This is an Ufo.Unfiltered and just zoomed in on. It travels from left to right and is measured by CIA supercomputers.They found the beam of light to be 8 feet wide as it leaves the ship.

This is the ufo at the right. It is filtered,meaning the original image has been changed by using : contrast, sharpness,brightness,tint etc.At the left is the mercury light, seperated by the steel building edges.

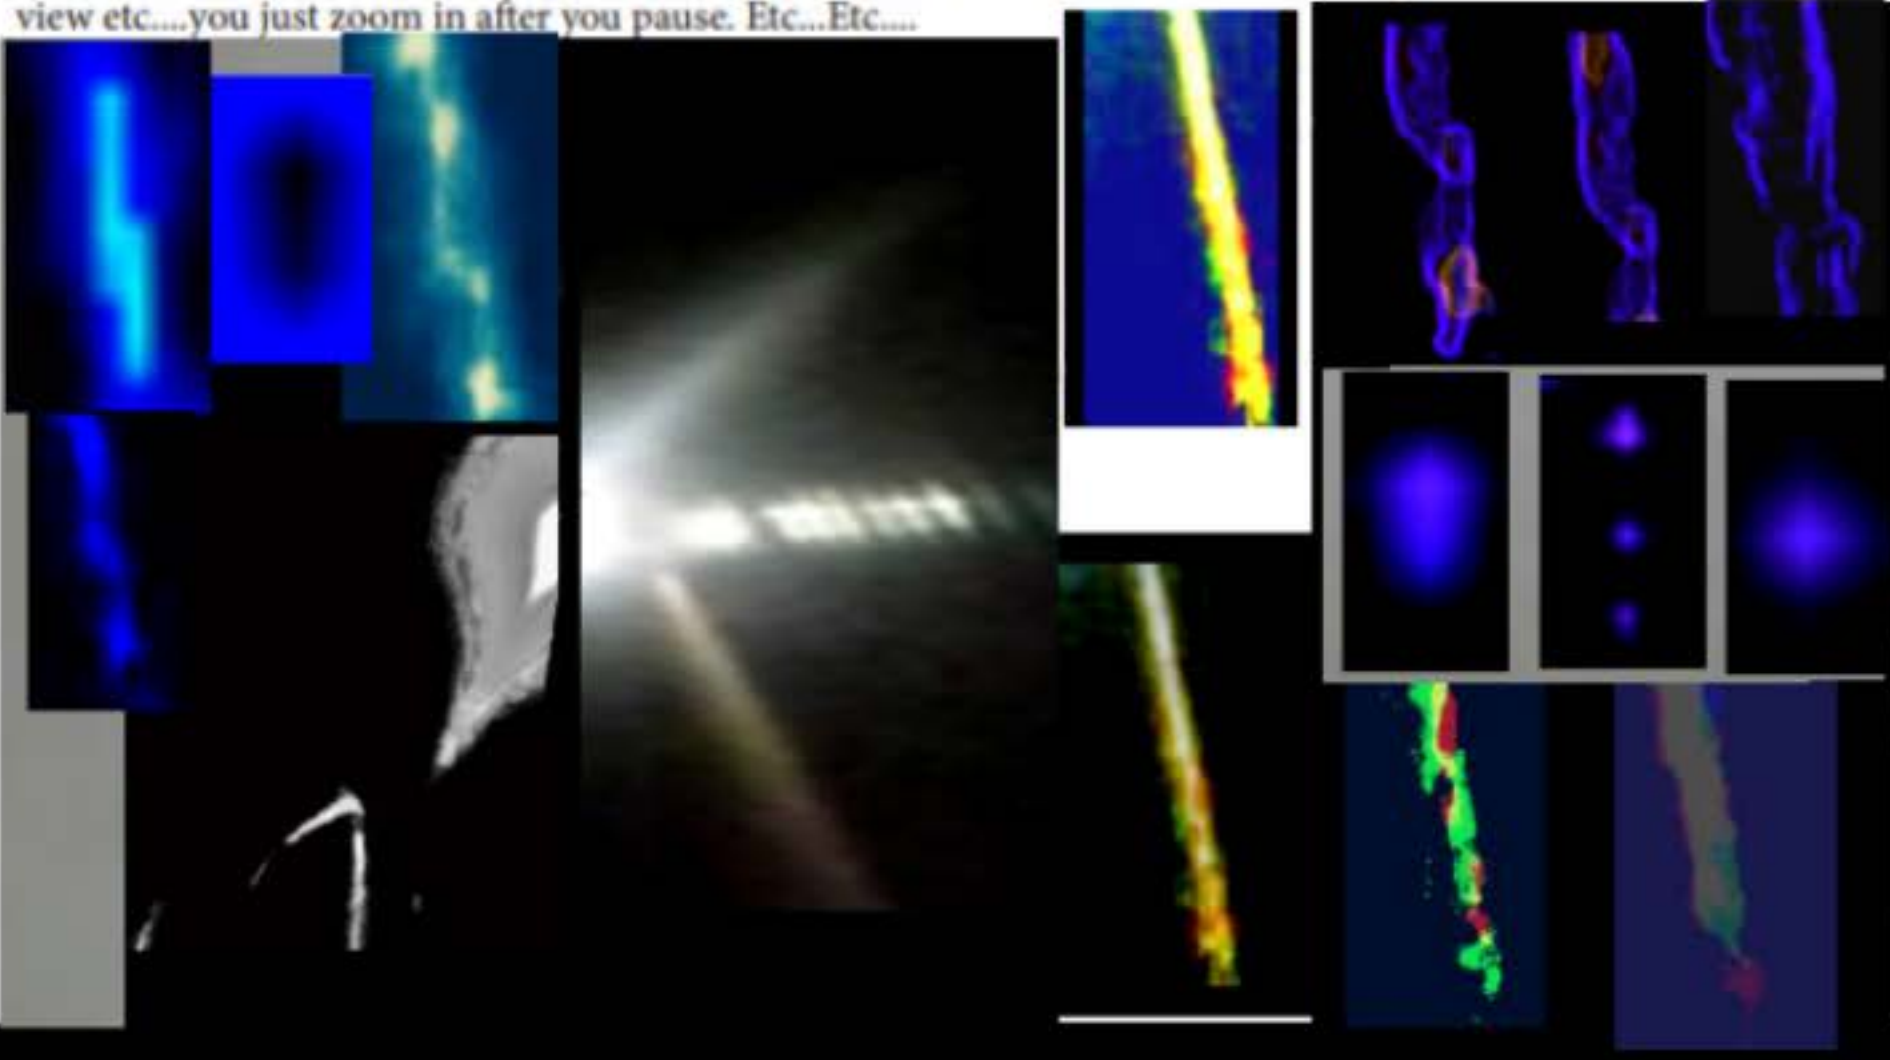

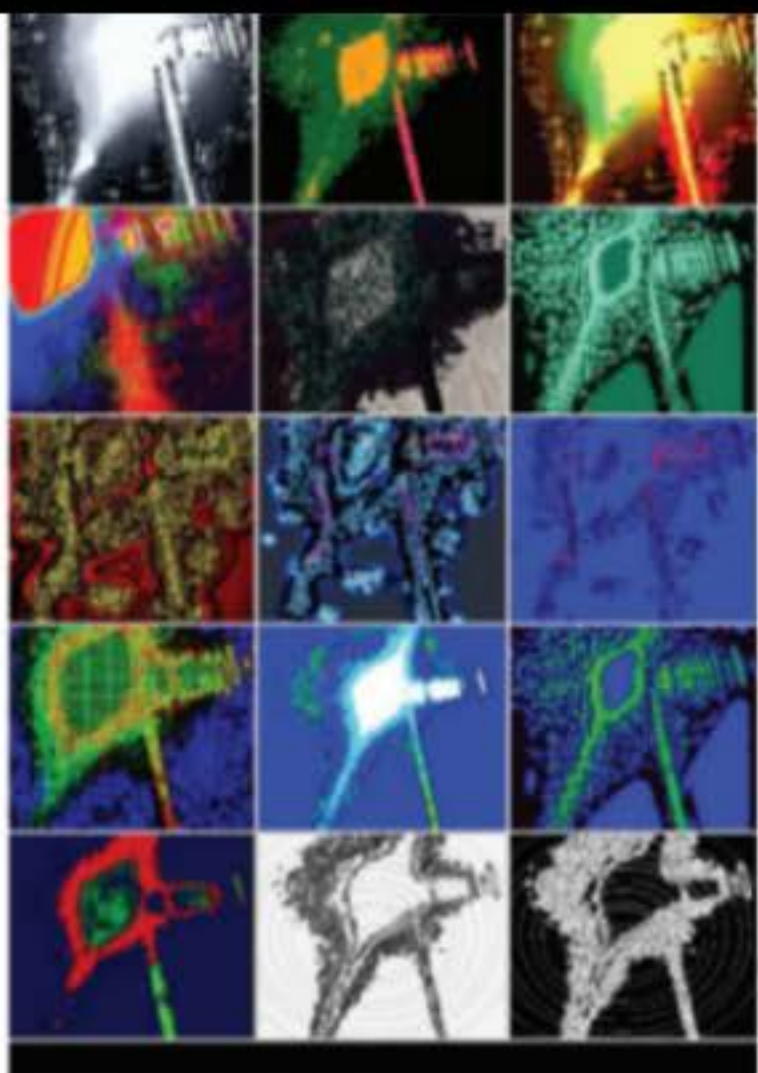

The mercury light ,(security light), hangs on to the steel building in 2016.The ufo flew over this area while looking like the security light.

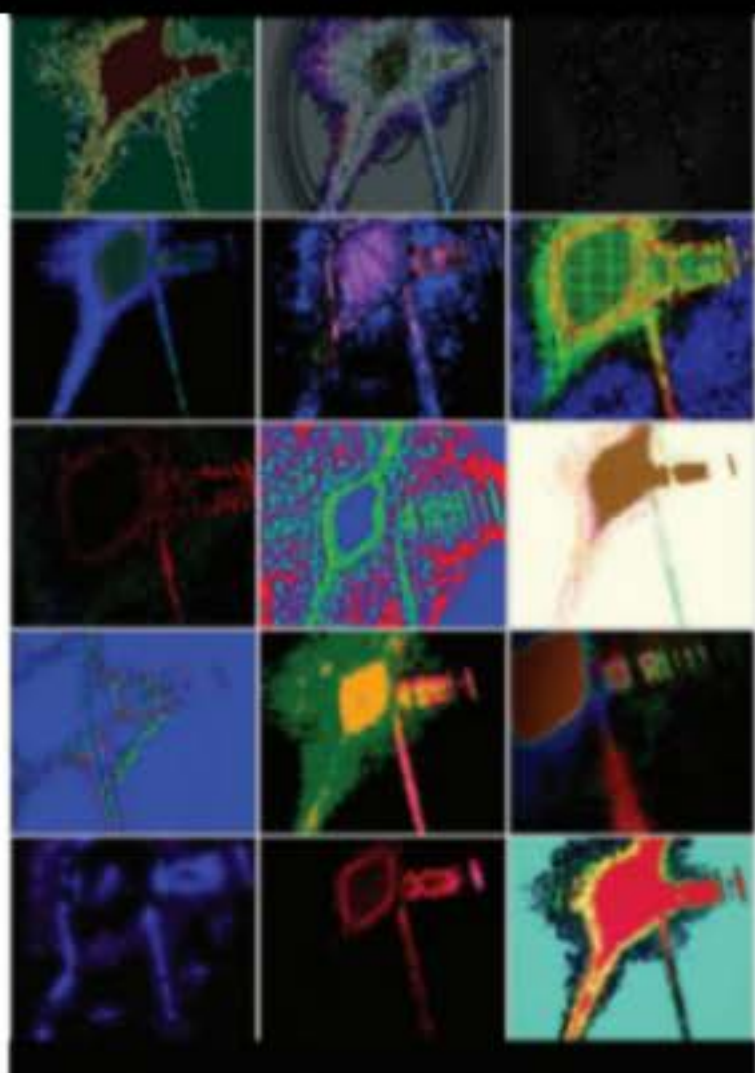

This shows the ufo,on the right, in an unfiltered image.The lower left corner has the mercury light,shining.

Reported to Peter Davenport. Stepped outside. Saw chopper or jet low approaching in south east. Looked west, saw in south west (Venus or low hanging star or chopper or jet, later to be the Starship UFO—my term...) just a spark. No FAA lights, low slowly approaching my grounds. Ran inside. Got smart phone. Waited a couple mins it seemed for it to get in video range. Jet and UFO were gonna hit, collide yet passed one over the other about 1/4 mile away over land to the north west, blink blink .in white specks, was the jet on my vid screen. Object in question was black or invisible on view screen. Aiming to anticipate it's route, I aimed at the building peak, the object 'passed' it. My camera eye was new to me .mostly, and is off center from my familiarity with camera phones. Mercury light is about the size of a medicine ball and is up about 25-27 feet on the steel buildings side. Peak is about 3 feet higher than mere light. Peak is about 5 paces out from standing video location. ..running west to east for example(the peak). Craft was silent. About 1,000 feet off the ground. Speed about 30 mph. Never altered appearance yet traveled. Looked like icicles sticking out like quills (3-4 total). Blinked at it yet, no alteration. Focusing "to it" was painfully difficult and tough. In video I felt awkward I might be preparing to film a chopper or flare/ fire work etc... I stated "Naw, I don't have the resolution...however...it's a weird one...this is really not good...it won't come in !" (Pan down to end video in frustration — mercury light again in left corner....) Roof appears bronzy in color., beam from ship exits on an angle, and, at my vicinity - and is brownish tan as it traveled low slow and clear on video. I "let it go", when video was a "fail" etc...and "allowed it to travel off" without further pursuit, going north east (rising sun side) in its straight line path....Soon after I called 911.2 Sheriffs deputies, 2 cars...2 mins later...during report, I showed the officer a bright light leaving our planet I said "do you see that!" He said "I see it ."....I said "do you got that!?" He said,"I got it." And we watched for about 5-7 seconds this Venus sized object (as seen from Earth with the unaided eye, like a star....) go away from us, clearly, at about 95,000 feet or whatever is high .high in altitude, near space gravity...at an arms length .traveling the distance of an open hand— in six seconds about— at about a degree, to due north on the sighting location, of 86 going to 87 straight path, then "bam"lights out, like somebody threw a bucket of cold water on it....or it went into the belly of the mother ship....or it hit a worm hole or something it just- bam was out. Gone. We both said "Woah! officer said I never seen anything like that before" Other officer stepped out ."what was that ?!" I said, "saw another UFO ." Now I reported to Nat.UFO rep.ctr in Sept time ...he, Pete, got back after some serious phone tag. Lol. To tell me "we don't investigate"...! said "do I try collage labs ?!" He said ,"yea !"....That was Jan-Feb...Big ol waste a time right...got a little "traction" with US Air Force (former) and THIER friends with a super computer ...They found in FebThe beam is REFRACTING, repeat REFRACTING....not that I said reflecting ...ok....it is 5 (five) feet wide ,ok,in width as it exits the craft in question...ok they said it is not a dowel or doweling it isn't even a post or wood or steel or a stadium light or street light etc....It is probably plasma or a tractor beam etcyet, it is 30(thirty) feet wide or in width at some point down away from the ship. The entire craft .light and all, is in full video view etc....you just zoom in after you pause. Etc...Etc....

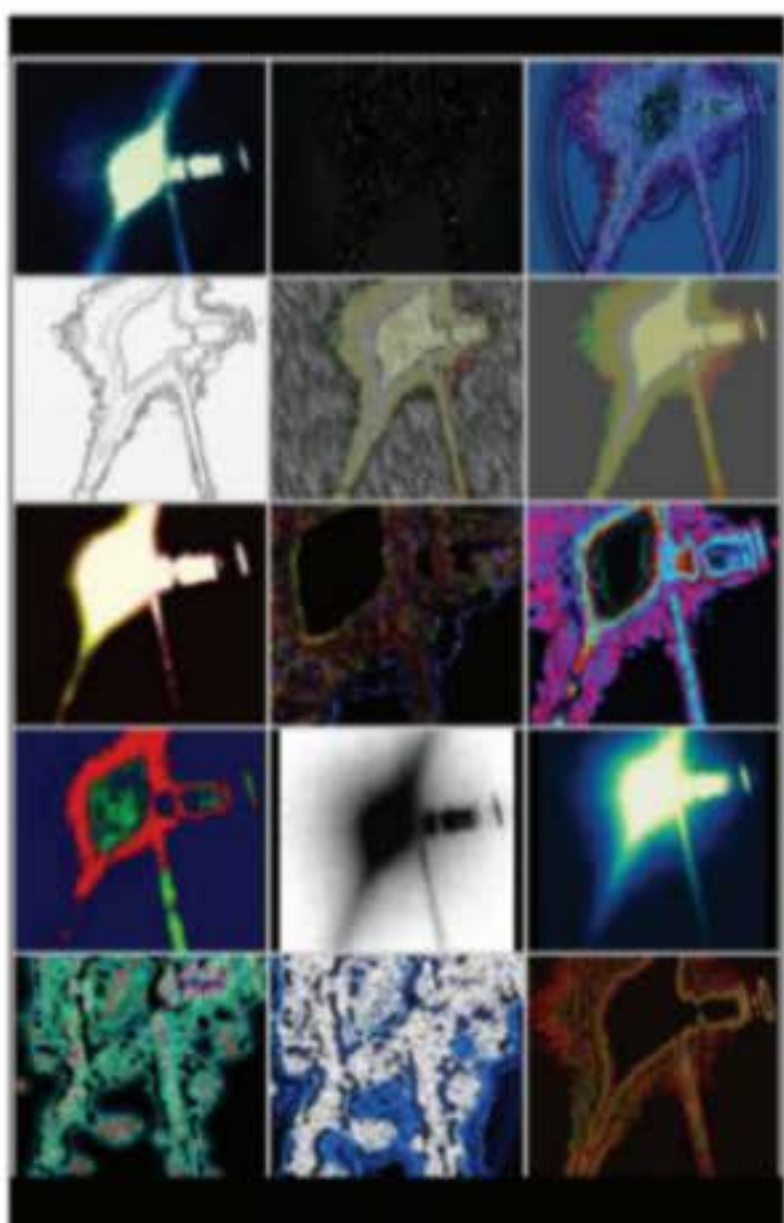

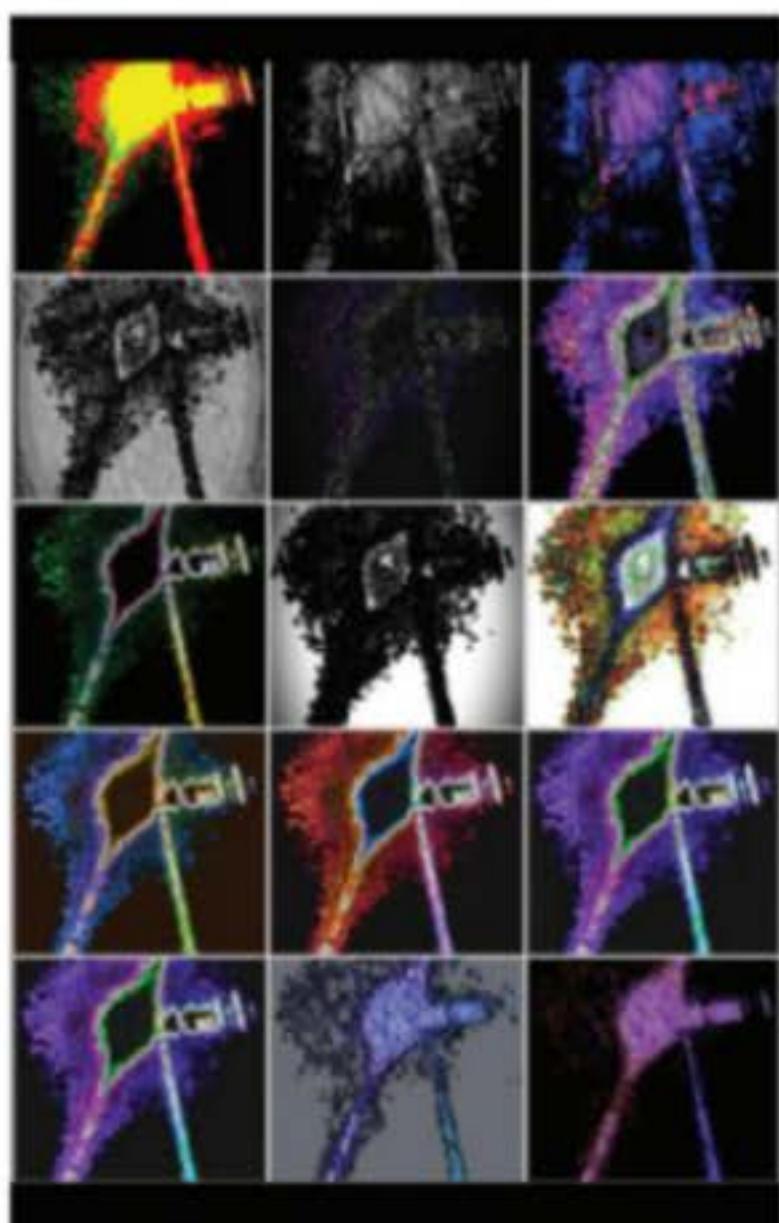

This is the ufo,under filter,so now you can see what the alien-made light doesn't normally allow you to see.

The filters can show the ufo looking like a watercoloring--without the paint.The ufo,un-derfilter,can look like it's from a different era,the 50's or 60's.

The ufo can look like it is under a X-Ray scan,with that one being done by MUFON ,known as The Mutual UFO Network.Formed decades ago,MU-FON knows---thier ufo's.Watch!

The use of filters like gothic,cartoon or pop ---you get these and other images of the real ufo.

Hi Mike,

Recently you have filled three reports to MUFON. Your case has been assigned to me by MUFON's State Director.

I have reviewed your video 10 times, pausing and looking at different positions and time but I do not see any objects.

See my attachment, I have grided off a snapshot at the 7 sec mark, I have overlayed an example of what I need. (Note; Street lamp is at Grid-F8, Example path defined by First seen at 7sec-Pt1-Grid A3, Last seen at 21sec-Pt2-Grid D10)

Please provide the following information:

- A. Object First seen at __sec-Pt1-Grid?
- B. Object Last seen at __sec-Pt2-Grid?
- C. How long after sunset was the event?
- D. What is your street address? (needed for credibility assessment)
- E. Provide copy of police report.
- F. Provide copyright documentation.
- G. Provide copy of photos you reference.
- H. Provide documentation of your Air Force contact and results provided.

Thank you

Daniel J Snow

Hi Mike,

Recently you have filled three reports to MUFON . Your case has been assigned to me by MUFON's State Director.

Upon review of your photos attached to the third submission, these are shots of the street lamp, where is the object you saw?

I have reviewed your video 10 times, pausing and looking at different positions and time but I do not see any objects.

See my attachment, I have grided off a snapshot at the 7 sec mark, I have overlayed an example of what I need.

What I need.

(Note; Street lamp is at Grid-F8, Example path defined by First seen at 7sec-Pt1-Grid A3, Last seen at 21sec-Pt2-Grid D10)

Please provide the following information:

- A: Object First seen at __sec-Pt1-Grid __?
- B. Object Last seen at __sec-Pt2-Grid __?
- C. How long after sunset was the event?
- D. What is your street address? (needed for credibility assessment)
- E. Provide copy of police report.
- F. Provide copyright documentation.
- G. Provide copy of photos you reference.
- H. Provide documentation of your Air Force contact and results provided.

Thank you,

Daniel J Snow

SUPPLEMENT 2 (Supplement 2)

Reporting Officer: WOODWYK, TROY, ANTHONY

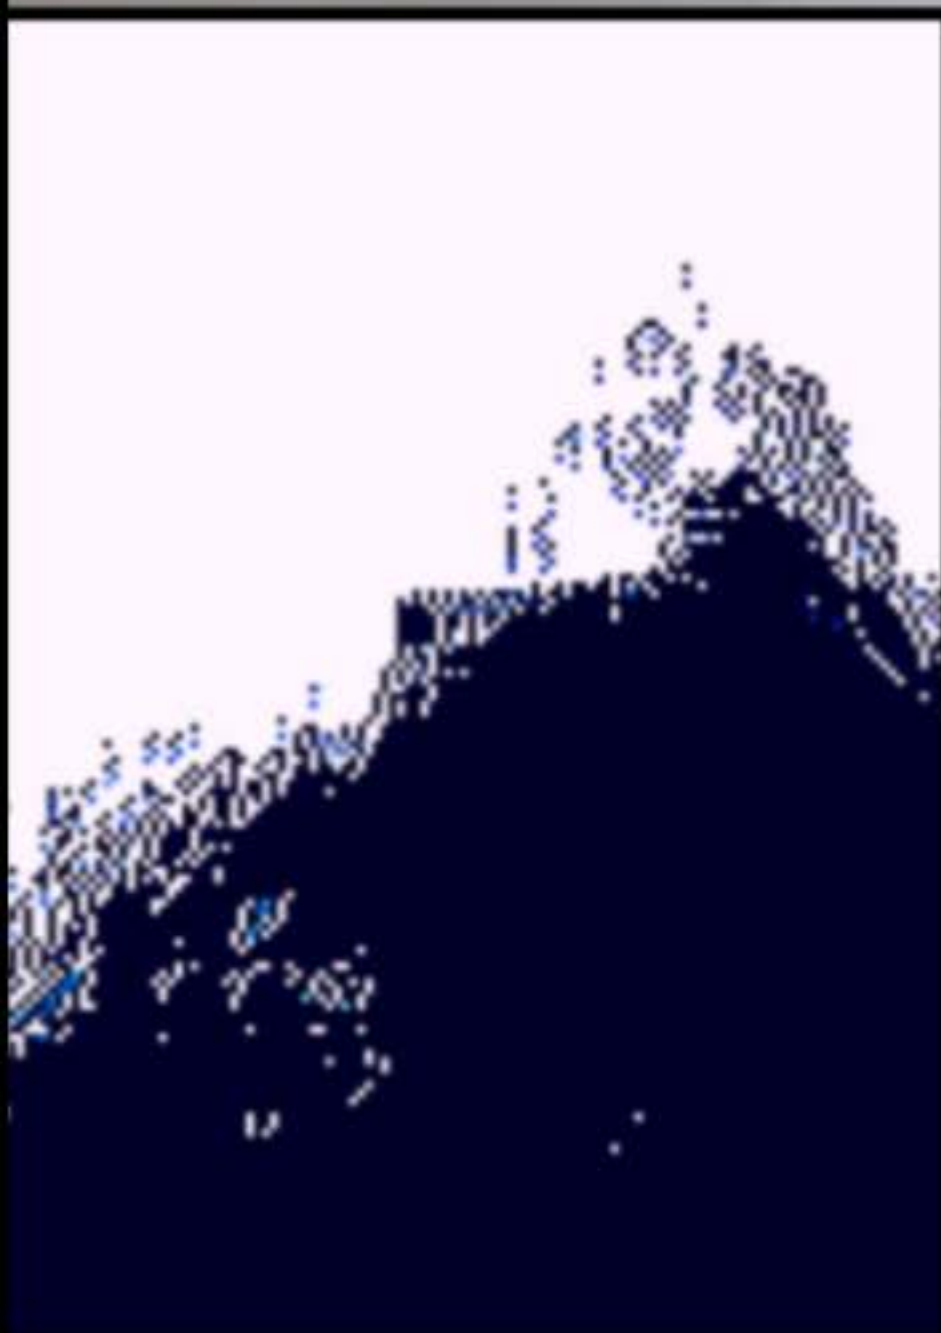

08/15/14

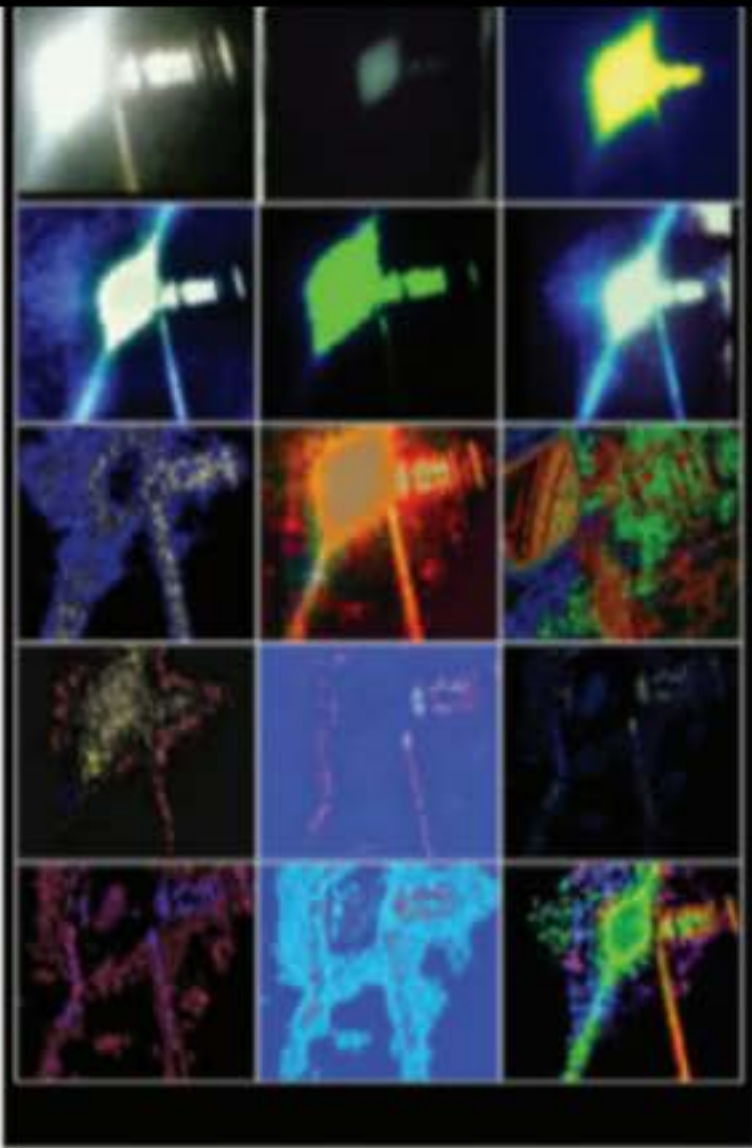

Recall Information:

Mike Brown called dispatch to provide additional information reference to an unidentified flying object that he captured on video using his cell phone. He stated he was standing in front of [redacted] on Thursday, August 6 but didn't realize he had audio when he first reported this to the original officer. Mike showed me a video of a bright light in the sky. It appeared to me to be an elevated light from a street light pole in the area. The video was approximately 20 seconds in length and only showed the light. He described seeing this light moving across the sky about 8000 feet high. He wanted to show the original officer his video.

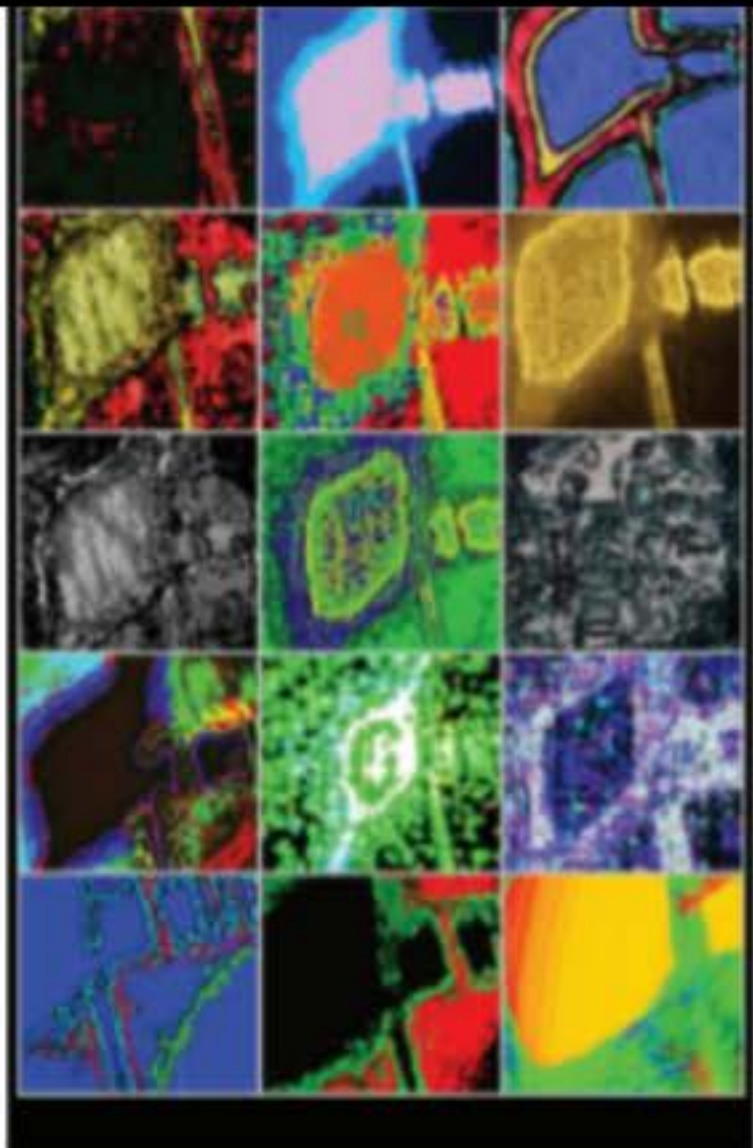

Status:

All of these are filtered images of the real ufo.

The ufo can appear to have a letter or look like steam punk.

These ufo's have the first true glimpses or little alien figures. Remember, the beam of light is 8 feet wide, at the start, and the craft is the size of a football field! - Do you see the Superman ufo or the steampunk one? How about the green or purple alien one. The ufo is real.

The golden ufo is seen. A filtering of the real ufo, - looking like it has a blanket of stars, to it. Disco ufo etc...

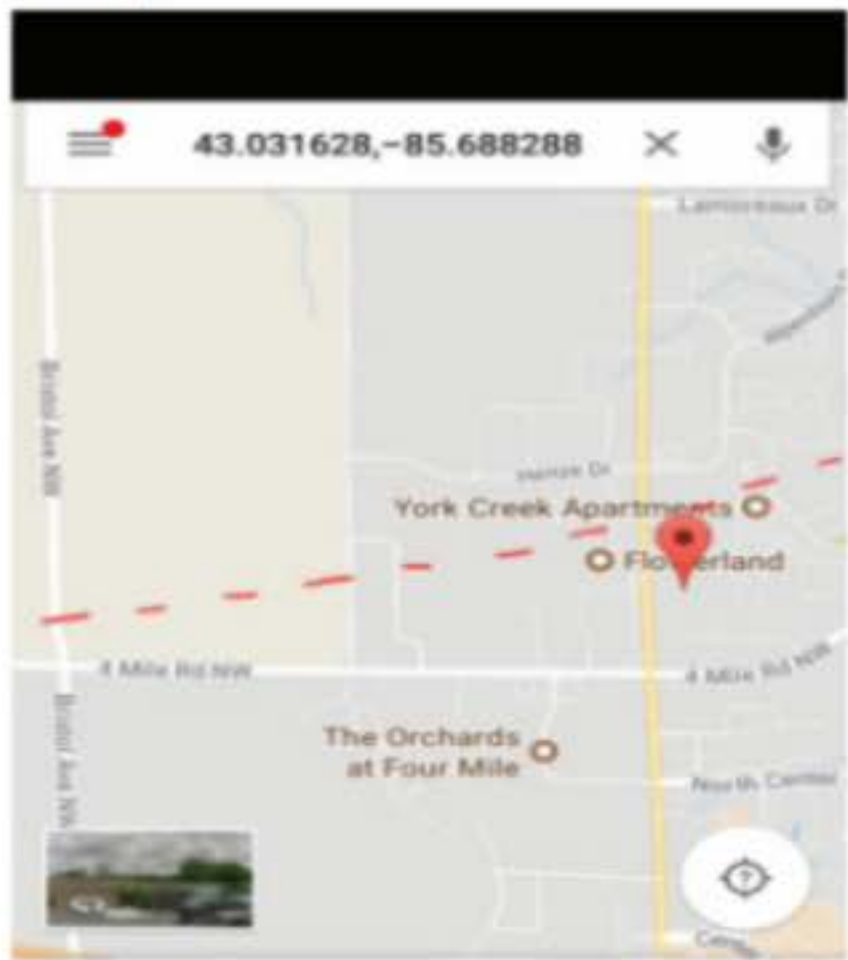

In the first picture, you see the ufo---unfiltered and zoomed in on. The next shows the ufo and the mercury light in the same picture, unfiltered. The picture at the lower left shows a filtered image of the real ufo and mercury light, in 2014. The last photo shows the mercury or security light from 2016.

The white arrow points to the real ufo. The blue points to the mercury light. The purple points to the steel buildings southwest outside corner. The yellow points to the steel buildings' west facing roof edge. Green points to "burning titanium" falling from the craft. On this side of the building.

This is a closeup of a filtered image of the real ufo. It appears to be raining from it---burning titanium. A person from MIT and NASA said that this is what it is. Aliens.

Dropped Pin

near 3718 Alpine Ave NW, Comstock Park, MI 49321

This is a drop pin of where everything was that night. The GPS coordinates are right there. The dashes show the path it took. Anything north of this line is basically wilderness to the pole and back. This was at a very high point. Alpine Ave.

Occurred : 8/6/2014 21:03 (Entered as: 08/06/14 21:03)

Reported: 1 /20/2015 1:15:23 PM 13:15

Posted: 1/26/2015

Location: Grand Rapids, MI

Shape: Light

Duration: 6 minutes

The ufo looked like a star. The responding sheriff deputy and I possibly saw the ufo at 90k feet leaving Earth.

On the horizon, in the south west, was a bright light; looking like Venus or a star. This ufo was approaching at about 30 mph. About 1-2 miles out. About 3 football fields up from the ground or a 1,000 feet up from the ground. It almost collided with an outbound jet traveling from the south east and going north west at about the same height. Paths of the jet and ufo crossed, just about overhead, about a 1/4 mile to the north by northwest. The jet can be heard in the video I took.

The ufo would not show up on my smart phone screen as a videoed. Only the blink, blink of the jet showed up on my phone screen as I recorded.

The ufo was recorded when I aimed the camera eye at the peak of a 30 foot building with a mercury light on the side of the building. The mercury light is the size of a beach ball and is seen in the lower left of the video. The mercury light is about 3 feet down from the peak. As the ufo passed in the background of the peak I recorded it. Mike Michigan ufo and I possibly saw the ufo at 90k feet leaving Earth.

