sāfe′ty valve, 1. an automatic valve for a steam boiler, etc., which opens and releases steam if the pressure becomes excessive. The form and construction of safety valves are

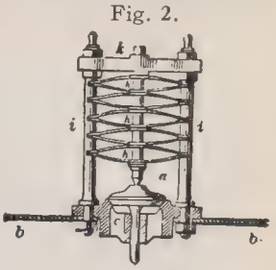

Fig. 1.

LEVER SAFETY VALVE

various, but their principle is the same: that of opposing the pressure within the boiler by such a force as will yield before it reaches the point of danger, and permit the steam to escape. The most simple kind of safety valve is that in which a weight is placed directly over a steam-tight plate, fitted to an aperture in the boiler. When, however, the pressure is high this form becomes inconvenient, and the lever safety valve is adopted. This form is represented in fig. 1, where *a* is the valve, fitted to move vertically, and guided by a stem passing through the seat; *b*, the boiler; *c*, the valve seat (the same letters indicate the corresponding parts in fig. 2); *d*, the lever, working upon a fixed center at *e*, and pressing upon the valve by a steel point; *f* is a guide for the lever, and *g* a weight which may be adjusted to any distance from the center, according to the pressure required. In locomotive engines, where the lever and weight would occupy too much space, it is usual to adopt the spring safety valve, one form of which is shown in fig. 2. A series of bent springs, *h h h*, are placed alternately in opposite directions, their extremities sliding upon the rods *i i*, and are forced down upon the valve *a* by means of a crossbar *k*, which may be adjusted by means of the nut so as to give the right pressure upon the valve.

sēa'sŏn, *n.* [ME. *seson*; OFr. *seson, seison, saison*; Fr. *saison*, season, due time, from L. *sationem*, acc. of *satio*, a season, time of the year.]
1. a fit or suitable time; the convenient time; the usual or appointed time; as this is the topcoat *season*.
2. any one of the four arbitrary periods into which the year is divided, as marked by its characteristics of temperature, moisture, conditions of nature, and the like. In the temperate regions of the earth there are four distinct divisions or seasons—spring, summer, autumn, and winter. Spring lasts from March 21 to June 21, or 92 days; summer from June 21 to September 21, or 92 days; autumn from September 21 to December 21, or 91 days, and winter from December 21 to March 21, or 90 days, or 91 days in the case of leap year; that is, the interval from the autumnal to the vernal equinox is about three days shorter than the interval from the vernal to the autumnal equinox. This discrepancy is due to the form of the earth's orbit, the earth describing during the autumn and winter months that portion of its orbit nearest the sun, and therefore with the greatest velocity. Within the tropics the seasons are not greatly marked by the rise or fall of temperature, so much as by dryness and wetness, and they are usually distinguished as the *wet* and the *dry seasons*.

sī′phŏn, sȳ′phon, *n.* [Fr.; L. *sipho, siphonis*; Gr. *siphōn*, a hollow tube, a reed.]
1. a bent pipe or tube whose legs are of unequal length, used for drawing liquid out of a vessel by causing it to rise in the tube over the rim or top through the force of atmospheric pressure upon the surface of the liquid. For this purpose the shorter leg is inserted in the liquid, and the air is exhausted by being drawn through the longer leg. The liquid then rises by the weight of the atmosphere till it reaches the top of the tube, and then descends in the lower leg of the siphon, and continues to flow till the liquid in the vessel reaches the level of the end of the shorter leg. Sometimes an exhausting tube is placed on the longer leg for exhausting the air by suction and causing the flow to begin.

SIPHONS

speç'tā·tŏr (*or* spek-tā'), *n.* [L., from *spectare*, to behold.] one who looks on; one who sees or beholds a given thing or event without taking an active part; as, the *spectators* were numerous; the *spectators* of a show.

the Spectator; an English periodical (1711–1712; 1714), successor to the *Tatler*, published and written by Joseph Addison and Richard Steele: it was composed chiefly of short essays professedly edited by the members of the imaginary Spectator Club, representative types in the social life of the times.

Syn.—looker-on, observer, witness.

speç·tà·tō'ri·ăl, *a.* of or relating to a spectator.

speç·tā'tŏr·ship, *n.* the state or condition of being a spectator.

speç·tā'tress, speç·tā'trix, *n.* a woman spectator.

speç'tēr, *n.* [Fr. *spectre*, from L. *spectrum*, an appearance, an apparition, from *spectare*, to behold.]
1. an apparition; the appearance of a person who is dead; a ghost.
2. any object of fear or dread.
3. in zoology, any of various animals, as the specter bat, specter insect, etc.

specter of the Brocken; an optical phenomenon peculiar to high mountains or aircraft in which a greatly magnified image of the spectator appears upon a background of clouds: named from a mountain of the Harz range.

speç'tēr bat, a bat, *Phyllostoma spectrum*, native to South America.

speç'tēr çan'dle, a belemnite.

speç'tēr çrab, same as *glass crab*.

speç'tēr in'seçt, any insect of the genus *Phasma*.

speç'tēr lē'mūr, same as *tarsier*.

