electric apparatus; the instruments, machinery, and appliances used in electrical measurements, in producing and utilizing electric charges and currents, and in the study of electrical phenomena.

electric appliances; household articles operated by electricity or depending on electricity for their usefulness, as the electric clock, electric heater, etc.

electric atmosphere; same as *aura*, sense 3.

electric battery; same as *battery*, sense 12.

electric burner; a small electric heating plate set in a stand and used as a stove for heating and cooking.

electric candle; two parallel carbons insulated by some heat-resisting material, as kaolin: an alternating current passed in and out of the blunt end of the carbons forms a voltaic arc at the pointed ends: also called *Jablochkoff candle*.

electric cat or *catfish*; a fish found in African waters, capable of giving severe electric shocks.

electric cell; see *cell*, n. 9.

electric chair; (a) an apparatus in the form of a chair, used in electrocuting criminals; hence, (b) [Colloq.] the death sentence or punishment by electrocution; as, he got the *electric chair*.

electric chimes; chimes rung by being struck by hammers oscillating under the influence of electric attraction and repulsion.

electric clock; a clock operated or regulated by an electric motor.

electric column; a voltaic pile.

electric current; a flow of electricity along a conductor in a closed circuit and in one direction or in periodically reversed directions. The current may manifest itself in several ways, as by producing heat, chemical reactions, light, mechanical forces, or magnetic attraction or repulsion. The amount of current is equal, for direct currents, to the difference of potential in volts divided by the resistance in ohms, and is measured in amperes, one ampere being equal to one coulomb per second. For alternating currents, the effects of induction must be taken into account.

electric displacement; the movement of electricity through or in a dielectric subjected to an electric field of force.

electric dogfish; a marine fish, the stargazer, occurring along the Atlantic coast of the United States, and said to have electrical properties.

electric dyeing; a process of dyeing in which the chemical compounds used are decomposed by an electric current.

electric eel; a South American fish of the genus *Gymnotus*, found in fresh water, resembling an eel, and having an organ in its tail capable of giving severe electric shocks.

electric energy; the energy possessed by a system because of electric charges resident in or of currents flowing in the system. The energy of a charged body equals one-half the charge times the potential of the body.

electric expansion; the increase in volume of a body incident to its electrification.

electric explorer; an apparatus making use of induced currents for locating metallic substances in an unmetallic medium, particularly the human body.

electric eye; a photoelectric cell: used for controlling various sorts of apparatus, as for opening doors, etc.

electric fan; a ventilating or blowing fan, driven by an electric motor.

electric field; any space in which the effects of static electricity are discernible.

electric fish; any fish capable of communicating an electric shock.

electric fluid; a theoretical fluid, formerly postulated to account for electric phenomena.

electric fog; a fog accompanied by an electrically charged atmosphere.

electric force; the force of attraction or repulsion exerted by electrically charged bodies.

electric furnace; an electrically heated furnace used in the reduction of ore, manufacture of carbides, etc.

electric guitar; a kind of guitar whose tones are transmitted to an amplifier and loudspeaker through an electrical pickup attached to the bridge.

electric heat; heat generated in a circuit by current electricity.

electric heater; an apparatus that radiates heat generated by the passage of an electric current through a resisting material.

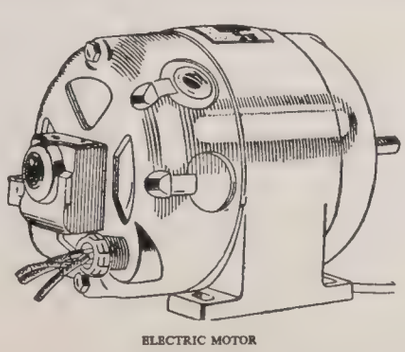
electric indicator; any electrically controlled automatic indicator, as an electric pressure gauge, etc.

electric iron; an electrically heated instrument used for pressing or smoothing.

electric jar; a Leyden jar or condenser.

electric lamp; an apparatus used for lighting in which matter is made luminous by electrical energy.

electric light; the light given off by a conductor, such as a carbon arc or a tungsten filament in an electric light bulb, which, due to its high resistance, becomes incandescent when an electric current is passed through it.



electric lock; an electrically controlled lock.

electric machine; a machine for generating electrical charges or currents, usually a machine for producing static or frictional electric charges, such as the Holtz and the Wimshurst machines. When the generation of a powerful continuous current of electricity is required, a dynamo, driven by steam or water power is used, thus converting mechanical energy into electrical energy by means of electromagnetic induction.

electric main; the principal or trunk conductor or wire of an electric lighting or power circuit.

electric meter; an instrument for measuring the current flowing in, the electromotive force applied to, or the power used in a circuit, as an ammeter, a wattmeter, or a voltmeter.

electric motor; a machine very similar to and often identical in construction with a dynamo, to which an electric current is led and by which the electrical energy of the current is converted into mechanical energy. Practically, it is a dynamo reversed in operation and turned by the magnetic effect of the current.

ELECTRIC MOTOR

electric needle; a high-frequency electrode in the form of a needle, used in surgery to cut through tissue, searing it at the same time to prevent bleeding.

ELECTRIC NEEDLE

electric organ; a musical instrument resembling an organ, but producing tones by means of vacuum tubes instead of pipes.

electric oscillations; alternating currents of very high frequencies.

electric osmosis; the transfer of a substance through a porous wall by an electric current, as the action on various electrodes placed in porous cups in electric batteries, in which the metal particles are transferred through the porous walls and deposited on the cathode.

electric pen; a pen or pointed style, the point of which is rapidly reciprocated by a small solenoid or similar electric device and is thereby enabled to make fine perforations, transferring to another sheet any writing or picture that is to be reproduced or manifolded.

electric pulse; a periodic variation in strength of a current, without any reversal of direction of flow: not an alternation or oscillation.

electric radiation; the radiation of electric energy by wave motion.

electric railway; a railway on which the rolling stock is moved by electric motors commonly supplied by a current taken off a circuit contiguous and parallel to the line.

electric ray; any of a group of rays (fish) capable of giving an electric shock: also called *torpedo*.

electric refrigeration; cooling obtained by the use of an electric refrigerator.

electric refrigerator; a refrigerator in which an electric motor provides the power for a mechanical cooling apparatus.

electric regulator; an apparatus for controlling the speed or the current generation in electric machines.

electric steel; steel made or refined in an electric furnace.

electric stress; force due to the attractions or repulsions of electric charges.

electric tension; the difference of potential; the electromotive force; the voltage.

electric thermometer; a thermometer indicating changes in temperature by the variation of the resistance of a conductor produced by the changes of temperature; also, a thermopile used to indicate differences or variations of temperature.

electric typewriter; a typewriter having keys which, when touched by the fingers, close an electric circuit that employs an electromagnet to force the type against the inked typewriter ribbon.

electric units; the magnitudes of electrical quantities adopted as standards or units for measurement or reference, as the coulomb, the unit of charge, etc.

electric varnish; an insulating varnish.

electric wave; a periodic oscillation of an electric charge having the character of a wave motion, by means of which electrical energy is transmitted through space; an electromagnetic wave.

electric welding; the process of welding metals, in which the welding heat is produced by an electric current passing through the junction of the pieces to be welded. The heat is localized at the welding points owing to the resistance produced by the gap in the circuit.

ē·leç'tri·çăl, *a.* 1. electric.
2. connected with the science or application of electricity; as, an *electrical* engineer.

ē·leç'triç·ăl·ly, *adv.* by or with electricity.

ē·leç'triç·ăl·ness, *n.* the state, condition, or quality of being electrical.

electrical transcription; in radio broadcasting, (a) a large, long-playing phonograph record for recording programs; (b) the use of such records for broadcasting.

ē·leç·tri'ciăn (-trish'ăn), *n.* 1. originally, one versed in the science of electricity; an investigator of the laws governing electricity.
2. one who invents, manufactures, constructs, installs, or repairs electrical apparatus.

ē·leç·tric'i·ty, *n.* [Gr. *ēlektron*, amber. So named because of the production of electricity by friction of amber.
1. a form of energy generated by friction, induction, or chemical change, and having magnetic, chemical, and radiant effects: it is a property of the basic particles of all matter, consisting of protons (positive charges) and electrons (negative charges), which attract each other.
2. (a) an electric current; a stream of moving electrons: it sets up a magnetic field of force through which it produces kinetic energy; (b) static electricity; a charge of stationary particles: it sets up a field of force having potential energy.
Static electricity, so called because the charge is at rest, is produced by friction, by pressure, by heating, and by electrostatic induction. This is the form in which electricity was first known.
Voltaic or current electricity involves the transfer of quantities of electricity along the conducting circuit. Currents are produced by chemical decompositions going on in a cell, by the movement of a conductor in a magnetic field, by the heating of the junction of two dissimilar metals, and by the inductive action of a varying current in one conducting circuit on another circuit in the neighborhood of the first.
Like electric charges repel each other, and unlike charges attract each other. A positive charge induces a negative charge in a neighboring unelectrified object and therefore attracts that object. Similarly, a negative charge produces a positive induced charge.
3. that branch of physics which treats of the laws and phenomena of electricity.
4. electric current supplied as a public utility for lighting, heating, etc.
5. a state of strong emotional tension, anticipation, etc.; as, her entrance created *electricity* in the room.
animal electricity; see under *animal*.
atmospheric electricity; electricity present, induced, or generated in the atmosphere.
dynamical electricity; current, or voltaic, electricity.
excitation of electricity; the production of an electric condition by one of various methods, for example, by rubbing a rod of glass with silk.
Faradaic electricity or *currents*; electrical currents produced by the inductive action of other currents: so called after Faraday, the discoverer of current induction.
frictional electricity; static electricity.
galvanic electricity; an electric current.
organic electricity; electricity developed in living organisms by processes taking place within the organism and incident to its life.
resinous electricity; negative electricity.
vitreous electricity; positive electricity.

ē·leç'triçs, *n.* electricity as a branch of science.

ē·leç'tri·çūte, *v.t.* same as *electrocute*.

ē·leç·tri·çu'tion, *n.* same as *electrocution*.

ē·leç·trif'ēr·ous, *a.* that can transmit electricity.

ē·leç'tri·fī·ȧ·ble, *a.* capable of receiving or being charged with electricity.

ē·leç"tri·fi·çā'tion, *n.* 1. an electrifying or being electrified.
2. all the installation and equipment required for electrifying.

ē·leç'tri·fī·ēr, *n.* a person or thing that electrifies.

ē·leç'tri·fȳ, *v.t.*; electrified, *pt., pp.*; electrifying, *ppr.* [*electric*, and L. *-ficare*, from *facere*, to make.]
1. to charge with electricity; to cause to become filled with electricity; as, to *electrify* a storage cell.
2. to affect by the transmission of electricity; to shock by an electric current.
3. to excite suddenly and intensely; to arouse to intense activity; to startle or to surprise, especially by something very inspiring or intensely interesting; to thrill; as, the dispatch reporting the relief of Mafeking *electrified* all England.
4. to equip for the use of electricity.

ē·leç'trine, *a.* [LL. *electrinus*; Gr. *ēlektrinos*, made of amber or electrum, from *ēlektron*, amber.]
1. pertaining to or made of amber. [Obs.]
2. made of electrum. [Obs.]

ē·leç'trīze, *v.t.*; electrized, *pt., pp.*; electrizing, *ppr.* to electrify: also written *electrise*.

ē·leç'trī·zēr, *n.* one who or that which electrizes.

ē·leç'trō, *v.t.*; electroed, *pt., pp.*; electroing, *ppr.* [abbrev. of *electro*type.] to electrotype.

ē·leç'trō, *n.*; *pl.* **ē·leç'trōs,** 1. an electrotype.
2. an electroplate.

ē·leç·trō-, [from Greek *ēlektron*, amber.] a combining form meaning: (a) *electric*, as in *electro*magnet; (b) *electrically*, as in *electro*cute; (c) *electricity*, as in *electro*statics; (d) *electrolysis*, as in *electro*deposit.

ē·leç"trō·ȧ·nal'y·sis, *n.* analysis by means of electrolysis.

ē·leç"trō·bal·lis'tiç, *a.* relating to or performed by electroballistics.

ē·leç"trō·bal·lis'tiçs, *n.* the science of measuring the velocity of a projectile between various points of its trajectory by making it cut wire screens which are placed at those points and form part of an electric circuit. Cutting the screen breaks the circuit and the instant of break is recorded on a chronograph placed on the circuit, thus fixing the instant of passage through each screen.

ē·leç'trō·bȧth, *n.* the solution used in electroplating or electrotyping.

ē·leç"trō·bī·ō·loġ'iç·ȧl, *a.* of or pertaining to electrobiology.

ē·leç"trō·bī·ol'ō·ġist, *n.* a person skilled in electrobiology.

ē·leç"trō·bī·ol'ō·ġy, *n.* the branch of biology which treats of electrical manifestations in living organisms.

ē·leç"trō·bī·os'çō·py, *n.* [*electro-*, and Gr. *bios*, life, and *skopein*, to view.] the testing of the muscles for contractions by passing an electric current through them: done, mainly, to determine whether life is or is not present.

ē·leç'trō·bronze, *n.* an article of metal (usually iron) electroplated with bronze.

ē·leç'trō·bronze, *v.t.* to make an electrobronze of.

ē·leç"trō·cap·il·lar'i·ty, *n.* that branch of physics which treats of the changes in capillarity which are produced by electric forces.

ē·leç·trō·çap'il·lā·ry, *a.* of or relating to electrocapillarity.

ē·leç"trō·çär'di·ō·gram, *n.* [*electro-*, and *cardiogram*.] the tracing produced by an electrocardiograph.

ē·leç"trō·çär'di·ō·gràph, *n.* [*electro-*, and *cardiograph*.] an instrument used to make graphic records of the changes in electric potential produced by the contractions of the heart.

ē·leç"trō·çär·di·ō·graph'iç, *a.* pertaining to or recorded by an electrocardiograph.

ē·leç"trō·çär·di·oġ'rȧ·phy, *n.* the study of the contractions of the heart by means of an electrocardiograph.

ē·leç·trō·çąu'tēr·y, *n.* the operation of cauterizing with an electrically heated wire.

ē·leç"trō·çhem'iç·ăl, *a.* of or pertaining to electrochemistry.
electrochemical series; a tabulation of the elements, such that each element is electropositive to all placed after it and electronegative to all preceding it.

ē·leç"trō·çhem'is·try, *n.* the science which treats of electricity in relation to chemical processes.

ē·leç"trō·çhron'ō·gràph, *n.* [*electro-*, and Gr. *chronos*, time, and *graphein*, to write.] an instrument for accurately recording the instant of any one or more occurrences and the elapsed time between such records. The time records are made by the making or breaking of a current or circuit, with a clock pendulum or other device, and a style making marks on a cylindrical surface revolving at a uniform and known rate.

ē·leç"trō·çhron"ō·graph'iç, *a.* relating to an electrochronograph.

