Introduction	vii
Guide to the thesaurus	viii
<b>Concise Oxford Thesaurus</b>	<b>1</b>
Wordfinder	<i>central section</i>

# Introduction

A thesaurus contains lists of words that have the same or a similar meaning to another word. It can help you to express yourself more precisely and add richness and variety to your writing by providing an array of alternative words that can be used in place of the one you already have in mind. It can lead you to a word that is on the tip of your tongue but remains stubbornly elusive, and it can expand your vocabulary by introducing you to words or phrases that you may not have previously encountered. A good thesaurus is also an invaluable tool for solving crosswords and for many other word games.

The third edition of the *Concise Oxford Thesaurus* has been revised, updated, and completely redesigned. It draws on our systematic research and analysis of the hundreds of millions of words of English contained in the Oxford English Corpus, taken from books, newspapers, magazines, and many other sources besides. This analysis enables us to determine how words are really used by native speakers and so provide better-matching and more useful sets of synonyms than ever before. The synonym sets are divided into numbered senses which relate to the various different meanings of the word in question and most synonym sets are preceded by an example sentence to make it easy to identify the sense you are seeking. The synonyms themselves are arranged in order of their closeness in meaning to the target word, with the closest one given first and printed in bold type. Antonyms, words with opposite meanings, are also provided for most of the entries in this thesaurus.

Apart from synonym lists, the *Concise Oxford Thesaurus* contains hundreds of special Word Link features, which are designed both to provide extra help with word games and to further enrich your vocabulary. Work Links contain a selection of words that, while not being synonyms, are closely associated with the entry word in some other way. At the main entry **cave**, for example, you will find the terms for the study or exploration of caves (*speleology*), for the deposits of calcium salts found in caves (*stalagmite* and *stalactite*), and for a person who lives in a cave (*troglydite*).

The newly designed Wordfinder section in the centre of the thesaurus contains hundreds of lists of words covering a wide range of topics, from the names of species of mammals, birds, and fish to types of pasta or the different parts of a ship. The lists are organized into thematic groups to make them especially browsable, while the handy index provided at the beginning of the section enables you to go straight to the information you need.

## LABELS

Most of the synonyms in the *Concise Oxford Thesaurus* are part of standard English, but some are suitable only in certain contexts or tend to be found only in certain types of writing. These synonyms are grouped at the end of their respective senses, preceded by a label (or a combination of labels).

### Register labels

Register labels refer to a particular level of use in the language. They indicate whether a term is informal, formal, historical, etc., and therefore in which contexts it would be appropriate to use such a term.

<b>informal</b>	e.g. <i>gawp</i> as a synonym for <i>stare</i> , or <i>lingo</i> for <i>language</i> : normally used only in speech or informal writing or email
<b>formal</b>	e.g. <i>dwelling</i> as a synonym for <i>home</i> or <i>house</i> : normally used only in writing, especially in official documents
<b>dated</b>	e.g. <i>tommyrot</i> as a synonym for <i>nonsense</i> : no longer used by most English-speakers, but still used by older people or to give a humorous or other effect
<b>literary</b>	e.g. <i>foe</i> as a synonym for <i>enemy</i> : found only or mainly in works of literature
<b>technical</b>	e.g. <i>occlude</i> as a synonym for <i>obstruct</i> : normally used only in technical language, though not restricted to a particular specialist field
<b>old use</b>	e.g. <i>comely</i> as a synonym for <i>attractive</i> : not in ordinary use today, though sometimes used to give an old-fashioned effect and also found in the literature of the past
<b>historical</b>	e.g. <i>serf</i> : only used today to refer to things that are no longer part of modern life
<b>euphemistic</b>	e.g. <i>tired and emotional</i> as a synonym for <i>drunk</i> : used in instead of a more direct or rude term
<b>humorous</b>	e.g. <i>transmogrify</i> as a synonym for <i>transform</i> : used with the intention of sounding amusing or playful
<b>derogatory</b>	e.g. <i>brat</i> as a synonym for <i>child</i> : meant to convey a low opinion or to insult someone
<b>rare</b>	e.g. <i>oppugnant</i> as a synonym of <i>antagonistic</i> : not in normal use today or in previous times

## Geographical labels

English is spoken throughout the world, and while most of the words used in standard British English will be the same as those used in other varieties, there are some words which are only found in one type of English. For example the normal word in American English for sweets and confectionery is *candy*. If a word has the geographical label *Brit.* in this thesaurus, this means that it is used in standard British English but not in American English, although it may be found in other varieties such as Australian English. The labels *US* and *N. Amer.*, on the other hand, mean that the word is typically American and is not standard in British English, though it may be found elsewhere.

## Subject labels

These are used to show that a word or sense is connected with a particular subject or specialist activity such as *Medicine*, *Law*, or *Computing*.

## Trademarks

This thesaurus includes some words which have, or are asserted to have, proprietary status as trademarks or otherwise. Their inclusion does not imply that they have acquired for legal purposes a non-proprietary or general significance, nor any other judgement concerning their legal status. In cases where the editorial staff have some evidence that a word has proprietary status this is indicated in the entry for that word by the label *trademark*, but no judgement concerning the legal status of such words is made or implied thereby.