speç'tēr shrimp, a small marine crustacean, *Caprella tuberculata*.

speç'trà, *n.* alternative plural of *spectrum*.

speç'trăl, *a.* 1. resembling or of the nature of a specter; ghostly; as, a *spectral* hue.
2. of or pertaining to the spectrum; caused by the spectrum; as, *spectral* phenomena.

speç·tral'i·ty, *n.* the quality or state of being spectral.

speç'trăl·ly, *adv.* in a spectral manner or form.

speç'tre (-tēr), *n.* a specter: British spelling.

speç'trō-, [from Latin *spectrum*, an appearance, apparition.] a combining form meaning (a) *of radiant energy as exhibited in a spectrum*, as in *spectrogram*; (b) *of* or *by a spectroscope*, as in *spectroheliogram*.

speç"trō·bō·lom'e·tēr, *n.* a spectroscope to which a bolometer is attached to measure the amount of heat in any region of the spectrum.

speç'trō·gram, *n.* a photograph of a spectrum.

speç'trō·graph, *n.* [*spectro-*, and Gr. *graphein*, to write.]
1. an instrument for dispersing light radiation into a spectrum and recording the spectrum photographically.
2. a photograph of a spectrum.

speç·trō·graph'iç, *a.* of or pertaining to the spectrograph or to spectrography.

spec·trog'rȧ·phy, *n.* the art of using the spectrograph.

spec·trō·hē'li·ō·gram, *n.* [*spectro-* and *helio-* and *-gram.*] a photograph of the sun made by monochromatic light, usually showing streaks or prominences on the sun's surface.

spec·trō·hē'li·ō·gr̆aph, *n.* an instrument used to make spectroheliograms.

spec·trō·loġ'iç·ăl, *a.* of or pertaining to spectrology.

spec·trō·loġ'iç·ăl·ly, *adv.* in a spectrological manner.

spec·trol'ō·ġy, *n.* [*spectro-*, and Gr. *logos*, a discourse.] the scientific study of spectra.

spec·trom'e·tẽr, *n.* 1. an instrument used for measuring spectral wave lengths.
2. an instrument used for determining the index of refraction.

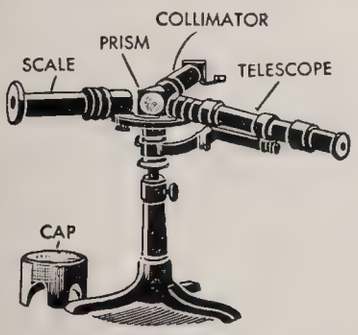
spec·trō·met'riç, *a.* of or made by a spectrometer.

spec·trō·mī·çrō·sçop'iç·ăl, *a.* of or pertaining to combined observations made by the spectroscope and the microscope.

spec'trō·phōne, *n.* a modification of the spectroscope, by which a spectrum causes a medium sensitive to sound to vibrate audibly.

spec·trō·phon'iç, *a.* of or relating to the spectrophone.

spec"trō·phō·tom'e·tẽr, *n.* an instrument in which two spectra may be brought into visual comparison, to determine their relative intensity, etc.



spec·trō·phō·tō·met'riç, *a.* of or relating to the spectrophotometer.

spec"trō·phō·tom'e·try, *n.* the science of using the spectrophotometer.

spec"trō·pō·lar'i·sçōpe, *n.* an instrument consisting of a combined spectroscope and polariscope.

spec"trō·pȳ·rom'e·tẽr, *n.* a form of spectrophotometer used for the determination of high temperatures.

spec'trō·sçōpe, *n.* [*spectro-*, and Gr. *skopein*, to view.] an optical instrument used for forming spectra for study. It usually consists of a tube with a slit in one end, and a convex lens called a collimator at the other, from which parallel rays of light proceed; a prism, or train of prisms, to separate the differently refrangible rays; and a telescope to view a magnified image of the spectrum produced.

SPECTROSCOPE

analyzing spectroscope; a spectroscope in which different parts of the slit receive light from different parts of a luminous object.

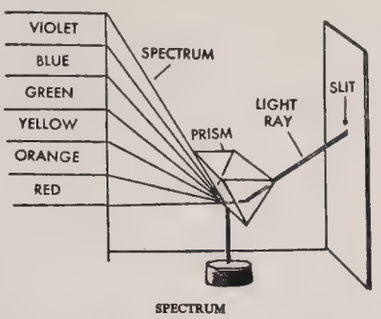
diffraction spectroscope; a spectroscope in which the spectrum is produced by a fine grating ruled on metal, instead of a prism.

direct-vision spectroscope; a small spectroscope which contains the essential parts in a single tube.

integrating spectroscope; a spectroscope in which the slit receives light from all parts of a luminous object.

prismatic spectroscope; a spectroscope in which the spectrum is produced by a prism.

spec'trō·sçōpe, *v.t.* and *v.i.* to observe by means of a spectrocope.



spec·trō·sçop'iç, spec·trō·sçop'iç·ăl, *a.* of, relating to, or obtained by means of the spectroscope or spectroscopy; as, *spectroscopic* data.

spec·trō·sçop'iç·ăl·ly, *adv.* in a spectroscopic manner.

spec'trō·sçō·pist, *n.* a student of or expert in spectroscopy.

spec'trō·sçō·py, *n.* the study of spectra through the use of the spectroscope.

spec'trum, *n.*; *pl.* **spec'trȧ, spec'trums,** [L., an appearance, image, or specter.]
1. the series of colored bands diffracted and arranged in the order of their respective wave lengths by the passage of white light through a prism or other diffracting medium and shading continuously from red (produced by the longest wave visible) to violet (produced by the shortest).

