WHEN JEWS CRITICIZE

If we lived in a sane society, they would ask the thousands of healthcare workers who don't want the rona shot WHY they don't want it, instead of just firing them.

Surely an important question, given these are the people who actually deal with patients day in, day out.

Always Question "Settled Science"

@TheFreeThoughtProject

In the 1940's-50's a Lobotomy represented the leading edge of psychiatric science and many considered the procedure "settled science." Infact, in 1949, the inventor of the procedure, Dr. António Egas Moniz, was awared the Noble Prize for his discovery. Thousands of patients had their SELF destroyed by this procedure and became docile, robotic, non-humans,

Remember there is no such thing as "settled science," everything should always be questioned and studied.

I talked to a restaurant owner that posted a vaxx proof to dine sign on his business. I asked him about his feelings regarding having an empty restaurant and losing business. He told me that the state pays him to stay open because he participates with the vaxx requirement sign, and if his sales go down they pay him even more money. So he said he really doesn't care if people come or not..
I had no idea of this!!!

What? Just like they're paying the hospitals to claim covid deaths.

Wow. Just wow.
