CALIFORNIA CIPHER

THE cipher ritual was adopted at the 1989 Annual Communication of the Grand Lodge of California.

This book is subtitled "A Valuable Aid to the Memory," and should only be used as such. The same word may be coded different ways, or the same code representing several different words. They have been left so deliberately. To do otherwise would have made the text more readable, and, thus, more capable of communicating our esoteric work to those not "lawfully entitled to receive the same." It is still the responsibility of your coaches to teach the work, and the Inspector's duty to confirm that it has been taught correctly.

The majority of the floorwork is missing from this book. We have continued the convention of printing instructions in italics and enclosing them in parentheses. As with the words, the floorwork cannot be learned from this book. Its instruction is the responsibility of your coaches and the Inspector.

A B C denotes the full name and Mr/Br C when only the last name should be used.

MrsL- Mr. C (*and if others, each last*
name), before you can be initiated an En-
tered Apprentice Mason, it will be neces-
sary for you to answer in a satisfactory
manner the following questions:

I. Do you seriously declare, upon your
honor, that unbiased by friends and uninflu-
enced by mercenary motives, you freely and
voluntarily offer yourself as a candidate for
the mysteries of Masonry?

II. Do you seriously declare, upon your
honor, that you are prompted to solicit the
privileges of Masonry by a favorable opin-
ion conceived of the Institution, a desire for
knowledge, and a sincere wish to be service-
able to your fellow creatures?

III. Do you seriously declare, upon your
honor, that you will cheerfully conform to
all the ancient established usages and cus-
toms of the Fraternity?

As you have answered these questions sat-
isfactorily, I will now leave you in the
charge of these gentlemen, who will prepare
you to receive the First Degree of Masonry.
It will be necessary for you to be divested of
all immurals and metals, and so much of your
clothing that you will be neither naked nor
clad, bare foot nor shod. Satisfactory rea-
sons will be given you for these and all
things else required of you. For the present
it is sufficient to say, that you will be asked
to submit to nothing, except that to which
all persons who have preceded you, have
been required to submit.

Speaker or Singer:

Behold how good and how pleasant it is for brethren to dwell together in unity.

It is like the precious ointment upon the head, that ran down upon the beard, even Aaron's beard, that went down to the skirts of his garments, as the dew of Hermon, and as the dew that descended upon the mountains of Zion: for there the Lord commanded the blessing, even life forevermore.

LAMB-SKIN APRON

It is an emblem of innocence, and the badge of a Mason; more ancient than the Golden Fleece or the Roman Eagle; more honorable than the Star or Garter, or any distinction that can be conferred upon you, at this or any future period, by King, Prince, Potentate, or any other person, and which it is hoped that you will wear with pleasure to yourself and honor to the Fraternity.

The Twenty-four Inch Gauge is an instrument made use of by operative Masons to measure and lay out their work. But we, as Free and Accepted Masons, are taught to make use of it for the more noble and glorious purpose of dividing our time. It, being divided into twenty-four equal parts, is emblematic of the twenty-four hours of the day, which we are taught to divide into three parts, whereby we find a part for the service of God and a distressed worthy brother, a part for our usual vocations; and a part for refreshment and repose.

The Common Gavel is an instrument used

by operative Masons to break off the rough and superfluous parts of stones, the better to fit them for the builder's use. But we, as Free and Accepted Masons, are taught to make use of it for the more noble and glorious purpose of divesting our hearts and consciences of all the vices and superfluities of life; thereby fitting our minds, as living stones, for that spiritual building, that house not made with hands, eternal in the heavens. PART III

In the third section we receive instruction relative to the Form, Supports, Covering, Furniture, Ornaments, Lights and Jewels of a Lodge; how it is situated, and to whom dedicated.

(*The next paragraph is not said if optional long form lecture is to be given.*)

The explanation of these is to be found in the Monitor, which has been adopted by the Fraternity as a textbook, and with which it is hoped that you will soon make yourself familiar.

[A Lodge is a certain number of brethren duly assembled, with a Holy Bible, a Square and Compass, and a Charter or Dispensation authorizing them to meet.

A Charter is an instrument emanating from a Grand Lodge, and, in this jurisdiction signed by the Grand Master and Grand Secretary, authorizing certain brethren therein named, when duly assembled, to Initiate, Pass, and Raise all good men and true who may apply for the purpose and whom they may find worthy. A Dispensation is a like instrument, issued by the Grand Master during the recess of the Grand Lodge, which for a limited period, confers similar powers.

Our ancient brethren assembled on the highest hills and in the lowest vales, the better to observe the approach of cowans and eavesdroppers.

The Form of a Lodge is oblong. It extends from east to west and from north to south, and it is said to be thus extensive to denote the universality of Masonry and to teach us that a Mason's charity should be equally extensive; for in every country and in every clime are Masons to be found.

A Lodge is metaphorically said to be *supported* by three great pillars, denominated Wisdom, Strength, and Beauty; it being necessary that there should be Wisdom to contrive, Strength to support, and Beauty to adorn all great and important undertakings. These pillars are represented in the Lodge by the Worshipful Master, the Senior and Junior Wardens.

