Dear Traveler,

Last year the National Geographic Society celebrated its 125th year by honoring exploration in every way possible. We recognized pioneers such as explorer Sylvia Earle, named an unprecedented number of Emerging Explorers, and sent National Geographic Explorer-in-Residence Enric Sala diving into Arctic waters, the Coral Sea, and the Eastern Pacific on three Pristine Seas expeditions. And some of our travelers set off on an extraordinary journey by private jet with 11 of our most renowned explorers. Our anniversary is behind us now, but we're not letting up in 2014.

This new year finds us burgeoning with incredible new travel opportunities—many inspired by National Geographic Explorers. The work of two recent Emerging Explorers, wildlife biologist Krithi Karanth and wildlife filmmaker Sandesh Kadur, led us to craft an expedition dedicated to India's magnificent creatures. We're thrilled that Krithi or Sandesh will accompany each departure, sharing their insights as we track Bengal tigers.

The story of yet another Emerging Explorer, humanitarian Lale Labuko, drew us to his native Ethiopia. On our new trip, we'll join Lale in the Omo Valley for a fascinating journey through timeless tribal lands. Aboard the new *National Geographic Orion*, we'll snorkel and dive in the Coral Sea and more of Enric Sala's designated Pristine Seas.

We're introducing a new line of family trips that will have travelers of all ages hiking beneath karst pinnacles in China and doing craft projects with pen pals in Costa Rica. See page 114 to learn more.

As my time as CEO of this extraordinary organization comes to an end, it is deeply gratifying to see travelers on our expeditions venturing out to some of the farthest-flung and most magical places on the planet, continuing the legacy of our founders. I wish you happy exploring!

Your participation in a National Geographic Expedition provides support to National Geographic's mission of increasing global understanding through exploration, geography education, and research.

Discover the National Geographic difference.

National Geographic first reported on Ethiopia back in 1925, when the country was called Abyssinia and future emperor Haile Selassie was still a soft-spoken regent known as Ras Tafari. Our reporter traveled by mule caravan and celebrated Christmas among thousands of pilgrims at the subterranean churches of Lalibela. Since then, our scientists and writers have helped tell many more stories about this intriguing place.

A treasure chest of fossils has been uncovered here with National Geographic's support by the likes of the Leakey family and Donald Johanson, who excavated 3.2-million-year-old Lucy in 1974. Today, National Geographic Emerging Explorer Zeresenay Alemseged and other Society-funded paleontologists continue to make groundbreaking finds.

Ethiopia's present-day human story is equally fascinating. In the Omo Valley, tribespeople with lip plates and loin cloths carry on their ancient traditions in the face of the encroaching modern world. We explored these societies in a March 2010 *National Geographic* magazine article "Africa's Last Frontier," and one of our newest Emerging Explorers, humanitarian and Omo Valley native Lale Labuko, has brought us valuable insights into the traditions of his people.

Lale's experiences inspired us as we crafted our new trip to Ethiopia, which combines the country's riveting tribal life, its religious history, and its vital contributions to paleontology. What's more, Lale or one of his colleagues will join us for our time in the Omo Valley, sharing an insiders' perspective and ensuring that our encounters with the valley's tribes are genuine and meaningful. And in Addis Ababa, we'll meet with a leading paleontologist for a firsthand account of some of the most game-changing fossil finds in history. Ethiopia is a fascinating place to explore, but seeing it through the eyes of our experts makes all the difference.

Authentic experiences around the world

National Geographic's explorers have never taken travel lightly.

As they trekked into the unknown wilds from Papua New Guinea to Patagonia, they sought experiences that would open their eyes and minds, discoveries of unsung species and geographies, and connections with cultures that would help explain our planet. This spirit inspires our trips as well. We seek new perspectives on legendary sites, and meaningful encounters with people we meet along the way. We craft our programs to draw out the authenticity of each destination and celebrate what makes it unique.