It was silent as can be. It never altered its shine.

No FAA (Federal Aviation Administration) lights on the ufo. No strobes. It never so much as flickered. It continued in a straight path going, again, north east at 30 mph. The jet continued on.

((NUFORC Note: We have looked at the photos, provided by the witness, and we do not see anything that seems to us to be unambiguously related to the presence of a UFO. PD))

The ufo was recorded when I aimed the camera eye at the peak of a 30 foot building with a mercury light on the side of the building. MERCURY
LIGHT

↑
UFO

This nonfiltered ufo image has the mercury light at the left. The roof edge divides.

This is the ufo, on a slant, thanks to adjusting the picture settings. There seems to be many parts to this ufo, from the light beam to the fuselage or nose, at the right, leading the way.

This is from 2016. This is the new mercury light they put in, since 2014. This is now called a security light, not an ufo!

This is the light, with nothing around. 2016.

This is the security light, unfiltered, on an angle and looking "good". See the barbed wire.

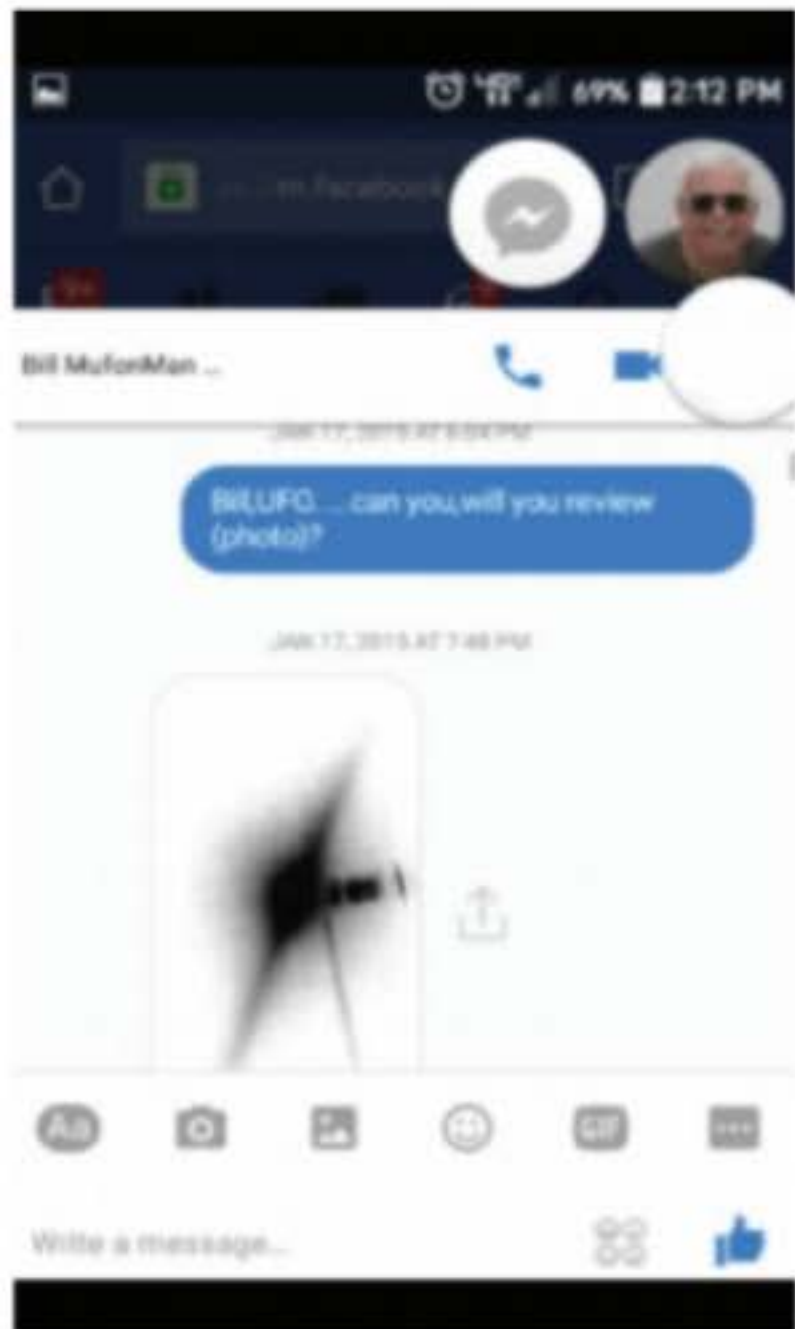

This is finally a filtered image of the security light. The light is the size of a little loaf of bread. A bread-box. The ufo has a light beam that is 8 feet wide and that's just at the start, from the CIA.

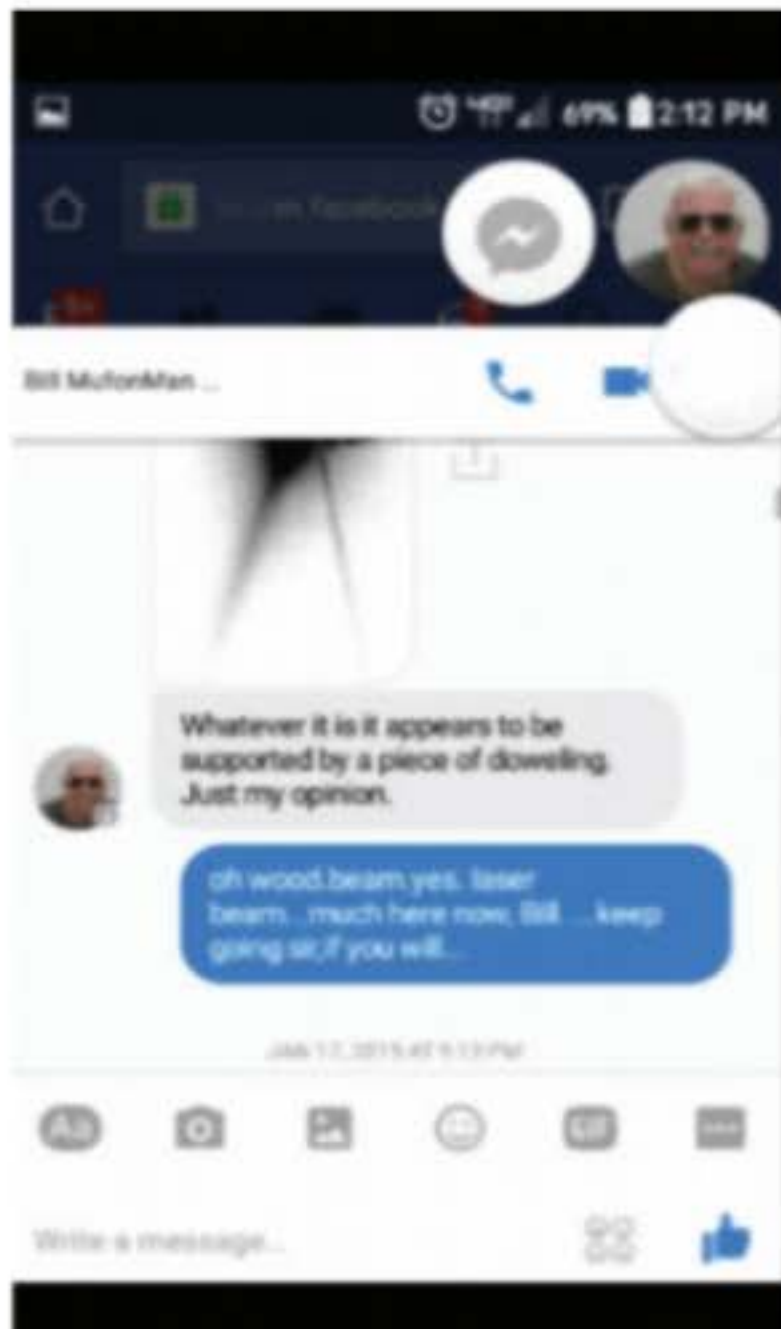

This is the ufo, filtered, traced out.

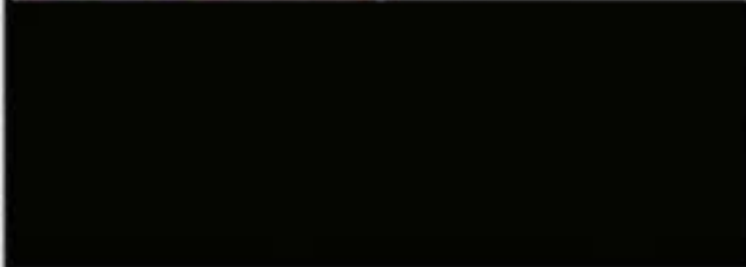

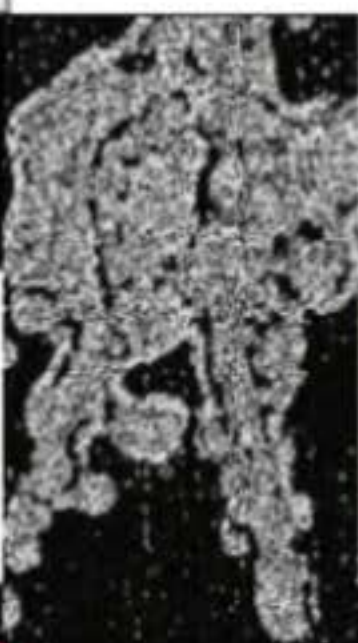

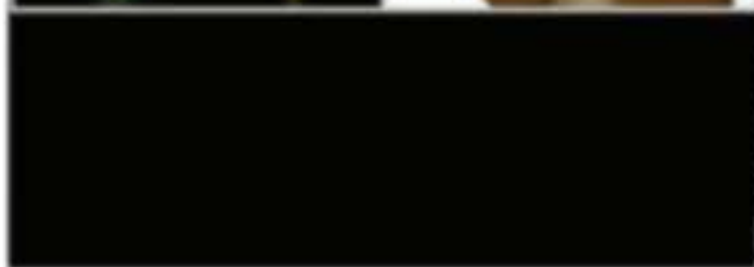

This is the security light, on the steel buildings side. The siding gives the image of an ufo's nose or fuselage.

This was me asking this man ,from MUFON, his help.

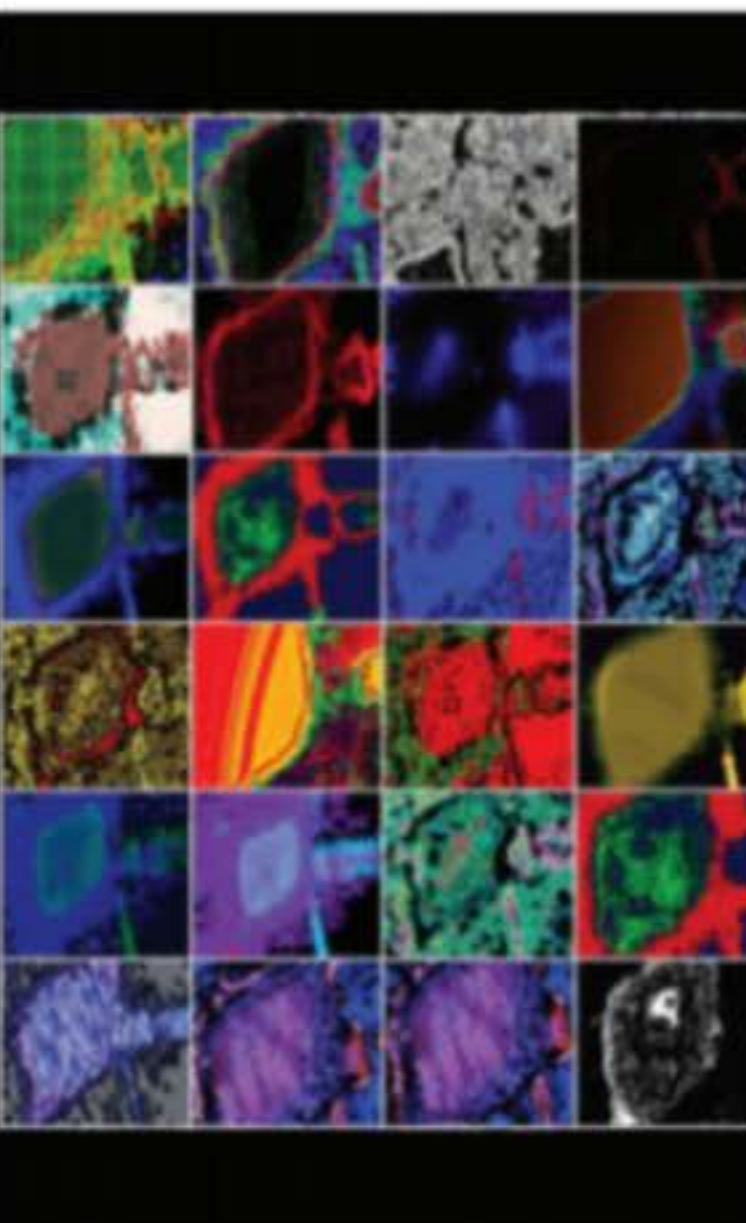

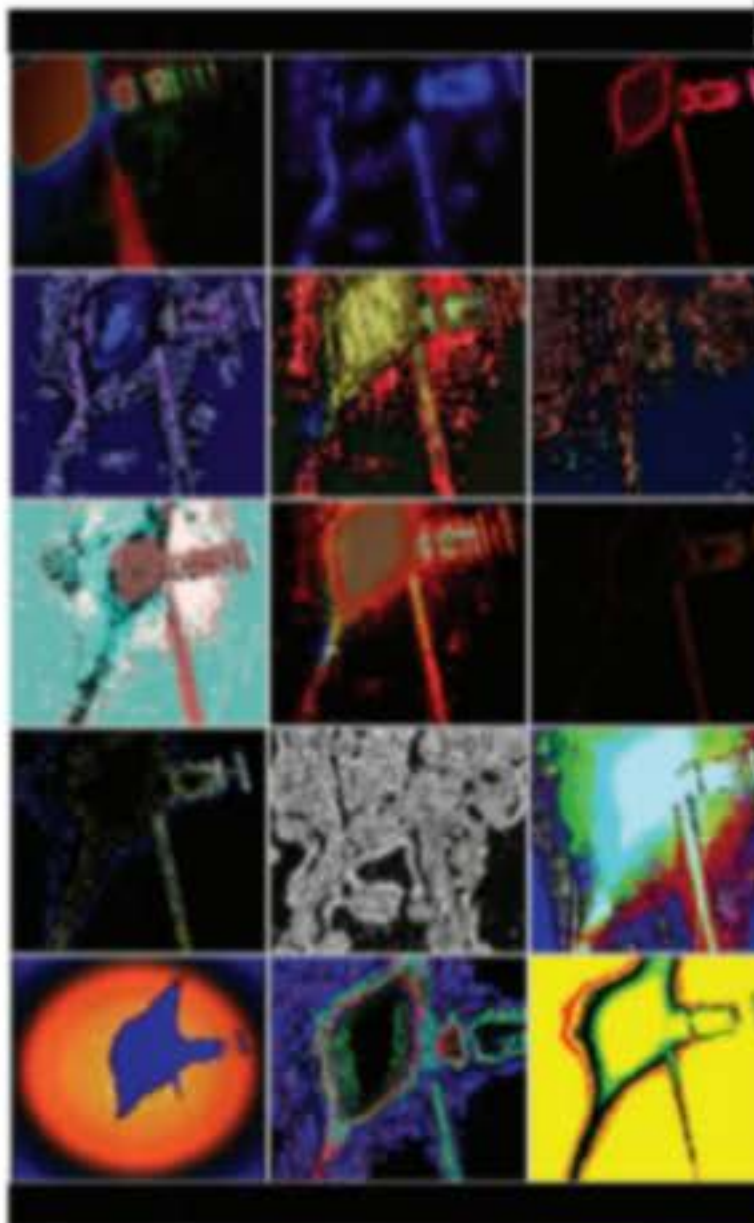

A dowel is basically a bird perch. The beam is 8 feet wide, minimum, and is a light. CIA said, "It is a light!"

This is the ufo nonfiltered. Then, the next picture is my drawing of the ufo in 2016, the new security light is there. The lower picture is the ufo filtered. The last pic is the security light, 2016.

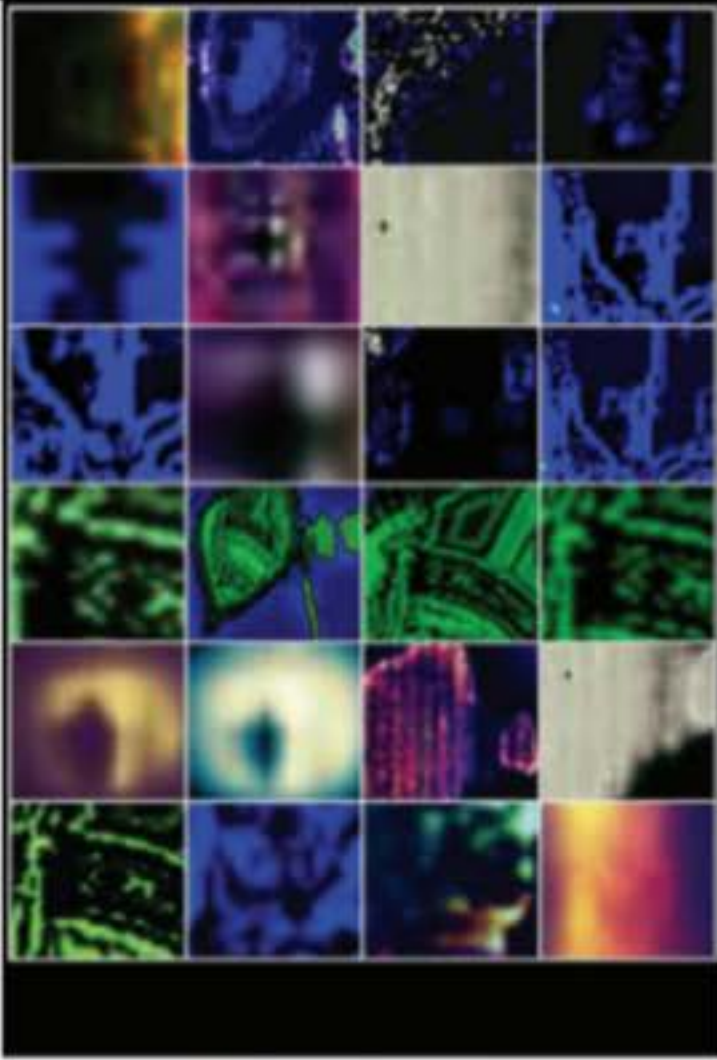

Filtered ufo's across the top. The pink ufo is blurred from moving the camera down and ending the video of the ufo. The lower left picture is a filtered image of the security light. The last picture has the ufo and mercury light, unfiltered.

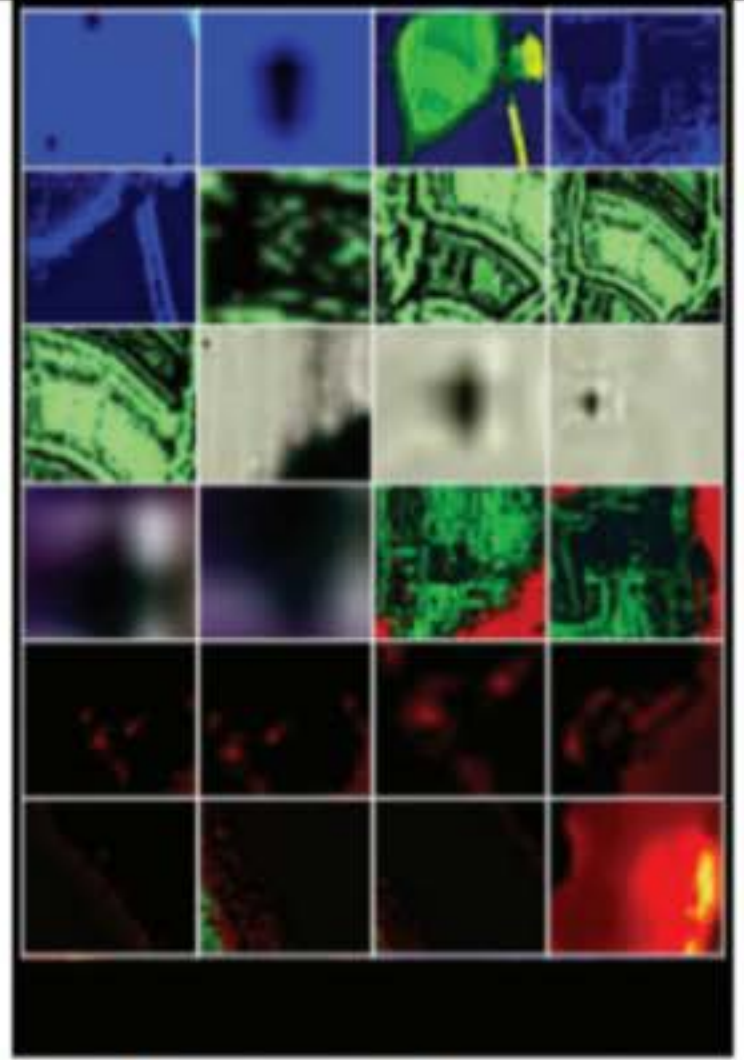

The ufo can look like it passes the sun, yet, these are all filters.

These filtered pics of the ufo are of the main housing area of the ufo.

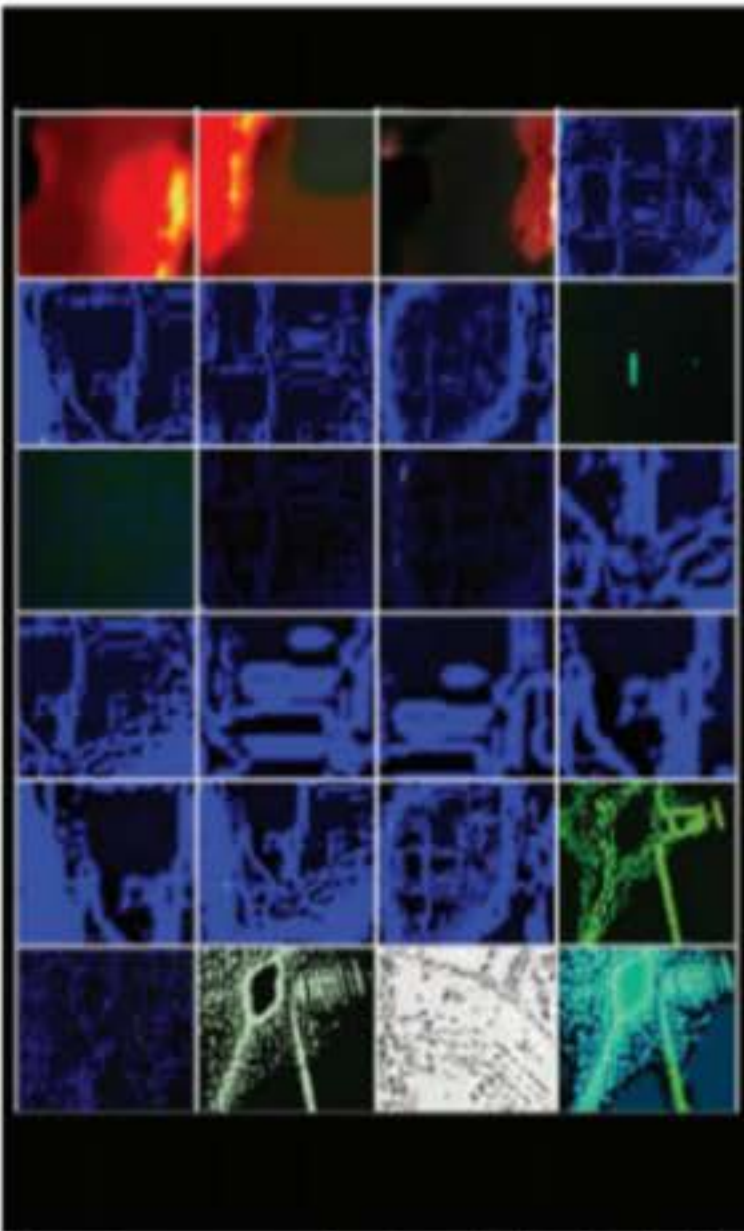

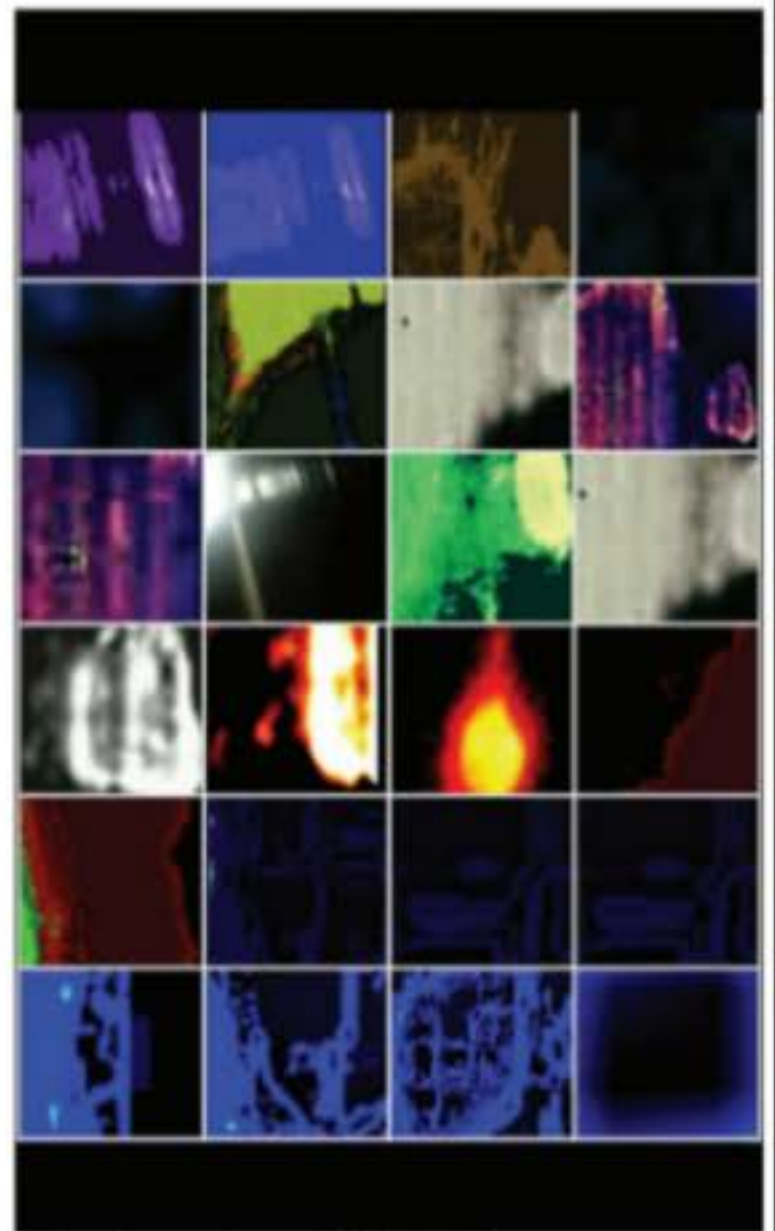

How many aliens are here?

These filtered images show close up , images of the ufo...

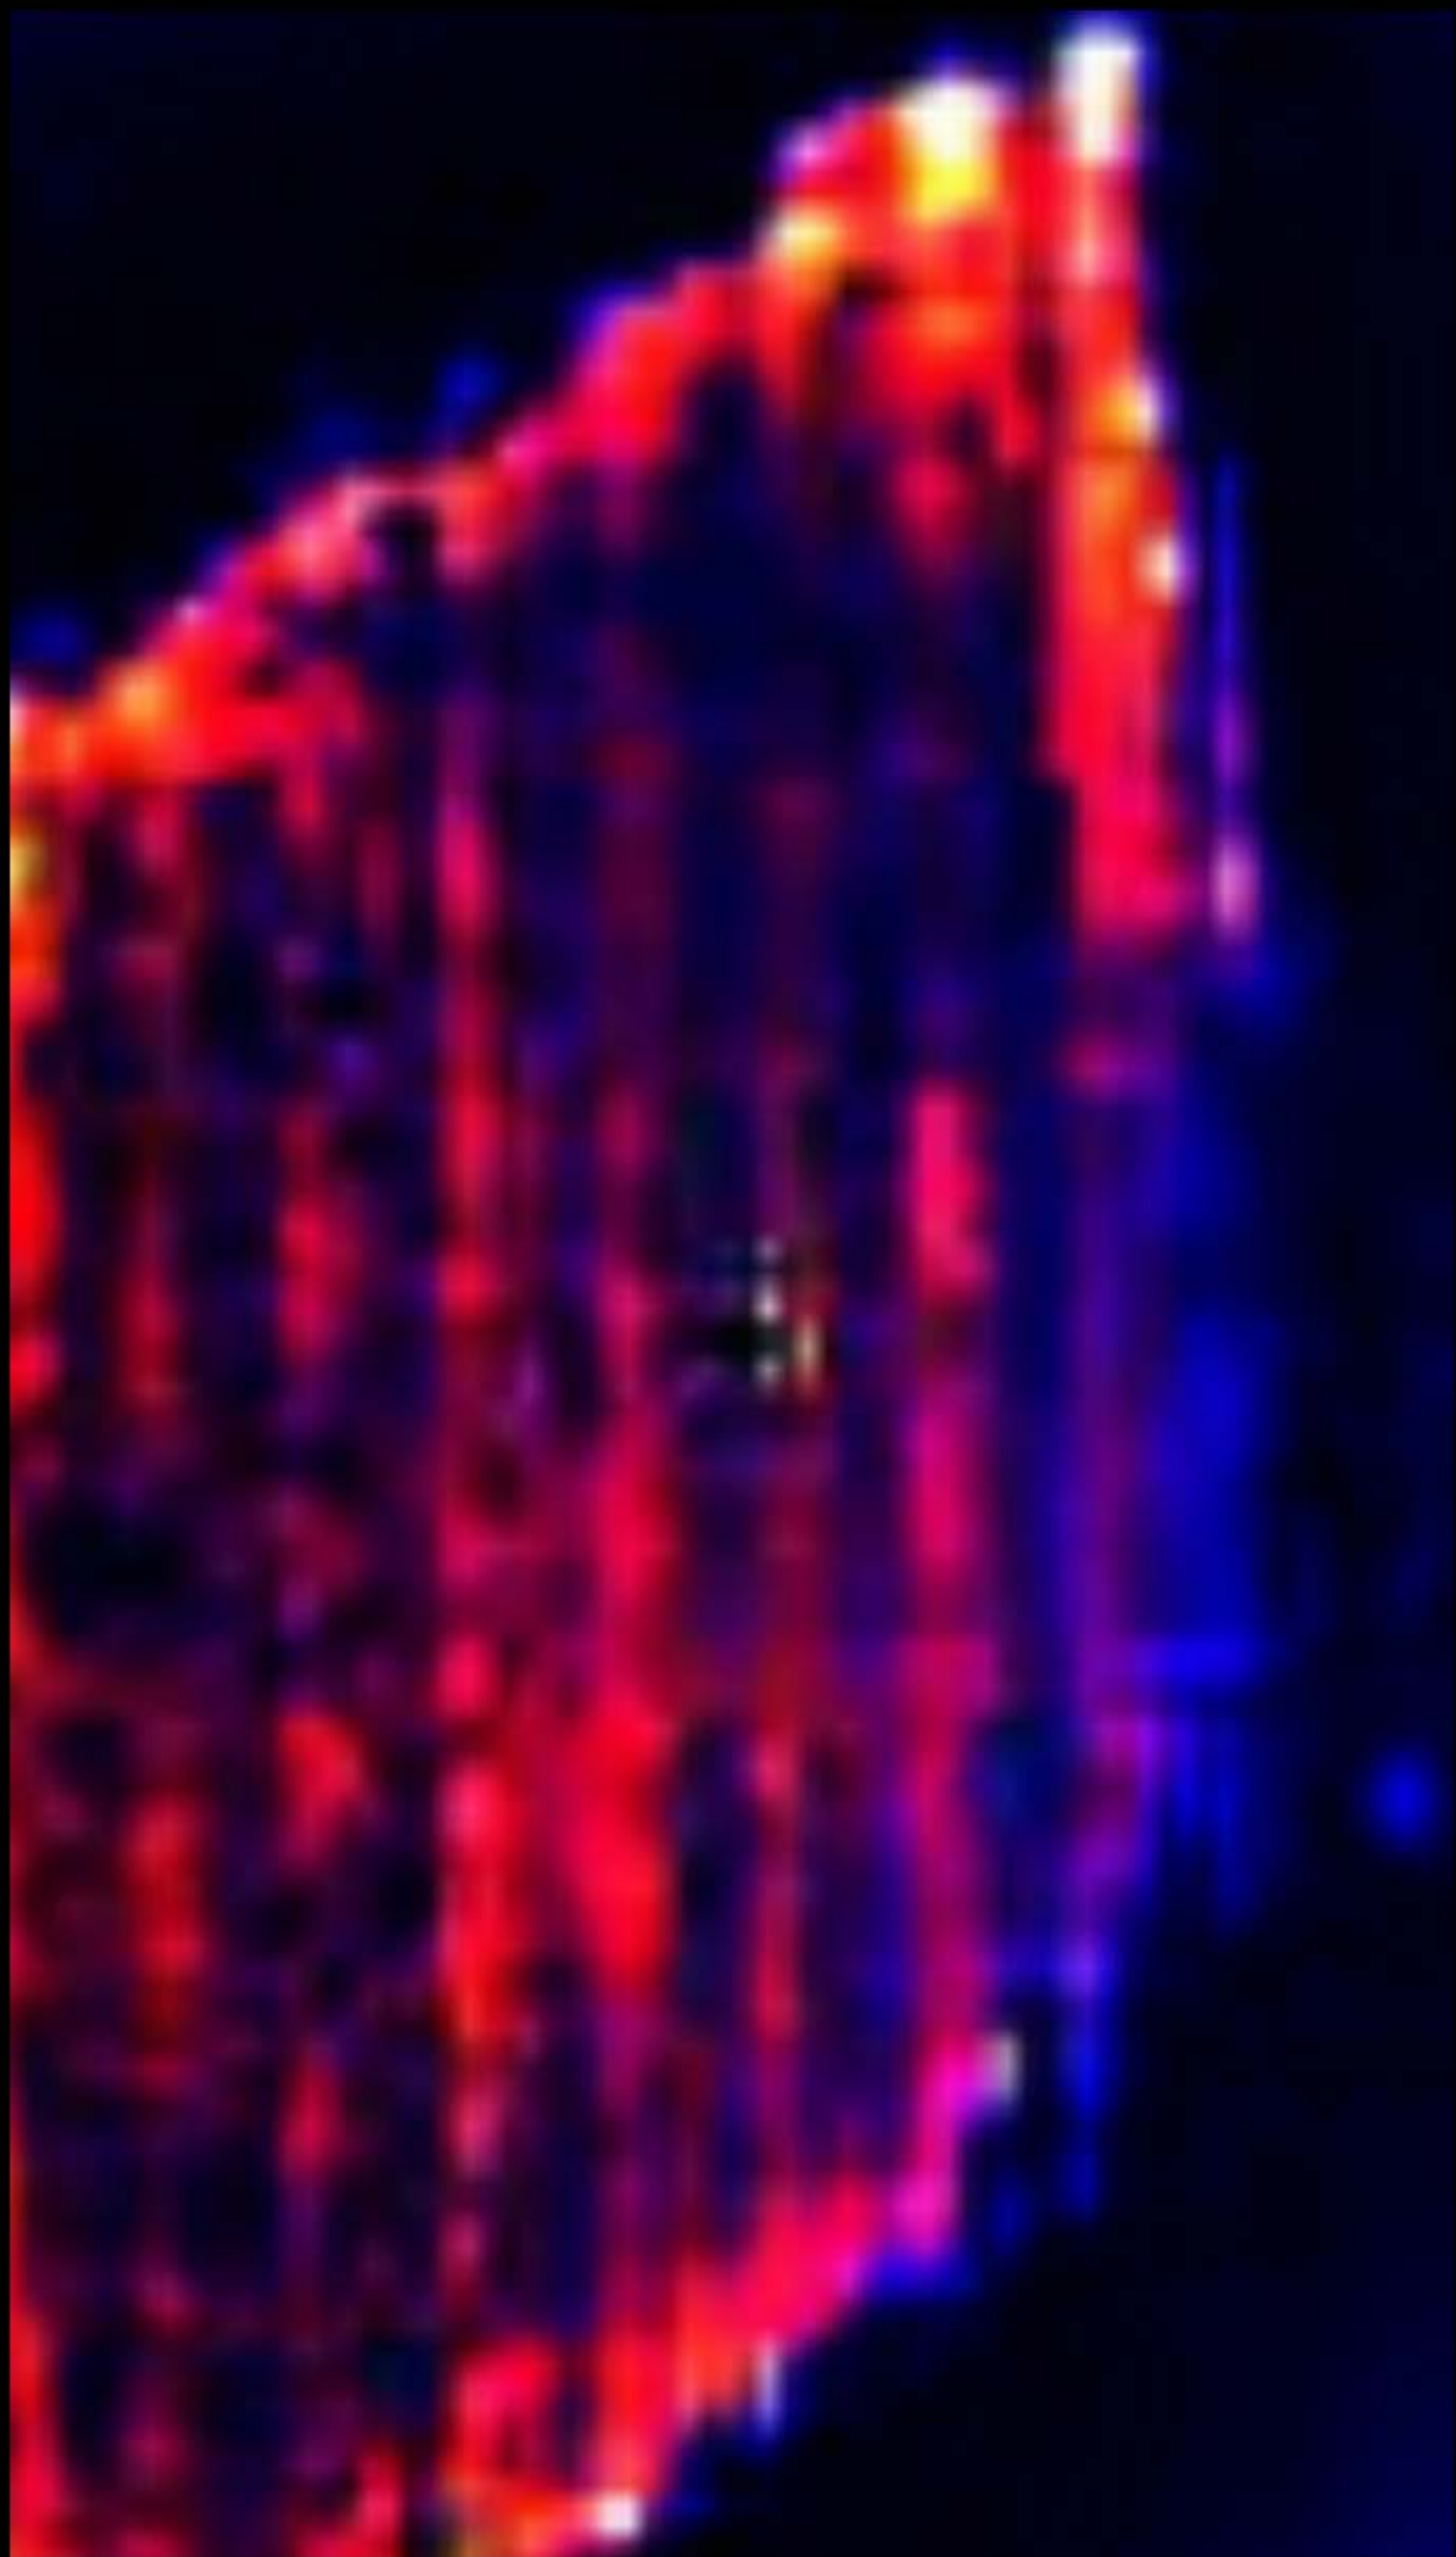

Some images are the size of a basket ball.
Some the size of a city block.

