U.O.N. – Unorthodox Openings Newsletter

Issue N. 11 - April 2005

rozzoni@libero.it

UnorthodoxChessOpenings@yahooogroups.com

Content

This issue is by far the “thickest” UON ever with 50 pages! If you print it you will have a booklet. I wish to express my gratitude to all the chess friends who contributed to this issue. Besides the names mentioned below, my thanks go to:

- Tom Cook for his great help & support for the past 2 issues
- Gary Gifford for the cover and PDF he created.
- Graham Stevens and Mauro Torelli who sent me a file containing Basman’s games.

In this issue you will find:

I had planned to write a Training Program for the Grob player, but when I realized that at www.geocities.com/lifemasteraj/training.html Lifemaster A. J. Goldsby has prepared a free and well done Training Program for Chess players, I suggest Grob players to read those pages, apply them to you and integrate that work as follows:

- Read Basman’s “The killer Grob” from the 1st page to the last page, and play slowly and carefully each game. **Read again that book slowly within 12 months. You need “to feel” the position as Basman did.**
- Be aware that your opponents have rarely or never faced the Grob, so they will surely have difficulties to find the best plan. Of course if you decide to play the Grob often, be sure some of your frequent opponents will study some kind of “antidotes”.
- Play literally hundreds of Grob games against chess software.
- Be confident that up to Class A/Expert level, the Grob is an excellent weapon in rapid games.

The Veresov Opening

1.d4 d5 2.Nc3 Nf6 3.Bg5 or 1.d4 Nf6 2.Nc3 d5 3.Bg5 & World Chess Championship

by D. Rozzoni

Recently in the Unorthodox Chess Openings Yahoo's list we have discussed a little this relatively unknown opening. In 2003 GM Nigel Davies published a valuable monograph ("The Veresov" – Everyman Chess) on the subject, thus filling a gap since the last valid work on this opening. I'm referring to Robert Bellin's 1983 book "Queen's pawn: Veresov System" published by Batsford. After a quick research through my databases I found out that Steinitz was the only World Champion who played the Veresov, as white, in a World Championship Match. Unfortunately he lost, although he was clearly in a much better position. Time exceed? Does anyone of you know what happened? Here's the game:

Steinitz,W - Chigorin,M [D01]

World match Havana Cuba, 1892

1.d4 Nf6 2.Nc3 d5 3.Bg5 Nbd7 4.f3 h6 5.Bh4 e6 6.e4 Be7 7.e5 Nh7 8.Bxe7 Qxe7 9.Qd2 a6 10.f4 c5 11.dxc5 Nxc5 12.Nf3 Bd7 13.Bd3 Nxd3+ 14.cxd3 Qc5 15.Rc1 Qb6 16.d4 Rc8 17.0–0 0–0 18.h4 f5 19.exf6 Nxf6 20.Ne5 Be8 21.f5 exf5 22.Nxd5 Nxd5 23.Rxc8 f4 24.Rfc1 Qf6 25.Rb8 Qxh4 26.Rcc8 f3 27.Nxf3 Qe4 28.Qe1 Ne3 29.Rc3 Qf4 30.Ra8 Nxg2 31.Qe6+ Kh7 32.Rxe8 Qg3 33.Qe4+ Kg8 34.Rxf8+ Kxf8 35.Rc8+ 0–1

Two games in the Cozio Variation of the Spanish Game (C60)

by FM Eric Schiller

Yap, Nicholas - Schiller, Eric

0:1 (Black Knight Memorial Day) 5/29/2004

1.e4 e5 2.Nf3 Nc6 3.Bb5 Nge7 First time I've tried the Cozio in a serious game, but I've taught it to some students. Knowing that my opponent likes to capture the knight on c6 made this seem like a good idea. **4.O-O a6 5.Ba4 Ng6 6.c3 Be7 7.d4 b5 8.Bb3** Retreating to c2 has been played. This was new to me.

8...O-O A new move.

[**8...d6 9.Re1 O-O 10.h3 Kh8 11.Nbd2 f5 12.Bd5 Bd7 13.exf5 Nf4 14.Be6 Nxe6 15.fxe6 Bxe6 16.dxe5 dxe5 17.Nxe5 Nxe5 18.Rxe5** Black's bishop pair didn't provide full compensation for the pawn in Lobanov vs. Sharipov, St. Petersburg (Russia) 2002.]

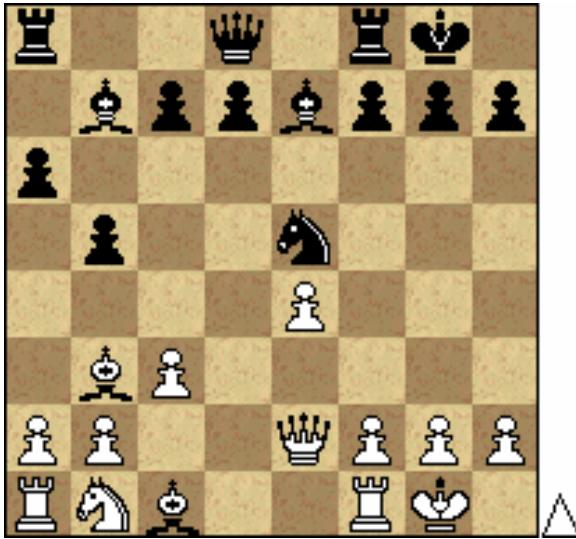

9.Nxe5 Ncxe5 10.dxe5 Bb7! A key move! I can grab the pawn later, but the long diagonal is more important.

[**10...Nxe5 11.Qd5 Nc6** is evaluated as even by computer programs, but it is hard to find a good plan for Black and White does own the center. I expect this is why castling wasn't played in the earlier game.]

11.Qe2

[**11.f4 Bc5+ 12.Kh1 Bxe4** Black's bishop are impressive. I would have loved to reach this position.]

11...Nxe5

12.f4 Just what I was hoping for! From this point forward I was thinking only of attacking the king.

[**12.Be3!** It is necessary to take control of the a7-g1 diagonal before advancing the f-pawn. **12...d6 13.Nd2 Qd7** looks about even.]

12...Ng6 13.a4 Bc5+ 14.Kh1 Qe7 15.Nd2 bxa4!? I plan to offer up the a-pawn as a sacrifice, just to get his queen away from the kingside.

[**15...d6 16.axb5 axb5 17.Rxa8 Rxa8** was a better plan, objectively. The pawn at b5 can't be captured because of ...Ba6, winning the exchange and then the pawn at e4 falls. **18.Bc2 b4 19.Nb3 Bb6 20.cxb4 f5** is an interesting piece of computer analysis. I didn't consider it during the game.]