It's in the way we travel. Our small-ship voyages, for instance, are expeditionary by nature, guided by an instinct for in-depth—and often spontaneous—exploration. This flexibility brings us far off the beaten path to encounter the remote and the rare, whether we're heading to the unspoiled coral atolls of the South Pacific aboard the new *National Geographic Orion* or gliding on Amazon waterways on the intimate and elegant *Delfin II*. We board a classic DC-3 to soar over southern Africa's wildlife-rich landscapes, and ply Holland's waterways in a traditional barge at the height of spring.

It's in the people we meet. In Japan, we get acquainted with geishas, monks, and traditional farmers, delving into very different sides of Japanese society to learn about timeless traditions. As we explore prehistoric cave art from France to Spain on our Human Origins expedition, we'll meet with leading archaeologists to hear their unique perspectives. And on our new family trips, kids spend time with pen pals they've previously corresponded with, playing games and sharing cultures in Beijing's *hutongs* or Cappadocia, Turkey.

It's in the places we stay: From stunning stone cottages within India's Panna National Park to a 17th-century convent that inspired Gabriel García Márquez in the seaside town of Cartagena, Colombia (pictured above, right), the accommodations we choose are an integral part of our experience. On a new family trip to Tanzania, for example, our private tented eco-camp in the eastern Serengeti gives us direct access to wildlife while offering comfort and a sense of harmony with the surrounding landscape.

It's in the traditions we encounter. Take part in a lamp-lighting ceremony with monks in Myanmar, or gather your kids to listen to an Icelandic storyteller recount age-old legends of elves and trolls. In Ethiopia or Bhutan, get

immersed in the colors and pageantry of a local festival. Experiences such as these are what make travel meaningful, enriching, and unforgettable.

"I had wanted to go on this [Tanzania] trip for a long time, and it was even better than I imagined. **I can't wait to travel with National Geographic again!**"

—Laura P., traveler

Our Experts:

Your inspiring travel companions

National Geographic researchers, explorers, writers, and photographers have brought the world to our members for more than a hundred years. Now, they bring you to the planet's most intriguing places to share their passion and their insider perspectives. We'd like to introduce you to a few of them.

Kristin Romey directs field operations for a National Geographic–sponsored archaeological project in Issyk Kul, Kyrgyzstan, described as the Atlantis of the Central Asian Silk Road. Kristin speaks fluent Russian, earned a graduate degree in nautical archaeology from Texas A&M University, and is a Fellow of the Explorers Club.

She was one of the first Westerners to survey and excavate in the former Soviet regions of the Black Sea. Her award-winning work as executive editor of *Archaeology* magazine covered topics ranging from the legend of the Golden Fleece in the Republic of Georgia to the legacy of Alexander the Great in present-day Uzbekistan. Kristin will accompany the September 2014 departure of *Along the Silk Road: A Journey by Classic Train*.

Brian Skerry is a photojournalist and marine biologist who specializes in underwater and marine-related subjects and stories. Since 1998 Skerry has been a contributing photographer for *National Geographic* magazine, covering a wide range of assignments. While on assignment, he has lived on the bottom of the sea, spent

months aboard fishing boats, and traveled in everything from snowmobiles to canoes to helicopters to get the picture. An award-winning photographer, Brian continues to pursue stories that will increase awareness about the sea. He will join both September 2014 departures of our Wild Encounters from Borneo to Bali voyage aboard the new *National Geographic Orion*.

When **Peter Hillary** first climbed Mount Everest in 1990, he and his father, Sir Edmund Hillary—who made the first ascent of Mount Everest in 1953—became the first father and son to reach the summit. He reached the summit again in 2002 on a National Geographic–sponsored ascent later featured

in the film *Surviving Everest*. Peter has completed more than 40 mountaineering expeditions and is deeply involved in assistance programs for the people of the Mount Everest region in Nepal. Peter will accompany the September 21 and October 10, 2014 departures of our Tibet and Nepal: Journey to the Highest Himalaya expedition.

