Wylie, Phillip Gordon 1902-71, U.S. author; on the staff of the *New Yorker* (1925-27); novels include *Gladiator* (1930) and *The Disappearance* (1951); also wrote *A Generation of Vipers* (1942), a survey of American habits and beliefs.

X

Xavier (zā'vē·ə*r*, zav'ē·ə*r*), **Saint Francis** 1506-52, Basque Jesuit missionary; studied in Paris (1525-34) where he met Ignatius of Loyola; one of the founders of the Society of Jesus; sent by John III of Portugal to Goa, India, as a missionary (1541-42); preached and established missions in India, Ceylon, and Japan (1542-52).

Xenophanes (ze·nof'*a*·nēz'') 570?-480? B.C., Greek philosopher and poet; may have been founder of the Eleatic School.

Xenophon (zen'*o*·fon, zeno'*o*·fon'') 434?-355? B.C., Greek historian; student of Socrates; author of *Anabasis,* an account of his experiences as a member of the Ten Thousand under Cyrus the Younger, and as leader of the heroic retreat after the murder of all Greek generals.

Xerxes I (zə*r*k'sēz) (called "Xerxes the Great") 519?-465? B.C., king of Persia (486-65 B.C.); brought Egypt again under Persian rule; invaded Greece by bridge of boats over the Hellespont; pillaged Athens; he was defeated at Salamis and returned to Asia Minor.

Y

Yamasaki (yäm''ä·sä'kē), **Minoru** 1912- , U.S. architect; his work is characterized by delicacy, elegance, high arches, and decorated vaults.

Yang (yäng), **Chen Ning** 1922- , U.S. physicist (Chinese born); Nobel prizewinner for physics (1957) for research in fields of statistical mechanics and meson physics; with T. D. Lee, he disproved the law of parity.

Yeats (yēts), **William Butler** 1865-1939, Irish poet and playwright; considered one of the greatest poets of the twentieth century; Nobel prizewinner for literature (1923); studied painting

early in his life, but he soon turned to literature; early writings were in the Pre-Raphaelite tradition; shortly after the turn of the century, his style was changed towards satire and realism and a more distilled symbolism; his greatest work was produced between the ages of 50 and 75; his devotion to Irish nationalism heavily influenced his work; elected a senator of the Irish Free State (1922); his works include *The Wanderings of Oisin* (1889), *The Countess Cathleen* (1892), *The Hour Glass* (1904), *The Land of Heart's Desire* (1904), *Four Plays for Dancers* (1921), *The Tower* (1928), *Last Poems* (1940), and others.

Yegorov (ye·gō′rof), **Boris B.** 1937- , Soviet doctor and cosmonaut; crew member of the first three-man team in space (October 12, 1964).

Yeliseyev (yel·i·sā′yef), **Aleksei S.** 1934- , Soviet cosmonaut; crew member on the first flight to perform docking maneuver (January 14, 1969).

Yevtushenko (yev′′tö·sheng′kō, *Russ.* yef·tụ·shen′ko), **Yevgeny Aleksandrovich** 1933- , Soviet Russian poet; spokesman of the "younger generation" of Russian poets; his poems include "Talk," "Babiy Yar," and "Zima Junction"; has been under criticism from Soviet press for "freethinking" and "political immaturity."

Yoritomo (yō·rē′tō·mō), (**Yoritomo Minamoto**) 1147-99, Japanese dictator; first shogun of Japan; established a system of centralized feudalism which ended a long period of civil war.

Young (yung), **Brigham** 1801-77, U.S. Mormon leader; attracted to Mormon faith as a young man in New York; led group of Mormons to Ohio and became prominent as capable leader during time of persecution; sent to England as missionary and encouraged converts to emigrate to U.S. (1839-41); led Great Trek west to Utah after the death of Joseph Smith, founder of the faith; established a settlement at Salt Lake City and directed growth of the Mormon community; first governor of Utah (1849-57); defied U.S. government opposition to Mormon community, but he avoided a complete break of relations.

Young, John, see **Lisgar, Baron.**

Young, John W. 1930- , U.S. astronaut; member of first U.S. two-man crew (March 23, 1965).

Young, Whitney M. 1921-71, U.S. black leader and organizer; worker for the National Urban League; dean of Atlanta University Graduate School of Social Work; executive director of the National Urban League (1961); a leader of the Selma March (1965) and Meredith Mississippi March (1966); a member of nine presidential panels.

Ysayë (ē·zA·ē′), **Eugène** 1858-1931, Belgian violinist; considered one of the greatest of his time; founded the Société des Concerts Ysayë, which he conducted; conductor of Cincinnati Symphony Orchestra (1918-20).

Yukawa (yö·kä′wä), **Hideki** 1907- , Japanese physicist; Nobel prizewinner for physics (1949) for his development of meson theory of nuclear forces and "nonlocal" theory of elementary particles.

Z

Zachary (zak′*a*·rē), **Saint** (also **Zacharias**) ?-752, Roman Catholic pope (741-52).

Zamora y Torres (thä·mạ′rä i tor′res), **Niceto Alcalá** 1877-1949, Spanish politician; helped lead the revolution against the monarchy (1930); president of the republic (1931-36); deposed by the Cortes and went to France and later Argentina.

Zarathrusta, see **Zoroaster.**

Zaturenska (zä·tö·ren′skä), **Marya** 1902- , U.S. poet (Russian born); Pulitzer prizewinner for poetry (1938) for *Cold Morning Sky.*

Zeeland (zā′länt), **Paul van** 1893- , Belgian economist and statesman; prime minister of Belgium (1935-37); committee president on refugees based in London (1939); worked for international economic cooperation and repatriation of displaced Belgians.

Zeeman (zā′män′′), **Pieter** 1865-1943, Dutch physicist; Nobel prizewinner for physics (1902) for his work in optics and electricity; codiscovered, with H. A. Lorentz, "the Zeeman effect," the splitting effect of a magnetic field on radiation.

Zelle, Gertrud Margarete, see **Mata Hari.**

Zenger (zeng′ėr), **John Peter** 1697-1746, U.S. journalist (German born); imprisoned on libel charges for attacking the governor of New York in his newspaper; defended by Andrew Hamilton and acquitted in a trial that marked the establishment of freedom of the press in America.

Zeno of Citium (zē′nō) 334?-262? B.C., Greek philosopher; founder of Stoicism.

Zeno of Elea 490?-430? B.C., Greek philosopher; Aristotle said he was first to use the dialectical method.

Zephyrinus (zef′′*i*·rī′nus), **Saint** ?-217, Roman Catholic pope (199-217).

Zeppelin (tsep′′*e*·lēn′), **Count Ferdinand Graf von** 1838-1917, German soldier and aeronaut; constructed first rigid airship (1900), called the Zeppelin after him.

Zernike (zâr′*ni*·ke, *D.* zeR′ni·ke), **Frits** 1888-1966, Dutch physicist; Nobel prizewinner for physics (1953); developed phase contrast microscope which enables examination of tissue without staining it.

Zhukov (zhö′kof), **Georgi Konstantinovich** 1894-1974, Russian general; commander in chief on central front (1941); conducted defense of Moscow (1941); broke sieges of Leningrad and Stalingrad (1942-43); marshal of the Soviet Union (1943); defense minister (1955-57); has published his memoirs (1969).

Ziegler (zē′glėr, *G.* tsē′gleR), **Karl** 1898-1973, German chemist; Nobel prizewinner for chemistry (1963) for developing technique to combine simple hydrocarbons into complex molecular substances with commercial uses.

Zimmerman, Robert, see **Dylan, Bob.**

Zinzendorf (tsin′tse*n*·dạRf′′), **Count Nikolaus Ludwig von** 1700-60, German religious reformer; revived and reorganized the Moravian Church; exiled from Saxony for religious activities; became bishop of Church (1737); traveled to England and U.S. (1741-43), where he worked to found and coordinate Moravian settlements in Pennsylvania.

Zog I (zōg) (original name: **Ahmed Zogu**) 1895-1961, king of Albania (1928-46); came to power with Yugoslavian and Italian backing; collaborated with Italy and went into exile with Italian occupation of Albania (1939); deposed when Communist regime gained control and declared Albania a republic (1946).

Zola (zō′l*a*, *Fr.* zạ·lA′), **Émile** 1840-1902, French novelist; apologist for and most typical example of French naturalism; supported Dreyfus with his article "J'Accuse" (1898); prosecuted for libel (1898), he escaped to England for a few months; accidently asphyxiated in his room; his works include *L'Assommoir* (1877; Eng. trans. *The Dram-Shop*), *Nana* (1880), and *Germinal* (1885; Eng. trans. 1901)—all a part of the series *Les Rougon-Macquart* (1871-93; 20 volumes); also wrote the socialistic *Quatre Evangiles* of which he finished *Fécondité* (1899), *Travail* (1901), and *Vérité* (1902).

Zorn (sạrn), **Anders Leonhard** 1860-1920, Swedish painter, etcher, and sculptor; executed landscape paintings and portraits of prominent figures of his time.

Zoroaster (zōr′ō·as′′tėr, zạr′ō·as′′tėr) seventh century B.C., Persian(?) religious philosopher and prophet; retired to a mountain for a life of religious meditation; rewarded after ten years with a vision of Ormazd the Supreme Being; was instructed in the doctrine and sent to teach it to the people.

Zozimus (zō′*si*·mus), **Saint** (also **Zosimus**) ?-418, Roman Catholic pope (417-18).

Zsigmondy (zhig′mạn·dē), **Richard Adolf** 1865-1929, German chemist (Austrian born); Nobel prizewinner for chemistry (1925) for development of ultramicroscope which he used to investigate colloids.

Zurbarán (thöR′′bä·Rän′), **Francisco de** 1598-1664, Spanish baroque painter; noted particularly for religious paintings.

Zweig (zwīg, *G.* tsvīg), **Arnold** 1887-1968, German Jewish author; exiled by Hitler (1933); became resident of Palestine; author of *The Case of Sergeant Grischa* (1927).

Zwingli (zwing′lē, *G.* tsving′lē), **Huldreich** (also **Ulrich**) 1484-1531, Swiss religious reformer; established Reformation in Zurich.

ROUGHLY SPEAKING . . .

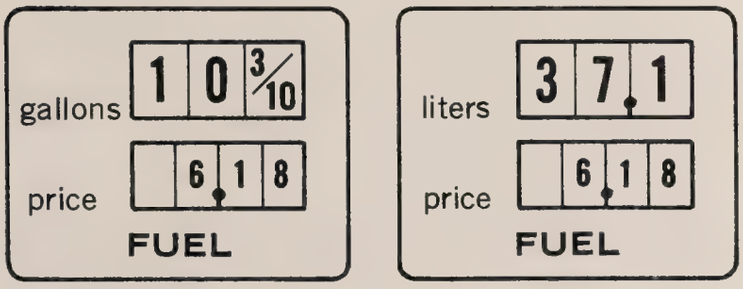
A meter is about 39 inches, or about 3 inches longer than a yard.

A kilogram is about 2.2 pounds.

A second is about the time needed to say "one thousand."

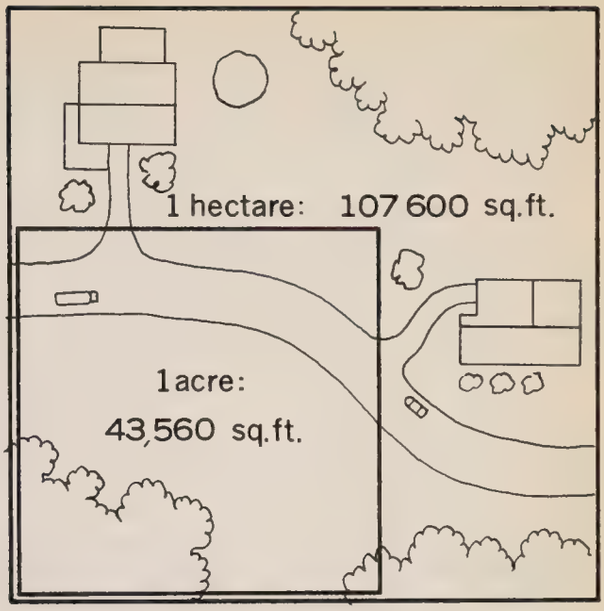
An ampere is about enough electric current to power a 100-watt bulb.

A kelvin (like a Celsius degree) is about 2 Fahrenheit degrees.



A candela is not enough light intensity by which to read a book; about 30 candelas are needed.

A radian is a plane angle (like a slice of pie) measuring about a 6th part of a circle.



A steradian is a solid angle (like a cone with a rounded bottom) measuring about a 12th part of a sphere.

THE METRIC LOOK

The changeover to the Metric System in the United States will alter the look of many commonplace things, such as highway markers, rulers, thermometers, gas pumps, and food packages. A few of the more common changes are illustrated here. Dimensions given here are for purposes of illustration only; exact dimensions and relationships are given in the text.

INTRODUCTION

A system of measurement is a necessary tool for carrying out commerce, science, and industry in every society. Weights and measures have been used by man since the dawn of civilization and have contributed much to his social progress. The first weights and measures probably arose out of ancient man's desire to obtain a fair exchange of gold and silver for his livestock or grain. The early Egyptian farmers along the Nile River may have wished to know how much land they owned, and then calculated the length and width of their fields by walking these distances and counting so many strides or paces. But whatever the origins of weights and measures, it is certain that the units were randomly chosen. Units of mass, length, and capacity from primitive times to the present have often been as diverse and variable as the livestock, metal, land, or grain they measured.

A survivor of this random system of weights and measures may still be found in the United States today. For example, a mile equals 8 furlongs, a furlong 40 rods, a rod $16\frac{1}{2}$ yards, and so on. In random systems of weights and measures, the mathematical relationship between units is arbitrary, and conversion from one unit to another is often confusing and time-consuming.

In an attempt to overcome this problem, France adopted, in the latter part of the eighteenth century, the metric system of measurement, which allows for easy and accurate conversion of units. Since then, all major nations of the world except the United States and parts of the British Commonwealth have adopted the metric system, and the United States, too, will soon be using the metric system. To understand why the metric system has been accepted as the common language of measurement throughout the world, it is important to understand the history of the metric system and how the system works.

The first man to propose the logical systematization of units of weights and measures was the French mathematician and astronomer, Gabriel Mouton (1618–1694), rector of St. Paul's Church, Lyons. In his book *Observations Concerning the Diameter of the Sun and the Phases of the Moon* (1670), Mouton suggested that a decimal system be used for units of measurement, having as a basis the length of an arc of one minute of a great circle of the earth.

During the next century, the idea of a decimal system of measurements spread and found favor with many scientists. It is a telling point, however, that not until the time of the French Revolution, when a new social order was established, were the majority of Frenchmen willing to discard their traditional weights and measures in favor of the more efficient metric system.

On May 8 1790 the National Assembly of France ordered the French Academy of Sciences to develop a new standard of weights and measures. The chief supporter of this decree was the revolutionary bishop of Autun, Charles Maurice de Talleyrand (1754–1838). The following year, the National Assembly named a commission of twelve reputable scientists to lay plans for the revision of the measurement system. Most of their attention was given to revision of units of mass and length, which were to be derived from some natural measure, such as the dimensions of the earth, and were to be based on the decimal system. The unit of length in the new system, the meter, was to be a ten-millionth part of the quarter-meridian (a hypothetical line from the North Pole to the equator) passing through Paris. The unit of mass, the gram, was defined as the mass of a cubic centimeter of water at maximum density. As can be seen, the hope was to interrelate the units of length, mass, and capacity in order to simplify the various conversions necessary in using a weights-and-measures system.

The quarter-meridian had to be accurately measured. Two astronomers, Jean Delambre (1749–1822) and Pierre Méchain (1744–1804), were assigned the job. From 1792 to 1798 they measured the distance from Barcelona, Spain, to Dunkerque, France, and, with this work as a basis, calculated the remainder of the quarter-meridian. A standard meter and kilogram were then constructed, based on the two astronomers' measurement work, and presented to the legislative body in Paris. Called the *mètre des archives* and the *kilogramme des archives*, these fundamental units of the metric system were established as the legal standards of length and mass by the French National Assembly on December 10, 1799.

Much of the credit for encouraging the use of the metric system throughout Europe belongs to Napoleon (1769–1821), who, as a result of his military conquests, introduced the metric system into several countries. However, Napoleon delayed a complete changeover to the metric system in France by permitting, for political reasons, the old French units to be used again. Finally, in 1840 the French Parliament outlawed all weights and measures except those of the metric system. From that time until today there has been a gradual progression of metric usage throughout the world, fulfilling the hope of the system's founders that common measurement would lead to more efficient commercial transactions and exchanges of scientific information between nations.

Before 1840 Greece, the Netherlands, and much of Italy were using metric measurements. Between 1840 and 1870 most of the countries of Europe and South America embraced the metric system. It was adopted by Spain in 1849, and permitted in England in 1864, in the United States in 1866, and in Germany in 1868. Two years later, at the invitation of the French Government, representatives from the nations of Austria, Colombia, Ecuador, Great Britain, Greece, Italy, Norway, Peru, Portugal, Russia, Spain, Switzerland, Turkey, and the United States convened in Paris to discuss how the metric system might be improved. Halted by the Franco-Prussian War, the conference did not meet again until 1872, when it initiated the machinery to establish an international standardizing bureau of weights and measures.

In 1875 seventeen countries, including the United States, ratified the treaty known as the Metric Convention, creating the International Bureau of Weights and Measures. Each nation agreed to send delegates to a General Conference on Weights and Measures, which would meet every six years to consider improvements in and modifications of metric standards. An International Committee on Weights and Measures, composed of eighteen scientists who were elected by the General Conference, was charged with caring for the bureau's laboratory at Sèvres, near Paris, and with carrying on research to improve the measurements and definitions of metric standards.

From 1799 to 1889 the meter had been defined as the length of the *mètre des archives*, from end to end, as based upon a ten-millionth part of the quarter-meridian passing through Paris. It was thought, however, that less error would result by defining the meter as the length between two lines on a bar, so the International Prototype Meter, a platinum line standard, was approved as the new definition of a meter by the General Conference in 1889. A copy of the International Prototype Meter was then presented to all member nations of the Metric Convention.

As rapid industrialization made the twentieth century the age of technology, more and more nations joined the Metric Convention and adopted the metric system. Aside from a handful of small nations, the Commonwealth of Great Britain and the United States were the only major powers not committed to metric measures by the end of World War II. Meanwhile, the General Conference on Weights and Measures had grown to include almost all the nations of the world, and had made significant improvements in the metric system. In 1960 the General Conference formally added the ampere to the metric system as a unit of electrical current, the candela as a unit of luminous intensity, and the kelvin degree as a unit of temperature. The mole, a unit of amount of substance, was adopted by the General Conference in 1971. With the meter, kilogram, and liter, these units form the *Système International d'Unités*, universally abbreviated "SI." It is called by English-speaking peoples the *International System of Units*. Also significant at the 1960 General Conference was the redefinition of the meter as 1 650 763.73 wavelengths of the orange-red radiation of a krypton-86 atom. This definition allows a standard meter to be reproduced in any properly equipped physics laboratory.

It is ironic that the metric system, which is the most advanced system of measurement created by man, is still not generally employed in the United States, the most technologically developed nation of the world. As early as 1821, John Quincy Adams (1767–1848) had remarked to Congress on the consistency of the metric system. In 1866 the National Academy of Sciences urged its adoption. More than a century elapsed, however, before the matter was again seriously pursued by Congress. In 1968, by order of Congress, the Commerce Department undertook a three-year study to decide whether the United States should adopt the metric system. Released in 1971, the title of the study provided the answer: *A Metric America: A Decision Whose Time Has Come*. In his 1972 State of the Union address, President Richard Nixon urged Congress to pass a bill declaring that it be the national policy to convert to the metric system. The president felt that the metric system would "enhance our competitive position." It appears likely, therefore, that America will soon begin a ten-year conversion to the metric system, like Great Britain, which began such a program in 1965.

When the United States adopts the metric system of measurement, Americans will be faced with learning a new set of terms and working with units both smaller and larger than the familiar units they have used since childhood. A speed limit on a local highway may be 50 miles per hour now, but signs will soon appear warning drivers not to travel faster than the equivalent 80 *kilometers* per hour. By metric standards, a 150-pound person with a height of 5 feet 8 inches will weigh 70 *kilograms* and stand 172 *centimeters* tall. School children, during the lunch hour, will be served ½-*liter* cartons of milk instead of pint cartons. All these little things of life, which most persons seldom think about yet always need to know or use, will be affected by the changeover to the metric system. But this should not be disturbing, for the transition from the inch to the *centimeter*, from the foot to the *meter*, from the pound to the *kilogram*, etc. can be carried out smoothly—with preparation.

One fear that should be put to rest at once is that every man, woman, and child will be asked to immediately stop using the U.S. Customary System of measurements and begin using metric units. Congress has allowed for a ten-year conversion period, during which people will be educated about the metric system through posters, pamphlets, radio, and television. The changeover will proceed gradually, each individual working with metric units only as much as he wants or feels necessary. Government and private industry will set the pace, as new metric standards are fixed for such things as bottles, cartons, and cans. These will be marked, for most of the conversion period, as weighing so many pounds and ounces as well as so many kilograms and grams. Some measuring devices, the ruler and yardstick for example, are already often marked in metric units. Americans will not be asked to give up their scales, yardsticks, measuring tapes, or measuring spoons, and may keep using them throughout the ten-year conversion period until they are accustomed to metric units.

It is clear that the changeover to the metric system will have an enormous effect on the American economy, especially in the field of engineering. Many manufacturing firms will not want to replace expensive, working machinery with metric-designed machinery, and they should not be expected to do so. In fact, one of the good points of the proposed changeover is that private industry will not be forced to adopt metric units; rather, each entity's own readiness for the metric system will determine when and how it converts. In the manufacturing industries the general policy will probably be to begin using metric-designed equipment as the old equipment wears out.

The changeover will be simplified by the fact that many sectors of American society have already adopted the metric system. Film and camera equipment are made according to metric specifications. Long ago, the pharmaceutical industry stopped measuring drugs in drams, grains, and scruples, and is now using grams, milligrams, and milliliters. To service and repair the many foreign cars on American roads, automobile shops now have an array of metric-scaled tools. Almost all swimming pools are constructed according to metric standards, so that swimmers can train for international events. Scientists, of course, have been using the metric system for decades.

The use of metric measurements by Americans will greatly expand this country's overseas trade. Fully 90 percent of the world's population now uses the metric system, and as time passes, foreigners importing from the American market will be more apt to purchase merchandise measured in meters and grams than in feet and pounds.

Compared to the U.S. Customary System, the metric system is beautifully consistent and simple, and the American consumer will in time appreciate this simplicity when shopping for bargains in the supermarket. For example, when a consumer wishes to know whether to buy a 1 pound 3 ounce box of cereal for 89¢ or a 12-ounce box for 59¢, he must convert 1 pound 3 ounces to 19 ounces before he divides the prices of both boxes by their sizes and realizes that the larger box is the better buy. Such a tangle of arithmetic would be simplified

by the metric system, since the sizes of the boxes will be given in units related by the power of ten. To find out whether a 600-gram box at 38¢ is a better buy than a 1.2-kilogram box of cereal at 69¢, the same shopper need only consider the 1.2-kilogram box to be a 1200-gram box, and then perform the divisions to realize that the larger box is the better buy.

The foregoing example illustrates the basic principle of the metric system: units are related by multiples and submultiples of ten. To show this relationship, Greek prefixes are assigned to the multiples of the base units, while Latin prefixes are assigned to the submultiples. For instance, 10 meters equal a dekameter, 100 meters equal a hectometer, and 1000 meters equal a kilometer. *Deka-* indicates multiplication by 10, *hecto-* by 100, and *kilo-* by 1000. The submultiples of the meter follow the same logical pattern. Ten decimeters equal a meter, as do 100 centimeters and 1000 millimeters. The Latin prefixes *deci*, *centi-*, and *milli-* indicate division by 10, 100, and 1000 respectively. Changing 27.19 inches to feet and inches is an involved mathematical problem in the U.S. Customary System of measurement. But changing 27.19 meters to centimeters requires only moving the decimal point two places to the right.

Considering how much the metric system will enter into the daily lives of Americans, the cost of the changeover for most individuals will be surprisingly low. Necessary items for the most part will include a meter stick, a scale showing weights in kilograms, a scale showing weights in grams, a set of cylinders for measuring liquids in liters and milliliters, a Celsius thermometer, and measuring cups. Two useful aids for the person seriously interested in mastering the metric system are a pocket-sized metric conversion card and a metric conversion handbook. However, rather than working with the old units and then converting them to metric equivalents, a better way to learn the metric system quickly and thoroughly would be to start thinking metric and using metric units.

Man has come a long way since the early Egyptian farmers measured their fields by walking so many paces. The French scientists of the eighteenth century were bold in daring to construct a new system of weights and measures, based on decimal relationships. The U.S. Commerce Department, in its study entitled *A Metric America: A Decision Whose Time Has Come*, states: "Eventually the United States will join the rest of the world in the use of the metric system as the predominant common language of measurement." That prediction is yet to be fulfilled; but the time of the decision is close.

DEFINITIONS OF METRIC UNITS

Originally, metric units were based on prototypes—physical objects which represented the exact quantity of each unit. The prototype meter was a metal bar with two lines etched in it to show the length of a meter, and the prototype kilogram was a metal cylinder whose mass acted as the standard for all kilograms.

As technology advanced, it became apparent that these standards were not precise enough for exact measurement. The prototype meter, even when stored in conditions of stable temperature and humidity,, would still expand and contract measurably. In addition, each country espousing the metric system needed its own prototype meters, so the difficult task of duplicating the original prototype as exactly as possible was undertaken.

The prototype problem was resolved in 1960 by the Eleventh General (International) Conference on Weights and Measures. The conference endeavored to define the meter not only in terms that were utterly precise, but also in such a way that the exact meter length could be duplicated easily anywhere in the world. Because of these criteria, the definition of a meter could not be based on a physical object, so the conference defined it as a specific number of wavelengths of the radiation from the element krypton. Not only is this measure precise enough to satisfy all scientific requirements, but it can also be duplicated in any properly equipped physics laboratory in the world.

Today the krypton-wavelength meter is the basis of all linear measurements in the metric system. The only unit in the metric system still based on a physical object is the kilogram, the prototype of which is located in a subterranean vault under the International Bureau of Weights and Measures in Sèvres, France. This prototype is a platinum-iridium cylinder, about 39 millimeters in diameter. Many copies of this prototype have been made, and each copy is numbered and has a certificate of authentication. The United States possesses two of these prototypes—numbers 4 and 20.

