Laurence², Lawrence ('lɒrəns, 'lɔː-). [ad. L. *Laurentius*.] A Christian name, used to denote a personification of indolence. *Laurence bids wages*: a proverbial phrase meaning that the attractions of idleness are tempting. Also *Lazy Lawrence*, a reproachful designation for an idle person.

Possibly the alliteration of the last-quoted phrase may sufficiently account for the use of the name; some, however, have suggested an allusion to the heat prevalent about St. Laurence's day (Aug. 10). Another conjecture is that there was a joke to the effect that when the martyr St. Laurence told his tormentors to turn him round on his gridiron, it was because he was too lazy to turn himself. It is important to note that the equivalent *G. der faule Lenz* (Lenz = Lorenz) has been in use from the 16th c.; see Grimm s.v. *Lenz*.

1796 PEGGE *Anonym.* (1809) 348 *Laurence bids wages*; a proverbial saying for *to be lazy*; because St. Laurence's day is the 10th of August, within the dog-days, and when the weather is usually very hot and faint. 1821 CLARE *Vill. Minstr.* II. 23 When... the warm sun smiles And 'Lawrence

lave (ləv), v.¹ Now chiefly *poet.* Forms: 1 lafian, 2-3 lavin, 7 Sc. lawe, 4- lave. [Two distinct formations appear to have coalesced—(1) OE. had lafian to wash by affusion, to pour (water), corresponding formally to MDu., Du. laven, OHG. labôn (MHG., mod.G. laben) to refresh; cf. OHG. laba, mod.G. labe refreshment. By some scholars the OE., Du., and Ger. words are considered to represent a WGer. adoption of L. lavāre to wash. This view involves some difficulty, as the numerous OHG. examples refer to refreshment by food, drink, or warmth, so that the assumed primary sense 'to wash', if it ever existed, must have been quite forgotten. The L. origin, however, accounts well for the senses of the OE. word, which perh. may be only accidentally similar in form to the continental words. (2) In ME. the representative of the OE. vb. blended indistinguishably with the vb. a. F. laver (= Pr., Sp., Pg. lavar, It. lavare):—L. lavāre = Gr. λούειν, f. OArayan root *lou- to wash (whence LATHER).]

The med.L. *lavendula* was taken into OHG. or early MHG. as *lavendla* (in MSS. of 12th c.; see *Ahd. Glossen* III. 105), whence MHG. and early mod.G. *lavandel(e)*, *lobendel*, *lobengele*, *laubangel*, *lavandel*, *lavander*, *lafander*; the standard form in Ger., Du., Sw., Da. is now *lavendel*.]

The current hypothesis is that med.L. *lavendula* is a corrupt form of *lavandula*, a dim. of the shorter word which appears in It. as *lavanda* (see above). This is commonly identified with It. *lavanda* 'washing', the supposition being that the name refers to the use of the plant either for perfuming baths (so already in 16th c. writers) or as laid among freshly washed linen (see 2 below). But on the ground of sense-development this does not seem plausible; a word literally meaning 'washing' would hardly without change of form come to denote a non-essential adjunct to washing. Besides, the earliest form appears to be *livendula*; if this could be connected with L. *livere* to be livid or bluish, the sense would be appropriate, but the formation is obscure; M. Paul Meyer suggests, as a possibility, that the original form may have been **livindula* for **lividula*, f. *lividus* LIVID. (A med.L. word of about the same date and of app. similar form is *calendula* marigold.) It is not certain that the word has not changed its application, as in early glosses *livendula*, *lavendula*, are given as synonymous with *samsucus* and *amaracus*, which properly mean 'marjoram'; but plant-names were applied often very loosely. The It. *lavanda*, F. *lavande*, would seem to be a back-formation from med.L. *lavandula*.]

III. Scientific and philosophical uses.

17. a. In the sciences of observation, a theoretical principle deduced from particular facts, applicable to a defined group or class of phenomena, and expressible by the statement that a particular phenomenon always occurs if certain conditions be present. In the physical sciences, and occasionally in others, called more explicitly *law of nature* or *natural law*.

The 'laws of nature', by those who first used the term in this sense, were viewed as commands imposed by the Deity upon matter, and even writers who do not accept this view often speak of them as 'obeyed' by the phenomena, or as agents by which the phenomena are produced.

