But by Lithgow in 1632, and from 17th c. in New England, associated with *vale*, in the specific American sense 3.

It is not clear whether the association with *vale*, *valley*, was, in the first place, one of popular etymology, favoured perhaps by the partial survival of the old variant form in -*vale* (cf. *intervail* in sense 2), or whether this was in New England a natural development of the sense, arising from the fact that the chief *intervals* in the primeval forest were the bottoms of the river valleys, and giving rise to an association with *vale*, as used in English in such names as the Vale of Clwyd, Vale of Llangollen, Vale of the Yarrow, etc. It is possible that both principles operated together; and it is to be noted that, in this specific sense, *intervale* has not, even in American use, ousted *interval*.]

into ('Intu), *prep.* and *a.* Also 1 in *tō*, 2-3 (*Orm.*) *intto*, 2-6 in *to*. [Orig. the two words, *in* adv., *to* *prep.*, as in the similar collocations *out to*, *up to*, *down to*, *away to*, *off to*, *on to*, *in from*, *out from*, *away from*, *out of*, etc., in which the adv. expresses the general direction of motion, and the *prep.* specifies or has reference to a particular point or place. In the case of *in to*, the two words may refer to the same space, as in 'he went *in to* the house', or the *to* may refer to something which is *in* the space entered, as in 'he went *in to* the patient'; it is from the former of these that the combined *into* has arisen; in the latter the words are still written separate. But in early MSS. and editions this is often neglected; not only are the words often written separate when the sense is combined, but they are sometimes written in one, when the sense is the unconnected *in to* (a person, etc.). In *in to*, the *n* is long; in *into* the *n* is shortened by its rapid passage into the allied mute, *t*.]

General Sense:—The preposition expressing motion from without to a point within limits of space, time, condition, circumstance, etc.; the motion which results in the position expressed by *IN*, or which is directed towards that position.

In the Teutonic languages, as in Latin, this was originally expressed by the *prep.* *in* followed by the accusative or case of direction, and so distinguished from the simple notion of position expressed by *in* with the locative (or dative); but, when the case-endings were becoming weakened or lost in OE., so that the language was losing the power of making the distinction expressed in Latin by *in oquō*, *in aquom*, the periphrasis *in tō*, *intō*, was substituted for the latter. The other Teutonic langs., having retained the inflexions, esp. in the article and demonstrative words, have not required a parallel formation: cf. Ger. *in dem (im) wasser*, *in das (ins) wasser*. In OE. *intō* was usually, like the simple *tō*, construed with the dative; but also, not infrequently, with the accusative, like the simple *in (on)* which it superseded, or the *L.* in which it rendered: see sense 1.

As the *prep.* *in*, partly from its OE. blending with *on* (see *IN prep.* 2), partly from its identification with *L. in*, had various uses now usually expressed by other prepositions, so *into* was formerly used in senses now properly expressed by *unto*, *upon*, *towards*, *against*, etc.: see II.

The earlier use of *in* to express motion died out gradually, so that there long remained (and still remain) phrases and constructions in which *in* has the sense of *into* (see *IN prep.* 31); conversely, in some dialects, and esp. in Central and North-eastern Scotch, *into* was extended to express position, and thus took the sense of *in* (cf. F. *en*, *dans* *in*, *into*): see III.

intransitive (in'trænsitiv, -æ-), *a. (sb.)* [ad. L. *intransitivus* not passing over (Priscian), f. in- (IN-³) + trans-ire to pass over. Cf. F. *intransitif*.]

1. Gram. Of verbs and their construction: Expressing action which does not pass over to an object; not taking a direct object. (See TRANSITIVE, NEUTER.)

1612 BRINSLEY *Lud. Lit.* 129 This Verbe *Sum es*, is a Verbe Substantive intransitive, not a transitive; and therefore will have such case after it as it hath before it. **1638** MEDE *Apost. Latter Times* II. i. Wks. (1672) III. 675 The syntax of the words in the Greek is incapable of such an intransitive construction. **1711** J. GREENWOOD *Eng. Gram.* 154 Those verbs whose action does not pass on any other Thing, are called Intransitive. **1861** MASON *Eng. Gram.* §177 Many verbs which denote actions are used sometimes as transitive, sometimes as intransitive verbs.

b. as sb. An intransitive verb.

1824 L. MURRAY *Eng. Gram.* (ed. 5) I. 108 Verbs neuter may properly be denominated *intransitives*, because the effect is confined within the subject, and does not pass over to any object; as, 'I sit, he lives, they sleep'.

2. That does not pass on to another person, or beyond certain limits (specified or implied). *rare.*

3. Logic. Of a relation: such that if the relation holds between a first and a second item, and also between the second and third, it cannot hold (or more widely, does not hold) between the first and the third.

1870 C. S. PEIRCE in *Mem. Amer. Acad.* (1873) IX. 369 Repeating relatives may be divided (after De Morgan) into those whose products into themselves are contained under themselves, and those of which this is not true. The former are well named by De Morgan transitive, the latter intransitive. **1881** J. VENN *Symbolic Logic* xix. 403 Relations... may be divided into those which are 'transitive' and those which are 'intransitive'. **1903** B. RUSSELL *Princ. Math.* xxvi. 218 Relations which do not possess the second property I shall call not transitive; those which possess the property that xRy, yRz always exclude xRz I shall call intransitive. All these cases may be illustrated from human relationships. ... *Spouse* is symmetrical but intransitive; ... *father* is both asymmetrical and intransitive. **1930** L. S. STEBBING *Mod. Intro. Logic* vii. 113 Symmetry and transitivity... are independent, so that relations can be symmetrical and either transitive or intransitive; asymmetrical and either transitive or intransitive. **1964** E. 4. Math. Of a group: not transitive (see TRANSITIVE *a.* (sb.)) 6 and quot. (1889).

1889 *Amer. Jnl. Math.* XI. 195 If a substitution-group *I* is intransitive, the letters upon which it operates can be

distributed into 'systems of intransitivity', $x_1, x_2, \dots; y_1, y_2, \dots; z_1, z_2, \dots$ such that the substitutions of *I* interchange among each other only the letters x_1, x_2, \dots ; the letters y_1, y_2, \dots ; the letters z_1, z_2, \dots , and so on, and connect transitively the letters of each system. **1940** D. E. LITTLEWOOD *Theory Group Characters* iii. 42 In an intransitive group the symbols are divided into transitive sets, the symbols of each set being permuted amongst themselves. **1971** POWELL & HIGMAN *Finite Simple Groups* vii. 234 If the union of these is Ω , they form a fixed trio, and if not, the group is intransitive.

Hence **intransitively**, in an intransitive manner.

intraposition (inf. INTRA- 3 + *-pōlation*, after *extrapolation*.] = INTERPOLATION 3; also more widely, (an) inference within the scope or framework of what is known.

