

classical MYTHOLOGY

Seventh Edition

MARK P.O. MORFORD  ROBERT J. LENARDON

Featuring the authors' extensive, clear, and faithful translations of original sources, *Classical Mythology, Seventh Edition*, retells the myths and legends of Greece and Rome in a lucid and engaging style. Building on the best-selling tradition of previous editions, it incorporates a dynamic combination of poetic narratives and enlightening commentary to make classical myths come alive for students. The discussion covers comparative and interpretative approaches as well as evidence from art and archaeology. The authors also examine the enduring survival of classical mythology in the fields of art, literature, music, dance, and film.

Classical Mythology, Seventh Edition, enables students to explore the fascinating nature of Greek and Roman gods, goddesses, heroes, and heroines and to appreciate the most significant ancient sources of classical legends and myths. The text is beautifully enhanced by over 150 illustrations, in both color and black and white.

classical mythology, seventh edition, features:

- **More extensive translations of works by the ancient authors:** Selections by Greek authors include all thirty-three Homeric Hymns; the important passages in Hesiod's *Theogony* and *Works and Days*; and excerpts from Homer, Aeschylus, Sophocles, Euripides, Herodotus, Plato, Lucian, Pindar, the Pre-Socratic philosophers, and the Lyric poets. Works by Latin authors including Ovid, Vergil, Statius, Manilius, and Seneca are also provided.
- **An expanded art program:** Sixty-six new illustrations—selected from both the ancient and the modern world—appear throughout the text and are accompanied by substantial and informative captions. **Three new maps** are also included.
- **Text boxes**—incorporated for the first time—explore a variety of new topics and highlight interpretative approaches.
- **A selected bibliography** is included for each chapter.
- **More explanatory material** is integrated throughout, including a “Glossary of Mythological Words and Phrases in English.”
- **Companion website:** www.classicalmythology.org includes chapter-by-chapter summaries, suggested activities, maps, and practice test questions. The website has been revised to enhance the multifaceted subjects treated in the text and to provide links to numerous helpful resources.

about the authors

Mark P. O. Morford is Professor Emeritus of Classics at the University of Virginia.

Robert J. Lenardon is Professor Emeritus of Classics at The Ohio State University.

COVER DESIGN: MARY BELIBASAKIS

COVER ART: AMPHORA WITH SCENE OF THE BIRTH OF ATHENA, GREEK; GREECE, ATTICA, ATHENS, ARCHAIC PERIOD, ABOUT 540 B.C.; GROUP E, CERAMIC, BLACK FIGURE; HEIGHT 39.4CM (15 1/2 IN.); HENRY LILLIE PIERCE FUND 00.330. PREFACE	xiii
ABOUT THE AUTHORS	xvii

PART ONE THE MYTHS OF CREATION: THE GODS

1	Interpretation and Definition of Classical Mythology	3
	<i>Appendix to Chapter 1: Sources for Classical Mythology</i>	26
2	Historical Background of Greek Mythology	39
3	Myths of Creation	51
	<i>Additional Reading: Hesiod and the Muses (Theogony, 1–115)</i>	71
4	Zeus' Rise to Power: The Creation of Mortals	76
	<i>Additional Reading: Parallels in Myths of Greece and the Ancient Near East</i>	98
5	The Twelve Olympians: Zeus, Hera, and Their Children	108
6	The Nature of the Gods	128
7	Poseidon, Sea Deities, Group Divinities, and Monsters	147
8	Athena	157
9	Aphrodite and Eros	171
10	Artemis	200
	<i>Additional Reading: Selections from Euripides' Hippolytus</i>	212
11	Apollo	226
	<i>Additional Reading: The Homeric Hymn to Pythian Apollo</i>	246
12	Hermes	257
13	Dionysus, Pan, Echo, and Narcissus	274
14	Demeter and the Eleusinian Mysteries	307
15	Views of the Afterlife: The Realm of Hades	328
16	Orpheus and Orphism: Mystery Religions in Roman Times	354

PART TWO THE GREEK SAGAS: GREEK LOCAL LEGENDS

- 17 The Theban Saga 375
 18 The Mycenaean Saga 404
Additional Reading: Orestes and the Three Electras 416
 19 The Trojan Saga and the *Iliad* 436
 20 The Returns and the *Odyssey* 482
 21 Perseus and the Legends of Argos 505
 22 Heracles 519
 23 Theseus and the Legends of Attica 548
 24 Jason, Medea, and the Argonauts 573
Additional Reading: Jason and Medea in Euripides 589
 25 Myths of Local Heroes and Heroines 602

PART THREE THE NATURE OF ROMAN MYTHOLOGY

- 26 Roman Mythology and Saga 623

PART FOUR THE SURVIVAL OF CLASSICAL MYTHOLOGY

- 27 Classical Mythology in Literature and Art 667
 28 Classical Mythology in Music, Dance, and Film 705

PLATES, MAPS AND FIGURES

COLOR PLATES

following pages 299 and 361

- 1 *Jupiter and Thetis*, by Jean-Auguste-Dominique Ingres
- 2 *Dionysus*, kylix by Exekias
- 3 *Christus Apollo*, third-century vault mosaic
- 4 *Lycurgus Cup*, early fourth-century glass
- 5 *The Rape of Helen by Paris*, attributed to a follower of Fra Angelico
- 6 *The Feast of the Gods*, by Giovanni Bellini
- 7 *Venus and Adonis*, by Paolo Veronese
- 8 *The Discovery of the Infant Erichthonius*, by Peter Paul Rubens
- 9 *Nessus and Deianeira*, by Guido Reni
- 10 *Las Hilanderas (The Weavers)*, by Diego Velazquez
- 11 *Cephalus and Aurora*, by Nicolas Poussin
- 12 *The Forge of Vulcan*, by Diego Velázquez
- 13 *The Triumph of Neptune and Amphitrite*, by Nicolas Poussin
- 14 *Pilgrimage to the Island of Cythera*, by Antoine Watteau
- 15 *Earth: Vertumnus and Pomona*, by François Boucher
- 16 *Ariadne Asleep on the Island of Naxos*, by John Vanderlyn
- 17 *Jupiter and Semele*, by Gustave Moreau
- 18 *Pandora*, by Odilon Redon
- 19 *Icarus*, by Henri Matisse
- 20 *Hector and Andromache*, by Giorgio de Chirico
- 21 *Landscape for Philemon and Baucis*, by David Ligare

BLACK-AND-WHITE PLATES

- 22 *The Endymion Sarcophagus*, marble sarcophagus 59
- 23 *Aurora*, artist unknown 60
- 24 *Saturn Devouring One of His Children*, by Francisco Goya y Lucientes 62
- 25 *Gigantomachy*, detail from the north frieze of the Treasury of the Siphnians at Delphi 67
- 26 *Zeus Attacks Typhoeus*, from an Apulian red-figure oinochoe by the Arpi painter 68
- 27 *Nawura, Dreamtime Ancestor Spirit*, by Djawida Nalorlman 69
- 28 *The Ancient of Days*, by William Blake 70
- 29 *Zeus*, bronze found in the sea off Cape Artemisium 77

- 30 *Atlas and Prometheus*, from a Laconian black-figure cup 84
- 31 *Prometheus*, by Gustave Moreau 89
- 32 *Zeus, Ganymede, and Hestia*, from a red-figure cup by Olto 110
- 33 *Hera*, Roman marble copy of a Greek bronze 112
- 34 *The Return of Hephaestus*, from an Attic black-figure column krater by Lydos 118
- 35 *Ares*, Roman marble copy of a Greek original (possibly by Skopas) 123
- 36 *Croesus on the Pyre*, from an Attic red-figure amphora by Myson 135
- 37 *Nereid*, by Georges Braque 148
- 38 *Poseidon (Neptune) and Amphitrite with Their Attendants*, relief from the Altar of Domitius Ahenobarbus 150
- 39 *Neptune and Triton*, by Gian Lorenzo Bernini 151
- 40 *The Birth of Athena*, from an Athenian black-figure amphora 158
- 41 *Athena Parthenos*, reconstruction by N. Leipen after Pheidias 162
- 42 *Pallas Athena*, by Gustav Klimt 163
- 43 *Athena*, from an Attic amphora by the Andocides painter 165
- 44 *Mourning Athena*, relief from the Acropolis 168
- 45 *The Birth of Aphrodite*, marble relief (from *The Ludovisi Throne*) 172
- 46 *Aphrodite of Melos (Venus de Milo)*, Greek marble from Melos 173
- 47 *The Godhead Fires*, by Edward Burne-Jones 175
- 48 *Venus Discovering the Dead Adonis*, by a Neapolitan follower of José de Ribera 178
- 49 *Venus and Anchises*, by Annibale Carracci 181
- 50 *Psyche Is Brought to Olympus*, fresco by Raphael and assistants 194
- 51 *Artemis the Huntress*, Roman copy of a fourth-century Greek bronze 201
- 52 *Death of the Children of Niobe*, from an Attic red-figure krater by the Niobid painter 202
- 53 *The Death of Actaeon*, from an Athenian krater by the Pan painter 205
- 54 *Artemis of Ephesus*, alabaster and bronze 209
- 55 *Apollo Belvedere*, Roman marble copy of a fourth-century Greek bronze 229
- 56 *Apollo and Daphne*, attributed to Antonio del Pollaiuolo 238
- 57 *Apollo and Daphne*, by Gian Lorenzo Bernini 239
- 58 *Apollo*, from the temple of Zeus at Olympia 246
- 59 *Apollo Delphinus*, from an Attic red-figure hydria by the Berlin painter 250–251
- 60 *Mercury*, by Giovanni Bologna 268
- 61 *Hermes*, from an Attic red-figure cup by the Euaion painter 269
- 62 *The Death of Semele*, by Peter Paul Rubens 275
- 63 *The Indian Triumph of Dionysus*, from a Roman sarcophagus 276
- 64 *Maenad*, from an Attic kylix by the Brygos painter 292
- 65 *Dionysus with Satyrs and Maenads*, from an Athenian black-figure amphora 295
- 66 *Pan Pursuing a Goatherd*, from an Attic red-figure krater by the Pan painter 298
- 67 *Echo and Narcissus*, by Nicolas Poussin 300
- 68 *Demeter*, cult-statue from Cnidus 308
- 69 *The Abduction of Persephone*, by Peter Paul Rubens 309
- 70 *Demeter*, by Jean Arp 318
- 71 *Hades and Persephone*, terra-cotta relief from Locri 315
- 72 *The Departure of Triptolemus*, from an Attic red-figure cup by Makron 320
- 73 *The Underworld*, from an Apulian red-figure krater by the Underworld painter 332
- 74 *Aeneas and the Sibyl in the Underworld*, by Jan Brueghel the Elder (detail) 344
- 75 *Spring: Orpheus and Eurydice*, by Eugène Delacroix 355
- 76 *Orpheus, Eurydice, and Hermes*, marble copy of a fifth-century Greek relief 357
- 77 *Orpheus and Eurydice*, by Isamu Noguchi 359
- 78 *The Rape of Europa*, limestone metope from Selinus 376
- 79 *The Rape of Europa*, by Titian 377
- 80 *Oedipus and the Sphinx*, from an Attic red-figure cup by the Oedipus painter 382

- 81 *Oedipus and the Sphinx*, by Gustave Moreau 384
- 82 *Oedipus Rex*, by Max Ernst 393
- 83 *Adrastus and Thyestes at Sicyon*, from an Apulian red-figure krater by the Darius painter 408
- 84 *The Death of Agamemnon*, from an Attic red-figure krater 410
- 85 *Orestes at Delphi*, from an Apulian red-figure krater 413
- 86 *The Judgment of Paris*, by Lucas Cranach the Elder 439
- 87 *The Death of Sarpedon*, from an Athenian red-figure krater by Euphronios 445
- 88 *The Anger of Achilles*, by Jacques-Louis David 452
- 89 *Hector and Achilles*, by Eunice Pinney 465
- 90 *The Funeral of Patroclus*, from an Apulian red-figure krater by the Darius painter 466
- 91 *The Building of the Trojan Horse*, by Giovanni Domenico Tiepolo 474
- 92 *The Sack of Troy*, from an Attic red-figure hydria by the Kleophrades painter 476
- 93 *Study for "Aeneas' Flight from Troy,"* by Federico Barocci 478
- 94 *Aeneas Carrying Anchises*, from an Attic red-figure krater 479
- 95 *Hermes Ordering Calypso to Rescue Odysseus*, by Gerard de Laireesse 485
- 96 *Calypso and Ulysses*, by Emily Marshall 486
- 97 *The Blinding of Polyphemus*, from a proto-Attic vase from Eleusis 488
- 98 *Circe and Her Lovers in a Landscape*, by Dosso Dossi 489
- 99 *Odysseus and the Sirens*, from an Athenian red-figure stamnos 491
- 100 *The Return of Odysseus*, by Pintoricchio 494
- 101 *Penelope at Her Loom and The Washing of Odysseus' Feet*, from an Attic red-figure cup 496-497
- 102 *Danaë and the Chest*, from an Attic red-figure lekythos 507
- 103 *Perseus Beheads Medusa*, limestone metope from Selinus 510
- 104 *Medusa*, by Harriet Hosmer 511
- 105 *Perseus Attacks the Sea Monster*, from an Etruscan black-figure hydria 512
- 106 *Perseus and Andromeda*, by Titian 513
- 107 *The Baleful Head*, by Edward Burne-Jones 515
- 108 *Hercules and the Lernaean Hydra*, by Gustave Moreau 524
- 109 *Heracles, Assisted by Athena, Cleans the Augean Stables*, from the Temple of Zeus at Olympia 526
- 110 *Heracles Shows Cerberus to Eurystheus*, from an Etruscan hydria 529
- 111 *Heracles and the Cercopes*, metope from Selinus 531
- 112 *Hylas and the Nymphs*, by J. W. Waterhouse 532
- 113 *Heracles and Apollo Struggle for the Pythian Tripod*, from an Attic red-figure amphora attributed to the Geras painter 535
- 114 *The Death of Nessus*, from an Attic black-figure amphora 536
- 115 *The Apotheosis of Hercules*, by Peter Paul Rubens 538
- 116 *The Choice of Hercules*, by Annibale Carracci 540
- 117 *Hercules Prodicus*, engraving by T. van Thulden after Peter Paul Rubens 542
- 118 *The Farnese Hercules*, copy by Glycon after Lysippus 543
- 119 *Hercules Victor*, by Hendrik Goltzius 544
- 120 *The Labors of Theseus*, from an Attic red-figure kylix 556
- 121 *Theseus and Amphitrite*, from an Attic red-figure cup by the painter Onesimos and signed by the potter Euphronios 559
- 122 *Death of a Monster*, by Pablo Picasso 560
- 123 *Dionysus and Ariadne*, marble sarcophagus 562
- 124 *Dionysus and Ariadne*, from a bronze krater (the Derveni Krater) 563
- 125 *The Fall of Icarus*, by Pieter Brueghel the Elder 568
- 126 *Jason Is Disgorged by the Dragon That Guards the Golden Fleece*, interior of an Athenian red-figure cup by Douris 579
- 127 *Jason Takes the Golden Fleece*, by Peter Paul Rubens 581
- 128 *Medea*, by Eduardo Paolozzi 586

- 129 *Medea Leaves Corinth in a Chariot Drawn by Dragons*, from a South Italian red-figure krater attributed to the Policoro painter 587
- 130 *Deidamia and Eurytion*, marble group from the west pediment of the Temple of Zeus at Olympia 604
- 131 *The François Vase*, Attic krater by the potter Ergotimus and the painter Kleitias 610–611
- 132 *Pyramus and Thisbe*, by Hans Wechtlin 619
- 133 *Jupiter, Juno, and Minerva*, marble panel relief from the Arch of Trajan at Benevento 628
- 134 *Dido and Anna*, by Washington Allston 651
- 135 *Mars and Rhea Silvia*, by Peter Paul Rubens 654
- 136 *Romulus and Remus*, by Alexander Calder 655
- 137 *The Oath of the Horatii*, by Jacques-Louis David 659
- 138 *Rape of Lucrece*, by Reuben Nakian 661
- 139 *Orion*, woodcut from *Hygini Poeticon Astronomicon Liber* 671
- 140 *Book 3 of Ovids Metamorphosis English'd*, by George Sandys, engraving by Francis Clein and Salomon Savery 680
- 141 *Sky-Map of the Northern Hemisphere*, by Albrecht Dürer 697

PREFACE

This is the seventh edition of *Classical Mythology*, which was first published in 1971. Successive revisions have been extensive, in grateful response to sensitive, knowledgeable, and appreciative critics over these many years. They have encouraged us to remain firm in our conviction that the literary tradition of Greek and Roman mythology must always remain our first consideration but have also confirmed our need to incorporate, as much as possible, additional comparative and interpretative approaches and the evidence from art and archaeology.

As a result, this new edition of our work, more than ever, stands as a comprehensive study of classical mythology, where one may go to explore the nature of the Greek and Roman gods, goddesses, heroes, and heroines and to enjoy the most significant sources that constitute the substance of their legends. Enriched with this knowledge and appreciation, readers will be prepared to make exciting comparisons of all sorts—anthropological, psychological, literary, artistic, and musical—and to pursue whatever further explorations they may desire.

Our translations of the ancient authors become more extensive with each edition. We include here, among Greek authors, all thirty-three Homeric Hymns; all the important passages in Hesiod's *Theogony* and *Works and Days*; excerpts (many of them substantial) from Homer, Aeschylus, Sophocles, Euripides, Herodotus, Plato, Lucian, Pindar, the pre-Socratic philosophers, and the lyric poets; and, among Latin authors, selections from Ovid, Vergil, Statius, Manilius, and Seneca. All translations are our own.

We have always considered the powerful influence of classical mythology upon diverse artistic forms (painting, sculpture, literature, music, opera, dance, theater, and cinema) to be a most vital, enjoyable, and rewarding study. This is why we believe our treatment (in Part 4) of the survival of this influence and our inclusion of depictions of myth in art from ancient through modern times to be of the utmost importance. The tenacious persistence of Greek and Roman mythology as a living force throughout the ages but particularly in contemporary society has become one of its most identifiable characteristics. After all, the beauty and power of its inspiration have never died. It is retold and reinter-

preted with infinite variations, repeatedly and continuously; these gods and goddesses, these heroes and heroines and their legends never have remained fixed but constantly change through refreshingly new metamorphoses that illuminate not only the artists but also their society and their times. We can never really pronounce with finality upon the myth of Orpheus and Eurydice and the legend of Heracles, or upon the character of Achilles or Helen, because no sooner is the pronouncement made than the myth, the legend, and its characters have been transformed anew and we are compelled to include and discuss the most recent transformations and the fresh insights they provide for our own world. This eternal afterlife of classical mythology is truly miraculous.

We each take the major responsibility for certain sections: Professor Lenardon has written Chapters 1–16 and Chapter 28, and Professor Morford Chapters 17–27. In this edition, as in the many revisions that have followed the first, both of us have contributed freely throughout the text.

There are many more illustrations in this edition, and Professor Morford is responsible for both the selections and the captions. Research for ancient representations has been made far easier by the publication, now complete in eight double volumes, of the *Lexicon Iconographicum Mythologiae Classicae (LIMC)*, the essential foundation of any research into ancient art on mythological subjects. Professor Morford also acknowledges the help of Thomas Carpenter's survey, *Art and Myth in Ancient Greece*, and, for art and music since 1300, Jane Davidson Reid's *Oxford Guide to Classical Mythology in the Arts*. Nevertheless, he has found that his own reading and observation from constant visits to museums and exhibitions (essential for contemporary art) have been the primary foundations of his selection and commentary. Professional art historians are quite arbitrary in the details that they choose to give about works of art, particularly those concerning size (which even *LIMC* does not give) and medium. The most detailed source for Greek vases, the *Corpus Vasorum Antiquorum*, is incomplete and patchy in its coverage. The most time-consuming labor has been that of finding out details of size, which are necessary if the student is to appreciate a work of art in its context. In nearly every case these details have been supplied, and where they are missing (in about six of the illustrations), they simply have not been available in any form.

Consistency in spelling has proven impossible to attain. In general we have adopted Latinized forms (Cronus for Kronos) or spellings generally accepted in English-speaking countries (Heracles not Herakles). The spelling of Greek names has become fashionable today, and so we have included an Appendix listing the Greek spellings with their Latinized and English equivalents.

NEW TO THIS EDITION

Minor revisions have been made throughout the text; the major revisions and additions are the following:

The Introduction in previous editions has been revised and expanded to become two chapters: Chapter 1, "Interpretation and Definition of Classical Mythology," has additional material on important theorists with expanded treatments of feminist issues, homosexuality, and rape; Chapter 2, "Historical Background of Greek Mythology," incorporates the most recent results of the ongoing excavation of Troy under the direction of Manfred Korfmann.

Chapter 3, "Myths of Creation," now ends with biographical details about Hesiod, followed by a translation of *Theogony*, lines 1–115, entitled "Hesiod and the Muses."

Added to the end of Chapter 4, "Zeus' Rise to Power: The Creation of Mortals," is a treatment of "Parallels in Myths of Greece and the Ancient Near East," which surveys major themes in Near Eastern epics that are also found in Greek mythology.

A summary and elucidation of Euripides' *Medea* is appended to Chapter 24, "Jason, Medea, and the Argonauts," which focuses upon the translation of the three crucial scenes between Jason and Medea, with interpretative commentary.

Additional translations are found in Chapter 19, which now includes the scene from the *Iliad* in which Achilles learns of the death of Patroclus, is consoled by his mother Thetis, and reaches the tragic decision to face his own death by returning to battle (Book 18, lines 18–38 and 50–126); and in Chapter 20, which now translates the *Odyssey*, Book 19, lines 525–553, an excerpt from Penelope's first encounter with Odysseus disguised as a beggar, in which she describes her dream about her geese.

Chapter 28, "Classical Mythology in Music, Dance, and Film," has been significantly revised and expanded. The American contribution has in particular received more detailed attention, and the dance section is new.

In general, more interpretative and exploratory material has been added throughout, both in the text and in boxes. Some of these additions, including the "Glossary of Mythological Words and Phrases in English," come from *A Companion to Classical Mythology*, which had previously been published to supplement the fifth edition of *Classical Mythology*.

Every chapter now includes its own Select Bibliography.

Finally, more than fifty new black-and-white illustrations and two color plates have been added, and the maps have been revised to increase their clarity and readability.

As a result of these many additions to the text, our work has become more comprehensive than ever, a single substantive book embracing the content, interpretation, and influence of classical mythology.

WEBSITE

The Website for *Classical Mythology* has been revised to elucidate and enhance, to an even greater degree, the multifaceted subjects treated in the text. The site

features chapter-by-chapter summaries, suggested activities, maps, and test questions. We have harnessed the potential of the Internet to search out resources of every sort, particularly in the visual arts. Included are updated bibliographies and discographies of works in music and film on CD, VHS, and DVD, keyed to each chapter. We encourage readers to take a look for themselves at the many riches and rewards that can be found there: www.oup-usa.org/sc/0195143388.

ACKNOWLEDGMENTS

We have received help and encouragement from many colleagues, students, and friends over the years, and in the publishing of each of the seven editions numerous people have provided valuable critical reviews or been involved in editorial development and production. To all who have contributed so much, we are deeply grateful.

We are particularly gratified that this new edition is published by Oxford University Press, and we want to thank Robert Miller, Executive Editor, for his efforts on our behalf, and also Liam Dalzell and all the others who have been responsible for editing and production.

Michael Sham, of Siena College, has also made valuable contributions, particularly in the creation of our Website and its revision to accompany the seventh edition.

From the beginning, Charles Alton McCloud has shared with us his expertise in music, dance, and theater.

Martha Morford was a constant support to the authors, with her critical acumen and profound knowledge of the history of art, and she is remembered with deep gratitude.

Mark P. O. Morford
Robert J. Lenardon

ABOUT THE AUTHORS

Mark Morford is Professor Emeritus of Classics at the University of Virginia, where he joined the faculty in 1984 after teaching for twenty-one years at The Ohio State University and serving as Chairman of the Department of Classics. He also served as Kennedy Professor of Renaissance Studies at Smith College, where he holds research appointments in the Department of Art and the Mortimer Rare Book Room of the Neilson Library. As Vice President for Education of the American Philological Association he actively promoted the cooperation of teachers and scholars in schools and universities. Throughout his fifty years of teaching he has been devoted to bringing together teachers of classical subjects and teachers in other disciplines. He has published books on the Roman poets Persius and Lucan and the Renaissance scholar Justus Lipsius (*Stoics and Neostoics: Lipsius and the Circle of Rubens*), as well as many articles on Greek and Roman literature and Renaissance scholarship and art. His book *The Roman Philosophers* was published in 2002.

Robert Lenardon is Professor Emeritus of Classics at The Ohio State University, where he was on the faculty for twenty-five years and served as Director of Graduate Studies in Classics. He has taught at several other universities, among them the University of Cincinnati, Columbia University, and the University of British Columbia. He was a Visiting Fellow at Corpus Christi College, Cambridge University, and has written articles on Greek history and classics and a biography, *The Saga of Themistocles*. He has served as book review editor of *The Classical Journal* and presented radio programs about mythology in music, a subject dear to his heart; the afterlife of classical subjects and themes in literature, film, and dance have also become favorite areas of teaching and research. For the fall semester of 2001, he was appointed Visiting Distinguished Scholar in Residence at the University of Louisville, Kentucky.

PART ONE

The Myths of Creation
THE GODS

INTERPRETATION AND DEFINITION OF CLASSICAL MYTHOLOGY

The impossibility of establishing a satisfactory definition of *myth* has not deterred scholars from developing comprehensive theories on the meaning and interpretation of myth, often to provide bases for a hypothesis about its origins. Useful surveys of the principal theories are readily available, so we shall attempt to touch upon only a few theories that are likely to prove especially fruitful or are persistent enough to demand attention.¹ One thing is certain: no single theory of myth can cover all kinds of myths. The variety of traditional tales is matched by the variety of their origins and significance; as a result, no monolithic theory can succeed in achieving universal applicability. Definitions of myth will tend to be either too limiting or so broad as to be virtually useless. In the last analysis, definitions are enlightening because they succeed in identifying particular characteristics of different types of stories and thus provide criteria for classification.

The word *myth* comes from the Greek word *mythos*, which means “word,” “speech,” “tale,” or “story,” and that is essentially what a myth is: a story. Some would limit this broad definition by insisting that the story must have proven itself worthy of becoming traditional.² A myth may be a story that is narrated orally, but usually it is eventually given written form. A myth also may be told by means of no words at all, for example, through painting, sculpture, music, dance, and mime, or by a combination of various media, as in the case of drama, song, opera, or the movies.

Many specialists in the field of mythology, however, are not satisfied with such broad interpretations of the term *myth*. They attempt to distinguish “true myth” (or “myth proper”) from other varieties and seek to draw distinctions in terminology between myth and other words often used synonymously, such as *legend*, *saga*, and *folktale*.³

MYTH, SAGA OR LEGEND, AND FOLKTALE

Myth is a comprehensive (but not exclusive) term for stories primarily concerned with the gods and humankind’s relations with them. **Saga**, or **legend** (and we use the words interchangeably), has a perceptible relationship to history; how-

ever fanciful and imaginative, it has its roots in historical fact.⁴ These two categories underlie the basic division of the first two parts of this book into "The Myths of Creation: The Gods" and "The Greek Sagas: Greek Local Legends." Interwoven with these broad categories are **folktales**, which are often tales of adventure, sometimes peopled with fantastic beings and enlivened by ingenious strategies on the part of the hero; their object is primarily, but not necessarily solely, to entertain. **Fairytales** may be classified as particular kinds of folktales, defined as "short, imaginative, traditional tales with a high moral and magical content;" a study by Graham Anderson identifying fairytales in the ancient world is most enlightening.⁵

Rarely, if ever, do we find a pristine, uncontaminated example of any one of these forms. Yet the traditional categories of myth, folktale, and legend or saga are useful guides as we try to impose some order upon the multitudinous variety of classical tales.⁶ How loose these categories are can be seen, for example, in the legends of Odysseus or of the Argonauts, which contain elements of history but are full of stories that may be designated as myths and folktales. The criteria for definition merge and the lines of demarcation blur.

MYTH AND TRUTH

Since, as we have seen, the Greek word for myth means "word," "speech," or "story," for a critic like Aristotle it became the designation for the plot of a play; thus, it is easy to understand how a popular view would equate myth with fiction. In everyday speech the most common association of the words *myth* and *mythical* is with what is incredible and fantastic. How often do we hear the expression, "It's a myth," uttered in derogatory contrast with such laudable concepts as reality, truth, science, and the facts?

Therefore important distinctions may be drawn between stories that are perceived as true and those that are not.⁷ The contrast between myth and reality has been a major philosophical concern since the time of the early Greek philosophers. Myth is a many-faceted personal and cultural phenomenon created to provide a reality and a unity to what is transitory and fragmented in the world that we experience—the philosophical vision of the afterlife in Plato and any religious conception of a god are mythic, not scientific, concepts. Myth provides us with absolutes in the place of ephemeral values and with a comforting perception of the world that is necessary to make the insecurity and terror of existence bearable.⁸

It is disturbing to realize that our faith in absolutes and factual truth can be easily shattered. "Facts" change in all the sciences; textbooks in chemistry, physics, and medicine are sadly (or happily, for progress) soon out of date. It is embarrassingly banal but fundamentally important to reiterate the platitude that myth, like art, is truth on a quite different plane from that of prosaic and transitory factual knowledge. Yet myth and factual truth need not be mutually ex-

clusive, as some so emphatically insist. A story embodying eternal values may contain what was imagined, at any one period, to be scientifically correct in every factual detail; and the accuracy of that information may be a vital component of its mythical *raison d'être*. Indeed one can create a myth out of a factual story, as a great historian must do: any interpretation of the facts, no matter how credible, will inevitably be a mythic invention. On the other hand, a different kind of artist may create a nonhistorical myth for the ages, and whether it is factually accurate or not may be quite beside the point.⁹

Myth in a sense is the highest reality; and the thoughtless dismissal of myth as untruth, fiction, or a lie is the most barren and misleading definition of all. The dancer and choreographer Martha Graham, sublimely aware of the timeless "blood memory" that binds our human race and that is continually revoked by the archetypal transformations of mythic art, offers a beautifully concise summation: as opposed to the discoveries of science that "will in time change and perhaps grow obsolete . . . art is eternal, for it reveals the inner landscape, which is the soul of man."¹⁰

MYTH AND RELIGION

As we stated earlier, true myth (as distinguished from saga and folktale) is primarily concerned with the gods, religion, and the supernatural. Most Greek and Roman stories reflect this universal preoccupation with creation, the nature of god and humankind, the afterlife, and other spiritual concerns.

Thus mythology and religion are inextricably entwined. One tale or another once may have been believed at some time by certain people not only factually but also spiritually; specific creation stories and mythical conceptions of deity may still be considered true today and provide the basis for devout religious belief in a contemporary society. In fact, any collection of material for the comparative study of world mythologies will be dominated by the study of texts that are, by nature, religious. Religious ceremonies and cults (based on mythology) are a recurrent theme in chapters to follow; among the examples are the worship of Zeus at Olympia, Athena in Athens, Demeter at Eleusis, and the celebration of other mystery religions throughout the ancient world. The ritualist interpretation of the origins of mythology is discussed later in this chapter.

Mircea Eliade. Mircea Eliade, one of the most prolific twentieth-century writers on myth, lays great emphasis upon religious aura in his conception of myth as a tale satisfying the yearning of human beings for a fundamental orientation rooted in a sacred timelessness. This yearning is only fully satisfied by stories narrating the events surrounding the beginnings and origins of things. Eliade believes that God once in a holy era created the world and this initial cosmogony becomes the origin myth, the model for creations of every kind and stories about them. His concept develops a complex mysticism that is difficult. Like a religious sacrament, myth provides in the imagination a spiritual release from

historical time. This is the nature of true myths, which are fundamentally paradigms and explanations and most important to an individual and society.¹¹ This definition, which embraces the explanatory nature of mythology, brings us to another universal theory.

MYTH AND ETIOLOGY

There are some who maintain that myth should be interpreted narrowly as an explication of the origin of some fact or custom. Hence the theory is called *etiological*, from the Greek word for cause (*aitia*). In this view, the mythmaker is a kind of primitive scientist, using myths to explain facts that cannot otherwise be explained within the limits of society's knowledge at the time. This theory, again, is adequate for some myths, for example, those that account for the origin of certain rituals or cosmology; but interpreted literally and narrowly it does not allow for the imaginative or metaphysical aspects of mythological thought.

Yet, if one does not interpret *etiological* ("the assignment of causes or origins") too literally and narrowly but defines it by the adjective *explanatory*, interpreted in its most general sense, one perhaps may find at last the most applicable of all the monolithic theories. Myths usually try to explain matters physical, emotional, and spiritual not only literally and realistically but figuratively and metaphorically as well. Myths attempt to explain the origin of our physical world: the earth and the heavens, the sun, the moon, and the stars; where human beings came from and the dichotomy between body and soul; the source of beauty and goodness, and of evil and sin; the nature and meaning of love; and so on. It is difficult to tell a story that does not reveal, and at the same time somehow explain, something; and the imaginative answer usually is in some sense or other scientific or theological. The major problem with this universal etiological approach is that it does nothing to identify a myth specifically and distinguish it clearly from any other form of expression, whether scientific, religious, or artistic—that is, too many essentially different kinds of story may be basically etiological.

RATIONALISM VERSUS METAPHOR, ALLEGORY, AND SYMBOLISM

The desire to rationalize classical mythology arose far back in classical antiquity, and is especially associated with the name of Euhemerus (ca. 300 B.C.), who claimed that the gods were men deified for their great deeds.¹² The supreme god Zeus, for example, was once a mortal king in Crete who deposed his father, Cronus. At the opposite extreme from Euhemerism is the metaphorical interpretation of stories. Antirationalists, who favor metaphorical interpretations, believe that traditional tales hide profound meanings. At its best the metaphorical approach sees myth as allegory (allegory is to be defined as sustained metaphor), where the details of the story are but symbols of universal truths. At its worst

the allegorical approach is a barren exercise in cryptology: to explain the myth of Ixion and the Centaurs in terms of clouds and weather phenomena is hardly enlightening and not at all ennobling.¹³

Allegorical Nature Myths: Max Müller. An influential theory of the nineteenth century was that of Max Müller: myths are nature myths, all referring to meteorological and cosmological phenomena. This is, of course, an extreme development of the allegorical approach, and it is hard to see how or why *all* myths can be explained as allegories of, for example, day replacing night, winter succeeding summer, and so on. True, some myths are nature myths, and certain gods, for example Zeus, represent or control the sky and other parts of the natural order; yet it is just as true that a great many more myths have no such relationship to nature.¹⁴

MYTH AND PSYCHOLOGY: FREUD AND JUNG

Sigmund Freud. The metaphorical approach took many forms in the twentieth century through the theories of the psychologists and psychoanalysts, most especially those of Sigmund Freud and Carl Jung. We need to present at least some of their basic concepts, which have become essential for any understanding of mythic creativity. Freud's views were not completely new, of course (the concept of "determinism," for example, "one of the glories of Freudian theory" is to be found in Aristotle),¹⁵ but his formulation and analysis of the inner world of humankind bear the irrevocable stamp of genius.

Certainly methods and assumptions adopted by comparative mythologists—the formulations of the structuralists and the modern interpretation of mythological tales as imaginative alleviating and directive formulations, created to make existence in this real world tolerable—all these find a confirmation and validity in premises formulated by Freud. The endless critical controversy in our post-Freudian world merely confirms his unique contribution.

Among Freud's many important contemporaries and successors, Jung (deeply indebted to the master, but a renegade) must be singled out because of the particular relevance of his theories to a fuller appreciation of the deep-rooted recurring patterns of mythology. Among Freud's greatest contributions are his emphasis upon sexuality (and in particular infantile sexuality), his theory of the unconscious, his interpretation of dreams, and his identification of the Oedipus complex (although the term *complex* belongs to Jung). Freud has this to say about the story of King Oedipus:

His fate moves us only because it might have been our own, because the oracle laid upon us before our birth the very curse which rested upon him. It may be that we are all destined to direct our first sexual impulses toward our mothers, and our first impulses of hatred and resistance toward our fathers; our dreams convince us that we were. King Oedipus, who slew his father Laius and wedded his mother Jocasta, is nothing more or

*less than a wish-fulfillment—the fulfillment of the wish of our childhood. But we, more fortunate than he, in so far as we have not become psychoneurotics, have since our childhood succeeded in withdrawing our sexual impulses from our mothers, and in forgetting the jealousy of our fathers. . . . As the poet brings the guilt of Oedipus to light by his investigation, he forces us to become aware of our own inner selves, in which the same impulses are still extant, even though they are suppressed.*¹⁶

This Oedipal incest complex is here expressed in the masculine form, of a man's behavior in relationship to his mother, but it also could be expressed in terms of the relationship between daughter and father; the daughter turns to the father as an object of love and becomes hostile to her mother as her rival. This is for Jung an Electra complex.

Dreams for Freud are the fulfillments of wishes that have been repressed and disguised. To protect sleep and relieve potential anxiety, the mind goes through a process of what is termed "dream-work," which consists of three primary mental activities: "condensation" of elements (they are abbreviated or compressed); "displacement" of elements (they are changed, particularly in terms of allusion and a difference of emphasis); and "representation," the transmission of elements into imagery or symbols, which are many, varied, and often sexual. Something similar to this process may be discerned in the origin and evolution of myths; it also provides insight into the mind and the methods of the creative artist, as Freud himself was well aware in his studies.¹⁷

Thus Freud's discovery of the significance of dream-symbols led him and his followers to analyze the similarity between dreams and myths. Symbols are many and varied and often sexual (e.g., objects like sticks and swords are phallic). Myths, therefore, in the Freudian interpretation, reflect people's waking efforts to systematize the incoherent visions and impulses of their sleep world. The patterns in the imaginative world of children, savages, and neurotics are similar, and these patterns are revealed in the motifs and symbols of myth.

As can be seen from Freud's description in the earlier quote, one of the basic patterns is that of the Oedipus story, in which the son kills the father in order to possess the mother. From this pattern Freud propounded a theory of our archaic heritage, in which the Oedipal drama was played out by a primal horde in their relationship to a primal father. The murder and the eating of the father led to important tribal and social developments, among them deification of the father figure, the triumph of patriarchy, and the establishment of a totemic system, whereby a sacred animal was chosen as a substitute for the slain father. Most important of all, from the ensuing sense of guilt and sin for parricide emerges the conception of God as Father who must be appeased and to whom atonement must be made. In fact, according to Freud, the Oedipus complex inspired the beginning not only of religion but also of all ethics, art, and society.

It is clear that Freud's connection between dreams and myths is illuminating for many myths, if not for all. In addition to the story of Oedipus one might single out, for example, the legend of the Minotaur or the saga of the House of

Atreus, both of which deal with some of the most persistent, if repressed, human fears and emotions and, by their telling, achieve a kind of catharsis.

Carl Jung. Jung went beyond the mere connection of myths and dreams to interpret myths as the projection of what he called the "collective unconscious" of the race, that is, a revelation of the continuing psychic tendencies of society. Jung made a distinction between the personal unconscious and the collective unconscious: the personal concerns matters of an individual's own life; the collective embraces political and social questions involving the group. Dreams therefore may be either personal or collective.

Thus myths contain images or "archetypes" (to use Jung's term, which embraces Freud's concept of symbols), traditional expressions of collective dreams, developed over thousands of years, of symbols upon which the society as a whole has come to depend. For Jung the Oedipus complex was the first archetype that Freud discovered. There are many such archetypes in Greek mythology and in dreams. Here are some of the ways in which Jung thought about archetypes, the collective unconscious, and mythology. An archetype is a kind of dramatic abbreviation of the patterns involved in a whole story or situation, including the way it develops and how it ends; it is a behavior pattern, an inherited scheme of functioning. Just as a bird has the physical and mental attributes of a bird and builds its nest in a characteristic way, so human beings by nature and by instinct are born with predictable and identifiable characteristics.¹⁸ In the case of human behavior and attitudes, the patterns are expressed in archetypal images or forms. The archetypes of behavior with which human beings are born and which find their expression in mythological tales are called the "collective unconscious." Therefore, "mythology is a pronouncing of a series of images that formulate the life of archetypes."¹⁹ Heroes like Heracles and Theseus are models who teach us how to behave.²⁰

The following are a few examples of archetypes: The *anima* is the archetypal image of the female that each man has within him; it is to this concept that he responds (for better or for worse) when he falls in love. Indeed the force of an archetype may seize a person suddenly, as when one falls in love at first sight. Similarly, the *animus* is the archetypal concept of the male that a woman instinctively harbors within her. The old wise man and the great mother and symbols or signs of various sorts are also among the many Jungian archetypes. These appear in the dreams of individuals or are expressed in the myths of societies.

The great value of Jung's concept is that it emphasizes the psychological dependence of all societies (sophisticated as well as primitive) upon their traditional myths, often expressed also in religion and ritual. But Jung's theories, like those we have already examined, have their limitations; they are not the only key to an understanding of mythology.

The Legacy of Freud. Freud's theories about the origin of mythological themes have attracted devotion and criticism in the century since their promulgation—

evidence for their undeniable importance. Classical scholars in the English-speaking world have been more dismissive than others: the important book by H. J. Rose on Greek mythology virtually ignores psychological and psychoanalytical approaches to myth, and the former Regius Professor of Greek at the University of Oxford, Hugh Lloyd-Jones, writing toward the end of the twentieth century, is skeptical yet appreciative of the work of other Regius Professors (Dodds and Kirk), which is based on deep knowledge of Greek language and literatures and some knowledge of comparative sociology, psychology, and religion. Lloyd-Jones is contemptuous of psychoanalytical interpretations of Greek literature and myth by writers unfamiliar with Greek language and history. More gently, Jan Bremmer observes: "Historical and linguistic knowledge remains indispensable."²¹

From the beginning Freud has been under attack from biologists and psychoanalysts. E. O. Wilson, writing in 1998, says that "Freud guessed wrong" with regard to dreams and the unconscious. Wilson embraces the theory of J. A. Hobson that "dreaming is a kind of insanity," which in a way reorganizes information stored in the memory and is not an expression of childhood trauma or repressed desires. Discussing the incest taboo, Wilson prefers "the Westermarck effect" (named after the Finnish anthropologist E. A. Westermarck, who published his theory in 1891 in *The History of Human Marriage*). Westermarck wrote that human avoidance of incest is genetic and that the social taboo comes from this "epigenetic" attribute. In contrast, Freud believed that the desire for incestuous relations (in men directed toward their mothers or sisters) was "the first choice of object in mankind," and therefore its repression was enforced by social taboos. Clearly very different interpretations of the myth of Oedipus will flow from these competing theories.²²

There will be other theories, and all of them, it can safely be said, will implicitly or explicitly support, attack, or comment upon Freud. This is the measure of his genius.

Freud's theories have been a springboard for anthropologists and sociologists—most notably Claude Lévi-Strauss, whose theories have been applied to Greek myth with success by the so-called Paris school, namely Jean-Pierre Vernant, Pierre Vidal-Naquet, and Marcel Detienne.²³ These mythographers combine the study of human societies with psychological theories that explain the origins of myth in terms of the minds of individuals. (Jung was particularly concerned with the collective unconscious of society, as we have seen.) The work of these French scholars is fundamental for any attempt to understand the place of myth in human societies, but, like the theories of Freud and Jung, it overvalues similarities in the minds of individuals and collective rituals and myths of societies while undervaluing variations among individual human societies.

Before we consider Lévi-Strauss and other structural theorists, we begin with earlier mythographers who associated myth with religion and ritual in society.

MYTH AND SOCIETY

Myth and Ritual: J. G. Frazer, Jane Harrison, and Robert Graves. A ritualist interpretation of mythology is one of the most influential and persistent points of view. Despite its faults, Sir J. G. Frazer's *The Golden Bough* remains a pioneering monument in its attempts to link myth with ritual. It is full of comparative data on kingship and ritual, but its value is lessened by the limitations of his ritualist interpretations and by his eagerness to establish dubious analogies between myths of primitive tribes and classical myths.

Similarly the works of Jane Harrison, *Prolegomena to the Study of Greek Religion* and *Themis*, are of seminal importance. Harrison falls in the same tradition as Frazer, and many of her conclusions about comparative mythology, religion, and ritual are subject to the same critical reservations. Frazer and Harrison established fundamental approaches that were to dominate classical attitudes at the beginning of the twentieth century.

Renowned novelist and poet Robert Graves has written an influential treatment of Greek myths that is full of valuable factual information unfortunately embedded in much fascinating but unsubstantiated and idiosyncratic analysis. For him the definition of "true myth" is "the reduction to narrative shorthand of ritual mime performed in public festivals, and in many cases recorded pictorially on temple walls, vases, seals, bowls, mirrors, chests, shields, tapestries, and the like."²⁴ He distinguishes this true myth from twelve other categories, such as philosophical allegory, satire or parody, minstrel romance, political propaganda, theatrical melodrama, and realistic fiction. We single out Graves because he was perceptive enough to realize that literary distinctions may be as enlightening as any other type of classification for classical mythology.

Yet stated most bluntly, this ritualist theory says that "myth implies ritual, ritual implies myth, they are one and the same."²⁵ True, many myths are closely connected with rituals, and the theory is valuable for the connection it emphasizes between myth and religion; but it is patently untenable to connect *all* true myth with ritual.

Myth as Social Charters: Bronislaw Malinowski. Important in the development of modern theories is the work of Bronislaw Malinowski, who was stranded among the Trobriand Islanders (off New Guinea) during World War I; he used his enforced leisure to study the Trobrianders.²⁶ As an anthropologist and ethnographer he placed a high value on fieldwork in order to reach his final ideological goal: "to grasp the native's point of view, his relation to life, to realize his vision of *his* world. . . ."²⁷

His great discovery was the close connection between myths and social institutions, which led him to explain myths not in cosmic or mysterious terms, but as "charters" of social customs and beliefs. To him myths were related to practical life, and they explained existing facts and institutions by reference to tradition: the myth confirms (i.e., is the "charter" for) the institution, custom,

or belief. Clearly such a theory will be valid only for certain myths (e.g., those involving the establishment of a ritual), but any theory that excludes the speculative element in myth is bound to be too limited.

THE STRUCTURALISTS: LÉVI-STRAUSS, PROPP, AND BURKERT

Claude Lévi-Strauss. More recently, the structural theories of Claude Lévi-Strauss have enriched the anthropological approach to myth, and they have a connection with Malinowski's most important concept, that is, the link between myth and society.²⁸

Lévi-Strauss sees myth as a mode of communication, like language or music. In music it is not the sounds themselves that are important but their *structure*, that is, the relationship of sounds to other sounds. In myth it is the narrative that takes the part of the sounds of music, and the structure of the narrative can be perceived at various levels and in different codes (e.g., culinary, astronomical, and sociological). From this it follows that no one version of a myth is the "right" one; all versions are valid, for myth, like society, is a living organism in which all the parts contribute to the existence of the whole. As in an orchestral score certain voices or instruments play some sounds, while the whole score is the sum of the individual parts, so in a myth the different, partial versions combine to reveal its total structure, including the relationship of the different parts to each other and to the whole.

Lévi-Strauss' method is therefore rigorously analytical, breaking down each myth into its component parts. Underlying his analytical approach are basic assumptions, of which the most important is that all human behavior is based on certain unchanging patterns, whose structure is the same in all ages and in all societies. Second, he assumes that society has a consistent structure and therefore a functional unity in which every component plays a meaningful part. As part of the working of this social machine, myths are derived ultimately from the structure of the mind. And the basic structure of the mind, as of the myths it creates, is *binary*; that is, the mind is constantly dealing with pairs of contradictions or opposites. It is the function of myth to mediate between these opposing extremes—raw/cooked, life/death, hunter/hunted, nature/culture, and so on. "Mythical thought always progresses from the awareness of oppositions towards their resolution."²⁹ Myth, then, is a mode by which a society communicates and through which it finds a resolution between conflicting opposites. The logical structure of a myth provides a means by which the human mind can avoid unpleasant contradictions and thus, through mediation, reconcile conflicts that would be intolerable if unreconciled. Lévi-Strauss would maintain that all versions of a myth are equally authentic for exploring the myth's structure.

The theories of Lévi-Strauss have aroused passionate controversy among anthropologists and mythographers. His analysis of the Oedipus myth, for exam-

ple, has been widely criticized. Yet whatever one's judgment may be, there is no doubt that this structural approach can illuminate a number of Greek myths, especially with regard to the function of "mediating." But the approach is open to the same objections as other comprehensive theories, that it establishes too rigid, too universal a concept of the functioning of the human mind. Indeed, the binary functioning of the human mind and of human society may be common, but it has not been proved to be either universal or necessary. Finally, Lévi-Strauss draws most of his evidence from primitive and preliterate cultures, and his theories seem to work more convincingly for them than for the literate mythology of the Greeks. His approach is better applied, for example, to the early Greek succession myths than to the Sophoclean, literate version of the legends of Oedipus and his family. We should all the same be aware of the potential of structuralist theories and be ready to use them as we seek to make meaningful connections between the different constituent elements of a myth or between different myths that share constituent elements. As we noted earlier, Lévi-Strauss was particularly influential upon the Paris school.

Vladimir Propp. The structural interpretation of myth was developed, long before the work of Lévi-Strauss, by Vladimir Propp in his study of the Russian folktale.³⁰ Like Lévi-Strauss, Propp analyzed traditional tales into their constituent parts, from which he deduced a single, recurrent structure applicable to all Russian folktales. Unlike Lévi-Strauss, however, he described this structure as linear, that is, as having an unchanging temporal sequence, so that one element in the myth always follows another and never occurs out of order. This is significantly different from the pattern in Lévi-Strauss' theory, where the elements may be grouped without regard to time or sequence.

Propp divided his basic structure into thirty-one functions or units of action (which have been defined by others as *motifemes*, on the analogy of morphemes and phonemes in linguistic analysis). These functions are constants in traditional tales: the characters may change, but the functions do not. Further, these functions always occur in an identical sequence, although not all the functions need appear in a particular tale. Those that do, however, will always occur in the same sequence. Finally, Propp states that "all fairy tales are of one type in regard to their structure."³¹

Propp was using a limited number (one hundred) of Russian folktales of one sort only, that is, the Quest. Yet his apparently strict analysis has proven remarkably adaptable and valid for other sorts of tales in other cultures. The rigid sequence of functions is too inflexible to be fully applicable to Greek myths that have a historical dimension (e.g., some of the tales in the Trojan cycle of saga), where the "facts" of history, as far as they can be established, may have a sequence independent of structures whose origins lie in psychological or cultural needs.

On the other hand, Propp's theories are very helpful in comparing myths that are apparently unrelated, showing, for example, how the same functions

appear in the myths, no matter what names are given to the characters who perform them. Mythological names are a strain on the memory. Merely to master them is to achieve very little, unless they can be related in some meaningful way to other tales, including tales from other mythologies. Dreary memorization, however, becomes both easier and purposeful if underlying structures and their constituent units can be perceived and arranged logically and consistently.

A very simple example would be the structural elements common to the myths of Heracles, Theseus, Perseus, and Jason, whose innumerable details can be reduced to a limited sequence of functions. It is more difficult to establish the pattern for, say, a group of stories about the mothers of heroes (e.g., Callisto, Danaë, Io, and Antiope). Yet, as Walter Burkert shows (see the following section), they resolve themselves into a clear sequence of five functions: (1) the girl leaves home; (2) the girl is secluded (beside a river, in a tower, in a forest, etc.); (3) she is made pregnant by a god; (4) she suffers punishment or rejection or a similar unpleasant consequence; and (5) she is rescued, and her son is born.³²

We can say definitely that in most cases it is helpful to the student to analyze a myth into its constituent parts. There should be four consequences:

1. A perceptible pattern or structure will emerge.
2. It will be possible to find the same structure in other myths, thus making it easier to organize the study of myths.
3. It will be possible to compare the myths of one culture with those of another.
4. As a result of this comparison, it will be easier to appreciate the development of a myth prior to its literary presentation.

Structuralism need not be—indeed, cannot be—applied to all classical mythology, nor need one be enslaved to either Lévi-Strauss or the more rigid but simpler structure of Propp's thirty-one functions; it basically provides a means toward establishing a rational system for understanding and organizing the study of mythology.

Walter Burkert. Walter Burkert has persuasively attempted a synthesis of structural theories with the more traditional approaches to classical mythology.³³ In defining a theory of myth he developed four theses, which are in part based upon structural theories and in part meet the objection that these theories are not adequate for many Greek myths as they have come down to us after a long period of development. According to Burkert, classical myths have a "historical dimension" with "successive layers" of development, during which the original tale has been modified to fit the cultural or other circumstances of the time of its retelling. This will be less true of a tale that has sacred status, for it will have been "crystallized" in a sacred document—for example, the myth of Demeter in the *Homeric Hymn to Demeter*. In contrast, many Greek myths vary with the time of telling and the teller—for example, the myths of Orestes or Meleager appear differently in Homer from their treatment in fifth-century Athens or in Augustan Rome.

Burkert therefore believes that the structure of traditional tales cannot be discovered without taking into account cultural and historical dimensions. With regard to the former, the structure of a tale is shaped by its human creators and by the needs of the culture within which it is developed. Therefore the structure of a tale is “ineradicably anthropomorphic” and fits the needs and expectations of both the teller and the audience. (Indeed, as Burkert points out, this is why good tales are so easy to remember: “There are not terribly many items to memorize, since the structure has largely been known in advance.”) Further—and here we approach the historical dimension—a tale has a use to which it is put, or, expressed in another way, “Myth is traditional tale applied.”

This refinement of the structural theory allows for the development of a tale to meet the needs or expectations of the group for whom it is told—family, city, state, or culture group, for example. A myth, in these terms, has reference to “something of collective importance.” This further definition meets a fundamental objection to many earlier “unitary” theories of myth. If myth is a sacred tale or a tale about the gods, how do we include, for example, the myths of Oedipus or Achilles? Similar objections can easily be made to other theories that we have been describing. The notions of “myth applied” and “collective importance” avoid the objection of rigid exclusivity, while they allow for the successive stages in the historical development of a myth without the Procrustean mental gymnastics demanded by the theories of Lévi-Strauss.

Here, then, are the four theses of Burkert’s modified synthesis of the structural and historical approaches:

1. Myth belongs to the more general class of traditional tale.
2. The identity of a traditional tale is to be found in a structure of sense within the tale itself.
3. Tale structures, as sequences of motifs, are founded on basic biological or cultural programs of actions.³⁴
4. Myth is a traditional tale with secondary, partial reference to something of collective importance.

These theses form a good working basis upon which to approach the interpretation of myth. They make use of the significant discoveries of anthropologists and psychologists, while they allow flexibility in exploring the structure of classical myths. Finally, they take account of the historical development of myths and of the culture within which they were told. It will be useful to refer to these theses when studying individual traditional tales.

COMPARATIVE STUDY AND CLASSICAL MYTHOLOGY

Comparisons among the various stories told throughout the ages, all over the world, have become influential in establishing definitions and classifications. In the modern study of comparative mythology, much emphasis tends to be placed

upon stories told by preliterate and primitive societies, and too often the developed literature of the Greeks and Romans has virtually been ignored. It was not always so; for pioneers in the field, such as Frazer (identified earlier), classical mythology was understandably fundamental. Our survey has shown that the comparative study of myths, especially by anthropologists (as opposed to philologically trained classicists), has been one of the most fruitful approaches to the interpretation of myths.

Oral and Literary Myth. The primary reason for the relative neglect of classical mythology is that many insist that a true myth must be oral, and some would add that it also must be anonymous. Today this is certainly the most persistent definition of all with support from many quarters. Reasons are easy to find in an argument that runs something like this: The tales told in primitive societies, which one may go to hear even today, are the only true myths, pristine and timeless. Such tales represent the poetic vision, the history, the religion, even the science of the tribe, revealing the fascinating early stages of development in the psyche of humankind. The written word brings with it contamination and a specific designation of authorship for what has been passed on by word of mouth for ages, the original creator with no more identity at all. For Malinowski (discussed earlier), myths were synonymous with the tales of the Trobrianders, which they called *lili'u*, the important stories a society has to tell.³⁵ For those sympathetic to this view, folktales hold a special place, even those that have become a literary text composed by an author, who has imposed a unity upon a multiplicity of oral tales.

What has all this to do with classical mythology?

We do not concur with those who place such a narrow definition upon the word *myth*. We would not write a book titled *Classical Mythology* with the conviction that the literary texts that we must deal with are not mythology at all. First of all, myth need not be just a story told orally. It can be danced, painted, and enacted, and this, in fact, is what primitive people do. As we stated at the beginning of this chapter, myth may be expressed in various media, and myth is no less a literary form than it is an oral form. Furthermore, the texts of classical mythology can be linked to the oral and literary themes of other mythologies.

We have established that, over the past few decades, comparative mythology has been used extensively for the understanding of the myths of any *one* culture. Greek mythology, largely because of the genius of the authors who told the stories in their literary form, has too often in the past been considered as something so unusual that it can be set apart from other mythologies. It is true that Greek and Roman literature has certain characteristics to be differentiated from those of the many, oral preliterate tales gathered from other cultures by anthropologists. Yet the work of the structuralists has shown that classical myths share fundamental characteristics with traditional tales everywhere. It is important to be aware of this fact and to realize that there were many successive

layers in the development of Greek and Roman myths before their crystallization in literary form. The Homeric poems, the *Iliad* and the *Odyssey*, no doubt had oral antecedents.³⁶ Often, and especially in structural interpretations, the earlier stages of a myth are discovered to have been rooted in another culture, or at least show the influence of other mythologies. For example, there are obvious parallels between the Greek creation and succession myths and myths of Near Eastern cultures (we explore these in the Additional Reading at the end of Chapter 4); such structural and thematic similarities do at least show how Greek myths are to be studied in conjunction with those of other cultures.

It is gratifying to report that comparative studies in the classics are becoming more and more abundant (made evident in our bibliographies), the focus being the identification of structures and motifs in Greek and Roman literature that are common to mythologies of the world.

Joseph Campbell. Joseph Campbell is the comparative mythologist who is the best known among the general public, and his body of work embraces mythologies of every sort—oral, literary, whatever—in the world throughout the centuries. In his vast all-embracing scheme of things, classical mythology is not of major significance, but it easily could be. He has done much that is worthwhile to popularize the study of comparative mythology, and for this we are grateful, even though we wish that, in his popularizations at least, he had paid more serious attention to the Greeks and the Romans. Perhaps he will appeal most of all to those who seek to recognize the kindred spiritual values that may be found through a comparison of the myths and legends of various peoples over the centuries. It is difficult to know how Campbell should be classified under our previous headings: with those who link mythology and society or religion or psychology?³⁷ His inspiring influence upon Martha Graham and her powerful re-creations of mythology in dance is discussed in Chapter 28. A clear and comprehensive introduction to his numerous works is offered by Robert A. Segal in *Joseph Campbell: An Introduction*.³⁸

FEMINISM, HOMOSEXUALITY, AND MYTHOLOGY

Feminism. Feminist critical theories have led to many new, and often controversial, interpretations of classical myths. They approach mythology from the perspective of women and interpret the myths by focusing especially on the psychological and social situation of their female characters. These theories share with structuralism a focus on the binary nature of human society and the human mind, especially in the opposition (or complementary relationship) of female and male. Social criticism of the male-centered world of Greek mythology goes back at least to Sappho, who, in her *Hymn to Aphrodite* (see pp. 197–198) used the image of Homeric warfare to describe her emotions, and in her poem on Anaktoria contrasts what she loves, another human being, with what conventional men love, the panoply of war.³⁹ In 1942 the French philosopher Simone Weil took basically the same approach in her essay on the *Iliad* (translated

by Mary McCarthy as *The Iliad, or the Poem of Force*), focusing on the issues of violence, power, and domination, fundamental to Homeric mythology.

More recently feminist scholars have used the critical methods of narratology and deconstruction to interpret the traditional tales, associating them with the theories of psychologists (especially Freud) and comparative anthropologists. Many feminist interpretations have compelled readers to think critically about the social and psychological assumptions that underlie approaches to mythology, and they have led to original and stimulating interpretations of many myths, especially where the central figure is female. The work of feminist scholars has led to greater flexibility and often (although by no means always) greater sensitivity in modern readings of classical literature. Helene P. Foley's edition of *The Homeric Hymn to Demeter* is a good example of how feminist interpretations can be incorporated in an array of varied interpretative viewpoints.⁴⁰ Feminist authors too are creating new versions of traditional tales designed to illuminate their point of view about political, social, and sexual conflict between men and women in our world today—for example, the two novels (originally in German) by Christa Wolf, *Cassandra* and *Medea*. Nevertheless, some scholars (among them leading classical feminists) have warned against the tendency to interpret classical myths in the light of contemporary social and political concerns. For example, Marilyn Katz criticizes those who object on moral grounds to the apparent infidelity of Odysseus to his wife, saying that “such an interpretation . . . imports into the poem our own squeamish disapproval of the double standard.”⁴¹

Feminist interpretations of mythological stories are often determined by controversial reconstructions of the treatment and position of women in ancient society, often making no distinctions between the Greek version and that of the Roman Ovid and thus embracing two civilizations inhabiting a vast area over a lengthy period of time. We single out two major topics that influence feminist theories of myth: the position of women in Greece and the theme of rape.

WOMEN IN GREEK SOCIETY. The evidence for the position of women in Greek society is meager and conflicting. It is also virtually impossible to make valid broad generalizations, since the situation in sixth-century Lesbos must have been different from that in Athens of the fifth century, and as time went on women in Sparta gained a great deal of influence. For a long time, we have been reading the literature and looking at the art, and for us, some of the revisionist histories today depict a civilization that we cannot recognize in terms of what little direct evidence we do possess, controversial as it may be. A good place to begin for one's own control of what little we do know with any kind of certainty is with a study by A. W. Gomme, “The Position of Women at Athens in the Fifth and Fourth Centuries B.C.”⁴² We offer here a few basic observations to give a sense of balance to the controversy.

First of all, the claim is made today that women were not citizens in the ancient world. This is not true. Aristotle (*Athenian Constitution*, 42.1) makes it very

clear that citizenship depended upon the condition that both parents be citizens: "Those born of parents who are both citizens share in citizenship, and when they are eighteen years old, they are registered on the rolls. . . ." It is evident over and over again that in Greek society the citizens were very much aware of the difference between citizens and noncitizens (resident aliens and slaves) in the structure and benefits of society. Women citizens, however, did not vote; to keep things in perspective, one should remember that women did not win the vote anywhere until the first quarter of the twentieth century. Were there no women citizens in the world before that time? in England? in America? It is only in the first quarter of the last century that women have gained not only political but also legal rights equal to those of men, sad as that fact may be in our judgment of humankind. In Athens a woman citizen benefited greatly from the prosperity and the artistic expression and freedom of the democracy and empire. She was very important in religious ceremonies, some of which excluded the participation of males. Women did not walk outdoors veiled, a few became intoxicated and had affairs, and many were very outspoken (amazingly so for this period of time in the history of Western civilization) about their own inferior position as citizens in relation to that of the males. It is difficult to believe all women were illiterate. It is likely that their education was different from that of the men. Much would depend upon contingencies such as class and individual needs. (The women of Sappho's Lesbos must have been able to read and write.) Athenian women went to the theater, where they saw and heard vivid depictions of the strength of their character and convictions and debates about their rights. They also saw varied portraits, not all evil but mixed, as it should be, many of great and noble wives such as Alcestis in Euripides and Deïanira in Sophocles' *Women of Trachis*, among others. In art, women appear idealized and beautiful, but not nude (as men could be) until the fourth century B.C. because of Greek mores. The mythological world of goddesses and heroines reflects the real world of Greek women, for whom it had to have some meaning.

THE THEME OF RAPE. A fertile and seminal topic has become the theme of rape. What are we today to make of the many classical myths of ardent pursuit as well as those of amorous conquest? Are they religious stories, are they love stories, or are they in the end all fundamentally horrifying tales of victimization? Only a few basic observations about this vast and vital subject can be made here, with the major purpose of insisting that the questions and the answers are not simple but complex.

In Ovid's *Metamorphoses*, Apollo's pursuit of Daphne is the first of the love stories in the poem. To some it is a beautiful idyll, to others, a glorification of male supremacy and brutality. Quite simply put, it can mean whatever one wants it to mean. Certainly it has been one of the most popular themes among artists throughout the centuries because it is subject to so many varied overt and subtle interpretations, primary among them not necessarily being that of rape in the

sense of the word today. The case is similar in the history of music; the very first opera was *Daphne*, and she has been a profound, spiritual inspiration in the years to follow.

The Greeks and Romans were fascinated with the phenomena of blinding passion and equally compulsive virginity. The passion was usually evoked by the mighty gods Aphrodite and Eros, who could gloriously uplift or pitilessly devastate a human being and a god. The equally ruthless force of chastity was symbolized by devotion to Artemis. Usually, but by no means always, the man defines lust and the woman chastity. In the case of Hippolytus and Phaedra (among others) these roles are reversed.

The motif of pursuit by the lover of the beloved with the implicit imagery of the hunter and the hunted is everywhere and becomes formulaic with the pursuit ending in a ritualistic acquiescence or the saving of the pursued from a fate worse than death, often through a metamorphosis. The consummation of sex need not be part of the scenario of this ancient motif, played upon with versatile sophistication by a civilized poet such as Ovid.

Many seduction scenes are ultimately religious in nature, and the fact that it is a god who seduces a mortal can make all the difference. Zeus may single out a chosen woman to be the mother of a divine child or hero for a grand purpose intended for the ultimate good of the world, and the woman may or may not be overjoyed. These tales are told from different points of view, sometimes diametrically opposed. For example, Zeus took Io by force, or their son Epaphus was born by the mere touch of the hand of god.

There is no real distinction between the love, abduction, or rape of a woman by a man and of a man by a woman. Eos is just as relentless in her pursuit of Cephalus or Tithonus as any other god, and they succumb to the goddess. Salmacis attacks innocent and pure Hermaphroditus and wins. Aphrodite seduces Anchises, who does not stand a chance against her devious guile. It is possible, if one so desires, to look beyond the romantic vision of beautiful nymphs in a lovely pool enamored of handsome Hylas to imagine a horrible outrage as the poor lad, outnumbered, is dragged down into the depths.

The title for a famous story that has become traditional may be misleading or false. Paris' wooing of Helen is usually referred to as the Rape of Helen. Yet the ancient accounts generally describe how Helen fell quickly and desperately in love with the exotic foreigner Paris and (despite her complaints about Aphrodite) went with him willingly to Troy. Of course a different version can find its legitimacy, too, if an artist wishes to depict a Helen dragged away screaming her protests against the savage force of a bestial Paris. The designation of the seduction/abduction of Helen by Paris as the "Rape of Helen" was established at a time when the word "rape" did not necessarily have the narrow, sole connotation it has today, that of a brutal, forceful sexual act against an unwilling partner.

The Rape of Persephone is quite another matter. Hades did brutally abduct Persephone, who did indeed cry out to no avail. Zeus and Hades saw this as

the divine right of gods and kings. Demeter and Persephone did not agree. On the other hand, a religious artist or critic might maintain that god's will is god's will, and it was divinely ordained to have Hades and Persephone as king and queen of the Underworld.

This book bears testimony again and again in a multitude of ways to the light these Greek and Roman tales have thrown on our civilization. They explored countless issues and emotions (among them passion and lust), as burning for them (both men and women) as they are for us, in their own images, just as we explore them in ours; we are no less obsessed with the subject of sex than were the ancients, and our depictions certainly can be much more violent and ugly, yet often not as potent. Critics of classical mythology in previous generations sometimes chose not to see the rape: some critics today choose to see nothing else.

It is fundamental to realize an obvious fact that too often is completely overlooked in our rush to interpretative, righteous judgment about the message of a story. The same tale may embody themes of victimization and rape or sexual love or spiritual salvation, one or all of these issues, or more. Everything depends upon the artist and the person responding to the work of art: his or her gender, politics, philosophy, religion, sexual orientation, age, experience or experiences—the list could go on. A major contention of this book is that there is no one “correct” interpretation of a story, just as there is no one “correct” definition of a myth.

Homosexuality. Homosexuality was accepted and accommodated as a part of life in the ancient world. There were no prevailing hostile religious views that condemned it as a sin. Much has been written about this subject in this era of gay liberation, and fundamental works are listed in the bibliography at the end of the chapter. Dover, in his classic study *Greek Homosexuality*, offers a scrupulous analysis of major evidence for ancient Greece, much of which pertains to Athens. This fundamental work is required reading, but his conclusions need to be tempered by other more realistic appreciations of sexuality in the real world, both ancient and modern. Particularly enlightening because of its wider perspective is *Homophobia: A History*, by Byrne Fone. The remarks that follow concentrate on homosexuality in ancient Greece. There were similarities among the Romans but differences as well. The period of time stretches over centuries and the subject again is vast, complex, and controversial.

A prevailing view persists that Athens (representing a kind of paradigm of the Greco-Roman world) was a paradise for homosexuals, particularly in contrast to the persecution so often found in other societies. There is some truth in this romantic vision, but homosexual activity had to be pursued in accordance with certain unwritten rules, however liberal they may have been. In Athens, a particular respectability was conferred when an older male became the lover of a younger man, and it was important that each should play his proper role in

the sexual act. The relationship was particularly sanctified by a social code if the primary motive was, at least ostensibly, education of a higher order, the molding of character and responsible citizenship. Longer homosexual relationships between two mature men, promiscuity, and effeminacy were sometimes not so readily accepted. Some homosexuals were made notorious because of their behavior. Gay pride today could not approve of many attitudes and strictures about sexuality in Athens or for that matter in Greece and Rome generally.

In the mythology, as one would expect, homosexuality may be found as an important theme. Aphrodite and Eros in particular play significant roles as deities particularly concerned about homosexual love. Several important myths have as their major theme male homosexual relationships: Zeus and Ganymede, Poseidon and Pelops, Apollo and Hyacinthus, Apollo and Cypris, the friendship of Achilles and Patroclus, Orestes and Pylades (especially in Euripides' *Iphigenia in Tauris*), and Heracles and Hylas. In Roman legend the love and devotion of Nisus and Euryalus is a particularly moving example.

Female homosexuality in Greek and Roman mythology and society is as important a theme as male homosexuality, but it is not nearly as visible. Sappho (mentioned earlier), a lyric poetess from the island of Lesbos (sixth century B.C.), in a fervent and moving poem (pp. 197–198) invokes Aphrodite's help to win back the love of a young woman with whom she has been involved, and her relationships with women are evident both in other poems and in the biographical tradition and have been the subject of endless interpretation. (For those interested in Sappho's biography, the ancient testimony is collected and translated in the Loeb Classical Library, published by Harvard University Press.) From Sappho comes the term *lesbian* and the association of Aphrodite with lesbian love.

Lesbianism is not so readily detectable in the mythology generally. Sometimes it can be deduced as a subtext here and there; for example, it may be a latent motif in stories about the strong bond of affection among Artemis and her band of female followers and in the depiction of the society and mores of the warlike Amazons.

THE MORES OF MYTHOLOGICAL SOCIETY

Rather than imagine what Greek and Roman society was like over thousands of years in its feminist and homosexual attitudes and then impose tenuous conclusions upon an interpretation of mythological stories treated by many individual artists with different points of view, perhaps it may be more fruitful and fair to look at the mythology itself to determine if there is any consistency in the social values it conveys.

Along with its nonjudgmental acceptance of homosexuality, and the beautiful stories it inspires, Greek and Roman mythology overall reflects the point of view of a heterosexual society, from the depiction of the Olympian family of deities on down. Homer's *Odyssey* is the most heterosexual of poems, and one,

must look long and hard to read any subtext to the contrary. So is the *Iliad* for that matter, although a subtext comes more easily. True, the poem turns upon Achilles' love for Patroclus, but both men are depicted as heterosexuals, leaving the bond between them open for others to read between the lines. Enhancing and illuminating the relationship between Achilles and Patroclus is Achilles' love for Briseis amid the profound depictions of the couples Priam and Hecuba, Hector and Andromache, and, perhaps the most searching of all, Paris and Helen. True, feminists today have a strong case against the inequalities and injustices inflicted upon women by men. But there are valid cases to be made against all wrongs of all societies in the past. We should not excuse them but try to understand and learn. The Homeric poems embrace many, many timeless moral issues, among them man's inhumanity to man. Their artistic, moving, and meaningful documentation is a possession and an education forever.

Homer sets the stage for the basic qualities of the literature to follow. The body of Greek drama, as we have it, is shot through with family and religious values, raised to lofty heights by genius. The great families of tragedy, to be sure, are dysfunctional and neurotic, but the ties that bind them together are those of man and woman, husband and wife, father and mother, brother and sister, son and daughter. It would be difficult to imagine more powerful familial and religious bonds than those in the legend of Oedipus. The mutual devotion between Oedipus and his daughters Ismene and, more particularly, Antigone is extreme. Equally powerful is the feud between Oedipus and his sons Eteocles and Polynices. Oedipus dies committed to God, and Antigone remains true to the memory of her brother Polynices because of family and religion. The legend of the *Oresteia* may be an even better example. The criteria by which Herodotus singles out Tellus the Athenian and Cleobis and Biton as the happiest of men are embodied in ennobling tales (translated on pg. 136-137) confirming the fact that marriage and the family were at the core of the politics and mores of the Greek city-state (*polis*). Roman mythology is possibly even more dominated by religious, familial, and, we may add, patriotic mores.

We all read this vast body of classical literature in different ways, and this is how it should be. The texts have something to say to each of us because they spring from a civilization that is all-embracing (not merely bizarre) and all too recognizable and helpful in the face of our own issues and conflicts and their resolution, not least of all those between heterosexuals and homosexuals and men and women.

SOME CONCLUSIONS AND A DEFINITION OF CLASSICAL MYTH

Our survey of some important interpretations of myth is intended to show that there is something of value to be found in a study of various approaches, and we have included only a selection from a wide range of possibilities. There are others that might be explored; belief in the importance and validity of diverse in-

terpretations naturally varies from reader to reader. About this conclusion, however, we are convinced: it is impossible to develop any one theory that will be meaningfully applicable to *all* myths; there is no identifiable Platonic Idea or Form of a myth, embodying characteristics copied or reflected in the mythologies of the world. The many interpretations of the origin and nature of myths are primarily valuable for highlighting the fact that myths embrace different kinds of stories in different media, which may be classified in numerous different ways.

We realize fully the necessity for the study of comparative mythology and appreciate its many attractive rewards, but we are also wary of its dangers: oversimplification, distortion, and the reduction of an intricate masterpiece to a chart of leading motifs. Greek and Roman mythology is unique, but not so unique that we can set it apart from other mythologies. In other words, it will illuminate other mythologies drawn from primitive and preliterate societies, just as they will help us understand the origin, development, and meaning of classical literature. We must, however, be aware of the gulf that separates the oral legends from the literary mythological thinking that evolved among the Greeks and Romans and also among their literary antecedents in the Near East. It is misleading, of course, to posit a "primitive" mentality, as some anthropologists and sociologists do, as if it were something childlike and simple, in contrast to the "sophisticated" mentality of more advanced societies such as that of the Greeks.⁴³ In fact, it has been clearly proved (as attested to earlier) how far the myths of primitive societies reflect the complexities of social family structures, and their tales may be profitably compared to classical literature. Yet there are important differences, and even our earliest literary sources (Homer, Hesiod, and the lyric poets) provide artistic presentations of intellectual, emotional, and spiritual values and concepts in influential works of the highest order, whatever their debts. Greek and Roman mythology shares similar characteristics with the great literatures of the world, which have evolved mythologies of their own, whether or not they have borrowed thematic material from the ancients. Classical mythology has at least as much (if not more) in common with English and American literature (not to mention French and German, among others)⁴⁴ as it does with preliterate comparisons of oral folktale and the scrutiny of archaic artifacts, however enlightening these studies may be. Greek and Roman mythology and literature look back to an oral and literary past, use it, modify it, and pass on the transformation to the future.

Since the goal of this book is the transmission of the myths themselves as recounted in the Greek and Roman periods, literary myth is inevitably our primary concern. Many of the important myths exist in multiple versions of varying quality, but usually one ancient treatment has been most influential in establishing the prototype or archetype for all subsequent art and thought. Whatever other versions of the Oedipus story exist,⁴⁵ the dramatic treatment by Sophocles has established and imposed the mythical pattern for all time—he is the poet who forces us to see and feel the universal implications. Although his

art is self-conscious, literary, and aesthetic, nevertheless the myth *is* the play. We cannot provide complete texts of Greek tragedy, but insofar as possible the original text of the dominant version of a myth will be translated in this book. We believe that a faithful translation or even a paraphrase of the sources is far better than a bald and eclectic retelling in which the essential spirit and artistic subtlety of literary myth is obliterated completely for the sake of scientific analysis. It is commonplace to say that myths are by nature good stories, but some are more childish, confused, and repetitious than others; the really good ones are usually good because they have survived in a form molded by an artist. These are the versions to which we may most profitably apply the criteria established by Aristotle in his *Poetics* on the basis of his experience of Greek tragedy. Is the plot (*muthos*) constructed well with a proper beginning, middle, and end? Have the powerful techniques of recognition and reversal been put to the best use? What about the development of characterization—does the protagonist have a tragic flaw? Most important of all, does the work effect a catharsis (an emotional and spiritual purging) involving the emotions of pity and fear, possibly a goal for all serious mythic art?

There are two indisputable characteristics of the literary myths and legends of Greek and Roman mythology: their artistic merit and the inspiration they have afforded to others. We have, to mention only one example, from the ancient world touching renditions of the story of Orpheus and Eurydice. The number of retellings of their tale in Western civilization has been legion (in every possible medium), and it seems as though the variations will go on forever.⁴⁶ Thus we conclude with a short definition that concentrates upon the gratifying tenacity of the classical tradition (in literature and art, but not oral), inextricably woven into the very fabric of our culture:

A classical myth is a story that, through its classical form, has attained a kind of immortality because its inherent archetypal beauty, profundity, and power have inspired rewarding renewal and transformation by successive generations.

The Greeks created a substantial and significant body of myth in various media. The Romans and many subsequent societies have been and continue to be captivated by it. In view of this phenomenal fact, the versions of *Oedipus* by Seneca, Corneille, von Hoffmannsthal, and Cocteau have equal validity as personal expressions of the authors' own vision of Sophocles and the myth, for their own time and their own culture. The same may be said of the depiction of a myth on a Greek vase and a painting by Picasso, or a frieze of ancient dancers and a reinterpretation by Isadora Duncan, and the music (no longer to be heard) for a fifth-century performance of *Electra* and the opera by Strauss, and so on. This book has been written out of the desire to provide a lucid and comprehensive introduction to Greek mythology so that the reader may know, appreciate, and enjoy its miraculous afterlife (*Nachleben*, as the Germans call it), which we feel compelled to survey as well because it is integral to the whole contin-

uum. The creation of classical myth has never really stopped, but from the time of Homer it has constantly been reborn and revitalized, expressed in exciting and challenging new ways through literature, art, music, dance, and film.

APPENDIX TO CHAPTER I

SOURCES FOR CLASSICAL MYTHOLOGY

Traditional tales were handed down orally until they were stabilized in a written form that spread over a wide area. The geography and topography of the Greek world often made communications by land and sea difficult, and these natural tendencies to cultural separatism were enhanced by tribal, ethnic, and linguistic variations. The Greek myths, therefore, varied greatly from place to place, as did the cults of individual gods. With the coming of writing, perhaps in the eighth century, "standard" versions of myths began to be established, but the sophistication of succeeding generations of poets led also to ingenious variations. Even in the central myths of Athenian drama—whose stories were well known to and expected by their audiences—substantial variations are found, as, for example, in the legends of Electra. The problem of variations is especially acute in saga, where differing literary versions and local variations (often based on local pride in the heroic past) make it virtually impossible to identify a "standard" version. This is especially the case with local heroes like Theseus at Athens. Nevertheless, there is a body of recognized principal sources for classical mythology from which major versions may be identified.

Greek Sources. Pride of place goes to Homer (to use the name of the poet to whom the *Iliad* and the *Odyssey* are ascribed), whose poems stabilized the myths of the Olympian gods and exercised an unparalleled influence on all succeeding Greek and Roman writers. The *Iliad* is much more than the story of the wrath of Achilles or the record of an episode in the tenth year of the Trojan War, for it incorporates many myths of the Olympian and Mycenaean heroes, while its picture of the gods has ever since been the foundation of literary and artistic representations of the Olympian pantheon. The poems themselves, which developed over centuries of oral tradition, perhaps took something like their final form in the eighth century, the *Iliad* being somewhat earlier than the *Odyssey*. The written text was probably stabilized at Athens under the tyranny of Pisistratus during the second half of the sixth century. Our debt to Homeric mythology and legend will be apparent in this book.

Important also for the Olympian gods and the organization of Olympian theology and theogony are the works of Hesiod, the Boeotian poet of the late eighth century, perhaps as late as 700. His *Theogony* is our most important source for the relationship of Zeus and the Olympians to their predecessors, the Titans, and other early divinities; it also records how Zeus became supreme and organized the Olympian pantheon. Hesiod's *Works and Days* also contains impor-

tant mythology. Thus substantial portions of these works appear in translation or paraphrase in the earlier chapters.

The thirty-three *Homeric Hymns* are a body of poems composed in honor of Olympian deities, most of which embody at least one myth of the god or goddess. Four (those to Demeter, Apollo, Hermes, and Aphrodite) are several hundred lines long and are the most significant sources for those gods' myths; others are very short indeed and appear to be preludes for longer compositions that have not survived. Because of their importance we have translated all these hymns complete.⁴⁷ The *Homeric Hymns* were composed at widely different times, some perhaps as early as the eighth or seventh century, some (for example, the *Hymn to Ares*) as late as the fourth century B.C. or Hellenistic times.

Another group of archaic poets whose work is an important source for mythology is the lyric poets, who flourished, especially in the islands of the Aegean Sea, during the seventh and sixth centuries. The lyric tradition was continued in the complex victory *Odes* of the Theban poet Pindar during the first half of the fifth century and in the dithyrambs of his rival and contemporary, Bacchylides of Cos. The lyric choruses of the Athenian dramatists also enshrine important versions of myths.

In the fifth century, the flourishing of the Greek city-states led to the creation of great literature and art, nowhere more impressively than at Athens. Here the three great writers of tragedy, Aeschylus (who died in 456), Sophocles, and Euripides (both of whom died in 406), established the authoritative versions of many myths and sagas: a few examples are the *Oresteia* of Aeschylus for the saga of the House of Atreus; the Theban plays of Sophocles for the saga of the family of Oedipus; and the *Bacchae* of Euripides (translated in large part in Chapter 13) for the myths of Dionysus.

After the fifth century, the creative presentation of myths in Greek literature gave way to more contrived versions, many of which were composed by the Alexandrian poets in the third century. Neither the *Hymns* of Callimachus nor the hymn to Zeus of Cleanthes has great value as a source for myth, but the epic *Argonautica*, of Apollonius of Rhodes (ca. 260 B.C.), is the single most important source for the saga of the Argonauts. Other Alexandrian versions of the classical myths are discussed in Chapter 27.

The principal Greek prose sources are the historians and the mythographers. Of the former, Herodotus is preeminent, although some myths are recorded in Thucydides (last quarter of the fifth century). Herodotus (born ca. 485) traveled widely, both within the Greek world and to Persia and Egypt, and he recorded traditional tales wherever he went. Some of his stories contain profound and universal truths of the sort we would associate with myth as well as history; his account of the meeting between Solon and Croesus, which we have translated in Chapter 6, is a perfect example of the developed "historical myth," giving us insight into Greek interpretations of god and fate that arose out of their factual and mythical storytelling.

The mythographers were late compilers of handbooks of mythology. Of these, the work ascribed to Apollodorus with the title *Bibliotheca* (*Library of Greek Mythology*), which is still valuable, perhaps was composed around A.D. 120. The *Periegesis* (*Description of Greece*) of Pausanias (ca. A.D. 150) contains many myths in its accounts of religious sites and their works of art.

The philosophers, most notably Plato (fourth century B.C.), used myth for didactic purposes, and Plato himself developed out of the tradition of religious tales' "philosophical myth" as a distinct literary form. His myth of Er, for example, is a philosophical allegory about the soul and its existence after death. It is important as evidence for beliefs about the Underworld, and its religious origins go back to earlier centuries, in particular to the speculations of Pythagorean and Orphic doctrine. The Roman poet Vergil (discussed later in this chapter), in his depiction of the afterlife, combines more traditional mythology developed out of Homer with mythical speculations about rebirth and reincarnation found in philosophers like Plato. Thus by translating all three authors—Homer, Plato, and Vergil—on the Realm of Hades (Chapter 15) we have a composite and virtually complete summary of the major mythical and religious beliefs about the afterlife evolved by the Greeks and Romans.

One late philosopher who retold archaic myths for both philosophical and satirical purposes was the Syrian author Lucian (born ca. A.D. 120), who wrote in Greek. His satires, often in dialogue form, present the Olympian gods and the old myths with a good deal of humor and critical insight. "The Judgment of Paris," found in Chapter 19, is a fine example of his art.

Roman Sources. The Greek authors are the foundation of our knowledge of classical myth. Nevertheless, the Roman authors were not merely derivative. Vergil (70–19 B.C.) developed the myth of the Trojan hero Aeneas in his epic, the *Aeneid*. In so doing, he preserved the saga of the fall of Troy, a part of the Greek epic cycle now lost to us. He also developed the legend of the Phoenician queen Dido and told a number of myths and tales associated with particular Italian localities, such as the story of Hercules at Rome. Several passages from Vergil appear in Chapter 26 as well as Chapter 15.

Vergil's younger contemporary Ovid (43 B.C.–A.D. 17) is the single most important source for classical mythology after Homer, and his poem *Metamorphoses* (completed ca. A.D. 8) has probably been more influential—even than Homer—as a source for representations of the classical myths in literature and art. A kind of epic, the poem includes more than 200 legends arranged in a loose chronological framework from the Creation down to Ovid's own time. Many of the most familiar stories come from Ovid, for example, the stories of Echo and Narcissus, Apollo and Daphne, and Pyramus and Thisbe. Ovid's poem on the Roman religious calendar, *Fasti*, is a unique source for the myths of the Roman gods, although he completed only the first six months of the religious year. We include a great deal from Ovid, in direct translation or in paraphrase.

The historian Livy (59 B.C.–A.D. 17) recorded the foundation myths of Rome in the first book of his *Ab Urbe Condita*. He is the source for many of the legends from Roman history that are closer to myth than history. Other Roman writers had antiquarian interests, but none wrote continuous accounts comparable with those of Livy.

Later in the first century A.D., there was a literary renaissance during the reign of the emperor Nero (54–68). The tragedies of Seneca present important versions of several myths, most notably those of Phaedra and Hippolytus, Medea, and Thyestes, the last named being the only surviving full-length version of the myth.

In the generation following Seneca, there was a revival of epic. The *Argonautica* of Valerius Flaccus (ca. 80) and the *Thebaid* of Statius (d. 96) are important versions of their respective sagas. After this time, there are few original works worth notice. One exception is a novel by the African rhetorician Apuleius (b. 123) formally titled *Metamorphoses* but better known to us as *The Golden Ass*. This is our source for the tale of Cupid and Psyche, while its final book is invaluable for its account of the mysteries of Isis.

Interest in mythology continued to be shown in a number of handbooks of uncertain date. We have mentioned the *Bibliotheca* of Apollodorus in Greek; in Latin, compendia were written by Hyginus (perhaps in the mid-second century) and Fulgentius (perhaps an African bishop of the sixth century). This tradition was revived during the Renaissance, especially in Italy, and we discuss some of the important handbooks of mythology in Chapter 27.

The Eclectic Variety of the Sources. It is readily apparent that this literary heritage offers infinite variety. The religious tales of Hesiod contrast with the sophisticated stories of Ovid. The historical legend of Herodotus differs in character from the legendary history of Homer. The philosophical myth of Plato and the romantic storytelling of Apuleius reveal contrasting spiritual hues. The dramatic environments of Aeschylus and Seneca are worlds apart. Yet *all* these authors from different periods and with diverse art provide the rich, eclectic heritage from which a survey of Graeco-Roman mythology must be drawn.

Translations. All the Greek and Roman works named here (except for the late Latin handbooks of mythology) are available in inexpensive translations. The Loeb series includes texts with facing translations, the latter of widely varying quality and readability, with improved, new editions made available annually. The translations published by Penguin and by the University of Chicago Press are generally both reliable and in some cases distinguished. But there is considerable choice and contemporary translations (some of them excellent) of standard works appear with surprising and gratifying frequency.⁴⁸ Yet one needs to be wary. Dover publications offers several Greek and Roman translations that should not be purchased indiscriminately; dramas are available individually, in thrift editions at an extremely modest price, but the poetic translations by

Sir George Young (1837–1930), for example, may be a bit more difficult for modern readers than they bargained for; yet the series includes the acceptable *Medea* by Rex Warner. The free translations of *The Oresteia* and of Ovid's *Metamorphoses* by the distinguished poet Ted Hughes stand as exceptional reinterpretations but can hardly serve as the basis for determining what Sophocles actually said—a vital concern for the student of mythology. Robert Fagles and Stanley Lombardo are, each in his own very different way, commendable translators for today's audiences, although one should be aware of the interpretative liberties they take as they impose their will upon a text. In the case of Homer, Richmond Lattimore wins the crown for his most faithful and poetic transmission of Homer's *Iliad*. Caveat emptor! Oxford University Press offers in its series Oxford World's Classics attractive paperback volumes of good translations of many works that might supplement our text, among them Hesiod's *Theogony* and *Works and Days*, translated by M. L. West, and Sophocles' *Antigone*, *Oedipus the King*, and *Electra*, translated by H. D. F. Kitto; other translations include Homer's *Odyssey*, Apollodorus' *The Library of Greek Mythology*, and Euripides, *Bacchae*, *Iphigenia among the Taurians*, *Iphigenia at Aulis*, and *Rhesus* (translated by James Morwood).

The translations presented in this book are our own, and we attempt to offer accurate and accessible versions for the reader who knows no Greek or Latin and wants to come as close as possible to the original sources.

SELECT BIBLIOGRAPHY

BIBLIOGRAPHY AND TEACHING

- O'Connor, J. F., and Rowland, R. J.** *Teaching Classical Mythology*, Education Papers 5. New York: American Philological Association, 1987. An extremely helpful collection of opinions about content and method with significant bibliography.
- Peradotto, John.** *Classical Mythology: An Annotated Bibliographical Survey*. Urbana: American Philological Association, 1973. A valuable and inexpensive guide in which the subject is neatly categorized and books are evaluated; one must look elsewhere for updated bibliography.

INTERPRETATION, ANALYSIS, AND COMPARATIVE STUDIES

- Strenski, Ivan.** *Four Theories of Myth in Twentieth-Century History: Cassirer, Eliade, Lévi-Strauss and Malinowski*. Iowa City: University of Iowa Press, 1987. An iconoclastic judgment of mythography and mythographers. For Strenski (p. 194), no such thing as *myth* exists—"Rather, what exists is the artifact 'myth' along with the 'industry' manufacturing the concept as it is used here and there."
- , ed. *Malinowski and the Work of Myth*. Princeton: Princeton University Press, 1992. Collection of central writings by Malinowski.
- Thompson, Stith.** *Motif-Index of Folk-Literature*. 6 vols. Bloomington: Indiana University Press, 1966. The basic reference book for folktale motifs.
- Vernant, J.-P.** *Myth and Society in Ancient Greece*. Translated by J. Lloyd. New York: Zone Books, 1990 [1974].
- Walker, Steven F.** *Jung and the Jungians on Myth: An Introduction*. New York: Garland, 1995.
- West, M. L.** *The East Face of Helicon: West Asiatic Elements in Greek Poetry and Myth*. New York: Oxford University Press, 1999. Detailed identification of the links between Hesiod, the Homeric epics, the lyric poets, and Aeschylus and the Near East and possible avenues of transmission.

MYTH AND PSYCHOLOGY

- Bolen, Jean Shinoda.** *Goddesses in Everywoman: A New Psychology of Women*. New York: Harper & Row, 1984. A psychologist provides archetypal descriptions of the Greek and Roman goddesses and shows how they provide meaningful patterns for the understanding of the character, behavior, and personality of women today.
- . *Gods in Everyman: A New Psychology of Men's Lives and Loves*. New York: Harper & Row, 1989. A sequel for men.
- Eisner, Robert.** *The Road to Daulis: Psychoanalysis, Psychology, and Classical Mythology*. New York: Syracuse University Press, 1987. Chapters include "Oedipus and His Kind," "Electra and Other Monsters," and "Apollo and His Boys."
- Evans, Richard I.** *Dialogue with C. G. Jung*. 2d ed. New York: Praeger, 1981. Basic concepts clearly presented through Jung's own words.
- Jung, C. G., et al.** *Man and His Symbols*. New York: Dell, 1968. Only the first essay ("Approaching the Unconscious") is by Jung.
- Lloyd-Jones, H.** "Psychoanalysis and the Study of the Ancient World," in P. Horden, ed., *Freud and the Humanities*. New York: St. Martin's Press, 1985, pp. 152–180. (Reprinted in *Greek Comedy [etc.]: The Academic Papers of Sir Hugh Lloyd-Jones*. New York: Oxford University Press, 1990, pp. 281–305). Hostile criticism of psychoanalytical theory by an authoritative classical scholar.
- Mullahy, Patrick.** *Oedipus Myth and Complex: A Review of Psychoanalytic Theory*. New York: Grove Press, 1955. An excellent survey.
- Schneiderman, Leo.** *The Psychology of Myth, Folklore, and Religion*. Chicago: Nelson-Hall, 1981. Chapters include "The Mystical Quest," "The Cult of Fertility," and "Jason and the Totem."
- Walker, Steven.** *Jung and the Jungians (Theories of Myth)*. New York: Routledge, 2001.
- Woolger, Jennifer Barker, and Woolger, Roger J.** *The Goddess Within: A Guide to the Eternal Myths That Shape Women's Lives*. New York: Fawcett Columbine, 1987. The ma-

for goddesses considered as types, with a bibliography of novels and plays and a list of movies (on video), identifying characters that embody these types.

FEMINISM, HOMOSEXUALITY, AND GENDER

- Bacchilega, Cristina.** *Gender and Narrative Strategies*. University Park: University of Pennsylvania Press, 1997. The representation of women in four classic fairytales and post-modern revisions in literature and film.
- Clark, G.** *Women in the Ancient World*. Greece and Rome Surveys 21. New York: Oxford University Press, 1989.
- Fantham, E.** "Women in Antiquity: A Selective (and Subjective) Survey." *Échos du Monde Classique* 30 (1986), pp. 1–24.
- . *Women in the Classical World: Image and Text*. New York: Oxford University Press, 1994.
- Foley, H. P., ed.** *Reflections of Women in Antiquity*. New York: Gordon & Breach, 1981. First published in *Women's Studies* 8, 1–2 (1981).
- Fone, Byrne.** *Homophobia: A History*. New York: Metropolitan Books (Henry Holt), 2000. An important study, the first part of which deals with the ancient world.
- Halperin, David M.** *One Hundred Years of Homosexuality, and Other Essays on Greek Love*. New York: Routledge, 1989. Argues that modern attitudes toward homosexuality are inadequate for an understanding of sexual mores in the ancient world.
- Hawley, Richard, and Levick, Barbara, eds.** *Women in Antiquity: New Assessments*. New York: Routledge, 1995. Includes discussion of women's roles in religious ritual and mythology.
- Lefkowitz, Mary R.** *Women in Greek Myth*. Baltimore: Johns Hopkins University Press, 1986.
- Pomeroy, Sarah B.** *Goddesses, Whores, Wives, and Slaves*. New York: Schocken, 1975. See especially Chapters 2 and 6.
- Sargent, B.** *Homosexuality in Greek Myth*. London: Athlone Press, 1987.
- Rabinowitz, Nancy Sorkin, and Richlin, Amy, eds.** *Feminist Theory and the Classics*. New York: Routledge, 1993. A collection of essays, some of which include approaches to mythology.
- Thornton, Bruce S.** *Eros: The Myth of Ancient Greek Sexuality*. Boulder: Westview Press, 1997. An insightful exploration of the destructiveness of Eros in Greek imagery and metaphor and the links between ancient and present-day attitudes and concerns about sex, love, and family.
- Williams, Craig A.** *Roman Homosexuality: Ideologies of Masculinity in Classical Antiquity*. New York: Oxford University Press, 1999.
- Winkler, John J.** *Constraints of Desire: The Anthropology of Sex and Gender in Ancient Greece*. New York: Routledge, 1990. A study of the sexuality of women (e.g., Penelope and Sappho) and the interpretation of rituals (e.g., in honor of Demeter, Aphrodite, and Adonis).
- Two scholarly journals, *Arethusa* and *Helios*, are especially receptive to feminist scholarship. *Arethusa* 6 (1973) and 11 (1978) have been mostly reprinted in J. J. Peradotto and J. P. Sullivan, eds., *Women in the Ancient World: The Arethusa Papers* (Albany: State University of New York, 1984). *Helios* 12, 2 (1985) contains a debate on "Classical Studies vs. Women's Studies," by Marilyn Skinner, Mary Lefkowitz, and Judith Hallett.

ICONOGRAPHY, RELIGION, AND FEMINIST INTERPRETATIONS

- Dexter, Miriam Robbins.** *Whence the Goddesses: A Source Book*. Elmsford, N.Y.: Pergamon Press, 1990. A history of goddesses through a comparison of the iconography with the literary tradition.
- Ehrenberg, Margaret.** *Women in Prehistory*. Norman: University of Oklahoma Press, 1989. The role of women from the Paleolithic to the Iron Age, with a consideration of matriarchy in Minoan Crete.
- Eller, Cynthia.** *The Myth of Matriarchal Prehistory: Why an Invented Past Won't Give Women a Future*. New York: Beacon Press, 2000. An argument against the validity of interpretations of feminists such as Marija Gimbutas, who imagine in a time of goddess worship a gynocentric golden age before the onslaught of patriarchy.
- Gimbutas, Marija.** *Goddesses and Gods of Old Europe, 7000–3500 B.C.: Myths and Cult Images*. New and updated ed. Berkeley: University of California Press, 1982. A study of figurines, which includes analysis of "Mistresses of Waters," "The Great Goddess of Life," "Death and Regeneration," and the "Year God."
- . *The Language of the Goddesses*. Foreword by Joseph Campbell. New York: Harper & Row, 1989. An analysis of the symbols in the archaeological evidence under the major categories of "Life-Giving," "The Renewing and Eternal Earth," "Death and Regeneration," and "Energy and Unfolding."

THE GODS, RELIGION, AND THE OCCULT

See the Select Bibliography at the end of Chapter 6.

NOTES

1. See the bibliography for this chapter.
2. G. S. Kirk, *The Nature of Greek Myths* (Harmondsworth and Baltimore: Penguin Books, 1974), p. 27. Kirk identifies a "traditional tale" as a myth that has "succeeded in becoming traditional . . . [and is] important enough to be passed from generation to generation."
3. See especially H. J. Rose, *A Handbook of Classical Mythology*, 6th ed. (London: Methuen, 1958), pp. 12–14, for his designations of myth, saga, and folktale.
4. *Legend* may be used as a general term like *myth* in its broadest sense. Often, however, it is defined as equivalent to *saga* and made to refer to stories inspired by actual persons and events. Thus for us *legend* and *saga* are one and the same. Many prefer the German word *Märchen* for the designation of folktales because of the pioneering work of the brothers Grimm (1857) in collecting and collating variations of oral tales and publishing their own versions.
5. Graham Anderson, *Fairytales in the Ancient World* (London and New York: Routledge, 2000), p. 1. He has identified several motifs from familiar fairytales in Greek and Roman stories (e.g., those of *Cinderella*, *Snow White*, *Red Riding Hood*, and *Bluebeard*, among many others) and offers a comparison of *Cupid and Psyche* and *Beauty and the Beast*.

6. Sometimes *fable* is also applied as a general term, but it is better to restrict its meaning to designate a story in which the characters are animals endowed with human traits, the primary purpose being moral and didactic.
7. Cf. Paul Veyne, *Did the Greeks Believe in Their Myths? An Essay on the Constitutive Imagination* (Chicago: University of Chicago Press, 1988 [1983]), on the creation of truth and history.
8. This has become a commonplace explanation of the human need for mythology; it has been formulated with particular conviction by Leszek Kolakowski in his *The Presence of Myth* (Chicago: University of Chicago Press, 1989 [1972]). Kolakowski frames his discussion in terms of a contrast between myth and science; for him science in its technological aspect represents the truth that is to be distinguished from myth.
9. A case for discussion is presented by the excerpts from the historical myth of Herodotus, translated in Chapter 6.
10. Martha Graham, *Blood Memory* (New York: Doubleday, 1991), p. 4.
11. Ivan Strenski, *Four Theories of Myth in Twentieth-Century History* (Iowa City: Iowa University Press, 1987), pp. 71–128, provides a clear critique of Eliade's complexity. Among Eliade's many works, we single out in this context *Myths, Dreams, and Mysteries* (London: Harvill, 1960) and *Myth and Reality* (New York: Harper & Row, 1963).
12. See Chapter 27, especially pp. 669–670.
13. For Ixion and the Centaurs, see pp. 602–603.
14. See Friedrich Max Müller, *Comparative Mythology: An Essay* (1856; reprint of rev. ed. of 1909, Salem, N.H.: Ayer Company Publishers, 1977), which includes an "Introductory Preface on Solar Mythology" by Abram Smythe Palmer and a parody by R. F. Littledale, "The Oxford Solar Myth," i.e., Müller himself. For an assessment of Müller's theories, see the essay by R. M. Dorson, "The Eclipse of Solar Mythology," in T. A. Sebeok, ed., *Myth: A Symposium* (Bloomington: Indiana University Press), pp. 25–63.
15. Also "contextualism" or "situationism" and "behaviorism" are to be found in Aristotle's writings, "the first scientific work on bio-social psychology . . . practically unknown to students of human nature today." For these and other observations explaining the profound debt of modern psychology to the perceptions of Greek dramatists and philosophers, see Patrick Mullahy, *Oedipus Myth and Complex: A Review of Psychoanalytic Theory* (New York: Grove Press, 1955), pp. 335–337.
16. "The Interpretation of Dreams," in A. A. Brill, ed., *The Basic Writings of Sigmund Freud* (New York: Random House, Modern Library, 1938), p. 308, quoted at greater length by Mullahy as an introduction to Chapter 1 of *Oedipus Myth*. Plato in his *Republic* (571C) has a famous description of the unbridled nature of dreams that includes the mention of intercourse with one's mother.
17. We do not attempt to summarize a complex and fruitful subject; see Mullahy, *Oedipus Myth*, pp. 102–113. For the beginner, Richard Wollheim, *Freud* (Glasgow: William Collins, 1971), provides a concise introduction to Freudian thought; similarly, one might consult Frieda Fordham, *An Introduction to Jung's Psychology*, 3d ed. (Baltimore: Penguin Books, 1966), with a foreword by Jung. The bibliography for both Freud and Jung is, not surprisingly, voluminous and accessible.
18. Cf. Xenophanes, translated on p. 131.
19. Richard I. Evans, *Dialogue with C. G. Jung*, 2d ed. (New York: Praeger, 1981), p. 167.
20. Cf. Joseph Campbell, *Myths to Live By* (New York: Viking Press, 1972). Typically and

- unfortunately, Campbell does not pay enough attention to the Greeks and the Romans.
21. Jan Bremmer, "Oedipus and the Greek Oedipus Complex," in J. Bremmer, ed., *Interpretations of Greek Mythology* (London: Routledge, 1988), pp. 41–59 (the quotation is from note 42).
 22. E. O. Wilson, *Consilience* (New York: Knopf, 1988), pp. 81–85 and 193–196.
 23. See R. L. Gordon, ed., *Myth, Religion, and Society: Structuralist Essays by M. Detienne, L. Gernet, J.-P. Vernant, and P. Vidal-Naquet* (New York: Cambridge University Press, 1981).
 24. Robert Graves, *The Greek Myths* (Baltimore: Penguin Books, 1993 [1955]), vol. 1, p. 10. The basic assumption that permeates his writing has merit: an early matriarchal society once existed in Europe with the worship of a great mother deity, and subsequently there was an invasion of a patriarchal society from the north and east; but many of his detailed arguments are extravagant and rash.
 25. E. R. Leach, *Political Systems of Highland Burma* (Cambridge: Harvard University Press, 1954), p. 13; quoted in Kirk, *Nature of Greek Myths*, pp. 67 and 226. The best short expositions of the ritualist theory are the essays by Lord Raglan, "Myth and Ritual," and S. E. Hyman, "The Ritual View of Myth and the Mythic," in Sebeok, *Myth*, pp. 122–135 and 136–153.
 26. Bronislaw Malinowski, "Myth in Primitive Psychology" (1926); reprinted in *Magic, Science and Religion* (New York: Doubleday, 1955).
 27. Bronislaw Malinowski, *Argonauts of the Western Pacific* (New York: Dutton, 1961 [1922]), p. 25. For a survey of Malinowski's views in a historical context see Strenski, *Four Theories of Myth*, pp. 42–69.
 28. The best introduction to Lévi-Strauss is the "Overture" to *The Raw and the Cooked*, and classicists should read his article "The Structural Study of Myth" (which includes his interpretation of the Oedipus myth), to be found in Sebeok, *Myth*, pp. 81–106.
 29. Lévi-Strauss, quoted in G. S. Kirk, *Myth: Its Meaning and Function in Ancient and Other Cultures* (Berkeley: University of California Press, 1971), p. 44.
 30. Vladimir Propp, *Morphology of the Folktale*, 2d ed., rev. (Austin: University of Texas Press, 1968 [1928]). Chapter 2 (pp. 19–24) is the essential statement of Propp's methodology.
 31. Propp's thirty-one functions are set out in his third chapter, pp. 25–65. The term *motifeme* was coined by the anthropologist Alan Dundes.
 32. This sequence of five functions is worked out by Walter Burkert, *Structure and History in Greek Mythology and Ritual* (Berkeley: University of California Press, 1979), n. 22, pp. 6–7. He points out that the metamorphosis of the mother (e.g., Callisto into a bear, Io into a cow) is not part of a fixed sequence of functions.
 33. See Burkert, *Structure and History*.
 34. See W. Burkert, *Creation of the Sacred: Tracks of Biology in Early Religion* (Cambridge: Harvard University Press, 1996), especially Chapter 3, "The Core of a Tale."
 35. See Strenski, *Four Theories of Myth*, pp. 42–69, for a critical discussion of Malinowski's definition of myth.
 36. Some attempt to find the oral antecedent of a literary version of a Greek myth and turn to late compendia of tales such as that of Apollodorus to identify the original version. The original version of a myth (oral or literary and usually hypothetical) is

- sometimes designated as the Ur-myth. It is difficult and often impossible to ascertain with any certainty the precise details or the date of versions of a classical story told by a late author, but the pursuit is interesting and can be rewarding—but it is beyond the scope of this introductory book.
37. Robert A. Segal, *In Quest of the Hero* (Princeton: Princeton University Press, 1990), pp. xi–xxii, identifies differences among Freud, Jung, and Campbell in their psychological explanations of the hero myth.
 38. Robert A. Segal, *Joseph Campbell: An Introduction* (New York: Meridian, 1997 [1987]). The bibliography for Joseph Campbell is considerable. See, for example, *The Hero with a Thousand Faces*, 2d ed., Bollingen Series 17 (New York: Princeton University Press, 1968); *The Masks of God*, 4 vols. (New York: Viking Press, 1959–1968). These are preferable to his works for a more general audience of television viewers, for whom his approach is exceedingly attractive, but disappointing to the serious classicist who expects a deeper appreciation of Greek and Roman mythology; see *The Power of Myth*, with Bill Moyers (New York: Doubleday, 1988).
 39. Numbers 1 and 16 in D. A. Campbell's *Greek Lyric* (New York: St. Martin's Press, 1967), vol. 1.
 40. Helene P. Foley, ed., *The Homeric Hymn to Demeter: Translation, Commentary, and Interpretive Essays*. Princeton: Princeton University Press, 1998.
 41. Marilyn Katz, *Penelope's Renown: Meaning and Indeterminacy in the Odyssey* (Princeton: Princeton University Press, 1991), p. 13. A starting point for the study of feminism and mythology is Mary R. Lefkowitz, *Women in Greek Myth* (Baltimore: Johns Hopkins University Press, 1986). The "moderate" approach of the author, however, is vigorously criticized by some feminists.

 43. This was the attitude, for example, of L. Lévy-Bruhl, *Primitive Mentality* (New York: Macmillan, 1923 [1922]).
 44. A realization forcefully brought home after a reading of George Steiner, *Antigones* (New York: Oxford University Press, 1984), which discusses treatments of the Antigone theme in European literature; also Ian Donaldson, *The Rapes of Lucretia: A Myth and Its Transformations* (New York: Oxford University Press, 1982). Jane Davidson Reid provides a comprehensive collection of works indebted to Greece and Rome in *The Oxford Guide to Classical Mythology in the Arts, 1300–1990s*, in 2 volumes (New York: Oxford University Press, 1991).
 45. See Lowell Edmunds, *Oedipus: The Ancient Legend and Its Later Analogues* (Baltimore: Johns Hopkins University Press, 1985), a survey of the many variations in ancient, medieval, and modern versions of this eternal myth.
 46. See the bibliography on Orpheus at the end of Chapter 16; and we should not forget the Orpheus of music, theater, and the dance. A most fascinating collection of poetry by internationally acclaimed authors, *Gods and Mortals: Modern Poems on Classical Myths*, ed. by Nina Kossman (New York: Oxford University Press, 2001), includes thirty-one works inspired by the theme of Orpheus and Eurydice.
 47. Invaluable is the Greek edition by T. W. Allen, W. R. Halliday, and E. E. Sikes (New York: Oxford University Press, 1963 [1934]). See also J. S. Clay, *The Politics of Olym-*

pus: Form and Meaning in the Major Homeric Hymns (Princeton: Princeton University Press, 1989).

48. A particularly good buy is *Ten Plays by Euripides* (New York: Bantam Books, 1960) in very readable translations by Moses Hadas and John McLean—all the plays of Euripides that one usually reads and all in one volume! Also in their catalogue is *The Complete Plays of Sophocles* in the stately translation of R. C. Jebb, perhaps a little too stately even in the revision by Hadas.

HISTORICAL BACKGROUND OF GREEK MYTHOLOGY

As we have already seen, the historical dimension is a prominent feature of Greek legend or saga, and an outline of the historical background will be helpful for a fuller understanding.¹ Our knowledge of the early history of Greece and the Aegean is constantly changing, thanks to the fresh discoveries of archaeologists and other scholars. Consequently our view of Greek religion and mythology has been (and will continue to be) modified by new knowledge, not least in the area of legends that cluster around the sagas of Mycenae and Troy.

The foundations of modern archaeological work in the Mycenaean world were laid by the brilliant pioneer Heinrich Schliemann (1822–1890), who, because of his love of Greek antiquity in general and Homer in particular, was inspired by a faith in the ultimate historical authenticity of Greek legend. Although Schliemann's character and achievement have come under vehement attack, it is impossible to deny him pride of place.² In the 1870s he went to Troy, Mycenae, and Tiryns and confirmed the reality of the wealth, grandeur, and power of the cities, kings, and heroes of Minoan-Mycenaean saga. Sir Arthur Evans followed at the turn of the century, unearthing the splendid and grand complex of the Palace of Minos at Cnossus in Crete. A whole new world had been opened up.

For a long time, it was believed that Greece had not been inhabited before the Neolithic period. But we know today that the country was settled in Paleolithic times (before 70,000 B.C.). With the present state of excavation and study, our knowledge of this early period remains tentative. Evidence for the Neolithic period (ca. 6000–3000 B.C.) is more abundant. Archaeology has revealed settled agricultural communities (i.e., outlines of houses, pottery, tools, and graves). It is conjectured that the Neolithic inhabitants came from the east and the north. For our purposes it is noteworthy that evidence of religion seems apparent; particularly significant are little female idols, their sexuality exaggerated by the depiction of swollen bellies, buttocks, and full breasts. Male figures also are found (some ithyphallic), although in far fewer numbers. Was a fertility mother-goddess worshiped in this early period, and perhaps already associated with a male consort? The interpretation of prehistoric icons for an understanding of the worship of gods and goddesses in patriarchal and matriarchal societies has become a subject of intense scrutiny.³

THE BRONZE AGE

The Stone Age gave way to the Bronze Age in Greece, Crete, and the Islands with a migration from the east (the movement was from Asia Minor across the Aegean to the southern Peloponnesus and up into Greece). These invaders were responsible for the building of the great Minoan civilization of Crete. The Bronze Age is divided into three major periods: Early, Middle, and Late; these periods are also labeled according to geographical areas. Thus the Bronze Age in Crete is designated as Minoan (from the tradition of King Minos); for the Islands the term is Cycladic (the Cyclades are the islands that encircle Delos); in Greece it is called Helladic (Hellas is the Greek name for the country). The Late Bronze Age on the mainland (i.e., the late Helladic period) is also identified as the Mycenaean Age, from the citadel of power (Mycenae) dominant in Greece during this period. The chronology with the terminology is as follows:⁴

3000–2000 B.C.	Early Bronze Age	Early Minoan Early Cycladic Early Helladic
2000–1600 B.C.	Middle Bronze Age	Middle Minoan Middle Cycladic Middle Helladic
1600–1100 B.C.	Late Bronze Age	Late Minoan Late Cycladic Late Helladic; also the Mycenaean Age

MINOAN CIVILIZATION

The Minoan civilization grew to maturity in the Middle Bronze Age and reached its pinnacle of greatness in the following period (1600–1400 B.C.). The palace at Cnossus was particularly splendid (although another at Phaestus is impressive, too). The excavations confirm the tradition (as interpreted later, for example, by Thucydides) that Cnossus was the capital of a great thalassocracy (sea-power) and that Minoan power extended over the islands of the Aegean and even the mainland of Greece. The complex plan of the palace at Cnossus suggests the historical basis for the legend of the labyrinth and the slaying of the Minotaur by Theseus. Tribute was in all probability exacted from her allies or her subjects; Cnossus could have won temporary control over Athens, and the monarchy there could have been forced to pay tribute for a time, but subsequently Athens would have won freedom from Cretan domination. The fact that Cnossus had no walls (unlike the fortress citadels of Hellas) indicates that its confident security depended upon ships and the sea. The sophistication of Minoan art and architecture implies much about the civilization, but more particularly the painting and the artifacts reflect a highly developed sense of religion, for example,

the importance of the bull in ritual, the dominant role of a snake goddess, and the sacred significance of the double ax.⁵ It seems fairly clear that the worship of a fertility mother-goddess was basic in Minoan religion.

About 1400 B.C., Cretan power was eclipsed (archaeology reveals signs of fire and destruction) and the focus of civilization shifted to the mainland of Greece. Did the mainland Greeks overthrow Cnossus and usurp the Minoan thalassocracy, with the Athenians playing a significant role? Was an earthquake solely responsible for the eclipse of this island power? Theories abound, but there is no general agreement except insofar as scholars may be divided into two groups: those who stress the dominant influence of the Minoans on the mainland civilization, and refuse to attribute the downfall of Crete to a Mycenaean invasion, as against those who argue for Mycenaean (Greek) encroachment and eventual control of the island. We incline to the latter view.

Excavations on the island of Thera (modern Santorini, about seventy miles northwest of Crete) have unearthed exciting new finds, among them interesting frescoes, and have indicated clear signs of destruction by earthquakes in the Minoan-Mycenaean period which may be dated ca. 1600 B.C.; it had been conjectured that these same earthquakes were responsible for the disintegration of power on the island of Crete but they appear now to have been earlier. At any rate, archaeologists have turned to the mythical tale about Atlantis (recorded by Plato in his *Critias* and *Timaeus*), a great island culture that vanished into the sea; conflict between Atlantis and Attica for control of the sea had broken out when earthquake and flood caused the astonishing disappearance of Atlantis. Does this Platonic legend reflect in any way the actual destruction of Thera, or of Crete itself, and the subsequent encroachment of Mycenaean power?⁶ Again no certain answer is forthcoming.

THE MYCENAEAN AGE

On the mainland of Greece, the Middle Bronze Age (or Middle Helladic period) was ushered in by an invasion from the north and possibly the east. These Indo-Europeans are the first Greeks (i.e., they spoke the Greek language) to enter the peninsula; gradually they created a civilization (usually called Mycenaean) that reached its culmination in the Late Helladic period (1600–1100 B.C.).⁷ They learned much from the Minoans; their painting, palaces, and pottery are strikingly similar, but there are some significant differences. Schliemann was the first to excavate at Mycenae, the kingdom of the mythological family of Atreus, corroborating the appropriateness of the Homeric epithet, "rich in gold." Cyclopean walls (so huge and monumental that they were said to be built by the giant Cyclopes of myth) typically surround the complex palace of the king and the homes of the aristocracy; the entrance to Mycenae was particularly splendid, graced as it was with a relief on which two lions or lionesses flanking a column were sculptured—presumably the relief was of political and religious sig-

nificance, perhaps the emblem of the royal family. A circle of shaft graves within the citadel, set off in ritual splendor, has revealed a hoard of treasures—masks of beaten gold placed on the faces of the corpses, exquisite jewelry, and beautifully decorated weapons. Larger (and later) tholos tombs (also typical of Mycenaean civilization elsewhere and confirming a belief in the afterlife), built like huge beehives into the sides of hills below the palace complex, were dramatically and erroneously identified by Schliemann as both the treasury of Atreus and the tomb of Clytemnestra.

Schliemann's discoveries established the certainty of a link between the traditional tales of Greek saga, especially those contained in the Homeric poems, and the actual places named in the poems, for example Mycenae. Archaeologists have proved that these places were prosperous centers during the Mycenaean Age, and the distinction must be appreciated between the legends of heroes associated with Mycenaean palaces (Agamemnon at Mycenae, Heracles at Tiryns, Oedipus at Thebes, and Nestor at Pylos, to name four such heroes) and the actual world revealed by archaeologists. Carl Blegen's (1887–1971) discovery of the Mycenaean palace at Pylos settled once and for all the controversy over its site and established the plan of the palace, with its well-preserved megaron (i.e., central room with an open hearth); and his conclusion seems inevitable that this is the palace of the family of Nestor. It is difficult to imagine to what families, other than those of the legends, these citadels could have belonged. Yet, of course, we must be wary of a naive belief in the details of the poetic tradition.

In religion there were important differences between the Minoans and the Mycenaean. The northern invaders of 2000 B.C. worshiped in particular a sky-god, Zeus, and in general their religious attitudes were not unlike those mirrored in the world of Homer's celestial Olympians. How different from the spiritual atmosphere of the Minoans dominated by the conception of a fertility mother-goddess, with or without a male counterpart! At any rate, Greek mythology seems to accommodate and reflect the union of these two cultures, as we shall see in Chapter 3.

LINEAR B

Clay tablets inscribed with writing have been found on the mainland (an especially rich hoard was found at Pylos, which helped immeasurably in their decipherment). These tablets were baked hard in the conflagrations that destroyed these Mycenaean fortresses when they fell before the onslaught of the invaders.⁸ The key to the decipherment of the Linear B tablets was discovered in 1952 by Michael Ventris, who was killed in 1956 in an accident. His friend and collaborator, John Chadwick, has written for the layperson a fascinating account of their painstaking and exciting work on the tablets, one of the most significant scholastic and linguistic detective stories of this or any other age.⁹ Important for our

study is the finding of the names of familiar deities of classical Greece: Zeus and Hera (listed as a pair), Poseidon, Hermes, Athena, Artemis, Eileithyia (Eleuthia in the tablets), and the name Dionysus (if this is the god, a startling discovery, since it has usually been assumed that the worship of Dionysus did not come to Greece until after the Mycenaean age); also identified is an early form of the word *paean*, which was later applied as a title or epithet for Apollo. Similarly, Eualios appears, a name identified in classical times with Ares. The word *potnia* (mistress or lady) is frequent, and thus support is added to the theory that the Mycenaeans as well as the Minoans worshiped a goddess of the mother-fertility type and that the concept of chthonian deities that this implies was merged with that of the Olympians. The gods are listed in the tablets as the recipients of offerings (i.e., of animals, olive oil, wheat, wine, and honey), which suggests ritual sacrifice and ceremonial banquets.

TROY AND THE TROJAN WAR

Schliemann and Wilhelm Dörpfeld (his contemporary and successor) were pioneers at Troy in archaeological campaigns from 1871 to 1894. Carl Blegen was the next archaeologist to provide a significant reexamination of the site from 1932 to 1938; after Blegen's, excavations have been renewed since 1988 by a team of archaeologists, led by Manfred Korfmann from the University of Tübingen (Germany) and C. Brian Rose, like Blegen before him, from the University of Cincinnati.¹⁰

There were nine settlements on the site of Troy, situated at the hill of Hisarlik. Troy I was settled in the Early Bronze Age (ca. 2920–2450 B.C.), and there continued to be successive settlements on the site for a long period of history. It was an important city in the historical Greek period (Troy VIII, Ilium, ca. 700–85 B.C.) The Romans restored the city on a large scale in the first century A.D. (Troy IX, Ilium, 85 B.C.–ca. A.D. 500); the imperial family of Augustus Caesar honored the city as the home of their ancestor Aeneas. It was flourishing in the time of Constantine the Great (in the fourth century), and it survived until the late twelfth or early thirteenth century. Of the seven major settlements in the Minoan-Mycenaean period (Troy I–VII), Troy II (ca. 2600–2450 B.C., the citadel contemporary with the Late Troy I settlement) is particularly interesting because of treasure Schliemann claimed to have found at that level and his inaccurate assumption that he had found the city of Priam and the Trojan War. A picture that has become famous shows Schliemann's wife Sophia decked out in some of the jewelry from this treasure (called "The Gold of Troy" or "Priam's Treasure"), which Schliemann gave to the Berlin Museum. It disappeared during World War II, and not until the 1990s did the world learn that it resided in the Pushkin Museum in Moscow. When the Red Army overran Berlin at the end of World War II, they shipped the valuable treasure off to Russia.¹¹ Troy III–V belong to the period ca. 2450–1700 B.C. (Early and Middle Bronze Ages). Troy VI

(Troia or Ilios, ca. 1700–1250 B.C., Middle-Late Bronze Age) was identified by Dörpfeld as the city of the Trojan War. The collapse of Troy VI is dated ca. 1250 B.C. by the new excavators, who believe that the final building phase was ended by a severe earthquake. The fortification walls of Troy VI are particularly impressive, and Dörpfeld identified this settlement as the great city of King Priam, besieged and taken by the Greeks. According to Blegen, however, Troy VI was devastated by an earthquake, but it was the next city, Troy VII (Troy VIIa to be exact), that was the scene of the Trojan War, since for Blegen the evidence seems to provide signs of a siege and fire, indicative of the Trojan War: burnt debris and human skeletal remains, amid signs of devastation, wrought by invaders. For him the fall of Troy VIIa (not Troy VI) belonged ca. 1250. The new excavators date Troy VII ca. 1250–1040 B.C., Late Bronze Age–Early Iron Age, its first phase VIIa ending ca. 1150 B.C. There is a continuity of culture between Troy VI and Troy VIIa; the ruins of houses and citadel walls were reused for repairs; buildings are much smaller, more cramped and clearly arranged; the style of pottery remains Mycenaean; and the population and number of storage vessels are increased. All signs of a city under siege? After all, both Troy VI and Troy VIIa could be the city of Priam in two different phases. Blegen may, after all, be right, but of course much is in great dispute. Thus far, at any rate, Korfmann's conclusions seem to support Blegen's thesis.

And so, sad to say, *absolute* archaeological and historical proof for the identification of Priam's city and the reality of the Trojan War has yet to be found and, indeed, may never be found. Nevertheless, the temptation is overwhelming to conjecture that the excavated Troy (whether Troy VI or Troy VIIa or both) must be the city of Priam that fell to the Greeks; as for chronology, the date of the conflict was ca. 1250–1150 B.C., not too far from the traditionally accepted date of 1184 B.C. for the fall of Troy.¹²

The citadel for Troy VI was newly constructed in eight successive stages, its size (20,000 square meters) greater than any so far found in western Asia Minor, indicating its prestige and power. The fortifications consist of gently sloping walls of ashlar masonry, four to five meters thick and over six meters high, topped by a superstructure of mud-brick, with the inclusion of massive towers. The principal palaces on the summit no longer survive, but remains of large, impressive buildings have been found along the edge of the acropolis within the fortifications. There were several gates leading into the citadel, the principal one to the south, flanked by a tower.

The excavations that are in progress have revealed for Troy VI clear indications of a systematic division between the citadel itself and the lower area of habitation, making the size of the whole settlement approximately 200,000 square meters, with a population of approximately 7000. Sections of a ditch cut in bedrock (south of the mound) have been discovered, which define the outer limit of the inhabited zone of Troy VI. In the lower town traces of habitation indicate that a Bronze Age settlement existed between the central fortress and the outer

ditch. "The outer defense system consisted of an over-ten-foot-wide rock-cut ditch which would have stopped the advance of any horsedrawn chariot outside. . . ." ¹³ Behind this ditch was a fortification wall, "a palisade built of wooden posts set directly into the bedrock. . . . A parallel series of postholes undoubtedly served as support beams for a sentry walk behind the wall." There are also clear indications of an entrance gate with doorposts (about three meters wide), presumably offering access to a major street through the lower town. Also, part of this fortification wall of the lower town of Troy VI was found to join up to the northeast bastion of the citadel; "at no other Bronze Age site is there evidence for such a sophisticated wooden fortification system." A cemetery with cremation-burial urns lay to the south. Many bones attest to the common use of the horse. There is evidence from pottery of commercial links between Troy and the Mycenaean world. Thus we have greater proof that Troy VI, a large, palatial trading center, with its fortified citadel and inhabited lower city, protected by a ditch and a wall, could certainly have been of a magnitude and significance worthy of the power of Priam celebrated in the heroic tradition. From the conjecture that the Trojans probably charged tolls for those traveling through the Dardanelles or Hellespont, serious economic causes may be easily conjured up to explain a conflict between the Mycenaeans and the Trojans.

The excavators have also found, just as Blegen did, indications within the lower town of a violent destruction for the end of Troy VIIa, for example, a hastily buried fifteen-year-old female and "a number of long-range weapons, such as arrowheads and spearheads, and over one hundred stone pellets, probably used for slings, which were piled in heaps. This may indicate defeat in battle because successful defenders usually clean up such piles, whereas victorious aggressors tend not to care about them." Perhaps the most exciting and significant find of all, thus far, is a bronze stamp seal in the Luwian script, an Indo-European language found in the Hittite kingdom and some other sites in Western Anatolia (modern Turkey). Found in a house inside the citadel of Troy VI, here is the very first evidence for writing in Bronze Age Troy. New Hittite texts recently discovered elsewhere "indicate strong connections between the Hittite kingdom and 'Wilusa,' which should probably be identified with Troy." Also one of the texts (called the Alaksandus treaty) identifies among the deities of Wilusa a deity named Appaliunas, almost certainly the name for Apollo, the great god on the side of the Trojans in the *Iliad*. The cult of Apollo is believed to be Anatolian or Cypriot in origin; after all, Homer does call him "Lycian-born."

Other excavations under Korfmann's direction in the area of the Troad have unearthed further confirmation for the authenticity of Homeric geography and legend. Five miles south west of Troy lies Besika Bay, where the original seashore at the time of the Trojan War has been identified; nearby, a cemetery containing about 200 graves surrounded by a single wall has been unearthed; the cremations and burials were accompanied by pottery and funeral offerings

which are unmistakably Mycenaean and of the thirteenth century (the period of late Troy VI or Troy VIIa). It is difficult to resist the identification of this cemetery as that of the camp of the invading Greeks and Besika Bay, from which the island of Tenedos can be seen about six miles away, as the harbor where the Greeks anchored and encamped. Nearby is the headland of Yassi Tepe (formerly named Cape Troy) where there rises a great cone-shaped tumulus, Besik Tepe (now called Sivri Tepe), which most certainly goes back to the Bronze Age and very probably is the great tumulus mentioned by Homer. It must also be the mound, believed in classical times to be the tomb of Achilles and visited by Xerxes and Alexander the Great, who was inspired by his love of the *Iliad* and saw himself and his comrade Hephaestion as a second Achilles and Patroclus.

In the epic cycle of saga, the great leaders of the Mycenaean kingdoms banded together to sail against Troy and, even though the historical facts remain a matter of conjecture, the romance of this poetic legend has a reality too. Until it is disproven with certainty (an unlikely prospect), we have every right to believe that there once was an Agamemnon and a Clytemnestra, a Hector and an Andromache and an Achilles, who lived and died, no matter how fictitious the details of the story that they inspired; and handsome Paris and beautiful Helen ran away together in the grip of Aphrodite, providing the inciting cause for a great war that has become immortal. The final results of the re-excavation of Troy will, we fervently hope, provide some secure answers at last. The scientific, contemporary archaeologist and historian will settle for nothing less than written proof; dare one expect some such confirmation of the Trojan War now that a sample of writing has been found in Bronze Age Troy?¹⁴

END OF THE MYCENAEAN AGE AND HOMER

The destruction of the later phases of Troy VII (VIIb, to the beginning of the tenth century B.C.) marked the troublesome period of transition from the Late Bronze Age to the Age of Iron. The Greeks, we are to assume, returned from Troy in triumph. Yet not long after their return, the Mycenaean Age in Greece was brought to a violent end, perhaps precipitated by internal dissension. The widely held theory that the destruction was entirely the work of Dorians invading from the north and east has been questioned. Some historians not very convincingly associate the destruction of the Mycenaean kingdoms with the "sea peoples" mentioned in an Egyptian inscription put up by the pharaoh Rameses III in the twelfth century B.C., but there is still no certainty about the details of the end of the Bronze Age in Greece.

Darkness descends upon the history of Greece, a darkness that is only gradually dispelled with the emergence of the two great Homeric epics, the *Iliad* and the *Odyssey*, in the eighth century B.C. The stories of the earlier period were kept alive by oral recitation, transmitted by bards like those described in the epics themselves. "Homer" almost certainly belongs to Asia Minor or one of the is-

lands (e.g., Chios) off the coast. In the cities of this area in this period, we find that monarchy is the prevailing institution; significantly enough, the social and political environment for the bard of this later age is not unlike that of his predecessors in the great days of Mycenae. With the re-excavation of Troy, some scholars prefer to describe Homer as an Anatolian (rather than a Greek) poet, and from the various traditions single out Smyrna as most likely for his birthplace, thus focusing his roots and that of his poetry upon Asia Minor (modern Turkey). Nevertheless, in light of our present limited knowledge, no final answers can be given to what has become “the Homeric question or questions”; the narrative of both the *Iliad* and the *Odyssey* seems to have a particularly Greek point of view, and the poet (or poets) who first set them down did so in Greek.

Most important for the appreciation of the cumulative nature of the growth of the legends is the realization that there were two major periods of creative impetus, one before the destruction of Mycenaean civilization and one after. The Homeric poems maintain the fact and fiction of the Bronze Age, but they also portray their own Age of Iron. To mention but one example, archaeology shows us that burial was prevalent in the Mycenaean Age, but in Homer cremation is common. The saga of the Argonauts reflects an interest in the Black Sea that is historical—but was this interest Mycenaean, or do the details belong to the later age of Greek colonization (ca. 800–600 B.C.)? The legend as we have it must be a composite product of both eras. The Theseus story blends, in splendid confusion, Minoan-Mycenaean elements with facts of the later historical period of monarchy in Athens.

The Homeric poems were eventually set down in writing; this was made possible by the invention of an alphabet.¹⁵ The Greeks borrowed the symbols of the Phoenician script and used them to create a true alphabet, distinguishing by each sign individual vowels and consonants, unlike earlier scripts (such as Linear B) in which syllables are the only linguistic units. This stroke of genius, by the way, is typically Greek in its brilliant and inventive simplicity; surely no one of our countless debts to Greek civilization is more fundamental. Is the invention of the Greek alphabet and the setting down of the Homeric epics coincidental? Presumably the dactylic hexameter of epic poetry cannot be reproduced in the clumsy symbols of Linear B. At any rate, when tradition tells us that the legendary Cadmus of Thebes taught the natives to write, we may wonder whether he is supposed to have instructed them in Mycenaean Linear B or in the later Greek alphabet.

NOTES

1. Emily Vermeule, *Greece in the Bronze Age* (Chicago: University of Chicago Press, 1964), offers a survey (now out of date) that contains important earlier bibliography. Vermeule regretfully ignores Homer as evidence; many archaeologists today have returned to Homer cautiously with important results. See note 14 for Fitton's more recent survey.
2. Schliemann's life and career are the material for a bizarre and exciting success story. He amassed a fortune so that he could prove the validity of his convictions, which he pursued with passion. Earlier biographies tend to be romantically sympathetic: Emil Ludwig, *Schliemann: The Story of a Gold-Seeker* (Boston: Little, Brown, 1931);

- Robert Payne, *The Gold of Troy* (New York: Funk and Wagnalls, 1959); Lynn and Gray Poole, *One Passion, Two Loves* (New York: Thomas Y. Crowell, 1966); and Irving Stone, *The Greek Treasure* (New York: Doubleday, 1975). More recently Schliemann has been characterized as a liar and a fraud: David A. Traill, *Schliemann of Troy: Treasure and Deceit* (New York: St. Martin's Press, 1995). Less scholarly, but nevertheless critical and more balanced, is the biography by Caroline Moorehead: *Lost and Found: The 9,000 Treasures of Troy: Heinrich Schliemann and the Gold That Got Away*. New York: Viking, 1996 [1994]. Susan Heuck Allen, *Finding the Walls of Troy* (Berkeley: University of California Press, 1999), another detractor, argues that Schliemann obscured his debts to the British archaeologist Frank Calvert for the identification and the excavation of the mound of Hisarlik as the site of Troy.
3. See the bibliography for Iconography and Religion, p. 34.
 4. The dates for these periods are serviceable. It is rash to insist on greater precision for this early period, the evidence for which fluctuates daily. The chronology of the Bronze Age is a subject of passionate dispute. Thus, attempts at a more precise chronology with further subdivisions within the periods are not reproduced here. For a scholarly treatment consult pertinent chapters and charts in *The Cambridge Ancient History*, 3d ed., vol. 2, pt. 1, *The Middle East and the Aegean Region 1800–1380 B.C.*, ed. I. E. S. Edwards, N. G. L. Hammond, and E. Sollberger (New York: Cambridge University Press, 1973); and pt. 2, *The Middle East and the Aegean Region c. 1380–1000 B.C.* (1975).
 5. For a more detailed interpretation of the evidence in terms of Minoan-Mycenaean religion, see W. K. C. Guthrie, "The Religion and Mythology of the Greeks," in Edwards et al., eds., *The Cambridge Ancient History*, vol. 2, pt. 2, chap. 40.
 6. For a survey of the excavations at Thera, the relationship to Crete, and theories about Atlantis, see Christos G. Doumas, *Thera: Pompeii of the Ancient Aegean* (London: Thames & Hudson, 1983).
 7. Some believe that a later wave of invaders (ca. 1600 B.C.) is to be specifically identified as the Achaeans in Homer; it is better to consider Achaeans virtually an equivalent term for the Mycenaean Greeks.
 8. Linear A tablets (Linear B is derived from the Linear A script), found on Crete, have not yet been deciphered; apparently Minoan Linear A is not Greek. Linear B tablets (written in an early form of Greek) have also been found at Cnossus with provocative implications for historical reconstruction. Hostile criticism of Evans is offered by Leonard R. Palmer, *Mycenaeans and Minoans*, 2d ed. (New York: Alfred A. Knopf, 1965).
 9. John Chadwick, *The Decipherment of Linear B*, 2d ed. (New York: Cambridge University Press, 1958).
 10. Blegen's results have been published in a series of highly technical volumes. Like the reports of his excavations at Pylos, they are a monumental testimony to the scientific precision of modern archaeological procedures. Blegen has provided a survey of the excavations at Troy for the general reader: Carl W. Blegen, *Troy and the Trojans* (New York: Praeger, 1963). We are grateful to Manfred Korfmann, C. Brian Rose, and Getzel Cohen for information about the new excavations of Troy.
 11. The official catalog of the "Gold of Troy" exhibition at the Pushkin State Museum of Fine Arts, Moscow (with beautiful color illustrations) has been published: Vladimir Tolstikov and Mikhail Treister, *The Gold of Troy: Searching for Homer's Fabled City*.

Translated from the Russian by Christina Sever and Mila Bonnichsen (New York: Harry N. Abrams, Inc., 1996).

12. An excellent survey of the problems is given by Michael Wood, *In Search of the Trojan War* (Berkeley: University of California Press, 1996).
13. Details and quotations about the excavations come from the Newsletters of the Friends of Troy, offered by the Institute for Mediterranean Studies in Cincinnati, and *A Guide to Troia*, by the director of the excavations, Manfred Korfmann, and his staff, Excavation Guides Series: 1 (Istanbul: Ege Press, revised edition, 1999). Scholarly annual excavation reports appear in *Studia Troica* (Mainz: Verlag Philipp von Zabern), published in both German and English, which also includes interdisciplinary research concerning Troy.
14. J. Lesley Fitton, in her survey of Bronze Age archaeology, *The Discovery of the Greek Bronze Age* (Cambridge, Mass.: Harvard University Press, 1996), sensibly observes (p. 203): "It seems a sad decline to our modern recognition that the material remains of a pre-literate society, incompletely recovered, can properly be expected only to answer limited and impersonal questions." Nevertheless, she concludes (p. 197) that "Without writing, 'proof' [of the Trojan War] is well nigh unimaginable."
15. The argument for connecting Homer with the invention of the alphabet has been cogently made by H. T. Wade-Gery, *The Poet of the Iliad* (New York: Cambridge University Press, 1952). See also Barry B. Powell, *Homer and the Origins of the Greek Alphabet* (New York: Cambridge University Press, 1991).

MYTHS OF CREATION

There were many myths about creation among the Greeks and Romans, and these myths have many parallels in other mythologies, such as Egyptian, Sumerian, Babylonian, and Hebraic. Homer (ca. 800 B.C.)¹ has the Titans Oceanus and Tethys (identified later in this chapter) responsible for the origin of the gods (*Iliad* 14. 201) and reflects a primitive belief in the geographical nature of the universe as a flat disc with hills, touched at its rim by the vast dome of the heavens. The deity Oceanus is the stream of ocean that encircles the earth (see figure on page 585). But Homer does not by any means provide a complete account of genesis. Hesiod (ca. 700), as far as we can tell, was the first to give literary expression to a systematic explanation of how the gods, the universe, and humankind came into being. At any rate his, the earliest account to survive, may be considered the classic Greek version. The genealogical scheme is presented in his *Theogony*, while his *Works and Days* adds significant details.

CREATION ACCORDING TO HESIOD

In the opening of the *Theogony*, Hesiod devotes many lines to the beauty and power of the Muses, with particular emphasis upon their ability to inspire the infallible revelation of the poet (a complete translation of the opening section of the poem is found in the Additional Reading at the end of this chapter). This ardent invocation to the Muses is no mere artistic convention but rather the utterance of a prophetic visionary.² Hesiod's vehement sincerity may be illustrated by these lines from the *Theogony* (22–34):

 They, the Muses, once taught Hesiod beautiful song, while he was shepherding his flocks on holy Mount Helicon; these goddesses of Olympus, daughters of aegis-bearing Zeus first of all spoke this word to me, "Oh, you shepherds of the fields, base and lowly things, little more than bellies, we know how to tell many falsehoods that seem like truths but we also know, when we so desire, how to utter the absolute truth."

Thus they spoke, the fluent daughters of great Zeus. Plucking a branch, to me they gave a staff of laurel, a wondrous thing, and into me they breathed a divine voice, so that I might celebrate both the things that are to be and the things that were before; and they ordered me to honor, in my song, the race of

the blessed gods who exist forever, but always to sing of them themselves, the Muses, both first and last.

Hesiod's attention to the Muses is steeped in a religious aura of divinely inspired revelation. As he begins his genesis, Hesiod asks the Muses, "Tell me how first gods, earth, rivers, the boundless sea . . . the shining stars, and the wide heavens above came into being." This is their answer (*Theogony* 116–125):

☞ Verily, very first of all Chaos came into being, but then Gaia wide-bosomed, secure foundation of all forever, and dark Tartarus in the depth of the broad land and Eros, the most beautiful of all the immortal gods, who loosens the limbs and overcomes judgment and sagacious counsel in the breast of gods and all humans. From Chaos, Erebus [the gloom of Tartarus] and black Night came into being; but from Night were born Aether [the upper atmosphere] and Day, whom Night bore when she became pregnant after mingling in love with Erebus.

The Greek word *Chaos* suggests a "yawning void." Exactly what it means to Hesiod is difficult to establish.³ His account of creation, fraught with problems, begins paratactically, that is, very first of all Chaos (not a deity particularly, but a beginning or a first principle, perhaps a void) came into being (or was), but then (next) came Gaia (Gaea or Ge, Earth)⁴ and the others, all presumably out of Chaos, just as Hesiod actually states that "from Chaos" came Erebus and dark Night. Although some are adamant in their disagreement, we believe that this is the correct translation and interpretation of Hesiod (see Ovid's description of Chaos as the primal source, discussed later in this chapter). Tartarus is a place deep in the depths of the earth (*Theogony* 713 ff.); Erebus is the gloomy darkness of Tartarus; later it may be equated with Tartarus itself.

THE PRIMACY AND MYSTERY OF EROS

Love, typically a potent force in tales of creation and procreation, inevitably appears early in the *Theogony*. Hesiod, as we have just seen, characterizes the most beautiful Eros by one of his many descriptive touches, which strive to lift his didacticism to the realm of poetry. For the Romans, Eros was called Cupid (or Amor).

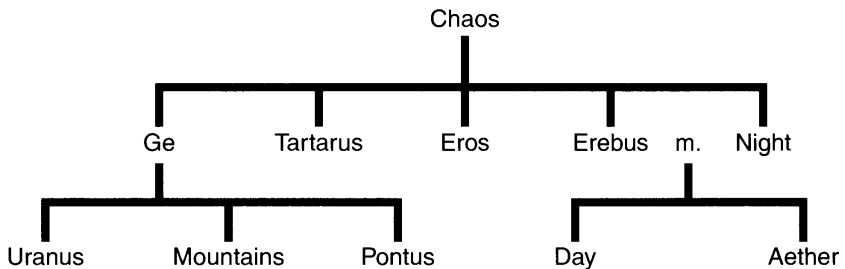

Figure 3.1. Descendants of Chaos

Another myth of creation is found in *Birds*, a comedy by the playwright Aristophanes (fifth century B.C.). For all its mock heroism and burlesque of religious and philosophical speculation, this account reflects earlier theory and illustrates both the multiplicity of versions and the primacy of Eros. A chorus of birds proves that the birds are much the oldest of all the gods by the following tale (683 ff.):

☞ Chaos, Night, black Erebus, and broad Tartarus were first. But Ge, Aer [the lower atmosphere], and Uranus [Sky] did not exist. In the vast hollows of Erebus first of all black-winged Night, alone, brought forth an egg, from which Eros, the desirable, burst forth like a swift whirlwind, his back glistening with golden wings. He mingled in broad Tartarus with Chaos, winged and dark as night, and hatched our race of birds and first led it to light. There was no race of immortals before Eros caused all things to mingle. From the mingling of couples, Uranus, Oceanus, Ge, and the immortal race of all the blessed gods came into being.

The Eros responsible for this fury of procreation may very well be the same Eros who is, in the later tradition, appropriately called Phanes (the one who first shone forth or gave light to creation) and Protogonus (first-born). If so, we have in Aristophanes a parody of a myth that was the basis of a religion ascribed to Orpheus in which the world-egg was a dominant symbol. Orpheus and Orphism are discussed in Chapter 16 and with them other religions similar in nature, designated generically as mystery religions.⁵ The link between myth and profound religious thought and experience in the ancient world is a continuing and fascinating theme.

CREATION ACCORDING TO OVID

Ovid, a Roman poet who wrote some seven hundred years after Hesiod, provides another classic account of genesis, different in important respects from that of Hesiod. Ovid is eclectic in his sources, which include not only Hesiod but many other writers, in particular, Empedocles, a fifth-century philosopher, who theorized that four basic elements (earth, air, fire, and water) are the primary materials of the universe.

Ovid's Chaos (*Metamorphoses* 1. 1–75) is not a gaping void but rather a crude and unformed mass of elements in strife from which a god (not named) or some higher nature formed the order of the universe.⁶ Ovid's poem *Metamorphoses*, which concentrates upon stories that involve transformations of various sorts, could very well provide a basic text for a survey of mythology. We shall on occasion reproduce Ovid's versions, since it is often his poetic, sensitive, and sophisticated treatment that has dominated subsequent tradition. But we must remember that Ovid is Roman, and late, and that his mythology is far removed in spirit and belief from that of earlier conceptions. Mythology for him is little more than inspirational, poetic fodder, however successful and attractive the

end product may be. Both the poetic and the real worlds of Hesiod and Ovid are poles apart.

THE SACRED MARRIAGE OF URANUS (SKY) AND GAIA (GE, EARTH) AND THEIR OFFSPRING

But let us return to Hesiod's *Theogony* (126–155):

 Gaia first brought forth starry Uranus, equal to herself, so that he might surround and cover her completely and be a secure home for the blessed gods forever. And she brought forth the lofty mountain ranges, charming haunts of the divine nymphs who inhabit the hills and dales. And she also bore, without the sweet union of love, Pontus, the barren deep, with its raging surf.

But then Gaia lay with Uranus and bore the deep-eddying Oceanus, and [the Titans, namely] Coeus, and Crius, and Hyperion, and Iapetus, and Theia, and Rhea, and Themis, and Mnemosyne, and golden-crowned Thebe, and lovely Tethys.

After them, she brought forth wily Cronus, the youngest and most terrible of her children and he hated his lusty father.

Moreover, she bore the Cyclopes, insulant at heart, Brontes (“Thunder”) and Steropes (“Lightning”) and bold Arges (“Bright”), who fashioned and gave to Zeus his bolt of thunder and lightning. They had only one eye, set in the middle of their foreheads but they were like the gods in all other respects. They were given the name Cyclopes (“Orb-eyed”) because one single round eye was set in their foreheads.⁷ Might and power and skill were in their works.

In turn, Gaia and Uranus were the parents of three other sons, great and unspeakably violent, Cottus, Briareus, and Gyes, arrogant children. A hundred invincible arms and hands sprang out of their shoulders and also from out of their shoulders there grew fifty heads, all supported by their stalwart limbs. Invincible was the powerful strength in these mighty hulks. Of all the children that Gaia and Uranus produced these were the most terrible and they were hated by their father from the very first.

For Hesiod, it appears, the first deity is female, a basic, matriarchical concept of mother earth and her fertility as primary and divine; comparative studies of iconography from primitive societies provide abundant evidence to confirm this archetype of the primacy of the feminine.⁸ The male sky-god Uranus (another fundamental conception), produced by Earth herself, emerges, at least in this beginning, as her equal partner; in matriarchal societies, he is reduced to a subordinate; in patriarchal societies he becomes the supreme god.

So it is, then, that the personification and deification of sky and earth as Uranus and Ge (Gaia) and their physical union represent basic recurring themes in mythology. Uranus is the male principle, a god of the sky; Ge, the female goddess of fertility and the earth. Worship of them may be traced back to very early times; sky and rain, earth and fertility are fundamental concerns and sources of

wonder to primitive agricultural peoples. The rain of Uranus might, for example, be imagined as his seed that fertilizes the hungry earth and makes her conceive. Thus develops the archetypal concept of a “sacred” or “holy marriage,” a translation of the Greek phrase *hieros gamos*. The sky-god and the earth-goddess appear again and again under various names and guises (for example, Uranus and Ge, Cronus and Rhea, and Zeus and Hera) to enact this holy rite.

The worship of the female earth divinity has many important facets, whether or not she assumes the dominant role in the partnership with her male consort. But whatever her name and however varied her worship, she is significant in all periods, either maintaining her own identity or lurking behind, influencing, and coloring more complex and sophisticated concepts of female deity. Ge, Themis, Cybele, Rhea, Hera, Demeter, and Aphrodite are all, either wholly or in part, divinities of fertility.⁹ Certainly the emotional, philosophical, religious, and intellectual range of the worship of the mother-goddess is vast. It may run the gamut from frenzied orgiastic celebrations, with the castration of her devoted priests, to a sublime belief in spiritual communion and personal redemption; from a blatant emphasis upon the sexual attributes and potency of the female to an idealized vision of love, motherhood, and virgin birth.¹⁰

The *Homeric Hymn to Earth, Mother of All* (30), in its invocation of Gaia (Ge), gives us the essentials of her primary archetype:

👤 About Earth, I will sing, all-mother, deep-rooted and eldest, who nourishes all that there is in the world: all that go on the divine land, all that sail on the sea and all that fly—these she nourishes from her bountifulness. From you, reverend lady, mortal humans have abundance in children and in crops, and it is up to you to give them their livelihood or take it away. Rich and fortunate are those whom you honor with your kind support. To them all things are bounteous, their fields are laden with produce, their pastures are covered with herds and flocks, and their homes are filled with plenty. These rule with good laws in cities of beautiful women and much happiness and wealth attend them. Their sons glory in exuberant joy and their daughters, with carefree hearts, play in blossom-laden choruses and dance on the grass over the soft flowers. These are the fortunate whom you honor, holy goddess, bountiful deity.

Hail, mother of the gods, wife of starry Uranus. Kindly grant happy sustenance in return for my song and I will remember both you and another song too.

Figure 3.2. Children of Ge and Uranus

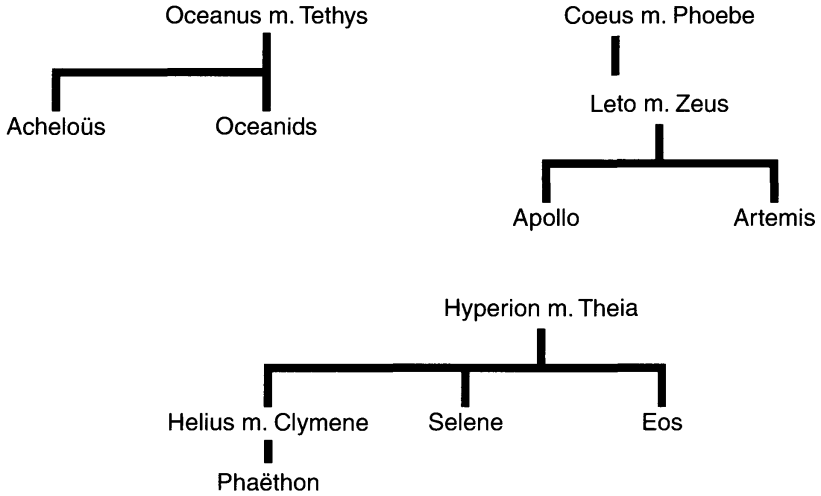

Figure 3.3. Descendants of the Titans

THE TITANS AND THEIR DESCENDANTS: OCEAN, SUN, MOON, AND DAWN

The Titans, children of Uranus and Ge, are twelve in number: Oceanus, Coeus, Crius, Hyperion, Iapetus, Theia, Rhea, Themis, Mnemosyne, Phoebe, Tethys, and “wily Cronus, the youngest and most terrible of these children and he hated his lusty father” (*Theogony* 137–138). They are for the most part deifications of various aspects of nature, and important for their progeny, although a few assume some significance in themselves. In the genealogical labyrinth of mythology, all lineage may be traced back to the Titans and to the other powers originating from Chaos. From these beginnings Hesiod continues to create a universe both real and imagined, physical and spiritual, peopled with gods, demigods, deified or personified abstractions, animals, monsters, and mortals; we cannot list them all here, but we shall select the most important figures. The Titans are best considered in pairs, since there are six males and six females; and the inevitable, incestuous matings of some of these brothers and sisters produce cosmic progeny.

Oceanus and the Oceanids. Oceanus and his mate, Tethys, produced numerous children, the Oceanids, three thousand daughters and the same number of sons, spirits of rivers, waters, and springs, many with names and some with mythological personalities.¹¹ Hesiod provides an impressive list, but he admits (*Theogony* 369–370) that it is difficult for a mortal to name them all, although people know those belonging to their own area.

Hyperion and Helius, Gods of the Sun. The Titan Hyperion is a god of the sun, more important than his sister and mate, Theia. They are the parents of Helius,

Selene, and Eos. Helios, like his father, is a sun-god. Duplication of divinities is common in the early scheme of things; they may exist side by side, or their names and personalities may be confused. Very often the younger generation will dominate the older and usurp its power.

The conventional picture of the sun-god is in harmony with the Homeric conception of geography described at the beginning of this chapter. The sun-god dwells in the East, crosses the dome of the sky with his team of horses, descends in the West into the stream of Oceanus, which encircles the earth, and sails back to the East, chariot and all. The *Homeric Hymn to Helios* (31) offers a glowing picture. Euryphaëssa (the word means “widely shining”), given as the wife of Hyperion and mother of Helios, is probably just another name for Theia.

 Now begin to sing, O Muse Calliope, daughter of Zeus, about shining Helios, whom ox-eyed Euryphaëssa bore to the son of Earth and starry Uranus. For Hyperion married glorious Euryphaëssa, his own sister, who bore him beautiful children: rosy-fingered Eos and Selene of the lovely hair and weariless Helios like the deathless ones, who shines for mortals and immortal gods as he drives his horses. The piercing gaze of his eyes flashes out of his golden helmet. Bright beams radiate brilliantly from his temples and the shining hair of his head frames a gracious countenance seen from afar. The exquisite, finely wrought robe that clothes his body shimmers in the blast of the winds. Mighty stallions are under his control. Then he stays his golden-yoked chariot and horses and stops there at the peak of the heavens, until the time when he again miraculously drives them down through the sky to the Ocean.

Hail, lord, kindly grant a happy sustenance. From you I have begun and I shall go on to celebrate the race of mortal men, the demigods, whose achievements the Muses have revealed to mortals.

Phaëthon, Son of Helios. A well-known story concerns Phaëthon (whose name means “shining”), the son of Helios by one of his mistresses, Clymene.¹² According to Ovid’s account (*Metamorphoses* 1. 747–779; 2. 1–366), Phaëthon was challenged by the accusation that the Sun was not his real father at all. His mother, Clymene, however, swore to him that he was truly the child of Helios and told him that he should, if he so desired, ask his father, the god himself.

Ovid describes in glowing terms the magnificent palace of the Sun, with its towering columns, gleaming with gold and polished ivory. Phaëthon, awed by the grandeur, is prevented from coming too close to the god because of his radiance; Helios, however, confirms Clymene’s account of Phaëthon’s parentage, lays aside the rays that shine around his head, and orders his son to approach. He embraces him and promises, on an oath sworn by the Styx (dread river of the Underworld), that the boy may have any gift he likes so that he may dispel his doubts once and for all. Phaëthon quickly and decisively asks that he be allowed to drive his father’s chariot for one day.

Helios tries in vain to dissuade Phaëthon, but he must abide by his dread oath. He reluctantly leads the youth to his chariot, fashioned exquisitely by Vul-

can,¹³ of gold, silver, and jewels that reflect the brilliant light of the god. The chariot is yoked; Helios anoints his son's face as protection against the flames, places the rays on his head, and with heavy heart advises him on his course and the management of the horses.

Phaëthon, young and inexperienced, is unable to control the four-winged horses who speed from their usual path. The chariot races to the heights of heaven, creating havoc by the intensity of the heat, then hurtles down to earth. Ovid delights in his description of the destruction; among the many transformations that result because of the heat, the Ethiopians at this time acquired their dark skins and Libya became a desert. Earth herself is ablaze and unable to endure her fiery anguish any longer.

Jupiter, in answer to Earth's prayer, hurls his thunder and lightning and shatters the car, dashing Phaëthon to his death. The river Eridanus receives and bathes him, and nymphs bury him with the following inscription upon his tomb: "Here is buried Phaëthon, charioteer of his father's car; he could not control it, yet he died after daring great deeds."¹⁴

Selene, Goddess of the Moon. Selene, daughter of Hyperion and Theia, is a goddess of the moon. Like her brother Helios, she drives a chariot, although hers usually has only two horses. The *Homeric Hymn to Selene* (32) presents a picture.

Tell in song about the moon in her long-winged flight, Muses, skilled in song, sweet-voiced daughters of Zeus, the son of Cronus. The heavenly gleam from her immortal head radiates onto earth. The vast beauty of the cosmos emerges under her shining radiance. The air, unlit before, glistens and the rays from her golden crown offer illumination whenever divine Selene, having bathed her beautiful skin, put on her far-glistening raiment, and yoked the powerful necks of her shining team, drives forward her beautifully maned horses at full speed in the evening; in mid-month brightest are her beams as she increases and her great orbit is full. From the heavens she is fixed as a sure sign for mortals.

Once Zeus, the son of Cronus, joined in loving union with her; she became pregnant and bore a daughter, Pandia, who had exceptional loveliness among the immortal gods.

Hail, kind queen with beautiful hair, white-armed goddess, divine Selene. From you I have begun and I shall go on to sing of mortal demigods whose achievements minstrels, servants of the Muses, celebrate in songs from loving lips.

Selene and Endymion. Only one famous myth is linked with Selene, and that concerns her love for the handsome youth Endymion, who is usually depicted as a shepherd. On a still night, Selene saw Endymion asleep in a cave on Mt. Latmus (in Caria). Night after night, she lay down beside him as he slept. There are many variants to this story, but in all the outcome is that Zeus granted Endymion perpetual sleep with perpetual youth. This may be represented as a punishment (although sometimes Endymion is given some choice) because of

Selene's continual absence from her duties in the heavens, or it may be the fulfillment of Selene's own wishes for her beloved.

Apollo, Sun-God, and Artemis, Moon-Goddess. Many stories about the god of the sun, whether he be called Hyperion, Helius, or merely the Titan, were transferred to the great god Apollo, who shares with them the same epithet, Phoebus, which means "bright." Although Apollo was, in all probability, not originally a sun-god, he came to be considered as such. Thus Phaëthon may become the son of Apollo, as sun-god. Similarly Apollo's twin sister Artemis became associated with the moon, although originally she probably was not a moon-goddess. Thus Selene and Artemis merge in identity, just as do Hyperion, Helius,

The Endymion Sarcophagus. Marble, ca. 200–220 A.D.; width 73 in., height 28 in. (with lid). The sarcophagus is shaped like a trough in which grapes were pressed. On the lid is a portrait of its occupant, Arria, with nine reliefs: those on the extreme left and right are of mountain gods, appropriate to the setting of the myth on Mt. Latmos; the next pair are representations of seasons, Autumn on the left and Spring on the right; the next pair are Cupid and Psyche on the left and Aphrodite and Eros on the right; the next pair are Ares on the left and his lover, Aphrodite, on the right. Balancing Arria is the union of Selene and Endymion. In the center of the main panel Selene descends from her chariot, whose horses are held by a nymph, to join Endymion, who lies to the right. Night pours the opiate of sleep over him (note the poppy-head between the heads of Night and the lion) and Cupids play around the lovers and beneath the right lion's head. Cupid and Psyche embrace beneath the left lion's head. Oceanus and Ge, respectively, lie to the left and beneath Selene's horses, and the horses of the chariot of Helius can be seen rising at the left, while Selene's chariot disappears to the right. The myth of Endymion was a common subject for Roman sarcophagi (seventy examples are known from the second and third centuries A.D.) because it gave hope that the sleep of death would lead to eternal life. (*The Metropolitan Museum of Art, Rogers Fund, 1947 (47.100.4).* All rights reserved, *The Metropolitan Museum of Art.*)

Aurora, artist unknown. Watercolor and gold paper collage on silk, ca. 1820; $14\frac{1}{2} \times 14\frac{1}{4}$ in. The goddess in this painting, formerly called *Venus Drawn by Doves*, has been identified as Aurora (Eos) by verses that accompany other copies, beginning; "Hail, bright Aurora, fair goddess of the morn!/Around thy splendid Car the smiling Hours submissive wait attendance." Her chariot is drawn by doves and winged cupids fly around it. Aurora is dressed in early nineteenth-century clothing, appropriate for the American landscape to which she brings the light of a new day. (Abby Aldrich Rockefeller Folk Art Collection, Williamsburg, Virginia. Reproduced by permission.)

and Apollo; and Selene and Artemis also are described by the adjective "bright," Phoebe (the feminine form of Phoebus).¹⁵ Therefore the lover of Endymion becomes Artemis (or Roman Diana).

Eos, Goddess of the Dawn, and Tithonus. Eos (the Roman Aurora), the third child of Hyperion and Theia, is goddess of the dawn, and like her sister Selene drives a two-horsed chariot. Her epithets in poetry are appropriate, for instance, rosy-fingered and saffron-robed. She is an amorous deity. Aphrodite, the goddess of love, caused her to long perpetually for young mortals because she caught her mate Ares in Eos' bed,¹⁶ but her most important mate was Tithonus, a handsome youth of the Trojan royal house. Eos carried off Tithonus; their story is

simply and effectively told in the *Homeric Hymn to Aphrodite* (5. 218–238), which is translated in its entirety in Chapter 9.

 Eos went to Zeus, the dark-clouded son of Cronus, to ask that Tithonus be immortal and live forever. Zeus nodded his assent and accomplished her wish. Poor goddess, she did not think to ask that her beloved avoid ruinous old age and retain perpetual youth.

Indeed as long as he kept his desirable youthful bloom, Tithonus took his pleasure with early-born Eos of the golden throne by the stream of Oceanus at the ends of the earth. But when the first gray hairs sprouted from his beautiful head and noble chin, Eos avoided his bed. But she kept him in her house and tended him, giving him food, ambrosia, and lovely garments. When hateful old age oppressed him completely and he could not move or raise his limbs, the following plan seemed best to her. She laid him in a room and closed the shining doors. From within his voice flows faintly and he no longer has the strength that he formerly had in his supple limbs.

These poignant few lines depict simply and powerfully the beauty of youth and the devastation of old age, the devotion of love even though sexual attraction has gone, and give a warning to us all: Be careful what you pray for, since God may grant your request. Oscar Wilde puts it more cleverly: “When the gods choose to punish us, they merely answer our prayers.” Later writers add that eventually Tithonus was turned into a grasshopper.

THE CASTRATION OF URANUS AND THE BIRTH OF APHRODITE

We must now return to Hesiod (*Theogony* 156–206), and his account of the birth of the mighty goddess of love, Aphrodite (the Roman Venus). The children of Uranus and Ge (the twelve Titans, including the last-born, wily Cronus, who especially hated his father; the Cyclopes; and the Hecatonchires) all were despised by their father from the beginning (as we learned earlier).

 As each of his children was born, Uranus hid them all in the depths of Ge and did not allow them to emerge into the light. And he delighted in his wickedness. But huge Earth in her distress groaned within and devised a crafty and evil scheme. At once she created gray adamant and fashioned a great sickle and confided in her dear children. Sorrowing in her heart she urged them as follows: “My children born of a presumptuous father, if you are willing to obey, we shall punish his evil insolence. For he was the first to devise shameful actions.”

Thus she spoke. Fear seized them all and not one answered. But great and wily Cronus took courage and spoke to his dear mother: “I shall undertake and accomplish the deed, since I do not care about our abominable father. For he was the first to devise shameful actions.”

Thus he spoke. And huge Earth rejoiced greatly in her heart. She hid him in an ambush and placed in his hands the sickle with jagged teeth and revealed the whole plot to him. Great Uranus came leading on night, and, desirous of

love, lay on Ge, spreading himself over her completely. And his son from his ambush reached out with his left hand and in his right he seized hold of the huge sickle with jagged teeth and swiftly cut off the genitals of his own dear father and threw them so that they fell behind him. And they did not fall from his hand in vain. Earth received all the bloody drops that fell and in the course of the seasons bore the strong Erinyes and the mighty giants (shining in their armor and carrying long spears in their hands) and nymphs of ash trees (called Meliae on the wide earth).

When first he had cut off the genitals with the adamant and cast them from the land on the swelling sea, they were carried for a long time on the deep. And white foam arose about from the immortal flesh and in it a maiden grew. First she was brought to holy Cythera, and then from there she came to sea-girt Cyprus. And she emerged a dread and beautiful goddess and grass rose under her slender feet.

Gods and human beings call her Aphrodite, and the foam-born goddess because she grew amid the foam (*aphros*), and Cytherea of the beautiful crown because she came to Cythera, and Cyprogenes because she arose in Cyprus washed by the waves. She is called too Philommedes (genital-loving) because she arose from the genitals.¹⁷ Eros attended her and beautiful desire followed her when she was born and when she first went into the company of the gods. From the beginning she has this honor, and among human beings and the immortal gods she wins as her due the whispers of girls, smiles, deceits, sweet pleasure, and the gentle delicacy of love.

The stark power of this passage is felt even in translation. The real yet anthropomorphic depiction of the vast Earth enveloped sexually by the surrounding Sky presents its own kind of poetic power. The transparent illustration of basic motives and forces in human nature, through this brutal allegory of Aphrodite's birth, provides fertile material for modern psychology: the youngest son whose devotion to his mother is used by her against the father, the essentially sexual nature of love, the terror of castration. The castration complex of the Freudians is the male's unconscious fear of being deprived of his sexual potency, which springs from his feeling of guilt because of his unrecognized hatred of his father and desire for his mother. Hesiod provides literary documentation for the elemental psychic conscience of humankind. Finally, Hesiod, with characteristic simplicity, suggests Aphrodite's powers of fertility by a brief and beautiful image, "and grass rose under her slender feet."

Is it Hesiod's art that gets to the essence of things, or is it that he is close to the primitive expression of the elemental in human nature? It is a commonplace to say that, although elements of the more grotesque myths may be detected in

←
Saturn Devouring One of His Children. By Francisco Goya y Lucientes (1746–1828); oil on plaster, transferred to canvas, 1820–1822, 57½ × 32½ in. The savagery of Saturn (Cronus) expresses Goya's insight into human cruelty and self-destructiveness, themes that dominated his thoughts in his old age. (*Madrid, Prado.*)

Greek literature, they were humanized and refined by the Greeks and transformed by their genius. Yet it is also true that these primitive elements were retained deliberately and consciously because of the horror, shock, and revelation they contain. The Greeks did not suppress the horrible and horrifying; they selected from it and used it boldly with profound insight and sensitivity. Thus Hesiod's account may reflect a primitive myth, the ultimate origins of which we can never really know, but his version gives it meaning with an artistry that is far from primitive.

CRONUS (SKY) AND RHEA (EARTH) AND THE BIRTH OF ZEUS

Cronus united with his sister Rhea, who gave birth to Hestia, Demeter, Hera, Hades, Poseidon, and Zeus. Cronus devoured all these children, except Zeus, as Hesiod relates (*Theogony* 453–506):

Great Cronus swallowed his children as each one came from the womb to the knees of their holy mother, with the intent that no other of the illustrious descendants of Uranus should hold kingly power among the immortals. For he learned from Gaia and starry Uranus that it was fated that he be overcome by his own child. And so he kept vigilant watch and lying in wait he swallowed his children.

A deep and lasting grief took hold of Rhea and when she was about to bring forth Zeus, father of gods and men, then she entreated her own parents, Gaia and starry Uranus, to plan with her how she might bring forth her child in secret and how the avenging fury of her father, Uranus, and of her children whom great Cronus of the crooked counsel swallowed, might exact vengeance. And they readily heard their dear daughter and were persuaded, and they counseled her about all that was destined to happen concerning Cronus and his stout-hearted son. And they sent her to the town of Lyctus in the rich land of Crete when she was about to bring forth the youngest of her children, great Zeus. And vast Gaia received him from her in wide Crete to nourish and foster.

Carrying him from Lyctus, Gaia came first through the swift black night to Mt. Dicte. And taking him in her hands she hid him in the deep cave in the depths of the holy earth on the thickly wooded mountain.¹⁸ And she wrapped up a great stone in infant's coverings and gave it to the son of Uranus, who at that time was the great ruler and king of the gods. Then he took it in his hands, poor wretch, and rammed it down his belly. He did not know in his heart that there was left behind, in the stone's place, his son unconquered and secure, who was soon to overcome him and drive him from his power and rule among the immortals.

Cronus and Rhea are deities of sky and earth, doublets of Uranus and Gaia, whose power they usurp, and their union represents the reenactment of the universal sacred marriage. But in the tradition, Cronus and Rhea have a more specific reality than their parents. Cronus appears in art as a majestic and sad deity, sickle in hand. He rules, as we shall see, in a golden age among mortals; and

after he is deposed by Zeus, he retires to some distant realm, sometimes designated as the Islands of the Blessed, one of the Greek conceptions of paradise. Cronus is called Saturn by the Romans.

Rhea, too, has a definite mythical personality, although basically yet another mother-goddess of earth and fertility. She sometimes is equated with Cybele, an Oriental goddess who intrudes upon the classical world; the worship of Rhea-Cybele involved frenzied devotion and elements of mysticism. Her attendants played wild music on drums and cymbals and she was attended by animals. The *Homeric Hymn to the Mother of the Gods* (14) pays tribute to this aspect of Rhea's nature:

 Through me, clear-voiced Muse, daughter of great Zeus, sing a hymn to the mother of all gods and all mortals too. The din of castanets and drums, along with the shrillness of flutes, are your delight, and also the cry of wolves, the roar of glaring lions, the echoing mountains, and the resounding forests.
So hail to you and, at the same time, all the goddesses in my song.

RELIGIOUS AND HISTORICAL VIEWS

Of great mythological significance is Hesiod's account of the birth of Zeus on the island of Crete.¹⁹ We can detect in this version some of the basic motives in the creation of myth, especially when we take into account later variations and additions. From these we learn that after Rhea brought forth Zeus in a cave on Mt. Dicte, he was fed by bees and nursed by nymphs on the milk of a goat named Amalthea. Curetes (the word means "young men") guarded the infant and clashed their spears on their shields so that his cries would not be heard by his father, Cronus. These attendants and the noise they make suggest the frantic devotees of a mother-goddess: Ge, Rhea, or Cybele. The myth is etiological in its explanation of the origin of the musical din and ritual connected with her worship.

Like many myths, the story of the birth of Zeus on Crete accommodates an actual historical occurrence: the amalgamation of at least two different peoples or cultures in the early period. When the inhabitants of Crete began to build their great civilization and empire (ca. 3000), the religion they developed (insofar as we can ascertain) was Mediterranean in character, looking back to earlier Eastern concepts of a mother-goddess. The northern invaders who entered the peninsula of Greece (ca. 2000), bringing with them an early form of Greek and their own gods (chief of whom was Zeus), built a significant Mycenaean civilization on the mainland, but it was strongly influenced by the older, more sophisticated power of Crete. The myth of the birth of Zeus reads very much like an attempt to link by geography and genealogy the religion and deities of both cultures. Zeus, the male god of the Indo-Europeans, is born of Rhea, the Oriental goddess of motherhood and fertility.

Two dominant strains in the character of subsequent Greek thought can be understood at least partly in terms of this thesis. W. K. C. Guthrie clearly iden-

tifies this dual aspect of the religion of classical Greece in the contrast between the Olympian gods of Homer and the cult of the mother-goddess Demeter at Eleusis:

The Mother-goddess is the embodiment of the fruitful earth, giver of life and fertility to plants, animals and men. Her cult takes certain forms, involving at least the more elementary kinds of mysticism, that is, the belief in the possibility of a union between the worshipper and the object of his worship. Thus the rites may take the form of adoption as her son or of sexual communion. Orgiastic elements appear, as in the passionate, clashing music and frenzied dancing employed by the followers of Rhea or Cybele. . . . What an essentially different atmosphere we are in from that of the religion of the Achaean heroes described by Homer. There we are in clear daylight, in a world where the gods are simply more powerful persons who might fight for or against one, with whom one made bargains or contracts. The Achaean warrior did not seek to be born again from the bosom of Hera. He was indeed the reverse of a mystic by temperament.²⁰

IMAGES OF CREATION MYTHS

How does one represent the Creation of the world out of emptiness and timelessness? Greek artists did not attempt to do so, for they preferred to create images of particular episodes—for example the birth of Aphrodite (see figure on p. 172) and scenes representing the triumph of the Olympian gods over the Titans and Giants. Victories of the Olympians over snake-legged monsters derive from Eastern myths (see Chapter 4, p. 98) and are common in Greek vase painting from the sixth century B.C. on, while monsters are common in Greek art of the “orientalizing” period of the seventh and sixth centuries B.C. The most popular subjects for Greek artists were the Gigantomachy and related scenes, in which the forces of order (Zeus and the Olympians) triumph over those of disorder and violence (the Titans, the Giants, and Typhoeus). Such scenes often carry a political message, most commonly focusing on the superiority of Greek civilization over the barbarians, especially in the period after the Greek victory over the Persians in 480–479 B.C. (for example, the metopes on the east side of the Parthenon at Athens and the painting on the inside of the shield of Athena Parthenos in the same temple: see Chapter 8, pp. 161–162). At Delphi, the Gigantomachy was represented in the west pediment of the temple of Apollo (ca. 520 B.C.) and on the north frieze of the treasury of the Siphnians (ca. 525 B.C.: shown here). It was the principal subject of the sculptures on the great altar of Zeus at Pergamum (ca. 150 B.C.), where it glorified Telephus, ancestor of the reigning dynasty and son of Heracles, whose help was crucial in the victory of Zeus over the Giants. One of the most complex programs, which included the Gigantomachy and the creation of woman (Pandora), was that of the Parthenon (see Chapter 8, pp. 158–162). We show four different solutions to the problem of representing Creation—two from Greece, one from Australia, and one from eighteenth-century Britain.

Gigantomachy. Detail from the north frieze of the Treasury of the Siphnians at Delphi, ca. 525 B.C.; marble, height 25 in. From left, two giants attack two goddesses (not shown); Dionysus, clothed in a leopardskin, attacks a giant; Themis (a Titan but also a consort of Zeus) drives a chariot drawn by lions; a lion attacks a giant; Apollo and Artemis chase a running giant; corpse of a giant protected by three giants. The names of all the figures were inscribed by the artist. The giants are shown as Greek hoplites—a device both for making the battle more immediate for a Greek viewer and for differentiating between the Olympians and the giants. (*Delphi Museum*.)

We can detect the ramifications of this paradox again and again in many places in the development of Greek civilization, but perhaps we feel it most clearly in the mysticism and mathematics that permeate Greek philosophical attitudes: the numbers of Pythagoras and the immortality of the soul in Orphic doctrine; the dichotomy of Platonic thought and Socratic character in the search for clarity and definition through rational argument coupled with the sound of an inner voice, the depths of a trance, and divine revelation in terms of the obscure and profound symbols of religious myth. God is a geometer and a mystic.

MYTHOLOGICAL INTERPRETATIONS

Ample material is all too apparent for testing the most persistent of interpretative theories discussed in Chapter 1. Here are myths predominantly about nature, which accord with the analysis of Max Müller, although we need not, like Müller, argue that all subsequent mythological stories must be interpreted as allegories of cosmological and natural phenomena.

Feminist concerns are addressed prominently: mother Earth is the first and most fundamental deity, and the feminine will always remain aggressively assertive, if not *always* dominant, in Graeco-Roman mythology; but it is encroached upon by masculine conceptions of the divine, as patriarchy in both society and religion gains a supremacy, which is not, by any means, always absolute over matriarchy.

Zeus Attacks Typhoeus. Apulian red-figure oinochoe by the Arpi painter, late fourth century B.C. Zeus rides in a chariot driven by Hermes; the snake-legged Typhoeus tries to defend himself with a rock as a huge wind-monster puffs vainly against the Olympian gods. (*British Museum.*)

Most apparent is the constant interweaving of structuralist motifs. The dualities (binary opposites) of Lévi-Strauss are everywhere: chaos/order, male/female, sky/earth, youth/age, and beauty/ugliness. Psychological and psychoanalytical motifs abound: Freudian sexuality is blatantly manifest in the castration of Uranus, and the subconscious motivations of the psyche reveal themselves in the recurring pattern of the victory of the ambitious son in his battle

Nawura, Dreamtime Ancestor Spirit. By Djawida, 1985; natural pigments on bark, 61 × 27 in. In the religion of the Aborigines of Australia the Dreaming (or Dreamtime)—a European term—is the period outside of time in which the creation and ordering of the cosmos takes place and in which supernatural beings and ancestors are agents of creation. Being outside of time, it is always present. Djawida's painting shows an ancestral creator and culture-hero who taught human beings the arts of living. Unlike the Greeks, the Aborigines do not set a dividing gulf between human and animal creation. So Nawura has a crocodile jaw and six fingers on each hand (like his wives), and he is accompanied by various animals (turtle, crocodile, kangaroo, fish, platypus, emu) and various attributes of the arts that he taught. In contrast, the Greek Prometheus is unequivocally human in form and attributes. (*National Gallery of Australia, Canberra.*)

for power against his ruthless father. The Jungian archetype of the holy marriage that is enacted three times (by Uranus and Gaia, Cronus and Rhea, and finally Zeus and Hera) is equally basic and universal. And the characters in these conflicts in the beginning of things are themselves archetypes: earth mother and queen, sky father and king, vying for control and settling for an uneasy and sometimes bitter reconciliation between the sexes.

Above all, these stories are etiological, beautiful and powerful mythical explanations of the origins and nature of the universe and the devastating physical and emotional force of Love.

ADDITIONAL READING

HESIOD AND THE MUSES (*THEOGONY*, I–II5)

The poet Hesiod has a much greater identity than his predecessor Homer, who is more immediately linked to an oral tradition and belongs to the coast of Asia Minor or the adjacent islands. The date for Hesiod is in much dispute, but he probably composed his two poems the *Theogony* and *Works and Days* in the period ca. 700. Which was written first also is uncertain, and other works (e.g., the *Catalogs of Women and Heroines* and *Divination by Birds*) are dubiously to be attributed to him personally. Certainly the *Shield of Heracles* belongs later.

As we have seen, in the *Theogony* Hesiod provides some information about his life. More details are to be found in his *Works and Days*, a didactic poem about farming incorporating important mythological stories, which are excerpted in the next chapter. From these two poems, the following biographical sketch may be drawn.

Hesiod's father came from Cyme, situated in the larger area of Aeolis in Asia Minor. He eventually crossed the Aegean and settled in Ascra, a town near Mt. Helicon, in Boeotia, where Hesiod was born and lived his life and which he describes with his usual dour outlook as (*Works and Days* 640) "bad in winter, difficult in summer, and never good at all." Hesiod had a son, so we must assume

←
The Ancient of Days. By William Blake (1757–1827); relief etching printed on paper with hand coloring, 1794, about 9½ × 6½ in. The Platonic notion of the Creator as geometer is dramatically expressed by Blake in the frontispiece to his book *Europe: A Prophecy*, printed and published by him at Lambeth in 1794. His Creator is Urizen (the root of whose name is the Greek word meaning "to set limits"), creator of the material world, author of false religions, and tyrant over the human spirit because of his reasoning powers and materialism. By his act of creation, Urizen separated the beings who represent, respectively, the Spirit of Joy and Poetry and the Spirit of Repressive Religion and Law. The compasses derive from Milton's lines (*Paradise Lost* 7. 225–227: "He took the golden compasses prepar'd/ . . . to circumscribe/ This Universe and all created things"): Milton could well have been thinking of Plato's demiurge (creator). Thus the Greek and biblical myths of the separation of earth and sky, and of the coming of evil, contribute to Blake's political and religious allegory. (*Smith College, Mortimer Rare Book Room.*)

that he got married. After all, misanthrope that he is, Hesiod still recommends a good marriage, if it can be found. Perhaps he was embittered by his experiences with his wife—an idle conjecture! He does tell us for a fact about his embitterment because of betrayal by his brother Perses.

After the death of their father, Hesiod had a serious dispute with Perses over their inheritance. The case was brought before a court, and the judges, who were bribed by Perses, cheated Hesiod of his fair share. Hesiod composed the *Works and Days* as an admonition to his brother to follow the path of justice and obey the righteous dictates of the one god Zeus. The *Theogony* too is drenched in a similar religious fervor, describing the genesis of the world, mortals, and the gods and tracing the momentous events that led to the supremacy of Zeus.

Hesiod grew up as a farmer and a shepherd and became a poet, and he once sailed to Chalcis on the island of Euboea. There, at the funeral games of Amphidamas, he won the first prize in the poetry contest, a tripod, which he dedicated to the Muses at the very spot on Mt. Helicon where he had received their divine inspiration.

Here is the text of the opening section of the *Theogony*, a lengthy tribute and invocation to his beloved Muses, some but by no means all of which has been included in the body of this chapter. The Muses are discussed further in the concluding section of Chapter 5.

HESIOD BEGINS HIS *THEOGONY* WITH A HYMN TO THE MUSES (1–21)

With the Heliconian Muses let us begin to sing, who have as their own Mount Helicon, lofty and holy. Round about the waters of a violet-hued spring they dance on delicate feet, and also round the altar of Zeus, the mighty son of Cronus. After they have bathed their soft skin in the brook, Permessus, or Hippocrene, “The Horse’s Spring,” or the holy Olmeius, at the very peak of Helicon they perform their choral dances, lovely and enticing, with firm and flowing steps. From here they set forth, enveloped and invisible in an impenetrable mist and proceed on their way in the night, singing hymns with exquisite voice in praise of: Zeus, who bears the aegis, and his queen Hera, of Argos, who walks on golden sandals, and bright-eyed Athena, daughter of aegis-bearing Zeus, and Phoebus Apollo, and Artemis, who delights in shooting arrows, and Poseidon, who firmly embraces the earth and violently shakes it, and revered Themis, and Aphrodite, with her seductive eyes, and golden-crowned Hebe, and beautiful Dione, and Leto, and Iapetus, and wily Cronus, and Eos, and great Helius, and bright Selene, and Earth, and great Oceanus, and black Night, and the holy race of the other immortals, who live forever.

THE MUSES TEACH AND INSPIRE HESIOD (22–35)

They, the Muses, once taught Hesiod beautiful song, while he was shepherding his flocks on holy Mount Helicon; these goddesses of Olympus, daughters of aegis-bearing Zeus first of all spoke this word to me, “Oh, you shepherds of the fields, base and lowly things, little more than bellies, we know how to tell many falsehoods that seem like truths but we also know, when we so desire, how to utter the absolute truth.” Thus they spoke, the fluent daughters of great Zeus. Pluck-

ing a branch, to me they gave a staff of laurel, a wondrous thing, and into me they breathed a divine voice, so that I might celebrate both the things that are to be and the things that were before; and they ordered me to honor, in my song, the race of the blessed gods who exist forever, but always to sing of them themselves, the Muses, both first and last. But enough of this digression about my personal encounter with the Muses amidst the oaks and stones of the mountain.²¹

HESIOD BEGINS HIS HYMN TO THE MUSES ONCE AGAIN (36–73)

You then, come, let us begin with the Muses, who by their song delight the great mind of Zeus on Olympus, as they reveal with harmonious voices, the things that are and the things that are to be and the things that were before. The sweet sound flows from their tireless lips and the household of loud-thundering Zeus, their father, laughs in joy at their song, resounding pure as a lily. The peaks of snowy Olympus and the homes of the gods resound. Pouring forth their divine music, first of all they celebrate in song the revered race of the gods from the very beginning, those whom Gaia and Uranus bore and the deities, givers of good things, who were their offspring. Next they begin by extolling Zeus, father of both gods and men and they end their song with him, praising the extent to which he is pre-eminent among the gods and the greatest in might. And then in turn, singing about the race of human beings and that of the powerful giants, they delight the mind of Zeus on Olympus—these Olympian Muses, daughters of aegis-bearing Zeus, who bring forgetfulness of ills and cessation of sorrows. Mnemosyne (“Memory”), the mistress of Eleutheræ on Mount Helicon bore them in Pieria, after mingling with the son of Cronus. For nine nights clever Zeus lay with her, mounting her holy bed, apart from the other immortals. When it was due time, after the seasons had come round and the months had passed and the many days were completed, near the highest peak of snowy Olympus, she gave birth to nine daughters, all of like disposition, with hearts committed to song and minds free from care. There on Olympus they perform their lovely dances and have their beautiful home. By their side also the Charites (“Graces”) and Himeros (“Desire”) dwell amidst delightful abundance. From their lips they sing a lovely song, celebrating with praise the privileges and solicitous behavior of all the immortals. After their birth, they went to the top of Olympus with their divine song, delighting in their beautiful voices. And the black earth echoed and reechoed to their singing. A lovely sound rose up from their delicate footsteps, as they returned to their father. He rules as king in heaven, he himself holding the bolt of thunder and glowing lightning, after having conquered with his might his father Cronus. To each of the immortals he distributed privileges fairly and assigned honors equitably.

ALL NINE MUSES (ESPECIALLY CALLIOPE) INSPIRE KINGS (74–103)

These things then the Muses sang, having their home on Olympus, the nine daughters begotten by great Zeus: Clio and Euterpe and Thalia and Melpomene and Terpsichore and Erato and Polyhymnia and Urania and Calliope. She is the most important of them all because she attends upon revered kings. They pour honeyed dew on the tongue of anyone of the kings cherished by Zeus, whom they, the daughters of great Zeus, honor and look upon favorably at his birth; and from his mouth words flow as sweet as honey. All the people look up to

him as he dispenses justice with fair impartiality; and soon speaking with confidence and knowledge he would end even the greatest of disputes. For this very purpose there are wise kings to settle quarrels easily among people who wrong each other in their dealings, by prevailing in the achievement of just retribution with gentle persuasion. As he passes through the city, they greet him with honey-eyed respect, like a god, and he is conspicuous in any assembly. Such is the nature of the holy gift that the Muses bestow among mortals. From the Muses and Apollo come singers and lyre-players on this earth but kings come from Zeus. Blessed is the one whom the Muses love. Sweet is the sound of the words which flow from his lips. For if anyone has a fresh grief in his soul and his troubled heart is parched with sorrow and then a bard, servant of the Muses, sings a hymn about the glorious accomplishments done by men of old and the blessed gods who have their homes on Olympus, soon the one in distress forgets his woes and does not remember any of his troubles, which have been dispelled so quickly by this gift of song bestowed by the goddesses.

HESIOD INVOKES THE MUSES TO TELL THROUGH HIM THE STORY OF GENESIS (104–115)

Hail, daughters of Zeus. Give me enticing song. Celebrate the holy race of the immortal gods existing forever, those who were born from Earth (Ge) and starry Heaven (Uranus) and those from dark Night and those whom the briny Sea (Pontus) nurtured. Tell how in the beginning gods and Earth (Gaia) came into being and rivers and the boundless sea with its raging surf and the shining stars and the wide firmament above and the gods who were born of them, givers of good things, and how they divided up their wealth and how they shared their honors and also how in the first place they occupied Olympus with its many clefts. You Muses, who have your homes on Olympus, reveal these things to me, and tell from the beginning, which of them first came into being. . . .

SELECT BIBLIOGRAPHY

See the Select Bibliography at the end of Chapter 4.

NOTES

1. Dates for Homer and Hesiod are tentative and controversial.
2. Since the Muses are the daughters of Zeus, their revelation comes from the infallible knowledge of the supreme god.
3. Perhaps Hesiod may anticipate the pre-Socratic philosophers who sought a primal world substance or substances. Thales (ca. 540) seems to provide a startling break with mythological and theological concepts when he claims water to be the source of everything, with shattering implications for both science and philosophy.
4. We shall use the names Gaia, Gaea, and Ge, which mean "earth," interchangeably.
5. For the Orphic myth of creation in particular, see pp. 362–363.
6. The concept of god creating something out of nothing is not found in the Greek and Roman tradition.
7. These Cyclopes are distinct from the Cyclops Polyphemus and his fellows.

8. See the bibliography for Iconography and Religion, p. 34. This matriarchal concept belongs to both the matriarchs and the patriarchs; it depends upon whose point of view you are talking about.
9. Cf. Erich Neumann, *The Great Mother: An Analysis of the Archetype*, 2d ed. (Princeton: Princeton University Press, 1963).
10. Indeed some scholars are ready to find Ge's presence in every goddess and are deeply suspicious of even the most circumspect virgin deities.
11. Included are many important rivers such as the Nile, Alpheus, and Scamander, to mention only three in this world, and the Styx, an imaginary one in the realm of Hades. The patronymic Oceanid regularly refers to a daughter of Oceanus and not a son.
12. For other lovers of Helius, Leucothoë, Clytië, and Rhode, see pp. 607 and 617.
13. When a Roman version of a myth is recounted, the Roman names of the original text will be used. Vulcan is Hephaestus, Jupiter is Zeus, etc. For the Roman names of the major Greek deities, see the beginning of Chapter 5, p. 108.
14. His sisters (daughters of the Sun) in their mourning for Phaëthon are turned into trees, from whose bark tears flow, which are hardened into amber by the sun and dropped into the river. Away in Liguria his cousin, Cycnus, mourns for him, and he too changes and becomes a swan.
15. Artemis, like Selene, as a moon-goddess is associated with magic, since the link between magic and the worship of the moon is close. Apollo and Artemis themselves have a close link with the Titans. The Titan Coeus mated with his sister Phoebe, and their daughter Leto bore Artemis and Apollo to Zeus. Coeus and Phoebe are little more than names to us, but Phoebe is the feminine form of Phoebus, and she herself may very well be another moon-goddess. Hecate, goddess of the moon, ghosts, and black magic, is but another aspect of both Selene and Artemis (see pp. 208–210).
16. Orion, Cleitus, and Cephalus were also all beloved by Eos.
17. Perhaps an intentional play upon the word *philommeides*, "laughter-loving," a standard epithet of Aphrodite.
18. There is trouble in the text concerning Hesiod's identification of the mountain as Dicte or Aegeum.
19. Another version places the birth on the mainland of Greece in Arcadia.
20. W. K. C. Guthrie, *The Greeks and Their Gods* (Boston: Beacon Press, 1955), p. 31.
21. This sentence is an interpretation of line 35, which literally means: "But why all this about an oak or a stone?"

ZEUS' RISE TO POWER: THE CREATION OF MORTALS

THE TITANOMACHY: ZEUS DEFEATS HIS FATHER, CRONUS

When Zeus had grown to maturity, Cronus was beguiled into bringing up all that he had swallowed, first the stone and then the children.¹ Zeus then waged war against his father with his disgorged brothers and sisters as allies: Hestia, Demeter, Hera, Hades, and Poseidon. Allied with him as well were the Hecatonchires and the Cyclopes, for he had released them from the depths of the earth, where their father, Uranus, had imprisoned them. The Hecatonchires were invaluable in hurling stones with their hundred-handed dexterity, and the Cyclopes forged for him his mighty thunder and lightning. On the other side, allied with Cronus, were the Titans—with the important exception of Themis and her son Prometheus, both of whom allied with Zeus. Atlas, the brother of Prometheus, was an important leader on the side of Cronus.

The battle was of epic proportions, Zeus fighting from Mt. Olympus, Cronus from Mt. Othrys. The struggle is said to have lasted ten years.² An excerpt from Hesiod conveys the magnitude and ferocity of the conflict (*Theogony* 678–721):

 The boundless sea echoed terribly, earth resounded with the great roar, wide heaven trembled and groaned, and high Olympus was shaken from its base by the onslaught of the immortals; the quakes came thick and fast and, with the dread din of the endless chase and mighty weapons, reached down to gloomy Tartarus.

Thus they hurled their deadly weapons against one another. The cries of both sides as they shouted reached up to starry heaven, for they came together with a great clamor. Then Zeus did not hold back his might any longer, but now immediately his heart was filled with strength and he showed clearly all his force. He came direct from heaven and Olympus hurling perpetual lightning,

Zeus. Bronze, ca. 460 B.C., height 82 in. The viewer feels awe at the superhuman size, divine nudity, and commanding mien of the god as he hurls his thunderbolt. This statue was found in the sea off Cape Artemisium (at the northern end of Euboea). The identification with Zeus is more likely than with Poseidon hurling his trident. (*National Museum of Athens*.)

and the bolts with flashes and thunder flew in succession from his stout hand with a dense whirling of holy flame. Earth, the giver of life, roared, everywhere aflame, and on all sides the vast woods crackled loudly with the fire. The whole of the land boiled, and as well the streams of Ocean, and the barren sea. The hot blast engulfed the earth-born Titans and the endless blaze reached the divine aether; the flashing gleam of the thunder and lightning blinded the eyes even of the mighty. Unspeakable heat possessed Chaos.

The sight seen by the eyes and the sound heard by the ears were as if earth and wide heaven above collided; for the din as the gods met one another in strife was as great as the crash that would have arisen if earth were dashed down by heaven falling on her from above. The winds mingled the confusion of tremor, dust, thunder, and the flashing bolts of lightning (the shafts of great Zeus), and carried the noise and the shouts into the midst of both sides. The terrifying clamor of fearful strife arose, and the might of their deeds was shown forth. They attacked one another and fought relentlessly in mighty encounters until the battle was decided.

The Hecatonchires (Cottus, Briareus, and Gyes), insatiate of battle, were among the foremost to rouse the bitter strife; they hurled three hundred rocks, one right after another, from their staunch hands and covered the Titans with a cloud of missiles and sent them down far beneath the broad ways of the earth to Tartarus and bound them in harsh bonds, having conquered them with their hands even though they were great of spirit. The distance from earth to gloomy Tartarus is as great as that of heaven from earth.

The Hecatonchires guarded the Titans imprisoned in Tartarus. Atlas was punished with the task of holding up the sky. In some accounts, when Zeus became secure in power he eventually relented and gave the Titans their freedom.

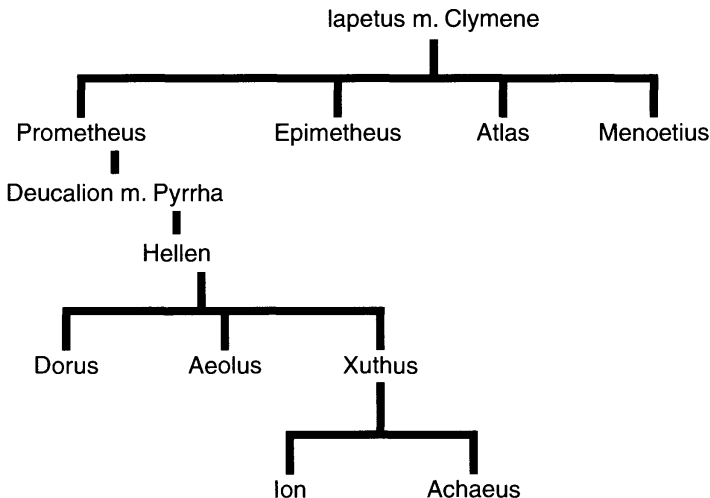

Figure 4.1. The Family of Prometheus

THE GIGANTOMACHY: ZEUS DEFEATS THE GIANTS AND TYPHOEUS

Another threat Zeus had to face came from giants that Earth produced to challenge the new order of the gods, or that had been born when the blood from the mutilation of Uranus fell upon the ground; these monstrous creatures are called Gegeneis, which means "earthborn." (See figure on p. 67.) The many details of the battle vary, but it is generally agreed that the struggle was fierce and ended with the imprisonment of the giants under the earth, usually in volcanic regions where they betray their presence by the violence of their natures. Thus, for example, the giant Enceladus writhes under volcanic Mt. Aetna in Sicily.

One of the most vicious of the monsters who opposed Zeus was the dragon Typhoeus (or Typhaon or Typhon). (See figure on p. 68.) He sometimes joins others in their conflict with the gods, or he may do battle alone, as in Hesiod's account (*Theogony* 820–880):

When Zeus had driven the Titans from heaven, vast Gaea brought forth the youngest of her children through the love of Tartarus and the agency of golden Aphrodite. The hands of the mighty god were strong in any undertaking and his feet were weariless. From the shoulders of this frightening dragon a hundred snake heads grew, flickering their dark tongues; fire blazed from the eyes under the brows of all the dreadful heads, and the flames burned as he glared. In all the terrible heads voices emitted all kinds of amazing sounds; for at one time he spoke so that the gods understood, at another his cries were those of a proud bull bellowing in his invincible might; sometimes he produced the pitiless roars of a courageous lion, or again his yelps were like those of puppies, wondrous to hear, or at another time he would hiss; and the great mountains resounded in echo.

Now on that day of his birth an irremediable deed would have been accomplished and he would have become the ruler of mortals and immortals, if the father of gods and men had not taken swift notice and thundered loudly and fiercely; the earth resounded terribly on all sides and as well the wide heaven above, the sea, the streams of Ocean, and the depths of Tartarus. Great Olympus shook under the immortal feet of the lord as he rose up and earth gave a groan. The burning heat from them both, with the thunder and lightning, scorching winds, and flaming bolts reached down to seize the dark-colored sea. The whole land was aboil and heaven and the deep; and the huge waves surged around and about the shores at the onslaught of the immortals, and a quake began its tremors without ceasing.

Hades who rules over the dead below shook, as did the Titans, the allies of Cronus, in the bottom of Tartarus, from the endless din and terrifying struggle. When Zeus had lifted up the weapons of his might, thunder and lightning and the blazing bolts, he leaped down from Olympus and struck, and blasted on all sides the marvelous heads of the terrible monster. When he had flogged him with blows, he hurled him down, maimed, and vast earth gave a groan. A flame flared up from the god as he was hit by the bolts in the glens of the dark craggy

mountain where he was struck down. A great part of vast earth was burned by the immense conflagration and melted like tin heated by the craft of artisans in open crucibles, or like iron which although the hardest of all is softened by blazing fire and melts in the divine earth through the craft of Hephaestus. Thus the earth melted in the flame of the blazing fire. And Zeus in the rage of his anger hurled him into broad Tartarus.

From Typhoeus arise the winds that blow the mighty rains; but not Notus, Boreas, and Zephyr³ who brings good weather, for they are sprung from the gods and a great benefit for mortals. But the others from Typhoeus blow over the sea at random; some fall upon the shadowy deep and do great harm to mortals, raging with their evil blasts. They blow this way and that and scatter ships and destroy sailors. Those who encounter them on the sea have no defense against their evil. Others blowing over the vast blossoming land destroy the lovely works of mortals born on earth, filling them with dust and harsh confusion.⁴

The attempt of the giants Otus and Ephialtes to storm heaven by piling the mountains Olympus, Ossa, and Pelion upon one another is sometimes linked to the battle of the giants or treated as a separate attack upon the power of Zeus. In fact there is considerable confusion in the tradition concerning details and characters in the battle of the giants (Gigantomachy) and the battle of the Titans (Titanomachy). Both conflicts may be interpreted as reflecting the triumph of the more benign powers of nature over the more wild powers or of civilization over savagery. Historically, it is likely that they represent the fact of conquest and amalgamation when, in about 2000 B.C., the Greek-speaking invaders brought with them their own gods, with Zeus as their chief, and triumphed over the deities of the existing peoples in the peninsula of Greece.

THE CREATION OF MORTALS

Various versions of the birth of mortals existed side by side in the ancient world. Very often they are the creation of Zeus alone, or of Zeus and the other gods. Sometimes immortals and mortals spring from the same source. A dominant tradition depicts Prometheus as the creator of man; and sometimes woman is created later and separately through the designs of Zeus.

After describing the creation of the universe and animal life out of the elements of Chaos, Ovid tells about the birth of mortals, depicting the superiority and lofty ambition of this highest creature in the order of things (*Metamorphoses* 1. 76–88); Ovid's "man" (*homo*) epitomizes the human race.

Until now there was no animal more godlike than these and more capable of high intelligence and able to dominate all the rest. Then man was born; either the creator of the universe, originator of a better world, fashioned him from divine seed, or earth, recently formed and separated from the lofty aether, retained seeds from its kindred sky and was mixed with rain water by Prometheus, the son of Iapetus, and fashioned by him into the likeness of the gods who control

all.⁵ While other animals look down to the ground, man was given a lofty visage and ordered to look up to the sky and fully erect lift his face to the stars. Thus earth that had been crude and without shape was transformed and took on the figure of man unknown before.

THE FOUR OR FIVE AGES

Ovid goes on to describe the four ages: gold, silver, bronze, and iron. We prefer, however, to excerpt Hesiod's earlier account of these ages, which for him are five in number, since he feels compelled to include the historical age of heroes. After he has recounted the story of Pandora and her jar, his introduction to the description of the five ages suggests both the multiplicity of versions of the creation of mortals and the futility of even attempting to reconcile the diverse accounts (*Works and Days* 106–201).

If you like, I shall offer a fine and skillful summary of another tale and you ponder it in your heart: how gods and mortal humans came into being from the same origin.

THE AGE OF GOLD

At the very first the immortals who have their homes on Olympus made a golden race of mortal humans. They existed at the time when Cronus was king in heaven, and they lived as gods with carefree hearts completely without toil or trouble. Terrible old age did not come upon them at all, but always with vigor in their hands and their feet they took joy in their banquets removed from all evils. They died as though overcome by sleep. And all good things were theirs; the fertile land of its own accord bore fruit ungrudgingly in abundance. They in harmony and in peace managed their affairs with many good things, rich in flocks and beloved of the blessed gods. But then the earth covered over this race. Yet they inhabit the earth and are called holy spirits, who are good and ward off evils, as the protectors of mortal beings, and are providers of wealth, since they keep watch over judgments and cruel deeds, wandering over the whole earth wrapped in air. For they have these royal prerogatives.

THE AGE OF SILVER

Then those who have their home on Olympus next made a second race of silver, far worse than the one of gold and unlike it both physically and mentally. A child was brought up by the side of his dear mother for a hundred years, playing in his house as a mere baby. But when they grew up and reached the measure of their prime they lived for only a short time and in distress because of their senselessness. For they could not restrain their wanton arrogance against one another and they did not wish to worship the blessed immortals or sacrifice at their holy altars, as is customary and right for human beings. Then in his anger, Zeus, the son of Cronus, hid them away because they did not give the blessed gods who inhabit Olympus their due. Then the earth covered over this race too. And they dwell under the earth and are called blessed by mortals, and although second, nevertheless honor attends them also.

THE AGE OF BRONZE

Father Zeus made another race of mortal humans, the third, of bronze and not at all like the one of silver; terrible and mighty because of their spears of ash, they pursued the painful and violent deeds of Ares. They did not eat bread at all but were terrifying and had dauntless hearts of adamant. Great was their might, and unconquerable hands grew upon their strong limbs out of their shoulders. Of bronze were their arms, of bronze were their homes, and they worked with bronze implements. Black iron there was not. When they had been destroyed by their own hands, they went down into the dark house of chill Hades without leaving a name. Black death seized them, although they were terrifying, and they left the bright light of the sun.

THE AGE OF HEROES

But when the earth covered over this race too, again Zeus, the son of Cronus, made still another, the fourth on the nourishing earth, valiant in war and more just, a godlike race of heroic men, who are called demigods, and who preceded our own race on the vast earth. Evil war and dread battle destroyed some of them under seven-gated Thebes in the land of Cadmus as they battled for the flocks of Oedipus; the end of death closed about others after they had been led in ships over the great depths of the sea to Troy for the sake of Helen of the beautiful hair. Some, father Zeus, the son of Cronus, sent to dwell at the ends of the earth where he has them live their lives; these happy heroes inhabit the Islands of the Blessed with carefree hearts by the deep swirling stream of Ocean. For them the fruitful earth bears honey-sweet fruit that ripens three times a year. Far from the immortals, Cronus rules as king over them; for the father of gods and men released him from his bonds. Honor and glory attend these last in equal measure.

THE AGE OF IRON

Far-seeing Zeus again made still another race who live on the nourishing earth. Oh, would that I were not a man of the fifth generation but either had died before or had been born later. Now indeed the race is of iron. For they never cease from toil and woe by day, nor from being destroyed in the night. The gods will give them difficult troubles, but good will be mingled with their evils. Zeus will destroy this race of mortals too, whenever it comes to pass that they are born with gray hair on their temples. And a father will not be in harmony with his children nor his children with him, nor guest with host, nor friend with friend, and a brother will not be loved as formerly. As they grow old quickly they will dishonor their parents, and they will find fault, blaming them with harsh words and not knowing respect for the gods, since their right is might. They will not sustain their aged parents in repayment for their upbringing. One will destroy the city of another. No esteem will exist for the one who is true to an oath or just or good; rather mortals will praise the arrogance and evil of the wicked. Justice will be might and shame will not exist. The evil person will harm the better, speaking against him unjustly and he will swear an oath besides. Envy, shrill and ugly and with evil delight, will attend all human beings in their woe. Then Aidos and Nemesis both^o will forsake them and go, their beautiful forms shrouded in white, from the wide earth to Olympus

among the company of the gods. For mortals sorry griefs will be left and there will be no defense against evil.

The bitterness and pessimism of this picture of his own age of iron are typical of Hesiod's general crabbed, severe, and moral outlook. But his designation of the five ages reflects a curious blend of fact and fiction. Historically his *was* the age of iron, introduced into Greece at the time of the invasions that brought the age of bronze to a close. Hesiod's insertion of an age of heroes reflects the fact of the Trojan War, which he cannot ignore.

This conception of the deterioration of the human race has been potent in subsequent literature, both ancient and modern. The vision of a paradise in a golden age when all was well inevitably holds fascination for some, whether imagined as long ago or merely in the good old days of their youth.⁷

It would be wrong to imply that this theory of the degeneration of the human race was the only one current among the Greeks and Romans. Prometheus' eloquent testimony in Aeschylus' play, translated on pages 90–91, listing his gifts to humans, rests upon the belief in progressive stages from savagery to civilization.⁸

PROMETHEUS AGAINST ZEUS

In the *Theogony* (507–616) Hesiod tells the stories of Prometheus and his conflict with Zeus, with the human race as the pawn in this gigantic clash of divine wills. He begins with the birth of Prometheus and explains how Prometheus tricked Zeus (507–569):

Iapetus led away the girl Clymene, an Oceanid, and they went together in the same bed; and she bore to him a child, stout-hearted Atlas; she also brought forth Menoetius, of very great renown, and devious and clever Prometheus, and Epimetheus,⁹ who was faulty in judgment and from the beginning was an evil for mortals who work for their bread. For he was the first to accept from Zeus the virgin woman he had formed. Far-seeing Zeus struck arrogant Menoetius with his smoldering bolts and hurled him down into Erebus because of his presumption and excessive pride. Atlas stands and holds the wide heaven with his head and tireless hands through the force of necessity at the edge of the earth, and in the sight of the clear-voiced Hesperides; this fate Zeus in his wisdom allotted him.

And Zeus bound devious and wily Prometheus with hard and inescapable bonds, after driving a shaft through his middle; and roused up a long-winged eagle against him that used to eat his immortal liver. But all the long-winged bird would eat during the whole day would be completely restored in equal measure during the night. Heracles, the mighty son of Alcmena of the lovely ankles, killed it and rid the son of Iapetus from this evil plague and released him from his suffering, not against the will of Olympian Zeus who rules from on high, so that the renown of Theban-born Heracles might be still greater than before on the bountiful earth. Thus he respected his famous son with this token of honor. Although he had been enraged, the mighty son of Cronus gave up the

Atlas and Prometheus. Laconian black-figure cup, ca. 560 B.C. The two Titans endure the punishments of Zeus: Atlas holds up the star-studded heavens and helplessly watches the vulture (or eagle) attack his brother, Prometheus, who is bound to a column. The motif of the column is repeated in the lower register, with lotus-leaf decoration, while the snake on the left seems not to be part of the narrative. (*Vatican Museums.*)

anger that he had held previously because Prometheus had matched his wits against him.

For when the gods and mortals quarreled at Mecone,¹⁰ then Prometheus with quick intelligence divided up a great ox and set the pieces out in an attempt to deceive the mind of Zeus. For the one group in the dispute he placed flesh and the rich and fatty innards on the hide and wrapped them all up in the ox's paunch; for the other group he arranged and set forth with devious art the white bones of the ox, wrapping them up in white fat.

Then the father of gods and men spoke to him: "Son of Iapetus, most renowned of all lords, my fine friend, how partisan has been your division of

the portions!" Thus Zeus whose wisdom is immortal spoke in derision. Wily Prometheus answered with a gentle smile, as he did not forget his crafty trick. "Most glorious Zeus, greatest of the gods who exist forever, choose whichever of the two your heart in your breast urges." He spoke with crafty intent.

But Zeus whose wisdom is immortal knew and was not unaware of the trick. And he foresaw in his heart evils for mortals, which would be accomplished. He took up in both his hands the white fat, and his mind was enraged, and anger took hold of his heart as he saw the white bones of the ox arranged with crafty art. For this reason the races of human beings on earth burn the white bones for the immortals on the sacrificial altars.

Zeus the cloud-gatherer was greatly angered and spoke to him: "Son of Iapetus, my fine friend, who know thoughts that surpass those of everyone, so you have then not yet forgotten your crafty arts." Thus Zeus whose wisdom is immortal spoke in anger. From this time on he always remembered the deceit and did not give the power of weariless fire out of ash trees to mortals who dwell on the earth.

But the noble son of Iapetus tricked him by stealing in a hollow fennel stalk the gleam of weariless fire that is seen from afar. High-thundering Zeus was stung to the depths of his being and angered in his heart as he saw among mortals the gleam of fire seen from afar.

THE CREATION OF PANDORA

Hesiod goes on to describe the dread consequence of Zeus' anger at Prometheus for his theft of fire (*Theogony* 570–616):

 Immediately he contrived an evil thing for mortals in recompense for the fire. The renowned lame god, Hephaestus, fashioned out of earth the likeness of a modest maiden according to the will of the son of Cronus. Bright-eyed Athena clothed and arrayed her in silvery garments and with her hands arranged on her head an embroidered veil, wondrous to behold. And Pallas Athena put around her head lovely garlands of budding flowers and greenery. And she placed on her head a golden crown that the renowned lame god himself made, fashioning it with his hands as a favor to his father, Zeus. On it he wrought much intricate detail, wondrous to behold, of the countless animals which the land and the sea nourish; many he fixed on it, amazing creations, like living creatures with voices; and its radiant loveliness shone forth in profusion.

When he had fashioned the beautiful evil in recompense for the blessing of fire, he led her out where the other gods and mortals were, exulting in the raiment provided by the gleaming-eyed daughter of a mighty father. Amazement took hold of the immortal gods and mortals as they saw the sheer trick, from which human beings could not escape. For from her is the race of the female sex, the ruinous tribes of women, a great affliction, who live with mortal men, helpmates not in ruinous poverty but in excessive wealth, just as when in overhanging hives bees feed the drones, conspirators in evil works; the bees each day, the whole time to the setting of the sun, are busy and deposit the white honeycombs, but the drones remain within the covered hives and scrape to-

gether the toil of others into their own belly. Thus in the same way high-thundering Zeus made women, conspirators in painful works, for mortal men.

He also contrived a second evil as recompense for the blessing of fire; whoever flees marriage and the troublesome deeds of women and does not wish to marry comes to ruinous old age destitute of anyone to care for him. He does not lack a livelihood while he is living but, when he has died, distant relatives divide up the inheritance. And again even for the one to whom the fate of acquiring a good and compatible wife in marriage falls as his lot, evil continually contends with good throughout his life. Whoever begets mischievous children lives with a continuous sorrow in his breast; in heart and soul the evil is incurable. Thus it is not possible to go beyond the will of Zeus nor to deceive him. For not even the goodly Prometheus, son of Iapetus, got out from under his heavy wrath and a great bondage held him fast, even though he was very clever.

Once again Hesiod's dominant note is despair. He provides another dismal account of Prometheus in the *Works and Days* (47–105); despite some minor repetitions, it is worth quoting for its elaboration of the theft of fire and its variations on the creation of woman. The evil is now specifically named; she is Pandora, which means "all gifts," and she has a jar (see Color Plate 19).¹¹

 Zeus, angered in his heart, hid the means of human livelihood because wily Prometheus deceived him. And so he devised for human beings sorrowful troubles. He hid fire. Then the good son of Iapetus, Prometheus, stole it for human beings from wise Zeus in a hollow reed, without Zeus who delights in thunder seeing it.

But then Zeus the cloud-gatherer was roused to anger and spoke to him: "Son of Iapetus, who know how to scheme better than all others, you are pleased that you stole fire and outwitted me—a great misery for you and men who are about to be. As recompense for the fire I shall give them an evil in which all may take delight in their hearts as they embrace it."

Thus he spoke and the father of gods and men burst out laughing. He ordered renowned Hephaestus as quickly as possible to mix earth with water and to implant in it a human voice and strength and to fashion the beautiful and desirable form of a maiden, with a face like that of an immortal goddess. But he ordered Athena to teach her the skills of weaving at the artful loom, and golden Aphrodite to shed grace about her head and painful longing and sorrows that permeate the body. And he commanded the guide Hermes, slayer of Argus, to put in her the mind of a bitch and the character of a thief.

Thus he spoke and they obeyed their lord Zeus, son of Cronus. At once the famous lame god molded out of earth the likeness of a modest maiden according to the will of Zeus. Bright-eyed Athena clothed and arrayed her, and the Graces and mistress Persuasion adorned her with golden necklaces. The beautiful-haired Seasons crowned her with spring flowers, and Pallas Athena fitted out her body with every adornment. Then the guide and slayer of Argus contrived in her breast lies and wheedling words and a thievish nature, as loud-thundering Zeus directed. And the herald of the gods put in her a voice, and

named this woman Pandora, because all who have their homes on Olympus gave her a gift, a bane to men who work for their bread.

But when the Father had completed this sheer impossible trick he sent the swift messenger of the gods, the renowned slayer of Argus, to bring it as a gift for Epimetheus. And Epimetheus did not think about how Prometheus had told him never to accept a gift from Olympian Zeus but to send it back in case that in some way it turned out to be evil for mortals. But he received the gift and when indeed he had the evil he realized.

Previously the races of human beings used to live completely free from evils and hard work and painful diseases, which hand over mortals to the Fates. For mortals soon grow old amidst evil. But the woman removed the great cover of the jar with her hands and scattered the evils within and for mortals devised sorrowful troubles.

Hope alone remained within there in the unbreakable home under the edge of the jar and did not fly out of doors. For the lid of the jar stopped her before she could, through the will of the cloud-gatherer Zeus who bears the aegis. But the other thousands of sorrows wander among human beings, for the earth and the sea are full of evils. Of their own accord diseases roam among human beings some by day, others by night bringing evils to mortals in silence, since Zeus in his wisdom took away their voice. Thus it is not at all possible to escape the will of Zeus.

INTERPRETATIONS OF THE MYTHS OF PROMETHEUS AND PANDORA

The etiology of the myth of Prometheus is perhaps the most obvious of its many fascinating elements. It explains procedure in the ritual of sacrifice and the origin of fire—Promethean fire, the symbol of defiant progress. Prometheus himself is the archetype of the culture god or hero ultimately responsible for all the arts and sciences.¹² Prometheus is also the archetype of the divine or heroic trickster (cf. Hermes and Odysseus).

Other archetypal themes once again abound, and embedded in them is a mythological etiology that provides causes and explanations for such eternal mysteries as: What is the nature of god or the gods? Where did we come from? Do we have a dual nature, an earthly, mortal body and a divine, immortal soul? Are human beings the pawns in a war of rivalry between supernatural powers? Did they lose a paradise or evolve from savagery to civilization? What is the source of and reason for evil? In the person of Pandora the existence of evil and pain in the world is accounted for.

The elements in the myth of the creation of woman reveal attitudes common among early societies. Like Eve, for example, Pandora is created after man and she is responsible for his troubles. Why should this be so? The answer is complex, but inevitably it must lay bare the prejudices and mores inherent in the social structure. But some detect as well the fundamental truths of allegory and see the woman and her jar as symbols of the drive and lure of procreation, the womb and birth and life, the source of all our woes.¹³

The theme of the first woman as the bringer of evil is particularly fraught with social, political, and moral implications. The most obvious interpretation of Hesiod is that Pandora was the first woman (like Eve in the Bible) and responsible for evil. Thus for the Greeks the world, before Pandora, was populated only by men—an extremely difficult concept. Did Prometheus create only men out of clay? Hesiod's account is riddled with irreconcilable contradictions because various stories have been awkwardly but poetically conflated. In the myth of the Ages of Mankind both men and women are created by Zeus or the gods, and both men and women are held responsible for evil, for which they are punished by the gods. Should we assume that Pandora was sent with her jar of evils (and Hope) to a happy humankind? At any rate, amidst all this confusion, Hesiod is more accurately condemned as a misanthropist, rather than only as a misogynist.