ē·leç·trō·çop'pēr, *v.t.*; electrocoppered, *pt., pp.*; electrocoppering, *ppr.* to coat with copper by electrodeposition.

ē·leç'trō·çul·tūre, *n.* [*electro-*, and L. *cultura*, from *colere*, to cultivate.] in plant cultivation, the stimulation of plant growth by electricity, as by sending currents through the soil or by the influence of electric light.

ē·leç'trō·çūte, *v.t.*; electrocuted, *pt., pp.*; electrocuting, *ppr.* [*electro-* and *execute*.]
1. to put to death or execute (a criminal) by means of electricity.
2. to kill accidentally by electricity.

ē·leç·trō·çū'tion, ē·leç·trī·çū'tion, *n.* the act of putting to death by means of an electric current.

ē·leç'trōde, *n.* [*electro-*, and Gr. *hodos*, path, way.] either of the two terminals of an electric source, such as a battery: the positive electrode is called the anode, the negative electrode, the cathode.

ē·leç"trō·dē·poș'it, *v.t.* to deposit (a metal) electrolytically.

ē·leç"trō·dē·poș'it, *n.* a deposit made by an electric current, as in electroplating.

ē·leç"trō·dī·al'y·sis, *n.* the rapid removal of undesired ions from solution by the application of a direct current to electrodes inserted into a dialysis system.

ē·leç"trō·dȳ·nam'iç, ē·leç"trō·dȳ·nam'iç·ăl, *a.* 1. of electrodynamics.
2. of electricity in motion.
electrodynamic speaker; in radiotelegraphy, a loud-speaker in which the coil carrying the audio-frequency current is fastened to a movable disk, so that both the disk and coil vibrate with the changes in current.

ē·leç"trō·dȳ·nam'içs, *n.pl.* [*construed as sing.*], [*electro-*, and Gr. *dynamikos*, powerful, from *dynamis*, power.] the branch of physics dealing with the phenomena of electric currents and associated magnetic forces.

ē·leç"trō·dȳ·nȧ·mom'e·tēr, *n.* [*electro-*, and Gr. *dynamis*, power, and *metron*, a measure.] an instrument for measuring the strength of an electric current by means of the interaction between the different parts of a single circuit carrying the current.

ē·leç"trō·en·ceph'ȧ·lō·gram", *n.* a tracing showing the changes in electric potential produced by the brain.

ē·leç"trō·en·grāv'ing, *n.* the process of engraving by means of electricity.

ē·leç"trō·etch'ing, *n.* a method of etching upon metals by electrolytic action.

ē·leç·trō·ġen'e·sis, ē·leç·troġ'e·ny, *n.* [*electro-*, and the root of Gr. *gignesthai*, to produce.] in physiology, a tetanic state or condition produced in the muscles of the limbs by the passage of an electric current along the spinal cord or nerves.

ē·leç·trō·ġen'iç, *a.* in physiology, of or relating to electrogenesis; as, an *electrogenic* state.

ē·leç"trō·gild'ing, *n.* the gilding of a metallic surface by means of electricity.

ē·leç'trō·gilt, *a.* gilded by means of electricity.

ē·leç'trō·gràph, *n.* [*electro-*, and Gr. *graphein*, to write.]
1. the graphic record made by an electrometer or other device for recording the action of electricity.
2. an electrical device for etching or engraving plates.
3. a telegraphic instrument for transmitting photographs, drawings, etc.
4. the transmitted picture; wirephoto.

ē·leç·trog'rȧ·phy, *n.* 1. galvanography.
2. the reproduction of an engraving by electrodeposition.

ē·lec'trō·jet, *n.* a narrow, high-velocity stream of electric energy that girdles the earth in the ionosphere above the magnetic equator.

ē·leç"trō·ki·net'iç, *a.* of or relating to electrokinetics.

ē·leç"trō·ki·net'içs, *n.* [*electro-*, and Gr. *kinētikos*, from *kinein*, to move.] the branch of electrodynamics treating of electricity in motion, or electric currents, and the forces producing or controlling them: opposed to *electrostatics*.

ē·leç·trō·lier', *n.* [*electro-*, and chande*lier*.] a chandelier or fixture for electric lamps.

ē·leç·trō·loġ'iç, ē·leç·trō·loġ'iç·ăl, *a.* of or pertaining to electrology.

ē·leç·trol'ō·ġy, *n.* [*electro-*, and Gr. *-logia*, from *legein*, to speak.] the branch of physics treating of electricity.

ē·leç"trō·lū"mi·nes'cence, *n.* the emission of nonincandescent light by certain substances when acted upon by an alternating electric field.

ē·leç·trol'y·sis, *n.* [*electro-*, and Gr. *lysis*, a loosing, from *lyein*, to loose.]
1. the decomposition into ions of a chemical compound in solution by the action of an electric current passing through the solution.
2. the removal of unwanted hair from the body by destroying the hair roots with an electrified needle.

ē·leç'trō·lȳte, *n.* [*electro-*, and *-lyte*.] any substance which in solution is dissociated into ions and is thus made capable of conducting an electric current: when an electric current is passed through an electrolyte, a gas is generated or a solid deposited at the electrodes.

ē·leç·trō·lyt′iç, ē·leç·trō·lyt′iç·ăl, *a.* 1. produced by or pertaining to electrolysis. 2. of or containing an electrolyte.

ē·leç·trō·lyt′i·çăl·ly, *adv.* by electrolysis.

ē·leç·trō·lī′zà·ble, *a.* capable of being decomposed by an electric current.

ē·leç″trō·ly·zā′tion, *n.* the act or process of electrolyzing.

ē·leç′trō·līze, *v.t.*; electrolyzed, *pt., pp.*; electrolyzing, *ppr.* to subject to, or decompose by, electrolysis.

ē·leç·trō·mag′net, *n.* a core of magnetizable substance, such as soft iron, placed within a coil or helix of wire through which an electric current is passed. This magnetizes the core by induction, but the magnetic state thus induced persists during the passage of the current only, and disappears almost wholly with its cessation.

ELECTROMAGNET

ē·leç″trō·mag·net′iç, *a.* 1. of, relating to, or produced by electromagnetism. 2. of or produced by an electromagnet.

electromagnetic engine; an engine in which the motive power is electromagnetic in character, as an electric motor.

electromagnetic speaker; a loud-speaker in which the coil carrying the audio-frequency current is stationary.

electromagnetic stress; stress existing in magnetic fields.

electromagnetic wave; in radio, television, etc., a wave of electric energy radiated into space from an antenna.

ē·leç·trō·mag·net′i·çăl·ly, *adv.* by means of an electromagnet or electromagnetism.

ē·leç·trō·mag·net′içs, *n.* electromagnetism, sense 2.

ē·leç·trō·mag′net·işm, *n.* 1. magnetism produced by an electric current. 2. the branch of physics that deals with the relations between electricity and magnetism.

ē·leç·trō·met′ăl·lūr·ġy, *n.* the branch of metallurgy having to do with the use of electricity for producing heat in smelting, refining, etc., or for separating metals from their ores by electrolysis, or for electroplating.

ē·leç·trom′e·tẽr, *n.* [*electro-*, and Gr. *metron*, a measure.] an instrument for detecting or measuring differences of potential by the effects of electrostatic forces.

absolute electrometer; an electrometer in which the forces of electrostatic attraction or repulsion can be directly measured or indicated.

balanced or *attracted-disk electrometer*; see *balance electrometer*.

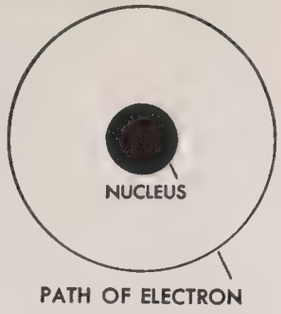
ē·leç·trō·met′riç, ē·leç·trō·met′riç·ăl, *a.* of or relating to electrometry or an electrometer; as, an *electrometric* indication.

ē·leç·trom′e·try, *n.* the science or process of making electrical measurements, especially by means of an electrometer.

ē·leç·trō·mō′tion, *n.* 1. the motion of an electric current. 2. motion produced by electric power.

ē·leç·trō·mō′tive, *a.* 1. producing an electric current through differences in potential. 2. relating to electromotive force or electromotion.

back electromotive force; the electromotive force in a circuit opposed to the impressed electromotive force: it is caused by the inductive effect of the current, or by the tendency of the products of electrolytic decomposition to reunite.



electromotive force; the force that can alter the motion of electricity, measured in terms of the energy per unit charge imparted to electricity passing through the source of this force.

impressed electromotive force; the electromotive force due to some outside source, as a dynamo or battery, applied to a circuit or branch of the circuit.

ē·leç·trō·mō′tŏr, *n.* 1. any source of electricity; an apparatus for generating an electric current, as a voltaic cell. 2. a machine or apparatus that transforms electrical into mechanical energy; an electric motor.

ē·leç·trō·mus′çū·lăr, *a.* relating to the action of electricity on the muscles.

ē·leç′tron, *n.* [Gr. *ēlektron*, amber.] 1. electrum. 2. any of the nonnuclear, negatively charged particles that form a part of all atoms, each carrying one negative charge 1.6 x 10^{-19} coulombs in size: the mass of an electron is about $^1/_{1800}$ of that of a proton, and the number of electrons circulating around a nucleus is equal to the number of positive charges on the nucleus.

PATH OF ELECTRON
ELECTRON
(diagram of hydrogen atom)

ē·leç·trō·neg′à·tive, *a.* 1. in physics and chemistry, having a negative electrical charge; tending to pass to the positive electrode, or anode, in electrolysis, by the law that opposite charges attract one another. 2. acid; negative; nonmetallic.

ē·leç·trō·neg′à·tive, *n.* a substance that is electronegative.

ē·leç′tron gun, the part of a cathode-ray tube that collects, focuses, and emits the electrons.

ē·leç·tron′iç, *a.* 1. of an electron or electrons. 2. operated, operating, produced, or done by the action of electrons.

ē·leç·tron′iç brāin, any of various calculators, computers, etc. operated electronically.

ē·leç·tron′iç mū′siç, music in which the sounds are originated, organized, or altered by electronic devices, and arranged and recorded on tape for presentation.

ē·leç·tron′içs, *n.pl.* [*construed as sing.*] the branch of physics which is concerned with the phenomena of electronic action in vacuums and gases, and with the use of vacuum tubes, photoelectric cells, etc.

ē·leç′tron mī′çrō·sçōpe, an instrument for focusing rays of electrons, rather than light rays, to form an enlarged image of the object: it is much more powerful than any optical microscope.

ē·leç′tron op′tiçs, the branch of electronics having to do with the control of electron rays by means of electric and magnetic fields, which act upon the rays in the same way that lenses act on light rays.

ē·leç′tron tel′ē·sçōpe, an instrument using a cathode-ray tube to form a visible image of infrared rays brought into focus from a distant object by optical lenses.

ē·leç′tron tūbe, a type of vacuum tube whose functioning is largely dependent on the motion of electrons, as an X-ray tube.

ē·leç′tron-vōlt, *n.* a unit of energy equal to that of an electron falling unimpeded through a potential difference of one volt.

ē·leç·trō·op′tiçs, *n.* electron optics.

ē·leç·trō·path′iç, *a.* of or by electropathy.

ē·leç·trop′à·thy, *n.* [*electro-*, and Gr. *pathos*, suffering.] same as *electrotherapeutics*.

ē·leç′trō·phōne, *n.* [*electro-*, and Gr. *phōnē*, sound.] a device for producing sound by means of electric currents.

ē·leç″trō·phō·rē′sis, *n.* cataphoresis.

Ē·leç·trō·phor′i·dae, *n.pl.* [*electro-*, and Gr. *pherein*, to bear.] a family of fishes, the electric eels.

ē·leç·troph′ō·rous, *a.* electriferous.

ē·leç·troph′ō·rus, *n.*; *pl.* **ē·leç·troph′ō·rī,** [*electro-*, and Gr. *pherein*, to bear.] an apparatus consisting of an insulated disk of resin, shellac, etc. and a metal plate, used in generating static electricity by induction.

ē·leç″trō·phys″i·ō·log′iç·ăl, *a.* relating to electrophysiology.

ē·leç″trō·phys·i·ol′ō·ġy, *n.* that branch of physiology which treats of electrical phenomena produced by or in living organisms.

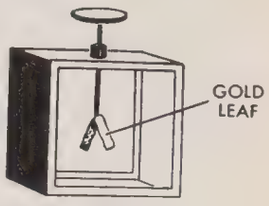
ē·leç′trō·plāte, *v.t.*; electroplated, *pt., pp.*; electroplating, *ppr.* to cover electrolytically with a coating of metal.

ē·leç′trō·plāte, *n.* that which has been electroplated; especially, silver-plated tableware.

ē·leç′trō·plā·tẽr, *n.* one who electroplates.

ē·leç′trō·plā·ting, *n.* the process or art of plating electrolytically.

ē·leç·trō·poi′ŏn, *n.* [*electro-*, and Gr. *poiōn*, ppr. of *poiein*, to make.] an electrolyte for certain electric batteries, made of potassium dichromate, water, and sulfuric acid.



ē·leç·trō·pō′lăr, *a.* having electric polarity; negatively electrified at one end, or on one surface, and positively at the other: applied to an electrical conductor.

ē·leç·trō·pos′i·tive, *a.* 1. having a positive electrical charge; tending to pass to the negative electrode, or cathode, in electrolysis. 2. basic; metallic; positive.

ē·leç·trō·pos′i·tive, *n.* an electropositive substance.

ē·leç·trō·puñç′tūre, ē·leç″trō·puñç·tū·rā′tion, *n.* in surgery, the application of galvanic currents by inserting needles into the affected part.

ē·leç′trō·sçōpe, *n.* [*electro-*, and Gr. *skopein*, to view.] an instrument for detecting very small charges of electricity, and indicating whether they are positive or negative, as by the divergence of strips of gold leaf.

ELECTROSCOPE

ē·leç·trō·sçop′iç, *a.* relating to, measured by, or capable of being detected by, an electroscope.

ē·leç·trō·stat′iç, *a.* of electrostatics; relating to electricity in a state of rest or to stationary electric particles.

electrostatic flux; the transfer of energy through space between two charged bodies.

electrostatic measure; measure of static electricity based on the attraction or repulsion of electrically charged objects.

electrostatic stress; the force exerted by tension existing near any electrically charged body.

ē·leç·trō·stat′içs, *n. pl.* [*construed as sing.*] [*electro-*, and Gr. *statikos*, causing to stand, from *histanai*, to stand.] the branch of electrical science which treats of the properties and effects of electricity at rest, or static electricity.

ē·leç′trō·steel, *n.* steel produced in electric crucibles.

ē·leç·trō·stē′rē·ō·tȳpe, *n.* see *electrotype*.

ē·leç·trō·steth′ō·graph, *n.* [*electro-*, and *stethograph*.] an instrument used in recording heart sounds or cardiac vibrations, which are projected on a viewing screen.