THE SEVEN BASE UNITS

Meter (m):	The base unit of length. Equal to 1 650 763.73 wavelengths of the orange-red radiation corresponding to the transition between the levels $2p_{10}$ and $5d_5$ of the krypton-86 atom, taken in a vacuum.
Kilogram (kg):	The base unit of mass. Equal to the mass of the International Prototype Kilogram, kept by the International Bureau of Weights and Measures in Sèvres, France.
Second (s):	The base unit of time. Equal to the 9 192 631 770 periods of the radiation corresponding to the transition between the two hyperfine levels of the ground state of the cesium-133 atom.
Ampere (A):	The base unit of electric current. Equal to the amount of current which, if maintained in two straight parallel conductors of infinite length, of negligible circular cross section, and placed 1 meter apart in vacuum, would produce between these conductors a force equal to 2×10^{-7} newton per meter of length.
Kelvin (K):	The base unit of temperature. Equal to the fraction 1/273.16 of the thermodynamic temperature of the triple point of water, and starting at absolute zero ($-273.16°C$) and advancing at increments equal to those used in the Celsius (centrigrade) scale.
Mole (mol):	The base unit of amount of substance. Equal to the amount of substance of a system that contains as many elementary entities as there are atoms in 0.012 kilogram of carbon-12.
Candela (cd):	The base unit of light intensity. Equal to the intensity of 1/600 000 square meter of a blackbody radiator at the temperature of the solidification of platinum (2045°K) under a pressure of 101 325 newtons per square meter.

THE TWO SUPPLEMENTARY UNITS

Radian (rad):	The base unit of the plane angle. Equal to a plane angle with its vertex at the center of a circle that is subtended by an arc equal in length to the radius.
Steradian (sr):	The base unit of the solid angle. Equal to a solid angle with its vertex at the center of a sphere that is subtended by an area of the spherical surface equal to that of a square with sides equal in length to the radius.

METRIC PREFIXES

The three most commonly used quantities of the metric system are the meter, the gram, and the liter. Prefixes, based on the power of 10, provide multiples and submultiples when added to these units. For example, *kilometer* means meter times 10^3, or 1000 meters; and *centimeter* means meter times 10^{-2}, or $\frac{1}{100}$ meter. (For an explanation of scientific notation, see "Conversion Factors," page 17.) In the chart below, symbols are listed in parentheses.

SOME DERIVED METRIC UNITS

There are seven base units (ampere, candela, kelvin, kilogram, meter, mole, and second) and two supplementary units (radian and steradian) which can be considered to be the fundamental units of the metric system. These units are adequate for most nonscientific measurements, but the metric system has also incorporated many units of specific quantities used in scientific work. These additional units are derived from the base metric units.

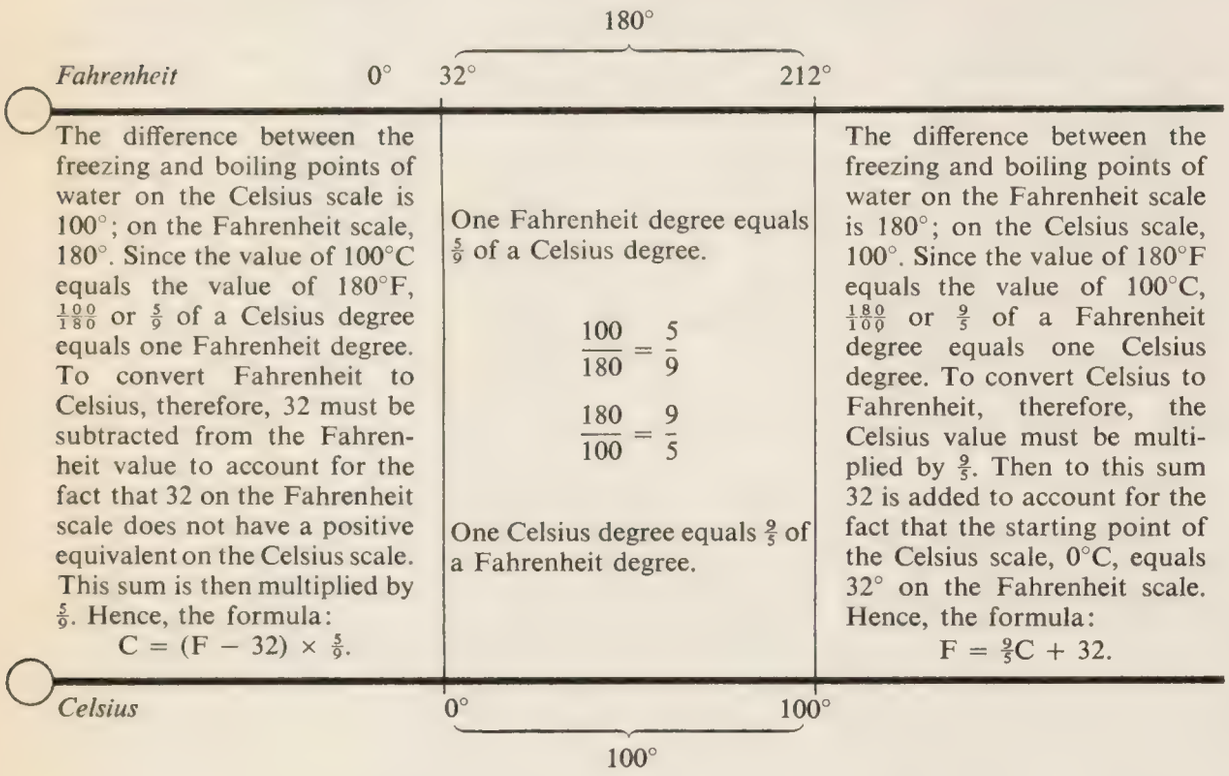
COMPARISON OF METRIC UNITS WITH U.S. CUSTOMARY UNITS

Since there is no obvious similarity between the metric system units and the United States Customary System units, it is sometimes confusing, when converting from one system to the other, to decide which units are roughly equivalent. The intrinsic simplicity of the metric system makes this a fairly easy problem to solve.

The metric system reserves one unit for each quantity: length in meters; volume in cubic meters; capacity in liters; weight in grams. Therefore, all quantities can be expressed by using one of these units or a division of one of these units (see list of prefixes on page 11). When compared to the metric system, the quantities in the United States Customary System are illogical and disorganized: length in inches, feet, yards, or miles; area in square inches, square feet, square yards, acres, or square miles; volume in cubic inches, cubic feet, or cubic yards; capacity in fluid ounces, pints, quarts, pecks, bushels, or gallons; weight in grains, ounces, pounds, or tons.



The chart below lists both the most common United States Customary units and the most common metric quantities. A complete list of all metric units is on page 10. Conversion factors for all these units begin on page 17, and an explanation of metric cooking terms is on page 14.

TEMPERATURE EQUIVALENTS

The United States Customary System of Measurement employs the Fahrenheit scale in temperature measurement. In this scale, the freezing point of water is 32° and the boiling point of water is 212°. This differs significantly from temperature measurement in the metric system, which uses the Kelvin and Celsius (formerly Centigrade) scales. In both of these metric scales, the graduations are exactly the same, but zero in the Kelvin system is at absolute zero (−273.16°C) while zero in the Celsius scale is at the freezing point of water. The formulas below show how to compute temperature equivalents in all three systems.

Fahrenheit to Celsius $C = \frac{5}{9}(F - 32)$	Kelvin to Celsius $C = K - 273$	Celsius to Fahrenheit $F = (\frac{9}{5}C) + 32$
Fahrenheit to Kelvin $K = \frac{5}{9}(F - 32) + 273$	Kelvin to Fahrenheit $F = \frac{9}{5}(K - 273) + 32$	Celsius to Kelvin $K = C + 273$

METRIC QUANTITIES USED IN COOKING

It is thought that when the United States adopts the metric system cooks will be forced to give up many kitchen utensils, such as measuring spoons and cups, pint- and quart-sized jars and pitchers, 9-inch pie and cake pans, and the Fahrenheit cooking thermometer. But the actual changeover to the metric system will be quite simple.

To cook the metric way, all that needs to be purchased for use in the kitchen are a Celsius thermometer, a scale with readings in grams and kilograms, and a cylinder or set of cylinders for measuring in milliliters and liters rather than cups, quarts, and fluid ounces. During the ten-year conversion period, both metric utensils and the more familiar U.S. Customary utensils will be used side by side. New cookbooks will gradually begin using metric measurements, but almost every cookbook will also provide U.S. Customary measurements. As people become accustomed to cooking the metric way they will be in less need of nonmetric measuring utensils, but they may continue to use them. The charts below are designed to help those cooks who wish to continue using U.S. Customary measurements and for those who, in the early stages of the metric conversion period, are still uncertain of metric quantities used in cooking and want to know what the equivalent U.S. Customary measurement is.

SPECIAL LOCAL UNITS

For the world traveler and tourist, the special measurements of each nation can often cause awkward problems, especially in those small neighborhood pubs, shops, and restaurants which the tourist so often seeks out to avoid the rush of the city. Even though the metric system has been adopted by all European countries and most other nations of the world people cling to the familiar: Austrians still order a *seidel* of beer, Chinese measure distances by the *li* as well as the kilometer, French-Canadians speak of *pieds* and *pouces*, and Americans will probably eat foot-long hot dogs at fairs and picnics long after the United States adopts the metric system. In short, the traditional units of measurement continue to be used side by side with the metric system.

These traditional units of measurement are often as hard for the tourist to unravel as the metric system is easy to understand. Most English-speaking persons know that sixteen ounces equal a pound and that thirty-six inches equal a yard, but few realize the length of a Greek *pecheus*, the capacity of a Malaysian *chupak*, or the weight of a Polish *funt*. Nor can Greeks, Malaysians, or Poles be expected to know how the English system of measurement works. It is not necessary for the tourist to know all the special local units of each country he visits. Rather, a working knowledge of the basic units he will most likely encounter would prove helpful and convenient. Such is the purpose of the list below: to acquaint the world traveler, tourist, student, or person generally interested in systems of measurement with a few special local units he might one day need to know.

Certain units should be noted. The pound, for example, is common to most European countries, being called a *zollpfund* in Germany, a *pond* in the Netherlands, a *pund* in Norway, a *funt* in Poland, and a *founte* or *funt* in the Soviet Union. The word ultimately derives from the Latin *pondus*, meaning weight. Examples of other measures shared by many countries are the ounce, the *livre*, and the foot. The *catty*, variously called *gin*, *kin*, *kon*, or *kati*, is found in most Far Eastern countries. Some nations, such as Turkey and the Netherlands, have adopted the metric system, but assigned traditional names to the metric units. In the list, each unit is followed by its equivalent in both metric and U.S. Customary units.

METRIC CONVERSION FACTORS

All of the conversion factors in this table are given to at least four decimal places and some are given to six decimal places. This will give a degree of accuracy of at least 99 percent in all conversions, which is adequate for all but the most precise mathematical computations.

All measurement units are listed alphabetically on the left-hand side of the following columns. To use the tables, first locate the unit in the left column, then locate the alternate unit in the middle column and multiply the first unit by the factor in the right column. For example, to convert 12 inches to centimeters, find inches in the *To Convert* column and centimeters in the *Into* column. The conversion factor, listed in the *Multiply by* column, is 2.540, so 12 inches equals 30.48 centimeters (12 × 2.540 = 30.48).

Note: Unless otherwise indicated, the units of measure listed below are U.S. Customary units.

Scientific notation is easy to use and easy to understand. Just as 10^2 is 10 × 10 (100) and 10^3 is 10 × 10 × 10 (1000), so also 10^5 is 10 × 10 × 10 × 10 × 10 (100 000), and so on. 10^1 is simply 10, and 10^0 is by definition 1. These multiples of 10 are called *positive exponents.*

Working with submultiples of 10 can be easy, too. 10^{-1} is simply .1, or one tenth. Just as 10^{-2} is .1 × .1 (.01) and 10^{-3} is .1 × .1 × .1 (.001), so also 10^{-5} is .1 × .1 × .1 × .1 × .1 (.00 001), and so on. These submultiples of 10 are called *negative exponents.*

When beginning to work with positive and negative exponents, perhaps the surest way to know what is happening is to count out the decimal places. The chart below illustrates the process for the numbers 2.9 and 8.1.

$2.9 = 2.9 \times 10^0$	When multiplying a number by 10^x, where x is a *positive* number, move the decimal point to the *right* x number of places. For example, 2.9×10^2 has the decimal point moved 2 places to the right, equaling 290.	$8.1 \times 10^0 = 8.1$
$29.0 = 2.9 \times 10^1$		$8.1 \times 10^{-1} = 0.81$
$290.0 = 2.9 \times 10^2$		$8.1 \times 10^{-2} = 0.081$
$2\,900.0 = 2.9 \times 10^3$		$8.1 \times 10^{-3} = 0.008\,1$
$29\,000.0 = 2.9 \times 10^4$	When multiplying a number by 10^x, where x is a *negative* number, move the decimal point to the *left* x number of places. For example, 8.1×10^{-2} has the decimal point moved 2 places to the left, equaling .081.	$8.1 \times 10^{-4} = 0.000\,81$
$290\,000.0 = 2.9 \times 10^5$		$8.1 \times 10^{-5} = 0.000\,081$
$2\,900\,000.0 = 2.9 \times 10^6$		$8.1 \times 10^{-6} = 0.000\,008\,1$

PLACES OF INTEREST IN THE UNITED STATES AND ITS POSSESSIONS

ALABAMA

Cathedral Caverns. These deep, immense caverns, located near Grant, contain numerous brilliantly colored calcite formations. Goliath, the largest stalagmite in the world, 60 feet high and 200 feet wide, is found here. Cathedral Caverns is one of four major caverns in northern and central Alabama. Most cavern areas provide camping and other facilities.

Dadeville. Near this town, Andrew Jackson fought the Battle of Horseshoe Bend in 1814 against the Upper Creek Indians that ended the power of the Creek nation. This battle is electronically reproduced in miniature several times each day. Fifteen miles away is the battle site itself in Horseshoe Bend National Military Park.

Cathedral Caverns, Inc.

The largest stalagmite in the world, appropriately named Goliath, is located in the Cathedral Caverns in Grant, Alabama.

Huntsville. This is a city of firsts. It was the first permanent English settlement in Alabama, the home of the first state constitution, and the site of the inauguration of the first state governor and the first session of the state legislature. Points of interest are numerous ante-bellum houses, churches, and the space center. Redstone Arsenal in Huntsville is one of the world's major centers for rocket production. In the George C. Marshall Space Flight Center are many exhibits to keep children amused and puzzled, while adults are attracted by informative displays and literature.

Mobile. A seaport town and the location of Alabama's first permanent white settlement, Mobile is noted for its Civil War history. In the surrounding locale are many forts dating from the Civil War or before. Fort Alabama has an excellent museum covering 200 years of Alabama history. Twenty miles south on Dauphin Island in Mobile Bay is Fort Gaines, built in the 1850's on orders from Secretary of War Jefferson Davis. Fort Morgan, star-shaped and noted for its excellent architecture, is located just across the mouth of the bay; it was the last Confederate fort to fall to the North and bloodstains of an anonymous Confederate soldier are still visible on its granite steps. Many gardens and parks as well as preserved and restored ante-bellum buildings are found in and around Mobile.

Montgomery. Here in the capital, many of the historic state buildings are open to the public. Worth seeing are the Capitol Building, where Jefferson Davis was inaugurated; the first Confederate White House; and the Department of Archives and History, in the capitol complex. Nearby are the Governor's Mansion and Teague House, the Chamber of Commerce building.

Mound State Monument. Situated near Moundville is Mound State Monument, a group of 40 temple mounds built by Indian residents of Alabama 600 years ago. The exhibits in the museum show that these Indians were among the most advanced tribes north of Mexico. The park, which covers 320 acres, is an interesting place to visit, to see the mounds, or to search for broken bits of pottery made before the arrival of white men in America.

Selma. The main attraction in the city is Sturdivant Hall, designed by Thomas Helm Lee, Robert E. Lee's cousin. Sturdivant Hall is one of the South's best neoclassical constructions. It has been expanded into a museum, and is furnished with Persian rugs, English furniture, and cut-crystal chandeliers. One of the most popular displays is the collection of antique dolls.

Tuscaloosa. This is the home of the University of Alabama. The beautiful campus was set on fire during the Civil War. Only four buildings remained standing, including the only military installation on campus, and they still attract visitors. The Museum of Natural History in Smith Hall with its many informative and delightful displays is a favorite with visitors. The city also offers many other interesting prewar structures, including the Friedman Library and Friedman Home.

ALASKA

Anchorage. This is the largest city in Alaska, and was once the headquarters of the Willow Creek gold district. South of Anchorage is Mt. Aleskya, a winter sports area. Katmai National Monument on the Alaska Peninsula includes Mt. Katmai, an active volcano, and the Valley of Ten Thousand Smokes. Kenai Peninsula, south of Anchorage, offers excellent hunting and fishing and beautiful scenery.

Fairbanks. Gold mining and lumbering are two of the principal industries of this city. Points of interest include the Ester Creek gold operation and the University of Alaska with its museum. Fairbanks is a departure point for trips on the Chena River and to Chena Hot Springs which can only be reached by air. Good hunting and fishing is available in this area; big game hunting, with a licensed guide, is legal in some seasons.

Juneau. The state capital, Juneau, is the third largest city in Alaska. Popular public attractions are the Mendenhall Glacier, and the Alaska Historical Library and Museum, which contains Eskimo antiquities, Russian documents, and other exhibits. The major industry is gold mining; two principal locations for mining are the Alaska-Juneau gold mine and Gold Creek, located on Mt. Roberts.

Pacific Northern Airlines

Twin Glacier Lake, southwest of Anchorage, Alaska, is named for the two glaciers—one at the base of each of the twin mountain peaks. About 3 percent of Alaska is glaciated.

Mt. McKinley National Park. Mount McKinley, the highest mountain in the United States, extends 20,320 feet above sea level. Unexplored ice-capped domes rise above mossy vegetation near the glaciers. The park is a wildlife preserve.

Nome. Located on the Seward Peninsula, Nome is the starting point for trips into

the upper regions of Alaska. Gold, silver, and other valuable minerals are found and mined here. It is accessible mostly by plane; few good roads are in the area.

ARIZONA

Grand Canyon. This natural masterpiece is, in the words of Teddy Roosevelt, "the one great sight every American should see." Ten million years of river, rain, wind, and frost have dug this mile-deep, 217-mile long, and 4- to 18-mile wide chasm in northern Arizona. At the bottom of the canyon is the raging Colorado River. The Grand Canyon is a spectacular display of rocky mountain peaks and constantly changing colors. The North Rim affords many fine views, notably Bright Angel, Point Imperial, and Cape Royal. On the South Rim there are Mather Point, Maricopa Point, Yavapai Point, and other viewing spots. Bright Angel Trail leads to the canyon floor. Within the Grand Canyon National Park are tourist and camping facilities, some of which are open all year.

Union Pacific Railroad

Bright Angel Point, on the rim of the Grand Canyon in Arizona, offers an excellent view of this spectacular area. The Grand Canyon was declared a national park in 1919.

Hoover Dam. Built on the Arizona-Nevada state border (1931–36) and spanning the Colorado River, the Hoover Dam produces great amounts of hydroelectric power for the surrounding states, holds water for irrigation, and forms Lake Mead, the largest man-made lake in the United States. Lake Mead provides fine waters for fishing and water sports.

Jerome State Historic Park. A picturesque town, Jerome had active mining operations as recently as 1952; then, operations suddenly ceased and it became a ghost town. Citizens who remembered the boom days formed the Jerome Historical Society and created the attractive ghost town, complete with museums, old buildings, and tours of abandoned mines.

Navajo National Monument. The Monument, near the Utah border, contains three points of particular interest: Betatakin and Keet Seel, which are the ruins of dwellings where Indians lived 700 years ago; and Inscription House, a trading post from early pioneer days. The Monument is only a small part of the Navajo-Hopi reservation which occupies the northeastern corner of Arizona. This is one of 19 reservations in Arizona. Most of the Indians welcome visitors and will guide them through the reservations. The public may also attend many of the Indian ceremonies and festivals. Handicraft products are available in reservation shops and trading posts.

Petrified Forest National Park. This is one of the world's vastest stretches of beautifully colored petrified wood. It includes six individual forests, each with huge logs—some up to 250 feet long—lying on the ground.

Phoenix. The capital and largest city of Arizona, Phoenix has increased its size more than five times since 1950. The warm climate contributed to this rapid growth and is of prime importance to the many retirees who have settled here. Phoenix, however, has something of interest for almost everyone. Spectator and participation sports are in season the year round. Points of interest include Arizona State University, the State Capitol Building and other state buildings, and the Library of Archives. There are also a number of museums, including the Heard Museum and the American Heritage Wax Museum in Scottsdale. In the surrounding area are many parks and gardens.

Tombstone. A boom town of the gold rush days, Tombstone is now a quiet, sedate town. It is probably best known because of the Earp brothers' participation in its development, and the gunfight at the O.K. Corral. This episode is reenacted each year in October during the Helldorado Days. Many of the old buildings are still standing, including the office of Tombstone's newspaper, the *Epitaph*, and the Birdcage Theater. Other popular tourist attractions are Boot Hill and an old mine where silver abounds but is unreachable because of flooding by an underground river. There are more than 30 ghost towns in Arizona. In many, among remains of diggings, small pieces of gold and other precious metals are often found. A visit to such places will prove exciting and rewarding, though possibly dangerous. For the adventurous, there are many legendary hidden treasures, including the famous Lost Dutchman Mine.

Phoenix Chamber of Commerce

Montezuma Castle National Monument, north of Phoenix, is one of Arizona's best-preserved Indian cliff dwellings.

Tucson. Tucson is a popular winter resort area and a rapidly growing southwestern city. Here the University of Arizona offers theater, speakers, and art shows to the residents of Tucson. Old Tucson, a recreation of a section of the city as it existed in 1860, is interesting to visit. Exhibits relating to the history of the state are on display in two museums: the Arizona State Museum and the Arizona Pioneers Historical Society.

ARKANSAS

Arkansas Post State Park. In 1686, the white men who explored this area made it one of the first permanent settlements in the Mississippi Valley. In 1819, after being part of the Louisiana and Missouri territories, the settlement became the capital of the newly created Arkansas Territory. It is now known primarily for its historic ruins.

Hot Springs National Park. This is the oldest national park in the United States. Of its 47 hot mineral springs, 45 are sealed so the waters can be conditioned and supplied to the park's bathhouses. Bathhouse Row in the park offers whirlpool baths and massages. Local physicians registered with the federal government recommend patients for hydrotherapy at the Libbey Memorial Physical Medical Center, also located in the park. Facilities are also available for fishing, boating, golf, horseback riding, and hiking.

Little Rock. This is the state capital and the largest city in Arkansas. The present Capitol Building, containing the State History Museum, was preceded by two others—the State House which is now a

museum, and the Territorial Capitol which has been completely and authentically restored. Little Rock's MacArthur Park, commemorating the birthplace of General Douglas MacArthur, contains museums of natural history and fine arts.

The Ozarks. These mountains extend from the southern part of Missouri to northern Oklahoma and Arkansas. Their highest ranges are in Arkansas. Caves, great forests, clear streams, and lakes make the Ozarks a popular attraction. Bull Shoals Lake and Mammoth Springs are great attractions in northern Arkansas. Eureka Springs, a health resort known for its mineral waters and also for its many limestone caves, is located northeast of Fayetteville, the location of the University of Arkansas.

Petit Jean State Park. The park, located on Petit Jean Mountain, is a good vacation spot and place for outdoor recreation. It offers many natural attractions, including Pioneer Cabin, Cedar Falls, and Bear Cave. Lake Bailey has facilities for fishing and other water sports.

CALIFORNIA

Death Valley. Named in 1849 for pioneers who died there, Death Valley was declared a national monument in 1933. Badwater, in Death Valley, is 282 feet below sea level, and is the lowest point on the North American continent. Only 80 miles west of Death Valley is Mt. Whitney, the highest point in the contiguous United States.

Humbolt Redwoods State Park. The home of the world's largest trees, the redwoods, Humbolt Redwoods State Park is a part of the Redwood Empire that extends from the middle of California north along the coast to southwestern Oregon. Two species of redwood still exist: the coastal and the Sierra redwoods. In Humbolt Bull Grove stands one of the tallest redwoods in the coastal area, 364 feet high. Southeast of the state park, in the Sierra Nevada range, are two Sierra redwood national parks, Sequoia and Kings Canyon. Some of the trees date back 3,000 years and have a diameter of 35 feet.

Los Angeles. Sometimes described as "nineteen suburbs in search of a city," Los Angeles is one of the most modern cities in the country. Its new central-core development program will include buildings for the arts, as well as beautiful and functional office and municipal buildings. The Olvera Street section with its interesting old shops and restaurants is the home of the original city. One of the city's most famous streets is Wilshire Boulevard; lined with modern shops, stores, and offices, it leads to residential areas where fine homes and beautiful gardens abound. The University of Southern California and the Los Angeles branch of the University of California are here, with their museums and other facilities for the public. Located on the Pacific Ocean, Los Angeles has innumerable beaches with some of the world's best swimming, sunning, surfing, and fishing. The freeway puts Hollywood, movie capital of the world, a few minutes away. Universal City provides tours of its studios. Near Hollywood is Beverly Hills where many of the stars' homes are located. Farther inland are Pasadena, home of the New Year's Day Rose Parade and Rose Bowl Football Classic, and San Marino with the Huntington Library and Art Gallery. Anaheim is the home of the perennially favorite Disneyland, the land of imagination.

Missions. Some of the 21 missions which the Spanish built during the early colonization of California remain today. These missions were built along the coast between San Diego and Sonoma. One of the best preserved is the San Luis Rey Mission. The San Juan Capistrano mission is where the swallows return with extreme regularity each year.

Monterey. This is a beautiful city on the bay with many old buildings reflecting its Spanish heritage. It was under Spanish and Mexican rule before becoming a part of the United States. Cannery Row, which novelist John Steinbeck made famous, is located here. Carmel, on the Monterey Peninsula, is a quaint town noted for its art galleries and many interesting shops, and is a popular spot with artists and writers as well as with tourists. The drive from Monterey to the Big Sur area is one of the most beautiful in the United States. It passes along the cliffs of the Pacific shoreline, and the ocean can be seen and heard pounding the rocks below. Point Lobos

Surf, sand, and mild climate along the Pacific Ocean near San Diego, California, provide outdoor recreation, such as swimming and surfing, throughout the year.

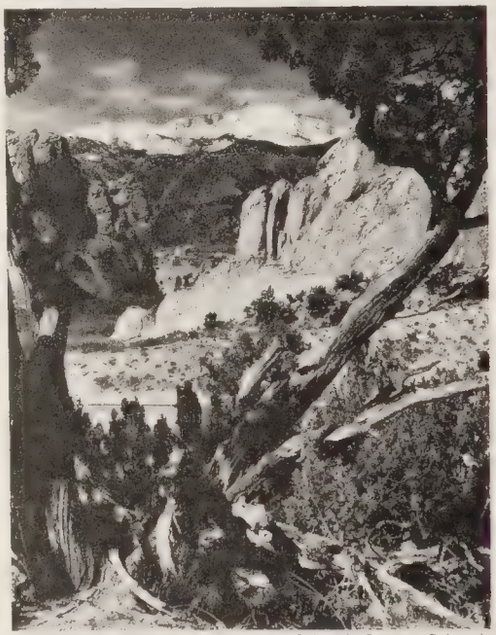
Reserve, located in this area, comprises 1,250 acres of land maintained as a wildlife sanctuary.