SPECTRUM

2. any of various arrangements of colored bands or lines, together with invisible components at both ends of the spectrum, similarly formed by light from incandescent gases or other sources of radiant energy, which can be studied by a spectrograph.
3. an afterimage.
4. in radio, the range of wave lengths of radio waves, from 3 centimeters to 30,000 meters, or of frequencies of radio waves, from 10 to 10,000,000 kilocycles: also *radio spectrum.*
5. an apparition; a specter.

chromatic spectrum; the region of the spectrum occupied by the visible rays.

diffraction spectrum; the spectrum of light produced by a grating.

fluted spectrum; a discontinuous spectrum having bands of fluted form.

gaseous spectrum; the spectrum of an incandescent gas or vapor.

heat spectrum or *thermal spectrum*; the spectrum composed of dark infrared rays.

line spectrum; a spectrum of light consisting of distinct and separated lines.

normal spectrum; the spectrum produced by means of a diffraction grating, the colors being so spaced as to agree with their wave lengths.

prismatic spectrum; a spectrum produced by means of a prism.

solar spectrum; the spectrum produced by a ray of solar light. Its characteristic feature is the presence of extremely numerous dark lines.

spectrum analysis; analysis of substances or bodies through study of their spectra.

spec'ū·lăr, *a.* [L. *specularis*, belonging to a mirror, from L. *speculum*, mirror.]
1. of, like, or by means of a speculum.
2. assisting sight by means of optical properties. [Obs.]
3. affording view. [Obs.]

specular iron ore; same as *hematite.*

spec'ū·lāte, *v.i.*; speculated, *pt., pp.*; speculating, *ppr.* [L. *speculari* (*-latus*), to view, from *specere*, to see.]