Details in the story of Pandora are disturbing in their tantalizing ambiguity. What is Hope doing in the jar along with countless evils? If it is a good, it is a curious inclusion. If it too is an evil, why is it stopped at the rim? What then is its precise nature, whether a blessing or a curse? Is Hope the one thing that enables human beings to survive the terrors of this life and inspires them with lofty ambition? Yet is it also by its very character delusive and blind, luring them on to prolong their misery? It is tempting to see in Aeschylus' play *Prometheus Bound* an interpretation and elaboration: human beings were without hope until Prometheus gave it to them along with the benefit of fire. The hope Prometheus bestows on mortals is both blind and a blessing. The pertinent dialogue between Prometheus and the chorus of Oceanids runs as follows (248–252):

PROMETHEUS: I stopped mortals from foreseeing their fate.

CHORUS: What sort of remedy did you find for this plague?

PROMETHEUS: I planted in them blind hopes.

CHORUS: This was a great advantage that you gave mortals.

PROMETHEUS: And besides I gave them fire.

Fundamental to both Hesiod and Aeschylus is the conception of Zeus as the oppressor of humankind and Prometheus as its benefactor. In Aeschylus the clash of divine wills echoes triumphantly through the ages. His portrait, more than any other, offers the towering image of Prometheus as the Titan, the bringer of fire, the vehement and weariless champion against oppression, the mighty symbol for art, literature, and music of all time.

AESCHYLUS' *PROMETHEUS BOUND*

Aeschylus' play *Prometheus Bound* begins with Strength (Kratos) and Force (Bia), brutish servants of an autocratic Zeus, having brought Prometheus to the remote and uninhabited land of Scythia. Hephaestus accompanies them. Kratos urges the reluctant Hephaestus to obey the commands of Father Zeus and bind Prometheus in bonds of steel and pin him with a stake through his chest to the

Prometheus. By Gustave Moreau (1826–1898); oil on canvas, 1868, 80½ × 48 in. Moreau's Prometheus is a defiant hero who ignores the vulture's beak and gazes into the future, knowing that his release and the defeat of Zeus lie ahead. Although chained among the rocks of the Caucasus, he is bound to a column, like the figure in the Laconian cup (the previous photo). At his feet lies a dead vulture, exhausted by its victim's obduracy. (Paris: Musée Gustave Moreau.)

desolate crags. It was Hephaestus' own brilliant "flower" of fire, deviser of all the arts, that Prometheus stole, and for this error ("sin" is not an inappropriate translation) he must pay to all the gods "so that he might learn to bear the sovereignty of Zeus and abandon his love and championship of mortals" (10–17).

Aeschylus, with great skill and economy, provides us with the essentials for the conflict and the mood of the play. The violent struggle pits a harsh, young,

and angry Zeus against the defiant determination of a glorious and philanthropic Prometheus.¹⁴

Hephaestus, in contrast to savage Strength and Force, is sensitive and humane; he curses his craft, hates the job he has to do, and pities the sleepless torment of Prometheus. Hephaestus also expresses an important theme of the play in his realization that Zeus has seized supreme rule of gods and mortals only recently: "The mind of Zeus is inexorable; and everyone is harsh when he first comes to power." The contrast is presumably intended to foreshadow the later Zeus, who will learn benevolence through experience, wisdom, and maturity. Certainly Zeus, fresh from his triumphant defeat of his father and the Titans, might indeed be uneasy and afraid. He may suffer the same fate as Cronus or Uranus before him; and Prometheus, his adversary, knows the terrifying secret that might lead to Zeus' undoing: Zeus must avoid the sea-nymph Thetis in his amorous pursuits, for she is destined to bear a son mightier than his father. In his knowledge of this lies Prometheus' defiant power and the threat of Zeus' ultimate downfall.

The first utterance of Prometheus after Strength, Force, and Hephaestus have done their work is glorious, capturing the universality of his great and indomitable spirit (88–92):

 O divine air and sky and swift-winged breezes, springs of rivers and countless laughter of sea waves, earth, mother of everything, and all-seeing circle of the sun, I call on you. See what I, a god, suffer at the hands of the gods.

In the course of the play, Prometheus expresses his bitterness because, although he with his mother fought on the side of Zeus against the Titans, his only reward is torment. It is typical of the tyrant to forget and turn against his former allies. Prometheus lists the many gifts he has given to humankind for whom he suffers now (442–506):

 **PROMETHEUS:** Listen to the troubles that there were among mortals and how I gave them sense and mind, which they did not have before. I shall tell you this, not out of any censure of humankind, but to explain the good intention of my gifts. In the beginning they had eyes to look, but looked in vain, and ears to hear, but did not hear, but like the shapes of dreams they wandered in confusion the whole of their long life. They did not know of brick-built houses that face the sun or carpentry, but dwelt beneath the ground like tiny ants in the depths of sunless caves. They did not have any secure way of distinguishing winter or blossoming spring or fruitful summer, but they did everything without judgment, until I showed them the rising and the setting of the stars, difficult to discern.

And indeed I discovered for them numbers, a lofty kind of wisdom, and letters and their combination, an art that fosters memory of all things, the mother of the Muses' arts. I first harnessed animals, enslaving them to the yoke to become reliefs for mortals in their greatest toils, and I led horses docile under the reins and chariot, the delight of the highest wealth and luxury. No one before

me discovered the seamen's vessels which with wings of sail are beaten by the waves. Such are the contrivances I, poor wretch, have found for mortals, but I myself have no device by which I may escape my present pain.

CHORUS: You suffer an ill-deserved torment, and confused in mind and heart are all astray; like some bad doctor who has fallen ill, you yourself cannot devise a remedy to effect a cure.

PROMETHEUS: Listen to the rest, and you will be even more amazed at the kinds of skills and means that I devised; the greatest this: if anyone fell sick, there existed no defense, neither food nor drink nor salve, but through lack of medicines they wasted away until I showed them the mixing of soothing remedies by which they free themselves from all diseases. I set forth the many ways of the prophetic art. I was the first to determine which dreams would of necessity turn out to be true, and I established for them the difficult interpretation of sounds and omens of the road and distinguished the precise meaning of the flight of birds with crooked talons, which ones are by nature lucky and propitious, and what mode of life each had, their mutual likes, dislikes, and association; the smoothness of the innards and the color of the bile that would meet the pleasure of the gods, and the dappled beauty of the liver's lobe. I burned the limbs enwrapped in fat and the long shank and set mortals on the path to this difficult art of sacrifice, and made clear the fiery signs, obscure before. Such were these gifts of mine. And the benefits hidden deep within the earth, copper, iron, silver, and gold—who could claim that he had found them before me? No one, I know full well, unless he wished to babble on in vain.

In a brief utterance learn the whole story: all arts come to mortals from Prometheus.

When Hermes, Zeus' messenger, appears in the last episode, Prometheus is arrogant and insulting in his refusal to bow to the threats of even more terrible suffering and reveal his secret. The play ends with the fulfillment of the promised torment; the earth shakes and cracks, thunder and lightning accompany wind and storm as Prometheus, still pinned to the rock, is plunged beneath the earth by the cataclysm; there he will be plagued by the eagle daily tearing his flesh and gnawing his liver. Prometheus' final utterance echoes and affirms the fiery heat and mighty spirit of his first invocation: "O majesty of earth, my mother, O air and sky whose circling brings light for all to share. You see me, how I suffer unjust torments."

IO, ZEUS, AND PROMETHEUS

In order to appreciate Aeschylus' depiction of Zeus and his vision of the final outcome of the conflict between Zeus and Prometheus,¹⁵ we must introduce the story of Io, a pivotal figure in *Prometheus Bound*.¹⁶ In the series of exchanges between Prometheus and the various characters who come to witness his misery, the scene with Io is particularly significant in terms of eventual reconciliation and knowledge.

Io was loved by Zeus; she was a priestess of Hera and could not avoid detection by the goddess. Zeus failed to deceive Hera, who in retaliation turned Io into a white cow,¹⁷ and to guard her new possession, she set Argus over her. Argus, whose parentage is variously given, had many eyes (the number varies from four in Aeschylus to one hundred in Ovid) and was called Argus Panoptes (the “all-seeing”); because his eyes never slept all at once, he could have Io under constant surveillance. Zeus therefore sent Hermes to rescue Io; Hermes lulled Argus to sleep by telling him stories, and then cut off his head—hence his title Argeiphontes, or “slayer of Argus.” Hera set Argus’ eyes in the tail of the peacock, the bird with which she is especially associated. Io still could not escape Hera’s jealousy; Hera sent a gadfly that so maddened her that she wandered miserably over the whole world until finally she came to Egypt. There by the Nile, Zeus restored her human form, and she gave birth to a son, Epaphus.¹⁸

In *Prometheus Bound*, Aeschylus describes Io’s sufferings in some detail to illustrate the ultimate wisdom, justice, and mercy of an all-powerful Zeus. In agony because of the stings of the gadfly and tormented by the ghost of Argus, Io flees over the earth in mad frenzy. She asks why Zeus has punished her, an innocent victim of Hera’s brutal resentment, and longs for the release of death. This is how the uncomprehending Io tells Prometheus of her anguish (645–682):

 Again and again in the night, visions would appear to me in my room and entice me with seductive words: “O blessed maiden, why do you remain a virgin for so long when it is possible for you to achieve the greatest of marriages? For Zeus is inflamed by the shafts of desire and longs to make love to you. Do not, my child, reject the bed of Zeus but go out to the deep meadow of Lerna where the flocks and herds of your father graze, so that the longing of the eye of Zeus may be requited.” I, poor wretch, was troubled every night by such dreams until at last I dared to tell my father about them. He sent numerous messengers to Delphi and Dodona to find out what he must do or say to appease the gods; and they returned with difficult and obscure answers, cryptically worded. At last an unambiguous injunction was delivered to Inachus, clearly ordering him to evict me from his house and city to wander without a home to the ends of the earth; if he did not comply, the fiery thunderbolt of Zeus would strike and annihilate his whole race.

In obedience to this oracle of Apollo, my father, unwilling as was I, expelled and drove me from my home; indeed the bridle bit of Zeus forcefully compelled him to do such things. Straightway my body was changed and my mind distorted; with horns, as you can see, and pursued by the sharp stings of a gadfly, I rushed in convulsive leaps to the clear stream of Cerchnea and the spring of Lerna. The giant herdsman Argus, savage in his rage, accompanied me, watching with his countless eyes my every step. A sudden unexpected fate deprived him of his life; but I, driven mad by the stings of the gadfly, wander from land to land under the scourge of god.

As the scene continues, Prometheus foretells the subsequent course of Io’s wanderings. Eventually she will find peace in Egypt, where (848–851):

 Zeus will make you sane by the touch of his fearless hand—the touch alone; and you will bear a son, Epaphus, “Him of the Touch,” so named from his begetting at the hand of Zeus.

Aeschylus' version of the conception of Epaphus is religious. Io has been chosen by Zeus and has suffered at the hands of Hera for the fulfillment of a destiny, and she will conceive not through rape but by the gentle touch of the hand of god. Prometheus, with the oracular power of his mother, foresees the generations descended from Io, the culmination of his narrative being the birth of the great hero Heracles, who will help Zeus in the final release of Prometheus. Thus the divine plan is revealed and the absolute power of almighty Zeus is achieved; in mature confidence he will rest secure, without fear of being overthrown, as the supreme and benevolent father of both gods and mortals.

As Aeschylus' other plays on Prometheus survive only as titles and fragments, we do not know how he conceived details in the ultimate resolution. From Hesiod (p. 83) we know that Heracles, through the agency of Zeus, was responsible for killing the eagle and releasing Prometheus—after Prometheus had revealed the fatal secret about mating with Thetis. Conflicting and obscure testimony has Chiron, the centaur, involved in some way, as Aeschylus seems to predict; Chiron, wounded by Heracles, gives up his life and his immortality in a bargain for the release of Prometheus.¹⁹

ZEUS AND LYCAON AND THE WICKEDNESS OF MORTALS

Prometheus had a son, Deucalion, and Epimetheus had a daughter, Pyrrha. Their story, from Ovid's *Metamorphoses*, involves a great flood sent by Zeus (Jupiter) to punish mortals for their wickedness. In the passage given here, Jupiter tells an assembly of the gods how he, a god, became a man to test the truth of the rumors of human wickedness in the age of iron. There follows an account of Jupiter's anger at the evil of mortals, in particular Lycaon (1. 211–252).

 “Reports of the wickedness of the age had reached my ears; wishing to find them false, I slipped down from high Olympus and I, a god, roamed the earth in the form of a man. Long would be the delay to list the number of evils and where they were found; the iniquitous stories themselves fell short of the truth. I had crossed the mountain Maenalus, bristling with the haunts of animals, and Cylene, and the forests of cold Lycaeus; from these ridges in Arcadia I entered the realm and inhospitable house of the tyrant Lycaon, as the dusk of evening was leading night on.

“I gave signs that a god had come in their midst; the people began to pray but Lycaon first laughed at their piety and then cried: ‘I shall test whether this man is a god or a mortal, clearly and decisively.’ He planned to kill me unawares in the night while I was deep in sleep. This was the test of truth that suited him best. But he was not content even with this; with a knife he slit the throat of one of the hostages sent to him by the Molossians and, as the limbs were still warm

with life, some he boiled until tender and others he roasted over a fire. As soon as he placed them on the table, I with a flame of vengeance brought the home down upon its gods, worthy of such a household and such a master.

"Lycaon himself fled in terror, and when he reached the silence of the country he howled as in vain he tried to speak. His mouth acquired a mad ferocity arising from his basic nature, and he turned his accustomed lust for slaughter against the flocks and now took joy in their blood. His clothes were changed to hair; his arms to legs; he became a wolf retaining vestiges of his old form. The silver of the hair and the violent countenance were the same; the eyes glowed in the same way; the image of ferocity was the same.²⁰

"One house had fallen but not one house only deserved to perish. Far and wide on the earth the Fury holds power; you would think that an oath had been sworn in the name of crime. Let all quickly suffer the penalties they deserve. Thus my verdict stands."

Some cried approval of the words of Jove and added goads to his rage, others signified their assent by applause. But the loss of the human race was grievous to them all and they asked what the nature of the world would be like bereft of mortals, who would bring incense to the altars, and if Jupiter was prepared to give the world over to the ravagings of animals. As they asked these questions the king of the gods ordered them not to be alarmed, for all that would follow would be his deep concern; and he promised a race of wondrous origin unlike the one that had preceded.

THE FLOOD

Set upon destroying humankind, Jupiter rejects the idea of hurling his thunderbolts against the world because he fears they may start a great conflagration that could overwhelm the universe. As Ovid continues the story, the god has decided on a different means of punishment: a great flood (260–290). The motif of the Flood is one of the most important and universal in myth and legend.²¹

A different punishment pleased him more: to send down from every region of the sky torrents of rain and destroy the human race under the watery waves. Straightway he imprisoned the North Wind, and such other blasts as put storm clouds to flight in the caves of Aeolus, and let loose the South Wind who flew with drenched wings, his dread countenance cloaked in darkness black as pitch; his beard was heavy with rain, water flowed from his hoary hair, clouds nestled on his brow, and his wings and garments dripped with moisture. And as he pressed the hanging clouds with his broad hand, he made a crash, and thence thick rains poured down from the upper air. The messenger of Juno, Iris, adorned in varied hues, drew up the waters and brought nourishment to the clouds. The crops were leveled and the farmers' hopeful prayers lay ruined and bemoaned the labor of the long year in vain destroyed.

Nor was the wrath of Jove content with his realm, the sky. His brother Neptune of the sea gave aid with waves as reinforcements. He called together the rivers and, when they had entered the dwelling of their master, said: "Now I cannot resort to a long exhortation. Pour forth your strength, this is the need—

open wide your domains, and all barriers removed, give full rein to your streams." This was his command. They went back home and opened wide their mouths for their waters to roll in their unbridled course over the plains. Neptune himself struck the earth with his trident; it trembled and with the quake laid open paths for the waters. The streams spread from their course and rushed over the open fields and swept away, together and at once, the trees and crops, cattle, human beings, houses, and their inner shrines with sacred statues. If any house remained and was able to withstand being thrown down by so great an evil, yet a wave still higher touched its highest gables, and towers overcome lay submerged in the torrent.

DEUCALION AND PYRRHA

Ovid provides further elaborate and poetical description of the ravages of the terrible flood and then concentrates upon the salvation of the pious couple, Deucalion (the Greek Noah) and his wife, Pyrrha, and the repopulation of the world (311–421).

 The greatest part of life was swept away by water; those whom the water spared were overcome by slow starvation because of lack of food.

The territory of Phocis separates the terrain of Thessaly from that of Boeotia, a fertile area when it was land, but in this crisis it had suddenly become part of the sea and a wide field of water. Here a lofty mountain, Parnassus by name, reaches with its two peaks up to the stars, the heights extending beyond the clouds. When Deucalion with his wife was carried in his little boat to this mountain and ran aground (for the deep waters had covered the rest of the land) they offered worship to the Corycian nymphs,²² the deities of the mountain, and prophetic Themis, who at that time held oracular power there. No man was better than Deucalion nor more devoted to justice, and no woman more reverent towards the gods than his wife, Pyrrha.

When Jupiter saw the earth covered with a sea of water and only one man and one woman surviving out of so many thousands of men and women, both innocent and both devout worshipers of deity, he dispelled the clouds, and after the North Wind had cleared the storm, revealed the earth to the sky and the upper air to the world below. The wrath of the sea did not endure and the ruler of the deep laid aside his trident and calmed the waves. He summoned the sea-god Triton, who rose above the waters, his shoulders encrusted with shellfish; he ordered him to blow into his resounding conch shell and by this signal to recall the waves and the rivers. Triton took up the hollow horn which grows from the lowest point of the spiral, coiling in ever widening circles. Whenever he blows into his horn in the middle of the deep, its sounds fill every shore to east and west. Now too, as the god put the horn to his lips moist with his dripping beard and gave it breath, it sounded the orders of retreat and was heard by all the waves on land and on the sea, and as they listened all were checked.

Once more the sea had shores and streams were held within their channels, rivers subsided, and hills were seen to rise up. Earth emerged and the land grew in extent as the waves receded. And after a length of time the tops of the woods

were uncovered and showed forth, a residue of mud left clinging to the leaves. The world had been restored.

When Deucalion saw the earth devoid of life and the profound silence of its desolation, tears welled up in his eyes as he spoke to Pyrrha thus: "O my cousin, and my wife, the only woman left, related to me by family ties of blood, then joined to me in marriage, now danger itself unites us. We two alone are the host of the whole world from east to west; the sea holds all the rest. Besides assurance of our life is not yet completely certain. Even now the clouds above strike terror in my heart. What feelings would you have now, poor dear, if you had been snatched to safety by the Fates without me? In what way could you have been able to bear your fear alone? Who would have consoled you as you grieved? For I, believe me, would have followed, if the sea had taken you, dear wife, and the sea would have taken me with you. How I wish I might be able to repopulate the earth by the arts of my father and infuse the molded clods of earth with life. As it is, the race of mortals rests in just us two—thus have the gods ordained—and we remain the only vestiges of human beings." Thus he spoke and they wept.

They decided to pray to the goddess Themis and seek help through her holy oracles with no delay. Together they approached the waves of the river Cephissus, which, although not yet clear, was cutting its accustomed course. When they had drawn water and sprinkled their heads and clothes, they turned their steps from there to the temple of the goddess; its pediments were discolored with vile moss and its altars stood without fire. As they reached the steps of the temple, both fell forward on the ground, and in dread awe implanted kisses on the cold stone. They spoke as follows: "If the divine majesty is won over and made soft by just prayers, if the anger of the gods is turned aside, tell, O Themis, by what art the loss of the human race may be repaired and give help, O most gentle deity, in our drowned world."

The goddess was moved and gave her oracle: "Go away from my temple, cover your heads and unloose the fastenings of your garments, and toss the bones of the great mother behind your back." For a long time they were stupefied at this; Pyrrha first broke the silence by uttering her refusal to obey the orders of the goddess; with fearful prayer she begged indulgence, for she feared to hurt the shade of her mother by tossing her bones. But all the while they sought another explanation and mulled over, alone and together, the dark and hidden meaning of the obscure words given by the oracle. Then the son of Prometheus soothed the daughter of Epimetheus with pleasing words: "Unless my ingenuity is wrong, oracles are holy and never urge any evil; the great parent is the earth; I believe that the stones in the body of earth are called her bones. We are ordered to throw these behind our backs."

Although the Titan's daughter was moved by the interpretation of her husband, her hope was still in doubt; to this extent they both distrusted heaven's admonitions. But what harm would there be in trying? They left the temple, covered their heads, unloosed their garments, and tossed the stones behind their steps as they were ordered. The stones (who would believe this if the antiquity of tradition did not bear testimony?) began to lose their hardness and rigidity and gradually grew soft and in their softness assumed a shape. Soon as they

grew and took on a more pliant nature, the form of a human being could be seen, in outline not distinct, most like crude statues carved in marble, just begun and not sufficiently completed. The part of the stones that was of earth dampened by some moisture was converted into flesh; what was solid and unable to be so transformed was changed into bone; what once had been a vein in the stone remained with the same name; in a short time, through the will of the gods, the stones hurled by the hands of the man assumed the appearance of men, and those cast by the woman were converted into women. Hence we are a hard race and used to toils and offer proof of the origin from which we were sprung.

The earth of her own accord produced other animals of different sorts, after the moisture that remained was heated by the fire of the sun; and the mud and soggy marshes began to swell because of the heat, and fertile seeds of things began to grow nourished by the life-giving earth, as in a mother's womb, and gradually took on a certain form.

Deucalion and Pyrrha had a son Hellen, the eponymous ancestor of the Greek people; for the Greeks called themselves Hellenes and their country Hellas.²³

SUCCESSION MYTHS AND OTHER MOTIFS

Literature of the ancient Near East has many parallels to Hesiod's account of genesis and the gods. One of the most striking is the archetypal motif known as the Succession Myth. In the Babylonian epic of creation, which begins with the words by which it is entitled (*Enuma Elish*, "When on high"), Marduk plays a role similar to that of Zeus in the conflict for power; and Marduk, like Zeus, attains ultimate control by defeating a monster, Tiamat, who thus resembles Typhoeus. Likewise the epic *Kingship in Heaven* reveals common thematic patterns; especially startling is the episode that tells how Kumarbi defeats Anu by biting off his genitals, a brutal act not unlike the castration of Uranus by Cronus. The flood archetype is particularly fascinating because of its presence worldwide, in virtually all cultures (see note 21). The wickedness of mortals and their punishment are also persistent themes, as well as their salvation. The Additional Reading at the end of this chapter provides a more detailed identification of parallels between the myths of Greece and those of the ancient Near East.

Among the many themes inherent in the character and career of Zeus himself, the following deserve special emphasis. Even though a god, his life illustrates special motifs that appear again and again not only in the lives of other deities but also in the mortal lives of the heroes of saga, to be sure with infinite variations and amplifications. Zeus is the child of extraordinary parents; both of his parents are gods. The circumstances of his birth are unusual or difficult; he must avoid being swallowed by his father. He must be brought up in secret, and his life as an infant is both precarious and charmed, progressing in accordance with the motif of the Divine Child. He grows up close to nature and the world of animals; and, after an idyllic childhood, with special care and training, upon

reaching manhood, he must come into his own by overcoming challenges and adversaries: his father Cronus and the Titans, the Giants, and Prometheus. Very special on the list of his triumphs is the slaying of a dragon. By killing Typhoeus, Zeus, the supreme god, may be proclaimed as the archetypal dragonslayer—one of the most powerful and symbolic of all divine and heroic achievements.

In the end, as we shall see in the next chapter, Zeus emerges as the ultimate victor and wins a bride, a kingdom, and supreme power. He triumphs to become almighty god, although even then his exploits and trials are by no means over.

PARALLELS IN MYTHS OF GREECE AND THE ANCIENT NEAR EAST

Five basic myths are important for the identification of parallels in the myths of ancient Near Eastern civilizations. These are the myths of Creation, Succession, the Flood, the Descent to the Underworld, and the hero-king Gilgamesh. They have striking parallels in Greek mythology, as we have already observed. "Are there migrating myths?" asks Walter Burkert, and he and others answer that the similarities are undeniable evidence for the influence of Near Eastern cultures over Greek mythology. How this influence traveled cannot be known precisely, but trade is the most likely means, as it has been shown that contacts between the Greek and Near Eastern worlds flourished especially in two periods, the thirteenth and fourteenth centuries and the eighth and seventh centuries B.C.²⁴ Near Eastern myths appear in the cultures of Sumer and Akkad—southern and northern Mesopotamia, respectively. The Sumerians were the earliest (from the fourth millennium B.C.) to develop a civilization with urban centers, such as Ur and Uruk. They developed *cuneiform* ("wedge-shaped") script on clay tablets, and their religious architecture was distinguished by *ziggurats* (temple towers). They were absorbed by Semitic peoples speaking a different language (Akkadian), but still using cuneiform script. The chief Akkadian urban center (from the late third millennium) was Babylon, which reached its first zenith under king Hammurabi, around 1800 B.C. Babylon was conquered in about 1250 B.C. by the northern Akkadians, who established the Assyrian empire, with its center at Nineveh.

Among the peoples associated with the Akkadians were the Hurrians of northern Syria, who in their turn were absorbed by the Hittites after about 1400 B.C. The Hittite empire flourished in Anatolia (the central and eastern area of modern Turkey) during the second millennium B.C., with its center at Hattusas, the modern Boghaz-Köy. Hittite myths absorbed Hurrian themes and the names of Hurrian gods, and several of these myths have themes in common with Greek myth. The same is true of Egyptian, Phoenician, and Hebraic myths, the last-named being more familiar to Western readers, especially in the biblical Christian narratives of Genesis (Chapters 1 and 2), Psalms (many references, for example, Psalms 33 and 104), and Job (Chapter 38).

Like Hesiod, the Sumerian, Babylonian, and Akkadian poets do not narrate a myth of creation by an intelligent creator. Their concern, like Hesiod's, is with the bringing of order out of disorder, or, rather, out of a concept similar to the Greek *Chaos* ("Void"). Thus their myths of creation also involve myths of succession and, to some extent, myths of the Flood and the survival and re-creation of humankind. The best-known myth of creation is in the Babylonian *Epic of Creation*, usually identified by its opening words, *Enuma Elish* ("When on high . . ."), which was probably composed in the early years of the second millennium B.C. In this version, the gods come into existence from the union of Apsu and Tiamat—the fresh-water and salt-water oceans, respectively. From them descend Anu (the sky) and Ea or Enki (the earth-god), who is also the god of wisdom. From Ea, Marduk is born, after Ea has destroyed Apsu. Tiamat then prepares to attack the younger gods, who entrust their defense to Marduk and make him their king, after their leader, Enlil, has proved unequal to the challenge. Armed with bow and arrow, thunderbolt and storm-winds, Marduk attacks Tiamat, fills her with the winds, and splits her body. The following is part of the battle, which should be compared with Hesiod's account of the battle between Zeus and Typhoeus (see pp. 79–88):

Face to face they came, Tiamat and Marduk. . . .
 They engaged in combat, they closed for battle.
 The Lord spread his net and made it encircle her,
 To her face he dispatched the *imhullu*-wind. . . .
 Tiamat opened her mouth to swallow it,
 And he forced in the *imhullu*-wind so that she could not
 Close her lips.
 Fierce winds distend her belly. . . .
 He shot an arrow which pierced her belly,
 Split her down the middle and slit her heart,
 Vanquished her and extinguished her life.²⁵

After his victory, Marduk places half of Tiamat's body above the earth and there, in the sky, he creates Esharra, the home of the gods, while Tiamat's followers, led by Kingu, are bound. Marduk then organizes the gods and the world and, on the advice of Ea, orders the creation of humankind from the blood of Kingu, who is killed. The work of humankind is to serve the gods, and Marduk's temple of Esagila, with its *ziggurat*, is built in Babylon. The poem ends with the enumeration of the fifty names of Marduk.

About two hundred years later than *Enuma Elish* (ca. 1700 B.C.), the Babylonian epic of *Atrahasis* was written down. *Atrahasis* is the supremely wise man—his name means "extra-wise," corresponding to Ut-napishtim of the *Gilgamesh Epic*, the Sumerian hero Ziusudra, the Hebrew Noah, and the Greek Prometheus and Deucalion (the former being the pre-Olympian god of wisdom and craftsmanship and the latter the survivor of the flood). In the myth of Atra-

Map 4.1. Greece and the Near East.

hasis, the gods complain of the hard labor that they must perform for Enlil and threaten to rebel against him. Enlil orders the creation of humankind to perform the toil of canal-digging and other labors for the gods. Enlil orders the death of the intelligent god Geshtu-e, from whose flesh and blood, mixed with clay, humankind is created, seven males and seven females. After a long period of time Atrahasis, advised by Enki, survives the flood sent by Enlil, who has determined to destroy humankind because their noise disturbs the peace of the gods. Enlil is furious when he sees the boat in which Atrahasis has survived, but the poem ends with a reconciliation between Enlil and Enki, by which the human race is allowed to continue.

The best-known version of the myth of the Flood is narrated in the *Epic of Gilgamesh* by the heroic survivor, Ut-napishtim, whom Gilgamesh visits after a journey through the hitherto impassable "mountains of Mashu" and across the waters of death. Here, too, Enlil is furious at the survival of Ut-napishtim, but again there is a reconciliation. Ut-napishtim lives, immortal, far off "at the mouth of the rivers;" humankind, re-created, cannot escape the evils that occur to the living, nor can they escape death. Gilgamesh ultimately fails in his quest for immortality, and the final tablet (no. xii) of the poem describes the retention of his dead friend, Enkidu, in the world of the dead.²⁶ Gilgamesh himself was originally a historical figure, ruler of the Sumerian city of Uruk (modern Warka, in central Iraq) ca. 2700 B.C. His legends were incorporated into the Assyrian version of his epic, dating from about 1700 B.C., written on eleven clay tablets, to which a twelfth was added much later. Different versions exist of the epic, the composition of which evolved over a lengthy period. Later tradition claimed that a scholar-priest Sinleqqiunninni was the author.²⁷

Gilgamesh, the wise hero and slayer of monstrous beings, has obvious similarities with Greek Odysseus and Heracles (who is also identified with Ninurta, son of Enlil, and with the underworld god, Nergal, consort of Ereshkigal). Like the Babylonian Atrahasis and the Greek Odysseus, he is supremely intelligent. Here are the opening lines of the first tablet of the poem:

[Of him who] found out all things, I [shall te]ll the land,
 [Of him who] experienced everything, I [shall te]ach the whole.
 He searched [?] lands [?] everywhere.
 He who experienced the whole gained complete wisdom.
 He found out what was secret and uncovered what was hidden.
 He brought back a tale of times before the Flood.
 He had journeyed far and wide, weary and at last resigned.
 He engraved all toils on a memorial monument of stone.²⁸

A brief summary of the poem runs as follows: The strong and handsome Gilgamesh is two-thirds divine and one-third human. As king of Uruk he acts oppressively toward his people and therefore the gods create a rival for him, valiant Enkidu, a primeval hunter in the forest, quite the opposite of the civi-

lized Gilgamesh. After sexual intercourse with a harlot, Enkidu is depleted of his wild character and eventually challenges Gilgamesh in a wrestling match. Although Gilgamesh defeats Enkidu, they become devoted comrades and their loving friendship now becomes a major theme. They set out together on a quest to cut down the sacred trees in the Pine (or Cedar) Forest in the mountains of southwest Iran, after having killed its guardian Humbaba (or Huwawa), the Terrible. These labors accomplished, upon their return to Uruki, Gilgamesh is confronted by the goddess Ishtar, who desires to marry him. When he rejects her, she sends down the terrifying and destructive Bull of Heaven, which the two heroes kill. Because they have defiled the sacred Forest and killed the Bull of Heaven, the gods decide that one of them, Enkidu, must die. All the long while that Enkidu suffers painfully, Gilgamesh is by his side, and when Enkidu dies, he is overcome with grief. Gilgamesh, horrified by the reality of death and decay, decides to find the secret of immortality. His encounter with Ut-napishtim, the survivor of the Flood, has already been described.

In addition to those mentioned here, many parallels between the Sumerian and Greek heroes and their legends can be found, for example, in the contact of Odysseus with the Underworld and the land of Alcinoos and the Phaeacians (similar to the realm of Ut-napishtim "at the mouth of the rivers"). Similarities between the story of the *Iliad* and that of the *Epic of Gilgamesh* are also readily apparent, prominent among them being the comradeship of Achilles and Patroclus and that of Gilgamesh and Enkidu.

On the other hand, the myth of the Flood is not prominent in classical Greek myth. It appears more fully (in Latin) in Ovid's narratives of the great flood (*Metamorphoses* 1. 260–421: see pp. 94–95) and of the Lydian flood in the story of Baucis and Philemon (*Metamorphoses* 8. 689–720: see p. 618).

Myths of succession and the separation of sky and earth appear also in Hittite narratives, of which the best known is the poem called *Kingship in Heaven*, in which Kumarbi (who corresponds to the Sumerian Enlil) bites off the genitals of the sky-god, Anu, and swallows them. Inside Kumarbi the Storm-god (Teshub or Tarkhun) develops from the genitals of Anu, and after his birth he plots with Anu to overthrow Kumarbi. The extant poem breaks off as Teshub prepares for battle, but it appears that he defeated Kumarbi. Thus Anu, Kumarbi/Enlil, and Teshub/Marduk are parallel to Uranus, Cronus, and Zeus in Greek myth. In the Hittite *Song of Ullikummiss*, Ea cuts off the feet of Ullikummiss, a giant made of diorite (a kind of very hard stone), 9000 leagues in height, created by Kumarbu as a threat to the gods. After his mutilation, the gods, led by Teshub, battle with Ullikummiss (the tablet breaks off at this point, but no doubt the gods prevailed).²⁹

The theme of descent to the Underworld is also prominent in Near Eastern myth and has many parallels in Greek myth. The most important myth on this theme is narrated in the short Akkadian poem, *The Descent of Ishtar to the Underworld*, dating from the end of the second millennium B.C. It was preceded by

a Sumerian version, about three times as long, in which Ishtar is called by her Sumerian name, Inanna.³⁰ Inanna/Ishtar is daughter of Anu (and therefore one of the earlier generation of gods) and sister of Ereshkigal, queen of the Underworld and wife of Nergal. Ishtar is a goddess of war but also the goddess of love and sexual creation, and thus has much in common with Aphrodite. While Ereshkigal corresponds to the Greek Persephone, Ishtar is like Persephone in that she returns from the Underworld, and like Eurydice (wife of Orpheus) in that she must return to the Underworld if certain conditions are not fulfilled on her journey back to the upper world. Her consort, Dumuzi (Tammuz), is similar to Adonis and Attis in Greek myth.

In both narratives Ishtar decides to visit the Underworld; knowing that she may be killed there, she leaves instructions with her vizier that will ensure her resurrection if she does not return within a certain time. She is stripped of her ornaments and clothing as she goes through the seven gates of the Underworld, and Ereshkigal orders her death. In the Sumerian version her corpse is hung from a peg. She is brought back to life through the advice of Enki (Sumerian version) or the agency of her vizier (Akkadian version). In the Akkadian version she receives back her clothing and ornaments, and the poem ends with mourning for the death of her consort, Dumuzi (Tammuz). In the Sumerian version, Ishtar is angry with Dumuzi for his refusal to dress in mourning for her absence, and in anger she hands him over to the demons who were to take her back to the Underworld if she failed to fulfill Ereshkigal's conditions. Only in 1963 was the Sumerian tablet published that describes the annual death and resurrection of Dumuzi, and with his return the renewal of crops on the earth.³¹

It must be stressed that many parallels between Near Eastern and Greek myths may be no more than that chance appearance of themes common to many mythologies, with no direct influence. Yet, in the instances of the succession myth, the Flood, the *Epic of Gilgamesh*, and the myth of Ishtar and Dumuzi, it is most probable that there was some direct contact between Near Eastern and Greek storytellers, in which case we have strong evidence for Eastern sources in early Greek mythology. The Greeks owed many debts to the civilizations with whom they came into contact, not only in the Near East but also in Egypt. They used and transformed what they heard, saw, and read into works of art cast in their own image.³²

NOTES

1. This very stone was exhibited at Delphi in ancient times; it was not large, and oil was poured over it every day. On festival days, unspun wool was placed upon it.
2. Ten years is the traditional length for a serious war, be it this one or the famous conflict of the Greeks against the Trojans.
3. Notus is the South Wind; Boreas, the North Wind; and Zephyr, the West Wind.
4. Later versions have it that Heracles was an ally of Zeus in the battle; the giants could be defeated only if the gods had a mortal as their ally. In addition Earth produced a magic plant that would make the giants invincible; Zeus by a clever stratagem plucked it for himself.
5. A fragment attributed to Hesiod (no. 268 Rzach; no. 382 Merkelbach and West) adds that Athena breathed life into the clay. At Panopea in Boeotia, stones were identified in historical times as solidified remains of the clay used by Prometheus.
6. Aidos is a sense of modesty and shame; Nemesis, righteous indignation against evil.
7. In his fourth eclogue, Vergil celebrates gloriously the return of a new golden age ushered in by the birth of a child. The identity of this child has long been in dispute, but the poem itself was labeled Messianic because of the sublime and solemn nature of its tone, reminiscent of the prophet Isaiah.
8. A similar but more sober and scientific statement of human development, made by some of the Greek philosophers and by Lucretius, the Roman poet of Epicureanism, provides a penetrating account of human evolution that in many of its details is astoundingly modern (*De Rerum Natura* 5. 783–1457).

9. Aeschylus has Themis as the mother of Prometheus, sometimes identified as Ge-Themis, to show that she is a goddess of earth, who possesses oracular power and is associated with justice. The name Prometheus means "forethinker," or "the one who plans ahead"; Epimetheus means "afterthinker," or "the one who plans too late." Prometheus is often called merely "the Titan," since he is the son of the Titan Iapetus.
10. An early name of Sicily.
11. The name suggests a link with the typical conception of the fertility mother-goddess.
12. He was worshiped by the potters in Athens alongside Hephaestus, with whom he has several attributes in common.
13. For a comparison of Eve with Pandora and female deities throughout the ages, see John A. Phillips, *Eve: The History of an Idea* (New York: Harper & Row, 1984).
14. Aeschylus even manages to characterize the brutish Kratos, the unreasonable and monstrous henchman of a tyrannical Zeus. Kratos is the willing and anxious supporter of a new regime rooted in force, the one thing he can understand; to him forceful power is the key to all: "Everything is hard except to rule the gods. For no one except Zeus is free."
15. Any interpretation of Aeschylus' tragedy is difficult since precise details in the outcome as conceived by Aeschylus are unknown. We have the titles and fragments of three additional plays on the Prometheus legend attributed to Aeschylus: *Prometheus the Fire-Bearer*, *Prometheus Unbound*, and *Prometheus the Fire-Kindler*. This last may be merely another title for *Prometheus the Fire-Bearer*, or possibly it was a satyr play belonging either to the Prometheus trilogy itself or to another trilogy on a different theme. We cannot even be sure of the position of the extant *Prometheus Bound* in the sequence.
16. Io is the daughter of Inachus, whose family appears in the legends of Argos; see pp. 516–517.
17. Versions other than that of Aeschylus have Zeus attempt to deceive Hera by transforming Io into a cow, which Hera asked to have for herself.
18. The Egyptians identified Epaphus with Apis, the sacred bull, and Io with their goddess Isis. See p. 516.
19. Chiron possibly dies for Prometheus and bestows his immortality upon Heracles.
20. This is Ovid's version of a tale about a werewolf that appears elsewhere in the Greek and Roman tradition. The name Lycaon was taken to be derived from the Greek word for wolf. The story may reflect primitive rites in honor of Lycaean Zeus performed on Mt. Lycaeus.
21. *The Flood Myth*, ed. Alan Dundes (Berkeley: University of California Press, 1988), provides a fascinating collection of writings by authors in a variety of disciplines who analyze the motif of the flood throughout the world. For parallels in Near Eastern mythology see the Additional Reading to this chapter.
22. That is, nymphs of the Corycian cave on Mt. Parnassus.
23. Hellen had three sons: Dorus, Aeolus, and Xuthus. Xuthus in turn had two sons: Ion and Achaeus. Thus eponyms were provided for the four major divisions of the Greeks on the basis of dialect and geography: Dorians, Aeolians, Ionians, and Achaeans. The names *Greeks* and *Greece* came through the Romans, who first met a group of Hellenes called the *Graioi*, participants in the colonization of Cumae just north of Naples.
24. W. Burkert, "Oriental and Greek Mythology: The Meeting of Parallels," in Jan Bremmer, ed., *Interpretations of Greek Mythology* (London: Routledge, 1998), pp. 10–40 (the

- quotation is from p. 10). Useful but brief remarks in Ken Dowden, *The Uses of Greek Mythology* (London: Routledge, 1992), pp. 57–60 and 181. Full discussion with bibliography by R. Mondt, "Greek Mythic Thought in the Light of the Near East," in L. Edmunds, ed., *Approaches to Greek Myth* (Baltimore: Johns Hopkins University Press, 1990), pp. 142–198. C. Penglase, *Greek Myths and Mesopotamia* (London: Routledge, 1994), focuses on Hesiod and the Homeric Hymns and defines the criteria for influence (as opposed to random similarities) on pp. 5–8.
25. Translated by Stephanie Dalley, from *Myths from Mesopotamia* (New York: Oxford University Press, 1989), p. 253.
 26. Tablet xii was composed much later than the rest of the Gilgamesh epic and so was not part of the original poem. The death of Gilgamesh is not part of the Akkadian version of the epic, which is the source of the translation by Stephanie Dalley, but there exists a fragmentary Sumerian version. Gilgamesh's monstrous opponents were Humbaba (or Huwawa), guardian of the Pine Forest in the mountains of southwest Iran (tablet v), and the Bull of Heaven (tablet vi).
 27. Maureen Gallery Kovacs provides clear introductory background for the nonspecialist in her translation, *The Epic of Gilgamesh* (Stanford, Calif.: Stanford University Press, 1989).
 28. Translated by Stephanie Dalley (see note 25), p. 50.
 29. The texts of myths of Kumarbi and Ullikummi are translated by A. Goetze in J. B. Pritchard, ed., *Ancient Near Eastern Texts Relating to the Old Testament*, 3d ed. (Princeton: Princeton University Press, 1969, previous eds. 1950 and 1955), pp. 120–125. They are not included in Pritchard's selections in paperback, *The Ancient Near East*, 2 vols. (Princeton: Princeton University Press, 1958 and 1975).
 30. Both versions are in Pritchard, *Ancient Near Eastern Texts*, pp. 52–57 (Sumerian version translated by S. N. Kramer) and pp. 106–109 (Akkadian version translated by E. A. Speiser). Stephanie Dalley, see note 25, translates the Akkadian version, pp. 154–162.
 31. See Dalley, from *Myths from Mesopotamia*, p. 154.
 32. The debts of Greeks to others have always been recognized and over the years have offered fruitful avenues of research. At times, however, there has been a compulsion to deny the Greeks the credit that is their due for the heritage they have left us. The book by Martin Bernal challenging traditional positions caused quite a stir when it first appeared: *Black Athena: The Afroasiatic Roots of Classical Civilization*, Vol. 1, *The Fabrication of Ancient Greece 1785–1985* (London: Free Association Books; New Brunswick, N.J.: Transaction Books, 1987). It has been successfully challenged by many scholars. See in particular a collection of essays edited by Mary R. Lefkowitz and Guy MacLean Rogers, *Black Athena Revisited* (Chapel Hill and London: The University of North Carolina Press, 1996). Mary Lefkowitz offers a refutation accessible to the non-specialist: *Not Out of Africa: How Afrocentrism Became an Excuse to Teach Myth as History* (New York: Basic Books [HarperCollins]), 1996.

THE TWELVE OLYMPIANS: ZEUS, HERA, AND THEIR CHILDREN

Thus Zeus is established as lord of gods and men. He is supreme, but he does share his powers with his brothers. Zeus himself assumes the sky as his special sphere; Poseidon, the sea; and Hades, the Underworld. Homer (*Iliad* 15. 187–192) says that they cast lots for their realms. Zeus takes his sister Hera as his wife; she reigns by his side as his queen and subordinate. His sisters Hestia and Demeter share in divine power and functions, as we shall see, and the other major gods and goddesses are also given significant prerogatives and authority as they are born.

And so a circle of major deities (fourteen in number) comes into being; their Greek and Roman names are as follows: Zeus (Jupiter), Hera (Juno), Poseidon (Neptune), Hades (Pluto), Hestia (Vesta), Hephaestus (Vulcan), Ares (Mars), Apollo, Artemis (Diana), Demeter (Ceres), Aphrodite (Venus), Athena (Minerva), Hermes (Mercury), and Dionysus (Bacchus).¹ This list was reduced to a canon of twelve Olympians by omitting Hades (whose specific realm is under the earth) and replacing Hestia with Dionysus, a great deity who comes relatively late to Olympus.

HESTIA, GODDESS OF THE HEARTH AND ITS FIRE

Although her mythology is meager, Hestia is important. She rejected the advances of both Poseidon and Apollo and vowed to remain a virgin; like Athena and Artemis, then, she is a goddess of chastity.² But she is primarily the goddess of the hearth and its sacred fire; her name, Hestia, is the Greek word for "hearth." Among primitive peoples fire was obtained with difficulty, kept alive, and revered for its basic importance in daily needs and religious ceremony. The hearth too was the center first of the family and then of the larger political units: the tribe, the city, and the state. Transmission of the sacred fire from one settlement to another represented a continuing bond of sentiment and heredity. Thus both the domestic and the communal hearth were designated as holy, and the goddess herself presided over them. Hestia often gained precedence at banquets and in sacrificial ritual; for as the first-born of Cronus and Rhea she was considered august, one of the older generation of the gods.

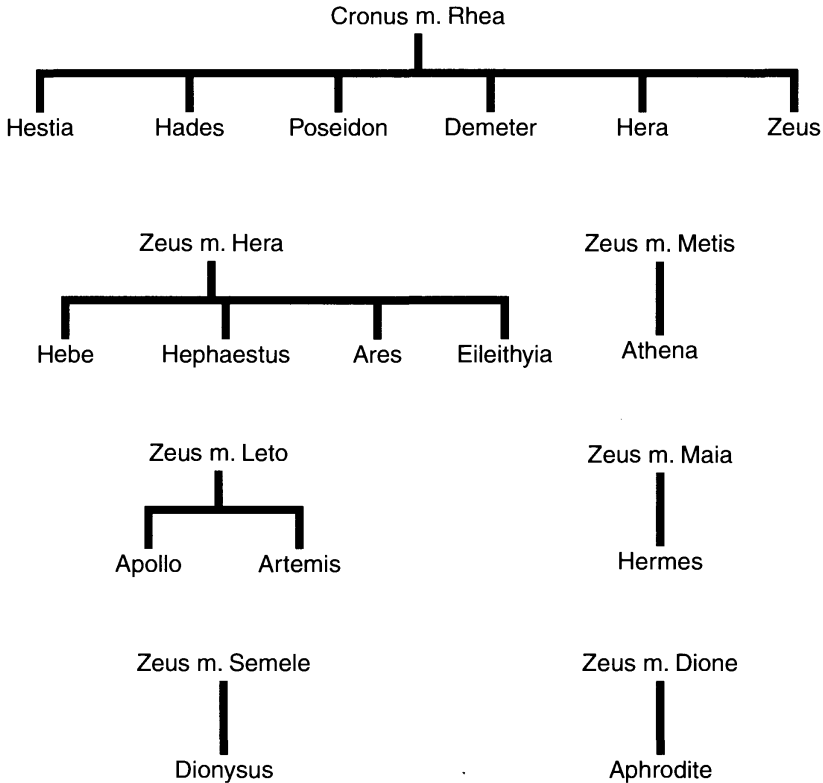

Figure 5.1. The Lineage of Major Deities

There are two *Homeric Hymns to Hestia*. Number 24 briefly calls on her as the manifestation of the protecting flame of the sacred hearth in a temple:

👤 Hestia, you who tend the hallowed house of the far-shooter Apollo in holy Pytho, liquid oil always drips from your hair.³ Come to this house; enter in sympathetic support, along with Zeus, the wise counselor. Grant as well a pleasing grace to my song.

In number 29, Hestia is invoked as the protectress of the hearth in the home; the poet appeals to the god Hermes as well, since both deities protect the house and bring good fortune.

👤 Hestia, you have as your due an everlasting place in the lofty homes of immortal gods and human beings who walk on earth—the highest of honors and a precious right. For without you, there are no banquets for mortals where one does not offer honey-sweet wine as a libation to Hestia, first and last.

And you, Hermes, the slayer of Argus, son of Zeus and Maia, messenger of the blessed gods, bearer of a golden staff and giver of good things, along with

Zeus, Ganymede, and Hestia. Red-figure cup by Oltos, ca. 520 B.C.; height $8\frac{3}{4}$ in., diameter $20\frac{1}{2}$ in. In the assembly of the Olympians Hestia sits opposite Zeus, holding the thunderbolt in his left hand and a *phiale* (ritual dish for libations) in his right hand, who is being served by Ganymede. She is crowned and holds a branch in her right hand and a flower in her left hand. Behind her, on the right, are Aphrodite and Ares and, on the left behind Zeus, Athena and Hermes. (*Tarquinia, Museo Nazionale.*)

revered and beloved Hestia, be kind and help me. Come and inhabit beautiful homes, in loving harmony. For since you both know the splendid achievements of mortals on earth, follow in attendance with intelligence and beauty.

Hail, daughter of Cronus, you and Hermes, bearer of a golden staff; yet I shall remember you both and another song too.

THE DIVERSE CHARACTER OF ZEUS

Zeus is an amorous god; he mates with countless goddesses and mortal women, and his offspring are legion. Most genealogies demanded the glory and authority of the supreme god himself as their ultimate progenitor. Along with this necessity emerged the character of a Zeus conceived and readily developed by what might be called a popular mythology. This Zeus belonged to a monogamous society in which the male was dominant; however moral the basic outlook, the standards for the man were different from those for the woman. Illicit affairs were possible and even, if not officially sanctioned, were at least condoned for men, but under no circumstances tolerated for women. Thus Zeus is the glorified image not only of the husband and father, but also of the lover. The gamut of Zeus' conquests will provide a recurrent theme.

As the picture evolves, Zeus' behavior may be depicted as amoral or immoral or merely a joke—the supreme god can stand above conventional standards. At other times he will act in harmony with them, and more than once he

must face the shrewish harangues of his wife, Hera, and pay at least indirectly through pain and suffering wrought by his promiscuity.

Yet this same Zeus (as we shall see later in his worship at Dodona and Olympia) becomes the one god, and his concerns envelop the whole sphere of morality for both gods and humankind. He is the wrathful god of justice and virtue, upholding all that is sacred and holy in the moral order of the universe. This Zeus we discuss at greater length in Chapter 6. In the literature, the portrayal of Zeus depends upon both the period and the intent and purpose of individual authors. The conception of deity is multifaceted, infinitely varied, and wondrously complex.

We are already familiar with Zeus the god of the sky, the cloud-gatherer of epic. The etymological root of his name means “bright” (as does that of Jupiter). His attributes are thunder and lightning, and he is often depicted about to hurl them. The king of gods and men is a regal figure represented as a man in his prime, usually bearded. He bears as well the aegis, a word meaning “goat skin” that originally designated merely the cloak of a shepherd. For Zeus it is a shield with wonderful and miraculous protective powers.⁴ The majestic eagle and mighty oak were sacred to Zeus.

Finally, it must be fully appreciated that the patriarchy of Zeus was by no means always absolute or supreme. Here are a few examples of his vulnerability. According to some, Zeus’ authority was not supreme but always subject to the dictates of fate or the feminine fates (see the final section), and the powerful goddess of love, Aphrodite, proclaims in the *Homeric Hymn to Aphrodite* (5) (pp. 181–182) that she is the greatest deity of all, for she can bend not only humans but even the gods (including almighty Zeus) to her amorous will. Only three goddesses, Athena, Artemis, and Hestia, defy her subjection. Demeter, the greatest matriarch of antiquity with her dominant and universal Eleusinian mysteries (see Chapter 14), refused to submit to the patriarchy of both Zeus and Hades in her grief and outrage over the rape of her daughter Persephone and won. A startling revolution against the power of Zeus is alluded to in the *Iliad* (1. 399–401): When Hera, Poseidon, and Athena bound Zeus in chains, it was Thetis, the mother of Achilles, who rescues the supreme god. The most determined critic who constantly challenged the authority of Zeus was his sister and wife Hera.

ZEUS AND HERA

The union of Zeus and Hera represents yet another enactment of the sacred marriage between the sky-god and earth-goddess; this is made clear in the lines from Homer (*Iliad* 14. 346–351) that describe their lovemaking:

 The son of Cronus clasped his wife in his arms and under them the divine earth sprouted forth new grass, dewy clover, crocuses, and hyacinths, thick and soft, to protect them from the ground beneath. On this they lay together and drew

Hera. Roman copy of a Greek bronze of ca. 470–460 B.C.; marble, height 76 in. Known as the *Hestia Giustiniani*, this standing goddess is almost certainly Hera, whose royal sceptre (now missing) was held in her left hand. She is veiled (a symbol of her status as wife of Zeus) and wears the Doric peplos. (Rome, Museo Torlonia.)

around themselves a beautiful golden cloud from which the glistening drops fell away.

Hera has little mythology of her own, being important mainly as Zeus' consort and queen; yet she has great power. The *Homeric Hymn to Hera* (12) makes this power very clear:

 I sing about golden-throned Hera, whom Rhea bore, immortal queen, outstanding in beauty, sister and wife of loud-thundering Zeus; she is the illustrious one whom all the blessed ones throughout high Olympus hold in awe and honor, just as they do Zeus who delights in his lightning and thunder.

Hera consistently appears as the vehement wife and mother who will punish and avenge the romantic escapades of her husband; she consistently acts with matronly severity, the severe champion of morality and marriage.⁵ Iris, the fleet-footed and winged goddess of the rainbow (see p. 153), is also at times a messenger of the gods, sometimes the particular servant of Hera, with the offices of Hermes as messenger god then confined to Zeus. In art, Hera is depicted as regal and matronly, often with attributes of royalty, such as a crown and a scepter. Homer describes her as ox-eyed and white-armed, both epithets presumably denoting her beauty. If we mistranslate "ox-eyed" as "doe-eyed," perhaps the complimentary nature of that adjective becomes clear. The peacock is associated with Hera; this is explained by her role in the story of Io (told in Chapter 4). Argos was a special center for her worship, and a great temple was erected there in her honor. Hera was worshiped less as an earth-goddess than as a goddess of women, marriage, and childbirth, functions she shares with other goddesses.

THE SANCTUARY OF ZEUS AT OLYMPIA

Olympia is a sanctuary beside the river Alpheus, in the territory of the Peloponnesian city of Elis. By the time of the reorganization of the Olympic Games in 776,⁶ Zeus had become the principal god of the sanctuary, and his son Hercules was said to have founded the original Olympic Games, one of the principal athletic festivals in the ancient world.⁷ An earlier cult of the hero Pelops and his wife, Hippodamia (see pp. 405–407), continued, nevertheless, along with the worship of Zeus and Hera, whose temples were the principal buildings of the sanctuary at the peak of its greatness.

The temple of Hera was older, while the temple of Zeus was built in the fifth century with a monumental statue of Zeus placed inside.⁸ The statue and the sculptures on the temple itself together formed a program in which religion, mythology, and local pride were articulated on a scale paralleled only by the sculptures of the Parthenon at Athens.

On the west pediment was displayed the battle of the Greeks and the centaurs at the wedding of a son of Zeus, the Lapith king Pirithoüs, a myth that

also appears in the metopes of the Parthenon. The central figure in the pediment is another son of Zeus, Apollo, imposing order on the scene of violence and chaos (illustrated on p. 246).

The east pediment shows the scene before the fateful chariot race between Pelops and Hippodamia and her father Oenomaüs. Zeus himself is the central figure, guaranteeing the success of Pelops in the coming race and the winning of Hippodamia as his wife.

The Twelve Labors of Heracles were carved in the metopes of the Doric frieze (each about 1.6 meters in height), six above the entrance porch to the inner chamber (cella, or naos) at the east end of the temple, and six above the corresponding "false" porch on the west end. The climax of the Labors, above the east porch, was the local myth of the cleansing of the stables of Augeas, king of Elis (see pp. 525–526). In this labor (and in three others) Athena is shown helping the hero, and in the labors of the Nemean Lion and Cerberus, Hermes is the helper.

The most complex union of myth and religion was in the statue of Zeus, carved by the Athenian sculptor Pheidias and the most admired of all ancient statues. It was huge (about 42 feet in height), and its surfaces were made of precious materials, gold (for the clothing and ornaments), and ivory (for the flesh). It inspired awe in those who saw it. Although nothing remains of the statue today, we can reconstruct its appearance.⁹ Zeus was seated on his throne, carrying a figure of Nike (Victory) in his right hand, and in his left hand a scepter, on which perched his eagle. On the feet of the throne were depicted the myths of the Theban sphinx and the killing of the children of Niobe by Apollo and Artemis. Also part of the structure of the throne was a representation of Heracles fighting the Amazons, and Heracles appeared again in the paintings on a screen that enclosed the underpart of the throne, performing two of his labors (the Apples of the Hesperides and the Nemean Lion), as well as freeing Prometheus. In the carved reliefs on the base of the throne the Olympian gods accompanied the miraculous birth of Aphrodite from the sea. In front of the statue was a reflecting pool of olive oil.

Thus in the temple and its statue, at the heart of the greatest of Panhellenic sanctuaries, myths of human and divine struggle and victory, of destruction and creation, combined to honor Zeus as the supreme god of civilization.¹⁰

THE ORACLES AT OLYMPIA AND DODONA

Dodona (in northern Greece) as well as Olympia was an important center for the worship of Zeus, and both were frequented in antiquity for their oracular responses.

The traditional methods for eliciting a response from the god were by the observation and interpretation of omens, for example, the rustling of leaves, the sound of the wind in the branches of his sacred oaks, the call of doves, and the condition of burnt offerings. At Olympia inquiries were usually confined to the

Figure 5.2. Plan of the Temple of Zeus at Olympia (After W. B. Dinsmoor)

chances of the competitors in the games. Eventually at Dodona, through the influence of the oracle of Apollo at Delphi, a priestess would mount a tripod and deliver her communications from the god.¹¹ Here leaden tablets have been found inscribed with all kinds of questions posed by the state and the individual. The people of Corcyra ask Zeus to what god or hero they should pray or sacrifice for their common good; others ask if it is safe to join a federation; a man inquires if it is good for him to marry; another, whether he will have children from his wife. There are questions about purchases, health, and family.

CHILDREN OF ZEUS AND HERA: EILEITHYIA, HEBE, HEPHAESTUS, AND ARES

Eileithyia, Goddess of Childbirth. Zeus and Hera have four children: Eileithyia, Hebe, Hephaestus, and Ares. Eileithyia is a goddess of childbirth, a role she shares with her mother Hera; at times mother and daughter merge in identity. Artemis (as we shall see in Chapter 10) is another important goddess of childbirth.

Hebe and Ganymede, Cupbearers to the Gods. Hebe is the goddess of youthful bloom (the literal meaning of her name). She is a servant of the gods as well.¹² Hebe is primarily known as the cupbearer for the deities on Olympus. When Heracles wins immortality, she becomes his bride. Some versions explain that she resigned from her position to marry. Late authors claim that she was discharged for clumsiness.

The Trojan prince Ganymede shares honors with Hebe as cupbearer of the gods; according to some he replaces her. The *Homeric Hymn to Aphrodite*

(5. 202–217), translated in its entirety in Chapter 9, tells how Zeus carried off Ganymede, the handsome son of Tros:

☞ Indeed Zeus in his wisdom seized and carried off fair-haired Ganymede because of his beauty, so that he might be in the company of the gods and pour wine for them in the house of Zeus, a wonder to behold, esteemed by all the immortals, as he draws the red nectar from a golden bowl. But a lasting sorrow gripped the heart of Tros, for he had no idea where the divine whirlwind had taken his dear son. Indeed he mourned for him unceasingly each and every day; and Zeus took pity on the father and gave him, as recompense for his son, brisk-trotting horses, the kind which carry the gods. These he gave him to have as a gift.

And at the command of Zeus, Hermes, the guide and slayer of Argus, told everything and how Ganymede would be immortal and never grow old, just

INTERPRETATIONS OF THE MYTH OF GANYMEDE

This story indeed illustrates succinctly and powerfully the wide variation of interpretation and reinterpretation that all myths are capable of inspiring—a principal reason for their immortality. The *Homeric Hymn to Aphrodite* tells a simple and beautiful story of how wise Zeus singled out handsome Ganymede to grace Olympus as cup-bearer and live there forever, immortal, like a god. Its ecstatic spirituality emerges with sublimity in the poem “Ganymede” by Goethe (especially in its musical settings by Schubert and Wolf). The incident is seen from the point of view of a devoted Ganymede. In a passionate yet spiritual aura, amidst the glowing sun, beloved spring, and burning love, Ganymede ecstatically cries to the descending clouds to carry him aloft: “In your lap, upwards, embracing, embraced. Upwards to your breast, loving father.” For a different artist, the homosexuality latent in the myth may offer amoral or nonmoral testimony to the fact of a physical relationship, and not a religious calling. Another may tell the story to prove a divine vindication of male relationships. Yet another may vehemently identify the myth as a horrifying Rape of Ganymede by Zeus—accusing God of this brutal sin, an idea inconceivable to the poet and philosopher Xenophanes (see p. 131). The tale may even become (as in the case of the Greek writer Lucian) a divinely amusing, urbane, satiric jest. So is this a myth about a religious experience, a summoning by God to heaven, a rape, or is it merely a joke? It depends on how the story is told and how it is interpreted; many are the possible variations. There is, of course, no single “correct” interpretation of a great myth. Myth is protean by nature, most gratifying because it forever changes through the personality and genius of each and every artist, in any medium at any time, to provide pleasure and enlightenment in our search to find in the work of art our own individual meaning and enrichment.

The myth of Zeus and Ganymede is similar to the story of how Poseidon fell in love with Pelops and brought him up to Olympus (see p. 405).

like the gods. When Tros heard this message from Zeus, he no longer continued his mourning but rejoiced within his heart and joyfully was borne by the horses that were as swift as a storm.

In some accounts an eagle, not a whirlwind, carries Ganymede away. This myth, for some, represents the spiritual calling of a young man by god; others attribute homosexual desire to a bisexual Zeus, thus having the supreme god mirror yet another human trait.¹³

Hephaestus, the Divine Artisan. Hephaestus, the next child of Zeus and Hera to be considered, is a god of creative fire and a divine smith. His divine workshop is often placed in heaven or on Olympus. All that this immortal craftsman produces excites wonder; his major role in mythology is to create things of extraordinary beauty and utility, often elaborately wrought. One of his masterpieces, the shield of Achilles, is described in exquisite detail by Homer (*Iliad* 18. 468–617). Hephaestus even has attendants fashioned of gold that look like living young women; these robots can move with intelligence and speak with knowledge. He is indeed the master artisan. Sometimes his forge is under the earth; and as he labors covered with soot and sweat, he may be attended by the three Cyclopes, whom we already know as the ones who create the thunder and lightning of Zeus.¹⁴

Hephaestus is also a god of fire in general, including destructive fire. When the Scamander (both a river and its god) is about to engulf the hero Achilles during an episode in the Trojan War (*Iliad* 21. 324–382), Hera calls upon Hephaestus to raise up his fire and direct it against the raging river, which soon is overcome by the flames.¹⁵

Hephaestus and the goddess Athena were often linked together as benefactors of wisdom in the arts and crafts and champions of progress and civilization. Their joint worship was particularly significant in Athens, and in the *Homeric Hymn to Hephaestus* (20) they are invoked together as archetypal, divine culture figures like Prometheus.

 Sing, clear-voiced Muse, about Hephaestus, renowned for his intelligence, who, with bright-eyed Athena, taught splendid arts to human beings on earth. Previously they used to live in mountain caves, like animals, but now, because of Hephaestus, renowned for his skill, they have learned his crafts and live year round with ease and comfort in their own houses.

Be kind, Hephaestus, and give me both excellence and prosperity.

The god Hephaestus was lame from birth. One version of his birth informs us that Hera claimed that Hephaestus was her son alone without Zeus; thus Hera has her own favorite child, born from herself, just as Zeus has his special daughter, Athena, who was born from his head. In this version too, Hera was ashamed of his deformity and cast him down from Olympus or heaven.¹⁶ Hephaestus refused to listen to any of the other gods, who urged that he return home, except for Dionysus in whom he had the greatest trust. Dionysus made

him drunk and brought him back to Olympus triumphantly. On vases this scene is variously depicted with a tipsy Hephaestus on foot or astride a donkey, led by Dionysus alone or with his retinue.

We are also told that he was hurled to earth (presumably on an another occasion?), this time by Zeus. Hephaestus landed on the island of Lemnos, was rescued, and eventually returned home. Lemnos in classical times was an important center of his worship. Other volcanic regions (e.g., Sicily and its environs) were also associated with this divine smith; these places bore testimony to the fire and smoke that at times would erupt from his forge.

At the close of Book 1 of the *Iliad*, Hephaestus himself recounts the episode of Zeus' anger against him. We excerpt this passage because it illustrates many

The Return of Hephaestus, detail from an Attic black-figure column-krater by Lydos, ca. 550 B.C.; circumference 74 in., height 23 in. The procession is painted round the vase, with Dionysus on one side and on the other (shown here) Hephaestus riding on a mule and accompanied by Sileni, satyrs, and dancing maenads. A snake, bunches of grapes, and wineskins emphasize the role of Dionysus in the myth of the drunken Hephaestus' return to Olympus. (*The Metropolitan Museum of Art, Fletcher Fund, 1931 (31.11.ilobv.)*). All rights reserved, *The Metropolitan Museum of Art.*

things: the character of Hephaestus; his closeness to his mother Hera; the tone and atmosphere instigated by an episode in the life of the Olympian family; Zeus as the stern father in his house; his difficult relations with his wife; the uneasy emotions of the children while they witness the quarrel of their parents.

The sea-goddess Thetis has come to Zeus on Olympus to ask that he grant victory to the Trojans until the Achaean Greeks honor her son Achilles and give him recompense for the insult that he has suffered. As Thetis clasps the knees of Zeus and touches his chin in the traditional posture of a suppliant (see Color Plate 1), Zeus agrees to her wishes with these words (*Iliad* 1. 517–611):

 “A bad business indeed if you set me at variance with Hera and she reviles me with reproaches. She always abuses me, even as it is, in the presence of the immortal gods and says that I help the Trojans in battle. But you now must withdraw, lest Hera notice anything. These things you have asked for will be my concern until I accomplish them. Come now, I shall nod my assent to you so that you may be convinced. For this from me is the greatest pledge among the immortals; for no promise of mine is revocable or false or unfulfilled to which I give assent with the nod of my head.” He spoke and the son of Cronus with his dark brows nodded to her wishes; and the ambrosial locks flowed round the immortal head of the lord and he made great Olympus tremble.¹⁷

After the two had made their plans, they parted; then she leaped into the deep sea from shining Olympus and Zeus returned to his own house. All the gods rose together from their places in the presence of their father and no one dared to remain seated as he entered but all stood before him. Thereupon he sat down on his throne. But Hera did not fail to observe that silver-footed Thetis, daughter of the old man of the sea, had taken counsel with him. Immediately she addressed Zeus, the son of Cronus, with cutting remarks: “Which one of the gods this time has taken counsel with you, crafty rogue? Always it is dear to you to think secret thoughts and to make decisions apart from me and never yet have you dared say a word openly to me about what you are thinking.”

Then the father of men and gods answered her: “Hera, do not hope to know all that I say; it would be difficult for you even though you are my wife. But whatever is fitting that you should hear, then not anyone either of gods nor of mortals will know it before you. But do not pry or ask questions about each and every thing to which I wish to give thought apart from the gods.”

And then ox-eyed Hera in her majesty replied: “Most dread son of Cronus, what kind of answer is this you have given? I have not pried too much or asked questions before but completely on your own you plan whatever you wish. Yet now I am terribly afraid in my heart that silver-footed Thetis, daughter of the old man of the sea, has won you over; for early this morning she sat by your side and grasped your knees and I believe that you nodded your oath that you would honor Achilles and destroy many by the ships of the Achaeans.”

The cloud-gatherer Zeus spoke to her in answer: “You always believe something and I never escape you; nevertheless you will be able to accomplish nothing, but you will be farther removed from my heart; and this will be all the more chill an experience for you. If what you say is so, its fulfillment is what I desire. But sit

down in silence, and obey what I say; for now all the gods in Olympus will be of no avail when I come closer and lay my invincible hands upon you." Thus he spoke and ox-eyed lady Hera was afraid, and she sat down in silence wrenching her heart to obedience, and the gods of heaven were troubled in the house of Zeus.

But Hephaestus renowned for his art began to make a speech to them showing his concern for his dear mother, Hera of the white arms. "This will be a sorry business indeed and not to be endured any longer, if you two quarrel on account of mortals and bring wrangling among the gods. There will be no further pleasure in the excellent feast when baser instincts prevail. I advise my mother, even though she is prudent, to act kindly toward my dear father Zeus so that he will not be abusive again and disturb our banquet. Just suppose he, the Olympian hurler of lightning, wishes to blast us from our seats. For he is by far the strongest. But you touch him with gentle words; immediately then the Olympian will be kindly toward us."

Thus he spoke and springing up he placed a cup with two handles in the hand of his mother and spoke to her: "Bear up, mother dear, and endure, although you are hurt, so that I may not see you struck before my eyes, and then even though you are dear and I am distressed I shall not be able to help. For the Olympian is hard to oppose. Previously on another occasion when I was eager to defend you, he grabbed me by the feet and hurled me from the divine threshold. And I fell the whole day and landed on Lemnos when the sun was setting, and little life was left in me. There Sintian men took care of me at once after my fall."

Thus he spoke. And the goddess Hera of the white arms smiled and as she smiled she received the cup from his hand. He drew sweet nectar from a mixing bowl and poured it like wine for all the other gods from left to right. Then unquenchable laughter rose up among the blessed gods as they saw Hephaestus bustling about the house.

In this way then the whole day until the sun went down they feasted, nor was anyone's desire for his share of the banquet found wanting nor of the exquisite lyre that Apollo held nor of the Muses, who sang in harmony with beautiful voice. But when the bright light of the sun set they went to bed each to his own home which the renowned lame god Hephaestus had built by his skill and knowledge. Olympian Zeus, the hurler of lightning, went to his own bed where he always lay down until sweet sleep would come to him. There he went and took his rest and beside him was Hera of the golden throne.

Hephaestus, Aphrodite, and Ares. Hephaestus is a figure of amusement as he hobbles around acting as the cupbearer to the gods in the previous scene, on Olympus; but he is a deadly serious figure in his art and in his love. His wife is Aphrodite,¹⁸ and theirs is a strange and tempestuous marriage: the union of beauty and deformity, the intellectual and the sensual. Aphrodite is unfaithful to her husband and turns to the virile Ares, handsome and whole, brutal and strong. Homer, with deceptive simplicity, lays bare the psychological implications in a tale about the eternal triangle that remains forever fresh in its humanity and perceptions.

In Book 8 (266–366) of the *Odyssey*, the bard Demodocus sings of the love affair between Ares and Aphrodite and the suffering of Hephaestus (see Color Plate 12: Hephaestus [Vulcan] is startled to hear the news of his wife's infidelity):

He took up the lyre and began to sing beautifully of the love of Ares and Aphrodite with the fair crown: how first they lay together by stealth in the home of Hephaestus. He gave her many gifts and defiled the marriage bed of lord Hephaestus. But soon Helius, the Sun, came to him as a messenger, for he saw them in the embrace of love, and Hephaestus when he heard the painful tale went straight to his forge planning evil in his heart. He put his great anvil on its stand and hammered out chains that could not be broken or loosened so that they would hold fast on the spot.

When he had fashioned this cunning device in his rage against Ares, he went directly to his chamber where the bed was and spread the many shackles all around the bedposts and hung them suspended from the rafters, like a fine spider's web that no one could see, not even the blessed gods, for they were very cunningly made. When he had arranged the whole device all about the bed, he pretended to journey to the well-built citadel of Lemnos, which of all lands was by far the most dear to him.

But Ares of the golden reins was not blind in his watch and as he saw Hephaestus leave he went straight to the house of the craftsman renowned for his art, eager for love with Cytherea of the fair crown. She was sitting, having just come from her mighty father, the son of Cronus, when Ares came into the house; he took her hand and spoke out exclaiming: "My love, come let us go to bed and take our pleasure, for Hephaestus is no longer at home but he has gone now, probably to visit Lemnos and the Sintian inhabitants with their barbarous speech." Thus he spoke and to her the invitation seemed most gratifying; they both went and lay down on the bed. And the bonds fashioned by ingenious Hephaestus poured around them, and they were not able to raise or move a limb. Then to be sure they knew that there was no longer any escape.

The renowned lame god came from close by; he had turned back before he had reached the land of Lemnos, for Helius watched from his lookout and told him the story. Hephaestus made for his home, grieving in his heart, and he stood in the doorway and wild rage seized him; he cried out in a loud and terrible voice to all the gods: "Father Zeus and you other blessed gods who live forever, come here so that you may see something that is laughable and cruel: how Aphrodite the daughter of Zeus always holds me in contempt since I am lame and loves the butcher Ares because he is handsome and sound of limb, but I was born a cripple. I am not to blame for this nor is anyone else except both my parents who I wish had never begotten me. You will see how these two went into my bed where they lay down together in love. As I look at them I am overcome by anguish. I do not think that they will still want to lie here in this way for even a brief time, although they are so very much in love, and very quickly they will no longer wish to sleep side by side, for my cunning and my bonds will hold them fast until her father pays back all the gifts that I gave to him for this hussy because she was his daughter and beautiful, but she is wanton in her passion."

Thus he spoke and the gods assembled at his house with the floor of bronze. Poseidon the earthshaker came and Hermes the helpful runner, and lord Apollo the far-shooter. But the goddesses in their modesty stayed at home one and all. The blessed gods, dispensers of good things, stood at the door and unquenchable laughter rose up among them as they saw the skill of ingenious Hephaestus. And one would speak to another who was next to him as follows: "Bad

deeds do not prosper; the slow overtakes the swift, since now Hephaestus who is slow and lame has caught by his skill Ares, even though he is the swiftest of the gods who inhabit Olympus. Therefore he must pay the penalty for being caught in adultery." This was the sort of thing that they said to one another.

And lord Apollo, son of Zeus, spoke to Hermes: "Hermes, son of Zeus, runner and bestower of blessings, would you wish to lie in bed by the side of golden Aphrodite, even though pressed in by mighty shackles?" Then the swift runner Hermes answered: "I only wish it were so, lord Apollo, far-shooter. Let there be three times the number of shackles and you gods looking on and all the goddesses, I still would lie by the side of golden Aphrodite."

Thus he spoke and a laugh rose up among the immortal gods. But Poseidon did not laugh; he relentlessly begged Hephaestus, the renowned smith, to release Ares and addressed him with winged words: "Release him. I promise you that he will pay all that is fitting in the presence of the immortal gods, as you demand." Then the renowned lame god answered: "Do not demand this of me, Poseidon, earthshaker; pledges made on behalf of worthless characters are worthless to have and to keep. How could I hold you fast in the presence of the immortal gods, if Ares gets away and escapes both his debt and his chains?" Then Poseidon the earthshaker answered: "Hephaestus, if Ares avoids his debt and escapes and flees, I myself will pay up." Then the renowned lame god replied: "I cannot and I must not deny your request."

Thus speaking Hephaestus in his might released the chains. And when they both were freed from the strong bonds, they immediately darted away, the one went to Thrace and the other, laughter-loving Aphrodite, came to Paphos in Cyprus where are her sanctuary and altar fragrant with sacrifices. There the Graces bathed her and anointed her with divine oil, the kind that is used by the immortal gods, and they clothed her in lovely garments, a wonder to behold.

A funny story yet a painful one; glib in its sophisticated and ironic portrayal of the gods, but permeated with a deep and unshakable moral judgment and conviction. The Greeks particularly enjoyed the fact that the lame Hephaestus, by his intelligence and craft, outwits the nimble and powerful Ares.

Ares, God of War. Ares himself, the god of war, is the last child of Zeus and Hera to be considered. His origins probably belong to Thrace, an area with which he is often linked. Aphrodite is usually named as his cult partner; several children are attributed to them, the most important being Eros. Dawn (Eos) was one of his mistresses, and we have already mentioned (in Chapter 3) Aphrodite's jealousy.

Ares. Roman copy of a Greek original (possibly by Skopas) of ca. 340 B.C.; marble, height 61½ in. Known as the *Ludovisi Mars*, this copy (made perhaps in the late second century A.D.) shows Mars, unarmed but holding his sword with the scabbard-handle turned toward the viewer and with his left foot resting on his helmet. His shield is upright (the inside face turned outward). Is the god simply at rest, or has he been subdued by love, as the Cupid (added by the copyist) implies? (*Rome, Museo Nazionale delle Terme.*)

In character Ares is generally depicted as a kind of divine swashbuckler. He is not highly thought of, and at times he appears as little more than a butcher. The more profound moral and theological aspects of war were taken over by other deities, especially Zeus or Athena. Zeus' response to Ares after he has been wounded by Diomedes (Ares sometimes gets the worst of things, even in battle) is typical of the Greek attitude toward him (*Iliad* 5. 889–891, 895–898).

 Do not sit beside me and complain, you two-faced rogue. Of all the gods who dwell on Olympus you are the most hateful to me, for strife and wars and battles are always dear to you. . . . Still I shall not endure any longer that you be in pain, for you are of my blood and your mother bore you to me. But if you were born of some other of the gods, since you are so destructive you would have long since been thrown out of Olympus.

The Greeks felt strongly about the brutality, waste, and folly of war, all of which are personified and deified in the figure of Ares. Yet they inevitably developed an appreciation (if that is the right word) of the harsh realities that Ares could impose and the various aspects of warfare that he might represent. After all, throughout much of their history the Greeks (like us) were plagued by war; and in the pages of the great historian Thucydides we see most clearly of all that despicable war is the harshest of teachers. The Greeks *did* worship Ares, Athena, and Zeus as divine champions in righteous conflict.

The *Homeric Hymn to Ares* (8), a relatively late composition with its astrological reference to the planet Ares (Mars), invokes with more compassion a god of greater complexity who is to provide an intelligent and controlled courage.¹⁹

 Ares—superior in force, chariot-rider, golden-helmeted, shield-bearer, stalwart in battle, savior of cities, bronze-armored, strong-fisted, unwearingly relentless, mighty with the spear, defense of Olympus, father of the war-champion Nike [Victory], ally of Themis [Right], tyrant against the rebellious, champion for the righteous, sceptred king of manhood—as you whirl your fiery red sphere among the planets in their seven courses through the air, where your blazing steeds keep you forever above the third orbit,²⁰ hear me, helper of mortals, giver of vigorous youth; from above shed upon my life a martial ferocity, so that I may be able to drive off bitter cowardice from my person, and then again a radiant gentleness so that I may be able to bend to my will the treacherous impulse of my spirit to rush to the attack and check the keen fury of my passion which drives me to engage in the chilling din of battle.

You, blessed one, give me the strength to keep within the harmless constraints of peace and flee from the strife of enemies and violence of fateful death.

OTHER CHILDREN OF ZEUS: THE MUSES AND THE FATES

The Nine Muses, Daughters of Zeus and Memory (Mnemosyne). We shall conclude this chapter with two of Zeus' many affairs because of the universal significance of the offspring. He mates with the Titaness Mnemosyne ("Memory"), and she

gives birth to the Muses, the patronesses of literature and the arts; thus allegorically Memory with divine help produces inspiration. The opening section of Hesiod's *Theogony*, which is devoted primarily to the Muses, is translated in the Additional Reading at the end of Chapter 3. The home of the Muses is often located in Pieria in northern Thessaly near Mt. Olympus,²¹ or about the fountain Hippocrene on Mt. Helicon in Boeotia. The Muses (their name means "the reminders") may originally have been water spirits with the power of prophecy and then inspiration, imagined from the babbling of waters as they flow. They are supreme in their fields, and those who dare to challenge them meet with defeat and punishment. In this respect they resemble Apollo, with whom they are often associated. The number of the Muses is not consistent, but later authors usually identify nine of them, each with a specific function, although assignments will vary. Calliope presides over epic poetry; Clio, history (or lyre playing); Euterpe, lyric poetry (or tragedy and flute playing); Melpomene, tragedy (or lyre playing); Terpsichore, choral dancing (or flute playing); Erato, love poetry (or hymns to the gods and lyre playing); Polyhymnia, sacred music (or dancing); Urania, astronomy; Thalia, comedy.

In the *Homeric Hymn to the Muses and Apollo* (25), the great deity Apollo is invoked along with them because as god of music, poetry, and the arts he is often their associate.

 With the Muses, let me begin, and with Apollo and Zeus. For through the Muses and far-shooting Apollo, human beings on earth are poets and musicians; but through Zeus, they are kings. Blessed are the ones whom the Muses love; sweet is the sound that flows from their lips.

Hail, children of Zeus, and give honor to my song; yet I shall remember you and another song too.

The Three Fates, Daughters of Zeus and Themis. Zeus is sometimes said to be the father of the Fates (Greek, *Moirai*; *Parcae* for the Romans) as a result of his union with Themis. Night and Erebus are also said to be their parents. The Fates are originally birth spirits who often came to be depicted as three old women responsible for the destiny of every individual. Clotho ("Spinner") spins out the thread of life, which carries with it the fate of each human being from the moment of birth; Lachesis ("Apportioner") measures the thread; and Atropos ("Inflexible"), sometimes characterized as the smallest and most terrible, cuts it off and brings life to an end. On occasion they can be influenced to alter the fate decreed by their labors, but usually the course of the destiny that they spin is irrevocable.

Fate is often thought of in the singular (Greek, *Moirai*), in a conception that is much more abstract and more closely linked to a profound realization of the roles played by Luck or Fortune (Tyche) and Necessity (Ananke) in the scheme of human life. The relation of the gods to destiny is variously depicted and intriguing to analyze in the literature. According to some authors Zeus is supreme

and controls all, but others portray a universe in which even the great and powerful Zeus must bow to the inevitability of Fate's decrees. The depth of this feeling of the Greeks for the working of *Moirai* or the *Moirai* cannot be overemphasized. It provides a definite and unique tone and color to the bulk of their writing. One thinks immediately of Homer or Herodotus or the tragedians, but no major author was untouched by fascination with the interrelation of god, mortals, and fate and the tantalizing interplay of destiny and free will.²²

In the brief *Homeric Hymn to the Supreme Son of Cronus* (23), Zeus is invoked as the intimate confidant of Themis; for Zeus and Themis were the parents not only of the Fates but also of the Hours (*Horae*)²³ and (appropriately for this hymn) of Good Order (*Eunomia*), Justice (*Dike*), and Peace (*Eirene*).

 About Zeus, I will sing, the best and greatest of the gods, far-seeing ruler and accomplisher, who confides his words of wisdom to Themis, as she sits and leans close. Be kind, far-seeing son of Cronus, most glorious and most great.

NOTES

1. The Roman gods are discussed on pp. 623–644.
2. See the lines about Hestia in the *Homeric Hymn to Aphrodite*, translated in Chapter 9, p. 182. Sometimes Hestia does not seem to be conceived fully as an anthropomorphic deity.
3. Pytho is Delphi, the site of Apollo's great temple; oil was used as an ointment for hair and in religious rites it was poured over the heads of statues.
4. The warrior-goddess Athena will also carry the aegis, on which may be depicted the head of the Gorgon Medusa whom she helped Perseus slay. Athena's aegis may be her own or lent by Zeus to his favorite daughter.
5. Zeus and Hera find their archetypal counterparts in the Wotan and Fricka of Nordic mythology.
6. These games were celebrated every four years after 776; an important system of dating for the Greeks was by Olympiads.
7. Long before 776, the pre-Olympian deities Cronus and Gaia were worshiped at Olympia. For Heracles at Olympia, see p. 525.
8. The temple was completed in 456; the statue, ca. 430.
9. It was described in detail by the traveler Pausanias (5. 11) in the second century A.D.;

- the Roman Quintilian wrote, "its beauty added something even to the traditional religion."
10. See Bernard Ashmole, N. Yalouris, and Alison Franz, *Olympia: The Sculptures of the Temple of Zeus* (New York: Phaidon, 1967); John Boardman, *Greek Sculpture: The Classical Period* (London: Thames and Hudson, 1985), Chapter 4, "Olympia: The Temple of Zeus," pp. 33–50, includes diagrams, reconstructions, and photographs to illustrate the very brief discussion; Martin Robinson, *A Shorter History of Greek Art* (New York: Cambridge University Press, 1981) (pp. 79–89 for the sculptures of the temple of Zeus at Olympia), is by far the best discussion, distilled from the author's *A History of Greek Art*, 2 vols. (1975), pp. 271–291.
 11. Olympia was not as famous for its oracles as was the sanctuary of Apollo at Delphi, another famous Panhellenic festival (i.e., one to which "all Hellenes" came). Delphi was similar to Olympia and is described in Chapter 11 in some detail as representative of this facet of Hellenic worship and life (see pp. 230–234).
 12. In the *Iliad* (5. 905) Hebe bathes and clothes Ares after he has been healed of the wounds inflicted by the hero Diomedes.
 13. For the theme of homosexuality see Chapter 1, pp. 21–22.
 14. Homer (*Iliad* 18) presents a splendid picture of his house on Olympus when Thetis appeals to Hephaestus to forge new armor for her son Achilles. Vergil (*Aeneid* 8) locates Vulcan's workshop in a cave on the island of Vulcania near Sicily. There he fashions magnificent armor for Aeneas, the son of Venus.
 15. This scene is not unlike the finale of act three of Richard Wagner's *Die Walküre*, in which Wotan conjures up Loge to surround his Walkyrie daughter Brünnhilde with a ring of magic fire.
 16. For this version, see the *Homeric Hymn to Apollo* in the Additional Reading to Chapter 11.
 17. Pheidias' majestic statue of the seated figure of Zeus in the temple at Olympia (described earlier) was supposedly inspired by these lines from Homer describing Zeus as he nods.
 18. Sometimes Hephaestus' mate is one of the Graces, either the youngest, Aglaea, or Grace herself (Charis), which actually may be but another designation for Aphrodite.
 19. This hymn probably belongs to Hellenistic times or even later; some, not very convincingly, associate it with the corpus of Orphic hymns. The richer connotations given to Ares' character and the emphasis upon strength in peace as well as war look to Mars, the Roman counterpart of Ares; see pp. 626–627.
 20. Ares is in the third planetary zone, if you count from the one that is farthest from Earth.
 21. The Muses are sometimes called the Pierides, but Ovid (*Metamorphoses* 5. 205–678) tells a story of nine daughters of Pierus of Pella in Macedonia who were also called Pierides. They challenged the Muses to a musical contest, lost, and were changed into magpies, birds that imitate sounds and chatter incessantly.
 22. The Romans developed this same tragic view of human existence. For them Fate is personified by the Parcae, or more abstractly conceived as Fatum (Fate).
 23. The Horae, Hours, become the Seasons, goddesses who are two, three, or four in number and closely connected with vegetation. They attend the greater deities and provide attractive decoration in literature and art. Zeus and Themis as sky-god and earth-goddess enact once again the ritual of the sacred marriage.

THE NATURE OF THE GODS

ANTHROPOMORPHISM

By now the nature of the anthropomorphic conception of deity that evolved among the Greeks and the Romans should be evident. The gods are generally depicted as human in form and character; but although they look and act like humans, very often their appearance and their actions are to some extent idealized. Their beauty is beyond that of ordinary mortals, their passions more grand and intense, their sentiments more praiseworthy and touching; and they can embody and impose the loftiest moral values in the universe. Yet these same gods can mirror the physical and spiritual weaknesses of human counterparts: they can be lame and deformed or vain, petty, and insincere; they can steal, lie, and cheat, sometimes with a finesse that is exquisitely divine.

The gods usually live in houses on Mt. Olympus or in heaven; a very important distinction, however, is to be made between those deities of the upper air and the upper world (the Olympians) and those of the realm below, appropriately named chthonian (i.e., of the earth). They eat and drink, but their food is ambrosia and their wine nectar. Ichor (a substance clearer than blood) flows in their veins. Just as they can feel the gamut of human emotion, so too they can suffer physical pain and torment. They are worshiped in shrines and temples and sanctuaries; they are honored with statues, placated by sacrifices, and invoked by prayers.

In general the gods are more versatile than mortals. They are able to move with amazing speed and dexterity, appear and disappear in a moment, and change their shape at will, assuming various forms—human, animal, and divine. Their powers also are far greater than those of mortals. Yet gods are seldom omnipotent, except possibly for Zeus himself, and even Zeus may be made subject to Fate or the Fates. Their knowledge, too, is superhuman, if on occasion limited. Omniscience is most often reserved as a special prerogative of Zeus and Apollo, who communicate their knowledge of the future to mortals. Most important of all, the gods are immortal; in the last analysis, their immortality is the one divine characteristic that most consistently distinguishes them from mortals.

Very often one or more animals are associated with a particular deity. For Zeus, it is the eagle; for Hera, the peacock; for Poseidon, the horse; for Athena, the owl; for Aphrodite, the dove, sparrow, or goose; for Ares, the boar. In ad-

dition, a deity who desires to do so can take the form of an animal. There is no concrete evidence, however, to show that the Greeks at an early period ever worshiped animals as sacred.

THE DIVINE HIERARCHY

Many of the preceding remarks apply for the most part only to the highest order of divinity in the Greek pantheon. Such wondrous and terrible creations as the Gorgons or Harpies, who populate the universe to the enrichment of mythology and saga, obviously represent a different category of the supernatural. Of a different order, too, are the divine spirits who animate nature. These beings are usually depicted as nymphs, beautiful young girls who love to dance and sing and, in some cases, are extremely amorous. Very often nymphs act as attendants for one or more of the major gods or goddesses. The Muses are a kind of nymph, and so are the Nereids and Oceanids, although some of them assume virtually the stature of deity. More typically, nymphs are rather like fairies, extremely long-lived but not necessarily immortal.¹

Demigods are another class of superhuman beings, or better, a superior kind of human being—that is, supermen and superwomen. They are the offspring of mixed parentage, the union of a god with a mortal, who may or may not be extraordinary.² Demigods are therefore limited in their powers, which are rather less than those of full-fledged gods; and they are mortals, often little more than figures made larger than life because of their tragic and epic environment.

Heroes sometimes are demigods, but the terminology is not easy to define precisely. Mortals like Oedipus and Amphiaräus are not, strictly speaking, demigods, although they are far from ordinary beings. They may be called heroes, and certainly they become so after death, honored with a cult largely because of the spiritual intensity of their lives and the miraculous nature of their deaths; they thus assume a divine status. Heracles, too, is a hero and a demigod, but he is an exception because he joins the company of the immortal gods on Olympus as a reward for his glorious attainments in this world. The difficulty in establishing absolute definitions is complicated because of the use of the designation "hero" in the vocabulary of literary criticism. Achilles is a demigod, that is, the son of a mortal Peleus and the nymph-goddess Thetis. His powers are extraordinary, but it is ultimately as a mortal, the dramatic and epic hero of the *Iliad*, that he is to be judged.

It is apparent that a hierarchy of divinities existed in the Greek pantheon. The Olympians, along with the major deities of the lower world, represent as it were a powerful aristocracy. Although individual gods and goddesses may be especially honored in particular places (e.g., Athena in Athens, Hera in Argos, Hephaestus in Lemnos, Apollo in Delos and Delphi), in general the major divinities were universally recognized throughout the Greek world. At the top is Zeus himself, the king, the father of both gods and mortals, the supreme lord.

ZEUS AND MONOTHEISM

We have already seen the popular anthropomorphic conception of Zeus as the father, husband, and lover; and we know too the primary sphere of his power: the sky and the upper air, with their thunder, lightning, and rain. Zeus also becomes the god who upholds the highest moral values in the order of the universe—values that he absorbs unto himself or that are divided among and shared by other deities. He is the god who protects the family, the clan, and the state, championing the universal moral and ethical responsibilities that these human associations entail. He protects suppliants, imposes ties of hospitality, upholds the sanctity of oaths; in a word, he is the defender of all that is right or just in the mores of advanced civilization.

Thus, within the polytheistic cast of Greek and Roman mythology and religion, a strong element of monotheism emerges from the very beginning; as it evolves, it may be linked closely to the standard depictions of an anthropomorphic Zeus or imagined in terms of more abstract philosophical and religious theories of a supreme power.

In Homer and Hesiod, Zeus is unquestionably the sovereign deity, and he is very much concerned with moral values. Yet his monotheism and patriarchy are severely tested by other divinities, especially goddesses. Hera's power is able to thwart Zeus' plans. Aphrodite can bend all the gods to her will, Zeus included, except for the three virgins, Hestia, Athena, and Artemis. Demeter, angry at the rape of her daughter Persephone, forces Zeus and the gods to come to her terms. And Zeus must yield to fate or the fates, although this need not always be the case.

At the same time, in the evolution of Zeus as the one supreme god, the almighty god of morality and justice, he could be referred to without a name and simply as god in an abstract, rather than specific, anthropomorphic conception. This greater sophistication in thought, which gave Zeus a more unquestionable, absolute, and spiritual authority, came about through the writings of religious poets and philosophers. Many selections from many authors could be quoted to bear testimony to the variety and complexity of Greek conceptions of the nature of the one god. A few examples must suffice.

Hesiod, who preaches a hard message of righteousness and warns of the terror of Zeus' punishment of the wicked, sounds very much like a severe prophet of the Old Testament. The opening section of his *Works and Days* includes the following lines (3–7):

 Through Zeus, who dwells in a most lofty home and thunders from on high and by his mighty will, mortals are both known and unknown, renowned and unrenowned; for easily he makes them strong and easily he brings them low; easily he makes the overweening humble and champions the obscure; easily he makes the crooked straight and strikes down the haughty.

Xenophanes, a poet and philosopher of the pre-Socratic period, was vehement in his attack on the conventional anthropomorphic depictions of the gods.

He argued against the folly of conceiving deities as human beings and insisted that there is one supreme nonanthropomorphic god:

 Homer and Hesiod have ascribed to the gods all that is shameful and reproachful among mortals: stealing, adultery, and deception. [frag. 11]

But mortals think that gods are born and have clothes and a voice and a body just like them. [frag. 14]

The Ethiopians say that their gods are flat-nosed and black and the Thracians that theirs are fair and ruddy. [frag. 16]

But if cattle and horses and lions had hands and could create with their hands and achieve works like those of human beings, horses would render their conceptions of the gods like horses, and cattle like cattle, and each would depict bodies for them just like their own. [frag. 15]

One god, greatest among gods and mortals, not at all like them, either in body or in mind. [frag. 23]

The chorus of Aeschylus' *Agamemnon* (160–161) calls upon god by the name of Zeus with words that illustrate beautifully the universality of this supreme deity: “Zeus, whoever he may be, I call on him by this name, if it is pleasing to him to be thus invoked.”

It is important to realize that monotheism and polytheism are not mutually exclusive and that human religious experience usually tends (as Xenophanes observes) to be anthropomorphic. It would be absurd to deny that Christianity in its very essence is monotheistic, but its monotheism too rests upon a hierarchical conception of the spiritual and physical universe, and its standard images are obviously cast in anthropomorphic molds: for example, there is one God in three divine persons, God the Father, the Son, and the Holy Ghost; there are angels, saints, devils, and so on. This does not mean that the Christian philosopher and layperson view the basic tenets of their religion in exactly the same way; ultimately each vision of deity is personal, as abstract and sublime for one as it is human and compassionate for another. Among Christian sects alone there are significant variations in dogma and ritual; and of course, there are those who do not believe at all. The range from devout belief to agnosticism and atheism was as diverse and rich in the ancient world as it is in our world. The tendency in a brief survey such as this is to oversimplify and distort.

GREEK HUMANISM

The anthropomorphism of the Greeks is almost invariably linked to their role as the first great humanists. Humanism (the Greek variety or, for that matter, any other kind) can mean many things to many people. Standard interpretations usually evoke a few sublime (although hackneyed) quotations from Greek literature. The fifth-century sophist Protagoras is said to have proclaimed: “Man is the measure of all things”; presumably he is challenging absolute values by voicing new relativistic attitudes (i.e., mortals, not gods, are individual arbiters

of the human condition). A chorus in Sophocles' *Antigone* sings exultantly: "Wonders are many but none is more wonderful than man"; and Achilles' judgment of the afterlife in Homer's *Odyssey* (translated on p. 331) quoted out of context seems to affirm an unbridled optimism in the boundless hope and achievement possible in this life, as opposed to the dismal gloom and dull inertia of the hereafter. He cries out:

 I should prefer as a slave to serve another man, even if he had no property and little to live on, than to rule all those dead who have done with life.

With words such as these ringing in one's ears, it seems easy to postulate a Greek worship (even idolatry) of the human in a universe where mortals pay the gods the highest (but surely dubious) compliment of casting them in their own image.

Whatever truths this popular view may hold, it is far too one-dimensional and misleading to be genuinely meaningful and fair. In opposition to this myopic, uplifting faith in the potential of human endeavor to triumph against all divine odds, Greek literature and thought are shot through with a somber and awesome reverence for the supremacy of the gods and the inevitability of the Fates. A sense of predetermined destiny for each individual was analyzed in terms of the meaning and possibility of free will and independent action. There also developed a strong and realistic awareness of the miseries, uncertainties, and unpredictability of human life, ordained by the gods. If we are lucky, our lives will be more blessed by happiness than doomed to misery; still, the terrible vicissitudes of life lead to only one conclusion: It is better to be dead than alive. This tragic irony of man's dilemma as both an independent agent and a plaything of fate and the pain and suffering of human existence were pitted against the conviction that mortals may reach glorious and triumphant heights in the face of dreadful uncertainties and terrors. This idealistic optimism and this realistic pessimism, these two seemingly irreconcilable points of view, account for a unique humanism originated by the Greeks, with its emphasis upon the beauty and wonder of mortal achievement, despite the horrible disasters that a vindictive god or fate may dispense at any moment.

MYTH, RELIGION, AND PHILOSOPHY

Another word of caution is in order about generalizations concerning Greek religious attitudes. It has been claimed that the Greeks had no Bible or strict dogma and (incredible as it may seem) no real sense of sin, or that they were innocently free and tolerant in their acceptance of new gods—what difference does one more make to a polytheist? One should not merely repeat stories (many of them from Ovid) and make pronouncement upon the spiritual adequacy or inadequacy of the theological convictions they are supposed to represent. Mythology, philosophy, and religion are inextricably entwined, and one must try to look at

all the evidence. Homer offered to the Greeks a literary bible of humanism that could on occasion be quoted (as Shakespeare is for us) like scripture; the mystery religions provided a dogma and ritual of a more exacting nature. Certainly Hesiod pronounces his divine revelation with a vehement biblical authority.

Priests and priestesses devoted their lives to the service of the gods. The city-states upheld—by custom, tradition, and law—strict moral and ethical codes of behavior. If the stories of opposition to the new god Dionysus rest upon any stratum of historical truth, a foreign message of salvation was not always readily or easily accommodated, and one could be put to death (in Athens, of all places) on a charge of impiety. The Greeks thought profoundly about god, the immortality of the soul, and the meaning and consequences of vice and virtue. The Platonic myth of Er (translated in Chapter 15) is a terrifying vision of heaven and hell; as such it is a religious document. Along with much other evidence, it shows that Greek philosophical thought can hold its own with that of any of the so-called higher religions.

THE LEGENDARY HISTORY OF HERODOTUS

The historian Herodotus (fifth century B.C.) perhaps best represents Greek humanistic and religious attitudes in their clearest and most succinct form when he relates the story of Solon, Croesus, and Cyrus. Fortunately, episodes in this drama may be easily excerpted here, for they illustrate many things. Monotheism and polytheism are shown resting compatibly side by side. The jealous god of Solon is not unlike the wrathful deity of the Old Testament, a god who makes manifest to mortals that it is better to be dead than alive. The divine is able to communicate with mortals in a variety of ways; one can understand the simple and sincere belief in Apollo and Delphi possible in the sixth century B.C. There is a fascinating interplay between the inevitability of fate or destiny and the individuality of human character and free will.

Much that is Homeric has colored the Herodotean view, not least of all a compassion, tinged with a most profound sadness and pity, for the human condition. Homeric and dramatic, too, is the simple elucidation of the dangers of hubris and the irrevocable vengeance of Nemesis—the kernel, as it were, of a theme that dominates Greek tragedy. Herodotus, like most Greek writers, takes his philosophy from Homer. In the last book of the *Iliad* (see pp. 464–467), Priam, great king of Troy, comes alone as a humble suppliant to the Greek hero Achilles in order to beg for the body of his son Hector, whom Achilles has killed. In the course of their interview, Achilles, who has also suffered much, not least of all because of the death of his beloved Patroclus, divulges his conclusions about human existence:

 No human action is without chilling grief. For thus the gods have spun out for wretched mortals the fate of living in distress, while they live without care. Two jars sit on the doorsill of Zeus, filled with gifts that he bestows, one jar of evils, the other of blessing. When Zeus who delights in the thunder takes from both

and mixes the bad with the good, a human being at one time encounters evil, at another good. But the one to whom Zeus gives only troubles from the jar of sorrows, this one he makes an object of abuse, to be driven by cruel misery over the divine earth.

The once mighty Priam will soon lose everything and meet a horrifying end, and Achilles himself is destined to die young. His fatalistic words about the uncertainty of human life are mirrored in the sympathetic humanism of Herodotus and echoed again and again by the Greek dramatists, who delight in the interplay of god and fate in human life and the tragic depiction of the mighty fall of those who were once great.

Herodotus' conception of a monotheistic god and his message of knowledge through suffering are strikingly Aeschylean. Herodotean themes *are* the very themes of Greek tragic literature: fate, god, and guilty and misguided mortals, who by their own actions try to avoid their destiny, only to further its fulfillment.

The story of the death of Atys is most Sophoclean in its movement and philosophy, and Croesus, like Oedipus, fulfills his inevitable destinies in terms of his character; each step that he takes in his blind attempts to avoid his fate brings him closer to its embrace. Most significantly, Croesus, again like Oedipus, can learn through sin and suffering to triumph against adversity and win reconciliation with god. There is not a single Greek tragedy that does not echo either implicitly or, in most cases, explicitly, the admonition of Solon, "Never count a person happy, until dead," with its twofold connotation: the happiness of human life cannot be judged until the entire span of that life has been lived, and death is to be preferred to the vicissitudes of life.

Jack Miles, a former Jesuit, provides a Pulitzer Prize-winning study of the anthropomorphic God of the *Tanakh* (the Hebrew Old Testament).³ His literary portrait depicts God as a fictional character with many facets. To show that his contention is true, Miles retells the biblical story by presenting "the various personalities fused in the character of the Lord God" as separate characters. The result is a tale that reads very much like Greek and Roman mythology.

Croesus on the Pyre. Attic red-figure amphora by Myson, ca. 500 B.C.; height 23 in. Croesus sits enthroned, wreathed, and holding his sceptre. In his right hand he pours a libation from a *phiale*. An attendant, dressed (like Croesus) as a Greek and not as a Persian, lights the pyre. This is the earliest known version, in art or literature, of the story, and its narrative is similar to that of the poet Bacchylides, whose poem was written in 468 B.C., about thirty years before Herodotus' narrative. In this version, Croesus voluntarily erects the pyre to burn himself and his family rather than submit to loss of freedom. This is consistent with his elaborate dress and throne, with the ritual libation to Zeus and Apollo, and with the non-Persian attendant. Like Herodotus' Croesus he is saved by a rainstorm, but he is then rewarded for his piety toward Apollo by being transported, with his family, to the land of the Hyperboreans. This scene was painted about fifty years after the capture of Sardis in 546 B.C.—a remarkable example of the transformation of an historical person into a mythical figure. (*Paris, Louvre.*)

Yet there is no need to retell the story of the Old Testament polytheistically in order to reveal the essential similarity between the God of the Hebrews and the God of the Greeks. It is true that the *Tanakh* illustrates an absolute monotheism that appears more all-pervasive and relentless than that of the Greeks. Yet if we modify the major contention of Miles that for the Hebrews "all depends on a frighteningly unpredictable God" to read "all human happiness and misery depend on a frighteningly unpredictable God," we are describing exactly the god of Homer and Herodotus.

Solon and Croesus. Herodotus presents in the context of his *History of the Persian Wars* a brilliant crystallization of the tragic yet uplifting nature of Greek humanism, which can only be truly understood through the emotional and intellectual experience afforded by great art. He molds the legend of Croesus into a complete and powerful drama, conceived and beautifully executed within the disciplined structure of the short story. Herodotus is neither professional theologian nor philosopher, yet by his molding of traditional tales he sums up the spiritual essence of an age of faith and shows how history, mythology, and religion are for him inextricably one. The story of Solon's meeting with Croesus is found in Book 1 of Herodotus (30–46):

And so Solon set out to see the world and came to the court of Amasis in Egypt and to Croesus at Sardis. And when he arrived, Croesus received him as a guest in his palace. Three or four days later at the bidding of Croesus, servants took Solon on a tour of his treasuries, pointing out that all of them were large and wealthy. When he had seen and examined them all to suit his convenience, Croesus asked the following question: "My Athenian guest, many stories about you have reached us because of your wisdom and your travels, of how you in your love of knowledge have journeyed to see many lands. And so now the desire has come over me to ask if by this time you have seen anyone who is the happiest." He asked this expecting that he was the happiest of human beings, but Solon did not flatter him at all but following the truth said: "O king, Tellus the Athenian."

Croesus, amazed at this reply, asked sharply: "How do you judge Tellus to be the most happy?" And Solon said: "First of all he was from a city that was faring well and he had beautiful and good children and to all of them he saw children born and all survive, and secondly his life was prosperous, according to our standards, and the end of his life was most brilliant. When a battle was fought by the Athenians against their neighbors near Eleusis, he went to help and after routing the enemy died most gloriously, and the Athenians buried him at public expense there where he fell and honored him greatly." Thus Solon provoked Croesus as he listed the many good fortunes that befell Tellus, and he asked whom he had seen second to him, thinking certainly that he would at least win second place.

Solon said: "Cleobis and Biton. They were Argives by race and their strength of body was as follows: both similarly carried off prizes at the festivals and as well this story is told. The Argives celebrated a festival to Hera and it was ab-

solutely necessary that the mother of these boys be brought by chariot to the temple.⁴ But the oxen had not come back from the fields in time, and the youths, because it was growing late, yoked themselves to the chariot and conveyed their mother, and after a journey of five miles they arrived at the temple. When they had done this deed, witnessed by the whole congregation, the end of life that befell them was the very best. And thereby god showed clearly how it is better for a human being to be dead than alive.⁵ For the Argive men crowded around and congratulated the youths for their strength and the women praised their mother for having such fine sons. And the mother was overjoyed at both the deed and the praise and standing in front of the statue prayed to the goddess to give to her sons, Cleobis and Biton, who had honored her greatly, the best thing for a human being to obtain. After this prayer, when they had sacrificed and feasted, the two young men went into the temple itself to sleep and never more woke up, but the end of death held them fast. The Argives had statues made of them and set them up in Delphi since they had been the best of men."⁶

Thus Solon assigned the second prize of happiness to these two and Croesus interrupted in anger: "My Athenian guest, is our happiness so dismissed as nothing that you do not even put us on a par with ordinary men?" And he answered: "O Croesus, you ask me about human affairs, who know that all deity is jealous and fond of causing troubles. For in the length of time there is much to see that one does not wish and much to experience. For I set the limit on life at seventy years; these seventy years comprise 25,200 days, if an intercalary month is not inserted. But if one wishes to lengthen every other year by a month, so that the seasons will occur when they should, the months intercalated in the seventy years will number thirty-five and these additional months will add 1,050 days. All the days of the seventy years will total 26,250; and no one of them will bring exactly the same events as another.

"And so then, O Croesus, a human being is completely a thing of chance.⁷ To me you appear to be wealthy and king of many subjects; but I cannot answer the question that you ask me until I know that you have completed the span of your life well. For the one who has great wealth is not at all more fortunate than the one who has only enough for his daily needs, unless fate attend him and, having everything that is fair, he also end his life well. For many very wealthy men are unfortunate and many with only moderate means of livelihood have good luck. Indeed the one who is very wealthy but unfortunate surpasses the lucky man in two respects only, but the man of good luck surpasses the wealthy but unlucky man in many. The latter [wealthy but unlucky] is better able to fulfill his desires and to endure a great disaster that might befall him, but the other man [who is lucky] surpasses him in the following ways. Although he is not similarly able to cope with doom and desire, good fortune keeps these things from him, and he is unmaimed, free from disease, does not suffer evils, and has fine children and a fine appearance. If in addition to these things he still ends his life well, this is the one whom you seek who is worthy to be called happy. Before he dies do not yet call him happy, but only fortunate.

"Now it is impossible that anyone, since he is a man, gather unto himself all these blessings, just as no country is self-sufficient providing of itself all its own needs, but possesses one thing and lacks another. Whichever has the most,

this is the best. Thus too no one human person is self-sufficient, for he possesses one thing but lacks another. Whoever continues to have most and then ends his life blessedly, this one justly wins this name from me, O king. One must see how the end of everything turns out. For to be sure, god gives a glimpse of happiness to many and then casts them down headlong."

Solon did not find favor with Croesus by his words. He was sent away as one of no account, since Croesus was very much of the opinion that a man must be ignorant who sets aside present goods and bids one look to the end of everything.

After the departure of Solon, a great Nemesis from god took hold of Croesus, very likely because he considered himself to be the happiest of all men. Straightway a dream stood before him as he slept, which made clear to him the truth of the evils that were to come about in connection with his son. Croesus had two sons, one of whom was mute, the other by far the first in all respects among youths of his own age. His name was Atys. The dream indicated to Croesus that this Atys would die struck by the point of an iron weapon. When he woke up he thought about the dream and was afraid; he got his son a wife and, although the boy was accustomed to command the Lydian forces, he no longer sent him out on any such mission; and javelins and spears and all such weapons that men use in war he had removed from the men's quarters and piled up in the women's chambers, for fear that any that were hanging might fall on his son.

While they had on their hands arrangements for the marriage, there came to Sardis a man seized with misfortune, his hands polluted with blood, a Phrygian by race and of the royal family. This man came to the palace of Croesus, and according to the traditions of the country begged to obtain purification, and Croesus purified him. The ritual of cleansing is similar for the Lydians and the Hellenes.⁸ When Croesus had performed the customary rites, he asked from where he came and who he was in the following words: "My fellow, who are you and from where in Phrygia have you come to my hearth? What man or woman have you killed?" And he answered: "O king, I am the son of Gordias, the son of Midas, and I am called Adrastus. I killed my brother unintentionally and I come here driven out by my father and deprived of everything."

Croesus answered him with these words: "You happen to be from a family of friends, and you have come to friends where you will want for nothing while you remain with us. It will be most beneficial to you to bear this misfortune as lightly as possible." So Adrastus lived in the palace of Croesus.

At this very same time a great monster of a boar appeared in Mysian Olympus, and he would rush down from this mountain and destroy the lands of the Mysians; often the Mysians went out against him but did him no harm and rather suffered from him. Finally messengers of the Mysians came to Croesus and spoke as follows: "O king, the greatest monster of a boar has appeared in our country and destroys our lands. We are not able to capture him despite our great effort. Now then we beseech you to send your son to us and with him a picked company of young men and dogs so that we may drive him out of our land."

They made this plea, but Croesus remembering the dream spoke the following words: "Do not mention my son further; for I will not send him to you; he is newly married and this now is his concern. I shall, however, send along a select

group of Lydians and all my hunting equipment and hounds, and I shall order them as they go to be most zealous in helping you drive the beast from your land."

This was his answer, and the Mysians were satisfied with it when the son of Croesus, who had heard their request, broke in on them. Croesus still refused to send his son along with them and the young man spoke to him as follows: "O father, previously the finest and most noble pursuits were mine—to win renown in war and in the hunt. But now you have barred me from both, although you have not seen any lack of spirit or cowardice in me. Now how must I appear in the eyes of others as I go to and from the agora? What sort of man will I seem to my fellow citizens, what sort to my new bride? What kind of husband will she think she has married? So either let me go to the hunt or explain and convince me that it is better for me that things be done as you wish."

Croesus answered with these words: "My child, I do not do this because I have seen in you cowardice or any other ugly trait, but the vision of a dream stood over me in sleep and said that your life would be short; for you will die by means of the sharp point of an iron weapon. And so in answer to the vision I urged this marriage on you and do not send you away on the present enterprise, being on my guard if in any way I might be able to steal you from fate for my own lifetime. For you happen to be my one and only child; for the other boy is deaf and I do not count him as mine."⁹

The young man answered: "O father, I forgive you for taking precautions for me since you have seen such a vision. But you do not understand; the meaning of the dream has escaped you and it is right for me to explain. You say that the dream said that I would die by the point of an iron weapon. But what sort of hands does a boar have? And what sort of iron point that you fear? For if it said that I would die by a tusk or tooth or some other appropriate attribute, you should do what you are doing. But as it is, the instrument is a weapon's point; and so then let me go since the fight is not against men."

Croesus answered: "My child, you have won me over with your interpretation of the dream; and so since I have been won over by you I reverse my decision and let you go to the hunt."

After these words Croesus sent for the Phrygian Adrastus; when he arrived he spoke as follows to him: "Adrastus, I did not reproach you when you were struck down by an ugly misfortune, I cleansed you, received you in my palace, and offered you every luxury. Now then since you owe me good services in exchange for those that I have done for you, I ask that you be a guardian of my boy while he hastens out to the hunt, in case some malicious robbers turn up on the journey to do you harm. Furthermore you should go where you will become famous for your deeds, for it is your hereditary duty and you have the strength and prowess besides."

Adrastus answered: "Ordinarily I would not go out to this kind of contest, for it is not fitting that one under such a misfortune as mine associate with companions who are faring well, nor do I have the desire and I should hold myself back for many reasons. But now, since you urge me and I must gratify you (for I owe you a return for your good services), I am ready to do this; expect that your boy, whom you order me to guard, will come back home to you unharmed because of his guardian."

This was the nature of his answer to Croesus, and afterward they left equipped with a band of picked young men and dogs. When they came to the mountain Olympus they hunted the wild beast, and after they had found him they stood in a circle round about and hurled their weapons. Then the stranger, the guest and friend who had been cleansed of murder, who was called Adrastus, hurled his javelin at the boar, but missed him, and hit the son of Croesus, who, struck by the point of the weapon, fulfilled the prediction of the dream; someone ran to Croesus, as a messenger of what had happened, and when he came to Sardis he told him of the battle and the fate of his child.

Croesus was greatly distressed by the death of his son and was even more disturbed because the very one whom he himself had purified had killed him. Overcome by his misfortune, Croesus called terribly on Zeus the Purifier, invoking him to witness that he had suffered at the hands of the stranger and guest-friend; he called on him too as god of the hearth and as god of friendship, giving this same god these different names: god of the hearth because he did not realize that he received in his palace and nourished as a guest the murderer of his son, and god of friendship because he sent him along as a guardian and found him to be his greatest enemy.

Afterward the Lydians arrived with the corpse and the murderer followed behind. He stood before the dead body and stretching forth his hands surrendered himself to Croesus; he bade Croesus slaughter him over the corpse, telling of his former misfortune and how in addition to it he had destroyed the one who had cleansed him, and life for him was not worth living. Croesus heard and took pity on Adrastus although he was enmeshed in so great a personal evil, and he spoke to him: "I have complete justice from yourself, my guest and friend, since you condemn yourself to death. You are not the one responsible for this evil (except insofar as you did the deed unwillingly), but some one of the gods somewhere who warned me previously of the things that were going to be."

Croesus now buried his son as was fitting; and Adrastus, the son of Gordias, the son of Midas, this murderer of his own brother and murderer of the one who purified him, when the people had gone and quietness settled around the grave, conscious that he was the most oppressed by misfortune of mankind, slaughtered himself on the tomb.

Croesus' personal and domestic tragedy was compounded by his political downfall. Daily the power of Cyrus the Great and the Persians was growing; and as they extended their empire to the west, Croesus' own kingdom of Lydia eventually was absorbed. In this crisis, Croesus consulted various oracles and came to believe that the one of Apollo at Delphi alone could speak the truth. He sent magnificent offerings to Delphi and inquired of the oracle whether or not he should go to war with the Persians. The Delphic reply is perhaps the most famous oracle of all time, typically ironic in its simple ambiguity: if Croesus attacked the Persians he would destroy a mighty empire. Croesus, of course, thought he would destroy the empire of the Persians; instead he brought an end to his own. Through Croesus' suffering the wisdom of Solon was confirmed. Herodotus tells of the fall of Sardis (the capital of Lydia) and the fate of

Croesus, its king, and his other son," a fine boy except that he could not speak" (1. 85–88):

When the city was taken, one of the Persians made for Croesus to kill him, not knowing who he was; now Croesus saw the man coming but he did not care, since in the present misfortune it made no difference to him if he were struck down and died. But the boy, this one who was mute, when he saw the Persian attacking, through fear of the terrible evil that was to happen broke into speech and cried: "Soldier, do not kill Croesus." This was the first time that he had uttered a sound but afterward he could speak for the rest of his life.

The Persians then held Sardis and took Croesus himself captive after he had ruled for fourteen years and been besieged for fourteen days, and as the oracle predicted, he brought to an end his own mighty empire. The Persians took Croesus and led him to Cyrus, who had a great pyre erected and ordered Croesus bound in fetters to mount it and along with him twice seven children of the Lydians. Cyrus intended either to offer them as the first fruits of the booty to some one of the gods, perhaps in a desire to fulfill a vow, or having learned that Croesus was a god-fearing man placed him on the pyre wishing to see if any of the gods would save him from being burned alive. At any rate this is what Cyrus did, but to Croesus as he stood on the pyre came the realization (even though he was in such sore distress) that the words of Solon had been spoken under god's inspiration: "No one of the living is happy!"

As this occurred to him he sighed and groaned and broke the lengthy silence by calling out three times the name of Solon. When Cyrus heard this he bade interpreters ask Croesus who this was whom he invoked, and they came up and asked the question. For a time Croesus did not answer, but eventually through compulsion he said: "The man I should like at all costs to converse with every tyrant."

Since his words were unintelligible to them, they asked again and again what he meant; annoyed by their persistence, he told how Solon the Athenian first came to him, and after having beheld all his prosperity made light of it by the nature of his talk, and how everything turned out for him just as Solon had predicted, with words that had no more reference to Croesus himself than to all human beings and especially those who in their own estimation considered themselves to be happy. As Croesus talked, the fire was kindled and began to burn the outer edges of the pyre.

When Cyrus heard from his interpreters what Croesus had said, he changed his mind, reflecting that he too was a human being who was surrendering another human being while still alive to the fire; besides he feared retribution, and realizing how nothing in human affairs is certain and secure, he ordered the burning fire to be quenched as quickly as possible and Croesus and those with him taken down from the pyre. And they made the attempt but were unable to master the flames.

Then, according to the Lydian version of the story, when Croesus learned of Cyrus' change of heart as he saw all the men trying to put out the fire but no longer able to hold it in check, he shouted aloud calling on Apollo, if ever he had received from him any gift that was pleasing, to stand by him and save him

from the present evil. In tears he called on the god and suddenly out of the clear and calm atmosphere storm clouds rushed together, burst forth in violent torrents of rain, and quenched the fire.

Thus Cyrus knew that Croesus was beloved by god and a good man. He brought him down from the pyre and asked: "Croesus, what man persuaded you to march against my land and become my enemy instead of my friend?" And he answered: "O king, these things I have done are to your good fortune but my own misfortune. The god of the Hellenes is responsible since he incited me to war. For no one is so senseless as to prefer war instead of peace. In time of peace sons bury their fathers, but in war fathers bury their sons. But it was somehow the pleasure of the gods that this be so." These were his words, and Cyrus released him and sat by his side and held him in great respect, and both he and all those around him looked on him with wonder.

Thus Croesus became the wise and benevolent counselor of Cyrus. In the concluding pages of this minisaga (Herodotus 1. 90–91), Croesus sends to inquire of the priestess of Apollo why the oracle had misled him. "It is impossible even for god to escape destined fate," the priestess replies, and then tells of the ways in which Apollo indeed tried to ameliorate Croesus' fated misfortune.

 Apollo saved him from burning. And it was not right that Croesus find fault with the oracle that he received. For Apollo warned that if he marched against Persia he would destroy a great empire. He should, if he were going to act wisely with respect to this reply, have sent again to ask whether his own empire or that of Cyrus was meant. If he did not understand the reply and he did not press the question, he should see himself as the one to blame. . . . When he [Croesus] heard he agreed that it was his own fault and not that of the god.

The story of Croesus was also narrated in a poem by the lyric poet Bacchylides of Ceos, written in 468. In this version, Croesus himself ordered the pyre to be lit but Zeus extinguished the fire and Apollo took Croesus to live happily forever among the Hyperboreans as a reward for his piety.

HERODOTUS AS MYTH HISTORIAN

The Herodotean account gives us a glimpse into the fascinating world of legendary history. How can one possibly with complete confidence isolate the facts from the fiction in the epic context of Herodotus' literary art? The name of Croesus' son Atys means "the one under the influence of Ate" (a goddess of doom and destruction), and he has links, too, in cult and in story, with Attis and Adonis. Adrastus may be connected to the mythological concept of Nemesis or Adrasteia ("Necessity"), and the name Adrastus can be translated "the one who cannot escape," that is, "the one who is doomed." Incidents in the tale recall those of the legendary Calydonian boar hunt. Is there anyone today who has enough faith in miracles to believe that Apollo saved Croesus from a fiery death?

Yet there *are* parts of the myth that perhaps may be true. Despite chronological problems, Solon could have met Croesus, although not at the time Herodotus imagines;¹⁰ Croesus may have had a son who died young. But the mythographer and historian Herodotus could never be satisfied with this prosaic truth alone. His stories (wrought with exquisite art) must illustrate a different level of emotional and spiritual truth that illuminates character and elu-

OTHER LEGENDARY FOLKTALES IN HERODOTUS:
GYGES, ARION, AND POLYCRATES

There are many other important and entertaining mythical legends, with folktale motifs, in Herodotus' *History*; although the choice is difficult, we single out three other examples.

Candaules, king of Lydia, continually boasted that his wife was the most beautiful woman in the world. He wanted to convince his favorite bodyguard, Gyges, that this claim was no exaggeration and so he arranged that Gyges should see his wife naked, without her knowledge. She, however, became aware of the great insult (it is most shameful among the Lydians for even a man to be seen naked). In revenge, she plotted with Gyges, who was forced to kill Candaules and win the throne and the queen for himself (1. 10–13).¹¹

Arion, a lyre-player and poet, was credited with the introduction of the dithyramb, a choral song associated with the god Dionysus. His story is not unlike that of Dionysus and the pirates (p. 296); he was threatened by robbers in a boat and was rescued from death in the sea by a dolphin, on whose back he was conveyed safely to land (1. 23–24).

Finally, an episode in the life of Polycrates, tyrant of Samos, echoes dramatically the Herodotean philosophy found in the legend of Solon and Croesus. Polycrates, like Croesus, continued to attain vast wealth and great power. His friend, king Amasis of Egypt, expressed troubled concern to Polycrates that his unbridled successes might eventually lead to disaster, since divinity is jealous of prosperity untempered by misfortune. He advised the tyrant to cast far away his most valued and prized possession, so that it might never appear again among human beings. Polycrates chose a beloved work of art, a precious gold ring with an emerald. He himself in a boat threw it way out into the sea and went home to weep at his loss. Five or six days later, a fisherman came proudly to the palace and presented to the tyrant a magnificent fish that he had caught. As the fish was being prepared for dinner, the ring of Polycrates was found in its belly. When Amasis learned what had happened to Polycrates he realized that one cannot help another avoid what is fated and that Polycrates' life would not end well because he had found what he had tried to cast away forever. Indeed, Polycrates ultimately was murdered by a villainous Persian named Oroetes (3. 39–40ff).

cidates philosophy. The life of Tellus the Athenian, the happiest of men, reveals the character and the values of those Greeks who fought and won in great battles like that of Marathon, defending their country against the Persian invaders in the first quarter of the fifth century B.C.; god will punish their king Xerxes for his sinful hubris, just as he did Croesus, Xerxes' prototype. Herodotus explains through his manipulation of traditional tales (military numbers, strategy, and "facts" will come later) why the Greeks defeated the Persians. These are truths, too, but of another order, and they are the essence of mythic art.

NOTES

1. Nymphs are sometimes classified as follows: the spirits of waters, springs, lakes, and rivers are called Naiads; Potamiads are specifically the nymphs of rivers; tree-nymphs are generally called Dryads or Hamadryads, although their name means "spirits of oak trees" in particular; Meliae are the nymphs of ash trees.
2. The mortal parent may bask in the grand aura of the great mythological age of saga and boast of a genealogy that in the not too distant past included at least one divine ancestor.
3. Jack Miles, *God: A Biography* (New York: Alfred A. Knopf, 1995), especially pp. 397–408.
4. Her name was Cydippe and she was a priestess of Hera, hence the necessity for her presence at the festival. The temple would be the Argive Heraeum.
5. Herodotus here uses the masculine article with the Greek word for god (not goddess), *ho theos*. He seems to be thinking of one supreme god or more abstractly of a divine power. Significantly she does not refer to Hera specifically, although subsequently it is to the goddess Hera that the mother prays on behalf of her sons.
6. These statues have been excavated and do much to tantalize in the quest for precise distinctions between myth and history in Herodotus' account.
7. That is, human beings are entirely at the mercy of what befalls them.
8. The ritual entailed, at least partly, the slaying of a suckling pig and the pouring of the blood over the hands of the guilty murderer, who sat in silence at the hearth while Zeus was invoked as the Purifier.

9. These words of Croesus at first may strike the modern reader as extremely cruel, but he means only that he cannot consider the other boy, who is deaf and mute, as his son in the same way. We are told elsewhere that Croesus did everything for the unfortunate boy, but his hopes, both domestic and political, rested in Atys.
10. Solon held office in Athens as archon extraordinary in 594, and his travels took place at some time after that date; his death occurred in the years following 560. Croesus did not become king of Sardis until ca. 560, and he was defeated by Cyrus in 546.
11. For a modern retelling of the myth of Gyges and Candaules, see Frederic Raphael, *The Hidden I: A Myth Revisited*, with original drawings by Sarah Raphael (London: Thames and Hudson, 1990).

POSEIDON, SEA DEITIES, GROUP DIVINITIES, AND MONSTERS

Poseidon, best known as the great god of waters in general and of the sea in particular, was by no means the first or only such divinity. As we have seen, Pontus (the "Sea") was produced by Ge in the initial stages of creation; and two of the Titans, Oceanus and Tethys, bore thousands of children, the Oceanids. In addition Pontus mated with his mother, Ge, and begat (among other progeny, discussed later in this chapter) Nereus, the eldest of his children, who was gentle, wise, and true, an old man of the sea with the gift of prophecy. Nereus in turn united with Doris (an Oceanid) who bore him fifty daughters, the Nereids; three of these mermaids should be singled out: Thetis, Galatea, and Amphitrite.

PELEUS AND THETIS

We have already mentioned that Thetis was destined to bear a son mightier than his father. Zeus learned this secret from Prometheus and avoided mating with Thetis; she married instead a mortal named Peleus, who was hard pressed to catch his bride. For Thetis possessed the power of changing shape and transformed herself into a variety of states (e.g., a bird, tree, tigress) in rapid succession, but eventually she was forced to succumb. Peleus and Thetis celebrated their marriage with great ceremony (although she later left him; see p. 605), and their son Achilles did indeed become mightier than his father.

ACIS, GALATEA, AND POLYPHEMUS

Galatea, another Nereid, was loved by the Cyclops Polyphemus, a son of Poseidon. Ovid's account (*Metamorphoses* 13. 750–897) presents a touching rendition of their story, playing upon the incongruity of the passion of the monstrous and boorish giant for the delicate nymph. Repelled by his attentions, she loved Acis, handsome son of Faunus and a sea-nymph, Symaethis, daughter of the river-god, Symaethus, in Sicily. Overcome by emotion, Polyphemus attempted to mend his savage ways; he combed his hair with a rake and cut his beard with a scythe.

Ovid's Galatea tells how the fierce Cyclops would sit on the cliff of a promontory jutting out to the sea, where he would lay down his staff (a huge pine-trunk

Nereid, by Georges Braque (1882–1963). Incised plaster, 1931–1932; $73\frac{1}{4} \times 51$ in. This is part of a series of mythological figures incised on large slabs of black-painted plaster. A Nereid (whose name, SAO, is added in Greek letters) rides upon a sea horse, while curving lines, reminiscent of ancient Greek and Etruscan techniques of engraving, represent other marine animals and the waves. (Foundation Marguerite et Aimée Maeght, 06570 St. Paul, France. © 1994 Artists Rights Society [ARS], New York/ADAGP, Paris.)

the size of a ship's mast) and take up his pipe of a hundred reeds. Hiding below in the arms of her beloved Acis, Galatea would listen to his song. First he would extravagantly describe her magnificent beauty, then bitterly lament her adamant rejection of him and continue with an offer of many rustic gifts. His tragicomic appeal concludes as follows (839–897):

 "Now Galatea, come, don't despise my gifts. Certainly I know what I look like; just recently I saw myself in the reflection of a limpid pool, and I was pleased with the figure that I saw. Look at what a size I am! Jupiter in the sky doesn't have a body bigger than mine—you are always telling me that someone or other named Jove reigns up there. An abundance of hair hangs over my rugged features and, like a grove of trees, overshadows my shoulders; and don't think my body ugly because it bristles with the thickest and coarsest of hair. A tree without leaves is ugly; ugly is a horse, if a bushy mane doesn't cover its tawny neck; feathers cover birds and their own wool is an adornment for sheep; for a man a beard and shaggy hair are only fitting. So there is one eye in the middle of my forehead. What of it? Doesn't the great Sun see all these things here on earth from the sky? Yet the Sun has only a single eye.

"Furthermore, my father Neptune rules over your waters and he is the one I give you as a father-in-law. Only have pity and listen to the prayers of my supplication! I succumb to you alone. I am scornful of Jove, of his sky and his devastating thunder; but I am afraid of you; your wrath is more deadly than his thunderbolt.

"I should better endure this contempt of yours, if you would run away from everybody; but why do you reject me and love Acis? Why do you prefer Acis to my embraces? Yet he may be allowed to please himself and you as well—but I don't want him to be pleasing to you! Just let me have the chance. He will know then that my strength is as huge as the size of my body. I'll tear out his living innards and I'll scatter his dismembered limbs over the land and the waves of your waters—in this way may he mingle in love with you! For I burn with a fiery passion that, upon being rejected, flames up the more fiercely and I seem to carry Mt. Aetna, with all its volcanic force, buried in my breast. And you, Galatea, remain unmoved."

After such complaints made all in vain, he rose up (for I saw it all) and was unable to stand still, but wandered the woods and his familiar pastures, like a bull full of fury when his cow has been taken away from him. Then the raging Cyclops saw me and Acis, who were startled by such an unexpected fright. He shouted, "I see you and I'll make this loving union of yours your last." That voice of his was as great as a furious Cyclops ought to have; Aetna trembled at his roar. But I was terrified and dove into the waters nearby. My Symaethian hero, Acis, had turned his back in flight and cried, "Bring help to me, Galatea, help, my parents, and take me, about to die, to your watery kingdom!"

The Cyclops, in hot pursuit, hurled a section torn out of the mountain. Although only a mere edge of that jagged mass struck Acis, it buried him completely; but it was through me that Acis appropriated to himself the watery

Poseidon (Neptune) and Amphitrite with Their Attendants. Relief from the "Altar of Domitianus Ahenobarbus," ca. 100 B.C.; marble, $30\frac{1}{2} \times 220$ in. The frieze, part of the base of a monument (not of an altar), shows Poseidon (Neptune) and Amphitrite drawn in their chariot by sea-serpents: before them Triton blows his conch-shell and another Triton plays a lyre. To the left a Nereid, riding upon a sea-horse, carries a torch, and a cupid flies off to the left. This relief should be compared with Poussin's painting of the same scene (see Color Plate 13). (Munich, *Staatliche Antikensammlung: Glyptothek.*)

power of his ancestry—the only solution allowed by the Fates. Red blood began to trickle from out the mass that had buried him, and in a short time the red of the blood began to disappear and it became the color of a stream made turbid by an early rain, and in a while the water cleared. Then the mass that had been thrown upon him split open and, through the cleft, a reed, green and slender, rose up and the hollow opening in the rock resounded with the leaping waves. Suddenly a wonderful thing happened—up to his waist in the midst of the waves there stood a youth, the sprouting horns on his brow wreathed with pliant reeds. Except that he was bigger and his whole face the bluish green of water, this was Acis indeed turned into a river-god.

POSEIDON AND AMPHITRITE

The third Nereid, Amphitrite, is important mainly as the wife of Poseidon; like her sister Thetis she proved a reluctant bride, but Poseidon finally was able to win her. As husband and wife they play roles very much like those enacted by Zeus and Hera; Poseidon has a weakness for women, and Amphitrite, with good cause, is angry and vengeful. They had a son, Triton, a merman, human above the waist, fish-shaped below. He is often depicted blowing a conch shell, a veritable trumpeter of the sea; he can change shape at will (see Color Plate 13).

PROTEUS

The sea divinity Proteus, probably another of the older generation of gods, is often named as the attendant of Poseidon or even as his son. Like Nereus, he is an old man of the sea who can foretell the future; he can also change shape. It is easy to see how the identities of Nereus, Proteus, and Triton could be merged. Confusion among sea divinities and duplication of their characteristics are everywhere apparent.¹

Neptune and Triton. By G-L. Bernini (1598–1680); marble, 1619, height 71½ in. Neptune (Poseidon) is shown striding forward angrily, supported by Triton blowing his conch. The scene is based on Ovid's description of the Flood (see Chapter 4: "Neptune struck the earth with his trident"). The statue stood above a pond in the gardens of the Roman villa of Cardinal Montalto, nephew of Pope Sixtus V. (London, Victoria and Albert Museum.)

THE APPEARANCE AND CHARACTER OF POSEIDON

Poseidon is similar in appearance to his brother Zeus, a majestic, bearded figure, but he is generally more severe and rough; besides, he carries the trident, a three-pronged fork resembling a fisherman's spear. By his very nature Poseidon is ferocious. He is called the supporter of the earth but the earthshaker as well, and as a god of earthquakes he exhibits his violence by the rending of the land and the surge of the sea. By a mere stroke of his trident he may destroy and kill. Ovid provides a typical description in his version of the Flood (see p. 95), providing a vivid characterization of Poseidon under his Roman name of Neptune. Poseidon's relentless anger against Odysseus for the blinding of Polyphemus provides a dominant theme in the *Odyssey*. The *Homeric Hymn to Poseidon* (22) attempts to appease his anger.

 About Poseidon, a great god, I begin to sing, the shaker of the earth and of the barren sea, ruler of the deep and also over Mt. Helicon and the broad town of Aegae.² A double honor, the gods have allotted to you, O Earthshaker—to be both a tamer of horses and a savior of ships. Hail, dark-haired Poseidon, who surround the earth and, O blessed god, be of kind heart and protect those who sail your waters.

The origins of Poseidon are much disputed. If his trident represents what was once a thunderbolt, then he was in early times a god of the sky. More attractive is the theory that he was once a male spirit of fertility, a god of earth who sent up springs. This fits well with his association with horses and bulls (he either creates them or makes them appear) and explains the character of some of his affairs. He mated with Demeter in the form of a stallion; he pursued her while she was searching for her daughter, and her ruse of changing into a mare to escape him was to no avail. Thus we have the union of the male and female powers of the fertility of the earth.³ It nevertheless should be remembered that standard epithets of the sea are "barren" and "unharvested" as opposed to the fecundity of the land. The suggestion that Poseidon's horses are the mythical depiction of the whitecaps of the waves is not convincing, at least in terms of origins.

The important story of the contest between Poseidon and Athena for control of Athens and its surrounding territory, Attica, is told in Chapter 8 in connection with the sculpture of the west pediment of the Parthenon.

SCYLLA AND CHARYBDIS

Poseidon made advances to Scylla, the daughter of Phorcys and Hecate. Amphitrite became jealous and threw magic herbs into Scylla's bathing place. Thus Scylla was transformed into a terrifying monster, encircled with a ring of dogs' heads; Ovid's different version of Scylla's transformation (*Metamorphoses* 13. 917–968; 14. 1–71) is more well known: Glaucus, a mortal who had been changed into a sea-god, fell in love with Scylla; when he was rejected, he turned to the

Figure 7.1. Descendants of the Sea

sorceress Circe for help. But Circe fell in love with him and, in her jealousy, poisoned the waters of Scylla's bathing place.

Scylla's home was a cave in the Straits of Messina between Sicily and Italy. With her was Charybdis, the daughter of Poseidon and Ge, a formidable and voracious ally whom Zeus had cast into the sea by his thunderbolt; three times a day she drew in mountains of water and spewed them out again. Scylla and Charybdis have been rationalized into natural terrors faced by mariners when they sailed through the straits. Certainly many of the tales about the gods of the waters are reminiscent of the yarns spun by fishermen, sailors, and the like, whose lives are involved with the sea and with travel.

THE PROGENY OF PONTUS AND GE

Pontus and Ge produced legions of descendants. Notice how elements of the fantastic and the grotesque appear again and again in the nature of the progeny associated with the sea and the deep.

In addition to Nereus, Pontus and Ge had two more sons, Thaumas and Phorcys, and two daughters, Ceto and Eurybië. Thaumas mated with Electra (an Oceanid) to produce Iris and the Harpies. Iris is the goddess of the rainbow (her name means "rainbow"). She is also a messenger of the gods, sometimes the particular servant of Hera, with Hermes' offices then confined to Zeus. She is fleet-footed and winged, as are her sisters, the Harpies, but the Harpies are much more violent in nature. In early sources, they are conceived of as strong winds (their name means "the snatchers"), but later they are depicted in literature and in art as birdlike creatures with the faces of women, often terrifying and a pestilence.⁴

Phorcys and his sister Ceto produce two groups of children, the Graeae and the Gorgons. The Graeae (Aged Ones) are three sisters, personifications of old age; their hair was gray from birth, but in their general aspect they appeared swanlike and beautiful. They had, however, only one eye and one tooth, which they were forced to share among themselves.

The Graeae knew the way to their sisters, the Gorgons, also three in num-

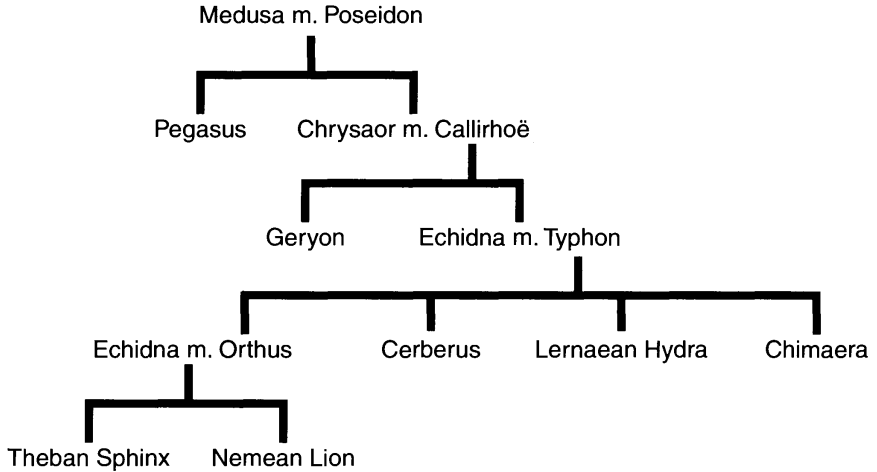

Figure 7.2. Descendants of Medusa

ber (Stheno, Euryale, and Medusa), whose hair writhed with serpents. They were of such terrifying aspect that those who looked upon them turned to stone. Gorgons are a favorite theme in Greek art, especially in the early period; they leer out most disconcertingly with a broad archaic smile, tongue protruding in the midst of a row of bristling teeth. Medusa is the most important Gorgon; Poseidon was her lover. She presents the greatest challenge to the hero Perseus (see pp. 509–511), and when he beheaded her, she was pregnant; from her corpse sprang a winged horse, Pegasus, and a son, Chrysaor (He of the Golden Sword).

Phorcys and Ceto also bore a dragon named Ladon; he helped the lovely Hesperides (Daughters of Evening), who guarded a wondrous tree on which grew golden fruit, far away in the west, and passed their time in beautiful singing. Heracles slew Ladon when he stole the apples of the Hesperides (see p. 528).

Chrysaor mated with an Oceanid, Callirhoë, and produced the monsters Geryon and Echidna (half nymph and half snake). Echidna united with Typhon and bore Orthus (the hound of Geryon), Cerberus (the hound of Hades), the Lernaean Hydra, and the Chimaera. Echidna and Orthus produced the Theban Sphinx and the Nemean Lion. These monsters will appear later in saga to be overcome by heroes; many of them are particularly associated with the exploits of Heracles (see Chapter 22).

INTERPRETATIVE SUMMARY

The stories about waters of all sorts—rivers, lakes, the ocean, and the seas—and the deities associated with them are numerous and revealing. They remind us of how important travel by sea was to the Greeks and Romans and how control of the seas, particularly the Mediterranean, was the key to power. The thal-

socracy (sea-power) of Minoan Crete makes this perfectly clear, as does the subsequent dominance of the Mycenaeans, the inheritors of Cretan control. Subsequently the naval empire of Periclean Athens confirms the vital importance of sea-power, and so does the mighty empire acquired by the Romans, for whom their Mediterranean "lake" was the central focus.

That there were two major periods in the initial creation of Greek mythology is made evident by the nature and extent of the travels of the seafarers, Theseus, Jason, Odysseus, and the survivors of the Trojan War in Minoan-Mycenaean times, with the conflation of geographical and historical events belonging to the historical age of colonization after 1100 B.C. From both periods evolved the turbulent and romantic tales about the various facets of waters and their deities and the sea monsters to be overcome by heroes.

We have shown Poseidon, the major god of the sea, to be characterized by ferocity and violence. He is "the earthshaker," a deity of storms and earthquakes. His powers are made evident by his association with bulls and horses. He is the father of the monstrous Cyclops, Polyphemus, and his inexorable anger is a major theme of Homer's *Odyssey*. Poseidon lost to the goddess Athena in a contest for control of Athens, as we shall see in the next chapter. Yet the Athenians, great seafarers themselves, continued to give him great honor, and linked him particularly to their ancient king Erechtheus and his beautiful temple on the Acropolis. Poseidon was also said to be the true father of Theseus, the great national hero of Athens, through the human figure of Aegeus, an Athenian king, who gives his name to the Aegean Sea.

Tales about waters are often yarns spun by sailors, full of abounding imagination, exciting adventure, and wondrous embellishment, embracing both the beautiful and the grotesque. Witness the fantastic variety in the character and appearance of the progeny of the sea. Poseidon is, like his domain, relentless and prone to stormy violence and anger. Yet gods such as Nereus and Proteus, profoundly wise, appear as ageless as the impenetrable sea itself. Still other deities mirror the unpredictable beauty and fascinating lure of the mysterious deep: the lovely mermaids, who can change shape and mood at will; the beguiling Sirens with their bewitching, lethal song; and monstrous Scylla and Charybdis, who bring terror, destruction, and death.

NOTES

1. There are two classic accounts of Proteus' nature and his powers: those of Homer (*Odyssey* 4. 363–570) and Vergil (*Georgics* 4. 386–528). In Homer, Menelaüs, on his way

home from Troy, was unduly detained off the coast of Egypt; he consulted Proteus, the old man of the sea, with the help of Proteus' daughter Eidothea. Menelaüs explains: "We rushed upon him with a shout and threw our arms about him; but the old man did not forget his devious arts. First off he became a thickly maned lion, and then a serpent, a leopard, and a great boar. And he became liquid water and a tree with lofty branches. But we held on to him firmly with steadfast spirits." Finally the devious Proteus grew weary and answered Menelaüs' questions about his return home.

2. Poseidon Heliconius was worshiped by Ionian Greeks, especially at Mycale in Asia Minor. It is uncertain whether the reference in the hymn to Helicon (from which Heliconius is derived) means Mt. Helicon (in Boeotia) or the town of Helice; Helice and Aegae were both on the Corinthian gulf.
3. The result is the birth both of a daughter and of the wonderful horse Arion, which belonged to the Theban Adrastus. Similarly Poseidon united with Ge to produce Antaeus, a giant encountered by Heracles.
4. The horrifying Harpies are not unlike the beautiful Sirens, who lure human beings to destruction and death by the enticement of their song.

ATHENA

THE BIRTH OF ATHENA

The *Homeric Hymn* (28) tells the story of Athena's birth.

☞ I begin to sing about Pallas Athena, renowned goddess, with bright eyes, quick mind, and inflexible heart, chaste and mighty virgin, protectress of the city, Tritogeneia. Wise Zeus himself gave birth to her from his holy head and she was arrayed in her armor of war, all-gleaming in gold, and every one of the immortals was gripped with awe as they watched. She quickly sprang forth from the immortal head in front of aegis-bearing Zeus, brandishing her sharp spear. And great Olympus shook terribly at the might of the bright-eyed goddess, and the earth round about gave a dread groan and the dark waves of the deep seethed. But suddenly the sea became calm, and the glorious son of Hyperion halted his swift-footed horses all the while that the maiden Pallas Athena took the divine armor from her immortal shoulders, and Zeus in his wisdom rejoiced.

So hail to you, child of aegis-bearing Zeus; yet I shall remember both you and another song too.

Hesiod (*Theogony* 886–898) tells how Zeus had swallowed his consort Metis (her name means “wisdom”) after he had made her pregnant with Athena; he was afraid that Metis would bear a son who would overthrow him.

☞ Zeus, king of the gods, first took as his wife Metis, who was very wise indeed among both gods and mortals. But when she was about to give birth to the bright-eyed goddess Athena, then Zeus treacherously deceived her with wheedling words and swallowed her down into his belly at the wise instigations of Gaea and starry Uranus. These two gave Zeus this advice so that no other of the eternal gods might rule supreme as king in his place. For Metis was destined to bear exceptional children: first, the keen-eyed maiden Athena, Tritogeneia, the equal of her father in might and good counsel, and then she was to give birth to a son of indomitable spirit who would become the king of both gods and mortals.

Variations in the story of Athena's birth have Hephaestus split Zeus' head open with an axe to facilitate the birth.¹ Some add to the dread awe of the occasion by having Athena cry out thunderously as she springs to life in full panoply. This myth (whatever its etiology in terms of the physical manifesta-

The Birth of Athena. Detail of an Athenian black-figure amphora, sixth century B.C.; height 15½ in. Athena emerges fully armed from the head of Zeus, who is seated on his throne holding the thunderbolt. At the left stand Hermes and Apollo (with his kithara), and to the right are Eileithyia, gesturing toward the newborn goddess whose birth she has assisted, and Ares. Beneath the throne is a sphinx. (Henry Lillie Pierce Fund. Courtesy, Museum of Fine Arts, Boston.)

tions of the thunderstorm) establishes the close bond between Zeus and his favorite daughter and allegorizes the three basic characteristics of the goddess Athena: her prowess, her wisdom, and the masculinity of her virgin nature sprung ultimately not from the female, but from the male.

THE SCULPTURE OF THE PARTHENON

The Parthenon was the great temple to Athena Parthenos (*parthenos*, meaning “virgin,” was a standard epithet of Athena) on the Acropolis at Athens. It was built between 447 and 438 B.C. and embodied the triumph of Greek (and specifically Athenian) courage and piety over the Persians, who had sacked the Acropolis in 480 and destroyed the Old Parthenon. Like the temple of Zeus at Olympia (described on pp. 113–115), the Parthenon was decorated with a complex program of sculpture in which mythology and religion glorified the city and its gods, above

all honoring Athena, whose great statue was housed in the temple. The whole program was directed by Pheidias, creator of the statue of Zeus at Olympia.

The east pediment of the Parthenon immortalized the dramatic moment of the birth of Athena, who stood in the center before the throne of Zeus, from whose head she had just sprung full grown and fully armed. Hephaestus, who had assisted in the birth, and Hera were probably present, while the announcement of the birth was brought to other divine figures waiting to observe the miracle. At the corners, to set the divine event in cosmic time, were the horses of Helios, rising from the sea, and of Selene, sinking into it.

As at Olympia, the west pediment was a scene of violent action, celebrating the victory of Athena in her contest with Poseidon for control of Athens and Attica. The central figures pull away from each other as they produce the gifts with which they vied, and to each side were figures of divinities and heroic kings of early Athens who attended the contest. Athena with her spear created an olive tree; Poseidon with his trident, a salt spring. Athena was proclaimed victor.² Poseidon continued to be worshiped (in conjunction with the Athenian hero Erechtheus) in the nearby sanctuary of the Erechtheum (described on pp. 550–551).³ There the marks of Poseidon's trident were enshrined and Athena's olive tree continued to grow.

There were two friezes on the Parthenon. The exterior Doric frieze consisted of ninety-two metopes (each 1.2 meters high), thirty-two on each of the long sides

Figure 8.1. Plan of the Parthenon (After J. Travlos)

Figure 8.2. Sectional Drawing of the East End of the Parthenon Showing Relationship of Frieze, Metopes, and Pediment (After N. Yalouris)

and fourteen on the short ones. On the south were reliefs of the battle of the Lapiths and Centaurs, also the subject of the west pediment of the temple of Zeus at Olympia. On the north side the subject was probably the sack of Troy, while on the east it was the Gigantomachy (the battle of the Olympian gods against the giants), and on the west the battle of the Greeks and the Amazons. Thus the mythical themes of the metopes reinforced the idea of the triumph of Greek courage over the barbarians and of the Greek gods over their predecessors.

The second, Ionic, frieze ran continuously round the outer wall of the cella, or naos (the interior part of the temple that housed the statue of Athena and the treasury). It has been generally thought (at least since the eighteenth century) that this frieze shows the people of Athens moving in procession as they cele-

brate the festival of the Panathenaea in honor of their goddess. Athenian men and women are shown as marshals, attendants, horsemen, hoplites, and assistants in the worship of Athena, along with the animals for the ritual sacrifice.⁴ At the climax of the procession, on the east side (i.e., over the entrance to the part of the cella housing the statue) the ceremonial robe (*peplos*) was presented to the priestess of Athena,⁵ and nearby sat the Olympian immortals enthroned, taking part in the joyous celebration of civic piety.⁶

In the cella of the Parthenon stood a monumental statue, the Athena Parthenos. The original by Pheidias is completely lost, but reconstructions (like the one illustrated on p. 162) may be made with some accuracy.⁷ Like Pheidias' later masterpiece at Olympia, the surfaces of the statue were made of gold and ivory, and its decoration contained a program related to the architectural sculptures already described that witnessed to the honor and glory of the goddess and the city she protected. It was nearly twelve meters high and in front of it was a reflecting pool. The standing goddess held a figure of Nike (Victory) in her right hand, and her armor included a helmet decorated with sphinxes, the aegis with the head of Medusa, a shield, and a spear, beside which was a serpent (representing the chthonic divinity Erechtheus). The shield was decorated with the battle of the Amazons on the exterior, and the Gigantomachy on the interior; on the rims of her sandals were reliefs of the battle with Centaurs (all themes repeated from the metopes). The relief on the base of the statue showed the creation of Pandora. In the sculpture of the Parthenon, mythology and religion combine with local pride to glorify the gods and civilization of the Greeks and to celebrate the city and its citizens under the protection of Athena.⁸

A DIFFERENT INTERPRETATION OF THE PANATHENAIC FRIEZE

The traditional and convincing interpretation of the Ionic frieze of the Parthenon as depicting a scene from the Panathenaic festival in Athens has been challenged by Joan B. Connelly, who argues that the subject of the frieze is the sacrifice of the daughters of Erechtheus in order to bring victory to the Athenians over Eumolpus, king of Eleusis (this episode in Athenian saga and Euripides' play, *Erechtheus*, are discussed on pp. 550–551). In this case, the *peplos* is the sacrificial robe that the youngest daughter will wear, and her two sisters are the two figures carrying stools at the left. The “priestess of Athena” will then be the priest who will sacrifice the maidens—none other than Erechtheus himself—and the woman to his left will be Praxithea, their mother. In this light, the frieze celebrates the excellence of Athenian women who are prepared to die for their country and it glorifies civic self-sacrifice in defense of the city. Connelly's ingenious and controversial interpretation has not been generally accepted.⁹ The depiction is not of a grim sacrifice but a glorious pageant.

Athena Parthenos. Reconstruction by N. Leipen of the original by Pheidias, 447–438 B.C.; about one-tenth full size. The original cult-statue stood some thirty-eight feet tall, its gold and ivory gleaming in the half-light as the worshiper entered the cella with its double row of columns and reflecting pool. Pheidias focused on the majesty of the city's goddess, and the reliefs on her shield, sandals, and statue-base all are symbols of the victory of order over disorder in the human and divine spheres. The atmosphere of civic grandeur is far from the intimate emotion of the *Mourning Athena*, on p. 168. (Courtesy of the Royal Ontario Museum, Toronto, Canada.)

PALLAS ATHENA TRITOGENEIA

Athena's title, Tritogeneia, is obscure. It seems to refer to a region sometimes associated with her birth, the river or lake Triton, or Tritonis, in Boeotia or in Libya. Some scholars see in this link the possibility that Athena was, at least in her origins, at one time a goddess of waters or of the sea. We are told that soon after her

birth Athena was reared by Triton (presumably the god of this body of water, wherever it may be). Now Triton had a daughter named Pallas, and Athena and the girl used to practice the arts of war together. But on one occasion they quarreled and, as Pallas was about to strike Athena, Zeus intervened on behalf of his daughter by interposing the aegis. Pallas was startled, and Athena took advantage of her surprise and wounded and killed her. Athena was distraught when

Pallas Athena. By Gustav Klimt (1862–1918); oil on canvas, $29\frac{1}{2} \times 29\frac{1}{2}$ in. Klimt focuses on the latent energy of the warrior goddess, while giving a new interpretation to her traditional attributes of helmet, grey eyes, owl, Gorgon and aegis, spear, and Nike (who is painted as a naked woman with red hair). The gold highlights (Klimt was the son of a gold engraver) again reinterpret the gold and ivory of Pheidias' statue. (Vienna, *Historisches Museum der Stadt Wien*.)

she realized what she had done; in her grief she made a wooden image of the girl and decked it with the aegis. Cast down by Zeus, this statue, called the Palladium, fell into the territory of the Trojans, who built a temple to house it in honor. The Palladium in saga carries with it the destiny of the city of Troy. In honor of her friend, Athena took the name Pallas for herself. A more likely etiology is that the word *Pallas* means maiden and is but another designation of Athena's chastity, just as she is called *Parthenos*, "virgin," or (like Persephone) *Kore*, "girl."

ATHENA AND ARACHNE

The famous story of Arachne bears testimony to the importance of Athena as the patroness of women's household arts, especially spinning and weaving. In Ovid's account (*Metamorphoses* 6. 5–145) Athena has, of course, become the Roman Minerva. (See Color Plate 10.)

 Minerva turned her mind to Arachne's destruction, for she had heard that her fame as a worker in wool equaled her own. Arachne's birth and position brought her no distinction—it was her skill that did. Idmon of Colophon was her father, who dyed the thirsty wool with Ionian purple; her mother, who also was of low birth like her husband, had died. Yet their daughter, Arachne, for all that she was born in a lowly family living at lowly Hypaepa, pursued her quest for fame throughout the cities of Lydia by her work.

The nymphs of Tmolus often left their vineyards, the nymphs of Pactolus often left their waters—to see and wonder at Arachne's handiwork. Nor was their pleasure merely in seeing her finished work, but also in observing her at work, such delight was in her skill. Whether at the beginning she gathered the unworked wool into balls, or worked it with her fingers and drew out lengths of fleece like clouds, or with swift-moving thumb turned the smooth spindle, or whether she used her embroidering needle—you would know that Minerva had taught her. Yet she would not admit this; jealous of her great teacher, she said, "Let her compete with me; if she wins I deny her nothing."

Minerva disguised herself as an old woman, white-haired and supporting herself upon a stick, and spoke as follows: "Not everything that old age brings is to be avoided; experience comes with the passing years. Do not despise my advice! Let your ambition be to excel mortal women at weaving; give place to the goddess and pray for her forgiveness for your rash words! She will pardon you if you pray." Arachne glowered at her; leaving her half-finished work and with difficulty restraining herself from blows, she openly showed her anger by her expression, as she attacked disguised Minerva with these words: "You old fool, enfeebled by advanced old age. Too long a life has done you no good! Keep your advice for your sons' wives (if you have any) and your daughter. I can think for myself, and you need not think your advice does any good—you will not change my mind. Why does not the goddess herself come? Why does she refuse to compete with me?"

Then Minerva cried: "She has come!" and throwing off her disguise she showed herself as she was, the goddess Minerva. The nymphs and women of

Athena. Detail from an Attic red-figure amphora by the Andocides Painter, ca. 520 B.C.; height of vase 22½ in. Athena is armed with helmet, spear, and shield, and her aegis is tasseled with snakes, with a Gorgon's head at the center. On the vase she stands at the left watching Heracles and Apollo struggling for the Pythian tripod (see 534–535 and illustration on p. 535). (Staatliches Museum, Berlin, Photograph courtesy of Hirmer Verlag, München.)

Lydia worshiped her divine presence; Arachne alone felt no awe. Yet she blushed; a sudden flush stole over her face in spite of herself and as suddenly faded, like the red glow of the sky when Dawn first glows just before the heavens begin to whiten with the sun's rising. Obstinate she held to her course and rushed to destruction in her foolish desire for the prize. Jupiter's daughter resisted no more; she offered her no more advice; no more did she put off the competition.

Ovid goes on to describe the weaving contest. Each weaves a tapestry at her loom with surpassing skill, depicting scenes from mythology. Minerva displays her contest with Neptune for the lordship of Attica and adds four subordinate scenes of mortals who challenged gods and were turned by them into other shapes. The whole was framed by an olive-tree motif: "with her own tree she concluded her work."

Heedless of the lessons of Minerva's legends, Arachne depicted scenes of the gods' less honorable amorous conquests—where Jupiter, Neptune, Apollo, Bacchus, and Saturn deceived goddesses and mortal women. As she completed her tapestry with a design of trailing ivy, Minerva's anger burst forth. Ovid continues:

 Minerva could find no fault with the work, not even Envy herself could. Angered by Arachne's success, the golden-haired goddess tore up the embroidered tapestry with its stories of the gods' shameful deeds. With the boxwood shuttle she beat Arachne's face repeatedly. In grief Arachne strangled herself, stopping the passage of life with a noose. Minerva pitied her as she was hanging and raised her up with these words: "Stubborn girl, live, yet hang! And—to make you anxious for the future—may the same punishment be decreed for all your descendants."

With these words Minerva sprinkled her with the juice of a magic herb. As the fateful liquid touched her, Arachne's hair dropped off; her nose and ears vanished, and her head was shrunken; her whole body was contracted. From her side thin fingers dangled for legs, and the rest became her belly. Yet still from this she lets the thread issue forth and, a spider now, practices her former weaving art.

This story illustrates the severe, moral earnestness of this warrior maiden that is often only too apparent. Yet, as Ovid tells it, Minerva's punishment of Arachne's hubris is also motivated by jealousy of her success.

THE CHARACTER AND APPEARANCE OF ATHENA

A study of women, cloth, and society in early times presents insights into how women's textile arts function as analogy and metaphor in mythology and illuminates the importance of Athena as the goddess of the "central womanly skill of weaving."¹⁰ Athena not only represented skill but also cunning, and so weaving became a metaphor for human resourcefulness, as illustrated by clever Penelope, a wily wife, just like her wily husband Odysseus. The concept of life as a thread created by women and controlled by the feminine fates presents a major related theme. Weaving, however necessary, was also revered as a most respected art that belonged to the *arete* (excellence) of a woman as opposed to the different *arete* of a man.

Athena is a goddess of many other specific arts, crafts, and skills (military, political, and domestic), as well as the deification of wisdom and good counsel

in a more generic and abstract conception. She is skilled in the taming and training of horses, interested in ships and chariots, and the inventor of the flute. This latter invention was supposed to have been inspired by the lamentations (accompanied by the hiss of serpents) uttered by the surviving Gorgons after the death of Medusa. But Athena quickly grew to dislike the new instrument because her beautiful features became distorted when she played, and so she threw it away in disgust. Marsyas, the satyr, picked up the instrument with dire consequences, as we shall see in Chapter 11. In Athens Athena was worshipped along with Hephaestus as patroness of all arts and crafts.

Athena is often represented in art with her attributes as a war goddess: helmet, spear, and shield (the aegis, on which the head of the Gorgon Medusa may be depicted). Sometimes she is attended by a winged figure (Nike, Victory) bearing a crown or garland of honor and success. Athena herself, as Athena Nike, represented victorious achievement in war, and a simple but elegant temple of Athena Nike stood on a bastion to the right of the entrance to the Acropolis. The brief *Homeric Hymn to Athena* (11) invokes her as a deity of war (like Ares).

I begin to sing about Pallas Athena, city-guardian, who with Ares is concerned about the deeds of war—the din of fighting and battles and the sacking of cities; she also protects the people as they leave and return. Hail, goddess, give us good luck and good fortune.

Pallas Athena is beautiful with a severe and aloof kind of loveliness that is masculine and striking. One of her standard epithets is *glaukopis*, which may mean gray- or green-eyed, but more probably refers to the bright or keen radiance of her glance rather than to the color of her eyes. Possibly, too, the adjective may be intended to mean owl-eyed, or of owl-like aspect or countenance; certainly Athena is at times closely identified with the owl (particularly on coins). The snake is also associated with her, sometimes appearing coiled at her feet or on her shield. This association (along with those of the owl and the olive tree) suggests that perhaps Athena originally was (like so many others) a fertility goddess, even though her character as a virgin dominates later tradition.

In fact her character is usually impeccable. Unlike another virgin goddess, Artemis, to whom men made advances (although at their dire peril), Athena remained sexually unapproachable. The attempt of Hephaestus on her honor (in the early saga of Athens, p. 548) confirms the purity and integrity of her convictions. It would be a misconception, however, to imagine Athena only as a cold and formidable virago who might easily elicit one's respect but hardly one's love. This Valkyrie-like maiden does have her touching moments, not only in her close and warm relationship with her father, Zeus, but also in her devout loyalty and steadfast protection of more than one hero (e.g., Telemachus and Odysseus, Heracles, Perseus, and Bellerophon).

Either alone or coupled with Apollo, Athena can be made the representative of a new order of divinity—the younger generation of the gods champi-

Mourning Athena. Marble relief from the Acropolis, ca. 460 B.C.; height 21 in. Athena is a young woman, with helmet and spear, but without aegis and shield. She gazes at a stele (an upright stone slab) on which may have been inscribed the names of Athenians killed in the previous year's fighting. The folds of her skirt follow her body and do not fall straight. The title and purpose of the work are unknown, but it shows how closely the goddess was concerned with the life and death of her citizens. (Acropolis Museum, Athens. Courtesy of Alinari/Art Resource, New York.)

oning progress and the advanced enlightenment of civilization. As the agent of Zeus, Athena brings the *Odyssey* to a close by answering the primitive demand for blood evoked by the relatives of the suitors and establishing the divine and universal validity of the justice meted out by Odysseus. In Aeschylus' *Oresteia* she is on the side of Apollo for the acquittal of Orestes through the due process of law in Athens before the court of the Areopagus (which the goddess is said to have created), appeasing and silencing, presumably forever, the old social order of family vendetta represented by the Furies.

NOTES

1. Sometimes Prometheus or even Hermes are helpers.
2. Or Poseidon produced the first horse; Athena may plant an olive tree or, more dramatically, as on this pediment, bring one forth by the touch of her spear. The contest took place on the Acropolis with Athena judged the victor by the gods, or the Athenians, or their king Cecrops. The importance of the olive in Athenian life is symbolized by Athena's victory.
3. Angry at losing, Poseidon flooded the Thriasian plain but he was appeased. The Athenians were seafarers and Poseidon remained important to them.
4. Games and contests were also a part of the festivities; the prize awarded was an amphora filled with oil. On it was depicted Athena in her war gear with an inscription identifying the vase as Panathenaic.
5. The *peplos* was dedicated to the ancient wooden statue of Athena Polias (i.e., "guardian of the city") in the nearby sanctuary of Erechtheus. The old temple was destroyed by the Persians, and the new Erechtheum was completed some thirty years after the Parthenon. For its religious significance, see Chapter 23, pp. 548–550.
6. Some parts of the friezes are still in situ, but the major fragments of the pediments

and the friezes are in the British Museum in London and known as the Elgin marbles.

7. There are a number of ancient, miniature replicas and a description by Pausanias (1. 24). Copyright permission cannot be obtained to reproduce the most recent full-scale reconstruction in the Parthenon at Nashville.

APHRODITE AND EROS

As we have seen, Hesiod describes the birth of Aphrodite after the castration of Uranus and derives her name from the Greek word for foam, *aphros*. Hesiod also links the goddess closely with Cythera (see Color Plate 14) and Cyprus; the latter was especially associated with her worship, particularly in its city of Paphos. Thus Aphrodite is called both Cytherea and Cypris. Another version of her birth gives her parents as Zeus and Dione. Dione is little more than a name to us, but a curious one, since it is the feminine form of the name Zeus (which in another form is Dios).

APHRODITE URANIA AND APHRODITE PANDEMOS

This double tradition of Aphrodite's birth suggests a basic duality in her character or the existence of two separate goddesses of love: Aphrodite Urania or Celestial Aphrodite, sprung from Uranus alone, ethereal and sublime; Aphrodite Pandemos (Aphrodite of All the People, or Common Aphrodite) sprung from Zeus and Dione is essentially physical in nature. Plato's *Symposium* elaborates upon this distinction and claims that Aphrodite Urania, the older of the two, is stronger, more intelligent, and spiritual, whereas Aphrodite Pandemos, born from both sexes, is more base, and devoted primarily to physical satisfaction.¹ It is imperative to understand that the Aphrodite who sprang from Uranus (despite her sexuality in Hesiod's account) becomes, for philosophy and religion, the celestial goddess of pure and spiritual love and the antithesis of Aphrodite, daughter of Zeus and Dione, the goddess of physical attraction and procreation. This distinction between sacred and profane love is one of the most profound archetypes in the history of civilization.

THE NATURE AND APPEARANCE OF APHRODITE

The *Homeric Hymn to Aphrodite* (10), with its brief glimpse of Aphrodite, reminds us of her cult places, Cyprus and Cythera, and the city of Salamis in Cyprus.

 I shall sing about Cyprus-born Cytherea, who gives mortals sweet gifts; on her lovely face, smiles are always suffused with the bloom of love.

Hail, goddess, mistress of well-built Salamis and sea-girt Cyprus. Give me a desirable song. Yet I shall remember you and another song too.

The Birth of Aphrodite. Ca. 460 B.C.: marble, height (at corner) 33 in. In this three-sided relief (known as *The Ludovisi Throne*) Aphrodite is shown in the center panel rising from the sea and being clothed by two attendants, who stand on a pebbly beach. On the left panel (not shown) a naked musician plays the double flute, and on the right panel (not shown) a veiled woman burns incense. (Rome, Museo Nazionale delle Terme.)

In general Aphrodite is the goddess of beauty, love, and marriage. Her worship was universal in the ancient world, but its facets were varied. At Corinth, temple harlots were kept in Aphrodite's honor; at Athens, this same goddess was the staid and respectable deity of marriage and married love. The seductive allurements of this goddess were very great; she herself possessed a magic girdle with irresistible powers of enticement. In the *Iliad* (14. 197–221) Hera borrows it with great effect upon her husband, Zeus.

→
Aphrodite of Melos (Venus de Milo). Late second century B.C.: marble, height 80 in. This is the best known representation of Aphrodite in the Hellenistic age, after Praxiteles had popularized statues of the unclothed female body with his *Aphrodite of Cnidus* (mid-fourth century B.C.): before Praxiteles, Greek convention had limited nudity in statues, with few exceptions, to the male form. Praxiteles' statue survives only in copies dismissed as "lamentable objects" by Martin Robertson. Unlike them, the *Aphrodite of Melos* is unrestored and half draped. It has aroused passionate criticism, favorable and unfavorable. Its sculptor was probably a Greek from Phrygian Antioch, whose name ended in "... andros." (Paris, Louvre.)

The gamut of the conceptions of the goddess of love is reflected in sculpture as well as literature. Archaic idols, like those of other fertility goddesses, are grotesque in their exaggeration of her sexual attributes. In early Greek art she is rendered as a beautiful woman, usually clothed. By the fourth century she is portrayed nude (or nearly so), the idealization of womanhood in all her femininity; the sculptor Praxiteles was mainly responsible for establishing the type—sensuous in its soft curves and voluptuousness.² As so often in the ancient world, once a master had captured a universal conception, it was repeated endlessly with or without significant variations. Everyone knows the Venus from Melos or one of the many other extant copies, although Praxiteles' originals have not survived.

ATTENDANTS OF APHRODITE

The Graces (Charites) and the Hours or Seasons (Horae) are often associated with Aphrodite as decorative and appropriate attendants. The Graces, generally three in number, are personifications of aspects of loveliness. The Horae, daughters of Zeus and Themis, are sometimes difficult to distinguish from the Graces, but they eventually emerge with clearer identity as the Seasons; thus they usually are thought of as a group of two, three, or four. Horae means "hours" and therefore "time" and thus ultimately "seasons." The *Homeric Hymn to Aphrodite* (6) focuses upon the decking out of the goddess by the Horae, whom we call in this context the Hours.

I shall sing about beautiful and revered Aphrodite of the golden crown, who holds as her domain the battlements of all sea-girt Cyprus. The moist force of the West Wind Zephyrus as he blows brought her there amidst the soft foam on the waves of the resounding sea. The gold-bedecked Hours gladly received her and clothed her in divine garments. On her immortal head they placed a finely wrought crown of gold and in her pierced earlobes, flowers of copper and precious gold. About her soft neck and silvery breasts they adorned her with necklaces of gold, the kind that beautify the Hours themselves whenever they go to the lovely dancing choruses of the gods and to the home of their father. Then after they had bedecked her person with every adornment they led her to the immortals, who greeted her when they saw her and took her in their welcoming hands; and each god prayed that she would be his wedded wife and he would bring her home, as he marveled at the beauty of violet-crowned Cytherea.

Hail, sweet and winning goddess with your seductive glance; grant that I may win victory in the contest and make my song fitting. Yet I shall remember you and another song too.

THE PHALLIC PRIAPUS

The more elemental and physical aspects of Aphrodite's nature are seen in her son, Priapus.³ His father may be Hermes, Dionysus, Pan, Adonis, or even Zeus. Priapus is a fertility god, generally depicted as deformed and bearing a huge and erect phallus. He is found in gardens and at the doors of houses. He is part scarecrow, part bringer of luck, and part guardian against thieves; therefore he

The Godhead Fires. By Edward Burne-Jones (1833–1898); oil in canvas, 1878, 39 × 30 in. This is the third of the four scenes painted by Burne-Jones to illustrate William Morris' poem "Pygmalion and the Image" in *The Earthly Paradise*. Venus, clothed in a diaphanous garment and holding a sprig of myrtle, appears with her doves and roses and by her touch brings Galatea to life, with the words, "Come down, and learn to love and be alive." (*Birmingham Museums and Art Gallery.*)

has something in common with Hermes. He also resembles Dionysus and Pan (two of his other reputed fathers), and is sometimes confused with them or their retinues. Whatever the origins of Priapus in terms of sincere and primitive reverence for the male powers of generation, stories about him usually came to be comic and obscene. In the jaded society of later antiquity, his worship meant little more than a cult of sophisticated pornography. (See Color Plate 6.)

PYGMALION

Although many stories illustrate the mighty power of Aphrodite, the story of Pygmalion has provided a potent theme in subsequent literature. Ovid tells how Aphrodite (Venus in his version) was enraged with the women of Cyprus be-

cause they dared to deny her divinity; in her wrath, the goddess caused them to be the first women to prostitute themselves, and as they lost all their sense of shame it was easy to turn them into stone. Ovid goes on to relate the story of Pygmalion and the result of his disgust for these women (*Metamorphoses* 10. 243–297).

 Pygmalion saw these women leading a life of sin and was repelled by the many vices that nature had implanted in the feminine mind. And so he lived alone without a wife for a long time, doing without a woman to share his bed. Meanwhile he fashioned happily a statue of ivory, white as snow, and gave it a beauty surpassing that of any woman born; and he fell in love with what he had made. It looked like a real maiden who you would believe was alive and willing to move, had not modesty prevented her. To such an extent art concealed art; Pygmalion wondered at the body he had fashioned and the flames of passion burned in his breast. He often ran his hands over his creation to test whether it was real flesh and blood or ivory. And he would not go so far as to admit that it was ivory. He gave it kisses and thought that they were returned; he spoke to it and held it and believed that his fingers sank into the limbs that he touched and was afraid that a bruise might appear as he pressed her close.

Sometimes he enticed her with blandishments, at other times he brought her gifts that please a girl: shells and smooth pebbles, little birds, flowers of a thousand colors, lilies, painted balls, and drops of amber, the tears wept by Phaëthon's sisters who had been changed into trees. He also clothed her limbs with garments, put rings on her fingers, draped long necklaces around her neck, dangled jewelry from her ears, hung adornments on her breast. All was becoming, but she looked no less beautiful naked. He placed her on his bed with covers dyed in Tyrian purple and laid her down, to rest her head on soft pillows of feathers as if she could feel them.

The most celebrated feast day of Venus in the whole of Cyprus arrived; heifers, their crooked horns adorned with gold, were slaughtered by the blow of the axe on their snowy necks, and incense smoked. When he had made his offering at the altar, Pygmalion stood and timidly prayed: "If you gods are able to grant everything, I desire for my wife. . . ." He did not dare to say "my ivory maiden." Golden Venus herself was present at her festival and understood what his prayers meant. As an omen of her kindly will a tongue of flame burned bright and flared up in the air.

When he returned home Pygmalion grasped the image of his girl and lay beside her on the bed and showered her with kisses. She seemed to be warm. He touched her with his lips again and felt her breasts with his hands. At his touch the ivory grew soft, and its rigidity gave way to the pressure of his fingers; it yielded just as Hymettan wax when melted in the sun is fashioned into many shapes by the working of the hands and made pliable. He is stunned but dubious of his joy and fearful he is wrong. In his love he touches this answer to his prayers. It was a body; the veins throbbed as he felt them with his thumb. Then in truth Pygmalion was full of prayers in which he gave thanks to Venus. At last he presses his lips on lips that are real and the maiden feels the kisses she is given and as she raises her eyes to meet his she sees both her lover and the sky.

The goddess is present at the marriage that she has made, and now when the crescent moon had become full nine times, Pygmalion's wife gave birth to Paphos, and from him the place got its name.

Galatea is the name given to Pygmalion's beloved in later versions of the tale.

APHRODITE AND ADONIS

In the most famous of her myths, Aphrodite is confused with the great Phoenician goddess Astarte; they have in common as their love a young and handsome youth named by the Greeks Adonis.⁴ Perhaps the best-known version of the story of Aphrodite and Adonis is told by Ovid. Paphos (the son of Pygmalion and Galatea) had a son, Cinyras. Myrrha, the daughter of Cinyras, fell desperately in love with her own father. Tormented by her sense of shame and guilt, the poor girl was on the point of suicide, but she was rescued just in time by her faithful nurse, who eventually wrenched the secret from her. Although the old woman was horrified by what she learned, she preferred to help satisfy the girl's passion rather than to see her die.

It was arranged that the daughter should go to the bed of her father without his knowing her identity, and their incestuous relations continued for some time until Cinyras in dismay found out with whom he had been sleeping. In terror, Myrrha fled from the wrath of her father. As he pursued her she prayed for deliverance and was changed into a myrrh tree, which continually drips with her tears. Myrrha had become pregnant by her father, and from the tree was born a beautiful son named Adonis, who grew up to be a most handsome youth and keen hunter. At the sight of him Aphrodite fell desperately in love. She warned Adonis against the dangers of the hunt, telling him to be especially wary of any wild beasts that would not turn and flee but stood firm (see Color Plate 7). Ovid's story continues as follows (*Metamorphoses* 10. 708–739):

 These were the warnings of Venus and she rode away through the air in her chariot yoked with swans. But Adonis' courageous nature stood in the way of her admonitions. By chance his dogs followed the clear tracks of a wild boar and frightened it from its hiding place. As it was ready to come out of the woods, the son of Cinyras hit a glancing blow on its side. With its crooked snout the savage beast immediately dislodged the blood-stained spear and made for the frightened youth as he fled for safety. The boar buried its tusk deep within his groin and brought him down on the yellow sand, dying.

As Venus was being borne through the air in her light chariot on the wings of swans (she had not yet reached Cyprus), she heard the groans of the dying boy from afar and turned the course of her white birds toward them. When she saw from the air above his lifeless body lying in his own blood, she rushed down, and rent her bosom and her hair and beat her breast with hands not meant to do such violence. She complained against the Fates, crying: "But still everything will not be subject to your decrees; a memorial of my grief for you, Adonis, will abide forever. The scene of your death will be re-created annually with

the ritual of my grief performed. But your blood will be transformed into a flower. O Persephone, you were allowed at one time to change the limbs of the maiden *Mentha* into the fragrant mint—will I be begrudged then the transformation of my hero, the son of *Cinyras*?"

With these words she sprinkled fragrant nectar on his blood which, at the touch of the drops, began to swell just like a gleaming bubble in the rain. In no longer than an hour's time a flower sprang from the blood, red as the thick skin of the fruit of the pomegranate that hides the seeds within. Yet the flower is of brief enjoyment for the winds (which give it its name, *anemone*) blow upon it; with difficulty it clings to life and falls under the blasts and buffeting.

Ovid's story predicts the rites associated with the worship of *Adonis* involving ceremonial wailing and the singing of dirges over the effigy of the dead

Venus Discovering the Dead Adonis, by a Neapolitan follower of José de Ribera (1591–1652). Oil on canvas, ca. 1650; 72½ × 94 in. Whereas Veronese shows Venus and Adonis before the tragedy, Ribera's follower represents Ovid's narrative of Venus descending from her dove-drawn chariot to mourn over her dead lover. The scene is full of dramatic emotion, focused by brilliant light on the gesture of Venus and the body of Adonis and amplified by the brooding figure of a shepherd on the right and the animals in the corners—Adonis' hound and the unyoked doves of Venus. (© The Cleveland Museum of Art, Mr. and Mrs. William H. Marlatt Fund, 65.19.)

youth. Obviously, we have here once again a rendition of a recurrent theme: the Great Mother and her lover, who dies as vegetation dies and comes back to life again. Another version of the myth makes this even clearer.

When Adonis was an infant, Aphrodite put him in a chest and gave it to Persephone to keep. Persephone looked inside; and once she saw the beauty of the boy, she refused to give him back. Zeus settled the quarrel that ensued by deciding that Adonis would stay with Persephone below one part of the year and with Aphrodite in the upper world for the other part. It is possible to detect similarities between Easter celebrations of the dead and risen Christ in various parts of the world and those in honor of the dead and risen Adonis. Christianity, too, absorbed and transformed the ancient conception of the sorrowing goddess with her lover dying in her arms to that of the sad Virgin holding in her lap her beloved Son.

CYBELE AND ATTIS

Parallels to the figures of Aphrodite and Adonis can readily be found in the Phrygian story of Cybele and Attis, yet another variation of the eternal myth of the Great Mother and her lover that infringed upon the Graeco-Roman world.⁵ Cybele was sprung from the earth, originally a bisexual deity but then reduced to a female. From the severed organ, an almond tree arose. Nana, the daughter of the god of the river Sangarios, picked a blossom from the tree and put it in her bosom; the blossom disappeared, and Nana found herself pregnant. When a son, Attis, was born, he was exposed and left to die, but a he-goat attended him. Attis grew up to be a handsome youth, and Cybele fell in love with him; however, he loved another, and Cybele in her jealousy drove him mad. In his madness, Attis castrated himself and died.⁶ Cybele repented and obtained Zeus' promise that the body of Attis would never decay.

In her worship, Cybele was followed by a retinue of devotees who worked themselves into a frenzy of devotion that could lead to self-mutilation.⁷ The orgiastic nature of her ritual is suggested by the frantic music that accompanied her: the beating of drums, the clashing of cymbals, and the blaring of horns. The myth explains why her priests (called Galli) were eunuchs. It is also easy to see how the din that attended Cybele could be confused with the ritual connected with another mother-goddess, Rhea, whose attendants long ago hid the cries of the infant Zeus from his father, Cronus, by the clash of their music.

Like Adonis, Attis is another resurrection-god, and their personalities become merged in the tradition. Like Adonis, Attis may die not through his self-inflicted wounds but by the tusk of a boar. Furthermore Attis, like Adonis, comes back to life with the rebirth of vegetation.

We have evidence of springtime ceremonies at which the public mourned and rejoiced for the death and rebirth of Attis. We can ascertain, too, the nature

of the secret and mystic rites that were also a part of his worship. Frazer provides a compelling reconstruction:

Our information as to the nature of these mysteries and the date of their celebration is unfortunately very scanty, but they seem to have included a sacramental meal and a baptism of blood. In the sacrament the novice became a partaker of the mysteries by eating out of a drum and drinking out of a cymbal, two instruments of music which figured prominently in the thrilling orchestra of Attis. The fast which accompanied the mourning for the dead god may perhaps have been designed to prepare the body of the communicant for the reception of the blessed sacrament by purging it of all that could defile by contact the sacred elements. In the baptism the devotee, crowned with gold and wreathed with fillets, descended into a pit, the mouth of which was covered with a wooden grating. A bull, adorned with garlands of flowers, its forehead glittering with gold leaf, was then driven on to the grating and there stabbed to death with a consecrated spear. Its hot reeking blood poured in torrents through the apertures, and was received with devout eagerness by the worshipper on every part of his person and garments, till he emerged from the pit, drenched, dripping, and scarlet from head to foot, to receive the homage, nay the adoration of his fellows as one who had been born again to eternal life and had washed away his sins in the blood of the bull. For some time afterwards the fiction of a new birth was kept up by dieting him on milk like a newborn babe. The regeneration of the worshipper took place at the same time as the regeneration of his god, namely, at the vernal equinox.⁸

We are obviously once again in the exotic realm of the mystery religions; this one, like the others, rests upon a common fundamental belief in immortality.

The myth of Aphrodite and Adonis, like that of Cybele and Attis, depicts the destruction of the subordinate male in the grip of the eternal and all-dominating female, through whom resurrection and new life may be attained.

APHRODITE AND ANCHISES

An important variation on the same theme is illustrated by the story of Aphrodite and Anchises. In this instance, the possibility of the utter debilitation of the male as he fertilizes the female is a key element; Anchises is in dread fear that he will be depleted and exhausted as a man because he has slept with the immortal goddess. As the story is told in the *Homeric Hymn to Aphrodite* (5) we are given ample evidence of the mighty power of the goddess in the universe and a rich and symbolic picture of her devastating beauty. Here Aphrodite is a fertility goddess and mother as well as a divine and enticing woman, epitomizing the lure of sexual and romantic love.

The *Homeric Hymn* begins by telling us that there are only three hearts that the great goddess of love is unable to sway: those of Athena, Artemis, and Hestia. All others, both gods and goddesses, she can bend to her will. So great Zeus caused Aphrodite herself to fall in love with a man because he did not want her to continue her boasts that she in her power had joined the immortal gods and goddesses in love with mortals to beget mortal children but had experienced no such humiliating coupling herself. Although it is this major theme of the union

Venus and Anchises. Fresco from the Galleria of the Farnese Palace, Rome, 1597–1600 by Annibale Carracci (1560–1609); dimensions of the Galleria, 66 × 21½ ft. The Farnese Gallery was decorated with Carracci's frescoes of *The Loves of the Gods*, arranged, like Ovid's stories in the *Metamorphoses*, in a complex and logical order. This scene is on the northeast side of the vault, opposite the scene of Zeus making love to Hera. Balancing these two scenes (on the southeast and southwest sides of the vault) are two others of divine lovers, Omphale and Hercules and Diana and Endymion. The Latin inscription on the footstool, on which the smiling Cupid has placed his foot, means "Whence [came] the Roman race," alluding to the birth of Aeneas from the consummation that is about to take place. (Rome, Galleria Farnese.)

between Aphrodite and Anchises that needs emphasis in this context, the hymn is translated in its entirety, thus preserving its integral beauty and power.

☞ Muse, tell me about the deeds of Cyprian Aphrodite, the golden goddess who excites sweet desire in the gods and overcomes the races of mortal humans, the birds of the sky and all animals, as many as are nourished by the land and sea; all these are touched by beautifully crowned Cytherea.

Yet she is not able to seduce or ensnare the hearts of three goddesses. First there is the daughter of aegis-bearing Zeus, bright-eyed Athena; for the deeds of golden Aphrodite give her no pleasure. She enjoys the work of Ares—fights, battles, and wars—and splendid achievements. She first taught craftsmen on the earth to make war-chariots and carriages fancy with bronze. She also teaches

beautiful arts to soft-skinned maidens in their homes by instilling the proper skill in each of them.

Next, laughter-loving Aphrodite is never able to subdue in love Artemis, the goddess of the noisy hunt, with shafts of gold; for she enjoys her bow and arrows and killing animals in the mountains, and also the lyre, dancing choruses, thrilling cries, shady groves, and the cities of just mortals.

Finally, the deeds of Aphrodite are not pleasing to the modest maiden Hestia, who was the first of Cronus' children and again the last, by the will of aegis-bearing Zeus.⁹ Poseidon and Apollo wooed this revered virgin, but she did not want them at all and firmly said no. She touched the head of her father, aegis-bearing Zeus, and swore that she would be a virgin all her days, this goddess of goddesses—and her oath has been fulfilled. Father Zeus has given her beautiful honor, instead of marriage. In the middle of the home she sits and receives the richest offering, in all the temples of the gods she holds her respected place, and among all mortals she is ordained as the most venerable of deities.

Yet Zeus put into the heart of Aphrodite herself sweet longing for Anchises, who at that time was tending cattle on the high ranges of Mt. Ida with its many streams. In beauty he was like the immortals; and so when laughter-loving Aphrodite saw him, she fell in love, and a terrible longing seized her being. She went to Paphos in Cyprus and entered her fragrant temple. For her precinct and fragrant altar are there. After she went in, she closed the shining doors; inside the Graces (Charites) bathed her and rubbed her with ambrosial oil, the kind used by the eternal gods, and she emerged perfumed in its heavenly sweetness.

When she was beautifully clothed in her lovely garments and adorned with gold, laughter-loving Aphrodite left fragrant Cyprus and hastened to Troy, pressing swiftly on her way, high among the clouds. And she came to Ida, the mother of beasts, with its many springs, and crossed the mountain straight for the hut of Anchises. Gray wolves, bright-eyed lions, bears, and swift panthers, ravenous after deer, followed her, fawning. When she saw them, she was delighted within her heart and filled their breasts with desire; and they all went together in pairs to their beds, deep in their shadowy lairs.

She came to the well-built shelter and found him in his hut, left alone by the others, the hero Anchises, who had in full measure the beauty of the gods. All the rest were out following the cattle in the grassy pastures, but he, left alone by the others, paced to and fro playing a thrilling melody on his lyre. The daughter of Zeus, Aphrodite, stood before him, assuming the form of a beautiful young virgin, so that Anchises might not be afraid when he caught sight of her with his eyes. After Anchises saw her, he pondered as he marveled at her beautiful form and shining garments. For she wore a robe that was more brilliant than the gleam of fire, and she was adorned with intricate jewelry and radiant flowers, and about her soft throat were exquisite necklaces beautifully ornate and of gold. The raiment about her tender breasts shone like the moon, a wonder to behold.

Desire gripped Anchises and he addressed her: "Hail to you, O lady, who have come to this dwelling, whoever of the blessed gods you are, Artemis or Leto or golden Aphrodite or well-born Themis or gleaming-eyed Athena; or perhaps you who have come here are one of the Graces, who are the companions of the gods and are called immortal, or one of the nymphs, who haunt the beau-

tiful woods or inhabit this beautiful mountain, the streams of rivers, and the grassy meadows. I shall build an altar for you on a high mound in a conspicuous spot and I shall offer you beautiful sacrifices in all seasons. Be kindly disposed toward me and grant that I be a preeminent hero among the Trojans; make my offspring flourish in the time to come and allow me myself to live well for a long time and see the light of the sun, happy among my people, and reach the threshold of old age."

Then Aphrodite, the daughter of Zeus, answered him: "Anchises, most renowned of earthborn men, I tell you that I am not any one of the gods. Why do you compare me to the immortals? No, I am a mortal and my mother who bore me was a mortal woman; my father, Otreus, who rules over all Phrygia with its fortresses, has a famous name; perhaps you have heard of him. But I know your language as well as I know our own, for a Trojan nurse reared me in my home in Phrygia; she took me from my mother when I was a very little child and brought me up. And so to be sure I readily understand your language. Now Hermes, the slayer of Argus, with his golden wand, snatched me away from the choral dance in honor of Artemis, the goddess of the golden arrows, who delights in the sounds of the hunt. We were a group of many nymphs and virgins such as suitors pursue, and in a vast throng we circled round about. From here the slayer of Argus with his golden wand snatched me away and whisked me over many places, some cultivated by mortals, others wild and unkempt, through which carnivorous beasts stalk from their shadowy lairs. I thought that I should never set foot again on the life-giving earth. But he told me that I should be called to the bed of Anchises as his lawful wife and that I should bear splendid children to you. And when he had explained and given his directions, then indeed he, the mighty slayer of Argus, went back again among the company of the gods.

"But I have come to you and the force of destiny is upon me. I implore you, by Zeus and by your goodly parents (for they could not be base and have such a son as you), take me, pure and untouched by love, as I am, and present me to your father and devoted mother and to your brothers who are born from the same blood. I shall not be an unseemly bride in their eyes but a fitting addition to your family. And send a messenger quickly to Phrygia, home of swift horses, to tell my father and worried mother. They will send you gold enough and woven raiment; accept their many splendid gifts as their dowry for me. Do these things and prepare the lovely marriage celebration which both mortal humans and immortal gods cherish."

As she spoke thus, the goddess struck Anchises with sweet desire and he cried out to her: "If, as you declare, you are mortal, and a mortal woman is your mother, and Otreus is your renowned father, and you have come here through the agency of Hermes and are to be called my wife all our days, then no one of the gods or mortals will restrain me from joining with you in love right here and now, not even if the archer god Apollo himself were to shoot his grief-laden shafts from his silver bow. After I have once gone up into your bed, O maiden, fair as a goddess, I should even be willing to go below into the house of Hades."

As he spoke he clasped her hand, and laughter-loving Aphrodite turned away and with her beautiful eyes downcast crept into his bed, with its fine cov-

erings, for it had already been made with soft blankets; on it lay the skins of bears and loud-roaring lions that Anchises had slain in the lofty mountains. And then when they went up to his well-wrought bed, Anchises first removed the gleaming ornaments, the intricate brooches and flowers and necklaces; and he loosened the belt about her waist and took off her shining garments and set them down on a silver-studded chair. Then by the will of the gods and of fate he, a mortal man, lay with an immortal goddess, without knowing the truth.

At the time when herdsmen turn their cattle and staunch sheep back to their shelter from the flowery pastures, Aphrodite poured upon Anchises a sleep that was sound and sweet, and she dressed herself in her lovely raiment. When the goddess of goddesses had clothed her body beautifully, she stood by the couch and her head reached up to the well-wrought beam of the roof, and from her cheeks shone the heavenly beauty that belongs to Cytherea of the beautiful crown. She roused Anchises from sleep and called out to him with the words: "Get up, son of Dardanus; why do you sleep so deeply? Tell me if I appear to you to be like the person whom you first perceived with your eyes."

Thus she spoke, and he immediately awoke and did as he was told. When he saw the neck and the beautiful eyes of Aphrodite, he was afraid and looked down turning his eyes away and he hid his handsome face in his cloak and begged her with winged words: "Now from the first moment that I have looked at you with my eyes, O goddess, I know you are divine; and you did not tell me the truth. But I implore you, by aegis-bearing Zeus, do not allow me to continue to dwell among mortals, still alive but enfeebled; have pity, for no man retains his full strength who sleeps with an immortal goddess."

Then Aphrodite, the daughter of Zeus, replied: "Anchises, most renowned of mortal men, be of good courage and do not be overly frightened in your heart. For you need have no fear that you will suffer evil from me or the other blessed ones; indeed you are beloved by the gods. And you will have a dear son who will rule among the Trojans; and his children will produce children in a continuous family succession. His name will be Aeneas, since I am gripped by a dread anguish¹⁰ because I went into the bed of a man, although among mortals those of your race are always most like the gods in beauty and in stature."

Aphrodite is upset because she can no longer taunt the gods with the boast that she has caused them to love mortals while she alone has never succumbed. She continues to try to justify her actions by glorifying the family of Anchises. She tells the story of Ganymede, who was beautiful and made immortal by Zeus, and relates the sad tale of handsome Tithonus, also of the Trojan royal family, who was beloved by Eos and granted immortality. Aphrodite's son Aeneas, of course, emerges eventually as the great hero of the Romans. Here is the conclusion of the *Homeric Hymn to Aphrodite*.

 "Indeed Zeus in his wisdom seized and carried off fair-haired Ganymede because of his beauty, so that he might be in the company of the gods and pour wine for them in the house of Zeus, a wonder to behold, esteemed by all the immortals, as he draws the red nectar from a golden bowl. But a lasting sorrow gripped the heart of Tros, for he had no idea where the divine whirlwind had

taken his dear son. Indeed he mourned for him unceasingly each and every day, and Zeus took pity on the father and gave him as recompense for his son brisk-trotting horses, the kind which carry the gods. These he gave him to have as a gift. And at the command of Zeus, Hermes, the guide and slayer of Argus, told everything and how Ganymede would be immortal and never grow old, just like the gods. When Tros heard this message from Zeus, he no longer continued his mourning but rejoiced within his heart and joyfully was borne by the horses that were as swift as a storm.

"So also golden-throned Eos carried off Tithonus, one of your race, and like the immortals. Eos went to Zeus, the dark-clouded son of Cronus, to ask that Tithonus be immortal and live forever. Zeus nodded his assent and accomplished her wish. Poor goddess, she did not think to ask that her beloved avoid ruinous old age and retain perpetual youth. Indeed as long as he kept his desirable youthful bloom, Tithonus took his pleasure with early-born Eos of the golden throne by the stream of Oceanus at the ends of the earth. But when the first gray hairs sprouted from his beautiful head and noble chin, Eos avoided his bed. But she kept him in her house and tended him, giving him food, ambrosia, and lovely garments. When hateful old age oppressed him completely and he could not move or raise his limbs, the following plan seemed best to her. She laid him in a room and closed the shining doors. From within his voice flows faintly and he no longer has the strength that he formerly had in his supple limbs.

"I should not choose that you, Anchises, be immortal and live day after day like him; but, if you could live on and on a beautiful man, as you are now, and if you could be called my husband, then grief would not cloud my anxious heart. Now, however, soon you will be enveloped by pitiless old age, which, depleting and destructive, stands beside all human beings and is depised by the gods.

"Besides, among the immortal gods there will be disgrace for me, continually and forever, because of you. Before this happened, they used to dread the jeers and schemes with which I used to mate all the immortal gods with mortal women at one time or another; for they were all subject to my will. But now no more will I be able to open my mouth about this power of mine among the gods, since driven quite out of my mind, wretched and blameless, I have been utterly insane—I have gone to bed with a mortal and I carry his child in my womb.

"When our baby first sees the light of the sun, deep-bosomed mountain nymphs who inhabit this great and holy mountain will bring him up. They are not the same as either mortals or immortals; they live a long time and eat ambrosial food and also with the immortals they join in beautiful choruses of dancers. The Sileni and the keen-eyed slayer of Argus make love to them in the depths of desireful caves. When they are born, pines and high-topped oaks are born along with them on the nourishing earth, beautiful and flourishing trees that stand towering on the high mountains; mortals call their groves sacred and do not cut them down with an axe. Yet when the fate of death stands at their side, these trees first begin to wither in the earth and then their enveloping bark shrivels and their branches fall off. Together with the trees the souls of their nymphs leave the light of the sun.

"These nymphs will have my son by their side to bring up. When he has first been touched by the enticing bloom of youth, the goddesses will bring the

boy here to show you. Yet so that I may go over with you all that I intend, I shall come back again with my son, about the fifth year. Certainly when you first behold with your eyes this flourishing child, you will rejoice at the sight, for he will be very much like a god; and you will bring him to windy Troy. If any mortal person asks who the mother was who carried him under her girdle, remember to say what I tell you. Say she is the daughter of one of the nymphs, beautiful as a flower, who inhabits this forest-covered mountain. If you speak out and boast like a fool that you were joined in love with lovely-crowned Cytherea, Zeus in his anger will strike you with a smoldering thunderbolt. Everything has been told to you; take it all to heart. Refrain from naming me and be intimidated by the anger of the gods." Having spoken thus, she soared upward to windy heaven.

Hail, goddess, guardian of well-built Cyprus; I began with you and now I shall go on to another hymn.

EROS

Eros, the male counterpart of Aphrodite, shares many of her characteristics. He too had a dual tradition for his birth. He may be the early cosmic deity in the creation myths of Hesiod and the Orphics or the son of Aphrodite, his father being Ares. At any rate he is often closely associated with the goddess as her attendant. Eros, like Aphrodite, may represent all facets of love and desire, but often he is the god of male homosexuality, particularly in the Greek classical period. He is depicted as a handsome young man, the embodiment and idealization of masculine beauty.

THE *SYMPOSIUM* OF PLATO

The *Symposium* of Plato provides a most profound analysis of the manifold nature and power of love, especially in terms of a conception of Eros. The dialogue tells of a select gathering at the house of Agathon, a dramatic poet, on the day after the customary celebration with the members of his cast in honor of his victory with his first tragedy. The topic at this most famous of dinner parties is that of love. Each guest in turn is asked to expound on the subject. The speeches of Aristophanes and Socrates, both of whom are present, are by far the most rewarding in their universal implications.¹¹

ARISTOPHANES' SPEECH IN THE *SYMPOSIUM*

Aristophanes' speech (*Symposium* 14–16 [189A–193E]) follows those of Pausanias and Eryximachus, two of the other guests.

Men seem to me to have failed completely to comprehend the power of Eros, for if they did comprehend it, they would have built to him the greatest altars and temples and offered the greatest sacrifices, whereas he is given none of these

honors, although he should have them most of all. For he is the most friendly to man of all the gods, his helper and physician in those ills, which if cured, would bring about the greatest happiness for the human race. Therefore I shall try to initiate you into the nature of his power, and you will be the teachers of others.

But first you must understand the nature of mortals and what experiences they have suffered. For our nature long ago was not the same as it is now, but different. In the beginning humankind had three sexes, not two, male and female, as now; but there was in addition, a third, which partook of both the others; now it has vanished and only its name survives. At that time there was a distinct sex, the androgynous both in appearance and in name, partaking of the characteristics of both the male and the female, but now it does not exist, except for the name, which is retained as a term of reproach.

Furthermore every human being was in shape a round entity, with back and sides forming a circle; he had four hands, an equal number of feet, one head, with two faces exactly alike but each looking in opposite directions, set upon a circular neck, four ears, two sets of genitals and everything else as one might imagine from this description. He walked upright just as we do now in whichever direction (backward or forward) he wished. When they were anxious to run, they made use of all their limbs (which were then eight in number) by turning cartwheels, just like acrobats, and quickly carried themselves along by this circular movement.

The sexes were three in number and of such a kind for these reasons; originally the male was sprung from the sun, the female from the earth, and the third, partaking of both male and female, from the moon, because the moon partakes of both the sun and the earth; and indeed because they were just like their parents, their shape was spherical and their movement circular. Their strength and might were terrifying; they had great ambitions, and they made an attack on the gods. What Homer relates about Ephialtes and Otus and their attempt to climb up to heaven and assail the gods is told also about these beings as well.

Zeus and the other gods took counsel about what they should do, and they were at a loss. They could not bring themselves to kill them (just as they had obliterated the race of the giants with blasts of thunder and lightning), for they would deprive themselves of the honors and sacrifices which they received from mortals, nor could they allow them to continue in their insolence. After painful deliberation Zeus declared that he had a plan. "I think that I have a way," he said, "whereby mortals may continue to exist but will cease from their insolence by being made weaker. For I shall cut each of them in two, and they will be at the same time both weaker and more useful to us because of their greater numbers, and they will walk upright on two legs. If they still seem to be insolent and do not wish to be quiet, I shall split them again and they will hop about on one leg."

With these words he cut human beings in two, just as one splits fruit which is to be preserved or divides an egg with a hair. As he bisected each one, he ordered Apollo to turn the face with the half of the neck attached around to the side that was cut, so that man, by being able to see the signs of his bisection, might be better behaved; and he ordered him to heal the marks of the cutting.

Apollo turned the face around and drew together the skin like a pouch with drawstrings on what is now called the belly and tied it in the middle making a single knot, which is called the navel. He smoothed out the many other wrinkles and molded the chest using a tool like that of cobblers when they smooth out the wrinkles in the leather on their last. But he left a few on their bellies around their navels as a reminder of their experience of long ago.

And so when their original nature had been split in two, each longed for his other half, and when they encountered it they threw their arms about one another and embraced in their desire to grow together again and they died through hunger and neglect of the other necessities of life because of their wish to do nothing separated from each other. Whenever one of a pair died, the other that was left searched out and embraced another mate, either the half of a whole female (which we now call woman) or of a male. Thus they perished, and Zeus in his pity devised another plan: he transferred their genitals to the front (for until now they had been on the outside, and they begot and bore their offspring not in conjunction with one another but by emission into the earth, like grasshoppers).

And so Zeus moved their genitals to the front and thereby had them reproduce by intercourse with one another, the male with the female. He did this for two reasons: if a man united with a woman they would propagate the race and it would survive, but if a male united with a male, they might find satisfaction and freedom to turn to their pursuits and devote themselves to the other concerns of life. From such early times, then, love for one another has been implanted in the human race, a love that unifies in his attempt to make one out of two and to heal and restore the basic nature of humankind.

Each of us therefore is but a broken tally, half a man, since we have been cut just like the side of a flatfish and made two instead of one. All who are a section halved from the beings of the common sex (which was at that time called androgynous) are lovers of women; many adulterers come from this source, including women who love men and are promiscuous. All women who are a section halved from the female do not pay any attention to men but rather turn to women; lesbians come from this source. All who are a section halved from the male pursue males; and all the while they are young, since they are slices, as it were, of the male, they love men and take delight in lying by their side and embracing them; these are the best of boys and youths because they are the most manly in nature. Some say that they are without shame, but they do not tell the truth. For they behave the way they do not through shamelessness but through courage, manliness, and masculinity as they cling to what is similar to them.

Here is a great proof of what I say. Only men of this sort proceed to politics when they grow up. Once they are men they love boys and do not turn their thoughts to marriage and procreation naturally but are forced to by law or convention; it is enough for them to spend their lives together unmarried. In short, then, a man like this is a lover of men as a boy and a lover of boys as a man, always clinging to what is akin to his nature. Therefore whenever anyone of this sort and every other kind of person encounters the other half that is actually his, then they are struck in an amazing way with affection, kinship, and love, virtually unwilling to be separated from each other for even a short time. These are the ones who spend their whole life together, although they would not be

able to tell what they wish to gain from each other. No one would imagine that it is on account of their sexual association that the one enjoys intensely being with the other; clearly the soul of each desires something else, which it cannot describe but only hint at obscurely.

Suppose Hephaestus, his tools in hand, were to stand over them as they lay together and ask: "O mortals, what is it that you wish to gain from one another?" Or when they were at a loss for an answer he were to ask again: "Is this what you desire, to be together always as much as possible so as never to be separated from each other night and day? If this is what you desire, I am willing to fuse and weld you together so that the two of you may become one and the same person and as long as you live, you may both live united in one being, and when you die, you may die together as one instead of two, united even in the realms of Hades. Just see if this would be enough to satisfy your longing." We know that there is not one person who, after hearing these words, would deny their truth and say that he wanted something else, but he would believe that he had heard exactly what he had desired for a long time—namely, to be melted in unison with his beloved, and the two of them become one. The reason is that our ancient nature was thus and we were whole. And so love is merely the name for the desire and pursuit of the whole.

Previously, as I have said, we were one, but now because of our wickedness we have been split by the god (just as the Arcadians have been split up by the Spartans).¹² There is too the fear that if we do not behave properly toward the gods we may again be bisected, just as dice that are divided as tallies, and go around like the figures cut in profile on steles, split right along their noses. For this reason all mortals must be urged to pay reverence to the gods so that we may avoid suffering further bisection and win what Eros has to give as our guide and leader. Let no one act in opposition to him—whoever does incurs the enmity of the gods. For if we are reconciled and friendly to the god of love, we shall find and win our very own beloved, an achievement few today attain.

Eryximachus is not to suppose in ridicule of my speech that I am referring only to Pausanias and Agathon, since they perhaps happen to be of the class of those who love males by nature. I am referring rather to all men and women when I say that the happiness of our race lies in the fulfillment of love; each must find the beloved that is his and be restored to his original nature. If this ancient state was best, of necessity the nearest to it in our present circumstances must be best—namely, to find a beloved who is of one and the same mind and nature. It is right to praise Eros as the god responsible; he helps us most in our present life by bringing us to what is kindred to us and offers us the greatest hopes for the future. If we pay reverence to the gods, he will restore us to our ancient nature and with his cure make us happy and blessed.

Aristophanes concludes by again imploring Eryximachus not to ridicule his speech; and indeed, in the last analysis, we cannot help but take it very seriously. The invention, the wit, and the absurdity are all typical of the comic playwright, but so is the insight that they so brilliantly elucidate. We do not know how much belongs to the genius of Plato, but it would be difficult to imagine anything more in character for Aristophanes. With or without the outspoken

glorification of love between males (inspired perhaps by the company present and certainly preliminary to Plato's own message in Socrates' subsequent speech), we have a vision of the basic need of one human being for another that is astonishingly like our own.

Who can ever forget Hephaestus as he stands before the two lovers and asks what they hope to gain from each other? After all, Aristophanes refers to all men and women when he says that happiness lies in the fulfillment of love and that each must find the appropriate beloved. The archetypal concept of love as a sensual and romantic striving for a blessed completeness or wholeness is basic and universal,¹³ and who can deny that the complex nature of this most fundamental physical and psychological drive is here laid bare, with a ruthless penetration that is disconcertingly familiar to us, however much the scientific quest for precise definition and vocabulary since the time of Freud has replaced the symbols of mythic art?

SOCRATES' SPEECH IN THE *SYMPOSIUM*

In Socrates' speech, which provides the dramatic and philosophical climax of the dialogue, we move from the conception of love that is elemental and essentially physical to a sublime elucidation of the highest spiritual attainments that Eros can inspire. Another myth is evoked, this time to establish the true nature of the divine being, in opposition to the misconceptions of the previous speakers. Socrates tells how he was instructed in the true nature of Eros by a woman of Mantinea called Diotima. She makes him realize that Eros is neither good and beautiful nor bad and ugly, but in nature lies somewhere between the two. Therefore he is not a god. Socrates continues his argument quoting from his conversation with Diotima (*Symposium* 23 [202D–204C]):

 "What then might love be," I said, "a mortal?" "Not in the least," she replied. "But what is he then?" "As I told you earlier, he is not mortal or immortal but something between." "What then, O Diotima?" "A great spirit, O Socrates; for every spirit is intermediate between god and human beings." "What power does he have?" I asked. "He interprets and conveys exchanges between gods and human beings, prayers and sacrifices from human beings to gods, and orders and gifts in return from gods to human beings; being intermediate he fills in for both and serves as the bond uniting the two worlds into a whole entity. Through him proceeds the whole art of divination and the skill of priests in sacrifice, ritual, spells, and every kind of sorcery and magic. God does not have dealings with mortals directly, but through Love all association and discourse between the two are carried on, both in the waking hours and in time of sleep. The one who is wise in such matters as these is a spiritual being, and he who is wise in other arts and crafts is his inferior. These spirits are many and of every kind and one of them is Eros."

"Who were his father and mother?" I asked. "Although it is a rather long story, I shall tell you," she replied. "When Aphrodite was born, the gods held

a feast and among them was Resourcefulness (Poros), the son of Cleverness (Metis), and while they were dining, Poverty (Penia) came and stood about the door to beg, since there was a party.¹⁴ Resourcefulness became intoxicated with nectar (for wine did not yet exist) and went into the garden of Zeus where, overcome by his condition, he fell asleep. Then Poverty, because of her own want and lack of resourcefulness, contrived to have a child by Resourcefulness, and she lay by his side and conceived Eros. And so Eros became the attendant and servant of Aphrodite, for he was begotten on her birthday and he is by nature a lover of beauty and Aphrodite is beautiful.

"Since Eros then is the son of Resourcefulness and Poverty, he is fated to have the following kind of character. First of all, he is continually poor, and far from being soft and beautiful as many believe, he is hard and squalid, without shoes, without a home, and without a bed; he always sleeps on the ground, in doorways, and on the street. Thus he has his mother's nature, with want as his constant companion. On the other hand, like his father, he lays his plots to catch the beautiful and the good; being vehement and energetic, he is a dread hunter, always weaving some scheme; full of resource, he has a passion for knowledge and is a lover of wisdom during all his life, a clever wizard, sorcerer, and sophist. He is not immortal nor is he mortal, but at one time he flourishes and lives whenever he is successful, and at another he dies all in the same day, but he will come back to life again because of his nature inherited from his father—what he acquires slips away from him again, and so Eros is never either poor or rich and he is in a state between wisdom and ignorance. This is the way he is. No one of the gods loves wisdom and longs to become wise, because he is wise; and so with any other who is wise—he does not love wisdom. On the other hand, the ignorant do not love wisdom or long to become wise. Ignorance is a difficult thing for this very reason, that the one who is neither beautiful nor good nor wise is completely satisfied with himself. The one who does not think he is lacking in anything certainly does not desire what he does not think he lacks."

"O Diotima," I asked, "who are those who love wisdom if not the wise or the ignorant?" "By now certainly it would be clear even to a child," she replied, "that they are those who are in a state between desire and wisdom, one of whom is Eros. To be sure wisdom is among the most beautiful of things and Eros is love of beauty; and so Eros must be a lover of wisdom, and being a lover of wisdom he lies between wisdom and ignorance. The nature of his birth is the reason for this. He springs from a wise and resourceful father and a mother who is not wise and without resources. This then, my dear Socrates, is the nature of this spirit. The conception you had of Eros is not surprising. You believed, to infer from what you said, that Love was the beloved (the one who is loved) and not the lover (the one who loves). For this reason, I think, Love appeared to you to be all beautiful. For that which is loved is that which actually is beautiful and delicate, perfect and most happy, but that which loves has another character, of the kind that I have described."

Diotima goes on to explain the function, purpose, and power of Eros in human life. Love and the lover desire what they do not possess, namely, the beautiful and the good, and the ultimate goal of their pursuit is happiness. Love finds

particular expression in the procreation of what is beautiful, both physically and spiritually; and all humans in their quest to bring forth beauty and knowledge are thereby touched by a divine harmony with the immortal. Procreation is the closest means by which the human race can attain to perpetuity and immortality; love, then, is a love of immortality as well as of the beautiful and the good.

Animals, as well as humans, seek to perpetuate themselves and thereby become immortal. But for humans there are various stages in the hierarchy of love. The lowest is that of the animal inspired by the desire for children of the body, but as one ascends, there is the realization of the possibility of producing children of the mind. Who would not prefer the poetic offspring of a Homer or a Hesiod and the more lasting glory and immortality that they have achieved? Just as on the rungs of a ladder we proceed from one step to another, so initiates into the mysteries of love move from the lower to the higher.

Love begins with the physical and sensual desire for the beautiful person or the beautiful thing. From the specific object one moves to the generic conception of beauty, which is wondrous and pure and universal. It is the love of this eternal beauty (and with it the goodness and wisdom it entails) that inspires the pursuit of philosophy in the philosopher.

Diotima sums up by describing the final stages of initiation and revelation, sustaining the vocabulary of the mysteries (28 [210A–C]):

☞ “It is necessary for the one proceeding in the right way toward his goal to begin, when he is young, with physical beauty; and first of all, if his guide directs him properly, to love one person, and in his company to beget beautiful ideas and then to observe that the beauty in one person is related to the beauty in another. If he must pursue physical beauty, he would be very foolish not to realize that the beauty in all persons is one and the same. When he has come to this conclusion, he will become the lover of all beautiful bodies and will relax the intensity of his love for one and think the less of it as something of little account. Next he will realize that beauty in the soul is more precious than that in the body, so that if he meets with a person who is beautiful in his soul, even if he has little of the physical bloom of beauty, this will be enough and he will love and cherish him and beget beautiful ideas that make the young better, so that he will in turn be forced to see the beauty in morals and laws and that the beauty in them all is related.”

This then is the Platonic Eros, a love that inspires the philosopher to self-denial in the cause of humanity and in the pursuit of true wisdom. Presumably this philosophic Eros can ultimately be aroused from any type of love, heterosexual as well as homosexual (both male and female); the crucial issue is that it be properly directed and become transformed from the erotic to the intellectual. According to Plato in his *Republic*, certain men as well as certain women can attain the highest goals of the true philosopher king. As we have just learned, this cannot be achieved without the sensual and sublime impetus of Eros. Whatever the physical roots, the spiritual import is universal, kindred to the passionate

SOCRATES AND EROS

Plato's message in the *Symposium* is in accord with his beliefs generally: sexual activity belongs at the lowest level in the ascent to a spiritual, nonsexual, philosophical Eros. In his *Republic*, the highest order of society, the philosopher kings (which include women), engage in sexual activity only at certain times solely for the purpose of procreation. This is impersonal and pragmatic sex. Platonic, true love (which sexual intercourse can endanger and contaminate) inspires their mutual pursuit of knowledge and service to the state. In the *Dialogues* there is ample testimony to the fact that Socrates was overwhelmed by the beauty of young men; he is stimulated and inspired but he presumably never succumbs sexually. At the culmination of the *Symposium* with the dramatic resolution of its mighty themes, Alcibiades (who has never really understood Socrates' philosophical message) tells of his futile attempts to seduce Socrates. His failure is inevitable. Socrates is Plato's exemplar of the way it should be, the philosopher conquering and sublimating lower instincts in the service of his (or her) higher intellect. In his last work, *Laws*, Plato actually condemns homosexual acts. This should not be surprising or judged to be a contradiction of his earlier views. On the contrary, his condemnation represents a logical and final development of his convictions about sex.¹⁵

love of God that pervades all serious religious devotion. Aristotle too thinks in Platonic terms when he describes his god as the unmoved mover, the final cause in the universe, who moves as a beloved moves the lover.

How far we have come from the traditional depiction of Eros as the handsome young athlete who attends Aphrodite! Even more remote is the image that later evolved of Eros as Cupid, a chubby mischievous little darling with wings and a bow and arrow. He still attends Aphrodite; and although the wounds he inflicts can inspire a passion that is serious and even deadly, too often he becomes little more than the cute and frivolous *deus ex machina* of romantic love.