1923 C. D. BROAD *Sci. So **in'trapolate** *v.* = INTERPOLATE *v.* 6.

Anal.* XVI. 145 From the beginning the ego introjects objects 'good' and 'bad', for both of which the mother's breast is the prototype—for good objects when the child obtains it and for bad when it fails him. 1937 'C. CAUDWELL' *Illusion & Reality* viii. 158 A blue rose, which was in the speaker's perceptual world... has been formed in the common perceptual world and introjected into the hearer's perceptual world. 1952 W. J. H. SPROTT *Social Psychol.* ix. 169 We are familiar with a theory that we 'introject' our version of our parents. 1962 *Sci. & Psychoanal.* V. 74 Second, the problem was said to be related to the *cathexis* of a deceased sister now existing as an 'introjected object'. 1964 GOULD & KOLB *Dict. Social Sci.* 353/2 It is more probable that as a result of the powerful oral medium of the initial object-relations, identification may assume a more or less oral-cannibalistic, incorporative, and therefore introjective terminology. 1967 M. ARGYLE *Psychol. Interpersonal Behaviour* vii. 123 Children introject their parents' love and admiration of themselves. If they are never loved they will come to reject themselves and suffer from low self-esteem in later life.

introjection (intrəu'dʒɛkʃən). [L. *jacere* to throw; cf. *projection*, *interjection*. In senses 2 and 3, ad. G. *introjektion*.]

1. The action of throwing in; in quot. of 'throwing oneself into' or entering eagerly upon, some course or pursuit.

1866 BLACKMORE *Cradock Nowell* xxix. (1883) 154 She had so much self-abandonment, such warm introjection.

2. *Philos.* A theory whereby external objects are images of elements within the consciousness of the individual. Hence **introjectionism**,

belief in a theory of introjection, introjectionist a., pertaining to introjection.

1899 J. WARD *Naturalism & Agnosticism* II. xvi. 172 The term 'introjection' we owe... to the late Richard Avenarius of Zurich. *Ibid.*, Thus while my environment is an external world for me, his experience is for me an internal world in him. This is introjection. 1903 A. E. TAYLOR *Elem. Metaphysics* II. i. 81 Subjectivism is thus the last step in the development of the fallacy which begins with what Avenarius calls 'introjection'. *Ibid.* iv. i. 304 To translate it into the introjectionist psychology. 1912 *Mind* XXI. 10 The theory appears... to be really a piece of lingering introjectionism. 1931 G. F. STOUT *Mind & Matter* 291 Ward finds this in a supposed process... which, following Avenarius, he calls Introjection.

3. a. *Psycho-analysis*. A term used by S. Ferenczi (1909 *Jahrb. f. Psychoanal. Forschungen* I. 422-57) to denote the forming of a subjective image of an object and the transfer to it of emotional energy previously given to the object itself.

1916 E. JONES tr. *Ferenczi's Contrib. Psycho-Anal.* ii. 40 One might give to this process, in contrast to projection, the name of *Introjection*. 1917 C. R. PAYNE tr. *Pfister's Psychoanal. Method* xii. 387 In the projection, one feels subjective processes producing discomfort as influences of the outer world; in the introjection, inversely, processes of the outer world as one's own. 1922 J. STRACHEY tr. *Freud's Group Psychol.* 65 First, identification is the original form of emotional tie with an object; secondly, in a regressive way it becomes a substitute for a libidinal tie, as it were by means of the introjection of the object into the ego. 1946 *Mind* LV. 83 This growth of the super-ego has four main features, 'narcissism', 'introjection', 'nemesism', and 'sado-masochism'. 1963 *Listener* 7 Mar. 431/2 The ego has incorporated (by means of introjection...) certain fantasy figures acquired in infancy (such as the image of the breast).

b. *Psychol.* The forming of an inward image of the attitudes, values, and expectations of people or groups by whom one is anxious to be accepted.

1931 J. C. FLÜGEL in W. Rose *Outl. Mod. Knowl.* ix. 384 An introjection into the self of the earliest external moral forces, i.e. the moral attitudes and precepts of parents. 1955 M. KLEIN *New Directions in Psycho-Anal.* i. 21 External and internal situations are always interdependent, since introjection and projection operate side by side from the beginning of life. 1962 *Listener* 21 June 1055/2 When a child's parents have habitually reacted to his behaviour in a certain way—for instance, being shocked if he cheats—then after a time the child begins to react in this way towards himself. This is the process sometimes described as 'introjection'. 1967 M. ARGYLE *Psychol. Interpersonal Behaviour* vii. 121 A process of *introjection*, whereby children adopt the perceptions, attitudes, and reactions to themselves of parents and others.

intron ('intrɒn). *Genetics.* [f. *intr(agenic)* adj. s.v. INTRA- + *-ON*!; see quot. 1978.] A segment of an RNA molecule which is excised during or soon after its transcription from DNA and takes no part in forming the eventual gene; a segment of a DNA molecule which codes for this. Cf. EXON².

LEWIN *Genes* (ed. 2) xx. 362 Many of the long introns in these genes have open reading frames in register with the preceding exon; at least in some cases, there is evidence for translation of the intron.

3. *Math.* The theory put forward by L. E. J. Brouwer (1908) that mathematics is founded on extra-linguistic constructs based on pure intuition (in the Kantian sense, cf. INTUITION 5c); that space geometry is reducible to arithmetic and that therefore the law of the excluded middle, applying to finite classes, might not be valid for infinite classes. Cf. FORMALISM 3.

1913 tr. L. E. J. Brouwer in *Bull. Amer. Math. Soc.* XXV. 86 From the present point of view of intuitionism... all mathematical sets of units... can be developed out of the basal intuition, and this can only be done by combining a finite number of times the two operations: 'to create a finite ordinal number' and 'to create the infinite ordinal number ω '. 1940 [see FORMALISM 3a]. 1941 COURANT & ROBBINS *What is Math.?* I. 87 Some distinguished mathematicians have recently advocated the more or less complete banishment from mathematics of all non-constructive proofs... SPENCER *Data Ethics* IV. §20. 55 Nor is it otherwise with the pure intuitionists, who hold that moral perceptions are innate in the original sense. 1913 *Bull. Amer. Math. Soc.* XXV. 86 The intuitionist can never feel assured of the exactness of a mathematical theory by such guarantees as the proof of its being non-contradictory, the possibility of defining its concepts by a finite number of words or the practical certainty that it will never lead to a misunderstanding in human relations. 1926 *Proc. London Math. Soc.* 2nd Ser. XXV. 339 Apart from formalism, there are two main general attitudes to the foundation of mathematics: that of intuitionists or finitists... and that of the logicians. 1933 M. WARD *Ess.* (1884) II. 155 And this criticism of Intuitionistic philosophers suggests a more general remark. 1940 *Mathematical Rev.* Nov. 323/1 The treatment is 'intuitionistic' in the sense that it is purely algebraic, involving reference to order, absolute value, boundedness, etc., but not to limiting processes. 1942 D. D. RUNES *Dict. Philos.* 150 The resulting disjunction becomes intuitionistically acceptable. 1944 *Mathematical Rev.* Sept. 198/2 The author proves intuitionistically seven theorems concerning the full product of a finite or denumerable number of virtually ordered sets, generalizing some results of Brouwer concerning the full products of sets of integers. 1945 E. 1893 J. R. GREEN in *Ann. Bot.* VII. 90 This transformation has been found to be due to a special enzyme, to which the name inulase may be given. 1864-72 WATTS *Dict. Chem.* II. 863 A solution of cane-sugar left to itself, or warmed with dilute acids, loses its dextro-rotatory power, and acquires a laevo-rotatory power, which, when the transformation, or *inversion*, is complete, amounts to 38° for every 100° of the original rotation to the right.

b. In full, *Walden inversion* [tr. G. Walden'sche umkehrung (E. Fischer 1906, in *Ber. d. Deut. Chem. Ges.* XXXIX. 2895), named after P. von Walden (1863-1957), Latvian chemist]. Originally, the reversal of the direction of optical rotation observed in certain substitution reactions. Now interpreted as a change of configuration (from D to L or vice versa) occurring when a reactant enters along the axis of the bond between a central atom and the leaving group and causes the other substituents on the central atom to pass through a plane perpendicular to this axis; hence extended to other substitution reactions in which there is such a reversal of configuration, regardless of whether the molecule is optically active or the direction of activity reversed.

