PREFACE

CAN any good thing come out of Palestine? is the broader anti-Semitic retort to the sneer cast by the Jews themselves against the harmless and natural Nazarene; one more example of the poetic justice of History. And no doubt such opponents of the modern Jew will acclaim this volume as an admirable disproof of that thesis which it purports to uphold.

The dissimilarities, amounting in some cases to sheer contradiction, which mark many numbers, will appear proof positive that there is nothing in this numerical Qabalah, especially as we may presume that by filling up this dictionary from the ordinary Hebrew Lexicon one would arrive at a mere hotch-pot.

Apart from this, there is a deeper-lying objection to the Qabalah; viz., that the theory is an example of the fallacy Post hoc propter hoc.

Are we to believe, asks the sceptic, that a number of learned men deliberately sat down and chose words for the sake of their numerical value? Language is a living thing, with many sources and diverse; can it be moulded in any such arbitrary fashion?

The only reply seems to be a mere assertion that to some extent it certainly is so. Examples of a word being spelt deliberately wrong do occur; and such a jugglery as the changing of the names Abram and Sarai to Abraham and Sarah can hardly be purposeless. Once admit the end of such a wedge, and it is difficult to say whether it may not be driven home so far as to split asunder the Tree of Knowledge, if not the Tree of Life.

Another line or argument is the historical. We do not here refer to the alleged forgery of the Qabalah by Rabbi Moses ben Leon—was it not?—but to the general position of the ethnologist that the Jews were an entirely barbarous race, incapable of any spiritual pursuit. That they were polytheists is clear from the very first verse of Genesis; that Adonai Melekh is identical with “Moloch” is known to every Hebraist. The “Old Testament” is mainly the history of the struggle of the phallic Jehovah against the rest of the Elohim, and that his sacrifices were of blood, and human blood at that, is indisputable.

Human sacrifices are to-day still practised by the Jews of Eastern Europe, as is set forth at length by the late Sir Richard Burton in the MS. which the wealthy Jews of England have compassed heaven and earth to suppress, and evidenced by the ever-recurring Pogroms against which so senseless and outcry is made by those who live among those degenerate Jews who are at least not cannibals.

Is it to such people, indeed, that we are to look for the highest and subtlest spiritual knowledge?

To this criticism there are but two answers. The first, that an esoteric tradition of great purity may co-exist with the most crass exoteric practices. Witness the Upanishads in the land of Jagga-nath, hook-swinging, and the stupidest forms of Hatha-Yoga.

Witness the Tipitaka (with such perfections as the Dhammapada) in the midst of peoples whose science of torture would seem to have sprung from no merely human imagination. The descriptions in the Tipitaka itself of the Buddhist Hells are merely descriptions of the actual tortures inflicted by the Buddhists on their enemies.

The second, that after all is said, I find it works very well. I do not care whether $\sqrt{-1}$ is an impossible, an unimaginable thing, or whether de Moivre really invented it, and if so, whether de Moivre was an immoral man, and wore whiskers. It helps me to make certain calculations; and so long as that is so, it is useful, and I stick to it.

Other criticisms of the methods of the Qabalah itself have been made and disposed of in the article on the subject in "The Temple of Solomon the King" (Equinox V) and no further reference need be made to them in this place. It is only necessary to say that that article should be studied most thoroughly, and also the article "A Note on Genesis" in the second number of The Equinox.

With these two weapons, and the Sword of the Spirit, the Practicus, fully armed, may adventure himself in the great battle wherein victory is Truth.

PERDURABO.

EDITORIAL NOTE

THIS dictionary was begun by Allan Bennet (Fra.: Iehi Aour, now Bhikku Ananda Metteya) in the last decade of the nineteenth century since ψ-J.C. It was bequeathed to the present Editor, with many other magical MSS., on I.A.'s departure for Ceylon in 1899.

Frater Perdurabo used it, and largely added to it, in the course of his Qabalistic workings. With George Cecil Jones (Fra.: Volo Noscere) he further added to it by making it a complete cross-correspondence to the book DCCLXXVII.

It was further revised and checked, re-copied by a Jewish scribe, and again checked through, in the year V of the present Era.

The mathematical additions were continued by Fra.: P. and Fra.: Lampada Tradam; and the MS. finally copies on a specially constructed typewriter by Gerald Rae Fraser (Fra.: ψ) who added yet further mathematical data.

This copy has again been checked by Fra.: P. and Soror.: N.N. and the proofs further by three separate scholars.

The method of employing the dictionary has been fully indicated in The Temple of Solomon the King [Equinox V].

None of the editors claim to possess even the smallest degree of scholarship. The method of compilation has been to include all words given in Von Rosenroth's Qabalistic Dictionary, those specially commented on in S.D., I.R.Q., and I.Z.Q., those given in 777, and those found by Fratres I.A. and P. Some of them are found in texts of the Hebrew scriptures which appeared to those adepts to be of magical importance. Owing to their carelessness, the meaning of some few words has been lost, and cannot now be traced.