CUPID AND PSYCHE

Finally, the story of Cupid and Psyche remains to be told. It is given its classic form by Apuleius, a Roman author of the second century A.D., in his novel *Metamorphoses*, or *The Golden Ass* (4. 28–6. 24). One's first impressions about a tale uniting Cupid (or Eros) with Psyche ("Soul") should inevitably be Platonic; but whatever philosophical profundities, Platonic or otherwise, have been detected in Apuleius' allegory, popular and universal motifs common to mythology in general and folktale, fairy tale, and romance in particular emerge with striking clarity: for example, the mysterious bridegroom, the taboo of identification, the hostile mother figure, the jealous sisters, the heroine's forgetfulness, the impo-

sition of impossible labors accomplished with divine assistance—among them descent into the very realm of Hades—and the triumph of romantic love. In this tale, which begins “Once upon a time” and ends “happily ever after,” Cupid appears as a handsome young god with wings. Here is a summary of Apuleius’ version.¹⁶

Once upon a time, a certain king and queen had three daughters, of whom Psyche, the youngest, was by far the most fair. In fact many believed that she was Venus reincarnated and paid her such adulation that the goddess became outraged. And so Venus ordered her son Cupid to make Psyche fall in love with the most base and vile of mankind; instead, Cupid himself fell in love with Psyche. Psyche’s inferior sisters had easily found husbands, but Psyche remained unmarried since she was admired by all with the awe that is inspired by divinity. Her father suspected that a god’s wrath was responsible. He consulted Apollo, who demanded that Psyche be decked out like a corpse and placed on a mountaintop to be wed by a terrifying serpent.

Therefore, Psyche, amid the rites of a funeral for a living bride, was left on a mountaintop to meet a fate that she finally accepted with resignation. Psyche fell into a deep sleep, and the gentle breezes of Zephyrus wafted her down to a beautiful valley. When she awoke, she entered a magnificent palace, where her every wish was taken care of. And when Psyche went to bed, an anonymous

Psyche Is Brought to Olympus by Mercury, by Raphael (1483–1520) and assistants. Fresco, 1518. This is the eastern half of the fresco painted on the vault of the loggia of the Villa Farnesina, which is sixty feet long. The other half shows the wedding banquet. Both scenes closely follow the narrative of Apuleius. Here Mercury introduces Psyche on the left, while the assembled gods attend as Jupiter, on the right, judges Cupid, to whose left stands Venus. Around Jupiter are (from the right) Minerva, Juno, Diana, and Neptune. The fresco was designed to give the illusion of a tapestry. (*Palazzo della Farnesina, Rome. Courtesy of Alinari/Art Resource, New York.*)

bridegroom visited her, only to depart quickly before sunrise. Thus Psyche spent her days—and her nights—in the palace.

Meanwhile, her sisters set out in search of her; but her mysterious husband continually warned her not to respond to them when they approached. Alone in her prison all day, Psyche besought her husband each night to allow her to see her sisters and give them gold and jewels. He finally consented on the condition that she must not, despite her sisters' urgings, try to learn his identity. When the sisters arrived and interrogated her, Psyche kept her secret—although she did say that her husband was a very handsome young man.

The sisters returned home with the riches that Psyche had given them, but in their hearts they nursed an all-consuming jealousy. The mysterious bridegroom warned Psyche of her sisters' treachery: their purpose was to persuade her to look upon his face; if she did so, she would never see him again. He also told her that she was pregnant, and if she kept their secret, their child would be divine; if she did not, it would be mortal. Nevertheless, he granted Psyche's appeal to see her sisters once again. In answer to their questions, Psyche revealed that she was pregnant. The sisters once again returned home laden with gifts, but more jealous than ever; they now suspected that Psyche's lover must be a god and her expected child divine.

The evil sisters visited Psyche a third time; this time they told her that her husband really was the monstrous serpent of the oracle and that she would be devoured when the time of her pregnancy was completed. Psyche was horrified and, believing that she was sleeping with the monster, forgot the warnings of her husband and took her sisters' advice. She was to hide a sharp knife and a burning lamp; when the monster was asleep, she was to slash it in the neck.

In anguish, Psyche made her preparations; in the night her husband made love to her and then fell asleep. As she raised the lamp, knife in hand, she saw the sweet, gentle, and beautiful Cupid. Overcome by the sight, her first impulse was to take her own life, but this she was unable to do. Spellbound by Cupid's beauty, she gazed at his lovely wings and fondled the bow and quiver that lay at the foot of their bed; she pricked her thumb on one of the arrows and drew blood. Overcome by desire, she kissed her husband passionately. Alas, the lamp dropped oil on the god's right shoulder. Cupid leaped out of bed and attempted to fly away at once; Psyche caught hold of his right leg and soared aloft with him, but her strength gave way and she fell to earth. Before flying away, Cupid admonished her from a nearby cypress: he had ignored Venus' command, he said, and had taken her as his love; he had warned her; his flight was penalty enough; and her sisters would pay for what they had done.

Psyche attempted to commit suicide by throwing herself in a nearby river; but the gentle stream brought her safely to its bank. She was advised by Pan to forget her grief and win back Cupid's love. In her wanderings, she came to the very city where one of her sisters lived. Psyche told her sister what had happened, but added that Cupid would marry the sister if she hastened to his side.

The sister called on Zephyrus to carry her from a mountaintop to Cupid's palace, but as she leaped into the air she fell and perished on the rocks below. Psyche then found her way to her other sister, who died in the same manner.

Psyche wandered in search of Cupid. He lay in his mother's bedroom, moaning because of his burn; Venus, learning of what had happened, rushed to her son's side, berated him for his behavior, and vowed revenge. In a rage, Venus left to pursue Psyche, but eventually abandoned her search. She approached Jupiter, who agreed to send Mercury to make a public proclamation for the capture of Psyche. When she was brought before Venus, the goddess denounced and abused her. In addition Venus imposed upon the poor girl a series of impossible tasks.

First, Psyche was ordered to sort out before nightfall a vast heap of mixed grains (wheat, barley, and the like). In this endeavor, an ant came to her rescue and summoned his army to isolate each different grain.

The next day Venus ordered Psyche to go to a riverbank where dangerous sheep with thick golden fleeces grazed and to bring back some of their wool. This time, a reed murmured instructions. She was to wait until the sheep had stopped their frenzied wandering under the blazing sun; and when they had lain down to rest, she was to shake from the trees under which they passed the woolly gold clinging richly to the branches. And so she accomplished the task. Still not satisfied, Venus ordered Psyche to go to the top of a high mountain, from which dark water flowed—water that ultimately fed the Underworld stream of Cocytus. Psyche was to bring back a jar filled with this chill water; among the terrors to be faced was a dragon. The eagle of Jupiter swooped down and filled the jar for Psyche.

Angrier now than ever, Venus imposed the ultimate task—descent into the realm of Hades. Psyche was ordered to take a box to Persephone and ask her to send back in it a fragment of her own beauty. In despair, Psyche decided to throw herself off a high tower. But the tower spoke to her and gave her specific directions to the Underworld and instructions about what she was and was not to do. Among the stipulations was that she provide herself with sops to mollify Cerberus and money to pay the ferryman Charon. Most important, the tower warned Psyche not to look into the box. Psyche did everything that she had been told, but she could not resist looking into the box. Inside the box was not beauty but the sleep of the dark night of the Underworld; by this deathlike sleep Psyche was enveloped.

By now cured of his burn, Cupid flew to Psyche's rescue. He put sleep back into the box and reminded Psyche that her curiosity once again had gotten the better of her. She was to go and complete her task. Cupid then appealed to Jupiter, who agreed to ratify his marriage with Psyche; since Psyche was made one of the immortals, Venus was appeased. Here is how Apuleius describes the glorious wedding feast on Olympus that marked the happy ending of the story of Cupid and Psyche (*Metamorphoses* 6. 23–24):

 Immediately a wedding feast appeared. The bridegroom took the highest place, embracing Psyche. So Jupiter with his own Juno took his place and then, in order, the other gods. Then Jupiter's cupbearer, the shepherd boy Ganymede, brought him a cup of nectar, the wine of the gods, and Bacchus gave nectar to the others. Vulcan cooked the feast; the Hours decorated everything with roses and other flowers. The Graces sprinkled the scent of balsam, and the Muses played and sang. Apollo sang to the cithara and Venus danced in all her beauty to the music; the tableau was so fitting for her that the Muses accompanied her with choral odes or played upon the tibia; a satyr and Pan played the pipes.

So, with all due ceremony, Psyche was married to Cupid and, in due time, a daughter was born to them, whom we call Pleasure (*Voluptas*).

SAPPHO'S APHRODITE

It is impossible to survey the mythological concepts of love without including the poetic vision of Sappho, the lyric poetess of love from the island of Lesbos. Only a little of her work has survived, but the critical acclaim for her artistry glows undiminished. We know practically nothing with certainty about her life and career. She was devoted to Aphrodite and to the young women with whom she was associated. But we cannot even confidently speak about a cult of the goddess, and her relations with her loved ones can legitimately be imagined only from the meager remains of her poetry. Her circle has been interpreted as everything from a finishing school for girls in the Victorian manner to a hotbed of sensuality. From Sappho comes the term *lesbian* and the association of Aphrodite with lesbian love.

In a fervent and moving poem she calls on Aphrodite for help to win back the love of a young woman with whom she has been involved. Sappho's invocation to Aphrodite has real meaning for us in this context because it illustrates beautifully the passionate intensity that infuses so much of Greek art within the disciplined control of artistic form. It reminds us too of the sincerity of the conception of the goddess that was possible in the seventh and sixth centuries B.C. Too often our sensibilities are numbed by the later artificial and conventional stereotypes to which the gods are reduced, once all genuine belief is gone. There can be no question about the intense reality of Aphrodite in the following lines.

Exquisitely enthroned, immortal Aphrodite,
 weaver of charms, child of Zeus,
 I beg you, reverend lady,
 do not crush my heart
 with sickness and distress.
 But come to me here,
 if ever once before you heard
 my cry from afar and listened
 and, leaving your father's house,
 yoked your chariot of gold.

Beautiful birds drew you swiftly
 from heaven over the black earth
 through the air between
 with the rapid flutter of their downy wings.
 Swiftly they came and you,
 O blessed goddess,
 smiling in your immortal beauty asked
 what I wished to happen most
 in my frenzied heart.

“Who is it this time you desire
 Persuasion entice to your love?
 Who, O Sappho, has wronged you?
 For if she runs away now,
 soon she will follow;
 if she rejects your gifts,
 she will bring gifts herself;
 if she does not now,
 soon she will love,
 even though she does not wish it.”

Come to me now too,
 free me from my harsh anxieties;
 accomplish all that my heart longs for.
 You, your very self,
 stand with me in my conflict.

NOTES

1. In the speech of Pausanias.
2. His mistress, the courtesan Phryne, was said to be his model, and some claim that Aphrodite herself asked: "Where did Praxiteles see me naked?"
3. Aphrodite's union with Hermes produced Hermaphroditus, whose story is told at the end of Chapter 12.
4. Many of Aphrodite's characteristics are Oriental in tone, and specific links can be found that are clearly Phrygian, Syrian, and Semitic in origin.
5. Cf. the Assyro-Babylonian myth of Ishtar and Tammuz.
6. Catullus (63) makes the anguish, love, and remorse of Attis the stuff of great poetry.
7. Her worship was introduced into Rome in 204. Lucretius (*De Rerum Natura* 2. 600–651) presents a hostile but vivid account of its orgiastic nature. For Lucretius the very nature of deity is that it exists forever tranquil and aloof, untouched by the human condition and immune to human prayers. See also pp. 643–644.
8. James G. Frazer, *The Golden Bough: A Study in Magic and Religion*. Abridged edition (New York: Macmillan, 1922), p. 408. One might want to read Theocritus, *Idyll* 15, for a picture of the worship of Adonis in a Hellenistic city.
9. Hestia, the first-born of Cronus, was the first to be swallowed and the last to be brought up.
10. The name Aeneas is here derived from the Greek *ainos*, which means "dread."
11. There has been much discussion about the *Symposium* as a reflection of Athenian views generally about homosexuality. One wonders how typical of the mores of Victorian England would have been the speeches (however profound) of a select group of friends at a dinner party given by Oscar Wilde, who actually does have several things in common with the personality and style of the dramatist Agathon, the host of the *Symposium*. (For more about homosexuality, see pp. 21–22).
12. This reference to the dispersion of the inhabitants of Mantinea (an Arcadian city) by the Spartans in 385 B.C. is an anachronism since the dramatic date of the speech is purportedly 416 B.C.
13. Literature, great and not so great, is permeated by this concept; particularly affecting in American literature is Carson McCullers' *Member of the Wedding*.
14. It is difficult to find one word that expresses adequately the abstract conceptions personified. The name Poros also suggests contrivance; Metis, wisdom or invention; and Penia, need.
15. For more on this subject, see the perceptive discussion by Byrne Fone, *Homophobia: A History* (New York: Metropolitan Books [Henry Holt], 2000), Chapter 1, "Inventing Eros." An aspect of the art of Plato in his complex portrait of Socrates is illuminated by Catherine Osborne, *Eros Unveiled* (New York: Oxford University Press, 1994); in her chapter "Eros the Socratic Spirit," she concludes (p. 100): "The resemblance between Diotima's picture of Eros and Plato's picture of Socrates is remarkable."
16. *Cupid and Psyche* may be compared thematically to *Beauty and the Beast*. See Graham Anderson, *Fairytales in the Ancient World* (London and New York: Routledge, 2000), pp. 61–77.

ARTEMIS

The *Homeric Hymn to Artemis* (27) draws the essential features of her character and appearance: beautiful, chaste, virgin of the hunt, armed with bow and arrows.

I sing about Artemis of the golden arrows, chaste virgin of the noisy hunt, who delights in her shafts and strikes down the stag, the very own sister of Apollo of the golden sword. She ranges over shady hills and windy heights, rejoicing in the chase as she draws her bow, made all of silver, and shoots her shafts of woe. The peaks of the lofty mountains tremble, the dark woods echo terribly to the shrieks of wild beasts, and both the earth and fish-filled sea are shaken. But she with dauntless heart looks everywhere to wreak destruction on the brood of animals. But when the huntress, who delights in her arrows, has had her fill of pleasure and cheered her heart, she unstrings her curved bow and makes her way to the great house of her dear brother, Phoebus Apollo, in the rich land of Delphi, where she supervises the lovely dances of the Muses and the Graces. After she has hung up her unstrung bow and arrows, she takes first place and, exquisitely attired, leads the dance. And they join in a heavenly choir to sing how Leto of the beautiful ankles bore two children who are by far the best of the immortals in sagacious thought and action.

Hail, children of Zeus and Leto of the lovely hair; yet I shall remember you and another song too.

The shorter *Homeric Hymn to Artemis* (9) dwells upon the closeness of Artemis and Apollo and their cult places in Asia Minor. The river Meles flows near Smyrna, where there was a temple of Artemis; and Claros was the site of a temple and oracle of Apollo.

Sing, O Muse about Artemis, the virgin who delights in arrows, sister of Apollo, the far-shooter, and nursed together with him. She waters her horses at the river Meles, thick with rushes, and swiftly drives her chariot, made all of gold, through Smyrna, to Claros, rich in vines; here Apollo of the silver bow sits and waits for the goddess who shoots from afar and delights in her arrows.

So hail to you, Artemis, with my song and at the same time to all the other goddesses as well; yet I begin to sing about you first of all and, after I have made my beginning from you, I shall turn to another hymn.

Artemis the Huntress. Roman copy in marble of a Greek bronze of the late fourth century B.C.; height 78 in. Artemis appears both as huntress, taking an arrow from her quiver, and as protectress of animals, as she grasps the leaping stag. Her short skirt, sandals, and loose clothing are appropriate for the activity of the hunt. (*Musée du Louvre, Paris. Courtesy of Alinari/Art Resource, New York.*)

THE BIRTH OF ARTEMIS AND APOLLO

The goddess Leto mated with Zeus and bore the twin deities Artemis and Apollo. The story of Apollo's birth on the island of Delos is recounted in Chapter 11 in the version given by the *Homeric Hymn to Apollo*.¹ Traditionally, Artemis is born first and is able to help with the delivery of her brother, Apollo, thus performing one

Death of the Children of Niobe. Attic red-figure krater by the Niobid painter, ca. 460 B.C.; height 21 $\frac{1}{4}$ in. The stark cruelty of the gods is shown by the cool detachment of Artemis as she reaches for an arrow out of her quiver, and equally by the restrained energy of Apollo. The Niobids are painted in a rocky landscape (only formally sketched) and disposed on different levels, an unusual technique for vase-painters of the time, and possibly related to contemporary wall-painting: contrast the contemporary *Death of Actaeon*, on page 205. (Paris, Louvre.)

of her primary functions as a goddess of childbirth early in her career (a role she shares with Hera and Eileithyia, as we have seen). According to Ovid, after the birth of Artemis and Apollo, Leto was forced by the anger of Hera to wander carrying her two babies. She came to Lycia, where the Lycians refused to allow her to drink water from a marsh. In anger, she changed them into frogs, telling them that they could live their lives in the marsh whose water they had refused to give her.

On other occasions, too, Artemis is closely linked with Apollo, both appearing as vehement and haughty agents of destruction with their shafts of doom. Sudden death (particularly of the young) was often attributed to these two deities, Artemis striking down the girls, Apollo the boys.

NIobe AND HER CHILDREN

One of the most famous exploits of Artemis and Apollo concerns Niobe and her children, told at length by Ovid (*Metamorphoses* 6. 148–315).

The women of Thebes bestowed great honor upon Leto and her twin children, crowning their heads with laurel and offering up incense and prayers in obedience to an injunction by the goddess herself. Niobe, however, was enraged by the whole proceedings and rashly boasted that she was more deserving of tribute than Leto. After all she was rich, beautiful, and the queen of Thebes.² Besides, Leto had borne only two children, whereas Niobe was the mother of seven sons and seven daughters. Indeed Niobe was so confident in the abundance of her blessings that she felt she could afford to lose some of them without serious consequences.

Leto was enraged at such hubris and complained bitterly to Artemis and Apollo. Together the two deities swiftly glided down to the palace of Thebes to avenge the insulted honor of their mother. Apollo struck down all the sons of Niobe with his deadly and unerring arrows, and Artemis in turn killed all her daughters. Just as Artemis was about to shoot the last child, Niobe in desperation shielded the girl and pleaded that this one, her youngest, be spared. While she was uttering this prayer, she was turned to stone; and a whirlwind whisked her away to her homeland, Phrygia, where she was placed on a mountaintop. Tears continue to trickle down from her marble face as she wastes away.³

ACTAEON

Several stories illustrate the hallowed purity of the goddess Artemis. A famous one concerns Actaeon,⁴ an ardent hunter who lost his way and by accident (or was it fate?) had the misfortune to see Artemis (Diana in Ovid's version) naked (*Metamorphoses* 3. 138–255):

 Actaeon first tinged with grief the happiness of his grandfather, Cadmus. A stag's horns grew on his head, and his hounds feasted on their master's flesh. Yet, if you look closely, you will find that his guilt was misfortune, not a crime; what crime indeed lies in an innocent mistake?

There was a mountain on which had fallen the blood of beasts of many kinds. It was midday, when shadows are at their shortest and the Sun is midway in his course. Young Actaeon calmly called his fellow huntsmen as they tracked the game through the depths of the pathless forest: "My friends, our nets and spears are wet with the blood of our prey; we have had luck enough today! Dawn's saffron-wheeled chariot will bring another day tomorrow and then we will renew the chase. The Sun now stands midway 'twixt east and west and with his hot rays parches the earth. Stop now the hunt, and take in the knotted nets!" His men obeyed and halted from their labors.

A vale there was called Gargaphië, sacred to the huntress Diana; clothed with a dense growth of pine and pointed cypress, it had at its far end a woodland cave which no human hand had shaped. . . . on the right from a murmuring spring issued a stream of clearest water, and around the pool was a grassy bank. Here would the woodland goddess rest when weary from the hunt and bathe her virgin body in the clear water. That day she came there and to one of her nymphs handed her hunting spear, her quiver and bow, and the arrows that were left. Upon another's waiting arms she cast her cloak, and two more took off her sandals. . . . Other nymphs⁵ fetched water and poured it from ample urns. And while Diana thus was being bathed, as she had been many times before, Actaeon, Cadmus' grandson, his labors left unfinished, came to the grotto uncertain of his way and wandering through the unfamiliar wood; so fate carried him along. Into the dripping cave he went, and the nymphs, when they saw a man, beat their breasts and filled the forest with their screams.

Surrounding Diana they shielded her with their bodies, but the goddess was taller than they and her head o'ertopped them all. Just as the clouds are tinged with color when struck by the rays of the setting sun, or like the reddening Dawn, Diana's face flushed when she was spied naked. Surrounded by her nymphs she turned and looked back; wishing that her arrows were at hand, she used what weapons she could and flung water over the young man's face and hair with these words, foretelling his coming doom: "Now you may tell how you saw me naked—if you can tell!" And with this threat she made the horns of a long-lived stag⁶ rise on his head where the water had struck him; his neck grew long and his ears pointed, his hands turned to hooves, his arms to legs, and his body she clothed with a spotted deerskin. And she made him timid; Autonoë's valiant son ran away in fear and as he ran wondered at his speed. He saw his horned head reflected in a pool and tried to say "Alas"—but no words would come. He sobbed; that at least was a sound he uttered, and tears flowed down his new-changed face.

Only his mind remained unchanged. What should he do? Go home to the royal palace? Or hide in the woods? Shame prevented him from the one action, fear from the other. While he stood undecided his hounds saw him. Blackfoot and clever Tracker first raised the hue and cry with their baying, the latter a Cretan hound, the former of Spartan pedigree. Then the rest of the pack rushed up, swifter than the wind, whose names it would take too long to give.⁷ Eager for the prey, they hunt him over rocks and cliffs, by rough tracks and trackless ways, through terrain rocky and inaccessible. He fled, by ways where he had often been the pursuer; he fled, pursued by his own hounds! He longed to cry

out "Actaeon am I; obey your master!" He longed—but could utter no words; and the heavens echoed to the baying hounds. First Blackie gored his back; then Hunter followed, while Hill-hound gripped Actaeon's shoulder with his teeth. These three had been slower to join the chase but had outstripped the pack along mountain shortcuts; while they held back their master, the pack came up and all sank their teeth into his body. His whole body was torn by the hounds; he groaned, a sound which was not human nor yet such as a stag could make.

The hills he knew so well echoed with his screams; falling on his knees, like a man in prayer, he dumbly looked at them in entreaty, for he had no human arms to stretch out to them. But the huntsmen, ignorant of the truth, urge on

The Death of Actaeon. Athenian red-figure krater by the Pan Painter, ca. 460 B.C.; height 14½ in. Artemis shoots Actaeon, who falls in agony as his hounds tear him. Actaeon is shown in fully human form, and the small size of the hounds compels the viewer to focus on the human figure and his divine antagonist. The scene of the consequences of chastity violated is made the more poignant by the reverse of this vase (on page 298), which shows the lustful god Pan pursuing a shepherd. (Courtesy of Museum of Fine Arts, Boston. James Fund and Special Contribution.)

the pack with their usual cries; they look round for Actaeon and loudly call his name as if he were not there. At the sound of his name he lifts his head; they think it a pity that he is not there, too slow to see the sight of the stag at bay. He could indeed wish he were not there! But he is; he could wish to be the spectator, not the victim, of his hounds' cruel jaws. Completely encircling him, with jaws biting deep, they tear in fact their master's flesh when he seems to be a stag. Only when his life has ebbed out through innumerable wounds, was it said that the vengeance was satisfied of the huntress Diana.

Opinions varied about the deed. Some thought the goddess had been more cruel than just; others approved, and said that her severity was worthy of her virgin chastity. Each view had good reasons to support it.

CALLISTO AND ARCAS

The same insistence on purity and chastity and the same vehemence against defilement of any sort appear again in the story of Callisto, one of the followers of Artemis (or Diana, as Ovid tells it; *Metamorphoses* 2. 409–507):

 As Jupiter journeyed back and forth to Arcadia, he saw the Arcadian girl Callisto, and the fires of love were kindled in his bones. She did not care to draw out the unworked wool or to change her hair's style. She would pin her dress with a brooch, keep her hair in place with a white ribbon; with a smooth spear in her hand or a bow, she marched in Diana's troops. No other girl who trod the Arcadian hills was dearer to the goddess—but no one's power can last for long!

High in the heaven rode the Sun beyond the middle of his course, when Callisto came to a wood that no one throughout the years had touched. Here she took off the quiver from her shoulder and unstrung the pliant bow; she lay upon the grassy ground, her head resting upon the painted quiver. Jupiter saw her, tired and unprotected. "My wife," said he, "will never discover this affair, and if she does—well, the prize is worth her anger." So he disguised himself to look like Diana and said: "Dear girl, my follower, upon which mountain did you hunt?" Callisto sprang up from the turf. "Hail, goddess," said she, "greater in my opinion than Jupiter—and let him hear my words!"

Jupiter smiled as he heard this, glad that Diana was preferred to himself; he kissed the girl, more warmly than a maiden should. He cut short Callisto's tale of the forest hunt with an embrace, and as he forced his advances showed her who he really was. Callisto fought against him with all a woman's strength—Juno's anger would have been lessened could she have seen her—but who is weaker than a girl, and who can overcome Jupiter? He won; to the heavens he flies and she hates the wood that knows her shame; as she fled from it, she almost forgot to take her quiver and arrows and the bow that she had hung up.

Diana saw her as she moved with her followers along the heights of Maenalus, flushed with pride at the beasts she had killed, and called her. Callisto hid, afraid at first that Jupiter in disguise was calling her. But as she saw the nymphs and goddess go on together she knew it was no trick, and joined the band. Poor Callisto! How hard it is not to show one's guilt in one's face! She could hardly lift her eyes from the ground; no longer did she stay close to Di-

ana's side nor be the first of all her followers. In silence she blushed and showed her shame; if Diana had not been a maiden, she could have known Callisto's guilt by a thousand signs. They say that the nymphs realized it.

The horned moon was waxing for the ninth time when Diana, weary from the chase and tired by the sun, her brother's flaming heat, reached a cool wood; here flowed a babbling stream, gliding over its smooth and sandy bed. She praised the place; she dipped her feet into the water and it pleased her. "No man is here to spy on us," she cried: "let us bathe naked in the stream!" Callisto blushed; the others took off their clothes; she alone held back. And as she delayed, they stripped her, and then her naked body and her guilt were plain to see. She stood confused, trying to hide her belly with her hands; but Diana cried: "Be off from here! Do not defile these sacred waters!" and expelled her from her band.

Long before, Juno had known the truth and put off revenge until the time was ripe. She saw no cause to wait now; Callisto's son, Arcas (his very name caused Juno pain), had been born, and when Juno's cruel gaze fell on him she cried: "So only this was left, you whore; for you to be pregnant and by this birth make known the wrong I suffer and my husband's shameful act! But I will have my revenge! I will take away the beauty that pleases you so much and gives my husband, you flirt, such pleasure."

And as she spoke she seized Callisto's hair and threw her to the ground. Callisto spread her arms in suppliant prayer; her arms began to bristle with black hair, her hands to be bent with fingers turning to curved claws; she used her hands as feet and the face that once delighted Jupiter grew ugly with grinning jaws. Her power of speech was lost, with no prayers or entreaties could she win pity, and a hoarse and frightening growl was her only utterance.

Yet Callisto's human mind remained even when she had become a bear; with never-ceasing moans she made known her suffering; lifting what once had been her hands to heaven she felt Jupiter's ingratitude, although she could not with words accuse him. Poor thing! How often was she afraid to sleep in the solitary forest before her former home; how often did she roam in the lands that once were hers! How often was she pursued over the rocky hills by the baying hounds; how often did the huntress run in fear from the hunters! Often she hid herself (forgetting what she was) and though a bear, shrank from the sight of bears; wolves scared her, although her father Lycaon had become one.

One day Arcas, now nearly fifteen years old and ignorant of his parentage, was out hunting; as he picked a likely covert and crisscrossed the forests of Mt. Erymanthus with knotted nets, he came upon his mother. She saw him and stood still, like one who sees a familiar face. He ran away, afraid of the beast who never took her gaze from him (for he knew not what she was); he was on the point of driving a spear through her body, eager as she was to come close to him. Then almighty Jupiter prevented him; he averted Arcas' crime against his mother and took them both on the wings of the wind to heaven and there made them neighboring stars.

Callisto became the Great Bear (Arctus, or Ursa Major); Arcas the Bear Warden (Arctophylax, or Arcturus, or Boötes) or the Little Bear (Ursa Minor). Ursa

Major was also known as Hamaxa (the Wain). The story of Callisto is typical of myths that provide etiology for individual stars or constellations. These stories (most of which belong to late antiquity) are told about various figures in mythology, and several of them cluster about Artemis herself.

ORION

One such story concerns Orion, a composite figure about whom many tales are related with multiple and intricate variations.⁸ He is traditionally a mighty and amorous hunter and often associated with the island of Chios and its king, Oenopion (the name means "wine-face"; Chios was famous for its wines). The many versions play upon the following themes. Orion woos the daughter of Oenopion, Merope; he becomes drunk and is blinded by the king, but he regains his sight through the rays of the sun-god, Helios. While he is clearing the island of wild beasts as a favor for Oenopion, he encounters Artemis and tries to rape her. In her anger, the goddess produces a scorpion out of the earth that stings Orion to death.⁹ Both can be seen in the heavens. Some say that Orion pursued the Pleiades (daughters of the Titan Atlas and Pleione, an Oceanid), and they were all transformed into constellations; with Orion was his dog, Sirius, who became the Dog Star.

ORIGINS OF ARTEMIS

The origins of Artemis are obscure. Although she is predominantly a virgin goddess, certain aspects of her character suggest that originally she may have had fertility connections.¹⁰ Artemis' interest in childbirth and in the young of both humans and animals seems to betray concerns that are not entirely virginal. At Ephesus in Asia Minor, a statue of Artemis depicts her in a robe of animal heads, which in its upper part exposes what appears to be (but may not be) a ring of multiple breasts. We should remember, too, that Artemis became a goddess of the moon in classical times. As in the case of other goddesses worshiped by women (e.g., Hera), this link with the moon may be associated with the lunar cycle and women's menstrual period. Thus the evident duality in Artemis' character and interests definitely links her with the archetypal concept of the virgin/mother.¹¹

ARTEMIS, SELENE, AND HECATE

As a moon-goddess, Artemis is sometimes closely identified with Selene and Hecate. Hecate is clearly a fertility deity with definite chthonian characteristics. She can make the earth produce in plenty, and her home is in the depths of the Underworld. She is a descendant of the Titans and in fact a cousin of Artemis.¹² Hecate is a goddess of roads in general and crossroads in particular, the latter being considered the center of ghostly activities, particularly in the dead of night.

Artemis of Ephesus. Alabaster and bronze, mid-second century A.D. The Ephesian Artemis continues the ancient tradition of the goddess as protectress of nature—seen in the rows of animal heads on her robe, sleeves, breastplate, and head-disk—and revives her original connection with fertility, shown by the multiple breastlike objects (whose identity is much debated). The turreted *polos* (crown) and the figure of Nike (Victory) on her breastplate are symbols of her role as protectress of the city of Ephesus. This Artemis is the “Diana of the Ephesians” at the center of the riot described in Acts 19:23–41. (Naples, Museo Nazionale.)

Thus the goddess developed a terrifying aspect; triple-faced statues depicted the three manifestations of her multiple character as a deity of the moon: Selene in heaven, Artemis on earth, and Hecate in the realm of Hades. Offerings of food (known as Hecate's suppers) were left to placate her, for she was terrible both in her powers and in her person—a veritable Fury, armed with a scourge and blazing torch and accompanied by terrifying hounds. Her skill in the arts of black magic made her the patron deity of sorceresses (like Medea) and witches. How different is the usual depiction of Artemis, young, vigorous, wholesome, and beautiful! In the costume of the huntress, she is ready for the chase, armed with her bow and arrow; an animal often appears by her side, and crescent moonlike horns rest upon her head; the torch she holds burns bright with the light of birth, life, and fertility. Whatever the roots of her fertility connections, the dominant conception of Artemis is that of the virgin huntress. She becomes, as it were, the goddess of nature itself, not always in terms of its teeming procreation, but instead often reflecting its cool, pristine, and virginal aspects. As a moon-goddess too (despite the overtones of fecundity), she can appear as a symbol, cold, white, and chaste.

ARTEMIS VERSUS APHRODITE: EURIPIDES' *HIPPOLYTUS*

In her role as a goddess of chastity, Artemis provides a ready foil for the voluptuous sensuality of Aphrodite. Artemis in this view becomes at one and the same time a negative force, representing the utter rejection of love and also a positive compulsion toward purity and asceticism. No one has rendered the psychological and physiological implications of this contrast in more human and meaningful terms than the poet Euripides in his tragedy *Hippolytus*.

As the play begins, Aphrodite is enraged; her power is great and universal, yet she is vehemently spurned by Hippolytus, who will have absolutely nothing to do with her. The young man must certainly pay for this hubris, and the goddess uses his stepmother, Phaedra, to make certain that he will. Phaedra is the second wife of Theseus, the father of Hippolytus (for the saga of Theseus, see Chapter 23). Aphrodite impels the unfortunate Phaedra to fall desperately in love with her stepson. Phaedra's nurse wrests the fatal secret of her guilty love from her sick and distraught mistress and makes the tragic mistake of taking it upon herself to inform the unsuspecting Hippolytus, who is horrified; the thought of physical love for any woman is for him traumatic enough; a sexual relationship with the wife of his father would be an abomination.

In her disgrace, Phaedra commits suicide; but first she leaves a note that falsely incriminates Hippolytus, whose death is brought about by the curse of his enraged father, Theseus, a heroic extrovert who has never really understood the piety of his son. Artemis appears to her beloved follower Hippolytus as he lies dying. She promises him, in return for a lifetime of devotion that has brought about his martyrdom, that she will get even by wreaking vengeance upon some

favorite of Aphrodite, and she will establish a cult in honor of Hippolytus as well—virgin maidens will pay tribute to him by dedicating their shorn tresses and lamenting his fate by their tears and their songs.¹³ Theseus realizes his error too late; he must suffer the consequences of his rash and hasty judgment against Hippolytus; but in the end father and son find understanding and reconciliation.

At the close of the play we are left with a fascinating chain of enigmas in the Euripidean manner, as the two opposing goddesses—both as real characters and psychological forces—manipulate the action. Is Hippolytus a saint or a foolish and obstinate prig? Has he destroyed himself through the dangerous, if not impossible, rejection of the physical? Are human beings at the mercy of ruthless and irrational compulsions inherent in their very nature, which they deify in terms of ruthless and vindictive women? Certainly the two goddesses play upon the basic character of the human protagonists. Aphrodite uses the essentially sensual Phaedra, and Artemis responds to the purity of Hippolytus' vision. Each of us is created in the image of a personal and controlling god, or each creates one's own special deity, according to his or her individual nature and character.

Obviously, then, a study of Euripides' *Hippolytus* becomes vital for an understanding of the nature of both Artemis and Aphrodite. For those who want to study Euripides' play in more detail, the Additional Reading at the end of this chapter offers crucial excerpts with commentary, including the entire final episode in which Artemis herself appears and reveals her essential characteristics. This is one of Euripides' best plays because of its masterful construction and its deceptively transparent simplicity, endlessly revealing intricate subtlety of thought and complexity of characterization. In the context of this and the previous chapter, Euripides' profound and critical scrutiny of the antithetical Artemis and Aphrodite and their worship should be primary.

The Misogyny of Hippolytus. In Euripides' play, after Hippolytus learns from the nurse of Phaedra's desire for him, he bursts out in a tirade against women as vile and evil (pp. 215–216), which has received a great deal of attention and interpretation, particularly today, because of its misogyny. Hippolytus' hatred of women is to be understood, but not necessarily condoned, in the context of his character and the play. This chaste man has suffered the most traumatic shock of his young life. Sex with any woman for him is impossible. The sudden realization of the lust of Phaedra, the wife of his beloved father, strikes him as an abomination. His feelings are in some ways similar to the misogyny of another holy man, John the Baptist, in his outbursts against Salome and her mother Herodias. Hippolytus at least is in love with one woman, Artemis. Not the least of his psychological problems is his own illegitimacy and the character of his mother, a vehement and chaste Amazon, who succumbed to his father Theseus.

Yet some see in Hippolytus' outcry against women the expression of views generally held in Greek society, particularly in fifth-century Athens, as though

somehow Hippolytus himself were a typical ancient Greek male. It is abundantly clear from the play that he is anything but that. Aphrodite herself punishes him for his aberration, and his father hates him for his religious fanaticism and cannot believe his virginal protestations; Theseus hastily convinces himself that Hippolytus raped Phaedra because he never could believe that his boy does not like women. Theseus is the archetype of the traditional, extrovert father who loves his wife and is disappointed by his son who has turned out to be an introvert, different from him in almost every way. If one were to pick an average Athenian (a dangerous, if not foolish, game to play), it would be Theseus.

Misandry, Artemis, and the Amazons. Misandry, hatred of men, rather than misogyny is a more immediate theme in connection with Artemis, where it manifests itself in the close religious bonds of her group, which excludes the male, as made evident in the stories of Actaeon and Callisto. In this connection the Amazons are relevant, important figures not only in the legends of Theseus, but also in those of Heracles and of the Trojan War; the Amazons developed a society not unlike that of Artemis the huntress, which excluded men. The Amazons, however, were devoted to the pursuits of battle and determined to become invincible warriors. Their *arete* ("excellence") was to be the same and in no way different from that of a male.

Lesbian Themes. Lesbianism is a latent motif in stories about the strong bond of affection among Artemis and her band of female followers. The atmosphere is virginal and the relationships pure, although the success of Jupiter with Callisto, when he takes the form of her beloved virgin goddess Diana, is fraught with Freudian overtones and makes one wonder. Athena, another virgin goddess, has close female companions. We learned in Chapter 8 about the tragic story of her relationship with Pallas; and she was also closely linked to the nymph Chariclo, who became the mother of Tiresias. Because of the avowed purity of these two virgin goddesses, it seems appropriate that Aphrodite (and not Artemis or Athena) preside over more sensual female relationships.

The society and mores of the warlike Amazons may also be subjected to lesbian interpretations, if one so desires.

ADDITIONAL READING

SELECTIONS FROM EURIPIDES' *HIPPOLYTUS*

The scene of Euripides' *Hippolytus* is in front of the palace in Troezen, a city linked to Athens and the hero Theseus. In a typically Euripidean prologue (cf. the opening of the *Bacchae* in Chapter 13), the mighty goddess Aphrodite proclaims the universality of her power and establishes the action of the play. She is outraged because the young and virginal hunter Hippolytus slights her and bestows all his love and attention upon Artemis, and she explains how she will exact vengeance (1–28):

 APHRODITE: I am called Cypris, a mighty and renowned goddess both in heaven and among mortals. Everyone who looks upon the light of the sun throughout the whole world (from the eastern boundary of the Black Sea to the western limit of the straits of Gibraltar) is at my mercy; I reward those who celebrate my power, but I destroy all who with arrogant pride oppose me. For gods, just like mortals, enjoy receiving honor. I will show you the truth of these words directly.

Hippolytus, the illegitimate son whom the Amazon woman bore to Theseus, this Hippolytus, brought up by the good Pittheus, is the only citizen of this place Troezen who declares that I am the worst of deities. He renounces sex and rejects marriage, and reveres Artemis, the sister of Apollo and daughter of Zeus, believing her the greatest of deities. Throughout the green woods, he rids the land of wild animals with his swift dogs, always intimate with the virgin goddess and experiencing a greater than mortal relationship. I am not envious. Why should I be? But for his sins against me I will take vengeance upon Hippolytus this very day. I have long since made great progress; I need exert little more effort. For once, when Hippolytus came from the house of Pittheus to Pandion's city of Athens to witness the sacraments of the holy mysteries, Phaedra looked upon him; and she the noble wife of his father was struck to the heart by a terrible desire, in accordance with my plans.

These last lines beautifully and succinctly epitomize the tragedy, with their swift series of powerful images. In one fatal moment, sensuous and mature Phaedra glimpses the beautiful, young, chaste, and religious Hippolytus and is overwhelmed by her lust (the Greek word used is *eros*), which is hopeless, impossible, and can only lead to catastrophe.

Aphrodite tells us that Theseus is absent from Troezen on a self-imposed exile and that Phaedra, tortured by her guilt, is determined to die without revealing her love for her stepson. She goes on to outline the course of the drama. Although Phaedra before leaving Athens for Troezen had built a shrine to Aphrodite on the Acropolis, she must die so that vengeance may be exacted against Hippolytus; Aphrodite is more concerned about punishing her enemy Hippolytus than she is about the suffering and death of the unfortunate Phaedra. As Hippolytus enters with a throng of servants singing the praises of Artemis, "most beautiful of the Olympian deities," Aphrodite withdraws with the dire pronouncement that the joyous youth does not realize that this is the last day of his life.

The prayer with which Euripides introduces us to Hippolytus defines the essential nature of the young man and of Artemis; he stands before a statue of the goddess offering her a diadem of flowers (73–87):

 HIPPOLYTUS: For you, my mistress, I bring this garland which I have fashioned of flowers plucked from a virgin meadow untouched by iron implements, where no shepherd has ever presumed to graze his flock—indeed a virgin field which bees frequent in spring. Purity waters it like a river stream for those who have as their lot the knowledge of virtue in everything, not through teaching but by their very nature. These are the ones for whom it is right to pluck these

flowers, but those who are evil are forbidden. My dear lady, accept from my holy hand this garland to crown your golden hair. I alone of mortals have this privilege: I am with you and converse with you, for I hear your voice, although I do not see your face. As I have begun life in your grace, may I so keep it to the end.

One of the servants warns Hippolytus of the consequences of his hubristic refusal to pay homage to a statue of Aphrodite. Hippolytus avows that since he is pure, he must keep his distance from a goddess who is worshiped in the night, and he bids her a haughty goodbye.

A chorus of women from Troezen expresses concern about Phaedra's mysterious illness and conjectures about its nature. When Phaedra, weak, pale, and wasted, makes her entrance, accompanied by her faithful Nurse, they realize the seriousness of her predicament. In the following scene, only with great difficulty can the Nurse wrest from her distraught mistress the guilty secret that she is in love with her stepson Hippolytus. An anguished Phaedra, whose ravings had been fraught with ambiguous and sexual innuendo, at last explains to the women of Troezen. She begins with some general thoughts (deeply pondered during her tortured, sleepless nights) about how lives of human beings have been destroyed. People are not ruined because they have no moral sense but because they fail to carry out what they know to be right due to inertia or weak submission to temptations and less honorable action. She goes on to explain how her conclusions apply directly to her own behavior and suffering (391–430):

PHAEDRA: I will tell you the course of my resolves. When *eros* struck me, I thought about how I might best endure the wound. And so I began in this way: to be silent and to hide my affliction. (For one's tongue is not at all trustworthy; it knows how to advise others in a quandary but gets for oneself a multitude of evils.) My second plan was to endure this madness steadfastly, mastering it by self-control.

But when I was unable to overcome Cypris by these means, it seemed best to me to die, the most effective of all resolutions—as no one will deny. The good and noble things that I do should be witnessed by all but not my bad and shameful actions. I knew that both my sick passion and its fulfillment were disreputable, and besides, I have learned well the lesson that being a woman and a wife I was open to disgrace. May she die in damnation, that woman, a pollution to us all, who first defiled her marriage bed with other men. This wickedness began in the houses of the nobility to become a defilement on all the female sex. For whenever shameful acts seem right to the aristocrats, most certainly they will seem good to the lower classes.

I also hate women who say that they are chaste but in secret dare to commit unholy acts. O Lady Cypris, mistress of the sea, how in the world can such women look into the faces of their husbands? How can they help but tremble in the dark, their accomplice, in fear that the walls of the house will utter a sound?

My friends, I must die for this simple reason: that I may never be found guilty of bringing shame upon my husband and the children whom I bore. In-

stead may they live and flourish in the renowned city of Athens, free men, open in speech and their good reputation unsullied by their mother. For man is enslaved, even if he is bold of heart, whenever he is conscious of the sins of a mother or a father.

They say that to win in life's contest, one needs only this: a good and just character. But the base among mortals are exposed, sooner or later, when Time holds a mirror before them, as before a young girl. Among such as these may I never be discovered.

Thus the noble Phaedra reveals her character and her motivation. The Nurse, upon first learning of Phaedra's love for Hippolytus, was shocked and horrified. Now, however, in response to her mistress, she offers assurances that Phaedra's experience is nothing unusual. She is the victim of the goddess of love, like many others. Not only mortals but even deities succumb to illicit passions. Phaedra must bear up. The pragmatic Nurse ends her sophistic arguments by claiming that she will find some cure. She is deliberately ambiguous about the precise nature of this cure in order to win Phaedra's confidence, hinting at some potion or magic that must be employed. She dismisses Phaedra's fear that she will reveal her love for Hippolytus—but this is exactly the cure that she has resolved upon, with the preliminary precaution of exacting from the young man an oath of silence.

Poor Phaedra learns that her Nurse (in a loving but misguided attempt to help) has indeed approached Hippolytus from his angry shouts that come from the palace. She overhears Hippolytus brutally denouncing the Nurse, calling her a procurer of evils, in betrayal of her master's marriage-bed. Phaedra believes that she is now ruined and confides to the Chorus that she is resolved to die. We do not have Euripides' stage directions. Some would have Phaedra exit at this point, but the drama is intensified and her subsequent actions are more comprehensible if she remains, compelled to witness the entire following scene. Hippolytus bursts forth from the palace followed by the Nurse (581–668):

 HIPPOLYTUS: O mother earth and vast reaches of the sun, What unspeakable words have I listened to!

NURSE: Be quiet, my boy, before someone hears you shouting.

HIPPOLYTUS: I have heard such dreadful things that it is impossible for me to be silent.

NURSE: Please, by your strong right hand.

HIPPOLYTUS: Keep your hands off me! Don't touch my cloak!

NURSE: I beseech you, by your knees. Don't ruin me.

HIPPOLYTUS: What do you mean? Didn't you claim that there was nothing wrong in what you said?

NURSE: What I said was by no means intended for all to hear.

HIPPOLYTUS: Good words spread among many become even better.

NURSE: My child, do not be untrue to your oath, in any way.

HIPPOLYTUS: My tongue swore but my mind is under no oath.

NURSE: My boy, what will you do? Ruin those near and dear to you?

HIPPOLYTUS: I spit upon them! No evil person is near and dear to me.

NURSE: Be forgiving. To err is human, my son.

HIPPOLYTUS: O Zeus, why did you bring them into the light of this world—women—an ingrained and deceitful evil for mankind? If you wanted to propagate the race, it is not from women that you should have ordained our birth. Instead, men should be able to buy children in your temples, each making a payment of bronze, iron, or gold, appropriate to his means, and live free in homes without females.

Hippolytus rages on to show how obvious it is that a woman is a great evil. A father settles on a dowry to be rid of his very own daughter because she is pernicious. A husband takes the woman into his house and enjoys adorning this worthless and ruinous creature with expensive jewelry and fine clothes, little by little squandering his estate, poor fool.

The husband with a wife who is a nonentity has it easiest. Although not without harm, she is kept from folly by her lack of intelligence. “A clever woman, I loathe. May I never have in my house a woman who is more clever than she should be,” Hippolytus exclaims, “for Cypris breeds more villainy in the clever ones.” Also, a woman should not have access to a servant but instead only wild and dumb animals, so they may not be able to speak to anyone or receive an answer in return. And these last admonitions bring Hippolytus back from his wild generalizations to his present trauma, which provoked them. He erroneously thinks that the Nurse has been sent by a wily and evil Phaedra on her abominable mission, and he goes on to denounce her.

☞ Thus it is that you, wicked creature, have come to make a deal with me to debauch the sacred bed of my father. I will pour running water into my ears to wash out the pollution of your words. How could I be a sinner, I who feel defiled by just listening to such a vile proposition. Woman, understand this clearly, my piety is your salvation. If I had not been caught off guard and bound by my oath to the gods, I would never keep myself from telling this filthy business to my father. For the time being, as long as Theseus is away from Troezen, I will absent myself from the palace and keep my mouth shut. But I will return when my father does and watch how you face him, both you and your mistress. Having this taste of your effrontery, I will be knowledgeable.

May you be damned. I will never have my fill of hatred for women, not even if anyone criticizes me for always declaring it. For they all, like you, are evil in one way or another. Either someone should teach them how to be temperate or allow me to trample them down forever.

The Greek word translated “to be temperate” is *sophronein*, which has the basic meaning of to show good sense, to exercise self-control and moderation in all things. It is particularly ironic, spoken here by the intemperate and inhumane Hippolytus. The word may in context connote specific restraint, for example, sexual self-control, that is, to be chaste.

The Nurse is overcome with remorse and guilt for the failure of her scheme but she cannot assuage the fury of Phaedra, whose only recourse now is to end

her own life. She confides her decision to the Chorus, whom she has sworn to secrecy (716–721 and 725–731).

 PHAEDRA: I have found a remedy for my misfortune so that I will bequeath to my sons a life of good reputation, and profit from what has now befallen me. For I will never bring shame upon my Cretan home, nor will I go and face Theseus with disgraceful actions for the sake of one life. . . .

On this day when I have freed myself from life, I will make Cypris happy, the one who destroys me, and I will be defeated by a bitter eros. But after my death, I will become an evil curse for that other person, so that he may understand that he should not exult haughtily over my misfortunes; by sharing in this malady with me, he will learn how to be temperate.

Phaedra reaffirms the convictions that she has revealed earlier. She cannot face the loss of her reputation or the risk of sullyng the reputation of Theseus and her sons, jeopardizing their future. Now she has added another motive for her actions, similar to that of Aphrodite: vengeance against the cruel and arrogant hubris of Hippolytus, which she herself has just witnessed, to exacerbate her humiliation and her suffering.

Phaedra echoes Hippolytus' tirade when she promises that he will learn (i.e., she will teach him) how to be temperate (*sophronein*). There is another reminder of Hippolytus and a chilling ambiguity in her earlier assertion: "nor will I go and face Theseus with disgraceful actions for the sake of one life." Does she mean her life or that of Hippolytus?

Phaedra goes into the palace to commit suicide. She hangs herself and just as she is freed from the noose and her corpse laid out, Theseus returns. Overcome with grief, he notices a tablet, bearing her seal, dangling from Phaedra's hand. He reads it in horror and cries out for all to hear: "Hippolytus has dared to violate my marriage bed by force, desecrating the holy eye of Zeus." He calls out to his father Poseidon, who has granted Theseus three curses, and asks that with one of them the god kill Hippolytus, who, he prays, may not live out this day. Theseus also pronounces banishment upon his son. Hearing the cries of Theseus, a bewildered Hippolytus appears. In the lengthy confrontation between father and son, the following excerpt elucidates the long-standing difficulties in their relationship and the crux of their conflict. To Hippolytus' protestations that he has done nothing wrong, Theseus exclaims (936–980):

 THESEUS: Oh, the human heart, to what lengths will it go? What limit will one set to boldness and audacity? . . . Behold this man, who was begotten by me; he has defiled my bed and stands clearly convicted of being the basest of human beings by the woman who is dead. Look at your father directly, face to face; don't be afraid that your gaze will contaminate me, I am already contaminated. Are you the man who consorts with the gods, as though you were superior to everyone else? Are you the pure virgin, unsullied by sin? I could never be convinced by these boasts of yours and wrongly believe that the gods are fooled by your hypocrisy. Now that you are caught, go ahead and brag, show

off with your vegetarian diet, take Orpheus as your lord, celebrate the mysteries, believing in their many and vacuous writings. I warn everyone to shun men such as these. For they prey upon you with their holy words, while they devise their evil plots.

She is dead. Do you imagine that this fact will save you? By this, most of all, O villain, you are convicted. For what kind of oath, what testimony could be more powerful than she to win your acquittal? Will you maintain that she hated you and that it is only natural for a bastard to be in conflict with those who are legitimate? If so, you argue that she made a bad and foolish bargain, if she destroyed what is most precious, her own life, out of hostility to you; but will you claim that folly is an attribute of women and not found in men? I know that young men are no more stable than women, whenever Cypris plays havoc in their young hearts; yet because they are male, they are not discredited. And so now—ah, but why do I wage this contest of words with you, when this corpse lies here, the clearest witness against you. Get out of this land, go, an exile, as quickly as possible; and stay away from god-built Athens and the borders of any territory ruled by my spear.

If I am beaten by you, after these terrible things you have made me suffer, Isthmian Sinis will not bear witness to his defeat at my hands but make it my idle boast, and the Scironian rocks by the sea will refute the fact that I am merciless against those who do evil.

Theseus' own boasting about his prowess refers to two of his labors, the killing of the robber Sinis at the Isthmus of Corinth and the brigand Sciron on the cliffs that bear his name. No one would believe his prowess against the wicked if he did not punish Hippolytus.

In his denunciation of Hippolytus, Theseus reveals the long-standing rift that has grown between them. However great his love for Phaedra and the shock of her suicide, how could Theseus so readily accept her accusation of rape if he had any understanding of the nature and character of his son? His suspicions about Hippolytus' avowals of purity, which to him smack of haughty superiority, and his ridicule of mystery religions indicate that Theseus, the hero, has little respect for the beliefs of a son who is so different in temperament. (We cannot help but recall that Phaedra was smitten with desire as she observed the pure Hippolytus participating in the Mysteries. A young and innocent man so unlike his father and her husband!)

Theseus imagines that Hippolytus will argue that Phaedra hated him and conflict between the two of them was inevitable: he was a bastard, she was a stepmother, and as the wife of Theseus bore him two legitimate sons, rivals to Hippolytus and heirs to the throne. How much has rejection sullied the relationship between Theseus and Hippolytus? In fact, Hippolytus' fanatical devotion to Artemis and his renunciation of Aphrodite reflect a resentment against his father expressed in his devotion to his real mother, who, as an Amazon, would normally have nothing to do with Aphrodite and heterosexual love, had she not been seduced by Theseus. Later Hippolytus exclaims (1082–1083): "O

my unhappy mother, O my bitter birth, may no one dear to me ever be born a bastard!" At this point in the play, Hippolytus answers his father's accusations as follows (983–1035):

 HIPPOLYTUS: Father, your strength and the intensity of your rage are terrifying. Yet, although your arguments seem just, if one examines the case you present closely, it is not just at all. I am not good at making a speech before many—I am better at talking to a few people of my own age. This is how things go—just as those who are inept among a group of the wise speak more persuasively before a crowd. Be this as it may, since misfortune has befallen me, I must not hold my tongue. First of all, I will begin by answering your first accusation by which you sought to destroy me without a word to say in response. You see the sky and this here earth. There is no one under the sun more righteous than I am, even if you say this is not so. First, I know how to pay reverence to the gods and to pick friends who try to do no wrong and whose sense of decency prevents them from demanding wrong or doing wrong to others. I do not belittle or betray these companions, father, but am the same to them, whether they are with me or not. I am innocent of the one charge, of which you now think you have convicted me. To this very moment, my body is chaste. I have never had sex but only heard about it, or seen depictions of it which I do not like to look at because I am a virgin, pure in heart and soul.

Suppose you are not convinced about my chastity. So be it. You must then show in what way I was corrupted. Was her body more beautiful than that of any other woman? Or did I hope to become an heir in your palace, by taking her to bed? If so, I was a fool, completely out of my mind. Will you argue that to be a king is a sweet temptation for a man in his right senses? Not in the least, because all those who love the power of a king have been corrupted. No, I would like to win first place in the Greek Games but in the city to be second and always to enjoy good fortune with the best people for friends; this allows for achievement, and the absence of danger affords more pleasure than kingship. You have all my arguments, except for one thing. If I had a truthful witness like myself to testify to what kind of man I am, and if I were pleading my case while Phaedra were still alive to see and hear me, you would know the guilty ones by a careful scrutiny of the evidence. As it is, now I swear to you by Zeus, god of oaths and by vast earth that I never touched your wife, never wanted to, nor ever even had the thought. May I die without a name or reputation, without a city or a home, wandering the earth as an exile, and after my death, may neither sea nor land accept my corpse, if I have done any wrong.

Why and through what fear she took her own life, I do not know, since it is not right for me to speak further. She acted virtuously, when she could not be virtuous. I am virtuous but I have not used my virtue well.

Hippolytus' last words present Theseus with a riddle. The message he conveys is that Phaedra, when she could not control her passion (be temperate, the verb *sophronein* is used again), she was not virtuous. When she committed suicide to ensure that she would not commit adultery, she absolved her guilt by

this virtuous act. Hippolytus, however, is virtuous and chaste, but his behavior has led to disaster. Hippolytus does not break his oath and reveal the truth but, from many of his words, a less hot-tempered and more sympathetic Theseus would have suspected that his son knows more than he has revealed. For example, Hippolytus picks friends and associates who in character and behavior are the antithesis of Phaedra.

In the heated exchange that follows, the father banishes his son from the land. Hippolytus leaves driving his four-horsed chariot. A messenger comes to report to Theseus the terrible fate of Hippolytus, brought about by the curse that Theseus had evoked through the god Poseidon. His dramatic speech vividly describes how amidst a terrifying surge of the sea, a huge wave brought forth a monstrous bull, bellowing savagely, which made directly for Hippolytus as he was driving his chariot along the sea coast. The four horses were seized by such a panic that even the experienced Hippolytus was not able to control them. In the horrible crash that ensued, Hippolytus was caught in the leather reins and brutally dragged along the rocks. Finally he was cut loose; and Theseus, upon learning that his son is still alive, orders that he be brought to face him once again. At this juncture, Artemis appears, a veritable *deus ex machina*, to set things aright, the counterpart to Aphrodite who had opened the play (1283–1466):

 ARTEMIS: I command you, royal son of Aegeus, to listen; for I address you, I, Artemis, the daughter of Leto. Why, Theseus, poor wretch, do you take pleasure in these things? You have murdered your son, persuaded to commit this unholy act by the false accusations of your wife, with no clear evidence. Clear, however, is the ruin you have earned. In shame you should hide yourself in the depths of the earth or escape from this misery by exchanging your life for that of a bird above, since you do not deserve to share in the lives of good men.

Listen, Theseus, to the extent of your evils. Although I will accomplish nothing, yet I will cause you pain. I have come for this purpose, to disclose the righteous nature of your son so that he may die with a good name and the frenzied passion of your wife or, from another point of view, her nobility. For stung by the goads of the goddess most hateful to all of us whose joy is in chastity, she fell in love with your son.

She tried to overcome Cypris by reason but she was ruined unwittingly by the machinations of her Nurse, who revealed her malady to your son sworn to secrecy. He did not give in to her entreaties, as was right, and again, being virtuous, he did not break the bond of his oath, although you wronged him so. Phaedra, terrified that she would be exposed, wrote a false letter, and destroyed your son by her lies, but nevertheless she convinced you to believe them.

THESEUS: Woe is me!

ARTEMIS: Do my words sting you? Yet be quiet and listen to the rest so that you may lament all the more. Didn't you know that the three curses you got from your father were bound to be fulfilled? You are a most base man to use one of them against your own son, when you could have used it against any of

your enemies. The god of the sea, your father and kindly disposed towards you, fulfilled your curse; he had to, since he had promised. Yet both in his eyes and in mine you appear base, you who did not wait either for proof or the guidance of prophets; you did not put the accusation to the test nor allow a lengthy time for scrutiny but, more quickly than you should have, you hurled a curse against your son and killed him.

THESEUS: My lady, let me die!

ARTEMIS: You have done terrible things but nevertheless it is still possible, even for you, to find pardon for your actions. For it was Aphrodite who wished that these things should come about to satisfy her anger. There is a law for the gods as follows: no one of us wishes to thwart the will of another but we always stand aside.

For understand me clearly—If I were not in fear of Zeus' retaliation, I would never have sunk to such a depth of shame as to allow the death of the man dearest to me of all mortals. Ignorance, first of all, acquits you of evil; and besides, your wife by dying prevented your testing the truth of her accusations and so she made you believe her. As it is, these misfortunes have burst upon you most of all; but I too feel pain. The gods have no joy in the deaths of the good and reverent but those who are wicked we destroy, children, house and all.

(Hippolytus is brought in by servants.)

 CHORUS: Here comes the poor fellow, his young flesh mutilated, his fair hair befouled. Oh, the suffering of this house. What grief—not once but now a second time—has been brought down upon it by the gods!

HIPPOLYTUS: Ah, what pain. I, unfortunate, destroyed by the unjust curse of an unjust father. Alas, wretched, I am done for, woe is me. Pains shoot through my head, spasms dart around my brain. Stop, servants, let me rest my exhausted body. Oh, what pain! O hateful chariot, drawn by horses fed by my own hand. You have destroyed me, you have killed me. Ah what agony! Servants, by the gods, place your hands lightly on my lacerated flesh. Who stands at my right side? Lift me gently; take me along carefully, me the ill-fated one, cursed by my father's wrong-doing. Zeus, Zeus, do you see what is happening? Here I am, a holy and god-revering man, one who surpassed all others in virtue going to my inevitable death. My life is utterly destroyed, and I have performed my labors of piety on behalf of mortals, all for nothing. Ah, ah, the pain, the pain which now overwhelms me. Let go of me in my misery and may death come as my healer. Kill me, destroy me and my pain, doomed as I am. I long for the thrust of a two-edged sword to end my life and bring peaceful rest.

Oh, unfortunate curse of my father. Some bloodstained evil, inherited from my ancestors long ago, rises up and does not stay dormant but has come against me. Why, oh why, when I am guilty of no evil myself? Woe is me, alas! What am I to say? How will I turn my life of pain into painlessness? If only the inevitable fate of death would transport me, one doomed to suffer so, into the night of Hades' realm.

ARTEMIS: O poor, wretched fellow, how great is the yoke of your misfortune! The nobility of your nature has destroyed you.

HIPPOLYTUS: Ah, what a breath of divine fragrance! Even amidst my misfortunes, I feel your presence, and the pain in my body is lifted. The goddess Artemis is present in this place.

ARTEMIS: Gallant sufferer, yes, she is most dear to you of all the gods.

HIPPOLYTUS: Do you see me, my Lady, how wretched I am?

ARTEMIS: I see your misery but it is not right for my eyes to shed a tear.

HIPPOLYTUS: Your huntsman and your servant is no more.

ARTEMIS: No, indeed, but you die most dear to me.

HIPPOLYTUS: No longer the keeper of your horses or the attendant of your statues.

ARTEMIS: Because the evil-schemer Cypris planned it so.

HIPPOLYTUS: Alas, I understand what goddess has destroyed me.

ARTEMIS: She resented your slights to her honor and hated you for being chaste.

HIPPOLYTUS: This one goddess has destroyed the three of us, I realize now.

ARTEMIS: Your father and you, and his wife, the third.

HIPPOLYTUS: And so I bemoan the misfortunes of my father as well as my own.

ARTEMIS: He was deceived by the designs of a god.

HIPPOLYTUS: Oh, how unhappy you must be, father, because of your great misfortune!

THESEUS: I am done for, my son, and for me there remains no joy in life.

HIPPOLYTUS: I pity you more than I pity myself for mistaken wrongdoing.

THESEUS: If only I could die, my son, instead of you.

HIPPOLYTUS: How bitter the gifts of your father, Poseidon!

THESEUS: That curse should never have come to my lips.

HIPPOLYTUS: Why not? You would have killed me anyway, you were in such a state of anger.

THESEUS: Because the gods had taken away my good sense.

HIPPOLYTUS: Oh, if only mortals could send a curse upon the gods!

ARTEMIS: No need of a curse. Even though you are in the dark depths of the earth, the rage that has been leveled against your very being through the zealous will of the goddess Cypris will not go unavenged, so that your piety and goodness of heart may be rewarded. For I will punish a lover of hers, the one mortal who is especially the dearest, by this unfailing bow of mine. To you, poor sufferer, I will bestow the greatest of honors in the city of Troezen in recompense for these evil torments of yours. Unmarried girls, before their marriage, will cut off their hair in dedication to you, the one who will reap the rich harvest of their mourning and tears though the span of the ages. The songs of maidens inspired by the Muses will keep your memory alive forever and Phaedra's passion for you will not be left unsung and become forgotten.

You, son of revered Aegaeus, take your son in your arms and embrace him; for you destroyed him unwittingly, and it is to be expected for human beings to err, when the gods so ordain.

I advise you, Hippolytus, not to hate your father. You have been destroyed by the destiny that is yours.

Farewell. It is not right for me to look upon the dead or to defile my sight

with the last gasps of the dying; and I see that you are now near that terrible state.

HIPPOLYTUS: Go as I bid you farewell, blessed virgin; how easily you leave behind our long relationship. Yet I put an end to my conflict with my father, since you so desire. For, in the past, indeed, I was persuaded by your words. Ah, darkness is now closing over my eyes. Take hold of me, father, and lay out my body in death.

THESEUS: Alas, my son, what terrible thing are you doing to me, one so ill-fated?

HIPPOLYTUS: I am done for; indeed I see the gates of the Underworld.

THESEUS: And will you leave me with my hands defiled?

HIPPOLYTUS: No, not at all, since I acquit you of this murder.

THESEUS: What are you saying? Do you free me from blood-guilt?

HIPPOLYTUS: I invoke Artemis with her indomitable bow as my witness.

THESEUS: O dearest son, what nobility you show towards your father!

HIPPOLYTUS: Farewell to you father, I wish you much happiness.

THESEUS: Alas for me to lose a son of such piety and goodness!

HIPPOLYTUS: Pray that your true-born sons may be like me.

THESEUS: Do not forsake me now, my son, but hold on courageously.

HIPPOLYTUS: I can hold on to life no longer. It is over, father. Cover my face—quickly.

THESEUS: O renowned land of Erechtheus and Pallas, what a man you have lost. I, in my wretchedness, will remember all too well, Cypris, the evils you have wrought.

CHORUS: This unexpected sorrow has come for all the citizens to share. There will be a flood of many tears. For lamentable stories about those who are great can inspire a more intense grief.

Although Artemis declares her love for Hippolytus, she remains cool and aloof, as antiseptic in some respects as her fanatical follower. The rites she predicts in honor of Hippolytus were celebrated in Troezen, and the beloved of Cypris whom she will kill has been specifically identified as Adonis (who in some versions of his death is killed by Artemis' arrows).

Hippolytus' farewell to Artemis is a beautiful example of Euripides' succinct and profound irony. The sad ambiguity of Hippolytus' words may be highlighted by a different but not unfaithful translation with interpretation: "You, go without any pain, fortunate lady! [I am in pain, unfortunate, and dying.] How readily (or lightly) you abandon my deep devotion. I will become reconciled to my father since you want me too. I will obey you now, as I have done in the past [through the ingrained conviction of a religious habit, which not even my disappointment in your present behavior can dispel. My worship and obedience end like this]."

In their final reconciliation, the theme of Theseus' recognition of the true nobility of his bastard son, and Hippolytus' hope for Theseus that his true-born sons by Phaedra may turn out as worthy, underlines the psychological importance of this basic motif of legitimacy in the play.

There have been many subsequent dramatic versions of the legend. The treatment of the Roman Seneca (d. A.D. 65) in his *Phaedra* is well worth studying for its own dramatic merit and as a contrast to Euripides' extant version. There are many differences, both in plot and in characterization, and he explores the psychological tensions of the myth without the goddesses Aphrodite or Artemis appearing as actual figures in the play. Seneca has Phaedra herself (not her Nurse) confront Hippolytus with her lust as she attempts to seduce him. Euripides wrote two dramas about Hippolytus, and Seneca, in this scene, was probably inspired by the earlier of the two versions by the Greek playwright; this first *Hippolytus* of Euripides was not a success and no longer survives. The second version (named *Hippolytos Stephanephoros* to distinguish it from the first), which Euripides produced in 428, is the one that we know today.

Other later plays on the theme are Jean Racine's *Phèdre* (1677); Eugene O'Neill's *Desire under the Elms* (1924), also influenced by *Medea*; and Robinson Jeffers' *The Cretan Woman* (1954). The manipulation of the character of Hippolytus is illuminating. For example, Racine, by giving Hippolytus a girlfriend in his version, drastically changes the configuration of the Euripidean archetype. Jeffers is closer to Euripides by keeping Hippolytus' abhorrence of sex; but when he introduces a companion for Hippolytus who is "slender and rather effeminate," he suggests another shifting of the archetype of the holy man. At any rate, once Hippolytus' sexual orientation is made too explicit, the mystery of his psyche is diminished. Euripides gets everything right, a judgment made with due respect for the masterpieces that he has inspired. The twentieth-century novel *The Bull from the Sea*, by Mary Renault, is yet another rewarding reinterpretation of the myth.

The attempted seduction of a holy man and its dire consequences represent familiar motifs in literature (in the Bible, for example, see the stories of Joseph and Potiphar's wife and of John the Baptist and Salome).

NOTES

1. Sometimes the place of birth is called Ortygia (the name means "quail island"), which cannot be identified with certainty. In some accounts, it is clearly not merely another name for Delos; in others, it is.
2. Niobe was the wife of Amphion, ruling by his side in the royal palace of Cadmus. As the daughter of Tantalus and the granddaughter of Atlas, her lineage was much more splendid than that of Leto, the daughter of an obscure Titan, Coeus.

3. A rock on Mt. Sipylus in Asia Minor was identified in antiquity as the figure of Niobe.
4. Actaeon was the son of Aristaeus and Autoonoe.
5. The nymphs' names, which are omitted in the translation, are Greek words suggestive of cool, crystal-clear water.
6. A stag was commonly believed to live nine times as long as a man.
7. Still Ovid goes on to give thirty-one more names, which are omitted in the translation.
8. Orion sometimes appears as the son of Earth; in other accounts his father is Poseidon.
9. Or Orion was run through by Artemis' arrows. Orion also attempted to rape Opis, a follower of Artemis, if indeed she is not the goddess herself.
10. Several of the nymphs associated with her (e.g., Callisto and Opis) were probably once goddesses in their own right and may actually represent various manifestations of Artemis' own complex nature. One of them, Britomartis, is closely linked to Crete, and perhaps was once a traditional mother-goddess.
11. Cf. Michael P. Carroll, *The Cult of the Virgin Mary: Psychological Origins* (Princeton: Princeton University Press, 1986). Carroll ignores the aspects of Artemis as a mother figure when he states (p. 8): "there is little or no basis in Graeco-Roman mythology for portraying either [Artemis or Athena] as a mother figure." He has, however, very perceptive analogies to make with the worship of Cybele (pp. 90–112).
12. Hecate's mother, Asterie, is Leto's sister; her father is Perses.
13. For more on the legend of Hippolytus and his cult-sites, see pp. 564–565 and p. 639.

APOLLO

THE BIRTH OF APOLLO

As has been told in the previous chapter, Zeus mated with Leto and she conceived the twin gods, Artemis and Apollo. The *Homeric Hymn to Apollo* (3) concentrates in its first part (1–178: To Delian Apollo) on the story of how Delos became the site of Apollo's birth. The hymn begins with a scene of the gods in the home of Zeus (1–29):

I shall not forget far-shooting Apollo but remember him before whom the gods tremble when he comes to the home of Zeus. They all spring up from their seats as he approaches and draws his shining bow, and Leto alone remains beside Zeus, who delights in thunder. But then she unstrings his bow and closes his quiver and, taking them from his mighty shoulders, hangs them on a column of his father's house from a golden peg. She leads him to a chair and sits him down, and his father welcomes his dear son by giving him nectar in a gold cup. Then the other deities sit down in their places and the lady Leto rejoices because she has borne a son who is a mighty archer. Rejoice, O blessed Leto, since you have borne splendid children, lord Apollo and Artemis, who take delight in arrows; Artemis you bore in Ortygia and Apollo in rocky Delos as you leaned against the great and massive Cynthian hill, right next to the palm tree near the stream of the Inopus.

How then shall I celebrate you in my song—you who are in all ways the worthy subject of many hymns? For everywhere, O Phoebus, music is sung in your honor, both on the mainland where heifers are bred and on the islands. All mountaintops give you pleasure and the lofty ridges of high hills, rivers flowing to the sea, beaches sloping to the water, and harbors of the deep. Shall I sing about how Leto gave you birth against Mt. Cynthus on the rocky island, on sea-girt Delos? On either side a dark wave was driven towards the land by shrill winds. From your beginning here, you rule over all mortals [including those to whom Leto came when she was in labor].

Leto had roamed far and wide in her search for a refuge where she might give birth to Apollo. The hymn continues with a long and impressive list of cities and islands to emphasize the extent of her wanderings; she visited all those who lived in these places (30–139):¹

Crete and the land of Athens, the islands of Aegina and Euboea famous for its ships, and Aegae, Eiresiae, and Peparethus by the sea, Thracian Athos, the tall

peaks of Pelion, Thracian Samos, the shady hills of Ida, and Scyros, Phocaea, the sheer mountain of Autocane, well-built Imbros, hazy Lemnos, and holy Lesbos, seat of Macar, the son of Aeolus, and Chios, most shimmering of the islands that lie in the sea, craggy Mimas, the tall peaks of Corycus, gleaming Claros, the steep mountain of Aesagea, rainy Samos, the sheer heights of Mycale, Miletus and Cos, the city of Meropian mortals, and steep Cnidos, windy Carpathos, Naxos, Paros, and rocky Rhenea.

DELOS ACCEPTS LETO

Leto approached these many places in labor with the far-shooting god in the hope that some land might want to make a home for her son. But they all trembled and were very much afraid; and not one of them, even the more rich, dared to receive the god Phoebus, until lady Leto came to Delos² and asked with winged words: "Delos, if you would like to be the home of my son, Phoebus Apollo, and to establish for him a rich temple—do not refuse, for no one else will come near you, as you will find out, and I do not think that you will be rich in cattle and sheep or bear harvests or grow plants in abundance—if you would then have a temple of Apollo, the far-shooter, all people will congregate here and bring hecatombs, and the aroma of rich sacrifices will rise up incessantly and your inhabitants will be nourished by the hands of foreigners."

Thus she spoke; Delos rejoiced and said to her in answer: "Leto, most renowned daughter of great Coeus, I should receive your son, the lord who shoots from afar, with joy, for the terrible truth is that I have a bad reputation among human beings, and in this way I should become greatly esteemed. But I fear this prediction (and I shall not keep it from you): they say that Apollo will be someone of uncontrollable power, who will mightily lord it over both immortal gods and mortal humans on the fruitful earth. And so I am dreadfully afraid in the depths of my heart and soul that when he first looks upon the light of the sun he will be contemptuous of me (since I am an island that is rocky and barren) and overturn me with his feet and push me down into the depths of the sea where the surge of the great waves will rise mightily above me. And he will come to another land that pleases him, where he will build his temple amidst groves of trees. But sea monsters will find their dens in me, and black seals will make me their home without being disturbed, since I will be without human inhabitants. But if, O goddess, you would dare to swear to me a great oath that he will build here first of all a very beautiful temple to be an oracle for men; then after he has done this, let him proceed to extend his prestige and build his sanctuaries among all people; for to be sure his wide renown will be great."

Thus Delos spoke. And Leto swore the great oath of the gods: "Now let Gaea and wide Uranus above bear witness and the flowing waters of the Styx (this is the greatest and most dread oath that there is for the blessed gods), in truth a fragrant altar and sacred precinct of Apollo will be established here forever, and he will honor you above all."

LETO GIVES BIRTH TO APOLLO

When she had ended and sworn her oath, Delos rejoiced greatly in the birth of the lord who shoots from afar. But Leto for nine days and nine nights was racked by desperate pains in her labor. All the greatest of the goddesses were with her—

Dione, Rhea, righteous Themis, and sea-moaning Amphitrite—and others too, except for white-armed Hera; for she sat at home in the house of Zeus the cloud-gatherer. Eileithyia, the goddess of pangs of childbirth, was the only one who had not heard of Leto's distress, for she sat on the heights of Olympus beneath golden clouds through the wiles of white-armed Hera, who kept her there because she was jealous that Leto of the beautiful hair was about to bear a strong and noble son.

But the goddesses on the well-inhabited island sent Iris away to fetch Eileithyia, promising her a great necklace strung with golden threads, over thirteen feet long. They ordered her to call Eileithyia away from white-armed Hera so that Hera might not be able to dissuade the goddess of childbirth from going. When Iris, swift-footed as the wind, heard their instructions, she ran on her way and quickly traversed all the distance between. And when she came to sheer Olympus, home of the gods, immediately she called Eileithyia out of the house to the door and addressed her with winged words, telling her everything just as the goddesses who have their homes on Olympus had directed.

EILEITHYIA ASSISTS LETO

Thus she moved Eileithyia to the depths of the heart in her breast, and like timid doves they proceeded on their journey. As soon as Eileithyia, goddess of the pangs of childbirth, came to Delos, the pains of labor took hold of Leto, and she was anxious to give birth. And she threw her arms about the palm tree and sank on her knees in the soft meadow, and the earth beneath her smiled. The baby sprang forth to the light, and all the goddesses gave a cry. There, O mighty Phoebus, the goddesses washed you with lovely water, holily and purely, and wrapped you in white swaddling clothes, splendid and new, fastened round about with a golden cord. And his mother did not nurse Apollo of the gold sword, but Themis from her immortal hands gave him nectar and delicious ambrosia. And Leto rejoiced because she had borne a strong son who carries a bow.

But after you had tasted the divine food, O Phoebus, then no longer could golden cords hold you in your restlessness or bonds keep you confined, but they all were undone. And straightway Phoebus Apollo exclaimed to the immortal goddesses: "Let the lyre and curved bow be dear to my heart, and I shall prophesy to human beings the unerring will of Zeus." With these words Phoebus, the far-shooter with unshorn hair, strode on the ground that stretches far and wide; all the goddesses were amazed, and the whole of Delos blossomed, laden with gold like the top of a mountain with woodland flowers, as she beheld the son of Zeus and Leto, in her joy that the god had chosen her among all islands and mainland sites to be his home, and loved her most of all in his heart.

Apollo Belvedere. Roman marble copy, possibly of the second century A.D., of a fourth century B.C. Greek bronze; height 94½ in. Apollo strides ahead just as the *Homeric Hymn to Delian Apollo* describes. His left hand would have held his bow: the tree trunk was added by the copyist to support the weight of the marble on the right ankle and foot. This has been the most famous statue of Apollo since its discovery in Rome in or before 1509, and its stance has been copied in innumerable works of art. It takes its name from the courtyard in the Vatican Palace where it stands in its own niche. (*Vatican Museum, Cortile del Belvedere.*)

The conclusion of this first part of the *Homeric Hymn to Apollo* tells about the great festival to Apollo at Delos, the amazing chorus of maidens, the Deliades, who can sing in all dialects, and about the poet himself, the blind bard from the island of Chios (140–178):

 And you yourself, O lord Apollo, far-shooter of the silver bow, come at times to the steep Cynthian hill of Delos, and on other occasions you wander among other islands and other peoples; indeed many are your temples and wooded groves, and every vantage point, highest peak of lofty mountains and river flowing to the sea, is dear to you. But, O Phoebus, your heart is delighted most of all with Delos, where the long-robed Ionians gather with their children and their revered wives. In commemoration of you they will take pleasure in boxing and dancing and song when they celebrate your festival. And anyone who might encounter the Ionians while they are thus assembled together would say that they were immortal and ageless, for he would perceive grace in them all and be delighted in his heart as he beheld the men and the beautifully robed women, the swift ships, and the abundant possessions.

In addition to this, there would be the maidens who serve the far-shooting god, the Deliades, a great and wondrous sight, whose renown will never perish. They sing their hymn to Apollo first of all and then to Leto and Artemis, who delights in her arrows, and they remember the men and women of old and enchant the assembled throng with their songs. They know how to imitate the sounds and sing in the dialects of all human beings. So well does their beautiful song match the speech of each person that one would say he himself were singing.

But come now Apollo with Artemis, and be propitious. Farewell, all you Delian maidens. Remember me hereafter when someone of earthborn mortals, a stranger who has suffered, comes here and asks: “Maidens, what man do you think is the sweetest of the singers who frequent this place and in whom do you delight most of all?” Then all of you answer that I am the one: “A blind man who lives in rocky Chios; all his songs are the best forevermore.”³

I will bring your renown wherever I roam over the earth to the well-inhabited cities of humans; and they will believe since it is true. Yet I shall never cease to hymn the praises of Apollo, god of the silver bow, whom Leto of the beautiful hair bore.

APOLLO AND DELPHI

Some believe that this first part of the lengthy *Hymn to Apollo* was originally a separate composition, a hymn to Delian Apollo. The second part of the hymn, which is translated in the Additional Reading at the end of this chapter, would have been recited as a song to Pythian Apollo, the god of Delphi.⁴ Filled with a wealth of mythological information, it tells how Apollo descended from Mt. Olympus and made his way through northern and central Greece, finally discovering the proper spot for the foundation of his oracle among humankind at Crisa under snow-capped Parnassus. Apollo laid out his temple and then slew

a she-dragon by the fair-flowing stream nearby. The name of the site was henceforth called Pytho (and Apollo, the Pythian) because the rays of the sun made the monster rot. (The Greek verb *pytho* means "I rot.")⁵

A cogent historical reconstruction of the conflicting evidence⁶ suggests that originally the site was occupied by an oracle of the great mother-goddess of the Minoan-Mycenaean period, sometimes known as Ge-Themis. The slaying of the dragon (the traditional manifestation of a deity of earth), therefore, represents the subsequent conquest by Hellenic or Hellenized Apollo. For murdering the dragon, Zeus sent Apollo into exile in Thessaly for nine years (his punishment presumably mirrors the religious dictates of ancient society).⁷

The omphalos, an archaic stone shaped like an egg, which was kept in the temple during the classical period, seems to confirm an early habitation of the site.⁸ Legend has it that this omphalos (the word means "navel") signified that Delphi actually occupied the physical center of the earth (certainly it was in many ways the spiritual center of the ancient world). Zeus was said to have released two eagles who flew from opposite ends of the earth and met exactly at the site of Apollo's sanctuary—a spot marked out for all to see by the stone omphalos with two birds perched on either side.

The hymn to Pythian Apollo concludes with a curious and interesting story. After he had established his sanctuary at Crisa, Apollo was concerned about recruiting attendants to his service. He noticed a ship passing, manned by Cretans from Cnossus, on its way to sandy Pylos. Phoebus Apollo transformed himself into a dolphin and immediately sprang aboard. At first the men tried to throw the monster into the sea, but such was the havoc it created that they were awed to fearful submission. Speeded on by a divine wind, the ship would not obey the efforts of the crew to bring it to land. Finally, after a lengthy course, Apollo led them to Crisa, where he leaped ashore and revealed himself as a god amid a blaze of fiery brightness and splendor. He addressed the Cretan men, ordering them to perform sacrifices and pray to him as Apollo Delphinus. Then he led them to his sanctuary, accompanying them on the lyre as they chanted a paean in his honor. The hymn ends with the god's prediction of the prestige and wealth that is to come to his sanctuary as he instructs the Cretan band, who are placed in charge.

The story links the early cult of Apollo with Crete, explains the epithet Delphinus in terms of the Greek word for dolphin, and provides an etymology for Delphi as the name of the sanctuary. As god of sailors and of colonization (his oracle played a primary role as the religious impetus for the sending out of colonies), Apollo was worshiped under the title Delphinus. The hymn as a whole confirms the universality of the worship of Apollo and the importance of his outstanding cult centers, certainly at Delos but above all at Delphi.

The sanctuary of Apollo at Delphi is representative of the nature and character of other Panhellenic sites elsewhere.⁹ The sacred area was built on the lower slopes of Mt. Parnassus, about two thousand feet above the Corinthian Gulf. It

is an awe-inspiring spot to this day. For anyone walking along the Sacred Way up to the great temple of the god, it is not difficult to sense the feelings of reverence and exaltation that filled the heart and the soul of the ancient believer. The excavations have laid bare the foundations of the many and varied types of monuments along the winding path that were set up by individuals and city-states in honor and gratitude. Small temples (called treasuries) were a particularly imposing type of dedication, erected to house expensive and precious offerings. Among the major buildings of the sanctuary were a stadium, a theater, and of course the great temple of Apollo himself.

The Pythian Games, which were celebrated every four years, included (after 582 B.C.) both physical and intellectual competitions. Footraces, chariot races, and musical, literary, and dramatic presentations were among the events that combined to make the festival second only to that of Zeus at Olympia. The sanctuary and the celebrations reflect much that is characteristic of Greek life and thought. The numerous triumphant dedications of victory in war mirror the narrow particularism and vehement rivalry among individual city-states, while the fact of the festivals themselves, to which *all* Greeks might come to honor gods common to their race, reveals the strivings toward a wider and more humane vision. Certainly the sense of competition in both athletics and the arts was vital to the Greek spirit. The importance of both the physical and the aesthetic also suggests a fundamental duality made one and whole in the prowess and intellectuality of the god Apollo himself. The *Odes* of Pindar, written to celebrate the glorious victors in the athletic competitions, have proven to be among the most sublime lyrical outpourings of the human spirit. Physical excellence intensified a sense of physical beauty that inspired Greek artists to capture in sculpture and in painting the realism and idealism of the human form. The crystallization of the Doric, Ionic, and Corinthian orders of architecture in the construction of sublime architectural forms was also inspired by religious as well as civic devotion. The spiritual and human impetus to great feats of body and mind is among the most wondrous achievements of the Greek religious experience.

THE ORACLE AND THE PYTHIA AT DELPHI

The Panhellenic sanctuary of Delphi was above all an oracle.¹⁰ People from all over the Greek world (and even beyond) came to Apollo with questions of every sort, both personal and political. Herodotus' story of Solon and Croesus, translated in Chapter 6, bears testimony to the prestige of the god, already well established in the sixth century, and provides primary evidence for the nature and form of his responses as well.

The exact oracular procedures followed cannot be determined precisely because our sources are inadequate. The Pythia (prophetess of Apollo) uttered the responses of the god. Her seat of prophecy was the tripod, a bowl supported by three metal legs. A tripod was a utensil of everyday life; a fire could be lit be-

neath or inside the bowl, and it could be used for many obvious practical purposes. The tripod at Delphi was both a symbol and a source of divine prophetic power. Ancient pottery depicts Apollo himself seated on the bowl; his Pythian priestess who does likewise becomes his mouthpiece. In a frenzy of inspiration she utters her incoherent ravings. A priest or prophet nearby will transcribe them into intelligible prose or verse (usually dactylic hexameters) to be communicated to the inquirer.

The Pythia herself underwent certain initial ceremonies to ensure purification and inspiration, among them a ritual cleansing with the sacred water of the famous Castalian spring. Some of our sources maintain that the Pythia's inspiration came from the vaporous outpourings from a chasm or cave and depict the priestess seated on the tripod above some such cleft or opening.

Unfortunately, the west end of Apollo's temple (where she uttered her responses) is so badly preserved in the excavations that it cannot be reconstructed with certainty; therefore we cannot be sure where the Pythia may have been placed.

The inquirer who came to the temple with his question for the god had to go through certain prescribed ceremonies that were in the nature of a fee.¹¹ First he had to offer an expensive sacred cake on the altar outside the temple; and once he had entered, he was required to sacrifice a sheep or goat, a portion of which went to the Delphians. After these preliminaries, he could enter the holy of holies, the innermost shrine of the temple, where he took his seat. The chief priest or prophet addressed the questions to the Pythia (who may have been in an area separated from the inquirer) and interpreted her answers.¹²

In early times, according to tradition, the Pythia was a young virgin. On one occasion an inquirer fell in love with one and seduced her. From then on, only mature women (probably over fifty years old) could become priestesses; whatever the nature of their previous lives (they could have been married), purity was required once they had been appointed to serve the god for life. At times, one from among at least three women could be called upon to prophesy, and there were probably more in reserve.¹³

Inevitably, one must wonder about the religious sincerity of the priests and priestesses at Delphi. Was it all a fraud? There is no good reason to think so. Many people have believed in the possibility of god communicating with mortals in marvelous ways. And belief in a medium, a person with special mantic gifts, is by no means unique to the Greeks. The Pythia presumably was chosen because of her special nature and religious character—she was susceptible to supernatural callings. It is true that the oracle was often on the side of political expediency and that the ambiguity of the responses was notorious. Apollo's obscure epithet, *Loxias*, was thought to bear testimony to the difficult and devious nature of his replies. But only a glance at the life and career of Socrates shows the sincere and inner religious meaning that an intellectually devout person is able to wrest from the material trappings of established institutions in any so-

ciety. According to Plato's *Apology*, Socrates' friend Chaerephon went to Delphi to ask who was the wisest of men. The answer was "Socrates"; and when the philosopher learned this, he could not rest until he had determined the meaning of the response and proved the god right. If we are to take the *Apology* at all literally and historically (and why not?), this message from Apollo provided a turning point for Socrates in his missionary-like zeal to make men and women think of eternal moral and ethical values in terms of their immortal souls.

THE CUMAEAN SIBYL

The Pythia is the specific title given to the priestess of Apollo at Delphi. A more generic term for prophetess was *Sibyl*, and many Sibyls were found at various places in various periods in the ancient world. Originally the title was probably the proper name (Sibylla) of an early prophetess. At any rate, the Sibyls at Cumae were among the most famous mediums of antiquity.¹⁴ The description of the Cumaean Sibyl as she prophesies to Aeneas helps us understand the nature of the communication of a prophetess with her god, even though we must allow for poetic imagination.¹⁵ The innermost shrine of the temple is a cavern from which the responses issue (Vergil, *Aeneid* 6. 42–51):

 The vast end of the temple, built in Euboean stone, is cut out into a cavern; here are a hundred perforations in the rock, a hundred mouths from which the many utterances rush, the answers of the Sibyl. They had come to the threshold, when the virgin cried: "Now is the time to demand the oracles, the god, behold, the god!" She spoke these words in front of the doors and her countenance and color changed; her hair shook free, her bosom heaved, and her heart swelled in wild fury; she seemed of greater stature, and her cries were not mortal as she was inspired by the breath of the god drawing nearer.

Later follows the metaphor of a wild horse trying to throw its rider (77–82, 98–101):

 Not yet willing to endure Apollo, the prophetess raged within the cavern in her frenzy, trying to shake the mighty god from her breast; all the more he wore out her ravings, mastering her wild heart and fashioning her to his will by constraint. Now the hundred mouths of the cavern opened wide of their own accord and bore the responses of the prophetess to the breezes. . . . The Cumaean Sibyl chants her terrifying riddles and, from the innermost shrine of the cavern, truth resounded, enveloped in obscurity, as Apollo applied the reins to her raving and twisted the goad in her breast.

Earlier in the *Aeneid* (3. 445) the seer Helenus warned Aeneas that the Sibyl wrote her prophecies on leaves that were carefully arranged. But when the doors of the cavern were opened, these leaves were scattered by the wind so that those who had come for advice left without help and hated the dwelling of the Sibyl. Thus Aeneas asks (6. 74–76) that the Sibyl utter the prophecies herself and not

entrust them to the leaves. All this may be an oblique reference to some characteristic of the Sibylline books (collections of prophecies of the Sibyls often consulted by the Romans) and the way in which they were interpreted.¹⁶

Ovid has the Sibyl tell Aeneas the story of her fate (*Metamorphoses* 14. 132–153):

 Eternal life without end would have been given me if I had yielded my virginity to Phoebus Apollo who loved me. He hoped that I would and desired to bribe me with gifts, so he said: “Virgin maid of Cumae, choose what you desire; you will attain whatever it is.” I picked up a heap of sand, showed it to him and asked for the vain wish that I might have as many birthdays as the individual grains in my hand. I forgot to ask for continuous youth along with the years. He would have given me both, long life and eternal youth, if I had succumbed to his love. But I despised Phoebus’ gift and I remain unmarried. And now the happier time of youth is gone, and sick old age has come with its feeble steps; and I must endure it for a long time.

For now, as you see, I have lived through seven generations; there remain for me to witness three hundred harvests, three hundred vintages in order to equal in years the number of grains of sand.¹⁷ The time will be when length of days will have reduced me from my former stature and make me small, and my limbs consumed by age will be diminished to the tiniest weight. And I shall not seem like one who was pleasing to a god and loved by him. Even Phoebus himself perhaps either will not recognize me or will deny that he once desired me; I shall be changed to such an extent that I shall be visible to no one, but I shall be recognized by my voice; the Fates will leave me my voice.

In another version, the Sibyl became a tiny thing suspended in a bottle. Boys asked: “Sibyl, what do you want?” Her answer was: “I want to die.”¹⁸

APOLLO AND CASSANDRA

Priam’s daughter Cassandra, a pathetic figure in the Trojan saga, was another of Apollo’s loves and another prophetess. When she agreed to give herself to Apollo, as a reward the god bestowed upon her the power of prophecy. But Cassandra then changed her mind and rejected his advances. Apollo asked for one kiss and spat into her mouth. Although he did not revoke his gift, Cassandra was thereafter doomed to prophesy in vain, for no one would believe her.

APOLLO AND MARPESSA

Apollo also attempted to win Marpessa, daughter of Evenus, a son of Ares. She was also wooed by Idas, one of the Argonauts, who carried her off in his chariot against the will of her father. Evenus unsuccessfully pursued the pair, then in his anger and heartbreak committed suicide. Subsequently Apollo, who had also been a suitor for Marpessa’s hand, stole her away from Idas in similar fashion. Ultimately the two rivals met face to face in conflict over the girl. At this point Zeus intervened and ordered Marpessa to choose between her lovers. She

chose Idas because he was a mortal, for she was afraid that the undying and eternally handsome god Apollo would abandon her when she grew old.

APOLLO AND CYRENE

Nearly all of Apollo's numerous affairs are tragic; he is perhaps the most touchingly human and the most terrifyingly sublime of all the Greek gods. A notable exception is his success with Cyrene, an athletic nymph, with whom he fell in love as he watched her wrestling with a lion. He whisked her away to Libya in his golden chariot, to the very site of the city that would be given her name, and she bore him a son, Aristaeus.¹⁹

APOLLO AND DAPHNE

The story of Apollo's love for Daphne explains why the laurel (the Greek word *daphne* means "laurel") was sacred to him. Ovid's version is the best known (*Metamorphoses* 1. 452–567):

 Daphne, daughter of Peneus, was the first object of Apollo's love. It was not blind fate that brought this about, but Cupid's cruel anger. Apollo, flushed with pride at his victory over Python, had seen Cupid drawing his bow and taunted him: "What business of yours are brave men's arms, young fellow? The bow suits *my* shoulder; I can take unerring aim at wild animals or at my enemies. I it was who laid low proud Python, though he stretched over wide acres of ground, with uncounted arrows. You should be content with kindling the fires of love in some mortal with your torch; do not try to share my glory!"

To him Cupid replied: "Although your arrows pierce every target, Apollo, mine will pierce you. Just as all animals yield to you, so your glory is inferior to mine." And as he spoke he quickly flew to the peak of shady Parnassus and from his quiver drew two arrows. Different were their functions, for the one, whose point was dull and leaden, repelled love; the other—golden, bright, and sharp—aroused it. Cupid shot the leaden arrow at Peneus' daughter, while he pierced Apollo's inmost heart with the golden one.

Straightway Apollo loved, and Daphne ran even from the name of "lover." Companion of Diana, her joy was in the depths of the forests and the spoils of the chase; a headband kept her flowing hair in place. Many suitors courted her, while she cared not for love or marriage; a virgin she roamed the pathless woods. Her father often said, "My daughter, you owe me a son-in-law and grandchildren"; she, hating the marriage torch as if it were a disgrace, blushed and embraced her father saying, "Allow me, dearest father, always to be a virgin. Jupiter granted this to Diana." Peneus granted her prayer; but Daphne's beauty allowed her not to be as she desired and her loveliness ran counter to her wish.

Apollo loved her; he saw her and desired to marry her. He hoped to achieve his desire, misled by his own oracle. Even as the stubble burns after the harvest, or a hedge catches fire from a careless traveler's embers, so the god burned with

all-consuming fire and fueled his love with fruitless hope. He sees her hair lying unadorned upon her neck and says, "What if it were adorned?" He sees her flashing eyes like stars; he sees her lips—and merely to see is not enough. He praises her fingers, hands, arms, and shoulders half-bared; those parts which are covered he thinks more beautiful.

Swifter than the wind, Daphne runs from him and stays not to hear him call her back: "Stay, nymph! Stay, daughter of Peneus, I pray! I am not an enemy who pursues you. Stay, nymph! A lamb runs like this from the wolf, a hind from the lion, doves with fluttering wings from the eagle. Each kind runs from its enemy; love makes me pursue! Oh, take care you do not fall; let not the thorns scratch those legs that never should be marred and I be the cause of your hurt! Rough is the place where you run; run more slowly, I beg, and I will pursue more slowly. Yet consider who loves you; I am not a mountain peasant; I am not an uncouth shepherd who watches here his flocks and herds. Unheeding you know not whom you try to escape, and therefore do you run. I am lord of Delphi, of Claros, Tenedos, and royal Patara; Jupiter is my father! I show the future, the past, the present; through me came the harmony of lyre and song! Unerring are my arrows, yet one arrow is yet more unerring and has wounded my heart, before untouched. The healing art is mine; throughout the world am I called the Bringer of Help; the power of herbs is mine to command. Ah me! for no herb can remedy love; the art which heals all cannot heal its master!"

Even as he spoke, Daphne fled from him and ran on in fear; then too she seemed lovely—the wind laid bare her body, and her clothes fluttered as she ran and her hair streamed out behind. In flight she was yet more beautiful. Yet the young god could not bear to have his words of love go for nothing; driven on by love he followed at full speed. Even as a Gallic hound sees a hare in an empty field and pursues its prey as it runs for safety—the one seems just to be catching the quarry and expects each moment to have gripped it; with muzzle at full stretch it is hot on the other's tracks; the other hardly knows if it has been caught and avoids the snapping jaws—so the god chased the virgin: hope gave him speed; her speed came from fear. Yet the pursuer gains, helped by the wings of love; he gives her no respite; he presses hard upon her and his breath ruffles the hair upon her neck.

Now Daphne's strength was gone, drained by the effort of her flight, and pale she saw Peneus' waters. "Help me, Father," she cried, "if a river has power; change me and destroy my beauty which has proved too attractive!" Hardly had she finished her prayer when her limbs grew heavy and sluggish; thin bark enveloped her soft breasts; her hair grew into leaves, her arms into branches. Her feet, which until now had run so swiftly, held fast with clinging roots. Her face was the tree's top; only her beauty remains.

Even in this form Apollo loves her; placing his hand on the trunk he felt the heart beating beneath the new-formed bark. Embracing the branches, as if they were human limbs, he kisses the wood; yet the wood shrinks from his kisses. "Since you cannot be my wife," said he, "you shall be my tree. Always you shall wreath my hair, my lyre, my quiver. You shall accompany the Roman generals when the joyous triumph hymn is sung and the long procession climbs the Capitol . . . and as my young locks have never been shorn, so may you forever

Apollo and Daphne, attributed to Antonio del Pollaiuolo (1433–1498). Oil on panel; $11 \frac{5}{8} \times 7 \frac{7}{8}$ in. Apollo, in the guise of a young Florentine nobleman, has just caught up with Daphne. Her left leg is rooted in the ground and her arms have already become leafy branches, while she looks down at the god with a mysterious smile. The painter has caught the interaction of movement and fixity that permeates Ovid's narrative, while the tragedy is set in a jewel-like Tuscan landscape. (National Gallery, London. Reproduced by courtesy of the Trustees.)

be honored with green leaves!" Apollo's speech was done: the new-made laurel nodded her assent and like a head bowed her topmost branches.

The interpretation of this most artistically inspiring tale of passion is discussed in Chapter 1 (pp. 19–20). Is it the most touching and poignant of love stories or the glorification of attempted rape?

Apollo and Daphne, by Gian Lorenzo Bernini (1598–1680). Marble, 1624; height 96 in. Like Pollaiuolo, Bernini has chosen the moment when swift movement is stopped. The sculptor brilliantly incorporates the psychological tensions of Ovid's narrative, frozen in the moment of metamorphosis. The contrast between Apollo, adapted from the famous *Apollo Belvedere*, and the agitated emotions of Daphne serves to heighten the tragedy. On the base (not shown) are inscribed Ovid's description of the metamorphosis (*Metamorphoses* 1. 519–521) and two Latin lines by the future Pope Urban VIII: "Every lover who pursues the joys of fleeing beauty fills his hands with leaves or plucks bitter berries." (*Galleria Borghese, Rome, Italy. Courtesy of Alinari/Art Resource, New York.*)

APOLLO AND HYACINTHUS

Apollo was also susceptible to the love of young men.²⁰ His devotion to Hyacinthus, a handsome Spartan youth from Amyclae, is well known from Ovid's account; the great god neglected his other duties in order to be in the company of his beloved (*Metamorphoses* 10. 174–219):

 The Titan sun was almost midway between the night that had passed and the one to come—equidistant from both—when Apollo and the boy took off their garments and glistening with olive oil began to compete with the broad discus. Phoebus made the first throw. He poised the discus and hurled it so far into the air that the clouds were scattered by its course and only after a long time, because of its own sheer weight, did it fall back again to solid earth. His throw exhibited great skill combined with great strength. Straightway Hyacinthus under the impulse of his enthusiasm, heedless of all but the game, made a dash to pick up the discus. But it bounced back, O Hyacinthus, as it hit the hard earth and struck you full in the face.²¹ The god turned as pale as the boy himself. He took up the limp body in his attempt to revive him, frantically staying the flow of blood from the sad wound and applying herbs to sustain the life that was ebbing away. His arts were to no avail; the wound was incurable. Just as when someone in a garden breaks off violets or brittle poppies or lilies that cling to their tawny stems, and suddenly these flowers droop and fade and cannot support the tops of their heavy heads which look down to the ground, so dropped the head of the dying boy and his neck, once strength was gone, gave way to the burden of its weight and sank on his shoulder.

Phoebus cried: “You slip away, cheated of your youthful prime. Your wound that I look upon accuses me. You are my grief and my guilt—my own hand is branded with your death! I am the one who is responsible. But what fault was mine? Can it be called a fault to have played a game with you, to have loved you? O that I could give you my life as you deserve or die along with you. But we are bound by fate's decree. Yet you will always be with me, your name will cling to my lips, forever remembering. You will be my theme as I pluck my lyre and sing my songs and you, a new flower, will bear markings in imitation of my grief; and there will come a time when the bravest of heroes will be linked to this same flower and his name will be read on its petals.”

While Apollo spoke these words from his unerring lips, lo and behold, the blood that had poured upon the ground and stained the grass ceased to be blood and a flower arose, of a purple more brilliant than Tyrian dye; it took the shape of a lily and differed only in color, for lilies are silvery white. Apollo, although responsible for so honoring Hyacinthus, was not yet satisfied. The god himself inscribed his laments upon the petals and the flower bears the markings of the mournful letters *AI AI*.²² Sparta was proud to claim Hyacinthus as her son and his glory endures to this day; every year a festival, the Hyacinthia, is celebrated in his honor with ceremonies ancient in their traditions.

APOLLO, CORONIS, AND ASCLEPIUS

Several stories emphasize Apollo's role as a god of medicine, which is taken over in large part by his son Asclepius. And this brings us to Apollo's affair with Coronis, the last we shall tell. Coronis (in Ovid's version) was a lovely maiden from Larissa in Thessaly whom Apollo loved; in fact she was pregnant with his child. Unfortunately the raven, Apollo's bird, saw Coronis lying with a young Thessalian and told all to the god (*Metamorphoses* 2. 600–634):

 When Apollo heard this charge against Coronis, the laurel wreath slipped from his head, his expression changed, and the color drained from his cheeks. As his heart burned with swollen rage, he took up his accustomed weapons and bent his bow to string it; with his unerring arrow he pierced the breast which he had so often embraced. She gave a groan as she was struck; and when she drew the shaft from her body, red blood welled up over her white limbs. She spoke: "You could have exacted this punishment and I have paid with my life, after I had borne your child; as it is, two of us die in one." With these words her life drained away with her blood; the chill of death crept over her lifeless corpse.

Too late, alas, the lover repented of his cruel punishment. He hated himself because he had listened to the charge against her and had been so inflamed. He hated his bow and his arrows and his hands that had so rashly shot them. He fondled her limp body and strove to thwart the Fates; but his efforts came too late, and he applied his arts of healing to no avail. When he saw that his attempts were in vain and the pyre was being built and saw her limbs about to be burned in the last flames, then truly (for it is forbidden that the cheeks of the gods be touched by tears) Apollo uttered groans that issued from the very depths of his heart, just as when a young cow sees the mallet poised above the right ear of her suckling calf to shatter the hollow temples with a crashing blow. He poured perfumes upon her unfeeling breast, clasped her in his embrace, and performed the proper rites so just and yet unjust. Phoebus could not bear that his own seed be reduced to the same ashes, but he snatched his son out of the flames from the womb of his mother and brought him to the cave of the centaur Chiron. The raven, who hoped for a reward for the truth of his utterances, Apollo forbade evermore to be counted among white birds. Meanwhile, the centaur was happy to have the divine infant as a foster child and delighted in such an honorable task.

Thus, like many another mythological figure, Asclepius was trained by the wise and gentle Chiron, and he learned his lessons well, particularly in the field of medicine. When he grew up, he refined this science and raised it by transforming it into a high and noble art (just as the Greeks themselves did in actual fact, particularly in the work of the great fifth-century physician, Hippocrates, with his medical school at Cos). Asclepius married and had several children, among them doctors such as Machaon (in the *Iliad*) and more shadowy figures such as Hygeia or Hygieia (Health).

The *Homeric Hymn to Asclepius* (16) is a short and direct appeal to the mythical physician:

 About the healer of sicknesses, Asclepius, son of Apollo, I begin to sing. In the Dotian plain of Argos, goddess-like Coronis, daughter of King Phlegyas, bore him, a great joy to mortals, a soother of evil pains.

So hail to you, lord; I pray to you with my song.

So skilled a physician was Asclepius (he was worshiped as both a hero and a god) that when Hippolytus died, Artemis appealed to him to restore her devoted follower to life. Asclepius agreed and succeeded in his attempt; but he thus incurred the wrath of Zeus, who hurled him into the lower world with a thunderbolt for such a disruption of nature.

APOLLO'S MUSICAL CONTEST WITH MARSYAS

Apollo's skill as a musician has already been attested. Two additional stories concentrate more exclusively upon the divine excellence of his art and the folly of inferiors who challenged it. The first concerns Marsyas, the satyr (as we have previously mentioned) who picked up the flute after it had been invented and then discarded by Athena. Although the goddess gave Marsyas a thrashing for taking up her instrument, he was not deterred by this and became so proficient

THE *ALCESTIS* OF EURIPIDES

Apollo was enraged by the death of his son Asclepius; he did not, of course, turn against Zeus, but he killed the Cyclopes who had forged the lethal thunderbolt. Because of his crime, he was sentenced (following once again the pattern of the human social order and its codes concerning blood-guilt) to live in exile for a year under the rule of Admetus, the beneficent king of Pherae in Thessaly. Apollo felt kindly toward his master, and when he found out that Admetus had only a short time to live, he went to the Moirai and induced them, with the help of wine, to allow the king a longer life. But they imposed the condition that someone must die in his place. Admetus, however, could find no one willing to give up his or her life on his behalf (not even his aged parents) except his devoted wife, Alcestis; and he accepted her sacrifice. She is, however, rescued from the tomb in the nick of time by the good services of Hercules, who happens to be a visitor in the home of Admetus and wrestles with Death himself (*Thanatos*) for the life of Alcestis.

In his fascinating and puzzling play *Alcestis* (it is difficult to find general agreement on the interpretation of this tragicomedy), Euripides presents a touching and ironic portrait of the devoted wife and an ambiguous depiction of her distraught husband.

that he dared to challenge Apollo himself to a contest. The condition imposed by the god was that the victor could do what he liked with the vanquished. Of course Apollo won, and he decided to flay Marsyas alive. Ovid describes the anguish of the satyr (*Metamorphoses* 6. 385–400):

 Marsyas cried out: “Why are you stripping me of my very self? Oh no, I am sorry; the flute is not worth this torture!” As he screamed, his skin was ripped off all his body and he was nothing but a gaping wound. Blood ran everywhere, his nerves were laid bare and exposed, and the pulse of his veins throbbed without any covering. One could make out clearly his pulsating entrails and the vital organs in his chest that lay revealed. The spirits of the countryside and the fauns who haunt the woods wept for him; and so did his brothers, the satyrs and nymphs and all who tended woolly sheep and horned cattle on those mountains—and Olympus, dear to him now, wept as well. The fertile earth grew wet as she received and drank up the tears that fell and became soaked to the veins in her depths. She formed of them a stream which she sent up into the open air. From this source a river, the clearest in all Phrygia, rushes down between its sloping banks into the sea. And it bears the name of Marsyas.

APOLLO’S MUSICAL CONTEST WITH PAN

Apollo was involved in another musical contest, this time with the god Pan, and King Midas of Phrygia acted as one of the judges (*Ovid Metamorphoses* 11. 146–193):

 Midas, in his loathing for riches,²³ found a retreat in the woods and the country and worshiped Pan, the god who always inhabits mountain caves. But his intelligence still remained limited, and his own foolish stupidity was going to harm him once again as it had before. There is a mountain, Tmolus, that rises high in its steep ascent with a lofty view to the sea; on one side it slopes down to Sardis, on another to the little town of Hypaepa. Here, while he was singing his songs to his gentle nymphs and playing a dainty tune on his pipes made of reeds and wax, Pan dared to belittle the music of Apollo compared to his own.

And so he engaged in an unequal contest, with Tmolus as judge. This elderly judge took his seat on his own mountain and freed his ears of trees; only the oak remained to wreath his dark hair, and acorns hung down around his hollow temples. He turned his gaze upon the god of flocks and said: “Now the judge is ready.” Pan began to blow on his rustic pipes; and Midas, who happened to be nearby as he played, was charmed by the tune. When Pan had finished, Tmolus, the sacred god of the mountain, turned around to face Phoebus, and his forests followed the swing of his gaze. The golden head of Apollo was crowned with laurel from Parnassus, and his robe, dyed in Tyrian purple, trailed along the ground. His lyre was inlaid with precious stones and Indian ivory; he held it in his left hand with the plectrum in his right. His very stance was the stance of an artist. Then he played the strings with knowing hand; Tmolus was captivated by their sweetness and ordered Pan to concede that his pipes were inferior to the lyre.

The judgment of the sacred mountain pleased everyone except Midas; he alone challenged the verdict and called it unjust. At this the god of Delos could not bear that such stupid ears retain their human shape. He made them longer, covered them with white shaggy hair, and made them flexible at their base so that they could be twitched. As for the rest of him, he remained human; in this one respect alone he was changed, condemned to be endowed with the ears of a lumbering ass.

Midas of course wanted to hide his vile shame, and he attempted to do so by covering his head with a purple turban. But his barber, who regularly trimmed his long hair, saw his secret. He wanted to tell about what he had seen, but he did not dare reveal Midas' disgrace. Yet it was impossible for him to keep quiet, and so he stole away and dug a hole in the ground. Into it, with the earth removed, he murmured in a low whisper that his master had ass's ears. Then he filled the hole up again, covering up the indictment he had uttered and silently stole away from the scene. But a thick cluster of trembling reeds began to grow on the spot; in a year's time, as soon as they were full grown, they betrayed the barber's secret. For, as they swayed in the gentle south wind, they echoed the words that he had buried and revealed the truth about his master's ears.

Thus if one listened carefully to the wind whistling in the reeds he could hear the murmur of a whisper: "King Midas has ass's ears."²⁴

THE NATURE OF APOLLO

The facets of Apollo's character are many and complex. His complex nature sums up the many contradictions in the tragic dilemma of human existence. He is gentle and vehement, compassionate and ruthless, guilty and guiltless, healer and destroyer. The extremes of his emotion are everywhere apparent. He acts swiftly and surely against Tityus, who dared to attempt the rape of Leto, and for this crime is punished (as we see later) in the realm of Hades. As he shot down Tityus with his arrows, he acted the same way against Niobe, this time in conjunction with his sister, Artemis (see p. 203). Can one ever forget Homer's terrifying picture of the god as he lays low the Greek forces at Troy with a plague in response to the appeal of his priest Chryses (*Iliad* 1. 43–52)?

Phoebus Apollo . . . came down from the peaks of Olympus, angered in his heart, wearing on his shoulders his bow and closed quiver. The arrows clashed on his shoulders as he moved in his rage, and he descended just like night. Then he sat down apart from the ships and shot one of his arrows; terrible was the clang made by his silver bow. First he attacked the mules and the swift hounds, but then he let go his piercing shafts against the men themselves and struck them down. The funeral pyres with their corpses burned thick and fast.

Yet this same god is the epitome of Greek classical restraint, championing the proverbial Greek maxims: "Know thyself" and "Nothing too much." He

knows by experience the dangers of excess. From a sea of blood and guilt, Apollo brings enlightenment, atonement, and purification wherever he may be, but especially in his sanctuary at Delphi.

The origins of Apollo are obscure. He may have been one of the gods brought into Greece by the northern invaders of 2000 B.C.; if not, he was probably very soon absorbed by them in the period 2000–1500. Some scholars imagine Apollo as originally the prototype of the Good Shepherd, with his many protective powers and skills, especially those of music and medicine.²⁵ As we have seen in Chapter 3, he becomes a sun-god and usurps the power of Hyperion and of Helius.

For many, Apollo appears to be the most characteristically Greek god in the whole pantheon—a gloriously conceived anthropomorphic figure, perhaps epitomized best of all in the splendid depiction of the west pediment of the great temple of Zeus at Olympia (illustrated on p. 246). Here Apollo stood with calm intelligent strength, his head turned to one side, his arm upraised against the raging turmoil of the battle between the Centaurs and Lapiths by which he is surrounded.

By stressing his disciplined control and intellectuality and ignoring his tumultuous extremes of passion, Apollo may be presented as the direct antithesis of the god Dionysus. In the persons of these two deities, the rational (Apollonian) and irrational (Dionysiac) forces in human psychology, philosophy, and religion are dramatically pitted against one another. Some scholars maintain that Apollo represents the true and essential nature of the Greek spirit, as reflected in the poetry of Homer, in contrast to the later, foreign intrusion of the mysticism of Dionysus. Whatever kernel of truth this view may hold, it must be realized that by the sixth and fifth centuries B.C. Dionysus had become an integral part of Greek civilization. By the classical period, he was as characteristically Greek as Apollo, and *both* deities actually reflect a basic duality inherent in the Greek conception of things. We have already detected in Chapter 3 this same dichotomy in the union of the mystical and mathematical that was mirrored in the amalgamation of two cultures (the Nordic and the Mediterranean) in the Minoan and Mycenaean periods.

Just as Apollo may be made a foil for the mystical Dionysus, so he may be used as a meaningful contrast to the figure of the spiritual Christ. Each in his person and his life represents, physically and spiritually, different concepts of meaning and purpose both in this world and in the next. Apollo and Christ do indeed afford a startling and revealing antithesis.

Here now is the brief *Homeric Hymn to Apollo* (21):

 Phoebus, about you even the swan sings clearly as it wings its way and alights on the bank along the swirling river, Peneus; and about you the sweet-voiced minstrel with his lovely sounding lyre always sings both first and last.

So hail to you, lord; I propitiate you with my song.

Apollo. Marble detail from the west pediment of the temple of Zeus at Olympia, ca. 460 B.C.; height of complete fixture approx. 120 in. This is the head of the central figure in the pediment (see pp. 113–114). Son of Zeus, he imposes peace on the drunken brawl of the Lapiths and Centaurs at the wedding of Pirithoüs (also the subject of the metopes on the south side of the Parthenon). The ancient traveler Pausanias thought that the figure was Pirithoüs, but no modern scholars accept his interpretation. (*Olympia Museum, Greece. Courtesy of Alinari/Art Resource, New York.*)

ADDITIONAL READING

THE HOMERIC HYMN TO APOLLO (3. 179–546: TO PYTHIAN APOLLO)

☞ O lord, you hold Lycia and charming Maeonia and Miletus, desirable city on the sea; but you yourself rule mightily over Delos, washed by the waves.

The renowned son of Leto, dressed in divine and fragrant garments, goes to rocky Pytho, as he plays upon his hollow lyre; at the touch of his golden pick, the lyre makes a lovely sound. From there, as swift as thought, he soars from earth to Olympus, to the house of Zeus and the company of the other gods. Im-

mediately the immortals are obsessed with the lyre and song. The Muses, all together, harmonize with their charming voices and celebrate the endless gifts enjoyed by the gods and the sufferings inflicted by these immortals that human beings must bear, as they live foolish and helpless lives, unable to find a defense against old age and a cure for death.

Also the Graces with beautiful hair, and the cheerful Hours, and Harmonia, Hebe, and Aphrodite, daughter of Zeus, dance together, holding hands at the wrist; and with them sings a goddess who is not slight or homely but awesome to behold and wondrously beautiful, Artemis, who delights in her arrows, sister to Apollo. Among them too, Ares and the keen-eyed slayer of Argus join in the merriment, and Apollo continues to play his beautiful music on the lyre, as he steps high and stately. The radiance from his glittering feet and glistening robe envelop him in splendor. Both golden-haired Leto and wise Zeus watch their dear son playing his music among the immortal gods and rejoice in their mighty hearts.

Shall I sing about you as a suitor in your love affairs? How you went to woo the daughter of Azan along with godlike Ischys, the son of Elatus famous for his horses, or with Phorbas, the son of Triops, or with Ereuthus or with Leucippus for the wife [to be] of Leucippus, you on foot and he from his chariot; indeed he was not a rival inferior to Triops.²⁶

APOLLO SEEKS A SITE FOR HIS ORACLE

Or shall I sing about how at first you went over all the earth, seeking a location for your oracle for the human race, O far-shooting Apollo?²⁷ First you came down from Olympus to Pieria and went past sandy Lectus and Enienae and through the territory of the Perrhaebi. Soon you came to Iolcus and entered Cenaeum in Euboea, famous for its ships, and you stood on the Lelantine plain; but it did not please your heart to build a temple amidst forest groves. From there you crossed the Euripus, far-shooting Apollo, and made your way along the holy green mountains, and quickly you went on from here to Mycalessus and grassy Teumessus and reached the forest-covered home of Thebe; for no one of mortals as yet lived in holy Thebes, nor were there yet at that time paths or roads running through the wheat-bearing plain of Thebes; but it was overgrown with trees.

From there you went further, O far-shooting Apollo, and came to Onchestus, with its splendid grove of Poseidon. Here, while the newly broken colt, worn out with drawing the beautiful chariot, slows down to get its wind, the noble driver springs out of his seat to the ground and makes his own way. Without guidance, the horses for a time knock about the empty chariot; and, if they smash it in the forest grove, the horses are taken care of but the chariot is put at a tilt and left there. For in this way from the very first the holy rite was enacted. They pray to the god, lord of the shrine, who then keeps the chariot as his allotted portion.²⁸ From there you went further, far-shooting Apollo, and then you came upon the beautifully flowing river, Cephissus, which pours its sweet-running water from Lillaea; you crossed it, and from many-towered Ocalea you arrived at grassy Haliartus. Then you went to Telphusa; here was a propitious place that you found pleasing for making a forest grove and a temple. You stood very near her and spoke these words: "Telphusa, here I intend to build a very beautiful temple, an oracle for mortals. Here all those who live in the rich Peloponnesus, in Europe, and on the sea-girt

islands will bring perfect hecatombs and consult the oracle. To them I shall deliver my answers and ordain infallible counsel in my wealthy temple."

Thus Phoebus Apollo spoke and laid out the foundations, wide and very long overall. But Telphusa, upon seeing his actions, became deeply incensed and spoke: "Phoebus, lord and far-worker, I shall give you this warning to think about. Since you intend to build a very beautiful temple here, to be an oracle for mortals, who will always bring perfect hecatombs, I will speak out and you take my words to heart. The clatter of swift horses and the sounds of mules being watered at my holy spring will always annoy you; here any person will prefer to look at the well-made chariots and the noisy swift-footed horses rather than at your great temple and the many treasures inside. But if you were to listen to me (you are better and stronger than I am and your might is the greatest), build in Crisa, beneath the slopes of Mt. Parnassus, where beautiful chariots will not clatter and no noise will be made by swift-footed horses around your well-built altar. So there hordes of renowned mortals will bring gifts to you as Ie Paeon,²⁹ and you will rejoice greatly in your heart to receive the beautiful sacrifices of the people living roundabout." Thus Telphusa spoke and convinced the far-shooter, so that renown in her land should go to Telphusa herself and not to Apollo.

APOLLO BUILDS HIS TEMPLE AT THE SITE OF DELPHI

From there you went further, far-shooting Apollo, and you reached the town of the hubristic people, the Phlegyae, who have no concern for Zeus and live on earth in a beautiful glen near the Cephisean lake. You darted away from here quickly and came to mountain ridges and arrived at Crisa beneath snowy Mt. Parnassus. Its foothills turn towards the west, and its rocky cliffs hang from above over the hollow glade that stretches below. Here the lord Phoebus Apollo decreed that he would make his lovely temple and he said: "Here I intend to build a very beautiful temple, an oracle for mortals. Here all those who live in the rich Peloponnesus, in Europe, and on the sea-girt islands will bring perfect hecatombs and consult the oracle. To them I shall deliver my answers and ordain infallible counsel in my wealthy temple."

Thus Phoebus Apollo spoke and laid out the foundations, wide and very long overall. On these foundations Trophonius and Agamedes, the sons of Erginus, both dear to the immortal gods, placed a threshold of stone; and countless numbers of men built up with finished blocks of stone the temple, to sing about forever. There was a beautifully flowing spring nearby, where the lord, son of Zeus, killed with his mighty bow a she-dragon, a huge, bloated, and fierce monster who had done many evils to mortals on earth, to mortals themselves and to their thin-shanked flocks; for she was a bloodthirsty scourge.

HERA GIVES BIRTH TO THE MONSTER TYPHAON

Once this she-dragon received, from golden-throned Hera to bring up, Typhaon, another terrible and cruel scourge for mortals;³⁰ this was when Hera became angry with father Zeus and gave birth to the monster because the son of Cronus bore renowned Athena from his head. Lady Hera was quickly enraged and she spoke among the immortals: "Hear from me, all you gods and all you goddesses, how Zeus, the cloud-gatherer, first begins to dishonor me, when he has made

me his dear and trusting wife. Apart from me, just now, he has given birth to keen-eyed Athena, who is outstanding among all the blessed immortals. But my son, Hephaestus, whom I myself bore, with his withered feet, was a weakling among the immortals—a shame to me and a disgrace on Olympus. I grabbed him myself with my own hands and threw him out and he fell into the wide sea. But silver-footed Thetis, daughter of Nereus, accepted him and with her sisters took care of him. (How I wish that she had done some other favor for the blessed gods!) Villain, crafty deceiver, what other scheme will you devise now? How do you dare, all alone, to give birth to keen-eyed Athena? Would I not have borne a child by you? To be sure I was the one called your very own among the immortals who hold the wide heaven. Watch out now that I don't devise some evil for you in the future. Indeed I will contrive how a son of mine will be born, who will be outstanding among the immortals, without any shame to our sacred marriage vow, either yours or mine. I shall not go near your bed, but separated from you I shall associate with the immortal gods."

Thus she spoke and went apart from the gods, angered in her heart. Then straightway ox-eyed lady Hera prayed and struck the ground with the flat of her hand and uttered this invocation: "Earth and wide Heaven, hear me now, and you, Titan gods dwelling beneath the earth in vast Tartarus, from whom both mortals and gods are descended—all of you listen to me and give me, without Zeus as father, a child in no way inferior to him in might. But let him be as much stronger than Zeus as all-seeing Zeus is stronger than Cronus." Thus she called out and lashed the ground with her mighty hand. The life-giving Earth was moved; and, when Hera saw this, she rejoiced in her heart. For she believed that her prayer would be answered.

From this time then, for a whole year, she never approached the bed of wise Zeus, nor did she ever, as before, sit on her intricate throne and by his side devise shrewd plans. But ox-eyed lady Hera remained in her temples, filled with her worshipers, and took delight in their offerings. Yet when the months and days were completed and the seasons had passed as the full year came round, she gave birth to a terrible scourge for mortals, cruel Typhaon, like neither a god nor a human being. Ox-eyed lady Hera at once took and gave him, an evil, to the evil she-dragon, who accepted him, Typhaon, who used to inflict many sufferings on the renowned tribes of human beings.

APOLLO VAUNTS OVER THE SHE-DRAGON HE HAS SLAIN

As for the she-dragon, whoever opposed her met the fatal day of death, until lord Apollo, the far-shooter, struck her with a mighty arrow. Racked by bitter pain, she lay gasping frantically for breath and writhing on the ground. An unspeakable and terrifying sound arose as she twisted and rolled in the forest; breathing out blood, she gave up her life, and Phoebus Apollo vaunted over her:

"Now rot here on the ground that nourishes mortals. You shall not live any longer to be the evil ruin of human beings who eat the fruit of the all-fostering earth and who will bring perfect hecatombs to his place." Thus he spoke, boasting; and darkness covered her eyes and the holy might of Helius caused her to rot there. Because of this, now the place is named Pytho, and they call its lord by the title, Pythian, since the mighty glare of the burning sun made the monster rot on the very spot.

Then Phoebus Apollo knew in his heart why the beautifully flowing spring, Telphusa, had tricked him. In anger he went to her and quickly he was there; standing very near her, he said: "Telphusa, you were not about to deceive my intelligence and keep this desirable place for you to put forth your beautifully flowing water. Here, to be sure, will be my glory, and not only yours." He spoke and lord Apollo, the far-worker, pushed on top of her a massive shower of rocks and hid her flowing stream; and he built an altar in the forest grove very near her beautifully flowing fountain. There all pray to Apollo under the name Telphusian because he shamed the stream of holy Telphusa.

APOLLO RECRUITS CRETANS TO SERVE AS HIS PRIESTS

Then Phoebus Apollo thought deeply about what people he would bring in as his priests who would serve him in rocky Pytho. While he was thinking this over, he noticed a swift ship on the wine-dark sea. On it were many fine men, Cretans from Minoan Cnossus, who perform sacrifices to their lord and make

Apollo Delphinus, Attic red-figure hydria by the Berlin painter, ca. 480 B.C.; height 202 in. (Detail above) Apollo rides over the sea in a winged tripod, as dolphins leap above the waves and fishes and an octopus swim below.

He wears the laurel wreath and plays the lyre, while his bow and quiver are slung on his back. The artist brilliantly combines three aspects of Apollo, as prophet (symbolized by the Delphic tripod and the dolphins, associated with Delphi), musician, and archer. (Rome, *Vaticano Museo Gregoriano*.)

known the pronouncements of Phoebus Apollo of the golden sword, whatever oracle he gives from his laurel beneath the slopes of Parnassus. These men were sailing in their black ship to sandy Pylos and the people in Pylos for trade and profit. But Phoebus Apollo intercepted them on the sea and leaped onto their swift ship in the shape of a dolphin and lay there, a huge and dread monster (see Color Plate 2). None of the men understood, nor did they recognize the dolphin as the god, and they wanted to throw it overboard. But he kept making the entire ship quake and its timbers quiver. They were afraid and sat in silence on the hollow black ship; and they did not slacken the ropes or the sail of their dark-prowed ship. But as they had fixed their course by the oxhide ropes, so they sailed on, and a fierce south wind drove the swift ship from behind.

First they sailed by Malia and the coast of Laconia and came to Taenarum, a sea-crowned town, and the land of Helios, who makes mortals glad, where the thick-fleeced sheep of lord Helios pasture always and inhabit a pleasurable country.³¹ They wanted to bring the ship ashore, disembark, and study the great marvel and watch with their own eyes whether the monster would remain on the deck of the hollow ship or leap back into the swell of the sea, full of fish. But the well-built ship did not obey their directions but made its way along the fertile Peloponnesus; lord Apollo, the far-worker, easily directed it with a breeze. The ship, continuing its course, came to Arena, lovely Argyphaea, and Thryon, the ford of the river Alpheus, and well-built Aepy and Pylos and the inhabitants of Pylos; and it went past Cruini and Chalcis and past Dyme and splendid Elis, where the Epei hold power. When it was sailing towards Pherae, jaunty in a wind from Zeus, beneath the clouds appeared the steep mountain of Ithaca and Dulichium and Same and wooded Zacynthus. But when it had passed the whole coast of the Peloponnesus, then to be sure, as they turned toward Crisa, there loomed before them the vast gulf whose length cuts off the rich Peloponnesus. A west wind, strong, clear, and vehement, came out of the sky by Zeus' decree and speeded the ship along so that it might complete its fast course over the briny water of the sea as quickly as possible. Then indeed they were sailing back towards the dawn and the sun. Lord Apollo, son of Zeus, was their guide, and they came to the conspicuous harbor of vine-clad Crisa, where the seafaring ship was grounded on the sands.

There lord Apollo, the far-worker, leaped out of the ship like a star at mid-day. His person was engulfed by a shooting fiery shower and his splendor reached to the heavens. He made his way, amidst precious tripods, to his innermost sanctuary. Then he caused a blaze to flare up and his arrows were bathed in a brilliance that encompassed the whole of Crisa. The wives and the lovely-dressed daughters of the Crisaeans cried out in amazement at the spectacular sight of Apollo; for the god instilled an awesome fear in each of them. Thereupon, swift as thought, he made a flying leap back onto the ship, in the form of a man in his prime, strong and vigorous, with his hair flowing about his broad shoulders. Uttering winged words, he spoke to them.

"Strangers, who are you? From where do you sail the watery paths? Is barter your goal, or do you roam recklessly, like pirates over the deep, who hazard their lives as they wander bringing evil to strangers? Why do you sit this way, despondent? Why don't you disembark and take your gear from your black ship

to land? This is the right thing for enterprising men to do whenever they come from the sea to shore in their black ship; they are worn out and weary and straightway overcome by the desire for luscious food."

Thus he spoke and put spirit in their breasts and the leader of the Cretans said in answer: "Stranger, indeed you do not look at all like mortals in your appearance and stature, but like the immortal gods. Good health and all hail, may the gods give you prosperity! Tell me this truly so that I may understand fully: What territory, what land is this? What people live here? For we were sailing the great seas, with other intentions, bound for Pylos from Crete, where we are proud to have been born; yet now we have arrived here with our ship, in a different way and by another course, not at all willingly, and anxious to return; but someone of the immortals has taken us here, against our wishes."

Then Apollo, the far-worker, spoke in answer: "Strangers, who used to live in wooded Cnossus before, now no longer will you return again to your lovely city, beautiful homes, and dear wives; but each of you here will keep my rich temple, honored by many mortals. I say proudly that I am Apollo, son of Zeus, and I took you to this place over the wide expanse of the sea. I intend you no harm, but you will keep my rich temple here, greatly esteemed and honored by all human beings; and you will know the counsels of the immortals, by whose will you always will be honored continually all your days. But come, as quickly as possible obey me in what I say. First let down the sails and loosen the ropes of ox-hide; then draw the swift ship up from the water onto dry land and remove your possessions and gear from the well-balanced ship; and build an altar on the shore of the sea; and, kindling a fire, make an offering of white barley. Then pray, standing around the altar. As I first leaped aboard your swift ship on the hazy sea in the form of a dolphin, so pray to me as Delphinus; furthermore, the altar itself will be Delphinus and overlooking³² forever. Next, take your meal by the swift black ship and make a libation to the blessed gods who hold Olympus. But when you have satisfied your desire for luscious food, come with me and sing the *Ie Paean* (Hail Healer) until the time when you arrive at the place where you will keep my rich temple."

So Apollo spoke, and they readily listened to him and obeyed. First they let down the sails and loosened the ropes of ox-hide; and, lowering the mast by the forestays, they brought it to rest on the mast-holder. They themselves disembarked on the seashore and drew the swift ship up from the water onto dry land. They built an altar on the shore of the sea; and, kindling a fire, they made an offering of white barley; and they prayed, as he ordered, standing around the altar. Then they took their meal by the swift black ship and made a libation to the blessed gods who hold Olympus. But when they had satisfied their desire for food and drink, they got up and went with their leader, lord Apollo the son of Zeus, who held his lyre in his hands and played a lovely tune, as he stepped high and stately. The Cretans followed, marching to his rhythm, and they sang the *Ie Paean*, like the Cretan paean singers and those in whose breasts the divine Muse has placed sweet song.

With weariless feet, they reached the mountain-ridge and quickly arrived at Parnassus itself and the desirable place where they were going to live, honored by human beings. Apollo, who had led them there, pointed out his sacred

sanctuary and rich temple. And the spirit was aroused in their dear breasts; and the leader of the Cretans questioned him with these words: "O lord, since you have brought us far from our loved ones and our fatherland—so was it somehow your wish—how then shall we live now? This we ask you to explain. This place is desirable neither as a vineyard nor as a pasture."

And Apollo, the son of Zeus, smiling upon them, said: "Foolish, wretched mortals, who prefer heartfelt care, hard work, and trouble; I shall give you a message of comfort, and take it in earnest. Even if each of you, holding a knife in his right hand, were to slaughter sheep continuously, still the supply would not be exhausted with all that the renowned tribes of human beings bring to me here. Guard my temple and receive the human hordes who gather here, and above all point out to them my directions and keep my ordinances in your hearts. But if anyone is foolish enough to pay no heed and disobey, if there will be any idle word or deed or hubris, which is usually the case among mortal humans, then other men will be masters over you and you will be forced to submit to their might all your days. Everything has been told to you; store it in your hearts."

So farewell, son of Zeus and Leto. Yet I shall remember you and another song too.

NOTES

1. Many had cults of Apollo. Leto's wanderings are at times geographically erratic. Most of the places mentioned are familiar enough, but some names are problematical. Any attempt to trace Leto's wanderings precisely should begin with the notes in *The Homeric Hymns*, ed. T. W. Allen, W. R. Halliday, and E. E. Sikes, 2d ed. (New York: Oxford University Press, 1963).
2. In later accounts, Hera employs various schemes to prevent Leto from finding a place to bear her children, and through fear of Hera the whole earth rejects Leto's pleas. Hera also is said to have decreed that Leto's children could not be born in any place where the sun shone, so Poseidon kept the island of Delos (which in this early time was afloat) covered by his waves from the sun's rays during the birth of the twins.
3. These lines were thought to refer to Homer, who, among the many traditions, becomes a blind bard from the island of Chios. It is extremely unlikely that the Homer associated with the *Iliad* and *Odyssey* wrote this hymn or any of the others. Bards are archetypically blind as opposed to the hale and hearty politicians and warriors; in terms of another fundamental motif, blind poets see the Muses' truth.

4. It is not difficult to imagine a fluid bardic tradition in which hymns could vary in length and be presented in diverse combinations.
5. In later accounts, the dragon or serpent is sometimes masculine with the name Python (as in Ovid's story of Apollo and Daphne, translated later in this chapter). It may also be described as the hostile opponent of Leto before the birth of her children. Some versions stress the great prowess of Apollo early in his life and career (as in the case of the wondrous childhood of Hermes and Heracles) to the extent of having him kill the dragon while still a child.
6. Aeschylus in the prologue to his *Eumenides* and Euripides in a chorus from his *Iphigenia in Tauris*. A scholarly survey of the problems, with a reconstruction of the origins and procedures of the oracle, is provided by H. W. Parke and D. E. W. Wormell, *The Delphic Oracle*, 2 vols. (Oxford: Basil Blackwell, 1956).
7. A festival (called the Stepteria) was celebrated every ninth year at Delphi to commemorate these events in the early history of the sanctuary.
8. The omphalos found in the excavations and originally identified as the archaic sacred stone has subsequently been labeled a fraud.
9. The other major Panhellenic festivals were those at Olympia and Nemea, both in honor of Zeus, and the Isthmian Games at Corinth, dedicated to Poseidon.
10. For the oracular Apollo elsewhere, see H. W. Parke, *The Oracles of Apollo in Asia Minor* (London: Croom Helm, 1985); also Joseph Fontenrose, *Didyma: Apollo's Oracle, Cult, and Companions* (Berkeley: University of California Press, 1988), who is overly skeptical in his scholarly treatment of evidence.
11. One could inquire on one's own behalf or on the behalf of someone else. Inquiries often came from state representatives. Both the question and the answer were usually set down in writing. See Joseph Fontenrose, *The Delphic Oracle: Its Responses and Operations* (Berkeley: University of California Press, 1978).
12. Among the religious objects that decked the temple was the tomb of Dionysus. The god Dionysus was worshiped alongside Apollo in the sanctuary (perhaps as early as the sixth century). The prophetic madness of the Pythia has much in common with Dionysiac frenzy. Some believe such frenzy was induced by drugs of one sort or another. See Walter Burkert, *Ancient Mystery Cults* (Cambridge: Harvard University Press, 1987), p. 108. Contemporary geologists (Jelle de Boer, Wesleyan University, Middletown, Conn., among others) are exploring the possibility that the priestesses inhaled narcotic fumes (from such gases as methane and ethane) arising from faults, fissures, and chasms created in the highly volcanic region of Delphi.
13. The first Pythia, who is named Phemonoë (Prophetic Mind), is a poetic figure; we have from Herodotus the names of later ones (Aristonice and Perallus), historically much more real.
14. See H. W. Parke, *Sibyls and Sibylline Prophecy in Classical Antiquity*, ed. Brian C. McGing. Croom Helm Classical Studies (New York: Routledge, 1988).
15. This Sibyl is Deïphobe, daughter of Glaucus, priestess of the temple of Phoebus Apollo and Diana.
16. Vergil's works themselves were consulted as oracles in later times as the *sortes Vergilianae*.
17. A total of one thousand years, counting the generations (*saecula*) as one hundred years each.

18. Petronius, *Satyricon* 48. 8. The Sibyl's story appears to be late in its reminiscences of Cassandra and Tithonus.
19. This is the Aristaeus who will become the husband of Autoonë and father of Actaeon; he too is the one who made advances to Eurydice. He is particularly linked with agricultural pursuits, especially beekeeping.
20. For the theme of homosexuality, see pp. 21–22.
21. Ovid puts the story in the mouth of Orpheus. Other accounts have Zephyrus (the West Wind) deliberately divert the course of the discus because of his jealous love for Hyacinthus.
22. These marks not only reproduce Apollo's moans of grief, they are also the initial letters of the name of the hero of the Trojan saga, the great Ajax (Greek *Aias*), son of Telamon, as Apollo indicates in his prophetic words. When Ajax committed suicide, the same flower, the hyacinth, sprang from his blood (Ovid, *Metamorphoses* 13. 391–398).
23. This is the famous Midas of the golden touch (Ovid's version of his story, *Metamorphoses* 11. 85–145, is well known). His story is told in Chapter 13, pp. 294–295.
24. Elements of folktale appear dominant in this story, particularly in the traditional depiction of the garrulous barber. In some versions, Midas plays this same role in the contest between Apollo and Marsyas. Thus he favors the satyr against Apollo and suffers the same humiliation.
25. Apollo's epithet Lykios was believed by the Greeks to refer to him as a "wolf-god," whatever this may mean—that he was a hunter like a wolf? That he was the protector against the wolf? Perhaps Lykios is to be derived from Lycia, a district in south-western Asia Minor.
26. These lines about Apollo as a suitor are full of problems; the text seems to be corrupt. Ischys and Apollo vied for Coronis, and Leucippus and Apollo vied for Daphne (in a version given by Pausanias, 8. 20. 3). Nothing much can be made of the other rivals.
27. Apollo's itinerary offers some geographical problems, but in general he goes from Olympus through Larissa (the home of the Perrhaebi) to Iolchus and eventually crosses to the Lelantine plain (between Chalcis and Eretria) on the island of Euboea, and then back again to the mainland and Onchestus, Thebes, Lake Copais, and the Cephissus River—all in Boeotia. Next, continuing westward, Apollo comes to the spring Telphusa in the region of Mt. Helicon, and from there finally to Crisa, the site of his Delphi.
28. This is our only evidence for this ritual in honor of Poseidon at his famous precinct in Onchestus, and the numerous conjectures made by scholars about its meaning and purpose are not at all convincing.
29. Some etymologists do not agree with the ancients, who thought this name was derived from the cry *Ie* and *Paeon*, meaning "healer." Later in this hymn, it is the name of a song.
30. *Typhaon* is also the name of the monster killed by Zeus, i.e., Typhoeus or Typhaon or Typhon; see pp. 79–80.
31. The ship sails along the south coast of the Peloponnesus, then up the north coast until it turns into the Corinthian Gulf and makes for Crisa.
32. The Greek word translated as "overlooking" is *epopsios* and may refer to another epithet of Apollo (and Zeus) as "overseers" of everything; or the adjective may only mean that the altar is "conspicuous."

HERMES

THE BIRTH AND CHILDHOOD OF HERMES

The *Homeric Hymn to Hermes* (18) concentrates upon the story (repeated at the beginning of the much more lengthy and important hymn that follows) of how Zeus became the father of Hermes as the result of his union with Maia, one of the Pleiades, the daughters of Atlas and Pleione.

 I sing about Hermes, the Cyllenian slayer of Argus, lord of Mt. Cyllene and Arcadia rich in flocks, the messenger of the gods and bringer of luck, whom Maia, the daughter of Atlas, bore, after uniting in love with Zeus. She in her modesty shunned the company of the blessed gods and lived in a shadowy cave; here the son of Cronus used to make love to this nymph of the beautiful hair in the dark of night, without the knowledge of immortal gods and mortal humans, when sweet sleep held white-armed Hera fast.

So hail to you, son of Zeus and Maia. After beginning with you, I shall turn to another hymn. Hail, Hermes, guide and giver of grace and other good things.

The more famous *Homeric Hymn to Hermes* (4) tells the story of the god's birth and childhood with delightful charm and disarming candor; here is a most artful depiction of this mischievous divine child, who invents the lyre and steals Apollo's cattle:

 Sing, O Muse, of the son of Zeus and Maia, lord of Mt. Cyllene and Arcadia rich in flocks, the messenger of the gods and bringer of luck, whom Maia of the beautiful hair bore after uniting in love with Zeus. She in her modesty shunned the company of the blessed gods and lived within a shadowy cave; here the son of Cronus joined in love with this nymph of the beautiful hair in the dark of night, without the knowledge of immortal gods and mortal humans, while sweet sleep held white-armed Hera fast. But when the will of Zeus had been accomplished and her tenth month was fixed in the heavens, she brought forth to the light a child, and a remarkable thing was accomplished; for the child whom she bore was devious, winning in his cleverness, a robber, a driver of cattle, a guide of dreams, a spy in the night, a watcher at the door, who soon was about to manifest renowned deeds among the immortal gods.

Maia bore him on the fourth day of the month. He was born at dawn, by midday he was playing the lyre, and in the evening he stole the cattle of far-shooting Apollo. After he leaped forth from the immortal limbs of his mother,

he did not remain lying in his sacred cradle; but he sprang up and looked for the cattle of Apollo. When he crossed the threshold of the high-roofed cave, he found a tortoise and obtained boundless pleasure from it.

HERMES INVENTS THE LYRE

Indeed Hermes was the very first to make the tortoise a minstrel. He happened to meet it in the very entranceway, waddling along as it ate the luxurious grass in front of the dwelling. When Zeus' son, the bringer of luck, saw it, he laughed and said at once: "Already a very good omen for me; I shall not be scornful. Greetings; what a delight you appear to me, lovely in shape, graceful in movement and a good dinner companion. Where did you, a tortoise living in the mountains, get this speckled shell that you have on, a beautiful plaything? Come, I shall take you and bring you inside. You will be of some use to me and I shall do you no dishonor. You will be the very first to be an advantage to me, but a better one inside, since the out-of-doors is dangerous for you. To be sure, while you are alive you will continue to be a charm against evil witchcraft, but if you were dead, then you would make very beautiful music."¹

Thus he spoke and lifted the tortoise in both hands and went back into his dwelling carrying the lovely plaything. Then he cut up the mountain-dwelling tortoise and scooped out its life-marrow with a knife of gray iron. As swiftly as a thought darts through the mind of a man whose cares come thick and fast or as a twinkle flashes from the eye, thus glorious Hermes devised his plan and carried it out simultaneously. He cut to size stocks of reeds, extended them across the back and through the tortoise shell and fastened them securely. In his ingenuity, he stretched the hide of an ox all around and affixed two arms to which he attached a bridge and then he extended seven tuneful strings of sheep gut.

When he had finished, he took up the lovely plaything and tried it by striking successive notes. It resounded in startling fashion under his hand, and the god accompanied his playing with a beautiful song, improvising at random just as young men exchange banter on a festive occasion. He sang about Zeus, the son of Cronus, Maia with the beautiful sandals, and their talk in the intimacy of their love, and proclaimed aloud the renown of his birth. He honored too the handmaids of the nymph, her splendid home, and the tripods and the ample cauldrons it contained. He sang of these things, but his heart was set on other pursuits. He took the hollow lyre and set it down in his sacred cradle; for he craved for meat and leaped out of the fragrant hall to a place where he could watch, since he was devising in his heart sheer trickery such as men who are thieves plan in the dead of black night.

HERMES STEALS APOLLO'S CATTLE

Heliuss, the Sun, with his horses and chariot was descending to earth and the stream of Ocean, when Hermes came hurrying to the shady mountains of Pieria² where the immortal cattle of the blessed gods have their home, grazing on the lovely untouched meadows. The sharp-sighted son of Maia, the slayer of Argus, cut off from the herd fifty loud-bellowing cattle and drove them over sandy ground reversing their tracks as they wandered. For he did not forget his skill at trickery, and he made their hoofs go backward, the front ones last and the back ones first; he himself walked straight ahead. For quickly, by the sandy

seashore, he wove sandals of wicker, a wonderful achievement, beyond description and belief; he combined twigs of myrtle and tamarisk and fastened together bundles of the freshly sprouting wood which he bound, leaves and all, under his feet as light sandals. The glorious slayer of Argus made them so, as he left Pieria, improvising since he was hastening over a long journey.³

But an old man, who was working in a luxuriant vineyard, noticed him coming to the plain through Onchestus with its beds of grass. The renowned son of Maia spoke to him first: "Old man, digging about with stooped shoulders, you will indeed have much wine when all these vines bear fruit, if you listen to me and earnestly remember in your heart to be blind to what you have seen and deaf to what you have heard and to keep silent, since nothing of your own has been harmed in any way." He said only this much and pushed the sturdy head of cattle on together. Glorious Hermes drove them over many shady mountains, echoing hollows, and flowery plains.

The greater part of divine night, his dark helper, was over; and the break of day that calls men to work was soon coming on, and bright Selene, daughter of lord Pallas, the son of Megamedes,⁴ had climbed to a new watchpost, when the strong son of Zeus drove the broad-browed cattle of Phoebus Apollo to the river Alpheus. They were unwearied when they came to the lofty shelter and the watering places that faced the splendid meadow. Then, when he had fed the loud-bellowing cattle well on fodder, he drove them all together into the shelter, as they ate lotus and marsh plants covered with dew. He gathered together a quantity of wood and pursued, with diligent passion, the skill of producing fire. He took a good branch of laurel and trimmed it with his knife, and in the palm of his hand he grasped a piece of wood; and the hot breath of fire rose up.⁵ Indeed Hermes was the very first to invent fire sticks and fire. He took many dry sticks which he left as they were and heaped them up together in a pit in the ground. The flame shone forth, sending afar a great blaze of burning fire.

While the power of renowned Hephaestus was kindling the fire, Hermes dragged outside near the blaze two horned cattle, bellowing, for much strength went with him. He threw them both panting upon their backs onto the ground and bore down upon them. Rolling them over, he pierced through their life's marrow; he followed up this work with more, cutting the meat rich in fat and spearing the pieces with wooden spits, and roasted all together the flesh, choice parts from the back, and the bowels that enclosed the black blood. He laid these pieces on the ground and stretched the hides on a rugged rock, and thus still even now they are there continually long afterward, despite the interval of time. Next Hermes in the joy of his heart whisked the rich bundles away to a smooth flat rock and divided them into twelve portions that he allotted, adding a choice piece to each, making it wholly an honorable offering.

Then glorious Hermes longed for the sacred meat of the sacrifice, for the sweet aroma made him weak, even though he was an immortal. But his noble heart did not yield, although his desire was overwhelming to gulp the offering down his holy throat.⁶ But he quickly put the fat and all the meat away in the cave with its lofty roof, setting them up high as a testimony of his recent childhood theft, and he gathered up wood for the fire and destroyed all the hoofs

and the heads in the blaze. When the god had accomplished all that he had to do, he threw his sandals into the deep-eddying stream of the Alpheus; he put out the embers and hid the black ashes in the sand. Thus he spent the whole night as the beautiful light of Selene shone down on him. Swiftly then he went back to the divine peaks of Cyllene and encountered no one at all (neither blessed gods nor mortal humans) on his long journey, and dogs did not bark.

Hermes, the luck-bringer, son of Zeus, slipped sideways past the lock into his house, like the gust of a breeze in autumn, and went directly through the cave to his luxurious inner chamber, stepping gently on his feet, for he did not make a sound as one would walking upon the floor. Glorious Hermes quickly got into his cradle and wrapped the blankets about his shoulders like a helpless baby and lay toying with his fingers at the covers on his knees; at his left side he kept his beloved lyre close by his hand.

But the god did not escape the notice of his goddess mother, who spoke to him: "You devious rogue, in your cloak of shameless guile, where in the world have you come from in the nighttime? Now I am convinced that either Apollo, son of Leto, by his own hands will drag you with your sides bound fast right out the door or you will prowl about the valleys, a robber and a cheat. Be gone then! Your father begat you as a great trouble for mortals and immortal gods!"

Hermes answered her with clever words: "Mother, why do you throw this up at me, as to a helpless child who knows in his heart very little of evil, a fearful baby, frightened of his mother's chiding? But I shall set upon whatever work is best to provide for me and you together. We two shall not endure to stay here in this place alone, as you bid, apart from the immortals without gifts and prayers. Better all our days to live among the gods, rich and full in wealth and plenty, than to sit at home in the shadows of this cave! And I shall go after divine honor just as Apollo has. And if my father does not give it to me, to be sure I shall take my honor myself (and I can do it) which is to be the prince of thieves. And if the glorious son of Leto search me out, I think he will meet with another even greater loss. For I shall go to Pytho and break right into his great house and I shall seize from within plenty of very beautiful tripods and bowls and gold and gleaming iron and an abundance of clothing. You will be able to see it all, if you like." Thus they conversed with each other, the son of aegis-bearing Zeus and the lady Maia.

APOLLO CONFRONTS HERMES

As Eos, the early-born, sprang up from the deep-flowing waters of Ocean, bringing light to mortals, Apollo was on his way and came to Onchestus, a very lovely grove sacred to loud-roaring Poseidon, who surrounds the earth. There he found the old man, who on the path within was feeding the animal that guarded his vineyard. The glorious son of Leto spoke to him first: "Old man, who pulls the weeds and briars of grassy Onchestus, I have come here from Pieria looking for some cattle from my herd—all cows, all with curved horns. The bull, which was black, fed alone away from the others; keen-eyed dogs followed behind, four of them, of one mind like humans. They were left behind, both the dogs and the bull—a truly amazing feat. But just as the sun had set, the cows went out of the soft meadow away from the sweet pasture. Tell me this, old fellow, have you seen a man passing along the road with these cows?"

The old man spoke to him in answer: "My friend, it is hard to tell everything that one sees with one's eyes. For many wayfarers pass along the road; some travel intent on much evil, others on much good. To know each of them is difficult. But, good sir, the whole day long until the sun set I was digging about in my fruitful vineyard and I thought that I noticed a child, I do not know for sure; whoever the child was, he, an infant, tended the fine-horned cattle and he had a stick. He walked from side to side as he drove them backward and kept their heads facing him."

Thus the old man spoke; after Apollo had heard his tale, he went more quickly on his way. He noticed a bird with its wings extended, and from this sign he knew at once that the thief was a child born of Zeus, the son of Cronus. So lord Apollo, the son of Zeus, eagerly hastened to holy Pylos in search of his shambling cows, his broad shoulders enshrouded in a dark cloud. When the archer-god spied the tracks he cried out: "Why, indeed, here is a great marvel that I see with my eyes. These are definitely the tracks of straight-horned cows, but they are turned backward toward the asphodel meadow. And these here are not the prints of a man or a woman or gray wolves or bears or lions; nor are they, I expect, those of a shaggy-maned centaur or whoever makes such monstrous strides with its swift feet. On this side of the road the tracks are strange but on the other side they are even stranger."

With these words lord Apollo, the son of Zeus, hurried on and came to the forest-clad mountain of Cyllene and the deeply shaded cave in the rock where the immortal nymph bore the child of Zeus, the son of Cronus. A lovely odor pervaded the sacred mountain, and many sheep ranged about grazing on the grass. Then the archer-god, Apollo himself, hurried over the stone threshold down into the shadowy cave.

When the son of Zeus and Maia perceived that far-shooting Apollo was in a rage about his cattle, he sank down into his fragrant blankets. As ashes hide a bed of embers on logs of wood, so Hermes buried himself in his covers when he saw the archer-god. He huddled head and hands and feet tightly together as though just bathed and ready for sweet sleep, but he was really wide awake, and under his arm he held his lyre. The son of Zeus and Leto knew both the beautiful mountain nymph and her dear son, the little boy enveloped in craft and deceit, and he was not fooled. He looked in every corner of the great house. He took a shining key and opened three chambers full of nectar and lovely ambrosia, and in them too lay stored much silver and gold and many of the nymph's garments, rich in their hues of purple and silver, such as are found in the sacred dwellings of the blessed gods.

Then, when the son of Leto had searched every nook in the great house, he addressed glorious Hermes with these words: "You, O child, lying in the cradle, inform me about my cattle and be quick, or soon the two of us will be at variance and it will not be nice. For I shall take hold of you and hurl you down into the terrible and irrevocable darkness of murky Tartarus; neither your mother nor your father will release you to the light above, but you will wander under the earth, a leader among little people."

Hermes answered him craftily: "Son of Leto, what are these harsh words you have spoken? Have you come here looking for cattle of the field? I have not

seen a thing, I do not know a thing, I have not heard a word from anyone. I cannot give information nor can I win the reward. Do I look like a man of brawn, a cattle rustler? That is not my line; I am interested rather in other things: sleep, milk from my mother's breast, baby blankets about my shoulders and warm baths. Do not let anyone find out how this dispute came about. It would indeed be a source of great amazement among the immortals that a newborn child should bring cattle of the field right through the front door of his house. What you say is pretty unlikely. I was born yesterday, my feet are tender and the ground is rough beneath them. If you wish, I shall swear a great oath by the head of my father; I pledge a vow that I am not guilty myself and that I have not seen anyone else who might be the one who stole your cows—whatever cows are, for I have only heard about them now for the first time."

Thus Hermes spoke, his eyes twinkling and his brows raised as he looked all about, and gave a long whistle to show how fruitless he considered Apollo's quest. But far-shooting Apollo laughed softly and spoke to him: "Oh splendid, you sly-hearted cheat; from the way that you talk I am sure that many a time you have broken into the better homes during the night and reduced more than one poor fellow to extremities by grabbing everything in the house without a sound. And you will distress many a shepherd in the mountain glens, when greedy after meat you come upon their herds of cattle and their woolly sheep. But come on now, if you do not want to sleep your last and longest sleep, get down out of your cradle, you comrade of black night. For this then you will have as your prerogative hereafter among the gods: you will be called forevermore the prince of thieves."

Thus Phoebus Apollo spoke and took hold of the child to carry him away. At that very moment the mighty slayer of Argus had an idea; as he was being lifted in Apollo's hands he let go an omen, a bold and servile messenger from his belly, a hearty blast, and right after it he gave a violent sneeze. And when Apollo heard, he dropped glorious Hermes out of his hands to the ground and sat in front of him; even though he was eager to be on his way he spoke with taunting words: "Rest assured, son of Zeus and Maia, in your swaddling clothes, with these omens I shall find my sturdy head of cattle by and by, and furthermore you will lead the way." Thus he spoke.

HERMES AND APOLLO BRING THEIR CASE BEFORE ZEUS

And Cyllenian Hermes gave a start and jumped up pushing the blanket away from both his ears with his hands, and clutching it around his shoulders he cried out: "Where are you taking me, O far-shooter, most vehement of all the gods? Is it because of the cows that you are so angry and assault me? Oh, oh, how I wish the whole breed of cattle might perish! For I did not steal your cows and I have not seen anyone else who has—whatever cows are, for I have only heard about them now for the first time. Let us have the case decided before Zeus, the son of Cronus."

Thus as they quarreled over each and every point, Hermes, the shepherd, and the splendid son of Leto remained divided. The latter spoke the truth and not without justice seized upon glorious Hermes because of the cattle; on the other hand, the Cyllenian wished to deceive the god of the silver bow by tricks

and by arguments. But when he in his ingenuity found his opponent equally resourceful, he hastened to walk over the sandy plain in front with the son of Zeus and Leto behind. Quickly these two very beautiful children of Zeus came to their father, the son of Cronus, on the top of fragrant Olympus. For there the scales of justice lay ready for them both.

A happy throng occupied snow-capped Olympus, for the deathless gods had assembled with the coming of golden-throned Dawn. Hermes and Apollo of the silver bow stood before the knees of Zeus, and he who thunders from on high spoke to his glorious son with the question: "Phoebus, where did you capture this delightful booty, a child newly born who has the appearance of a herald? This is a serious business that has come before the assembly of the gods."

Then lord Apollo, the archer, replied: "O father, you, who scoff at me for being the only one who is fond of booty, are now going to hear a tale that is irrefutable. After journeying for a long time in the mountains of Cyllene I found a child, this out-and-out robber here; as sharp a rogue I have not seen either among gods or mortals who cheat their fellows on earth. He stole my cows from the meadow in the evening and proceeded to drive them along the shore of the loud-sounding sea making directly for Pylos. The tracks were of two kinds, strange and marvelous, the work of a clever spirit. The black dust retained the prints of the cattle and showed them leading into the asphodel meadow. But this rogue I have here, an inexplicable wonder, did not cross the sandy ground on his feet or on his hands; but by some other means he smeared the marks of his amazing course as though someone had walked on oak saplings. As long as he followed the cattle across the sandy ground, the tracks stood out very clearly in the dust. But when he had covered the great stretch of sand, his own course and that of the cows quickly became imperceptible on the hard ground. But a mortal man noticed him driving the herd of cattle straight for Pylos. When he had quietly penned up the cows and slyly confused his homeward trail by zigzagging this way and that, he nestled down in his cradle, obscure as the black night, within the darkness of the gloomy cave, and not even the keen eye of an eagle would have spied him. He kept rubbing his eyes with his hands as he devised his subtle wiles, and he himself immediately maintained without a qualm: 'I have not seen a thing, I do not know a thing and I have not heard a word from anyone. I cannot give information nor can I win the reward.' " Thus Phoebus Apollo spoke and then sat down.

And Hermes in answer told his side of the story, directing his words pointedly to Zeus, the ruler of all the gods. "Father Zeus, I shall indeed tell you the truth. For I am honest and I do not know how to lie. He came to our house to-day as the sun was just rising, in search of his shambling cattle. He brought none of the blessed gods as witnesses or observers and with great violence ordered me to confess; he made many threats of hurling me down into wide Tartarus, since he is in the full bloom of his glorious prime, while I was born only yesterday (as he too well knows himself) and do not look at all like a cattle rustler or a man of brawn. Believe me (for you claim to be my own dear father too) that I did not drive his cows home nor even cross the threshold—so may I prosper, what I tell you is the truth. I deeply revere Helios and the other gods; I love you and I am in dread of this fellow here. You know yourself that I am not guilty—

I shall swear a great oath besides—no, by these beautifully ornate portals of the gods. Somehow, someday, I will pay him back, even though he is mighty, for his ruthless behavior. Be on the side of a defenseless baby.” Thus the Cyllenian slayer of Argus spoke, blinking in innocence, and he held his baby blanket on his shoulder and would not let it go.

Zeus gave a great laugh as he saw the devious child knowingly and cleverly make his denials about the cattle. He ordered the two of them to act in accord and make a search; Hermes, in his role of guide, was to lead without any malicious intent and point out the spot where he had hidden away the mighty herd of cattle. The son of Cronus nodded his head and splendid Hermes obeyed, for the will of agis-bearing Zeus easily persuaded him.

THE RECONCILIATION BETWEEN HERMES AND APOLLO

The two very beautiful sons of Zeus hastened together to sandy Pylos, crossed the river Alpheus, and came to the lofty cave where the animals were sheltered in the nighttime. Then, while Hermes went into the rocky cavern and drove the mighty head of cattle out into the light, the son of Leto looked away and noticed the cowhides on the steep rock and immediately asked glorious Hermes: “O sly rogue, how were you, a newborn infant, able to skin two cows? I do indeed wonder at the strength that will be yours in the future; there is no need to wait for you to grow up, O Cyllenian, son of Maia.”

Thus he spoke and fashioned with his hands strong bonds out of willow.⁷ But they grew up in that very spot on the ground under their feet; and twisting and twining together, they readily covered over all the cattle of the field at the will of the trickster Hermes, while Apollo watched in wonder. Then the mighty slayer of Argus looked away to the ground, fire flashing from his eyes, in his desire to get out of his predicament. But it was very easy for him, just as he wished, to soften the far-shooting son of Leto, even though he was strong; he took up the lyre in his left hand and tried it by striking successive notes. The instrument resounded in startling fashion and Phoebus Apollo laughed with delight as the lovely strains of the heavenly music pierced his being, and sweet yearning took hold of his heart while he listened.

The son of Maia, growing bold as he played so beautifully, took his stand on the left side of Phoebus Apollo and began to sing a song—and lovely was the ensuing sound of his voice—fashioned on the theme of the immortal gods and the dark earth and how in the beginning they came into being and how each was allotted his due. Of the gods he honored first of all Mnemosyne, mother of the Muses, for she honored him, the son of Maia, as one of her own. The splendid son of Zeus paid tribute to each of the other immortal gods according to age and birth, mentioning all in the proper order, as he played the lyre on his arm.

But an irresistible desire took hold of Apollo, heart and soul, and he spoke up, interrupting with winged words: “Cattle slayer, contriver, busy worker, good companion at a feast, this skill of yours is worth fifty cows—I think that we soon will be peacefully reconciled. Come now, tell me, ingenious son of Maia, was this wonderful achievement yours from birth or did one of the gods or mortal humans give you this noble gift and teach you inspired song? For this newly

uttered sound I hear is wonderful, and I tell you that no one, either mortal or god who dwells on Olympus, has ever before known it, except you, you trickster, son of Zeus and Maia. What skill! What Muse's art! What salve for sorrow and despair! It gives the choice of three blessings together all at once: joy and love and sweet sleep. I follow the Olympian Muses who delight in dancing, the swelling beat of music, and the lovely tune of flutes, yet never have I been as thrilled by such clever delights as these at young men's feasts. I marvel, O son of Zeus, at your charming playing. Since you know such a glorious skill, even though you are little, sit down, my boy, and listen to what I intend. For you yourself and your mother will have renown among the immortal gods. And I shall vow this to you truly: By this spear of cornel wood, I shall make you a renowned and prosperous guide among the immortal gods, and I shall give you splendid gifts and to the end I shall not deceive you."

Hermes answered him with clever words: "Archer-god, your questions are well considered; I do not begrudge your taking up my art. You will know it this very day. I want us to be friends, alike in what we think and what we say. You know all things in your heart, for you, son of Zeus, sit in the first place among the immortals, brave and strong. Zeus in his wisdom loves you as he rightly should and has granted you splendid gifts. And they say that you have acquired from the mouth of Zeus honors and, O archer-god, from him too every kind of divine oracular power. I know then that you are very rich in these gifts and you have only to make the choice of whatever you desire to learn. So, since your heart is set on playing the lyre, sing and play and be merry; accept this gift from me; and you, my dear friend, bestow glory upon me. With this clear-voiced companion in your hands,⁸ sing beautifully and well, knowing the art of proper presentation. Then with confidence take it to a luxurious feast and lovely dance and splendid revel, a thing of joy both night and day. Whoever makes demands of it after acquiring skill and knowledge is informed with sounds of every sort to delight the mind, for it is played by gentle familiarity and refuses to respond to toilsome drudgery. And whoever through lack of skill is from the first vehement in his demands is answered in return with wild and empty notes that clang upon the air. But you have only to make the choice of learning whatever you desire. To you I give this gift, splendid son of Zeus, and we both shall feed the cattle of the field on the pastures in the mountain and the plain where horses also graze. Even you, shrewd bargainer that you are, ought not to be violently angry."

With these words he held out the lyre, and Phoebus Apollo accepted it. And he entrusted to Hermes the shining whip that he had and put him in charge of cattle herds. The son of Maia accepted this with joy. The far-shooting lord Apollo, the glorious son of Leto, took the lyre in his left hand and tried it by striking successive notes. It sounded in startling fashion at his touch and the god sang a beautiful song in accompaniment.

Afterward the two of them turned the cows out into the sacred meadow and they, the very beautiful sons of Zeus, hastened back to snow-capped Olympus, all the while taking delight in the lyre. Zeus in his wisdom was pleased and united them both in friendship; Hermes has loved the son of Leto steadfastly, and he still does even now, as is evident from the pledges made when Hermes entrusted his lovely lyre to the archer-god and Apollo took it on his

arm and learned how to play. But Hermes himself fashioned another instrument and learned another art, producing the sound of pipes that are heard from afar.⁹

Then the son of Leto said to Hermes, "I fear, cunning guide, that you may steal my lyre and my curved bow; for you have from Zeus the prerogative of establishing the business of barter among people on the nourishing earth. Yet if, for my sake, you would deign to swear the great oath of the gods, either by a nod of your head or by the mighty waters of the river Styx, you would do everything that would satisfy my heart's desire." Then the son of Maia nodded and promised that he would never steal a thing from all that the far-shooter possessed and that he would never come near his mighty house. In turn Apollo, the son of Leto, nodded in loving friendship that no one else among mortals would be more dear, neither god nor mortal sprung from Zeus, and said, "I shall pledge that this bond between us will be trusted and honored both in my heart and that of all the gods. Besides, I will give you in addition a very beautiful golden staff of prosperity and wealth, three-branched and protective; it will keep you safe while, in the name of all the gods, you accomplish by word and by deed the good things which I declare that I learn from the divine voice of Zeus.

"As for this gift of prophecy which you mention, O best of Zeus' sons, it is not allowed by god that you or any other of the immortals learn what the mind of Zeus knows; but I have pledged, vowed, and sworn a mighty oath that no other one of the eternal gods (apart from me) should know the infinite wisdom of Zeus. You, my brother, with your rod of gold, do not bid me reveal any of the divine plans which far-seeing Zeus is devising. I shall hurt some and help others, as I cause great perplexity for the masses of unhappy human beings. The person will profit from my utterance who comes under the guidance of the flight and the cry of my birds of true omen. This is the one who will profit from my utterance and whom I will not deceive; but the one who trusts the birds of meaningless chatter will seek to find out my prophecies and to know more than the eternal gods, quite against my will. I declare that for this one the journey will be in vain but I would take his gifts anyway.

"I shall tell you another thing, son of illustrious Maia and aegis-bearing Zeus, O divine luck-bringer of the gods: indeed, certain holy sisters have been born, three virgins, glorying in their swift wings and having on their heads a sprinkling of white barley, and they live under a ridge of Mt. Parnassus;¹⁰ set apart, they are masters of divination, an art I practiced while still a lad tending cattle and my father did not mind. Then from their home they fly from one place to another and feed from every honeycomb until it is empty. When they have eaten the yellow honey, they become inspired and willingly desire to speak the truth; but if they are deprived of the sweet food of the gods, they gather in a swarm and tell lies. These sisters I give to you; enquire of them carefully and take pleasure in your heart. If then you inform mortal persons, they will listen to what you say often, if they are fortunate. Have these things, son of Maia, and care for the horned oxen of the field, the toiling mules and the horses."

Thus he spoke, and from heaven father Zeus himself added a final pledge to his words: he ordered that glorious Hermes be the lord of all birds of good omen, fierce-eyed lions, boars with gleaming tusks, dogs, and every flock and herd that the wide earth nourishes; and that he alone would be the ordained

messenger to Hades, who, although he accepts no gifts, will grant this, by no means the least of honors.

So lord Apollo loved the son of Maia in an all-encompassing friendship; and Zeus, the son of Cronus, bestowed on him a beguiling charm. He associates with mortals and immortals. On occasion he gives profit or help to a few, but for the most part he continually deceives human beings by the horde in the blackness of night.

So hail to you, son of Zeus and Maia; yet I shall remember both you and another song too.

This artful hymn to Hermes has been much admired; the English poet Percy Bysshe Shelley (1792–1822) himself was one of its translators. The glib and playful treatment of both Hermes and Apollo is often labeled typically Greek.¹¹ It is typically Greek only if we mean by typical *one* of the many brilliant facets of Hellenic genius and a suggestion of the wide variety and scope in the conception of deity. Sincere profundity in religion and philosophy are as typically Greek as wit and facetious sophistication.

THE NATURE OF HERMES AND HIS WORSHIP

Many of Hermes' characteristics and powers are evident from the poem. The Greek admiration for cleverness is readily apparent; it is this same admiration that condones the more dubious traits of the hero Odysseus. Anthropomorphism and liberalism are both pushed to their extreme in the depiction of the god Hermes as a thief and in the implication that thieves too must have their patron deity. Divine Hermes, like Prometheus, represents another (albeit extreme) example of the archetypal trickster. Yet in delightful, archetypal variations, the major quest of this charming young rogue is extremely dubious—a robbery—and, moreover, is accomplished when he is only a little baby!

The similarities between Hermes and Apollo are equally apparent. They share pastoral and musical characteristics and the origins of both were probably rooted in the same pastoral society of shepherds with their interest in flocks, music, and fertility. The Sicilian shepherd Daphnis was the son of Hermes and a nymph and became the inventor of pastoral music and a leading character in the pastoral poetry of Theocritus. Hermes and Apollo are alike in appearance, splendid examples of vigorous and handsome masculinity. But Hermes is the younger and more boyish, the idealization and patron of youths in their late teens; his statue belonged in every gymnasium. Hermes is perhaps best known as the divine messenger, often delivering the dictates of Zeus himself; as such he wears a traveler's hat (*petasus*) and sandals (*talaria*) and carries a herald's wand (*caduceus*), which sometimes bears two snakes entwined.¹² Wings may be depicted on his hat, his sandals, and even his wand. Thus he is also the god of travelers and roads. As the guide of souls (*psychopompos*) to the realm of Hades under the earth, he provides another important function, which reminds us once again of his fertility connections.

Mercury, by Giovanni Bologna (known as Giambologna, 1529–1608). Bronze, 1576; height 25 in. Giambologna has taken the classical attributes of Hermes—the petasus, caduceus, and winged sandals—and combined them with the nude figure of a running man to create a masterpiece of Late Renaissance Mannerism. (Museo Nazionale del Bargello, Florence. Courtesy of Alinari/Art Resource, New York.)

Statues of Hermes, called *herms* (singular, *herm*), were common in the ancient world and symbols of fertility. They were intended to bring prosperity and luck. In the classical period, a herm might be found outside any house; and these herms could be taken very seriously. In appearance, they were square pillars equipped with male genitals; on top of each was the head of Hermes. These phallic statues probably marked areas regarded as sacred or designated, at least originally, the bounds of one's home or property.

To sum up, many of the functions of Hermes can be characterized by his role as a creator and crosser of boundaries and an intermediary between two

THE MUTILATION OF THE HERMS

Some ancient Greeks did believe in their gods. A historical incident concerning herms warns us to be wary of facile generalizations about Greek religious attitudes. In 415 B.C., on the eve of the great Athenian expedition against Sicily, the herms in the city of Athens were mutilated during the night. The religious scandal that ensued became a political football; the general Alcibiades was charged and the consequences were serious—quite a fuss over phallic statues of a god in a period fraught with sophistic skepticism, agnosticism, and atheism. Alcibiades was also charged with the parody and desecration of the Eleusinian mysteries of Demeter in a private home; he called himself Hierophant and wore a robe like that of the high priest when he shows the holy secrets to the initiates (Plutarch, *Alcibiades* 22. 3; see also Thucydides 6. 27–29).

different worlds. His *herms* served to mark the boundaries between one's property and that of another and what has to be bridged. As a messenger of the gods, Hermes joins the human with the divine realm of the Olympians; as *psychopompos* he brings mortals across the barriers of the Underworld. As a god of young men, Hermes stands as an exemplar of the critical rite of passage between youth and

Hermes. Attic red-figure cup by the Euaion painter, ca. 460 B.C. Hermes stands with his attributes of petasus, caduceus, and winged boots. He wears the traveler's cloak and is bearded. Compare Giambologna's bronze, page 268. (Paris, Louvre.)

HERMES TRISMEGISTUS

Hermes came to be equated with the Egyptian god Thoth and thus began to acquire some of his attributes as a god of magic, knowledgeable in things mystic and occult. The epithet Trismegistus comes from the Egyptian and means thrice great (an appellation denoting a superlative, "great, great, great"). Hermes Trismegistus (supposedly the grandson of Hermes the god and not the god himself) is said to have composed many books on various aspects of Egyptian religion. The extant corpus of works attributed to him is referred to as the *Hermetica* (*Discourses of Hermes*) or Hermetic writings. Topics deal with philosophy, astrology, and alchemy and despite some Egyptian influence are essentially Greek in character. These texts belong to the Hellenistic period (in the fourth century) after the time of Plato, whose influence is evident.

adulthood. Finally, in relation to Hermes and the crossing of established boundaries, consider the story of Hermaphroditus, a figure who unites the attributes of both sexes but transgresses the limitations of gender.

HERMAPHRODITUS AND SALMACIS

Among the adventures and affairs of Hermes, his union with Aphrodite is important because of their offspring, Hermaphroditus, whose story is told by Ovid (*Metamorphoses* 4. 285–388):

 Let me tell you how the fountain Salmacis got its bad reputation and why it weakens and softens limbs touched by its enervating waters.¹³ This power of the fountain is very well known; the reason for it lies hidden. A son was born to Mercury and Venus, and Naiads brought him up in the cave of Mt. Ida. You could recognize his mother and father in his beauty and his name also came from them. As soon as he reached the age of fifteen, he left the hills of his homeland. When he had departed from Ida, the mountain that had nurtured him, he took delight in wandering over unknown lands and in seeing unknown rivers; his zeal made the hardships easy.

Then he came to the cities of the Lycians and their neighbors the Carians. There he saw a pool of water that was clear to the very bottom with no marsh reeds, barren sedge, or sharp-pointed rushes to be seen. The water was transparent in its clarity, and the edge of the pool was surrounded by fresh turf and grass that was always green.

A nymph lived here; but one who was not inclined to hunt and not in the habit of bending the bow or contending in the chase. She alone of the Naiads was unknown to swift Diana. It is told that her sisters often said to her: "Salmacis, take up a javelin or a lovely painted quiver; vary the routine of your idleness with the strenuous exercise of the hunt." She did not take up the javelin or the lovely painted quiver and did not vary the routine of her idleness with the stren-

uous exercise of the hunt. Instead she would only bathe her beautiful limbs in her fountain and often comb out her hair with a comb of boxwood and look into the water to see what suited her best; and then she would clothe her body in a transparent garment and recline on the soft leaves or the soft grass. Often she picked flowers.

Salmacis was picking flowers as it happened when she saw the boy Hermaphroditus. As soon as she saw him she desired to have him. Although she was anxious to hasten to him, she did not approach until she had composed herself, arranged her garment, and assumed a beautiful countenance. When she looked as attractive as she ought, she began to speak as follows: "Lovely boy, most worthy to be believed a god; if you are a god, you could be Cupid; if a mortal, blessed are your parents, and happy your brother and fortunate indeed your sister, if you have one, and the nurse who gave you her breast. But by far the most blessed of all is your betrothed, if she exists, whom you will consider worthy of marriage. If you have such a beloved, let my passion be satisfied in secret but if you do not, let me be the one and let us go together to our marriage bed." With this the nymph was silent.

A blush flared up in the boy's face, for he did not know what love was. But the flush of red was becoming; his was the color of apples hanging in a sunny orchard or of tinted marble or of the moon, a reddish glow suffusing its whiteness. . . . To the nymph, as she demanded without end at least the kisses of a sister and brought her hand to touch his ivory neck, he exclaimed: "Are you going to stop or am I to flee and leave you and your abode?" Salmacis was frightened and replied: "I give over to you free access to this place, my guest and friend." She turned her step away and pretended to depart, though still with a glance back. She concealed herself in a hidden grove of bushes, dropping on bended knees. But he moved on the deserted grass from one spot to another, confident that he was not being watched and gradually dipped his feet as far as the ankles in the playful waves.

Taken by the feel of the captivating waters, with no delay he threw off the soft clothes from his body. Then, to be sure, Salmacis was transfixed, enflamed with desire for his naked form. Her eyes too were ablaze just as if the radiant orb of the glowing sun were reflected in their mirror. With difficulty she endured the agony of waiting, with difficulty she held off the attainment of her joy. Now she longed to embrace him, now in her frenzy she could hardly contain herself. He swiftly struck his hollow palms against his sides and plunged into the pool, and as he moved one arm and then the other he glistened in the limpid water like an ivory statue or a lily that one has encased within clear glass. The nymph cried out: "I have won, he is mine!" And she flung off all her clothes and threw herself into the middle of the waves. She held him as he fought and snatched kisses as he struggled; she grasped him with her hands and touched his chest and now from this side and now from that enveloped the youth.

Finally she encircled him as he strove against her in his desire to escape, like a serpent which the king of birds has seized and carried aloft, and which as it hangs binds the eagle's head and feet and with its tail enfolds the spreading wings, even as ivy is wont to weave around tall trunks of trees or as the octopus grabs and holds fast its enemy in the deep with tentacles let loose on every side. Her-

maphroditus, the descendant of Atlas, endured and denied the nymph the joys that she had hoped for. She continued her efforts, and her whole body clung to him as though they were glued together. She cried: "You may fight, cruel villain, but you will not escape. May the gods so ordain and may we never be separated in future time, you from me or me from you." The gods accepted her prayer.

For their two bodies were joined together as they entwined, and in appearance they were made one, just as when one grafts branches on a tree and sees them unite in their growth and become mature together; thus, when their limbs united in their close embrace, they were no longer two but a single form that could not be called girl or boy and appeared at the same time neither one, but both. And so, when he saw that the limpid waters into which he had gone as a man had made him half a man and in them his limbs had become enfeebled, Hermaphroditus stretched out his hands and prayed in a voice that was no longer masculine: "Father and mother, grant this gift to your son who bears both your names. Let whatever man who enters this pool come out half a man and let him suddenly become soft when touched by its waves." Both parents were moved and granted the wish of their child, who was now of a double nature, and they tainted the waters with this foul power.

Statues of Hermaphroditus and hermaphrodites became common in the fourth century and in the following Hellenistic period, when Greek masters strove to vary their repertoires with fascinating and brilliantly executed studies in the realistic, erotic, and unusual.

NOTES

1. The live tortoise was believed to be a taboo against harm and sorcery.
2. This is probably the well-known Pieria near Mt. Olympus in northern Thessaly. On his journey from Pieria, Hermes passes through Onchestus, situated between Thebes and Orchomenus, and brings the cattle to the river Alpheus, which flows near Olympia in the western Peloponnesus.

3. As he walks along, Hermes makes the cattle walk backward. Thus the hoofprints of the cattle will seem to be going toward the meadow and not out of it. Hermes' own tracks will be obscured by his sandals.
4. As we have seen, according to Hesiod (*Theogony* 387) Selene is the daughter of Hyperion and Theia; Pallas (*Theogony* 375, 377, 409) was the son of the Titan Crius; and his brother Perses was the father of Hecate. Megamedes is not found elsewhere.
5. The text is corrupt at this point; apparently Hermes used the laurel branch to rub against a piece of wood grasped in the palm of his hand, thus creating the friction to produce fire.
6. Hermes offers a portion to each of the twelve gods. According to sacrificial ritual, he (as one of them) must not eat his portion or those of the other gods but merely savor the aroma.
7. Presumably Apollo intends to bind either Hermes or the cows.
8. The lyre is mentioned as a beloved companion, that is, a girlfriend, and in the next few lines Hermes sustains the metaphor, which reads naturally in Greek but is difficult to render in English. Thus she will accompany Apollo to the feast and the dance and she will behave and respond as a beloved should, if only she is treated in the right way.
9. These are shepherds' pipes of reed, also called panpipes since they are often said to be the invention of the god Pan. Hermes sometimes is named as the father of Pan, whom he resembles in certain respects.
10. These are identified as the Thriae; their name means "pebbles"; thus they are the eponymous nymphs of divining pebbles, i.e., pebbles used for divination. They appear to be women with wings; probably their hair is literally powdered with white flour; some suggest that they are meant to be white-haired and old or that the image intended is that of bees covered with pollen.
11. In tone and mood this story is not unlike that of Aphrodite, Ares, and Hephaestus in Homer (*Odyssey* 8. 266–366, translated in Chapter 5, pp. 120–122).
12. The entwined snakes maybe be a symbol for Hermes as a fertility god. The staff of Hermes became confused with the staff of the physician Asclepius, for whom serpents represented new life, since they could slough their old skins.
13. In context, Alcithoë is telling the story to her sisters. The spring Salmacis was located at Halicarnassus.

DIONYSUS, PAN, ECHO, AND NARCISSUS

THE BIRTH, CHILDHOOD, AND ORIGINS OF DIONYSUS

The traditional account of the birth of Dionysus (Bacchus)¹ runs as follows. Disguised as a mortal, Zeus was having an affair with Semele, a daughter of Cadmus. When Hera found out, her jealousy led her to get even. She appeared to Semele disguised as an old woman and convinced her rival that she should ask her lover to appear in the full magnificence of his divinity (see Color Plate 17). Semele first persuaded Zeus to swear that he would grant whatever she might ask of him, and then revealed her demand. Zeus was unwilling but was obliged to comply, and Semele was burned to a cinder by the splendor of his person and the fire of his lightning flash. The unborn child, being divine, was not destroyed in the conflagration; Zeus saved his son from the ashes of his mother and sewed him up in his own thigh, from which he was born again at the proper time.²

Various nurses are associated with the infant Dionysus, in particular certain nymphs of Nysa, a mountain of legendary fame located in various parts of the ancient world. Hermes, who had rescued Dionysus from Semele's ashes, carried the baby to the nymphs of Nysa. Ino, Semele's sister, is traditionally singled out as one who cared for the god when he was a baby.³ When Dionysus reached manhood, he carried the message of his worship far and wide, bringing happiness and prosperity to those who would listen and madness and death to those who dared oppose. The tradition of his arrival in Greece makes clear that he is a latecomer to the Olympian pantheon. His origins lie in Thrace and ultimately Phrygia.⁴

THE *BACCHAE* OF EURIPIDES

Dionysus is basically a god of vegetation in general, and in particular of the vine, the grape, and the making and drinking of wine. But his person and his teaching eventually embrace very much more. The best source for the profound meaning of his worship and its most universal implications is found in Euripides' *Bacchae* (*The Bacchic Women*). Whatever one makes of the playwright's depiction

The Death of Semele. By Peter Paul Rubens (1577–1640); oil on panel, 1636, $10\frac{1}{2} \times 15\frac{1}{2}$ in. Both Semele and Zeus are shown under extreme emotion—she, as death approaches, and he, rising from her couch with pity and horror, knowing her coming agony. He holds the thunderbolt back in his left hand, and his eagle grips it in its beak. (*Brussels, Musées Royaux des Beaux Arts.*)

of the rites in a literal sense, the sublimity and terror of the spiritual message are inescapable and timeless.

The play opens with Dionysus himself, who has come in anger to Thebes; his mother's integrity has been questioned by her own relatives, and the magnitude and power of his very godhead have been challenged and repudiated; the sisters of Semele claim (and Pentheus agrees) that she became pregnant because she slept with a mortal and that Cadmus was responsible for the story

Figure 13.1. The Children of Cadmus. A fuller genealogy for the House of Cadmus is given in Figure 17.3.

The Indian Triumph of Dionysus. Roman marble sarcophagus, mid-second century A.D.; width (without lid) 92 in., height 39 in., lid, width 93 in., height 12½ in. Dionysus rides on a chariot drawn by panthers. He is preceded by satyrs, maenads, sileni, and animals, among which elephants and lions are prominent. He has come from India, bringing happiness and fertility to the Greek world. On the lid are reliefs of the death of Semele, the birth of Dionysus from the thigh of Zeus, and his nurture by the nymphs of Nysa. Hermes appears in each of the three scenes on the lid—rescuing the infant from the dying Semele in the left panel; taking him to the nymphs in the center panel after his birth from the thigh of Zeus, and pointing toward the scene of his nurture by the nymphs in the right panel. The sarcophagus is one of seven found in the tomb of the family of the Calpurnii Pisones in Rome. (*Walters Art Gallery, Baltimore.*)

that Zeus was the father of her child; as a result Zeus killed her with a blast of lightning (1–63):

DIONYSUS: I, Dionysus, the son of Zeus, have come to this land of the Thebans; my mother Semele, the daughter of Cadmus, gave birth to me, delivered by a fiery blast of lightning. I am here by the stream of Dirce and the waters of the Ismenus, not as a god but in disguise as a man. I see here near the palace the shrine that commemorates my mother, who was struck dead by the lightning blast, and the ruins of her home, smoldering yet from the flame of Zeus' fire that still lives—the everlasting evidence of Hera's outrage against my mother. I am pleased with Cadmus for setting this area off as a holy sanctuary dedicated to his daughter, and I have enclosed it round about with the fresh greenery of the clustering vine.

I left the fertile plains of gold in Lydia and Phrygia and made my way across the sunny plateaus of Persia, the walled towns of Bactria, the grim land of the

Medes, rich Arabia, and the entire coast of Asia Minor, where Hellenes and non-Hellenes live together in teeming cities with beautiful towers. After having led my Bacchic dance and established my mysteries in these places, I have come to this city of the Hellenes first.

I have raised the Bacchic cry and clothed my followers in the fawnskin and put into their hands the thyrsus—my ivy-covered shaft—here in Thebes first of all Greece, because my mother's sisters claim (as least of all they should) that I, Dionysus, was not begotten of Zeus but that Semele became pregnant by some mortal man and through the clever instigations of Cadmus laid the blame on Zeus; they gloatingly proclaim that Zeus because of her deception struck her dead.

And so these same sisters I have stung with madness, driving them from their homes, and they inhabit Mt. Cithaeron, bereft of sense; I have compelled them to take up the symbols of my rituals, and all the women of Thebes—the entire female population—I have driven from their homes in frenzy. Together with the daughters of Cadmus they sit out in the open air on rocks under the evergreens. For although it does not wish to, this city must learn full well that it is still not completely schooled in my Bacchic mysteries and I must defend the reputation of my mother Semele by showing myself to mortals as the god whom she bore to Zeus.

Cadmus has handed over the prerogatives of his royal power to his daughter's son, Pentheus, who fights against my godhead, thrusting me aside in sacrifices and never mentioning my name in prayers. Therefore I shall show myself as a god to him and all the Thebans. And when I have settled matters here, I shall move on to another place and reveal myself. If the city of Thebes in anger tries by force to drive the Bacchae down from the mountains, I shall join them in their madness as their war commander. This then is why I have assumed a mortal form and changed myself into the likeness of a man.

O you women whom I have taken as companions of my journey from foreign lands, leaving the Lydian mountain Tmolus far behind, come raise the tambourines, invented by the great mother Rhea, and by me, and native to the land of Phrygia. Come and surround the royal palace of Pentheus and beat out your din so that the city of Cadmus may see. I will go to my Bacchae on the slopes of Cithaeron, where they are, and join with them in their dances.

The chorus of women that follows reveals the exultant spirit and mystic aura surrounding the celebration of their god's mysteries (64–167):

 CHORUS: Leaving Asia and holy Mt. Tmolus, we run in sweet pain and lovely weariness with ecstatic Bacchic cries in the wake of the roaring god Dionysus. Let everyone, indoors or out, keep their respectful distance and hold their tongue in sacred silence as we sing the appointed hymn to Bacchus.

Happy is the one who, blessed with the knowledge of the divine mysteries, leads a life of ritual purity and joins the holy group of revelers, heart and soul, as they honor their god Bacchus in the mountains with holy ceremonies of purification. He participates in mysteries ordained by the great mother, Cybele herself, as he follows his god, Dionysus, brandishing a thyrsus.

Run, run, Bacchae, bringing the roaring god, Dionysus, son of a god, out of the Phrygian mountains to the spacious streets of Hellas.

Once when his mother carried him in her womb, the lightning bolt flew from the hand of Zeus and she brought the child forth prematurely with the pains of a labor forced on her too soon, and she gave up her life in the fiery blast. Immediately Zeus, the son of Cronus, took up the child and enclosed him in the secret recess of his thigh with fastenings of gold, and hid him from Hera thus in a second womb. When the Fates had so decreed, Zeus bore the bull-horned god and wreathed his head with a crown of serpents, and so the Maenads hunt and catch wild snakes and twine them in their hair.

O Thebes, crown yourself with ivy, burst forth luxuriant in verdant leaves and lovely berries; join the Bacchic frenzy with branches torn from trees of oak or fir and consecrate your cloak of dappled fawnskin with white tufts of purest wool. Be reverent with the violent powers of the thyrsus. Straightway the whole land will dance its way (whoever leads the sacred group represents the roaring god himself) to the mountain, to the mountain where the crowd of women waits, driven from their labors at the loom by the maddening sting of Dionysus.

O secret chamber on Crete, holy cavern where Zeus was born, attended by the Curetes!⁵ Here the Corybantes with their three-crested helmets invented this drum of hide stretched tight for us and their ecstatic revels mingled its tense beat with the sweet alluring breath of the Phrygian flutes, and they put it into the hand of mother Rhea, so that she might beat an accompaniment to the cries of her Bacchic women. The satyrs in their frenzy took up the drum from the mother-goddess and added it to the music of their dances during the festivities in which Dionysus delights.

How sweet it is in the mountains when, out of the rushing throng, the priest of the roaring god falls to the ground in his quest for blood and with a joyful cry devours the raw flesh of the slaughtered goat. The plain flows with milk and wine and the nectar of bees; but the Bacchic celebrant runs on, brandishing his pine torch, and the flame streams behind with smoke as sweet as Syrian frankincense. He urges on the wandering band with shouts and renews their frenzied dancing, as his delicate locks toss in the breeze.

Amid the frantic shouts is heard his thunderous cry: "Run, run, Bacchae, you the pride of Tmolus with its streams of gold. Celebrate the god Dionysus on your thundering drums, honoring this deity of joy with Phrygian cries and shouts of ecstasy, while the melodious and holy flute sounds its sacred accompaniment as you throng, to the mountain, to the mountain."

Every Bacchanal runs and leaps in joy, just like a foal that frisks beside her mother in the pasture.

The scene that follows (215–313) is fraught with tragic humor and bitter irony. Cadmus (retired king) and Tiresias (priest of the traditional religion) welcome the new god with motives that are startling in their blatant pragmatism. In their joyous rejuvenation, these two old men, experienced realists, present just the right foil for the introduction of the doomed Pentheus, who, in his mortal blindness, dares to challenge the god, his cousin, Dionysus.

 TIRESIAS: Who attends at the gate? Summon Cadmus from the house, the son of Agenor, who came from Sidonia and fortified the city of the Thebans. Let someone go and announce that Tiresias wants to see him. He already knows for what reason I have come. I made an agreement with him, even though I am old and he is even older, to make myself a thyrsus, wear a fawnskin, and crown my head with shoots of ivy.

CADMUS: My dearest friend, I knew your voice from inside the palace, and recognized the wise words of a wise man. I have come ready with the paraphernalia of the god. For since Dionysus, who has revealed himself to mortals as a god, is the son of my daughter, I must do everything in my power to magnify his greatness. Where should we go to join the others in the dance, shaking our gray heads in ecstasy? Tell me, an old man, Tiresias, for you are old too and wise. I shall never grow tired by night or by day as I strike the ground with my thyrsus. It will be a sweet pleasure to forget that we are old.

TIRESIAS: You experience the same sensations as I do, for I feel young again and I shall attempt the dance.

CADMUS: Shall we not proceed to the mountain by chariot?

TIRESIAS: No, the god would not have as appropriate an honor.

CADMUS: I will lead the way for you, two old men together.

TIRESIAS: The god will lead the two of us there without any difficulty.

CADMUS: Are we to be the only men of the city to dance in honor of Bacchus?

TIRESIAS: We are the only ones who think the way one should; the others are wrong and perverse.

CADMUS: We delay too long; give me your hand.

TIRESIAS: Here it is, take hold and join our hands together.

CADMUS: Being a mere mortal, I am not scornful of the gods.

TIRESIAS: About the gods we have no new wise speculations. The ancestral beliefs that we hold are as old as time, and they cannot be destroyed by any argument or clever subtlety invented by profound minds. How could I help being ashamed, one will ask, as I am about to join in the dance, at my age, with an ivy wreath on my head? The god does not discriminate whether young or old must dance in his honor, but he desires to be esteemed by all alike and wishes his glory to be magnified, making no distinctions whatsoever.

CADMUS: Since you are blind, Tiresias, I shall be a prophet for you, and tell you what I see. Pentheus, the son of Echion, to whom I have given my royal power in Thebes, comes in haste to this palace. How excited he is; what news has he to tell us?

PENTHEUS: Although I happened to have been away from Thebes, I have heard of the new evils that beset the city; the women have abandoned our homes on the pretense of Bacchic rites, and gad about on the dark mountainside honoring by their dances the new god, Dionysus, whoever he is. Bowls full of wine stand in the midst of each group, and they sneak away one by one to solitary places where they satisfy the lust of males. Their pretext is that they are Maenad priestesses, but they put Aphrodite ahead of Bacchus. All those I have caught are kept safe with their hands tied by guards in the state prison. The others, who still roam on the mountain, I shall hunt out, including my own mother, Agave,

and her sisters, Ino and Autoonö, the mother of Actaeon. And when I have bound them fast in iron chains, I shall soon put an end to this evil Bacchism.

They say too that a stranger has come here from Lydia, some wizard and sorcerer, with scented hair and golden curls, who has the wine-dark charms of Aphrodite in his eyes. He spends both night and day in the company of young girls, enticing them with his Bacchic mysteries. If I catch him here in my palace, I'll cut off his head and put a stop to his thyrsus-pounding and head-tossing. That fellow is the one who claims that Dionysus is a god, who was once sewn up in the thigh of Zeus, when he was in fact destroyed by the fiery blast of lightning along with his mother, because she lied and said that Zeus had been her husband. Whoever this stranger may be, does he not deserve to hang for such hubris?

But here is another miracle—I see the prophet Tiresias in a dappled fawn-skin, and my mother's father, a very funny sight, playing the Bacchant with a wand of fennel reed. I refuse, sir, to stand by and see you behave so senselessly in your old age. You are my grandfather; won't you toss away your garland of ivy and rid your hand of the thyrsus?

You persuaded him, Tiresias. Why? By introducing this new divinity among people do you hope that he will afford you an additional source of income from your omens and your sacrifices? If it were not for your gray hairs, you would not escape being bound and imprisoned along with the Bacchae for initiating evil rites. As far as women are concerned, I maintain that whenever the gleam of wine is in their feasts, there can be nothing further that is wholesome in their ceremonies.

CHORUS: What sacrilege, sir! Do you not have respect for the gods and Cadmus, who sowed the seeds from which the earthborn men arose; are you the son of Echion, who was one of them, bringing shame on your own family?

TIRESIAS: Whenever a wise man takes a good theme for his argument, it is no great task to speak well. You seem to be a man of intelligence from the glibness of your tongue, but there is no good sense in your words. A headstrong man who is powerful and eloquent proves to be a bad citizen because he is wanting in intelligence. This new divinity whom you laugh at—I could not begin to tell you how great he will become throughout Hellas. . . .⁶

Pentheus, believe me; do not be overly confident that force is all-powerful in human affairs, and do not think that you are wise when the attitude that you hold is sick. Receive the god into the city, pour him libations, crown your head, and celebrate his worship.

Tiresias goes on to argue that self-control is a question of one's own nature and character. Dionysus is not immoral; he cannot corrupt a chaste woman or restrain a promiscuous one. Besides, the god (just like Pentheus himself) is happy to receive the homage of his people.

Cadmus reinforces Tiresias' appeal for reason and control. Pentheus must be sick to defy the god; and even if he were right and Dionysus were an impostor, he should be willing to compromise and lie in order to save the honor of Semele and the whole family. But Pentheus is young and adamant; he accuses

his peers of folly and madness and directs one of his henchmen to smash Tiresias' place of augury (after all, has he not himself desecrated his own priestly office?) and to hunt down the effeminate foreigner who has corrupted the women of Thebes.

A guard brings in the exotic stranger who has come with his new religion (in reality he is Dionysus himself), and Euripides presents the first of three interviews between the god and the man which turn upon the ironic reversal of their positions. Pentheus, believing himself triumphant, is gradually but inevitably caught in the net prepared for him by Dionysus. The calm and sure strength of the god plays beautifully upon the neurotic impulsiveness of the mortal (433–518):

 GUARD: Pentheus, here we are, having hunted the quarry you sent us after, and our efforts have not been unsuccessful. But we found this wild beast tame—he did not attempt to flee, but gave me his hands willingly; he did not even turn pale, but kept the flush of wine in his cheeks. With a smile he bade me tie him up and lead him away and waited for me, thus making my task easy. I was taken aback and said: “O stranger, I do not arrest you of my own free will but at the orders of Pentheus who has sent me.”

About the Bacchae whom you seized and bound and imprisoned—they are freed and have gone and dance about the glens calling on their god, Bacchus. The bonds fell from their feet of their own accord, and the locks on the door gave way untouched by mortal hands. This man who has come to our city of Thebes is full of many miraculous wonders—and what else will happen is your concern, not mine.

PENTHEUS: Untie his hands. Now that he is in my trap, he is not nimble enough to escape me. Well, stranger, you are not unattractive physically—at least to women—and, after all, your purpose in Thebes is to lure them. Your flowing locks that ripple down your cheeks so seductively prove that you are no wrestler. Your fair complexion too is cultivated by avoiding the rays of the sun and by keeping in the shade so that you may ensnare Aphrodite with your beauty. But first tell me where you come from.

DIONYSUS: I can answer your question easily and simply. I am sure you have heard of the mountain of Tmolus with its flowers.

PENTHEUS: I have; its range encircles the city of Sardis.

DIONYSUS: I am from there; Lydia is my fatherland.

PENTHEUS: How is it that you bring these mysteries of yours to Hellas?

DIONYSUS: Dionysus, the son of Zeus, has directed me.

PENTHEUS: Is there a Zeus in Lydia who begets new gods?

DIONYSUS: No, he is the same Zeus who wedded Semele here in Thebes.

PENTHEUS: Did he bend you to his service, an apparition in the night, or did you really see him with your own eyes?

DIONYSUS: We saw each other face to face and he gave me his secrets.

PENTHEUS: What is the nature of these secrets of yours?

DIONYSUS: It is not lawful for the uninitiated to know them.

PENTHEUS: What advantage is there for those who do participate?

- DIONYSUS: It is not right for you to learn this, but the knowledge is worth much.
- PENTHEUS: Your answer is clever, designed to make me want to hear more.
- DIONYSUS: An impious man is abhorred by the god and his mysteries.
- PENTHEUS: You say that you saw the god clearly; well then, what did he look like?
- DIONYSUS: He looked as he wished; I had no control over his appearance.
- PENTHEUS: Once again you have sidetracked me cleverly with an answer that says nothing.
- DIONYSUS: The words of the wise seem foolish to the ignorant.
- PENTHEUS: Have you come here first of all to introduce your god?
- DIONYSUS: Every foreigner already dances his rituals.
- PENTHEUS: Yes, of course, for they are far inferior to Hellenes.
- DIONYSUS: Customs differ, but in these rituals the foreigners are superior.
- PENTHEUS: Do you perform your holy rites by night or by day?
- DIONYSUS: By night for the most part; darkness adds to the solemnity.
- PENTHEUS: For women it is treacherous and corrupt.
- DIONYSUS: One may find, if one looks for it, shameful behavior by daylight too.
- PENTHEUS: You must be punished for your evil sophistries.
- DIONYSUS: And you for your ignorance and blasphemy against the god.
- PENTHEUS: How bold our Bacchant is and how facile his retorts.
- DIONYSUS: What punishment must I suffer? What terrible thing will you do to me?
- PENTHEUS: First I shall cut your pretty locks.
- DIONYSUS: My hair is sacred; it belongs to the god.
- PENTHEUS: Hand over your thyrsus then.
- DIONYSUS: Take it away from me yourself. I carry it for Dionysus; it really belongs to him.
- PENTHEUS: I shall close you up in a prison.
- DIONYSUS: The god himself will free me, whenever I wish.
- PENTHEUS: As you call on him when you take your stand amid your Bacchic women, I suppose.
- DIONYSUS: Even now he is near at hand and sees what I endure.
- PENTHEUS: Where is he? My eyes cannot see him.
- DIONYSUS: Here with me. But you in your blasphemy cannot perceive him for yourself.
- PENTHEUS: Guards, seize him; he is making a fool of me and of all Thebes.
- DIONYSUS: I tell you not to bind me—I am the sane one, not you.
- PENTHEUS: My orders are to bind you, and I have the upper hand.
- DIONYSUS: You do not know what life you live, what you do, or who you are.
- PENTHEUS: I am Pentheus, the son of Agave; my father is Echion.
- DIONYSUS: Your name, Pentheus, which means sorrow, is appropriate for the doom that will be yours.
- PENTHEUS: Get out of here—Guards, imprison him in the neighboring stables where he may find his secret darkness—do your mystic dances there. And the women you have brought with you as accomplices in your evil I shall either keep as slaves myself to work the loom or sell them to others—this will stop their hands from beating out their din on tambourines.

DIONYSUS: I will go, since what is not destined to be, I am not destined to suffer. But Dionysus, who you say does not exist, will exact vengeance for your insolence. For as you do me wrong and imprison me, you do the same to him.

Pentheus confidently follows Dionysus into the prison. But the god miraculously frees himself amid fire, earthquake, and the destruction of the entire palace. He explains to the chorus how he has escaped from Pentheus' evil clutches, maintaining throughout the fiction of his role as the god's disciple. Quite typically Dionysus is associated with or transformed into an animal (616–636):

 DIONYSUS: I have made a fool of Pentheus—he thought that he was tying me up, yet he did not so much as lay a finger on me but fed on empty hopes. In the chamber where he led me a prisoner, he found a bull. It was the knees and hoofs of this animal that he tried to bind, fuming and raging, biting his lips, and dripping with sweat, while I sat calmly close by his side and watched. In this crisis Bacchus arrived and made the building shake and raised a flame up from the tomb of his mother. When Pentheus saw it, he thought that the palace was on fire and rushed this way and that, calling on the servants to bring water. The entire household joined in the work but their toil was for nothing. Pentheus, thinking that I had got away, abandoned his efforts and seized a dark sword and rushed inside the palace in pursuit.

Then Dionysus created an illusion in the courtyard (I am telling you what I believe happened) and Pentheus made a dash for it, jabbing and stabbing at the sunny air, imagining he was butchering me. Bacchus had even greater humiliation for him than this. He razed the whole palace to the ground; all lies shattered for him as he beholds the most bitter results of my imprisonment. Worn out and exhausted, he has dropped his sword; a mere mortal, he dared to go to battle against a god.

As Dionysus coolly finishes his account, Pentheus appears, bewildered, angry, and, despite his experience, still relentlessly aggressive. A brief exchange between the two is interrupted by the arrival of a messenger, who reports what he and others have seen of the Bacchic women and their worship in the mountains; at first a calm, peaceful scene full of miracles, then madness and bloodshed when the interlopers are detected—a grim foreshadowing of what is in store for Pentheus (678–774):

 MESSENGER: I had just reached the hill country with my pasturing herds by the time that the sun had risen and was warming the earth with its rays. And I saw the women, who had arranged themselves in three groups; Autonoe led one, your mother, Agave, the second, and Ino, the third. All were stretched out asleep, some reclined on beds of fir, others rested their heads on oak leaves, having flung themselves down at random but with modesty; and they were not, as you said they would be, intoxicated with wine and the music of the flute, bent on satisfying their lust in solitary places.

When your mother heard the sounds of our horned cattle, she stood up in the midst of the Bacchae, and cried out to rouse them from their sleep, and they

threw off the heavy slumber from their eyes and jumped up—amazing in their orderliness, young and old (many still unwed). The first thing they did was to loosen their hair to their shoulders and tie up their fawnskins if any of the fastenings had come loose; and they made a belt for the dappled fur with snakes that licked their cheeks. Some held in their arms the young of the wild, a gazelle or wolf cubs, and those who had left their newborn babes at home gave them white milk from breasts that were still full.

And they put on crowns of ivy, oak, and flowering vine. One took her thyrsus and struck it against a rock, and from it a gush of dewy water welled up; another hit the solid earth with her wand, and from the spot the god sent forth a spring of wine. Those who thirsted for milk scraped the earth with their fingertips and produced white streams; and from each thyrsus, wreathed in ivy, dripped sweet drops of honey. And so, if you had been there to see these things, you would have invoked with prayers the god whom you now blame.

We herdsmen and shepherds gathered together to discuss and argue about the strange and wondrous actions. One of the group, who always goes into town and has a way with words, spoke to us all: "You who inhabit the sacred mountain heights, how would you like to hunt down Agave, the mother of Pentheus, in her revels and do the king a favor?" What he said seemed good to us, so we hid ourselves in a leafy thicket and waited in ambush. At the appointed time they began their Bacchic revels, shaking their thyrsus and calling on the god, the son of Zeus, with one voice "Iacchus, Bromius!" The whole mountain and animals joined in their ecstasy and there was nothing that remained unmoved by the dance.

It happened that Agave, as she leaped and ran, came close to me, and I leaped out of the ambush where I had hidden myself, bent on seizing her. But she cried aloud: "O my swift-running hounds, we are being hunted by these men; so follow me, follow, armed with your thyrsus in your hands."

And so we fled and escaped being torn into pieces by the Bacchae, but with their bare hands they attacked our cattle grazing on the grass. You could see one of them wrenching apart a bellowing cow, its udders full. Others ripped apart the calves, and you could see ribs and cloven hoofs being scattered high and low, and from the pines the pieces hung dripping with blood. Bulls, arrogant before as they raged with their horns, were laid low, dragged bodily to the ground by the countless hands of girls; and their flesh was stripped from their bodies more quickly than you, O king, could wink your eyes.

Like birds propelled aloft by the speed of their course, the Bacchae ranged across the stretch of plain along the stream of the Asopus, which affords the Thebans a rich harvest. Like a hostile army they descended upon the villages of Hysiae and Erythrae, nestled low on the slopes of Cithaeron, and devastated them. They snatched children from their homes, and all the booty (including bronze and iron) that they carried off on their shoulders did not fall onto the dark earth, although it was not fastened. They bore fire on their hair and it did not burn. The villagers, enraged by the plundering of the Bacchae, rushed to arms.

Then, my king, there was a terrifying sight to behold. The weapons that the villagers threw did not draw any blood, but when the Bacchae hurled the thyrs-

sus from their hands they inflicted wounds on many. Women routed men—a feat not to be accomplished without the power of some god. Back they came to where they sallied forth, to the very streams which the god made gush for them. They washed their hands of blood, and snakes licked the stains from their cheeks.

And so, my lord, receive into the city this god, whoever he is. He is great in many respects but especially in his reputed gift to mortals, about which I have heard, the grape, our remedy for pain and sorrow. With no more wine, there could be no more love and no other pleasure for humankind besides.

Pentheus refuses to listen to the pleas of the messenger. He is determined to rush to arms for an assault on the Bacchae. But the stranger, Dionysus, finds a way to restrain him by appealing to Pentheus' basic nature and psychology—in general, the complex neurosis that stems from his repressions, in particular, his prurient preoccupation with sex and his desire to see the orgies that he insists are taking place (811–861):

-  DIONYSUS: Would you like to see the women banded together in the mountains?
 PENTHEUS: Yes, indeed. I would give a ton of gold for that.
 DIONYSUS: Why are you driven by such a great desire to see them?
 PENTHEUS: Actually, it would pain me to see them drunk.
 DIONYSUS: Nevertheless you would be pleased to see what is painful to you?
 PENTHEUS: To be sure, if I watched in silence crouched beneath the firs.
 DIONYSUS: But they will track you down, even if you go in secret.
 PENTHEUS: Then I shall go openly; what you say is right.
 DIONYSUS: You will undergo the journey then? Let me lead you.
 PENTHEUS: Come, as quickly as possible; I begrudge you this delay.
 DIONYSUS: Then dress up in a fine linen robe.
 PENTHEUS: What is this? Am I to change from a man to a woman?
 DIONYSUS: If you are seen there as a man, they will kill you.
 PENTHEUS: Again, what you say is right. You are like some sage of long ago.
 DIONYSUS: Dionysus gives me this inspiration.
 PENTHEUS: In the garb of a woman? But shame holds me back!
 DIONYSUS: You are no longer interested in watching the Maenads?
 PENTHEUS: What dress did you say that you would put on me?
 DIONYSUS: I shall set on your head a long flowing wig.
 PENTHEUS: And what is the next feature of my outfit?
 DIONYSUS: A robe that falls to your feet and a band around your head.
 PENTHEUS: What else will you give me?
 DIONYSUS: A thyrsus in your hand and a dappled fawnskin cloak.
 PENTHEUS: I cannot bring myself to put on the costume of a woman.
 DIONYSUS: But if you attack the Bacchae in battle, you will shed blood.
 PENTHEUS: This is true; I must first go as a spy.
 DIONYSUS: To be sure, it is wiser than to hunt out evil by evil.
 PENTHEUS: How shall I get out of the city without being seen?
 DIONYSUS: We shall take a deserted route, and I shall lead the way.
 PENTHEUS: Anything, rather than have the Bacchae laugh at me. I shall go into the house and make preparations that are for the best.

DIONYSUS: So be it, and I am at your side ready for everything.

PENTHEUS: I am going inside; I shall either proceed with arms or follow your instructions.

DIONYSUS: Women, this man is ready to be caught in the net. He will go to the Bacchae, and he will pay the penalty with his life. Dionysus, now do your work; for you are not far away. We shall exact our retribution. First we shall inflict upon him delirious madness and drive him out of his wits; in his right mind, he would not want to dress up in the costume of a woman; but once driven from reason he will put it on. My desire is to make him the laughingstock of the Thebans as they see him led in a woman's garb through the city in return for the terrible threats that he uttered before. I go now to deck out Pentheus in the dress with which he will go down to the realm of Hades, slaughtered by the hands of his mother. He will know Dionysus as the son of Zeus and a deity of his own right, among humankind most dread and most gentle.

The dressing of Pentheus in the garb of the Bacchae suggests the ceremonial decking out of the sacrificial victim. By the ritual of donning his costume, Pentheus falls under the spell and the power of the god, eventually to be offered up to him. The chorus sings of the joys of their worship and the justice of their triumph over impiety; and at the end of their song, Dionysus exerts final and complete mastery over Pentheus, who is delirious (912–970):

DIONYSUS: Pentheus, I call on you, the one who desires to see what he should not see and hastens upon what he should not do. Come forward out of the house, let me behold you dressed in the garb of a woman, a Bacchic Maenad, about to go as a spy on your mother and her group.

PENTHEUS: I think that I see two suns, and the image of Thebes with its seven gates appears double. You look like a bull as you lead me forward, with horns growing out of your head. Were you then an animal? Now, indeed, you have become a bull.

DIONYSUS: The god walks with us; he is on our side although he was not kindly disposed before. Now you see what you should see.

PENTHEUS: Tell me how I look. Do I not have the bearing of Ino or my mother, Agave?

DIONYSUS: Looking at you I seem to see those very two. But this lock here that I had fixed under your hairband has fallen out of place.

PENTHEUS: I shook it loose indoors while I was tossing my head back and forth like a Bacchic reveler.

DIONYSUS: Well we, whose concern is to serve you, shall put it back in place. Bend your head.

PENTHEUS: Fine, you deck me out properly, for I am now dedicated to you.

DIONYSUS: Your belt is loose and the folds of your dress do not hang straight to your ankles.

PENTHEUS: They are not straight at the right foot but here on the left the dress hangs well at the heel.

DIONYSUS: You will, I am sure, consider me the best of your friends, when contrary to your expectation you witness the temperance of the Bacchae.

PENTHEUS: Shall I be more like one of the Bacchae if I hold my thyrsus in my right or my left hand?

DIONYSUS: You should hold it in your right hand, and raise it and your right foot at the same time.

PENTHEUS: Will I be able to lift up on my shoulders Mt. Cithaeron with its glens full of Bacchae?

DIONYSUS: You will, if you wish; before your mind was not sound, but now it is as it ought to be.

PENTHEUS: Let us take crowbars, or shall I thrust my shoulder or my arm under the peaks and crush them with my hands?

DIONYSUS: Do not destroy the haunts of the nymphs and the places where Pan does his piping.

PENTHEUS: Your words are right; women must not be overcome by force; I will hide myself among the firs.

DIONYSUS: You will find the hiding place that you should, coming upon the Maenads as a crafty spy.

PENTHEUS: Indeed I can see them now in the bushes like birds held fast in the enticing coils of love.

DIONYSUS: Yes, of course, you go on a mission to guard against this very thing. Maybe you will catch them, if you yourself are not caught first.

PENTHEUS: Take me through the middle of Thebes, for I am the only man among them who dares this deed.

DIONYSUS: You alone bear the burden of toil for this city—you alone. And so the struggle which must be awaits you. Follow me, I shall lead you there in safety, but another will lead you back.

PENTHEUS: My mother.

DIONYSUS: A spectacle for all.

PENTHEUS: It is for this I am going.

DIONYSUS: You will be carried home.

PENTHEUS: What luxury you are suggesting.

DIONYSUS: In the hands of your mother.

PENTHEUS: You insist upon pampering me.

DIONYSUS: Pampering of sorts.

PENTHEUS: Worthy of such rewards, I follow you.

Pentheus imagines he will return in a splendid carriage, with his mother by his side. This terrifying scene is built on more than this one irony and is laden with a multiplicity of ambiguities. Pentheus the transvestite imagines, like a child, loving care at the hands of his mother. How bitter now appear the earlier taunts of Pentheus against Cadmus and Tiresias! In his delirium, does Pentheus really see the god in his true and basic character—a beast? Or does his vision spring from his own warped interpretation of the bestial nature of the worship?

A messenger arrives to tell of Pentheus' horrifying death (1043–1152):

 MESSENGER: When we had left the town of Thebes behind and crossed the stream of the Asopus, we made our way up the slopes of Cithaeron, Pentheus and I (for I followed with my master) and the stranger who led us to the scene.

First we took a position in a grassy glen, with silent footsteps and not a word, so that we might see and not be seen. It was a valley surrounded by cliffs, watered by streams, and shaded by pines; here Maenads sat, their hands occupied in their joyous tasks. Some were restoring a crown of ivy on a thyrsus that had lost its foliage; others, happy as fillies let loose from their painted yokes, were singing Bacchic hymns in answering refrains.

But poor Pentheus, who could not see this crowd of women, said: "My friend, from where I stand I am too far away to see these counterfeit Maenads clearly, but if I climbed up a towering pine on the hillside, I could properly behold the orgies of the Maenads." Then and there I saw the stranger do wondrous things. He took hold of the very top branch of a pine that reached up to the sky and pulled it down, down, down to the black earth. And it was bent like a bow or the curving line of the circle of a wheel. Thus the stranger grabbed the mountain pine with his hands and bent it to the ground, a feat no mortal could accomplish.

He sat Pentheus on the topmost branches and let the tree go, sliding it through his hands until it was upright again, slowly and carefully so that he might not dislodge him. It towered straight to towering heaven, with our king perched on top. He could be seen more clearly by the Maenads than he could see them. He was just becoming visible, seated aloft, when the stranger was no longer to be seen, and from heaven a voice (I imagine that of Dionysus) cried aloud: "O women, I bring the man who made a mockery of you and me and our mysteries; now take vengeance on him."

As the voice spoke these words, a blaze of holy fire flashed between heaven and earth. The air grew still, every leaf in the wooded glen stood silent, and no sound of a beast was to be heard. The women had not made out the voice clearly, and they stood up straight and looked around. He called again, and when the daughters of Cadmus understood the clear command of Bacchus, they rushed forth as swift as doves in their relentless course, his mother, Agave, her sisters, and all the Bacchae. With a madness inspired by the breath of the god, they darted over the glen with its streams and rocks. When they saw the king seated in the pine tree, they first climbed on the rock cliff that towered opposite and hurled stones at him with all their might and pelted him with branches of pines. Others hurled the thyrsus through the air at Pentheus, a pitiable target.