16.Rxa4 Bc6!? Pushing the pawn to a5 was a solid alternative, but I felt the long-term weakness of the pawn was such that it wasn't worth preserving, especially after I spotted the possibility of getting my bishop to e3. **17.Rxa6 Rxa6 18.Qxa6 Be3!**

19.f5 Nf4 20.Re1 The queen will return to f1, and then where will my attack be. Time to plunge in! **20...Nxf2! 21.Re2**

[**21.Kxg2 Qg5+ 22.Kf1 Bxd2 23.Bxd2 Qxd2 24.Qe2 Qf4+** Black is definitely better.]

21...Bxd2 22.Bxd2 Nh4 23.Bd5

[**23.Qd3 Nxf5 24.Bd5 Re8 25.Bf4 Nd6** Black is still a pawn up.]

23...Ra8! 24.Qc4?

[**24.Qd3! Bxd5 25.Qxd5 c6 26.Qd3 Ra1+ 27.Re1 Rxe1+ 28.Bxe1 Nxf5** Once again, Black has an extra pawn in the endgame.]

24...Qg5!

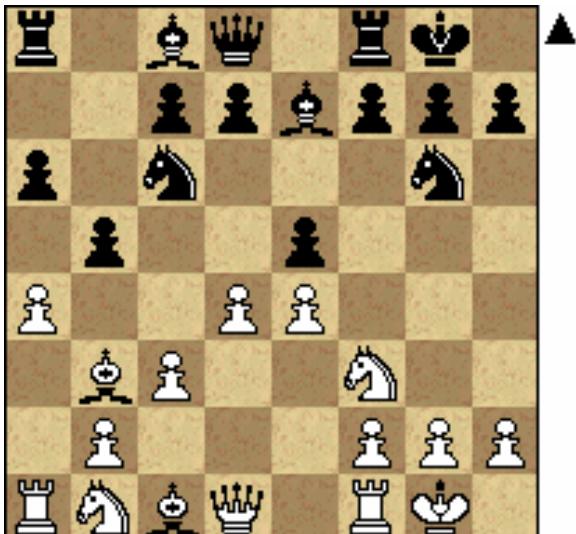

25.Be1 Ra1 26.e5 Nf3! 27.Qc5 Nxe1! White resigned. It is mate in 3. [0:1]

Tate, Emory - Schiller, Eric

1:0 (Western States Open) 10/16/2004

1.e4 e5 2.Nf3 Nc6 3.Bb5 Nge7 4.O-O a6 5.Ba4 b5 6.Bb3 Ng6 7.c3 Be7 8.d4 O-O 9.a4 A new move in this rarely explored opening. It caught me off guard and I did not react properly.

9...Bb7?!

[9...b4 was surely the correct plan.;

9...Rb8 looks dubious because of 10.axb5 axb5 11.d5]

10.d5 Nb8 This retreat is not justified. I simply was afraid of the plan of maneuvering my knight to c4, because I feared that after a capture by the bishop, and recapture with my d-pawn, that the pawn at c4 would then be a serious weakness.

[10...Na5 11.Ba2 c5 12.b4 Nc4 13.Bxc4 bxc4 14.bxc5 Bxc5 15.Na3?/ would not be so bad for Black.]

11.Qe2 bxa4 I was thinking along the lines of my game with Nicholas Yap. that's what happens when you win a nice game, it carries over and the next time you use the opening you tend to play the same way, whether or not it is appropriate. **12.Rxa4 d6 13.Be3?** No doubt about it, White has a small advantage here. Nevertheless, Black can whip up some serious counter play. **13...Bc8?!** This bishop is destined to stagger drunkenly all over the board, without having any serious effect on White's position.

[13...Nd7 would've been a much better plan and in that case White's advantage would not have been so significant.]

14.Nbd2 Bd7 15.Ra3 f5 At this point there really isn't any other source of comfort play. 16.exf5 Bxf5 17.Bc4 Bg4 18.h3 Bc8 19.Ne4 h6 20.b4!± White has a dominating position and Black is suffering under the weight of a large number weaknesses. 20...Qe8 21.Nc5! A powerful move! The sacrifice cannot be accepted.

21...Bd8

[21...dxc5? 22.d6+ Kh8 23.dxe7 Nxe7 24.Bxc5 is a miserable for Black.]

22.Ne6 Rf6 23.Nd2 Bxe6!? Of course that this is not the best move, objectively. I made the capture simply because it allowed me to develop a plan to win White's new weakling at e6, and possibly get some counter play going by advancing central pawns. Other moves would have left me with a miserable position with no real chances to establish any sort of counter play. 24.dxe6 Ne7 All I have to do is somehow advance my pawn from d6 to d5 and everything will be fine. Unfortunately my opponent doesn't allow me to do that.. 25.Ne4! Rf8 26.Ba2 Btheoy, did I underestimate this move. At the very end of the game you will see the point. 26...Qg6 27.Bc1 Kh8 28.b5 a5 29.f4! d5 Finally! At this point, however, the move doesn't have much of an impact and allows the knight to take up an even better post at c5. 30.Nc5 c6 31.Qxe5 Bb6 32.Be3 Nf5? Right square, wrong piece. I could have kept the game close by moving my rook to the square.

[32...Rf5! 33.Qd4 Bxc5 34.Qxc5 Qxe6 35.bxc6 Nbxc6²]

33.Bf2? A serious error which allows me to get back into the game, but both of us mis-analyzed the position and missed the finesse at the end.

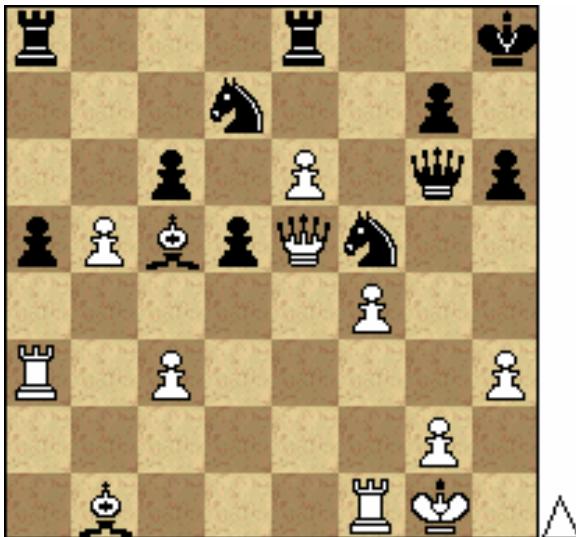

[33.Bd4! Nxd4 34.cxd4 cxb5 35.Bxd5 Bxc5 36.dxc5 Ra7 37.f5 was the correct plan. White's passed pawns and dominating bishop provide a winning advantage.]

33...Re8?

[33...Nh4! was the saving plan. I spotted the move, of course, but simply didn't date indeed enough into the position. Both players saw the same continuation 34.Bxd5! cxd5 35.Qxd5 Ra7! 36.Bxh4 but here we both failed to spot 36...Rf5! 37.Qe4 Bxc5+ 38.Bf2 Qf6 (38...Bxa3 39.Bxa7) 39.Bxc5 Rxc5 40.Rxa5 Rxa5 41.e7 Rc8 42.e8=Q+ Rxe8 43.Qxe8+ Kh7 44.Qxb8 Qxc3 with a difficult but not hopeless position for Black.]

