The Contact Reports of "Billy" Eduard Albert Meier: a topical listing - here summary for contacts up to 117th

From:

-honour to the people there for doing this BIG collecting job!!

-This doc should be opened in "Word" for showing two columns as shown up.

A general listing of topics, names & places mentioned in the Contact Reports of the events & discussions between "Billy" Eduard Albert Meier and extraterrestrial human beings. In some places a rough (and incomplete) summary is given, along with selected quotes. The listings are generally in the order that they are mentioned within a contact. Some topics are not listed as they are not easily labeled, such as incidents or discussions relating to spiritual teachings & development, responsibility, psychology and similar matters. To use this listing effectively, use your internet browser's word-find function.

Presently, the main source for listings in Contacts 3-9, 11-106 & 115 is Wendelle Stevens' 4-volume "Message From The Pleiades: the Contact Reports of Eduard Billy Meier", an incomplete, edited and often incorrect English-language translation of the original German-language Contact Reports. Full informational reliability on any given topic, quotation or event can only be had from a careful reading of the German-language Contact Reports, "Plejadisich-plejarische Kontaktberichte" & "Semjase-Bericht", available from FIGU (Freie Interessengemeinschaft für Grenz- und Geisteswissenschaften und Ufologiestudien [The Free Community of Interests in Fringe and Spiritual Sciences and Ufological Studies]):
http://shop.figu.org/index.php?cPath=21_30
http://shop.figu.org/index.php?cPath=21_30&sort=1a&page=2

The origin of the English-language translation in Stevens' books, to the best of my reasoning with the information provided, is as follows. The original English-language translation of the Contact Reports was done "by a young German college student who spent a great deal of time at

the Meier home, living with them and observing the various witnesses in their daily lives, and seeking very careful explanations. His translations were then checked and approved, as he proceeded, by both the others at the home and by Eduard Meier himself." (MFTP preface). Stevens purchased an edited variation (MFTP2 pg.151) of this translation in 1979 as a "standard approved 1,800 pages in 100-page booklets" (MFTP4 pg.403), which had been "copied by Amata Stetter, who partly changed the meaning unauthorized and also copied wrong" (Meier, MFTP4 pg.404). The errors in the previously approved copies were discovered by FIGU circa 1992, "accordingly we had to correct and to print everything again" (Meier, MFTP4 pg.404). Thus, PLEASE NOTE and take into consideration that there are not only omissions in the Stevens books, but also, more crucially, interpretation, translation and various clerical errors throughout (sentence numbering, spelling, numerical, etc.).

AGAIN, FULL INFORMATIONAL RELIABILITY ON ANY GIVEN TOPIC, QUOTATION OR EVENT CAN ONLY BE HAD FROM A CAREFUL READING OF THE GERMAN-LANGUAGE CONTACT REPORTS.

Extraterrestrial humans began contacts with "Billy" at the age of 5 in 1942 with the Pleiadians/Plejaren man Sfath, and lasted with him until 1953. From 1953-1964 contacts continued with Asket, a woman from the DAL Universe (the twin universe to ours, the DERN Universe). After an 11 year break, the Pleiadians/Plejaren resumed contacts on January 28, 1975 with Sfath's granddaughter Semjase, and continue with others to this day. This document pertains to the 1975-date contacts. Official case summary: <http://www.figu.org/us/ufology/statistics.htm>

Meier - "strong thought force", few human beings have such a strong thought force

Pleiadians/Plejaren - possess knowledge of all Earth languages ever spoken; develop language study courses which get transmitted to the Pleiadians/Plejaren by computers, a process requiring 21 days + additional 9-10 days to learn to speak the language

Beamship hyper-drive - "a form of radiation propulsion" which surpasses the speed of light by many million times

Beamship normal drive - acceleration to the speed of light; null-time & null-space; 7-hour trip to Earth's region via hyper-speed

Hyperspace travel requires a security distance from planets, 153 million kilometers

Hyper-drives - light-emitting propulsion drives & tachyon-drives

Beamship - aerodynamic disc-shaped form

Beamship - "protection-beam-belt" which protects the ship & the occupants

Gravity of a planet - "not always the same", fluctuates

Gravity & effects (and non-effects) on/in beamships

When extraterrestrials move about on other planets they use protective suits equipped with the same type of

gravity-protective features as beamships
 Earth humans - barbarous, greed & want for power & control over others
 Other extraterrestrial intelligences - some humane, others inhumane; Earth humans need worldwide unity to combat possible future evil-minded intruders
 Spiritual reason & wisdom of Earth humans is underdeveloped

 M.R. [Isa Rashid], a contactee of the Pleiadians/Plejaren since 1956, learned Aramaic with the help of the Pleiadians/Plejaren
 Talmud Immanuel originally written by Judas Ischarioth
 Isa Rashid fled his church in Jerusalem in mid-1974 to Lebanon, living there in a refugee camp with his family under a different name; Talmud Immanuel destroyed by fire when the camp was invaded by the Israeli military; the 1/4th that was translated into German is sufficient to "reveal the truth and to free the human being from a deadly delusion"
 Isa Rashid - not his real name; Isa Rashid's cousin using the name "M. Rashid"
 Parapsychology & parapsychologists
 "Spiritual healers" - many are cheats, liars & charlatans
 Uri Geller: <http://www.uri-geller.com/> - has certain mental forces but uses the spiritual forces of others around him to accomplish his feats; never came near or went inside a UFO (not so as on <http://galactic2.net/rune/uri2.html>)
 George Adamski - a deceiver Meier claims: <http://www.gafintl-adamski.com/> but some says he had contact to another dimension level of Venus - the so-called 4dim level - that means the contact was not on our 3th dim level - but he didnt tell of this in his books)

Karl Michalek - a deceiver:

<http://www.virtuallystrange.net/ufo/updates/2001/nov/m25-007.shtml>

5 colored human races plus others living underground & in inaccessible regions

Blue race of humans living in India

Some colored human races died out long ago

"The Heaven's Sons" or "Star Travelers" - name given by the Pleiadians/Plejaren to their forefathers

Climate helps determine skin color

Innumerable skin coloring of life forms throughout the universe

Body size differs according to the gravity of a planet, ranging from 50 centimeters to 12 meters tall

Giants & titans once lived on Earth

Present different colored Earth races are descendents of different colored ancestors who came from different stars

Charles Darwin - "crazy logic":

<http://en.wikipedia.org/wiki/Evolution>

Earth humans not descended from monkeys & apes

Earth humans "became created by [Plejaren] ancestors who interbred with ancient Earth humans

Evas/Eva = word meaning "the bearing one" or "bearer"

Talmud Jmmanuel: <http://www.tjresearch.info>

Ancient Earth humans - savage creatures with human-like form, descended from and sent out in earlier millenniums by the Plejaren ancestors; these creatures

interbred with different animals; one such offspring/mutation is the monkey

"Australopithecus Africanus", "Peking Man",

"Neanderthals" - intermediate human/animal mutations:

4 different types of human/animal mutations survived and live today, known as the Yeti, Sasquatch, Bigfoot, etc.:

<http://en.wikipedia.org/wiki/Yeti>

<http://en.wikipedia.org/wiki/Bigfoot>

Evas - captured by and mated with Plejaren ancestors who settled on Earth; their descendents were called

"Adam", meaning "Earthhuman being"; some of these early Earth humans survived, their average age being

15,000 years old; the last of these was killed "a bit more than 2,300 years ago"; though today [1975] there still

exist 7 of these creatures hidden on the Earth

Giants, titans & cyclops - tall men, called "Goliaths"; served power-hungry kings as warriors

"...many things the human being is only allowed to know when he has become spiritually aware, and has

developed his spiritual knowledge and spiritual wisdom sufficiently"

A "spirit world" does not exist, only innumerable "fine material worlds", worlds which exist in other

dimensions & contain bodiless spirit forms

What happens after death - reincarnation explained

Reincarnation - facial appearance of "guest bodies" remains "much the same"

Fine-material world - spirit forms there are no more advanced in knowledge than they were in the material world

Ability to communicate with fine-material world spirits but not advised

Mediums - only a few humans capable of contacting fine-material world spirits

Voices heard on tape recordings in empty rooms - explained

Pleiadians/Plejaren - have bases/stations on Earth and many other planets

Pleiadians/Plejaren - base/station in Switzerland "high up in the mountains" & elsewhere on Earth

Semjase - often visits Erra in the Pleiades

"Ghost music" (music compositions transmitted to living people from the dead) - deceitful claims; spirits do not transmit music from "the other world"

Magic - does not exist as commonly thought of and explained

Meier will be allowed to take pictures of 4 beamships at once

Semjase's old beamship - an older type ship, @100 years old; built on a wave principle for stability; old ship to be taken away on March 3, 1975

Explorer-class beamship

Karl Veit (publisher of UFO Nachrichten) - Meier to give Contact Reports to him to diffuse to the public

Meier to form a group which will inform leaders of the Earth about serious matters

Ozone layer depletion:

http://en.wikipedia.org/wiki/Ozone_depletion

Bromine gases slowly dissolve the Ozone layer - released by combustion engines, atom-splitting & similar things; spray bottles release bromine

(flourochlorohydrocarbons, FCHCs) & other gases

Ozone layer holes may take hundreds of years to close (if no further eroding)

Ozone layer/belt - moves & wanders, not stationary

Dr. Michael B. McElroy at Harvard University - to be approached by Meier's group regarding ozone layer

 Light speed - dangers
 "All forms of life have to accomplish their evolutionary processes, and thus they collect experience & knowledge"

<http://en.wikipedia.org/wiki/Amulet>

 Talmud Jmmanuel - retrieved from its hiding place because "the time of truth had dawned"; Jmmanuel's teachings not his own, but Creation's and its laws which "Jmmanuel first needed to master, recognize and accept"
 "Important alone is the truth and the laws but not the person who has brought them."
 Doubters - those who require more proof of the existence of the Pleiadians/Plejaren
 "Evidence then is only valid if founded on knowledge and recognition, which means only hard spiritual work enables real reasoning, but never only seeing."
 Pleiadians/Plejaren - "not allowed to coerce to convince Earth humans of the truth"
 "It is neither our nor your mission to remove from doubters and criticizers their spirit-obstructing activities; the mission lies in quite other fields"

 Natural barbarism - usefulness
 Scientists - danger in their misuse of knowledge against others
 UFOs (beamships) - often not recognized as such, rather as airplanes
 Beamship "distorter screen" - apparatus, sight protective screen up to 500 meters in any direction in whole or in part; why Meier able to see them to photograph and not others in the area
 Meier asks if he can tape record Semjase's voice - denied
 Talmud Jmmanuel: <http://www.tjresearch.info>
 "It is the character of the uninformed to continually criticize and accuse"
 Teachings of Jmmanuel & the Pleiadians/Plejaren the same as what was taught by others tens of thousands of years ago, with different words; truth remains the same

Religion - dangers of; "there does not exist any form of religion that is all good"

Spiritually repressed by religion; living a distortion

"The truth is always harsh"

Pleiadians/Plejaren - could reveal themselves publicly but not interested in doing so