spēr'mȧ·gōne, *n.* same as *spermogonium.*
-spēr'măl, -spermous.
spēr'măl·ist, *n.* same as *spermist.*
spēr'mȧ·phōre, *n.* [*sperma-,* and Gr. *pherein,* to bear.] in botany, that part of the ovary from which the ovules arise; a placenta. [Rare.]
spēr'mȧ·ry, *n.*; *pl.* **spēr'mȧ·ries,** the organ in male animals in which spermatozoa are produced; the spermatic gland or glands of the male.
spēr·mȧ·thē'çȧ, *n.*; *pl.* **spēr·mȧ·thē'cae,** [*sperma-,* and Gr. *thēkē,* case.] a cavity in certain female insects, as queen bees, in which the sperm of the male is received.
spēr·mā'ti·ȧ (-shi-), *n.* pl. of *spermatium.*
spēr·mat'iç, spēr·mat'iç·ăl, *a.* 1. of or having to do with sperm or sperm cells; generative.
2. of or having to do with a spermary.
spēr·mat'iç çord, the cordlike structure suspending a testicle within the scrotum and containing the vas deferens, blood vessels and nerves supplying the testicle, etc.
spēr'mȧ·tid, *n.* a cell derived from a secondary spermatocyte by fission, developing into a spermatozoon: also called *spermatoblast.*
spēr'mȧ·tin, *n.* an albuminoid substance found in semen, related to mucin and to alkali albumin.
spēr·mȧ·ti·ǫg'e·nous, *a.* bearing spermatia.
spēr'mȧ·tişm, *n.* the emission or discharge of semen.
spēr'mȧ·tist, *n.* a spermist.
spēr·mȧ·tī'tis, *n.* inflammation of a vas deferens or spermatic cord.
spēr·mā'ti·um (-shi-), *n.*; *pl.* **spēr·mā'ti·ȧ,** [Gr. *spermation,* dim. of *sperma,* a seed.]
1. a nonmotile male gamete in red algae.
2. a very small cell thought to be a male gamete, found in some lichens and fungi.
spēr'mȧ·tīze, *v.t.* and *v.i.* to discharge, or fertilize with, seed.
spēr'mȧ·tō-, see *sperma-.*
spēr'mȧ·tō·blȧst, *n.* the germ of a spermatozoon; a spermatid: also called *spermatocyte* and *nematoblast.*
spēr'mȧ·tō·cēle, *n.* [*spermato-,* and Gr. *kēlē,* a tumor.] a swelling of the spermatic vessels; cystic distention of the epididymis.
spēr'mȧ·tō·cyst, *n.* same as *seminal vesicle* under *seminal.*
spēr"mȧ·tō·cys·tī'tis, *n.* inflammation of the seminal vesicles.
spēr'mȧ·tō·cȳte, *n.* [*spermato-* and *-cyte.*] a cell that develops through several stages to form spermatozoa or spermatozoids.
spēr"mȧ·tō·ġem'mȧ, *n.*; *pl.* **spēr"mȧ·tō·ġem'mae,** [*spermato-,* and Gr. *gemma,* a bud.] an aggregation of spermatocytes; a spermatic cyst of many nuclei which project into the seminal tubules and develop into spermatoblasts. [Obs.]
spēr"mȧ·tō·ġen'e·sis, *n.* the production and development of spermatozoa.
spēr"mȧ·tō·ġē·net'iç, *a.* pertaining to, exhibiting, or characterized by spermatogenesis.
spēr·mȧ·toġ'e·nous, *a.* producing spermatozoa or sperm.
spēr·mȧ·toġ'e·ny, *n.* spermatogenesis. [Rare.]
spēr"mȧ·tō·gō'ni·ăl, *a.* of or having to do with a spermatogonium.
spēr"mȧ·tō·gō'ni·um, *n.*; *pl.* **spēr"mȧ·tō·gō'ni·ȧ,** [*spermato-,* and Gr. *gonē,* generation.]
1. a primitive male germ cell.
2. a spermogonium.
spēr'mȧ·toid, *a.* resembling sperm; spermlike.
spēr"mȧ·tō·loġ'iç·ăl, *a.* pertaining to spermatology.
spēr·mȧ·tol'ō·ġist, *n.* one versed in spermatology; a spermologist.
spēr·mȧ·tol'ō·ġy, *n.* [*spermato-,* and Gr. *logos,* discourse.] the branch of science dealing with semen, sperm, etc.
spēr·mȧ·toph'ō·răl, *a.* pertaining to a spermatophore.
spēr'mȧ·tō·phōre", *n.* [*spermato-,* and Gr. *pherein,* to bear.] a case or capsule containing a number of spermatozoa, expelled whole by the male of certain animals, as the segmented worms and mollusks.
spēr·mȧ·toph'ō·rous, *a.* bearing or producing sperm or seed; seminiferous.
spēr'mȧ·tō·phȳte", *n.* [*spermato-,* and Gr. *phyton,* plant.] any seed-bearing plant.
spēr"mȧ·tō·phyt'iç, *a.* of or having to do with a spermatophyte.
spēr"mȧ·tor·rhē'ȧ, spēr"mȧ·tor·rhoe'ȧ (-rē'), *n.* [*spermato-,* and Gr. *rhein,* to flow.] involuntary, abnormal, or excessive discharge of semen without an orgasm.
spēr'mȧ·tō·spōre", *n.* a spermatogonium.
spēr"mȧ·tō·thē'çȧ, *n.* same as *spermatheca.*
spēr·mȧt·ō'vum, *n.*; *pl.* **spēr·mȧt·ō'vȧ,** a fecundated ovum. [Rare.]
spēr"mȧ·tō·zō'ȧ, *n.* pl. of *spermatozoon.*
spēr"mȧ·tō·zō'ăl, *a.* spermatozoan.
spēr"mȧ·tō·zō'ăn, *a.* pertaining to or resembling spermatozoa.
spēr"mȧ·tō·zō'ăn, *n.* a spermatozoon.
spēr"mȧ·tō·zō'iç, *a.* spermatozoan.
spēr"mȧ·tō·zō'id, *n.* [*spermato-,* and Gr. *zōon,* a living creature, and *-oid.*]