ē·leç·trō·sūr′gẽr·y, *n.* in surgery, the use of electrically operated instruments to cut through tissues or destroy them.

ē·leç·trō·syn′thē·sis, *n.* in chemistry, synthesis produced by means of an electric current.

ē·leç·trō·teçh′niç·ăl, *a.* of or pertaining to electrotechnics.

ē·leç·trō·teçh′niçs, *n.* the science that deals with the practical application of electricity in the industrial arts.

ē·leç″trō·ther·à·peū′tiç, *a.* relating to electrotherapeutics.

ē·leç″trō·ther·à·peū′ti·çăl, *a.* electrotherapeutic.

ē·leç″trō·ther·à·peū′tiçs, *n. pl.* [*construed as sing.*] in medicine, the application of electricity in disease; electropathy.

ē·leç·trō·ther′à·py, *n.* electrotherapeutics.

ē·leç·trō·thẽr′măl, *a.* using, relating to, or generating heat from electric energy.

ē·leç·trō·thẽr′miçs, *n.pl.* [*construed as sing.*] the branch of science which deals with the direct transformation of electric energy and heat, as in the heating chamber of certain rockets.

ē·leç·trō·thẽr′măn·cy, *n.* electrothermics.

ē·leç·trō·thẽr′mō·stat, *n.* a thermostat operating with electricity.

ē·leç·trō·ton′iç, *a.* in physiology, of or pertaining to electrotonus.

ē·leç·trot′ō·nīze, *v.t.* electrotonized, *pt., pp.* electrotonizing, *ppr.* to produce electrotonus in.

ē·leç·trot′ō·nus, ē·leç″trō·tō·nic′i·ty, *n.* [*electro-*, and Gr. *tonos*, tension.] in physiology, a changed state of a nerve produced during the passage of an electric current through any part of it.

ē·leç·trot′rō·pişm, *n.* [*electro-*, and Gr. *tropos*, from *trepein*, to turn.] in biology, the tropistic effect produced by electricity on vegetable organisms.

ē·leç′trō·tȳpe, *n.* [*electro-*, and Gr. *typos*, figure, image.] 1. a metal facsimile of a plate made by electroplating a wax impression of the original plate. 2. a print made from such a plate.

ē·leç′trō·tȳpe, *v.t.*; electrotyped, *pt., pp.*; electrotyping, *ppr.* to produce an electrotype of;

to duplicate by means of an electrotype; as, to *electrotype* a form.

ē·leç′trō·tȳpe, *v.i.* to make electrotypes.

ē·leç′trō·tȳ·pēr, *n.* one who electrotypes.

ē·leç·trō·typ′iç, *a.* 1. using, having the nature of, or relating to an electrotype. 2. of electrotypy.

ē·leç′trō·tȳ·py, *n.* the process or art of producing electrotypes. A matrix is made by pouring melted wax into a shallow molding case and impressing the cake thus formed with the surface to be duplicated. The matrix is coated with graphite, then suspended in a bath of copper sulfate acting as an electroplating cell in which a copper plate forms the anode, while the plumbago of the matrix forms the cathode. When the electrodes are connected to the terminals of a source of current, the copper is deposited on the cathode, forming a thin shell covering the wax impression. This shell is then backed with molten metal.

ē·leç′trum, *n.* [L., from Gr. *ēlektron*, amber.] 1. amber. [Obs.] 2. an amber-colored alloy of gold and silver, used by the ancient Greeks for coins. 3. an alloy of copper, nickel, and zinc, used for keys, tableware, etc.: also called *German silver, nickel silver*.

ē·leç′tū·ā·ry, *n.*; *pl.* **ē·leç′tū·ā·ries,** [LL. *electuarium, electarium*, from Gr. *ekleikton*, from *ekleichein*, to lick up; *ek*, out, and *leichein*, to lick.] a medicine composed of drugs mixed with honey or sirup to form a paste.

el·ee·mos′y·nā·ri·ly, *adv.* in an eleemosynary manner.

el·ee·mos′y·nā·ry, *a.* [LL. *eleemosynarius*, pertaining to alms, one who receives or gives alms, from *eleemosyna*; Gr. *eleēmosynē*, alms.] 1. charitable; of or for charity or alms. 2. supported by or dependent on charity. 3. given by charity; gratuitous; free.

el·ee·mos′y·nā·ry, *n.*; *pl.* **el·ee·mos′y·nā·ries,** one who lives on alms. [Obs.]

el′ē·gănce, *n.* 1. the state or quality of being elegant; dignified richness and grace, as of manner, language, dress, design, style, etc. 2. that which is elegant.

el′ē·găn·cy, *n.*; *pl.* **el′ē·găn·cies,** elegance.

el′ē·gănt, *a.* [L. *elegans* (*-antis*), luxurious, choice, fine, from *eligere*, to choose, select.] 1. characterized by dignified richness and grace, as of manner, dress, design, style, etc.; luxurious or opulent in a restrained, tasteful manner. 2. characterized by a sense of propriety or refinement; fastidious in manners and tastes. 3. excellent; fine; first-rate. [Colloq.]

el′ē·gănt·ly, *adv.* in a manner to please; with elegance; with beauty; with pleasing propriety; as, a composition *elegantly* written.

el·ē·ġī′aç (*or* ē-lē′ġi-aç), *a.* [LL. *elegiacus*; Gr. *elegeiakos*, from *elēgeia, elegeion*, an elegy.] 1. of or composed in dactylic hexameter couplets, the second line (sometimes called a pentameter) having only an accented syllable in the third and sixth feet: the form was used for Greek and Latin elegies and various other lyric poems. Scansion:

′⏑⏑ | ′⏑⏑ | ′⏑⏑ | ′⏑⏑ | ′⏑⏑ | ′⏑
′⏑⏑ | ′⏑⏑ | ′ | ′⏑⏑ | ′⏑⏑ | ′ |

2. of, like, or fit for an elegy. 3. sad; mournful; plaintive.

el·ē·ġī′aç, *n.* 1. an elegiac couplet. 2. [*pl.*] a series of such couplets; a poem or poems written in such couplets.

el·ē·ġī′ă·çăl, *a.* elegiac.

el″ē·ġī·am′bus, *n.*; *pl.* **el″ē·ġī·am′bī,** [Gr. *elegeion*, an elegy, and *iambos*, iambus.] a compound form of versification in which a line consists of seven syllables (two dactyls and one long syllable) and an iambic dimeter.

el″ē·ġī·og′rà·phēr, *n.* [Gr. *elegeiographos*; *elegeion*, an elegy, and *graphein*, to write.] a writer of elegiac verse. [Obs.]

el′ē·ġist, *n.* a writer of elegies.

ē·lē′ġit, *n.* [L., he has chosen; 3rd pers. sing. perf. ind. of *eligere*, to choose, select.] a writ of execution by which a defendant's goods are appraised and delivered to the plaintiff until his claim is satisfied.

el′ē·ġīze, *v.t.*; elegized, *pt., pp.*; elegizing, *ppr.* to commemorate or lament as in an elegy.

el′ē·ġīze, *v.i.* to write elegies.

el′ē·gy, *n.*; *pl.* **el′ē·ġies,** [Fr. *élégie*; L. *elegia*; Gr. *elegeia*, from *elegos*, a lament.] 1. a poem of lament and praise for the dead, as Shelley's "Adonais." 2. any poem in elegaic verse. 3. a poem written in a mournfully contemplative tone; as, Gray's "*Elegy* in a Country Churchyard."

ē·lē′i·din, *n.* [Gr. *elaia*, olive oil, oil.] a substance found in various parts of the epidermis, believed to be an intermediate stage in the formation of keratin.

el′ē·me, *a.* [Turk.] gathered by hand; hence, of the best quality: said of fruit; as, *eleme* figs.

el′ē·ment, *n.* [L. *elementum*, a first principle, element.] 1. any of four substances—earth, air, fire, water—formerly believed to constitute all physical matter. 2. any of these four substances thought of as the natural environment of a class of living beings. 3. the natural or fitting environment for a person or thing. 4. a component, feature, or principle of something; basic part. 5. in chemistry, any substance that cannot be separated into different substances except by nuclear disintegration: all matter is composed of such substances. 6. [*pl.*] the bread and wine used in the Eucharist. 7. in electricity, (a) either of a pair of metallic substances that act together in an electrolyte to produce electricity; (b) a positive or negative electrode; (c) the working part of an electrical appliance; as, the heating *element* of an iron. 8. in mathematics, (a) an infinitesimal part of any magnitude; differential; (b) the point, line, etc. that generates a line, surface, etc. 9. in military aviation, the basic unit of an air force, consisting of one or more aircraft: it is a subdivision of a flight.

in one's element; in a situation, surroundings, etc. suited to one.

the elements; (a) the first or basic principles; rudiments; (b) wind, rain, etc.; forces of the atmosphere.

el′ē·ment, *v.t.* to compound of elements or first principles. [Obs.]

el·ē·men′tăl, *a.* 1. of any or all of the four elements (earth, air, fire, and water) believed in by ancient philosophers. 2. of or like natural forces; characteristic of the physical universe. 3. basic and powerful; primal; as, hunger and sex are *elemental* drives. 4. of first principles; elementary; basic; rudimentary; simple. 5. being an essential part or parts. 6. in chemistry, of an element; not a compound.

el·ē·men′tăl·işm, *n.* worship of the elements as deities.

el″ē·men·tal′i·ty, *n.* composition of principles or ingredients.

el·ē·men′tăl·ly, *adv.* according to elements; in an elemental sense. [Obs.]

el·ē·men′tăr, *a.* elementary. [Obs.]

el·ē·men′tà·ri·ly, *adv.* in an elementary manner.

el·ē·men′tà·ri·ness, *n.* the state or quality of being elementary.

el″ē·men·tar′i·ty, *n.* elementariness. [Obs.]

el·ē·men′tà·ry, *a.* [L. *elementarius*, pertaining to an element; *elementum*, element.] 1. elemental. 2. of first principles; of the rudiments or fundamentals of something; introductory. 3. consisting of one chemical element; not a compound. 4. of a chemical element or elements.

Syn.—physical, material, natural, primary, rudimental, simple, inchoate, component, constituent, ultimate.

el·ē·men′tà·ry păr′ti·çle, a particle smaller than an atom, which is not a composite of other particles but is capable of independent existence, as a neutron, proton, electron, etc.

el·ē·men′tà·ry sçhool, 1. in educational systems having no junior high school, a school of eight grades, where basic subjects are taught. 2. in educational systems having a junior high school, a similar school of six grades. Also called *grade school, grammar school*.

el″ē·men·tā′tion, *n.* instruction in primary principles. [Obs.]

el·ē·men′toid, *a.* like an element; having the nature of a simple elementary substance.

el′ē·mi, *n.* [prob. of Ar. origin.] a resin used in the manufacture of varnishes, plasters, and medicinal ointments, and obtained from the bark of the *Canarium* and *Amyris*, genera related to the myrrh family: also *gum elemi*.

el′ē·min, *n.* [*elem*i and *-in*.] either of two derivatives of various elemis, one crystalline, the other oily.

ē·leñçh′, *n.* [L. *elenchus*; Gr. *elenchos*, from *elenchein*, to cross-examine, for the purpose

of refuting, to refute.] a fallacious argument which is apt to deceive under the appearance of truth; a sophism.

ē·leñ′çhiç, ē·leñ′çhiç·ăl, *a.* pertaining to an elenchus.

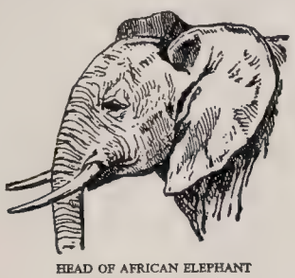
ē·leñ′çhiç·ăl·ly, *adv.* by means of an elenchus.

ē·leñ′çhīze, *v.i.* to dispute by using elenchi.

ē·leñçh′tiç, ē·leñçh′tiç·ăl, *a.* elenctic.

ē·leñ′çhus, *n.*; *pl.* **ē·leñ′çhī,** [L.; Gr. *elenchos*, cross-examination, disproof, refutation.]
1. an elench.
2. in logic, a syllogism that refutes a proposition by proving the direct contrary of its conclusion.

ē·leñç′tiç, *a.* [Gr. *elenktikos*, fond of cross-examining, critical.] in logic, (a) of elenchus; refuting; (b) of cross-examination.



el′enġe, *a.* [ME. *elenge*; AS. *ellende*, foreign, strange; G. *elend*, miserable.] troubled; filled with sorrow. [Obs.]

el′enġe·ness, *n.* misery; loneliness. [Obs.]

Ē·lē·oçh′à·ris, *n.* [Gr. *elos*, genit, *eleos*, low ground by rivers, marsh, and *chairein*, to rejoice.] a widely distributed genus of sedgelike plants, comprising about eighty species, commonly known as spike rushes, because of the appearance of the stalks.

el′ē·phăn·sy, *n.* [L. *elephantia*, from *elephans*, an elephant.] elephantiasis. [Obs.]

el′ē·phănt, *n.* [L. *elephantus* or *elephas*, *elephantis*; Gr. *elephas*, *elephantos*, an elephant, ivory; perhaps from Heb. *eleph*, an ox.]
1. a huge, thick-skinned, almost hairless mammal, the largest of extant four-footed animals, with a long, flexible snout (called a trunk) and two ivory tusks growing out of the upper jaw. Two existing species are *Elephas indicus* (the Indian elephant) and *Elephas africanus* (the African elephant). The former is characterized by a high, concave forehead, and small ears and tusks which are usually present in the male only. The tusks and ears are much larger in the African elephant, its forehead is convex, and both sexes have tusks.

HEAD OF AFRICAN ELEPHANT
(*Elephas africanus*)

HEAD OF INDIAN ELEPHANT
(*Elephas indicus*)

2. ivory; the tusk of the elephant. [Obs.]

el′ē·phănt ap′ple, an East Indian tree, *Feronia elephantum*, belonging to the *Rutaceæ*, having an edible fruit like the orange; also, the fruit.

el′ē·phănt bee′tle, any of a group of beetles of the genus *Goliathus*, native to Africa.

el′ē·phănt bīrd, a gigantic fossil bird, similar to the ostrich, found in Madagascar, of the genus *Æpyornis*.

el′ē·phănt çreep′ēr, a creeper, *Argyreia speciosa*, allied to the morning-glory, which runs to the tops of trees: it bears large, rose-colored flowers, and is native to both the Indies.

el′ē·phănt fish, a fish, *Callorhynchus antarcticus*, with a projection of the snout like a proboscis, belonging to the order *Chimæra*.

el′ē·phănt grăss, a plant native to southern Asia and southern Europe, *Typha elephantina*, considered a congener of the common cattail.

el·ē·phan′ti·aç, *a.* affected with or characteristic of elephantiasis.

el″ē·phăn·tī′à·sis, *n.* [Gr. *elephantiasis*, a skin disease, from *elephas* (*-antos*), an elephant.] a chronic disease of the skin characterized by the enlargement of certain parts of the body, especially the legs and genitals, and by the hardening and ulceration of the surrounding skin: it is caused by small, threadlike worms (*filariae*) which obstruct the lymphatic glands.