History of Mankind: Pleiadians/Plejaren found peace & liberty 50,000 years ago; before this time (@53,000 years ago) 70,000 humans fled under their leader Pelegon, settling on Earth; 200 scientist sub-leaders under Pelegon; 10,000 years of relative peace with the new Earth settlers, then war broke out killing all but a few thousand humans, others fled into space; for 7,000 years there were no visitors to Earth while the remaining humans on Earth became wild; then descendents of the fled ancestors returned and built Atlantis and Mu, lived peacefully "for thousands of years"; then rogue scientists tried to seize power but the people revolted against them; the scientists and their followers fled into space 15,000 years ago; they lived in a neighboring solar system for 2,000 years extending their life spans through science & mutation to thousands of years; returned to Earth 13,000 years ago under the leadership of a scientist named Arhus "The Barbarian" who also had 200 scientist sub-leaders; they settled in "the high north" and Florida, continuously attacking Atlantis & Mu, destroying them after a few millennium; many Earth survivors became slaves while some scientists were able to escape into space back to their planets in the Pleiades; centuries before this, Arhus' sub-leaders captured wild female Earth creatures & mutations (called "Evas", distant descendents of former humans from space) and mated with them producing dwarf-like, gigantic or animal-like offspring; the sub-leaders were known as "Sons Of Heaven"; the highest ranking sub-leader was named Semjasa, who mated with an Eva; their offspring was a male that Semjasa named Adam (a word meaning "Earth human"); a similar breeding produced a female who was mated with Adam, while other such offspring by sub-leaders and Evas were produced, who formed themselves into groups & tribes; from those groups & tribes present Earth human races developed; Arhus was angered by what his sub-leaders did and brought 3 human races under his control (ancestors of today's "Indians", the fair-skinned inhabitants around the Black Sea, and gypsies from along the south of the Mediterranean Sea who were called Hebrews), who adored and worshipped Arhus and his sub-leaders; Arhus demanded blood from the guilty; Arhus son was Jehav, also a blood-demanding ruler over the 3 races; later descendents of these cosmic "gods" evolved spiritually and left the evolution of the Earth humans to themselves, returning back to the Pleiades

Age Of Aquarius ("Golden Age") - religious interpretations are wrong; "enables everything to develop to highest potential, including spirit"; 184 year transition period from the Age Of Pisces to the Age of Aquarius, from February 3, 1844 - February 3, 2028, 11:20 a.m.; this period marked by strong religious

delusion, accelerated technological developments, wars, etc.; origin of this change in epochs due to the radiation effect of the universal central sun

Universal Central Sun - Sol System circles the Universal Central Sun once in 25,860 years, passing through 12 epochs (zodiacs); Earth has touched the outer borders of the "Golden Radiation" of the central sun; prophets appear during these epochal changes Meier exhorted to begin his mission of teaching Meier - alludes to having been institutionalized in a "madhouse"

True friends

Semjase offers to "procure crystals, etc. from other planets" for Meier to sell

Primitive laws of "modern man" are enslaving Atomic composition of crystals & minerals is the same throughout the universe, such as gold

German excerpt:

http://www.figu.org/de/figu/die_kritiker/adamski.htm

Due to problems arising from Meier's photographs &
films Semjase "had to eliminate forms of life...such
concerns, under laws of our race, admit such
eliminations only in case of emergency"

On April 21, 1975 military personnel were actively
investigating an area where Semjase had landed
Pleiadians/Plejaren had to locate people who had
become aware of their activities in order to "eliminate
their memories in this respect, to avoid harm of any
kind"

Meier has been trying to find out about his past lives,

visiting hypnotists but unable to be hypnotized, having noticed in himself a "defense block" that prevents such, even causing discomfort to the hypnotists if they persist Meier's "defense block" is generated by the wisdom of his spirit as a protection

George Adamski & his close friends/supporters - fraudulent contactee; has strong suggestive abilities to influence others: <http://www.gafintl-adamski.com/>
Pleiadians/Plejaren have 2 ways to know the future - one is to travel materially or spiritually into the future and register events that happen (as was done with Mr. J.; see Contact 14); the 2nd way is by probability calculations, which is prone to error or mistakes
Predictions for Switzerland @1975-1977 based upon probability calculations: rain & snow storms will kill many & cause millions of francs in damage; increased deaths due to heavy street traffic, resulting in regulations, fines & laws including only public transportation allowable in certain cities & large towns; due to unreasonable civilians, Switzerland will become heavily isolated; criminality will increase (especially corporate/commerce related robbery, murder & homicide) resulting in renewed cries for the death penalty; commercial situations will become worse, causing honorable citizens to break the laws; suicides will increase; politics will generate problems, the current politicians will remain but mischief will brew; Swiss currency will become devalued until the new government in 1976 will remedy this; Switzerland will become a drug relay point in Europe, but enacted laws will be ineffectual to stop this; Switzerland will lose its esteem as a tourist paradise, mainly due to inflation & the behaviors of the citizens; religious delusions will affect many

Semjase will be gone for some time within the next weeks & will only have telepathic contacts with Meier; Meier jokes with her about finding a man to marry, jokingly referring to the crazy images of extraterrestrials found in Earth comic strips & books; Semjase doesn't understand this reference, explaining that sometimes she walks among Earth humans and finds something to read but has never found such things; Meier jokes that she won't if all she reads is Mickey Mouse, Superman

"No goals are achieved without troubles and sacrifices"; real prophets of the past

Semjase says Meier makes "harsh & peculiar jokes" to which he responds "One has to let in fresh air"

Meier gives Semjase 2 writings to read and judge, one being a flyer he has written, and the other a birth horoscope analysis of Meier by a woman who is enslaved by religious thinking

Some group members find Meier's writing style too harsh; truth exposed by clear & directly stated facts, often with harsh words

Meier studied thoroughly by the Pleiadians/Plejaren, found to have a good intuition

Different radiations are partly absorbed by all material things

Crystals - also absorb & store different radiations, which are different for each planet; Pleiadians/Plejaren technically able to withdraw such radiations (except in living things), as done with the minerals & crystals brought to Meier; use an apparatus called a neutralizer which uses a regenerative mode of radiation absorption

Stevens annotations: 2 trees eliminated by Semjase due to having picked up radiations from her ship (see Contact 16); eliminated tree - "we changed its time"; Meier working as a security guard at the time of first contacts with the Pleiadians/Plejaren; lost his job due to using so much of his time

"knowing the future is useless because we are not allowed to use this knowledge"; each creature must develop normally without skipping learning experiences Meier critical of some parts of the Contact conversations/meetings being omitted from transmission by the Pleiadians/Plejaren; nature of the thought-transmitted contact reports, obtained by a machine that retrieves the dialogue from the subconscious and then transmits the report to Meier

"the subconscious, with its powers, never forgets"

Meier figures out the workings of the subconscious-retrieval machine which causes Semjase to ponder removing this knowledge from him, to Meier's stern objections; "...the radiations of your feelings witness the sincerity of your words"

Meier - "I do not rely on matters of belief"; "I never take great oaths, that but a 'yes' or a 'no' are decisive for me" Less than 3 minutes needed by the Pleiadians/Plejaren to technically eliminate knowledge from a living being using their apparatus, which is first adjusted according to the being concerned; distance plays no part in this Meier offers alternate solution to the Pleiadians/Plejaren eliminating his knowledge in case someone attempts to

forcefully retrieve it from his mind

Crystals & precious stones could become dangerous for humans if worn or carried; all crystals, semi-crystals, precious stones, semi-precious stones & different minerals of Earth origin (including pearls) are receivers & transmitters of human emotional feelings & thought energies; store negative energies; if they are to be worn they should be neutralized (or subjected to "an easy inner clarification") of these energies every 5 years; such items have been exposed to negative charging/radiations for 2 to 4 millenniums or more to become receivers of negative energies

Negative energies surround the Earth that arise & develop from negative thought-energies Talismans - work only due to the beliefs held by the wearer; often strong receivers of negative thoughts; should also be neutralized every 6 months to 2 years depending on the material

Preferred are stones & crystals from other planets, either uninhabited or inhabited by harmonious beings, which are receivers & emitters of positive forms of energy; such should not be neutralized for negative energies if brought to Earth

Process & action for neutralization & clarification of stones & crystals briefly described

Arahata Athersata

Meier has prepared a lecture concerning the reality of Semjase, Plejaren beamships, and UFOs in general Elias (ancient prophet) had no family to take care of Laws of sex & matrimony (Mosaic Law) still valid today; sex criminals and their punishment, banishment for life; these laws, preserved in the Talmud Immanuel, are for regulating Earth humans and were given by the IHWH ("Governor of the Heavenly Sons")

"Wherever there are thinking forms of life, there are established laws everywhere"; based on natural logic as opposed to Earth laws which are "illogical and primitive"

Pleiadians/Plejaren also have laws for criminality, but they are of a more spiritual level and humane; heavy crimes are punished by exile to other worlds used solely for that, and only those of the same sex are exiled to those worlds; the exiled are prohibited from having or developing machinery & apparatus and they are closed off from having contact with other worlds; on some Plejaren worlds "the fallible creatures are also exiled to great islands, if the grade of fallibility on the concerned world is very low"

"Only there where the Creational law becomes self-evident do expressed laws fall away", which occurs only in high spiritual levels & spheres
 Earth was once a penal/exile planet for "fallible creatures" from various worlds in this Universe; the Pleiadians/Plejaren have no exact dates for when this was

Pleiadians/Plejaren are monogamous "after a thorough clearing up of facts in respect to belonging together"; birth rates are regulated to prevent overpopulation; divorce is only permissible in the worst cases (such as when one is exiled) Plejaren laws have been the same for millenniums

Possibility of a Plejaren loving an Earth human or being of another race/world even if the other is spiritually less developed; this is a rare occurrence
 Meier and Semjase - their love is of a friendly nature
 Many forms of "love" are possible

Pleiadians/Plejaren are connected to an alliance of planets that extend "far into the Cosmos" and includes different solar systems; the total of human life in this alliance is "127 billion", aside from innumerable other non-human forms of life as well as beings (human and other) with whom the Pleiadians/Plejaren are unfamiliar with or have no contact with

Some of Earth's neighboring planets were formerly occupied by Plejaren races and are still important as Plejaren bases; different extraterrestrial races from the widths of the Universe are active on the SOL system planets for use as bases, but have not settled them
 Semjase feels that Meier is a Plejaren, which he was in a previous incarnation

excerpt in Why do the Pleiadians/Plejarans have contacts with Billy Meier only?:

http://www.figu.org/us/ufology/why_billy_meier.htm

Conditions necessary for Pleiadians/Plejaren to contact an Earth human being; except for special purposes, after which the pertinent memory of the being concerned is eliminated (for example, the case of Isa Rashid)

"Truth, knowledge, wisdom, love & all power of the spirit are unchangeable & constant"

"Religion" vs. "Relegeon"

"Evolution" - 2 meanings; 1 concerning things that already exist, the other concerning things that don't yet exist

The spirit that dwells within humans "has stored only those matters & things which it collected in the course of its material existence in material bodies & lives";
 "during innumerable further lives, the spirit must

explore further, must search, and must find; thus he must assemble further knowledge, recognitions & experiences, which then establish themselves in him as faculties"

"the spirit continues after the material death of the body, and exists within spheres of living of the "other world";
 "it works upon the achieved results of the other lives, and fixes these results inside it in what you call 'the sub-conscious'. Upon taking up the human form of life again, the obtained knowledge and faculty is anchored in the sub-conscious, and must evolve slowly in the human form of life to help in new lessons and recognitions toward developing conscious talents..."

