2. *Physical Geogr.* a. Undercutting by water, esp. backward erosion by a waterfall of softer layers of rock at its base; headward erosion of hillsides by springs.

1863 J. R. GREEN *Lett.* (1901) II. 126, I have noticed... the wonderful sapping of the chalk cliffs going on here [Margate]. 1902 W. M. DAVIS in *Bull. Mus. Compar. Zool.* XXXVIII. 328 Whatever flood plains may have been produced during the excavation of the present basin floor, the streams have now so well taken advantage of their opportunity for lateral corrosion or 'sapping' that terraces at high and intermediate levels are everywhere obliterated. 1932 W. H. EMMONS et al. *Geol.* VI. 133 As the swirling water back of the falls loosens the soft, shaley formation it removes it piecemeal and undermines the capping limestone, until finally it remains as an inadequately supported overhanging ledge from which large masses of rock plunge into the pool at the bottom of the falls. This process of undercutting is termed sapping. 1936 *Proc. Geologists' Assoc.* XLVII. 40 A coombe formed in jointed chalk by the sapping back of springs. 1957 *Ibid.* LXVIII. 31 There remains the curious series of right-angled bends in the Ravensburgh Valley system, which has been attributed to sapping along major joints. 1970 R. J. SMALL *Study of Landforms* II. 53 On rocks such as chalk and limestone the actual sources of streams are extended into escarpments and steep slopes by the process known as 'spring sapping'. This involves underground chemical erosion, surface stream erosion, and slumping of moistened debris around the springhead.

b. Undermining by glacial erosion; (*loosely*) plucking; *spec.* erosion of rock slopes by frost action under the margins of a glacier.

1899 W. D. JOHNSON in *Science* 20 Jan. 106/1 An unrecognized process was set forth, that of sapping, whose action is horizontal and backward... The tendency of the sapping process is to produce benches and cliffs. 1938 *Geol. Mag.* LXXV. 261 As the wall at the head of the cirque retreats under the action of sapping and plucking, immediately downstream the ice abrades and smoothes. 1954 *Jrnl. Glaciol.* II. 421 In accounting for these features [*sc. roches moutonnées*] the assumption ordinarily made is that rock has been removed by plucking or sapping from the downstream side, leaving that face steep and irregular. 1968 R. W. FAIRBRIDGE *Encycl. Geomorphol.* 741/1 The walls have been kept steep and caused to retreat by the collapse of unsupported rock faces as they have been undercut by the process of glacial 'sapping'... The explanation of sapping appears to be found in rending and disintegration of rock by the freeze-and-thaw process. 1972 J. G. MCCALL in C. Embleton *Glaciers & Glacial Erosion* xi. 217 The term sapping, as used here, implies frost-riving on the rock slopes under the margins of a glacier. It is produced by the freezing of any water which flows in under the 'cold' glacier and, in the case of cirques, it results in a horizontal retreat of the headwall.

saprobe ('sæprəʊb). *Biol.* [f. Gr. *σαπρός* putrid + *βίος* life; cf. G. *saprobie* (Kolkwitz & Marsson 1902, in *Mittheilungen aus der K. Prüfungsanstalt f. Wasserversorgung und Abwässerbeseitigung* I. 46).] Any organism that derives its nourishment from decaying organic matter.

1932 G. W. MARTIN in *Bot. Gaz.* XCIII. 427 The word *saprophyte* and its derivatives, implying that a fungus is a plant, can be replaced by *saprobe* (*σαπρός* + *βίος*), which is without such implication. 1952 C. J. ALEXOPOULOS *Introd.*

Mycol. i. 30 Fungi obtain their food either as parasites or saprobes. Some are obligately parasitic or saprobic. 1971 G. C. AINSWORTH *Ainsworth & Bisby's Dict. Fungi* (ed. 6) 518 Saprobe is the preferred usage for fungi.

saprobial (sə'prəʊbiəl), *a. Ecol.* [f. SAPROB(IC *a.* + -IAL.)] Serving as a measure of saprobity.

1965 *Hydrobiologia* XXV. 523 The secondarily introduced methods of statistical calculation and expression of saprobial indices may only pretend an exact mathematical basis. 1970 J. SCHWOERBEL *Methods Hydrobiol.* vii. 155 The saprobial valency is better characterized than the allotment to a single zone of the saprobic system.

saprobic (sə'prəʊbɪk), *a. Ecol.* [f. G. *saprob-ie* SAPROBE + -IC.] a. Characterized by the prevalence of decaying organic material; *spec.* = *polysaprobic* adj. s.v. POLY-1; *saprobic system*, a system by which a body of polluted water is divided into zones characterized by the presence of certain organisms that are treated as indicators of the degree of pollution.

1913 *Bull. Illinois State Lab. Nat. Hist.* IX. x. 498 We will distinguish... three stages of impurity, by use of the following terms applicable both to the waters themselves and to the characteristic organisms, given here in the order of a diminishing impurity, namely: (1) septic or saprobic [etc.]. 1925 [see *polysaprobic* adj.]. 1967 A. F. BARTSCH in Olson & Burgess *Pollution & Marine Ecol.* vi. 294 Various North American biologists have expressed doubt as to the applicability of the saprobic system to coastal and estuarine environments. 1971 R. J. BENOIT in L. L. Ciaccio *Water & Water Pollution Handbk.* I. iv. 255 The general relationship between the saprobic zones and the zones shown by oxygen sag curves has been illustrated. 1975 D. F. WESTLAKE in B. A. Whitton *River Ecol.* iv. 126 In general macrophytes are not good indicators for use in the saprobic system of classifying rivers.

b. Pertaining to or characteristic of a saprobe; deriving nourishment from decaying organic matter.

1932 *Bot. Gaz.* XCIII. 429 The nutrition of the Phycomycetes is saprobic or parasitic. 1960 H. B. N. HYNES *Biol. Polluted Waters* xiii. 161 Complex organic... molecules encourage the growth of saprophytic plants and saprobic animals. 1976 *Nature* 27 May 336/2 The free-living saprobic form found in soil is mycelial.

Hence **sa'probical** *a.* = SAPROBIAL *a.*; **sapro'bicity** = SAPROBITY.

1961 *Arch. Hydrobiol.* LVII. 405 Tables of the saprobical valency of species studied by the authors as well as examples of the saprobiological evaluation are appended. 1971 *Ann. Rev. Microbiol.* XXV. 565 The rate of multiplication of the test organism, i.e., optimum biomass produced, is considered to be an integrated biological measure of the content of biologically active organic nitrogen in the water and thus a measure of the saprobicity. 1975 G. A. COLE *Textbk. Limnol.* iv. 61/2 Saprobiticity, the total of all the processes that are antithetical to primary production, is another classification of heterotrophy.

saprobiology (sæprəʊbaɪ'ɒlədʒɪ). [f. as next + BIOLOGY.] The study of saprobic environments.