El·ē·phan′ti·dae, *n.pl.* [L. *elephas* (*-antis*), an elephant, and *-idæ*.] a family of mammals of which the elephant, *Elephas*, is the type.

el·ē·phan′tine, *a.* [L. *elephantinus*, from *elephas* (*-antis*), an elephant.]
1. pertaining to an elephant or elephants.
2. like an elephant in size or gait; huge, heavy, slow, clumsy, ungainly, etc.
3. in ancient Rome, designating certain books in which the Romans registered the transactions of the senate, magistrates, emperors, and generals: so called because made of ivory.

el′ē·phănt leg, elephantiasis.

el′ē·phănt mouse, a species of jumping or kangaroo mice, one of the African *Insectivora*, with a proboscislike snout: also called *elephant shrew*.

el·ē·phan′toid, el″ē·phan·toid′ăl, *a.* [Gr. *elephas* (*-antos*), an elephant, and *eidos*, form.] similar to an elephant in appearance or habits.

El·ē·phan′tō·pus, *n.* [Gr. *elephantopous*, ivory-footed; *elephas* (*-antos*), an elephant, ivory, and *pous*, a foot.] a genus of herblike plants, native to America and belonging to the aster family.

el·ē·phan′tous, *a.* [L. *elephantiasis*, and *-ous*.] resembling or of the nature of elephantiasis; as, an *elephantous* skin disease.

el′ē·phănt sēal, a seal, sometimes attaining a length of twenty feet, of the subfamily *Cystophorinæ*, genus *Macrorhinus*, the male of which has a proboscislike snout; the sea elephant.

el′ē·phănt's ēar, in botany, a species of the genus *Begonia*, so named because of its large, ornamental leaves.

el′ē·phănt's foot, 1. any of several species of *Elephantopus*.
2. a vine of the yam family, with a large root somewhat resembling an elephant's foot.

el′ē·phănt shrew, same as *elephant mouse*.

el′ē·phănt's tusk, a mollusk, *Dentalium arcuatum*, whose curved tubular shell resembles an elephant's tusk.

El·eū·sin′i·à, *n.pl.* [Gr. *Eleusinia*, neut. pl. of *Eleusinios*, pertaining to *Eleusis* (*-inos*), Eleusis.] the Eleusinian mysteries.

El·eū·sin′i·ăn, *a.* relating to Eleusis, a city in ancient Greece.

El·eū·sin′i·ăn mys′tēr·ieṣ, secret religious rites of ancient Greece, celebrated every spring at Eleusis in honor of Demeter and Persephone: they symbolized the annual death and resurrection of vegetation.

el·eū·thē′ri·ăn, *a.* [Gr. *eleutherios*, like a free man, frank, freely giving, from *eleutheros*, free.] giving freedom; liberating: applied to Zeus, as a liberator of slaves.

e·leū″thēr·ō·mā′ni·à, *n.* [Gr. *eleutheros*, free, and *mania*, madness.] a mania for freedom.

e·leū″thēr·ō·mā′ni·aç, *n.* one whose zeal for freedom appears to be a mania.

e·leū″thēr·ō·mā′ni·aç, *a.* having a mania for freedom.

e·leū″thēr·ō·pet′ăl·ous, *a.* [Gr. *eleutheros*, free, and *petalon*, a leaf.] having the petals free or noncoherent.

el′ē·vāte, *v.t.*; elevated, *pt., pp.*; elevating, *ppr.* [L. *elevatus*, pp. of *elevare*, to raise, lift up; *e-*, out, and *levare*, to make light, lift, from *levis*, light.]
1. to lift or raise from a lower to a higher place; as, to *elevate* a machine or a house.
2. to promote; to raise to a higher rank or position.

en'dō·cyst, *n.* [*endo-*, and Gr. *kystis*, a bladder.] the inner layer of the cell of a polyzoan.

en'dō·dērm, *n.* [*endo-*, and Gr. *derma*, skin.] the inner layer of cells of the embryo, from

which is formed the lining of the digestive tract and of other internal organs; endoblast; hypoblast.

en·dō·dēr′măl, en·dō·dēr′miç, *a.* pertaining to the endoderm.

en·dō·dēr′mis, *n.* in botany, a layer of cells forming a sheath around a fibrovascular bundle.

en·dō·en′zȳme, *n.* an enzyme that functions within the cell.

en·dog′ȧ·mous, en·dō·gam′iç, *a.* [*endo-*, and Gr. *gamos*, marriage.]
1. of endogamy.
2. practicing endogamy.

en·dog′ȧ·my, *n.* [*endo-*, and *-gamy*.] the custom of marrying only within one's own tribe or social group; inbreeding: opposed to *exogamy*.

en′dō·ġen, *n.* [*endo-*, and *-gen*: so called because the stems were formerly believed to grow from within.] any plant that grows by adding tissue irregularly throughout the stem; monocotyledon: distinguished from *exogen*.

en·dō·ġen′e·sis, *n.* same as *endogeny*.

en″dō·ġē·net′iç, *a.* endogenous.

en·doġ′e·nous, *a.* 1. developing from within; originating internally.
2. in biology, growing or developing from or on the inside.
3. in physiology and biochemistry, of the anabolism of cells.

en·doġ′e·nous·ly, *adv.* in biology, in an endogenous manner.

en·doġ′e·ny, *n.* [*endo-*, and *-geny*.] in biology, a growing from within; endogenous formation of cells.

en′dog·nath, *n.* [*endo-*, and Gr. *gnathos*, a jaw.] in zoology, the chief or inner division of the oral appendage of a crustacean.

en·dog′nȧ·thăl, *a.* in zoology, of or relating to the endognath.

en′dō·lymph, *n.* [*endo-*, and *lymph*.] in anatomy, the fluid in the membranous labyrinth of the ear.

en″dō·lym·phan′ġi·ăl, *a.* [*endo-*, and L. *lympha*, water, and Gr. *angeion*, a vessel.] in anatomy, situated or included in a lymphatic vessel.

en″dō·lym·phat′iç, *a.* [*endo-*, and L. *lympha*, water, and *-atic*.] in anatomy, (a) relating to or enclosing endolymph; (b) situated or included in a lymphatic vessel.

en·dōme′, *v.t.* to furnish with a dome.

en·dō·mēr′sion, *n.* see *endomersion objective* under *objective*.

en″dō·mē·trī′tis, *n.* [*endo-*, and Gr. *mētra*, womb, and *-itis*.] in medicine, an inflammatory condition of the endometrium.

en·dō·mē′tri·um, *n.* [*endo-*, and Gr. *mētra*, the womb.] in anatomy, the inner lining of the uterus.

en′dō·morph, *n.* [*endo-*, and Gr. *morphē*, form.] in mineralogy, a mineral, especially a crystal, enclosed within another.

en·dō·mor′phiç, *a.* 1. of an endomorph.
2. of or caused by endomorphism.
3. designating or of the abdominal physical type, characterized by predominance of the structures developed from the endodermal layer of the embryo (i.e., the internal organs): distinguished from *ectomorphic*.

en·dō·mor′phism, *n.* 1. the state or fact of being endomorphic.
2. structural change caused in an intrusive rock by the action of the surrounding rock.

en·dō·mys′i·um, *n.* [*endo-*, and Gr. *mys*, a muscle.] in anatomy, the tissue connecting muscular fibers.

en·dō·neū′ri·um, *n.* [*endo-*, and Gr. *neuron*, a nerve.] in anatomy, tissue connecting nerve fibers.

en·dō·par′ȧ·sīte, *n.* [*endo-*, and Gr. *parasitos*, a parasite.] any parasite that inhabits the internal organs of animals; hookworm, tapeworm, endamoeba, etc.

en″dō·par·ȧ·sit′iç, *a.* of or relating to endoparasites.

en·dō·path′iç, *a.* [*endo-*, and Gr. *pathos*, suffering.] in medicine, relating to diseases arising from internal causes; autopathic.

en″dō·pe·rid′i·um, *n.*; *pl.* **en″dō·pe·rid′i·ȧ,** [*endo-*, and *peridium*, from Gr. *peri*, around, and dim. *-idion*.] in botany, the inner of two peridia, as distinguished from *exoperidium*

en′dō·phragm (-fram), *n.* [*endo-*, and Gr. *phragma*, a fence.] in zoology, a horny partition in the thorax of some *Crustacea*.

en·dō·phrag′măl (-frag′), *a.* of or relating to the endophragm.

en·doph′yl·lous, *a.* [*endo-*, and Gr. *phyllon*, a leaf.] evolved from inside a leaf or sheath.

en′dō·phȳte, *n.* [*endo-*, and Gr. *phyton*, a plant.] in botany, any plant that grows within another plant.

en·dō·phyt′iç, *a.* of or pertaining to an endophyte.

en·doph′y·tous, *a.* [*endo-*, and Gr. *phyton*, a plant.] in zoology, fitted for penetrating and for living within plant tissues, as some insects and their larvae.

en′dō·plaṣm, *n.* [*endo-*, and Gr. *plasma*, a thing formed, from *plassein*, to form, mold.] in biology, the inner part of the cytoplasm of a cell: distinguished from *ectoplasm*.

en·dō·plaṣ′mȧ, *n.* same as *endoplasm*.

en·dō·plaṣ′miç, *a.* of endoplasm.

en′dō·plȧst, *n.* [*endo-*, and Gr. *plastos*, formed.] in protozoan life, a cell nucleus.

en·dō·plas′tron, *n.* same as *entoplastron*.

en·dō·plas′tūle, *n.* [*endo-*, and Gr. *plastos*, formed, molded, and dim. *-ule*.] in biology, among the higher *Protozoa* (as the amoebas), that which corresponds to the nucleolus in a metazoic cell.

en·dō·pleū′rȧ, *n.*; *pl.* **en·dō·pleū′rae,** [*endo-*, and Gr. *pleura*, rib, side.] in botany, the innermost covering of a seed.

en·dō·pleū′rīte, *n.* in zoology, among certain crustaceans, a part of the apodeme.

en·dop′ō·dīte, *n.* in zoology, the inner or principal branch of an ambulatory appendage of a crustacean.

En·dō·proç′tȧ, *n.pl.* same as *Entoprocta*.

en·dō·proç′tous, *a.* same as *entoproctous*.

end ọr′găn, any specialized structure at the peripheral end of nerve fibers having either sensory or motor functions.

en·dọrs′ȧ·ble, *a.* that can be endorsed: also spelled *indorsable*.

en·dọrse′, *v.t.*; endorsed, *pt., pp.*; endorsing, *ppr.* [with altered sp. after L., from ME. *endossen*; OFr. *endosser*, from ML. *indorsare*, from L. *in*, on, upon, and *dorsum*, the back.]
1. to write on the back of (a document); specifically, (a) to sign one's name as payee on the back of (a check, money order, etc.); (b) to make (a check, etc.) payable to another person by thus signing one's name and adding "payable to the order of —" on the back.
2. to give support or approval to; sanction; as, civic leaders have *endorsed* the housing project.
Also spelled *indorse*.

en·dọrse′, *n.* in heraldry, a palelike subordinary much narrower than a pale.

en·dọr·see′, *n.* the person to whom a check, note, etc. is made over by endorsement.

en·dọrse′ment, *n.* 1. the act of writing on the back of a check, note, etc.
2. something written on the back of a check, note, etc., as the signature of a payee, by which money or property is made over to someone.
3. a change, as of coverage or beneficiary, written on or added to an insurance policy, and signed by an agent of the insurer.
4. approval; sanction.
Also spelled *indorsement*.

en·dọrs′ẽr, *n.* one who endorses: also spelled *indorser*.

en′dō·särç, *n.* [*endo-*, and Gr. *sarx*, *sarkos*, flesh.] the endoplasm of certain protozoa.

en′dō·sçōpe, *n.* [*endo-*, and Gr. *skopein*, to view.] an instrument used for examining the inside of a hollow organ of the body, as the rectum or bladder.

en·dōs′çō·py, *n.* the examination of hollow organs of the body by means of an endoscope.

en·dō·skel′e·tăl, *a.* belonging to or associated with the endoskeleton.

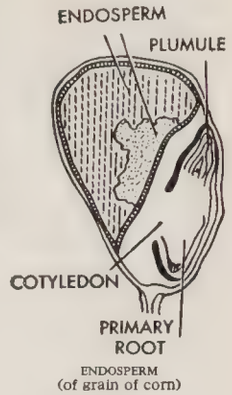
en·dō·skel′e·tŏn, *n.* [*endo-*, and Gr. *skeleton*, a dry body.] the internal bony supporting structure, or true skeleton, in vertebrates: distinguished from *exoskeleton*.

en·dos′miç, *a.* same as *endosmotic*.

en·dos·mom′e·tẽr, *n.* [*endo-*, and Gr. *ōsmos*, a thrusting, impulsion, and *metron*, a measure.] an instrument to measure the rapidity of endosmotic action.

en·dos·mō·met′riç, *a.* pertaining to measurements of endosmotic action.

en′dos·mōse, *n.* same as *endosmosis*.



en·dos·mō′sis, *n.* [Mod. L.; *end-*, and *osmosis*.] in osmosis, the more rapid diffusion of the less dense fluid through the semipermeable membrane to mingle with the more dense: opposed to *exosmosis*.

en·dos·mos′miç, *a.* same as *endosmotic*.

en·dos·mot′iç, *a.* relating to endosmosis.

en′dō·sōme, *n.* [*endo-*, and Gr. *sōma*, body.] in zoology, the inner layer of certain sponges.

en′dō·spẽrm, *n.* [*endo-*, and Gr. *sperma*, seed.] the nourishment for the embryo, which surrounds the embryo in the seed of a plant.

