We see that these words, *mutiny* and *meo*, are from the same root as L. *muto*, to change, W. *madac*, which is radically the same word as L. *moto*, to move. *Mutiny* is formed from the French *mutin*, a derivative word, and *meo* from the root or verb. So *mutin*, in Spanish, is a derivative, while *muda*, change, and Port. *mudar*, to change

feathers, are directly from the verb; Eth. ጠፍፍ

or ملا *mata*, to drive. Class Md, No. 14, 10.]

An insurrection of soldiers or seamen against the authority of their commanders; open resistance of officers, or opposition to their authority. Any attempt to excite opposition to lawful authority, or any act of contempt toward officers, or disobedience of commands, is by the British Mutiny Act declared to be mutiny. NEITHER, (*nē'ther* or *nī'ther*). The former is given in most dictionaries, and still prevails in America. The latter is now common in England, a compound pronoun, pronominal adjective, or a substitute. [*Sax. nather, nathor, nauthor, or nouthor; ne, not, and either or othor, not either, or not other.* So in *Lu. and uter.*]

Not either; not the one or the other.

1. It refers to individual things or persons; as, which road shall I take? *Neither*, take neither road. The upright judge inclines to *neither* party. It is used as a substitute; as, the upright judge inclines to *neither* of the parties.

He neither loves, Nor either cares for him. **Shak.**

2. It refers to a sentence; as, "Ye shall not eat of it, *neither* shall ye touch it;" that is, ye shall not eat, *not either* or *other* shall ye touch it; ye shall not eat, nor shall ye do the other thing here mentioned, that is, touch it. **Gen. iii.**

"Fight *neither* with small nor great, save only with the king;" that is, fight not, either with small or great. [*Kings xxii.*]

Neither, in the first part of a negative sentence, is followed by *nor* in the subsequent part. It is *neither* the one *nor* the other. But *or* would be most proper, for the negative in *neither* applies to both parts of the sentence.

It is often used in the last member of a negative sentence instead of *nor*, as in the passage above cited. "Ye shall not eat it, *neither* shall ye touch it." Here *neither* is improperly used for *nor*, for *not* in the first clause refers only to that clause, and the second negative refers only to the second clause. "Ye shall not eat it, *nor* shall ye touch it."

In the sentences above, *neither* is considered to be a conjunction or connecting word, though in fact it is a pronoun or representative of a clause of a sentence.

3. *Neither* primarily refers to two; not either of two. But by usage it is applicable to any number, referring to individuals separately considered. Five or ten persons being charged with a misdemeanor or riot, each may say, *neither* of us was present.

4. *Neither* sometimes closes a sentence in a peculiar manner, thus: "Men come not to the knowledge of ideas thought to be innate, till they come to the use of reason; nor then *neither*." **Locke.**

That is, *not either* when they come to the use of reason, or before.

Formerly, in English, as in Greek and French, two negatives were used for one negation. But in such phrases as that above, good speakers now use *either*; "nor then *either*."

NOTION, n. [Fr., from L. *notio*, from *notus*, known; *noeo*, to know.]

1. Conception; mental apprehension of whatever may be known or imagined. We may have a just notion of power, or false notions respecting spirit.

Notion and idea are primarily different; *idea* being the conception of something visible, as the idea of a square or a triangle; and *notion* the conception of things invisible or intellectual, as the *notion* we have of spirits. But from negligence in the use of *idea*, the two words are constantly confounded.

What hath been generally agreed on, I content myself to assume under the notion of principle.

Few agree in their notions about these words. That notion of hunger, cold, sound, color, thought, wish, or fear, which is to the mind, is called the *idea* of hunger, cold, &c.

2. Sentiment; opinion; as, the extravagant notions they entertain of themselves.

3. Sense; understanding; intellectual power. [Not used.]

4. Inclination; in vulgar use; as, I have a notion to do this or that.

NOT-WHITE, n. [Sax. *hnot*, smooth, shorn.] Wheat not hearded.

NOT-WITH-STAND-ING; and the participle of WITH-stand, with not prefixed, and signifying not opposing, nevertheless. It retains in all cases its principal signification. For example: "I will surely rend the kingdom from thee, and will give it to thy servant; notwithstanding, in thy days I will not do it, for David thy father's sake."