1899 *Jrnl. Chem. Soc.* LXXVI. II. 540 If... the sign of the rotatory power alone is considered, then optical inversion

occurs in the action of phosphorus pentachloride and pentabromide... and the only 'normal' action in which no inversion occurs is the hydrolysis by means of silver oxide. 1911 *Ann. Rep. Progr. Chem.* VIII. 64 Most cases of the Walden inversion have been observed in transformations of α -substituted acids and their derivatives. 1937 F. C. WHITMORE *Org. But 'invulnerability' also includes having too many missile sites for your enemy to be able to knock out even with a perfectly executed first strike; it includes having a mixed deterrent of bombers and land-base missiles and sea-going missiles, and it includes the case where your enemy knows that you are sure to have enough warning to launch your missiles and get your bombers aloft. This business of warning introduces serious ambiguities in the idea of 'invulnerability'. 1972 *Sci. 1. One of the non-metallic elements, belonging to the halogen group; at ordinary temperatures a greyish-black soft brittle solid with a metallic lustre, volatilizing into a dense vapour of a deep violet colour; in chemical properties resembling chlorine and bromine, but less energetic. ion ('aɪən). *Electr.* [a. Gr. *ἰόν*, neut. pr. *ppl.* of *ἵεναι* to go.] 1. Name given by Faraday to either of the constituents which pass to the 'poles' or electrodes in electrolysis: the general term including ANION and CATION. In modern use, any individual atom, molecule, or group having a net electric charge (either positive or negative), whether in an electrolytic solution or not.

1834 W. WHEWELL *Lett. to Faraday* 5 May in I. Todhunter *William Whewell* (1876) II. 182 For the two together you

might use the term *ions*. 1834 FARADAY in *Phil. Trans. R. Soc. CXXIV*. 79 Finally, I require a term to express those bodies which can pass to the electrodes. . . I propose to distinguish these bodies by calling those anions which go to the anode of the decomposing body; and those passing to the cathode, cations; and when I have occasion to speak of these together, I shall call them ions. [Note] Since this paper was read, I have changed some of the terms which were first proposed. *Ibid.* 112 A body decomposable directly by the electric current, i.e. an electrolyte, must consist of two ions. *Ibid.*, Compound ions are not necessarily composed of electro-chemical equivalents of simple ions. For instance, sulphuric acid, boric acid, phosphoric acid, are ions, but not electrolytes, i.e. not composed of electro-chemical equivalents of simple ions. 1856 W. A. MILLER *Elem. Chem.* II. xviii. 1110 When a binary compound, such as a fused chloride, . . . is submitted to electrolysis, the ions or components of the compound are separated at the respective electrodes in equivalent proportions. 1870 R. M. FERGUSON *Electr.* 161 The constituents into which the electrolyte is decomposed are called *ions*. 1879 *Encycl. Brit.* VIII. 107/1 Sodium acetate and silver chloride are therefore electrolytes of which Ag, Cl, Na, C₂H₃O₂ are the respective ions. 1896 W. R. WHITNEY tr. *Le Blanc's Elem. Electrochem.* iii. 60 Only those substances conduct which are at least partly dissociated, and therefore the conductivity is due to the dissociated parts; to the latter, which were called by him the 'ions', Arrhenius ascribed electric charges. 1896 RUTHERFORD & THOMSON in *Phil. Mag.* XLII. 405 We have made . . . experiments with the view to seeing whether there is any polarization when a current of electricity passes through a gas; we have not, however, been able to satisfy ourselves of the existence of this effect. The absence of polarization implies, however, that the ions are able to give up their charges to the metal electrodes. 1899 RUTHERFORD in *Ibid.* XLVII. 112 The theory has been put forward that the rays in passing through the gas produce positively and negatively charged particles in the gas, and that the number produced per second depends on the intensity of the radiation and the pressure. . . The term ion was given to them from analogy with electrolytic conduction, but in using the term it is not assumed that the ion is necessarily of atomic dimensions; it may be a multiple or submultiple of the atom. 1927 N. V. SIDGWICK *Electronic Theory of Valency* vi. 91 In a crystal like calcium carbonate we find the same kind of relation between the calcium ion and the CO₃ ion, but a different one for the constituent atoms of the CO₃ group; . . . this may be taken as evidence that the calcium and the CO₃ are themselves ions, but that the atoms of the CO₃ group are covalently linked to one another. 1962 P. J. & B. DURRANT *Introd. Adv. Inorg. Chem.* xii. 346 An ionic crystal is one in which the units of crystal structure are the ions of a salt. 1967 *New Scientist* 30 Nov. 531/1 The normal electrode separation is less than 1 mm, so there is a very strong electric field which ionizes the gas atoms, giving ions and electrons.

-ion, suffix¹, repr. F. *-ion*, L. *-io*, *-iōnem*, a suffix forming sbs. of condition or action, rarely formed from adjs. or sbs., as *communion-em* sharing in common, *portion-em* share, *rebellion-em* rebellion, *talion-em* retaliation; sometimes from the verb-stem, as *alluvion-em* alluvion, *condicion-em* terms of agreement, *legion-em* a chosen body of soldiers, *oblivion-em* forgetfulness, *opinion-em* opinion; but chiefly from the ppl. or supine stem in *t-*, *s-*, *x-*, where it was a permanent possibility, and, from most verbs, in actual use, e.g. *damnation-em* condemning, *complecion-em* fulfilling, *monition-em* warning, *munition-em* fortification, *notion-em* a taking note, *solucion-em* loosening, *action-em* acting, *mansion-em* staying, *abode*, *mission-em* sending, *co(n)nexion-em* close union. Examples of all these classes occur in English, through Fr. or from L. directly, or formed analogically in Eng. itself, e.g. *union*, *portion*, *religion*, *oblivion*, but chiefly those in *-tion*, (*-sion*, *-xion*), as *damnation*, *completion*, *munition*, *notion*, *pollution*, *action*, *session*, *connexion*; the form in *-ATION* (q.v.) is by far the most frequent, and has become a living formative.

-ion, suffix², the ending of *ION*¹, proposed by P. Broca, 1875 (in *Bull. de la Soc. d'Anthrop. de Paris* X. 346), as a suffix for forming the names of other craniometric points (as GNATHION, GONION).

-ion, suffix³, the word *ION* added to abbreviated forms of the names of elements and radicals to form the names of their ions, as *chlorion*, *hydrion*, *nitron*, *sodion*.

ADAMS *Wks.* (1854) IX. 549, I would... demand, in a tone that could not be resisted, the punctual fulfilment of every *iota* of the treaty on the part of Britain. **1863** WHYTE

MELVILLE *Gladiators* III. 124 We will not part with one iota of our privileges.

iotacism (aɪ'əʊtəsɪz(ə)m). [ad. L. *iotacismus*, a. Gr. ἰωτακισμός a laying too much stress upon the ι, repetition of ι, f. ἰωτα IOTA.] Excessive use or repetition of the letter *iota* or *i*; *spec.* the pronunciation of other Greek vowels like *iota* (i.e. as Latin *i* or mod.Eng. *ee*), as in modern Greek: see ITACISM, and cf. ETACISM.