ENDOSPERM (of grain of corn)

en·dō·spẽr′miç, *a.* relating to the endosperm; of the nature of the endosperm.

en′dō·spōre, *n.* [*endo-*, and Gr. *sporos*, a sowing, seed.]
1. in bacteriology, an asexual spore formed within a special spore case.
2. in botany, the endosporium.

en·dō·spō′ri·um, *n.*; *pl.* **en·dō·spō′ri·ȧ,** [Mod. L.; see *endo-* and *spore*.] the inner layer of the covering of a spore.

en·dō·spōr′ous, *a.* having spores contained in a spore case.

en·doss′, *v.t.* [Fr. *endosser*, to put on the back, endorse; *en*, in, and *dos*, back, from L. *dorsum*, back.] to endorse. [Obs.]

en·dos′tē·ȧ, *n.* pl. of *endosteum*.

en·dos′tē·ăl, *a.* 1. relating to endostosis or the endosteum.
2. situated inside the bone.

en·dō·stẽr′nīte, *n.* [*endo-*, and Gr. *sternon*, the breast, chest, and *-ite*.] any of the parts of the endothorax of crustaceans and insects originating in the intersternal membrane.

en·dō·stẽr′num, *n.* [*endo-*, and Gr. *sternon*, the breast, chest.] same as *entosternum*.

en·dos′tē·um, *n.*; *pl.* **en·dos′tē·ȧ,** [Mod. L., from *end-*, and Gr. *osteon*, a bone.] the vascular connective tissue lining the marrow cavities of bones.

en·dos′tō·mȧ, *n.* [*endo-*, and Gr. *stoma*, mouth.] in zoology, a posterior plate which supports the labrum in some crustaceans.

en′dō·stōme, *n.* [*endo-*, and Gr. *stoma*, the mouth.]
1. in botany, (a) the opening through the inner integument of an ovule; (b) the inner peristome of a moss.
2. in zoology, same as *endostoma*.

en·dos·tō′sis, *n.* [*endo-*, and Gr. *osteon*, a bone, and *-osis*.] the formation of bone within cartilage.

en·dos′trȧ·çum, *n.* [*endo-*, and Gr. *ostrakon*, a shell.] in zoology, the inner layer of a crustacean's exoskeleton.

en′dō·stȳle, *n.* [*endo-*, and Gr. *stylos*, a pillar.] in zoology, a longitudinal fold of the endoderm projecting into the blood cavity of an ascidian.

en·dō·thē′çȧ, *n.*; *pl.* **en·dō·thē′cae,** [*endo-*, and Gr. *thēkē*, a case, chest.] the hard substance making up the lining of the visceral chamber of a coral.

en·dō·thē′çăl, *a.* of or pertaining to the endotheca.

en·dō·thē′ci·um, *n.* [*endo-*, and Gr. *thēkē*, a case, chest.] in botany, (a) a mass of cells in the center of a rudimentary capsule of a moss; (b) the interior lining of an anther cell.

en·dō·thē′li·ăl, *a.* pertaining to the endothelium.

en·dō·thē′li·oid, *a.* of or like the endothelium.

en″dō·thē·li·ō′mȧ, *n.* [*endo-*, and Gr. *thēlē*, nipple, and *ōma*, a tumor.] a tumor originating in or resembling the structure of endothelium.

en·dō·thē′li·um, *n.*; *pl.* **en·dō·thē′li·ȧ,** [Mod. L., from *endo-*, and Gr. *thēlē*, nipple.] the layer of squamous cells lining the inside of blood and lymph vessels, of the heart, and of some other closed cavities.

en·doth′e·loid, *a.* same as *endothelioid*.

en·dō·thẽr′mal, *a.* same as *endothermic*.

en·dō·thẽr′miç, *a.* [*endo-*, and Gr. *thermē*, heat, and *-ic*.] relating to or designating chemical reaction in which heat is absorbed: opposed to *exothermic*.

en·dō·thō′rax, *n.* [*endo-*, and Gr. *thōrax*, a breastplate, chest.] in zoology, the internal processes of the sternal plate in an insect or a crustacean.

en·dō·tox′in, *n.* [*endo-*, and *toxin*.] any of a group of toxic substances found in certain disease-producing bacteria and liberated by

the disintegration of the bacterial cell: they harm certain tissue cells.

en·dow′, *v.t.*; endowed, *pt., pp.*; endowing, *ppr.* [ME. *endowen*; OFr. *endouer*; *en-*, in, and *douer*, to endow, from L. *dotare*, to give.]
1. to furnish with a dower. [Obs.]
2. to provide with some talent, quality, etc.; as, he was *endowed* with courage.
3. to give money or property so as to provide an income for the support of (a college, hospital, etc.); bequeath.

en·dow′ēr, *v.t.* to endow; to enrich with a portion. [Obs.]

en·dow′ēr, *n.* one who endows.

en·dow′ment, *n.* 1. an endowing.
2. that with which something is endowed; bequest; gift; as, the *endowments* of a church, hospital, or college.
3. that which is given or bestowed on the person or mind; gift of nature; talent; ability.
Syn.—gift, provision, benefit, benefaction, capacity, attainment, qualification.

en·dow′ment pol′i·cy, an insurance policy by which a stated amount is paid to the insured after the period of time specified in the contract, or to the beneficiaries in case the insured dies within the time specified.

En·dō·zō′ȧ, *n.pl.* [*endo-*, and Gr. *zōon*, pl. *zōa*, an animal.] same as *Entozoa*.

en·dō·zō′iç, *a.* same as *entozoic*.

end pā′pēr, a folded sheet of paper one half of which is pasted to the inside of either cover of a book, the other half forming the first (or last) page of the book: also called *end leaf*.

end plāte, in anatomy, a kind of expansion of tissue connecting a muscle with the terminal of a motor nerve.

end plāy, in machinery, space allowed for movement endways.

end prod′uçt, the final result of any series of changes, processes, or chemical reactions.

en·drudġe′ (-druj′), *v.t.* to make a drudge or slave of. [Obs.]

end stōne, one of the jewels in a timepiece against which a pivot abuts.

end tā′ble, a small table to be placed at either end of a sofa, beside a chair, etc.

en·dūe′, *v.t.*; endued, *pt., pp.*; enduing, *ppr.* [ME. *endewen*; OFr. *enduire*; L. *inducere*, to lead in; *in-*, in, and *ducere*, to lead.]
1. to put on; clothe; cover. [Rare.]
2. to provide (*with* something); specifically, to endow (*with* qualities, talents, etc.).
Also spelled *indue*.

en·dūe′, *v.t.* [OFr. *enduire*, *induire*, to bring in, cover, digest.] to digest: said of birds, especially of hawks.

en·dūe′ment, *n.* endowment.

en·dūr′ȧ·ble, *a.* that can be endured; bearable.

en·dūr′ȧ·ble·ness, *n.* the state or quality of being endurable.

en·dūr′ȧ·bly, *adv.* in an endurable manner.

en·dūr′ănce, *n.* 1. an enduring.
2. the power of enduring; specifically, (a) ability to last, continue, or remain; (b) ability to stand pain, distress, fatigue, etc.; fortitude.
3. that which is endured; hardship. [Rare.]
4. duration.
Syn.—fortitude, patience, resignation, sufferance.

en·dūr′ănt, *a.* having ability to endure suffering, pain, disappointment, etc. [Rare.]

en·dūre′, *v.t.*; endured, *pt., pp.*; enduring, *ppr.* [ME. *enduren*; OFr. *endurer*, to bear, last, from L. *indurare*; *in-*, in, and *durare*, to harden, to hold out, last, from *durus*, hard.]
1. to stand (pain, fatigue, etc.); bear; undergo.
2. to put up with; tolerate.
Also spelled *indure*.

en·dūre′, *v.i.* 1. to last; continue; remain.
2. to bear pain, etc. without flinching; hold out.
Also spelled *indure*.
Syn.—bear, continue.

en·dūr′ēr, *n.* one who or that which endures.

en·dūr′ing, *a.* 1. having the capacity for remaining or continuing; durable; not to be destroyed; as, an *enduring* monument.
2. long-suffering.

en·dūr′ing·ly, *adv.* for a long time; permanently.

en·dūr′ing·ness, *n.* the quality or state of enduring; permanence; lastingness.

end′wāyṣ, end′wīṣe, *adv.* 1. on end; erectly; in an upright position.
2. with the end forward.
3. lengthwise.
4. end to end.

en′dy·mȧ, *n.* same as *ependyma*.

en′dy·mal, *a.* same as *ependymal*.

En·dym′i·ŏn, *n.* [L.; Gr. *Endymiōn*.] in Greek legend, a beautiful young shepherd loved by Selene and caressed by her as he slept.

en′dy·sis, *n.*; *pl.* **en′dy·sēṣ,** [Gr. *endysis*, a putting on, entering into, from *endyein*, to put on, get into.] in biology, the growth of new plumage, hair, or scales: opposed to *ecdysis*.

-ene, [from L. *-enus*, adj. suffix.] a suffix used (a) to form names of certain hydrocarbons, especially those which belong to the olefin or ethylene series; as in ethyl*ene*, benz*ene*; (b) to form commercial names for some products.

en′ē·çāte, *v.t.* [L. *enecatus*, pp. of *enecare*, to kill off; *e-*, out, and *necare*, to kill.] to kill; to destroy. [Obs.]

enef·fet′ (äṅ-ne-fe′), [Fr., lit., in effect.] in reality; in fact; indeed.

Ē·nē′id, *n.* same as *Æneid*.

en′e·mȧ, *n.* [Gr. *enema*, an injection, from *enienai*, to send in; *en-*, in, and *hienai*, to send.]
1. a liquid injected into the rectum either as a purgative or a medicine; clyster.
2. the injection of such a liquid.
3. the apparatus used for this.

en′e·my, *n.*; *pl.* **en′e·mieṣ,** [ME. *enemi*; OFr. *enemi*; L. *inimicus*, unfriendly, hostile (as substantive, an enemy); *in-*, not, and *amicus*, a friend.]
1. a person who hates another, and wishes or tries to injure him; a person hostile to an idea, cause, etc.; adversary; foe.

en·ep·i·dēr′miç, *a.* [Gr. *en*, in, and *epidermis*, the outer skin; *epi*, upon, and *derma*, skin, and *-ic*.] in medicine, applied to or laid on the skin; as, *enepidermic* treatment.

en·ēr·ġē′sis, *n.* [Mod. L., from Gr. *energein*, to be in action: see *energy*.] in botany, the process by which energy is liberated through catabolic action in the cell.

en·ēr·ġet′iç, *a.* [Gr. *energētikos*, from *energein*, to be in action, from *energēs*, *energos*, working, active; *en-*, in, and *ergon*, work.] characterized by or exhibiting energy; operating with force, vigor, and effect; forcible; powerful; efficacious; as, an *energetic* man, *energetic* methods.

en·ēr·ġet′iç·ăl, *a.* energetic.

en·ēr·ġet′iç·ăl·ly, *adv.* in an energetic manner; with energy and effect.

en·ēr·ġet′iç·ăl·ness, *n.* the quality or state of being energetic.

en·ēr·ġet′içs, *n.pl.* [*construed as sing.*] the science that deals with the laws of energy.

en·ēr′ġiç, *a.* having or exhibiting energy. [Rare.]

en·ēr′ġiç·ăl, *a.* energic.

en′ēr·ġīze, *v.t.*; energized, *pt., pp.*; energizing, *ppr.* to give energy to; to activate; as, to *energize* the will.

en′ēr·ġīze, *v.i.* to act energetically; to show energy; to be active.

en′ēr·ġī·zēr, *n.* an agent or means of imparting or increasing energy.

en′ēr·ġī·zing, *a.* capable of giving energy, force, or vigor.

en·ēr·gū′men, *n.* [L. *energumenus*; Gr. *energoumenos*, ppr. pass. of *energein*, to effect, work on.]
1. a person supposedly possessed by an evil spirit; demoniac.
2. a fanatic; enthusiast.

en′ēr·ġy, *n.*; *pl.* **en′ēr·ġieṣ,** [LL. *energia*; Gr. *energeia*, action, operation, energy, from *energēs*, *energos*, active, at work; *en-*, in, and *ergon*, work.]
1. strength of expression; force of utterance; life; spirit; emphasis.
2. internal or inherent power; potential forces; capacity for vigorous action.
3. [*pl.*] such powers, especially in action; as, apply all your *energies* to the cause.
4. effectual operation; efficacy; strength or force producing the effect.
5. in physics, the capacity for doing work and overcoming resistance: see *kinetic energy*, *potential energy*.
conservation of energy; see under *conservation*.
degradation of energy; see under *degradation*.
energy of rotation; in physics, the energy imparted to a body in giving it rotary motion, measurable by the work it will do in coming to rest.
Syn.—force, vigor.—With *energy* is connected the idea of activity; with *force* that of capability; with *vigor* that of health.

en′ēr·vāte, *v.t.*; enervated, *pt., pp.*; enervating, *ppr.* [L. *enervatus*, pp. of *enervare*, to deprive of nerves or sinews, to weaken; *e-*, out, and *nervus*, a nerve, sinew.]
1. to deprive of nerve, force, or strength; to weaken physically, mentally, or morally; to render feeble.
2. to cut the nerves of; as, to *enervate* a horse. [Obs.]
Syn.—debilitate, weaken, enfeeble.

ē·nēr′vāte, *a.* weakened; weak; without strength or force.

en·ēr·vā′tion, *n.* [LL. *enervatio*, from *enervare*, to weaken.] an enervating or being enervated.

ē·nēr′vā·tive, *a.* having a tendency to enervate; weakening.

ē·nēr′vā·tŏr, *n.* that which enervates.

ē·nērve′, *v.t.* to weaken; to enervate. [Obs.]

e·nērv′ous, *a.* lacking vigor; enervated; nerveless. [Obs.]

en·fāce′, *v.t.*; enfaced (-fāst′), *pt., pp.*; enfacing, *ppr.* to write or print on the face of (a note, check, draft, or other negotiable paper).

en·fāce′ment, *n.* something written or printed on the face of a document.

ep·i·dem′iç·ăl, *a.* epidemic; characteristic of an epidemic.

ep·i·dem′iç·ăl·ly, *adv.* in an epidemic manner.

ep·i·dem′iç en·ceph·ȧ·lī′tis, sleeping sickness.

ep·i·dē·mi·og′rȧ·phy, *n.* [Gr. *epidēmios*, among the people, epidemic, and *-graphia*, from *graphein*, to write.] a treatise on or description of epidemic diseases.

ep·i·dē″mi·ō·loġ′iç·ăl, *a.* pertaining to epidemiology.

ep·i·dē″mi·ō·loġ′iç·ăl·ly, *adv.* in an epidemiological manner.

ep·i·dē·mi·ol′ō·ġist, *n.* one who makes a study of epidemiology.

ep·i·dē·mi·ol′ō·ġy, *n.* [Gr. *epidēmios*, among the people, epidemic, and *-logia*, from *legein*, to speak.] the science which investigates the causes and control of epidemic diseases.

ep′i·dem·y, *n.* an epidemic. [Obs.]

ep·i·den′drăl, *a.* [*epi-*, and Gr. *dendron*, a tree.] growing or existing upon trees.

Ep·i·den′drum, *n.* [from Gr. *epi*, upon, and *dendron*, a tree.] a large genus of tropical American orchids, most of the species of which are epiphytic, growing on trees. The stems are often pseudobulbs, and the leaves are strap-shaped and leathery. The flowers are very handsome, and a large number of the species are in cultivation.

ep′i·dērm, *n.* the epidermis.

ep·i·dēr′măl, *a.* epidermic; pertaining to or like the epidermis.

ep″i·dēr·mat′iç, *a.* same as *epidermal*.

ep·i·dēr′mȧ·toid, *a.* same as *epidermoid*.

ep·i·dēr′mē·ous, *a.* epidermic.

ep·i·dēr′miç, *a.* pertaining to or like the dermis; epidermal.

ep·i·dēr′miç·ăl, *a.* epidermic.

ep·i·dēr′mi·dăl, *a.* epidermal.

ep·i·dēr′mis, *n.* [LL. *epidermis*; Gr. *epidermis* (*-idos*), the outer skin; *epi*, upon, and *derma*, skin.]

