

MIND CONTROL

With Silent Sounds and Super Computers

The Mind-Altering Mechanism is Based on a Subliminal Carrier Technology:

The Silent Sound Spread Spectrum (S.S.S.S.),

sometimes called "S-quad" or "Squad".

It was developed by Dr. Oliver Lowery, of Norcross, Georgia, and is described in U.S. Patent # 5,159,703, "SILENT SUBLIMINAL PRESENTATION SYSTEM",

Dated October 27, 1992.

The abstract for the patent reads:

"A silent communications system in which non-aural carriers, in the very low or very high audio frequency range or in the adjacent ultrasonic frequency spectrum are amplitude- or frequency modulated with the desired intelligence and propagated acoustically or vibrationally, for inducement into the brain, typically through the use of loudspeakers, earphones or piezoelectric transducers. The modulated carriers may be transmitted directly in real time or may be conveniently recorded and stored on mechanical, magnetic, or optical media for delayed or repeated transmission to the listener."

According to literature by Silent Sounds, Inc., it is now possible, using supercomputers, to analyze human emotional EEG patterns and replicate them, then store these "emotion signature clusters" on another computer and, at will, silently induce and change the emotional state in a human being."

"My name is Trevor Constantine. I am, or was, a psychologist working for the military. I had to quit. I had no choice. Not when I realized what I was part of. The American people have been kept in the dark about the true scientific progress of this country. Technologies of mass control exist that the public would never dream of. I know because I helped develop them. They call it Psychotronic Warfare. It's a research program dealing with Mind Control. These bastards have finally decoded the human brain. Every emotion you have, every thought that we experience, they produce evoked intentional little electrical impulses firing in the brain. These forces have developed a weapon that can lock onto those thoughts, read them and then control them remotely. They can control everything a person does. Voices. That's how they get you. The Spooks have developed a technology called Synthetic Telepathy. They beam a frequency at you and let your skeleton conduct the voices like an antenna. It sounds like ghosts inside of you. They've targeted individuals for experimentation." (audio)

Silent Sounds, Inc. states it is only interested in positive emotions, but the military is not so limited. That this is a U.S. Department of Defense project is obvious. Edward Tilton, President of Silent Sounds, Inc, says this about S-quad in a letter dated December 13, 1996: "All schematics, however, have been classified by the U.S. government and we are not allowed to reveal the exact details . . . we make tapes

and CDs for the German government, even the former Soviet Union countries! All with the permission of the U.S. State Department, of course . . . the system was used all throughout Operation Desert Storm (Iraq) quite successfully.”

In the first Iraq war there is evidence that HAARP was used to irradiate the battle field prior to invasion through Kuwait. When the tanks rolled into the area, the troops piled out of the bunkers, not willing to give a fight, they gave up in mass. These were the Iraqi troops.

Weapons that are barred from use against the worst enemies are very soon used against citizens by the local police departments.

CLOWNING THE EMOTIONS WITH SUPER COMPUTERS

The graphic illustration, “Induced Alpha to Theta Biofeedback Cluster Movement,”

Which accompanies the literature, is labeled “#AB 116-394-95 UNCLASSIFIED”

and is an output from

“the world’s most versatile and most sensitive electroencephalograph (EEG) machine”.

It has a gain capability of 200,000, as compared to other EEG machines in use which have gain capability of approximately 50,000.

It is software-driven by the “fastest of computers”

using a noise-nulling technology similar to that used

by nuclear submarines for detecting small objects

underwater at extreme range.

The purpose of all this high-technology is to plot and display

a moving cluster of periodic brainwave signals.

The illustration shows an EEG display from a single individual,

taken of left and right hemispheres simultaneously.

“Twenty-two percent of the city is now under our control. “ (audio)

By using these computer-enhanced EEGs

scientists can identify and isolate the brain’s low-amplitude

“emotion signature clusters”, synthesize them and store them on another computer.

In other words, by studying the subtle characteristic brainwave patterns that occur when a subject experiences a particular emotion, scientists have been able to identify the concomitant brainwave pattern and can now duplicate it.

These clusters are then placed on the Silent Sounds™ carrier frequencies and will silently trigger the occurrence of the same basic emotion in another human being!

Imagine what the governments could do with that.

“Gentlemen, you are witnesses to the future.” (audio)

There is a lot more involved here than a simple subliminal sound system. There are numerous patented technologies which can be piggybacked individually or collectively onto a carrier frequency to elicit all kinds of effects.

One is direct microwave induction into the brain of the subject, limited to short-range operations. The other, as described above, utilizes ordinary radio and television carrier frequencies.

Far from necessarily being used as a weapon against a person, the system does have limitless positive applications. However, the fact that the sounds are subliminal makes them virtually undetectable and possibly dangerous to the general public.

In more conventional use, the Silent Sounds Subliminal System (SSSS) might utilize voice commands, e.g., as an adjunct to security systems. Beneath the musical broadcasts that you hear in stores and shopping malls may be a hidden message which exhorts against shoplifting. And while voice commands alone are powerful, when the subliminal presentation system carries cloned emotional signatures, the result is overwhelming.

