INTRODUCTION

AMONG the Egyptians who wrote in Greek, Manetho the priest holds a unique place because of his comparatively early date (the third century B.C.) and the interest of his subject-matter—the history and religion of Ancient Egypt. His works in their original form would possess the highest importance and value for us now, if only we could recover them; but until the fortunate discovery of a papyrus,¹ which will transmit the authentic Manetho, we can know his writings only from fragmentary and often distorted quotations preserved chiefly by Josephus and by the Christian chronographers, Africanus and Eusebius, with isolated passages in Plutarch, Theophilus, Aelian, Porphyrius, Diogenes Laertius, Theodoretus, Lydus, Malalas, the Scholia to Plato, and the *Etymologicum Magnum*.

Like Bêrôssos, who is of slightly earlier date, Manetho testifies to the growth of an international

¹ F. Bilabel (in P. Baden 4. 1924, No. 59: see also *Die Kleine Historiker*, Fragm. 11) published a papyrus of the fifth century after Christ containing a list of Persian kings with the years of their reigns (see further Fr. 70, note 1), and holds it to be, not part of the original *Epitome*, but a version made from it before the time of Africanus. It certainly proves that Egyptians were interested in Greek versions of the Kings' Lists, and much more so, presumably, in the unabridged Manetho. See Fr. 2 for Panodôrus and Annianus, who were monks in Egypt about the date of this papyrus. Cf. also P. Hibeh, i. 27, the Calendar of Saïs, translated into Greek in the reign of Ptolemy Sôter, *i.e.* early in the lifetime of Manetho.

spirit in the Alexandrine age: each of these "barbarians" wrote in Greek an account of his native country; and it stirs the imagination to think of their endeavour to bridge the gulf and instruct all Greek-speaking people (that is to say the whole civilized world of their time) in the history of Egypt and Chaldaea. But these two writers stand alone: ¹ the Greeks indeed wrote from time to time of the wonders of Egypt (works no longer extant), but it was long before an Egyptian successor of Manetho appeared—Ptolemy of Mendês,² probably under Augustus.

The writings of Manetho, however, continued to

¹ Cf. W. W. Tarn on Ptolemy II. in the *Journal of Egyptian Archaeology*, 1928, xiv. p. 254: (Activity at Alexandria had no effect at all on Egyptians) "Ptolemy Sôter had thought for a moment that Egyptians might participate in the intellectual activities of Alexandria: . . . but, though Manetho dedicated his work to Ptolemy II., in this reign all interest in native Egypt was dropped, and a little later Alexandria appears as merely an object of hatred to many Egyptians. (Its destruction is prophesied in the Potter's Oracle.)" (See p. 123 n. 1.)

The complete isolation of Manetho and Bêrôssos is the chief argument of Ernest Havet against the authenticity of these writers (*Mémoire sur les écrits qui portent les noms de Bêrose et de Manéthon*, Paris, 1873). He regards the double tradition as curious and extraordinary—there is no other name to set beside these two Oriental priests; and he suspects the symmetry of the tradition—each wrote three books for a king. Cf. Croiset, *Histoire de la Littérature Grecque*, v. p. 99; *Abridged History of Greek Literature*, English translation, p. 429 (Manetho's works were probably written by a Hellenized Oriental at the end of the second century B.C.); and F. A. Wright, *Later Greek Literature*, p. 60.

INTRODUCTION

be read with interest ; and his *Egyptian History* was used for special purposes, e.g. by the Jews when they engaged in polemic against Egyptians in order to prove their extreme antiquity. (See further pp. xvi ff.) Manetho's religious writings are known to us mainly through references in Plutarch's treatise *On Isis and Osiris*.

The Life of Manetho : Traditions and Conjectures.

Our knowledge of Manetho is for the most part meagre and uncertain ; but three statements of great probability may be made. They concern his native place, his priesthood at Héliopolis, and his activity in the introduction of the cult of Serapis.

The name Manetho (*Μανεθώς*, often written *Μανεθων*) has been explained as meaning " Truth of Thôth ", and a certain priest under Dynasty XIX. is described as " First Priest of the Truth of Thôth ".¹ According to Dr. Černý² " Manetho " is from the Coptic *ⲙⲀⲛⲈⲒⲦⲐ* " groom " (*ⲙⲀⲛⲈ* " herdsman ", and *ⲒⲦⲐ* " horse "); but the word does not seem to occur elsewhere as a proper name. In regard to the date of Manetho, Syncellus in one passage³ gives us the information that he lived later than Bêrôssos : elsewhere⁴ he puts Manetho as " almost contemporary with Bêrôssos, or a little later ". Bêrôssos, who

was priest of Marduk at Babylon, lived under, and wrote for, Antiochus I. whose reign lasted from 285 to 261 B.C. ; and Bêrôssos dedicated his *Χαλδαϊκά* to this king after he became sole monarch in 281 B.C. The works of Manetho and Bêrôssos may be interpreted as an expression of the rivalry of the two kings, Ptolemy and Antiochus, each seeking to proclaim the great antiquity of his land.

Under the name of Manetho, Suidas seems to distinguish two writers : (1) Manetho of Mendês in Egypt, a chief priest who wrote on the making of *kyphi* (i.e. Fr. 87) : (2) Manetho of Diospolis or Sebennytus. (Works) : *A Treatise on Physical Doctrines* (i.e. Fr. 82, 83). *Apotelesmatica* (or *Astrological Influences*), in hexameter verses, and other astrological works. (See p. xiv, note 3.) No-where else is Manetho connected with Mendês ; but as Mendês was distant only about 17 miles from Sebennytus across the Damietta arm of the Nile, the attribution is not impossible. Müller suspects confusion with Ptolemy of Mendês, an Egyptian priest (probably in the time of Augustus), who, like Manetho, wrote a work on Egyptian Chronology in three books. In the second note of Suidas Diospolis may be identified, not with Diospolis Magna (the famous Thebes) nor with Diospolis Parva, but with Diospolis Inferior, in the Delta (now Tell el-Balamûn), the capital of the Diospolite or 17th nome¹ to the north of the Sebennyte nome and contiguous with

¹ The Greek word *νομός* means a division of Egypt, called in Ancient Egyptian *sp.t.*,—a district corresponding roughly to a county in England. Pliny (*Hist. Nat.* 5, 9) refers to nomes as *praefecturae oppidorum*.

INTRODUCTION

it. Diospolis Inferior lay near Damietta, some 30 miles from Sebennytus. (See Strabo, 17. 1, 19, and Baedeker, *Egypt and the Sûdân*, 8th ed. (1929), p. 185.) We may therefore accept the usual description of Manetho (Fr. 3, 77, 80: Syncellus, 72, 16), and hold that he was a native of Sebennytus (now Samannûd)¹ in the Delta, on the west bank of the Damietta branch of the Nile. Manetho was a priest, and doubtless held office at one time in the temple at Sebennytus; but in the letter (App. I.) which he is said to have written to Ptolemy II. Philadelphus, he describes himself as "high-priest and scribe of the sacred shrines of Egypt, born at Sebennytus and dwelling at Héliopolis". Although the letter, as we have it, is not genuine in all its details, this description may have been borrowed from a good source; and while his precise rank as a priest remains in doubt, it is reasonable to believe that Manetho rose to be high-priest in the temple at Héliopolis.² This eminent position agrees with the important part he played in the introduction of the cult of Serapis. As a Heliopolitan priest, Manetho (to quote from Laqueur, Pauly-Wissowa-Kroll, *R.-E.* xiv. 1, 1061) "was, without doubt, acquainted with

¹ See Baedeker⁸, p. 185. Sebennytus was the seat of Dynasty XXX., and therefore a place of great importance shortly before the time of Manetho. In Ancient Egyptian, Sebennytus is *Tjeb-nûter*, "city of the sacred calf": it is tempting to connect with Sebennytus the worship of the Golden Calf in *O.T. Exodus xxxii., 1 Kings xii. 28 ff.* (P. E. Newberry).

² See Strabo, 17. 1, 29 for the "large houses in which the priests had lived". According to Herodotus (ii. 3, 1), "the Heliopolitans are said to be the most learned of the Egyptians".

the sacred tree in the great Hall of Héliopolis,—the tree on which the goddess Seshat, the Lady of Letters, the Mistress of the Library, wrote down with her own hand the names and deeds of the rulers.¹ He did nothing more than communicate to the Greek world what the goddess had noted down.² But he did so with a full sense of the superiority which relied on the sacred records of the Egyptians in opposition to Herodotus whom he was contradicting” (Fr. 43, § 73 : Fr. 88). His native town, Sebennytus, was visited as a place of learning by Solon when Ethêmôn was a priest in residence there (see Proclus in *Plat. Tim.* i. 101, 22, Diehl); and the Greek culture of the place must have been a formative influence upon Manetho at an early age.

In the introduction of the statue of Serapis to Alexandria as described by Plutarch (Manetho, Fr. 80), Manetho the Egyptian was associated with the Greek Timotheus as a priestly adviser of King Ptolemy Sôter. It is natural to suppose that the cult of Serapis itself, which was a conflation of

¹ See Erman-Ranke, *Ägypten*, 1923, pp. 396 f.; or Erman, *Die Religion der Ägypter*, 1934, pp. 56 f.; or the original drawing in Lepsius, *Denkmäler*, iii. 169. This illustration shows the goddess, along with Thôth and Atûm, making inscriptions upon the leaves (or fruit) of the venerable tree.

² It may be added that the Egyptians are surpassed by no nation in their strong and ever-present desire to leave upon stone or papyrus permanent records of their history, their motive being to glorify the ruling king. Cf. Herodotus, ii. 77, 1 (of the Egyptians who live in the cultivated country), “the most diligent of all men in preserving the memory of the past, and far better skilled in chronicles than any others whom I have questioned”.

INTRODUCTION

Egyptian and Greck ideas intended to be acceptable to both nationalities, had already been organized¹ with the help of the two priests, and the magnificent temple in Rhakôtis, the Egyptian quarter in the west of Alexandria, had doubtless been built. The date is not certain : according to Jerome (Fotheringham, p. 211, Helm. p. 129) " Sarapis entered Alexandria " in 286 B.C., while the Armenian Version of the *Chronicle* of Eusebius says that in 278 B.C. " Sarapis came to Alexandria, and became resident there " (Karst, 200). Perhaps the two statements refer to different stages in the development of the cult : if the former describes the entry of the statue by Bryaxis, the latter may possibly refer to the final establishment of the whole theology. As a proof that the work of Manetho in building up the cult of Serapis must not be belittled, it may suffice to refer to the inscription of the name *Μαρέθων* on the base of a marble bust found in the ruins of the Temple of Serapis at Carthage (*Corpus Inscr. Lat.* viii. 1007). The name is so uncommon that the probability is that the bust which originally stood on this base represented the Egyptian Manetho, and was erected in his honour because of his effective contribution to the organization of the cult of

¹ The earliest date for Serapis is given by Macrobius, *Sat.* i. 20, 16, a questioning of Serapis by Nicocreon of Cyprus, c. 311-310 B.C. For Dittenberger, *O.G.I.S.* 16 (an inscription from Halicarnassus on the founding of a temple to Serapis-Isis under (the satrap) Ptolemy Sôter), the date is uncertain, probably c. 308-306 B.C. Already in Menander's drama, *Ἐγχειρίδιον* (before 291 B.C. when Menander died), Serapis is a " holy god " (P. Oxy. XV. 1803).

Serapis.¹ Hence it is not impossible also that the following reference in a papyrus of 241 B.C. may be to Manetho of Sebennytus. It occurs in a document containing correspondence about a Temple Seal (P. Hibeh, i. 72, vv. 6, 7, γράφειν Μανεθῶι). The person named was evidently a well-known man in priestly circles: he was probably our Manetho, the writer on Egyptian history and religion, if he lived to a considerable age.²

Manetho's Works.

Eight works³ have been attributed to Manetho: (1) *Αἰγυπτιακά*, or *The History of Egypt*, (2) *The Book of Sôthis*, (3) *The Sacred Book*, (4) *An Epitome of Physical Doctrines*, (5) *On Festivals*, (6) *On Ancient Ritual and Religion*, (7) *On the Making of Kyphi* [a kind of incense], (8) *Criticisms of Herodotus*.

Of these, (2) *The Book of Sôthis* (App. IV. and

¹ Cf. Lafaye, *Histoire du Culte des Divinités d'Alexandrie* (1884), p. 16 n. 1: "At all events, there is no doubt that the adepts of the Alexandrine cult had great veneration for Manetho, and considered him in some measure as their patriarch".

² Bouché-Leclercq (*Histoire des Lagides*, iv. p. 269 n. 4) holds a different opinion: "the reference is not necessarily to the celebrated Manetho, whose very existence is problematical".

³ A work wrongly attributed in antiquity (e.g. by Suidas, see p. x) to Manetho of Sebennytus is *Ἀποτελεσματικά*, in 6 books, an astrological poem in hexameters on the influence of the stars. See W. Kroll (*R.-E. s.v. Manethon* (2)), who with Köchly recognizes in the 6 books 4 sections of different dates from about A.D. 120 to the fourth century after Christ. Books I. and V. open with dedications to King Ptolemy: cf. Pseudo-Manetho, Appendix I.

INTRODUCTION

pp. xxvii. ff.) is certainly not by Manetho ; and there is no reason to believe that (8) *Criticisms of Herodotus* formed a separate work, although we know from Josephus. *C. Apion.* i. 73 (Fr. 42). that Manetho did convict Herodotus of error. Six titles remain, but it has long been thought that some of these are "ghost" titles. Fruin (*Manetho*, p. lxxvii) supposed that Manetho wrote only two works—one on Egyptian history, the other on Egyptian mythology and antiquities. Susemihl (*Alex. Lit.-Gesch.* i. 609, n. 431) and W. Otto (*Priester und Tempel in Hellenistischen Ägypten*, ii. 215, n. 4) modified this extreme view : they recognized three distinct works of Manetho (*The History of Egypt*, *The Sacred Book*, and *An Epitome of Physical Doctrines*), and assumed that the titles *On Festivals*, *On Ancient Ritual and Religion*, and *On the Making of Kyphi* referred to passages in *The Sacred Book*. In the paucity of our data, no definite judgment seems possible as to whether Manetho wrote six works or only three ; but in support of the former theory we may refer to Eusebius (Man. Fr. 76).

The History of Egypt.

The *Egyptian History*¹ of Manetho is preserved in extracts of two kinds. (1) Excerpts from the original work are preserved by Josephus, along with other passages which can only be pseudo-

Manethonian. The Jews of the three centuries following the time of Manetho were naturally keenly interested in his *History* because of the connexion of their ancestors with Egypt—Abraham, Joseph, and Moses the leader of the Exodus; and they sought to base their theories of the origin and antiquity of the Jews securely upon the authentic traditions of Egypt. In Manetho indeed they found an unwelcome statement of the descent of the Jews from lepers; but they were able to identify their ancestors with the Hyksôs, and the Exodus with the expulsion of these invaders. The efforts of Jewish apologists account for much re-handling, enlargement, and corruption of Manetho's text, and the result may be seen in the treatise of Josephus, *Contra Apionem*, i.

(2) An *Epitome* of Manetho's history had been made at an early date,—not by Manetho himself, there is reason to believe,—in the form of Lists of Dynasties with short notes on outstanding kings or important events. The remains of this *Epitome* are preserved by Christian chronographers, especially by Africanus and Eusebius. Their aim was to compare the chronologies of the Oriental nations with the Bible, and for this purpose the *Epitome* gave an ideal conspectus of the whole *History*, omitting, as it does, narratives such as the account of the Hyksôs preserved by Josephus. Of the two chronographers, the founder of Christian chronography, Sextus Julius Africanus, whose *Chronicle*¹ came down to

¹ For a later miscellaneous work, the *Κεχροί*, see P. Oxy. iii. 412 (between A.D. 225 and 265); and Jules African, *Fragments des Cestes*, ed. J.-R. Vieillefond, Paris, 1932.

INTRODUCTION

A.D. 217 or A.D. 221, transmits the *Epitome* in a more accurate form; while Eusebius, whose work extends to A.D. 326, is responsible for unwarranted alterations of the original text of Manetho. About A.D. 800 George the Monk, who is known as Syncellus from his religious office (as "attendant" of Tarasius, Patriarch of Constantinople), made use of Manetho's work in various forms in his *Ἐκλογὴ Χρονογραφίας*, a history of the world from Adam to Diocletian. Syncellus sought to prove that the incarnation took place in Anno Mundi 5500; and in his survey of the thirty-one Egyptian dynasties which reigned from the Flood to Darius, he relied on the authoritative work of Manetho as transmitted by Africanus and Eusebius, and as handed down in a corrupt form in the *Old Chronicle* (App. III.) and the *Book of Sôthis* (App. IV.) which had been used by the chronographer Panodôrus (c. A.D. 400).

Even from the above brief statement of the transmission of Manetho's text, it will be seen that many problems are involved, and that it is extremely difficult to reach certainty in regard to what is authentic Manetho and what is spurious or corrupt. The problems are discussed in detail by Richard Laqueur in his valuable and exhaustive article in Pauly-Wissowa-Kroll, *R.-E. s.v. Manethon*; and it may be sufficient here to quote his summary of the results of his researches in regard to Manetho (1) in Josephus, and (2) in the Christian Chronographers.

(1) Manetho in Josephus, *Contra Apionem*, i. (see Fr. 42, 50, 54.)

"(a) Extracts from the genuine Manetho appear in §§ 75-82, 84-90, 94-102a, 232-249, 251. Of these

MANETHO

passages, §§ 75-82, 94-102*a*, 237-249 are quoted *verbatim*, the others are given in Indirect Speech.

“(b) A rationalistic critique of the genuine Manetho was written by a Hellenist, and was used by Josephus for his work. The remains of this critique appear in §§ 254-261, 267-269, 271-274, 276-277. Perhaps §§ 102*b*-103 is connected with these.

“(c) The authoritative work of Manetho was further exploited by Jews and Egyptians in their mutual polemic, in the course of which additions to Manetho’s works were made: these additions were partly favourable to the Jews (§§ 83, 91), partly hostile to the Jews (§ 250). These passages, like those mentioned in (b), were collected before the time of Josephus into a single treatise, so that one could no longer clearly recognize what had belonged to Manetho and what was based upon additions.