1 Kings xl. In this passage there is an ellipsis of that after *notwithstanding*. That refers to the former part of the sentence, I will rend the kingdom from thee; notwithstanding that, (declaration or determination,) in thy days I will not do it. In this and in all cases, *notwithstanding*, either with or without that or *this*, constitutes the case absolute or independent.

"It is a rainy day, but notwithstanding that, the troops must be reviewed;" that is, the rainy day not opposing or preventing. That, in this case, is a substitute for the whole first clause of the sentence. It is to that clause what a relative is to an antecedent noun, and which may be used in the place of it; *notwithstanding which*, that is, the rainy day.

"Christ enjoined on his followers not to publish the cures he wrought; but notwithstanding his injunctions, they proclaimed them." Here, *notwithstanding his injunctions* is the case independent or absolute; the injunctions of Christ not opposing or preventing.

This word answers precisely to the Latin *non obstante*, and both are used with nouns or with substitutes for nouns, for sentences or for clauses of sentences. So in the Latin phrase, *hoc non obstante*, *hoc* may refer to a single word, to a sentence, or to a series of sentences.

O.

O is the fifteenth letter, and the fourth vowel, in the English alphabet. The shape of this letter seems to have been taken from the circular configuration of the lips in uttering the sound. It corresponds in figure with the Coptic O, and nearly with the Syriac initial and final *o*, and the Ethiopic *oin*. Its words derived from the Oriental languages, it often represents the *o* of those languages, and sometimes the *oin*: the original sound of the latter being formed deep in the throat, and with a greater aperture of the mouth.

In English, O has a long sound, as in *tone*, *hone*, *groan*, *cloak*, *roll*, *droll*; a short sound, as in *lot*, *plod*, *rod*, *song*, *lodge*, and the sound of *no*, or the Italian *u*, and French *ou*, as in *more*, *prove*. This sound is shortened in words ending in a close articulation, as in *book*, *foot*.

The long sound of O is usually denoted by *e*, at the end of a word or syllable, as in *bone*, *lonely*; or by *n* serve *a*, as in *moon*, *fool*. It is generally long before *ll*, as in *roll*; but it is short in *doll*, *coll*, and in words of more syllables than one, as in *fully*, *valley*.

As a numeral, O was sometimes used by the ancients for 11, and, with a dash over it, (Ō) for 11,00.

Among the Irish, O, prefixed to the name of a family, denotes progeny, or is a character of dignity; as, O'Neil; O'Carroll.

Among the ancients, O was a mark of triple time, from the notion that the ternary, or number 3, is the most perfect of numbers, and properly expressed by a circle, the most perfect figure.

O is often used as an exclamation, expressing a wish.

O, were he present! *Dryden*.

It sometimes expresses surprise. Shakespeare uses O for a circle or oval. Within this woodcock O.

From a, then, the primary sense of this preposition a sense is derived as, off, the same word differently written for distinction. But this sense is appropriately lost in many of its applications as, a man of genius, a man of courage, a man of rare endowments, a kind of a red color, or of a beauteous figure. He lost all hope of relief. This is an affair of the cabinet. He is a man of despatched fortune. What is the price of corn? We say that of, in those and similar phrases, denotes property or possession, making of the sign of the genitive or possessive case. These applications, however, all proceed from the same primary sense. That which proceeds from, or is produced by, a person, is naturally the property or possession of that person; as, the son of John; and this idea of property, in the course of time, would pass to things not thus produced, but still bearing a relation to another thing. Thus we say the father of a sin, as well as the son of a father. In both cases, other languages also use the same word, as in the French de, della, and Italian, di, dell. Off, then, has one primary sense, from, denoting, issuing, proceeding from or out of, and a derivative sense denoting possession or property.

In common usage, however, it is applicable to either party in a controversy, denoting any person who opposes another for his cause. Opponent may sometimes be used for *adversary*, and for *antagonist*, but not with strict propriety, as the word does not necessarily imply enmity nor bodily strife. OR, a termination of Latin nouns, is a contraction of *vir*, a man, or from the same radix. The same word, *vir*, is in our mother tongue, *secr*, and from this we have the English termination *er*.
 It denotes an agent, as in *actor*, *creditor*. We annex it to many words of English origin, as in *lessee*; as we do so to words of Latin and Gr. origin, as in *astronomer*, *laborer*. In general, *er* is annexed to words of Latin, and *or* to those of English origin.