Mars & Venus - forms of life exist there but of a different form than Earth humans assume

Semjase had been to Mars recently and obtained a large ruby in a zoisite matrix for Meier; she also brings him "one piece of my home world" brought by her friend for Meier to give to his acquaintance who asked for such (see Contact 16); Meier asks her to bring him, for his collection, a piece of malachite and an emerald (smaragd)

"The atomic danger has increased again by immense proportion"

Semjase informs Meier that his mission ("execution of your task") is within his hands, that he is not coerced by the Pleiadians/Plejaren; "As a human being it is your duty to tell what you know and to help your fellow creatures this way"; "You have the very troublesome preparation work for those who will come after your time"; Meier is the first prophet of the New Age
 Pleiadians/Plejaren have "no means of currency as used on Earth"; unable to financially assist Meier; "fortune plays [gambling]...are extraordinarily evil"

Mission of the Pleiadians/Plejaren - "to help the Earth human, within his development", "voluntary self obligation"; "the Earth human must take upon himself a certain obligation and bear certain things by himself";
 "If the Earth human acts according to the principle that taking is better than giving, then he will not release himself from his malicious egoism"; "exploitation is written in capital letters on your world"

Semjase has a task to perform that will take her to the moon and other planets in the SOL system, due to Earth scientists doing explorations of those places America & Russia will be cooperating on something regarding a space laboratory in mid-July 1975; Pleiadians/Plejaren have followed the development of the space lab "and also influenced it in certain measures. On the other hand we have had to trouble ourselves for eliminations in different cases, or to help projects fail." Other extraterrestrials visit Earth and interfere in Earth concerns, not necessarily with good intentions; Pleiadians/Plejaren not allowed to interfere in their activities except if "necessary for survival, thus we are only allowed to be active in the way of teaching" Some descendents of the ancient Pleiadians/Plejaren (splinter groups) still exist and live by their old [unharmonious] ways to influence other life forms including Earth humans, appearing as "messengers of God"

from the ship; when the ship is in the stratosphere of a planet (no atmosphere) the windows appear transparent; windows have a special coating to prevent entrance of all radiations except for neutralized light; ship equipped with "control mechanisms" which allow for better observation than looking through the windows Before Meier, the Pleiadians/Plejaren had never troubled themselves about photo devices (cameras, etc.) 3 photos taken of the 2 other departing beamships Meier not allowed to disclose all the details of the flight until given permission

The flight to Mars, Jupiter, Saturn and back through the asteroid belt to Earth takes 2 hours & 34 minutes (total of "3,000 million kilometers" [3 billion])

During Meier's travels on the Earth over the past 12 years he logged 2.7 million kilometers

Meier given notice of being taken later on "a much greater journey to the Pleiades"

German excerpt:

http://www.figu.org/de/figu/die_kritiker/adamski.htm

Karl Veit & wife visit Meier, life-threatening car engine problem found by the Pleiadians/Plejaren who accelerate "the process of destruction of the motor" Mrs. Veit's work deemed highly by the Pleiadians/Plejaren

Pleiadians/Plejaren warn Meier that he is being watched and that "wicked-minded elements" are plotting intrigues against him; some are accusing him of spying for foreign powers, others accusing him of deceit to prevent the spread of truth; these people belong variously to "religious circles" and to "a still secret organization"

Of the extraterrestrials that visit earth, some having stations here, the Pleiadians/Plejaren are the "highest developed creatures"; the second highest evolved extraterrestrials are a little more than 1,340 years behind the Pleiadians/Plejaren in total evolution

"If we therefore convey explanations and interpretations, these correspond to the highest degree of our understanding and knowledge of the highest known truth..."

Venus - those who claim contact with beings from Venus are deceivers; no form of humans, either materially or spiritually, exists there, though other life forms do

Comets - different types described, their tails & courses through solar systems

"The so-called 'empty space' is not empty, because it is alive with innumerable particles and other things"

"The Destroyer" planet - origin as "a huge dark star"; course/orbit changed to a path towards Earth; 3,453 years ago a cosmic object was drawn into its gravity and pulled along, passing closely to Earth causing catastrophes, all SOL planets pushed into new orbits, the object settled into orbit between Earth & Mercury becoming Venus; Earth's gravity slowed down and changed the rotation of Venus thus giving it "the slowest rotation time in the whole solar system" (1 day on Venus = 117 Earth days, rotation around the 30-degree inclined axis of the poles = 243 Earth days), heat arising from the friction causing the present conditions on the planet

Venus - atmosphere deadly for human life; surface temperature at a depth of 32 kilometers = 457 degrees Celsius; water turned to vapor creating the cloud stratum; dense atmosphere (pressure at sea level = 334 times higher than Earth air); atmosphere consists of 87% carbon dioxide, oxygen at lower stratum only 4.23%, nitrogens & rare gases at 95.47%; atmospheric pressure = 107 times greater than Earth's atmosphere; Pleiadians/Plejaren found Earth probes on Venus' surface crushed by the atmosphere (Russian Venara probes); very weak magnetic field; very low "Van Allen

belt" resulting in little screening of the "solar wind"; Venus in the first phases of recovery & restoration, over centuries & millenniums conditions will become capable of sustaining primitive life forms; equatorial regions very flat; wind speeds; cloud levels; mountains average 2.3 kilometers in height; similar in surface appearance to Earth's moon; rich in very different minerals & other materials; when Pleiadians/Plejaren or other extraterrestrials visit Venus they must use special protective suits; at different locations temperatures rise to over 500 degrees Celsius on the surface; atmospheric pressure varies between 88-107 atmospheres (AT) Other SOL system planets contain no forms of human life

Contact reports should be unexpurgated for internal use but should be censored of personal information for external use; if someone wants unexpurgated reports they should be furnished to them

Notice to Meier of his upcoming "great journey" in space, which will take him "further away than any Earth human has traveled in the last 2,000 years"; Meier asks to visit the Pleiades

Photos Meier took of Saturn trip (see Contact 27) have all turned out bad (over- or under-exposed or black) Pleiadians/Plejaren have produced a special apparatus to assist Meier in taking photos

Stevens annotations: the Stevens team was under observation; Meier had 9 assassination tempts on his life up through 1983; note about a private unrecorded discussion with Semjase in which she tells him he was one of the Biblical prophets in a previous incarnation & was in contact with the Pleiadians/Plejaren even then

Human life forms - product of Creation; doesn't descend from apes; evolution of the physical form of humans is a lengthy process, created from the earliest primitive life, "but with the intended purpose of becoming a human being"... "this life form, therefore, has fundamentally been its own species since the very Ur-beginning [original/archetypal-beginning]".

Meier's "Great Journey" with the Pleiadians/Plejaren, REPORT PART 1 (see Contacts 32, 34 & 35 for additional parts)

Lifted into the beamship by a transport beam

Meier takes photos about 50 meters off the ground through the entrance hatch of the beamship

The beamship rushes up to several kilometers off the ground without Meier noticing any change in pressure, etc.

Meier able to see through the "windows" on board, noticing that at times the ship moves "in the craziest movements, like a great pendulum"

Travel first to Venus

Apparatus - transparent glass-like screen to assist Meier in taking better photos of objects outside the beamship; device recessed on its side for generating different radiations for better pictures; size about 50 centimeters by 50 centimeters

Semjase uses a second camera (obtained by one of the Pleiadians/Plejaren) to take photos too, film supplied by Meier

Pleiadians/Plejaren - "we also own dresses of your fashion. We do need these, because here and there we walk in your circles"; Meier proposes Semjase go out for an evening with him (a "date")

Pleiadians/Plejaren - don't use personal identification papers; if a Plejaren were walking among Earth humans and got asked for ID, they would be able to "produce by the force of our thinking, sham-pictures" (a hallucination)

Meier notices many different apparatus around the cockpit room of the beamship, "installed within a circular control console & in the walls" and assumes them to be for guidance & control of the beamship,

exploration devices, distance meters, radiation control devices, etc.

Viewing monitors showed things in vivid color and 3-dimensional

Meier takes some photos of the stratum of Venus; the viewing screen of the photo apparatus has to be closed due to the extreme heat of the planet

Venus - cloud cover many kilometers deep, clear at about 40 kilometers from the surface; landscape is "wild-looking and crater-covered", some mountains in places, much like Earth's moon; Meier sees a crashed exploration satellite on the surface; Meier & Semjase circle the surface of the planet 2 or 3 times; certain observational discoveries are not allowed to be explained yet

After Venus, they visit Mercury, and then on to "the greater planets"; close-up or detailed photos are not allowed to be taken; some of the existing forms of life on various SOL planets "are of completely different character than human, and as well are not interested in the Earth human being; there are surface stations of different extraterrestrials on some of the planets, mainly used for certain missions rather than daily living On their return towards Earth, Meier observes the linking of the Apollo & Soyuz (Apollo-Soyuz Test Project), also noticing 5 other extraterrestrial spaceships watching it (1 of them is another Plejaren ship); zero-sight picture screens - apparatus which allows Meier to visibly see the 5 screened ships; Semjase uses a radiation apparatus which makes the shell of the Soyuz capsule appear invisible, allowing them to see the 2 cosmonauts inside; Meier observes one of the 3 Americans bump his head inside the Apollo Earth humans are at the very beginning of space exploration

Pleiadians/Plejaren - their technologies are thousands of years in advance of Earth technologies

Meier becomes anxious at the sight of the humans squeezed into the tiny space capsules; this is due to some experience in a past life; Stevens annotation #5, "Meier's former life experience as a Plejaren cosmonaut, after that he incarnated as one of the prophets in the Old Testament [Henok ?]

Meier & Semjase take photos of the Apollo-Soyuz docking procedure; afterwards Meier will be allowed to take photos of different Earth satellites and extraterrestrial satellites; after that they travel to the "great-spacer" spaceship stationed in the SOL system and then travel to other systems, partly for a mission of Semjase

Beamship - peculiar-shaped chair, very accommodating & comfortable

Meier's comfortable & familiar feelings about being in space

Great-spacer spaceship - a huge sphere the size of a small planet (Stevens annotation, "17 kilometers"); in the lower third there is an entrance hatch/hangar (which seems to take up the whole lower section of the great-

spacer with a height of 600-800 meters) in which are innumerable beamships the same as Semjase's, only a 100x100 meter square space is cleared; bright light inside the great-spacer appears "a bit blue" and seems to come out of the glass-clear walls, behind which are the innumerable beamships; many people occupy themselves with the beamships, including "some kind of robots"; beyond the many beamships are larger beamships Meier had not seen before; great-spacer contains all technologies known to the Pleiadians/Plejaren; contains 144,000 inhabitants; everything needed for daily living can be produced inside the ship; able to negotiate "the barrier between Universes"

As they approach the great-spacer Meier notices a formation of several luminous lens-shaped ships, one of which performs a somersault as he takes a photo of it Meier given permission to publish his reports about his contacts with Asket in 1964

Asket - after ending contact with Meier in India in 1964, she contacted the High Council & obtained their cooperation; with the help of her people from the DAL Universe, the Pleiadians/Plejaren obtained higher technological abilities

After entering the great-spacer, Semjase & Meier leave her ship after awhile "because the room is atmospherically balanced & prepared", exit by a transport beam out of the hatch onto the metal floor of the great-spacer

Semjase uses "a small thing in her hand" to open an entranceway in the transparent walls

Small vehicle the size of a Volkswagen [Beetle] that floats 20 centimeters off the floor, equipped with very comfortable seats

Ceiling of the hangar area also radiates a soft-blue light, looks like a sky; in the center is a hole/shaft ("transport pit") which also radiates the soft-blue light

Semjase & Meier in the floating vehicle float up through the shaft about 11,000 meters to another area near the center of the ship, 100x100 meters diameter, with green fields, trees, bushes & flowers and a town; park area has "artificial soil or similar", flowers with strange blossoms & scents and bushes & trees like on Earth