Travel writer and photographer **Christopher P. Baker** has produced guidebooks to Colombia, Cuba, Costa Rica, the Dominican Republic, and Panama in the *National Geographic Traveler* series. He has also written and photographed for more than 200 publications, including *National Geographic Traveler* and *Newsweek*. Named the

2008 Lowell Thomas Travel Journalist of the Year, Christopher will lead two January 2015 expeditions to Costa Rica and the Panama Canal, and several departures of our Cuba expeditions. He also looks forward to sharing his knowledge of Colombia with our travelers on the November and December 2014 and February 2015 departures of our new expedition *Discovering Colombia*.

The host of Nat Geo WILD's *Expedition Wild* and *America the Wild*, naturalist **Casey Anderson** was nicknamed the “animal magnet” while growing up in Montana. In 2002, Casey rescued an abandoned grizzly bear cub and dedicated his life to raising Brutus to be an ambassador for his wild grizzly cousins. Casey built Brutus a sanctuary which became the Montana Grizzly Encounter, a bear rescue and education facility. Together, they have been featured in the National Geographic Channel's *Expedition Grizzly* and in numerous educational videos, films, television shows, and commercials. A passionate advocate for wildlife as well as an entertaining presenter, Casey will share insights from his many adventures including those in Alaska, where he studied the grizzly population of Kodiak Island. Casey will join our June 21, 2014 Alaska's Inside Passage voyage as well as the June 28, 2014 Alaska Family Voyage.

WILDLIFE CONSERVATIONIST AND NATIONAL GEOGRAPHIC EMERGING EXPLORER **KRITHI KARANTH** GREW UP AMONG TIGERS IN INDIA. Read on to learn about her current projects and what she hopes to share with travelers on our new India Wildlife Safari expedition.

How did you become interested enough in wildlife to devote your career to it?

I had a pretty unusual childhood, growing up in India with my dad, who's a well-known tiger biologist. From the age of one, I traveled with him extensively to several parks. We would sit for hours on end with a pair of binoculars looking out for animals. When you're a little kid, that's a long time to sit and watch animals! For years, I didn't really appreciate it. It's only when I came to the U.S. to study that I completely fell in love with the idea of doing research. I felt very much at home with something that I'd spent my whole life growing up with, and I decided that I wanted to be a conservation biologist.

What's the focus of your current work?

I work on a range of projects. The one that National Geographic has funded has been looking at human-wildlife conflicts, livestock predation, crop loss, and property loss that people suffer in India. I also look at the impacts of wildlife tourism on our parks—what it means for the parks themselves, how involved the local communities are in tourism, who

benefits from the incredible explosion in tourism that's taking place in India right now. I also have projects outside parks. Unfortunately, India just has four percent of its land protected. So clearly, there's a lot of wildlife outside the parks.

What are a few of the things that people who join you on the new India Wildlife Safari are likely to see?

I'm definitely hoping for tigers and leopards, but there's a spectacular array of other species as well: rhinos, elephants, a lot of interesting bird species. Another interesting thing about this trip is that Kaziranga National Park is very different from Panna and Bandhavgarh in terms of the forests that we're going to see. They also represent different stories if you look at the Indian conservation context. Panna failed in some sense because tigers went locally extinct and had to be reintroduced, whereas Kaziranga has worked on the policy of armed guards protecting rhinos, which is why they've managed to save the species. They represent very different conservation philosophies and how perhaps you need to try different things in different places to make sure the wildlife are still there.

Take to the seas with National Geographic and Lindblad Expeditions aboard the National

From the Northwest Passage to the South Pacific, the National Geographic fleet can typically be found in some of the planet's most remote, untouched, and mind-bogglingly beautiful places. For the past ten years, National Geographic and Lindblad Expeditions have worked together to craft extraordinary small-ship expeditions, tapping our vast resources to bring you to fascinating parts of the world and connect you to the people who know them best—whether it's whale researchers in Alaska or art historians in Holland and Belgium.

Our newest ship, the *National Geographic Orion*, sets off on its inaugural voyage in the South Pacific this spring. Guests on board our expedition from Bali to Borneo will observe orangutans in Borneo's jungles and meet with

National Geographic grantee Biruté Galdikas—a protégé of Louis Leakey and one of the world's leading orangutan experts—at her research camp. As we voyage from Fiji to Tahiti and then from Tahiti to Easter Island, we'll snorkel and dive in the Southern Line Islands and the Pitcairns, two regions that have been designated as some of the last unspoiled ocean environments by the Pristine Seas Project established by marine ecologist and National Geographic Explorer-in-Residence Enric Sala.