OR, *conj.* [Sax. *ather*; G. *ader*.] It seems that *or* is a contraction of *other*. "Tell us by what authority thou dost these things. *Other* who is he that gave thee this authority?" Tyndale's *New Testament*.
 A connective that marks an alternative. "You may read or may write" that is, you may do one of the things at your pleasure, but not both. It corresponds to *either*. You may either ride to London, or to Windsor. It often connects a series of words or propositions, presenting a choice of either. He may study law, or medicine, or divinity, or he may enter into trade.
 Or sometimes begins a sentence, but in this case it expresses an alternative with the foregoing sentence. *Matt. vii.* and *ix.*
 In poetry, *or* is sometimes used for *either*.
 For thy vast boundless sea so numberless,
 That thou or to conceal or else to tell
 Is equally impossible. Cowley.

Or is often used to express an alternative of terms, definitions, or explanations of the same thing in different words. Thus we say, a thing is a square, or a figure under four equal sides and angles.

OR'DE-AL, n. [Sax. *ordal* or *ordel*; G. *urtheil*; D. *ordel*. The last syllable is *deal*, to divide or distribute. The sense of the prefix is less obvious. Wilkins supposes or to signify *without*, as in some Saxon words it has that sense, and *ordel* to signify without difference or distinction of persons, entire judgment. In Saxon, *ord* signifies origin, cause, beginning, prime. In G. *ur* signifies prime, very, original; *ur-sort*, primitive word. In Dutch, *oor* is the ear; *oorlog*, war. But this prefix would seem to be the same as in *farlose*, (furlough) for; in G. *urloub*, D. *oorlof*, Dan. *orlof*, Sw. *orlof*, is a furlow, and this indicates that or is a corruption of *far* or *for*. In Welsh, this word is *gordal*, which Owen compounds of *gor*, high, superior, extreme, above, and *tdl*, reward, re-quit; and *gordal* signifies not only *ordel*, but an over-payment, a making satisfaction over and above. Or, then, may signify *out*, *away*, and in *ordel* may denote *ultimate*, *final*. But the real sense is not obvious. The practice of *ordel*, however, seems to have had its origin in the belief that the substances used had each its particular presiding deity, that had perfect control over it.]

1. An ancient form of trial to determine guilt or innocence, practiced by the rude nations of Europe, and still practiced in the East Indies. In England, the *ordel* was of two sorts, *fire-ordel* and *water-ordel*; the former being confined to persons of higher rank, the latter to the common people. Both might be performed by deputy, but the principal was to answer for the success of the trial.

Fire-ordel was performed either by taking in the hand a piece of red-hot iron, or by walking barefoot and blindfold over nine red-hot plowshares, laid lengthwise, at unequal distances; and if the person escaped unhurt, he was adjudged innocent; otherwise he was condemned as guilty.

Water-ordel was performed, either by plunging the bare arm to the elbow in boiling water, or by casting the person suspected into a river or pond of cold water, and if he floated without an effort to swim, it was an evidence of guilt, but if he sank he was acquitted.

Both in England and Sweden, the clergy presided at this trial. It was at last condemned as unlawful by the canon law, and in England it was abolished by an order in council of Henry III. Blackstone.

It is probable our proverbial phrase, to go through *fire and water*, denoting severe trial or danger, is derived from the *ordel*; as also the trial of witches by 2. Severe trial; accurate scrutiny. [water.

On this subject divines are not agreed.

In strictness, *original sin* is an improper use of words, as *sin*, *ex vi termini*, implies violation and the transgression of a known rule of duty by a moral agent. The word straus, in German, signifies a bush, a tuft, a bunch; but the latter part of this name, struz, struds, strauss, coincides also with the Eug. strut, Dan. strutter, G. strutzen: and this is the L. struthio, Gr. ostrion. The first part of the word in Fr. Sp. and Port. is from L. acis. The primary sense of struz, struthio, &c., is to reach, stretch, extend, or erect; but whether this name was given to the fowl from its stately walk or appearance, or from some part of its plumage, let the reader judge.