But they were unsuccessful, for the poor wretch sat trapped and helpless, too high for even their fanaticism. Finally, with a lightning force they ripped off oak branches and tried to use them as levers to uproot the tree. But when these efforts too were all in vain, Agave exclaimed: "Come, O Maenads, stand around the tree in a circle and grab hold of it, so that we may catch the climbing beast and prevent him from revealing the secret revels of the god." And they applied a thousand hands and tore up the tree out of the earth. And from his lofty seat, Pentheus fell hurtling to the ground with endless cries; for he knew what evil fate was near.

His mother as priestess was the first to begin the slaughter. She fell on him and he ripped off the band from his hair so that poor Agave might recognize him and not kill him, and he cried out as he touched her cheek: "Mother, it is your son, Pentheus, whom you bore in the home of Echion. Have pity on me for my sins and do not kill me, your son."

But Agave was not in her right senses; her mouth foamed and her eyes rolled madly as the god Bacchus held her in his power. And Pentheus could not reach her. She seized his left arm below the elbow and placing her foot against the ribs of her ill-fated son, wrenched his arm out of his shoulder. It was not done through her own strength, but the god made it easy for her hands. From the other side, Ino clawed and tore at his flesh, and Autonoe and the whole pack converged on him. All shouted together, he moaning with what breath remained, they screaming in triumph. One carried an arm, another a foot with the boot still on; his ribs were stripped clean and they all with blood-drenched hands tossed the flesh of Pentheus among them like a ball. His body lies scattered, some pieces under hard rocks, others in the shady depths of the woods—not easy to find.

His mother has taken his poor head and affixed it on the point of her thyrsus; she carries it like that of a mountain lion through the depths of Cithaeron, leaving her sisters and their Maenad bands. She comes within these walls, exulting in her ill-fated prey and calling on Bacchus, her partner in the hunt, her comrade in the chase, her champion of victory, who gave her tears as her reward. And so I am leaving now, before Agave reaches the palace, to get away from this misfortune. Temperance and reverence for the gods are best, the wisest possessions, I believe, that exist for mortals who will use them.

Agave returns and in a terrifying scene with her father Cadmus, she awakens from her madness to recognize the horror of her deed; it is the head of her son Pentheus, not that of a mountain lion that she holds in her hands. The conclusion of the play affirms the divine power of Dionysus. He appears now as god, the *deus ex machina*, to mete out his harsh justice against those who have denied his godhead and blasphemed his religion.

Pentheus has already died for his crimes; the other principal sinners must go into exile. Cadmus and Harmonia will experience much war and suffering in their wanderings and will be turned into serpents; but eventually they will be saved by Ares (the father of Harmonia) and transported to the Islands of the Blessed. Agave and her sisters must leave Thebes immediately. In her anguished farewell to her father, she utters this provocative commentary on her bitter and tragic experience with the religion of Dionysus.

 May I reach a place where Cithaeron, that mountain polluted by blood, may never see me or I lay eyes upon it, where any record of the thyrsus is unknown. Let Cithaeron and the thyrsus be the concern of other Bacchic women, not me.

There are serious textual problems in the last section of the play; and a medieval work, the *Christus Patiens*, that drew upon Euripides, is of some help—an interesting fact that rivets our attention to the parallels between Dionysus and Christ.

The pathos and horror of the butchering of Pentheus have led some to advance a sympathetic view of the rash king as an ascetic martyr, killed in his crusade against the irrational tide of religious fanaticism. But too much in the makeup of this young man suggests the myopic psychopath who is unable to

HARRY PARTCH'S AMERICAN BACCHAE

Harry Partch, the American composer, offers enlightening insights into element of Dionysiac worship in his elucidation of his musical and theatrical Americanization of Euripides' tragedy, *Revelation in the Courthouse Park*:

I first decided that I would bodily transfer Euripides' The Bacchae to an American setting. But in the end the better solution seemed to be to alternate scenes between an American courthouse park and the area before the palace of the city of Thebes. . . . I was determined to make this an American here-and-now drama, which, tragically, it truly is. . . . Many years ago I was struck by a strong and strange similarity between the basic situation in the Euripides play and at least two phenomena of present-day America. Religious rituals with a strong sexual element are not unknown to our culture, nor are sex rituals with a strong religious element. (I assume that the mobbing of young male singers by semihysterical women is recognizable as a sex ritual for a godhead.) And these separate phenomena, after years of observing them, have become synthesized as a single kind of ritual with religion and sex in equal parts, and with deep roots in an earlier period of evolution. . . .⁷

The equation of the idolization of Elvis Presley with the worship of Dionysus has turned out to be more apt than Partch might even suspect. For the devout, Elvis either has never really died, or has been resurrected, and he is still very much with us. Pilgrimages to his temple in Graceland are legion. The Dionysiac experience in relation to singers of popular music and rock has spanned more than one generation. It can be recognized in the bobby-soxers who swooned at the feet of Frank Sinatra and in the androgynous cults of Michael Jackson and Boy George, and it afflicts both sexes with equal passion. The furor aroused by the female singer Madonna or the rock group The Beatles devastates both men and women equally, sometimes enhanced by the Dionysiac use of intoxicating drugs (see also pp. 724–725).

accept human nature as it is and foolishly tries to suppress it. The basic impulses toward both the bestial and the sublime are terrifyingly and wondrously inter-related; Dionysus is after all the god of mob fury and religious ecstasy and anything in between. Was the celebration of his worship a cry for release from the restraints of civilized society and a return to the mystic purity and abounding freedom of nature, or was it merely a deceptive excuse for self-indulgence in an orgy of undisciplined passion?

OTHER OPPONENTS OF DIONYSUS

In Argos, the daughters of Proetus, king of Tiryns, refused to accept the god and were driven mad; but the famous seer Melampus knew of certain therapeutic dances (or herbs) to cure them.⁸

In Orchomenus, a city of Boeotia, the daughters of Minyas refused to participate in Bacchic worship but remained at home to weave. Dionysus, in the guise of a girl, warned them of their folly to no avail, and they were driven mad; one of them, Leucippe, bore a son named Hippasus, who (like Pentheus) was torn to pieces. The women eventually were turned into bats.

Lycurgus of Thrace pursued the nurses of Dionysus with an ox goad, and Dionysus himself in terror jumped into the sea and was rescued and comforted by Thetis. The gods became angry with Lycurgus, and Zeus struck him with blindness and he died soon afterwards. (See Color Plate 4.)

THE NATURE OF DIONYSUS, HIS RETINUE, AND HIS RELIGION

The *Homeric Hymn to Dionysus* (1)⁹ gives some variant information about Dionysus' birth, derives his name from Zeus (Dios) and the mountain Nysa (which is here placed in Egypt), and establishes the universal power of his worship.

 O divinely born god, sewn in Zeus' thigh,¹⁰ some say it was on Draconum, some in windy Icarus, some at the deep flowing Alpheus,¹¹ where Semele, made pregnant by Zeus who delights in the lightning, gave birth to you. Others say, O lord, that you were born in Thebes. They are all wrong; the father of both gods and men gave you birth, away from people and hidden from white-armed Hera.

There is a certain mountain, Nysa, very high and with verdant forests, far from Phoenicia, near the streams of Egypt.¹²

“. . . and they will set up many statues in temples; and as things are three, mortals always, everywhere, will sacrifice perfect hecatombs to you in triennial festivals.”¹³ The son of Cronus spoke and nodded with his dark brows; and the divine hair of our lord flowed down around his immortal head and he made great Olympus shake. Thus speaking, wise Zeus nodded confirmation with his head.

Be kind, you, sewn in Zeus' thigh, who drive women mad. We bards sing of you as we begin and end our song. It is utterly impossible for anyone who is forgetful of you to remember how to sing his holy song.

So hail to you, Dionysus, sewn in Zeus' thigh, along with your mother, Semele, whom indeed they call Thyone.

Another *Homeric Hymn to Dionysus* (26) tells us more about the god:

 I begin to sing about ivy-crowned, loud-crying Dionysus, glorious son of Zeus and renowned Semele. The nymphs with beautiful hair took him to their bosoms from the lord his father and nurtured him tenderly in the vales of Mt. Nysa. By the grace of his father, he grew up in a fragrant cave, to be counted among the immortals. But when the goddesses had brought up this much-hymned god, then indeed he used to wander, heavily wreathed in ivy and laurel, among the woodland haunts of the forest. The nymphs followed along, with him as leader, and the sound of their cries filled the vast forest.

So hail to you, Dionysus, rich in grape clusters; grant that we may in our joy go through these seasons again and again for many years.

Maenad. Interior of an Attic kylix by the Brygos painter, ca. 480 B.C.; diameter 11¼ in. This lively white-ground painting (the cup is signed by the potter Brygos) shows a maenad in violent motion, holding a thyrsus in her right hand and a small leopard in her left. A leopardskin is fastened over her dress and a wreath of serpents encircles her head. (*Antikensammlungen, Munich. Photograph courtesy of Hirmer Verlag, München.*)

The essential characteristics of Dionysiac religion are an ecstatic spiritual release through music and dance,¹⁴ the possession by the god of his followers, the rending apart of the sacrificial animal, and the eating of the raw flesh (*omophagy*, a kind of ritual communion, since the god was believed to be present in the victim). The religious congregation (the holy *thiasus*) was divided into groups, often with a male leader for each, who played the role of the god. The Bacchae,

or maenads, are the female devotees, mortal women who become possessed. In mythology they are more than human, nymphs rather than mere mortals.

Their mythological male counterparts are satyrs, who are, like them, spirits of nature; they, however, are not completely human but part man and part animal, possessing various attributes of a horse or a goat—a horse's tail and ears, a goat's beard and horns—although in the later periods they are often depicted as considerably more humanized. Satyrs dance and sing and love music; they make wine and drink it, and they are perpetually in a state of sexual excitement. One of their favorite sports is to chase maenads through the woods. Animal skins and garlands are traditional attributes of Bacchic revelers (although satyrs are usually nude); maenads, in particular, carry the thyrsus, a pole wreathed with ivy or vine leaves, pointed at the top to receive a pine cone. As we have seen, it is a magic wand that evokes miracles; but if necessary it can be converted into a deadly weapon.

Sileni also attend Dionysus; they often cannot be distinguished from satyrs, although some of them are older (*papposileni*) and even more lecherous. Yet others are old and wise, like Silenus himself, the tutor of Dionysus. A story tells how once one of them was made drunk by adding wine to the water of a spring; when he was brought to King Midas, this Silenus philosophized that the best fate for human beings was not to be born at all, the next best to die as soon as possible after birth, a typical example of Greek pessimism and wisdom reminiscent of Solon and Herodotus.¹⁵ Dionysus and his retinue are favorite subjects in Greek art.

As the male god of vegetation, Dionysus was, as we should expect, associated with a fertility goddess; his mother, Semele, was a full-fledged earth deity in her own right before she became Hellenized. The story of Zeus' birth on Crete, with the attendants who drowned out his infant cries by their frenzied music, suggests contamination with Dionysiac ritual. Certainly Euripides associates Bacchic mysticism with the ritual worship of both Rhea and Cybele. Dionysus' "marriage" with Ariadne, saving her after she was deserted by Theseus on the island of Naxos (see pp. 558–563), not only provides an example of the union of the male and female powers of vegetation but also illustrates allegorically his powers of redemption. Dionysus represents the sap of life, the coursing of the blood through the veins, the throbbing excitement and mystery of sex and of nature; thus he is a god of ecstasy and mysticism.

Another myth told about his birth even more clearly established him in this role as a god of the mysteries. Zeus mated with his daughter Persephone, who bore a son, Zagreus, which is another name for Dionysus. In her jealousy, Hera then aroused the Titans to attack the child. These monstrous beings, their faces whitened with chalk, attacked the infant as he was looking in a mirror (in another version, they beguiled him with toys and cut him to pieces with knives). After the murder, the Titans devoured the dismembered corpse.¹⁶ But the heart of the infant god was saved and brought to Zeus by Athena, and Dionysus was born again—swallowed by Zeus and begotten on Semele. Zeus was angry with

the Titans and destroyed them with his thunder and lightning; but from their ashes humankind was born.

Surely this is one of the most significant myths in terms of the philosophy and religious dogma that it provides. By it human beings are endowed with a dual nature—a body gross and evil (since we are sprung from the Titans) and a soul that is pure and divine (for after all the Titans had devoured the god). Thus basic religious concepts (which lie at the root of all mystery religions) are accounted for: sin, immortality, resurrection, life after death, reward, and punishment. It is no accident that Dionysus is linked with Orpheus and Demeter and the message that they preached. He is in his person a resurrection-god; the story is told that he went down into the realm of the dead and brought back his mother, who in this account is usually given the name Thyone.

The essence and spirit of Greek drama are to be found in the emotional environment of Dionysiac ecstasy. Theories concerning the origins of this genre in its relationship to Dionysus are legion. But it is a fact that tragedy and comedy were performed at Athens in a festival in his honor. It is difficult to agree with those who feel that this connection was purely accidental. Certainly Aristotle's treatise dealing with the nature of tragedy in terms of a catharsis of pity and fear takes for granted emotions and excitement that are essentially Bacchic.¹⁷

DIONYSUS AND ICARIUS AND ERIGONE

Dionysus, however, can be received amid peace and joy. In Attica, in the days of King Pandion, a man named Icarius was most hospitable to the god, and as a reward he was given the gift of wine. But when the people first felt the effects of this blessing, they thought they had been poisoned, and they turned upon Icarius and killed him. Erigone, his devoted daughter, accompanied by her dog Maira, searched everywhere for her father. When she found him, she hanged herself in grief. Suffering and plague ensued for the people until, upon Apollo's advice, they initiated a festival in honor of Icarius and Erigone.

DIONYSUS' GIFT TO MIDAS OF THE GOLDEN TOUCH

We have learned how the philosophical Silenus was captured and brought to King Midas.¹⁸ Midas recognized the satyr at once as a follower of Dionysus and returned him to Dionysus. The god was so delighted that he gave the king the right to choose any gift he would like for himself. Midas foolishly asked that whatever he should touch might be turned into gold. At first Midas was delighted with his new power, when he saw that he could transform everything into gleaming riches by the mere touch of his hand. But the blessing quickly became a curse, for he could no longer eat or drink; any morsel or drop that he brought to his lips became a solid mass of gold. Midas' greed turned to loathing; in some accounts, even his beloved daughter was transformed. He begged the

Dionysus with Satyrs and Maenads. Athenian black-figure amphora, sixth century B.C.; height 18 $\frac{3}{4}$ in. Dionysus, wreathed with ivy, holds a horn-shaped wine cup in his left hand and looks back at the satyr on the left carrying off a maenad, who is playing a double-flute. A second satyr on the right carries off a maenad with castanets, who raises her arms and looks back at the god. Vine leaves and bunches of grapes trail in the background and frame Dionysus. (British Museum, London. Reproduced by permission of the Trustees.)

god's forgiveness for his sin and release from his accursed power. Dionysus took pity and ordered the king to cleanse himself of the remaining traces of his guilt in the source of the river Pactolus, near Sardis. Midas obeyed, and the power of transforming things into gold passed from his person into the stream, whose sands forevermore were sands of gold.

DIONYSUS AND THE PIRATES

In the *Homeric Hymn to Dionysus* (7) the god is abducted by pirates who mistake him for a mortal. (See Color Plate 2.) The ensuing events aboard ship offer a splendid picture of Dionysus' power and majesty and remind us of funda-

mental elements in the nature of his character and worship: miracles, bestial transformation, violence to enemies, and pity and salvation for those who understand.¹⁹

 I shall sing of how Dionysus, the son of renowned Semele, appeared as a man in the first bloom of youth on a projecting stretch of shore by the sea that bears no harvest. His hair, beautiful and dark, flowed thickly about his head, and he wore on his strong shoulders a purple cloak. Before long, foreign pirates, led on by evil fate, appeared swiftly over the sea, dark as wine, in a ship with fine benches of oars. As soon as they saw him, they nodded one to the other and, quickly jumping out, seized him at once and put him on board ship, delighted in their hearts. For they thought that he was the son of kings, who are cherished by Zeus, and wanted to bind him in harsh bonds. But the bonds fell far from his hands and feet and did not hold him as he sat with a smile in his dark eyes.

When the helmsman saw this he called aloud to his comrades: "Madmen, who is this mighty god whom you have seized and attempt to bind? Not even our strong ship can carry him, for this is either Zeus or Apollo of the silver bow or Poseidon, since he is not like mortal men but like the gods who have their homes on Olympus. But come, let us immediately set him free on the dark shore; do not lay hands on him for fear that he become angered in some way and rouse up violent winds and a great storm."

So he spoke, but the commander of the ship rebuked him scornfully: "Madman, check the wind, and while you are at it seize the tackle and hoist the sail. I expect that he will come with us to Egypt or Cyprus or the northern Hyperboreans or farther. But at his destination he will eventually tell us about his friends and all his possessions and his brothers, since a divine power has put him in our hands." When he had spoken, the mast and sail were hoisted on the ship; the wind breathed into the midst of the sail and the men made the ropes tight all around.

But soon deeds full of wonder appeared in their midst. First of all a sweet and fragrant wine flowed through the black ship, and a divine ambrosial odor arose. Amazement took hold of all the sailors as they looked, and immediately a vine spread in all directions up along the very top of the sail, with many clusters hanging down; dark ivy, luxuriant with flowers, entwined about the mast, and lovely fruit burst forth, and all the oarpins bore garlands. When they saw this, they ordered the helmsman to bring the ship to land. But then the god became a terrifying lion in the upper part of the ship and roared loudly, and in the middle of the ship he created a shaggy-necked bear, thus manifesting his divine credentials. The bear stood up raging, while on the upper deck the lion glared and scowled.

The sailors fled into the stern and stood in panic around the helmsman, who had shown his right sense. The lion sprang up suddenly and seized the commander of the ship, but the sailors when they saw this escaped an evil fate and leaped all together into the shining sea and became dolphins.

The god took pity on the helmsman and saved him and made him happy and fortunate in every way, saying: "Be of good courage, you who have become dear to my heart. I am loud-crying Dionysus, whom my mother, Semele, daughter of Cadmus, bore after uniting in love with Zeus."

Hail, son of Semele of the beautiful countenance; it is not at all possible to forget you and compose sweet song.

THE *DIONYSIACA* OF NONNUS

Nonnus, a poet from Panopolis in Egypt, composed in the fifth century A.D. a Greek epic poem in forty-eight books upon the theme of Dionysus and his exploits. In the "Mythical Introduction" to the Loeb text in three volumes, H. J. Rose begins with this arresting statement: "The mythology of the *Dionysiaca* is interesting as being the longest and most elaborate example we have of Greek myths in their final stage of degeneracy."²⁰ Crammed full of learned information, this work does have its moments (often more academic than poetic) that justify proclaiming Nonnus "the last great epic poet of antiquity."

Book 1 begins with the carrying off of Europa by Zeus, and Book 48 concludes with Dionysus' final return to Olympus, where he places the crown of his beloved Ariadne. Nonnus, in his varied and crammed tapestry of countless events, gives us information that is to be found nowhere else, for example, the fight between Dionysus and Perseus and the myth of Beroë, a child of Aphrodite, invented to afford Berytus, the site of a great Roman school of law, its very own foundation-myth. One should single out as well his wealth of knowledge of astronomy, astrology, and religious doctrine, especially that of the Orphics. The amorous exploits of Dionysus seem endless, and a whole group of his lovers are all metamorphosized into various plants. Most interesting and bizarre of all Nonnus' excesses is the lengthy account of Dionysus as world conqueror, whose military conquests are obviously inspired by the legendary career of Alexander the Great. This same author Nonnus is credited with a poetic paraphrase of the gospel of John.

PAN

The god Pan has much in common with the satyrs and silenoi of Dionysus.²¹ He is not completely human in form but part man and part goat—he has the horns, ears, and legs of a goat; he will join in Bacchic revels, and he is full of spirit, impulsive, and amorous. His parents are variously named: his mother is usually some nymph or other; his father is very often Hermes or Apollo. Like them, he is a god of shepherds and a musician.

Pan is credited with the invention of his own instrument, the panpipe (or in Greek, *syrix*); Ovid tells the story with brevity and charm (*Metamorphoses* 1. 689–712). Syrix was once a lovely nymph, devoted to Artemis, who rejected the advances of predatory satyrs and woodland spirits. Pan caught sight of her, and as he pursued her she was transformed into a bed of marsh reeds. The wind blowing through them produced a sad and beautiful sound, and Pan was inspired to cut two of the reeds, fasten them together with wax, and thus fashion a pipe on which he could play.

Pan's haunts are the hills and the mountains, particularly those of his homeland, Arcadia, and he came to be especially honored in Athens.²²

Pan Pursuing a Goatherd. By the Pan painter, Attic red-figure krater, ca. 460 B.C.; height 142 in. Pan pursues a herdsman, possibly Daphnis, son of Hermes. Pan's intentions are clear, and his lust is wittily echoed by the herm (or, more likely, figure of Priapus) in the rocky background. This is reverse of the vase illustrated in Chapter 10 on page 205. The impunity of divine lust contrasts with the tragic consequences of divine anger for human error. (Boston, Museum of Fine Arts.)

Pan had other loves besides Syrinx.²³ His passion for the nymph Echo also ended tragically. She fled from his advances, and Pan spread such madness and "panic" among a group of shepherds (a particular feat to which he was prone) that they tore her to pieces. All that remained was her voice.

The *Homeric Hymn to Pan* (19) presents a memorable account of his birth and his revels; in this case his father is Hermes and his mother Dryope, the daughter of Dryops.

 Tell me, O Muse, about the dear son of Hermes—Pan, goat-footed, two-horned, lover of musical clangor—who wanders through wooded meadows together with a chorus of nymphs dancing along the heights of sheer rock. They call upon Pan, the splendid shaggy-haired god of shepherds, who has for his domain every snowy ridge, and mountaintops and rocky summits. He roams this place and that through dense thickets; sometimes he is tempted by soft streams, and then again he passes among sheer rocks and climbs up to the highest peak that overlooks the flocks. Often he moves across gleaming high mountains; often, among the slopes, he presses on and, sharply on the outlook, kills animals.

Then, in the evening only, returning from the chase, he plays a lovely tune upon his pipe of reeds. Not even the nightingale, the bird who pours forth her sad lament in honeyed song amidst the petals of flower-laden spring, could surpass him in melody. With him then the clear-voiced mountain nymphs, moving on nimble feet, sing by a dark-watered spring; and Echo's wails reverberate around the mountaintop. The god Pan dances readily here and there among the chorus and then slips easily into their midst. He wears a spotted pelt of a lynx on his back, and his heart is delighted by his piercing tunes in a soft meadow where the crocus and fragrant hyacinth blooming at random mingle in the grass.

They sing hymns about the blessed gods and high Olympus, and, above the rest, they single out Hermes, the bringer of luck. They sing how he is the swift messenger for all the gods and how he came into Arcadia, full of springs and mother of flocks, the place where his sacred precinct is located. There, even though he was a god, he tended the shaggy-fleeced sheep, in the service of a mortal. For a melting longing seized Hermes, and his passion to make love to the daughter of Dryops,²⁴ the nymph with the beautiful hair, intensified; and he brought to its fulfillment a fruitful marriage.

Dryope bore to Hermes in their house a dear son, a marvel to behold right from his birth, a goat-footed, two-horned baby who loved music and laughter. But his mother was startled and fled, and she abandoned the child, for she was frightened when she saw his coarse features and full beard. Hermes, the luck-bringer, took him at once and clasped him in his arms; and the god felt extremely happy. Quickly he covered the child in the thick skin of a mountain hare and went to the homes of the immortals and sat him down beside Zeus and the other gods and showed them the boy. All the immortals were delighted in their hearts, and especially Bacchic Dionysus; and they called him Pan because he delighted the hearts of them all.²⁵

So hail to you, lord. I pray to you with my song, and I shall remember both you and another song too.

ECHO AND NARCISSUS

We know that because she rejected him Pan caused Echo to be torn to pieces so that only her voice remained. A more famous story about Echo concerns her love for Narcissus. Ovid's version is as follows (*Metamorphoses* 3. 342–510):

Echo and Narcissus, by Nicolas Poussin (1594–1665); oil on canvas, ca. 1630, $29\frac{1}{4} \times 39\frac{1}{2}$ in. Narcissus lies along the edge of the pool with his flowers growing near his head, while Echo, waiflike, fades away in the background. The Cupid's burning torch is more fitting for a funeral than for the celebration of love. (Paris, Louvre.)

The river-god Cephisus once embraced the nymph Liriope in his winding stream and, enveloping her in his waves, took her by force. When her time had come, the beautiful Liriope bore a child with whom even as a baby the nymphs might have fallen in love. And she called him Narcissus. She consulted the seer Tiresias, asking whether her son would live a long time to a ripe old age; his answer was: "Yes, if he will not have come to know himself." For a long time this response seemed to be an empty prophecy, but as things turned out, its truth was proven by the unusual nature of the boy's madness and death.

The son of Cephisus had reached his sixteenth year and could be looked upon as both a boy and a young man. Many youths and many maidens desired him, but such a firm pride was coupled with his soft beauty that no one (either boy or girl) dared to touch him. He was seen once as he was driving the timid deer into his nets by the talkative nymph, who had learned neither to be silent when another is speaking nor to be the first to speak herself, namely the mimic Echo.

At that time Echo was a person and not only a voice; but just as now, she was garrulous and was able to use her voice in her customary way of repeating from a flood of words only the very last. Juno brought this about because, when

she might have been able to catch the nymphs lying on the mountain with her Jove, Echo knowingly detained the goddess by talking at length until the nymphs could run away. When Juno realized the truth, she exclaimed: "The power of that tongue of yours, by which I have been tricked, will be limited; and most brief will be the use of your voice." She made good her threats; Echo only gives back the words she has heard and repeats the final phrases of utterances.

And so she saw Narcissus wandering through the secluded countryside and burned with passion; she followed his footsteps furtively, and the closer she pursued him, the nearer was the fire that consumed her, just like the tops of torches, smeared with sulphur, that catch fire and blaze up when a flame is brought near. O how often she wanted to approach him with blandishments and tender appeals! Her very nature made this impossible, for she was not allowed to speak first. But she was prepared to wait for his utterances and to echo them with her own words—this she could do.

By chance the boy became separated from his faithful band of companions and he cried out: "Is there anyone there?" Echo replied "There!" He was dumb-founded and glanced about in all directions; then he shouted at full voice: "Come!" She called back to him with the same word. He looked around but saw no one approaching; "Why do you run away from me?" he asked. She echoed his words just as he spoke them. He was persistent, beguiled by the reflection of the other's voice, and exclaimed: "Come here and let us get together!" Echo replied, "Let us get together," and never would she answer any other sound more willingly. She emerged from the woods, making good her very words and rushed to throw her arms about the neck of her beloved. But he fled and in his flight exclaimed, "Take your hands off me; I would die before I let you possess me." She replied with only the last words "Possess me."

Thus spurned, Echo hid herself in the woods where the trees hid her blushes; and from that time on she has lived in solitary caves. Nevertheless, her love clung fast and grew with the pain of rejection. Wakeful cares wasted away her wretched body, her skin became emaciated, and the bloom and vigor of her whole being slipped away on the air. Her voice and her bones were all that was left. Then only her voice remained; her bones, they say, were turned into stone. From that time on, she has remained hidden in the woods; she is never seen on the mountains, but she is heard by everyone. The sound of her echo is all of her that still lives.

Narcissus had played with her so, just as he had previously rejected other nymphs sprung from the waves or the mountains, and as well males who had approached him. Thereupon one of those scorned raised up his hands to the heavens and cried: "So may he himself fall in love, so may he not be able to possess his beloved!" The prayer was a just one, and Nemesis heard it.

There was a spring, its clear waters glistening like silver, untouched by shepherds, mountain goats, and other animals, and undisturbed by birds, wild beasts, and falling tree branches. Grass grew round about, nourished by the water nearby, and the woods protected the spot from the heat of the sun. Here the boy lay down, tired out by the heat and his quest for game and attracted by the pool and the beauty of the place. While he was trying to quench his thirst, it kept coming back again and again, and as he continued to drink, he was captivated by the reflection of the beauty that he saw.

He fell in love with a hope insubstantial, believing what was only an image to be real and corporeal. He gazed in wonder at himself, clinging transfixed and emotionless to what he saw, just like a statue formed from Parian marble. From his position on the ground he looked at his eyes, twin stars, and his hair, worthy of both Bacchus and Apollo, and his smooth cheeks, his ivory neck, and the beauty of his face, a flush of red amid snowy whiteness. He marveled at all the things that others had marveled at in him. Unwise and unheeding, he desired his very self, one and the same person approving and being approved, seeking and being sought, inflaming and being inflamed. How many times he bestowed vain kisses on the deceptive pool! How many times he plunged his arms into the midst of the waters to grasp the neck that he saw! But he could not catch hold of himself in their embrace. He did not understand what he was looking at, but was inflamed by what he saw, and the same illusion that deceived his eyes aroused his passion.

Poor deluded boy, why do you grasp at your fleeting reflection to no avail? What you seek is not real; just turn away and you will lose what you love. What you perceive is but the reflection of your own image; it has no substance of its own. With you it comes and stays, and with you it will go, if you can bear to go. No concern for food or rest could drag him away from his post, but stretched out on the shady grass he looks at this deceptive beauty with insatiable gaze and destroys himself through his own eyes. He raised himself up a little and stretching out his arms to the surrounding woods exclaimed:

"Has there ever been anyone smitten by more cruel a love? Tell me, O trees, for you know since you have provided opportune haunts for countless lovers. In the length of your years, in the many ages you have lived, can you remember anyone who has wasted away like me? I behold my beloved, but what I see and love I cannot have; such is the frustration of my unrequited passion. And I am all the more wretched because it is not a vast sea or lengthy road or impregnable fortress that separates us. Only a little water keeps us from each other. My beloved desires to be held, for each time that I bend down to kiss the limpid waters, he in return strains upward with his eager lips. You would think that he could be touched; it is such a little thing that prevents the consummation of our love. Whoever you are, come out to me here. Why, incomparable boy, do you deceive me? When I pursue you, where do you go? Certainly you do not flee from my youthful beauty, for nymphs loved me too. You promise me some kind of hope by your sympathetic looks of friendship. When I stretch forth my arms to you, you do the same in return. When I laugh, you laugh back, and I have often noted your tears in response to my weeping. And as well you return my every gesture and nod; and, as far as I can surmise from movements of your lovely mouth, you answer me with words that never reach my ears. I am you! I realize it; my reflection does not deceive me; I burn with love for myself, I am the one who fans the flame and bears the torture. What am I to do? Should I be the one to be asked or to ask? What then shall I ask for? What I desire is with me; all that I have makes me poor. O how I wish that I could escape from my body! A strange prayer for one in love, to wish away what he loves! And now grief consumes my strength; the time remaining for me is short, and my life will be snuffed out in its prime. Death does not weigh heavily upon me, for death

will bring an end to my misery. I only wish that he whom I cherish could live a longer time. As it is, we two who are one in life shall die together!"

He finished speaking and, sick with longing, turned back again to his own reflection. His tears disturbed the waters and caused the image in the pool to grow less distinct. When he saw it disappearing he screamed: "Where are you going? Stay here, do not desert me, your lover. I cannot touch you—let me look at you, give me this nourishment at least in my misery and madness." As he grieved, he tore his garment in its upper part and beat his bare chest with his marble-white hands. And his chest when struck took on a rosy tinge, as apples usually have their whiteness streaked with red, or grapes in various clusters when not yet ripe are stained with purple. As soon as he beheld himself thus in the water that was once again calm, he could endure it no further; but, as yellow wax is wont to melt under the touch of fire and the gentle frost under the warmth of the sun, so he was weakened and destroyed by love, gradually being consumed in its hidden flame. His beautiful complexion, white touched with red, no longer remained nor his youthful strength, nor all that he had formerly looked upon with such pleasure. Not even his body, which Echo had once loved, was left.

When Echo saw what he had become, she felt sorry, even though she had been angry and resentful. Each time that the poor boy exclaimed "Alas," she repeated in return an echoing "Alas." And as he struck his shoulders with his hands, she gave back too the same sounds of his grief. This was his last cry as he gazed into the familiar waters: "Alas for the boy I cherished in vain!" The place repeated these very same words. And when he said "Farewell," Echo repeated "Farewell" too. He relaxed his weary head on the green grass; night closed those eyes that had so admired the beauty of their owner. Then too, after he had been received in the home of the dead below, he gazed at himself in the waters of the Styx. His sister Naiads wept and cut off their hair and offered it to their brother; the Dryads wept, and Echo sounded their laments. Now the pyre and streaming torches and the bier were being prepared, but the corpse was nowhere to be seen. They found instead a yellow flower with a circle of white petals in its center.

NARCISSISM

This tragic story of self-love and self-destruction has cast a particularly potent spell upon subsequent literature and thought, not least of all because of Ovid's perceptive and moving tale. How typical of classical poetry is Ovid's insight: the fact that a male lover's prayer for just retribution is answered defines the homoerotic nature of Narcissus' self-love and self-destruction.²⁶ We do believe that Ovid intends us to understand that a male lover (*aliquis*) was rejected, because then Narcissus' affliction becomes so ironic and so just: "Let the punishment fit the crime." The ominous words of Tiresias predict the tragedy in a fascinating variation of the most Greek of themes, "Know thyself," preached by Apollo and learned by Oedipus and Socrates. "When his mother inquired if Narcissus would live to a ripe old age, the seer Tiresias answered, "Yes, if he

will not have come to know himself." We should not be surprised that Ovid is so profound.

Narcissism and narcissistic have been technical psychological terms and part of our everyday vocabulary since 1914, the year of Freud's paper "On Narcissism: An Introduction."²⁷

NOTES

1. Bacchus, the name for the god preferred by the Romans, is often used by the Greeks as well.
2. The word *dithyrambos*, an epithet of Dionysus and the name of a type of choral poetry that included hymns sung in the god's honor, was in ancient times believed to refer etymologically to his double birth.
3. The career of Ino is extremely confusing because of the multiple versions of her story. She was the second wife of Athamas (whom we shall meet again in the Argonautic saga), and they had two sons, Learchus and Melicertes. Angry with Ino because of her care for Dionysus, Hera drove both Ino and her husband mad. Athamas killed his son Learchus and pursued Ino, who escaped with Melicertes in her arms. She leaped from a cliff into the sea and was transformed into the sea-goddess Leucothea; Melicertes also became deified under the new name of Palaemon.
4. Note the Dionysiac aspects of Orpheus' missionary zeal in Thrace. The date for the introduction of the worship of the god into Hellas is difficult to establish; it probably belongs to the obscure period of transition after the fall of Mycenae (ca. 1100). But it is foolhardy to be dogmatic, especially if the decipherment of a Linear B tablet is correct and the name Dionysus (whether that of the god or not) can be identified as belonging to the Mycenaean Age.
5. The Curetes, as we have seen, are the attendants of Rhea, who hid the cries of the infant Zeus from his father Cronus. In this passage, Euripides associates them with the Corybantes, the ministers of Cybele.
6. We have translated only the beginning and end of Tiresias' lengthy and learned sermon on the great power of Dionysus.
7. Harry Parth, *Bitter Music, Collected Journals, Essays, Introductions, and Librettos*, ed. Thomas McGeary (Urbana: University of Illinois Press, 1991), pp. 244–246. Reprinted from his *Genesis of Music*. 2d ed. (New York: Da Capo Press, 1974 [1949]).
8. See pp. 606–607.
9. The initial nine lines, quoted by Diodorus Siculus (3. 66. 3), are probably not a separate hymn but should in some way be joined to the fragmentary last section of this first hymn, which is found in manuscript.

10. The epithet *eiraphiotes* is of uncertain derivation. It may mean "insewn," but it may instead refer to Dionysus' connection with the ivy plant or the goat or the bull.
11. Dracanum is a cape on the island of Cos; Icarus and Naxos are islands, and the Alpheus is a river in Elis.
12. There must be a lacuna after these lines from Diodorus and before the next section from the manuscript text.
13. The reference to three things is unclear; it may refer to the ritual of dismemberment.
14. E. R. Dodds' helpful edition of the Greek text of the *Bacchae*, 2d ed. (New York: Oxford University Press, 1960), includes an enlightening introduction; he notes that Dionysiac religion shares a belief, found universally, that musical rhythms and ritual dances lead to the most satisfying and highest religious experiences. See also Walter F. Otto, *Dionysus: Myth and Cult* (Bloomington: Indiana University Press, 1965 [1933]); M. Detienne, *Dionysos at Large* (Cambridge: Harvard University Press, 1989 [1986]); Carl Kerényi, *Dionysos: Archetypal Image of Indestructible Life*. Translated from the German by Ralph Manheim. Bollingen Series LXV.2 (Princeton: Princeton University Press, 1976); and Thomas H. Carpenter and Christopher A. Faraone, eds., *Masks of Dionysus*. Myth and Poetics Series (Ithaca: Cornell University Press, 1993), a collection of essays about various aspects of Dionysus and his worship.
15. A famous adaptation of this legend was made by Vergil in his sixth *Eclogue*, in which the utterance of the silenus is cosmogonical and mythological.
16. Variations in the story are obviously etiological attempts to account for elements of Bacchic ritual. Later ceremonies enacted the passion, death, and resurrection of the god in all their details.
17. Friedrich Nietzsche has provided the most imaginative and influential modern analysis of the Dionysiac experience, particularly in enunciating its antithetical relationship to the Apollonian. See M. S. Silk and J. P. Stern, *Nietzsche on Tragedy* (New York: Cambridge University Press, 1981), a study of Nietzsche's first book, *The Birth of Tragedy*.
18. Ovid's version of Midas' story (*Metamorphoses* 11. 85–145) is well known. This is the same Midas whose ears were turned into those of an ass as a result of his preference for the music of Pan over that of Apollo; see p. 243.
19. The same story is told by Ovid (*Metamorphoses* 3. 597–691), who provides an interesting comparison in artistic method and purpose.
20. Nonnos, *Dionysiaca*. Translated by W. H. D. Rouse (New York: Harvard University Press, 1934), Vol. 1, p. x.
21. See Philippe Borgeaud, *The Cult of Pan in Ancient Greece* (Chicago: University of Chicago Press, 1988) for a study of changing representations of Pan. Also Patricia Merivale, *Pan the Goat-God: His Myth in Modern Times* (Cambridge: Harvard University Press, 1969).
22. According to Herodotus (6. 106), Pan was encountered by the runner Phidippides, who had been sent to Sparta by the Athenians to ask for help when they were about to fight the Persians at Marathon in 490. Phidippides claimed that Pan called him by name and asked why the Athenians ignored him although he was a deity friendly to them. The Athenians believed Phidippides and later built a shrine to Pan and honored him with annual sacrifices and torch races.
23. Another nymph he pursued was turned into a tree that bore her name, Pitys (the Greek word for "pine").

24. This is Dryope; Ovid (*Metamorphoses* 9. 325 ff.) has a different version.
25. The Greek word *pan* means "all."
26. See Louise Vinge, *The Narcissus Theme in Western European Literature up to the Early 19th Century* (Lund, Sweden: Gleerups, 1967); also Gerasimos Santas, *Plato and Freud: Two Theories of Love* (Oxford: Basil Blackwell, 1988): Freud believed (and of course many disagree) that an individual's sexual development as an infant may determine his or her choices as an adult concerning the object and nature of love; thus the theory of narcissism had a great impact on his conviction that, for some, relationships in love may stem not from their primal attachment to their mothers but from infantile self-love.
27. See *The Standard Edition of the Complete Psychological Works of Sigmund Freud*, ed. James Ströckey, vol. 14 (London: Hogarth Press, 1957), pp. 69–129. Of great interest is a biography of the psychoanalyst Heinz Kohut by Charles B. Strozier, *Heinz Kohut: The Making of a Psychoanalyst* (New York: Farrar, Straus & Giroux, 2001). Kohut made himself famous by his profound exploration of narcissism in papers such as "Forms and Transformations of Narcissism" (1966) and "The Analysis of the Self" (1971).

DEMETER AND THE ELEUSINIAN MYSTERIES

THE MYTH OF DEMETER AND PERSEPHONE

There are two *Homeric Hymns to Demeter*. Number 13 is a very short prelude.

 I begin to sing about the holy goddess Demeter of the beautiful hair, about her and her very lovely daughter Persephone. Hail, goddess; preserve this city and lead my song.

The lengthy and powerful *Homeric Hymn to Demeter* (2), by contrast, is of the utmost importance; it begins with Hades' abduction of Persephone at the will of Zeus:

 I begin to sing about the holy goddess, Demeter of the beautiful hair, about her and her daughter, Persephone of the lovely ankles, whom Hades snatched away; loud-thundering Zeus, who sees all, gave her to him.

Alone, away from Demeter of the golden scepter and goodly crops, Persephone was playing with the deep-bosomed daughters of Oceanus and picking flowers along a soft meadow: beautiful roses, crocuses, violets, irises, and hyacinths; and Earth at the will of Zeus to please Hades, the host of many, produced as a snare for the fair maiden a wonderful and radiant narcissus, an awesome sight to all, both immortal gods and mortal humans. From its stem a hundred blossoms sprouted forth, and their odor was most sweet. All wide heaven above, the whole earth below, and the swell of the salt sea laughed. The girl was astounded and reached out with both her hands together to pluck the beautiful delight. And the wide-pathed Earth yawned in the Nysaeen plain, and the lord and host of many, who goes by many names, the son of Cronus, rushed at her with his immortal horses. And he snatched her up in his golden chariot and carried her away in tears.

She shouted with shrill cries and called on father Zeus, the son of Cronus, the highest and the best, but no one of the immortals or of mortals—not even the olive trees laden with their fruit—heard her voice except for the daughter of Persaeus [Perses], Hecate, her hair brightly adorned, who listened from her cave as she thought kindly thoughts, and lord Helius, the splendid son of Hyperion. These two heard the maid call on the son of Cronus, father Zeus; but he sat apart, away from the gods, in his temple with its many suppliants, receiving beautiful holy offerings from mortals. By the counsel of Zeus, his brother

Demeter. Marble, second half of the fourth century B.C.; height 58 in. This is the cult-statue from the sanctuary of Demeter at Cnidus in Asia Minor. She is shown seated and heavily draped. Her solemn gaze and matronly clothing are consistent with the Demeter of the *Homeric Hymn to Demeter*. (British Museum, London. Reproduced by permission of the Trustees.)

and her uncle Hades, the son of Cronus, who bears many names, the lord and host of many, led her off with his immortal horses against her will.

As long as the goddess could behold the earth, starry heaven, the deep flowing sea full of fish, the rays of the sun, and still hoped to see her dear mother and the race of everlasting gods, hope soothed her great heart, although she was

distressed. But the peaks of the mountains and the depths of the sea echoed with her immortal voice, and her lady mother heard her.

DEMETER'S GRIEF, ANGER, AND RETALIATION

Sharp pain seized Demeter's heart, and she tore the headdress about her ambrosial hair with her own dear hands and threw off the dark covering from both her shoulders; and she rushed in pursuit, just like a bird, over land and water. But no one—either of gods or mortals—wished to tell what had really happened—not even a bird came to her as a messenger of truth. For nine days, then, lady Demeter roamed over the earth holding burning torches in her hands and in her grief did not eat any ambrosia or drink sweet nectar, nor did she bathe her body. But when dawn brought on the light of the tenth day, Hecate, a torch in hand, met her and gave her some news as she exclaimed: "Lady Demeter, bringer of goodly gifts in season, who of the heavenly gods or mortals carried off Persephone and troubled your dear heart? For I heard her voice but did not see with my eyes who it was. I am telling you the whole truth quickly."

The Abduction of Persephone. By Peter Paul Rubens (1577–1640); oil on canvas, 1639, 71 × 106¼ in. Rubens follows the narrative of Book 2 of the epic poem *De Raptu Proserpinae*, of Claudian (late fourth century A.D.). Hades emerges from the Underworld in a chariot drawn by black horses and accompanied by two Cupids. He seizes Persephone, who has been gathering flowers in the basket that has fallen to the ground. To the left Artemis (distinguished by the small crescent on her forehead) and Athena (wearing her helmet) try to restrain Hades, while Aphrodite, who in Claudian's narrative had conspired with Zeus to arrange the abduction and had persuaded Persephone to go into the meadow to pick flowers, is caught in the middle. *Madrid, Prado.*

Thus Hecate spoke, and the daughter of Rhea of the beautiful hair did not answer but swiftly rushed away with her, holding burning torches in her hands. They came to Helius, the lookout for both gods and human beings, and stood before his horses, and the goddess of goddesses spoke: "Helius, do at least have respect for me, a goddess, if I have ever by word or by deed gladdened your heart and your spirits. Through the barren air I heard the piercing cry of the girl whom I bore, a sweet daughter, illustrious in her beauty, as though she were being violated; yet I saw nothing with my eyes. But since you look down from the divine aether with your rays on all the earth and sea, tell me truthfully if you have seen my dear child at all and who, either of gods or mortals, has seized her alone, away from me, by force against her will and made away."

Thus she spoke. And the son of Hyperion answered her: "Demeter, regal daughter of Rhea of the beautiful hair, you will know the truth. For indeed I revere you greatly and I pity you in your grief for your daughter of the lovely ankles. No other of the immortals is to blame except the cloud-gatherer Zeus, who gave her to his own brother Hades to be called his lovely wife. And he seized her and with his horses carried her away to the gloomy depths below as she cried aloud. But, O goddess, desist from your great lament; you should not thus bear an unseemly husband for your daughter; he is your own brother and born from the same blood; and as for honor, when at the first power was divided three ways, his lot was to be made lord of all those with whom he dwelt."

Thus he spoke and called out to his horses. And at his cry they nimbly bore the swift chariot, just like long-winged birds. But a more dread and terrible grief possessed Demeter's heart, and thereafter she was angry with the son of Cronus, Zeus, enwrapped in clouds; she kept away from the gatherings of the gods and high Olympus; and for a long time she went among the cities and rich fields of human beings, disguising her beautiful form.

DEMETER COMES TO ELEUSIS AND THE PALACE OF CELEUS

No one of men or deep-bosomed women who saw her recognized her until she came to the home of wise Celeus, who at that time was ruler of fragrant Eleusis. Grieving in her dear heart, she sat near the road by the Maiden Well, from which the people drew their water; she was in the shade, for an olive tree grew overhead. Her appearance resembled that of a very old woman long past her days for childbearing and the gifts of garland-loving Aphrodite; she was like the nurses for the children of law-pronouncing kings or the housekeepers in their echoing halls.

The daughters of Celeus, of the family of Eleusis, saw her there as they came after the easily drawn water so that they might bring it in their bronze pitchers to the dear home of their father. There were four of them, just like goddesses in their youthful bloom, Callidice and Cleisidice and lovely Demo and Callithoë who was the oldest of them all. They did not know Demeter, for it is difficult for mortals to recognize the gods; and standing near they spoke winged words: "Who are you, old woman, of those born long ago? Where are you from? Why have you come away from the city and not approached the houses there, in whose shadowy halls dwell women just like you and younger, who would welcome you in word as well as in deed?"

Thus they spoke. And she, the queenly goddess, answered with these words: "Dear children, whoever you are of women, I bid you greeting, and I shall tell you my tale. To be sure it is not inappropriate to relate the truth to you who have asked. My name is Doso, for my lady mother gave it to me. Now then, I have come from Crete over the broad back of the sea—not willingly but against my wishes, for by force pirates carried me away. Then they put in at Thoricus, where the women and the men together disembarked; they were busy with their meal beside the cables of the ship, but my heart had no desire for the delicious food. I hastened away over the black land and escaped from my overbearing masters so that they might not sell me, whom they had not bought, and reap a profit from me. And so I have come here after my wanderings, and I have no idea at all what land this is or who inhabit it. But may all those who dwell in homes on Olympus grant that you have husbands and bear children just as parents desire. But you maidens pity me now and show concern until, dear children, I come to the home of a man and woman to perform for them zealously the tasks appropriate for an elderly woman like me; I could hold a newborn child in my arms and care for him well, make my master's bed in the recess of his well-built chambers, and teach the women their tasks."

Thus spoke the goddess, and at once the virgin maiden Callidice, the most beautiful of the daughters of Celeus, answered: "Good woman, we mortals, even though we suffer, must bear what the gods bestow, for indeed they are much the stronger. I shall help you with the following advice, and I shall tell you the names of the men who have great honor and power here and who are foremost among the people and guard the battlements of our city by their counsels and firm judgments. There is clever Triptolemus and Dioclus and Polyxeinus and noble Eumolpus and Dolichus and our own brave father. All of these have wives who take care of their homes, and no one of them at the very first sight of your person would dishonor you or turn you out of his house, but they will welcome you, for to be sure you are like one of the gods. But if you wish, stay here, so that we may go to our father's house and tell our mother, the deep-bosomed Metaneira, the whole story in the hope that she will bid you come to our place and not search for the homes of the others. She cherishes in our well-built house an only son, born late, a darling long prayed for. If you were to bring him up and he attained the measure of his youth, you would easily be the envy of any woman who saw you. Such are the great rewards that would be yours for your care."

Thus she spoke, and Demeter nodded her head in agreement. And the girls filled their shining pitchers with water and carried them away happy. Quickly they came to the great house of their father and told their mother at once what they had seen and heard. She enjoined them to go with all speed and to hire the woman at any price. Just as deer or heifers bound along the meadow when in the springtime they have had their fill of pasture, thus they hurried along the hollow wagon path, holding up the folds of their lovely garments, and their hair, which was like the flower of the crocus, danced about their shoulders. And they found the illustrious goddess where they had left her earlier and thereupon led her to the dear house of their father; she followed behind with her head veiled, distressed at heart, and the dark robe grazed the slender feet of the goddess.

Soon they arrived at the house of Celeus, a man cherished by Zeus, and passed through the vestibule to where their lady mother sat by the pillar that supported the sturdy roof, holding her son, just a baby, in her lap. Her daughters ran to her, but the goddess stood at the threshold; her head reached up to the beams and she filled the doorway with a divine radiance. Then awe and reverence and fear seized Metaneira, and she sprang up from her couch and bade her guest be seated, but Demeter, the giver of goodly gifts in season, did not wish to sit on the splendid couch but waited in silence with her beautiful eyes downcast, until [the servant] Iambe in her wisdom set out for her a chair, artfully made, and threw a silvery fleece over it; then Demeter sat down, holding her veil over her face with her hands.

For a long time she remained seated without a sound, grieving; she did not by word or action acknowledge anyone; but without a smile, not touching food or drink, she sat wasted with longing for her deep-bosomed daughter, until Iambe in her wisdom resorted to many jests and jokes and brought the holy lady around to smile and laugh and bear a happy heart (thereafter too Iambe was to cheer her in her anguish). And Metaneira filled a cup with wine as sweet as honey and offered it, but she refused saying that it was not right for her to drink red wine. But she ordered them to mix meal and water with tender mint and give it to her to drink. Metaneira mixed the potion and gave it to the goddess as she had ordered. And the great lady Demeter took it for the sake of the holy rite.¹

DEMETER NURSES DEMOPHOÏN

Beautifully robed Metaneira was the first to speak among them: "Greetings, O lady, I expect that you are not born of base parents but of noble ones. Majesty and grace shine clearly in your eyes as though from the eyes of royalty who mete out justice. But we mortals, even though we suffer, must bear what the gods bestow, for the yoke lies on our necks. Yet now since you have come here, as much as I have will be yours. Nurse this child, whom the immortals gave me late in life, fulfilling my desperate hopes and endless prayers. If you were to bring him up and he attained the measure of his youth, you would easily be the envy of any woman who saw you. Such are the great rewards that would be yours for your care." Then Demeter of the beautiful crown replied to her: "Sincere greetings to you, also, O lady, and may the gods afford you only good. I shall take the boy gladly, as you bid, and tend to him, and I have good hopes that he will not be harmed or destroyed by any evil charms, for I know much more potent remedies and effective antidotes for harmful spells."

Thus she spoke, and with her immortal hands she took the child to her fragrant bosom. And his mother rejoiced in her heart. Thus she nursed in the house the splendid son of wise Celeus, Demophoön, whom beautifully robed Metaneira bore. And he grew like a god, not nourished on mortal food but anointed by Demeter with ambrosia, just as though sprung from the gods, and she breathed sweetness upon him as she held him to her bosom. At night she would hide him in the might of the fire, like a brand, without the knowledge of his dear parents. It was a source of great wonder to them that he grew and flour-

ished before his time, for he was like the gods to look upon. And she would have made him immortal and never to grow old if beautifully robed Metaneira in her foolishness had not seen what was happening, as she watched in the night from her fragrant chamber. Great was her dismay, and she gave a shriek and struck both her thighs, terrified for her child. Amid her groans she uttered winged words: "Demophoön, my child, this stranger buries you within the blazing fire to my anguish and grievous pain."

Thus she spoke in agony, and the goddess of goddesses, Demeter of the beautiful crown, grew angry as she listened; with her immortal hands she snatched from the fire the dear son whom Metaneira had borne in her house, blessing beyond hope, and threw him down on the floor. Demeter was dreadfully angry in her heart as she spoke to beautifully robed Metaneira: "Mortals are ignorant and stupid who cannot foresee the fate both good and bad that is in store. Thus you in your foolishness have done a thing that cannot be remedied. I call to witness by the relentless waters of the river Styx, the oath of the gods, that I would have made your dear child immortal and never to grow old all his days, and I would have granted him imperishable honor; but now, as it is, he will not be able to escape death and the Fates. Yet imperishable honor will always be his because he has lain on my knees and slept in my arms. But when the years go by and he has reached his prime, the new generation of Eleusinians will continually engage in dread wars and battles all their days. I am Demeter, esteemed and honored as the greatest benefit and joy to mortals and immortals. Now then, let all the people build to me a great temple and an altar with it, below the town and its steep wall, on the rising hill above the well, Kallichoron. And I myself shall teach my rites, so that performing them with reverence you may propitiate my heart."

Thus the goddess spoke and cast aside her old age, transforming her size and appearance. Beauty breathed around and about her, and a delicious odor was wafted from her fragrant garments. The radiance from the immortal person of the goddess shone far and wide, and her golden hair flowed down on her shoulders. The sturdy house was filled with her brilliance as though with a lightning flash. She disappeared from the room, and at once Metaneira's knees gave way; for a long time she was speechless and did not even remember at all to pick up her late-born son from the floor. But his sisters heard his pitiful cries and sprang down from their beds, spread well with covers; one of them then picked up the child in her arms and took him to her bosom, another stirred the fire, and a third hastened on her delicate feet to rouse their mother from her fragrant chamber. They gathered around the frantic child and bathed him with loving care. But his spirits were not soothed, for the nurses who tended him now were indeed inferior.

The whole night long, trembling with fear, they made their supplication to the illustrious goddess, and as soon as dawn appeared they told the truth to Celeus, whose power was great, just as Demeter the goddess of the beautiful crown had commanded. Then Celeus called the many people to an assembly and bade them build a splendid temple to Demeter of the lovely hair and an altar on the rising hill. They listened to him as he spoke and immediately complied and did as they were told. And the child flourished by divine destiny.

HADES AND PERSEPHONE AND HER EATING OF THE POMEGRANATE

When they had finished and ceased from their labor, each made his way homeward. But golden Demeter remained sitting there quite apart from all the blessed gods, wasted with longing for her deep-bosomed daughter. And she caused human beings a most terrible and devastating year on the fruitful land. The earth would not send up a single sprout, for Demeter of the lovely crown kept the seed covered. In vain the oxen dragged the many curved ploughs through the fields, and much white barley was sown in the earth to no avail. Now she would have destroyed the entire human race by cruel famine and deprived those who have their homes on Olympus of their glorious prestige from their gifts and sacrifices, if Zeus had not noticed and taken thought in his heart. First he roused golden-winged Iris to summon Demeter of the lovely hair, desirable in her beauty.

Thus he ordered. And Iris obeyed Zeus, the dark-clouded son of Cronus, and on swift feet traversed the interval between. She came to the citadel of fragrant Eleusis and found dark-robed Demeter in her temple. She spoke to her, uttering winged words: "Demeter, father Zeus, whose knowledge is imperishable, commands you to join the company of the eternal gods. Come now, let not the word I bring from Zeus be unaccomplished."

Thus she spoke in supplication, but Demeter's heart was unswayed. Thereupon father Zeus sent down to her all the blessed gods who exist forever; and they came one by one, calling out her name and offering her many very beautiful gifts and whatever honors she would like to choose for herself among the immortals. But no one was able to sway her mind and her heart from her anger, and she stubbornly rejected all appeals. She maintained that she would never set foot on fragrant Olympus or allow fruit to sprout from the earth until she saw with her own eyes her lovely daughter.

Then loud-thundering Zeus, who sees all, sent the slayer of Argus, Hermes, with his golden wand to Erebus to appeal to Hades with gentle words and bring chaste Persephone up from the murky depths to the light, so that her mother might desist from anger when she saw her daughter with her own eyes. Hermes did not disobey, and straightway he left the realms of Olympus and swiftly rushed down to the depths of the earth. He encountered the lord Hades within his house, sitting on a couch with his modest wife, who was very reluctant because of her longing for her mother. And Demeter, far away, brooded over her designs to thwart the actions of the blessed gods.

The mighty slayer of Argus stood near and said: "Hades of the dark hair, ruler of the dead, father Zeus has ordered me to bring to him from Erebus august Persephone, so that her mother may see her with her own eyes and desist from her wrath and dread anger against the immortals. For she is devising a great scheme to destroy the feeble tribes of earthborn men by keeping the seed hidden under earth and ruining the honors that are bestowed on the immortals. She clings to her dire wrath and does not associate with the gods but remains on the rocky citadel of Eleusis sitting apart within her fragrant temple."

Thus he spoke. And Hades, the lord of those below, smiled with furrowed brows and did not disobey the commands of Zeus the king; and he hastily ordered wise Persephone: "Go, Persephone, to the side of your dark-robed mother,

with a gentle and loving heart in your breast. Be not distraught. I among the immortals shall not be an unworthy husband for you, since I am the full brother of your father, Zeus. While you are here with me you will rule over all that lives and moves and you will hold the greatest honors among the immortals. Those who wrong you and do not propitiate your power by performing holy rites and sacrifices and offering appropriate gifts will find eternal retribution."

Hades and Persephone. Terra-cotta plaque, ca. 460 B.C.; height 10¹/₄ in. This is one of a series of small votive reliefs from the sanctuary of Persephone at Locri (in southern Italy). The divinities of the Underworld sit enthroned holding emblems connected with their worship—grain, parsley, a cock, a bowl. In front stands a lamp with a tiny cock on it, and another cock stands beneath Persephone's throne. (Museo Nazionale, Reggio. Photograph courtesy of Hirmer Verlag; München.)

Thus he spoke. And wise Persephone was delighted and jumped up quickly in her joy. But her husband secretly gave her the honey-sweet fruit of the pomegranate to eat, taking thought for himself that she should not remain all her days above with august, dark-robed Demeter. Hades, host of many, then yoked his immortal horses to the front of his golden chariot, which Persephone mounted; the mighty slayer of Argus, Hermes, took the reins and whip in his hands and drove them up and away from the palace; the pair of horses readily sped along and easily covered their long journey. Neither the sea nor streams of rivers nor grassy glens nor mountaintops impeded the onrush of the immortal horses as they cut through the deep air above them in their course. The charioteer brought them to a halt in front of the fragrant temple where Demeter of the lovely crown waited.

DEMETER'S ECSTATIC REUNION WITH PERSEPHONE

At the sight of her daughter, she rushed out like a maenad down a mountain thick with woods. When Persephone on the other side saw the beautiful eyes of her mother, she leaped down from the chariot with its horses and ran, throwing her arms about her neck in an embrace. But while Demeter still had her dear child in her arms, suddenly her heart sensed some treachery; trembling with dread she let go her loving embrace and asked quickly: "My child, have you eaten any food while you were below? Speak up, do not hide anything so that we both may know. If you have not, even though you have been in the company of loathsome Hades, you will live with me and your father, Zeus the cloud-gatherer, son of Cronus, in honor among all the immortals. But if you have eaten anything, you will return again beneath the depths of the earth and live there a third part of each year; the other two-thirds of the time you will spend with me and the other immortals. When the spring blooms with all sorts of sweet-smelling flowers, then again you will rise from the gloomy region below, a great wonder for gods and mortals. But tell me, too, by what trick the strong host of many deceived you?"

The very beautiful Persephone then said in answer: "To be sure, mother, I shall tell you the whole truth. When Hermes, the bringer of luck and swift messenger, came from my father, the son of Cronus, and the other gods of the sky, saying that I was to come up from Erebus in order that you might see me with your own eyes and desist from your wrath and dread anger against the immortals, I immediately jumped up in my joy. But Hades swiftly put in my mouth the fruit of the pomegranate, a honey-sweet morsel, and compelled me to eat it by force against my will. I shall tell you too how he came and carried me down to the depths of the earth through the shrewd plan of my father, the son of Cronus, going through it all as you ask.

"We were all playing in a lovely meadow: Leucippe, Phaeno, Electra, Ianthe, Melite, Iache, Rhodeia, Callirhoë, Melobosis, Tyche, Ocyrhoë beautiful as a flower, Chryseis, Ianeira, Acaste, Admete, Rhodope, Pluto, lovely Calypso, Styx and Urania, charming Galaxaura,² and Pallas the battle-rouser and Artemis delighting in arrows.

"We were playing and gathering lovely flowers in our hands, a mixed array of soft crocuses, irises, hyacinths, roses in full bloom, and lilies, wonderful to behold, and a narcissus, which the wide earth produced, in color yellow of a crocus. I plucked it joyously, but the earth beneath opened wide and thereupon

the mighty lord, the host of many, leaped up and carried me away in his golden chariot beneath the earth despite my violent protests—my cries were loud and shrill. I tell you the whole truth, although the story gives me pain.”

Thus they then in mutual love and tender embraces greatly cheered each other's heart and soul the whole long day. Their grief was assuaged as they exchanged their joys. Hecate, her hair brilliantly arrayed, approached them and frequently embraced the holy daughter of Demeter. From that time on, regal Hecate became the lady and attendant of Persephone.

DEMETER RESTORES FERTILITY AND ESTABLISHES THE MYSTERIES

Loud-thundering Zeus, who sees far and wide, sent as a messenger to them Rhea of the lovely hair to lead dark-robed Demeter among the company of the gods, and he promised to grant her the honors that she would choose among the immortal gods, and he consented that her daughter live a third part of the revolving year in the gloomy depths below and the other two-thirds by the side of her mother and the other immortals. Thus he ordered, and the goddess Rhea did not disobey the message of Zeus. She quickly rushed down from the heights of Olympus and came to the Rharian plain, previously very fertile, but now not fertile at all, standing leafless and barren. The white seed was hidden through the machinations of Demeter of the lovely ankles. But soon thereafter, with the burgeoning of spring, long ears of grain would be luxuriant and the rich furrows too along the ground would be laden with grain, some already bound in sheaves.

Rhea came from the barren air to this place first of all, and the goddesses beheld each other gladly and rejoiced in their hearts. Rhea, her hair brilliantly arrayed, spoke to Demeter thus: “Come here, my daughter; loud-thundering Zeus, who sees far and wide, summons you to join the company of the gods, and he has promised to grant you whatever honors you would like among the immortals, and he has consented that your daughter live a third part of the revolving year in the gloomy depths below and the other two-thirds with you and the other gods. Thus he said it would be accomplished and nodded his head in assent. But come, my child, and be obedient; do not persist in your relentless anger against Zeus, the dark-clouded son of Cronus. But quickly make grow for human beings the life-bringing fruit in abundance.”

Thus she spoke, and Demeter of the lovely crown obeyed. Quickly she caused fruit to spring up from the fertile plains, and the whole wide land was laden with leaves and flowers. She went to the kings who minister justice (Triptolemus, Diocles, the rider of horses, the mighty Eumolpus, and Celeus, the leader of the people) and showed them the performance of her holy rites and taught her mysteries to them all, Triptolemus and Polyxeinus and Diocles besides—holy mysteries that one may not by any means violate or question or express. For the great reverence due to the gods restrains one's voice.

Happy is the one of mortals on earth who has seen these things. But those who are uninitiated into the holy rites and have no part never are destined to a similar joy when they are dead in the gloomy realm below.

But when the goddess of goddesses had ordained all these things, they made their way to Olympus among the company of the other gods. There they dwell

beside Zeus, who delights in the thunder, august and holy goddesses. Greatly happy is the one of mortals on earth whom they dearly love; straightway they send, as a guest to his great house, Plutus, who gives wealth to human beings.

Come now you who hold power over the land of fragrant Eleusis, sea-girt Paros, and rocky Antron, lady and queen Demeter, the giver of good things in season, both yourself and your daughter, very beautiful Persephone, kindly grant me a pleasing substance in reward for my song. Yet I shall remember both you and another song too.

INTERPRETATIONS OF THE HYMN

The myth of Demeter and Persephone represents another variation of a fundamental and recurring theme—the death and rebirth of vegetation as a metaphor or allegory for spiritual resurrection. In the New Testament (John 12:24), this archetype is expressed in this way: “Unless a grain of wheat falls into the earth and

Demeter, by Jean Arp (1887–1966). Marble, 1960; 26 × 11 in. At the age of seventy-three Arp returned to the ancient and abstract form of the earth-mother, whose swelling curves and strong thighs presage the fertility of nature that is described at the end of the *Homeric Hymn to Demeter*. (New York, Art Resource, © 1994 Artists Rights Society (ARS), New York/VG Bild-Kunst, Bonn.)

dies, it remains alone; but if it dies it bears much fruit." In this Greek hymn, the allegory is rendered in terms of the touching emotions of mother and daughter; more often the symbols and metaphors involve the relationship between a fertility goddess and her male partner, either lover or son (e.g., Aphrodite and Adonis, Cybele and Attis, Semele and Dionysus). Demeter is often imagined as the goddess of the ripe grain; Persephone then is the deity of the budding tender shoots. They are invoked together as the "two goddesses." Persephone (who is often called merely *Kore*, a name meaning "girl") is the daughter of Demeter and Zeus, who enact once again the sacred marriage between earth-goddess and sky-god.

This is a hymn permeated by religious and emotional allegories about death and rebirth, resurrection, and salvation. The parable of the infant Demophoön is particularly revealing. Nursed and cherished by Demeter, he flourished like a god and would have become immortal, his impure mortality cleansed away in the fire, if only the unfortunate Metaneira, who did not understand the rituals, had not interfered. If we are nourished like this child by Demeter's truth and become initiated into her mysteries, we too shall find redemption, immortality, and joy through the same love and devotion of this holy mother, lavished not only upon Demophoön but also her lovely daughter.

The *Homeric Hymn to Demeter* also illustrates the grim character of Hades in his method of obtaining a wife and provides the mythological reasons for Hecate's prominence as a goddess of the Underworld. Hades' basic character as a fertility god is evident from the location of his realm, the violence of his nature, and his link with horses. He is thus a god of agricultural wealth (compare his names, Pluto or Dis, among the Romans); but he should not be confused with Plutus (Wealth) mentioned in the last lines of the hymn, another deity of agricultural plenty and prosperity (and thus wealth in general), the offspring of Demeter and Iasion.

TRIPTOLEMUS

Triptolemus, who also appears in the concluding lines of the hymn, is generally depicted as the messenger of Demeter when she restored fertility to the ground. He is the one who taught and spread her arts of agriculture to new lands at that time and later, often traveling in a magical car drawn by winged dragons, a gift of Demeter. He is sometimes either merged in identity with the infant Demophoön (variant spelling is Demophon) of the hymn or said to be his brother; in Plato, Triptolemus is a judge of the dead.

THE ELEUSINIAN MYSTERIES

This hymn to Demeter is of major importance because it provides the most significant evidence that we have for the nature of the worship of Demeter at Eleusis. The town of Eleusis is about fourteen miles west of Athens; the religion and

The Departure of Triptolemus. Attic red-figure cup by Makron, ca. 480 B.C.; height 8 $\frac{1}{4}$ in. Triptolemus holds stalks of grain in his left hand and in his right hand a dish (*phiale*), into which Persephone pours liquid from the jug in her right hand; she holds a torch in her left hand. The libation is a necessary ritual before departure on a journey. To the left stands Demeter, holding a torch and grain-stalks, and the personification of Eleusis stands behind Persephone. Triptolemus sits in a throne-like wheeled vehicle, whose wings symbolize the speed and extent of his travels, while the serpent indicates his association with the grain-bearing earth. (London, British Museum.)

ceremony that developed in honor of Demeter and her daughter had its center here, but the city of Athens too was intimately involved. This religion was of a special kind, not the general prerogative of everyone but open only to those who wished to become initiates; these devotees were sworn to absolute secrecy and faced dire punishments if they revealed the secret rites.³ This does not imply that initiation was confined to a select few. In early times, membership was inevitably limited to the people of Eleusis and Athens; but soon participants came from all areas of the Hellenic world, and eventually from the Roman Empire as well.

This religion was not restricted to men; women, children, and even slaves could participate. Appropriately, the religious celebration that evolved was given the name of the Eleusinian mysteries. Demeter, then, along with other

Hellenic deities, is the inspiration for a kind of worship that is generally designated as the mystery religions (compare elements in the worship of Dionysus and aspects of the devotion to Aphrodite and Adonis or Cybele and Attis). Orpheus is credited with originating the mysteries, and the nature of Orphism and kindred mystery religions will be considered in Chapter 16. Although there must have been differences among the various mystery religions (some of them probably quite marked) obvious to the ancient world, we have difficulty today in distinguishing precisely among them. It seems fairly certain that the major common denominator is a belief in the immortality of the soul and a future life.

The mysteries at Eleusis were kept secret so successfully that scholars are by no means agreed about what can be said with any certainty, particularly about the highest and most profound elements of the worship. The sanctuary at Eleusis has been excavated,⁴ and buildings connected with the ceremonies have been found, most important among them being the temple of Demeter, where the final revelation of the mysteries was celebrated.⁵ But no evidence has been unearthed that might dispel the secrecy with absolute certainty once and for all. The priests in charge of the rites presumably transmitted orally what Demeter was said to have taught.

It is impossible to know just how much of the ritual is revealed in the *Hymn to Demeter*. It would be presumptuous to imagine that the most profound secrets are here for all to read, and we cannot be sure how much may be inferred from what is directly stated. That elements of the ceremonies are indicated cannot be denied, but presumably these are only the elements that were witnessed or revealed to all, not only to the initiated. Thus we have prescribed by the text such details as an interval of nine days, fasting, the carrying of torches, the exchange of jests, the partaking of the drink *Kykeon*, the wearing of a special dress (e.g., the veil of Demeter); even precise geographical indications (e.g., the Maiden Well and the site of the temple) are designated.

The emotional tone of the poem, too, might hold the key for a mystic performance in connection with the celebrations. The anguish of Demeter, her frantic wanderings and search, the traumatic episode with Demophoön, the miraculous transformation of the goddess, the thrilling reunion between mother and daughter, the blessed return of vegetation to a barren earth—these are some of the obvious emotional and dramatic highlights.

On the basis of our inadequate evidence, the following tentative outline of basic procedures in the celebration of the Eleusinian mysteries may be presented; ultimate revelation and meaning are matters of more tenuous conjecture. Two major compulsory stages had to be undertaken: (1) participation in the Lesser Mysteries, involving preliminary steps in initiation; (2) advancement to the Greater Mysteries, which entailed full initiation into the cult. A third stage, not required but possible, entailed participation in the highest rites.⁶ It is immediately apparent that these mysteries are basically different from the festivals celebrated in the Panhellenic sanctuaries at Olympia and Delphi, which were open

to all, without secrecy or initiation or a fundamental mystic philosophy, however religious the tone that oracular response and devotion to a god might set.

Two major priestly families were connected with Eleusis.⁷ Among the many important priesthoods and assistant officials, the highest was that of the Hierophant; this priest alone could reveal to the worshipers the ultimate mysteries that entailed the showing of the *Hiera*, the sacred objects—his title means “he who reveals the *Hiera*.” Prominent too was the priestess of Demeter, who lived in a sacred house. Many of the priests received a fixed sum of money from each initiate as a fee for their services. The initiate was sponsored and directed by a patron.⁸

The Lesser Mysteries were held in Athens, usually once a year in early spring. Precise details are unknown, but the general purpose was certainly the preliminary preparation of the initiates for subsequent advancement to higher things. Ceremonies probably focused upon ritual purification, involving sacrifices, prayer, fasting, and cleansing by water.

The Greater Mysteries were held annually during the months of September and October. A holy truce was declared for a period of fifty-five days, and heralds were sent to issue invitations to states. Both Athens and Eleusis were involved in the festivities. Preliminary to the festival proper was the day on which the *Hiera* were taken out of the temple of Demeter in Eleusis and brought to Athens amid great pomp and ceremony. The splendid procession, headed by the priests and priestesses who carried the *Hiera* in sacred caskets bound by ribbons, was met officially in Athens and escorted in state to the sanctuary of Demeter in the city (the Eleusinion). The next day began the formal celebration of the Greater Mysteries, which continued through eight days, the ceremonies culminating in Eleusis, with a return to Athens on the ninth. The first day saw the people summoned to an assembly in the Athenian agora; those who were pure and knew Greek were invited by proclamation to participate in the mysteries. On the second day all participants were ordered to cleanse themselves in the sea. The third day was devoted to sacrifices and prayers. The fourth day was spent honoring the god of healing, Asclepius, who according to tradition had in previous times arrived late for initiation. So on this day other latecomers could enroll.

The festivities in Athens culminated on the fifth day in a brilliant procession back to Eleusis. Priests and laymen wended their prescribed way, crowned with myrtle and carrying mystic branches of myrtle tied with wool strands.⁹ Heading the procession was a wooden statue of Iacchus (very likely another name for the god Dionysus) escorted in a carriage. At some stages of the journey, abuse, jest, insults, and scurrilous language were exchanged, perhaps in part to instill humility in the throng. Prayers were chanted and hymns sung; torches were carried and lit as night fell, and the sacred procession reached the sanctuary of Demeter in Eleusis.

The sixth and seventh days brought the initiates to the secret core of the mysteries, and it seems safe to assume that much of the ritual was performed

in remembrance of the episodes described in the *Hymn to Demeter*. Thus there was a fast (certain foods, such as pomegranates and beans, were prohibited) and a vigil; the fast was probably ended by the drinking of the prescribed drink, the *Kykeon*, whatever its significance.

The heart of the ceremonies, which were celebrated in Demeter's temple, apparently involved three stages: a dramatic enactment, the revelation of sacred objects, and the uttering of certain words. What were the themes of the dramatic pageant? Probably it focused upon incidents from the story of Demeter and her wanderings and other episodes recorded in the hymn, all designed to elicit a religious catharsis. Some have suggested scenes of an Orphic character involving a simulated trip to the Underworld, with fabricated apparitions of terror and sublimity as the action moved from Hell (Tartarus) to Paradise (Elysium). That no underground chambers have been found in the excavations does not necessarily invalidate this theory. We do not know whether the initiates merely witnessed the drama or actually participated in it. Eventually the culmination was the awesome exhibition by the Hierophant himself of the holy objects, bathed in a radiant light as he delivered his mystic utterances. The highest stage of all, which was not required for full initiation, entailed further revelation of some sort. The eighth day concluded the ceremonies; the ninth brought the return to Athens, this time with no organized procession. The following day the Athenian council heard a full report on the conduct of the ceremonies.

Conjectures about the exact nature of the highest mysteries have been legion. Comments by the fathers of the Christian church have been brought to witness, but their testimony has been rightly viewed with grave suspicion because it was probably rooted in prejudice, stemming from ignorance and hostility. No one of them had ever been initiated into the mysteries, and surprisingly enough, those Christian converts who had been initiated seem to have continued to take their pledges of secrecy very seriously. It has been claimed that the ultimate revelation was connected with the transformation of the Eleusinian plain into a field of golden grain (as in the hymn); the heart of the mysteries consisted of no more than showing an ear of grain to the worshipers. Thus we actually *do* know the secrets; or, if you like, they are really not worth knowing at all in terms of serious religious thought. Yet this ear of grain may, after all, realistically and allegorically represent the enigma of the mystery itself. Others insist upon an enactment of the holy marriage in connection with the ceremonies, imagining not a spiritual but a literal sexual union between the Hierophant and the Priestess of Demeter. The *Hiera* too might be the female pudenda and, since Dionysus may be linked with Demeter and Kore, the male phallus as well. These holy objects were witnessed, or even manipulated, by the initiates in the course of the ritual. But there is no good evidence to argue with any certainty for such orgiastic procedures. The *Hiera*, as has been conjectured, could have been merely sacred and antique relics handed down from the Mycenaean Age.

It is difficult to agree with those who assert that Dionysus was completely excluded from the worship of Demeter at Eleusis. Iacchus has good claims to be Dionysus. And the myth of Zagreus-Dionysus, which provides the authority for Orphism (see pp. 362–363), makes Persephone his mother. Any spiritual message in the cult at Eleusis must have, in common with Dionysiac cults, a belief in the immortality of the soul and in redemption. If a doctrine similar to that of Orphism is also involved, it need not spring directly from Orphism. The confusion arises because all the mystery religions (whatever their precise interrelation)¹⁰ did in fact preach certain things in common.

The death and rebirth of vegetation as deified in Demeter and Kore surely suggest a belief in the afterlife. After all, this is the promise of the hymn: "But the one who is not initiated into the holy rites and has no part never is destined to a similar joy when he is dead in the gloomy realm below." If at some future time, only obscure evidence remained for the ritual of the Christian mass, scholars might imagine all sorts of things and miss completely the religious and spiritual doctrine upon which it rests. The words uttered by the Hierophant could have ordained spiritual direction and hope. But there was no church body as such for the followers of Demeter, in the sense that they were required to return each year; we know of no sacred writings like those, say, of Orphism. George Mylonas' conclusions affirm the universal power of the matriarchal cult of Demeter in the Graeco-Roman world:

Whatever the substance and meaning of the Mysteries was, the fact remains that the cult of Eleusis satisfied the most sincere yearnings and the deepest longings of the human heart. The initiates returned from their pilgrimage to Eleusis full of joy and happiness, with the fear of death diminished and the strengthened hope of a better life in the world of shadows: "Thrice happy are those of mortals, who having seen those rites depart for Hades; for to them alone is it granted to have true life there; to the rest all there is evil," Sophocles cries out exultantly. And to this Pindar with equal exultation answers: "Happy is he who, having seen these rites goes below the hollow earth; for he knows the end of life and he knows its god-sent beginning." When we read these and other similar statements written by the great or nearly great of the ancient world, by the dramatists and the thinkers, when we picture the magnificent buildings and monuments constructed at Eleusis by great political figures like Peisistratos, Kimon, Perikles, Hadrian, Marcus Aurelius and others, we cannot help but believe that the Mysteries of Eleusis were not an empty, childish affair devised by shrewd priests to fool the peasant and the ignorant, but a philosophy of life that possessed substance and meaning and imparted a modicum of truth to the yearning human soul. That belief is strengthened when we read in Cicero that Athens has given nothing to the world more excellent or divine than the Eleusinian Mysteries. Let us recall again that the rites of Eleusis were held for some two thousand years; that for two thousand years civilized humanity was sustained and ennobled by those rites. Then we shall be able to appreciate the meaning and importance of Eleusis and of the cult of Demeter in the pre-Christian era. When Christianity conquered the Mediterranean world, the rites of Demeter, having perhaps fulfilled their mission to humanity, came to an end. The "bubbling spring" of hope and

THE FESTIVAL OF THE THESMOPHORIA

Women generally played a dominant role in the religion of the ancient world. In the celebration of some of these rites only women were permitted to participate and men were completely excluded. One of the most famous of these women's festivals was the Thesmophoria, common to all Greece. The rites as performed in Athens became the subject of Aristophanes' comedy *Thesmophoriazusae*, about the doings of the feminine participants and the dire consequences for any male who dared to intrude. The festival, lasting for five days, took place in the fall and its purpose was to ensure fertility, especially of the crops to be sowed. Important in the ceremonies was the throwing of piglets into subterranean pits; after three days their remains were recovered and mixed with the seed to be planted in hopes of a good harvest. Etiology for this practice was provided by the myth of Eubouleus, a swineherd, who was swallowed up with his swine by the earth at the very time when Persephone was taken by Pluto. Celebrations also included sexual abstinence, a procession, sacrifices, fasting and feasting, and even ribald jests.

inspiration that once existed by the Kallichoron well became dry and the world turned to other living sources for sustenance. The cult that inspired the world for so long was gradually forgotten, and its secrets were buried with its last Hierophant.¹¹

Finally, a word of caution about the usual generalizations put forth concerning the dichotomy between the mystery religions and the state religions of antiquity. The argument runs something like this. The formal state religions were sterile or very soon became so; people's hope and faith lay only in the vivid experience offered by the mysteries. Whatever the general truth of this view, it must be noted that for classical Greece, at any rate, the lines are not so distinct. Ceremonies connected with Demeter at Eleusis are tied securely to the policies of the Athenian state. The *archon basileus* (an Athenian official in charge of religious matters in general) directed the celebrations for Demeter in Athens. The Athenian council as a political body was very much concerned about the festival. The pomp and procession involved are startlingly similar to the pageant connected with the Panathenaic festival in honor of Athena, a civic function, whatever its spiritual import. The "church" at Eleusis and the Athenian state were, to all intents and purposes, one.¹²

THE TRIUMPH OF MATRIARCHY

Again and again there appear in mythology variations on the theme of the dominant earth-goddess and her subordinate male lover, who dies and is reborn to ensure the resurrection of the crops and of the souls of mortals. Demeter's name may mean "earth-mother," but her myth and that of Persephone introduce a startling

and drastic variation of this eternal and universal archetype. The myth's sexual bluntness is replaced by a more refined and purer concept of motherhood and the love between a mother and daughter. In this guise, with nobility and humanity, the mother-goddess and matriarchy sustained their dominance in the ancient world.

Details of the myth continually challenge the patriarchal power of Zeus. The abduction of Persephone ordained by the supreme god so that Hades may have a wife and the Underworld may have a queen is depicted not as a divine right but a brutal rape, seen from the point of view of Demeter, who will not accept the status quo and is mighty enough to modify it. Through compromise, both the will of Zeus and the will of Demeter are fulfilled. Demeter shares the love and the person of her daughter with Hades; Hades has his wife; and Persephone attains honor as queen of the Underworld: the mystic cycle of death and rebirth is explained by a myth accommodating a specific patriarchal religious ritual, promising joy in this life and the next.

As we have seen, the Eleusinian mysteries were an inspiring spiritual force and became the one universal mystery religion of the ancient world before Christianity. Indeed, matriarchy was very much alive and well in the patriarchal world of the Greeks and the Romans.

An attractive little book offering a concise synthesis of dance (the ballet by Limón), photography (by Trager), and poetry (by Eavan Boland and Rita Dove).

NOTES

1. That is, "to initiate and observe the holy rite or sacrament." There appears to be a lacuna after this sentence. The words translated "for the sake of the holy rite" are difficult, and their precise meaning is disputed. The reference must be to an important

part of the ceremony of the Eleusinian mysteries, namely the partaking of a drink called the *Kykeon*. But the nature and significance of the ritual are unknown: was this in any real sense the sharing of a sacrament, an act of communion fraught with mystic significance, or was it merely a token remembrance of these hallowed actions of the goddess?

2. Sixteen of these names are listed among the daughters of Oceanus and Tethys by Hesiod, *Theogony*, 346–361; and Melite is a Nereid (246). The poet adds Leucippe, Phaeno, Iache, and Rhodope.
3. The charges against Alcibiades mentioned in the Box on p. 269 are indicative of the seriousness of the consequences if the sacred ceremonies were divulged or desecrated in any way.
4. See in particular George E. Mylonas, *Eleusis and the Eleusinian Mysteries* (Princeton: Princeton University Press, 1961); this provides the best general survey of all the evidence and the inherent archaeological, historical, religious, and philosophical problems.
5. As a place for the celebration of the mysteries (the Greek word is *teletai*), the temple of Demeter is called a *telesterion*.
6. Known as the *Epopteia*.
7. The Eumolpids (whose ancestor Eumolpus, according to the hymn, received the mysteries from Demeter herself) and the Kerykes.
8. The initiate was the *mystes* and his patron the *mystagogos*.
9. Aristophanes' *Frogs*, 340 ff., gives us some idea of this procession.
10. Herodotus (8.65) tells a tale about a mysterious cloud (arising from Eleusis amidst the strains of the mystic hymn to Iacchus) that provided a true omen of future events; in the context, the worship of the mother and the maiden is mentioned. This miracle sets the right tone for elements common to the worship and myths of both Demeter and Dionysus. It is not impossible that the passion of this resurrection-god played some role in the mysteries; Dionysus too is close to drama, and drama lies at the essence of the emotional aspects of Eleusinian ritual.

VIEWS OF THE AFTERLIFE: THE REALM OF HADES

HOMER'S BOOK OF THE DEAD

The earliest surviving account of the realm of Hades appears in Book 11 of the *Odyssey*. Homer's geographical and spiritual depiction is fundamental to subsequent elaborations and thus deserves to be excerpted at some length. Odysseus is telling the Phaeacians and their king Alcinoüs of his visit to the Underworld, where he must consult the seer Tiresias about how to reach Ithaca, his homeland (12–99):

 Our ship came to the farthest realm of deep-flowing Oceanus, where the country of the Cimmerians lies shrouded in cloud and mist. Bright Helios never looks down on them with his rays, either when he ascends to starry heaven or returns to earth; but dire night covers these poor mortals. Here we beached our ship, and after putting the animals ashore, we went along the stream of Oceanus until we came to the place that Circe had indicated. Here two of my men, Perimedes and Eurylochus, held the sacrificial victims, and I drew my sharp sword from my side and dug a pit about eighteen inches square. Around it I poured a libation to all the dead, first with a mixture of honey and milk, then with sweet wine, and a third time with water; over this I sprinkled white barley. I then supplicated the many strengthless spirits of the dead, promising that once I had come to Ithaca I should sacrifice, in my own halls, a barren heifer, the very best I had, and heap the sacrificial pyre with the finest things and offer separately to Tiresias alone a jet-black sheep that was outstanding among my flocks.¹

When I had finished entreating the host of the dead with prayers and supplications, I seized the victims and cut their throats, and their dark blood flowed into the pit. Then the souls of the dead who had departed swarmed up from Erebus:² young brides, unmarried boys, old men having suffered much, tender maidens whose hearts were new to sorrow, and many men wounded by bronze-tipped spears and wearing armor stained with blood. From one side and another they gathered about the pit in a multitude with frightening cries. Pale fear took hold of me, and then I urgently ordered my companions to flay the animals which lay slaughtered by the pitiless bronze and burn them and pray to the gods, to mighty Hades and dread Persephone. But I myself drew my sword from my side and took my post and did not allow the strengthless spirits of the dead to come near the blood before I had questioned Tiresias.

But first the soul of my comrade Elpenor came up, for he had not yet been buried in the wide earth.³ We had left his body in Circe's palace, unwept and unburied, since other toil had oppressed us. I wept at seeing him and pitied him and calling out addressed him with winged words: "Elpenor, how have you come in this gloomy realm? You arrived on foot sooner than I in my black ship."

Thus I spoke; and he replied with a groan: "Royal son of Laërtes, clever Odysseus, a divine and evil destiny and too much wine were my undoing. When I went to sleep in Circe's palace, I forgot to climb down the long ladder and fell headlong from the roof; my neck was severed from my spine and my soul came down to the realm of Hades.⁴ Since I know that when you leave this house of Hades you will stop with your fine ship at Circe's island of Aea, I beseech you by those whom you left behind far away, by your wife and father who took care of you as a child, and by Telemachus, your only son whom you left at home in your palace, do not turn away and go back leaving me unwept and unburied for future time, or I may become the cause of wrathful vengeance from the gods upon you. But burn my body with all the armor that I have and pile up a mound for me on the shore of the gray sea, the grave of an unfortunate man, so that posterity too may know. Do these things for me and plant on the mound the oar with which I rowed alongside my companions while I was alive."

Thus he spoke. And I addressed him in answer: "My poor friend, I shall accomplish to the full all your wishes." So we two faced each other in sad conversation, I holding my sword over the blood and on the other side the shade of my companion recounting many things. The soul of my dead mother came up next, daughter of great-hearted Autolycus, she who was alive when I went to sacred Ilium. I cried when I saw her and pitied her in my heart. Still, even though I was deeply moved I did not allow her to come near the blood before I had questioned Tiresias.

Then the soul of Theban Tiresias came up, bearing a golden scepter. He knew me and spoke: "Royal son of Laërtes, clever Odysseus, why, why, my poor fellow, have you left the light of the sun and come to see the dead and their joyless land? But step back from the pit, and hold aside your sharp sword so that I may drink the blood and speak the truth to you." So he spoke; and I drew back my silver-studded sword and thrust it into its sheath. After he had drunk the dark blood, then the noble seer spoke to me.⁵

Tiresias then tells Odysseus what destiny has in store for him; after the seer has prophesied, Odysseus asks how he can enable his mother, Anticlea, to recognize him (141–159):

 "I see there the soul of my dead mother, and she stays near the blood in silence and has not dared to look at her own son face to face nor speak to him. Tell me, O prince, how may she recognize that I am her son?" Thus I spoke. And he addressed me at once with the answer: "I shall tell you simple directions which you must follow. Any one of the dead you allow to come near the blood will speak to you clearly, but anyone you refuse will go back away from you." With these words the soul of Prince Tiresias went into the home of Hades, after he had uttered his prophecies.

But I remained steadfast where I was until my mother came up and drank the dark blood. Immediately then she knew me and in her sorrow spoke winged words: "My son, how have you come, while still alive, below to this gloomy realm which is difficult for the living to behold? For great rivers and terrible waters lie between, first Oceanus which, if one does not have a sturdy ship, he cannot in any way cross on foot."

Anticlea and Odysseus continue their conversation, questioning each other. Finally she reveals to her son that it was heartache and longing for him that brought her life to an end. At this Odysseus cannot restrain himself (204–234):

 Troubled in spirit I wished to embrace the soul of my dead mother; three times I made the attempt, as desire compelled me, three times she slipped through my hands like a shadow or a dream. Sharp pain welled up from the depths of my heart, and speaking I addressed her with winged words: "O my mother, why do you not stay for me so eager to embrace you, so that we both may throw our arms about each other, even in Hades' realm, and take comfort in chill lamentation? Or has august Persephone conjured up this phantom for me so that I may groan still more in my grief?"

Thus I spoke, and she, my lady mother, answered at once: "O my poor child, ill-fated beyond all men; Persephone, daughter of Zeus, does not trick you at all; but this is the doom of mortals when they die, for no longer do sinews hold bones and flesh together, but the mighty power of blazing fire consumes all, as soon as the life breath leaves our white bones and the soul like a dream flutters and flies away. But as quickly as possible make your way back to the light, but understand all these things so that you may in the future tell them to your wife." Thus we two exchanged words; then women came up (for august Persephone compelled them), all of whom were the wives or daughters of noble men. And they gathered all together about the dark blood. But I deliberated how I might speak to each one individually, and upon reflection this seemed to me the best plan. I drew my sharp sword from my sturdy side and did not allow them to drink the dark blood all at the same time. And they came up one by one and each explained her lineage and I questioned them all.

The parade of beautiful women that follows is packed with mythological and genealogical information that has little meaning for us in this context. At the end, Persephone drives away the souls of these illustrious ladies. A lengthy interview follows between Odysseus and Agamemnon, who tells bitterly of his murder at the hands of his wife, Clytemnestra, and her lover, Aegisthus, and remains suspicious and hostile toward all women. Then the souls of Achilles and Patroclus and the greater Ajax appear. The soul of Achilles addresses Odysseus next (Patroclus does not speak). We must excerpt two portions of their conversation to establish more completely the tone and humanity of Homer's conception. The first reveals Achilles' despair (473–491):

 "Royal son of Laërtes, clever and indomitable Odysseus, what still greater exploit have you ingeniously devised? How have you dared to come down to

Hades' realm where spirits without body or sense dwell, shadows of mortals worn out by life?" Thus he spoke, and I addressed him in answer, "O Achilles, son of Peleus, by far the mightiest of the Achaeans, I came down to Hades' realm to ask the seer Tiresias if he might tell me some way by which I might return to rocky Ithaca. For I have not yet come near Achaea nor yet reached my homeland, but I always have misfortunes. But no man either before or after is more fortunate than you, Achilles. Previously while you lived, we Argives heaped honors on you equal to those of the gods, and now being in this place you have great power among these shades. So, Achilles, do not be at all distressed, even though you are dead."

Thus I spoke, and he at once addressed me in answer: "Do not speak to me soothingly about death, glorious Odysseus; I should prefer as a slave to serve another man, even if he had no property and little to live on, than to rule over all these dead who have done with life."

Achilles goes on to inquire about his son, Neoptolemus; and when Odysseus has given details of how the boy has proven himself a man worthy of his father, Achilles in his pride feels a surge of joy illumine his gloomy existence (538–544):

 The soul of swift-footed Achilles [Odysseus goes on to relate] made its way in great strides over the plain full of asphodel, rejoicing because I said that his son was a renowned hero. Other souls of the dead stood grieving, and each recounted his sorrows. Only the soul of Ajax, son of Telamon, stood apart.

Ajax, who committed suicide because Odysseus was awarded the armor of Achilles rather than he, will not respond to Odysseus' appeals (563–600):

 Instead he followed the dead spirits into Erebus, where perhaps he might have spoken to me or I to him. But desire in my breast wished to see the souls of the other dead.

There I saw Minos, the splendid son of Zeus, sitting with a gold scepter in his hand and pronouncing judgments for the dead, and they sitting and standing asked the king for his decisions within the wide gates of Hades' house. And I saw next the giant hunter Orion, driving together on the plain of asphodel the wild beasts which he himself had killed on the lonely mountains, having in his hand a bronze club that was always unbreakable. And I saw Tityus, son of revered Earth, lying on the ground covering a vast area. Two vultures sitting on either side of him tore into his body and ate at his liver, and his hands could not keep them off. For he had assaulted Leto, the renowned consort of Zeus, as she was going through Panopeus, a city of beautiful dancing places, to Pytho.⁶

And also I saw Tantalus enduring harsh sufferings as he stood in a pool that splashed to his chin. He strained to quench his thirst but was not able; for every time the old man leaned eagerly to take a drink, the water was swallowed up and gone and about his feet the black earth showed, dried up by some divine power. Tall and leafy trees dangled fruit above his head: pears, pomegranates, apples, sweet figs, and olives, growing in luxuriant profusion. But whenever he reached out to grasp them in his hands, the wind snatched them away to the shadowy clouds.⁷

The Underworld, Apulian red-figure krater by the Underworld painter, ca. 320 B.C.; dimensions not given. This large vase represents many of the myths of the Underworld. In the center, Hades sits enthroned facing Persephone in a small temple. She is crowned and holds a staff; chariot wheels hang from the ceiling, probably the wheels of the chariot in which Hades abducted Persephone. To the left Orpheus plays his lyre, and behind him may be Megara and the children of Heracles. To the right a Fury stands next to a seated judge of the Underworld, before whom is the soul of an old man. In the bottom register Heracles drags off Cerberus, while Hermes points the way. To the left a Fury lashes Sisyphus, and to the right Tantalus, wearing a Phrygian cap, reaches up towards an overhanging cliff. In the upper register appear to be scenes of initiation, and on the neck are the chariots of Helios and Selene, beneath which fishes symbolize the Ocean in which their daily (or nightly) journeys begin and end. (*Munich Antikensammlung*, no. 3297.)

And also I saw Sisyphus enduring hard sufferings as he pushed a huge stone; exerting all his weight with both his hands and feet he kept shoving it up to the top of the hill. But just when he was about to thrust it over the crest then its own weight forced it back, and once again the pitiless stone rolled down to the plain. Yet again he put forth his strength and pushed it up; sweat poured from his limbs and dust rose up high about his head.⁸

Odysseus next sees the phantom of Heracles—the real Heracles is with his wife, Hebe, among the immortal gods. Heracles tells how he too was ill-fated while he lived, performing labors for an inferior master.

Homer's *Book of the Dead* ends when hordes of the shrieking dead swarm up and Odysseus in fright makes for his ship to resume his journey.

Countless difficulties beset any interpretation of the Homeric view of the afterlife, many of them linked to the nature of the composition of the *Odyssey* as a whole and of this book in particular. Discrepancies are apparent, and explanations must finally hinge upon one's views on the much wider problems of the Homeric question. Does the *Book of the Dead* reflect different attitudes and concepts put together by one man or by several, at one time or over a period of years—even centuries? Basic to the account, perhaps, is a cult of the dead—seen in the sacrificial ceremonies performed at the trench and in the serious note of moral compulsion to provide burial for one who has died. But as the description proceeds, there is much that is puzzling. Odysseus apparently remains at his post while the souls come up; if so, how does he witness the torments of the sinners and the activities of the heroes described? Are they visions from the pit of blood, or is this episode an awkward addition from a different treatment that had Odysseus actually tour the realm of Hades? Certainly the section listing the women who come up in a group conveys strongly the feelings of an insertion, written in the style of the Boeotian epic of Hesiod. As the book begins, the stream of Oceanus seems to be the only barrier, but later Anticlea speaks of other rivers to be crossed.

Thus the geography of the Homeric Underworld is vague, and similarly the classification of those who inhabit it is obscurely defined, particularly in terms of the precision that is evident in subsequent literature. Elpenor, among those who first swarm up, may belong to a special group in a special area, but we cannot be sure. Heroes like Agamemnon and Achilles are together, but they do not clearly occupy a separate paradise; the meadow of asphodel they inhabit seems to refer to the whole realm, not to an Elysium such as we find described by Vergil. One senses, rather, that all mortals end up together pretty much in the same place, without distinction. Since Odysseus thinks that Achilles has power among the shades as great as that which he had among the living, perhaps some prerogatives are assigned or taken for granted. A special hell for sinners may be implied (at least they are listed in a group), but it is noteworthy that these sinners are extraordinary indeed, great figures of mythological antiquity who dared great crimes against the gods. Apparently ordinary mortals do not suffer so for their sins. Homer does not seem to present an afterlife of judgment and reward

and punishment, and Minos presumably acts as a judge among the dead, settling their disputes there very much as he did in real life.

The tone and mood of the Homeric afterlife are generally more consistent. Vague and fluttering spirits, with all the pursuits, passions, and prejudices they had while alive, drift aimlessly and joylessly in the gloom; the light and hope and vigor of the upper world are gone. Philosophical and religious thought, shot through with moral earnestness and righteous indignation, will soon bring about sublime and terrifying variations in this picture.

PLATO'S MYTH OF ER

Plato concludes the last book of his great dialogue, *The Republic*, with the myth of Er. This vision of the afterlife is steeped in religious and philosophical concepts; and although figures from mythology are incorporated, the symbolic and spiritual world depicted is far removed from that of Homer. Addressing Glaucon, Socrates makes this clear as he begins (614B–616B):

 I shall not tell a tale like that of Odysseus to Alcinoüs, but instead my story is of a brave man, Er, the son of Armenius, a Pamphylian, who at one time died in war; after ten days, when the bodies—by now decayed—were taken up, his alone was uncorrupted. He was brought home, and on the twelfth day after his death placed on a funeral pyre in preparation for burial. But he came back to life and told what he had seen in the other world. He said that, after his soul had departed, it traveled with many and came to a divine place, in which there were two openings in the earth next to each other, and opposite were two others in the upper region of the sky.

In the space between these four openings sat judges who passed sentence: the just they ordered to go to the right through one of the openings upward in the sky, after they had affixed their judgments in front of them; the unjust they sent to the left through one of the downward openings, bearing on their backs indications of all that they had done; to Er, when he approached, they said that he must be a messenger to human beings about the afterlife and commanded him to listen and watch everything in this place.

To be sure he saw there the souls, after they had been judged, going away through the opening either in the heaven or in the earth, but from the remaining two openings he saw some souls coming up out of the earth, covered with dust and dirt, and others descending from the second opening in the sky, pure and shining. And they kept arriving and appeared as if they were happy indeed to return after a long journey to the plain that lay between. Here they encamped as though for a festival, and mutual acquaintances exchanged greetings; those who had come from the earth and those from the sky questioned one another. The first group recounted their experiences, weeping and wailing as they recalled all the various things they had suffered and seen in their journey under the earth, which had lasted one thousand years; the others from the sky told in turn of the happiness they had felt and sights of indescribable beauty.

O Glaucon, it would take a long time to relate everything. But he did say that the essential significance was this: everyone had to suffer an appropriate

penalty for each and every sin ten times over, in retribution for the number of times and the number of persons he had wronged; that is, he must make one full payment once every hundred years (since this is considered the span of human life) so that he might pay in full for all his wrongs, tenfold in one thousand years. For example, if any were responsible for the deaths of many or betrayed and enslaved cities or armies or were guilty of any other crime, they would suffer torments ten times over for all these sins individually; but on the other hand, if they had done good deeds and were just and holy, in the same proportion they were given a worthy reward. About those who died immediately after birth and those who had lived a short time he said other things not worth mentioning.

He described still greater retribution for honor or dishonor toward gods and parents and for murder. He told how he was near one spirit who asked another where Ardiaeus the Great was. This Ardiaeus had been tyrant in a city of Pamphylia a thousand years before this time, and he was said to have killed his aged parents and older brother and to have committed many other unholy deeds. The reply was that he had not and would not come back to the plain. For to be sure this was one of the terrifying sights that we witnessed.

When we were near the mouth and about to come up, after experiencing everything else, we suddenly saw Ardiaeus and others, most of whom were tyrants, but there were also some ordinary persons who had committed great wrongs. They all thought that they would at last ascend upward, but the mouth would not let them; instead it gave forth a roar, whenever any who were so incurable in their wickedness or had not paid sufficient penalty attempted to come up. Then indeed wild men, fiery of aspect, who stood by and understood the roar, seized some of them and led them away, but they bound Ardiaeus and the others, head, hand, and foot, threw them down, and flayed them; they dragged them along the road outside the mouth combing their flesh like wool with thorns, making clear to others as they passed the reason for the punishment and that they were being led away to be hurled down to Tartarus.

Of all the many and varied terrors that happened to them there, by far the greatest for each was that he might hear the roar as he came up, and when there was silence each ascended with the utmost joy. The judgments then were such as these: punishments for some and again rewards for others in due proportion.

The souls who have completed their cycle of one thousand years spend seven days on the plain and then proceed on another journey, accompanied by Er. Four days later they arrive at a place from which they behold a beam of light that extends like a pillar through all of heaven and earth. After another day's journey, they can see that this light provides as it were a bond or chain to hold the universe together; from this chain of light extends the spindle of Necessity (*Ananke*) by which all the revolving spheres are turned. The next section of the myth presents a difficult, cosmological explanation of the universe, with its circles of fixed stars and revolving planets, the earth being at the center.⁹

Then Plato's account of Er, as Socrates relates it, continues with a description of the harmony of the spheres (617B–621D):

 The spindle turned on the knees of Necessity. A Siren was perched aloft each of the circles and borne along with it, uttering a single sound on one musical

note; from all eight came a unified harmony. Round about at equal distances sat three others, each on a throne, the Fates (Moirai), daughters of Necessity, in white robes with garlands on their heads, Lachesis, Clotho, and Atropos, singing to the music of the Sirens: Lachesis of the past, Clotho of the present, and Atropos of the future. Clotho touches with her right hand the outside circle of the spindle and helps turn it; with her left Atropos moves the inner circles in the same way, and Lachesis touches and moves both, alternating with each hand.

Immediately after the souls arrived, they had to approach Lachesis. First of all a prophet arranged them in order; and then, after taking from the knees of Lachesis lots and examples of lives, he mounted a lofty platform and spoke: "Hear the word of Lachesis, maiden daughter of Necessity. Ephemeral souls, this is the beginning of another cycle of mortal life fraught with death. A divinity will not allot himself to you, but you will choose your divinity.¹⁰ Let one who has drawn the first lot choose a life, which will be his by necessity. Virtue is without master; each man has a greater or lesser share, insofar as he honors or dishonors her. The blame belongs to the one who makes the choice; god is blameless."

With these words, he cast the lots among them all, and each picked up the one that fell near him. Only Er was not allowed to participate. It was clear to each when he had picked up his lot what number he had drawn. Next he placed the examples of lives on the ground in front of them, many more than those present and of every kind; lives of all living creatures and all human beings. Among them lives of tyrants, some complete, others cut short and ending in poverty, exile, and destitution. There were lives of illustrious men, renowned for form and beauty or strength and physical achievement, others for family and the virtues of their ancestors; in the same way were lives of unknown or disreputable men; and so it was for women. But the disposition of the soul was not included, because with its choice of another life it too of necessity became different, but the other qualities were mixed with one another, wealth and poverty, sickness and health, and intermediate states.

Herein to be sure, as it seems, my dear Glaucon, lies all the risk; therefore each one of us must seek to find and understand this crucial knowledge; he must search if he can hear of and discover one who will make him capable of knowing; he must distinguish the good life from the wicked and choose always in every situation from the possibilities the better course, taking into account all that has now been said. He must know how these qualities, individually or combined, affect virtue in a life; what beauty mixed with poverty or wealth achieves in terms of good and evil, along with the kind of state of soul that it inspires; and what high and low birth, private status, public office, strength, weakness, intelligence, stupidity, and all such qualities, inherent or acquired, achieve in combination with one another, so that after deliberation he may be able to choose from all of these between the worse and better life, looking only to the effect upon the nature of his soul.

By the worse life I mean that leading the soul to become more unjust, by the better, that leading it to become more just. All other considerations he will ignore. For we have seen that this is the most crucial choice for a human being living or dead. Indeed one must cling to this conviction even when he comes to the realm of Hades, so that here, just as in the other world, he may not be over-

whelmed by wealth and similar evils and succumb to acts like those of a tyrant, committing many incurable evils, and besides suffering still greater ones himself, and so that he may know how to choose a life that follows the mean in such circumstances, and to avoid the excess in either direction, both in this life and in every future life, as far as he is able. For in this way a person becomes most fortunate and blessed.

Then indeed Er, the messenger from the afterlife, reported that the prophet spoke as follows: "Even for the one who comes last, there lies a life that is desirable and not evil, if he chooses intelligently and lives it unflinchingly. Let not the one who chooses first be careless, nor the last discouraged." After he had spoken, the one who had drawn the first lot immediately went up and chose the most extreme tyranny, and he made his choice out of senselessness and greed and did not look closely at everything, and he did not notice that his life entailed the fate of eating his own children and other evils. And when he examined his choice at leisure, he beat his breast and lamented that he had not abided by the warnings of the prophet. For he did not accept the responsibility for these evils, but he blamed fate and the gods and everything rather than himself. He was one of those who had come down from the sky and had lived his previous life in a city with an orderly political constitution and adopted virtue through habit rather than wisdom.

Generally speaking, the number of those who came down from the sky and were caught in this kind of predicament was not small, since they were untrained in suffering. But many of those from earth, since they had themselves suffered and seen others suffer, did not make their choice on impulse. Because of this and because of the chance of the lot, for many souls there occurred a change from an evil to a good fate or the reverse. For if one always pursues wisdom with all his strength each time he takes a life in the world, and if the lot of choosing does not fall to him among the last, it is likely, from all that has been reported, that not only will he be happy in life but also his journey after death from the plain and back will not be under the earth and hard, but easy and upward to the sky.

Er said that to watch each soul as he chose his life was a worthwhile sight, piteous, laughable, and wondrous. For the most part, they made their choices on the basis of their experiences in their previous lives. He saw the soul that had been that of Orpheus choose the life of a swan through hatred of the female sex because of his death at their hands, not wishing to be born again of woman. And he saw the soul of Thamyras select the life of a nightingale, and a swan decide to change to the life of a human, and other musical creatures make similar decisions. The soul that drew the twentieth lot chose the life of a lion; this was the soul of Ajax, son of Telamon, avoiding a human life because he remembered the judgment concerning Achilles' armor. After him came the soul of Agamemnon; he too through hatred of the human race because of his sufferings changed to the life of an eagle. The choice of the soul of Atalanta fell in the middle of the proceedings; she saw great honors attached to the life of a male athlete and took it, not being able to pass it by. He saw after her the soul of Epeus, the son of Panopeus, assuming the nature of a craftswoman, and far away among the last the soul of the ridiculous Thersites taking the form of an ape.

In his fated turn, the soul of Odysseus, who had drawn the last lot, went to choose; remembering his former toils he sought to be free from ambition; he looked a long time and with difficulty found the quiet life of an ordinary man lying somewhere disregarded by the others and, when he saw it, he made his choice gladly and said that he would have done the same thing even if the first lot had fallen to him. In the same way, souls of wild animals exchanged forms or entered human beings, the unjust changing to savage beasts, the just to tame ones; and all kinds of combinations occurred.

When all the souls had chosen lives, they proceeded in order according to their lots to Lachesis. She gave to each the divinity (*daimon*) he had chosen to accompany him as a guardian for his life and to fulfill his choices. This divinity first led the soul to Clotho, under her hand as it turned the revolving spindle, to ratify the fate each had chosen after drawing his lot. He touched her and then led the soul to the spinning of Atropos, thus making the events on the thread of destiny unalterable. From here without turning back they went under the throne of Necessity and passed beyond it. When all the souls and their guardian divinities had done this, they proceeded together to the plain of the river of forgetfulness (Lethe) through a terrible and stifling heat. For it was devoid of trees and all that the earth grows.

Now that it was evening, they encamped by the river of forgetfulness, whose water no container can hold. It is necessary for all to drink a fixed amount of the water, but some do not have the wisdom to keep from drinking more than this amount. As one drinks one becomes forgetful of everything. In the middle of the night when they were asleep there was thunder and an earthquake, and then suddenly just like shooting stars they were borne upward, each in a different direction to his birth. Er himself was prevented from drinking the water. He does not know where and how he returned to his body, but suddenly opening his eyes he saw that he was lying on the funeral pyre at dawn.

Thus, O Glaucon, the myth has been preserved and has not perished. We should be saved if we heed it, and we shall cross the river of forgetfulness well and not contaminate our souls. But if we all agree in believing the soul is immortal and capable of enduring all evils and all good, we shall always cling to the upward path and in every way pursue justice with wisdom, so that we may be in loving reconciliation with ourselves and the gods, and so that when we carry off the prizes of justice, just like victors in the games collecting their rewards, both while we are here and in the thousand-year journey we have described, we may fare well.

This vision of an afterlife, written in the fourth century B.C., comes from various sources about which we can only conjecture. We must also allow for the inventive genius of Plato himself in terms of his own philosophy. The numeric intervals (e.g., the journey of a thousand years) are reminiscent of Pythagoras and the belief in the transmigration of the soul; reward and punishment, with ultimate purification, is usually identified as Orphic. Since this myth of revelation concludes *The Republic* with proof of divine immortality, problems abound in connection with its precise interpretation. How much was intended to be ac-

cepted literally? Is Er's story an allegory filled with profound symbols hiding the universal truths it wishes to disclose?

In his *Phaedo*, Plato provides another vision of the afterlife in which he explains (114B–C) how true philosophers eventually are released from the cycle of reincarnation; those who have lived a life of exceptional holiness and purify themselves sufficiently through their pursuit of philosophy live entirely as souls in the hereafter in beautiful dwellings, which are not easy to describe.

For the purposes of our sketch of the development of the Greek and Roman concept of the afterlife, it is important to stress that a heaven and a hell are clearly depicted for the soul of every mortal; and in addition to the upward and downward paths that must be traversed, special tormentors exist, as does a special place of torment (Tartarus) in which the greatest sinners are placed forever.¹¹ In such a conception lies the mythical and biblical basis for the mystery religions of antiquity, whether their god be Demeter or Dionysus and their prophet Orpheus or Plato.¹² Ties with Christian sentiments are not hard to see, despite the obvious differences. More specific links are provided by the early Christian identification of Er as an ancestor of St. Joseph and by the fact that these early Christians, in their championship of free will, seized upon the admonition of Lachesis: "This blame belongs to him who makes the choice; god is blameless."

VERGIL'S BOOK OF THE DEAD

In Book 6 of the *Aeneid*, Vergil paints his sad and prophetic picture of the Underworld in shadowy halftones fraught with tears and pathos. His sources are eclectic, but his poetic vision is personal and unique. Despite the centuries of oral and written tradition and the Roman chauvinism of his depiction, Homeric and Platonic elements are often still distinctly evident. At Cumae, in Italy, the Sibyl, prophetess of Apollo, tells Aeneas what the requirements are to visit his father in the realm of Hades. He must get a golden bough, sacred to Proserpine (i.e., Persephone), and bury his comrade, Misenus. It is easy to descend to the Underworld; the task is to retrace one's steps to the upper air; only a special few have managed this. While his men are preparing a funeral pyre for Misenus, Aeneas goes in search of the bough (186–204):

 As Aeneas gazed at the vast woods, it happened that he uttered a prayer: "If only the golden bough would show itself to me in so immense a forest. For the priestess told all that was true—alas, too true—about your need for burial, Misenus." At that moment, as it happened, twin doves came flying from the sky under his very eyes and settled on the green ground. Then the great hero recognized his mother's birds and in his joy prayed: "Be leaders, if there is some way, and direct your course to the grove where the branch rich in gold shades the fertile earth; O goddess mother do not fail me in this crisis."

Thus he spoke and stopped in his tracks, watching what sign they gave and what course they took. They would stop to feed and then fly ahead, always per-

mitting Aeneas to keep them in sight as he followed. When they approached the foul odor coming up from Lake Avernus, they quickly flew higher; and gliding through the liquid air the doves settled down together on the longed-for tree, where the tawny gleam of gold flickered through the branches.

Aeneas eagerly breaks off the golden bough; after the funeral rites for Misenus have been completed, he takes it to the Sibyl (237–322):

There was a deep and rocky cave with a huge yawning mouth sheltered by the black lake and the darkness of the forest; no birds at all were able to wing their way overhead, so great and foul an exhalation poured up to the vault of heaven from the lake. Its name, Avernus, deriving from the Greek, means “birdless.” Here first of all the priestess set four black bullocks and poured wine over their heads; between their horns she cut the tips of bristles and placed them on the sacred fire as first libations, calling aloud on Hecate, who holds power both in the sky above and in the depths of Erebus. Attendants applied their knives and caught the warm blood in bowls. Aeneas himself slaughtered with his sword a black-fleeced lamb for Night, the mother of the Eumenides, and her great sister, Earth; and for you, Proserpine, a barren cow; then he built an altar in the night for the Stygian king and placed on the flames the whole carcasses of bulls, pouring rich oil over their entrails. Lo, at the first rays of the rising sun, the ground rumbled and the wooded ridges began to move and she-dogs appeared howling through the gloom as the goddess approached from the Underworld.

The Sibyl cried: “Keep back, keep back, you who are unhallowed; withdraw completely from this grove. But you, Aeneas, enter the path and seize your sword from its sheath. Now there is need for courage and a stout heart.” This much she spoke and threw herself furiously into the cave. Aeneas, without fear, matched the steps of his leader as she went.

You gods who rule over spirits, silent shades, depths of Chaos, Phlegethon, and vast realms of night and silence, let it be right for me to speak what I have heard; by your divine will let me reveal things buried deep in earth and blackness.

They went, dim figures in the shadows of the lonely night, through the empty homes and vacant realms of Dis, as though along a road in woods by the dim and treacherous light of the moon, when Jupiter has clouded the sky in darkness, and black night has robbed objects of their color. At the entrance itself, in the very jaws of Orcus, Grief and avenging Cares have placed their beds; here dwell pale Diseases, sad Old Age, Fear, evil-counseling Hunger, foul Need, forms terrible to behold, and Death and Toil; then Sleep, the brother of Death, and Joys evil even to think about, and opposite on the threshold, death-dealing War, the iron chambers of the Eumenides, and insane Discord, her hair entwined with snakes and wreaths of blood.

In the middle, a huge and shady elm spreads its boughs, aged arms in which empty Dreams are said to throng and cling beneath all the leaves. There were also many different forms of beasts and monsters: Centaurs had their haunt in the doorway, Scyllas with twofold form, hundred-handed Briareus, the creature of Lerna hissing dreadfully, the Chimaera armed with flames, Gorgons, Harpies, and the shade of triple-bodied Geryon. Suddenly Aeneas, startled by fear,

snatched his sword and threatened them with his drawn blade as they approached. If his wise companion had not warned that these insubstantial lives without body flitted about with but the empty shadow of a form, he would have rushed in and smitten the shades with his weapon for nothing.

From here is a path that leads to the waters of Acheron, a river of Tartarus, whose seething flood boils turbid with mud in vast eddies and pours all its sand into the stream of Cocytus.¹³ A ferryman guards these waters, Charon, horrifying in his terrible squalor; a mass of white beard lies unkempt on his chin, his eyes glow with a steady flame, and a dirty cloak hangs from his shoulders by a knot. He pushes his boat himself by a pole, tends to the sails, and conveys the bodies across in his rusty craft; he is now older, but for a god old age is vigorous and green. Here a whole crowd poured forth and rushed down to the bank: mothers and men, the bodies of great-souled heroes finished with life, boys and unmarried girls, young men placed on the pyres before the eyes of their parents, as many as the leaves that drop and fall in the forest at the first cold of autumn or as the birds that flock to land from the stormy deep, when winter puts them to flight across the sea and sends them to sunny lands. They stood pleading to be the first to cross and stretched out their hands in longing for the farther shore. The grim boatman accepted now these and now those, but he drove others back and kept them at a distance from the sandy shore.

Aeneas, who was moved by the tumult, asked in wonder: "Tell me, O virgin Sibyl, the meaning of this gathering at the river. What do these souls seek? By what distinction do some retire from the bank, while others are taken across the murky stream?" The aged priestess answered him briefly as follows: "Son of Anchises, and most certainly a descendant of the gods, you see the deep pools of Cocytus and the marshes of the Styx, the river by which the gods fear to swear falsely. This one group here consists of those who are poor and unburied.¹⁴ The ferryman is Charon. The others whom he takes across are those who have been buried. Charon is not allowed to transport them over the hoarse-sounding waters to the dread shore if their bones have not found rest in proper burial; but a hundred years they wander and flit about this bank before they come back at last to the longed-for waters to be admitted to the boat." The son of Anchises stopped in his tracks and stood thinking many thoughts, pitying in his heart the inequity of the fate of human beings.

Among those who have not received burial, Aeneas sees his helmsman Palinurus, who had fallen overboard on their voyage from Africa; he managed to reach the coast of Italy, but once he came ashore tribesmen killed him. The interview is reminiscent of the exchange between Odysseus and Elpenor in human emotion and religious sentiment. The Sibyl comforts Palinurus with the prediction that he will be buried by a neighboring tribe. The book continues (384–449):

 Aeneas and the Sibyl proceed on their way and approach the river. When the ferryman spied them from his post by the river Styx, coming through the silent grove and turning their steps toward the bank, he challenged them first with unprovoked abuse: "Whoever you are who approach our river in arms, explain

why you have come but answer from there, do not take another step. This is the place of the shades, of sleep and drowsy night; it is forbidden to carry living bodies in my Stygian boat. To be sure, I was not happy to accept Heracles and Theseus and Pirithoüs when they came to these waters, although they were of divine descent and invincible strength. Heracles by his own hand sought and bound in chains the guardian dog of Tartarus and dragged it away trembling from the throne of the king himself. The other two attempted to abduct the queen from the chamber of Dis."

The priestess of Apollo answered briefly: "No such plots this time; be not dismayed; our weapons bear no violence; let the huge doorkeeper howl forever and strike terror into the bloodless shades; let Proserpine remain safe and pure within the house of Pluto, her uncle. Trojan Aeneas, outstanding in goodness and valor, descends to the shades below to his father. If the sight of such great virtue and devotion does not move you, at least recognize this bough."

She revealed the bough that lay hidden in her robe, and at this his heart that was swollen with anger subsided. Not a word more was uttered. He marveled at the hallowed gift of the fateful branch, which he had not seen for a long time, and turned his dark-colored boat around to approach the shore. Then he drove away the souls that were sitting on the long benches, cleared the gangway, and at the same time took the mighty Aeneas aboard; the leaky seams groaned under his weight and let in much of the swampy water. At last Charon disembarked the seer and the hero safe and sound on the further shore amid shapeless mud and slimy sedge.

Huge Cerberus, sprawling in a cave facing them, made these regions echo with the howling from his three throats. When the prophetess saw his necks bristling with serpents she threw him a cake of meal and honey drugged to make him sleep. He opened wide his three throats in ravenous hunger and snatched the sop; his immense bulk went limp and spread out on the ground, filling the whole of the vast cavern. With the guard now buried in sleep, Aeneas made his way quickly over the bank of the river of no return.

Immediately, on the very threshold, voices were heard and a great wailing and the souls of infants weeping who did not have a full share of sweet life but a black day snatched them from the breast and plunged them into bitter death. Next to them were those who had been condemned to die by a false accusation. To be sure their abode has not been assigned without an allotted jury, and a judge, Minos, is the magistrate; he shakes the urn and draws lots for the jury, summons the silent court, and reviews the lives and the charges. Right next is an area occupied by an unhappy group who were guiltless but sought death by their own hand and hating the light abandoned their lives. How they wished now even for poverty and hard labor in the air above! But fate stands in the way and the hateful marsh binds them with its gloomy waters, and the Styx flowing round nine times imprisons them.

Not far from here spread out in all directions were the fields of Mourning, as they are named. Here those whom relentless and cruel love had wasted and consumed hide themselves in secret paths in the woods of myrtle; even in death itself their anguish does not leave them. In this place he saw Phaedra, Procris, and unhappy Eriphyle displaying the wounds inflicted by a cruel son, and

Evadne, Pasiphaë, and with them Laodamia and Caeneus, who had been changed into a boy and now once again was a woman.

Here Aeneas meets Dido, queen of Carthage, who has recently committed suicide because of her love for Aeneas and his betrayal. He addresses her in sad, piteous, and uncomprehending tones; but she refuses to answer and turns away to join the shade of her former husband, Sychaeus.

From here Aeneas and his guide move on to the last group and farthest fields, reserved for those renowned in war, who had been doomed to die in battle and were much lamented by those on earth. Tydeus, Parthenopaeus, Adrastus, and many, many others come to meet Aeneas. Trojan heroes crowd around him, but the Greek warriors from Troy flee in terror. Aeneas converses with Deiphobus, the son of Priam who married Helen after the death of Paris. Deiphobus tells the story of his death at the hands of Menelaus and Odysseus through the treachery of Helen. Their talk is interrupted by the Sibyl, who complains that they are wasting what brief time they have; it is now already past midday on earth and night is coming on (540–543):

 This is the place where the road divides and leads in two directions: our way is to the right and extends under the ramparts of Dis to Elysium, but the left path leads to the evil realms of Tartarus, where penalties for sin are exacted.

We must look at Vergil's comprehensive and profound conception of Hell, Tartarus, and Paradise, Elysium or the Elysian Fields (548–579):

 Suddenly Aeneas looked back to the left and saw under a cliff lofty fortifications enclosed by a triple wall around which flowed Phlegethon, the swift stream of Tartarus, seething with flames and rolling clashing rocks in its torrent. He saw in front of him a huge door, with columns of solid adamant that no human force nor even the gods who dwell in the sky would have the power to attack and break through. Its tower of iron stood high against the winds; and one of the Furies, Tisiphone, clothed in a bloody robe, sat guarding the entrance, sleepless day and night. From within he heard groans and the sound of savage lashes, then the grating of iron and the dragging of chains. Aeneas stood in terror, absorbed by the din. "Tell me, virgin prophetess, what is the nature of their crimes? What penalties are imposed? What is this great wail rising upward on the air?"

Then she began to speak: "Renowned leader of the Trojans, it is not permitted for anyone who is pure to cross the threshold of the wicked. But when Hecate put me in charge of the groves of Avernus, she herself taught me the penalties exacted by the gods and went through them all. Cretan Rhadamanthus presides over this pitiless kingdom; he punishes crimes and recognizes treachery, forcing each to confess the sins committed in the world above, atonement for which each had postponed too long, happy in his futile stealth, until death. At once the avenging fury, Tisiphone, armed with a whip, leaps on the guilty and drives them with blows; as she threatens with her fierce serpents in her left hand, she summons the phalanx, her savage sisters. Then at last the

Aeneas and the Sibyl in the Underworld. By Jan Brueghel the Elder (1568–1625); oil on canvas, 1600, $10\frac{1}{2} \times 14\frac{1}{4}$ in. Aeneas strides along holding his sword (useless against the powers of the Underworld) and the golden bough, which he will offer to Persephone before he can enter the Elysian Fields. Behind are the lurid fires of Tartarus, and on either side are monsters and sinners enduring or awaiting punishment. (Budapest, Szépművészeti Múzeum.)

sacred gates open wide, turning with strident horror on their creaking hinges. Do you see what kind of sentry sits at the entrance? What forms are watching in the threshold? The monstrous Hydra, more fierce than the Furies with its fifty black and gaping throats, has its home within. Then Tartarus itself yawns deep under the shades, extending straight down twice as far as the view upward to the sky and celestial Olympus."

In Tartarus Vergil places the Homeric sinners Tityus, Sisyphus, and possibly Tantalus; but there is difficulty in the text and its interpretation. Tityus is the only one of the three named directly. Other criminals identified by Vergil are the Titans, who were hurled to the very bottom of Tartarus by the thunderbolts of Jupiter; the sons of Aloeus, Otus and Ephialtes,¹⁵ who tried to storm heaven and seize Jupiter himself; Salmoneus, who was foolish enough to play the role of Jupiter and claim divine honors; Theseus and Pirithoüs; Phlegyas;¹⁶ and Ixion. Ixion is one of the more famous sinners condemned to Tartarus; he is punished by being bound to a wheel that eternally revolves.¹⁷

Vergil's Tartarus is not a hell just for heroic sinners of mythological antiquity; in it all who are guilty suffer punishment. It is important to realize fully the ethical standards he applies. The nature of sin is clearly summed up by the Sibyl as she continues; just as clear is the moral conviction that assigns happiness to the good in the paradise of Elysium (608–751):

 "Here are imprisoned and await punishment those who hated their brothers while they were alive or struck a parent and devised guile against a dependent or who hovered over their acquired wealth all alone and did not share it with their relatives (these misers were the greatest throng), and those who were killed for adultery or took up arms in an impious cause and were not afraid to betray the pledges made to their masters. Do not seek to learn the nature of the crime and fate of each and every sinner and the punishment in which he is submerged. Some roll a huge rock, others hang stretched on the spokes of a wheel; Theseus sits in his misery and will remain sitting forever; wretched Phlegyas admonishes all as he bears testimony in a loud voice among the shades: 'Be warned! Learn justice and not to despise the gods.' This one sold his country for gold, set up a tyrannical despot, made laws and revoked them for a price. This one invaded the bedroom of his daughter in forbidden incestuous marriage.

"All dared enormous crime and were successful in the attainment of their darling. I should not be able to recount all the forms of wickedness or enumerate all the names of the punishments if I had a hundred tongues and a hundred mouths."

After the aged priestess of Phoebus had uttered these words, she continued: "But come now, proceed on your way and accomplish the task you have undertaken. Let us hurry. I see opposite fortifications of Pluto's palace erected by the forges of the Cyclopes and the vaulted arch of its door where we have been ordered to lay down this gift!" She had spoken, and making their way together through the gloom of the path they hurried over the space between and approached the gates. Aeneas reached the entrance, sprinkled himself with fresh water, and placed the bough on the threshold.

When this had been done and the gift had been given to the goddess, then at last they came to the happy places, the pleasant green glades of the Woods of the Fortunate, the home of the blessed. Here air that is more pure and abundant clothes the plains in soft-colored light and they have their own sun and their own stars. Some exercise their limbs on the grassy wrestling grounds, vie in sport, and grapple on the yellow sand. Others dance in a chorus and sing songs; and the Thracian priest, Orpheus, in his long robe, accompanies their measures on the seven strings of his lyre, plucking them now with his fingers, now with an ivory quill. Here is the ancient Trojan line of King Teucer, a most beautiful race, great-souled heroes born in better years, and Ilus, Assaracus, and Dardanus, the founder of Troy.

Aeneas marvels at the unreal arms of the heroes and their chariots nearby. The spears stand fixed in the ground, and horses browse freely everywhere on the plain. The same pleasure that they had in their chariots and arms and in tending their sleek horses follows them after they have been laid in the earth. Behold he sees others feasting to the right and to the left on the grass and singing a happy paean in a chorus amidst a fragrant grove of laurel, from which the full stream of the Eridanus River rolls through the woods in the upper world.¹⁸

Here in a group were those who suffered wounds while fighting for their country, and the priests who remained pure while they lived, and the poets who were devout in their art and whose words were worthy of their god, Phoebus Apollo, or those who made life better by their discoveries in the arts and the sciences and who through merit made others remember them. All of these wore around their temples a snowy white garland; the Sibyl spoke to them as they surrounded her, singling out Musaeus especially: "Tell me, happy souls and you, O illustrious poet, what region, what place does Anchises inhabit? We crossed the great rivers of Erebus and have come on his account." Musaeus replied in these few words: "No one has a fixed abode; we inhabit shady groves, living in meadows fresh with streams along whose banks we recline. But if the desire in your heart so impels you, cross over this ridge; I shall show you an easy path." He spoke and walked ahead of them pointing out the shining fields below; then they made their way down from the height.

Father Anchises was eagerly contemplating and surveying souls that were secluded in the depths of a green valley and about to enter upon the light of the upper air. It happened that he was reviewing the whole number of his own dear descendants; the fate, fortune, character, and exploits of Roman heroes. When he saw Aeneas coming toward him over the grass, he quickly extended both his hands and a cry escaped his lips as the tears poured down his cheeks: "At last you have come, and your long-awaited devotion to your father has overcome the hard journey. Is it granted to me to see your face, to hear your voice, to speak to you as of old? I have been pondering your visit, thinking about when it would be, counting out the time, and my anxiety has not gone unrewarded. I receive you here after your travels over so many lands and so many seas, harried by so many dangers! How much I feared that Dido in her African kingdom might do you some harm!"

Aeneas replied: "The vision of you in your sadness appearing to me again and again compelled me to pursue my way to this realm. My ships are moored

on the Italian shore. Give me, give me your right hand, father, do not shrink from my embrace." As he was speaking, his face was moist with many tears. Three times he attempted to put his arms around his father's neck, three times he reached in vain as the phantom escaped his hands as light as a breeze, like a fleeting vision of the night.¹⁹ Meanwhile, Aeneas saw in this valley set apart, a secluded grove and the rustling thickets of a wood and the stream of Lethe, which flowed by the serene abodes. Around the river countless tribes and peoples were flitting, just as when bees settle on different flowers in a meadow in the calm heat of summer and swarm about the white lilies; the whole plain was filled with a murmuring sound.

Aeneas, who did not understand, gave a sudden shudder at the sight; and seeking reasons for it all, he asked what the river was in the distance and what crowd of men filled its banks. Then father Anchises replied: "The souls to which bodies are owed by Fate at the stream of the river Lethe drink waters that release them from previous cares and bring everlasting forgetfulness. Indeed I have desired for a long time to tell you about these souls, to show them before your very eyes, and to list the number of my descendants; now all the more may you rejoice with me that you have found Italy." "O father, am I to think that some souls go from here to the upper air and enter sluggish bodies again? What is this dread desire of these poor souls for light?" "To be sure I shall tell you and not hold you in suspense." Thus Anchises replied and proceeded step by step to reveal the details in order.

"In the first place, a spirit within sustains the sky, the earth, the waters, the shining globe of the moon, and the Titan sun and stars; this spirit moves the whole mass of the universe, a mind, as it were, infusing its limbs and mingled with its huge body. From this arises all life, the race of mortals, animals, and birds, and the monsters that the sea bears under its marble surface. The seeds of this mind and spirit have a fiery power and celestial origin, insofar as the limbs and joints of the body, which is of earth, harmful, and subject to death, do not make them dull and slow them down. Thus the souls, shut up in the gloomy darkness of the prison of their bodies, experience fear, desire, joy, and sorrow, and do not see clearly the essence of their celestial nature.

"Moreover, when the last glimmer of life has gone, all the evils and all the diseases of the body do not yet completely depart from these poor souls; and it is inevitable that many ills, for a long time encrusted, become deeply ingrained in an amazing way. Therefore they are plied with punishments, and they pay the penalties of their former wickedness. Some spirits are hung suspended to the winds; for others the infection of crime is washed by a vast whirlpool or burned out by fire. Each of us suffers his own shade.²⁰

"Then we are sent to Elysium, and we few occupy these happy fields, until a long period of the circle of time has been completed and has removed the ingrown corruption and has left a pure ethereal spirit and the fire of the original essence. When they have completed the cycle of one thousand years, the god calls all these in a great throng to the river Lethe, where, of course, they are made to forget so that they might begin to wish to return to bodies and see again the vault of heaven."

Anchises then leads Aeneas and the Sibyl to a mound from which they can view the souls as they come up, and he points out to them, with affection and pride, a long array of great and illustrious Romans who are to be born. The book ends with Aeneas and his guide leaving by the gate of ivory; why Vergil has it so, no one knows for sure (893–899):

 “There are twin gates of Sleep; one is said to be of horn, through which easy exit is given to the true shades. The other is gleamingly wrought in shining ivory, but through it the spirits send false dreams up to the sky.” After he had spoken, Anchises escorted his son and the Sibyl and sent them out by the gate of ivory. Aeneas made his way to his ships and rejoined his companions.

Vergil wrote in the second half of the first century B.C., and variations and additions are apparent when his depiction is compared to the earlier ones of Homer and Plato. There are, of course, many other sources for the Greek and Roman conception of the afterlife, but none are more complete or more profound than the representative visions of these authors, and a comparison of them gives the best possible insight into the general nature and development of the ancient conception both spiritually and physically.

Vergil’s geography of Hades is quite precise. First of all a neutral zone contains those who met an untimely death (infants, suicides, and persons condemned unjustly); next the Fields of Mourning are inhabited by victims of unrequited love and warriors who fell in battle. The logic of these allocations is not entirely clear. Is a full term of life necessary for complete admission to the Underworld? Then appear the crossroads to Tartarus and the Fields of Elysium. The criteria for judgment are interesting; like many another religious philosopher and poet, Vergil must decide who will merit the tortures of his hell or the rewards of his heaven on the basis both of tradition and of personal conviction. Other writers vary the list.²¹ Some have observed that the tortures inflicted are often imaginative and ingenious, involving vain and frustrating effort of mind and body, and therefore characteristically Greek in their sly inventiveness. Perhaps so, but depicted as well is sheer physical agony through scourging and fire. Attempts made to find a logic in the meting out of a punishment to fit the crime are only sometimes successful.²²

Vergil’s Paradise is very much an idealization of the life led by Greek and Roman gentlemen; and the values illustrated in the assignment of its inhabitants are typical of ancient ethics: devotion to humankind, to country, to family, and to the gods. In Elysium, too, details supplement the religious philosophy of Plato, which has been labeled Orphic and Pythagorean in particular and mystic in general. The human body is of earth—evil and mortal; the soul is of the divine upper aether—pure and immortal. It must be cleansed from contamination and sin. Once again we are reminded of the myth of Dionysus, which explains the dual nature of human beings in terms of their birth from the ashes of the wicked Titans (the children of Earth) who had devoured the heavenly god Dionysus.

Presumably in the cycle of rebirth and reincarnation, the weary chain is ultimately broken; and we are no longer reborn into this world, but join the oneness of divinity in the pure spirit of the upper air.

TRADITIONAL ELEMENTS OF HADES' REALM

Some identification and clarification of the various names and terminology linked with the Underworld are in order. The realm as a whole may be called Tartarus or Erebus, although these are also the names given solely to the region of torment, as opposed to Elysium or the Elysian Fields. Sometimes the realm of Paradise is located elsewhere in some remote place of the upper world, such as the Islands of the Blessed.

There are usually three judges of the Underworld: Minos, Rhadamanthys (or Rhadamanthus), and Aeacus, whose duties are variously assigned. Aeacus is sometimes relegated to more menial tasks; in comedy he appears as the gatekeeper. The rivers are generally five in number, with appropriate names: Styx (the river of hate); Acheron (of woe); Lethe (of forgetfulness); Cocytus (of wailing); Pyriphlegethon or Phlegethon (of fire). For philosophical and religious conceptions of the afterlife and the belief in the transmigration of souls and rebirth, the River of Forgetfulness (Lethe) assumes great importance. It was a custom to bury the dead with a coin in the mouth to provide the ferryman Charon with his fare.²³ Hermes Psychopompus often plays the role of guide for the souls from this world to the next. The ferocious dog, Cerberus, usually depicted with three heads, guards the entrance to the realm of the dead.

Hades, king of the Underworld, is also called Pluto or (in Latin) Dis, which means "the wealthy one," referring to him either as a god of earth and fertility or as a deity rich in the numbers of those who are with him. The Romans called him and his realm Orcus, which probably means "the one or the place that constrains or confines." Sometimes Hades (this word may mean "the unseen one") is given no name at all or is addressed by some complimentary epithet, as is the custom with all dreadful deities or spirits—including the devil. Hades and his realm and its inhabitants are in general called *chthonian*, that is, of the earth, as opposed to the bright world of the Olympian gods of the upper air; and Hades himself may even be addressed as Chthonian Zeus. His queen is Persephone.

In Hades' realm, we may find either our heaven (Elysium) or our hell (Tartarus). Tradition developed a canon of mythological sinners who suffer there forever: Tityus, with vultures tearing at his liver; Ixion, bound to a revolving wheel; the Danaids, vainly trying to carry water in sievelike containers; Sisyphus, continually rolling a rock up a hill; and Tantalus, tantalized by food and drink.²⁴

The Furies (Erinyes) usually have their home in the realm of Hades; so does Hecate, who sometimes resembles them in appearance and in character. Hesiod, as we have seen, tells how the Furies were born from the blood that fell onto the

earth after the castration of Uranus; according to others, they are the offspring of Night. Both versions are appropriate in terms of their sphere and their powers. They vary in number, but they may be reduced to three with specific names: Allecto, Megaera, and Tisiphone. In literature and art they are depicted as formidable, bearing serpents in their hands or hair and carrying torches and scourges. They are the pitiless and just avengers of crime, especially murder; blood guilt within the family is their particular concern, and they may relentlessly pursue anyone who has killed a parent or close relative. It has been conjectured that originally they were thought of as the ghosts of the murdered seeking vengeance on the murderer or as the embodiment of curses called down upon the guilty.

THE UNIVERSALITY OF GREEK AND ROMAN CONCEPTS

A consideration of how different societies and peoples at various times have viewed the afterlife cannot help but be fascinating. We all must die, and what will happen after death is a question that each of us has pondered deeply. Whatever our beliefs, the Graeco-Roman view must stand as one of the most philosophically profound and religiously archetypal, with themes that find parallels not only with religions of the West (such as Judaism and Christianity) but also with those of the East (Buddhism and Platonism share basic concepts).²⁸ For those who dismiss any certain knowledge of death's aftermath as futile, the artistic bequest of the ancient world can offer its own rewards.

The profundity and intensity of the Greek and Roman visions of an afterlife have been all-pervasive in the art and literature of Western civilization. The most explicit literary description is that of Vergil, and this has been the most potent inspiration for postclassical artists and writers. The great Italian poet Dante (1265–1321) was steeped in its radiance, which he suffused with Christian imagination and dogma. Dante takes Vergil as his guide through the *Inferno*, in which many of the classical features of Hades are to be found. In Canto 1 Dante, terrified and lost in a wilderness, encounters Vergil, who becomes his guide through Christian Hell; lines 82–87 express Dante's intense devotion to the Roman poet, inherent in the poem.

O, honor and light of all the other poets,
 May the long study and great love
 which made me pore over your tome
 help me now.
 You are my master and my authority,
 You are the only one from whom
 I drew and cultivated the noble style
 which has brought me honor.

Many excerpts from Dante could be offered to show the myriad debts to the *Aeneid*. The depiction of Cerberus in Canto 6 is a particularly famous example.

The Furies very definitely represent the old moral order of justice within the framework of primitive society, where the code of “an eye for an eye and a tooth for a tooth” is meted out by the personal vendetta of the family or the clan. This is Aeschylus’ conception of them in his dramatic trilogy, the *Oresteia*. The Furies persecute Orestes after he murders his mother (who has murdered his father), but eventually their role is taken over by a new regime of right: the Areopagus, the court of Athens, decides Orestes’ case through the due process of law; and it is significant that Apollo and Athena (the new generation of progressive deities) join forces with the justice of advanced civilization. The last play in the trilogy is called the *Eumenides*, which means the “kindly ones”; this is the name for the Furies as they were worshiped in Athens, after having finally been appeased and put to rest once and for all.²⁵

The Christian concept of Satan should not be confused with the ancient portrayal of Hades, who is not fighting with his brother Zeus for our immortal souls. We all end up in his realm, where we may or may not find our heaven or our hell. The only exceptions are those who (like Heracles) are specifically made divinities and therefore allowed to join the gods in heaven or on Olympus. Hades, to be sure, is terrible and inexorable in his severity, but he is not in himself evil or our tormentor; we may fear him as we fear death and its possible consequences, which we cannot avoid. But he does have assistants, such as the Furies, who persecute with devilish and fiendish torments.²⁶ Hades’ wife and queen of his realm, Persephone, is considered in the previous chapter.

It would be misleading, however, to conclude our survey of the Underworld with the impression that all Greek and Roman literature treats the realm of Hades and the afterlife so seriously. One thinks immediately of Aristophanes’ play the *Frogs*, in which the god Dionysus rows across the Styx to the accompaniment of a chorus croaking *brekekekex koax koax*; his tour of the Underworld is quite different from Aeneas’ and is at times hilarious.²⁷

NOTES

1. Tiresias is the famous seer of the Theban cycle, who holds special prerogatives in the world of the dead; his wits are intact, and to him alone in death Persephone has left a mind for reasoning; all others are mere shadows (*Odyssey* 10. 492–495).
2. Another name for Hades' realm or part of it.
3. Elpenor can address Odysseus first without drinking the blood because his corpse has not yet been cremated.
4. As we learn in Book 10 (551–560), Elpenor got drunk and, wanting fresh air, left his companions in Circe's palace. He fell asleep on the roof; in the morning he was awakened suddenly and forgot where he was.
5. Tiresias does not have to drink the blood before he can speak, but he needs to drink it in order to express his prophetic powers to the full. He may also be drinking it as a mortal would drink wine, for refreshment, and thus he establishes ties of hospitality and friendship with Odysseus.
6. An early name of Delphi.
7. Tantalus' crime is variously described by later writers; whatever its specific nature, it is a crime against the gods, often identified as some abuse of their trust or hospitality. The verb *tantalize* comes from his name and his punishment. For Pindar's version, see pp. 404–405.
8. Sisyphus' crimes are recounted on pp. 612–613.
9. Plato's image is of a spindle with its shaft at one end and a fly or whorl at the other. We may liken this to an open umbrella held upside down and filled with eight concentric circular rings, which revolve and carry with them the stars and the planets.
10. This divinity (*daimon*) is the destiny that accompanies each soul through its life on earth, its good or bad *genius*.
11. In Hesiod (*Theogony* 713–814) Tartarus is a dark place in the depths of the earth into which Zeus hurled the Titans after he defeated them. It is surrounded by a fortification of bronze, and inside dwell Night and her children Sleep and Death. The house of Hades and Persephone is guarded by a terrifying hound. The river of Tartarus is the Styx, by whose water the gods swear dread oaths; if they break these oaths, they must suffer terrible penalties for a full nine years.
12. In graves in southern Italy and Crete have been found thin plates of gold inscribed with religious verses that were presumably intended to help the mystic believer in the afterlife; some of the sentiments reflect the eschatology found in Plato, especially concerning the drinking of the waters of Lethe.
13. Vergil's conception of the rivers of the Underworld is far from clear. Charon seems to ferry the souls across Acheron, although Cocytus is mentioned in the immediate context; the Styx is identified by Vergil later. Tradition often has Charon cross the river Styx.
14. By poor, Vergil probably means that they do not have the fare to pay Charon. A coin was traditionally placed between the lips of the dead for passage to the Underworld.
15. The mother of the Aloadae was Iphimedeia, who said that their real father was Poseidon, according to the Greek version. These twins grew to be giants, and their attack on Zeus was made by piling Mt. Ossa upon Olympus and then Mt. Pelion upon Ossa. For this presumption, they were both while still young killed by Apollo.
16. In some accounts Phlegyas is the father of Ixion; he burned the temple of Apollo at Delphi because of Apollo's affair with his daughter Coronis.

17. Sometimes the wheel is on fire. For Ixion's crime, see pp. 602–603.
18. Near its source, the Po River flowed for some distance underground, and the legendary river of the Underworld, Eridanus, was identified with it.
19. Vergil echoes Homer's lines about Odysseus trying to embrace the shade of his mother.
20. That is, each of us has a soul that must bear the consequences of its life on earth.
21. The Danaids, the forty-nine daughters of Danaüs who killed their husbands on their wedding night, are frequently added to the group in Tartarus; their punishment is that they must attempt in vain to carry water in containers that have no real bottoms.
22. Thus, for example, Tityus has his liver devoured because he attempted to violate Leto, since the liver was believed to be the seat of the passions.
23. For Charon in the Western tradition, see R. H. Terpening, *Charon and the Crossing: Ancient, Medieval and Renaissance Transformations of a Myth* (Lewisburg: Bucknell University Press, 1985).
24. Tantalus' misery is vividly described in Seneca's play *Thyestes* (152–175).
25. The Furies also may be called the Eumenides in an attempt to ward off their hostility by a euphemistic appellation, as in the case of Hades.
26. Zeus and the gods may destroy human beings and punish evil in this life, at times in opposition to one another. And the justice of the moral order of the Olympian gods and the Fates is the same as that of the realm of Hades. It is Prometheus who champions the human race as a whole against the antagonism of Zeus, but this is a quite different story.
27. The brilliant, satiric *Dialogues of the Dead* (e.g., nos. 18 and 22) by Lucian also illustrate the varied moods of the Greek and Roman portrayal of the Underworld.
28. For the development of concepts of reward and punishment, see Jeffrey Burton Russell, *A History of Heaven* (Princeton: Princeton University Press, 1997), and, by the same author, *The Devil: Perceptions of Evil from Antiquity to Primitive Christianity* (Ithaca: Cornell University Press, 1977). See also Alice K. Turner, *History of Hell* (Orlando: Harcourt Brace, 1993). Alan E. Bernstein, *The Formation of Hell: Death and Retribution in the Ancient and Early Christian Worlds* (Ithaca: Cornell University Press, 1993), reveals how Christianity in developing its own particular views chose between the two options offered by the Graeco-Roman and Judaic conceptions: all the dead live on with no distinction made between the good and the wicked, or the good are rewarded and the wicked punished. His discussion of "Christ's Descent into Hades" is relevant for its theme of the Harrowing of Hell or The Conquest of Death by both resurrection-god and hero, an archetype with which we have already become *very* familiar.

ORPHEUS AND ORPHISM: MYSTERY RELIGIONS IN ROMAN TIMES

ORPHEUS AND EURYDICE

Ovid tells the story of how Orpheus lost his new bride Eurydice (*Metamorphoses* 10. 1–85; 11. 1–66):

 Hymen, god of marriage, wrapped in his saffron-colored cloak, left the wedding of Iphis and Ianthe and made his way through the vast tracts of air to the shores of the Thracian Cicones; he came at the call of Orpheus, but in vain, for although he was to be sure present at the marriage of Orpheus to Eurydice, he did not smile or bless the pair or give good omens. Even the torch he held kept sputtering with smoke that drew tears and would not burn despite vigorous shaking. The outcome was even more serious than this ominous beginning. For while the new bride was wandering through the grass accompanied by a band of Naiads, she was bitten on the ankle by a serpent and collapsed in death.

After Orpheus, the bard of the Thracian mountains, had wept his fill to the breezes of the upper world, he dared to descend to the Styx by the entrance near Taenarus so that he might rouse even the shades.¹ Past the tenuous multitudes of ghosts beyond the grave, he approached Persephone and her lord, who rule this unlovely realm of shadows, and sang his song as he plucked the strings of his lyre: “O deities of the world below the earth, into which all of us who are mortal return, if it is right and you allow me to utter the truth, laying aside evasion and falsehood, I did not come down to see the realms of Tartarus or to bind the triple neck, bristling with serpents, of the monstrous hound descended from Medusa; the cause of my journey is my wife; she stepped on a snake, and its venom coursing through her veins stole from her the bloom of her years. I wanted to be able to endure, and I admit that I have tried; but Love has conquered. He is a god who is well known in the world above; I suspect that he is famous even here as well (although I do not know for sure); if the story of the abduction of long ago is not a lie, Love also brought you two together.

“By these places full of fear, by this yawning Chaos, and by the silent vastness of this kingdom, reweave I pray the thread of Eurydice’s destiny cut off too soon! We pay everything to you, and after tarrying but a little while, we hasten more slowly or more quickly to this one abode. All of us direct our course here, this is our very last home, and you hold the longest sway over the human race. Eurydice too, when she in her ripe age has gone through the just allotment

Spring: Orpheus and Eurydice. By Eugène Delacroix (1798–1863); oil on canvas, 1836, 78 × 65 $\frac{1}{4}$ in. Eurydice falls as a companion holds her and looks in horror at the snake gliding into the undergrowth at the bottom right corner. Orpheus with his lyre approaches from the left, and another nymph looks on in fear on the right, kneeling like the figure of Eurydice in Poussin's painting of the same subject. This painting, left unfinished at the artist's death, is one of a series of the Four Seasons with mythological subjects (*Summer: Diana and Actaeon; Autumn: Bacchus and Ariadne; Winter: Juno and Aeolus*). (São Paulo, Museu de Arte de São Paulo.)

of her years, will fall under your power; I ask as a gift her return to me. If the Fates refuse this reprieve for my wife, it is sure that I do not wish to return either. Take joy in the death of us both!"

As he made this plea and sang his words to the tune of his lyre, the bloodless spirits wept; Tantalus stopped reaching for the receding waters, the wheel of Ixion stopped in wonder, the vultures ceased tearing at the liver of Tityus, the Danaid descendants of Belus left their urns empty, and you, O Sisyphus, sat on your stone. Then for the first time, the story has it, the cheeks of the Eumenides were moist with tears as they were overcome by his song, and the king who rules these lower regions and his regal wife could not endure his pleas or their refusal. They called Eurydice; she was among the more recent shades and she approached, her step slow because of her wound. Thracian Orpheus took her and with her the command that he not turn back his gaze until he had left the groves of Avernus, or the gift would be revoked.

Through the mute silence, they wrest their steep way, arduous, dark, and thick with black vapors. They were not far from the border of the world above; here frightened that she might not be well and yearning to see her with his own eyes, through love he turned and looked, and with his gaze she slipped away and down. He stretched out his arms, struggling to embrace and be embraced, but unlucky and unhappy he grasped nothing but the limp and yielding breezes. Now as Eurydice was dying for a second time, she did not reproach her husband; for what complaint should she have except that she was loved? She uttered for the very last time a farewell that barely reached his ears and fell back once more to the same place.

At the second death of his wife, Orpheus was stunned. . . . The ferryman kept Orpheus back as he begged in vain, wishing to cross over once again; yet he remained seated on the bank for seven days, unkempt and without food, the gift of Ceres; anxiety, deep grief, and tears were his nourishment as he bewailed the cruelty of the gods of Erebus. He then withdrew to the mountains of Thrace, Rhodope, and windswept Haemus. Three times the Titan sun had rounded out the year with the sign of watery Pisces, and Orpheus the while had fled from love with all women, either because of his previous woe or because he had made a pledge. Many women were seized with passion for union with the bard, and many in anguish were repulsed. He was the originator for the Thracian peoples of turning to the love of young men and of enjoying the brief spring of their youth and plucking its first flowers. . . .

While the Thracian bard was inducing the woods, the rocks, and the hearts of the wild beasts to follow him, Ciconian women, their frenzied breasts clad in animal skins, spied Orpheus from the top of a hill as he was singing to his lyre. One of them, her hair tossing in the light breeze, exclaimed: "Ah look, here is the one who despises us." And she hurled her weapon, wreathed with foliage, straight at the face of Apollo's son as he sang, and it made its mark but did not wound. The weapon of another was a stone, which as it hurtled was overcome in midair by the harmony of voice and lyre and fell prone at his feet like a suppliant apologizing for so furious an assault. But their hostility grew more bold, and restraint was abandoned until the Fury of madness held absolute sway. All weapons would have been softened by his song, but the great clamor, the

Orpheus, Eurydice, and Hermes. Marble relief, Roman copy of a Greek original of the fifth century B.C.; height 46½ in. This panel was originally part of a parapet placed around the Altar of the Twelve Gods in the Agora at Athens. It shows the moment when Orpheus has looked back at Eurydice and they part forever. Hermes Psychopompos has his hand on Eurydice's wrist, ready to lead her back to the Underworld—a poignant contrast with the tender placement of Eurydice's left hand on her husband's shoulder. The names of the figures appear above them, Orpheus' being written right to left. (*Museo Nazionale, Naples. Photograph Corbis-Bettmann.*)

Phrygian flutes with their curved pipes, the drums, the pounding, and the Bacchic shrieks drowned out the sound of his lyre.

Then at the last the stones that could not hear grew red with the blood of the poet. But first the maenads seized the hordes of birds still spellbound by the singer's voice, the serpents, and the throng of beasts, all testimonies to the triumph of his song. And then they turned with bloody hands on Orpheus himself, like birds that throng together if at any time they see the owl of night abroad by day. They made for the bard, just as the stag about to die is prey for the dogs in the morning sand of the amphitheater, and they flung the verdant leafy thyrsus, not made for such deadly purpose. Some hurled clods of earth, others branches ripped from trees, still others stones.

So that weapons might not be wanting for their fury, it happened that oxen were working the earth, yoked to the ploughshare; and nearby sturdy farmers were digging the hard fields with much sweat preparing for the harvest. When they saw the throng, they fled leaving behind the tools with which they worked. Hoes, heavy mattocks, and long rakes lay scattered through the empty fields. The madwomen snatched them up; and after they had torn apart the oxen that threatened with their horns, they rushed back again to mete out the poet's fate. In their sacrilege they destroyed him as he stretched out his hands and spoke then for the first time in vain with a voice that touched no one. And through that mouth, which was heard, god knows, by stones and understood by bestial senses, his soul breathed forth receding on the winds.

For you, O Orpheus, for you the trees let fall their leaves and shorn of foliage made lament. They say too that rivers swelled with their own tears, and the Naiads and Dryads changed their robes to black and wore their hair disheveled. His limbs lie scattered in various places; his head and lyre you got, O river Hebrus; and—O wonder—while they floated in midstream, the lyre made some plaintive lamentation, I know not what; the lifeless tongue murmured laments too, and the banks lamented in reply. And then they left his native Thracian river and were carried out to sea, until they reached Methymna on the island of Lesbos. Here they were washed ashore on foreign sands, and a savage snake made for the mouth and hair soaked with the dripping foam. At last Phoebus Apollo appeared and stopped the serpent as it prepared to make its bite and froze hard its open mouth and gaping jaws, just as they were, in stone.

The shade of Orpheus went down below the earth and recognized all the places he had seen before; he looked amid the fields of the pious and found Eurydice, and clasped her in his eager arms. Here now they walk together side by side, sometimes he follows her as she precedes, sometimes he goes ahead and safely now looks back at his Eurydice.

As Ovid continues the story, we learn that Bacchus was distressed at the loss of the poet who sang his mysteries; he punished the Thracian women by turning them into trees and then abandoned Thrace all together.

The other major classical version of the story of Orpheus and Eurydice is Vergil's.² Most, but not all, of the details are similar, although the poetic timbre is different. According to Vergil, Eurydice stepped on the snake while running away from the unwelcome advances of Aristaeus, son of Apollo and Cyrene.³

Orpheus and Eurydice, by Isamu Noguchi (1904–1988). Scenic model, 1948. In this model for a scene from the ballet *Orpheus*, with choreography by Balanchine and music by Stravinsky, Orpheus charms all the Underworld by his music, so that, according to Noguchi, “glowing rocks, like astral bodies, levitate.” (Photograph by Rudolph Burckhardt. Courtesy of the Isamu Noguchi Foundation, Inc.)

Thus Ovid and Vergil represent the tradition for the tragic love story of Orpheus and Eurydice: a paean to the devotion of lover and beloved, husband and wife. Their eternal myth has been re-created again and again with imagination, beauty, and profundity, whether it be in an opera by Gluck or a movie by Cocteau. Orpheus has become the archetype of the poet and musician, and of the great and universal power of art.

LIFE OF ORPHEUS, RELIGIOUS POET AND MUSICIAN

There is another very important side to Orpheus' character, of which we can only catch glimpses today because of the inadequacy of our evidence. He was considered the founder of a religion, a prophet, who with his priests and disciples committed to writing holy words that provided a bible for dogma, ritual,

and behavior. Variations and inconsistencies in the tradition make it difficult to know this Orpheus and his religion precisely, but the general nature of their character and development can be discerned, despite the frustrating contradictions and obscurities.⁴ Some of the significant "facts" that can be isolated from the diverse accounts are as follows.

Orpheus' home was in Thrace; his mother was one of the Muses, usually said to be Calliope; his father was either Oeagrus, a Thracian river-god, or the great god Apollo, whom he followed. He wooed and won Eurydice, a Dryad, by the charm of his music. When she died, he went to Hades to fetch her but failed. Orpheus was one of the members of Jason's Argonautic expedition.⁵ He had a son or a pupil, Musaeus, who assumed many of the characteristics of Orpheus himself. Among the versions of his death, several prove interesting in the quest for the historical religious teacher. He is said to have been struck down by the thunderbolt of Zeus because in his mysteries he taught things unknown before; he also is said to have died through a conspiracy of his countrymen, who would not accept his teachings.

The common tradition (which both Ovid and Vergil reflect) makes the women of Thrace responsible for his death. But the reasons for their hostility vary: they were angry because he neglected them after the death of Eurydice, or refused to initiate them into his mysteries, or enticed their husbands away from them. Sometimes the women are followers of Dionysus, expressly directed against Orpheus by their god, for Dionysus in his attempts to convert Thrace to his religion met the opposition of Orpheus, a devoted follower of Apollo the sun-god, and sent his maenads to tear the bard to pieces. According to some, the fragments of his body were buried by his mother and sister Muses in Thrace or in the region of Mt. Olympus. His head and lyre were claimed by Lesbos (as already explained by Ovid), where a shrine was erected in his honor. The head became an oracular source, but its prophecies were suppressed by Apollo. A temple of Bacchus was built over the spot where the head was buried.⁶

In these conflicting speculations, a fundamental and puzzling duality is evident. Orpheus is linked in one way or another to both Apollo and Dionysus. Was there a *real* Orpheus, a missionary in Thrace who met his death violently? Did he champion Apollo against Dionysus or Dionysus against Apollo? Did he compromise and adapt the religion of the Oriental Dionysus to that of Hellenic Apollo, taking from both and preaching a message that was new and convincing, at least to some?

However one would like to interpret the evidence, this duality cannot be ignored. The music, magic, and prophecy suggest Apollo, as does the championship of civilization, but Orpheus' sermon of gentleness and peace has none of the violence of the archer-god. On the other hand, Orpheus' music is the antithesis of the clashing din of Bacchus; and the tales of his misogyny could imply a religion that at some period was confined to men, in contrast to the worship of Dionysus with its appeal to women. At the same time, Orphic initiation

and mysteries are by their very nature Dionysiac. Other elements in the legends of both Orpheus and Dionysus are strikingly parallel: Orpheus is torn to pieces like Dionysus himself (at the hands of the Titans), or like Pentheus, who also opposed the god and met destruction at the hands of his maenads. Like Orpheus, Dionysus descended to the Underworld, in his case to fetch his mother, Semele; indeed, a less common variant has Orpheus successful (like Dionysus) in his pursuit of Eurydice.⁷

There is nevertheless a well-established tradition that the historic Orpheus was not a god but a hero who lived, suffered, and died; his tomb was sacred, and he had a cult. He was in this view a prophet, a priest, or, if you like, a saint, whose god was Apollo or Dionysus or both. Such a belief is ultimately subjective; but by the fifth century B.C. he *was* accepted as a human religious teacher,

ORPHEUS—THE IMMORTAL ARTIST

Orpheus exemplifies the universal power of the artist and in particular music and poetry. Art eases care, makes life meaningful and beautiful, and can instruct. Orpheus is also the archetypal religious teacher, illustrating the omnipotence of the word in music. Orpheus suffers and dies the martyr's death of a prophet and a savior. Just as potent are the eternal elements in the romance of Orpheus and Eurydice. Theirs is a moving and tragic love story that, in its endless metamorphoses, never fails to touch the hearts and minds of human beings of all times.

There is a wondrous duality of religion and music in the archetype that illuminates the uplifting and informing spiritual power of his gift. "Indeed, what then is music? Music is a sacred art, which brings together all who have spirit, like cherubim around a radiant throne, and that is why it is the holiest among the arts, sacred music."⁸

The following simple but sublime verses from Shakespeare's *Henry VIII*, Act 3, scene 3, which also sum up the spiritual power of Orpheus, have often been set to music. A beautiful version is that of William Schuman:

*Orpheus with his lute made trees,
And the mountains that freeze
Bow themselves when he did sing.
To his music plants and flowers
Ever sprung, as sun and showers
There had made a lasting spring.*

*Every thing that heard him,
Even the billows of the sea,
Hung their heads and then lay by.
In sweet music is such art,
Killing care and grief of heart.
Fall asleep, or hearing, die.*

whose doctrine was communicated in sacred writings attributed to him and believed to be much earlier in time. Tablets were said to be found in the mountains of Thrace inscribed with his writing, prescribing potent charms, incantations, and spells. In the fourth century, Plato quotes hexameter lines of Orpheus and tells of priests who preached his message of salvation. Later, Orpheus is credited with songs about the gods and the origin of all things. The hymns that have come down to us under Orpheus' name were given their present form in the early centuries of our era;⁹ in fact this corpus of *Orphic Hymns* may have been composed (rather than compiled) in the second or third century A.D. It is of little help for reconstructing early Orphic doctrine.¹⁰

In music, art, and poetry Orpheus has been a source of inspiration for thousands of works. His myths address several of the most profound of human concerns: the power of music over animals and inanimate nature, over human discord, and over death itself; the pain of bereavement and the hope of reunion after the loss of one's beloved.

THE ORPHIC BIBLE

Dominant in the pantheon of Orphism was Dionysus, very often under the name of Zagreus. Although we hear about initiation into mysteries and a ritual life of purity demanded by the Orphics, we do not know their details. The shedding of blood and the eating of flesh seem to have been important prohibitions inspired by a fundamental belief in the transmigration of the soul and the sanctity of all life. It is possible to reconstruct the basic themes of the Orphic theogony, with its myth of Dionysus crucial to the doctrine. Although parallels to the *Theogony* of Hesiod are apparent, there are meaningful differences and variations. The major stages in the Orphic theogony run as follows, although divergent statements in the tradition are many.

The first principle was Chronus (Time), sometimes described as a monstrous serpent having the heads of a bull and a lion with a god's face between; Chronus was accompanied by brooding Adrasteia (Necessity), and from Chronus came Aether, Chaos, and Erebus. In Aether, Chronus fashioned an egg that split in two; and from this appeared the firstborn of all the gods, Phanes, the creator of everything, called by many names, among them Eros.¹¹ He was a bisexual deity, with gleaming golden wings and four eyes, described as possessing the appearance of various animals. Phanes bore a daughter, Night, who became his partner in creation and eventually his successor in power. Night then bore Gaea (Earth) and Uranus (Heaven), and they produced the Titans. Next Cronus succeeded to the rule of Night and subsequently (as in the Hesiodic account) Zeus wrested power from his father, Cronus.

Then Zeus swallowed Phanes, and with him all previous creation (including a special race of human beings of a golden age); Zeus now created everything *anew*, with the help of Night. As second creator, Zeus became the begin-

ning and middle and end of all things. Eventually Zeus mated with Kore (Persephone), and Dionysus was born. This myth of the birth of Dionysus is most potent for the dogma it provides, and we have related it in connection with Dionysus himself (pp. 293–294). Its essential features are that the infant god was dismembered and devoured by the monstrous Titans, who were then struck down in punishment by the thunderbolt of Zeus. From the ashes of the Titans came mortals; thus humans are partly evil and mortal but also partly pure and divine, since the wicked Titans had consumed the god, although not completely. The heart of Dionysus was saved and he was born again.

In this way, the Orphic bible provided the divine authority for belief in an immortal soul; the necessity for keeping this soul pure despite the contamination and degradation of the body; the concept of a kind of original sin; the transmigration of the soul to an afterlife of reward or punishment; and finally, after various stages of purification, an apotheosis, a union with the divine spirit in the realms of the upper aether. The seeds of everything came from Phanes or Zeus; out of the One, all things come to be and into the One they are once again resolved.

Plato's myth of Er and Vergil's vision of the afterlife are, as far as we can tell, strongly influenced by Orphic concepts; a reading of both, translated in Chapter 15, conveys most simply and directly a feeling for the basic tenets of Orphism. The ritual purification and catharsis of the great god Apollo are mingled with the Dionysiac belief in the ultimate immortality of the human soul to provide a discipline and control of the ecstatic passion of his Bacchic mysteries.

Mystery religions have been a persistent theme; their spiritual ethos has been associated with Eros, Rhea, Cybele and Attis, Aphrodite and Adonis, Dionysus, Demeter, and Orpheus. We cannot distinguish with clear precision among the many different mystery religions and philosophies of the ancient world. It is possible, for example, to argue that the mysteries of Demeter, with their emphasis on participation in certain dramatic rites, lacked the spiritual depth of Orphism, with its insistence on the good life as well as mere initiation and ritual. In any comparison or contrast for the greater glory or detriment of one god or goddess and one religion as opposed to another, it must be remembered that we know practically nothing about the Greek and Roman mysteries. In contrast, our knowledge, say, of Christianity, particularly in its full development, is infinitely greater.

The correspondences between Christianity and the other mystery religions of antiquity are perhaps more startling than the differences. Orpheus and Christ share attributes in the early centuries of our era;¹² and of all the ancient deities, Dionysus has most in common with the figure of Christ.

MYSTERY RELIGIONS IN ROMAN TIMES

Indeed, the association of Christ with the vine frequently led to the use of the myths and attributes of Dionysus in early Christian iconography. We discuss in a later chapter (p. 694) the third-century A.D. wall mosaic in the cemetery be-

neath St. Peter's basilica in the Vatican and the fourth-century vault mosaics in the church of Santa Costanza in Rome. (See Color Plate 3.) In both cases, the vine of Dionysus, the symbol of new life after release from the old life, is associated with the Christian resurrection and the words of Jesus in John 15:1, "I am the true vine." In the same cemetery there is a tomb containing both pagan and Christian burials, one of which is a third-century sarcophagus decorated with a relief showing Dionysus finding Ariadne (see p. 502). Whether the occupant of the sarcophagus was Christian or not, the finding of Ariadne as she wakes from sleep, by the god of life renewed, is an allegory of the soul waking from death equally applicable to the Christian doctrine of the resurrection or to pagan beliefs in an afterlife. The mysteries of Dionysus were widely practiced, and the similarities between them and the Christian *mythoi* made the process of *syncretism* inevitable. This term literally means "growing together," and in the context of religion and mythology it describes the harmonizing of different cults and their myths into some sort of unity. You can clearly see this process in our discussion of the worship of Isis later in this chapter.

Mystery religions were widely practiced in the Roman Empire during the first four centuries of the Christian era.¹³ Like Christianity, they gave the individual worshiper hope for a better life in an uncertain world and frequently the expectation of a new life after death. Since mystery religions involved initiation into secret knowledge, our information about them is at best partial and generally inadequate. We can say with certainty that the mysteries involved a sense of belonging to a group and that initiation preceded some sort of revelation, which resulted in a sense of release and joy, with hope for a better future in this life and in the life after death. Often the initiate submitted to the discipline of a rule of life, so that morality and religion were closely associated.

The mysteries of Demeter at Eleusis (discussed at length in Chapter 14) attracted initiates from all classes all over the empire and continued to be practiced down into late antiquity. The sanctuary was destroyed by the Huns in A.D. 395, and the Christians saw to it that it was never rebuilt.

Other Greek mystery cults continued to flourish in the Roman Empire. The mysteries of Cybele and Attis continued to be important throughout the Roman world, but their violent elements, especially the self-mutilation of the Galli (i.e., priests), made the cult less attractive than other cults with central resurrection myths (see pp. 643–644). Shedding the blood of a bull came to be a spectacular feature of the rite of initiation into these mysteries. It was called the *taurobolium*, and the initiate stood in a pit under the bull, so that its blood poured down upon him.¹⁴ This baptism symbolized purification, the washing away of the old life, and resurrection to a new one; and the rebirth was further symbolized by the drinking of milk, the drink of a newborn child, while the ancient musical instruments of Cybele's worship became part of a kind of communion: "I have eaten from the tambourine, I have drunk from the cymbal, I have become a mys-

tic of Attis," are the words of one hymn. Like the Eleusinian mysteries, the mysteries of Cybele ceased to be practiced after the fourth century.

The oldest of the Greek mysteries after those of Demeter were those of the Cabiri, whose cult center was associated with the island of Samothrace and the city of Pergamum. The Cabiri themselves were usually referred to as *theoi megaloi*, the "great gods." Sometimes they were identified with the Dioscuri, Castor and Pollux, and thus offered protection from the dangers of seafaring. The Argonauts were said to have been initiated, and there are innumerable records of actual initiations in the Greek and Roman world right down until the end of the fourth century.¹⁵

Three Eastern mystery religions widely practiced in the Roman Empire were sometimes assimilated to Greek and Roman mythology. From Persia came the mysteries of Mithras (or Mithra), the god of light and truth and righteous champion of good against evil. His myth included a miraculous birth from a rock and the slaying of a bull, from whose blood sprang the fertility of the earth. Mithraism was practiced in underground chapels or *Mithraea*. More than four hundred of these have been found all over the Roman world, wherever Roman soldiers and merchants traveled. Basic to the iconography of a Mithraeum was a *tauroctony*, a scene depicting Mithras, amidst other figures, killing a bull, presumably a ritualistic sacrifice by which the god assured beneficence and rebirth for his initiates.¹⁶ The cult appealed especially to officers, soldiers, and sailors; and only men could be initiated. We do not know the details of the initiation rituals, but we do know that there were seven grades of initiation and that the cult demanded a high level of self-discipline from its initiates. Its ceremonies also involved a communal meal. Mithraism was a major rival to Christianity; and, like the other mystery religions we have mentioned, it continued to be practiced widely until the end of the fourth century.

The second Eastern religion, which was not strictly a mystery religion with the usual elements of secrecy and revelation, was the worship of Atargatis, known to the Romans simply as *Dea Syria*, the Syrian goddess. She was originally an earth-mother, like Cybele and Demeter, whose cult was spread through the Roman world, especially by soldiers. Shrines have been found at Rome itself and as far away as Hadrian's Wall, which the Romans built in northern England. Her consort was variously called Tammuz or Dushara, but her sacred marriage to the Semitic god of the thunder, Hadad, led to her association with the other sky-gods, the Syrian Baal, the Greek Zeus, and the Roman Jupiter. She was worshiped in wild rituals with self-flagellation by ecstatic priests.¹⁷ Amongst Romans her consort was usually called Jupiter Dolichenus, who was portrayed holding an axe and a thunderbolt and standing upon the back of a bull.¹⁸

The third Eastern mystery religion is the worship of the Egyptian goddess Isis, and we have a full account of an initiate's conversion. Like Demeter and Cybele, Isis was a goddess of fertility, bringer of new life and hope. Her myth involved a search, in this case for her husband and brother, Osiris (dismembered by the evil power, Seth),¹⁹ and for a child, Horus (also known as Harpocrates).

Her attributes included a musical instrument (the *sistrum*, a kind of rattle), a breast-shaped container (the *situla*) for milk, and a jug for the holy water of the Nile. Her cult was associated with the god Serapis, whose origin is quite obscure; temples to Isis and Serapis are found all over the Roman world. Isis herself, however, as mother and nurturer, appealed to multitudes of men and women, who found in her a less terrible presence than that of Cybele or the Syrian goddess. Lucius, the hero of Apuleius' novel *Metamorphoses* (or *The Golden Ass*), appealed to her for help in becoming a human being again and shedding his form as a donkey. She appeared to him in a dream and instructed him to take the garland of roses from the hand of a priest, who would be taking part in the procession in her honor the next day. When Lucius did this, he resumed his human form, and the miracle was greeted with the praise of the crowd (*Metamorphoses* 11.16):

The august divinity of the all-powerful goddess today has restored this man to human form. Fortunate indeed and thrice blessed is he who has deserved such glorious protection from heaven because of the innocence of his earlier life and faith.

When Isis first appeared to Lucius in answer to his prayer, she described herself in terms that perfectly illustrate the meaning of syncretism, expressed with a power and enthusiasm that even translation cannot totally obliterate (*Metamorphoses* 11. 5):

Behold, Lucius, I have come, moved by your prayers. I am the mother of things in nature, the mistress of all the elements, the firstborn of the ages, the sum of the divine powers, queen of the souls of the dead, first of the heavenly powers, the single form of the gods and goddesses, who by my nod control the bright heights of heaven, the health-bringing winds of the sea, the grievous silence of the gods of the Underworld. My name, one with many forms, varied rituals, and many names, is revered by the whole world. Thus the firstborn Phrygians call me Pessinuntia, the Mother of the Gods; the autochthonous people of Attica call me Cecropian Minerva; the Cyprians, tossed by the waves, call me Paphian Venus; the archer Cretans call me Dictynna Diana; the Sicilians of three languages call me Stygian Proserpina; the Eleusinians the ancient goddess Ceres; some call me Juno, others Bellona, some Hecate, others Rhamnusia [i.e., Nemesis]; the . . . Ethiopians . . . and the . . . Egyptians, who worship me with proper ceremonies, call me by my true name, Queen Isis.

Cybele, Athena, Aphrodite, Artemis, Demeter, Persephone, Hera—the ancient Queens of Heaven and Earth—are here, through the process of syncretism, included in the great Egyptian goddess, Isis. Apuleius, whose evidence is almost certainly reliable, shows us how in the second century (he was born about A.D. 120) the figures of Greek and Roman mythology had given way to the idea of a single divine power. Her devotees experienced a sense of liberation, of hope and joy. Lucius (through whom Apuleius is evidently describing his own expe-

rience) was initiated three times into the mysteries of Isis and Serapis; his life was consecrated to Isis. In this experience we can see how the mythology of the gods of the Greek city-state became incorporated in the mysteries that brought hope of salvation to the individual worshiper. The power of that experience is revealed in Lucius' description, with which we end our survey of the mystery religions (*Metamorphoses* 11. 23):

 Perhaps you may ask, studious reader, what then was said, what was done. I would tell you, if it were lawful to speak; and you would know, if it were lawful to hear. . . . I do not wish to torture you . . . with the pain of long suspense. Therefore hear, but believe, because these things are true. I approached the boundaries of death; I trod the entrance of Proserpina and, carried through all the elements, I returned. At midnight I saw the sun shining with brilliant light, I came into the presence of the gods below and the gods above, and close by I worshiped them. Behold, I have told you that about which, although you have heard, you must remain ignorant.

NOTES

1. One of the many places identified as an entrance to the Underworld was a cave near Taenarus, a town in Laconia.
2. *Georgics* 4. 452–526.
3. Aristaeus, the son of Apollo and Cyrene, is the traditional hero or deity of rustic pursuits, especially beekeeping. When Eurydice died, her sister Dryads in their grief and anger caused all the bees of Aristaeus to die. Perplexed at this, he eventually consulted the wise old man of the sea, Proteus. Aristaeus appeased the nymphs and a new swarm of bees was created. Through the role of Aristaeus, Vergil artfully introduces the touching account of Orpheus and Eurydice in the last book of his didactic poem on farming.
4. An important survey offers the general reader a scholarly examination of the whole question: W. K. C. Guthrie, *Orpheus and Greek Religion: A Study of the Orphic Movement* (New York: Norton, 1966).
5. He does not seem really to belong, but the gentle bard was placed among the brawny heroes because of his prestige and the magical powers of his song, which saved them all in more than one crisis; Orpheus appropriately was the leader in religious matters. The chronology also seems wrong for our historical Orpheus, if we must put him back in the heroic age in the generation before the Trojan War.
6. The chronological tradition for Orpheus is equally muddled. Those who connect his dates with Homer's deserve the most credibility. Thus either he was the inventor of writing and his works immediately preceded the Homeric epics, or Homer was the first poet and Orpheus followed shortly after.
7. This link with Dionysus may mean that Orpheus is yet another god (however faded) of the death and rebirth of vegetation; Eurydice, too, has some of the chthonian characteristics of Semele and Persephone. These parallels could likewise have been added to the legend that grew up about a historical prophet. Some of the themes also look

- like motifs common to folktale: conjugal devotion, the journey to Hades' realm, the taboo of looking back.
8. The words of the Composer, yet another Orpheus (*Musik ist eine heilige Kunst . . .*), in the opera *Ariadne auf Naxos*, by Richard Strauss and Hugo von Hofmannsthal, which epitomizes the profundity of Orpheus' art in one of the most beautiful of all musical motifs.
 9. The date and authorship of these hymns are not securely established; perhaps at least some of them are earlier. See Apostolos N. Athanassakis, *The Orphic Hymns*, text, translation, and notes (Atlanta: Scholars Press, 1977); Athanassakis (pp. viii–ix) inclines to accept the theories of Otto Kern that the hymns belong to the city of Pergamum for use in the celebration of the mysteries of Dionysus, third century A.D.
 10. An attractive thesis claims that the religion attributed to the legendary musician was formulated in large part by philosophers in southern Italy and Sicily (although not necessarily confined to this region) in the sixth century B.C. Thus we can explain the elements identified as Orphic in the philosophy of Empedocles and in the religious sect of Pythagoras and thereby account for the Orphic–Pythagorean thought transmitted by Plato.
 11. See Aristophanes' parody translated on p. 53.
 12. For the archetypal Orpheus and subsequent motifs, including that of the Good Shepherd, see John Block Friedman, *Orpheus in the Middle Ages* (Cambridge: Harvard University Press, 1970).
 13. The Roman emperor Augustus himself was initiated, while Nero, according to his biographer Suetonius, did not dare to become a candidate because of his guilty conscience. In the third century, Gallienus (253–268) commemorated his initiation by issuing a coin with his name and title in the feminine gender (*Galliena Augusta*) in honor of the goddess.
 14. The *taurobolium* is described in detail by the fourth-century Christian poet Prudentius in the tenth of his hymns about martyrs, *Peri Stephanon (On Crowns)*. The most vivid details are translated in John Ferguson, *Religions of the Roman Empire* (Ithaca: Cornell University Press, 1970), pp. 104–105. The *taurobolium*, which is recorded in many inscriptions, the first being in A.D. 105, was practiced by initiates of Mithraism and even of Demeter; for a description by Frazer in connection with the worship of Attis, see p. 180.
 15. See Susan Cole, *Theoi Megaloi: The Cult of the Great Gods of Samothrace* (Leiden: Brill, 1984).
 16. This interpretation, advocated by Franz Cumont, *The Mysteries of Mithra* (New York: Dover, 1956 [1903]), has been challenged; David Ulansey, *The Origins of the Mithraic Mysteries* (New York: Oxford University Press, 1989), follows those scholars who believe the tauroctony represents a series of stars and constellations, and in this kind of star map, the figure of Mithras is to be equated with the Greek and Roman Perseus.
 17. Vividly described by Apuleius, *Metamorphoses* 8. 27–29.
 18. To this Jupiter the Romans assimilated the dedications of the great temples of Baal at Baalbek (in modern Lebanon), usually referred to as the temple of Jupiter, and of Bel at Palmyra.
 19. See R. E. Witt, *Isis in the Greek and Roman World* (Ithaca: Cornell University Press, 1971; Baltimore: Johns Hopkins University Press, 1997). For Io, who came to be worshiped as Isis, see pp. 91–93 and 516–517.

PART TWO

The Greek Sagas
GREEK LOCAL LEGENDS

Universal themes are persistent in the myths of Greek gods, who present archetypal images of fundamental human traits—the passions, psychology, and mores of mortal men and women writ large—and basic familial relationships, social ties, and political aspirations. Variations of these recurring themes are equally prominent in saga (or legend) and folktale. These classes of myth have been discussed in the Chapter 1 (pp. 3–15), and saga will be the principal focus of the chapters in this part. Although saga has a relationship (however tenuous) to history, it often includes elements of folktale that are common to other legends, and its heroes are descended from gods and often associate with divine beings. A defining feature of saga is the focus upon the deeds of one or more heroes.

THE HERO AND HEROINE IN SAGA AND FOLKTALE

We have seen (pp. 13–14) how the Russian scholar Vladimir Propp has shown how one particular kind of folktale (the Quest) has a universal structure, in which the elements always appear in the same sequence. In Greek saga, as in folktales, we find many recurring motifs, though not always as predictably as in Propp's structural theory. Ten motifs frequently appear: (1) The hero usually has elements of the extraordinary linked to his birth and his childhood. (2) He inevitably faces opposition of one sort or another from the beginning, and as a result he must prove his inherent worth by surmounting challenges of every kind. (3) His enemy or enemies usually instigate his achievement, and (4) he is helped by at least one ally, divine or human. (5) He faces apparently insuperable obstacles, often labors that must be accomplished or a quest that must be completed. (6) Adventurous conflicts with divine, human, or monstrous opponents present him with physical, sexual, and spiritual challenges. (7) He may also have to observe taboos—he must not, for example, look back, eat of a forbidden fruit, or be too inquisitive. (8) Death itself is the ultimate conquest, usually achieved by going to and returning from the Underworld. (9) The hero's success may be rewarded with marriage, political security, or wealth and power. (10) But knowledge through suffering and more lasting spiritual enlightenment (literal or symbolic)—entailing purification, rebirth, redemption, and even deification—are also part of a hero's attainment. These and other motifs recur with seemingly infinite variation, and they will continue to do so as long as human nature remains the same. Refined by artistic experience, they delight and inform, while they touch the very depths of the human spirit.

Propp's analysis of structure is very helpful for the scientific mythographer interested in structural analysis and similarities in the patterns of comparative mythology. It can be very misleading, however, for those whose delight is in the study of the subtle differences in the manipulation of motifs and the diverse

characterization of heroes in all periods of mythological creation. The quests of Perseus, Odysseus, and Aeneas, to name only three, are to some degree alike, but they are all the more fascinating because of their differences. Achilles and Ajax represent two very different personalities in their response to the thematic code of heroic *arete* ("excellence"). Hector and Paris are not simple reflections of the pattern of brotherly opposites; instead, emotionally and psychologically they are worlds apart, and their feelings about war, life and death, and love and marriage may be most intricately juxtaposed. The rich and illuminating examples of complexity and profundity in heroic portraits make up the substance of our text.

Some heroes do not always act as heroes and reveal their feet of clay, and all heroes, to be sure, do not live happily ever after; a few of them are even undone by the heroines with whom they are associated. Witness the life and humiliating demise of Jason and the death of Heracles, both excruciating and glorious at one and the same time; Theseus too suffers a miserable end as a dishonored exile.

Heroines also provide motifs that are just as intriguing and varied as those of the heroes. They usually are of royal or divine stature, are possessed of extraordinary beauty, wield great power, and become the mothers of heroes. Like Propp in his analysis of the hero, Burkert (as we have seen, pp. 14–15) reduces the diverse lives of heroines into a clear sequence of five functions: (1) The girl leaves home. (2) The girl is secluded (beside a river, in a tower, in a forest, etc.). (3) She is made pregnant by a god. (4) She suffers punishment or rejection or a similar unpleasant consequence. (5) She is rescued, and her son is born. Yet, just as in the case of heroes, the lives of heroines reveal astonishing variety and complexity, which are not easy to summarize.

As the lover or the wife of a hero, a heroine can perform great feats because of passionate devotion. Ariadne helps Theseus kill the Minotaur, and without Medea, Jason never could have won the golden fleece. When heroines are abandoned or betrayed, they can be driven by despair and hatred to wreak a terrifying revenge or, like Ariadne, find salvation. Heroes can be destroyed by heroines through cleverness or guile, for example, the murder of Agamemnon by Clytemnestra or the ruin of Jason by Medea.

Helen of Troy, alluring in her multifaceted nature, has become an archetypal image. Antigone, devoted daughter and loving sister, by contrast presents for all time brave and righteous defiance against tyranny. Penelope as wife and mother offers us a paradigm of intelligence, integrity, and loyalty, her *arete* a match and a foil for that of her husband Odysseus. Then there are the Amazons, every bit like men in their *arete*, heroes and not heroines with respect to their prowess and courage in war.

THE MYCENAEAN WORLD AND GREEK SAGA

The cycles of Greek saga are for the most part connected with cities and areas that were important in the later Bronze Age—that is, from about 1600 to 1100 B.C.

The richest of these cities, Mycenae, gave its name to the period, and it was the king of Mycenae who led the Greeks on the greatest of their expeditions, the war against Troy. There are three major geographical groups in the cycles of saga: first, cities of the Peloponnese—Mycenae, Tiryns, Argos, and Sparta and the rural area of Arcadia; second, cities of the rest of the Greek mainland and their surrounding areas—Athens in Attica, Thebes and Orchomenus in Boeotia, and Iolcus in Thessaly; third, Troy in Asia Minor, whose relations with the Mycenaean cities may have been extensive. Beyond these groups are legends connected with Crete, whose Minoan civilization preceded Mycenae as the dominant power in the Aegean world, before its collapse at the end of the fifteenth century B.C. Finally, the story of Odysseus, although based in the Mycenaean world, extends far beyond it and incorporates many folktales.

There is a historical dimension to Greek saga that archaeological discoveries have confirmed. It is important therefore to keep in mind our review of the historical background given in Chapter 2 (pp. 39–50). Many Minoan and Mycenaean sites that can be linked to the legends of the Greek and Roman heroes and heroines have been and are being excavated: Cnossus, Troy, Mycenae, Tiryns, Pylos, Thebes, and Athens, to name some of the more important. How to distinguish historical fact from romantic fiction affords endless and exciting debate.

The sequence of these chapters from Greek saga is quite deliberate. We begin with Thebes and Oedipus because the treatment by Sophocles is so uniquely religious that it should follow closely upon a study of the gods. The spiritual intensity of *Oedipus at Colonus*, for example, provides concrete and sublime evidence for how the Greeks could actually use their myths for moral edification, and Sophocles makes us understand more clearly how they might have actually believed them, whether as reality or metaphor. Following this premise, Mycenaean legend comes next, which leads directly into the events of the Trojan War. We know that a different order, along legendary, chronological lines, may seem more logical. The chapters, however, are designed so that they can be read with profit in any order that one wishes.

THE THEBAN SAGA

THE FOUNDING OF THEBES

The historical Thebes was the leading city of Boeotia, the plainland area of central Greece, ringed by the mountain ranges of Parnes, Cithaeron, Helicon, and Parnassus and bounded on the east by the Straits of Euboea. Thebes was situated on the low ridge that separates the two chief plains of Boeotia; its citadel was called the Cadmeia, preserving the name of Cadmus, legendary founder of the city. Cadmus was son of Agenor, king of Tyre, and brother of Europa. Agenor sent him to find Europa, whose abduction from Tyre is one of several myths in which a woman was taken against her will from Asia to Europe or vice versa. Herodotus narrates these legends at the beginning of his *History* in order to underline the difference between mythology and history. In these myths the opposition of the Greek and Asiatic worlds, which came to a historical climax in the Persian Wars of 494–479 B.C., began when Phoenician traders kidnapped the Argive princess Io and took her to Egypt. The Greeks (whom Herodotus calls “Cretans”) in return seized the Phoenician princess Europa and took her to Crete. The pattern was then reversed: the Greeks took Medea from Colchis and in return the Trojan Alexander (Paris) took Helen from Sparta. Herodotus explained that the Persians, reasoning from these myths, believed that Europe and Asia were permanently divided and hostile. As a historian he was skeptical about these tales, for he could not vouch for their truth, whereas he could report things of which he had knowledge: “About these things I am not going to come and say that they happened in this way or in another, but the man who I myself know was the beginner of unjust works against the Greeks, this man I will point out and advance with my story . . .” (1.5). So for the Greek historian of the Persian Wars the distinction between myth and history was evident.

EUROPA

The story of Europa is the first in which the Asiatic figure makes her way to the Greek world. In the usual version of the myth (which is different from the skeptical account of Herodotus) Zeus, disguised as a bull, took her to Crete. Here is

The Rape of Europa. Limestone metope from Selinus, ca. 540 B.C.; height 58 in. Europa rides over the sea, represented by the dolphins, upon the bull, which looks frontally at the viewer. The formality and restraint of the relief contrast with the swirling motion of Titian's painting. (Museo Nazionale, Palermo. Photograph courtesy of Hirmer Verlag, München.)

Ovid's description of the abduction (*Metamorphoses* 2. 846–3. 2), which should be compared with the nearby illustrations.

 Majesty and love are not well joined, nor do they sit well together. Abandoning the dignity of his royal office, the father and ruler of the gods took on the appearance of a bull, and as a beautiful animal shambled over the tender grass.

Agenor's daughter [Europa] wondered at the bull's beauty, amazed that he did not threaten to attack, yet, gentle as he seemed, she at first was afraid to touch him. After a while she came up close and offered flowers to his white face. The young princess even dared to sit upon the bull's back. Then the god little by little began to take his deceptive steps further from the dry land into the sea, then he went further and carried his prey across the central waters of the sea. At length he laid aside the disguise of the deceiving bull and revealed who he was and reached the shores of Crete.

In Crete Europa became the mother of Minos by Zeus.

The Rape of Europa, by Titian (ca. 1488–1576). Oil on canvas, 1559–1562; 73 × 81 in. Titian relies upon Ovid's narratives (*Fasti* 5. 605–614 and *Metamorphoses* 2. 843–875). As in the Selinus metope, dolphins swim near the bull (one in the right foreground and one supporting a cupid), and Europa grasps the bull's horn. Her windblown drapery and desperate gestures, and the cupids flying through the air, impart an air of agitated movement in keeping with the mixed emotions, fear and anticipation, of the principal figures. In the distant background Europa's companions vainly call her back to the shore. (*Isabella Stewart Gardner Museum, Boston. Reproduced by permission.*)

CADMUS, FOUNDER OF THEBES

Meanwhile Cadmus, Europa's brother, set out to find her and came to Delphi, where he asked the oracle for advice. Apollo told him not to worry about Europa any more but to follow a certain cow until she lay down out of weariness and there to found a city. Cadmus found the cow in Phocis (the district of Greece in which Delphi is situated), and she led him to Boeotia, where he founded his city, Cadmeia, later called Thebes. As for the divinely sent cow, it was Cadmus' duty to sacrifice her; to perform the ceremony, he needed water, which he sent his companions to draw from the nearby spring sacred to Ares. A serpent, a child of Ares, guarded the spring; it killed most of Cadmus' men, and in return was itself killed by Cadmus. Ovid relates that Cadmus then heard a voice saying: "Why, son of Agenor, do you look at the dead serpent? You too will be looked at as a serpent." Thus the final episode in the life of Cadmus was prophesied.

Athena, to whom Cadmus had been sacrificing the cow, now advised Cadmus to take the serpent's teeth and sow them; from the ground sprang up armed men, who fought and killed each other until only five were left. From these five survivors, who were called Spartoi (i.e., "sown men"), descended the noble families of Thebes.

Euripides recounts Cadmus' achievement as follows (*Phoenissae* [*The Phoenician Women*] 639–675):

 Tyrian Cadmus came to this land where the cow fell down on all fours, providing irrevocable fulfillment of the oracle by which god had ordained that he was to make his home amid the fertile plains—here where the beautiful stream of Dirce waters the rich and green fields. In this place the bloodthirsty serpent of Ares kept his savage guard over the freshly flowing waters, looking far and wide with his swiftly darting glances. Cadmus came for sacrificial water and destroyed him, wielding a stone by the might of his arm and showering deadly blows upon the monster's head. At the bidding of Pallas Athena he sowed its teeth in the bountiful ground; and in their place Earth sent up onto its surface the spectacle of armored men. Iron-willed Slaughter sent them back to Mother Earth; and she who had presented them to the bright breezes of the upper air was steeped in their blood.

Now Cadmus had to appease Ares for the death of the serpent; he therefore became his slave for a year (which was the equivalent of eight of our years). At the end of this time he was freed and given Harmonia, daughter of Ares and Aphrodite, as his wife. The marriage was celebrated on the Cadmeia, and all the gods came as guests. Among the gifts for the bride were a robe and a necklace from her husband; the necklace was made by Hephaestus and given by him to Cadmus; it came to play an important part in the Theban saga. Cadmus and Harmonia had four daughters—Ino, Semele, Autonoe, and Agave—whose stories, with those of their husbands and sons, are told in Chapters 10 and 13.

1. Cadmus	6. Laius
2. Pentheus	7. Oedipus (regency of Creon)
3. Labdacus	8. Eteocles
4. Lycus	9. Creon
5. Zethus and Amphion	10. Laodamas

Figure 17.1. The Kings of Thebes

Despite the misfortunes of their daughters, Cadmus and Harmonia reigned a long time, civilizing their people and introducing knowledge of writing. Eventually they went away to northwest Greece, where Cadmus became king of the Illyrians; at the end of their lives, they both were turned into great harmless serpents (according to Euripides and Ovid; Apollodorus says that Zeus sent them to Elysium). They were worshiped by their descendants, and their departure from Cadmeia was not the outcome of any misdeed or grief, but a symbol of their change from mortal to heroic or divine status.

THE FAMILIES OF LABDACUS AND LYCUS

LYCUS AND ANTIOPE

Cadmus' successor as king was his grandson Pentheus, son of Agave, whose misfortunes are dealt with in Chapter 13. After his death, a new dynasty was founded by Labdacus, possibly a grandson of Cadmus. He is said to have perished while pursuing the same policy as Pentheus, leaving as his successor an infant son, Laius. Lycus, a great-great-uncle of Laius, first assumed the regency and then made himself king, reigning for twenty years. He was the son of Chthonius, one of the five Spartoi, and his family has an important legend. His brother's daughter Antiope was loved by Zeus; while she was pregnant, she fled to Sicyon (a city in the northern Peloponnese) to escape from the anger of her father, Nycteus. In despair Nycteus killed himself, and his brother (Lycus) then attacked Sicyon and recovered Antiope.

Somewhere in Boeotia, Antiope gave birth to twin sons, who were left to die. A shepherd found them and named them Amphion and Zethus. Zethus became a skilled herdsman, Amphion a musician, playing on a lyre given him by the god Hermes. Many years later, Amphion and Zethus met and recognized their mother, who had escaped from the imprisonment in which she was kept by Lycus and his wife, Dirce. They avenged Antiope by killing Lycus and tying Dirce to the horns of a bull that dragged her to her death. From her blood sprang the fountain at Thebes that is called by her name.

Amphion and Zethus now became rulers of Cadmeia and drove Laius into

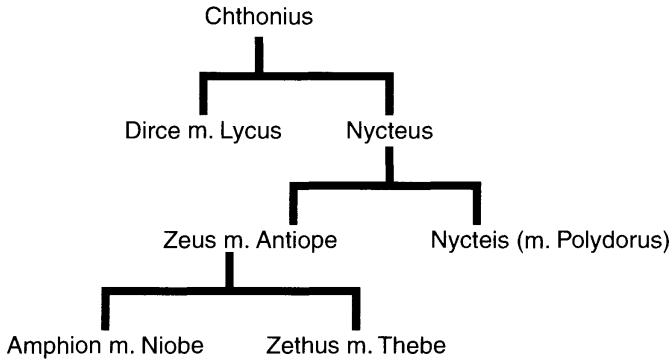

Figure 17.2. The Descendants of Chthonius

exile. They built walls for the city, whose stones were moved into place by the music of Amphion's lyre. Amphion married Niobe (whose story is told on p. 203), and Zethus married Thebe, in whose honor the newly walled city was renamed Thebes.

The story of the family of Lycus repeats motifs from the story of Cadmus. The walling of Cadmeia and its renaming is a doublet of the founding of the city by Cadmus, and just as Cadmus and Harmonia civilized their people, so Amphion's music demonstrated the power of harmony and beauty over the disunited and inanimate stones.

LAIUS

After a reign of many years Amphion and Zethus died, and Laius returned from exile and resumed the kingship of which he had been deprived as an infant. In exile, he had been hospitably received by Pelops, king of Elis. The ties of guest and host were among the most sacred of human relationships, and Laius brought upon himself and his descendants a curse by abducting Chrysippus, the son of Pelops, with whom he had fallen in love. Apollo foretold the working out of the curse in the first generation when Laius (now king of Thebes) consulted the Delphic oracle about the children who should be born to him and his wife, Jocasta. This is the reply of the oracle (Sophocles, Argument to *Oedipus Tyrannus*):

I will give you a son, but you are destined to die at his hands. This is the decision of Zeus, in answer to the bitter curses of Pelops, whose son you abducted; all this did Pelops call down upon you.

OEDIPUS, SON OF LAIUS AND JOCASTA

When a son was born, Laius attempted to avoid the fate foretold by the oracle by ordering the infant to be exposed upon Mt. Cithaeron, with a spike driven

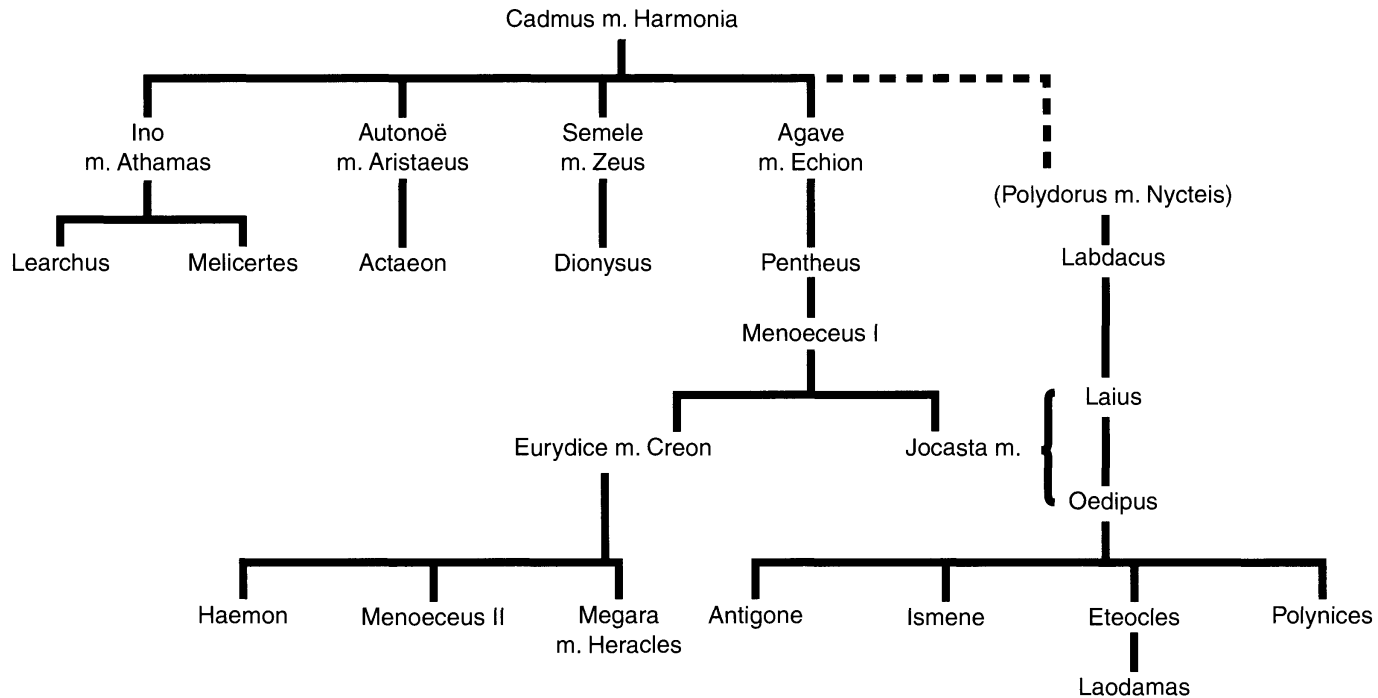

Figure 17.3. The Dynasties of Thebes

through his ankles. The servant entrusted with the task pitied the baby, and instead gave him to a Corinthian shepherd (for the Theban and Corinthian summer pastures were adjacent on Cithaeron). The shepherd in turn brought the infant to his master, Polybus, king of Corinth. The child was brought up as the son of Polybus and his queen, Merope, and was called Oedipus (which means “swellfoot”) from the injury to his ankles.

Years later, a drunken companion jeered at Oedipus during a feast at Corinth and said that he was not Polybus’ natural son. In alarm and shame at the taunt (which soon spread through the city), Oedipus left Corinth to ask the oracle at Delphi who his parents were. The oracle warned him in reply to avoid his homeland, since he must murder his father and marry his mother. So he determined not to return to Corinth and took the road from Delphi that led to Thebes. What happened then, Oedipus himself relates to Jocasta (Sophocles, *Oedipus Tyrannus* 800–813):

☞ As I came on my journey to this junction of three roads, a herald and a man (like him whom you described) riding in a horse-drawn chariot blocked my way; they violently drove me off the road. In anger I struck the driver, who was pushing me aside; and when the old man saw me passing by him, he took aim at the

Oedipus and the Sphinx. Interior of Attic red-figure cup by the Oedipus painter, ca. 470 B.C. Oedipus, dressed as a traveler, ponders the riddle of the Sphinx, who sits on an Ionic column. The Sphinx is winged, with a woman’s head and a lion’s body and tail. (Vatican Museums.)

middle of my head and struck me with the two-pronged goad. But he paid for this with interest; struck promptly by the staff in this hand of mine, he quickly tumbled out of the chariot. I killed them all.¹

The old man, whom Oedipus did not recognize, was Laius. The curse of Pelops was being fulfilled.

OEDIPUS AND THE SPHINX

So Oedipus came to Thebes, a city in distress; not only was the king dead, but also the city was plagued by a monster sent by Hera, called Sphinx (which means “strangler”). This creature had the face of a woman, the body of a lion, and the wings of a bird. It had learned a riddle from the Muses, which it asked the Thebans. Those who could not answer the riddle, it ate; and it was prophesied that Thebes would be free of the Sphinx only when the riddle was answered. The riddle was: “What is it that has one name that is four-footed, two-footed, and three-footed?”² No Theban had been able to find the answer; and in despair, the regent Creon (son of Menoecus and brother of Jocasta) offered both the throne and his sister as wife to anyone who could do so. Oedipus succeeded. “Man,” said he, “is the answer: for as an infant he goes upon four feet; in his prime upon two; and in old age he takes a stick as a third foot.” And so the Sphinx threw itself off the Theban acropolis; Oedipus became king of Thebes and husband of the widowed queen, his mother.

THE RECOGNITION OF OEDIPUS

Thus the prophecy of Apollo was fulfilled; what remained was for the truth to be discovered. There are three versions, two Homeric and one Sophoclean, of Oedipus’ fate. According to Homer, Epicasta (Homer’s name for Jocasta) married her own son “and the gods speedily made it known to mortals. Unhappily he reigned on at Thebes, but she went down to the house of Hades, fastening a noose to the roof of the lofty hall” (*Odyssey* 11. 271). In the *Iliad*, Oedipus is spoken of as having fallen in battle. In this version, another wife is the mother of the children of Oedipus.

The most widely accepted story, however, is the later version, that of Sophocles. Oedipus and Jocasta lived happily together, and she bore him two sons, Polynices and Eteocles, and two daughters, Antigone and Ismene. After many years, a plague afflicted Thebes, and the oracle of Apollo advised the Thebans that it was the result of a pollution on their state, for the murderer of Laius was in their midst. At this point, Polybus died, and the messenger who brought the news also brought the invitation to Oedipus from the people of Corinth to become their king. Oedipus, still thinking that Merope was his mother, refused to return to Corinth; but the messenger—who was the same shepherd to whom the infant exposed on Cithaeron had been given—tried to reassure him by telling him that he was not in fact the son of Merope and Polybus. Oedipus then sent

for the servant to whom Laius had given his infant son to be exposed on Mt. Cithaeron. This man was also the sole survivor of the incident in which Laius died. Now the truth came out. This is how Sophocles describes the moment of Oedipus' discovery. He is questioning the servant (who already knows the truth) in the presence of the messenger (*Oedipus Tyrannus* 1164–1185):

 OEDIPUS: Which of these citizens [gave you the baby] and from what house [did it come]?

SERVANT: Do not, I beg you by the gods, master, do not question me any more.

OEDIPUS: You will be killed if I have to ask you this question again.

SERVANT: Well, it was one of the children of Laius.

OEDIPUS: A slave? Or one of his own children?

SERVANT: Alas! I am on the point of revealing a terrible secret!

OEDIPUS: And I of hearing it. Yet hear it I must.

SERVANT: Well, it was called the son of Laius. The woman inside the palace best would tell—your wife—the facts.

OEDIPUS: So she it was who gave you the baby?

SERVANT: Yes, my lord.

OEDIPUS: For what purpose?

SERVANT: That I might kill him.

OEDIPUS: Was she his mother, unhappy woman?

SERVANT: Yes, and she was afraid of the harm that had been foretold by the oracle.

OEDIPUS: And what was that?

SERVANT: The prophecy was that he would kill his parents.

OEDIPUS: How then did you give him up to this old man, how did *you*?

SERVANT: I was sorry for him, master, and I thought this man would carry him to another country, from which he came himself. But he saved him for evils much worse. For if *you* are the person this man says you are, then, I tell you, you were born to a wretched destiny.

OEDIPUS: Alas! Alas! All is revealed! O light, may this be the last time I look upon you, I who have been shown to be born from those from whom I should not have been born, to be living with those with whom I should not live, and to have killed those whom I should not have killed!

 *Oedipus and the Sphinx*. By Gustave Moreau (1826–1898); oil on canvas, 1864, 81¹/₄ × 41¹/₄ in. The sphinx clutches Oedipus, ready to tear him in pieces (like his predecessors whose remains lie in the foreground), while Oedipus gazes at her intensely. Like Ingres (*Oedipus and the Sphinx*, 1808), Moreau sets the scene in the mountains outside Thebes (faintly seen in the background of both paintings), but he paints the whole of the monster's body and includes a column with a serpent, topped by an ancient vase with griffins' heads, copied from an engraving by Piranesi. The close physical contact of man and monster heightens the intensity of Oedipus' encounter. This was Moreau's best-known work, and it drew the attention of critics (favorable and unfavorable) and cartoonists (Daumier's caption read in part: "A bare-shouldered cat with the head of a woman, so that's called a sphinx?"). (*New York, Metropolitan Museum of Art.*)

The horror of Oedipus' predicament is powerfully expressed in the stark dialogue, and it is no wonder that Sophocles' version of the myth has swept aside all other versions.³ While Oedipus was questioning the servant, Jocasta, who already knew the truth, had gone into the palace and hanged herself. Oedipus rushed into the palace and, when he saw her corpse, blinded himself with the brooches from her robe. Creon became regent again, and Oedipus was banished, in accordance with a curse he himself earlier pronounced on the (as yet unknown) killer of Laius and in obedience to an oracle of Apollo.

THE END OF THE *OEDIPUS TYRANNUS*

Modern readers and viewers of Sophocles' tragedy are likely to find the 234 lines (15 percent of the whole) that are spoken after the entry of the blind Oedipus an anti-climax after the discovery of his identity. This would be a mistake. Oedipus establishes the true measure of his heroic stature in his lament and dialogue with the Chorus and with Creon. The central themes of the tragedy are the relationship of the human to the divine and, as a consequence, the way in which human beings react to or control events brought about by the divine will. The audience knows the end result of Oedipus' search for the killer before he begins the process of discovery. Part of the suspense lies in our not knowing how he will react to the discovery. His self-blinding cannot be the end of the story: Sophocles shows how this act begins the next part of the hero's life, in which he proves his worth as a human being, accepting the will of the gods while still asserting his own dignity and independence. Thus he cries out to the Chorus (1329–1335):

 Apollo it was, Apollo, who brought to fruition these my evil sufferings. No one struck [my eyes] but I in my misery. Why should I need to see, when there is nothing sweet for me to see?

Oedipus recognizes the power of the god and the impossibility of avoiding the divine will. Yet he also recognizes his own responsibility—he is the one who committed the crimes against the divine law, and he is the one who blinded himself. He is also the one who now, even in his miserable state, gives instructions to Creon (1446: “These are my orders to you . . .”) for the burial of Jocasta, for his own exile from Thebes (where, he commands, he is not to be buried), and for the reunion with his daughters, Antigone and Ismene, who in the last lines of the play are taken from him as he is led back into the palace.

How noble the interpretation of Sophocles is can be seen if we look back to the lines in the tragedy where Jocasta dismisses the prophecies of Apollo, thinking that the details of the killing of Laius, as told by Oedipus, have proved that the oracle was false (857–858):

 I would not in the future look for prophecies on this side or on that.

The Chorus, speaking for ordinary citizens of Thebes (or of any Greek city that honored the gods), is appalled. They (so they affirm) will not resist what is fated, for its laws have been established by Zeus and never die, while human beings grow old and die. The human being who dismisses the laws of Zeus commits *hubris* (pride, leading to insolent violence) and becomes a tyrant, his world one in which the proper order of things human and divine is thrown into disorder. Such insolence, so the Chorus sings, they never will display. In famous lines they conclude (893–896):

☞ What man who lives his life like this [i.e., disregarding the divine law] can protect his soul from the shafts [of Zeus]? If deeds such as his are honored, why should I dance in the Chorus?

In the lines that follow these words they pray to Zeus to assert his power, for if the prophecies of Apollo are disregarded, then religion (and with it, the power of the gods) no longer has any meaning.

Immediately after this chorus, in a brilliant dramatic stroke, Sophocles brings on Jocasta, the very person who had declared that the prophecies of Apollo were useless. She has kept faith in the god but not in the prophecies she believes were delivered by his false prophets. Jocasta sacrifices at the altar of Apollo but to no avail. In bitter irony, her prayer is answered at once by the arrival of the Corinthian messenger, who sets in motion events leading to her own death. The inexorable progress of Oedipus' discovery continues to its fated climax.

Returning now to the last scene of the tragedy, we see that the power of Zeus is confirmed, but with it comes the potential for the hero to assert his dignity in the face of the worst that the will of Zeus can do to him. In the final lines of the drama, the Chorus, in lines that appear repeatedly in Sophocles (and in Herodotus' story of Croesus, as told in Chapter 6), sing (1528–1530):

☞ Call no man happy until he reaches the end of his life without suffering.

The will of Zeus, as foretold by Apollo at Delphi, has triumphed, but so also has Oedipus, who has asserted his greatness as a human being and has not given in to despair.

SOPHOCLES' *OEDIPUS AT COLONUS*

Sophocles died in 406–405 B.C. at about the age of ninety, and his final drama, *Oedipus at Colonus*, was produced at Athens by his grandson in 401.⁴ It is the longest of Sophocles' tragedies, and it is a profound meditation upon the wisdom that old age brings after a lifetime of experience—success and failure, suffering and happiness. It develops the themes of the *Oedipus Tyrannus*, produced in about 428, bringing the hero to his mysterious yet glorious end near the village of Colonus, the birthplace of Sophocles himself.

The drama begins with Oedipus, after years of wandering as an exile and beggar, coming to Colonus accompanied by Antigone. A citizen of Colonus tells him that he is on holy ground, sacred to the Eumenides, daughters of Earth and Darkness, ground possessed also by Poseidon and Prometheus. The citizen leaves to find the king of Athens, Theseus, and Oedipus prays to the Eumenides that they will bring an end both to his wandering and to his life, as prophesied by Apollo and hinted at in the dialogue with Creon at the end of the *Oedipus Tyrannus*. Thus in this imposing opening scene Sophocles sets out the essential plot of the drama, the climax of which is to be the end of the hero's life on earth.

A Chorus of old men, citizens of Colonus, enters and learns the identity of this stranger. Naturally, they think he is a pollution on their land, and in the subsequent scenes Oedipus looks back on his crimes from the perspective of the end of a long life. Thus he says (265–274):

 Neither [the condition of] my body nor my deeds were mine. Know that I was the sufferer in my deeds, not the agent, if I *must* tell you of what happened with my mother and my father. This is why you are afraid of me, I know well. Yet how was I evil in nature if I reacted to what I suffered, so that, if I did what I did with full awareness, I would not have been an evil-doer? Yet, as it is, I have come where I have come not knowing what I did. I suffered and was destroyed by those who knew [i.e., the gods].

So in this play Sophocles discusses the intractable question of Oedipus' guilt or innocence more fully than in the earlier tragedy. By establishing the innocence of Oedipus he prepares for his transformation to heroic status (in the religious sense) at the end of his life, while he in no way diminishes the horror that we (represented by the citizens of Colonus) feel at his crimes of parricide and incest. The role of the Eumenides in the drama makes Sophocles' solution yet more powerful, for they had been the Erinyes, the terrible goddesses who pursued and punished those who committed crimes against members of their own families.⁵ It is in their sacred *temenos* (enclosure) that the action takes place, and it is to them that Oedipus first prays before the entry of the Chorus, and again following the instructions of the Chorus (486–487):

 Since we call them *Eumenides* you should pray that they should be the suppliant's saviors, acting with kindly hearts.

The action of the drama is therefore intertwined with the resolution of Oedipus' crimes, so that at the end he is justified and can control the final scene of his life, as he proceeds to his miraculous disappearance from the earth.

Creon, king of Thebes, appears with an armed escort and tries by persuasion and by force to get Oedipus to return to Thebes, even kidnapping Antigone and Ismene in his efforts to overpower him. But Oedipus is secure in the protection of Theseus, which the Athenian king has promised him before the appearance of Creon. Theseus appears just as the young women have been led off, and he sends soldiers to recover them. Meanwhile Creon attempts to justify him-

self before Theseus, the Chorus, and Oedipus, whose great speech in response is the most detailed defense of his actions. We translate most of it here (962–1002):

 Murder, marriage, misfortune—you have hurled these charges from your mouth. These things I suffered unwillingly, for they were the will of the gods, who perhaps have been angry with our family for generations past. As for myself alone, you never could reproach me for a crime in doing the deeds I did against myself and members of my family. Then show me this: if you came upon an oracle prophesying that [my] father must be killed by his children, how could you justly call me guilty? My mother had not then been filled with my father's seed, and I had not been conceived. Again, if I, appearing as the victim of an evil fate (as I did appear)—if I fought with my father and killed him, knowing nothing of what I was doing and to whom I was doing it, how could you reasonably find fault with an unwilling deed?

Then, you wretch, you are not ashamed to force me to speak of my mother's marriage, your own sister! I will speak, I will not be silent. . . . For she bore me—yes, she gave me birth, unhappy man that I am. She did not know, and I, her child, knew not. She gave birth to me and then to her shame bore children to me. One thing I know, that you slander her and me in saying that I did these things willingly. Unwillingly did I marry her, and unwillingly do I say these things now. Not even in this marriage can you find me guilty, nor in the murder of my father (which you constantly bring up with your bitter charges). Answer me this one question: if someone came up to you—you righteous man—to kill you, would you ask if your killer were your father? Or would you pay him back immediately? I think, if you love life, you would pay back the criminal and you would not look round for justification.

Well, these were the evils that I walked into, led by the gods. I do not think even my father's soul, if he were alive again, would disagree. But you, you are not just: you think it good to say anything, things that can be spoken and things that should remain unspoken, and you make these charges in the presence of these men.

Oedipus ends by calling on the Eumenides to support him and his protector, Theseus (1010–1013):

 I call upon these goddesses, I beg them with my prayers, to come as my helpers and defenders, so that you [Creon] may know what sort of men are guardians of this city [Athens].