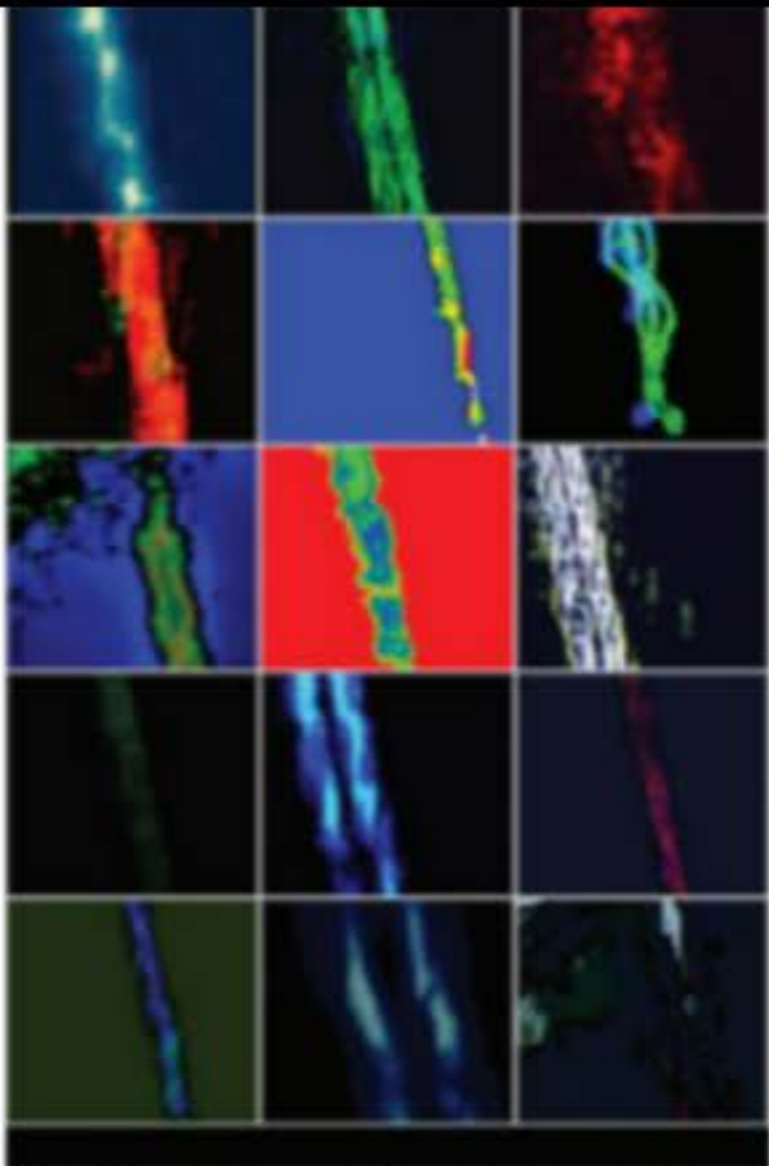

A hodgepodge of ufo stuff.

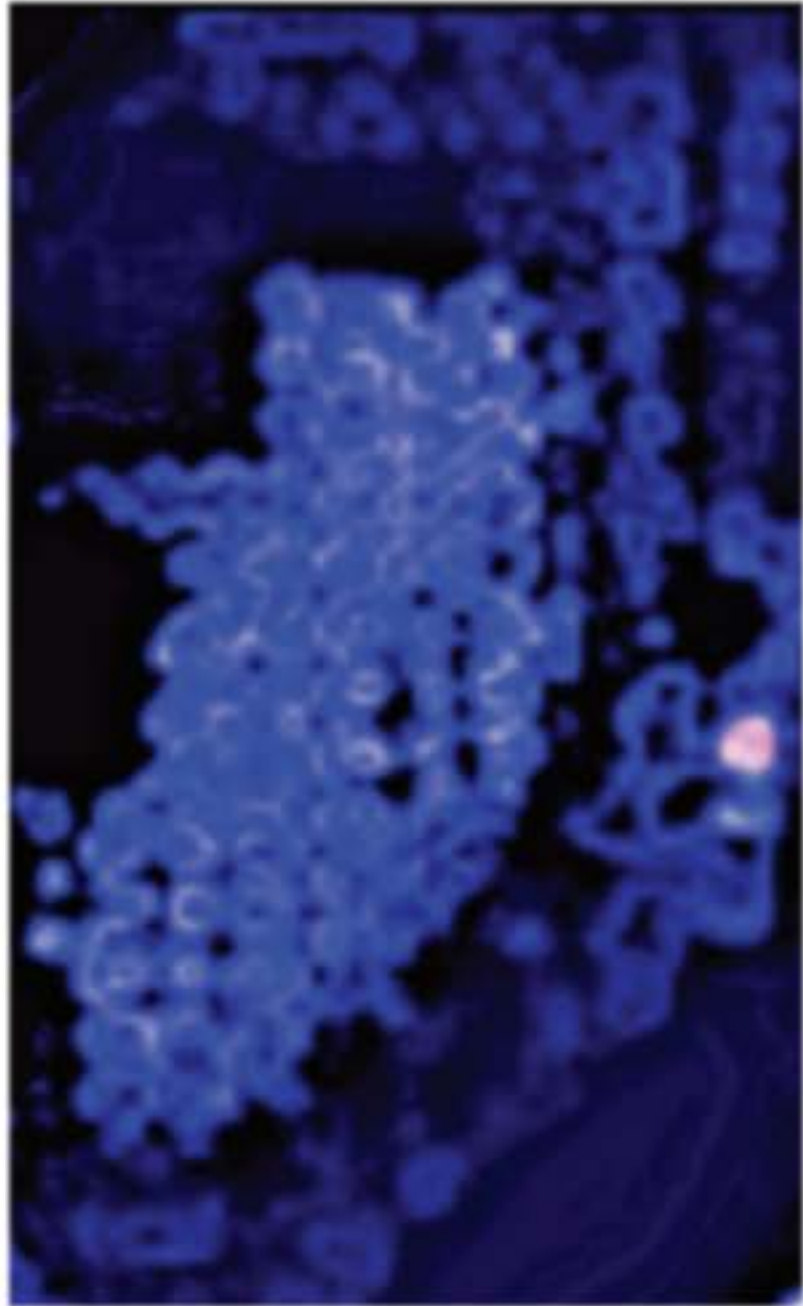

Do you see the alien?

This filtered image is from the heart of the ufo.

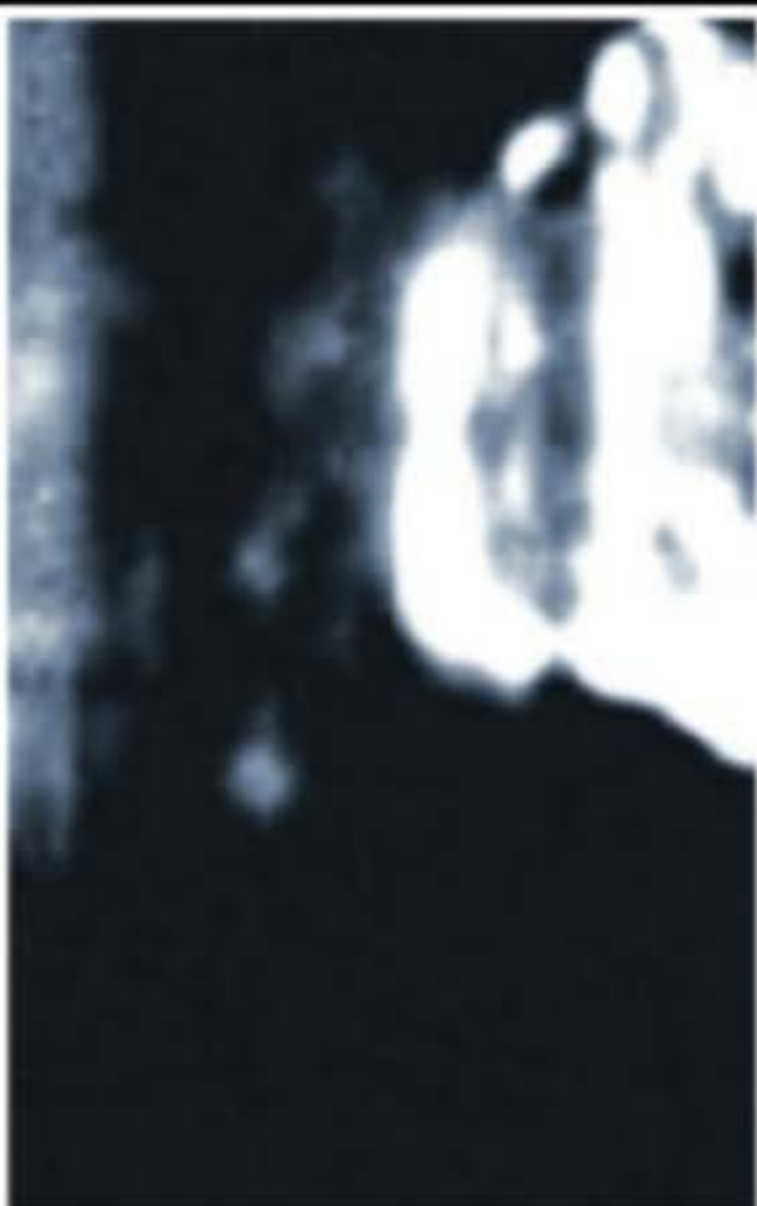

Lasers from the ufo.

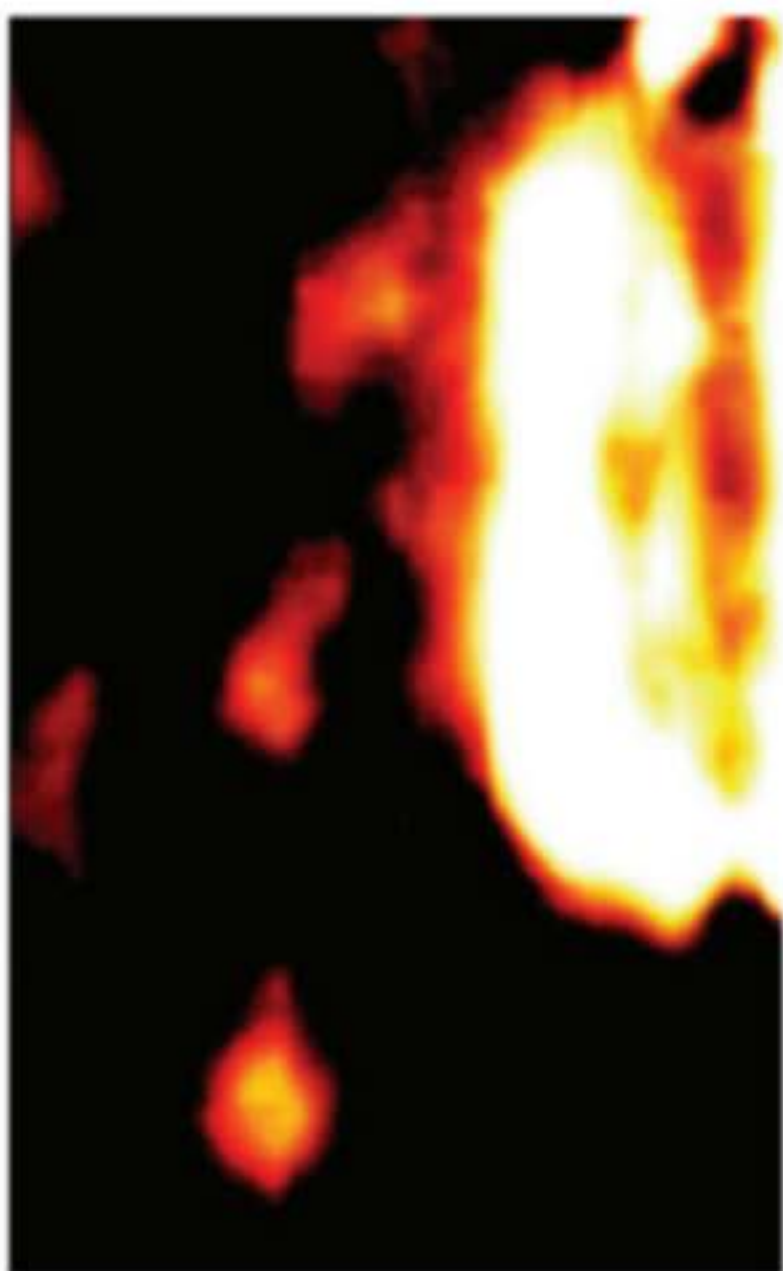

The ship is under intelligent control.

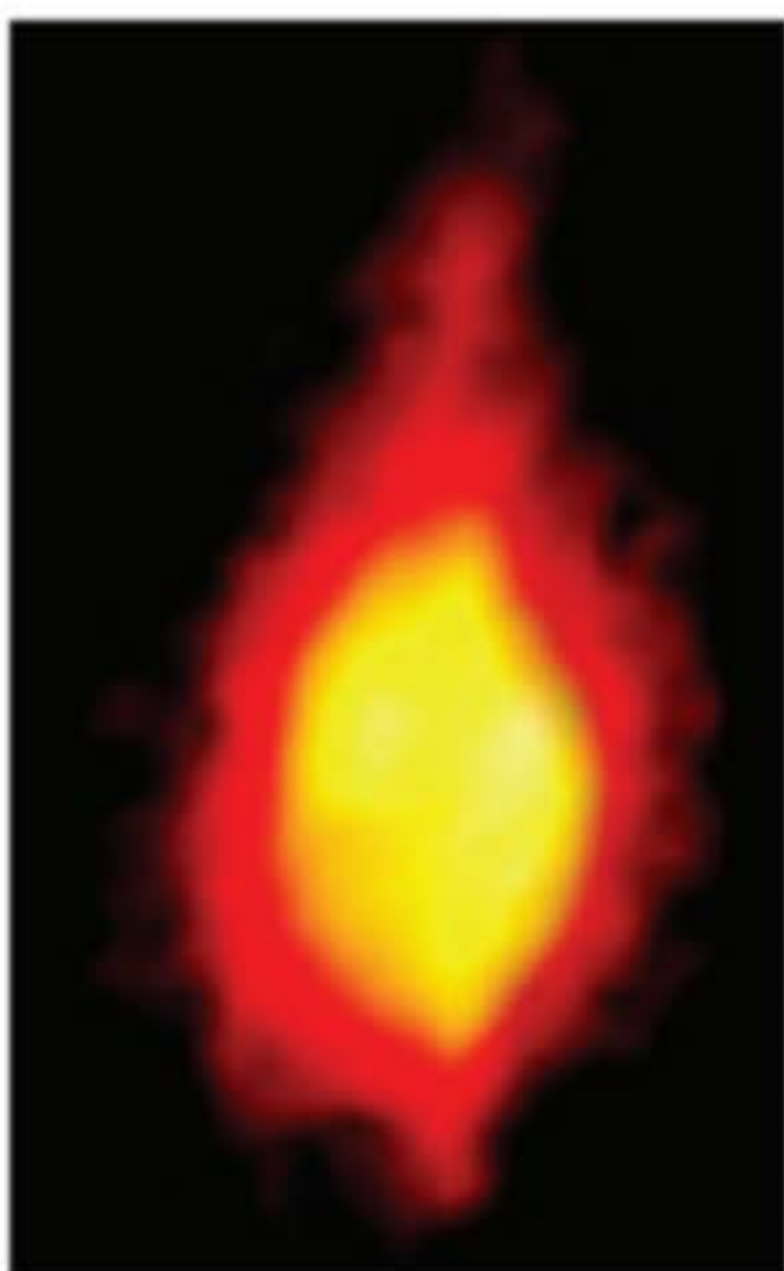

This highly filtered image of the ufo begins to show an alien. The figure is on the left. A dot of light is also between the main part of the ufo and the ufo's fuselage. The dot is the size of a car...

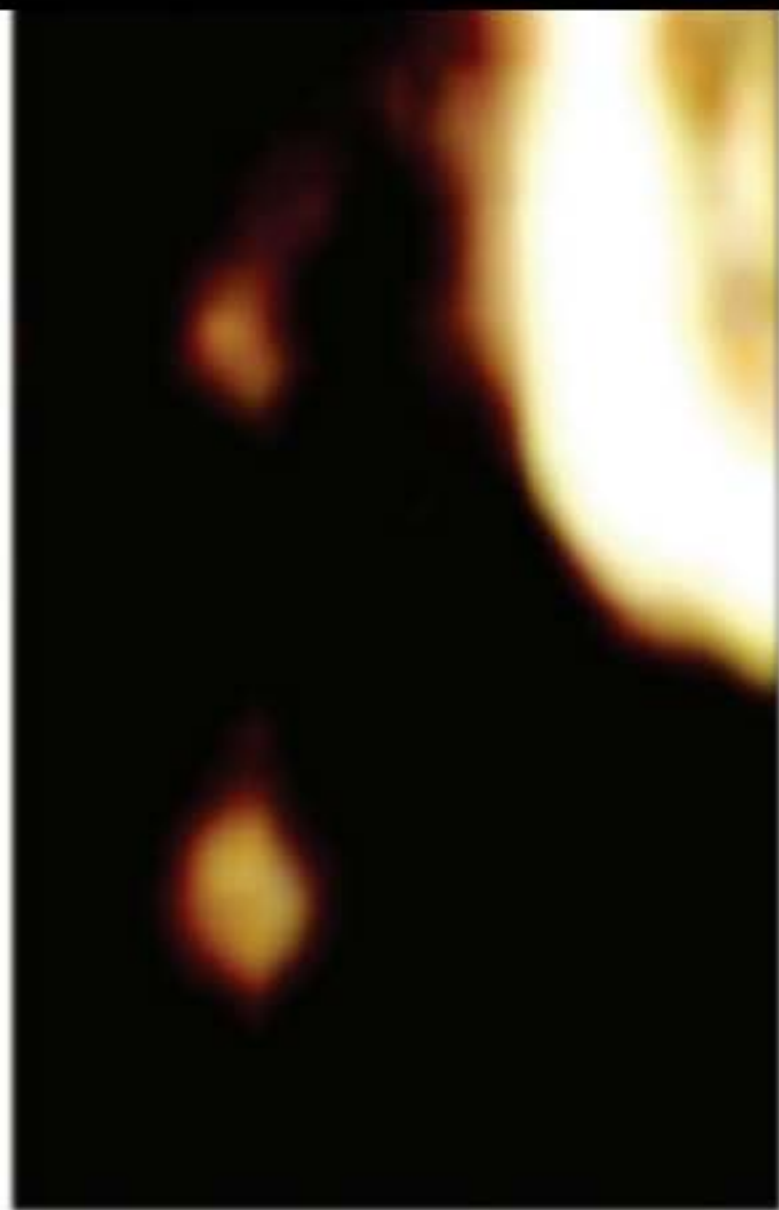

In this filtered image of the ufo, you can see a large flame falling... The large silver portion on the right is the fuselage. The flames are much smaller.

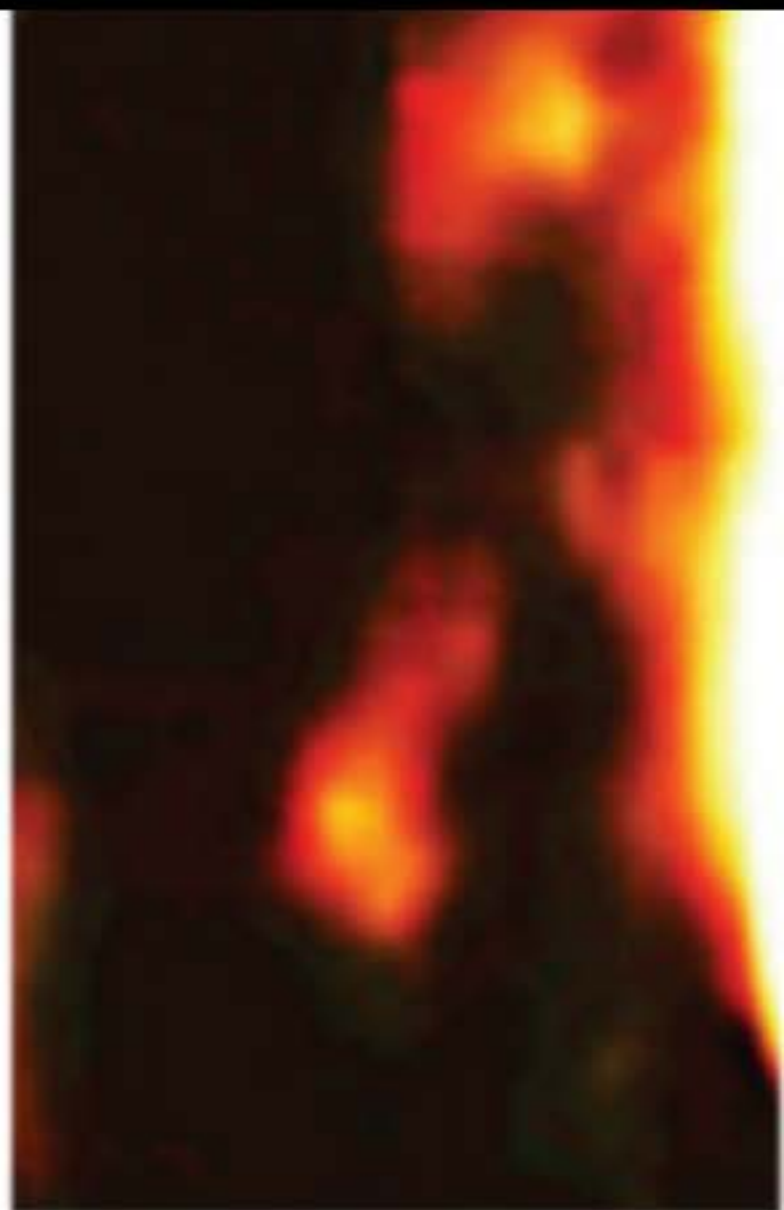

This is a closeup of the flames falling off of this particular ufo.

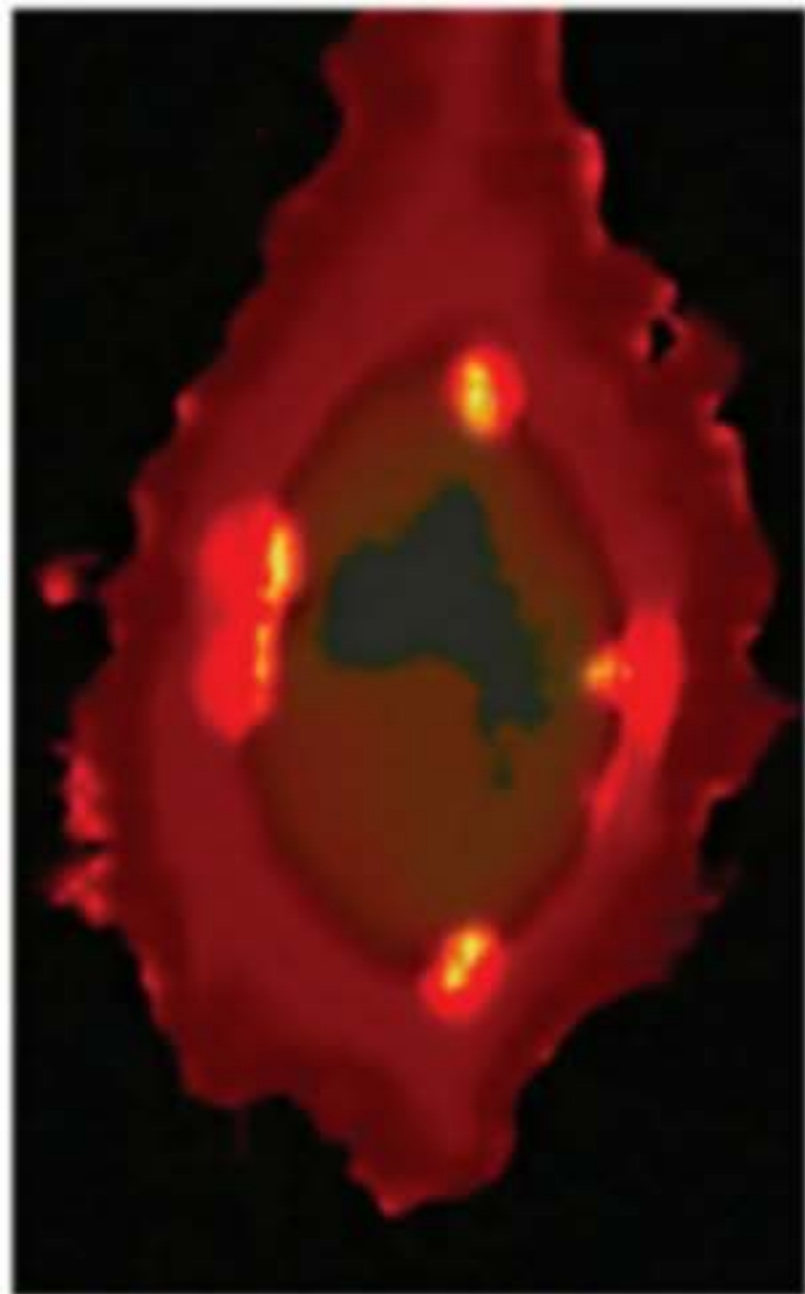

This is the lower flame, blown up. The flame seems to fall, eventually, into the start of the laser.

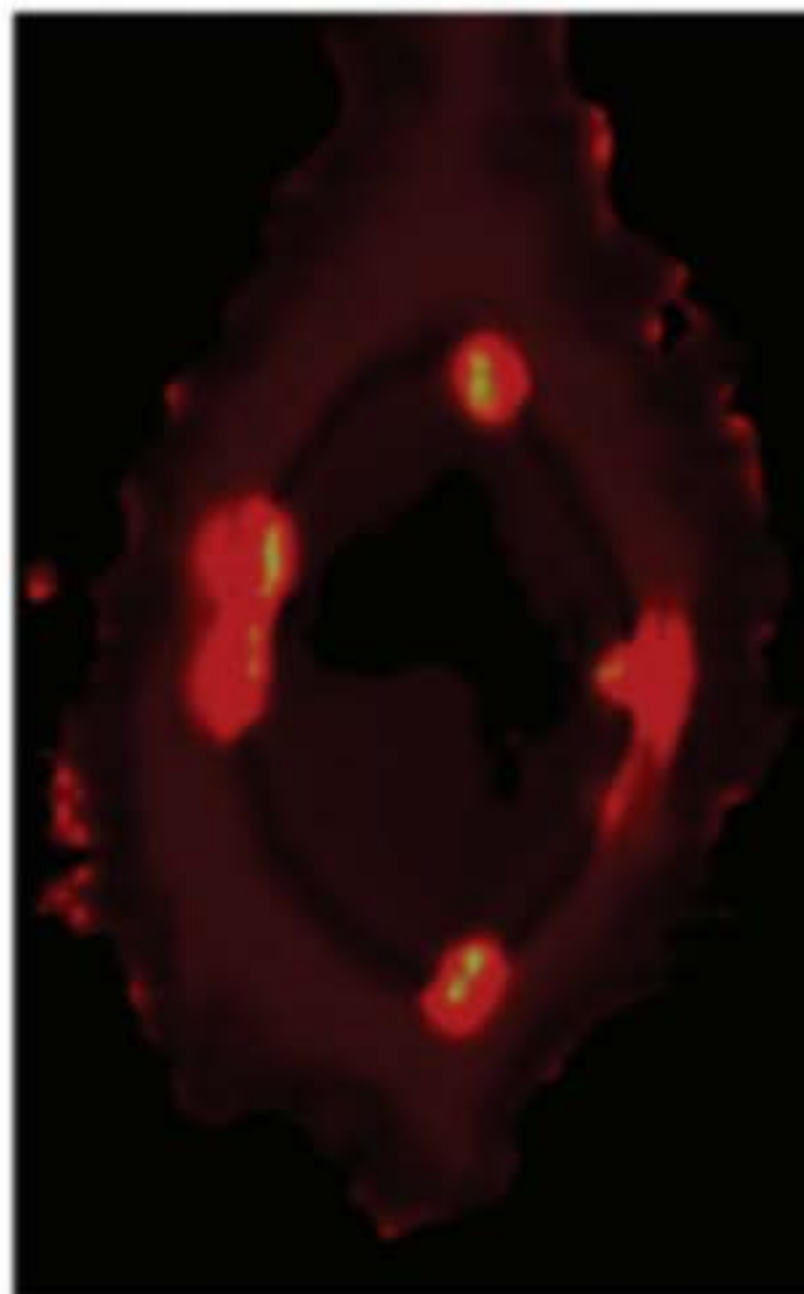

Here is the flame. No matter where I screen-saved the ufo image, from the nearly half minute video, the image is frozen in place. As is. Like it's all frozen in time. The ufo is appearing to be suspended in time.

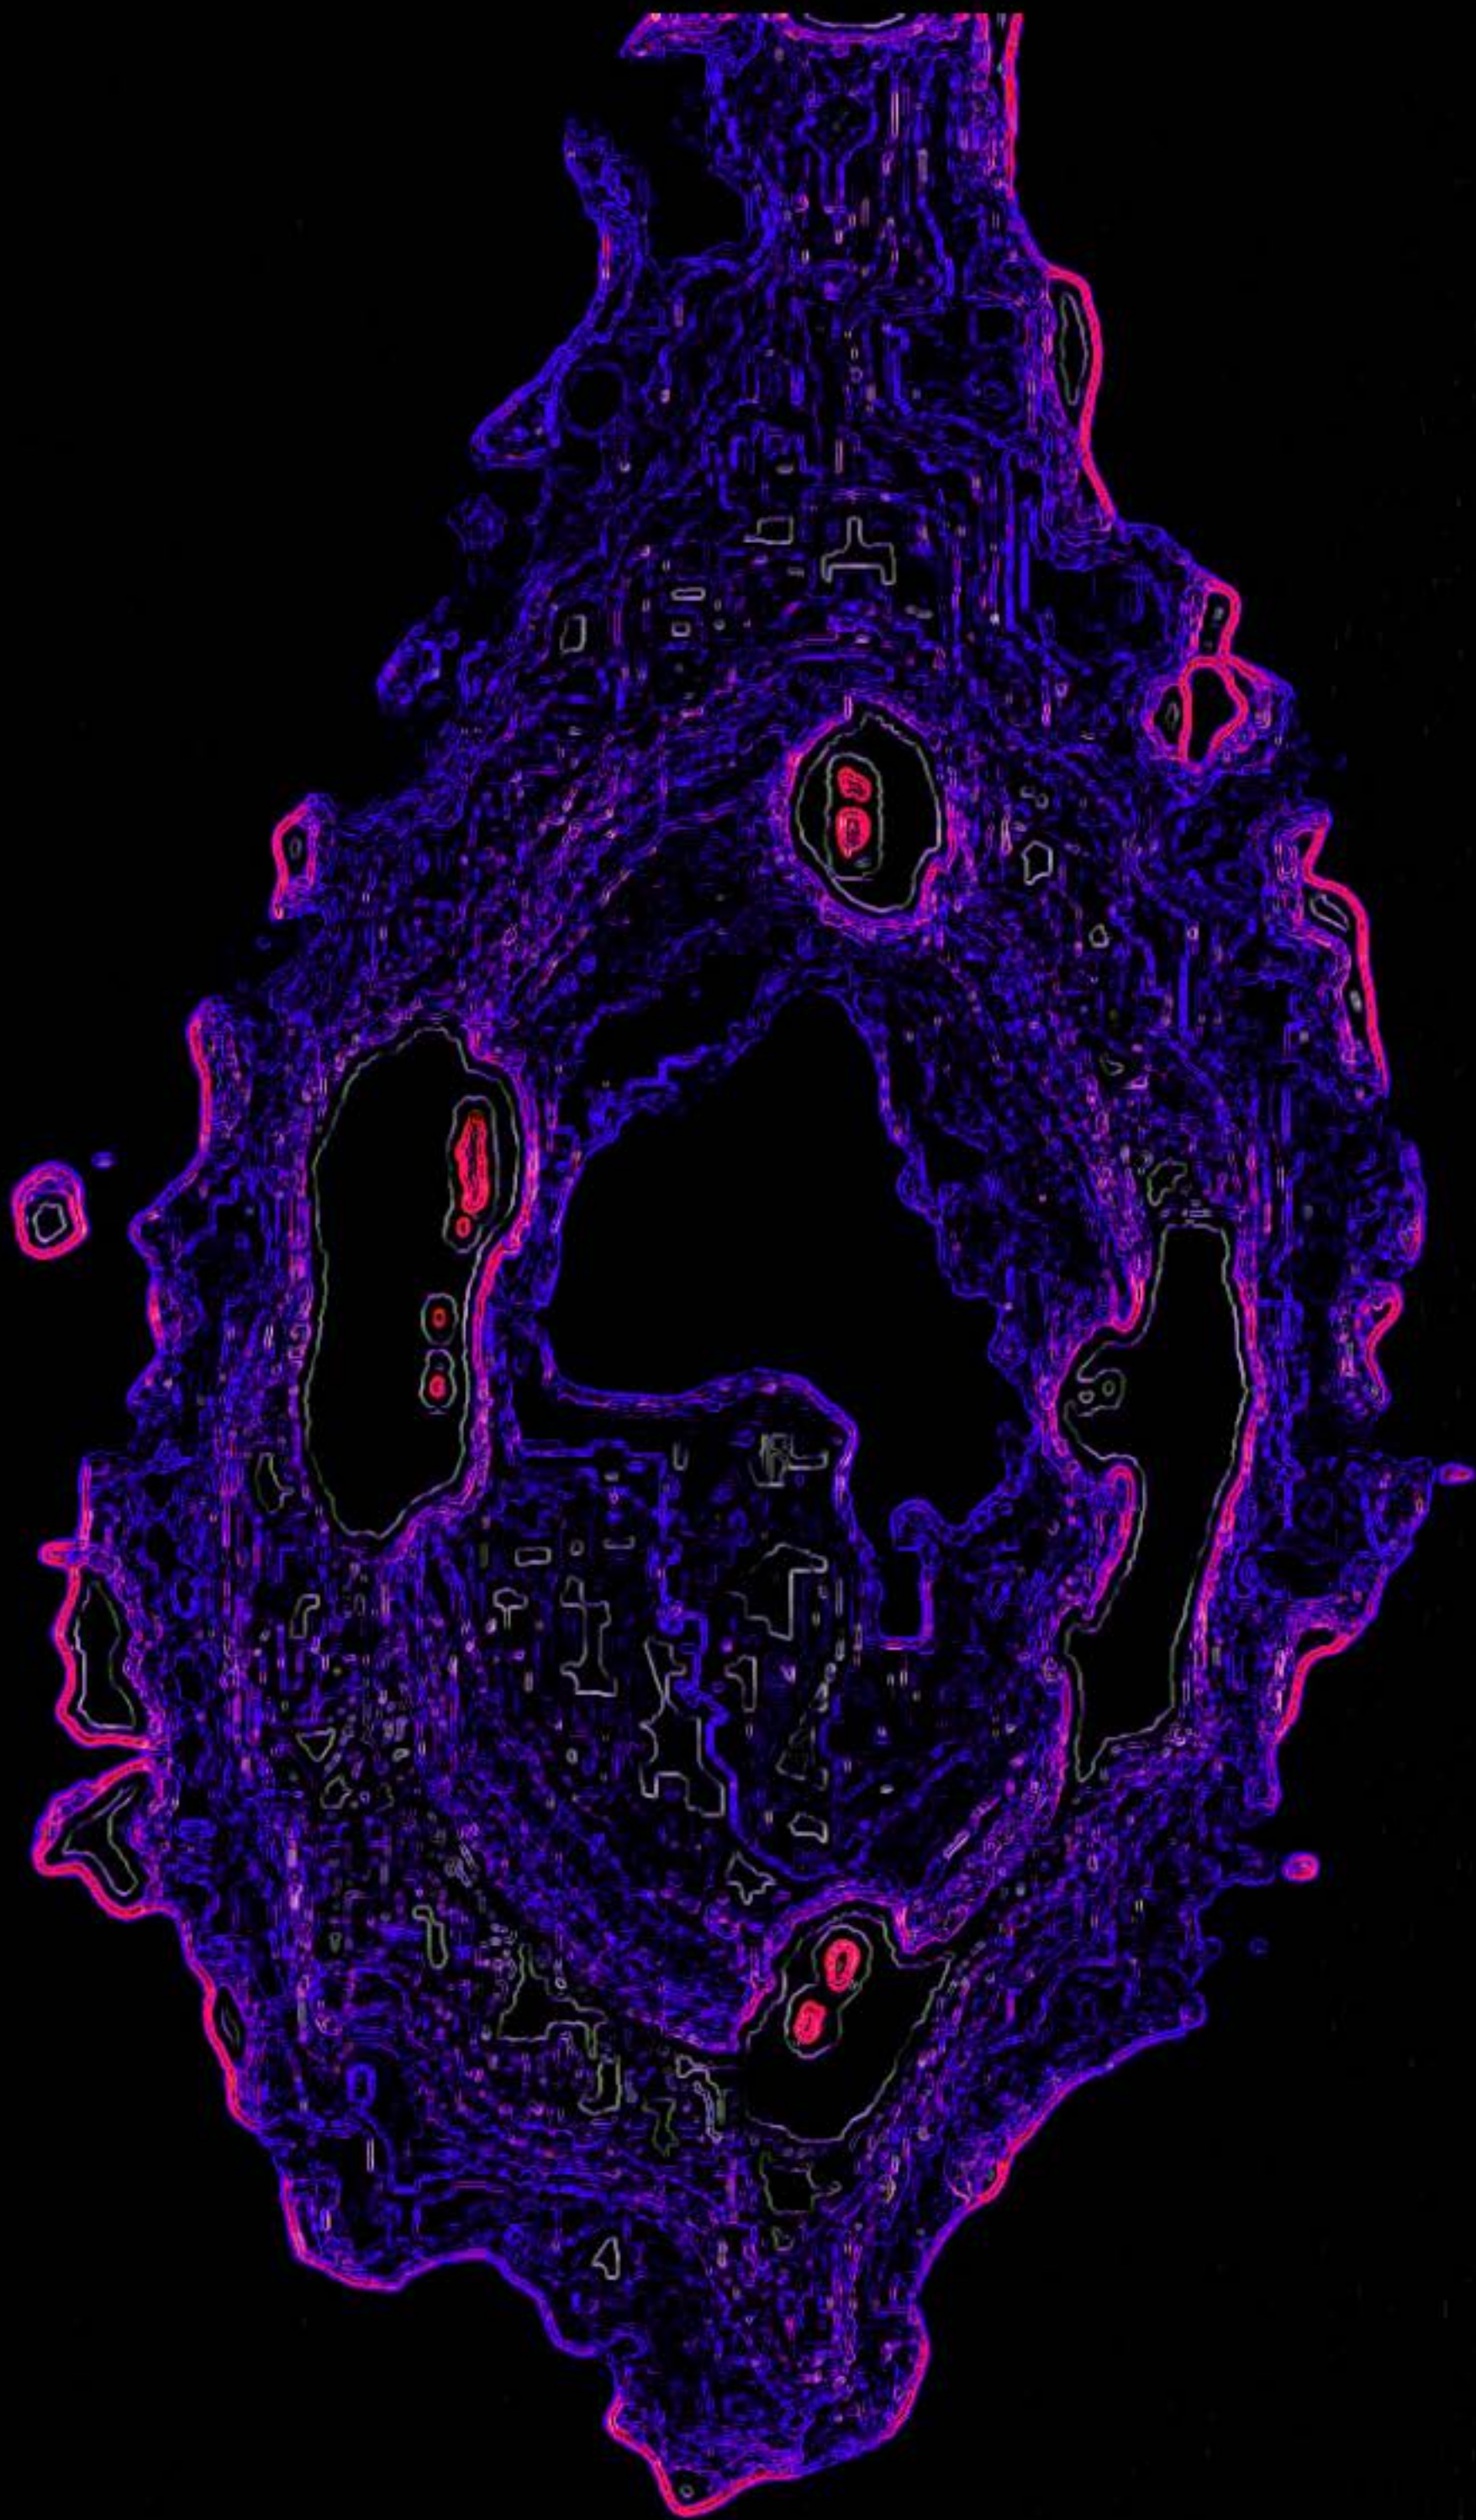

Flames.