The Sax. participle *agen*, Dan. *egen*, is the English *own*. Ought is a derivative tense, and was formerly used in the sense of *owed*. 1. A vegetable; an organic body, destitute of sense and spontaneous motion, adhering to another body in such a manner as to draw from it its nourishment, and having the power of propagating itself by seeds; "whose seed is in itself." Gen. 1. This definition may not be perfectly correct, as it respects all plants, for some aquatic plants grow without being attached to any fixed body.

The woody or dicotyledonous plants consist of three parts; the bark or exterior coat which covers the wood; the wood, which is hard, and constitutes the principal part; and the pith or center of the stem. In monocotyledonous plants, the ligneous or fibrous parts, and the pith or parenchymatous, are equally distributed through the whole internal substance; and in the lower plants, fungi, sea-weed, &c., the substance is altogether parenchymatous. By means of proper vessels, the nourishing juices are distributed to every part of the plant. In its most general sense, *plant* comprehends all vegetables, trees, shrubs, herbs, grasses, &c. PLATONISM, n. The doctrines of Plato and his followers. Plato believed God to be an infinitely wise, just, and powerful Spirit; and that he formed the visible universe out of preëxistent amorphous matter, according to perfect patterns or ideas eternally existent in his own mind. Philosophy he considered as being a knowledge of the true nature of things, as discoverable in those eternal ideas after which all things were fashioned. In other words, it is the knowledge of what is eternal, exists necessarily, and is unchangeable; not of the temporary, the dependent, and changeable; and of course it is not obtained through the senses; neither is it the product of the understanding, which concerns itself only with the variable and the transitory; nor is it the result of experience and observation. But it is the product of our reason, which, as partaking of the divine nature, has innate ideas resembling the eternal ideas of God. By contemplating these innate ideas, reasoning about them, and comparing them with their copies in the visible universe, reason can attain that true knowledge of things which is called philosophy. Such appears to have been the system of Plato himself, so far as it can be gathered from his Dialogues, which are not systematic treatises, but free conversations. His professed followers, the Academics and the New Platonists, differed considerably from him, yet are called *Platonists*.

Pleasure is properly positive excitement of the passions or the mind; but we give the name also to the absence of excitement, when that excitement is painful; as when we cease to labor, or repose after fatigue, or when the mind is tranquilized after anxiety or agitation.

5. Formerly, to invite to drink by drinking of the cup first, and then handing it to another, as a pledge of good will and kindness. The person drinking pledged his guest by drinking first, and then handing the cup to his guest. The practice is frequent among the common people in America to this day; the owner of the liquor, taking the cup, says to his friend, I pledge you, and drinks, then hands the cup to his guest; a remarkable instance of the power of habit, as the reason of the custom has long since ceased.

In zoology, a term applied to cetaceous mammals of the genus Delphinus of Linnaeus, but of the genus Phocaena of more recent naturalists, of which about five species are known. There is one species whose back is usually blackish or brown, whence it is called, in Dutch, bruinvisch, brown-fish; the body is thick toward the head, but more slender toward the tail, which is scutellum. This mammal preys on fish, and seeks food not only by swimming, but by rooting like a hog in the sand and mud, whence some persons suppose the name has been given to it.

 1. In a philosophical sense, the faculty of doing or performing any thing; the faculty of moving or of producing a change in something; ability or strength. A man raises his hand by his own power, or by power moves another body. The exertion of power proceeds from the will, and, in strictness, no being destitute of will or intelligence can exert power. Power in man is active or speculative. Active power is that which moves the body; speculative power is that by which we see, judge, remember, or, in general, by which we think.
 Power may exist without exertion. We have power to speak when we are silent.
Locke. Reid.
 Power has been distinguished also into active and passive, the power of doing or moving, and the power of receiving impressions or of suffering. In strictness, passive power is an absurdity in terms. To say that gold has a power to be melted, is improper language; yet for want of a more appropriate word, power is often used in a passive sense, and is considered as twofold; viz., as able to make, or able to receive, any change.