Mount Everest not the highest mountain on Earth; measurement of mountain height should be from the center of the planet rather than sea level; Mount Everest is about 2,150 meters less in height than the highest mountain which is Chimborazo in Ecuador; Chimborazo "has played in earlier times a very important role in respect to extraterrestrial intelligences & their activities":

http://volcano.und.nodak.edu/vwdocs/volc_images/img_chimbarozo.html

Another transport pit with another floating vehicle is within the park area of the great-spacer which leads to the control center in a cupola at the top of the great-spacer; as they travel up through the pit there appears to be the vast open sky with stars; the IHWH leader of the

great-spacer is in the control center

Salutation ceremonies - "they are humiliating & slavish, and doggish devoting" --Meier

"I regard a human being as simply a human being, whether he is from this world or another, or whether he is a beggar, or God in person, and whether he is ignorant or wise, they are all of equal right. No one has more right than any other, and nobody is more than any other." --Billy Meier

Great-spacer - speaker system (leading to the control center)

Ptaah - "don't call him 'Dear God', because this evokes painful memories about our very early developments. We have all-right maintained this appellation of 'IHWH', but it now has for us a completely new meaning." --Semjase

Great-spacer, cupola's cockpit control center - several kilometers in diameter; walls/ceiling of a metal alloy made to appear transparent by radiations from on-board apparatus, making open space/sky visible; desk-like formations with apparatus & screens, people and androids operating them; middle of the command center contains a 1 meter high horseshoe-shaped formation the size of an average room, completely covered with apparatus & picture screens

Ptaah - Semjase's father, looks to be 70-75 years old; speaks to Meier in German (as Semjase does); his name is the same as one of his ancestors, an IHWH who lived on Earth, his wife Basth - in South America there are some traditions, tales & legends about this ancestor named Ptaah connected to the planet Venus & other SOL planets; Stevens annotation #10, "Ptaah was the chief God in Memphite theology centered in Memphis, Egypt in the 3rd millennium B.C. and was regarded as the Creator of the Universe. He came from the stars." Meier - speaks a little English and modern Greek; he & Ptaah then speak in modern Greek without the translator apparatus as Ptaah has also mastered modern Greek Apparatus - language-transformer, language pattern converter, used by Ptaah when he first spoke with Meier because Ptaah did not know German

Great-spacer control console - one instrument shows the velocity of the ship

Pleiadians/Plejaren - symbols & unit of measure

Apparatus - language-former (different from the language translator), begins the operation of the great-spacer's language computer

"Transmit" - another term for "time traveling"

Hyper-leap - during the transmission from one system to another (hyper-leap), Meier hears "a tone, a very soft & calming singing of metal" and feels "a great tranquility inside" himself; the great-spacer's hyper-leap takes them 500 light years from Earth to near the Pleiades (211 million kilometers from the nearest star)

Photo-shielding screen apparatus brought from Semjase's ship to the control center by an android so Meier can take photos through the great-spacer's cupola

Android - speaks to Meier, wishing him success with the photo device & pictures; it thinks & acts independently (highly developed); its body construction is half organic, its brain is chemical

Hyper-leap - 2nd hyper-leap to the Orion Nebula (1,800 light years from Earth), Meier again feels a deep tranquility and a sense of timelessness

Hyper-leap - 3rd hyper-leap to the Andromeda system; during this Meier observes himself and notices for a split second he can not see his body

Pleiadians/Plejaren space/time travel - "Distances are no problem for us, and we can unhesitatingly jump anywhere back and forth through space, and don't have to do this in any sequence."

Meier asks Semjase to write some words on paper for Meier's group

Plejaren alphabet - Meier copies them along with the pronunciations from Semjase's explanations; there are no umlauts or other pronunciation keys; 11,000 years old, taken from Plejaren scientist ancestors on Earth who based the patterns on star formations seen from Earth; script composed of circles (representing stars) and lines; older letters/script was much more complex; no longer used on Earth, but was in use centuries ago, often changed; some current Earth scripts are altered forms of this Plejaren alphabet; Earth scripts brought by "the heavenly sons & daughters" ("the ones responsible for the re-emergence of Earth humans [from savagery]") Meier observes in Semjase certain characteristics that are peculiarly female

Semjase blushes - "she is influenced by feelings, even though she cleverly hid them" --Meier
"It is not always good to know the feelings of others." -- Semjase

Great leap (hyper-leap) - jump 7 minutes into the "eternity"; feelings & sensations at that time are different than in normal material life;
Pleiadians/Plejaren unable to receive Meier's thoughts & feelings at that time

Pleiadians/Plejaren - need technical assistance for "true word repeats" of what has been thought and/or said
Apparatus - booths near the screens in the control center which "are equipped with all necessary means to store up feelings & thoughts"; thought impulses stored in a special computer from which they can later be repeated word for word; helmet, shapeable & adaptable in size, equipped with very fine sondes (probes) & a "fine-meshed net of sondes which pick up every kind of energy & transforms it into impulses which are then transmitted to the computer"; "the energy of thoughts & feelings is measured in very high values" and "exist only in very high frequency fields (hyperfrequencies)"; Meier sits in chair, places his head under the helmet cap which adapts itself automatically to his head, closes around his whole head leaving the face open, 1 and 1/2 centimeters between his skull and the helmet
Hyper-leap, Meier's ecstatic experience "inside the

timelessness" - sky/stars change "in a fraction of a second they are nothing more than a whitish milky mass, a shining mass", then there is darkness, then "all is merging into a golden color, and now everything is like silver...everything is merged into glistening light"; feelings of tranquility & peace, all encompassing love, "I am eternity, and I am inside of eternity", "loving voices calling for me", "I can't see myself", etc.; Semjase explains "under no circumstances or conditions are we allowed or able to remain, until we have reached that level of consciousness"; Semjase embraces Meier to stabilize him after the hyper-leap

Caltos - last star in the space Meier/Pleiadians/Plejaren were traveling in; twice as large as SOL

5 "blue stars" beyond Caltos, actually 11 stars, self-radiant; photos taken; life (even spiritual forms of life) are rarely possible on these stars with a few exceptions of creatures no bigger than 70 centimeters; "not all creatures breathe oxygen like ourselves & Earth humans"

Jupiter, Saturn & Uranus - no life forms (material or spiritual) existing there; not really planets; difference between planets & stars explained; "both are inhabitable by creatures of sorts, stars as well as planets, if atmospheric and other circumstances permit it"

Jakob Lorber (1800-1864, Austrian mystic):
<http://www.jakoblorber.co.nz/JakobLorber.html> - Meier read books by him, specifically about Saturn & the planets; "there exist on Earth many humans who write such kinds of books and other literature...these are products of fantasy"

Messages from angels or from God by inspiration - "In a few cases, such inspirations are true, but they never contain religious information."

"Religions exist solely on your own Earth. They do not exist anywhere else in the Universe. Some space-traveling people have brought Earth religions to other planets but only for the purpose of studying them." -- Ptaah

Jesus Christ - "...these delusions of your world..."

"Spiritual evolution is impeded through the false teachings of your religions, which currently dominate your Earth."

"...for many millenniums on many worlds of the Universe, the Earth human represents the most materialistic creature development, deficient in spiritual evolution for the run of millenniums. It is a known fact on many worlds, that the Earth human being defies (real) spiritual growth and develops himself only within gross materialism." --Ptaah

"This, precisely, is a real danger, for as soon as the Earth human becomes master of the technologies for space-drive and travels to strange worlds, and brings them by power of his weapons or lies or deceit under his control, so also will he include in his doing, the crazy spread of his religion to his conquests, and the existing universal harmony will be destroyed. ... And just to

prevent this occurrence is a great and difficult mission for spiritually developed space-traveling forms of life." -
-Ptaah

Asket, huge DAL Universe beamship a few hundred meters from the great-spacer
Great-spacer - "metal box" beside the control console with a one meter diameter hole/pit in the bottom lighted by bluish shining light; Meier steps inside and slides down the pit to the hangar section
Meier - must accomplish his mission in order to evolve
Huge DAL beamship - Meier & Semjase arrive into the port & exit to the floor of a small hall with metallic light-radiating walls all around; opening appears in the wall leading to a room with very comfortable seats & dishes

Meier goes to meet Asket, she notes his missing arm & offers to produce a half-organic prosthesis for him, he declines citing possible dangers if Earth humans learn of it

Nera - female, Asket's deputy (Second Coordinator); Asket is the First Coordinator (not the ship commander)
Stalor - male, DAL ship commander
Nera - on Earth at various times long ago; observes Meier as having "overcome the horror of death planted in you by religions"; states they (the DALs) will come to Earth again long after Meier's death
DALs - don't differentiate between the sexes as far as capabilities; DAL beamships crewed by male & female
Meier - "...Asket determined in your contacts that you are able to deal with female forms of life better than male. For that reason it is only logical for us to make contact with you mainly with female forms, and to use male forms only for certain things." --Nera
Semjase returns a "recording device" back to the DALs (partial purpose of this great journey with Meier); DALs researched a new technique for time-transmission, for which they developed small spiral-shaped sondes (probes) which they transmit from the DAL Universe (theirs) to the DERN Universe (ours), including Earth; they had sent a probe to Earth that got lost due to a small error in time calculations, landing several thousand kilometers to the east of its intended destination, Semjase retrieved it to return to the DALs; see Stevens annotation #18 - Else Schroder, a German girl, was backpacking, sleeping in a pup-tent near Zahedan, Iran when she heard a sound and went out to discover Semjase in a 1-piece silver-gray suit with her beamship, Semjase digging in the sand with a machine for the lost sonde ("time-spiral"); see Contact 40
Meier takes photos of Asket & Nera:

Asket explains why photos taken inside their ships or immediate surroundings turn out poorly (energy radiations which disturb images on film, especially color film); the photo screen apparatus from Semjase would not work in the ship either; photos of Semjase, Asket & Nera also taken (private, unpublished); photos of Semjase may be allowed in the future when "she is

no longer vulnerable on Earth"; Asket "will not come to Earth again for a long time", so photos of her are OK; "contrary to Semjase, Asket & Nera do not wear space clothes, but normal clothes (for them), which actually are rather different from those [Meier] knows of Earth women's fashions"

Asket speaks with Meier about his failures in getting his mission started, tries to persuade him to use Karl Veit's "UFO Nachrichten" publication for that purpose, Meier says the Veits would not be interested in his mission
"We do not come to you to command you, but to advise you, within certain matters and directions. We are not allowed to order you or to explain to you in advance, (what) the future is bringing in certain matters. If you knew this, then we would deprive you of certain development, which you irresistibly must go through." -
-Semjase

Stevens annotation: a few weeks later a complete reproduction outfit (printer, collator, etc.) arrived from an anonymous donor which allowed for the publication of the "Stimmer der Wassermanzeit"
Meier given notice of last public beamship sighting for photo purposes; "Whoever will not be contented with this, for him it would be better if he no longer troubles himself in this matter. Only satisfying one's desire for sensation is meaningless for our mission.in Earth terms, we are further developed forms of life, and no longer able to move in such levels of mind as Earth beings." --Asket

"Insane" Earth individuals "are only underdeveloped"
Prophets - "For to adjust to all tasks in the existing laws of Creation, each world creates, in cooperation with the Universe, from time to time, each according to level of evolution, one or more creatures of advanced development through whom necessary facts may be transmitted. These higher developed creatures have been called Prophets on Earth..."
Other extraterrestrial intelligences "who move in the Earth realm" are of different evolution levels ("some by only a few centuries"); "some Earth humans have had real contacts with such extraterrestrials, and others take such reports and elaborate them with fantasy, thus creating new stories. There also appear lesser developed intelligences who thirst for command and want to keep the scepter over Earth humans, and conscious of the affinity for religions on Earth, they learn to apply them for their own purposes..."; "but behind these contacts are menaces too, which Earth beings can see when wars and catastrophes befall them. Many powerful leaders of Earth are unconsciously led astray by such intelligences..."