Sierra Nevadas. The great Sierra Nevada mountain range stretches along the eastern edge of the state and provides an excellent opportunity for sports the year round. Lake Tahoe, within these mountains, has facilities for swimming, boating, and fishing in the summer and skiing in the winter. Squaw Valley, site of the 1960 Winter Olympics, provides some of the best skiing in the world and, in the summer, has facilities for hiking, camping, tennis, and riding. Deep within the mountains is the Mother Lode, a rich vein of gold. Visitors may still pan for gold in these hills.

Sacramento. The capital of California, Sacramento is located in the central valley of the state. The Capitol Building, which can be seen from miles away, is considered by many to be one of the finest such structures in the United States. Points of interest in Sacramento are the Crocker Art Gallery, one of the best in the United States; the restored Sutter's Fort where Captain John Sutter began a settlement in 1839; and in nearby Coloma, Sutter's Sawmill, the site of the first gold discovery in 1848.

San Diego. One of this city's major attractions is Balboa Park which covers 1,400 acres and includes museums, art galleries, arcades, and the famous San Diego Zoo. A major United States naval training center is located here. Old Town, an interesting section of San Diego to visit, is the original site of the city and of the Mission San Diego de Alcala, which is now located outside of the city. Replacing the mission in Old Town is the Sierra Museum. Other points of interest in the San Diego area are Mount Palomar, 55 miles away, site of the world's largest telescope; Point Loma, site of the Cabrillo National Monument; and the Old Spanish Lighthouse, which marks the spot where explorers first set foot in California. Tijuana, south of the nearby border, and Coronado, the year-round vacation resort across San Diego Bay, are also of interest. In nearby Mission Bay is Sea World, a seaquarium with many ocean animals. The whole Mission Bay area is a seaside playground, and is only a small part of the 70 miles of shoreline of San Diego County.

San Francisco. Built on hills, San Francisco is one of the most beautiful cities in the United States. Picturesque cable cars provide an enjoyable ride and a look at the city's many interesting views. Some of the more popular viewing locations are Coit Tower on Telegraph Hill and the Twin Peaks Scenic Drive. Across the Golden Gate, a strait between San Francisco Bay and the Pacific Ocean, is the famous Golden Gate Bridge connecting San Francisco with Marin County; another beautiful bridge is the Bay Bridge across San Francisco Bay, leading to Oakland and to Berkeley, the location of the main campus of the University of California. The most famous sections of the city are Fisherman's Wharf, North Beach, and Chinatown. Other attractions are the Civic Center, Dolores Mission, and Golden Gate Park, which contains the Steinhart Aquarium and DeYoung Museum. A variety of life styles is typical of the city. Night life of every kind can be found in over 2,500 restaurants and numerous clubs and theaters.



Yosemite National Park. This beautiful national park is set in the Sierra Nevada mountains in eastern California. In spring and summer, waterfalls and wildlife provide spectacular views, while in fall and winter, snow blankets the mountains, providing excellent skiing conditions. The park contains 700 miles of trails to explore. The longest drop of waterfall is 2,425 feet from the Upper Fall to the base of the Lower Fall. One of the favorite summertime events staged for tourists is the Firefall in which a great log is burnt to embers, then pushed over the rim at Glacier Point, falling to a ledge 1,000 feet below in the valley.

COLORADO

Aspen. Aspen is located on Roaring Fork River just west of the Continental Divide. Although it is known primarily for its wonderful skiing facilities, that is by no means its only attraction. During the summer, Aspen is one of the cultural centers of the West, hosting major music festivals in its new music center. There is also ample opportunity for fishing, hiking, and sightseeing.

Boulder. Boulder is the location of the University of Colorado and is the site of the first schoolhouse in the state. Nearby are Boulder Canyon, Roosevelt National Forest, and Rocky Mountain National Park.

Central City. The first gold mining town to spring up in the Rockies, and once called "the richest square mile on earth," Central City is now a ghost town. Some of the old buildings remain, however, and are open to the public. The old Opera House hosts the July Opera Festival.

Snow-capped Pikes Peak and red sandstone rock formations dominate the Garden of the Gods, near Colorado Springs, Colorado.

Colorado Springs. Colorado Springs is a famous resort town built on the Fountain and Monument rivers. Just outside the city is Pikes Peak, whose summit towers 14,110 feet. Points of interest in and around the city are the Garden of the Gods, a natural garden of rock formations; Cave of the Winds, where underground formations are mixed with eerie wind sounds; Manitou Springs; Seven Falls; Cheyenne Canyon; and the Will Rogers Shrine of the Sun Memorial. Colorado Springs is also the home of the United States Air Force Academy; its beautiful campus, set in the mountains, is distinguished by a multispired interfaith chapel. Southwest of Colorado Springs on the Arkansas River is the Royal Gorge, spanned by the world's highest suspension bridge.

A rancher distributes feed to cattle grazing near the Rocky Mountains outside of Walden, north central Colorado, one of the highest regions in the United States.

Denver. The state capital is known as the Mile-High City because it is 5,280 feet above sea level. Some attractions include the Colorado Capitol Building with its many pillars and golden dome, and the Museum of Natural History with its interesting and unusual planetarium. Also located here are the University of Denver, the United States Mint, and the Denver Union Stockyards. The nearby mountain parks include Park of the Red Rocks and Lookout Mountain, the site of Buffalo Bill's grave. Estes Park, a beautiful resort center, is northwest of Denver.

Dinosaur National Monument. Large deposits of dinosaur bones and other ancient animal fossils have been discovered here and are being preserved by paleontologists. Other national monuments in Colorado are the Great Sand Dunes, 57 square miles of white sand cradled in the Sangre de Cristo Mountains; and Black Canyon of the Gunnison, another wonder sculptured and painted by nature for thousands of years.

Mesa Verde National Park. About 1,600 years ago, cave-dwelling Indians built the first pueblo villages on this mesa, and many are still perfectly preserved; Cliff Palace is the largest and most famous of these dwellings. On the top of this mesa is the Sun Temple, with an ingeniously placed stone marking the vernal and autumnal equinoxes. There are also hundreds of dwellings in caves beneath the rim of the cliff; however, untutored hiking is prohibited, not only because the cliffs have been dangerously weakened by time, but also because unwary hikers might destroy or damage clues about the ancient inhabitants.

Rocky Mountain National Park. The park straddles the Continental Divide and is a haven for the nature lover. At a height of one and one half miles, forests of pine and fir abound; above the 11,000-foot timberline, grasses and alpine flowers grow. Many species of wildlife are common, including elk, deer, bighorn sheep, and mountain lions. Much of the spectacular natural scenery can be seen from Trail Ridge Road, a beautiful 44-mile long highway, 11 miles of which stretch above the timberline across the park to Grand Lake. There are also 200 trails which penetrate deep into the heartland of Colorado's mountains.

CONNECTICUT

Bridgeport. Birthplace of P. T. Barnum, the circus man, Bridgeport hosts the P. T. Barnum Museum, which contains circus mementos from Barnum's collection, as well as articles once owned by Tom Thumb and Jenny Lind. Other attractions in Bridgeport include Seaside Park and the Museum of Art, Science, and Industry.

Gillette Castle State Park. Designed and built near Hadlyme in 1913 by the actor William Gillette, the castle was originally called the Seventh Sister, for the series of hills on which it is built. There are 24 rooms in the castle, all reflecting Gillette's creativity. After Gillette's death in 1937, the executors of his will secured the status of a state park for the home. Today the 122 acres of his estate are open to visitors who may see the home, or hike, picnic, and explore the grounds, which contain the remains of a three-mile, full-scale railroad.

Hartford. The state capital, Hartford is located in the northern part of Connecticut. Points of interest in Hartford include the Old State House, designed by Charles Bullfinch; the Wadsworth Atheneum, an excellent art museum; and Constitution Plaza, one of the most modern and impressive urban renewal developments in the United States. A main attraction in the western part of Hartford is Nook Farm and the Nook Farm Research Library. Two noted writers' homes, the Mark Twain Memorial and the Harriet Beecher Stowe House, are in this area.

Mystic. Mystic seaport, a re-creation of the 19th-century maritime community, berths many ships, each with a unique and dramatic past; among them are the *Charles W. Morgan*, last of the New England whalers, and the *Joseph Conrad*, a training ship. Visitors may watch shipwrights working as they did a century ago. Many original buildings remain and some are still furnished as they were in the 1840's. Local museums house exhibits of sailing handicraft and equipment.

Newgate. Originally Simsbury copper mine, the buildings at Newgate came to be used, in 1773, as the first state prison in

Connecticut. After 50 years, the prison was abandoned and the buildings are now used as a museum.

New Haven. Points of interest in the city include various types of museums, such as the Winchester Gun Museum with weapons and firearms dating from the 1400's; the New Haven Colony Historical Society, featuring Eli Whitney's original cotton gin; and the Peabody Museum, with an excellent natural history collection. Yale University, the third oldest university in the country, is located here. Its excellent library and the Yale University Art Gallery are among the attractions seen on guided tours. A few miles from New Haven, in Stratford, is the American Shakespeare Festival Theatre, a replica of London's Globe Theatre.

DELAWARE

Dover. Dover was established as the capital of Delaware in 1777. Its historical points of interest include the Governor's House, which before and during the Civil War was a station of the Underground Railroad; the Hall of Records containing the state's public archives; and the John Dickinson Mansion. Dickinson, called the "Penman of the Revolution," wrote many important historical documents even before the Declaration of Independence was penned. Also of interest is the Delaware State Museum, which exhibits various phases of Delaware life. Located on the Dover Green, the Old State House is the second oldest building in the United States; built in 1792, it is still being used and is open to the public.

Lewes. Among the attractions in Lewes are the Zwaanendael Museum, built to commemorate the first Dutch settlement in Delaware and containing exhibits from colonial days, and Memorial Park with cannons from the War of 1812. Lewes Beach is one of many along Delaware Bay.

New Castle. New Castle's many historic homes and buildings give it a colonial atmosphere. Attractions include the Old Court House, the first Statehouse of Delaware; the Amstel House and the Old Dutch House, both of which are now small museums; and the Immanuel Church, built in 1703. West of the city is the Town Common, a farming grant which still yields revenue.

Wilmington. The largest city in Delaware, Wilmington dates back to 1638 when the Dutch settled at Fort Christina. There are many museums in the city. Old Town Hall, in governmental use from 1798 to 1916, was purchased by the Historical Society of Delaware and is now a museum containing exhibits which date back to the Revolutionary War. The Hagley Museum is located in the old DuPont Powder Company yards near Wilmington. Formerly a textile mill, the museum's main building now exhibits water wheels, papermills, tanneries, and the inventions of Oliver Evans. The steps followed in manufacturing gunpowder are demonstrated in another former industrial building. Also located in Wilmington is the Delaware Art Center. Perhaps the most elegant museum in the Wilmington area is the Henry Francis DuPont Winterhur Museum located just outside the city. The museum has over 100 rooms showing domestic America from 1640 to 1840. Ten rooms may be viewed without an appointment; the remaining rooms may be toured by appointment only.

DISTRICT OF COLUMBIA

Washington. Washington, the capital of the United States, is dominated by the White House on Pennsylvania Avenue. Blackened during the burning of Washington in the War of 1812, this official residence of the President was painted white at President Monroe's request. Visitors may now tour its public rooms daily except Sunday and Monday. Two impressive monuments are nearby: the Washington Monument with almost 900 stairs leading to the 500-foot level, providing a breath-taking view of the capital area; and the beautiful Jefferson Memorial across the Tidal Basin with its rounded, domed architecture reminiscent of Jefferson's home, Monticello. Northwest across the Basin is the Lincoln Memorial, a Grecian structure containing Chester French's seated statue of the 16th president. The texts of Lincoln's Gettysburg Address and Second Inaugural Address are inscribed in the granite walls of the shrine. West of the Lincoln Memorial is the Arlington Memorial Bridge leading to Arlington National Cemetery, and eastward is the reflecting pool beneath the Washington Monument. Many of the nation's best-known government buildings border the nearby Mall,

one of the world's most famous parkways. The Departments of Labor, Agriculture, and the Department of Health, Education and Welfare, as well as the National Archives, the Smithsonian Institution, and the National Gallery of Art are all in this area. The far east end of the Mall is dominated by the Capitol Building on Capitol Hill. Sessions of the Senate and the House of Representatives may be observed from visitors' galleries in the Capitol. Nearby is the Supreme Court Building, and across the street is the Library of Congress. Every book copyrighted in the United States is on file here. It also has a replica of the Magna Carta, Lincoln's draft of his Gettysburg Address, and Jefferson's first draft of the Declaration of Independence. The Folger Shakespeare Library, in the Library of Congress, has many works and documents on Shakespeare and a replica of London's Globe Theatre. Across the Potomac River from Washington is the Pentagon, the largest office building in the world, which houses the Department of Defense. Ford's Theater in downtown Washington, where President Abraham Lincoln was shot, has been restored for use and is also a museum of Lincoln memorabilia.

National Park Service

The white-domed Thomas Jefferson National Memorial, on the south bank of the Tidal Basin of the Potomac River, is one of the most beautiful buildings in Washington, D.C.

FLORIDA

Everglades National Park. This national park, the third largest in the country, is located at the southern tip of Florida. Once inhabited by the Seminole Indians, it was known only to hunters, explorers, and Indians as recently as 1915, when it became a state park. In 1947, it was named a national park, and today thousands of visitors can view more than 230 species of birds and many other species of wildlife here. Many areas of the Everglades have been developed for tours, trails, and exhibits, while other areas are still as wild as they were centuries ago. There are campgrounds in the park, and numerous places to stay in the area. A marina is available for people who wish to visit it by boat. Fishing and other water sports are permitted.

Key Largo. Having its land base on Key Largo in the Upper Keys is the John Pennekamp Coral Reef State Park, the first underwater park in America. This colorful park contains many species of coral and other sea life, which can be viewed from glass-bottom boats and explored by skin-divers. Numerous water sports can be enjoyed here. The park also offers a marina and camping facilities.

Key West. Key West, the southernmost city in the United States, is situated on the tip of the Florida Keys. The Overseas Highway traverses the entire length of the Keys and makes Key West accessible by car. It is a modern, but picturesque, city with commercial fishing and shrimping, and a large naval base. All of the Florida Keys offer opportunities for fishing, golfing, swimming, and sightseeing.

Miami and Miami Beach. Points of interest in Miami, Florida's largest city, include the Seaquarium, Monkey Jungle, Parrot Jungle, and Serpentarium. Also of interest are Hialeah Park and Race Track, with its flamingoes; streets lined with royal palm trees; the Miami docks; and the University of Miami at Coral Gables. Across Biscayne Bay reached by any of several causeways is the fashionable resort city, Miami Beach, where beautiful ocean-front hotels and motels host vacationers the year round.

Saint Augustine. Founded in 1565, Saint Augustine is the oldest city in the United States; reminders of its long history are everywhere in the city. Some points of interest are the Spanish Treasury, the Zero Milestone at the start of the trail to California, the Castillo de San Marcos, and the Cathedral of St. Augustine. Nearby is the Ponce de Leon Springs, where the Spanish explorer supposedly drank the waters of the Fountain of Youth.

Sarasota. Jungle Gardens, a world-renowned tropical garden, is one of the main attractions of Sarasota; it is also a bird sanctuary, where hundreds of birds can be seen in natural settings. The favorite attraction of Sarasota, however, is the trio of Ringling Museums, left to the state by John Ringling at his death in 1936. One is the Ringling residence, Ca'd'zan, built in the style of a Venetian palace; the interior and exterior are both extravagant and exquisite, costing $1.5 million to build in 1925. The Ringling Museum of the Circus contains relics of the business which made

Occasionally loan exhibitions are held in its new wing. The Ringling complex also contains the Asolo Theater, the official state theater of Florida.

Saint Petersburg. Situated on Florida's west coast is Saint Petersburg, the "Sunshine City." Because of its mild weather and daily sunshine, it is an ideal place for outdoor sports, including swimming and deep-sea fishing. Among Saint Petersburg's scenic attractions are the Sunken Gardens, acres of beautiful tropical gardens, birds, and flowers; Tiki Gardens, nearby at Indian Rocks Beach; and natural tropical jungles such as Fort De-Soto Park and Lake Maggiore Park.

Silver Springs. Silver Springs, near Ocala, is one of the world's major freshwater springs, and the largest in Florida. It offers tours of the jungle and of the underwater world, the latter in glass-bottom boats. The International Deer Ranch, with more than 300 tame deer from all over the world, is located near Silver Springs. Nearby are Rainbow Springs and Homosassa Springs.

Tampa. Located on Tampa Bay, this was originally a Spanish trading post and is now an industrial city. Favorite attractions in Tampa are the cigar-making factories, the beer breweries, and the tropical Busch Gardens.

GEORGIA

Atlanta. Atlanta was not settled until 1833, and did not assume the status of a capital until 1868. Points of interest in Atlanta are the State Capitol Building; the campus of Georgia Institute of Technology; and "Wren's Nest," Joel Chandler Harris's home. There are some 88 parks in the city, including Piedmont, Grant, and Lakewood. Near Atlanta is the huge granite Stone Mountain on which is carved the unfinished Confederate Memorial.

Bell & Stanton, Inc.

The skyline of Atlanta, Georgia, has been rapidly changing since 1960, when a major building boom resulted in the construction of many new major office structures.

Okefenokee Swamp. The swamp covers more than a 600-square-mile area. It is a marshy land covered with flowers and shaded by pine, bay, cypress, and gum trees. Within the area are panthers, deer, bear, and a variety of birds and fish.

Savannah. Savannah was founded in 1733 by James Oglethorpe. Now a modern city and important shipping point, Savannah has one of the oldest histories in the United States. Many colonial buildings have been carefully preserved. Among the historic points of interest are Johnson Square, where lies the grave of Nathaniel Greene, a Revolutionary War general; Mulberry Grove, General Greene's estate, where Eli Whitney invented the cotton gin; and Trustee Garden Village, on the waterfront, with many renovated houses and shops. Also of interest is the Owens-Thomas House Museum, an excellent historic museum. Savannah's historical past lies in a setting of wide streets, broken regularly by beautifully landscaped squares and parks.

HAWAII

Hawaii. Hawaii is the largest island of the state of Hawaii. Called also "Big Island," and "the Orchid Isle," it is an important orchid-growing center. The island was formed by volcanic mountains, some of which are still active; Mauna Loa erupted as recently as 1955. Among the attractions on the island is Hawaii Volcanoes National Park, the location of active volcanoes such as Kilauea Crater. Other features are the orchid nurseries around Hilo, pineapple canneries, and sugar mills. On the western side of the island is the Kona area with peaceful coves, native villages, and ruins of temples. Parker Ranch, a large cattle ranch, is in this area.

Kauai. This island, called the "Garden Island," was the first one known to western explorers. Captain Cook visited Kauai in 1778, when it was the only island which King Kamehameha had not conquered. It is the oldest and most eroded island of the group. Kauai receives more than 400 inches of rain annually and is covered with a luxuriant growth. Although there are several good beaches, most of the island is covered by the beautiful mountain Waialeale. Other attractions of the island are Waimea Canyon, Hanalei Valley, the Napali coast of precipices, and the Fern Grotto.

The Iao Needle rises in the western mountains on Mauri. Mauri is one of the eight principal islands of Hawaii.

Molokai. Human population is sparse and there is much wildlife on Molokai. The biggest industry is pineapple growing, which is confined mainly to the western half of the island. The eastern side is mostly fish ponds, and visitors can watch fishing here as it has been done since early times.

Oahu. Although third is size and fifth in height, Oahu is the main island of the chain. Honolulu, the island's largest city, is the state capital. One of the state buildings, the Iolani Palace, was originally the home of the kings of Hawaii. The University of Hawaii is located in this city. The city's harbor carries much tourist and commercial traffic. Military shipping goes to nearby Pearl Harbor where Battleship Row, the site of sunken and half-sunken ships, is a major attraction and reminder of the Japanese attack in 1941. Other features on Oahu are the Punchbowl Crater where the Pacific War Memorial National Cemetery is located, and Paradise Park, containing a rain forest, jungle trail, orchid jungle, native bird exhibits, and floral nurseries. Waikiki, east of the city, is a beautiful resort haven. Farther east is Diamond Head, a massive rock formation and famous landmark. Beaches ring the island and provide good surfing and other water sports.

IDAHO

Boise. This city, the largest in Idaho, is the state's capital. The State Capitol Building is an impressive sight, reaching a height of 195 feet at its dome. Reservoir lakes formed by dams such as the Arrowrock Dam offer water recreation in the vicinity of Boise. Bogus Basin is a popular ski area near Boise.

Coeur d'Alene. The city itself is a lumber and mining center, and headquarters for the Coeur d'Alene National Forest. The scenic attraction of the area is Lake Coeur d'Alene. Here hydroplane races held each year add excitement to the normally quiet area.

Craters of the Moon National Monument. Prehistoric lava flows and subterranean explosions formed the craters and crags of this area. Other natural phenomena in southern Idaho which have been created by lava flows and volcanic eruptions are the Thousand Springs near Buhl, Shoshone Falls east of Twin Falls, and Hot Springs Resort with its therapeutic hot mineral springs.

Hell's Canyon. This area, on the western border of Idaho, is also known as the "Grand Canyon of the Snake River." It is the deepest gorge in the country—deeper than the Grand Canyon—5,500 feet deep on the average and 7,900 feet at the deepest point. Four miles across, on the other side of the gorge, is Oregon. In the surrounding area is the Seven Devils Monument Park, a series of peaks which seem

forbidding but, although snow-capped all year, are easily accessible.

Nez Percé National Historical Park. This park in northern Idaho preserves the Indian lore of the Nez Percé Indians. One of the oldest tribes of American Indians, the Nez Percé have lived in the Kamiah Valley since prehistoric times. Important sites in the park are White Bird Battlefield, starting point of the 1877 Nez Percé War; Fort Lapwai, the major military base during the war; and Coyote's Fishnet, an important site in Nez Percé folklore. Lewis and Clark passed through this area on their journey to the Pacific Ocean; some sites in Nez Percé Park commemorate their journey.

Sun Valley. Located in central Idaho is Sun Valley, one of the world's best and most well-known ski resorts. Two mountains are available for skiing: Dollar Mountain with slopes for beginners as well as experts, and Baldy Mountain for more experienced skiers. An unusual summer feature at Sun Valley is the outdoor ice-skating rink.

ILLINOIS

Chicago. This city, the Midwest's largest, is the country's leading rail center. It is also served by water, land, and air routes, making it one of the nation's leading travel, transportation, and industrial cities. O'Hare International Airport serves the area. The southern part of the city is heavily industrialized, with steel and metal products the main industries. The downtown section of the city or "Loop" is a big business section which is bounded roughly by the encircling elevated tracks, from which the area takes its name. Here are many fine stores and office buildings, including the Merchandise Mart, Marshall Field & Co., the Prudential Building, and the Board of Trade. The new John Hancock Center just to the north of the Loop offers an excellent view of the city from the ninety-sixth floor. Cultural interests are served by a variety of museums, libraries, and societies: the Field Museum of Natural History, the Museum of Science and Industry, the Art Institute, Chicago Historical Society, the Chicago Academy of Sciences, and John Crerar Library. Lincoln Park includes both a zoo and a plant conservatory. The city offers many forms of entertainment including opera, symphony, theater, and ballet. For evening entertainment, there are many night clubs and cabarets. Sports are popular, and Chicago has professional teams in every major sport. One summer highlight is the College All-Star football game in Soldier Field. A popular spot is Old Town, the part of the city which survived the Great Chicago Fire of 1871, and where small shops and night entertainment are the primary attractions. There are many universities in the area: the University of Chicago in the Hyde Park section; Roosevelt University in the Loop; University of Illinois, Circle Campus, west of the Loop; Loyola University; De Paul University; and Northwestern University in Evanston. West of the city is the Brookfield Zoo, one of the country's best, with natural-habitat, barless enclosures.

Rock formations of great geological interest rise as high as 125 feet above the Illinois River in Starved Rock State Park, near La Salle, in northern Illinois.

Lincoln's time. The Old State House is also a memorial of two other giants of Illinois history, Stephen Douglas and Ulysses S. Grant. Northwest of Springfield is New Salem State Park. The park has facilities for camping, picnicking, and other outdoor activities, but it is best known for the 23 restored buildings from the mid-1800's. North of Springfield is the town of Lincoln, named for Lincoln before his presidency. A replica of the original Postville Courthouse, where he argued many cases as a circuit rider, is here. There are 12 other historic sites in Lincoln, including the Postville Park which Lincoln helped plan. East of Springfield is Decatur, where Lincoln was started on his way to the presidency. Today it is an important industrial center, but there are still many restored and rebuilt houses. North of Decatur is Champaign-Urbana where the main campus of the University of Illinois is located. East of Champaign is the Kickapoo State Park, a depleted strip-mining site that has been converted into a 1,600-acre recreational area.

Starved Rock State Park. The park gets its name from the large rock where white men besieged a group of Indians. Rather than starve, the Indians chose to leap to their deaths. La Salle, the French explorer, built a fort here in 1683 to guard the river. The park is a favorite vacation center in northern Illinois.

INDIANA

Brown County State Park. The beautiful Brown County State Park in south central Indiana is set in a hilly and wooded area. Nearby in Nashville is an art colony.

Evansville. Evansville has many reminders of Ohio River history, and this large old city is a good base for exploring the lush Ohio River Valley. Points of interest here are the Soldiers and Sailors Memorial Coliseum and Mesker Municipal Park. The Willard Carpenter Homestead is a good example of Georgian architecture.

Gary. This is one of the best known of the Indiana steel cities; most of Indiana's heavy industry is concentrated here and in the neighboring cities. Many of the steel plants offer tours for visitors. Just east of this area is Indiana Dunes State Park on Lake Michigan.

Indianapolis. This is the state capital and also the largest city in Indiana. In the center of the business district is Monument Circle, containing the Soldiers and Sailors Monument. Other points of interest include the Capitol Building; Indiana University Medical Center for Children, which has James Whitcomb Riley's poems illustrated on stained-glass windows and murals; and James Whitcomb Riley's home. Also of interest are the Scottish Rite Cathedral, a good example of old-world architecture, with its huge pipe organ and carillon; the World War Memorial; the Benjamin Harrison Home; the John Herron Art Institute; and the Children's Museum. An annual attraction is the Memorial Day 500-mile race at the Indianapolis Speedway outside the city. East of Indianapolis is Riley Memorial Park, a memorial to James Whitcomb Riley.