1. the outermost layer of the skin in vertebrates, having no blood vessels and consisting of several layers of cells, covering the dermis.

2. in botany, the outermost layer of cells covering seed plants and ferns.

3. the outer layer of the shells of many mollusks.

4. any of various other integuments.

ep·i·dēr′moid, *a.* like, or having the nature of, epidermis.

ep·i·dēr′mōse, *n.* same as *keratin*.

ep·i·dēr′mous, *a.* epidermal.

ē·pi·dī′ȧ·sçōpe, *n.* a mechanical device for projecting images of opaque and transparent objects upon a screen.

ep·i·diç′tiç, ep·i·deīç′tiç, *a.* [L. *epidicticus*, declamatory; Gr. *epideiktikos*, from *epideiknynai*, to display, show, demonstrate; *epi*, upon, and *deiknynai*, to show, point out.] serving to display, exhibit, or explain; demonstrative: applied to oratory.

ep·i·diç′tiç·ăl, ep·i·deīç′tiç·ăl, *a.* same as *epidictic*.

ep·i·did′y·măl, *a.* relating to the epididymis.

ep·i·did′y·mis, *n.*; *pl.* **ep″i·di·dym′i·deṣ,** [Gr. *epididymis*, the epididymis; *epi*, upon, and *didymos*, a testicle.] a long, oval-shaped structure attached to the rear upper surface of each testicle, consisting mainly of the excretory ducts of the testicles.

ep·i·did·y·mī′tis, *n.* [Gr. *epididymis*, the epididymis, and *-itis*.] inflammation of the epididymis.

ep·i·dī′ō·rīte, *n.* [*epi-*, and *diorite*.] a variety of diorite containing fibrous hornblende.

ep·i·dī·ọr·thō′sis, *n.* [Gr.] same as *epanorthosis*.

ep·i·dō′sīte (*or* e-pid′ō-), *n.* [Gr. *epidosis*, a giving besides, increase, and *-ite*.] a rock the chief constituent of which is epidote.

ep′i·dōte, *n.* [Fr. *épidote*, from Gr. *epididonai*, to give besides, increase.] a mineral of a green or gray color, vitreous luster, and partial transparency, crystallizing in the monoclinic system, but also occurring fibrous and granular. It is a silicate of aluminium, calcium, and iron. The epidote group includes zoisite, allanite, and piedmontite.

ep·i·dot′iç, *a.* pertaining to, resembling, or containing epidote.

ep·i·fō′çal, *a.* over the focus, or center of disturbance, of an earthquake.

Ep·i·ġae′ȧ, *n.* [Gr. *epigaios*, upon the earth; *epi*, upon, and *gaia*, poet. form of *gē*, earth.] a genus of shrubs of the heath family. *Epigæa repens*, the trailing arbutus, is also called the Mayflower.

ep·i·ġae′ăl, *a.* same as *epigeal*.

ep·i·ġae′ous, *a.* same as *epigeous*.

ep·i·ġam′iç, *a.* [Gr. *epigamos*, marriageable; *epi*, upon, for, and *gamos*, marriage.] serving to attract the other sex in the breeding season: applied to the coloration of birds and animals.

ep·i·gas′trăl, *a.* in anatomy, epigastric.

ep″i·gas·tral′ġi·ȧ, *n.* [Gr. *epigastrion*, epigastrium, and *algos*, pain.] in medicine, pain in the epigastrium.

ep·i·gas′tri·ăl, *a.* epigastric.

ep·i·gas′triç, *a.* [Gr. *epi*, upon, and *gastēr*, *gastros*, stomach, and *-ic*.] pertaining to or located within the epigastrium; as, an *epigastric* artery or vein.

ep·i·gas′tri·um, *n.* [Gr. *epigastrion*, neut. of *epigastrios*, over the stomach; *epi*, upon, and *gastēr*, *gastros*, stomach.]

1. in anatomy, the upper middle part of the abdomen, including the area over and in front of the stomach; the epigastric region.

2. in entomology, the lower side of the middle segment and of the posterior segment of the thorax in certain insects.

ep·i·ġē′ăl, *a.* 1. same as *epigeous*.

2. in entomology, living near the ground, as certain insects.

ep·i·ġē′ăn, *a.* same as *epigeal*.

ep′i·ġee, *n.* same as *perigee*.

ep′i·ġēne, *a.* [*epi-*, and Gr. *gignesthai*, to produce.]

1. in geology, formed or originating on the surface of the earth: opposed to *hypogene*; as, *epigene* rocks.

2. in crystallography, foreign; unnatural; unusual: said of forms of crystals not natural to the substances in which they are found.

ep·i·ġen′e·sis, *n.* [*epi-*, and Gr. *genesis*, birth, descent.]
1. in biology, the theory that the germ cell is structureless and that the embryo develops as a new creation through the action of the environment on the protoplasm: opposed to *preformation*.
2. in geology, metamorphism.
3. in medicine, the appearance of a secondary or auxiliary symptom; also, a secondary symptom.

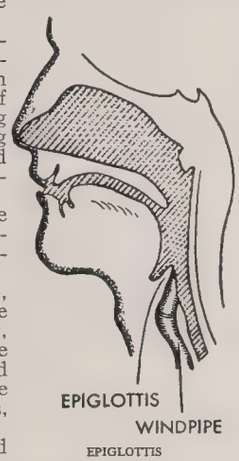
ep·i·ġen′e·sist, *n.* one who supports the theory of epigenesis.

ep″i·ġē·net′iç, *a.* of or relating to epigenesis.

ep″i·ġē·net′iç·ăl·ly, *adv.* in an epigenetic manner.

ē·pig′e·nous, *a.* [from Gr. *epi*, upon, and *gignesthai*, to beget, be born.] in botany, growing upon the surface, especially the upper surface of a part, as fungi on leaves.

ep·i·ġē′ous, *a.* [Gr. *epigaios*, on the earth; *epi*, upon, and *gaia*, poet. form of *gē*, earth.] in botany, growing on or above the ground; specifically, directed above ground after germination; as, *epigeous* plants.



ep·i·ġē′um, *n.* perigee. [Obs.]

ep·i·glot, *n.* the epiglottis. [Obs.]

ep·i·glot′iç, *a.* relating to the epiglottis.

ep″i·glot·tid′ē·ăn, *a.* epiglottic.

ep·i·glot′tis, *n.* [Gr. *epiglōttis*; *epi*, upon, and *glōtta, glōssa*, the tongue.]
1. in anatomy, a cartilaginous structure behind the tongue, which covers the opening of the windpipe during the act of swallowing and thus prevents food and drink from entering the larynx.

ep'ō·nyme, *n.* an eponym. [Obs.]

ep·ō·nym'iç, *a.* eponymous.

e·pon'y·mist, *n.* an eponymous person, as an ancestor.

e·pon'y·mous, *a.* 1. of or relating to an eponym.
Every country, every autonomous town, nay even many a hamlet, thus had its *eponymous* hero. —Cox.
2. giving one's name to a people, nation, etc.; as, an *eponymous* founder.

e·pon'y·my, *n.* [Gr. *epōnymia,* a surname.] the derivation of a name from an eponym.

ep·ō·oph'ō·ron, *n.* same as *parovarium.*

ep·ō·pee', ep·ō·poe'iȧ (-yȧ), *n.* [L. *epopœia*; Gr. *epopoiia,* epic poetry; *epos,* an epic, and *poiein,* to make.]

1. an epic poem.
2. epic poetry.
3. the history, action, or fable which makes the subject of an epic poem.

ep'opt, *n.* [L. *epopta*, Gr. *epoptēs*, one initiated in the mysteries, a spectator.] an initiate in the Eleusinian mysteries.

ep·op'tic, *a.* pertaining to an epopt.

ep'os, *n.* [L.; Gr. *epos*; see *epic.*]
1. epic poetry.
2. a primitive epic poem, handed down by word of mouth.
3. a series of epic events.

ep·ox'y (e-pok'sē), *a.* [*ep-*, and *oxygen.*] designating or of a compound in which an oxygen atom is joined to two carbon atoms in a chain to form a bridge; specifically, designating a resin, containing epoxy groups, that polymerizes spontaneously when mixed with a phenol, forming a strong, hard, resistant adhesive used in glues, enamel coatings, etc.

ep·ox'y, *n.*; *pl.* **ep·ox'ies,** an epoxy resin.

ep'si·lon, *n.* [Gr.; *e.* e, and *psilon*, plain, simple.] the fifth letter of the Greek alphabet, corresponding to English *E, e.*

ep'sŏm·īte, *n.* native Epsom salt.

Ep'sŏm salts (or **salt**), [from *Epsom*, England, famous for its mineral waters.] a white, crystalline salt, magnesium sulfate, $MgSO_4 \cdot 7H_2O$, used chiefly as a cathartic.

ep'ū·lā·ry, *a.* [L. *epularis*, from *epulum*, a feast.] pertaining to a feast or banquet.

ep·ū·lā'tion, *n.* a feasting.

e·pū'lis, *n.*; *pl.* **e·pū'li·dēs,** [L., from Gr. *epoulis*, a gumboil; *epi*, upon, and *oulon*, the gum.] a tumor of the alveolar processes of the jaws.

ep'ū·lōse, *a.* feasting to excess. [Obs.]

ep·ū·lō'sis, *n.* [L., from Gr. *epoulōsis*, a cicatrization; *epi*, upon, and *oulousthai*, to be scarred over, from *oulē*, a wound.] in medicine, the formation of a scar in the process of healing.

ep·ū·los'i·ty, *n.* a feasting to excess. [Obs.]

ep·ū·lot'iç, *a.* [Gr. *epoulōtikos*, promoting cicatrization, from *epoulousthai*, to cicatrize.] having a healing or cicatrizing power.

ep·ū·lot'iç, *n.* a medicine or application which tends to heal wounds.

ē·pū'pil·lāte, *a.* [*e-* priv., and L. *pupilla*, pupil.] having no pupil: used in entomology of a color spot without a central dot.

e·pū'răl, *a.* [*epi-*, and Gr. *oura*, tail.] borne dorsally on the tail.

e·pū'răl, *n.* a bone on the dorsal side of the tail.

ep·ū·rā'tion, *n.* [L. *e-* intens., and *puratus*, pp. of *purare*, to purify.] the act of purifying. [Rare.]

ē·pūre', *n.* [Fr., a draft, working drawing, from *épurer*, to purify, clarify; L. *e-*, out, from, and *purare*, to purify.] in architecture, the plan of a building, or part of a building, traced on a wall or floor, on the same scale as that of the work to be constructed.

Ep'wŏrth Lēague, an American organization of young people of the Methodist Episcopal Church, founded in 1889, to promote personal evangelism and intelligent Bible study.

ē·py·or'nis, *n.* see *Aepyornis.*

eq·uă·bil'i·ty (ek-wȧ- *or* ē-kwȧ-), *n.* [L. *æquabilitas*, from *æquabilis*, equable.] the condition or quality of being equable.

eq'uă·ble (ek'wȧ- *or* ē'kwȧ-), *a.* [L. *æquabilis*, from *æquare*, to make equal, from *æquus*, equal.]
1. characterized by uniformity, invariableness, or evenness; equal and uniform at all times; steady; as, an *equable* temperature.
2. even; tranquil; serene; as, an *equable* temperament.

Syn.—uniform, regular, proportionate, even.

eq'uă·ble·ness, *n.* same as *equability.*

eq'uă·bly, *adv.* in an equable manner.

ē'quăl (-kwăl), *a.* [ME. *equal*; OFr. *equal*; L. *æqualis*, equal, from *æquus*, plain, even, flat.]
1. of the same quantity, size, number, value, degree, intensity, etc.
2. having the same rights, privileges, ability, rank, etc. (with *to* or *with*); as, I am *equal with* him in skill.
3. evenly proportioned; balanced or uniform in effect or operation.
4. level; smooth and flat. [Archaic.]
5. equable. [Obs.]
6. impartial; fair; just. [Archaic.]
Equal and unconcerned, I look on all.
—Dryden.
7. of the same interest or concern; of like importance, rank, or dignity. [Now Rare.]
They who are not disposed to receive them may let them alone or reject them; it is *equal* to me. —Cheyne.
equal to; having the necessary ability, strength, power, capacity, or courage for.

Syn.—even, equable, uniform, unvarying, adequate, proportionate, commensurate, fair, just, equitable.—*Equal* is said of degree, quantity, number, and dimensions, as *equal* in years; *even* is said of the surface and position of bodies; a board is made *even* with another board. *Even* and *equable* are applied to the same object in regard to itself; *like* or *alike* is applied to two or more objects in regard to each other; *uniform* is said either of one object in regard to itself or of many objects in regard to one another.

ē'quăl, *n.* 1. a person, thing, or quantity not inferior or superior to another; specifically, one having the same or a similar age, rank, status, quality, value, etc.
Those who were once his *equals*, envy and defame him. —Addison.
2. the state of being equal; equality. [Obs.]

ē'quăl, *v.t.*; equaled *or* equalled, *pt., pp.*; equaling *or* equalling, *ppr.* 1. to make equal; to make of the same quantity, dimensions, or quality; to equalize. [Archaic.]
2. to be equal to; to be adequate to; to be commensurate with.
On me, whose all not *equals* Edward's moiety. —Shak.
3. to rise to the same state, rank, estimation, or excellence with; to become equal to; as, few commanders *equal* Washington in fame.
What delights can *equal* those
That stir the spirit's inner deeps?
—Tennyson.
4. to make equivalent to; to recompense fully; to answer in full proportion.
Who answer'd all her cares, and *equall'd* all her love. —Dryden.

ē"quăl·i·tā'ri·ăn, *a.* of, or holding, the belief that all men should have equal political and social rights.

ē"quăl·i·tā'ri·ăn, *n.* a person who holds the belief that all men should have equal political and social rights.

ē·quăl'i·ty, *n.*; *pl.* **ē·quăl'i·ties,** [ME. *egalite*; OFr. *egalite, équalité*; L. *æqualitas*, equality, from *æqualis*, equal.]
1. the state of being equal; likeness in magnitude or dimensions, value, qualities, degree, and the like; the state of being neither superior nor inferior; as, the *equality* of men; an *equality* of rights.
2. evenness; uniformity; sameness in state or continued course; as, an *equality* of temper.
3. evenness; plainness; uniformity; as, an *equality* of surface. [Now Rare.]
4. in mathematics, a comparison of two quantities which are in effect equal, though differently expressed or represented, usually denoted by two parallel lines, =.

ē"quăl·i·zā'tion, *n.* the act of equalizing or state of being equalized.

ē'quăl·īze, *v.t.*; equalized, *pt., pp.*; equalizing, *ppr.* 1. to make equal; to cause to be equal in amount or degree; as, to *equalize* accounts.
2. to make uniform.
3. to be equal to; to equal. [Obs.]