“(d) Josephus originally knew only the genuine Manetho (*cf.* (a)), and used him throughout as a witness against the aggressors of Judaism. In this it was of importance for Josephus to show that the Hyksôs had come to Egypt from abroad, that their expulsion took place long before the beginning of Greek history, and that they, in their expedition to aid the Lepers, remained untainted by them.

“(e) After Josephus had completed this elaboration, he came later to know the material mentioned in (b) and (c): so far as it was favourable to the Jews or helpful in interpretation, it led only to short expansions of the older presentation; so far, however, as it was hostile to the Jews, Josephus found himself induced to make a radical change in his attitude towards Manetho. He attacked Manetho

xviii

INTRODUCTION

sharply for his alleged statement (§ 250), and at the same time used the polemic mentioned in (b) in order to overthrow Manetho's authority in general.

“(f) From the facts adduced it follows that Manetho's work was already before the time of Josephus the object of numerous literary analyses.”¹

Cf. the following summary.

(2) Manetho in the Christian Chronographers.

“(a) Not long after the appearance of Manetho's work, an *Epitome* was made, giving excerpts from the Dynasty-Lists and increasing these from 30 to 31. The possibility that other additions were made is not excluded.

“(b) The *Epitome* was remodelled by a Hellenistic Jew in such a way that the Jewish chronology became compatible with that of Manetho.

“(c) A descendant of version (a) is extant in Julius Africanus: a descendant of version (b), in Eusebius.”

The *Chronicle* of Africanus in five books is lost except for what is preserved in the extracts made by Eusebius, and the many fragments contained in the works of Syncellus and Cedrenus, and in the *Paschale Chronicon*. For Eusebius we have several lines of transmission. The Greek text of Eusebius has come down to us in part, as quoted by Syncellus; but the whole work is known through (1) the Armenian Version, which was composed in v./A.D.²

¹ A further study of the transmission of Manetho in Josephus is made by A. Momigliano, “Intorno al Contro Apione,” in *Rivista di Filologia*, 59 (1931), pp. 485-503.

² The Armenian MS. G (Codex Hierosolymitanus) printed by Aucher (1818) is dated by him between A.D.

from a revision of the first Greek text,¹ and is, of course, quite independent of Syncellus; and (2) the Latin Version made by Jerome towards the end of the fourth century.

Possible Sources of the Αἴγυπτιακά.

An Egyptian high priest, learned in Greek literature, had an unrivalled opportunity, in early Ptolemaic times, of writing an excellent and accurate history of Egypt. He had open access to records of all kinds—papyri² in the temple archives (annals, sacred books containing liturgies and poems), hieroglyphic tablets, wall sculptures, and innumerable inscriptions.³ These records no one but an Egyptian priest could consult and read; and only a scholar who had assimilated the works of Greek historians could make a judicious and scientific use of the abundant material. It is hardly to be expected,

1065 and 1306. Karst quotes readings from this and two other Armenian MSS., but the variations are comparatively unimportant.

¹ See A. Puech, *Hist. de la Litt. grecque chrétienne*, iii. p. 177.

² Herodotus (ii. 100: cf. 142) mentions a papyrus roll (βύβλος) containing a list of 331 kings. Diodorus (i. 44, 4) tells of "records (ἀναγραφαί) handed down in the sacred books" (ἐν ταῖς ἱεραῖς βίβλοις), giving each king's stature, character, and deeds, as well as the length of his reign.

³ Cf. the Annals of the Reign of Tuthmôsis III. (Breasted, *Ancient Records*, ii. §§ 391-540): this important historical document of 223 lines is inscribed on the walls of a corridor in the Temple of Amon at Karnak, and "demonstrates the injustice of the criticism that the Egyptians were incapable of giving a clear and succinct account of a military campaign".

INTRODUCTION

however, that Manetho's *History* should possess more worth than that of his sources ; and the material at his disposal included a certain proportion of un-historical traditions and popular legends.¹

There is no possibility of identifying the particular records from which Manetho compiled his *History* : the following are the kinds of monuments which he may have consulted and from which we derive a means of controlling his statements.

(1) *The Royal List of Abydos*, on the wall of a corridor of the Temple of Sethôs I. at Abydos, gives in chronological order a series of seventy-six kings from Mênês to Sethôs I. Dynasties XIII. to XVII. are lacking. A mutilated duplicate of this list was found in the Temple of Ramessês II. at Abydos (now in the British Museum : see *Guide*, p. 245) : it arranges the kings in three rows, while the more complete list has them in two rows.

(2) *The Royal List of Karnak* (now in the Louvre) has a list of kings, originally sixty-one, from Mênês down to Tuthmôsis III., Dynasty XVIII., with many names belonging to the Second Intermediate Period (Dynasties XIII.-XVII.).

The Royal Lists of Abydos and Karnak give the tradition of Upper Egypt.

(3) *The Royal List of Sakkâra* (found in a tomb at Sakkâra, and now in the Cairo Museum) preserves the cartouches of forty-seven (originally fifty-eight) kings previous to, and including, Ramessês II. It begins with Miebis, the sixth king of Dynasty I. ; and like

MANETHO

the *Royal List of Abydos*, it omits Dynasties XIII.-XVII. Like (4) the *Turin Papyrus*, the *Royal List of Sakkâra* gives the tradition of Lower Egypt.

(4) More important than any of the preceding is the *Turin Papyrus*, written in hieratic on the *verso* of the papyrus, with accounts of the time of Ramessês II. on the *recto* (which gives the approximate date, c. 1200 B.C.). In its original state the papyrus must have been an artistically beautiful exemplar, as the script is an exceptionally fine one. It contains the names of kings in order, over 300 when complete, with the length of each reign in years, months, and days; and as the definitive edition of the papyrus has not yet been issued, further study is expected to yield additional results.¹ The papyrus begins, like Manetho, with the dynasties of gods, followed by mortal kings also in dynasties. The change of dynasty is noted, and the sum of the reigns is given: also, as in Manetho, several dynasties are added together, e.g. "Sum of the Kings from Mênês to [Unas]" at the end of Dynasty V. The arrangement in the papyrus is very similar to that in the *Epitome* of Manetho.

(5) *The Palermo Stone*² takes us back to a much greater antiquity: it dates from the Fifth Dynasty, c. 2600 B.C., and therefore contains Old Egyptian annals of the kings. The Stone or Stele was origin-

ally a large slab¹ of black diorite, about 7 feet long and over 2 feet high; but only a fragment of the middle of the slab is preserved in the Museum of Palermo, while smaller pieces of this, or of a similar monument, have been identified in the Cairo Museum and in University College, London. Although the text is unfortunately fragmentary, this early document is clearly seen to be more closely related to the genuine Manetho than are the Kings' Lists of later date (1, 2, 3, 4 above).² In a space marked off on each side by a year-sign and therefore denoting one year, notable events are given in an upper section of the space and records of the Nile-levels in a lower. A change of reign is denoted by a vertical line prolonging the year-sign above, on each side of which a certain number of months and days is recorded—on one side those belonging to the deceased king, and on the other to his successor. In the earliest Dynasties the years were not numbered, but were named after some important event or events, e.g. "the year of the smiting of the 'Inu," "the year of the sixth time of numbering". Religious and military events were particularly common, just as they are in Manetho. A year-name of King Snefru (Dynasty IV.) states that he conquered the Nehesi, and captured 7000 prisoners and 200,000 head of cattle: cf. Manetho, Fr. 7, on the foreign expedition of Ménês. So, too, under

¹ More plausibly, according to Petrie (*The Making of Egypt*, 1939, p. 98), the text of the annals was divided among six slabs each 16 inches wide, both sides being equally visible.

² Borchardt, in *Die Annalen* (1917), quoted in *Ancient Egypt*, 1920, p. 124, says, "Manetho had really good sources, and his copyists have not altogether spoiled him".

Shepseskaf, the last king of Dynasty IV., the building of a pyramid is recorded, and under Dynasties I., IV., and VI. Manetho makes mention of pyramid-building. It is especially noteworthy that the first line of the Palermo Stone gives a list of kings before Mênês : *cf.* the *Turin Papyrus*, as quoted on Fr. 1. (For the Cairo fragments see Sethe, *op. cit.*)

In regard to Manetho's relation to his Greek predecessors in the field of Egyptian history, we know that he criticized Herodotus, not, as far as we can tell, in a separate work, but merely in passages of his *History*. In none of the extant fragments does Manetho mention by name Hecataeus of Abdera, but it is interesting to speculate upon Manetho's relation to this Greek historian. The *floruit* of Hecataeus fell in the time of Alexander and Ptolemy son of Lagus (Gutschmid gives 320 B.C. as an approximate estimate); and it is very doubtful whether he lived to see the reign of Philadelphus, who came to the throne in 285 B.C. (Jacoby in *R.-E.* vii. 2, 2750). His *Aegyptiaca* was "a philosophical romance," describing "an ethnographical Utopia": it was no history of Egypt, but a work with a philosophical tendency. Manetho and Hecataeus are quoted together, *e.g.* by Plutarch, *Isis and Osiris*, chap. 9, perhaps from an intermediary writer who used the works of both Manetho and Hecataeus. If we assume that Hecataeus wrote his "romance" before Manetho composed his *History*, perhaps one of the purposes of Manetho was to correct the errors of his predecessor. No

INTRODUCTION

criticism of Hecataeus, however, has been attributed to Manetho; and it is natural that similarities are found in their accounts (*cf.* p. 131, n. 2). Be that as it may, Hecataeus enjoyed greater popularity among the Greeks than Manetho: they preferred his "romance" to Manetho's more reliable annals. Yet Manetho's *Aegyptiaca* has no claim to be regarded as a critical history: its value lies in the dynastic skeletons which serve as a framework for the evidence of the monuments, and it has provided in its essentials the accepted scheme of Egyptian chronology.¹ But there were many errors in Manetho's work from the very beginning: all are not due to the perversions of scribes and revisers. Many of the lengths of reigns have been found impossible: in some cases the names and the sequence of kings as given by Manetho have proved untenable in the light of monumental evidence. If one may depend upon the extracts preserved in Josephus, Manetho's work was not an authentic history of Egypt, exact in its details, as the *Chaldaïca* of Bêrôssos was, at least for later times. Manetho introduced into an already corrupted series of dynastic lists a number of popular traditions written

¹ *Cf.* H. R. Hall, *Cambridge Ancient History*, i. p. 260: "So far as we are able to check Manetho from the contemporary monuments, his division into dynasties is entirely justified. His authorities evidently were good. But unhappily his work has come down to us only in copies of copies; and, although the framework of the dynasties remains, most of his royal names, originally Graecized, have been so mutilated by non-Egyptian scribes, who did not understand their form, as often to be unrecognizable, and the regnal years given by him have been so corrupted as to be of little value unless confirmed by the Turin Papyrus or the monuments."

in the characteristic Egyptian style. No genuine historical sense had been developed among the Egyptians, although Manetho's work does illustrate the influence of Greek culture upon an Egyptian priest. He wrote to correct the errors of Greek historians, especially of Herodotus (see Fr. 88); but from the paucity of information about certain periods, it seems clear that in ancient times, as for us at the present day, there were obscure eras in Egyptian history.¹ Before the Saïte Dynasty (XXVI.) there were three outstanding periods—in Dynasties IV.-VI., XI.-XII., and XVIII.-XX., or roughly the Old Kingdom, the Middle Kingdom, and the New Kingdom (sometimes called the Empire); and these are the periods upon which the light falls in all histories.

The significance of Manetho's writings is that for the first time an Egyptian was seeking to instruct foreigners in the history and religion of his native land.

Other Works attributed to Manetho.

To judge by the frequency of quotation, the religious treatises of Manetho were much more popular in Greek circles than the *History of Egypt* was; yet the fragments surviving from these works (Fr. 76-88) are so meagre that no distinct impression of their nature can be gained. The *Sacred Book* (Fr. 76-81)

¹ Cf. H. R. Hall, *Ancient History of the Near East* ⁸, p. 14: "In fact, Manetho did what he could: where the native annals were good and complete, his abstract is good: where they were broken and incomplete, his record is incomplete also and confused. . . ."

INTRODUCTION

was doubtless a valuable exposition of the details of Egyptian religion, as well as of the mythological elements of Egyptian theology. It testifies to the importance of the part played by Manetho in support of Ptolemy Sôter's vigorous policy of religious syncretism. It seems probable that the *Sacred Book* was Manetho's main contribution in aid of this policy: it may have been the result of a definite commission by the king, in order to spread a knowledge of Egyptian religion among the Greeks. That an Egyptian priest should seek to instruct the Greek-speaking world of his time in the history of Egypt and in the religious beliefs of the Egyptians, including festivals, ancient rites and piety in general, and the preparation of *kyphi*, is not at all surprising; but it seems strange that Manetho should feel called upon, in the third century B.C., to compose an *Epitome of Physical Doctrines* (Fr. 82, 83) with the apparent object of familiarizing the Greeks with Egyptian science. One may conjecture that his special purpose was to give instruction to students of his own.

The Book of Sôthis (Appendix IV.).

*The Book of Sôthis*¹ or *The Sôthic Cycle* is transmitted through Syncellus alone. In the opinion of Syncellus, this *Sôthis-Book* was dedicated by Manetho

¹ Sôthis is the Greek form of *Sopdet*, the Egyptian name for the Dog-star, Sirius, the heliacal rising of which was noted at an early date: on the great importance of the Sôthic period in Egyptian chronology, see Breasted, *Ancient Records*, i. §§ 40 ff., and H. R. Hall, *Encyclopaedia Britannica*¹¹, s.v. Chronology. Cf. *infra*, Appendix III., p. 226, and Appendix IV., p. 234.

to Ptolemy Philadelphus (see App. I.). The king wished to learn the future of the universe, and Manetho accordingly sent to him "sacred books" based upon inscriptions which had been written down by Thôth, the first Hermês, in hieratic script, had been interpreted after the Flood by Agathodaemôn, son of the second Hermês and father of Tat, and had been deposited in the sanctuaries of the temples of Egypt. The letter which purports to have accompanied the "sacred books" is undoubtedly a forgery; but the *Sôthis-Book* is significant for the textual transmission of Manetho. According to the LXX the Flood took place in Anno Mundi 2242 (see Frags. 2, 6: App. III., p. 232). This date must close the prehistoric period in Egypt and in Chaldea: the 11,985 years of the Egyptian gods are therefore regarded as months and reduced to 969 years. Similarly, the 858 years of the demigods are treated as quarter-years or periods of three months, thus becoming $214\frac{1}{2}$ years: total, $969 + 214\frac{1}{2} = 1183\frac{1}{2}$ years (Fr. 2). In Chaldean prehistory, by fixing the saros at 3600 days, 120 saroi become 1183 years $6\frac{5}{6}$ months. Accordingly, the beginning of Egyptian and Babylonian history is placed at 2242 — 1184, or 1058 Anno Mundi: in that year (or in 1000, Fr. 2) falls the coming of the Egregori, who finally by their sins brought on the Flood. The *Book of Sôthis* begins with the reign of Mestraïm, Anno Mundi 2776 (App. IV., p. 234: App. III., p. 232), i.e. 534 years after the Flood, and continues to the year 4986, which gives 2210 years of Egyptian rule—almost the same number as Manetho has in either Book I. or Book II. of his *History of Egypt*.

NOTE

THE editor wishes to acknowledge with gratitude the valuable help ungrudgingly given to him in all Egyptological matters by Professor Percy E. Newberry (Liverpool and Cairo) and by Professor Battiscombe Gunn (Oxford); but neither of these Egyptologists must be held responsible for the final form in which their contributions appear, except where their names or initials are appended. Thanks are also due to Professor D. S. Margoliouth (Oxford), who very kindly revised the Latin translation of the Armenian Version of Eusebius, *Chronica*, by comparing it with the original Armenian as given in Aucher's edition: the footnotes show how much the text here printed has benefited from his revision.

In a work which brings before the mind's eye a long series of Kings of Egypt, the editor would have liked to refer interested readers to some book containing a collection of portraits of these kings; but it seems that, in spite of the convenience and interest which such a book would possess, no complete series of royal portraits has yet been published.¹ For a certain number of portrait-sketches (25 in all), skilfully created from existing mummies and ancient representations, see Winifred Brunton, *Kings and Queens of Ancient Egypt* (1924), and *Great Ones of Ancient Egypt* (1929).

p. 93 (Mai).

Ex Aegyptiacis Manethonis monumentis, qui in tres libros historiam suam tribuit,—de diis et de heroibus, de manibus et de mortalibus regibus qui Aegypto praefuerunt usque ad regem Persarum Darium.

¹ Cf. Joannes Lydus, *De Mensibus*, iv. 86 (Wünsch). On *Maius*, after speaking of Hephaestus, Lydus adds: κατὰ δὲ ἱστορίαν Μανέθων Αἰγυπτιακῶν ὑπομνημάτων ἐν τόμῳ τρίτῳ φησὶν, ὅτι πρῶτος ἀνθρώπων * παρ' Αἰγυπτίους ἐβασίλευσεν Ἡφαίστος ὁ καὶ εὐρέτης τοῦ πυρὸς αὐτοῖς γενόμενος· ἐξ οὗ Ἡλιος, οὗ Κρόνος, μεθ' ὃν Ὅσιρις, ἔπειτα Τυφῶν, ἀδελφὸς Ὅσιρεως. From this passage we see that Lydus gives the sequence "Hêphaestus, Hêlios (the Sun), Cronos, Osiris, Typhôn," omitting Sôsis as Eusebius does. After this passage in Lydus comes Fr. 84 Ἰστέον δὲ . . .

THE *AEGYPTIACA* OF MANETHO: MANETHO'S *HISTORY OF EGYPT*

BOOK I.

FR. 1 (*from the Armenian Version of Eusebius, Chronica*). DYNASTIES OF GODS, DEMIGODS, AND SPIRITS OF THE DEAD.

FROM the *Egyptian History* of Manetho, who composed his account in three books. These deal with the Gods, the Demigods, the Spirits of the Dead, and the mortal kings who ruled Egypt down to Darius, king of the Persians.