1656 BLOUNT *Glossogr.*, *Iotacism* . . is when the letter (*I* or *Iota*) sounds much; as if we say, *Juno Jovi irascitur*. It is also sometimes taken for an error in pronouncing the letter *I*. 1834 *Fraser's Mag.* IX. 502 The letter *I* is a great letter. There was a prejudice against it among the Latins, and the Greeks were accused of Iotacism. a 1843 *SOUTHEY Comm. pl. Bk.* IV. 428 In the pronunciation of modern Greek Alfieri says the most melodious language in the world becomes a continual iotacism, like the neighing of a horse.

So *i'otacist*, one who practises iotacism in the pronunciation of Greek; = ITACIST.

iotal (aɪ'əʊtəl), *a. nonce-wd.* [f. IOT-A + -AL'.] Existing with respect to every iota; absolute in every detail.

1810 *Q. Rev.* III. 189 Mr. Smith's flaming profession as to the *iotal* accuracy of his creed.

iote, obs. form of JOT.

iotize (aɪ'əʊtaɪz), *v. rare.* [ad. Gr. ἰωτίζειν to write with an iota: see -IZE.] (See quot.)

1880 GRANT WHITE *Every-Day Eng.* 33 The introduction of it [the *i* sound] before another letter is called the iotizing of that letter.

I O U (aɪəʊ'juː). [= 'I owe you'.] A document bearing these three letters followed by a specified sum, and signed, constituting a formal acknowledgement of a debt.

[1618 BRETON *Court. & Countryman* *C, Hee teacheth od fellows play tricks with their Creditors, who in stead of payments, write *IOV*, and so scoffe many an honest man out of his goods.] 1795 ESPINASSE *Rep.* I. 426 *arg. note*, An I.O.U. is admissible evidence of a debt without a stamp. 1808 CAMPBELL *Rep.* I. 499 It had been held by Eyre C. J. that an I.O.U. was good without a stamp. 1817 MAR. EDGEWORTH *Harrington* xvi. 442 The fellow understands nothing, in short, but his IOUs. 1833 CHITTY *Bills of Exch.* 558. 1836 JAS. GRANT *Gl. Metrop.* I. iv. 190, I shall be able to pay it you in a couple of months', said his Lordship, handing the ex-fishmonger his IOU. 1840 MARRYAT *Olla Podr.* (Rtldg.) 300 Of course with IOU's upon his... domains. a 1845 HOOD *Sniffing a Birthday* vii, I'm free to give my IOU, Sign, draw, accept, as majors do. 1893 BITHELL *Counting-Ho. Dict.*, IOU, a recognized contraction of the sentence, 'I owe you.' It is a simple acknowledgment of indebtedness to some particular person. As it is neither a promissory note nor a receipt, it requires no stamp. It is not a negotiable instrument, but as it is an acknowledgment of a debt, that debt can be sued for at any time, and is so far equal to a promissory note payable on demand.

-iour, a compound suffix, viz. -OUR (OF. -ur, -or, F. -eur), preceded by an *i* representing *i*, *ei*, *e*, of another element; as in *saviour*, ME. and AF. *saiveour*, OF. *saive-ur*, -e-or, early OF. *salvedur*:—L. *salvātōrem*; later F. *sauteur*; in some cases a corruption of a different suffix, as in *haviour*, *behaviour*: see -OUR. Through the general later change of -our to -or, and the confusion of this with -er, several words formerly in -iour are now written -ior (as *warrior*), -ier (as *carrier*, *soldier*).

-ious, a compound suffix, consisting of the suffix -ous, added to an *i* which is part of another suffix, repr. L. -iōsus, F. -ieux, with sense 'characterized by, full of'. Found in L. in adjs. formed from derivative sbs. in -ia, -ies, -ius, -ium, as *invidiōsus* invidious, *perniciōsus* pernicious, *ebriōsus* drunken, *ebrius*, *odiōsus* odious; by false analogy in *cūriōsus* curious (from *cūra*): see -OUS. Also in adjs. belonging to sbs. in -io, -iōn-em, as *ambit-iōs-us* (from *ambit-iōn-em*) ambitious; so *captiōsus* captious, *factiōsus* factious, *obliviōsus* oblivious, *religiōsus* scrupulous, religious, *seditiōsus* seditious, *suspiōsus* suspicious, etc. By analogical extension from these, there is a tendency in English to form an adj. in -ious beside any sb. in -ion, esp. those in -tion, -cion, -sion, e.g. *rebellion*, -ious, *caution*, -ious, *infection*, -ious, *contradiction*, *deception*, *disputation*, *dissentious* (for -sious), *ignitiōsus*. Adjs. in -ious are also formed in Eng. by adding -ous to the stem of L. adjs. in -i-us, e.g. L. *vari-us* various; also in -itius from L. -īci-us, as *adventitious*: see -ITIOUS, and -OUS.

iow, obs. f. JAW, JEW.

Iowan (aɪəwən), *sb. and a.* Also formerly *Iowaian* (from the pronunciation *Ioway* of *Iowa*, which is still heard.) [f. *Iowa*, name of one of the

B. adj. Of, pertaining to, or designating what was formerly considered the fourth Pleistocene glaciation of North America, but which is now considered the earliest phase of the Wisconsin glaciation. Also *absol.*, the Iowan glaciation or the deposits it produced.

irk (3:k), *v. arch.* Also 4-7 irke, yrk(e), (5 erke), 5-6 hirk, 6 erk, irck, yirke, yerke, urke). [ME. *irke-n*, *yrke-n*, orig. northern and north midl.; found with the cognate adj. IRK, from c 1300; the compound FORIRK *v.* occurs as early as c 1250; of uncertain origin.

It does not appear whether the vb. was formed from the adj. (which would *a priori* be the more likely) or *vice versa*. The affinities outside Eng. are also uncertain; there was a rare MHG. *erken* to be disagreeable, to disgust, nauseate, with freq. *erkeln*, and adj. *erklich* abhorrent, which suits the sense; but the rarity of this, with its non-appearance in LG., causes difficulties. On the other hand, the northern character of the word in Eng. has suggested its identity with ON. *yrkja* (= Goth. *waurljan*, OE. *wyrcan*) to work, to take effect upon, Sw. *yrka* to urge, press, enforce; the theory being that the notion 'it works me' might have developed in Eng. that of 'it wears, tires, or disgusts me'. But for this there is no actual evidence; ON. *yrkir* does not even appear impersonally used.]