1958 *Ecology* XXXIX. 547/2 It can be stated in terms used in saprobiology that the polysaprobity was changed into alpha-mesosaprobity. 1965 *Hydrobiologia* XXV. 524 The applicability in practice is... the main criterion of an applied scientific branch, as saprobiology is.

Hence **saprobio'logical** *a.*; **saprobi'ologist**.

1960 *Biol. Abstr.* XXXV. 3801/2 The saprobiological analysis is based on the determination of approximately 8,500 organisms. 1965 *Hydrobiologia* XXV. 526 Such problems as the influence of different amino acids... on the stimulation of the growth of *Sphaerotilus* and *Leptomit* cannot be solved by the saprobiologists alone. 1971 *Ann. Rev. Microbiol.* XXV. 574 Caspers & Karbe... have proposed a saprobiological classification of waters.

saprobiotic (sæprəʊbaɪ'ɒtɪk), *a. Biol.* [f. Gr. *σαπρός* putrid + *βιωτικός* -ός pertaining to life.] = SAPROBIC *a.*

1940 *Chambers's Techn. Dict.* 740/2 *Saprobiotic*, feeding on dead or decaying animals or plants. 1950 P. D. F. MURRAY *Biology* xlvii. 52 A saprobiotic organism (the term covers 'saprozoic' and 'saprophytic') is one which lives on the dead bodies of other organisms or their inanimate products. 1960 E. N. WILLMER *Cytol. & Evolution* ix. 151 Many flagellates... depend for their energy supplies on the extraction of materials dissolved in the fluid in which they are swimming, i.e. they lead a saprobiotic existence.

Hence **saprobio'tically** *adv.*

saprobity (sə'prəʊbɪtɪ). *Ecol.* [f. SAPROB(IC *a.* + -ITY.)] The degree to which the decomposition of organic material is occurring in an aquatic environment.

1956 *Archiv für Hydrobiol.* LI. 389 Utilization of the running water Macroorganism as Indicators of the water saprobity degrees (sensu Kolkwitz-Marsson). 1965 *Hydrobiologia* XXV. 523 The saprobity system is applicable only to organic pollution undergoing bacterial decomposition and it is useless for the assessment of the effects of poisons or other pollutional matters. 1973 BAYLY & WILLIAMS *Inland Waters & their Ecol.* xii. 254 The 'saprobity indices' of several European workers... are indirect measures of pollution based upon a combination of chemical, bacteriological, and biological features.

saprogenic (sæprəʊ'dʒɛnɪk), *a.* [f. Gr. *σαπρός* putrid + -GEN + -IC.] Causing decay or putrefaction; also, produced by putrefaction.

1876 tr. *Wagner's Gen. Pathol.* 599 Saprogenic or putrid infection. 1882 HUXLEY in *Nature* 9 Mar. 439 The results of recent researches, which tend to show that pathogenic

saprogenous (sæ'prɒdʒɪnəs), *a.* [f. Gr. σαπρός putrid + -GEN + -OUS.] = prec.

1892 *Brit. Med. Jnl.* 17 Sept. 47/3 *Lasex* (. . . August 18th, 1892) gives an account of an inquiry made by him into the properties of saprol. 1897 *Syd. Soc. Lex.*, *Saprol*, name for a crude mixture of creosols with carbohydrates and pyridine, used for rough disinfection.

|| **Saprolegnia** (sæprəʊ'leɪniə). *Bot.* [mod.L., f. Gr. σαπρός putrid + λέγν-ον border.] A genus of fungi (the type of the N.O. *Saprolegniaceæ* or *Saprolegniaceæ*), which chiefly infests the bodies of fish.

1866 BERKELEY in *Treas. Bot.* s.v. *Saprolegniæ*, The same animal has been observed, when immersed, to produce a *Saprolegnia*, and when surrounded merely by air to produce a *Mucor*. 1882 HUXLEY in *Nature* 9 Mar. 438/2, I tried some experiments on the transplantation of the *Saprolegnia* of the living salmon to dead animal bodies. 1885 KLEIN *Micro-Organisms* 146 *Saprolegnia*: colourless tubular threads, forming gelatinous masses on living and dead animal and vegetable matter in fresh water.

saprolite ('sæprəʊlaɪt). *Geol.* [f. Gr. σαπρός putrid + -LITE.] Soft, clay-rich, thoroughly decomposed rock formed *in situ* by chemical weathering of igneous and metamorphic rocks.

1895 G. F. BECKER in *16th Ann. Rep. U.S. Geol. Survey* III. 289, I propose the term *saprolite*. *Ibid.* 290 The deposits referred to . . . are gold-bearing saprolites. 1935 *Jrnl. Geol.* XLIII. 745 In the Appalachian Piedmont of the southern states, weathering has reduced the granitic rocks to an extensive mantle of incoherent clay, or saprolite, that in places extends to a depth of over 100 feet. 1948 *Prof. Papers U.S. Geol. Survey* No. 213. 125/2 The upper parts of the lodes were in the saprolite zone and were worked as residual placer deposits, but at the base of the saprolite these deposits graded into solid lodes. 1977 A. HALLAM *Planet Earth* 48/1 Chemical weathering can produce a rotted rock-form known as a saprolite, which is the product of chemical changes which have taken place *in situ*.

Hence **sapro'litic** *a.*; **saproliti'zation**, the process of formation of saprolite.

1904 L. J. SPENCER tr. *Bauer's Precious Stones* 361 Several crystals of rhodolite were found . . . embedded in a decomposed saprolitic rock. 1970 D. CARROLL *Rock Weathering* III. 20 Extensive areas in arid Western Australia are underlain by saprolitic rocks on which lateritic profiles have developed (probably in the Pliocene). *Ibid.*, Saprolitization also occurs in rocks that are covered by later deposits that protect them from erosion. An example is saprolitization under a cover of river gravel or sand through which water percolates.

sapropel ('sæprəʊpel). *Geol.* [a. G. *sapropel* (H. Potonié 1904, in *Sitzungsber. Ges. naturforsch. Freunde Berlin* 13 Dec. 243), f. as next.] An unconsolidated nitrogen-rich slime or sludge, formed of incompletely decomposed aquatic micro-organisms, esp. algæ, found in anaerobic environments on the bottoms of lakes and seas.

1907 *Rep. Brit. Assoc. Adv. Sci.* 1906 748 The sapropel is formed from the excrements and bodies of completely aquatic animals and plants which have lived in stagnant water, and therefore, because the water is stagnant, do not decay completely. *Ibid.*, Cannel coal . . . is a fossil sapropel. 1929 H. B. MILNER *Sedimentary Petrogr.* (ed. 2) 335 The coal-substance has been regarded by Potonié as 'sapropel', a solidified jelly-like carbonaceous slime. 1970 *Nature* 17 Oct. 200/1 Cores from the Mediterranean's three deep basins also yielded dolomites, . . . diatomites and organic sapropels. 1978 *Ibid.* 16 Nov. 259/2 The preservation of non-siliceous algae is uncommon, although found in the sapropel deposits of the USSR.

sapropelic (sæprəʊ'pelɪk), *a.* *Geol.* and *Zool.* [ad. G. *sapropelisch* (R. Lauterborn 1901, in *Zool. Anzeiger* XXIV. 50), f. Gr. σαπρός putrid + πηλός mud, earth, clay: see -IC.] Found in, characterized by, or derived from sapropel.

saprophyte ('sæprəʊfaɪt). [f. Gr. σαπρός putrid + φυτόν plant: see -PHYTE.] Any vegetable organism that lives on decayed organic matter.