Syn.—adjust, arrange, balance, neutralize.

ē'quăl·ī·zĕr, *n.* 1. a person who equalizes.
2. a thing that equalizes; especially, an electrical conductor of low resistance, used to equalize voltages.

ē'quăl·ī·zing bär, in mechanics, any lever-like bar used to equalize strain, as a device to distribute weight equally in a passenger coach or engine.

ē'quăl·ly, *adv.* in an equal manner; in or to an equal extent or degree; uniformly; impartially.

ē'quăl mark (or **sīgn**), the arithmetical sign (=), indicating that the terms on either side of the sign are equal; as, 2 + 2 = 4.

ē'quăl·ness, *n.* equality; evenness.

ē·quăn'gū·lăr, *a.* equiangular. [Rare.]

ē·quă·nim'i·ty (*or* ek'wȧ-), *n.* [L. *æquanimitas*, evenness of mind; *æquus*, even, equal, and *animus*, mind.] evenness of mind; calm temper or firmness of mind; composure.

ē·quan'i·mous, *a.* possessing equanimity.

ē'quănt, *n.* [L. *æquans* (*-antis*), ppr. of *æquare*, to make equal.] in ancient astronomy, an imaginary circle used for determining the motions of the planets.

ē·quāte', *v.t.*; equated, *pt., pp.*; equating, *ppr.* [L. *æquatus*, ppr. of *æquare*, to make equal.]
1. in mathematics, to state or express the equality of; put in the form of an equation.
2. to make equal or equivalent; treat, regard, or express as equal or equivalent.

ē·quā'tion (-zhun *or* -shun), *n.* [ME. *equacion*; L. *æquatio* (*-onis*), an equalizing, from *æquare*, to make equal.]
1. an equating or being equated.
2. (a) variation in computation due to personal errors in observation, judgment, etc., or the correction to compensate for this: in full, *personal equation*; (b) the amount of such error or correction, as in astronomical computations.
3. in chemistry, an expression in which symbols and formulas are used to represent a chemical reaction; as, $H_2SO_4 + 2NaCl = 2HCl + Na_2SO_4$.
4. in mathematics, a proposition asserting the equality of two quantities and expressed by the sign = between them; an expression of the same quantity in two dissimilar but equal terms; as, $a + b = c$.
5. in astronomy, the correction or quantity to be added to or subtracted from the mean position of a heavenly body to obtain the true position; more generally, the correction arising from any erroneous supposition whatever.
absolute equation; see under *absolute.*
equation clock or *watch*; a clock (or watch) showing the difference between mean solar and apparent solar time.
equation of a curve; in mathematics, an equation giving an expression of the relation of the co-ordinates of every point in the curve.
equation of equinoxes; in astronomy, the difference between the mean and apparent places of the equinox.
equation of the center; in astronomy, the difference between the true and the mean anomaly of a planet.
equation of time; in astronomy, the difference between mean and apparent time, or the reduction of apparent unequal time or motion of the sun or a planet to equable and mean time or motion.

ē·quā'tion·ăl, *a.* denoting an equation or the use of equations.

ē·quā'tŏr, *n.* [ME. *equator*; LL. *æquator*, the equator, from L. *æquare*, to make equal.]
1. an imaginary circle around the earth equally distant at all points from both the North Pole and the South Pole: it divides the earth's surface into the Northern Hemisphere and the Southern Hemisphere.
2. any circle that divides a sphere or other body into two equal and symmetrical parts.
3. in astronomy, the imaginary circle formed by the intersection of the plane of the earth's equator with the observed celestial sphere: in full, *celestial equator.*
magnetic equator; a line on which a dipping needle carried along it remains horizontal: also called the *aclinic line.*

ē·quă·tō'ri·ăl (*or* ek-wȧ-), *a.* 1. of or near the earth's equator.
2. of an equator.
3. like or characteristic of conditions near the earth's equator; as, *equatorial* heat.

ē·quă·tō'ri·ăl, *n.* a telescope mounted in such a way as to have two axes of motion, one (called *polar axis*) parallel to the earth's axis, the other (called *declination axis*) perpendicular to it: by rotation on the polar axis it can follow the apparent motion of a heavenly body.

ē·quă·tō'ri·ăl·ly, *adv.* so as to have the motion of an equatorial; in a line with the equator.

eq'uĕr·ry (ek'wĕr-), *n.*; *pl.* **eq'uĕr·ries,** [Fr. *ecurie*; OFr. *escuyrie*; LL. *scuria*, a stable, from O.H.G. *sciura*, a shed.]
1. formerly, an officer in charge of the horses of a royal or noble household.
2. a personal attendant on some member of the king's family, as in England.

eq'ue·ry, *n.* same as *equerry.*

ē·ques'tri·ăn, *a.* [L. *equester* (*-tris*), pertaining to a horse or horseman, equestrian, from *eques*, a horseman, from *equus*, a horse.]
1. pertaining to horses, horsemen, horseback riding, or horsemanship; performed with horses; as, *equestrian* feats.
2. representing a person on horseback; as, an *equestrian* statue.
3. of or pertaining to the Roman equites, or knights; as, the *equestrian* order.

ē·ques'tri·ăn, *n.* a rider or circus performer on horseback.

ē·ques'tri·ăn·işm, *n.* the performance of an equestrian; horsemanship.

ē·ques·tri·enne', *n.* [from *equestrian*, and Fr. f. suffix *-enne.*] a girl or woman who rides or performs on horseback.

e·qui-, [from Latin *æquus*, equal.] a combining form meaning *equal, equally*, as in *equi*valent, *equi*distant.

ē·qui·an′gū·lăr, *a.* [*equi-*, and L. *angulus*, an angle.] having all angles equal.

ē·qui·bal′ănce, *n.* [*equi-*, and *balance*.] equal weight; equilibrium.

ē·qui·bal′ănce, *v.t.* to have equal weight with (something); to counterbalance. [Rare.]

ē·qui·crū′răl, *a.* [*equi-*, and L. *crus* (*cruris*), leg.] having legs of equal length; isosceles; as, an *equicrural* triangle.

ē′qui·çrûre, *a.* equicrural. [Obs.]

Eq′ui·dae (ek′wi-dē), *n.pl.* a family of mammals, the horse family, consisting of a single extant genus, *Equus*.

ē·qui·dif′fēr·ent, *a.* [*equi-*, and L. *differens* (*-entis*), ppr. of *differre*, to carry different ways, to be different.] having equal differences.

ē·qui·dis′tănce, *n.* equal distance.

ē·qui·dis′tănt, *a.* [*equi-*, and L. *distans* (*-antis*), ppr. of *distare*, to stand apart, to be distant.] being at an equal distance from some point or thing.

ē·qui·dis′tănt·ly, *adv.* at an equal distance.

e″qui·dī·ūr′năl, *a.* [*equi-*, and L. *diurnus*, daily.] at the time when day and night are equal.

ē′qui·form, *a.* [L. *æquiformis*, uniform; *æquus*, equal, and *forma*, shape.] having the same form; uniform. [Rare.]

ē·qui·for′mi·ty, *n.* uniform equality. [Rare.]

ē·qui·lăt′ēr·ăl, *a.* [LL. *æquilateralis*; L. *æquus*, equal, and *latus*, side.] having all the sides equal; as, an *equilateral* triangle.

EQUILATERAL TRIANGLE

equilateral hyperbola; a hyperbola which has the two axes equal to one another, the asymptotes forming a right angle.

equilateral shell; a shell in which a transverse line, drawn through the apex of the umbo, divides the valve equally and symmetrically.

ē·qui·lat′ēr·ăl, *n.* 1. a side exactly corresponding to another or others in length.

2. a figure of equal sides.

ē·qui·lī′brănt (*or* ē-quil′i-brănt), *n.* [*equi-*, and L. *librans* (*-antis*), ppr. of *librare*, to poise.] in physics, a force (or forces) keeping or tending to keep another force (or forces) in equilibrium.

ē·qui·lī′brāte (*or* ē-quil′i-), *v.t.* and *v.i.*; equilibrated, *pt., pp.*; equilibrating, *ppr.* [*equi-*, and L. *libratus*, ppr. of *librare*, to poise, weigh out.] to balance or counterbalance; to bring into or be in equilibrium.

ē·qui·lī·brā′tion (*or* ē-quil′i-), *n.* an equilibrating or being equilibrated.

ē·qui·lī′brā·tŏr (*or* ē-quil′i-), *n.* any of many devices used to maintain or restore equilibrium.

ē·qui·lib′ri·ous, *a.* equally poised.

ē·qui·lib′ri·ous·ly, *adv.* in equal poise.

ē·qui·lī′brist (*or* ē-quil′i-brist), *n.* one who keeps his balance in unnatural positions and hazardous movements, as a tightrope walker.

ē·qui·lib′ri·ty, *n.* [L. *æquilibritas* (*-tatis*), from *æquilibris*, evenly balanced; *æquus*, equal, and *libra*, a balance.] equilibrium. [Rare.]

ē·qui·lib′ri·um, *n.* [L. *æquilibrium*, an even balance, a level, from *æquilibris*, evenly balanced; *æquus*, even, equal, and *libra*, a balance.]

1. a state of balance or equality between opposing forces.

2. a state of balance or adjustment of conflicting desires, interests, etc.

3. equal balancing of the mind between motives or reasons; a state of indifference or of doubt, when the mind is suspended in indecision between different motives or the different forces of evidence.

4. in chemistry, the stage in a reversible chemical change at which the products of the forward or direct reaction are consumed by the reverse reaction at the same rate as they are formed.

5. in radioactivity, the stage of a radioactive material at which the rate of disintegration and the rate of formation are equal.

ē′qui·lōbed, *a.* [*equi-*, and L. *lobus*, lobe.] in botany, having equal lobes or divisions, as a leaf.

ē″qui·mō·leç′ū·lăr, *a.* having an equal number of molecules.

ē″qui·mō·men′tăl, *a.* [*equi-*, and L. *momentum*, moment.] in physics, having the moments of inertia equal.

ē·qui·mul′ti·ple (-pl), *a.* [*equi-*, and L. *multiplex* (*-plicis*), manifold.] multiplied by the same number or quantity.

ē·qui·mul′ti·ple, *n.* in mathematics, a product arising from the multiplication of two or more quantities by the same number or quantity. Hence, *equimultiples* of any numbers or quantities are always in the same ratio to each other as the simple numbers or quantities before multiplication. If 6 and 9 are multiplied by 4, the *equimultiples*, 24 and 36, will be to each other as 6 to 9.

ē·quī′năl, *a.* equine. [Obs.]

ē′quīne, *a.* [L. *equinus*, from *equus*, a horse.] of, pertaining to, or resembling a horse.

ē·qui·nec′es·sā·ry, *a.* [*equi-*, and L. *necessarius*, necessary.] necessary or needful in the same degree. [Rare.]

ē·quin′i·à, *n.* [L., from *equinus*, pertaining to a horse, from *equus*, a horse.] same as *glanders*.

ē·qui·noç′tiăl (-shăl), *a.* [ME. *equinoctial*; L. *æquinoctialis*, from *æquinoctium*, the equinox; *æquus*, equal, and *nox*, night.]

1. pertaining to the equinoxes or to either of the equinoxes.

2. pertaining to the regions or climate of the equinoctial circle or equator; equatorial; as, *equinoctial* heat; an *equinoctial* sun.

3. occurring at or about the time of the equinox, when day and night are equal in length.

equinoctial circle (or *line*); the celestial equator: when the sun crosses it, the days and nights are equally long in all parts of the earth.

equinoctial colure; the meridian which passes through the equinoctial points.

equinoctial point; either of the equinoxes (sense 2).

equinoctial time; time reckoned from a fixed instant common to all the world, that is, the instant when the sun passes the mean vernal equinoctial point.

ē·qui·noç′tiăl, *n.* 1. the equinoctial line.

2. a severe storm or gale which usually occurs at or near the equinox, erroneously supposed to be the result of the sun's crossing the equator.

ē·qui·noç′tiăl·ly, *adv.* in the direction of the equinoctial.

ē′qui·nox, *n.* [Fr. *équinoxe*; L. *æquinoctium*, the equinox; *æquus*, equal, and *nox*, night.]

1. the precise time when the sun crosses the equator, making the day and night everywhere of equal length. The vernal equinox occurs about the 21st of March, and the autumnal equinox about the 22d of September.

2. either of the two points on the celestial equator where the sun crosses it on these dates: also called *equinoctial point*.

3. an equinoctial gale or storm. [Obs.]

ē·quip′, *v.t.*; equipped (-kwipt′), *pt., pp.*; equipping, *ppr.* [OFr. *equiper*, *esquiper*, to put in order, equip; Ice. *skipa*, to place in order, to arrange.]

1. to dress (oneself) for a certain purpose; to array; to accouter; as, to *equip* a person with a suit of clothes.

2. to furnish with the necessities for an undertaking; to fit out; as, the soldiers were *equipped* for battle.

3. to prepare for some particular duty or service, whether physically or mentally; to furnish with qualifications; to train; as, a man well *equipped* for the ministry.

Syn.—accouter, fit out, dress, furnish, adorn.

eq′ui·păġe, *n.* [OFr. *equipage*, from *equiper*, to equip.]

1. the furnishings, accessories, or outfit of a ship, army, expedition, etc.; equipment.

2. a carriage, especially one with horses and liveried servants.

3. (a) toilet articles; (b) a case for these. [Archaic.]

4. retinue; train; following, as of a person of rank. [Archaic.]

ē·quip′à·bà·ble, *a.* comparable. [Obs.]

ē·quip′à·răn·ce, ē·quip′à·răn·cy, *n.* in logic, a state of equality; equivalence. [Rare.]

ē·quip′à·rāte, *v.t.* [L. *æquiparatus*, pp. of *æquiparare*, to put on a level, compare; *æquus*, equal, and *parare*, to make ready.]

1. to compare. [Obs.]

2. to reduce to a level; to make or regard as equal. [Obs.]

ē·quip′e·dăl, *a.* [LL. *æquipedus*, equal-footed; L. *æquus*, equal, and *pes*, *pedis*, foot.] in zoology, equal-footed; having the pairs of feet equal.

ē·qui·pend′en·cy, *n.* [*equi-*, and L. *pendere*, to hang.] the act or state of hanging in equipoise or of not being inclined or determined either way; an unbiased condition. [Obs.]

ē·quip′ment, *n.* 1. an equipping or being equipped.

2. whatever a person, group, or thing is equipped with; furnishings; outfit.

3. in transportation, cars, trucks, etc.; rolling stock, as distinguished from stationary property.

ē′qui·poiṣe (*or* ek′wi-), *n.* [*equi-*, and *poise*.]

1. equal distribution of weight; hence, equilibrium; a state in which the two ends or sides of a thing are balanced: figuratively applied to moral, social, or political interests or forces.