The Covering of a Lodge is no less than the clouded canopy or star-decked heaven where all good Masons hope at last to arrive by aid of that theological ladder which Jacob, in his vision, saw, reaching from earth to heaven, the three principal rounds of which are denominated *Faith, Hope, and Charity*; which admonish us to have faith in God, hope of immortality, and charity for

all mankind. The greatest of these is Charity; for our Faith may be lost in sight, Hope ends in fruition, but Charity extends beyond the grave, through the boundless realm of eternity.

Every regular Lodge is furnished with a Holy Bible, Square and Compass.

The Holy Bible is dedicated to God, it being His incalculable gift to man, as the rule and guide of his faith; @upon al @s r obgtd; the Square to the Master, because it is the proper Masonic emblem of his office; and the Compass to the Craft, for by due attention to its use, we are taught to circumscribe our desires and keep our passions within due bounds toward all mankind.

The *Ornaments* of a Lodge are the Mosaic Pavement, the Indented Tessel, and the Blazing Star. The Mosaic Pavement is a representation of the ground floor of King Solomon's Temple, and is emblematic of human life, checkered with good and evil. The Indented Tessel is a representation of the beautiful tessellated border or skirting which surrounded the pavement, and is emblematic of the manifold blessings and comforts which surround us, and which we hope to enjoy by a faithful reliance upon Divine Providence, hieroglyphically represented by the Blazing Star in the center.

The *Lights* of a Lodge are three, situated in the East, West, and South. As you may observe, there is none in the North, because King Solomon's Temple, of which every Lodge is a representation, was situated so far north of the Ecliptic that neither the Sun nor Moon, at meridian height, could dart its rays into the north part of the building. The North, therefore, among Masons, has always been termed a place of darkness.

The *Jewels* of a Lodge are six; three immovable, and three movable. The Immovable Jewels are the Square, the Level, and the Plumb; and they are termed immovable because they are the jewels of the three principal officers of the Lodge, the Worshipful Master, the Senior and Junior Wardens, who are always stationed in the East, West, and South. The Square denotes morality, the Level equality, and the Plumb rectitude of life.

The Movable Jewels are the Rough Ashlar, the Perfect Ashlar, and the Trestle Board. The Rough Ashlar is a stone as taken from the quarry in its rude and natural state. The Perfect Ashlar is a stone made ready by the hands of the workman, to be adjusted by the working-tools of the Fellow Craft. The Trestle Board is for the Master Workman to draw his designs upon.

By the Rough Ashlar we are reminded of our rude and imperfect state by nature; by the Perfect Ashlar, of that state of perfection at which we hope to arrive by a virtuous education, our own endeavors, and the blessing of God; and by the Trestle Board we are reminded that, as the operative workman erects his temporal building agreeably to the rules and designs laid down by the Master on his Trestle Board, so should we, both operative and speculative, endeavor to erect our spiritual building agreeably to the rules and designs laid down by the Supreme Architect of the Universe in the great book of nature and revelation, which is our spiritual, moral, and Masonic Trestle Board.

Lodges are situated due East and West because Moses, after having been instrumental in conducting the children of Israel through the Red Sea when pursued by Pharaoh and his hosts, by divine command erected a tabernacle which he placed due east and west, to commemorate the mighty east wind by which their miraculous deliverance was wrought. This tabernacle was an exact model for King Solomon's Temple, for which reason all Masonic Lodges are, or should be, situated due east and west.

Lodges were anciently dedicated to King Solomon, as it is said that he was our first

Most Excellent Grand Master. Lodges at the present time are dedicated to Saint John the Baptist and Saint John the Evangelist, who were two eminent patrons of Masonry; and since their time there is, or should be, represented in every regular Lodge a certain point within a circle—the point representing an individual brother, and the circle the boundary line of his conduct, beyond which he should never suffer his passions, his prejudices, or his interests to betray him.

This circle is supported by two perpendicular parallel lines, representing Saint John the Baptist and Saint John the Evangelist, and on its top rest the Holy Writings. In tracing its circumference we necessarily touch upon the parallel lines and also upon the Holy Bible, and while a Mason keeps himself thus circumscribed, it is impossible that he can materially err.]

The three principal tenets of Masonry are Brotherly Love, Rehef and Truth.

By the exercise of Brotherly Love we are taught to regard the whole human species as one family,—the high and the low, the rich and the poor,—who, as created by one almighty parent, and inhabitants of the same planet, are to aid, support, and protect each other. On this principle Masonry unites men of every country, sect and opinion; and

causes true friendship to exist among those who might otherwise have remained at a perpetual distance.

To relieve the distressed is a duty incumbent on all men, but particularly on Masons, who are linked together by an indissoluble chain of sincere affection. To soothe the unhappy, to sympathize with their misfortunes, to compassionate their miseries, and to restore peace to their troubled minds, is the great aim we have in view. On this basis we form our friendships and establish our connections.

Truth is a divine attribute and the foundation of every virtue. To be good and true is the first lesson we are taught in Masonry. On this theme we contemplate; and by its dictates endeavor to regulate our conduct. Hence, while influenced by this principle, hypocrisy and deceit are unknown among us; sincerity and plain dealing distinguish us; and with heart and tongue, we join in promoting each other's welfare and rejoicing in each other's prosperity.