1875 *Encycl. Brit.* III. 691/1 There are other degraded allies of green plants, which are content to work up again the imperfectly broken down products of decay. ||**saros** ('sɛəɾɒs). [Gr. *σάρος* or *σαρός* (Berossos), a. Assyro-Babylonian *sār(u)*.]

1. *Antiq.* The Babylonian name for the number 3600, and hence for a period of 3600 years.

The notion expressed in quot. 1662, that the saros consisted of 3600 days, is due to the desire to rationalize the incredible statements of Berossos with regard to the lengths of the reigns of the antediluvian kings of Babylon. Other expedients for the same purpose were adopted by early writers on chronology.

2. *Astr.* Adopted by modern astronomers as the name of the cycle of 18 years and 10³/₅ days, in which solar and lunar eclipses repeat themselves.

This use is founded on the statement of Suidas (app. due to some mistake) that the length of the saros was 18¹/₅ years. 1812 WOODHOUSE *Astron.* xxxv. 353 The period of 223 lunations, called by the Chaldean Astronomers, the Saros. 1868 LOCKYER *Elem. Sart (sɑ:t), *sb.*² and *a.* [Turki.] *A. sb.* *a.* A member of a settled people of mixed Turkoman and Iranian descent, living as town-dwellers and traders in Turkestan and parts of Afghanistan. Cf. TAJIK. *b.* The Eastern Turkic dialect of Uzbek spoken by the Sarts. *B. adj.* Of or pertaining to this people or their language.

The name is widely used, with varying degrees of exactness, to designate the sedentary people of this region. They are thus contrasted with the Kurds and others, by whom the term is considered derogatory. Other commentators view the Sarts as an ethnologically distinct people.

1871 R. B. SHAW *Visits to High Tartary* ii. 26 All the Khokandees whom I met with in Eastern Toorkistan agreed in affirming that Sart is merely a word used by the Kirghiz to denote all who do not lead a nomad existence like themselves, whether they be Tajiks or Oosbeks. 1879 *Encycl. Fergana, Turkestan, etc.] is, strictly speaking, not a linguistic designation, but denotes a dweller in cities and a merchant, as distinguished from a countryman and agriculturist, called Tajik. 1920 *Glasgow Herald* 31 Aug. 8 It is among the highly intelligent Sarts and Tajiks, speaking Persian and Arabic fluently and many of them conversant with Hindustani, that the Bolsheviks find their cleverest agents. 1946 F. M. BAILEY *Mission to Tashkent* iii. 36 Sart writers sometimes refer to themselves as Turks but this word is... misleading. 1953 O. CAROE *Soviet Empire* iii. 34 It was to sedentary dwellers of this kind, whether bilingual or speaking only Tajik, that the true Turks formerly applied the pejorative appellation of 'Sart'. 1954 PEI & GAYNOR *Dict. COURIS tr. *Pahlen's Mission to Turkestan* 10 Pahlen... regarded the Sarts as a distinct ethnic group with their own language. Originally... the word was applied to the sedentary, and... urban, population of Turkestan without any reference to race or language. A Sart might... be of Tadzhiik... Uzbek... or of mixed Iranian and Turkic stock; and... speak... Tadzhiik or Uzbek... There is no such thing as a Sart language. During the Soviet régime the word acquired a derogatory significance and is now no longer used.

It is doubtful whether the Sp. word is a transferred application (which, indeed, would be difficult to account for) of a Sp. representation of L. *saxifraga* SAXIFRAGE, or whether it was adopted from some American language; in the latter case the American word seems to have influenced the form of the Sp. name for saxifrage, which according to the native lexicographers has the forms *saxifraga, -fragia, -fragua, salsifragia, salsifrex, saxafra*. The Spanish writer Monardes (1571) regards the Sp. name as adopted from Fr., which seems unlikely; he gives the native Indian name as *pauame*.]

Satan ('seɪtən). Also 3-5 *saton*, 5 *satone*; 3-7 *sathan*, 4, 6 *sathane*, 5 *sathon(e)*. [*a. L. Satān* (Vulg., only in the O.T.) = Gr. *Σατάν* or *Σατάν* (once in the LXX and once in the N.T.), *a. Heb. šāṭān* adversary, one who plots against another, *f. šāṭān* to oppose, plot against.

In the Old Testament the Heb. word ordinarily denotes a human adversary, but in some of the later portions (Job, Chron., Zech., Ps. cix) it occurs (chiefly with definite article) as the designation of an angelic being hostile to mankind, who tempts men to evil and accuses them to God. In both applications the ordinary rendering of the LXX is *διάβολος* slanderer (see *DEVIL sb.*); the more accurate *ἐπιβουλος* (plotter) occurs once; the one instance in which the Heb. word is

retained (1 Kings xi. 14) relates clearly to a human enemy, but may have been misapprehended. In the Gr. N.T. the ordinary form is *Σατανᾶς* (once only *Σατάν*), which is followed by the Vulgate and hence by Wyclif (see *SATANAS*); but the English versions from Tindale onwards (including the Rheims N.T.) all substitute the Heb. form *Satan*. Cf. OF. *Sathan*, *Satan*, Fr., Sp., It., G. *Satan*.

The pronunciation ('sætən), which is mentioned disapprovingly by Walker (1828), and is ignored in later Dictionaries, was still not uncommon in British liturgical and pulpit use c1900.]

6. a. A country or state politically or economically dependent upon and subservient to another.

[1776 T. PAINE *Wks.* (1796), II. 24 In no instance hath nature made the satellite larger than its primary planet; and as England and America... reverse the common order of nature, it is evident that they belong to different systems: England to Europe, America to itself.] 1800 J. ADAMS *Wks.* (1854) IX. 49 A great deal is yet to be done to prevent our becoming a mere satellite to a mighty power. 1827 MACAULAY *Ess.*, *Machiav.* (1897) 43 The governments of the Peninsula ceased to form an independent system. Drawn from their old orbit by the attraction of the larger bodies which now approached them, they became mere satellites of France and Spain. 1930 *Economist* 8 Nov. 844/2 Do they portend a military alliance against France between a Fascist Italy and a Fascist Germany, with a bevy of East European satellites—Bulgaria, Albania, Hungary, Austria—to balance Poland and the Little Entente? 1936 *Pacific Affairs* Sept. 404 Outer Mongolia may well be called a satellite of the Soviet Union. 1941 *Ann. Reg.* 1940 204 This [sc. the Tripartite Pact of the Axis Powers] made Hungary a mere satellite of Germany. 1948 *Sun* (Baltimore) 9 Jan. 1/2 Several of the Soviet Union's satellites. 1974 M. B. BROWN *Econ. of Imperialism* xii. 286 Cuba is not a satellite of the USSR in the same sense that other Latin American States are satellites of the USA. 1977 *Time* 21 Feb. 8/1 In Czechoslovakia, East Germany, Poland and even some of the less volatile satellites, the Russians and their local rulers are being forced to put out brushfires of discontent.

b. A community or town that is economically or otherwise dependent on a nearby larger town or city.