 1. That may be done, effected, or performed by human means, or by powers that can be applied. It is sometimes synonymous with POSSIBLE, but the words differ in this; possible is applied to that which might be performed, if the necessary powers or means could be obtained; practicable is limited in its application to things which are to be performed by the means given, or which may be applied. [There is no reason why the noun and verb should not both be spelled with *c*, as in *notice*, *sacrifice*, *appliance*, and all like cases where the accent precedes the last syllable. The distinction in spelling between the noun and the verb properly belongs only to words which are accented on the last syllable, as *device* and *deviser*, where the verb has the sound of *ice*. The spelling *practise* tends to give it the same sound, as we see in uneducated persons; and hence it is desirable to follow the regular analogy and write the noun and verb alike.]

1. Commendation bestowed on a person for his personal virtues or worthy actions, on meritorious actions themselves, or on any thing valuable; approbation expressed in words or song. Praise may be expressed by an individual, and in this circumstance differs from **FAME**, **RENOUN**, and **Celebrity**, which are the expression of the approbation of numbers, or public commendation. It appears that *praise*, *price*, *prize*, are all from one root, the primary sense of which is, to lift, to raise, or rather to strain. So from *L. tollere*, *extollo*, we have *extol*. Now, in Dan. *rosen*, Sw. *rosa*, signifies to praise, and it may be questioned whether this is *praise* without a prefix. The Latin *pretium*, W. *prid*, is probably from the same root, denoting that which is taken for a thing sold, or the rising or amount, as we use *high*; a high value or price; corn

Prepossession is more frequently used in a good sense than prejudice.

PRE-RO-G'A-TIVE, n. [*Fr. id.; It. prerogative; Sp. prerogativa; L. prerogativa, precedence in voting; pra, before, and rogo, to ask or demand.*]

An exclusive or peculiar privilege. A royal prerogative is that special preeminence which a king has over all other persons, and out of the course of the common law, in right of his regal dignity. It consists in the possession of certain rights which the king may exercise, to the exclusion of all participation of his subjects; for when a right or privilege is held in common with the subject, it ceases to be a prerogative. Thus the right of appointing ambassadors, and of making peace and war, are, in Great Britain, royal prerogatives. The right of governing created beings is the prerogative of the Creator.

It is the prerogative of the house of peers, in Great Britain, to decide legal questions in the last resort. It is the prerogative of the house of commons to determine the validity of all elections of their own members. It is the prerogative of a father to govern his children. It is the prerogative of the understanding to judge and compare.

In the United States, it is the prerogative of the president, by and with the advice and consent of the senate, to ratify treaties.

1. In a general sense, a declaration, written or verbal, made by one person to another, which binds the person who makes it, either in honor, conscience, or law, to do or forbear a certain act specified; a declaration which gives to the person to whom it is made a right to expect or to claim the performance or forbearance of the act. The promise of a visit to my neighbor gives him a right to expect it, and I am bound in honor and civility to perform the *promise*. Of such a *promise* human laws have no cognizance; but the fulfillment of it is one of the minor moralities which civility, kindness, and strict integrity, require to be observed.
2. In law, a declaration, verbal or written, made by one person to another for a good or valuable consideration, in the nature of a covenant, by which the promiser binds himself, and, as the case may be, his legal representatives, to do or forbear some act, and gives to the promisee a legal right to demand and enforce a fulfillment.
3. A binding declaration of something to be done or given for another's benefit; as, the *promise* of a grant of land. A promise may be absolute or conditional; lawful or unlawful; express or implied. An absolute promise must be fulfilled at all events. The obligation to fulfill a conditional promise depends on the performance of the condition. An unlawful promise is not binding, because it is void; for it is incompatible with a prior paramount obligation of obedience to the laws. An express promise is one expressed in words or writing. An implied promise is one which reason and justice dictate. If I hire a man to perform a day's labor, without any declaration that I will pay him, the law presumes a *promise* on my part that I will give him a reasonable reward, and will enforce such implied promise.
4. Hopes; expectation, or that which affords expectation of future distinction; as, a youth of great promise.
5. That which is promised; fulfillment or grant of what is promised.

The last is used for the name of things, as well as for that of persons. Other words are used for the names of persons, things, sentences, phrases, and for adjectives; and when they stand for sentences, phrases, and adjectives, they are not strictly pronouns, but relatives, substitutes, or representatives of such sentences. Thus we say, "The jury found the prisoner guilty, and the court pronounced sentence on him. This or that gave glory to the spectators." In these sentences, *this* or *that* represents the whole preceding sentence, which is the proper antecedent. We also say, "The jury pronounced the man guilty; *this*, or *that*, or *which* he could not be, for he proved an alibi;" in which sentence, *this*, or *that*, or *which*, refers immediately to guilty, as its antecedent.