This is the flame, heading to join the laser. Remember, this particular flame, from a real ufo; from space, is roughly the size of the Volks Wagon Beetle Bug.

This is another filtered image of the real ufos' flame. 150p feet up and nearly overhead.

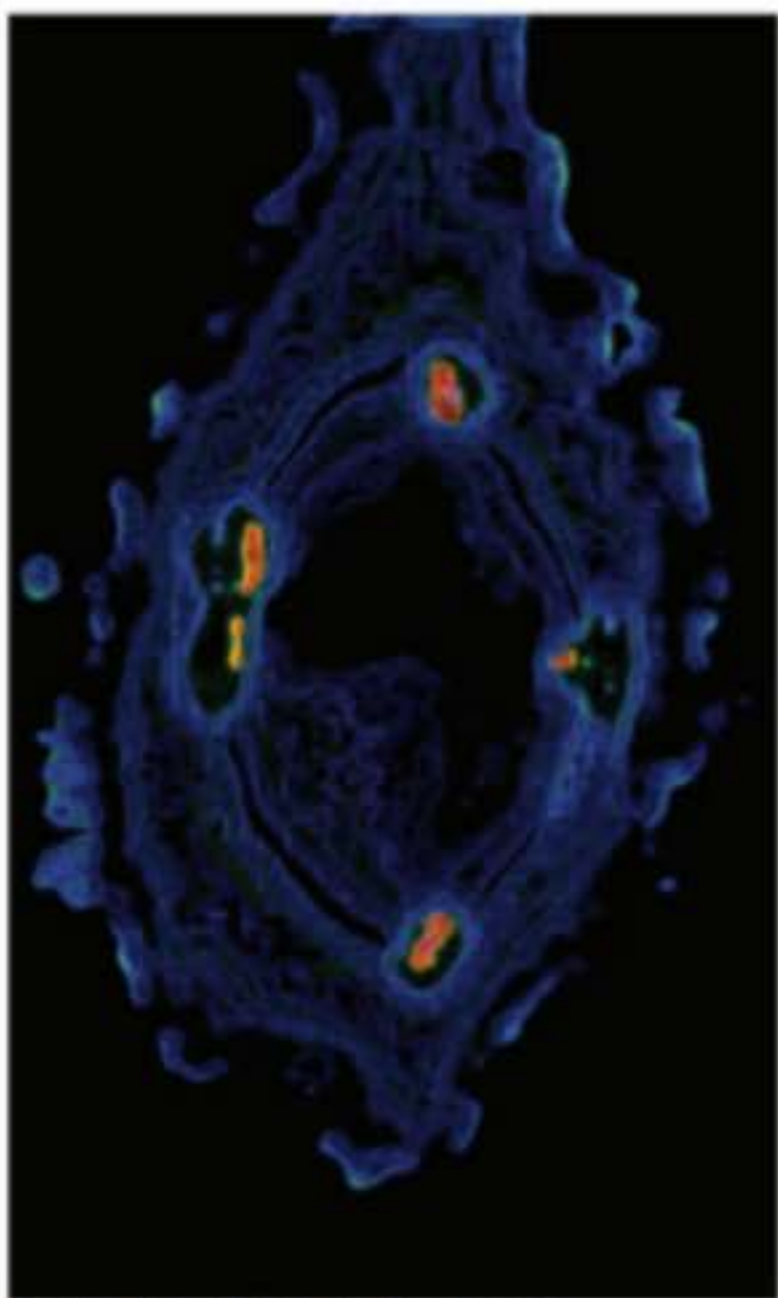

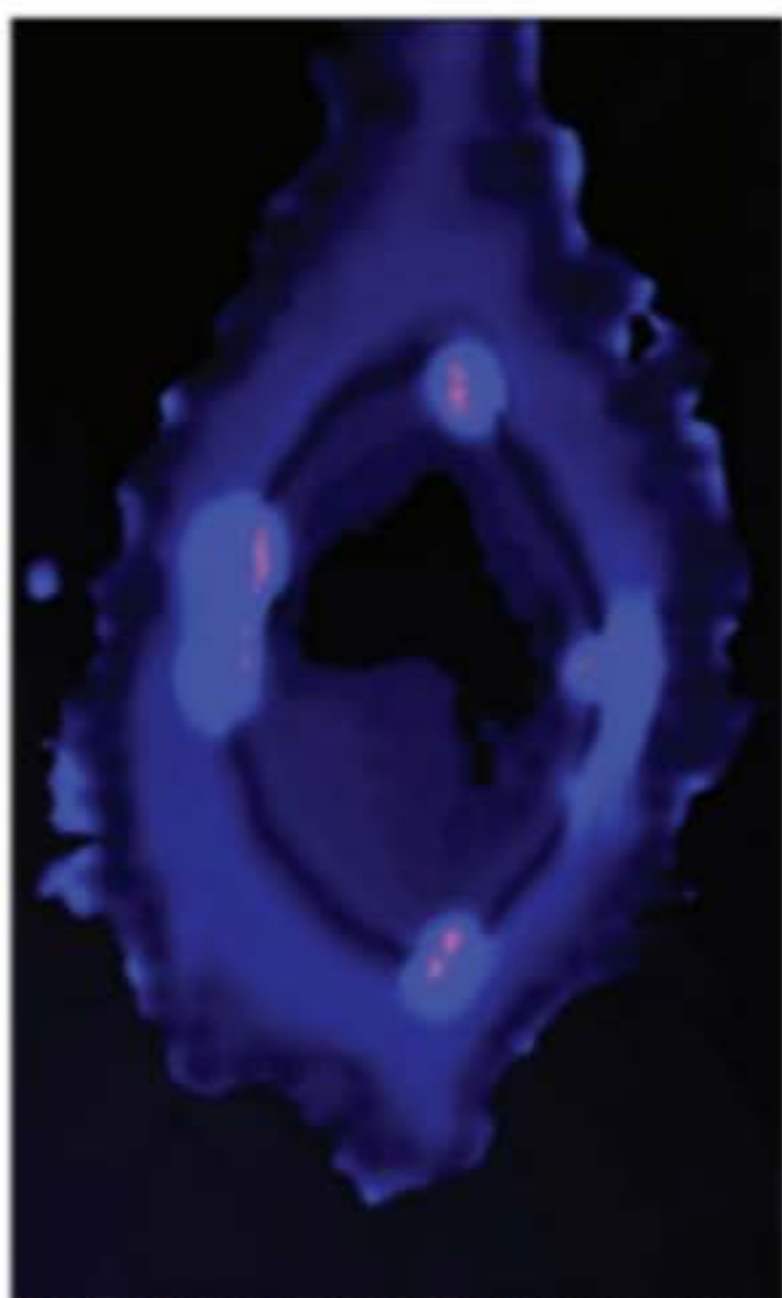

The inside of the flame is distinguishable.

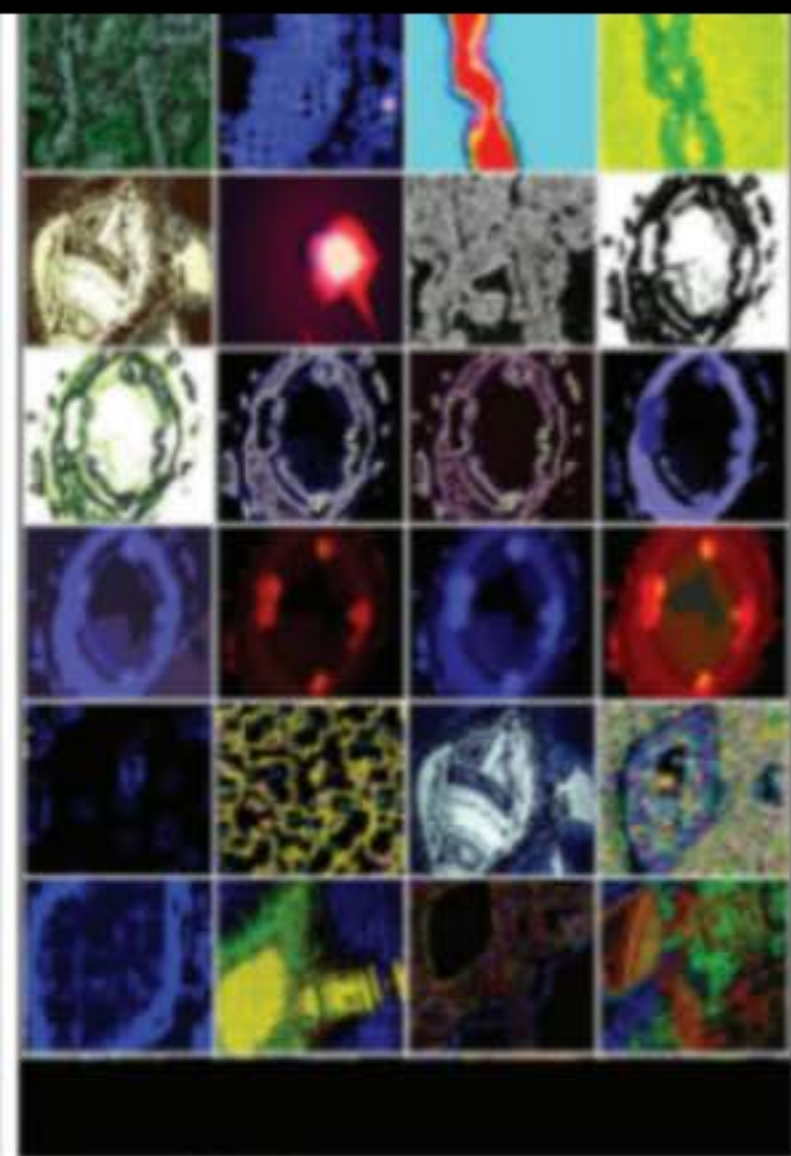

You don't want to get yourself any closer.

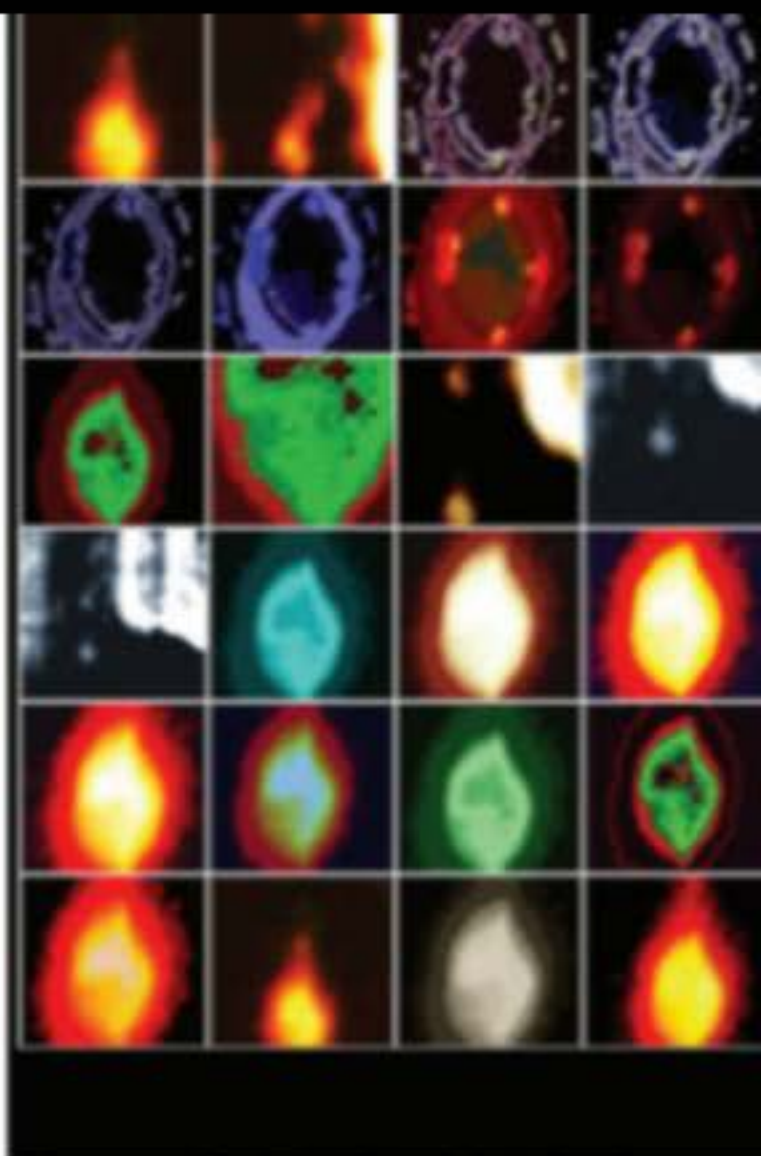

Under filter, this is the flame, again.

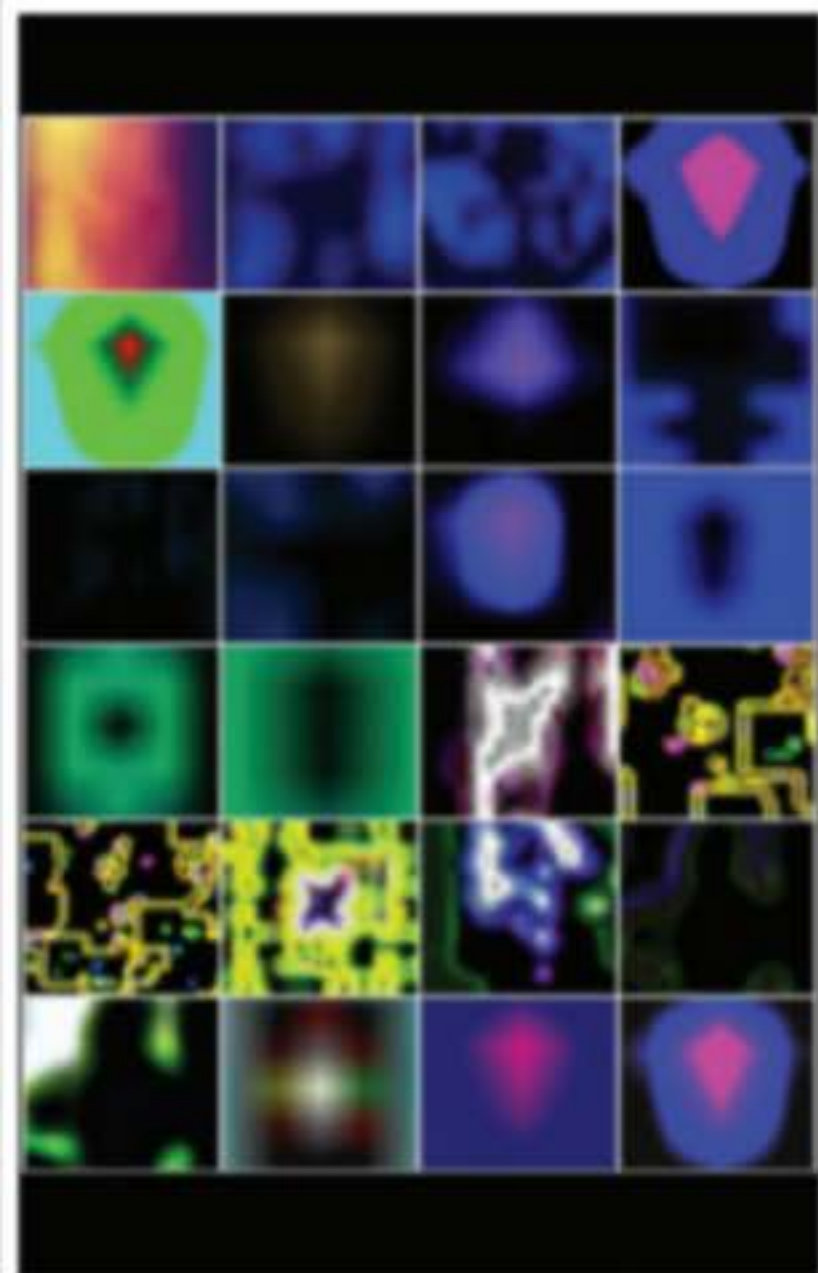

This is a filtered image of the blue flame. The ufo flame.

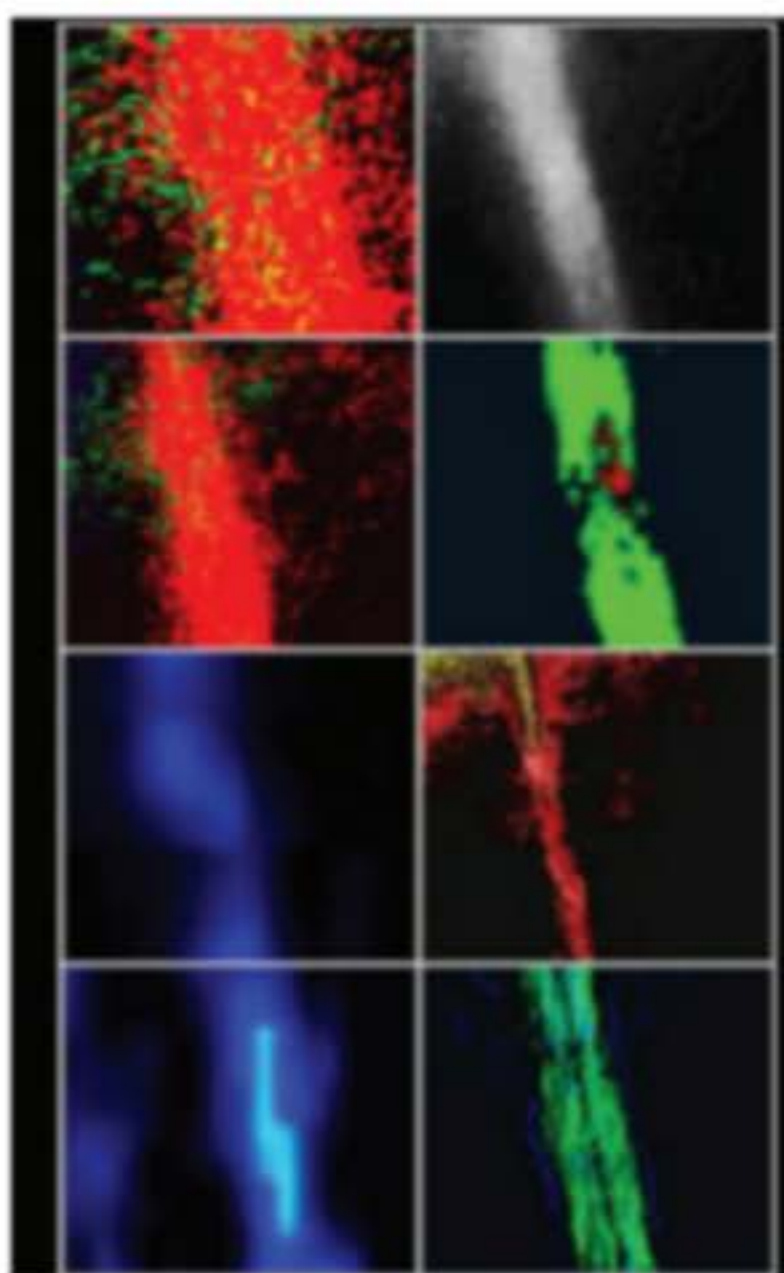

Images of the ufo.

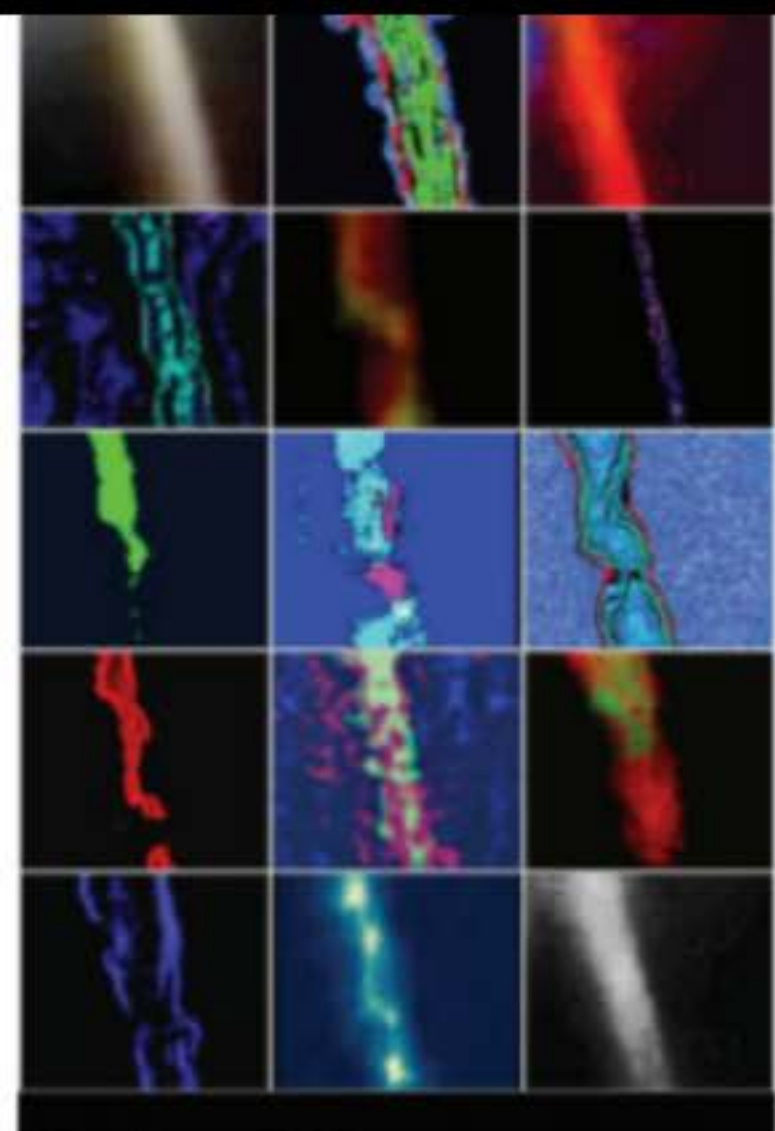

Flames under filter,from the real ufo.

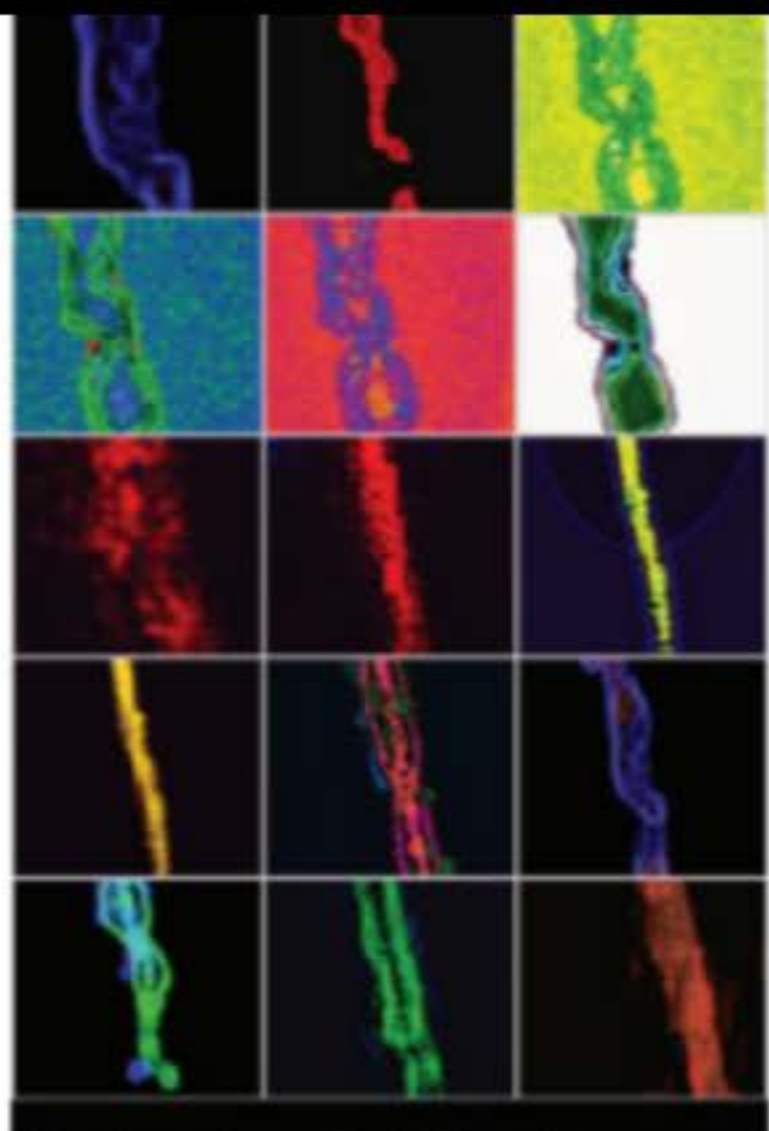

By zooming in ,under filter,we get very de-tailed images of the ufo,all from space.

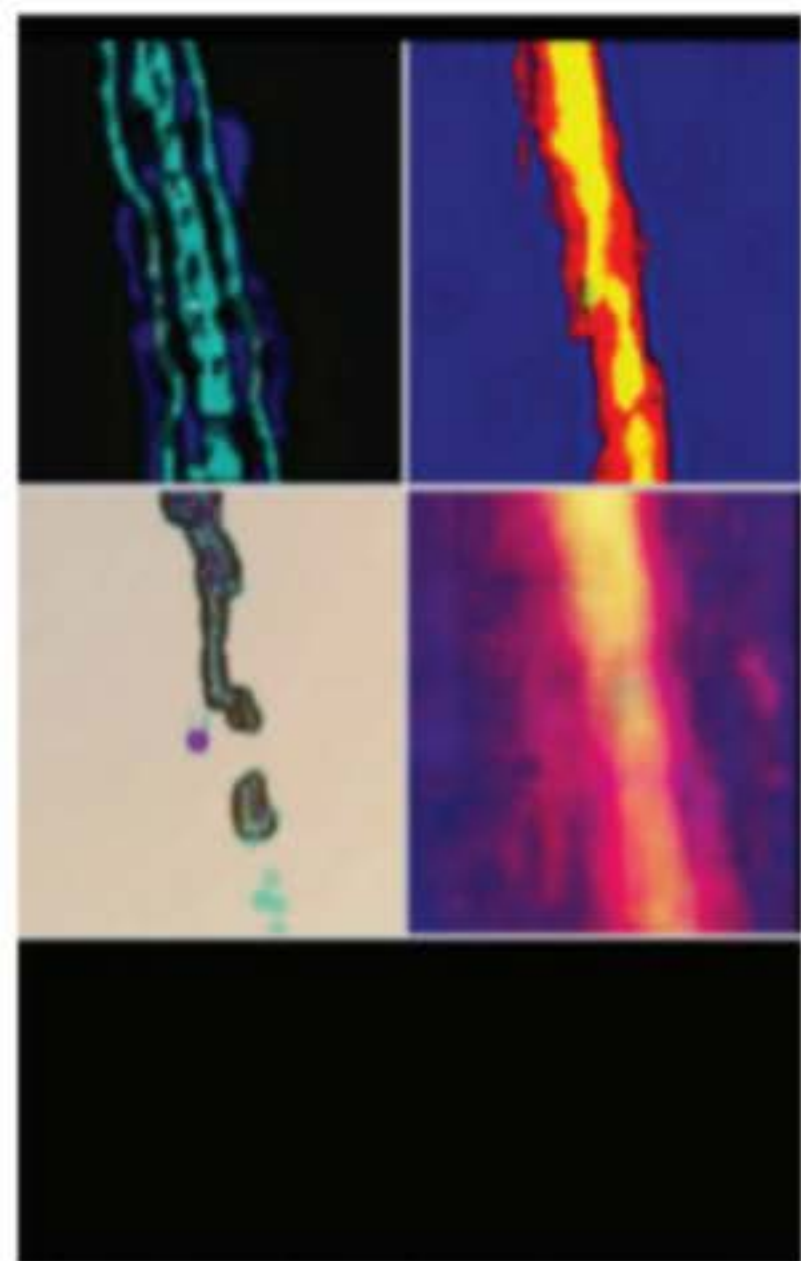

Nuff said.

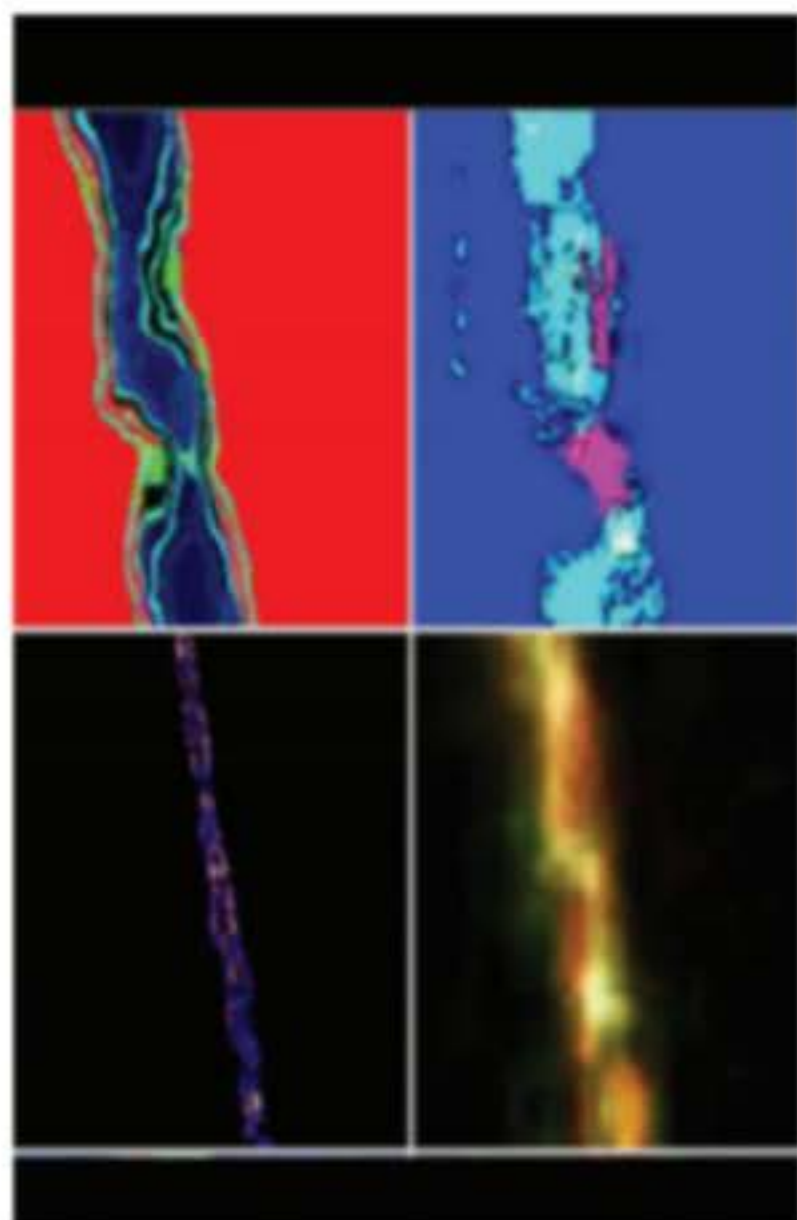

Filtered lasers.Ufo lasers.

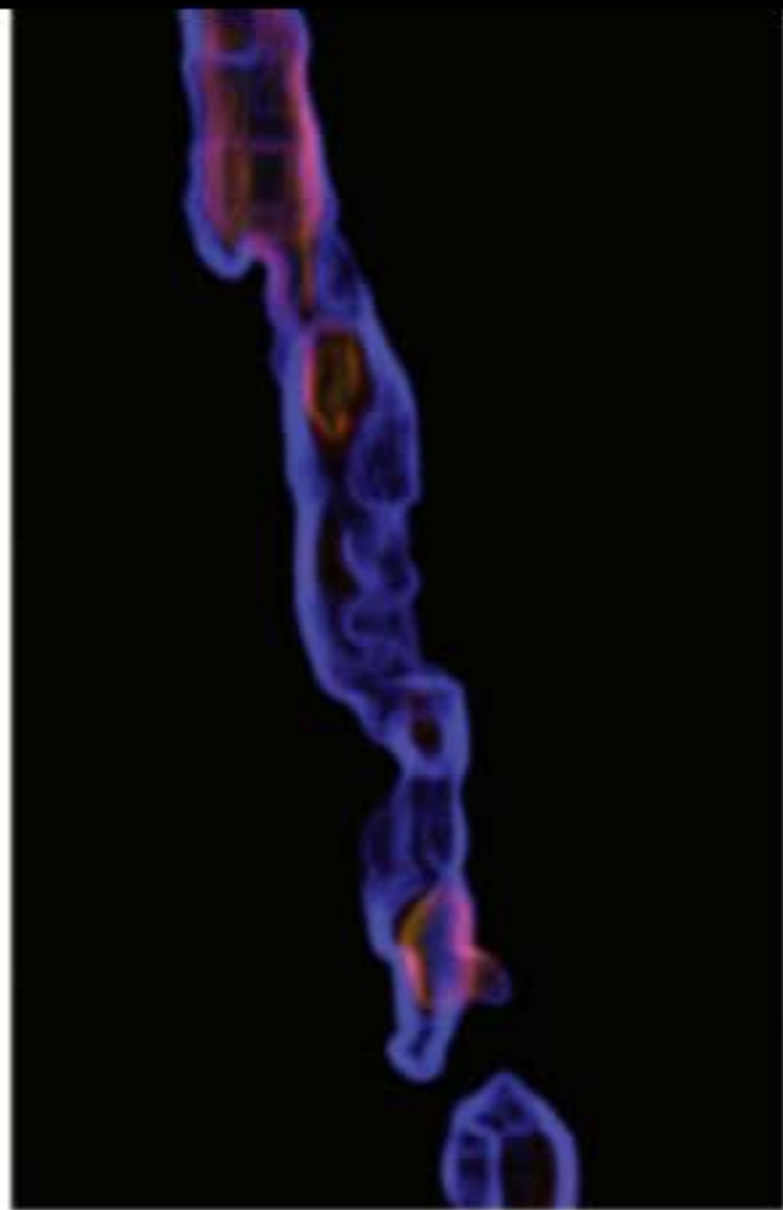

More lasers,interestingly, from deep space.

The laser goes down and seems to go back up,like a chain on a gear.

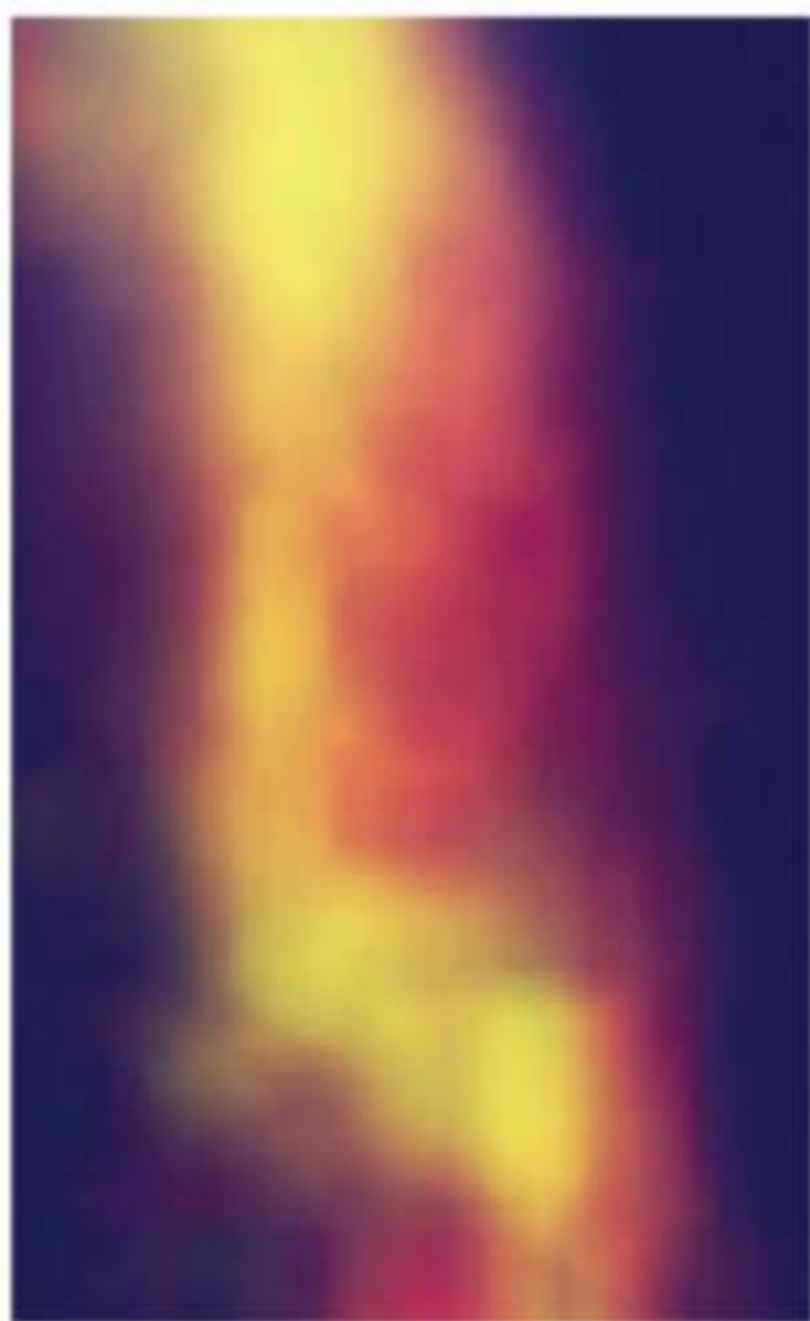

The laser goes down and seems to go back up,like a chain on a gear.