1912 G. R. TAYLOR in *Survey* (N.Y.) 5 Oct. 14/2 In some sections of the South scarcely a city of any size lacks one or more satellites thrumming with spindle and shuttle. 1935 *Archit. News* 27 Apr. -10 May 8/2 No. 50(B) Squadron was then based at Skellingthorpe, west of Lincoln (a satellite of Swindon).

7. **Spectroscopy**. A spurious or subordinate spectral line; *spec.* one caused by an irregularity in the positions of lines in a diffraction grating. Also **satellite line**.

1904 *Astrophysical Jnl.* XIX. 118 The appearance and disappearance, according to circumstances, of the satellite lines still remains a most curious fact. 1924 *Phil. Mag.* XLVIII. 501 On moving the eyepiece back, the line broadened and a faint black 'satellite' split off from it, moving slowly across the grating. 1945 R. A. SAWYER *Exper. Spectrosc.* vii. 175 It often happens that satellites or diffuse edges will be observed for strong lines at the best obtainable focus. 1969 [see *Rowland ghost*]. 1971 *Physics Bull.* July 388/3 The centre line is due to Rayleigh scattering and the satellites arise from transverse (T) and longitudinal (L) phonons.

8. *Anat.* Chiefly as **satellite cell**. Each of the cells that go to make up the membrane surrounding the nerve cell bodies in many ganglia, analogous to the Schwann cells that surround their axons; also, formerly, a Schwann cell.

[1908 G. MARINESCO in *Compt. Rend. Hebdom. des Séances et Mém. de la Soc. de Biol.* LXV. 99 De toutes ces recherches, il résulte qu'il existe à l'état normal un équilibre entre la nutrition des cellules satellites et celle des cellules des ganglions sensitifs.] 1928 W. PENFIELD in E. V. COWDREY *Special Cytol.* II. xxx. 1055 Specific stains showed the perivascular and perineuronal oligodendrocyte satellites to be definitely increased. 1954 M. SINGER in R. O. GREP *Histology* xi. 216 Each cell body of spinal, cranial, and autonomic ganglia is completely encapsulated by a thin membrane composed of so-called satellite cells which contains small, scattered, and flattened nuclei. 1958 *Exper. Histol.* (ed. 16) x. 259/1 When these companion cells are in association with a nerve cell body... they are called satellite cells; when they provide ensheathment for axons, they are called neurilemma cells, or cells of Schwann.

9. **Cytology**. A short section of a chromosome demarcated from the rest by a constriction (if terminal) or by two constrictions (if intercalary). [The sense is due to S. G. NAVASHIN, who used Russ. *spútnik* satellite (*Izvestiya Imper. Akad. Nauk* (1912) VI. 378).]

1926 C. D. DARLINGTON in *Jrnl. Genetics* XVI. 246 Chromosome 'G' is seen to be approaching the pole with the satellite foremost; this means that the satellite is endowed with special responsiveness to the attraction of the pole. 1960 *Lancet* 14 May 1063/2 In some chromosomes the additional criterion of the presence of a satellite is available (table 1), but in view of the apparent morphological variation of satellites, they and their connecting strands are excluded in computing the indices. 1975 A. & D. LÖVE *Plant Chromosomes* I. 1. 26 A secondary constriction may demarcate a short part of the chromosome, either intercalary or, most frequently, terminally. Such a terminal piece is called a satellite.

10. **Bacteriol.** A bacterial colony growing in culture near a second colony which is the source of a diffusible substance which promotes the growth of the first but is not produced by it; it consequently shows accelerated growth, or resists a substance which would otherwise poison it. *Usu. attrib.*

1938 in *Dorland & Miller Med. Dict.* (ed. 18) 1243/1. 1940 M. FROBISHER *Fund. Microbiol.* I. 90/2 The satellite growth of *Haemophilus* species around a colony of *Staphylococcus* can be attributed not only to NAD but also to catalase, which is produced by staphylococci.

11. **Molecular Biol.** A portion of the DNA of a genome distinguished from the rest of the genome by its distinctive base composition and density. *Freq. attrib.*

1961 S. KIT in *Jrnl. Molecular Biol.* III. 711 The mean buoyant densities of the principal and the satellite mouse DNA bands were 1.701 and 1.690 g cm⁻³, respectively. 1962 *Ibid.* IV. 439 Calf thymus satellite was found at the same position in each of three different DNA preparations isolated from thymus tissue obtained from different animals. 1970 *New Scientist* 27 Aug. 406/1 Discovered originally in the mouse, where it constitutes some 10 per cent of the total DNA in each cell of the animal, satellite DNA can be distinguished from the rest by its different density, and by the fact that it apparently consists of repeating base sequences—i.e., multiple copies of a given sequence repeated again and again. 1977 REES & JONES *Chromosome Genetics* ii. 22 Exceptional DNA segments may have an unusually high or low G + C content. When plotted, these fractions appear as heavy or light satellites respectively at the tails of the 'main-band' DNA. Heavy satellites are found in the guinea pig and in human DNA. Light satellites... are less common.

satire ('sætəɪə(r)), *sb.* Also 6-8 satyre, 7-8 satyr, 8 satir. [a. F. *satire* (= Sp. *sátira*, Pg., It. *satira*, G. *satire*), or directly ad. L. *satira*, later form of *satura*, in early use a discursive composition in verse treating of a variety of subjects, in classical use a poem in which prevalent follies or vices are assailed with ridicule or with serious denunciation. The word is a specific application of *satura* medley; this general sense appears in the phrase *per saturam* in the lump, indiscriminately; according to the grammarians this is elliptical for *lanx satura* (lit. 'full dish': *lanx* dish, *satura*, fem. of *satur* full, related to *satis* enough), which is alleged to have been used for a dish containing various kinds of fruit, and for food composed of many different ingredients.]

Formerly often confused or associated with SATYR (see esp. sense 4), from the common notion (found already in some ancient grammarians) that *L. satira* was derived from the Gr. *σαῦρος* satyr, in allusion to the chorus of satyrs which gave its name to the Greek 'satyric' drama. The words *satire* and *satyr* were probably at one time pronounced alike, as the derivatives *satiric* and *satyric* are still; and the common use of *y* and *i* as interchangeable symbols in the 16th and 17th c. still further contributed to the confusion.]

1. A poem, or in modern use sometimes a prose composition, in which prevailing vices or follies are held up to ridicule. Sometimes, less correctly, applied to a composition in verse or prose intended to ridicule a particular person or class of persons, a lampoon.