The ulterior etymology of the Celto-Teut. *isarno-* is uncertain; and the relationship of the various types in Eng. and the cognate languages involves many difficulties. The full Eng. type (= OHG., ON. *isarn*) was *isern*, found only in OE., though still in the 11th c. The form *isen*, corresp. to later OHG. *isan*, MHG. *isen*, Ger. *eisen*, MDu. *ijzen*, extends from OE. to the 14th c. in Kentish and perh. other south. dial. (at length reduced to *yse*, also in the comb. *ysmonger*: see IRONMONGER). The Eng. type *iren* has no continental parallel; in OE., as a simple sb., it was app. chiefly poetic, but it became the standard form in ME.; the second syllable was from the 14th c. variously spelt -en, -yn, -un, and from early in the 16th c. always -on, the prevalent 16th c. form being *yron*, on which *iron*

gradually gained, and became universal about 1630. In early ME. southern dial., *iren* was reduced to *ire*, *yre*, found in literature in 15th c., and still the s.w. dialect form from Berkshire to Cornwall. In north. dial., on the other hand, *iren* was compressed to *irn*, *yrn*, still used as *irn*, *irne*, *ern*, *airn*, in Sc. and north. Eng. dial. (See *Eng. Dialect Dict.* s.v.) In the standard Eng. *iren*, *iron*, syncopated app. did not take place until after diphthongation of the *i*, whence through a phonetic series ('i:rn), ('a:rn), ('a:rn), ('a:rn), ('a:rn), ('a:rn), came the existing ('a:rn); cf. the syncopated pa. pples. *born*, *borne*, *torrn*, *worn*, *boln*, *swoln*, and Sc. *fal'n*, *fawn*, from earlier *boren*, *toren*, *woren*, *bollen*, *swollen*, *fallen*. The 15-16th c. dial. spellings *iern*, *yern*, *yirn*, are ambiguous: in some cases they may have meant ('i:rn, 'a:rn), in others *yern*, ('j:rn), the latter prob. from Norse *jarn*, Da. *jern*. The plural *yrnes*, *irnes* (-ys, -esse, etc.) could arise alike from *yrn*, *irn*, or from *yren*, *iren* (as in *heven*, *hevnes*).

The form of the original *isarn* has been much discussed; it has been viewed by some as a derivative, and perhaps adj. form, and suggestions made of its relation to *is* ice (with the notion of 'glancing'), or to L. *as*, *ar*-, Goth. *aiz*, OHG. *ēr*, OE. *ār* brass; but in neither case with much probability. Some class it among the Inde-eur. neuter words with *r* in nom.-acc., and -n in oblique cases (e.g. Skt. *ādhar* gen. *ādhas*, L. *femur*, *feminis*), and suppose an orig. nom. **isarn*, gen. **isarnos* (yielding by Verner's Law **isarn-as*), whence the later forms in -r and -n, and (by contamination) -rn. The phonetic history of ON. *jarn* and its cognates is also doubtful. Grimm and others suggested a borrowing of OIr. *iarn*, giving ON. *iarn*, *iárn*, *járn*; others would derive it from *isarn* through *eran*, *earn*, *jarn*-. (See Möller in P. & B. *Beiträge* VII. 547; Noreen in *Arkiv for Nordisk Filologi* IV. 110 note, *Abriß der urgerm. Lautlehre* 195.) Uncertainty also attaches to the phonetic history of OE. *iren* whether it merely arose by rhotacism from *isen*, or from *isern* through an intermediate *irern*, shortened like *berern*, *beren*, *cweartern*, *cweartern*.)

1. a. A metal, the most abundant and useful of those used in the metallic state; very variously employed for tools, implements, machinery, constructions, and in many other applications.

Pure iron is soft and of a silver-white colour, but is scarcely known; the metal as commonly used has always an admixture of some other substance, usually carbon, and varies in colour from tin-white to dark grey. It is of three kinds, differing in the proportion of carbon present, and in properties: *malleable iron*, or *WROUGHT IRON*, which is comparatively soft, very tenacious, fusible only at a very high temperature, and capable at a red heat of being hammered or rolled into any required shape; *CAST IRON*, which is hard and brittle, and fusible at a lower temperature; and *STEEL*, which partakes of the properties of both. Iron is very rarely found native (the known instances being mostly of meteoric origin), but is obtained from its ores, which are chiefly oxides or salts of the metal. Chemically, iron is a metallic element: symbol Fe (*ferrum*); atomic weight, 56. In alchemy it was represented by the sign for the planet Mars (♂).

iron ('aɪən), a. Forms: see **IRON sb.** [OE. *isern*, *isen*, *iren*, for **isern-en*, etc., corresp. to Goth. *eisarn-eins*, OHG. *isarn-in*, *isern-in*, MHG. *iser-in*, *iser-en*, *iser-n*, Ger. *eiser-n*, MDu. *iser-ijn*, *-in*, *-en*, Du. *ijzer-en*.

The OE. forms, though identical in the nom. with the sb. (app. through loss of the adj. ending *-en*, after *-n* of the sb.) were real adjs., so inflected and entering into concord with sbs., as seen in sense 1. During the ME. period the inflexions disappeared, first in the northern dialect, and last in the south (where the pl. in *-e* survived to c 1400). The adj. was thenceforth indistinguishable from the attributive use of the sb. (as in *gold, silver, brass*, for *golden, silvern, brazen*), which again is largely owing to resolution of OE. compounds such as *iren-bend*, *iren-byrne*, *isern-scur*, etc.; but the feeling of its being an adj. often permits the use of *iron* in senses and constructions in which it is parallel to *golden*, *brazen*, rather than to *gold*, *brass*. But in most modern uses it is impossible to distinguish it from the sb. used attrib., from which it is here separated on historical grounds. An actual derivative adj. is found in IRNEN.]

'ironclad, iron-clad, *a.* and *sb.*

A. *adj.* 1. a. Clad in iron; protected or covered with iron; esp. of a vessel for naval warfare: Cased wholly or partly with thick plates of iron or steel, as a defence against shot, etc.

[Note. When the question of protecting ships of war, etc., by iron or steel armour first aroused general attention (c 1859), various terms were used to describe ships so protected, as *iron-cased*, *-clad*, *-clothed*, *-coated*, *-plated*, *-sided*, *steel-clad*, *-clothed*; *armour-clad*, *-plated*; of these, *iron-cased*, *-plated*, were at first preferred, and for several years were those usually employed in England, officially and otherwise; *iron-clad*, occasionally used in England before, appears to have come into common use at first in the United States, during the Civil War, and established itself as the preferred term c 1862-3, its adaptability as a substantive facilitating its general adoption. But its official use in England dates from c 1866.

isat-, an element derived from L. *isat-is* (Gr. ἰσάρις) woad, used in *Chem.* to form the name of ISATIN (see below), and of other bodies related to it and to indigo. Among these are:

isatic (aɪ'sætɪk) *acid*, C₈H₇NO₃ (= isatin + H₂O), substitution products of which are **bromisatic** (C₈H₆BrNO₃), **chlorisatic**, etc., *acids*; the salts are **isatates** ('aɪsəteɪts), **bro'misatates**, **chlo'risatates**, etc. **isatimide** (aɪ'sætɪmaɪd), the imide of isatin, C₂₄H₁₇N₅O₄. **isatite**: see ISATIN. **i'satogen**, any compound containing the bicyclic group C₈H₄NO₂ found in isatin; hence **isato'genic a.** **isato-sul'phuric acid**, an acid containing the elements of isatin and sulphuric acid or sulphuric anhydride; the salts of which are **isato-sulphates**. **'isatyde** (†**isathyd**), a substance bearing the same relation to isatin that indigo-white bears to indigo-blue, being formed from it by the addition of one atom of hydrogen.

isatin ('aɪsətɪn). *Chem.* Also -ine. [f. L. *isat-is*, *a.* Gr. ἰσάρις the plant woad, whence a blue dye is obtained + -IN¹.] A crystalline, reddish-orange substance (C₈H₅NO₂), of brilliant lustre, obtained from indigo by oxidation.

Isatin in combination plays the part of an acid, forming 'isatites, e.g. potassium isatite, C₈H₄KNO₂. With bromine and chlorine it forms **bro'misatin** (C₈H₄BrNO₂), **chlo'risatin**, in which one or two atoms of hydrogen are replaced by equivalent quantities of bromine or chlorine. The salts of these are **bromisatites**, **chlorisatites**.