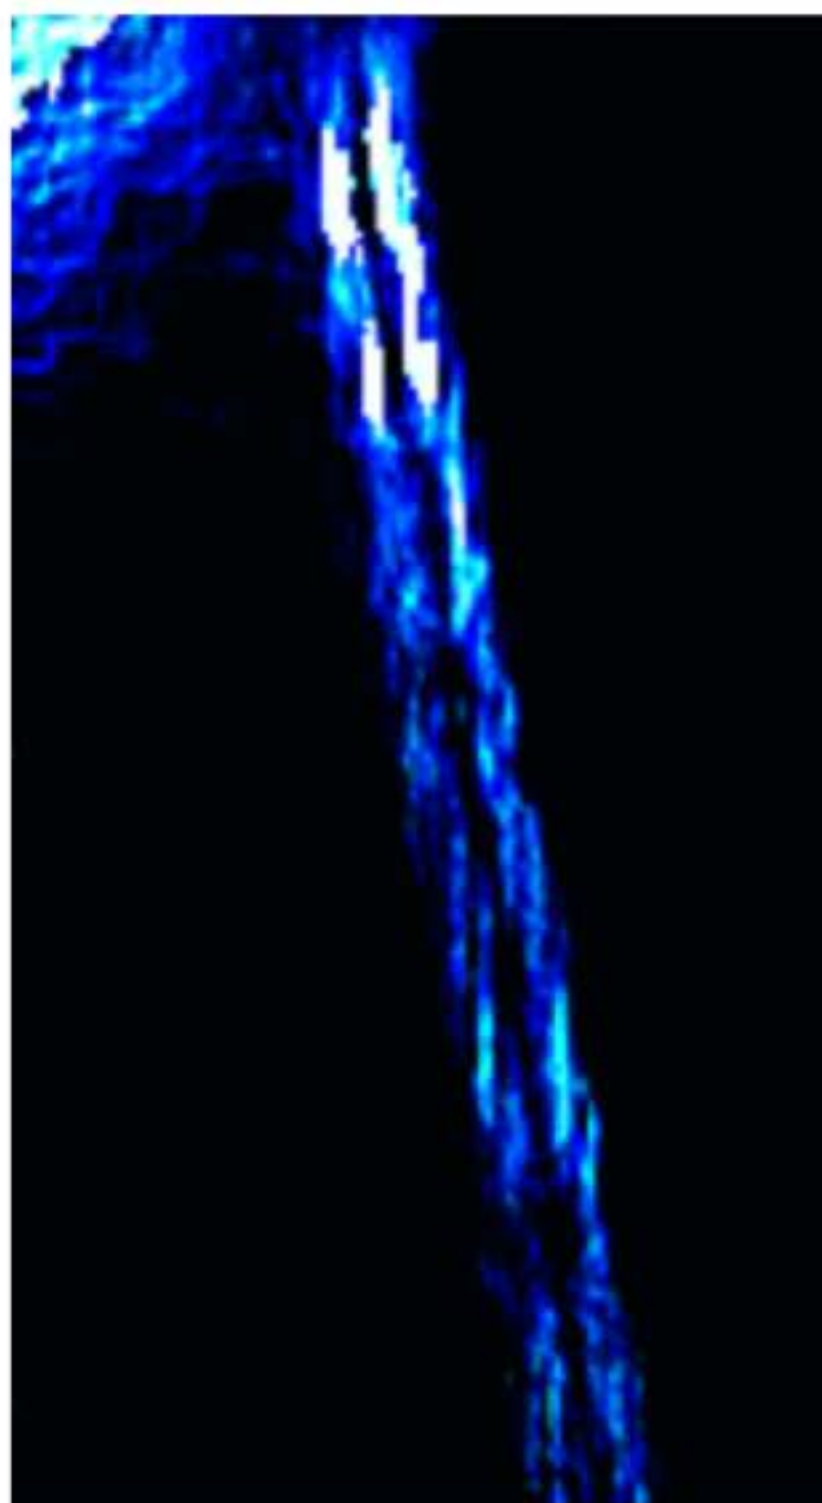

Can a street light or a stadium light or even a street lamp do all that?!

Can you see an image ,in this laser shot,from this real ufo?

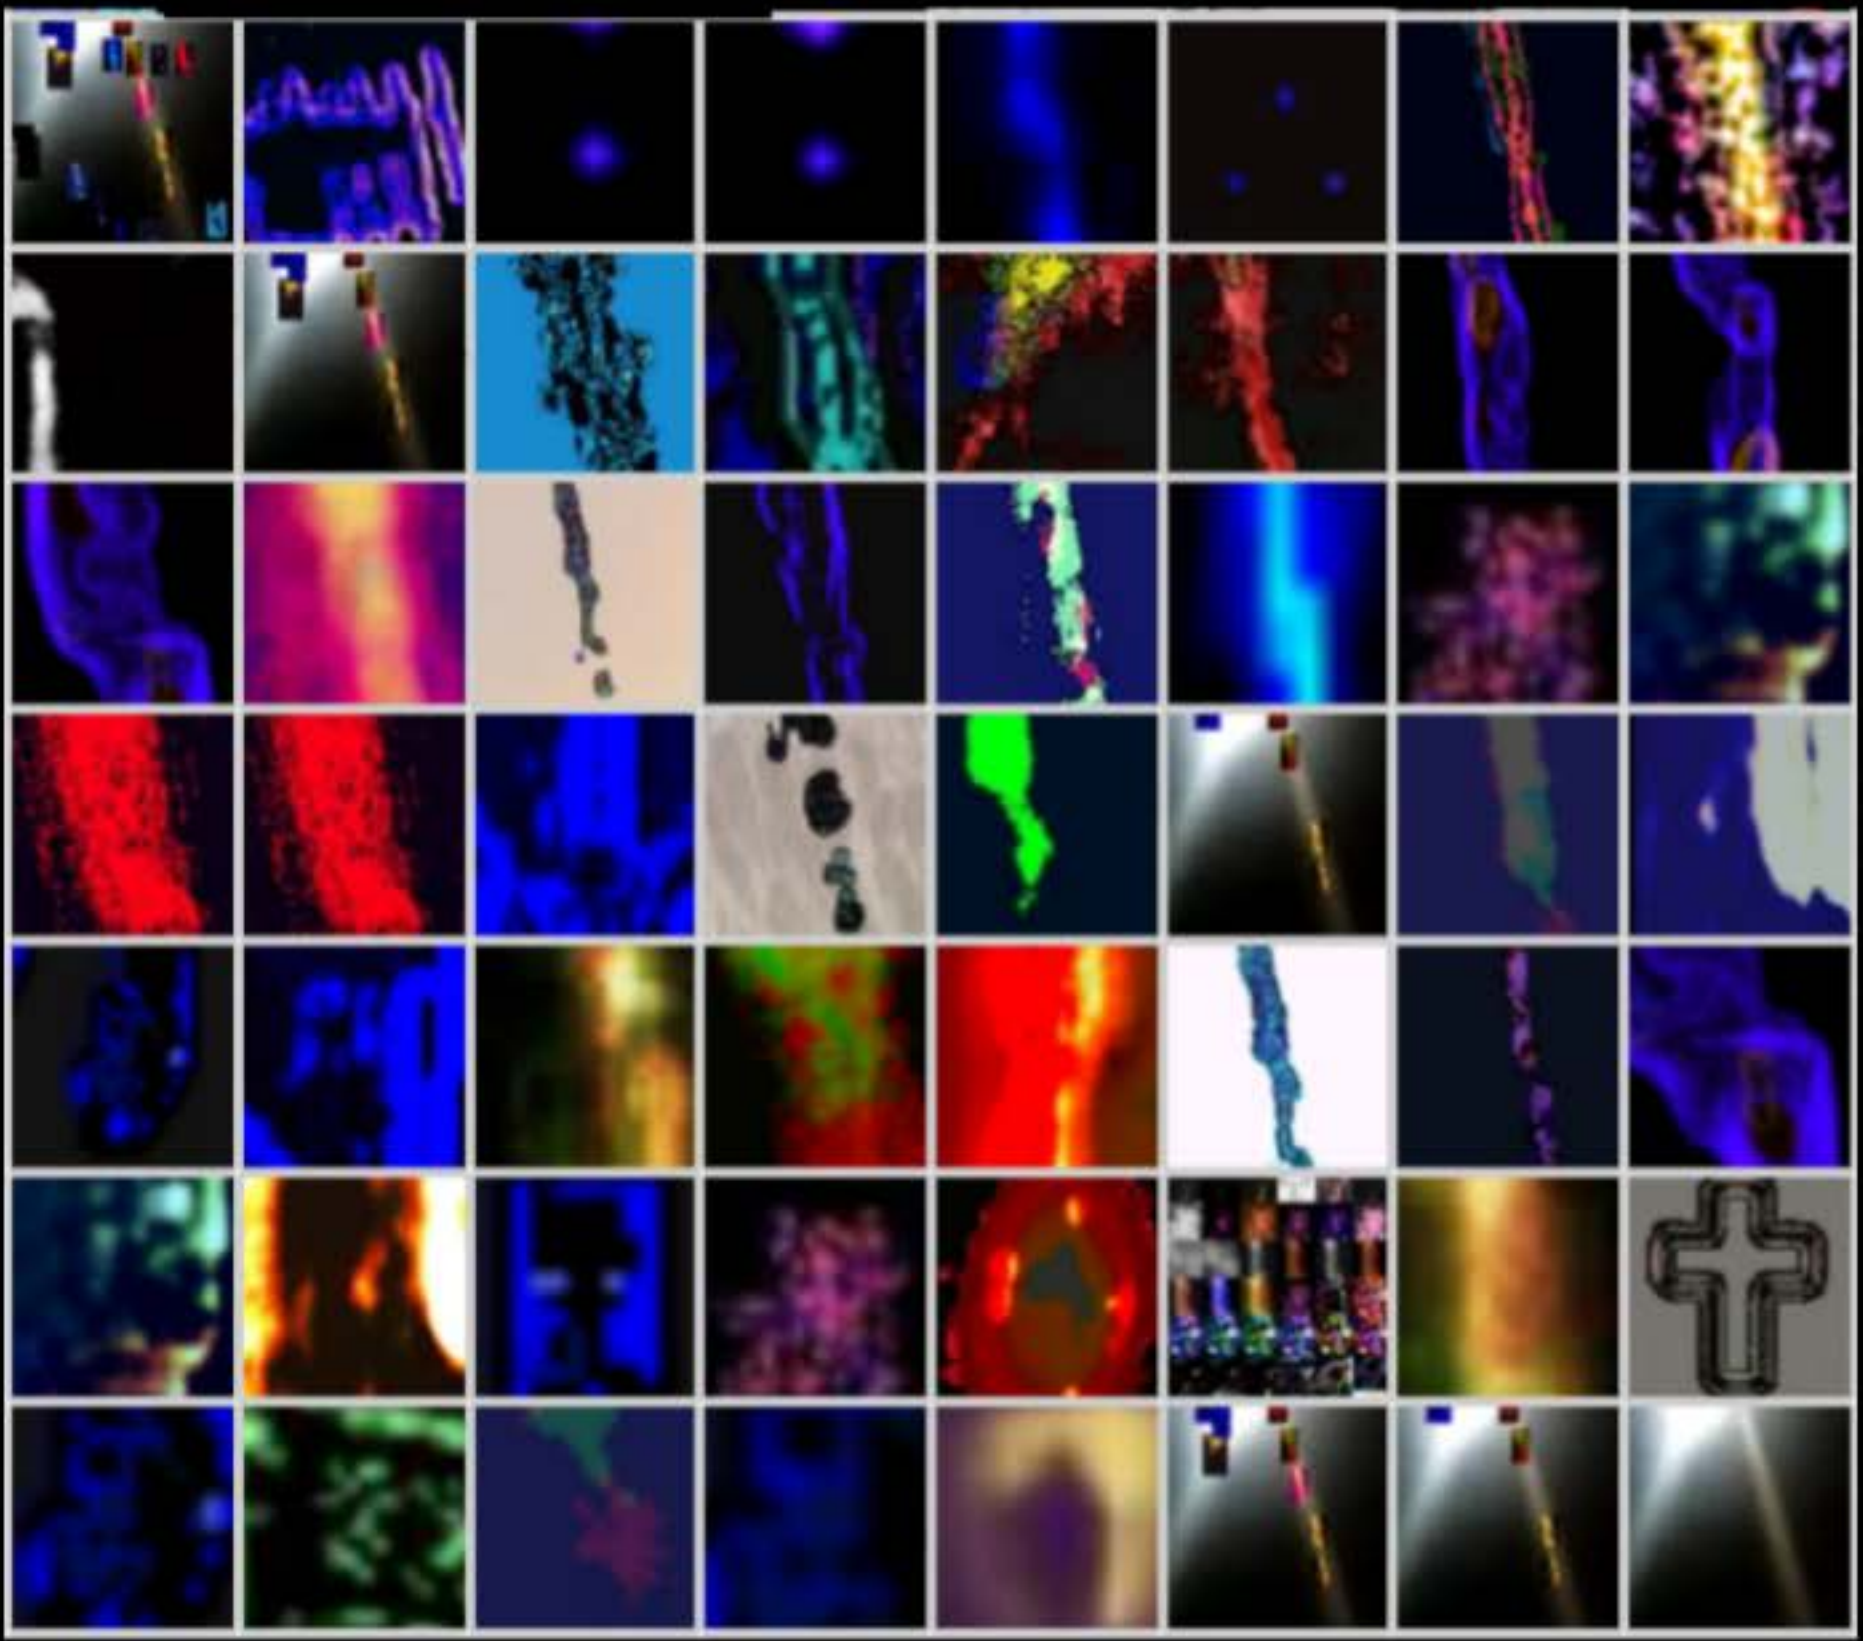

Can you see an image of a face,in this laser shot,from this real ufo?

This image of the lase has it as two.A twin laser,from space!

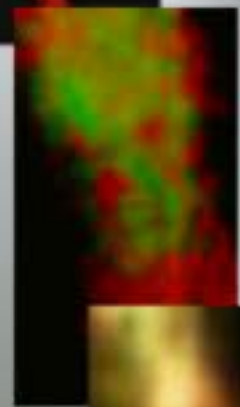

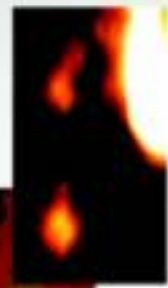

The Ufo is measured,by CIA supercomputer, in 2015.The Ufo video was brought to them ,at Wright Field ,by United States Air Force Captain (ret.) ; in Ohio.This is what they found....
 The beam of light isa light. It is 8 (Eight) feet (foot)wide ,expanding to over 30 (thirty) feet (feet) .The UFO is 1500 (1,500) feet up (up in the air), from the ground .The beam is acting like a whirlpool . The beam is also refracting. Not reflecting.Refracting.Refracting means the beam is changing direction as it moves through water,in this case —air .Etc. They said, " Don't worry. We don't have stadium lights THAT BIG ! "

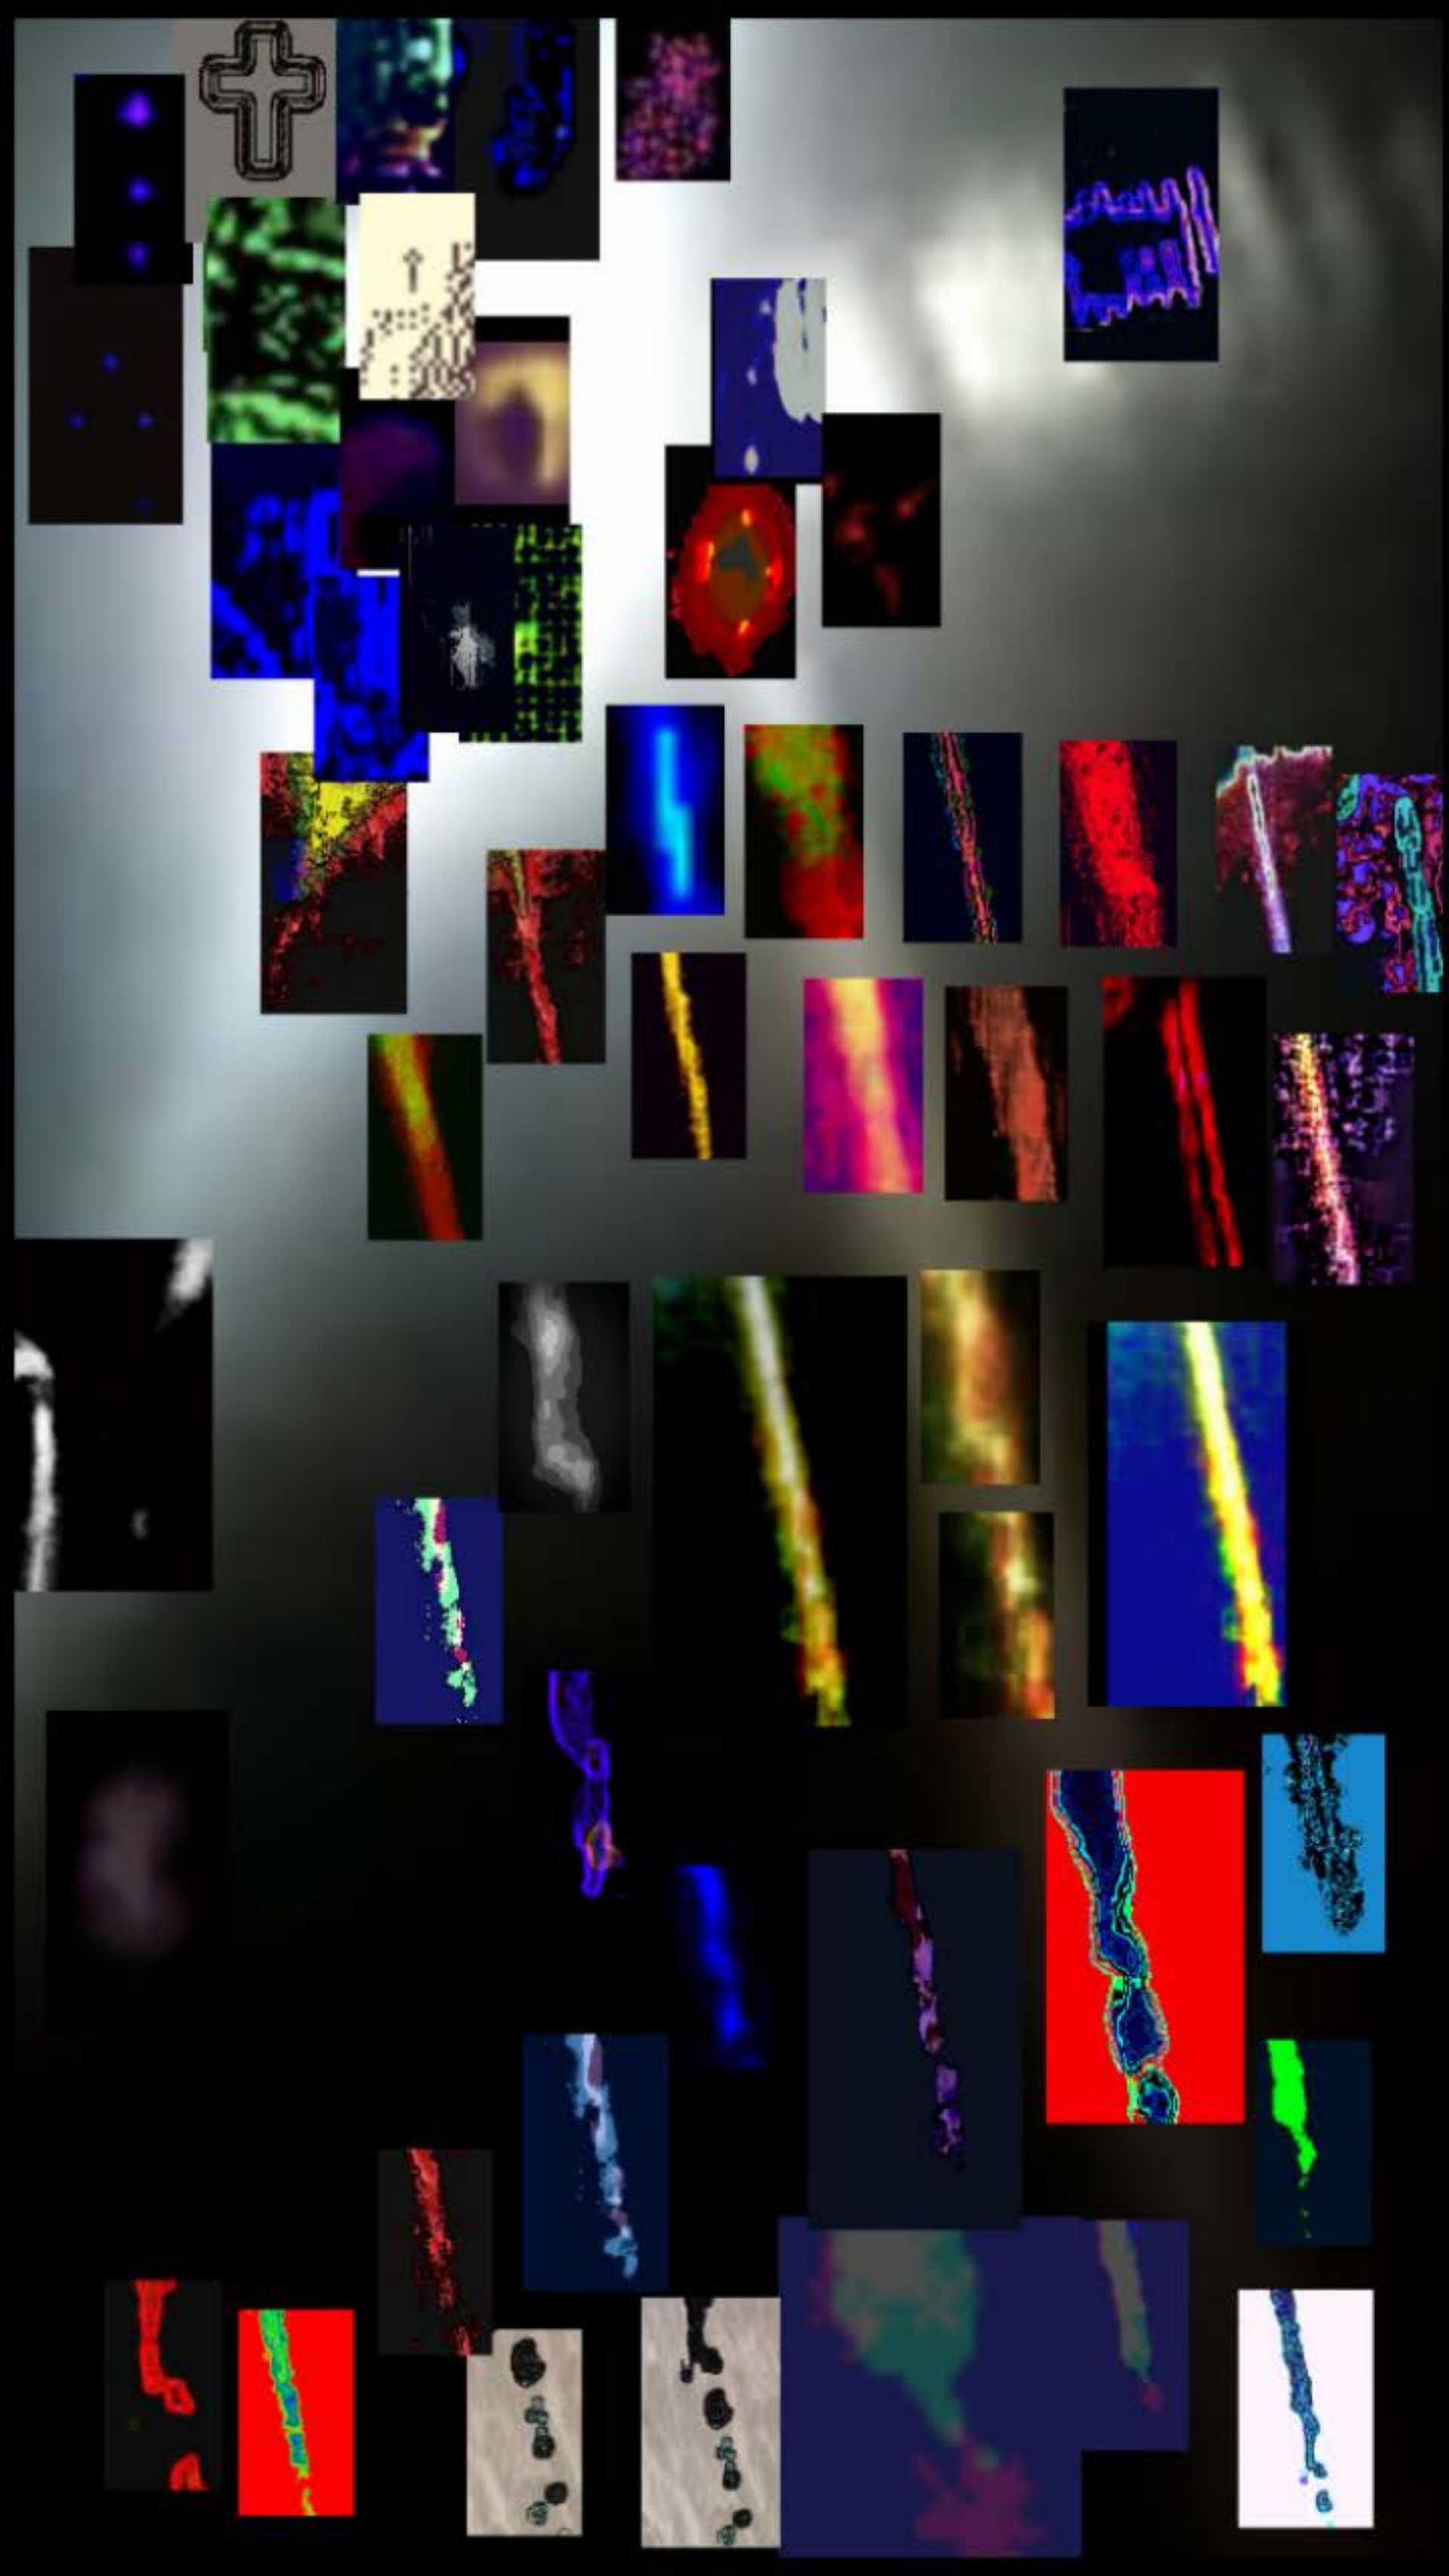

Trigonometry Scientists found imperial data,on the real ufo . That data agrees with the observations...both find it 1500 feet up . The Trig scientist asked me , " How high up was the ufo from the ground—at first ?" I said " About a 1000 feet up or so ..." The scientists then said to me, " What did the CIA say ?" I said, " 1500 feet!" The scientist said, " They ' were closer " . The scientist then said , " How close was the jet from the UFO? " I said ; " About 300 feet !" He said ; " Not even close. " (That's it ? Just ; not even close! No cigar no , just, " Not " ,from the public scientist .) Fraud . The scientist has a million dollar bounty for the one who finds the imperial data on an UFO,set up a while ago, by a beloved investor who passed away . The scientists claims fraud. The scientist has tax issues and is kicked out of a neighboring county .Why? Problems.