KGB PSYCHOTRONICS

This technology did not spring up overnight. It has a long history of development and denials of development by the U.S. Government and probably half of the other governments of the world as well.

We know that the former Soviet Union was actively engaged in this type of research. In a previous article we reported that during the 1970s the Soviet KGB developed a Psychotronic Influence System (PIS) that was used to turn soldiers into programmable ‘human weapons’.

The system employed a combination of high-frequency radio-waves and hypnosis. The PIS project was begun in response to a similar training scheme launched by President Carter, according to Yuri Malin, former security advisor to USSR President Gorbachev.

In 1975 the General Assembly considered a draft first proposed by the Soviet Union:

“Prohibition of the Development and Manufacture of New Types of Weapons of Mass Destruction and New Systems of Such Weapons”.

In 1979 the Soviet Union added a list of some types of potential weapons of mass destruction.

Radiological Weapons (using radioactive materials) which would produce harmful effects similar to those of a nuclear explosion

Particle beam weapons, based on charged or neutral particles, to affect biological targets

Infrasonic acoustic radiation weapons

Electromagnetic weapons operating at certain radio-frequency radiations which could have injurious effects on human organs.

“Every conceivable human emotion has been recorded and catalogued. We started out slowly broadcasting a waveform for apathy and boredom, but we will expand. In the future, we hope to test its effectiveness on worker productivity, the crime rate, perhaps even the next election. As for resistance, Phase One has ruled that out. We are virtually invisible. We exist so the general population doesn’t have to.” (audio)

The secrecy involved in the electromagnetic mind-altering technology reflects the tremendous power inherent in it. To put it bluntly, whoever controls this technology can control the minds of men, all men.

There is evidence that the US Government has plans to extend the range of this technology to envelop all peoples, all countries. This can be accomplished, is being accomplished, by utilizing the nearly completed HAARP Project for overseas areas and the GWEN network now in place in the US. The US Government denies all this.

Dr. Michael Persinger is a Professor of Psychology and Neuroscience at Laurentian University, Ontario, Canada. “Temporal lobe stimulation,” he said, “can evoke the feeling of a presence, disorientation, and perceptual irregularities. It can activate images stored in the subject’s memory, including nightmares and monsters that are normally suppressed.”

Dr. Persinger wrote an article a few years ago, titled “On the Possibility of Directly Accessing Every Human Brain by Electromagnetic Induction of Fundamental Algorithms.”

The abstract reads:

“Contemporary neuroscience suggests that existence of fundamental algorithms by which all sensory induction is translated into an intrinsic, specific brain-code. Direct stimulation of these codes within the human temporal or limbic cortices by applied electromagnetic patterns may require energy levels which are within the range of both geomagnetic activity and contemporary communication networks.

A process which is coupled to the narrow band of brain temperature could allow all normal human brains to be affected by a subharmonic frequency range at about 10 Hz that would only vary by 0.1 Hz.”

He concludes the article with this:

“Within the last two decades a potential has emerged which was improbable, but which is now marginally feasible. This potential is the technical capability to influence directly the major portion of

the approximately six billion brains of the human species, without mediation through classical sensory modalities, by generating neural information within a physical medium within which all members of the species are immersed.”

“The historical emergence of such possibilities, which have ranged from gunpowder to atomic fission, have resulted in major changes in the social evolution that occurred inordinately quickly after the implementation. Reduction of the risk of the inappropriate application of these technologies requires the continued and open discussion of their realistic feasibility and implications within the scientific and public domain.”

(Movie audio transcription follows)

“I guess one wasn’t enough”.

“I guess you were the dry-run.”

“Mass behavioral modification. I don’t get it.”

“Neither did I. I couldn’t figure it out either, man. And then I looked up. Cell phone towers, major power transmission network. There’s one on every block. They can control the whole city.” (Codename Medusa)

“It’s starting.” (The actors notice a frequency coming out of the radio that causes those around them to behave as though entranced.)

“U.S. Army Soldiers . . . Brainwashing experiments . . . ” (Actors reading a document) -End Scene_

Living in denial?

Think it is just a film? A game?

“I never gave you my mind!” (Actor points a gun at a scientist who answers)

“You’re all just sheep. Everyone can’t see what’s going on.” (Scientist picks up a rifle) *“They say the world ends not with a bang, but with a whimper.”*(Scientist cocks the gun and shoots a lamp) *“They’re wrong.”* (He walks out the door with gun) -End Scene-

We do not have open discussion because the U.S. Government has totally denied the existence of this technology.

It doesn’t get any plainer than that.

I would like to give special thanks to:

Jan Wiesemann for sending the Silent Sounds TM statement and patents which were the keystone of this article

Mike Coyle, whose computer search turned up many more related patents

To the many who have provided news clippings and articles,

moral and financial support to Resonance

without which we'd have ceased publication long ago.

PSYCHOTRONIC MIND CONTROL FOR THE MASSES

"You're scaring me!"