3291	—								

The first dozen factorials, and sub-factorials; and the ratios they bear to one another; note that $\underline{!n} / \underline{\underline{n}} = e$

N	$\underline{!N}$	$\underline{\underline{!N}}$	$\underline{!N} \div \underline{\underline{!N}}$	$\underline{\underline{!N}} \div \underline{!N}$
1	1	0	∞	0.000000
2	2	1	2.000000	0.500000
3	6	2	3.000000	0.333333
4	24	9	2.666666	0.375000
5	120	44	2.727272	0.366666
6	720	265	2.716981	0.368055
7	5040	1854	2.718446	0.367857
8	40320	14833	2.718262	0.367881
9	362880	133496	2.718283	0.367879
10	2628800	1334961	2.718281	0.367879
11	39916800	14684570	2.718281	0.367879
12	479001600	176214841	2.718281	0.367879

Factorial n , or $\underline{!n}$ is the continued product of all the whole numbers from 1 to n inclusive and is the number of ways in which n different things can be arranged.

Sub-factorial n , or $\underline{\underline{n}}$, is the nearest whole number to $n \div e$, and is the number of ways in which a row of n elements may be so deranged, that no element may have its original position.

Thus

$$\underline{!n} = 1 \times 2 \times 3 \times \dots \times n,$$

and

$$\underline{\underline{n}} = \frac{1 \times 2 \times 3 \times \dots \times n}{2.71828188\dots} \pm h,$$

where h is the smaller decimal fraction less than unity by which the fraction $\frac{1 \times 2 \times 3 \times \dots \times n}{2.71828188\dots}$ differs from a whole number.

is to be added or subtracted as the case may be.—The most useful expression for $\underline{\underline{n}}$ is:

$$\underline{\underline{n}} \equiv n! - \frac{n}{1} (n-1)! + \frac{n(n-1)}{1 \cdot 2} (n-2)! - \frac{n(n-1)(n-2)}{1 \cdot 2 \cdot 3} (n-3)! + \text{etc}$$

to $(n+1)$ terms.

$$\begin{aligned} e &\equiv 1 + \frac{1}{1!} + \frac{1}{2!} + \frac{1}{3!} + \dots \text{to } \infty \\ &\equiv 2.71828188\dots . \end{aligned}$$

Names of the letters	Figures of the letters	Value of the letters	English equivalents of the letters
(M) Alpeh	א	1	A
(D) Beth	ב	2	B
(D) Gimel	ג	3	C

(D) Tau	ת	400	T Th

When written large, the Value of a Hebrew letter is increased to one thousand times its ordinary value. A large Aleph is counted 1000: a large Beth, 2000: and so on.

Note that A, I, O, U, H, are really consonants, mere bases for the vowels. These vowels are not here given, as they have no importance in Gematria.

M, D and S before the names of the letters shew their division into Mothers, Double and Single letters, referred respectively to active Elements, Air, Water, Fire, Planets, and Signs. But שׁ and נ also serve to signify the Elements of Spirit and of Earth. See Liber 777.

<u>I</u> 2 The Mystic Number of Kether. S.P.M.		$\pi \sqrt{1}$	Gad, a Tribe of Israel; good fortune	גָּד
2 3. S. S.F.		π^2	Was weary	דָּבָב

		מְאַכְּאָשָׁנָה

א ב ר א א ה א א ד א א ב ר א

$418 = 418$ = **בֵּית הַחַיִּים** = **חַיָּה**, the House of Hé: because of I.Z.Q. 694; for **נ** formeth **נ**, but **נ** formeth **נְנִי**: each = 20. Thus is Abrahadabra a Key of the Pentagram.

Also, by Aik Bkr, it = 22: and $418 = 19 \times 22$. 19 = Manifestation; it therefore manifest the 22 Keys of R.O.T.A.

The first meaning is ABRAH DBR, = The Voice of the Chief Seer.

It resolves into Pentagram and Hexagram as follows:

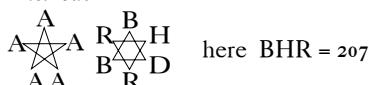

1st method.

forms 12 and 406, **אֶלְוֹן**

and **מִקְרָבָן** [406 = **מִקְרָבָן**], where AThH= Microprosopus, and HVA = Macropropous. The Arcanum is therefore that of the Great Work.

2nd method.

here BHR = 207

= **סֻמְךָן**, etc., and DBR = Voice ("The Vision and the Voice"); thus showing, by Yetziratic attribution, the Three Wands— Caduceus: Phoenix: Lotus. Note always **בְּבָבָן** are the three Supernals.

3rd method.

give 205 + 213;

both mean "Mighty," when Abrahadabra is "The Word of Double

Power." AAB shows AB : AIMA : BN, viz., Amoun : Thoth : Mout. By Yetziratic MEthod, H : D : R : are Isis : Horus : Osiris. (Also, for H:D:R; vide I.R.Q. 992.)