1. in certain mosses, ferns, etc., a male sex cell, or gamete, that moves by means of cilia: it is usually produced in an antheridium.
2. a spermatozoon. [Rare.]
spēr"mȧ·tō·zō'oid, *n.* a spermatozoid.
spēr"mȧ·tō·zō'on, *n.*; *pl.* **spēr"mȧ·tō·zō'ȧ,** [*spermato-,* and Gr. *zōon,* a living being.] the male germ cell, found in semen, which penetrates the ovum, or egg, of the female to fertilize it: it has a well-defined head, mid-section, and tail, and moves with a swimming action: also *sperm.*
spērm cell, 1. a spermatozoon.
2. a spermatoblast or spermatocyte.
spēr'miç, *a.* of or having to do with sperm.
spēr'min, *n.* spermine.
spēr'mĭne, *n.* [*sperm* and *-ine.*] a basic substance, $C_{10}H_{26}N_4$, found in semen, yeast, and some animal tissue.
spēr'mĭşm, *n.* a former theory that the spermatozoon is the whole germ of the future animal.
spēr'mist, *n.* a believer in the theory of spermism.
spērm nū'çlē·us, a nucleus, as of a spermatozoon.
spēr'mō-, see *sperma-.*
spēr'mō·blȧst, *n.* a spermatoblast.
spēr'mō·çȧrp, *n.* the fruit of the *Characeæ.* [Rare.]
spēr'mō·dērm, *n.* [*spermo-,* and Gr. *derma,* skin.] in botany, the whole integument of a seed in the aggregate; the testa.
spēr'mō·gōne, *n.* same as *spermogonium.*
spēr·mō·gō'ni·um, *n.*; *pl.* **spēr·mō·gō'ni·ȧ,** [*spermo-,* and Gr. *gonē,* offspring.] in certain lichens, a cup-shaped cyst in which spermatia are produced.
spērm oil, a valuable lubricating oil obtained from the head of the sperm whale.
spēr·mol'ō·ġist, *n.* one who studies seeds; a collector of seeds.
spēr·mol'ō·ġy, *n.* that branch of botany which investigates the seeds of plants.
spēr'mō·phile, *n.* [*spermo-,* and Gr. *philein,* to love.] any rodent of the genus *Spermophilus,* including the chipmunk, ground squirrel, suslik, and gopher: they can do much damage to crops.
spēr'mō·phōre, *n.* [*spermo-,* and Gr. *pherein,* to bear.] same as *spermophorum.*
spēr·moph'ō·rum, *n.*; *pl.* **spēr·moph'ō·rȧ,** the placenta of a plant.
Spēr·moph'y·tȧ, *n.pl.* a phylum of plants including the higher flowering plants and those that bear true seeds; the *Phanerogamia.*
spēr'mō·phȳte, *n.* [*spermo-,* and Gr. *phyton,* plant.] one of the *Spermophyta*; any plant producing true seeds.
spēr·mō·phyt'iç, *a.* in botany, capable of producing seeds.
spēr'mō·plaşm, *n.* [*spermo-,* and Gr. *plasma,* anything molded.] the protoplasm of a spermatozoon.
spēr'mō·sphēre, *n.* a group or mass of spermatids formed by the segmentation of a secondary spermatocyte. [Obs.]
spēr'mō·spōre, *n.* same as *spermatospore.*
spēr'mous (-mus), *a.* of or like sperm.
-spēr'mous, a combining form meaning *having* (a specified number or kind of) *seed,* as in mono*spermous.*
spēr'mūle, *n.* a sperm cell or spermatozoon. [Obs.]
spērm whāle (hwāl), the cachalot or physeter, *Physeter macrocephalus,* a large, toothed whale inhabiting warm seas: a closed cavity in its square head contains spermaceti and sperm oil: also called *spermaceti whale.*
porpoise or *pygmy sperm whale*; a tropical whale not over twenty feet long, occasionally found in American waters: also called *snub-nosed cachalot.*
sperm-whale porpoise; a bottle-nosed whale of the genus *Hyperoodon* found in both Europe and America.
sper'ry·līte, *n.* [named after F. L. *Sperry,* its discoverer.] a silvery-white granular or crystalline native compound of platinum and arsenic, $PtAs_2$.
spēr'se, *v.t.* to disperse. [Obs.]
spes'särt·īte, spes'särt·ine, *n.* [from *Spessart,* in Germany.] a manganesian garnet.
spet, *v.t.* to spit; to throw out. [Dial.]
spet, *n.* spittle; a flow. [Dial.]
spetch'eş, *n.pl.* the trimmings of skins and hides, used for making glue.
spew (spū), *v.t.*; spewed, *pt., pp.*; spewing, *ppr.* [AS. *spiwan,* to spit; akin to G. *speien.*]
1. to vomit; to eject from or as from the stomach.
2. to eject; to cast forth violently or with abhorrence.
spew, *v.i.* 1. to vomit; to discharge the contents of the stomach.
2. to cast up seed, as wet land swollen with frost.
spew, *n.* that which is spewed; vomit.
spew'ĕr, *n.* one who or that which spews.
spew'i·ness, *n.* the state of being spewy, moist, or damp. [Brit. Dial.]
spew'y, *a.*; *comp.* spewier; *superl.* spewiest, wet; boggy; moist; damp. [Brit. Dial.]
sphac'el, *n.* same as *sphacelus.*