Temperance is that due restraint upon the affections and passions which renders the body tame and governable, and frees the mind from the allurements of vice. This virtue should be your constant practice, as you are thereby taught to avoid excess or the contracting of any licentious or vicious habits, the indulgence in which might lead you to disclose some of those valuable secrets which you have promised to conceal and never reveal, which would consequently subject you to the contempt and detestation of all good

Os, @ t + pn % ur ob, tt % hv ur t ct se te @ so fr wch is th gt, o fs pr pt % en.

Fortitude is that noble and steady purpose of the mind whereby we are enabled to undergo any pain, peril, or danger, when prudentially deemed expedient. This virtue is equally distant from rashness and cowardice, and, like the former virtue, should be deeply impressed upon your mind, as a safeguard or security against any illegal attempt which may be made, by force or otherwise, to extort from you any of those valuable secrets with which you have been so

solemnly entrusted, and which was emblematically represented on your first admission into the Lodge,

whn u wr rc upn + pnt % a shp inst,
pre ur nk lb br, wch is + pctl, o sct
pr pt % en.

Prudence teaches us to regulate our lives, and actions agreeably to the dictates of reason, and is that faculty by which we wisely judge and prudentially determine on all things relative to our present, as well as our future happiness. This virtue should be your peculiar characteristic, not only for the government of your conduct while in the Lodge, but also when abroad in the world. You should be particularly careful, in all strange and mixed companies, never to let fall the least sign, token, or word, whereby the secrets of Freemasonry might be unlawfully obtained,

CHARGE

MY BROTHER:—Having passed through the ceremonies of your initiation, allow me to congratulate you on your admission into our ancient and honorable Fraternity. Ancient, as having existed from time immemorial; and honorable, as tending to make all men so who are strictly obedient to its precepts. It is an institution having for its foundation the practice of the social and moral virtues; and, to so high an eminence has its credit been advanced, that, in every age and country, men pre-eminent for their moral and intellectual attainments have encouraged and promoted its interests. Nor has it been thought derogatory to their dignity that monarchs have, for a season, exchanged the sceptre for the trowel, to patronize our mysteries and join in our assemblies.

As a Mason, you are to regard the volume of the Sacred Law as the great light in your profession; to consider it as the unerring standard of truth and justice; and to regulate your actions by the divine precepts it contains. In it you will learn the important duties which you owe to God, your neighbor, and yourself. To God, by never mentioning

His name but with that awe and reverence which are due from the creature to his Creator; by imploring His aid in all your lawful undertakings; and by looking up to Him in every emergency for comfort and support. To your neighbor, by acting with him upon the Square; by rendering him every kind office which justice or mercy may require; by relieving his distresses and soothing his afflictions; and by doing to him as, in similar cases, you would that he should do unto you. And to yourself, by such a prudent and well-regulated course of discipline as may best conduce to the preservation of your corporeal and mental faculties in their fullest energy; thereby enabling you to exert the talents wherewith God has blest you, as well to His glory as to the welfare of your fellow-creatures.

As a Citizen, you are enjoined to be exemplary in the discharge of your civil duties, by never proposing or countenancing any act which may have a tendency to subvert the peace and good order of society; by paying due obedience to the laws under whose protection you live; and by never losing sight of the allegiance due to your country.

As an Individual, you are charged to practice the domestic and public virtues. Let Temperance chaste, Fortitude support,

and *Prudence* direct you, and let *Justice* be the guide of all your actions. Be especially careful to maintain, in their fullest splendor, those truly Masonic ornaments—*Brotherly Love, Relief, and Truth.*

Finally: Be faithful to the trust committed to your care, and manifest your fidelity to your principles by a strict observance of the Constitutions of the Fraternity; by adhering to the Ancient Landmarks thereof, and by refusing to recommend anyone to a participation in our privileges, unless you have strong reasons to believe that, by a similar fidelity, he will ultimately reflect honor on our ancient Institution.

Supreme Grand Master! Ruler of Heaven
and Earth! Now that we are about to sepa-
rate, and return to our respective places of
abode, wilt thou be pleased so to influence
our hearts and minds, that we may each one
of us practice, out of the Lodge, those great
moral duties which are inculcated in it, and
with reverence study and obey the laws
which thou hast given us in thy Holy Word.
Amen.

The Twenty-four-inch Gauge is an instrument made use of by operative Masons to measure and lay out their work; but we, as Free and Accepted Masons, are taught to make use of it for the more noble and glorious purpose of dividing our time. It being divided into twenty-four equal parts, is emblematic of the twenty-four hours of the day, which we are taught to divide into three parts, whereby we find a part for the service of God and a distressed worthy brother, a part for our usual vocations, and a part for refreshment and repose.

The Common Gavel is an instrument used by operative masons to break off the rough and superfluous parts of stones, the better to fit them for the builder's use; but we, as Free and Accepted Masons, are taught to make use of it for the more noble and glo-

rious purpose of divesting our hearts and consciences of all the vices and superfluities of life; thereby fitting our minds, as living stones, for that spiritual building—that house not made with hands—eternal in the heavens.

