Later the use of this connective vowel was applied to compounds whose elements are of Latin origin, although in Latin itself, the connective vowel is *i* (cp. e.g. *art-i-fex*, 'artist', the stem of the first element being *arti-*). The use of the connective *o* was extended later to form compounds from elements of Late L., ML. and even ModL. origin, first in ethnic names (as *Anglo-Saxon*, *Anglo-Indian*) and later—esp. in our time—to coin scientific terms (as *radio-active*). As in Greek words (cp. e.g. *ἀριστο-αρχία* in contradistinction to *ἀριστο-κρατία*), the connective *o* is usually dropped if the second element begins with a vowel. The change of *nar-ange* to *or-ange* is prob. due to the influence of the name of the town *Orange*, an important transit station for the oranges bound for the north of France. The usual explanation that the change mentioned is due to a confusion with F. *or*, 'gold' (see *aurum*), must be abandoned owing to the fact that originally and for many centuries the fruit was called in French *pomme d'orange*, which makes it probable that *orange* was regarded as a place name. **parch**, tr. and intr. v. — Late ME. *parchen*. Some authorities derive this verb fr. OF. *perchier*, *parchier*, now *percher*, Picard form of F. *percer*, 'to pierce' (see *pierce*); others see in it a derivative of L. *persiccāre*, 'to dry thoroughly'. Both these etymologies are justly rejected by OED. for phonetic and historical reasons. — I tentatively suggest that Late ME. *parchen* derived through back formation fr. **parchment** (q.v.) The noun *parchment* was divided into *parch-ment* and through this division the verb *parch* in the sense 'to dry' was 'reconstructed'. (The orig. meaning of *parchment* was supposed to have been 'anything dried', and the meaning 'dried skin of animals used for writing' to be secondary). This etymology is supported by the rather striking fact that while the orig. form *parchemin* appears for the first time in English about 1300, the form *parchment* and the verb *parch* appear for the first time only about a hundred years later (see OED.)

Derivatives: *parch-ed*, *parch-ing*, adjs., *parching-ly*, adv.

**parchment**, n. — ME. *parchemin*, fr. OF. (= F.) *parchemin*, fr. L. *Pergamēna*, *Pergamina*, 'parchment', shortened for *Pergamēna charta* (so in Pliny), fr. Gk. *Περγαμηνή*, '(skin) of Pergamon', fr. *Πέργαμον*, 'Pergamon', the famous town in Mysia in Asia Minor, now called Bergama. F. *parchemin* was influenced in form by an association with L. *Parthica* (*pellis*), 'skin from the land of the Parthians'. The alteration of ME. *parchemin* into E. *parchment* is due to a confusion of the ending *-min* with the suff. *-ment* (fr. L. *-mentum*) and was prob. suggested by ML. *pergamentum*, 'parchment', which occurs in England already in the X cent., and which itself owes its form to a confusion of the ending *-mēnum* (in L. *Pergamēnum*) with the suff. *-mentum*. Cp. **parch**.

It is more probable, however, that Greek *πάρδος* has been borrowed fr. Heb. *bārōdāh*, 'spotted' (said of an animal), and lit. denotes 'the spotted animal'; see Heinrich Lewy, *Die semitischen Fremdwörter im Griechischen*, Berlin, 1895, p. 7. **Roman balance** — It is taken for granted that Roman balance means 'balance of Rome' or 'balance resembling the balance used in Rome'. According to my opinion, such an explanation of *Roman balance* is based on error. In reality, *Roman* in *Roman balance* derives fr. F. *romaine*, 'steelyard', fr. Sp. *romana*, fr. Arab. *rummāna<sup>h</sup>*, 'steelyard', fr. *rummān*, 'pomegranate'. Arab. *rummān* is borrowed fr. Aram. *rummānā*, 'pomegranate', which is rel. to Heb. *rīmōn*, of s.m. The steelyard was called in Arabic *rummāna<sup>h</sup>*, because the counterpoise used with Arabic balances usually had the shape of a pomegranate (Arab. *rummān*). Accordingly, *Roman* in the sense of *balance*, had nothing to do orig. with the adjective *Roman*, 'of Rome'; later, however, folk etymology identified F. *romaine*, 'steelyard', with F. *romaine*, fem. of *romain*, 'Roman', fr. L. *Rōmānus* (see **Roman**).