34.Bb1! The bishop slips onto the long diagonal and finishes off the game. **34...Bxc5** **35.Bxc5 Nd7** I allow Emory Tate to finish the game with a flashy tactic. Why not? He played very well.

36.exd7 Rxe5 37.fxe5 I resigned. My opponent at long last got his revenge for my upset victory in the 1997 United States Masters. [1:0]

The Blackburne-Kloosterboer Gambit by Clyde Nakamura

The opening move sequence 1.e4 d5 2.cxd5 c6 is the Blackburne-Kloosterboer Gambit. This comes out of the Scandinavian Defense (1.e4 d5). I checked John Emms book on the Scandinavian called “The Scandinavian” but it does not cover this gambit. For a long time I had called this gambit the Scandinavian Gambit, but the Scandinavian Gambit is actually the sequence of moves 1.e4 d5 2.exd5 Nf6 3.c4 c6 and if 4.dxc6 Nxc6 and Black actually has good compensation for the pawn. This is why almost no one plays this pawn capture. The best move is 4.d5 transposing into the Caro-Kann Panov-Botvinnik Attack which is a line in the Caro-Kann Defense. Play may continue with 4...cxd5 5.Nc3.

According to Eric Schiller in his book “Gambit Chess Openings” the Blackburne-Kloosterboer Gambit splits into 2 main lines. Schiller also mentions the Kadas-Scandinavian Gambit as a separate side line.

Blackburne Gambit

1.e4 d5 2.exd5 c6 3.dxc6 Nxc6

Black gets a lead in development with open lines. But Schiller does not believe that Black gets enough compensation for the gambited pawn..

Kloosterboer Gambit

1.e4 d5 2.exd5 c6 3.dxc6 e5

Black is attempting a reverse form of the Danish Gambit. But Schiller says that White may not know the lines in the Danish Gambit. He says that the chances are equal.

Kadas-Scandinavian Gambit

1.e4 d5 2.exd5 c6 3.d4 Nf6 4.dxc6 e5!?

This a strange line played by that strange Hungarian player Kadas who specializes in 1.h4 as his first move. Listed below is the only known game with the Kadas-Scandinavian Gambit.

[Event "Budapest HUN"] [Site "Budapest HUN"] [Date "1987.??.??"]
[Round "?"] [White "Movray"] [Black "Kadas, Gabor"] [Result "0-1"]
[ECO "B01"] [PlyCount "56"] [EventDate "1987.??.??"] [Source "www.chesslib.no"] [SourceDate "2003.12.02"]
1. e4 d5 2. exd5 Nf6 3. d4 c6 4. dxc6 e5 5. Nf3 Nxc6 6. Bb5 Bg4 7. h3 Qa5+ 8. Nc3 O-O-O 9. Bxc6
exd4 10. O-O dxc3 11. Qe2 Be6 12. Bb5 Nd5 13. Nd4 Bd6 14. Nxe6 fxe6 15. bxc3 Nxc3 16.
Qxe6+ Kb8 17. Bd2 Qb6 18. Bd7 Rxd7 19. Qxd7 Qd4 20. Kh1 Qxd2 21. Rae1 Qf4 22. g3 Qf3+ 23.
Kh2 Qc6 24. Qxg7 Rf8 25. Re3 Ne4 26. Qxh7 Nd2 27. Kg1 Nxfl 28. Kxf1 Bc5 0-1

I have for many years enjoyed playing the Blackburne-Kloosterboer Gambit (1.e4 d5 2.exd6 c6) in blitz and off hand chess games but I did not realize it was not one of the main lines in the Scandinavian Defense.

I have compiled a chess database of 297 Blackburne-Kloosterboer Gambit games and lines in a file called bklooster2.pgn. For those of you who have a pgn reader I have also compiled a file called bklooster.pgn so that you can more easily follow this article. It has 32 lines and games.

There are some familiar names in this database such as Siegbert Tarrasch, Joseph Blackburne, GM Jan Timman, Jordy Mont-Renaud and myself. Eric Schiller in his book “Gambit Chess Openings” is right about the fact that you will not find too many professional players playing the Blackburne-

Kloosterboer Gambit. I did not find any current GM's or IM's playing the Blackburne-Kloosterboer Gambit, however a master named A. Razmyslov with an elo rating of 2337 has been playing this gambit. He has 2 games in the chess database that I had compiled and he may actually be playing this gambit on a regular basis.

The Main Accepted line:

1.e4 d5 2.exd5 c6 3.dxc6 Nxc6

Here White has 4.Bb5, 4.Nc3, Nf3 and the gambit move 4.d4.

The Move 4.Nf3

This is the most common reply to 3...Nxc6.

4.Nf3 e5 5.Bb5 e4

I saw 1 game with this line. It looks very interesting. The line continues 6.Qe2 Qe7. See game listed below. I analyzed that game and had concluded that Black actually had an even position. He made one bad move which lost the game. The Black side is not easy to play since there are all kind of tactics involved.

[Event "Ch Ukraine team"] [Site "Alushta UKR"] [Date "2000.??.??"]
[Round "8"] [White "Vinogradov, Pavel"] [Black "Kotsuba, Aleksander"]
[Result "1-0"] [ECO "B01"] [WhiteElo "2234"] [BlackElo "2255"]
[Annotator "Nakamura,Clyde"] [PlyCount "75"] [EventDate "2000.??.??"]
1. e4 d5 2. exd5 c6 3. dxc6 Nxc6 4. Nf3 e5 5. Bb5 e4 6. Qe2 Qe7 7. Nd4 Bd7 8. Nxc6 bxc6 9. Ba4
Nf6 10. O-O Qe5 11. d3 Bd6 12. g3 Qa5 (12... O-O 13. Nd2 Bg4 14. Qe1 (14. Qe3 Be5 15. Qf4
Qxf4 16. gxf4 exd3 17. cxd3 Be2 18. Bxc6 Rac8 19. Bb5 Bxf1 20. Kxf1 {=}) 14... Bh3 15. Nxe4
Bxf1 16. Bf4 Qxb2 17. Nxd6 Bh3 18. Be5 Qa3 19. Bxc6 Rad8 20. Nb7 Rc8 21. Qa5 Qe7 22. Bd6
Qe2 23. Re1 Qxc2 24. Bf3 Rfe8 {Black is up by +- 2.44 according to Fritz8.}) 13. Nc3 O-O 14.
dxe4 Rfe8 15. Bb3 Bc5 16. Kg2 Bd4 17. Bd2 Qc7 18. f3 Rad8 19. Rad1 Qc8 20. Kh1 Bh3 21. Rfe1
Ng4 {This is the losing move according to Fritz8. There is almost a 1 point jump in advantage for
White from 1.31 to 2.69.} 22. fxg4 Bxg4 23. Qf1 Bh5
(23... Bf6 24. Bf4 Bxd1 25. Nxd1 Qb7 26. e5 g5 27. Be3 c5+ 28. Kg1 Bxe5 29. c3 {Fritz8 gives
White an advantage of +- 3.19.}) (23... Bxd1 24. Bxf7+ Kh8 25. Bxe8 Rxe8 26. Nxd1 {Fritz8 gives
White a large lead in edge of +- 4.81}) 24. Be3 Bxc3 25. Rxd8 Qxd8 26. bxc3 Rxe4 27. Bxa7 Bf3+
28. Kg1 Qe7 29. Bf2 Be2 30. Qg2 c5 31. Bd5 Re5 32. Bc4 g5 33. Rxe2 Rxe2 34. Bxe2 Qxe2 35.
Qd5 Qxc2 36. Qxg5+ Kh8 37. h3 Qc1+ 38. Qxc1 1-0