Nancy Hanks Lincoln Memorial. This memorial in southern Indiana marks the site of Nancy Hanks Lincoln's grave. She was the mother of Abraham Lincoln and died when he was nine years old. Here, too, is Lincoln's boyhood home; its fireplace has been reconstructed with the original stones. Nearby is Lincoln State Park and Lincoln Pioneer Village, the latter containing many reconstructed buildings, including Aunt Lepha McKay House, Gentry

Mansion, and Pigeon Creek Baptist Church.

Spring Mill State Park. Located in the southern portion of the state, this park features an old stone grist mill surrounded by a restored pioneer village. Here visitors may see meal ground by water power as it was done in the early 1800's. In addition to the buildings, there are acres of land and miles of trails to explore. There are also stalactite caves and an underground river.

Turkey Run State Park. This park, which is located in the north central portion of the state, is one of the most scenic in Indiana. It is known for its beautiful gorges, deeply carved in sandstone and covered with vegetation. Throughout the acres of forest are trails and campgrounds.

IOWA

Des Moines. The state capital is located on the Des Moines and Raccoon rivers. Points of interest in the city include the gold-domed Capitol Building; other federal and municipal buildings at the Civic Center; the State Historical, Memorial and Art Building, with displays from pioneer and Civil War times; and the campus of Drake University.

Effigy Mound National Monument. The monument is located along the western bank of the Mississippi River at Marquette near the Wisconsin border. The mounds, in the shapes of animals with some as long as 300 feet, were built by the Indians centuries ago. McGregor State Park and Pictured Rocks are nearby.

Fort Dodge. This replica of a government fort contains one of the best museums of Indian and pioneer history in the state. Originally built as a defense against the Sioux Indians, it now includes the museum, a curio shop, and a restored school house. Historically, Fort Dodge figured prominently in the Spirit Lake Massacre relief tragedy. A company of 125 perished here while returning from a vain attempt to help survivors of the Spirit Lake Massacre. Spirit Lake is now a popular resort area. Within a 25-mile radius are beautiful Lake Okoboji, Dolliver State Park, Indian Mound, and Twin Lakes, which offer boating, fishing, and swimming.

Red Rock Dam. This $80-million project has created the largest body of water in Iowa, Red Rock Lake, which provides both recreational and business opportunities. The dam itself is at the eastern end of the lake; around the shores are picnic, camping, and recreational facilities. Red Rock Refuge, on the lake, is an Iowa State Conservation Commission water fowl management area. The surrounding communities offer a variety of tourist and social diversions.

Sioux City. This industrial city in northwestern Iowa is a meat-packing center. Among the parks and monuments are Grand View Park, with a natural amphitheater where summer concerts are given; War Eagle Park, dedicated to the great Sioux Indian chief and containing his grave; and Floyd Monument, named after the first U.S. soldier to die west of the Mississippi. Farther down the Missouri River and overlooking Omaha, Nebraska, is Council Bluffs, the great meeting place of the Sioux nation. Museums and parks honoring the Sioux exist throughout the area.

KANSAS

Abilene. During the 1800's, this famous frontier cow town was the northern terminus of the Chisholm Cattle Trail. It is now better known as the home and burial place of Dwight D. Eisenhower, thirty-fourth president of the U.S. The Eisenhower Center, built here in his memory, consists of the Eisenhower Museum, containing a collection of his personal effects; the Eisenhower home, where he grew to manhood; the Eisenhower Library, one of the largest and most complete research centers in the Midwest; and the Meditation Chapel.

Chamber of Commerce, Dubuque, Iowa

Zebulon Pike Locks at Eagle Point Dam are near Dubuque, Iowa, on the Mississippi River. Dubuque is an important agricultural area and manufacturing center for farm machinery.

Dodge City. Dodge City is in the center of the wheat country. Located on the Arkansas River, it made an ideal watering and shipping place for cattlemen. Remnants of the Wild West can still be seen at Boot Hill Cemetery and along a replica of Front Street, the scene of many gun battles in the days of notorious outlaws and

famous lawmen. Dodge City was also the site of Fort Dodge, the base of operations in the Indian Wars. Here, as throughout the state, visitors can see memorials. Other memorial forts in the state are Forts Leavenworth, Scott, Larned, and Riley.

Chamber of Commerce, Topeka, Kansas

Lake Shawnee, a man-made lake which is ideal for fishing, swimming, and boating, is located in a park of 1,165 acres near Topeka, Kansas.

Kansas City. An important meat-packing center, Kansas City is located on the Missouri River, just opposite Kansas City, Missouri. Nearby are Wyandotte County Park and the Shawnee Methodist Mission.

Topeka. Divided by the Kansas River, the capital city has experienced several serious floods. Of interest in Topeka are the Menninger's Foundation, a center for the treatment of mental illnesses; the State Capitol Building with John Stuart Curry's murals of John Brown; Constitution Hall; the Kansas Memorial Building housing the State Historical Society's library and museum; and the Underground Railroad Station of Civil War days.

KENTUCKY

Abraham Lincoln National Historic Park. In this park, located just south of Hodgenville, is the reputed birthplace cabin of Abraham Lincoln. To the northeast, at Springfield, is the Lincoln Homestead, which includes the log house where Nancy Hanks, Lincoln's mother, lived. Nearby in Bardstown is the house where Stephen Foster's song "My Old Kentucky Home" was written.

Frankfort. The State Capitol and Governor's Mansion in Frankfort are structures typical of the Old South. The Old State House still remains, and is the headquarters of the Kentucky Historical Society. In the cemetery are the graves of Daniel and Rebecca Boone.

Lexington. In the center of the bluegrass region is Lexington, the second largest city in the state and home of the University of Kentucky. Horse-breeding farms in this area are open to visitors. Man o' War was raised here, and his statue stands at Faraway Farm.

Louisville. The largest and most industrial city in Kentucky is Louisville. Each year it hosts the Kentucky Derby at Churchill Downs, the most prestigious race for three-year-olds in the world. Noted buildings are the J. B. Speed Art Museum, the largest in the state; the Filson Club Library, specializing in state and regional history; and the American Printing House for the Blind, one of the largest of its kind in the world. Other points of interest are Iroquois Park, containing an amphitheater for musical programs; George Rogers Clark's grave; and the Haymarket, formerly a lively trading place for farmers.

Three Lions

Floyd Collins Crystal Cave in Mammoth Cave National Park in central Kentucky contains formations of onyx and crystal.

Mammoth Cave National Park. This park, located in west central Kentucky, is noted for its extensive caves containing passages, waterfalls, underground rivers, deep pits, two lakes, and stalagmite and stalactite formations. Guided trips, varying in length, are available. Features on the trails include Frozen Niagara, Crystal Lake, Star Chamber, and Mammoth Dome. There are also cruises along the Echo River. Elsewhere in the park facilities are provided for hiking, picnicking, and fishing.

Perryville. Near the town of Perryville in central Kentucky is the Perryville Battlefield State Shrine, site of one of the bloodiest battles of the Civil War (Oct., 1862). Markers and monuments explain the field to visitors, and a museum contains relics and scenes from the battle. A tour of the scarred but standing buildings that survived the war is available.

LOUISIANA

Baton Rouge. The state capital, Baton Rouge has been under ten flags since its founding. Although the modern Capitol Building was built in 1932, the old State Capitol, a castle of Mediterranean Gothic design, remains as a museum. The state's largest center of higher education, Louisiana State University, is here. One of the nation's finest planetariums is housed in the Old Governor's Mansion, one-time home of Huey Long. After the deepening of the Mississippi River channel, Baton Rouge became one of the leading seaports in the country. In the nearby area are the towns of St. Francisville and Clinton, restored examples of the Old South. Also nearby is Audubon State Park which includes the Oakley Plantation, where John James Audubon painted some of the birds of the area.

Lafayette. Located in the parish of Acadia is Lafayette, a city of extremes. Although it is a thriving oil center with over 700 companies, the city abounds with beautiful parks and landscapes. Lafayette is also the home of the University of Southern Louisiana. Common year-round sports within the area are professional golf, bowling, horseracing, tennis, fishing, and hunting. The city's cuisine is authentic Acadian, and the meals are slow and excellent. South of Lafayette, on Bayou Teche, is the city of New Iberia where many ante-bellum buildings are found; the most popular is The Shadows, a museum of the Old South. Further south is Avery Island, home of Bird City and the Jungle Gardens. In nearby St. Martinville is the grave of Emmeline Labiche, Longfellow's "Evangeline."

New Orleans. The annual Mardi Gras carnival is one of the best-known events of

New Orleans life. Also of interest is the New Year's Day Sugar Bowl Football classic following the December Sports Carnival. An all-year attraction is the French Quarter, also called the Vieux Carré; the sights in here can best be seen on a walking tour. On each side of the narrow streets are Spanish and French buildings, many of which have beautiful iron-lacework balconies. Around Jackson Square are the St. Louis Cathedral; the Pontalba Buildings, said to be the first apartments in the United States; the Cabildo, where the Louisiana Purchase was signed; and the Presbytere. There are many restaurants and night clubs providing a cosmopolitan atmosphere and featuring excellent Creole cuisine and Dixieland jazz. In the French Market, food is sold in the open air. Other buildings in the city date from Civil War times. New Orleans in its newer sections is a diversified industrial city yielding hundreds of manufactured products.

New Orleans Tourist Commission

The port of New Orleans, Louisiana, 110 miles from the mouth of the Mississippi River, receives ships from all over the world.

Shreveport. Founded in 1837 as a frontier town on the Red River, Shreveport is now a cultural, industrial, and trade center. It has one of the finest community buildings in the state, the Civic Center. Visitors can see Fort Humbug, named for the fake cannons set there during the Civil War. Shreveport also hosts each fall the Louisiana State Fair. North of the city are the oil towns of Rodessa and Plain Dealing, where visitors may watch the refining process. In Plain Dealing is Dogwood Drive, a hilly scenic drive which provides a pleasant break from the industry of the area. South of Shreveport are Mansfield Battle Park and the Confederate Museum.

MAINE

Acadia National Park. Situated on Mount Desert Island, Acadia National Park is the only national park bordering on the Atlantic Ocean. The entrance is in Bar Harbor, a fashionable resort town. The park offers the rugged charm of the Maine seacoast, with many trails and byways for exploration. There are also several summits for climbers, among them Mount Cadillac, 1,532 feet high.

Union Pacific Railroad

This lighthouse on West Quoddy Head warns mariners nearing the coast of Lubec, Maine. In the background is Sail Rock, the easternmost point of land in the United States.

Augusta. The state capital is located on the Kennebec River, which bisects the city. The Capitol Building was designed in 1829 by Charles Bulfinch, but only the portico remains intact after a 1911 remodeling. A state museum is in the south wing of the building. The James Blaine House is now the governor's mansion. Just down the river is Fort Western, a restored 18th-century fortification.

Brunswick. Brunswick is the home of Bowdoin College, where Henry Wadsworth Longfellow taught. His home, Emmons House, still stands in the city. Here, too, is the house where Harriet Beecher Stowe wrote *Uncle Tom's Cabin.* Brunswick has a professional musical repertory theater.

Portland. The state's largest city, Portland has been a major port since colonial times. One of its famous citizens was the poet Henry Wadsworth Longfellow. A monument has been built in the city square honoring his name. His boyhood home, Wadsworth-Longfellow House, is open to the public. The Museum of the Maine Historical Society and the L.D.M. Sweat Art Museum are other cultural points of interest in the city. Two landmarks are the Portland Observatory, built in 1807, and the Portland Head Light, built in 1791. Along Maine's coast there are historic forts, landmarks, and lighthouses; many of the lighthouses are still in use and have interesting legends.

MARYLAND

Annapolis. Annapolis, the state capital, is the home of the U.S. Naval Academy. A few miles away is the campus of St. John's College, one of the oldest universities in

the country. In this historic city is the Statehouse; built in 1779, it was the nation's first capitol building. It is still used by the state government, but a part has been reserved and restored to the period of the 1780's when the peace treaty with Great Britain was signed.

Baltimore. Baltimore, a seaport, is important as a shipping, industrial, and cultural center. Cultural highlights of the city include the Johns Hopkins University, the Peale Museum, the Baltimore Museum of Art, the Walters Art Gallery, the Maryland Historical Society, and the Baltimore and Ohio Railroad Museum. Important industrial plants are McCormick Spice Company, Chevrolet, and Bethlehem Steel. "The Star-Spangled Banner," America's national anthem, was written by Francis Scott Key at what is now the Fort McHenry National Monument outside the city.

Frederick. In Frederick is Barbara Fritchie's House, a reconstructed home and museum featuring the relics and belongings of the heroine of Whittier's poem. Nearby is Fort Frederick State Park, a huge stone fort dating back to the French and Indian Wars. Here during the summer, 18th-century military exercises are reenacted. Farther west near Sharpsburg is Antietam National Battlefield, the site of a major Civil War battle (Sept., 1862).

MASSACHUSETTS

Boston. The state capital, Boston is located on the Mystic and St. Charles rivers near the Atlantic seaboard. The city's character varies from the old-world quaintness of crooked and narrow streets to the new-world atmosphere of luxury hotels and motels. Many of the city's historic spots can be seen on a walking tour along Freedom Trail in Old Boston: Boston Common, the Old State House, Paul Revere's House, and the Old North Church are just a few. Also of interest are the Bunker Hill Monument and the U.S.S. *Constitution* in the Boston Navy Yard. The city's cultural attractions include the Peabody Museum, the Museum of Fine Arts, the Institute of Contemporary Art, and Symphony Hall, which hosts both the Boston Symphony and the Boston Pops orchestras. There are professional teams in all major sports. Deep-sea fishing, swimming, sailing, tennis, and golf are among the major sport activities. The area is famous for seafood and other culinary specialties. Across the St. Charles River in Cambridge is Harvard University, oldest in the country; here, too, are Radcliffe College and Massachusetts Institute of Technology. The homes and graves of poets Longfellow and Lowell are in Boston.

Cape Cod. The arm of Cape Cod curves 65 miles into the Atlantic Ocean. One of the favorite resort spots in New England, Cape Cod boasts over 120 public beaches of all sizes, five of which are within the Cape Cod National Seashore. The water is warmed by the Gulf Stream. The area offers art shows and galleries, antique shops and auctions, and a Summer Theater for pre- and post-Broadway shows. Woods Hole, at the southern end of the cape, is a departure point for the island resorts of Nantucket and Martha's Vineyard, the "Storybook Island." Nantucket is a delightful spot with green fields, golden beaches, and quaint villages. The island was important in the whaling days, and much of the island's decor reveals its whaling history, which is perpetuated in a whaling museum. There are many villages to visit here, each with its own distinctive personality. There are wild grapevines, flowers, and beaches with lively surf. To the northeast are the quiet waters of Martha's Vineyard; Edgartown is a fine resort on this island.

Concord and Lexington. The American Revolution started on a battlefield near these towns when "the shot heard round the world" was fired at the British. The battleground and the old bridge are maintained as historic sites. At Concord are the Old Manse and Wayside, homes of author Nathaniel Hawthorne. The Hancock-Clarke House nearby is now a museum. At Orchard House, Louisa May Alcott wrote *Little Women*. Near Concord is Walden Pond, where Henry David Thoreau lived while writing *Walden*. The site retains much of the beauty that existed in Thoreau's day. At Lexington is the Minute Man Monument commemorating the battle of Lexington.

Union Pacific Railroad

The 17th-century home of famous patriot Paul Revere is one of many historic sites in Boston, Massachusetts.

Plymouth. Plymouth Rock, the "cornerstone of the nation," is enshrined here. There is also a reconstructed village showing the life of the Pilgrims. Some 17th-century homes remain, and plaques mark the spot where others stood. A replica of the *Mayflower* is moored at the dock. Visitors can also see the historic Wax Museum. Plymouth offers facilities for various types of outdoor recreation such as sailing, fishing, swimming, and horseback riding.

Salem. Salem, an old seaport town north of Boston, is the home of the Salem Maritime National Historic Site, which includes the Custom House, built in 1819, and the Derby Wharf, which dates back to pre-Revolutionary days. Elsewhere in the city is Witch House, home of Jonathan Corwin, one of the judges in the historic witch trials. Another famous building is the House of Seven Gables, built in 1668 and immortalized by Nathaniel Hawthorne's novel of the same name. Many other structures reflect the days when Salem was an important seaport.

MICHIGAN

Dearborn. Henry Ford's home is located in Dearborn. Greenfield Village, a model of an early American town, includes a collection of historic buildings brought from other parts of the U.S.; among them are the home where Henry Ford was born, the home of Noah Webster, and Edison's Menlo Park Laboratory. The 14-acre Henry Ford Museum displays highlights of America's growth since colonial times, including replicas of historic buildings and early American crafts.

Detroit. The world's largest automobile manufacturing city has many auto assembly plants in and around it. Plants offering tours to visitors include Cadillac, Chrysler, Dodge, Plymouth, Lincoln-Mercury, and

Pontiac. Other attractions in the city are the Institute of the Arts, the Detroit Historical Museum, the Detroit Zoological Park, and Belle Isle, an amusement park on an island in the Detroit River.

Grand Rapids. Grand Rapids is an industrial community as well as a cultural center. The Art Museum, Ryerson Library, Civic Auditorium, Civic Theater, and Grand Valley State College provide a well-rounded cultural program. Furniture-making is the city's major industry, and at the Furniture Museum visitors may watch craftsmen at their work. Other attractions are the General Motors plants and the Vandenberg Center. Just southwest of Grand Rapids, in Holland, is the Dutch Village, a reconstructed village which features crafts, food, dress, and buildings in the style of the old country. There is a wooden shoe factory where visitors may watch blocks of wood being carved into boatlike clogs. The annual tulip festival in Holland is an event which attracts visitors from all over the Midwest.

Isle Royale. Isle Royale, the largest island in Lake Superior, was declared a national park in 1940. One of few primitive areas left in the United States, Isle Royale has no roads and can only be reached by boat or plane. A variety of wildlife, including a moose herd, is found in the island's forested area. The many sheltered harbors and coves are landings for fishermen, hikers, and campers.

Mackinac Island. Ferries from Mackinaw City on the mainland cross the Straits of Mackinac to the island where no automobiles are permitted. The island is a popular summer resort. Major points of interest on the island are the John Jacob Astor Fur Post, Fort Mackinac, and Fort Holmes. Mackinac City is important in its own right as the home of Major Robert Rogers, commander of Fort Mackinac (1765–1768), who unsuccessfully tried to prove the existence of a Northwest Passage. The bridge over the straits connecting the Upper and Lower peninsulas between Mackinaw City and St. Ignace was opened in 1957. An imposing structure with an overall length of five miles, it gives the motorist easy access to the vacation spots of the entire state. At St. Ignace is Father Marquette's grave.

Sault Ste. Marie. The first permanent white settlement in Michigan was at Sault Ste. Marie on the Canadian border. A major shipping port, the Soo locks and St. Mary's Ship Canal connect Lake Superior with Lake Huron, and thence with the Atlantic Ocean through the St. Lawrence Seaway. Just outside the American city of Sault Ste. Marie is the Shrine of the Missionaries, with its 160-foot sightseeing tower.

MINNESOTA

Bemidji. The city was built on the site of the Indian settlement founded by the Chippewa chief, Bemidji. It is located at the southern end of Lake Bemidji, one of the reputed 10,000 lakes of Minnesota. Bemidji is also a center of the folklore of Paul Bunyan, hero of Minnesota loggers.

Duluth. Duluth is one of the leading seaports in the world. Ocean-going ships travel up the St. Lawrence Seaway and through the Great Lakes to Duluth, where more than three million tons of cargo are shipped annually, making it second only to New York City in annual tonnage. The city itself rises 800 feet above the lake level on rocky bluffs. Skyline Parkway, a scenic drive, provides an excellent view of the area. Some of the city's attractions are the Aerial Lift Bridge, the ore docks, and the Incline Railway.

Lake Itasca. Here at Lake Itasca, 2,546 miles from New Orleans, are the headwaters of the Mississippi River, only one and one-half feet wide and one foot deep. Lake Itasca, the center of Itasca State Park, offers visitors year-round recreational facilities and accomodations. There is also a museum depicting the history and development of northern Minnesota.

Minneapolis–St. Paul. Minneapolis, the state's largest city, has many beautiful lakes and parks within its limits. Minnehaha Park, situated on the Mississippi River, contains Minnehaha Falls, immortalized in Henry Wadsworth Longfellow's "Song of Hiawatha." Points of interest in Minneapolis include the campus of the University of Minnesota, the Walker Art Center, the Tyrone Guthrie Repertory Theater, and Fort Snelling. Also of interest are the world's largest flour mills, many of which offer tours for visitors. Twin city St. Paul is the state capital and the state's second largest city. There are weekday guided tours of the Capitol Building, a beautiful Italian Renaissance structure. Nearby is the Minnesota State Historical Society with its noteworthy museum displays of Indian and pioneer life. The Alexander Ramsey House, completed in 1872 and home of the first governor of the Minnesota Territory, is an outstanding example of Victorian architecture. Victorian furnishings and personal belongings of the Ramsey family give it added interest. In

Rochester. Visitors and persons seeking medical treatment come from all parts of the world to the famous Mayo Clinic, nearly doubling the city's official population. Because of this, there are many hotels and apartment houses in the area. The Mayo family is highly regarded in Rochester, and one of the city's attractions is Mayowood, home of Dr. Charles H. Mayo. Mayo House, the early home of the family, is located in LeSueur, west of Rochester; of special interest in this small structure is the restored office of Doctor W. W. Mayo, who, with his two sons, founded the Mayo Clinic. The towns of Traverse des Sioux and New Ulm and Fort Ridgely State Memorial Park, all important during the Indian uprisings of the mid-1800's, are within a 30-mile radius of LeSueur.

Vicksburg Chamber of Commerce, Mississippi

The largest sternwheel towboat in the world, the Sprague, docked on the Mississippi River, near Vicksburg, Mississippi, is both a river museum and a showboat.

MISSISSIPPI

Jackson. Here, in the state capital, the Mississippi Ordinance of Secession was passed; years later Jefferson Davis made his last appearance before retiring to his home, Beauvoir, in Biloxi. The city itself was almost completely destroyed by General Sherman's troops during the Civil War. The few remaining buildings have been restored and are open to visitors the year round. Other attractions are the state complex, which includes the State Hall of Fame and the Department of Archives and History, both located in the War Memorial Building. Nearby is the Governor's Mansion; built in 1842, it is the oldest governor's mansion in the United States. Also of interest is the State Historical Museum which has an extensive and interesting collection of artifacts depicting Mississippi's history.

Natchez. Once a river town where steamboat races were the biggest events, Natchez is a city rich in southern tradition and history. The city's main attractions are the ante-bellum mansions and spectacular gardens, many of which are open the year round; in the spring, during the pilgrimage, all 29 homes are open to the public. Also of interest are Rosalie, General Grant's headquarters when he occupied Natchez; Stanton Hall and Arlington, two beautiful estates; and the Briars, where Jefferson Davis was married. Nearby is a section of the old and scenic Natchez Trace Parkway, a trail that ran from Natchez to Nashville.

Vicksburg. Vicksburg is the site of one of the most strategic battles of the Civil War. Forty-seven days of siege and starvation were needed to break the Confederate defense of this river port. One of the attractions here is the Vicksburg National Military Park with its many monuments and markers. Before seeing the battlefield, visitors usually stop at the headquarters and museum, where an automated lecture and electric diagram explain the progress of the battle. Other points of interest in the city are the Old Courthouse Museum in downtown Vicksburg and the showboat steamer Sprague, the largest sternwheeler ever to ply the Mississippi.

MISSOURI

Hannibal. This was the boyhood home of Mark Twain, born Samuel Clemens and one of America's best-known writers. The entire area is dedicated to his memory, and visitors can roam the terrain where Huck Finn and Tom Sawyer had their adventures. The house in which Mark Twain grew up is now a museum. Many spots mentioned in his books can be seen: Becky Thatcher's house, the fence Tom Sawyer whitewashed, and the caves in which Tom Sawyer and Huck Finn were lost. Southwest of Hannibal at Paris, Missouri, are the Mark Twain State Park and the Mark Twain Wildlife Refuge, both offering facilities for camping, picnicking, and fishing. A shrine enclosing the house where Mark Twain was born is located in the park.

Independence. Just south of Kansas City on the Missouri River is Independence, once a famous frontier town. The Santa Fe and the Oregon trails started here, and it was an important terminal of the Overland Stage. Points of interest include the blacksmith shop, where wagons were assembled for the trip west, and the Old Public Spring. Independence is the home of former President Harry S. Truman, and houses the Harry S. Truman Library and Museum. Due south in Lamar is his birthplace.

Kansas City. Although Kansas City is a modern city, an industrial center, and a major market, remnants of the days of the Santa Fe Trail are evident in such memorials as Fort Osage. Swope Park offers golf, tennis, a zoo, and the Starlight Theater. There are also professional football, baseball, and hockey teams. Cultural centers include the William Rockhill Nelson Gallery of Art, Mary Atkins Museum of Fine Arts, and the Kansas City Art Institute and School of Design. One of the city's most inspiring sights is the Liberty Memorial. Built to honor those who served in World War I, it features a Torch of Liberty.

Ozarks. The beautiful Ozark Mountains stretch from the southern end of the Missouri River to Arkansas and Oklahoma.

Turner's Mill, a relic of the past, on the Eleven Points River in the Ozark Mountains near Alton, Missouri, is in a region of hills, plateaus, and deep valleys.

Numerous springs, lakes, hardwood forests, and caves make it a noted recreational area. Big Spring and Bennett Springs state parks contain huge natural springs where some of nature's finest caves have been formed. The most popular are Meramec and Missouri caverns, and Bridal and Jacob's caves. Near the middle of the state, in Lake of the Ozarks State Park, is the man-made Lake of the Ozarks, behind the Bagnell Dam on the Osage River; it is an excellent spot for water sports. In the winter there is skiing on the nearby slopes. Lake of the Ozarks State Park, the largest in Missouri, provides many facilities, including an airport for private planes and six organized group camps.

St. Louis. Missouri's largest city and natural port is located on the Mississippi River. The recently remodeled river front is the main attraction for sightseers. The Gateway Arch commemorates the fact that St. Louis was the Gateway to the West; visitors can ride to the top of the arch. The Missouri Botanical (Shaw's) Gardens display over 12,000 species of plant life under the Climatron, the world's first geodesic greenhouse. The Jefferson National Expansion Memorial now preserves the old courthouse and other historical buildings. Also of interest are Forest Park, a cultural center containing the Art Museum; the Jefferson Memorial Building, housing the documents of the Louisiana Purchase and many of Charles Lindbergh's momentos; the Planetarium; Municipal Opera; and the St. Louis Zoological Park. The city has professional football, baseball, and hockey teams; Civic Center Busch Memorial Stadium contains the St. Louis Sports Hall of Fame.