Also used *Hist.* as the rendering of *L. satura* in its preclassical sense of a poetic 'medley': see the etymological note above.

c. Min. and Petrol. Of a mineral (see quot. 1913). Of a rock: containing neither free quartz (or some other specified oxide) nor any undersaturated minerals.

1913 S. J. SHAND in *Geol. Mag.* Decade V. X. 508 Of the various minerals which enter into the composition of igneous rocks, about one-half are capable of forming in presence of free silica... These may... be termed saturated minerals. *Ibid.* 510 A rock which contains only saturated minerals may be termed a saturated rock. 1947 [see OVERSATURATED ppl. a.]. 1951 TURNER & VERHOOGEN *Igneous & Metamorphic Petrol.* iii. 54 Saturated minerals are those which are compatible with excess silica under magmatic conditions, and are therefore commonly associated with quartz. 1968 B. BAYLY *Introd. Petrol.* vi. 53 All saturated rocks fall within the shaded area in Fig. 6-1. The commonest such rocks are made of feldspar with pyroxene or amphibole.

HILL in *Metal World* No. 22. 342 Saturated steam (that is, steam charged with such an amount of heat that any reduction thereof would produce condensation, and any increase thereof would produce super heat) is substantially a perfect gas. 1883 W. N. SHAW in *Trans. Cambr. Philos. Soc.* XIV. 39 The saturated air was then sent through all four tubes, and the gain in weight of each tube determined.

b. Electronics. Characterized by or exhibiting saturation (senses 3 d, f); of or pertaining to a device in such a state.

1896 *Phil. Mag.* XLII. 394 For a given intensity of radiation the current through the gas does not exceed a certain maximum value whatever the electromotive force may be, the current gets, as it were, 'saturated'. 1899 *Ibid.* XLVII. 160 The gas tends to become more readily saturated with diminution of pressure. 1933 *Proc. IRE* XXI. 1667 The practical limitation of this 'saw-tooth' generator lies in the fact that there is no such thing as a completely saturated thermionic tube. 1956 J. C. LOGUE in L. P. Hunter *Handbk. of Semiconductor Electronics* xv. 11 It is necessary to impose an upper limit on *r_e* in the saturated region. This is to ensure that the voltage drop between the emitter and collector terminals is small when the transistor is in a saturated state. 1967 *Electronics* 6 Mar. 122 2 They permit a whole spectrum of products with the highest speed possible with saturated logic. 1977 TAUB & SCHILLING *Digital Integrated Electronics* i. 18 When a base current *I_B* is supplied, the transistor is able to furnish a current *I_C* = *h_{FE}I_B*. If the current *I_C* is actually less than *h_{FE}I_B*, the transistor is said to be in saturation. However, such is the case because of the constraint imposed by the circuit and not by the transistor. Hence, strictly, we should speak of a saturated circuit and not a saturated transistor.

c. saturated diving = *saturation diving* s.v. SATURATION 5.

1968 *New Scientist* 17 Oct. 125 2 The important element in saturated diving is that after six days or six months of exposure to a given depth or pressure, the diver requires a single, fixed decompression period. 1971 *Petroleum Rev.* July 248 1 Saturated diving requires a considerable increase in equipment sophistication and diver training.

c. *Magnetism.* The condition of being as strongly magnetized as possible, or so strongly magnetized that an increase in magnetizing force produces no appreciable increase in magnetization.

1837 BREWSTER *Magnet.* 134 It was magnetized to saturation. 1864 *Chamb. Encycl.* VI. 262/2 Magnets, when freshly magnetised, are sometimes more powerful than they afterwards become. In that case, they gradually fall off in strength, till they reach a point at which their strength remains constant. This is called the *point of saturation*. 1920 *Whittaker's Electr. Engineer's Pocket-bk.* (ed. 4) 144 In addition to the limitations imposed by saturation, the parts of the magnetic circuit where the flux is continually changing in value are further restricted by losses due to eddy-currents and hysteresis. 1962 *Newnes Conc. Macropedia* XI. 333/2 It was suggested in 1907 that a ferromagnetic material is composed of a large number of small volumes called domains, each of which is magnetized to saturation.

d. *Electronics.* The condition in which increase in the potential difference between two electrodes in a gas-filled or evacuated vessel leads to no increase in the current flowing between them, owing to the limitations of the gas as a current-carrier or the electrode as an electron-emitter.

1896 *Phil. Mag.* XLII. 394 It is evident that this saturation must occur if the current destroys the conducting power of the gas. 1899 *Ibid.* XLVII. 158 The great difficulty in producing complete saturation, i.e. to reach a stage when all the ions produced reach the electrodes, may be due to one or more of three causes. 1947 R. LEE *Electronic Transformers & Circuits* v. 116 In plate-modulated class C amplifiers, sufficient excitation must be applied so that grid saturation still obtains at 100 per cent modulation; otherwise output would not be proportional to plate voltage. 1962 D. F. SHAW *Introd. Electronics* x. 192 Other cathode materials, such as metallic oxides, do not exhibit full saturation.

e. *Psychol.* A term used in mental testing based on the theory of two-factor analysis put forward by C. S. Spearman (1863-1945) for the degree to which the general factor (g) saturates

the specific factor or ability in question; also *attrib.*

1904 C. S. SPEARMAN in *Amer. Jnl. Psychol.* XV. 276 Intellectual saturation, or extent to which the considered faculty is functionally identical with General Intelligence. *Ibid.* 277 Mathematics, for example, has a saturation of 74 and Common Sense has one of about 96. 1927 *Psychol. THOULESS *Gen. & Social Psychol.* (ed. 3) xxiii. 367 This degree of dependence on the general factor was called by Spearman the saturation with g of the ability in question; the term more commonly used at the present time is the general factor loading.

f. *Electronics.* The state of operation of a transistor in which the collector current becomes independent of the base voltage, arising when the base-collector junction becomes forward-biased.

1956 J. C. LOGUE in L. P. Hunter *Handbk. of Semiconductor Electronics* xv. 48 In pulse-type computer systems, the length of time that the transistor is driven into saturation is controllable. 1962 SIMPSON & RICHARDS *Physical Princ. 4. a. *Chromatics.* Degree of intensity (of a colour); relative freedom from admixture of white. Cf. *HUE sb.* 3 c.

1878 *Encycl. Brit.* VIII. 824/1 Saturation, which depends on the amount of white the colour contains; thus, it is saturated when there is no white, as in the pure colours of the spectrum, and there may be an infinite number of degrees of saturation from the pure colour to white. 1879 ROOD *Mod. SHORT *Embroidery & Fabric Collage* i. 12 The hues are all used at their full strength or saturation, i.e. they are not diluted in any way by black or white. 1970 *Nature* 19 Sept. 1183/1 Discrimination tests revealed that sorters identified stamps most easily if seven colours were used each at two distinct levels of saturation, for example, dark blue and light blue, dark green and light green. 1978 *Sci. The second component is an ohmic characteristic which is caused by surface leakage across the space charge region. 1976 MILLMAN & HALL *Electronic Fund. & Appl.* iv. 79 In addition to the variability of reverse saturation current with temperature, there is also a wide variability of reverse current among samples of a given transistor type. 1966 *Sci. ||satya ('satja). [Skr.] In Indian philosophy: truth, truthfulness.