-ise¹, a frequent spelling of **-IZE**, suffix forming vbs., which see.

-ise², suffix of sbs., repr. OF. *-ise*, properly:—L. *-itia*, but also, in words of learned formation, put for L. *-icia*, *-itia*, *-icium*, *-itium*, as in L. *justitia*, *judicium*, *servitium*, OF. *justise*, *juise*, *servise*. Hence it became a living suffix, forming abstract sbs. of quality, state, or function, as in *coward-ise*, *friand-ise*, *gaillard-ise*, *marchand-ise*. In the words from L., *-ise* was subsequently changed in F. to *-ice*, as in *justice*, *service*, in which form the suffix mostly appears in Eng., as in *justice*, *service*, *cowardice*; but *-ise* is found in *franchise*, *merchandise*, the obsolete or archaic *niggardise*, *quaintise*, *riotise*, *truandise*, *valiantise*, *warrantise*, and in such barely-naturalized words as *galliardise*, *gourmandise*, *paliardise*; also, in *exercise*, F. *exercice*, L. *exercitium*. Native formations on the same type are *inconvenientise*, *sluggardise*.

1875 A. NEWTON in *Encycl. Brit.* III. 768/1 His [sc. Middendorff's] chief object has been to trace what he has termed the isepipteses. . . Assuming that the advance is directly across the isepiptesimal lines . . . the whole course of the migration is thus most accurately made known. 1926 A. L. THOMSON *Probl. Bird-Migration* viii. 132 His [sc. Middendorff's] method was to plot out 'isepipteses', or isochronal lines, joining up all localities corresponding with each other as to their average dates for the arrival of particular summer visitors. [1962 C. D. SHERMAN tr. *Dorst's Migrations of Birds* viii. 233 He [sc. Middendorff] plotted these data on a map, linked the localities which migrants reach on the same date and thus obtained a line he called the isopiptes. . . -ish', a suffix forming adjs., of Com. Teut. origin; Goth. *-isks*, ON. *-iskr*, OHG., OS., OFris., OE. *-isc*, Ger., Du. *-isch*: cognate with Gr. *-ισκ-ος* dim. suffix of sbs. Sometimes syncopated to *-sh* (spelt also *-ch*). In Scottish usually *-is*, syncopated *-s*, *-ce*. In words of old formation, the prec. vowel had umlaut (which was often present in the sb. whence the adj. in *-isc* was formed); in later use the vowel has usually been altered back to that of the sb. when this is in use; e.g. *Scottish, Danish, after Scot, Dane*; the modified vowel being retained in other cases, as in *English, French, Welsh*.

1. In OE. and the cognate langs., chiefly forming gentile adjs. from national names: e.g. *British* (OE. *Brittisc*), *English* (OE. *Englisc*, †*Sc. Inglis*), *Scottish, Scotch* (OE. *Scyttisc*, *Sc. †Scottis, Scots*), *Irish* (OE. *Irisc*), *Welsh* (OE. *Wielisc*, †*Sc. Walys, Wallis*); *Danish* (OE. *Denisc*, †*Sc. Dense, Dence*); *Frankish, French* (OE. *Frēncisc*); so in many adjs. of various ages, as *Alemannish, Finnish, Flemish, Gaulish, †Greekish* (OE. *Grēcisc*), *Icelandish, Jewish, Jutish, Netherlandish, Pictish, Polish, Romish, Spanish, Swedish, Turkish, Wendish*.

2. Added to other sbs., with the sense 'Of or belonging to a person or thing, of the nature or character of'. These were not numerous in OE., whence only a few have come down to later times. Examples are *folcisc* popular, *hæðenisc* heathenish, *þeodisc* national, *inlēndisc* inlandish, *utlēndisc* outlandish (which come close to the gentile group in 1); also *mennisc* human, *cildisc* childish, *cierlisc* churlish. In later times this ending has become exceedingly common, sometimes in the earlier colourless sense as *boyish, girlish, waggish*, but chiefly in a derogatory sense, 'Having the (bad or objectionable) qualities of': as in *apish, babyish, boarish, boorish, brutish, clownish, currish, devilish, doggish, doltish, dronish, foolish, foppish, goatish, ghoulish, hoggish, impish, knavish, mannish, monkish, mulish, owlsh, prudish, roguish, selfish, shrewish, sluggish, sluttish, sottish, swinish, thievish, waspish, whorish, wolvish, womanish*. (These have usually corresponding Ger. forms in *-isch*.) Also from names of things, with sense 'of the nature of, tending to', as in *aguish, blackish, bookish, brinish, feverish, freakish, hellish, moorish*; or from other parts of speech, as *snappish, stand-offish, uppish*.

In recent colloquial and journalistic use, *-ish* has become the favourite ending for forming adjs. for the nonce (esp. of a slighting or depreciatory nature) on proper names of persons, places, or things, and even on phrases, e.g. *Disraelitish, Heine-ish, Mark Twainish, Micawberish, Miss Martineauish, Queen Annish, Spectator-ish, Tupperish, West Endish, all-over-ish, at-homeish, devil-may-care-ish, how-d'ye-doish, jolly-good-fellowish, merry-go-roundish, out-of-townish*, and the like.

1815 *Hist. Mr. J. Decastro* II. 243 She might have an I-dont-know-howishness about her which no lady can run away from unless she runs one way. 1836 DICKENS *Sk. Boz* (1837) II. 2 A clean-cravatish formality of manner. 1845 TENNYSON in *Ld. Tennyson Mem.* (1897) I. 227. I feel the least bit possible Miss Martineauish about it. 1883 'ANNIE THOMAS' *Mod. Housewife* 150 The Micawberish prospect of anything turning up. 1887 *Pall Mall G.* 17 Oct. 3/1 A Heine-ish sneer at the tendency of the Eternal-Feminine to relax the tension of our ideals. 1894 *Daily News* 4 Jan. 4/7 Some huge pile of building, generally much more Queen Anne-ish than the houses of Queen Anne's own time.

3. Added to adjs. with the sense 'Of the nature of, approaching the quality of, somewhat', apparently first with words of colour (which may have been treated as sbs., and so have originally come under 2): e.g. *bluish* (a 1400), *blackish* (a 1500), *brownish, reddish, whitish, yellowish*, etc. In later use also with other adjs., and now, in colloquial use, possible with nearly all monosyllabic adjs., and some others, e.g. *brightish, broadish, coldish, darkish, dimmish, dryish, dullish, duskish, feeblish, goodish, hardish, loudish, narrowish, oldish, palish, poorish,*

queerish, smallish, smartish, softish, tallish, thickish, thinnish, warmish, weakish, wettish, youngish. Derivatives of this type are peculiar to English among the cognate languages: those formed on adjs. of colour answer to F. adjs. in *-âtre*, as *bleuâtre, noirâtre*, and to Ger. adjs. in *-lich*, as *bläulich, schwärtzlich*. Of other adjectives, only a few have equivalent Ger. forms in *-lich*; the force of *-ish* is ordinarily given in Ger. by the qualifying *etwas* or *ein wenig*.

4. Added to names of hours of the day or numbers of years to denote: round about, somewhere near (the time or period of) (prob. after *earlyish, latish*).