The Razmyslov line:

4.Nf3 e5 5.Bb5 Bd6

This is the line that I normally play. See the 2 games listed below. I believe that Black has about equal chances to win the game. Black has some compensation for the pawn sacrifice with better piece development and open lines.

1. e4 d5 2. exd5 c6 3. dxc6 Nxc6 4. Nf3 e5 5. Bb5 Bd6 6. Qe2 Nge7 7. O-O O-O

The move 6...Nge7 is a really nice move because it guards the N at c6 from being captured, resulting in isolated pawns at a7 & c6.

[Event "X Open"] [Site "Coria del Rio ESP"] [Date "2004.02.14"]

 1. e4 d5 2. exd5 c6 {the Blackburne-Kloosterboer Gambit} 3. dxc6 Nxc6 4. Nf3 e5 5. Nc3 Bd6 6.
 Bc4 Nf6 7. d3 O-O 8. O-O Kh8 9. Bg5 h6 10. Bxf6 Qxf6 11. Nd5 Qg6 12. Nh4 Qh7 13. g3 g5 14.
 Ng2 {Fritz8 gives 14...Qg6 as best for Black with a slight edge of +/- 0.47 for White. I wanted to
 get in f5 and then f4 to start my kingside attack.} f5 15. Kh1 f4 16. Qh5 Bf5 17. Rae1 Bg6 18. Qd1
 a6 {Maybe this move was not necessary at the time. Not sure what I was thinking about. Fritz8
 gives Na5 as best for Black with an evaluation of =.} 19. a4 Nd4 20. Nc3 {This was a lemon move.
 I believe that 20.c3 was correct. This was also confirmed by Fritz8.} f3 21. Ne3 Qd7 {I was
 attempting to get to the h3 square because White's K was vulnerable to the mate at g2.} 22. Ne4
 Bc7 23. c3 Nc6 24. Nc5 Qh3 25. Be6 Bf5 26. Bxf5 Rxf5 {White cannot touch this R at f5 because
 of mate at g2.} 27. Rg1 Rf7 28. Nd5 Bb8 29. Re3 g4 {Now White has a possible mate with the R
 lift to f5 and the Q sac at h2 followed by R check at h5.} 30. Nb6 Rf5 31. Qf1 \$2
 {31.Rxf3 had to be played.} Qxh2+ 0-1

The Move 4.Nc3

4.Nc3

This move can and does transpose back into the 4.Nf3 line and I rate it as also
 with equal chances for both sides.

[Event "ICC r 5 0"] [Site "Internet Chess Club"] [Date "1997.12.17"]
 [Round "?"] [White "Flambe"] [Black "Evilone"] [Result "0-1"]
 [ECO "B01"] [WhiteElo "2524"] [BlackElo "2030"]
 [Annotator "Blackburne-Kloosterboer Gambit"] [PlyCount "52"]
 1. e4 d5 2. exd5 c6 {The Blackburne-Kloosterboer Gambit} 3. dxc6 Nxc6 {
 I am now in the Blackburne Gambit} 4. Nc3 e5 5. Bb5 {White threatens to take my N at c6 so that I
 would have 2 isolated pawns on a7 and c6.} Nf6 6. Nf3 Bd6 {I normally guard my e pawn} 7. Qe2
 O-O 8. Bxc6 bxc6 9. O-O {White cannot play 9.Nxe5 Bxe5 10.Qxe5 because 10...Re8 wins the
 White Queen} Bg4 10. h3 Bh5 11. g4 {According to Fritz8 the position is even at 0.00.} Nxg4 12.
 hxg4 Bxg4 13. Qe4 f5 14. Qxc6 {White got greedy and took my c pawn} Rf6 15.Qd5+ Kh8 16.
 Re1 e4 17. Ng5 Qe8 18. Nf7+ Rxf7 {18...Qxf7 cannot be played because 19.Qxa8+ drops my R}
 {although white is up a minor piece, his king position is seriously weakened. If my B gets to f3
 White will not be able to defend his K.} 19. Qxd6 Rf6 20. Qf4 Bf3! 21. Ne2 Rh6 {now I am
 threatening mate at h1} 22. Kf1 Rh1+ 23. Ng1 Qh5 24. Qxf3 {Fritz8 gives this as the best move for
 White but White will not be able to stop mate in a few moves} exf3 25. Re7 Qh3+ 26. Ke1 Rxg1#
 0-1

The Move 4.Bb5

White by playing 4.Bb5 pins the Black Knight at c6 and threatens to take the N at c6 resulting in isolated pawns at c6 & a7. Black can continue in 2 different ways. He can guard the N at c6 by playing Bd7 or ignore the exchange at c6 and proceed with development with the move 4...Bd6. I normally play the 4...Bd6 move in this gambit.

4.Bb5 and if 4...Qd5

I do not favor this 4...Qd5 line because it is anti-gambit in principle. Black should be trying to develop all of his minor pieces quickly and set up for an overwhelming attack on the White kingside. In this line the Black Queen is wasting too many opening moves. See analysis below.

1. e4 d5 2. exd5 c6 3. dxc6 Nxc6 4. Bb5 Qd5 5. Bxc6+ (5. Nc3 Qxg2 6. Qf3 Bh3 7. Nd5 Qxf3 8. Nxf3 Bg2 9. Nc7+ Kd8 10. Rg1 Bxf3 11. Nxa8 {Fritz8 gives Black a slight plus of -/+ 0.81}) 5... Qxc6 6. Nf3 Bg4 (6... Qe4+ 7. Kf1 Bg4 8. d4 Bxf3 9. gxf3 Qf5 {Fritz8 gives the position as equal with Black having a very, very slight plus of 0.16.}) 7. d4 O-O-O 8. Be3 Qb5 9. Nbd2 Qxb2 {Nakamura: Taking the b pawn is very dangerous because it leads to open lines to the Black kingside.} 10. c4 e6 11. O-O Nf6 12. a3 Qb6 13. Qa4 {White is up according to Fritz8 by +/- 0.94. Nakamura: I do not like Black's position since the Black King is in a vulnerable position. White is ready to play Rfb8 & also play d5. I do not believe Black can stop White's kingside attack.} *

if 4...e5 White can play 5.Bxc6+ and the position resembles a position from the Two Knights Defense. I am not sure if either side has lost a tempo. I would have to look at this further. I believe that the move 5.Bxc6+ is an error because now White's kingside becomes vulnerable to a kingside attack. White has effectively taken his good bishop and exchanged it for the Black knight at c6. Now White has one less piece guarding his kingside. However White has a chance if he can exchange queens which could nullify Black's kingside attack.