WOOD *Yoga Dict.* 139/2 *Satya*. (Truthfulness). The second of the abstinences. 1974 *Encycl. Brit. Patel et al. *Say not the Struggle Nought Availeth* 192 In Gandhi's view, truth (*satya*) and non-violence (*ahimsa*) were inter-related.

||satyagraha (sa'tja:graha). [a. Skr. *satyāgraha* insistence on truth, f. *satya* truth + *āgraha* pertinacity.] The Indian form of passive resistance, as formulated by M. K. Gandhi. Also *transf.* and *attrib.*

1920 M. K. GANDHI *Non-Co-operation* (1921) 46 But all the painful experience that I then gained did not in any way shake my belief in Satyagraha or in the possibility of that matchless force being utilised in India. 1928 V. G. DESAI tr. *Gandhi's Satyagraha in S. Afr.* xii. 173 A small prize was therefore announced in *Indian Opinion* to be awarded to the reader who invented the best designation for our struggle... Sr. Maganlal Gandhi...suggested the word 'Sadagraha', meaning 'firmness in a good cause'. I...corrected it to 'Satyagraha'. Truth (*Satya*) implies love and firmness (*Aggraha*) engenders and therefore serves as a synonym for force. I thus began to call the Indian movement 'Satyagraha', that is to say, the Force which is born of truth and love or non-violence, and gave up the use of the phrase 'passive resistance'. 1929 *Daily Express* 10 Jan. 1/5 The ex-soldiers expressed their intention of performing satyagraha until their leader was released. 1930 *Aberdeen Press & Jnl.* 7 Apr. 7/1 The 'Untouchables', dissatisfied with his campaign, have threatened counter satyagraha. 1955 *Times* 5 July 10/5 But there were signs of official uneasiness; Sikh dignitaries were arrested before offering satyagraha, Press censorship was imposed in Amritsar, [etc.]. 1958 *Economist* 26 July 280 Delay in producing this Bill was one of the grievances advanced by the Tamil minority when they launched their satyagraha campaign in the spring. 1963 *Times* 3 May 12/2 Negro and white youngsters, organized by bodies such as the student non-violent coordinating committee and the south Christian leaders' conference, will be offering their own kind of satyagraha throughout the deep south. 1969 *Pioneer* (Lucknow) 13 Aug. 7/7 A batch of 12 girls were taken into custody...when they staged satyagraha in support of a separate Telengana. 1976 *Times* 23 Jan. 9/2 The opposition...is pursuing its campaign of *satyagraha* (non-violent demonstration) in traditional Indian style. 1980 *Times Lit. Suppl.* 21 Nov. 1339/1 For him [sc. Michael Scott], the world desperately needs a moral force which will work for justice. He finds this in *satyagraha*, the soul-force, more positive than non-violence or passive resistance, an active weapon of good in its perennial fight against evil.

So sat'yagrahi (with pl. satyagrahi or satyagrahis), sat'yagrahist, an exponent or practitioner of *satyagraha*.

1928 V. G. DESAI tr. *Gandhi's Satyagraha in S. Gandhi] will be accompanied by a band of satyagrahists or home rule volunteers, who will march on foot. 1934 H. MILLER *Tropic of Cancer* 102 The little band of Satyagrahists imitated the devotion of their master. 1968 H. J. N. HORSBURGH *Non-Violence & Aggression* i. 22 Belligerents do, and satyagrahi do not, claim finality for their interpretation of a just settlement. 1976 *New Yorker* 24 May 43/1 According to Gandhi, a satyagrahi, or votary of satyagraha, is governed by the belief that the soul can be saved from evil in the world, and so helped along in its search for Brahma, by truth and truth alone.

1. *a. Myth.* One of a class of woodland gods or demons, in form partly human and partly bestial, supposed to be the companions of Bacchus.

In Greek art of the pre-Roman period the satyr was represented with the ears and tail of a horse. Roman sculptors assimilated it in some degree to the faun of their native mythology, giving to it the ears, tail, and legs of a goat, and budding horns.

In the English Bible the word is applied (without precedent either in the LXX or the Vulgate) to the hairy demons or monsters (Heb. *śē'irim*) of Semitic superstition, supposed to inhabit deserts.

1881 P. D. DU CHAILLU *Land of Midnight Sun* II. xvii. 206 One of the most characteristic institutions of the country is the *Sauna* (bath-house), called *Badstuga* in Swedish. 1897 E. B. BUCHWALD *I chose Caviar* 31 But in Finland a sauna is not just a bath—it is a way of life. City Wall sauna, as it is called, has the requisite little wooden rooms with a stove containing a pile of heated stones on to which water is sprinkled to produce the sauna heat, and showers and rest cubicles. Bunches of leafy birch twigs will also be available, price 2s. 6d., for bathers to whisk up their circulation; the sauna itself costs 15s. 1971 *Country Life* 26 Aug. 512/3 It stands in six acres, with frontage to the river, and has a... sauna bath, stables, [etc.]. 1975 *N. The current suggestion that the word is a. 1. In the original use, a quantity of finely chopped pork, beef, or other meat, spiced and flavoured, enclosed in a short length of the intestine of some animal, so as to form a cylindrical roll (usually, one of the 'links' formed by tying the containing intestine at regular intervals); later also, in generalized sense, meat thus prepared. Since the 19th c. the application of the word has been greatly extended; in its widest use, it denotes a preparation of comminuted beef, veal, pork, mutton, or a mixture of these, either fresh, salted, pickled, smoked or cured, with salt,

spices, flour (sometimes with the addition of fats, blood, sugar, vegetables, etc.), stuffed into a container made from an intestine, stomach, bladder, or other animal tissue.

There are more than 150 kinds of sausage, distinguished by names indicating the ingredients and the method of manufacture. They are divided into two classes, in the U.S. known as *dry sausage*, which is a cured product, subjected to a process of drying lasting several weeks, and *fresh or wet sausage*. *Bologna sausage*: see BOLOGNA. *polonian*, *polony sausage*: see POLONY. *German sausage*: see GERMAN. 0.2 4.