Great Architect of the Universe! In thy name we have assembled and in thy name we desire to proceed in all our doings. Grant that the sublime principles of Freemasonry may so subdue every discordant passion within us—so harmonize and enrich our hearts with thine own love and goodness—that the Lodge at this time may humbly reflect that order and beauty which reign forever before thy throne. Amen.

Response. So mote it be. (WM rplc ht)

Or, this alternate prayer may be used:

Supreme Ruler of the Universe! We reverently invoke thy blessing at this time. Wilt thou be pleased to grant that this meeting, thus begun in order, may be conducted in peace and closed in harmony. Amen.

Response. So mote it be. (*WM rplc ht*)

Speaker or Singer:

"Though I speak with the tongues of men
and of angels, and have not charity, I am
become as sounding brass or a tinkling cym-
bal."

"And though I have the gift of prophecy and
understand all mysteries and all knowledge, and
though I have all faith, so that I could remove
mountains, and have not charity, I am nothing.
And though I bestow all my goods to feed the
poor, and though I give my body to be burned,
and have not charity, it profiteth me nothing.

"Charity suffereth long and is kind, charity
envieth not, charity vaunteth not itself, is not
puffed up, doth not behave itself unseemly, seek-
eth not her own, is not easily provoked, thinketh
no evil, rejoiceth not in iniquity, but rejoiceith
in the truth, beareth all things, believeth all
things, hopeth all things, endureth all things.

"And now abideth Faith; Hope and Charity—
these three, but the greatest of these is Charity."

The *Plumb* is an instrument made use of
by operative masons, to try perpendiculars;
the *Square*, to square their work; and the
Level, to prove horizontals; but we, as Free
and Accepted Masons, are taught to make
use of them for more noble and glorious pur-
poses. The Plumb admonishes us to walk
uprightly in our several stations before God
and man, squaring our actions by the square
of virtue and ever remembering that we are
traveling upon the level of time, to "that
undiscovered country, from whose bourne
no traveler returns."

By Operative Masonry we allude to a proper application of the useful rules of architecture, whence a structure will derive figure, strength, and beauty and from which will result a due proportion and just correspondence in all its parts. It furnishes us with dwellings and convenient shelters from the vicissitudes and inclemencies of the seasons, and while it displays the effects of human wisdom, as well in the choice as in the arrangement of the several materials of which an edifice is composed, it demonstrates that a fund of science and industry is im-

planted in man for the best, most salutary, and most beneficent purposes.

By Speculative Masonry we learn to subdue the passions, act upon the Square, keep a tongue of good report, maintain secrecy, and practise charity. It is so far interwoven with religion as to lay us under obligations to pay that rational homage to the Deity, which at once constitutes our duty and our happiness. It leads the contemplative Mason to view with reverence and admiration the glorious works of the creation, and inspires him with the most exalted ideas of the perfections of his Divine Creator.

Their principal use, besides serving as maps to distinguish the outward parts of the earth and the situation of the fixed stars, is

to illustrate and explain the phenomena arising from the annual revolution of the earth around the sun, and its diurnal rotation upon its own axis. They are valuable instruments for improving the mind and giving it the most distinct idea of any problem or proposition, as well as for enabling it to solve the same. Contemplating these bodies, we are inspired with a due reverence for the Deity and His works, and are induced to encourage the studies of astronomy, geography, navigation, and the arts dependent upon them, by which society has been so much benefited.

ORDERS OF ARCHITECTURE

By order in architecture is meant a system of all the members, proportions, and ornaments of columns and pilasters; or, it is a regular arrangement of the projecting parts of a building, which, united with those of a column, form a beautiful, perfect and complete whole.

From the first formation of society, order in architecture may be traced. When the rigor of seasons first obliged men to contrive shelter from the inclemency of the weather, we learn that they first planted trees on end, and then laid others across to support a covering. The bands which connected those trees at top and bottom are said to have given rise to the idea of the base and capital of pillars; and from this simple hint originally proceeded the more improved art of architecture.

The Five Orders are thus classed: the Tuscan, Doric, Ionic, Corinthian, and Composite.

The ancient and original orders of architecture, esteemed by Masons, are no more than three, the *Doric*, *Ionic* and *Corinthian*, which were invented by the Greeks. To these the Romans added two, the *Tuscan*,

which they made plainer than the Doric, and the Composite, which was more ornamental, if not more beautiful, than the Corinthian. The first three orders alone, however, show invention and particular character, and essentially differ from each other; the two others having nothing but that which is borrowed, and differing only accidentally. The Tuscan is the Doric in its earliest state, and the Composite is the Corinthian enriched with the Ionic. To the Greeks, therefore, and not to the Romans, we are indebted for what is great, judicious, and distinct in architecture.

Geometry treats of the powers and properties of magnitudes in general, where length, breadth, and thickness are considered; from a *point* to a *line*, from a line to a *surface* and from a surface to a *solid*.

A *point* is the beginning of all geometrical matter.

A *line* has length, without breadth or thickness.

A *surface* has length and breadth, without thickness.

A *solid* has length, breadth and thickness.