2. Tallness. [Not in use.]
3. Perfect form; handsomeness.

PROP'ER-TY, n. [This seems to be formed directly from *proper*; if not, it is contracted. The Latin is *proprietas*, Fr. *propriété*, from which we have *property*.]

1. A peculiar quality of any thing; that which is inherent in a subject, or naturally essential to it; called by logicians an *essential mode*. Thus color is a property of light; extension and figure are properties of bodies.
2. An acquired or artificial quality; that which is given by art or bestowed by man. The poem has the properties which constitute excellence.
3. Quality; disposition.

It is the property of an old sinner to find delight in reviewing his own villainies in others. *South.*

4. The exclusive right of possessing, enjoying, and disposing of a thing; ownership. In the beginning of the world, the Creator gave to man dominion over the earth, over the fish of the sea, and the fowls of the air, and over every living thing. This is the foundation of man's property in the earth and in all its productions. Prior occupancy of land and of wild animals gives to the possessor the property of them. The labor of inventing, making, or producing any thing, constitutes one of the highest and most indefeasible titles to property. Property is also acquired by inheritance, by gift, or by purchase. Property is sometimes held in common, yet each man's right to his share in common land or stock is exclusively his own. One man may have the property of the soil, and another the right of use, by prescription or by purchase.
5. Possession held in one's own right. *Dryden.*

6. The thing owned; that to which a person has the legal title, whether in his possession or not. It is one of the greatest blessings of civil society that the property of citizens is well secured.

7. An estate, whether in lands, goods, or money; as, a man of large property or small property.

8. An estate; a farm; a plantation. In this sense, which is common in the United States and in the West Indies, the word has a plural.

The all-houses, on the sugar plantations, vary in size according to the fancy of the proprietor, or the magnitude of the property. *Edwards, W. Indies.*

I shall confine myself to such properties as fall within the reach of a poor observation. *Edwards, W. Indies.*

9. Nearness or right.

Here I disclaim all my paternal care,
Propinquity and property of blood. *Shak.*

10. Properties; the dresses and appendages used in a theater, the keeper of which is still called the property man. [Obs.] *Toune.*

I will draw a bill of properties. *Shak.*

High pomp and state are useful properties. *Dryden.*

II. Propriety. [Not in use.] *Camden.*

Literary property; the exclusive right of printing, publishing, and making profit by one's own writings. No right or title to a thing can be so perfect as that which is created by a man's own labor and invention. The exclusive right of a man to his literary productions, and to the use of them for his own profit, is entire and perfect, as the faculties employed and labor bestowed are entirely and perfectly his own. On what principle, then, can a legislature or a court determine that an author can enjoy only a temporary property in his own productions? If a man's right to his own productions in writing is as perfect as to the productions of his farm or his shop, how can the former be abridged or limited, while the latter is held without limitation? Why do the productions of manual labor rank higher in the scale of rights or property, than the productions of the intellect?

1. A foretelling; prediction; a declaration of something to come. As God only knows future events with certainty, no being but God, or some person informed by him, can utter a real prophecy.  1. The comparative relation of any one thing to another. Let a man's exertions be in proportion to his strength.
 2. In mathematics, the identity or similitude of two ratios. Proportion differs from ratio. Ratio is properly the relation of two magnitudes or quantities of one and the same kind; as the ratio of 5 to 10, or the ratio of 8 to 16. Proportion is the sameness or likeness of two such relations. Thus 5 is to 10 as 8 to 16, or A is to B as C is to D; that is, 5 bears the same relation to 10 as 8 does to 16. Hence we say, such numbers are in proportion. *Hutton.*
 An equality of ratios; sometimes, also, the series of terms among which an equality of ratios exists. *Day.*

3. In arithmetic, a rule by which, when three numbers are given, a fourth number is found, which bears the same relation to the third as the second

Harmonical or musical proportion, is when, of three or four quantities, the first is to the last as the difference between the two first is to the difference between the two last. Thus, 2, 3, 6, are in harmonical proportion; for 2 is to 6 as 1 to 3. Thus, 24, 16, 12, 9, are harmonical, for 24:9::8:3.

