HCO BULLETIN OF 12 AUGUST 1969

Class VIII Only

CASE SUPERVISOR ACTIONS

The following are basic Case Supervisor Actions.

It is to be noted Symptoms are double lettered (AA, BB) and the Directions to Auditors are numbered (1, 2, 3.) When more than one Direction applies to a symptom, a letter is added (1A, 1B).

In the future if a related Symptom is added, it will go to a triple letter for the same Class (BBB, JJJ).

In the future, for a triple letter, a Direction will be numbered as hundreds, (BBB 200, BBB 200 A).

Thus to have a system which can expand and be refined which can be charted and boxed.

A chart can be drawn up of Symptoms. This chart gives the numbers for Directions.

To save himself from writing, the Case Supervisor can get the slips run off separately in quantity.

These slips can be packaged in envelopes. Or go into a covered wooden box with 80/100 pigeon holes. The door closes over the holes, the chart is on the inside of the door, the whole thing can be padlocked. The pattern is that of a flag locker in which signal flags are kept. Each pigeon hole is numbered.

The C/S then simply looks on his chart, deals out of the C/S locker a number of slips, staples them, puts on auditor and PC, uses a time and date stamp and he is very much in business.

The C/S does not issue the Symptoms in folders. Only the Directions.

His comments to the Auditor can be made on a blank sheet stapled in front of the separate slips.

He then has his locker, he has an independent copy of this HCOB for separate reference. He will have his chart.

His only real problem is how to keep himself supplied with slips of directions. It is probably best to cut these all of a piece on mimeo stencils and get them run off in batches.

Standard Grades are not part of this set-up as it is understood that the Auditor knows these. Directions to do Standard Grades are written on the blank sheet.

The Standard Dianetic Case Supervisor actions and Dianetic Remedies have been added as a separate Section. Dianetic Symptom and C/S instruction numbers are preceded by “(D)” to distinguish them from the Class VIII instructions.

Good Luck!

CASE SUPERVISOR KK

CLASS VIII

Alcohol

Symptoms

Delusions.
Can't leave alcohol alone.
Dishonesty.
Physical deterioration.
Deception.
Religious fixations.
Sexual perversions or promiscuity.

Alcohol produces it's effect by rapidly burning up the vitamin B1 and foods in the body. This pulls a Thetan into the resulting low area.

The delusions of alcohol are almost entirely from R6. Animals, Religion, God, Sex, Perversion. The R6 bank was implanted while the Thetan was caught in a compound of frozen Alcohol and Glycol.

Use of Alcohol restimulates the R6 Bank.

CASE SUPERVISOR 11
CLASS VIII

PC or Pre OT: _____ Date: _____

Auditor: _____ Time: _____

CASE SUPERVISOR LL

CLASS VIII

Drugs

Symptoms

Registers on the meter as having taken drugs.

High TA.

Seems unauditible on ARC Straightwire or above or hangs up in doing Grades.

Talks randomly.

Compares auditing sessions to former Drug trips.

Looking for same euphoria from auditing as received during Drug trips.

Dub-in Engram.

Drugs and also Biochemical substances used in "treatment" or in tranquilizing the person produce delusion. This is done by making a reduced creation in the body so that the Thetan is dragged into heavy creating. Makes a plus and minus.

If a person is heavily the effect of something, then he has done it as an Overt.

A PC who has recently been on drugs should not be audited until off them for six weeks.

Vitamin B1 in heavy dosage has been known to alleviate the no-create body drag and so stop the obsessive create by the Thetan.

Auditing someone during a drug delusion state heavily hangs up a case and must not be done. Vitamins are not drugs.

Drugs include a long category of substances and even some poisons.

Anything that produced a release of a Thetan from the body can be Rehabbed.

CASE SUPERVISOR 12
CLASS VIII

SERIOUSLY PHYSICALLY ILL

1. Get a competent Medical analysis.
2. When well or if no improvement, find and audit any engrams or chain to F/N. R3RA Triple or Quad.

(Ruds do not have to be flown. Be careful in auditing a person running a fever, audit lightly. Do not force them into anything.)

RESISTIVE CASES 220M(1)

Had been previously ill . Protesting the Item

1. Fly the Ruds to F/N, check for protest on illness item. If so, handle protest fully (itsa E/S itsa). If item still reads, find and run an illness engram chain to F/N.

NOTE: You can't run a recall process on illness engrams. It is too much. If it doesn't read on illness reassess and send back to C/S. .

CASE SUPERVISOR WW

CLASS VIII

OT IV RUNDOWN

Symptoms

Has completed OT III

OT IV Warning:

This is in fact a Grade. Therefore to run it with out first setting the case up fully is to waste it.

Often the case has to (1) Be discharged with lots of corrective actions and (2) OT III must be run on the Pre OT by the auditor or at least cleaned up. It might not be uncommon to have to do half or more of the C/S's in the book before doing the OT IV rundown.

If one holds off and really flys the case, then the person ends up at OT Exterior very nicely when one does OT IV.

If you do OT IV and he is still in his head, all is not lost. You have other actions you can take eg: Clusters, Prepchecks , failed to exteriorise directions.

OT V and VI are designed for someone all ready exterior.

If a person doesn't go exterior after OT IV Rundown, you set him up for OT V by seeing he jolly well does go exterior before going on to V.