Our little lives are kept in *equipoise*
By opposite attractions and desires.
—Longfellow.

2. counterpoise; counterbalance.

ē·qui·pol′lence, ē·qui·pol′len·cy, *n.* [ME. *equipolence*; LL. *æquipollens* (*-entis*), having equal power; L. *æquus*, equal, and *pollens*, ppr. of *pollere*, to be strong.]

1. equality of force, value, meaning, etc.

2. in logic, an equivalence between two or more propositions, as when two propositions signify the same thing, though differently expressed.

ē·qui·pol′lent, *a.* [ME. *equipolent*; OFr. *equipolent*; LL. *æquipollens*, having equal power; *æquus*, equal, and *pollens*, ppr. of *pollere*, to be strong.]

1. equal in force, weight, validity, etc.

2. equivalent in meaning or result.

ē·qui·pol′lent·ly, *adv.* in an equipollent manner.

ē·qui·pon′dĕr·ănce, ē·qui·pon′dĕr·ăn·cy, *n.* equality of weight; equilibrium; balance.

ē·qui·pon′dĕr·ănt, *a.* [ML. *æquiponderans*, ppr. of *æquiponderare*, from L. *æquus*, equal, and *ponderare*, to weigh.] of the same weight; evenly balanced (often with *to* or *with*).

ē·qui·pon′dĕr·āte, *v.i.*; equiponderated, *pt., pp.*; equiponderating, *ppr.* [*equi-*, and L. *ponderatus*, pp. of *ponderare*, to weigh.] to be equal in weight; to weigh as much as another thing.

ē·qui·pon′dĕr·āte, *v.i.* 1. to make evenly balanced.

2. to counterbalance.

ē·qui·pon′dĕr·ous, *a.* having the same or equal weight. [Obs.]

ē·qui·pon′di·ous, *a.* having equal weight on both sides. [Obs.]

ē″qui·pō·ten′tiăl (-shăl), *a.* [*equi-*, and L. *potentia*, power.]

1. having equal potentiality or power.

2. in physics, of the same potential.

equipotential surface; a surface having equal potential at all points.

ē·qui·rō′tăl, *a.* [*equi-*, and L. *rota*, a wheel.] having wheels of the same size or diameter, as a machine. [Rare.]

Ē″qui·sē·tā′cē·ae, *n.pl.* [L., from *equus*, horse, and *sæta*, a bristle.] a family of vascular, cryptogamous plants, with jointed hollow stems; the horsetail family.

ē″qui·sē·tā′ceous, *a.* in botany, pertaining to the family *Equisetaceæ*.

Eq·ui·sē′tum (ek-wi-), *n.* [L., from *equus*, a horse, and *seta*, *sæta*, a bristle.]

1. a genus of flowerless plants with hard, jointed stems, the horsetails, being the sole genus of the family *Equisetaceæ*. The cuticle abounds in siliceous cells, on which account the stems of some species are used for polishing wood: called also *Dutch rush* and *scouring rush*.

EQUISETUM

eye (ī), *n.* [ME. *eye, eghe* (pl. *eyen, eghen*); AS. *eage* (pl. *eagan*), eye.]
1. the organ of sight or vision; properly, in vertebrates, the globe or ball movable in the orbit. In all vertebrates, the eye closely resembles that of man, being formed by the combination of two segments from a larger and a smaller sphere. The segment of the lesser sphere forms the anterior part of the eye, and is composed externally of a strong hornlike membrane, the cornea, within which are the aqueous humor and the iris. The iris is a colored muscular membrane, capable of contraction and dilatation, suspended in the aqueous humor, with an opening (the pupil) in the center for the transmission of light. The larger sphere presents three coats, the outermost being the sclerotic, within which is the choroid, and lastly the retina. The last is the sentient coat, and consists of a cuplike expansion of the optic nerve, spread on the black coat, or *pigmentum nigrum*, covering the inner surface of the choroid, The anterior orifice of the choroid is firmly connected to a thick ring of grayish pulpy substance, forming the point at which the sclerotic and cornea without, and the iris within, are united. The

HUMAN EYE

interior sphere is filled with a jellylike, transparent mass, the vitreous humor, immediately in front of which, and just behind the pupil, is the crystalline lens, bearing the same relation to the retina that the lens of a camera does to the sensitive plate.

fēr′mil·let, *n.* [OFr.] a buckle or clasp. [Obs.]

fēr′mi·on, *n.* [after E. *Fermi* (see next entry), and *-on*.] a subatomic particle, as an electron, proton, or neutron, that occurs alone at any one time at a particular energy level.

fēr′mi·um, *n.* [named after E. *Fermi* (1901–54), American physicist.] a radioactive chemical element produced by intense neutron irradiation of plutonium: symbol, Fm; atomic weight, 257(?); atomic number, 100.

fērn, *n.* [ME. *ferne*; AS. *fearn*; G. *farn*, a fern.] any of a large class of shrubby plants called *Filicineae*, having their asexual reproductive cells on the back of the fronds, or leaves, in one-celled spore cases, or sporangia, variously grouped in dots, lines, or masses, and containing but one kind of minute, one-celled, powdery spore. Ferns are cryptogamous plants and abound in humid temperate and tropical regions. In size, they vary from the minute species growing on tree trunks to the giant tree fern of the tropics. They are very abundant as fossil plants. The earliest known forms occur in Devonian rocks, and their remains contribute largely to the formation of the beds of coal.

LADY FERN
(*Athyrium filix-femina*)

Christmas fern; an evergreen fern of North America, *Polystichum acrostichoides*.

climbing fern; a fern, *Lygodium palmatum*, having climbing fronds rising from slender, creeping rootstocks. It overruns low shrubs, the fronds sometimes attaining a length of three feet.

flowering fern; a species, *Osmunda regalis*, common in swamps and wet woods.

scented fern; a species, *Dennstedtia punctilobula*, whose fronds yield an aromatic odor when crushed.

sensitive fern; a fern, *Onoclea sensibilis*, growing in wet places, whose fronds exhibit a tendency to roll up when touched.

fērn′ēr·y, *n.*; *pl.* **fērn′ēr·ies,** a place for cultivating ferns.

fērn′gāle, *n.* sweet fern.

fērn owl, 1. the goatsucker.
2. the short-eared owl, *Asio flammeus*.

fērn seed, the seed, or spores, of fern: formerly supposed to make the person who carried them invisible.

fērn′shaw, *n.* a thicket of ferns.

fērn′tĭ·cle, *n.* a freckle. [Brit. Dial.]

fērn′y, *a.* abounding in or like ferns.

fē·rō′cious, *a.* [L. *ferox* (*-ocis*), from *ferus*, wild, fierce.]
1. having or exhibiting ferocity, cruelty, savagery, etc.; violently cruel; as, *ferocious* actions or looks.
2. very great; as, a *ferocious* appetite. [Colloq.]

Syn.—fierce, savage, barbarous, untamed, fell, brutal, cruel, sanguinary, bloody.

fē·rō′cious·ly, *adv.* in a ferocious manner.

fē·rō′cious·ness, *n.* same as *ferocity*.

fer′ret·ēr, *n.* one who hunts with a ferret; also, one who ferrets out secrets.

fer·ret′tō, *n.* [It. *ferretto*, dim. of *ferro*, from L. *ferrum*, iron.] copper calcined with sulfur, used to color glass.

fer′ri-, [from L. *ferrum*, iron.] a combining form meaning *containing ferric iron*.

fer′ri·āge, *n.* the price or fare to be paid at a ferry; also, conveyance over a river or lake in a ferry.

fer′riç, *a.* [from L. *ferrum*, iron.]
1. of, containing, or derived from iron.
2. in chemistry, designating or of iron with a valence higher than two, or compounds containing such iron: distinguished from *ferrous*.

ferric acid; an acid of iron, H_3FeO_4, never obtained in the free state and known only in the form of its salts, the ferrates.

ferric oxide; an oxide of iron, Fe_2O_3, occurring in nature as hematite.

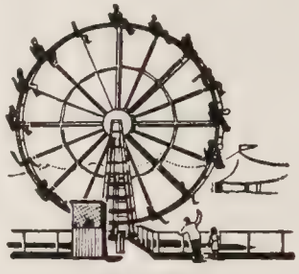
fer·ri·cȳ′à·nāte, *n.* same as *ferricyanide*.

fer″ri·cȳ·an′ĭç ac′id, an acid, $H_3Fe(CN)_6$, obtained by decomposing ferricyanide of lead with sulfuric acid.

fer·ri·cȳ′à·nide, *n.* any salt of ferricyanic acid.

potassium ferricyanide; red prussiate of potash, $K_3Fe(CN)_6$, obtained by oxidizing $K_4Fe(CN)_6$ by the action of chlorine.

fer″ri·cȳ·an′ō·gen, *n.* [*ferri-*, and Gr. *kyanos*, a dark blue substance.] a sexivalent radical $(Fe(CN)_6)_2$.



fer′rī·ēr, *n.* a ferryman; a boatman. [Obs.]

fer·rif′ēr·ous, *a.* [*ferri-*, and L. *ferre*, to bear.] bearing or containing iron.

fer·ri·prus′si·āte, *n.* same as *ferricyanide*.

fer·ri·prus′siç, *a.* same as *ferricyanic*.

Fer′ris wheel (hwēl), [after George W. G. *Ferris* (1859–1896), Am. engineer who constructed the first one for the World's Fair in Chicago in 1893.] a large upright wheel revolving on a fixed axle and having seats hanging from the frame: used in amusement parks, etc.

FERRIS WHEEL

fer′rīte, *n.* [from L. *ferrum*, iron; and *-ite*.]
1. any yellowish or reddish-brown substance occurring in rocks and containing iron compounds.
2. one of the forms of pure metallic iron, having high magnetic permeability and occurring as a constituent of ordinary iron and steel.
3. any of various compounds in which ferric oxide may be regarded as combined with a more basic metallic oxide, as calcium ferrite, $Ca(FeO_2)_2$.

fer′rō-, [from L. *ferrum*, iron.] a combining form meaning: (a) *iron, connection with iron*, as in *ferro*magnetic; (b) *iron and*, as in *ferro*manganese; (c) in chemistry, *containing ferrous iron*, as in *ferro*cyanide.

fer″rō·al·loy′, *n.* any of various alloys of iron used in the manufacture of steel: they are named from the added metal, as ferrochromium, ferromanganese, etc.

fer·rō·çal′cīte, *n.* [*ferro-*, and L. *calx*, *calcis*, lime, and *-ite*.] a kind of calcite which takes on a brown color after exposure, due to the iron contained in it.

fer″ro·chrō′mi·um, *n.* [*ferro-*, and *chrome*.] an alloy of iron and chromium used in making steel.

fer·rō·con′crēte, *n.* concrete having an iron or steel framework embedded in it: also called *reinforced concrete, armored concrete.*

fer·rō·cy′a·nāte, *n.* a compound of ferrocyanic acid with a base.

fer″rō·cy·an′ic, *a.* designating or of an acid, $H_4Fe(CN)_6$, obtained by decomposing a ferrocyanide with sulfuric acid.

fer·rō·cy′a·nide, *n.* a salt formed by the union of ferrocyanic acid with a base.
potassium ferrocyanide; yellow prussiate of potash, $K_4Fe(CN)_6$.

fer″rō·mag·nē′siăn, *a.* in mineralogy, having iron and magnesium as constituents.

fer″rō·mag·net′ic, *a.* [*ferro-*, and L. *magneticus*, from *magnes* (*-etis*), a magnet.]
1. formerly, paramagnetic: opposite of *diamagnetic.*
2. highly magnetic, as iron, nickel, etc.: distinguished from *paramagnetic.*

fer·rō·mag′net·ism, *n.* the quality of being ferromagnetic.

fer·rō·mañ′gȧ·nēse, *n.* [*ferro-*, and Fr. *manganese*, manganese.] an alloy of iron and manganese, used for making hard steel.

fer·rō·prus′si·āte, *n.* same as *ferrocyanide.*

fer·rō·prus′sic, *a.* same as *ferrocyanic.*

fer·rō·sil′i·cŏn, *n.* a compound of iron and silicon, used in making steel.

fer″rō·sō·fer′ric, *a.* [*ferro-*, and L. *ferrum*, iron.] designating or of the black or magnetic oxide of iron, Fe_3O_4: also known as *magnetite* and *lodestone.*

fer′rō·tȳpe, *n.* [*ferro-*, and Gr. *typos*, impression, image.]
1. a positive photograph taken directly on a thin plate of iron coated with a sensitized film: also called *tintype.*
2. the process of making such photographs.

fer′rous, *a.* [from L. *ferrum*, iron.]
1. of, containing, or derived from iron.
2. in chemistry, designating or of bivalent iron or compounds containing it: distinguished from *ferric.*

fer·rū′gi·nā·ted, *a.* [from L. *ferruginus*, of the color of iron rust, from *ferrugo* (*-inis*), iron rust, the color of iron rust.] having the color or properties of the rust of iron.

fer·rū·gi·nā′tion, *n.* the act or process of permeating or coloring with iron ore or iron rust: said of the discoloring of rocks.

fer·rū·ġin′ē·ous, *a.* same as *ferruginous.*

fer·rū′gi·nous, *a.* [L. *ferruginus*, of the color of iron rust, dusky, from *ferrugo* (*-inis*), iron rust, the color of iron rust, from *ferrum*, iron.]
1. of iron; containing iron; having the nature of iron.
2. having the color of iron rust; reddish-brown.

fer·rū′gō, *n.* [L. *ferrugo*, iron rust, the color of iron rust.] in botany, disease rust. [Obs.]

fer′rule (fer′ụl *or* -ůl), *n.* [formerly *verrel*; OFr. *virole*, an iron ring to put around the end of a staff, from LL. *virola*, a ring, bracelet; L. *viriola*, dim. of *viria*, a bracelet, armlet, from *viere*, to twist, bind around. The spelling of the word was corrupted in imitation of L. *ferrum*, iron.]
1. a metal ring or cap put around the end of a stick, tool, cane, etc. to prevent splitting or to give added strength.
2. in mechanics, a short tube or bushing for tightening a joint.
3. a bushing placed in the end of a flue to expand it.
4. the wooden frame fitted about a slate.

fer′rule, *v.t.*; ferruled, *pt., pp.*; ferruling, *ppr.* to furnish with a ferrule.

fer′ruled, *a.* having a ferrule.

fer·rū′mi·nāte, *v.t.* [L. *ferruminatus*, pp. of *ferruminare*, to cement, solder, from *ferrumen*, cement, solder, from *ferrum*, iron.] to unite by solder; to join together: used of metals. [Rare.]

fer·rū·mi·nā′tion, *n.* the soldering or uniting of metals. [Rare.]

fer′ry, *v.t.*; ferried, *pt., pp.*; ferrying, *ppr.* [ME. *ferien*; AS. *ferian*, to carry, convey, especially in a boat, from *faran*, to go.]
1. to carry or transport across a river or narrow body of water in a boat.