The Gambit Move 4.d4

Also possible is 4.d4 a very unusual gambit. See analysis below by Fritz8 and myself.

[Event "?"] [Site "HCDCH"] [Date "2004.12.02"] [Round "?"]

[White "Analysis 4.d4 Gambit"] [Black "Fritz 8 & Clyde Nakamura"]

[Result "*"] [ECO "B01"] [Annotator "Nakamura,Clyde"]

[PlyCount "30"] [TimeControl "900"]

1. e4 d5 2. exd5 c6 3. dxc6 Nxc6 4. d4 Nxd4 (4... Qxd4 5. Qxd4 Nxd4 6. Na3 e5 7. c3 Bxa3 8. cxd4 Bb4+ 9. Bd2 Bxd2+ 10. Kxd2 exd4 11. Nf3 Be6 12. Nxd4 O-O-O 13. Kc3 Bd5 {=(-0.03) Fritz8}) 5. The Declined lines:

The 4.c4 line:

1.e4 d5 2.exd5 c6 3.d4 Nf6 4.c4

Transposing into the Caro-Kann Panov-Botvinnik Attack.

The Von Scheve Line:

1. e4 d5 2. exd5 c6 3. d4 cxd5 4. Bd3 Nc6 5. Be3 Nf6 6. Nf3 Bg4

Here we have Von Scheve playing the classic Tarrasch opening principle rule of knights before bishops and developing pieces quickly. The 3...cxd5 pawn capture is the most common declined line after the pawn has been declined. The position is about equal after 6 moves with equal chances for both sides.

[Result "1-0"] [ECO "B13"] [PlyCount "37"] [EventDate "1882.??.??"]

[Source "www.chesslib.no"] [SourceDate "2003.12.02"]

1. e4 d5 2. exd5 c6 3. d4 cxd5 4. Bd3 Nc6 5. Be3 Nf6 6. Nf3 Bg4 7. h3 Bxf3 8. Qxf3 Qb6 9. O-O Qxb2 10. Nd2 Nxd4 11. Qf4 Ne6 12. Qa4+ Nd7 13. Rab1 Qc3 14. Rxb7 Nc7 15. Bd4 Qxd2 16. Rxc7 Rd8 17. Qxd7+ Rxd7 18. Rc8+ Rd8 19. Bb5# 1-0

The Nakamura Line:

1. e4 d5 2. exd5 c6 3. d4 Nf6 4. Nf3 cxd5 5. Bd3 Nc6 6. O-O Bg4 7. c3

My line is similar to Von Scheve's line but I had played 3...Nf6 instead of Von Scheve's move 3...cxd5, which had the option continuing with the gambit. I eventually had to play cxd5. The final position after White's 7.c3 is similar to what Von Scheve had. He had developed both of his N's to f6 & c6 and had a B at g4. I had the same setup but my opponent had played c3 to guard his d pawn. In the Tarrasch game White had played Be3 to guard the d pawn. Again the position is about equal for both White and Black.

The Kloosterboer Gambit line:

1. e4 d5 2. exd5 c6 3. dxc6 e5

This line is like a reverse Danish Gambit (1.e4 e5 2.d4 exd4 3.c3 dxc3 4.Bc4 cxb2 5.Bxb2) and Eric Schiller in his book “Gambit Chess Openings” says that White may not know how to play the Danish Gambit, therefore this line is playable. I believe that Black has equal chances in this line because of open lines and quick development of his pieces and very complicated tactics are involved which is not easily neutralized by White.

[Event "?"] [Site "?"] [Date "1926.??.??"] [Round "?"] [White "Olland"]
[Black "Kloosterboer"] [Result "0-1"] [ECO "B01"] [PlyCount "38"]
[EventDate "1926.??.??"]
1. e4 d5 2. exd5 c6 3. dxc6 e5 4. cxb7 Bxb7 5. Bb5+ Nc6 6. Qe2 Bd6 7. d4 Nf6 8. dxe5 O-O 9. Bxc6 Bxc6 10. f4 Bc5 11. Nf3 Qb6 12. Nc3 Rfe8 13. Ng5 Rad8 14. Nge4 Nxe4 15. Nxe4 Qb4+ 16. Nc3 Rd4 17. a3 Qb7 18. Kf1 Red8 19. Rg1 Rd1+ 0-1

Listed below is a simul game Alekhine-Morelli which was played in Milan, Italy in 1923. The opening is similar to the Kloosterboer Gambit line since Black is attempting to play a reverse Danish Gambit. The only difference is that the move 3...Qc7 was played instead of 3...e5.

[Event "Milan ITA"] [Site "Milan ITA"] [Date "1923.??.??"]
[Round "?"] [White "Alekhine, Alexander A"] [Black "Morelli L"]
[Result "0-1"] [ECO "B01"] [PlyCount "68"] [EventDate "1923.??.??"]
1. e4 d5 2. exd5 c6 3. dxc6 Qc7 4. cxb7 Bxb7 5. d4 Nf6 6. Nc3 Nc6 7. Nf3 O-O-O 8. Bd3 e5 9. O-O exd4 10. Nb5 Qd7 11. Bf4 Bc5 12. a3 Nh5 13. Bg3 Nxg3 14. fxg3 g6 15. b4 Bb6 16. a4 Nxb4 17. a5 Bc5 18. a6 Ba8 19. Kh1 Rhe8 20. Qd2 Nc6 21. Rab1 f6 22. c3 dxc3 23. Qxc3 Bb6 24. Bc4 Re3 25. Qc2 Kb8 26. Rfd1 Qe7 27. Bd5 Rxd5 28. Rxd5 Nb4 29. Rd7 Qxd7 30. Rxb4 Rxf3 31. Rf4 Qxb5 32. Rxf3 Bxf3 33. Qc1 Be4 34. Qf4+ Kc8 0-1

Lines with an early f5 opening move:

The Blackburne f5 line:

1. e4 d5 2. exd5 c6 3. dxc6 Nxc6 4. Nf3 e5 5. d3 f5

The move 5...f5 is playable because White had locked in his B at e2 with 5.d3. The White B cannot go to c4 where it can prevent Black from castling kingside. Although Black is down a pawn I believe he has compensation for the pawn and is ahead slightly because he is better developed and because the White B at e2 is hemmed in by his own pawn at d3. Black has excellent chances for a kingside attack.