Creon leaves, and Theseus' soldiers return with Antigone and Ismene. But now another threat to Oedipus appears as Polynices, his elder son, comes from Argos to ask his father's blessing and presence as he marches with six heroic allies to claim the throne of Thebes. Before Polynices appears, Theseus promises Oedipus that he will not allow him to leave under compulsion, and we know therefore that Polynices will fail. The scene between Polynices and Oedipus is powerful. Though Oedipus is blind and a wandering beggar, he is still the father who has the authority to bless or curse his son.

Polynices makes a self-serving speech, in which he describes the expedition that he is making against his own city.⁶ He knows that the army that has Oedipus with it will be victorious, and he promises to restore Oedipus to Thebes. Oedipus' reply is a masterpiece of reproach and chastisement. He shows who in fact has been guilty of transgressing the unwritten laws of the family, the very charge that he himself had answered in his speech to Creon. He says (1354–1364):

 When you held the power and ruled at Thebes, as now your brother does, yourself you banished your own father; you made me a man without a city and made me wear these rags, which now make you weep to see. Now you suffer the same troubles as I and suffer the same evils. They do not call for tears, but I must endure them all my life, as I remember that you were my destroyer. You made me live with suffering, you thrust me out; you made me a wanderer who must beg his daily life from others.

Oedipus disowns his sons, contrasting them with Antigone and Ismene, who have truly been loyal to him. He foretells the failure of the expedition against Thebes, reminding Polynices that he had cursed him long ago. He curses him once more (1383–1396):

 Go! I spit you out, you are no son of mine. You are the worst of evil men. Take with you these curses which I call down on you—never may you rule your own land by force, and never may you return to the vale of Argos. May you die by your brother's hand and may you kill the man [your brother] who drove you out! These are my curses. I call on the hateful, dark abyss of Tartarus, where my ancestors lie, to keep you from your city. I call on these goddesses [the Eumenides]; I call on Ares, who thrust this terrible hatred into your hearts. Hear this and go! Tell all the Thebans and tell your loyal allies that Oedipus has bequeathed this legacy to his children.

Before he goes Polynices refuses to listen to Antigone's request that he give up his expedition. In Antigone's moving words Sophocles foreshadows her fate, to die upholding the unwritten laws of Zeus that compel her to break the laws of man in burying her brother. This is the plot of Sophocles' tragedy *Antigone*.

THE END OF THE LIFE OF OEDIPUS

The drama of *Oedipus at Colonus* has looked back at the crimes of Oedipus and has proved him innocent of deliberate intention in his crimes against his family. It has looked forward to the self-destructive hatred of the sons of Oedipus for each other, and it has foreshadowed the tragic self-sacrifice of Antigone. It has brought Oedipus to Colonus, where he is protected by the earthly power of king Theseus and the divine power of the Eumenides. One thing remains, the final moments of the hero's life on earth. As Polynices leaves thunder is heard, and Oedipus knows that this is the sign for the ending of his life. Theseus reappears, and the blind Oedipus, with the authority of one who fully knows who

he is, and at peace with himself, leads him and the young women toward the place where his life will end. He blesses Theseus and Athens, asking only that Theseus never reveal the place of his disappearance.

What happened next is related in the speech of the messenger who was an eyewitness. We give the passage in full here, since it clearly tells us how Sophocles viewed the relationship of Oedipus the man to Oedipus the hero. The poet carefully describes the place, for a hero is associated with a particular locality. He connects Oedipus' passing with the powers beneath the earth (Zeus is called by his title Chthonius, that is, "Zeus of the Earth"); yet Theseus rightly worships the powers of both earth and heaven after the miracle, for the hero is part of the array of Greek divinities, those of heaven as well as the chthonic powers. And Oedipus' passing is miraculous and without grief, in this symbolizing his benign influence upon the place where he passed from mortal sight and his power as a hero to perform miracles for those who worship him. Here then is Sophocles' description (*Oedipus at Colonus* 1587–1665):

 You know how he left this place without any of his friends to guide him, himself the leader of us all. When he came to the edge of the ravine, which is rooted in the earth by the brazen stairs, he stood in one of the paths which meet there—the place is by the hollow basin where the pact of Theseus and Pirithoüs was forever made. Around him were the rock of Thoricus, the hollow wild pear tree, and the stone tomb. Here he sat and loosened his dust-stained garments. Then he called his daughters and bade them bring him water from the running stream to wash with and make libations. So they went to the hill of Demeter, bringer of green freshness, which overlooks the place, and soon returned bringing what their father had asked for. Thus they washed and clothed him as custom demands. When he was satisfied with all that they were doing and none of his commands had gone unfulfilled, then Zeus of the Earth thundered, and the girls shuddered as they heard. They clasped their father's knees and wept; continuously they beat their breasts and wailed. But he immediately answered their unhappy cry, clasped his arms around them, and said: "My children, today your father ceases to be. All that is mine has come to an end; no more need you labor to support me. Hard was that task, I know, my daughters; yet one word alone relieves all that toil—for of *Love* you never will have more from any man than me. And now you will pass your lives bereft of me."

In this way they all sobbed and wept, embracing each other. When they came to an end of weeping and were silent, a sudden voice called him and all were afraid and their hair stood on end. It was God who called him repeatedly. "Oedipus, Oedipus," he called, "why wait we to go? Too long have you delayed." Then Oedipus, knowing that God was calling him, called King Theseus to him, and when he drew near said: "Dear friend, give your hand to my children as a solemn pledge, and you, my children, give yours to him. And do you, Theseus, swear never knowingly to betray these girls and always to act for their good." And Theseus, without complaint, swore on his oath that he would do as his friend asked, for he was a man of generous nature.

When this was done, Oedipus straightway felt his children with unseeing hands and said: "My daughters, you must resolutely leave this place; you may

not ask to see what is not right for you to see, nor hear words that you should not hear. Go then; let only King Theseus stay and behold what will be done."

All of us heard his words, and with groans and tears went with the girls. As we began to leave, we turned and saw Oedipus no longer there; the king we saw, shielding his eyes with his hand, as if some dread sight had appeared which he could not bear to look upon. Yet soon after we saw him worship Earth and Olympus, the gods' home above, with the same words.

How Oedipus died no man can tell except Theseus. No fiery thunderbolt from God consumed him, no whirlwind from the sea. Some divine messenger came for him, or the deep foundations of the earth parted to receive him, kindly and without pain. Without grief he passed from us, without the agony of sickness; his going was more than mortal, a miracle.

So Oedipus became a hero, bringing good to the country in which he lay, and thus Sophocles honors Attica and his own deme of Colonus in this version of the end of Oedipus' life.

OTHER VERSIONS OF THE MYTH OF OEDIPUS

There were, however, other versions. We have seen (p. 383) that in Homer Jocasta is not the mother of his children and that he apparently dies in battle. In the *Oedipus* of Euripides (of which a few lines survive) the servants of Laius boast that they blinded Oedipus. At the end of Sophocles' *Oedipus Tyrannus* he is led into the palace, whereas he had earlier indicated (1446–1454) that he was to be thrust out of the city to wander and die on Mt. Cithaeron, where he had been exposed as a baby. In the *Phoenissae* of Euripides (produced about a decade before the *Oedipus at Colonus*), Oedipus is still in the palace at the time of the expedition of the Seven against Thebes and Jocasta is still living. After his sons have killed each other and Jocasta has killed herself over their corpses, he emerges for the first time and is sent into exile by Creon. At the end of the play he leaves Thebes accompanied by Antigone and foretells that he will come to Colonus: in this respect the version of Euripides harmonizes with that of Sophocles. His final speech in the *Phoenissae* looks back over his tragic life (1758–1763):

 O citizens of my glorious homeland, look! Here am I, Oedipus, I, who knew the hard riddles; I, once the greatest of men. I alone ended the violence of the murderous Sphinx. Now I, the same man, I am being driven out of my land, a pitiful figure, deprived of my rights. Yet why bewail these things and weep in vain? A mortal must endure what the gods compel him to suffer.

THE MYTH OF OEDIPUS AND PSYCHOANALYTIC THEORY

The story of Oedipus is among the best-known classical legends, largely because of the use made of it by psychologists ever since Sigmund Freud's identification of the "Oedipus complex" in 1910; Freud's interpretation of the myth, excerpted in Chapter 1 (pp. 7–8) provides the basis for any psychoanalytical approach. Sophocles was aware of the Oedipus complex, in part, at any rate: "Many men,"

Oedipus Rex by Max Ernst (1891–1976); oil on canvas, 1922, 37 × 41 in. In this surrealist painting, Freudian imagery is combined with elements in the myth of Oedipus. A hand stretches out from the house (or palace?), with a handsaw that splits a womblike walnut shell, itself pierced by an arrow. To the right a bird's head with tethered horns projects from a hole in a plank, while a balloon rises into the sky. The painting clearly alludes to Oedipal themes, including father-son rivalry, the mother's womb, piercing, freedom and confinement, flight from home, and being drawn inexorably back. (Private collection.)

says Jocasta (*Oedipus Tyrannus* 981), "have in dreams lain with their mothers," and we have already noted how Greek myths of creation are permeated with the concepts of the mother-son relationship and of conflict between father and son. Sophocles and his predecessors were concerned with the historical, theological and other aspects of the myth, and we should be skeptical of attempts to

interpret the legend purely and solely in psychological terms. Nevertheless, psychoanalytical criticism reveals many rewarding insights.

On the face of it, the plot of the play appears most incredible. Oedipus, brought up as a prince, when told by god that he is destined to kill his father and marry his mother tries to avoid his fate; when he does kill a king old enough to be his father and soon after marry a queen old enough to be his mother and recently bereft of a murdered husband, we may at first be dubious enough to ask a very superficial question: Why is it that a man so reputed for his intelligence cannot reach some obvious, albeit terrifying, conclusions? As we try to answer, mythic, universal truths about human nature, revealed by Sophocles' art, will emerge and gradually overwhelm us with their credibility. Young and ruthless Oedipus believes what he wants and needs to believe in order to achieve his ambitious goals for glory, wealth, and power. An unshakable fixation that

OEDIPUS THE HERO

Oedipus is basically an archetypal Greek hero whose legend is consistent with the criteria given at the beginning of this chapter or with Propp's formulation (see Chapter 1, pp. 14–15). The *Odyssey* version of the story focuses on the kingship of Oedipus—he kills his father, king of Thebes; succeeds him; and inherits his wife. After she commits suicide he continues to rule and dies, as a king often does, in battle (as may be implied in the *Iliad's* reference to his death). Kingship, rather than incest, is the focus of Oedipus' myth (as opposed to that of Epicasta/Jocasta) in its early stages. Sophocles seems to have brought the theme of incest into the foreground, and in so doing to have taken the myth beyond the traditional ending of the hero's quest, that is, the winning of a bride. And from Sophocles' great tragedy have descended the psychoanalytical theories discussed here and in Chapter 1.

Other than kingship and family relations, the myth also focuses on the hero's wisdom and his effect on society. Gustave Moreau (see photo on page 384) commented in preparing his painting that Oedipus was "a man of mature age wrestling with the enigma of life," and for him this was the principal focus of the myth, not parricide and incest. For Lévi-Strauss and the structuralists, the myth mediates between extremes in family relationships that would be intolerable otherwise. Others have adopted the structuralist approach of including all variants of a myth in their context. Jan Bremmer, for example, accepts the Freudian notion of father-son rivalry and sees the Greek myth as a "warning to the younger generation" to respect their fathers, whom they will succeed. Modern fascination with the Freudian interpretation—powerful and satisfying as it may be—should not obscure the origins of the myth in the role of kingship in preclassical Greek society, nor should they ignore the fact that the myth as we have it is made up of many elements from different Greek (and non-Greek) societies.

Polybus and Merope of Corinth are his parents must reassure him that the murder of a fatherly figure who gets in his way cannot be his father so that he need not pursue pressing questions about Laius' death. The mutual attraction of filial husband and motherly wife becomes a deep-rooted love, compelling and strangely consoling. Sublimation and repression free him from any guilty suspicions. His gradual perception of truth, when forced by irrefutable reality to make conscious what lies suppressed and hidden in his subconscious, is portrayed with shattering beauty by the master psychoanalyst, Sophocles.

The strength and perseverance to face the past and the present, to learn the truth about oneself, to recognize honestly one's real identity and face it—these are the cornerstones for healing in psychoanalysis. Oedipus then is a paradigm for everyone in his struggle and his victory. Through suffering he has come to know himself and win personal and spiritual salvation. Jocasta cannot face the consequences of self-knowledge and thus must seek solace for her guilt and her misery in death.⁷

THE SEVEN AGAINST THEBES

THE PRELIMINARIES TO THE EXPEDITION

In his speech cursing Polynices in the *Oedipus at Colonus*, Oedipus refers to an earlier curse that he had laid upon his sons, Eteocles and Polynices (1375). According to early epics, now lost, they had disobeyed Oedipus by using a golden cup and a silver table belonging to Laius in serving a meal to him while he was shut up in the palace, and he cursed them. Later they served him a less honorable portion of meat than was his due as a king, and he cursed them again. The curses were that they should divide the kingdom of Thebes, that there should "always be war and battle between them," and that they should kill each other.⁸ Thus the curse uttered in the *Oedipus at Colonus* is the third one.

The curses were fulfilled after the death of Oedipus or (in the version of the *Phoenissae* of Euripides) while he was still alive. Eteocles and Polynices quarreled over the kingship at Thebes. They agreed that each should rule in alternate years, while the other went into exile. Eteocles ruled for the first year, while Polynices went to Argos, taking with him the necklace and robe of Harmonia. At Argos Polynices and another exile, Tydeus of Arcadia, married the daughters of the king, Adrastus, who promised to restore them to their lands, and decided to attack Thebes first. This war and its consequences are the subject of the saga of the Seven against Thebes, which is the title of one of the tragedies of Aeschylus.

Several other dramas deal with the saga, including two with the title *Phoenician Women*, one by Euripides and the other by the Roman author Seneca. The consequences of the war are the subject of *The Suppliant Women* by Euripides and of *Antigone* by Sophocles. The saga is most fully narrated by the Roman poet

Stattius, whose epic, *Thebaid*, written in about A.D. 90, was widely read in Medieval and Renaissance Europe.

The Argive army had seven leaders: besides Adrastus, Polynices, and Tydeus, there were Capaneus, Hippomedon, Parthenopaeus, and Amphiaraüs. Amphiaraüs, who had the gift of prophecy, knew that except for Adrastus all seven would be killed, and therefore opposed the expedition. But Polynices bribed Amphiaraüs' wife, Eriphyle, with the necklace of Harmonia, to persuade her husband to change his mind. As he set out, he ordered his sons to avenge his death on their mother, and themselves to make an expedition against Thebes when that of the Seven had failed.

INCIDENTS ON THE JOURNEY FROM ARGOS TO THEBES

Before the army reached Thebes, two episodes intervened. At Nemea (not far from the Isthmus of Corinth) they were led to a spring of water by Hypsipyle, nurse of Opheltes, the infant son of the local king. She left the baby lying on the ground while she showed the way, and he was killed by a serpent. The Seven killed the serpent and celebrated in honor of the dead child the athletic contests that became the Nemean Games. His name was changed by Amphiaraüs from Opheltes (Snake Child) to Archemorus (Beginner of Death), as an omen of what was yet to come.

In the second episode Tydeus was sent to Thebes as an ambassador to demand the abdication of Eteocles in accordance with his agreement with Polynices. While at Thebes, he took part in an athletic contest and by winning humiliated the Thebans, who ambushed him as he returned to the army. He killed all fifty of his attackers, except for one man who took the news to Thebes.

THE FAILURE OF THE ATTACK ON THEBES

When the army reached Thebes each leader attacked one of the city's seven gates. The central part of Aeschylus' tragedy *Seven against Thebes* consists of matched speeches in which the herald describes each of the Seven and is answered by Eteocles, who stations a Theban hero at each gate of the city. The herald's speeches give a vivid idea of the qualities of each of the Argive heroes (selections from Aeschylus, *Seven against Thebes* 375–685):⁹

 Tydeus raging . . . shouts out with midday cries like a dragon. . . . Upon his shield he has this proud sign embossed, the heaven blazing beneath the stars. The bright full moon, the oldest of the stars, the eye of night, shines brightly in the middle of the shield. . . .

Capaneus . . . is another giant, greater than the one already named. . . . He threatens to sack the city, whether the god is willing or not. . . . His device is a naked man carrying fire, and the torch with which his hand is equipped blazes, and in golden letters he says, "I will burn the city."

Hippomedon with a war-cry stands before the gates of Athena. . . . It was no mean craftsman who placed this work upon his shield, Typhon, belching fiery smoke through his mouth, and the encircling hollow of the shield is covered with wreathed serpents. . . .

[Parthenopaeus the Arcadian] swears . . . that he will violently sack the city of Cadmeia. . . . Upon his bronze shield he wields the flesh-eating Sphinx, the reproach of the city. . . .

The sixth I would say is the most virtuous man, the prophet best in might, strong Amphiaraüs. . . . Upon his shield was no sign, for he did not wish to seem, but to be, the best. . . . Against him I advise setting wise and virtuous defenders, for terrible are those whom the gods revere.

Finally the herald describes Polynices, whose threats against his brother are the most terrible of all. Upon his shield is a double device, a woman leading an armed man:

 She says she is Justice, as the inscription says: "I will bring this man back, and he shall possess his father's city and go about its houses."

In these descriptions, Aeschylus has given an impressive picture of the heroic stature of the Seven, whose individual characters are delineated through the devices on their shields. Eteocles refuses to be intimidated and arms himself for battle, denying that Justice is on Polynices' side. He knows that he must kill his brother, and he knows that in so doing he will be the instrument fulfilling the curse of Oedipus. When the Chorus asks him if he wishes to kill his own brother, he replies, "When the gods give evil, you cannot escape their gift."

These were the final words of Eteocles before the Seven attacked the city, and they express the inevitability of the curse on the sons of Oedipus. The failure of the Seven was foretold by the Theban prophet Tiresias, who prophesied that if one of the Spartoi sacrificed himself, the city would have atoned fully for the blood-guilt incurred by the killing of Ares' sacred serpent and so be saved. Here is part of the prophecy of Tiresias, as given by Euripides (*Phoenissae* 931–941):

 This man [i.e., Menoecus] must be killed at the lair of the earthborn serpent, the guardian of Dirce's fountain, and he must pay the earth with his blood for the water drawn by Cadmus. This is the result of the ancient anger of Ares, who will avenge the death of the earthborn serpent. If you [i.e., Creon and the Thebans] do this, you will have Ares as your ally. If the earth takes your fruit for hers, and for her blood the blood of mortals, she will favor you—she who once put forth the gold-helmeted crop of Sown Men [*Spartoi*]. Of their descendants, one must die, one who is descended from the serpent.

Menoecus, son of Creon and a descendant of the Spartoi, willingly died for the city: "Dying for the city," says the messenger in Euripides' play (*Phoenissae* 1090–1092), "he plunged the black-bound sword through his throat to save this land, upon the top of the city-walls," and so he fell into the serpent's lair. In the ensuing fight, only Capaneus succeeded in scaling the wall. As he reached the

top, he boasted that not even Zeus could keep him out, and for his blasphemy “Zeus,” says Sophocles (*Antigone* 131–137), “hurled him with brandished fire as he stood upon the parapet eager to raise the victory cry. Down he fell to the hard earth, hurled through the air, as he breathed out rage and madness in his frenzied assault.”

Eteocles and Polynices killed each other in single combat, which Statius describes at great length in Book 11 of his epic, *Thebaid*. Even after death their enmity continued. Statius imagines Antigone, after the battle, trying to burn the corpse of Polynices on the very place where Eteocles had been cremated. She cries out in horror as the flames split in two with divided tongues, symbols of the brothers’ eternal hatred.

Of the other heroes, Hippomedon, Parthenopaeus, and Tydeus fell in battle. (Tydeus, indeed, could have been made immortal by Athena, whose favorite he was, but she revoked her gift when she saw him eating the brains of the man who had fatally wounded him.)

AMPHIARAÛS

Only Amphiaraüs and Adrastus escaped; Adrastus was saved by the speed of his divine horse Arion and returned to Argos; Amphiaraüs was swallowed up in the earth, with his chariot and driver, as he fled along the banks of the river Ismenus, one of the rivers of Thebes. The scene is vividly described by Statius (*Thebaid* 7. 816–820):

 The earth parted with a deep, steep-sided chasm, and the stars above and the dead below were both struck with fear. The huge abyss swallowed Amphiaraüs and enveloped the horses as they began to cross. He did not relax his hold on his arms or the reins: just as he was, he drove the chariot straight into Tartarus.

Amphiaraüs became an important hero, and chthonic cults (i.e., cults whose ritual was directed toward the earth and the Underworld) were established in his honor in several places. He was worshiped at the place beside the river Ismenus where he was said to have descended into the earth. His most famous cult was at Oropus (a city in northeastern Attica near the border with Boeotia), where an elaborate shrine, the Amphiaraüm, was developed in the fifth century B.C. He exemplifies the hero who is associated with the place (or places) where his life was said to have ended. Like Oedipus at Colonus, he experienced a mysterious death and made the place where he disappeared holy.

ANTIGONE

The deaths of Eteocles and Polynices posed difficult religious and political dilemmas, which are presented in Sophocles’ tragedy *Antigone*. The four children of Oedipus and Jocasta were Antigone, Ismene, Eteocles, and Polynices. Creon, Antigone’s uncle, became king of Thebes again on the death of Eteocles. He gave orders that Polynices was not to be buried, on the grounds that he was a traitor

who had attacked his own city. To leave the dead unburied was an offense against the gods, for it was the religious duty of the relatives of the dead to give them a pious burial. Antigone, as the sister of both Eteocles and Polynices, owed such a burial to both brothers, even though she would be breaking Creon's edict by burying Polynices. Alone (for Ismene refused to join in her defiance) she gave him a symbolic burial by throwing three handfuls of dust over his corpse. For this Creon condemned her to be buried alive. Antigone expresses her defiance of Creon in words of unforgettable power (Sophocles, *Antigone* 441–455):

-  CREON: Do you admit that you did this or deny it?
 ANTIGONE: I admit it and I do not deny it.
 CREON: Did you know that this was forbidden by my decree?
 ANTIGONE: I knew it for it was clear to all.
 CREON: And yet you dared to break these laws?
 ANTIGONE: Yes, for it was not Zeus who gave me this decree, nor did Justice, the companion of the gods below, define such laws for human beings. Nor did I think that your decrees were so strong that you, a mortal man, could overrule the unwritten and unshaken laws of the gods.

Antigone was right. Creon's order defied the law of the gods, and he was soon punished. His son Haemon attempted to save Antigone (to whom he was engaged to be married) and, finding she had hanged herself in her tomb, killed himself with his sword. Creon's wife, Eurydice, killed herself when she heard the news of her son's death. Warned by Tiresias, Creon himself relented too late.

The *Antigone* of Sophocles, like his *Oedipus Tyrannus*, shows how human beings cannot ignore the demands of the gods. Antigone is a heroine who is willing to incur a lonely death rather than dishonor the gods by obeying the king's command.¹⁰

THE BURIAL OF THE SEVEN AGAINST THEBES

According to Euripides (in his tragedy *The Suppliant Women*) Adrastus and the mothers of the Seven went to Eleusis (in Attica) as suppliants. Helped by Aethra, mother of Theseus, they persuaded Theseus to attack Thebes and obtain an honorable burial for the dead Argives. Theseus returned victorious with the corpses of the heroes (other than Polynices, Amphiaräus, and Adrastus himself), and conducted their funeral rites. Capaneus was granted a separate pyre, and his widow, Evadne, threw herself into its flames.

THE EPIGONI, SONS OF THE SEVEN AGAINST THEBES

ALCMAEON, SON OF AMPHIARAÜS

Amphiaräus had ordered his sons to attack Thebes and to punish their mother, Eriphyle, for her treachery in accepting the necklace of Harmonia from Poly-

nices as a bribe. Alcmaeon, one of his sons, carried out these commands ten years later. He and the sons of the Seven (they are known as the Epigoni, “the later generation”) made a successful expedition against Thebes and destroyed the city, which the Thebans had abandoned on the advice of Tiresias. At this point saga touches on history, for the war of the Epigoni took place, it was said, not long before the Trojan War. In the catalogue of ships in the *Iliad*, which is certainly historical, only Hypothebae (Lower Thebes) is mentioned, implying that the ancient town and its citadel had been abandoned.

ALCMAEON, ERIPHYLE, AND THE NECKLACE OF HARMONIA

Alcmaeon, encouraged by an oracle of Apollo, avenged his father by killing Eriphyle. The Furies pursued him as a matricide until he found temporary shelter in Arcadia, where he married the daughter of King Phegeus, giving her the necklace of Harmonia. But the land was soon afflicted with famine, the result of the pollution caused by the presence of the matricide Alcmaeon. Obedient to another oracle, he searched for a land on which the sun had not shone when he killed his mother. In western Greece he found land at the mouth of the river Achelouïs recently formed by the river’s silt. Settling here, he was purified of his guilt by the river-god, whose daughter Callirhoë he married. But he soon was killed by the sons of Phegeus for the crime of stealing the necklace of Harmonia in order to give it to Callirhoë. The necklace eventually was dedicated by the sons of Callirhoë and Alcmaeon at Delphi. Alcmaeon’s sons became the founders of Acarnania, a district of western Greece.

TIRESIAS

A recurring figure in the Theban saga is the blind prophet Tiresias. Descended from one of the Spartoi, he was the son of a nymph, Chariclo, a follower of Athena, and a Theban nobleman, Eueres. He appears in the *Bacchae* of Euripides as a companion of Cadmus in the worship of Dionysus (see Chapter 13). Pindar (*Nemean Odes* 1. 60–69) describes him as “the outstanding prophet of Zeus” and tells how Amphitryon summoned him to interpret the miracle of the strangling of the snakes by the infant Heracles (we translate this passage in Chapter 22, pp. 521–522). On this occasion he foretold the labors of Heracles and part in the defeat of the giants by the Olympians (see Chapter 4, note 4). Tiresias, then, was distinguished for his longevity; he lived for seven generations, says Hesiod, and continued to have the gift of prophecy after his death, for in the Underworld, where the souls of the dead are insubstantial and futile, he alone retained his full mental faculties. Accordingly Homer makes him Odysseus’ informant when he consults with the dead, and he foretells the end of Odysseus’ wanderings and the manner of his death.

There are different stories about his blindness, an affliction shared by many prophets and poets in Greek literature. Ovid tells the story in full (*Metamorphoses* 3. 318–338):

They say that Jupiter once had driven away his serious worries with nectar and was joking with Juno, saying, "You women have more pleasure than men, I am sure." She disagreed, and they decided to ask the experienced Tiresias for his opinion, since he had known the act of love both as man and as woman. For once he had struck with his staff the bodies of two large serpents copulating in the green forest, and he miraculously passed seven autumn seasons turned from man into woman. In the eighth, he saw the same serpents and said, "If striking you has the power to change the striker to the other sex, then I will strike you again now." He struck the serpents, and his former body returned with his native physique. So, being made the judge of the lighthearted quarrel, he agreed with Jupiter. Juno, they say, was more angry than was just and condemned the arbiter [Tiresias] to eternal blindness. But the all-powerful father [Jupiter] granted him in return for the loss of his sight knowledge of the future.

The sight of two large snakes entwined in the act of copulation is mysterious and impressive (it is symbolized in the entwined snakes of the staff of Asclepius, still a modern medical symbol), and a person who violates the snakes can readily be thought to have offended against a divine power. The idea of the violation of the divine is explicit in the second legend of the blinding of Tiresias, which is similar in this respect to the legend of Actaeon (see Chapter 10, pp. 203–206), also a Theban hero. In this version (narrated by the third-century B.C. Alexandrian poet, Callimachus), Tiresias came upon Athena and Chariclo as they were bathing in the waters of the fountain Hippocrene, on the slopes of Mount Helicon. Athena caused him to lose his sight, a punishment for having seen what mortal eyes should not have seen, but gave him the power of prophecy (Callimachus, *Hymn* 5. 121–30):

[Athena speaks to Chariclo:] Do not lament, my companion. For your sake I shall give him many other honors. I will make him a prophet, to be honored in song by future generations, a far greater prophet than any other. He will have knowledge of birds, those that are of good omen as they fly, and those that are ill-omened. He will give many oracles to the Boeotians and to Cadmus, and, last of all, to the family of Labdacus. I will give him, too, a great staff, to guide his feet where he must go, and I will give him a limit to his life after many generations. And he alone when he dies will walk among the dead having intelligence, and he will be honored by the great Gatherer of the People [i.e., Hades].

In the story of Oedipus, Tiresias revealed the truth before Oedipus or the Thebans were ready to understand it (Sophocles, *Oedipus Tyrannus* 350–367):

TIRESIAS: I bid you obey your own decree, and on this day speak neither to these men here nor to me, for you are the unholy pollution on this land.

OEDIPUS: Tell me again, that I may better learn.

TIRESIAS: I say that you are the murderer of Laius. Unwittingly you live most shamefully with those who are dearest to you, and you do not see how far gone you are in evil.

Oedipus still cannot believe Tiresias and goads him into telling him the truth even more terribly (412–419):

 **TIRESIAS:** These are my words, since you have reproached me with being blind: you see, and you do not see the evil in which you are, nor where you live, nor with whom you dwell. Do you know from whom you are sprung? You do not know that you are hateful to your family below and above upon the earth, and that the double curse from your mother and your father will track you down and drive you from this land, now seeing clear, but then in darkness.

The words of Tiresias powerfully express the horror of Oedipus' crimes. Through the images of seeing and blindness, they bring before us the inevitability of the justice of the gods.

Tiresias, in Sophocles' *Antigone*, also warned Creon of the disastrous mistakes he was making, only to be understood too late. Finally, before the attack of the Epigoni, he advised the Thebans to abandon the city and migrate to found the city of Hestiaea. Tiresias never reached the new city; on the way he drank from the spring called Telphusa and died on the spot.

NOTES

1. One of Laius' retainers escaped: in Sophocles' play he is the very servant who originally failed to expose Oedipus, and his story brings about the final discovery of Oedipus' identity.

2. There are several variants of the riddle and its answer. The shortest (Apollodorus 3. 53–54) is given here.
3. Cf. Lowell Edmunds, *Oedipus: The Ancient Legend and Its Later Analogues* (Baltimore: Johns Hopkins University Press, 1985), a survey of the many versions of the myth. Two modern novels are of merit: *Oedipus on the Road* (1990), originally in French by Henry Bauchau, recounting the journey of Oedipus, blind and bleeding, from Thebes, with his daughter Antigone and a shepherd-bandit named Clius, though an imaginative, geographical and spiritual landscape; and *Emmeline* (1980) by Judith Rossner, a powerful retelling of the Oedipus legend, set in the eastern United States in the mid-nineteenth century.
4. In the intervening four years Athens had surrendered to Sparta and her allies at the end of the Peloponnesian War; the “long walls” between the city and its port had been pulled down. The democracy had been replaced by an oligarchy led by a committee of thirty, itself soon replaced by the restored democracy.
5. The transformation of the Erinyes (“Furies”) into Eumenides (“Kindly Ones”) is the climactic theme of Aeschylus’ *Oresteia* (see Chapter 18); Aeschylus brings the goddesses to Athens where they take up their new home.
6. In lines 1284–1345 of his speech, Polynices names the Seven against Thebes. We translate a similar passage from Aeschylus’ *Seven against Thebes* on pp. 396–397. Another catalog is given by Euripides in the *Phoenissae* (1090–1199), where a messenger reports the failure of the attack on Thebes.
7. For a psychoanalytic interpretation, a good place to begin is with *Oedipus: Myth and Complex, A Review of Psychoanalytic Theory*, by Patrick Mullahy (see the Bibliography for Myth and Psychology on pp. 32–33 and 402). Mullahy discusses Sigmund Freud, Alfred Adler, C. G. Jung, Otto Rank, Karen Horney, Eric Fromm, and Harry Stack Sullivan. Of related interest is a study of the use of myth (with emphasis upon psychoanalytic interpretation) in the works of William Butler Yeats, Ezra Pound, T. S. Eliot, and W. H. Auden: Lillian Feder, *Ancient Myth and Modern Poetry* (Princeton: Princeton University Press, 1971).
8. The legends contained in the lost epics (with the titles of *Oedipodea* and *Thebais*) are discussed by G. A. Huxley, *Greek Epic Poetry* (Cambridge, Mass.: Harvard University Press, 1969), chap. 3.
9. The herald’s description of Eteoclus (son of Iphis), whom Aeschylus names as the third hero in place of Adrastus, is omitted. For other catalogues of the Seven in Euripides and Sophocles see note 6 in this chapter.
10. Antigone, as the symbol of individual conscience against the unjust laws of the state, has inspired many literary and musical works. See George Steiner, *Antigones* (Oxford: Oxford University Press, 1984).

THE MYCENAEAN SAGA

The legends of Mycenae are particularly concerned with the House of Atreus and the greatest of its princes, Agamemnon, leader of the Achaeans against Troy. We consider the Trojan War later; in the present chapter we discuss the fortunes of the house as they developed in Greece itself.

PELOPS AND TANTALUS

The ancestor of the family of Atreus was Pelops, son of Tantalus, who came from Asia Minor as a suitor for the hand of Hippodamia, daughter of Oenomaüs, king of Pisa, whose territory included Olympia. This fact accounts for the importance of Pelops in the religious cults at Olympia. From the end of the Mycenaean Age, Pisa and Olympia were for most of the time controlled by Elis.

In the time of Tantalus and Pelops there was easy intercourse between gods and mortals, and in some way Tantalus abused the privilege of eating with the gods. In the best-known version of the myth, he invited the gods to dine with him and cut up his son Pelops, boiled the parts in a cauldron, and served them at the feast. Pindar is reluctant to believe the story, but he told it nevertheless (Pindar, *Olympian Ode* 1. 46–58):

 One of the envious neighbors secretly told the tale that they cut your limbs up with a knife and [put them] into the water boiling over the fire, and at the second course of the meat at the tables they divided you and ate. I cannot say that any of the blessed gods was gluttonous—I stand aside. . . . But if the guardians of Olympus honored a mortal man, that man was this Tantalus. Yet he could not digest great fortune, and in his fullness he brought on himself great madness. Thus the Father [Zeus] balanced above him a mighty rock, and longing always to throw it away from his head, he is an exile from good cheer.

The usual punishment of Tantalus is that he was condemned to suffer everlasting thirst and hunger in the Underworld. We have given Homer's account (*Odyssey* 11. 582–592) in Chapter 15. There are two other Greek myths that involve cannibalism, both from places connected with Elis. The one is the story of Lycaon, king of Arcadia, told by Ovid (*Metamorphoses* 1. 211–243, see pp. 93–94), and the other is the banquet of Thyestes, which we discuss later in this chapter.

The existence of these myths is evidence enough that in the distant past some form of cannibalism once underlay the sacrificial rituals.¹

In the usual version of the myth, the gods recognized the deception of Tantalus, and all, except for Demeter, refused to eat. She, it was said, ate the flesh from Pelops' shoulder, so that when he was restored to life and wholeness by the gods, an ivory shoulder had to be substituted. Pindar gives a different explanation of the temporary disappearance of Pelops, saying that Poseidon fell in love with him and took him up to Olympus, as Zeus had done with Ganymede. In any case, says Pindar, "the immortal gods sent back the son [of Tantalus] to be among the short-lived race of mortals." It was after this that Pelops traveled to Greece as the suitor of Hippodamia.

Pelops became an important hero with a cult at Olympia, where his shrine, the Pelopion, was next to the temple of Zeus. Pindar says (*Olympian Ode* 1. 90–93):

 Now he lies by the crossing of the Alpheus and is present at the blood-drenched festival. He has a busy tomb, close by the altar [of Zeus] visited by multitudes.

Indeed, sacrifices to Zeus and Pelops were central to the ritual of the Olympic festival, and Pelops received a sacrifice (usually a black ram) before each sacrifice to Zeus. Not only did he give his name to the southern part of the Greek mainland, the Peloponnese (Pelops' Island), but he received honors at the center of the greatest of the Panhellenic festivals. When the great temple of Zeus was built around 460 B.C. to house Pheidias' gold and ivory statue of Zeus seated upon his throne, the sculptures of the west pediment showed the moment before the start of the race between Pelops and Oenomaüs (we have described the temple in Chapter 5).

This race was the origin of the curse on the descendants of Pelops. To win Hippodamia, a suitor had first to win a chariot race against Oenomaüs from Pisa to the Isthmus of Corinth. He would have a short start and take Hippodamia in his chariot with him; Oenomaüs would follow, and if he caught up, he would kill the suitor. Thirteen suitors had failed before Pelops came, and their heads decorated Oenomaüs' palace.

According to Pindar, Pelops prayed to his lover, Poseidon, before the race. His words give a sense of the heroic stature of Pelops (*Olympian Ode* 1. 75–89):

 [Pelops said] "If the dear gifts of Love, Poseidon, can be turned to good, shackle the brazen spear of Oenomaüs and bring me upon the swiftest chariot to Elis and set me near to power. For he has killed thirteen suitors and puts off his daughter's marriage. Great danger, however, does not take hold of the coward. Among those who must die, why should a man sitting in darkness pursue old age without glory, to no purpose? Before me, however, lies this contest. May you give me the action dear to me." Thus he spoke, and his words were not without success. Honoring him, the god gave him a golden chariot and tireless winged horses. He overcame the violence of Oenomaüs and took the girl as wife. And she bore him six princes, sons eager in virtue.

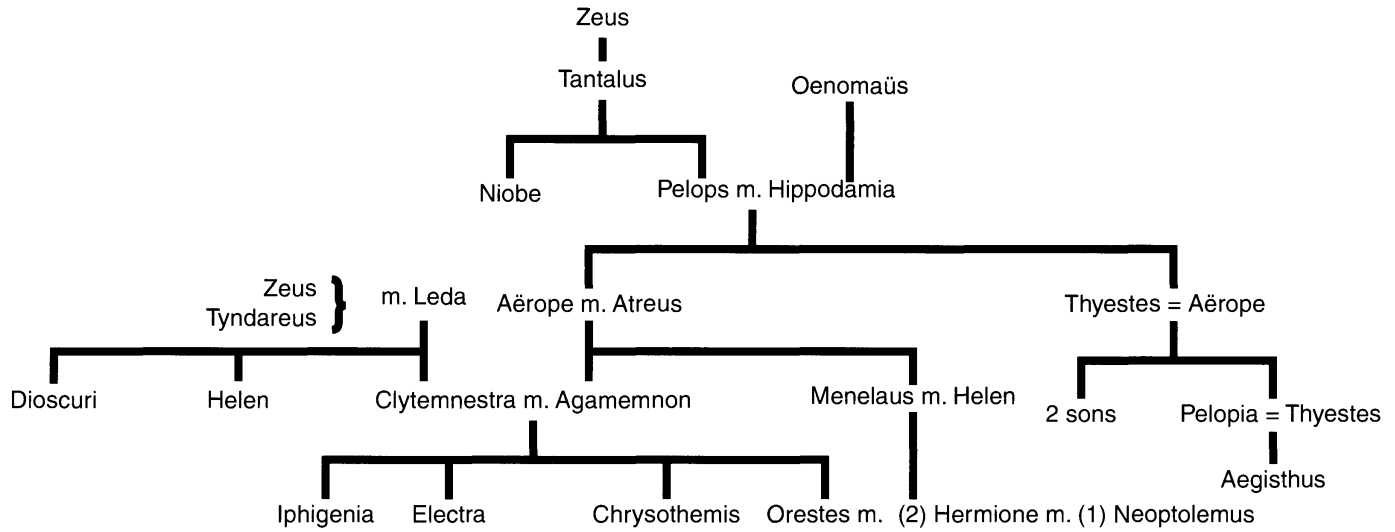

Figure 18.1. The House of Atreus

This version is simpler and probably older than the better-known one, according to which Pelops bribed Oenomaüs' charioteer, Myrtilus (son of the god Hermes), to remove the linchpins from Oenomaüs' chariot so that it crashed during the pursuit, killing Oenomaüs.

So Pelops won Hippodamia and drove away with her, accompanied by Myrtilus. Now Myrtilus expected that Pelops would reward him by allowing him to enjoy Hippodamia on the first night. At a resting place on the journey, he attempted to violate her, and when Pelops discovered this, he threw Myrtilus from a cliff into the sea. As Myrtilus fell, he cursed Pelops and his descendants. This curse, and the blood-guilt of the murder of Myrtilus, led to the misfortunes of the House of Atreus. Seneca, however, whose tragedy *Thyestes* is the only classical drama on this theme to survive, connects the murder with the crime of Tantalus (*Thyestes* 138–148):

 Neither right nor shared crimes have prevailed. Betrayed, the master [Oenomaüs] of Myrtilus has perished, and he, meeting with the same loyalty [from Pelops] as he had shown [to Oenomaüs] has given his name to the noble sea [the Myrtoan Sea]. . . . The child Pelops, running to kiss his father, was met with the impious sword and fell, a young victim at the hearth. He was cut up by your hand, Tantalus, so that you might make a feast for your guests, the gods.

ATREUS AND THYESTES

Pelops returned to Pisa and became king in place of Oenomaüs. His children, Thyestes and Atreus, quarreled over the kingdom of Mycenae, which had been offered to "a son of Pelops" in obedience to an oracle. It was agreed that the possessor of a golden-fleeced ram should become king. According to Euripides (*Electra* 698–725), Pan brought the golden-fleeced ram to Atreus, and the people of Mycenae were celebrating his succession to the throne:

 The golden censers were set out, and throughout the city the altar-fires blazed. The flute, the Muses' servant, sounded its music, most beautiful. The lovely dances spread, honoring the golden ram—of Thyestes. For he had persuaded Atreus' own wife [Aërope] with secret love and took the talisman to his house. Then he came to the assembly-place and cried out that he had the horned sheep in his house, the golden-fleeced one.

Euripides further says that Zeus, in anger at Thyestes' deception, caused the sun to travel in the opposite direction. So Thyestes for a time enjoyed the reward of his adultery, and Atreus was banished. Later, Atreus returned and became king, exiling Thyestes in his turn, only to recall him and avenge himself for Aërope's seduction. He pretended to be reconciled with Thyestes and invited him to a banquet to celebrate the reconciliation. He killed Thyestes' sons and gave them to him to eat (the banquet is described in the fifth act of Seneca's *Thyestes* in a scene of overpowering horror). Too late, Thyestes realized what he had eaten. As the heavens darkened and the sun hid from sight of the crime, Thyestes cursed Atreus and went into exile.

OTHER VERSIONS OF THE MYTH OF THYESTES

Adrastus and Thyestes at Sicyon. Apulian red-figure krater by the Darius painter, ca. 325 B.C.; height 25¼ in. A scene from Sophocles' (lost) tragedy *Thyestes at Sicyon*. Adrastus, king of Sicyon, central figure in the lower register, commands Thyestes (wearing a cap) to give up the baby Aegisthus to the huntsman (extreme lower left) for exposure. On the lower right, the baby's mother, Pelopia, is comforted by the queen of Sicyon, Amphiheia. In the top register, Apollo (with a swan and a panther) sits in the middle looking toward a Fury (right center): Apollo had commanded the incest of Thyestes, and the Fury foreshadows the further working out of the curse on the house of Atreus if Aegisthus survives. On the right is the figure of Sicyon, representing the city bearing his name, and on the left Artemis (protectress of the young) orders Pan to see that Aegisthus is saved, perhaps (like Zeus on Crete) through being suckled by a goat. The vase shows that other traditions of the myths of Thyestes and Adrastus existed as well as those known from Aeschylus. Here Adrastus is ruler at Sicyon, having fled from Argos, and Aegisthus is born at Sicyon, where Pelopia had been sent for safety after the "banquet of Thyestes" at Argos. (Boston, Museum of Fine Arts.)

AGAMEMNON, CLYTEMNESTRA, AND AEGISTHUS

Thus the curse of Myrtilus affected the first generation of Pelops' descendants. The quarrel of Thyestes and Atreus was continued by their sons. In his second exile, Thyestes lay with his daughter Pelopia, as he had been advised to do by an oracle, and became the father of Aegisthus, who continued the vendetta in

the next generation. The son of Atreus, Agamemnon, succeeded his father as king of Mycenae. He married Clytemnestra and their children were Iphigenia, Electra, and Orestes; a third daughter, Chrysothemis, is important only as a foil for Electra in Sophocles' play (see the Additional Reading at the end of this chapter).

Agamemnon in his turn committed an unspeakable crime against one of his children. He sacrificed his daughter Iphigenia at the start of the Trojan expedition in order to appease Artemis and gain favorable winds to sail from Greece. This is one of the most powerful and pervasive of all Greek myths and was frequently represented in literature and art. It is the central myth with which Aeschylus sets forth the background to the action of his tragedy *Agamemnon* (184–249), and it is the theme of Euripides' final tragedy, *Iphigenia in Aulis*. It was narrated by the Roman poet Lucretius in a moving passage that we translate on page 453.

Agamemnon's crime earned the implacable hatred of his wife, Clytemnestra. During his absence at Troy she committed adultery with Aegisthus, who had his own reasons to join her in plotting vengeance against Agamemnon. On his return from Troy with his prisoner, the Trojan princess Cassandra, Agamemnon was enticed into the palace and murdered by Clytemnestra and Aegisthus. This is the central event (although it takes place off stage) of the *Agamemnon* of Aeschylus. After the murder, Clytemnestra justifies the deed in a speech we translate later in this chapter (Aeschylus, *Agamemnon* 1372–1398). Aegisthus also took full responsibility for the deed, which he welcomed as a just vengeance upon the son of Atreus, the enemy of his father, Thyestes.

In the *Odyssey*, Agamemnon's ghost tells Odysseus how he and Cassandra were murdered (Homer, *Odyssey* 11. 408–426):

 It was not brigands who murdered me on land, but Aegisthus, with my cursed wife, who killed me, arranging my death and fate, having called me into the house and given me a feast—killing me like an ox at the manger. Thus I died a most pitiable death, and around me my other companions were being ruthlessly killed, like tusked boars. . . . You have in the past experienced the death of many men, but if you had seen those deaths you would have most of all been grieved to see us lying in the hall amid the wine-bowls and tables full with food, and the whole floor flowing with blood. Most pitiable was the voice of the daughter of Priam that I heard, of Cassandra, whom treacherous Clytemnestra killed with me. But I, lifting my hands [in supplication] let them fall to the earth as I died by the sword, and my shameless wife turned away, nor did she dare, even though I was going down to the House of Hades, to close my eyes or mouth with her hands.

In this version Agamemnon was killed by Aegisthus and Clytemnestra at the banquet celebrating his homecoming. The more widely accepted version is that of Aeschylus, in which Clytemnestra kills him in his bath, trapping him in a robe while she stabs him. Aeschylus has Cassandra foresee the murder and her own death in a dramatic prophecy before she enters the palace. She links

The Death of Agamemnon. Attic red-figure krater, possibly by the Dokimasia painter, ca. 470 B.C., height 20½ in. Aegisthus holds Agamemnon by his hair, having already thrust his sword into him. Agamemnon, enmeshed in a net, slips to the ground as Clytemnestra (holding an axe) runs in from the left and a woman (perhaps Electra) tries to protect Agamemnon. Cassandra tries to escape to the right. On the other side of this vase, the death of Aegisthus is painted. (William Francis Warden Fund, Courtesy, Museum of Fine Arts, Boston.)

Agamemnon's murder to the banquet of Thyestes, which she describes as if it were before her eyes (*Agamemnon* 1095–1125):

 Yes, I am persuaded by the evidence I see, as I weep for these children murdered, for the cooked flesh eaten by their father. . . . What now is this new sorrow? Great is the evil being plotted in this palace, intolerable to its friends, hard

to atone for, and one where defense is far away. . . . Oh, wretched woman, is this your purpose? As you wash your husband, who shares your bed, . . . how shall I describe the end? . . . What is this I see? Some net, the net of Hades? But the net is she who shares the guilt for the murder. . . . Ah! Ah! Keep the bull from the cow! She takes him in the robes and strikes him with the black-horned weapon.² He falls in the bath full of water. It is the fate brought by the bath, contriver of treacherous murder, that I describe to you.

The prophetic cries of the inspired victim describe, as vividly as any objective report, the death of Agamemnon, which she shortly is to share. With the corpses of Agamemnon and Cassandra at her feet, Clytemnestra defends the justice of her actions. Her speech ends with the terrifying image of Clytemnestra as the earth-mother being renewed by the rain of the sky-god—in this case the blood of her murdered husband. The archetypal Sacred Marriage has never been used with greater poetic effect (Aeschylus, *Agamemnon* 1372–1398):

 I have said many things previously to serve my purpose, all of which I shall now contradict, without any shame. For how else could anyone fulfill hatred for an enemy who pretends to be a friend and string up nets of woe too high for him to overleap? For me this contest in this ancient quarrel has come after long planning—in the fullness of time, I say. I stand here where I struck him, over my deeds. Thus did I act, I shall not deny it, so that he could not escape or ward off his doom. I entrapped him in the fatal richness of the robe, encircling him with the huge net, like fishes. I struck him twice, and with two cries he let his limbs go slack; a third blow did I add as a thank-offering to Zeus below the earth, keeper of the dead. Thus fallen he gasped out his life, and at his dying breath he spattered me with rapid spurts, a dark-red rain of blood, and I rejoiced no less than the sown Earth rejoices in the glory of the rain that Zeus sends for the birth of the swelling buds. Thus my case rests, elders of Argos assembled, and may you too rejoice, if you would like to rejoice. As for me, I exult in my imprecations. If I had poured a libation for the corpse as would be fitting, it would have been of wine and curses—with justice, yes, with more than justice. So great were the accursed evils with which he filled our cup in the house, and now by his homecoming he drinks it to the dregs.

It is notable that of the sons of Atreus only Agamemnon was affected by the curse of Myrtilus. Menelaüs had his own sorrows in the adultery and flight of his wife, Helen, the cause of the Trojan War. Euripides portrays him in a contemptible light in his tragedy *Orestes*, the action of which takes place soon after Orestes has murdered Clytemnestra. He is hardly any more attractive in the *Andromache* (whose action we describe later in this chapter) or in the *Trojan Women*, whose action takes place immediately after the sack of Troy. All the literary versions of the myth portray the working out of the curse on the House of Atreus exclusively in the family of Agamemnon, whose son, Orestes, inherits its consequences.

ORESTES AND ELECTRA

According to Aeschylus, Orestes was away from Mycenae at the time of Agamemnon's murder. While Clytemnestra and Aegisthus usurped the throne, he grew to manhood in exile at the court of Strophius, king of Phocis. It was now his duty to avenge the murder of his father, even though one of the murderers happened to be his own mother; and Apollo commanded him to carry out his duty. He returned to Mycenae, and with the encouragement of his sister Electra, murdered Clytemnestra and Aegisthus. In the *Odyssey*, Homer makes Zeus praise Orestes for his piety toward his dead father; and Sophocles, of the three Athenian tragedians (each of whom wrote a tragedy on the murder of Clytemnestra), is the most neutral. In both Aeschylus and Euripides, however, the feeling of revulsion at the matricide predominates. In this tradition Orestes was pursued by the Erinyes, the Furies, the ancient divinities who avenge the victims of murder. At the end of Euripides' *Electra*, the Dioscuri prophesy that Orestes must go into exile, pursued by the Furies. Eventually, they promise, he will appeal to Athena and be acquitted of the charge of matricide by the court of the Areopagus at Athens.

These events are the subject of the *Eumenides*, the third drama in Aeschylus' trilogy *Oresteia*. The play begins at Delphi, where Orestes has come pursued by the Furies. There Apollo orders him to go to Athens, promising to protect him. At Athens he pleads his case before the court of the Areopagus, whose members, citizens of Athens, are the jury.³ Apollo defends him, and Athena presides, while the Erinyes claim the justice of their punishment. The jury's votes are tied, and Athena gives her casting vote in favor of Orestes' acquittal, on the grounds that the killing of a mother does not outweigh the murder of a husband and father and that the son's duty toward a father outweighs all other relationships. Thus the curse on the House of Atreus comes to an end; the Erinyes are appeased and given a new name, the Eumenides (Kindly Ones), and worshiped thereafter at Athens.

This version of the myth focuses on the development of law as the vehicle for justice, as against the ancient system (represented by the Erinyes) of blood-guilt and vengeance. But the arguments of Athena are hardly persuasive, and we are left in some doubt as to whether Aeschylus himself believed in their validity. Nor is this as important as the fact that it was the will of Zeus that had already determined that Orestes would be acquitted.⁴ Indeed, to Aeschylus, as

➔

Orestes at Delphi. Apulian krater, ca. 370 B.C.; height 35½ in. Orestes clings to the omphalos in the temple of Apollo, while Apollo wards off a Fury who flies in from the upper left. The Pythia runs off in horror from her tripod (seen between the legs of Apollo), and Artemis, on the right, with her hunting hounds, scans the heavens for more flying Furies. Various other details reinforce the setting in the temple—the three Ionic columns, the second tripod (to the left), the Pythia's key to the temple, which she is dropping, and the dedications (chariot wheels and helmets) at the top center. (*Naples, Museo Nazionale.*)

to many authors, playwrights, and poets since his time (including Eugene O'Neill and T. S. Eliot in the twentieth century), the legend of Orestes is important because of the moral and religious principles that it introduces. In its original form, the story of the House of Atreus is one of blood-guilt descending from one generation to another. The murder of Agamemnon is an act of vengeance, which is more fundamental to the myth than the tragic pride (*hubris*) that precedes the fall of Agamemnon, or the jealousy of Clytemnestra against Cassandra. Similarly Orestes acted with piety in avenging his father's death; his "guilt" is a later—if more humane—interpretation. Indeed, it is illogical, for it ignores the fact that Apollo had ordered him to murder Clytemnestra. It was the genius of Aeschylus that transformed the primitive legend and, in place of the ancient doctrine of blood-guilt and vengeance, substituted the rule of reason and law.

Aeschylus presents his monumental tragic version in his trilogy *Oresteia*, consisting of *Agamemnon*, *Libation Bearers* (*Choephoroi*), and *Eumenides*. We are fortunate to have dramas of all three tragedians—Aeschylus, Sophocles, and Euripides—that deal with the events of the saga that concern Electra, the return of Orestes, and the murder of Clytemnestra and Aegisthus. These are the subjects of the second play (*Libation Bearers*) in Aeschylus' trilogy and of the *Electra* of Sophocles and the *Electra* of Euripides. Thus we are in the unique position of being able to compare the three great dramatists in their manipulation of the same plot. Each has produced a masterpiece, stamped with an individual conception of motivation, character, and religion. These three plays on an identical theme could not be more different in their personal statements and universal implications.

Electra is the focal point of Sophocles' play. Even while Orestes is killing their mother, it is Electra whom we see outside the palace with her cry, "Strike her again!" And it is Electra who, with exquisite Sophoclean irony, taunts and lures Aegisthus to his death at the hands of Orestes. Sophocles accepts the fact that Orestes has acted justly in his obedience to Apollo's command, and he presents us with a compelling portrait of Electra, passionate in her devotion to her murdered father, consumed by hatred for her mother, Clytemnestra, and her mother's lover, Aegisthus, and kept alive by the hope that Orestes will return to mete out retribution and justice. Among the glories of Sophocles' version are a dramatic confrontation between mother and daughter and a recognition scene between brother and sister of great emotional intensity. Sophocles shows us what anger, frustration, and longing can do to the psyche of a young woman.

Even more brutal, Euripides' portrayal of Electra affords its own kind of pity and fear, tinged as it is by the sordid, realistic, and mundane. Electra and Orestes act at times as little more than neurotic thugs: Electra's revenge, in particular, is motivated as much by sexual jealousy as by any sublime sense of absolute justice. Her monologue to the head of Aegisthus is a study in horror, and brother and sister join side by side in butchering their mother. Castor, the *deus ex*

machina, with typically Euripidean philosophical ambiguity, tells us that Apollo is wise but that his orders to Orestes were not wise.

For a more lengthy analysis of Aeschylus' *Libation Bearers* and the *Electras* of Sophocles and Euripides with pertinent excerpts from the texts, see the Additional Reading at the end of this chapter.

It is not surprising that there are other versions of Orestes' story, which allow him to be purified from the blood-guilt either by some ritual or by performing an expiatory deed, without undergoing trial and acquittal. In Euripides' play *Iphigenia in Tauris* not all the Erinyes have accepted the judgment of Athena, and some still pursue Orestes. Once again he comes to Delphi, where he is told by Apollo to go to the land of the Tauri (the modern Crimea) and fetch a wooden statue of Artemis. It was the custom of the Tauri to sacrifice strangers to Artemis in her temple, and Orestes and his companion Pylades (now the husband of Electra) are handed over to the priestess of Artemis, none other than Orestes' sister Iphigenia. She questions the Greek strangers about events at Argos and Mycenae and then reveals to Orestes who she is and how she has been miraculously saved at Aulis by Artemis and transported to the land of the Tauri. Once she recognizes Orestes, they deceive Thoas, king of the Tauri, into letting them take the statue of Artemis to the sea, to be cleansed of the pollution caused by Orestes, the matricide. They board Orestes' ship and set sail, but adverse wind and waves drive them back toward the land. Before Thoas can seize them, Athena appears and instructs him to let them go. So Orestes and Iphigenia return to Greece. They dedicate the statue of Taurian Artemis at Halae in Attica. Orestes returns to Mycenae, while Iphigenia stays in Attica as the priestess of Artemis at Brauron for the rest of her life.

Thus Orestes recovered his sanity and reigned at Mycenae. Later, he is said to have married his cousin Hermione (daughter of Helen and Menelaüs), and by her to have been the father of Tisamenus. Before his madness, he was betrothed to her, but she married Neoptolemus, son of Achilles, and accompanied him to the land of the Molossi in Epirus. According to Euripides, however, in his tragedy *Andromache*, Neoptolemus lived in Phthia (the home of his grandfather Peleus) with Hermione and Andromache, widow of the Trojan hero, Hector, and now given to Neoptolemus as the spoils of war. Hermione, who is barren (while Andromache bears a child), plots to escape with Orestes, who has unexpectedly appeared while journeying to the oracle of Zeus at Dodona. This all takes place while Neoptolemus is away at Delphi on a mission to appease Apollo for his anger with him after the death of his father, Achilles, at Troy. Orestes himself goes to Delphi, and there Neoptolemus is brutally murdered by the Delphians in the sanctuary of Apollo. Orestes organizes the attack, but it is not clear if he actually takes part in the murder. Neoptolemus is buried in the sanctuary of Apollo, thus gaining the status of a hero with a cult. Pindar twice

TRANSFORMATIONS OF THE LEGEND

The legend of the *Oresteia* has inspired many works of literature. Especially memorable in the twentieth century were Eugene O'Neill's trilogy *Mourning Becomes Electra* (1931), a saga set in nineteenth-century New England, and T. S. Eliot's *The Family Reunion* (1939), where the setting is the house of an English family. John Barton has written a monumental cycle of ten plays entitled *Tantalus: An Ancient Myth for a New Millennium* (2000, an extension of an earlier work *The Greeks*), which embraces the sagas of Mycenae and of the Trojan War. In French there is, for example, Jean Giraudoux's *Electra* (1937), and Jean-Paul Sartre in his play *The Flies* transforms Orestes into a paradigm of existentialism. *The Prodigal* (1960), by the American playwright Jack Richardson, might also be mentioned.

In the ingenious novel *Angel of Light*, by the American Joyce Carol Oates, Orestes and Electra have become students in Washington, D.C., descendants of the abolitionist martyr John Brown, who are convinced that their father, a director in the Ministry of Justice, has been murdered by their mother.

tells the story of his death, each time without mentioning the name of Orestes (*Nemean Ode* 7. 33–47: cf. *Paeon* 6. 98–120):

 Neoptolemus came as a defender to the great navel of the broad-bosomed earth, when he had sacked the city of Priam, where the Danaäns had labored. He sailed from Troy past Scyros, and wandering they came to Ephyra [Corinth]. And for a short time he ruled over Molossia, and his descendants always have this honor. But he went to the god [Apollo], bringing the first fruits of the spoils from Troy. And there a man killed him with a dagger fighting over the [sacrificial] meat.

As for Orestes, he married Hermione and came to rule over Argos and Sparta, as well as Mycenae.⁵ After his death (from a snake bite) he was buried at Tegea, which in historical times was the rival of Sparta. According to Herodotus, the Spartans got possession of his bones, on the advice of the Delphic oracle, and afterwards always were victorious over the Tegeans. Tisamenus was the Achaean leader against the Heraclidae, at whose hands he perished. Electra, as has already been mentioned, married Orestes' constant friend and companion, Pylades, son of Strophius, and by him bore two sons, Strophius and Medon. Thereafter she disappears from the legend.

ADDITIONAL READING

ORESTES AND THE THREE ELECTRAS

Aeschylus' *Oresteia* was first produced in 458 B.C. The second play of this trilogy, *Libation Bearers* (*Choephoroi*), tells of the return of Orestes, his reunion with

his sister Electra, and the murder of their mother Clytemnestra and her lover and husband Aegisthus. As has been noted in this chapter, Sophocles and Euripides also wrote plays on this same theme. Thus a unique opportunity is afforded us to compare and contrast the methods and the purposes of these three great dramatists. Following are some interpretative observations with translations of pertinent excerpts from each of the three plays.

AESCHYLUS, *LIBATION BEARERS* (*CHOEPHORI*)

The play opens with Orestes, accompanied by his companion Pylades, having returned to Argos. Orestes, with a prayer to Hermes, places two locks of his hair upon the tomb of his father Agamemnon. As Electra enters accompanied by a chorus of women bringing offerings to the grave, the two young men withdraw. After libations have been offered, during which Electra reveals her plight, she discovers Orestes' locks of hair and immediately recognizes them because, in texture, they are like her own. Similarly she is convinced Orestes has returned because the footprints that he has left match hers exactly. These signs of recognition strike the contemporary reader as dubious and extremely curious, but apparently they were used by primitive people.⁶

At this point Orestes reveals his identity by showing a woven design on his clothing of wild animals that his sister remembers. Their recognition scene is short, swift, and joyous. To Electra, her brother brings the light and the hope of her salvation; in him alone four lost loves are restored: that of her father, her mother, her sacrificed sister, and her beloved Orestes himself. A lengthy threnody follows in which Orestes, Electra, and the Chorus elaborate upon the theme of their just retribution and call upon Agamemnon, with prayers to Zeus and Apollo as well. Orestes, very much in command, reveals his plans for the murders of Aegisthus and Clytemnestra and gives Electra directions for her limited role in his plot. Orestes will be received into the palace and convey to Clytemnestra the false news that Orestes is dead (supposedly learned from Strophius, to whom the child Orestes had been sent).

Orestes has already disclosed the devastating power of Apollo's oracle with its dire predictions. If he does not kill to avenge Agamemnon's murder, his life will become a horror. Pursued relentlessly by the terrifying Furies of his father and covered by boils and a kind of leprosy, he will wander endlessly, an exile and pariah until he dies in misery. Orestes, then, is motivated by fear of these punishments and also by compassion for his father, by desire to win the inheritance that is his due, and by dismay that heroes who returned from Troy with his father are now subjected to the rule of two women, Clytemnestra and the weakling Aegisthus.

Orestes and Pylades are received by Clytemnestra into the palace. She accepts the report of her son's death with intense and mixed emotions. The servant Cilissa is called upon to bring the news to Aegisthus, who is away, and we

learn that it was this Cilissa who nursed and cared for Orestes when he was a baby and saw to it that he got safely away after the murder of Agamemnon.

Aegisthus returns to confirm the good news and upon entering the palace meets his death at Orestes' hands. Clytemnestra will soon be next. She had sent the women with libations to the tomb of Agamemnon because, in a terrifying dream, she gave birth to a snake and nestled it to sleep in coverlets. She gave the little monster her breast to suck and cried aloud in fright and pain as it fed and tore at her nipple, drawing blood that stained the milk. Now Orestes the serpent has come to fulfill her nightmare.

A servant cries out that Aegisthus has been murdered and rouses Clytemnestra with warnings that she will be next; Clytemnestra realizes that Orestes is not dead but alive and ready to kill her (885–930):

CLYTEMNESTRA: What is the matter? What is this shouting within the palace?

SERVANT: I tell you that the dead one is alive and come to strike the living dead.

CLYTEMNESTRA: Ah! I understand the meaning of your riddle. We die by treachery, just as we killed by treachery. Someone, quickly, give me an axe to kill a man. Let us see whether we win or lose. Now I have reached the critical moment in these terrible events.

Orestes is revealed with Pylades at his side and the murdered Aegisthus at his feet.

ORESTES: It is you I am looking for. I have dealt well enough with this one here.

CLYTEMNESTRA: Alas, strong Aegisthus, dearest, are you dead?

ORESTES: You love the man, do you? Fine, for you will lie in the same grave. Never will you be unfaithful to him now that he is dead.

CLYTEMNESTRA: Stop, my son, have reverence for this, your mother's breast, my child, from which so many times with toothless gums you drowsily sucked the milk that nourished you.

ORESTES: Pylades, what shall I do? Shouldn't I be in dread of killing my own mother?

PYLADES: What about the future and the sanctity of Apollo's oracles delivered by his holy priestess? What about binding pledges sworn in good faith? Make enemies of mortals rather than the gods.

ORESTES: You overcome my fears; your advice is good. Come, mother, I want to slaughter you right next to Aegisthus here. For, when he was alive, you thought him better than my father; now sleep with him in death, since you love him and hate the man you should have loved.

CLYTEMNESTRA: I gave life to you and I want to grow old with you.

ORESTES: You killed my father and you want to live with me?

CLYTEMNESTRA: My son, Fate had a part in all that has happened.

ORESTES: Then Fate has determined what is about to happen now.

CLYTEMNESTRA: Aren't you afraid of the curses of a mother, my son?

ORESTES: A mother? You bore me and then threw me out to misery.

CLYTEMNESTRA: I did not throw you out but sent you away to friends.

ORESTES: I, free born, was shamefully sold out, my person and my patrimony betrayed.

CLYTEMNESTRA: Where, then, is the price that I received for giving you up?

ORESTES: I blush to enumerate what you got in return, much to your shame.

CLYTEMNESTRA: You should count the sins of your father, not only mine.

ORESTES: Don't malign him, who suffered much, while you stayed safe at home.

CLYTEMNESTRA: It is grief for women to be without a husband, my son.

ORESTES: Yet the hardships of the husband insure the safety of the wife at home.

CLYTEMNESTRA: My son, you are going to kill your mother.

ORESTES: It is you who kill yourself, not I.

CLYTEMNESTRA: Watch out, beware the Furies, hounds of a mother's curse.

ORESTES: How can I escape the curse of my father, if I do not act?

CLYTEMNESTRA: I plead for my life as though to a dead man entombed, all in vain.

ORESTES: The fate of my father brings this fate down upon you.

CLYTEMNESTRA: Ah, this is the snake that I gave birth to and nourished.

ORESTES: The terror of your dreams prophesied the truth. You should not have committed murder. Suffer your own murder in retaliation.

A chorus comments upon the terrifying events and reiterates the themes of vengeance, justice, and the will of god. Then Orestes appears with the corpses of Aegisthus and Clytemnestra at his feet to claim that he has acted with justice. The scene parallels the one in the *Agamemnon* (with its rich and profound imagery of ensnarement, entanglement, and the net), where Clytemnestra after the murders of Cassandra and Agamemnon appears with her victims to claim that her actions have been just (p. 411). Orestes holds in his hands the very robe in which Agamemnon was entangled and butchered (973–1006):

 ORESTES: Behold the two of them, tyrants of this land, murderers of my father and despoilers of his estate. Haughtily they once sat on their august thrones, lovers then and even now, as you may infer from what has befallen them. They have remained true to their pledges: together they vowed death for my poor father and swore to die together. All these things that they swore are truly accomplished.

As you listen to my litany of their wicked deeds, look at this robe, an entanglement which they devised for my poor father as a fetter for his hands and a shackle for his feet. Spread it out, stand in a circle around it, point out this trap to ensnare her husband for father to see these unholy deeds of my mother, not my father but Helios, the Sun, the one who watches over everything so that he may bear witness for me when the time for judgment comes that I, with justice, was responsible for the fate of my mother. Aegisthus' death I need not mention, for he has received the just deserts of an adulterer according to the law. But she who devised this monstrous crime against her husband became preg-

nant by him; the children that she bore him she loved once but now, as it is all too clear, they have become her dire enemy. I'll tell you what she is like. If she had been born a serpent or a viper, she would have been able to infect by touch alone, no need of fangs to bite, because of an inherent, venomous audacity.

This robe, what am I to call it? Could I find the proper words? A trap for a wild beast, a snare for a corpse, or a covering for after the bath. One might call it a net to catch fish or one for animals or fabric to entangle the feet. The sort of thing a thief might own in order to make his living by ensnaring wayfarers and robbing them. With such a treacherous device, he could kill many, steal much, and warm his heart in comfort.

May I never get this kind of woman for a wife. By the will of the gods, may I die first, childless.

In the finale of the play *Orestes* is driven out by the Furies, frightening, with faces like Gorgons and serpents entwined in their hair. He will find salvation in the third play, the *Eumenides* (as we have seen) through the agency of Apollo and Athena and a civil court of law. The righteous will of Zeus is eventually accomplished.

SOPHOCLES' *ELECTRA*

In Aeschylus' *Libation Bearers*, Orestes maintains center stage, determining the course of the action. True, a stirring and compelling portrait of Electra emerges, delineating characteristics with great potential for further development. Yet she exits from the play before Orestes and Pylades enter the palace, and her presence, therefore, does not dilute the power of a vengeance delivered by Orestes himself at the dictates of Apollo. All is as it should be for the central play of a trilogy entitled *Oresteia*.

How different are the two *Electras* that follow! We do not know for sure whether Sophocles wrote his version before or after that of Euripides; the date for Sophocles' play is unknown, and 416 B.C. for Euripides' is only a conjecture. Because of the nature of the development in motives and characterizations and the drastic shift in religious and philosophical sentiment, Euripides' play is best considered last.

Sophocles' *Electra* begins with the return of Orestes to Mycenae, accompanied by both his tutor and his friend Pylades, ready to set in motion his plans to exact vengeance from Aegisthus and Clytemnestra for their murder of his father Agamemnon. In Sophocles, both are the murderers, not as in Aeschylus, where Clytemnestra did the actual deed herself. Orestes clearly and succinctly emphasizes the justice of his mission, ordained by god (32–37):

 ORESTES: When I went to the Pythian oracle to find out how I should win justice from the murderers of my father, Phoebus Apollo uttered this response, which I will tell you now: I alone, without men in arms, am to steal by treachery their righteous slaughter by my own hand.

The moans of a grieving Electra are heard from within the palace, and at the tutor's urging the three leave to carry out the orders of Apollo. Thus the recognition scene between brother and sister is postponed to achieve its full effect later in the play.

In her lengthy exchange with the chorus of sympathetic women, Electra reveals her misery; she cannot ever forget that her mother and her mother's bed partner split the skull of her father with an axe, as one would cut down a mighty and regal oak. Her laments for her beloved father are endless, her hatred for his murderers relentless, and she lives only in her hope for the return of her brother and vengeance. Unmarried and alone, without children, she has become a slave and a beggar in her father's house. In her helpless isolation, she awaits the return of her brother, her savior and her salvation. She reveals her soul and her psyche in the following summation (254–309):

 **ELECTRA:** I am ashamed, women, if it seems to you that I am too excessive in my suffering and my many complaints. Forgive me, but I am forced to act this way. How could a woman of noble integrity help but behave as I do, if she sees what I see—calamitous evils in my father's house, never ceasing causes of pain, continually fresh and renewed. First of all, my relationship with the mother who bore me has come to be most hateful. Then, in my own house I live with the murderers of my own father; I am ruled by them, I am dependent on them for what they give and what they take away alike. Furthermore, what kind of day do you think that I spend when I see Aegisthus sitting on the throne of my father and I behold him wearing the same clothes as he did, pouring libations at the very hearth where he killed him, and I witness the ultimate hubris, the murderer in the bed of my father, with my abominable mother—if I should call the woman who sleeps with him my mother. She is so brazen that she lives with the guilty wretch, unafraid of any retribution from any of the Furies. Instead, as though laughing exultantly at her wicked deeds, she has fixed the date on which she killed my father through treachery—and on this day of each month she has established choruses and sacrifices, a holy celebration for the gods who keep her safe.

I, however, ill fated, seeing in these halls this evil ceremonial in the name of my father, I, all alone lament, myself to myself, and weep and pine away; but I cannot indulge my grief as much as would fill my heart with joy because this queen of lies shouts wicked renunciations such as these: “Damned and hateful creature, are you the only one for whom a father has died? No other person in the world has ever been in mourning? May you go to hell and may the gods below never release you from your agonies.”

Thus she wantonly rages, except when she hears some rumor that Orestes has returned. Then, mad with rage, she stands close beside me and yells: “Aren't you the one responsible? Isn't all this your doing, you, the one who stole Orestes safely out of my arms? I want you to know that you will pay the just reward that you deserve.” Such are the words she screams at me; and present by her side, he urges her on with the same reproaches, this renowned bridegroom of hers, completely impotent, an utter disaster, whose battles are only fought behind the skirts of a woman.

I, poor wretch, waste away, waiting for Orestes to put an end to these miseries, for living in the constant expectation that he is about to accomplish this great feat, I have lost all possible hope that he will ever return. So, dear women, in such circumstances, I cannot behave with pious self-control but in the midst of these evils, necessity compels me to pursue an evil course.

Sophocles purposefully changes Aeschylus, who has the servant Cilissa nurse the infant Orestes and whisk him away after the murder, in order to depict Electra as mother-figure to her brother.

A scene follows in which Electra encounters her sister Chrysothemis, who, as we learn, has been willing to obey Clytemnestra and Aegisthus and as a result lives freely and normally with them in the palace. Such compromise is incomprehensible and disgusting to Electra. Chrysothemis warns Electra that if she does not change her ways, she is to be sentenced upon Aegisthus' return to spend the rest of her life imprisoned in a dungeon. We learn also that Chrysothemis has been sent to the grave of Agamemnon with libations from Clytemnestra, who has been tormented by an ambiguous dream that could foretell Orestes' vengeance: she saw Agamemnon come to life again. He took back his royal scepter, now held by Aegisthus, and planted it in his own ground; there it burst into luxuriant leaf and quite overshadowed the whole of Mycenae.

Chrysothemis' only importance lies in her role in Sophocles, where she is created as a dramatic foil for Electra, in much the same way as this playwright uses Ismene to illuminate by contrast the character of Antigone. Central to Sophocles' play is a bitter and revealing confrontation between mother and daughter (516–609); there is no such scene in Aeschylus. Clytemnestra argues that Agamemnon should not have sacrificed their daughter Iphigenia. Instead, a child of Menelaüs and Helen should have been the victim at Aulis, since the Greek expedition against Troy was on behalf of Menelaüs, whose wife Helen had been abducted by the Trojan prince Paris. Electra responds with a vehement defense of her father:

 **CLYTEMNESTRA:** It is obvious that you feel free to leave the palace and without any restraint disgrace your family and friends, since Aegisthus is not here to prevent you as he always does. But now since he is away you show me no respect. Over and over again for many to hear you have spoken out that I rule brazenly and unjustly, treating you and all that you hold dear outrageously. But I am not guilty of hubris. I revile you only because you revile me so often.

Your father is always your excuse, and nothing else—that he died by my hand. By my hand, I am well aware of that and cannot deny the charge. But Justice killed him, not I alone, and you would be on the side of Justice if you had any sense at all. Why? Because this father of yours, whom you are always bemoaning, was the only one of the Greeks to have the effrontery to sacrifice his daughter to the gods, Iphigenia, your sister. Of course it was easy enough for him to beget her, with none of the pain that I suffered when I gave her birth. So be it! Yet explain this to me. Why and for whom did he sacrifice her? Will your

answer be, for the Greeks? But they had no right to kill a daughter of mine. If he killed her on behalf of his brother Menelaüs, didn't he still owe me just retribution for killing what was mine? Menelaüs had two children of his own; since the expedition against Troy was for the sake of their mother and father, wasn't it only right that they should die, instead of my daughter? Did Hades have some sort of longing for the death of a child of mine rather than that one of Helen's? Did your accursed father love the children of Menelaüs and feel nothing for those that I bore to him? Isn't this the behavior of an evil, foolish father with no scruples? I think so, even if you do not. Iphigenia who is dead would agree with me, if she could speak. I am not sorry for what I have done. If you think that I am evil for feeling as I do, you had better have justice on your side before you blame others.

ELECTRA: This time you cannot claim that I started this painful confrontation and that you were only responding to my reproaches. Yet if you will allow me, I would like to make a righteous defense on behalf of both my dead father and my sister.

CLYTEMNESTRA: Yes, I allow you. If you always began your speeches so politely, you would not be such a pain to listen to.

ELECTRA: Then I will speak to you. You say that you killed my father. What further admission could be more disgraceful, whether you acted justly or not? I tell you that you killed him not in justice but because you were enticed by the allurements of the evil man with whom you live. Ask the huntress Artemis what ransom she demanded for the release of the many winds which she held fast at Aulis. Since we cannot find out the answer from her, I will tell you what I have been told. Once when my father was hunting in a sacred grove of the goddess, at the sound of his footsteps a dappled stag with antlers started up. He killed it and happened to make some boast or other; at this the daughter of Leto was enraged and detained the Achaeans until the time he would sacrifice his own daughter in compensation for the animal. Thus it was that Iphigenia was sacrificed; there was nothing else he could do so that the army could sail either homeward or to Troy. It was for this and not for Menelaüs that he sacrificed her, with great reluctance and much against his will. Suppose that he did perform the sacrifice out of a desire to help Menelaüs, as you argue. Did he have to die at your hands because of this? According to what kind of law? Be careful that you do not regret imposing such a law for human beings since you bring punishment down upon yourself. For if we are to commit murder in retaliation for murder, you should be the first to die, in order to satisfy the justice you deserve. But watch out that you are not making an insubstantial excuse to justify your actions. Tell me, if you like, for what reason you are doing the most shameful thing of all, you who sleep with the murderer with whom you once killed my father, and you who have begotten a child by him but have cast out your legitimate children born in holy wedlock.⁷ How could I sanction such behavior? Or will you say that these actions too are done in recompense for your daughter? If you do argue so, it is to your shame. For it is not right to marry the enemy, Aegisthus, for the sake of your daughter. Yet it is impossible to give good advice to you, the one who continually berates us with the charge that we speak ill of our mother, and I consider you more a tyrant than a mother towards us, I who live

a life of misery, suffering many torments at the hands of you and your bed-mate. Your other child far away, poor Orestes, having barely escaped your violence, wastes away his ill-starred life. Many times you have accused me of nurturing him to be your avenger. Know full well that I would have done so, if I had the power. For these reasons then denounce me to everyone, whether you proclaim me as evil or loud-mouthed or full of shamelessness. Indeed, if I am so accomplished in such behavior, it only shows that I do not in the least belie a nature and character just like yours.

In this way mother and daughter argue their case. The scene ends with Clytemnestra calling upon Apollo to grant that her dream might turn out well for her and that she might live a long, safe, and happy life. At the conclusion of her prayer, the tutor arrives to announce the false news of Orestes' death and set in motion the action that will end in death for Clytemnestra and Aegisthus. With similar dramatic irony, Sophocles in *Oedipus the King* marks the beginning of the end for Jocasta when the messenger from Corinth arrives immediately after her invocation to Apollo for salvation.

Belief that Orestes is dead brings to Clytemnestra a joyous relief but also a painful sadness. Electra is devastated and in a second clash with Chrysothemis reveals that she is ready, all alone, to kill Aegisthus herself. Sophocles' Electra does not even contemplate the murder of her mother.

When Orestes and Pylades arrive bringing an urn that supposedly contains the ashes of the dead Orestes, Electra receives it into her hands and utters these heartbreaking words (1126–1170):

ELECTRA: This urn is a memorial of the life of Orestes, to me the most beloved of men. Here is all that is left of him. With what high hopes I sent you away, dear brother, and how far they have fallen now that I have gotten you back. Now I fondle you in my hands but you are no more. You were gloriously alive when I rescued you out of the palace.

How I wish that I had died before I stole you away with these same hands and delivered you into a foreign land to save you from being murdered; if I had not done so, you could then on that day have died here, and shared death and a grave with your father. But now as it is, you have died miserably, far from home, an exile in a foreign land, separated from your sister. I, wretched me, did not bathe your corpse with loving hands or remove your remains from the blazing pyre as I should have; instead, poor brother, your funeral was in the hands of foreigners and you have come back to me as a handful of ashes in a tiny urn. Alas, unhappy me, all for nothing was the care which long ago I lavished upon you—a sweet burden; you never loved your mother more than you did me, and I was your nurse, not anyone else in the household; in addition to mother and nurse, you could call me your sister. But now with your death, all is over in one day. You have gone and have taken everything away with you, like a whirlwind. Father is gone, you yourself are gone and your death has killed me. Our enemies laugh and our mother is insane with joy, she no mother at all, against whom you were to appear as an avenger, as you so often promised in secret

messages. But your unfortunate fate and mine have taken everything away and have sent you back to me thus—ashes, an ineffectual shade instead of the living form of my dear, dear brother. Woe is me, O pitiable corpse, alas! You have been sent on a most dread journey. Welcome me to this home of yours, me your sister, whom you have destroyed—nothingness into nothingness—so that I may live with you below for the rest of time. Since I shared equally with you when I was in the upper world, now too in death I long to be given a place with you in your tomb. For I envision an end of suffering for those who are dead.

In the recognition scene that follows, Electra, with an overwhelming joy, rushes into the arms of her brother. It is a signet-seal of his father that Orestes shows as final proof of his identity—proof more realistic, if not irrefutable, than that in Aeschylus! Orestes, her surrogate father and mother, now becomes in a sense her surrogate lover and most certainly her very real savior.

Apollo will grant Electra's prayer for success. She remains center stage while Orestes kills Clytemnestra and Aegisthus. Sophocles reverses the order of the murders with telling effect. Here is the conclusion of his play (1398–1510):

 ELECTRA: Dearest women, the men will accomplish their mission at once. Just be silent and wait.

CHORUS: How now? What are they doing?

ELECTRA: She is preparing the urn for burial and the two are standing beside her.

CHORUS: Why have you hastened out of the palace?

ELECTRA: I must watch so that we may know when Aegisthus returns.

CLYTEMNESTRA (from within the palace): Alas, the house is bereft of friends but teeming with killers.

ELECTRA: Someone is crying out from within. Don't you hear, my friends?

CHORUS: I heard a chilling cry that makes me shudder.

CLYTEMNESTRA: Woe is me, O Aegisthus, where can you be?

ELECTRA: Listen, someone is calling out again.

CLYTEMNESTRA: My child, my child, pity your mother who bore you!

ELECTRA: But he received no pity from you and neither did his father who begat him.

CHORUS: O unfortunate city! O unhappy family! The fate that supported you daily now is waning, waning.

CLYTEMNESTRA: Ah, I am struck!

ELECTRA: Strike her again, and more deeply, if you have the strength.

CLYTEMNESTRA: Ah, I am struck again!

ELECTRA: I only wish Aegisthus were there too!

CHORUS: The curses are being fulfilled. Those who lie beneath the earth are alive, for those once dead are draining the blood of the murderers in retribution. Look, they are before us. A hand drips with blood from a sacrifice to Ares, and I cannot find any fault.

ELECTRA: Orestes, how has it turned out?

ORESTES: It has turned out well in the house, if Apollo prophesied well.

ELECTRA: Is the wretched woman dead?

ORESTES: No longer be afraid that your mother's arrogance will ever dishonor you again.

CHORUS: Be quiet, for I see Aegisthus approaching.

ELECTRA: Orestes and Pylades, get back.

ORESTES: Where do you see the man?

ELECTRA: He comes towards us from the outskirts of the city, with a smile on his face.

CHORUS: Get back inside as fast as you can so that you may take care of the situation well, as you have just done previously.

ORESTES: Rest assured, we will do it.

ELECTRA: Now hurry within.

ORESTES: I am gone.

ELECTRA: Let me take care of him out here.

CHORUS: It would be a good idea for him to hear from you a few gentle words of assurance so that he may rush unsuspecting into his hidden ordeal with justice.

AEGISTHUS: Which one of you knows the whereabouts of the strangers from Phocis, who they say have brought the news that Orestes has lost his life in the wreckage of chariot? You, I ask you, yes you, the one always so insolent before, for I believe that his death touches you especially and you especially know about it and can answer.

ELECTRA (her responses to Aegisthus are laden with dramatic irony): I know about it. How could I not know about it and remain uninformed about a calamity touching those dearest to me?

AEGISTHUS: Then where might the strangers be? Tell me.

ELECTRA: Within. They have greeted a loving hostess.

AEGISTHUS: Did they bring the news that he was truly dead—for sure?

ELECTRA: Yes, and not by word alone, but they even offered proof.

AEGISTHUS: Is it possible for us to see this proof clearly?

ELECTRA: We certainly can and it is a very unenviable sight.

AEGISTHUS: You have said much to please me—how unusual!

ELECTRA: May you be pleased, if this happens to give you pleasure.

AEGISTHUS: I order that the doors be opened to display his corpse for all the Mycenaeans and Argives to see, so that if any of them were once elated by vain hopes in this man, now upon beholding him dead they may accept my bridle and learn good sense without my having to chastise them with force.

ELECTRA: Certainly I have learned this lesson; in time I have come to my senses and now acquiesce with those who are stronger.

AEGISTHUS (upon the revelation of the corpse): O Zeus, what I behold is a portent that has befallen not without the ill will of the gods. If it entails a just nemesis, I do not say. Remove the covering over the eyes completely so that my relative may receive proper lamentation from me.

ORESTES: Lift the cloth yourself; it is yours to do not mine—to behold this face and to speak words of affection.

AEGISTHUS: You give good advice and I will follow it. But you, call Clytemnestra, if by any chance she is in the house.

ORESTES: She is close to you; no need to look elsewhere.

AEGISTHUS: Ah, what do I look upon?

- ORESTES: Of whom are you afraid? Whom do you not recognize?
 AEGISTHUS: Into the trap of what men have I fallen? Poor me!
 ORESTES: Haven't you been aware that you who are alive have been conversing face to face with the dead?
 AEGISTHUS: I understand your meaning. It cannot be otherwise; this must be Orestes who is speaking to me.
 ORESTES: You the best of prophets and yet fooled for so long?
 AEGISTHUS: Wretched me, I am done for! Yet let me say a word.
 ELECTRA: Don't let him say more, brother; don't prolong all this talk, by the gods. When mortals are enmeshed in evil, what advantage is there in delay for the one who is about die? Kill him as quickly as possible, and when he is dead throw his body to scavengers for the burial he deserves, far from our sight, since for me this would be the only deliverance from evil.
 ORESTES: Go inside. Be quick about it. For now the contest is no longer of words but about your life.
 AEGISTHUS: Why do you force me into the palace? If your action is good, how come you need the dark and are not ready to kill me out here?
 ORESTES: Don't give orders to me. Go inside where you killed my father so that you may die in the same place.
 AEGISTHUS: Is it really necessary that this house witness future as well as the present evils that have fallen upon the family of Pelops?
 ORESTES: It will witness yours, for sure. I am your unerring prophet in this.
 AEGISTHUS: You boast about a skill that you did not inherit from your father.
 ORESTES: Your replies are too long and our short journey is delayed. Now go.
 AEGISTHUS: Lead on.
 ORESTES: You must go first.
 AEGISTHUS: So that I may not escape you?
 ORESTES: No, so that you may not die where it pleases you. I must see to it that this is bitter for you. This swift justice should be meted out to all who desire to act outside of the laws—death, for then there would not be so much crime.
 CHORUS: O family of Atreus, how much you have suffered to reach freedom amid such adversity, freedom crowned by this present act of daring.

Apollo's will has been accomplished and the justice of Zeus has been fulfilled. There are no Furies to pursue a guilty Orestes in this masterpiece that explores so profoundly the heart and the soul of a frightening, pitiable, and tragic Electra.

EURIPIDES' *ELECTRA*

By clever manipulation of the plot to create a different emphasis in the interpretation of the characters and their motives, Euripides seriously questions religious and philosophical beliefs about right and wrong action and the nature of justice. The setting for his play is the hut of a peasant, who is the husband of Electra. This peasant provides a prologue that gives the essential background

for the plot with its subtle Euripidean twists, only a few of which can be mentioned in this brief summary. Most important is the fact that Aegisthus has married off Electra to this poor but well-meaning man, in the belief that he would have nothing to fear from such a match. Indeed Electra has remained a virgin, untouched sexually by her husband, whose nature is admirably noble.

Orestes, at the command of Apollo, returns with Pylades and encounters Electra. Eventually their scene of recognition is confirmed most realistically. The servant who once saved the infant Orestes now, as an old man, points out to Electra a scar that proves the identity of her brother. As Electra makes abundantly clear, similarity in locks of hair and footprints or the design of woven fabric are not enough for certainty.

Now Orestes can make plans for his vengeance. He receives a great deal of assistance from the old servant for his scheme against Aegisthus, and it is Electra who takes a particularly vicious delight in laying the plot herself for the death of her mother, Clytemnestra. Euripides, like Aeschylus, places the murder of Clytemnestra last for his own macabre purposes.

The circumstances and the religious setting of the murder of Aegisthus place him in an ingratiating light. The scene is described by a messenger to a gloating Electra. Aegisthus is approached by Orestes and Pylades while he is preparing a sacrifice in honor of the Nymphs, and he welcomes the strangers most hospitably as guests and friends. After he has butchered the sacrificial bull and bends over to examine the severed parts of the animal in fear of bad omens, Aegisthus is brutally stabbed in the back by Orestes, who brings his body and his severed head to his sister. Electra, painfully triumphant, addresses the remains of her most bitter enemy with the following apostrophe (907–1248):

 ELECTRA: Alas, first of all in reproaching you with evils where will I begin? What sort of ending will I provide? How shall I list all those in between? To be sure, from early dawn I never ceased rehearsing the things that I wanted to say to you face to face if ever I should become free from those former terrors. Well now we are free and I will repay you with this litany of evils which I wanted to recite to you when you were alive.

You destroyed me and you made me and Orestes here bereft of a dear father, even though you were never wronged. You married my mother shamefully and killed her husband, commander-in-chief of the Hellenic forces against Troy, while you stayed at home. You reached such a pinnacle of folly that you expected that, having wronged my father's bed and married my mother, she would do you no wrong. Whenever anyone has corrupted the wife of another in a clandestine affair and then is compelled to marry her, let him know for sure that he is a sorry fool if he thinks that she who has already betrayed one husband will be a chaste wife for him. You lived a most abominable life, not realizing how evil it was. Yet you knew that you had entered into an unholy marriage and my mother knew that she had taken an impious man as her husband. Both of you base, each partaking of each other's evil fate, she of yours and you of hers. And among all the Argives Clytemnestra never was called the wife of Aegisthus, instead you heard yourself denigrated as the husband of Clytemnestra.

This is a disgrace that the woman and not the man controls the household, and I hate it when in the city children are designated not as the offspring of the male, the father, but of the mother. When a husband has married a conspicuously superior wife, the woman receives all the attention but no account is taken of the man. But this is what deceived you, what you did not understand. You boasted that you were somebody relying upon wealth for your importance. But money is nothing. It is our consort for only a little while. Nature is what remains steadfast, a good character, not money; it stays with us always and lifts away evils. But wealth, dishonest associate of the foolish, flourishes for a short time and then flies out the door.

As for your affairs with women, I remain silent. Since it is not proper for a virgin to speak out about them, I will only offer discreet hints. You behaved outrageously, possessed as you were of a royal palace and endowed with physical beauty. As for me, may I get a husband who does not look like a girl but is manly, whose children would be like Ares. Good looks alone are merely a pretty adornment for devotees of the dance.

Away with you, completely ignorant that you have paid the penalty for your crimes that have in time been found out. Let no one as wicked as you think that, if he has run the first phase of the course well, he is triumphing over Justice, before he approaches the final turn and the end of his life.

CHORUS: He has done terrible things and he has paid a terrible retribution to you and Orestes because of the power of Justice.

ELECTRA: So be it. Servants, you must carry the body inside and hide it in the darkness so that when my mother arrives she may not see the corpse before she is slaughtered.

At this point Clytemnestra arrives upon the scene. She had been summoned with the false announcement that Electra had recently borne a son, just as Electra had planned, and, as it was with Aegisthus, her entrapment appears particularly sordid. The confrontation between mother and daughter raises similar issues that had been argued in Sophocles' version, but Euripides provides crucial additions with disturbing differences in motivation; so much of their conflict is steeped in sexual rivalry and jealousy and psychological perversity. Clytemnestra is even very much aware of the nature of Electra's complex when she observes that it is ingrained in her daughter's nature to love her father more than her mother.

Here is a much weaker Orestes than we have ever seen, who must be goaded and driven by his sister to murder their mother, and Electra herself, obsessed with a passionate hatred, actually participates in the killing.

ORESTES: Hold on now, another decision is thrust upon us.

ELECTRA: What is it? Do I see an armed force coming from Mycenae?

ORESTES: No, but the mother who gave birth to me.

ELECTRA: Good! She is stepping right into the trap. How splendid she looks in her fine chariot and robes.

ORESTES: What are we to do now? Will we murder our mother?

ELECTRA: Are you overcome with pity at the sight of your mother in person?

ORESTES: Ah, how am I to kill her, the one who bore me and nourished me?

ELECTRA: In the same way as she butchered your father and mine.

ORESTES: Oh Phoebus, you prophesied sheer folly. . . .

ELECTRA: Where Apollo is a fool, who are wise?

ORESTES: . . . you, Phoebus, who told me to kill my mother, a crime which I should not commit.

ELECTRA: What possible harm is there since you are avenging your own father?

ORESTES: I am guiltless now, but if I do the deed I will be condemned as the killer of my mother.

ELECTRA: But if you do not avenge your father, you will be impious against god.

ORESTES: The murder of my mother—to whom will I pay the penalty?

ELECTRA: To whom will you pay, if you fail to accomplish vengeance for your father?

ORESTES: Did some demon, disguised as god, order me to do this?

ELECTRA: A demon sitting on the sacred tripod? I really don't think so.

ORESTES: I cannot be convinced that this divine oracle was right.

ELECTRA: Don't become a coward and a weakling.

ORESTES: Am I to devise the same treachery against her?

ELECTRA: Yes, the same that you used when you killed her husband Aegisthus.

ORESTES: I will go in and undertake a terrible task. I will do a terrible thing—if the gods think it is right, so be it. This ordeal is both bitter and sweet for me.

CHORUS: Lady and queen of the land of Argos, daughter of Tyndareus and sister of the noble twins, the sons of Zeus, who live amid the stars in the fiery firmament and are honored by mortals as their saviors in storms at sea. Greetings, I give you honor equal to the gods because of your great wealth and blessed happiness. Now is the right time for your fortunes to be provided for. Hail, O queen!

CLYTEMNESTRA: Out of the chariot, Trojan women, take my hand and help me to get down. The temples of the gods are adorned with Trojan spoils, and for my palace I have taken these chosen women from Troy, a small yet lovely gift, in exchange for the daughter whom I lost.

ELECTRA: Shouldn't I, mother, take hold of your royal and blessed hand, for I also am a slave, cast out of my ancestral home and living in a miserable one?

CLYTEMNESTRA: I have these slaves here; don't trouble yourself on my account.

ELECTRA: Well, am I not just like these women, taken prisoner when my palace was captured, driven out of the house, left bereft of my father?

CLYTEMNESTRA: Such are the results of actions your father devised against those whom he should have loved. I will explain. I know that when a reputation for evil clings to a woman, a bitter sharpness inevitably invests the tone of her argument. So it is with us, and that is not good. But if, upon learning the truth, you have a worthy reason to hate, it is right to hate but if not, why should there be hatred?

Tyndareus gave me to your father and the marriage was not intended to bring death to him or me or the children whom I bore. Yet that man, Agamemnon, through the pretext of marriage with Achilles, took my daughter from home

and brought her to Aulis, where the fleet was kept from sailing. There he placed Iphigenia high upon the sacrificial altar and slit her white throat. If to avert the capture of his city or to benefit his house or to his other children he killed this one girl on behalf of many, it would be forgivable. No, it was for the sake of Helen, a voracious whore, and because Menelaüs, who married her, did not know how to control his adulterous wife. This was the reason why Agamemnon murdered my daughter. And yet for all that, having been wronged, I would not have become a savage and killed my husband. But he came back to me bringing with him the maiden Cassandra, mad, possessed by god, and he brought her to our marriage bed; now there were two wives in the same household! Women really are foolish prey, I do not deny it. This is taken for granted, every time a husband wrongfully rejects his marriage bed for someone else. When his wife at home in her desire to follow his example takes on a lover, then all the blame is blazoned forth upon us women, but the men who are responsible hear not a word of criticism. What if Menelaüs had been secretly abducted from his home? Would it then have been necessary for me to kill Orestes so that I might rescue Menelaüs, the husband of my sister, Helen? How would your father have tolerated that crime? I would have had to suffer death at his hands for killing his son. Should he not have died for killing my daughter? Yes, and so I killed him, turning to his enemies—the only way possible. For any friend of your father would never have conspired with me in his slaughter. Speak your refutation freely, if you like, and explain how your father died unjustly.

CHORUS: You have made a just argument but your justice is tainted with shame. A woman who is right-minded should concede to her husband in everything. Any woman who does not think so is not included in my reckoning.

ELECTRA: Remember, mother, your last words which gave me liberty to speak.

CLYTEMNESTRA: Yes I do and I stand by them now, my child.

ELECTRA: After you have heard what I have to say, mother, will you treat me badly?

CLYTEMNESTRA: Not at all. I will be sweetly disposed towards you.

ELECTRA: I will speak then and this is how I will begin. I only wish you, O you who gave me birth, were of a better mind and character. You and Helen are sisters, through and through. The physical beauty of you both is worthy of my praise, but the two of you morally are whores, and I do not consider you worthy of your noble brother Castor. Helen was willing in her rape and brought about her own ruin, and you destroyed the best man of Hellas, making up the pretext that you killed your husband because of your daughter. Those who believe you do not know you as well as I do.

Even before the sacrifice of your daughter and when your husband had scarcely left home, you were primping before a mirror as you adorned your blonde tresses. A wife who decks herself out in beauty while her husband is away, I label a wicked woman. For she should not vaunt her fair features out of doors, unless she is looking for evil. I know for a fact that you alone of all the women of Hellas rejoiced when you heard that the Trojans were doing well, but if they were losing, your eyes would look troubled because you did not want Agamemnon to return from Troy. Yet there was every reason for you to behave

properly. You had a husband in no way inferior to Aegisthus, whom Hellas chose as its commander-in-chief. Furthermore, in contrast to Helen, your sister, who did such terrible things, you could have won for yourself great renown for virtue since evil actions present a foil to enhance the good for all to see. If, as you say, my father killed your daughter, in what way have I or my brother done you wrong? After you killed our father why didn't you include us in the ancestral estate? Instead, you gave what was not really yours as a dowry for your lover and bought your marriage with him. Your husband Aegisthus is not banished because of your son Orestes nor has he died on my account, even though he has inflicted a living death upon me, twice as painful as the death of Iphigenia. If slaughter demands slaughter as a just penalty, then I and your son Orestes will kill you to avenge our father. If your actions are just, ours would be too.

CLYTEMNESTRA: My child, it is ingrained in your nature to love your father always. This is the way things are. Some are attached to the fathers, others love their mothers more than their fathers. I will forgive you, for in truth I am not that exultant at all about the things that I have done, my daughter. But you so unwashed and so unkempt in your dress, have you just recently given birth and become a mother? Alas, poor me and my plots! I drove myself into a fury against my husband, more than I should have.

ELECTRA: Too late for bewailing when you have no remedy for your plight. My father is dead, so why don't you recall your son who wanders far from home?

CLYTEMNESTRA: I am afraid to. I must look to my own safety, not his, since they say that he is enraged at the murder of his father.

ELECTRA: Why do you allow your husband Aegisthus to treat me so cruelly?

CLYTEMNESTRA: That's the way he is; and you are inherently stubborn.

ELECTRA: I am suffering, yet I will put an end to my fury.

CLYTEMNESTRA: If so he will persecute you no longer.

ELECTRA: He is arrogant because he lives in my house.

CLYTEMNESTRA: You see, you are at it again, kindling a fresh inflammatory quarrel.

ELECTRA: I'll be quiet, for I fear him, how I fear him!

CLYTEMNESTRA: Stop such talk. Why did you summon me here, my child?

ELECTRA: You have heard, I know, about the birth of my child. Make the proper sacrifice for me—I don't know how—as it is ordained for a son after he is born. I have no experience in this because until now I have been childless.

CLYTEMNESTRA: This is not my duty but that of the woman who delivered the child.

ELECTRA: I gave birth alone and delivered the child myself.

CLYTEMNESTRA: Is your home so bereft of friendly neighbors?

ELECTRA: No one wants to have friends who are poor.

CLYTEMNESTRA: I will go and sacrifice to the gods as is appropriate after the child's birth, and when I have done this favor for you, I will go out to the countryside, where my husband is offering sacrifice to the Nymphs. Servants, take the horses out to pasture and when you think that I have finished this sacrifice to the gods, be back here, for I must also oblige my husband.

ELECTRA: Enter my humble house but be careful that the soot inside does not defile your robes, for you will make to the gods the sacrifice that you should. All is made ready, the knife that was sharpened has already slaughtered the bull, next to which you will fall after you have been struck down. Even in the house of Hades you will be joined in matrimony with the one whom you slept with in life. I will grant this favor to you and you will grant to me justice for my father.

CHORUS: Retribution for evils. Changed gales of vengeance blow through the house. Once my king, mine, fell stricken in his bath. The stones and the rooftop shrieked with the cry that he uttered: "O wretched woman, my wife, why will you kill me who have returned to my dear fatherland after ten years?" In retribution this unhappy woman of an adulterous marriage is brought to justice, she who took up an axe with sharpened blade and by her own hand killed her husband who had returned after many years to his home and its Cyclopean walls that reach to the sky. A poor, suffering husband, whatever evil wrong took hold of his unhappy wife. Like a lioness roaming the woods, who pastures in the mountains, she accomplished her deeds.

CLYTEMNESTRA (from inside the house): O my children, by the gods, do not kill your mother.

CHORUS: Do you hear her cry from within?

CLYTEMNESTRA: Ah, woe is me!

CHORUS: I pity her, overpowered and undone by her children. God metes out justice, sooner or later. You have suffered a terrible fate but you, poor wretch, committed an unholy crime against your husband. But here they come out of the house, defiled with freshly shed blood of their mother, triumphal testimony of how they silenced her cries of anguish. No house is more lamentable than that of the family of Tantalus.

Orestes and Electra appear, the bodies of both Aegisthus and Clytemnestra at their feet. After the horror of murdering their mother, all bravado is gone, and upon full realization of what they have done, they become craven with a remorse that is both sad and repellent. Electra must bear full responsibility for committing the crime along with Orestes; brother and sister have learned to their dismay and regret that the desire for retribution, even when ordained by the command of god, is far different emotionally and psychologically from the real trauma of actually killing their mother.

 ORESTES: O Earth and Zeus, you who witness all that mortals do, behold these bloody, abominable murders, two corpses lying on the ground, struck down by my hand in recompense for my sufferings.

ELECTRA: Our tears overflow, my brother, and I am the cause. In fiery rage I, poor wretch, came against this mother of mine, who bore me, her daughter.

CHORUS: Alas for misfortune, your misfortune. You, the mother who bore them, have suffered unforgettable misery and more at the hands of your children and you have paid justly for the murder of their father.

ORESTES: O Phoebus, you prophesied a justice I could not foresee, but all too clear now is the misery that you have wrought. You have bestowed on me the

fate of a murderer driven from this land of Hellas. To what other city will I go? What friend, what god-fearing human being will look upon the face of a man who has killed his mother?

ELECTRA: Alas, woe is me! Where will I go? At what dance will I be accepted? What marriage will be in store for me? What husband will take me to his marriage bed?

CHORUS: Your thoughts have been changed back once again to considerations that are good. Now your thinking is holy, then it was not and you made your brother do a terrible thing, when he did not want to.

ORESTES: Did you see how the poor woman opened her robe to show me her breast as I slaughtered her, alas for me, and I grabbed at her hair as her body that gave me birth sank to the floor?

CHORUS: I know full well the pain that you went through when you heard the piercing cry of your mother who bore you.

ORESTES: This was the cry that she uttered as she touched my cheek with her hand: "My child, I beg you," and then she clung to me so closely that my sword fell from my hand.

CHORUS: Poor woman! How did you dare to see with your own eyes your mother breathing out her life?

ORESTES: I covered my eyes with my cloak as we began the sacrifice, plunging the sword into my mother's flesh.

ELECTRA: I ordered you to do it as we took hold of the sword together.

CHORUS: You have done a most terrible deed.

ORESTES: Come, help me cover the limbs of our mother with her garments and close up her wounds. You gave birth to your own murderers.

ELECTRA: See how we cover you, whom we loved and we hated.

The play ends with the appearance of the Dioscuri, and it is Castor who acts as the *deus ex machina*. He reaffirms religious and philosophical issues raised by Orestes himself as he hesitates in horror, while his sister is prodding him to join her in murdering their mother. To kill a mother is a terrible crime, with devastating ramifications, whether or not it is decreed by god.

CHORUS: Thus ends great evils for this house. But look! Who are these two who arrive high above the house? Are they divine spirits or gods from the heavens? Mortals do not appear in this way. Why in the world do they come into the clear sight of humans?

DIOSCURI (Castor speaks for the two of them): Listen, son of Agamemnon. We, Castor and Polydeuces, address you, we the twin sons of Zeus, brothers of your mother. We just now calmed a terrible storm at sea and come to Argos in time to witness here the slaughter of our sister and your mother. She received justice, but you did not act justly. And Phoebus, O Phoebus—but since he is my lord, I keep silent. Being wise, he did not prophesy to wise things. Yet all this must be commended and now you have to do what Fate and Zeus have ordained for you.

Castor goes on at some length to predict the future course of events, including the pursuit of Orestes by the Furies and his acquittal by the court of the Areopagus in Athens. Pylades is to marry Electra.

NOTES

1. These tales are brilliantly discussed by Walter Burkert, *Homo Necans* (Berkeley: University of California Press, 1983), pp. 83–109, part of his chapter entitled "Werewolves around the Tripod Kettle."
2. The Greek phrase is obscure. Cassandra refers to the instrument of the murder, either a sword or an axe, one or the other of which appears in different poetic accounts and vase paintings of the murder.
3. The Areopagus was the court at Athens that heard homicide cases; its members were former archons, that is, state officials. The court had been a center of political controversy shortly before Aeschylus produced his play.
4. Apollo's argument that the child's begetter is the father not the mother because the mother is only the nurse of the newly sown seed need not be interpreted as a manifestation of Greek misogyny, as Mary R. Lefkowitz so clearly perceives in *Women in Greek Myth* (Baltimore: Johns Hopkins University Press, 1986), pp. 122–123: "[Apollo] is acting as an advocate for a person accused of matricide; had Orestes been accused of killing his father to avenge his mother, Apollo might well have said what Aeschylus has the Erinyes say about the primacy of maternal blood ties. The role of the female in conception, of course, was not clearly understood; opinions varied about whether the female seed present in the menstrual fluid contributed to the appearance and character of the child. . . . But no Athenian audience would have believed that Apollo's argument was conclusive. . . . In fact, the jury in Aeschylus' drama gives Apollo and the Erinyes equal votes, and it is only because Athena, who was born from her father Zeus without a mother, casts her vote for Apollo that Orestes is acquitted."
5. In Euripides' drama *Orestes* (408), Orestes is condemned at Argos for the murder of his mother but saves himself by taking Hermione hostage. Apollo orders Orestes to marry Hermione and foretells his acquittal at Athens. Versions of Orestes' marriage to Hermione, including Euripides' *Andromache* (ca. 430), are discussed earlier in this chapter.
6. For comparative examples, see George Thomson, *Aeschylus and Athens*. 3d ed. (London: Lawrence & Wishart, 1996), p. 449.
7. The child of Clytemnestra and Aegisthus was Erigone, the theme of a lost play by Sophocles and mentioned by the early cyclic poet Cinaethon.

THE TROJAN SAGA AND THE *ILIAD*

THE CHILDREN OF LEDA

Leda, wife of Tyndareus, king of Sparta, bore four children to Zeus, who visited her in the shape of a swan; the four were born from two eggs—from the one sprang Polydeuces and Helen, from the other Castor and Clytemnestra.

THE DIOSCURI

The legends of the Dioscuri (Sons of Zeus), Castor and Polydeuces (his Roman name is Pollux), are not part of the saga of the Trojan War. Castor was renowned as a tamer of horses and Polydeuces for his skill in boxing. Polydeuces was the immortal son of Zeus, whereas Castor was the mortal son of Tyndareus, who eventually shared in the immortality of his brother. They were perhaps originally mortal heroes, later worshiped as gods. According to Pindar the Dioscuri quarreled with the two sons of Aphareus, Idas and Lynceus, over the division of some cattle that the four of them had taken in a raid. In the quarrel Lynceus and Castor were killed, and Idas was destroyed by Zeus' thunderbolt. As Castor lay dying, Polydeuces prayed to Zeus that he might die with him. Zeus gave him the choice either of immortality for himself and death for Castor or of living with Castor but spending alternate days on Olympus and in Hades. Polydeuces chose the latter, and so the Dioscuri shared both immortality and death.¹

As gods Castor and Polydeuces were especially connected with seafarers, to whom they appear as St. Elmo's fire.² They were particularly honored at Sparta, and in the early fifth century B.C. their cult spread to Rome.³ One of the most prominent buildings in the Forum at Rome was the temple of Castor.

In the two *Homeric Hymns to the Dioscuri* they are addressed as the Tyndaridae because their mother, Leda, was the wife of Tyndareus. Hymn 17 is short and focuses on their conception and birth:

About Castor and Polydeuces sing, clear-voiced Muse, the Tyndaridae, who are sprung from Olympian Zeus. Beneath the peaks of Mt. Taygetus lady Leda bore them, after she had been stealthily seduced by the dark-clouded son of Cronus.

Hymn 33 depicts the Dioscuri in their important role as patron deities of sailors and seafarers:

 O bright-eyed Muses, tell about the sons of Zeus, the Tyndaridae, splendid children of lovely-ankled Leda—Castor, the horse-tamer, and faultless Polydeuces. Leda joined in love with Zeus, the dark-clouded son of Cronus, and she gave birth beneath the summit of the great mountain, Taygetus, to these children, saviors of people on earth and of swift-moving ships, when wintry winds rage over a savage sea. Those on the ship go to the highest part of the stern and call on great Zeus with promises of white lambs. The strong wind and swell of the sea put the ship under water, but suddenly the two brothers appear, darting on tawny wings through the air. At once they calm the blasts of the harsh winds and quell the waves on the expanse of the white-capped sea. Those who have been freed from pain and toil rejoice, since they have seen these two fair signs of deliverance from distress.

Hail, Tyndaridae, riders of swift horses! Yet I shall remember you and another song too.

HELEN

The daughters of Zeus and Leda were Clytemnestra and Helen. Clytemnestra became the wife of Agamemnon, and we have discussed her part in the Mycenaean saga (Chapter 18). Helen grew up to be the most beautiful of women, and from the many Greek princes (including Theseus and Odysseus) who were her suitors she chose Menelaüs, who became king of Sparta. The rejected suitors swore to respect her choice and help Menelaüs in time of need.

Helen lived for some years at Sparta and bore a daughter, Hermione, to Menelaüs. In time, however, the Trojan prince Paris (also called Alexander), the son of Priam and Hecuba, visited Sparta while Menelaüs was away in Crete. There he seduced Helen and took her back to Troy with him. (See Color Plate 5.) To recover her and vindicate the rights of Menelaüs, the Achaean (Mycenaean Greek) expedition, led by Agamemnon, brother of Menelaüs, was raised against Troy.

Another version of Helen's story was invented by the seventh-century poet Stesichorus, who says in his *Palinode*:

 That story is not true; you did not go in the well-benched ships, nor did you go to the towers of Troy.

In Stesichorus' version Helen got only as far as Egypt, where King Proteus detained her until Menelaüs took her back to Sparta after the Trojan War. It was merely a phantom of Helen that accompanied Paris to Troy, and this was sufficient pretext for the war, which Zeus had determined should occur to reduce the population of the earth.⁴

THE JUDGMENT OF PARIS

The Olympian gods were guests at the wedding feast of Peleus and Thetis. During the feast, Eris, goddess of Discord (who was not a guest), threw onto the table an apple inscribed with the words "For the most beautiful." Hera, Athena, and Aphrodite each claimed it, and Zeus decided that the argument should be settled by Paris.

Now Paris had been exposed as an infant because of a dream that came to his mother Hecuba (the Greek form of her name is Hekabe) before his birth. She dreamed that she had given birth to a firebrand that consumed the whole of Troy, and a soothsayer⁵ foretold that her baby would be the destruction of the city. The infant was exposed on Mt. Ida, and suckled by a bear. He was found and brought up by a shepherd. Hermes led the three goddesses to him, and each offered the best gift she could provide in return for his favorable decision. Hera promised him royal power and Athena, victory in war, while Aphrodite promised Helen as his wife. He chose Aphrodite, and so the train of events that led to the Trojan War was set in motion, in which Hera and Athena were hostile to the Trojans.

Lucian (*Dialogues of the Gods* 20) offers a satiric version of the judgment of Paris, in tone not unlike Cranach's painting. The sardonic wit of his portrayal illuminates the bitter rivalry, ruthless ambition, and irresponsible passion of the characters, and in so doing they intensify the horror of the tragic events to follow. How bitterly ironic is Paris' response to Athena: "War and battles serve absolutely no purpose to me. As you see, there is peace throughout Phrygia and Lydia and the entire kingdom of my father." The satire begins as Zeus gives the golden apple to Hermes with directions to take it and the three goddesses to Paris, who is tending his flocks on Mt. Ida. Hermes is to tell Paris that he has been chosen to make the decision because he is so handsome and knowledgeable in matters of love. Zeus disqualifies himself as judge by saying that he loves all three equally and that if he gives the apple to one he will incur the anger of the others. The goddesses agree to Zeus' scheme and fly away to Ida with Hermes as their guide. In the course of the journey, each goddess asks for pertinent information about their judge, Paris. As they approach Mt. Ida, Hermes decides that they had better make a landing and walk up to Paris amiably, rather than frighten him by swooping down from the sky. Hermes explains everything to the bewildered Paris and hands him the golden apple with its inscription:

 PARIS: Well then, look at what it says: "Let the beautiful one take me." Now, lord Hermes, I am a mere mortal and from the country; how am I to become the judge of this marvelous spectacle, too great for a herdsman to handle? To make a decision such as this is a job for a city sophisticate. I could probably judge which is the more beautiful in a contest between two she-goats or two cows, but all these goddesses are equally beautiful. Their beauty surrounds and engulfs me completely. My only regret is that I am not Argus, and so I cannot look at them with eyes all over my body. It seems to me that my best judgment would be to give the apple to all three. For, besides everything else, this one happens

The Judgment of Paris, by Lucas Cranach the Elder (1472–1553); oil on panel, 1530, $13\frac{1}{2} \times 8\frac{3}{4}$ in. This tiny painting wittily exploits the incongruities of a tale where great goddesses appear naked before a shepherd. Paris is a corpulent Renaissance knight in armor and foppish hat, while Hermes is an aged warrior (barefoot, as befits a god) whose decrepit appearance sets off the sensuality of the goddesses. Aphrodite looks fully at the viewer, while Athena rests her arm on Hermes. In the background the towers and spires of Troy can be seen. Cupid draws his bow above, and to the left the horse seems to add his own view of the contest. (Staatliche Kunsthalle, Karlsruhe, Germany. Reproduced by permission of Staatliche Kunsthalle.)

to be the sister and wife of Zeus, and these two are his daughters. Doesn't all this make the decision extremely difficult?

HERMES: I don't know. Yet it is impossible to avoid an order given by Zeus.

PARIS: Just this one request, Hermes. Convince them—I mean the two who

lose—not to hold their defeat against me and to realize that the fault was in my eyes.

HERMES: They agree that they will not blame you; but now the time has come to go through with the contest.

PARIS: I'll try. What else can a man do? Still, first I want to know if it will be enough to look at them as they are, or will it be necessary for them to undress for a proper examination?

HERMES: This would be up to you as the judge. Conduct the proceedings as you desire.

PARIS: As I desire; I'd like to see them naked.

HERMES: You goddesses there, undress! And you, Paris, look them over. I have already turned my back.

The goddesses proceed to undress, and Paris is overwhelmed.

PARIS: O Zeus, god of marvels! What a sight, what beauty, what ecstasy! The virgin Athena is such a vision! How regal and august is the radiance of Hera, truly a wife worthy of Zeus! The gaze of Aphrodite is so sweet and lovely, and she gave me such a seductive smile. Already this rapture is too much, but if it is all right with you, I'd like to see each one separately, since at this moment I am overwhelmed.

APHRODITE: Let's do what he wants.

PARIS: Then the two of you go away, but, Hera, you stay here.

HERA: Here I stay, and after you have looked me over carefully, the time will be right for you to think about whether other considerations are beautiful too—I mean, the gifts that you will get in return for your vote for me. Paris, if you judge me to be the beautiful one, you will be master of all Asia.

PARIS: My vote is not determined by gifts: go on now. Athena, you step forward.

ATHENA: I am right beside you, and if you judge me the beautiful one, Paris, you will never leave a battle in defeat but always victorious. I shall turn you into a warrior and a conquering hero.

PARIS: War and battles serve absolutely no purpose for me. As you see, there is peace throughout Phrygia and Lydia and the entire kingdom of my father. But cheer up! You will not be at a disadvantage, even if my judgment is not to be made on the basis of gifts. Get dressed now and put on your helmet, for I have seen enough. It's time for Aphrodite to step forward.

APHRODITE: No rush! Here I am, right beside you. Look at every detail scrupulously. Take your time over every inch of my body, and as you examine me, my beautiful lad, listen to what I have to say. I noticed the moment I saw you how young and handsome you are—I doubt if there is any other fellow in the whole of Troy who is better looking. I congratulate you on your beauty, but it pains me that you do not leave these stony crags for a life in the city. Instead, you are letting your beauty go to waste amidst this isolation. What fun do you get out of these mountains? What good is your beauty to the cows? By now you should be married, not to some country bumpkin like the women from Mt. Ida but to someone from Greece—from Argos or Corinth—or to a Spartan like Helen, young and beautiful as I am and, above all, amorous. If she only got a look

at you, I know very well that she would leave everything behind, succumb to you completely, follow you home in surrender to live with you as your wife. Of course, you have heard at least something about her?

PARIS: Not a thing, Aphrodite, but it would be my pleasure to hear you tell me everything about her.

APHRODITE: She is actually the daughter of beautiful Leda, whom Zeus seduced after flying down to her in the form of a swan.

PARIS: What does she look like?

APHRODITE: As fair as you would expect the daughter of a swan to be, and soft and delicate, since she was hatched from an eggshell, but yet very athletic too—so sought-after, in fact, that even a war has already been waged over her, because Theseus carried her off when she was still quite young. Furthermore, when she reached the peak of her present perfection, all the best of the Achaeans gathered to seek her hand in marriage. Menelaüs, of the family of Pelops, was the one chosen. If you'd like, I'll arrange her marriage to you.

PARIS: What are you saying? Me with a married woman?

APHRODITE: You are young and naïve, but I know how this kind of thing must be managed.

PARIS: How? I want to know too.

APHRODITE: You will take a trip, ostensibly a tour of Greece, and when you come to Sparta, Helen will see you. From then on, it will be up to me to manage how she will fall in love and follow you home.

PARIS: This is the very thing that seems so incredible to me, that she would want to leave her husband and sail away with a foreigner she doesn't know.

APHRODITE: Don't fret about it, for I have two beautiful children, Desire (*Himeros*) and Love (*Eros*). I shall give them to you as guides for your journey. Love will insinuate himself completely into her very being and compel the woman to love you. Desire will make you desirable and irresistible by suffusing you with the very essence of his being. I'll be there myself, too, and I'll ask the Graces to accompany me. In this way, all of us together will persuade her to submit.

PARIS: It is not in the least clear to me how this will all turn out, Aphrodite. But I am already in love with Helen. I seem to see her now—I'm sailing straight for Greece—I'm visiting Sparta—I'm returning home holding the woman in my arms! I am very upset that I am not doing all this right now.

APHRODITE: Hold on, Paris! Don't fall in love until you have rewarded me with your decision—me, the one who is fixing the marriage and giving away the bride. It would be only fitting that I, your helper, be the winner of the prize, and that we celebrate at the same time both your marriage and my victory. For it is up to you. You can buy everything—love, beauty, marriage—the cost is this apple.

PARIS: I am afraid that you will forget about me after my decision.

APHRODITE: And so you want me to swear an oath?

PARIS: Not at all, only promise me again.

APHRODITE: I promise to give you Helen as your wife and that she herself will follow and come with you to your family in Troy. I shall be at your side myself, and I shall help accomplish everything.

PARIS: And you will bring Love, Desire, and the Graces?

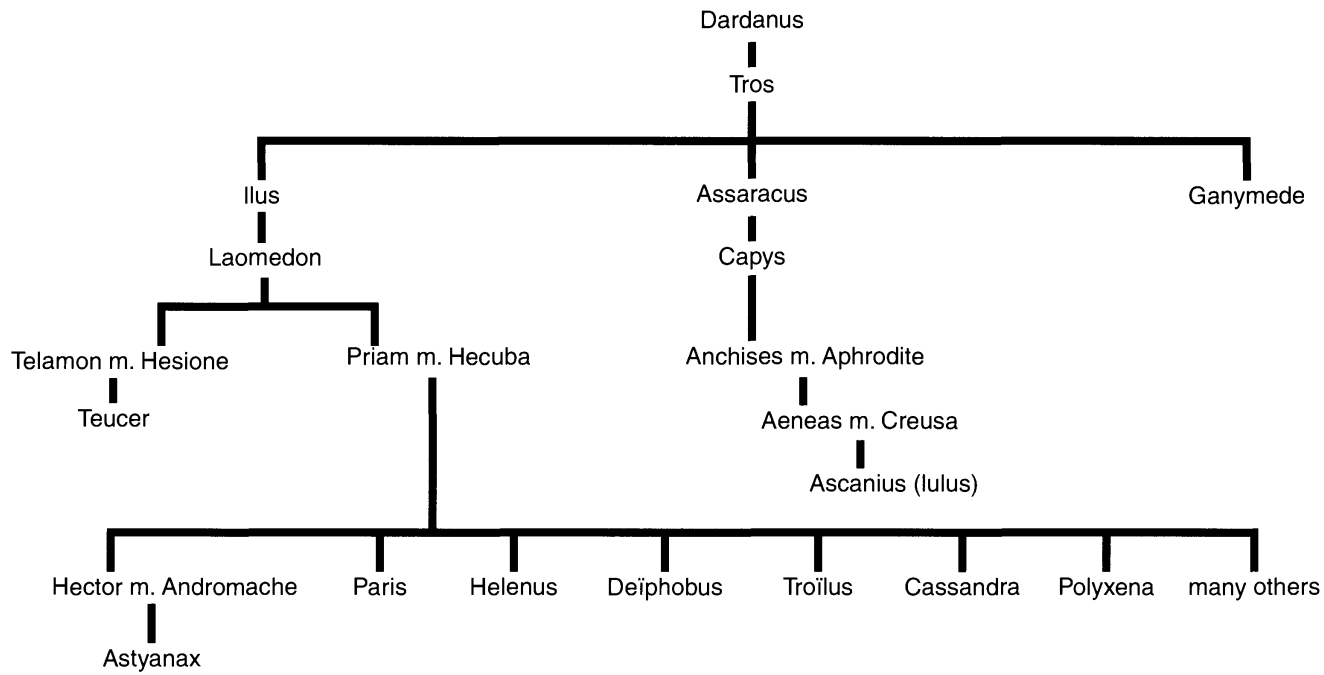

Figure 19.1. The Royal House of Troy

APHRODITE: Never fear, I shall even bring along Passionate Longing and Hymen, the god of Marriage.

Homer never mentions this story; according to him Paris once insulted Hera and Athena when they visited him but praised Aphrodite, who gave him the power to attract women irresistibly. This simpler version is certainly older than the more famous literary account of the judgment, but it is the latter that has dominated the tradition and fascinated an endless line of poets and artists.

TROY AND ITS LEADERS

LAOMEDON

Apollo and Poseidon (disguised as mortals) built the walls of Troy for its king Laomedon, who then cheated them of their pay.⁶ In punishment, Apollo sent a plague and Poseidon a sea monster to harass the Trojans. The oracles advised that the only way to get rid of the monster was to expose Laomedon's daughter Hesione and let it devour her. When Heracles came to Troy (see p. 527) he agreed to kill the monster and save Hesione in return for Laomedon's immortal horses, which were the gift of Zeus.⁷ Once again Laomedon cheated his benefactor; Heracles therefore returned with an army, captured Troy, and gave Hesione as wife to his companion, Telamon, by whom she became the mother of Teucer. Heracles killed Laomedon but spared his young son Podarces, who became king of the ruined city, changing his name to Priam.

PRIAM AND HECUBA

King Priam was father of fifty sons and twelve (or fifty) daughters, of whom nineteen were children of his second wife, Hecuba (Arisba, his first wife, is not significant in the legend). In the *Iliad* Hecuba appears as a tragic figure whose sons and husband are doomed; her most famous legend takes place after the fall of Troy (p. 477).

PARIS (ALEXANDER)

The most important sons of Priam and Hecuba were Paris and Hector. While Paris was a shepherd on Mt. Ida he fell in love with a nymph, Oenone, who had the gift of healing. He left her for Helen. Years later, when he was wounded by Philoctetes, she refused to heal him, but when he died she killed herself in remorse. As a young man, Paris had returned to the royal palace and had been recognized by Priam as his son. As we have seen, his actions led to the Trojan War, in which he appears as a brave warrior if uxorious. He was the favorite of Aphrodite, who saved him from being killed in combat by Menelaüs. His vanity and sensuality contrasted with the dignity and courage of Hector. Paris shot the arrow that fatally wounded Achilles.

HECTOR, ANDROMACHE, AND ASTYANAX

Hector, brother of Paris, was the champion of the Trojans, brave and honorable, and as a warrior excelled only by Achilles, by whom he was killed in single combat. As long as Achilles took no part in the fighting, Hector carried all before him. When he was killed, the Trojans knew they were doomed. His wife was Andromache, daughter of Eëtion (an ally of the Trojans killed by Achilles), and their child was Astyanax. In the *Iliad* Homer draws unforgettable portraits of Paris and Helen and of Hector and Andromache, as he juxtaposes their characters and their relationships in moving scenes of universal power (pp. 457–459).

HELENUS, DEÏPHOBUS, AND TROÏLUS

Priam's son Helenus had the gift of prophecy, for when he was a child serpents had licked his ears. In the last year of the war the prophet Calchas (pp. 453 and 473) advised the Greeks to capture him, since he alone could tell what must be done to end the war. He was caught by Odysseus and honorably treated, so that he alone of Priam's sons survived the war. He eventually married Andromache and became a ruler in Epirus. As a prophet he appears for the last time in the *Aeneid*, where he foretells the course of Aeneas' future wanderings (pp. 646–647).

Of Priam's many other sons, Deïphobus married Helen after the death of Paris; his ghost spoke with Aeneas in the Underworld; and Troïlus, who was killed by Achilles, became more significant in later times.⁸

CASSANDRA AND POLYXENA

Cassandra and Polyxena are the most important of the daughters of Priam. Cassandra had been loved by Apollo, who gave her the gift of prophecy. When she rejected him, he added to the gift the fate that she should never be believed (p. 235). Thus she foretold the fall of Troy and warned the Trojans against the Trojan horse all in vain. Her fate in the sack of Troy is described later in this chapter (pp. 475–477); as we have seen, she died in Mycenae, murdered by Clytemnestra.

Polyxena was sacrificed on the tomb of Achilles as his share of the spoils after the sack of Troy, as we describe later in this chapter (pp. 471–472).

AENEAS

Of the Trojan leaders outside Priam's immediate family, the most prominent is Aeneas, who belonged to another branch of the royal family. Although he was the son of Anchises and Aphrodite, he was not the equal of Priam in prestige or of Hector as a warrior. In the *Iliad* he fights in single combat with Achilles and is saved from death by Poseidon, who transports him miraculously from the fight. Poseidon prophesies that Aeneas and his descendants, now that Zeus has withdrawn his favor from Priam's family, will be the future rulers of Troy. We consider his later prominence, as depicted by Vergil, in Chapter 26.

ANTENOR

Antenor, brother of Hecuba, was conspicuous among those who did not want the war, and he advised returning Helen to the Greeks. When the Greeks first landed, he saved their ambassadors from being treacherously killed by the Trojans. In the last year of the war, he protested the breaking of a truce by the Trojans and still proposed the voluntary return of Helen. The Greeks spared him at the sack, and he and his wife, Theano, the priestess of Athena, were allowed to sail away. They reached Italy, where they founded the city of Patavium (Padua).

GLAUCUS AND SARPEDON

Of the allies of Troy, the most prominent in the *Iliad* were the Lycians, led by Glaucus and Sarpedon. When Glaucus and Diomedes were about to fight, they discovered that they were hereditary guest-friends (i.e., their ancestors had entertained one another and exchanged gifts). They exchanged armor instead of fighting and parted amicably. Since Glaucus' armor was made of gold and that

The Death of Sarpedon. Athenian red-figure krater by Euphronios, ca. 510 B.C.; height 18 in. The winged gods, Sleep (Hypnos, left) and Death (Thanatos, right), carry the body from the battlefield under the guidance of Hermes as two Greek warriors look on. The gods wear armor (note the chain mail of Thanatos), but the corpse of Sarpedon has been stripped. The vase is one of the masterpieces of Athenian vase-painting. (New York, *The Metropolitan Museum of Art, Purchase, Gift of Darins Ogden Mills, Gift of J. Pierpont Morgan, and Bequest of Joseph H. Durkee, by exchange, 1972.*)

of Diomedes of bronze, Diomedes had the better of the exchange, as Homer says (*Iliad* 6. 234–236):

 Zeus took away Glaucus' wits, for he exchanged golden armor with Diomedes for bronze, armor worth a hundred oxen for that worth nine.

Glaucus eventually was killed by Ajax (son of Telamon) in the fight over the corpse of Achilles.

Sarpedon was the son of Zeus and the Lycian princess Laodamia, daughter of Bellerophon. Zeus foresaw Sarpedon's death but could not change his destiny (*moira*) without upsetting the established order. He therefore had to be content with raining drops of blood on the earth to honor his son before the catastrophe and saving his body after it. Here is Homer's description of the scene (*Iliad* 16. 676–683) after Sarpedon has been killed by Patroclus and Zeus has instructed Apollo to save his body:

 Thus [Zeus] spoke, and Apollo did not disobey his father. He went down from the peaks of Ida into the terrible din of battle and straightway lifted godlike Sarpedon out of the way of the missiles and carried him far off. He washed him in the flowing waters of the river and anointed him with ambrosia and clothed him with immortal garments. And he sent him to be carried by two swift escorts, the twins Sleep and Death, who quickly set him down in the fertile land of broad Lycia.

After Hector, Sarpedon is the most noble of the heroes on the Trojan side. In Book 12 of the *Iliad*, when the Trojans are attacking the wall of the Greek camp, he addresses Glaucus in words expressing heroic *arete* ("excellence") and nobility as memorable as those of Achilles in Book 9 (translated on pp. 459–460). Unlike Achilles, he speaks as the leader of a community (*Iliad* 12. 310–328):

 Glaucus, why are we specially honored in Lycia with seats of honor, with meat and more cups of wine, and all people look upon us like gods, and we have been allotted a great domain beside the banks of the Xanthus, fine for the planting of vineyards and for grain-bearing tillage? Therefore now must we stand in the front rank of the Lycians and face the raging battle, so that one of the well-armored Lycians may say: "Indeed not without glory do our kings rule over Lycia and eat the fat lambs and drink choice honey-sweet wine. Noble also is their strength, since they fight among the leaders of the Lycians." My friend, if we were to avoid this war and were to live out our lives ever ageless and deathless, then neither would I myself fight among the leaders nor would I station you in the battle that destroys men. Now, as it is, let us go, for ten thousand death-bringing fates are close upon us.

RHESUS

Other allied contingents who appeared at Troy were those of the Amazons and the Ethiopians (p. 471), and the Thracians led by Rhesus. Their arrival coincided

with a night patrol by Diomedes and Odysseus, during which they caught and killed a Trojan spy, Dolon, who first told them of the Thracians. They went on to kill Rhesus and twelve of his men and to capture his white horses. Rhesus, who was a son of one of the Muses, was worshiped as a hero in Thrace.

THE ACHAEAN LEADERS

The organization of the Greek army was different from that of the Trojans, for Troy was a great city led by a powerful king and helped in war by independent allies. We have seen that Helen's suitors had sworn to help Menelaüs if he called on them, and they assembled for war under the leadership of Agamemnon, king of Mycenae. While Agamemnon's position as leader was unquestioned, each of the Greek princes led his contingent independently and could at any time withdraw, as Achilles did.

AGAMEMNON

Agamemnon was the "lord of men," greatest in prestige among the Greeks, although neither the greatest warrior nor the wisest in council. His stature is shown in the scene in Book 3 of the *Iliad* when Helen names the Greek warrior whom Priam points out to her from their viewpoint on the wall (hence the scene is known as the "viewing from the wall," or *teichoskopia*). Priam begins (*Iliad* 3. 166–190):

 "Tell me the name of this mighty man, whoever he is of the Greeks, a man valiant and great." Then Helen answered in words, goddess-like among women: "This is the son of Atreus, Agamemnon, ruler of a broad kingdom, both a noble king and a strong warrior. He was my husband's brother." Thus she spoke, and the old man was filled with wonder and said: "O happy son of Atreus, favored by Destiny, blest by fortune, many sons of the Achaeans are your subjects. Long ago I went to Phrygia rich in vineyards, and there I saw great numbers of Phrygian warriors on their swift horses. But not even they were as great as are the quick-eyed Achaeans."

In Book 11 (36–40) the terror inspired by Agamemnon as a warrior is shown in the devices on his shield and shield-strap, "The grim-looking Gorgon with her terrifying gaze, and around the shield Terror and Fear. And on the strap coiled a dark serpent, and it had three heads turning all ways, growing from one neck." Yet great warrior as Agamemnon was, he was a lesser hero than Achilles.

MENELAÛS

We have seen how Menelaüs, king of Sparta, and his wife Helen were involved in the origin of the war. In the war itself he fought Paris in single combat. Aphrodite saved Paris just as Menelaüs was on the point of killing him (p. 456).

DIOMEDES

Diomedes, king of Argos, was a much greater warrior than Menelaüs. He was the son of Tydeus, and second only to Agamemnon in power and prestige. He was also a wise counselor. He was a favorite of Athena and with her help could oppose even the gods in battle. He wounded both Ares and Aphrodite. He was especially associated with Odysseus, with whom he fetched Achilles from Scyros and later Philoctetes from Lemnos. Odysseus was also his companion in the night patrol where Dolon and Rhesus were killed and in the theft of the Palladium from Troy. This Palladium (the statue of Pallas, which Athena had made and Zeus cast down from heaven into Troy) was worshiped and looked upon as a talisman for the city's survival. When Odysseus and Diomedes stole it, Troy was doomed. Diomedes' meeting with Glaucus has already been described; his adventures after the war are discussed in Chapter 20 (pp. 482–483).

NESTOR

Nestor, son of Neleus and king of Pylos, was the oldest and wisest of the Greek leaders. Like Priam, he had become king after Heracles sacked his city. In the sack Neleus and all his sons except Nestor were killed. At Troy, Nestor was a respected counselor, and his speeches, full of reminiscences, contrast with the impetuosity of the younger princes. He himself survived the war, although his son Antilochus was killed by Memnon. There is no tradition of his death.

AJAX THE GREATER OF SALAMIS, THE SON OF TELAMON

Ajax, son of Telamon, was second only to Achilles as a warrior.⁹ He is called the Great (or Greater) to distinguish him from Ajax the Less (or Lesser), son of Oïleus. In the fighting before the Greek ships (Books 13–15) he was the most stalwart defender, always courageous and the last to give ground to the enemy. Again he was the Greek champion in the fight over the body of Patroclus in Book 17, providing cover while Menelaüs and Meriones retreated with the body. At the climax of that battle, he prayed to Zeus to dispel the mist of battle and let him die in the clear sunlight, a striking scene in which the sudden appearance of the sun and clear vision seems especially appropriate for this straightforward warrior. In the *teichoskopia* Priam asks Helen (*Iliad* 3. 226–229):

“Who is this other Achaean warrior, valiant and great, who stands out from the Achaeans with his head and broad shoulders?” [Helen replies] “This is Ajax, of huge size, the bulwark of the Achaeans.”

Ajax is both the foil to and the rival of Odysseus. His gruff and laconic speech in the embassy to Achilles (Book 9), which we discuss later, contrasts with the smooth words of the diplomatic Odysseus. In Book 23 they compete in the footrace in the funeral games, and Ajax's defeat there foreshadows his far more

tragic defeat in the contest with Odysseus for the armor of Achilles, discussed later in this chapter.

AJAX THE LESS (OR LESSER)

Ajax the Less (as Homer calls him), prince of the Locrians and son of Oileus, is a less attractive character than his namesake. Although he figured prominently in the fighting and was the leader of a large contingent, his sacrilegious violation of Cassandra during the sack of Troy diminished his stature and led to his death on the voyage back to Greece (p. 482).

IDOMENEUS

Another important fighter with a large contingent was Idomeneus, son of Deucalion and leader of the Cretans. He stood in a different relationship to Agamemnon from most of the other leaders in that he came as a voluntary ally. He had long been a friend of Menelaüs, and Agamemnon showed him great respect. In Book 13 of the *Iliad* he defends the Greek camp bravely and kills a number of leading Trojan warriors. Good as he was, however, as fighter and counselor at Troy, his most important legend is concerned with his return (p. 483).¹⁰

ODYSSEUS

When Menelaüs and Agamemnon sent heralds throughout Greece and the islands to summon the Greek leaders and their contingents to the war, not all the Greek heroes came willingly; two of the most important, Odysseus and Achilles, attempted to avoid the war by subterfuge.

Odysseus, king of Ithaca, pretended to be mad. When Agamemnon's envoys came, he yoked an ox and an ass and plowed a field, sowing salt in the furrows. One of the envoys, Palamedes, took Odysseus' infant son Telemachus from his mother, Penelope, and put him in the path of the plow. Odysseus was sane enough to avoid him; his pretense was uncovered, and he joined the expedition.¹¹

Odysseus was the craftiest and wisest of the Greeks, as well as a brave warrior. He was the best in council, and his powerful speech in Book 2 (284–332) decided the debate in favor of staying before Troy to finish the war. He attacked the unattractive and sardonic Thersites for intervening in the debate, when only princes should speak, and for this he was greatly honored by the Greeks. He was the principal speaker in the embassy to Achilles in Book 9, and he undertook the dangerous night mission with Diomedes as well as other missions mentioned earlier. Above all Odysseus was a skilled speaker, and this is brought out in the *teichoskopia* (*Iliad* 3. 191–224):

 Next the old man [Priam] asked about Odysseus. "Come, tell me also about this man, dear child, who he is. He is shorter by a head than Agamemnon, son of

Atreus, but I see that he is broader in the shoulders and chest. His arms lie on the fruitful earth, and he like a ram is going up and down the ranks of warriors. I liken him to a thick-fleeced ram which goes through the flocks of white-fleeced sheep." Then Helen, daughter of Zeus, answered: "This is crafty Odysseus, son of Laërtes, who was raised in the land of Ithaca, rocky though it is. He knows all kinds of deceit and clever plans."

Then wise Antenor spoke to her and said: "Lady, true indeed are your words. Godlike Odysseus came here once before with Menelaüs, dear to Ares, for news of you. I was their host and welcomed them in my home, and I knew their stature and their wise intelligence. But when they joined in the assembly of the Trojans, Menelaüs was taller when they stood by his [head and] broad shoulders; yet when they both were seated Odysseus was the more noble. But when they began to weave their speeches and proposals before all, then indeed Menelaüs spoke glibly, a few words in a clear voice, since he was not long-winded or irrelevant, and he was younger also. But whenever wise Odysseus rose to speak he would stand and look down and fix his eyes on the ground, and he would not gesture with the sceptre before or behind him, but held it stiffly, like some unskilled man. You would say that he was angry and unintelligent too. But when he sent forth the great voice from his chest and the words that were like falling winter snows, then no other mortal could compete with Odysseus. Indeed then we were not amazed as we looked at the appearance of Odysseus."

The double portrait of the wise orator and the glib young king vividly puts before us two sides of the heroic ethos, and it prepares us for the complexity of Odysseus' character in the saga of his return from Troy.

ACHILLES AND HIS SON NEOPTOLEMUS (PYRRHUS)

The second chieftain who attempted to avoid the war was the mighty Achilles, prince of the Myrmidons (a tribe of Phthia, in central Greece) and the greatest of the Greek warriors, as well as the swiftest and most handsome. He was the son of Peleus and Thetis; Thetis was a sea-goddess, daughter of Nereus, who was avoided by Zeus when the secret was revealed hitherto known only to Prometheus and Themis—that Thetis' son would be greater than his father.¹²

Accordingly, Thetis was married to a mortal, Peleus, king of the Phthians. Peleus took part in the Argonauts' expedition and the Calydonian boar hunt (pp. 576 and 608–612), but as a mere mortal he was hardly a match for Thetis. It was with difficulty that he married her, for she was able to turn herself into various shapes in attempting to escape from him. Although the gods attended their wedding feast, Thetis left Peleus not long after the birth of Achilles. She tried to make Achilles immortal, either by roasting him in the fire by night and anointing him with ambrosia by day¹³ or by dipping him in the waters of the Styx. In the latter story, all parts of Achilles' body that had been submerged were invulnerable. Only his heel, by which Thetis held him, remained vulnerable. It was here that he received the fatal arrow wound.

Once Thetis left Peleus, Achilles was sent to the centaur Chiron for his education. From him he learned the art of music and other skills. While Achilles was with Chiron, Thetis learned that Troy could not be taken without Achilles; she also knew that he could live long and die ingloriously or go to Troy and die young and glorious. To circumvent his early death, she tried to prevent his going by disguising him as a girl and taking him to the island of Scyros, where he was brought up with the daughters of Lycomedes, king of the island. One of them was Deïdamia, with whom Achilles fell in love; their child, born after Achilles left Scyros, was Neoptolemus (also called Pyrrhus, which means “red-head”), who took part in the capture of Troy after his father’s death. Odysseus and Diomedes exposed Achilles’ disguise at Scyros. They took gifts for the daughters of Lycomedes, among them weapons and armor, in which Achilles alone showed any interest. As the women were looking at the gifts, Odysseus arranged for a trumpet to sound; the women all ran away, thinking it was a battle signal, but Achilles took off his disguise and put on the armor. Here is the description of the scene by the Roman poet Statius (*Achilleid* 1. 852–884), after the gifts have been set out by Diomedes:

 The daughters of Lycomedes see the arms and assume that they are a present for their mighty father. But when fierce Achilles saw the shining shield close by, chased with scenes of war and lying next to the spear, he grew violent . . . and Troy filled his heart. . . . When he saw his reflection in the golden shield he shuddered and blushed. Then observant Odysseus stood close to him and whispered: “Why do you hesitate? We know. You are the pupil of the centaur, Chiron, you are the descendant of [the gods of] sky and sea. The Greek fleet is waiting for you, the Greek army is waiting for you before raising its standards, the walls of Troy itself are ready to fall before you. Hurry, no more delaying!” . . . Already Achilles was beginning to take off his woman’s dress when Agyrtes sounded a loud blast on the trumpet, as he had been ordered to do [by Odysseus]. The girls began to run away, scattering the gifts. . . . Achilles’ clothing of itself fell from his chest, and he quickly seized the shield and short spear and, miraculously, he seemed to be taller by head and shoulders than Odysseus and Diomedes. . . . Stepping like a hero he stood forth.

So Achilles was discovered and joined the expedition. At Troy, he proved to be the mightiest of the champions on either side and a hero of enormous passions.

PHOENIX AND PATROCLUS

Two of Achilles’ associates, Phoenix and Patroclus, are important. Phoenix, at the instigation of his mother, lay with his father’s mistress. His father cursed him with childlessness, and Phoenix sought refuge from his father’s wrath with Peleus, who made him the tutor and companion of Achilles both in Phthia and at Troy.

Patroclus was a great warrior. When very young, he had killed a rival in anger over a dice game. Peleus took him in and brought him up to be the companion of Achilles. Achilles and Patroclus become devoted friends and perhaps lovers, and their relationship provides a major theme for the *Iliad*.¹⁴

THE GATHERING OF THE EXPEDITION AT AULIS

Menelaüs and Agamemnon sent heralds throughout Greece and the islands to summon the Greek leaders and contingents to the war; the expedition gathered at Aulis (on the coast of Boeotia, opposite Euboea) numbering nearly twelve hundred ships with their crews and fighting men.¹⁵

The Anger of Achilles, by J.-L. David (1748–1825): oil on canvas, 1819, 41½ × 57¼ in. Iphigenia has been brought to Aulis on the pretext that she is to be the bride of Achilles. David shows the moment when Agamemnon has revealed his true intention to Achilles, who draws his sword in anger to strike Agamemnon. The anger of the men contrasts with the sadness of Iphigenia, who has learned that she will be sacrificed, and of Clytemnestra, who gazes at Achilles as she puts her hand on her daughter's shoulder. The subject is based on Euripides' tragedy, *Iphigenia at Aulis*. (Fort Worth, Kimbell Art Museum.)

THE SACRIFICE OF IPHIGENIA

There were delays before the fleet could sail; for a long time contrary winds blew, and in despair Agamemnon consulted the prophet Calchas. He knew that Artemis had caused the unfavorable weather because Agamemnon had offended her,¹⁶ and that she could only be appeased by the sacrifice of Agamemnon's daughter Iphigenia, who therefore was fetched from Mycenae (on the pretext that she was to be married to Achilles) and sacrificed. In another version, however, Artemis saved her at the last moment, substituted a stag as the victim, and took Iphigenia to the land of the Tauri (the modern Crimea) to be her priestess.¹⁷

Lucretius, the Roman poet (ca. 55 B.C.), tells the story of Iphigenia with bitter pathos in order to show to what lengths men will go in the name of religion (*De Rerum Natura* 1. 84–101):

 Look how the chosen leaders of the Greeks, the foremost of men, foully defiled the altar of virgin Artemis at Aulis with the blood of Iphigenia. As they placed around her maiden's hair the headband which hung down evenly by her cheeks, she suddenly caught sight of her father standing sadly before the altar and at his side his ministers hiding the knife, while the people shed tears at the sight of her. Dumb with fear she fell to the ground on her knees. At such a moment little help to her in her misery was it that she had been his first child, that she had first bestowed upon the king the name of father. The hands of men brought her trembling to the altar, not that she might perform the customary ritual of marriage to the clear-ringing songs of Hymen, but that at the very time for her wedding she might fall a sad and sinless victim, sinfully butchered by her own father, all for the happy and auspicious departure of the fleet. Such are the monstrous evils to which religion could lead.

CALCHAS' PROPHECY

Calchas the prophet was an important figure in the Greek expedition, especially in times of doubt or perplexity. At Troy, as we shall see later, he gave the reason for Apollo's anger and advised the return of Chryseis to her father. At Aulis he interpreted a famous omen. A snake was seen to climb up a tree and devour eight chicks from a nest high in its branches; it then ate the mother, and was itself turned into stone by Zeus. Calchas correctly interpreted this to mean that the Greeks would fight unsuccessfully at Troy for nine years before capturing the city in the tenth.¹⁸

THE ARRIVAL AT TROY

PHILOCTETES

The expedition finally sailed from Aulis, but did not go straight to Troy. On the way the Greeks were guided by Philoctetes, son of Poeas, to the island of Chryse to sacrifice to its goddess. There Philoctetes was bitten in the foot by a snake;

and as the fleet sailed on, the stench from his wound became so noisome that the Greeks abandoned him on the island of Lemnos, where he remained alone and in agony for nearly ten years. Now Philoctetes' father, Poeas, had lit the funeral pyre of Heracles and had in return been given Heracles' bow and arrows, which Philoctetes later inherited. In the last year of the war, the Greeks captured Priam's son Helenus, who prophesied that only with the aid of Heracles' bow and arrows could Troy be captured. Accordingly, Odysseus and Diomedes fetched Philoctetes from Lemnos. The sons of Asclepius, Podalirius and Machaon, healed his wound, and with the arrows he shot Paris, thus removing the most formidable of the surviving Trojan champions.¹⁹

ACHILLES HEALS TELEPHUS

On the way to Troy the Greeks landed in Mysia, a district of Asia Minor. In the battle against the Mysians, Achilles wounded the Mysian Telephus, a son of Heracles. When the wound would not heal, Telephus despairingly asked the Delphic oracle for advice. Learning that "he that wounded shall heal," he went to the Greek army disguised as a beggar and asked Achilles to cure his wound. Achilles said he could not, for he was not a doctor, but Odysseus pointed out that it was Achilles' spear that had caused the wound. Scrapings from it were applied, and Telephus was healed.

PROTESILAÛS AND LAODAMIA

When the Greeks reached Troy the first to leap ashore was Protesilaüs, who was immediately killed by Hector. His wife, Laodamia, could not be comforted in her grief. Pitying her, Hermes brought back her husband from Hades for a few hours, and when he was taken away again, she killed herself. Another person to die in the first skirmish was a Trojan, Cynus, son of Poseidon, who was turned into a swan. The Greeks successfully established a beachhead, made a permanent camp with their ships drawn up on shore, and settled down to besiege Troy.

THE *ILIAD*

While the events of the first nine years of the war are obscure (since the epic poems in which they were described survive only in prose summaries), those of the tenth are in part brilliantly illuminated by the *Iliad*. The poem, however, deals only with events from the outbreak of the quarrel between Achilles and Agamemnon to the ransoming and burial of Hector.

Nine years were spent in a fruitless siege of Troy, varied only by abortive diplomatic exchanges and raids against cities allied with Troy. The division of the spoil from these cities led to the quarrel between Agamemnon and Achilles.

Agamemnon was given in his share Chryseïs, daughter of Chryses, priest of Apollo—but (as we shall see) he had to send her back. Therefore he took Briseïs, who had been given to Achilles and whom Achilles had come to love greatly. The wrath of Achilles, the principal theme of the *Iliad*, is characterized in the poem's opening lines (1. 1–7):

 The wrath of Achilles, Peleus' son, sing, O goddess, a ruinous wrath, which put countless woes upon the Achaeans and hurled many mighty souls of heroes to Hades, and made them a feast for dogs and a banquet for birds, and the will of Zeus was being accomplished, from the time when first Agamemnon and Achilles stood opposed in strife.

The passionate theme of “wrath,” the very word with which the poem begins, determines the intensity of emotion and the scope and form of its action. In verses of visual and auditory clarity as deceptively simple as they are profound, the story unfolds through scenes of great dramatic power. With Chryseïs in his possession, Agamemnon refused to allow Chryses to ransom his daughter, and Chryses therefore prayed to Apollo to punish the Greeks. Apollo's answer to the prayer is described in these vivid lines (*Iliad* 1. 43–52):

 So Chryses prayed, and Phoebus Apollo heard him. Angry at heart, he strode down from the peaks of Olympus, having his bow slung from his shoulder and his hollow quiver. The arrows clashed loudly upon his shoulders as he strode in his anger, and like night did he go. Then he sat apart from the ships and shot an arrow; terrible was the twang of his silver bow. First he shot the mules and the swift dogs, and next he shot his sharp arrow at the men. Constantly were the funeral pyres burning in great numbers.

This is the first appearance of a god in the *Iliad*, and it shows how the gods are participants in the saga of Troy, with Apollo constantly favoring the Trojans. Calchas advised that the evil could be ended only by the return, without ransom, of Chryseïs. Accordingly she was sent back, but this left Agamemnon without his share of the spoils, a humiliating situation for the greatest of the Greek kings. He therefore took Briseïs from Achilles, and Achilles repaid the dishonor by withdrawing his contingent, the Myrmidons, from the war.

Achilles is the embodiment of heroic *arete* (excellence). Important in the concept of *arete* is one's standing in the eyes of others, which is gained not only by words and deeds but also by gifts and spoils relative to those of others. Therefore Achilles' honor was slighted when Agamemnon took away Briseïs, and he had good cause to withdraw from the fighting, even though the Greeks suffered terribly as a result. Homer describes the mighty quarrel, during the course of which Athena restrains Achilles from attacking Agamemnon, and he describes the prophecy of Achilles as he withdraws from the war (1. 234–246):²⁰

 “By this sceptre, which will never grow leaves or roots, since it was cut in the mountains, and now the sons of the Achaeans bear it in their hands when they

administer justice, for they defend Justice in the name of Zeus—and this will be a great oath: In time all the sons of the Achaeans will long for Achilles. Then you [Agamemnon] will not be able to do anything, grieved though you be, while many men fall in death before Hector, slayer of men. And you will tear your heart, angry that you did not honor the best of the Achaeans.” So spoke the son of Peleus, and he cast the golden-studded sceptre upon the ground, and down he sat.

Angry, hurt, and resentful, Achilles finds comfort and support from his mother, Thetis. Theirs is a sad and touching relationship, tragic in the knowledge that Achilles has chosen to come to Troy to die young and gloriously rather than stay at home to live a long but mundane existence. Thetis agrees to go to Zeus for help, and she obtains from the supreme god an oath that he will honor her son, whom Agamemnon has dishonored, and grant success to the Trojans in his absence, so that the Greeks will come to regret Agamemnon’s actions and increase the glory of Achilles.

At the end of Book 1, it is difficult not to condemn Agamemnon as a guilty, arrogant sinner, first against Apollo and his priest and then against Achilles. Achilles’ tragic withdrawal, like Apollo’s arrows, will cause the deaths of countless of his Greek companions, and he will be condemned for his selfish, cruel, and pitiless behavior. Yet the wrath of Apollo, until properly appeased, has been just as devastating, heartless, and indiscriminate, causing innumerable deaths, in this case, too, because of the arrogance of Agamemnon. Homer juxtaposes the wrath of Achilles and that of Apollo at the beginning of his epic. Are we to judge the actions of the god and those of the mortal demigod by two different standards?

In Book 3 a truce is agreed upon to allow Menelaüs and Paris to fight in individual combat, in order to decide the issues and the fate of Helen. In the duel, Menelaüs gets the better of Paris. He takes hold of Paris by the helmet and swings him around so that he is choked by the neck-strap. When Aphrodite notices that Paris is lost, she quickly snatches up her favorite with the ease of a goddess and transports him to his fragrant bedchamber. She goes to summon Helen, who has already witnessed the humiliation of her husband from a high tower of Troy. Although Aphrodite is disguised as an old woman, Helen recognizes the beautiful breasts and flashing eyes of her mirror image, and with this recognition of herself she rebels.

As the scene proceeds, through the literal depiction of the goddess Aphrodite, the inner soul (the psyche) of Helen is laid bare. Helen wonders where in the world beauty and passion—Aphrodite—will lead her next, and in indignation she demands that the goddess abandon Olympus and go herself to Paris until he makes her his wife or his slave. Helen is too ashamed before the eyes of the Trojan women to return to his bed. At this Aphrodite becomes enraged and threatens to turn against Helen. Helen submissively returns to her bedchamber and to Paris, whom Aphrodite has restored from a bedraggled loser into a beautiful dandy. Yet a disillusioned Helen greets her beloved with these demeaning words (3. 428–436):

“You have come out of battle? You ought to have died there, beaten by a stronger man, who was my former husband. To be sure you boasted before that you were mightier than warlike Menelaüs in the might of your hands and your sword. So then go now and challenge warlike Menelaüs again to face you in battle. No, I bid you hold on and do not fight in combat against blond Menelaüs in your rashness, lest somehow you will quickly be subdued by his spear.”

Paris responds with characteristic nonchalance, and Aphrodite is victorious once again (3. 438–447):

 “My wife, do not rebuke me with harsh words; now Menelaüs has won with the help of Athena. At another time I will beat him, for the gods are on our side too. Come on now, let us go to bed and make love. Never at any time has desire so clouded my senses, not even when we first consummated our love on the island of Cranaë, after I had carried you out of lovely Sparta and we sailed away. This is how I love you now and how sweet desire takes hold of me.” He spoke, and led her to bed, and his wife followed along.

In Book 6, Hector, the valiant brother of Paris, seeks out his wife, Andromache, to bid her farewell before returning to the battlefield. On his way he looks in on Paris, who is still dallying with Helen in their home. After his defeat by Menelaüs and his lovemaking with Helen, Paris is sullenly polishing his armor. Hector has obviously interrupted another of their quarrels. Paris tells his brother how Helen has just now been urging him to go out to battle, and he agrees with them both that it is time for him to return. Helen speaks to Hector in words fraught with misery and self-reproach (6. 344–358):

 “My brother-in-law, how I wish that I—cold, evil-scheming bitch that I am—had died on the day when first I was born before all this had happened—that a terrible blast of wind had hurled me into the side of a mountain or into a wave of the resounding sea to be swept away. But since the gods have so ordained these evils, I wish that I were the wife of a better man, who felt a sense of guilt and shame before the eyes of society. But his character is not rooted in such values and he will never change, and so I think that he will reap the rewards. Now come here and sit down in this chair, brother-in-law, since the battle toil has crushed you the most, all on account of me, a bitch, and retribution for Paris’ guilt. Upon us both has Zeus imposed an evil fate, so that we might become for future generations the subjects for poetic songs.”

Hector tells Helen that he must be on his way. He finds that his wife, their son Astyanax, and the boy’s nurse are not at home; they have been anxiously watching from the battlements in concern for his fate. In the sad farewell between husband and wife, Andromache implores Hector not to go to battle and leave her a widow and their child an orphan. (See Color Plate 20.) Achilles has already killed her father and seven brothers; he captured their mother, and although he accepted a ransom for her return, she has died too. So Hector is father, mother, and brother to her, as well as dear husband. Hector responds with loving conviction (6. 441–485):

“To be sure, all these things are of deep concern to me too, but I should feel terrible shame before the Trojan women with their long robes if like a coward I were to shrink from battle. Nor would my spirit allow me to, since I have learned to be brave always and to fight amidst the first of the Trojans, winning great glory for myself and for my father. For I know this well in my heart and in my soul. The day will come when Troy will be destroyed and Priam and the people of Priam of the fine ashen spear. The suffering that will follow for the Trojans—for Hecuba herself and king Priam and my many brave brothers who will fall in the dust under the hands of their enemies—is not so much a grief for me as is the pain that you will endure when one of the bronze-clad Achaeans leads you away weeping and takes from you the day of your liberty. In Greece at another’s bidding you will work the loom and draw water from a spring in Laconia or Thessaly, much against your will, but heavy necessity will lie upon you. Then someone, seeing you in tears, will say, ‘This is the wife of Hector, who was by far the best fighter when the horse-taming Trojans did battle for Ilium.’ Thus at some time will someone speak, and your grief will be awakened anew because you are without such a husband to ward off the day of your slavery. But may I die with the earth heaped up over my grave before I hear your cries of anguish as you are dragged away a captive.”

Thus radiant Hector spoke and reached out for his son, but the child clung to the bosom of the fair-girdled nurse, screaming in dismay at the sight of his father, startled as he saw the bronze crest of his helmet and the horsehair plume nodding dreadful from its peak. His dear father laughed aloud and his lady mother, and immediately Hector took the helmet from his head and placed it all-shining on the ground. Then he kissed his dear son and fondled him in his arms and spoke in prayer to Zeus and the other gods:

“Zeus and you other gods, grant that this son of mine become outstanding among the Trojans, just as I am, excellent in his might and a strong ruler over Ilium. Some day let someone say that this boy has turned out to be far better than his father, as he comes out of the battle, and when he has killed his enemy may he bring home the gory spoils and may his mother rejoice in her heart.” Thus speaking he placed his son in the hands of his dear wife. She took him to her fragrant bosom, laughing amidst her tears.

On two other occasions, Andromache prophesies her fate and that of her son and of the city, each time addressing Hector’s corpse. Here is how she takes her farewell of him (24. 725–738):

“My husband, you were young when you were taken from life, and you leave me a widow in the palace. The boy is still just a baby, who is our child, yours and mine, ill-fated that we are. I do not think that he will grow to manhood, for the city will first be utterly sacked now that you, its guardian, are dead, who defended the city, the chaste wives, and the little children. They will soon go away in the hollow ships, and I with them. And you, my child, either will go with me, where you will perform demeaning tasks, laboring for a harsh master; or else one of the Achaeans will take you by the hand and hurl you in anger from the tower—a grim death—because Hector once killed his brother or father or son.”

Indeed, Andromache became the slave of Neoptolemus after the fall of Troy, and her infant son Astyanax was thrown from the city walls.

A major development in the theme of Achilles' wrath occurs in the ninth book. Should Achilles have relented when Agamemnon offered to restore Briseis with many valuable gifts? It is a measure of his sensitive and passionate nature that he refused the offer, presented by three envoys, Odysseus, Phoenix, and Ajax, son of Telamon.

Odysseus' speech to Achilles echoes for the most part the directions given by Agamemnon, but it begins and ends with more tactful and artful persuasion. In describing the successes of the Trojans, Odysseus emphasizes the danger to Achilles and the opportunity to destroy Hector. The fury of Hector cannot wait to come down to destroy their ships. Then he lists the gifts to be given to Achilles immediately upon his return: seven tripods, ten talents of gold, twenty shining cauldrons, twelve prize-winning horses, seven women from Lesbos, particularly beautiful and skilled (whom Achilles had picked out for himself when he took Lesbos!), and Briseis, with a solemn oath that Agamemnon had never slept with her. In addition, if the gods were to grant that Priam's city be sacked, Achilles might heap up his ship with gold and bronze and choose twenty Trojan women for himself, the most beautiful after Helen. Beyond this, if they return safely to Greece, Agamemnon promises to make Achilles his son-in-law, with a dowry larger than any ever given before and a kingdom of seven rich cities over which he might rule like a god.

At the conclusion of his speech, Odysseus is careful not to repeat Agamemnon's final instructions: "Let him be subdued—Hades is the most hateful of gods and mortals because he is inexorable and inflexible. Let him submit to me, inasmuch as I am more royal and assert that I am the elder" (9. 158–161). Instead Odysseus, with more tact and wisdom, begs that Achilles, even if his anger and hatred of Agamemnon are too great for forgiveness, should at least have pity on the other Greeks, who are worn out in battle and will upon his return honor him like a god. In conclusion Odysseus tries to win Achilles over by playing upon his jealousy of Hector's arrogant success, implying that now is his chance to achieve his desire for glory through the defeat of Hector, who thinks that no Greek is his match. By questioning some of these values in his reply, Achilles reveals a sensitivity and introspection that make him unique (9. 308–345):

 "I must give a direct answer to your speech, telling you honestly what I think and what I will do, so that you ambassadors may not try to wheedle me one after the other. For I hate the man who hides one thing in his heart and says something else as much as I hate Hades and his realm. I will say outright what seems to me best. I do not believe that the son of Atreus, Agamemnon, will persuade me, nor will the other Greeks, since it was no pleasure for me always to fight against the enemy relentlessly. The coward is held in equal honor with the brave man who endures and fights hard, and equal is his fate. The one who does nothing and the one who does much find a similar end in death. It was no advan-

tage to me when I suffered deeply, continually risking my life in battle. As a bird brings food to her unfledged nestlings, after she has won it with much distress, so I used to spend many sleepless nights and endure days of blood in fighting against enemies belligerent in the defense of their wives.

Indeed, I say to you, I plundered twelve populated cities by ship and attacked another eleven by land; from all these I took many splendid treasures and brought them back to give to Agamemnon, the son of Atreus. He who had remained behind by his swift ships took them, distributing a few things but keeping much for himself. All that he gave as prizes to the nobles and kings they keep secure; it was from me alone of the Achaeans that he stole. He has a dear wife, let him sleep with her for his pleasure. Why must the Greeks fight with the Trojans? Why did the son of Atreus gather an army to bring here? Was it not on account of Helen with her beautiful hair? Are the sons of Atreus the only ones among mortals who love their wives? To be sure, any decent and responsible man loves and cares for his own, just as I loved Briseïs from the depths of my heart, even though she was won by my spear. As it is now, since he took my prize out of my hands and deceived me, let him not try me, since I know him too well—he will not persuade me."

Achilles' response continues at some length. He makes it clear that he despises gifts from Agamemnon, however grand they may be, and he has no need or desire to be chosen as his son-in-law. Surely Agamemnon could find someone more royal and worthy of respect! The shameless Agamemnon, "dog that he is, would not dare to look me in the face!" The gifts are excessively generous, but Achilles sees through Agamemnon's façade. This is not reconciliation but bribery. Many critics have said, with some justice, that Achilles by his rejection of these gifts has gone too far in his pride and that he is guilty of the sin of *hubris*. He should understand, they say, that Agamemnon cannot humiliate himself by coming to Achilles with apologies, as if to a god. Is it really too much, however, to ask a good king to admit his error in person? Agamemnon by his royal arrogance may be as guilty as Achilles, if not more so, because he, the commander-in-chief, is ultimately responsible for all the slaughter and suffering that might have been avoided.

So Agamemnon's attempt to win Achilles back has failed. After Achilles' old tutor, Phoenix, also tries to persuade Achilles, the third envoy, the warrior Ajax, son of Telamon, bluntly concludes the embassy (9. 628–638):

"Achilles has put a savage and proud spirit within his breast. Obdurate, he does not care for the love of his friends, with which we honored him above all men beside the ships, unpitying as he is. Yet others have accepted payment for the death of a brother or a son. But the gods have put in your breast a spirit unfor-giving and harsh, because of one girl."

Without Achilles, the Greeks were driven back by the Trojans until Hector began to set fire to the ships. All this was done, says Homer, in fulfillment of the will of Zeus (1. 5), for Zeus had agreed to honor Achilles in this way after Thetis had prayed to him to avenge the wrong done by Agamemnon.

When Hector broke through to the Greek ships, Achilles finally allowed his friend and companion, Patroclus, to take his armor and fight Hector and the Trojans. For a while, Patroclus carried all before him, even killing Sarpedon, son of Zeus. But he went too far in his fury. Homer describes (16. 786–867) how Apollo opposed him in the battle and struck him across the back with his hand. Patroclus was dazed by the blow, and the Trojan Euphorbus wounded him with a spear. It was left for Hector to deal the deathblow to the enfeebled and stunned Patroclus.

The death of Patroclus is the turning point of the epic. Achilles is overcome by grief, guilt, and remorse. His anguish is so terrifying that his comrades fear he may take his own life. Yet his mother, Thetis, provides comfort once again as Achilles steadfastly makes the tragic decision to return to battle to avenge Patroclus and so, assuredly, to fix the seal upon his own fate. At the beginning of Book 18, Antilochus, son of Nestor, who brings the tragic news of Patroclus' death, finds Achilles agonized with anxiety and fear that Patroclus has ignored his warning not to fight Hector and is dead. Antilochus in tears addresses Achilles (18–38):

 “Ah, son brave Peleus, you must hear my painful message—how I wish this had never happened—Patroclus lies dead and they are fighting over his corpse, which is naked. Hector with the flashing helmet has taken his armor.”

Thus he spoke and a black cloud of grief enveloped Achilles. He clutched the black dirt with both his hands and poured it over his head and his handsome face was defiled. The dark filth covered his immortal tunic and he, his mighty self, lay stretched out mightily on the ground and he tore at his hair and befouled it.

And the women whom Achilles and Patroclus had taken as captives, stricken to the heart with grief, cried aloud and ran out to surround great Achilles and they all beat their breasts and the limbs of each of them went limp. Antilochus also by his side, shedding tears and lamenting, restrained the hands of Achilles, whose proud heart was overwhelmed with sorrow, because he feared that he would cut his throat with his sword. Achilles cried out a terrifying scream of woe and his divine mother heard him, as she sat beside her aged father Nereus in the depths of the sea and in turn she answered with a cry. The goddesses gathered around her, all her sister Nereids who were there in the deep sea.

Homer goes on to name all these Nereids in lines that read very much like a catalogue that might have been composed by Hesiod. Homer then continues (50-126):

 Together all the Nereids beat their breasts and Thetis began her lament:
 “Hear me, my sisters, daughters of Nereus, so that all of you, once you have listened, will know well how many sorrows are in my heart. Ah, poor me, unhappy mother of the best of sons born for an evil fate, since I give birth to a child, both blameless and strong, the best of heroes. He shot up like a young sapling and I nurtured him and he flourished like a tree, growing up strong, the

pride of the orchard. But then I sent him forth with the curved ships to battle against the Trojans on Ilium. He will not return home to the house of Peleus and I will never get him back again. All the while that he lives and looks upon the light of the sun, he suffers in anguish, and when I go to him I am not able to help him at all. Nevertheless, I will go to him in order to see my dear son and I will listen to the sorrow that has come to him as he stays out of the battle."

Thetis lamented thus and left her cavern and her sisters went with her, in tears, and the swell of the sea broke and gave way. When they reached fertile Troy, they all came to shore in an orderly stream, where the cluster of the Myrmidons' ships were anchored close by swift Achilles. His divine mother stood before him, as she heaved a deep sigh, and uttering a sharp cry she clasped the head of her son and grieving spoke winged words: "My son, why are you weeping? What sorrow has touched your heart? Tell me and don't keep it hidden. These things have been brought to fulfillment through Zeus, just as you once wanted, lifting your hands in prayer that all the sons of the Achaeans be pinned against the prows of their ships and suffer terrible atrocities, all because of their need for you."

Achilles, swift of foot, groaning deeply answered: "Mother, Olympian Zeus has accomplished these things for me but what joy is there in them now, since my dear friend has perished, Patroclus, whom I loved more than my other comrades, loved as much as my own life. I have lost him. Hector has killed him and stripped him of my mighty armor, wondrous to behold. The gods gave it to Peleus, a splendid gift, on the day when they brought you to the bed of a mortal man. How I wish you had continued to live among the immortal goddesses of the sea and Peleus had won a mortal wife! But as it is now there must be endless sorrow in your heart for the death of your son, whom you will never welcome back again, as he returns home. For I have no more heart to go on living, unless Hector first is struck down by my spear and loses his life and pays the price for stripping my armor from Patroclus, son of Menoetius."

Thetis then in turn answered him amidst her tears: "My son, your life will soon be over from what you are saying. For right after the death of Hector, your own death is at hand."

Then in great distress Achilles, swift of foot, answered her: "So may I die at once, since it was never destined to save my comrade from death. He has perished very far from his fatherland because he did not have me, with my prowess in war, as protector. Now then alas I will not return to my fatherland and I did not become any light of salvation for Patroclus or my other comrades, so many of whom were struck down by mighty Hector. But I sit by my ships, useless, a burden on the earth, though I am superior in battle like no other of the bronze-armored Achaeans, even if others are better speakers in counsel. I wish strife would disappear from among both gods and human beings and wrath, which has sent even the most sensible into a rage and which, much more sweet than the dripping of honey, wells up in the breasts of men like smoke. Thus the king of men Agamemnon enraged me but we will let this be a thing of the past, and even though I am angry I will overcome the anger in my heart because I have to. For now I will go back into battle so that I may seek out Hector, the slayer of my dear friend. I will accept my own death whenever Zeus wishes to bring it about or the other immortal gods. For not even Heracles in his might escaped

death, he who was most dear to Zeus the king, son of Cronus but fate defeated him and the fierce anger of Hera. So I too, if a like fate has been fashioned for me, will lie down in acceptance when death comes. But now may I win goodly renown and compel some one of the Trojan women or deep-girdled Dardani-ans to wipe away the tears from her tender cheeks with both her hands in her outburst of grief and may they so realize that I have stayed away from the fighting for too long a time. Do not try to keep me away from the battle, however much you love me because you will not persuade me."

Thetis sadly agrees with the tragic decision made by Achilles to determine his own death by avenging his dear Patroclus, and she tells him that she will go to Hephaestus to have new armor made for him.

Grief over the death of Patroclus drove Achilles to end his quarrel with Agamemnon and to return to the fighting with one goal, to kill Hector. So Briseis was returned with costly gifts, and upon her return she lamented over the corpse of Patroclus (19. 287–300):

 "Patroclus, most dear to my unhappy heart, I left you alive when I was taken from the hut, and now upon my return I find you, leader of the host, dead. Thus for me evil follows upon evil. I saw my husband, to whom my father and lady mother gave me, transfixed by a sharp spear in front of his city, and my dear brothers, all three born to our mother, on that day found their way to ruinous death. You would not let me cry when swift Achilles killed my husband and sacked the city of godlike Mynes, but you said that I would be made the wedded wife of godlike Achilles and that I would be taken back in his ship to Phthia to celebrate our marriage among the Myrmidons. So I lament for you unceasingly, you who were always gentle."

Thetis brought new armor, made by Hephaestus, to her son. Homer describes the shield of Achilles in detail, with its portrayal of the human world of the Mycenaeans—cities at war and at peace, scenes of farming and other peaceful activities (a lawsuit, for example, marriage, dancing, and music).

Meanwhile Hector has spoiled Patroclus' corpse of the armor of Achilles, which he himself put on. As he changes his armor, Zeus watches and foretells his doom (17. 194–208):

 He put on the immortal armor of Achilles, son of Peleus, which the gods had given to his father and he in turn in his old age gave to Achilles his son. But the son did not grow old in the armor. And when Zeus the cloud-gatherer saw Hector from afar arming himself with the arms of the godlike son of Peleus, he moved his head and spoke to his own heart: "Ah, wretched man! You do not now think of death that will come close to you. You are putting on the immortal arms of the best of men, before whom others also tremble. That man's friend you have killed, gentle and strong, and you have taken the arms from his head and shoulders, as you should not have done. For now I will give you great strength. In return, Andromache will never take the noble arms of the son of Peleus from you when you return from battle."

Achilles returned to the battle and drove the Trojans back to the city, in his rage fighting even the river-god Scamander and filling the river with Trojan corpses. Eventually the Trojans were driven into the city, and only Hector remained outside the wall. The single combat between Hector and Achilles is the climax of the *Iliad*. Hector is chased by Achilles three times around the walls; “as in a dream the pursuer cannot catch him who is running away, nor can he who runs escape nor the other catch him” (22. 199–200). Finally, Zeus agrees to the death of Hector (*Iliad*, 22. 209–213):

Then indeed the Father held up the golden scales, and in them he put two lots of grievous death, the one for Achilles, and the other for Hector, tamer of horses, and he held the scales by the middle. And the fatal day of Hector sank down toward the house of Hades. Then Phoebus Apollo left Hector, and Athena, the grey-eyed goddess, came to the son of Peleus.

Athena helps Achilles by leading Hector to his death through treachery. She takes the form of his brother, Deiphobus, in whom Hector, now rendered defenseless, puts his final trust (22. 295–301):

He called with a great shout to white-shielded Deiphobus and asked for a long spear, but Deiphobus was nowhere near him. And Hector knew the truth in his heart and said, “Alas! Now for sure the gods have summoned me deathward. For I thought that the hero Deiphobus was beside me, but he is inside the walls and Athena has deceived me. Now indeed evil death is not far away but very near, and I have no way out.”

Deserted by the gods and deceived by Athena, Hector died at the hands of Achilles, who refused to show any mercy and dragged the corpse back to his hut behind his chariot. Next Achilles celebrated the funeral of Patroclus, on whose pyre he sacrificed twelve Trojan prisoners. He also held athletic games in honor of Patroclus, at which he presided and gave valuable prizes for the winners. Yet his anger against Hector was still unassuaged, and daily for twelve days he dragged Hector’s body round the tomb of Patroclus behind his chariot; the mutilated corpse was refreshed and restored by Apollo each day. Only when Thetis brought him the message of Zeus was Achilles ready to relent. Priam himself, with the help of Hermes, came to Achilles’ hut and ransomed the corpse of his son. The scene where the old man kneels before the killer of so many of his sons is one of the most moving in all Greek saga (24. 477–484):

Great Priam entered, unseen by Achilles’ companions, and stood near Achilles. With his hands he took hold of Achilles’ knees and kissed his hands, hands terrible and man-killing, which had killed many of Priam’s sons. Achilles was full of wonder as he looked at godlike Priam, and the others also wondered and they looked at each other.

Hector and Achilles. By Eunice Pinney (1770–1849); watercolor on paper, 1809–1826, 16 × 20 in. Eunice Pinney, a member of a prominent Connecticut family, took up painting when she was thirty-nine years old. Her work has more vigor and originality than that of less mature artists in the early Republic. Here Achilles thrusts his spear into Hector's neck (*Iliad* 22. 326–329), while Athena encourages him from above. In the background are the walls and the people of Troy and, to the left, the springs of the river Scamander "where the wives and daughters of the Trojans used to wash their clothes" (*Iliad* 22. 154–155). Note the elaborate clothing of the warriors, the miniature Gorgon's head on Athena's robe, and the owl that accompanies her. All three of the major figures are left-handed, as sometimes happens with designs for engravings or tapestries, for which the final product would be reversed. In fact this painting was copied from an engraving of the oil sketch by Peter Paul Rubens of "The Death of Hector" for his tapestry series on "The Life of Achilles" (now in Rotterdam). Pinney has dispensed with the herms and putti of the sketch, substituting trees for the former. In the center she has kept the prominent shield of Achilles (the subject of much of Book 18 of the *Iliad*) and on the left, beyond the tree and the Scamander, the white horses and charioteer who will drag the corpse of Hector around the tomb of Patroclus. (*Abby Aldrich Rockefeller Folk Art Collection, Williamsburg, Virginia.*)

When Priam has made his appeal to Achilles and they both have had their fill of lamentation, each remembering his sorrows, Achilles explains the ultimate reason for human misery (24. 524–533):

☞ “No [human] action is without chilling grief. For thus the gods have spun out for wretched mortals the fate of living in distress, while they live without care. Two jars sit on the doorsill of Zeus, filled with gifts that he bestows, one jar of evils, the other of blessings. When Zeus, who delights in thunder, takes from both and mixes the bad with the good, a human being at one time encounters evil, and at another good. But the one to whom Zeus gives only troubles from the jar of sorrows, this one he makes an object of abuse, to be driven by cruel misery over the divine earth.”

Achilles has finally learned through suffering true compassion. His pessimistic view of human existence lies at the core of the Greek tragic view of life. It is a view mirrored with sad beauty by Herodotus, as we have seen in Chapter 6, and echoed again and again by the dramatists, who delight in the splendid fall of those who were once great and blessed. “Never count a person happy until dead.”

So Priam ransomed Hector and returned to Troy with the corpse. The *Iliad* ends with the funeral of Hector, over whose body Andromache, Hecuba, and finally Helen had poured out their lamentations. For nine days the people of Troy mourned for Hector, whose death had made inevitable their own fate.

Achilles is not only subject to vehement passions. Alone of the Greek heroes he knows his destiny clearly: to Odysseus’ speech in the embassy he replies (9. 410–416):

☞ My mother, Thetis of the silver feet, has told me that two fates are carrying me to the goal of my death. If I stay here and fight before the city of the Trojans, then I lose my homecoming, but my glory will never fade. But if I return home to my own dear land, then gone is my noble glory, and my life will be long.

The character of Achilles is perfectly expressed in these words. When his horse, Xanthus, prophesies his death (19. 404–417), Achilles replies:

☞ Well do I know that my destiny is to die here, far from my dear father and mother. Even so, I shall keep on. I shall not stop until I have harried the Trojans enough with my warfare.

←
The Funeral of Patroclus. Apulian red-figure krater by the Darius painter, ca. 330 B.C.; height 56 in. In the central panel is the pyre with Hector’s spoils (originally Achilles’ armour worn by Patroclus) on it. To its left Achilles holds a Trojan prisoner by his hair before running him through with his sword: three other bound prisoners to the left await the same fate. To the right of the pyre Agamemnon pours a libation. In the lower panel the charioteer of Achilles, Automedon, prepares to drag the corpse of Hector behind the four-horse chariot around the tomb of Patroclus. In the upper register the old warriors, Nestor (seated) and Phoenix, converse in a tent. (*Naples, Museo Nazionale.*)

Again, when the dying Hector foretells Achilles' death, Achilles resolutely accepts his fate. Nor is Achilles always violent. At the funeral games for Patroclus, he presides with princely dignity and even makes peace between the hot-tempered competitors. We have also seen how he gave up his anger against Hector and treated Priam with dignity and generosity. Achilles is a splendid and complex hero, incomparably the greatest figure in the Trojan saga.

THE OLYMPIAN GODS IN BATTLE

The gods are all-important participants in the Trojan war. We have seen (in Chapter 5, pp. 118–120) how Hephaestus settles the quarrel between Zeus and Hera at the end of the first book of the *Iliad*, an episode that vividly displays the gulf between mortal and immortal emotions. The first book sets forth the quarrel between Agamemnon and Achilles, which (as the poet says in the second line of the poem) ends in the death of so many people. In contrast, the quarrel between Zeus and Hera ends in laughter and lovemaking. We also have seen (in Chapter 5, pp. 111–113) the sacred marriage of Zeus and Hera in Book 14 of the *Iliad*, the union of sky-god and earth-goddess. Usually the gods are distant observers of human battle, which is nevertheless a direct concern to them. Yet individual gods and goddesses sometimes take part in battle by helping or protecting their mortal favorites.

In two episodes (which are called “theomachies”), however, the gods themselves fight each other on the battlefield. In the first of these Athena descends to the battle in a chariot with Hera. We translate here the description of her arming (*Iliad* 5. 736–747):

 Athena put on a tunic and armed herself for tear-filled battle with the armor of Zeus, the cloud-gatherer. Round her shoulders she put the tasseled aegis, a fearsome sight, ringed all around with Fear. In it is Strife, in it is Might, in it is icy Pursuit, in it is the head of the frightening monster Gorgon—a terrible and grim image, the sign of Zeus the aegis-carrier. On her head she put the double-crested golden helmet with its four metal plates, decorated with images of defenders of a hundred cities. She climbed into the fiery chariot, she grasped the heavy, long spear, with which she lays low the ranks of men with whom she, daughter of a mighty Father, is angry.

She helps Diomedes and herself takes part in the fighting. Even Aphrodite enters the battle and is wounded by Diomedes—a mortal wounding an immortal. Aphrodite returns to Olympus and is comforted by her mother, Dione (*Iliad* 5. 382–384):

 Be patient, my child, and endure, even though you are in pain. For many of us who dwell in the palaces of Olympus have endured suffering caused by men, causing harsh pain to each other.

Dione goes on to name gods who have been wounded by mortals. Finally Zeus, alerted by Athena and Hera, says to Aphrodite (*Iliad* 5. 428–430):

 Battle is not your gift, my child. You should busy yourself with the work of desire and love. Leave all this business to swift Ares and Athena.

Diomedes wounds even the god of war himself, Ares, who complains to Zeus and finds little sympathy (see Chapter 5, p. 124).

The second theomachy is in Books 20 and 21. In the Council of the Gods at the beginning of Book 20, Zeus gives permission to the gods to fight on the field of battle, while he remains above it all (*Iliad* 20. 22–25):

 I will stay here in a fold of Olympus: I will watch from my seat and delight my mind. You other gods may go to the Trojans and Achaeans and give help to both sides, wherever you decide.

Thus the battle becomes more violent, as the gods inspire the heroes with fighting spirit and themselves take part. Once again the contrast is drawn between the reality of human suffering and the triviality of the gods' injuries. Mortals must fight and die: the wounds of the immortals are soon healed.

Not all the gods who are on the battlefield fight. Poseidon challenges Apollo, who replies (*Iliad* 21. 462–467):

 Earth-shaker, you would not say I was prudent if I were to fight you for the sake of wretched mortals. They are like leaves that flourish with fiery colors, for a little while eating the fruits of the earth. Then they fade away and perish, lifeless. Let us, however, stop fighting now, and let mortals fight.

The theomachies help us see the unbridgeable gap between the mortal and the divine. They show that it *is* ridiculous for gods to fight like mortals, yet they also show that human warfare is a concern of the Olympians. The theomachies, by recognizing the triviality of divine pain, serve to illuminate human suffering. Nor should we take them too seriously: we end this discussion with the description of Hera's attack on Artemis (*Iliad* 21. 489–496):

 Hera spoke and with her left hand seized Artemis by her wrists. With her right hand she stripped the bow and arrows from her shoulder, and with a smile she boxed her ears and stunned her. Out fell the arrows from the quiver. In tears the goddess [Artemis] fled like a pigeon that flies into a hole in a rock chased by a hawk (for it was not fated that the pigeon should be caught)—even so did Artemis run away in tears and left her bow and arrows there.

THE FALL OF TROY

The brilliance of the *Iliad* makes the rest of the saga of the Trojan War pale by comparison. Episodes are recorded in summaries of lost epics, in drama, in many vase-paintings, and in Vergil's *Aeneid*, so that we can tell the story of the rest of the war.

THE UNIVERSALITY OF THE *ILIAD*

Since the *Iliad*, if not before, war has served as one of the greatest themes in all literature, a universal human experience, one that lays bare the extremes of human character and passion and explores with wrenching intensity the heights and depths of human relationships. What age has not known war, despite all condemnation, a universal and persistent plague? What man and woman do not care about how they are seen by others? Who has never let rage control action? Who has not had to face an encounter and quailed before it in fear? Who has never felt controlled by a greater power that cares little for the lot of humans and has never questioned standards of moral behavior or concluded that we are all victims and that injustice too often motivates human action? The archetypal Trojan War has become a mirror through which we see war forever, not only in all its devastating horror and brutality but also in the lofty grandeur of the achievements it can inspire in the face of life and death: we see men and women, husbands and wives, brothers and sisters challenged by the most harrowing ordeals, which put them to the test and define their bravery or cowardice, their love or betrayal, their selfishness or their patriotism. The great heroes and heroines of the *Iliad*, in their diversity and scope, transcend the mores of their time and place to epitomize us all. It is easy to recognize not only the men as prototypes but also the women from the depth and grandeur of individual depictions: Andromache, the deeply devoted wife of Hector and mother of Astyanax; Hecuba, the powerful and aged queen, loving wife and mother, who sees her Hector killed and will eventually lose her husband and all her children and be reduced to utter desolation; Helen, trapped by her own passion, as she herself admits, between two opposing forces, a woman of grand stature, the focal point of the entire struggle. The reinterpretations of Helen's character since the time of Homer to the present day have been legion, with judgments ranging from guilty whore to guiltless victim.²¹ Her beauty has inspired countless poems: Christopher Marlowe made her an object of sensual desire in *Dr. Faustus* with the lines beginning, "Was this the face that launched a thousand ships / and burn't the topless towers of Ilium?" For Goethe, in *Faust* (Part two, Act three), she symbolized all that is beautiful in classical antiquity.

The universality of the *Iliad* and the devastating truth of Homer's depiction of war and its hero Achilles find powerful and specific confirmation in a brilliant book by Jonathan Shay that illuminates the experiences and sufferings of Vietnam veterans through a study of the *Iliad*, in particular the character and emotions of Achilles.²² Dr. Shay, a psychiatrist who appreciates Homer's contemporary value, finds parallel themes such as these: betrayal of "what's right" by a commander; the shrinkage of social and moral horizons; intense comradeship reduced to a few friends; and the death of one of these special comrades, followed by feelings of grief and guilt culminating in a berserk rage.

ACHILLES AND PENTHESILEA

After the funeral of Hector the fighting resumed, and Achilles killed the leaders of two contingents that came from the ends of the earth to help the Trojans. From the north came the Amazons—the legendary warrior women—led by Penthesilea. Achilles killed her; in some versions, just as Achilles was about to deal the fatal thrust, their eyes met and he fell in love with her.²³ Achilles mourned over her death and her beauty and killed Thersites, who taunted him.²⁴ For this murder Achilles had to withdraw for a time to Lesbos, where he was purified by Odysseus.

ACHILLES AND MEMNON

A second foreign contingent was that of the Ethiopians, from the south. They were led by Memnon, son of Eos (Aurora), goddess of the dawn, and of Tithonus (a brother of Priam). After Memnon's death, his followers were turned into birds that fought around his tomb. Achilles did not long survive these victories.

THE DEATH OF ACHILLES

As he pursued the Trojans toward the city, Achilles was fatally wounded in the heel by an arrow shot by Paris with the help of Apollo. After a fierce fight, his corpse was recovered by Ajax, son of Telamon, and buried at Sigeum, the promontory near Troy. Agamemnon's ghost tells the ghost of Achilles about the battle over his corpse and his splendid funeral. The Greeks prepared the corpse for cremation and shaved their heads. Thetis herself came from the sea accompanied by her sea-nymphs, and, with the Muses, they mourned with wailing and dirges, while the Greeks wept (*Odyssey* 24. 63–70):

 For seventeen days and nights, immortal gods and mortal men, we wept for you. On the eighteenth we gave you to burning fire, and we sacrificed flocks of fat sheep. You were burned in the clothing of the gods, anointed with oil and sweet honey. Many of the Achaean heroes paraded in armor around the burning pyre, men on foot and horseback, and a loud roar arose.

Agamemnon describes how Achilles' bones were put in a golden urn by Thetis, mixed with those of Patroclus. Then the great tomb was raised, and Thetis gave funeral games in honor of her dead son. Thus Achilles, the greatest of Greek heroes, was given a funeral and burial that would ensure his fame for posterity.²⁵

The ghost of Achilles appeared to the Greeks after the sack of Troy and demanded that Polyxena, the daughter of Priam and Hecuba, be sacrificed at his tomb. The sacrifice of Polyxena is one of the principal themes of Euripides' tragedy *Hecuba*, in which the dignity and virtue of Polyxena are a striking contrast to the violence of the young Greeks and their leaders. Thus

the aftermath of the war involved the sacrifice of a maiden before the Greek army just as it had been preceded by the sacrifice of Iphigenia. In a version especially popular in medieval legend, Polyxena had been loved by Achilles, and it was while he was meeting her that he was ambushed and killed by Paris.

ODYSSEUS AND AJAX COMPETE FOR THE ARMOR OF ACHILLES

Achilles' armor was claimed by both Odysseus and Ajax, son of Telamon, as the leading warriors surviving on the Greek side. Each made a speech before an assembly of the Greeks, presided over by Athena. Trojan prisoners gave evidence that Odysseus had done them more harm than Ajax, and the arms were awarded to Odysseus. The disgrace of losing sent Ajax mad; he slaughtered a flock of sheep (which he believed were his enemies) and on becoming sane again killed himself for shame by falling on his sword. From his blood sprang a flower (perhaps a type of hyacinth) with the initials of his name (AI-AI) on its petals.²⁶

This legend is the subject of Sophocles' tragedy *Ajax*, in which the hostility of Athena toward Ajax contrasts with Odysseus' appreciation of the human predicament. Athena asks Odysseus if he knows of a hero who was greater than Ajax, and his reply is a final commentary on the heroic tragedy of the *Iliad* (Sophocles, *Ajax* 121–133):

 ODYSSEUS: I do not know [of a greater hero]. I pity him in his misery, nevertheless, although he is my enemy. Because he is yoked to evil madness (*ate*) I look at this man's troubles no more than at my own. For I see that we who live are nothing more than ghosts and weightless shadows.

ATHENA: Therefore when you see such things, say nothing yourself against the gods and swear no boastful oath if your hand is heavy [with success] or with deep and enduring wealth. For time lays low and brings back again all human things. The gods love those who are moderate (*sophrones*) and hate those who are evil.

We can hardly find a better expression of the way in which the Greeks used mythology to express their deepest understanding of human life.

The Roman poet Ovid tells the story of Ajax and the armor of Achilles at length. Here is how he describes its end (*Metamorphoses* 13. 382–398):

 The Greek leaders were impressed [i.e., by the speech of Odysseus], and the power of eloquence was made clear in the consequences. The eloquent man took away the armor of the brave warrior. Ajax, who alone so many times had resisted Hector, who had opposed iron missiles and fire and the will of Jupiter, could not resist one thing, anger. Shame conquered the unconquered hero. He seized the sword and thrust the lethal blade into his breast, never before wounded. The ground reddened with his blood and put forth a purple flower from the green grass, the flower which earlier had sprung from the wound of Hyacinthus. The same letters were written on the petals for hero and youth, for the one signifying his name, for the other the mourning cry.

THE DEATHS OF PARIS AND PRIAM

After Achilles' death, Odysseus captured Helenus, who told the Greeks of a number of conditions that must be fulfilled before they could capture the city. Among these was the summoning of two absent heroes, Neoptolemus (Pyrrhus) and Philoctetes. As we have mentioned, Philoctetes was brought from Lemnos, cured of his snakebite, and with his indispensable bow and arrows shot Paris. Neoptolemus (his name means "new recruit"), the son of Achilles, proved himself to be a brutal warrior, and his butchering of Priam at the altar during the sack of Troy is one of the most moving scenes in the *Aeneid*. Vergil's description of Priam's remains echoes a familiar theme: the once mighty king now "lies, a great and mutilated body, head torn from the shoulders, a nameless corpse on the seashore" (2. 557–558).

THE WOODEN HORSE

The Greeks finally took the city by deception. One of them, Epeus, built an enormous hollow wooden horse, in which the leading warriors were concealed. The *Iliad* does not mention the Trojan horse, which is repeatedly mentioned in the *Odyssey*. In Book 8 the bard, Demodocus, sings a second song at the request of Odysseus, whose identity has not yet been revealed (*Odyssey* 8. 487–495):

 [Odysseus speaks:] "Demodocus, I honor you above all mortals. A Muse, daughter of Zeus, was your teacher, or Apollo, for well do you sing in proper order of the sorrows of the Greeks—their deeds and sufferings and labors—as if you yourself had been there or had heard them from another. Come now, and change your song: sing of the wooden horse, which Epeus made with the help of Athena. Odysseus brought it as a deception into the acropolis [of Troy], when he had filled it with men who sacked Troy."

Demodocus then tells the story of the horse, in which Odysseus has the most prominent role (*Odyssey* 8. 502–513):

 They [i.e., the Greek heroes] sat around glorious Odysseus in the center of Troy, concealed in the horse, for the Trojans themselves had dragged it up to the acropolis. Thus it stood there, and the Trojans sat and debated around it. They favored three plans: either to drive a sharp bronze [spear] through its hollow belly, or to drag it to the edge of the precipice and throw it down the rocks, or to let it be a great dedication to placate the gods. This was the course which they would choose, for it was fated that they would be destroyed once the city held the great wooden horse, where sat all the noblest of the Argives, bringing slaughter and fate to the Trojans. He sang, too, how the sons of Achaeans sacked the city when they poured out of the horse, leaving their hollow place of ambush.

"This was the bard's song," says Homer, and Odysseus wept when he heard it, even as a woman weeps whose husband has been killed in battle—the very suffering that Odysseus himself had inflicted on the Trojans. The song of

The Building of the Trojan Horse, by Giovanni Domenico Tiepolo (1727–1804). Oil on canvas, 1773; 15 × 26 in. This is part of a series of oil sketches on the fall of Troy by the younger Tiepolo (formerly ascribed to his more famous father). The massive horse dwarfs the workmen, while the walls of the doomed city brood in the background. The final painting, nearly six times the size of the sketch, hangs in the Wadsworth Atheneum in Hartford, Connecticut. (*National Gallery, London. Reproduced by courtesy of the Trustees.*)

Demodocus is the basis for Vergil's detailed account of the sack of Troy in the second book of the *Aeneid* (see later in this chapter). Odysseus himself tells the story of the horse to the ghost of Achilles in the Underworld, narrating how Achilles' son, Neoptolemus, alone had been fearless and eager to fight as he sat waiting in the horse, whereas the other Greek heroes had wept and their knees were weak with fear. Odysseus is shown in both of these accounts to be the leader of the Greeks in the horse.

The horse was left outside the city walls, while the other Greeks sailed off to the island of Tenedos, leaving behind one man, Sinon. The Trojans, thinking that their troubles were over, came out of the city and captured Sinon, who pretended to be the bitter enemy of Odysseus and the other Greeks. He told the Trojans that the horse was an offering to Athena, purposely made too big to pass through the city walls; if it were brought inside, the city would never be captured. Not all the Trojans believed him; Cassandra, the prophetic daughter of Priam, foretold the truth, and Laocoön, son of Antenor and priest of Apollo, hurled his spear into the horse's flank and said that it should be destroyed. Yet the Trojans ignored Cassandra and failed to hear the clash of armor as Laocoön's spear struck the horse. Their judgment appeared to be vindicated when two huge serpents swam over the sea from Tenedos as Laocoön was sacrificing to Apollo and throttled him and his two sons.

THE SACK OF TROY

The Trojans pulled down part of the city walls and dragged the horse in. Helen walked round it calling to the Greek leaders, imitating the voice of each one's wife, but they were restrained from answering by Odysseus.²⁷ So the horse achieved its purpose; that night, as the Trojans slept after celebrating the end of the war, Sinon opened the horse and released the Greeks. The other Greeks sailed back from Tenedos and entered the city; the Trojans were put to the sword and the city burned.

Antenor was spared, and of the other Trojan leaders only Aeneas escaped, along with his son, Ascanius, and his father, Anchises. Priam and the others were killed; Hector's infant son, Astyanax, was thrown from the walls, and his widow, Andromache, along with Hecuba and the other Trojan women, were made slaves of the Greek leaders. Neoptolemus' share of the spoil included Andromache, but eventually she married Helenus and founded the dynasty of the Molossian kings. In Book 3 of the *Aeneid*, she and Helenus figure prominently. She is the only one of the Trojan women to regain some sort of independent status after the fall of Troy.

During the sack of the city, Cassandra took refuge in the temple of Athena. She was dragged from this asylum by Ajax the Locrian, son of Oileus, and for this he was killed by the gods on his way home.²⁸ Cassandra became the slave and concubine of Agamemnon, who took her back to Mycenae, where she was

The Sack of Troy. Attic red-figure hydria by the Kleophrades painter, ca. 480 B.C.; height of vase 16½ in., height of painting 6½ in. In the upper picture Priam sits on the altar with the dead and mutilated Astyanax across his knees, as Neoptolemus rushes forward to kill him. Behind Neoptolemus a Trojan woman attacks with a clublike implement, and behind her, to the right, Aethra is rescued by her grandchildren, Akamas and Demophon (see p. 564 for her being taken to Troy with Helen). In the lower image, Ascanius, on the left, leads the way for Aeneas (helmeted), who carries Anchises on his back (Anchises looks back toward the central scene). In the center Ajax Oïleus brutally drags Cassandra from the statue of Athena, whose threatening stance foreshadows his fate. Between the statue and a palm tree Trojan women grieve for their coming fate. (Naples, Museo Nazionale.)

murdered with him by Clytemnestra. In Aeschylus' play *Agamemnon* she foresees her own death in a moving scene (see pp. 475–477); yet her audience, the Chorus in the play, does not believe her. The curse of Apollo remained with her to the end.

As Hecuba sailed back to Greece with Odysseus (to whom she had been given as part of the spoils), she landed in Thrace and there recognized the corpse of her son Polydorus when it was washed up on the seashore. He had been murdered by the local king Polymestor (to whom he had been sent for safety during the war) because of the treasure that had been sent with him. Taking advantage of Polymestor's avarice, Hecuba enticed him and his children into her tent, pretending that she knew the whereabouts in Troy of some hidden treasure, while she appeared to know nothing of the murder of Polydorus. Once they were in the tent, Hecuba's women murdered the children before Polymestor's eyes, then blinded him with their brooches. After this, Hecuba was turned into a bitch; when she died, the place of her burial (in Thrace) was called Cynossema, which means the "dog's tomb."

THE *TROJAN WOMEN* OF EURIPIDES

In Euripides' tragedy the *Trojan Women*, the results of the fall are seen through the eyes of Hecuba, Cassandra, and Andromache. The death of Astyanax is a central part of the tragedy, in which he is torn from his mother's embrace to be hurled from the walls. Later his body is brought back on stage and placed by Hecuba on the shield of Hector, a symbol of the defenselessness of Troy once her champion had been killed. The chorus of Trojan captives recalls the entry of the wooden horse (*Trojan Women* 515–540):

 Now I shall sing of Troy, how I was destroyed by the four-wheeled contrivance of the Greeks and made their prisoner, when they left the horse at the gates, echoing to the skies with the clash of armor and caparisoned with gold. And the Trojan people shouted as it stood on the rock of Troy: "Come, the labor of war is over! Bring in this wooden horse as a holy offering to the daughter of Zeus, guardian of Troy!" Who of the young women did not go, who of the old men stayed at home? Charmed by music, they took hold of the treacherous means of their destruction. All the Phrygian people gathered at the gates, and with ropes of flax they dragged it, like the dark hull of a ship, to the stone temple's floor, bringing death to their city—the temple of the goddess Pallas.

THE SACK OF TROY IN THE *AENEID*

The principal source for the fall of Troy is the second book of the *Aeneid*. Here is how Vergil describes the horror of the end of a city deserted by its divine protectors in Aeneas' vision at the climactic moment of the sack, as his mother Venus allows him a moment of divine insight (*Aeneid* 2. 602–603, 610–625):²⁹

Study for "Aeneas' Flight from Troy," by Federico Barocci (ca. 1535–1612). Pen and brown ink, brown wash, opaque watercolor, over black chalk on paper; ca. 1587–1588; 11 × 16³/₄ in. The tightly structured group of Aeneas, Anchises, and Ascanius are separated from Creusa. In the background are the burning buildings of Troy (the circular temple, like a Roman church of Barocci's time, is prominent) and confused forms of Trojans and Greeks are sketched on the right. To the left a dog adds a poignant touch to the departure. With great economy the artist faithfully represents Vergil's narrative. (*Italian*. © The Cleveland Museum of Art, L. E. Holden Fund, 60.26.)

[Aeneas recalls the words of Venus:] "It is the pitiless gods, the gods who are destroying the wealth of Troy and laying the city low from top to bottom. Look—for I will remove the cloud that now dulls your mortal sight. Here, where you see the shattered towers and huge stones torn up, where dust and smoke are billowing, Neptune is convulsing the walls, shaking the foundations with his trident as he uproots the city. Here Juno, most cruel, leads the others in seizing the Scaean gates: raging and clad in iron armor she calls the Greeks from the ships. Look over here—even now Tritonian Pallas has taken up her place upon the height of Troy's citadel: see how she is lit with the lurid storm-cloud and the ferocious Gorgon! The Father of the gods himself renews the courage and violence of the Greeks, himself he urges them on to fight."

I saw the fatal vision and the mighty power of the gods hostile to Troy. Then, indeed, I saw all Ilium collapse into the flames and Troy, built by Neptune, overturned from its foundations.

Aeneas Carrying Anchises. Attic red-figure krater, ca. 460 B.C.; height 17³/₄ in. The economy of the painting contrasts with Barocci's equally dramatic sketch. Ascanius is shown as an adult warrior, looking back at Aeneas, while Anchises looks back toward Creusa (on the left) and the Greek warriors. (Boston, Museum of Fine Arts.)

Yet Aeneas escaped, taking with him his father, Anchises (who carried the images of the city's gods in his hands), and his son, Ascanius (also called Iulus). His wife, Creusa, started with him and was lost to Aeneas' sight. Only her ghost appeared to him, foretelling his destiny and encouraging him to travel to a new world. The scene of Aeneas leaving Troy is heavy with symbolism, and it is with hope for the future that Aeneas, burdened with the past, leaves the doomed city (*Aeneid* 2. 707–711, 721–725):

☛ "Then come, dear father, sit on my shoulders; I will carry you, the load will not weigh me down. Whatever chance may fall, we will share a common danger and a common salvation. Let little Iulus walk beside me and let my wife follow.

... " With these words I spread my cloak and the skin of a tawny lion across my shoulders and neck and lifted the burden. Little Iulus took my right hand and, hardly able to keep up, walked beside his father.

NOTES

1. Pindar, *Nemean Ode* 10. In Theocritus, *Idyll* 22, the quarrel begins when the Dioscuri carry off the daughters of Leucippus from their intended husbands, Idas and Lynceus. The "Rape of the Leucippides" was a common subject in ancient art. Another version has one of the divine twins in heaven and the other in Hades on alternate days.
2. Euripides brings them on dramatically at the end of his *Electra*, not only as the protectors of sailors but also as champions of a better morality than that represented by Apollo (see p. 434).
3. Their appearance as horsemen on white steeds at the battle of Lake Regillus in 496 led to a great Roman victory.
4. Aphrodite is said (also by Stesichorus) to have made Helen unfaithful as punishment for Helen's father, Tyndareus, who had once omitted to sacrifice to the goddess. For Helen in Egypt, see Herodotus 2.112–120 and Euripides, *Helen*.
5. Hecuba's stepson, Aesacus.
6. For the historical facts about Troy and the Trojan War, see pp. 43–46.
7. Laomedon was a nephew of Ganymede, whom Zeus had snatched up to Olympus to become the cupbearer of the gods (pp. 116–117). In compensation, Zeus gave Tros (father of Ganymede) the divine horses that Laomedon inherited and failed to give to Heracles.
8. The story of Troilus' love for Cressida (daughter, in this version, of Calchas) is an invention of the Middle Ages; Boccaccio and Chaucer took the story from the *Roman de Troie* of Benoît de Ste. Maure. Shakespeare's play is a further variation.
9. Although the contingents supplied by Odysseus, king of Ithaca, and Ajax, prince of Salamis, were among the smallest (only twelve ships each), their personal prowess gave them preeminence.
10. The comparative importance of the Greek leaders may be gauged from the size of their contingents in the *Catalogue* in Book 2 of the *Iliad*: Agamemnon, one hundred ships; Nestor, ninety; Diomedes and Idomeneus, eighty each; Menelaüs, sixty; Achilles, sixty; Ajax the Less, forty; Ajax, son of Telamon, and Odysseus, twelve each.
11. Palamedes, son of Nauplius, was, after Odysseus, the cleverest of the Greeks; he was credited with a number of inventions. His unmasking of the "madness" earned him the hostility of Odysseus, who eventually contrived his death.
12. For the role of this secret in the story of Prometheus, see pp. 90 and 147; for Thetis' supplication to Zeus on behalf of Achilles, see pp. 119–120.

13. Similar magic was practiced by Demeter at Eleusis on the child Demophoön.
14. Nowhere does Homer mention a physical relationship between Achilles and Patroclus. In Plato's *Symposium*, Pausanias, probably not speaking in purely spiritual terms, identifies Patroclus as older and less beautiful than Achilles and his lover, contradicting Aeschylus, who (in a play no longer extant) made Achilles the lover rather than the beloved of Patroclus.
15. The figure is given in the *Catalogue* in Book 2 of the *Iliad*. Ancient as this document is and historically of the greatest importance, its numbers are inflated.
16. The most common version of his offense is that he had killed a stag sacred to the goddess. Some say that Artemis caused no winds to blow at all.
17. This version underlies Euripides' tragedy *Iphigenia in Tauris* (see p. 415).
18. After the Trojan War, Calchas challenged the seer Mopsus to a contest by asking him how many unripe figs there were on a nearby tree. When Mopsus gave the correct answer, Calchas died, for he was fated to do so if he met a cleverer prophet than himself.
19. Some versions have Calchas make the prophecy and Neoptolemus accompany Odysseus to Lemnos. Sophocles and Aeschylus both wrote tragedies on Philoctetes; that of Sophocles is extant.
20. Pope's translation of this passage is given on pp. 687–688.
21. Today Helen is often defended as the guiltless victim; for example, see Mihiko Suzuki, *Metamorphoses of Helen* (Ithaca: Cornell University Press, 1989). Helen is studied in the depictions by Homer, Vergil, Spenser (*The Faerie Queene*), and Shakespeare (*Troilus and Cressida*), using theories of sacrifice and scapegoating and the conflict between patriarchal attitudes and victimized women.
22. Jonathan Shay, *Achilles in Vietnam* (New York: Atheneum, 1994).
23. Of great interest is *Penthesilea*, by the renowned German playwright Heinrich von Kleist, translated into English by Joel Agee, with pictures by Maurice Sendak (New York: HarperCollins, 1998).
24. This is the same Thersites who spoke out of turn in the assembly of the Greeks in Book 2 of the *Iliad*.
25. In another version Thetis takes the corpse of Achilles to the island of Leuce (in the Black Sea), where she restored it to life. In Book 11 of the *Odyssey* the ghost of Achilles talks with Odysseus and complains bitterly of his fate in the Underworld.
26. Ajax is the Latin form of the Greek Aias. For the metamorphosis of Hyacinthus, see p. 240.
27. Menelaüs narrates this episode in Book 4 of the *Odyssey* to Odysseus' son, Telemachus.
28. His sacrilege had a strange historical consequence; for a thousand years the Locrians annually sent two daughters of noble families to serve as temple servants of Athena at Troy (i.e., the later foundations after the fall of Priam's city) as a penance for Ajax's crime. If any of these girls was caught by the Trojans before she reached the temple, she was put to death. This penance was ended not long before A.D. 100. There is a connection between the name Oileus and the Greek name for Troy, Ilium.
29. The gods are here called by their Latin names.

THE RETURNS AND THE *ODYSSEY*

The returns of the Greek leaders from Troy were narrated in an epic called *Nostoi* (Returns), of which only a brief prose summary and three lines of verse are extant.¹ It omits the return of Odysseus, which is the subject of Homer's *Odyssey*.

AGAMEMNON, MENELAÛS, AND NESTOR

Agamemnon and Menelaüs quarreled over the departure and so parted company. Agamemnon sailed for Greece with part of the fleet, including the contingent of the Locrians. Near the island of Mykonos, Athena, in her anger at the sacrilege committed at Troy by the Locrian leader Ajax (pp. 475–476), caused a storm to wreck many of the ships. Ajax swam to a nearby rock, where he boasted that not even the gods could prevent his escape from the dangers of the sea. For this Poseidon struck the rock with his trident, and Ajax was hurled into the sea and drowned.

During a second storm, which struck Agamemnon's fleet at Cape Caphareus in Euboea, Nauplius avenged the death of his son Palamedes by luring many ships onto the rocks with a false beacon. Agamemnon finally reached Mycenae, only to be murdered by Aegisthus and Clytemnestra.

Meanwhile Menelaüs, Nestor, and Diomedes set sail together from Troy. Nestor returned to Pylos safely. In the *Odyssey* he tells Telemachus how Menelaüs lost all his fleet except for five ships in a storm off Crete and eventually reached Egypt. On the advice of the sea-nymph Eidothea, he forced her father, Proteus, to tell him how to appease the gods and secure a safe voyage home. Thus after seven years he and Helen returned to Sparta, where they resumed their rule.² At the end of his life he was transported to the Elysian Fields, avoiding the usual fate of going to Hades, because he was the husband of Helen and the son-in-law of Zeus.

DIOMEDES

Diomedes reached Argos quickly, but there he found that his wife, Aegialia (daughter of Adrastus) had been unfaithful. Her adulteries were caused by Aphrodite, angry because Diomedes had wounded her at Troy. Diomedes left Argos and came to Italy, where the Apulian king, Daunus, gave him land.

Diomedes founded several cities in Italy, but he declined to help King Latinus against Aeneas. After his death he was worshiped as a hero in many places in Italy, and in one story Athena made him an immortal god.³ His followers were turned into birds.⁴

IDOMENEUS

Idomeneus returned to Crete to find that his wife, Meda, had committed adultery with Leucus, who had then murdered her and her daughter and made himself king over ten of the cities of Crete. Idomeneus was driven out by Leucus and came to Calabria in southern Italy, where he was worshiped as a hero after his death.⁵

Servius, the ancient commentator on Vergil, tells a legend which is similar to the biblical story of Jephthah's vow (Judges 11:30–11:40). Idomeneus was caught in a storm during the voyage home and vowed, if he were saved, to sacrifice to Poseidon the first living thing that met him. When he returned home, his son came out first to meet him. After Idomeneus had fulfilled his vow, a pestilence attacked the Cretans, who took it to be a divine punishment for Idomeneus' act and drove him into exile.

PHILOCTETES

Philoctetes returned to Thessaly but was driven out by his people. He came to southern Italy and there he founded a number of cities and after his death was worshiped as a hero.

The stories of Diomedes, Idomeneus, and Philoctetes seem to reflect the founding of Greek colonies in southern Italy from the eighth century onwards. All three were worshiped as heroes after their death.

NEOPTOLEMUS

Achilles' son, Neoptolemus, warned by Thetis not to return by sea, took the land route back to Greece, accompanied by Helenus and Andromache. With them and his wife, Hermione (daughter of Menelaüs), he left his home in Phthia and came to Molossia in Epirus, where he ruled over the Molossi. He was killed at Delphi and there became a hero with his own cult.

ODYSSEUS

The return of Odysseus forms a saga in itself, to which many folktale elements have accrued. Here is the summary of the *Odyssey* given by Aristotle in his *Poetics* (17):

 The story of the *Odyssey* is not long; a man is away from home for many years; Poseidon constantly is on the watch to destroy him, and he is alone; at home his

property is being wasted by suitors, and his son is the intended victim of a plot. He reaches home, tempest-tossed; he makes himself known, attacks his enemies and destroys them, and is himself saved. This is the heart of the matter: the rest is episodes.

The adventures of Odysseus have been taken as symbolic (e.g., Odysseus conquers death in his visit to the Underworld) or as connected with real places that had become known to the Greeks as their trade and colonization expanded. For the most part, however, they are romantic legends and folktales set in imaginary places and grafted onto the saga of a historical prince's return from a long absence.⁶

During the Trojan War, Odysseus was the wisest of the Greek heroes and a brave warrior. After Achilles' death, Odysseus inherited his divine armor. In the *Odyssey* he experiences many adventures, usually escaping from danger through his intelligence and courage. He meets with many men, women, goddesses, and monsters, and he remains faithful to Penelope, the wife whom he left in Ithaca with his son, Telemachus.⁷ Homer, with his customary perception and art, frames just the right introduction to establish our good faith in Odysseus. In Book 5, we first meet our hero, who has been marooned for seven years on the island of Ogygia, captive of the beautiful and divine nymph, Calypso. She comes down to the shore to find her unhappy victim Odysseus, gazing across the sea, pining for home—an indelible tableau of enduring and overriding devotion (151–158):

 Calypso found Odysseus sitting on the shore. His eyes were always wet with tears. His sweet life was ebbing away, while he bemoaned the impossibility of his homecoming, since the nymph no longer gave him any pleasure. The nights he was forced to spend lying with her in her grotto; certainly he did not want to, but she did. The days he spent amidst the rocks on the shore, his heart racked by tears and groans and misery, as he looked out across the barren sea, weeping.

STORY OF THE *ODYSSEY*

At the time the poem begins Odysseus is in the middle of his adventures. Books 1–4 relate the situation in Ithaca, where in Odysseus' absence Penelope is besieged by suitors who want her hand in marriage and with it her kingdom. As we have just seen we first meet Odysseus in Book 5, detained on Ogygia, the island of the divine nymph Calypso. After he has sailed away from this island and his raft has been wrecked, Odysseus relates to his rescuers the events previous to his arrival on Ogygia. The poem then continues with the arrival of Odysseus on Ithaca, his revenge on the suitors for the hand of Penelope, and his eventual recognition by and reunion with Penelope.

The resourceful character of Odysseus dominates the story, but the gods also play a significant part, especially Poseidon, who is hostile to the hero, and Athena, who protects him. Homer introduces Odysseus in the opening lines (1–21) of the *Odyssey*:

Hermes Ordering Calypso to Release Odysseus, by Gerard de Lairesse (1641–1711). Oil on canvas, 1670; 36 × 45 in. Odysseus, loosely garbed in a scarlet robe, and Calypso embrace on a voluptuous bed. Above, Zeus addresses the council of the gods (Apollo is behind him), from which Hermes descends to bring the commands of Zeus. To the left a child plays with the armor of Odysseus, and to the right in the background servants prepare a feast in a columned banquet hall. At the right is a clothed statue of a woman holding a basket in which is a bird, perhaps Aphrodite and her dove. De Lairesse has changed Calypso's cave into a luxurious palace, and there is no hint of the longing of Odysseus for Ithaca and Penelope in his splendid reinterpretation of Homer's text. (Dutch. © The Cleveland Museum of Art, Mr. and Mrs. William H. Marlatt Fund, 92.2.)