1916 'PETER' *Trench Yarns* ix. 110 'What time shall I come?' 'Elevenish,' Sam replied. 1925 B. TRAVERS *Mischief* xiv. 209, I shall be going to Shady Nook at about tenish. 1930 J. B. PRIESTLEY *Angel Pavement* iii. 106 Eighthish then, next Tuesday, eh? 1941 *Britannia & Eve* Sept. 15/3 Lady Regan was probably thirty. Sir Gerald looked fifty-five-ish. 1950 *Sat. Rev. Lit.* 28 Jan., The ninetyish, gentle Chandler at the reception desk. 1955 E. HYAMS *Slaughterhouse Informer* xiv. 220 'We'll make a party of it.' 'Sixish?' 1967 B. NORMAN *Matter of Mandrake* xx. 174 Will you be in your room about sevenish? 1971 P. PURSER *Holy Father's Navy* iii. 19 Thirtyish furniture in pale, shabby wood. 1972 C. FREMLIN *Appointment with Yesterday* iv. 24 This anxious thirty-five-ish person.

From adjs. in *-ish*, advbs. in *-ishly* and sbs. of quality in *-ishness*, are formed *ad libitum*: e.g. *girlishly, girlishness, feverishly, feverishness*.

-ish', a suffix of verbs, repr. F. *-iss-*, extended stem of verbs in *-ir*, e.g. *périr* to perish, *perissant, ils periss-ent*. The F. *-iss-* originated in the L. *-isc-* of inceptive verbs, which in It., Pr., and Fr. was extended to form a class of simple verbs, corresp. to L. verbs in *-ire* and *-ēre*, and including others which were assimilated to these. At their first adoption, these verbs ended in Eng. in *-is*, *-ise*, *-iss(e)*, which before 1400 changed to *-isse*. In Sc. the original *-is*, *-isse*, was retained longer, and appeared in 16th c. as *-eis(e)*: *pereis, fleureis*. Among the chief examples of this ending are *abolish, accomplish, banish, blandish, blemish, brandish, burnish, cherish, demolish, embellish, establish, finish, flourish, furbish, furnish, garnish, impoverish, languish, nourish, perish, polish, punish, ravish, relinquish, replenish, tarnish, vanish, varnish*.

In some cases, other Fr. endings have been levelled under this suffix in AFr. or English: such are *admonish, astonish, diminish, distinguish, eternish, famish, lavish, minish, monish, publish, relish*, etc., for the history of which see the individual words.

In a few words the F. *-iss-* is represented in Eng. by *-ise*, or even *-ize*: e.g. *avertir, -iss- ADVERTISE, châstir, -iss- CHASTISE, amortir, -iss- AMORTIZE; réjouir, rejoiss-* has given *REJOICE*.

The idea of 'island universes' strewn throughout the ocean of space impressed the world. **1898** *Daily News* 7 May 8/1 The distance between these separate systems—or 'island universes' as they have been called—may be very great compared with the diameter of each system. **1928** J. Universe* i. 2 Many... nebulae were discovered. However, it was not until the 1920's that the problem of their distance and spacing was unravelled by Hubble, who showed that they were very distant island universes (galaxies) of stars many of which were similar to our Milky Way system.

1. A portion of land entirely surrounded by water; an island. Now more usually applied to an island of smaller size, except in established appellations, as 'the British Isles'.

In proper names *isle* is often prefixed, as Isle of Wight, Isle of Man, Isle of Dogs, Isle of Ely, Isle of Thanet; but it also follows, as in Coquet Isle, Scilly Isles, Orkney Isles: *island* usually follows, as in Lundy Island, Hayling Island, the Channel Islands, Canary Islands, West India Islands. As a common noun, *island* is the ordinary prose word; thus the Isle of Wight is commonly referred to as 'the island'.

ism ('ɪz(ə)m), *quasi-sb.* [The suffix *-ism* used generically as an independent word.] A form of doctrine, theory, or practice having, or claiming to have, a distinctive character or relation: chiefly used disparagingly, and sometimes with implied reference to *schism*.

-ism, suffix, repr. F. *-isme*, L. *-ismus*, a. Gr. *-ισμός*, forming nouns of action from verbs in *-ίζεω*, e.g. βαπτίζεω to dip, baptize, βαπτισμός the action of dipping, baptism. An allied suffix was *-ισμα(-r-)*, which more strictly expressed the finished act or thing done, and which in some cases is the source of modern *-ism*.

Besides its free use as a suffix forming *vbs.* on ordinary *sbs.* and adjs., *-ίζεω* was (as mentioned under *-IZE*) affixed to national names, with the sense to act or 'play' the people in question, and hence to act like, do after the manner of, practise the habits, customs, or language of, side with or adhere to the party of, those people. Hence the *sb.* in *-ισμός* had the sense of acting or doing like, siding with, adhesion to, or speaking like the people in question; e.g. Ἀττικίζεω to Atticize, to side with the Athenians, to use the Attic dialect; hence Ἀττικισμός, Atticism, a siding with Athens, Attic style of language, etc. The LXX (Esther viii. 17) and N.T. have 'λουβαίζεω to Judaize, to live like the Jews. The derivative 'λουβαισμός Judaism, the manner of the Jews, occurs in the LXX (2 Macc. ii. 21). The Latin *Judaismus* occurs in Tertullian (c 200); *Judaizare* in the Vulgate. Origen (a 250) has Χριστιανίζεω to play the Christian, act the part of a Christian, practise Christian principles, and Justin Martyr (a 150) has Χριστιανισμός the practice of Christians, Christianity. Hence late L. *christianizāre* in Tertullian, *christianismus* in Tertullian, Augustine and Jerome. On the

type of these, -ισμός, -ismus, became the ordinary ending to form names of religious, ecclesiastical, or philosophical systems; thus *pāgānismus* is cited by Du Cange from a council of 744. The OF. repr. of this, *paenisme*, *paenime*, *paime* (12th c.) is prob. the earliest Fr. example, and appears in Eng. as *painime*, *painim* in the 13th c. But, in the modern form and sense, *Judaisme* is found a 1500, and *christianisme* (a 1500 in Fr.) c 1525 in Eng. From the 16th c. such formations are numerous.

The following are the chief uses of the suffix:

1. Forming a simple noun of action (usually accompanying a vb. in -IZE), naming the process, or the completed action, or its result (rarely concrete); as in *agonism*, *aphorism*, *baptism*, *criticism*, *embolism*, *exorcism*, *magnetism*, *mechanism*, *nepotism*, *organism*, *plagiarism*, *ostracism*, *sylllogism*, *synchronism*, *volcanism*. To this group in Gr. belonged *asterism*.

b. Applied to these, though with affinities to 2, are words in which -ism expresses the action or conduct of a class of persons, as *heroism*, *patriotism*, *despotism*, and the more colloquial *blackguardism*, *busybodyism*, *desperadoism*, *priggism*, *scoundrelism*; also the condition of a person or thing, as *barbarism*, *deaf-mutism*, *orphanism*, *anomalism*, *mediævalism*, *parallelism*; also *Daltonism*; with such nonce-words as *barmaidism*, *old maidism*; *all-roundism*, *cleverism*, *devil-may-care-ism*, *well-to-do-ism*.