1940 C. F. C. HAWKES *Prehist. Foundations Europe* iii. 50 We are... in the region of Azilian tradition, but the industry might almost equally well be a 'Middle Tardenoisian', with its crescentic and angular microliths and its moderate but not excessive development of micro-burin technique, and the French now propose to call such industries in general Sauveterrian, reserving the name Tardenoisian in a strict sense for the later stage. *Ibid.* 66 In Britain... microlithic technique was never carried beyond the Middle Tardenoisian or Sauveterrian stage. 1952 *Proc. Prehist. Soc.* XVIII. 109 Since then, the discovery of mesolithic tools which preceded the Tardenoisian on the Causses west of the Massif Central has added 'Sauveterrian' to the terminology. 1963 E. S. WOOD *Collins Field Guide Archaeol.* iv. 50 The character of the mesolithic of all but the south-east and east of England shows affinities with the French mesolithic culture called *Sauveterrian*. *Ibid.* 103 The mesolithic people of the Sauveterrian were particularly fond of rock-shelters. 1975 *Nature* 3 July 33/2 This radiocarbon evidence from the Pennines indicates conclusively that simple 'broad blade' microlithic industries identical to those of Thatcham and Star Carr precede 'narrow blade' (sometimes termed 'Sauveterrian') industries with small scalene triangles and rod-like microliths. 1975 J. G. EVANS *Environment Early Man Brit. Isles* v. 92 On the high moors of north-east Yorkshire another group of industries, also Mesolithic... occurs. These... contain... a profusion of microliths. save (serv), quasi-*prep.* and *conj.* Forms: a. 3-5 sauf, 5-6 saufe, 5 sawf, sauff, saauf; 3-5 saf, 4-5 safe, saaf, 4-6 saff(e, 5 sef; 5-6 saif, 6 salfe, saulfe; 5-6 *Sc.* saiff. β. 3-4 sauve, 4 sawve, 5 sawe, 4-6 salve, 4- save. [Developed from *SAFE a. 5*, in imitation of the similar development in the use of the equivalent *F. sauf*.

Already in OF. the adj. *sauf*, fem. *sauve*, prefixed to a sb. in the absolute construction (= *L. salvō, salvā*; see *SAFE a. 5*) had often the sense 'being excepted', so that it became (like the analogous *except* ppl. adj. in Eng.) functionally equivalent to a *prep.*, and was eventually treated as such, the masc. form *sauf* being used even before a fem. sb. Cf. *Sp. salvo, Pr. sal*.

The β forms may partly represent the OF. *sauve* in collocation with a fem. sb., and partly the ME. form of the plural adj. But the later exclusive use of the form *save* is probably due to the identification of the word with the imperative of the vb.: cf. *except*, which appears to have been similarly apprehended as an imperative.

The use of a nominative after *save* (see 1 b) may perhaps be a trace of the originally adjectival character of the word; it is, however, to be noted that the same thing occurs with all the quasi-prepositional words of the same meaning, including even *saving* and *excepting*, which are in origin pr. pples. of transitive verbs.]

The existence of these forms suggests that the ME. *saverey* may be an adoption of an unrecorded OF. form which had the v either as a phonetic development in hiatus (cf. F. *pouvoir* for early OF. *puoir*) or through the influence of *sauveur* SAVOUR.

saw (sɔː), *sb.* 1 Forms: 1 *sagu*, *saga*, 4 *sagh*, 4-7 *sawe*, 5 *sae*, *saghe*, *sage*, 5- *saw*. [OE. **sagu* str. fem., in oblique cases *sage* (also *saga* wk. masc.) = OHG. *saga*, MLG., MDu. *sage* (Du. *zaag*), ON. *sog* (Sw. *såg*, Da. *sav*, †*saug*):—OTeut. **sagā* str. fem.; the ablaut-var. **segā* appears in OHG. *sega* (MHG. *sege*, mod.G. *säge*); cogn. w. OE. *seax* (:—**sahso-*) knife, *sax sb.* 1, f. pre-Teut. root **sok-*: **sek-* to cut; cf. L. *secāre* to cut.]

1. *a.* A cutting tool consisting of a plate (or, in some forms, a band or a tube) of metal (usually steel), one edge of which is formed into a continuous series of teeth. (Some saws for cutting stone are without teeth.) In the original form of the tool, represented by the HAND-SAW, and in some varieties of more modern invention, e.g. the pit-saw (see PIT sb. 1 15), the saw is moved backwards and forwards, each movement in one direction deepening the groove or 'kerf' made in the wood or other material to be cut. In other varieties, as the circular saw and the band-saw, a continuous movement in one direction is substituted for the reciprocating movement.

Ordinarily *saw* means the complete instrument including the handle, frame, or the like, necessary to fit it for use; but sometimes the word is applied to the 'saw-plate' or 'saw-blade' alone.

Also with defining words, indicating special varieties of form, structure, mode of operation, or purpose, as in *band saw*, *circular saw*, *compass saw*, *drag saw*, *endless saw*, *frame saw*, *fret saw*, *gate saw*, *hand saw*, *ice saw*, *joint saw*, *keyhole saw*, *lock saw*, *meat saw*, *mill saw*, *panel saw*, *pit saw*, *rabbit saw*, *rip saw*, *sash saw*, *tenon saw*, *web saw*. These terms, so far as they have been thought to require notice in this Dictionary, are treated either under their first element or as main words. A considerable number of kinds of saws used for surgical purposes are distinguished by the names of their inventors, as *Butcher's*, *Ferguson's*, *Gowan's*, *Hey's*, *Liston's* saw.

say (sei), v.¹ Forms: see below. [OE. *secgan*, pa. t. *sæge*, corresp. to OFris. *sega*, *sedza* (mod.Fris. *sizze*), OS. *seggian*, pa. t. *sagda* (MLG. *seggen*, MDu. *seggen*, *sagen*, Du. *zeggen*), OHG. *sagên*, pa. t. *sagita*, *segita* (MHG., mod.G. *sagen*), ON. *segja*, pa. t. *sagða*; repr. OTeut. **sagjān*, **sagjan*—pre-Teut. **sokēi*-. The root is perh. WIndo-germanic **soq*-.: **seq*-, found in Lith. *sakýti*, OSl. *sočyti* to say, Gr. *ἔπειπε* imper. (—**en-seqe*=OLatin *inseque*, *insece*), *ἐπιπείν* aorist inf., to tell, say, L. *inquam* I say (—**in-squ-am*).

The normal mod.Eng. phonetic representative of the OE. inf. *secgan* (or the 1st sing. pres. *sege*) would have been **sedge*. As in the case of BUY v., LIE v.¹, the mod. form comes from OE. forms which had *g* (palatal) instead of *cg*, as imp. *sege*, *sæge*, 2nd sing. pres. ind. *segest*, *sægst*, 3rd sing. pres. ind. *segeð*, *sægeð*. The *g* represents WGer. *g*, and the *cg* WGer. *gg*; the OTeut. stem **sagi-* having become by phonetic law in V.Ger. **saggi-* before an inflexional suffix beginning with a vowel, and **sagi-* in any other position. In Middle English, alongside the tendency, which ultimately prevailed, to extend the stem *sey-*, *sei-*, *sai-* (—OE. *se-*) to all parts of the verb, there existed an opposite tendency to extend the stem *segg-* beyond its etymological limits. Hence most of the parts of the verb (though not the pa. t.) had two widely divergent forms, the distribution of which does not closely correspond to dialectal divisions. In some northern poetry the two forms occasionally occur in juxtaposition as distinct words (e.g. 'Tille I haue seggid and saide all my sawe', York Myst. xxxii. 16). In Robert of Brunne the form *sege*, **sege* (implied in *sedgeyng*) seems to be appropriated to the sense 'recite' (as a minstrel): see SAYER 1, SAYING 1.]