☛ Of the man tell me, O Muse, the man of many ways,⁸ who traveled afar after he had sacked the holy city of Troy. He experienced the cities and the thoughts of many men, and his spirit suffered many sorrows on the sea, as he labored for his own life and for the homecoming of his companions. Yet even so he could not protect his companions, much though he wished it, for they perished by their own folly, when thoughtlessly they had eaten the cattle of Helios, Hyperion the sun-god. And the god took away the day of their homecoming. From

Calypso and Ulysses, by Emily Marshall. Watercolor on paper, 1820–1835; 19 × 24 in. Calypso, in the dress of a woman of the early nineteenth century, tries to comfort Odysseus as he looks over the ocean and thinks of Penelope. Her left hand rests on his shoulder and behind is a river landscape with a palm tree to give a suitably exotic air. Nothing is known of the artist, whose deceptively naïve style has caught the pathos of the situation in which the goddess and the hero find themselves. (Abby Aldrich Rockefeller Folk Art Collection, Williamsburg, Virginia. Reproduced by permission.)

some point in these things, O goddess, daughter of Zeus, begin to tell me also the tale.

Then all the others, who had escaped sheer destruction, were at home, safe from the sea and the war. But this man alone, longing for his homecoming and his wife, did the nymph, the lady Calypso, keep in her hollow cave, desiring him as her husband. But when, as the years rolled round, that year came in which the gods had destined his return home to Ithaca, not even then did he escape from his labors nor was he with his friends. Yet the gods pitied him, all except Poseidon, and he unrelentingly was hostile to godlike Odysseus, until he returned to his own land.

THE CICONES AND THE LOTUS EATERS

It took Odysseus ten years to reach home. When he and his contingent left Troy, they came to the Thracian city of Ismarus, home of the Cicones, which they sacked before being driven off. They had spared Maron, priest of Apollo, in their attack, and he in return gave them twelve jars of fragrant red wine, which was to prove its value later. They were driven southward by a storm to the land of the lotus eaters. Here their reception was friendly but no less dangerous, for whoever ate of the fruit of the lotus forgot everything and wanted only to stay where he was, eating lotus fruit. Odysseus got his men away, even those who had tasted the fruit, and sailed to the land of the Cyclopes.

THE CYCLOPES

The Cyclopes were one-eyed giants, herdsman, living each in his own cave. One of them was Polyphemus, son of Poseidon, whose cave Odysseus and twelve picked companions entered. In the cave were sheep and lambs, cheeses, and other provisions, to which they helped themselves while waiting for the return of the cave's owner. When Polyphemus returned with his flocks, he shut the entrance of the cave with a huge stone, and then caught sight of the visitors, two of whom he ate for his supper. He breakfasted on two more the next day and another two when he returned the second evening.

Now Odysseus had with him some of the wine of Maron, and with this he made Polyphemus drunk; he told him his name was Nobody (*Outis*), and the giant, in return for the excellent wine, promised that he would reward Nobody by eating him last. He then fell asleep. Odysseus sharpened a wooden stake and heated it in the fire; then he and his surviving men drove it into the solitary eye of the sleeping giant. As he cried out in agony the other Cyclopes came running to the cave's entrance, only to hear the cry "Nobody is killing me," so that they assumed that not much was wrong and left Polyphemus alone.

Next morning Polyphemus, now blind, removed the stone at the entrance and let his flocks out, feeling each animal as it passed. But Odysseus had tied his men each to the undersides of three sheep, and himself clung to the belly of the biggest ram; so he and his men escaped. As Odysseus sailed away, he shouted his real name to the Cyclops, who hurled the top of a mountain at him and nearly wrecked the ship. Polyphemus had long before been warned of Odysseus, and as he recognized the name he prayed to his father Poseidon (*Odyssey* 9. 530–535):

 Grant that Odysseus may not return home, but if it is fated for him once more to see those he loves and reach his home and country, then let him arrive after many years, in distress, without his companions, upon another's ship, and may he find trouble in his house.

The prayer was heard.

The Blinding of Polyphemus. Proto-Attic vase from Eleusis, mid-seventh century B.C.; height of vase 56 in., of neck 15 in. Odysseus (painted in white) and his companions drive a long pole into the eye of the Cyclops, who holds the cup of wine that has made him drunk. This brutal scene is one of the earliest "free" vase-paintings after the Geometric period. (Eleusis, Museum. Photograph courtesy of Hirmer Verlag, München.)

AEOLUS AND THE LAESTRYGONIANS

Odysseus, reunited with the rest of his fleet, next reached the floating island of Aeolus, keeper of the winds, who lived with his six sons, who were married to his six daughters. After he had entertained Odysseus, Aeolus gave him as a parting gift a leather bag containing all the winds and showed him which one to release so as to reach home. Thus he sailed back to Ithaca and was within reach of land when he fell asleep. His men, believing that the bag contained gold that

Odysseus was keeping for himself, opened it, and all the winds rushed out and blew the ships back to Aeolus' island. Aeolus refused to help them any more, reasoning that they must be hated by the gods. Odysseus and his men sailed on to the land of the Laestrygonians. They sank all Odysseus' ships except his own and ate up the crews. So Polyphemus' curse was already working, and Odysseus sailed away with his solitary ship.

CIRCE

He reached the island of Aeaëa, the home of the witch Circe, daughter of the Sun. Odysseus divided his men into two groups; he stayed behind with the one while the other, twenty-three men in all, went to visit the ruler of the island.

Circe and Her Lovers in a Landscape, by Dosso Dossi (ca. 1479–1542). Oil on canvas, ca. 1525; $39\frac{1}{2} \times 53\frac{1}{2}$ in. Dossi was court painter to the dukes of Ferrara, where Ariosto composed his poem *Orlando Furioso*, whose Alcina is probably the origin of Dossi's Circe. She points to an inscribed tablet, and on the ground lies an open book of magic, whereas Homer's Circe used a wand and drugs to transform her victims. The exquisite landscape is populated by peaceful animals and birds, far different from Homer's wolves and lions and the swine into which she turned Odysseus' men. (Samuel H. Kress Collection, © 1998 Board of Trustees, National Gallery of Art, Washington, D.C.)

They found Circe with various animals around her, and they themselves (except for Eurylochus, who brought the news back to Odysseus) became pigs when they ate her food, swine in appearance and sound, but still having human minds.⁹ As Odysseus went to rescue his men, he encountered the god Hermes, who told him how to counter Circe's charms and gave him as an antidote the magic herb *moly*, whose "root is black and flower as white as milk." So he ate Circe's food unharmed and threatened her with his sword when she tried to turn him into a pig. She recognized him and instead made love to him. She then set a feast before him, which he would not touch before he had made her change his men back into their human shape. Odysseus lived with Circe for a year and by her begot a son, Telegonus. At the end of a year Odysseus, urged on by his men, asked Circe to send him on his way home. She agreed, but told him that he first had to go to the Underworld and there learn the way home from the prophet Tiresias.

THE NEKUIA

Book 11 of the *Odyssey*, which tells of Odysseus' experiences in the Underworld, is generally referred to as the Book of the Dead or the *Nekuia*, the name of the rite by which ghosts were summoned and questioned. Odysseus' visit to the Underworld is a conquest of death, the most formidable struggle a hero has to face. The hero who can return from the house of Hades alive has achieved all that a mortal can achieve. The *Nekuia* of Odysseus is different in one important respect from its most famous imitation: in the *Aeneid*, Aeneas actually descends to the Underworld and himself passes through it (see pp. 339–348), whereas Odysseus goes to the entrance and there performs the ritual sacrifice that summons up the spirits of the dead. Passages that tell of Odysseus' journey from Aea to the Underworld, his performance of the rite, and his conversations with a number of the ghosts are translated at length at the beginning of Chapter 15; here we provide a summary of his visit.

Following Circe's directions, Odysseus sailed with his men to the western limit of the world. As he performed the ritual sacrifice at the entrance to the world of the dead, many ghosts came, among them Tiresias, who foretold the disasters that yet awaited Odysseus on his journey. He would reach home, but alone and after many years. At Ithaca he would find the arrogant suitors pressing Penelope hard and wasting his substance. But he would kill them all, and he would have still more travels ahead of him before death came.

From Tiresias, Odysseus also learned that the spirits with whom he wished to speak must be allowed to drink the blood of the sacrificial victim; the others he kept away by threatening them with his sword. Among the ghosts who appeared and spoke were those of Odysseus' mother, Anticlea, and of Agamemnon, Achilles, and Ajax, son of Telamon. Achilles said that "he would rather be

a slave to a poor man on earth than be king over all the souls of the dead." Ajax would not answer Odysseus a word, for he still was grieved by his loss in the contest for Achilles' arms.

Eventually Odysseus left the house of Hades for fear that the Gorgon's head (which turns all whom it beholds to stone) might appear. He rejoined his men and sailed back to Aeaea.

THE SIRENS, THE PLANCTAE, CHARYBDIS, AND SCYLLA

Circe sent him on his way after warning him of the dangers that lay ahead. First were the Sirens (said by Homer to be two in number, but by other authors to be more). To Homer they were human in form, but in popular tradition they were birdlike, with women's heads. From their island meadow they would lure passing sailors onto the rocks; all around them were the whitened bones of their victims. Odysseus sailed by them unharmed, stopping his men's ears with wax.

Odysseus and the Sirens. Athenian red-figure stamnos, ca. 450 B.C.; height 13³/₄ in. Odysseus, lashed to the mast, safely hears the song of the Sirens as his men row by, their ears plugged with wax. Two Sirens (winged creatures with human heads) stand on cliffs, while a third plunges headlong into the sea. The artist, by the dramatic angle of Odysseus' head, expresses the hero's longing to be free of his bonds, and the turned head of the oarsman on the right and the helmsman's gesture add further tension to the scene. (*British Museum, London. Reproduced by courtesy of the Trustees.*)

while he had himself bound to the ship's mast so that he could not yield to the irresistible beauty of the Sirens' song.

The next danger was the two wandering rocks (Planctae) between which one ship only, the *Argo*, had ever safely passed. Odysseus avoided them by sailing close to two high cliffs; in the lower of these lived Charybdis (she is not described by Homer), who three times a day sucked in the water of the strait and spouted it upward again. To sail near that cliff was certain destruction, and Odysseus chose as the lesser evil the higher cliff where was the cave of Scylla, daughter of the sea deity Phorcys. Originally a sea-nymph, she had been changed through the jealousy of Poseidon's wife Amphitrite into a monster with a girdle of six dogs' heads and with twelve feet, by means of which she would snatch sailors from passing ships. From Odysseus' ship she snatched six men, whom she ate in her cave. Odysseus and the rest of the crew were unharmed.

THE CATTLE OF THE SUN

Last, Circe told Odysseus of the island of Thrinacia, where Helius (the Sun) pastured his herds of cattle and sheep; she strictly warned Odysseus not to touch a single one of the animals if he and his men wished ever to return to Ithaca. But Odysseus' men could not show such restraint after weeks of being detained by adverse winds, and while he was sleeping they killed some of the cattle for food. Helius complained to Zeus, and as a punishment for the sacrilege of killing the god's cattle Zeus raised a storm when the ship set sail and hurled a thunderbolt at it. The ship sank, and all the men were drowned except for Odysseus, who escaped, floating on the mast and part of the keel.

After the wreck, Odysseus drifted back to Charybdis, where he avoided death by clinging to a tree growing on the cliff until the whirlpool propelled his mast to the surface after sucking it down.

CALYPSO

Odysseus drifted over the sea to Ogygia, the island home of Calypso, daughter of Atlas, with whom he lived for seven years. Although she loved him and offered to make him immortal, he could not forget Penelope. Finally, after Hermes brought her the express orders of Zeus, Calypso helped Odysseus build a raft and sail away.

THE PHAEACIANS

Even now Odysseus was not free from disaster; Poseidon saw him as he approached Scheria (the island of the Phaeacians) and shattered the raft with a storm. After two days and two nights, helped by the sea-goddess Leucothea (formerly the mortal Ino, daughter of Cadmus) and by Athena, he reached land, naked, exhausted, and alone.

The king of the Phaeacians was Alcinoüs, and his daughter was Nausicaä. The day after Odysseus' landing Nausicaä went to wash clothes near the seashore and came face-to-face with Odysseus. She gave him her protection and brought him back to the palace. Here he was warmly entertained by Alcinoüs and his queen, Arete, and related the story of his adventures to them. The Phaeacians gave him rich gifts, and a day later they brought him back to Ithaca on one of their ships, in a deep sleep. So Odysseus reached Ithaca ten years after the fall of Troy, alone and on another's ship, as Polyphemus had prayed. Yet even now Poseidon did not relax his hostility; as the Phaeacians' ship was entering the harbor of Scheria on its return, he turned the ship and its crew to stone as a punishment upon the Phaeacians for conveying strangers over the seas, especially those who were the objects of Poseidon's hatred.

ITHACA

In Ithaca more than one hundred suitors (young noblemen from Ithaca and the nearby islands) were courting Penelope in the hope of taking Odysseus' place as her husband and as king of Ithaca (for Telemachus, Odysseus' son by Penelope, was considered still too young to succeed). They spent their days feasting at Odysseus' palace, wasting his possessions. Penelope, however, remained faithful to Odysseus, even though he seemed to be dead. She put the suitors off by promising to choose one of them when she should have finished weaving a magnificent cloak to be a burial garment for Odysseus' father, Laertes. For three years she wove the robe by day and undid her work by night, but in the fourth year her deception was uncovered, and a decision was now unavoidable.

At this stage Odysseus returned. Helped by Athena, he gained entrance at the palace disguised as a beggar, after being recognized by his faithful old swineherd, Eumaeus, and by Telemachus. Telemachus had been on a journey to Pylos and Sparta and had learned from Nestor and Menelaüs that his father was still alive. Outside the palace, Odysseus' old hound, Argus, recognized his master after nineteen years' absence, and died.

At the palace Odysseus was insulted by the suitors and by another beggar, Irus, whom he knocked out in a fight. Still in disguise, he gave to Penelope an exact description of Odysseus and of a curious brooch he had worn. As a result, she confided in him her plan to give herself next day to the suitor who succeeded in stringing Odysseus' great bow and shooting an arrow straight through a row of twelve axe heads. Also at this time Odysseus was recognized by his old nurse, Euryclea, who knew him from a scar on his thigh, which he had received when hunting a boar with his grandfather, Autolycus. Thus the scene was set for Odysseus' triumphant return; his son and his faithful retainers knew the truth, and Penelope had fresh encouragement to prepare her for the eventual recognition.

The Return of Odysseus, by Pintoricchio (Bernardo Betti, 1454–1513). Fresco transferred to canvas, 1509, 60 in. × 50 in. To the left sits Penelope at her loom, with Euryclea beside her; above her head are the bow and quiver of Odysseus. Telemachus runs to greet his mother, and behind him are a young suitor (note the falcon on his wrist), the seer Theoclymenus, and Eumaeus. Odysseus, disguised as a beggar, is coming through the door on the right. In the background is the ship of the Phaeacians; to its left is Odysseus' boat being shattered by Poseidon, and, in the wooded landscape beyond, Odysseus meets Circe, while his men root around as pigs. This fresco was originally painted for a wall in a room of the Ducal Palace in Siena. (London: National Gallery. Reproduced by courtesy of the Trustees.)

THE BOW AND THE KILLING OF THE SUITORS

The trial of the bow took place next day. When none of the suitors could even so much as string it, Odysseus asked to be allowed to try. Effortlessly he achieved the task and shot the arrow through the axes. Next he shot the leading suitor, Antinoüs, and in the ensuing fight he and Telemachus and their two faithful servants killed all the other suitors. The scene where Odysseus strings the bow and reveals himself to the suitors is one of the most dramatic in all epic poetry (*Odyssey* 21. 404–423; 22. 1–8):

♣ But crafty Odysseus straightway took the great bow in his hands and looked at it on all sides, just as a man who is skilled at the lyre and at song easily stretches a string round a new peg, fitting the well-turned sheep's gut around the peg—

even so without effort did he string the great bow, did Odysseus. He took it in his right hand and made trial of the string, and it sang sweetly under his hand, in sound like a swallow. Then great sorrow seized the suitors, and in all of them their skin changed color. Zeus, giving a sign, thundered loudly. Then godlike, patient Odysseus rejoiced that the wily son of Cronus had sent him a sign. Then he chose a swift arrow, one that lay on the table beside him uncovered, while the others lay in the hollow quiver—and these the Achaeans would soon feel. This arrow, then, he took, and he drew back the string and the notched arrow, sitting where he was on his stool. And he shot the arrow aiming straight ahead, and of the hafted axes he missed none from the first to the last, and the arrow weighted with bronze sped straight through to the end. . . .

Then wily Odysseus stripped off his rags, and he leaped to the great threshold holding the bow and the quiver full of arrows, and he poured out the arrows in front of his feet. Then he spoke to the suitors: "This my labor inexorable has been completed. Now I shall aim at another target which no man has yet struck, if I can hit it and Apollo grants my prayer." He spoke and shot a death-dealing arrow straight at Antinoüs.

The suitors all were killed, and only the herald, Medon, and the bard, Phemius, were spared. Odysseus called Euryclea to identify the twelve servant-women who had insulted him and had been the lovers of the suitors. They were forced to cleanse the hall, and then they were mercilessly hanged, while the disloyal goatherd, Melanthius, was mutilated and killed. The consequences of the battle in the hall were grisly, a reminder that Odysseus was a warrior who had taken part in the sack of Troy and was merciless to his enemies.

TELEMACHUS

The portrait in the *Odyssey* of Telemachus, the son of Odysseus and Penelope, is a masterful depiction of the hero as a young man. His introduction in Book 1 establishes his character with sure and subtle brevity. Athena has come down from Olympus to inspire courage and action in Telemachus, still a boy at heart. We first meet him in the palace, helplessly witnessing the abusive arrogance of the suitors. He sits sad and despondent, daydreaming that his father had already returned and driven out the suitors and saved them from his insolence and disrespect. Amidst their drunken revels, he is the only one to notice Athena disguised as Mentès waiting at the threshold. He alone is gentleman enough to rise and greet her with a courtesy demanded by the sacred bond of guest-friendship. In a few lines, we know that Telemachus is a worthy son of his heroic father and we are prepared for his gratifying development. By the end of Book 1 he will have stood up to his mother, who is surprised by his manly effort to break loose from her overprotective apron strings. He will go on to have an odyssey of his own (appropriately a mini-odyssey, to be sure, in Books 3 and 4) to Pylos and Sparta to find out news of Odysseus from Nestor and Menelaüs and Helen. When Odysseus does return, it is Telemachus who can almost, but

Penelope at Her Loom and The Washing of Odysseus' Feet. Attic red-figure cup, ca. 440 B.C.; height 8 in., diameter 62 in. On the first side Penelope sits sadly at her room, while Telemachus talks with her. On the second side (see the opposite page) Euryclea (named Antiphata on the vase) looks up at Odysseus with her mouth open, as she recognizes him from the scar. To the right stands Eumaeus, evidently offering a gift to Odysseus, who wears the traveler's cap and carries the beggar's basket and stick. (Chiusi: Museo Civico.)

not quite yet, string his father's bow, although he would have done so if his father had allowed him a fourth try. At the climax of the poem, it is father and son, side by side, who wreak the just slaughter of the sinful suitors.

PENELOPE

We have said earlier that Odysseus "remained faithful to Penelope," and the reunion with his wife is the goal of the epic. Penelope is not a passive figure: she is the equal of Odysseus in intelligence and loyalty, and she is resourceful in fending off the suitors and, equally significant, in choosing her time and method for the recognition of Odysseus. When she finally does recognize him the poet describes her "as fitting his heart" (*thymares*), that is, she is a perfect match for

the man who is the “man of many twists and turns” (*polytropos*, an epithet given him in the first line of the poem), the cleverest of the Greeks.

Penelope’s usual epithet is *periphron* (“circumspect”); that is, she is wary and resourceful, able to keep the suitors at bay by her intelligence. In her first meeting with Odysseus (in Book 19) she says “I spin out my stratagems,” and she tells him of the weaving and unravelling of the burial-garment for Laertes. She used her sexual power to weaken the suitors. When she appears before them she is repeatedly likened to Aphrodite and Artemis, and “the suitors’ knees went slack; she bewitched their spirits with lust, and all longed to lie beside her in bed” (*Odyssey* 18. 212–214). She gets them to give her gifts (observed with joy by Odysseus himself, who is in the hall disguised as a beggar), and, when it ap-

appears inevitable that she must choose one of them, she devises the test of the bow. Finally, she insists that the stranger (i.e., Odysseus, with whom, as we have seen earlier, she had conversed) be allowed to take part in the test. But before Odysseus actually strings the bow she is told by Telemachus (now for the first time asserting himself as his father's heir apparent and head of the household) to go upstairs. Thus she is absent during Odysseus' successful stringing of the bow, the battle in the hall and its cleansing, and the killing of the servants. The stage is set, as it were, for the climactic scene between Penelope and Odysseus, leading to recognition and reunion.

At their first meeting (in Book 19) she had asked the stranger who he was, and he had begun his reply by likening her to a king who rules over a just and prosperous city—in other words, he likens his wife to himself as king of Ithaca. Later (still not revealing how much she knows of his identity) she shares with him a dream in which an eagle kills her flock of twenty geese and he agrees with her that it is an omen of Odysseus' return. Penelope's words are fraught with psychological import. She begins with confidences about how her nights are filled with anxiety. She lies awake, miserable with indecision (525–534):

 Should I stay here by the side of my son and keep all my possessions safe, my property, my slaves, and my grand and lofty palace, respecting the bed of my husband and what people might say or should I go off with the best one of the Achaeans here who court me and offer lavish gifts? As for my son, as long as he was still young and immature, he would not allow me to leave the palace and marry a new husband but now that he is grown up and has reached maturity, he beseeches me to go away, so upset is he about his estate, which these Achaeans are swallowing up.

More Freudian is the insight offered by the dream that Penelope goes on to relate (535–553):

 Now I want you to listen to a dream of mine and interpret it for me. At my home there are twenty geese who come to eat corn from a water-trough and I love watching them. But down from a mountain swoops a huge eagle with hooked beak and he breaks their necks and kills them all. They lie strewn together about the house but he flies aloft into the divine upper air. I weep and wail, although it is only a dream and the Achaean women with lovely hair gather round me as I grieve bitterly because the eagle has killed my geese. He comes back and perched on a beam jutting from the roof speaks in a human voice and restrains my tears. "Take heart, daughter of renowned Icarus. This is not a dream but a reality, a good deed that will be accomplished. The geese are your suitors and I who am the eagle in your dream will come back as your husband, who will bring a sorry fate down upon all your suitors." Thus he spoke and honeyed sleep left me. Looking around, I saw my geese in the courtyard by the trough, pecking at the grain, exactly where they were before.

The stranger in a brief answer assures Penelope that there is only one possible interpretation of her dream. Certain death lies in store for each and every

suitor. We wonder how Odysseus feels about Penelope's avowed affection for her geese and marvel at Homer's finely etched portrait of a complex woman, devoted to her husband but wary about her own future and not unflattered and unmoved by the attention and the gifts of a flock of suitors. Could she knowingly be leading this stranger on?

After the battle in the hall Penelope is wakened by Euryclea and refuses to admit that the stranger is Odysseus (we are not told whether she thinks he is). She comes down, and she and Odysseus sit opposite each other. When Telemachus reproves her for not embracing Odysseus she replies that if the stranger truly is Odysseus then "we will know it from each other even better, for we have signs which we know, hidden from others." Then she orders

NAMING ODYSSEUS

After Euryclea has recognized Odysseus from the scar on his thigh, Homer tells the story of the naming of Odysseus. His grandfather, Autolycus (father of Anticlea, the mother of Odysseus), was asked to name the infant, whom Euryclea had placed on his knees. "I shall call him *Odysseus*," he said, "because I have come being hateful [Greek, *odyssamenos*] to many men and women all over the fruitful earth." The Greek word is in the middle voice, that is, its subject can be either "an agent of rage or hatred but also its sufferer" (B. Knox's phrase). George Dimock suggests "man of pain," implying both the hero's sufferings and the suffering that he caused to others.

The anonymity or naming of Odysseus is an essential element in his story. In the first line of the *Odyssey* he is simply "[the] man": contrast the first line of the *Iliad*, where the hero, Achilles, is named. The conventions of heroic hospitality allowed hosts to ask their guest's name after he had eaten at their table: so Antinoüs asks, "Tell me the name that your mother and father call you by [at home]," and only then does Odysseus reply (*Odyssey* 9. 19), "I am Odysseus, son of Laertes." Odysseus controls the revelation of his name: for example, urged on by Athena, he chooses when to reveal himself to Telemachus in Book 16. Euryclea's discovery caught him by surprise, and his reaction was to threaten to kill her if she revealed it to others. The Cyclops asks his name and is told that it is *Outis* ("Nobody"). Arrived on Ithaca, Odysseus tells Athena that he is a Cretan. Penelope's first question at their first interview (19. 105) is, "Tell me, what people do you come from? Where are your city and your parents?," and Odysseus replies that he is a Cretan named *Aethon* ["shining," an epithet like that of the Cretan queen, *Phaedra*, "bright"]. Only after outwitting him with the test of the bed does Penelope finally achieve the self-revelation of the hero. Odysseus, "man of pain," is indeed both "Nobody" and the universal hero.

[Note: the Latin name for Odysseus is *Ulixes* or *Ulysses*, etymologically the same as the Greek name, with *Od-* shifting to *Ul-*, possibly (it has been suggested) influenced by a local dialect in Sicily or southern Italy.]

Euryclea to move the bed, which Odysseus himself had made, out of the marriage-chamber for him to sleep on outside.

Odysseus is furious that anyone would move his bed, for he had built it using a living olive tree as one of its supports and building the marriage-chamber around it. Thus he revealed the secret, and Penelope knew now that it was he.¹⁰ Then, and only then, did she give way and embrace the husband who had been away for twenty years. The poet again uses a simile for Penelope that identifies her with Odysseus (*Odyssey* 23. 232–240):

 He wept as he held the wife who matched his heart (*thymares*). Just as land is a welcome sight to shipwrecked sailors whose well-made ship Poseidon has shattered on the sea, battering it with wind and wave: few escape from the grey sea to reach land, and their skin is caked with brine, but they escape destruction and stand on land with joy—even so with joy did she look upon her husband, and her white arms would not let go of his neck.

In a sense Penelope *is* Odysseus, the sailor wrecked by Poseidon who reaches land. Thus by the similes of the king and the sailor, and by her resourceful patience and deliberate testing of the stranger, she gets him to reveal himself and proves herself to be his match.

The poet describes the end of Odysseus' labors with tact and delicacy. At the same time he allows Odysseus to recall his adventures (*Odyssey* 23. 300–343):

 So when they (Odysseus and Penelope) had taken their delight in the joys of love, they took delight in words and spoke to each other. She, goddesslike among women, told of all she had endured in the hall as she watched the unseemly mob of suitors, who to win her slaughtered many oxen and fine sheep and drank many casks of wine. In his turn godlike Odysseus told all, the cares he had brought upon men and the grievous sufferings that he had endured. She delighted in his tale, and sleep did not fall upon her eyes until he had finished his tale.

He told first how he had subdued the Cicones and how he had come to the fertile land of the lotus-eating men. He told of the Cyclops' deeds and how he avenged his valiant companions, whom the Cyclops had pitilessly devoured. He told how he came to Aeolus, who received him kindly and sent him onward, yet it was not yet destined for him to come to his own dear land, for a storm again snatched him and bore him over the fish-full sea, groaning deeply. He told how he came to Telepolus and the Laestrygonians, who destroyed his ships and his well-greaved companions. He told of the deceit and wiles of Circe, and he told how he came to the dank house of Hades to consult the soul of Theban Tiresias, sailing on his well-benched ship. There he saw his companions and his mother, who bore him and nourished him when he was a baby.

He told how he heard the song of the clear-voiced Sirens, and how he came to the wandering rocks of the Planctae, and to terrible Charybdis and Scylla, whom no man before had escaped alive. He told how his companions had slain the cattle of Helius, and how Zeus, who thunders in the high heavens, had struck his swift ship with a smoky thunderbolt and killed all his companions, and only

he escaped evil death. He told how he came to the island Ogygia and the nymph Calypso, who kept him there in her hollow cave, desiring him to be her husband. She fed him and promised to make him immortal and ageless all his days, yet she did not persuade the heart in his breast. He told how, after many sufferings, he reached the Phaeacians, who honored him like a god and sent him with a ship to his own dear homeland with ample gifts of bronze and gold and clothing.

This was the last tale he told, when sweet sleep came upon him, sleep that relaxes the limbs and releases the cares of the spirit.

THE END OF THE *ODYSSEY*

The last book of the *Odyssey* begins with Hermes escorting the souls of the dead suitors to the House of Hades, where they converse with the souls of Agamemnon and Achilles. The ghost of Amphimedon (one of the leading suitors) tells Agamemnon's ghost of Penelope's weaving and the test of the bow and the slaughter of the suitors. Agamemnon's ghost replies (*Odyssey* 24. 192–200):

 Happy son of Laertes, wily Odysseus! You married a wife of great excellence (*arete*)! How virtuous was the mind of peerless Penelope, daughter of Icarius! How well she kept the memory of Odysseus, her wedded husband! Therefore the fame of her virtue will never fade, and the immortals will fashion a lovely song for mortals to sing in honor of Penelope, the wife who kept her counsel. She did not contrive crimes like the daughter of Tyndareus, who murdered her wedded husband.

Penelope is repeatedly contrasted with Clytemnestra in the *Odyssey*, most eloquently by Agamemnon himself.¹¹ Meanwhile Odysseus leaves the palace to find his father, Laertes, who is living as a farmer, away from the city. At first he conceals his identity from the old man, but soon he reveals himself. As they are sharing a meal in Laertes' farmhouse, news comes that the relatives of the suitors are approaching to avenge their deaths. Once again Odysseus must fight, helped by Athena, and Laertes, miraculously energized by the goddess, kills Eupheithes, father of Antinoös. At this point Athena orders the men to stop fighting and Zeus casts a thunderbolt at her feet to confirm her command. She makes peace between Odysseus and the suitors' families, and so the epic ends.

ODYSSEUS AND ATHENA

Odysseus was especially helped by the goddess Athena, whose own attributes of wisdom and courage complement his gifts. The relationship of goddess and hero is brilliantly depicted by the poet in a scene after Odysseus, asleep, has been put ashore on Ithaca by the Phaeacians and wakes up, not knowing where he is. Athena, disguised as a young shepherd, has told him that he is on Ithaca (*Odyssey* 13. 250–255, 287–301):

Thus she spoke, and patient godlike Odysseus was glad, rejoicing in his own fatherland, as Pallas Athena had told him, the daughter of Zeus, bearer of the aegis. And he replied to her with winged words. He did not tell her the truth, but he held it back, always directing his mind in his breast for every advantage. [Odysseus then makes up a story which, however, does not fool the goddess.]

Thus he spoke, and the goddess, grey-eyed Athena, smiled and stroked him with her hand. In form she was like to a beautiful and tall woman, one who is expert in fine handiwork. She addressed him with these winged words:

“Crafty and wily would he be who could surpass you in every trick, even if a god were to compete with you. You rogue, deviser of tricks, never satisfied with deceit, even in your own land you were not going to abandon your deceit and your deceiving words, which are dear to you from your inmost heart. Still, come now, let us no longer talk like this, since we both know how to get the advantage. For you are by far the best of all mortals in counsel and in words, and I am famous among all the gods for wisdom and cunning. Yet you did not recognize Pallas Athena, daughter of Zeus, who stands beside you in every labor and protects you.”

THE END OF ODYSSEUS' LIFE

Homer tells the subsequent history of Odysseus in the words of Tiresias' prophecy (*Odyssey* 11. 119–137):

When you have killed the suitors in your palace, then you must go, carrying a well-made oar, until you come to men who know not the sea nor eat food flavored with salt; nor know they of red-painted ships nor of shapely oars, which are the wings of ships. This shall be a clear sign that you shall not miss: when another traveler meets you and says that you have a winnowing-fan upon your fine shoulder, then plant the well-turned oar in the ground and sacrifice to Poseidon and to all the immortal gods. And death shall come to you easily, from the sea, such as will end your life when you are weary after a comfortable old age, and around you shall be a prosperous people.

Odysseus appeased Poseidon in the manner foretold by Tiresias, founding a shrine to Poseidon where he planted the oar. He returned to Ithaca. Years later, Telegonus, who had grown up on his mother Circe's island, sailed to Ithaca in search of his father. He was plundering the island and killed Odysseus, who was defending his possessions, not knowing who he was.¹²

THE UNIVERSALITY OF THE *ODYSSEY*

The *Odyssey* is a splendid intermingling of true myth (tales about the gods), legend (stories ultimately reflecting the history of real heroes and heroines), and folktales, fairytales, and the like, which both amuse and edify. It is, perhaps, the finest example of the persistent mythological theme of the legendary Quest. In the case of Odysseus, his personal quest brings him back home, surmounting

all obstacles on his journey to punish the wicked and regain his wife, his son, and his kingdom. In subsequent literature, he has become a kind of Everyman. Certainly, to the Romans Odysseus (Ulysses) was a symbol of virtuous patience, and his endurance of adversity made him an example, especially for the Stoics. Plato, in the myth of Er that ends the *Republic*, shows Odysseus in the Underworld choosing for his next life an inconspicuous existence because of his memory of adversity.

Odysseus, then, perhaps more than any other, is the archetypal hero, just as Penelope is par excellence the archetypal heroine, each beautifully illustrating aspects of an exemplary human and heroic *arete* (excellence). Recently special attention has been given to the character and motives of Penelope. She has been seen as the peer of Odysseus in intelligence and in patience, qualities shown in her resistance to the long siege by the suitors and in her restraint on declaring her recognition of Odysseus. Penelope's reluctance to recognize Odysseus has increasingly been interpreted as a manifestation of her wisdom and self-control, leading attributes of her husband. The final reunion of husband and wife is consummated through the incident concerning their shared knowledge about the solid construction of their immovable marriage bed, with the olive tree forming one leg, a powerful symbol of the strength and persistence of their physical and spiritual love.

Homer's great epic has a unique, universal appeal to both young and old—and to the child and philosopher in us all. It can be read solely as a most entertaining story of travel and adventure, full of exciting episodes of delightful variety, a tale of abiding love that ends happily, with the just triumph of good over evil, or it can reveal to the artist and the sage the most profound insights about men and women, the gods and fate, and the meaning of human existence. The word "odyssey" itself has come into our language as synonymous with a journey and a quest, and never has the word "homecoming" found a more joyous resonance or deeper meaning than in the final books of the poem.¹³

NOTES

1. The summary is ascribed to the fifth century A.D. scholar Proclus, who names Agias of Troezen as the author of the *Nostoi*. A useful discussion is by G. L. Huxley, *Greek Epic Poetry* (Cambridge: Harvard University Press, 1969), Chapter 12.
2. For the story that Helen was in Egypt during the Trojan War, see p. 437.
3. Pindar, *Nemean Odes* 10. 7. Among the many narratives of the legend of Diomedes are those of Vergil (*Aeneid* 11. 243–295) and Ovid (*Metamorphoses* 14. 460–511).
4. Said by Ovid to be “next in shape to swans.” What these birds were can only be guessed.
5. He is also associated with Colophon in Asia Minor.
6. Many attempts have been made to follow the route of Odysseus. See T. Severin, *The Ulysses Voyage: Sea Search for the Odyssey* (London: Hutchinson, 1987). Compare T. Severin, *The Jason Voyage: The Quest for the Golden Fleece* (New York: Simon and Schuster, 1985).
7. According to the conventions of Homeric society the liaisons with Calypso and Circe did not make Odysseus unfaithful. Cf. Mary R. Lefkowitz, *Women in Greek Myth* (London: Duckworth, 1986), p. 64: “[Penelope] does not demand strict fidelity; neither she nor Helen object to their husbands’ liaisons with other women, so long as they are temporary.” The same point is made by Sarah Pomeroy, *Goddesses, Whores, Wives, and Slaves* (New York: Schocken, 1975), pp. 26–27, and by Marilyn Katz, *Penelope’s Renown* (Princeton: Princeton University Press, 1991), p. 13.
8. The Greek word *polytropos* (of many ways) means a combination of complexity, intelligence, and being widely traveled.
9. A powerful adaptation of this legend is the Circe episode in James Joyce’s *Ulysses*.
10. The living olive tree and the bed are powerful sexual symbols for a psychoanalytical interpretation.
11. The soul of Agamemnon describes his murder in the first Underworld scene (*Odyssey* 11. 405–456). The *Odyssey* focuses on Clytemnestra’s deed, not on Agamemnon’s killing of his own daughter, Iphigenia, which motivated Clytemnestra’s revenge.
12. The adventures of Odysseus subsequent to the *Odyssey* were narrated in the lost epic *Telegonia* by Eugammon of Cyrene. It ends with Telegonus conveying Odysseus’ body with Penelope and Telemachus to Circe, who makes them immortal. Telegonus then marries Penelope and Circe marries Telemachus.
13. Of interest is a novel by Charles Frazier, *Cold Mountain* (1997). Homer’s *Odyssey* is reset in nineteenth-century America in the South, near the end of the Civil War. Inman, a wounded Confederate veteran, flees from the hospital where he is recovering to return to his home and to his beloved Ida, whom he intends to marry.

PERSEUS AND THE LEGENDS OF ARGOS

HERA AND PHORONEUS

Argos was connected in history and in legend with Corinth and Thebes, and the Argive sagas demonstrate the many contacts of Argos with the eastern Mediterranean, notably the Levant and Egypt. While some of the legendary heroes are associated with a particular city of the Mycenaean Argolid (e.g., Heracles with Tiryns, Diomedes with Argos, and Perseus with Mycenae), it is often hard to distinguish between the separate cities. We shall generally use "Argos" to cover the whole Argolid and its cities.

Argos was the greatest center in Greece for the worship of Hera, and the Heraeum, the hill where Hera's sanctuary stood, was the religious center of the whole area. In the Argive saga, the first of men was Phoroneus, who established the kingdom of Argos and decided in favor of Hera in the contest for the land between Poseidon and Hera. In anger Poseidon dried up the Argive rivers, one of which, Inachus, was the father of Phoroneus. Ever after, the Argive rivers have been short of water.

The richness of Argive saga can be seen from the opening lines of Pindar's tenth *Nemean Ode*:

 Sing, O Graces, of the city of Danaüs and his fifty daughters on their shining thrones, of Argos, dwelling of Hera, a home fit for the gods; bright is the flame of her brave deeds unnumbered in their excellence. Long is the tale of Perseus and the Gorgon, Medusa; many are the cities of Egypt founded by the wisdom of Epaphus; Hypermnestra kept to the path of virtue and alone did not draw the dagger from its sheath. Fair Athena once made Diomedes divine; in Thebes the earth, struck by Zeus' thunderbolts, received the seer Amphiaraüs, the storm cloud of war. Ancient is Argos' excellence in beautiful women; Zeus revealed this truth when he came to Alcmena and to Danaë.

PERSEUS

DANAË AND ACRISIUS

Of the heroes of Argos, first in importance, though not in time, is Perseus. His great-grandfather Abas had twin sons, Proetus and Acrisius, who quarreled even before their birth.¹ Acrisius, who became king of Argos itself while Proetus ruled

Tiryns, had no sons and only one daughter, Danaë; an oracle foretold that her son would kill Acrisius. To keep her from having children, Acrisius shut Danaë up in a brazen underground chamber in his palace, but Zeus loved her and entered the chamber in the form of a shower of gold and lay with her.² Their child was Perseus, and Danaë kept him in the chamber for four years, unknown to Acrisius, until he was discovered from the noise he made while playing. Acrisius refused to believe that Zeus was the child's father and put mother and child into a chest which he set afloat on the sea. The chest floated to the island of Seriphos, where the fisherman Dictys (whose name means "net") found it and rescued Danaë and Perseus, giving them shelter in his own home.

POLYDECTES

Now Polydectes, brother of Dictys, was king of Seriphos, and as Perseus grew to manhood, he fell in love with Danaë, who refused him. He then summoned the leading men of the island to a banquet at which each man had to present him with the gift of a horse. Perseus boasted that he could just as easily give Polydectes the Gorgon's head. Polydectes, eager to get Perseus out of the way, took him at his word and ordered him to perform the task. In despair Perseus wandered to a lonely part of Seriphos, where Hermes and Athena came to his help with advice. That two gods should assist him is remarkable; Hermes belongs more to the Peloponnese than Athena, and it is very likely he was originally the hero's only supernatural helper. Since the Gorgon's head was an attribute of Athena's aegis, she may very early have been associated with the saga, for much of the literary tradition was in the hands of Athenians.³ Pindar, writing in the first half of the fifth century B.C., makes Athena the sole helper: "Breathing courage, Danaë's son joined the company of blessed men, and Athena was his guide" (*Pythian Odes* 10. 44–46).

THE GRAEAE

Advised by Hermes and Athena, Perseus made his way to the three daughters of Phorcys, sisters of the Gorgons and old women (in Greek, the *Graiai*) from their birth. They alone could tell Perseus the way to some nymphs who possessed certain magic objects he would need for his task, but would part with their information only under duress. Among them they had one eye and one tooth, which they passed to one another in turn. Perseus got hold of these and gave them back only when the Graeae had told him the way to the nymphs. From the nymphs he received three objects: a Cap of Invisibility, a pair of winged sandals, and a wallet or *kibisis*.⁴ From Hermes he received a scimitar, the only object given directly by Hermes.⁵

THE GORGONS

Perseus now flew to the Gorgons, whose home was somewhere on the edge of the world, usually situated in North Africa.⁶ Pindar, who makes Perseus go to

Danaë and the Chest. Attic red-figure lekythos, ca. 470 B.C.: height 16 in. The infant Perseus, already in the chest, reaches up to his reluctant mother. Acrisius gestures impatiently to her to get in. In her left hand Danaë holds a perfume jar. (Toledo, Ohio, Museum of Art.)

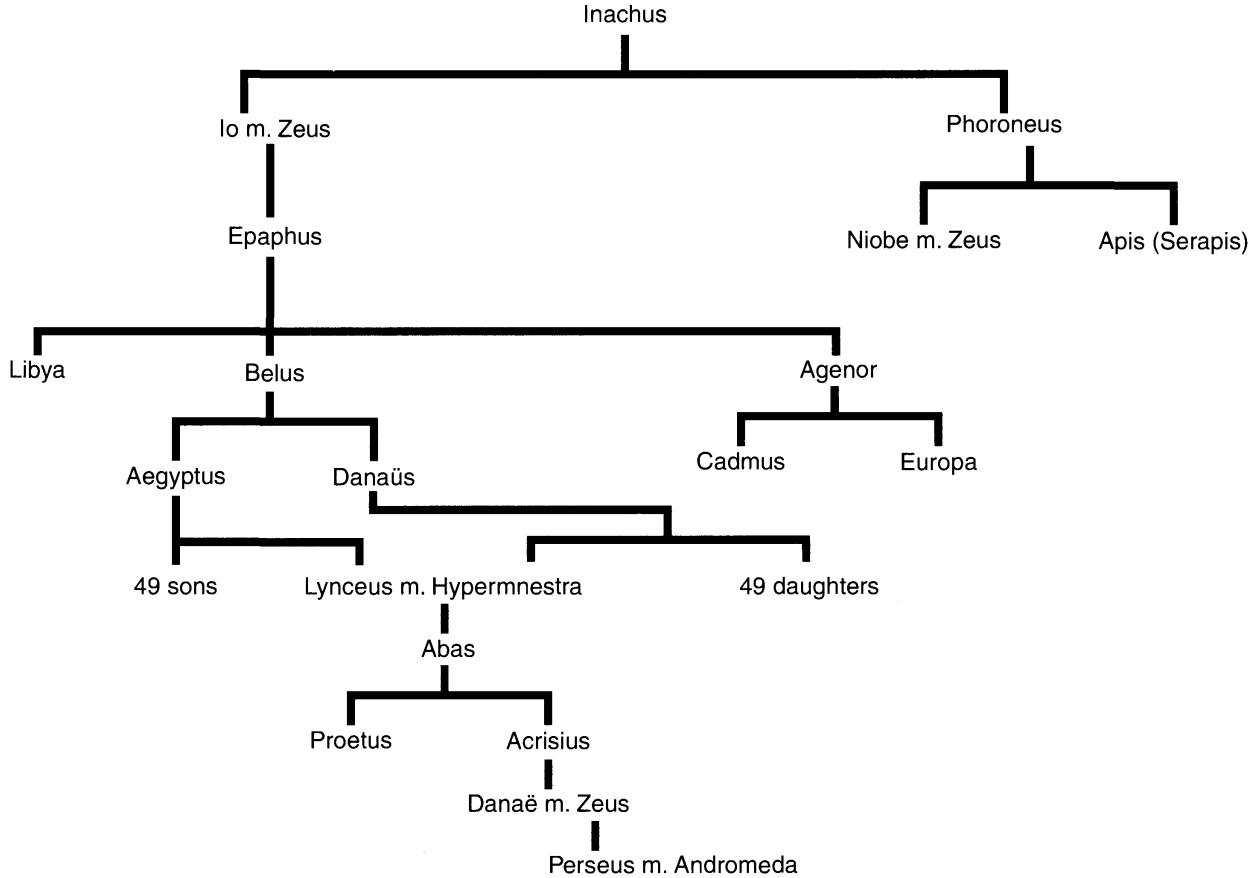

Figure 21.1. The Ancestry of Perseus

the far north, gives a beautiful description of the perfect life lived by the Hyperboreans, and his account is one of the few continuous passages in extant classical Greek literature that deals with the legend of Perseus (*Pythian Odes* 10. 29–48):

❖ Not with ships nor on foot would you find the marvelous road to the assembly of the Hyperboreans. Once did Prince Perseus feast among them when he entered their palace; he found them solemnly sacrificing one hundred donkeys to their god. In their feasts continually and in their hymns Apollo especially takes delight, and he laughs as he sees the pride of the animals rearing up. The Muse is always with them and is a part of their customs: everywhere are the maidens' dances, the music of lyres and of the deep-sounding flutes. They bind their hair with golden laurel-wreaths, feasting with joy. Neither disease nor wasting old age has any part in their holy nation. Without labor, without battles, they live, escaping the severe justice of Nemesis. Breathing courage, Danaë's son joined the company of blessed men, and Athena was his guide. And he slew the Gorgon and came bearing the head with hair of writhing snakes, for the islanders a stony death.

The three Gorgons, of whom only Medusa was mortal, were of terrifying aspect, and those who looked upon their faces were turned to stone.⁷ They were asleep when Perseus came; guided by Athena and looking only at the Gorgon's reflection in his brazen shield he beheaded Medusa and put the head in the *kibisis*. As she was beheaded, Chrysaor (He of the Golden Sword) and Pegasus, the winged horse, sprang from her body. Their father was Poseidon; Chrysaor became father of the monster Geryon, and Pegasus was prominent in the legend of Bellerophon. According to Ovid, his hoof struck Mt. Helicon and caused the fountain Hippocrene (Horse's Fountain) to gush forth, which from then on was loved by the Muses and associated with poetic inspiration.

This is not the only association of the legend of Medusa with music and poetry. Pindar, praising Midas of Akragas, winner in the competition for flute-playing at the Pythian Games, tells how the music of the flute was invented by Athena in imitation of the Gorgons' lament for the death of Medusa (*Pythian Odes* 12. 5–23):

❖ Receive this garland from Delphi for glorious Midas who is the best in Greece in the art that Pallas Athena wove from the deadly lament of the impetuous Gorgons, which Perseus heard pouring from the snaky heads that could not be approached. Grievously he labored when he killed the third part of the sisters, bringing death to sea-girt Seriphos and its people. Indeed he brought the darkness of death to the Gorgons, god-born children of Phorcys; and grievous did the son of Danaë make the banquet of Polydectes, and the long servitude of his mother and her forced love. His spoil was the head of fair-cheeked Medusa. And he, we say, was born from the shower of gold. But when the virgin Athena had

Perseus Beheads Medusa. Limestone metope from Selinus, ca. 540 B.C.; height 58 in. To the left stands Athena, wearing a *peplos*. The winged horse, Pegasus, springs from the body of Medusa. The frontality of the figures compels the viewer to confront the horror of Medusa's face and the necessity for Perseus of avoiding her gaze. (*Palermo, Museo Nazionale.*)

Medusa, by Harriet Hosmer (1830–1908). Marble, 1854; height 27 in. Hosmer emphasizes the beauty and the pathos of Medusa, whereas most artists, ancient and modern, have preferred to focus on the horror of the Gorgon's head. A visitor to her studio said, "To fulfill the true idea of the old myth, Medusa should be wonderfully beautiful, but I never saw her so represented before." (© *The Detroit Institute of Arts, Founders' Society Purchase, Robert H. Tannahill Foundation Fund.*)

delivered the hero dear to her from these labors, she made the music of the flutes with its many notes, so that with instruments she might imitate the loud-sounding lamentation that was forced from the hungry jaws of Euryale.⁸ This was the goddess' invention, but she gave it to mortals and called it "the music of many heads."

Perseus was able to fly away from Medusa's sisters unharmed, since he was wearing the Cap of Invisibility. In the original version of the saga, he probably returned directly to Seriphos and dealt with Polydectes.

ANDROMEDA

At a very early stage the legend of Andromeda was added to the story of Perseus' return. Andromeda was the daughter of King Cepheus and his queen, Cassiopea. Their kingdom is variously placed in Ethiopia or in the Levant.⁹

Cassiopea boasted that she was more beautiful than the Nereids. As a punishment, Poseidon flooded Cepheus' kingdom and sent a sea-monster to ravage

Perseus Attacks the Sea-Monster. Etruscan black-figure hydria from Caere (Cerveteri), ca. 530 B.C.; height 15³/₄ in. Perseus brandishes a rock in his right hand and Hermes' scimitar (*harpe*) in his left. The seal, octopus, and dolphins remind the viewer of marine realities. The absence of Andromeda reflects the artist's narrative priorities, and it has been suggested that the hero is Heracles, rather than Perseus. (Switzerland, Küssnacht, Hirschmann Collection.)

Perseus and Andromeda. By Titian (ca. 1477–1576): oil canvas, 1554–1556, $70\frac{1}{2} \times 77\frac{3}{4}$ in. For six centuries the subject of Andromeda has been a favorite vehicle for painters' interpretations of the theme of "Beauty and the Beast." Titian correctly gives Perseus winged sandals and *harpe*. In many versions Perseus is confused with Bellerophon and rides on the winged horse, Pegasus. (London, Wallace Collection.)

the land. Cepheus consulted the oracle of Zeus Ammon and learned that the monster could be appeased only if Andromeda were offered to it, chained to a rock. Cepheus obeyed; but at this point, Perseus came on the scene and undertook to kill the monster if he could marry Andromeda. Making use of his sandals and cap, Perseus killed the beast with Hermes' scimitar and released

Andromeda, whom he married, using the Gorgon's head to deal with the opposition of Cepheus' brother Phineus, to whom Andromeda had previously been betrothed. After their son Perses was born, Perseus and Andromeda flew back to Seriphos, leaving Perses behind as heir to Cepheus' kingdom.

THE ORIGIN OF LIBYAN SNAKES, THE ATLAS RANGE, AND CORAL

A number of other details have been added to the original account of Perseus' flight with the Gorgon's head. The Gorgon's blood is said to have dripped through the *kibisis* as Perseus flew over Libya, and from the drops sprang the infinite number of poisonous snakes that (according to the belief of the ancients) infested the Libyan desert. The giant Atlas, supporter of the heavens, refused to show Perseus any hospitality, and Perseus turned him into stone with the Gorgon's head. His head and body became a mountain range, his hair the forests upon the mountains. As an example of these ingenious additions to the legend, we give Ovid's description of the creation of coral (*Metamorphoses* 4. 740–752):

 Perseus washed his hands, bloody from his victory over the monster, in the sea. So that the hard sand should not damage the snake-bearing head, he made the ground soft with leaves and branches that grow beneath the sea's surface, and on these he placed the head of Medusa, daughter of Phorcys. The branch that a few moments before had been fresh and filled with living pith absorbed the monster's power; and touched by the head, its leaves and stems took on a new hardness. But the sea-nymphs tested the miraculous change on other branches and rejoiced to see the same thing happen. Now coral still retains its same nature: it grows hard in contact with air, and what in the sea was flexible becomes stone out of the water.

POLYDECTES AND PERSEUS' RETURN TO ARGOS

When Perseus and Andromeda reached Seriphos, they found that Danaë and Dictys had taken refuge at an altar from the violence of Polydectes. Perseus displayed the Gorgon's head before Polydectes and his assembled followers, who were all turned to stone. Thus Danaë was released and returned to Argos with Perseus and Andromeda. Perseus made Dictys king of Seriphos and returned the magic objects to the gods—the sandals, *kibisis*, and cap to Hermes (who returned them to the nymphs) and the Gorgon's head to Athena, who set it in the middle of her shield (see illustration on p. 165).

THE DEATH OF ACRISIUS

When Acrisius heard that Danaë's son was indeed alive and returning to Argos, he left the city and went to the city of Larissa, in Thessaly, where Perseus followed him. Here Acrisius met his long-foretold death. Competing in the athletic

The Baleful Head. By Edward Burne-Jones (1833–1898); oil on canvas, 1887, $60\frac{1}{2} \times 50\frac{3}{4}$ in. This is the final painting in Burne-Jones' Perseus cycle, undertaken for Arthur Balfour in 1875 and based on William Morris' poem "The Doom of Acrisius" in *The Early Paradise*. Ten full-scale watercolor cartoons (now in Southampton, England) and four oil paintings (now in Stuttgart, Germany) were completed. Burne-Jones sets the lovers in an enclosed garden. They look at the reflection of the Gorgon's head, held up by Perseus, in the surface of a marble-sided well. The bright, open eyes of Andromeda provide a dramatic contrast with the reflection of Medusa's closed eyes. The scene is an intense yet peaceful close to the turbulent adventures of Perseus, who still must face the battle with Phineus. (Stuttgart, Staatsgalerie.)

games which the king of Larissa was celebrating in honor of his dead father, Perseus threw a discus that accidentally killed Acrisius. He was buried outside Larissa and honored there as a hero. Perseus, having shed kindred blood, returned not to Argos but to Tiryns, whose king Megapenthes, son of Proetus, exchanged kingdoms with him. As king of Tiryns, Perseus founded Mycenae, where in historical times he was honored as a hero. The children of Perseus and Andromeda became kings of Mycenae, and from them descended Heracles and Eurystheus.

SAGA AND FOLKTALE

An interesting feature of the saga of Perseus is its number of folktale motifs, more than in any other Greek saga. These include the magic conception of the hero by the princess, his mother; the discovery of the hero as a child by the noise of his playing; the villainous king and his good and humble brother; the rash promise of the hero, which he performs with the aid of supernatural helpers and magic objects; the three old women from whom advice must be sought; the Gorgons, imaginary monsters of ferocious ugliness; and, finally, the vindication of the hero and the punishment of the villain.

OTHER LEGENDS OF ARGOS

THE FAMILY OF INACHUS

Among the earliest legends of Argos are those of the family of Inachus. The daughter of Inachus was Io, much of whose story is told on pages 91–93 in connection with Aeschylus' *Prometheus Bound*. Beloved by Zeus, Io was changed into a white cow by jealous Hera and guarded by all-seeing Argus until Hermes, sent by Zeus to rescue her, cut off Argus' head. Next Hera sent a gadfly to madden her; but after wandering the earth, Io came at last to Egypt, where Zeus restored her human form. There she gave birth to a son, Epaphus, destined to be the ancestor of the hero Heracles.

From other sources we learn that the Egyptians identified Epaphus with Apis, the sacred bull. And his birth did not bring an end to Io's wanderings. Hera had Epaphus kidnapped, and Io set out in search of him, eventually finding him in Syria. She now returned to Egypt where she came to be worshiped as Isis.

The story of Io has many confusing elements. An Apis was said to have been a son of Phoroneus and to have given the Peloponnese its ancient name of Apia; after his death he was identified with Serapis, who is the same as the Egyptian bull-god Apis. Io was originally a goddess; she may have been a form of Hera herself. Herodotus, who himself visited Egypt, said that Isis was identified there with Demeter, whose image Io had first brought there, and that Isis was always represented as a woman with cow's horns (in this being similar to the great Phoeni-

cian moon-goddess, Astarte). The versions of Io's legend vary considerably, and Aeschylus gives different reasons for her departure from home and her transformation in his two plays, the *Suppliants* and *Prometheus Bound*. She was originally a divine being rather than a human heroine, and through Greek contacts with the East (especially Egypt), she was assimilated into Egyptian mythology.

THE DESCENDANTS OF IO

Through Epaphus, Io was the founder of the royal families of Egypt and Argos, as well as those of Phoenicia, Thebes, and Crete. Epaphus himself was said to have founded many cities in Egypt, including the royal city of Memphis. His daughter was Libya, who gave her name to part of North Africa; he also had twin sons, Agenor and Belus. The former became the Phoenician king, father of Cadmus (founder of Thebes) and Europa (mother of the Cretan king Minos). Belus stayed in Egypt and also became the father of twin sons, Aegyptus and Danaüs, who, like their descendants Proetus and Acrisius, were bitter enemies.

THE DAUGHTERS OF DANAÜS

Aegyptus and Danaüs quarreled over the kingdom, so that Danaüs was compelled to leave Egypt. Sailing with his fifty daughters (the Danaïds) via Rhodes, he came to Argos, where he peaceably established himself as king. (His subjects were called after him *Danaï*—the term by which Homer generally refers to the Greeks.) Now Aegyptus had fifty sons, who claimed as next of kin the right to marry their cousins and pursued them to Argos. Danaüs gave his daughters in marriage, but to each he gave a dagger with orders to kill her husband that night. All obeyed, save one only, Hypermnestra, who spared her husband, Lynceus, and hid him. As to the sequel, accounts vary; according to the most popular version, the forty-nine Danaïds who obeyed their father were punished in the Underworld by eternally having to fill water jars, through which the water leaked away. According to Pindar, however, Danaüs gave them as wives to the winners of an athletic contest. After a period of imprisonment by Danaüs, Hypermnestra was reunited with Lynceus and became the mother of Abas, father of Proetus and Acrisius. Thus the line of descent of the Argive kings from Inachus to Heracles remained unbroken.

AMYMONE

The Danaïd Amymone was sent by her father to search for water and came upon a satyr who attempted to seduce her. She was saved by Poseidon, who then himself lay with her and as a reward caused a spring to burst from a rock with a stroke of his trident. In historical times, the spring Amymone was still shown near Argos.

OTHER ARGIVE HEROES

Important Argive heroes were the seer Melampus and the heroes who took part in the expedition of the Seven against Thebes. Among these was Tydeus, whose son Diomedes, a leading Greek hero in the Trojan War and the last great mythical prince of Argos, was widely worshiped as a hero after his death. Pindar says that Athena gave him the immortality that she denied Tydeus.¹⁰

NOTES

1. For Proetus and Bellerophon see pp. 613–615.
2. The Roman poet Horace (*Odes* 3. 16) changed Danaë's prison to a brazen tower, which has become the traditional version.
3. The Athenian historian Pherecydes (early fifth century B.C.) is an early authority for the saga.
4. The word *kibisis* is not Greek and in antiquity was believed to be Cypriote.
5. Hermes wears the Cap of Darkness in the Gigantomachy and is regularly portrayed with winged sandals. Athena wore the Cap of Invisibility at Troy (*Iliad* 5. 844–845).
6. It is also placed by others in the far north, among the Hyperboreans, or in the far south, among the Ethiopians.
7. For their origin, see pp. 153–154.
8. The Gorgon Euryale is mourning for her dead sister, Medusa.
9. In the first century A.D. the marks of Andromeda's fetters were still being shown on the rocks near the city of Joppa.
10. The legends of these heroes are discussed on pp. 606–607 (Melampus), pp. 395–398 (the Seven), and pp. 482–483 (Diomedes).

HERACLES

Heracles is the most popular of the Greek heroes, and his legends include elements of saga and folktale.¹ His status as man, hero, and god is controversial and continues to be a source of debate. He is particularly associated with the area around Argos and with Thebes, where his birth is traditionally placed. The two areas are connected in the account of his parents' adventures.

AMPHITRYON AND ALCMENA

Electryon, king of Mycenae, and his sons fought at Mycenae against the sons of Pterelaüs, king of the Teleboans (a people of western Greece). Only one son from each family survived.² The Teleboans then retreated, taking with them Electryon's cattle. Electryon planned to attack the Teleboans and made Amphitryon (son of his brother, Alcaeus) king in his place, betrothing him to his daughter Alcmena on the condition that Amphitryon leave her a virgin until after his return from the Teleboans. Now Amphitryon had already recovered the stolen cattle, and while he was herding them, he threw his club at one of them and accidentally killed Electryon. For his homicide, he was exiled from Mycenae, while his uncle Sthenelus became king.

Taking Alcmena, Amphitryon went to Thebes, where Creon purified him. Alcmena, nevertheless, refused to lie with Amphitryon until he had avenged the death of her brothers by punishing the Teleboans.³ Amphitryon's expedition was successful through the treachery of Comaetho, daughter of the Teleboan king Pterelaüs. Out of love for Amphitryon she pulled from Pterelaüs' head the golden hair that guaranteed him immortality and made the Teleboans invincible. Thus Pterelaüs died and Amphitryon was victorious. Amphitryon killed Comaetho and returned to Thebes.

Amphitryon expected to lie with Alcmena, and he did not know that Zeus, disguised as Amphitryon, had visited her the previous night, which he extended to three times its proper length, and had told her the full story of the Teleboan expedition. Alcmena only accepted Amphitryon after Tiresias had revealed the truth. Thus she conceived twins (it was said); the elder by one night was Heracles, son of Zeus, and the younger was Iphicles, son of Amphitryon.

There are several variants of this story. According to Hesiod, Amphitryon

Figure 22.1. The Ancestry of Heracles

killed Electryon in a fit of anger and for this reason left Argos with Alcmena and came to Thebes. There he lived with Alcmena, but he did not consummate their marriage until he had returned victorious over the Teleboans. Meanwhile Zeus had lain with Alcmena that same night; yet Amphitryon was able to lie “all night long with his chaste wife, delighting in the gifts of golden Aphrodite.”

Another variant is the plot of the “tragicomedy” (as the playwright himself called it) by Plautus, *Amphitruo*. In this version, Jupiter (Zeus) and Mercury (Hermes) disguise themselves as Amphitryon and Amphitryon’s servant Sosia, respectively. Amphitryon returns just after Jupiter has left Alcmena, who is thoroughly confused. She gives birth to twins, one of whom is stronger than the other, and immediately strangles two serpents sent by Juno (Hera) to kill him. Just as Alcmena’s servant Bromia is describing the scene, Jupiter himself appears and reveals the truth to Amphitryon. This is the only one of the surviving plays of Plautus whose plot is taken from mythology.

THE BIRTH OF HERACLES AND HIS EARLY EXPLOITS

The birth of Heracles introduces a constant feature of his story, the hostility of Hera. Zeus had boasted on Olympus on the day when Heracles was to be born (Homer, *Iliad* 19. 102–105):

 Today Eileithyia, helper in childbirth, will bring to the light a man who shall rule over all that dwell around him; he shall be of the race that is of my blood.

Hera deceived Zeus by hastening the birth of the child of Sthenelus (king of Mycenae), whose wife was seven months pregnant, and sending Eileithyia to delay the birth of Alcmena’s sons.⁴ Sthenelus was the grandson of Zeus, and so his son rather than Alcmena’s fulfilled the terms of Zeus’ boast. He was Eurystheus, for whom Heracles performed the Labors.

Pindar tells the story (mentioned earlier in connection with the *Amphitruo* of Plautus) that Hera also sent a pair of snakes to kill the infant Heracles, whose birth she had not been able to prevent. The passage ends with the prophet Tiresias foretelling the hero’s part in the battle of the gods against the Giants and his eventual deification (*Nemean Odes* 1. 33–72):

 Willingly do I take hold of Heracles upon the high peaks of Virtue as I retell an ancient tale. When the son of Zeus had escaped from the birth pangs with his twin and had come into the bright light, he was wrapped in the yellow swaddling bands, and Hera of the golden throne saw him. Straightway in hasty anger, the queen of the gods sent snakes, which passed through the open doors into the farthest part of the wide room, eager to coil their quick jaws around the children. But Heracles lifted up his head and for the first time made trial of battle; with his two hands, from which there was no escape, he seized by their necks the two serpents, and his grip squeezed the life out of the huge monsters, strangling them.

Then fear unbearable struck the women who were helping Alcmena at the birth. Alcmena, too, leaped to her feet from the bedclothes, unclothed as she was, as if to protect her babies from the attack of the beasts. Then the Theban leaders quickly ran and assembled with their bronze weapons, and Amphitryon came, smitten with the bitter pangs of anxiety and brandishing his sword unsheathed. . . . He stood with amazement hard to bear mixed with joy, for he saw the immeasurable spirit and power of his son. The immortals indeed had made the words of the messengers untrue. Then he summoned Tiresias, his neighbor, excellent mouthpiece of Zeus the most high. To Amphitryon and to all his armed men he foretold with what fortunes Heracles would meet, how many lawless wild beasts he would kill on the sea, how many on land. He foretold how Heracles would give to his fate the man who walks with crooked insolence, most hateful of men. For, he foretold, when the gods should do battle with the giants on the plain of Phlegra, beneath the onrush of his missiles, bright hair would be soiled in the dust. But Heracles himself, in peace for all time without end, would win rest as the choice reward for his great labors, and in the palaces of the blessed he would take Hebe to be his youthful bride. Feasting at his wedding beside Zeus, son of Cronus, he would praise the holy customs of the gods.

Thus Heracles survived. In his education he was taught chariot driving by Amphitryon, wrestling by Autolycus, archery by Eurytus, and music by Linus.⁵ Heracles killed Linus, who was a son of Apollo, by striking him with his lyre, and for this was sent away to the Theban pastures on Mt. Cithaeron, where he performed a number of exploits. He killed a lion that was preying on the cattle of Amphitryon and of Thespius, king of the Boeotian town of Thespieae. During the hunt for the lion, Heracles was entertained for fifty days by Thespius and lay with one of his fifty daughters each night (or with all fifty in the same night). He also freed the Thebans from paying tribute to the Minyans of Orchomenus, leading the Theban army himself into battle. In gratitude Creon gave him his daughter Megara as wife, and by her he had three children.

THE MADNESS OF HERACLES

Some time later, Hera brought about a fit of madness in which Heracles killed Megara and her children. When he recovered his sanity, he left Thebes and went first to Thespieae, where Thespius purified him, and then to Delphi, where he sought further advice. Here the priestess of Apollo called him Heracles for the first time (until then he had been known as Alcides) and told him to go to Tiryns and there for twelve years serve Eurystheus, performing the labors that he would impose. If he did them, she said, he would become immortal.

This is the simplest story of the origin of the Labors; there is, however, great confusion over the chronology of Heracles' legends. Euripides in his *Heracles* puts the murder of Megara and her children after the Labors. Sophocles in his *Trachiniae* has Heracles marry his second wife Deianira before the Labors, whereas Apollodorus places the marriage after them. All are agreed that for a

number of years Heracles served Eurystheus. Heracles' ghost says to Odysseus: "I was a son of Zeus, but infinite was my suffering; for I was slave to a far inferior mortal, and heavy were the labors he laid upon me" (Homer, *Odyssey* 11. 620–633).

THE TWELVE LABORS

The Greek word for labors is *athloi*, which really means contests undertaken for a prize. In Heracles' case the prize was immortality, and at least three of his Labors are really conquests of death.⁶ Heracles did not always perform the Labors unaided; sometimes Athena helped him, sometimes his nephew, Iolaüs. The first six Labors all take place in the Peloponnese, the remaining six in different parts of the world. In these Heracles has changed from a local hero into the benefactor of all humankind. The list of the labors varies, but the twelve given are traditional and were represented on the metopes of the temple of Zeus at Olympia (see p. 114).

THE PELOPONNESIAN LABORS

1. The Nemean Lion Heracles was required to bring the skin of this beast to Eurystheus. He killed it with a club that he had himself cut. Theocritus (in his twenty-fifth *Idyll*) makes the lion invulnerable, and Heracles has to strangle it and then flay it by using its own claws to cut its hide. The club and lion-skin henceforth were Heracles' weapon and clothing and are his attributes in art and literature.

2. The Lernaean Hydra This serpent lived in the swamps of Lerna, near Argos. It had nine heads, of which eight were mortal and the ninth immortal. Each time Heracles clubbed a head off, two grew in its place. The labor was made the harder by a huge crab, which Hera sent to aid the Hydra. First Heracles killed this monster, and then killed the Hydra, helped by his nephew, Iolaüs, son of Iphicles. Each time he removed one of the heads, Iolaüs cauterized the stump with a burning brand so that another could not grow. Heracles buried the immortal head under a huge rock. He then dipped his arrows in the Hydra's poison. As for the crab, Hera took it and made it into the constellation Cancer.

3. The Cerynean Hind The hind had golden horns and was sacred to Artemis; it took its name from Mt. Cerynea in Arcadia.⁷ It was harmless, nor might it be harmed without incurring Artemis' wrath. After pursuing it for a year Heracles caught it by the river Ladon, and carried it back to Eurystheus. On the way Artemis met him and claimed her sacred animal, but she was appeased when Heracles laid the blame on Eurystheus.

This version of the story is entirely set in the Peloponnese. A different account, however, is given by Pindar in his beautiful third *Olympian Ode*. In it Heracles went to the land of the Hyperboreans in the far north in search of the hind,

Hercules and the Lernaean Hydra. By Gustave Moreau (1826–1898); oil on canvas, 1869–1876, $70\frac{1}{2} \times 60\frac{1}{4}$ in. Moreau, who painted several of Hercules' Labors, devoted enormous effort to this painting. Hercules is young and of normal human size and anatomy. He stands in the attitude (legs reversed) of the *Apollo Belvedere* (p. 229), with his attributes of lionskin, bow (also Apollo's weapon), and club. The seven-headed Hydra towers over the hero, and in front of it lie the remains of its victims. The rocky cliffs heighten the drama, a suitable setting for the fearless hero. The conquest of the Hydra had long been a parable for the triumph of good government over disorder, but Moreau focuses on the moral stature of the hero rather than on political allegory. (*Chicago, Art Institute.*)

on whose golden horns the nymph Taygete, a daughter of Atlas, had stamped the name of Artemis.⁸ Pindar's narrative allows us to connect this labor with that of the Apples of the Hesperides, for in the latter story Heracles goes to the limits of the world in search of a miraculous golden object, and again Ladon (in the form of a dragon) and Atlas appear.⁹ The labor of the Apples of the Hesperides is a conquest of death, and it seems that the story of the Cerynean stag is another version of the same theme.

4. The Erymanthian Boar This destructive animal had to be brought back alive from Mt. Erymanthus. Heracles chased the boar into deep snow and there trapped it with nets. He brought it back to Eurystheus, who cowered in terror in a large jar.

This labor resulted in a side adventure (or *parergon*).¹⁰ On his way to the chase, Heracles was entertained by the centaur Pholus, who set before him a jar of wine that belonged to all the centaurs in common. When it was opened, the other centaurs, attracted by its fragrance, attacked Heracles, who repelled and pursued them. Most of them were scattered all over Greece, but Chiron was wounded by one of Heracles' poisoned arrows. Since he was immortal and could not die, he suffered incurable agonies until Prometheus interceded with Zeus and took upon himself the immortality of Chiron. Pholus also met his death when he accidentally dropped a poisoned arrow on his foot.

5. The Augean Stables Augeas, son of Helius (the Sun) and king of Elis, owned vast herds of cattle whose stables had never been cleaned out. Heracles was commanded by Eurystheus to perform the task, and successfully achieved it within one day by diverting the rivers Alpheus and Peneus so that they flowed through the stables. Augeas agreed to give Heracles one-tenth of his herds as a reward, but refused to keep his promise and expelled both Heracles and his own son Phyleus (who had taken Heracles' part in the quarrel). Heracles was received by a nearby prince, Dexamenus (whose name, indeed, means "the receiver"), whose daughter he saved from the centaur Eurytion. After he had finished the Labors, Heracles returned to Elis at the head of an army, took the city, and killed Augeas, making Phyleus king in his place.

It was after this expedition that Heracles was said to have instituted the Olympic Games, the greatest of Greek festivals, held every four years in honor of Zeus. He marked out the stadium by pacing it out himself, and he fetched an olive tree from the land of the Hyperboreans to be, as Pindar described it, "a shade for the sacred precinct and a crown of glory for men" (*Olympian Odes* 3. 16–18), for at that time there were no trees at Olympia, and at the games the victors were awarded a garland of olive leaves.¹¹

6. The Stymphalian Birds Heracles was required to shoot these creatures, which flocked together in a wood by the Arcadian lake Stymphalus. He flushed them by clashing brazen castanets given him by Athena and then shot them.¹²

Heracles, Assisted by Athena, Cleans the Augean Stables. Marble metope over the east porch of the temple of Zeus at Olympia, ca. 460 B.C.; height 63 in. This local legend is given the place of honor as the final one of the series of the Labors of Heracles in the metopes of the temple of Zeus (see p. 114). Athena is helmeted and clothed in the Doric *peplos*, her left hand resting on her shield. With her spear (now missing) she directs Heracles as he labors to open (with a crowbar) the stables so that the river Alpheus can flush them clean. (From metope no. 12 of the Temple of Zeus at Olympia. Courtesy of Alinari/Art Resource, New York.)

THE NON-PELOPONNESIAN LABORS

7. The Cretan Bull This bull was one that Minos had refused to sacrifice to Poseidon. Heracles caught it and brought it back alive to Eurystheus. It was then turned loose and eventually came to Marathon, where in time Theseus caught and sacrificed it.

8. The Mares of Diomedes Diomedes, son of Ares, was a Thracian king who owned a herd of mares that were fed human flesh. Heracles, either alone or with an army, got possession of them and tamed them by feeding them Diomedes himself. He took them back to Argos, where Eurystheus set them free and dedicated them to Hera. On his way to Thrace Heracles was entertained by Admetus, king of Pherae, who disguised his grief at the recent death of his wife, Alcestis. Heracles discovered the truth and himself wrestled with Thanatos (Death), forcing him to give up Alcestis, whom he restored to her husband.

9. The Girdle of Hippolyta Hippolyta was queen of the Amazons, the warrior women at the northern limits of the world. Heracles was sent to fetch her girdle, which had magic powers. He killed Hippolyta in battle and took the girdle. It was displayed at Argos in historical times.

While returning from this labor, Heracles came to Troy and there rescued Hesione from the sea-monster (see p. 443). Cheated by King Laomedon of his reward, he returned later (after his time as the servant of Omphale) with an armed force and sacked the city, giving Hesione to his ally Telamon and leaving Podarces (Priam) on the throne of the ruined city.

10. The Cattle of Geryon The last three labors are most clearly conquests of death, with the abduction of Cerberus as their climax. Geryon lived on the island of Erythia, far away to the west. Geryon was a three-bodied monster, offspring of the Oceanid Callirhoë and Chrysaor; he tended a herd of cattle, helped by a giant herdsman, Eurytion, and a two-headed hound, Orthus (or Orthrus). Heracles' labor was to bring the cattle back to Eurystheus. To reach Erythia, Heracles was helped by Helius (the Sun), who gave him a golden cup in which to sail upon the River of Ocean, which girdles the world. He killed Orthus, Eurytion, and Geryon, and then sailed back in the cup to Tartessus (i.e., Spain) with the cattle. He returned the cup to Helius and then began to drive the cattle back to Greece.

As a monument of his journey to the western edge of the world, he set up the Pillars of Heracles at the Atlantic entrance to the Mediterranean. They are sometimes identified with the rocks of Calpe (Gibraltar) and Abyla (Ceuta), which flank the Straits of Gibraltar.

Heracles' journey back to Greece has many *parerga*. While crossing the south of France, he was attacked by the tribe of the Ligurians and exhausted his supply of arrows defending himself. He prayed for help from Zeus, who sent a rain of stones that gave Heracles the ammunition he needed to drive off the attackers. He then crossed the Alps and traversed Italy, where he was said to have founded several cities.¹³

Heracles' wanderings in Italy also took him across the strait to Sicily. Here he wrestled with Eryx (king of the mountain of the same name at the western end of the island), whom he killed. He returned to Greece by traveling around the head of the Adriatic and through Dalmatia. At the Isthmus of Corinth he killed the giant and brigand, Alcioneus. As for the cattle, Eurystheus sacrificed them to Hera.

Quite a different version of the legend of Geryon is told by Herodotus. In this, Heracles journeyed to the cold lands beyond the Danube and there lay with Echidna (Snake Woman), a monster who was half woman and half serpent, who bore him three sons, Agathyrus, Gelonus, and Scythes. When the three grew up, only Scythes was able to draw a bow and put on a belt that Heracles had left behind. The other two were driven away by Echidna, and Scythes became king and ancestor of the Scythians.¹⁴

11. The Apples of the Hesperides The Hesperides were the three daughters of Night, living far away to the west; they guarded a tree upon which grew golden apples. They were helped by the serpent Ladon, who was coiled around the tree. The apples had originally been a wedding gift from Ge to Hera when she married Zeus, and Ge put them in the garden of the Hesperides. Heracles first had to find the sea-god Nereus and learn from him the whereabouts of the garden. Nereus would tell him only after he had turned himself into many different shapes, being held all the while by Heracles. At the garden, in Euripides' version, he killed Ladon and plucked the apples himself. In the tradition represented by the metopes at Olympia, however, he got the help of the Titan Atlas, who held up the heavens. Heracles, helped by Athena, took the heavens on his own shoulders while Atlas fetched the apples. He then returned the load to Atlas' shoulders and brought the apples back to Eurystheus. Athena is then said to have taken the apples back to the garden of the Hesperides.

This labor is a conquest of death. The apples are symbols of immortality, and the tree in the garden of the Hesperides is a kind of Tree of Life. As in the labor of Geryon, the journey to a mysterious place in the far west is really a journey to the realm of death.

On his journey to the garden of the Hesperides, Heracles killed the king of Egypt, Busiris, who would sacrifice all strangers to Zeus.¹⁵ In Libya he conquered the giant Antaeus, son of Ge and Poseidon, who would wrestle with those who came to his kingdom. He was invincible, since every time an opponent threw him he came in contact with his mother (Earth) and rose with renewed strength. Thus Antaeus had killed all comers and used their skulls in building a temple to his father, Poseidon. Heracles held him aloft and crushed him to death.

Some versions of this story take Heracles to the Caucasus Mountains. Here he found Prometheus chained to his rock and released him after killing the eagle that tormented him. Prometheus advised him to use Atlas in getting the apples and foretold the battle against the Ligurians. On this occasion, too, Prometheus took over the immortality of Chiron and satisfied Zeus by letting Chiron die in his place.

12. Cerberus The final labor was to fetch Cerberus, the three-headed hound of Hades. This labor is most clearly a conquest of death, and Heracles himself (in the *Odyssey*) said that it was the hardest of the Labors and that he could not have achieved it without the aid of Hermes and Athena. In the

Heracles Shows Cerberus to Eurystheus. Etruscan hydria from Caere, ca. 530 B.C.; height 17 in. The terrified Eurystheus leaps into a storage jar to escape from the Hound of Hades, which bares its three sets of teeth while its snakes furiously hiss at him. Heracles, with club and lionskin, strides forward confidently, guiding Cerberus with a leash. The humor in this splendid vase is remarkable. (*Musée du Louvre, Paris. Reunion des Musées Nationaux.*)

Underworld he wrestled with Cerberus, brought him back to Eurystheus, and then returned him to Hades.

In Hades, Heracles saw Theseus and Pirithoüs, chained fast because of their attempt to carry off Persephone. He was able to release Theseus, who out of gratitude sheltered him after his madness and the murder of Megara. He also saw the ghost of Meleager, whose sister, if he still had one living, he offered to marry. Meleager named Deïanira, "upon whose neck was still the green of youth, nor did she know yet of the ways of Aphrodite, charmer of men" (Bacchylides, *Epinician Ode* 5, 172–175). Thus the train of events was set in motion that led eventually to the death of Heracles.

In conclusion we translate a chorus from Euripides' *Heracles*, which tells of the great hero's Labors. This choral ode also reveals the nature of our sources

for Greek legends, where the dry facts are enlivened by poetic expression (Euripides, *Heracles* 352–427):

 I wish to offer a glorious crown for labors done, by singing the praises of him who descended into the darkness of earth's realm of shades—whether I am to call him the son of Zeus or of Amphitryon. For the renown of noble deeds is a joy to those who have died. First he cleared Zeus' grove of the lion; and he wore its tawny skin upon his back, with the fearful jaws of the beast framing his fair head.

He laid low the mountain race of savage Centaurs with his deadly arrows, slaughtering them with his winged shafts. The beautiful stream of Peneus was a witness and the vast extent of the plains without crops and the vales of Mt. Pelion and the places on the green glens of Homole—all haunts where they filled their hands with weapons of pine and, galloping as horses, brought fear to the land of the Thessalians.

He slew the dappled hind with golden horns and dedicated this ravaging plunderer to the huntress Artemis of Oenoë.

He mounted the chariot of Diomedes and mastered with the bit the four mares, who ranged wild in stables drenched in blood and reveled in their horrid feasts of human flesh with ravenous jaws.

In his labors for the king of Mycenae, he crossed over the banks of the silver-flowing Hebrus; and along the sea-cliff of Pelion, by the waters of the Amaurus, he killed with his bow Cynus, the guest-murderer who lived alone near Amphanaea.

He came to the western home of the singing maidens, to pluck from amid the golden leaves the fruit of the apple, and the fiery dragon who kept guard coiled around the tree, hard even to approach, him he killed.

He made his way into the farthest corners of the sea and made them safe for men who ply the oar.

Having come to the abode of Atlas, he extended his hand to support the vault of heaven in its midst, and by his manly strength held up the starry homes of the gods.

He crossed the swell of the Euxine Sea to the land of the Amazons, who rode in force where many rivers flow into Lake Maeotis. Mustering a band of friends from Hellas, he sought to win the gold-encrusted adornment of the warrior maid—the deadly booty of her girdle—and Hellas captured the renowned prize of the foreign queen, which is kept safe in Mycenae.

He seared the many heads of the deadly monster, the Lernaean Hydra, and dipped his arrows in its venom; with that he killed three-bodied Geryon, the herdsman of Erythia.

He won the glorious crown for these and other labors; and he sailed to the tearful realm of Hades—the final task of all.

OTHER DEEDS OF HERACLES

CYCNUS, SYLEUS, AND THE CERCOPESES

Heracles fought and killed a number of harmful beings. Cynus, son of Ares, used to rob men passing on their way through Thessaly to Delphi. Heracles,

helped by Athena and with Iolaüs as charioteer, killed Cycnus (who was helped by Ares) in single combat.¹⁶ Another robber was Syleus, who lived by the Straits of Euboea. Heracles destroyed his vineyard, in which Syleus compelled passers-by to work, and then killed Syleus himself.

Closer to folktale is Heracles' encounter with the Cercopes, whose home is placed in various parts of Greece or Asia Minor. They were a pair of dwarfs who

Heracles and the Cercopes. Limestone metope from Selinus, ca. 540 B.C.; height 58 in. Heracles looks straight at the viewer, like the bull in the metope from the same group (p. 376), and the faces of the Cercopes are also shown frontally. Despite the archaic formality of the composition, the hero's power is forcefully expressed. (Museo Nazionale, Palermo, Italy. Courtesy of Alinari/Art Resource, New York.)

spent their time playing tricks on people. They had been warned by their mother “to beware of the black-bottomed man.” Now as Heracles was asleep under a tree, they attempted to steal his weapons, but he caught them and slung them from a pole across his shoulders upside down. They thus had an uninterrupted view of his backside which, since the lionskin did not cover it, had been burned black by the sun. They joked about the sight so much that Heracles, himself amused, let them go. Later they tried to trick Zeus and were punished by being turned into either apes or stones.

HYLAS

Heracles was among the heroes who sailed on the *Argo*. But he was too important to be subordinate to other heroes in the saga, and so he soon dropped out of the expedition. In one version he went looking for the boy Hylas, whom he loved. When the *Argo* put in at Cios (in Asia Minor), Hylas went to a nearby spring to draw water, and the water-nymphs were so entranced by his beauty that they pulled him into the water, to remain with them forever. Heracles spent so long searching for him that the rest of the Argonauts sailed away without

Hylas and the Nymphs. By J. W. Waterhouse (1849–1917); oil on canvas, 1896, 38 × 63 in. The young Hylas is lured to his fate by seven water-nymphs. The artist brilliantly combines English Victorian ideals of female beauty and landscape (the latter in colors of great beauty) with psychological insight that anticipates Freud. (Manchester, England, City Art Gallery.)

him and he returned on his own to Argos. A cult of Hylas was established at Cios by Heracles. In late antiquity the people still searched for him annually, calling out his name.¹⁷

MILITARY EXPEDITIONS

Heracles took part in Zeus' battle against the giants, during which he slew the terrible Alcyoneus. He attacked Laomedon, king of Troy, and Augeas, king of Elis, who had both cheated him. He made an expedition against Neleus, king of Pylos, who had refused to purify Heracles after the murder of Iphitus. He killed eleven of the twelve sons of Neleus; the twelfth, Nestor, eventually became king of Pylos and took part in the Trojan War. According to Hesiod, one of the sons of Neleus was Periclymenus, to whom Poseidon had given the ability to transform himself into every sort of bird, beast, or insect. With the help of Athena, Heracles recognized him in the form of a bee settled upon the yoke of his horse-drawn chariot and shot him with an arrow.

In this expedition also, says Homer, Heracles wounded the god Hades, "in Pylos among the corpses" (*Iliad* 5. 395–397), as if the expedition were another conquest of death. Homer also mentions that Heracles wounded Hera, and says that this was another example of Heracles' violence—"brutal and violent man, who did not scruple to do evil and wounded the Olympian gods with his arrows" (*Iliad* 5. 403–404). This is an older view of Heracles, and is more likely to represent the character of the original mythical hero than that of Pindar, who makes the following protest (*Olympian Odes* 9. 29–36):

 How would Heracles have brandished his club with his hands against the trident, when, in defense of Pylos Poseidon pushed him back, and Apollo shook him and drove him back with his silver bow, nor did Hades keep his staff unmoved, with which he drives mortal bodies to the hollow ways of the dead? Hurl this story, my mouth, far away!

We can see that by Pindar's time (the first half of the fifth century B.C.) the transformation of Heracles was already well advanced, from the primitive strongman into a paragon of virtue. Heracles also made an expedition against Hippocoön, king of Sparta, and his sons, who had given assistance to Neleus. Iphicles was killed in this campaign. While returning home from Sparta, Heracles lay at Tegea with Auge, whose father, fearing an oracle that Auge's son would kill her brothers, had made her priestess of Athena. The son she conceived was Telephus, and mother and baby crossed the sea to Asia Minor floating in a chest. There Telephus eventually became king of the Mysians.¹⁸

In Thessaly, Heracles appeared as an ally of Aegimius, king of the Dorians, against the attacks of his neighbors, the Lapiths and the Dryopes. This legend brings Heracles back to central Greece, where the legends of the last part of his life are placed.

HERACLES, DEĪANIRA, AND IOLE

MARRIAGE TO DEĪANIRA

Some time after the completion of the Labors, Heracles fulfilled the promise he had made to the soul of Meleager, to marry his sister Deĭanira, daughter of Oeneus, king of Calydon. To win her Heracles had to wrestle with the river-god Acheloüs, who was horned like a bull and had the power of changing himself into different shapes. This is how Sophocles describes the scene (*Trachiniae* 513–525):

 They came together desiring marriage; alone between them as umpire was Aphrodite, maker of marriages. Then was there confusion of sounds, the beating of fists, the twang of bow, the clash of bull's horns. There were the wrestling holds, the painful collision of heads, and the groans of both. But she, the prize, fair and delicate, sat afar upon a hill, waiting for him who was to be her husband.

In the struggle Heracles broke off one of Acheloüs' horns; and after his victory, he gave it back, receiving in return the miraculous horn of Amalthea, which could supply its owner with as much food and drink as he wished.¹⁹ Heracles returned with Deĭanira to Tiryns. On the way the centaur Nessus carried Deĭanira across the river Evenus. He attempted to violate her, but Heracles shot him with his bow (see Color Plate 9). As he was dying he advised Deĭanira to gather some of the blood that flowed from his wound, which had been caused by an arrow that had been dipped in the Hydra's poison. It would, he said, prevent Heracles from loving any other woman more than he loved Deĭanira. She therefore kept the blood, and for a number of years she and Heracles lived at Tiryns, where she bore him children, including a son, Hyllus, and a daughter, Macaria.

IOLE

But Heracles fell in love with Iole, daughter of Eurytus, king of Oechalia, who had once taught Heracles archery. Eurytus refused to let him have Iole, even though he won an archery contest that was to decide whose wife (or concubine) Iole should be. Heracles returned to Tiryns, bitter at the insult, and when Iphitus, brother of Iole, came to Tiryns in search of some lost mares Heracles threw him from the citadel to his death. For this murder, he had to leave Tiryns, going first to Pylos, where Neleus refused to purify him. Having obtained purification at Amyclae, he went to Delphi to find out what more he should do to be cured of the madness that had caused him to kill Iphitus. When the Pythia would not reply he attempted to carry off the sacred tripod, intending to establish an oracle of his own. Apollo himself wrestled with him to prevent this, and their fight ended when Zeus threw a thunderbolt between them. Finally Heracles ob-

Heracles and Apollo Struggle for the Pythian Tripod. Attic red-figure amphora attributed to the Geras Painter, ca. 480 B.C.; height 22 in. Heracles rushes off holding the tripod and threatening Apollo with his club. He wears the lionskin and a bow and quiver are slung in front of him. On the left stands Athena, wearing the aegis and holding a crested helmet and spear. Apollo grasps the tripod with his left hand (which also holds his bow and arrows; the quiver is on his back) and with his right restrains Heracles' club. He wears the laurel wreath and hunter's clothing and boots, appropriate for the god who has slain Python with his arrows. The deer is also a lively hunting motif. (Collection of the J. Paul Getty Museum, Malibu, California.)

tained the advice he had asked for, which was that he must be sold as a slave and serve for one year.

OMPHALE

Accordingly Hermes auctioned Heracles, and he was bought by Omphale, queen of the Lydians; he served her for a year and performed various tasks for her in keeping with his heroic character. Later versions, however, make Heracles perform women's work for the queen and picture him dressed as a woman and spinning wool. At the end of his year, he mounted the expedition against Troy and then returned to Greece, determined to punish Eurypyus and to win Iole.

The Death of Nessus. Detail of an Attic black-figure amphora, ca. 620 B.C.; height of vase 48 in., of painting 14 in. The scene is painted on the neck of the vase, with owls, a swan, and a pigeon on the handles. The names of Heracles (written right to left) and Nessus (spelled "Netos") are given. Heracles finishes Nessus off with a sword, grasping his hair and violently thrusting his left foot into the Centaur's back. He ignores the pleas of Nessus for mercy, shown by the gesture of touching the chin. The hero does not wear the lionskin, nor does he carry his club and bow. (National Archaeological Museum, Athens, Greece/Foto/Marburg/Art Resource, New York.)

THE DEATH OF HERACLES

Deianira, meanwhile, was living in Trachis, where King Ceyx had received her and Heracles after they left the Peloponnese. According to Sophocles, whose *Trachiniae* is the most important source for the last part of Heracles' life, she knew nothing of Oechalia and Iole until the herald Lichas brought news of the sack of the city. She had not seen Heracles for fifteen months, before his servitude to Omphale. In this account Heracles killed Eurytus and sacked Oechalia on his way back from Asia, sending Iole and the other captive women back to Trachis with Lichas. When she realized that Heracles loved Iole, Deianira, hoping to win him back, dipped a robe in the blood of Nessus and sent it to Heracles by Lichas' hand for him to wear at his thanksgiving sacrifice to Zeus.

As the flames of the sacrificial fire warmed the poisoned blood, the robe

clung to Heracles and burned him with unendurable torment. In his agony, he hurled Lichas to his death in the sea and had himself carried back to Trachis, where a huge funeral pyre was made for him upon Mt. Oeta. Deianira killed herself with a sword when she realized what she had done, while Hyllus went with his father to Oeta. There Heracles instructed Hyllus to marry Iole after his death and gave his bow to the shepherd Poeas (father of Philoctetes), since he alone had dared to light the pyre. So the mortal part of Heracles was burned away and he gained immortality, ascending to Olympus, there to be reconciled with Hera and to marry her daughter Hebe. This is Pindar's version (*Isthmian Odes* 4. 61–67):

 To Olympus went Alcmena's son, when he had explored every land and the cliff-girt levels of the foaming sea, to tame the straits for seafarers. Now beside Zeus he enjoys a perfect happiness; he is loved and honored by the immortals; Hebe is his wife, and he is lord of a golden palace, the husband of Hera's daughter.

Sophocles' *Trachiniae* ends with Heracles, in torment, being carried from his palace to the pyre on Mt. Oeta. In this scene, Hyllus says: "No one foresees what is to come" (1270), thus leaving the destiny of Heracles shrouded in ambiguity. Ovid's description is explicit (*Metamorphoses* 9. 239–272):

 And now . . . the flames were attacking the limbs that did not fear them and him who despised them. The gods were anxious for earth's champion [Hercules] and them did Jupiter . . . in happiness thus address: "Your fear is my joy, O gods . . . let not your hearts tremble with empty fear, despite Oeta's flames! He who conquered all will conquer the flames which you see, and only his mother's part will feel the power of Vulcan [i.e., fire]. That part which he inherited from me is immortal, immune to death, impervious to fire, and it will I receive in the heavens when its time on earth is done. . . ." The gods approved. Meanwhile Vulcan had consumed all that fire could consume, and the recognizable form of Hercules was no longer to be seen. He kept no part of himself that came from his mother, and he kept only the features drawn from Jupiter. . . . So, when the hero of Tiryns had put off his mortal body, his better part kept its vigor. He began to seem greater in size and awe-inspiring with august dignity. The almighty Father received him as he ascended into the surrounding clouds in a four-horse chariot, and placed him among the shining constellations.

HERACLES: MAN, HERO, AND GOD

Odysseus describes his meeting with the ghost of Heracles in this way (Homer, *Odyssey* 11. 601–603):

 Then saw I mighty Heracles—his ghost, but he himself delights in feasting among the immortal gods, with fair-ankled Hebe for his wife.

In this very early passage, the ambiguity of Heracles' status as man and god is evident. That he was a man before he became a god is shown by his name

The Apotheosis of Hercules, by Peter Paul Rubens (1577–1640). Oil on panel, 1636; $11 \times 12\frac{3}{4}$ in. In this oil sketch for Philip IV's hunting lodge near Madrid, Rubens represents Ovid's narrative at the moment when Hercules ascends from the pyre to Olympus. The flames can be seen at the bottom left and the bulky hero (Ovid says that "he began to seem greater in size") climbs on the chariot provided by Jupiter. A flying putto puts the victor's wreath on his head, and a second guides the chariot. Rubens does not show Jupiter, so as not to detract from the focus on the triumphant hero. (*Musées Royaux des Beaux-Arts de Belgique, Brussels.*)

(which means "glory of Hera"), since Greek gods do not form their names from compounds of other gods' names.

Since his legend is particularly associated with Argos, Mycenae, and Tiryns, his saga may have had its origin in a prince of Tiryns who was vassal to the lord of Mycenae. This fits with the theme of subservience to Eurystheus. But other areas with which he is especially associated are Boeotia (the traditional setting of his birth and of a group of his exploits) and Trachis, scene of his final exploits and death.

This leads to one of two possibilities: either legends of the hero of Tiryns spread to Boeotia and other parts of Greece, where his fame attracted local leg-

ends, or else he was brought into Greece by early settlers from the north and his fame spread all over Greece. The latter explanation seems the more acceptable, but it has led many people to believe wrongly that Heracles was a Dorian hero, brought in by invaders who entered Greece at the end of the Mycenaean Age. It is better to suppose that Heracles is an older hero common to all the Greek peoples but associated more with certain areas (Argos, Thebes, Trachis) than with others. Thus we find his exploits covering the whole of the Greek world and his legends and cult flourishing in areas of Greek colonization, such as Asia Minor and Italy (where as Hercules he passed into the Roman state religion).

Many people have thought of him primarily as a god. Herodotus believed that Heracles the god was quite distinct from Heracles the man and that the god was one of the twelve ancient gods of Egypt. He himself even traveled to the Phoenician city of Tyre, whose chief god, Melkart, was identified with Heracles, to find support for his theory. Since the mythology of Melkart is virtually unknown, the similarities between him and Heracles remain unclear; nor can we establish the exact relationship between Heracles and other Oriental figures with whom he shares many similarities, for example, the Israelite hero Samson, the Mesopotamian Gilgamesh, and the Cilician god Sandas. These figures may have contributed elements toward the Greek hero's legend. In general, it is safe to reject Herodotus' theory and accept the nearly unanimous view of the ancients that Heracles the man became a god.

Still, the origins of Heracles are a subject of great interest. The similarities to the Eastern figures mentioned are undeniable, as are similarities to the Indian hero Indra, who killed the three-headed monster Visvarupa and released the cattle penned in his cave. The monsters that Heracles overcame, such as the lion and the many-headed Hydra, belong more to Eastern mythology, yet Heracles is very definitely a Greek hero, and his myths are Greek traditional tales. Many different tales, then, have become attached to the hero called Heracles. The process can be seen in the large number of *parerga* that cluster around several of the Labors. Some of the myths have a structure consistent with Propp's Quest (see pp. 13–14), and in these the basic structure of the myth remains, despite its varied appearances. The primitive origins of much of Heracles' mythology are apparent from his violence and brutality. His association with many different types of animals has led some scholars to see in him a kind of "Master of Animals," not least because of his association with cattle, the chief source of food in a pastoral society. There is much that is persuasive in Walter Burkert's conclusion:

*Heracles is, basically, not a heroic figure in the Homeric sense: he is not a warrior fighting warriors, he is mainly concerned with animals, just as he is a savage clad in a skin; and his main job is to tame and bring back the animals which are eaten by man.*²⁰

The Greek hero, son of Zeus and exemplar of strength and patience, is also the man wielding the primitive weapon of the club and wearing the lionskin, whose origins lie perhaps far from Greece and certainly in a time long before the development even of Mycenaean culture.

The Choice of Heracles. By Annibale Carracci (1560–1609); oil on canvas, 1596, 65³/₄ × 93¹/₄ in. Formerly the central painting in the ceiling of the *camerino* (private office) of the Farnese Palace, Carracci's painting is a lucid interpretation of Prodicus' parable. Heracles, identified by his club and lionskin, ponders the choice between Pleasure (to the viewer's right), whose attributes include an actor's mask and a musical instrument. On the other side, Virtue, holding a sheathed sword, points to the rocky upward path, at the top of which stands Pegasus. At the bottom left a poet sits ready to record the deeds of the hero, whose eyes indicate that he has already made his choice of Virtue. In the central background is a palm tree, source of the future victor's wreath. (Naples, Galleria di Capodimonte.)

So diverse a character attracted a variety of interpretations and uses. Indeed, as Aristotle pointed out in the *Poetics* (8), his very diversity made it impossible for a unified epic or tragedy to be written about him. Only three extant Greek tragedies deal with his legend—Sophocles' *Trachiniae* and Euripides' *Heracles* and *Alcestis* (the latter almost incidentally). To the comic poets like Aristophanes, he is good material for slapstick; in the *Frogs*, for example, he is largely motivated by gluttony and lust.

More significant was the use made of his virtues by the moralists and philosophers, to whom he became a model of unselfish fortitude, laboring for the good of humankind and achieving immortality by his virtue. This process is best typified by the famous parable told by Prodicus of Ceos:²¹ As a young

man, Heracles was faced with the choice between two women, representing Vice (with ease) and Virtue (with hardship), and chose the latter. Heracles was especially important as a paradigm of virtue in Roman Stoicism, whose doctrines set high value on the Heracleian qualities of endurance and self-reliance. In a modern setting, the character of Harcourt-Reilly in T. S. Eliot's *The Cocktail Party* (1949) combines the Heracles of the myth of Alcestis with the virtues of a Christ-like hero.

Perhaps we would do better to leave Heracles by returning to the ancient invocation to him in the *Homeric Hymn to Heracles, the Lion-Hearted* (15); here we may focus on the man who after a lifetime of toil became a hero and a god:

 Of Heracles will I sing, son of Zeus, whom Alcmena bore in Thebes, city of delightful dances, when she had lain with the son of Cronus, lord of the dark clouds, to be by far the greatest of men on earth. He traversed long ago vast distances of land and sea at the order of King Eurystheus; many were the bold deeds he did, many were the things he endured. Now he dwells in joy in the beautiful palace of snowy Olympus and has for wife slender-ankled Hebe. Hail, lord, son of Zeus. Grant [me] both excellence and wealth.²²

THE HERACLIDAE

ALCMENA, EURYSTHEUS, AND THE CHILDREN OF HERACLES

After the death of Heracles, his mother Alcmena and his children were persecuted by Eurystheus. King Ceyx was unable to protect them and they fled to Athens. The Athenians fought Eurystheus, who died in battle with his five sons. His head was brought to Alcmena, who gouged out the eyes with brooches.

According to Euripides, however, in his drama *Heraclidae*, Alcmena and her grandchildren were received at Athens by King Demophon, son of Theseus. Demophon was ordered "by all the oracles to sacrifice a virgin, daughter of a noble father, to the daughter of Demeter [Persephone], to be the defeat of our enemies and the salvation of the city" (*Heraclidae* 407–409, 402). Macaria, daughter of Heracles, voluntarily offered herself for the sacrifice and so brought victory to the Athenians. In the battle, Iolaüs, the nephew of Heracles, was miraculously rejuvenated by Heracles and Hebe and pursued Eurystheus, whom he captured and brought back to Alcmena. The play ends with Alcmena gloating over her prisoner and ordering him off to be executed. With his last words Eurystheus prophesies that his body, if it were buried in Attica, would protect the land from invaders.

Yet another version was given by Pindar (*Pythian Odes* 9. 79–84):

 Seven-gated Thebes knew that the Right Time (*Kairos*) favored Iolaüs. Him they buried, after he had cut off the head of Eurystheus with his sword, deep in the earth in the tomb of Amphitryon the charioteer. His grandfather [Amphitryon] lay there, guest of the Spartoi, who lived as a foreigner in Cadmeia, city of white horses.

Hercules Prodicus. Engraving by T. van Thulden after a design by Peter Paul Rubens, from C. Gevartius, *Pompa Introitus Ferdinandi*, Antwerp, 1642. The virtuous hero of Prodicus' parable of the Choice of Heracles is at the center of baroque political allegory. The victorious Archduke Ferdinand, wearing Heracles' lionskin and holding his club, refuses the temptations of women representing Love and Pleasure (a cupid tugs at the lionskin), as he prepares to ascend the rocky path of Virtue pointed out to him by Athena, toward the temple of Virtue and Honor. The allegory is set in a triumphal arch erected over the processional way along which Ferdinand made his "Joyful Entry" into Antwerp in 1635 after his victory at Nördlingen, to which the cannon at the lower right of the panel alludes. (*The Library of Congress, Washington, D.C.*)

The Farnese Hercules. Marble copy by Glycon, early third century A.D., of an original by Lysippus, mid-fourth century B.C.; height 125 in. This huge statue was found in the Baths of Caracalla at Rome, for which it had been specially copied. The weary hero leans on his club, which rests on a stump over which the lionskin is draped. His vast body is bursting with mountainous muscles. It has been suggested (by M. Robertson) that he is "an athlete in decay"; more likely his stance is one of weariness after his labors. (*Museo Archeologico Nazionale, Naples, Italy/Alinari/Art Resource, New York.*)

Hercules Victor (The Farnese Hercules), by Hendrik Goltzius (1558–1617). Engraving 1589; published 1617. Goltzius's engraving shows the overmuscled body of the hero from the rear, clutching the Apples of the Hesperides in his right hand. The two contemporary observers emphasize the vastness of his body silhouetted against the sky. The Latin iambic lines (to the left and right of the caption) say: "I, Hercules, terror of the world, rest, weary after subduing the three-formed king [Geryon] of further Spain and after taking the apples from the turning-point of Hesperus, where the never-sleeping serpent had guarded them in gardens of gold." (*The Metropolitan Museum of Art, New York, Gift of Henry Walters, 1917.*)

In this version, Iolaüs killed Eurystheus, and his body, rather than that of Eurystheus, protected the foreign land that had welcomed him—in this case Thebes (which was Pindar's own city).

Alcmena herself also became associated with a cult. In one version, she died in Thebes and was transported by Hermes to the Elysian Fields, where she mar-

ried Rhadamanthys, brother of Minos. In the version of Apollodorus, she married Rhadamanthys in Thebes after the death of Amphitryon and was reunited with him in the Underworld. As she was being carried out to burial in a coffin Hermes, at the command of Zeus, substituted for her body a large stone, which the sons of Heracles discovered (for the coffin had suddenly become very heavy) and set up in a shrine sacred to her.²³

THE RETURN OF THE HERACLIDAE

The saga of the descendants of Heracles (the Heraclidae) explains the occupation of a large part of the Peloponnese by Dorian tribes in the period after the end of the Mycenaean Age. Hyllus married Iole as his father had commanded and consulted Delphi about his return to the Peloponnese. He was advised to wait "until the third fruit" and that victory would come "from the Narrows." After waiting two more years, he attacked by way of the Isthmus of Corinth. He himself was killed in single combat by Echemus, king of Tegea; his army withdrew, and a truce of one hundred years was agreed upon. At the end of that time, the Heraclid Temenus again consulted the oracle, who told him that the "third fruit" meant not the third harvest but the third generation, and that "the Narrows" meant the entrance to the Gulf of Corinth. Temenus therefore invaded the northwest Peloponnese, crossing over near Patrae and taking as a guide a "three-eyed man" in accordance with the advice of the oracle; this was an Aetolian exile named Oxylus, whom he found riding a one-eyed horse. With his help, the Heraclids defeated the Peloponnesian defenders, who were led by Tisamenus, son of Orestes. Thucydides (1. 12) relates these events to the disruptions in Greece that followed the Trojan War and the return of the Greek leaders. He says that "the Dorians with the Heraclidae took possession of the Peloponnese in the eightieth year [after the fall of Troy]."

Thus the "Return of the Heraclidae" took place. The leaders divided up the three principal areas which they had conquered. Lacedaemon (Sparta) was given to Procles and Eurysthenes, sons of the lately dead leader Aristodemus, and they became founders of the two royal houses of Sparta. Argos fell to Temenus, and Messene to Cresphontes. Temenus was killed by his sons, whom he had passed over in the succession to his throne; Cresphontes was also murdered, along with two of his sons, by a rival Heraclid, Polyphontes. His widow, Merope, was forced to become Polyphontes' queen, but she succeeded in getting her surviving son Aepytyus out of the kingdom to Aetolia, where he grew up. Later he secretly returned to Messene and was recognized by Merope, with whose connivance he killed Polyphontes and recovered his father's throne. Of the three Dorian kingdoms, Sparta and Argos flourished for many centuries, but Messene was subjugated by the Spartans within a comparatively short time.

NOTES

1. The Greek form of his name, which means "glory of Hera," is used here. Its Latin form is Hercules. He is also called Alcides (i.e., descendant of Alcæus) and sometimes Amphitryoniades (i.e., son of Amphitryon).
2. Licymnius, surviving son of Electryon, was later killed by a son of Heracles.
3. According to Apollodorus, Amphitryon was helped by Creon after ridding Thebes of a monstrous fox with the aid of Cephalus and his magic hound (see pp. 551–552).
4. Eileithyia sat outside Alcmena's door with her hands clasped around her knees in a gesture of sympathetic magic. Alcmena's servant Galanthis broke the spell by rushing out crying, "My mistress has borne a son!" Eileithyia leaped up and unclasped her hands, and the birth took place. She punished Galanthis by turning her into a weasel.
5. Eurytus was grandson of Apollo and king of the Euboean city of Oechalia. See p. 536 for his death at the hands of Heracles.
6. The Cattle of Geryon, the Apples of the Hesperides, and Cerberus.
7. Although female, the hind is always shown with horns. Euripides makes the hind destructive, and some authors call it the Cerynitian hind, from the Achaean river Cerynites.
8. Atlas was the name of a mountain in Arcadia as well as of the more famous range in North Africa.
9. The hind is shown beside the tree of the Hesperides in a vase painting.
10. *Parerga* are adventures incidental to the labors.
11. Pausanias attributes the founding of the games to "Heracles the Dactyl," an attendant of the great Cretan goddess. He had nothing to do with the Greek hero Heracles.
12. The attributes of the birds vary with the imagination of individual authors. See D'Arcy W. Thompson, *Glossary of Greek Birds*, 2d ed. (New York: Oxford University Press, 1936), p. 273. The birds are later encountered by the Argonauts on the Island of Ares (see p. 578).
13. The killing of Cacus is one of the *parerga* to this labor. It is told by Vergil (see pp. 631–632).
14. The Agathyrsi and Geloni were tribes to the north of Scythia, which was the area between the Danube and the Don.
15. His name means "the house of Osiris." Herodotus points out that the Egyptians did not practice human sacrifice.
16. In another version Zeus throws a thunderbolt between Cynus and Heracles.
17. Vergil describes this in the sixth *Eclogue* (6. 44): *ut litus Hyla, Hyla omne sonaret.*
18. There are many variants of the legend of Telephus, about whom both Sophocles and Euripides wrote tragedies.

19. This is the *cornu copiae* (horn of plenty). Amalthea is the name of a goddess of Plenty and of the goat that suckled the infant Zeus. Ovid says that the horn of Acheloüs became the cornucopia when the Naiads picked it up and filled it with fruit and flowers.

21. Xenophon, *Memorabilia* 2. 21–34; Cicero, *De Officiis* 1. 118. The parable has been very important in Western art: see E. Panofsky, *Hercules am Scheideweg* (Leipzig, 1930).
22. For further discussion, see L. R. Farnell, *Greek Hero-Cults and Ideas of Immortality* (New York: Oxford University Press, 1921), Chapters 5–7, and G. Karl Galinsky, *The Herakles Theme* (Oxford: Basil Blackwell, 1972). The best discussion is that of Burkert, *Structure and History*. For Heracles in art, see Frank Brommer, *Herakles*, 2 vols. (Darmstadt: Wissenschaftliche Buchgesellschaft, 1972–1984); vol. 1 has been translated by Shirley J. Schwarz as *Heracles: The Twelve Labors of the Hero in Ancient Art and Literature* (New Rochelle: Caratzas, 1984). See also Jane Henle, *Greek Myths: A Vase Painter's Notebook* (Bloomington: Indiana University Press, 1973), pp. 231–238.
23. For the different versions of her myth, see J. G. Frazer's notes on pp. 181–182 and 303 in vol. 1 of his edition of *Apollodorus* (Cambridge: Loeb Classical Library, Harvard University Press, 1961 [1921]).

THESEUS AND THE LEGENDS OF ATTICA

THE EARLY KINGS AND THEIR LEGENDS

CECROPS, ERICHTHONIUS, AND ERECHTHEUS

The Athenians boasted that they were autochthonous (literally, "sprung from the earth"), that is, that they were not descended from any invaders of Attica. They said that Cecrops, their earliest king, had sprung from the earth and was serpent-shaped in the lower half of his body. He has little importance in legend except as the founder of Attica, which he called Cecropia after himself. It was in his time that the contest between Poseidon and Athena for the possession of Attica took place (see p. 159). Poseidon continued to be an important divinity at Athens, and his worship on the Acropolis was closely connected with that of Athena.

Another early figure in Attic mythology is Erichthonius, who was also partly serpent-shaped and (as the element *-chthon-* in his name implies) sprung from the earth. When Hephaestus attempted to violate Athena, his semen fell on the ground, and from it sprang Erichthonius. Athena took him up and put him in a chest, which she gave to the daughters of Cecrops, Pandrosos, Auglauros, and Herse (or only to Pandrosos), forbidding them to look inside. The sisters disobeyed (see Color Plate 8): driven mad by what they saw (either a pair of snakes or Erichthonius with his snakelike body), they hurled themselves off the Acropolis.¹ After this, Athena took Erichthonius back and brought him up herself. As king of Athens he was credited with instituting the great annual festival of the Panathenaea and setting up the wooden statue of Athena on the Acropolis.

Erichthonius' myth focuses upon his birth, the most important feature of which is that he was "sprung from the earth." He is to some extent confused with his grandson and successor as king of Athens, Erechtheus. Both are in fact forms of Poseidon. Athena prophesied that after his death Erechtheus would be worshiped at Athens with his own cult-site, "ringed around with stones," and that under the title of "Poseidon-Erechtheus he will be offered sacrifices of bulls."²

Toward the end of the fifth century, the beautiful temple on the Acropolis known as the Erechtheum was dedicated jointly to Athena Polias (i.e., Athena

Figure 23.1. The Royal Families of Athens

as Guardian of the City) and Erechtheus.³ In it were sacred objects associated with the earliest stages of Athenian religion, including the wooden statue of Athena, the tomb of Erechtheus, and the salt spring produced by the blow of Poseidon's trident in his contest with Athena, which was known as "the sea of Erechtheus." In this "sea" were the marks of Poseidon's trident where he struck the earth, and linked to the sanctuary was the olive tree produced by Athena. The temple took the name by which it is generally known, Erechtheum, from Erechtheus-Poseidon; but in antiquity it was known officially as "the temple in which is the ancient statue."

Thus the Erechtheum and its neighboring shrines were closely bound up with the most ancient myths of Athens. It was built upon the Acropolis, the site of the Mycenaean fortress of Athens, and so it linked Athenians to the earliest stages of their city's history. Athena, the great Olympian protectress of the city, here was associated with both her rival Poseidon and her predecessor, the chthonic divinity Erechtheus. Her triumph in the struggle for the honor of protecting the city was visible nearby in the sculptures of the west pediment of the Parthenon.

Erechtheus was important in the mythology of Athens. He successfully defended Athens in her earliest war, the attack of the Eleusinians led by the Thracian Eumolpus, who was a son of Poseidon and ancestor of the hereditary priests of Eleusis. With the approval of his wife, Praxithea, Erechtheus sacrificed one

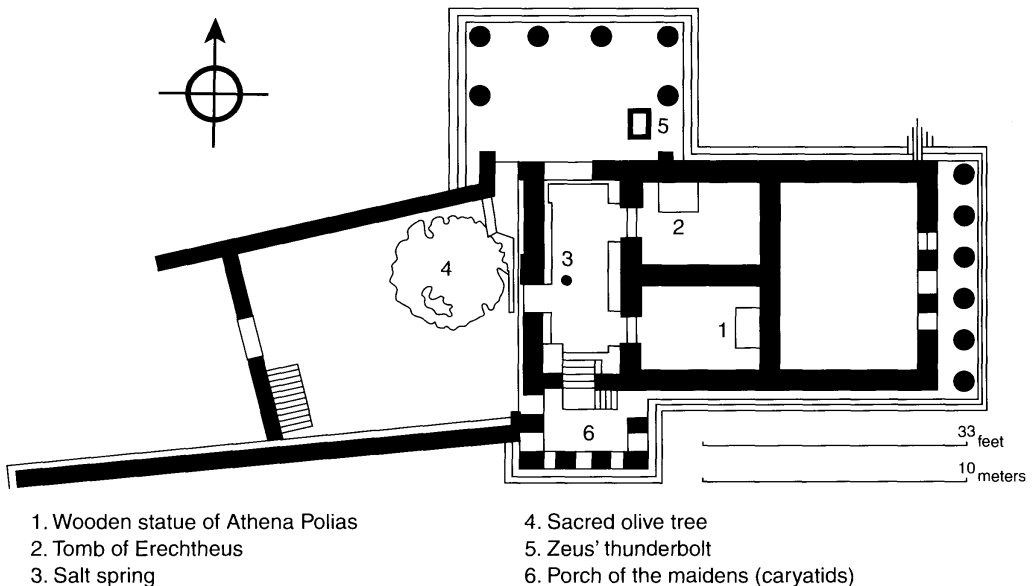

Figure 23.2. Plan of the Erechtheum (After W. B. Dinsmoor)

(or all three) of his daughters to secure the victory for Athens,⁴ a myth that has been argued to be the subject of the frieze of the Parthenon (see box on p. 161). In the battle he killed Eumolpus, and for this was himself killed by Poseidon, who thrust him into the earth with his trident. The sacrifice of the daughter was a central theme in Euripides' tragedy *Erechtheus*, in which Praxithea played a prominent part.⁵

In Euripides' tragedy *Ion*, Ion's mother, Creusa, one of Erechtheus' daughters, gives a different version, in which all the daughters of Erechtheus were sacrificed except for herself (*Ion* 277–282):

-  ION: Did your father Erechtheus sacrifice your sisters?
 CREUSA: He hardened himself to kill the maidens as a sacrificial offering for the earth.
 ION: How then were you saved alone amongst your sisters?
 CREUSA: I was a newborn baby in my mother's arms.
 ION: And does a chasm in the earth truly hide your father?
 CREUSA: Yes—blows from the ocean-god's trident killed him.

As a final reminder of the importance of Erechtheus in Athenian mythology and the pride of the Athenians in being autochthonous, we quote from the opening lines (824–830) of the beautiful chorus in praise of Athens that Euripides composed for his tragedy *Medea*.⁶

-  The descendants of Erechtheus are fortunate from of old and children of the blessed gods, [dwelling in] a holy land that has never been conquered, feeding on most famous wisdom and walking lightly through the shining air.

We have earlier mentioned the daughters of Cecrops to whom Athena entrusted the infant Erichthonius (see Color Plate 8). They were three in number, Aglauros, Herse, and Pandrosos, whose names, meaning "bright," "dew," and "alldew," show that they are truly mythological beings, in origin fertility goddesses.⁷

Ovid tells how Herse was loved by Hermes, who was first noticed by Aglauros as he flew down to the Acropolis. Aglauros asked Hermes for gold as a reward for her help in bringing him to Herse. For this she further angered Athena, who was already angry because of her disobedience in looking inside the chest of Erichthonius. Athena therefore filled Aglauros with envy so that she tried to prevent Hermes from going in to Herse and he turned her into a rock. He then lay with Herse, and their son was Cephalus.

CEPHALUS AND PROCRIS

Cephalus was loved by Eos (Dawn) and was an ally of Amphitryon. In later legend he is the husband of Procris, daughter of Erechtheus. In Ovid's story, he was tempted by Aurora (the Latin form of Eos), who also loved him, to make trial of Procris' faithfulness (see Color Plate 11). In disguise he attempted to seduce her, and when he was on the point of succeeding, revealed himself. In shame Procris

fled and joined Artemis, who gave her a hound, Laelaps, that always caught its quarry, and a javelin that never missed its mark. Later she was reconciled to Cephalus and returned home, bringing with her the magic gifts. According to Ovid, the hound was turned into marble, along with its prey, when Cephalus was hunting near Thebes. The javelin had a longer and more tragic history. Here is part of Ovid's story (*Metamorphoses* 7. 804–859; Cephalus is the speaker):

When the sun's first rays had just begun to touch the topmost peaks, I used to go, like the young man I was, to the forest to hunt. No servants went with me, nor horses, nor keen-scented dogs trained to follow the knotted hunting nets—all I relied upon was the javelin. When my right hand had had enough of killing wild beasts, I would look for the cool shade and the breeze (*aura*) that came from the cold valleys. The gentle breeze would I call for in the midday heat; the breeze would I wait for, refreshment after my labors. "Come, Aura" (for I remember my words), would I sing, "assist me and most pleasing, enter my bosom; be willing to relieve as you do, the heat with which I burn."⁸ Perhaps I would add (for this way tended my fate) more endearments and would say, "You are my great pleasure; you restore and refresh me, you make me love the forest and solitary places; may your breath always be caught by my mouth."

Someone listening to my words with their double meaning was deceived; thinking the name of *aura* that I called upon so often was the name of a nymph, she believed that it was a nymph I loved. Soon a rash informer falsely charged me before Procris and repeated the murmurings she had heard. Love is credulous, yet often Procris hesitated and refused to believe the informer; she would not condemn her husband's crime unless she saw it herself.

The next dawn's light had driven the night away: I went to the forest and, successful in the hunt, lay on the grass and said, "Come, Aura, and give relief to my labor." Suddenly I thought I heard a sob as I spoke, yet still as I was saying, "Come, most excellent Aura," a fallen leaf rustled; and, thinking it was a wild animal, I hurled my javelin through the air. It was Procris; and as she held her wounded breast, she groaned "Ah, me." When I recognized the voice of my faithful wife, headlong I ran to her in dismay. I found her half dead, her blood staining her torn clothes, and plucking her own gift, alas, from the wound. Gently I lifted her body, dearer to me than my own . . . and implored her not to leave me, guilty of her death.

Weakened and on the point of death, with an effort she said these few words: "By our marriage vows . . . and by my love that still endures, the cause, even as I am dying, of my death, do not let Aura take my place as your wife." Those were her words, then finally I realized how she had mistaken the name, and told her of the mistake. Yet what use was it to tell her? She fainted away, and her feeble strength failed as her blood flowed out.⁹

PHILOMELA, PROCNE, AND TEREUS

The successor of Erichthonius was Pandion, who is famous in legend chiefly for his daughters Philomela and Procne. The Thracian king Tereus came to help

Pandion in a war against Thebes and was rewarded with the hand of Procne. He took her back to Thrace and by her became the father of Itys. Later Philomela came to visit her sister and was attacked by Tereus, who violated her, cut out her tongue, and shut her up in a remote building deep in the forest. Here is how Ovid continues the story (*Metamorphoses* 6. 572–600):

 What could Philomela do? Her prison, with its walls of unyielding stone, kept her from flight. Her mouth, dumb, could not tell of the crime. Yet sorrow is inventive, and cunning is an ally in distress. Skillfully she hung the threads from the barbarian loom and interwove purple scenes with the white threads, telling of the crime. She gave the finished embroidery to a servant and by signs asked her to take it to her mistress. The servant, not knowing what she was bringing, obeyed and took the embroidery to Procne. The cruel tyrant's wife unrolled the tapestry and read the unhappy saga of her own misfortunes. She held her peace (a miracle that she could!); sorrow restrained her words.

Now came the time when the Thracian matrons celebrated Bacchus' triennial feast; Night accompanied their rites. Queen Procne left her palace, garbed in the god's ritual dress and holding the instruments of his ecstasy. In a frenzy, with threatening looks, Procne rushed through the forest with a crowd of followers; driven by the madness of sorrow she pretended, Bacchus, that it was your madness. At length she reached the lonely prison and raised the Bacchic cry, *Evoe*; she broke down the doors, seized her sister, and put on her the Bacchic vestments, veiling her face with leaves of ivy. Dragging the stunned Philomela, Procne brought her sister to the palace.

Ovid then tells how Procne decides to revenge herself upon Tereus by murdering their son Itys (636–645):

 Without delay, Procne seized Itys. . . . In a distant part of the lofty palace, as he stretched out his hands (for he saw his fate before him) and cried, "Mother, mother," trying to embrace her, she struck him with a sword, where the chest meets the body's flank, and she did not look away. One wound was enough to kill him, but Philomela cut his throat with a knife. They tore apart his body, while it still retained vestiges of life.

Ovid describes, in considerable detail, how the sisters cooked Itys and served him up to Tereus, who recognized too late what he had eaten. The tale continues (666–674):

 Now Tereus drew his sword and pursued the daughters of Pandion: you would think that their bodies were clothed with feathers, and indeed they were. One flew to the forest; the other to the roof, and still the murder marked her breast and her feathers were stained with blood. Tereus, rushing swiftly in sorrow and in eagerness for revenge, turned into a bird with crested head; a long beak projects in place of his sword; the bird's name is Epops (Hoopoe), and its face seems armed.

In the Greek version of the story it is the nightingale (Procne) that mourns for her dead son, while the tongueless swallow (Philomela) tries to tell her story

by her incoherent chatter. The Latin authors, however, changed the names, making Philomela the nightingale and Procne the swallow.

THE *ION* OF EURIPIDES

Pandion was said to have been succeeded as king by Erechtheus, whose myths we discussed earlier. Among his daughters was Creusa, the heroine of Euripides' play *Ion*. Creusa was the only one of the daughters not to have been sacrificed by her father before the battle against Eumolpus. She was loved by Apollo and bore him a son, Ion, whom she exposed out of fear of her father. Ion was saved by Hermes at Apollo's request and taken by him to Delphi, where he was brought up as a temple servant and became treasurer of the sanctuary. Creusa, meanwhile, was given as wife to Xuthus as a reward for aiding Erechtheus in defeating the Chalcodontids of Euboea. After years of childlessness, Xuthus and Creusa consulted the Delphic oracle as to how they might have children; Xuthus was told to greet as his son the first person he met on going out of the temple.¹⁰ This person was Ion, but Creusa, who did not know that he was her own son, took him for a bastard son of Xuthus and attempted to kill him. The attempt miscarried, and with the intervention of Athena mother and son recognized each other. Xuthus, Creusa, and Ion returned together to Athens, where Ion became the ancestor of the four Ionic tribes (which were the main units of the early Athenian political structure). His descendants colonized part of the coast of Asia Minor and the islands, thereafter called Ionia.¹¹

ORITHYIA AND BOREAS AND THEIR CHILDREN

Another daughter of Erechtheus, Orithyia, was loved by the North Wind, Boreas. He carried her off to Thrace as she was playing by the river Ilissus.¹² In Thrace she became the mother of the winged heroes Zetes and Calais, and of two daughters, Cleopatra and Chione. Zetes and Calais were prominent in the Argonauts' expedition (see pp. 576–578). Phineus was married to Cleopatra, who was said to have caused the blindness of her stepsons (born to Phineus from another woman) by falsely accusing them of attempting to seduce her. Chione became the mother, by Poseidon, of Eumolpus, whose expedition against Athens we discussed earlier.

THE CONFUSED GENEALOGY OF THE KINGS OF ATHENS

According to Apollodorus, Erechtheus was succeeded by his son Cecrops, and Cecrops by his son Pandion; Cecrops and Pandion thus repeat the names of earlier kings. Pandion was driven out of Attica by his uncle Metion and fled to Megara, where he became the father of four sons: Aegeus, Pallas, Nisus, and Lycus. After Pandion's death, the four brothers recovered the throne at Athens and shared the power; Aegeus, however, as the oldest, was in effect the sovereign, while Nisus returned to Megara as its king.

THESEUS

Aegeus, like Erechtheus, is another form of the god Poseidon. This is indicated by his connection with the Aegean Sea and by the tradition that Poseidon rather than Aegeus was Theseus' father.¹³ As king of Athens he was threatened by the opposition of his brother Pallas. Being childless, he was told by the Delphic oracle "not to undo the wineskin's mouth" until he had returned home. Perplexed by this riddle, he asked the advice of Pittheus, king of Troezen, his host on the journey. Pittheus, who understood the oracle, made Aegeus drunk and gave him his daughter Aethra to lie with.¹⁴ When Aegeus left Troezen, he told Aethra that if their child were a boy she must bring him up without saying who his father was. She was to send him to Athens when he was old enough to lift a rock by himself, under which Aegeus would leave a sword and a pair of sandals as tokens by which he could recognize his son. In due time Aethra bore a son, Theseus, who grew up and set out for Athens after securing the tokens.

Theseus is the great national hero of Attica, and Athens came to be the focal point of his legends. His earlier links with Marathon and Troezen were weakened. He is associated with Heracles in some of his adventures, and his deeds are similar to those of Heracles—for example, his ridding the land of brigands and monsters and his expedition against the Amazons. Some of the characters in his saga were themselves heroes with cults of their own, for example, Sciron and Hippolytus. The legends of Theseus have become famous largely through the genius of Athenian writers.¹⁵

THESEUS' SIX LABORS ON HIS JOURNEY FROM TROEZEN TO ATHENS

The adventures of Theseus fall into fairly well defined groups,¹⁶ of which the first contains six deeds he performed while traveling to Athens from Troezen. Theseus chose the land route so as to expose himself to the challenge of more dangerous adventures.

At Epidaurus he killed the brigand Periphetes, a son of Hephaestus, who was armed with a club and generally called Corynetes (Club Man). Theseus took the club for himself, and it plays no further part in his legend (except in artistic representations).

At the Isthmus of Corinth, he killed the robber Sinis, called Pityocampetes (Pine Bender) from the way in which he killed his victims. He would bend two pine tree saplings to the ground, tie one end of his victim to each of the two trees, and then release the trees. Theseus killed him in this way.

On the border of the Isthmus and the Megarid he killed a monstrous sow near the village of Crommyon. Next he found the brigand Sciron barring his way at the so-called Cliffs of Sciron. Sciron, originally a local hero of neighboring areas,¹⁷ blocked the path along which travelers through the Megarid must

The Labors of Theseus. Attic red-figure kylix, ca. 475 B.C.; height of kylix 5 in.; diameter $12\frac{3}{4}$ in. The cycle of Theseus' labors was often painted on Athenian vases, especially drinking cups (*kylikes*), in the fifth century. This cup is unusual in that the cycle is painted (almost identically, except for the Minotaur) on both the exterior and interior. The interior, with the Minotaur at the center, is shown here. Starting at the top and going in a clockwise direction the labors are: (1) Cercyon; (2) Procrustes; (3) Sciron (note the turtle); (4) the Bull of Marathon; (5) Sinis (*Pityocampetes*); (6) the Sow of Crommyon. At the center Theseus drags the dying Minotaur out of the Labyrinth to dispatch him with his sword. Periphetes does not appear, since this labor does not enter the cycle until after 475 B.C. (*British Museum, London. Reproduced by permission of the Trustees.*)

go to pass the cliffs and compelled all comers to stoop and wash his feet. He would then kick his victims into the sea, where a gigantic turtle ate them up. Theseus killed him by his own methods.

Drawing closer to Athens, Theseus met Cercyon at Eleusis. Like Sciron, Cercyon was also originally a local hero. He compelled travelers to wrestle with him to the death. Theseus defeated him in wrestling, held him high in the air, and then dashed him to his death upon the ground.

Finally, between Eleusis and Athens, Theseus met the brigand Procrustes (his name means "the stretcher"),¹⁸ who possessed a hammer, a saw, and a bed. He compelled travelers to lie on the bed, and those who were too long for it he would cut down to size; those who were too short he would hammer out until they fit it exactly. He too perished at Theseus' hands in the way in which he had killed his victims.

THESEUS IS RECOGNIZED BY AEGEUS

Theseus' arrival at Athens is dramatically described by the lyric poet Bacchylides of Ceos. In reply to the citizens' questions, Aegeus speaks (Bacchylides, *Dithyramb* 18. 16–60):

 "A messenger has come, traversing the long road from the Isthmus; incredible are the deeds of a mighty man that he relates. This man killed violent Sinis, strongest of mortals. He killed the man-slaying sow in the glens of Crommyon and killed the cruel Sciron. The wrestling ring of Cercyon has he suppressed; Procoptes [Slicer, i.e., Procrustes] has dropped the mighty hammer of Polype-mon [Troubler, i.e., Procrustes' father?], for he has met a more valiant man. I fear what this news portends." "Who is this man?" [ask the citizens, and Aegeus continues]: "Two companions only come with him, says the messenger; upon his shoulders he wears an ivory-hilted sword and in his hand he carries two polished spears; upon his red-haired head is set a Spartan cap, well-made; around his body he has cast a purple tunic and over it a woolen cloak from Thes-saly. From his eyes darts blood-red flame, as from Lemnos' volcano. Yet he is but a youth in his first prime, whose skill is in the delight of war and the brazen blows of battle. In quest of shining Athens does he come."

Theseus' arrival was hedged with further danger. Aegeus was married to Medea, who expected their son Medus to succeed as king of Athens. Medea immediately recognized Theseus as Aegeus' son and a rival to Medus, and attempted to have Theseus poisoned before Aegeus could recognize him. She advised Aegeus that the newcomer would be a threat to his power. He should entertain Theseus at a banquet where he would drink poisoned wine, for which Medea would provide the poison. Theseus at the banquet carved his meat with the sword that he had recovered from under the rock at Troezen; Aegeus recognized the sword, dashed the cup of poison out of Theseus' hand, and publicly recognized him as his son and successor.

Pallas, brother of Aegeus, and his sons had hoped and plotted to take over Aegeus' power and resorted to violence upon Theseus' recognition. Theseus killed all the members of one of the two groups into which they had divided, and Pallas himself and his surviving sons ceased to be a threat.

THE BULL OF MARATHON

Theseus' next labor was to catch the bull of Marathon, said to have been the one that Heracles had brought from Crete. He mastered the bull and drove it back

to Athens, where he sacrificed it to Apollo Delphinus. On his way to Marathon an old woman, Hecale, entertained Theseus. She promised she would sacrifice to Zeus if Theseus returned successful, but on his return he found her already dead and ordered that she share the honors henceforth paid to Zeus Hecalus at a local annual festival.

THE MINOTAUR

Androgeos, son of the Cretan king Minos, had been killed in Attica because of the jealousy he aroused by winning all the contests at the Panathenaic games. In revenge Minos mounted an expedition against Athens and her ally, Megara, where Nisus, brother of Aegeus, was king. Megara was attacked first, and some time after its fall Athens made a treaty with Minos, with the provision that at intervals (of one or nine years) seven Athenian youths and seven girls, children of noble families, should be sent to Crete as tribute, there to be shut up in the Labyrinth and devoured by the Minotaur. The victims were chosen by lot and Theseus volunteered to go.¹⁹

On the voyage to Crete, Minos attacked one of the maidens, Eriboea, who called on Theseus for help. When Theseus intervened, Minos prayed to Zeus for a sign that he was indeed Minos' father (and therefore that his son need be under no restraint in dealing with other men). Zeus sent lightning, and Minos then challenged Theseus' claim to be the son of Poseidon by throwing a ring overboard, which Theseus was to recover. A beautiful poem by Bacchylides describes the sequel (*Dithyramb* 17. 92–116):

The Athenian youths trembled as the hero leaped into the sea, and tears poured from their lilylike eyes as they awaited the sorrow of what had to be. Yet the dolphins, dwellers in the sea, swiftly brought great Theseus to the palace of his father, the ruler of horses. There with awe he saw the noble daughters of rich Nereus, and in the lovely palace he saw his father's own wife, the beauteous Amphitrite, in all her majesty. Round him she cast a purple robe, and upon his thick hair the unwithered wreath, dark with roses, which subtle Aphrodite had given her at her own marriage.

With these gifts (the poet does not mention the ring) Theseus returned miraculously to the ship and so came to Crete. Here the daughter of Minos, Ariadne, fell in love with him and gave him a thread with which he could trace his way back out of the Labyrinth. With this aid he entered the Labyrinth, killed the Minotaur, and emerged unharmed. He then sailed from Crete with his thirteen Athenian companions, taking Ariadne with him.

ARIADNE ON NAXOS

Another tradition, however, makes Ariadne give Theseus a wreath that lights up the darkness of the Labyrinth and so helps him escape. In the poem of Bac-

Theseus and Amphitrite. Attic red-figure cup by the painter Onesimos and signed by the potter Euphronios, ca. 500 B.C.: diameter $15\frac{3}{4}$ in. The boyish figure of Theseus is held up underwater by a tiny Triton, as dolphins cavort to the left. Amphitrite, seated on a stool, holds the wreath in her left hand, as Athena (with helmet, spear, and aegis) looks toward her. This scene anticipates the narrative of Bacchylides by some twenty-five years. (*Paris, Louvre.*)

chylides, this wreath is made the gift not of Ariadne but of Amphitrite, so that Theseus himself brings it to Crete. Ariadne wore the wreath on her flight with Theseus until he deserted her on Naxos and she was found by Dionysus. The god took the wreath and set it in the heavens, where it became the constellation Corona.

Here is Ovid's version of the metamorphosis (*Metamorphoses* 8. 174–181):

Quickly the son of Aegeus sailed to Dia after seizing Minos' daughter, and cruelly left his companion deserted upon that shore. Alone and bitterly complaining, Ariadne found comfort in the embraces of Bacchus, who took the wreath

Death of a Monster, by Pablo Picasso (1881–1973). Pencil on paper, 1937; $15 \times 22\frac{1}{4}$ in. The contorted and dying Minotaur sees himself in a mirror held up by a sea-goddess, perhaps Amphitrite herself. Picasso used the violence and horror of the Minotaur to express his anger at the atrocities of the Spanish Civil War; this drawing is dated December 6, 1937, eight months after the bombing of Guernica. (Lee Miller Archives, Chiddingly, England, © 1998 Artists Rights Society (ARS), New York/SPADEM, Paris.)

from her brow and placed it in the heavens so that Ariadne might be made famous by a constellation. The wreath flies through the thin air, and as it flies its jewels are turned into fires and become fixed in their place, still with the appearance of a wreath (*corona*).

Ariadne is originally a divine person, perhaps another form of Aphrodite. Hesiod (*Theogony* 947–949) describes her as the “wife of Dionysus, whom Zeus made immortal.” Later versions of the Theseus legend make her a forlorn heroine, deserted by her lover Theseus upon the island of Dia (the early name for Naxos) during the voyage back to Athens (see Color Plate 16). Here is the narrative of Catullus (64. 52–59):

❖ Ariadne, with uncontrolled passion in her heart, looking out from the shore of Dia with its sounding waves, saw Theseus receding into the distance with his fleet at full speed. Not yet could she believe her eyes, for she had only just been wakened from deceitful sleep and saw that she was alone, unhappy, upon the

shore. But the young man, forgetful, parted the waves with his oars in flight, leaving his promises unfulfilled to the gusts of wind.

Ovid, who related this legend three times,²⁰ describes the arrival of Dionysus and his companions (*Ars Amatoria* 1. 535–564):

 And now Ariadne beat her soft breast again and again: “My faithless lover has gone,” cried she. “What will become of me?” “What will become of me?” she cried; the shore reechoed to the sound of cymbals and the frenzied beating of drums. She swooned in fear, and her words trailed away; no blood remained in her fainting body. Look! here are the maenads, their hair streaming down their backs. Look! here come the dancing satyrs, forerunners of the god. Look! here is old Silenus, hardly able to keep his seat upon the swaybacked donkey. And now came the god in his chariot decked to the top with vines, driving yoked tigers with golden reins. Ariadne lost her color, her voice, her thoughts of Theseus; twice she tried to run away, and twice fear held her rooted. Then said the god: “Behold I am here, a more faithful object of your love. Away with fear! You shall be the Cretan wife of Bacchus. Take the heavens as my gift; you shall be observed in the heavens as a constellation. Often as the Cretan Crown (Corona) will you guide lost sailors.” So he spoke and jumped down from the chariot, lest she be alarmed by the tigers, and took her up in his arms, for she could not resist; all things are easy for a god. Some of his followers chant the marriage cry, “O Hymen,” and others cry, “*Evoe, evoe*,” so the god and his bride lay together in the sacred bed.

Homer says that Ariadne was killed by Artemis upon Naxos as a punishment for eloping with Theseus when she was already betrothed to Dionysus. Yet another story has her die in Cyprus in giving birth to Theseus’ child. When Theseus returned, he instituted a ritual in her honor, and in historical times she was honored under the title of Ariadne Aphrodite, part of the ritual being for a young man to lie down and imitate a woman in childbirth. In all these conflicting stories it is clear that Ariadne is no ordinary mortal and that her partner was not a man, Theseus, but a god.

THESEUS BECOMES KING OF ATHENS

After leaving Dia (Naxos), Theseus went to Delos, where he sacrificed to Apollo and danced the Crane dance (in Greek, *geranos*) with his companions (see p. 611, detail 2). The dance became traditional at Delos, and its intricate movements were said to imitate the windings of the Labyrinth.²¹ From Delos he sailed home to Athens. Now he had arranged with Aegeus that he should change the black sail of his ship for white if he had been successful. This he forgot to do, and as Aegeus saw the black-sailed ship approaching, he threw himself from a cliff into the sea, which thereafter was called the Aegean Sea.

So Theseus became king of Athens. He was credited with a number of historical reforms and institutions, including the synoecism of Attica (i.e., the union

562

Dionysus and Ariadne. Marble sarcophagus, ca. 180 A.D.; width 77 in., height (without lid) 20½ in., height of lid 11 in. Dionysus approaches from the left riding on a chariot drawn by a lyre-playing centaur, behind and to the right of whom a centauress blows on a kind of flute. Before him go Pan and a silenus, and a silenus mask lies on the ground in the left center. A cupid hovers near the god. In the center the god stands, now clothed in a long robe, holding a reversed thyrsus in his left hand, his right hand resting on the leading silenus. He looks toward the sleeping Ariadne, whose robe is being drawn aside by a cupid, while two maenads look back at the god. To the right two maenads are about to attack Pentheus. On the lid are reliefs of the god's thiasos, and a deer is being sacrificed to the right. The waking of Ariadne to the coming of the god of new life was popular in the funerary art of late antiquity as a parable of the waking of the soul to eternal life after death. This sarcophagus is in a tomb in the cemetery under St. Peter's Basilica in the Vatican. It is not known whether its occupant was pagan or Christian. (Photo courtesy of the Foto Fabbrica di San Pietro.)

Dionysus and Ariadne. Bronze krater (the Derveni Krater), second half of the fourth century B.C.; height 35½ in. The krater, which held the ashes of a Thessalian nobleman, was discovered at Derveni, not far from Thessalonike, in 1962. The reliefs on the central panel show Dionysus, naked, seated on a rock with his leg over Ariadne's thigh. She draws her veil aside, the gesture of a bride accepting her husband. Behind Dionysus is a panther, and birds, animals, vines, and ivy ornament the neck and body of the krater. Figures of Maenads flank the divine pair, and in the upper register the seated Dionysus gestures towards a sleeping Maenad. The handles, in the form of serpents, frame the head of a horned god to the left and of Heracles (with lionskin over his head) to the right.

of the different villages into one political unit with Athens as its center) and the refounding of the Isthmian Games (see p. 613).

THE AMAZONS

Theseus joined with Heracles in his expedition against the Amazons, and as his share of the spoil received the Amazon, Antiope, by whom he became the father of Hippolytus. The Amazons in revenge invaded Attica and were defeated by Theseus. During the Amazon attack Antiope died. The battle between Theseus and the Amazons became a favorite theme in Athenian art after the Persian Wars, when the Amazons were seen as symbols of the barbarians, who, like the Persians, had been defeated by the Greeks.²²

THESEUS AND PIRITHOÛS

Pirithoüs, king of the Thessalian tribe of the Lapiths and son of Ixion, was Theseus' friend. Theseus was among the guests at the marriage of Pirithoüs and took part in the fight against the Centaurs, which became an important theme in Greek art.

Theseus and Pirithoüs vowed to help each other in securing a wife. Theseus attempted to take Helen, and Pirithoüs, Persephone. Helen, who at the time was only a child, was kidnapped from Sparta and brought back to Attica, where she was put in the care of Theseus' mother, Aethra, in the Attic village of Aphidnae. While Theseus and Pirithoüs were away on their attempt against Persephone, the Dioscuri invaded Attica and recovered their sister. The Dioscuri were favorably received in Athens itself, where the regent Menestheus instituted a cult in their honor.²³ Aethra was taken back to Sparta as Helen's servant and went with her to Troy.

Pirithoüs met his end in attempting to abduct Persephone. He and Theseus descended to the Underworld where they were held fast in magic chairs. In the Athenian tradition, Heracles interceded for Theseus' release, while Pirithoüs stayed forever in Hades. Thus the Athenian hero was again associated with Heracles, in this case in his last and greatest labor, the conquest of death.

THESEUS, PHAEDRA, AND HIPPOLYTUS

Theseus was also married to Phaedra, another daughter of Minos, and by her was the father of two sons, Demophon and Acamas. Phaedra (whose name means "bright") may originally have been a Cretan goddess like Ariadne. As we learned in Chapter 10, she fell passionately in love with Hippolytus, Theseus' son by Antiope, but did not tell him of her desire. During an absence of Theseus, her old nurse found out the secret and told Hippolytus. In shame at the discovery of her secret, Phaedra hanged herself and left behind a letter falsely accusing Hippolytus of attempting to seduce her. When Theseus re-

turned, saw Phaedra's corpse, and read the letter, he banished Hippolytus and called on Poseidon to destroy him.²⁴ As Hippolytus was driving his chariot along the seashore on his way into exile, Poseidon sent a bull from the sea, which so frightened the horses that they bolted, threw Hippolytus from the chariot, and dragged him almost to his death. He was carried back to Theseus and died after a reconciliation with his father, assured by Artemis of his future honor as a hero with a cult.

The legend of Hippolytus owes its fame largely to Euripides, who wrote two tragedies on the subject (one of which is extant), and to Seneca, whose *Phaedra* was the model for Racine's *Phèdre*.²⁵ In Euripides' *Hippolytus*, the drama is set at Troezen; but most other authors make Athens the scene. Hippolytus himself was honored with a cult at Troezen and was closely connected with Artemis, in whose honor he avoided all women. At Athens he was connected with Aphrodite, whose temple on the south side of the Acropolis was called "Aphrodite by Hippolytus." He himself was said to have been brought to life by Asclepius, and in his resurrected form he was absorbed by the Italians with the name of Virbius. His legend is of the greatest literary importance, and it connects Attica and Troezen and links Theseus to the great goddesses worshiped in Crete, Troezen, and Athens.

THESEUS AS CHAMPION OF THE OPPRESSED

In the fifth century, a number of legends were developed in which kings of Athens were portrayed as protectors of victims of tyranny who had been driven from their homes. In Euripides' *Medea*, Aegeus, father of Theseus, promises to protect Medea, who has been exiled from Corinth. Theseus was especially popular in these legends. He generously gave refuge to the exiled Oedipus (see p. 388), and in the *Suppliant Women* of Euripides he champions the mothers of the dead heroes of the Seven against Thebes. Led by Adrastus, the sole survivor of the expedition, they come to Eleusis, where Aethra has come to sacrifice to Demeter. She takes pity on the women and appeals to Theseus to protect them and help them persuade the Theban king Creon to allow them to bury the dead Argive princes. Theseus is at first unpersuaded by her pleas and those of Adrastus, but eventually he relents and attacks Thebes with an Athenian army. He returns victorious, bringing the bodies of the dead Argive leaders, over whom Adrastus makes a funeral oration. The bodies are then cremated, although the pyre of Capaneus is separate from the others because he was killed by the thunderbolt of Zeus, and therefore sacred to the god. In the climactic scene of the tragedy, Evadne, the widow of Capaneus, hurls herself into the flames of his pyre (see p. 399).

The figure of Theseus as the noble king has frequently been portrayed in later literature.²⁶ He is the compassionate champion of the Argive women in the twelfth book of Statius' *Thebaid*, in which he actually kills Creon. In Chaucer's

Canterbury Tales he is, in "The Knight's Tale," the protector of the Argive women and the wise king. He is "Duke Theseus" rather less loftily in Shakespeare's *Midsummer Night's Dream*.

OTHER ADVENTURES OF THESEUS

Theseus was not originally a member of the great expeditions of saga, but so important a national hero naturally came to be included in the roster of heroic adventurers, so that he was said to have been an Argonaut and one of those present on the Calydonian boar hunt. Indeed, "not without Theseus" became an Athenian proverb, and he was called "a second Heracles." His life was said to have ended in failure. He was driven out of Athens, his power usurped by Menestheus, who is mentioned in the *Iliad's* catalogue of ships as the Athenian leader at Troy. Theseus went to the island of Scyros and was there killed by Lycomedes, the local king. Menestheus continued to reign at Athens but died at Troy. The sons of Theseus then recovered their father's throne. After the Persian Wars, the Greek allies, led by the Athenian Cimon, captured Scyros in the years 476–475 B.C. There Cimon, obedient to a command of the Delphic oracle, searched for the bones of Theseus. He found the bones of a very large man with a bronze spear-head and sword and brought them back to Athens. So Theseus returned, a symbol of Athens' connection with the heroic age and of her claim to lead the Ionian Greeks.

THESEUS IN GREEK TRAGEDY

In a meticulous and lucid study, Sophie Mills distinguishes Theseus in the *Hippolytus* of Euripides as individual and quite different from his depiction in other plays and explains why this is the case.²⁷ Basic elements in the legend of Theseus—for example, his abduction of Helen, ill-fated journey to the Underworld, Cretan adventure, and the Centauromachy—were developed in Greece long before the fifth century. In Attica, however, with the emergence of democracy and the establishment of the Athenian Empire, an idealized portrait of Theseus was deliberately created to exemplify and glorify the character of the individual, the state, and the empire. The legend of Theseus was cleansed of any dubious traits, and Theseus himself, thus purified, was artfully transformed into an ideological paradigm, an honorable hero, brave and just, representing Athenian intelligence and virtue. This is the Theseus in Euripides' *Suppliants* and *Heracles* and Sophocles' *Oedipus at Colonus*. The depiction of Theseus in Euripides' *Hippolytus* offers a striking contrast. He is not represented in this play as the heroic king of Athens, noble model for his city and its citizens; instead he is most realistically portrayed as a vulnerable human being, a tragically flawed individual, whose character and actions are integral to the drama.

DEMOPHON

Theseus' son Demophon helped the children of Heracles (see p. 541), and he has a number of other legends.²⁸ He loved the Thracian princess Phyllis, and on leaving her in Thrace, he swore to return soon. When he never came back, she hanged herself and became an almond tree. Too late he returned and embraced the tree, which burst into leaf.

CODRUS

The last king of Athens was Codrus, who sacrificed himself for his city. The Peloponnesians invaded Attica, assured by the Delphic oracle that the side would win whose king was killed. When Codrus learned of the oracle, he disguised himself as a peasant and provoked a quarrel with some enemy soldiers, who killed him; the Peloponnesians were defeated.

MINOS

DAEDALUS AND MINOS

Daedalus was son or grandson of Metion, younger brother of Cecrops, and therefore a member of the Athenian royal house. He was a skilled craftsman and inventor; his assistant was his nephew Perdix.²⁹ One day Perdix invented the saw, getting the idea from a fish's backbone. In a fit of jealousy, Daedalus hurled him from a rock. As he fell, he was turned into a partridge, which still bears the name *perdix*. Being now guilty of homicide, Daedalus had to leave Athens. He went to Crete, where his skill was employed by Minos and Pasiphaë.

Now Minos had prayed to Poseidon to send him a bull from the sea for sacrifice; when Poseidon answered his prayer, Minos was so covetous that he sacrificed another, less beautiful bull, keeping Poseidon's animal for himself. As a punishment, Poseidon caused his wife, Pasiphaë, to fall in love with the bull. To satisfy her passion, Daedalus constructed a lifelike hollow cow in which Pasiphaë was shut up to mate with the bull. Her offspring was the Minotaur. It had a man's body and the head of a bull, and was held captive in the Labyrinth, a mazelike prison of Daedalus' devising. We have already seen how Theseus destroyed it. The famous discoveries at Cnossus in Crete (pp. 40–41) have shown that the bull played a significant part in Cretan ritual, and that a common sacred object was the *labrys*, or double-headed axe, which is certainly to be connected with the word *labyrinth*. The idea of the maze has plausibly been thought to have its origin in the huge and complex palace of Cnossus, with its many passageways and endless series of rooms. Minos and Pasiphaë, like their daughters Ariadne and Phaedra, are probably divine figures; Minos was son and friend of Zeus,³⁰ while Pasiphaë (All Shining) was the daughter of Helios.

THE FLIGHT OF ICARUS

Daedalus eventually tired of his life in Crete, but Minos would not let him go. He therefore contrived feathered wings, held together by wax, by means of which he and his son Icarus could escape. As they flew high above the sea, Icarus ignored his father's warning not to fly too close to the sun, and as the wax on his wings melted he fell into the sea, which thereafter was called *Mare Icarium* (see Color Plate 19). The story is told by Ovid (*Metamorphoses* 8. 200–230):

☛ When Daedalus the craftsman had finished [making the wings], he balanced his body between the twin wings and by moving them hung suspended in air. He also gave instructions to his son, saying: "Icarus, I advise you to take a middle course. If you fly too low, the sea will soak the wings; if you fly too high, the sun's heat will burn them. Fly between sea and sun! Take the course along which I shall lead you."

As he gave the instructions for flying, he fitted the novel wings to Icarus' shoulders. While he worked and gave his advice, the old man's face was wet with tears, and his hands trembled with a father's anxiety. For the last time, he

The Fall of Icarus. By Pieter Bruegel the Elder (1525–1569); oil on canvas, 1555, 30 × 44 in. Only the legs of Icarus are visible in the sea near the galleon. The ploughman, the fisherman, and the shepherd, observers in Ovid's narrative, here mind their own business. The partridge (Latin name, *perdix*), too, is Ovidian, a reference to Daedalus' rival and victim Perdix: in Ovid it gloats over the burial of Icarus. (Brussels, *Musées Royaux des Beaux-Arts.*)

kissed his son and rose into the air upon his wings. He led the way in flight and was anxious for his companion, like a bird that leads its young from the nest into the air. He encouraged Icarus to follow and showed him the skills that were to destroy him; he moved his wings and looked back at those of his son. Some fisherman with trembling rod, or shepherd leaning on his crook, or farmer resting on his plow saw them and was amazed, and believed that those who could travel through the air were gods.

Now Juno's Samos was on the left (they had already passed Delos and Paros), and Lebinthos and Calymne, rich in honey, were on the right, when the boy began to exult in his bold flight. He left his guide and, drawn by a desire to reach the heavens, took his course too high. The burning heat of the nearby sun softened the scented wax that fastened the wings. The wax melted; Icarus moved his arms, now uncovered, and without the wings to drive him on, vainly beat the air. Even as he called upon his father's name the sea received him and from him took its name.

Daedalus himself reached Sicily, where Cocalus, king of the city of Camicus, received him.³¹ Here he was pursued by Minos, who discovered him by the ruse of carrying round a spiral shell, which he asked Cocalus to have threaded. Cocalus gave the shell to Daedalus, who alone of men was ingenious enough to succeed. Minos knew that Daedalus was there when Cocalus gave him back the threaded shell. However, Daedalus still stayed out of Minos' reach, for the daughters of Cocalus drowned Minos in boiling water. There is no reliable legend about the further history or death of Daedalus.

THE FAMILY OF MINOS

Several of the children of Minos and Pasiphaë have their own legends; there were four sons—Catreus, Deucalion, Glaucus, and Androgeos—and four daughters, of whom only Ariadne and Phaedra have important legends.

Catreus, who became the Cretan king, had a son Althaemenes, of whom an oracle foretold that he would kill his father. Althaemenes tried to avoid his fate by leaving Crete and going to Rhodes with his sister Apemosyne.³² She was seduced by Hermes and killed by Althaemenes as a punishment for her apparent unchastity. Catreus later came to Rhodes in search of his son; he and his party were taken for pirates, and in the ensuing skirmish he was killed by his son. When Althaemenes learned how the oracle had been fulfilled, he avoided the company of other men and was eventually swallowed up by the earth. The Rhodians honored him as a hero.

Of the other sons of Minos, Deucalion (not to be confused with Deucalion of the flood legend) became the father of Idomeneus, the Cretan leader at Troy. As a boy, Glaucus fell into a vat of honey and drowned. Minos could not find him, and was told by the oracle that the person who could find an exact simile for a magic calf in the herds of Minos would be able both to find Glaucus and to restore him to life. This calf changed color every four hours, from white to

red to black; but the seer Polyidus most fittingly likened it to a mulberry, which changes from white to red to black as it ripens. With the help of various birds, Polyidus found Glaucus' corpse in the vat. It was placed in a tomb, and Polyidus was then shut up in the tomb and ordered to bring Glaucus back to life. While he was wondering what to do, a snake came. Polyidus killed it with his sword, whereupon another snake came, looked at the dead snake, and went away, returning with an herb, which it put on the dead snake's body. The dead snake then came to life again, and Polyidus took the herb and used it on Glaucus, who likewise came to life. Even now, Minos was not satisfied; he compelled Polyidus to teach Glaucus the seer's art before he would let him return home to Argos. Polyidus obeyed, but as he left, he told Glaucus to spit into his mouth, whereupon Glaucus forgot all that he had learned.³³

Androgeos was killed in Attica, and his death led to Minos' expedition and the attack on Megara. The king of Megara, Nisus, had a purple lock of hair, which was the city's talisman, for the city would fall if the lock were cut off. Now Scylla, daughter of Nisus, fell in love with Minos (whom she could see from the city walls). To please him she cut off her father's purple lock and brought it to Minos. When the city fell, Minos rejected Scylla and sailed away; she clung to the stern of his ship and was turned into a sea bird called *ciris*,³⁴ while Nisus turned into a sea eagle, forever pursuing her.

1. According to Ovid, only Aglauros disobeyed Athena.
2. Euripides, *Erechtheus*, frag. 18, 94–98.
3. For the Erechtheum, one might begin by consulting John Travlos, *Pictorial Dictionary of Ancient Athens* (New York: Praeger, 1971): entry for "Erechtheum." See also G. P. Stevens and J. M. Paton, *The Erechtheum* (Cambridge: Harvard University Press, 1927).
4. The sacrifice of a virgin was the original form of the legend. Later versions give her the name of Chthonia (which means "earth woman") and have her sisters take an oath to kill themselves so as to die with her. According to others the names of the daughters of Erechtheus were Pandora, Protogeneia, and Orithyia. Joan B. Connelly suggests (p. 161, note 9) that the subject of the relief on the base of the statue of the Athena Parthenos is the birth of Pandora, daughter of Erechtheus.
5. Euripides' *Erechtheus* survives only in fragments; its ending (including a long speech

- from Athena), first published in 1967, has helped fill out many of the missing details of the relationship between the myth of Erechtheus and his cult. Erechtheus took the title of the god who caused his death (i.e., he became Poseidon-Erechtheus). His original status as a hero, with a cult located at the place of his burial, was later confused with that of the god. His daughters had become goddesses with the title Hyacinthides, to be worshiped with annual sacrifices and dances.
6. The lines are sung just after Medea has secured the promise of protection from Aegeus.
 7. Pandrosos had her own shrine and cult on the Acropolis, close to the Erechtheum. She was the one of the three daughters of Cecrops, to whom, in some versions, Athena had entrusted Erichthonius. Aglauros was worshiped in a cave on the north side of the Acropolis, while the name *Herse* had been connected etymologically with the festival of the *Arrephoria*, in which two specially chosen young girls carried mysterious objects from the Acropolis by night down to the sanctuary of Aphrodite and Eros, which was also on the north side of the Acropolis.
 8. Ovid plays on words with a double meaning, literal and erotic, for which English has no adequate equivalent.
 9. In another version Procris was discovered by Cephalus with a lover. She fled to Minos, king of Crete, who himself fell in love with her. He had been bewitched by his wife, Pasiphaë, so that whenever he lay with a woman he discharged snakes and other creatures. Procris cured him and then lay with him, being rewarded with the gift of the hound and the javelin. Later she returned to Athens and was reconciled with Cephalus.
 10. There is a pun here on Ion's name, which is also the Greek word meaning "going."
 11. The legend of Ion stems almost entirely from Euripides' play. It explains the historical fact of the colonization of Ionia by mainland Greeks (principally from Athens) during the unsettled period after the collapse of the Mycenaean civilization.
 12. The chief source is Plato's *Phaedrus* 229, where Socrates rationalizes the legend: "I would say that the North Wind pushed her, as she was playing, down from the nearby rocks. She died in this way; but her death was described as her being ravished by Boreas."
 13. And by his link with the cult of Apollo Delphinus, i.e., Apollo as a god of spring, when the sea becomes navigable and the dolphins appear as portents of good sailing weather. See pp. 231 and 251–254.
 14. The oracle is difficult to reconcile with this story if the "home" referred to should be Athens. Euripides has Medea cure Aegeus of his sterility after she has joined him in Athens.
 15. Theseus was idealized in the latter part of the sixth century B.C. when Pisistratus was tyrant of Athens, and again immediately after the Persian Wars (ca. 475).
 16. The most complete source for the legend of Theseus is Plutarch's *Life of Theseus* (early second century A.D.). This biography blurs the lines between mythology, history, and philosophy. For Theseus in ancient art, see Frank Brommer, *Theseus, die Taten des griechischen Helden in der antiken Kunst und Literatur* (Darmstadt: Wissenschaftliche Buchgesellschaft, 1982).
 17. Sciron originally had his own legend and cult at Megara, on the island of Salamis, and in Attica where there were limestone outcrops (his name means "limestone").
 18. Procrustes is also called Damastes (Subduer), Procoptes (Slicer), and Polypemon (Troubler). Polypemon may also be the name of his father.

19. According to the fifth-century historian Hellanicus, Minos himself chose the victims and took them on his ship back to Crete.
20. Respectively, in the tenth letter of the *Heroides*; in *Ars Amatoria* 1. 527–564; and in *Metamorphoses* 8. 174–192.
21. This dance was represented on the François Vase (ca. 575 B.C.); see p. 611. At Athens Theseus instituted the *Oschophoria* (carrying of branches) in which two boys disguised as girls carried vine branches in a procession to honor Bacchus and Ariadne.
22. In Athens the battle with the Amazons was depicted in the Hephaesteum and in the Stoa Poecile (Painted Colonnade); it was one of the subjects of the metopes of the Parthenon and was depicted on the shield of Pheidias' statue of Athena Parthenos. It also appeared on the pedestal of the statue of Zeus at Olympia.
23. They were called by the title of *Anakes* or *Anaktes* (Kings), and their temple was called the *Anakeion*.
24. Poseidon was said to have granted Theseus three wishes, of which this was the third. The others were to escape from the Labyrinth and to return from Hades.
25. Twentieth-century dramatic adaptations of the myth include *The Cretan Woman* by Robinson Jeffers and *Desire under the Elms* by Eugene O'Neill.
26. An entertaining novel retelling the life of Theseus in a very compelling fashion is *The King Must Die* (1958) by Mary Renault, who is exceptional in her ability to make classical mythology and legend come alive. Robert Graves is another so gifted, for example, in his novel *Hercules, My Shipmate*, 1945. Renault has a firm grasp of both the ancient sources and modern archaeology, and by her sensitive art she is able to recreate the civilization and the characters in a most credible and exciting manner. Dominant among the many political and religious issues is the overriding motif of Theseus caught in the archetypal battle between matriarchy and patriarchy. This young and inspiring hero could never fall victim to the horrifying, archaic ritual by which the king must die to ensure the dominance and fertility of the earth mother. Renault's sequel *The Bull from the Sea* (1962) depicts the life of the Amazons, one of whom becomes the mother of Hippolytus.
27. Sophie Mills, *Theseus, Tragedy and the Athenian Empire* (New York: Oxford University Press, 1997).
28. He was said to have succeeded Menestheus as Athenian leader at Troy and to have brought his grandmother Aethra back to Athens.
29. The boy is also called Talus and his mother, Daedalus' sister, Perdix.
30. Homer (*Odyssey* 19. 178–179) describes him as the intimate friend of Zeus; and Hesiod (frag. 103) calls him "the most kingly of mortal kings, who ruled over most subjects and held his scepter from Zeus."
31. In the opening lines of the sixth book of Vergil's *Aeneid*, Daedalus comes to Cumae in Italy.
32. Two other sisters are mentioned: Aërope, who became the wife of a Mycenaean prince (either Pleisthenes or Atreus); and Clymene, who became the wife of Nauplius and the mother of Palamedes.
33. Forgetfulness induced by spitting is a folktale motif, as is also the seer who can understand the ways of birds and snakes.
34. Its identification is unknown. According to Aeschylus, Scylla was bribed by Minos with a golden necklace to betray Nisus.

JASON, MEDEA, AND THE ARGONAUTS

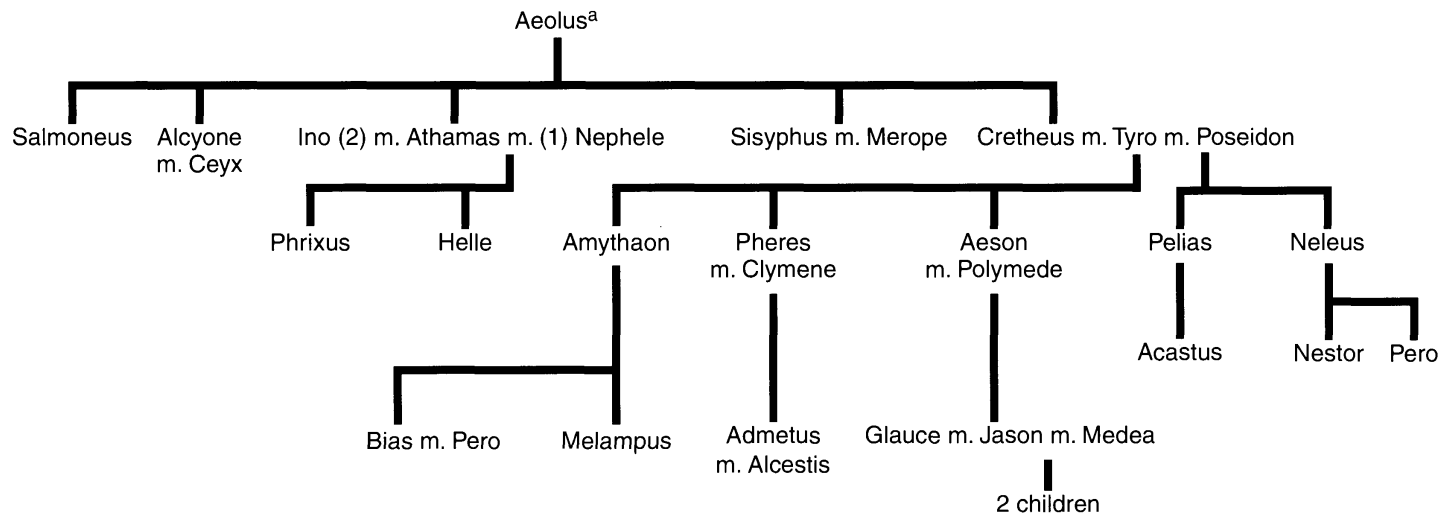

INTRODUCTION: THE MINYAE

The saga of the Argonauts covers much of the Greek world in its geographical scope and includes many of the leading Greek heroes of the age before the Trojan War. The crew of the *Argo* included the flower of Greece, descendants of gods and ancestors of Greek nobles. They are often referred to as Minyae, and among cities that claimed Minyan descent were Iolcus in Thessaly and Miletus in Ionia. Jason belonged to the ruling family of Iolcus, and the Euxine Sea (i.e., the Black Sea), where the main part of the saga takes place, was an area particularly colonized by the Milesians.

The name *Minyae* therefore tells us something about the origin of the saga. Homer calls the *Argo* “all men’s concern,” reflecting the adventures of the seamen of Mycenaean Greece. Later additions reflect the expansion of the Greeks into the Black Sea area from the eighth century onward. Folktale elements can be seen in the name *Aea* (which means no more than “land”) that Homer uses for the country to which the *Argo* sailed, and its king, Aeëtes (Man of the Land). It is a mysterious land on the edge of the world, a suitable setting for a story in which magic and miracle play a big part. The folktale element can further be distinguished in the formal outline of the legend, where a hero is set a number of impossible tasks that he performs unscathed, helped by the local princess, whom he then marries.¹

THE GOLDEN FLEECE

The saga concerns the quest for the Golden Fleece by Jason and the crew of the *Argo*. The Boeotian king Athamas took as his first wife Nephele, whose name means “cloud.” After bearing Athamas two children, Phrixus and Helle, she returned to the sky. Athamas then married Ino, one of the daughters of Cadmus, who attempted to destroy her stepchildren. She also persuaded the Boeotian women to parch the seed grain so that when it was sown nothing grew. In the ensuing famine, Athamas sent to Delphi for advice, but Ino suborned the envoys to report that the god advised Athamas to sacrifice Phrixus if he wanted the famine to end. As he was about to perform the sacrifice, Nephele snatched

^aThis Aeolus was the son of Hellen and is to be distinguished from Aeolus, the king of the winds.

Figure 24.1. The Ancestry of Jason

Phrixus and Helle up into the sky and set them on a golden-fleeced ram that Hermes had given her. The ram carried them eastward through the heavens. Above the straits between Europe and Asia (the Dardanelles), Helle fell off and drowned, and the straits were called the Hellespont after her. Phrixus continued his flight and came to Colchis, at the eastern end of the Black Sea, where King Aeëtes (son of Helius and brother of Circe and Pasiphaë) received him with kindness and gave him his elder daughter, Chalcioppe, as wife. Phrixus sacrificed the ram to Zeus Phyxius (i.e., Zeus as god of escape) and gave the Golden Fleece to Aeëtes, who hung it up on an oak tree in a grove sacred to Ares, where it was guarded by a never-sleeping serpent. Phrixus himself lived on at Colchis, where he finally died; his four sons by Chalcioppe—Argus, Melas, Phrontis, and Cytisorus—play a minor part in the Argonauts' saga. The fleece, a golden treasure guarded by a dragon, became a goal for a hero's quest.

JASON AND PELIAS

Cretheus, brother of Athamas, was king of Iolcus. At his death his stepson Pelias (son of Poseidon and Tyro, wife of Cretheus) usurped the throne and deposed the rightful heir, Aeson, son of Cretheus and Tyro and father of Jason. Jason's mother, Polymede,² sent the boy away to the hills to be educated by the centaur Chiron and cared for by Chiron's mother, Philyra. After twenty years Jason returned to Iolcus to claim the throne that rightly belonged to his family. Pelias knew that he was fated to be killed by a descendant of Aeolus, and the Delphic oracle had warned him to "beware of the man with one sandal." He therefore realized that his fate was approaching when Jason appeared wearing one sandal.

On the way down from the hills, Jason had carried an old woman across the river Anaurus in full spate, losing one sandal as he tried to get a foothold in the mud. The old woman was the goddess Hera, who thereafter favored him, just as she remained hostile to Pelias, who had neglected to sacrifice to her. Pelias promised to yield the throne as soon as Jason brought him the Golden Fleece, which Phrixus, appearing to him in a dream, had ordered him to obtain. Whether for this reason or for some other, Jason readily undertook the task.

THE ARGONAUTS

In preparation for the expedition, the *Argo* was built, "which . . . first through the Euxine seas bore all the flower of Greece" (Spenser, *Faerie Queen* 2. 12. 44). Its name means "swift," and it was built by Argus, son of Arestor, with the help of Athena. In its bows she put a piece of wood made from an oak of Dodona (where there was an oracle of Zeus), which had the power of speech.

The crew came from all over Greece, motivated by the heroic quality of *arete* (Pindar, *Pythian Odes* 4. 185–188):

 Hera kindled all-persuading sweet desire in the sons of gods for the ship *Argo*, so that none should be left behind to nurse a life without danger at his mother's side, but rather that he should find even against death the fairest antidote in his own courage along with others of his age.

Lists of the names of the Argonauts vary, since the Greeks of later ages were eager to claim an Argonaut for an ancestor. Two heroes who figure prominently in all the lists, Orpheus and Heracles, have no place in the original story. The former is a post-Homeric figure, and the latter, as the most important of the Greek heroes, could hardly be left out of a saga that occurred in his own lifetime. He refused to accept the leadership, in favor of Jason, and he disappeared from the expedition before the *Argo* had even reached the Black Sea.

Of the fifty or so names included among the Argonauts certain groups stand out. These are the heroes from Thessaly, such as Jason, and those from the Peloponnese, such as Augeas, king of Elis; a third group consists of Meleager and other heroes who took part in the Calydonian boar hunt; a fourth includes the parents of Trojan War heroes, such as Peleus (father of Achilles), Telamon (father of Ajax Telamonius), Oileus (father of Ajax the Less), and Nauplius (father of Palamedes).

Some of the Argonauts had special gifts. These were the seers Idmon and Mopsus; Castor and Polydeuces, excellent as horseman and boxer, respectively, with their later enemies, Idas and Lynceus, the latter of whom had such keen sight that he could see even beneath the earth; Periclymenus, son of Neleus, who could take whatever shape he liked in battle (this was Poseidon's gift); Euphemus, son of Poseidon, who could run so fast over the waves of the sea that his feet stayed dry; Zetes and Calais, the winged sons of Boreas; Argus, the skilled shipwright; and finally, the helmsman, Tiphys. Of these, only Polydeuces, Zetes, Calais, Argus, and Tiphys have any significant part in the legend as we now have it. Originally, the individual Argonauts must have used their gifts to help Jason perform his otherwise impossible tasks.

THE VOYAGE TO COLCHIS

HYPSIPYLE AND THE LEMNIAN WOMEN

After leaving Iolcus, the Argonauts sailed to the island of Lemnos, where they found only women, led by their queen, Hypsipyle. Aphrodite had punished them for neglecting her worship and had made them unattractive to their husbands. The men therefore had taken Thracian concubines whom they had captured in war. In revenge, the Lemnian women murdered every male on the island, with the exception of the king, Thoas, who was son of Dionysus and father

of Hypsipyle. Hypsipyle first hid him in the temple of Dionysus and then put him in a chest in which he floated to the land of the Tauri (i.e., southern Russia) and there became a priest of Artemis. Meanwhile the Lemnian women received the Argonauts, who stayed on the island for a year. Among the many children born as a result of their stay were the twin sons of Jason and Hypsipyle, Euneos and Thoas (or Nebrophonus). After the departure of Jason, Hypsipyle's deception in saving her father Thoas was discovered and she was driven from the island. Eventually she was captured by pirates and sold into slavery, becoming the servant of Lycurgus, king of Nemea.

In Greece, Hypsipyle became the nurse of the child of Lycurgus, Opheltes (see p. 396). She was eventually brought back to Lemnos by her sons. As a mythological figure Hypsipyle is significant as the queen of a society from which males have been driven out and because of her connection with the founding of the Nemean Games in honor of Opheltes. The Roman epic poet Statius devoted a long episode of his *Thebaid* to her story, as did his contemporary Valerius Flaccus, in his epic *Argonautica*. Ovid made her a romantically deserted heroine in his *Heroides*.

CYZICUS AND CIOS

After touching at Samothrace, where they were initiated into the mysteries, the Argonauts sailed on to the Propontis and put in at Cyzicus, where the Doliones lived under King Cyzicus, who received them well. In return for this hospitality, Heracles killed the earthborn giants who lived nearby. The Argonauts were driven back to Cyzicus by contrary winds, and in a night battle (for the Doliones took them for night raiders) they killed the king. Next day they helped bury Cyzicus before sailing off again.

Their next port of call was Cios, farther eastward along the Asiatic shore of the Propontis, where they landed so that Heracles could replace his broken oar. Here Hylas was lost and Heracles left the expedition (see pp. 523–533).

AMYCUS

Next the Argonauts passed into the Euxine (the Black Sea) and came to the land of the Bebryces, a Bithynian tribe whose custom was to compel strangers to box with their king, Amycus, a son of Poseidon, who had never lost a boxing match. Polydeuces fought Amycus and killed him.

PHINEUS AND THE HARPIES AND THE SYMPLEGADES

Next they came to Salmydessus on the Euxine shore of Thrace, where they were received by King Phineus, a blind prophet.³ He was tormented by the Harpies, two winged monsters (their name means "the snatchers") who, every time a meal was set before him, swooped down upon it, snatched away most of the

food, and fouled the rest. When the Harpies next appeared, Zetes and Calais, the winged sons of Boreas, pursued them with drawn swords to the Strophades Islands, where Iris put an end to the chase by making the sons of Boreas return and the Harpies swear never to go near Phineus again. Phineus foretold the rest of the voyage to the Argonauts and forewarned them of its dangers. He told them of the Symplegades (Clashing Rocks), two huge rocks near the western end of the Black Sea that clashed together driven by the force of the winds. Nothing had ever yet passed between them, and it was fated that they should remain fixed once a ship had made the passage. Phineus advised the Argonauts to release a dove, and if it succeeded in flying between the rocks, then they themselves were to row hard between them as they recoiled. If it failed, they were to turn back. In the event the dove was successful, and the Argonauts, with the help of Athena (or Hera), got through before the rocks clashed for the last time, losing part of the ship's stern ornament. The Symplegades remained fixed, never to threaten seafarers again.⁴

THE VOYAGE THROUGH THE EUXINE SEA

Not far along the Asiatic coast of the Euxine lived the Mariandyni, whose king, Lycus, received the Argonauts hospitably. Here Idmon was killed by a boar, and the helmsman, Tiphys, died. Nevertheless, with the Arcadian hero Ancaeus, son of Lycurgus, as the new helmsman, they sailed on past the land of the Amazons and that of the iron-working Chalybes and came to the Island of Ares, where the Stymphalian Birds (frightened away from Greece by Heracles in his sixth Labor) now lived. These they kept at bay by clashing their shields together. Here they also found Phrixus' four sons, shipwrecked during an attempted voyage from Colchis to Boeotia. They took them on board the *Argo* and found them of no little help when they reached Colchis. Finally, they sailed up the river Phasis to Colchis.

JASON AT COLCHIS

JASON'S TASKS

At Colchis, Aeëtes was prepared to let Jason take the fleece only if he first performed a series of impossible tasks. These were to yoke a pair of brazen-footed, fire-breathing bulls, the gift of Hephaestus to Aeëtes, and with them plow a large field and sow it with dragon's teeth, from which would spring up armed men, whom he would then have to kill.⁵

MEDEA'S ROLE

Medea, Aeëtes' younger daughter, now enters the saga and brings to it elements of magic and folktale. Through the agency of Hera and Aphrodite, she fell in

love with Jason and agreed to help him at the request of Chalciopé, mother of Argus (who had returned to Colchis with the Argonauts). She was herself priestess of Hecate, as skilled in magic as her aunt Circe. She gave Jason a magic ointment that would protect him from harm by fire or iron for the space of a day. So he plowed the field with the fire-breathing bulls, and he threw a stone among

Jason Is Disgorged by the Dragon that Guards the Golden Fleece. Athenian red-figure cup by Douris, ca. 470 B.C.; diameter 11³/₄ in. Athena (not Medea) watches the bearded dragon disgorge Jason. She holds an owl and wears the aegis. The fleece hangs on the tree in the background. There are no literary sources for this version of the myth. (*Museo Nazionale di Villa Giulia, Rome, Italy/Alinari/Art Resource, New York.*)

the armed men who sprang from the dragon's teeth to set them fighting one another. Then he took the fleece, with Medea's help, drugging the serpent with herbs that she had provided.

Euripides, however, in his tragedy *Medea*, gives Medea a larger part in performing the tasks and gaining the fleece. She, rather than Jason, is the dragon-slayer, as she reminds Jason (*Medea* 476–482):

 I saved you, as all the Greeks know who embarked with you on the ship *Argo*, when you were sent to master the fire-breathing bulls with yokes and sow the death-bringing field. I killed the serpent, which unsleeping guarded the golden fleece, twining its many coils around it, and I brought you the light of salvation.

In the vase-painting reproduced on page 579 Jason's part is even less heroic, as he hangs limply from the jaws of the serpent while Athena (not Medea) stands before him.

OID'S NARRATIVE

Ovid's account restores Jason's heroic stature. It begins the day after Medea's meeting with Jason at the shrine of Hecate (*Metamorphoses* 7. 100–158):

 The next dawn had put to flight the gleaming stars when the people assembled in Mars' sacred field and took their place on the higher ground. The king himself sat enthroned among his army, conspicuous by his purple robe and ivory scepter. The brazen-footed bulls puffed forth fire from their adamantine nostrils, and the grass burned at the touch of their breath. . . . Yet Jason faced them; with threatening look, they turned their awesome faces toward him as he came, their horns tipped with iron; with their cloven hooves they pounded the dusty earth and filled the place with their bellowing and clouds of smoke. The Argonauts were petrified with fear. On came Jason and felt not their fiery breath, so great was the power of [Medea's] drugs. He stroked their deep dewlaps with fearless hand and compelled them, driven beneath the yoke, to draw the plow's heavy weight and tear open the soil as yet unplowed. The Colchians were amazed, while the Argonauts shouted encouragement and strengthened Jason's spirits.

Next he took the serpent's teeth in a bronze helmet and sowed them in the plowed field. The soil softened the seed, which had been smeared with strong poison, and the teeth grew and became new bodies. Just as a baby takes on human form in its mother's womb and inside its whole body grows in due proportion, only to issue into the outside world when it is fully formed, so, when the forms of men had been made in the womb of the pregnant earth, they rose from the mother-furrows, and, yet more miraculously, at their birth clashed their weapons.

When the Greeks saw these warriors preparing to hurl their sharp spears at the head of the young Thessalian, their eyes and spirits were lowered by fear. Medea, too, who had made him safe from attack, grew pale when she saw so many enemies attacking the solitary young hero. . . . Jason threw a heavy rock into the middle of the enemy and turned their attack from himself to them: the

earthborn brothers killed each other and fell in civil war. The Greeks applauded and eagerly embraced the victor.

It remained yet to put to sleep with drugs the wakeful serpent. It was the fearsome guardian of the golden tree, a monster with a crest, three tongues, and curved teeth. This serpent Aeson's heroic son fed with a soporific herb and repeated thrice a charm that brought peaceful sleep. When sleep came upon those eyes that it had not visited before, Jason took the gold, and in the pride of his spoils, took her who had made possible his success, a second prize. Victorious he returned to the harbor of Iolcus with his wife.

Jason Takes the Golden Fleece. By Peter Paul Rubens (1577–1640); oil on panel, 1636, $10\frac{1}{2} \times 11\frac{1}{4}$ in. Jason jauntily passes by the statue of Mars [Ares], with the fleece draped over his left arm. He is dressed as a Roman soldier. Rubens follows the narrative of Hyginus, who said that Phrixus dedicated the fleece in the temple of Mars, rather than the narrative given here. Note the absence of Medea or Athena as Jason's helpers. (Brussels, *Musées Royaux des Beaux-Arts.*)

THE RETURN OF THE ARGONAUTS

PINDAR'S NARRATIVE

Ovid's narrative focuses upon Jason the hero, winner not only of the fleece, the prize of his quest, but also of the princess Medea. He set sail with her, pursued by the Colchians under the leadership of Medea's brother, Apsyrtus, whom he killed in an ambush near the mouth of the Danube.⁶ Pindar gives the earliest continuous account of the capture of the fleece and the return journey. The poem is addressed to Arcesilas, king of Cyrene and winner of the chariot race at Delphi in 462 B.C.⁷ Pindar's narrative begins after Jason has successfully completed plowing with the fire-breathing bulls (*Pythian Odes* 4. 239–254):

His companions stretched out their welcoming hands to the valiant hero, and they crowned him with garlands of grass and congratulated him with honeyed words. Then [Aeëtes] the wonderful child of the Sun told him of the shining fleece, where the knives of Phrixus had stretched it out. And he did not expect that Jason would complete that labor. For the fleece lay in a thicket, the lair of a serpent, held in its fearsome jaws, and the serpent in thickness and length was greater than a fifty-oared ship which the blows of iron have built.

He killed the grey-eyed spotted serpent, O Arcesilas, and he stole Medea with her connivance, and she caused the death of Pelias. And they came to the waves of Oceanus and the Red Sea and the nation of the women of Lemnos, who had killed their men. And there they showed their strength in physical contests with clothing for the prize, and there they lay together.

Pindar's narrative is brief and clear. Jason, as befits the hero of the quest, himself performed the final labor, took the prize, and returned home with the princess. Their journey took them to the ends of the earth (for the River of Ocean encircles the earth; see Figure 24.2, p. 585) and to the mysterious but unspecified "Red Sea," which in Pindar's time usually meant the Indian Ocean. Earlier in the poem, Medea had referred to the journey during which "relying on my counsel we carried the sea-ship on our shoulders for twelve days, hauling it up from Ocean, across the desert lands" (4. 26–28). Although the twelve-day portage appears to have taken place in Africa, Pindar seems rather to be describing a voyage whose details are set in a mythological landscape (indicated by the River of Ocean beyond the boundaries of the world) than in any particular lands. Lemnos is a recognizable place in the Greek world, and Pindar places the Lemnian episode during the return. He adds the celebration of the Lemnian Games, which evidently were part of the funerary ritual in honor of the dead men of Lemnos, with a cloak as the appropriate prize for a festival that marked also the resumption of marriage.

APOLLONIUS' NARRATIVE AND THE MARRIAGE OF JASON AND MEDEA

Apollonius of Rhodes takes the Argonauts up the Danube, across to the head of the Adriatic, then up the mythical Eridanus River and across to the Rhone, down

which they sailed to the Mediterranean Sea. Here they sailed to the western coast of Italy, where they visited Circe (the aunt of Medea), who purified Jason and Medea from the pollution caused by Jason's murder of Apsyrtus. After this, they encountered many of the same dangers described by Odysseus—the Planctae, Scylla and Charybdis, and the Sirens.

Next they came to the land of the Phaeacians, still pursued by the Colchians. Medea appealed to Queen Arete for protection, and she and the king, Alcinoüs, agreed not to give Medea up if she were already married to Jason. That night they celebrated the marriage, and the Colchians gave up their pursuit. Resuming their journey, the Argonauts sailed to Libya, where they were stranded on the shoals of the Syrtes. They carried the *Argo* on their shoulders to Lake Tritonis (a twelve-day journey), past the garden of the Hesperides. On the way Mopsus was killed by a snake. From the lake, they made their way back to the Mediterranean, guided by the sea-god Triton.⁸

TALUS

Another adventure took place off the coast of Crete. The island was guarded by the bronze giant Talus, who walked around it three times a day and kept strangers from landing by throwing rocks at them. His life depended on a membrane (or bronze nail) that closed the entrance to a vein above one ankle. If this were opened, the ichor (the divine equivalent of human blood) would flow out and he would die. The Argonauts caused this to happen and thus Talus perished.⁹

THE END OF THE JOURNEY

Finally the Argonauts reached Iolcus and there the saga (like the epic of Apollonius) ends. Jason handed the fleece over to Pelias, and he dedicated the *Argo* to Poseidon at the Isthmus of Corinth. Years later, he was struck on the head and killed by a piece of timber from its stern that fell upon him.

The geographical details of the return of the Argonauts are confused and largely fanciful. The time when the saga was taking its final form (i.e., in the archaic period, before the sixth century) was one of expansion and discovery in the Greek world, when Greeks traveled far to the east and west for trade and colonization, venturing as far as Russia and North Africa. The voyage of the *Argo* perhaps recalls actual voyages, but it is impossible to attempt to match details from Pindar and Apollonius with actual places.¹⁰

JASON AND MEDEA IN GREECE

IOLCUS

At Iolcus, Pelias refused to honor his pact with Jason, and Medea therefore contrived to cause his death. Making a display of her magic arts, she rejuvenated Jason's father, Aeson, by cutting him up and boiling him in a cauldron along

 GEOGRAPHY AND MYTH

It is tempting to try to trace the journeys of the heroes of saga: Odysseus and Jason are prime tempters. The map given here shows diagrammatically how the contemporaries of Pindar saw their world. Neither Pindar nor Apollonius can be used as sources for geographical identification: their world is one of the literary imagination, even though real places are named in their poems. Archaeologists, however, have shown that there is some basis for the identification of Colchis with an area in modern Georgia, the territory that lies to the east of the Black Sea, occupied in antiquity by farmers and metal-workers at least since the third millennium B.C. Greek trading settlements have been found dating from about 550 B.C., that is, about a century before Pindar's poem. The mythological river Phasis is safely identified with the modern river Rioni, and the modern town of Vani was the most prosperous ancient city, corresponding to the mythical Colchis. Beyond these facts, and the fact that the area in Greek times was rich in gold, copper, and iron, there can be no certainty in making geographical identifications. The modern equivalent of gold is perhaps oil, for an oil pipeline is being built across Georgia from the Caspian coast of Azerbaijan to the Black Sea coast.

with magic herbs, and then rejuvenated an old ram as well. Persuaded by these examples, the daughters of Pelias tried to rejuvenate their father in the same way. But Medea did not give them the magic herbs, and their attempt led only to his death.

CORINTH

Thus Jason was revenged on Pelias, but he did not gain the throne of Iolcus; for being defiled by the murder of Pelias, he and Medea were driven out of the city by Acastus, son of Pelias. They went to Corinth, the setting for Euripides' tragedy *Medea*. The connection between Medea and Corinth was made as early as the eighth century by the Corinthian poet Eumelos. In his version, Aeëtes and his brother Aloeus were the sons of Helios and Antiope. Helios divided his lands between the brothers, so that Aloeus inherited Arcadia and Aeëtes received "Ephyra," which Eumelos identified with Corinth. Aeëtes then went to Colchis, leaving Corinth in the hands of a regent. Later the Corinthians summoned Medea from Iolcus to be their queen. Thus Jason became king of Corinth through his marriage with Medea, who meanwhile had resisted the advances of Zeus out of respect for Hera (who was especially worshiped at Corinth). As a reward, Hera promised to make Medea's children immortal. Medea therefore concealed her children in the sanctuary of Hera, believing that in this way she would make them immortal, but they died and were honored with a cult. Medea refers to this in her final speech to Jason in Euripides' tragedy (*Medea* 1378–1383):

Figure 24.2. Map of the World According to the Ideas of Hecataeus of Miletus (ca. 500 B.C.). The River of Ocean is assumed to run around the edge of the inhabited world, which is divided into Europe and Asia. (© Laszlo Kubinyi, 1994.)

 I shall bury them with my hand, carrying them into the sanctuary of Hera Akraia [Hera of the Acropolis], so that none of my enemies can violate them by digging up their graves. And I shall impose upon this land of Sisyphus [Corinth] a solemn feast and ritual for the future, in return for this impious murder.

The death of the children of Jason and Medea therefore was a central feature in the original myth.

Another variant, however, named Creon as king of Corinth and the enemy of Medea, who killed him and left her children in the sanctuary of Hera when she fled to Athens. They were killed by Creon's family, who said that Medea had killed them. This version was the foundation of Euripides' powerful drama,

Medea, by Eduardo Paolozzi (b. 1924). Welded aluminum, 1964; height 81 in. The machine parts threateningly imply the destructive power of the barbarian princess. The mythological title suggests an allegorical meaning for the work without precise narrative content. (Courtesy of Rijksmuseum Kröller-Müller, Otterlo, Netherlands.)

in which Jason and Medea lived in Corinth as exiles from Iolcus. Jason divorced Medea to marry Glauce (also called Creusa), the daughter of King Creon. In revenge, Medea sent her two children with a robe and a crown as wedding gifts to Glauce. The magic ointment with which Medea had smeared the gifts burned Glauce and Creon to death. After this, Medea killed her children as a final act of vengeance against Jason and escaped to Athens in a chariot drawn by winged dragons provided by her grandfather Helios. In the final scene of the drama,

Medea Leaves Corinth in a Chariot Drawn by Dragons. South Italian krater, attributed to the Policoro Painter, ca. 400 B.C.; height 20 $\frac{1}{4}$ in. Medea, wearing oriental cap and dress, drives a chariot sent by the Sun, whose rays encircle her. Winged Furies look down on the human figures below—on the left, Jason railing at Medea, and on the right the children's tutor and Medea's nurse mourning over the bodies of the two children, which are draped across an altar. A spotted feline reacts energetically to the dragons. The painting represents the final scene of Euripides' *Medea*. (*The Medea Krater. Earthenware with slip decoration and added red, white, and yellow, late fifth–early fourth century B.C.* © The Cleveland Museum of Art, Leonard C. Hanna Jr. Fund, 91.1.)

Medea appears in the chariot high above the stage holding the bodies of her murdered children, triumphing over Jason and foretelling his miserable end. Jason lived on at Corinth, and Medea was given asylum at Athens by King Aegeus.

ATHENS

While at Athens, Medea was said to have become the mother of Medus by Aegeus. Later she nearly caused Aegeus to poison his son Theseus (see p. 557). Failing in this, she fled from Athens to Persia, where Medus established the kingdom of Media. Medea herself eventually returned to Colchis, and the rest of her legend is lost in the ingenious fancies of individual authors.

INTERPRETATIONS OF THE SAGA

THE ARGONAUTS IN LATER LITERATURE

The saga of Jason and the Argonauts has been filtered through literary interpretations as much as any other Greek saga.¹¹ It was known to Homer (who does not mention Medea), and it formed part of the epics of the eighth-century Corinthian poet Eumelos. In the third century B.C. it was the subject of the epic *Argonautica* of Apollonius of Rhodes, and this was translated or adapted by more than one Roman epic poet. The unfinished *Argonautica* of Valerius Flaccus, dating from the second half of the first century A.D., includes much of Apollonius' narrative, to which Valerius added episodes of his own, including the rescue of Hesione by Hercules and Telamon (see pp. 443 and 527). Statius, as we noted earlier, included a lengthy account of the legend of Hypsipyle in his *Thebaid*.

In drama, the *Medea* of Euripides has been a powerful influence, inspiring tragedies by Ovid (now lost), Seneca (which survives), and, in the twentieth century, Robinson Jeffers (*Medea*, 1946), to say nothing of many versions by French and German playwrights. It is one of the most frequently performed Greek tragedies in our contemporary theater. The saga appealed especially to the Victorians. William Morris' long narrative poem, *The Life and Death of Jason*, was published in 1867 and soon became popular. Its seventeen books cover the whole of Jason's saga, including the events in Corinth and his death. It owes as much, however, to Morris' feeling for medieval chivalry as to the classical epics, and Jason is a less ambiguous hero than he is in Apollonius or Euripides. Episodes from the saga were brilliantly narrated in Nathaniel Hawthorne's *Tanglewood Tales* (1853) and Charles Kingsley's *The Heroes* (1855). These versions were written with a strong moral bias toward courage and adventure, and they are, as Michael Grant has happily described them, "brisk, antiseptic narratives . . . jolly good hero-worshipping yarns, without esoteric overtones or significances."¹²

THE HERO'S QUEST

Jason's legend is better seen as a Quest using Propp's model. This view makes many of the folktale elements fall into a coherent structure. At the same time,

much of the saga goes back to the earliest stages of Greek mythology, not excepting Medea, whose status as the granddaughter of the Sun must once have been more important than her functions as a magician. By far the most powerful interpretation of her part in the saga is the tragedy of Euripides, produced at Athens in 431 B.C. While Euripides concentrates upon the psychology of Medea and explores the tensions in her relations with Jason, he also makes Medea into a quasi-divine being in the final scene, as she leaves in the chariot of the Sun. Medea is older (in terms of the development of the myth) and grander than the romantic heroine of Apollonius and Valerius Flaccus, and more formal than the driven, deserted, and clever heroine of Euripides. She and many of the other leading characters in the saga have attributes that point to elements in the myth that are both earlier and more significant than the quasi-historical tale of adventure that it has become.

ADDITIONAL READING

JASON AND MEDEA IN EURIPIDES

This summary of Euripides' *Medea* with commentary centers around a translation of the three scenes in which Jason and Medea appear together. Euripides begins with one of his typical prologues (cf. the *Hippolytus* and the *Bacchae* in Chapters 10 and 13), with a monologue that provides essential background and sets the scene for the tragedy to follow. The very first line that the Nurse utters is fraught with foreboding: "How I wish that the ship *Argo* had never winged its way between the dark Clashing Rocks into the land of the Colchians." After they had come to Corinth, Jason and Medea and their two sons led a happy life, but now all is enmity between husband and wife. Jason has abandoned Medea and their children and married Creusa (also called Glauce), daughter of Creon, king of Corinth. Medea is beside herself with anguish and rage, and the Nurse is terrified at the thought of what Medea might do; she even fears for the safety of the children, whom Medea has come to loathe because of their father. In the following scene between the Nurse and the Tutor, we learn further that Creon is about to exile both Medea and her children from the city. Medea enters, lamenting, crying out that she wants to die and eventually winning over the Chorus, women of Corinth, to her side by appealing to their common plight as women, which includes the virtual impossibility of finding a good husband. Her appeal, beginning with the words (215) "Women of Corinth," is reminiscent of Phaedra's to the women of Troezen in the *Hippolytus* (p. 214) and is equally laden with issues that belong to fifth-century Athens as much as to Mycenaean Greece.

Creon enters, and his first outcry is to order Medea and her children to leave Corinth at once and go into exile. He is afraid of Medea's rage and her dire threats of terrible retaliation against the royal family, and, since he knows about her notorious skill in evil arts, he wants to assure, in particular, the safety of his daughter. We witness in the exchange that follows Medea's subtle guile, as she

cleverly manipulates Creon to soften, with assurances of his safety, and made sympathetic to her plight he yields to her plea that she remain for only one day. In Robinson Jeffers' paraphrase, Medea begs, "lend me this inch of time. . . ." ¹³ What possible harm could this unfortunate woman do in such a brief period?

When Creon leaves, Medea confides in the Chorus with brutal frankness. She tells them that she would never have fawned upon this man, unless she were plotting revenge, and he is a fool to have given her this one day to accomplish her revenge; and she openly reveals some possible courses her actions might take to murder with impunity Creon himself, his daughter, and her husband.

The next scene presents the first encounter between Medea and Jason (446–626):

 JASON: Now is not the first time but many times before I have seen your fierce temper and how it is an evil, impossible to cope with. You could have stayed in Corinth and kept your home, if only you had easily submitted to the decisions of those in power, but instead, because of your unreasonable arguments you will be exiled from this land. It doesn't matter to me. Go on forever, if you like, telling everyone that Jason is the vilest of men. But for what you have said against the ruling family, consider it pure luck that you are being punished only with exile. I, to be sure, have always tried to assuage the fury of the outraged king but you never give up your stupidity, with your continual abuse of the royal family. And so you will be thrown out of this land.

Nevertheless, even after all this, I have not disowned those dear to me, and I have come to provide for your well-being, woman, so that you will not go into exile with the children, penniless and in need of anything. Exile brings in its train many hardships and indeed even if you hate me, I would not be able to think badly of you, ever.

MEDEA: O most vile human being in every way. These are the worst words that I can find with which to accost you verbally for your lack of manliness. You have come to me, you have come, even though you are most hateful to the gods, and not only to me and the entire human race. This is not courage nor even audacity to do wrong to dear ones and then look them in the face—this is shamelessness, a disease, the greatest of all the vices among human beings. Yet you did well to come here, for after I have told you how evil you are, my soul will be lightened and you will suffer pain because of what you hear.

From first things first I will begin what I have to say. I saved you, as all the Greeks know who embarked with you on the ship *Argo*, when you were sent to master the fire-breathing bulls with yokes and sow the death-bringing field. I killed the serpent, which unsleeping guarded the golden fleece, twining its many coils around it, and brought you the light of salvation. I myself betrayed my father and my home and came to Iolcus, below Mt. Pelion, with you, I too much in love but not too wise. And I murdered Pelias at the hands of his own daughters, in a most dreadful way to die, and ruined his home. After benefitting from all these things that I did, you, vilest of men, have betrayed me. You have taken a new wife, although children had been born to us. Indeed, if you were still childless, you might have been forgiven for desiring this second marriage. No

more is there trust in your oaths to me. I am not able to discern whether you think the gods you swore by then no longer still rule or that new divine ordinances are now to be followed among human beings, since you know full well that you have not been true to what you swore to me. Oh, my poor right hand, which you clasped so many times and my poor knees, how they were clutched for nothing by a base man, and how I have been cheated of my hopes.

Still I will share my dilemma with you as though you were a friend. What helpful solution can I expect from you? Nevertheless, I will do so, for having been asked what I should do, you will appear all the more vile. Where can I turn now? To the house of my father which I betrayed for you by coming to your fatherland or to the wretched daughters of Pelias? A fine reception I would receive in their home, I who killed their father. And so this is my predicament. I have made my loved ones at home hate me and, because of what I did for you, I have made enemies of those whom I should never have wronged. As a reward for these services, you have made me so happy, I am sure, in the eyes of many women. In you I possess an amazing and trustworthy husband, if I am thrown out of this land and wander an exile bereft of friends, with my children, alone and abandoned. A fine reproach for a newly married bridegroom that his children wander as beggars and I do too, the one who saved you.

O Zeus, who gave to human beings sure signs for gold that is counterfeit, why is there no birthmark stamped on the skin, by which one must recognize the man who is base?

CHORUS: Terrible is the rage and very difficult to heal, when loved ones battle it out.

JASON: I must, as it seems, not be a bad speaker but just like a trusty captain of a ship reef up the sails and ride out from under the stormy verbiage of your busy tongue. While you exaggerate excessively your kindness to me, I consider Aphrodite alone of gods and mortals to be the savior of my expedition. You do have a clever mind but it would be invidious to go through the story of how Eros with his unerring arrows compelled you to save my life. But I will not go into the many details. Where you did help me, however, you got more in return for my safety than you gave, as I will explain. First, you dwell in the land of Hellas instead of a barbarian country and you experience justice and the exercise of laws, without the mere gratification of force. All Hellenes have come to know that you are wise and you have gained a reputation. But if you were still living at the very end of the earth, you would be of no account. I would rather have the good fortune of an outstanding reputation than a house full of gold or the power to sing a more beautiful song than Orpheus.

So much then I say to you about my labors. After all you started this contest of words. With respect to your reproaches against me concerning my marriage into royalty, I will prove to you that in this first of all I was wise, next that I was not driven by sex and finally that I acted as a great friend to you and to my sons.

Now, now, Medea, be quiet.

After I moved here from the land of Iolcus, bringing with me the burden of many hopeless misfortunes, what luckier find could I have come upon than this: to marry the daughter of the king, even though I was an exile. It was not that I

loathed your bed, your accusation that so galls you, and I was not anxious to outrival those who have many children. The ones I have are enough and I have no complaint. But my purpose was to insure that we should live well, this is of the greatest importance, and not be in want, knowing full well that every one takes pains to avoid a friend who is poor. Also I wanted to bring up my children in a manner that was worthy of my house and to father brothers and sisters for the children born of you. I wanted to treat them all alike and, having established one unified family, I would be blessed with happiness. For you, why is there need of children? For me, it is profitable to benefit the ones I already have by means of those whom I hope will be born. I haven't planned badly, have I? Even you would agree, if only the marriage and matter of sex did not gall you so. You women think everything depends on sex! If any trouble happens on that score, you turn the best laid, finest plans into causes for hostility. Men ought to be able to beget children from some other source and the female gender should not exist. Then evil would not exist for human beings.

CHORUS: Jason, you have made your arguments look good but, nevertheless, to me, even if I am speaking against you point of view, you seem not to act justly in betraying your wife.

MEDEA: To be sure I am at odds with many people about many things. For to me the man who is unjust and born a clever speaker incurs the heaviest retribution, because overly confident that he can cover up his wrongs beautifully, he stops at nothing in his tongue-wagging arguments. But he is not as clever as all that. And so it is with you. Do not now become a specious liar and a devastating talker against me, for one word will lay you out. If you were not a coward, you should have persuaded me to agree before making this marriage, but not without saying a thing to your loved ones.

JASON: You would have given me splendid support, I imagine, if I had told you about the marriage, you, who not even now can bring yourself to abandon your overwhelming rage.

MEDEA: It was not this consideration that controlled your behavior but rather you thought that as you grew older a foreign marriage was likely to end badly.

JASON: You can be sure of this: it was not on account of a woman that I made this marriage with the daughter of a king, to which I am committed but, just as I said before, it was because of my wish to save you and to beget royal children as brothers and sisters to my own children, a bulwark for our family.

MEDEA: I do not wish to have a life of good fortune that causes pain nor a prosperity that galls my heart.

JASON: Do you not know how you must change your wish to show yourself the wiser? Wish that your best interests not appear painful and that you do not think that you are unfortunate when you are fortunate.

MEDEA: Continue with your hubris, since there is a refuge for you but I will go from this land, an abandoned exile.

JASON: You choose this yourself. Don't blame anyone else.

MEDEA: What did I do? I didn't take a wife, and betray you.

JASON: You uttered unholy curses against the royal house.

MEDEA: Yes, and I am a curse to your house too.

JASON: I will not debate the matter any further but, if you want to accept any

financial help for the children and yourself in your exile, say so. Know that I am ready to give with an ungrudging hand and to send introductions to my friends who will treat you well. You are crazy not to want to accept these offers, woman. If you forget your rage, you will have the more to gain.

MEDEA: I would never use the help of your friends and I would not accept anything from you, so don't give me anything. For gifts from an evil man hold no benefit.

JASON: Well then, I call the gods as witnesses that I want to do everything for you and the children. What is good for you isn't to your liking but you push away your friends by your audacity. Therefore you suffer all the more.

MEDEA: Go, for you must be possessed by longing for your newly won girl, being so long away from the palace. Play your role as bridegroom; Perhaps—and with god's help I will say this—you have made such a marriage that will end up to your grief.

Within the framework of a heroic myth, we witness a mundane and frighteningly real confrontation between a man and a woman, husband and wife, once a marriage is over. It is difficult to sympathize with Jason, arrogant and cold, who immediately takes the stance of the tolerant and benevolent provider, even though it is Medea, he claims, who is in the wrong. It is true, as we have learned from Creon himself, that Medea's rage and deadly threats against the royal family have been the reasons for her exile, but, in Medea's view, no other recourse is possible except vengeance against her enemies. When Medea lists her services to Jason, including betrayal of her family and country, murder, and even the slaying of the dragon, the eternal question immediately arises: should the continuation of a marriage be based upon debts from the past? Her appeal to earlier pledges and oaths perhaps has a greater religious and moral authority. It seems that her foreign marriage with Jason holds no legal validity for Jason in Corinth.

When Jason lists the blessings that he has conferred upon Medea in return, he presents us with one of the many fascinating issues raised by the play. He boasts that he has brought Medea to a system of justice in an enlightened land, far superior to that of her own barbarian country, where brute force is the rule. For Medea, no justice at all exists in a land where she can be treated with such injustice, and vengeful violence represents to her an earlier and better standard of morality.

One of the most heartless responses to Medea is Jason's claim that she had no choice in her actions; all that she did for him she did under the compulsion of an overwhelming love, inspired by Aphrodite and Eros. He never mentions any kind of affection that he might have once held for her. It is most rewarding to read the *Argonautica* of Apollonius of Rhodes for his version of the events in Colchis and the beginnings of the relationship between Jason and Medea. In Book 3 Apollonius draws a justly admired portrait of Medea as a woman smitten by love, and he seems to take his cue from these lines of Jason in Euripides.

When Medea, at the court of Aeëtes, first set eyes on Jason an invisible Eros, crouched low at Jason's feet, shoots an arrow directly at Medea, and she is consumed with the flame of passion. Eventually, though, Jason too is touched by feelings of love.

In Euripides, Jason's rhetoric is that of the exemplary sophist, one who by clever and devious arguments can make or try to make the worse cause seem the better. To Medea all his words are specious and insincere, designed to disguise the fact that he is a base and cowardly man and his actions despicable. But at least some of his arguments may be true and very understandable, however morally dubious and unforgivable. Despite all of Medea's help, Jason did not realize his ultimate goal, to become the king of Iolcus. The murder of Pelias, orchestrated by Medea, failed in its purpose and Jason had to flee with Medea to Corinth. Now, his days of glory past, his shattered hopes inspire a desperate ambition. As he explains, his marriage into the royal family is calculated and pragmatic, his golden opportunity, a last chance for power and success. Less credible may be his contentions that his actions are not motivated by passion (the beautiful young princess holds no sexual attraction for him) and that his plans were designed to help Medea and the children; yet, apparently he had not expected them to be exiled and perhaps he did have in mind a prosperous future in which they might be included. Medea is not above sophistry herself: she claims that Jason has left them destitute, while at the same time refusing to accept the liberal help that he offers.

To continue with Euripides, Aegeus, the king of Athens, arrives in Corinth (a lucky coincidence that does not seem too contrived in the momentum of performance). He has been to the oracle of Apollo at Delphi to inquire about a cure for his inability to beget children and is on his way to consult with Pittheus, king of Troezen, about the response before he returns home. Medea tells Aegeus about her husband's cruel betrayal and her imminent exile and makes him feel pity toward her plight and critical of Jason's behavior. She begs Aegeus to receive her into his house in Athens as a suppliant, never to give her over to her enemies in pursuit, and she in return will, through her knowledge of medicines, cure him of his childlessness.¹⁴ Aegeus agrees to this exchange of favors first because of the gods (her salvation is a just cause) and then because of her benefit to him. Medea, however, must leave Corinth by her own devices because Aegeus as a guest there does not want to offend his hosts by interfering. If Medea does reach Athens, Aegeus promises to protect her, since he is a just king. At Medea's insistence, he swears a solemn oath by Earth, the sacred light of Helios, and all the gods that he will do what he has promised.

Once again Medea has duped a king. Now she has made her escape secure, eliciting a safe refuge from Aegeus, who is ignorant of what she is planning to do. It may be that Euripides ironically depicts his Athens, so renowned in myth and drama for being a righteous champion of the oppressed, as the deceived protector of a murderer, whose victims include her own children.

Medea now exults before the Chorus, calling upon Zeus, the justice of Zeus, and the light of the Sun in her victory over her enemies. She goes on boldly to reveal fully the exact details of her plans for what she in actual fact will accomplish. The laughter of one's enemies is intolerable; they must pay. We learn as well, amidst her anguished groans, her chilling decision to kill her children. Has the realization of Aegeus' desperation over his childlessness steeled her for the decision to commit this atrocity? Jason, with god's help, will never see alive his children born by her, and he will never have other children by his new bride. Medea claims she would never want to be considered weak, passive, or base. No, just the opposite, she, like those whose life is most renowned, is hurtful to enemies and kindly to friends. Among her enemies now, it seems, are her children by Jason. And so she begins her plans for destruction by sending the Nurse to summon Jason, and she artfully feigns reconciliation in this second scene between the two of them (866–975):

 JASON: I have come at your command. For even though you bear ill will, I would still not fail to come, but I will hear you out. What is it now that you want from me, woman?

MEDEA: Jason, I beg you to forgive what I have said. It is only fair that you bear with my rages now, since many have been the acts of love between us in the past. I have argued the case with myself and am full of self-reproach. "Stubborn fool, why am I so insane and hostile to those who are making good plans and why do I persist in my enmity against the rulers of this land and against my husband, who is doing for us what is most advantageous by marrying a princess and begetting children who will be as brothers and sisters to my own. Will I not cease from my anger? What is wrong with me, the gods are providing for me well. I have children and I know that we are being exiled from this land and are in need of friends." I mulled over these considerations and realized my great lack of foresight and my useless rage. And so now I applaud and think that you are most wise and reasonable to take on this marriage for us. I am the foolish one. I ought to share in your plans, join you in carrying them out, stand by our nuptial bed, and take joy in my support of your marriage. But we women are what we are, I don't say evil, but just women. You should not imitate our nature or respond to our childishness with childishness. I give in and admit that I was not thinking right then, but now I have come to a better understanding of this situation.

O children, children, here, come out of the house, come out. Embrace your father, greet your father with me, and along with your mother be reconciled and turn from our former enmity against a loved one. We have made peace and our anger has given way. Take his right hand. Alas for me when I think about any of the possible hidden misfortunes in store. O my children, will you stretch out your dear hands so, throughout a long life? Poor me, how prone to weep and full of fear. Now that I have at long last ended the quarrel with your father, I have drenched your tender faces with my tears.

CHORUS: Fresh tears have started in my eyes too. May the present evil not proceed any further and increase.

JASON: I approve, woman, of all this and I do not blame your former hostility. It is to be expected that women become enraged when a husband secretly makes a deal for a marriage of a different sort. But your heart has changed for the better and you have come to recognize the winning plan. This is the behavior of a reasonable woman.

For you, children, your father, thoughtful and concerned, has provided great security, with the help of the gods. For I believe that you with your new brothers and sisters will be foremost in this land of Corinth in time to come. Only you must grow to manhood. Both your father and whatever god is kindly will take care of the rest. May I see you coming to young manhood, strong and victorious over my enemies.

You there, Medea, moist with fresh tears. Why do you turn away, so pale? Why are you not happy to hear what I have been saying?

MEDEA: It is nothing. I was thinking about these children here.

JASON: Bear up now, for I will take care of them.

MEDEA: I will bear up. I will not distrust your words but a woman is by nature feminine and prone to tears.

JASON: Why, then, do you cry over these children too much?

MEDEA: I gave birth to them. When you prayed that the children might live, I wondered if this would happen and pity overwhelmed me.

But I have told you only some of the reasons for you having to come to talk to me and now I will mention the others. Since the rulers of this land have decided to banish me, this is the best thing for me too, I know full well, not to live here and be in your way or theirs since I seem to be a menace to the royal house. I, for my part, am resigned to go into exile, but the children, beg Creon that they not be exiled too so that they may be brought up by your hand.

JASON: I don't know if I can persuade him, but I will try.

MEDEA: Then you beg your wife to ask her father not to exile the children.

JASON: Certainly, I'll do it and I think I will persuade her.

MEDEA: If she is a woman like the rest, you will, and I will help you in this. I will send her gifts, which I know are by far the most beautiful of any on this earth today, an exquisite robe and a diadem of gold, and the children will bring them. But one of the servants here must bring them out as quickly as possible. Your bride will be blessed by happiness forever, since she has found you, the best of men, to be her husband and been given this treasure, which Helios, father of my father, gave to his descendants.

Take these bridal gifts, children, into your hands, carry them, and give them to the princess, the happy bride. Certainly she will accept these gifts with which she can find no fault.

JASON: O foolish woman, why do you empty your hands of these things? Do you think the royal household is in need of fine robes, or gold; do you really think so? Keep these things; do not give them away. For if my wife prizes me at all, she will prefer to oblige me rather than accept treasures, I am quite sure.

MEDEA: No, you must not dissuade me. They say gifts persuade even the gods and for mortals gold is more powerful than a thousand words. Divine luck is hers; now god blesses her good fortune. She is young and a princess. I would give my life and not only gold to repeal the exile of my children.

But children, when you both have entered the rich palace, entreat the new bride of your father, my mistress, and beg her that you not be banished from this land. Give here these treasures and, most important of all, she must accept these gifts into her own hand.

So go quickly as possible! May you succeed and come back to your mother, good messengers of what she is longing to hear.

Pompous Jason is fooled by obsequious flattery into believing Medea has accepted the wisdom of his actions. She fully understands how to play upon the foibles of his character and make him completely blind to the treachery in hers, which he fails even to suspect despite his knowledge of their past. The scene confirms Jason's love for his sons, and there is an ominous irony in Medea's tears, which he does not understand.

There follows a terrifying scene between Medea and her blameless children, exposing her pain and agonized indecision in the face of their loving tenderness. Then comes the return of the messenger from the palace who describes for an exultant Medea, relishing every exquisite detail, the horrifying deaths of the bride Creusa and her father Creon. Convinced by Jason, the princess accepted the beautiful gifts from the children. As the poisoned robe and diadem consumed her, her father rushed to save her but he became fused in her struggles to escape and they died in agony together. With this news of her success, Medea decides with finality that her children (who will be killed anyway, she assumes, because of what she has done) must die by her own hand. We hear their piteous cries from within, as Medea kills them with a sword.

Upon the deaths of Creusa and Creon, Jason rushes to confront Medea and the play ends with this final confrontation (1291–1414):

 JASON: You women standing near the door, is she still inside the house, Medea, the one who has done such terrible things, or has she made her escape in flight? To be sure, she will have to hide in the depths of the earth or soar aloft on wings to the heavens above, if she is to avoid paying retribution to the royal house. Does she imagine that she will flee from here unpunished for having killed the sovereigns of this land? Still I am not as concerned about her as I am about my children. Those whom she has wronged will take care of her punishment but I have come to save the life of my sons so that the next of kin may do them no harm by exacting vengeance for the unholy crime committed by their mother.

CHORUS: Jason, poor man, if you knew the depths of your misfortune, you would not have spoken these words.

JASON: What do you mean? Can it be that she wants to kill me too?

CHORUS: Your children are dead, murdered by their mother.

JASON: Woe is me! What are you saying? Woman, how you have destroyed me.

CHORUS: You must understand that your children are no longer alive.

JASON: Where has she killed them, within the house or outside?

CHORUS: Open the doors and you will see the slaughter of your sons.

JASON: Quickly, servants, unlock the doors and open them up so that I may see this two-fold evil, my dead sons and her, their killer, whom I will kill in just retribution.

MEDEA: Why do you rush at the doors and attempt to unlock them in order to find the corpses and their murderer? Stop your efforts. If there is anything you want of me, say what it is that you wish, but you will never be able to touch me. Helios, the father of my father, has given me this chariot, a defense against the hand of an enemy.