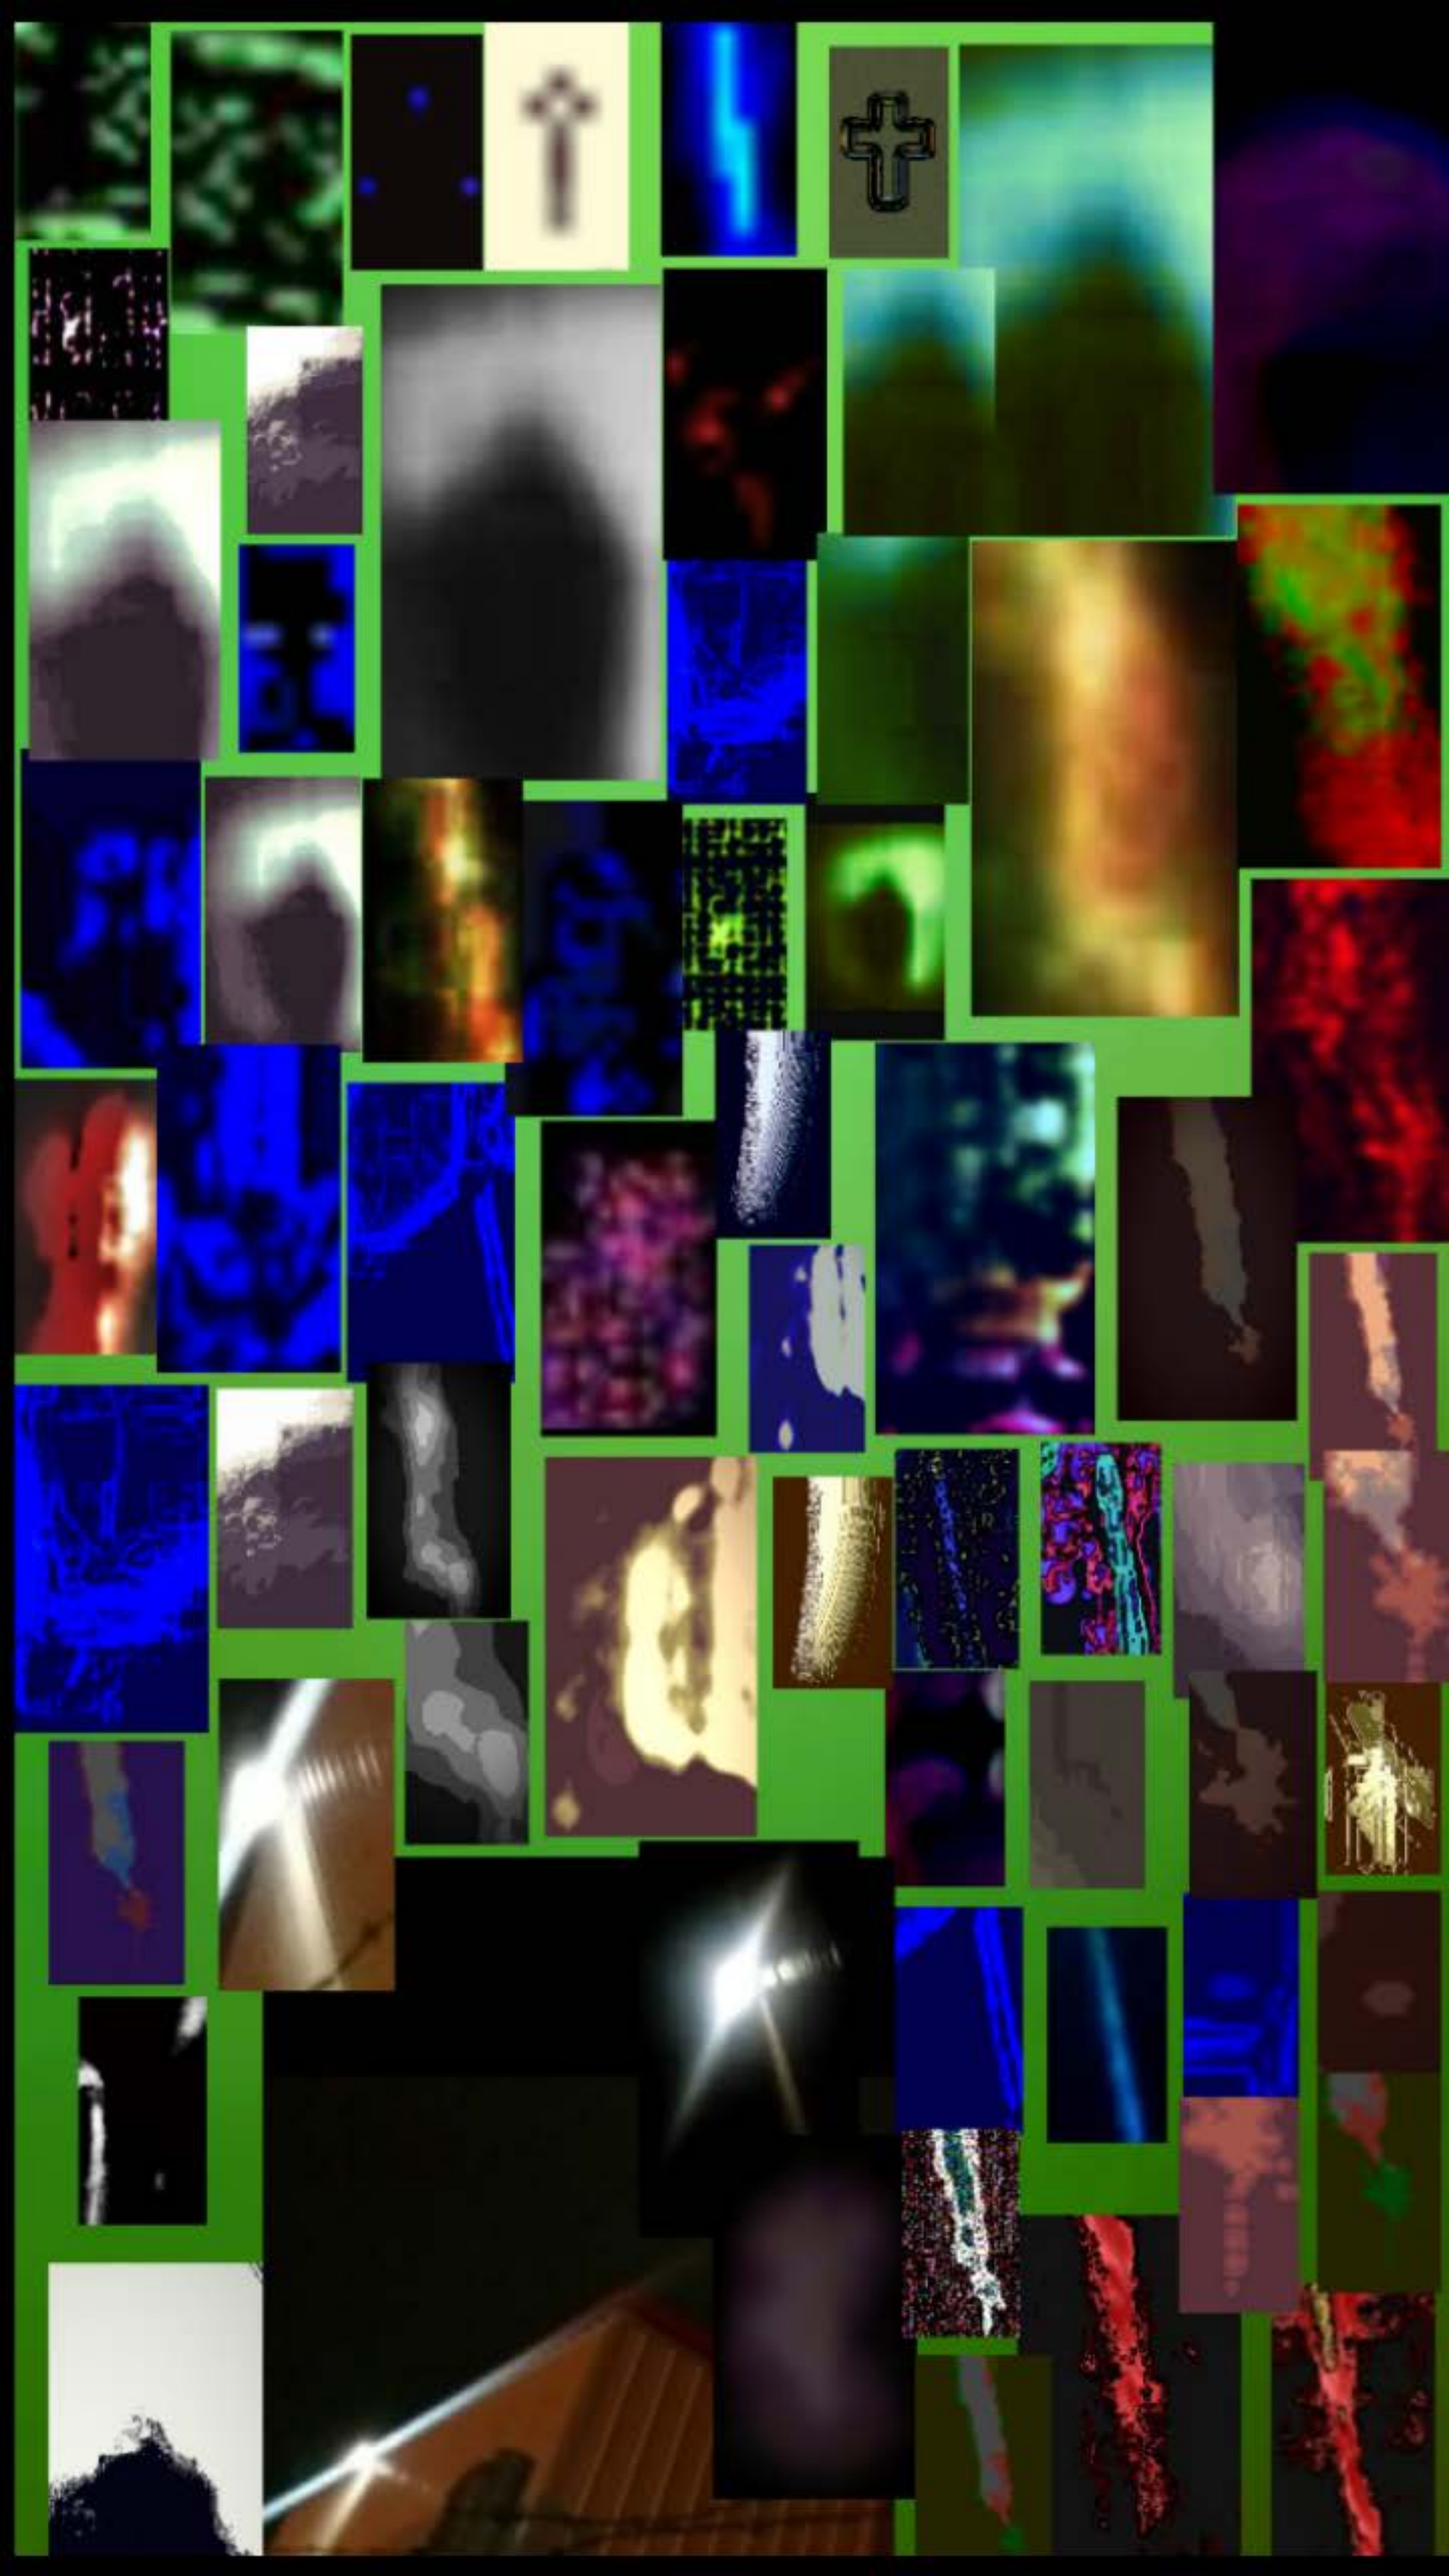

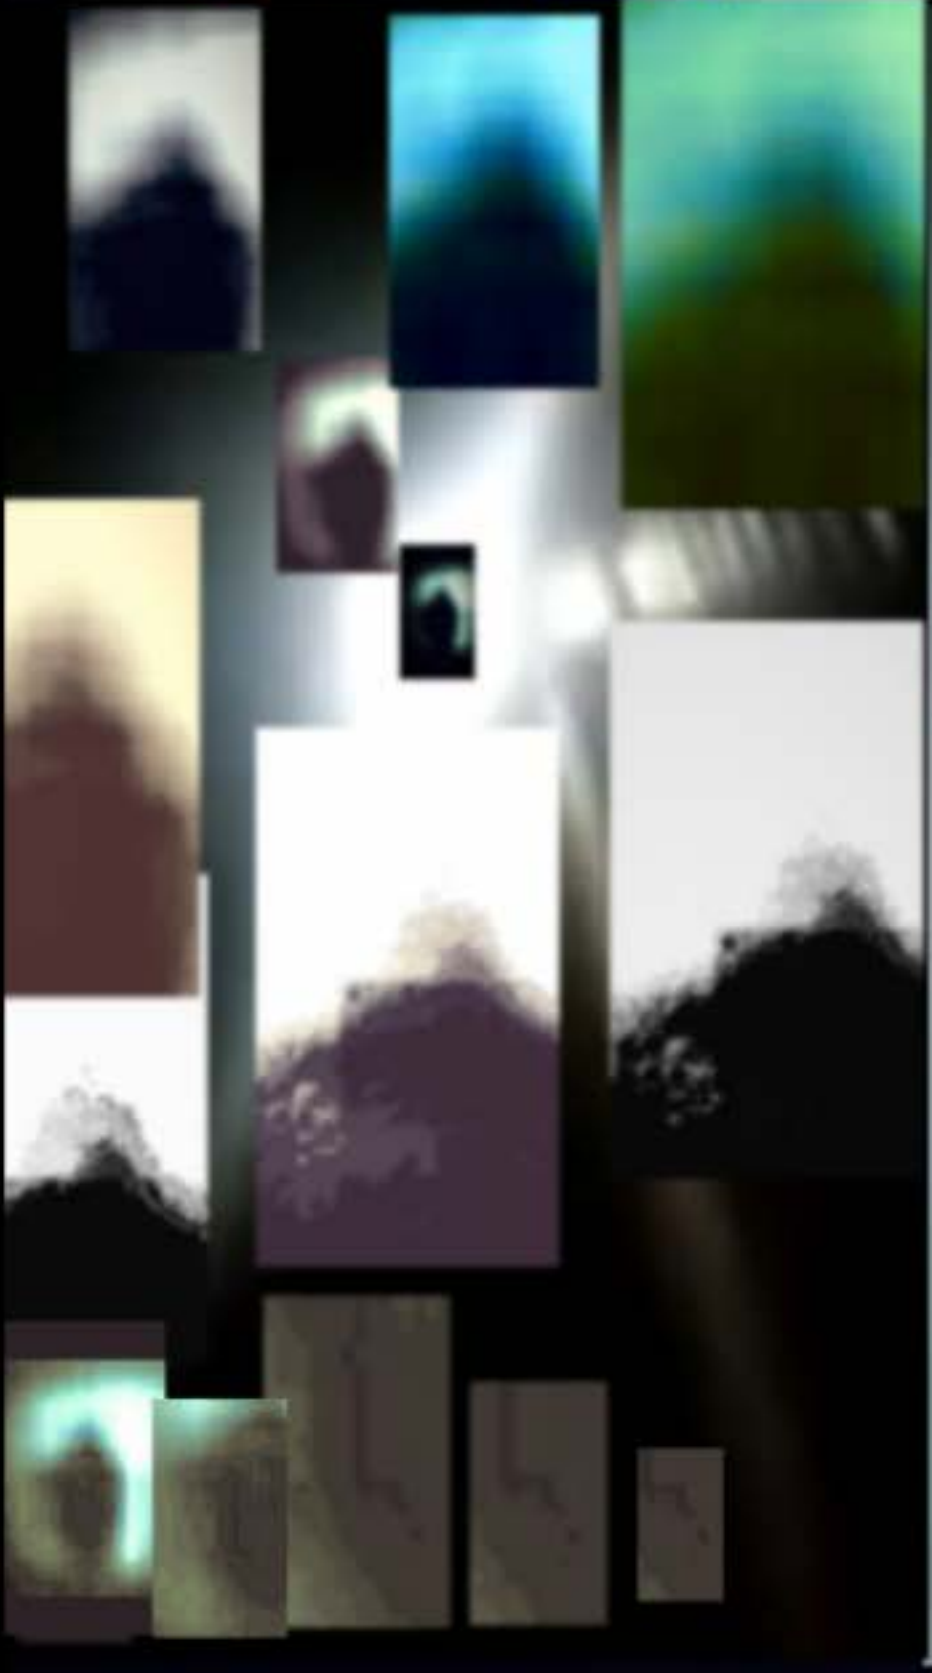

The claim by the Trigonometry Scientist is —this is a drone—strapped to a rocket... explains rocket plume as the light that CIA measured at 8 feet wide as it leaves the ship.Refracting.Valid. This miracle contraction,launched 20 miles from due west ...built by a 10 yr old ,living 30 miles to the west.The scientists further finds this UFO was actually " caught ", on very sophisticated, state-of-the-art, military grade radar;at a radar installation west of the UFO sighting 25 miles away,in Coopersville, Michigan. They ,at the installation, saw the UFO go up,to 9 thousand (9,000) feet (foot) and run out of fuel...it then fell to 6 thousand (6,000) feet ; before deploying chute. This is what the scientist, with the reward, found; for my little UFO .

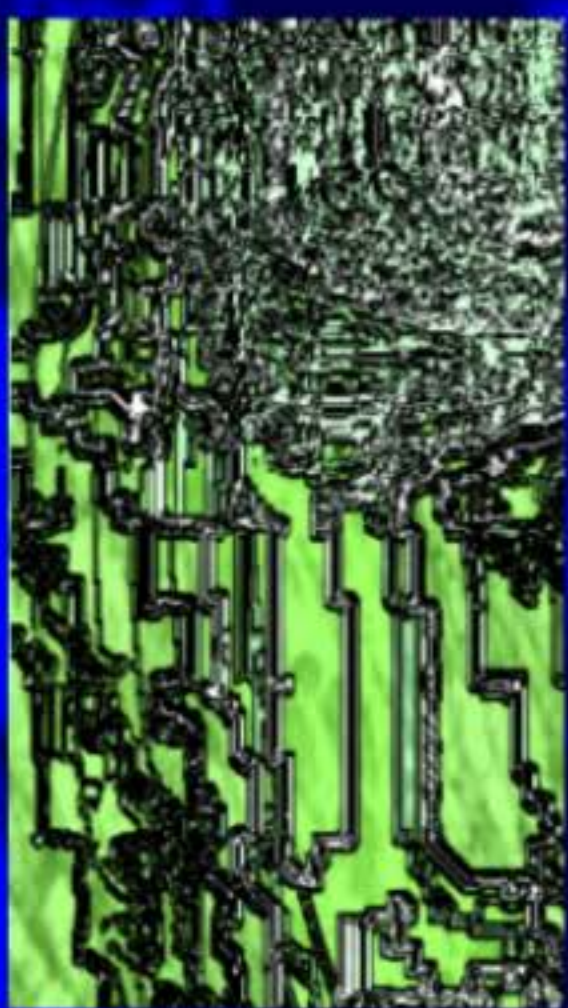

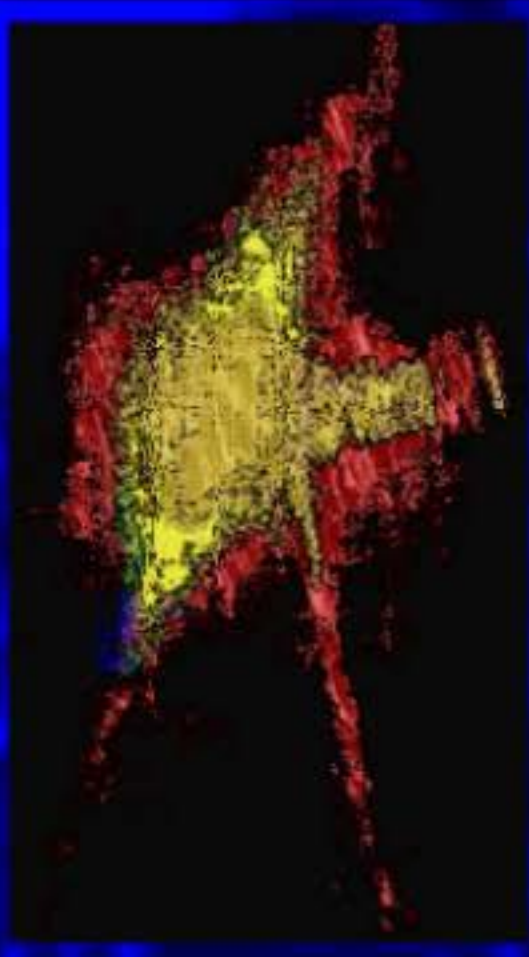

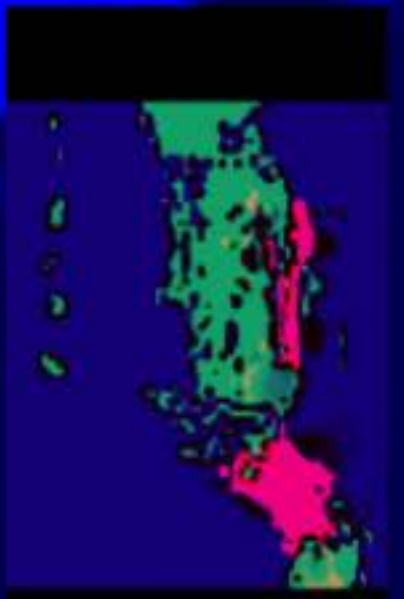

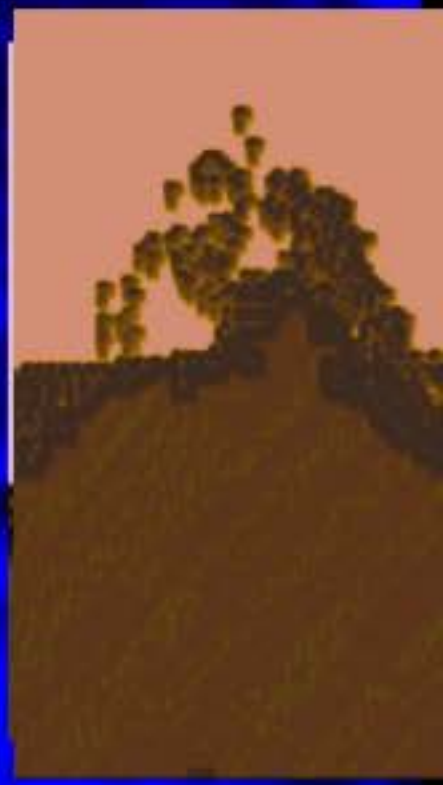

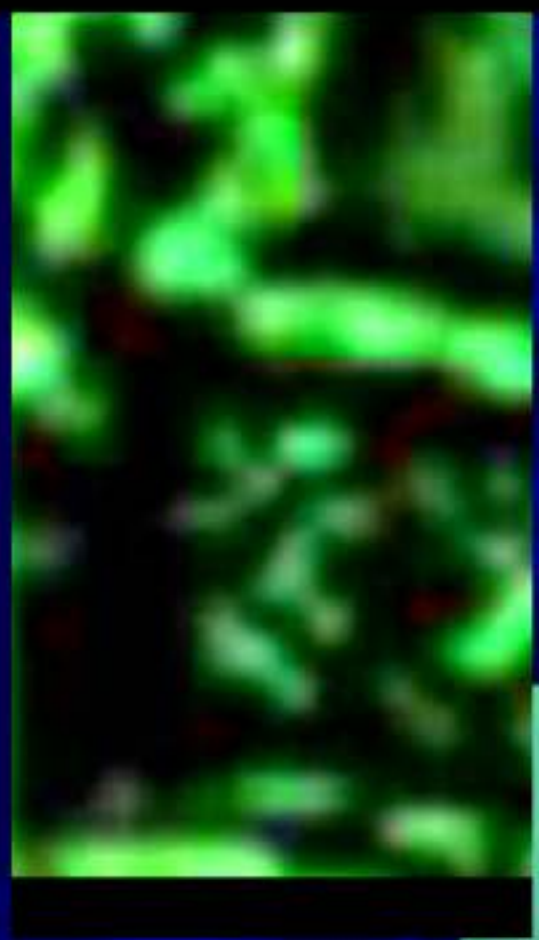

That's not good !
 I saw that light, an hour later,from the ufo sighting,with officers present...
 That is not what I have— that is— refracting !
 Measured !
 Where is the radar from an hour before?
 Where is the honesty ?
 Anyway ,MUFON and the trolls have a hay-day , with the streetlight UFO...
 Keep reading....

in left corner....) Roof appears bronzy in color... beam
from ship exits on an angle, and, at my vicinity - and
is brownish tan as it traveled low slow and clear on
video. I "let it go", when video was a "fail" etc... and

"allowed it to travel off" without further pursuit, going
north east (rising sun side) in its straight line
path... Soon after I called 911. 2 Sheriffs deputies, 2
cars... 2 mins later... during report, I showed the officer
a bright light leaving our planet... I said "do you see
that!" He said, "I see it." ... I said "do you got that!"
He said, "I got it." And we watched for about 5-7
seconds this Venus sized object (as seen from Earth
with the unaided eye, like a star...) go away from us,
clearly, at about 95,000 feet or whatever is high, high
in altitude, near space gravity... at an arms length
, traveling the distance of an open hand— in six
seconds about— at about a degree, to due north on
the sighting location, of 86 going to 87 ... straight
path, then "bam" ... lights out, like somebody threw a
bucket of cold water on it... or it went into the belly of
the mother ship... or it hit a worm hole or something it
just— bam was out. Gone. We both said
"Woah!" ... officer said "I never seen anything like that
before!" ... Other officer stepped out, "what was that?"
I said, "saw another UFO." Now I reported to Nat. UFO
rep. ctr in Sept time... he, Pete, got back after some
serious phone tag, Lol, to tell me "we don't
investigate" ... I said "do I try collage labs?" He said
"yea!" ... That was Jan-Feb. Big ol waste a time

right... got a little "traction" with US Air Force (former)
and THIER friends with a super computer... They
found in Feb ... The beam is REFRACTING, repeat
REFRACTING... not that I said reflecting ... ok... it is 5
(five) feet wide, ok, in width as it exits the craft in
question... ok they said it is not a dowel or dowering it
isn't even a post or wood or steel or a stadium light or
street light etc... It is probably plasma or a tractor
beam etc ... yet, it is 30 (thirty) feet wide or in width at
some point down away from the ship. The entire craft
, light and all, is in full video view etc... you just zoom in
after you pause Etc... Etc...

Acepup.

What I think happened, is, I also "pictured" and "searched" for the "proper Ufo look".
—As pertaining to camouflage and the use of it therein, particularly in crafting Ufo.
What stands behind it?How is it made?
What will be the winning design to maybe look out for or even forward to?

I'm thinking all this prior,or before the incident—This story takes place about 1-4 weeks prior,so in the month of July,2014.

How would Venus look?
Like a star.

So match it.Match the look of a star or venus,from earth and "blend in" easy....but think, what is the detail, NOW, if it's close...! Looking at the feeble light, that was the security light, and what beams it sends. I thought, it has a bit much or things about it, and any ufo would need less ornamenting anyway....since i can't see a complete use in half of what shines off such a craft, and then go to be used as part toward a spacecraft, highly capable and all, yet, all was contrived and used by the real ufo too .wasn't it...The beams of light...the hues....shapesthe "chatter" etc....

Don't tell, but, I have designs on a baby-blue Ufo that flies at —when else?
When the sky is blue .

An Ufo that is cloud- looking.... or matches a FAA set-up on choppers or other craft drone lights etc....

That's prior stuff....

I "see" how my real Ufo is indeed street "lighty" even if it's a security light and off- street, etc....

P.s.
See photo of the trifecta...
security light, Ufo and cell vid.

I'm saying I stepped out, pondering the camouflage look for space ships to travel, undetectedand in my search....looking high in the night sky, a month prior, let's say, and saw the security light and took on an epiphany...

It is all there....etc....

Alright, so I was looking up north to north west, on the side of the SW corner, again, prior to ;using the night sky as a backdrop to think of a camouflage design and getting the overwhelming glare...of the security light and basically calling it off after a couple few seconds.

In conclusion : I guess ,now I'm thinking it....it came in like ...Venus or a star...

As I began to picture a pin of light being a nice Ufo disguise, all earlier though.

Being a pin- of- light- looking ufo design, that functions, would be a bigger chamouflage concean, I would wager,- to millions of viewers ,at the time....at distance....and look more innocuous, (you can also imagine the suggestion and/or "determinations " for it,) therefore; than all the closeup Luke Skywalker lights — of the real Ufo would be.

They do it so you" loose ",if you take a picture mid~sky, you got a light!

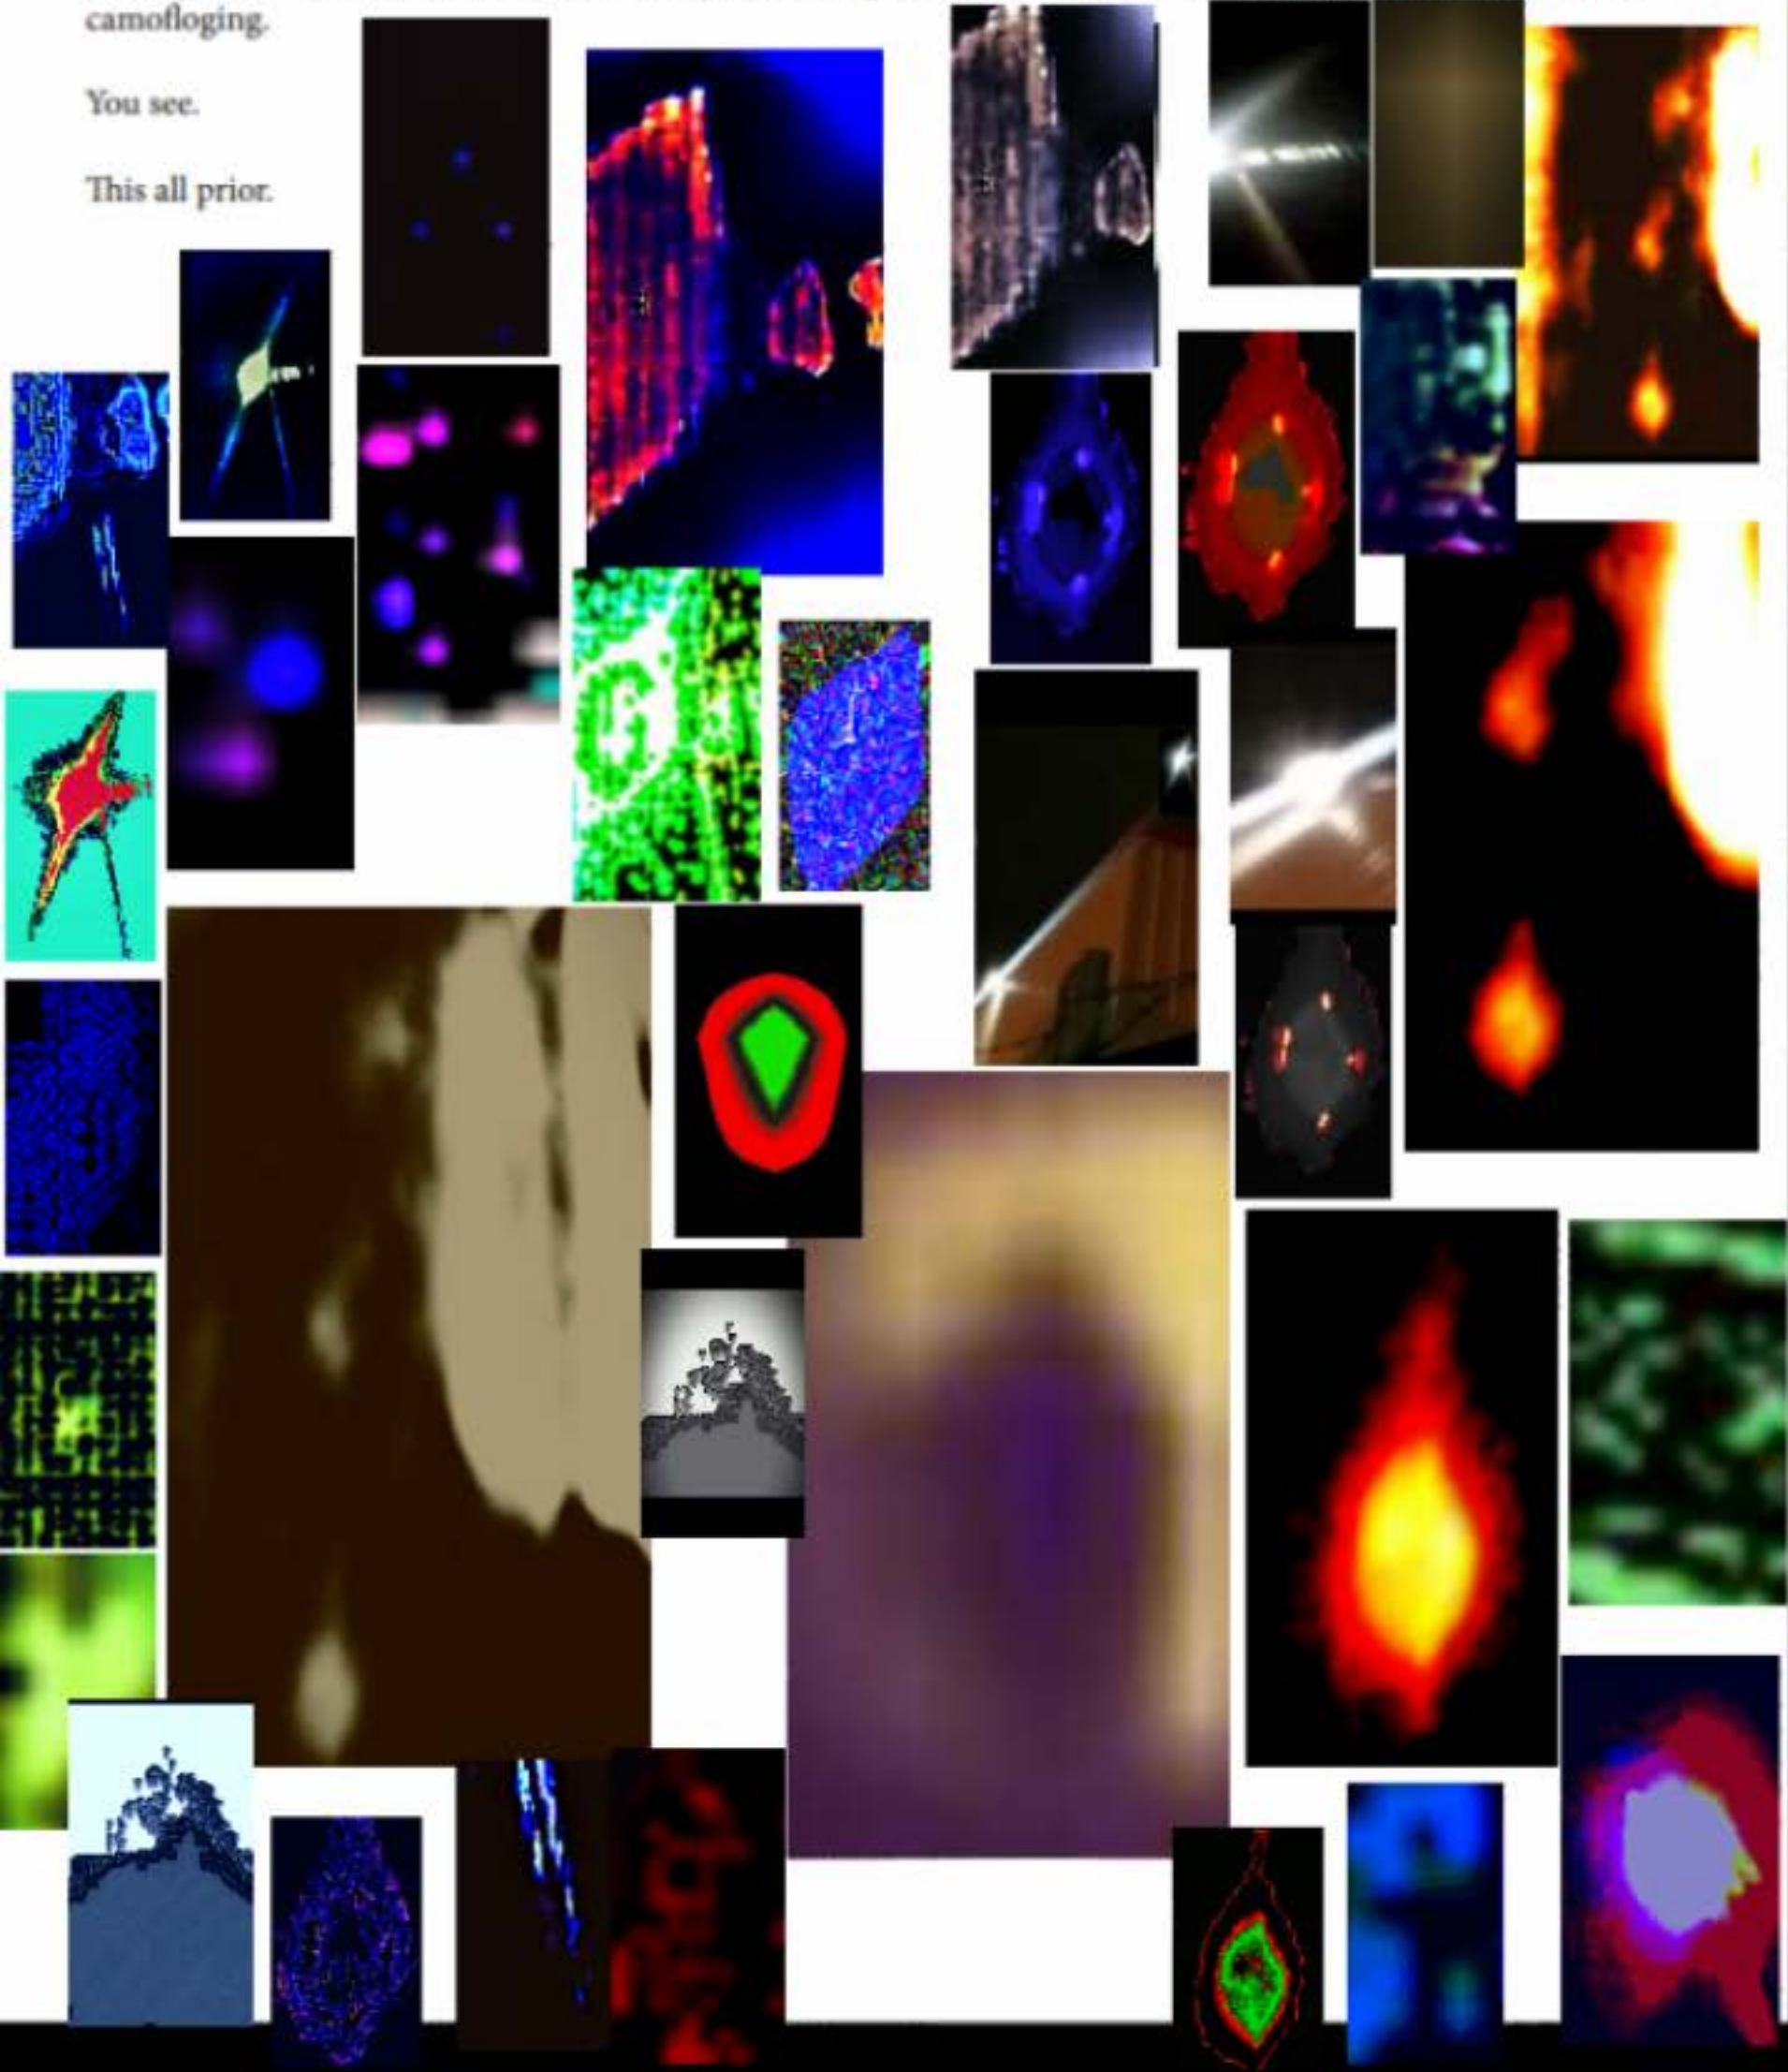

Congradularions... look n see.

You would have no refrence....no extra light....or roof etc....

It also punctuated on how a star or far off light, would, give off its shimmer...what that would be like- --toward camoflogging.

You see.

This all prior.

Congratulations to all the winners of ArtPrize like A-Block and The Marketplace Community Market as the big attraction. Check out who else was!

Check out the winners of ArtPrize 9

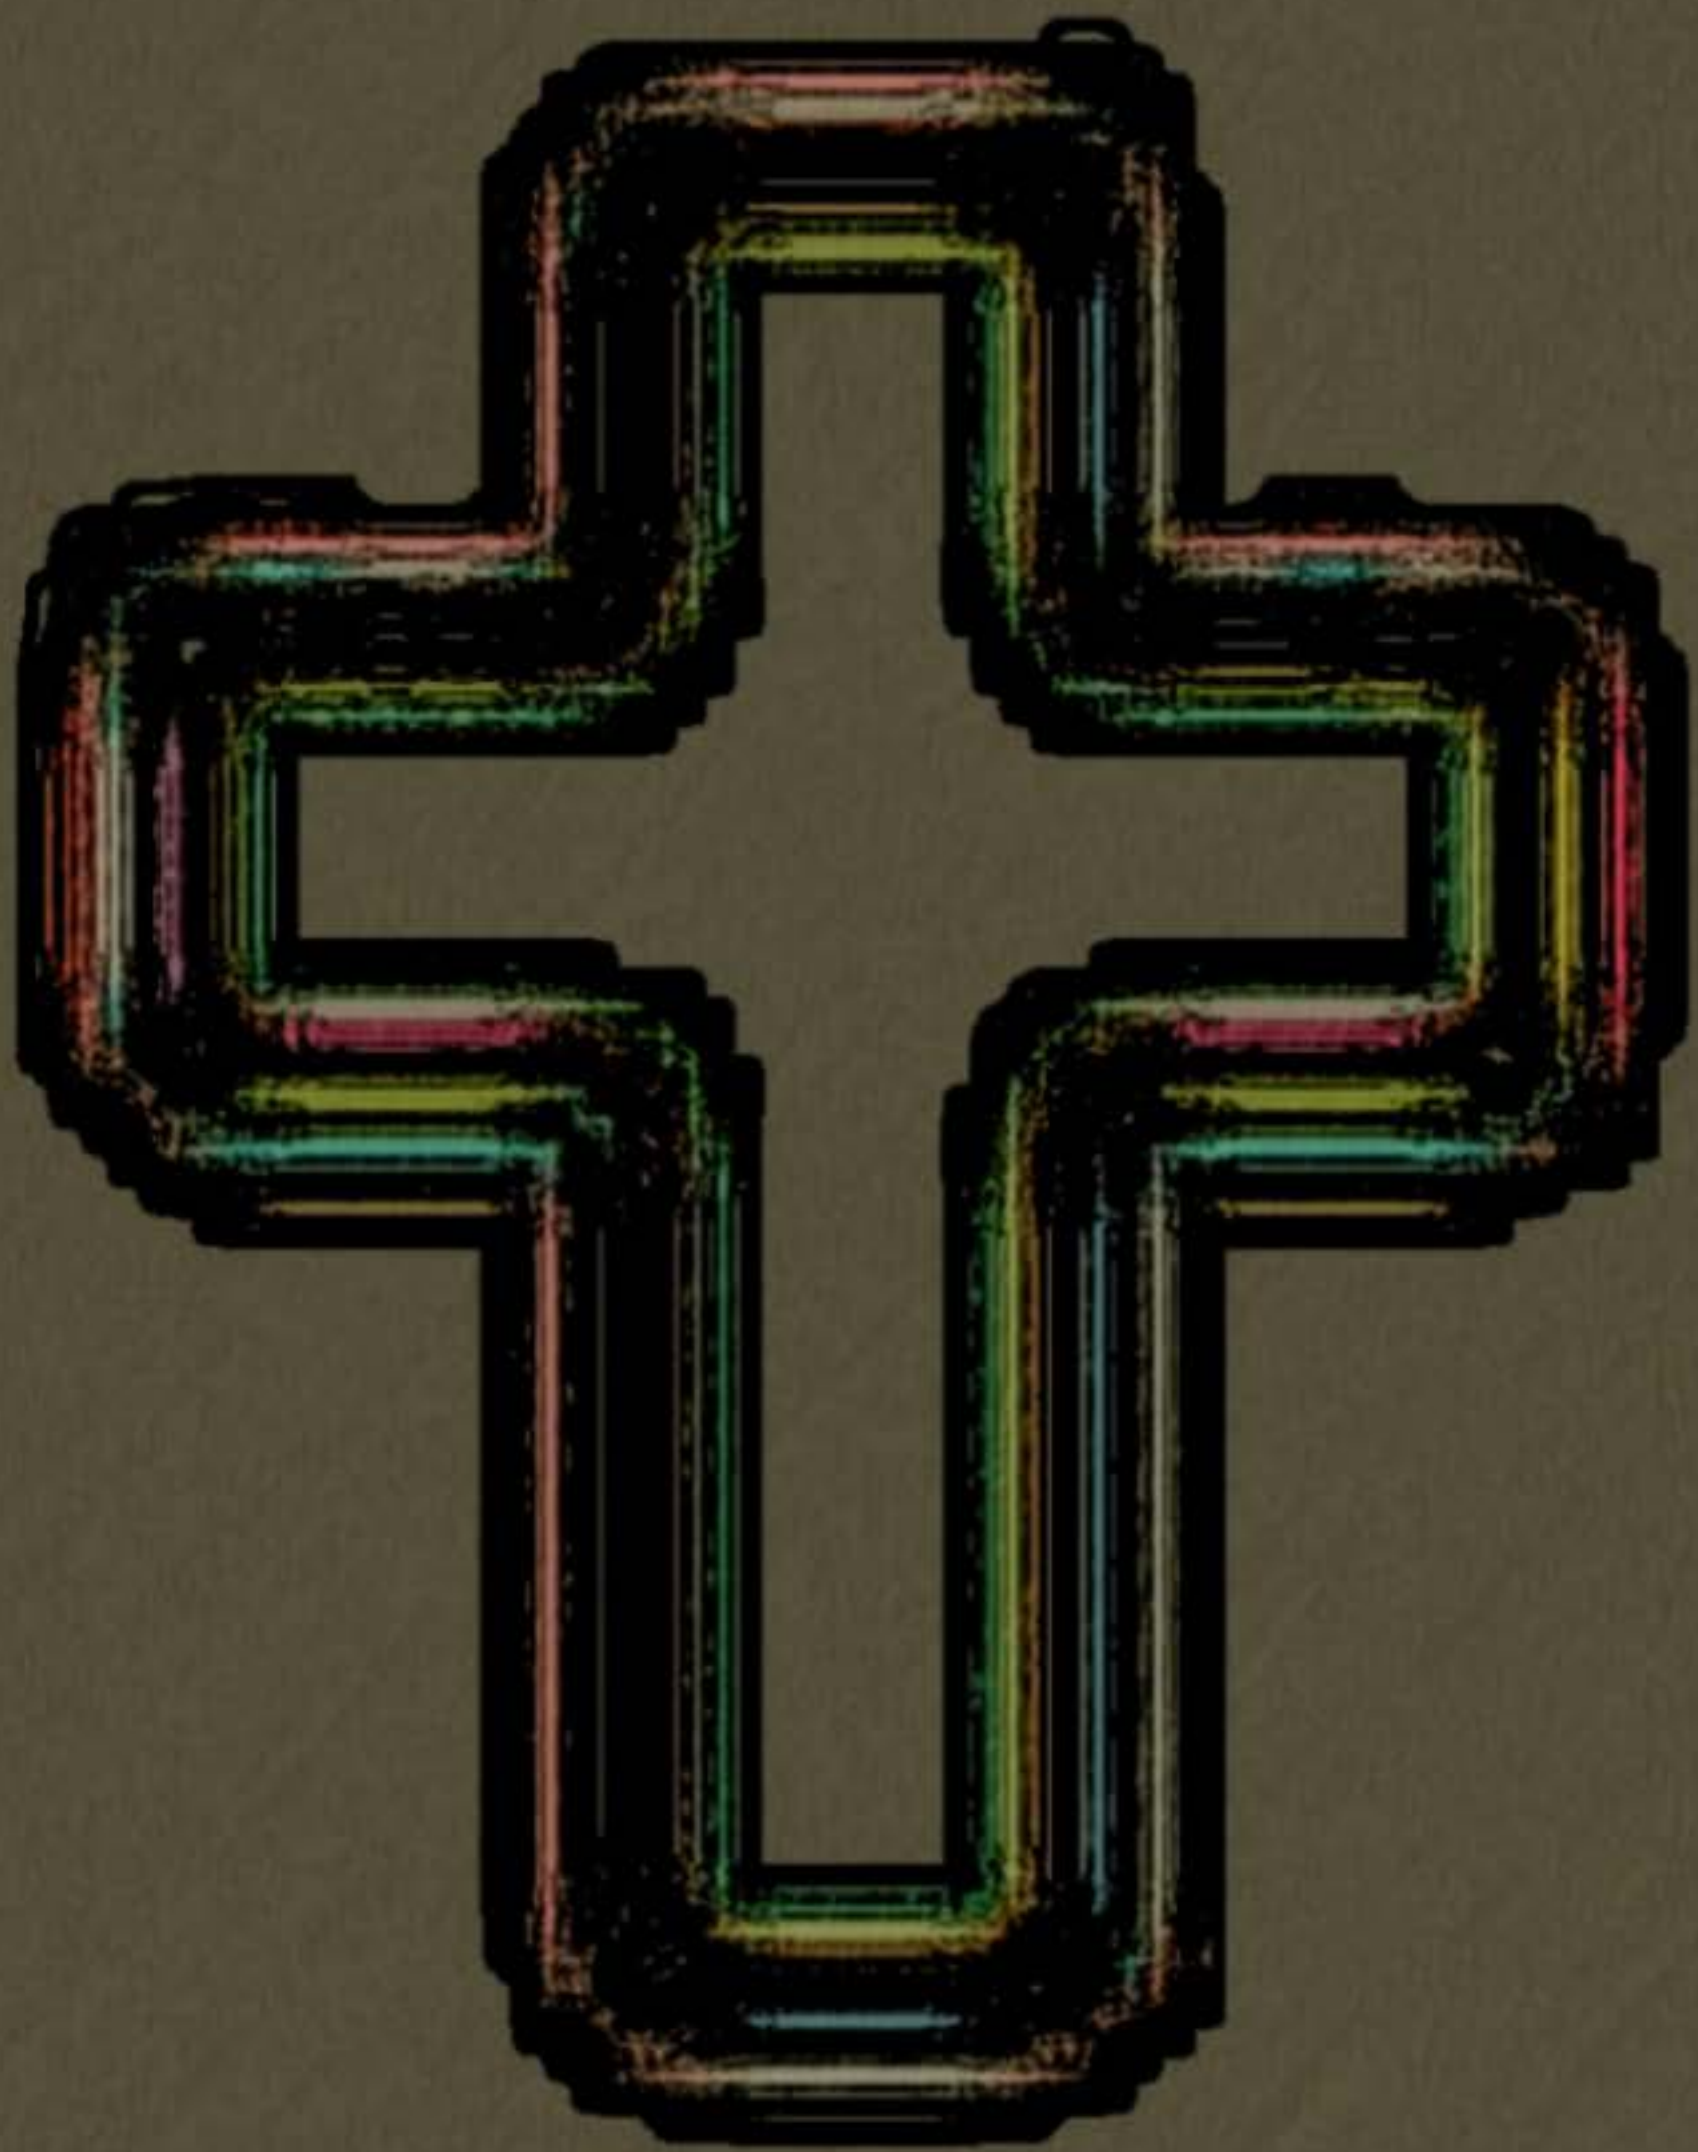

Part of a special look at Grand Rapids' art scene.