MONTANA

Custer Battlefield National Monument. Because the Little Big Horn River flows through the Crow Reservation, the site of Custer's Last Stand is now, ironically, surrounded by Indian homeland. Conflicting reports about the battle may be one reason why many people hunt the battlefield for clues to the true story. Headstones mark the places where men died, and visitors to the museum can see dioramas and exhibits depicting what may have happened here.

lakes. It is on the sheer precipices that the Rocky Mountain goat may be glimpsed—a favorite sight of the park visitor. The scenic Going-to-the-Sun Highway crosses the park from the eastern side at St. Mary's Lake to the town of West Glacier on the western side. Browning, just east of the park, is the home of the Museum of the Plains Indians.

Great Falls. There are numerous historical sights in the city, many related to the Lewis and Clark Expedition. The Charles M. Russell Studio and his gallery, which contains many of his paintings and sculptures of the American West, are in Great Falls. Also in Great Falls is the smelting plant of the Anaconda Company where copper and zinc ore from Butte are refined.

National Park Service

Glacier National Park in the Rocky Mountains of Montana is a wilderness of forests and natural wonders. It is one of the largest national parks in the United States.

Glacier National Park. Glacier National Park, established in 1910 and straddling the Continental Divide, is part of the Waterton-Glacier International Peace Park. The park, which is partly in Montana and partly in Alberta, Canada, contains some of the most primitive wilderness in America and abounds in forests, waterfalls, and high peaks. In the park's 1,600 square miles are more than 1,000 miles of trails, over 60 glaciers, and 200

Helena. Montana's capital was a gold rush town in the 1800's; the Old Placer Diggings in Dry Gulch, where gold is still washed, will remind visitors of Helena's origin as a mining town. Some of the city's streets wind along the gulches as they did in early days. Points of interest in the city include the State Historical Society and the State Capitol Building, which has

paintings of historical figures and events. Southeast of the capital is Livingston, the northern gateway to Yellowstone National Park in Wyoming.

NEBRASKA

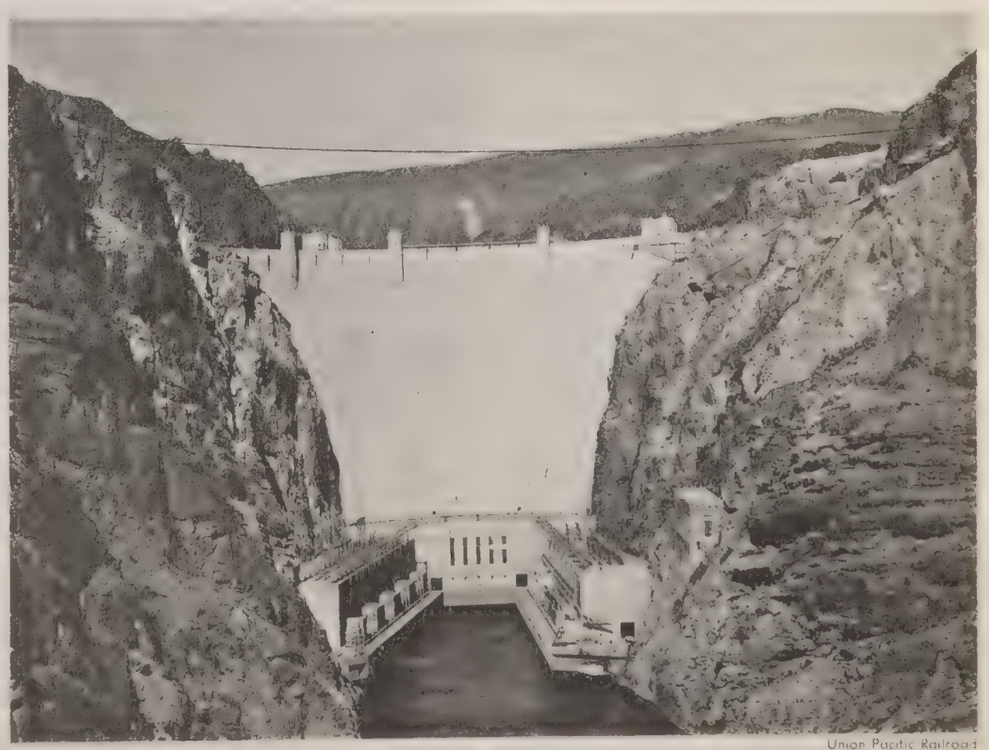
Lincoln. Lincoln's 400-foot Capitol Building is visible from miles away. The structure and decorations combine the simplicity of Indian and pioneer cultures with the high ideals of the state. Other points of interest in Lincoln include the State Historical Society Museum, the University of Nebraska and its archaeological museum, the Sheldon Art Gallery, the historic Kennard House, and Fairview, home of three-time presidential candidate William Jennings Bryan.

Ogallala. Ogallala was Nebraska's cowboy capital one hundred years ago. Now those days are relived on Front Street at the Cowboy Museum, the Crystal Palace Saloon, and the General Store. The dance hall still has shows, and the stagecoach still runs. Fifty miles east is North Platte, home of Buffalo Bill Cody. His ranch, where the famous Wild West show was rehearsed, is now a state historical park. To the north, near the South Dakota border, is Valentine, the center of the beautiful Niobrara area, and nearby is Fort Niobrara National Wildlife Refuge, a division of the Nebraska National Forest with 14 lakes. Here some of the last remaining herds of bison and longhorn cattle can be seen. The museum holds relics of frontier days.

Omaha. The state's largest city is a transportation center with a number of railroad trunk lines and a modern jetport near the river. It was from Omaha that the first transcontinental railroad was built; the Union Pacific has established a museum here in its honor. Omaha also has one of the largest stockyards in the world. The cultural center is the Joslyn Art Museum, which houses a huge concert hall in addition to the exhibition area. Also in the city are the Mormon Cemetery and monument which honor the Mormons who died near Omaha on their trip westward. Boys Town, the noted community founded in 1917 for homeless boys, is on the western outskirts of the city. South of Omaha are the headquarters for the Strategic Air Command and the Aerospace Museum.

Scotts Bluff. At Gering, Nebraska, is the Scotts Bluff National Monument, once an important landmark for westward travelers on the Oregon Trail. The Pony Express and the first transcontinental telegraph passed through Mitchell Pass, on the Bluff. Also of interest in the area is the Oregon Trail Museum. A few miles east of the monument is Chimney Rock Historical Site, another landmark on the trail. Farther north are Agate Fossil Beds National Monument and Pine Ridge, a division of the National Forest.

Union Pacific Railroad



Scotts Bluff, in western Nebraska, was an important landmark for the westward migration along the Oregon Trail. It was declared a national monument in 1919.

NEVADA

Carson City. Carson City is the smallest state capital in the U.S. First a Pony Express station, then a boom town in the gold rush days, it was named for Kit Carson. The Capitol Building, State Library, and Supreme Court Building are the main points of interest in the administrative complex. The old U. S. Mint now houses the State Museum. On the river just east of Carson City are markers at the sites of mills where ore from the Comstock Lode was treated.

Las Vegas. Once a small desert town, Las Vegas has experienced a phenomenal growth, particularly since World War II. It is now the largest city in Nevada, known primarily as a tourist and convention center. Its hotels are among the most luxurious in the world and are especially noted for their opulent night clubs and casinos. Las Vegas is not far from Hoover Dam, completed in 1936, and the recreational area of Lake Mead, where there is ample opportunity for water sports, camping, and fishing.

Reno. Reno, once an important campsite beside the Truckee River on the Donner Pass route to California, is now the region's bustling commercial and shipping center. The county seat of Washoe County is perhaps best known as an early mecca for those seeking quick divorces. Legalized gambling and the surrounding recreational areas have also contributed to Reno's prosperity. The University of Nevada is located here; some of its facilities are open

to the public. South of the city is a marker on the site of Junction House, the first permanent settlement on the Truckee meadows. The Truckee River leads southward to Lake Tahoe and the Sierra Nevada winter sports area, which includes Squaw Valley, site of the 1960 Winter Olympics, Mt. Rose, and Slide Mountain.

Virginia City. Founded in 1859, this city, located between Reno and Carson City, once produced millions of dollars in gold and silver from the Comstock Lode. During the 1870's it was the most prosperous mining metropolis of the West. Today, it is almost a ghost town. Many of its famous buildings, such as the Crystal Bar, the International Hotel, Piper's Opera House, and the office of the *Territorial Enterprise* where Mark Twain worked as a reporter, are preserved.

NEW HAMPSHIRE

Concord. This city, located on the Merrimack River in the central part of the state, has been the state capital since 1808. The Capitol Building is an impressive white granite structure. Points of interest in Concord include the Statehouse and State Library, Kent House, the New Hampshire Historical Society and Museum, and the granite quarries. A few miles away is Bow, the birthplace of Mary Baker Eddy, founder of the Christian Science religion.

Franconia Notch. A deeply cut pass between two ranges in the White Mountains, Franconia Notch is dominated by a natural formation, the 40-foot granite profile of the Old Man of the Mountain, made famous by Nathaniel Hawthorne's *Great Stone Face*. Also of interest in the area are Echo Lake, the Cannon Mountain Aerial Tramway, and the Flume Gorge, a deep natural chasm in the granite walls. South of the White Mountain National Forest is Lake Winnipesaukee, the largest lake in the state and an excellent resort area.

Hanover. Located near the junction of the White and Connecticut rivers in eastern New Hampshire, Hanover is the site of Dartmouth College, chartered in 1769. Of interest on the campus are the Colonial and Georgian buildings and such contrasting modern ones as the Hopkins Center, with its complex of art galleries, two theaters, a concert hall, workshops, and studios. Winter sports are traditional at Dartmouth and the Dartmouth Outing Club, founded in 1910, has helped popularize skiing, ice skating, and other winter sports in America.

Manchester. New Hampshire's largest city, located south of Concord on the Merrimack River, is a leading industrial and agricultural center. Attractions in the city include the Historic Association Building; the home of General John Stark, commander in the American Revolutionary War; Stark Park; the Western Observatory; and the Currier Art Gallery.

Portsmouth. Located on the coast, Portsmouth has been an important port since before the Revolution. The United States Naval Shipyard is located in the harbor. A portion of the downtown area is now being restored in the likeness of Strawberry Banke, the original settlement in Portsmouth. Other places of interest include the Old State House, Pitt Tavern, Fort Constitution, Fort Stark, the John Paul Jones House, and the Wentworth-Coolidge Mansion. A popular recreational area is Hampton Beach, a three and one-half-mile strand on the Atlantic in southern Portsmouth.

C. T. Bodwell, New Hampshire Planning and Development Commission

Old Man of the Mountain, formed by the upper cliffs of the Profile Mountain, overlooks the Franconia Notch, New Hampshire.

Delaware Water Gap. Bordering Pennsylvania, the water gap is a picturesque break in the Kittatinny Mountains. There are many places to camp, and the water sports on the river make it one of the most popular spots for vacations or overnight visits in the state.

Morristown. An important town during the Revolutionary War, Morristown is rich in historic sites. Ford Mansion, within the city, was the headquarters of General George Washington during the war. The Historical Museum, behind the mansion, contains documents and relics from his stay. A few miles from the city is the Morristown National Historical Park and Jockey Hollow where Revolutionary soldiers camped. Also nearby is Fort Nonsense, built for no other reason than to keep the soldiers occupied.

Newark. Newark is the state's largest and most industrially active city. It has a teeming harbor, and its airport is one of the busiest in the country. There are several breweries in the city offering tours of their plants. Historical attractions in Newark include the Trinity Episcopal Church, the John Plume House, Military Park, and the Newark Academy, which was once a troops' barracks in the Revolutionary War.

Allegheny Airlines

In Atlantic City, New Jersey, beaches are popular vacationlands. New Jersey's Atlantic shoreline has some 50 resort towns between Sandy Hook and Cape May.

NEW JERSEY

Atlantic City. One of the favorite resort and convention cities on the eastern seaboard, Atlantic City accommodates well over 16,000,000 visitors each year. The first boardwalk, a broad wooden walk paralleling the shore, was built here in 1870, and the first rolling chairs made their appearance in 1884. Today's boardwalk, extending for four miles, is lined with hotels and shops. There are five amusement piers and a municipal auditorium; the latter is the site of the annual Miss America Pageant. Atlantic City is the prototype for such popular resort cities as Seaside, Asbury Park, and Wildwood, which stretch along the 127-mile shoreline of New Jersey.

Princeton. Nassau Hall is the first college building of what is today Princeton University. During the Revolutionary War, it was used as a barracks, first by the British and later by the Continental army. The Battle of Princeton ended in the Hall, and in 1783 it served as the site where the declaration of peace was signed by the Continental Congress. Not far away is the

Princeton Battle Monument. Just outside the city is Morven, original home of Richard Stockton, a signer of the Declaration of Independence; it is now the official residence of the governor of New Jersey. North of the city is Rocky Hill, the site where Washington wrote and delivered his farewell address to the army.

Trenton. On Christmas night, 1776, General Washington and his troops crossed the Delaware River and staged a successful surprise attack on the British forces quartered in Trenton. The battle proved to be a turning point in the war, and the city, which is now the state capital, has commemorated the achievement by building a monument at Washington Crossing. The Trenton Battle Monument marks the spot where Washington placed his artillery.

NEW MEXICO

Albuquerque. Served by land, air, and rail lines, Albuquerque is the commercial center of New Mexico. The city lies on a plain at the foot of the Sandia Mountains, and is a superb scenic and recreational area. Sandia Crest and Sandia Peak Aerial Tramway offer a beautiful view of the surroundings. Old Town, a section of the city, retains part of the original Spanish settlement of 1706. Many of the buildings of the University of New Mexico are of Spanish-Pueblo architecture.

New Mexico Department of Development

Ruins of a prehistoric Pueblo civilization are preserved in Chaco Canyon National Monument in northwest New Mexico.

Carlsbad Caverns. Vast and beautiful limestone caverns are the main feature of this 49,000-acre national park. Rangers of the National Park Service conduct walking tours along the electrically lighted trails leading to such caverns as the Green Lake Room, King's Palace, Queen's Chamber, and the 14-acre Big Room, where the famous Bat Flight occurs nightly. The caverns are located at the foot of the Guadalupe Mountains. Camping facilities are available in the nearby scenic park, and tourists may also enjoy boating or other water sports on the Pecos River.

Four Corners. Named after the area in northwestern New Mexico where four states meet, Four Corners is mostly Indian territory. The area is the home of the Navajos, and farther south, near Gallup, is the Zuni Pueblo, the first village in New Mexico seen by Spanish explorers. In Gallup, a coal-mining region and center for trade, the Inter-Tribal Indian Ceremonial is held each summer.

Allen Green, New York Convention and Visitors Bureau

Skyscrapers in the financial district of Lower Manhattan in New York City create a fantastic skyline for the largest city in the United States.

Lincoln County. It was during the range war here that William Bonney made his reputation as Billy the Kid. At Lincoln State Monument his exploits are documented, and once each year the town reenacts his final jail escape and death. Not far away is an excellent ski area, near Ruidoso on Sierra Blanca Peak. Ruidoso also has the race track where each summer the All-America Futurity and other races are run. Gran Quivira National Monument, and Abo and the Quarai State Monuments, ruins of the Saline Pueblos and their Spanish missions, are located north of Ruidoso near Cibala National Forest.

Santa Fe. The oldest capital in the United States, Santa Fe has been a capital city under Spanish, Mexican, Confederate, and American flags. It was the end of the Santa Fe Trail and remained the Southwest's supply center for a long time, but now is relatively unindustrialized. The city still reflects the Indian-Spanish architecture and way of life, and the old plaza is still the center of activity. Points of interest in the city include the Palace of the Governors, the San Miguel Church, and the Cathedral of St. Francis of Assisi. Northeast of Sante Fe is Taos, the famous art colony. Once an important Indian and Spanish trading center, Taos began to attract artists and writers around the turn of the century. Activity still centers around the plaza. The shops, galleries, and restaurants in the adjacent narrow streets are an interesting attraction. Numerous small villages in the Sangre de Cristo Mountains are also worth seeing; the area offers not only beautiful scenery, but also camping, hiking, hunting, fishing, and skiing.

NEW YORK

Adirondack Mountains. Located in the northeast corner of the state, this large resort and recreation area is a summer and winter playground. Outdoorsmen are attracted to the trails and campsites of these valleys and mountains, while others enjoy many resort hotels, motels, dude ranches, and cottages. The region is a land of lakes—Placid, George, and Champlain being the best known. During the summer, there is the lure of water sports, mountaineering, and camping; in winter it is a skiing center. Mt. Marcy, New York's highest mountain, is here. West of Lake Champlain is Ausable Chasm, a magnificent gorge with provisions for tours of the site and a ride through the flume.

Albany. The tulips that blossom each spring in the park across from the Capitol Building are a reminder of the Dutch origin of New York's capital. Guided tours of the Capitol's Senate and Assembly Chambers, Governor's office, and Military Museum are offered. The city's other museums are the Institute of History and Art and the State Museum. Several Revolutionary War buildings are open to the public. Just north of Albany is Saratoga Springs, where a decisive battle was fought during the Revolution. There is a tour route which commemorates the battle, as does the Historical Museum. The city is a popular resort, offering healthful springs and the nation's oldest race track; there is even a museum of horse racing. The New York City Ballet and the Philadelphia Orchestra have their summer homes here. Their performances at the Saratoga Performing Arts Center add a cultural note to the recreational opportunities open to the visitor.

Buffalo. Although Buffalo offers two museums, a fine art gallery, a zoo, theaters, and lake- and rail-shipping facilities, the greatest attraction remains Niagara Falls. There are three falls across the United States-Canada border: American, Bridal Veil, and Horseshoe or Canadian Falls. More than two dozen viewing points are available, some of which take visitors within a few feet of the falls. Many people return at night when giant searchlights are turned upon the falls, changing them into shimmering fantasies of color and sound. The city of Niagara Falls has an aquarium, the Animated Museum of History, the Wax Museum of History, and a zoo. The Niagara Power Project is open to the

public and has models, movies, and lectures explaining the $737 million hydroelectric project.

New York City. The largest city in the United States is made up of five separate boroughs: Bronx, Brooklyn, Queens, Richmond (Staten Island), and Manhattan. Most people, however, think of Manhattan when they think of New York City, for it offers an incredible list of interesting places. Gray Line Bus sightseeing tours go to the Empire State Building and the Statue of Liberty, the first points of call for most visitors. At the docks, visitors can see great ships, both cargo and passenger, and on certain days special tours are available. Wall Street, in downtown Manhattan, is the financial center of America. Nearby is the New York Stock Exchange, the nation's largest organized securities market; the Chase Manhattan Bank, one of the world's largest banks; and the Federal Reserve Bank of New York. Farther north is Greenwich Village, a haven for artists, poets, and writers; many shops, restaurants, clubs, and cafes are found around Washington Square where outdoor summer concerts are held. Near midtown is the new Madison Square Garden; the Port Authority Bus Terminal, one of the world's largest bus stations; and the New York Public Library, one of the largest in the U.S. Also in midtown are the Rockefeller Center, Carnegie Hall, and Times Square. On the East River is the United Nations headquarters where tours of the business chambers and galleries are provided. Uptown's favorite attraction is Central Park, with concerts and Shakespearean plays in the summer, a zoo all year, and an outdoor ice-skating rink in the winter. Farther north in Morningside Heights is Columbia University. Nearby, on Riverside Drive overlooking the Hudson, are two famous landmarks, the Riverside Church and Grant's Tomb. The cultural life in New York City is of infinite variety. It includes the Broadway theater district and the off-Broadway theaters centered in the Greenwich Village area. The new Lincoln Center houses, among other cultural facilities, the Philharmonic Hall, the State Theater, and the New Metropolitan Opera House. The most famous art museums are the Metropolitan Museum, the Museum of Modern Art, the Whitney Museum of Art, and the Guggenheim Museum with its spiral building designed by Frank Lloyd Wright. The other boroughs offer other well-known attractions. In Brooklyn are the Brooklyn Botanic Garden; and Coney Island, the amusement playground on the ocean, where the New York Aquarium is located. Linking Brooklyn to Staten Island is the spectacular Verrazano-Narrows Bridge at the entrance to New York Harbor. Bronx has the Bronx Zoo, second largest in America, New York University, and the Hall of Fame. Yankee Stadium is close to the Harlem River. Queens' major attraction is the Flushing Meadow Fair Grounds, site of the 1964–65 World's Fair and the 1939 World Exposition. A few pavilions are still open to visitors. Near the fair grounds is Shea Municipal Stadium, home of the New York Mets and New York Jets, the city's professional baseball and football teams. Aqueduct Race Track, one of the finest in the country, is also in Queens.

Finger Lakes. Six lakes in west central New York comprise the Finger Lakes region. This is one of the finest resort areas in the state, with beautiful scenery and excellent water facilities. Its lakeside vineyards are renowned for their fine wines and sparkling champagnes and have made the region famous. Also within the region are the state's third and fourth largest cities, Rochester and Syracuse. Rochester is the photo capital of the country. It is the home of the Eastman Company, makers of Kodak cameras, equipment, and supplies. The George Eastman Home, a national landmark, is now a museum of photography and cameras. Also in Rochester are the University of Rochester and the Eastman School of Music. East of Rochester is Syracuse. Chief among its diversified industries are steel, china, and electronic equipment. Syracuse University is located within the city; other cultural institutions include the Syracuse Civic Symphony Orchestra, the Museum of Natural History, and the Lowe Art Center. In the southern part of the Finger Lakes region is Corning, with its large glassmaking industry; exquisite crystal pieces are on display at the Corning Glass Center. Nearby is Watkins Glen, the noted sports car racing center.

Thousand Islands. There are actually over 1,700 islands scattered at random in the St. Lawrence River near the Canadian border. Many are historic sites and have scenic boat tours. All kinds of water sports are available among the islands. Of interest in the area are the Akwesasne Mohawk Indian Village at Hogansburg and the Boldt Castle on Heart Island, a castle which was abandoned in 1902 before being completed. Along the seaway one can visit hydroelectric plants, which are part of the international electric project. The Power Authority building is upstream from Cornwall, Ontario. Visitors can hear lectures and receive literature explaining the project.

West Point. The United States Military Academy is located at West Point overlooking the Hudson River; it was founded in 1802. Of interest here are Cadet Chapel, restored Fort Putnam, the Academy Museum, Battle Monument, and the Parade Grounds where daily parades may be viewed.

NORTH CAROLINA

Asheville. North Carolina's entranceway to the Great Smokies, Asheville, provides many resort activities as a prelude to those of the great Smoky Mountain National Park on the Tennessee border. Near Asheville is the Biltmore House, built in the style of a French chateau and displaying art objects. There is a good view of Asheville and the plateau on which it is set from the drive along Elk Mountain Scenic Highway. Visitors will also enjoy the Thomas Wolfe Memorial, the author's boyhood residence made famous in his novel, *Look Homeward, Angel.* Great Smoky Mountain National Park located on the Tennessee and North Carolina border has a great variety of plant life and is a popular area during the flowering of the rhododendrons.

Kittyhawk. The Wright Brothers National Memorial is the site of the first powered aircraft flight, which occurred in 1903. The memorial, set between the Kill Devils Hill and Kittyhawk, contains markers, a museum, a reconstructed hangar and shop, and an airport. South of Kittyhawk is the Fort Raleigh National Historical Site. On Roanoke Island is the memorial to the early, ill-fated colony of Sir Walter Raleigh. Both the settlement and earthworks of Fort Raleigh have been restored and are open to the public.

Raleigh. The Capitol Building, located in Raleigh, is a Grecian-Doric structure. Surrounding it are statues of national and

state heroes. Many of the state buildings are open to the public, including the Hall of History and the State Historical Museum. A few miles away is Durham, home of Duke University. One of the attractions on the campus is the Duke University Chapel. Durham is also known for its tobacco operations, as are other cities in the state, notably Winston-Salem.

NORTH DAKOTA

Badlands. Once considered "bad lands" by early explorers, the Badlands, an area in the southwestern part of the state, has since been recognized for its scenery. The area abounds in gorges, buttes, and other unusual earth formations, shaped in part by the Little Missouri River. The region was a favorite of President Theodore Roosevelt, after whom a national memorial park within the area was named. His home in the Badlands is near the visitor's center in the park. Near Medora is the Chateau de Mores, home of the man who dreamed of being, but failed to become, king of the Dakota meat-packers. His house and memorabilia provide a glimpse into life during the 1800's. Fishing, hunting, and trail riding are also available for visitors.

Bismarck. The state's unusual 19-story Capitol Building, erected to replace the one that burned in 1930, is open to the public. The Capitol complex also contains the Liberty Memorial Building, housing the state library and museum, and many memorial statues. The log cabin from Theodore Roosevelt's Ranch is near Bismarck.

International Peace Garden State Park. One of the few gardens in the world dedicated to peace is a mile-square area north of Dunseith on the border of North Dakota and Manitoba, Canada. It commemorates the lasting peace between Canada and the United States. In addition, it has facilities for many sports and cultural diversions. Visitors may freely cross between the United States and Canada to view the points of interest in the garden.

Smithsonian Institution

The Serpent Mound in Adams County, Ohio, was built by prehistoric Indians and is 1330 feet long. Archaeologists believe it was used for religious purposes.

OHIO

Cincinnati. Located in southern Ohio, Cincinnati is a busy cultural and industrial center. Many of its diverse industries are open to the public; visitors may observe the construction of a grand piano as well as that of a jet engine. Cultural attractions include the Edgecliff and Shubert theaters, the Opera, Playhouse-in-the-Park, and other music and art centers. An educational center as well, the city is the home of five universities including the University of Cincinnati. Other attractions include the fine parks, the zoo, and the many sports stadiums and arenas hosting professional and amateur sports.

Cleveland. The largest city in Ohio, Cleveland is an iron and steel center and an important Lake Erie port. University Circle, an attractive cultural center, is the home of Case Institute of Technology, Western Reserve University, the Cleveland Museum of Art, and Severance Hall, host of the Cleveland Symphony Orchestra. Other attractions include Terminal Tower, Dunham Tavern, the Auto Aviation Museum, and a museum which was once a stagecoach station. Municipal Stadium hosts the Cleveland Indians in the summer, and the Cleveland Browns in the fall. One terminal of the Ohio-Erie Canal is in Cleveland, and many spots along the canal can be visited. At some of these points, boat rides and demonstrations of canal operations are available.

Columbus. The present capital is the third in Ohio's history, the first having been at Chillicothe and the second at Zanesville. Tours of the Statehouse are available each weekday. They cover departmental offices, the House and Senate Chambers, and the Governor's Cabinet Room. The state museum is located on the Ohio State University campus. Other points of interest include the Civic Center; the Park of Roses, one of the world's largest municipal rose gardens; and the Walk-O-Wonders which has replicas of the Seven Wonders of the World.

Toledo. Although Toledo is known primarily as an industrial center, it also offers varied cultural attractions. The Toledo Museum of Art has 35 galleries. There are orchestra and opera associations in the city; Lyrno Productions provides the city with theatrical performances. It also has one of the finest zoological gardens in the country, the Toledo Zoological Park. The Miami-Erie Canal had a terminus here, and remains of it can be seen at many points between Toledo and Cincinnati.