JASON: O hatred personified, most detestable abomination to the gods, to me, and to the whole race of human beings. You who gave them birth brought yourself to drive a sword into your own children and kill them and destroy me too by making me childless. Having done this, you still look upon the sun and the earth, even though you dared this most impious deed. May you die! Now I am sane; but then I was insane when I brought you out of a barbarian land from your house to a home among the Hellenes, you, a great evil, the betrayer of your father and the country that nourished you. The gods have brought down upon me the avenging spirit that should have been meant for you, for it was you who killed your brother at the hearth before you even set foot on the *Argo*, my ship with its beautiful prow. You began with actions like these. Now after you had married a man like me and borne me children, you murdered them because of sex and jealousy. There are no women in Hellas who would ever dare such a thing. Instead of one of them, I preferred to marry you, a hateful union and ruinous for me, you, a lioness, not a woman, more savage in nature than Scylla in her Tuscan waters. But I would not be able to sting you, however endless my reproaches, since you have such an inbred brazen hostility. Go to perdition, evildoer, child-killer! All I have left is to bewail my ill-fate.

From my new bride and marriage I will not derive any joy and benefit and as for my boys whom I raised, I will not be able to speak to them again alive but I have lost them.

MEDEA: I would have gone on at length to respond to these words of yours, if Zeus, the father, did not understand what I did for you and what you did to me. You were not about to spend a happy life laughing at me after you had dishonored our bed, nor were the princess and Creon, who gave her to you in marriage, about to throw me out of this land, with impunity. And so call me a lioness if you wish and Scylla who lives in the Tuscan sea. I have stung you in the heart, as I had to do.

JASON: You yourself also feel the pain and share in my misfortune.

MEDEA: Only too true, but the pain is soothed if you cannot laugh at me.

JASON: O my children, fated with such a wicked mother!

MEDEA: O my sons, you were destroyed by your father's sick treachery!

JASON: Now then, it was not my hand that killed them.

MEDEA: No, it was your hubris and your newly arranged marriage.

JASON: Do you really believe it right to kill them, just because of a marriage?

MEDEA: Do you really think that this painful insult is trivial to your wife?

JASON: To a wife who is sensible, but to you everything is vile.

MEDEA: These children are no more. This will sting you.

JASON: These children are alive, alas, spirits of vengeance down upon your head.

MEDEA: The gods know who began this suffering.

JASON: They know, to be sure, your hateful mind and heart.

MEDEA: Go ahead and hate! I loathe your bitter, barking voice.

JASON: As I do yours. Our separation is only too easy.

MEDEA: How so? What shall I do? For I too want it desperately.

JASON: Let me bury these corpses and mourn over them.

MEDEA: Certainly not! I will bury them by my own hand, bringing them to the sanctuary of Hera Akraia in Corinth, so that no one of my enemies will violate their graves by tearing them up. In this Corinthian land of Sisyphus I will institute a holy festival and religious rites forevermore, in expiation for this impious murder. I myself will go to Athens in the land of Erechtheus to live with Aegeus, son of Pandion. But you, as is fitting for a base coward, will die an unheroic death, struck on the head by a piece of your *Argo*, having witnessed the bitter end of my marriage to you.

JASON: May the avenging Fury of the murdered children destroy you, and also Justice, avenger of blood-guilt.

MEDEA: What god or divine spirit will hear you, false liar, and betrayer of oaths.

JASON: Oh, alas, you polluted murderess of children!

MEDEA: Go home and bury your wife.

JASON: I am going, bereft of my two sons.

MEDEA: Your mourning has not really begun yet, old age is left for you to grieve.

JASON: O children, so very dear!

MEDEA: To their mother, not you.

JASON: And yet you killed them.

MEDEA: Yes, to cause you pain.

JASON: Oh, poor wretch that I am, how I long to embrace my children and kiss their dear lips.

MEDEA: Now you speak to them, now you greet them with love, before you rejected them.

JASON: By the gods, let me touch the soft and gentle bodies of my sons.

MEDEA: That is impossible. You ask in vain.

JASON: Zeus, do you hear all this? How I am driven away, the treatment I suffer from this polluted, child-slaying lioness. But insofar as I have the power and am able, I offer up my lament and call upon the gods to witness how you killed my sons and prevented me from touching them and burying their bodies. How I wish that I had never begotten them to see them dead by your hand.

Poor Jason! He had approved when Medea killed more than once on his behalf; now true recognition has come at last (but too late) that she is a murderess. For Medea, her hatred of Jason and the compulsion to cause him the ultimate pain are more powerful than her love for her children and her own suffering wrought by their murder. How unbearable for us is the slaughter of sweet, young innocence to satisfy cruel, selfish, and ruthless passions. Both Medea and Jason are responsible for the tragedy, but Medea's claim that Jason, not she, is the real perpetrator must surely be the ultimate sophistry of all! In this horrifying

denouement, Euripides' masterful use of the *deus ex machina* illuminates the profundity of his art. It is Medea herself who acts as the *deus ex machina*, the protagonist integral to the whole plot who provides its resolution from without (not unlike Dionysus in the *Bacchae*). When Medea appears untouchable, above Jason in the chariot sent by her grandfather Helios, she becomes transformed and takes on the attributes of a primordial deity who has with divine impunity meted out the cruel and terrible vendetta of an older order of justice.

No other play illustrates more succinctly how our reactions to a work of art are inevitably determined by who we are, what we believe, and what we have experienced. Its ruthless delineation of character and motivation and the relentless power of its emotional and cathartic impact never fail to elicit the most conflicting judgments and vehement interpretations; the arguments will surely go on forever.

NOTES

1. Sources for the saga are the Greek epic *Argonautica* by Apollonius of Rhodes (third century B.C.) and the Latin epic *Argonautica* by Valerius Flaccus (late first century A.D.). Pindar's complex fourth *Nemean Ode* (ca. 460 B.C.) is the most poetic account, and Ovid (early first century A.D.) has a brief narrative in Book 7 of the *Metamorphoses*. Graham Anderson, *Fairytale in the Ancient World* (London and New York: Routledge, 2000), pp. 72–82, analyzes the fairytale motifs in the story.
2. Her name is also given as Alcimede or Amphinome.
3. He was the son of Poseidon and the husband of Cleopatra, daughter of Boreas. Different reasons are given for his blindness.
4. Clashing rocks called *Planctae* (Wanderers) appear in the Argonauts' return voyage and in the *Odyssey*. Herodotus calls them *Cyaneae* (Dark-rocks).
5. The teeth came from the Theban dragon killed by Cadmus (see p. 378), and had been given to Aeëtes by Athena.
6. Apollodorus has Medea take Apsyrtus on the *Argo* and delay the pursuers by cutting him up and throwing his limbs piecemeal into the sea.
7. The earliest epic narratives of the saga were part of the *Corinthiaka* and *Naupaktika* of the Corinthian poet Eumelos (ca. 730 B.C.). Only a few lines survive.
8. Triton gave a clod of earth to the Argonaut Euphemus as a token that his descendants would rule in Libya. From it grew the island of Thera, from which eventually the Greek colony of Cyrene was founded in Libya by the descendants of Euphemus.
9. There are many different accounts of the origin, functions, and death of Talus.
10. See Janet R. Bacon, *The Voyage of the Argo* (London: Methuen, 1925), Chapter 9. For

an attempt to retrace the journey, see T. Severin, *The Jason Voyage: The Quest for the Golden Fleece* (New York: Simon and Schuster, 1985).

MYTHS OF LOCAL HEROES AND HEROINES

Every district in the Greek world had its local heroes and heroines, whose legends were often associated with local cults. Some of these became famous throughout Greece, for example, Theseus of Athens and Bellerophon of Corinth. Some were important local heroes who are known for their spectacular punishments, like Ixion of Thessaly and Sisyphus of Corinth. Some, like Melampus of Thessaly, attracted folktales and cult practices that spread their fame to other areas. Some, like Ovid's Pyramus and Thisbe, have become famous because their legend has been preserved by a master storyteller like Ovid. In this chapter we discuss some of the legends that are associated with particular localities.

THESSALY

IXION

Pindar tells the myth of Ixion, king of the Lapiths, son of Phlegyas (*Pythian Odes* 2. 21–48):

 They say that Ixion, upon the winged wheel that rolls in every direction, by the orders of the gods says this to mortals: “pay back the one who does you good with gentle recompense.” He learned this clearly. For he obtained a sweet life among the children of Cronus, yet he did not long enjoy happiness. For with mad thoughts he loved Hera, whom the bed of Zeus with its many pleasures had as his portion. But Pride urged him on to overbearing folly, and soon the man obtained a special woe, suffering what was reasonable. Two crimes bring him lasting labor: the first, because he was the first hero to shed kindred blood amongst mortals, not without clever planning; the second, that he made trial of the wife of Zeus in the deeply hidden marriage chamber. But his unlawful passion cast him into overwhelming evil when he approached the bed, since he lay beside a cloud, ignorant man, a sweet deception. For in appearance it was like the daughter of Cronus, the greatest of the daughters of the son of Uranus. The hands of Zeus put it there to deceive him, a beautiful cause of suffering. And he accomplished his own destruction, bound to the four spokes. Cast down in ineluctable fetters he proclaims his message to all. To him she [i.e., the cloud, *Nephele*] bore a monstrous child, alone, without the Graces, a solitary child that

had no honor amongst human beings nor in the homes of the gods. This she nursed and named it Centaurus. And it mated with the mares in Magnesia, in the foothills of Pelion, and from them sprung a wondrous host, like both parents, below like their mother, above like their father.

We have already encountered Ixion as a sinner being punished in the Underworld (p. 345). Originally his punishment was in the sky. He was the first to shed kindred blood. He invited his father-in-law Eioneus to come and collect the price that Ixion was to pay for his bride, Dia. Eioneus came, but fell into a pit of burning coals that Ixion had dug and camouflaged. Since this was a new crime, no mortal was able to purify Ixion, and Zeus himself purified him, receiving him as a guest at his own hearth. Yet Ixion repaid him with a second crime, the attempt on Hera. Pindar describes the deception practiced by Zeus and the punishment of Ixion, bound to the wheel.

CENTAURS AND LAPITHS

The cloud (Nephele) that Ixion had impregnated gave birth to the monster Centaurus, which mated with the mares that grazed the slopes of Mt. Pelion and became the father of the Centaurs, creatures with a human head and torso and the legs and body of a horse. The most famous centaur was Chiron, who differs from the others in that he was wise and gentle, skilled in medicine and music.¹ Pindar calls him the son of Cronus and the nymph Philyra. The other centaurs are generally portrayed as violent beings, and their best-known legend is that of their fight with the Thessalian tribe of the Lapiths.

The Lapith chieftain Pirithoüs was the son of Ixion, and the centaurs were invited to his wedding. At the feast they got drunk and attempted to carry off the bride, Hippodamia, and the other Lapith women. The violent scene was frequently represented in Greek art, for example, in the west pediment of the temple of Zeus at Olympia and in the metopes of the Parthenon at Athens. The battle is described at length in the twelfth book of Ovid's *Metamorphoses*.

Another Lapith was Caeneus. Born a girl, Caenis, she was seduced by Poseidon, who then granted her anything she wanted. She asked to be turned into a man and to become invulnerable. As a man, Caeneus set up his spear and ordered people to worship it. This impiety led Zeus to bring about his death. During the battle at the wedding of Pirithoüs and Hippodamia he was attacked by the centaurs, who buried him under the enormous pile of tree trunks that they hurled at him. Either his body was driven down into the Underworld by their weight or else a yellow-winged bird emerged from the pile, which the seer Mopsus announced to be Caeneus transformed.

PELEUS

On the southern border of Thessaly lies Phthia, and its prince was Peleus, the father of Achilles. He was the son of Aeacus, king of Aegina, and brother of Telamon. For killing his half-brother Phocus, he had to leave Aegina and came

Deidamia and Eurytion. Marble group from the west pediment of the Temple of Zeus at Olympia, ca. 460 B.C. The wife of Pirithoüs, Hippodamia (or Deidamia) fights off the drunken centaur, Eurytion, at her wedding feast. This is the principal group to the viewer's left of Apollo, the central figure (see p. 246). (*Olympia, Museum.*)

to Eurytion of Phthia, who purified him and gave him part of his kingdom. Peleus accompanied Eurytion on the Calydonian boar hunt (see pp. 608–612) and accidentally killed him with a javelin intended for the boar. He went into exile again, and was purified by Acastus, son of Pelias and king of Iolcus.

Now the wife of Acastus, Astydamia, fell in love with Peleus; and when he refused her advances, she accused him before her husband of trying to seduce her.² Rather than kill his guest, Acastus took him hunting on Mt. Pelion, where he left him asleep, but not before hiding his sword (a gift from Hephaestus) in a pile of dung. Peleus awoke to find himself surrounded by wild animals and centaurs, who would have killed him had not Chiron protected him and given him back his sword.³

When Zeus avoided a union with Thetis, whose son was destined to be greater than his father (see pp. 90 and 147), she was given to Peleus because of his virtue. The wedding feast was celebrated on Mt. Pelion, and all the gods and goddesses came as guests. With them came Eris (Discord) as an uninvited guest, bringing the apple that eventually led to the judgment of Paris and the Trojan War. Peleus returned to Phthia where he became the father of Achilles. Thetis soon left Peleus, angry because he interrupted her while she was making Achilles immortal.⁴

After the death of Achilles, Peleus defended Andromache at Delphi against Orestes and Hermione, who had killed his grandson Neoptolemus, the son of Achilles. At the end of Euripides' tragedy *Andromache*, Thetis reappears and promises Peleus immortality and eternal reunion with her in her ocean dwelling.

SALMONEUS

A group of Thessalian stories is associated with the family of Aeolus (see Figure 24.1, p. 574). Salmoneus, a son of Aeolus, left Thessaly and founded Salmone in Elis. He dressed himself as Zeus and imitated the god's thunder and lightning by driving in a chariot with brazen vessels attached to it and hurling lighted torches until Zeus killed him with his thunderbolt. Vergil describes his crime and fate (*Aeneid* 6. 585–594):

 I saw Salmoneus also being cruelly punished, who imitated the flames of Jupiter and the thunder of Olympus. He drove arrogantly through the Greek states and the city in the middle of Elis, riding in a chariot drawn by four horses, and he demanded that he be honored like a god. He was mad, because he tried to imitate the storm-clouds and the lightning that cannot be imitated with bronze and the clatter of horses' hooves. But Jupiter, all-powerful, hurled his thunderbolt through the thick clouds and cast him headlong down with a violent whirlwind.

CEYX AND ALCYONE

Ceyx, king of Trachis and son of Eosphoros (Lucifer, the Morning Star), and his wife Alcyone, daughter of Aeolus, called themselves Zeus and Hera. They were

punished by being turned into sea-birds. In Ovid, however, they are romantic lovers. Ceyx left Trachis on a sea voyage and drowned during a storm. Alcyone, who had been left in Trachis, learned of her husband's death in a dream. She found his corpse washed up on the shore and in her grief she became a sea-bird. As she flew by the corpse and touched it, it came to life and became a bird. For seven days each winter Aeolus forbids the winds to blow while the halcyon (*alcyone*) sits on the eggs in her nest as it floats upon the waves.

TYRO

Tyro, daughter of Salmoneus, was loved by Poseidon, who disguised himself as the Thessalian river Enipeus (Homer, *Odyssey* 11. 245):

 In the form of Enipeus did the Earthshaker lie by her at the mouth of the ed-dying river. About them rose a crested wave, mountainous in size, which hid both god and mortal woman.

The children born of this union were twins, Neleus and Pelias. Pelias became king of Iolcus, while Neleus founded Pylos (in Messene), which was sacked by Heracles. Neleus and all his sons, save only Nestor, were killed.⁵ Tyro later married her uncle Cretheus, the founder and king of Iolcus, and by him she became the mother of Aeson, Pheres, and Amythaon. Aeson was the father of Jason, and Pheres, founder of Pherae, was the father of Admetus, husband of Alcestis. In order to marry Alcestis, Admetus had to perform the task of harnessing a lion and a boar together to a chariot.⁶

BIAS AND MELAMPUS

The children of Amythaon were Bias and Melampus (see Figure 24.1, p. 574). Melampus was a seer with the power of understanding the speech of animals. He had honored a pair of snakes killed by his servants by burning their bodies and rearing their young, who later licked his ears and so enabled him to understand the tongues of animals and birds, and from them know what was going to happen.

Bias was a suitor for the hand of Pero, daughter of Neleus, for whom the bride-price was the cattle of Phylacus, the king of Phylace (in Phthia). He appealed to Melampus for help, and Melampus agreed to get the cattle, even though he knew he would have to spend a year in prison at Phylace. The cattle were guarded by a monstrous dog, and Melampus was caught in the act of stealing them and imprisoned. After nearly a year, he heard two woodworms saying to each other that they had very nearly finished gnawing through the roof-beams of the cell. He insisted on being moved to another cell, and shortly afterward the first cell collapsed. Phylacus then set Melampus free and asked him how to cure the impotence of his son Iphiclus. Melampus agreed to tell him

on condition that he be given the cattle. He sacrificed a pair of bulls, and from a vulture that was feeding on their flesh, he learned that Iphiclus' debility was the result of being frightened as a child while watching his father gelding some rams. On that occasion, Phylacus had stuck the knife, still bloody, into an oak tree, and the tree's bark by now covered it over. If it could be found and the rust from its blade scraped off and put in Iphiclus' drink for ten days, his impotence would cease. All this came to pass and Iphiclus became the father of two sons, Podarces and Protesilaüs. Melampus was given the cattle, which he drove back to Pylos and handed over to Neleus. In return he got Pero and gave her to Bias.

The myth of Melampus is like the tenth Labor of Heracles. He must bring back cattle from a distant place guarded, like Geryon's Erythia or Hades itself, by a dog. Like Heracles, Melampus is the bringer of cattle and even the conqueror of death itself.⁷

Other legends of Melampus are located in the Peloponnese. According to Herodotus (2. 49), he introduced the rituals of Dionysus to Greece. At Tiryns the daughters of King Proetus resisted Dionysus, who caused them to rush over the countryside, leaving their homes and killing their children. In return for half of the kingdom, Melampus cured the madness of the daughters of Proetus by joining a group of strong young men in performing a kind of war dance, although one daughter, Iphinoë, died during the pursuit. This myth was connected with the festival of the Agriania, which involved a ritual pursuit of women by night and a return the next day to the normal order of society. It was celebrated at Orchomenus and at many other places in Greece.

Amphiaräus, a seer and one of the Seven against Thebes, was a descendant of Melampus. The wife of Proetus, Stheneboea, is prominent in the myth of Bellerophon (see pp. 613–615).

BOEOTIA

The principal myths of Boeotia are those of Thebes, involving the families of Cadmus and Laius (see Chapter 17). At Orchomenus, the daughters of Minyas resisted Dionysus and were driven mad, tearing apart one of their children, chosen by lot, and rushing out of the city. Unlike the daughters of Proetus, the Minyads did not return to normal life; they became winged creatures of the night, either owls or bats. Clymene, however, one of the daughters of Minyas, appears as the wife of five different husbands and thus becomes both the aunt of Jason (through her marriage to Pheres) and the mother (by Iasus) of Atalanta.

THE LOVES OF HELIUS

As wife of Helios (the Sun), Clymene became the mother of Phaëthon (see pp. 57–58). Helios also loved the Eastern princess Leucothoë, daughter of the Persian king Orchamus. Disguising himself as Eurynome, her mother, he seduced

her. Another of the lovers of Helios, the Oceanid Clytië, jealous because Helios preferred Leucothoë to her, told Leucothoë's father of the affair. Orchamus buried Leucothoë and Helios was too late to save her. He shed drops of nectar on her corpse, which grew into a frankincense tree. Clytië could not persuade Helios to forgive her nor could she recover his love. She sat, following the Sun's progress with her eyes until she turned into a sunflower, which forever turns its face toward the sun.

TROPHONIUS

The famous oracle of Trophonius was situated at Lebadeia in northern Boeotia. He is a chthonic hero (his name means "he who fosters growth") and he was therefore consulted in a subterranean setting with an awesome ritual. His legend is similar to the story of the Egyptian Pharaoh Rhampsinitus (Rameses), which Herodotus tells (2. 121). Trophonius and his brother Agamedes were skilled builders, sons of Erginus of Orchomenus. They built for King Augeas of Elis (or, as some say, the Boeotian king Hyrieus) a treasury with a movable stone, which they used to steal the king's treasure. In time the king set a trap for the unknown thief, and Agamedes was caught. At his own suggestion his head was cut off by Trophonius, who then escaped carrying the head. He fled to Lebadeia, where he was swallowed up by the earth and thereafter worshiped as a god.

Pindar (frags. 2–3), however, has a different story of the brothers' death, one very similar to Herodotus' story of the Argives Cleobis and Biton (see pp. 136–137). In this version, Trophonius and Agamedes built the temple of Apollo at Delphi.⁸ When they asked the god for their wages, he said he would pay them on the seventh day. On that day they fell asleep, never to wake.

AETOLIA

THE CALYDONIAN BOAR HUNT

Among the descendants of Aeolus was Oeneus, king of Calydon and father of Heracles' wife Deïanira; his son was Meleager. Shortly after the birth of Meleager, the Fates (Moirai) appeared before his mother, Althaea, and told her that Meleager would die when a log, which was burning on the hearth, had burned out. Althaea snatched up the log, extinguished it, and kept it in a chest. Years later, when Meleager was a young man, Oeneus offended Artemis by failing to sacrifice her share of the first fruits, and she sent a huge boar to ravage Calydon.

Meleager gathered many of the noblest Greek heroes to hunt the boar, and with them came Atalanta, daughter of the Boeotian king Schoeneus. In the hunt, after several heroes had been killed, Atalanta was the first to wound the boar. Meleager gave it the coup de grâce and therefore received the boar's skin, which he presented to Atalanta. His uncles, the brothers of Althaea, were insulted at

being given less honor than Atalanta, and in the ensuing quarrel Meleager killed them. In grief and anger at their deaths, Althaea took the unburned log from its chest and cast it on the fire. As it burned to ashes, Meleager's life ebbed away. Both Althaea and Meleager's wife Cleopatra hanged themselves, while the women who mourned for him at his funeral became guinea fowl, which the Greeks called *meleagrides*.

This is Ovid's version of the Calydonian boar hunt. Homer, however, says that Artemis sent the boar to ravage the land during a war between the Calydonians and the Curetes. Meleager killed it and led the Calydonians in the battle against the Curetes over the boar's body. But his mother Althaea cursed him "because of the murder of her brother" and called on Hades to kill him (*Iliad* 9. 553–572). Meleager withdrew in anger. Then he relented, went back into battle, and saved Calydon. Homer says that the Calydonians did not reward him as they had promised, and he implies that Meleager died as a result of Althaea's curse.

In the Underworld, Meleager's ghost talked with Heracles, and in Bacchylides' fifth *Epinician Ode* (93–154) he tells Heracles his story, in which the Homeric details of the boar and the battle with the Curetes are combined with the burning log:

 There [i.e., in the battle with the Curetes] I killed with many others Iphiclus and Aphares, my mother's swift brothers; for bold Ares does not distinguish a friend in war, but blind are the weapons hurled from one's hands. My mother, ill-fated and unfearing woman, planned my death. She burned the log that brought me a speedy death, taking it from the cunningly made chest. It had the *Moirai* [i.e., allotted portion] fated to be the limit of my life. And my sweet life ebbed, and I knew that I was losing my strength—alas!—and unhappily I wept as I breathed my last, leaving lovely youth.

In this version, although Meleager accidentally kills his uncles in battle, their sister still avenges their death, her ties to her father's family being even stronger than those to her son. As Bacchylides also tells us, Heracles responded to Meleager's story with a promise to marry Deianira, Meleager's sister, when he returned to the world of the living (see p. 529).

Nowhere in Homer or Bacchylides is there any mention of Atalanta, nor is there any complete account of her part in the legend earlier than Ovid. She appears in the François Vase, which was made in about 575 B.C., a century before Bacchylides' poem. About 165 years later, in 411–410 B.C., Euripides says in his play *Phoenissae* (1104–1109) that Atalanta's son, Parthenopaeus, one of the seven heroes who attacked Thebes, had the device on his shield of "Atalanta subduing the Aetolian boar with her arrows shot from afar," whereas in the François Vase she brandishes a hunting spear and marches in the second rank, behind Meleager and Peleus. Finally, her companion on the vase is named Milanion, who wins the Arcadian Atalanta as his bride in yet another tale.

The François Vase. Attic black-figure krater by the potter Ergotimos and the painter Kleitias, ca. 575 B.C.; height 30 in. There are four bands of mythological scenes, a fifth band with plants and animals, a battle of pygmies and cranes on the foot, and more figures, including Ajax carrying the corpse of Achilles, on the handles. (Detail 1, below) The first detail shows the top bands on one side: Meleager and Peleus thrust at the Calydonian boar with their

spears, with Atalanta and Milanion behind them. A dead hound and hunter lie on the ground, and other hunters (all named) attack or prepare to attack the beast. The band below shows the chariot race from the funeral games for Patroclus: Diomedes leads Damasiippus, and the prize, a tripod, is shown below to the left. (*Detail 2, top*) The second detail shows the top bands on the other side: Theseus and the Athenian boys and girls (thirteen in the complete band) begin the Crane dance [see p. 561 for the location of the Dance at Delos, not Crete] that celebrates their release, as the sailors in the Athenian ship that will take them home cheer. One sailor swims eagerly to land. In the band immediately below is the battle of Centaurs and Lapiths. (*Detail 3, bottom*). In the third detail, the band below the chariot race shows the wedding procession of Peleus and Thetis, who are on the chariot to the left. The lower band shows Achilles pursuing Troilus: on the left is the fountain-house where Polyxena (sister of Troilus) had been drawing water. To its right a Trojan woman gesticulates in alarm, and next to her (in order) are Thetis, Hermes, and Athena, the latter urging on Achilles (the top half of whose body is missing). Troilus rides a horse beside a second riderless horse, and beneath lies Polyxena's amphora, which she has dropped in her flight. She runs in front of Troilus (her top half is missing) toward the walls of Troy, from which two armed warriors, Hector and Polites, are emerging. In front of Troy sits Priam, who is receiving a report from Antenor about the danger to Troilus. (*Museo Archeologico, Florence. Photograph courtesy of Hirmer Verlag, München.*)

From all this we can conclude that several legends have been conflated around Meleager and Atalanta, whose myths were originally separate. Ovid created a unified narrative from these different elements.

THE ARCADIAN ATALANTA

Atalanta, daughter of the Boeotian Schoeneus, is easily confused with Atalanta, daughter of the Arcadian Iasus. The latter also is a virgin huntress who joins in the Calydonian boar hunt and the Argonauts' expedition. As a baby she was exposed by her father and nurtured by a bear that suckled her until some hunters found her and brought her up. Grown up, she was recognized by her father, but she refused to let him give her in marriage unless her suitor could beat her in a footrace. Those who lost were executed. After many young men had died in the attempt, Milanion (also called Hippomenes) raced her. He had three golden apples given him by Aphrodite. These he dropped one by one during the race so as to delay Atalanta. So he won the race and his wife, but in their impatience to lie together they made love in a sacred place (a precinct of either Zeus or Cybele), and for this sacrilege they were turned into a lion and lioness.

CORINTH

The Corinthian poet Eumelos identified the Homeric "Ephyra" with Corinth. Homer (*Iliad* 6. 152–159) says:

 There is a city, Ephyra, in a corner of horse-rearing Argos, and there lived Sisyphus, who was the most cunning of men, Sisyphus, son of Aeolus. He was father to Glaucus, and Glaucus was father to virtuous Bellerophon, to whom the gods gave beauty and lovely manliness. But Proetus devised evil against him in his heart and drove him out from the people of Argos, since Bellerophon was a better man than he. For Zeus had made him subject to Proetus.

Originally Ephyra was no more than a minor city in the kingdom of Argos (which includes Tiryns, normally given as the city ruled by Proetus), and its rulers, Sisyphus and his grandson Bellerophon, were minor chieftains subject to the king of Argos. By identifying Ephyra with Corinth, Eumelos magnified the status of the city and of its rulers. According to him, Sisyphus became the king of Corinth (which had been founded by the son of Helius, Aeëtes) after Medea left. Others make Sisyphus the founder of Corinth.

SISYPHUS

Sisyphus, a son of Aeolus and brother of Salmoneus, Cretheus, and Athamas, came from Thessaly to Ephyra. Ino, the wife of his brother Athamas, leaped into the sea with her child Melicertes and became the sea-goddess Leucothea, while her child

became the god Palaemon (see note 3 on p. 304). Melicertes' body was brought ashore on the Isthmus of Corinth by a dolphin. Sisyphus found and buried it, instituting the Isthmian Games in the child's honor. At first the games were mainly religious and ritualistic; Theseus is said to have founded them a second time and thus given them the athletic character that they acquired in historical times.

The legends of Sisyphus are less concerned with him as king than as the craftiest of men. One story makes him the father of Odysseus, whose mother, Anticlea, he seduced before she married Laertes. Anticlea's father was the master thief Autolycus, son of Hermes, who gave him the power to steal whatever he wished undetected. For a long time he was in the habit of stealing Sisyphus' cattle until Sisyphus branded the animals on their hooves and so easily recognized and recovered those that Autolycus had stolen. The two heroes became friends, and Autolycus allowed Sisyphus to lie with Anticlea. Thus (in this version) Sisyphus, not Laertes, was really the father of Odysseus.

Sisyphus' greatest exploit was outwitting Death (Thanatos) himself. In its simplest form it is alluded to by the seventh-century poet Alcaeus of Lesbos (frag. 110. 5–10):

 For Sisyphus also, the son of Aeolus, thought that he was the cleverest of men to overpower Death. Yet, although he was crafty and crossed swirling Acheron twice (avoiding his destiny), the King [Zeus], son of Cronus, devised labor for him beneath the black earth.

Sisyphus aroused the anger of Zeus by telling the river-god Asopus that Zeus had carried off his daughter Aegina, and Zeus sent Death to carry Sisyphus off. Sisyphus chained Death, and as long as he was bound, no mortals could die. Eventually Ares freed Death and handed Sisyphus over to him, but before he went down to the Underworld, Sisyphus left instructions with his wife, Merope, not to make the customary sacrifices after his death. When Hades found that no sacrifices were being made, he sent Sisyphus back to remonstrate with Merope. So he returned to Corinth and stayed there until he died in advanced old age. It was for his revelation of Zeus's secret that he was punished in the Underworld by having to roll a huge rock uphill only to have it roll down again (see p. 333).

Sisyphus, therefore, combines a number of heroic and folktale elements in his legend. He is the founder of a city and of games and rituals in honor of a god. But he is also the trickster, peer of the master-thief Autolycus, and deceiver of Death itself.

BELLEROPHON

The greatest of Corinthian heroes was Bellerophon, grandson of Sisyphus. His legend is told in Homer by the Lycian leader Glaucus, when he meets Diomedes in battle. It is set both in the Argolid and in Asia Minor. Bellerophon may even have been introduced into Greek legend from the East.

Born in Corinth, he left home, perhaps because of blood-guilt after unintentionally killing a brother, and went to the court of Proetus, king of Tiryns, who purified him. There Proetus' wife Stheneboea (or Antea, as Homer calls her) fell in love with him. When he rejected her, she accused him before Proetus of trying to seduce her. Proetus therefore sent Bellerophon to his wife's father Iobates, king of Lycia, with a sealed letter that told of Stheneboea's accusation and asked Iobates to destroy Bellerophon. Accordingly, Iobates sent the hero on a number of dangerous expeditions (Homer, *Iliad* 6. 179–193):

 First he bid him kill the fearsome Chimaera, which was of divine, not mortal, breed—a lion in its forepart with a serpent's tail and in the middle a goat, and it breathed fire. He killed it, trusting in the gods' signs. Next he fought the mighty Solymi, and this was his most violent battle with men. Third, he slew the warrior Amazons. And as he returned, the king devised another plot against him; he chose the most valiant men in all Lycia and set them in ambush. Not one of them returned home, for gallant Bellerophon killed them all.

So when the king realized that he was truly of divine descent, he kept him there in Lycia and gave him his daughter and the half of his kingdom.

Bellerophon became the father of Hippolochus (Glaucus' father) and of Isandrus, who was killed fighting the Solymi, and of a daughter, Laodamia. She was loved by Zeus and by him became the mother of Sarpedon, whom Patroclus killed at Troy. Laodamia was "killed by Artemis in anger," and Bellerophon ended his days in sorrow; "hated by the gods he wandered over the Alean plain alone, eating out his heart and avoiding the paths of men." (Homer, *Iliad* 6. 200–202).

In Homer, Bellerophon is the hero who performs certain tasks and wins the prize of a kingdom and a princess. His tragic end, to which Homer refers in vague terms, is the theme of Euripides' tragedy *Bellerophon*, in which Bellerophon tries to mount to heaven itself and fails.

Both Euripides and Pindar introduce the winged horse Pegasus into the myth of Bellerophon. Poseidon gave it to him, but he could not master it, as it stood by the Corinthian spring Pirene, until Athena appeared to him in a dream and gave him a magic bridle with golden trappings (Pindar, *Olympian Odes* 13. 63–92):

 Much did he labor beside the spring in his desire to harness the offspring of the snake-girdled Gorgon, until the maiden Pallas brought him the gold-accoutred bridle, and quickly his dream became reality. "Are you sleeping," said she, "King, descendant of Aeolus? Come, take this charm to soothe the horse and sacrifice a white bull to your forefather Poseidon, the Tamer of Horses."

These were the words which the maiden with the dark aegis seemed to speak as he slept; he leaped to his feet and took the divine object that lay beside him. And strong Bellerophon, after all his efforts, caught the winged horse by putting the gentle charm around its mouth. Mounting it straightway, he brandished his arms, himself in armor of bronze. With it he slew the archer army of women, the Amazons, shooting them from the unpeopled bosom of the cold upper air, and he slew the fire-breathing Chimaera and the Solymi. His fate I shall not mention; the ancient stalls of Zeus's stable in Olympus shelter the horse.

Bellerophon, then, met his end in attempting to rise too high. This theme of Euripides' *Bellerophon* is also expressed in Pindar's words (*Isthmian Odes* 7. 60–68):

☞ If any man sets his eye on a distant target, he is too short to reach the brass-paved home of the gods. For winged Pegasus hurled his rider Bellerophon, who wished to enter the palaces of Heaven and join Zeus' company.

Euripides also wrote a tragedy, *Stheneboea*, in which Bellerophon returned to Tiryns after his labors in Lycia and killed Stheneboea by luring her onto Pegasus and throwing her down as they flew high over the sea. For Euripides, Bellerophon's end is that of a human being who fails in a high endeavor, but originally he must have been punished, like Tantalus and Ixion, because he abused the friendship of the gods. Neither of Euripides' plays is extant.

ARION OF LESBOS

Herodotus (1. 23–24) tells the story of the musician Arion of Lesbos. He had traveled round Greece and the Greek cities of Italy teaching the ritual of Dionysus, particularly the singing of the dithyramb, the sacred choral song performed in honor of the god. He was particularly favored by Periander, tyrant of Corinth, and he decided to return to Greece from Italy in a Corinthian ship. Plotting to steal the money Arion had gained from his performances in Italy, the sailors threw him overboard, allowing him first to give a final performance standing on the stern of the ship. When he jumped into the sea, a dolphin saved him and carried him on its back to the sanctuary of Poseidon at Cape Taenarum (the southern cape of the Peloponnese). From there he made his way back to Corinth, where he told Periander what had happened and appeared at Periander's behest to confound the sailors when they told him that Arion was safe in Italy.

Periander was a historical figure who ruled over Corinth around 600 B.C., and Arion was perhaps also historical. He was credited with the invention of the dithyramb. Dionysus is associated with dolphins in the myth of the sailors narrated in the seventh *Homeric Hymn* (see pp. 295–296), and Herodotus tells how there was a statue of a man on a dolphin (said to have been dedicated by Arion himself) in the temple of Poseidon at Taenarum. Thus the story of Arion is undoubtedly connected with the worship of Poseidon and Dionysus.

OTHER PELOPONNESIAN LEGENDS

ARETHUSA

The river-god Alpheus loved the nymph Arethusa, a follower of Artemis.⁹ As he pursued her along the river bank, she prayed to Artemis, who covered her with a cloud; as the god watched the cloud, both it and the nymph melted into a stream for which Artemis cleft the earth. Flowing underground (where it was united with the waters of Alpheus) and under the sea, it emerged at Syracuse in Sicily, where it is still called by the same name, the fountain Arethusa.

IAMUS

A daughter of Poseidon, Evadne, left her newborn son Iamus, whose father was Apollo, on the banks of the Alpheus. Evadne's foster father Aepytus, aware of her condition, inquired about the child at Delphi and learned that he would be the greatest of human seers. He returned, found the child (who had been miraculously fed on honey by two serpents), and brought him up. When he grew up, Poseidon and Apollo brought Iamus to Olympia, where he received the gift of prophecy. His oracle, says Pindar, was established by Heracles upon the altar of Zeus at Olympia.¹⁰

THE ISLANDS

The Aegean islands with the most important religious cults were Delos and Samothrace. At Delos Apollo was honored (see Chapter 11), and in the mysteries on Samothrace the Cabiri were worshiped as "the great gods" (*theoi megaloi*: see p. 365).

DELOS

Delos was the home of Anius, son of Apollo, who was both his father's priest and king of the island at the time of the Trojan War. He had three daughters, Elaïs (Olive Girl), Spermo (Seed Girl), and Oeno (Wine Girl), who received from Dionysus the power of producing, respectively, oil, grain, and wine. Agamemnon attempted to compel them to go to Troy with the Greeks to supply the army with these provisions. As they resisted and tried to escape, Dionysus turned them into white doves; ever after, doves were sacrosanct at Delos.

CEOS

Ceos was the home of Cyparissus, a boy loved by Apollo. His sad story is told by Ovid (*Metamorphoses* 10. 106–142). On the island was a beautiful stag, a favorite of Cyparissus, which he accidentally killed with his javelin. As he grieved he became a tree, the cypress, ever after called by his name and associated with mourning.

Ovid (*Heroides* 20 and 21) also relates how a Cean girl, Cydippe, was loved by Acontius, a youth who was not her social equal. He left in her path an apple on which were inscribed the words, "I swear before Artemis to marry only Acontius." She picked it up and read the words out loud, thus binding herself by the vow. Each time her parents found a suitable husband for her, she fell so ill that she could not be married; eventually the truth was revealed, and she and Acontius were united.

RHODES

The island of Rhodes was sacred to Helios, the Sun. When Zeus was dividing up the lands of the world among the gods, Rhodes had not yet appeared above

the surface of the sea. Helios was accidentally not given a share, but he refused Zeus' offer of a redivision, for he could see the future island below the sea, and he took it as his possession when it appeared. There he loved the island's nymph Rhode, and one of her seven sons became the father of the heroes of the three principal cities of Rhodes, Camirus, Ialysus, and Lindos. Even late in historical times, the people of Rhodes threw a chariot and four horses into the sea every October as a replacement for the old chariot and horses of the Sun that would be worn out after the labors of the summer.

Rhodes was associated with several figures of saga. From Egypt came Danaüs, who visited the island on his journey to Argos and there founded the great temple of Athena at Lindos. A son of Heracles, Tlepolemus, murdered his uncle Licymnius at Tiryns, and on the advice of Apollo fled to Rhodes. He later led the Rhodian contingent in the Trojan War. Rhodes was also the home of the Telchines, who were skilled craftsmen and metal-workers. They were also credited with having the evil eye; and for this reason (says Ovid), Zeus drowned them in the sea.

LESBOS

On the island of Lesbos lived Macareus, a son of Aeolus, whose story was told by Euripides in his lost play *Aeolus*. He fell in love with his sister Canace and by her became father of a child. When Aeolus discovered the truth, he sent Canace a sword with which to kill herself, and Macareus also committed suicide.

CYPRUS

The island of Cyprus is especially associated with Aphrodite (Venus), who was worshiped particularly at Paphos. For the story of Pygmalion and Galatea, parents of Paphos, who gave his name to the city, see pages 175–177. In the Cypriot city of Salamis lived Anaxarete, who scorned her lover, Iphis. In despair, he hanged himself at the door of her house, yet she still showed no pity. As she was watching his funeral procession pass her house, she was turned into stone. Ovid says that her stone figure became the cult statue of Venus at Salamis, with the title of Venus the Beholder (*Venus Prospiciens*).

CRETE

Crete is the setting for Ovid's legend of Iphis, daughter of Ligdus (different from the boy Iphis who loved Anaxarete). Her mother Telethusa, when pregnant, was ordered by Ligdus to expose the baby if it proved to be a girl. Encouraged by a vision of the Egyptian goddess Isis, Telethusa kept the baby girl, giving her a name suitable either for a boy or a girl and dressing her like a boy. Thus deceived, Ligdus betrothed Iphis to another girl, Ianthe, whom Iphis did indeed come to love. On the night before they were to be married, Telethusa prayed to Isis to pity Iphis

and Ianthe (for Ianthe was ignorant as yet of the real sex of her lover). The goddess heard her prayer: Iphis became a boy and next day married his Ianthe.

ASIA MINOR

DARDANUS

Electra, daughter of Atlas, had two sons by Zeus, Iasion and Dardanus. On the death of Iasion in Samothrace, Dardanus sailed to the Troad, where Teucer, son of the river-god Scamander, was king. There Dardanus married the king's daughter and built a city called by his name. On the death of Teucer, the land was called Dardania and its inhabitants (as in Homer) Dardani. From Dardanus was descended the Trojan royal house.

HERO AND LEANDER

Leander, a young man from the city of Abydos on the Asiatic shore of the Hellespont, loved Hero, priestess of Aphrodite in Sestos on the European shore. He swam the Hellespont each night to visit her, guided by a light that she placed in a tower on the shore. One stormy night the lamp was extinguished, and Leander, bereft of its guidance, drowned. Next day his body was washed up on the shore near the tower, and Hero in grief threw herself from the tower to join her lover in death.

BAUCIS AND PHILEMON

This chapter ends with three stories related by Ovid that are almost certainly not Greek in origin, although the names of the principal characters are Greek. From Phrygia comes the legend of Baucis and Philemon, a poor and pious old couple who unwittingly entertained Zeus and Hermes in their cottage. The gods, who had not been received kindly by anyone else on their visit to the earth, saved Baucis and Philemon from the flood with which they punished the rest of Phrygia, and their cottage became the gods' temple (see Color Plate 21). Being granted one wish each, they prayed that they might together be priest and priestess of the shrine and die together. And so it happened; full of years, they simultaneously turned into trees, an oak and a linden.

BYBLIS AND CAUNUS

Byblis, daughter of Miletus, fell in love with her brother, Caunus. Unable either to forget her love or to declare it, she wrote a letter to Caunus confessing it. In horror he left Miletus (the city named after his father), and Byblis followed him. Still unable to achieve her desire, she sank down to the ground in exhaustion and became a fountain that was called by her name.

Pyramus and Thisbe, by Hans Wechtlin (ca. 1480–ca. 1526). Chiaroscuro woodcut, ca. 1515; $10\frac{1}{2} \times 7$ in. Ovid's tale is set in a German Renaissance landscape. Thisbe comes upon Pyramus dying beneath the mulberry tree. The Latin inscription means: "Pyramus, Thisbe's lover, shows by his death what power raging Love, clinging to his bones, has in his veins." The blindfolded Cupid on the fountain further alludes to Pyramus' love, which so blinded him to rational thought that he rashly took his own life. (German. © The Cleveland Museum of Art, John L. Severance Fund, 50.396.)

PYRAMUS AND THISBE

Ovid's setting for the story of Pyramus and Thisbe is Babylon. Perhaps Cilicia in southern Asia Minor is the home of the legend, for the river Pyramus was there, and the name Thisbe was variously associated with springs in Cilicia or Cyprus.

Pyramus and Thisbe were next-door neighbors in Babylon, forbidden by their parents to marry or even to meet each other. They conversed through a crack in the common wall of their houses and arranged to meet at the tomb of Ninus outside the city. Thisbe arrived first only to be frightened by a lioness that had come to drink in a nearby fountain. As she fled, she dropped her veil, which the lioness mangled with her jaws, bloodstained from a recent kill. Pyramus came and found the footprints of the lioness and the bloodstained veil. He concluded that the lioness had eaten Thisbe and fell on his sword; as he lay dying, Thisbe returned and in grief killed herself with the same sword. They lay together in death beneath a mulberry tree, whose fruit, which before had been white, henceforward was black, in answer to Thisbe's dying prayer that it be a memorial of the tragedy.

This is one of Ovid's most beautifully told stories (*Metamorphoses* 4. 55–166), of which a paraphrase is at best a pale reflection. The structure of the tale was used by Shakespeare for the main plot of *A Midsummer Night's Dream*, with its meetings outside the city and lovers' errors, while countless people have enjoyed Shakespeare's hilarious yet pathetic burlesque of the tale presented by the "rude mechanicals" in the last act of the play.

NOTES

1. He taught Achilles, Jason, and Asclepius.
2. Pindar calls her Hippolyta. Similar stories are those of Bellerophon and Stheneboea and the biblical Joseph and Potiphar's wife (Genesis 39).
3. The magic sword is a folktale element in the legend.
4. Either by dipping him in the river Styx or by burning away his mortality (see pp. 312–313 for the similar story of Demophoön).
5. Homer (*Iliad* 11. 682–704) says that Neleus survived into old age.
6. For her recovery from the Underworld by Heracles, see p. 527.
7. There are many folktale elements in the legend, for example, the bridegroom's task, the magician who can understand the speech of animals, and the cure of disease by sympathetic magic (cf. Telephus, p. 454).
8. In the *Homeric Hymn to Apollo* (see p. 248) the god himself lays the foundations of the temple.
9. According to the sixth-century poetess Telesilla, Alpheus loved Artemis herself.
10. Divination was practiced by inspecting entrails of victims sacrificed at the altar, and Iamus was asked for omens.

PART THREE

The Nature of Roman Mythology

ROMAN MYTHOLOGY AND SAGA

The fundamental differences between Greek and Roman mythology account for the dominant influence of Greek myths over native Italian myths and Roman legends. The Italian gods were not as generally anthropomorphic as the Olympian gods, about whom the Greeks developed legends that they expressed in poetry and art of great power. The Roman gods were originally associated more with cult than with myth, and such traditional tales as were told about them did not have the power of Greek legends. In the third century B.C., when the first historians and epic poets began to write in Latin, the influence of Greek literature was already dominant. Many of the early authors were themselves Greeks, and were familiar with Greek mythology. Thus many Roman legends are adaptations of Greek legends, and to a varying extent they owe their present form to sophisticated authors such as Vergil and Ovid.

Roman mythology nevertheless had an independent existence in the cults of Roman religion and the legends of early Roman history. The roots of Roman religion lay in the traditions of pre-Roman Italic peoples such as the Sabines and Etruscans. The native Italian gods, however, became identified with Greek gods—Saturnus with Cronus, Jupiter with Zeus, and so on. The poet Ennius (239–169 B.C.) came from southern Italy and spoke Greek, Oscan, and Latin. He equated the twelve principal Roman gods with the twelve Olympians as follows:¹

 Iuno (Hera), Vesta (Hestia), Minerva (Athena), Ceres (Demeter), Diana (Artemis), Venus (Aphrodite), Mars (Ares), Mercurius (Hermes), Iovis (Zeus), Neptunus (Poseidon), Vulcanus (Hephaestus), Apollo.

Of these only Apollo is identical with his Greek counterpart. Of the others, the Italian fertility spirit, Venus, becomes the great goddess underlying the fertility of nature and human love. In contrast, the great Italian agricultural and war deity, Mars, is identified with Ares, one of the less important Olympians. The others more or less retain their relative importance.

As a result of these identifications Greek myths were transferred to Roman gods. In Ovid's *Metamorphoses*, for example, most of the myths of the Olympians are Greek, although the names of the gods are Roman. Some genuinely Roman or Italic legends, however, have been preserved in the poetry of Ovid, Vergil,

and Propertius (to name the three most important poets in this respect) and in the prose writers Cicero, Varro (a polymath and antiquarian who died at the age of eighty-nine in 27 B.C.), and Livy. The outline of other legends can be recovered from what is known of the cults and rituals of Roman divinities. Especially important in this respect is Ovid's *Fasti*, in which he describes the festivals of the first six months of the Roman calendar. He tells many legends of the gods, while describing their cults and explaining the origins of their rituals.

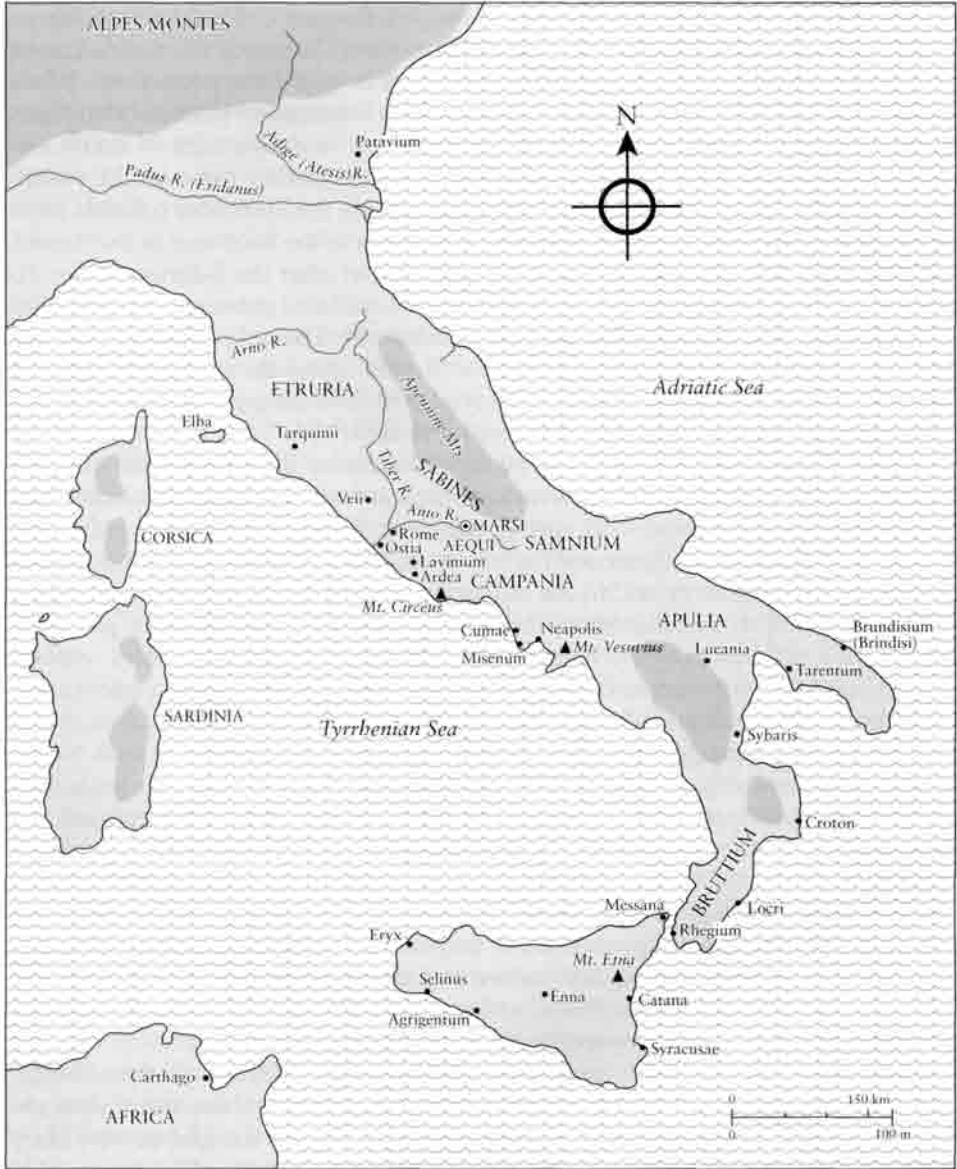

Legends attached to the early history of Rome are the Roman equivalent of saga. A few of these are associated with specific local heroes, of whom the most important are Aeneas and Romulus. A large group of legends associated with the early history of Rome idealized the past, and their central figures exemplify Roman virtues. Such idealizing was especially practiced in the time of Augustus (who reigned from 27 B.C. to A.D. 14), a period of reconstruction and revival of the supposed principles of the early Romans. All the authors named here as sources for Roman mythology were contemporaries of Augustus, and of them, only Varro (fifty-three years older than Augustus) and Cicero (forty-three years older) died before the Augustan reconstruction had begun. Thus the definition of myth as a "traditional tale" has a special coloring in Roman mythology. Livy justifies the process of idealization in the "Preface" to his history (sects. 6-10):

 I do not intend to accept or deny the truth of traditional legends about events before and during the founding of the city. These are more suitable for poetic fables than for reliable historical records. But one can excuse ancient legends because they make the origins of the city more august by uniting human and divine actions. If any nation has the right to consider its origins sacred and to ascribe them to the gods, it is the Roman people, for they claim that Mars is their ancestor and the father of the founder [Romulus].

THE ITALIAN GODS

JANUS, MARS, AND BELLONA

Among the gods of the Roman state, Janus takes first place; in formal prayers to the gods he was named first. He is a very ancient deity, and he has an equivalent in the Etruscan god, Culsans. He is the god who presides over beginnings, and in this connection we preserve his name in the month that begins our year. It is likely, however, that in his earliest form he was connected with water, especially with crossing places and bridges. Thus in the city of Rome there were five shrines to Janus, all placed near crossings over the river or watercourses, and he was intimately connected with the boundaries of the earliest settlements at Rome, the approaches to which required crossing the Tiber or one of its tributary brooks. As the city expanded, these early crossing-places lost their importance, and Janus' original functions were obscured. Yet they can be detected in later times; the gates of his shrine near the Argiletum entrance to the Forum were open in time of war and closed in time of peace. They were closed by Au-

Map 26.1. Roman Italy and Sicily

gustus with great ceremony, for example, to mark the end of the protracted civil wars that brought him to power. In the early days of Rome, the bridges would have been broken when the city was threatened by an enemy; an analogy for opening the gates of Janus in time of war would be raising a drawbridge over a moat.

In later times, "Janus" was used not only as the name of a deity but also as a common noun (a janus), which Cicero (*De Natura Deorum* 2. 67) defined as "a crossing-place with a roadway," in this recalling the god's early functions. While Janus' significance as a god of bridges waned, he attracted to himself other functions; he was the god of going in and coming out, and therefore of doors, entrances, and archways, as well as of beginnings. In another form, as the youthful god Portunus, he was god of harbors (which are the entrances to lands from overseas) and ferries. Portunus helped the winners of the boat race in the *Aeneid*.

There are few legends of Janus; it was said that after the Sabines, under Titus Tatius, had captured the Capitol they were kept from entering the Forum by jets of boiling water that Janus caused to gush forth. The only ancient statues of Janus surviving are two four-faced marble "herms" upon the parapet of the Pons Fabricius in Rome; on coins he is portrayed with two faces, for as a god of entrances and exits he could look both before and behind.

The Italian deity Mars (or Mavors) was much more important than Ares, his Greek equivalent. In origin he was an agricultural deity worshiped by many Italian tribes. His association with spring, the time of regeneration and growth, is shown by the use of his name for the month of March, which began the Roman year in the pre-Julian calendar. As an agricultural god, he is associated with a number of rural deities like Silvanus and Flora; the latter supposedly provided Juno with a magical flower whose touch enabled her to conceive Mars without any father. Mars sometimes has as his consort the Sabine fertility goddess Nerio, who is often identified with Minerva. Ovid tells how Mars asked Anna Perenna (the ancient goddess of the year) to act as his go-between with Nerio. After he had made love to Nerio, he found on unveiling her that his bride was none other than Anna, who was old and wrinkled and thoroughly enjoyed her deception. This, says Ovid, was the origin of jokes and obscenities at marriage parties.

Just as the Roman people turned from farming to war, so Mars became a war god, and this aspect became more important than his agricultural character. Sacrifices were offered to him before and after a battle, and a portion of the spoils was dedicated to him. The most famous of his temples at Rome was that of Mars Ultor (Mars the Avenger) vowed by Augustus at the battle of Philippi (42 B.C.) and dedicated forty years later. The Campus Martius (Field of Mars) was the open space outside the gates of the ancient city where the people assembled under arms and practiced their military skills. As the god of war, Mars often had the title Gradivus (perhaps meaning "the marcher"); he was also closely associated with the Sabine war deity Quirinus, with whom Romulus was later identified. In battle, Mars was generally accompanied by a number of lesser deities and personifications, of whom the war goddess Bellona is the best known. Bellona herself was often identified with the Greek personification of war, Enyo (connected with the title of Ares, *Enyalios*), and a temple was first dedicated to her in Rome in 296 B.C.

Mars is particularly associated with two animals, the wolf and the woodpecker. A she-wolf suckled his sons, the infants Romulus and Remus. The woodpecker, *picus*, was said in one legend to have been a Latin king Picus, whose wife was the nymph Canens (Singer). Circe, the magician, tried to seduce him, and when he rejected her, she turned him into a woodpecker. After searching in vain for him for six days and six nights, Canens wasted away into nothing more than a voice.

JUPITER

The great Italian sky-god was Jupiter, the forms of whose name are etymologically connected with those of other Indo-European sky-gods, including Zeus. At the end of the regal period (509 B.C.) the temple of Jupiter Optimus Maximus was built on the Capitoline Hill and the great sky-god became localized in a temple with a statue like a Greek city god. He shared the temple with Juno, the chief Italian goddess of women, and Minerva, an Italian fertility and war goddess who at Rome was worshiped principally as the patroness of handicrafts and wisdom. These three deities formed the "Capitoline triad."

Jupiter was called by many titles. In his temple on the Capitol he was worshiped as Jupiter Optimus Maximus (Best and Greatest). The great ceremonial procession of the Triumph wound its way through the Forum up to this temple. The triumphing general was robed as if he were a god, proceeding in his chariot amid the cheering crowds, with his soldiers around him and his prisoners before him. On the Capitoline Hill he sacrificed to Jupiter, acknowledging by this ritual that Jupiter was the source of Roman greatness and military might.

As sky-god, Jupiter directly influenced Roman public life, in which the weather omens of thunder and lightning, his special weapons, played an important role. After lightning had struck, a ritual purification or expiatory rite was required, and Jupiter himself was said to have given King Numa the original instructions for the sacrifice. Advised by the nymph Egeria, Numa captured the two forest divinities, Picus and Faunus, on the Aventine Hill and compelled them to tell him how to summon Jupiter. When Jupiter himself came, Numa asked what objects were necessary for the expiatory rite. "A head," the god replied, and Numa interrupted with "of an onion." "Of a man," Jupiter went on, and Numa added "a hair"; finally Jupiter demanded "a life." "Of a fish," said Numa, and Jupiter good-naturedly agreed to accept these objects (the head of an onion, a human hair, and a fish) as part of the expiatory ritual. Ovid's narrative (*Fasts* 3. 285–346), which is summarized here, explains why these objects were offered instead of a human sacrifice, almost certainly the original form of expiation.

Jupiter also promised to give Numa a sign to support Rome's claim to exercise power over other communities. In full view of the people of Rome, he caused a shield (*ancile*) to fall miraculously from heaven. This *ancile* was of the

Jupiter, Juno, and Minerva. Marble panel relief from the attic of the west side of the Arch of Trajan at Benevento, ca. 115 A.D.; height of panel, 90½ in. Jupiter, the central figure in the Capitoline triad, hands his thunderbolt, symbol of power, to Trajan, who appears in the corresponding panel on the other side of the central inscription on the attic. The arch was erected to celebrate the completion of the Via Traiana, the road from Rome to Brindisi, where it left the old Appian Way. In the background are other Olympian gods: Hercules to the left (behind Minerva), Apollo, Venus, and Mercury (with his winged cap). (Photo Alinari.)

archaic figure-eight shape; since it was a talisman of Roman power, Numa had eleven others made exactly like it, so that it would be hard to steal the genuine *ancile*. The twelve *ancilia* were kept in the Regia (the office of the Pontifex Maximus, the official head of the hierarchy of the state religion)² and were used by the priests of Mars, the Salii, in the sacred war dance they performed each spring. As they danced, they sang an ancient hymn containing the words *mamuri veturi*, whose meaning had long since been forgotten. According to tradition, the craftsman who made the eleven false *ancilia* was named Mamurius, who asked for his name to be included in the hymn as a reward.

The many titles of Jupiter indicate his supreme importance in all matters of the state's life in war and peace. As Jupiter Latiaris, he was the chief god of the Latins, worshiped by the Romans in an annual ceremony upon the Mons Albanus (the modern Monte Cavo) twenty miles from Rome. As the god before whom the most solemn oaths were sworn, he was closely associated with the goddess Fides (Good Faith) and identified with the old Sabine god Dius Fidius. Oaths sworn by Dius Fidius had to be sworn under the open sky (Jupiter's realm). The Latin deity Semo Sancus (the name comes from the same root as *sancire*, the Latin word for ratifying an oath) is also identified with Dius Fidius and Jupiter.

Another title of Jupiter is Indiges, by which he was worshiped near the river Numicus. The word *Indiges* has never been explained. It evidently refers to a state god, and the Di Indigetes were a well-known group of gods whose exact role remains unknown. Livy believed that Aeneas was worshiped as Jupiter Indiges after his death beside the river Numicus. Ovid tells the story (*Metamorphoses* 14. 598–608):

 [Venus] came to the shore at Laurentum, where the waters of the river Numicus, concealed by reeds, wind into the nearby sea. She commanded the river to wash away from Aeneas all that was mortal and to carry it away silently into the sea. The horned river-god performed the commands of Venus and purified all that was mortal of Aeneas and cleansed it with his waters. The best part of Aeneas remained. His mother [Venus] anointed the purified body with divine perfume; she touched his face with ambrosia and sweet nectar and made him a god. Him the people of Quirinus [i.e., the Romans] hailed as "Indiges," and received him with a temple and altars.

JUNO

Juno, the second member of the Capitoline triad, was originally an independent Italian deity who presided over every aspect of the life of women. She was especially associated with marriage and (as Juno Lucina) childbirth. The festival of Juno Lucina, the Matronalia, was celebrated in March as a spring festival, when all nature was being renewed. Juno was also worshiped as Juno Moneta on the Arx (Citadel), the northern peak of the Capitoline Hill. Moneta means "adviser" (from the same root as the Latin word *monere*), but the word survives

in the English word “mint,” for Juno’s temple on the Arx was next to the Roman Mint, which was known as *ad Monetam*.

Another title of Juno was Juno Regina (Queen Juno). Livy (5. 21) describes how Juno was invited by the Romans to leave the Etruscan city of Veii after its defeat in 396 B.C. At Rome Camillus dedicated a temple in her honor on the Aventine Hill. The ritual of persuading an enemy’s gods to leave their city was called *evocatio* (calling out). By accepting the invitation the goddess was believed to have come willingly to her new home in Rome, while the Etruscans were deprived of her protection.

Under the influence of Greek literature, Juno, the great Italian goddess of the life of women, became the wife and sister of Jupiter. In the *Aeneid* she has a prominent role in opposing the fated success of Aeneas, but eventually Jupiter and Fate are superior and she accepts the union of the Trojan newcomers and the indigenous Italian tribes.

MINERVA

Minerva, the third member of the Capitoline triad, was also an Italian deity, introduced to Rome by the Etruscans. She became identified with Athena and Athena’s legends, so it is hard to distinguish her original functions. She may have been a war goddess, for she shared her great festival, the Quinquatrus, with Mars, whose consort, the Sabine goddess Nerio, was often identified with her. Her chief importance for the Romans, however, was as the goddess of all activities involving mental skill. She was the patroness of craftspeople and skilled workers, among whom Ovid (in his invocation to Minerva in the *Fasti*) includes authors and painters.³ She was also the goddess of schoolchildren, and Quinquatrus was the time both of school holidays and the payment of school fees.

DIVINITIES OF FIRE: VESTA, VULCAN, AND CACUS

The most important of the other Roman state gods who were of Italian origin were the two concerned with fire, Vesta and Vulcan (Volcanus). Vesta (whose name is etymologically identical with the Greek Hestia) was the goddess of the hearth, the center of family life. Since the state was a community of families, it had a hearth with an ever-burning fire as the symbolic center of its life. The fire was kept alight in the round temple of Vesta in the Roman Forum and tended by the six Vestal Virgins. These were daughters of noble families who entered the service of Vesta before their tenth birthday and remained until their fortieth year or even longer. Their life was hedged with many taboos and rituals, and their vow of chastity was strictly observed. The Vestals were treated with the highest honor, and were some of the most important persons in the hierarchy of Roman state religion. Their offices and living quarters were in the Forum, next to the Regia.

The second Roman king, Numa, was said to have founded the cult of Vesta. The myths of Vesta are few and uninteresting. Ovid (*Fasti* 6. 319–338) tells how the fertility god Priapus tried to seduce her and was prevented by the braying of a donkey. He gives another version of the story (see pp. 636–637), in which the nymph Lotis is the intended victim of Priapus.

Closely associated with Vesta were the household spirits of the Romans, the Penates, whose name derives from the *penus*, or store cupboard, source of food and therefore symbol of the continuing life of the family. Originally the spirits on whom the life and food of the individual family depended, they became an essential part of the life of the state. The Romans were vague about their number or identity, and a useful definition is that of Servius (fourth century A.D.), “all the gods who are worshiped in the home.” The Penates were originally Italian and were especially worshiped at the Latin town of Lavinium. It was said that when an attempt was made to remove them from Lavinium to Alba Longa they miraculously returned to their original home. At Rome they became identified with the Trojan gods entrusted by Hector to Aeneas on the night of Troy’s destruction and brought by him to Italy. Among the sacred objects kept in the *penus Vestae* (i.e., the sacred repository in the temple of Vesta) was the Palladium, the statue of the Trojan Athena given by Diomedes to one of Aeneas’ followers. When the temple of Vesta was burned in 241 B.C., the consul L. Caecilius Metellus earned great glory by saving the Palladium with his own hands, yet he was blinded for the act because he had looked upon a sacred object that it was not lawful for a man to see.

Vulcan (Volcanus) was the chief Italian fire-god, more important than his Greek equivalent, Hephaestus. The Greek god was the god of industrial, creative fire, while Vulcan was the god of destructive fire and a potent power to be worshiped in a city frequently ravaged by conflagrations.⁴ Through his identification with Hephaestus, Vulcan acquired creative attributes shown by his other name, Mulciber (He who tempers). Vergil has a fine description of Vulcan’s smithy deep below Mt. Aetna (*Aeneid* 8. 424–438):

 The Cyclopes were working the iron in the vast cave, Brontes and Steropes and naked Pyracmon. In their hands was a thunderbolt, partly finished and partly yet to be finished, one of very many which the Father (i.e., Jupiter) hurls to the earth from all over the sky. They had put onto it three rays of twisted rainstorms, three of watery clouds, three of red fire and the winged south wind. Just then they were adding the terrifying lightning to the weapon and the penetrating flames of [Jupiter’s] anger. In another part they were working on the chariot of Mars and its winged wheels, with which he stirs up men and cities. They were busily polishing the fearsome aegis, the weapon of aroused Minerva, with serpents’ scales and gold. It had entwined snakes and the Gorgon’s head itself turning its gaze.

The Italian fire-god, Cacus, was associated with Vulcan. Vergil narrates how he was killed by Hercules (*Aeneid* 190–267). Cacus had stolen the Cattle of Geryon

from Hercules and had hidden them in his cave on the Aventine Hill. Here is the climax of the fight, when Hercules has broken open the cave of Cacus (*Aeneid* 8. 247–261):

 Hercules overwhelmed Cacus from above with missiles, Cacus who had been suddenly trapped by the unexpected daylight, shut in his rocky cave and belching as he was not used to do. Hercules summoned up all his weapons and attacked him with branches and huge boulders. But Cacus (who had no escape from the danger) belched forth (a miracle to narrate) clouds of smoke, enveloping his cave in blind darkness and taking away the sight from Hercules' eyes. He filled the cave with the smoky blackness of night and darkness mixed with fire. Brave Hercules did not put up with this: he leaped headlong through the fire, where the waves of smoke were the thickest and the black clouds billowed through the cave. Here he held Cacus knotted in his grip, as he vainly belched forth fire in the darkness. Clinging tight he throttled him, so that his eyes burst out and no blood was left in his throat. Then the doors of the black cave were wrenched off and it was suddenly thrown open. Displayed to the sky were the stolen cattle and the theft that Cacus had denied, and the monstrous corpse was dragged out by its feet. The people could not have enough of gazing on the terrible eyes of the monster, on the face and the chest with its bristling hair and the throat with fire extinct.

Vergil's narrative ostensibly explains the origin of the worship of Hercules at the Ara Maxima, an ancient cult-site in the low-lying ground (called the Forum Boarium) between the Aventine and the Tiber. But he makes a monster of the ancient Italian fire-god, whose name survived in the *Scalae Caci* (Steps of Cacus), a pathway leading up onto the corner of the Palatine Hill that was associated with the earliest settlement on the site of Rome.

AGRICULTURAL AND FERTILITY DIVINITIES

SATURN, CERES, AND THEIR ASSOCIATES

Saturn was an ancient god, perhaps of Etruscan origin. His temple dated from the early days of the Republic, and beneath it was the state treasury. His origins are obscure; he was an agricultural deity, and his festival, the Saturnalia, celebrated on December 17, was perhaps originally connected with the winter grain sowing. Like many other country festivals, it was accompanied by a relaxation of the normal social inhibitions. This was a prominent feature of the Saturnalia in historical times, when slaves were allowed freedom of speech. The Saturnalia came to be linked with the festival of Ops, which was celebrated two days later, and eventually the festival period lasted for a week.

Saturn was very soon identified with the Greek Cronus, and like him was believed to have ruled over a golden age. Rhea, the Greek consort of Cronus, was likewise identified with Ops, the Italian goddess of plenty, who was the partner of Saturn in popular mythology. His partner in cult, however, was the

obscure Italian deity Lua. In the cult of Ops, her partner was Consus, an Italian harvest deity, whose festival, the Consualia, was celebrated in both August and December. Livy tells us that the seizure of the Sabine women took place at the games held during the Consualia.

Agricultural deities were very prominent in early Roman religion, and others besides Mars, Saturn, and their associates were connected with the fertility of the land. The cult of Ceres at Rome went back to the earliest days of the Roman Republic, when in 493 B.C. a temple on the Aventine was dedicated to Ceres, Liber, and Libera. Ceres was identified with Demeter, Liber with Dionysus, and Libera with Kore (i.e., Persephone, Demeter's daughter). Thus the Eleusinian triad of Demeter, Kore, and Iacchus/Bacchus had its exact counterpart at Rome. The mythology of Ceres and Liber is entirely Hellenized, and the ritual of worship in their temple was Greek, even the prayers being spoken in Greek. The wine-god Liber, however, did not share in the ecstatic aspects of Dionysus.

The Aventine temple of Ceres, Liber, and Libera was also important as a political and commercial center. It was a center of plebeian activity, and was especially connected with the plebeian aediles and tribunes. In front of it was the headquarters of the state-subsidized grain supply (*statio annonae*).

Also associated with Ceres was the Italian earth-goddess Tellus Mater, with whom she shared the festival of the sowing of the seed (*feriae sementivae*) in January. Thus the grain was watched over from seed to granary by three divinities—Ceres before it was sown, Tellus Mater when it was put in the earth, Consus when it was harvested and stored.

Two minor fertility goddesses were Flora and Pomona. The former was the goddess of flowering, especially of grain and the vine. In Ovid she is the consort of the West Wind, Zephyrus, who gave her a garden filled with flowers. Here is how she describes it (Ovid, *Fasti* 5. 209–230):

 I have a fertile garden in the lands that are my wedding gift, filled with noble flowers by my husband, who said, "Be ruler, O goddess, over flowers." As soon as the dewy frost is shaken from the leaves . . . the Hours come together clothed in many colors and gather my flowers in lightly woven baskets. Then come the Graces, twining flowers into garlands. . . . I was the first to make a flower from the blood of the boy from Therapnae [Hyacinthus]. . . . You too, Narcissus, keep your name in my well-tended garden. . . . And need I tell of Crocus and Attis and Adonis, the son of Cinyras, from whose wounds I caused the flowers to spring that honor them?

In this passage Ovid uses Greek mythology to give substance to the Italian fertility goddess. The Greek figures of Zephyrus, the Seasons (in Latin, *Horae*) and Charites (Latin, *Gratae* or Graces), and the youths who were changed into flowers give a narrative element to Flora, who otherwise has no myths. Ovid has created a Roman mythology from the Greek stories. His description of the garden of Flora, moreover, was the inspiration for Nicolas Poussin's famous

painting with this title, now in Dresden. In this work Poussin has gathered six of the young men and women who were changed into flowers and were celebrated as the subjects of Ovid's stories.

Even with divinities for whom there was no Greek equivalent, Ovid created stories in the Greek manner that gave them character and substance. Pomona, goddess of fruit that can be picked from trees, was linked by Ovid with an Etruscan deity, Vertumnus, whose name appears to be connected with the Latin word *vortere*, which means "to turn" or "to change." An old statue of Vertumnus stood not far from the Forum in Rome, the subject of a poem by Propertius, who was a contemporary of Ovid.

In Ovid's story, Pomona had a garden from which she excluded her lovers, among them Vertumnus, who could change himself into different shapes. Disguised as an old woman, he approached Pomona and advised her to marry Vertumnus. This he did so successfully (his advice included the cautionary tale of Iphis and Anaxarete, narrated earlier, p. 617) that he resumed his natural appearance as a young man and won Pomona's love. The legend of Pomona and Vertumnus has been one of the most popular of Ovid's stories and has been the subject of innumerable paintings and musical works (see Color Plate 15).

The deities who presided over the livestock of the farm were called Pales. Originally a pair, their name was later used for one deity, either male or female. The festival of Pales, the Parilia (or Palilia), was celebrated in April and was also considered to be the anniversary of the founding of Rome.

FOREST DIVINITIES: SILVANUS AND FAUNUS

Silvanus (Forester) and Faunus (Favorer) were gods of the woods and forests. Silvanus had to be propitiated when a forest was being cleared or trees felled. In the *Aeneid*, Faunus is the son of Picus and grandson of Saturn, and the father of Latinus by an Italian birth-goddess, Marica. Originally he was a woodland spirit, occasionally mischievous but generally favorable to the farmer who worshiped him. His consort (or daughter) was Fauna, who was identified with the Bona Dea (Good Goddess), a divinity worshiped only by women. Both Faunus and Silvanus were identified with the Arcadian pastoral god Pan. Faunus and Fauna were further identified with minor gods of woodland sounds because they were considered responsible for strange and sudden forest noises. Thus (according to Livy) the night after a closely fought battle against the Etruscans, the Romans heard Silvanus (whom Livy here confuses with Faunus) cry out from a nearby forest that they had won the victory, with the result that the Etruscans acknowledged defeat and returned home. Faunus also had oracular powers; Latinus consulted him about the prodigies that accompanied the arrival of Aeneas in Italy, and Numa received advice from him in a time of famine.

Faunus was officially worshiped at Rome and had a temple on the Tiber island. His festival was in December, but he was closely connected with the more

famous festival of the Lupercalia, which took place in February. The Arcadian king Evander was said to have come to Rome and there to have founded the first settlement upon the Palatine Hill. On the side of the hill is a cave, the Lupercal, where the she-wolf (*lupa*) was later believed to have suckled Romulus and Remus. Here Evander worshiped his Arcadian god Pan, who was the equivalent of Faunus. Thus Faunus was connected with the Lupercalia, whose central ritual was a sacrifice in the Lupercal, at which two young noblemen were smeared with the victims' blood. They were called the *Luperci*, and after the sacrifice they ran nearly naked around the boundary of the Palatine, striking the women they met with leather straps. Barren women, it was believed, became fertile by this act.

Ovid relates a folktale explaining the nudity of the *Luperci*. Hercules and the Lydian queen Omphale came once to a cave where they exchanged clothes while supper was being prepared. After the meal they went to sleep, still each in the other's clothes. Meanwhile, Faunus had determined to seduce Omphale. He entered the cave and lay with the person dressed as a girl. His reception was far from warm, and ever after he ordered his followers (i.e., the *Luperci*) to be naked at his cult, to prevent the repetition of so painful a mistake.

GARDEN DIVINITIES: VENUS AND PRIAPUS

Venus was an Italian fertility goddess whose original functions are not known. She was worshiped in a number of places under titles that indicate that she had as much to do with luck and the favor of the gods as with beauty and fertility, and she was apparently particularly the protectress of gardens. A temple to her was dedicated at Rome in 295 B.C. with the title *Venus Obsequens* (Venus who is favorable) the same title as in Plautus' comedy *Rudens*, which takes place in front of her temple by the seashore in Libya. During the fourth century, contact with the Greek world led to identification of Venus with the Greek goddess of love, Aphrodite.

In 217 B.C., after the Roman defeat at the battle of Lake Trasimene, the dictator Quintus Fabius Maximus Cunctator consulted the Sibylline books, which ordered him to dedicate a temple on the Capitoline Hill to Venus Erycina. Eryx, at the western end of Sicily, was the site of a great temple to the Phoenician fertility goddess Astarte, who later became identified with Aphrodite and then with Venus. The dedication of the temple of Venus Erycina in 215 was significant in the development of the worship of Venus at Rome. In that year a *lectisternium* was also conducted, a festival at which the statues of the gods were laid out on couches, two to a couch, and offered a banquet while supplication was made to them. The ceremony had first been conducted at Rome in 399 for six gods. The ceremony of 215 was the first in which the twelve great gods were so honored, and Ennius' lines naming them (see p. 623) described this event. In the *lectisternium* Venus was paired with Mars. Thus she gained in status, since Mars was acknowledged as the ancestor of the Romans.

In about 55 B.C. Lucretius began his poem with an eloquent invocation to Venus as the creative principle of life. The opening lines of the poem transfer the majesty and creative power of the Greek Aphrodite to a Roman context (*De Rerum Natura* 1. 1–13):

 Mother of the descendants of Aeneas, bringer of pleasure to gods and men, nurturing Venus, beneath the gliding constellations of heaven you fill the ship-bearing sea and the fruitful lands. Through you all living things are conceived and at birth see the light of the sun. Before you, O goddess, the winds withdraw, and at your coming, the clouds in heaven retreat. For you the variegated earth puts forth her lovely flowers, for you the waters of the sea laugh and the sky at peace shines, overspread with light. For you the West Wind, creator of life, is unbarred. You first, O goddess, and your coming do the birds of the air salute, their hearts struck by your power.

At about the time that Lucretius was writing his poem, the Roman general Pompey dedicated a temple in his theater (the first permanent stone theater at Rome) to Venus Victrix (Bringer of Victory). The family of Julius Caesar traced its ancestry back to her, and he dedicated a temple to her in his forum (which was completed by Augustus). Her connection with Troy led to her importance in the *Aeneid* as the mother of Aeneas. More than a century later, Hadrian dedicated one of Rome's most magnificent temples to the two goddesses, Venus Felix (Bringer of Success) and Roma Aeterna, thus uniting the personification of the city with its divine ancestress.

The shrine of Venus Cloacina stood in the Forum Romanum. Cloacina was presumably the goddess of the Cloaca, the Etruscan drainage system that drained the Forum area and allowed the city of Rome to develop in the low-lying ground from the sixth century onward. How this goddess was identified with Venus is unknown. Among Italian divinities connected with the success of agriculture was Robigo, the goddess of blight, whose festival, the Robigalia, was celebrated in April. She was offered the gruesome sacrifice of a dog and a sheep so that the growing crops would not be attacked by mildew. Naming a divinity after a natural feature (good or ill) is typical of Roman religion.

The protector of gardens, Priapus, was originally Greek. He was represented by a wooden statue, painted red, with an enormous erect phallus. His principal cult in the Greek world was at Lampsacus (a city overlooking the Hellespont), where he was offered the sacrifice of a donkey (see Color Plate 6). Ovid explains the choice of this victim in this story (*Fasti* 1. 415–440):⁵

 Red Priapus, the ornament and guardian of gardens, loved Lotis, above all the Naiads. She laughed at him scornfully. It was night, and [the Naiads], made drowsy by wine, lay in different places overcome with sleep. Lotis, just as she was, tired by play, slept farthest away on the grassy ground beneath the branches of a maple. Up rose her lover, and holding his breath he silently made his way on tiptoe to the nymph's resting place. Even now he was balancing [on tiptoe]

on the distant grass, yet she still was sleeping soundly. He rejoiced; and lifting her dress from her feet, he had happily begun to reach his longed-for goal. But look! The donkey, Silenus' mount, began ill-timed braying. Up leaped the terrified nymph and pushed Priapus away, arousing the whole wood as she fled. But the god, all too ready with his obscene member, was an object of ridicule to all by the light of the moon. The source of the noise paid the penalty with his life, and this is the victim that is pleasing to the god of the Hellespont.

WATER GODS: PORTUNUS AND THE GODS OF RIVERS AND SPRINGS

Water gods were important to the Italian farmer. Each river and spring had its deity, who needed to be propitiated by offerings. Tiberinus, god of the river Tiber, was propitiated each May when twenty-seven straw dummies, called *Argei*, were thrown into the river from the Pons Sublicius, the wooden bridge of the early city. This ceremony was attended by the *pontifices* (priests of the state religion) and the Vestal Virgins, but even the Romans did not know its origin. Propitiation of a potentially damaging god by means of dummies (substitutes for human sacrifice) is as likely an explanation as any.

Neptunus, later identified with Poseidon, was originally a freshwater divinity whose festival occurred in July, when the hot Italian summer was at its driest. Portunus also was an old Italian god, originally the god of gates (*portae*), but later the god of harbors (*portus*), whose temple was near the Aemilian Bridge in Rome. Vergil makes him help Cloanthus to victory in the boat-race in the *Aeneid* (5. 241–243). He was also identified with the Greek sea-god Palaemon, originally Melicertes (see note 3, p. 304). Both of the Roman sea-gods, therefore, were originally freshwater divinities, who acquired their attributes as sea-gods from Greek mythology.

Of the river-gods, the most important was Tiberinus, and bridging his river was a significant religious matter. The Pons Sublicius (mentioned earlier) was administered by the *pontifices* (whose title may originally have meant "bridge builders"), and there were various religious taboos involved in its construction and administration. Tiberinus himself plays an important role in Book 8 of the *Aeneid* when he appears to Aeneas in a dream and tells him that he has arrived at his final home. He shows him the sign of the sow and her thirty piglets, and he calms his waters so that the boat of Aeneas can move smoothly upstream to Pallanteum (*Aeneid* 8. 31–96).

Springs of running water were under the protection of the nymphs. In the Forum at Rome was the spring of Juturna, who in Vergil appears as the sister of Turnus and the victim of Jupiter's lust. She was worshiped in the Forum and the Campus Martius, and the headquarters of the city's water administration lay in her precinct. Her festival was the Juturnalia. After the battle of Lake Regillus in 496 B.C. the Dioscuri (Castor and Pollux) watered their horses at her spring in the Forum. Their temple was next to her precinct.

Outside the Porta Capena at Rome were a spring and a small park dedi-

cated to the Camenae, water-nymphs of great antiquity but unknown origin. Later they were identified with the Greek Muses. The Vestals drew water from the fountain of the Camenae for the purification of the temple of Vesta. Closely associated with the spring of the Camenae was the nymph Egeria, said to have been the counselor and consort of Numa, to whom so much of Roman religious custom was ascribed. Egeria is also found in the precinct of Diana at Aricia, and her spring was one of those that fed Lake Nemi. She was the helper of pregnant women and may indeed have once been a birth-goddess. Another nymph associated with the Camenae is Carmentis (or Carmenta), who also has the double association with water and with birth. As a water-nymph she shared the festival of Juturna, and she is sometimes named as the mother of Evander, the king of Pallanteum, an earlier city on the site of Rome. Like the Parcae (the Roman birth-goddesses identified with the three Fates) she had prophetic powers, as is indicated by her name, for *carmen* means a song or prophetic utterance.

DIANA

The Italian goddess Diana was worshiped at Aricia with a cult that was established by members of the Latin League. Aricia is near Lake Nemi, which was known as "Diana's mirror," perhaps indicating her association with the moon, reflected in the waters of the lake. This cult was the starting point for Sir James Frazer's *The Golden Bough*. The priest of Diana at Aricia was a fugitive slave, who had the title of "King of the Grove" (*rex nemorensis*). He became priest by killing his predecessor in single combat, having challenged him by plucking a bough from a sacred tree. As priest he always went armed, watching for the successor who would kill him. It is likely that the sacred grove was originally an asylum for runaway slaves and the sacred bough was the branch carried by suppliants at an altar.

Diana was concerned with the life of women (especially in childbirth). She was often identified with the Italian goddess Lucina, who brought babies into the light (Latin, *lux, lucis*), although Lucina was more commonly a title of Juno.

Diana was also worshiped at Mt. Tifata near Capua. It is possible that this is where she began to be identified with Artemis. Through Artemis she acquired her powers as goddess of the hunt and (as Hecate) her association with the Underworld. At Rome she was worshiped upon the Aventine Hill, and her cult was established by Servius Tullius. Like her cult at Aricia, it was originally shared by members of the Latin League, being situated outside the early city's walls. Under Augustus her status as sister of Apollo was emphasized and was dramatically expressed in Horace's *Carmen Saeculare*, sung at the celebration of the Secular Games in 17 B.C. by antiphonal choirs of boys and girls, standing respectively upon the Palatine and Aventine hills.

Horace embodies the triple functions of Diana (as Artemis, mistress of animals; Lucina, goddess of childbirth; and Hecate, goddess of the Underworld) in the following hymn, in which he dedicates a pine tree to her (*Odes* 3. 22):

 Guardian of mountains and woods, virgin, you who, when called upon three times, hear women laboring in childbirth, three-formed goddess, let the pine that overshadows my villa be yours, to which I will gladly sacrifice at the end of each year the blood of a boar as it prepares the sideways slash [of its tusk].

At Aricia the resurrected Hippolytus was identified with the minor Italian divinity, Virbius, and associated with Diana. Both Vergil and Ovid tell his story, in which he is put under the protection of the nymph Egeria, and Vergil suggests that it was because of his violent death in a chariot crash that horses were excluded from Diana's shrine.

MERCURY

In early Rome the god Mercury (Mercurius) was worshiped as a god of trading and profit (the Latin word *merces* means "merchandise"), and his temple stood by the Circus Maximus in the busiest commercial center of Rome. As a character in Plautus' play *Amphitruo*, he describes himself still as the god of commerce and gain. As he came to be identified with the Greek Hermes, however, he acquired Hermes' other functions—musician, messenger of Jupiter, and escort of the dead. Horace, who elsewhere called himself *mercurialis*, that is, a lyric poet under the special protection of Mercury, inventor of the lyre, addressed a hymn to Mercury that elegantly combines his functions (*Odes* 1. 10):

 Mercury, eloquent grandson of Atlas, who with language and the rules of the well-mannered gymnasium cleverly fashioned the crude manners of new-made humankind, of you shall I sing, messenger of great Jupiter and the gods, inventor of the curved lyre, clever at concealing with light-hearted theft whatever you like. Apollo laughed at you when he found his quiver missing as he threatened you, a child, unless you returned his stolen cattle. Indeed, with you as guide rich Priam left Troy and unnoticed passed by the proud sons of Atreus, the watch-fires of the Thessalians, and the enemy camp. You bring back the souls of the good to the blessed fields; and with your golden wand you restrain the weightless crowd [of ghosts of the dead], welcome to the gods on high and in the Underworld.

Thus the Roman Mercury adopts the functions that were described in the *Homeric Hymn to Hermes* (see Chapter 12), in Priam's journey to the tent of Achilles in Book 24 of the *Iliad*, and in escorting the dead suitors to the Underworld in the opening lines of Book 24 of the *Odyssey* (where the "golden wand" of Hermes is described).

DIVINITIES OF DEATH AND THE UNDERWORLD

We have already seen (in Chapter 15) something of the Roman idea of the Underworld and its system of rewards and punishments. This conception, which is found principally in Vergil, is literary and sophisticated, derived from differ-

ent philosophical, religious, and literary sources, most of them Greek. The native Italian ideas of the Underworld and its spirits originated in the simple religion of the early agricultural communities. The spirits of dead ancestors were propitiated at the festival of the Parentalia that took place from February 13 to 21 (which in the old Roman calendar was the last month of the year). During this period, no one got married, the temples were closed, and offerings were made to the spirits by the head of the family as a guarantee of their friendliness to the family in the ensuing year. The Parentalia was a family celebration. Its gods were simply "gods of the ancestors" (*divi parentum*), without names and without mythology.

The festival of the Lemuria was celebrated in May. The head of the family would propitiate the Lemures, spirits who could do great harm to the household. The ceremony was conducted by night with a magic ritual—the paterfamilias was barefoot, his fingers and thumb forming an "O," his hands ritually washed before he threw behind him black beans for the Lemures to pick up, while uttering nine times a formula intended to drive the spirits from the house.

Ovid identifies the Lemures with the Manes, who were synonymous with the dead. Each person has his or her Manes, and epitaphs conventionally began with *Dis Manibus Sacrum*, "sacred to the divine Manes of . . .," followed by the person's name.

The Manes, the Parentalia, and the Lemuria, which involve no mythology or legend, are far removed from Vergil's elaborate Underworld, which was derived mostly from Greek sources. From the Etruscans the Romans learned to propitiate the dead by offering human blood spilled on the earth. This is the origin of the gladiatorial games, which were first celebrated at Rome in 264 B.C. at the funeral games for Decimus Junius Brutus. The Etruscans shared with the Greeks many Underworld divinities, such as Charon and Persephone, and added some of their own, such as the demon Tukulcha. The Underworld itself in Roman literature is commonly called Orcus (sometimes personalized as a god) and its ruler was Dis Pater, whose name (Dis = *dives*, "wealth") is the equivalent of the Greek Pluto. The worship of Dis Pater was established at Rome in 249, although he was certainly known there long before. He and Proserpine shared a cult at an underground altar in the Campus Martius, whose precinct was called Tarentum (the etymology of the name is still unexplained), and its cult was associated with the festival of the Secular Games.

The burial goddess, Libitina, was Italian; but her name, origin, and associations have never been satisfactorily explained. Her name was used by the later poets as synonymous with Death, and undertakers were known as *libitinarii*.

LARES AND GENIUS

The Lares were divinities often linked with the Penates. The origin and etymology of their name are unknown. Although they have been identified

with spirits of the dead, particularly of ancestors, the Lares were probably household spirits in origin who could bring prosperity and happiness to the farmer and his farm.

This agricultural origin survived in the Compitalia (crossroads festival), a winter feast celebrated when work on the farm had been completed. A crossroads in primitive communities was regularly the meeting point of the boundaries of four farms, and the Lares honored at the Compitalia were the protecting spirits of the farms. At each crossroads was a shrine, with one opening for each of the four properties. The farmer would hang a doll in the shrine for each free member of his household and a ball of wool for each slave. This seems to have been a purification ritual at the end of the farmer's labor, when substitutes for the human beings were hung up to be purified by the air.

The Lares are basically kindly spirits, protecting the household. Transferred from farm to city, they kept this function, and each house had its *Lar familiaris* to whom offerings of incense, wine, and garlands were made. In Plautus' play *Aulularia*, the *Lar familiaris* speaks the prologue and describes how he can bring happiness and prosperity if he is duly worshiped; if he is neglected, the household will not prosper. Just as each household had its Lar, so the city had its Lares (called the *Lares praestites* or "guardian Lares"), who were worshiped on May 1. Augustus revived the celebration of the Compitalia in the city by instituting shrines of the Lares Compitales in each of the 265 *vici* or subdivisions of the city. In this function, according to Ovid, the Lares "protect the crossroads and are constantly on guard in our city" (*Fasti* 2. 616). At the city Compitalia, the Lares were worshiped together with the Genius of Augustus himself.

The Lares were also protectors of travelers by land (*Lares viales*) and by sea (*Lares permarini*). In 179 B.C. a temple was dedicated to the Lares Permarini to commemorate a naval victory over King Antiochus eleven years earlier.

The Genius represented the creative power of a man, seen most especially in the *lectus genialis*, or marriage bed, symbol of the continuing life of the family. It was associated more generally with the continued well-being of the family. Slaves swore oaths by the Genius of the head of the family, and offerings were made to it on his birthday. For women, the equivalent of the male Genius was her Juno.

NON-ITALIAN GODS

HERCULES

Several foreign deities had an important place in Roman religion. In most cases, they came from Greece or the East, and their arrival can often be dated.

The earliest newcomer was the Greek Heracles, called Hercules at Rome. Livy says that when Romulus founded the city the cult of Hercules was the only foreign one that he accepted. We have seen how Hercules visited Rome with the

Cattle of Geryon and there killed the monster Cacus (pp. 631–632). To commemorate the event, his cult was established, either by Hercules himself or by Evander, in the Forum Boarium (the cattle market between the Circus Maximus and the Tiber). His precinct there was the Ara Maxima (Greatest Altar), and the cult was in the hands of two noble families until 312 B.C., when it was taken over by the state. The Forum Boarium area was a natural landing place on the Tiber, and it was among the earliest commercial quarters of the city. Since Hercules was the patron of traders, this area was appropriate for his worship. Like Mercury, Hercules brought luck (including chance finds) and profit, and successful traders dedicated a tithe of their profits to him. Besides the Ara Maxima there were at least twelve shrines or temples dedicated to him in the city.

THE DIOSCURI

The Dioscuri, Castor and Pollux, were worshiped from the time of the early Republic. After they appeared at the battle of Lake Regillus (probably in 496 B.C.) a temple in the Forum was dedicated to them both, although its official name was the Temple of Castor. In the battle the Romans were being hard pressed by the Latins, when the Dioscuri appeared before them on horseback and led them to victory. They then appeared in the Roman Forum and announced the victory. After watering their horses at the fountain of Juturna they vanished. The appearance of the Dioscuri in battle is fairly common in ancient legend, and they were said to have appeared at other battles in later Roman history. They came to Rome from the Greek cities of southern Italy (perhaps from Tarentum) after a period as important deities at Tusculum, a Latin city near Lake Regillus. At Rome they were especially the patrons of horsemen and of the knights (i.e., the economic and social class below the senators). Only women swore by them, using the oath *ecastor*.

THE SIBYLLINE ORACLES

An even older arrival in Rome than the Dioscuri were the Sibylline oracles, which were traditionally associated with the Greek colony of Cumae. Collections of oracles written in Greek hexameters were common throughout the Greek world; they were especially associated with the Sibyls, prophetesses said to be inspired by Apollo. The Cumaean Sibyl was said to have been granted a life of one thousand years by Apollo, who withheld the compensation of eternal youth (see pp. 234–235). She was Aeneas' guide in the Underworld.

A well-known legend tells how the Sibylline books came to Rome. The Sibyl mysteriously appeared before the last Roman king, Tarquinius Superbus, and offered to sell him nine books of oracles for a high price; when he refused, she burned three of the books and offered the remaining six at the same price. Again he refused, and again she burned three books and offered the last three at the

same price. This time, acting on the advice of the augurs (an important group of priests), Tarquin bought the books. The Sibyl handed them over and promptly disappeared. The books were stored in the Capitoline temple of Jupiter, to be consulted only on the orders of the senate—for guidance in times of calamity and perplexity or during a pestilence or after the appearance of disturbing prodigies. The priests who had charge of them were prominent citizens. The books were considered so important that after they were destroyed in the Capitoline fire of 83 B.C., a new collection was made, which Augustus later deposited in the base of the statue of Apollo in his new temple on the Palatine Hill. The Sibylline books are an example of early Greek influence at Rome. They also were influential in bringing new cults to Rome. For example, they advised the introduction of the cults of Ceres, Liber, and Libera in 496 B.C. and of Apollo in 433.

APOLLO AND AESCULAPIUS

Apollo—the only one of the great Greek gods not to change his name at Rome—arrived as the result of a pestilence, and his temple was dedicated in 431 B.C., two years after the Sibylline books had been consulted. Until the time of Augustus, this remained his only temple at Rome. Except for his cult under Augustus and, to a lesser extent, under Nero, he was never as prominent at Rome as he was in the Greek world. He was worshiped originally as Apollo Medicus (corresponding to his Greek title of Paeon, the Healer). Later his other attributes and interests were introduced, and in 212 the Ludi Apollinares (Games of Apollo, an annual festival), were instituted. Augustus had a special regard for Apollo, and in 28 B.C. he dedicated a magnificent new temple to him on the Palatine Hill.

In 293 B.C., during an epidemic, the Sibylline books counseled bringing Asclepius, the Greek god of healing, to Rome from Epidaurus. He came in the form of a sacred serpent; when the ship bringing him came up the Tiber to Rome, the serpent slipped onto the island that is in the middle of the present-day city and there made its home. A temple to Aesculapius (his Latin name) was built on the island and his cult was established.

CYBELE

In 205 B.C., during another period of public distress, the Sibylline books advised the Romans to bring in the Phrygian mother-goddess Cybele, known also at Rome as the Magna Mater (Great Mother). After a visit to Delphi, a solemn embassy went to the city of Pessinus in Phrygia, where it received a black stone that was said to be the goddess. It was brought to Rome with much ceremony; a temple was built on the Palatine Hill, and the festival of the Megalensia was instituted in honor of Cybele. The ecstatic nature of her worship was exceptional at Rome. Her priests (known as Galli) practiced self-castration, and until the reign of Claudius, Roman citizens were forbidden to become Galli. The Megalensia,

however, and its processions, celebrated in April, were a colorful and popular feature of the Roman religious calendar. Lucretius (2. 614–624) and Ovid (*Fasti* 4. 181–186) have left vivid descriptions of the Galli with their wild music, and Catullus (Poem 63) has brilliantly told the myth of Attis (see pp. 178–179).

Other Eastern gods made their way to Rome, especially in the time of the empire. The Egyptian Isis, the Asiatic Ma, the Syrian Baal, and the Persian Mithras were widely worshiped (see pp. 365–367).

LEGENDS OF THE FOUNDING OF ROME

AENEAS AND ROMULUS

The origins of Rome traditionally went back to Aeneas, whose son Iulus (also called Ascanius) was ancestor of the *gens Iulia*, the family of Augustus.⁶ But Aeneas left Troy some 475 years before the traditional date for the founding of Rome in 753 B.C. The gap between the two dates was filled by a line of kings at the Latin city of Alba Longa. Aeneas succeeded in establishing a foothold in Latium but died soon after. Iulus then founded Alba Longa, and from there Romulus came eventually to found Rome itself. The earliest settlement at Rome may indeed date from the eighth century B.C., and it is also known that early Rome was an alliance of villages on the different hills by the Tiber, which in time were unified. As Rome became a city, it was sometimes under the control of neighboring peoples (the Tarquins, the fifth and seventh kings of Rome, were Etruscans, and the sixth king, Servius Tullius, may have been Etruscan), but by the early part of the fifth century, the city was strong enough to assert its independence. Then it extended its control over the Etruscan cities and the Sabine and Latin tribes, whose customs and gods it often absorbed. The legendary connection between Rome and Alba Longa is historically likely. That between Rome and Troy is more doubtful.

AENEAS: THE TRADITION BEFORE VERGIL

In the foundation myth that connects Rome with Troy, the central figure is Aeneas, son of Aphrodite and Anchises. In the *Iliad* he was an important warrior but inferior to the Trojan champion Hector. When he meets Achilles in single combat (*Iliad* 20. 158–352), he is saved from death by Poseidon, who makes this prophecy (*Iliad* 20. 300–308):

 Come, let us lead him away from imminent death, lest Zeus be angry if Achilles kill him. For he is fated to escape, so that the race of Dardanus may not perish without seed and invisible. For Zeus loved Dardanus most of all his children whom mortal women bare to him. Already Zeus is angry with the family of Priam. Now indeed strong Aeneas and his children's children will rule over the Trojans.

Map 26.2. Map of Early Rome. (© Laszlo Kubinyi, 1994.)

Thus there was Homeric authority for the development of Aeneas' saga after the fall of Troy. There are many irreconcilable variations in his legend before Vergil, but his wanderings over the Aegean and Mediterranean and his arrival in Italy seem to have become traditional quite early, and he was associated with a number of shrines of Aphrodite in the areas to which he was said to have traveled. The fifth-century Greek historian Hellanicus recorded his arrival in Italy, and he was well known to the Etruscans. At Veii, for example, a number of statuettes have been found, dating from about 500 B.C., showing Aeneas carrying Anchises from Troy, and the same scene appears on seventeen Greek vases from the same period found in Etruria. His travels were narrated in the epics on the Punic Wars by Naevius (who died shortly before 200) and Ennius, and it is possible that Naevius introduced his meeting with Dido into the tradition.

The early Roman historians also developed the legend of Aeneas. Around 200 B.C. Fabius Pictor, who wrote in Greek, described his arrival in Italy and the founding of Alba Longa by Ascanius (Iulus) thirty years later. In his *Origines*, the founder of Latin historiography, Cato the Elder (who died in 149), brought Aeneas to Italy, where he married Lavinia and founded the city of Laurolavinium (which is evidently the same as Lavinium) in an area called the *ager Laurens*. In this version, Latinus fought against Aeneas, while both Turnus and Aeneas perished in a later battle, and the Etruscan warrior Mezentius was killed by Ascanius in a third battle. Ascanius then left Laurolavinium to found Alba. Finally, Cato calculated that there were 432 years between the fall of Troy and the founding of Rome by Romulus.

This is the basic version of Aeneas' myth, which is also told with some variations by Livy, Vergil's contemporary. All these stories make Aeneas fight with the indigenous inhabitants (called *Aborigines* by Cato and Livy), marry a local princess (Lavinia), found a city (Lavinium), die, become a god, and leave Ascanius, now called Iulus, as his successor. Ascanius then founds Alba, and some four hundred years later Romulus founds Rome itself from Alba.

VERGIL'S AENEID

This was the material from which Vergil created his epic, the great national poem of Rome, combining Homeric conventions, Greek mythology, and Roman ethical and historical insights. It records the events of a distant mythological past, yet it has reference to the events and hopes of Vergil's own day, when Augustus was rebuilding the Roman state after decades of civil war and instability. In the prologue, Vergil links Roman history to the mythological tradition and focuses on the hero Aeneas, survivor of the fall of Troy and ancestor of Rome's leaders (*Aeneid* 1. 1–7):

 Of war and a man I sing, who first from Troy's shores, an exile by the decree of fate, came to Italy and Lavinium's shores. Much was he tossed on sea and land by the violence of the gods, because of cruel Juno's unforgetting anger. Much, too, did he endure in war as he sought to found a city and bring his gods to Latium. From him are descended the Latin people, the elders of Alba, and the walls of lofty Rome.

According to Vergil, Aeneas sailed by way of Thrace and Delos to Crete, where he stayed a year, believing that this was the place from which Dardanus came and that therefore it was the future home foretold him by the oracle at Delos. But a pestilence and a vision of the Penates led him to sail in search of Italy, which proved to be Dardanus' original home. He sailed to Epirus, where Helenus and Andromache had settled. Here Helenus foretold some of his future wanderings, and in particular told of their ending, which Aeneas would know had come when he saw a white sow with thirty piglets on a river bank in Italy. This prophecy complemented one that Aeneas received from the Harpy Celaeno,

who foretold that he would reach Italy and would only found his new city when hunger had compelled the Trojans to eat the tables upon which their food lay.

Leaving Helenus, Aeneas reached Sicily, sailing past the shore of southern Italy and avoiding the perils of Charybdis. A direct link with Odysseus was provided by the appearance of one of his men, Achaemenides, a survivor of the adventure with the Cyclopes, who warned Aeneas of Polyphemus and other dangers. It was in Sicily, too, that Anchises died and was buried.

The fall of Troy and Aeneas' wanderings to this point are narrated by him to Dido in Books 2 and 3 of the *Aeneid*. The poem begins with a storm that scatters Aeneas' fleet after setting sail from Sicily. The survivors were reunited in northern Africa, where Dido, queen of Carthage, hospitably received them. She fell deeply in love with Aeneas, who would himself have been content to stay with her had not Mercury appeared to him and gave him Jupiter's orders to sail away to fulfill his destiny in Italy. As he left, Dido laid a curse on Aeneas and his descendants that they should always be the enemies of Carthage, and then killed herself with the sword that Aeneas had given her.

Aeneas sailed back to Sicily and was welcomed by the king of Egesta, the Trojan Acestes. Here he celebrated funeral games in honor of Anchises, during which the Trojan women, incited by Juno, set fire to some of the ships, the rest being saved by Jupiter in a miraculous rainstorm.⁷ Aeneas left some of his followers behind in Sicily and now sailed on to Italy where he reached Cumae. Here the Sibyl foretold the wars he must fight in the new land and escorted him to the Underworld, where he talked with many of the dead whom he had known in his past life. The climax of his visit to the Underworld was his meeting with Anchises, who foretold the greatness of Rome and showed him a pageant of future Romans. The visit to the Underworld is the turning point in Aeneas' saga; after it, he is sure of his destiny and determined to settle in Italy, whatever obstacles have to be surmounted.

From Cumae, Aeneas sailed to the mouth of the Tiber, where the prophecy of Celaeno was fulfilled; as the Trojans ate the flat cakes upon which their food was placed, Iulus said, "Why, we are even eating our tables!" In Latium, King Latinus had betrothed his daughter Lavinia to the prince of the tribe of the Rutuli, Turnus. Worried by prodigies, Latinus consulted the oracle of Faunus, who advised him to give Lavinia to a foreigner instead. Latinus attempted to obey this advice by giving Lavinia to Aeneas, but Juno sent the Fury Allecto to madden Turnus and Lavinia's mother Amata, so that they violently opposed Aeneas.

War became inevitable, and Latinus was powerless to prevent it. Turnus and the Latins, with other Italian leaders (notably the Etruscan exile Mezentius), opposed the Trojans, who had for allies the Etruscans under Tarchon and the men of Pallanteum, Evander's city on the future site of Rome. Aeneas' visit to Evander had been preceded by the vision of the river-god Tiberinus. Evander himself showed Aeneas the city that was to become Rome and sent back with him his own son, Pallas, who later was killed by Turnus. After ferocious battles

between the Latin allies and the Trojans Aeneas killed Turnus in single combat. At this point the *Aeneid* ends.

This bald outline hardly reveals the extraordinary power of Vergil's poem. Writing in the epic tradition of Homer, he created a new kind of Roman epic. We illustrate three of his innovations—his use of Jupiter and prophecy to combine myth and Roman history; his creation of a different kind of hero, in some ways like Achilles and Odysseus, but differing completely in the Roman nature of his *pietas* (a virtue that includes a sense of duty and service); and finally, the prominent role he gives to Dido.

JUPITER IN THE *AENEID*

In the *Aeneid* the traditional Olympian figure of Zeus-Jupiter becomes identified with destiny or fate. Therefore his prophecies are especially important, and through them Vergil links mythology and Roman history to make the destiny of Rome both noble and inevitable.

In Book 1, Aeneas is driven to land near Carthage by a storm raised by Juno and Aeolus, and Venus complains to Jupiter of the sufferings of her son. In reply Jupiter foretells his glorious destiny and that of his Roman descendants. Here are a few lines from this prophecy (*Aeneid* 1. 267–279):

 But young Ascanius, who now has assumed the additional name of Iulus . . . will complete thirty mighty cycles of the rolling months as king, and he will transfer his kingdom from its place at Lavinium and will found with much force Alba Longa. Here the family of Hector will rule for three hundred whole years, until the royal priestess Ilia, pregnant by Mars, will bear twin children. Then Romulus, rejoicing in the tawny covering of the skin of the wolf (his nurse), will succeed as ruler of the race and will found the city of Mars and call its people Romans after his own name. For them I give no limits of events or time: I have given them empire without end.

This sense of high destiny, in which the traditional myths serve a historical purpose, is repeatedly emphasized by Vergil, in Aeneas' visit to the Underworld in Book 6 (see Chapter 15), in the description of his shield at the end of Book 8, and in the final prophecy of Jupiter in Book 12 (830–840). By these means Vergil preserves the Homeric figures of the Olympian gods, but Jupiter is a more powerful figure than Zeus, while the other gods play their traditional roles, favoring one side or the other. Juno is hostile to Aeneas and favors those who would divert him from his destiny, notably Dido and Turnus, while Venus consistently favors her son and intercedes with Jupiter for him.

AENEAS: A NEW EPIC HERO

Aeneas is motivated by *pietas*, which leads him to leave ease and comfort to pursue a destiny of which he does not become fully aware until after his visit to the

Underworld. He is a wanderer, like Odysseus, in search of a home; and he is the son of a goddess, like Achilles, terrible in single combat. But he is also an exile, who has been defeated in a great war and has seen his city destroyed. His character is epitomized in the scene where he leaves Troy with Anchises, symbol of the past, on his shoulders, while holding the hand of Ascanius, hope of the future (see pages 477–478). When we first meet Aeneas in the storm in Book 1, he wishes he were dead and his “limbs were loosened with cold fear” (1. 92–96), yet on coming to land he speaks to his followers words that show his patience, courage, and hope (*Aeneid* 1. 198–207):

 My companions—for we are not inexperienced in adversity—O friends who have suffered worse, the god will bring an end to these things also. You came to the fury of Scylla and the sounding rocks, you experienced the cave of the Cyclops. Recall your courage and dismiss dejected fear. Perhaps we shall be glad to remember these things also in the future. Through varied fortunes, through so many dangers, we go to Latium, where fate shows us a peaceful home. There the kingdom of Troy is destined to rise again. Endure, and keep yourselves for prosperous times!

Yet Aeneas’ path is never simple. In Carthage he loves and is loved by Dido, and in a last interview with her he tells her that he must obey Jupiter, whose messenger Mercury has appeared to him, however unwillingly (4. 356–361):

 Now also the messenger of the gods sent from Jupiter himself has brought his orders flying swiftly through the air. I myself saw the god in the clear light entering the city and with my own ears I heard him speak. Do not inflame me and yourself with your complaints. I go to Italy not of my own will.

In the last part of the poem, Aeneas must fight a terrible war against the Rutulians, led by Turnus, and their allies. In the final scene of the poem, Aeneas and Turnus meet in single combat, and the poem ends with the death of Turnus, who has pleaded with Aeneas for his life. Turnus had earlier killed Pallas, son of Evander, Aeneas’ host at Pallanteum, and put on his victim’s sword-belt. Here are the last fifteen lines of the poem (12. 938–952):

 Aeneas stood armed eager to attack, surveying [Turnus], and he kept his hand from striking. Even now more and more Turnus’ appeal had begun to deflect him as he hesitated, while the ill-starred belt came into his view high on [Turnus’] shoulder and the well-known studs glittered on the boy Pallas’ strap. Turnus had felled him with a [fatal] wound and wore his enemy’s fittings on his shoulders. Aeneas gazed profoundly at the reminder of his savage grief and at the spoils; and on fire with rage and terrible in his anger, he spoke: “Will you, wearing the spoils taken from my friends, be snatched from me? Pallas with this blow sacrifices you and exacts payment from your sinful blood.”

With these words in hot anger he sank the sword in Turnus’ chest. His limbs collapsed in the coldness [of death] and his life fled with a groan complaining to the Underworld.

Thus at the end Aeneas is overcome by anger mixed with devotion to his dead friend. Vergil leaves us in doubt—is the *pietas* of Aeneas weaker than his passion? Is he after all a hero motivated by passion like Achilles, rather than the Roman hero inspired by *pietas*? Vergil leaves his readers to decide.

DIDO

The greatest obstacle to Aeneas' success is Dido, queen of Carthage and favorite of Juno. In the tradition before Vergil she was called Elissa, a princess of Tyre, married to Sychaeus, who was murdered by her brother, Pygmalion. She escaped from Tyre (taking with her Pygmalion's treasure) and came to north Africa where, as Dido (which in Punic means "Virgin"), she founded Carthage, whose territory she was given by the local prince, Iarbas. Vergil makes her a gracious queen, a leader whom he likens to the goddess Diana. She welcomed the Trojan survivors of the storm, and Aeneas is moved as he sees the history of his own sufferings at Troy portrayed on the city's temple. When Dido first appears, she is likened to Diana herself; all is light and activity. She graciously invites the Trojans to her palace, for, she says, "I also was tossed about with many sufferings and Fortune finally wished me to settle in this land. Not without experience of evil, I know how to help the unfortunate" (*Aeneid* 1. 628–630).

But destiny is against Dido; Venus and Juno conspire to make her fall in love with Aeneas; and after he has recounted to her the fall of Troy and his wanderings, she is stricken with love, likened by Vergil to a wounded deer. Her passion is described in Book 4, along with the hunt and her union with Aeneas, the complaint of her rejected suitor Iarbas to his father, Jupiter (who had seduced Iarbas' mother), the appearances of Mercury urging Aeneas to leave, the final confrontation of Dido and Aeneas, Aeneas' departure, and Dido's decision to die. Before she dies Dido utters a curse on Aeneas and his descendants (4. 607–629):

O Sun, you who traverse all earth's works with your flames, and you, O Juno, mediator in these troubles and witness, and Hecate, called on with weird cries by night at the crossways in the cities, and dire avenging goddesses (*Dirae*), and gods of dying Elissa [i.e., Dido], accept my words and hear my prayer! If it is necessary for his cursed head to reach harbor and come to land, and if Jupiter's fate so demands and this ending is fixed, then let him beg for help, harried by war with a brave and well-armed people, an exile with no home, torn from the embrace of Iulus, and let him see the untimely death of his companions. And when he has yielded himself to the terms of an unfair peace then may he not enjoy his kingdom nor the light he longed for. Let him fall before his time and lie unburied on the shore. This is my prayer, this is my final word as I shed my blood. Then may you, O my Tyrians, harass his family and all his future descendants with hatred and send this offering to my ashes. Let there be no love, no treaty between our peoples. May you arise, some avenger, from my bones, and may you pursue the Trojan settlers with fire and sword, now, in the future,

Dido and Anna, by Washington Allston (1779–1843). Oil on millboard, 1809(?); 24 × 18 in. Anna comforts her sister, while Aeneas stealthily slips away from the palace to the waiting fleet in the background. In this unfinished painting Allston's focus is the closeness of the sisters rather than the solitary tragedy of Dido. (Lowe Art Museum, University of Miami, Miami, Florida, Gift of the Washington Allston Trust. Courtesy of Lowe Art Museum.)

whenever time gives you strength. This is my curse—shore with opposing shore,
sea with sea, arms with arms, let them and their descendants fight!

Vergil has again united myth and history, for Dido's curse vividly reminds the reader of Rome's times of greatest danger, the wars against Carthage. But in *Dido*, Vergil also created a character who has always aroused the sympathy of his readers—we are reminded of Augustine, who confessed that he shed tears

for Dido before he did for Christ. As with Aeneas and his legend, Vergil took the traditional story of the founding of Carthage by the Phoenician queen Elissa and transformed the saga into profoundly moving tragedy.

OTHER CHARACTERS IN THE *AENEID*

The *Aeneid* is full of characters and scenes that have become part of traditional Roman legend. Besides the fall of Troy, Vergil takes Aeneas to the future site of Rome, where he is welcomed by the Arcadian king Evander and hears the story of Hercules and Cacus. We have seen in Chapter 15 how Aeneas visits the Underworld. In Book 7 we see how Juno rouses the malevolent powers of the Underworld in her attempt to thwart the fulfillment of destiny. Aeneas' enemy Turnus is, like Dido, a victim of destiny, both a cruel warrior and a gallant champion of his people. Mythical Italian characters are vividly portrayed, Nisus and his lover, Euryalus, who died tragically during a nocturnal patrol; the warrior maiden Camilla, leader of the Volscians, who could run over the fields of ripe grain without bruising the crops and over the waves of the sea without her feet touching the water (7. 808–811); Mezentius, “despiser of the gods,” the Etruscan leader who in other versions of the saga survived the war and was later killed by Ascanius. In the *Aeneid*, both he and his son, Lausus, are killed by Aeneas. Camilla is killed by the Etruscan Arruns, who is himself killed by Diana's follower Opis in punishment for killing her favorite.

THE DEATH OF AENEAS

The *Aeneid* ends with the death of Turnus. The saga continues with Aeneas' marriage to Lavinia and his founding of Lavinium. He died in battle after only three more years and became a god, being worshiped with the divine title *Indiges*.⁸

ANNA AND ANNA PERENNA

The myth of Anna, Dido's sister, is related by Ovid (*Fasti* 3. 523–656) in connection with the New Year's festival (celebrated in March, originally the first month of the Roman calendar) in honor of Anna Perenna. Anna fled from Carthage, which had been occupied by Iarbas, and came to Melita (Malta). Here her brother Pygmalion, who had killed Dido's husband Sychaeus and driven her from Tyre, found her and demanded that she be handed over. Fleeing again, she was shipwrecked off the coast of Latium, reaching land in Aeneas' territory in the *ager Laurens*. Aeneas found her and gave her a refuge in his palace, but Lavinia out of jealousy plotted to kill her. Warned by Dido in a dream, Anna fled once more and came to the bank of the river Numicus, where Aeneas' followers searched for her. Here is how the story ends (*Fasti* 3. 651–656):

 They came to the banks [of the Numicus], where her footsteps were. The river, which knew [what had happened], stopped the flow of his silent waters. Anna

herself seemed to speak: "I am a nymph of the peaceful Numicus. I hide in the river that flows year round (*perenne*) and my name is Anna Perenna." Immediately they feasted in the meadows where they had wandered in their search and celebrated the day and themselves with copious wine.

Thus Ovid identified Anna, sister of Dido, with Anna Perenna, the Italian goddess of the New Year, whose festival was marked by feasting in the open air, drinking, and lovemaking.

ROMULUS AND THE EARLIEST LEGENDS OF ROME

ROMULUS AND REMUS

The last king of Alba Longa was Amulius, who had usurped the throne from his brother Numitor. Numitor's daughter was Rhea Silvia, also called Ilia, whom Amulius attempted to keep from marriage by making her a Vestal Virgin. Mars loved her, however, and she bore him twin sons, Romulus and Remus, whom Amulius ordered to be thrown into the Tiber. But the servants pitied them and left them by the edge of the river, which was in flood. When the waters receded, the twins were safe on dry ground, where they were found by a she-wolf, who suckled them. The place was marked by the Ficus (fig tree) Ruminalis, a name that is related to the word *rumis*, a teat. It grew near the Lupercal cave below the Palatine Hill, which was the site of Evander's city, Pallanteum.

The babies were found by one of Amulius' shepherds, Faustulus, who brought them to his home, where he and his wife Acca Larentia brought them up. When they were grown up, they made their living, it was said, by attacking brigands and relieving them of their spoils. Eventually Remus was arrested and brought before Numitor, but his punishment was prevented by the appearance of Romulus, who related the story told to him by Faustulus of the twins' rescue. So grandfather and grandsons recognized each other, and together they brought about the death of Amulius and the restoration of Numitor to the throne of Alba. Romulus and Remus then left Alba and founded their own city at the site of their miraculous rescue from the Tiber.

The theme of fraternal rivalry now appears in the story of Romulus and Remus, and it led to the death of Remus. To decide which should give his name to the city, Romulus and Remus resorted to augury, that is, taking omens from the flight of birds. Here is how Ennius describes the scene (*Annales* 1, frag. 47):

 Then caring with great care and desiring to rule they give their attention to auspices and augury. Remus takes his place on the hill and alone watches for a favorable bird. But handsome Romulus watches from the heights of the Aventine, observing the race of high-flying birds. Their contest was whether to name the city Roma or Remora. All [the people] were in suspense as to who would be their leader. Straightway the bright light came forth, struck by the rays [of the

Mars and Rhea Silvia, by Peter Paul Rubens (1577–1640). Oil sketch on canvas, 1616–1617; $21\frac{1}{2} \times 29\frac{1}{4}$ in. Mars, in armor, rushes impetuously toward the Vestal Virgin. Already a cupid has removed his helmet, and another (with a quiver of arrows) is unbuckling his breastplate. Rhea looks at him with mixed emotions, including fear and love. The setting is the temple of Vesta, whose sacred fire burns on the altar in front of the Palladium. The sketch may have been intended for a tapestry, since Athena's spear and shield are reversed (her shield would normally be on the left arm) and Mars' sword is on his right side. (Courtesy of the Collections of the Prince of Liechtenstein, Vaduz Castle.)

sun], and at the same time high up a bird flew on the left, by far the most beautiful bird of augury. At the same time the golden sun rose, and thrice four sacred bodies of birds flew from the heavens and settled in the lucky places of good omen. Then Romulus saw that the throne and land of the kingdom had been given to him as his own by augury.

In Ennius' account, Romulus and Remus watch from different parts of the Aventine and the birds appear only to Romulus. In later versions, Romulus watched from the Palatine Hill, Remus from the Aventine. The first omen, six vultures, appeared to Remus, and then twelve appeared to Romulus. In the ensuing quarrel as to whether the winner was he who saw more birds or he who saw the omen first, Remus was killed. Romulus gave his name to the new city of Rome and became its king.

Ennius, however, gave a different version of Remus' death, which was followed by Livy and Ovid. Romulus began to build his city on the Palatine, and when the walls had risen a little way, Remus scornfully leaped over them and was killed by his brother because he had acted as an enemy, for a friend enters a city by the gate.

ROMULUS AND THE SABINES

Romulus now set about establishing his kingdom and laying the foundations of Rome's political structure. In order to increase the population, he declared the area between the two parts of the Capitoline Hill an *asylum* (i.e., a sanctuary where any man could be assured of freedom from violence or prosecution). To this place men came from many directions to become Rome's future citizens. There was a shortage of women, however, and attempts to remedy this situation led to a long series of incidents involving the Romans and the Sabines.

In the first place, the surrounding tribes refused requests from Roman embassies for young women to be wives for Roman men. Romulus decided therefore to use deceit and force. Men and women from the Sabine tribes were invited to attend the festival games of the Consualia. At a given signal, the Roman men seized the young Sabine women, whose relatives fled. Such an act could not go unavenged, and the Sabines, under the leadership of Titus Tatius, organized themselves for war on the Romans. In the first encounter, Romulus killed

Romulus and Remus, by Alexander Calder (1898–1976). Wire sculpture, 1928; 31 × 112 in. This large construction is a witty reinterpretation of the famous Etruscan bronze “Capitoline Wolf” in Rome suckling the mythical founders of Rome. (Solomon R. Guggenheim Museum, New York. Photograph by Robert E. Mates. © The Solomon R. Guggenheim Foundation, New York. © 1998 Artists Rights Society (ARS), New York/ADAGP, Paris.)

the king of the Sabine town of Caenina and dedicated his armor to Jupiter Feretrius (perhaps Jupiter “to whom one brings”). This was the first of only three occasions in the history of the Roman Republic that a Roman commander dedicated the armor of an enemy commander whom he had personally slain; such dedications were known as the *spolia opima* (the finest trophy). In the second battle, when Romulus was again victorious, Hersilia, the wife of Romulus, acted as conciliator and persuaded her husband to accept the defeated Sabines as Roman citizens.

Finally the Sabines attacked Rome itself and through the treachery of Tarpeia captured the Capitoline Hill. In the legend Tarpeia was the daughter of the Roman commander upon the Capitol; greedy for gold, she agreed to let the Sabines in if they would give her “what they had upon their left arms”—meaning their gold bracelets. After the capture, they crushed her to death under their shields, for the left arm is the shield arm. Although they were masters of the citadel, the Sabines could not capture the Forum—its entrance was barred by miraculous jets of boiling water emitted by Janus. In the low ground where the Forum lay, fierce fighting took place, and the Sabines were successful until Romulus turned the tide of battle by vowing a temple to Jupiter Stator (Jupiter the Stayer).

The next stage of the battle is associated with a cavity in the Roman Forum called the Lacus Curtius. The fiercest of the Sabine soldiers was Mettus Curtius, who rode on his horse into the marshy ground and miraculously escaped from his pursuers. The low-lying depression was named after him. Livy also gives another (more patriotic) account of the Lacus Curtius, which has proved more popular. In 362 B.C. a chasm mysteriously opened up in the Forum, and the soothsayers announced that it could be closed only by putting into it that which was most valuable to Rome; if it were so filled, the Roman state would endure forever. A young Roman, Marcus Curtius, realized that military courage was Rome’s greatest treasure, and in full panoply and before the assembled people he prayed to the gods and rode into the chasm. Thus it was closed, and the place took its name from the hero who had been swallowed up by the earth.

The battle between Romulus and the Sabines was brought to an end by the Sabine women themselves, wives (and now mothers) of Romans and daughters of Sabines. They ran into the middle of the battle and by their direct appeals brought about a truce. Peace was made, and the Sabines and Romans agreed to live together at Rome, with Titus Tatius becoming Romulus’ colleague in the kingship, while the Sabines provided the name by which the Roman citizens were addressed, *Quirites*.⁹

Thus the unification of the two peoples was achieved. Titus Tatius was killed some years later by the people of Lavinium. Romulus himself, after a long reign, disappeared while reviewing his army in the Campus Martius, amid thunder and lightning. He became the god Quirinus, and appeared to a farmer, Proculus Julius, who reported his final words. They eloquently embody the ideals that later Romans attributed to the founder of their state (Livy 1. 16):

 "Go," said he, "and tell the Romans that it is the gods' will that my city of Rome should be the capital of the world. Let them exercise their military skill and let them know—and let them tell their descendants—that no mortal power can resist the Romans."

Some of the saga of Romulus is rooted in fact, as has been proved by recent archaeological discoveries. Much of his legend, however, is literary invention. Romulus himself is the eponym of Rome, to whom many features of the Roman constitution are ascribed. His deification is problematic, since Quirinus was a Sabine god with whom Mars was associated. Sometimes his name stands by itself; sometimes it is attached to Mars (Mars Quirinus) or to Janus, Jupiter, or even Hercules. One ancient Roman scholar (Servius on *Aeneid* 1. 292) described Quirinus as "Mars when he presides in peacetime." The idea of a god of a military state when it is not at war is particularly suitable for Romulus, organizer of the peaceful state and successful leader in its first wars. Quirinus, moreover, being Sabine, is suitably fused with the Roman Romulus; there were separate communities with different cultures upon the Palatine, Oppian, and Quirinal hills in the eighth century B.C. and the legend of a fusion, symbolized by the god Romulus-Quirinus, is supported by archaeological evidence.

OTHER CHARACTERS IN THE LEGEND OF ROMULUS

Several other characters in the Romulus legend are divine. Faustulus, the shepherd who reared the twins, may have some connection with Faunus, since the root of his name is the same and has the connotation of "favoring" or "bringing increase." Cato and Varro, followed by Ovid, connected Acca Larentia, Faustulus' wife, with the festival of the Larentalia on December 23, at which offerings were made to the dead, but her exact divine function is unknown. It has been suggested that her name, Acca, is the same as the Sanskrit word for "mother," and that she was therefore the *mater Larum*, mother of the Lares (although the *a* of *Larentia* is long and that of *Larum* is short). All that can be said with certainty is that both Acca and Faustulus are old divinities whose precise attributes and functions had been forgotten by the time of the early Roman writers.

Hersilia, the wife of Romulus, became Hora Quirini, the consort of the deified Romulus. Almost certainly her name, Hora, meant "the power" or "the will" of Quirinus, and this was her original function, before the myth made her the wife of the mortal Romulus.

The treacherous Tarpeia gave her name to the Tarpeian Rock, from which criminals were thrown to their deaths. She too was divine, for libations were offered at her tomb. Although Livy makes her a Sabine, her name is Etruscan.

Some of the elements in the legend explain features of the Roman constitution. The dual kingship of Romulus and the colorless Titus Tatius foreshadows the collegiate principle of Republican magistracies, in particular the dual consulship.

LEGENDS OF THE REGAL PERIOD

The period of the kings (which traditionally ended in 509 B.C.) and of the early Republic is full of stories that are more myth than history. We give a few examples here.

THE HORATII

In the reign of the third king, Tullus Hostilius, there was war between Rome and Alba Longa, which ended in the destruction of Alba. At an earlier stage, the two sides agreed to decide the issue by a battle between champions, three brothers on each side; the Alban champions were the Curiatii, the Romans were the Horatii. Two Romans were quickly killed, but the third, who was unwounded, separated and dispatched singly his wounded opponents. Now his sister had been betrothed to one of the Curiatii; and as her brother was triumphantly entering Rome, bearing the spoils of the dead Curiatii, she cried out in grief. Horatius killed her immediately for her inopportune and unpatriotic gesture. As a murderer, he was condemned to death, but on appeal to the people, he gained a reversal of the verdict because of his popularity as a courageous soldier. He underwent a ritual purification by offering a sacrifice and passing with veiled head beneath a kind of yoke or crossbar (i.e., a horizontal beam supported by two upright poles). The crossbar was called the *tigillum sororium* and was flanked by two altars, one dedicated to Janus Curiatius, the other to Juno Sororia.

The association of Horatius with the *tigillum sororium* was the result of confusing the archaic title of Juno Sororia with the Latin word *soror*, a sister. Passing under the yoke was indeed a ceremony of purification, but, as the titles of the two divinities prove, the purification in this case was of boys and girls reaching the age of puberty. The boys, initiated at the altar of Janus Curiatius, went out to their first battle, and on their return they were purified from blood-guilt by passing beneath the *tigillum*. Juno Sororia likewise presided over the initiation of girls into adult life. Other details of the legend are etiological. The appeal of Horatius explains the Roman citizen's right of appeal to the people. The legend of the Horatii and Curiatii may have derived from five ancient mound tombs, in two groups of two and three, respectively, outside Rome in the direction of Alba. Another ancient stone tomb stood near the place where Horatia was said to have been killed by her brother.

THE TARQUINS AND SERVIUS TULLIUS

The last three kings of Rome were Tarquinius Priscus, Servius Tullius, and Tarquinius Superbus. The two Tarquins were Etruscans, and Servius probably was

The Oath of the Horatii. By Jacques-Louis David (1748–1825); oil on canvas, 1785, 128 $\frac{1}{4}$ × 168 in. David moved from Paris to Rome in order to imbibe the classical inspiration necessary for this huge and heroic painting. The scene is based not on Livy, but on Corneille's tragedy *Horace* (1640) and Noverre's ballet (1782) on the same theme. The elder Horatius, holding the brothers' swords, administers the oath to the brothers, who salute with military precision, which indicates (for David's patrons) patriotic self-sacrifice but bears more ominous associations for modern viewers. On the right, in the background, the mother of the three brothers comforts her grandchildren, and, in front, Sabina (wife of one of the brothers and sister of the Curiatii) and Camilla (sister of the Horatii and engaged to one of the Curiatii) mourn for their coming bereavement. (Paris, Louvre.)

Etruscan, although his name is Latin. Servius was a founder and organizer of Roman institutions second only to Romulus, and a number of legends gathered round him. His mother, Ocrisia, was a slave who had been captured in war and assigned to the household of Tarquinius Priscus. She was of the royal house at Corniculum. According to the legend, Servius' father was the son of Vulcan, who miraculously appeared in phallic form to Ocrisia as she was sitting by the fire in the palace. When Servius was a baby Vulcan showed his favor by causing a miraculous flame to play around the child's head without harming him. Favored by such portents, Servius was assured of special treatment in the palace;

he was brought up in the king's family and married to his daughter. When Tarquin was murdered his widow, Tanaquil, skillfully arranged for the transfer of power to Servius.

Apart from his political and military reforms, Servius is credited with introducing the cult of Diana to Rome. Like King Numa he is said to have had a divine counselor and consort, in this case the goddess Fortuna. His death was said to have been caused by his daughter Tullia, who was married to Arruns, the son of Tarquinius Priscus, while her sister (also called Tullia) was married to his brother Tarquinius. She had her husband and her sister murdered and then married Tarquinius, whom she urged to usurp the throne and murder Servius. The corpse of Servius lay in the street called the Clivus Urbius; Tullia drove her coach over her father's body; because of the crime, the name of the street was changed to Vicus Sceleratus (Crime Street).

LUCRETIA AND THE END OF THE MONARCHY

Thus Tarquinius Superbus (the proud) became king; in the historical tradition he is a tyrant, and his expulsion led to the establishment of the Roman Republic. The crime that caused his removal became one of the most famous of Roman legends. In the Roman army during the siege of the Rutulian capital of Ardea were a number of young nobles, including Tarquinius Collatinus and Sextus Tarquinius, the son of the Roman king. Full of wine one evening, they rode off to pay surprise visits to their wives in order to see who was the most virtuous and faithful. Alone of all whom they visited, the wife of Collatinus, Lucretia, was acting in a chaste and matronly way; they all judged her to be the best and returned to camp. Now Sextus Tarquinius was so taken by Lucretia's beauty that he returned alone to Collatia some nights later and surprised and violated her. Next day she sent for both her father and her husband, who came together with Lucius Junius Brutus. She told them what had happened and made them promise to avenge themselves on her attacker. Then she plunged a dagger into her heart.

Lucretia's martyrdom led to the end of the monarchy. Tarquinius Superbus was driven into exile with two of his sons. Sextus Tarquinius went to the Latin town of Gabii, where he was murdered. Rome became a republic, the chief power being exercised by two praetors elected annually (the title was changed to "consuls" some sixty years later), one of whom was Brutus.

The early centuries of the Roman Republic were idealized by historians and poets. As early as the fourth century, legends were created about Roman leaders to express heroic and moral ideals. In the view of Georges Dumézil, the legends of the monarchy and early Republic reflect the tripartite organization of Indo-European society (for there were three tribes in early Rome), which he classifies by function, that is, priest-kings, warriors, and food producers. He believes that the traditional tales enshrined in the historians (most notably the early books of Livy) were the genuine myths of this society. This view is controversial, but

Rape of Lucrece, by Reuben Nakian (1897–1986). Steel, 1953–1958; height 144 in. Nakian has transformed conventional representations of the scene into a violent confrontation of abstract forms constructed from steel plates and pipes. The intimidating figure on the left, topped by a helmetlike shape, threatens the slighter figure on the right, who starts back from the attacker, while she leaps (we can imagine) to the ground from her bed. Nakian's disjointed shapes starkly express the breakdown of moral and social order represented by the crime of Tarquinius. (Hirshhorn Museum and Sculpture Garden, Smithsonian Institution, Washington, D.C. Gift of Joseph H. Hirshhorn, 1974. Photograph by Lee Stalsworth.)

it does recognize the peculiar ability of the Romans to make national heroes of their historical figures, as Livy saw. Nevertheless, the stories of these early Roman heroes belong more to the realm of history than to that of pure myth, and we end our survey of Roman mythology with the end of the Roman monarchy.¹⁰

NOTES

1. Because of the demands of the Latin hexameter, the gods are not named in order of importance. Ennius' forms are given, but we refer to Mercury and Jupiter (for Mercurius and Iovis).
2. Augustus continued to live on the Palatine Hill after he became Pontifex Maximus in 12 B.C.
3. Her name seems to be connected with the Latin words for mind (*mens*) and remembering (*meminisse*).
4. Some years after the great fire of A.D. 64 the emperor Domitian set up altars to Vulcan in every one of the fourteen districts of Rome.
5. Ovid tells the same story of Priapus and Vesta at *Fasti* 6. 319–346. The story of Lotis is the subject of Bellini's painting *The Feast of the Gods* (see Color Plate 6).
6. R. Ross Holloway, *The Archaeology of Early Rome and Latium* (New York: Routledge, 1996). An overview that includes the recent archaeological discoveries relating to early Rome, such as the shrine of Aeneas at Lavinium and the walls of the Romulan city on the Palatine.
7. These ships reached Italy and were turned into sea-nymphs by Cybele, who, as the Phrygian goddess, protected ships made from Phrygian trees (*Aeneid* 10. 220–231).

8. See p. 629 for Ovid's account of Aeneas' death and his epithet. The meaning of the title *Indiges* is not certain. A group of gods were called the *Di Indigetes*, and certain gods (e.g., Jupiter and Sol) were sometimes worshiped with this epithet. Aeneas was sometimes called *Pater Indiges*.
9. The etymology of *Quirites* is unknown. It has the same root as the god Quirinus and the Quirinal Hill. The Romans wrongly connected it with the Sabine town Cures.
10. See Georges Dumézil, *Archaic Roman Religion*. Translated by P. Knapp, 2 vols. (Chicago: University of Chicago Press, 1970). For further reading in Roman mythology we particularly recommend the following: Michael Grant, *Roman Myths* (Harmondsworth and Baltimore: Penguin Books, 1973; reprint, New York: Dorset, 1984).

PART FOUR

The Survival of Classical Mythology

CLASSICAL MYTHOLOGY IN LITERATURE AND ART

CLASSICAL MYTHOLOGY IN LATE ANTIQUITY

THE DECLINE OF THE GODS OF THE GREEK CITY-STATE

The connection between religion and the state in classical Greece is evident in Greek drama and in the sculpture of the great temples. The gods and their myths were central in the life of the city-state, which reached its climax in many parts of the Greek world during the fifth century B.C. In the following century the self-confidence of many city-states was weakened in part by political strife and warfare, in part by the need for alliances with other Greek cities or with non-Greek peoples. Citizens were less motivated by patriotism to make great sacrifices on behalf of their city, whose gods were no longer ubiquitous in its life. They were less relevant to a world where citizens sought from religion comfort for their individual concerns.

The process of undermining Homeric religion had begun centuries earlier, when the Ionian philosophers began to explain the place of human beings in the macrocosm in nontheological terms. A whole world separates Hesiod's cosmogony and theogony from the Ionians' theories about the universe. Anaximenes of Miletus (ca. 545 B.C.), for example, said that air was the elemental substance of the universe (including the gods) and did not hesitate to refer to it as *theos* (God). Heraclitus of Ephesus (ca. 500) taught that fire was the prime element and further criticized the rituals of Homeric religion, in particular its central feature, the animal sacrifice; purifying oneself with blood, he said, was like washing in mud. The most outspoken of these early critics was Xenophanes of Colophon (ca. 525), who attacked Homeric anthropomorphism: "Homer and Hesiod," he said, "have attributed to the gods everything that is shameful and a reproach among mortals: theft, adultery, and deceit" (frag. 11 [Diels]). Toward the end of the fifth century, the criticisms of the philosophers were widely accepted among thoughtful people, whose confidence in the old order and established religion was shaken by the political, moral, and intellectual upheavals that surrounded them. In the period of the Peloponnesian War (431–404), the Sophists (professional philosophers) were to be found lecturing in many Greek

cities. Their skepticism about traditional religion caused a strong conservative reaction, which finds its expression in Aristophanes' play the *Clouds* (423) and in the condemnation and execution of Socrates (who was not a Sophist) in 399. The charges against Socrates show how serious was the debate about the gods of the state (Xenophon, *Memorabilia* 1. 1):

Socrates is guilty of refusing to recognize the gods recognized by the state and introducing other, new gods. He is also guilty of corrupting the young.

About twenty-five years later, Plato banished Homer from the educational curriculum of his ideal state because he believed the Homeric gods and their myths set a bad moral example for the young. People turned more and more to philosophy for assurance, and the great philosophical schools—such as the Academy of Plato—were founded during the fourth century B.C.

ALEXANDRIANISM

The conquests of Alexander the Great renewed the influence of Oriental ideas and religions in the Greek world. He and his father, Philip II of Macedon, further weakened the independence of Greek city-states and loosened the hold of traditional religion. The period after Alexander's death in 323 B.C. is called the Hellenistic Age, which continued until the final absorption of Greece into the Roman Empire in 146 B.C. The intellectual center of the Greek world in the Hellenistic Age was the Egyptian city of Alexandria, and its library was the greatest of the Greek centers of scholarship. Here in the third century scholars were interested in traditional mythology, which they explained and classified or used as a source of learned allusions. Callimachus (ca. 265) was the most distinguished of the Alexandrian scholar-poets. Amongst his works was the *Aetia* (*Causes*), a poem more than four thousand lines in length, of which only about four hundred survive, containing many myths and legends about the origins of customs, institutions, and historical events. He also wrote six hymns modeled on the *Homeric Hymns*. Among his contemporaries were Apollonius of Rhodes, who wrote an epic on the Argonauts, and Theocritus of Cos, whose poems included episodes from the sagas of Hercules and the Argonauts. Often, however, the Alexandrians used mythology as a source for literary ornamentation or learned allusion.

One of Callimachus' *Aetia* was adapted by Catullus in his sixty-sixth poem, "Berenice's Lock," and we give here a few lines whose ingenuity is typical of the Alexandrian use of mythological allusion. Berenice was queen of Egypt, wife of Ptolemy III, who vowed to dedicate a lock of her hair if her husband returned safe from a campaign in Syria. After the lock disappeared from the temple where it was dedicated, it was identified with a newly discovered constellation, *coma Berenices*. The lock of hair is the speaker (Catullus 66. 51–56):

 The sisters of the lock that had just been cut off were mourning my fate, when the twin of Ethiopian Memnon arrived on hovering wings, the horse that be-

longs to Locrian Arsinoë, and he lifted me up and flew off through the dark upper air and placed me in the chaste lap of Venus.

It would take a learned reader to understand that the "twin of Memnon" is the West Wind, here identified with the winged horse Pegasus. Pegasus is made the servant of Arsinoë, wife of King Ptolemy II, who after her death was deified as Aphrodite Zephyritis (her title coming from the place Zephyrium, but punningly interpreted to mean "having power over Zephyrus," that is, able to send the West Wind on errands).

The Alexandrians and their Roman followers were not always so ingenious in their allusions. Catullus himself created the finest narrative of the myth of Ariadne and Theseus in his sixty-fourth poem, and the Alexandrian taste for romantic detail was brilliantly united with mythological narrative in the *Metamorphoses* of Ovid, the master storyteller.

Thus the myths enjoyed a revival in the Alexandrian tradition, which at its best led to entertaining and often moving narratives, and at its worst to a paralyzing use of ingenious allusion. In art also, the search for ingenious expression of a particular emotion, or for a particular effect on the viewer, led to works such as the *Hermes* of Praxiteles, whose technical brilliance should be compared with the dignity of the Apollo of the temple of Zeus at Olympia. The *Demeter* of Cnidus, however, dating from the later part of the fourth century, showed that artists could still represent the majesty of the Olympian gods (see page 308).

In the thousand years between the rise of Alexandrianism and the early Middle Ages (i.e., ca. 300 B.C. to A.D. 700) the survival of classical mythology was ensured both by the uses to which it was put and by its critics. We discuss four of these modes of survival: (1) Euhemerism; (2) mythographers and handbooks; (3) astronomy and astrology; and (4) pagan and Christian critics.

EUHEMERISM

The work of Euhemerus of Messene (ca. 300 B.C.), which achieved an influence out of all proportion to its merits, took a different approach to the traditional myths. The theory of *Euhemerism* states that the gods were originally men who had been kings or otherwise distinguished men. Euhemerus claimed in his book *The Sacred Scripture* to have journeyed to the Indian Ocean and, on an island there, to have seen a golden column in the temple of Zeus, upon which were inscribed the deeds of Uranus, Cronus, and Zeus. From this he discovered that the gods were human beings deified for their great deeds. Euhemerus' book was translated into Latin by Ennius (ca. 180) and summarized in Greek by the historian Diodorus Siculus (ca. 30); Ennius' version was summarized by the Christian writer Lactantius (ca. A.D. 300).

Euhemerism owed its importance in the Christian era to the fact that it provided pagan material with which to attack the pagan gods. St. Augustine, writing around A.D. 415, explained the errors of pagan religion "most reasonably,"

he said, "by the belief that the pagan gods were once men" (*De Civitate Dei* 7. 18). The seventh-century bishop Isidore of Seville began his chapters on the pagan gods with the Euhemeristic statement: "Those whom the pagans call gods are said to have once been men" (*Etymologiae* 8. 11). Isidore tried to give historical dates for the men who became gods, and his summary of world history (*Etymologiae* 5. 39) did not distinguish between myth and history. Thus he dated as "historical facts" the invention of the lyre by Hermes and Heracles' self-immolation. Euhemerism survived throughout the Middle Ages, and it was an important element in the survival of the gods of Greek mythology.

MYTHOGRAPHERS AND HANDBOOKS OF CLASSICAL MYTHOLOGY

Mythographers, who summarized and classified Greek mythology, demonstrate another aspect of scholarly interest in mythology. The Alexandrian polymath Eratosthenes (ca. 225 B.C.) and the Athenian scholar Apollodorus (ca. 145) are known to have written handbooks on mythology, now lost, and their names are attached to two surviving mythological compendia. That of "Apollodorus" (perhaps ca. A.D. 120) is the most complete and contains versions of many of the legends that are still useful. The shorter work of pseudo-Eratosthenes, called *Catasterisms*, deals exclusively with metamorphoses of people into stars. Astral legends are an aspect of Alexandrianism, and genuinely early Greek astral myths are rare (the myth of Orion is one example). The *Catasterisms*, however, include forty-four such legends, for example, the origins of the Great Bear (Callisto), the signs of the Zodiac, and the Milky Way. These legends are not myths in the strict sense, but they are a significant element in the survival of some of the persons named in classical mythology.

We give two examples of these catasterisms. In the tenth, the constellation Gemini (the Twins) was formerly the Dioscuri (Castor and Pollux):

 They exceeded all men in brotherly love, for they never quarreled about power or about anything else. So Zeus, wishing to make a memorial of their unanimity, called them, "the Twins" and placed them together among the stars.

In *Catasterism* 44, the origin of the Milky Way is given thus:

 The sons of Zeus might only share in divine honors if Hera had suckled them. Hermes, therefore (so they say), brought Heracles at his birth to Hera and held him to Hera's breast and she suckled him. But when she realized it was Heracles, she shook him off and the excess milk spurted out to form the Galaxy.¹

A few other mythological handbooks still survive. In the first century B.C. Parthenius compiled a collection of love stories for the use of the Roman poet Gallus. A Latin compendium was made in about A.D. 160 by an author who called himself Hyginus (the name of the librarian of the Emperor Augustus around 10 B.C.), containing summaries of more than 250 legends. The *Mitologiae*

O Orion: hunc a zona & reliquo corpore æquinoctialis circulus diuidit cum tauro decertantem collocatum: dextra manu clauam tenentem & incinctum ense: spectantem ad occasum: & occidentem exorta scorpionis posteriore parte & sagittario exoriente: cum cancro autem toto corpore pariter exurgentem. Hic habet in capite stellas tres claras. in utrisq; humeris singulas. in cubito dextro obscuram unam. in manu simile unã. in zona tres. in eo quo gladius eius deformatur tres obscuras. in utrisq; genibus singulas claras. in pedibus singulas obscuras. Omnino sunt decem & septem.

Orion. Woodcut from *Hygini Poeticon Astronomicon Liber*, T. de Blavis, Venice, 1488. Hyginus' mythological summary was printed by Erhard Radtolt at Venice in 1485, the first printed book to have woodcuts illustrating the constellations named after mythological figures and emblems. His blocks were used by other printers: in the case of Orion, de Blavis reversed the figure (Orion wields the club in his left hand). Orion is represented as a medieval knight whose armor overwhelms the seventeen stars of the constellation. *Smith College, Mortimer Rare Book Room.*

of the African bishop Fulgentius (late fifth century A.D.) summarized and explained the pagan myths. These works, whatever their literary worth, at least helped keep the myths alive through the early Middle Ages.

ASTRONOMY AND ASTROLOGY

The names of mythology often survived through astronomy and astrology. We have already mentioned the interest of the Alexandrians in astral legends. The astronomical poem *Phaenomena*, by Aratus (a Greek from Asia Minor, ca. 275 B.C.), was one of the most popular of all Hellenistic works. It was translated into Latin by several authors (including Cicero), and more than two dozen ancient commentaries are known. Astrology, however, was more significant in the survival of the pagan gods. It had been important in the East since the time of the Sumerians and became popular in the Greek world after the conquests of Alexander. Before the Hellenistic Age the Greeks had been skeptical about astrology, but after the fourth century B.C. the influence of the stars on human life was widely studied and feared.

Astrology was not confined to the uneducated or the superstitious; it was encouraged by the Stoic philosophers, and among the Romans even so rational a man as Cicero admitted that there was "divinity in the stars." Astrologers believed in the sympathy of the heavenly bodies and human beings. Human life, they said, was bound up with the movements of the heavenly bodies, so that the stars came to have the power formerly held by the gods. It was an easy step then to give them the names of gods and to link these names with existing legends. Moreover, as countless peoples and religions were included in the Roman Empire, a host of foreign gods joined the classical pantheon, and they transformed the images of the classical gods. This process is especially clear in the influence of Egyptian religion and its mother-goddess, Isis, and in the representations of gods in the religions of the Near East such as Mithraism.

One great Roman poem on astrology survives, the *Astronomica* of Manilius, written early in the first century A.D. Manilius recognized the authority of Homer and other Greek poets, but he found traditional mythology to be too restrictive. In Book 2, he recalls the *Iliad* and the *Odyssey* (*Astronomica* 2. 1–7):

 The greatest of poets with his sacred mouth sang of the struggles of the Trojan people, of the king and father of fifty princes [Priam], of Hector conquered by Achilles and Troy conquered after Hector, and the wanderings of the leader [Odysseus] . . . and his final battle in his own land and in a home taken captive [i.e., by the suitors].

Manilius goes on to praise Hesiod and other poets, showing that Greek mythology still exerted a strong influence on even the most rational of poets. In Book 3, however, he shows how he needed to go beyond the traditional themes of mythology and epic (*Astronomica* 3. 1–13):

 Lead me on, O Muses, as I rise to new themes and dare things greater than my strength, not afraid to enter woods not yet visited. I try to extend your bounds and to bring new treasure to poetry. I shall not tell of the war coming into being to destroy the heaven [i.e., the war of the giants], nor of the unborn baby [Dionysus] buried by the flames of the thunderbolt in its mother, nor of the kings [i.e., Agamemnon and the Greek leaders] bound by their oath, nor of Hector ransomed for his cremation as Troy was falling, and Priam bringing him [back to Troy]. I shall not tell of the Colchian woman [i.e., Medea] selling the kingdom of her father and dismembering her brother for love, nor of the crop of warriors and the cruel flames of the bulls and the watchful dragon, nor of the years restored [i.e., to Aeson], nor the fire lit by gold [i.e., the killing of Glauce and Creon], nor [Medea's] children sinfully conceived and more sinfully murdered.

In the next century (ca. A.D. 140) the Greek-Egyptian astronomer and mathematician Ptolemy (Claudius Ptolemaeus) published his astrological treatise, the *Tetrabiblos*, which explained the heavenly bodies and the nature of their influence upon human character and action.

Christianity was unable to resist the popularity of astrology. St. Augustine vigorously attacked it in his *City of God* (especially in Book 5), yet even he believed that the stars did have an influence, to which God and human free will were nevertheless superior. In any case, astrology was too much a part of late classical and early medieval culture to be extirpated. It therefore survived the coming of Christianity and with it the classical gods prolonged their existence, often, it is true, in scarcely recognizable forms.

PAGAN AND CHRISTIAN CRITICS

Even the critics of mythology acknowledged its uses. As early as 55 B.C. the Roman poet Lucretius found the names of the gods useful as symbols (*De Rerum Natura* 2. 655–660):

 Let us allow a man to use “Neptune” and “Ceres” for “sea” and “grain,” “Bacchus” for the proper word “wine,” “mother of the gods” for “earth,” provided that he does not in fact allow his mind to be touched by base superstition.

Elsewhere in *De Rerum Natura* (3. 978–1023) Lucretius interprets myths allegorically, so that the sinners in the Underworld (Tantalus, Tityus, Sisyphus) become allegories of human passions. He comments on Tityus as follows (3. 992–994):

 Tityus is in us here, whom the birds tear as he lies in the throes of love and as painful anxiety eats him up or as the cares of some other desire consume him.

By rationalizing the myths writers such as Lucretius were also ensuring their survival. This also was the case when they were attacked by the Christian Fathers. Augustine's goal in writing his *City of God* (ca. A.D. 420) was, in his words, “to defend the City of God against those who prefer their gods to its founder,” that is, preferring the gods of classical mythology to Christianity. Yet August-

A VOICE FROM THE END OF CLASSICAL ANTIQUITY

Boethius (524–480 B.C.) wrote his *Consolation of Philosophy* during the last year of his life, while he lay in prison in Pavia awaiting execution. Writing in classical Latin, he imagines a woman who personifies Philosophy instructing him, prose dialogue alternating with poems in a variety of meters. Boethius uses mythology to confirm philosophical doctrine. Orpheus (3. 12) is an example of one who disobeyed through love the laws of moderation. Boethius describes the traditional features of the Underworld, yet “Orpheus saw, lost, killed his own Eurydice.” Those who seek the higher good will lose it if they look back to Tartarus. Again, Odysseus was saved by Hermes from the power of Circe (4. 3.), unlike his men. Her herbs cannot change the hearts of human beings, but such poisons “drag a human being down from himself. . . . They flow in insidiously: not harming the body they rage in the wounded mind.”

Finally, after Philosophy has told Boethius that human beings must shape their own fortunes (4. 6), the following poem (4. 7) uses Agamemnon, Odysseus, and Hercules as examples of heroes who overcame great adversity to achieve their goals (although Agamemnon and Iphigenia paid a heavy price). “Go on, brave human beings,” sings Philosophy, “where the high road of heroic examples leads. . . . Earth, if you rise above her, rewards you with the stars.”

Boethius found in classical mythology examples to instruct and encourage human beings in adversity. Whether or not he was a Christian (and he almost certainly was), for him the ancient legends still had a power to illuminate the precepts of reason.

tine, Jerome, and other Christian Fathers actually helped to prolong the life of the classical legends. The myths survived not only in classical literary texts but also in Christian literature and works of art. The process of absorption and mingling during late antiquity and the Middle Ages reached its climax in the work of Dante, who used, criticized, and, in the process, vindicated the classical myths.

The mythological figures, then, did indeed survive, despite the passing of the religion that created them. In Western literature they were used as symbols or as allegories; they became vehicles for romantic storytelling or were identified with constellations. They traveled to the East, to be depicted in Arab manuscripts in forms very different from their Greek originals. However changed they were, the important fact is that they survived, and at the end of the Middle Ages they took out a new lease on life that still endures.

LITERARY USES OF THE MYTHS

OID IN THE LATER MIDDLE AGES

A new age in European literature, beginning toward the end of the eleventh century, has rightly been called an Ovidian Age, since Ovid’s *Metamorphoses* were

supremely important in bringing about the revival of classical mythology that reached its climax in Renaissance literature and art. In the Middle Ages classical and biblical history and mythology were mingled without distinction between history and legend. In the period of the eleventh to the thirteenth century Ovid's tales were retold not merely for their own sake, but also as vehicles for moralizing allegory. The goddesses and heroines of the *Metamorphoses* even appear as nuns in one work, and a whole series of poems and prose works explain the *Metamorphoses* in Christian terms.

This process reached its zenith with the enormous *Ovide Moralisé* of the early fourteenth century, a French reworking of the *Metamorphoses* in which the legends were interpreted as moral allegories. As an example we give a translation (from a fifteenth-century French prose summary of the poem) of one of several interpretations of the legend of Apollo and Daphne:

 Here we may suppose that by the maiden Daphne is meant the glorious Virgin Mary, who was so lowly, pure, and beautiful that God the Father chose her to conceive his only Son by the work of the Holy Spirit. She carried him for nine months and then bore him, virgin before the birth and at the birth; virgin after the birth she remained without ever losing her virginity. This sovereign Virgin is the laurel, always green in virtue, which God planted in the garden of his paradise.

A similar approach is to be found in the translation (from the French of Raoul le Fèvre) of the *Metamorphoses* by William Caxton (*Ovyde Hys Booke of Methamorphose*, 1480):

 Another sentence may be had for the storye of Daphne which was a ryght fayre damoyssel. . . . On a tyme he [Apollo] fonde her alone and anone beganne to renne after her. And she for to kepe her maydenhode and for to eschewe the voice of Phebus fledde so faste and asprely [roughly] that al a swoun [all of a sudden] she fel down dede under a laurel tree. In which place she was entered [interred] and buryed without deflourynge or towchyng of her vyrgynyte. And therefore fayneth the fable that she was chaunged and transformed into a laurel tree, whiche is contynuelly grene. Which sygnefyeth the vertu of chastete.²

Quaint as the medieval uses of Ovid may seem, they show a lively interest in classical mythology. Ovid's legends were to return in their full glory in the art and poetry of the Renaissance, and his poem still remains the single most fruitful ancient source of classical legend.

Medieval use of classical mythology was not limited to allegory. The romantic side of Ovid's legends was often preserved. The "most lamentable comedy and most cruel death of Pyramus and Thisby" presented by the "rude mechanicals" in Shakespeare's *A Midsummer Night's Dream* has several predecessors in French, Italian, and English. They appear in Chaucer and Boccaccio, in the songs of the medieval troubadours, and in the twelfth-century *Pyramus et Tisbé*. All go back finally to Ovid.

THE TROJAN LEGEND IN THE MIDDLE AGES

A different romantic tradition is embraced by the medieval versions of the Trojan legend. During the twelfth and thirteenth centuries, a number of epic *romances* were composed with classical themes. The most influential of these was the *Roman de Troie* by Benoît de Ste. Maure, a 30,000-line romance written around 1160. In scope it extends from the Argonautic expedition through the founding and destruction of Troy to the death of Odysseus. Benoît was using two Latin prose versions of the Trojan legend as his sources. The first, by Dictys Creten-sis, describes the war and the returns from the Greek point of view. It is a forgery of uncertain date (second to fourth century A.D.), purporting to be a translation from the Greek version of a diary written on bark in Phoenician script by Dictys of Crete during the Trojan War. The second of Benoît's sources, the *De Excidio Troiae* of Dares Phrygius, is likewise a late Latin forgery (perhaps of the sixth century A.D.), purporting also to be a translation from the Greek, this time of the eyewitness diary of the war from the Trojan point of view kept by the Phrygian Dares. These works were thought to be better sources than Homer because they were apparently written by eyewitnesses. They also had realistic details about the war and its participants and romantic elements. They appealed to medieval tastes and they are, through Benoît, the ancestors of much writing on the Trojan legend. Joseph of Exeter, for example, wrote a Latin verse paraphrase of Dares, which Chaucer used as a source for his *Troilus and Criseyde* (ca. 1380). The legend of Troilus and Cressida, indeed, which was first elaborated by Benoît, went through several stages of transformation. Benoît's narrative was paraphrased in Latin by an Italian, Guido delle Colonne (ca. 1275), and Guido was put into French by Raoul le Fèvre (1464). The French version was used by Chaucer and Caxton, who were the principal sources for Shakespeare's play *Troilus and Cressida*. Here are a few lines from Caxton's *Recuyell of the Historye of Troye*:

 Whan Troylus knewe certaynly that Breseyda [Cressida] shold be sente to her fader he made grete sorowe. For she was his soverain lady of love, and in semblable wyse Breseyda lovyd strongly Troylus. And she made also the grettest sorowe of the world for to leve her soverayn lord in love. There was never seen so much sorowe made betwene two lovers at their departyng. Who that lyste to here of alle theyr love, late [let] hym rede the booke of Troyllus that Chawcer made wherein he shall fynde the storye hooll [whole] whiche were to longe to wryte here.³

DANTE

Dante (1265–1321), the last of the great medieval writers and the forerunner of the Italian Renaissance, took Vergil as his guide in the *Inferno* and named Homer and Ovid among the “great shades” of classical authors inhabiting the Inferno.

Thus the importance of three of the principal sources for classical legends (Homer, Vergil, and Ovid) was confirmed.

THE ITALIAN RENAISSANCE

The figures of classical mythology first returned to their classical forms in Italy, after the centuries of metamorphosis. Their revival was part of the Renaissance ("rebirth") of classical Greek.⁴ During the fourteenth century scholars journeyed to Byzantium, where they learned Greek. If they were lucky or persistent, they also acquired manuscripts of classical Greek authors, which they brought back to Italy. Thus the study of classical Greek (which had been limited during the preceding centuries) was expanded. Petrarch (1304–1374) and Boccaccio (1313–1375) learned classical Greek, and the latter's teacher translated Homer and some Euripides into Latin. The most powerful impetus to the revival of Greek studies came from the capture of Byzantium by the Turks in 1453, for many Greek scholars fled to Italy bringing with them manuscripts of classical authors. They taught Greek to Italian humanists, although it is hard to say how many of these were learned enough to be able to read a Greek text with ease.

In the fourteenth and fifteenth centuries Italian scholars hunted for classical manuscripts, which they copied in the libraries of monasteries, and even stole. Petrarch, for example, possessed and copied two manuscripts by Livy. Boccaccio possessed copies of Varro and Apuleius, while others—of whom Coluccio, Poggio, and Politian are the most distinguished—formed extensive classical libraries and commented upon the classical works. Thus by the time classical authors began to be printed (Cicero's *De Oratore* was printed at Subiaco in 1465) there was a large corpus of fairly reliable texts.

Another aspect of the Italian Renaissance was the publication of mythological handbooks, often illustrated with woodcuts.⁵ The earliest was Boccaccio's *De Genealogia Deorum* (1371), which was first printed in 1472 at Venice. Giraldi's *De Deis Gentium* was published in 1548, and the *Mythologiae* of Conti (Natalis Comes) in 1551. These were written in Latin, while in Italian Vincenzo Cartari published his *Le Imagini degli Dei Antichi* at Venice in 1556. These handbooks gave basic narratives for writers and artists to draw on, and their woodcuts provided basic iconographies for artists to copy or elaborate. They were a significant element in the recovery of the classical forms of the gods.

PETRARCH, BOCCACCIO, AND CHAUCER'S "KNIGHT'S TALE"

Petrarch and Boccaccio used classical mythology in their poems—Petrarch in his Latin epic *Africa*, and Boccaccio in his Italian epic *Teseida* (*Theseid*). Chaucer used the *Teseida* as his principal source for "The Knight's Tale" (ca. 1387), the first of his *Canterbury Tales*. The tale begins at the point in the Theban legend when the

Seven have failed and their widows come to Attica and ask Theseus for help. Chaucer's Theseus is Duke of Athens, whose virtues are more typical of the ideal medieval leader than of the classical epic hero. In telling of the theater in which the jousting is to take place, Chaucer describes three "oratories" of Mars, Venus, and Diana. We give part of the description of Diana's oratory, which combines Ovidian mythology and medieval allegory ("The Knight's Tale" 2051–2072):

Now to the temple of Diane the chaste
 As shortly as I can I wol me haste,
 To telle yow al the descripcioun.
 Depeynted been the walles up and doun
 Of hunting and of shamfast chastitee.
 Ther saugh I how woful Calistopee [Callisto],
 Whan that Diane agreved was with here,
 Was turned from a womman til a bere,
 And after was she maad the lode-sterre [star];
 Thus was it peynt, I can say yow no ferre [further];
 Hir sone is eek [also] a sterre, as men may see.
 Ther saugh I Dane [Daphne], y-turned til a tree,
 I mene nat the goddesse Diane,
 But Penneus doughter, which that highte [was called] Dane.
 Ther saugh I Attheon [Acteon] an hert [stag] y-maked,
 For vengeaunce that he saugh Diane al naked;
 I saugh how that his houndes have him caught,
 And freten [eaten] him, for that they knewe him naught.
 Yet peynted was a litel further-moor,
 How Atthalante hunted the wilde boor,
 And Meleagre, and many another mo,
 For which Diane wroghte him care and wo.

Thus Chaucer, drawing on Boccaccio, embellished his tale with legends drawn from Ovid's *Metamorphoses*.

PASTORAL

In Italy pastoral Latin poetry, modeled on the *Eclogues* of Vergil, was composed during the Renaissance. In these poems, the form and language are Vergilian, while the characters have classical names with figures from classical mythology used for ornament and allusion. The setting is Renaissance Italy; for example, in the *Eclogues* of Sannazaro (1458–1530), Vergilian shepherds have become Neapolitan fishermen, who on one occasion meet with Proteus and a band of Tritons as they are sailing back from Capri. The classical conventions of pastoral were widely used in the sixteenth and seventeenth centuries in England and France, and they influenced the development of opera and masque, especially in France.

ENGLAND IN THE SIXTEENTH AND SEVENTEENTH CENTURIES

TRANSLATIONS OF OVID

In England classical mythology was widely used. Ovid was the most popular source, and the *Metamorphoses* were known to educated people in Latin, French, or English versions. The English version by Arthur Golding (1567), preeminent in the latter part of the sixteenth century, was used by Shakespeare. Although it was clear and faithful to the text of Ovid, its fourteen-syllable lines hardly did justice to Ovid's swift-moving energy. The translation of George Sandys (1626) largely took its place, and was in part successful because of the tighter rhythm of its ten-syllable heroic couplets. Here are the opening two lines of the poem in Golding's version, then in Sandys':

-  (G) Of shapes transformde to bodies straunge, I purpose to entreate;
 Ye gods vouchsafe (for you are they that wrought this wondrous feate). . . .
 (S) Of bodies chang'd to other shapes I sing.
 Assist you gods (from you these changes spring). . . .

Sandys (1578–1644) worked on his translation during the voyage from England to Virginia, where he was treasurer of the Virginia Company, and he completed it during his time in Jamestown. He probably returned to England in 1626 to see to its publication. *Ovid's Metamorphosis Englished* is therefore the first verse work in English (other than a ballad, *Good Newes from Virginia*, about the vengeance taken by the settlers for the Indian massacre of 1622) completed in America. Its importance was assured by the second edition, published at Oxford in 1632, which included an allegorical commentary and a full-page woodcut to illustrate each of the fifteen books.⁶ The commentary interpreted the legends in moralizing or Christian terms, but Sandys excelled his predecessors in the breadth of his learning and the incisiveness of his prose. Here are some of his comments on the transformation of Arachne (for her story, see pp. 164–166):

-  These personages, with the places, being woven to the life by Arachne, she in-closeth the web with a traile of Ivy; well suting with the wanton argument and her owne ambition. Worne in garlands at lascivious meetings; and climbing as ambitious men, to compass their owne ends with the ruin of their supporters. Minerva tears in peeces what envy could not but commend, because it published the vices of great ones; and beats her with the shuttle to chastise her presumption: who not induring the indignity hangs her selfe; and is by the Goddess converted into a Spider: that she might still retain the art which she had taught her, but toile without profit. For uselesse and worthlesse labors are expressed by the spiders web: by which the Psalmist presents the infirmity of man, and vanity of his actions.

SHAKESPEARE, MARLOWE, AND SPENSER

English authors in the sixteenth and seventeenth centuries made extensive use of classical mythology, in drama and narrative poems, as ornaments in lyric poetry and by means of mythological allusion in prose and verse works. Allusions were not always explicit. For example, when Ben Jonson addresses the moon as "Queen and huntress, chaste and fair," he is alluding to Artemis (Diana). In William Shakespeare's (1564–1616) *Twelfth Night*, the Duke imagines himself to be Actaeon as he recalls his first sight of Olivia (1. 1. 19–23):

 O! When mine eyes did see Olivia first,
Methought she purg'd the air of pestilence.
That instant was I turn'd into a hart,
And my desires, like fell and cruel hounds,
E'er since pursue me.

Christopher Marlowe's *Hero and Leander* (1598, completed by Chapman) and Shakespeare's *Venus and Adonis* (1593) are outstanding examples of narrative poems drawn from Ovid's legends. In drama, history rather than mythology more commonly provided Renaissance authors with material, but one distinguished exception is Marlowe's *Doctor Faustus*, published in 1604 and, in a revised version, in 1616. Marlowe (1564–1593) makes the mythological Helen a symbol of surpassing sensual beauty, an object of Faustus' desire. Here are the famous lines in which Faustus embraces Helen (*Doctor Faustus* 1328–1334):

 Was this the face that launch'd a thousand ships
And burn't the topless towers of Ilium?
Sweet Helen, make me immortal with a kiss!
Her lips suck forth my soul. See where it flies!
Come, Helen, come give me my soul again.
Here will I dwell, for heaven be in these lips,
And all is dross that is not Helena.

Masques were dramatic productions, usually allegorical in nature, in which the characters were drawn from classical mythology. The most distinguished example of the genre is Milton's *Comus* (1634), which combines a pastoral setting with classical allegory. Another example is the masque in Shakespeare's *The Tempest* (Act 4, scene 1). The custom of having aristocrats dress up as classical gods and goddesses survived in France and England well into the eighteenth century.

←
Ovid's Metamorphosis English'd. By George Sandys, 1632. Engraving for Book 3 by Francis Clein and Salomon Savery. Each book of the poem was prefaced by a full-page illustration, giving a summary representation of the book's legends. Book 3 is devoted to the Theban legends: the death of Semele appears on the upper right; the battle of the Spartoi in the right center; Cadmus, after killing the dragon in the lower right, looking up at Mars [Ares] in the sky; Actaeon in the lower left. (*Smith College, Mortimer Rare Book Room*.)

More important was the use of mythology for didactic purposes, as allegory, or as symbolic of universal truths, especially in the works of Spenser and Milton. In the second book of Edmund Spenser's (1552–1599) *Faerie Queen* (1596), Guyon journeys with the good Palmer and destroys the evil Bower of Bliss. On the way he is tempted by the Sirens and he is only saved from destruction by the "temperate advice" of the Palmer. In this episode the classical Sirens are symbolic of evil, and Homer's Odysseus has become a Christian holy man. In Book 2, Canto 12, Spenser alludes to Homer's tale of Ares and Aphrodite when the enchantress throws "a subtile net" over Guyon and the Palmer, and he alludes to Ovid's Arachne in the description of her delicate silk dress ("More subtile web Arachne cannot spin"). The enchantress herself, with her bewitched animals, is the Homeric Circe. Thus Spenser uses several classical legends in his allegory of Temperance.

MILTON

Of all English writers John Milton (1608–1674) displays the deepest knowledge and most controlled use of classical mythology. In an allusion to the Adonis legend, he describes the Garden of Eden as a "spot more delicious than those gardens feigned or of revived Adonis," combining ornamental simile and adverse judgment. In *Paradise Lost* (1667) his classical allusions are especially associated with Satan and his followers, and Hell is peopled with the full complement of the classical Underworld. The violence of the fallen angels is described in a simile drawn from Heracles' death (*Paradise Lost* 2. 542–546):

 As when Alcides, from Oechalia crowned
With conquest, felt th'evenomed robe, and tore
Through pain up by the roots Thessalian pines,
And Lichas from the top of Oeta threw
Into th' Euboic sea.

This passage is followed by another describing the more peaceful fallen angels in terms of Vergil's Elysian Fields. Throughout Milton's poetry, classical mythology is intertwined with biblical and contemporary learning. Like the Christian Fathers, Milton knew classical mythology so well that he felt it necessary to appeal to the superiority of Christian doctrine. In the invocation to his Muse, Urania, he follows his description of the fate of Orpheus (whose mother, the Muse Calliope, could not save him), with these words (*Paradise Lost* 7. 1–39):

 So fail not thou, who thee implores
For thou are heav'nlie, shee an empty dreame.

The tension between classical paganism and puritan Christianity is yet more explicitly put by Milton's contemporary, Abraham Cowley:

 Still the old heathen gods in numbers (i.e., poetry) dwell.
The heav'nliest thing on earth still keeps up hell.

FRANCE IN THE SEVENTEENTH AND EIGHTEENTH CENTURIES

The great dramas of the French Renaissance were founded on classical sources, although their themes were more often taken from Roman history than from mythology. Thus Garnier (1534–1590) wrote tragedies on the themes of Phaedra (*Hippolyte*) and Antigone (*Antigone*). The first tragedy of Corneille (1606–1684) was *Médée* (1635), and Racine (1639–1699) likewise wrote his first tragedy, *La Thébaïde* (1664), on a theme drawn from classical mythology, the legend of the Seven against Thebes. His *Andromaque* (1667) deals with the legend of Andromache and Pyrrhus, with the significant variation that Astyanax is supposed to have survived the fall of Troy. By far the greatest of Racine's mythological tragedies is *Phèdre* (1677), based largely on the *Hippolytus* of Euripides and the *Phaedra* of Seneca.

Classical mythology was the principal source for court entertainments under Louis XIV and Louis XV, whose reigns spanned the period from 1643 to 1774. In these productions members of the court appeared as mythological beings or as characters from classical pastoral poetry. They included music and dancing as well as words, and they were performed in elaborate settings, often designed by the most prominent artists of the day. They were operas, in which the singing predominated, or court ballets, in which dancing was more prominent. The earliest French opera was *Pomone*, by Robert Cambert, produced in 1671. Ovid's legend of Pomona and Vertumnus was one of many classical tales used by court composers (including the great French masters Lully and Rameau) for their operas and court ballets. Toward the end of the long reign of Louis XV, critics such as Denis Diderot attacked the frivolity of such artificial productions and related works of art such as the mythological paintings of François Boucher (see Color Plate 15). Their opinions helped turn contemporary taste toward the high seriousness of historical subjects (drawn especially from Roman Republican history as portrayed by Livy and Plutarch) and away from mythology.

The burlesques of Paul Scarron (1610–1660) comically deflated the pretensions of classical epic and mythology. The best known of these was his unfinished parody of the *Aeneid*, *Virgile Travesti*. Scarron was a serious writer, and he was most unfortunately imitated in a host of tasteless and less skillful travesties in England.

Classical mythology was also the basis of important French prose works, of which the most significant was the *Télémaque* of François Fénelon (1651–1715), a didactic romance published in 1699. The basis of this work is the first four books of the *Odyssey*, in which Telemachus, accompanied by Minerva, travels from Ithaca in search of Ulysses. Into these adventures were worked Fénelon's moral and political precepts.

Classical mythology, therefore, had been an inseparable part of French literary and artistic life in the two centuries before the French Revolution. By then it

had lost its freshness, and its use eventually became too formal for it to continue to be inspiring. Voltaire (1694–1778) ironically views the rise and fall of the influence of classical mythology in France in his late poem addressed to Pindar:

 Sors du tombeau, divin Pindare,
 Toi qui célébras autrefois
 Les chevaux de quelques bourgeois
 Ou de Corinthe ou de Mégare;
 Toi qui possédas le talent
 De parler beaucoup sans rien dire;
 Toi qui modulas savamment
 Des vers qui personne n'entend,
 Et qu'il faut toujours qu'on admire.

[Come out of your grave, divine Pindar, you who in other times used to celebrate the horses of some rich citizens, whether from Corinth or Megara; you who possessed the gift of speaking much without saying anything; you who skillfully modulated lyrics that no one listens to and everyone must always admire.]

GERMANY IN THE EIGHTEENTH AND NINETEENTH CENTURIES

The renaissance of classical studies took place later in Germany than in Italy, France, Spain, Austria, the Netherlands, and England. Although there had been fine classical scholars in German universities and princely courts since the sixteenth century, the classical renaissance did not reach its full vigor there until well into the eighteenth century. It differed also from the classical renaissance elsewhere in that the Greeks were admired more than the Romans, and Homer and the Greek gods reigned supreme. A short work by J. J. Winckelmann (1717–1768) led to revived interest in Greek sculpture and its ideals. This was *Thoughts on the Imitation of Greek Works in Painting and Sculpture* (*Gedanken über die Nachahmung der griechischen Werke in der Malerei und Bildhauerkunst*), published in 1755. Its influence grew with the publication in England of Stuart and Revett's *The Antiquities of Athens Measured and Delineated* (1762), which directed attention to Greek buildings and the sculpture that decorated them. Winckelmann's ideas spread with the publication, in 1766, of Lessing's *Laocoön*, which encouraged viewers to admire and become emotionally involved in works of Greek sculpture.

Thus Germany was prepared for the emergence of a group of great poets whose inspiration was drawn from Greece, and through them Greek mythology enjoyed a new life. The first of these were Johann Wolfgang Goethe (1749–1832) and Friedrich Schiller (1759–1805). Schiller's poem *The Gods of Greece* (*Die Götter Griechenlands*), which appeared in 1788, laments the passing of the world of Greek mythology and contrasts it with the materialism that the poet perceived in the Christian world around him.

Goethe was constantly inspired by the classical myths. He wrote a drama on *Iphigenie auf Tauris* (first in prose, 1779, then in verse, 1788) and a long succession of lyric poems evoking Greek mythology. Sometimes the Greek myths symbolized freedom and clarity (as in his *Ganymed*, where Ganymede expresses his joy at union with Zeus), sometimes they are the vehicle for expression of human independence and dignity, as in his *Prometheus*:

 Hier sitz ich, forme Menschen
 Nach meinem Bilde,
 Ein Geschlecht, das mir gleich sei,
 Zu leiden, zu weinen,
 Zu geniessen und zu freuen sich,
 Und dein nicht zu achten,
 Wie ich!

[Here I sit, I make human beings in my image, a race that will be like me, to suffer, to weep, to enjoy and to be glad, and to pay no attention to you, as I do!]

Goethe's most powerful evocation of Greek mythology is his use of Helen in *Faust*, Part 2, completed in 1832, the year of his death. Helen, whom Faust loves and loses, symbolizes all that is beautiful in classical antiquity, most specifically the beauty of Greek art. Goethe's Helen is more complex than Marlowe's (discussed earlier), for she represents the power and beauty of classical humanism. Here are Faust's words when he first sees the phantom of Helen, the ideal of classical beauty (*Faust* 2. 1. 6487–6500):

 Have I still eyes? Is the spring of beauty most richly poured deep into my soul? My fearsome journey has brought a blessed prize. How empty was the world to me and closed! What is it now since my Priesthood? For the first time worth wishing for, firm-founded, everlasting! Let my life's breath die if ever I go back from you! The beauty that once enchanted me, that in the magic glass delighted me, was only a foam-born image of such beauty! You are she, to whom I give the rule of all my strength, the embodiment of my passion, to you I give longing, love, worship, madness!

Later Faust travels to Greece and there is united with Helen. Here are his words of happiness as he looks forward to "years of happiness" with Helen in Arcadia, the pastoral landscape of perfect bliss (2. 3. 9562–9569):

 So has success come to me and you; let the past be behind us! O feel yourself sprung from the highest god! You belong solely to the first [the ancient] world. No strong fortress should enclose you! Eternally young, Arcadia, Sparta's neighbor, surrounds us, there to stay in full happiness!

The third of the great German poets inspired by Greek antiquity was Hölderlin (1770–1843), whose work was most deeply infused with longing for the world of Greek mythology and with regret for its passing. "We have come too late," he says (*Brot und Wein* 7): "the gods still live, but above our

heads in another world." In the same poem he evokes the landscape of Greek mythology:

 Come to the Isthmus! There, where the open sea roars by Parnassus and the snow shines on the Delphic cliffs! There, to the land of Olympus, there on the heights of Cithaeron! There, under the pine trees, under the clusters of grapes, whence Thebe and Ismenus [flow and] roar in the land of Cadmus below, whence comes the god and where he points back as he comes!

Hölderlin evokes the places associated with the great Olympian gods, Poseidon, Apollo, Zeus, and Dionysus, but "gone are the thrones and the temples," and Delphi is silent. Yet Greece still was a source of inspiration, and throughout his work, Hölderlin used Greek mythology to contrast the excitement and purity of its world with the harsher reality of his own day. This kind of escapism was a positive influence on the romantic poets in Germany and England.

ENGLAND IN THE EIGHTEENTH AND NINETEENTH CENTURIES

DRYDEN AND POPE

During the eighteenth century, classical influences reached their zenith in English literary circles. Unlike the fashionable writers who inhabited court circles in France, the English authors succeeded in keeping the classical tradition alive and vigorous over a longer period. There were, of course, many jejune uses of classical myths as ornament or mere allusion. The lack of patronage comparable to that of the courts of Louis XIV and XV meant less brilliant achievements in painting and music, but the independence of British authors led to a vigorous use of classical literature. English taste inclined more to Roman models than to Greek and to history and satire rather than to epic and tragedy. Of authors after Milton, Dryden and Pope were especially important influences for the survival of classical mythology.

John Dryden (1631–1700), although a seventeenth-century figure, exercised such influence as critic, translator, and poet that he established criteria for poetry for the first half of the eighteenth century as well. For our survey, his importance lies especially in his monumental achievements as a translator, mostly from Latin authors, including much of Ovid's *Metamorphoses*. His translation of Vergil, in which other translators collaborated, was published in 1693. Dryden successfully employed the heroic couplet as the proper meter for the translation of epic, and the style of his translation certainly affected the way in which his readers approached classical mythology. Pope described it as follows (*Imitations of Horace: The First Epistle of the Second Book of Horace* 267–269):

 . . . Dryden taught to join
The varying verse, the full-resounding line,
The long majestic march and energy divine.

The dignity and energy of Dryden's heroic couplets were also attributes of the classical figures who appeared in them. As an example of Dryden's style, we quote his translation of Ovid's description of Triton blowing his horn (*Metamorphoses* 1. 447–461):

 The billows fall, while Neptune lays his mace
 On the rough sea, and smooths its furrow'd face.
 Already Triton at his call appears
 Above the waves; a Tyrian robe he wears,
 And in his hand a crooked trumpet bears.
 The sovereign bids him peaceful sounds inspire,
 And give the waves the signal to retire.
 His writhen shell he takes, whose narrow vent
 Grows by degrees into a large extent;
 Then gives it breath; the blast, with doubling sound,
 Runs the wide circuit of the world around . . .
 The waters, list'ning to the trumpet's roar,
 Obey the summons and forsake the shore.

A greater poet was Alexander Pope (1688–1744), whose translation of the *Iliad*, published in 1720, was for many decades the way by which readers in Britain and America became familiar with Homer and the world of Greek mythology. Pope succeeded in his “first grand duty” as a translator, which was “to give his author entire . . . [and] above all things to keep alive the spirit and fire which make his chief character” (from the preface to the *Iliad*). The translation, however, is as much a creation of Pope's time and taste as it is Homeric, and many would agree with Thomas Jefferson, who said: “I enjoyed Homer in his own language infinitely beyond Pope's translation of him.” Like Dryden's translations, however, Pope's *Iliad* created a certain view of the Greek gods and their myths, which not only spread knowledge of them but also established the criteria by which they were valued. Here are a few lines from Pope's translation, in which Achilles swears his great oath at the height of his quarrel with Agamemnon (*Iliad* 1. 233–247):

 “Now by this sacred sceptre hear me swear,
 Which never more shall leaves or blossoms bear,
 Which sever'd from the trunk (as I from thee)
 On the bare mountains left its parent tree:
 This sceptre, form'd by temper'd steel to prove
 An ensign of the delegates of Jove,
 From whom the power of laws and justice springs
 (Tremendous oath! inviolate to kings);
 By this I swear—when bleeding Greece again
 Shall call Achilles, she shall call in vain.
 When, flush'd with slaughter, Hector comes to spread
 The purpl'd shore with mountains of the dead,
 Then shalt thou mourn the affront thy madness gave,

Forced to deplore when impotent to save:
 Then rage in bitterness of soul to know
 This act has made the bravest Greek thy foe."
 He spoke; and furious hurl'd against the ground
 His sceptre starr'd with golden studs around:
 Then sternly silent sat.

ROMANTICS AND VICTORIANS

By the end of the eighteenth century, Pope's heroic couplets were no longer considered the appropriate vehicle for classical myths. Like the German romantic poets mentioned earlier, English poets used the myths to express the effect of classical literature and art on their own emotions. John Keats (1795–1821) was inspired by the Greeks, although he knew no Greek, and expressed his admiration and enthusiasm in the sonnet *On First Looking into Chapman's Homer* and the *Ode on a Grecian Urn*. He used the myth of Diana and Endymion as the basis of his long poem *Endymion*, in which other myths (Venus and Adonis, Glaucus and Scylla, Arethusa) were included. His slightly older contemporary and friend, Percy Bysshe Shelley (1792–1822), was very widely read in the classics and translated many Greek and Roman works. His drama *Prometheus Unbound* used the Aeschylean hero to express his views on tyranny and liberty. Prometheus is the unconquered champion of humanity, who is released from his agony while Jupiter is overthrown. "I was averse," said Shelley, "from a catastrophe so feeble as that of reconciling the Champion with the Oppressor of mankind." Thus, in the tradition of Aeschylus and Euripides, Shelley changed the myth for his own moral and political purposes. His poems are full of allusions to classical mythology. One of the greatest, *Adonais*, is his lament for the death of Keats, whom he portrays as the dead Adonis. Aphrodite (Urania) mourns for him, as do a succession of personifications, including Spring and Autumn (*Adonais* 16):

 Grief made the young Spring wild, and she threw down
 Her kindling [growing] buds, as if she Autumn were,
 Or they dead leaves; since her delight is flown,
 For whom should she have waked the sullen year?
 To Phoebus was not Hyacinth so dear
 Nor to himself Narcissus, as to both
 Thou, Adonais.

Shelley and the Romantics anticipate the uses of classical myths in nineteenth-century literature, art, and education.⁷ In England the classics remained the foundation of formal schooling, and the knowledge of classical mythology was widespread if not very deeply understood. Increasingly the learning of classical literature was linked to morality, a process that was furthered by the doctrines of Matthew Arnold (1822–1888), who in *Culture and Anarchy* (1869) saw

"Hebraism" and "Hellenism" as the inspiration of modern ideals. The latter, he said, aimed at seeing "things as they really are." Nevertheless, there were many creative uses of the classical myths. Arnold himself was a very good classicist and translator and a gifted critic and poet, who looked back to the classical world for the "moral grandeur" that he found to be missing in his own age.

Many other poets used the classical myths for their own purposes; in *Ulysses* (1833, published in 1842) Alfred, Lord Tennyson (1809–1883) used the hero setting forth once more "to strive, to seek, to find, and not to yield," as an example for the poet who must continue "going forward and braving the struggle of life." The epic *Life and Death of Jason* (1867) by William Morris was unusual in scale, since most authors, poets, and novelists (of whom George Eliot was perhaps the most imbued with knowledge of the classics) preferred to use themes from classical literature for shorter poems, allegory, or allusion. The influence of Homer was especially strong in the ideals of English education, where the *arete* of Achilles was thought to inspire physical courage and manly vigor. At the same time, the aristocratic milieu of Homeric action appealed to the sentiment of educated Victorians, who had little sympathy for the Homeric Thersites. Nevertheless, it was not so much the individualism of Achilles as the group discipline of Sparta that proved to be a more important influence, and lessons were learned more from classical history than from mythology.

Classical mythology also became the object of serious study by linguists and anthropologists, of whom Max Müller (1823–1900), professor of comparative philology at Oxford, was the earliest and in some ways the most influential and most misleading (see p. 7). Once scholars began to develop unitary theories of mythology, the creative use of classical mythology was threatened. Yet, as we have seen in the twentieth and now in our own century, the myths have refused to die, and they still inspire writers, artists, and musicians.

CLASSICAL MYTHOLOGY IN AMERICA

THE SEVENTEENTH THROUGH THE NINETEENTH CENTURIES

The hard life and grinding work ethic in colonial America left little opportunity for the study of classical mythology, even though Sandys' translation of Ovid was largely written in Virginia. Americans in colonial times read Homer (in Pope's translation), Vergil (more in Dryden's translation than in Latin), and Ovid (both in Latin and in Sandys' translation and in the literal prose translation of John Clarke, published in London in 1742) and included Vergil and Ovid in the school curriculum, not always with approval. Cotton Mather (1663–1728) believed that classical poetry was frivolous and dangerous for the soul: "Preserve the chastity of your soul from the dangers you may incur, by a conversation with the Muses, that are no better than harlots," he said in 1726. The great Boston teacher, Ezekiel Cheever, warned his pupils not to be charmed by Ovid's *Meta-*

morphoses and reminded them of the example of “young Austin” (St. Augustine), who wept for Dido when he should have shed tears for Christ.⁸

More powerful voices attacked the primacy of the classics in education on utilitarian grounds or because they were thought to be a sign of the subservience of America to the Old World. Ralph Waldo Emerson in 1837 spoke for the intellectual independence of America: “We have listened too long to the courtly muses of Europe.” Noah Webster in 1783, Francis Hopkinson in 1784, Benjamin Rush in 1789, Thomas Paine in 1795—all spoke eloquently for broadening the base of American education. Although the classical languages remained an essential part of college entrance requirements (and therefore of the school curriculum) until the twentieth century, the arguments of Webster and Rush were effective, and the moral arguments that supported the classics in Europe (especially in Britain) were less widely heard in America. Nevertheless, the study of mythology was still thought to have some value, and Thomas Bulfinch, whose *Age of Fable* was published in 1855, believed that it could promote virtue and happiness even if it was not useful knowledge.

Nathaniel Hawthorne quite purposefully pursued a moral goal in retelling the myths in his *Wonder Book* (1851) and *Tanglewood Tales* (1853). In the preface to the former, he said that the myths were “legitimate subjects for every age to clothe with its own garniture of manners and sentiment, and to imbue with its own morality.” Thus in the story of the Apples of the Hesperides (“The Three Golden Apples”) Hercules is imagined to feel regret that he had spent so long talking to the Graeae, and Hawthorne comments:

 But thus it always is with persons who are destined to perform great things. What they have already done seems less than nothing. What they have taken in hand to do seems worth toil, danger, and life itself.

It is difficult to combine this attitude with Ovid’s stories of the gods in love or with the shameful acts of many heroes. Hawthorne simply left out Theseus’ desertion of Ariadne and Jason’s of Medea. “The objectionable characteristics seem to be a parasitical growth, having no essential connection with the original fable” (from “The Wayside,” in *Tanglewood Tales*). Jupiter becomes consistently dignified: in the tale of Baucis and Philemon (“The Miraculous Pitcher”), Philemon is impressed by the disguised god:

 Here was the grandest figure that ever sat so humbly beside a cottage door. When the stranger conversed it was with gravity, and in such a way that Philemon felt irresistibly moved to tell him everything which he had most at heart. This is always the feeling that people have, when they meet with anyone wise enough to comprehend all their good and evil, and to despise not a tittle of it.

Indeed the bowdlerization of Ovid was both a feature of school texts in the nineteenth century and a reason for his decline. George Stuart (1882), in his widely used text, omitted all the love stories (even Daphne!), except for those

involving boys (Hyacinthus was included), and chose to emphasize manly courage and violence, along with the most desiccated grammar. This approach could, and did, lead only to the death of mythology as a living subject of study and pleasure.

THE TWENTIETH CENTURY

In the twentieth century, the traditional tales took on vigorous new life. In part this was the result of studies in comparative anthropology and psychology, which led to new versions of the old legends. We can only mention here a few examples from a vast number. Isamu Noguchi's sets for the ballet *Orpheus* (1948) are one example (see p. 359); John Cheever's story "The Swimmer," a retelling of the saga of Odysseus with a sardonic ending, is another. Several films described in Chapter 28 are clearly indebted to the theories of Jung and Freud. Among poets, Ezra Pound (1885–1972) used classical mythological allusions throughout his poems. Like Pound, T. S. Eliot (1888–1965) spent his creative years in Europe, having gained a classical education in America. His poetry and plays are full of allusions to classical mythology, and his play *The Family*

POETRY AND MYTHOLOGY

In modern times the classical myths have constantly inspired poets, whether as sources for Jungian archetypes, for political and moral allegory, or for discussion of social, religious, and psychological problems. At the gates of the twentieth century stands Rainer Maria Rilke (1875–1926), whose *New Poems* (1907) include the profoundly moving *Orpheus. Eurydike. Hermes*, in which the description of the upward path from the Underworld rivals Vergil's evocation of the downward path in *Aeneid* 6 (see p. 340: "they went, dim figures, in the shadows of the lonely night"). Eurydice already belongs to another world; she follows Orpheus uncertainly, "uncertainly, gently and without patience," words repeated as Orpheus sees her descending once more, "her steps hobbled by the long winding-sheets." In 1923 Rilke's *Sonnets to Orpheus* explored the nature of poetry and its fame: "only he who has lifted his lyre already among the shades may have unending praise. . . . Only in the Double-realm are the voices eternal and gentle" (1. 9).

Proto-feminist H. D. (Hilda Doolittle, 1886–1961) constantly returned to classical mythology for her images, nowhere more intensely than in *Eurydice* (1915), in which Eurydice is the speaker and the focus: "So you have swept me back,/I who could have walked with the live souls/above the earth. . . . So for your arrogance/and your ruthlessness/I have lost the earth . . . before I am lost,/hell must open up like a red rose/for the dead to pass."

From Rilke to Rita Dove, classical mythology lives in poetry, above all in the myth of Orpheus—singer, musician, and poet immortal.

Reunion (1939) is based on the saga of the House of Atreus. So also is the trilogy by Eugene O'Neill, *Mourning Becomes Electra* (1931), where the saga is set in nineteenth-century New England. O'Neill's *Desire under the Elms* (1924) sets the myth of Phaedra and Hippolytus in New England in 1850. Robinson Jeffers (1887–1962) adapted Euripides' *Medea* in 1947 and *Hippolytus*, entitled *The Cretan Woman*, in 1954.

More recently feminist theories and interpretations (discussed on pp. 17–18) have given new life to many classical myths, particularly those involving the tragic heroines (e.g., Clytemnestra, Antigone, Medea, Phaedra), who stand as universal examples of leaders, victims, destroyers, mothers, daughters, wives, or lovers. The feminist approach has led also to a deeper understanding of Ovid's *Metamorphoses*, in which young women so often are portrayed as victims.

OTHER MODERN USES OF CLASSICAL MYTHOLOGY

In Europe and elsewhere, classical myths were a rich source of inspiration in modern times. Among the most famous and complex works is *Ulysses* (1922), by James Joyce (1882–1941), in which the events of Bloomsday (June 16, 1904) are narrated in chapters that roughly correspond to episodes in the *Odyssey*. The hero, as is often the case in modern adaptations of classical saga, is antiheroic; but the transformation of the world of Odysseus into Dublin in 1904 is both faithful to Homer and original. The work owes much to psychological discoveries, especially those of Freud; yet in the Circe episode (set in a Dublin brothel with Bella as Circe), the substance of the allegory is also close both to Homer and to Spenser (discussed earlier).

Metamorphosis itself is the theme of *The Metamorphosis* (*Die Verwandlung*, 1915), by Franz Kafka (1883–1924), in which again Freudian psychology enriches the theme of human transformation into a "monstrous bug" (or "vermin"). While there is no direct derivation from Ovid's *Metamorphoses*, the theme itself is common to Ovid and Kafka. To give one example from many, Ovid's Io (Book 1) is alienated, like Kafka's Gregor Samsa, from her family by her metamorphosis, and we observe her tragedy, like his, through the medium of her human mind. In French literature, the Theban saga and the myth of Orpheus have both been especially popular. The dramas of Jean Anouilh (1910–1987) include *Eurydice* and *Antigone* (as well as *Médée*). In the first named, Orpheus is a café violinist, Eurydice an actress, and Death a commercial traveler. Jean Cocteau (1889–1963) wrote *Orphée* (1927), *Antigone* (1928), and *La machine infernale* (1934) on the Oedipus theme. André Gide (1869–1951) turned to the myths of Philoctetes (1897) and Narcissus (1899) to discuss moral questions; and his play *Oedipe* (1926) discusses the "the quarrel between individualism and submission to religious authority." Finally, *Amphitryon 38* (1929), by Jean Giraudoux (1882–1944), owes its serial number, according to the author, to the thirty-seven previous dramatizations of the myth that he had identified. Giraudoux also wrote a one-act play,

The Apollo of Bellac, in which the god appears as a nondescript inventor. Better known is his play *La Guerre de Troie n'aura pas lieu* (*The Trojan War Will Not Take Place*, 1935), translated by Christopher Fry with the title *Tiger at the Gates*. In this play, Hector and Ulysses agree that Helen will be returned to Menelaus and so the war will be avoided. But a drunken incident nevertheless precipitates the fated hostilities, and at the end Cassandra prophesies the inevitable action of Homer's *Iliad*—"and now the Grecian poet will have his word." The renowned Marguerite Yourcenar (1903–1987) has two plays inspired by Greek mythology: *Electre ou la chute des masques* (*Electra or the Fall of the Masks*, 1954), concentrating on Orestes' return before the murders, and *Qui n'a pas son minotaure?* (*To Each His Minotaur*, 1943), about the legend of Theseus.

In literature in Spanish, the Argentinian Jorge Luis Borges (1899–1986) was especially provocative in his use of classical mythology, whose importance to him is indicated by the title of his best-known collection of short stories, *Labyrinths* (1953; translated into English, 1962). "The Immortal" begins with the antique dealer Joseph Cartaphilus of Smyrna offering the Princess of Lucinge a six-volume set of Pope's *Iliad*. A little later he dies during a voyage to Smyrna on the ship *Zeus*, but he leaves in one of the volumes a manuscript relating his experiences in many ages as a kind of Odysseus. His account ends:

 "I have been Homer; shortly I shall be No One, like Ulysses; shortly I shall be all men; I shall be dead."

On quite a different scale, the enormous *Odyssey, A Modern Sequel* of the Greek author Nikos Kazantzakis (1938; translated into English, 1958) also takes Odysseus beyond the limitations of place. He travels through the world until his search for a perfect society is transformed into a search for himself, ending with his isolation in the Antarctic, where death comes gently to him, as Tiresias had foretold in the *Odyssey*.

It is not surprising that our survey ends with Homer, the first and greatest creator of the literature of classical mythology. The myths and sagas, like the great mythical figures of the gods and heroes, have proved indestructible because of their universal quality, expressed in the words of Borges and interpreted in countless works of poets, dramatists, and other writers for the greater part of three thousand years.

CLASSICAL MYTHOLOGY IN ART

CLASSICAL MYTHOLOGY IN THE ART OF LATE ANTIQUITY

Despite the decline of the influence of the gods in the life of the cities and individuals, they continued to be a source of allegory, especially in funerary art. With the spread of inhumation (from about A.D. 140), wealthy patrons commissioned reliefs on sarcophagi (i.e., marble or stone coffins), whose mytho-

logical subjects were allegories of the resurrection of the soul (the finding of Ariadne by Dionysus, illustrated on page 562, was especially popular in this connection), the triumph of virtue over evil (e.g., the Labors of Heracles or scenes of battles with the Amazons), or hope for everlasting life (symbolized especially by Dionysus and the vine). These subjects were equally appropriate for pagan and Christian patrons, and so classical mythology continued to provide material for artistic representations even after the triumph of Christianity.

Here are a few examples from the third and fourth centuries. In the cemetery beneath St. Peter's Basilica in the Vatican is a third-century wall mosaic showing Christ with the attributes of Apollo as sun-god (see Color Plate 3). He ascends in the chariot of the sun, whose rays, as well as the cross, emanate from his head, while in the background the vine of Dionysus is both a decorative and a symbolic feature. Also in the third century, Christ appears as Orpheus in a fresco in a Christian catacomb in Rome, and a century later Hercules is shown killing the Hydra in another Christian catacomb fresco. In the fourth century, a Christian woman, Projecta, had her splendid silver-gilt wedding casket decorated with figures of the Muses and of sea-gods and goddesses attended by mythological monsters. The Muses and sea divinities appear in mosaics from the provinces, including Britain and Germany, and the myth of Actaeon is the subject of a third-century mosaic from Cirencester (the Roman Corinium) in Britain.

Of all mythological figures Dionysus proved the most durable, in part because the vine was a powerful symbol in Christian allegory, in part because Dionysus and his myths were associated with mysteries that gave hope of salvation to individuals. The myth of Ariadne (mentioned earlier) often appears for this reason. In the Church of Santa Costanza at Rome, built in the fourth century to house the sarcophagi of members of the Christian emperor Constantine's family, the vault mosaics show Dionysus and the vintage in a Christian context. The vintage is again the subject of the reliefs on the sarcophagus of Constantine's daughter. In contexts that may be Christian or pagan, Dionysus and his maenads, along with Hercules and his lion, appear on the silver dishes from the fourth century that were found at Mildenhall in Britain. An opponent of Dionysus, the Thracian king Lycurgus, is the subject of a floor mosaic now in Vienna and of a famous glass cup (see Color Plate 4), both showing Lycurgus trapped in the god's vine.

Scenes from classical mythology continued to inspire painters of manuscript illuminations. For example, the "Vatican Vergil" manuscript of about A.D. 400 has forty-one miniatures, and there are ten in the so-called *Vergilius Romanus* manuscript, which dates from about 500. Mythological figures maintained their classical forms better in the Byzantine East than in the West. They appear in manuscripts, on ivory plaques and boxes, and in many other media, including silver work, pottery, and textiles.

MYTHOLOGICAL REPRESENTATIONS AND THE STARS

We have seen how the mythological figures survived in astronomy and astrology, and they were frequently depicted in astronomical and astrological manuscripts. The ninth-century manuscripts of Aratus (in Cicero's Latin translation) show Perseus still in recognizable classical form, with cap, sword, winged sandals, and Gorgon's head, and ancient classical forms still appear in a few manuscripts as late as the eleventh century.

Two other traditions, however, combined to change the classical gods beyond recognition, the one Western and the other Eastern. In the West, the artist would plot the position of a constellation and then link up the individual stars in the form of the mythological figure whose name the constellation bore. Since the artists were more interested in the pictorial qualities of the subject, the illustrations were usually astronomically inaccurate. In the East, however, the approach was scientifically more accurate, since the Arabs used Ptolemy's astronomical work, which (by a corruption of the word *megiste* in the Greek title) they called *Almagest*. The Arab artists therefore plotted the constellations accurately, while the mythological figures took on new forms. Hercules appeared as an Arab, with scimitar, turban, and Oriental trousers; Perseus carried, in place of the Gorgon's head, a bearded demon's head, which gave its name *Algol* (Arabic for "demon") to one of the stars in the constellation of Perseus. (See the sky-map illustrated on p. 697.)

Some of these changes went back to Babylonian religion. In the Arab manuscripts Mercury is a scribe and Jupiter a judge, just as in Babylonian mythology the god Nebo had been a scribe and Marduk a judge. Even in the West, in thirteenth-century Italian sculpture, Mercury appears as a scribe or teacher, Jupiter as a monk or bishop, and other classical gods take on similar guises.

MYTHOLOGICAL HANDBOOKS AND THEIR ICONOGRAPHY

We have already mentioned the importance of handbooks in the survival of classical mythology. In the later Middle Ages handbooks appeared giving detailed instructions for the appearance of the gods, for it was important in astrology and magic to have an accurate image of the divinity whose favor was needed. One Arab handbook appeared in a Latin translation in the West after the tenth century with the title *Picatrix*, and contained, besides magic rituals and prayers, fifty detailed descriptions of gods. Some, like Saturn with "a crow's head and the feet of a camel," were changed into Oriental monsters; but in some, for example, Jupiter, who "sits on a throne and he is made of gold and ivory," the classical form remains.

An important iconography in this period was the *Liber Ymaginum Deorum* of "Albricus" (perhaps Alexander Neckham, who died in 1217), which was certainly used by Petrarch in his description of the Olympian gods (*Africa* 3. 140-262), from which we give a short extract (140-146):

First is Jupiter, sitting in state upon his throne, holding scepter and thunderbolt. Before him his armor bearer [the eagle] lifts the Trojan boy [i.e., Ganymede] above the stars. Next with more stately gait, weighed down with gloomy age, is Saturn; with veiled head and a gray cloak, holding a rake and sickle, a farmer in aspect, he devours his sons.

A third type of handbook is represented by the *Emblemata* of Andrea Alciati (1531), in which woodcuts of gods, virtues and vices, proverbs and aphorisms, and many other subjects were depicted, each with a few lines of Latin elegiac couplets, usually containing a moral lesson. Friendship, for example, was represented by a vine with clusters of grapes entwined round the trunk of a leafless elm. Alciati concluded: “[The vine] warns us by its example to choose friends whom the final day with its laws may not part from us.” In 1571 a Latin commentary was added to the *Emblemata* by the French jurist Claude Mignault, which was extensive and important in its own right. The expanded work was frequently reprinted, including duodecimo editions small enough to be carried in the pocket or saddlebag of an artist or sightseer. Alciati’s *Emblemata* was one of the most important sources for the “correct” use of mythological figures as symbols or allegories, and his emblems can often be found in paintings of the later Renaissance and Baroque periods.

Two other handbooks were equally important. The *Iconologia* of Cesare Ripa was published in 1593 and reissued with woodcuts in 1603. Ripa’s commentary, which was in Italian, separated the mythological figures from their narrative contexts, so that they often became abstractions with a moral meaning. This approach was valuable for artists who wished to employ allegory, and the book was translated and reissued frequently until the end of the eighteenth century.

The other important iconography was the *Imagines* of Philostratus, a Greek work of the third century A.D. describing an art collection in Naples. It was translated into French by Blaise de Vigenère in 1578 and reissued in a splendidly illustrated version in 1614, with woodcuts, explanatory poems, and commentary containing a very wide range of classical myths.

CLASSICAL MYTHOLOGY IN RENAISSANCE ART

The classical gods had survived in late antiquity and the Middle Ages, but in many disguises. Renaissance artists gave them back their classical forms. In Florence, Botticelli (1444–1510) combined medieval allegory with classical mythology in his allegorical masterpieces, *The Birth of Venus*, *Primavera*, *Venus and Mars*, and *Pallas and the Centaur*. In Venice, Giovanni Bellini (1430–1516), Giorgione (1478–1510), and his pupil Titian (1487–1576) also drew on a variety of traditions while representing the myths more or less in agreement with the handbooks. Great artists, of course, like the four named here were hardly limited by these criteria, as can be seen in Bellini’s *Feast of the Gods* (see Color Plate 6).

Sky Map of the Northern Hemisphere, by Albrecht Dürer (1471–1528). Woodcut, 1515; $16\frac{3}{4} \times 16\frac{3}{4}$ in. The Latin title means “Figures of the northern sky with the twelve signs of the Zodiac.” Dürer’s sky-maps are patterned on Arab celestial maps, but this is one of the earliest Renaissance works in which the classical figures resume their classical forms. Hercules (seen just below and to the right of center) has his club and lionskin; Perseus (just above and to the left of center) holds the Gorgon’s head (*caput Meduse*) instead of the Arabic monster, Algol. Individual stars are indicated by numbers corresponding to Books 8 and 9 of Ptolemy’s *Almagest*. The signs of the Zodiac encircle the map, and in the corners are three ancient writers on astronomy and one medieval scholar: Aratus of Cilicia (third century B.C.); Ptolemy of Egypt (second century A.D.); Al Sufi, written here as Azophi (Abdul Rahman, Arab astronomer of the tenth century A.D.); and Manilius of Rome (early first century A.D.). Dürer made the original version of this map in 1503, showing the heavens as they were in 1499–1500. (*The Metropolitan Museum of Art, New York, Harris Brisbane Dick Fund, 1951.*)

Besides the painters already mentioned, Michelangelo at Florence and Rome, Correggio at Ferrara, and both Paolo Veronese and Tintoretto at Venice were sixteenth-century masters who found inspiration in classical mythology. One of the most extensive mythological programs is the great series of paintings by the Carracci brothers in the Gallery of the Farnese Palace at Rome (1597–1604) depicting the triumph of Love by means of one classical legend after another.

Two other Renaissance works show how the classical gods recovered their antique forms. One is the map of the sky published in 1515 by the German Albrecht Dürer in which the classical forms of the Western astronomical tradition combine with the scientific accuracy of the Arabs. Dürer gave the mythological figures their ancient forms; Hercules is a Greek once more and recovers his club and lionskin.

The second work is the decoration of the Vatican Stanza della Segnatura by Raphael, after 1508. Here the classical, allegorical, and Christian traditions combined to exalt the glory of the Church and its doctrine. In the place of honor (though not supreme) was Apollo, surrounded by the Muses, the poets of antiquity, and Renaissance humanists. Classical mythology and Renaissance humanism had achieved the perfect synthesis.

ILLUSTRATED EDITIONS OF OVID

In the sixteenth and seventeenth centuries Ovid's works were repeatedly issued in illustrated editions, which were frequently used as sources by artists. The series began with a prose translation of the *Metamorphoses* known as the *Grande Olympe*, published at Paris in 1539. The most important of the early editions was that of Bernard Salomon, *La Métamorphose d'Ovide Figurée*, published at Lyons in 1557 and reissued at Lyons in 1559 (in Italian) and at Antwerp in 1591. A German translation of the *Metamorphoses* was issued by Virgilio Solis at Frankfurt in 1563, and another at Leipzig in 1582, while an Italian translation by Andrea d'Anguillara was published at Venice in 1584.

The most influential editions were those of Antonio Tempesta and George Sandys. Tempesta published *Metamorphoseon sive Transformationum Ovidianarum Libri Quindecim* at Amsterdam in 1606. His book consists of engravings of 150 scenes from the *Metamorphoses* without text, and it became an important source-book of classical stories for painters. The importance of Sandys lay rather in his connection of pictures with the text and commentary, which we have mentioned earlier. In his preface to the 1632 edition he says:

 And for thy farther delight I have contracted the substance of every Booke into as many Figures . . . since there is betweene Poetry and Picture so great a congruities; the one . . . a speaking Picture, and the other a silent Poesie: Both Daughters of the Imagination.

Sandys was helped by the outstanding quality of his artist, Francis Clein, and his engraver, Salomon Savery. They engraved a full-page illustration

for each book of the poem, in which the stories of the book were represented, choosing more often the moment of greatest drama rather than the moment of metamorphosis. In addition Clein designed a splendid title page and a portrait of Ovid, each decorated with allegorical figures from classical mythology.

The principle of the interaction of words and pictures has remained a regular feature of the influence of Ovid since the publication of Sandys' 1632 edition. Ovid is the most visual of poets, and his landscapes and narrative invite pictorial representation, as can be seen in a large number of school editions of the *Metamorphoses*.

EUROPEAN ART OF THE SEVENTEENTH THROUGH THE NINETEENTH CENTURIES

RUBENS

Peter Paul Rubens (1577–1640) found in classical mythology a constant source of inspiration throughout his career. During his years in Italy, between 1600 and 1608, he studied and copied classical works of art and became thoroughly familiar with the representations of classical mythology. He already had a good knowledge of Latin literature, and through his brother, Philip (an excellent classicist), he had access to the brilliant circle of humanists that centered on his fellow countryman, Justus Lipsius. Rubens painted great numbers of scenes in which he showed with energy and brilliance his understanding of classical mythology.

In his last years, Rubens was commissioned to decorate the hunting lodge of King Philip IV near Madrid with a series of paintings illustrating the legends in Ovid's *Metamorphoses*. Rubens, who began the commission in his sixtieth year, completed no less than 112 oil sketches, of which about forty-five survive (see pages 275, 538, and 654). Only a handful of the final full-size paintings survive, still to be seen together in Madrid. This series is perhaps the most ambitious of all the illustrated Ovids, and the oil sketches are among the most beautiful of all the Baroque representations of classical myths. Rubens also turned to Homer and Statius for inspiration for his designs for the tapestries portraying the life of Achilles. Most of these oil sketches can still be seen together in Rotterdam.

POUSSIN

Nicolas Poussin (1594–1665), although French by birth, spent nearly all his productive life in Rome, and, like Rubens, he never ceased to draw inspiration from the classical legends and to meditate on their deeper meaning beyond the narrative. Among painters he is the most intellectual interpreter of

the classical myths, and those who wish to understand best what “classicism” means in the centuries following the Renaissance should study the long series of drawings and paintings done by Poussin on mythological themes (see Color Plates 11 and 13).

OTHER PAINTERS

From the time of Poussin to our own day, artists have returned again and again to the classical myths, and the ancient gods and heroes have survived in art as in literature. We cannot here satisfactorily survey even a corner of this vast field of study, but we can refer to some important stages in the use of classical myths by artists.

Painters in France and Italy in the seventeenth and eighteenth centuries used classical myths for narrative paintings on a heroic scale, for these were considered to belong to history painting, the most highly esteemed genre. The leading painter at the court of Louis XV, François Boucher (1703–1770), produced a long series of classical scenes, often pastoral and usually erotic (see Color Plate 15). In the last third of the eighteenth century, this somewhat sentimental approach to classical mythology gave way to a sterner view of the classical past, which placed a high value on the moral lessons to be drawn from history. In the nineteenth century, therefore, when painters in England and France returned to subjects taken from classical mythology, their approach tended to be moralistic, paralleling (as far as art can parallel literature) the approach typified by Hawthorne and Kingsley, discussed earlier.

TWO ROMANTIC IDEALISTS

Gustav Moreau (1826–1899) and Edward Burne-Jones (1833–1898) were profoundly inspired by classical mythology, and their art goes far beyond the morality and symbolism of many of their contemporaries. Moreau’s great paintings *Prometheus*, *Oedipus*, and *Heracles* (all reproduced in this volume) probe the meaning of the classical texts and express a heroic humanism appropriate for the challenges of his time. In England, Burne-Jones, who shared with William Morris the ideals of the pre-Raphaelite movement, returned again and again to the classical myths to support his search for purity and beauty in the past. In *The Tower of Brass* (1888), he focuses on Danaë’s feelings as the tower is built, not on the lust of Zeus and the anger of Acrisius. In the *Pygmalion Series* (1878) and the *Perseus Series* (1887), Burne-Jones turns from the anger of the gods and the violence of the hero to the ideals of piety, chivalry, and chaste love. Yet these very ideals involve the psychological and sexual tensions that Freud (1856–1939) at the same time was beginning to explore.

CLASSICAL MYTHOLOGY IN AMERICAN ART

During the first century of the American Republic, mythological subjects were often copied by schoolgirls from engravings (the illustrations for Pope's translation of the *Iliad* were a favorite source) or were imaginatively treated by women in their spare time at home (see pages 60, 465, and 486). Artists who studied in Europe copied paintings of classical subjects and exhibited them when they returned. The earliest such exhibition, given in Boston in 1730 by John Smibert (1688–1751), aroused great public interest. Ten years earlier, a Swedish immigrant, Gustavus Hesselius (1682–1755), painted the earliest known American mythological works, *Bacchus and Ariadne* (now in Detroit) and *Bacchanal* (now in Philadelphia).

While the leading American painters (such as Copley, West, Allston, and Vanderlyn) sometimes painted mythological subjects, American taste soon turned to historical themes and to the dramatic potential of the American landscape. One of the best American mythological paintings is John Vanderlyn's *Ariadne*, painted in 1811 and now in Philadelphia (see Color Plate 16). It depicts the scene described in Ovid's *Heroides* 10. 7–10, as Ariadne wakes to find herself deserted. When it was first exhibited it aroused interest and controversy. But by Vanderlyn's time it was already clear that American painters would find material in sources other than classical mythology.

In sculpture, however, the classical influence continued to be strong. Horatio Greenough (1805–1852) used Pheidias' statue of Zeus at Olympia as the basis for his seated statue (1832–1839) of George Washington, now in the National Museum of American History but planned originally for the Rotunda of the Capitol. On the sides of Washington's throne are mythological reliefs, on one side Apollo as the sun-god rising into the sky with his chariot and on the other the infants Heracles and Iphicles with the serpents sent by Hera. Greenough wanted Heracles to be an allegory of North America, which "struggles successfully with the obstacles and dangers of an incipient political existence."

A group of expatriate American artists living in Rome is described in Hawthorne's *The Marble Faun* (1859). Among these was Harriet Hosmer (1820–1908), whose busts of *Medusa* (illustrated on p. 511), and *Daphne* (both completed in 1854) were meant to express her views on celibacy and beauty. Her *Oenone* was based on Tennyson's poem *Oenone* rather than directly on Ovid's *Heroides*.

CLASSICAL MYTHOLOGY SINCE 1900

Classical mythology has continued to be a vigorous source of inspiration for artists since 1900. In France and Spain especially, Georges Braque (1882–1963) and Pablo Picasso (1881–1973) returned frequently to classical themes. Perhaps

the most famous example of such inspiration is Picasso's long series of works involving the legend of the Minotaur, which he used (especially in the period of the Spanish Civil War) to comment on the horror and violence of much of modern life as he observed it (see the illustration on p. 560).

In recent decades, artists have interpreted the classical myths allegorically, as we have seen with Noguchi's use of the myth of Orpheus. Many artists have been influenced by psychological theories, especially those of Freud, and the series of works by Reuben Nakian on *Leda and the Swan* is an outstanding example. Many artists have returned to literal representations of the myths, including David Ligare, whose *Landscape for Philemon and Baucis* we reproduce as Color Plate 21, and Milet Andrejevič, whose *Apollo and Daphne* is set in a city park. A group of Italian neoclassicists has revived the mythological tradition in Italy, of whom Carlo Maria Mariani is the best known. All in all, it can be said that the classical tradition in mythology will continue to inspire all who care for the creative use of the imagination.