Arithmetical proportion; an equality of arithmetical ratios.

Geometrical proportion; an equality of geometrical ratios. [*See PROGRESSION, N. 4.*]

PROSE-CUTE, v. t. [L. *prosequor, prosequi*; pro and sequor, to follow, Eng. to seek. See **ESSEY**.] 1. To follow or pursue with a view to reach, execute, or accomplish; to continue endeavors to obtain or complete; to continue efforts already begun; as, to prosecute a scheme; to prosecute an undertaking. The plan of a great canal in the State of New York has been prosecuted with success. That which is morally good is to be desired and prosecuted. *Wilkins.*

This word signifies either to begin and carry on, or simply to continue what has been begun. When I say, "I have devised a plan which I have not the courage or means to prosecute," the word signifies to begin to execute. When we say, "The nation began a war which it had not means to prosecute," it signifies to continue to carry on. The latter is the genuine sense of the word, but both are well authorized. We prosecute any work of the hands or of the head. We prosecute a purpose, an enterprise, a work, studies, inquiries, &c.

2. To seek to obtain by legal process; as, to prosecute a right in a court of law.

3. To accuse of some crime or breach of law, or to pursue for redress or punishment, before a legal tribunal; as, to prosecute a man for trespass or for a riot. It is applied to civil suits for damages, as well as to criminal suits, but not to suits for debt. We never say a man prosecutes another on a bond or note, or in assumpsit; but he prosecutes his right or

claim in an action of debt, detinue, trover, or assumpsit. So we say, a man prosecutes another for assault and battery, for a libel or for slander, or for breaking his clause. In these cases, prosecute signifies to begin and to continue a suit. The attorney-general prosecutes offenders in the name of the king or of the state, by information or indictment. *Prosecute* differs from *persecute*, in as law it is applied to the legal proceedings only, whereas *persecute* implies cruelty, injustice, or oppression.

PROSE-CUTE, v. i. To carry on a legal prosecution; as, to prosecute for public offenses. *Blackstone.*

The Italian provianda is probably composed of *pro* and *vicianda*, victuals, from *vivere*, L. vivo, to live, and from *vicianda* the French have *viande*, Eng. viand. Whether the French *provende* and Norm. *provender* are from the same source, may be doubted. The German *proviant* may be formed from the L. *providere*, Sp. *proveer*, Port. *prover*. Qu. L. *proventus*. It is said that *provend*, *provender*, originally signified a vessel containing a measure of corn daily given to a horse or other beast. In England, this practice was restrained by statutes of Richard II. and Henry IV.

The Goth. *frod* signifies both wise, prudent, and broken; D. *vraed*, prudent. We see that *prudent*, *prudent*, and *prudent*, are from the same root. The sense of brittle would indicate that these words belong to the same family with the Dan. *brüder*, to break; and the radical elements are the same. The Welsh *pruz* is from tending out or reaching, hence *pryder*, anxiety, a stretching of the mind. The sense of *prude* is probably from stretching, strictness, stiffness; and the sense of *wise* is derivative. *Prudence* is from the same root, implying care, a tension of mind.]

It is sometimes more caution or circumspection.
Prudence is principally in reference to actions to be done, and due means, order, season, and method of doing or not doing. *Hale.*

The right of *punishment* belongs only to persons clothed with authority. Some *punishments* consist in exile or transportation, others in loss of liberty by imprisonment; some extend to confiscation by forfeiture of lands and goods; others induce a disability of holding offices, of being heirs, and the like. *Blackstone.*

Divine *punishments* are doubtless designed to secure obedience to divine laws, and uphold the moral order of created intelligent beings.

PURCHASE, *v. t.* [*Fr. pourchasser*, to seek, to pursue; *pour and chasser*, to chase, *fr. cacciare*, *Sp. cazar*.] This word seems to be considered by Blackstone as formed from the *L. perquisitio*. This is an error. The word is from the root of *chase*; *pourchasser* is to pursue to the end or object, and hence to obtain. In Law Latin, *purchase*, the noun, was written *perquisitum*. The legal use of the word in obtaining writs, shows best its true origin; to *purchase* a writ, is to sue out a writ, that is, to seek it out; for *sue*, *seek*, and *L. sequor*, are all of one origin, and synonymous with *chase*.