Dividing as 3 and 8, we get Δ of Horus dominating the Stooping Dragon, **אֲדָר יְאָזִין**; also—

from

we get

$8 = 66$, Love, and $207 = 207$, Light; $8 \times 207 = 18$, which is equivalent to **חַיִּים**, Living; further, $207 = 23 \times 9 = 23\text{Chayim}$, Life: hence Licht : Liebe : Leben.

Again, $418 = 207 + \text{way} = 21 + 397$, q.v. **דְּבָר** and $678 = 6 + 7 + 8 = 21$. $2 \times 2 + 2 \times 6 + 7 = 32$. The Five different letters represent Amoun:Thoth:Isis: Horus:Osris. They (A + B + R + H + D) add to 212 (q.v.).

Finally, **ש** is the Crown, **ב** the Wand, **כ** the Cup, **נ** the Sword, **ר** the R.C.

See Equinox, V and VII, for further details.

π 419

Serpent: the letter Teth **תֵּיתָה**

Sodom and Gomorrah **סָדוּם + עַמּוֹרָה**

420

It was **חַיָּה**

Dolium, vas **חַבּוֹת**

Vapour, smoke **עַשְׁן**

Pacifica **שְׁלָמִים**

רַצְפִּים

π 421

Angel ruling **בְּשִׂיעִיה**

Angel ruling **פְּשִׁיאָל**

מלכָא בְּתִרְשִׁים וְעַד בֶּרוּחַ שָׁחוּרִים
The Intelligence of the Intelligences of the Moon.

The Spirit of the Spirits of the Moon

שְׁדֵבֶרְשָׁחָמָעַת שְׁרָתָן

[A pendant to this work, on the properties of pure number, is in preparation under the supervision of Fraters P. and ψ . Also a companion volume on the Greek Qabalah by them and Frater J.M.]

Transcriber's notes.

The software I used to set up mathematical expressions cannot cope with the notation Crowley used to represent factorials. In the expressions for $\underline{\underline{n}}$ and e I have therefore substituted the modern use of $n!$ for n factorial. $0!$ is conventionally defined as 1; for a positive integer n , $n!$ is thus equal to $(n-1)! \times n$. e is defined as the sum from $n = 0$ to infinity of $1/(n!)$, otherwise written:

$$e \equiv \sum_{i=0}^{\infty} \frac{1}{i!}$$

While I am not familiar with the notation of sub-factorials used here, I will observe that if we similarly define sub-factorial 0 as 1 (again, simply as a convenience) then for any positive integer n , $\underline{\underline{n}} = n \times \underline{\underline{(n-1)}} + (-1)^n$. $[(-1)^n = 1 \text{ if } n \text{ be even, } -1 \text{ if } n \text{ be odd.}]$ Or we could have a computer do it thus (using the conventional notation of the C programming language):

```
int subfact ( int n )
{
    if (n < 1) return 1; /* should strictly be undefined for n < 0 */
    else return (n*subfact(n-1) + 1 - 2*(n%2));
}
```

Similarly, the rather ugly expression for $\underline{\underline{n}}$ given in the preface simplifies to:

$$\frac{n!}{0!} - \frac{n!}{1!} + \frac{n!}{2!} - \frac{n!}{3!} + \dots \text{ to } n+1 \text{ terms; or, in sigma notation, } \sum_{i=0}^n \frac{(-1)^i n!}{i!}$$

I have made alterations to the page of abbreviations, signs and figures to reflect actual use. The notation of a box around a number to indicate a perfect square is used only in the table of factors; in the main table a root symbol was used. Similarly, we were informed that “R (n) before [a number shows that the number is] a reciprocal (or ‘amicable’) number” which is nowhere defined and nowhere used. The printed edition did not explain that π was used in the main table to denote prime numbers. A “perfect” number is one which is the sum of its factors (including 1), e.g. $6 = 1+2+3$; $28 = 1+2+4+7+14$; $496 = 1+2+4+8+16+31+62+124+248$.

The citations of “S.D. ii. 467” in the entries for 157 and 227 refer not to the Sepher Dtzennouthia but to Blavatsky’s *Secret Doctrine*. My thanks to Tim Maroney for this information.

Pietro di Abano was neither the actual nor the imputed author of the “Arbatel of Magick” (*de magia veterum*), in fact “Arbatel” may well have been meant as the author’s name. The first and only known book of the “Arbatel” (an outline description of the work lists nine volumes) was printed as Basle in 1575 and bound up in vol. i of the Lyons edition (ca. 1600) of Cornelius Agrippa’s *Opera* which included the *Heptameron*, a short Grimoire of planetary magick spuriously attributed to d’Abano.

References to page numbers in 777 have been changed to refer to column numbers.

This etext of Liber D was completely key-entered by myself, and I take full responsibility for any errors in it which do not occur in the printed edition. I have corrected a few errors which could be dealt with *within* the entry for a given number: many words are mis-spelt, and placed at the correct numeration for the mis-spelling.

T.S.