By this science the architect is enabled to construct his plans and execute his designs; the general, to arrange his soldiers; the engineer, to mark out grounds for encampments; the geographer, to give us the dimensions of the world and all things therem contained, to delineate the extent of seas, and to specify the divisions of empires, kingdoms, and provinces. By it, also, the astronomer is enabled to make his observations and to fix the duration of times and seasons, years and cycles. In fine, Geometry is the foundation of architecture and the root of mathematics.

Geometry, the first and noblest of sciences, and the basis upon which the superstructure of Freemasonry is erected. By Geometry we may curiously trace nature through her various windings to her most concealed recesses. By it we discover the power, wisdom, and goodness of the Great Artificer of the Universe, and view with delight the proportions which connect this vast machine. By it we discover how the planets move in their respective orbits, and demonstrate their various revolutions. By it we account for the return of seasons, and the variety of scenes which each season displays to the discerning eye. Numberless worlds are around us, all framed by the same Divine Artist, which roll through the vast expanse, and are all conducted by the same unerring law of nature.

A survey of nature, and the observation of her beautiful proportions, first determined man to imitate the Divine plan, and

to study symmetry and order. This gave rise to societies and birth to every useful art. The architect began to design; and the plans which he laid down, being improved by time and experience, have produced works which are the admiration of every age.

The lapse of time, the ruthless hand of ignorance, and the devastations of war, have laid waste and destroyed many valuable monuments of antiquity on which the utmost exertions of human genius were employed. Even the Temple of Solomon, so spacious and magnificent, and constructed by so many celebrated artists, escaped not the unsparing ravages of barbarous force. Freemasonry, notwithstanding, has still survived. The *attentive ear* receives the sound from the *instructive tongue*, and the mysteries of Masonry are safely lodged in the repository of *faithful breasts*. Tools and implements of architecture, most expressive, are selected by the Fraternity to imprint upon the memory wise and serious truths; and thus, through the succession of ages, are transmitted unimpaired the most excellent tenets of our Institution.

CHARGE

MY BROTHER:—Being advanced to the second degree of Freemasonry, I congratulate you on your preferment.

Masonry is a progressive moral science, divided into different degrees; and, as its principles and mystic ceremonies are regularly developed and illustrated, it is intended and hoped that they will make a deep and lasting impression upon your mind.

It is unnecessary to recapitulate the duties which, as a Fellow Craft, you are bound to discharge. Your general good reputation affords satisfactory assurance that you will not suffer any consideration to induce you to act in a manner unworthy of the respectable character which you now sustain; but that, on the contrary, you will ever display the discretion, the virtue, and the dignity which become a worthy and exemplary Mason.

Our laws and regulations you are strenu-

ously to support, and be always ready to assist in seeing them duly executed. You are not to palliate nor aggravate the offenses of your brethren; but, in the decision of every trespass against our rules, you are to judge with candor, admonish with friendship, and reprehend with justice.

The impressive ceremonies of this degree are calculated to inculcate in the mind of the novitiate the importance of the study of the liberal arts and sciences, especially of the noble science of Geometry, which forms the basis of Freemasonry, and which, being of a divine and moral nature, is enriched with the most useful knowledge; for, while it proves the wonderful properties of nature, it demonstrates the more important truths of morality. To the study of Geometry, therefore, your attention is especially directed.

Your past regular deportment and upright conduct have merited the honor which we have conferred. In your present character it is expected that, at all our assemblies, you will observe the solemnities of our ceremonies; that you will preserve the ancient usages and customs of the Fraternity sacred and inviolate; and thus, by your example, induce others also to hold them in due veneration.

Such is the nature of your engagements as a Fellow Craft, and to a due observance of them you are bound by the strongest ties of fidelity and honor.

The *Plumb* is an instrument made use of
by operative Masons to try perpendiculars;
the *Square*, to square their work; and the
Level, to prove horizontals; but we, as Free
and Accepted Masons, are taught to make
use of them for more noble and glorious

purposes. The Plumb admonishes us to walk uprightly in our several stations before God and man, squaring our actions by the Square of virtue, and ever remembering that we are traveling upon the Level of time to "that undiscovered country from whose bourne no traveler returns."

Chaplain-

Great Architect of the Universe! In Thy name
We have assembled, and in Thy name we desire
to proceed in all our doings. Grant that the sub-
lime principles of Freemasonry may so subdue
every discordant passion within us - so harmon-
ize and enrich our hearts with thine own love

and goodness—that the Lodge at this time may
humbly reflect that order and beauty which
reign forever before Thy throne. Amen.

Response— So mote it be. (WM rplc ht)

Or, this alternate prayer may be used:

Supreme Ruler of the Universe! We rever-
ently invoke Thy blessing at this time.
Wilt Thou be pleased to grant that this
meeting, thus begun in order, may be con-
ducted in peace and closed in harmony.
Amen.

Response. So mote it be. (WM rplc ht)

Speaker or Singer:

Remember now thy Creator in the days of thy youth, while the evil days come not, nor the years draw nigh, when thou shalt say, I have no pleasure in them;

While the sun, or the light, or the moon, or the stars, be not darkened, nor the clouds return after the rain:

In the day when the keepers of the house shall tremble, and the strong men shall bow themselves, and the grinders cease because they are few, and those that look out of the windows be darkened.