Conclusion

After examining a number of lines in this gambit, I believe that the Blackburne-Kloosterboer Gambit is playable and does not lead to a forced win by White. By gambiting the c pawn, Black takes the lead in development and has more open lines of play. Black has enough tactics to play for a win in the main accepted lines of this gambit.

However, I still have questions about the Kloosterboer Gambit line which is like a reversed Danish Gambit. For now, my evaluation of the Kloosterboer Gambit line is that it is equal. The declined lines are about equal. The early f5 lines by Black is a new frontier that has to be further analyzed and tested. It really still comes down to who plays the game better. My work here is just the beginning of the analysis of this exciting gambit.

1.Nc3 Der Linksspringer - Updated pgn database

In the first part of 2003, H. Keilhack published bauble about 1.Nc3. Attached to UON 11 you will find a compressed pgn database, containing 71 OTB (= on the board) games, starting with 1.Nc3 with the following features:

- Eco A00 (No transpositions to the Veresov, French, Spanish etc.)
- Both players have elo rating > 2.200
- All games have been played between years 2002 and 2004 up to TWIC 531.

GROB ATTACK

Zilbermints Gambit

1 g4 d5 2 e4 de4 3 Nc3 e5 Black chickens out! Ooh, it's a gambit! So, how do you force a coward into accepting gambits? Simple. Give the coward another pawn!

4 d3! exd3 The Zilbermints-Hartlaub Gambit. This variation bears a striking similarity to the Hartlaub Gambit in the 1 d4 e5 complex. That line runs 1 d4 e5 2 de5 Nc6 3 Nf3 d6 4 ed6 Bxd6 or 2...d6 3 ed6 Bxd6. For the pawn Black has better development and some tactical chances. **5 Bxd3 Nc6 6 Qe2** It is very important to ensure that the Bd3 does not get traded. Thus, the Queen has to move, preventing 6...Nb4! **6...Be6 7 h3 Qd7 8 Nf3 f6 9 Be3 000 10 000** Okay... So what does White have? Faster development, pressure in the center, and an unorthodox opening. **10...Bb4?** Oops! Now White crashes through. **11 Bb5! Qe7 12 Bxc6! Rxd1+ 13 Rxd1 Bxc3 14 Bxb7+ Kxb7 15 Qb5+ Ka8 16 Qa6! Bd4 17 Nxd4 Bc4 18 Qc6+ Kb8 19 Nf5 Qf8** It is pretty much over here. The conclusion was: **20 Qxc4 Ne7 21 Qa6 22 Rd3 g6 23 Rb3+ Nb6 24 Ng3 Qd6 25 a4 Rd8 26 Rd3 Qe7 27 Rxd8+ Qxd8 28 a5 Ne8 29 Qb5+ Ka8 30 Qc6+ Kb8 31 Ne4 1-0**

But how do you play if your opponent chickens out of accepting the e4-pawn? The following game illustrates the point.

Zilbermints - mehitabel (2077)

Internet Chess Club

3 0 rated blitz

29.12.2004

1 g4 d5 2 e4 d4?! Told you so. This move is common to those Black players who are afraid of unknown territory...and open positions! **3 Bc4** Taking aim on f7. Of course, 3 Bg2, with a later ...f4-f5 push comes to mind. I will cover that in another article. **3...e5 4 d3 Be7 5 Qf3! Be6 6 Bxe6 fxe6 7 Ne2 Nc6 8 a3 Nf6 9 Nd2 00 10 Qh3 g5** Black closes up the position. What did I say before? Told you so. **11 Nf3 Nd7 12 Bd2 Rf7 13 000 Nf8 14 Qg3 Ng6 15 Rhg1 Nf4 16 Nxf4 ef4 17 Qg2 e5 18 Rh1 b5 19 h4 h6** I am attacking on the Kingside, and Black? Hey, if he wants the Queenside, that is fine by me. My attack is swifter than his. **20 hg5 hxg5 21 Rh5 Rg7 22 Qh3 Kf7 23 Rh7 Qg8 24 Qg5+ Kf8 25 Rg8** It is pretty much over, but my opponent still resists for another ten moves. The game concluded **25...b4 26 Rxg8 Kxg8 27 a4 b3 28 Rh1 Rb8 29 Qh8+ Kf7 30 Qh5+ Kg8 31 c3 dxc3 32 Bxc3 Bf6 33 Rd1 Nb4 34 Bxb4 Rxb4 35 Qe8+ 1-0**

Finally, a real weird game against IM Tarek Fatin of Egypt (2375 FIDE)

Zilbermints - IM Tarek Fatin

Internet Chess Club

3 minute 2 second increment rated blitz

2004.04.11

GROB ATTACK

1 g4 h5 2 g5 g6 He tries a fianchetto, ...Bg7. **3 b4! Bg7 4 Nc3 a5 5 b5 c6 6 a4 d5 7 e3 e5 8 h4 d4 9 Ne4 Bf5 10 Bg2 Nd7 11 Nd6+ Kf8 12 Nxb7 Qb6 13 bxc6 Nc5 14 Nxc5 dxc3 15 fxe3 Ne7 16 Ba3 Kg8 17 Rb1 Qd8 18 c7 1-0**

It should be noted that Tarek and I have played 152 (!) blitz games since February 2004. In November, we played 92 games alone. The score for that month stood at +43, -43, =6. As of this writing, the match is still ongoing. I will keep you informed.

Omega Gambits – A Recap by Clyde Nakamura

Listed below is a brief recap of all the different types of Omega Gambits that have been posted as messages and files. A sample game is provided for each different types of Omega Gambit. I have provided a file called omegarecap.pgn for your viewing pleasure. A key theme in almost all of the Omega Gambits is that the side accepting the gambit gets into trouble in the middlegame because they traded their KN for my QN, thereby leaving their kingside with one less defender and making their kingside vulnerable to a kingside attack.

Omega Gambits from the White side

Omega Gambit

1.d4 Nf6 2.e4

Position after 2.e4

Position after 13...Bh4

Evilone(2175) – MrsLovett (2790)
ICC 5 min. blitz 1998

1. d4 Nf6 2. e4 {The Omega Gambit.} 2... Nxe4 3. Nc3 Nxc3 4. bxc3 e6 5. Nf3 c5 6. Bd3 Nc6 7. O-O 7... cxd4 {I believe MrsLovett got greedy here. Black saw that it could win a pawn with Bb4 followed by Bc3 winning the d pawn.} 8. cxd4 Bb4 9. Rb1 O-O 10. Ng5 10... h6 {Black also had 10...g6 but I had a quick combination with 11.Nxh7 Kxh7 12.Qh5+ and if 12...Kg8 I could continue the attack with 13.Bxg6 fxg6 14.Qxg6+ Kh8 & 15.Rb3 should win. If 12...Kg7 13.Qh6+ Kg8 14.Bxg6 fxg6 15.Qxg6+ Kh8 & the R lift 16.Rb3 wins.} 11. Nh7 Re8 12. Qh5 Be7 13. Bxh6 13... Bh4 {I do not believe this is correct. Fritz5 says that 13...gxh6 is the best move. After 13...gxh6 14.Qxh6 f5 15.Qg6+ Kh8 16.Qh6 is equal.} 14. g3 gxh6 15. gxh4 Kg7 16. Kh1 Ne7 17. Rg1+ Ng6 18. Bxg6 Rb8 19. Bxf7+ Qg5 20. hxg5 Ra8 1-0