Stevens annotations: Emanuel Velikovsky, "Worlds In Collision"; 1976 Astronomy Magazine Meier verification of Venus details; U.S. Geological Survey National Observatory (Flagstaff, Arizona) Venus relief map; John G. Newbrough, OAHSP book 1881 automatic writing; Meier's contact notes with Asket of

the DAL Universe (see Stevens' "UFO Contact From The DAL Universe With Asket Of The Timmers Society"):
http://www.ufophotoarchives.com/Dal_Universe.jpg ;
 bad quality of the photos taken using the Plejaren photo screen apparatus & other photos aboard the ships, including Asket/Nera photos, some photos in the Meier photo albums placed in by friends were ones he collected to describe certain things and became taken as being real photos from beamship travels, some bad quality photos taken by Semjase for Plejaren scientists to study were never returned; "most of the photographs made aboard the [great-spacer] not using the special screen were 'lost' in the processing line of handling from [the photo] laboratory back to Meier and he never saw them."

 Contact persons: Semjase, Asket, Nera, Ptaah
 excerpt in And Still They Fly!, pages 161-162

Double-exposure photos of Semjase's beamship over a hillside where a group of people were standing (April 20, 1975); photos destroyed by Semjase; Asket & Semjase discuss why she illogically allowed this to happen

Meier's contact notes with Asket of the DAL Universe (see Stevens' "UFO Contact From The DAL Universe With Asket Of The Timmers Society"):
http://www.ufophotoarchives.com/Dal_Universe.jpg ,
 all lost reports to be retransmitted to Meier by Asket; Meier presently rewriting the Contact Notes with Asket from 1964 with her memory's help, "all about the events and conversations are stored by her"

"GREAT JOURNEY" CONTACT 31 REPORT, PART 2 from 17 July 1975 aboard the Plejaren great-spacer:
 Stevens annotation: Predictions - "He was advised of a series of events that would transpire, involving him and also others of our world."

"You are only then allowed to tell of these things after they have happened." -- Asket

Nera to Meier - "Perhaps we will meet another time again, but this may be many years from now."

Photo screen apparatus from Semjase - "always the half-oval form of the frame appears in the view"; Stevens annotation - "This part of the special viewing screen frame showed up in several of the Apollo-Soyuz docking photographs we had seen before they disappeared in a theft at the Meier house. When those slides were printed this was usually lost in the picture cropping."

New photo apparatus from Asket to be used on Meier's next travel

Semjase to Meier - "...it may be a long time. Before another journey, I will first "abduct" you into another

dimension"; Parallel worlds - "Each planetary body has different parallel worlds, as well with your home world, the Earth. These parallel worlds exist in super and sub-ordered dimensions, thus strange for your normal time. On such parallel worlds, nearly everything is the same as in the world of normal time. Only small differences prevail, especially with respect to times. And so to such a parallel world I want to take you." -- Semjase

Semjase wants to leave and return, Meier suggests a short time leap during which he will become "some seconds younger"

Universal Barrier - return to the DERN Universe; "we will stay a little time at the barrier, to close it again", "we are not allowed to let it simply fall together, but must close it systematically"; "from Universe to Universe, there are only a few points in the barrier which can be used for passage. They should not be strained or overburdened, else the structure is damaged..."; "the whole process of closing is programmed, and is performed automatically" After closing the universal barrier Meier & Semjase will "jump into different systems", visit some planets & other forms of life; "We can only allow our ship to become visible on the fewest of these worlds. So also we can not leave our ship..."

Religion - Plejaren negative remarks about religion are only "addressed to a certain form of religion", "the uninformed ones are sure to think that all religion is being discredited"

Lessons - defined

Spiritual lessons - "the hitherto offered lessons and explanations by Semjase are only the foundation stones for the essential now following main work"

Religion - "When hitherto Semjase only spoke of Earth religions in negative form, then it was because the Earth human had to be made attentive to the error in his religions, ...for these are like nowhere else in this Universe"; "They control the Earth human and the whole planet, and retard your world thousands of years, in Spiritual respect. Every Spiritual evolution is blocked by these religions and find no progress. Your religions still contain real worth, but this becomes so indiscernible that only few people are able to see the effective truth there. These few who are able to see the real truths from the scripts, are banned and confounded by those dependent on these wrong beliefs, and thus cannot spread the truth. When Semjase speaks in negative form about Earth religions, she is addressing the falsifications in them which have been built up partly consciously. The Earth religions are only called such in name, but are just degenerate cults."

Rel-e-geon & Religion - defined; "religion can not exist without rel-e-geon, just as reigion cannot exist without re-ligion"

IHWH - defined, vainly termed "God" by Earth humans; defined as "He"/"Him" bears witness to the human-ness of "God"/"Creator"/Deities

Ptaah to Meier - "You are awake inside. You have become wise."; Meier - "many humans say that I am a fantast and far from the truth..."

Earth-built UFOs (beamships) - only equipped with "explosion [combustion] motors" & recently with "repulse drives having a thrust effect" ... "and lately also atomic", "they have problems"; first ones designed & under construction in 1941; first test flights mid-Feb. 1941 reaching altitudes of 12,500 meters, speeds a bit more than 2,000 kilometers per hour; Adolph Hitler ordered them to be built, most plans, equipment & apparatus destroyed but some overlooked were discovered and "from this, different groups developed the today existing ships in disc-form of Earth origin"; largest was nearly 100 meters in diameter, "a number have been constructed"; some have crashed, people seeing them think them to be extraterrestrial UFOs. Some evil-minded extraterrestrials who attack Earth or become lost here, but not of much importance. Many observations of UFOs & "abductions" are Earth people acting deceptively to trick people into thinking they are ETs, angels or other "Godly" messengers working for the welfare of mankind when this only serves for espionage. Preparation for the next hyper-leap, "we will show you some very different and interesting things"

CONTACT 33

[Friday, September 12, 1975, 10:57 a.m.]
Contact person: Semjase

Meier & group spot a 600-700 meter in diameter spherical "small-spacer" ship on 10 September 1975 at 8:45 p.m. which disappeared into a black artificial cloud, Meier able to film it; object seen again on 11 September 1975; Semjase explains it was the same ship Meier saw on 20 April 1975 (see Contact 12) which belongs to a group of a few thousand evil-minded intelligences (similar to the Gizeh Intelligences) who want to kidnap Meier as well as control Earth humans through religion; Pleiadians/Plejaren have been able to "control their limits", though "in certain matters they are equal to us, and we have our need for them"; Meier always carries a gun (a heavy .44 revolver with holster). Bermuda Triangle - certain things [there] which belong to ETs; many occurrences there trace back to natural events.

Satan - "only a product of the fantasy of your Christian religions"

Meier instructed that he will have to "write down many facts of the essential spiritual lesson"

Stevens annotations: "Ra", "The Law Of One" book by Don Elkins & Carla Ruckert; Meier's accuracy with a gun, drew & shot a 5-franc coin tossed into the air, hit a postage stamp at 100 feet at dusk, shot the hat off a running man who attempted an assassination of Meier (shot in chest, bullet deflected by a book & metal tag); "to this date" 10 assassination attempts on Meier &

several contrived accidents

CONTACT 34

[Sunday, September 14, 1975, 1:43 p.m.
+ thought transmission Tuesday, September 16, 1975]
Contact persons: Semjase, Ptaah
German excerpt:
http://www.figu.org/de/figu/die_kritiker/adamski.htm

Hans Jacob received a letter from 41-year old Alois Rickenbach of Mannedorf, Switzerland claiming to have had a séance contact with an author named Gloria Lee [Gloria Lee Bird] ("Why Are We Here", 1959), as well as contact in 1961 with an extraterrestrial from Alpha Centauri named Sefh (who befriended Rickenbach while on Earth for 11 months) who told him about the future (1975) Plejaren contactee in Switzerland (Meier) that Sefh was aware of through Time-Visions; details about Rickenbach etc. were found after Ptaah used a "fan-shaped analyzer" in the region "Ashtar Sheran"/"Asthara Sheran". Thule Society - secret society in Germany, "use telepathic forces & have much knowledge of extraterrestrial technologies, occurrences & intelligences"; seek to elevate the white/Aryan race on Earth; "all is screened by spiritual forces that are difficult to penetrate":

http://en.wikipedia.org/wiki/Thule_society

Bermuda Triangle - natural dimension doors;

extraterrestrial bases stationed there

So-called "appearances of the saints"

Contact conversations - "...I need the apparatus which recovers the knowledge word for word from my sub-conscious and transmits this to you in thought form. No material creature has an unlimited force of memory. This is first attained in pure spirit forms, when the spirit can lay aside the material body...and be nearer to the existence than to the life." --Semjase

Meier remarks on Semjase's beauty, "I have often asked myself whether I should not one time take a bite out of you"; Meier's wife was jealous of Semjase but has "calmed down"; Meier has begun going for contacts without his wife knowing because "she quickly influences me"

Arahat Athersata - "He has already joined the level of existence of pure spiritual form"; only the [Andromedan] High Council "who are already half-spiritual forms" can get in contact with him, "Like this also are the facts in respect to 'other worlds' forms of life, when these forms still are bound in material bodies"

Thought-transmission [Tuesday, 16 September 1975] - "GREAT JOURNEY" CONTACT 31 REPORT, PART 3 from 17 July 1975 aboard the Plejaren great-spacer: ETs from a planet in the NESAR system - a group lived on Earth 1,067 years ago mixing with Earth humans & lived on Earth about 50 years studying the Christian

religion; they took those teachings to their home planet; many "temples to God" were built on NESAR planets; after 5 years hostilities broke out between families over these religious ideas & increased & spread to other planets causing war which lasted 7 years & destroyed stars & planets even creating a black hole in the NESAR galaxy; prior to this they had lived in peace for 17,000 years; other extraterrestrials intervened to stop the wars, forbidding the NESAR people to return to Earth After another hyper-leap they have traveled 960 decillion light-years from the SOL System to the Galaxy of "ASAP" to the planet "Desmon" inhabited by humans "something like equivalent to your Middle Ages" who live in "greater villages" like those in Earth's oriental regions; a second nomadic race also lives here in huts made from plants & bushes; there is a giant sun in this system "which will die after some millenniums"; there is a moon 4 times the size of Earth's moon which will rush into the giant sun in about 3,200 years "because the 3 cosmic bodies work slowly towards one another"; the humans on Desmon will have developed technologies which will enable them to escape the planet, if this doesn't happen "then help from outside would be brought in. This is an obligation under cosmic law"; Meier & Semjase unable to talk with these humans "nor on any of the worlds which we will visit in the next few hours"... "we are only allowed to be seen where the concerned evolution allows this"

Next hyper-leap 700 sextillion light-years from Earth to the Galaxy of "Nepon", the system of "Lesa" with 2 sister planets of immense size (one is inhabited by human forms of life) and their giant moon 520 times larger than Earth; "on these worlds also we will undertake a short flight"; Meier takes photos Next hyper-leap, still in the "Lesa" system ("which is very extensive and must be crossed in hyper-leaps"), to a planet in similar size to Earth that has oxygen and an Earth-similar atmosphere but the surface is more like that of Venus; the planet has "quite primitive plant & animal life but was in earlier times more populated. A cosmic event destroyed all and reduced it to stone for millions of years. For some millenniums now the conditions are changing again and new life is developing itself"; waste-, water- & forest-regions, and desert-like landscapes consisting "partly of massive rock, mountains, and very fried and brittle stones"; mountains no taller than 2,000 meters and look similar to the mountains on Venus; Meier able to photograph through the beamship's hatch opening "for the atmosphere is very well suited for all of us"

Next hyper-leap 30 trillion light-years from Earth to the Galaxy "Mara", the system "Taro" with an enclave of stars; "most worlds of this system appear blue in color"... "are all still actively volcanic, and after some millions of years the first life will start developing itself on them"

Flying over one of the volcanic worlds of "Taro" Meier

spots a "flight machine", Semjase tries to contact it "with some of her instruments, and also talks in a not understandable language for [Meier], characterized by fully strange melodic ("a speakable language of signs or symbol pictures"), and speaks into an instrument" but has no success since the creatures "do not maintain intergalactic communication"

Next hyper-leap 480 quadrillion light-years from Earth to the Galaxy "Deron", the system "Exes", "this star cluster consists only of volcanic worlds which radiate their own light power...it is still rather dark on these worlds. The light only penetrates to the outside, but is not able to illuminate the world's surfaces"; Meier photographs some volcanoes

Next hyper-leap to a system with a star cluster (3 billion kilometers from the beamship) and a giant ice-world planet 11 times larger than Saturn

Meier asks about the security distance from planets needed in hyper-leaps, why Ptaah doesn't observe that in these hyper-leaps; he explains "with my ship we have much better capabilities for overcoming distances. The technologies of our ship enables us to also neutralize time...by this process it is possible for us to achieve a safe distance in less time and to then transmit"... "on the one hand we neutralize the time until shortly before the point of departure, and on the other we generate in the space a neutral timeless tunnel through which we can then overcome within a split-second the short distance for safe position"... "the timelessness tunnel is indeed easier to handle than a hyper-leap. Such a tunnel can only be generated within certain distances, in which the sort of environment must always be regarded. In different galaxies and systems the different energies limit the extent of a timelessness-channel..."