B. Signification. In Eng., as in other Teut. langs., say is an approximate synonym of *speak*, from which it differs in having normally as its object a particular word or series of words, or a sentence representing the meaning of a particular series of words. Cf. L. *dicere* and its representatives in Romanic (which, however, have also senses that are now expressed in Eng. by *tell*), and L. *aia*, *inquam*.

As the word designates not the action of speaking itself, but its relation to the object, its use with reference to written

expression does not ordinarily, like the similar use of *speak*, involve any consciousness of metaphor.

1. a. *trans.* To utter or pronounce (a specified word or words, or an articulate sound). Also, in wider sense, used of an author or a book, with quoted words as object. Also *fig.*, of things: to suggest, to indicate. Phrs. *I won't* (or *wouldn't*) *say no to* (something, usu. a food or drink): I would like; *to say the word*: see WORD sb. 7; *who says* —?, with an item of food as object: who would like —?

For various idiomatic collocations, as *to say nay*, *to say bo*, *to say farewell*, etc., see the conjoined words.

For *as who saith*, *as who should say*, see AS and WHO.

10. On the analogy of expressions like 'let us say', 'shall we say?', etc. (referable to senses 1-3), where the verb has contextually the sense of 'suppose', 'assume', the imperative *say* is idiomatically used: a. to introduce a clause, with the sense 'supposing', 'on the assumption that'; b. parenthetically, to indicate that a preceding sentence expresses a supposition or a selected instance; c. prefixed to a designation of number, quantity, date, etc. to mark it as an approximate guess or as representing a hypothetical case; d. immediately following a word or phrase to show that it represents a supposition, an instance, an approximation, or the like.

In commercial documents *say* is also used, without any implication of inexactness, to introduce any varied repetition of a numerical or quantitative statement: e.g., 'a shipment of 215 (say two hundred and fifteen) tons of coal'; 'thirteen stones (say 182 pounds)'; 'four editions of 2000 copies each, or say in all 8000 copies'. Cf. Ger. *sage*, Da. *siger*, Sw. *säger*; the two last are indicative present, either 1st or 3rd pers. sing.; Du. has *zegge* (old form of *zeg*, 1st pers.), and Fr. has *je dis* similarly used.

Say's law (seiz lɔ:). *Econ.* [f. the name of Jean Baptiste Say (see below).] The theory propounded by the French economist Jean Baptiste Say (1767–1832) that supply creates its own demand.

[1817 D. RICARDO *Princ. Polit. Econ.* xix. 401 Is the following quite consistent with M. Say's principle?] 1934 *Encycl. Social Sciences* XII. 351/1 At any given time in one market area there could be only a single price relationship of each good to any other good there offered in exchange, so long as competition held sway. This tendency involved the fixation not only of an identity of offering price among different sellers of the given good to the same (prospective) buyer but also of an identity of the offering price to different (prospective) buyers of the given good from the same seller. This is the substance of what has been denominated Say's law. 1936 J. M. KEYNES *Gen. Theory Employment* iii. 26 Say's law, that the aggregate demand price of output as a whole is equal to its aggregate supply price for all volumes of output. 1969 *Daily Tel.* 21 Apr. 14/2 If Say's Law had been true there could have been no unemployment. 1972 T. SOWELL *Say's Law* i. 3 The idea that supply creates its own demand—Say's Law—appears on the surface to be one of the simplest propositions in economics.

ON. **skabb-r* (MSw. *skabb-er*, mod.Sw. *skabb*, Da. *skab* from the 13th c.), corresponding to OE. *sceabb* *SHAB sb.*, q.v. for cognate forms. With sense 4 cf. MDu. *schabbe*, applied to women with the senses 'slut' and 'scold'; possibly this word, used by foreign vagrants, may have helped the development of the sense in Eng.; its etymological relation to early mod.Du. *schabbe* (Kilian), Flem. dial. *schab* itch (= OE. *sceabb*) is not clear.

The occurrence of the word in Kentish of the 13th c. is a difficulty, as the Scandinavian form would be unlikely to be adopted in that dialect. Perh. the word may in this passage represent the OE. *sceabb*, with archaizing spelling due to the influence of the L. *scabies*, which it here renders (cf. Lev. xiii. 6, Vulgate). Association with the Latin word of similar sound has influenced the later medical use.]

Evidence of the existence of the word in continental OF. has not yet been found, as J. de Garlandia, though resident in France, was an Englishman. The form represents an earlier **scalberc*, -*berge*, which must be an adoption of a Teut. compound, the last element of which contains the root **berg-* to protect (cf. HAUBERK). No such Teut. compound has, however, been found. As to the origin of the first element two suggestions have been made: (1) that it is OHG. *scala* shell, husk, which does not yield a very satisfactory sense; (2) that **scalberc* is altered by dissimilation from **scarberc*, from OHG. *scâr*, *scâra*, ordinarily meaning 'scissors', but occas. used as a designation for a sword. The Icel. *skálp-r* scabbard, *skálm* short sword (? a. Gr. *σάδμν*), *skálm* 'one part of a cloven thing' (Vigf.), pl. bean-pods, have some resemblance in form and sense, but the possibility of etymological connexion is very doubtful.]

The specific use referring to liquid agency, which is the prominent use in Fr. In Eng. this is the earliest sense of the word, which is first recorded in the Ancien Riwe (*a* 1225) both in its simple form (see quot. s.v. SKOAL) = OHG. *scāla* (MHG. *schāle*, mod.G. *schale*):—OTeut. **skālā*, ablaut-var. of **skalā*, whence OE. *scealu* shell, hust, drinking cup, weighing scale (see SHALE *sb.* ¹), OHG. *scala* shell, husk (MHG., mod.G. *schale*); the quantity of the vowel is doubtful in OS. *skala* cup, and in the ODu. antecedent of MDu. *schale* (Du. *schaal*), though it is probable that in Du. as in Ger. two original forms, *skāla* cup, scales, and *skāla* husk, shell, have become phonetically coincident. For the OE. *scealu* the inflexion appears to attest the short vowel in all the senses. The WGer. **skāla* (:—OTeut. **skālā*, *skālā*) passed into OF. as *eschale*, *escale* cup (mod.L. *scala* 'patera'), also husk (mod.F. *écale*). For the Teut. root **skel*-, *skal*-, *skāl*- to separate, divide, cf. SHALE, SHELL, SKILL. See also SKELE.

Between the first quarter of the 13th c. and the 16th c. the *a* forms (containing the vowel *a*) represent the northern pronunciation, the *β* forms being midland and southern. In the 16th c., however, the northern scale seems to have found its way into the London dialect, being used by Palsgrave and later by Spenser and Shaks. In the 17th c. *scale* is the prevailing literary form, though *scole* (with other equivalent spellings) occasionally appears down to the middle of the century.]