1. The first man (or god) in Egypt is Hephaestus,¹ who is also renowned among the Egyptians as the discoverer of fire. His son, Helios (the Sun), was succeeded by Sôsis: then follow, in turn, Cronos,

¹ The Pre-dynastic Period begins with a group of gods, "consisting of the Great Ennead of Heliopolis in the form in which it was worshipped at Memphis" (T. E. Peet, *Cambridge Ancient History*, i. p. 250). After summarizing §§ 1-3 Peet adds: "From the historical point of view there is little to be made of this". See Meyer, *Geschichte des Altertums* ⁵, I. ii. p. 102 f. for the Egyptian traditions of the Pre-dynastic Period. In the Turin Papyrus the Gods are given in the same order: (Ptah), Rê, (Shu), Geb, Osiris, Sêth (200 years), Horus (300 years), Thoth (3126 years), Ma'at, Har, . . . Total See Meyer, *Aeg. Chron.* p. 116, and cf. Fr. 3.

Osiris; exin Osiridis frater Typhon; ad extremum Orus, Osiridis et Isidis filius. Hi primi inter Aegyptios rerum potiti sunt. Deinceps continuata successione delapsa est regia auctoritas usque ad Bydin (Bitem) per annorum tredecim milia ac nongentos. Lunarem tamen annum intelligo, videlicet xxx diebus constantem: quem enim nunc mensem dicimus, Aegyptii olim anni nomine indigitabant.

2. Post deos regnarunt heroes annis MCCLV: rursusque alii reges dominati sunt annis MDCCCXVII: tum alii triginta reges Memphitae annis MDCCXC: deinde alii Thinitae decem reges annis CCCL.

3. Secuta est manium heroumque dominatio annis MMMMMDCCCXIII.

4. Summa temporis in mille et myriadem¹ consurgit annorum, qui tamen lunares, nempe menstrui,

¹ Müller: mille myriadas Mai.

¹ The name Bydis (or Bites) seems to be the Egyptian *bity* "king" (from *bit* "bee"), the title of the kings of Lower Egypt: see the Palermo Stone, and cf. Herodotus, iv. 155, "the Libyans call their king 'Battos'" (P. E. Newberry). Bitys appears in late times as a translator or interpreter of Hermetical writings: see Iamblich. *De Mysteriis*, viii. 5 (= Scott, *Hermetica*, iv. p. 34) where the prophet Bitys is said to have translated [for King Ammôn] a book (*The Way to Higher Things*, i.e. a treatise on the theurgic or supernatural means of attaining to union with the Demiurgus) which he found inscribed in hieroglyphs in a shrine at Saïs in Egypt. Cf. the pseudo-Manetho, App. I.

² There is no evidence that the Egyptian year was ever equal to a month: there were short years (each of 360 days) and long years (see Fr. 49).

³ See *Excerpta Latina Barbari* (Fr. 4) for the beginning of this dynasty: "First, Anubis . . .".

Osiris, Typhon, brother of Osiris, and lastly Orus, son of Osiris and Isis. These were the first to hold sway in Egypt. Thereafter, the kingship passed from one to another in unbroken succession down to Bydis (Bites)¹ through 13,900 years. The year I take, however, to be a lunar one, consisting, that is, of 30 days: what we now call a month the Egyptians used formerly to style a year.²

2. After the Gods, Demigods reigned for 1255 years,³ and again another line of kings held sway for 1817 years: then came thirty more kings of Memphis,⁴ reigning for 1790 years; and then again ten kings of This, reigning for 350 years.

3. There followed the rule of Spirits of the Dead and Demigods,⁵ for 5813 years.

4. The total [of the last five groups] amounts to 11,000 years,⁶ these however being lunar periods, or

¹ Corroborated by the Turin Papyrus, Col. ii.: "of Memphis".

² "Demigods" should be in apposition to "Spirits of the Dead" (*νέκρες ἡμίθεοι*), as in *Excerpta Latina Barbari* (Fr. 4) and Africanus (Fr. 6. 1). These are perhaps the *Shemsu Hor*, the Followers or Worshippers of Horus, of the Turin Papyrus: see H. R. Hall, *Cambridge Ancient History*, i. p. 265. Before King Mênês (Fr. 6), the king of Upper Egypt who imposed his sway upon the fertile Delta and founded the First Dynasty,—the *Shemsu Hor*, the men of the Falcon Clan whose original home was in the West Delta, had formed an earlier united kingdom by conquering Upper Egypt: see V. Gordon Childe, *New Light on the Most Ancient East*, 1934, p. 8, based upon Breasted, *Bull. Instit. Franç. Arch. Or.* xxx. (Cairo, 1930), pp. 710 ff., and Schäfer's criticism, *Orient. Literaturz.* 1932, p. 704.

³ The exact total of the items given is 11,025 years. So also 24,900 *infra* is a round number for 24,925.

Namque Aegyptus ab Hebraeis Mestraïmus appellatur: Mestraïmus autem (haud²) multo post diluvium tempore exstitit. Quippe ex Chamo, Noachi filio, post diluvium ortus est Aegyptus sive Mestraïmus, qui primus ad Aegypti incolatum profectus est, qua tempestate gentes hac illac spargi coeperunt. Erat autem summa temporis ab Adamo ad diluvium secundum Hebraeos annorum MMCCXLII.

³ Petermann's version of the first sentence of this section runs as follows: Itaque placet (licet) Egiptiis, priscis (primis) temporibus quae praecesserunt diluvium, se iactare ob antiquitatem. Deos quosdam fuisse dicunt suos, semideosque et manes. In menses redactis annis apud Hebraeos enarratis, lunarium annorum myriades duas et amplius etiam computant (computarunt), ita ut tot fere menses fiant, quot anni apud Hebraeos comprehenduntur; scilicet (id est) a protoplasto homine usque ad Mezrajim tempora nostra computando ("And so, for the early times which preceded the Flood, the Egyptians may well boast of their antiquity. They say that certain Gods were theirs, as well as Demigods and Spirits of the Dead. Having reduced to

5. Now, if you care to compare these figures with Hebrew chronology, you will find that they are in perfect harmony. Egypt is called Mestraïm² by the Hebrews; and Mestraïm lived <not> long after the Flood. For after the Flood, Cham (or Ham), son of Noah, begat Aegyptus or Mestraïm, who was the first to set out to establish himself in Egypt, at the time when the tribes began to disperse this way and that. Now the whole time from Adam to the Flood was, according to the Hebrews, 2242 years.

Mestraim was indeed the founder of the Egyptian race; and from him the first Egyptian dynasty must be held to spring.

7. But if the number of years is still in excess, it must be supposed that perhaps several Egyptian kings ruled at one and the same time; for they say that the rulers were kings of This, of Memphis, of Saïs, of Ethiopia, and of other places at the same time. It seems, moreover, that different kings held sway in different regions, and that each dynasty was confined to its own nome: thus it was not a succession of kings occupying the throne one after the other, but several kings reigning at the same time in different regions.¹ Hence arose the great total number of years. But let us leave this question and take up in detail the chronology of Egyptian history.

(Continued in Fr. 7(b).)

p. 39) says: "The Manethonian Dynasties are not lists of rulers over all Egypt, but lists partly of more or less independent princes, partly of princely lines from which later sprang rulers over all Egypt. (*Cf.* the Scottish Stuarts, or the Electors of Hanover.) Some were mere Mayors of the Palace or princelets maintaining a precarious independence, or even more subordinate Governors of nomes, from whom, however, descended subsequent monarchs. Thereafter¹ Manetho tells also of five Egyptian tribes which formed thirty dynasties, comprising those whom they call Gods, Demigods, Spirits of the Dead, and mortal men. Of these Eusebius, "son" of Pamphilus, gives the following account in his *Chronica*: "Concerning Gods, Demigods, Spirits of the Dead, and mortal kings, the Egyptians have a long series of foolish myths. The most ancient Egyptian kings, indeed, alleged that their years were lunar years consisting of thirty days, whereas the Demigods who succeeded them gave the name *hóroi* to years which were three months long." So Eusebius wrote with good reason, criticizing the Egyptians for their foolish talk; and in my opinion Panodôrus² is wrong in finding fault with Eusebius here, on the ground that Eusebius failed to explain the meaning of the historians, while Panodôrus thinks he himself succeeds by a somewhat novel method, as follows:

"From the creation of Adam, indeed, down to Enoch, *i.e.* to the general cosmic year 1282, the number of days was known in neither month nor year; but the Egregori (or 'Watchers'),³ who had

descended to earth in the general cosmic year 1000, held converse with men, and taught them that the orbits of the two luminaries, being marked by the twelve signs of the Zodiac, are composed of 360 parts. Observing the moon's orbit which is nearer the earth, smaller, and more conspicuous, as it has a period of thirty days, men decided that it should be reckoned as a year, since the orbit of the sun also was filled by the same twelve signs of the Zodiac with an equal number of parts, 360. So it came to pass that the reigns of the Gods who ruled among them for six generations in six dynasties were reckoned in years each consisting of a lunar cycle of thirty days. The total in lunar years is 11,985, or 969 solar years. By adding these to the 1058¹ solar years of the period before their reign, they reach the sum total of 2027 years." Similarly, in the two dynasties of nine Demigods,—these being regarded as real, although they never existed,—Panodôrus strives to make up 214½ years out of 858 *hóroi* (periods of three months) or *tropoi*, so that with the 969 years they make, he says, 1183½, and these, when added to the 1058 years from the time of Adam to the reign of the Gods, complete a total of 2242 years down to the Flood.

Thus Panodôrus exerts himself to show that the Egyptian writings against God and against our divinely inspired Scriptures are really in agreement with them. In this he criticizes Eusebius, not understanding that these arguments of his, which are incapable of proof or of reasoning, have been proved

On the Antiquity of Egypt.

Manetho of Sebennytus, chief priest of the accursed temples of Egypt, who lived later than Bêrôssos in the time of Ptolemy Philadelphus, writes to this Ptolemy, with the same utterance of lies as Bêrôssos, concerning six dynasties or six gods who never existed: these, he says, reigned for 11,985 years. The first of them, the god Hêphaestus, was king for 9000 years. Now some of our historians, reckoning these 9000 years as so many lunar months, and dividing the number of days in these 9000 lunar months by the 365 days in a year, find a total of $727\frac{3}{4}$ years. They imagine that they have attained a striking result, but one must rather say that it is a ludicrous falsehood which they have tried to pit against Truth.

The First Dynasty of Egypt.

1. Hêphaestus reigned for $727\frac{3}{4}$ years.
2. Hêlios (the Sun), son of Hêphaestus, for $80\frac{1}{8}$ years.
3. Agathodaemôn, for $56\frac{1}{2}$ years.

In the kingdom of Egypt we have the oldest of all kingdoms, and we are minded to record its beginning, as it is given by Manetho. First, I shall put down as follows the reigns of the Gods, as recorded by the Egyptians. Some say that the god Hêphaestus reigned in Egypt for 680 years: after him, Sol [Hêlios, the Sun], son of Hêphaestus, for 77

*This extract made by an anonymous and ignorant scribe depends chiefly upon Africanus. See Weill, *La fin du moyen empire égyptien*, pp. 640, 642 f., 655 f. Gelzer and Bauer have inferred that the Greek account translated by Barbarus was either the work of the Egyptian monk Annianus (see Fr. 2, p. 11 n. 2) or at least a source derived from him (Laqueur, *R.-E.* xiv. 1, 1081).

This note was, for some reason, transferred from its original place between Potestas XVI. and XVII. See Unger, *Manetho*, pp. 163 f. This mangled sentence, as interpreted by Unger, Gelzer, and Frick, attests the value of the tradition preserved by Barbarus.

years : next, Sosinosiris [Sôsis and Osiris], for 320 years : then Orus the Ruler, for 28 years ; and after him, Typhon, for 45 years. Total for the reigns of the Gods, 1550 years.¹

Next come the reigns of the Demigods, as follows : first, Anubes² for 83 years ; then after him, Amusis, some say, was king. About him, Apiôn the grammarian,³ who composed a history of Egypt, explained that he lived in the time of Inachus⁴ who was king at the founding of Argos . . . for 67 years.⁵

¹ Apiôn the grammarian, born in Upper Egypt, lived at Rome in the time of Tiberius, Gaius, and Claudius : Tiberius called him by the nickname of "cymbalum mundi". As leader of the anti-Jewish movement, Apiôn was later attacked by Josephus in his *Contra Apionem*.

The quotation from Apiôn appears to derive in part from the *History* of Ptolemy of Mendês : see Tatian, *Or. adversus Graecos*, § 38, in Migne, *Patrologia Graeca*, vi. 880-882, and in Müller, *F.H.G.* iv. p. 485 (quoted in *F.H.G.* ii. p. 533). (Ptolemy of Mendês dated the Exodus to the reign of Amôsis, who was contemporary with Inachus. Apiôn in the fourth volume of his *Aegyptiaca* (in five volumes) stated that Auaris was destroyed by Amôsis.) Much matter must have been common to the works of Ptolemy of Mendês and Apiôn : cf. Africanus in Eusebius, *Praepar. Evang.* x. 10, "Apiôn says that in the time of Inachus Moses led out the Jews". Cf. Fr. 52, 1 ; 53, 9.

⁴ The founder of the First Dynasty of kings of Argos, Inachus is said to have died twenty generations before the Fall of Troy, *i.e. circa* 1850 B.C. Aegyptus and Danaus were fifth in descent from Inachus : cf. Fr. 50, § 102.

⁵ This appears to be the length of the reign of Amôsis, not of Inachus. Cf. Fr. 52, 1, where Africanus as recorded by Syncellus omits the number of years.

[After recording the reigns of Hêphaestus (1680 days), Hélios (4477² days), Sôsis, Osiris, Hôrus, and Thulis, Malalas adds:]

These ancient reigns of early Egyptian kings are recorded by Manetho, and in his writings it is stated that the names of the five planets are given in other forms: Cronos [Saturn] they used to call the shining star; Zeus [Jupiter], the radiant star [Phaethôn]; Arês [Mars], the fiery star; Aphroditê [Venus], the fairest; Hermês [Mercury], the glittering star. These names were later explained by the wise Sôtatês [? Sôtadês or Palaephatus³].

The first king of Egypt belonged to the tribe of Cham [Ham], Noah's son; he was Pharaôh, who was also called Narachô.

Now, the ancient reigns in Egypt before King Narachô were set forth by the wise Manetho, as has already been mentioned.

Fr. 6 (*from Syncellus*).

Since a knowledge of the periods of the Egyptian dynasties from Mestraïm¹ down to Nectanabô² is on many occasions needful to those who occupy themselves with chronological investigations, and since the dynasties taken from Manetho's *History* are set forth by ecclesiastical historians with discrepancies in respect both to the names of the kings and the length of their reigns, and also as to who was king when Joseph was governor of Egypt, and in whose reign thereafter Moses,—he who saw God,—led the Hebrews in their exodus from Egypt, I have judged it necessary to select two of the most famous recensions and to set them side by side—I mean the accounts of Africanus and of the later Eusebius, the so-called “son” of Pamphilus,—so that with proper application one may apprehend the opinion which approaches nearest to Scriptural truth. It must, above all, be strictly understood that Africanus increases by 20 years the period from Adam to the Flood, and instead of 2242 years he makes it out to be 2262 years, which appears to be incorrect. On the other hand, Eusebius keeps to the sound reckoning of 2242 years in agreement with Scripture. In regard to the period from the Flood down to Abraham and Moses, both have gone astray by 130

Note.—The dates which have been adopted throughout this book are those of Eduard Meyer, except where another authority is specified. Meyer's revised dates (as in *Die Ältere Chronologie* . . ., 1931) may conveniently be found in G. Steindorff's chapter on Ancient History in Baedeker⁸, pp. ci. ff. In the *Cambridge Ancient History*, vol. i., H. R. Hall gives for the dynasties a series of dates

years belonging to the second Caïnan, son of Arphaxad,¹ even one generation, the thirteenth, from Adam, as it is recorded by the divine evangelist Luke.² But Africanus, in the 20 years which he added between Adam and the Flood, anticipated this; and in the period of Caïnan and his successors, only 110 years remain. Hence, down to the first year of Abraham he reckoned 3202 years; but Eusebius, completely omitting those 130 years, gave 3184 years³ as far as Abraham's first year.

which differ from those of Breasted and the German School: he assigns earlier dates to the first twelve dynasties, e.g. Dynasty I. c. 3500 B.C. A. Scharff, on the other hand, dates the beginning of Dynasty I. c. 3000 B.C. (*Journ. of Eg. Arch.* xiv., 1928, pp. 275 f.).

Dynasty I. For the identifications of Manetho's kings with monumental and other evidence, see Meyer, *Geschichte des Altertums*⁶, I. ii. p. 140: he identifies (1) Mênês, (2) Atoti I., II., III., (5) Usaphaïs, (6) Miebis.

(3) Kenkenês and (5) Usaphaïs are two names of the same king: see Newberry and Wainwright, "King Udymu (Den) and the Palermo Stone" in *Ancient Egypt*, 1914, p. 148 ff.

Eusebius also sets out the details of the First Dynasty in much the same way as Africanus.

⁴For the later study of anatomy (including, perhaps, the practice of vivisection) by kings of Ptolemaic Egypt, see G. Lumbroso, *Glossario*, s.v. 'Ανατομική.

⁵Kôchômê has been identified with Sakkâra, and excavations carried out there in the Archaic Cemetery from 1935 by W. B. Emery (assisted by Zaki Saad) have gone far to confirm Manetho. Several tombs which date from the First Dynasty were discovered at Sakkâra in 1937 and 1938. One of these, the tomb of Nebetka under the 5th king of Dynasty I., was found to contain in its interior a stepped-pyramid construction of brickwork: during the building the form of the tomb was altered to a palace-façade mastaba.

⁶These forms are really the genitives of the names Usaphais and Miebis.

⁷The actual total of the items given is 263 years.

Here is the account which Eusebius gives of the Egyptian dynasties [after the Flood].

In succession to the Spirits of the Dead and the Demigods, the Egyptians reckon the First Dynasty to consist of eight kings. Among these was Mênês, whose rule in Egypt was illustrious. I shall record the rulers of each race from the time of Mênês ; their succession is as follows :

1. Mênês of This, with his [17, or in another copy] 7 descendants,—the king called Mên by Herodotus,—reigned for 60 years. He made a foreign expedition and won renown, but was carried off by a hippopotamus.
2. Athôthis, his son, ruled for 27 years. He built the palace at Memphis ; he practised medicine and wrote anatomical books.
3. Kenkenês, his son, for 39 years.
4. Uenephês, for 42 years. In his reign famine seized the land. He built the pyramids near Kôchôme.
5. Usaphaïs, for 20 years.
6. Niebaïs, for 26 years.