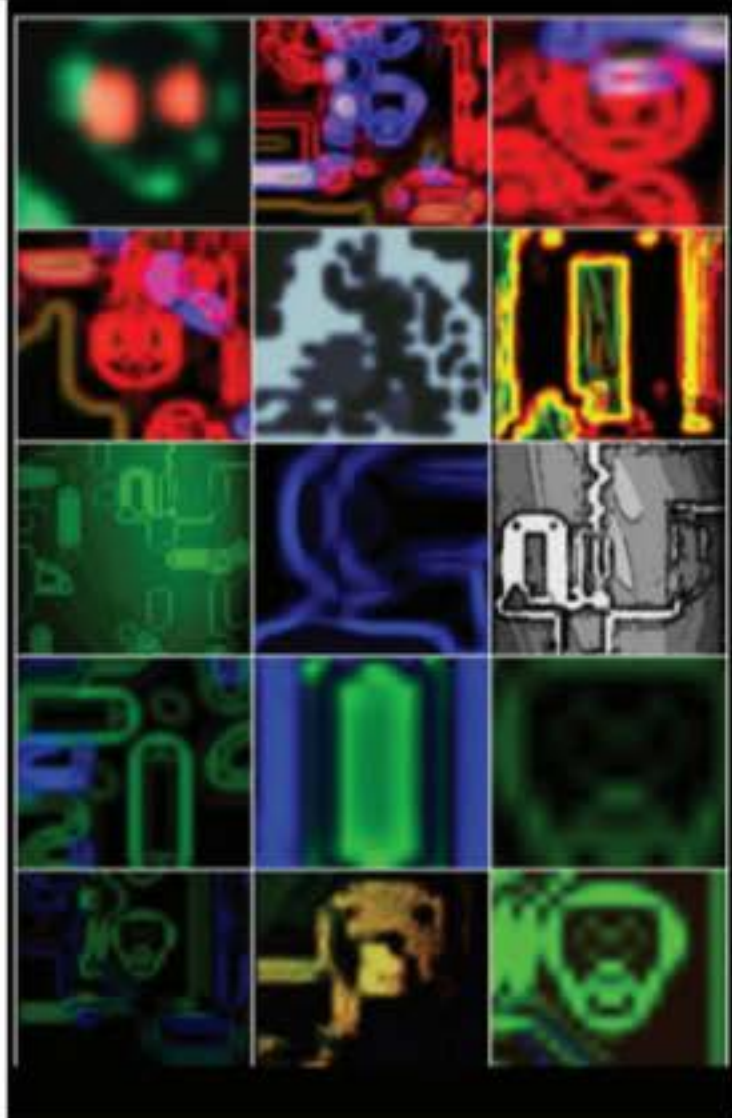

UFO

MERCURY LIGHT

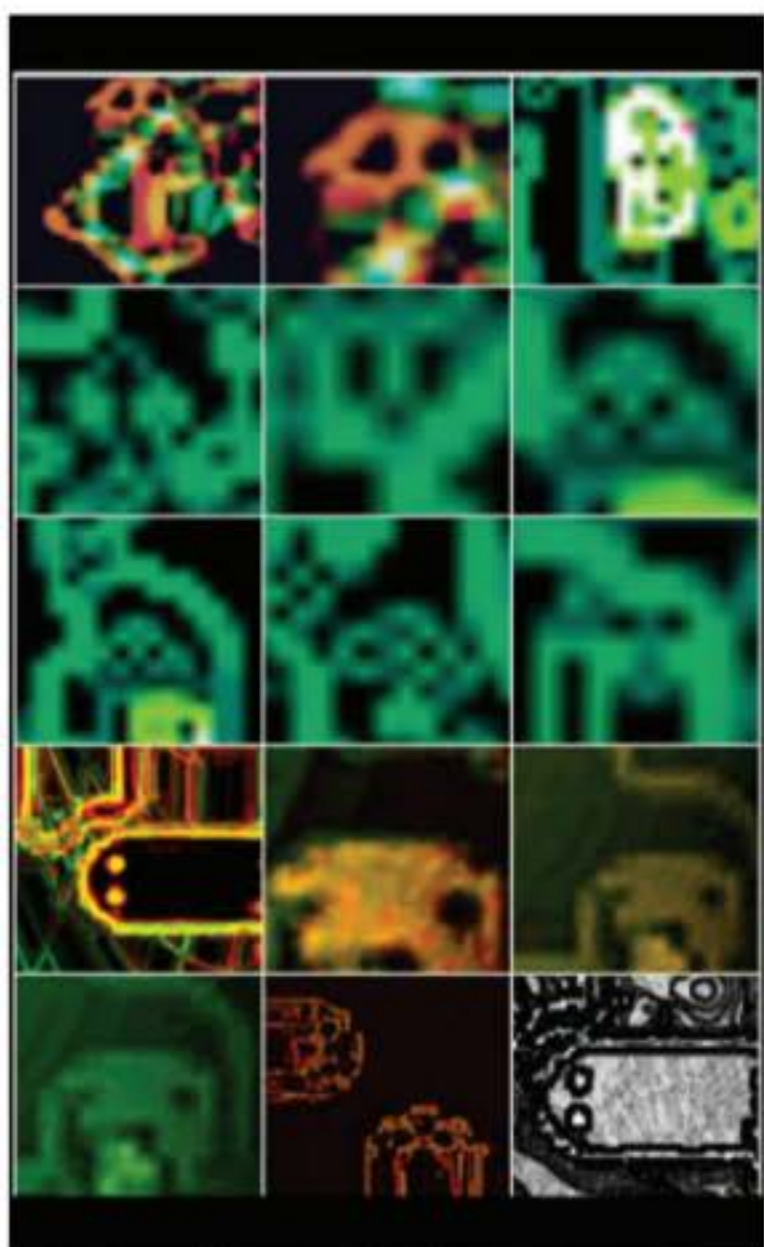

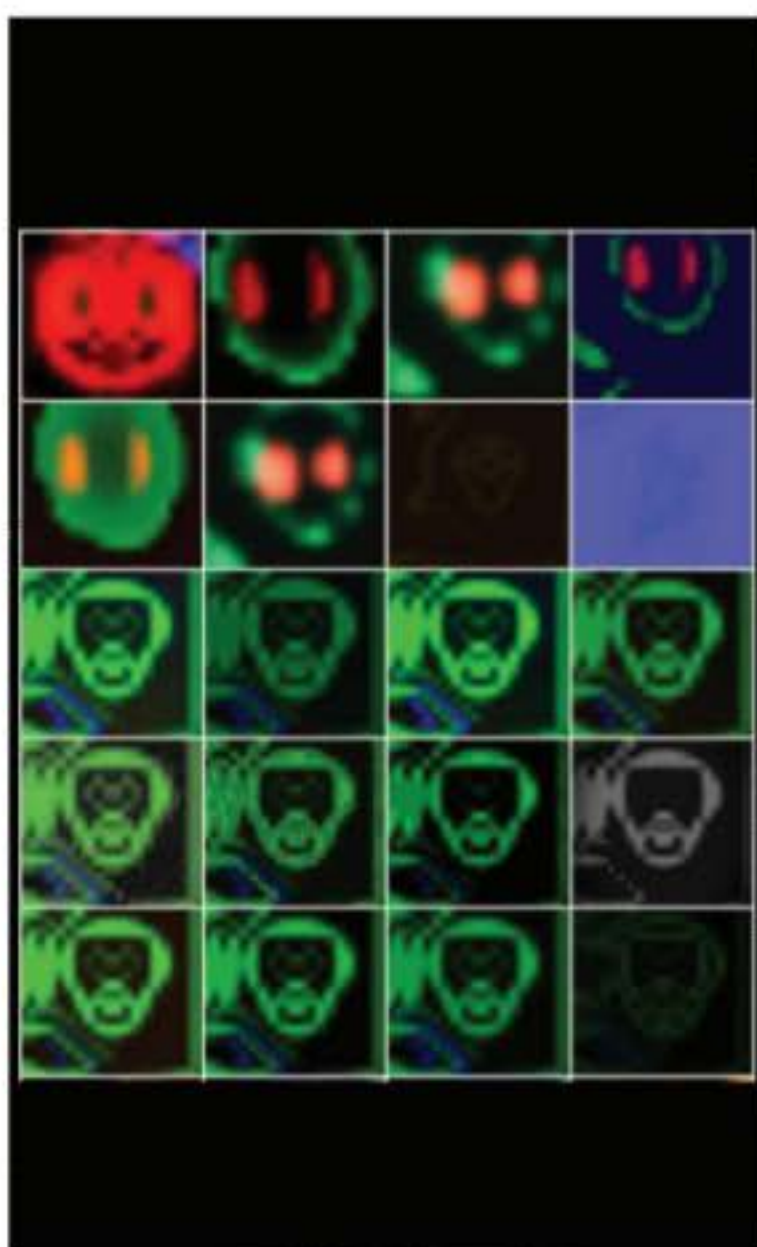

These are images from a bell-shaped ufo in a different location, entirely. This will be another ebook. The images look peculiar. Can you see a golden retriever dog here? How about a frog? A rabbit? An alien?

Can you see any familiar images? These are all from a Bell-shaped ufo. The ufo is about the size of a football field.

These images contain alien ones!

These images are all from The Bell ufo. Look for it next.

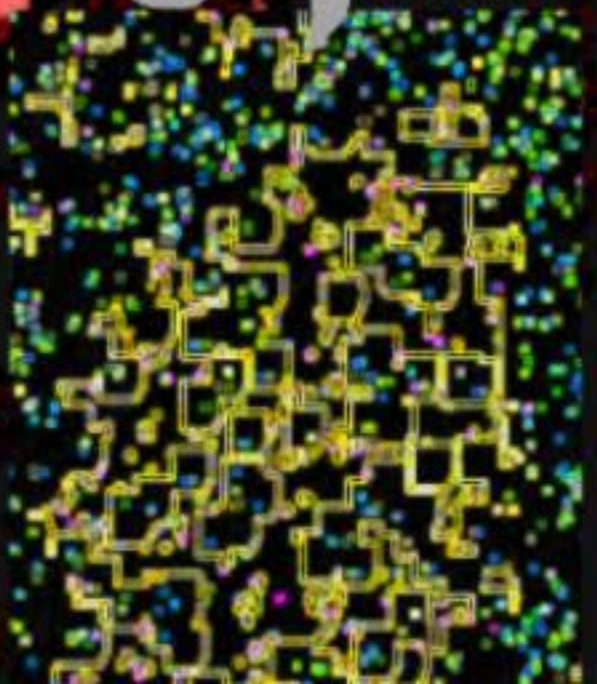

mock

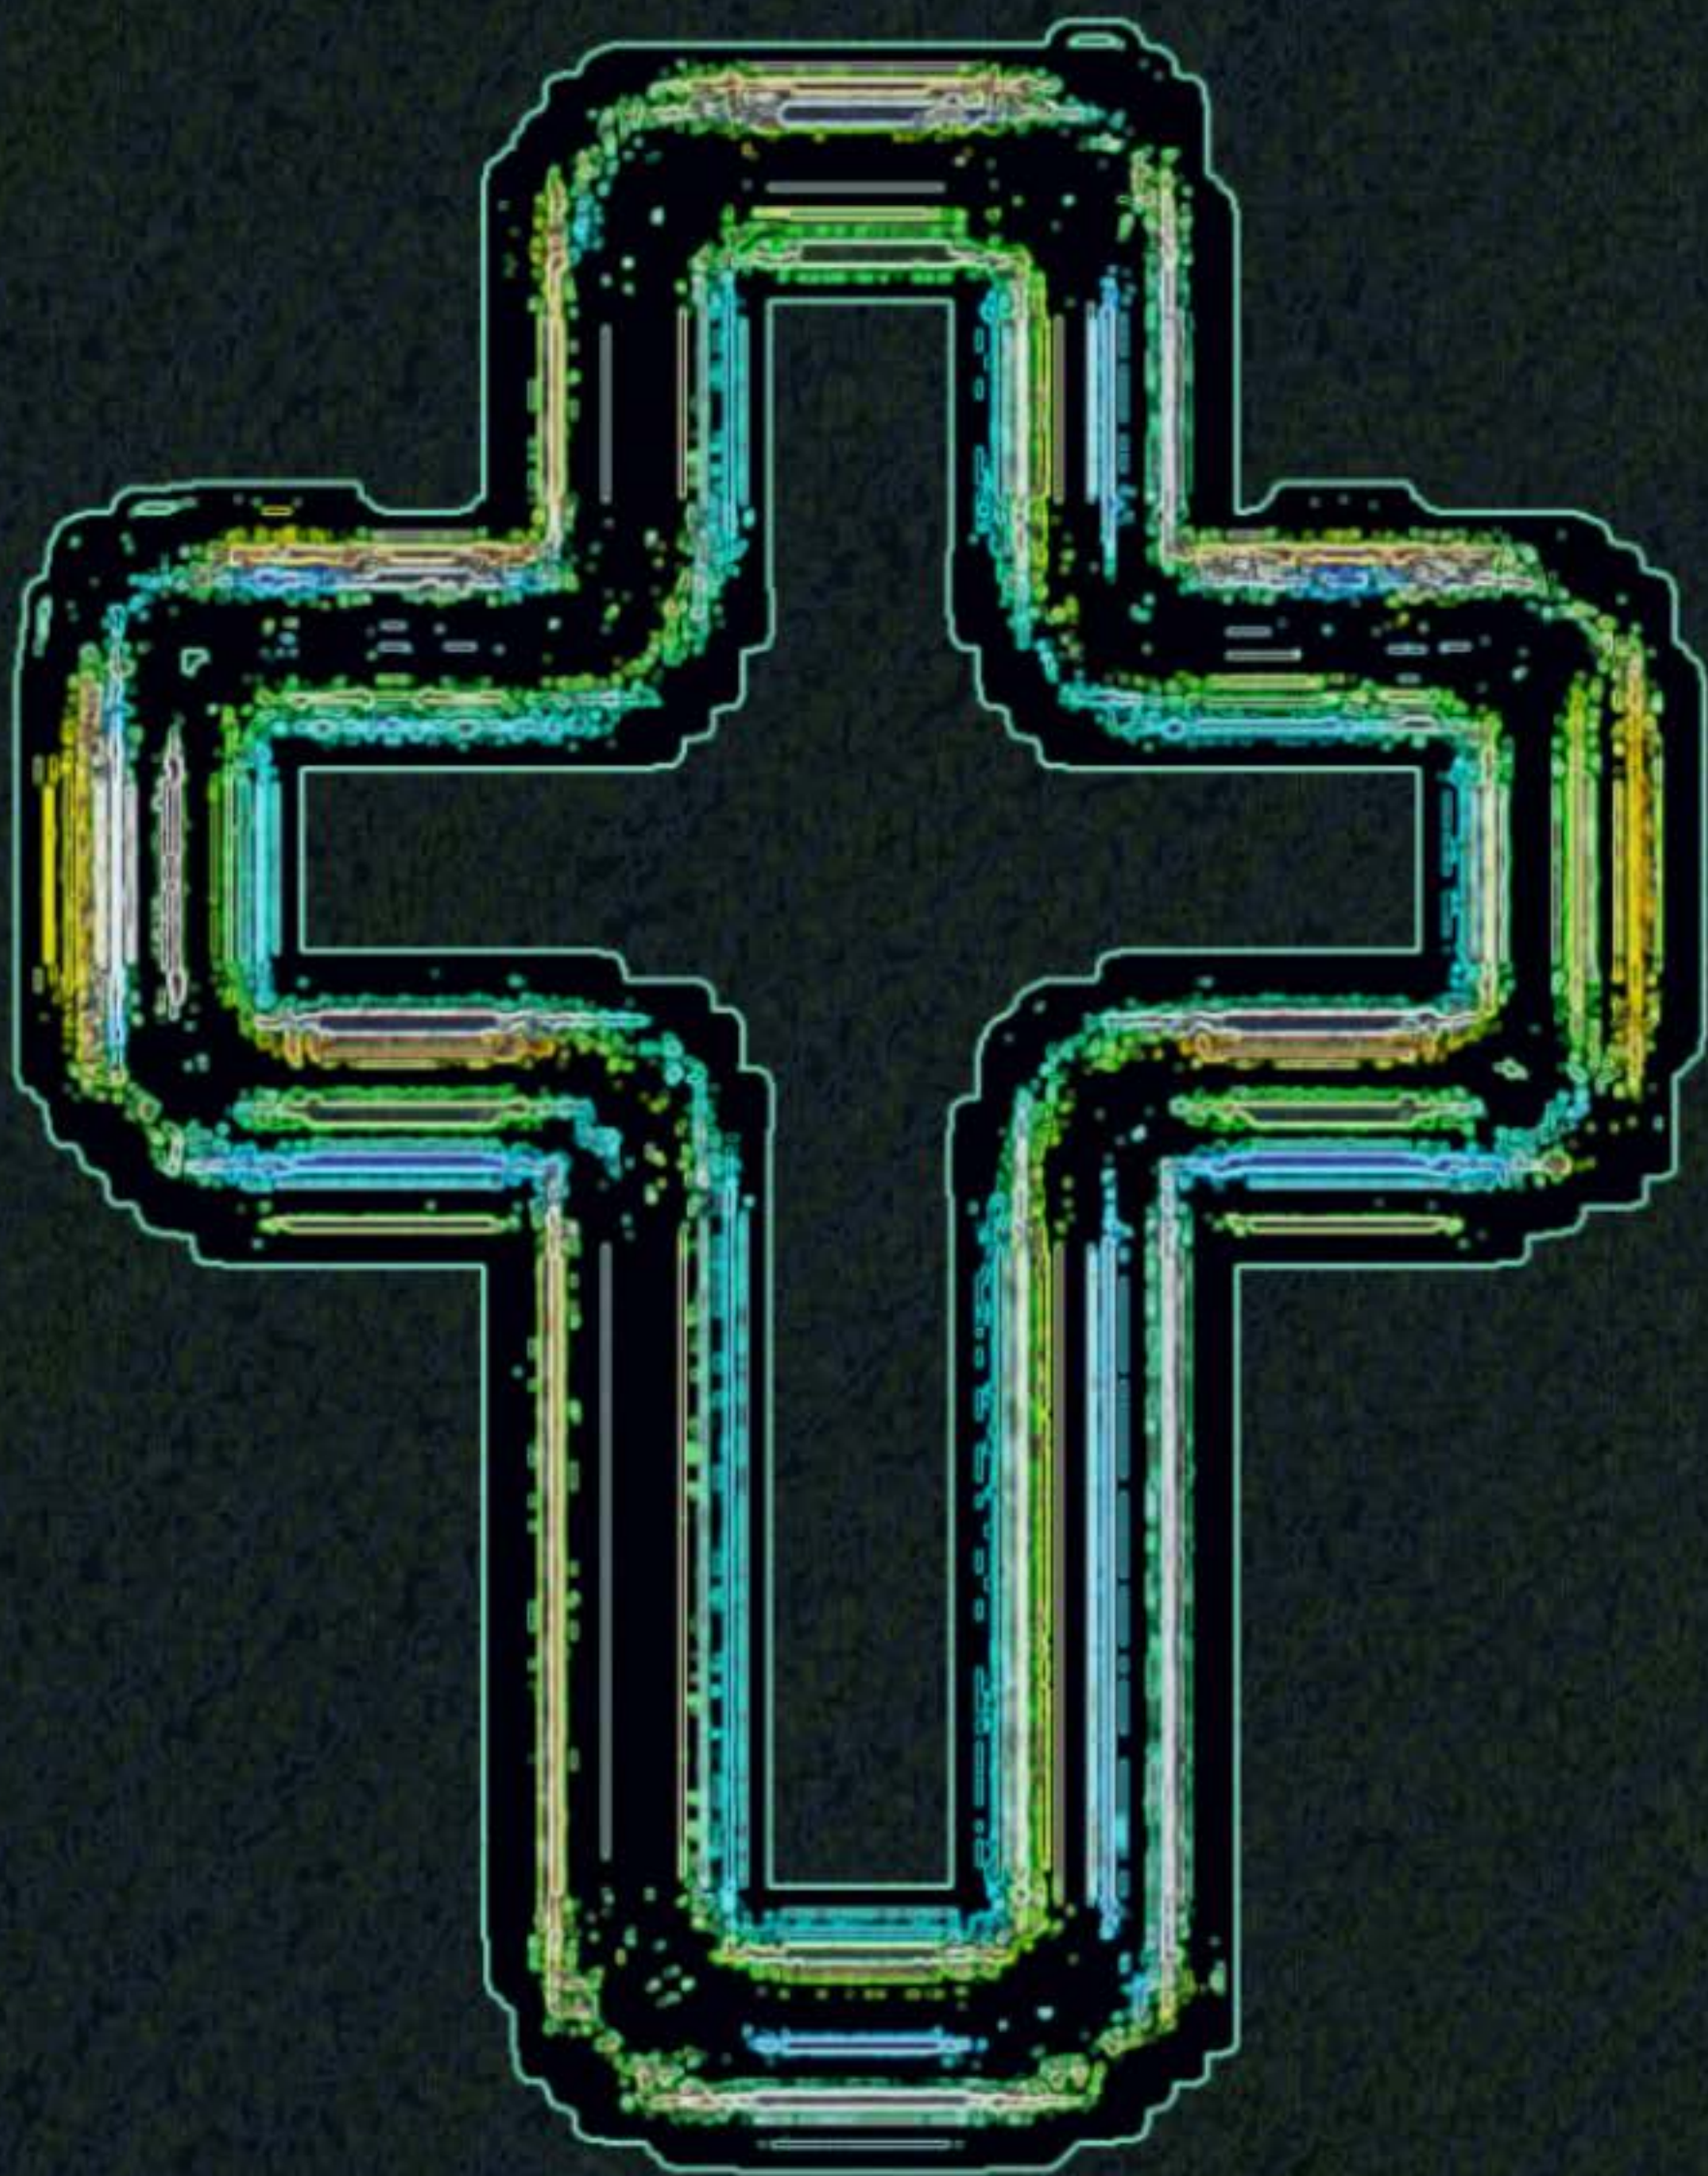

TRES

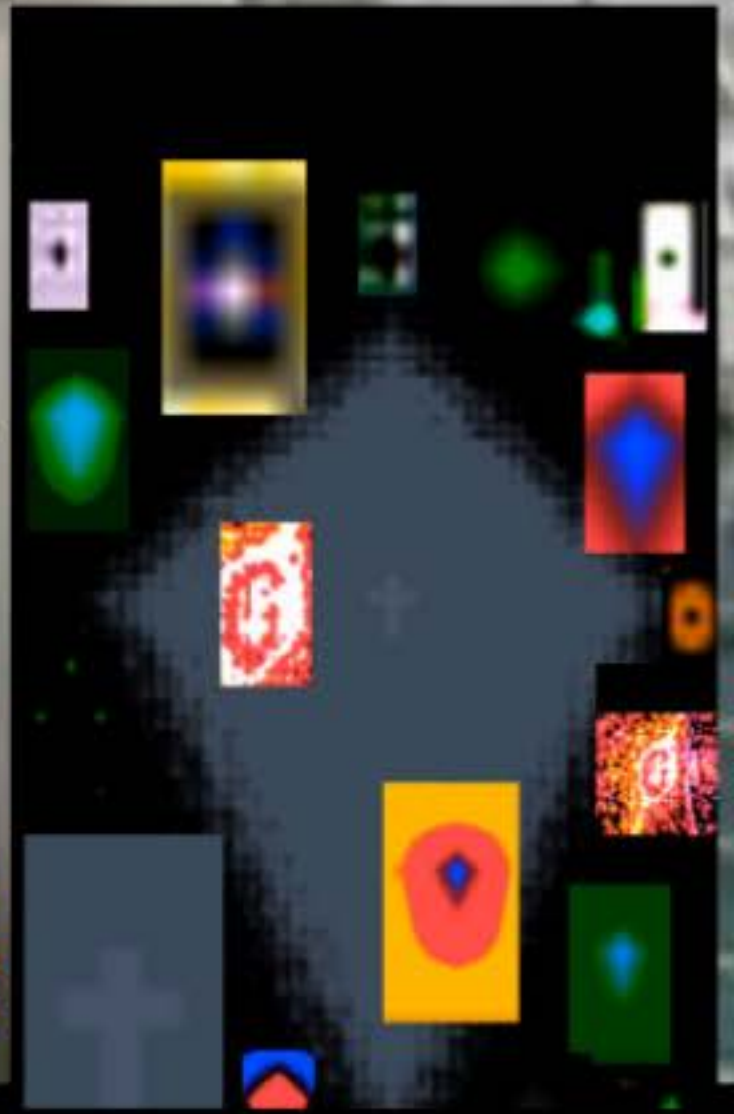

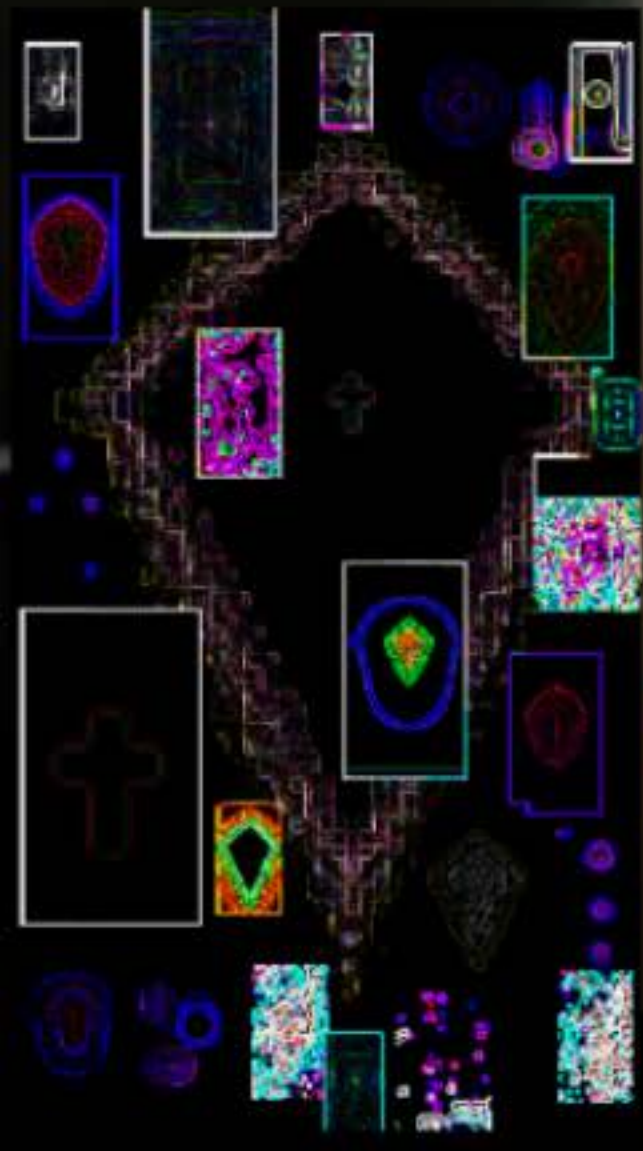

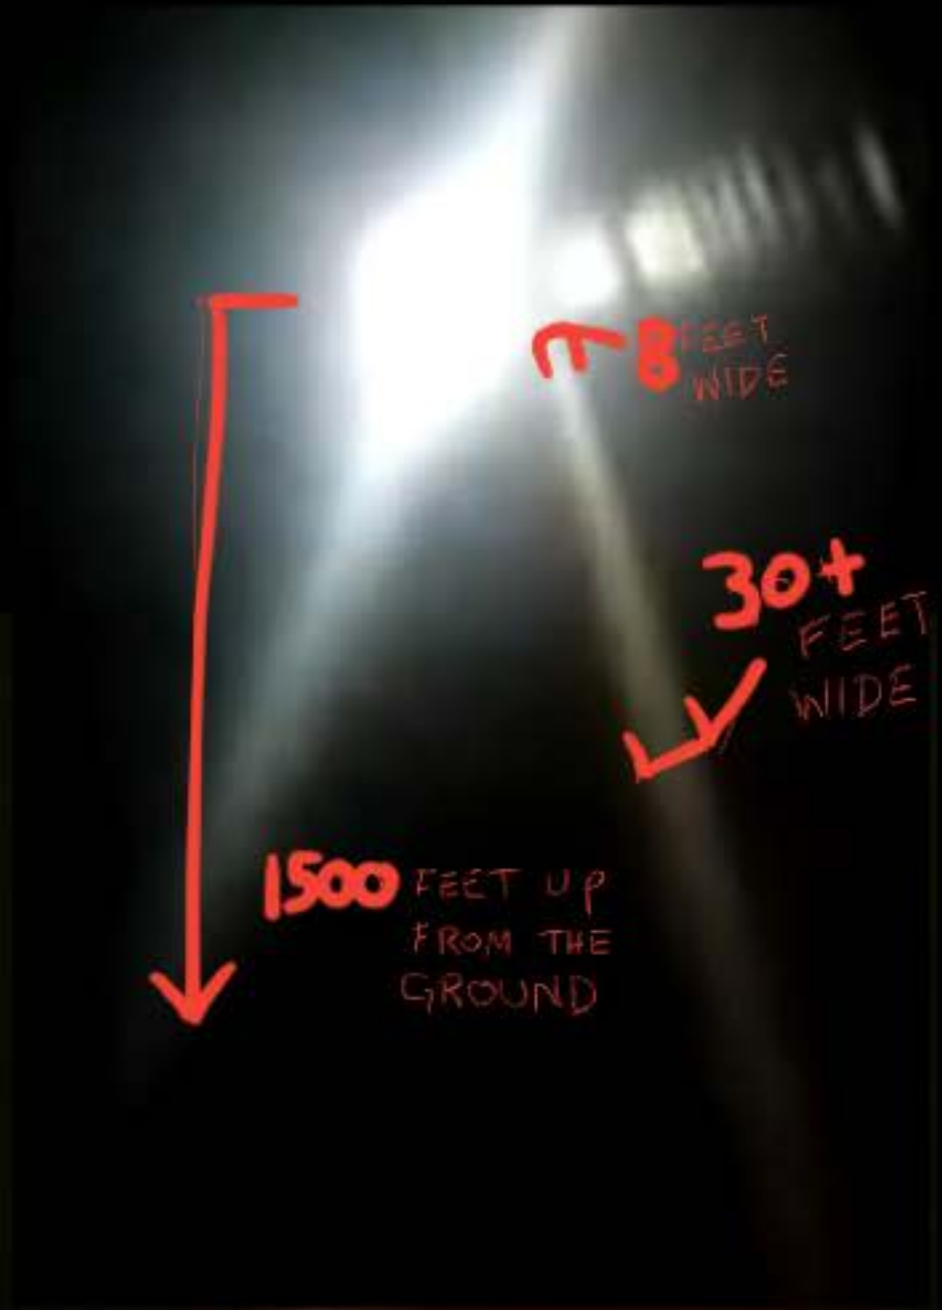

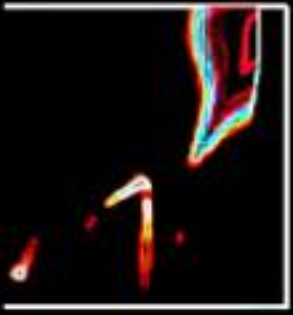

UFO

UFO

UFO

As filtering shows, some alien emerges....