Marine Mag.* (1858) V. 11 It does seem strange that... greater attention is not given to the Law of Storms. 1860 TYNDALL *Glac.* ii. xi. 289 As regards the motion of the surface of a glacier, two laws are to be borne in mind. 1864 BOWEN *Logic* ix. 308 The fact that water stands at this level is ranked among many other facts, which are comprehended under the general statement called a Law of Hydrostatics. 1877 E. R. CONDER *Bas. Faith* iii. 122 The laws of reasoning. 1884 tr. *Lotze's Metaph.* 333 Stated in its complete logical form a law is always a universal hypothetical judgment, which states that whenever C is or holds good, E is or holds good.

c. In certain sciences, particular 'laws' are known by the names of their discoverers, as in the following examples. (Most of these terms are of general European currency, their equivalents being used in Fr., Ger., It., etc.)

(a) Astronomy.

Bode's law, an empirical formula representing the distances of the orbits of the other planets from the orbit of Mercury as forming an approximate geometrical progression. Kepler's laws, the three propositions established by John Kepler (1571-1630) with regard to the planetary motions: (1) That the planets move in ellipses, the sun being in one of the foci; (2) That the radius vector of a planet describes equal areas in equal times; (3) That the square of the periodic time of a planet is directly proportional to the cube of its mean distance from the sun.

1781 *Chambers' Cycl.*, *Kepler's Law*, is that law of the planetary motions discovered by Kepler. 1805 *Edin. Rev.* Jan. 443 Kepler's Laws. 1833 HERSHEY *Astron. Index*, Bode's law of planetary distances. 1837 WHEWELL *Induct. Sci.* I. 416 One of the important rules known to us as 'Kepler's laws'.

(b) Physics.

Avogadro's law, the law that equal volumes of different gases, pressure and temperature being equal, contain the same number of molecules. Boyle's law, the principle, published by Robert Boyle about 1662, that the volume of a given mass of gas (the temperature being constant) varies inversely as the pressure. Charles's law, the law discovered by Alex. César Charles (1746-1823) that for every degree centigrade of rise in temperature, the volume of a gas increases by 1/273 of its amount at zero. Dulong and Petit's law, the law that all the chemical elements have approximately the same atomic heat.

1860 MAXWELL *Sci. Papers* (1890) I. 389 Boyle and Mariotte's law. 1863 ATKINSON *Ganot's Physics* 110 The laws of the compressibility of gases were studied separately by Boyle and by Mariotti... Each of these philosophers arrived at the same law, which in England bears the name of Boyle's, and on the continent of Mariotti's. *Ibid.* 288 Dulong and Petit's law may be thus expressed; the same quantity of heat is needed to heat an atom of all simple bodies to the same extent. 1880 CLEMINSHAW tr. *Wurtz' Atomic Theory* v. 95 The 'law', as it is generally called, of Avogadro and Ampère may be enunciated as follows: Equal volumes of gases or vapours contain the same number of molecules. 1884 DANIELL *Princ. Physics* 223 Then the volume varies as the 'absolute temperature' (Charles's Law, often attributed to Gay Lussac).

(c) Philology.

Grimm's law, the rule formulated by Jacob Grimm (in the 2nd ed. of his *Deutsche Grammatik*, 1822) with regard to the representation in the Germanic langs. of certain consonants of the primitive Aryan language. Grimm's statement was that original aspirates became mediæ in Gothic, Low German, English, Old Norse, etc. and tenues in High German; original mediæ became tenues in Gothic, etc., and 'aspirates' (supposed to be represented by spirants and affricates) in High German; and original tenues became 'aspirates' in Gothic, etc. and mediæ in High German. The formula is no longer accepted as correct, but the name of 'Grimm's law' is still applied to its rectified form, which is too complicated to be stated here. Verner's law, discovered by Karl Verner of Copenhagen in 1875, deals with a class of exceptions to Grimm's law, and is to the effect that an original Germanic voiceless spirant, when following or terminating a primitively unaccented syllable, became a voiced spirant, which in the historic Germanic langs. is under certain conditions represented by a media; the *z* which according to the 'law' results from *s* is, except in Gothic, normally represented by *r*. Grassmann's law, published by Hermann Grassmann in 1863, is that when primitive Aryan had two aspirates in the same or successive syllables the former of them was in Sanskrit changed into the corresponding media, and in Greek into the corresponding tenuis.

1838 W. B. WINNING *Man. Compar. Philol.* i. iii. 36 *Grimm's Law*.—I now proceed with the consideration of Grimm's important law... concerning the regular interchange of certain letters in different languages. *Ibid.* 47 On the principle of Grimm's law, we exclude the Perso-Grecians, High Germans, and Goths, from among the earliest colonists of Italy. 1841 LATHAM *Eng. Lang.* 190 An important fact relating to the change of consonants, which is currently called Grimm's Law. 1878 SWEET in *Academy* 9 Feb. 123/2 Verner's law [explained].

