

Humor, Wisdom and Revulsion about the Covid-19 Scamdemic

Douglas Karr 
@douglaskarr

Members of Congress have each been paid 16 paydays of \$7,125 base salaries for a total of \$114,000 since sending you \$1,200 to live on 240 days ago. You got 20 cents a day, they got \$475 a day. And they took a recess (paid vacation).

**We can't eat inside.
But we can eat outside.
But it's cold so we set
up outside as inside.
It's fine because it's
outside inside.**

Bes

@besf0rt

the new COVID relief bill includes:

- \$4'000'000'000 for navy weapons
- \$2'000'000'000 for air force missiles
- \$500'000'000 for israel
- tax breaks if you own a race horse

- \$600 for you

The CDC says the flu is almost nonexistent this year because of wearing masks and social distancing.

The CDC says COVID-19 is out of control because no one is wearing masks and social distancing.

Alan MacLeod

@AlanRMacLeod

The word "missile" appears 19 times
in the COVID Relief Bill.

"Aircraft" appears 208 times.

"Munition" 46 times.

"weapon" 46 times.

"Healthcare" = 24.

"doctor"/"nurse" = 5.

"masks" = 0.

...

Dr. Fauci admitted lying to the American people about masks, in order to conserve them for health workers. He has now admitted lying about the herd immunity threshold, so that we would be more likely to get vaccinated. What else is he lying to us about?

Coronavirus disease (COVID-19): Serology

Coronavirus disease (COVID-19): Serology

9 June 2020 | Q&A

What is herd immunity?

Herd immunity is the indirect protection from an infectious disease that happens **when a population is immune either through vaccination or immunity developed through previous infection**. This means that even people who haven't been infected, or in whom an infection hasn't triggered an immune response, they are protected because people around them who are immune can act as buffers between them and an infected person. The threshold for establishing herd immunity for COVID-19 is not yet clear.

antibodies and immunity

Coronavirus disease (COVID-19): Serology, antibodies and immunity

13 November 2020 | Q&A

What is herd immunity?

'Herd immunity', also known as 'population immunity', **is a concept used for vaccination**, in which a population can be protected from a certain virus **if a threshold of vaccination is reached**.

Herd immunity is achieved by protecting people from a virus, **not by exposing them to it**. *Read the [Director-General's 12 October media briefing speech](#) for more detail.*

**“Some may call
it **Communism**,
but I call it what
it is: **Judaism!**”**