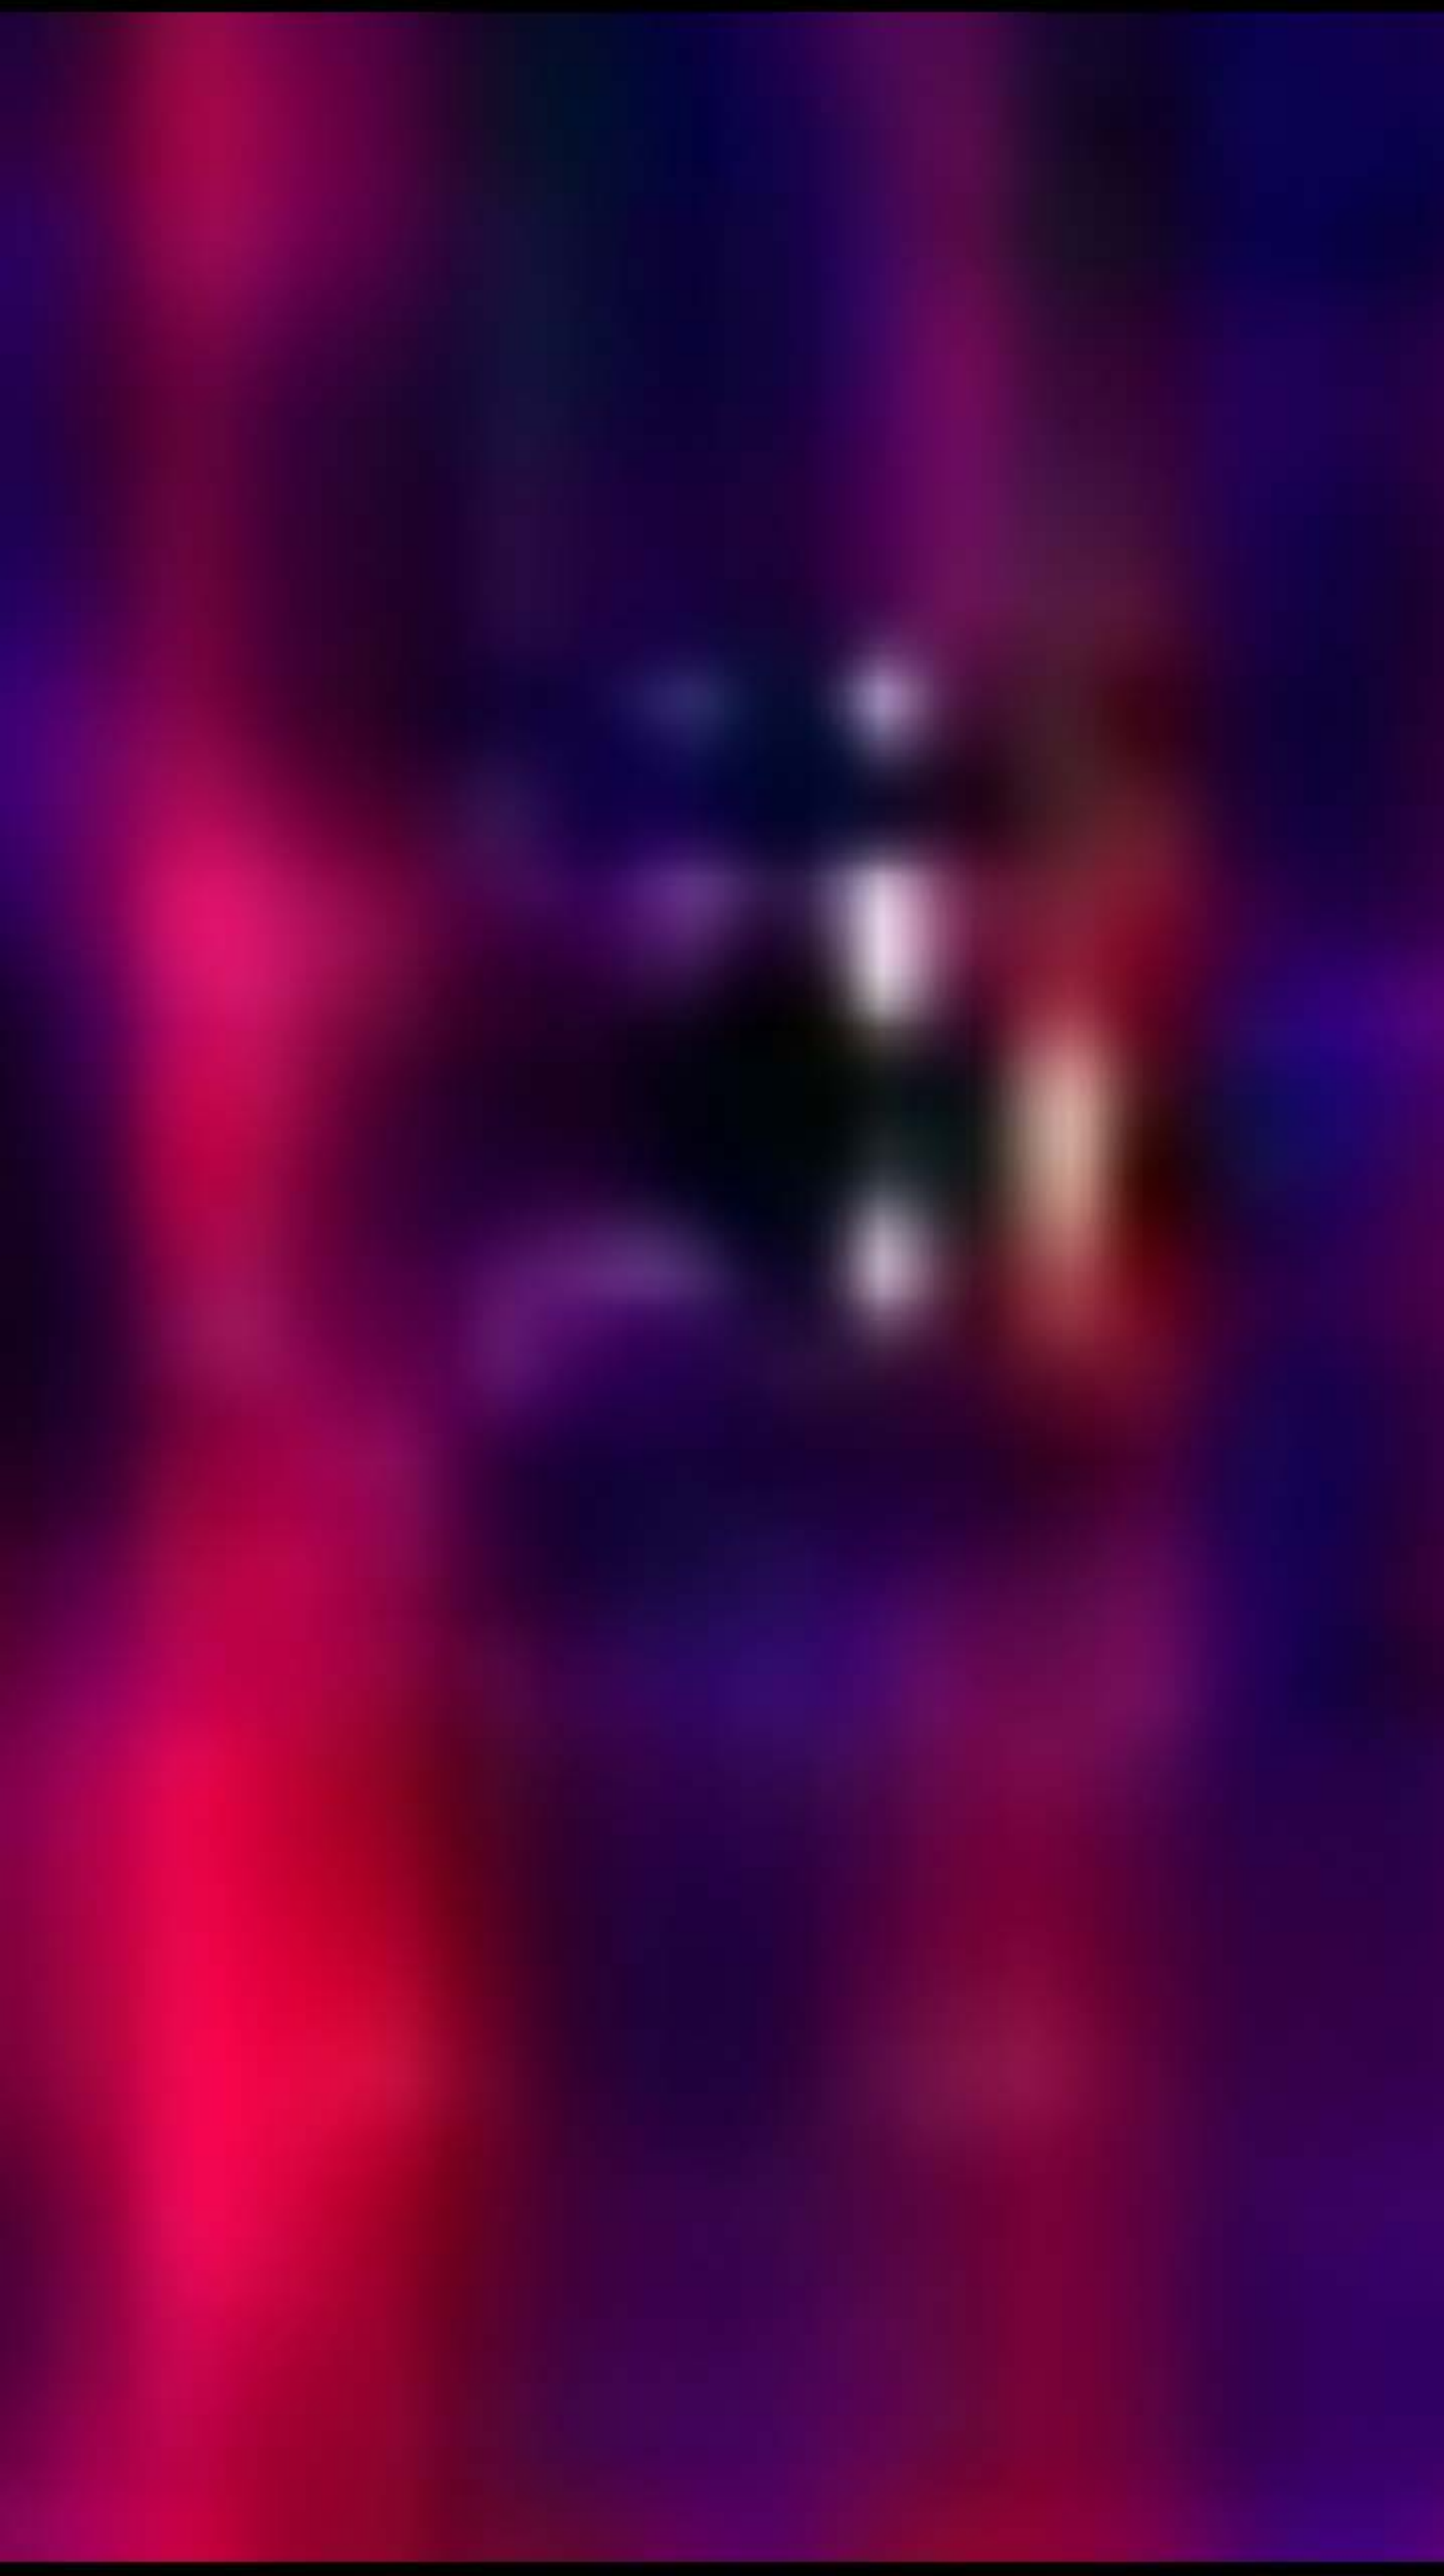

This looks like a figure from the filtered ufo.

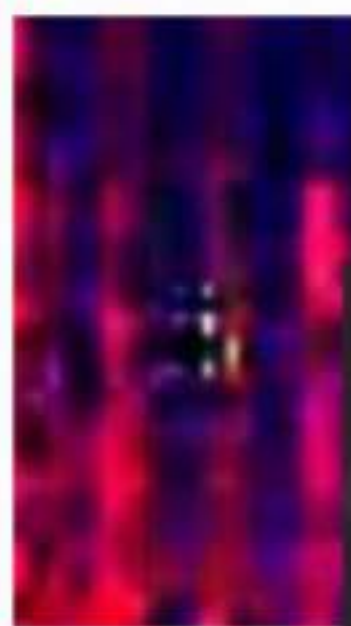

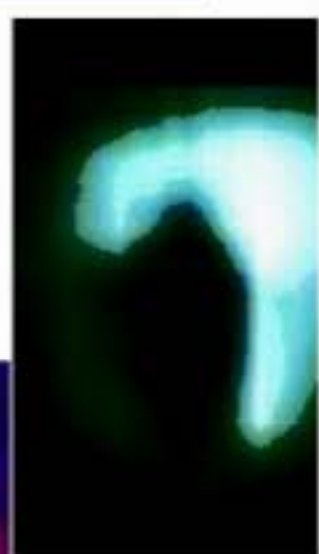

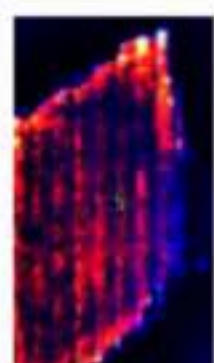

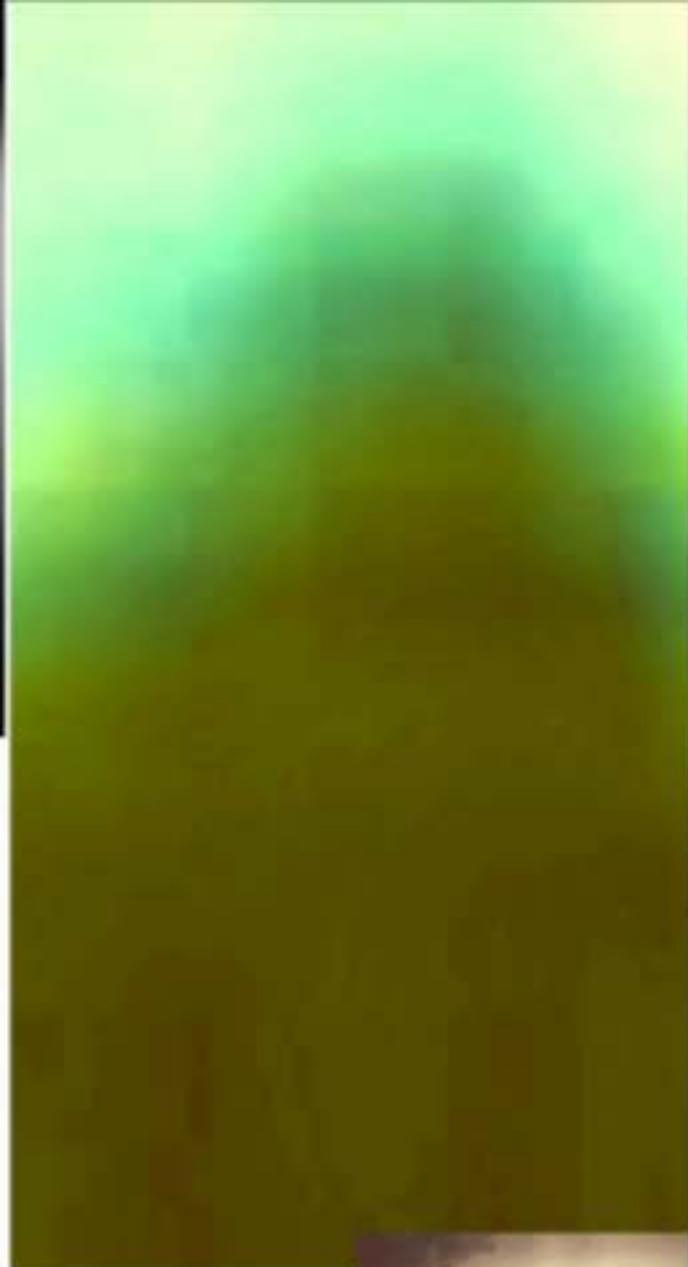

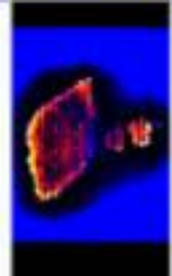

This is close to the alien.

The laser is eight feet wide, at the start, can the alien figures be around 5 feet tall?

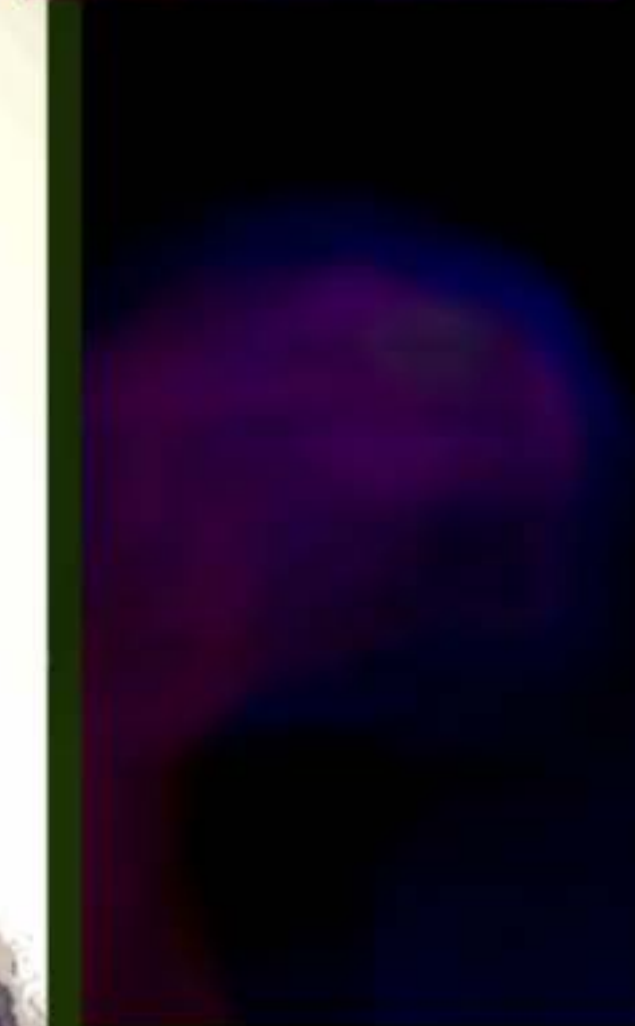

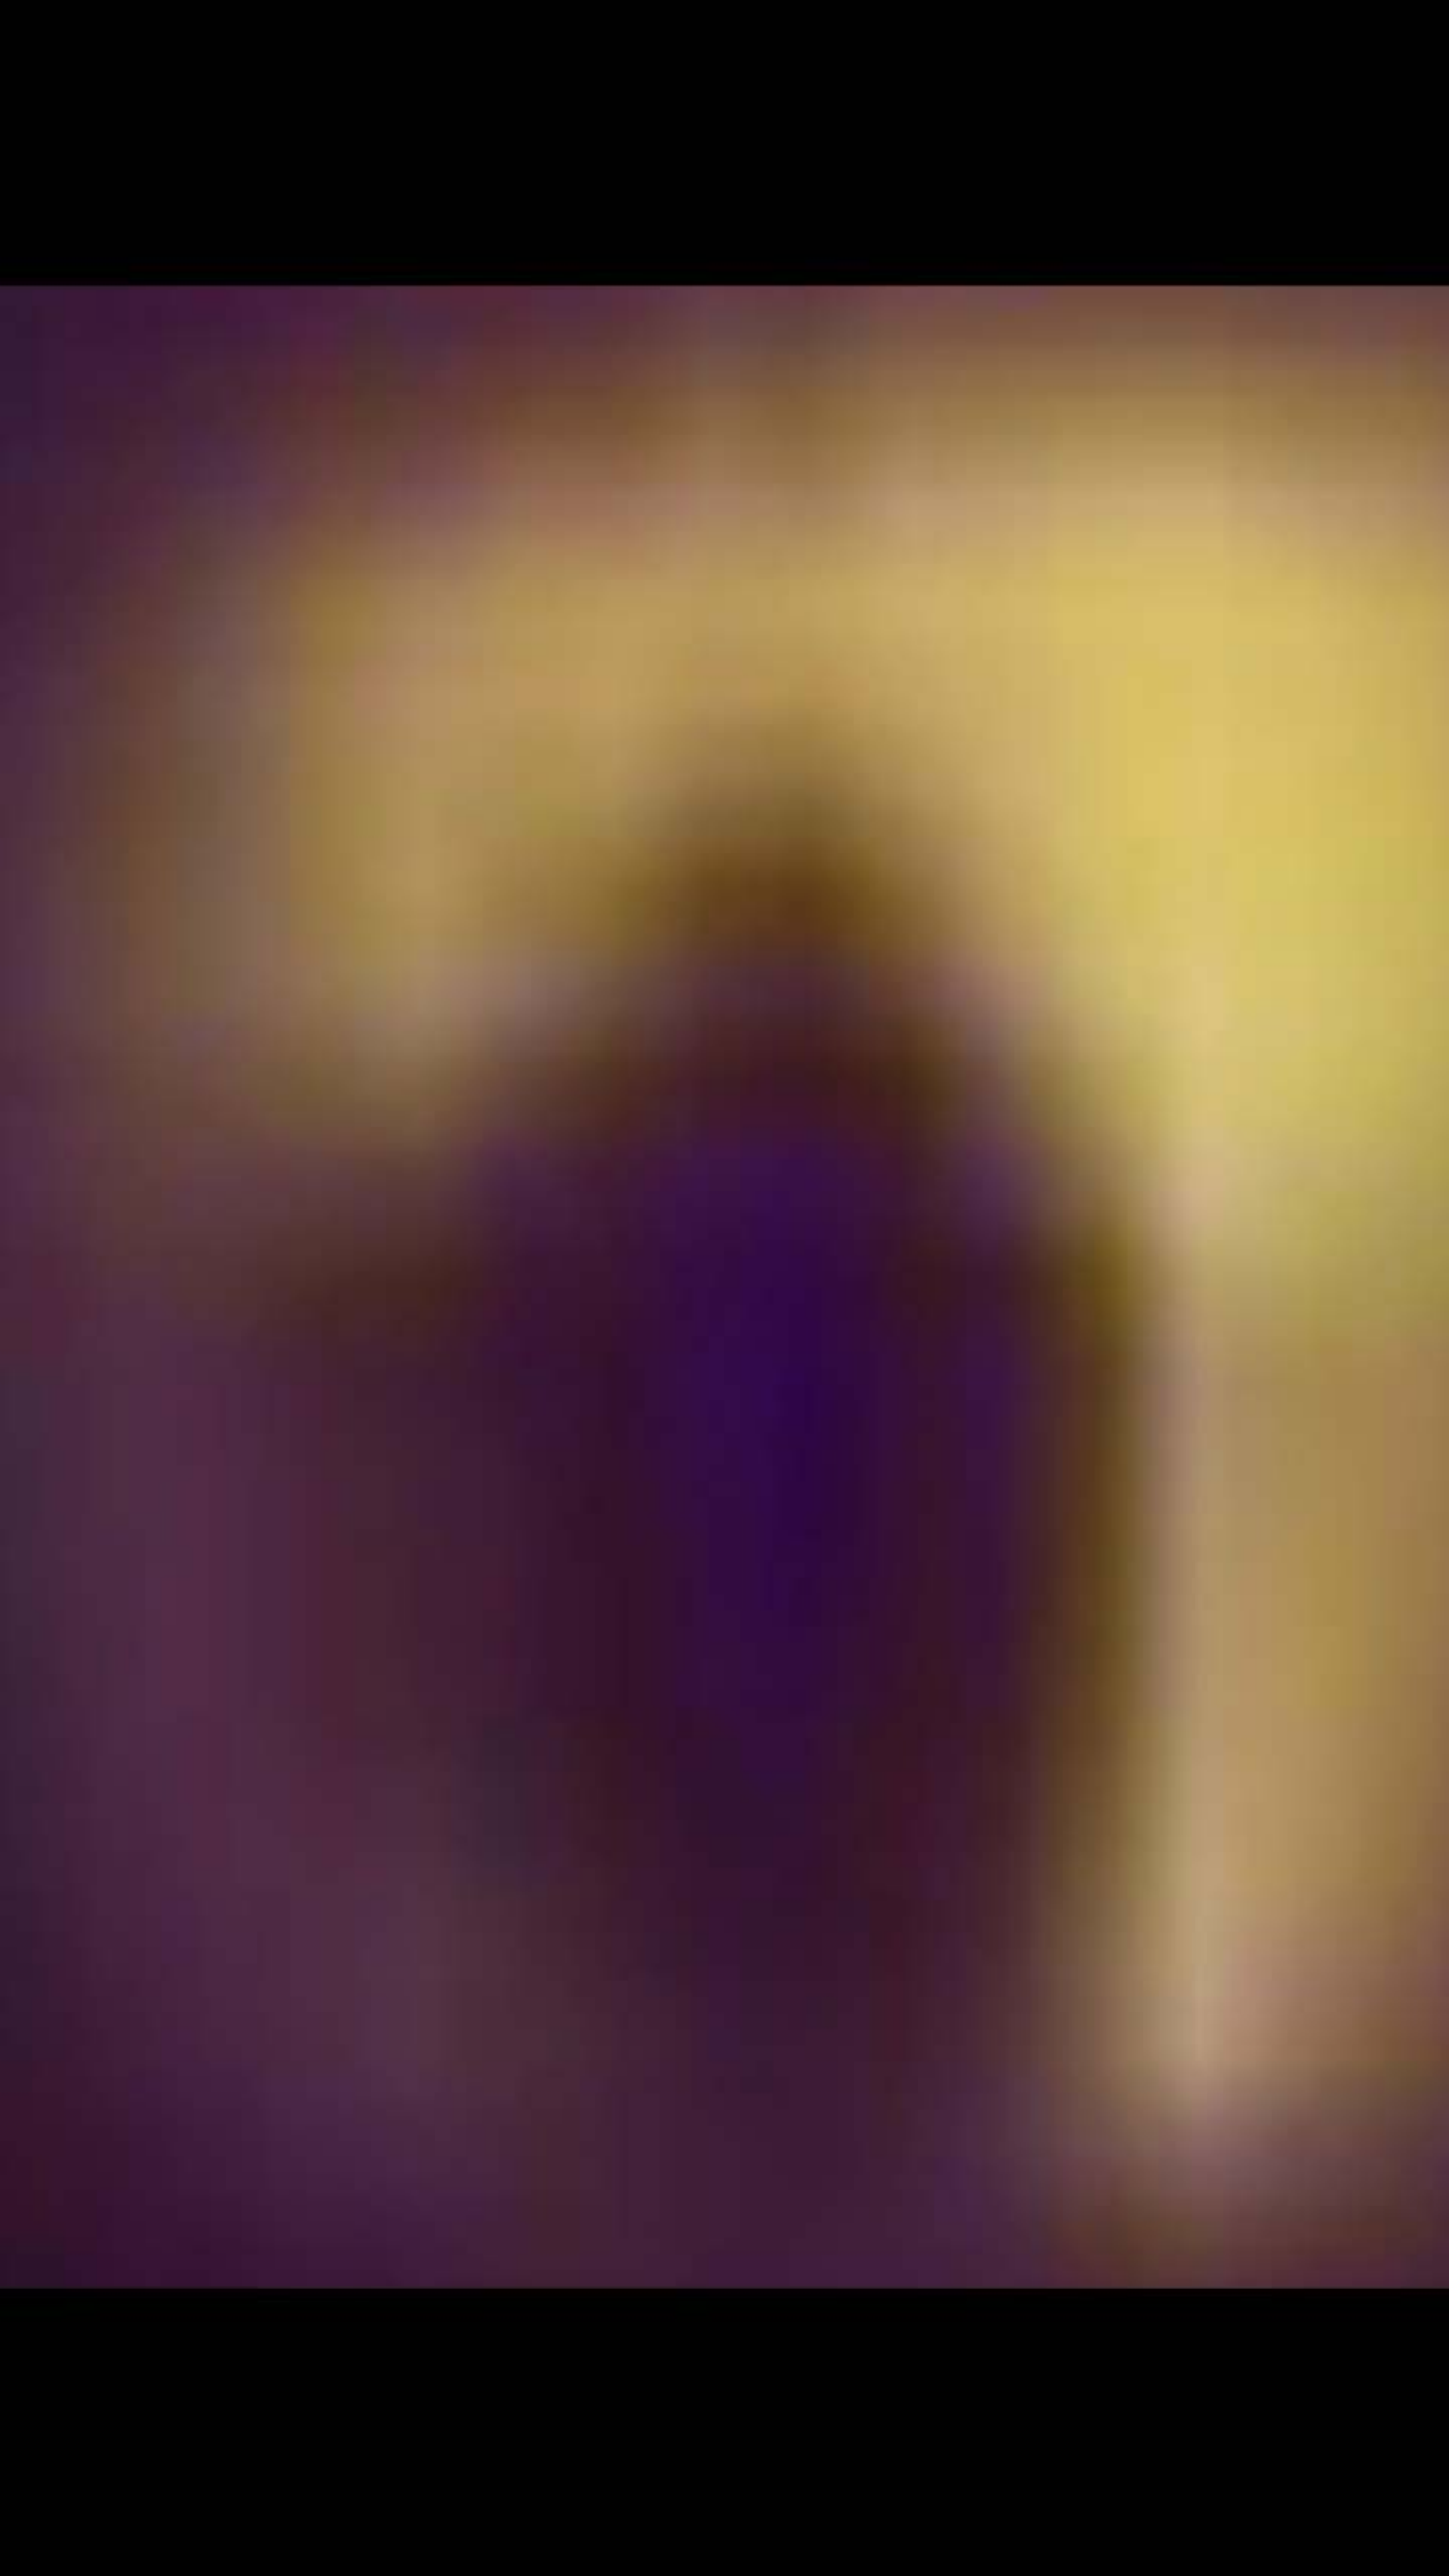

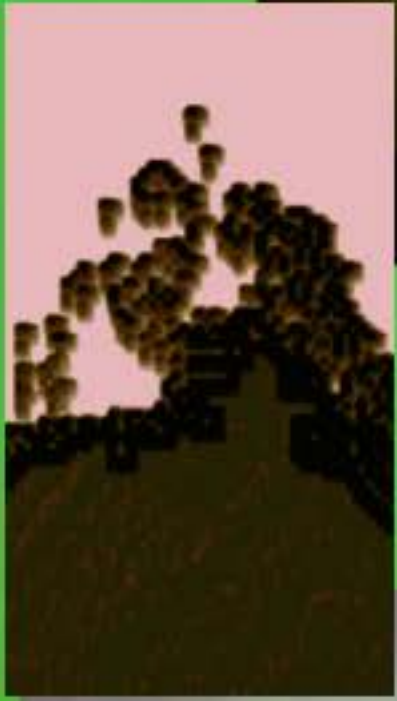

PRO'S WANT
TO SEE THE
ALIENS CAVITIES,

THOUGH THIS
ONE FROWNS..

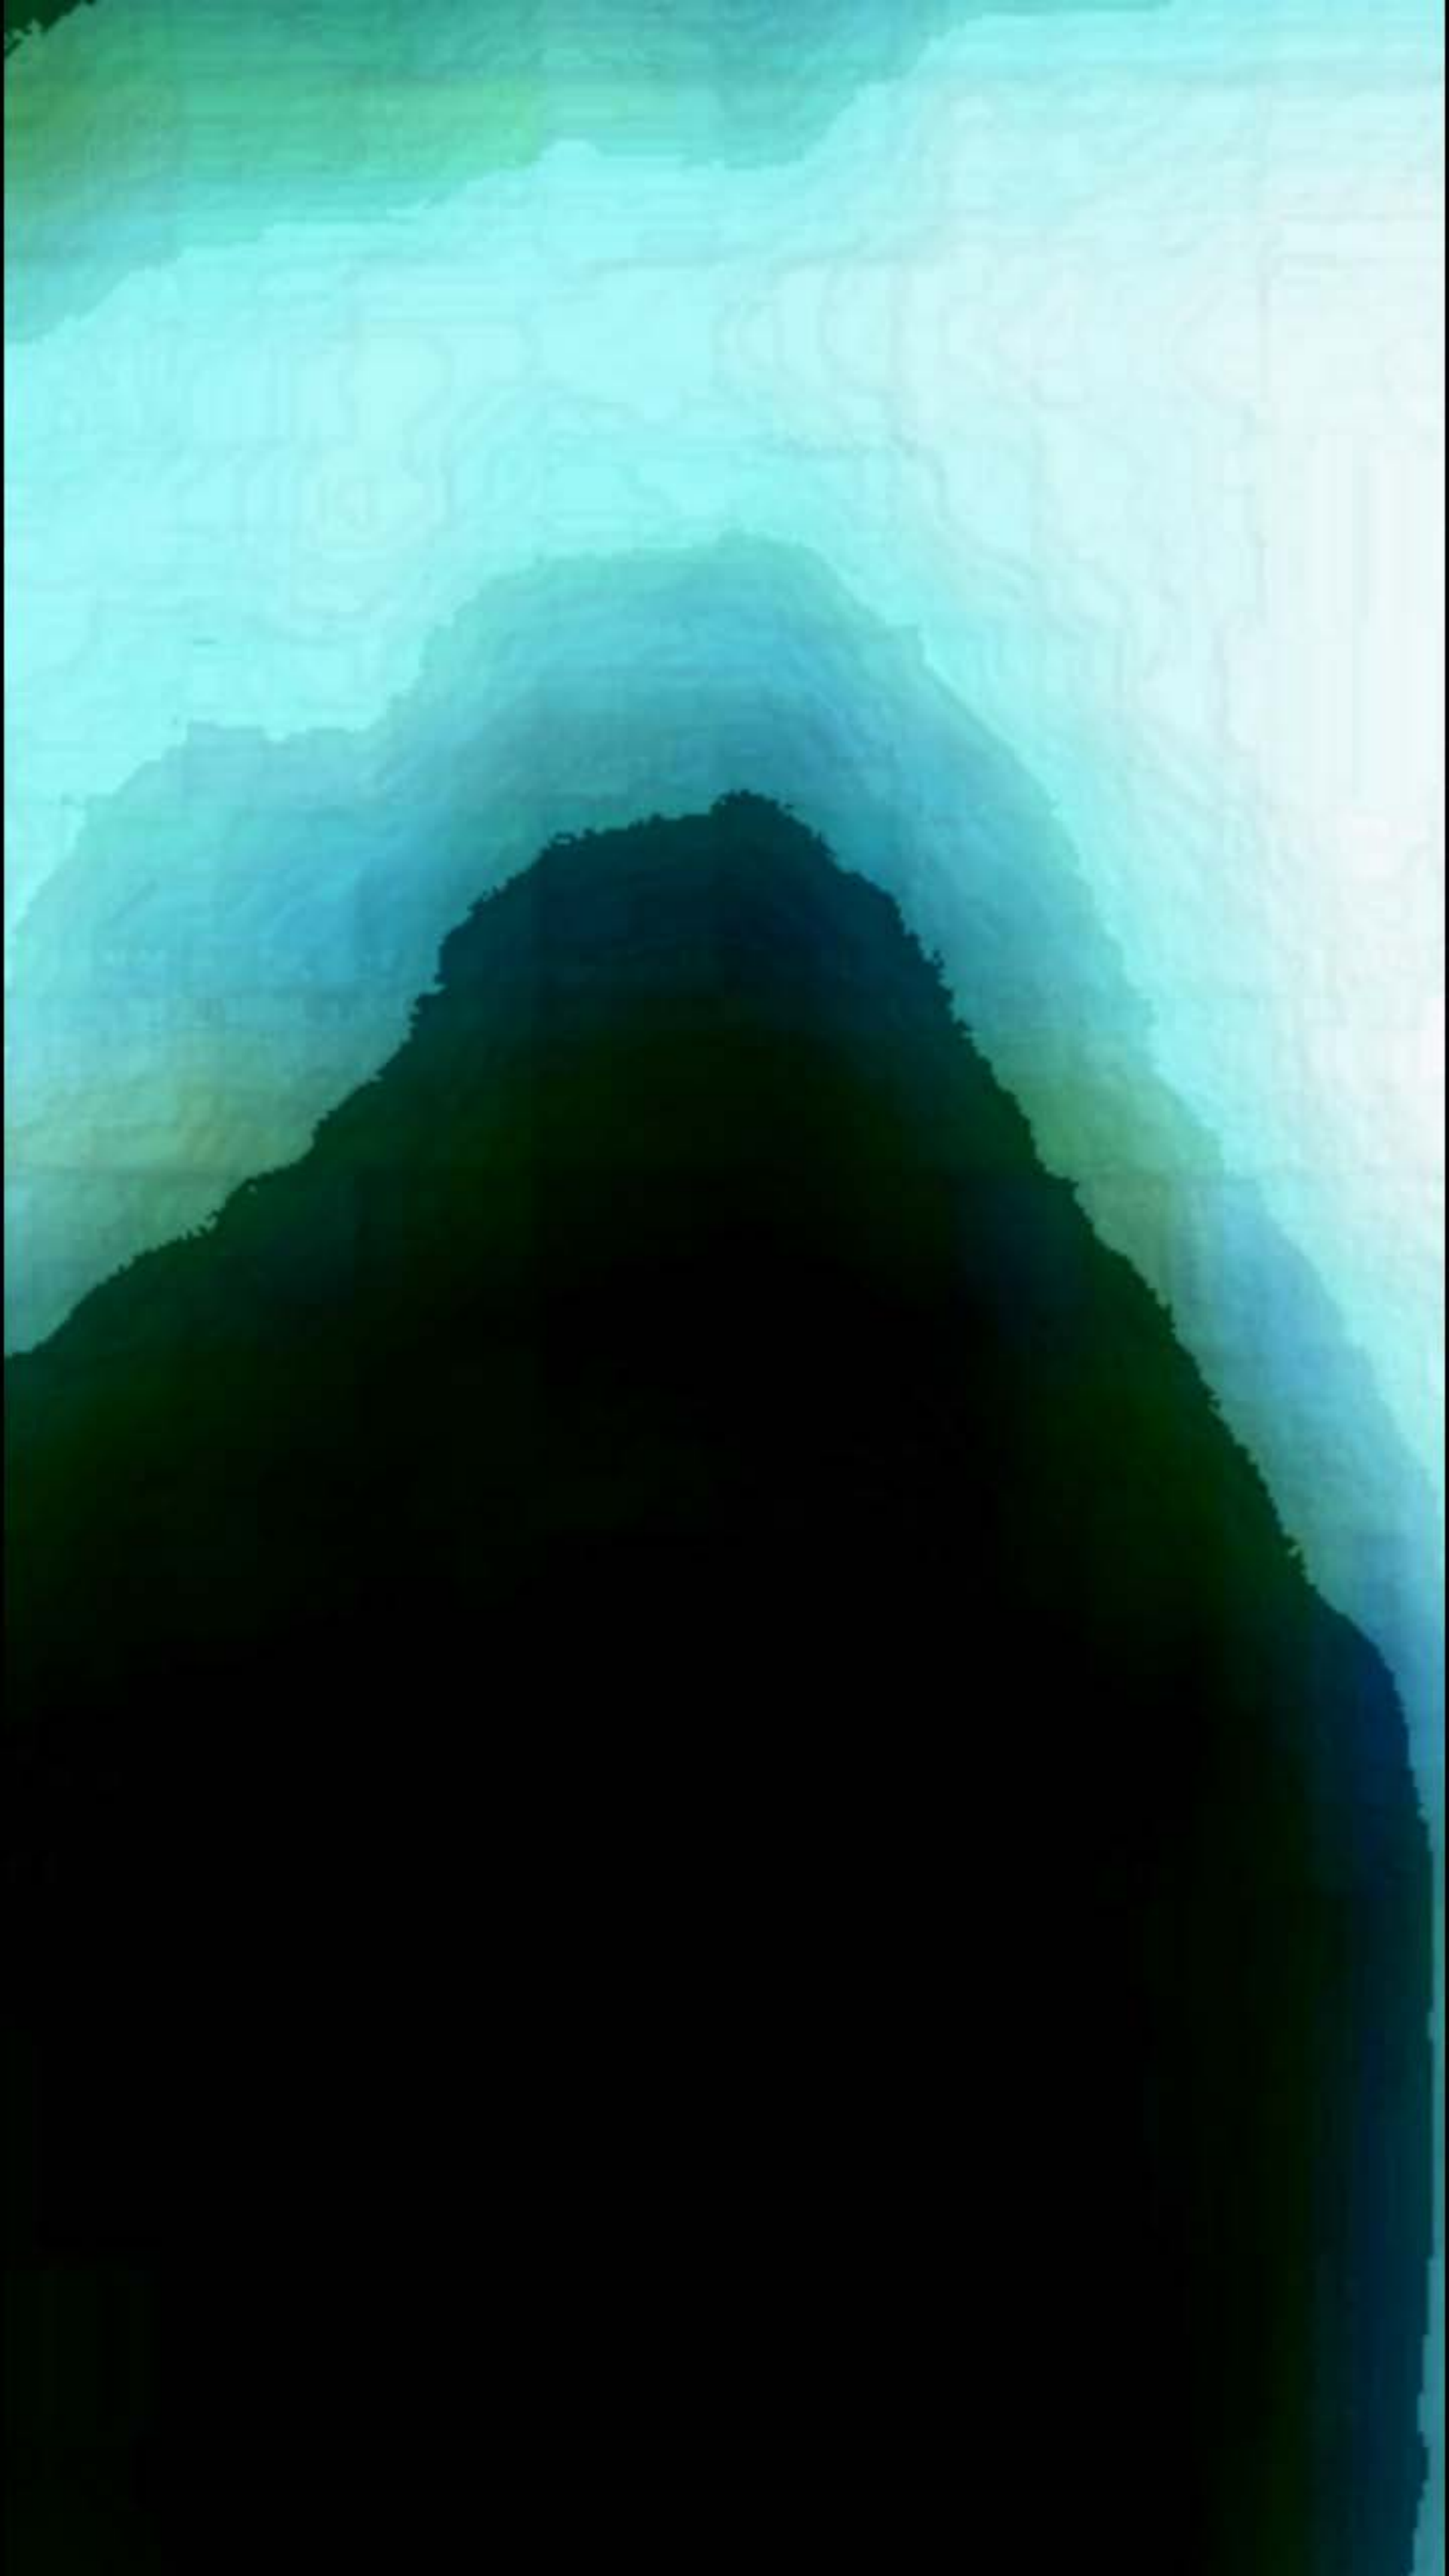

Could
this be
the mouse
that
roared?