(d) Pol. Econ.

Gresham's law, the principle, involved in Sir Thomas Gresham's letter to Q. Elizabeth in 1558, that 'bad money drives out good', i.e. that when debased money (sc. coins reduced in weight or fineness, or both) is current in the same country with coins of full legal weight and fineness, the latter will tend to be exported, leaving the inferior money as the only circulating medium.

1858 MACLEOD *Elem. Pol. Econ.* 477 As he was the first to perceive that a bad and debased currency is the cause of the disappearance of the good money, we are only doing what is just, in calling this great fundamental law of the currency by his name. We may call it Gresham's law of the currency.

(e) Meteorol.

Buys-Ballot's law (bi:z'bæləʊ) [enunciated by C. H. D. Buys-Ballot (1817-90), Dutch meteorologist, in 1857] (see *quots.*).

1875 *Encycl. Brit.* III. 29/1 Buys-Ballot's 'Law of the Winds'... may be thus expressed:—The wind neither blows round the space of lowest pressure in circles returning on themselves, nor does it blow directly towards that space; but it takes a direction intermediate, approaching, however, more nearly to the direction and course of circular curves than of radii to a centre. 1970 J. HULBERT *All about Weather* vi. 73 Buys Ballot's law... says that if a man stands with his back to the wind, the lower pressure will be to his left in the northern hemisphere, and to his right in the southern.

lay (lei), sb.⁴ Also 3-4 lai, 4-6 laie, 4-7 laye. [a. OF. lai (recorded from the 12th c.) = Pr. lais, lays; of uncertain etymology.

The most likely view is that favoured by M. Gaston Paris, that the word is of Teut. origin, an adoption of some form of the word represented by OHG., MHG. leich, play, melody, song. The ON. lag (see LAW sb.¹), used in the sense of 'tune', would also be phonetically a possible source. Connexion with Teut. *leupo- (OE. léod, Ger. lied) is out of the question, as are the Celtic words commonly cited: the Irish laoidh is believed to represent an OCeltic type *lūdi-; the Welsh llais voice, sound, is too remote in meaning, and the assumed Breton equivalent is non-existent.]

1. A short lyric or narrative poem intended to be sung.

Originally applied spec. to the poems, usually dealing with matter of history or romantic adventure, which were sung by minstrels. From the 16th to the 18th c. the word was a mere poetical synonym for 'song'. This use still continues, but lay is now often employed (partly after G. lied, with which it is often erroneously supposed to be etymologically connected) as the appropriate term for a popular historical ballad such as those on which the Homeric poems are by some believed to be founded. Some writers have misapplied it to long poems of epic character like the Nibelungenlied or Beowulf.

VII. 43. a. In intransitive uses, coinciding with or resembling those of LIE *v.* 1 to lay low (see LOW a. 18c): an occas. use erroneously developed from to lie low.

In the earliest examples the verb appears to be intransitive for reflexive or passive. Now (exc. in Nautical lang., see b) it is only dialectal or an illiterate substitute for lie, its identity of form with the past tense of the latter no doubt accounting largely for the confusion. In the 17th and 18th centuries, it was not app. regarded as a solecism. (For lay in wait see WAIT *sb.*)

le, obs. form of LAY, LEA, LEE, LIE.

-le, suffix, pronounced (-ə)l, of various function and origin.

1. The usual mod.Eng. form of ME. *-el(e)*, *-le*, repr. OE. *-el*, *-ela*, *-(e)le* in sbs. and *-ol*, *-ul*, *-el* in adjs. (The form *-EL* is retained where phonetic law or orthographical convention does not

permit the change into *-le*, as after *ch*, *g* soft, *n*, *r*, *sh*, *th*, and *v*. After *m* the suffix becomes *-ble*.)

The OE. sbs. and adjs. with *l* suffixes are prob. in most cases of pre-Eng. formation. The sbs. formed on nouns have sometimes an originally diminutive sense, as in *bramble*; sometimes they express the notion of 'an appliance or tool', as in *thimble*, *handle*. In those formed on vb.-stems the function of the suffix is either agential as in *beadle*, instrumental as in *bridle*, *girdle*, or expressive of some less definable relation, as in *bundle*. The adjs., which are formed on vb.-stems, have the sense 'apt or liable' (to do what the vb. expresses), as in *brittle*, *fickle*, *grippy*, *nimble*, *twikel*.

b. In *riddle* the suffix represents OE. *-els*, the s having been confused with the plural ending.