¹ The version (transmitted to us by Syncellus) which Eusebius gives of the *Epitome* of Manetho shows considerable differences from Africanus, both in the names of kings and in the length of their reigns. Peet (*Egypt and the Old Testament*, pp. 25 f.) says : "The astonishing variations between their figures are an eloquent testimony to what may happen to numbers in a few centuries through textual corruption." Petrie (*History of Egypt*, i. p. viii) compares the corruptions in such late Greek chronicles as those of the Ptolemies (c.v./A.D.).

(b) ARMENIAN VERSION OF EUSEBIUS.

In succession to the Spirits of the Dead and the Demigods, the Egyptians reckon the First Dynasty to consist of eight kings. The first of these was Mênês, who won high renown in the government of his kingdom. Beginning with him, I shall carefully record the royal families one by one : their succession in detail is as follows :

Mênês of This (whom Herodotus named Min) and his seven descendants. He reigned for 30 years, and advanced with his army beyond the frontiers of his realm, winning renown by his exploits. He was carried off by a hippopotamus god (?).²

Athothis, his son, held the throne for 27 years. He built for himself a royal palace at Memphis, and also practised the art of medicine, writing books on the method of anatomy.

Cencenes, his son, for 39 years.

Vavenephis, for 42 years. In his time famine seized the land. He reared pyramids near the town of Cho.

DYNASTY III.

Fr. 11 (*from Syncellus*). THE ACCOUNT OF AFRICANUS.

The Third Dynasty² comprised nine kings of Memphis.

1. Necherôphês, for 28 years. In his reign the Libyans revolted against Egypt, and when the moon waxed beyond reckoning, they surrendered in terror.
2. Tosorthros,³ for 29 years. <In his reign lived Imuthês,⁴> who because of his medical skill has the reputation of Asclepios among the

Pyramid at Sakkâra, which was the work of the great architect Imhotep (Baedeker⁸, p. 156 f.).

⁴ If the emendation in the text be not accepted, the statement would surely be too inaccurate to be attributed to Manetho. The Egyptian Asclepios was Imouth or Imhotep of Memphis, physician and architect to King Zoser, afterwards deified : on Philae (now for the most part submerged) Ptolemy II. Philadelphus built a little temple to Imhotep. See Sethe, *Untersuchungen*, ii. 4 (1902) : J. B. Hurry, *Imhotep* (Oxford, 1926).

One of the Oxyrhynchus Papyri, edited by Grenfell and Hunt, P. Oxy. XI. 1381, of ii./A.D., has for its subject the eulogy of Imuthês-Asclepius : the fragment preserved is part of the prelude. See G. The Sixth Dynasty.

There was a queen Nitôcris, the noblest and loveliest of the women of her time; she had a fair complexion, and is said to have built the third pyramid.

Seemiophris (Sebeknofrurê⁴) closes the line: *cf.* perhaps, in Dyn. IV., Thamphthis, of whom nothing is known.

In 1932 Professor Selim Hassan discovered at Giza the tomb of Queen Khentkawes, a tomb of monumental dimensions, the so-called fourth or "false" pyramid. Khentkawes was the daughter of Mycerinus; and, disregarding the chronological difficulty, H. Junker, in *Mitteilungen des Deutschen Instituts für Ägyptische Altertumskunde in Kairo*, iii. 2 (1932), pp. 144-149, put forward the theory that the name Nitôcris is derived from Khentkawes, and that Manetho refers here to the so-called fourth pyramid, which merits the description (Fr. 21(b)),—"with the aspect of a mountain". See further B. van de Walle in *L'Antiquité Classique*, 3 (1934), pp. 303-312.

¹ Dynasty XII. c. 2000-1790 B.C. (Meyer, *Geschichte* ⁵, I. ii. p. 270). Including Ammenemês whom Manetho places between Dynasty XI. and Dynasty XII., there are eight rulers in Dynasty XII.—(1) Ammenemês (Amenemhêt I.), (2) Sesonchôsis (Senwosret or Sesôstris I.), (3) Ammanemês (Amenemhêt II.), (4) Sesôstris II. (omitted by Manetho), (5) Sesôstris (Senwosret III.), (6) Manetho's Lamarês and Amerês (Amenemhêt III., Nema'trê'), (7) Ammenemês (Amenemhêt IV.), (8) Scemiophris (Queen Sebeknofrurê'). For (5), the great Sesôstris (1887-1850 B.C.) of Herodotus, ii. 102, Diod. Sic. I. 53 ff., see Sethe, *Unters. zur Gesch. . . . Aeg.* ii. 1, and Meyer, *Geschichte* ⁵, I. ii. p. 268. The name of Amenemhêt bespeaks his Theban origin: he removed the capital further north to Dahshûr, a more central position—"Controller of the Two Lands," as its Egyptian name means. Thus the kings of Dynasty XII. are kings who came from Thebes, but ruled at Dahshûr.

3. Sesôstris, for 48 years: in nine years he subdued the whole of Asia, and Europe as far as Thrace, everywhere erecting memorials of

In Dynasty XII. the conquests of Dynasty VI. in the south were extended; and Sesôstris III. was the first Egyptian king to conquer Syria. Among works of peace the great irrigation schemes in the Fayûm perpetuated the name of Amenemhêt III. in "Lake Moeris". (See G. Caton-Thompson and E. W. Gardner, *The Desert Fayûm*, 1934.) Manetho mentions his building of the Labyrinth: it is significant that after the reign of Sesôstris III. and his wide foreign conquests, his son should have built the Labyrinth. Vases of the Kamares type from Crete have been found at Kahûn, not far from the Labyrinth.

²See A. de Buck (*Mélanges Maspero*, vol. i., 1935, pp. 847-52) for a new interpretation of the purpose of *The Instruction of Amenemmes*: in this political pamphlet the dead king speaks from the tomb in support of his son Sesostris, now holding the throne in spite of strong opposition, and violently denounces the ungrateful ruffians who murdered him. It seems probable that Manetho's note here refers to the death of Ammenemês I. (Battiscombe Gunn).

² The Labyrinth is correctly attributed by Manetho to Amenemhêt III., who built it as his mortuary temple (contrast Herodotus, ii. 148, who assigns this monument to the Dodecarchy). The Fayûm was a place of great importance during this dynasty, from Amenemhêt I. onwards.

The description of the nome as "Arsinoïte" has often been suspected as a later interpolation; but if "Arsinoïte" was used by Manetho himself, it gives as a date in his life the year 256 B.C. when Ptolemy Philadelphus commemorated Queen Arsinoë (d. 270 B.C.) in the new name of the nome. ¹ The invasion of the Hyksôs took place at some time in Dynasty XIII.: hence the succeeding anarchy in a period of foreign domination. The later Egyptians looked back upon it as the Jews did upon the Babylonian captivity, or the English upon the Danish terror. The keen desire of the Egyptians to forget about the Hyksôs usurpation accounts in part for our ignorance of what actually happened: "it is with apparent unwillingness that they chronicle any events connected with it" (Peet, *Egypt and the Old Testament*, p. 69). In Egyptian texts the "infamous" (Hyksôs) were denoted as 'Amu,—a title also given to the Hittites and their allies by Ramessês II. in the poem of the Battle of Kadesh (ed. Kuentz, § 97). Perhaps they were combined with Hittites who in 1925 B.C. brought the kingdom of Babel to an end. It is certain that with the Hyksôs numerous Semites came into Egypt: some of the Hyksôs kings have Semitic names. For the presence of an important Hurrian element among the Hyksôs, see E. A. Speiser, "Ethnic Movements," in *Ann. of Amer. Sch. of Or. Res.* xiii. (1932), p. 51. The

THE HYKSÔS AGE, c. 1700-c. 1580 B.C.¹

Fr. 42 (*from Josephus, Contra Apionem*, i. 14,
§§ 73-92).

[Josephus is citing the records of neighbouring nations in proof of the antiquity of the Jews.]

I will begin with Egyptian documents. These I cannot indeed set before you in their ancient form ; but in Manetho we have a native Egyptian who was manifestly imbued with Greek culture. He wrote in Greek the history of his nation, translated, as he himself tells us, from sacred tablets ;² and on many

Hyksôs brought with them from Asia their tribal god, which was assimilated by the Egyptians to Sêth, the god of foreign parts, of the desert, and of the enemy.

In the first half of the second millennium B.C. the Hyksôs ruled a great kingdom in Palestine and Syria (Meyer, *Geschichte*⁵, i. § 304) ; and when their power was broken down by the arrival of hostile tribes, King Amôsis took advantage of their plight to drive the Hyksôs out of Egypt (A. Jirku, "Aufstieg und Untergang der Hyksôs," in *Journ. of the Palestine Orient. Soc.* xii., 1932, p. 60).

A dim tradition of Hyksôs-rule is possibly preserved in Herodotus, ii. 128. Perhaps "the shepherd Philitis" in that passage is connected with "Philistines," a tribe which may have formed part of these invaders. There is confusion between two periods of oppression of the common people,—under the pyramid-builders and under the Hyksôs. For a translation of the Egyptian records which illustrate the Hyksôs period, see Battiseombe Gunn and Alan H. Gardiner, *J. Eg. Arch.* v., 1918, pp. 36-56, "The Expulsion of the Hyksôs".

²The word "tablets" is a probable emendation, since Manetho would naturally base his *History* upon temple-archives on stone as well as on papyrus : cf. the Palermo Stone, the Turin Papyrus, etc. (Intro. pp. xxiii ff.).

² This account of the Hyksôs invasion is obviously derived from popular Egyptian tales, the characteristics of which are deeply imprinted upon it. Meyer (*Geschichte* ⁶, I. ii. p. 313) quotes from papyri and inscriptions passages of similar style and content, e.g. Pap. Sallier I. describing the war with the Hyksôs, and mentioning “Lord Apôpi in Auaris,” and an inscription of Queen Hatshepsut from the Speos Artemidos, referring to the occupation of

points of Egyptian history he convicts Herodotus¹ of having erred through ignorance. In the second book of his *History of Egypt*, this writer Manetho speaks of us as follows. I shall quote his own words, just as if I had brought forward the man himself as a witness :²

“Tutimaëus.³ In his reign, for what cause I know not, a blast of God smote us; and unexpectedly, from the regions of the East, invaders of obscure race marched in confidence of victory against our land. By main force they easily seized it without striking a blow;⁴ and having overpowered the rulers of the land, they then burned our cities ruthlessly, razed to the ground the temples of the gods, and treated all the natives with a cruel hostility, massacring some and leading into slavery the wives and children of others. Finally, they appointed as king one of their number whose name was

Auaris. See Breasted, *Ancient Records*, i. § 24, ii. §§ 296 ff. Meyer adds that he would not be surprised if Manetho's description reappeared word for word one day in a hieratic papyrus. Cf. § 75 *ὁ θεός* : § 76 the crimes of the Hyksôs (Fr. 54, § 249, those of the Solymites and their polluted allies) : § 77 the upper and lower lands : §§ 78, 237 religious tradition to explain the name of Auaris and its dedication to Typhôn : § 99 hollow phrases about military expeditions of Sethôs : § 237 the form of the phrase *ὡς χρόνος ἰκανὸς διήλθεν*, and many other passages. See also Weill, *La fin du moyen empire égyptien*, pp. 76 ff.

⁴ The success of the Hyksôs may have been due to superior archery and to the use of horse-drawn chariots, previously unknown in Egypt (Maspero, *Hist. Anc.* ii. p. 51; Petrie, *Hyksos and Israelite Cities*, p. 70; H. R. Hall, *Anc. Hist. of Near East*⁸, p. 213), as well as to superior weapons of bronze (H. R. Hall, *C.A.H.* i. p. 291 n., 312 f.).

⁴ Couj. Σεθροῖτη Manetho, Fr. 43, 48, 49.

¹ The name may be Semitic (cf. Hebr. *shallūt*), but it has not been found on the monuments. Possibly it is not strictly a proper name, but rather a title like "prince," "general": "sultan" comes from the same root.

² Cf. § 90. Manetho regards as historically true the Greek tales of the great Assyrian Empire of Ninus and Semiramis. The period referred to here is much earlier than the time when Assyria began to harass the Mediterranean regions.

³ If "Saïte" is correct here, it has nothing to do with the famous Saïs, but is probably used for "Tanite": cf. Herodotus, ii. 17, Strabo, 17, 1, 20 (P. Montet in *Revue Biblique*, xxxix. 1930). The Sethroïte nome (Fr. 43, 45, 49) is in the extreme E. of the Delta, adjoining the Tanite nome. For Sethroë see H. Junker, *Zeit. f. äg. Sprache* 75. 1939, p. 78.

⁴ For Bubastis see Fr. 8 n. 2. The Bubastite branch is the farthest E., the next being the Tanitic.

⁵ Auaris, in Ancient Egyptian *Hetwa'ret*, "town of the desert strip," but this meaning does not explain the "religious tradition". (The older interpretations, "house of the flight," "house of the leg," were attached to the Seth-Typhôn legend: cf. n. 3 *infra*.) Tanis was a strong-

Salitis.¹ He had his seat at Memphis, levying tribute from Upper and Lower Egypt, and always leaving garrisons behind in the most advantageous positions. Above all, he fortified the district to the east, foreseeing that the Assyrians,² as they grew stronger, would one day covet and attack his kingdom.

“In the Saïte [Sethroïte] nome³ he found a city very favourably situated on the east of the Bubastite branch⁴ of the Nile, and called Auaris⁵ after an

hold of the Hyksôs: in *O.T. Numbers* xiii. 22, “Now Hebron (in S. Palestine) was built seven years before Zoan in Egypt,” Zoan is Tanis (Dja’net), and the statement probably refers to the Hyksôs age. Sethe cautiously said, “Seth is the god of the Hyksôs cities, Tanis and Auaris”. But in *Revue Biblique*, xxxix., 1930, pp. 5-28, Pierre Montet, the excavator of Tanis, brought forward reasons to identify Auaris and Pi-Ra’messes with Tanis; and Alan H. Gardiner (*J. Eg. Arch.* xix., 1933, pp. 122-128) gave further evidence for this view (p. 126): “San el-Hagar marks the site of the city successively called Auaris, Pi-Ra’messe, and Tanis”. In spite of the criticism of Raymond Weill (*J. Eg. Arch.* xxi., 1935, pp. 10-25), who cited a hieroglyphic document (found in the temple of Ptah in Memphis) in which Auaris and “the field (or land) of Tanis” are separate, Pierre Montet (*Syria*, xvii., 1936, pp. 200-202) maintains the identity of Auaris, Pi-Ra’messes, and Tanis. [So does H. Junker, *Zeit. f. äg. Sprache* 75. 1939, pp. 63-84.]

Meanwhile, a new identification of Pi-Ra’messês had been suggested: by excavation M. Hamza (*Annales du Service des Antiquités de l’Égypte*, xxx. 1930, p. 65) found evidence tending to identify Pi-Ra’messês with the palace of Ramessês II. at Tell el-Yahudiya, near Kantîr, c. 25 kilometres south of Tanis; and William C. Hayes (*Glazed Tiles from a Palace of Ramessês II. at Kantîr: The Metropolitan Museum of Art Papers*, No. 3, 1937) supports this theory that Kantîr was the Delta residence of the Rameside kings of Egypt, pointing out that there is a practically

ancient religious tradition.¹ This place he rebuilt and fortified with massive walls, planting there a garrison of as many as 240,000 heavy-armed men to guard his frontier. Here he would come in summer-time, partly to serve out rations and pay his troops, partly to train them carefully in manœuvres and so strike terror into foreign tribes. After reigning for 19 years, Salitis died; and a second king, named Bnôn,² succeeded and reigned for 44 years. Next to him came Apachnan, who ruled for 36 years and 7 months;³ then Apôphis for 61, and Iannas for 50 years and 1 month; then finally Assis for 49 years and 2 months. These six kings, their first rulers, were ever more and more eager to extirpate the Egyptian stock. Their race as a whole was called

unbroken series of royal Ramesside monuments which cover a period of almost 200 years.

In 1906 Petrie discovered at Kantîr a vast fortified encampment of Hyksôs date and a Hyksôs cemetery: see Petrie, *Hyksôs and Israelite Cities*, pp. 3-16 (the earthwork ramparts of the camp were intended to protect an army of chariots).

¹ See Fr. 54, § 237, for its connexion with Seth-Typhon, to whom the tribal god of the Hyksôs was assimilated.

² Of these Hyksôs names Bnôn and Apachnan are unexplained. Apôpi (the name of several kings—at least three), and perhaps Asêth (Assis), seem to be pure Egyptian: Iannas is presumed to be Khian, whose cartouche turned up surprisingly and significantly on the lid of an alabastron in the Palace of Minos at Knossos in Crete, as well as on a basalt lion from Baghdad. On Khian, see Griffith in *Proc. of Soc. of Bibl. Arch.* xix. (1897), pp. 294 f., 297.

³ In his *History* (and for short reigns in the *Epitome*, see e.g. Dynasty XXVII.) Manetho reckoned by months as well as by years, like the Turin Papyrus and the Palermo Stone: see Intro. pp. xxiv f.

³ ποιμένας Eus.: οὐ ποιμένας L.

⁴ μὲνύειν Holwerda: μὲνύει L.

⁵ Bracketed by Thackeray, Reinach.

¹ Hyksôs, “rulers of foreign lands” (Erman-Grapow, *Wörterbuch*, iii. p. 171, 29). Another form of the name, Hykussôs, is preserved by Eusebius, but it is uncertain whether the medial -u- is really authentic—the Egyptian plural (Meyer). *Hyk* = ruler of a pastoral people, a sheikh.

“The Hyksôs, like the foreign Kassite Dynasty in Babylonia, adopted the higher culture of the conquered

Hyksôs,¹ that is 'king-shepherds': for *hyk* in the sacred language means 'king,' and *sôs* in common speech is 'shepherd' or 'shepherds':² hence the compound word 'Hyksôs'. Some say that they were Arabs."³ In another copy⁴ the expression *hyk*, it is said, does not mean "kings": on the contrary, the compound refers to "captive-shepherds".⁵ In Egyptian *hyk*, in fact, and *hak* when aspirated expressly denote "captives".⁶ This explanation seems to me the more convincing and more in keeping with ancient history.