National Park Service

Theodore Roosevelt National Memorial Park in North Dakota includes the Badlands, the Grand Canyon of the Little Missouri River, and petrified forests.

OKLAHOMA

Oklahoma City. The state capital since 1910, Oklahoma City is the largest city in the state. The present Capitol Building, erected in 1917, spans two land tracts donated for its construction. The Capitol faces a mall, around which is the rest of the Capitol complex. Some of the state's

largest oil companies have their headquarters in the city. The Oklahoma Historical Society is next to the proposed site of the International Oil Museum, which is to be built by contributions from the oil industry. Oil derricks are everywhere and oil is a major source of income for the city. Other points of interest in Oklahoma City include the Oklahoma Art Center, the stockyards, and the National Cowboy Hall of Fame and Western Heritage Center.

Platt National Park. The park, located in southern Oklahoma, is noted not only for its plant and animal life, but also for the numerous mineral and fresh-water springs, including bromide waters which flow through its 900 acres of wooded hills. The most beautiful streams in the valley are Travertine Creek and Rock Creek. In addition to this national park, Oklahoma has numerous state parks with excellent recreational facilities and accommodations including spacious resort lodges and free campsites.

Tulsa. Tulsa is the home of many oil companies and is appropriately called "the oil capital of the world." There are many refineries, and some have tours of their facilities. The International Petroleum Exposition is held annually in Tulsa. Cultural attractions in the city include the Gilcrease Institute of American History and Art, the Philbrook Art Center, and the University of Tulsa. Of special interest among the city's 44 parks are Mohawk Park and the Woodward Park where the Municipal Rose Gardens are located.

OREGON

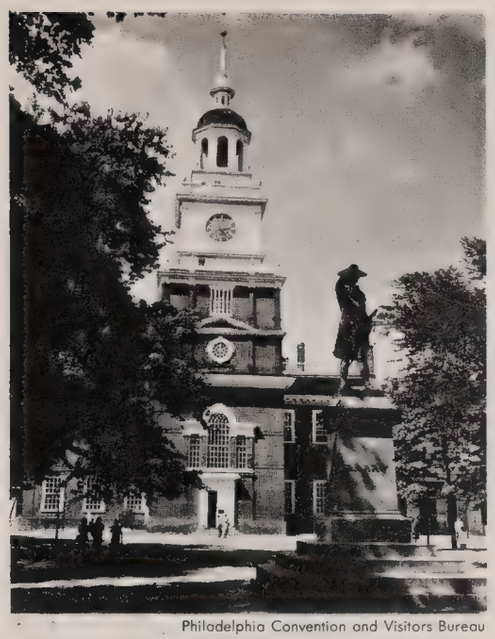
Bonneville Dam. This huge dam, 39 miles east of Portland, cuts across the Columbia River and provides electricity for the area. It also has one of the largest fish hatcheries in the country as well as salmon ladders which migratory fish use to run upstream and spawn. The river is widened and deepened at The Dalles, allowing navigation to that point. At The Dalles there is the Archaeological Museum containing Indian exhibits. This scenic area can be viewed from sightseeing boats as well as from highways.

Crater Lake. Crater Lake, in Crater Lake National Park, is an unusual, brilliant blue lake in the heart of a once-active volcano. The 2,000-foot deep lake is encircled by multicolored lava walls 500 to 2,000 feet high. The park provides excellent camping, fishing, and boating facilities. A wide assortment of wildlife, especially bird life, can be found in the area.

Mount Hood. Part of the Cascade Range, Mt. Hood is Oregon's highest mountain, rising 11,245 feet above sea level. The mountain is a summer recreational center and a winter ski resort. Timberline Lodge, located near the summit, is easily accessible by road. From this point spectacular views of the Willamette Valley may be had. The mountains of Oregon are excellent recreational areas for the outdoorsman.

Portland. The largest city in Oregon is on the Willamette River near its confluence with the Columbia River. Mount Hood, 45 miles to the east, dominates the horizon. Each June, Portland becomes the Kingdom of Rosaria for ten days during the rose festival. The rest of the year there are other attractions, notably the Portland Zoological Gardens, Hoyt Arboretum, golf courses, and 125 parks. The Scenic Parkway Drive gives an overall view of the valley and the surrounding area, passing many of Portland's points of interest.

Salem. About 40 miles south of Portland on the Willamette River is Salem, the state capital. The Capitol Mall, a complex of five buildings, dominates the city. Salem is also the seat of Willamette University. Farther south on the Willamette River is the University of Oregon at Eugene.



Portland Chamber of Commerce

Ecola State Park is located north of Cannon Beach on Oregon's 296-mile coast line. Oregon has 221 state parks in addition to Crater Lake National Park.

PENNSYLVANIA

Bethlehem. Bethlehem is eastern Pennsylvania's steel center. The Schwab Memorial Library in the Bethlehem Steel Office Building has an exhibit of the history of steelworks. Other points of interest in Bethlehem are the Gemein Haus, the city's oldest structure; the Kemerer Museum; and the Moravian Museum.

Gettysburg. The most famous battle of the Civil War was fought here July 1-3, 1863. Four months later President Lincoln returned to the scene and delivered his Gettysburg Address at the dedication of the National Cemetery commemorating the battle. There are a number of buildings in and near Gettysburg which explain the battle and its surrounding circumstances. The Electric Map in the Gettysburg National Museum uses audio-visual techniques to recreate the battle. The National Civil War Museum contains over 200 life-size wax figures of the Civil War era. Other buildings of interest are the Lincoln Room Museum, Jennie Wade House, General Lee's Headquarters, Fort Defiance Museum and Frontier Town, and the Hall of Presidents. There are bus tours of the battlefield itself, although a walking tour is favored by many. Tour guides highlight the area's most famous spots: Cemetery Hill, Seminary Ridge, the ground over

which Pickett's Charge was made, and Culp's Hill.

Harrisburg. Capital of Pennsylvania since 1812, Harrisburg is a steelmaking center. Its Capitol Building reflects Renaissance architecture. North of the Capitol is the William Penn Memorial Museum with its planetarium and exhibits of documents, natural history, and the arts. The old homes in Harrisburg include that of John Harris, the city's founder. Twelve miles east is Hershey, "Chocolate Town U.S.A." Other attractions in the area are the zoo, Rose Gardens and Arboretum, and facilities for a variety of sports. The Pennsylvania Dutch Days are celebrated annually in late summer.

Lancaster. South central Pennsylvania is the heart of the Pennsylvania Dutch country. In addition to the Pennsylvania Dutch restaurants, museums, and markets, Lancaster has many historical buildings such as Wheatland, the home of James Buchanan, and the Fulton Opera House, America's oldest operating theater. Also of interest in Lancaster County is the 18th-century restoration of the German protestant monastic settlement at Ephrata. Northeast is Kutztown, which holds an annual Folk Festival in early July. The festival has exhibits and demonstrations of arts and crafts, cookery, and other facets of Pennsylvania Dutch life.

Philadelphia. One of the nation's oldest cities, Philadelphia is second only to Boston in historical significance. Its biggest attraction and one of America's most meaningful shrines is Independence Hall, where the Declaration of Independence and the Constitution were signed and where the Liberty Bell is now preserved. The surrounding area has been designated Independence National Park. Other points of interest are the Betsy Ross House, William Penn House, Benjamin Franklin's grave at Christ Church, and Carpenters' Hall. Outdoor attractions include Fairmount Park with its restored colonial mansions; the zoological gardens; Robin Hood Dell where summer concerts are held; Liberty Bell Park and trackway; Washington Square; and the port of Philadelphia on the Delaware River. Other points of interest are the new U.S. Mint, the Museum of Art, the Art Alliance, the Academy of Music, the Rodin Museum, the Franklin Institute, and the University of Pennsylvania, founded in 1740.

Pittsburgh. Once one of the country's smokiest cities, Pittsburgh has undergone massive urban renewal programs and is now one of America's most beautiful and progressive cities. The view from Mt. Washington overlooking the city is particularly exciting at night. There are many colleges and universities in the city including the University of Pittsburgh in the "Cathedral of Learning," the world's tallest school building; Carnegie Institute of Technology; and Chatham College; many have facilities open to the public. Fort Pitt Blockhouse, a museum depicting the country's early days, is in Point State Park on the Golden Triangle. All professional sports are represented, and spectators watch their favorite teams in the newly constructed Civic Arena. Highland Park has three zoos—the main zoo, the children's zoo, and an underground zoo.

Pocono Mountains. The Poconos in northeastern Pennsylvania are quickly becoming one of the favorite vacation areas of eastern U.S. Lakes and rivers provide opportunities for water sports while the resort towns provide facilities for other recreational activities. The low mountains are excellent for many outdoor sports, such as hiking and camping in the summer and skiing in the winter. More than a dozen parks and game lands are in the area.

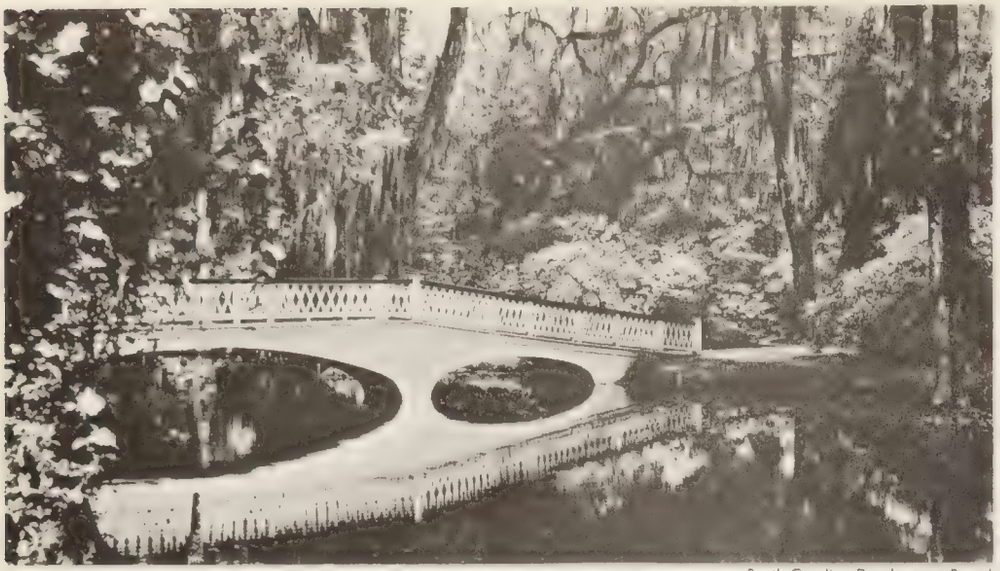
RHODE ISLAND

Newport. Because of its reputation as a resort, Newport's historic importance is often overlooked. There are many historically significant buildings: the Colony House, a national landmark dating from 1739; and the great mansions Chateau-Sur-Mer, The Breakers, and The Elms. The city also contains the oldest synagogue in America, Touro Synagogue. Newport's 100 beaches cover over 400 miles of seashore and are some of the finest in the state. The city also has one of the largest naval bases in the world. Every summer, Newport invites the best jazz and folk music artists to two festivals, the Newport Jazz and the Newport Folk festivals.

Pawtucket. This was the home of Samuel Slater, the English mechanic who built from memory America's first spinning frame. The Old Slater Mill, birthplace of the American textile industry, is now a national landmark and museum with demonstrations of early techniques of the industry. Also of interest is the Daggett House, which features pewter, china, needlework, and other early relics of the Revolutionary War period.

Providence. Founded in 1636 by Roger Williams, Providence has been the state capital since the Revolution. The Old Statehouse is now maintained as a state museum. The new Capitol also contains some relics. Of interest in Providence are the many buildings from Revolutionary times and before, especially the John Brown House, which now houses the State Historical Society; the Providence Athenaeum, one of America's first private libraries; and the new Statehouse with its beautiful marble dome. More relics from the state's history are on display at Brown University, which offers tours of its campus.

SOUTH CAROLINA



Charleston. Although Charleston is now an important seaport, the city's most interesting sites reflect its historical prominence. The most significant site is old Fort Sumter on an island in Charleston Harbor. The Civil War began here as Confederate batteries bombarded the entrenched Union troops. The tiny island has a museum run by historians from the National Park Service who provide lectures and tours. Other attractions include the Boone Hall Plantation, the Old Slave Market Museum, and many beautiful pre-Revolutionary homes.

Columbia. The state capital, Columbia's

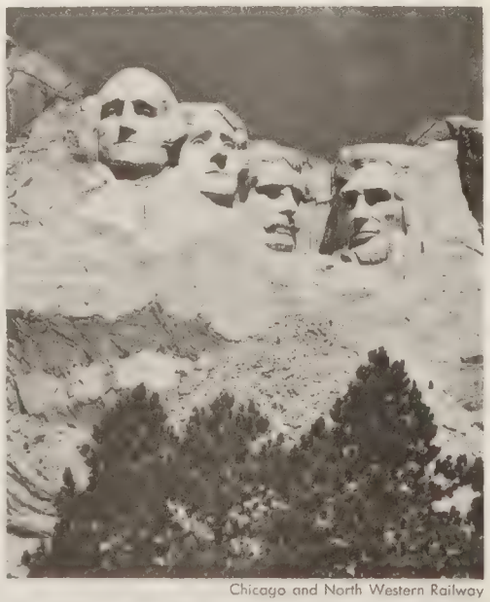
colorful history is reflected by such sites as the Statehouse; bombarded during the Civil War by General Sherman's troops, the building's scars are now marked by brass stars. Also of interest is President Wilson's boyhood home and articles associated with his life. Two of the city's landmarks are the Robert Mills Historic House and Park and the Boyleston House and Garden; the former is known for its architectural significance, and the latter for its private gardens. The University of South Carolina is one of the six colleges and universities in the area. Twenty miles northeast of Columbia is Camden, the oldest inland city of South Carolina. Camden was burned by the British in 1781, devastated by a fire in the early 1800's, and demolished by Federal troops during the Civil War.



Greenville. Although not really a resort, Greenville has the attractions of one. Professional and college sports abound all year round and there are excellent areas for hunting, fishing, camping, and hiking. Greenville's cultural life is enhanced by the internationally famous art gallery and museum at Bob Jones University. Nearby is Spartanburg, a large and diversified industrial town. It is the seat of Converse College as well as a regional campus of the University of South Carolina. The Spartanburg area was the scene of eleven major battles during the Revolutionary War. Nearby, in the Blue Ridge Mountains, is a popular recreation site.

SOUTH DAKOTA

Badlands National Monument. Barren buttes, pinnacles, and gorges cut by millions of years of erosion form the Badlands of South Dakota, an area in the western part of the state, southeast of Rapid City. The formations change color from pale gold to red and gold as the sun moves across the horizon. There are good roads through the area. Archaeologists have uncovered numerous fossils in the monument, many of which are on display. Rapid City College has a large exhibit of fossils and information on prehistoric inhabitants of the Badlands.

Black Hills. The Black Hills National Forest is best known for its Mount Rushmore National Memorial. The 465-foot heads of Washington, Jefferson, Lincoln, and Theodore Roosevelt were carved from the mountainside and reflect the sun's rays most of the day. Southwest is the Crazy Horse Monument, an entire mountain being carved by Korczak Ziolkowski; it will hold the riding figure of Crazy Horse, chief of the Sioux. Mt. Rushmore National Memorial borders on Custer State Park, a 60,000-acre area encompassing three lakes and noted not only for its herds of bison, deer, and elk, but also its zoo, museum, and Black Hills Playhouse. To the north is Deadwood, where Wild Bill Hickok was killed. Each night during the summer, the town puts on a show depicting the story of his death. Also commemorated are the July, 1876, gold rush days of Deadwood. Just outside the Black Hills near Spearfish is the scenic Spearfish Canyon. A production of the 700-year-old passion play depicting the last days of Christ is held each year in Spearfish.

Sioux Falls. The largest city in the state is located in southeastern South Dakota on the Big Sioux River. It is a prosperous city with beautiful parks and homes and such attractions as the Great Plains Zoo and the Dennis the Menace Park nearby. There are other recreational facilities at the Palisades and Dells of the Sioux River. Farther north, near Madison, is Prairie Village, a replica of a frontier town of the 1890's. Actual buildings and farm machinery of that era have been assembled here through the efforts of the Prairie Historical Society.

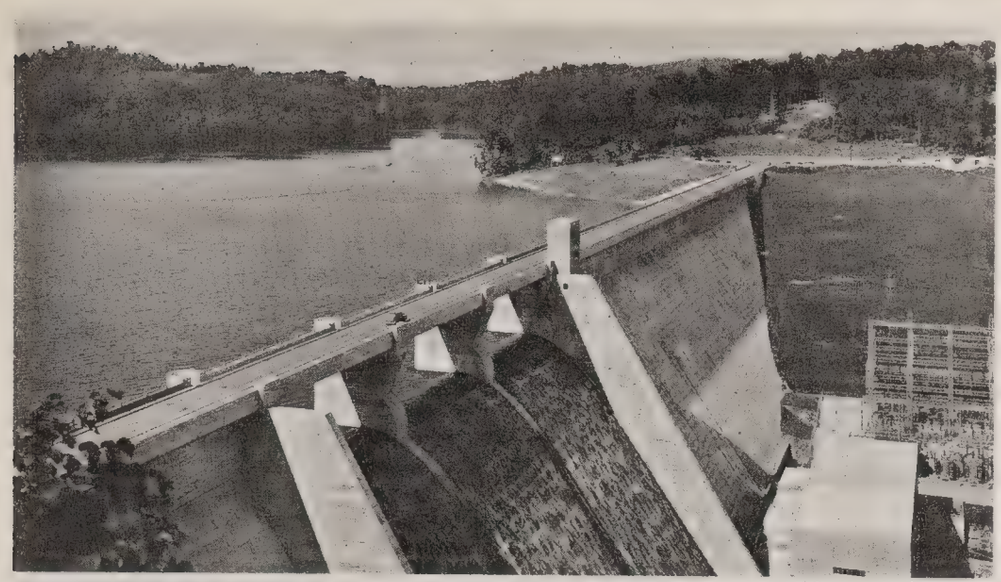
TENNESSEE



Chattanooga. Many Civil War battles were fought in the Chattanooga area. Civil War buffs can visit the battle sites of Chickamauga, Chattanooga, Orchard Knob, Lookout Mountain, and Missionary Ridge. There is also the Confederama which re-creates battles with toy soldiers and special effects. From the summit of Lookout Mountain, one gets excellent views of Lake Chickamauga and the Tennessee River. The Lookout Mountain Caverns, among the major caverns in the state, are also a worthwhile attraction.

Chickamauga and Chattanooga National Military Park. This national military park is located in Georgia and Tennessee. It includes the Civil War battlefields of Chickamauga, Orchard Knob, Lookout Mountain, and Missionary Ridge of the Chattanooga Campaign. Established in 1890, the park is maintained by the National Park Service.

Great Smoky Mountains. These scenic mountains in the Blue Ridge section of eastern Tennessee and western North Carolina derive their name from the smokelike haze covering the many mile-high peaks. Favorite spots in the Great Smoky Mountains National Park are Mt. LeConte, Chimney Tops, Newfound Gap, and Clingman's Dome, Tennessee's highest spot named for Thomas Clingman who first explored the area in the mid-1800's. Hardwood and evergreen forests, rhododendron and mountain laurel shrubs, and many kinds of wildflowers cover the slopes; bears, turkey, and deer abound. Within the park are facilities for horseback riding, swimming, camping, hiking, fishing, and in the winter, skiing.

Knoxville. Once the state capital, Knoxville is now a center for sports, recreation, and education. The city is located on the Tennessee River and thus provides easy access to the vast recreational facilities of the lakes and dams of the Tennessee Valley Authority. A popular tourist attraction is the spring Dogwood Festival. Knoxville is also the home of the University of Tennessee. Other points of interest include the Market Square Mall, the Oak Ridge Atomic Energy Museum, and the Blount Mansion, home of the first governor of the Southwest Territory.

Memphis. Located on the Mississippi River, Memphis is not only Tennessee's largest city, but also its commercial, industrial, and transportation center. It is one of the world's leading hardwood lumber and cotton markets. Each May visitors are attracted to the Cotton Carnival, a festive occasion dedicated to the area's king crop. Also of interest are the modern replicas of steamboats which make short trips to

nearby river spots. The Mississippi River and Lake McKeller provide facilities for numerous water sports. Other attractions are a zoo and the Brooks Memorial Art Gallery located in Overton Park.

Nashville. Although the neoclassical Capitol Building and the statuary are great favorites, they are not the only attractions of the state's second largest city. Artistic and intellectual interests are served by the Parthenon, a full-scale reproduction of the temple in Athens; Cheekwood Botanical Gardens and Fine Arts Center; and many college and university campuses. Among the latter are Vanderbilt and Fisk universities and George Peabody College for Teachers. Nashville is also the Country and Western music capital. At the head of Record Row is the Country Music Hall of Fame. The Grand Ole Opry is located in Nashville, and tours are available of the Opry stars' homes. Nashville is also a historical city where tourists can visit Andrew Jackson's Hermitage, 12 miles from the city; and Fort Nashborough, a reproduction of the stockade which protected the early settlers. Other points of interest are the State Museum; Traveller's Rest, built in 1792 by John Overton, the founder of Memphis; and Belle Meade Mansion, an outstanding example of Greek Revival architecture and site of one of the first thoroughbred horse-breeding farms in the United States.

TEXAS

Austin. Originally settled in 1838 as Waterloo, the capital of the Texas republic, it was renamed Austin in 1839 in honor of Stephen F. Austin, a leader in the colonization of Texas. It became the permanent capital of the state of Texas in 1870. The Capitol complex is dominated by one of the largest capitol buildings in the United States. The architecture is classically southern; the rooms contain antique furniture and items of historical significance. Also located in Austin is the main campus of the University of Texas. Fifty miles west of the city is the LBJ Ranch, home of former president Lyndon B. Johnson.

Big Bend National Park. This national park is located in the great bend of the Rio Grande River on the border of Texas and Mexico. It is full of magnificent mountain and desert scenery and various types of geologic formations. The park contains a variety of indigenous plants and animal life. Also of interest are the trails leading to Juniper Flat, the South Rim, and the Widow; particularly scenic are Bouquillas and Santa Elena canyons. There are also facilities for camping, hiking, and horseback riding.

Corpus Christi. The focal point for most visitors is the marina with its resort facilities and amusements. The city is also an important seaport and cultural center. Offshore is the Padre Island National Seashore, an 80-mile natural shoreline preserve located on Padre Island.

Dallas. Although the city started as one cabin built in 1841 near the present county courthouse lawn, Dallas is now a cultural center known for its symphony halls, theaters, art galleries, and museums. Also of interest are the Hall of State, Southern Methodist University, and the Marsalis Zoo. Another attraction is the Dallas Theater Center, the only theater designed by Frank Lloyd Wright. In addition, the city's excellent climate makes outdoor entertainment a popular activity. The Dallas Cowboys, a professional football team, play in the Cotton Bowl Stadium, and the Spurs, a minor league baseball team, play in Turnpike Stadium. State Fair Park, nearby, is the home of the largest state exposition in the country; it includes an aquarium, Cotton Bowl Stadium, Garden Center, and several museums.

El Paso. One of the oldest towns in west Texas, El Paso is the home of many Spanish missions, some older than the famous California missions. Because it is the largest of the border cities, it is an important trade center. However, the greatest attraction of El Paso is its international atmosphere emphasized by bilingual traffic signs and advertisements. Just across the Rio Grande is Juarez, which adds the flavor of Mexico to the varied life-style of El Paso. Along the border to the southeast are the Quitman, Vieja, and Chinati mountains.

Fort Worth. Although an important livestock center, Fort Worth is also a leading manufacturer of aircraft, boats, mobile homes, and candy. Of interest in the city are the Will Rogers Memorial Museum, the Nobel Planetarium, and Texas Christian University. Culturally, the city is served by the Fort Worth Art Center, the Amon Carter Museum of Western Art, and the Fort Worth Opera and Symphony. Nearby, at Arlington, is Six Flags Over Texas, a family entertainment complex and historical display center.

Houston. Texas' largest city has become one of the finest cultural and resort centers in the South. It is also a major port, having access to the Gulf via the Houston Ship Channel. There are many parks and monuments in the city; among them are Sam Houston National Forest, San Jacinto Battleground State Park, and Hermann Park with its zoo, gardens, and amphitheater. Adjacent to the zoo is a reminder of the city's role in the scientific world, the Texas Medical Center. Twenty miles outside of

The Alamo, in Texas, was the site of the last stand by a group of Texans in their fight for independence from Mexico in 1836.

Houston is the Manned Spacecraft Center of the National Aeronautics and Space Administration. NASA has a museum in the center which is open to the public a few hours each day. Other attractions in Houston include the Museum of Fine Arts and the Contemporary Arts Museum. Rice University is one of Houston's many institutions of higher learning. A popular tourist attraction is the Astrodome, America's largest enclosed stadium, home of the Houston Astros baseball team and the National Football League Houston Oilers. It is also used for boxing matches and other sporting events, and for conventions.

San Antonio. Of all the historical landmarks in the Southwest, San Antonio's Alamo is probably the best known. It was originally the chapel of a mission founded in 1718. In 1836, 187 Americans, using it as a fortress, held Santa Anna's Mexican army at bay for 13 days before being overrun. The Spanish heritage is preserved in La Villita (the little village), the famous San Jose Mission, and the Paseo del Rio (the river walk), an art and recreational

center. In contrast to its old-world charm are the modern features of the state's third largest city. Brackenridge Park holds one of the nation's largest zoos and the lovely Chinese Gardens. St. Mary's and Trinity universities lie within the city. Annual rodeos, festivals, and musical performances are popular. Huge military centers are in the area.

UTAH

Bryce Canyon National Park. Bryce Canyon's 14 horseshoe-shaped amphitheaters comprise the 55-square-mile park located in southwestern Utah, 275 miles south of Salt Lake City. Eroded limestone formations of every conceivable shape fill these amphitheaters with imaginary temples and castles. The pinks, reds, and oranges of the pinnacles change with the moving sun. A highway along the rim of the plateau above leads to Rainbow Point; it passes by 12 scenic viewing areas which have trails leading to the canyon floor below. Although the campgrounds and other accommodations are closed for the winter by early October, the major viewing areas and the visitor center are open all year. Campgrounds and rooms can be found nearby.

Utah Tourist and Publicity Council

Queen's Castle, in Bryce Canyon National Park in Utah, is one of many erosion-produced rock formations in the area.