2. An occasional representative of ME. *-el(l)*, *-elle*, in sbs. adopted from Fr. This has several different sources: in *castle*, *mantle*, it is OF. *-el*:—L. *-ellum* dim. suffix (see *-EL*); in *cattle* it is OF. *-el*:—L. *-āle*, the neut. sing., and in *battle* it is OF. *-aille* the neut. pl., of the adjective suffix *-ālis* (see *-AL*); in *bottle* it is OF. *-eille*:—L. *-icula* dim. suffix.

3. A verbal formative, repr. ME. *-(e)len*, OE. *-lian*:—O Teut. type *-ilōjan*, with a frequentative or sometimes a diminutive sense. Among the few examples that go back to OE. are *nestle*, *twinkle*, *wrestle*. In ME. and early mod.E. the suffix was extensively used (like the equivalent forms in MHG. and mod.Ger. and in Du.) to form vbs. expressing repeated action or movement, as in *brastle*, *crackle*, *crumple*, *dazzle*, *hobble*, *niggle*, *paddle*, *sparkle*, *topple*, *wriggle*, etc. Many of these formations are from echoic roots, as *babble*, *cackle*, *gabble*, *giggle*, *guggle*, *mumble*, etc.

lea (li:), *sb.*¹ Forms: 1 léah, léa, léag, lég, 4 le3, 5-6 (9) lee, 5-7 leye, 5 lie, legh, 5-6 le, 6 lighe, laie, 6-7 laye; 5-7 lay, 5-9 ley, 6- lea. [OE. *léa* (h) masc. (genitive *léas*, *léages*, nom. pl. *léas*), and *léah* fem. (genitive *léage*), app. meaning a tract of cultivated or cultivable land; in spite of the difference of sense, the words appear to be etymologically identical with OHG. *lôh* neut. or masc., used to render L. *lucus* grove (MHG. *lôh*, *lôch* low brushwood, clearing overgrown with small shrubs, mod.Ger. dial. *loh*), and perh. with Flem. *-loo* in place-names, as *Waterloo*; the pre-Teut. type **lougo-* occurs also in L. *lucus* grove, and Lith. *laukas* meadow and arable land, as opposed to wood; the root is supposed by some scholars to be **leuq-* to shine (whence L. *lucere*, Eng. *LIGHT sb.*, etc.; for the sense cf. *clearing*); others have suggested **leu-* to loosen (Gr. *λύειν*, L. *solu-ere*).

The sense has been influenced by confusion with LEASE *sb.*¹ (OE. *læs*), which seems often to have been mistaken for a plural, and also with LEA *sb.*²

A tract of open ground, either meadow, pasture, or arable land. After OE. chiefly found (exc. where it is the proper name of a particular piece of ground) in poetical or rhetorical use, ordinarily applied to grass land.

† *leak*, a. *Obs.* Forms: 1 *hleac*, 6 *lek* (e, 6-7 *leake*, 7 *Sc. leek*. [In OE. *hleac*; after OE. the word does not appear until the 16th c. when it may have been adopted from LG., MDu. *lek* (inflected *lĕk-*), whence mod. Du. *lek*, Sw. *läck*, Da. *læk*, G. *leck*; cogn. w. ON. *lekr*, Ger. dial. *lech* of the same meaning, and with LEAK sb. and v.

The OE. form presents difficulties; the spelling *hleac* occurs in the Hutton MS. of the *Pastoral Care* (9th c.) and in at least three glosses, so that it cannot well be a mere error; on the other hand the (apparently) cognate words in the other Teut. langs. show no trace of the *h*; in the ON. vb. *leka* the initial *l* (not *hl*) is attested by the alliteration.]

OE. had a causative *hlēnan* to make to lean (occurring only once as simple vb. and once in each of the compounds *up-ohlēnan* and *bihlēnan*), corresponding to MDu. *leinen*, OHG. *hlein* (MHG. *leinen*):—WGer. **hlainjan*. If this verb survived into ME., it would assume the form *lēnen*, thus coalescing with *hleonian*. Whether the mod. vb. actually descends from both the OE. vbs. is doubtful, but in view of the rare occurrence of *hlēnan* in OE. it seems more probable that only *hleonian* has come down; the development of transitive senses presents no difficulty.]