Omega-Paris Gambit

1.d4 Nf6 2.c4 g6 3.e4

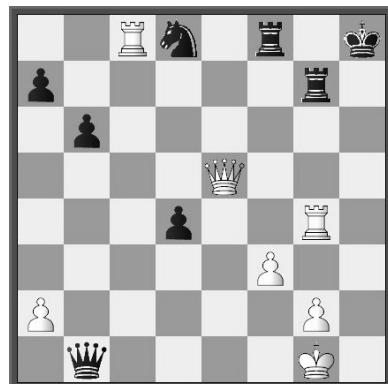

C. Nakamura – Fritz5
Game 30 8-9-03 ECO:E60

1. d4 Nf6 2. c4 g6 3. e4 {The e pawn sac. The Omega-Paris Gambit.} Nxe4 4. Nc3 Nxc3 5. bxc3 Bg7 6. Bd3 c5 7. Ne2 Nc6 {Black has built quite a bit of pressure on White's d pawn in a short time.} 8. Be3 cxd4 9. cxd4 O-O 10. O-O d5 11. Qd2 e5 12. Bh6 {Here I decided to exchange off my B for Black's strong B on g7. The Black B on g7 is causing quite a bit of problems. If 12.dxe5 then Nxe5 becomes very unpleasant.} Bxh6 13. Qxh6 dxc4 14. Bxc4 exd4 15. Rad1 Bg4 16. f3 Be6 17.

Bxe6 fxe6 18. Nf4 Qe7 19. Rfe1 e5 20. Nh3 {Here I decided to post my N at h3 to redeploy it at g5 where it can attack Black's h7 pawn.} Rac8 21. Ng5 Rfd8 22. h4 {This move is possible because Black cannot try to exchange Q's with Qf8 which leads to Qxh7+mate or if Qg7 then QxQ KxQ and N fork at e6 with check wins the exchange.} b6 {I am not sure why Black played this move on the Queenside because White has an attack on the kingside. Black should be playing to safeguard his kingside} 23. h5 gxh5 24. Qxh5 Rd7 25. Re4 Rf8 26. Rg4 Kh8 27. Rc1 Nd8 28. Nxh7 Qxh7 29. Qxe5+ Rg7 30. Rc8 Qb1+ 31. Kh2 Qh7+ 32. Kg1 Qb1+ (32... Kg8 33. Qd5+ Kh8 34. Rxg7 (34. Qxd4 Qb1+ 35. Kh2 Qh7+ 36. Rh4 {This line is not good for White since after 36...Qxh4+ 37.Qxh4 Rh7 38.Qxh7+ Kxh7 and Black is a N up after all the exchanges.}) 34... Qxg7 35. Rxd8 Rxd8 36. Qxd8+ Kh7 37. Qd5 Qf6 38. Kf2 Kh6 {White has a slight edge but it is still probably a draw.}) 33. Kh2 Qh7+ {Here Fritz5 offered the draw, which I accepted.}) 1/2-1/2

Variante 1.d4 b5 2.c3!?

by

Correspondance Master

Giorgio Codazza

La variante

La **difesa Polacca** è caratterizzata dal tratto **1...b5** in risposta a **1.d4**. Il nero tende in questo modo alla ricerca immediata dell'iniziativa nel lato di donna. Sono molteplici le strategie che il bianco può adottare per controbattere il piano dell'avversario. La variante principale in risposta a **1...b5** è sicuramente **2.e4**. Ci occuperemo in questo numero della meno appariscente **2.c3!?**.

L'idea del bianco è semplice: frenare l'avanzata dell'avversario sul lato di donna e preparare un immediato contro gioco tattico posizionale, nella stessa parte di campo. Dopo **1.d4 b5 2.c3 Bb7** (la risposta più logica, ma daremo un'occhiata anche a **2...e6**) analizzeremo due seguiti interessanti per il bianco, uno posizionale **3.a4** ed uno più tattico **3.Qb3**. La scelta del primo o del secondo dipende dai gusti del giocatore.

A 3.a4: il bianco attacca il pedone **b5** nero, costringendo quest'ultimo ad una decisione. Solitamente il secondo giocatore gioca o **3...bxa4** ed in questo caso il bianco ha perlomeno un finale superiore, oppure **3...a6** lasciando l'iniziativa al bianco nel lato di donna.

B 3.Qb3 prende in prestito la stessa idea del nero nella **Sokolsky(1.b4)**, ma con un tratto in più: **1.b4 c6 2.Bb2 Qb6!?** **3.a3 a5!?** che costringe il bianco al sacrificio di un pedone **4.b5!?** per non essere costretto al tratto "umiliante" **4.c3!?** ridicolizzando l'alfiere in **b2**. **3.Qb3** persegue lo stesso piano aggressivo con un tratto in più **1.d4**. Le varianti che si generano in questo caso sono, a mio avviso, degne di considerazione per il bianco. Il nero può giocare **2...e6** rimandando lo sviluppo in fianchetto dell'alfiere campo-chiaro, ma dopo **3.Qb3** la strategia del bianco non cambia.

Le ragioni della scelta 1.d4 b5 2.c3

La "sottovariante" **2.c3** al posto della naturale **2.e4**, contro la **difesa Polacca**, può rivelarsi una discreta sorpresa. **2.c3** ha il pregio di controbattere l'idea iniziale del nero, contrastandolo la (nel lato di donna) dove cerca l'iniziativa. La posizione bianca non presenta debolezze immediatamente sfruttabili. Il pedone **b5** è per contro, un bersaglio fin dalle prime mosse. Non è da sottovalutare la pressione che il bianco può esercitare nel lato di donna nero, indebolito dalla spinta in **b5**.

Il rientro:

Non si rientra in niente di particolare dopo **1.d4 b5 2.c3**

Le partite : **1.d4 b5 2.c3 Bb7 3.Qb3 a6 4.a4**

Basman – Swan; BCF Ch – Plymouth 1992

by D. Rozzoni

When someone is studying a UCO, it is useful to know the refutations of the lines one intends to play in order to be aware of the difficulties a player may face. But what should a player do when a “so called” refutation proposed by a GM doesn’t agree with the evaluation provided by some strong commercial chess playing programs? Now I try to explain what I mean. I was reading Adorján’s “Black is OK in....rare openings”. My temperature was rising while I was reading Adorjan’s omments at page 63

“ (...) As for 1.h3, it is even more difficult to attribute any sense to it. Perhaps it prepares 2.g4, which is at least as stupid on the second move as on the first. We chose 2.a3 as our main line; this move was probably motivated by the fact that Basman had to face a big dilemma: which rook’s pawn to advance on the first move? Regretting his decision, he did justice to the a-pawn... A free variation on Hasek’s Sveijk: “I adore people who play such nonsense...”