2. Forming the name of a system of theory or practice, religious, ecclesiastical, philosophical, political, social, etc., sometimes founded on the name of its subject or object, sometimes on that of its founder. Such are *Alexandrianism*, *Arianism*, *Arminianism*, *Brahmanism*, *Buddhism*, *Calvinism*, *Catholicism*, *Chartism*, *Christianism*, *Congregationalism*, *Conservatism*, *Epicureanism*, *Judaism* (a 1500), *Latitudinarianism*, *Liberalism*, *Machiavellism*, *Muhammadanism*, *Platonism*, *Positivism*, *Presbyterianism*, *Protestantism*, *Puritanism*, *Puseyism*, *Quakerism*, *Quietism*, *Radicalism*, *Ritualism*, *Romanism*, *Socinianism*, *Taoism*, *Toryism*, *Wesleyanism*, *Whiggism*.

These pass into terms of more or less temporary currency, as *Berkeleyism*, *Fourierism*, *Jeremy Benthamism*, *Layardism*, *Owenism*, *St. Simonism*; with nonce-words formed ad libitum, as *John Bullism*, *Robert Elmerism*, *Mahdiism*; and others designating the cult of a person or family, as *Bonapartism*, *Boulangism*, *Brontëism*, *Gladstonism*, *-onianism*, *Salisburyism*, *Stuartism*, etc.

b. More of the nature of class-names or descriptive terms, for doctrines or principles, are *agnosticism*, *altruism*, *animism*, *atheism*, *bimetallism*, *deism*, *egoism*, *egotism*, *empiricism*, *evangelism*, *fanaticism*, *feminism*, *heathenism*, *hedonism*, *idealism*, *imperialism*, *jingoism*, *libertinism*, *monachism*, *naturalism*, *opportunism*, *pædobaptism*, *paganism*, *polytheism*, *realism*, *romanticism*, *sansculottism*, *scepticism*, *stoicism*, *theism*, *universalism*.

These lead the way to nonce-formations of many kinds, often humorous, of which the following are specimens, chiefly from newspapers: *anti-slaveryism*, *anti-state-churchism*, *anti-whole-hogism*, *can't-help-myself-ism*, *know-nothingism*, *Little-Peddlingtonism*, *L.S. Deism* (after deism), *nothing-arianism*, *19th-century-ism*, *other-ism*, *P.R. B-ism*, *Primrose-leaguism*, *red-tapeism*, *Rule-Britanniaism*, *self-ism*.

3. Forming a term denoting a peculiarity or characteristic, esp. of language, e.g. *Æolism*, *Americanism*, *Anglicism*, *Atticism*, *Devonshireism*, *Galicism*, *Græcism*, *Hebraism*, *Hellenism*, *Latinism*, *Orientalism*, *Scotticism*, *Southernism*, *Westernism*, etc. To these add such as *archaism*, *classicism*, *colloquialism*, *modernism*, *newspaperism*, *solecism*, *sophism*, *witticism*.

Also denoting a peculiarity or characteristic of the language, style, or phraseology of a writer, speaker, character in fiction, etc., as *Browningism*, *Carlylism*, *De Quinceyism*, *Gibbonism*, *Montesquieuism*, *Micawberism*, and similar nonce-words without number.

Adjectives pertaining in sense to sbs. in -ism are formed in -istic; e.g. *atheism*, *atheistic*; *naturalism*, *naturalistic*.

Ismaelian, Ismailian (ismel'i:liən, -'liən), *sb.* and *a.* [f. pr. name *Ismael* or *Ismail*, the former being the Gr., L., and F. spelling of *Ishmael*, sometimes also used, in place of the more correct *Ismail*, to represent the Arabic *isma'īl*. -ismus, suffix, repr. G. -ismus or L. -ismus (see -ISM), used similarly to -ISM, indicating a typical condition or typical conduct, in nouns formed from proper names, or indicating a system or principle, as in *historicismus*, *mysticismus*, *Sherlockismus*, *snobismus*. Freq. with ironical or pejorative overtones.

1912 R. A. KNOX in *Blue Bk.* (Oxf.) July 132 There is a special kind of epigram, known as the Sherlockismus, of which the indefatigable Ratzegger has collected no less than 173 instances. The following may serve as examples: 'Let me call your attention to the curious incident of the dog in the night-time.' 'The dog did nothing at all in the night-time.' 'That was the curious incident,' said Sherlock Holmes. And again: 'I was following you, of course.' 'Following me? I saw nobody.' II. 16 The pure white ground and tense drawing so characteristic of the later Isnik tiles. 1957 — *Later Islamic Pott.* III. 60 It will probably never be possible to stop dealers and collectors calling the later Isnik wares 'Rhodian', and the nickname is at any rate a convenient label for the whole class in which the 'sealing-wax red' appears. 1966 J. FOWLES *Magus* xv. 88 A triangular cabinet full of pale-blue and green Isnik ware. 1972 *Daily Tel.* 5 Dec. 12/5 A large Isnik pottery dish of the late 16th century was bought by Eskenazi for £8,000 at Sotheby's yesterday.

iso- (aisəu), before a vowel sometimes *is-*, combining form of Gr. *isos* equal, used in numerous terms, nearly all scientific, the second element being properly and usually of Greek origin, rarely of Latin (the proper prefix in the latter case being *EQUI-*). The more important of these words are treated in their alphabetical places; others, of less importance or frequency, follow here.

Many recent words of this class are terms of Physical Geography, Meteorology, etc. formed on the analogy of *isotherm*, *isothere*, *isochimenal*, the Fr. originals of which were introduced by A. von Humboldt in 1817.

b. In Chemistry sometimes prefixed to the name of a compound substance to denote another substance isomeric with it.

The simple name having originally been given to one such substance, an isomer of it, when found to exist, is distinguished by the prefix *iso-*; but in some cases the first-discovered substance is not the simplest or normal form, and is itself properly designated the *iso*-type, when the normal type is subsequently discovered; thus the first-known *butyl alcohol* is now known as *iso-butyl alcohol*, a normal *butyl alcohol* having been subsequently obtained. *Iso-* was formerly regarded as a separable prefix and printed in italics (often with a hyphen). The International Union of Pure and Applied Chemistry recommendation is that *iso-* should always be directly attached to the remainder of the parent name (and be printed in ordinary type).

Where the isomerism occurs within an alkane or alkyl radical, the prefix *iso-* is used to form the name of the isomer having a $(CH_3)_2CH-$ group at the end of an otherwise straight chain: so $CH_3(CH_2)_3CH_3$ (normal or *n*-) pentane, $(CH_3)_2CHCH_2CH_3$ isopentane, $(CH_3)_3CCH_3$ neopentane.

The number of such names is unlimited, and liable to constant increase, as new isomeric forms of known compound bodies are discovered. Examples are *iso-amyl* (AMYL), *iso-butyl* or *iso-teteryl* (see BUTYL), *iso-butylate*, *iso-butylic*, *iso-butyric* (see BUTYRIC), *iso-cajuputene* (CAJUPUTENE), *isocaproic* (CAPROIC), *iso-cholesterin*, *iso-cyanate* (= carbimide), *iso-cyanide* (= carbamine), *iso-heptane*, *iso-hexane*, *iso-hydrobenzoin*, *iso-propyl* (PROPYL) or *iso-trityl*, etc.

Also *isoalloxazine* [ALLOXAN + AZINE], the hypothetical tricyclic parent compound, $C_{10}H_6N_4O_2$, of the flavins, which has a structure formed of fused benzene, pyrazine, and pyrimidine nuclei and is known only as substituted derivatives; *isoamyl alcohol* = *isopentyl alcohol*; *isoborneol* [a.