1947 J. W. KEARNS in *Amer. Bar Assoc. Proc.*, *Section of Corporation, Banking & Mercantile Law* 46/1 The origin of the 'lease-back deal' is probably traced back to high taxes, high taxes coupled with the desire of almost any corporate manager to see a liquid balance sheet with very few fixed assets on it. The fewer the better. The lease-back deal is

basically a transaction under which a corporation, which in the course of its business will use a considerable amount of real estate, sells that real estate to another entity which may be a university; it may be a charitable foundation; it may be any other type of organization which is tax free under the Internal Revenue Code. The real estate is usually sold at depreciated book value and simultaneously or concurrently a lease-back is granted to the industrial or merchandising concern that has sold the property. **1949** *Business Week* 22 Oct. 31/1 The device under attack is the sale-and-lease-back of real estate. **1964** *Financier Times* 12 Mar. 1/8 Excess cash produced by sale and lease-back arrangements. **1967** *Times Rev. e. law (or principle) of least action (Physics): the principle that an actual trajectory of a physical system is always such that, in comparison with any slightly different motion between the same end-points, the integral over the trajectory of the momentum with respect to distance (or more generally, of the sum of the generalized momenta with respect to generalized co-ordinates) has a minimum (or a maximum) value.

[1748 *MOREAU DE MAUPERTUIS* in *Hist. de l'Acad. R. des Sci.* 1744 423 Le chemin qu'elle [sc. la lumière] tient est celui par lequel la quantité d'action est le moindre... La quantité d'action.. est proportionnelle à la somme des espaces multipliés chacun par la vitesse avec laquelle le corps les parcourt. 1748 — in *Hist. de l'Acad. R. des Sci. et des Belles Lettres de Berlin* 1746 286 J'ai découvert le principe universel, sur lequel toutes ces loix sont fondées... C'est le principe de la moindre quantité d'action.] 1814 *J. TOPLIS tr. Laplace's Treat. Analytical Mech.* ii. 47 Maupertuis.. asserted, that in all the changes which take place in the situation of a body, the product of the mass of the body by its velocity and the space which it has passed over is a minimum. This he called the principle of the least action, and it was applied by him to the discovery of the laws of the refraction and the reflection of light, .. the laws of equilibrium, &c. 1834 *W. R. HAMILTON in Phil. Trans. R. Soc. CXXIV.* 252 Although Lagrange and others, in treating of the motion of a system, have shown that the variation of this definite integral vanishes when the extreme coordinates and the constant H are given, they appear to have deduced from this result only the well known law of least action. 1920 *A. S. EDDINGTON Space, Time & Gravitation* ix. 149 The law of gravitation, the laws of mechanics, and the laws of the electromagnetic field have all been summed up in a single Principle of Least Action. For the most part this unification was accomplished before the advent of the relativity theory, and it is only the addition of gravitation to the scheme which is novel. 1966 *J. L. MERIAM Dynamics* viii. 349 Hamilton's principle and the principle of least action have found important but limited applications in engineering problems. Their use will undoubtedly grow with time as the complexity and generality of design situations increase. 1973 *Nature* 28 Sept. 223/1 The mechanics section begins with Hamilton's principle (here called the principle of least action) and gives a concise and elegant account of the relation between invariance and conservation laws.

OS. *lēbôn*, OHG. *leibên* to remain. The OTeut. **laibjan* is the causative of **liban* str. vb., represented by the compounds OE. *belifan* (see BELIVE v.), OFris. *beliva*, bliva, MDu. *bliven* (Du. *blijven*), OHG. *beliban* (MHG. *beliben*, *bliben*, mod.G. *bleiben*), to remain.

The root (OTeut. **lib-*, **laib-* :—OAr. **lip-*, **leip-*, **loip-*) has in Teut. only the sense 'to remain, continue' (so in LIFE, LIVE v.), which appears also in Gr. *ἀνταρῆς* persevering, importunate. This sense is usually regarded as a development from a primary sense 'to adhere, be sticky', exemplified in Lith. *lipėti*, OS. *lipēti* to adhere, *lēpiti* to stick, Gr. *λίπος* grease, Skr. *rip-*, *lip-* to smear, adhere to.

The view of some scholars, that the Teut. words may belong to the Ar. root **leiq-* to leave (whence Gr. *λείπειν*, L. *linquere*), is plausible with regard to the sense, but the tendency of recent research is unfavourable to the admission of its formal possibility.]

IV. Phraseological combinations.

13. In various idiomatic phrases. **a. to leave . . . alone** (earlier **† to leave one**); to abstain from interfering with; = 'to let alone' (see ALONE 4 and LET v. 1). In the same sense, *to leave . . . be*

(colloq.) where *leave* has been substituted for *let* without modification of the form of the phrase. *to leave* (a person) *cold*: see COLD a. 7 e; *to leave it at that*: to proceed no further with a matter; to refrain from pressing a point; *to leave to (himself, etc.)*: to let (a person, etc.) alone or without help or interference from another or others; *to leave* (a person) *to it*: to leave (someone) alone, esp. to allow him to proceed with a task in hand. **b. to leave go (of), to leave hold (of), to leave loose (of)** colloq.: to cease holding, to let go.