Whether you're swimming with sea lions and marine iguanas in the Galápagos or gliding past penguin-dotted icebergs in Antarctica, exploration is easy, fun, and at your fingertips on our small ships. Zodiacs, kayaks, cutting-edge imaging technology, and snorkeling gear bring you up close to wildlife

Geographic fleet.

and wild places, and our team of naturalists, historians, and cultural experts on board share their passion and their insights everywhere we go. Through our partnership, we've established the Lindblad Expeditions–National Geographic fund, which supports a wide range of initiatives, from combating invasive species on South Georgia to conservation efforts in Baja California.

“[This is] the most amazing place I’ve ever seen...the most pristine place we have dived so far. We have found it. This is it.”

–National Geographic Explorer-in-Residence Enric Sala, on diving in the Southern Line Islands

Field Notes: Journey to Antarctica

“This was a breathtaking day. Antarctica doesn’t get any better. Our expedition leader awoke us with news of four emperor penguins on the ice alongside the ship. We scurried from our cabins with cameras in hand to photograph these wayward juveniles—giants compared to the gentoo penguins nearby. As the sun climbed, a glorious light spilled onto distant icy mountains under a brilliant blue sky. We slam-dunked breakfast, donned our lifejackets, and walked on the frozen waters of Charlotte Bay. It was pure magic. Not a breath of wind, and as the morning warmed we found ourselves over-dressed.

“After a well-deserved hot lunch, we enjoyed a round of Zodiac cruising in what can only be described as ‘perfect’ conditions: crystal-clear, calm waters; blue icebergs; bright sunshine; snow-covered peaks; and mirror reflections. If life is indeed measured by the moments that take our breath away, then we aboard *National Geographic Explorer* are living life to the fullest. Sleep well, breathless shipmates.”

–Melanie Heacox, naturalist

Please note: Though we see thousands of penguins on our Journey to Antarctica voyages, emperor penguins are a rare sighting except on the earliest voyages of the season. This one was spotted in November 2012.

Introducing Our Newest Family Adventures.

With more than 125 years of exploring behind us, we at National Geographic believe that family travel can be life changing. Kids are natural explorers, and getting them out into the world to experience its wonders firsthand can transform a curious youth into a budding global citizen.

We've crafted our family expeditions to inspire and enrich travelers of any age, drawing on our global resources to create experiences in incredible places that are authentic, immersive, and fun. We discover the secrets of America's national parks with a field geologist or a wildlife biologist, and join a team of experts on family voyages on National Geographic fleet.

On all of our trips, our dynamic staff organizes engaging activities for kids and adults alike. We meet with all kinds of fascinating people on the road—from whale researchers in Alaska to Alpine mountaineers, and try out new things like ancient martial arts or traditional Andean weaving. On our newest family trips, kids correspond with pen pals in our destination and then meet up with them to get a taste of what growing up in Iceland or China might be like. And before your trip, we'll send you engaging materials about your destination, from our magazines or DVDs to maps or journals.

Imagine your family snorkeling with penguins in the Galápagos, rafting through the rain forests of Costa Rica; or sitting around the campfire in a private wildlife refuge in Tanzania, listening to the nighttime sounds of the Serengeti. Experiences like these make for great family memories and spark a passion for exploration and discovery...in kids, but also in their parents and grandparents.

NATIONAL GEOGRAPHIC EXPERT

National Geographic grantee **Ana Pinto** is a Spanish archaeologist who worked with Donald Johanson at Arizona State University's Institute of Human Origins.

She specializes in fossilization processes, early human diets, and the origins of modern human behavior. Her fieldwork has brought her to England, South Africa, and Armenia, as well as caves and rock shelters in Spain, Tanzania, and Kenya. In 2001, she discovered Spain's Sopena rock shelter, which bears evidence of Neanderthal and Cro-magnon life. She and her team made major finds at the World Heritage site of Atapuerca and were awarded the prestigious Prince of Asturias Prize.