CLASSICAL MYTHOLOGY IN MUSIC, DANCE, AND FILM

MYTHOLOGY IN MUSIC

EUROPEAN BEGINNINGS AND DEVELOPMENTS

The topic of classical mythology in music is vast, rich, and important; we can only attempt to suggest the significance and vitality of Greek and Roman inspiration in this fascinating and rewarding area. Opera provides the most obvious focal point for such a cursory discussion, yet, as will be seen, works in every genre have been inspired by ancient Greece and Rome. Our major concern is the treatment of mythological themes but, on occasion, we include a few important works dealing with legendary subjects in Greek and Roman history. Fortunately, the ever-expanding repertoires of the recording companies are making even the more esoteric works accessible. A veritable gold mine of musical compositions on classical themes of every sort and period is now available, with great promise of many more to come; and contemporary, live performances continue to be ever more adventuresome. To derive the most value from this entire chapter, recent, complete catalogues of compact discs, cassette tapes, videos, and DVDs will be a great asset. Be aware that recordings come and go at a disturbing rate.

Galilei and the Camerata. Music and myth were closely related in the culture of ancient Greece and Rome. Drama, for example, was rooted in music and the dance, and its origins were religious.¹ Music was also linked with drama in the Middle Ages, in the liturgical mystery and miracle plays, and again the impetus was religious. During the Renaissance, with its veneration of antiquity, tragedy and comedy were often inspired by Greek and Roman originals, and quite elaborate musical choruses and interludes were sometimes added. The years ushering in the Baroque period (ca. 1600–1750), however, provide the real beginning for our survey.

In 1581, Vincenzo Galilei (father of the renowned astronomer), spokesman for a literary and artistic society of Florence called the Camerata, published *Dialogo della Musica Antica e della Moderna*. The revolutionary goals of the

Camerata were inspired by a reaction against the prevailing polyphonic style of music—intricate and multitextured in its counterpoint, with words sung by several voices to create a tapestry of sound. Texts set to music in this way could not be understood; Galilei suggested a return to the simplicity of ancient Greek music and drama. Now Galilei and company knew very little about the actual musical setting of a Greek play by Aeschylus, Sophocles, or Euripides (for that matter, we do not know much more), but they believed that ancient drama was sung in its entirety, not realizing fully the distinction between the episodes and the choral interludes. We can agree, however, that Greek musical settings must have been simple in terms of instrumentation and melodic harmony. Choral music was generally accompanied by the *aulos*, or *auloi* (double-pipe)—often translated as “flute” but actually more akin to a modern oboe.

The Camerata argued that words should be clearly heard and understood and the melodic line should reflect and underscore the meaning and emotion of the text. Their new style was appropriately labeled monodic (as opposed to polyphonic); it represents in large part the declamatory element that survived in opera as *recitativo*, or recitative—spoken dialogue lightly accompanied by music (of various kinds depending on period and composer), to be distinguished from set melodic pieces—arias, duets, trios, and so on.

In 1594 or 1597, members of the Camerata produced what may be called the first opera; its title was *Dafne* and its theme reflected the spell cast by the ancient world. Ottavio Rinuccini wrote the text (which is still extant); Jacopo Peri composed the music, with the help of Jacopo Corsi (some of whose music is all that survives); and Giulio Caccini may have contributed as well. A second opera followed, *Euridice*, which has survived and on occasion receives scholarly revivals. Peri again wrote most of the score, but apparently Caccini added some music and then composed another *Euridice* of his own.

Monteverdi, Cavalli, Cesti, and Bach. The first genius in the history of this new form was Claudio Monteverdi (1567–1643); his first opera, *Orfeo* (1607), lifts the musical and dramatic potential initiated by his predecessors to the level of great art appreciated in performance to this day. The subjects of some of his subsequent works reveal the power and impetus provided by Greece and Rome: *Arianna* (her “Lament,” which is all that survives, is still popular today), *Tirise e Clori*, *Il Matrimonio d’Alceste con Admeto*, *Adone*, *Le Nozze d’Enea con Lavinia*, *Il Ritorno d’Ulisse in Patria*, and finally *L’Incoronazione di Poppea*, which is based upon Roman history.

Monteverdi’s pupil, Pier Francesco Cavalli (1602–1676), wrote more than forty operas. Among his best known are *Giasone* (Jason) and *Ercole Amante* (*Hercules in Love*).

Cavalli’s contemporary, Marc Antonio Cesti (1623–1669), is said to have composed more than one hundred operas; of the eleven surviving, *Il Pomo d’Oro* (*The Golden Apple*), which deals with the contest for the Apple of Discord, was the

most famous—a superspectacle in five acts and sixty-six scenes, including several ballets in each act and requiring twenty-four separate stage sets. And thus opera developed in Italy. The list of composers is long and the bibliography of their many works inspired by classical antiquity impressive; particularly startling is the number of repetitions of favorite subjects.

Many of the operatic composers of the early period wrote cantatas as well. As examples of this musical form, we shall mention three works by Johann Sebastian Bach (1685–1750) in the catalogue of his secular cantatas. Some of these he himself entitled *dramma per musica*, and modern critics have gone so far as to label them “operettas.” In Cantata 201 (*Der Streit zwischen Phoebus und Pan*), Bach presents the contest between Phoebus and Pan as a musical satire aimed at a hostile critic of his works, Johann Adolph Scheibe. The text is derived from Ovid’s version. Mt. Tmolus and Momus, god of mirth, award the victory to Pan, while Midas is punished with a pair of ass’ ears. The “Hunting Cantata” 208 has the myth of Diana and Endymion as its theme. Finally, Cantata 213 (*Hercules auf dem Scheidewege*) depicts Hercules at the crossroads; he rejects the blandishments of Pleasure in favor of the hardship, virtue, and renown promised to him by Virtue (see p. 540). The more familiar *Christmas Oratorio* uses the musical themes of this cantata.

Blow, Purcell, Lully, and Handel. In England during the Baroque period, plays with incidental music and ballet became very much the fashion; these led eventually to the evolution of opera in a more traditional sense. John Blow (1649–1708) wrote a musical-dramatic composition, *Venus and Adonis*. Although the work bears the subtitle “A masque for the entertainment of the king,” it is in reality a pastoral opera constructed along the most simple lines.

It was Blow’s pupil, Henry Purcell (1659–1695), who created a masterpiece that has become one of the landmarks in the history of opera, *Dido and Aeneas*. The work was composed for Josias Priest’s Boarding School for Girls, in Chelsea; the libretto by Nahum Tate comes from Book 4 of Vergil’s *Aeneid*.² The artful economy and tasteful blending of the various elements in Purcell’s score have often been admired. Dido’s lament (“When I am laid in Earth”) as she breathes her last is a noble and touching aria.

In France, Jean-Baptiste Lully (1632–1687), a giant in the development of opera, produced *Cadmus et Hermione* in collaboration with the poet Philippe Quinault; this was the first of a series of fifteen such tragic operas (twelve of them to texts by Quinault). Some of the other titles confirm the extent of the debt to Greece and Rome: *Alceste*, *Thésée*, *Atys*, *Proserpine*, *Persée*, *Phaéton*, *Acis et Galatée*.

Jean-Philippe Rameau (1683–1764) was the most significant heir to the mantle of Lully. He too created many operas and opera-ballets on Greek and Roman themes, for example, *Hippolyte et Aricie*, *Castor et Pollux*, *Dardanus*, and *Les Fêtes d’Hébé*.

George Frideric Handel (1685–1759) was one of the greatest composers of the first half of the eighteenth century. He was a prolific musician, and although the general public knows him primarily for his oratorios, he was very much concerned with the composition of operas. In fact many of his oratorios on secular themes are operatic in nature and, although intended for the concert hall, are much closer to the theater than to the church; some deal with mythology, for example, *Semele* and *Hercules*. Handel wrote forty operas and fortunately revivals and recordings have become more frequent in recent years to reveal their abundant riches. Many of Handel's operas are based on history, for example, *Attone*, *Agrippina*, *Giulio Cesare*, and *Seise*; some are more strictly mythological—*Acis and Galatea* (a pastorella), *Admeto*, and *Deidamia*.

Gluck, Piccinni, Sacchini, and Haydn. Christoph Willibald Gluck (1714–1787) is the composer of the earliest opera to maintain any kind of position in the standard repertoire, *Orfeo ed Euridice* (first version, 1762). This beautiful work, restrained in its passion and exquisite in its melody, remains one of the most artistically rewarding settings of the myth. The libretto, by Raniero Calzabigi, proved a great help to Gluck, whose avowed purpose was to compose music that would best serve the poetry and the plot. Musical extravaganzas with artificial and even absurd plots and the immoderate intrusion of ballet and spectacle had become too fashionable. As a result Gluck and Calzabigi desperately felt a need for reform. It was appropriate that Gluck should resort to the same theme as that of his idealistic predecessors. Orpheus' arias expressing his anguish at the loss of his wife, "*Che puro ciel!*" and "*Che farò senz' Euridice,*" well illustrate the highest embodiment of these ideals. In the first version of Gluck's opera, the role of Orfeo was written for a castrato—a male who had been castrated and therefore sang soprano and who undertook both male and female roles. When Gluck wrote a second version of the opera for production in Paris in 1774, he reworked the role for a tenor. It is now usually sung by a mezzo-soprano or contralto; but performances and recordings may be found sung by both male and female voices.

Gluck again worked with Calzabigi for *Alceste* (first version, 1767). Derived from Euripides' play, it is another impressive achievement more monumental in character than *Orfeo*, but nevertheless equally touching in its nobility and sentiment. Their third collaboration, *Paride ed Elena*, although originally a failure, sounds most enjoyable today. Subsequent operas by Gluck are *Écho et Narcisse*, *Iphigénie en Aulide*, and *Iphigénie en Tauride*; the latter two are particularly melodic and compelling. Richard Wagner admired and reworked the score of *Iphigénie en Aulide* to create the version that is usually performed. Early in his career, before he had established his identity as an operatic reformer (1747), Gluck composed a serenata, *Die Hochzeit von Herkules und Hebe*, to a libretto that had previously been set to music and reused music from some of his previous operas. The theme of the marriage of Heracles and Hebe was appropriate for a work performed at the marriage celebration of the Electoral Prince of Saxony.

Niccolò (or Nicola) Piccinni (1728–1800), a rival of Gluck (they were both commissioned by the French Opéra to write an *Orfeo*), composed more than one hundred operas, many of them on classical subjects.

There are many other important composers of the eighteenth century who were classically inspired. Antonio Sacchini (1730–1786) wrote a *Dardanus* and a popular masterwork, *Oedipe à Colone*.

Luigi Cherubini (1760–1842) deserves special mention for his excellent *Médée*, an opera on occasion revived for a prima donna of the caliber of Magda Olivero or Maria Callas who can meet the technical and histrionic demands of the title role.

The renowned Franz Joseph Haydn (1732–1809) composed an *Orpheus and Euridice* (*L'Anima del Filosofo ossia Orfeo ed Euridice*), which is considered by many to be the finest of his many operas. The orchestral introduction of his Oratorio, *The Creation*, is a Representation of Chaos.

Mozart, Beethoven, Brahms, and Wagner. Wolfgang Amadeus Mozart (1756–1791) had an inspired interest in mythological and legendary themes. When only eleven years old, he wrote a short opera, *Apollo et Hyacinthus* (1767). The Latin text by Father Rufinus Widl transforms this famous tale of homosexual passion into a romantic, heterosexual triangle: Zephyrus (West Wind) falls in love with Hyacinthus' sister, who also happens to be the beloved of Apollo. Other youthful works by Mozart deal with Roman history as legend: *Mitridate*, *Rè di Ponto* (1770), based upon Racine's play about King Mithridates, a "theater serenade," *Ascanio in Alba* (1771), and *Il Sogno di Scipione* (1772). The latter, a serenata, has a text by Metastasio, derived from Cicero's *Somnium Scipionis* (*Dream of Scipio*), wherein Scipio Aemilianus experiences a vision of an Elysium that is Platonic to be sure but also, in its chauvinism and substance, very much like the Elysium of Vergil. In 1775, Mozart completed *Il Re Pastore*, a charming addition to the mythology of Alexander the Great; Alexander has liberated Sidon from its tyrant and appoints a Shepherd King in his place. Mozart's *Idomeneo*, *Rè di Creta* (1781) is a fascinating opera, well worth investigation. Mozart's much-loved and admired opera *The Magic Flute* (1791) is significant for the mythographer because of its Masonic symbolism and motifs. The matriarchal Queen of the Night, the ritual worship of Isis and Osiris, and the ordeals that the hero Tamino must endure for the revelation of the Mysteries all represent universal, thematic patterns. Mozart's last opera, *La Clemenza di Tito* (1791), is based on Roman history.

Ludwig van Beethoven (1770–1827) found some direct influence from Greece and Rome. His *Coriolanus* Overture, inspired by the legendary Roman hero, might be mentioned; more to the point is his ballet music *The Creatures of Prometheus*. The thematic material of this work seems in a special way to epitomize the indomitable spirit of the composer. He arranged it as a set of variations for piano; and it appears again in the final movement of his great Third Symphony (the *Eroica*). The whole aura of defiance conjured up by the romantic im-

age of the life and music of Beethoven is strikingly parallel to that evoked by the Titan Prometheus. At any rate, Beethoven's career provides the chronological and spiritual link between eighteenth-century classicism and nineteenth-century romanticism.³

Johannes Brahms (1833–1897) gives us a *Song of the Fates* (*Gesang der Parzen*), for chorus and orchestra and a *Song of Lamentation* (*Nänie*), which bewails the death of beauty, with references to Hades, Orpheus, Aphrodite and Adonis, Achilles, and Thetis.

Richard Wagner (1813–1883) in the Overture to his opera *Tannhäuser* and the Venusberg scene that follows (with its depiction of a voluptuous Venus and her carnal abode) delineates, unforgettably, the archetypal conflict between sacred and profane love.

Schubert, Wolf, Liszt, and Franck. The German *Lied* of the nineteenth century embodies much of the passion and longing that are the exquisite torture and delight of the romantic soul. The musical mood runs parallel to that of the *Sturm und Drang* movement in literature as typified by the works of Goethe.

Several of the songs of Franz Schubert (1797–1828), for example, are set to poems on ancient themes, not only by Goethe but also by Schiller and other poets: "Amphiaraos," "Der Atlas," "Atys," "Dithyrambe," "Elysium," "Fahrt zum Hades," "Fragment aus dem Aeschylus" (a chorus from the *Eumenides*), "Ganymed," "Die Götter Greichenlands," "Freiwilliges Versinken" (with reference to Helios), "Gruppe aus dem Tartarus," "Heliopolis 1," "Hippolit's Lied," "Klage der Ceres," "Lied eines Schiffers an die Dioskuren," "Memnon," "Der Musensohn," "Orest auf Tauris," "Der entsühnte Orest," "Orpheus," "Philoctet," "Prometheus," "Uranien's Flucht," and "Der zürnenden Diana." Also by Schubert are two lovely duets, "Hektors Abschied" and "Antigone und Oedip."

Two songs (texts by Goethe) by a later romantic composer, Hugo Wolf (1860–1903), "Prometheus" and "Ganymed," are staples of the lieder repertoire.⁴ Wolf's one symphonic work, a tone poem entitled *Penthesilea*, is an interesting piece of program music that is not as well known.

Other fine examples of the genre of the symphonic poem are offered by Franz Liszt (1811–1886), a sublime *Orpheus* and stirring *Prometheus*, and by César Franck (1822–1890), a beautiful *Psyché*.

Other Major Composers of the Nineteenth Century and into the Twentieth Century. The operatic achievements of the nineteenth century are among its most conspicuous glories, but by then Greek and Roman themes were no longer dominant and as much in vogue. Yet *Der Ring des Nibelungen* by Richard Wagner (1813–1883) offers exciting parallels for the study of classical mythology, particularly since he was so profoundly influenced by the *Oresteia* of Aeschylus.⁵ Operas like Bellini's *Norma* (the tragic story of a Druid priestess) are, it is true, built upon Roman legendary themes, but such an exception only brings home to us more forcefully the changes being wrought in subject matter and style. It is nev-

ertheless rash to generalize. Out of the countless number of works on ancient themes, we list only a few by some major composers as representative.

Charles Gounod (1818–1893), most famous for his *Faust* and *Romeo and Juliet*, wrote a significant opera *Philémon et Baucis*.

Hector Berlioz (1803–1869) created a monumental work with *Les Troyens*, one of the most important masterpieces ever created on an ancient mythological subject. The work, which draws heavily upon Vergil, consists of two parts: *La Prise de Troie* (based upon Book 2 of the *Aeneid*) and *Troyens à Carthage* (the Dido and Aeneas episode from Book 4). Berlioz also wrote an affecting cantata, *La Mort d'Orphée*, for voice and orchestra.

Arrigo Boito (1842–1918) wrote both the music and the libretto of his opera *Mefistofele*, after Goethe's *Faust*, in which Helen of Troy plays such a pivotal and symbolic role.

Jules Massenet (1842–1912), especially beloved for his *Manon* and *Werther*, composed the opera *Bacchus and Ariane*.

Gabriel Fauré (1845–1924), admired for his songs and chamber music, also wrote two mythological operas, *Prométhée* and *Pénélope*.

Toward the end of the nineteenth century, the Russian composer Sergei Ivanovich Taneiev (1856–1915), a pupil of Tchaikovsky, completed his impressive *Oresteia*, based on Aeschylus.

Zdeněk Fibich (1850–1899), a Czech romantic composer, created a monumental melodrama for the stage, the trilogy *Hippodamia* in three parts, *The Courtship of Pelops*, *The Atonement of Tantalus*, and *Hippodamia's Death*.

Verismo opera, which became the rage at the turn of the century because of the genius of composers like Giacomo Puccini, turned away from classical themes in favor of the realistic and shocking or the Oriental and exotic; yet the realistic Ruggiero Leoncavallo (1858–1919), famous for his *Pagliacci*, also wrote an *Edipo Rè* (posthumously produced). This was in keeping with the trend in the twentieth century of returning to classical subjects.

Thus, Gian Francesco Malipiero (1882–1973) used the Orpheus theme for a trilogy, *L'Orfeide*, and his *Ecuba* (1941) is modeled on Euripides.

Max Bruch (1836–1920) has given us *Odysseus*, a vocal and choral masterpiece popular in Bruch's lifetime, which treats episodes from Homer.

Among the operas of Darius Milhaud (1892–1974) are *L'Orestie d'Eschyle*, a trilogy comprising *Agamemnon*, *Les Choéphores*, and *Les Euménides*, composed to a translation by Paul Claudel; *Les Malheurs d'Orphée*; *Médée*; and three short operas (each only about ten minutes long): *L'Enlèvement d'Europe*, *L'Abandon d'Ariane*, and *La Délivrance de Thésée*. He also wrote an orchestral work, *La Muse Ménagère*, which also became a piano suite. He composed incidental music for Paul Claudel's satirical drama *Protée*, which told of the sad and hopeless love of the aged prophet Proteus for a young girl. The work was rescored as an orchestral symphonic suite, *Protée*.

The Swiss composer Arthur Honegger (1892–1955) wrote an impressive opera, *Antigone*, set to a libretto by Jean Cocteau based upon Sophocles.

A supreme operatic masterpiece is the *Oedipe* of the Romanian composer Georges Enesco (1881–1955); the brilliant score is set to a libretto by Edmond Fleg, which embraces the whole legend of Oedipus.

Equally magnificent in its own way is *King Roger* by Karol Szymanowski (1882–1937), a profound reinterpretation of the *Bacchae*; the Pentheus figure is transformed into the historical twelfth-century King Roger of Sicily, who faces the emotional challenge of the mysterious Shepherd and his religious message.

Hans Werner Henze (b. 1926) wrote an opera based on Euripides, *The Bassarids*, another name for the *Bacchae*.

Yannis Xenakis (b. 1922), born in Greece, is representative of modern attitudes, innovations, and techniques. A mathematician and architect as well as a musician, Xenakis is a champion of mathematical and automatic music; in theory and in practice he attempts to unite (in the ancient tradition of Pythagoras) numbers and harmonies, with the help of modern electronic equipment. Among Xenakis' compositions are an *Oresteia* and a *Medea*, which employ orchestra and chorus.

Another Greek composer, Mikis Theodorakis (b. 1925), has won worldwide renown for both his outspoken politics and his many and varied musical scores, including a *Lyrical Trilogy*, comprising operatic settings of Euripides' *Medea* and Sophocles' *Electra* and *Antigone*.

The twelve-tone (or "atonal") school of musical composition founded by Arnold Schönberg has produced some works on classical themes; for example, Egon Wellesz (1885–1974) wrote *Alkestis* (1924, libretto by Hofmannsthal) and *Die Bakchantinnen*, both from Euripides.

We end this section with *Jocaste* by Charles Chaynes (b. 1935). Fiercely feminist, this opera is intended to set free the traditional Jocasta and to speak to all women who have been victimized by the selfishness of men. From Sophocles and Euripides, Jocasta, who survives after Oedipus has blinded himself, becomes the focal point of the tragedy.

Orff and Strauss. Carl Orff (1895–1982) has won considerable and deserved renown with his operatic treatment of mythological subjects. In 1925 he adapted Monteverdi's *Orfeo*; he wrote an *Antigona* and subsequently *Oedipus der Tyrann*, both of which follow Sophocles closely. His *Prometheus* is a dramatic tour de force, which is of special interest to classicists since it is actually set to the classical Greek text of Aeschylus.

The operas of Richard Strauss (1864–1949) are among the greatest of the twentieth century. His reworkings of Greek myth in terms of modern psychology and philosophy are among the most rewarding artistic products of this or any other age. Strauss was fortunate in having as his librettist for most of these the brilliant dramatist Hugo von Hofmannsthal (1874–1929). Their collaboration for *Elektra* (1909), a work based upon Sophocles but startling in the originality of its conception, is a brilliant opera.⁶ Both Hofmannsthal and Strauss were fas-

cinated by the new revelations made by Sigmund Freud, particularly in his writings about hysteria. Hofmannsthal, seeing in *Electra* a classic study of neurosis, brilliantly adapted Sophocles' play to highlight its psychological insights for modern times. Sophocles' superb recognition scene between *Electra* and *Orestes* becomes even more overpowering when enhanced by Strauss' music, which evokes the passion of a love duet. In this scene in Sophocles, *Orestes* expresses his concern that *Electra's* intense emotions might overwhelm her. In the opera, after the murder of *Clytemnestra* and *Aegisthus* and amidst the triumph of *Orestes*, *Electra* actually dies after an ecstatic dance of joy, succumbing to physical exhaustion and psychological devastation, wrought by cruel injustice, ingrained hatred, and the engulfing fulfillment of brutal vengeance. Of prime interest for the creation of this masterpiece is another important opera, *Cassandra* by Vittorio Gnechi (1876–1954), which influenced Strauss.

Strauss and Hofmannsthal again worked together to create the charming and sublime *Ariadne auf Naxos* (original version of 1912, redone in 1916); this opera within an opera focuses upon the desolate and abandoned *Ariadne*, who longs for death but finds instead an apotheosis through the love of *Bacchus*. The last three mythological operas of Strauss do not deserve the relative neglect they have suffered. *Die Aegyptische Helena* (1929, again Hofmannsthal is the librettist) plays upon the ancient version of the myth that distinguishes between the phantom *Helen* who went to *Troy* with *Paris* and the real *Helen* who remained faithful to *Menelaus* in *Egypt*. *Daphne* (1938, text by Joseph Gregor) is a most touching treatment of the same subject as that of the very first opera; its final scene (for soprano and orchestra) depicts a magical and evocative transformation that soars with typical Straussian majesty and power. Gregor was also the librettist for *Die Liebe der Danae* (1940), although he drew upon a sketch left by Hofmannsthal. The plot evolved from an ingenious amalgamation of two originally separate tales concerning *Midas* and his golden touch and the wooing of *Danaë* by *Zeus* in the form of a shower of gold.

English Composers of the Twentieth Century. English composers of the twentieth century have been prolific in their use of classical themes.

Benjamin Britten (1913–1976) deserves special mention. *Young Apollo* (1939), a youthful "fanfare" for piano solo, string quartet, and string orchestra, depicts in sound the sun-god as a new and radiant epitome of ideal beauty. In 1943, Britten wrote incidental music for a radio drama by Edward Sackville-West, *The Rescue*, based on Homer's *Odyssey*; and afterwards reworked his score into a concert version, entitled *The Rescue of Penelope*. His chamber opera *The Rape of Lucretia* (1946) is a taut and concise rendition of the Roman legend; the libretto by Ronald Duncan is derived from the play by André Obey, *Le Viol de Lucrece*. Britten offers a simple and affecting composition, *Six Metamorphoses after Ovid* (1951), for oboe solo (*Pan*, *Phaethon*, *Niobe*, *Bacchus*, *Narcissus*, and *Arethusa*). Britten's last opera, *Death in Venice* (1973), based upon the celebrated novella by

Thomas Mann, also treats the idea of beauty through important archetypal images. This story about a famous writer, Aschenbach, who becomes enamored of the beautiful boy Tadzio, is framed in terms of concepts of love and beauty that are familiar from Plato's *Symposium*; the structure is also mythological because of the Nietzschean conflict between a restrained Apollo and a passionate Dionysus for the soul of the creative artist. Interwoven as well are the allegorical themes of disease, plague, and death, which go as far back as the *Iliad* and gain a specially potent classic expression in Sophocles' *Oedipus*. Also among Britten's last compositions is *Phaedra* (1975), a cantata to a text from Racine's play (in a verse translation by Robert Lowell), written expressly for the mezzo-soprano Janet Baker.

William Walton (1902–1983) wrote a striking operatic version of an episode in the Trojan War, *Troilus and Cressida*, based upon the medieval romance.

Arthur Bliss (1891–1975) turned to Greek themes with his cantata, *Hymn to Apollo*; an opera, *The Olympians*; and a symphony for orator, chorus, and orchestra entitled *Morning Heroes*—the latter written as a tribute to his brother and his comrades who died in the Great War of 1914–1918; among the texts used are Hector's Farewell to Andromache (*Iliad* 6) and Achilles Goes Forth to Battle (*Iliad* 19).

Michael Tippett (1905–1998) wrote both the text and the music for an imaginative operatic treatment of the Trojan War (largely inspired by the *Iliad*), *King Priam*. From this work, he extracted one of Achilles' songs (with guitar accompaniment) and added two others, all focusing upon the relationship between Achilles and Patroclus, to create an effectively terse and tragic cycle, *Songs for Achilles* ("In the Tent," "Across the Plain," and "By the Sea").

Harrison Birtwistle (b. 1934) provided (to accompany a text by Peter Zinovieff) a lament upon the sorrow and death of Orpheus for soprano soloist, *Nenia, the Death of Orpheus*, which relies upon striking gymnastic effects both instrumental and vocal. *Nenia* is a funeral dirge or the Roman goddess thereof. Birtwistle and Zinovieff have since expanded this work into a larger-scaled operatic composition of note, *The Mask of Orpheus*.

Operetta and Musical Comedy. Other musical genres have inevitably been influenced by classical mythology and legend. The boisterous, satiric, and melodic works of Jacques Offenbach (1819–1880) provide splendid introductions to the world of light opera and operetta. His opera bouffe *Orphée aux Enfers* (*Orpheus in the Underworld*) is an absolute delight; surely everyone has heard from this score some version of the can-can, which Offenbach immortalized. Equally witty and entertaining is his later *La Belle Hélène* (*The Beautiful Helen*). Amid its tuneful arias is the famous "Judgment of Paris."

Another charming operetta is by Franz von Suppé (1819–1895), *Die Schöne Galathée* (*The Beautiful Galatea*). In this musical treatment of the story of Pygmalion, the sculptor despairs of the woman whom he has brought to life; she is so flirtatious and troublesome that, to his relief, Venus grants his request

that Galatea be changed back into a statue once again. In the same spirit is an operetta by Henri Christine, *Phi-Phi* (1918). Phi-Phi is the nickname of the famous sculptor Pheidias; but this treatment of the historical Pheidias, Pericles, and Aspasia belongs to the realm of legend.

Operetta has had an important history. For the classicist, we may isolate from the works of Gilbert and Sullivan the obscure *Thespis*, which is on a Greek and Roman theme. Yet, in this genre, Americans have made their own striking contribution to musical theater; and in its brashness or in its earnestness the American musical has developed a characteristic style and coloring all its own, as we shall see in the next section.

THE AMERICAN CONTRIBUTION

Who Is an American Composer? The complex questions of who is an American composer and whether or not characteristics peculiar to American music and dance can be identified are conveniently and justifiably answered by a profound quip made by the renowned American composer and critic Virgil Thomson: "It's very easy to write American music. All you need to be is American, and then write any kind of music you wish."⁷ American composers, and choreographers as well, must be identified as those who are American citizens, either by birth or naturalization; also included are some who never became American citizens at all but who, nevertheless, have established such a career in America that inevitably one must categorize them as American. To give but one example, Gian Carlo Menotti (the composer of Martha Graham's dance, *Errand into the Maze*) is rightfully considered an American composer since his lengthy career has been based in the United States; yet he has never given up his Italian citizenship, and he now lives in a castle in Scotland.

The American Debt to Greece and Rome. Leonard Bernstein (1918–1990) epitomized the spirit of many American composers:⁸

*Of course my music is eclectic; all music is. Any composer's writing is the sum of himself, of all his roots and influences. I have deep roots, each different from one another. They are American, Jewish, and cosmic in the sense they come from the great tradition of all music. I have been as influenced by Handel and Haydn as by jazz, folk songs, Hasidic melodies, or prayers I heard as I child. My music is not one or the other but a mixture of all. I can only hope it adds up to something you could call universal.*⁸

Bernstein might well have added the powerful influence of Greece and Rome. He himself has composed a *Serenade*, after Plato's *Symposium*, an orchestral work with sections bearing the names of Phaedrus, Pausanias, Aristophanes, Erixymachus, Agathon, Socrates, and Alcibiades. Considered by many to be one of the finest of Bernstein's classical works, it was performed as a ballet choreographed by Herbert Ross. In his notes for the piece, Bernstein wrote: "If there is a hint of jazz in the celebration, I hope that it will not be taken as anachronistic

 LEONARD BERNSTEIN'S VERSION OF ARISTOPHANES

Of great interest to those who wish to confirm Bernstein's classical roots is a letter written by John W. Darr (Harvard class of 1941) to the *New York Times* (November 4, 1990), which states that perhaps the first musical score written and directed by Bernstein for public performance (to critical acclaim) was for the production of Aristophanes' *Peace* in Sanders Theater of Harvard University in 1941. Bernstein's contribution was announced as an "original modern score for chorus and orchestra by the brilliant young composer Leonard Bernstein." Darr was leader of the chorus for the production. Years later as fifth-grade teacher at the Midtown Ethical Culture School in Manhattan, he got in touch with Bernstein about doing a production of *Peace*. Bernstein let Darr use the score, and his revival of the work was a memorable experience for those involved.

party music, but rather the natural expression of a contemporary American composer imbued with the spirit of that timeless dinner party."

Certainly one will find compositions by Americans (just as we have seen in the case of European composers) on classical themes of every sort, in every kind of musical genre and style: symphonic, operatic, chamber, vocal, choral, instrumental, classical, popular, jazz, rock, atonal, twelve-tone, serial, minimalist, and so on.⁹

Inspiration from Greece and Rome is often given a unique color and meaning in terms of things American, for example, in an art form that Americans have made very much their own, musical theater. Three such works in particular illustrate the successful metamorphosis of things classical into pure Americana: *The Golden Apple*, which turns Homeric epic into an American saga; *Gospel at Colonus*, which transposes the spirituality of Sophocles into a black American gospel service; and *Revelation in the Courthouse Park*, a chilling and profound dramatic allegory embracing American rock, sex, religion, and the philosophical message of Euripides' *Bacchae*.

The Beginnings of American Music. The beginnings of music in America are characterized by the European background and fierce religious devotion of the New England colonists, who considered the singing of psalms an integral part of their new lives, as it had been of their old ones. The Puritan ministers of New England preached about the need for better singing, and the result was the first American music textbook, *An Introduction to the Singing of Psalm Tunes*, by the Rev. John Tufts (a graduate of Harvard College), published in 1721; with it came the important development in American music known as the singing-school movement. Many groups for singing-school instruction sprang up and itinerant singing masters began their careers; from them emerged a group of American composers or "tunesmiths," sometimes designated as the First New England

School. These musical pioneers published hundreds of such “tunebooks,” collections of hymns, songs, and anthems, which are still sung today and continue to be an inspiration for American composers. Initial musical developments in America were dominated by the Bible and Christianity, not the classics.

Francis Hopkinson and The Temple of Minerva. A wave of immigration following the consolidation of the United States brought with it many enriching foreign influences, among them those of the great European master composers. As a result the American idiom of the Yankee tunesmiths became modified, broadened, or submerged. In the context of these new developments in music emerged the two earliest composers who may be confidently identified as native-born Americans, James Lyon and Francis Hopkinson, both of whom also figured prominently in the world of sacred music in Philadelphia, a Quaker center.

It is upon Francis Hopkinson (1737–1791) that our survey now must focus, one of the new breed of cultured artists who helped immeasurably in the fostering of urban secular music in the eighteenth century;¹⁰ he has good claims to be honored (with deference to Lyon) as the very first native American composer, and the influence of the classics upon him is very much apparent.

In 1788, Hopkinson dedicated a set of *Songs for the Harpsichord or Forte Piano* to George Washington, remarking in the dedication that “I cannot, I believe, be refused the credit of being the first native of the United States who has produced a musical composition.”¹¹ Gummere, in his survey of Hopkinson’s importance, comments that this “volume of songs, dedicated to Washington, who acknowledged the honor in a note that sustained the metaphor of Orpheus throughout the first paragraph, is no whit inferior to many English Elizabethan madrigals.”¹² The first composition we can unequivocally attribute to a native American is a song by Hopkinson dated 1759, “My Days Have Been So Wondrous Free.”¹³

Hopkinson, a member of the first graduating class of the College of Philadelphia in 1757, was indeed a man of many parts: besides being a composer, he was also a virtuoso musician on the harpsichord; he was trained in the classics and was an essayist and satirist, and his satire embraced criticism of dry teaching of Latin and Greek grammar; he studied and practiced law and was judge of the Admiralty; as a politician, he was a member of Congress and was one of the signers of the Declaration of Independence; he was an inventor and a designer of the American flag; and he was a poet. Many of his poems contain classical allusions.¹⁴

It is as the poet of the classic-laden libretto for the work entitled *America Independent* or *The Temple of Minerva* (first performed on December 11, 1781) that Hopkinson is vital for our topic. He was the composer too, in the sense that he chose the music for his text.¹⁵ The significance of this surviving work in the political and musical history of America cannot be overestimated. It provides us with firsthand evidence for the highly charged emotions of the American patri-

ots who were fighting for a new and independent nation—the fulfillment and reality of an idealistic vision of freedom—and it celebrates in particular America’s alliance with France in the pursuit of this quest for independence—to be “great and glorious, wise and free.” The libretto for *America Independent* provides us with one of our earliest extant, original musical texts, imbued with a patriotism clothed, very startlingly, in classical allusion. The Minister of France entertained a “very polite circle of gentlemen and ladies” that included “General Washington and his lady” with an elegant concert consisting of the “*Oratorio*,” written and set to music by Hopkinson. Sarah Bach, the daughter of Benjamin Franklin, was present at this first performance and could not keep from crying upon hearing the stirring lines of the Roman goddess Minerva proclaiming that if the sons of America “united stand, great and glorious shall she be.”¹⁶

The work is described in contemporary sources as an oratorical or musical entertainment; others have labeled it a pageant, dramatic allegorical cantata or an allegorical political opera; it is even extravagantly claimed to be the first American grand opera. The scene is set in the temple of Minerva and begins with the appeals of suppliants for the goddess to reveal the future. Here are a few excerpted lines from this surprising text:

Great Minerva! Hear our pray’r,
What the Fates ordain, declare;
Thus before thy throne we bow,
Hear, oh Goddess! hear us now.

The High-Priest of Minerva continues the supplication.

Daughter of Jove! from thy resplendent throne,
Look, with an eye of blessing down;
Whilst we our sacred song address . . .
And to thy praise
Our voices raise,
In carols of triumphant joy.

Adore the great daughter of Jove!
Behold, how resplendent with light,
On a cloud, she descends from above . . .
She comes to reply to your pray’r;
And now what the Fates have ordain’d,
Minerva herself shall declare

The Doors of the Sanctuary open; Minerva appears and for the future predicts happiness and prosperity in these lines:

Jove declares his high command,
Fate confirms the great decree;
If her sons united stand
Great and glorious shall she be. . . .
She, like the glorious sun

Her splendid course shall run. . . .
 The gods decree
 That she shall be
 A nation great. . . .

And the suppliants respond:
 . . . Let loud paeans rend the skies;
 Great Minerva Pow'r divine!
 Praise! exalted praise be thine.

The Development of Musical Theater. As far as theatrical performances for the public were concerned, the struggle for their maintenance and survival in the eighteenth century confirms the strong religious puritanism of early America. For many years anti-theater laws in Boston (1750) and Philadelphia (1778) were inhibiting, but it was impossible to suppress the need and desire of those who would promote and attend the theater. By the end of the century, such laws were either repealed or safely ignored and a vigorous theatrical life in America began to flourish.

Music was an integral part of the theater of the eighteenth century since much of the repertoire for the early companies included the English type of ballad-opera (i.e., plays interspersed with music) that was usually compiled from miscellaneous sources. Then at the end of the century came a piece that foreshadowed important developments in American musical theater; as Sonneck perceptively observed: "In 1797 a form of entertainment was introduced in New York for which I believe the Americans to be peculiarly gifted: the melodrama."¹⁷ This portentous form of entertainment was, significantly enough, initiated by a work with a classical theme: *Ariadne Abandoned by Theseus, in the Isle of Naxos*, in one act, its text of unknown authorship; its advertisement claimed, "Between the different passages by the actors, will be Full Orchestral Music, expressive of each situation and passion. The music composed and managed by Pelissier." It is not an unlikely conjecture that some songs may have been included along with the background music. The composer, Victor Pelissier, a French musician, first appeared in Philadelphia in 1792; he became associated with the Old American Company, for which he arranged and adapted foreign ballad-operas and composed original scores.

In the development of the American musical over the years, two on mythological themes may be singled out. *Adonis* (1884), by Edward Everett Rice (1848–1924), was a "burlesque-extravaganza" based vaguely on the theme of Pygmalion and Galatea. With 603 performances, it had the longest run in Broadway history up to that time.¹⁸ *Up and Down Broadway* (1910), a musical revue by Jean Schwartz, had Apollo and the other gods arrive in New York determined to reform taste in the theater, but they finally come to the conclusion that they do not know as much about good entertainment as Broadway does. With them is Momus. The song, "Chinatown, My Chinatown," originated in this show; the

THE MYTHOLOGICAL ROOTS OF THE NATIONAL ANTHEM

A study of the evolution of the national anthem of the United States reveals that it was derived from music that had once been a setting for words on a classical theme. A succinct summary of the origin and development of "The Star-Spangled Banner" is given by Hitchcock:

The song destined to become the national anthem was anything but patriotic to begin with. Addressed "to Anacreon in Heav'n," the tune later sung as The Star-Spangled Banner originated as a British drinking song, celebrating the twin delights of Venus and Bacchus. Taken up by Americans, it was given new patriotic words in 1798 by a (not THE) Thomas Paine, who sang of "Ye sons of Columbia, who bravely have fought/For those rights, which unstained from your Sires had descended." The Star-Spangled Banner text, which was composed in 1814 by Francis Scott Key after the bombardment of Fort McHenry by the British, was applied to the old tune, and the resulting song was made the national anthem in 1931.¹⁹

A bronze statue of Orpheus by the sculptor Charles Niehaus stands at the entrance to Fort McHenry in Baltimore, Maryland, as a monument to Francis Scott Key. It was dedicated by President Warren Harding in 1922.

cast included Irving Berlin and Ted Snyder, who sang interpolated songs of their own. The plot is similar to that of an earlier show, *Apollo in New York*, produced by W. E. Burton and his troupe in 1854.

The Boston Group or Second New England School. In the second half of the nineteenth century, classical music of substance and quality came to be written by native American composers. American music may, with some justice, be said to begin with John Knowles Paine (1839–1906), the educational father of many important and influential American composers, musicians, and critics. Paine, who became an excellent organist, studied music in Europe, particularly in Germany, and became a professor of music at Harvard; his compositions deeply reflect his European training. The influence of Bach and German romantics such as Mendelssohn, Schumann, and Brahms, in particular, is strong; but Paine is an American, and his works are in their own right powerful and original, as are those of many of his contemporaries and disciples, who were not untouched by the influence of classical themes. Paine himself was sometimes inspired by Greece and Rome; he composed music for a production at Harvard of Sophocles' *Oedipus Tyrannus* (1881) in the original Greek. His other compositions include an orchestral piece, *Poseidon and Amphitrite, an Ocean Fantasy*, and a cantata, *Phoebus Arise*.

Three other important composers out of the many comprising The Boston Group should be singled out for their use of classical themes. George Whitefield Chadwick (1854–1931), a church organist who studied in Germany and became the director of the New England Conservatory of Music, wrote three *Concert*

Overtures, each bearing the name of a Muse: *Thalia*, *Melpomene*, and *Euterpe*; *Adonais*, *Elegiac Overture*, for orchestra, written as a memorial to a friend; and the symphonic fantasy for orchestra, *Aphrodite* (1912).

Frederick Shepherd Converse (1871–1940) studied in Munich and in America with Paine and Chadwick, and he taught at the New England Conservatory and Harvard. One of his orchestral works is a concert overture, entitled *Euphrosyne*; two others are inspired by Keats: *Festival of Pan, a Romance* and *Endymion's Narrative, a Concert Overture*, not strictly programmatic but intended to reflect upon Endymion's emotional changes in the poem.²⁰

Henry Kimball Hadley (1871–1937) became one of the most prolific of Chadwick's students, a veritable "Henry Ford of American composers." Among his classically inspired works is an opera, *Cleopatra's Night* (with Frances Alda as Cleopatra), which was produced at the Metropolitan Opera in 1920 with some acclaim. The libretto is by Alice Leal Pollock, adapted from *Une Nuit de Cléopâtre*, by Theophile Gautier. He also composed the music for *The Atonement of Pan*, a festival play or masque written by Joseph D. Redding; a concert overture, *Hector and Andromache*; and a piano solo, *Dance of the Satyrs*.

It has far too long been fashionable among some critics to be supercilious and derogatory about these early American composers. At last many of their works are being performed and recorded, and we can hear them for ourselves and appreciate their virtues.²¹ Now, so to speak, the floodgates of American musical composition have been thrown open.

Some Important Musical Developments. Among the important developments in the twentieth century, that of electronic music, which began in Europe (e.g., Xenakis and Wellesz, identified earlier), deserves to be singled out because of the significant classically inspired works in that medium. Among the pioneers in the evolution of electronic music in America was Milton Babbitt (b. 1916), a trained mathematician who turned to the serious study of music. He became intrigued with the twelve-tone techniques of the Europeans Schoenberg, Berg, and Webern, and was determined to turn them into a real system. Thus he developed a "systematic serial composition," or "serialism"; and to him belongs the first serial work ever written. He was also the first to compose an extended composition for the synthesizer (1961). Babbitt, combining synthesized sound with live performance in new and vital ways, has written the highly acclaimed *Philomel* (1964) for soprano, recorded soprano, and synthesized tape, set to a poem by John Hollander that is based on Ovid's legend of Tereus, Procne, and Philomela. There are three sections: Philomel flees through the forest, vocalizing sounds that play upon the names Philomel and Tereus; then an Echo Song follows after Philomel is transformed into a nightingale; finally, the nightingale realizes her full voice and new power:

On the tape the voice of Bethany Beardsley is now near, now far in the stereo spectrum, sometimes electronically distorted, sometimes singing in chorus, sometimes echoing or

*harmonizing with the live soprano. . . . The vocal part, which ranges from F sharp below middle C to B above the staff, also requires spoken pitches. . . . The form of the music relates clearly to that of the text, with articulative synthesized interludes at appropriate points.*²²

The following is a selective discussion of composers who illustrate the variety of new musical techniques used in compositions on mythological themes.

Marvin David Levy (b. 1932) has given us an opera based on Eugene O'Neill's *Mourning Becomes Electra*, with libretto by H. Butler, first performed at the Metropolitan Opera in 1967. It is generally atonal, with a strong sense of drama and theater and special electronic sound effects prepared by Vladimir Ussachevsky (1911–1990), another important pioneer in electronic music. Levy revised the work for a production at the Chicago Lyric Opera in 1999.

Echoi (1963) by Lukas Foss (1922–), is numbered I, II, III, and IV; Foss is inspired by the story of Echo.

Ernst Krenek (1900–1991), who adopted various styles in his career (jazz idiom, romanticism, and atonality), wrote several classically inspired works: *Orpheus und Eurydike* (1923); *Leben des Orest* (or *Orestes*, 1929); *Cefalo e Procri* (1933); *Tarquin* (1941); *Pallas Athena Weint* (1950), about the downfall of democracy in Athens as pertinent to the contemporary scene; and *Medea* (1952), a dramatic monologue for voice and orchestra with text, after Euripides, by Robinson Jeffers.

John C. Eaton (b. 1935) has won particular acclaim for his opera *The Cry of Clytaemnestra* (1979). The libretto by Patrick Creagh is based loosely on Aeschylus' *Oresteia*. This is a powerful work, with moments of soaring lyricism and dramatic in its manipulation of electronic effects, whose organization depends upon dissonance, including successive shrieks by Clytemnestra as she reveals her shifting psychological and emotional states in a series of dream sequences. He has also composed a large-scale opera, *Heracles* (1964), to a libretto by Michael Fried, after Sophocles' *The Women of Trachis* and Seneca's *Hercules Oetaeus*. His *Ajax* (1972), in a series of dream sequences, is for baritone and orchestra.

Typical of the work of innovators who experiment is that of Larry Don Austin (b. 1930), whose compositions first combined jazz with atonality and eventually employed computer-generated and -assisted techniques. Several of his compositions are multimedia productions and suggest classical influence: for example, *Catharsis* (for Two Improvisational Ensembles, Tape and Conductor, 1967) embodies the improvisational techniques he named his "open style." Other works include *Roma: A Theater Piece in Open Style* (1965); *The Maze* (1966), a theater piece in open style for percussionists, dancer, tape, and films; *Phoenix*, for four-channel tape; and *Agape*, a celebration or electronic masque or rock mystery play for soprano and baritone soloists, dancers, actors, rock band, chorus, and tapes (1970).

Attis (in two parts, completed in 1980), by Albert Moeus (b. 1920), is scored for soprano and tenor soli, chorus, percussion, and orchestra, using the Latin text of Catullus. Moeus developed a technique he calls systematic chromatism.

Part I of *Attis* caused a furor when first performed by the Boston Symphony in 1960 because of its shocking and violent mood of pagan ritual.

Philip Glass (b. 1937) is most famous as the proponent of a musical style known as minimalism. *The CIVIL WarS* is a large multimedia work created by him and Robert Wilson for the Olympic Games in Los Angeles (1984), but it was never performed completely. The Rome Section is a self-contained part (Act 5) with text in Latin, Italian, and English. In the last scene Hercules, who comes to earth to help humans, raises the Olympic torch as he returns to heaven. More to the point, Glass also has *Orphée* (1993), an operatic redoing of Jean Cocteau's classic movie for the stage, and the first of a trilogy followed by Cocteau's *La Belle et la Bête* (1994) and *Les Enfants Terribles* (1995).

Finally, we single out four women composers who have been innovators in their treatments of mythology in music.

Louise Juliette Talma (1906–1996) composed *The Alcestiad* (1958), with libretto by Thornton Wilder, her most successful work. Talma, dean of women composers, combined twelve-tone music with tonal lyricism, and hers was the first opera by an American woman to be mounted by a major European company (its premiere was in Germany, not the United States).

Thea Musgrave (b. 1928) has won a measure of renown. Her chamber opera *Voice of Ariadne* (1973), with libretto by Amalia Elguera, is based on Henry James' *The Last of the Valerii*. A statue depicts Ariadne, who is not seen; for her a taped voice is used with electronic sounds to depict the sea and distance. An Italian count is infatuated with the legend of Ariadne; he alone can hear her voice and he falls in love with her. In the end, his American wife takes on the guise of Ariadne and wins him back. Musgrave is fond of the flute: *Orfeo I* (1975), for flute and prerecorded tape, is an improvisation on a theme; *Orfeo II* is another version for solo flute with the music on the tape distributed among fifteen strings; and *Orfeo III. An Improvisation on a Theme* is for solo flute and string quintet. The flute represents Orpheus, and all other characters are portrayed by the strings. Her *Narcissus* (1988) employs solo flute with digital delay.

Julie Kabat (b. 1947) set *Evadne*, one of *Five Poems* by H. D. (Hilda Doolittle), to music. Evadne reminisces ecstatically about her love with Apollo. Two of the other songs are entitled *Oread* and *Fragment 113* (a poem based on Sappho's "Neither honey or bee for me"). Kabat uses unusual instruments in unusual combinations, in this case, voice, glass harmonica, saw, and violin.

Jean Eichelberger Ivey (1923–) offers a feminist interpretation, *Hera, Hung from the Sky*, for mezzo-soprano, seven winds, three percussion, piano, and electronic tape (1973, premiere). The poem by Carolyn Kizer reinterprets the myth from a contemporary woman's point of view: The goddess Hera is punished by her husband Zeus for her presumption "that woman was great as man."

Harry Partch. Among all the composers strongly influenced by Greek and Roman themes, Harry Partch (1901–1976) may perhaps be called the most gen-

unely American and the most original. Independent and iconoclastic, he spent part of his life as a hobo during the Depression. He was at the same time a most knowledgeable musician and highly literate academic who taught, held research posts, and accepted grants. His musical theater pieces (original as they are) have something in common with those of the European Carl Orff, whose musical treatments of Greek tragedy have a powerful, theatrical impact. Partch's dramatic break with European and American musical tradition came in 1930, when he burned his own previous compositions (fourteen years' worth) in an iron pot-bellied stove. He would turn his back on the traditional, forge a new music to be played on new instruments of his own making, and train musicians for performance. He explains:

*I am first and last a composer. I have been provoked into becoming a musical theorist, an instrument builder, a musical apostate, and a musical idealist, simply because I have been a demanding composer. I hold no wish for the obsolescence of the widely heard instruments and music. My devotion to our musical heritage is great—and critical. I feel that more ferment is necessary to a healthy musical culture. I am endeavoring to instill more ferment.*²³

Partch called his new musical language “monophony,” built upon a forty-three-tone-to-the-octave just scale. He designed the original instruments required to play his unique compositions from fuel tanks, Pyrex jars, and a wide variety of modified musical instruments. His music and his musical theater are as much influenced by the Far East as by Western Europe. His *Oedipus* and *Revelation in the Courthouse Park* are classical in their inspiration, and his *Delusion of the Fury* is Oriental; its themes, including the release from the wheel of life and death, come from Japanese Noh drama and West African folktale.²⁴

Partch originally used the translation of W. B. Yeats for his setting of *Oedipus* (1952), which was entitled *Sophocles' King Oedipus*. Because he could not get permission from Yeats' literary agent to release a recording, in 1954 he revised the score for enlarged instrumentation, setting it to his own translation; the final revision of his operatic dance-drama *Oedipus* was made in 1967. His treatment confirms the reason he was attracted to mythology: “There's so much basic in it.” Yet he felt that his *Oedipus* was too firmly rooted in the ancient past, and he wanted to strive for more contemporary relevance—hence his Americanization of Euripides.

Partch's *Revelation in the Courthouse Park* (1960) is based on the *Bacchae* of Euripides. He wrote his own controversial libretto, in which the character of Dionysus is depicted in the image of Elvis Presley, but based the text for the choruses on Gilbert Murray's translation.

Because of the many difficulties involved in a performance of *Revelation in the Courthouse Park* (with its unorthodox score and orchestra requiring the playing of unorthodox instruments), any staging of the work is a rare and momentous theatrical event; and so when it was elaborately produced in Philadelphia

in 1987 (in a production that was recorded) and revived in 1989 in New York, it aroused varied and widespread critical response. This is Partch's most grandiose musical theater piece. A mobile marching brass band juxtaposes music in a traditional style; the action requires singers, actors, dancers, acrobats, tumblers, gymnasts, baton-twirlers, fire-throwers, and a filmed fireworks display. The scenario alternates between ancient Thebes and the courthouse park (in Greek revival style) of a small midwestern town in the 1950s. Each major singer plays two roles—Dion, rock star (a pop idol archetype for Elvis Presley) and Hollywood King of Ishbu Kubu with his fanatic female followers is also Dionysus, god of the frenzied Bacchae; Sonny, a young, disturbed man in the courthouse park, becomes Pentheus, the youthful king of ancient Thebes; and Mom, devotee of Ishbu Kubu and mother of Sonny, plays her alter ego Agave, mother of Pentheus and leader of the Bacchae. The action is that of ritual theater; lines are spoken or declaimed with or without music, amidst the more purely musical episodes; and it is not the music itself that matters as much as the theatrical impact and the universal import of the imaginative and provocative libretto. Partch explains: "Dion, the Hollywood idol, is a symbol of dominant mediocrity, Mom is a symbol of blind matriarchal power, and Sonny is a symbol of nothing so much as a lost soul, one who does not or cannot conform to the world he was born to." (See the box on p. 290).

Other works by Partch are influenced by classical mythology. *Ulysses at the Edge* (1955) is a "small chamber work" that appears in other versions as *Ulysses Departs from the Edge of the World* and *Ulysses Turns Homeward from the Edge of the World*. Partch, in reminiscence of his hobo years, thought of Ulysses as another wanderer like himself. This piece eventually became the fifth part of *The Wayward*, a collection of his compositions on American themes. *Castor and Pollux* (1952) is called *A Dance for the Twin Rhythms of Gemini*. It is one part of a three-part work, *Plectra and Percussion Dances*, subtitled *Satyr-Play Music for Dance Theater*. The work has two sections, one for Castor, the other for Pollux; each section is in four parts: (1) Leda and the Swan, (2) Conception, (3) Incubation (or Gestation), (4) Chorus of Delivery from the Egg. Partch reveals that from the moment of insemination, each egg uses exactly 234 beats in cracking. *Daphne of the Dunes* (1958, rev. 1967) was originally the music score for a film. Partch collaborated with the Chicago experimental filmmaker Madeline Tourtelot in the making of six films. One of them was *Wind Song*, a study of nature and a modern version of the myth of Daphne and Apollo, for which Partch composed and performed the sound track. Another of their collaborations was for the movie *Revelation in the Courthouse Park* (1961).

Barber, Stravinsky, and Some of the Many Others. One of the foremost American composers is Samuel Barber (1910–1981), whose popularity has been maintained (despite bitter, adverse criticism) because of the universal persistence of his melodic neo-romanticism. His *Andromache's Farewell* (1963) for soprano and

orchestra is a moving setting of Andromache's farewell to Astyanax from Euripides' *The Trojan Women*, in a new translation by John Patrick Creagh. A messenger has come to tell Andromache that she must relinquish her son Astyanax to the Greeks, who have decided to hurl the boy to his death from the walls of Troy. Andromache begins with the words, "So you must die, my son."

Barber also has provided *Incidental Music for a Scene from Shelley*, inspired by a short passage in Act 2, scene 5, of *Prometheus Unbound* that calls for music.

One of Barber's greatest works is based on Roman legendary history. Shakespeare's *Anthony and Cleopatra* is truly an American opera of stature in the grand tradition. The first performance (1966) was commissioned for the inauguration of the new Metropolitan Opera House in Lincoln Center. Alvin Ailey was the choreographer and Franco Zeffirelli the librettist, designer, director, and producer; the grandiose vulgarity of his production was in large part responsible for the initial critical failure of this work. Barber made extensive revisions, along with his friend Gian Carlo Menotti, who replaced Zeffirelli as the librettist. The opera was revived with success by the Chicago Lyric Opera and telecast in December 1991.

Barber's score for *Medea*, a ballet by Martha Graham, is discussed later in this chapter.

Works by many other composers are not insignificant. For example, Igor Stravinsky (1882–1971) was also drawn to classical subjects. His *Oedipus Rex* is perhaps his most significant achievement on a classical theme—a highly stylized opera-oratorio, liturgical, ritualistic, and statuesque, composed to a Latin text provided by Jean Cocteau, who condensed Sophocles' play into six episodes (Stravinsky gave Cocteau's French version to Jean Danielou to translate into Church Latin). This ecclesiastical work, in spirit more akin to a Christian morality play than to ancient Greek drama, is scored for six solo voices, a narrator, a male chorus, and orchestra; surprisingly enough, many of its musical themes are adapted from Verdi's *Aida*.

Stravinsky also composed *Perséphone* (1934). Called a melodrama (i.e., a work with spoken, not sung, recitative accompanied by instruments), it incorporates mime, spoken dialogue, dance, and song and utilizes orchestra, narrator, tenor soloist, chorus, and dance; the text by André Gide is inspired by the *Homeric Hymn to Demeter*. There are three sections: Persephone abducted; Persephone in the Underworld; and Persephone restored.

Stravinsky's collaboration with Balanchine is discussed later in this chapter.

Elliott Carter (b. 1908) gave us *Syringa* (1978), for mezzo-soprano, bass (or baritone), guitar, and ten instruments, with text by John Ashbery ("Houseboat"). This original work is a cantata, chamber opera, polytextual motet, and vocal double concerto all in one. The music is responsive to Ashbery's modern text—ironic, campy, and lyrical. His Orpheus becomes a modern poet who despairs of the futility of his art; the mezzo declaims Ashbery's poetry in a flat, prosaic manner; the bass-baritone, with intense emotion, intones a collage of classical

Greek texts collected by Carter; and the work celebrates the “time” that gave birth to an egg. The potpourri of Greek texts is drawn from the Orphicorum Fragmenta, Aeschylus, Plato, Hesiod, Euripides, Mimnermus, Archilochus, Sappho, Ibycus, Homer, and the *Homeric Hymn to Hermes*.

Carter has also composed incidental music for Sophocles’ *Philoctetes* and Plautus’ *Mostellaria*. When Carter was director of the music department at St. John’s College in Annapolis, Maryland (in the 1940s), he taught not only music but also subjects in the fields of Graeco-Roman history and language. His preoccupation with classical mythology is further shown in his ballet score for *The Minotaur*, discussed later in this chapter.

Ned Rorem (b. 1923), an author and musician who is particularly acclaimed as an American composer of songs, has written two classically inspired songs for voice and piano: “Philomel” (text by R. Barnefield) and “Echo’s Song” (poem by Ben Johnson). He also has a cantata for voices and piano on ten poems by Howard Moss, entitled *King Midas* (of the golden touch). Moss tells us in the notes for the recording (Phoenix PACD 126):

King Midas went through many transformations; two themes emerged originally: “the King, himself, mourning the horrors of transforming the world into gold,” and “the wish fulfilled becoming a scourge” (Be careful what you ask for; you may get it). . . . If you can imagine a King walking down Fifth Avenue, about to deposit an accumulation of goldleaf at the Chase Manhattan bank, you’d have a notion of what I was after.

Marc Blitzstein (1905–1964) wrote *The Harpies* (1931), a comic chamber opera that satirizes earlier mythological operas and parodies contemporary musical styles with jazz and spicy slang, in a libretto (by the composer) based upon the legend of Jason and the Argonauts and their encounter with Phineus and the Harpies.

A work based on the legendary Julius Caesar is one of the few operas composed to an overtly homosexual plot: *Young Caesar* (1971) by Lou Harrison (b. 1917–) was originally written for puppets, with singers in the pit and employing adapted and original instruments. It has been revised for a big stage with singers and performed by the Gay Men’s Chorus of Portland. The story is about Caesar’s youthful homosexual affair with Nicomedes, king of Bithynia.

The renowned critic and composer Virgil Thomson (1896–1989) wrote *Seven Choruses from the Medea of Euripides* (1934), for women’s voices a capella and percussion ad lib (translations by Countee), and *Oedipus Tyrannos* (1941), Sophocles’ text, in Greek, for men’s voices, winds, and percussion.

The following are just a few among the many works by women composers that touch upon classical themes:

- Peggy Glanville-Hicks (1912–1990), *Nausicaa* (1957). The libretto by Robert Graves and A. Reid is derived from Graves’ novel *Homer’s Daughter*, a work strongly influenced by Samuel Butler’s *The Authoress of the Odyssey*; the central thesis is that Nausicaa (not Homer) is responsible for the com-

position of the *Odyssey*. Solo roles are sung in English, choral episodes are in Greek, and the score is strongly influenced by Greek folk music.

- Betsy Jolas (b. 1926), *Le Cyclope* (1986), after Euripides, *Cyclops*, and *Schliemann* (1969). Libretto based upon the play by Bruno Bayen. The character of Heinrich Schliemann is illuminated through the fantasy of the fulfillment of a childhood dream; at age forty-seven he leaves New York to discover ancient Greece and marry Helen of Troy.
- Margaret Garwood (b. 1927), *The Trojan Women* (1967, rev. 1979). Libretto by H. A. Wiley, after Euripides.
- Eleanor Everest Freer (1864–1942), *The Masque of Pandora* (1928). Libretto by the composer, after Longfellow.
- Isadora Freed (1900–1960), *Pygmalion*, symphonic rhapsody (1926).
- Vivian Fine (1913–), *Paeon* (1979), for tenor-narrator, brass ensemble, female chorus. A dramatic cantata presenting lines from Keats' "Ode to Apollo"; *Song of Persephone* (1964), for solo viola; and *The Confession* (1963), for voice, flute (alto flute), violin, viola, cello, and piano. Inspired by Racine's *Phaedra*, there is speaking as well as singing in this piece.

Some important treatments of Sophocles, in addition to the works of Carter and Thompson mentioned earlier, include the following:

- Frederic Rzewski (b. 1938), *Antigone-Legend* (1982). The text is a poem by Bertholt Brecht (189 lines in dactylic hexameter), written in 1947 when he was adapting Hölderlin's translation of Sophocles' *Antigone* for the stage.
- Seymour Shifrin (1926–1979), *Cantata to the Text of Sophoclean Choruses* (1957). The choruses (for mixed chorus and full orchestra) are Lament for Oedipus, "What can the shadow-like generations of man attain" (from *King Oedipus*, translated by W. B. Yeats); Ode, "Love, unconquerable, Paeon, God of many names, / O Iacchos"; and Ode II, "I have seen this gathering sorrow from time long past" (from *Antigone*, translated by Dudley Fitts and Robert Fitzgerald).
- Tobias Picker (b. 1954), *Emmeline* (1996). Based on the novel by Judith Rossner, a powerful retelling of the Oedipus legend set in the eastern United States in the mid-nineteenth century.

The following are works based on the legend of Medea:

- Alva Henderson (b. 1940), *Medea* (1972). Henderson also wrote the libretto, after Robinson Jeffers' adaptation of Euripides.
- Jonathan Elkus (b. 1931), *Medea* (1963). Libretto by the composer, after Euripides.
- Benjamin Lees (b. 1924), *Medea in Corinth* (1970). Libretto by Robinson Jeffers, after Euripides. This opera was broadcast by CBS television, May 26, 1974, starring Rosalind Elias.

- Jacob Druckman (b. 1928), *Prism*, 1980. Inspired by the Medea myth and scored for large orchestra, with an electric harpsichord and augmented percussion section. Druckman also composed *Medea, a Sex-War Opera*, which was commissioned by the Metropolitan Opera (1985). The original libretto by Tony Harrison (after Euripides) introduces references to other literary and musical versions up to the present. John Corigliano's *The Ghosts of Versailles* was the work chosen instead and performed (1992). Druckman explains the reasons why his commission was ill-fated: "The project was not canceled because of disapproval of the music but for reasons of deadline. In fact the Met never saw the music that had been completed at the time of the cancellation."²⁵

Finally, two works on the theme of Orpheus:

- Lukas Foss (1922–), *Orpheus* (1972). Originally a concerto for viola or 'cello (i.e., violoncello) or violin and chamber orchestra (strings, piano strings, oboes, harp, and chimes). In 1983 an extended violin duet was added and the "new" work became *Orpheus and Euridice*.
- The song *Orpheus with his Lute*, by William Schuman (1910–1992), is a setting to music of verses from Shakespeare's *Henry VIII*, Act 3, scene 3 (see the box on p. 361). Schuman also has a version for flute and guitar and as well a reworking of the song, entitled *In Sweet Music, Serenade on a Setting of Shakespeare*; the text appears only at the beginning and end; the singer, for the most part, hums and sings without text, accompanied by flute, viola, and harp. Another reworking of this music by Schuman is orchestral, *Song of Orpheus, Fantasy for Cello and Orchestra*. The beautiful lines of Shakespeare have been set to music by several other composers, including Mario Castelnuovo-Tedesco and Marc Blitzstein.

Popular Music and Rock. The revolution in music caused by the development of electronic instruments (particularly the guitar) has led to the evolution of the musical idiom and style called "rock." It is refreshing (but perhaps not surprising) to find that in rock music, too, there exists a repertoire inspired by classical themes. The legend of Icarus appears to be a favorite: for example, "Icarus Ascending" by Steve Hackett, "Flight of Icarus" by the heavy metal group Iron Maiden, and "Icarus, Borne on Wings of Steel" by Kansas. The song "Icarus" by Ralph Towner has become the theme music of the Consort of Paul Winter, whose concerns are with nature and ecology (see *Missa Gaia*, later in this chapter). "The Fountain of Salmacis" is a song by the group Genesis; an instrumental piece, "The Waters of Lethe," was composed by Tony Banks, the keyboard player in Genesis. "The End" is an Oedipal song by Jim Morrison and his rock group The Doors. Others worth singling out are "Cassandra" by Steve Hackett, "Achilles Last Stand" by Led Zeppelin, "The Three Fates" by Emerson, "Pegasus" by the Allman Brothers Band, "Jason and the Argonauts" by XTC, "Daphne" by Kayak, and "Lysistrata" by Utopia.

Paul McCartney has given us a *Venus and Mars Rock Show*; William Russo, *Antigone*, a rock musical, and *The Bacchae*, a rock cantata. Of some interest is *Orpheus and Eurydice*, a rock opera in Russian by Alexander Zhurbin (who now lives in the United States), which has won a measure of renown and notoriety. A work by the rock group Manowar, *Achilles, Agony and Ecstasy in Eight Parts*, deals with episodes from the *Iliad*, including the death of Patroclus and the mutilation of Hector's corpse by Achilles.

Other works on mythological themes are "Atlantis" by Donovan Leitch, "Calypso" by Suzanne Vega, "Athena" by Peter Townshend, and "The Minotaur" by Dick Hyman and his Electric Eclectics. The second of the seven parts of Scott Cossu's *Wind Song* is entitled "Demeter/Rejoicing."

Odysseus and the *Odyssey* in particular have inspired more lengthy and ambitious works. Examples include "Tales of Brave Ulysses" by Cream; David Bedford's *The Odyssey*, an entire album that musically presents major episodes in the story; and Bob Freedman's *The Journeys of Odysseus*, a jazz suite for chamber orchestra. Sections are entitled "Prologue (Dawn)," "Sea Voyage," "The Eaters of the Lotos," "Polyphemus," "Erebos (Conversation with the Shades)," "Construction of the Raft," "The Song of the Sirens," "The Besting of the Suitors," and "Epilogue (Offering to the Gods)." The composer observes: "At the beginning of each section you will hear a brief spoken quotation from Homer. It is meant to set the tone for the episode. What each individual will experience or 'hear into' the music depends totally on his own imagination and sensitivity."²⁶ Particularly appealing in its melodies and imaginative in its lyrics is *Ulysses, the Greek Suite* by Michael Rapp. Songs illuminate the theme of Ulysses' trials and his homecoming: the Lotus Eaters, Polyphemus, Circe, Hades, the Sirens, and Scylla and Charybdis; and Penelope is given some lovely, introspective songs expressing her fears and her hopes. In the category of more traditional popular music are songs associated with particular singers that have become perennial favorites, for example, "Stupid Cupid," sung by Connie Francis; "Venus," by Frankie Avalon; "Venus in Blue Jeans," by Jimmy Clayton; and "Cupid," by Sam Cooke. From the many songs about love, we add "Cupid's Boogie," "Cupid's Ramble" (for voice and piano), and "Cupid and I," from the operetta *The Serenade* by Victor Herbert.

From the musical *Leave It to Jane* (1917), by Jerome Kern (words by P. G. Wodehouse), come two songs, "The Siren's Song" and "Cleopatterer"; the latter was sung by June Allyson in the movie *Till the Clouds Roll By*.

A composition by Chip Davis, *Impressions of Greek Mythology*, has the following sections:

- "Rhodes," inspired by the myth that on the island of Rhodes Helios "took the sun up every morning with his winged horse chariot," has sections entitled "Twilight;" "Night Festival" (using authentic ancient instruments, including a cithara made by the composer from a depiction on a sixth cen-

tury B.C. vase); "Sunrise" ("The god, Helios, readies his chariot to take up the sun from the crystal gates of the horizon of the ocean. The wings flap, the horses whinny in the clouds as the ocean disappears").

- "Come Home to the Sea," described by Davis as "about the joy and power of the ocean . . . as heard in the conversation between the two dolphins."
- "Olympics," which relates the games to the founding of the festival by Zeus or Heracles.
- "Nepenthe," indebted to the scene in the *Odyssey* in which Telemachus visits Menelaus and Helen and the pain-banishing drug *nepenthes pharmakon* is added to the wine.
- "Orpheus," with sections entitled "Descent into the Underworld" ("the seal on the gate pops with the hiss of the snake that bit Orpheus' wife"), "Dialog with the Devil" ("the little flute sound represents Orpheus asking questions answered by the fuzz guitar sound of the devil"), and "Ascent from Hell."
- "Sirens," divided into "Crash and the Call," "The Dance," "The Singing Contest" [with the Muses], and "Farewell."

A classic of new age music is *Missa Gaia (Earth Mass)* (1981) by Paul Winter. This work is inspired by universal ecological concerns (scientific, mythical, and spiritual) expressed by words and music in the religious context of the Christian Mass. It embodies freely traditional parts of the service (e.g., Kyrie, Sanctus, and Agnus Dei) with sections entitled "Return to Gaia" and "Dance of Gaia" in a modern celebration of the earth that highlights pagan connotations inherent in the classical Greek concept of all-embracing Gaia. The section "Return to Gaia" is described as a "dream fantasy, of seeing Gaia (the Earth) from space; inspired by the words of astronaut Rusty Schweichart, the first man to walk in space without an umbilical." Fr. Benedict Groeschel captures the spirit of the piece: "In choosing the words and format of the Mass, Paul Winter has done more than simply select a musical form familiar to western audiences. . . . [H]e means to bring together into a hymn of praise, music ancient and modern, drawn from the Catholic liturgy as well as primitive religion, music inherent in the sounds of earth's creatures, animate and inanimate. *Missa Gaia* is literally meant to be a call to worship addressed to all creation."²⁷

Rick Wakeman and Ramon Remedios have composed *A Suite of the Gods*, a collection of new age songs for tenor, keyboards, and percussion: "Dawn of Time," "The Oracle," "Pandora's Box," "Chariot of the Sun," "The Flood," "The Voyage of Ulysses," and "Hercules."

The American Musical. Among the classics we must certainly place *My Fair Lady* (1956) by Alan Jay Lerner and Frederick Loewe, another adaptation of the legend of Pygmalion via Bernard Shaw. Some other Broadway musicals that may

delight the heart of the classicist perhaps are not so widely known. This and other musicals that also appear in film versions are discussed in this section.

In 1923, Harry (Harold) Ruby composed *Helen of Troy*, with lyrics by B. Kalmar and a libretto by G. S. Kaufman and M. Connelly. Better known is the high-spirited musical by Richard Rodgers and Lorenz Hart, *By Jupiter* (1942), derived from Julian Thompson's play *The Warrior's Husband*, which starred Katharine Hepburn. The story is based on Hercules' ninth Labor, his quest for the magical girdle of Hippolyta, queen of the Amazons. On this expedition, as we know, Theseus joins Hercules and receives the Amazon Antiope as his share of the spoils. In *By Jupiter*, we are given a light-hearted picture of Hippolyta's queendom, where the women are rulers and warriors and the men take care of domestic duties. Among other things, the Greeks conquer the Amazons through the invincible power of love, and Sapiens (known as Sappy), the timid husband of Hippolyta, becomes the rightful king. Rodgers and Hart felt that this amusing treatment of the conflict between the Greeks and the Amazons had serious and timely things to say about relationships between men and women.

The musical *Out of This World* (1950) is a witty satire on the amatory pursuits of Jupiter by the master, Cole Porter. The plot bears some resemblance to the legend of Amphitryon, revolving as it does upon Jupiter's infatuation with a lovely American mortal. During previews in Boston, there was trouble with the censor because of the lyrics, thought to be too risqué; the scanty dress of the performers; and an evocative ballet sequence directed by Agnes de Mille. Despite striking visual effects and an excellent cast, *Out of This World* did not have a long run on Broadway. Nevertheless, both the score and the lyrics are vintage Cole Porter.

Another work on Amphitryon, *Olympus on My Mind* (1986), is an entertaining, lightweight musical comedy of no great consequence; the book and lyrics by Barry Harman were "suggested by" the *Amphitryon* of Heinrich von Kleist; music is by Grant Sturiale. Jupiter, Alcmena, Mercury, a slave Sosia, and his wife Charis offer plenty of humorous antics revolving around mistaken identities; they are assisted by an amusing chorus made up of Tom, Dick, Horace, and Delores.

Still another variation on the same theme is by Richard Rodgers, *The Boys from Syracuse* (1938), with lyrics by Lorenz (Larry) Hart and based on Shakespeare's *A Comedy of Errors*, which is reminiscent of Plautus' *Menaechmi* and *Amphitryon*. This lovely score and delightful romp (also made into a movie) revolves around a confusion about the twin Antipholuses, accidentally separated shortly after birth, and their twin servants, both named Dromio.

In this context must be mentioned *A Funny Thing Happened on the Way to the Forum* (1962), by Stephen Sondheim, who also wrote the book. Based upon various plays of Plautus, this musical is a clever, funny, and melodic amalgamation of all the basic archetypes and stereotypes (both in characterization and plot) of new comedy. Indeed, one of the very best Plautine comedies has been

created by Americans! As too often is the case, it seems miraculous that this classic of musical theater was ever produced. The stars, Zero Mostel and Phil Silvers, at first didn't want to do it (because it was "old shtick"); there was trouble with directors and writers, who withdrew for all sorts of reasons. The musical opened in New Haven to disastrous reviews but was a triumph on Broadway and became a superb movie.

Stephen Sondheim also wrote the score for *The Frogs*, Burt Shevelove's adaptation of Aristophanes' *Frogs* (1974) starring Larry Blyden and featuring, as Chorus members, Meryl Streep, Christopher Durang, and Sigourney Weaver, staged by the Yale Repertory Theatre in the Yale swimming pool.²⁷

The Happiest Girl in the World (1961) is based ("with a bow to Aristophanes and Bulfinch") very loosely upon the *Lysistrata*. The musical comedy becomes mythological indeed as a result of the inclusion of the deities Diana and Pluto. Although the essential idea concerning Lysistrata's scheme for ending the war by abstaining from sexual relations with the men remains firmly intact, this Lysistrata is no longer truly Aristophanic but merely "naughty but nice," in the spirit of the operettas of Offenbach; in fact a potpourri of Offenbach's tunes has been adapted to provide the musical score. The clever lyrics are by E. L. Harburg, famous for other musicals and, in particular, for the Academy Award-winning song "Over the Rainbow" from *The Wizard of Oz*.

One of the most creative of modern musical adaptations is *The Golden Apple*, designated significantly as a musical play. The text by John Latouche and music by Jerome Moross received great acclaim and indeed won the Drama Critics Award for the best musical of the 1953–1954 season. This colorful retelling of the legend of the Trojan War is set in the United States at the turn of the twentieth century and is both serious and comic—all in all, pure Americana. The scene is the small town of Angels' Roost (in the state of Washington, famous both for Mt. Olympus and for apples), where the rich old sheriff Menelaus has married Helen, a sexy and bored farmer's daughter. (The langorous ballad "Lazy Afternoon," sung by the original Helen, Kaye Ballard, was a highlight). The local heroes have returned from the Spanish-American War; and Ulysses, in particular, is happily reunited with his faithful wife, Penelope. A county fair and a church social are organized to celebrate the homecoming, and the women bring their cakes and pies to be judged in a contest. Jealous old Mother Hare contributes the golden apple ("symbol of our proud state of Washington"). Just in time, a young and attractive traveling salesman named Paris descends in a balloon to act as "impartial" judge and award the apple to Lovey Mars, wife of a military man and vehement about utilizing her flair for matchmaking.

Paris runs off with Helen to nearby Rhododendron, but Ulysses and his men track her down and send her home in disgrace. They themselves dally in the big city to face numerous temptations, among them Madame Calypso, a most scandalous hostess, and Circe, the woman without mercy who turns water into gin and men into swine. Of course, Ulysses realizes the folly of his ways and, like

the good American that he is, returns home a second time to his beloved Penelope, whom he surprises as she is busily at work in the company of her sewing bee.

In a different vein and musical style is another startlingly original conception, *The Gospel at Colonus* (1983), wherein Sophocles' play *Oedipus at Colonus* is successfully reinterpreted in the contemporary setting of an American gospel service. The text (often a close adaptation of the original) by Lee Breuer works in beautiful collaboration with the idiomatic score by Bob Telson. The agonized spirituality of the Greek play becomes transformed into a biblical parable of human fate and divine redemption that finds natural expression in the ecstatic intensity of black religious fervor. Among the many highlights is the incorporation of the most famous choral ode from Sophocles' *Antigone*, extolling the wondrous nature of man.

Ernest Ferlita's *Black Medea: A Tangle of Serpents*, a play with music and dance, opened at Audelco's Annual Black Theater Festival at the City University of New York (1987). More famous is *Marie Christine* (1998), a musical by composer-lyricist Michael John LaChiusa and director-choreographer Graciela Daniele, a quasi-operatic musical version of *Medea* set in the 1880s amidst the Creole society of New Orleans and the corrupt politics of Chicago. The transition of time and setting does not really work, and the weaknesses in the libretto and disappointing musical score make this *Medea* a pretty dull evening in the theater.

From reports it would be at least more entertaining, albeit less intellectual, to be able to see a revival of *Home Sweet Homer* (1974), a musical based on the *Odyssey*. Erich Segal (*Love Story*) wrote the book, and Mitch Lee (*Man of la Mancha*) wrote the music. It starred Yul Brynner, who toured in it cross-country for a year before it was scheduled to open on Broadway. Another musical comedy based on the *Odyssey*, *Fabulous Voyage* (1946) by Milton Babbitt, has never been produced at all, but in 1988 three songs from it were sung at Alice Tully Hall in New York City.

Finally, those of us who like comedy in music can enjoy the works of Peter Schickele, (b. 1935), alias P. D. Q. Bach (1807–1742)?: a cantata, *Iphigenia in Brooklyn*, and the hilarious *Oedipus Tex*, set in the Old West. This comic dramatic oratorio (1986) was later staged as an opera. Tex shoots some fellows riding on a rig, solves the riddle posed by Big Foot, and marries Billie Jo Casta. Also funny is a song by Tom Lehrer, "Oedipus Rex." Lehrer writes both the words and the music for his humorous songs for voice and piano.

MYTHOLOGY IN DANCE

This brief survey concentrates upon developments in the United States by major choreographers, who made a specialty of creating dances on Greek and Roman themes. European antecedents, however, have not been ignored; included in our listing of works are many of European origin that have been revived and adapted to become classics throughout the world.

ISADORA DUNCAN: PIONEER CHAMPION OF THE GREEK IDEAL

Isadora Duncan (1877–1927) was born in San Francisco. At a young age she became interested in the dance but soon rebelled against the strictures of classical ballet and the frivolities of the music hall to develop her own method of freedom and expression in dance movement, in tune with her artistic and spiritual response to nature. Her autobiography reveals her fundamental accord with the classical Greek spirit:

*I was born by the sea, and I have noticed that all the great events of my life have taken place by the sea. My first idea of movement, of the dance, certainly came from the rhythm of the waves. I was born under the star of Aphrodite, Aphrodite who was also born on the sea, and when her star is in the ascendant, events are always propitious to me.*²⁹

In Chicago in 1895, at age eighteen, Isadora danced for Charles Fair, manager of the Masonic Roof Garden, billed as “The California Faun.” Not long afterward in New York her appeal to the manager Augustin Daly confirms her conviction that she was transforming Greek dance into a new American expressiveness:

*I have discovered the dance. I have discovered the art which has been lost for two thousand years. You are a supreme theatre artist, but there is one thing lacking in your theatre which made the old Greek theatre great, and this is the art of the dance—the tragic chorus. Without this it is a head and body without legs to carry it on. I bring you the dance. . . . I am indeed the spiritual daughter of Walt Whitman. For the children of America I will create a new dance that will express America.*³⁰

Duncan was much attracted to the music of Ethelbert Nevin, a composer with whom she did concerts in New York but who died young. One of her important early Greek dances (1898) was *Narcissus*, choreographed to his music; a favorable review describes her performance:

*Narcissus is another charming bit of pantomime. The fabled youth is depicted staring at his own image in the water, first startled at its sudden appearance, then charmed, fascinated at his mirrored beauty. Becoming more and more enamored, the dancer leans forward, seemingly viewing herself from side to side, sending kisses to the liquid image, stepping across the shallow brook and still finding the figure reflected from its surface. The poetry of motion, the first start, the gradually growing conceit, the turning and bending, the ecstasy of delight at finding himself so beautiful are all most convincingly enacted by the pretty dancer.*³¹

Duncan gave other performances in New York, assisted by her sister and her brother Raymond, the latter reading selections from Theocritus and Ovid as an accompaniment to her dances, with music provided by a concealed orchestra. These were not so favorably received and, in 1899, the family went to London, hoping to find understanding. Duncan tells us:

. . . [W]e spent most of our time in the British Museum, where Raymond made sketches of all the Greek vases and bas-reliefs, and I tried to express them to whatever music

seemed to me to be in harmony with the rhythms of the feet and Dionysiac set of the head, and the tossing of the thyrsis. We also spent hours every day in the British Museum Library. . . .³²

Charles Hallé, director of the New Gallery, which had a central court and fountain surrounded by plants, flowers, and banks of palms, had the idea that Isadora should give three performances there, which included a dance to music from Gluck's *Orfeo* and illustrations in dance of passages chosen from the *Homeric Hymn to Demeter* and the *Idylls* of Theocritus, read by the Greek scholar and mythographer Jane Harrison and accompanied by a small orchestra. Also on the programs were discussions by the artist Sir William Richmond on dancing in its relation to painting, by the classical scholar Andrew Lang on dancing in its relation to the Greek myth, and by the composer Hubert Parry on dancing in its relation to music. A contemporary magazine article commented that from her time spent in the British Museum, Duncan analyzed and memorized "the steps and attitudes of the classic nymphs of antique art. Her work is thus the result of the application of poetic intelligence to the art of dancing, and her aim is to study nature and the classics and abjure the conventional."³²

Thus from the beginning, Duncan's attitudes and methods were established. She studied art in the museums of the world; became an ardent admirer and friend of the sculptor Rodin, as he was of her; and never lost her fervor for the Greek ideal. Her visit to Greece (1903–1904) was particularly ecstatic and she presented there (with ten Greek boys) a singing and acting rendition of Aeschylus' *Suppliants*; her art was religious, not a copy of but inspired by the art of ancient Greece. "Out of that has come my dancing, neither Greek nor antique but the spontaneous expression of my soul lifted up by beauty"; her purpose was not to imitate but to re-create the Greek ideal in herself "with personal inspiration: to start from its beauty and then go toward the future."³⁴ She toured Europe extensively but returned only once to the United States; she became closely associated with France and with Russia (she opened schools in Paris and in Moscow). Both her personal life and public career were turbulent and iconoclastic, and her triumphs were tempered by tragedy.

Duncan's legacy embraced her liberating influence from tradition; her creation of plotless or "pure" dances; her use of great music, especially symphonic music; her invention of expressive movements, as in her portrayal of the damned in *The Dance of the Furies*; and her employment of political, social, and moral themes, along with Greek mythology.³⁵ It is true that modern dance in the United States stems most directly from Duncan's pioneering contemporaries, Ted Shawn and Ruth St. Denis and their pupils, for example, Martha Graham. Yet these dancers and others were deeply influenced by Duncan. Revivals and re-creations of Duncan dances (for example, the *Three Graces* and *Cassandra*) have become popular.³⁶

TED SHAWN AND RUTH ST. DENIS

One of the many contributions of Ted Shawn (1891–1972) to American dance was his proud celebration of the male dancer; the all-men's company that he eventually founded was a realization of "the Greek ideal of the perfect body moving in strength, beauty, eloquence."³⁷ He tells with good humor of his brave fight against prejudice as he brought his dances inspired by Greece and Rome to Americans:

On the morning of January 2, 1914, I dropped off the train at Gallup, New Mexico, where I was to play a one-night stand with a company that carried my own name. . . . How would the male citizenry react to a man garbed in a flame-colored chiton as I would be that night when I performed my Greek dance? I formulated a dreadful answer. Behind the footlights I would be at the mercy of any cowpoke who chose to spatter lead on the stage while he yipped, "Dancer in the red nightshirt, boy. Dance." . . . My sudden panic was not as unreasoned as it may seem. . . . A fraternity brother in Denver, frankly appalled by my announced intention of becoming a dancer, had closed an impassioned harangue with a flat statement, "But, Ted, men don't dance." In vain I countered that men performed ritual dances in many countries of the world, that he and I together had enjoyed performances by Mikhail Mordkin, partner of Pavlova, and by Theodore Kosloff of the Gertrude Hoffman Company. "Oh, those people," he dismissed them with a shrug. He admitted, though grudgingly, that dancing might be all right for aborigines and Russians, but contended vehemently that it was hardly a suitable career for a red-blooded American male."³⁸

Shawn tells of other significant events in these early years. At a Long Beach studio in Los Angeles he made a movie for the Thomas A. Edison Company, *The Dance of the Ages*, based on a sketchy scenario: "I wrote a thread-thin dance history beginning in the Stone Age, progressing through the glorious ages of Egypt, Greece, and Rome into Medieval Europe, and ending with the contemporary dance of the United States."³⁹ Thus Greek and Roman themes appeared early in Shawn's repertoire. With Norma Gould, he gave ballroom exhibitions, which included a dance entitled *Diana and Endymion*.

In 1914 he met Ruth St. Denis (1877–1968) in her studio in New York; they were married on August 13. They coined the word *Denishawn*, which was used during their many years together to designate their schools and their company. Their first dance school was opened in Los Angeles. The composer Louis Horst was among those who joined them; he was their pianist-conductor for eight years. Among their many pupils who were to become distinguished pioneers in modern dance were Doris Humphries, Charles Weidman, and Martha Graham (she was one of the dancers in the Denishawn ballet *Soaring*, symbolizing Venus' birth from the sea foam).

Among the many Denishawn dances inspired by ancient Greece was *Greek Scene* (1918), choreographed by Ruth St. Denis, with music by Debussy and Gluck; its four parts indicate the frame of reference: *Pas de Trois*, *Greek Veil Plastique*, *Greek Dancer in Silhouette*, and *Dance of the Sunrise*. One of the more ambitious works of

Denishawn (with a cast of 170!) was a dance pageant (1916) that depicted first the customs and then the concepts of the afterlife in Egypt, India, and Greece. Shawn tells us about its hit number (for sixteen male dancers), the "Pyrrhic Dance:"

The first number I ever choreographed for an all-male ensemble . . . Pyrrhic dances which date from ancient Greece, originally were part of military training and symbols of victory. My interpretation was not a revival of the Greek classic form but an attempt to capture the spirit of the original. Sixteen men dancers, leaping and jumping with power, muscles, and virile strength, created an impact that thrilled the pageant's audiences and won paragraphs of newspaper praise. Many years elapsed before I formed my own group of men dancers but after the reception of the "Pyrrhic Dance" I always had in the back of my mind plans, choreographies, and dance themes suitable for men dancers.⁴⁰

Shawn's choreography for Aeschylus' *Persians* perhaps offers the best example of his devotion to his male dancers and his inspiration from ancient Greece. The first chorus of Aeschylus' play was danced and sung by twenty-five men. The music was by Eva Sikelianos, who taught the dancers to sing the text (in a new stark English translation) to her music, composed in an ancient Greek modal style. For Shawn this correct treatment of the chorus was an epic-making experience. The performers were all men, who sang with the power of men's voices in the open air as they danced and offered the "best example of what the real Greek chorus must have been like." A silent (very faded) film of this performance and a separate audiotape of Shawn's remarks are to be found in the Jerome Robbins Archive of the Dance Collection in the New York Public Library, Lincoln Center.

Shawn would do for the male dancer what Isadora Duncan had done for the female. In his own words he justifies fairly and succinctly the claim that he and St. Denis are the true father and mother of American dance:

The Denishawn Dancers filled all the requirements to be called a Ballet, and the first truly American Ballet: the Company were all American born, trained by Ruth St. Denis and myself, who were American born; we were the first dance company to give a program in which all the music was composed by Americans, the first to use indigenous themes for choreographic treatment (American square dance, cowboys, Indians, negro spirituals, the folk legends of America and dances about American historical characters). Costumes and decor were all designed and executed by Americans. . . . We had the courage to end Denishawn at its peak of success and world fame, so that we both could again be free to explore. . . . I set out to fight the battle of the legitimacy of dancing as a profession for men, and to form my company of men dancers. With the ending of Denishawn, I had bought an old farm house and barns in the Berkshire Hills in southwest Massachusetts, which place had been called for over a century: Jacob's Pillow. Here . . . I formed the company billed as "Shawn and his Men Dancers." . . . In 1942 [at Jacob's Pillow] the first theatre ever designed, built and used exclusively for the art of the dance opened its doors. . . .⁴¹

And now after Shawn's death, Jacob's Pillow, this American shrine to dance performance and education, continues to flourish and inspire year after year.⁴²

The following are more examples of classically inspired Denishawn dances, choreographed by Shawn:⁴³

- *Diana and Endymion* (part 4 of *Grecian Suite*), 1914.
- *Pan and Syrinx* and *The Pipes of Pan*, 1914. Music by Delibes.
- *Gnossienne* or *A Priest of Knossos*, 1919. Music by Erik Satie. Shawn, as a priest of ancient Crete, danced a ritual at the altar of the snake-goddess.
- *Death of Adonis* (or *Adagio Pathétique*), 1924. Music by Godard. "He performed nude (except for fig leaf), his body made up to simulate marble as he moved through a plastique."⁴⁴
- *Death of a God*, 1929. Music by Debussy. Shawn and fourteen dancers.
- *Les Mystères Dionysiaques*, 1920. Music by Massenet.
- *Orpheus*, 1928. Music by Liszt.
- *Prometheus Bound*, 1929. Shawn's "Prometheus is man of any age seeking to free himself of bondage."⁴⁵
- *Death of the Bull God*, 1929. Music by Griffes.
- *Orpheus Dionysus* (with Margarete Wallman, choreographer), 1930. Music by Gluck.
- *O, Libertad*, 1937 (after Denishawn). Ted Shawn and his Men Dancers. Music by Jess Meeker. A kind of history of the United States with a section on the Olympic Games.⁴⁶

MARTHA GRAHAM

Martha Graham (1894–1991) was one of the most original and American innovators in modern dance; she preferred to call it contemporary dance because "modern dance dates so quickly," as she observed in her autobiography, *Blood Memory*.⁴⁷ She explained her early and abiding fascination with Greek myth: "I remember how father used to recite stories to us from Greek mythology. My days would be filled with these tales, these word paintings. . . ." Eventually two preoccupations dominated her career: "My interest was in America and the women of classical Greece."⁴⁸ In 1914, while still in high school, she first saw Ruth St. Denis dance and she became enamored of this "goddess figure." In 1919 she enrolled in the Denishawn school in Los Angeles and made her debut, at age twenty-two, in the Denishawn dance pageant of Egypt, Greece, and India. In 1923 she left Denishawn to accept a role in the *Greenwich Village Follies*, and from there went on to evolve her own persona as an artist and a dancer. "I felt I had to grow and work within myself. I wanted, in all my arrogance, to do something in dance uniquely American."⁴⁹ Graham has influenced many important dancers, among them Doris Humphrey, nicknamed "Doric" Humphrey by the composer Louis Horst "because she was always doing Greek dances."⁵⁰

MARTHA GRAHAM AND JOSEPH CAMPBELL

A dancer in Martha Graham's company was Jean Erdman, wife of the famous mythographer Joseph Campbell. Graham had this to say about Campbell's influence:

*Joe was a luminous being in all our lives, one who opened gates to mysteries past through his knowledge and insight into the myths and legends that touch all civilizations. . . . He enabled us to treasure and to use the past and to recognize the blood memory within each of us. I have so often said that dance should illuminate the landscape of man's soul, and in my journey through that landscape Joe was a profound influence.*⁵¹

This concept of soul was vital to Martha Graham's vision; as opposed to the discoveries of science that "will in time change and perhaps grow obsolete . . . art is eternal, for it reveals the inner landscape, which is the soul of man."⁵²

A Graham dance inspired by mythology elucidates the myth from the point of view of the heroine; it is an exploration of the inner world of the feminine soul or, better, psyche, with all of the Freudian implications that this word evokes. Another vital element in her art was its sublime eroticism: "I know my dances and technique are considered deeply sexual, but I pride myself in placing on stage what most people hide in their deepest thoughts."⁵³ Graham's company, which she founded in 1926, is the oldest continuously performing American dance company, whose future, alas, is in jeopardy in the year 2002. Her first ensemble consisted of a trio of three women; this was expanded in 1929 to a larger all-female group; with the addition of permanent male dancers the company came into being in 1938.

Many important scores by prominent American composers were commissioned by Graham for her innovative dances.

One work choreographed by Graham and danced by three males, *Bas Relief* (1926, music by Cyril Scott), is influenced by the ancient world. Also, her dance *Tanagra* (1926), to music by Satie, confirms her early commitment to the Greek spirit; Louis Horst described the work: "An expression of a classical figure, performed with an effective use of draperies, it was the last dance still showing a definite influence of Denishawn background."⁵⁴ In addition to her works on Greek myth, many of Graham's dances have universal spiritual motifs that are significant for the classicist. A good example out of many is *Primitive Mysteries* (Hymn to the Virgin, Crucifixus, Hosanna, 1931; music by Louis Horst). This work "was not a piece about Catholicism exclusively, although she had spoken of Mary the Virgin when working on it with her dancers; rather it was a piece about religious feelings in general. . . ." This "Spanish-Indian brand of Christian ritual" could be classical; Graham was the Virgin or any "sacred ritual figure" of religious myth.⁵⁵ Another work, *Celebration* (1934; music by Louis Horst), which has no story, suggests things Greek. With reference to this work in particular, comments may be aptly framed in Greek terms about the "enlarged beings" of Graham's dances,

who “draw virtue and strength from a Dionysiac joy in movement.” Graham perfected her chorus of dancers as an ensemble and dramatic force so that they became the “inspired damsels of the Bacchae; Euripides would have understood.”⁵⁶

The list of dynamic and imaginative works for dance theater by Martha Graham solely on Greek themes is most impressive:⁵⁷

- *Night Journey* (1947). Music by William Schuman. Graham states in her notes: “. . . it is not Oedipus who is the protagonist. The action turns upon that instant of Jocasta’s death when she relives her destiny, sees with double insight the triumphal entry of Oedipus, their meeting, courtship, marriage, their years of intimacy which were darkly crossed by the blind seer, Tiresias, until at last the truth burst from him.” To enhance appreciation of Martha Graham’s genius one should read her own lengthy analysis of her “highly erotic dance” between Jocasta and Oedipus.⁵⁸ *Night Journey* provides the very best introduction to Graham’s art. It is concise, taut, and concentrated (about a half hour in length), and its stylized and simple sets by Isamu Noguchi enhance the intensity of the action: a bed, where Jocasta conceived and gave birth to Oedipus, their marriage-bed, and the setting for her suicide; and a rope, which in the episodes of the dance becomes the binding umbilical cord, the entangling thread of fate, and the noose of death.
- *Suite from Alceste* (1926). Music by Gluck. Danced by Graham, Trio, and five other dancers, including males.
- *Alceste* (1960). Music by Vivian Fine. The cast: Alceste, Thanatos, Admetus, Hercules, and thirteen dancers.
- *Errand into the Maze* (1947). Music by Gian Carlo Menotti. In her program notes Graham describes the work: “There is an errand into the maze of the heart’s darkness in order to do battle with the Creature of Fear [the Minotaur]. There is the accomplishment of the errand, the instant of triumph, and the emergence from the dark.”
- *Cave of the Heart* (1947). Music by Samuel Barber. Original title, *Serpent Heart* (1946). Barber notes that both he and Graham did not wish to make a literal use of the legend; the mythical Medea and Jason “served rather to project psychological states of jealousy and vengeance which are timeless.” Barber rearranged and rescored some of this material for an orchestral ballet suite (*Medea*) and then fashioned one continuous orchestral study of Medea herself (*Medea’s Meditation and Dance of Vengeance*).
- *Ekstasis* (1933). Music by Lehman Engel. A solo on the legend of Medea.
- *Clytemnestra* (1958). Music by Halim El-Dabh, whose score is operatic with a soprano and bass as narrators in concert dress. A full-evening tour de force in which the following characters appear: Clytemnestra, Aegisthus, Iphigenia, Electra, Cassandra, Helen of Troy, Agamemnon, Orestes, Hades, Paris, the watchman, ghost of Agamemnon, and Messenger of Death.

- *Electra* (1931). For the first time Graham appeared in a production of a legitimate play, produced by a company associated with the University of Michigan in Ann Arbor. Cast as The Dancer, Graham choreographed her three solos: Dance of the Fury, Lament over the Urn, and a final Dance to lead the chorus.
- *Dithyrambic* (1931). Music by Aaron Copland (piano variations). A barbaric solo dance expressing the passion of the dionysiac dithyramb.
- *Bacchanale* (1931) and *Bacchanale No. 2* (1932). Music (for piano, four hands) by Wallingford Riegger (1885–1961), who wrote many scores for the leading figures in modern dance in the 1930s.
- *Lucrece* (1932). A dramatic adaptation by André Obey of Shakespeare's *The Rape of Lucretia*, in which narrators recited the story while actors mimed; Graham was movement and staging consultant to Katharine Cornell and Guthrie McClintic for the production.
- *Tragic Patterns* (1932). Music by Louis Horst. *Three Choric Dances for an Antique Greek Tragedy*: Chorus for Suppliants, Chorus for Maenads, and Chorus for Furies. Also performed as a solo.
- *Cortege of Eagles* (1967). Music by Eugene Lester. Hecuba and Polymnestor are the central tragic figures; a list of the other principal dancers suggests the scope of the action: Andromache, Charon, Hector, Achilles, Priam, Polydorus, Paris, Helen, Astyanax, and Polyxena.
- *Phaedra* (1962). Music by Robert Starer. Cast: Phaedra, Hippolytus, Aphrodite, Artemis, Theseus, Pasiphae, and seven bull dancers.
- *Phaedra's Dream* (1983). Music by Crumb.
- *Andromache's Lament* (1982). Music by Samuel Barber.
- *Circe* (1963). Music by Alan Hovhaness. The characters are Circe, Ulysses, Helmsman, Snake, Lion, Deer, and Goat. The program notes explain: "The world Ulysses sees, in Martha Graham's adaptation of the myth of Circe, is his own: that inner world of bestialities and enchantments where one discovers what it costs to choose to be human."
- *Persephone* (1987). Music by Igor Stravinsky (Symphony in C). Program notes explain: "Demeter, Goddess of the Harvest, searches for her daughter Persephone, abducted into the Underworld. Until her return, the earth remains barren."

GEORGE BALANCHINE

George Balanchine (1904–1983), born in St. Petersburg, Russia, was trained in the Imperial Theater Ballet School, studied music at the Conservatory, was a member of the company of the State Theater of Opera and Ballet, and became the leader of an independent group of dancers called the Young Ballet. In 1924

he defected to western Europe, met the renowned impresario Serge Diaghilev, and was appointed ballet master of *Les Ballet Russes*, where he choreographed major works. In 1933, this talented artist steeped in Russian and European ballet tradition was brought to the United States by the wealthy American Lincoln Kirstein, who was determined to establish classical ballet in his own country. Thus the American Ballet and its School of American Ballet, and eventually Ballet Caravan, were formed under Balanchine's direction.

Balanchine, in the composition of his ballet *Apollon Musagète* for the first time, in 1928, had collaborated with Igor Stravinsky (1882–1971), who wrote the original score; Balanchine later described this collaboration as the turning point in his creative life. He was driven to develop for this twentieth-century score his own new concept of dance:

*His re-use of Goleizovsky's "Sixth position," in which the toes and the heels of the feet are touching, although "modern," held a suggestion of archaic Greek sculpture; there were syncopated movements and whole passages without a single classical ballet step.*⁵⁹

Apollo (the title from 1957) became a cornerstone of Balanchine's career in America. His American Ballet gave its premiere performance April 27, 1937, at the Metropolitan Opera in New York. The world premiere, however, was given in Paris in 1928 by Serge Diaghilev's Ballets Russes, with Stravinsky conducting. The work has been revised several times; in 1979 for a revival with Mikhail Baryshnikov, Balanchine eliminated nearly the first third of the score; his original version is very much to be preferred. After Leto's labor and the birth and youth of Apollo, two goddesses present him with a lute and teach him music. Apollo plays the lute and dances. The three Muses enter and Apollo presents each with an emblem of her art. Calliope receives a stylus and tablet and personifies poetry and rhythm; Polyhymnia represents mime; and Terpsichore, who combines poetry and gesture in dance, is honored by Apollo, who dances a solo variation and a pas de deux with her. Apollo and the Muses join in a final dance and ascend to Parnassus. Another landmark of Balanchine's neo-classicism was his *Orpheus*, again with music by Stravinsky, who, as he was writing the score, worked more closely than ever with Balanchine. After *Orpheus* had its premiere in New York, the City Center of Music and Drama felt compelled to invite Balanchine's Ballet Society to become its permanent ballet company. *Orpheus* was on the program of the inaugural performance of Balanchine's New York City Ballet on October 11, 1948. A brief summary of the action goes as follows: Orpheus weeps for Eurydice and friends sympathize; The Dark Angel leads Orpheus to Hades. Orpheus meets the threats of the Furies and the Lost Souls implore Orpheus to continue his song. Hades is moved; Orpheus' eyes are bound and Eurydice is returned to him. When Orpheus tears the bandage from his eyes, Eurydice falls dead. The Bacchantes attack and tear Orpheus to pieces. Apollo appears, wrests the lyre from Orpheus, and raises his song heavenward.

In 1957, again to music by Stravinsky, Balanchine choreographed a ballet entitled *Agon* (the Greek spelling of this Greek word for contest is actually used), which with *Apollo* and *Orpheus* was by intention to complete a Greek triad for performance by the New York City Ballet.⁶⁰

Finally we mention Balanchine's *Electronics* (New York City Ballet, 1961), with music by Remil Gassman in collaboration with Oskar Sala (for an electronic tape). In this dance, Zeus, Mercury, and the other Olympians rule in a space age of science fiction.

OTHER DANCE WORKS

- *God the Reveler* (1987). Choreographer, Erick Hawkins. Music by Alan Hovhaness. Erick Hawkins Dance Company. Dionysus battles unsuccessfully with death; after his entrails are eaten by Titans, he is reborn. The dance ends with a revel ("a kind of antique hoedown") for the god and his maenads and satyrs. Erick Hawkins (1909–1991), an important figure in American dance, has been deeply influenced by the Greeks (as well as by Zen Buddhism). He majored in classics at Harvard and worked with George Balanchine; he was the first male dancer to join Martha Graham's company in 1938, and she created some of her best male roles for him. He married Graham, and the ending of their marriage caused her much unhappiness.
- *The Minotaur* (1947). Choreographer, John Taras. Music by Elliott Carter. Ballet Society, New York. Lincoln Kirsten invited Carter to write the score and Balanchine helped adapt the story for the stage. Motives reflect fragments of ancient Greek music, for example, the Epitaph of Seikilos and the hymns to Apollo inscribed on the Delphic Treasury of the Athenians. The dance is in two scenes: King Minos' Palace in Crete; and Before the Labyrinth. Among the episodes depicted are the following: Queen Pasiphaë dances frantically with the sacred bull; Pasiphaë's heartbeat becomes the pounding of hammers used in the building of the Labyrinth amidst the howling of their offspring, the Minotaur, who is to be imprisoned; various dances go on to depict Ariadne's love for Theseus, her help in the killing of the Minotaur, and her abandonment. Carter composed an abbreviated version of his score, *The Minotaur, Suite from the Ballet*.
- *Ovid, Metamorphoses* (1958). Choreographer, Herbert Ross. Music by Arnold Schönberg (*Sonata for Violin and Piano*). American Ballet Theatre Workshop. Cast: Io and the Cloud, Narcissus and Echo, Daphne and Apollo, Calpurnia, Caesar, and Venus.
- *Ulysses' Bow* (1984). Music by John Harbison. Sections are entitled Prelude: Premonitions; Ulysses' Return; Ulysses and Argos; The Suitors; While the Suitors Sleep; Penelope; Penelope's Dream; The Trial of the Bow;

The Ritual of Purification; Reunion. The work is the second part of an evening-length ballet, yet to be staged; the first part is called Ulysses' Raft, and it uses the same themes and structure. The composer first wanted to tell this story as a dance piece while watching a televised performance of Monteverdi's opera *Il Ritorno d'Ulisse in Patria*. Harbison was attracted to the scenes, which were to him "visually indelible" and "scenically extraordinary."

- *Achilles Loved Patroclus* (1993). Choreographer, Bill T. Jones. Music by John Oswald. A solo dance.
- *The Bull Dancers* (1963). Choreographer, Lawrence Gradus. Music by Jacques Ibert (*A Louisville Concerto*). American Ballet Theatre Workshop. Events in the bull arena leading up to Theseus' slaying of the Minotaur.
- *Judgment of Paris* (1940). Choreographer, Antony Tudor. Music by Kurt Weill (selections from *Die Dreignoschenoper*). American Ballet Theatre. World premiere, London Ballet (1938). In this comic ballet, a drunken Englishman must choose among three Parisian prostitutes. Video: Anthony Tudor. A Dance Horizons Video. In a brief section Agnes de Mille expresses her delight in the role of Venus.
- *The Moirai* (1961). Music by Hugh Aitken. The José Limón Dance Company.
- *Diana and Actaeon*, a pas de deux (1973). Choreographer, Rudolf Nureyev, from the original by Agrippina Vaganova. Music by Cesare Pugni, arranged by John Lanchbery. American Ballet Theatre. Video: World premiere of Nureyev's staging (taped for television), NBC, 1963, with Nureyev and Svetlana Beriosova.
- *Antigone/Rites for the Dead* (1989). Film: Eclipse Productions. Amy Greenfield, Producer/Director. Various composers. Bertram Ross (Oedipus) and Janet Eilber.
- *Persephone* (1991). Choreographer, Ralph Lemon. Music by Anthony Davis (*Maps, Violin Concerto*). Ralph Lemon Dance Company. The myth of Demeter and Persephone.
- *Orpheus Portrait*, a pas de deux (1991). Choreographer, Kent Stowell. Music by Liszt. Pacific Northwest Ballet.
- *Nymphs and Satyr*. Music by Howard Hanson, who from the score composed a ballet suite (1979). The ballet was premiered by the Chautauqua Ballet. The music, adapted from an earlier sketch for a solo clarinet fantasy, reveals the composer's personal style of bucolic tone painting. The ingratiating melody of the Scherzo originated in a tune Hanson improvised as he sang to his Irish terrier Molly and offered her dog biscuits. He provides a synopsis of the work in the notes to the recording (Bay Cities BCD-1005): "Destiny moves the nymphs on a journey. As they travel they

express their joy of life. Satyr is touched on the shoulder by Destiny and he joins the nymphs in their expression of happiness. At the end, Satyr is left alone, contemplating life and friendship."

- *The Sphinx* (1951). Choreographer, David Lichine. Music by Henri Sauguet. Originally *La Rencontre* (Les Ballets des Champs-Élysées, Paris, 1948). Oedipus solves the riddle of the Sphinx.
- *The Relativity of Icarus* (1974). Choreographer, Gerald Arpino. Music by Gerhard.
- *Icarus at Night* (1991). Choreographer, Christopher Gillis. Music by Brahms (*String Sextet No. 1*). Paul Taylor Dance Company.
- *Icarus* (1964). Choreographer, Lucas Hoving. The José Limón Dance Company. A classic of the modern dance, performed by several companies, including the Alvin Ailey American Dance Theater.
- *Dionysus*, a dance film (1963). Film-maker's Corp., Charles Boultenhouse, producer/director. Music by Teiji Ito. The portrayal of the psychology of the Euripidean characters is enhanced by photographic tricks; Louis Falco as Dionysus, Anna Duncan as Agave, and Nicholas Magallanes as Pentheus.
- *Dido and Aeneas* (1989). Choreographer, Mark Morris. Music by Purcell (*Dido and Aeneas*). A performance of the complete opera (both words and music) is used as the ballet score. The controversial Morris dances the roles of both Queen Dido and the Sorceress!
- *L'Amour et son Amour*. Choreographer, Jean Babilé. Music by César Frank (*Psyche*). Scenery and costumes by Jean Cocteau. American Ballet Theatre (1951). World premiere, Les Ballets des Champs-Élysées, Paris (1948). The story of Cupid and Psyche.
- *Helen of Troy* (1942). Choreographer, David Lichine. Music by Jacques Offenbach (*La Belle Hélène*, arranged by Antal Dorati). American Ballet Theatre. A comic version of the Trojan War, employing the score and décor of the version by Michel Fokine, but completely different in choreography and treatment. Cast: Helen, Paris, Menelaus, Zeus, Calchas, Aphrodite, Athena, Hera, Hermes, and Hymen.
- *Afternoon of a Faun* (1941). Choreographer, Yura Lazovsky, from the original by Vaslav Nijinsky. Music by Claude Debussy. American Ballet Theatre. Originally *L'Après-midi d'un Faune* (Les Ballets Russes de Diaghilev, 1912).
- *The Transformations of Medusa*. In *The Jean Erdman Video Archives, vol. 1: The Early Dances* (1989), which presents re-creations of Erdman's work after she left the Martha Graham Dance Company; also included is a dance entitled *Hamadryad*.

- *The Stone Medusa* (1969). Choreographer, Richard Elis. Music by Hector Villa-Lobos (*Uirapura*, Symphonic Poem). The Illinois Ballet performs this dance about Medusa, based on the myths of both Medusa and Pygmalion. Video by Orion Dance Films.
- *Medea* (1979), a ballet from the Soviet Union. Choreographer, Georgiy Aleksiz. Music by Revaz Gabichvadze. Offers a more traditional version danced by a Russian cast; available on video.
- *Medea* (1780), ballet d'action by Jean Georges Noverre, the father of modern ballet, has been re-created for today, staged and choreographed by Judith Chazin-Bennahum and presented by the University of New Mexico Department of Theater and Dance with a chamber ensemble in full period costume of the eighteenth century and accompanied by sixteen musicians. The Dance Horizons Video includes the documentary *Recreating Medea* by Mariel McEwen.
- *Daphnis and Chloe* (1982). Choreographer, Graeme Murphy (The Sydney Dance Company). A provocative and daring production, not least of all because of its frank sensuality. The scenario is based on the novel by Longus, and the famous score is by Maurice Ravel. On video.
- Birgit Akesson, a noted Swedish dancer, choreographed several mythological ballets for the Royal Swedish Ballet, including *Sisyfos* (1957), *Minotaurus* (1958), *Ikaros* (1963), and *Nausikaa* (1966).
- The famous Danish choreographer, Flemming Flindt, created for the Dallas Ballet a powerful *Phaedra* (1986), based on Euripides. The score by Philip Glass is most effective.

MYTHOLOGY IN FILM

This brief survey concentrates on movies that seem to be available, particularly on videotape, videodisc, or DVD, which may be judged of some interest and significance. Even the most casual perusal of films that deal with the ancient world reveals an impressive number of treatments. We omit with regret the many adaptations of Greek and Roman history, legendary or otherwise, but begin by mentioning one in this genre because of its mythological and musical interest: *Seven Brides for Seven Brothers* (directed by Stanley Donen, 1954), a gem of a Hollywood musical, based very loosely upon the accounts by Plutarch and Livy of the rape of the Sabine women in the early saga of Rome and reset in the American Old West (from *Sobbin' Women* by Stephen Vincent Benet). The dances are choreographed by Michael Kidd, the songs are by Johnny Mercer, and the stars are Howard Keel and Jane Powell, joined by dancers including Tommy Rall and Jacques d'Amboise.

Everyone should enjoy the movie versions of two musicals discussed earlier that derive from Plautus: Rodgers and Hart's *The Boys from Syracuse* (1940),

starring Allan Jones and Martha Raye and directed by Edward A. Sutherland, which includes a spirited chariot race finale and an added song, "The Greeks Have No Word for It"; and the delightful *A Funny Thing Happened on the Way to the Forum* (1966), for which Stephen Sondheim wrote both the music and the book, starring Zero Mostel and Phil Silvers and directed by Richard Lester.

Lerner and Loewe's *My Fair Lady* (1964) is also a musical delight, particularly for Rex Harrison's Professor Henry Higgins. The play upon which it is based, George Bernard Shaw's *Pygmalion*, may also be enjoyed in its classic movie version (1938), starring Leslie Howard and Wendy Hiller.

The Broadway musical by Kurt Weill, *One Touch of Venus* (1948), based on *The Tinted Venus* by F. Annstey and adapted by S. J. Perelman and Ogden Nash, has been considerably modified for the screen; yet it remains amusing enough as it tells about a statue of Venus (Ava Gardner) in a department store that comes to life and falls in love with a window dresser (Robert Walker).

The powerful *Gospel at Colonus* (discussed in the previous section) is another musical now available for viewing; this is a piece that definitely should be seen and not just heard.

Performances of dance, some of which are on film, are discussed in the previous section. Operatic performances are also available on video. Of note are Tippett's *King Priam* (Kent Opera) and two Glyndebourne Festival Opera productions, Gluck's *Orfeo ed Euridice* (with Janet Baker) and Monteverdi's *Il Ritorno d'Ulisse in Patria*.

A contemporary version of Gluck's *Orfeo ed Euridice*, staged by Harry Kupfer (The Royal Opera House, Covent Garden), has Orpheus sung by a male alto, Jochen Kowalski, in leather jacket and with electric guitar, pursuing his Eurydice, who has died in a car accident. Yet another video, this time the French version of Gluck's opera, is conducted by John Eliot Gardiner and directed by Robert Wilson. From the same conductor and director comes a performance of Gluck's *Alceste*, starring Anne Sofie von Otter. Three interpretations of Strauss's *Elektra* have been filmed, one from the Metropolitan Opera with Birgit Nilsson in the title role and Leonie Rysanek as Chrysothemis, another (directed by Götz Friedrich and shot on the outskirts of Vienna amidst filth and rain) with Leonie Rysanek as Electra and Karl Böhm conducting the Vienna Philharmonic, and a third starring Eva Marton with the Vienna State Opera conducted by Claudio Abbado. We also have a choice of two performances of Mozart's *Idomeneo*, one from Glyndebourne and one from the Metropolitan Opera, the latter starring Luciano Pavarotti, in a production by the controversial Jean-Pierre Ponnelle. *Ariadne auf Naxos* from the Metropolitan Opera stars Jessye Norman. Norman also appears as Cassandra in the Metropolitan's production of Berlioz' *Les Troyens*, in a cast that includes Plácido Domingo as Aeneas. Finally, Offenbach's delightful operetta, *La belle Hélène*, is available, conducted by Nikolaus Harnoncourt.

THE TROJAN WAR

It may surprise all but the die-hard movie buff that many films inspired by Greece and Rome were made between the years 1888 and 1918. We shall begin, however, with *Helen of Troy*, produced by Warner Brothers in 1955, with Rossana Podesta as Helen and a musical score by Max Steiner. This epic is lavish in its production but, alas, weak in its script. Of a much lower caliber are two other cinematic treatments: Steve Reeves as Aeneas in *The Avenger*, also titled *Last Glory of Troy*; and *Colossus and the Amazon Queen* (1964), with Rod Taylor, Dorian Gray, and Ed Fury, a tale about two veterans of the Trojan War and their encounter with the Amazons; the main virtue of this romantic comedy is that its humor is intentional.

ROMAN LEGEND

Gate of Hell (director, Hiroshi Inagaki, 1955) is a tragedy of a warrior's desire for a married noblewoman set in twelfth-century Japan and based on the rape of Lucrece. It won an Academy Award for the best foreign film of 1954.

In a much lighter vein is *Jupiter's Darling*, starring Esther Williams and Howard Keel and directed by George Sidney, an amusing musical about Hannibal based on Robert E. Sherwood's play *Road to Rome*. Equally mythological is *Roman Scandals*. A fellow from Oklahoma (Eddie Cantor) dreams his way back to an ancient Rome that enjoys Busby Berkeley musical numbers.

In addition to the Hollywood grand epics, countless movies of lesser stature dealing with early legendary Rome are available, for example, *Romulus and Remus* and Roger Moore in *The Rape of the Sabines*.

ULYSSES AND THE ODYSSEY

Ulysses (1954), an Italian film with English dialogue, has rightly received critical acclaim for its cinematic techniques and performances by Kirk Douglas (as Ulysses) and Silvana Mangano, who offers haunting portrayals of both Penelope and Circe. Viewers may judge for themselves the highly acclaimed Hallmark made-for-television movie *The Odyssey* (1997). For us it was a disappointment. Armand Assante set the tone by making the hero a bore; Bernadette Peters as Circe played Bernadette Peters; beautiful Isabella Rossellini, who should have been an ideal Athena, forgot she was a goddess and became the chum next door; and so on. The great actress Irene Papas as Anticlea did her valiant best with the banal script in these surroundings. Yet a very campy Hermes added a brief moment of relief and some visual effects were impressive, for example, angry Poseidon and the sea.

A contemporary, topical, and yet mystical reuse of the Odysseus' theme has been made by the distinguished Greek director Theo Angelopoulos. In *Ulysses'*

Gaze (1995). Mr. A (played by Harvey Keitel), a famous Greek-American director, returns to Greece and the Balkans in search of the lost films of the pioneering Manakia brothers, which they made in 1903. His personal and professional odyssey, which crisscrosses the Balkans and culminates in war-torn Sarajevo, involves many powerful and poetic episodes, including his encounters with women, and juxtaposes present and past in provocative images. Hailed as a masterpiece and condemned as pretentious and tiresome, this epic movie (almost three hours long) contains much beautiful and evocative cinematography. *O Brother, Where Art Thou* (2000), a comedy with American folk and traditional music directed by Joel and Ethan Coen, is very loosely but brilliantly based on the *Odyssey*; George Clooney (Ulysses), John Turturro, and Tim Blake Nelson are escapees from a chain gang in the South during the Depression of the 1930s. Their encounter with the Sirens is particularly funny, amidst many amusing, thought-provoking, and heart-warming scenes.

HERCULES

There are several movies about the hero Hercules; some freely manipulate legendary material, while others (e.g., *Hercules and the Moon Men*) make little or no attempt to remain faithful to antiquity. Although these films are of dubious quality, two are worth mentioning: *Hercules* (1959) and *Hercules Unchained* (1959), both starring bodybuilder Steve Reeves, attempt to recapture aspects of the original legend and offer a modicum of entertainment, if one is not too discriminating. *The Three Stooges Meet Hercules* is a very funny screwball comedy for those who like this sort of thing. In the world of Heracleian films, the popular television series *Hercules: The Legendary Journeys*, starring Kevin Sorbo (with Anthony Quinn as a bumbling Zeus), however juvenile at times, deserves credit for some clever reworking of material that is still recognizably classical and for employment of certain stunning special effects. Some of the titles are *Heracles: In the Underworld*, *The Circle of Fire and the Amazon Women*, and *The Lost Kingdom*. There is also *The Xena Trilogy*, recounting the adventures of Hercules (Sorbo again) with “the beautiful and deadly princess Xena”: *The Warrior Princess*, *The Gauntlet*, and *Unchained Heart*. Disney’s movie *Hercules* (1997) provides good family entertainment and animation that is clever, for example, friezes and vase-paintings that spring delightfully to life. This is myth-making of independent spirit, a takeoff and transformation of the character bearing the unique creative stamp of Disney, like it or not. Disney fans should consult the beautiful and informative book *The Art of Hercules: The Chaos of Creation*.⁶¹

JASON AND THE ARGONAUTS

An important mythical adaptation, *Jason and the Argonauts* (1963, directed by Don Chaffey), is especially noteworthy for its exciting special effects by Ray

Harryhausen and a musical score by Mario Nascimbene, conducted by Bernard Herrmann. Well worth seeing and whatever its faults (among them the performance of a Medea weakened by the screenplay), this movie seems like a masterpiece when compared to the TV version, *Jason and the Argonauts* (2000), in which the role of Medea is by no means its greatest weakness. The Jason (Jason London) is an expressionless youth who acts like a zombie; in fact almost the whole cast (several of them of some repute) exhibits a blank lethargy of non-acting (or is it bad acting?) that is oppressive. The legend is drastically transformed and often one is pressed to ask, "Why not leave well enough alone?" The Argonauts become a grubby and motley crew and include one woman, Atalanta, of course in love with Jason. Special effects are unimpressive, when not ludicrous—the best being the Harpies who plague Phineus in his home (a beehive tomb!); the most wrong-headed, Poseidon, the god portrayed as a monstrous and ugly giant. The lout Heracles does not leave the expedition early and forms a special bond with Jason (no Hylas here!). The vacuous and limp direction is by Nick Willing, who cannot even control incorrect and inconsistent pronunciation of names (a failing far too common generally today). The highlight (or lowlight) of this travesty occurs when Orpheus gives the name of his wife in Italian (shades of Gluck!)

THE PLAYS OF EURIPIDES

Artful and compelling is the controversial Italian film *Medea* (1970), directed by Pier Paolo Pasolini. Bold in its depiction of the bloodier and more brutal elements and fraught with interpretive insight, it is by no means confined to the events of Euripides' play but includes the essential episodes in the entire tragedy of Medea and Jason. Particularly astonishing is the depiction of the archetypal, ritualistic sacrifice of the young male to ensure Mother Earth's fertility and the renewal of the crops. For many, the major asset of this movie is opera star Maria Callas, who offers her only nonsinging cinematic appearance as Medea.

Another adaptation of the Medea story, *A Dream of Passion* (1978), directed by Jules Dassin, presents the tragic and harrowing study of a modern-day Medea in Greece, played most realistically by Ellen Burstyn. In addition, Melina Mercouri convincingly portrays an aging actress who is engaged in a performance of the *Medea* of Euripides. Thus this gripping film also offers, among its many riches, scenes from the play, in both modern Greek and English. The American poet Robinson Jeffers wrote an artful adaptation of Euripides' *Medea* in 1947; Judith Anderson created the title role, and her striking performance is preserved. A revival of Jeffers' play starring Zoe Caldwell, also a fine Medea (with Judith Anderson as the nurse), is also available in its Kennedy Center production (1983). From Sweden comes a *Medea* (1963) directed for television by Keve Hjelm, and for Danish television the enigmatic director Lars von Trier created a beautifully stark and powerful interpretation in his version of Euripides (1987), based on a

script by Carl Theodor Dryer; the chilling horror of the murder of the children is devastating. Startling, to say the least, is a production of *Medea* by the New York Greek Drama Company in the original Greek of Euripides, with English subtitles; the actors wear masks, and William Arrowsmith provides introductory comments that tell us why we should appreciate this strange attempt at authenticity.⁶²

The highest standard for the filming of Euripidean plays has been set by the Greek director Michael Cacoyannis: his *Electra* (1962), with Irene Papas; *The Trojan Women* (1971), with Katharine Hepburn, Vanessa Redgrave, and Irene Papas; and *Iphigenia* (1977), with Irene Papas, should not be missed. Each of these movies is a masterpiece in its own way, full of passion and meaning for today. The performance of Papas in all three is outstanding: she is totally different and thoroughly convincing in the diverse roles of Electra, Helen, and Clytemnestra. The genius of Cacoyannis becomes all the more evident in comparison with a movie like *Bacchantes*, directed by George Ferroni—an embarrassing travesty of Euripides to be avoided by all but the insatiably curious.

A video (offered by Creative Arts Television), *Andre Serban: The Greek Trilogy* (1974), presents excerpts from the experimental productions, off Broadway, of this flamboyant director: Euripides' *Electra*, *Medea*, and *The Trojan Women*.

Of great interest is the movie of Eugene O'Neill's *Desire under the Elms* (1958); this version of the Hippolytus legend, set in New England, also combines thematic elements from the legends of Oedipus and Medea; Anthony Perkins, Sophia Loren, and Burl Ives give strong performances. Anthony Perkins is also the Hippolytus figure in a modern adaptation of *Phaedra* (1962), directed by Jules Dassin and also starring Melina Mercouri. Although heavy-handed and at times absurd, this movie has some power.

OEDIPUS AND ANTIGONE

Sophocles' *Oedipus the King* is presented in the ancient Greek theater of Amphiaraiion, with the actors wearing masks. James Mason plays Oedipus; Claire Bloom, Jocasta; and Ian Richardson, Tiresias. This abridged performance includes narration by Anthony Quayle. Among other performances of *Oedipus the King*, a version directed by Tyrone Guthrie (1957) should be singled out. This film of a performance of the Stratford Shakespearean Festival Players of Canada employs William Butler Yeats' translation. Although not entirely a cinematic success, its professionalism and its use of striking masks are of great interest. A strong British version (1967), starring Christopher Plummer, Orson Welles, and Lilli Palmer, makes more of an attempt to transform the play into a movie.

The film by the Italian director Pier Paolo Pasolini, *Oedipus Rex* (1967), includes many unforgettable episodes from the saga, for example, the brutal exposure of the infant Oedipus and later his youthful and bloody encounter with his father; such amplifications reveal psychoanalytic insight and a personal and

modern vision. One of the finest productions of all three Theban plays of Sophocles (*Oedipus the King*, *Oedipus at Colonus*, and *Antigone*) was done for BBC Television, in a new translation by the director Don Taylor, with a cast that includes John Gielgud, Claire Bloom, and Anthony Quayle, all of whom are superb. A movie version of *Antigone*, written and directed by George Tzavellas, in Greek with English subtitles, has the incomparable Irene Papas in the title role as its greatest strength. A production of Jean Anouilh's *Antigone* for *Great Performances* on PBS Television, starring Genevieve Bujold, Stacy Keach, and Fritz Weaver, may be obtained from Broadway Theatre Archive. *Antigone: Rites of Passion*, a powerful movie by Amy Greenfield, adds a wonderful dimension of music and dance to the drama.

Not to be ignored is *Oedipus Wrecks*, one of three short films included in the movie *New York Stories*, directed by and starring Woody Allen, about a fifty-year-old neurotic lawyer tormented by the specter of his nagging mother.

THE ORESTEIA

An unusual production of Aeschylus' *Oresteia*, by the National Theatre of Great Britain, directed by Peter Hall, employs both a new rhyming translation by Tony Harrison and the stylized use of masks; although in many ways dramatically intense and well worth seeing, the overall conception verges at times on the monotonous. Of historic and histrionic importance is the movie version (1947) of Eugene O'Neill's American *Oresteia*, *Mourning Becomes Electra*, particularly for the performances (very much in the grand manner) of Katina Paxinou and Michael Redgrave, but Rosalind Russell is miscast as Electra. A production of the play for *Great Performances* on PBS Television, starring Bruce Davison, Joan Hackett, and Roberta Maxwell is fortunately available from The Broadway Theatre Archive. The Italian director Pier Paolo Pasolini recounts his preparations for a film made in Africa of a modern version of the *Oresteia* (which he never lived to complete) in *Notes for an African Orestes*; he documented local rituals and searched local villages in Uganda and Tanzania for likely candidates and situations for the filming. This is a study of specialized interest, to be sure, even though it attempts, not always successfully, to illuminate many parallels between political and social issues in the ancient trilogy and those of Africa in the twentieth century.

ORPHEUS

Among the more significant treatments of ancient mythology are modern retellings of the Orpheus legend. The problematic but arresting play *Orpheus Descending*, by Tennessee Williams, has become a noteworthy film (under the title *The Fugitive Kind*), thanks to its stars, Marlon Brando, Anna Magnani, Joanne Woodward, Maureen Stapleton, and Victor Jory. The words of Marlon Brando in the brief opening scene of the movie speak volumes. The name of this

Orpheus sounds like Savior, he wears a snake-skin jacket to attest to his underworld connections, and he is devoted to his guitar, "a life-long companion."

The Brazilian *Black Orpheus* (1959), directed by Marcel Camus, with a relentless but compelling musical score by Antonio Carlos Jobim and Luis Bonfá, which sets the myth in Rio at carnival time, has deservedly won critical acclaim and popularity. Indeed, it attests to the universal humanity of the myth that transcends race, color, locale, and time. Also from Brazil comes *Orfeu*, directed by Carlos Diegues, about the love of a famous musician, with an added milieu of drugs and gangs and its own arresting soundtrack by Caetano Veloso. Both movies are based upon the play by the Brazilian Vinicius de Moraes. Also, everyone should experience more than once the exciting and evocative *Orphée* (1949) of Jean Cocteau, a landmark in the history of the cinema. He reshapes the myth in a setting in Paris on the Left Bank in the 1940s. This Orpheus is in love with Death, named The Princess, and his entrance to the Underworld is through a mirror. Cocteau's obsession with the Orphic archetype appears in his last movie, *Le Testament d'Orphée* (1959), which offers plenty of mythological allusion. Along with these two, his first movie (1930), *The Blood of a Poet*, which explores themes of artistic creation, poetry, death, and rebirth in sequences of dreamlike imagery, makes up what may be called Cocteau's Orphic trilogy. The DVD release of this trilogy includes many priceless bonuses, including transcripts of Cocteau's insightful essays for each movie and two illuminating documentaries. Mirrors, through which we see the ravages of time, and the stealthy approach of death are recurrent images reflecting his fascination with death and the interplay of dreams and reality.

VARIOUS THEMES

The legend of Perseus has received imaginative and entertaining treatment in *Clash of the Titans* (1981), with a star-studded cast including Harry Hamlin, Laurence Olivier, and Maggie Smith. Despite its misleading title, this movie has many strengths that have not always been justly appreciated, among them a chilling decapitation of Medusa (imaginatively set in the Underworld),⁶³ an exhilarating depiction of the flying horse Pegasus, and the addition of Bubo, a mechanical owl straight out of science fiction. Special effects are by Ray Harryhausen (who surpasses his splendid work for *Jason and the Argonauts*), and the stirring music is by Laurence Rosenthal. Not in the same class is *The Gorgon*, a horror vehicle for Peter Cushing and Christopher Lee. For those interested in the humorous, the historic movie of Max Reinhardt's production of Shakespeare's *A Midsummer Night's Dream* (1935) has James Cagney as Pyramus and Joe E. Brown as Thisbe and may be compared to a more recent version (1968) with a stellar British cast. In *Seven Faces of Dr. Lao* (1964), an elderly Chinese man in a circus (Tony Randall) is a master of disguises who gives us a vision of Medusa and Pan. *Time Bandits* (1981) has as one of its sequences an episode with

Sean Connery playing Agamemnon. The episode "Who Mourns for Adonais" from the television series *Star Trek* presents Apollo, as the last of the Olympian gods, who demands to be worshiped.

We find a modern depiction of a muse in three movies: *The Muse* (1999), directed by Albert Brooks, with Sharon Stone, an extravagant and eccentric muse who makes extraordinary demands upon a screenwriter in return for the creative inspiration she can bestow; *Down to Earth* (1947), directed by Alexander Hall, with Rita Hayworth as the muse Terpsichore, who comes to earth to make a Broadway producer fix a new musical because she is irate that she is portrayed as too modern and sexy; and *Xanadu* (1980), directed by Robert Greenwald, a remake of *Down to Earth* as a vehicle for Olivia Newton-John, a muse who, this time, helps two friends open a roller disco (Gene Kelly also stars).

In *The Midas Touch* (1997), directed by Peter Manoogian, a twelve-year-old boy who is granted his wish to have the Midas touch; a Hungarian movie with the same title (1989), directed by Geza Bereményi, tells the story of a flea merchant who possesses the golden touch.

Cupid (Costas Mandylor) comes to earth and falls in love in the romantic *Love Struck* (1997). In an even more lightweight movie, Vanna White proves that she cannot act, as Venus in *Goddess of Love* (1988). Woody Allen's *Mighty Aphrodite* (1995) offers amusing testimony of the power of love, along with a parody of Greek tragedy. Much more serious, horrifying, and certainly not for everyone is *Ted and Venus* (1992), directed by Bud Cort, who also plays Ted, about a misfit who ardently pursues the woman of his dreams (an allegorical Venus).

We are all enriched by meaningful and stimulating cinematic treatments of mythology and legend; and in our search for movies on Greek and Roman themes, those that deal with comparative thematic material should not be forgotten. The film *Dragonslayer* (1981), for example, which is based on Anglo-Saxon myth, exploits one of the most dominant themes in all mythology. *The Wicker Man* (1973) presents with chilling insight an archetypal pattern of demonic ritual and human sacrifice. The popular movies about Superman and Tarzan certainly can be related to the archetypes of classical saga. *Superman* (1978, the first of the series with Christopher Reeve) presents a disarming variation of the patterns in the birth, childhood, and adventures of a hero; and the version of the Tarzan legend called *Greystoke* is of particularly high caliber and worth mentioning not only for its own sake but also for the opportunity to point out that Tarzan has been identified as an Odyssean type of hero.⁶⁴ There is something of the *Iliad* (emotionally and spiritually) in the heroic sadness and epic devotion of *The Deer Hunter* (1978), and the protagonist of *Angel Heart* (1987) suffers in his ignorant guilt like an Oedipus. *Voyager* (1991) too is profoundly Greek in its mood and intensity because of its themes of family, incest, and fate; also steeped in the atmosphere of Greek tragedy is *Jean de Florette* (1987), as is made overtly clear in the dialogue of its equally fine sequel *Manon of the Spring* (1987). *Pretty Woman* (1990) is yet another metamorphosis of Pygmalion's Galatea; *She's All*

That (1999) presents a teenage version about a high school student who bets that he can transform a nonentity into a prom queen.

Finally, on video is *The Mythology of Star Wars*, an interview with director George Lucas by Bill Moyers, which explores such universal themes as the Journey and the Quest and the symbolism of light and darkness in the movie (1977). The fantasy and excitement of folktale and legend have been transported to outer space with familiar structures and motifs. Another good comparative example from the genre of science fiction is *Dune* (1984), although the novel is better than the movie. And so it goes.

This highly selective review is intended only as a mere sampling of the richness and variety in the treatment of Greek and Roman themes readily to be found in works by artists of every sort. Nevertheless, even the briefest account cannot help but forcefully remind us once again of the potent inspiration that classical mythology has provided and continues to provide for all facets of creative artistic expression.

NOTES

1. For a survey, see M. L. West, *Ancient Greek Music* (New York: Oxford University Press, 1992).
2. For the history of the musical treatment of Vergilian themes and characters, see A. E. F. Dickinson, "Music for the Aeneid," *Greece & Rome* 6 (1959), pp. 129–147; and James S. Constantine, "Vergil in Opera," *Classical Outlook* 46 (1969), pp. 49 ff. Cavalli wrote *La Didone* in 1641. A libretto by Metastasio, *Didone Abbandonata*, was first set to music by D. A. Sarro (1724); subsequently many other composers set this same poem to music, among them Luigi Cherubini (1786).
3. Liszt and more recently Owen Jander (a musicologist) connect the brief second movement of Beethoven's lovely *Concerto No. 4 in G* (for piano and orchestra) to the Orpheus myth: the pianist represents Orpheus and the orchestra represents the Furies, whom an ever more assured soloist gradually tames in their alternating utterances.
4. A pioneer in setting the poems of Goethe and Schiller (among others) to music was Johann Friedrich Reichhart (1752–1814), for example, "Prometheus" (Goethe) and "Aeneas zu Dido" (Vergil/Schiller). It is a rewarding pleasure to make musical comparisons, e.g., the setting of Goethe's "Prometheus" by Reichhart, Schubert, and Wolf.
5. See Michael Ewans, *Wagner and Aeschylus: The Ring and the Oresteia* (London: Faber & Faber, 1982). Of historical interest is a mammoth work inspired by Wagner's *Ring*, a cycle of operas entitled *Homerische Welt* by August Bungert (1845–1915), which failed to win favor.
6. Inspired by the Trojan Cycle is an opera in one act by Othmar Schoeck (1886–1957), *Penthesilea* (1925, after Kleist), which may be compared, not unfavorably, to Strauss' *Elektra* for dramatic impact and musical idiom.
7. Quoted, without specific reference, by Ned Rorem, "In Search of American Opera," *Opera News* 56, 1 (July 1991), p. 9.
8. Quoted in David Ewen, *American Composers, A Biographical Dictionary* (New York: G. P. Putnam's Sons, 1982), p. 65.
9. An indigenous development, at the beginning of the twentieth century, was the emergence of jazz in New Orleans, a new musical genre created by black musicians who blended tribal African music with European and American styles. This along with the creation of blues and ragtime (of whom Scott Joplin was the king) came to be regarded as epitomizing American folk art. Classical composers sometimes use ele-

- ments of jazz, blues, and ragtime to give to their works a particularly American originality and flavor.
10. Gilbert Chase, *America's Music*, 2d ed. (New York: McGraw-Hill Book Co., 1966), identifies (in Chapters 5 and 6) these artists as emigrant professionals and gentlemen amateurs; among the best known of the latter are Thomas Jefferson, not a musician but an aristocratic patron; Benjamin Franklin, a practicing musician who may have composed; and Francis Hopkinson.
 11. The dedication is reprinted in *The American Composer Speaks, A Historical Anthology, 1770–1865*, ed. Gilbert Chase (Baton Rouge: Louisiana State University Press, 1966), pp. 39–40.
 12. Richard M. Gummere, *The American Colonial Mind and the Classical Tradition, Essays in Comparative Culture* (Cambridge, Mass.: Harvard University Press, 1963), pp. 142–143.
 13. H. Wiley Hitchcock, *Music in the United States* (Englewood Cliffs, N.J.: Prentice Hall 1969), p. 5.
 14. His well-known *Battle of the Kegs* includes a prefatory metaphor of the Trojan horse. “A poem of 1762 on the benefits of science opens with a Horatian tribute, making mention of the muses, Helicon, Maecenas (in the guise of Lieutenant-Governor Hamilton), and Aeneas, with descriptions of an ideal college curriculum”; Gummere, *The American Colonial Mind*. While admitting that Hopkinson is not a poet of great prominence, Gummere calls him “almost a cross between Horace and Petronius.” See also George Everett Hastings, *The Life and Works of Francis Hopkinson* (Chicago: The University of Chicago Press, 1926).
 15. Oscar Sonneck wrote the pioneering work on Hopkinson: *Francis Hopkinson, the First American Poet-Composer (1737–1791) and James Lyon, Patriot, Preacher, Psalmist (1735–1794); Two Studies in Early American Music* (Washington, D.C.: H. L. McQueen, 1905). For Sonneck the music that accompanied Hopkinson’s libretto was not extant. Gillian B. Anderson, however, has been responsible for a realization of the score, which she has recorded (The Colonial Singers and Players, Gillian B. Anderson, Director. LP Musical Heritage Society, MHS 3684). Her notes explain that she discovered documents that enabled her to identify almost all the music that Hopkinson chose with excellent taste, for it is beautiful and sophisticated, drawn from composers such as Handel and Arne. Anderson also warns that musically “we know with certainty only the names of the tunes to which most of the words were sung,” and refers to a performing edition of the work “for a discussion of the different choices of performing forces” that may be made: *Francis Hopkinson, America Independent, or, The Temple of Minerva* (Washington, D.C.: C.T. Wagner Music Publishers, 1977).
 16. A description of this first performance of *America Independent* appeared in *The Freeman's Journal*, Philadelphia, December 19, 1781.
 17. Sonneck, quoted in Gerald Bordman, *American Musical Theater, A Chronicle* (New York: Oxford University Press, 1978). p. 6.
 18. Bordman, *American Musical Theater*, pp. 78–79.
 19. Hitchcock, *Music in the United States*, pp. 17–18; three versions of the anthem (from among the many variations) are printed as Nos. 113–115 in *Music in America: An Anthology from the Landing of the Pilgrims to the Close of the Civil War, 1620–1865*, ed. W. Thomas Marrocco and Harold Gleason (New York: W. W. Norton & Co., 1964).
 20. Converse wrote a fairy tale opera, *The Pipe of Desire*, the first American opera to be produced at the Metropolitan (1910).

21. These pioneering American composers began to become unfashionable in the 1920s when Aaron Copland, Virgil Thomson, and later Ned Rorem and many other American composers went to continue their education in France, not Germany. It became very much the musical vogue to go to Paris to study with Nadia Boulanger, a passionate follower of Stravinsky. These innovative Francophiles were determined to create a new American style, and looked upon the likes of Paine, Chadwick, and Converse as academic careerists and facile imitators of German romantic composers such as Brahms. Another reason for the unfair dismissal of these American pioneers (which persists to this day) was the general hostility of an emerging new avant-garde, who championed atonality and innovation to the detriment of traditional, tonal, and melodic composition.
22. David Hamilton in his notes for the recording (New World Records 80566-2).
23. Harry Partch, *Bitter Music, Collected Journals, Essays, Introductions, and Librettos*. Edited with an introduction by Thomas McGeary (Urbana: University of Illinois Press, 1991). p. ix (frontispiece).
24. An important half-hour film documentary on Partch is entitled *The Dreamer That Remains*.
25. Letter to the *New York Times* (January 12, 1992).
26. Notes to the recording by Jim Shey (Fresh Aire VI, American Gramophone AGCD-386) relate the piece to the *Homeric Hymn to Dionysus*, where the sailors are turned into dolphins, and to a scene from Apuleius, *The Golden Ass*, about the worship of Isis.
27. In an essay for the recording, Living Music Records LMR-2.
28. Craig Zadan, *Sondheim & Co.*, 2d ed. (New York: Harper & Row, 1986), pp. 65–68 and 162–164; included is a priceless photograph of the Yale production of the *Frogs*.
29. Isadora Duncan, *My Life* (New York: Boni and Liveright, 1927), p. 10.
30. *Ibid.*, pp. 30–31.
31. Review from *The Director*, March 1898, quoted by Fredrika Blair, *Isadora, Portrait of the Artist as a Woman* (New York: McGraw-Hill, 1986), p. 27.
32. Duncan, *My Life*, pp. 54–55.
33. Quoted in Blair, *Isadora*, p. 36.
34. Quoted in Walter Terry, *Isadora Duncan, Her Life, Her Art, Her Legacy* (New York: Dodd, Mead & Co., 1963), pp. 36 and 100; A flood of imitators were able neither to understand nor to follow her concept of the Greek ideal. Terry discusses successors (e.g., Shawn, Graham, and Balanchine, among others) who have, like Duncan, found a pathway, not an end, in Greek culture, and describes the potent and indelible inspiration Greek antiquity has had upon them all (p. 104): “In her own day, she was hailed by the Greeks themselves as the one who had rediscovered the secret of ‘the age of Greece’s greatness.’ This discovery, which few of her contemporaries in the theatre, in the press and in her public truly understood, has been bequeathed to her successors who have used and are using the stimulation provided by the Greek ideal in a new renaissance of the art of dancing.”
35. Blair, *Isadora*, in her last chapter on “Isadora’s Legacy” (pp. 400–497), offers an excellent summary.
35. The following videos are some of the important reconstructions of Duncan’s life and choreography: *The Enduring Essence: The Technique and Choreography of Isadora Duncan, Remembered and Reconstructed by Gemze De Lappe*—Ms. De Lappe describes her

- Duncan training and illustrates six dances (including “Three Graces”) with a class at Smith College; *Isadora Duncan: Movement from the Soul*—a documentary narrated by Julie Harris that includes “Dance of the Furies,” “Dance of the Blessed Spirits,” and “Narcissus,” performed by the Oakland Ballet; and *What Is New* (Series, Magic of the Dance)—narrated by Margot Fonteyn, with a short film of Duncan dancing in a garden. There are two film biographies: *Isadora Duncan, The Biggest Dancer in the World* (1966), Kit Parker Films—an inventive biography by the iconoclastic director Ken Russell, with Vivien Pickles as Isadora; also *Isadora* (1968)—directed by Karel Reisz, starring Vanessa Redgrave. See Louise Spain, ed., *Dance on Camera, A Guide to Dance Films and Videos* (Latham, Md.: The Scarecrow Press, 1998).
37. Terry, *Isadora Duncan*, p. 102.
 38. Ted Shawn with Gray Poole, *One Thousand and One Night Stands* (New York: Doubleday and Company, 1960), pp. 10–11.
 39. *Ibid.*, p. 15.
 40. *Ibid.*, p. 66. Information for this dance, choreographed by Shawn and St. Denis, is as follows: *Dance Pageant of India, Greece and Egypt (or Life and Afterlife in Egypt, Greece and India)*, 1916. Music by Meyrowitz, De Lachau, Nevin, and Halverson. The section on Greece was subdivided: Plastic; Figures from an Amphora; Dancers with Musical Instruments; From a Grecian Vase; and Greek Youth.
 41. Ted Shawn, *Thirty-three Years of American Dance (1927–1959) and the American Ballet* (Pittsfield, Mass.: Eagle Printing and Binding Co., 1959), pp. 4–6. Beginning in 1915, Denishawn toured the United States and the world until 1931; then, beginning in 1933, Shawn and his Men Dancers toured for seven years in over 750 cities in the United States, Canada, Cuba, and England, presenting over 1259 performances; in their repertoire were many dances related to Greek and Roman themes.
 42. Ted Shawn, *How Beautiful upon the Mountain, A History of Jacob’s Pillow*, 3d ed. (n.p., 1947).
 43. See Christina L. Schlundt, *The Professional Appearances of Ruth St. Denis and Ted Shawn, A Chronology and Index of Dances 1906–1932* (New York: The New York Public Library, 1962). The following videos offer insight into the careers and choreography of Shawn and St. Denis: *Denishawn, The Birth of Modern Dance* and *The Men Who Danced*, a nostalgic reunion of members of Shawn’s all-male troupe, founded in 1933, that offers a history of life and performance at Jacob’s Pillow. For these and other videos and films see Spain, *Dance on Camera*.
 44. Terry, *Isadora Duncan*, pp. 101–102. This dance is on the Denishawn video.
 45. *Ibid.*, p. 102.
 46. *Ibid.*, p. 102, comments that *O, Libertad*, “his greatest group work . . . restated in contemporary dance terms the ceremonial of the threshing floor and its testimony to love, life, death and afterlife.”

GLOSSARY OF MYTHOLOGICAL WORDS AND PHRASES IN ENGLISH

Many of us talk the language of myth without even realizing it. Myth encompasses a tradition, a repository of images, themes, motifs, and archetypes that can serve to give human speech resonance beyond its immediate context. When Hamlet compares his murdered father to his uncle as Hyperion to a satyr, he speaks a powerful shorthand; the images conveyed by these two personages do more to express his inner state than if he were simply to speak admiringly of the one and disparagingly of the other. Often we use mythological references in our everyday speech, blissfully unaware that many of our common everyday expressions find their origin in the mythic traditions of Greece and Rome; one can use the word *chaotic* without knowing its ultimate source. The following list briefly explains the original mythological meaning of some of the more common terms that have entered our language.

Achilleian/Achilles' heel/Achilles' tendon Achilles was the son of the mortal Peleus and the nymph Thetis. A warrior of legendary prowess in battle and the hero of Homer's *Iliad*, he was essential to the Greek war effort against Troy. To describe someone as Achilleian is to mark that person as invincible or invulnerable, or nearly so. Achilles himself had one vulnerable spot. His mother dipped the infant Achilles in the magical waters of the river Styx in a vain attempt to render him immortal; she grasped him by the heel in order to submerge him in the stream, thereby leaving one spot on his body susceptible to injury. Paris took advantage of this weakness and with Apollo's help delivered the fatal arrow to Achilles' heel. An Achilles' heel refers to the one assailable feature or weakness a person may have; in anatomy the Achilles' tendon stretches from the heel bone to the calf muscle.

Adonis Adonis was such a handsome youth that Aphrodite herself found him irresistible. A capable hunter, he disregarded the warnings of the goddess to retreat in the face of a boar that stood its ground and sustained a fatal injury from a charging boar's tusk. A grieving Aphrodite sprinkled nectar on the blood-soaked ground and the anemone blossomed forth. To call a man an Adonis is to draw attention to his beauty.

aegis The aegis is the shield of Zeus (originally a "goatskin"), which thunders when he shakes it. Athena also bore the aegis, often tasseled and with the head of Medusa affixed, its petrifying power still intact. This divine shield afforded safety and security, and so to be under the aegis of an individual or of an institution is to be favored with protection, sponsorship, or patronage.

Aeolian harp or lyre Aeolus was put in charge of the winds by Zeus. He kept watch over his subjects in a cave on the island of Aeolia. An Aeolian

harp is a box-shaped musical instrument across which strings are strung; the strings vibrate when wind passes across them.

Amazon The Amazons were a warrior-race of women from the North who joined battle with a terrifying war-cry. They were the equal of men in the field. They came to be seen as haters of men, women who sought foreign husbands, only to kill their sons and raise their daughters as Amazons. Later tradition has it that they cut off their right breasts to become better archers. A vigorous and aggressive woman today might be deemed an amazon, while also conveying the idea of enormous physical stature. Often it is a derogatory term. The Amazon ant is a species of red ant that captures the offspring of other species and turns them into slaves.

ambrosia/ambrosial The Greek gods on Olympus took food and drink as mortals do. But since the gods are of a different order from mortals, so too is their sustenance. Ambrosia, culled from the regions beyond the Wandering Rocks, served variously as food for the gods, as unguent or perfume, or as fodder for horses. It is often coupled with nectar, which provided drink for the Olympians. Both words derive from roots that indicate their power to bestow immortality and stave off death. Today ambrosia can refer to a dessert of fruit and whipped cream or, especially when joined with nectar, any gourmet masterpiece. Generally, ambrosial has come to indicate anything fit for the gods or of divine provenance, or anything delicious or fragrant. See **nectar**.

aphrodisiac According to Hesiod, Aphrodite was born of the foam around the severed genitals of Uranus, a fitting beginning for a divinity whose concern is the sexual. From her name comes the noun aphrodisiac, denoting anything that has the power to excite the sexual passions.

apollonian Apollo had as his pur-view the arts, prophecy, and healing. At his chief shrine at Delphi the watchword was "Know thyself," the beginning and principal aim of human understanding. He is the god of rationality, harmony, and balance, known by the epithet Phoebus, "bright" or "shining," by which he is equated with the Sun and more broadly the order of the cosmos. The adjective apollonian describes that which partakes of the rational and is marked by a sense of order and harmony. Its opposite is dionysian, which describes unbridled nature, the frenzied and the irrational. These polarities, the apollonian and the dionysian, were recognized by the Greeks as twin aspects of the human psyche. See **bacchanal**.

apple of discord All the gods and goddesses were invited to the wedding of Peleus and Thetis, save one, Eris or "Strife." To avenge this slight, this goddess of discord tossed into the wedding hall a golden apple with the inscription "For the Fairest." It was immediately claimed by three rival goddesses: Hera, Athena, and Aphrodite. Zeus refused to decide the issue, but instead gave it to Paris, the son of Priam, king of Troy, to settle. The Judgment of Paris, as it has come to be known, bestowed the apple on Aphrodite, who had promised to Paris the most beautiful woman in the world, namely Helen, wife of Menelaus, king of Sparta. The abduction of Helen by Paris was the cause of the ten-year siege and destruction of Troy under the onslaught of the Greek forces, pledged to wreak vengeance on the seducer. The apple of discord describes any action or situation that causes dissension and turmoil and is more trouble than it is worth.

arachnid Arachne was a common girl with a remarkable skill in weaving. She won such fame that Athena, slighted and envious, challenged Arachne to a contest. Athena wove themes, including the fate of foolish mortals who dared to vie with the gods. Arachne depicted the gods' compromising love affairs. Outraged, Athena struck the girl with her shuttle and, after Arachne hanged herself, in remorse transformed Arachne into a spider, so that she and her species might practice her art of weaving forever. An arachnid refers to any of the various arthropods of the class Arachnida, including the spider.

Arcadia/arcadian Arcadia is the central mountainous region of the Peloponnese. Often it is described in idyllic terms: the ideal land of rustic simplicity, especially dear to Hermes, the home of Callisto (the favorite of Artemis), the usual playground of Pan; for the bucolic poets, Arcadia is a place where life is easy, where shepherds leisurely tend their flocks and pursue romantic dalliances.

Thus Arcadia becomes that imagined primeval terrain, where human beings lived in contentment and harmony with the natural world. Arcadian refers to any place or time signifying the simple, rustic, pastoral life of a golden age lost.

Argus/argus-eyed One of Zeus' sexual escapades involved the maiden Io. In an attempt to keep Hera from discovering the truth of his dalliance, Zeus transformed Io into a cow. Hera, not easily thrown off the scent of her husband's affairs, prevailed upon Zeus to give her the cow as a present and an assurance of his good faith, after which Hera enlisted the aid of Argus, a giant with one hundred eyes, to keep a close watch over the poor girl. In English one who is ever-vigilant or watchful can be called an Argus or be described as argus-eyed.

Atlas/Atlantic/atlantes/Atlantis Atlas was a titan who opposed Zeus in the battle between the Olympians and the earlier generation of Titans. The defeated Titans were condemned to Tartarus, but Atlas was punished with the task of supporting upon his shoulders the vault of the heavens, thereby keeping the earth and sky separate. Through a mistaken notion that this vault, sometimes depicted as a sphere, was actually the earth, Atlas has given his name to that particular kind of book which contains a collection of geographical maps. It was not until the Flemish cartographer Gerhardus Mercator (1512-1594) depicted on the frontispiece of his atlas the titan carrying the earth that the association became fixed. The plural of atlas has given us the architectural term atlantes, which refer to support columns formed in the shape of men, corresponding to the maiden columns known as caryatids. Atlas endured his torment at the western edge of the world and so has given his name to the ocean beyond the straits of Gibraltar, the Atlantic, as well as to the Atlas mountains in northwest Africa. The mythical island of Atlantis was located, according to Plato, in the western ocean.

Augean Stables/Augean One of Heracles' Labors, performed in service to King Eurystheus, was to clean the stables of King Augeas of Elis. King Augeas had not cleaned his stalls for some years and the filth and stench had become unbearable. Heracles agreed to the task and succeeded in diverting the course of two rivers to achieve his aim. The term Augean Stables has since become a byword for squalor. Augean describes anything that is extremely filthy or squalid.

aurora australis/borealis Aurora was the Roman goddess of the dawn (the Greek Eos). The sons of Aurora and the titan Astraeus were the four winds: Boreas, who blows from the north; Notus, the southwest; Eurus, the east; and Zephyrus, the west. The

spectacular streaks of light that appear in the sky at night are a result of the effect of the particles of the sun's rays on the upper atmosphere. Seen especially at the poles, in the Northern Hemisphere they are called the northern lights or the aurora borealis, and in the South, the aurora australis, Auster being the Roman name of the southwest wind.

bacchanal/bacchanalia/bacchanalian/bacchant/bacchante/bacchic Dionysus, the Roman Bacchus, was the god of wine, frenzied music and dance, and the irrational. He presided over ecstatic, sometimes orgiastic rites, which involved initiation and drove the participants into another plane of perception as they became possessed by the deity. He is usually represented in the midst of a retinue of female worshipers, known as maenads, bacchae, or bacchantes (the feminine singular is bacchante; a male follower is a bacchant, plural bacchants); he is also attended by male satyrs, mischievous and lecherous creatures, half-human and half-animal. Wine proved a powerful conduit to the ineffable, amidst rituals that included the rending of a sacrificial victim and the eating of its raw flesh. Dionysiac rites among the Romans became known as Bacchanalia, and the sometime extreme behavior of the initiates provoked the Roman Senate to outlaw them in 186 B.C. Thus we derive the words bacchanal and bacchanalia to refer to any debauched party or celebration. Bacchanal, bacchant, bacchante, and bacchae can be used to characterize an overzealous partygoer. The adjectives bacchanalian and bacchic describe any exuberant, drunken revelry. See **dionysian** and **apollonian**.

Beware of Greeks bearing gifts/I fear Greeks even when they bear gifts The fall of Troy was finally accomplished by a ruse of the Greeks. They constructed an enormous, hollow, wooden horse, into which they hid some of their best fighters. The horse was left behind as the rest of the Greek host sailed off to the nearby island of Tenedos and waited. The treacherous Sinon convinced the Trojans to drag the gift into the city, despite the warnings of Laocoön, a priest of Poseidon. In Vergil's account, Laocoön implored his countrymen not to bring the treacherous horse into Troy, crying, "I fear Greeks even when they bear gifts" (*Timeo Danaos et dona ferentis*). Two serpents emerged from the sea to strangle Laocoön and his two sons. The Trojans were convinced that they should accept the horse and thus wrought their own destruction. Laocoön's utterance has become a warning to beware of treachery and look for the hidden motives behind even the most fair-seeming generosity.

boreal Boreas, the north wind, has given us this adjective, which refers to the region of the world from which his blasts come. See **aurora**.

by Jupiter/by Jove/jovian/jovial Jupiter was the Roman counterpart of Zeus, the supreme god and father. He was a god of the sky and his name is derived from Indo-European roots *dyaus/pitr*, which literally mean god/father. In Latin the common oath "by Jupiter" would be rendered "pro Jove" (Jove being a different form of his name). In the Christian tradition there is no religious significance to this exclamation, but English writers, by using it as an expression of surprise or pleasure, avoided taking God's name in vain; thus "by Jupiter" or "by Jove" was used to replace the offensive "by God." To describe someone or something as jovian means that one partakes of that awe-inspiring majesty that is particular to a supreme god. Many mythological names also found a new existence in the field of astrology. Since it was felt that the heavenly bodies influence the life of humans on earth, celestial bodies were given appellations drawn from mythology, for example Jupiter became the name not only of a god but also of a planet. Those who were born under the influence of the planet Jupiter were said to be of a cheerful disposition, hence the meaning of the adjective jovial.

Cadmean Victory Cadmus was informed by the oracle at Delphi that he would establish a great city. When he eventually found the site of the future Thebes, he prepared to sacrifice to the gods in thanksgiving. He soon discovered that the local spring from which he needed to draw water for a proper sacrifice was guarded by a serpent. He sent his men to dispatch the monster and bring back the ritual water. All of his men failed in the attempt and Cadmus eventually took it upon himself to kill the serpent. Though Cadmus was ultimately victorious, he now found himself bereft of his comrades and despaired of establishing his realm. A Cadmean Victory has come to mean a victory won at great loss to the victor.

caduceus In Latin the herald's staff was known as the caduceum, derived from the Greek word *keryx*, or herald, and his staff the *kerykeion*. Hermes, as divine messenger, was invariably depicted with the caduceus, which was represented as a staff with white ribbons or intertwined snakes. The white ribbons may have indicated the inviolability of his office. The image of intertwined snakes may have been drawn from the Near Eastern use of copulating snakes as a symbol of fertility, for Hermes was a fertility god. The staff of Hermes became confused with the staff of Asclepius, the renowned mythic physician and son of Apollo, because some stories about Asclepius involved snakes and the reptile has the ability to slough its old skin and seemingly be "re-born," and so had associations with healing.

calliope Calliope was one of the nine Muses, who gives her name to the musical instrument the calliope, made up of tuned steam whistles and played like an organ; it is also the name for the California hummingbird. See **muse**.

Cassandra Trojan Cassandra, daughter of Priam and Hecuba, was amorously pursued by the god Apollo. Having at first agreed to succumb to his advances, she was awarded the gift of prophecy, but later, when she changed her mind and refused him, Apollo punished her. She would remain a prophetess, but would never be believed. Cassandra's predictions were invariably of disaster, foretelling the murder of Agamemnon by Clytemnestra or the destruction of Troy through the ruse of the Trojan Horse. A Cassandra today is anyone who utters dire warnings of the future, regardless of their truth.

Calypso/Calypso music Calypso ("she who hides or conceals") was the daughter of Thetis and either Atlas, Nereus, or Oceanus. Odysseus was detained on her island home of Ogygia for seven years with the promise that she would make him immortal. Though he enjoyed her bed, each day he would weep and look longingly over the sea to his homeland, Ithaca. Eventually Zeus sent Hermes to inform Calypso that she must give up Odysseus. Calypso music, derived from the name of the nymph, originated on the islands of the West Indies and features topical or amusing themes.

catamite Zeus was so impressed with the beauty of the Trojan youth Ganymede that he took the form of an eagle and brought him to Olympus to become the cupbearer of the gods. The Latin rendering of Ganymede's name was Catamitus, and his relationship with Zeus (or Jupiter) was interpreted by some as overtly homosexual to lend divine authority to ancient pederastic practices; today a catamite is still the designation for a boy used for pederastic purposes.

Cerberus Cerberus, the hound of the underworld, stood guard at the gates of Hades and prevented those not permitted from entering. He is usually described as a beast with three heads and the tail of a dragon. When Aeneas journeyed to the lower regions under the guidance of the Sibyl, he brought along a medicated cake to drug the animal and ensure their safe passage. To throw a sop to Cerberus means to give a bribe and thereby ward off an unpleasant situation.

cereal Ceres (the Roman counterpart of Demeter) was goddess of grain and the fertility of the earth. From her name is derived the Latin adjective *Cerealis* (having to do with Ceres and the grain), from which comes our English word cereal.

chaos/chaotic Whether Chaos is to be understood as a void or a primordial, formless, undifferentiated, and seething mass out of which the order of the universe is created, it is the starting point of creation. This unformed beginning is contrasted with later creation, a universe called the cosmos, a designation meaning, literally, harmony or order. The sky and the stars, the earth and its creatures, and the laws and cycles that direct and control creation seem to exhibit the balance, order, and reason that the mind discerns in the natural world. For us chaos, together with its adjective chaotic, simply means a state of confusion. See **cosmos**.

Chimera/chimerical/chimeric A wild, hybrid creature, the Chimera had the head of a lion, the body of a goat, and the tail of a serpent, and it breathed fire. It was killed by the Corinthian hero Bellerophon on one of his journeys. Today a chimera is a fantastic delusion, an illusory creation of the mind. It can also refer to a hybrid organism, usually a plant. Chimerical and Chimeric refer to something as unreal, imaginary, or fantastic. These adjectives can also signify that one is given to fantasy.

cornucopia The Latin cornucopia means "horn of plenty." There are two stories about this horn, which bestows upon the owner an endless bounty. Zeus, in his secluded infancy on Crete, was nursed by a goat named Amalthea, which was also the name of the goddess of plenty. One of the horns of this goat was broken off and became the first cornucopia. The horn of plenty is also associated with Hercules. In order to win Deianira as his bride, he had to defeat the horned river-god Achelöus. In the struggle, Hercules broke off one of the horns of the river-god but after his victory returned the horn and received as recompense the horn of Amalthea. Ovid, however, relates that the horn of Achelöus became a second horn of plenty. Today the cornucopia is a sign of nature's abundance, and the word comes to mean a plenteous bounty.

cosmos/cosmic/cosmology/cosmetic/cosmetician Cosmos refers to the universe, and all that is ordered and harmonious. The study of cosmology deals with the origin and structure of the universe. The adjective cosmic may designate the universe beyond and apart from the earth itself, or it may in a generalized sense describe something of vast significance or implication. Akin to the word cosmos are various English words derived from the Greek adjective *kosmetikos*. Cosmos means not only order and harmony, but also arrangement and decoration; thus a cosmetic is a substance that adorns or decorates the body, and a cosmetician the person involved with cosmetics. See **chaos**.

cupidity The Latin word *cupidus* (desirous or greedy) gave rise to Cupido, Cupid, the Roman equivalent of the Greek god of love, Eros. In early representations he is a handsome youth, but he becomes increasingly younger and develops his familiar attributes of bow and arrow (with which he rouses passion both in gods and mortals) and wings, until he finally evolves into the Italian *putti* or decorative cherubs frequently seen in Renaissance art. From the same root is derived *cupiditas* to denote any intense passion or desire, from which we derive *cupidity* (avarice or greed). See **erotic**.

cyclopean There were two distinct groups of giants called the Cyclopes, whose name means circle-eyed and indicates their principal distinguishing feature, one round eye in the center of their foreheads. The first, offspring of Uranus and Ge, were the smiths who labored with Hephaestus at his forge to create the thunderbolt for Zeus, among other masterpieces. The second group of Cyclopes were a tribe of giants, the most important of whom is Polyphemus, a son of Poseidon encountered by Odysseus. The word cyclopean refers to anything that pertains to the Cyclopes or partakes of their gigantic and powerful nature. Thus the Cyclopes were said to be responsible for the massive stone walls that surround the palace-fortresses of the Mycenaean period. And so cyclopean is used generally to describe a primitive building style, which uses immense, irregular, stone blocks, held together by their sheer weight without mortar.

cynosure The constellation Ursa Minor ("little bear") was called Kuno-soura ("the dog's tail") by the astronomer Aratus, who saw in it one of the nymphs who raised the infant Zeus. Long a guiding star for seafarers, it has given us the word *cynosure*, which can describe anything that serves to focus attention or give guidance.

demon/demoniac/demonic/demonology In Greek *daimon* was a word of rather fluid definition. In Homer the Olympians are referred to as either gods (*theoi*) or *daimones* ("divine powers"). In later literature the *daimones* became intermediate beings between gods and men, or often the spirits of the dead came to be called *daimones*, especially among the Romans. *Daimon* could also denote that particular spirit granted to each mortal at birth to watch over its charge. This corresponds to the Roman *Genius*, a vital force behind each individual, originally associated with male fertility and particularly with the male head of a household. Later it became a tutelary spirit assigned to guide and shape each person's life. With the triumph of Christianity, all pagan deities were suspect, and *daimon*, viewed

solely as a power sprung from the devil, became our demon (any evil or satanic spirit). As an adjective demoniac or demonic suggests possession by an evil spirit and can mean simply fiendish. As a noun demoniac refers to one who is or seems possessed by a demon. Demonology is the study of evil spirits. As for genius, it has come to denote a remarkable, innate, intellectual or creative ability, or a person possessed of such ability. Through French we have the word *genie*, which had served as a translation of *Jinni*, spirits (as in the Arabian Nights) that have the power to assume human or animal form and supernaturally influence human life.

dionysian The dionysiac or dionysian experience is the antithesis of the apollonian, characterized by moderation, symmetry, and reason. See **apollonian** and **bacchanal**.

echo There are two major myths that tell how the acoustic phenomenon of the echo arose. According to one, Echo was originally a nymph who rejected the lusty advances of the god Pan. In her flight she was torn apart by shepherds, who have been driven into a panic by the spurned god, Pan. The second version involves the mortal Narcissus. Echo had been condemned by Hera to repeat the last utterance she heard and no more. It was in this state that Echo caught sight of the handsome Narcissus. Narcissus, a youth cold to all love, rejected the amorous advances of Echo, who could now only mimic Narcissus' words. Stung deeply by this rebuff, she hid herself in woods and caves and pined for her love, until all that remained of the nymph was her voice. As for Narcissus, too proud in his beauty, he inevitably called down upon himself the curse of a spurned lover. Narcissus was doomed to be so captivated by his own reflection in a pool that he could not turn away his gaze, even to take food and drink. He wasted away and died. From the spot where he died sprang the narcissus flower. Narcissism has come to mean an obsessive love of oneself. As used in psychoanalysis it is an arrested development at an infantile stage characterized by erotic attachment to oneself. One so afflicted with such narcissistic characteristics is a narcissist. See **panic** and **narcissism**.

Electra complex Comparable to the Oedipus complex in the development of the female is the Electra complex, a psychotic attachment to the father and hostility toward the mother, a designation also drawn from myth. Electra was the daughter of Agamemnon and Clytemnestra, a young woman obsessed by her grief over the murder of her beloved father and tormented by unrelenting hatred for her mother who killed him. See **Oedipus**.

Elysian Fields/Elysian/Elysium In Vergil's conception of the Underworld there is a place in the realm of Hades reserved for mortals who, through their surpassing deeds and virtuous life, have won a blessed afterlife. It is named the Elysian Fields or Elysium, and the souls who inhabit this paradise live a purer, more carefree, and pleasant existence. The adjective Elysian has come to mean blissful.

enthusiasm In cultic ritual, particularly Dionysiac, the initiate was often thought to become possessed by the god and transported to a state of ecstatic union with the divine. The Greeks decried a person so exalted as being *entheos*, "filled with the god," which gave rise to the verb *enthousiastein*. Thus the English word enthusiasm, meaning an excited interest, passion, or zeal. See **bacchanal**.

erotic/erotica/erotomania To the Greeks Eros was one of the first generation of divinities born from Chaos; he was also said to be the son of Aphrodite and Ares. From the Greek adjective *eroticos*, we derive erotic, which describes anyone or anything characterized by the amatory or sexual passions. Erotica is a branch of literature or art whose main function is the arousal of sexual desire. Erotomania is an obsessive desire for sex. See **cupidity**.

eristic Eris was the goddess of "strife" or "discord," responsible for all the dissension arising from the Apple of Discord, which she threw among the guests at the wedding banquet of Peleus and Thetis. Thus is derived the term eristic, which as an adjective means pertaining to argument or dispute; as a noun it refers to rhetoric or the art of debate. See **Apple of Discord**.

Europe Europa was the daughter of Agenor, king of Tyre in Phoenicia. Zeus, disguised as a white bull, enticed the girl to sit on his back and then rushed into the sea and made his way toward Greece. When they reached Crete, Zeus seduced Europa, who bore a son named Minos and gave her name to a foreign continent. The word Europe itself may be of Semitic origin, meaning the land of the setting sun.

Faunus/faun/fauna/flora Faunus, whose name means one who shows favor, was a Roman woodland deity. He was thought to bring prosperity to farmers and shepherds and was often depicted with horns, ears, tail, and sometimes legs of goat; therefore he was associated with the Greek god Pan and also Dionysiac satyrs. A faun comes to be another name for a satyr. Faunus' consort was Fauna, a female deity like him in nature. Flora was another, though minor, agricultural deity, a goddess of flowers, grain, and the grapevine. When we talk of flora and fauna, we refer, respectively, to flowers and animals collectively.

Furies/furious/furioso The Erinyes (Furies) were avenging spirits. They sprang from the severed genitals of Uranus when drops of his blood fell to the earth. They pursued those who had unlawfully shed blood, particularly within a family. They were said to rise up to avenge the blood of the slain and pursue the murderer, driving the guilty to madness. As chthonic deities they are associated with the Underworld and are charged with punishing sinners; they are usually depicted as winged goddesses with snaky locks. In English fury can refer to a fit of violent rage or a person in the grip of such a passion, especially a woman. The Latin adjective *furiosus* has given us our adjective furious as well as the musical term *furioso*, which is a direction to play a piece in a turbulent, rushing manner.

Gaia Hypothesis Gaia (or Ge), sprung from Chaos, is the personification of the earth. Her name has been employed in a recent coinage called the Gaia Hypothesis, a theory that views the earth as a complete living organism, all of its parts working in concert for its own continued existence.

genius The Latin word *Genius* designated the creative power of an individual that was worshiped as a mythological and religious concept. See **demon**.

gorgon/gorgoneion/gorgonian/gorgonize The Gorgons were three sisters who had snakes for hair and a gaze so terrifying that a mortal who looked into their eyes was turned to stone. Medusa, the most famous of the three, was beheaded by Perseus, aided by Athena and Hermes. Perseus gave the head to Athena, who affixed it to her shield (see *aegis*). The head of the Gorgon was often depicted in Greek art in a highly stylized manner; this formalized depiction is called a gorgoneion. Today a gorgon can mean a terrifying or ugly woman. There is also a species of coral known as gorgonian with an intricate network of branching parts. The verb to gorgonize means to paralyze by fear.

halcyon/halcyon days The mythical bird called the halcyon is identified with the kingfisher. Ceyx and Alcyone were lovers. Ceyx, the king of Trachis, was drowned at sea. Hera sent word to Alcyone in her sleep through Morpheus, the god of dreams, that her husband was dead. Alcyone in her grief was transformed into the kingfisher; as she tried to drag the lifeless body of Ceyx to shore, he too was changed into a bird. The lovers still traverse the waves, and in winter she broods her young in a nest that floats upon the surface of the water. During this time, Alcyone's father, Aeolus, king of the winds, keeps them from disturbing the serene and tranquil sea. Today, the halcyon days are a period of calm weather dur-

ing the winter solstice, especially the seven days preceding and following it. Halcyon days can also describe any time of tranquillity.

harpy The Harpies ("snatchers"), daughters of Thaumias and Electra, were originally conceived of as winds, but eventually came to be depicted as bird-like women who tormented mortals. The Argonauts rescued Phineus, the blind king and prophet of Salmydessus, whose food was "snatched" away by these ravenous monsters. Today when we call someone a harpy we evoke images of these vile, foul-smelling, predatory creatures; or harpy simply means a shrewish woman.

hector Hector was the greatest warrior of the Trojans, who was defeated by his counterpart on the Greek side, Achilles. To hector means to bluster and bully. The noun hector denotes a bully. The connection between the noble Hector and this later conception originated in the Middle Ages, when Hector was portrayed as a braggart and bully.

heliotrope/heliotropism, etc. Helios was god of the sun. The Greek root *trop-* refers to a turning in a certain direction. Heliotropism is a biological term that refers to the growth or movement of an organism toward or away from sunlight. A heliotrope is a genus of plant that behaves in that manner. Several scientific or technical words derive from the name of the sun-god; for example, a heliostat is an instrument that uses a mirror to reflect sunlight; heliotherapy, treatment by means of the sun's rays; heliotype is a photomechanical process of printing a plate, or the printing plate itself produced in this fashion; a heliograph is an instrument used to photograph the sun; and heliocentric refers to anything that has the sun as a center or is relative to the sun.

Hercules/herculean/Hercules' club Hercules, in Greek Heracles, was the greatest hero in the ancient world, who wore a lionskin and brandished a club. He achieved countless remarkable exploits and is most famous for twelve canonical Labors. To describe someone as herculean is to liken him to Hercules in strength and stature. Any effort that is herculean requires a tremendous exertion or spirit of heroic endurance. The Hercules is a constellation in the northern hemisphere near Lyra and Corona Borealis. A shrub indigenous to the southeastern United States and characterized by prickly leaves and large clusters of white blossoms is known as Hercules' club.

hermetic/hermeneutic/hermeneutics/hermaphrodite The god Hermes became associated with the Egyptian god Thoth and received the appellation Trismegistus ("thrice-greatest"). A number of works

on occult matters, known as the Hermetic Corpus, were attributed to Hermes Trismegistus; today hermetic refers to occult knowledge, particularly alchemy, astrology, and magic. From this notion of secret or sealed knowledge hermetic comes to mean completely sealed; a hermetic jar is one closed against outside contamination. From Hermes' primary function as a bearer of messages came the Greek *hermeneus* ("interpreter") and the phrase *hermeneutike technē* ("the art of interpretation"). Hermeneutics is the science of interpretation, and hermeneutic, as adjective or noun, connotes an interpretive or explanatory function. Hermaphroditus, the beautiful son of Hermes and Aphrodite, was bathing in a pool when the nymph Salmacis caught sight of him and was filled with desire. She plunged into the water and entwined her limbs around him. He fought her efforts to seduce him but her prayer to the gods that they might become united into one being was granted. A hermaphrodite has the genitalia and secondary sexual characteristics of both males and females.

hydra Heracles' second Labor was to encounter the Hydra, a nine-headed serpent which would grow back two heads for every one that was severed. Every time he clubbed off one of the heads he cauterized the stump so that another could not grow. A hydra is a polyp with a cylindrical body and tentacles surrounding an oral cavity, and it has the ability to regrow itself from cut-off parts. A hydra can also be a destructive force that does not succumb to a single effort. The Hydra is a constellation in the equatorial region of the southern sky near the constellation Cancer.

hymen/hymeneal Hymen was the god of marriage who was invoked during the wedding ceremony with the chant "O Hymen, Hymenaeus"; thus he was the overseer of hymeneal or marriage rites. Originally the Greek word *hymen* referred to any membrane, but today the hymen is a membranous fold of tissue that covers the outer orifice of the vagina.

hyperborean The Hyperboreans were a mythical race that inhabited a paradise in the far north, at the edge of the world, "beyond" (hyper) the reach of the north wind (Boreas) and his arctic blasts. In English hyperborean merely means arctic or frigid.

hypnosis/hypnotic, etc. Hypnos, son of Nyx (Night) and brother of Thanatos (death), was the god of sleep and father of Morpheus, the god of dreams. Hypnosis is a sleeplike condition in which the person becomes susceptible to suggestion. Hypnotic, as an adjective, means to pertain to or induce hypnosis. As a noun it refers to the person hypnotized, something that promotes hypnotism, or means simply a soporific, that which induces sleep. Hypnogenic refers to

a drug that produces sleep or describes the state immediately preceding sleep, while hypno-pompic refers to the state immediately preceding awakening; both states may be marked by visual or auditory hallucination as well as sleep-induced paralysis. Hypnophobia is a pathological fear of sleep.

Icarian/Icarian Sea Daedalus had crafted out of wax and feathers two pairs of wings to escape from the imprisonment imposed by King Minos of Crete, one pair for himself and one for his young son, Icarus. Heedless of his father's advice, the young Icarus flew too close to the sun. The wax of the wings melted and the boy fell into the sea. That part of the Mediterranean along the coast of Asia Minor into which he fell ever after carried his name and would be known as the Icarian Sea. Icarian denotes acts that are reckless and impetuous and lead to one's ruin.

ichor Gods, although immortal, can suffer wounds. Human blood does not flow from those wounds but instead a clear, rarefied liquid—divine ichor. In English ichor can refer to a fluid, like blood, or, in pathological terms, a watery substance discharged from wounds or ulcers.

iris/iridescent Iris was the goddess of the rainbow (the meaning of her name). The adjective iridescent describes anything that gleams with the colors of the rainbow. The iris is the colored portion of the eye that contracts when exposed to light. It is also a genus of plant that has narrow leaves and multi-colored blossoms.

junoesque Juno was the mighty and majestic queen of the Roman Pantheon, wife and sister of Jupiter, identified with the Greek Hera. To describe someone as junoesque is to liken her to the goddess in stature and stately bearing.

labyrinth/labyrinthine In Crete, King Minos had Daedalus construct a maze in which to imprison the monstrous Minotaur. Theseus' greatest achievement was to kill the Minotaur and, with the help of Ariadne's thread, find his way out of the maze, which was known as the Labyrinth. Excavations of the complex and vast palace of Cnossus in Crete with its network of rooms seem to substantiate elements of this legend. A labyrinth is a maze, and the adjective labyrinthine describes something winding, complicated, and intricate. Labyrinth can also denote anatomical features marked by connecting passages, in particular the structures of the internal ear.

Lethe/lethargy/lethargic/Lethean Lethe was the river of "forgetfulness" in the Underworld. From it souls would drink and forget their experiences upon being reincarnated. Lethe refers today to a state of

oblivion or forgetfulness; lethargy and lethargic denote a state of persistent drowsiness or sluggishness; Lethean characterizes anything that causes forgetfulness of the past.

lotus/lotus-eater Odysseus was driven to North Africa and the land of the Lotus Eaters, who consumed the fruit of the lotus and lived in a continual state of dreamy forgetfulness and happy irresponsibility. Today a lotus eater is anyone who succumbs to indolent pleasure. The lotus, a small tree of the Mediterranean, produces the fruit supposedly consumed by the Lotus Eaters; it is also an aquatic plant indigenous to southern Asia.

maenad A maenad is a female worshiper of Dionysus. See **bacchanal**.

March/martial/martial law Mars was the Roman god of war, equated with the Greek Ares. He personified the conflict of battle in all its brutality and bloodshed. The adjective martial means of or pertaining to battle; when the military authority usurps the power of civil authority, the population is said to be under martial law. Also the name of the month March is derived from Mars.

matinee/matins Matuta was a minor Roman deity, the goddess of the dawn (in Latin dawn is *tempus matutinum*). Through French, we have matinee, a theatrical or cinematic performance given in the daytime, and matins (also called Morning Prayer), the first division of the day in the system of canonical hours of the monastic tradition.

mentor In Book One of Homer's *Odyssey*, Odysseus' palace is ravaged by suitors for the hand of his wife, Penelope. His son Telemachus, daydreaming of his father's return, is incapable of action. Athena, in the guise of Odysseus' trusted counselor, Mentor, comes to Ithaca to rouse Telemachus and give him advice and hope. Thus mentor means a trusted guardian and teacher.

mercury/mercurial Mercury was the Roman equivalent of the Greek Hermes. This fleet-footed messenger of the gods has given us the word mercury, a silver metallic element that at room temperature is in liquid form, also called "quicksilver" because of the nature of its movement. In astrology, Mercury is the name given to the planet closest to the Sun, around which it completes one revolution in eighty-eight days. In botany, it refers to a genus of weedy plants. To describe someone as mercurial is to impart to the individual craftiness, eloquence, cunning, and swiftness, all attributes of the god. It can also simply mean quick or changeable in temperament, either from the nature of the god or the influence of the planet.

Midas'/ass's ears/Midas touch/the golden touch Apollo and Pan entered into a musical contest. When Apollo was judged victorious by the mountain-god Tmolus, Midas, the king of Phrygia, disagreed. For his lack of perception Apollo transformed Midas' offending ears into those of an ass. To have ass' ears means that one lacks true musical judgment and taste. On another occasion, the god Dionysus granted Midas' wish that whatever he might touch be turned into gold. To his despair, Midas found that even as he put food and drink to his mouth it was transmuted into gold. Dionysus granted him relief by telling him to bathe in the river Pactolus, whose bed became golden. To have the golden touch or Midas' touch means to be successful in any endeavor.

money/monetary In the Temple of Juno Moneta ("money," "mint") was housed the Roman mint. The epithet Moneta means "the warner" and refers to an important legend regarding her temple. When Rome was threatened in 390 B.C. by an invasion of Gauls, the sacred geese in Juno's temple began to squawk, rousing the Romans to battle. Moneta, through the Old French *monnaie*, has given us the word money; the adjective monetary, "pertaining to money," comes from the stem monet-.

morphine Morpheus was the god of dreams, or more particularly the shapes (*morphai*) that come to one in dreams. Later he became confused with the god of sleep and it is from this confusion that the meaning of morphine comes. Morphine, an addictive compound of the opium plant, is used as an anaesthetic or sedative. The compounds that include the stem morph-, such as metamorphosis (a transformation into another shape or state of being), are drawn from the Greek word *morphe* ("shape" or "form") and not the god Morpheus.

muse/music/museum/mosaic The nine Muses were the daughters of Zeus and Mnemosyne ("memory"), whose province was inspiration in the arts, particularly poetry and music; from Muse we derive the word music. The Greek word *mouseion* ("place of the Muses"), in Latin *museum*, has given us museum, a place for displaying works of artistic, historical, or scientific interest. From the adjective *mousaicos* ("pertaining to the Muses") comes mosaic, a picture or design made up of small colored tiles or stones.

narcissism/narcissist/narcissistic/narcissus Narcissism refers to a psychological state in which the person has a pathological attachment to oneself. See **echo**.

nectar Nectar is the special drink of the gods, usually paired with their food, ambrosia. Nectar has

come to mean any refreshing drink, the pure juice of a fruit, or the liquid gathered by bees from the blossoms of flowers, used in making honey. See **ambrosia**.

nemesis Nemesis is the goddess of vengeance who brings retribution to those who have sinned, especially through *hubris* ("overweening pride"). A nemesis denotes the following: the abstract idea of retributive vengeance; the agent of retribution; an invincible rival in a contest or battle; or a necessary or inevitable consequence.

nestor Nestor, the oldest and wisest of the Greek kings at Troy, lived to see three generations of heroes. A brave and strong warrior when young, in old age he was prized for his good counsel and his oratory. Homer tells us that his speech flowed more sweetly than honey. When a politician or statesman today is called a nestor, it is these qualities of wisdom, good counsel, and oratory that are emphasized.

nymph/nymphomania/nympholepsy Nymphs are beautiful, idyllic goddesses of wood and stream and nature, often the objects of love and desire. A nymph today may simply mean a remarkably attractive young woman, but if she were to suffer from nymphomania ("nymph-madness"), she would be suffering from sexual promiscuousness. Nympholepsy (from *lepsis*, "a seizing"), on the other hand, refers to the madness that assails one who has glimpsed a nymph. It can also denote a strong desire for what is unattainable (Cf. **satyr/satyriasis**).

ocean In mythology the world is a disc circled by a stream of water, the god Oceanus, who is the father of the Oceanids, that is, all the lesser rivers, streams, brooks, and rills that flow over the earth. Today ocean can refer to the entire body of salt water or any of its major divisions covering the globe.

odyssey Homer's *Odyssey* recounts the return of Odysseus to Ithaca, his wife, Penelope, and his son, Telemachus. After ten years of war at Troy, Odysseus found the day of his return postponed for another ten years by the god Poseidon. On his extended travels he overcame many challenges before winning his homecoming. An odyssey has come to mean a long, tortuous period of wandering, travel, and adventure, often in search of a quest, both literally and spiritually.

Oedipus/Oedipal complex King Laius of Thebes was given a prophecy that his wife, Jocasta, would bear a son who would kill his father and marry his mother. They did have a son, whose name was Oedipus, and when he grew up he killed his father and married his mother, despite all that was done to avert the prophecy and destiny. Sophocles' masterpiece, *Oedipus the King*, inspired Sigmund Freud to crystal-

lize one of his major, defining ideas on the nature of the human psyche and infantile sexual development; the Oedipus complex is the term he used to describe the natural progression of psychosexual development in which the child has libidinal feelings for a parent of the opposite sex and hostility for the parent of the same sex. The term Oedipus complex refers to the male child. See **Electra complex**.

Olympic Games/olympian The Greek gods had their homes on the heights of Mt. Olympus in northern Greece, and so were called the Olympians. The term olympian carries with it notions of the new order ushered in by Zeus and his family and also distinguishes these gods in their sunlit heights from the chthonic ("of the earth") deities, who have associations with the gloom of the underworld. Therefore olympian means towering, awesome, and majestic, akin to the gods of Olympus. The adjective can also refer to one who competes in or has won a contest in the Olympic Games, but this designation is derived from the ancient Olympic Games, celebrated at Olympia, which was a major sanctuary of Zeus in the Peloponnese.

paean Paean was an epithet of the god Apollo, invoked in a cry for victory in battle or for deliverance from sickness. A paean thus became a song of thanksgiving. Today it refers to a song of joy or praise, whether to a god or a human being.

palladium As a child Athena had a special girlfriend named Pallas, with whom she used to play at war. During one of their skirmishes Athena inadvertently killed Pallas, and in her memory she built a wooden statue of the girl. This statue was thrown down to earth by Zeus, where it became known as the Palladium, and became for the Trojans a talisman for their city; as long as they had possession of it, the city would stand. Thus the English palladium means a protection from harm for a people or state, a lucky charm.

Pandora's box Pandora was the first woman, given to men as punishment for Prometheus' theft of fire. Sent with her was a jar, which, when opened, released all the ills that now plague human beings. Later this jar became a box, and now Pandora's box refers to something that should be left unexamined lest it breed disaster.

panic Panic describes a state of great fear and anxiety with an attendant desire for flight, which was considered inspired by the god Pan. See **echo**.

phaëthon Helios, the sun-god, assured Phaëthon that he was truly his father and swore an oath that his son could have anything he desired. Phaëthon asked that he be allowed to drive his father's char-

iot across the sky. Helios could not dissuade the boy, and Phaëthon could not control the horses and drove to his death. A phaeton has come into English as a four-wheeled chariot drawn by two horses or an earlier type of convertible automobile.

priapism/priapic Priapus was the ithyphallic son of Aphrodite. He is most often depicted with an enormous and fully erect penis. Priapic is an adjective referring to priapian characteristics. Priapism is a pathological condition in which the penis is persistently erect.

procrustean/procrustean bed Procrustes (the "one who stretches") was encountered by Theseus. He would make unwitting travelers lie down on a bed. If they did not fit it exactly, he would either cut them down or stretch them out to size. The adjective procrustean refers to someone or something that aims at conformity through extreme methods. A procrustean bed describes a terrible, arbitrary standard against which things are measured.

Prometheus/promethean The god Prometheus ("forethought"), son of the titan Iapetus, was the creator of humanity and its benefactor. He bestowed upon mortals many gifts that lifted them from savagery to civilization. One of his most potent benefactions was fire, which he stole from heaven in a fennel stalk to give to mankind, a boon expressly forbidden by Zeus. As a punishment for his championship of human beings in opposition to Zeus, Prometheus was bound to a rocky crag and a vulture ate at his liver, which would grow back again for each day's repast. Thus the name Prometheus becomes synonymous for the archetypal champion, with fire his symbol of defiance and progress. The adjective promethean means courageous, creative, original, and life-sustaining. Beethoven's music may be called promethean, and Mary Shelley called her gothic horror novel *Frankenstein, A Modern Prometheus*.

protean Proteus was a sea-god who could change shape and who possessed knowledge of the future. To obtain information, one had to grapple with him until his metamorphoses ceased. Protean means of changeable or variable form, or having the ability to change form.

psyche/psychology, etc. The Greek word for the soul was *psyche*. The myth of Cupid and Psyche can be interpreted as the soul's longing for an eventual reunification with the divine through love. For Freud *psyche* means mind and *psychic* refers to mental activity; many English derivatives describe the study of the mind and the healing of its disorders: psychology, psychiatry, etc. In psychoanalytic terms, the

soul is the mind, the seat of thoughts and feelings, our true self, which seeks to orient our lives to our surroundings.

python Apollo established the major sanctuary for his worship and his oracle at Delphi, but to do so he had to kill the serpent that guarded the site. He named his new sanctuary Pytho, from the rotting of the serpent after it had been killed (the Greek verb *pythein* means to rot); or the serpent's name was Python. A python today belongs to a particular family of nonvenomous Old World snakes.

Rhadamanthus/Rhadamantine or **Rhadamantine** Rhadamanthus, along with Minos and Aeacus, is one of the judges in the Underworld. Rhadamanthus and Rhadamanthine describe anyone who is rigidly just and strict.

rich as Croesus Croesus was the king of Lydia who possessed great wealth that became legendary. Thus to emphasize their possession of extreme riches we describe a person as "rich as Croesus."

saturnalia/saturnian/saturnine/saturnism The titan Saturn (equated with the Greek Cronus) castrated his father, hated his children, devoured them, and was castrated and overthrown by his son Zeus. After his defeat, Saturn ruled over the Golden Age of the world; according to Roman mythology, he fled to the west and brought a new golden age to Italy. Originally Saturn was an old Italic deity of the harvest; the Romans built a temple to Saturn on the Capitoline Hill and each December celebrated the winter planting with the Saturnalia, a time of revelry and the giving of presents. Saturnalia today denotes a period of unrestrained or orgiastic revelry. Saturn gives his name to the sixth planet from the sun, the second largest planet in the solar system after Jupiter. Anyone born under the influence of Saturn may have a saturnine temperament, which is to say gloomy or melancholy, characteristics of the god who castrated his father and was overthrown. Saturnian simply means pertaining to the god or the planet Saturn. The planet Saturn was also associated with the element lead, and so the term for lead poisoning is saturnism.

satyr/satyriasis Satyrs were male woodland deities with the ears and legs of a goat who worshiped Dionysus (Bacchus), god of wine, often in a state of sexual excitement. A satyr today is nothing more than a lecher. A man who has an excessive and uncontrollable sexual drive suffers from satyriasis. See **nymph/nymphomania/nympholepsy**.

Scylla and Charybdis Scylla, once a beautiful maiden, was transformed into a hideous creature with the heads of yapping dogs protruding from her midriff. Charybdis was a terrible whirlpool. Both these

dangers were said to lurk in the Strait of Messina between southern Italy and Sicily, a terror to sailors who endeavored to navigate these waters. The phrase between Scylla and Charybdis is much like the English between a rock and a hard place; it denotes a precarious position between two equally destructive dangers.

siren/siren song The Sirens were nymphs (encountered by Odysseus) often depicted with birdlike bodies, who sang such enticing songs that seafarers were lured to their death. A siren has come to mean a seductive woman. It can also denote a device that uses compressed steam or air to produce a high, piercing sound as a warning. A siren song refers to something bewitching or alluring that also may be treacherous.

sisyphean Sisyphus was a famous resident of Hades who was condemned to roll an enormous rock up a hill only to have it fall back down, a punishment for revealing the secret of one of Zeus' love affairs. A sisyphean task has become a term for work that is difficult, laborious, almost impossible to complete. See **tartarean** and **tantalize**.

sphinx The sphinx terrorized Thebes before the arrival of Oedipus (see **Oedipal complex**). She was a hybrid creature with the head of a woman, body of a lion, wings of an eagle, and the tail of a serpent. She punished those who failed to answer her riddle with strangulation (the Greek verb *sphingein* means to strangle). At some point the Greek sphinx became associated with Egyptian iconography, in which the sphinx had a lion's body and a hawk's or man's head. When we liken someone to a sphinx, we have in mind the great riddler of the Greeks and not the Egyptian conception. A sphinx is an inscrutable person given to enigmatic utterances (the Greek word *ainigma* means a riddle).

stentorian Stentor, the herald of the Greek army at Troy, could speak with the power of fifty men. Today we may liken a powerful orator to Stentor and designate the effect of his voice as stentorian.

stygian Across the river Styx, the "hateful" river that circles the realm of the Underworld, the ferryman Charon transports human souls to Hades. The gods swear their most dread and unbreakable oaths by invoking the name of the river Styx. Stygian describes something to be linked with the infernal regions of Hell, something gloomy or inviolable.

syringe Syrinx ("pan-pipes") rejected the god Pan and was turned into a bed of reeds from which he fashioned his pan-pipes. A syringe is a device made up of a pipe or tube, used for injecting and ejecting liquids. Syringa is a genus of plants used for making pipes or pipestems.

tantalize Tantalus, who through *hubris* tried to feed the gods human flesh, is punished by being in a state of perpetual thirst and hunger, food and drink always just beyond his reach. To tantalize is therefore to tease and tempt without satisfaction. See **sisyphean** and **tartarean**.

tartarean Tartarus is the region in the realm of Hades reserved for the punishment of sinners, among whom are those who have committed the most heinous crimes and suffer the most terrible punishments. The adjective tartarean refers to those infernal regions. See **sisyphean** and **tantalize**.

terpsichorean From Terpsichore, one of the nine Muses, comes the adjective terpsichorean, which refers to her special area of expertise, dancing. See **Muse**.

titan/titanic The twelve Titans, the second generation of gods, born of Ge and Uranus, were of gigantic stature, most of them conceived of as natural forces, and although defeated and punished by Zeus, virtually invincible. Their massive strength is preserved in the adjective titanic, which was also the name given to the ocean vessel thought to be unsinkable. To call someone a titan is to emphasize one's enormous mastery and ability in any field or endeavor.

Trojan horse The Trojans were fooled and dragged into their city a large, wooden horse, which deceptively contained in its belly enemy Greek soldiers; the result was the utter destruction of Troy. In computer terminology, a Trojan horse is a potentially dangerous piece of software, disguised as harmless but a destructive application, which also may be downloaded from a website or as an e-mail attachment. It is different from a computer virus because it does not replicate itself.

typhoon Zeus' struggle with the dragon Typhon (also named Typhaon or Typhoeus) was the most serious battle that he had before finally consolidating his rule. Typhon had one hundred heads and tongues, fire shot out of his eyes, and terrible cries

bellowed from his throats. The word typhoon, meaning a severe tropical hurricane that arises in the China Sea or the western Pacific Ocean, comes from the Chinese *ta* ("great") and *feng* ("wind"), but the form of the word is influenced by the name Typhon.

venereal/venery/veneration Venus was the powerful Roman goddess of love, equated with the Greek Aphrodite, who was born from the foam around Uranus' castrated genitals. Her dominant sexual aspect is made clear by the nature of her origin. The adjective venereal denotes a sexually transmitted disease, and the noun venery is indulgence in sexual license. Veneration, however, is the act of showing respectful love, adoration, or reverence.

volcanic/volcano/volcanism/volcanize/volcanology, etc. (each of these words may also be spelled with vul-) The Roman god Vulcan, identified with the Greek Hephaestus, was the supreme craftsman of the gods. His helpers were three Cyclopes and his forge was located in various places, but most often under Mt. Aetna in Sicily, or similar volcanic regions, which betray its presence. A volcano is a vent in the earth's crust that spews forth molten material and thereby forms a mountain. Volcanism or vulcanism refers to any volcanic force or activity. To vulcanize is to subject a substance, especially rubber, to such extremes of heat that it undergoes a change and thereby becomes strengthened. Volcanology is the scientific study of volcanic phenomena.

Wheel of Fortune Fors or Fortuna was an Italic fertility goddess who controlled the cycles of the seasons and became associated with the Greek conception of good or bad fortune (*tyche*). She is often represented holding the cornucopia in one hand and a wheel in the other, to signify the rising and falling of an individual's prospects. From that iconography comes wheel of fortune, a device used in a game of chance. See **cornucopia**.

zephyr Zephyrus is the west wind (see **aurora borealis**), which signals the return of spring. Today a zephyr is a pleasant, gentle breeze, as well as a reference to any insignificant or passing thing.

THE GREEK SPELLING OF NAMES

In the transliteration of Greek into English, the letter upsilon (*υ*) usually appears as *y*. The letter *χ* usually becomes *ch* but sometimes *kh*; both forms are given below. The following changes are to be noted in the Latin and English spelling of Greek words*:

k = c:	Kastor = Castor
ai = ae, or e:	Graiai = Graeae; Klytaimnestra = Clytaemnestra, Clytemnestra
ei = e or i:	Medeia = Medea; Kleio = Clio

CAPTIONS FOR COLOR PLATES 1–10

1. *Jupiter and Thetis*, by J. A. D. Ingres (1780–1867). Oil on canvas, 1811; 136 × 101 in. In this huge painting, Jupiter is enthroned among the clouds with his attributes, the scepter and the eagle. Thetis kneels and touches Jupiter's chin in a gesture of supplication. To the left Juno (Hera) appears threateningly, and reliefs of the battle of gods and giants decorate the base of Jupiter's throne.
2. *Dionysus*. Kylix by Exekias, ca. 530 B.C.; diameter 4½ in. The scene depicts the story told in the *Homeric Hymn to Dionysus*. The god reclines on the pirates' ship, round whose mast a grape-laden vine entwines itself. The crew have leaped overboard and have been transformed into dolphins.
3. *Christus Apollo*. Vault mosaic, third century A.D.; height of vault 72 in. Christ is shown with the attributes of the sun-god (Apollo or Helius), ascending into the vault of the sky on a chariot drawn by four white horses (two are missing from the damaged part). The rays emanating from his head form a cross. Across the background trails the ivy of Dionysus, another pagan symbol of immortality used in early Christian art. This vault mosaic is in a Christian tomb in the cemetery beneath the basilica of St. Peter's in the Vatican.
4. *The Lycurgus Cup*. Glass, early fourth century A.D.; height 6½ in. The Thracian king Lycurgus is trapped in the vine of Dionysus (who appears on the other side of the cup, along with a nymph, a satyr, and Pan), as a punishment for his persecution of the god. The axe with which he tried to cut down the vine lies useless behind his left foot. This "cage cup" is carved from green glass, which is translucent red when placed in front of light. The glass has been undercut to show the agony of Lycurgus in high relief. The gilt-bronze rim is a nineteenth-century addition.
5. *The Rape of Helen by Paris*, attributed to a follower of Fra Angelico. Oil on wood, ca. 1450; 20 × 24 in. The companions of Paris carry Helen (distinguished by her central position and headdress) and three of her companions from a temple (as related by Dares Phrygius) to a waiting ship, accompanied by a cupid in the foreground. Paris may be the central figure in the group on the left. This octagonal painting was originally a panel in a wedding chest, perhaps as a warning of the dangers of marital infidelity.

PLATE 10 *Las Hilanderas (The Weavers)*, by Diego Velázquez. (Madrid, Prado.)

6. *The Feast of the Gods*, by Giovanni Bellini (1430–1516), with additions by Titian. Oil on canvas, 1514; 67 × 74 in. Painted when the artist was eighty-four years old, this painting has been called “both mysterious and comic.” Its subject is the attempt of Priapus to rape the nymph Lotis (cf. Ovid, *Fasti* 1.391–440 and 6.319–346, where the intended victim is Vesta), shown on the right. The gods appear as young Renaissance men and women: Jupiter (drinking from a cup) is in the center, Mercury (wearing a helmet) reclines in the left center foreground, and a group consisting of a satyr, Silenus, and Dionysus (kneeling on one knee) is on the left. Between Dionysus and Silenus is the donkey whose braying woke Lotis.
7. *Venus and Adonis*, by Paolo Veronese (Paolo Caliari, 1528–1588). Oil on canvas, 1584; 83½ × 75 in. Adonis sleeps in the lap of Venus, who fans him with a small flag. A cupid restrains one of the hounds, eager for the hunt that will bring the death of Adonis. Veronese transforms the text of Ovid (*Metamorphoses* 10.529–559), and the last moments of the lovers together are enriched by the splendid colors of their robes, while the darkening sky foreshadows the tragedy.
8. *The Discovery of the Infant Erichthonius*, by Peter Paul Rubens (1577–1640). Oil on canvas, ca. 1616; 85 × 125 in. Rubens has painted the moment when Aglauros has opened the basket containing Erichthonius and shows him to her sisters, Pandrosos (on the right) and Herse (on the left) with a brilliant red robe. Cupid gestures towards her as the future bride of Mercury. Behind is a fountain of the many-breasted Artemis, whose fertility is echoed by the herm of the lascivious god Pan, on the left. The identity of the old woman is not known.
9. *Nessus and Deianeira*, by Guido Reni (1575–1642). Oil on canvas, 1623; 104 × 77 in. Reni painted a series of four scenes from the life and death of Heracles for Ferdinando Gonzaga, Duke of Mantua, in 1621. When the original *Nessus and Deianeira* was removed to Prague (where it still is) during the sack of Mantua by the troops of Charles V, Reni replaced it with this splendid and romantic interpretation of the myth. The young centaur, triumphant in his conquest, bears off Deianeira, who twists away as she realizes the fate that has overtaken her, while Heracles in the background takes an arrow from his quiver. Thus Reni focuses on the joy of the centaur, soon to be turned to tragedy for himself, Deianeira, and Heracles. The contrast with the stark realism of the Attic artist’s painting on the seventh-century B.C. vase on page 536 is a remarkable example of the way in which the same myth can inspire different emotions. (*Paris, Musée du Louvre.*)
10. *Las Hilanderas (The Weavers)*, by Diego Velazquez (1599–1660). Oil on canvas, ca. 1657; 66½ × 98 in. (as shown); enlarged in the eighteenth century to 87 × 114 in. In the foreground tapestry weavers are at work, with an older woman to the left and a young one to the right as the principal figures. In the background women view the completed tapestry, in which the helmeted Athena is about to strike Arachne with her shuttle, in anger at her subject, *The Rape of Europa*. Velazquez has included reference to Titian’s *Rape of Europa*. (*Madrid, Prado.*)

CAPTIONS FOR COLOR PLATES 11–21

11. *Cephalus and Aurora*, by Nicolas Poussin (1594–1665). Oil on canvas, ca. 1630; 38 × 51½ in. Cephalus gazes at a portrait of Procris, held up to him by a cupid, as he resists the advances of Aurora. In the background Pegasus waits to pull the chariot of the Dawn. The sleeping god with the urn is a river-god used by Poussin to signify a mythological landscape.
12. *The Forge of Vulcan*, by Diego Velázquez (1599–1660). Oil on canvas, 1630; 88 × 114 in. Velázquez has painted the moment when Helius tells Hephaestus that his wife, Aphrodite, is making love to Ares (Homer, *Odyssey* 8.270–271). At the appearance of Helius in the forge Hephaestus and his four assistants stop their work on a suit of armor (perhaps for Ares himself), stunned by the news. Helius, whose white flesh, blue-thonged sandals, and orange robe contrast with the burly torsos of the blacksmiths, is both sun-god and Apollo, god of poetry (as his laurel wreath indicates). The rays from his head illuminate the dark forge, while the exquisite white jug on the mantelpiece provides another focus of light on the opposite side of the painting. Velázquez catches the intersection of divine omniscience and the blacksmith's toil without diminishing the wit and pathos of Homer's tale. The great anvil in the left foreground, we know, waits for Hephaestus to forge on it the inescapable metal net that will trap the lovers.
13. *The Triumph of Neptune and Amphitrite*, by Nicolas Poussin (1594–1665). Oil on canvas, ca. 1637; 45 × 58 in. Amphitrite is at the center, accompanied by Nereids and Tritons as she rides over the sea in her shell drawn by four dolphins. Neptune comes alongside his bride in a chariot drawn by four sea-horses. Above, winged cupids (one with butterfly's wings and one with a wedding torch) strew flowers, and in the background to the left ride two cupids, above whom fly the swans of Venus. Poussin exuberantly reinterprets a theme found in Roman floor mosaics and in Raphael's fresco *Galatea* (ca. 1512) in the Villa Farnesina at Rome.
14. *Pilgrimage to the Island of Cythera*, by Antoine Watteau (1684–1721). Oil on canvas, 1717; 51 × 76 in. To the right, three pairs of lovers prepare to embark for Cythera (or, perhaps, to sail from the island), while below five other couples approach the richly ornamented galley, whose shell motifs recall the birth of Venus. An armless herm of Venus looks down on the lovers from the wood on the right. It is garlanded with flowers and Cupid's bow and arrows are tied to it by a ribbon. A half-naked cupid, seated on his quiver, tugs at the skirt of one of the lovers, and other cupids fly through the air (one with a torch) and around the galley. The spirit of love fills Watteau's exquisite landscape, in which eighteenth-century lovers find joy in the timeless mythological setting. Watteau submitted this painting to the French Academy as his "reception piece," and he painted a second version (now in Berlin) in 1718. The Academy gave it the title *Une feste galante* (a courtly celebration), but Watteau's title more accurately expresses the power of the goddess who rules the island of Cythera.

15. *Earth: Vertumnus and Pomona*, by François Boucher (1703–1770). Oil on canvas, 1749, $34\frac{1}{2} \times 53\frac{1}{2}$ in. *Earth* is one of a planned series representing the Four Elements by means of classical myths. The legend of Pomona and Vertumnus illustrates the fertility and variety of Earth. Pomona is shown as a beauty at the court of Louis XV in a pastoral scene such as was produced in the court ballets and operas at Versailles. The deception of Vertumnus is indicated by the mask held up by the cupid, and his intentions are made clear by the lascivious head of Pan on the urn at the right and by the fountain on the left with Cupid riding a dolphin.
16. *Ariadne Asleep on the Island of Naxos*, by John Vanderlyn (1775–1852). Oil on canvas, 1814; 68×87 in. Ariadne lies asleep, unaware that Theseus (who can be seen in the background at the right) is setting sail. Painted in Paris, this is one of the earliest nudes by an American painter to have been exhibited in America. Vanderlyn hoped that his masterpiece “while not chaste enough . . . to be displayed in the house of any private individual . . . [would] attract a great crowd if exhibited publicly.”
17. *Jupiter and Semele*, by Gustave Moreau (1826–1898). Oil on canvas, 1895; $83\frac{1}{2} \times 46\frac{1}{2}$ in. This exuberant representation should be compared with the economical sketch by Rubens (shown on page 271). Jupiter, young and beardless, sits enthroned (“like an Indian Rajah,” it has been said) with the dying Semele over his right knee. His eagle, with open wings, is at the base of the throne, behind the figure of Pan. At the bottom is the “realm of Erebus,” and all around are symbolic figures drawn from Moreau’s reading of Ovid and modern literature, with architectural details and ornamentation from Greek and oriental traditions. Moreau considered this work to be his masterpiece, yet it was never publicly exhibited. (*Paris, Musée Gustave Moreau*).
18. *Pandora*, by Odilon Redon (1840–1916). Oil on canvas, ca. 1910; $56\frac{1}{2} \times 24\frac{1}{2}$ in. Pandora, holding her box, is framed by jewellike flowers, but above her is a leafless tree. Redon used symbols “to clothe ideas in a sensuous form” (in the words of the *Symbolist Manifesto* of 1886). This painting is nearly contemporary with Freud’s *Interpretation of Dreams* (1900). Like Freud, Redon used the symbols of mythology to express his innermost ideas and emotions.
19. *Icarus*, by Henri Matisse (1869–1954). Stencil print of a paper cutout, 1947; $16\frac{1}{2} \times 25\frac{1}{2}$ in. This is Plate 8 (p. 54) in Matisse’s *Jazz* (Paris: Tériade, 1947). The plates were printed from paper cutouts pasted on and painted through stencils. He wrote the text in his own firm handwriting, and opposite *Icarus* is the last of seven pages titled *L’Avion* (The Airplane). Matisse reflects on the freedom in space experienced by air travelers, then he concludes “Ought one not to make young people who have finished their studies take a long journey in an airplane.” The red heart of Icarus—symbol of his courage and creativity—stands out in the black silhouette against the sky and stars that he tried, and failed, to reach.
20. *Hector and Andromache*, by Giorgio de Chirico (1888–1978). Oil on canvas, 1917; $35\frac{1}{2} \times 23\frac{1}{2}$ in. Husband and wife, mannequins backed by receding frames, part at the Scaean Gate in an austere, stagelike setting with receding perspective. They are sheathed in geometrically shaped metallic plates, and the baby Astyanax is reduced to a steel wedge with a black disk for his head. De Chirico’s images of the intersection of war and the family are a disturbing interpretation of Homer’s moving scene.
21. *Landscape for Philemon and Baucis*, by David Ligare (b. 1945). Oil on canvas, 1984; 32×48 in. The cottage of Baucis and Philemon has become a temple, while they have been transformed into the intertwined trees on the right. The lake conceals the homes of the villagers who were so inhospitable to Zeus and Hermes. The size of the trees and the ruinous state of the temple indicate that the metamorphosis took place long ago.

INDEXES

INDEX OF AUTHORS, ARTISTS, COMPOSERS, AND TITLES

This index is particularly useful for finding information about material in Chapters 27 and 28 (on the survival of Greek and Roman mythology) and identifying the ancient sources used throughout the book.

- Abandon d'Ariane, L' (Milhaud), 711
Abduction of Persephone, The (Rubens), 309
Ab Urbe Condita (Livy), 29
Achilleid (Statius), 451
Achilles, Agony and Ecstasy in Eight Parts (Manowar), 730
"Achilles Last Stand" (Zeppelin), 729
Achilles Loved Patroclus (Jones), 745
Acis (Lully), 707
Acis and Galatea (Handel), 708
Acis et Galatée (Lully), 707
Admeto (Handel), 708
Adonais (Chadwick), 721; (Shelley), 688
Adone (Monteverdi), 706
Adonis (Rice), 719
Adrastus and Thyestes at Sicyon (Darius painter), 407
Aegyptische Helena, Die (Strauss), 713
Aeneas and the Sibyl in the Underworld (Bruegel), 344
Aeneas Carrying Anchises (Attic), 479
Aeneas Flight from Troy (Barocci), 478
Aeneid (Vergil), 28, 490, 646–652; Book 1, 646, 648–649; Book 2, 477–478; Book 4, 649–651; Book 5, 637; Book 6, 234, 339–343, 345–348, 604; Book 8, 631–632, 637; Book 12, 649
Aeolus (Euripides), 617
Aeschylus, Aeschylean, Agamemnon, 131, 409–411, 477; *Eumenides*, 412; *Libation Bearers* (Choephoroi), 414, 417–420; *Oresteia*, 412, 710; *Prometheus Bound*, 88–91, 92–93, 517; *Seven against Thebes*, 396–397; *Suppliants* (Suppliants), 517, 736
Aetia (Causes) (Callimachus), 668
Africa (Petrarch), 677, 695–696
Afternoon of a Faun (Lazovsky), 746
Agamemnon (Aeschylus), 409–411, 477

GLOSSARY/INDEX OF MYTHOLOGICAL AND HISTORICAL PERSONS, PLACES, AND SUBJECTS

A simple guide to pronunciation follows most words in this index. The long vowels are to be pronounced as follows: ā (cape), ē (bee), ī (ice), ō (boat), and ū (too). Syllabification is marked by a prime mark (') and a hyphen (-). Syllables that precede the prime are stressed. **Note:** Pictorial representations are in **bold-face** type.

- Abas (a' bas), son of Lynceus and Hypermnestra and grandfather of Perseus, 508
- Acamas (ak' a-mas), son of Theseus and Phaedra, 549
- Acca Larentia (ak' ka lar-en' shi-a), wife of Faustulus who raised Romulus and Remus, 657
- Acestes (a-ses' tēz), Trojan, king of Egesta, 647
- Achaemenides (ak-e-men' i-dēz), one of Odysseus' men, encountered by Aeneas, 647
- Achaeus (ak-ē' us), eponymous ancestor of the Achaeans, 78
- Achelōis (ak-e-lō' us), river in western Greece and its god, with whom Heracles wrestled for Deianira, 534
- Acheron (ak' e-ron), river of "Woe" in the Underworld, 341, 349
- Achilles (a-kil' lēz), son of Peleus and Thetis and the greatest Greek hero in the Trojan war, 23, 46, 123–134, 129, 330–331, 450–451, **452**, 454, 455–456, 459–468, **465**, **467**, 471–472, 490, 605, **611**, 687–688, 689
- Acis (ā' sis), Galatea's beloved, changed into a river-god, 147–150
- Acrisius (ak-ris' i-us), Danaë's father, accidentally killed by Perseus, 505, 506, **507**, 508, 514–516
- Acropolis (a-kro' po-lis), hill of Athens on which the Parthenon and Erechtheum were built, 550
- Actaeon (ak-tē' on), son of Aristaeus and Autonoe whom Artemis turned into a stag because he saw her naked, 203–206, **205**, 381, **680**
- Admetus (ad-mē' tus), king of Pherae who accepts the offer of his wife Alcestis to die in his place, 242, 527, 574, 606
- Adonis (a-do' nis), son of Cinyras and Myrrha and Aphrodite's beloved, fatally wounded by a boar's tusk, and a resurrection god, from whose blood sprang the anemone, 177–179, **178**
- Adrasteia (ad-ra-stē' a or ad-ra-sī' a), Necessity, a concept or goddess, 362
- Adrastus (a-dras' tus), the sole survivor of the Seven against Thebes, 398, 565; son of Gordias, accidental murderer of Croesus' son, Atys, 138–140
- Aea (ē' a), "Land," for Homer, the place to which the Argonauts sailed, 573
- Aeacus (ē' a-kus), a judge in the Underworld and father of Peleus, 349
- Aeaea (ē-ē' a), island, home of Circe, 489
- Aeetes (ē-ē' tēz), "Man of the Land," son of Helius, king of Colchis, and father of Medea, 575, 584
- Aegeus (ē' je-us), son of Pandion and Theseus' father (as Poseidon) who gives his name to the Aegean sea, 549, 555, 561, 588, 594
- Aegialia (ē-ji-a-lī' a), unfaithful wife of Diomedes, 482
- Aegimius (ē-jim' i-us), king of the Dorians, helped by Heracles, 533
- Aegina (ē-jī' na), Asopus' daughter, carried off by Zeus, 613
- Aegis (ē' jis), "goatskin," shield, especially that of Zeus and Athena, 111, 166
- Aegisthus (ē-jis' thus or e-jis' thus), son of Thyestes and lover of Clytemnestra, 406, **408**, 408–411, **410**
- Aegyptus (ē-jip' tus), king of Egypt, brother of Danaüs, and father of fifty sons, 508, 517