In *to leave go, to leave loose*, the vb. was orig. transitive, *go* being *inf.*, and *loose* a complementary adj.; but the combinations being used *absol.* or with ellipsis of the obj. became virtually intransitive vbs., and were construed with *of*. (Cf. *let go*, under LET v. 1.) The frequency in use of the three expressions *leave go, leave hold, leave loose*, varies in different parts of the country, but perhaps none of them can be regarded as merely *dial.*

The notion expressed in some Dicts. that *leave* in some of these phrases represents ME. LEVE (OE. *lēfan, lȳfan*), to permit, is quite erroneous.

SLOCOMBE *Hist. Poland* (new ed.) 12 The Western Slavs had become divided into three distinct sections: the Serbs...; the Czech group...; and the Lech group, in which were included the Obodrites, the Wiltzi, the Pomeranians..., and other tribes who were in the course of the succeeding centuries to form the Polish nation. 1950 A. P. GOUDY in *Cambr. Hist. Poland* to 1096 i. 10 Besides the name Polanie, there existed another collective name—Lachy (Lechs). This term is used in the Chronicle of Nestor to indicate the Poles and came into frequent use by the old chroniclers.

lech (letʃ), *v.* Also letch. [Back-formation from LECHER *sb.*] *intr.* To behave lustfully, to feel or to be lecherous. *Occas.*, to have a (non-sexual) desire.

Le Chatelier (lə ʃæ'teljei). [The name of Henry Le Chatelier (1850-1936), French chemist.]

a. Used *attrib.* with reference to a test for the soundness (freedom from expansion) of cement using a small hollow brass cylinder split longitudinally and having pointers close to the split which indicate the extent of any expansion that occurs when the cylinder is filled with cement.

1904 *Specification for Portland Cement (B.S.I.)* 7 The cement shall be tested by the Le Chatelier method, and shall in no case show a greater expansion than 12 millimetres after 24 hours aeration and 6 millimetres after seven days aeration. The apparatus for conducting the Le Chatelier test... consists of a small split cylinder of brass. 1930 *Engineering* 18 July 62/1 Dry clay when adsorbing water increased in bulk and exerted... sufficient pressure to spring open the Le Chatelier gauge about 1 lb. per square inch. 1963 A. M. NEVILLE *Properties of Concrete* i. 50 The Le Chatelier test detects unsoundness due to free lime only.

b. Used *attrib.* and in the possessive († and in conjunction with the name of K. Ferdinand Braun (1850-1918), German physicist) to designate a principle enunciated by Le Chatelier, which states that if a constraint (such as a change in pressure or temperature) be applied to any system in equilibrium, the equilibrium will shift in such a way as to tend to counteract the effect of the constraint.

1910 *Chem. Abstr.* IV. 1600 (heading) New isomerization of benzopinacolins and Le Chatelier's law. 1911 *Ibid.* V. 3361 The author gives the following as the usual statement of the Le Chatelier-Braun principle. 1922 *Proc. Amer. Acad. Arts & Sci.* LVII. 25 The condition which must be satisfied in order that the Le Chatelier Principle may hold with regard to the effect of a change in the initial mass of one component, is that the addition of such component shall accelerate or retard the transformation (at equilibrium). 1943 *Thorpe's Dict. Appl. Chem.* (ed. 4) VI. 229/1 It would be expected from the Le Chatelier-Braun principle of mobile equilibrium that increase of pressure would exert a retarding effect upon the rate of a uni-molecular reaction. 1954 A. R. BAILEY *Text-bk. Metall.* viii. 232 A reaction involving a gaseous reactant is favoured by increase in operating pressure, and one involving a gaseous product by decrease of pressure or by sweeping it away in a gas stream; these points also follow from Le Chatelier's Principle. 1961 A. HOLDERNESS *Inorg. & Physical Chem.* xviii. 258 If the temperature of an equilibrium system... is lowered, Le Chatelier's Principle requires the equilibrium to shift so as to tend to raise the temperature again; that is, to evolve heat. 1973 *Jrnl. Chem. Education* L. 124 Since stretching a rubber band is an exothermic process, Le Chatelier's principle predicts that heat applied to a stretched rubber band will contract it.

lechatelierite (ləʃæ'telɪəraɪt, ləʃæ'te'lɪəraɪt). *Min.* Also †-iérite. [a. F. *lechatéliérite* (A. Lacroix 1915, in *Bull. de la Soc. franç. de Min.* XXXVIII. 185), f. LE CHATELIER + -ITE¹.] Naturally occurring vitreous silica, SiO₂, formed when siliceous material is intensely heated (as by lightning).