Meier asks if "there exists in our Universe forms of life at about the same position in evolution as we humans on Earth"; "The variety of The Creation knows no limits." - Ptaah

After this great journey Meier will be one half hour younger in relation to other Earth humans; his wristwatch "always goes crazy when I get near Semjase's ship"; he is not tired, hungry or thirsty during this long trip because he has eaten some Plejaren fruits & vegetables for dinner which are more nourishing & thirst-quenching than Earth produce, able to calm hunger & thirst for up to 90 hours; Stevens annotation - Meier given an apple grown on the Plejaren great-spacer which he gave to Guido Moosbrugger who saved it for months, it hadn't begun to rot even up to the time of examination by the Stevens/Elders/Welch team because "produce grown aboard the ship was cultivated free of destructive bacteria";

Meier not tired because the air aboard the great-spacer has higher oxygen content than Earth air "and also the compound of other elements is somewhat different", "the different composition of the air keeps us awake

longer and in need of less sleep than is the case on Earth"

This great journey has lasted for more than 2 Earth days (by Meier's watch), and another day will be needed "before we will bring you back"; Meier worried about his wife's complaints of him missing for more than 3 days, Semjase reassures him that they will undertake a time travel which will result in him only appearing to have been away from home for about 24 hours "Miracles" versus Logical Reason - "In earlier ages for the human beings of Earth, visible proofs were necessary, to give them certain forms of thinking. By these visible proofs they started to believe in marvels, and went astray again. The present time of Earth has passed for visible proofs, and there must only be the way of clear and logical reason and clear mind." -- Semjase

Stevens annotations: "Perhaps we are, after all, only the bacterium infesting a spore-like planet in a flower-head universe in a garden of universes on one side of a rock..."; Stevens team asked Meier about ancient works which talk about Earth humans visiting other planets, "...he knew nothing about them. He did know of other writings in the Ashoka Ashram which we have never heard of. Truly, the leaders of Earth humanity have carefully selected what they want us to read and know, and have just as carefully suppressed and hidden other knowledge they did not want us to be aware of, and they have been doing this for millenniums. An adjunct of Meier's mission is to help break this cycle."

excerpts in *And Still They Fly!*, pages 32,33,209,230-231,258-259

"GREAT JOURNEY" CONTACT 31 REPORT, PART 4 from 17 July 1975 aboard the Plejaren great-spacer: Planets exist with a similar evolution as Earth humans, such as the planet "Kartag" in the system "Neb" in the Galaxy "Aratom"; on Kartag war is practiced and there are atomic sciences; the system of Neb "is under control of a highly developed form of life which troubles itself for the prevention of catastrophe"

"Interference can only be performed if recognizable catastrophe of great extraplanetary extension announces themselves."; "Each creature must take its own path of evolution, even if this includes self-destruction." --Ptaah "...it is a law which is well established in nature. What degenerates negatively is thus destroyed so that it can not menace the better forms." --Ptaah

Next hyper-leap to the planet Kartag; Kartagians don't have airplanes but flight machines more like beamships; don't drop bombs but use rockets with guidance systems; their atomic missiles are stronger & more

dangerous than those on Earth

Next hyper-leap to the Galaxy "Beberas", the system "Kras", the planet "Neber"; giant dinosaurs live there, Meier wants to touch one; Meier & Semjase fly over the planet, masked from sight; humans live on Neber but not native to the planet, they were "displaced there"; "On ancient worlds human creatures do not yet exist, because they rise normally in later times."; humans on Neber "have become wild & degenerate" over millenniums "as this was as well the situation on Earth"; Neber humans consist of 2 different human races from 2 different planets, they constructed research stations & pyramids (for protection from the hostile environment); the home world of one of the races was damaged by a cosmic catastrophe, stranding that race on Neber; the home world of the other race suffered a devastating unknown epidemic that killed all humans, stranding that race on Neber; over time the technology of these races deteriorated due to the wet climate, causing their descendents to slowly become primitive

"The human form is indeed a creation of The Creation. It does not descend from any animals, as for example the monkey, as some of you on Earth believe"; evolution (or degeneration) of the human form explained; reflexes; self-preservation; Earth humans need oxygen, like the Pleiadians/Plejaren; "vegetative state"

Final hyper-leap/transmission back to a location near the SOL system

Meier - "I feel at home on Earth - even if it often appears strange to me"; "Each form of life is connected by moving feelings towards its home" --Ptaah Plejaren planets - each planet has only 1 nation & 1 government which "functions as an executive institution" subordinate to advice (based on the Creational natural law) of the High Council; "Our teachers in spiritual evolution trouble themselves by every means at their disposal to study the spiritual development of each single creature"

High Council - the essential government of all the Plejaren planets; doesn't live on Erra "but on a very special planet"; consists of half-spiritual/half-material humans in a state of transition; "able to communicate with higher pure-spirit forms, which is impossible for pure-material forms of life"... "the oscillations (vibrations) of the spiritual spheres are much higher than we can generate"; "Earth beings can only come into contact with those of about the same position in evolution. This is a safety measure in Creational Law..." "In the whole Universe are found innumerable forms of space-traveling life, humanoid as well as non-human races"; alliances between like-minded races, also occasional conflict; alliances are "instituted to watch over locally inhabited space", exercised by Great-spacers (huge spaceships); due to the variety of creatures in the universes, "conflict is a way of life", though "wherever possible this does not result in

elimination of forms of life, materials, etc. because every creature needs its evolution"; Earth humans descended from Plejaren ancestors

Other extraterrestrial creatures occasionally contact Earth humans; this happened more often millenniums ago when many humans knew of the existence of the "Heavenly Sons", including trading with them; interference from evil-minded persons (Earthly & ET) decreased the extraterrestrial contacts with Earth humans resulting in loss of knowledge about ETs; some "less beneficial" extraterrestrials secretly built stations on Earth & fostered cults; other extraterrestrials tried to assist Earth humans in their evolution
Age of Pisces ("epoch of fishes") "cleared the way for a new chance [for ETs] to enter Earth affairs without being noticed"; even before the Age of Pisces, prophets were chosen & prepared to assist Earth human evolution; why landings & contacts are done secretly (not publicly); "When the epochs change, so also do the minds of the forms of life."

Age of Pisces - "characterized by religious fanaticism"
Age of Aquarius - characterized by searching & exploring; one of the main reasons why certain humans are now being contacted by extraterrestrials again; "Age of Aquarius demands thinking & spiritual evolution of the humans of Earth. This can not be achieved by seeing & listening with the physical organs only, but only by reasoned thought"; "his interest is only aroused by secrets for which he can hunt..."

Earth's magnetic field disturbed by atomic explosions, influencing its rotation & orbit, resulting in displacement of the magnetic poles (North Pole now in the Canadian Ice Sea, South Pole moving in the direction of South America); by the year 3000 the North Pole will be in Saudi Arabia (between Jidda & Mecca), the South Pole in South America

Atomic explosions like Hiroshima & Nagasaki - elementary radiations effect the "pure atmospheric stratum...which cause electrical energies in great magnitude...in very high frequency ranges...near the ultra-violet spectrum" mixing with oxygen to generate "huge quantities of ozone" in the lower atmosphere; "this ozone value increases 34 fold a short time after the explosion", which destroys "in wide surroundings all micro-organisms of wide variety, which are of critical importance for the preservation of Earth life. Then a short time after the explosion the ozone values decrease drastically to very low levels"... "certain elementary effects penetrate all matter & endure for hundreds of years"; elementary radiations also effect the ozone belt
Atmospheric lightning produces ozone - "lightning cleans"... "nature herself always generates just as much ozone as necessary to guarantee life"

Van-Allen Belt - "this belt consists especially of caught by the Earth magnetic field, electrons & protons, which have a life-important function for Earth existence";

"exists at a height of 1,000 kilometers average. The charged particles are in constant movement, and that on spiral courses from pole to pole":

http://en.wikipedia.org/wiki/Van_Allen_Belt

Contactees - about 17,422 real Earth contactees

Gizeh Intelligences - contact different Earth humans & take them on flights into the cosmos, much more than the Pleiadians/Plejaren

Gizeh Intelligences - influencing an Earth couple to misguide masses of people into death, announced a gathering for September 14, 1975 in Waldport, Oregon [Heaven's Gate cult; Bonnie Lou Trousdale Nettles & Marshall Herff Applewhite]

Pleiadians/Plejaren - have taken 3 Earth humans on cosmic flights in the 1900s

Other extraterrestrials kidnap Earth humans, seldom returned to Earth - happens rarely

Other inhuman extraterrestrial races "rob Earth human beings"; Pleiadians/Plejaren "not allowed to interfere by force", though attempt to contact such extraterrestrials to prevent these kidnappings

Plejaren weapons - "in every case are intended for defense alone, but never designed for attack"; "every single race of a form of life in the Universe disposes of weapons of some kind"; self-preservation; dialogue leading to reasonability is the first step in defense, fleeing if that fails, fighting if that fails

Akart [[Acart](#)] - planet in the next inhabited star system 5 light-years from Earth; different worlds in that system are inhabited by humans who differ little from Earth humans, though they are some years advanced (technologically & spiritually) beyond Earth humans, having already achieved space flight & visit Earth often; they have a space station mid-way between their world & Earth; they narcotize themselves for cosmic space flight due to severe pain associated with it; Akart, approximate size of Earth, is overpopulated (23 billion), they come to Earth to collect seeds of plants, vegetables, fruits & grains; they collect foodstocks on other less-populated planets; Akartians are rather peaceful, though suffered much & currently live in a dictatorship; people from other populated planets in the system of Akart are unable to help the Akartians being "still too much caught up in the material & worldly things" (see Stevens' "UFO Contact From Planet Acart"); <http://www.ufophotoarchives.com/acart.jpg>

Nearly all extraterrestrials will abandon Earth "if certain circumstances come up"

Open contact between Pleiadians/Plejaren & Earth humans "is not provided for still a very long time"
Peaceful & harmless extraterrestrial race to officially visit Earth (landing in America) "before the year 2000" (according to Plejaren probability calculations) "if unanticipated factors before then do not put this enterprise in question"; "they will announce themselves to you first by radio & television, and prepare Earth men for their arrival, and will then land with one of their

egg-shaped ships, which will be used by 8 to 12 other forms of life"

Meier's mission - he has prepared a lecture on the Pleiadians/Plejaren; Ptaah urges him to make this information public, "for which you have been impressed in the form of a prophet"; Hans Jacob opposed to Meier speaking negatively of other UFO cases; lectures to be given with request for donations not fixed fees; "you may have renounced materialism, but you have to feed your family as well as yourself. Remember, each work must be worth its earnings."