These kings whom I have enumerated above, and their descendants, ruling over the so-called Shepherds, dominated Egypt, according to Manetho, for 511

country" (J. Garstang, *The Heritage of Solomon*, 1934, p. 62).

² This is correct: for the Egyptian word *š'sw*, "Bedouins," which in Coptic became *shôs*, "a herdsman," see Erman-Grapow, *Wörterbuch*, iv. p. 412, 10 (B.G.).

³ In a papyrus (ii./iii. A.D.) quoted by Wilcken in *Archiv für Pap.* iii. (1906), pp. 188 ff. (*Chrestomathie*, I. ii. p. 322) *ἄμμος ὑκαιοτική* is mentioned—aloe [or cement (Preisigke)] from the land of the Hyksiôtæ, apparently in Arabia. This gives some support to the statement in the text.

⁴ Josephus, in revising this treatise just as he revised his *Antiquities*, appears to have used a second version of Manetho's *Aegyptiaca*. Did Josephus ever have before him Manetho's original work? Laqueur thinks it more probable that Josephus consulted revisions of Manetho made from the philo- or the anti-Semitic point of view: see Intro. p. xx. Since the third century B.C. an extensive literature on the origin of the Jews had arisen.

⁵ This appears to be a Jewish explanation (§ 91), to harmonize with the story of Joseph.

⁶ The reference here is to the Egyptian word *h'k*, "booty," "prisoners of war" (Erman-Grapow, *Wörterbuch*, iii. p. 33) (B.G.).

¹This number of years, much too high for the length of the Hyksôs sway in Egypt, may perhaps refer to the whole period of their rule in Palestine and Syria: see A. Jirku, in *Journ. of the Palestine Orient. Soc.* xii., 1932, p. 51 n. 4.

²Misphragmuthôsis, *i.e.* Menkheperrê (Tuthmôsis III.) and his son Thummôsis, *i.e.* Tuthmôsis IV., are here said to have driven out the Hyksôs. In Fr. 50, § 94, Tethmôsis is named as the conqueror. In point of historical fact the

years.¹ Thereafter, he says, there came a revolt of the kings of the Thebaïd and the rest of Egypt against the Shepherds, and a fierce and prolonged war broke out between them. By a king whose name was Mispfragmuthôsis,² the Shepherds, he says, were defeated, driven out of all the rest of Egypt, and confined in a region measuring within its circumference 10,000 *arûrae*,³ by name Auaris. According to Manetho, the Shepherds enclosed this whole area with a high, strong wall, in order to safeguard all their possessions and spoils. Thummôsis, the son of Mispfragmuthôsis (he continues), attempted by siege to force them to surrender, blockading the fortress with an army of 480,000 men. Finally, giving up the siege in despair, he concluded

victorious king was Amôsis, and he took Auaris by main force: the genuine Manetho must surely have given this name which is preserved by Africanus and Eusebius, as also by Apiôn in Tatian, *adv. Graecos*, § 38. See p. 101 n. 2, and *cf.* Meyer, *Aeg. Chron.* pp. 73 f.

Weill, *La fin du moyen empire égyptien*, p. 95, explains the error by assuming that the exploit of the capture of Auaris was usurped by Tuthmôsis IV., as it was usurped earlier by Hatshepsut and later by Ramessês III.

Breasted (*C.A.H.* ii. p. 83) holds that, since with the catastrophic fall of Kadesh on the Orontes before the arms of Tuthmôsis III. the last vestige of the Hyksôs power disappeared, the tradition of late Greek days made Tuthmôsis III. the conqueror of the Hyksôs. He points out that the name Mispfragmuthôsis is to be identified with the two cartouche-names of Tuthmôsis III.: it is a corruption of "Menkheperré' Tuthmôsis".

³ Lit. "with a circumference of 10,000 *arûrae*". The text (which cannot be attributed as it stands to Manetho—τὴν περίμετρον must be a later addition) implies a wrong use of *arûra* as a measure of length: it is, in reality, a measure of area, about half an acre.

On these terms the Shepherds, with their possessions and households complete, no fewer than 240,000 persons,¹ left Egypt and journeyed over the desert into Syria. There, dreading the power of the Assyrians who were at that time masters of Asia, they built in the land now called Judaea a city large enough to hold all those thousands of people, and gave it the name of Jerusalem.²

In another book³ of his *History of Egypt* Manetho says that this race of so-called Shepherds is, in the sacred books of Egypt, described as "captives"; and his statement is correct. With our remotest ancestors, indeed, it was a hereditary custom to feed sheep; and as they lived a nomadic life, they were called Shepherds.⁴ On the other hand, in the Egyptian records they were not unreasonably styled Captives, since our ancestor Joseph told the king of Egypt⁵ that he was a captive, and later, with the

The Fifteenth Dynasty consisted of Shepherd Kings. There were six foreign kings from Phoenicia,³ who seized Memphis: in the Sethroïte nome they founded a town, from which as a base they subdued Egypt.

The first of these kings, Saïtès, reigned for 19 years: the Saïte nome⁴ is called after him.

Total, 284 years.

⁴ See p. 80 n. 3. The Saïte nome proper, as opposed to this "Tanite" nome, is mentioned in Egyptian texts of the Old Kingdom. For the famous Saïs, the seat of Dynasty XXVI. ⁶ For Iannas (in Josephus), the Khian of the Monuments, see p. 83 n. 2.

⁷ Archlès here, and in Eusebius (Fr. 48), corresponds with Assis (or Aseth) in Josephus (Fr. 42, § 80); but the change in the form of the name is extraordinary.

⁸ The length of reign (61 years, as in Josephus) leads one to believe that Africanus has transposed Apôphis from the 4th place to the 6th; but in point of fact the last Hyksôs king whom we know by name was called Apepi.

The Seventeenth Dynasty were Shepherds and brothers :³ they were foreign kings from Phoenicia, who seized Memphis.

The first of these kings, Saïtês, reigned for 19 years : the Saïte nome⁴ is called after him. These kings founded in the Sethroïte nome a town, from which as a base they subdued Egypt.

with those of Dynasty XIII. tend to show that the Hyksôs rule in the Nile Valley lasted for about a hundred and twenty years, c. 1700-1580 B.C. Under one of the Theban kings, Ta'ô, who bore the epithet "The Brave," war with the Hyksôs broke out c. 1590 B.C. ; Kamose, the last king of Dynasty XVII., continued the war of independence, and Amôsis (of Dynasty XVIII.) finally expelled the usurpers.

(b) ARMENIAN VERSION OF EUSEBIUS.

The Seventeenth Dynasty consisted of Shepherds, who were brothers¹ from Phoenicia and foreign kings: they seized Memphis. The first of these kings, Saïtes, reigned for 19 years: from him, too, the Saïte nome² derived its name. These kings founded in the Sethroïte nome a town from which they made a raid and subdued Egypt.

The second king was Bnon, for 40 years.

Next, Archles, for 30 years.

Aphophis, for 14 years.

Total, 103 years.

It was in their time that Joseph appears to have ruled in Egypt.³

The Armenian text of this sentence is rather difficult, but Professor Margoliouth, pointing out that the Armenian present infinitive is used here for the perfect, approves of this rendering. Karst translates the Armenian in the following sense: "It is under these kings that Joseph arises, to rule over Egypt".

The second of these kings, Bnôn, reigned for 40 years; the third, Archaês, for 30 years; and the fourth, Aphôphis, for 14 years. Total, 103 years.

Saïtês added 12 hours to the month, to make its length 30 days; and he added 6 days to the year, which thus comprised 365 days.³

¹ See p. 95 n. 3.

² See p. 80 n. 3.

³ The addition of 5 days (not 6, as above) to the short year of 360 days was made long before the Hyksôs age: it goes back to at least the Pyramid Age, and probably earlier. The introduction of the calendar, making an artificial reconciliation of the lunar and solar years, perhaps as early as 4236 B.C., is believed to give the earliest fixed date in human history: see V. Gordon Childe, *New Light on the Most Ancient East*, 1934, pp. 5 f.

DYNASTIES, XVIII,¹ XIX.

Fr. 50 (from Josephus, *Contra Apionem*, i. 15, 16, §§ 93-105)—(continued from Fr. 42).

For the present I am citing the Egyptians as witnesses to this antiquity of ours. I shall therefore resume my quotations from Manetho's works in their reference to chronology. His account is as follows: "After the departure of the tribe of Shepherds from Egypt to Jerusalem, Tethmôsis,² the king who drove them out of Egypt, reigned for 25 years 4 months until his death, when he was succeeded by his son Chebrôn, who ruled for 13 years. After him Amenôphis reigned for 20 years 7 months; then his sister Amessis for 21 years 9 months; then her son Mêphrês for 12 years 9 months; then his son Mêphramuthôsis for 25 years 10 months; then his son Thmôsis for 9 years 8 months; then his son Amenôphis

(Chebrôn is unexplained), (2) Amenôphis I., (3) Tuthmôsis I., (4) Tuthmôsis II., (5) Hatshepsut (apparently Manetho's Amessis or Amensis: the same length of reign, 21 years), (6) Tuthmôsis III. (corresponding to Mêphrês, *i.e.* Menkheperre' or Meshperê', and Misphragmuthôsis, *i.e.* Menkheperre' Thutmose), (7) Amenôphis II., (8) Tuthmôsis IV. (the order of these two being reversed by Manetho), (9) Amenôphis III. (Hôrus, the same length of reign, 36 years).

The remaining kings of the dynasty are: Amenôphis IV. (Akhnaten, see p. 123 n. 1), Semenkhikarê' (? Acenchêrês), Tût'ankhamon (? Chebrês), Ay (? Acherrês): see *C.A.H.* ii. p. 702. On rulers Nos. 3, 4, 5 and 6, see Wm. F. Edgerton, *The Thutmosid Succssion*, 1933.

¹ Howard Carter (*Tutankhamen*, iii. p. 3) points out that monuments of Amenôphis III. are dated to his 37th year, perhaps even to his 40th year; and he explains that Manetho has given the length of his reign as sole ruler. More commonly, the high figures assigned to the reigns of kings may be explained by the assumption that overlapping co-regencies have been included.

This king appointed his brother Harmaïs viceroy of Egypt, and invested him with all the royal prerogatives, except that he charged him not to wear a diadem, nor to wrong the queen, the mother of his children, and to refrain likewise from the royal concubines. He then set out on an expedition against Cyprus and Phœnicia and later against the Assyrians and the

³ The margin of the Florentine MS. has a note here: "The following reading was found in another copy: 'After him Sethôsis and Ramessês, two brothers. The former, with a strong fleet, blockaded his murderous (?) adversaries by sea. Not long after, he slew Ramessês and appointed another of his brothers, Harmaïs, as viceroy of Egypt.'" This is intended as a correction of the text of Josephus, but it contains the error of the Florentine MS. in the reading Σέθωσις καὶ Ραμέσσης. Sethôsis is the Sesostris of Herodotus, ii. 102, where his naval expedition in the "Red Sea" is described.

Meyer, *Aeg. Chron.* p. 91, considers the words "also called Ramesses" an addition to Manetho. See § 245.

W. Struve (see p. 148 n. 1) would here emend Sethôs into Sesôs, which was a name of Ramesês II.: according to the monuments he reigned for 67 years (*cf.* Fr. 55, 2), and his triumphant Asiatic campaigns were told by Hecataeus of Abdera (Osymandyas in Diodorus Siculus, i. 47 ff.).

¹ A frequent title from the Old Kingdom onwards is “overseer of the priests of Upper and Lower Egypt,” later applied to the high priest of Amūn. The emendation ἱεράων (for ἱερέων) is supported by a reference in a papyrus of about the time of Manetho.

Medes ; and he subjugated them all, some by the sword, others without a blow and merely by the menace of his mighty host. In the pride of his conquests, he continued his advance with still greater boldness, and subdued the cities and lands of the East. When a considerable time had elapsed, Harmaïs who had been left behind in Egypt, recklessly contravened all his brother's injunctions. He outraged the queen and proceeded to make free with the concubines ; then, following the advice of his friends, he began to wear a diadem and rose in revolt against his brother. The warden of the priests of Egypt¹ then wrote a letter which he sent to Sethôsis, revealing all the details, including the revolt of his brother Harmaïs. Sethôsis forthwith returned to Pêlusium² and took possession of his kingdom³ ; and the land was named Aegyptus after him. ⁴ Danaus : cf. § 231. See Meyer, *Aeg. Chron.* p. 75, for the theory that the identification of Sethôs and Harmaïs with Aegyptus and Danaus is due, not to Manetho, but to a Jewish commentator or interpolator.

The tradition is that Danaus, a king of Egypt, was expelled by his brother and fled to Argos with his fifty daughters, and there "the sons of Aegyptus" were slain by "the daughters of Danaus." The legend appears to have existed in Egypt as well as in Greece : see Diod. Sic. i. 28. 2, 97. 2. For attempts to explain the story in terms of Aegean pre-history, see J. L. Myres, *Who Were the Greeks ?* (1930), pp. 323 ff. ; M. P. Nilsson, *The Mycenaean Origin of Greek Mythology* (1932), p. 64.

Such is Manetho's account; and, if the time is reckoned according to the years mentioned, it is clear that the so-called Shepherds, our ancestors, quitted Egypt and settled in our land 393 years¹ before the coming of Danaus to Argos. Yet the Argives regard Danaus as belonging to a remote antiquity.² Thus Manetho has given us evidence from Egyptian records upon two very important points: first, upon our coming to Egypt from elsewhere; and secondly, upon our departure from Egypt at a date so remote that it preceded the Trojan war³ by wellnigh a thousand years.⁴ As for the additions which Manetho has made, not from the Egyptian records, but, as he has himself admitted, from anonymous legendary tales,⁵ I shall later refute them in detail, and show the improbability of his lying stories.

Fr. 52 (*from Syncellus*). ACCORDING TO AFRICANUS.

The Eighteenth Dynasty¹ consisted of 16 kings of Diospolis.

The first of these was Amôs, in whose reign Moses went forth from Egypt,² as I³ here declare; but, according to the convincing evidence of the present calculation⁴ it follows that in this reign Moses was still young.

The second king of the Eighteenth Dynasty, according to Africanus, was Chebrôs, who reigned for 13 years.

The third king, Amenôphthis,⁵ reigned for 24 (21) years.

The fourth king (queen), Amensis (Amersis), reigned for 22 years.

¹ *I.e.* by Syncellus.

² This Greek transcription of "Amenhotpe," retaining both the labial and the dental, is the fullest form of the name, "Amenôthês" showing assimilation: "Amenôphis," which is regularly used to represent "Amenhotpe," actually comes from another name, "Amen(om)ôpe" (B.G.). The month Phamenôth (February-March) is named from the "feast of Amenôthês".

¹ This note about Memnôn in both Africanus and Eusebius should be transferred to the ninth king of the dynasty, Orus or Amenôphis III.

[Footnote continued on opposite page.]

The fifth, Misaphris, for 13 years.

The sixth, Misphragmuthôsis, for 26 years : in his reign the flood of Deucalion's time occurred.

Total, according to Africanus, down to the reign of Amôsis, also called Misphragmuthôsis, 69 years. Of the length of the reign of Amôs he said nothing at all.

7. Tuthmôsis, for 9 years.

8. Amenôphis, for 31 years. This is the king who was reputed to be Memnôn and a speaking statue.¹

9. Ôrus, for 37 years.

10. Acherrês,² for 32 years.

11. Rathôs, for 6 years.

12. Chebrês, for 12 years.

13. Acherrês, for 12 years.

14. Armesis, for 5 years.

15. Ramessês, for 1 year.

16. Amenôphath (Amenôph), for 19 years.

Total, 263 years.

The reference is to the two monolithic colossi of Amenôphis III. (Baedeker³, pp. 345 f.): see Pausanias, i. 42 (the Thebans say it was a statue not of Memnôn, but of Phamenôph, who dwelt in those parts) with J. G. Frazer's note (vol. ii. pp. 530 f.), and Tacitus, *Ann.* ii. 61. Amenôphis III. (Memnôn) is correctly named in Greek Amenôth and Phamenôth by the poetess Balbilla (time of Hadrian): see Werner Peek in *Mitt. des Deutsch. Inst. für äg. Alt. in Kairo*, v. 1 (1934), pp. 96, 99; *Sammelbuch*, 8211, 8213.

² For possible identifications of Nos. 10, 12, and 13 see p. 101 n. 1. Nos. 14, 15, and 16 should be transferred to Dynasty XIX.: see p. 148 n. 1. Armesis (Armaïs) is probably Haremhab: Ramessês, vizier of Haremhab and afterwards Ramessês I., was probably of Heliopolitan origin (P. E. Newberry).

EUSEBIUS.

The Eighteenth Dynasty consisted of fourteen kings of Diospolis.

The first of these, Amôsis, reigned for 25 years.

2. The second, Chebrôn, for 13 years.

3. Ammenôphis, for 21 years.

4. Miphrês, for 12 years.

5. Mispfragmuthôsis, for 26 years.

Total from Amôsis, the first king of this Eighteenth Dynasty, down to the reign of Mispfragmuthôsis amounts, according to Eusebius, to 71 years; and there are five kings, not six. For he omitted the fourth king, Amensês, mentioned by Africanus and the others, and thus cut off the 22 years of his reign.

6. Tuthmôsis, for 9 years.

7. Amenôphis, for 31 years. This is the king who was reputed to be Memnôn and a speaking statue.¹

8. Ôrus, for 36 years (in another copy, 38 years).

9. Achenchersês [for 12 years].

[Athôris, for 39 years (? 9).]

[Cencherês] for 16 years.

About this time Moses led the Jews in their march out of Egypt. (Syncellus adds: Eusebius alone places in this reign the exodus of Israel under Moses, although no argument supports him, but all his predecessors hold a contrary view, as he testifies.)

Fr. 54 (*from Josephus, Contra Apionem, I. 26-31, §§ 227-287*).

(Josephus discusses the calumnies of the Egyptians against the Jews, whom they hate.)