sphac'ē·lāte, *v.i.*; sphacelated, *pt., pp.*; sphacelating, *ppr.* 1. to mortify; to become gangrenous, as flesh.
2. to decay or become carious, as a bone.
sphac'ē·lāte, *v.t.* to make gangrenous.
sphac'ē·lāte, *a.* 1. in botany, decayed, withered, or dead.
2. affected with gangrene.
sphac'ē·lā·ted, *a.* sphacelate.
sphac·ē·lā'tion, *n.* the process of becoming or making gangrenous; mortification.
sphac'ē·lism, *n.* sphacelation; a sphacelate condition.
sphac'ē·lous, *a.* affected with or pertaining to gangrene.
sphac'ē·lus, *n.* [Gr. *sphakelos*, from *sphazein*, to kill.] a slough or mass of gangrenous tissue.
sphae·raph'i·dēs, *n.pl.* [Gr. *sphaira*, a sphere, and *rhaphis*, needle.] in botany, the round crystal masses occurring in some plant cells: also called *sphere crystals*.
Sphae·rel'là, *n.* [LL., dim. from Gr. *sphaira*, a sphere.] a large genus of parasitic plant fungi, comprising 150 North American species.
sphae·rēn'ċhy·mà, *n.* [*sphaer-*, and Gr. *enchyma*, anything poured out.] spherical or spheroidal cellular tissue, such as is found in the pulp of fruits.
sphae·rid'i·um, *n.*; *pl.* **sphae·rid'i·à,** [Gr. *sphaira*, a sphere, and *eidos*, resemblance.] one of numerous stalked appendages with buttonlike heads, covered with cilia, found in almost all sea urchins.
sphae'rō-, [from Gr. *sphaira*, a ball, a sphere.] a combining form meaning *a sphere* or *like a sphere*: also, before a vowel, *sphaer-*.
sphae'rō·spōre, *n.* same as *spherospore*.
Sphae·rō·thē'ċà, *n.* [*sphaero-*, and Gr. *thēkē*, a case.] a genus of fungi, some of which cause a destructive, whitish mildew on plants, especially the hop vine and gooseberry.
sphaer'ū·līte, *n.* same as *spherulite*.
Sphag·nā'cē·ae, *n.pl.* a family of caulescent bog plants typified by the genus *Sphagnum*; the peat mosses.
sphag·nā'ceous, *a.* relating to the *Sphagnaceæ*.
Sphag·nā'lēs, *n.pl.* the peat mosses.
sphag·niċ'ō·lous, *a.* growing among or in sphagnum mosses.
sphag'nous, *a.* of, consisting of, or covered with mosses of the genus *Sphagnum*.
Sphag'num, *n.* [Gr. *sphagnos*, a kind of moss.]
1. the typical and only genus of the family *Sphagnaceæ*. The mosses of this genus are widely diffused over the surface of the earth in temperate climates, readily recognized by their pale grayish tint, fasciculate branchlets, and apparently sessile globose capsules. They are aquatic plants, and constitute the great mass of the bogs in swampy and moory districts. The formation of the peat in such situations is often owing, in a great measure, to these plants.
2. [s–] a moss of the genus *Sphagnum*; also, a mass of such mosses, used to make fertilizer, to pack and pot plants, to make surgical dressings, etc.
sphal'ēr·īte, *n.* [Gr. *sphaleros*, deceptive, uncertain; and *-ite*.] a transparent, cleavable resinous zinc sulfide, ZnS, the principal ore of zinc: also called *zinc blende, black jack, false galena*, etc.
Spheġ'i·dae, *n.pl.* a family of fossorial hymenopters or digger wasps which burrow in sandbanks for nidification.
sphen-, same as *spheno-*.
sphēne, *n.* [Fr. *sphène*, from Gr. *sphēn*, a wedge.] same as *titanite*.
sphē·neth'moid, *a.* designating the curved plate in front of the lesser wing of the ethmoid bone.
sphē·neth'moid, *n.* the sphenethmoid bone, as in the skull of a frog.
sphenethmoid bone; a cranial bone of a frog in front of the parasphenoid and circling the front of the brain: also called *girdle bone*.
sphē·neth·moid'ăl, *a.* same as *sphenethmoid*.
sphē'niċ, *a.* 1. wedge-shaped.
2. designating or of a number having three unequal prime factors.
sphē·nis'ċăn, *n.* [Gr. *sphēniskos*, dim. of *sphēn*, a wedge.] a penguin.
sphē'nō-, [from Gr. *sphēn*, a wedge.] a combining form meaning, (a) *shaped like a wedge*, as in *sphenogram*; (b) *of the sphenoid bone*: also, before a vowel, *sphen-*.
sphen·oċ·cip'i·tăl, *a.* relating to the sphenoid and the occipital bones.
sphenoccipital bone; the hindmost bone of the skull, formed by the union of the sphenoid and occipital bones in adults.
Sphē'nō·don, *n.* same as *Hatteria*.
sphē"nō·eth·moid'ăl, *a.* same as *sphenethmoid*.
sphē'nō·gram, *n.* [*spheno-* and *-gram*.] a cuneiform or wedge-shaped character or symbol, as on a monolith.
sphē·nog'rà·phēr, *n.* one versed in sphenography or in deciphering cuneiform inscriptions.
sphē·nō·graph'iċ, *a.* pertaining to sphenography.
sphē·nog'rà·phist, *n.* same as *sphenographer*.
sphē·nog'rà·phy, *n.* [*spheno-*, and Gr. *graphein*, to write.] writing done in wedge-shaped and arrow-headed characters; also, the art of deciphering cuneiform writings; that branch of philological science which concerns itself with such writings.
sphē'noid, sphē·noid'ăl, *a.* [*spheno-*, and Gr. *eidos*, form.]
1. wedge-shaped.
2. in anatomy, designating or of the wedge-shaped compound bone at the base of the skull.
sphē'noid, *n.* 1. a wedge-shaped crystal contained under four equal isosceles triangles.
2. the sphenoid bone.
sphē·nō·pal'à·tine, *a.* related to or in the region of the sphenoid and palatal bones.
sphenopalatine ganglion; a ganglion of the sympathetic, facial, and other nerves situated near the right auricle of the heart: also called *Meckel's ganglion*.
sphē·not'iċ, *a.* relating to the sphenoid bone and the hard parts of the ear, or otic capsule.
sphenotic bone; in a fish, a bone situated back of the frontal bone.
sphē'nō·trībe, *n.* [*spheno-*, and Gr. *tribein*, to bruise.] an obstetrical instrument to crush the head of the fetus to facilitate delivery when normal delivery is not possible.
sphēr'ăl, *a.* 1. of or like a sphere.
2. rounded in form; spherical.
3. symmetrical.
sphēre, *n.* [Fr., from L. *sphæra*, Gr. *sphaira*, a ball, globe.]
1. any round body or figure having the surface equally distant from the center at all points; a globe; a ball.