"Live well and become just for your mission." --Ptaah to Meier

Stevens conclusions: "we had...a specimen of extraterrestrial plastic-like material,...spacecraft sounds captured on 4 different occasions, and once before 13 other witnesses...with 4 audio tape recorders all being used simultaneously"; Meier has had 17 assassination attempts up to 1988

excerpt in 49 Questions, page 34

unofficial English translation:

<http://www.gaiaguys.net/Aryans.htm>

Noah - 3.10 meters tall (measurement corrected due to clerical error)

A primary (first) molecule of spiritual energy becoming matter contains 49 atoms; the atoms are an intermediate between spiritual energy & material matter

Seven-fold synthesis of matter - 7 planes each different structurally & by "value"; earth scientists only aware of the 7th and 6th planes, working on the 5th; earth scientists call the 7th plane the atom plane, (but actually the 1st plane is the atomic plane); and they call the 6th plane elementary particles (but this is actually the 2nd plane); "there exists a micro-atom-plane beside the atom

plane, which draws through all spiritual energetic & rough-material matter"

HISTORY OF THE ARYANS - ancient home worlds were planets within Lyra near Vega; mastered space flight 22+ million years ago & visited Earth in its early development; brought banished criminals to Earth for punishment who mixed with early native Earth human-like creatures; Destroyer planet damaged Lyra-Vegan home worlds; later developed disc-shaped beamships; conquering wars; Lyra-Vegan liberation war 230,000 years ago; "more than 60% of all culture was damaged & completely destroyed", 3 planets of Lyra system dissolved to energy by a weapon called "over-kill" (now being developed on Earth, written about in science fiction novels); commander of the terrorizing armies an IHWH named Asael; Asael fled with 360,000 people ("titan-sized") in 183 great-spacers & 253 space-reconnaissance ships to the Asael System ([the Pleiades] star system with 254 young blue-white stars), later take possession of the worlds of the Hesperides System; on the Hesperides worlds centuries later, Asael dies, succeeded by his daughter Pleja (an IHWH), "Asael System" name changed to "Pleja-System" [the Pleiades]; Pleja commanded expeditions to the SOL system, which had been where a part (Venus) of a destroyed (by the Destroyer planet millions of years ago) planet of the Lyra-Vega system was transplanted

(see Contacts 5 & 60); Pleja expedition to SOL system took control of Mars, Earth & Malona, later returned back to Lyra-Vega system leaving some behind to mix with the races there; Pleja died and later Lyra-Vegans (Pleiadians) returned again to Earth & Malona (4th planet), fights for government arose, Earth was evacuated to Lyra-Vega worlds, Malona remained colonized until destroyed by war between its 2 nations (remains are the Asteroid Belt); later, Lyra-Vega criminals again banished to Earth; later Earth colonized again by several hundred great-spacers of Lyra-Vegans (Pleiadians) for 6,000 years, later destroyed by wars; later war broke out again in Lyra-Vega system, IHWH leader Pelegon & other Lyra-Vegan "titans" traveled to Earth 50,000 years ago; in Lyra-Vega the wars were fought to their end & government was given over to spiritual leaders, final peace was found and @26 A.D.

Pleiadians discovered by expedition a semi-spiritual world in the Andromeda system inhabited by semi-spiritual beings who became the Plejaren alliance "High Council" in 26 A.D. (1,951 years ago, see sentence 170); under Pelegon's leadership on Earth with 200 sub-leader scientists, high-cultured civilizations arose on every continent & peace lasted 10,000 years, until IHWH named Jesas murdered the follower of Pelegon & took command of all nations, war broke out & 100s of thousands fled to Beta-Centaurus ("Barnard's Star"); etc., etc.

History of Atlantis (see Contacts 55 & 59)- @31,000 B.C. (33,000 years ago) descendents of the Beta-

Centaurus [?] refugees colonized Earth again, guided by IHWH named Atlant who was married to IHWH named Karyatide; Atlantis (city & continent) built under Atlant's leadership; Smaller-Atlantis built under Karyatide's leadership; Mu built under the leadership of Karyatide's father Muras; 18,000 years passed in flourishing, until @13,000 B.C. (15,000 years ago) scientists tried to seize power but subdued & escaped to Beta-Centaurus ("Barnard's Star") region Hyperborea (Florida) - @11,000 B.C. descendents of the Atlantis power-mongers/escapees to Beta-Centaurus returned to Earth for revenge (meanwhile had increased their lifespan up to 1,000 years by research & extended knowledge), led by IHWH named Arus "the barbarian" who also had 200 sub-leaders/scientists; Arus conquered northern lands of Earth ("Hyperborea"), Earth's axis at that time was different, "before a turn of the Earth changed its axis" (i.e. Florida used to be in the northern region of Earth's magnetic pole before the axis changed to what it is now); Arus's son Arus II attacked what are now the lands of India, Pakistan, Iran (Persia), etc. inhabited by the Sumerians (peace loving, dark-skinned {not negroid, but Europid} & tall, mainly traders & agriculturalists [sentence 176], descendents of Sirians who had settled on Earth 33,000 years ago when the Pleja-System people did); [sentences 173-175]

Sumerians expelled by Arus II, returned to their old homeland "between the Caspian Sea & Mount Ararat [Ararat]"; India, previously named Arya, named after Arus II, which had split from Hyperboreans & allied with inhabitants of Mu & Agharta; Arus I ("the barbarian", father of Arus II) meanwhile constantly attacked Mu & Greater Atlantis; those wars lasted 1,502 years, Mu & Atlantis were destroyed; Arus I murdered in old age, after destruction of Mu & Atlantis, by his 3rd son Jehovan; [sentences 172-179] some descendents of Arus I "preserved themselves as the Ausists" until Jehav's time (@3,400 B.C.) when 160,000 of them (called Great-Aryans, advocated Arus I's ideas) deserted Jehav's government, wandered & plundered northwest to east, attacked the Sumerians in India & settled there

Hebrew/Jewish History - Jehovan took power & seized control of 3 nations & the Hyperboreans; 1 of those nations subjugated by Jehovan were descendents of an IHWH named Armus who had settled in the region of Armenia 33,000 years ago (from the Pleja-System); 2nd nation subjugated by Jehovan were the Aryans (of India); 3rd "nation" was not a nation but "a worldwide alliance of gypsies...interspersed by spies & saboteurs of Jehovan", the "Hebrews" ("Hebraons" in ancient Plejaren language, later "Hebrons", names meaning "gypsies", "dregs of society", "outcast"), the "Jews" of today, who then "constantly incited fights & quarrels within the whole world"; (sentence 143) "Peace on Earth will finally be then when, when this might-thirsty & murderous self-called Hebraon race-connection has become completely scattered"; Jehovan governed

@7,000 years ago (@5,000 B.C.?), murdered by his only son Jehav who took control of government 3,400 B.C. & ruled the 3 nations/races wickedly ("demanding blood & death") until 3,320 B.C.; Jehav had 3 sons, Arussem (1st born), Ptaah & Salam; Arussem murdered Jehav & tried to seize power but thwarted by his brothers who banished him & 72,000 followers; [sentences 167-171] Ptaah & Salam (sons of Jehav) along with "heavenly sons", Hyperboreans & "the emigrants from the Pleja-System led the further government by common agreement...and created peace"; Ptaah (2nd son of Jehav) ruled for 93 years, stricken with an unknown disease & died, his brother Salam (3rd son of Jehav) ruled alone until an old man, re-connected with "the home worlds" & their form of government, & handed over government to his son Plejos 2,040 years ago (73 B.C.?). Plejos followed the guidance of the High Council when it was established in 26 A.D. (1,951 years ago) & prepared the long hoped for return to the Pleiadians/Plejaren' home worlds in 33 A.D. (1,944 years ago) after Jmmanuel had been born & educated for a prophet for his mission; Plejos ordered the procreation of Jmmanuel

"Like every human form of life, you need the steady new testing of your spiritual forces" -Semjase

Spiritual Teachings:

Death - desire to be sure that there is "life after death" obtainable "if every single one will overcome his own I,

because in truth, it is only the fog of the ego and the I which prevents the outlook towards the kingdom or sphere of the true living, the spiritual sphere, being away from the change of rising or dying" (Semjase); "egotism & materialism and all other unworthy of the human being concerns to which he became subject and by which he is imprisoned" (Semjase); spiritual growth; "for many human beings" physical death means "the beginning of their essential life...the gradual re-lighting of the inner sohar", reincarnation

"Only by true inner rebirth can the darkness or dim light of one earthly life be finished, that is, when the light of the inner sphere becomes conscious to you, and when the working of the spirit of life no longer appears a hollow fate to you, which in truth you yourselves generate and create by wrong education. If then finally the sohar is shining inside of you, then you see the invisible, the power of the spirit and its unlimited force for being the true working fact..." -Semjase

"The Other World" (after physical death)

"One life is arranged in order into the next one, and the one assists the other for living, for being arranged at a certain time again into the perishing, when it has completed its time and task" -Semjase

Life and Death - "The life does not strive for the overcoming of the single case of death, but towards the overcoming by evolution of the death and rising in itself"; "the final goal of all creations...the Creation...the Universal Consciousness"

"The actual sense of life within the material realm" - "Self-conquest of the steadily wanting to dominate I, and following evolution in the whole of spirit. To conquer yourselves then, is meaning that you should help your higher self towards the victory, to recognize in this way a still higher self, namely the creational I, into which you will awake by still higher evolutions. Certainly, this is one of the most difficult labors of your life, but moreover as well the very most beautiful, most worthy and richest one." -Semjase

"your spirit life inside of you is a piece of the spiritual energy of the Creation"; "to be at one with the spirit of life inside of yourselves, with the part-piece of Creation inside of you"; true freedom & freedom from fear of death & death itself; "To be at one with the part-piece of creational energy inside of yourselves also means to recognize behind the outer ego your other ego, which namely is the creational I" -Semjase

"To see himself truly and to recognize oneself - one's most original I, which reaches above all spheres and limitations and beyond is floating in all senses towards the all-great-temporal and humanly inconceivable regions of the Creation...by which he recognizes the death for only the other side of life, which, like in the physical sphere is sleep, which detaches from the wakefulness of day." -Semjase

"The Other World" - "the separate kingdoms of this world and the Other World are one single kingdom and sphere, coexisting in the same place, but just otherwise

dimensioned, but within the same time-sphere"

"Need and pains, like joy and delight, do always keep the scale in balance, but by your wrong thinking alone you over-value your need and pain, register these and keep them in constant memory, while far too soon you forget the events of delight and luck and let them go...move with poise in these matters and remember the positive like the negative to preserve that in memory." - Semjase

Millions & billions of years will pass before Earth humans realization of the highest goal

"in the present you...truly have to seize the helping hand and the offered knowledge of truth, to value this and to elaborate it towards the goal" -Semjase

Thought transmissions ("talking by thought") - symbolic pictures re-translated by Meier