Salt Lake City. Salt Lake City is a cultural and commercial metropolis located at the foot of the Wasatch Mountains in the Great Salt Lake Valley. Brigham Young founded the city in 1847 for his Mormon followers who were unwelcome in other areas of the country. It became the state capital when Utah was admitted to the Union in 1896. Weekday tours of the Capitol Building include the rotunda, exhibition hall, gold room, and the third floor Senate, House, and Supreme Court Chambers. Nearby are Capitol Hill Park and the Mormon Battalion Monument. A few blocks south is Temple Square and the famous Mormon Temple and Tabernacle. Although the Temple is not open to the public, the Tabernacle is. Built from native timber, the Tabernacle has a fine 11,000-pipe organ which is used for organ and choir concerts and recitals. The Tabernacle Choir is one of the most respected choral groups in the world. Other attractions in the Temple Square area are the Assembly Hall, the unique Seagull Monument, and the Church Museum. Also nearby are Beehive House, which was Brigham Young's home, Hansen Planetarium, Liberty Park, and the Salt Lake Art Center. A few miles west is the Great Salt Lake, remarkable for its saline content. Once a deep prehistoric lake covering a vast area, it has since receded to form the Great Salt Lake Desert and the Bonneville Salt Flats, an unusually level stretch of terrain famous for world land-speed records.

Zion National Park. The colorful, deep, narrow canyons and rock masses in this area were formed by erosion and faulting patterns which in turn created phenomenal shapes and landscapes. Zion Canyon is an awe-inspiring, vertically walled chasm. Formerly, there was volcanic activity in this area. Zion's 155 miles of trails pass numerous masses of rock formations, many named by the Mormons: Great White Throne, Three Patriarchs, Checkerboard Mesa, and others. The Mount Carmel Highway passes through a mile-long tunnel blasted from solid granite. Large windows cut in the tunnel's sides frame the spectacular views.

VERMONT

Bennington. Three villages make up the Bennington area complex. Old Bennington has a Revolutionary War center, with an obelisk commemorating the war. Nearby is the site where John Stark won the Battle of Bennington. Just south is a monument on the site of the Old Catamount Tavern where Ethan Allen planned to seize Fort Ticonderoga. Bennington Village, a center for both crafts and industry, has a museum of early American artifacts. Bennington College, a pioneer among independent study institutions, is in North Bennington. The town is also the home of Cushman Colonial furniture, whose products are exhibited in the family's stone mansion. Farther north is Manchester and the Southern Vermont Art Center.

Burlington. Vermont's largest city is located on Lake Champlain. Formerly an important lumber port, today it is the cultural center of the area; the University of Vermont, Trinity College, and Champlain College contain numerous museums and host concerts, public lectures, and dramatic performances. Less than 150 miles east of the city in the Green Mountain range is Stowe, a ski resort on the slopes of Mt. Mansfield. Horseback riding, golf, tennis, and hiking are as popular as winter skiing. The Green Mountains, which extend the length of the state, were the home of Ethan Allen and his Green Mountain Boys of the Revolution in New England.

Montpelier. Built on hills, Montpelier is recognized from miles away by the State Capitol's gold dome. The Vermont Historical Society Museum is filled with objects from the settlement days. Within the Supreme Court Building is the State Library. Wood Gallery of Art was established by the Vermont artist Thomas W. Wood. The National Life Insurance Company headquarters overlooks the city and provides free tours, movies, and lectures on Vermont.

VIRGINIA

Arlington–Alexandria. Just across from the nation's capital on the west side of the Potomac River is Arlington National Cemetery; its scores of white crosses mark the graves of men who died in the country's defense. Also in the cemetery are the graves of Robert F. and John F. Kennedy, the Tomb of the Unknown Soldier, and the Custis-Lee Mansion. There are many old buildings in the Alexandria area. The favorite is Mt. Vernon, George Washington's home for many years. Others are Gunston Hall, Woodlawn, and Pohick Church.

Charlottesville. Thomas Jefferson took 35 years building his home near Charlottesville. When he was through, he had created Monticello, one of the nation's greatest architectural achievements. It is ingenious in its gadgetry and beautiful in its design. In the city is one of Jefferson's favorite creations – the University of Virginia. He designed the buildings, and as

the school's first rector, he set the high standards that are still maintained. In the vicinity are Michie Tavern, where the waltz was introduced to Virginia; and Ash Lawn, home of James Monroe.

Fredericksburg. Fredericksburg was the site of a major Civil War battle in which the city changed hands several times; it was finally retained by the Confederate troops under General Longstreet until the close of the Civil War. This battlefield and that of Chancellorsville are now historic national military parks where Civil War buffs can retrace the battles. Nearby is the house where Stonewall Jackson died, and the law office of James Monroe.

Newport News–Hampton. Newport News, one of the ports on Hampton Roads in southwest Virginia, is the home of the world's largest privately owned shipyard, the Newport News Shipbuilding and Dry Dock Center. It is also the home of America's largest naval installation, the Norfolk Naval Station. The area has many naval and maritime museums including the Mariners Museum and the War Memorial Museum. Just south is the east coast surfing capital, Virginia Beach.

Williamsburg–Jamestown. Located in southeastern Virginia between the James and York rivers is Williamsburg, the most ambitious colonial restoration in America. The reconstruction of the city began in 1927; today 83 original 18th-century structures stand restored, and 48 major colonial buildings have been rebuilt on their original sites. These structures include the Capitol, meeting place of the Virginia Assembly; the Raleigh Tavern, center of pre-Revolutionary political activity; and the Burton Parish Church, one of the oldest Protestant Episcopal churches in America. Williamsburg is also the site of William and Mary College; the school's original building is the oldest college building still in use in the United States. At the west end of the city are many restored craft shops where the work of 18th-century artisans is demonstrated. Costumed craftsmen explain their work to visitors.

Ten miles south of Williamsburg is the island Jamestown, site of the first permanent English settlement in America. Most of the area is included in the Colonial National Historical Park. The tower from the Jamestown Church and the old cemetery are two of the few remaining relics in Jamestown.

Richmond. Since 1779 Richmond has been the capital of the Commonwealth of Virginia, the Confederacy, and now the state of Virginia. In 1865, during the final evacuation before the oncoming Federal forces, the citizens set fire to their own city; the flames, however, missed some of the most famous structures which are preserved today. One of these is St. John's Church where Patrick Henry delivered his famous speech which included the lines "Give me liberty or give me death." The White House of the Confederacy, once the home of Jefferson Davis, has a museum of relics from the Civil War. The Capitol Building also hosts a museum and displays the only statue of George Washington made during his lifetime. Throughout the city there are many statues of notables from Virginia and the Confederacy. At Richmond Battlefield Park visitors can relive the maneuvers of Lee and Grant, and McClellan and Jackson during their Civil War battles. Richmond is now one of the most progressive cities in the South; its Museum of Fine Arts pioneered mobile galleries to carry exhibits throughout the state.

Shenandoah Valley. Called "Daughter of the Stars" by the Indians, the valley is one of the most beautiful places in the state. There are specific attractions in the mountains: battlefield parks, McCormick's farm where the reaper was invented, apple blossom festivals, many caverns, and the Virginia Military Institute at Lexington. The real attraction of the area, however, is the scenery. Skyline Drive runs along the ridge of the Blue Ridge Mountains, surrounded by Shenandoah National Park, which has facilities for camping, fishing, hiking, and other outdoor amusements.

WASHINGTON

Grand Coulee Dam. Northwest of Spokane on the Columbia River is the Grand Coulee Dam, the world's largest concrete dam. It has converted a large portion of the river into a reservoir and has helped irrigate acres of farmland as well as provide electrical power for the state.

Mount Rainier National Park. Mt. Rainier is a 14,410-foot high dormant volcano. Its craterlike summit is a favorite goal of climbers. The greatest single-peak glacial system in the United States originates from its summit and slopes. It is an excellent ski area. The peak is snow-covered throughout the year. There are guided tours of the peak and the nearby glaciers and caves.

Olympia. The capital city is at the

southern end of Puget Sound, gateway to the Olympic Peninsula. The State Legislative building is the center of a large Capitol complex which contains 17 state buildings. On the peninsula is a large recreational area, Olympic National Park. The park in the Olympic Mountains is a wilderness preserve with rain forests, wildlife, and glaciers.

Seattle. Seattle is a seaport and home of the University of Washington. The Seattle Center, near Puget Sound, is a concentration of amusements and cultural facilities, including the Space Needle, Opera House, and Coliseum. A monorail leads to the Center from downtown. Cruises and tours of the docks and the surrounding waterfront are a sightseeing adventure. Along the salt-water strip one may find shops with imports from the Far East as well as restaurants specializing in seafood. The city's aquarium has killer whales and other sea animals. The old section of Seattle, which was destroyed by fire in 1889, has since been rebuilt on higher ground. Many storefronts still exist underground and can be seen on the Underground Tour. Lake Washington borders the city on the east. Along its western shore are lakefront parks with facilities for water sports. Seattle is also a starting point for tours of the surrounding areas of Mt. Rainier, the Cascade Range, Olympic Peninsula, and the San Juan Islands.

WEST VIRGINIA

Charleston. The state capital, located on the Kanawha River and at the mouth of the Elk River, is the state's industrial center. Dominating the city is the Capitol Building, with its 300-foot high dome. Included in the Capitol complex are the state museum, and the Stonewall Jackson and Pioneer monuments. Sunrise, an estate containing two restored mansions, is of interest to visitors; one of the mansions is occupied by the Children's Museum and Planetarium.

Harpers Ferry. Situated at the confluence of the Potomac and Shenandoah rivers, Harpers Ferry played an important role in the Civil War. Harpers Ferry National Historic Park, scene of John Brown's raid in 1859, is located here. A monument marks the site where John Brown met final defeat; nearby is the place where he was hanged. The engine house, known as John Brown's Fort, now contains a museum; it is located on the Storer College campus.

Huntington. This city, 30 miles west of Charleston, is the home of one of the state's biggest glassmaking plants. There are six plants which offer tours of their facilities; visitors can watch the art of glass blowing as it has been done for centuries.

The New River winds through Grandview State Park in West Virginia. The state's spectacular scenery and its many mineral springs attract a million visitors each year.

WISCONSIN

Madison. Madison is both the state capital and the home of the University of Wisconsin. The State Building, known for its dome which is second in height only to that of the White House, has an observation platform near the top which provides an excellent view of the lakes in the surrounding area. The University of Wisconsin, one of the nation's ten largest, borders on Lake Mendota. Many of its facilities are open to the public. Other points of interest in Madison are the World Shrine of Our Lady of the Green Scapular, the U. S. Forest Products Laboratory, and the Vilas Park zoo. In the vicinity are Cave of the Mounds and the Aztalan Historical-Memorial Park with its stockade and Indian mounds.

Milwaukee and Environs. Milwaukee, strategically located on Lake Michigan, is known to millions as the beer capital of the United States. Some of the country's largest breweries are found here and offer daily tours through their facilities. The city is known for its German cuisine. The Public Museum, the new Public Museum of Science and Industry, the Milwaukee Art Center, and the Allis Art Library enhance Milwaukee's cultural life. Recreational facilities are available at the many fine parks, at the professional sporting events, and at the Milwaukee County Zoo, one of the finest in the country. Fifty-five miles north of Milwaukee is Sheboygan, a shipping center and also noted for the production of bratwurst, spices, and herbs. Southwest of Milwaukee is the popular resort area of Lake Geneva, with its many fine estates and sailboat races. At Williams Bay stands Yerkes Astronomical Observatory, operated by the University of Chicago. Northwest of Milwaukee are the resort areas of Lake Winnebago, Fond du Lac, and Door County.

Northwoods Country. This name is applied to the counties in north-central Wisconsin which border on Michigan's Upper Peninsula. Rhinelander is the southern gateway to the area which abounds in lakes, streams, and forests. Long a popular region of summer resorts, it has become a year-round recreation center because of improved accessibility. In winter, the sports of skiing and snowmobiling draw many visitors to the area.

The Wisconsin Dells is a gorge that was cut into the sandstone when glaciers dammed the Wisconsin River a million years ago.

Wisconsin Dells. The Dells is an area of beautiful rock and cliff formations along the Wisconsin River. The Upper Dells are best viewed from both land and water; boat rides are available. The Lower Dells can be seen on a one-hour boat ride. Other attractions in the Dells are the Storybook Gardens and the Tommy Bartlett Water Show. Baraboo is 13 miles south. For many years the home of the Ringling Brothers Circus, it now has the Circus World Museum which offers special shows about life in the circus. A few miles farther is Devil's Lake State Park. Glaciers which cut the lake left many unusual geological formations, notably Devil's Doorway, Turk's Head, The Needle, and Ancient Rock.

WYOMING

Cheyenne. Cheyenne, an important trade and transportation center, draws much of its wealth from the cattle industry. The city is world-famous for the rodeos, which are held every July during the Frontier Days celebration. Points of inter-

Devil's Tower National Monument. Designated by President Theodore Roosevelt in 1906 as the country's first national monument, Devil's Tower is an 865-foot volcanic neck, formed about 50 million years ago. In the surrounding area are the Black Hills National Forest and Keyhole State Park, both of which provide year-round facilities for hunting, camping, boating, and fishing.

Grand Teton National Park. The series of peaks comprising the most impressive part of the Teton range makes up Grand Teton National Park. In earlier days, these beautiful grey-blue, snow-capped peaks were a noted landmark for the Indians. Grand Teton Park, the Snake River, and Jackson Lake are excellent places to fish, boat, ski, and sail. The park is open all year, but the guest ranches, lodges, cabins, and campgrounds are open only during the summer. A point of interest is the Church of the Transfiguration. The surrounding Jackson Hole country is an excellent resort area.

Yellowstone National Park. Yellowstone is the first and largest of the country's national parks. It is the world's greatest geyser area, with about 3,000 geysers and hot springs. Old Faithful Geyser, which erupts every hour, is a major attraction. Others erupting less regularly are Grand Geyser, Grotto, Little Cub, Daisy, and Jewel. The park is rich in wildlife; the bears which roam the park freely provide memorable entertainment. Also of interest are the waterfalls and the Grand Canyon of Yellowstone, both products of the Yellowstone River and easily accessible by roads and trails. Facilities are available for lodging or camping within the park; the surrounding area has many other accommodations.

GUAM

Since the disastrous typhoons of 1962 and 1963, Guam has become a tourist mecca. With 90 percent of the housing and industry destroyed, the government came to regard the beaches and subtropical climate as the major asset of the island and began a program to develop tourism.

Several cultures have intermingled on Guam for many years. Still visible around the island are ruins of the Chamorros, the island's first inhabitants. Agana, the capital, resembles a modern U.S. community. Old Agana was completely destroyed during the reoccupation of the island by American Forces in 1944. The island villages are quite picturesque. Recreational activities on the island include legalized cockfights and other gambling games, fiestas, and a 50-mile trip around the island. Because Guam is duty-free, prices of foreign goods are quite attractive to tourists. Bargains from Japan and Hong Kong are found in most shops and stores in the cities.

Guam is one of the important military bases of the United States in the Pacific; the island's economy is based primarily on employment on military installations. Agriculture is the other important element in the economy.

PUERTO RICO

Puerto Rico's balmy climate, natural beaches, and blue skies make tourism its richest natural resource. Its potential became evident with the building of the Caribe Hilton in 1950. The hotel's success induced other private investors to develop resort facilities on the island. Puerto Rico's hotels have increased their capacity by 3,200 rooms since 1950. Experts estimate that five times that number will be needed by 1980 to accommodate the increasing numbers of visitors. Many hotels have been built in cities around the island: large hotels in San Juan, Dorado, and Fajardo, and smaller ones in Mayaquez and Ponce.

The major cities are resort areas. All are on the seashore and occupy only a small part of the hundreds of miles of ocean front. Some of the areas are highly developed; others are completely deserted. Puerto Rican law has made all beaches public land; the most famous are those near San Juan and Luquillo. The steady, high waves have made surfing one of the most popular sports on the island. The beaches near Mayaquez were chosen as the site of the 1968 world surfing championships. Deep-sea fishing facilities are provided at Mayaquez, San Juan, Fajardo, and Ponce. Inland, there are many freshwater streams and pools which are beautiful but dangerous. Swimming in them is

not recommended because they are infested with a parasitic blood fluke genus *Schistosoma*, harmful to man. The other main inland attractions are the mountain coffee plantations above Utado and the ruins of the Taino Indian culture.

The main historic sites in Puerto Rico are the Spanish forts which protected the settlers from the Carib Indians first, then the privateers, and then the enemies of Spain in the New World. El Morro and San Christobal are now maintained by rangers from the National Park Service. A smaller fort, San Geronimo, is maintained as a military history museum. Old San Juan is a seven-block-square area enclosed by Spanish walls, offering visitors a glimpse of the colonial life in Puerto Rico. San Germán in the southwest is a well-preserved colonial settlement; its Porta Coeli Museum of religious art is the focus of interest.

The island's 350 years of Spanish rule are most evident in its night life. The most popular attractions are the flamenco dance shows and guitarists, the Latin combos and jazz musicians, and Mexican and Puerto Rican songfests. Some clubs offer a discotheque atmosphere and contemporary shows with rock groups and electric light shows.

The tourist trade annually brings over 200 million dollars to Puerto Rico and directly provides 15,000 jobs for Puerto Ricans; other jobs are created by the construction of future tourist facilities. The economic development program, Operation Bootstrap, inaugurated in the 1940's, has helped the island make great strides in its industrial and agricultural expansion. Extensive urban renewal projects have also bolstered the economy.

VIRGIN ISLANDS OF THE U.S.

Lying in the Caribbean, the Virgin Islands are a subtropical paradise. Numbering over 50 islands or keys in all, those of St. Croix, St. Thomas, and St. John are the largest. The annual average temperature is in the high 70's, the same as Hawaii's. Although the islands lie in the hurricane belt of the Atlantic, modern forecasting techniques have eliminated most of the danger. Their proximity to the United States mainland has made them a popular, easily accessible, winter vacation spot. Many tourists are now recognizing their value as a summer resort, for the differences here between the seasons are very slight. The official language is English, and American money, postage, and other conventions are used.

The greatest attraction of the Virgin Islands are the beaches. There are miles of developed and natural beaches. The best are usually found around the cities, but most bays and inlets which ring the islands also have excellent beaches. Magens Bay on the north side of St. Thomas has one of the ten most beautiful beaches in the world. The sparkling white sands and clear water provide excellent facilities for swimming, sailing, water-skiing, and snorkeling. Game fishing is popular, and charter boats set out daily to the surrounding waters for record-size game fish. Other popular outdoor activities are tennis, baseball, and basketball.

Although St. Croix is flat, St. Thomas and St. John are fairly mountainous. They rise from the same plateau, and their peaks reach up 1,500 feet above sea level, offering an excellent view of the countryside.

The harbor at Charlotte Amalie, St. Thomas, U.S. Virgin Islands, with its duty-free bargains and picturesque scenery, is the busiest cruise port in the Carribean Sea.

There are several cities which are of particular interest. Christiansted on St. Croix dates from the early days of the Danish occupation. Fort Christiansted is now a National Historic Site, a fine example of early Danish military architecture. The Steeple Building which was previously a church, a bakery, a hospital, and a school, is now a museum. Government House was once the seat of the Danish government and the home of the Danish governors. Its Grand Ballroom is furnished with Danish antiques, a gift from Denmark. Other buildings in the Danish style are preserved, and many house shops stock merchandise from all over the world. Frederiksted, a picturesque city on western St. Croix, is best known for the Whim estate a few miles away. The Whim Greathouse is of classic 18th-century design; it houses collections of furniture, china, and other artifacts which date back to its plantation days. Charlotte Amalie on St. Thomas is the territorial capital. The hilltops surrounding St. Thomas harbor and Charlotte Amalie offer spectacular views of the adjacent islands. The harbor, sidewalk cafes, and seaplane rides are other attractions. The main feature on St. John is the Virgin Islands National Park which comprises two-thirds of this island. St. John has no airport and no industry; the beach is its main attraction. Tektite II, the laboratory habitat of aquanauts engaged in an underwater exploration program, is anchored on the bottom of Lameshur Bay, St. John.

Although the Carib Indians and the Spanish were here for many years, only occasional historical structures are found. The most famous is La Fortaleza, a fort built to protect settlers from Carib attacks. Most historical sites are of Danish origin. Annaberg, on St. John, is a good example. A plantation and factory for the production of sugar, molasses, and rum remains almost intact. During the 1700's over 100 plantations and 20 factories were built. However, the abolition of slavery in 1848 precipitated a decline in the plantation industry. Ruins of the Danish plantation system remain on the islands.

Native entertainment offers the most popular night life. Clubs, cafes, and restaurants feature Latin dancing, limbo, calypso singers, and Latin combos. The favorite instrument is the pan, improvised from an oil drum and played with mallets. There are also contemporary music and modern film and stage theaters.

While tourism is an important industry here, it is not as crucial as in some other territories. The main crop of the Virgin Islands is sugar cane. It is slowly becoming less profitable, however, and the flatlands of St. Croix are being used more and more for cattle grazing, which has become the Islands' second leading industry. This uses most of the arable land, so the agriculture industry is decreasing; what little remains is mostly in vegetables and fruits. The biggest use for the sugar cane grown here is in the rum for which the area is famous. A few small businesses have plants here, taking advantage of its duty-free status.

To multiply two numbers, each of 30 or less, find one of the numbers along the side of the table and follow this row to the column headed at the top by the other number. Thus: $14 \times 19 = 266$.

COMPOUND INTEREST TABLE

This table provides factors for computing the amount accumulated from, and the compound interest paid on, any principal at various interest rates over n years. These factors are defined by the *Annual Rate of Compound Interest* (given in a row along the top) and the *Years of Interest* (given in columns along the sides). To find the amount accumulated, multiply the original principal by the appropriate factor from the table. To find only the interest paid on the principal, subtract the original principal from the accumulated amount after n years.

For example: To find the amount accumulated from an original principal of $100 at 3½% annual interest after 20 years, multiply $100 by the appropriate factor from the table (1.9898). $100 × 1.9898 = $198.98. The amount accumulated after 20 years is the product, or $198.98. To find only the interest paid, subtract the original principal ($100) from the accumulated amount ($198.98). $198.98 − $100 = $98.98. The total interest paid over 20 years is the difference, or $98.98.

TIME ZONES OF THE WORLD

The globe is divided into twenty-four time zones — each 15° wide. The zone in which Greenwich, England, is located has been chosen as the "zero" point and is used as the point against which the times of the cities in the world are compared. The time in that zone is called Greenwich Mean Time (abbreviated GMT). Because the earth rotates to the east, zones to the west of Greenwich are behind GMT; zones to the east of Greenwich are ahead of GMT.

This time chart shows how far ahead or behind GMT the principal cities in the world are. If we assume it is twelve noon in Greenwich and begin traveling either east or west, we will reach a point on the other side of the world where it is midnight. Continuing past this point (approximately the 180th meridian, located in the 12th time zone and called the International Date Line) we will gain a day if traveling west, and lose a day if traveling east.

If the local time is known in any city of the world, then the local time can be found for any other city by comparing them both to GMT. If both cities are ahead of GMT or if both are behind GMT, then the smaller number (from the fourth or fifth column in the chart) is subtracted from the larger number (from the same column) to find the hours difference between the two cities. If one city is ahead of GMT and the other behind, then their differences from GMT are added; that is, the figure from column four and the figure from column five are added, to obtain the difference in hours between the two cities.

When the difference in time between the two cities is known, then that difference is added to the local time in the more westerly city to obtain the local time in the other. Or the difference can be subtracted from the local time in the more easterly city to obtain the local time in the other.

STANDARD TIME ZONES

In the standard time zone system, the world is divided into 24 longitudinal zones of 15° each. The Greenwich meridian has been designated as the starting point and is the center of the "zero" time zone. Each subsequent 15° zone represents a difference in time of one hour from the previous zone. Since the earth rotates from west to east, the zones west of Greenwich are later in time and the zones east are earlier in time than Greenwich.

The twelfth time zone is numbered both +12 and −12 and is divided, with some variation, by the 180th meridian which has been designated as the International Date Line. Moving across this line to the west, the traveler adds one day to the calendar date, and crossing this line to the east the traveler subtracts one day from the calendar date. The position of the International Data Line, fixed by international agreement, is indicated by a heavy dotted line on this map.

The zones on this map are identified by a number which represents the difference in hours between that zone and Greenwich time. At the border of the map, each zone is shaded. Those regions within the zone whose times conform with the zone time are shaded with the same tone as the border. Those regions within a zone whose times differ from the standard zone time are shaded with a different tone and display a number indicating the difference in that region's time from Greenwich time.

PERPETUAL CALENDAR

This calendar will give you the day of the week on which a date falls during the two centuries from 1901 to the year 2100. To locate the day, first look at the proper year in the list below. A letter follows this year which indicates the calendar in use during that year.

AN ENVIRONMENTAL GLOSSARY

by ROBERT F. KUNZ

The following glossary is intended as a guide to some of the more common terms appearing in our news media, related to the current crisis concerning the quality of our environment.

Airshed: A common air supply demarcated by arbitrary or convenient borders, such as an urban area.

Allowable release levels: Levels of nuclear radiation that are officially accepted as harmless to humans. Some scientists claim there is no radiation level below which genetic damage, cancer, or shortening of life does not occur.

Aquifers: Underground water-bearing rock strata that supply most of our well water.

Biodegraduable: Organic substance that is quickly broken down by normal environmental processes.

Biological magnification: The process whereby an organism can build up and store quantities of a substance vastly in excess of the average concentration in its' environment. For example, oysters can extract pesticides to 80,000 times the amount in the water around them.

Biosphere: That envelope made up of the Earth's waters, land crust, and atmosphere where all organisms, including man, live.

Biota: All living organisms, both plant and animal, of a region or period.

BOD: The biological oxygen demand of aquatic organisms for survival.

Carcinogen: A substance capable of provoking cancer.

Chlorinated hydrocarbons: Insecticides that last for years or decades, travel around the globe in the air and water, and accumulate in hazardous concentrations in the tissues of nontarget animals. Examples are: DDT, DDD, Endrin, TDE, Aldrin, Dieldrin, Toxaphene, Heptachlor, and Lindane (BH-C).

Coliform bacteria: Microscopic one-celled organisms that are always but not exclusively present in human intestines.

Compost: A mixing of garbage and degradable trash with soil in a pile. Bacteria in the soil cause decomposition and thereby return desirable organic material back to nature.

Decibel: The unit of measuring the intensity of sound. Zero on the decibel scale is the slightest sound that can be heard by humans—rustling leaves, breathing. The scale: EARDRUM RUPTURES (140 decibels—jet taking off); DEAFENING (100 decibels—thunder, car horn at three feet, loud motorcycle, loud power lawn mower); VERY LOUD (eighty decibels—portable sander, food blender; continued exposure brings about loss of hearing, impossible to use phone); LOUD (sixty decibels—city playground, average restaurant or living room); FAINT (twenty decibels—courtroom or classroom, private office, a whisper at five feet).

Decomposers: Living plants and animals, chiefly fungi and bacteria, that live by extracting energy from the tissues of dead plants and animals.

Demography: The study of populations—births, deaths, marriages, etc.—by means of statistics.

Ecocide: A substance which enters, permeates, and kills an entire system, be that system an insect pest, a lake, or a man-environment community.