The first writer upon whom I shall dwell is one whom I used a little earlier as a witness to our antiquity. I refer to Manetho. This writer, who had undertaken to translate the history of Egypt from the sacred books, began by stating that our ancestors came against Egypt with many tens of thousands and gained the mastery over the inhabitants; and then he himself admitted that at a later date again they were driven out of the country, occupied what is now Judaea, founded Jerusalem, and built the temple.¹ Up to this point he followed the chronicles: there-

if the Exodus is dated c. 1445 B.C. (see p. 110 n. 2), the Temple was founded c. 965 B.C.

after, by offering to record the legends and current talk about the Jews, he took the liberty of interpolating improbable tales in his desire to confuse with us a crowd of Egyptians, who for leprosy and other maladies¹ had been condemned, he says, to banishment from Egypt. After citing a king Amenôphis, a fictitious person,—for which reason he did not venture to define the length of his reign, although in the case of the other kings he adds their years precisely,—Manetho attaches to him certain legends, having doubtless forgotten that according to his own chronicle the exodus of the Shepherds to Jerusalem took place 518 years² earlier. For Tethmôsis was king when they set out; and, according to Manetho, the intervening reigns thereafter occupied 393 years down to the two brothers Sethôs and Hermaeus, the former of whom, he says, took the new name of Aegyptus, the latter that of Danaus. Sethôs drove out Hermaeus and reigned for 59 years; then Rampsês, the elder of his sons, for 66 years. Thus, after admitting that so many years had elapsed since our forefathers left Egypt, Manetho now interpolates this intruding Amenôphis. This king, he states, conceived a desire to behold the gods, as Ôr,³ one of his predecessors on

² This number seems to be obtained by adding 393 + 59 + 66: in that case the reign of Sethôsis is counted twice, (1) as 60, (2) as 59 years (*cf.* Fr. 50, § 103).

³ Ôr, or Hôrus, is the ninth king in Manetho's list of Dynasty XVIII. (Frs. 51, 52), in reality Amenôphis III. Reinach points out that Herodotus (ii. 42) tells the same story of the Egyptian Heracles, and conjectures that there is perhaps confusion with the god Hôrus.

In 1934-35 excavations by the French Institute, Cairo, revealed all that remains of the splendour of the funerary temple of Amenhotpe, son of Hapu, among a series of such temples to the N. of Medinet Habu: see Robichon and Varillo, *Le Temple du Scribe Royal Amenhotep, Fils de Hapou*, i. Cairo, 1936. An inscription of iii. B.C. (and therefore contemporary with Manetho), headed Ἀμενώτου ὑποθήκαι, "Precepts of Amenôtes or Amenôphis," was published by Wilcken in *Aegyptiaca*, 1897, pp. 142 ff. It is inscribed upon a limestone ostrakon of Deir el-Bahri; and the first three injunctions run: "Practise wisdom along with justice," "Revere both the gods and your parents,"

122

the throne, had done; and he communicated his desire to his namesake Amenôphis,¹ Paapis' son, who, in virtue of his wisdom and knowledge of the future, was reputed to be a partaker in the divine nature. This namesake, then, replied that he would be able to see the gods if he cleansed the whole land of lepers and other polluted persons. The king was delighted, and assembled² all those in Egypt whose bodies were wasted by disease: they numbered 80,000 persons.

"Take counsel at leisure, but accomplish speedily whatever you do".

An ostrakon, found at Deir el-Bahri, and giving the draft of an inscription concerning the deified Amenôphis, was published by A. Bataille, *Études de Papyrologie*, IV. (1938), pp. 125-131: it celebrates the cure of a certain Polyaratos. See O. Guéraud in *Bull. Inst. Fr. d'Arch. Or.*, xxvii. (1927), pp. 121 ff., P. Jouguet, "Les Grands Dieux de la Pierre Sainte à Thèbes," *Mélanges Glotz*, II. pp. 493-500.

For the historical interpretation of this whole passage, §§ 232-251, see Meyer, *Geschichte*², ii. 1, pp. 421 ff. King Amenôphis is at one time Merneptah, son of Rameses II.; at another time, Amenôphis IV. (Akhnaten), some 200 years earlier. The doings of the polluted, the persecution of the gods, and the slaughter of the holy animals, clearly portray the fury of Akhnaten and his followers against Egyptian religion. For a popular Egyptian parallel to §§ 232 ff., see the Potter's Oracle, one of the Rainer Papyri (iii. A.D.) edited by Wilcken in *Hermes*, xl. 1905, pp. 544 ff. and by G. Manteuffel, *De Opusculis Graecis Aegypti e papyris, ostracis, lapidibusque collectis*, 1930, No. 7; and cf. the prophecy of the lamb, Manetho, Fr. 64.

For a theory about the identity of the polluted (they are the troops of Sethôs I., sent to Tanis by his father Ramessês I. during the ascendancy of Haremhab), see P. Montet, "La Stèle de l'An 400 Retrouvée," in *Kémi*, iii. 1935, pp. 191-215.

These he cast into the stone-quarries ¹ to the east of the Nile, there to work segregated from the rest of the Egyptians. Among them, Manetho adds, there were some of the learned priests, who had been attacked by leprosy. Then this wise seer Amenôphis was filled with dread of divine wrath against himself and the king if the outrage done to these persons should be discovered; and he added a prediction that certain allies would join the polluted people and would take possession of Egypt for 13 years. Not venturing to make this prophecy himself to the king, he left a full account of it in writing, and then took his own life. The king was filled with despondency. Then Manetho continues as follows (I quote his account *verbatim*): "When the men in the stone-quarries had suffered hardships for a considerable time, they begged the king to assign to them as a dwelling-place and a refuge the deserted city of the Shepherds, Auaris, and he consented. According to religious tradition ² this city was from earliest times dedicated to Typhôn. Occupying this city and using the region as a base for revolt, they appointed as their leader one of the priests of Héliopolis called Osarsêph,³

¹ The quarries of Tura were known to Herodotus (ii. 8, 124) as the source of building-stone for the Pyramids.

³ Osarsêph, the leader of the movement, is later (§ 250) identified with Moses. The name Osarsêph is a possible Egyptian name: cf. Ranke, *Personennamen* I. p. 85, No. 3 *wsîr-sp'*. Wilcken (*Chrestomathie*, i. 1, p. 106) derives the name from a holy animal Sêph; but the Jews would naturally see in it a form of the name Joseph.

and took an oath of obedience to him in everything. First of all, he made it a law ¹ that they should neither worship the gods nor refrain from any of the animals ² prescribed as especially sacred in Egypt, but should sacrifice and consume all alike, and that they should have intercourse with none save those of their own confederacy. After framing a great number of laws like these, completely opposed to Egyptian custom, he ordered them with their multitude of hands, to repair the walls of the city and make ready for war against King Amenôphis. Then, acting in concert with certain other priests and polluted persons like himself, he sent an embassy to the Shepherds who had been expelled by Tethmôsis,³ in the city called Jerusalem; and, setting forth the circumstances of himself and his companions in distress, he begged them to unite wholeheartedly in an attack upon Egypt. He offered to conduct them first to their ancestral home at Auaris, to provide their hosts with lavish supplies, to fight on their behalf whenever need arose, and to bring Egypt without difficulty under their sway. Overjoyed at the proposal, all the Shepherds, to the number of 200,000, eagerly set out,

and before long arrived at Anaris. When Amenôphis, king of Egypt, learned of their invasion, he was sorely troubled, for he recalled the prediction of Amenôphis, son of Paapis. First, he gathered a multitude of Egyptians; and having taken counsel with the leading men among them, he summoned to his presence the sacred animals which were held in greatest reverence in the temples, and gave instructions to each group of priests to conceal the images of the gods as securely as possible. As for his five-year-old son Sethôs, also called Ramessês after his grandfather Rapsês,¹ he sent him safely away to his friend.² He then crossed the Nile with as many as 300,000 of the bravest warriors of Egypt, and met the enemy. But, instead of joining battle, he decided that he must not fight against the gods, and made a hasty retreat to Memphis. There he took into his charge Apis and the other sacred animals which he had summoned to that place; and forthwith he set off for Ethiopia³ with his whole army and the host of Egyptians. The Ethiopian king, who, in gratitude for a service, had become his subject, welcomed him, maintained the whole multitude with such products of the country as were fit for human consumption,

¹ Rapsês: doubtless an error for Rampês. There is confusion here: the grandfather is Ramessês II. See Meyer (*Aeg. Chron.* p. 91), who considers the words "Sethôs also called" an interpolation (*cf.* § 98), intended to identify a Sethôs son of Amenôphis and a Ramessês son of Amenôphis.

² A curious indefiniteness: the reference may be to the king of Ethiopia, mentioned in the next section.

³ The truth is that Ethiopia (Nubia, Cush) was at that time a province of the kingdom of the Pharaohs.

assigned to them cities and villages sufficient for the destined period of 13 years' banishment from his realm, and especially stationed an Ethiopian army on the frontiers of Egypt to guard King Amenôphis and his followers. Such was the situation in Ethiopia. Meanwhile, the Solymites [or dwellers in Jerusalem] made a descent along with the polluted Egyptians, and treated the people so impiously and savagely that the domination of the Shepherds seemed like a golden age to those who witnessed the present enormities. For not only did they set towns and villages on fire, pillaging the temples and mutilating images of the gods without restraint, but they also made a practice of using the sanctuaries as kitchens to roast the sacred animals which the people worshipped: and they would compel the priests and prophets to sacrifice and butcher the beasts, afterwards casting the men forth naked. It is said that the priest who framed their constitution and their laws was a native of Héliopolis, named Osarsêph after the god Osiris, worshipped at Héliopolis; but when he joined this people, he changed his name and was called Moses."¹

Such, then, are the Egyptian stories about the Jews,² together with many other tales which I pass

anti-Semitic commentator on Manetho. It is interesting that Osiris should be thus identified with the mysterious god of the Jews, whose name must not be uttered.

² Cf. Hecataeus of Abdera (in Diodorus Siculus, xl. 3): the Jews are foreigners expelled from Egypt because of a plague. See Meyer, *Geschichte*², ii. 1, p. 424. Hecataeus lived for some time at the court of Ptolemy I. (323-285 B.C.), and used Egyptian sources for his *Aegyptiaca*. Cf. Intro. pp. xxvi f.

by for brevity's sake. Manetho adds, however, that, at a later date, Amenôphis advanced from Ethiopia with a large army, his son Rampsês also leading a force, and that the two together joined battle with the Shepherds and their polluted allies, and defeated them, killing many and pursuing the others to the frontiers of Syria. This then, with other tales of a like nature, is Manetho's account. Before I give proof that his words are manifest lies and nonsense, I shall mention one particular point, which bears upon my later refutation of other writers. Manetho has made one concession to us. He has admitted that our race was not Egyptian in origin, but came into Egypt from elsewhere, took possession of the land, and afterwards left it. But that we were not, at a later time, mixed up with disease-ravaged Egyptians, and that, so far from being one of these, Moses, the leader of our people, lived many generations earlier, I shall endeavour to prove from Manetho's own statements.

To begin with, the reason which he suggests for his fiction is ridiculous. "King Amenôphis," he says, "conceived a desire to see the gods." Gods indeed! If he means the gods established by their ordinances,—bull, goat, crocodiles, and dog-faced baboons,—he had them before his eyes; and as for the gods of heaven, how could he see them? And why did he conceive this eager desire? Because, by Zeus,¹ before his time another king

had seen them! From this predecessor, then, he had learned their nature and the manner in which he had seen them, and in consequence he had no need of a new system. Moreover, the prophet by whose aid the king expected to succeed in his endeavour, was a sage. How, then, did he fail to foresee the impossibility of realizing this desire? It did, in fact, come to naught. And what reason had he for ascribing the invisibility of the gods to the presence of cripples or lepers? Divine wrath is due to impious deeds, not to physical deformities. Next, how could 80,000 lepers and invalids be gathered together in practically a single day? And why did the king turn a deaf ear to the prophet? The prophet had bidden him expel the cripples from Egypt, but the king cast them into stone-quarries, as if he needed labourers, not as if his purpose was to purge the land. Manetho says, moreover, that the prophet took his own life, because he foresaw the anger of the gods and the fate in store for Egypt, but left in writing his prediction to the king. Then how was it that the prophet had not from the first foreknowledge of his own death? Why did he not forthwith oppose the king's desire to see the gods? Was it reasonable to be afraid of misfortunes which were not to happen in his time? Or what worse fate could have been his than that which he hastened to inflict upon himself?

But let us now examine ¹ the most ridiculous part

¹The passage §§ 260-266 repeats unnecessarily the substance of §§ 237-250: possibly these are extracts from two treatises utilizing the same material.

of the whole story. Although he had learned these facts, and had conceived a dread of the future, the king did not, even then, expel from his land those cripples of whose taint he had previously been bidden to purge Egypt, but instead, at their request, he gave them as their city (Manetho says) the former habitation of the Shepherds, Auaris, as it was called. Here, he adds, they assembled, and selected as their leader a man who had formerly been a priest in Heliopolis. This man (according to Manetho) instructed them not to worship the gods nor to refrain from the animals revered in Egypt, but to sacrifice and devour them all, and to have intercourse with none save those of their own confederacy. Then having bound his followers by oath to abide strictly by these laws, he fortified Auaris and waged war against the king. This leader, Manetho adds, sent to Jerusalem, inviting the people to join in alliance with him, and promising to give them Auaris, which, he reminded them, was the ancestral home of those who would come from Jerusalem, and would serve as a base for their conquest of the whole of Egypt. Then, continues Manetho, they advanced with an army of 200,000 men; and Amenôphis, king of Egypt, thinking he ought not to fight against the gods, fled straightway into Ethiopia after enjoining that Apis and some of the other sacred animals should be entrusted to the custody of the priests. Thereafter, the men from Jerusalem came on, made desolate the cities, burned down the temples, massacred

the priests, and, in short, committed every possible kind of lawlessness and savagery. The priest who framed their constitution and their laws was, according to Manetho, a native of Héliopolis, Osarsêph by name, after Osiris the god worshipped in Héliopolis: but he changed his name and called himself Moses. Thirteen years later—this being the destined period of his exile—Amenôphis, according to Manetho, advanced from Ethiopia with a large army, and joining battle with the Shepherds and the polluted people, he defeated them, killing many, after pursuing them to the frontiers of Syria.

Here again Manetho fails to realize the improbability of his lying tale. Even if the lepers and their accompanying horde were previously angry with the king and the others who had treated them thus in obedience to the seer's prediction, certainly when they had left the stone-quarries and received from him a city and land, they would have grown more kindly disposed to him. If indeed they still hated him, they would have plotted against him personally, instead of declaring war against the whole people; for obviously so large a company must have had numerous relatives in Egypt. Notwithstanding, once they had resolved to make war on the Egyptians, they would never have ventured to direct their warfare against their gods, nor would they have framed laws completely opposed to the ancestral code under which they had been brought up. We must, however, be grateful to Manetho for stating that the

authors of this lawlessness were not the newcomers from Jerusalem, but that company of people who were themselves Egyptians, and that it was, above all, their priests who devised the scheme and bound the multitude by oath.

Moreover, how absurd it is to imagine that, while none of their relatives and friends joined in the revolt and shared in the perils of war, these polluted persons sent to Jerusalem and gained allies there! What alliance, what connexion had previously existed between them? Why, on the contrary, they were enemies, and differed widely in customs. Yet Manetho says that they lent a ready ear to the promise that they would occupy Egypt, just as if they were not thoroughly acquainted with the country from which they had been forcibly expelled! Now, if they had been in straitened or unhappy circumstances, they would perhaps have taken the risk; but dwelling, as they did, in a prosperous city and enjoying the fruits of an ample country, superior to Egypt, why ever should they be likely to hazard their lives by succouring their former foes, those maimed cripples, whom none even of their own kinsfolk could endure? For of course they did not foresee that the king would take flight. On the contrary, Manetho has himself stated that the son¹ of

Pêlusium, "the celebrated eastern seaport and key to Egypt" (Baedeker⁸, pp. 197, f.), the famous frontier fortress, in Ancient Egyptian *Šnw*. A scarab of the late Twelfth Dynasty or early Thirteenth, published by Newberry in *J. Eg. Arch.* xviii. (1932), p. 141, shows the place-name written within the fortress-sign. The name Pêlusium is from *πηλός* "mud": cf. Strabo, 17. 1, 21, for the muddy pools or marshes around Pêlusium.

Amenôphis marched with 300,000 men to confront them at Pêlusium. This was certainly known to those already present ; but how could they possibly guess that he would change his mind and flee ? Manetho next says that, after conquering Egypt, the invaders from Jerusalem committed many heinous crimes ; and for these he reproaches them, just as if he had not brought them in as enemies, or as if he was bound to accuse allies from abroad of actions which before their arrival native Egyptians were performing and had sworn to perform. But, years later, Amenôphis returned to the attack, conquered the enemy in battle, and drove them, with slaughter, right to Syria. So perfectly easy a prey is Egypt to invaders, no matter whence they come ! And yet those who at that time conquered the land, on learning that Amenôphis was alive, neither fortified the passes between it and Ethiopia, although their resources were amply sufficient, nor did they keep the rest of their forces in readiness ! Amenôphis, according to Manetho, pursued them with carnage over the sandy desert right to Syria. But obviously it is no easy matter for an army to cross the desert even without fighting.

Thus, according to Manetho, our race is not of Egyptian origin, nor did it receive any admixture of Egyptians. For, naturally, many of the lepers and invalids died in the stone-quarries during their long term of hardship, many others in the subsequent battles, and most of all in the final engagement and the rout.