1916 *Mineral. Mag.* XVII. 353 *Lechatelierite*, naturally occurring fused (amorphous) silica. 1928 *Amer. Mineralogist* XIII. 77 *Lechatelierite* is unique in that it is the only naturally occurring glass that is definite enough to be considered a mineral. 1931 *Jrnl. R. Soc. W. Austral.* XVII. 146 Digging revealed a vertical core of lechatelierite in the soil. This core was hollow and very brittle, and extended downwards for about a metre. 1963 W. A. DEER et al. *Rock-Forming Min.* IV. 180 Silica glass (vitreous silica; lechatelierite): can exist at room temperatures and up to 1000°C... It is an unstable glass at all temperatures below 1713°C. 1964 *New Scientist* 16 Jan. 160/1 The invariable signs of flow and common presence of lechatelierite (pure silica glass) indicate that tektites were formed by rapid fusion at very high temperatures.

Leclanché (lə'klɑːʃeɪ). The name of Georges Leclanché (1839–82), French chemist, used *attrib.* and *absol.* to denote a primary cell invented by him that has a zinc cathode in contact with zinc chloride, ammonium chloride (in solution or as a paste) as the electrolyte, and a carbon anode in contact with a mixture of manganese dioxide and carbon powder.

1871 *Chem. News* 6 Oct. 186/2, I find that what I said about the Leclanché battery... has led to a false impression. It is used only on circuits of considerable resistance, and not much work, for which it is found very suitable. 1878 *Encycl. Brit.* VIII. 93/1 Good instances of this kind of action are furnished by the bichromate battery of Bunsen and the Leclanché [sic] cell, which occupy a sort of middle position between one and two fluid batteries. 1891 E. M. CAILLARD *Electr.* iv. 264 A form of Daniell's cell has been chiefly adopted in England, but the Leclanché is also excellent for telegraphic purposes. 1907 M. K. -lect, terminal element, f. DIALECT, used to designate a regional or social variety within a language as in IDIOLECT; also used in forming a number of technical terms in linguistics, as *acrolect*, *basilect*, *isolect*, *sociolect*, etc. (see *quots.*). Hence (without hyphen) as *sb.*, a social variety of a language or dialect.

1965 W. A. STEWART in R. W. Shuy *Social Dial. & Lang. Learning* 15, I will refer to this topmost dialect in the local

sociolinguistic hierarchy as *acrolect* (from *acro-* 'apex' plus *-lect* as in *dialect*). In most cases what is meant by 'Standard' English is either *acrolect* or something close to it. At the other extreme is a kind of speech which I refer to hereafter as *basilect* (from *basī-* 'bottom'). 1969 *Florida FL Reporter* VII. 1. 48 Although *acrolect* differs also in sounds and words from *basilect*, grammatical differences between them create the real blocks to communication. 1971 C.-J. N. BAILEY in *Working Papers in Ling.* (Univ. of Hawaii) III. v. 39 In this case, the creole becomes a satellite (*satellect* or *acoluthelect*) to the established language (*matrilect*). *Ibid.*, The matrilect serves as the *acrolect* in the continuum at one end, while the *basilect*... will be separated from the *acrolect* by a graded (systematic) series of *mesolects*. *Ibid.*, An *isolect* has been defined by me elsewhere as a form of speech different from its *isolectal* correlate. *Ibid.* 41, I have suggested *paralect* to denote folk creations from the related systems (e.g. middle Arabic, Puntī, Slavish). 1972 J. L. DILLARD *Black English* iii. 107 Higginson recorded many clause and question forms which are much as they still are in Black English *basilect* today. *Ibid.* 300 Dialect refers to a set of features delimited geographically; *sociolect* to a socially distributed set. 1974 J. NIST *Hondicapped Eng.* iii. 72 Any departure from that code... marks the speaker as confined to either the vernacular of *mesilect* or to the 'folk speech' of *basilect*. *Ibid.*, Geographical dialects in present-day British English automatically become social-class *lects*. 1975 *College Composition & Communication* XXVI. 1. 104/1 She is being primed to be the ideal teacher of *basilect* students in spite of her messy *lect*.

The *β.* forms are influenced by the L. *lectrum*, or perh. rather by the synonymous med.L. *lectrinum*, f. the same root (cf. *textrinum* weaver's shop, f. *tex-ere* to weave), which was the more usual word in eccl. Latin in the 15th c.