Semjase privately discusses higher concerns, "which still can not be understood by the earthhuman beings of the present", with Meier

 microwaves, caused by the Gizeh Intelligences &
 Pegasus refugees in their ship
 Pegasus refugees - made connections with the secret
 neo-Nazi group in Brazil
 FIGU Center - essential worth & danger to Gizeh
 Intelligences
 Pegasus refugees - oscillation-vibrator with microwaves
 causes instant aging when used on people (not allowed
 by Gizeh Intelligences because it would reveal their
 existence to the public); energies are generated by "an
 exactly defined oscillation of thought" (Gizeh
 Intelligences unable to do this, must rely on Pegasus
 refugees)

Gizeh Intelligences - religions "are their best helping
 means in the purpose of their plans for world
 government"
 Pegasus refugees - will be captured by Ptaah and taken
 to their home planet
 Plejaren telemeter disc - stationed constantly above the

 concentrated force of Mr. G's subconscious

CONTACT 85
 [Thursday, September 15, 1977, 4:11 p.m.]
 Contact persons: Semjase, Ptaah

Mr. G - his consciousness, believing he is still in contact
 with higher life forms, misleads his subconscious,
 which creates a vicious circle of delusion; his
 subconscious (influenced strongly by religious
 concerns) defended itself from Meier & Semjase's
 analysis attempts

Consciousness & subconsciousness - feed each other
 Energies & auric forces of religious belief - "These forces represent an immense accumulation, a gigantic form of concentrated energy, which clasp your world like a closed sphere and often cause bad harm"; the crazy faithful believers produce these religious forces "by their belief & fluidum of belief", which they assume to be "forces of darkness"

Meier - attacked at Einsiedeln Monastery (Schwyz, Switzerland) by religious forces; told to shun such places: <http://www.kloster-einsiedeln.ch/webseite/english/english.htm>

Meditation center times - values for each member determined by their radiations, "the fluidum and the cosmic oscillations" + other very important factors
 Aura - violet color corresponds to a low level of development, caused by faith in something wrong; violet & ultraviolet erroneously assumed to be protective when it is actually negative

 Herbert Runkel & Guido Moosbrugger had previous lifetime connections with Meier's previous incarnations Pleiadians/Plejaren - subject to mistakes & sometimes make errors

October 13, 1977 hijacking of a Lufthansa airplane - unfolding event discussed & elaborated; Mogadishu, Somalia; Gudrun Ensslin, Andreas Baader, Jan-Carl Raspe murdered by German prison guards: <http://www.baader-meinhof.com/timeline/1977.html>
 Beamship demonstrations - perceived by some as a privilege or expected & more; with a few exceptions, "we can not grant these unreasonable desires in any way, because they contradict the meaning of our tasks"; "Apart from this, there is no importance of our ships and ourselves and our existence at all, but only and solely for the mission of all of us..."; possibility of a new/false religion or idolization arising otherwise

Stevens note: explanation of the German word "milliard" (billion):

<http://en.wikipedia.org/wiki/Milliard>

Contact report transmissions - Meier works largely via his subconscious which controls the movements of his hand quickly

Meier warned of insincere future new "members" who may seek control, profit & power or turn "betrayal" to do harm to the mission

Mistakes - sincerity & courage needed to confess mistakes to oneself & others; "bettering himself by changing and recognition of his mistakes and for their confession"

Betrayal - "with the earthhuman being, unfortunately betrayal is very much expressed among selfish & might-thirsty human beings"

Pleiadians/Plejaren - spoken for doubters, the truth & meaning of the mission; "the goal of improvement & the absolute"; "the law of the Creational, of complete-universal sense & meaning"; "universal consciousness"

Lectures - about the Pleiadians/Plejaren & their beamships, Meier not allowed to be burdened by them in the future, "in the first place it is not of great importance" and secondly deprives Meier of time needed for his "essential mission"

Meier asked to let Herbert Runkel take over the 3 lectures at Zurich-Kloten

Letters/questions for Semjase - copied by her, originals kept by Meier; her answers transmitted to Meier who writes them down on sheets of papers where Semjase has written her name; copies of the transmission answers to be kept with the original question-letters; Semjase not able to easily use Earth writing tools or the handwritten Earth language

Elsi Moser - a book given to Semjase to comment upon; book copied by Semjase

FIGU Center - purified of negative forces; a place of calm, peace & love

Jacobus Bertschinger - picks up on Semjase's thought impulses

Group members individual meditation times/data - the will as a factor; "when the individual persons trouble themselves for the processes of learning the lessons"; "the necessary measure of concentration"; auric forces ("material amount of fluidism"), a certain amount must be eradicated in the members & "a quite definite quantity has to become stored in quite a definite time"
Age & genesis of the present DERN Universe - calculated "since its last state of slumber"; 47,000,000,000,000 years old; "seven-greattemporal slumber"

The "Primary Universe", explained

"Greattime" (measurement) - 1 greattime =

311,040,000,000,000 years

The "Ancient Creation" - by idea "gave rise" to "our Creation"

"Period of slumbering" - 1 greattime

Age of "our Creation" - 6,578,840,000,000,000 years old

Question: where did humans first arise in the universe; not known by Semjase

Perry Rhodan (science fiction character) - books written by Karl Herbert Scheer & Clark Carlton, ideas

"inspirationally-impulsively received by the authors & written down": <http://www.perry-rhodan-usa.com/index1998.htm>

Spaceships & beamships - mainly piloted by female forms of life

Women - more sensitive in communicating, thus more companionable than males

Other extraterrestrial human races who have male-dominated societies

Culture & developmental level of a society can be determined by the form of manual activity of women

Women - physically less suited for strenuous labor, but more suited towards labors that require a delicate touch, like flying a spaceship

Semjase sends greetings to FIGU members from herself, Ptaah, Pleja, Quetzal, Menara, Alena & others

Meier tries "calling" Semjase - "my calls have simply faded away somewhere, without having found resonance"; she was strictly occupied

"The troubling for a real success does not only depend very much on the will, but as well on an understanding of the whole lesson & exercise" - Semjase

Group member - H. "is burdened by body-organic & psychic imbalances"/"impurity of the body" which causes a steady feeling of slackness, tiredness, incontentedness, apathy & aggression; can be detrimental to the meditation center concerns/item which stores highly concentrated magnetic forces; group member's impurity effects noticed by Meier as "a very peculiar fumigant smell"; neutralized by the Pleiadians/Plejaren; before H. goes into the mediation pyramid again he must clean his body, clothes & mouth [smoking ??]

"It is all right correct that you spend much patience with each human being and concede in this way for him always still a chance until the bitter end" - Semjase to Meier

Meier asks Semjase about his "later life" in respect to his present parents; answer not allowed to be given Asina (Cygnian extraterrestrial girl) - first appears at the Center November 8, 1977 @ 11:30 p.m., Meier with Clair hear a peculiar animal call; Clair leaves

frightened; beamship noise heard, tape recorder recording it; figure suddenly appeared partly in the shadow; apish face (monstrous, like a mixture between a fish & a frog with a large mouth, like an "amphibian human"), something like whalebone above the skull, female body, fingers twice as long as Earth humans, excellent eyesight (saw Meier's pistol in the deep darkness), 160 centimeters tall, able to communicate telepathically; words spoken were "Murg, murg", meaning "peace, peace"

Other extraterrestrial life forms can have voices very different from Earth humans

Cygnians - amphibian humans who in earlier times lived in the water as well as on the land; have a "clumsy language", primarily communicate via telepathy; their home worlds/race located in the constellation of Deneb 2,000 light-years from the SOL system

Asina's spaceship with a protective screen registered by one of the Plejaren's telemeter discs in southern Europe; cylinder-shaped ship 12 meters in diameter

Meier - commended by Semjase for his advanced abilities far above all other Earth humans; praises cause Meier to get upset; conversation about the meanings of "I am sorry" and "I feel sorry" (omitted by Stevens)

Contact report transmissions - pre-reports to be transmitted by a new apparatus, constructed by Quetzal & his friends, which can transmit a 2-hour conversation in 30 minutes as a series of pictures which can be translated & written down by Meier as fast as a computer might work

Semjase often sad that she can't have contacts with the many people who think about her

Cygnians - 4 expedition ships from the home worlds with whereabouts unknown; unable to communicate with their home worlds due to limited range of their communicators (1,400 light years); utilize only primary telepathy; heightened senses able to receive & analyze radiations from all forms of life; Cygnian government led by the one with the strongest, most forceful oscillations on their planet; they are a very timid race

Primary telepathy

Spiritual telepathy

Meier - "emits the highest radiations on the Earth"
Pleiadians/Plejaren - have oscillations several times higher than Meier; radiations absorbed inside their stations & beamships so as not to influence Earth humans; if their radiations were freely released among Earth humans they would "straighten themselves according to us"

"Radiations" - such as sympathy & antipathy, "pro & con"

"Lessons of truth" - effects upon those who receive the lesson; a voluntary relatedness to the lesson giver & their location is generated inside the receiver

"Negative or untruthful lessons" - no connection is generated because the lesson is based on coercion; similar happens with fanatical beliefs

Meier forced to kill his dog - the dog killed 2 chickens & Meier saw "a strange yellow fire reflecting like a will-o'-the-wisp in his eyes"; the dog wasn't sick but suffering from periodic confusions causing a desire to kill

Meier - was attacked by a tiger in eastern India (1960s)
"you have listened to your subconscious and treated according to its dictates, which doing was all right, which yet you were not able to reason out for you reflected too much on feelings over these matters" - Semjase

Meier asks Semjase if he can try receiving the report transmissions with a Remington electric typewriter

"For other human beings of the Earth...chances should be given for that they seize them & become able to learn by recognition of themselves" -Semjase

"the otherones have to learn to learn" -Semjase

Asina & the Cygnians - staying with their ship at the Plejaren station; while on a 4-year journey their ship's interplanetary drive (and radio device) had been destroyed by an explosion causing them to drift in space for 2+ years in hibernation/deep-sleep in water chambers, awoken by robots when they drifted towards Earth; Cygnians have old-fashioned technology given to them less than 4,000 years ago, which they are unable to

repair themselves; ship to be repaired by the Pleiadians/Plejaren and returned to the Cygnian home world

Science Fiction writers - "they are writing by inspirational manner"

Meier asks Semjase if she will transmit as a report the short talk with Asina as well as obtain a picture of her Asina had kissed Meier and Semjase on the cheek - the normal manner of greeting among Cygnians

Semjase's accident - Ptaah traveled to the DAL Universe to seek help from Asket's people who could not help, so she turned to a higher race, the Soneans; Sonean scientists travel to Erra to operate on Semjase, removing

Artificial protoplasmic brain tissue needs 3-4 years to fully incorporate itself

The brain of each life form is the seat & steering center, needing a special energy supply which now comes from the "cosmic-electrical energy of life"

Soneans - human race of the DAL Universe; average age is 2,360 years; average height is 175 centimeters; head-length/size is 50% more than Earth humans; their race is called "Sona"; developed 4000 years beyond the Pleiadians/Plejaren

Timars - name of Asket's people/race; helped the Pleiadians/Plejaren to attain the development level of the Soneans

DERN Universe - name given our universe by the Timars of the DAL Universe; Pleiadians/Plejaren just call it "Our Universe"

Why Pleiadians/Plejaren don't maintain contacts with Earth humans physically - explained in detail;
"oscillations of the Earth human reach up to 90 meters"; Pleiadians/Plejaren developed 3,500 years beyond Earth humans; Pleiadians/Plejaren use an instrument to protect them from negative oscillations when walking among Earth humans; Meier does not emit these negative oscillations

Pleiadians/Plejaren live "dimensionally-shifted" "inside a parallel system of the Pleiades"; that dimension explained