It remains for me to reply to Manetho's statements about Moses. The Egyptians regard him as a wonderful, even a divine being, but wish to claim him as their own by an incredible calumny, alleging that he belonged to Héliopolis and was dismissed from his priesthood there owing to leprosy. The records, however, show that he lived 518 years¹ earlier, and led our forefathers up out of Egypt to the land which we inhabit at the present time. And that he suffered from no such physical affliction is clear from his own words. He has, in fact, forbidden lepers² either to stay in a town or to make their abode in a village; they must go about in solitude, with their garments rent. Anyone who touches them or lives under the same roof with them he considers unclean. Moreover, even if the malady is cured and the leper resumes normal health, Moses has prescribed certain rites of purification—to cleanse himself in a bath of spring-water and to shave off all his hair,—and enjoins the performance of a number of different sacrifices before entrance into the holy city. Yet it would have been natural, on the contrary, for a victim of this scourge to show some consideration and kindly feeling for those who shared the same misfortune. It was not only about lepers that he framed such laws: those who had even the slightest mutilation of the body were disqualified for the priesthood;³ and if a priest in the course of his ministry met with an

¹ The same etymology (with the necessary addition that ὕσῆς means "saved") recurs in Josephus, *Antiq.* ii. 228: cf. Philo, *De Vita Moysis*, i. 4, § 17. There is a word in Ancient Egyptian, *mw*, meaning "water," but the connexion with the name Moses is hypothetical. Similar forms appear as personal names in Pharaonic times, e.g.

accident of this nature, he was deprived of his office. How improbable, then, that Moses should be so foolish as to frame these laws, or that men brought together by such misfortunes should approve of legislation against themselves, to their own shame and injury! But, further, the name, too, has been transformed in an extremely improbable way. According to Manetho, Moses was called Osarsêph. These names, however, are not interchangeable: the true name means "one saved out of the water," for water is called "mō-y" by the Egyptians.¹

It is now, therefore, sufficiently obvious, I think, that, so long as Manetho followed the ancient records, he did not stray far from the truth; but when he turned to unauthorized legends, he either combined them in an improbable form or else gave credence to certain prejudiced informants.

Ms. i from the Old Kingdom, *Ms* (very common) from the New Kingdom. In *Exodus* ii. 10 "Moses" is "drawn out" (Hebr. *mashah*) of the water—a derivation "hardly meant to be taken seriously" (T. H. Robinson, in Oesterley and Robinson, *History of Israel*, I. p. 81).

See further Alan H. Gardiner, "The Egyptian Origin of some English Personal Names," in *Journ. of Amer. Orient. Soc.* 56 (1936), pp. 192-4. Gardiner points out (p. 195, n. 28) that *ῥσῆς* (mentioned above) is clearly a perversion of *ασις* [or *ἑσις*, = Egyptian *ḥsy*, "praised," LS⁹], the Greek equivalent of the Coptic *hasiē*, "favoured"; but an Egyptian became "favoured" by the fact of being drowned, not by being saved from drowning.

¹ Dynasty XIX.: c. 1310-1200 B.C. The lists given by Africanus and Eusebius for Dynasty XIX. are in very bad confusion. Armaïs (Haremhab) should begin the line, which Meyer gives as follows:—

Haremhab: Ramessês I.: Sethôs I.: Ramessês II. (the Louis Quatorze of Egyptian history: 67 years, see Breasted, *Anc. Rec.* iv. § 471; *C.A.H.* ii. pp. 139 ff.): Merneptah: Amenmesês: Merneptah II. Siptah: Sethôs II.: Ramessês Siptah: <Arsu the Syrian>.

W. Struve (*Die Ära ἀπὸ Μενόφρεως und die XIX. Dynastie Manethos*, in *Zeitschr. für äg. Siptah, (8) Ammenemes (Amenmeses), (9) Thuôris or Thuôsrîs, also called Siphthas. Cf. Petrie, *History of Egypt*, iii. pp. 120 ff. Struve points also to a new Sôthis date, 1318 B.C., in the reign of Seti I. (according to Petrie's chronology, 1326-1300 B.C.).

¹The Fall of Troy was traditionally dated 1183 B.C.: cf. p. 107 n. 3.

In Homer, *Odyssey*, iv. 126, a golden distaff and a silver work-basket with wheels beneath and golden rims,—treasures in the palace of Menelaus at Sparta,—are described as gifts to Helen from "Alcandrê, the wife of Polybus who dwelt in Egyptian Thebes where the amplest store of wealth is laid up in men's houses"; while to Menelaus himself Polybus had given two silver baths, two tripods, and ten talents of gold. See W. H. D. Rouse, *The Story of Odysseus*, 1937, p. 56: "Polybos was a great nobleman in the Egyptian Thebes, with a palace full of treasures".

² Dynasty XXIII., resident at Tanis: the records of these kings (dated by Breasted 745-718 B.C.) are much confused. The name Petubatês (see Fr. 63 for the usual Grecized form Petubastis) represents the Egyptian Pedibaste. For King Osorcho (Osorkon III.) see the *stele* of Piankhi, king of Ethiopia, whose vassal Osorkon became (Breasted, *Anc. Rec.* iv. §§ 807, 811, 872, 878). Psammûs has not been identified.

Total, 89 years.

³ The date of the first Olympic festival was conventionally fixed at 776-775 B.C.

* See G. A. Wainwright, *Sky-Religion*, pp. 35 f.

⁴ The fact that the name Zêt, occurring in Africanus alone, is wrapped in obscurity, has led Flinders Petrie to suggest ("The Mysterious Zêt" in *Ancient Egypt*, 1914, p. 32) that the three Greek letters are a contraction for ζῆτέῖται or other word connected with ζῆτέω, meaning "A question (remains)," or "Query, about 31 years": for 31 years at this time no single ruler seemed to be predominant, and further search was needed to settle who should be entered as the king of Egypt. "Zêt." is found in wall-inscriptions at Pompeii: see Diehl, *Pompeianische Wandinschriften*, No. 682. The next inscription, No. 683, gives "Zêtêma" in full: a riddle follows.

¹ Dynasty XXIV., c. 720–c. 715 B.C. Before Bocchoris, his father Tefnachte of Saïs (Tnephachthus in Diodorus Siculus, i. 45, 2) became the most powerful among the chiefs of the Delta (c. 730–720 B.C.).

For King Bocchoris see Alexandre Moret, *De Bocchori Rege*, 1903. Cf. Diodorus Siculus, i. 65, 79, 1 (law of contract: Bocchoris legislated for commerce), and 94, 5. See Breasted, *Anc. Rec.* iv. § 884: the only extant monuments of King Bocchoris are a few Serapeum *stelae* and a wall inscription, which record the burial of an Apis in the sixth year of his reign.

² See especially the demotic story (8 B.C.) of the prophetic lamb, quoted by Krall in *Festgaben für Büdinger*, pp. 3-11 (Innsbruck, 1898): the lamb prophesied the conquest and enslavement of Egypt by Assyria, and the removal of her gods to Nineveh. Cf. Aelian, *De Nat. Anim.* xii. 3, and Manetho, Fr. 54, §§ 232 ff. A reference to Manetho's description of the oracular lamb is preserved in Pseudo-Plutarch, *De proverbiiis Alexandrinorum* (Crusius, 1887), No. 21, τὸ ἀρνίον σοι λελάληκεν. Αἰγύπτιοι τοῦτο ἀνέγραψαν ὡς ἀνθρωπεία φωνῆ λαλήσαν (or, as in Suidas, ἐν Αἰγύπτῳ, ὡς φασιν, ἀνθρωπεία φωνῆ ἐλάλησεν). εὐρέθη δὲ ἔχον

¹ Manetho's interpretation is from *imn*, "hidden, secret": see Sethe, *Abhandl. Berl. Akad.*, 1929, p. 78, § 153. Herodotus, ii. 42, 3, tells a story which is probably related to this meaning of Amún.

FR. 76 (*from* EUSEBIUS).

Now the whole history of Egypt and especially the details of Egyptian religion are expounded at length in Greek by Manetho the Egyptian, both in his *Sacred Book* and in other writings of his.

(*From* THEODORETUS.)

Manetho rehearsed the stories of Isis, Osiris, Apis, Serapis, and the other gods of Egypt.

FR. 77 (*from* PLUTARCH, *Is. and Osir.*, ch. 9).

Further, the general belief is that the name Amûn,¹ which we transform into Ammôn, is an Egyptian proper noun, the title of Zeus²; but Manetho of Sebennytus is of opinion that this name has a meaning—"that which is concealed" and "concealment."

FR. 78 (*from* PLUTARCH, *Is. and Osir.*, ch. 49).

Some say that Bebôn³ was one of the comrades of Typhôn; but Manetho states that Typhôn himself

²The title Zeus Ammôn was already known to Pindar in the first half of the fifth century B.C. (*Pythians*, iv. 16, Fr. 36; see Pausanias, ix. 16, 1).

³The name "Bebôn," given to Typhôn, does not mean "prevention," but is the Egyptian *b'by*, an epithet of Sêth. In Greek, besides the form *Béβων*, *Báβυς* was used (Hellicanicus in Athenaeus, xv. 25, p. 680a). Typhôn, an unpopular deity, came into favour in Dynasty XIX., two kings of which were Sethôs I. and II.

¹ Explanation is difficult. The name of the goddess Neith with whom Athena is often identified has been interpreted “that which is, or exists” (Mallet, *Le Culte de Neit à Saïs*, p. 189). As a genuine etymology of the name, this is impossible; but it may be that in the late period a connexion was imagined between *Nt*, “Neith,” and *nt(t)*, “that which is” (B.G.). It is suggestive that the Coptic word meaning “come” is *na* (A. Rusch, Pauly-Wissowa-Kroll, *R.-E.* xvi. 2 (1935), col. 2190).

was also called *Bebôn*. The name means "checking" or "prevention," and implies that, when actions are proceeding in due course and tending to their required end, the power of *Typhôn* obstructs them.

FR. 79 (from PLUTARCH, *Is. and Osir.*, ch. 62).

The usage of the Egyptians is also similar. They often call *Isis* by the name of *Athena*, which expresses some such meaning as "I came from Myself,"¹ and is indicative of self-originated movement. But *Typhôn*, as I have already mentioned, is called *Sêth*, *Bebôn*, and *Smy*,² these names implying a certain violent and obstructive force, or a certain opposition or overthrow. Further, as *Manetho* records, they call the loadstone "the bone of *Hôrus*," but iron "the bone of *Typhôn*."³ Just as iron is often like to be attracted and led after the stone, but often again turns away and is repelled in the opposite direction. so the

¹ *Smy* is not a name of *Typhôn*, but may mean "confederate" in Egyptian (from *sm*'), to unite). In religious texts the phrase *Sêth* and his *sm'yt*, i.e. "Sêth and his confederates," often occurs. See Kees on *Sêth* in Pauly-Wissowa-Kroll, *R.-E.* ii. A. 2 (1923), cols. 1896 ff.

² Interesting confirmation of the correctness of *Plutarch* and *Manetho* is given by G. A. Wainwright in his article "Iron in Egypt" (*J. Ég. Arch.* xviii. 1932, p. 14). He compares *Pyramid Texts*, § 14, "the *bi*" which came forth out of *Setesh*," and refers to *Petrie's* discovery at *Kâw* (an important centre of *Sêth* worship) of great quantities of gigantic bones, collected in piles: they were chiefly of hippopotami,—mineralized, heavy, black bones, of metallic lustre and appearance. It is clear that they were considered sacred to *Sêth*, as they were wrapped in linen and were found here and there in tombs at *Kâw*.

¹ The story of the transport of the colossus of Serapis to Alexandria is told with variants by Tacitus, *Hist.* iv. 83, 84, Clement of Alexandria, *Protrep.* iv. p. 37, Stahlin, and Cyrillus in *Jul.* p. 13, Spanh.: cf. also Plutarch, *De sollert. anim.* 36, Eustathius on Dionys. *Perieg.* 254 (Müller, *Geogr. gr. min.* ii. p. 262). Both Tacitus and Plutarch agree in assigning the introduction of the statue to Ptolemy I.: Clement and Cyril attribute it to Ptolemy II. See Parthey, *Über Is. und Osir.* pp. 213 ff. Tacitus gives (from Lysimachus) the more circumstantial account, adding the name of the King of Pontus, Scydrothemis; but Plutarch mentions other names (e.g. Manetho) which Tacitus omits. The new cult of Serapis was intended to unite the Greek ruling class and their Egyptian subjects. (See Intro. p. xiv.) Georg Lippold (*Festschrift Paul Arndt*, 1925, p. 126) holds the sculptor of the statue to be the famous Bryaxis of Athens, c. 350 B.C.; and thus the image was worshipped at Sinôpe for about 70 years before it was taken to Alexandria. The most trustworthy copy of the statue is that in the Museum at Alexandria: see *Athen. Mitt.* xxxi. (1906), Plates VI, VII (A. W. Lawrence in 192

salutary, good, and rational movement of the world at one time attracts, conciliates, and by persuasion mollifies that harsh Typhonian power; then again, when the latter has recovered itself, it overthrows the other and reduces it to helplessness.

FR. 80 (*from* PLUTARCH, *Is. and Osir.*, ch. 28).

Ptolemy Sôtêr dreamed that he saw the colossal statue¹ of Pluto at Sinôpê,² although he did not know what manner of shape it had, having never previously seen it; and that it bade him convey it with all possible speed to Alexandria. The king was at a loss and did not know where the statue stood; but as he was describing the vision to his friends,

J. Eg. Arch. xi. (1925), p. 182). Only the Greek statue by Bryaxis was brought from Sinôpe: the cult was organized in Egypt itself, and Serapis became the paramount deity of Alexandria with a magnificent temple in Rhakôtis. If there were forty-two temples of Serapis in Egypt (Aristides, viii. 56, 1, p. 96 Dind.)—this number being one for each nome, the majority have left no trace: Parthey (*op. cit.* pp. 216 f.) identifies eleven.

See Wilamowitz, *Hell. Dichtung*, i. p. 154, Wilcken, *Urkunden der Ptolemäerzeit*, Intro. pp. 77 ff. (a full discussion of the origin of the cult of Serapis). Cf. also Rostovtzeff in *C.A.H.* vii. pp. 145 f.

For the dream as a vehicle of religious propaganda, cf. P. Cairo Zenon 34 (258-257 B.C.: see Deissmann, *Light from the Ancient East*, pp. 152 ff.), and *Inscr. Gr.* xi. 4, 1299 (c. 200 B.C.).

² In the districts by the Black Sea, a great god of the underworld was worshipped; and this deity, as Rostovtzeff holds, must be set in close connexion with the Alexandrine Serapis. See Julius Kaerst, *Geschichte des Hellenismus*², ii. (1926), pp. 246 f., and cf. the late Roman coins of Sinôpe with the Serapis-type (Plate IV, No. 3).

¹ Timotheus (of Eleusis), the Eumolpid, is believed to have introduced the Eleusinian Mysteries into Eleusis, the suburb of Alexandria.

there came forward a far-travelled man, by name Sôsibius, who declared that at Sinôpe he had seen just such a colossus as the king had dreamt he saw. He therefore despatched Sôtêlês and Dionysius, who after a long time and with difficulty, though not unaided by divine providence, stole away the statue. When it was brought to Egypt and exhibited there, Timotheus¹ the *exégétés* (expounder or interpreter), Manetho² of Sebennytus, and their colleagues, judging by the Cerberus and the serpent, came to the conclusion that it was a statue of Pluto; and they convinced Ptolemy that it represented no other god than Serapis. For it had not come bearing this name from its distant home, but after being conveyed to Alexandria, it acquired the Egyptian name for Pluto, namely Serapis.

Fr. 81 (*from* AELIAN).

I am told also that Manetho the Egyptian, who attained the acme of wisdom, declared that one who tastes sow's milk is infected with leprosy or scall. All Asiatics, indeed, loathe these diseases. The Egyptians hold that the sow is abhorred by both Sun and Moon; so, when they celebrate the annual festival in honour of the Moon, they sacrifice swine³ to the goddess, whereas at any other time they refuse to sacrifice this animal to the Moon or to any other deity.

² Manetho's connexion with the Serapis cult is vouched for by a bust in the Serapeum at Carthage, *Corpus Inscr. Lat.* viii. 1007: see Intro. p. xv.

AN EPITOME OF PHYSICAL DOCTRINES

AN EPITOME OF PHYSICAL DOCTRINES.

Fr. 82 (*from* DIOGENES LAERTIUS).

The Egyptians hold the Sun and the Moon to be gods, the former being named Osiris, the latter Isis. They refer darkly to them under the symbols of beetle, serpent, hawk, and other creatures, as Manetho says in his *Epitome of Physical Doctrines*.

Fr. 83 (*from* EUSEBIUS).

The Egyptians say that Isis and Osiris are the Moon and the Sun ; that Zeus is the name which they gave to the all-pervading spirit, Hephaestus to fire, and Demeter to earth. Among the Egyptians the moist element is named Ocean and their own River Nile ; and to him they ascribed the origin of the Gods.¹ To Air, again, they give, it is said, the name of Athena. Now these five deities,—I mean Air, Water, Fire, Earth, and Spirit,—traverse the whole world, transforming themselves at different times into different shapes and semblances of men and creatures of all kinds. In Egypt itself there have also been born mortal men of the same names as these deities :

In a *Hymn to the Nile*, engraved upon the rocks at Gebel Silsileh in Upper Egypt by command of Rameses II., the river is described as "the living and beautiful Nile, . . . father of all the gods" (Wiedemann, *Religion of the Ancient Egyptians*, pp. 146 f.).

The rite of human sacrifice² at Hêliopolis (Eileithyiaspolis)³ in Egypt was suppressed by Amôsis,⁴

Tiberius, wrote an account of human sacrifice in Egypt (Athen. iv. p. 172*d*), and there is evidence for the sacrifice of captives in Dynasties XVIII. and XIX. See Diod. Sic. i. 88, 5, and *cf.* Frazer, *Golden Bough*, ii. pp. 254 ff.

Some writers have suggested that the contracted human figure (the *tekenu*), wrapped in a skin and drawn on a sledge, who is a regular feature of funeral processions in the New Kingdom, may have been a remnant of human sacrifice. This, however, is very doubtful: *cf.* N. de G. Davies, *Five Theban Tombs*, pp. 9, 14. See further G. A. Wainwright, *Sky-Religion*, pp. 33 f.

³ See Fr. 86. The mention of Hêra (see *infra*) makes it very probable that "Eileithyiaspolis" is the correct reading here.

But this was done openly and at a set time, namely in the dog-days; whereas the consecrations of sacred animals are secret ceremonies, taking place at irregular intervals as occasion demands. unknown to the common people except when the priests celebrate a funeral of Apis, and, displaying some of the animals, cast them together into the tomb in the presence of all, deeming that thus they are vexing Typhôn in return and curtailing his delight.

[CRITICISMS OF HERODOTUS]

Fr. 88³ (from the *Etymologicum Magnum*).

The word λέων ("lion") comes from λάω, "I see": the animal has indeed the keenest of sight, as Manetho says in his *Criticism of Herodotus* that the lion never sleeps.⁴ But this is hard to believe.