The mod.F. *lutrin* (15th c. *lieutrin*, *leutrin*) seems to represent a mixture of OF. *leitrin* (the vowel of the first syll. being influenced by that of the last) with OF. *lectrin*, ad. med.L. *lectrinum*. There seems to be no foundation for the common statement that Isidore's *lectrum* is ad. Gr. λέκτρον, for which no other sense is known in Gr. of any period than that of 'bed', 'marriage-bed'.]

lectin ('lektɪn). *Immunol.* [See *quot.* 1954 and -IN'] A substance, usu. a protein of plant origin, which has the properties of an antibody but is not produced in response to an antigen.

1954 W. C. BOYD in Neurath & Bailey *Proteins* IIb. xxii. 789 It would appear to be a matter of semantics as to whether a substance not produced in response to an antigen should be called an antibody, even though it is a protein and combines specifically with certain antigens alone. It might be better to have a different word for these substances, and the present writer would like to propose the word *lectin*, from the Latin *lectus*, the past participle of *legere*, meaning to pick, choose, or select. 1971 *New Scientist* 8 Apr. 82/2 Over a dozen different agglutinins or lectins have now been isolated from a variety of plant materials, but most work has centred on just two of them—wheat germ agglutinin and concanavalin A. Both preferentially agglutinate several sorts of transformed cells, including those transformed by polyoma virus. 1971 *Nature* 30 July 299/2 During the past eighteen months plant agglutinins, or lectins..., have become a major topic of conversation in many cancer research laboratories.

lectio difficilior ('lektɪəʊ dɪfɪ'kɪlə(r)). *Textual Criticism.* Also *difficilior lectio*. [L., 'harder reading', from the maxim *difficilior lectio potior*.] Of two alternative manuscript readings, the one that is less obvious, and therefore less likely to be a copyist's error; also, the practice of giving preference to such a reading.

It is... formulated by Bengel in the words, *Proclivi scriptiori praeferat ardua*, or... *Difficilior lectio potior*; the harder reading is to be preferred to the easier... The 'difficilior lectio' is preferable... because a hard reading is likely to be altered into an easy one. 1901 W. EDIE tr. *Nestle's Introd. Textual Crit. [Repr. three different but closely related OE. words: (1) OE. *léd* fem., nation, people; not found elsewhere in Teut. as fem., but corresponding in sense with the masc. sb. OHG. *liut* (MHG. *liut*, also neut.), MDU. *liet*, ON. *lýð-r* people (whence ME. LITH followers). (2) OE. *lêode*, *lêoda*, Northumb. *lîoda*, pl., men, people = OS. *liudi* (MDU. *liede*, Du. *lieden*), OHG. *liuti* (MHG. *liute*, mod.G. *leute*), ON. *lýðir*. (3) OE. *léd* str. masc., man (occurring only as a poetical word for 'king', and in the compounds *burhléd* (-*lîod*) burgher, *landléd* inhabitant); not found in the other Teut. langs. Cognates outside Teut. are OSl. *ljudŭ* masc. sing., people, nation, pl. *ljudije* people, folks, Lettish *laudis* fem. sing., people.

The relation between the Teut. words is uncertain, but the Slavo-Lettic cognates suggest that the OTeut. type was a collective sing. **leudi-s* masc., people, the plural of which had naturally much the same sense (cf. *folk, folks*). The OE. masc. sing., with the sense 'man', seems to have been evolved from the plural meaning 'people'. The fem. gender of the OE. *léd* people, and the form *lêoda* (*lîoda*) in the pl. instead of *lêode*, seem to be due to the influence of the synonymous *þeod* fem.

The Teut. word is commonly regarded as from the OArvan root **leudh-*, whence Goth. *liudan*, OS. *liodan*, OE. *lêodan*, to grow, spring (from).]

d. Comm. The principal book of the 'set of books' ordinarily employed for recording mercantile transactions.

Its distinctive feature is that its contents consist of 'debtor-and-creditor accounts'. Usually each person (or firm) with whom the trader has business relations has an account in the ledger, headed with his name, and showing the sums charged to his debit on the left page or half-page, and on the right those credited to him. In the system of 'double entry' the ledger includes other accounts of similar form to these, but headed with the designations of certain branches or subdivisions of the trader's own business.

MELLIS *Briefe Instruct.* C iv b, After you have thus sette every parcell orderly in your Iournal, then it behoueth you to take out the said parcelles, and compile and indite them into the third booke, called the Leager, which commonly is made of double so many leaues as is the Iournal. 1662-3 *PEYPS Diary* 7 Jan., So to my office all the morning, signing the Treasurer's ledger. 1679 R.