And the doors shall be shut in the streets, when the sound of the grinding is low, and he shall rise up at the voice of the bird, and all the daughters of music shall be brought low;

Also when they shall be afraid of that which is high, and fears shall be in the way, and the almond tree shall flourish, and the grasshopper shall be a burden, and desire shall fail; because man goeth to his long home, and the mourners go about the streets:

Or ever the silver cord be loosed, or the golden bowl be broken, or the pitcher be broken at the fountain, or the wheel broken at the cistern.

Then shall the dust return to the earth as it was: and the spirit shall return unto God who gave it.

All the implements of Masonry, but especially the Trowel.

The *Trowel* is an instrument made use of by operative Masons to spread the cement which unites the building into one common

mass; but we, as Free and Accepted Masons, are taught to make use of it for the more noble and glorious purpose of spreading the cement of brotherly love and affection—that cement which unites us into one sacred band, or society of friends and brothers, among whom no contention should ever exist but that noble contention, or rather emulation, of who best can work and best agree.

Almighty and Eternal God! Great architect and Ruler of the Universe! At Whose creative fiat all things first were made! We, the frail creatures of Thy Providence, humbly implore Thee to pour down upon this convocation, assembled in Thy holy name, the continual dew of Thy blessing. And we especially beseech Thee to impart Thy grace to this Thy servant, who offers himself as a candidate to partake with us the mysterious secrets of a Master Mason. Endue him with such fortitude that in the hour of trial, he faint not, but pass him safely under Thy protection through the valley of the shadow of death that he may finally arise from the tomb of transgression and shine as the stars forever and ever. Amen.

ODE

Tune of Pleyel's Hymn

Solemn strikes the fun'ral chime,
Notes of our departing time;
As we journey here below,
Through a pilgrimage of woe.

Mortals, now indulge a tear,
For Mortality is here;
See how wide her trophies wave
O'er the slumbers of the grave.

Lord of all! below — above —
Fill our hearts with truth and love;
As dissolves our earthly tie,
Take us to Thy Lodge on high.

Thou, Oh God! knowest our downsitting
and our uprising, and understandest our
thoughts afar off. Shield and defend us
from the evil intentions of our enemies, and
support us under the trials and afflictions
which we are destined to endure while trav-
eling through this vale of tears. Man that is
born of a woman is of few days and full of

trouble. He cometh forth like a flower and
is cut down; he fleeth also as a shadow, and
continueth not. Seeing that his days are
determined, the number of his months is
with Thee; Thou hast appointed his bounds
that he can not pass; turn from him that he
may rest till he shall accomplish his day.
For there is hope of a tree, if it be cut down,
that it will sprout again, and that the tender
branch thereof will not cease. But man
dieth and wasteth away; yea, man giveth up
the ghost, and where is he? As the waters
fail from the sea and the flood decayeth and
drieth up, so man lieth down, and riseth not
till the heavens be no more. Yet, Oh Lord!
have compassion on the children of Thy cre-
ation; administer them comfort in time of
trouble; and save them with an everlasting
salvation. Amen.

HISTORICAL LECTURE

We read in the Holy Writings that it was decreed in the wisdom and counsels of Deity aforetime, that a house should be built, erected to God and dedicated to His holy name. We also learn from the same sacred source that David, King of Israel, desired to build the house, but that, in consequence of his reign having been one of many wars and much bloodshed, that distinguished privilege was denied him. He was not, however, left without hope, for God promised him that out of his loins there should come a man who would be adequate to the performance of so great and glorious an undertaking. That promise was verified in the person and character of Solomon, his son, who ascended the throne, and, after David was gathered to his fathers, wielded the sceptre over Israel at a time when (as the great Jewish historian, Josephus, informs us) peace and tranquillity pervaded the world, and all eyes seemed directed toward Jerusalem, as if to witness the splendid display of the wisdom of Solomon.

About this time King Solomon received a congratulatory letter from Hiram, King

of Tyre, desiring to participate, in a small degree at least, in the rich honors which then seemed to be clustering around his throne. In his reciprocations with Hiram of Tyre, King Solomon desired him to furnish a man well skilled in the arts and sciences, and his attention was directed to H A, a wd sn % + trb % Napth, @ we lrn tt Slm sent @ hd Hrm brt out % Ty; @ whn + prlary argmts fr + ert % th bldg were cmpld it ws comncd in + frth yr % + rgn % Slm und + ausp % thr grd mst, S K % Is, Hy K % T, @ H A, bt m prly und + imd dtm @ insp % H A, t w s, wh ws + arhte % + wk; @ w hv ths evg, my br, rps a tr, wch @c trdtm infms us, actly tk pc whn K S T ws nr its empln, @ wh rsld i + dth % + G M H A; hs dth ws prm, @ t cm atng it wr as flws: Fftn Fcs, seng + Tr nr its empln @ frg tt th wd nt b abl t obt @ @s wgs whn trv in fr cnts, ent int a cnspy t xrt fm + G M H A + scts % a @ @ or tk hs lf.