ANA WILL ACCOMPANY THE SEPTEMBER 5 DEPARTURE. SEE OUR WEBSITE FOR EXPERTS ON OTHER DEPARTURES.

ITINERARY | 10 DAYS

DAYS 1 AND 2 U.S./BORDEAUX, FRANCE/ VÉZÈRE VALLEY

Depart on an overnight flight to Bordeaux. Journey to the beautiful Dordogne region—still commonly known by its pre-revolutionary name, Périgord. Here, rivers have carved up the limestone landscape, leaving cliffs and caves where humans have built their homes for tens of thousands of years. Settle into your country hotel in the Vézère valley, and gather this evening for a welcome reception and dinner. HOSTELLERIE LA ROSERAIE OR LA VILLA ROMAINE (D)

DAY 3 PREHISTORIC SITES OF THE VÉZÈRE VALLEY

Begin the day at the National Museum of Prehistory with an introduction to Paleolithic art by one of the world's leading experts, Christine Desdemaïnes-Hugon, author of *Stepping Stones: A Journey through the Ice Age Caves of the Dordogne*. Then join Christine for a visit to Bernifal Cave, known for its tectiform images and engrav-

ings. After lunch on your own in the nearby town of Les Eyzies-de-Tayac, see the majestic sculpted frieze of horses and bison in the shelter of the cliffs at Cap Blanc before finishing our day at Rouffignac Cave, the "cave of a hundred mammoths." (B, D)

DAY 4 LASCAUX II/SARLAT

Meet prehistory expert Denis Tauxe for a tour of Lascaux II, a painstaking recreation of the two primary chambers of the original Lascaux cave, whose famous paintings have been off-limits to visitors since 1963 to prevent deterioration. Travel to picturesque Sarlat, whose original half-timbered, golden-stone buildings and narrow cobbled streets make it one of the best-preserved medieval towns in France. After time to explore on your own, gather for a unique "prehistoric" lunch, made with the same ingredients used by Neanderthals. In the afternoon, join archaeologist Isabelle Castanet for a visit to Castel-Merle, a complex of prehistoric stone shelters more than 300 feet long, excavated and preserved by several generations of the Castanet family. (B, L, D)

Known for its buildings of ochre-colored stone, Sarlat has retained much of its medieval character.

DAY 5 PECH MERLE/TOULOUSE

This morning, venture into the spectacular natural galleries of Pech Merle, an enormous cave system filled with prehistoric art and artifacts dating back 25,000 years. See rare representations of human figures, engraved or spotted animals, and a mammoth drawn using the natural contours of the rock. The cave floor displays children's footprints preserved in the ancient clay more than 12,000 years ago. Following lunch on your own, continue to the lively university town of Toulouse. GRAND HOTEL DE L'OPERA (B)

Carved into the shape of a lion, a reindeer horn found at Isturitz displays symbols thought to be magical.

DAY 6 BASQUE COUNTRY/SANTILLANA DEL MAR, SPAIN

Drive southwest into France's Basque region, stopping in a picturesque village for lunch in a traditional Basque restaurant. In the afternoon, enter the Isturitz and Oxocelhaya caves with local prehistory specialist Aude Labarge and meet with the archaeological site director, Christian Normand. Used by human beings for more than 80,000 years, these superimposed caves have yielded tens of thousands of artifacts, including flutes, sculpted reindeer horns, and whale-bone tools. Cross into Spain this afternoon and trace the Bay of Biscay to the Cantabria region. Check into our charming hotel, a manor house situated in the heart of the medieval village of Santillana del Mar. PARADOR SANTILLANA DEL MAR (B, L, D)

DAY 7 PUENTE VIESGO CAVES

Come face-to-face with some of the oldest artistic representations in human history on a visit to the caves at Puente Viesgo, part of the Paleolithic caves of northern Spain World Heritage site. Recently identified as the oldest cave artwork in the world, the paintings in El Castillo cave date back at least 40,800 years. Explore the nearby Las Monedas cave—the longest in Puente Viesgo—and later, delve deeper into the prehistory of the region on a visit to the Altamira Museum. (B, L, D)