2. a star or planet.
3. the visible heavens; sky.
4. the apparent globe (*celestial sphere*) formed by the heavens and visible only as a dome extending from horizon to horizon.
5. any of a series of hypothetical spherical shells, transparent, concentric, and postulated as revolving one within another, in which the stars, planets, sun, moon, etc. were were supposedly set: a concept of ancient astronomy.
6. the place or range of action or existence; field or extent of knowledge, experience, influence, etc.; province; compass; domain.
7. social stratum; place in society; walk of life.
8. a circuit, as of a heavenly body. [Obs.]
9. in logic, whatever comes within the scope of a general concept; the entire content of a concept, as including individuals, species, and genera. [Rare.]
armillary sphere; see under *armillary*.
axis of a sphere; any diameter of a sphere; specifically, the diameter about which it rotates, as the axis of a planet.
circle of a sphere; see *circles of the sphere* under *circle*.
music of the spheres; see under *music*.
oblique sphere; see under *oblique*, a.
parallel sphere; see under *parallel*, a.
right sphere; see under *right*, a.
terrestrial sphere; (a) the earth; (b) anything representing the earth as an illustrative globe with the earth's features marked upon it.
Syn.—ball, globe, orb.
sphēre, *v.t.*; sphered, *pt., pp.*; sphering, *ppr.* 1. to place in or as in a sphere.
2. to form into a sphere; as, light *sphered* in a radiant cloud.
3. to put among the heavenly spheres.
-sphēre, combining form meaning *a sphere* or *like a sphere*, as in blasto*sphere*, strato*sphere*.
sphēre crys'tăls, same as *sphaeraphides*.
sphēre'less, *a.* without a sphere or spheres; having no place of action; wandering; errant; as, a *sphereless* star.
spher'iċ, *a.* same as *spherical*.
spher'i·ċăl, *a.* 1. shaped like a sphere; globular.
2. of a sphere or spheres.
3. of the heavenly spheres (sometimes with astrological reference).
spherical aberration; optical distortion resulting from spherical form, as in a lens or mirror.
spherical angle (or *triangle*, etc.); an angle (or triangle, etc.) formed by intersecting arcs of great circles of a sphere.
spherical excess; see under *excess*.
spherical geometry; that branch of geometry which treats of spherical magnitudes; the doctrine of the sphere, particularly of the circles described on its surface.
spherical lune; the part of the surface of a sphere included between the semicircumferences of two great circles having a common diameter.
spherical polygon; a portion of the surface of a sphere bounded by the arcs of three or more great circles.
spherical sector; same as *sector of a sphere* under *sector*.
spherical segment; a portion of a sphere included between a zone and a secant plane or between two parallel secant planes.
spherical trigonometry; that branch of trigonometry concerned with spherical triangles and polygons.
spherical ungula; a portion of a sphere bounded by a lune and two semicircles meeting in a diameter of the sphere: also called *spherical wedge*.
spher'i·ċăl·ly, *adv.* 1. in the form of a sphere or spherical section.
2. so as to be spherical.
spher'i·ċăl·ness, *n.* the condition or quality of being spherical. [Rare.]
sphē·ric'i·ty, *n.* the state or quality of being orbicular or spherical; roundness; as, the *sphericity* of a drop of water.
spher'i·ċle, *n.* a small sphere.
spher'iċs, *n.pl.* [*construed as sing.*] the geometry and trigonometry of figures formed on the surface of a sphere.
sphē'rō-, same as *sphaero-*.
sphē·rō·ċon'iċ, *n.* in mathematics, the nonplane curve of intersection formed by a sphere and a quadric cone whose vertex is the center of the sphere.
sphē'rō·grȧph, *n.* a nautical instrument for the determination of the angular position of a ship, and distance sailed.
sphē'roid, *n.* [*sphero-*, and Gr. *eidos*, form.]
1. a body or figure that is almost but not quite a perfect sphere: the earth is a *spheroid*.
2. same as *ellipsoid of revolution* under *ellipsoid*.
sphē'roid, *a.* same as *spheroidal*.
sphē·roid'ăl, *a.* having the form of a spheroid; almost spherical.
spheroidal state; the form taken by a drop of liquid, as water, when placed on the level surface of a very hot metal, being held aloof from the metal by a layer of its own vapor and assuming a more or less flattened spheroidal shape: also called *calorific paradox*.
sphē·roid'iċ, *a.* spheroidal.
sphē·roid'iċ·ăl, *a.* spheroidal.
sphē·roi·dic'i·ty, *n.* the character or condition of being spheroidal.
sphē·roid'i·ty, *n.* same as *spheroidicity*.
sphē·rom'e·tēr, *n.* [Fr. *sphéromètre*.] an instrument used for measuring the surface curvature of bodies that are spherical, cylindrical, etc., as lenses, by means of a scale and a micrometer screw.
sphē·rō·sid'ēr·īte, *n.* carbonate of iron siderite in spheroidal masses.
sphē'rō·spōre, *n.* the quadruple spore peculiar to some of the *Algæ*.
spher'ù·là, *n.*; *pl.* **spher'ù·lae,** [L. *sphærula*, dim. of *sphæra*, a sphere.] a small sphere; specifically, (a) a globose peridium of a fungus; (b) a globose siliceous part of the skeleton of a sponge.
spher'ù·lăr, *a.* spherical.
spher'ù·lāte, *a.* in zoology, provided or covered with spherules or tubercles.
spher'ùle, *n.* [L. *sphærula*, a little sphere.] a little sphere or spherical body, as of quicksilver when poured upon a plane; a globule.
spher'ù·līte, *n.* a group of crystals arranged in the shape of a sphere, as in certain volcanic rocks.
spher·ù·lit'iċ, *a.* referring to, containing, or composed of spherulites.
sphēr'y, *a.*; *comp.* spherier; *superl.* spheriest, 1. of or like a sphere, especially a heavenly body. [Poet.]
2. celestial; starlike. [Poet.]