THIRD SECTION

The third section illustrates certain hieroglyphical emblems well calculated to increase knowledge and promote virtue. In it, also, many particulars relative to the building of King Solomon's Temple are noticed. That famous fabric, as I before informed you, was commenced in the fourth year of the reign of Solomon, on the second day of the month Zif, being the second month of the sacred year. It was located on Mount Moriah, near the place where Abraham was about to offer up his son Isaac, and where David met and appeased the destroying angel. It was supported by fourteen hundred and fifty-three columns and two thousand nine hundred and six pilasters, all hewn from the finest Parian marble. There were employed in its erection three Grand Masters, three thousand three hundred Masters or Overseers of the work, eighty thousand Fellow Crafts or hewers on the mountains and in the quarries, and seventy thousand Entered Apprentices or bearers of burdens; and these were all so classed and arranged by the wisdom of Solomon that neither envy, discord, nor confusion was suffered to inter-

rupt or disturb the peace and good fellowship which prevailed among the workmen; exc i + sngl instuc wch w hv ts evng rprntd @ wch rsultd in + dth % + G M H A,

and, as a striking evidence of the approbation and interposition of Divine Providence, we are informed by the great Jewish historian Josephus that, although more than seven years were occupied in its building, yet during the whole term it did not rain in the day time, but in the night season only, that the workmen might not be obstructed from their labors. From sacred history we also learn that there was not heard the sound of axe, hammer, or any tool of iron in the house while it was building, it having been put together in the manner described to you in a preceding degree.

EMBLEMS

The hieroglyphical emblems explained in
this degree are—

The Three Steps:

The Pot of Incense:

The Bee-hive:

The Book of Constitutions, guarded by
the Tyler's Sword:

The Sword, pointing to a Naked Heart,
and the All-Seeing Eye:

The Anchor and Ark:

The forty-seventh Problem of Euclid: and

The Hour glass and Scythe.

(*The next paragraph is not said if optional
long form lecture is to be given.*)

The explanation of these is to be found in
the monitor which has been adopted by the
Fraternity as a text book and with which it
is hoped that you will soon make yourself
familiar.

The Three Steps usually delineated upon
the Master's carpet, are emblematical of the
three principal stages of human life: *Youth*,
Manhood, and *Age*. In *Youth*, as Entered
Apprentices, we ought industriously to oc-
cupy our minds in the attainments of useful
knowledge; in *Manhood*, as Fellow Crafts,

we should apply our knowledge to the discharge of our respective duties to God, our neighbor, and ourselves; that so, in age, as Master Masons, we may enjoy the happy reflection consequent on a well-spent life, and die in the hope of a glorious immortality.

The Pot of Incense is an emblem of a pure heart, which is always an acceptable sacrifice to the Deity; and, as this glows with fervent heat, so should our hearts continually glow with gratitude to the great and beneficent Author of our existence, for the manifold blessings and comforts we enjoy.

The Bee Hive is an emblem of industry, and recommends the practice of that virtue to all created beings, from the highest seraph in heaven, to the lowest reptile of the dust. It teaches us, that as we came into the world rational and intelligent beings, so we should ever be industrious ones; never sitting down contented while our fellow-creatures around us are in want, especially when it is in our powers to relieve them, without inconvenience to ourselves.

When we take a survey of nature, we view man in his infancy, more helpless and indigent than the brute creation; he lies languishing for days, months, and years, totally

incapable of providing sustenance for himself, of guarding against the attack of the wild beasts of the field, or sheltering himself from the inclemencies of the weather. It might have pleased the great Creator of heaven and earth, to have made man independent of all other beings; but as dependence is one of the strongest bonds of society, mankind were made dependent on each other for protection and security, as they thereby enjoy better opportunities of fulfilling the duties of reciprocal love and friendship. Thus was man formed for social and active life, the noblest part of the work of God; and he that will so demean himself as not to be endeavoring to add to the common stock of knowledge and understanding, may be deemed a *drone* in the *hive* of nature, a useless member of society, and unworthy of our protection as Masons.

The Book of Constitutions, Guarded by the Tyler's Sword, reminds us that we should be ever watchful and guarded in our thoughts, words, and actions, particularly when before the enemies of Masonry; ever bearing in remembrance those truly Masonic virtues, *silence* and *circumspection*.

The Sword, Pointing to a Naked Heart, demonstrates that justice will sooner or

later overtake us; and although our thoughts, words, and actions may be hidden from the eyes of man, yet that All-seeing Eye, whom the *Sun, Moon and Stars* obey, and under whose watchful care, even *Comets* perform their stupendous revolutions, pervades the inmost recesses of the human *Heart*, and will reward us according to our merits.

The Anehor and Ark are emblems of a well-grounded *hope*, and a well-spent life. They are emblematical of that divine *ark* which safely wafts us over this tempestuous sea of troubles, and that *anchor* which shall safely moor us in a peaceful harbor, where the wicked cease from troubling, and the weary shall find rest.