Choeroboscus, in his work *On Orthography* (iv./v. A.D.), gives the derivation of λέων according to Ōrus or Hōrus in almost the same words as those quoted above from the *Etymologicum Magnum*; but he omits the clause "as Manetho says in his *Criticism of Herodotus*" (Cramer, *Anecdota Graeca e codd. manuscriptis bibliothecarum Oxoniensium*, ii. p. 235, ll. 32 ff. = *Etymologicum Genuinum*).

Cf. Aelian, *On the Nature of Animals*, v. 39: "the Egyptians, they say, boast about this, adding that the lion is superior to sleep, being always awake." Aelian quotes from Apion (see p. 19 n. 3), who may well have taken his statement from Manetho.

⁴ By a curious coincidence, in Egyptian also the words for "lion" (*m'í*) and "to see" (*m''*) are very similar, and the word for "lion" is sometimes written as though it came from the verb "to see". Manetho possibly had this fact in mind when he stated that the lion never sleeps (Battiscombe Gunn).

Eustathius on Homer, *Iliad*, XI, 480:

(Τινὲς λέγουσιν) ὅτι ἐκ τοῦ λάω, τὸ βλέπω, γίνεται ὡσπερ ὁ λέων, οὕτω καὶ ὁ λῖς, κατὰ τὸν γραμματικὸν Ὦρον, ὡς ὀξύδερκῆς, καὶ ὅτι, ὡς φησι Μανέθων ἐν τοῖς πρὸς Ἡρόδοτον, οὐ καθεύδει ὁ λέων ὅπερ ἀπίθανον . . .

(From EUSTATHIUS.)

(Some say) that from *λάω*, "I see," comes not only *λέων*, but also *λίς* (a lion), according to Ôrus the grammarian,¹ because of its keen sight; and they add, as Manetho states in his *Criticisms of Herodotus*, that the lion never sleeps. This is hard to believe.

¹ Ôrus or Hôrus (v. A.D.) was, according to Suidas, an Alexandrian grammarian who taught at Constantinople: none of his numerous works is extant.

APPENDIX I.

PSEUDO-MANETHO.

(From SYNCELLUS).

It remains now to make brief extracts concerning the dynasties of Egypt from the works of Manetho of Sebennytus. In the time of Ptolemy Philadelphus he was styled high-priest of the pagan temples of Egypt, and wrote from inscriptions in the Sêriadic land,¹ traced, he says, in sacred language and holy characters by Thôth,² the first Hermês, and translated after the Flood . . . in hieroglyphic characters. When the work had been arranged in books by Agathodaemôn, son of the second Hermês³ and father of Tat, in the temple-shrines of Egypt, Manetho dedicated it to the above King Ptolemy II. Philadelphus in his *Book of Sôthis*, using the following words :

³The second Hermês is Hermês Trismegistus, the teacher.

For a discussion of the whole passage, see W. Scott, *Hermetica*, iii. pp. 492 f. He pointed out manifest breaches of continuity after χρηματίσας (end of l. 4) and after Αἰγύπτου (end of l. 12). If the intervening 8 lines are cut out (ἐκ τῶν . . . Αἰγύπτου), the sentence runs smoothly; and Scott suggested that these 8 lines originally stood in Manetho's letter after ἀ ἔμαθον. Even with this insertion there still remains a gap before ἰερά βιβλία, but apart from that lacuna, the whole becomes intelligible.

Ἐπιστολὴ Μανεθῶ τοῦ Σεβεννύτου πρὸς Πτολεμαῖον τὸν Φιλάδελφον.

“Βασιλεῖ μεγάλῳ Πτολεμαίῳ Φιλαδέλφῳ σεβαστῶ Μανεθῶ ἀρχιερεὺς καὶ γραμματεὺς τῶν κατ’ Αἴγυπτον ἱερῶν ἀδύτων, γένει Σεβεννύτης ὑπάρχων Ἡλιουπολίτης, τῷ δεσπότη μου Πτολεμαίῳ χαίρειν.

Ταῦτα περὶ τῆς ἐρμηνείας τῶν ὑπὸ τοῦ δευτέρου Ἑρμοῦ γραφέντων βιβλίων λέγει. μετὰ δὲ ταῦτα καὶ περὶ ἐθνῶν Αἰγυπτιακῶν πέντε ἐν τριάκοντα δυναστείαις ἱστορεῖ² . . .

Letter of Manetho of Sebennytus to Ptolemy Philadelphus.

“To the great King Ptolemy Philadelphus Augustus.¹ Greeting to my lord Ptolemy from Manetho, high-priest and scribe of the sacred shrines of Egypt, born at Sebennytus and dwelling at Héliopolis. It is my duty, almighty king, to reflect upon all such matters as you may desire me to investigate. So, as you are making researches concerning the future of the universe, in obedience to your command I shall place before you the Sacred Books which I have studied, written by your forefather, Hermês Trismegistus.² Farewell, I pray, my lord King.”

Such is his account of the translation of the books written by the second Hermês. Thereafter Manetho tells also of five Egyptian tribes which formed thirty dynasties . . .

(Fr. 2, p. 11, follows directly after this.)

A MS. of Celsus gives a list of medical writers, Egyptian or Greek and Latin: they include (col. 1, ll. 9-13) Hermês Trismegistus, Manetho (MS. *enmanetos*), Nechepsô, Cleopatra regina. Here Manetho is followed by Nechepsô, to whom, along with Petosiris (perhaps another name of Nechepsô), works on astrology were attributed in the Second Century B.C.: see W. Kroll and M. Pieper in *R.-E.* xvi. 2 (1935), *s.v.* Nechepsô.

Kings of Thebes.¹

Apollodorus, the chronographer, recorded another dynasty of Egyptian kings,—the Thebans, as they are called,—thirty-eight kings ruling for 1076 years. This dynasty began in Anno Mundi 2900, and came to an end in Anno Mundi 3045 [3976]. The knowledge of these kings, he says, Eratosthenes took from Egyptian records and lists, and at the king's command he translated them into the Greek language, as follows :

Of the Theban kings in thirty-eight dynasties ruling 1124 years after the Dispersion,

containing thirty-eight kings, who ruled for 1076 years, is of Theban origin, derived from a Royal List such as that of Karnak : the explanations of the names are interesting, and the variations in Nos. 11 and 15 may be due to the priests themselves. Historically the list is of no great worth : several of the names are not proper names, but Throne-names, such as are found in the Royal Lists and the Turin Papyrus (Meyer, *Aeg. Chron.* pp. 99 ff.).

Kings 1-5 correspond to Dynasty I., 13-17 to Dynasty IV., 18-22 to Dynasty VI.

“leader of men”. He had exceeding large limbs (and was therefore irresistible). Anno mundi 3090.

7. The seventh king of Thebes in Egypt was his son, Stoichos. The name means “unfeeling Arês”. He reigned for 6 years. Anno mundi 3169.
8. The eighth king of Thebes in Egypt was Gosormiês, whose name means “all-demanding”. He reigned for 30 years. Anno mundi 3175.
9. The ninth king of Thebes in Egypt was his son, Marês, whose name means “gift of the Sun”.¹ He reigned for 26 years. Anno mundi 3205.
10. The tenth king of Thebes in Egypt was Anôÿphis, whose name means “revelling”.² He reigned for 20 years. Anno mundi 3231.
11. The eleventh king of Thebes in Egypt was Sirius, whose name means “son of the iris of the eye,”³ or, as others say, “unharméd by the evil eye”. He reigned for 18 years. Anno mundi 3251.
12. The twelfth king of Thebes in Egypt was Chnubos or Gneuros, which means “gold”⁴

line 32, A. Vogliano, *Madinet Madi, Primo Rapporto* (1936): see note on No. 35 *infra*, p. 224.

² Possibly this explanation is based upon the Egyptian word *unóf*, “to rejoice” (B.G.).

³ In Egyptian *si-iri* means “son of the eye”.

⁴ *Nûb* is Egyptian for “gold”.

³ This interpretation is based upon the common Egyptian name Amenerdais, "Amûn has given him".

⁴ The Egyptian *Wôse-mi-Rê* means "Mighty like the Sun": Uôsimarês may however be intended for the first half of the *praenomen* of Ramessês II., *Wese-mê-Rê*, but this means "Rê is mighty in justice" (B.G.).

¹ The Old Chronicle is dated by Gutschmid to the end of the second century after Christ. Gelzer would refer its statements to another source than Manetho, perhaps Ptolemy of Mendés; while Meyer regards it as the work of Panodorus, c. A.D. 400 (cf. Fr. 2).

² By the name Manetho Syncellus refers, as always, to the *Book of Sôthis* (App. IV.).

³ The actual total of years from the items given, if 6 years be assigned to Dynasty XXVIII., is 36,347, i.e. 178 years

APPENDIX III.

THE OLD CHRONICLE.

(*From Syncellus*).

Now, among the Egyptians there is current an old chronography,¹ by which indeed. I believe, Manetho² has been led into error.

In 30 dynasties with 113 generations, it comprises an immense period of time [not the same as Manetho gives] in 36,525 years,³ dealing first with the Aëritæ,⁴ next with the Mestraei, and thirdly with the Egyptians. Its contents are somewhat as follows:—

Dynasties of the Gods according to the Old Chronicle.

Hêphaestus has no period assigned, because he shines night and day. Hêlios [the Sun], son of

less than the total given in the text. The number of generations, 113, is obtained by counting 1 for Dynasty XXVIII. and 7 for XXIX. This vast world-period of 36,525 years is 25 times the Sôthie period of 1461 calendar years (or 1460 Sôthie years): see *infra*, and for the Sôthie period, Intro. pp. xxix f.

⁴ Aëritæ and Mestraei are really the same as the third race, the Egyptians, the three names apparently referring to Egypt at three different dates. Aeria is an old name of Egypt (Euseb., *Chron.* in Syncellus, p. 293, Armenian Version (Schöne, p. 30), *Aegyptus quae prius Aeria dicebatur* . . .). Mestraei (Josephus, *Antiq.* 1. 6. 2)—from Mestraim (p. 7 n. 2).

Hêphaestus, ruled for 30,000 years. Then Cronos (it says) and the remaining gods, 12 in number, reigned altogether for 3984 years. Next, the eight demi-gods were kings for 217 years ; and after them 15 generations of the Sôthic Cycle are recorded with 443 years.¹

Then follow :

The Sixteenth Dynasty of Kings of Tanis, in 8 generations, for 190 years.

The Seventeenth Dynasty of Kings of Memphis, in 4 generations, for 103 years.

The Eighteenth Dynasty of Kings of Memphis, in 14 generations, for 348 years.

The Nineteenth Dynasty of Kings of Diospolis, in 5 generations, for 194 years.

The Twentieth Dynasty of Kings of Diospolis, in 8 generations, for 228 years.

The Twenty-first Dynasty of Kings of Tanis, in 6 generations, for 121 years.

The Twenty-second Dynasty of Kings of Tausis, in 3 generations, for 48 years.

The Twenty-third Dynasty of Kings of Diospolis, in 2 generations, for 19 years.

The Twenty-fourth Dynasty of Kings of Saïs, in 3 generations, for 44 years.

The Twenty-fifth Dynasty of Ethiopian Kings, in 3 generations, for 44 years.

The Twenty-sixth Dynasty of Kings of Memphis, in 7 generations, for 177 years.

¹ This total comes, not from the *Book of Sôthis* which gives 395 for the first 15, but from Eratosthenes (App. II.). A smaller total than Manetho's 3357 years was desired in order to shorten the duration of the historical age of Egypt.

The Twenty-seventh Dynasty of Persian Kings, in 5 generations, for 124 years.

[The Twenty-eighth Dynasty is here omitted— one king of Saïs reigning for 6 years.]

Then comes the Twenty-ninth Dynasty of Kings of Tanis in <7> generations for 39 years ; and finally the Thirtieth Dynasty consists of one King of Tanis for 18 years. The sum total of all the 30 Dynasties comprises 36,525 years.

If this total is broken up, or divided, 25 times into periods of 1461 years, it reveals the periodic return of the Zodiac which is commonly referred to in Egyptian and Greek books, that is, its revolution from one point back to that same point again, namely, the first minute of the first degree of the equinoctial sign of the Zodiac, the Ram as it is called by them, according to the account given in *The General Discourses of Hermês* and in the *Cyranides*.

Hence it was, I suppose, that Claudius Ptolemaeus¹ announced that the ready astronomical tables should be calculated in periods of 25 years . . .

Hence, too, the lack of harmony between such systems and our Holy Scriptures, as well as between one system and another, may be explained by the fact that this Egyptian record, which is held to be of great antiquity, assigns an immense period to Hêphaestus, and to the remaining 29² Dynasties 36,525 years, although Hêphaestus ruled over Egypt

¹ Claudius Ptolemaeus, the famous mathematician, astronomer, and geographer, c. A.D. 100-178: for his *Ready Tables* see p. 5 in the other section of this volume.

many years after the Flood and the Building of the Tower, as will be shown in the appropriate place.

The illustrious Egyptian Manetho, writing of these same 30 Dynasties, and obviously taking this as his starting-point, is widely divergent thereafter in the dates he gives, as one may learn both from what I have already said above, and from the remarks that will follow immediately. For in his three books, 113 generations are recorded in 30 Dynasties, and the time which he assigns amounts in all to 3555 years, beginning with Anno mundi 1586 and ending with 5147 [5141], or some 15 years before the conquest of the world by Alexander of Macedon.

If therefore one subtracts from this total the 656 years before the Flood in order to make up [with 1586] the 2242 years from Adam to the Flood,—these 656 years being regarded as falsely assigned or non-existent,—and the 534 years from the Flood to the Building of the Tower, the Confusion of Tongues, and the Dispersion of the Peoples, one will clearly find the rise of the kingdom of Egypt under the first Egyptian king, Mestraïm, who is by Manetho called Ménês, which began in the year 2776, the year of Adam, and continued down to Nectanabô, the last king of Egypt. Thus the sum total from Mestraïm down to this Nectanabô is 2365 years, which takes us, as has already been stated, to Anno mundi 5147 [5141], approximately 15 years before the rule of Alexander the Founder.

It is not possible to divide the kings of this "Cycle" into dynasties, for their sequence is unchronological: e.g. 18-24 belong to Dynasties XIX. and XX., 26-29, 32 to the Hyksôs period, 33-48 to Dynasty XVIII., 49, 58 to Dynasty XIX., 50, 51 to Dynasty XXVI., 59-61 to Dynasty I., 63-67 to Dynasty XXI., 68-70 to Dynasty XXIII., 74 to Dynasty XXIV., 75-77 to Dynasty XXV., and 79-86 to Dynasty XXVI.

² The name Usimarê(s) is the first part of the *praenomen* of Ramessês II. : see p. 221 n. 4.

³ It is tempting to see in this name the Egyptian *Ramesese-o*, "Ramessês the Great," although this term, so commonly used in modern times, is not found in Egyptian records (B.G.).

⁴ On Abraham's descent into Egypt, see Peet, *Egypt and the Old Testament*, 1922, pp. 47 ff. (Abraham went down into Egypt in the First Intermediate Period, during Dynasties VII.-X., and left Egypt before 2081 B.C.) Sir L. Woolley, on the other hand, is satisfied with the traditional date of the birth of Abraham at Ur, c. 2000 B.C. ; but he believes that the patriarch was not a single man, but a composite character (Abram, Abraham)—see *Abraham: Recent Discoveries and Hebrew Origins*, 1936.

⁵ This description "son of Uaphrês" is a remarkable anachronism : a king of Dynasty XIX. or XX. is said to be the son of a king of Dynasty XXVI.

Dynasty of the Sôthic Cycle as it is called in Manetho, the total of years from the first king and founder of Egypt, Mestraïm, is 700 belonging to 25 kings, *i.e.* from the general cosmic year 2776, in which the Dispersion took place in the 34th year of the rule of Arphaxad¹ and the 5th year of Phalec.² Next in the succession were 4 kings of Tanis, who ruled Egypt in the Seventeenth Dynasty for 254 [259] years, according to the following computation.

26. Silitês (the first of the 6 kings of the Seventeenth Dynasty in Manetho), 19 years.
27. Baiôn, 44 years.
28. Apachnas, 36 years.
29. Aphôphis, 61 years.

Some say that this king was at first called Pharaoh, and that in the 4th year of his kingship Joseph came as a slave into Egypt.³ He appointed Joseph lord of Egypt and all his kingdom in the 17th year of his rule, having learned from him the interpretation of the dreams and having thus proved his divine wisdom.

² Phalec or Peleg (= division): "for in his days was the earth divided" (*Genesis* x. 25). Cf. the name of the town Phaliga on the Euphrates,—not that the patriarch Peleg is to be connected directly with this town (W. F. Albright, *The Archaeology of Palestine and the Bible*², 1932-3, p. 210).

46. Armaeus, also called Danaus, 9 years.

This king, fleeing from his brother Ramessês, also called Aegyptus, was driven from his kingdom of Egypt and came to Greece. Ramessês, his brother, whose other name was Aegyptus, ruled Egypt for 68 years, changing the name of his country to Egypt after his own name. Its previous name was Mestraea, and among the Greeks Aeria. Now Danaus or Armaeus took possession of Argos and, driving out Sthenelus the son of Crotôpus, ruled over the Argives. His descendants thereafter were called Danaïdæ down to Eurystheus son of Sthenelus, the son of Perseus. Next to these, after Pelops the Pelopidæ succeeded to the kingdom: the first of these was Atreus.

¹ Susakeim, apparently, is Shoshenq, or Sesonehôsis, the first king of Dynasty XXII. (Fr. 60, 1): Josephus, *Antiq.*, viii. § 210, has Susakos.

² In *O.T. 2 Chron.* xii. 3 it is said that Shishak brought up, along with the Ethiopians, the Lubims (Libyans) and the Sukkiims : in the LXX the last are the Trôglodytes, *i.e.* the "Cave-dwellers" along the west shore of the Red Sea (see Strabo, xvi. 4. 17). G. W. Murray, *Sons of Ishmael*, 1935, p. 18, suspects that the Ethiopians were negro troops or perhaps Beja nomads (*i.e.* Bedouin). "At any rate Shishak, like the great Mohammed Ali after him, realized the importance of Bedouin auxiliaries on a desert campaign."