Sphex, *n.* [Gr. *sphēx*, a wasp.]
1. a genus, mostly tropical, of digger wasps, typical of the family *Sphegidæ*.
2. [s–] any wasp of the genus *Sphex*.

sphiñç'tĕr, *n.* [Gr. *sphinktēr*, from *sphingein*, to draw close.] in anatomy, a ring-shaped muscle that surrounds a natural opening in the body and can open or close it by expanding or contracting.
sphincter ani; the muscle that closes the anus.

sphiñç'tĕr, *a.* relating to, performing as, or designating a sphincter.

sphiñç'tĕr·ăl, *a.* of, or having the nature of, a sphincter.

sphiñç'tĕr·āte, *a.* 1. provided with a sphincter.
2. moved or controlled by a sphincter.

sphiñç·tē'ri·ăl, *a.* same as *sphincteral*.

sphin'ġid, *a.* of, pertaining to, or related to the *Sphingidæ*.

sphin'ġid, *n.* one of the *Sphingidæ*.

Sphin'ġi·dae, *n.pl.* a family of lepidopterous insects of the section *Crepuscularia*. This family embraces some of the largest European *Lepidoptera*, as the hawk moths.

sphin'ġi·form, *a.* resembling a sphingid.

sphiñ'ġoid, *a.* sphingiform.

sphiñx, *n.*; *pl.* **sphiñx'eṣ, sphin'ġēṣ,** [Gr., lit., the strangler.]
1. any Egyptian statue or figure having, typically, the body of a lion and the head of a man, ram, or hawk.
2. [S–] a huge statue of this kind with the head of a man, at Gîza, near Cairo, Egypt.
3. in Greek mythology, (a) a winged monster with a lion's body and the head and breasts of a woman; specifically, (b) [S–] a monster of this kind that perched on a rock near Thebes and asked

GREEK SPHINX

EGYPTIAN SPHINX

a riddle of every passer-by, strangling all who could not answer: Oedipus solved the riddle, and the Sphinx killed herself.
4. a person whose manner or expression suggests that his character is deep and mysterious.
5. in zoology, a hawk moth.

sphiñx mṓth, any insect of the family *Sphingidæ*.

sphraġ'ide, *n.* [Fr. *sphragide*, from L. *sphragis* (*-idis*), a kind of stone used for seals, Lemnian earth, from Gr. *sphragis* (*-idos*), a seal. The earth is said to have been so called because sold in sealed packets.] same as *Lemnian earth* under *Lemnian*.

sphrà·ġis'tiçs, *n.pl.* [*construed as sing.*] [Gr. *sphragis*, a seal.] the science of engraved seals, their history, age, and distinctions.

sphyg'miç, *a.* [Gr. *sphygmos*, the pulse.] of or pertaining to the pulse.

sphyg'mō-, [from Gr. *sphygmos*, the pulse.] a combining form meaning *the pulse*, as in *sphygmo*graph.

sphyg'mō·gram, *n.* the record made by the sphygmograph; a series of tracings showing the force and extent of the undulations of the pulse.

sphyg'mō·gràph, *n.* an instrument which, when applied over an artery, indicates the rate, force, and variations of the pulse.

sphyg·mō·graph'iç, *a.* of, pertaining to, or registered by the sphygmograph.

sphyg·mog'rà·phy, *n.* the recording of the pulse by means of a sphygmograph.

sphyg'moid, *a.* pulselike.

sphyg·mol'ō·ġy, *n.* the scientific study of the pulse.

sphyg''mō·mà·nom'e·ter, *n.* an instrument for measuring arterial blood pressure.

sphyg·mom'e·tĕr, *n.* an instrument for measuring the force and rate of the pulse.

sphyg'mō·phōne, *n.* [*sphygmo-*, and Gr. *phōnē*, a sound.] an instrument for determining the character of pulse undulations by means of the hearing.