The Forty-seventh Problem of Euclid was an invention of our ancient friend and brother, the great PYTHAGORAS, who, in his travels through Asia, Africa and Europe, was initiated into several orders of Priesthood, and raised to the sublime degree of Master Mason. This wise philosopher enriched his mind abundantly in a general knowledge of things, and more especially in Geometry, or Masonry. On this subject he drew out many problems and theorems; and, among the most distinguished, he erected

this, which, in the joy of his heart, he called *Eurcka*, in the Grecian language signifying *I have found it*; and upon the discovery of which he is said to have sacrificed a hecatomb. It teaches Masons to be general lovers of the arts and sciences.

The Hour-Glass is an emblem of human life. Behold! how swiftly the sands run, and how rapidly our lives are drawing to a close! We can not without astonishment behold the little particles which are contained in this machine; how they pass away almost imperceptibly! and yet, to our surprise, in the short space of an hour they are all exhausted. Thus wastes man! Today, he puts forth the tender leaves of hope; tomorrow, blossoms, and bears his blushing honors thick upon him; the next day comes a frost which nips the shoot; and when he thinks his greatness is still aspiring, he falls, like autumn leaves, to enrich our mother earth.

The Seythe is an emblem of time, which cuts the brittle thread of life, and launches us into eternity. Behold what havoc the Scythe of Time makes among the human race! If by chance we should escape the numerous evils incident to childhood and youth and, with health and vigor arrive to the years of manhood, yet withal we must

soon be cut down by the all-devouring
Seythe of Time and be gathered into the
land where our fathers have gone before us.]

It is the inspiration of that great Divinity
whom we adore, and bears the nearest re-
semblance or affinity to that Supreme Intel-
ligence which pervades all nature, and
which will never, never, never die. Hence,
my brother, how important it is that we
should endeavor to imitate *tGMHA* in his
truly exalted and exemplary character, in
his unfeigned piety to God, and in his in-
flexible fidelity to his trust; that we may be

prepared to welcome death, not as a grim ty-
rant, but as a kind messenger sent to trans-
late us from this imperfect to that all-per-
fect, glorious, and celestial Lodge above,
where the Supreme Grand Master of the
Universe forever presides.

Ths, my bro, enclds th lectr % ts 0. If u
wl rs, Br X wl dlvr u th chg.

CHARGE

MY BROTHER:—Your zeal for our Institution, the progress which you have made in our mysteries, and your steady conformity to our useful regulations, have pointed you out as a proper object for this peculiar mark of our favor.

Duty and honor now alike bind you to be faithful to every trust; to support the dignity of your character on all occasions; and strenuously to enforce, by precept and example, a steady obedience to the tenets of Freemasonry. Exemplary conduct on your part will convince the world that merit is the just title to our privileges, and that on you our favors have not been undeservedly bestowed.

As a Master Mason you are authorized to correct the irregularities of your less informed brethren, to fortify their minds with resolution against the snares of the insidious, and to guard them against every allurement to vicious practices. To preserve unsullied the reputation of the Fraternity ought to be your constant care; and, therefore, it becomes your province to caution the inexperienced against any breach of fidelity.

To your inferiors in rank or office you are to recommend obedience and submission; to your equals, courtesy and affability; and to your superiors, kindness and condescension. Universal benevolence you are zealously to inculcate; and by the regularity of your own conduct endeavor to remove every aspersion against this venerable Institution. Our ancient landmarks you are carefully to preserve, and never to suffer them, on any pretense, to be infringed; and you are never to countenance any deviation from our established customs.

Your honor and reputation are concerned in supporting with dignity the respectable character which you now bear. Let no motive, therefore, make you swerve from your duty; violate your vows or betray your trust; but be true and faithful, and imitate the example of that celebrated artist whom you have this evening represented. Thus you will render yourself deserving of the honor which we have conferred, and worthy of the confidence which we have reposed in you.

⊕ ⊖ (gs dwn t cdt.)

Brother C, I congratulate you on

your becoming a Master Mason, and as such, I commend you to the kind care, love and protection of all Master Masons withersoever dispersed. The eyes of the Fraternity are now upon you. Be just, be faithful, be true, and convince the world by your acts that on becoming a Master Mason you have become a better man. Retain, we entreat you, that goodness of heart, that purity of intention, and that love of virtue of which we think you now possessed, and of which this spotless vestment wherewith you are now girded is at once the emblem, the badge and the reward.

Nothing now remains to constitute you a member of..... Lodge No....., Free and Accepted Masons of the State of....., but to approach our Secretary's table and there sign its by-laws, which will subject you to its burdens and its responsibilities, as well as entitle you to its benefits and its privileges.

Chaplain-

Supreme Grand Master! Ruler of Heaven
and Earth! Now that we are about to sepa-

rate, and return to our respective places of
abode, wilt Thou be pleased so to influence
our hearts and minds, that we may each one
of us practice, out of the Lodge, those great
moral duties which are inculcated in it, and
with reverence study and obey the laws
which Thou hast given us in Thy Holy
Word. Amen.

Response. So mote it be. (W/M rplc ht.)

The Trowel is an instrument made use of by operative Masons to spread the cement which unites the building into one common mass; but we, as Free and Accepted Masons, are taught to make use of it for the more noble and glorious purpose of spreading the cement of brotherly love and affection—that cement which unites us into one sacred band,

or society of friends and brothers, among whom no contention should ever exist but that noble contention, or rather emulation, of who best can work and best agree.