Ecosystem: An integrated unit or "system" in nature, sufficient unto itself, to be studied as a separate entity—e.g., a rotting log in the forest, a coral atoll, a continent, or the Earth with all its biota.

Effluent: A discharge from an exit that is relatively self-contained, such as an industrial smokestack, nuclear power plant thermal plume, or a sewage treatment plant; generally carrying pollutants.

Energy cycle: The process by which the energy of the sun is passed from one living organism to another or is stored, as in coal or oil.

Environment: All that surrounds a designated ecosystem.

Estuary: A coastal area of high marine productivity where fresh and salt waters mingle, including the associated tidal rivers, marshes, flats, lagoons, bays, and shallow sounds.

Eutrophication: An aging process that occurs to aquatic ecosystems naturally over a long period of time. Nutrients entering the water support an increasingly dense growth of aquatic life, which depletes the oxygen supply. In time, the body of water progresses from lake or pond to swamp, marsh, and meadow. Eutrophication can be accelerated by excessive nutrient enrichment resulting from man-made fertilizers, detergents, and human and animal wastes.

Green revolution: The hoped-for arithmetical increase in agricultural production that would provide food for the geometrically increasing human population.

Greenhouse effect: The effect of pollution in the air that absorb infrared or heat rays and so prevent the radiation back into space of a certain fraction of the energy Earth receives from the sun.

Herbicide: A kind of chemical that injures or kills plant life by interfering with normal growth.

Hydrology: The study of water in all its forms and manifestations in the biosphere.

Inversion: An atmospheric condition occurring when a layer of cool air sits on a layer of hot air and prevents the warmer air from rising. If the stagnant hot air is heavily polluted, it becomes increasingly harmful to life.

Nitrogen fixation: The process whereby bacteria and other soil microorganisms convert atmospheric nitrogen into nitrates, which become available to growing plants.

Non-renewable resources: Resources that once used (or misused) cannot renew themselves. For example: coal, oil.

Particulates: Dust and soot in the air.

Phosphates: Salts and esters of phosphoric acid, containing phosphorus.

Photosynthesis: The photochemical process by which the energy in light, acting in presence of a catalyst—such as the pigment chlorophyll—converts atmospheric carbon dioxide, water, and inorganic salts into tissue. The fundamental food-making process in green plants on which all life on Earth directly or indirectly depends.

Plankton: The microscopic floating plant and animal organisms of lakes, rivers, and oceans. Basic organisms in the food chains leading to the large fishes and aquatic mammals. A critical source of oxygen for the entire world.

Pollution: The condition of any system unable to recleanse itself.

Producers: Green plants upon which all other living things ultimately depend.

Pumped storage power plant: A technological device designed to supply extra electric power during peak-load periods. At those hours (late evening, early morning) when extra power is available, water is pumped from a lower to an upper reservoir. During the periods of peak-load demand (beginning and end of the workday), the stored water is is dropped through turbines to produce the needed power.

Recycling: The reutilization of natural resources and man-made products.

Renewable resources: Those biological resources which renew themselves by growth and reproduction.

Smog: As originally defined in England, smoke plus fog equals smog. It has come to mean air that is heavily contaminated with particulates, nitrogen oxides, and waste hydrocarbons.

Sonic boom: Shock wave produced by movement of objects through the atmosphere at speeds faster than the speed of sound.

Symbiosis: The association of two or more organisms for mutual benefit.

Thermal pollution: The ejection of heated water into the environment, usually aquatic ecosystems, raising the temperature above normal limits.

Trophic level: The energy level at which an organism sustains itself.

Wetland: Inland—any area that is more or less regularly wet or flooded, where the water table stands at or above the land surface for at least part of the year. Coastal—land types such as salt marshes, tidal marshes, and brackish marshes subject to saline and/or tidal influences.

In Congress, July 4, 1776

The unanimous Declaration of the thirteen united States of America,

When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the Powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shown, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same Object evinces a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security.—Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their Public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative Powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the mean time exposed to all the dangers of invasion from without, and convulsions within.

He has endeavoured to prevent the population of these States; for that purpose obstructing the Laws of Naturalization of Foreigners; refusing to pass others to encourage their migration hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary Powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our People, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without the Consent of our legislature.

He has affected to render the Military independent of and superior to the Civil Power.

He has combined with others to subject us to a jurisdiction foreign to our constitution, and unacknowledged by our laws; giving his Assent to their acts of pretended legislation:

For quartering large bodies of armed troops among us:

For protecting them, by a mock Trial, from Punishment for any Murders which they should commit on the Inhabitants of these States:

For cutting off our Trade with all parts of the world:

For imposing taxes on us without our Consent:

For depriving us in many cases, of the benefits of Trial by Jury:

For transporting us beyond Seas to be tried for pretended offences:

For abolishing the free System of English Laws in a neighbouring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:

For taking away our Charters, abolishing our most valuable Laws, and altering fundamentally the Forms of our Governments:

For suspending our own Legislature, and declaring themselves invested with Power to legislate for us in all cases whatsoever.

He has abdicated Government here, by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravaged our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large armies of foreign mercenaries to complete the works of death, desolation and tyranny, already begun with circumstances of Cruelty & perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavoured to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare, is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these Oppressions We have Petitioned for Redress in the most humble terms: Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free People.

Nor have We been wanting in attention to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which, would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

We, therefore, the Representatives of the united States of America, in General Congress, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the Name, and by Authority of the good People of these Colonies, solemnly publish and declare, That these United Colonies are, and of Right ought to be Free and Independent States; that they are Absolved from all Allegiance to the British Crown, and that all political

connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which Independent States may of right do. And for the support of this Declaration, with a firm reliance on the Protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes and our sacred Honor..

THE CONSTITUTION OF THE UNITED STATES

WE THE PEOPLE of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I

SECTION 1. All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

SECTION 2. The House of Representatives shall be composed of Members chosen every second Year by the People of the several States, and the Electors in each State shall have the Qualifications requisite for Electors of the most numerous Branch of the State Legislature.

No Person shall be a Representative who shall not have attained to the Age of twenty five Years, and been seven Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State in which he shall be chosen.

[Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons.][1] The actual Enumeration shall be made within three Years after the first Meeting of the Congress of the United States, and within every subsequent Term of ten Years, in such Manner as they shall by Law direct. The Number of Representatives shall not exceed one for every thirty Thousand, but each State shall have at Least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to chuse three, Massachusetts eight, Rhode-Island and Providence Plantations one, Connecticut five, New-York six, New Jersey four, Pennsylvania eight, Delaware one, Maryland six, Virginia ten, North Carolina five, South Carolina five, and Georgia three.

When vacancies happen in the Representation from any State, the Executive Authority thereof shall issue Writs of Election to fill such Vacancies.

The House of Representatives shall chuse their Speaker and other Officers; and shall have the sole Power of Impeachment.

SECTION 3. The Senate of the United States shall be composed of two Senators from each State, [chosen by the Legislature thereof,][2] for six Years; and each Senator shall have one Vote.

Immediately after they shall be assembled in Consequence of the first Election, they shall be divided as equally as may be into three Classes. The Seats of the Senators of the first Class shall be vacated at the Expiration of the second Year, of the second Class at the Expiration of the fourth Year, and of the third Class at the Expiration of the sixth Year, so that one third may be chosen every second Year; [and if Vacancies happen by Resignation, or otherwise, during the Recess of the Legislature of any State, the Executive thereof may make temporary Appointments until the next Meeting of the Legislature, which shall then fill such Vacancies.][3]

No Person shall be a Senator who shall not have attained to the Age of thirty Years, and been nine Years a Citizens of the United States, and who shall not, when elected, be an Inhabitant of that State for which he shall be chosen.

The Vice President of the United States shall be President of the Senate, but shall have no Vote, unless they be equally divided.

The Senate shall chuse their other Officers, and also a President pro tempore, in the Absence of the Vice President, or when he shall exercise the Office of President of the United States.

The Senate shall have the sole Power to try all Impeachments. When sitting for that Purpose, they shall be on Oath or Affirmation. When the President of the United States is tried, the Chief Justice shall preside: And no Person shall be convicted without the Concurrence of two thirds of the Members present.

Judgment in Cases of Impeachment shall not extend further than to removal from Office, and disqualification to hold and enjoy any Office of honor, Trust or Profit under the United States: but the Party convicted shall nevertheless be liable and subject to Indictment, Trial, Judgment and Punishment, according to Law.

SECTION 4. The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by Law make or alter such Regulations, except as to the Places of chusing Senators.

The Congress shall assemble at least once in every Year, and such Meeting shall [be on the first Monday in December,][4] unless they shall by Law appoint a different Day.

SECTION 5. Each House shall be the Judge of the Elections, Returns and Qualifications of its own Members, and a Majority of each shall constitute a Quorum to do Business; but a smaller Number may adjourn from day to day, and may be authorized to compel the Attendance of absent Members, in such Manner, and under such Penalties as each House may provide.

Each House may determine the Rules of its Proceedings, punish its Members for disorderly Behaviour, and, with the Concurrence of two thirds, expel a Member.

Each House shall keep a Journal of its

Proceedings, and from time to time publish the same, excepting such Parts as may in their Judgment require Secrecy; and the Yeas and Nays of the Members of either House on any question shall, at the Desire of one fifth of those Present, be entered on the Journal.

Neither House, during the Session of Congress, shall, without the Consent of the other, adjourn for more than three days, nor to any other Place than that in which the two Houses shall be sitting.

SECTION 6. The Senators and Representatives shall receive a Compensation for their Services, to be ascertained by Law, and paid out of the Treasury of the United States. They shall in all Cases, except Treason, Felony and Breach of the Peace, be privileged from Arrest during their Attendance at the Session of their respective Houses, and in going to and returning from the same; and for any Speech or Debate in either House, they shall not be questioned in any other Place.

No Senator or Representative shall, during the Time for which he was elected, be appointed to any civil Office under the Authority of the United States, which shall have been created, or the Emoluments whereof shall have been encreased during such time; and no Person holding any Office under the United States, shall be a Member of either House during his Continuance in Office.

SECTION 7. All Bills for raising Revenue shall originate in the House of Representatives; but the Senate may propose or concur with Amendments as on other Bills.

Every Bill which shall have passed the House of Representatives and the Senate, shall, before it become a Law, be presented to the President of the United States; If he approve he shall sign it, but if not he shall return it, with his Objections to that House in which it shall have originated, who shall enter the Objections at large on their Journal, and proceed to reconsider it. If after such Reconsideration two thirds of that House shall agree to pass the Bill, it shall be sent, together with the Objections, to the other House, by which it shall likewise be reconsidered, and if approved by two thirds of that House, it shall become a Law. But in all such Cases the Votes of both Houses shall be determined by yeas and Nays, and the Names of the Persons voting for and against the Bill shall be entered on the Journal of each House respectively. If any Bill shall not be returned by the President within ten Days (Sundays excepted) after it shall have been presented to him, the Same shall be a Law, in like Manner as if he had signed it, unless the Congress by their Adjournment prevent its Return, in which Case it shall not be a Law.

Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary (except on a question of Adjournment) shall be presented to the President of the United States; and before the Same shall take Effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the Rules and Limitations prescribed in the Case of a Bill.

SECTION 8. The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States;

To borrow Money on the credit of the United States;

To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes;

To establish an uniform Rule of Naturalization, and uniform Laws on the subject of Bankruptcies throughout the United States;

To coin Money, regulate the Value thereof, and of foreign Coin, and fix the Standard of Weights and Measures;

To provide for the Punishment of counterfeiting the Securities and current Coin of the United States;

To establish Post Offices and post Roads;

To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries;

To constitute Tribunals inferior to the supreme Court;

To define and punish Piracies and Felonies committed on the high Seas, and Offences against the Law of the Nations;

To declare War, grant Letters of Marque and Reprisal, and make Rules concerning Captures on Land and Water;

To raise and support Armies, but no Appropriation of Money to that Use shall be for a longer Term than two Years;

To provide and maintain a Navy;

To make Rules for the Government and Regulation of the land and naval Forces;

To provide for calling forth the Militia to execute the Laws of the Union, suppress Insurrections and repel Invasions;

To provide for organizing, arming, and disciplining, the Militia, and for governing such Part of them as may be employed in the Service of the United States, reserving to the States respectively, the Appointment of the Officers, and the Authority of training the Militia according to the discipline prescribed by Congress;

To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the Acceptance of Congress, become the Seat of the Government of the United States, and to exercise like Authority over all Places purchased by the Consent of the Legislature of the State in which the Same shall be, for the Erection of Forts, Magazines, Arsenals, dock-Yards, and other needful Buildings; —And

To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

SECTION 9. The Migration or Importation of such Persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the Year one thousand eight hundred and eight, but a Tax or duty may be imposed on such Importation, not exceeding ten dollars for each Person.

The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.

No Bill of Attainder or ex post facto Law shall be passed.

No Capitation, or other direct, Tax shall be laid, unless in Proportion to the Census or Enumeration herein before directed to be taken.

No Tax or Duty shall be laid on Articles exported from any State.

No Preference shall be given by any Regulation of Commerce or Revenue to the Ports of one State over those of another: nor shall Vessels bound to, or from, one State, be obliged to enter, clear, or pay Duties in another.

No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law; and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time.

No Title of Nobility shall be granted by the United States: And no Person holding any Office of Profit or Trust under them, shall, without the Consent of the Congress, accept of any present, Emolument, Office, or Title, of any kind whatever, from any King, Prince or foreign State.

SECTION 10. No State shall enter into any Treaty, Alliance, or Confederation; grant Letters of Marque and Reprisal; coin Money; emit Bills of Credit; make any Thing but gold and silver Coin a Tender in Payment of Debts; pass any Bill of Attainder, ex post facto Law, or Law, impairing the Obligation of Contracts, or grant any Title of Nobility.

No State shall, without the Consent of the Congress, lay any Imposts or Duties on Imports or Exports, except what may be absolutely necessary for executing it's inspection Laws; and the net Produce of all Duties and Imposts, laid by any State on Imports or Exports, shall be for the Use of the Treasury of the United States; and all such Laws shall be subject to the Revision and Controul of the Congress.

No State shall, without the Consent of Congress, lay any Duty of Tonnage, keep Troops, or Ships of War in time of Peace, enter into any Agreement or Compact with another State, or with a foreign Power, or engage in War, unless actually invaded, or in such imminent Danger as will not admit of delay.

ARTICLE II

SECTION 1. The executive Power shall be vested in a President of the United States of America. He shall hold his Office during the Term of four Years, and, together with the Vice President, chosen for the same Term, be elected, as follows

Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress: but no Senator or Representative, or Person holding an Office of Trust or Profit under the United States, shall be

appointed an Elector.

[The Electors shall meet in their respective States, and vote by Ballot for two Persons, of whom one at least shall not be an Inhabitant of the same State with themselves. And they shall make a List of all the Persons voted for, and of the Number of Votes for each; which List they shall sign and certify, and transmit sealed to the Seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the Presence of the Senate and House of Representatives, open all the Certificates, and the Votes shall then be counted. The Person having the greatest Number of Votes shall be the President, if such Number be a Majority of the whole Number of Electors appointed; and if there be more than one who have such Majority, and have an equal Number of Votes, then the House of Representatives shall immediately chuse by Ballot one of them for President; and if no person have a Majority, then from the five highest on the List the said House shall in like Manner chuse the President. But in chusing the President, the Votes shall be taken by States, the Representation from each State having one Vote; A quorum for this Purpose shall consist of a Member or Members from two thirds of the States, and a Majority of all the States shall be necessary to a Choice. In every Case, after the Choice of the President, the Person having the greatest Number of Votes of the Electors shall be the Vice President. But if there should remain two or more who have equal Votes, the Senate shall chuse from them by Ballot the Vice President.][5]

The Congress may determine the Time of chusing the Electors, and the Day on which they shall give their Votes; which Day shall be the same throughout the United States.

No Person except a natural born Citizen, or a Citizen of the United States, at the time of the Adoption of this Constitution, shall be eligible to the Office of President; neither shall any Person be eligible to that Office who shall not have attained to the Age of thirty five Years, and been fourteen Years a Resident within the United States.

[In Case of the Removal of the President from Office, or of his Death, Resignation, or Inability to discharge the Powers and Duties of the said Office, the Same shall devolve on the Vice President, and the Congress may by Law provide for the Case of Removal, Death, Resignation or Inability, both of the President and Vice President, declaring what Officer shall then act as President, and such Officer shall act accordingly, until the Disability be removed, or a President shall be elected.][6]

The President shall, at stated Times, receive for his Services, a Compensation, which shall neither be encreased nor diminished during the Period for which he shall have been elected, and he shall not receive within that Period any other Emolument from the United States, or any of them.

Before he enter on the Execution of his Office, he shall take the following Oath or Affirmation:—"I do solemnly swear (or affirm) that I will faithfully execute the Office of President of the United States, and will to the best of my Ability, preserve, protect and defend the Constitution of the United States."

SECTION 2. The President shall be Commander in Chief of the Army and Navy of the United States, and of the Militia of the several States, when called into the actual Service of the United States; he may require the Opinion, in writing, of the principal Officer in each of the executive Departments, upon any Subject relating to the Duties of their respective Offices, and he shall have Power to grant Reprieves and Pardons for Offences against the United States, except in Cases of Impeachment.

He shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the supreme Court, and all other Officers of the United States, whose Appointments are not herein otherwise provided for, and which shall be established by Law: but the Congress may by Law vest the Appointment of such inferior Officers, as they think proper, in the President alone, in the Courts of Law, or in the Heads of Departments.

The President shall have Power to fill up all Vacancies that may happen during the Recess of the Senate, by granting Commissions which shall expire at the End of their next Session.

SECTION 3. He shall from time to time give to the Congress Information of the State of the Union, and recommend to their Consideration such Measures as he shall judge necessary and expedient; he may, on extraordinary Occasions, convene both Houses, or either of them, and in Case of Disagreement between them, with Respect to the Time of Adjournment, he may adjourn them to such Time as he shall think proper; he shall receive Ambassadors and other public Ministers; he shall take Care that the Laws be faithfully executed, and shall Commission all the Officers of the United States.

SECTION 4. The President, Vice President and all civil Officers of the United States, shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other high Crimes and Misdemeanors.

ARTICLE III

SECTION 1. The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish. The Judges, both of the supreme and inferior Courts, shall hold their Offices during good Behaviour, and shall, at stated Times, receive for their Services, a Compensation, which shall not be diminished during their Continuance in Office.

SECTION 2. The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority;—to all Cases affecting Ambassadors, other public Ministers and Consuls;—to all Cases of admiralty and maritime Jurisdiction;—to Controversies to which the United States shall be a Party;—to Controversies between two or more States;—[between a State and Citizens of another State;][7]—between Citizens of different States,—between Citizens of the same State claiming Lands under Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make.

The Trial of all Crimes, except in Cases of Impeachment, shall be by Jury; and such Trial shall be held in the State where the said Crimes shall have been committed; but when not committed within any State, the Trial shall be at such Place or Places as the Congress may by Law have directed.

SECTION 3. Treason against the United States, shall consist only in levying War against them, or in adhering to their Enemies, giving them Aid and Comfort. No Person shall be convicted of Treason unless on the Testimony of two Witnesses to the same overt Act, or on Confession in open Court.

The Congress shall have Power to declare the Punishment of Treason, but no Attainder of Treason shall work Corruption of Blood, or Forfeiture except during the Life of the Person attainted.

ARTICLE IV

SECTION 1. Full Faith and Credit shall be given in each State to the Public Acts, Records, and judicial Proceedings of every other State. And the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof.

SECTION 2. The Citizens of each State shall be entitled to all Privileges and Immunities of Citizens in the several States.

A Person charged in any State with Treason, Felony, or other Crime, who shall flee from Justice, and be found in another State, shall on Demand of the executive Authority of the State from which he fled, be delivered up, to be removed to the State having Jurisdiction of the Crime.

[No Person held to Service or Labour in one State, under the Laws thereof, escaping into another, shall, in Consequence of any Law or Regulation therein, be discharged from such Service or Labour, but

[5]The clause in brackets has been superseded by the 12th Amendment.
[6]The clause in brackets is affected by the 25th Amendment.
[7]The part in brackets is limited by the 11th Amendment.

shall be delivered up on Claim of the Party to whom such Service or Labour may be due.][*]

SECTION 3. New States may be admitted by the Congress into this Union; but no new States shall be formed or erected within the Jurisdiction of any other State; nor any State be formed by the Junction of two or more States, or Parts of States, without the Consent of the Legislatures of the States concerned as well as of the Congress.

The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as to Prejudice any Claims of the United States, or of any particular State.

SECTION 4. The United States shall guarantee to every State in this Union a Republican Form of Government, and shall protect each of them against Invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic Violence.

ARTICLE V

The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two thirds of the several States, shall call a Convention for proposing Amendments, which, in either Case, shall be valid to all Intents and Purposes, as Part of this Constitution, when ratified by the Legislatures of three fourths of the several States, or by Conventions in three fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress; Provided that no Amendment which may be made prior to the Year One thousand eight hundred and eight shall in any Manner affect the first and fourth Clauses in the Ninth Section of the first Article; and that no State, without its Consent, shall be deprived of it's equal Suffrage in the Senate.

ARTICLE VI

All Debts contracted and Engagements entered into, before the Adoption of this Constitution, shall be as valid against the United States under this Constitution, as under the Confederation.

This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

The Senators and Representatives before mentioned, and the Members of the several State Legislatures, and all executive and judicial Officers, both of the United States and of the several States, shall be bound by Oath or Affirmation, to support this Constitution; but no religious Test shall ever be required as a Qualification to any Office or public Trust under the United States.

ARTICLE VII

The Ratification of the Conventions of nine States, shall be sufficient for the Establishment of this Constitution between the States so ratifying the Same.

Done in Convention by the Unanimous Consent of the States present the Seventeenth Day of September in the Year of our Lord one thousand seven hundred and Eighty seven and of the Independence of the United States of America the Twelfth. In witness whereof We have hereunto subscribed our Names,

AMENDMENTS TO THE CONSTITUTION

Articles in addition to, and Amendment of the Constitution of the United States of America, proposed by Congress, and ratified by the Legislatures of the several States, pursuant to the fifth Article of the original Constitution. [The first ten amendments went into effect November 3, 1791.]

AMENDMENT I

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances.

AMENDMENT II

A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.

AMENDMENT III

No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.

AMENDMENT IV

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

AMENDMENT V

No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

AMENDMENT VI

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defence.

AMENDMENT VII

In Suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise re-examined in any Court of the United States, than according to the rules of the common law.

AMENDMENT VIII

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

AMENDMENT IX

The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

AMENDMENT X

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

AMENDMENT XI[9]
January 8, 1798

The Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

AMENDMENT XII[10]
September 25, 1804

The Electors shall meet in their respective states, and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate; —The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted; —The person having the greatest number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. [And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President.][11] —The person having the greatest number of votes as Vice-President, shall be the Vice-President, if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

AMENDMENT XIII
December 18, 1865

SECTION 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

SECTION 2. Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XIV
July 28, 1868

SECTION 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

SECTION 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the Executive and Judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

SECTION 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice President, or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability.

SECTION 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

SECTION 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

AMENDMENT XV
March 30, 1870

SECTION 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude —

SECTION 2. The Congress shall have power to enforce this article by appropriate legislation —

AMENDMENT XVI
February 25, 1913

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

AMENDMENT XVII
May 31, 1913

The Senate of the United States shall be composed of two senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature.

When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: *Provided*, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

This amendment shall not be so construed as to affect the election or term of any senator chosen before it becomes valid as part of the Constitution.

AMENDMENT XVIII
January 29, 1919

After one year from the ratification of this article, the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by Congress.

---

[9]Amendment XI qualifies Article III, Section 2.

[10]This amendment replaces Clause 3 in Article II, Section I, and annuls it.

[11]The clause in brackets is superseded by the 20th Amendment, Section 3.

AMENDMENT XIX
August 26, 1920

The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any States on account of sex.

Congress shall have power by appropriate legislation to enforce the provisions of this article.

AMENDMENT XX
February 6, 1933

SECTION 1. The terms of the President and Vice-President shall end at noon on the twentieth day of January, and the terms of Senators and Representatives at noon on the third day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

SECTION 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the third day of January, unless they shall by law appoint a different day.

SECTION 3. If, at the time fixed for the beginning of the term of the President, the President-elect shall have died, the Vice-President-elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President-elect shall have failed to qualify, then the Vice-President-elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President-elect nor a Vice-President-elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice-President shall have qualified.

SECTION 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice-President whenever the right of choice shall have devolved upon them.

SECTION 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

SECTION 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission.

AMENDMENT XXI
December 5, 1933

SECTION 1. The eighteenth article of amendment to the Constitution of the United States is hereby repealed.

SECTION 2. The transportation or importation into any State, Territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

SECTION 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by conventions in the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

AMENDMENT XXII
February 26, 1951

SECTION 1. No person shall be elected to the office of the President more than twice, and no person who has held the office of President, or acted as President, for more than two years of a term to which some other person was elected President shall be elected to the office of the President more than once. But this Article shall not apply to any person holding the office of President when this Article was proposed by the Congress, and shall not prevent any person who may be holding the office of President, or acting as President, during the term within which this Article becomes operative from holding the office of President or acting as President during the remainder of such term.

SECTION 2. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.

AMENDMENT XXIII
April 3, 1961

SECTION 1. The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct:

A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the twelfth article of amendment.

SECTION 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XXIV
February 4, 1964

SECTION 1. The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

SECTION 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XXV
February 10, 1967

SECTION 1. In case of removal of the President from office or of his death or resignation, the Vice President shall become President.

SECTION 2. Whenever there is a vacancy in the office of the Vice President, the President shall nominate a Vice President who shall take the office upon confirmation by a majority vote of both Houses of Congress.

SECTION 3. Whenever the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that he is unable to discharge the powers and duties of his office, and until he transmits to them a written declaration to the contrary, such powers and duties shall be discharged by the Vice President as Acting President.

SECTION 4. Whenever the Vice President and a majority of either the principal officers of the executive departments or of such other body as Congress may by law provide, transmit to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office, the Vice President shall immediately assume the powers and duties of the office as Acting President.

Thereafter, when the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that no inability exists, he shall resume the powers and duties of his office unless the Vice President and a majority of either the principal officers of the executive department or of such other body as Congress may by law provide, transmit within four days to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office. Thereupon Congress shall decide the issue, assembling within forty-eight hours for that purpose if not in session. If the Congress, within twenty-one days after receipt of the latter written declaration, or, if Congress is not in session, within twenty-one days after Congress is required to assemble, determines by two-thirds vote of both Houses that the President is unable to discharge the powers and duties of his office, the Vice President shall continue to discharge the same as Acting President; otherwise, the President shall resume the powers and duties of his office.

AMENDMENT XXVI
June 30, 1971

SECTION 1. The right of citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age.

SECTION 2. The Congress shall have power to enforce this article by appropriate legislation.