Well, Adorjan chose the game in subject in order to show the craziness of Basman’s 1.h3 & a3 system. This is the whole game:

Basman,M (2365) – Swan,I (2270) [A00]

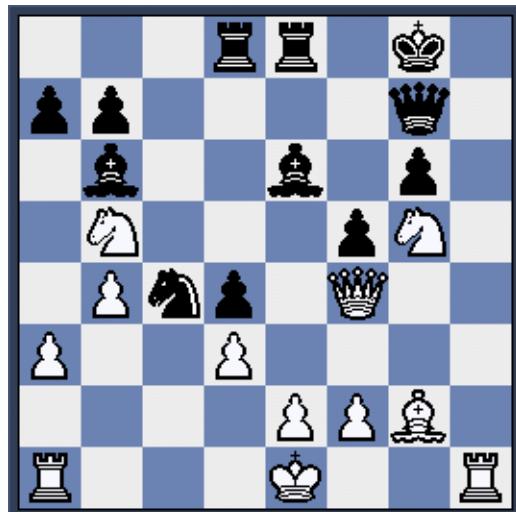

BCF-ch Plymouth (8), 1992

1.h3 d5 2.a3 e5 3.c4 c6 4.cxd5 cxd5 5.d3 Bd6 6.g4 Ne7 7.Bg2 Nbc6 8.Nc3 Bc7 9.Nf3 0–0 10.b4 Ng6 11.g5 Be6 12.h4 f5 13.h5 Nf4 14.Bxf4 exf4 15.h6 d4 16.hxg7 Re8 17Nb5 Bb6 18.Qd2 Qe7 19.g6 hxg6 20.Qxf4 Qxg7 21.Ng5 Ne5 22.Kd2 Nc4+ 23.Ke1 Rad8 24.Rh7 Qe5 25.Qxe5 Nxe5 26.Nxe6 Rxe6 27.Rxb7 Nxd3+ 28.Kf1 Nf4 29.Bf3 g5 30.Nxa7 g4 31.Bc6 Bxa7 32.Bb5 Rh6 33.Bc6 Rxc6 34.Rxa7 Rdc8 35.Kg1 Rc1+ 36.Rxc1 Rxc1+ 37.Kh2 Nxe2 38.b5 Rb1 39.a4 Nc3 40.Rd7 Nxa4 41.Rxd4 Nb6 42.Rd8+ Kf7 43.Kg3 Rb3+ 0–1

Adorján’s evaluation after 23....Rad8 is “! ± / ± with the intention of Qe5 “.

What do Shredder 7 and Hiarcs 8 think of this position? Is Adorján’s evaluation of the position a correct one?

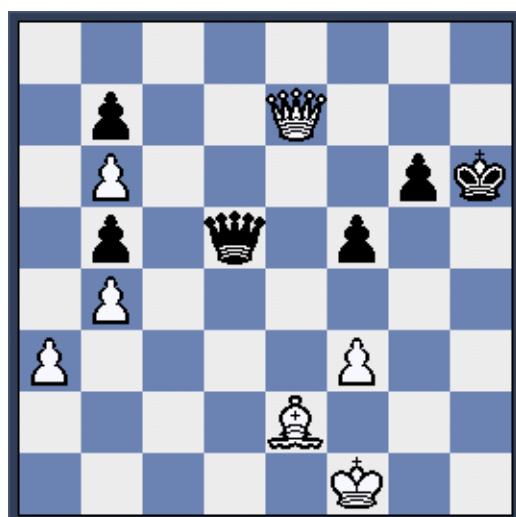

Let’s see a diagram of this position after 23...Rad8:

After the spontaneous moves 24.Rh7 Qe5 I let Hiarcs 8 play this position against Shredder 7 on my PC (Hardware AMD Athlon XP 2000+ - 256 Mb Ram – 50 moves x 2 hours – Hash Tables 16.384 – No permanent brain working.) for 14 moves and this is what happened:

Hiarcs 8 – Shredder 7

Instead of Basman's 25.Qxe5 Hiarcs "thought" almost 26 minutes and played **25.Qh4** (and it considered the position as +2.59 pawns White's advantage). 25....Bf7 (evaluation +4.62 in White's favour) 26.Bf3 Re7 27.Nxf7 Rxf7 28.Rxf7 Kxf7 29.dxc4 d3 30.Qh7+ Kf6 31.Rd1 a6 32.c5 axb5 33.cxb6 Qc3+ 34.Kf1 dxe2+ 35.Bxe2 Rxd1 36. Qd3+ 37.Be2 Qd5 38. Kg5 39.Qe7+ Kh6 After the last move both programs evaluate white's advantage around to 6 pawns. This is the final position :

Now UCO chess friends after 23.....Rad8 who stands better? Who's right Adorjan or Shredder 7/Hiarcs 8?

ICCF 1.g4 Thematic Tournament - TT 14/99 – Final

I received and I'm glad to publish the following e-mail I received recently from chess friend Frank Bendig (Germany):

Hello Davide,

meanwhile I have finished the games of our ICCF thematic tournament 1. g4 - and I am the winner (with 9 points out of ten games, early because nobody can reach this score) as you has expected. But - and there is a big "but" - what had happened if you have continued the tournament ...

Anyway, here are my games in this tournament, enjoy them and maybe you have use of them in your UON. Here we go:

[Event "TT 14/99/Final"] [Site "ICCF"] [Date "2003.03.10"]

Riding the Nh6 Hippopotamus

by Gary K. Gifford

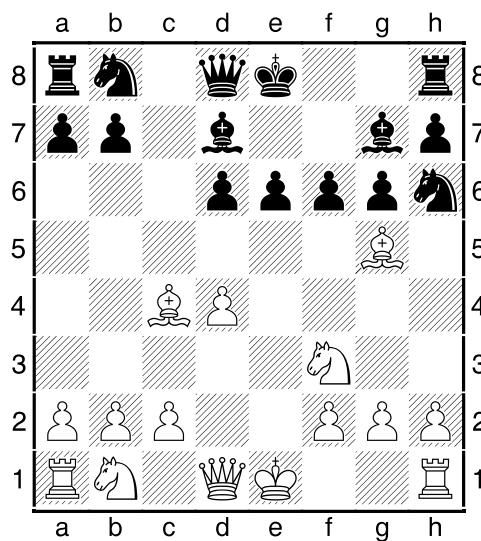

I had a nice Hippo win at a coffee shop the other night. I did feel embarrassed during the opening. Wondering if some little kid would come by and say, "Look mom, that guy doesn't know how to develop pieces."

During the middle-game my opponent commented as to how he had a far superior position... a few moves later he was getting crushed. The strangeness of the Hippo can fool players. It usually starts off quite tranquil... but that is often just the calm before the storm.