DAY 8 HORNOS DE LA PEÑA CAVE/BILBAO

Continue our exploration of Cantabria's World Heritage-listed caves at Hornos de la Peña. Here, large-scale naturalistic engravings depict horses, bison, aurochs, goats, and other animals, as well as an unusual anthropomorphic figure with a human-like arm and a tail. After lunch at a local restaurant, transfer to Bilbao, the largest city in Spain's autonomous Basque Country. Explore the city on your own this afternoon, and if you wish, stop in at the world-famous Guggenheim Museum, designed by Frank Gehry and located just a short walk from our hotel. HOTEL MIRÓ OR HOTEL CARLTON (B, L)

DAY 9 ATAPUERCA/BURGOS

archaeological site. Then continue to Burgos to visit the Museum of Human Evolution, where many of the Atapuerca finds are displayed. Return to Bilbao and celebrate your prehistoric adventure at a festive farewell dinner. (B, L, D)

Skins of morning mist rise from the valley floor...No other houses are visible. The only sound is the drip of predawn rain from nearby branches and from the farmhouse's roof of thick thatch. The faint scent of charcoal from last night's hearth rides on the air.

I feel as if I'm in the hermit's hut in a 17th-century ink-and-brush painting.”

Return to Jinka to visit Omo Child, a nonprofit co-founded by National Geographic Emerging Explorer Lale Labuko to stop the practice of mingi. This superstition dictates the killing of children who are believed to be cursed, and is still followed by some tribes. Omo Child rescues these children and gives them a home and an education to help them become contributors to society in the future. (B, L, D)

National Geographic Emerging Explorer Lale Labuko

A native of the Omo Valley, Lale Labuko co-founded Omo Child to stop the

practice of mingi, the ritualistic killing of children. Ancient belief says mingi children will bring drought, famine, and disease to the tribe and must therefore be killed. Through Omo Child, these children are provided safe shelter, medical care, and education. As a result of Lale's efforts, elders of his own tribe, the Kara, officially banned mingi in 2012.

THIS TRIP IS OFFERED IN ASSOCIATION WITH LINDBLAD EXPEDITIONS.

ITINERARY | 14 DAYS

DAYS 4 AND 5 COM, EAST TIMOR/AT SEA

Settle into your cabin and prepare for the amazing photographic opportunities ahead with talks and hands-on instruction by our National Geographic photographer and certified photo instructor. The ship makes a brief stop at Com before continuing into the heart of the Kimberley. (B, L, D DAILY)

Early in the season, we will probably hang back in the mist to watch the thundering water. Later in the year, we will get right up close—even under—the falls. If you wish, hike to the top of the falls and cool off in a freshwater rock pool. (B, L, D)

ALTERNATE ITINERARY: AUSTRALIA'S WILD NORTHWEST AND THE SPICE ISLANDS new

17 Days • 2014: Aug. 8–25

If you have more time to explore, combine a voyage along Australia's dramatic Kimberley coast with the contrasting landscapes of Indonesia's tropical isles. Discover natural wonders from the reefs of Rowley Shoals and towering King George Falls to the pink coral beaches of Komodo. Look for humpbacks in their breeding grounds and observe wallabies, crocodiles, and Komodo dragons in the wild. DAY 9 HUNTER RIVER

With crimson cliffs jutting toward the sky and thick mangroves lining the waterways, Prince Frederick Harbour and Hunter River make for some of the most spectacular scenery on the Kimberley coast. Drop anchor near Naturalists Island and set off to explore Hunter River by Zodiac. Navigate the mangroves, on the lookout for crocodiles and numerous bird species, or take an optional helicopter flight to Mitchell Falls to get a unique perspective on the Kimberley's vast, rugged, and hard-to-reach interior. (B, L, D)

DAY 10 MONTGOMERY ISLANDS AND RAFT POINT

The Kimberley coast is known for its dramatic tides. We'll arrive at the reef surrounding the Montgomery Islands at the turn of the tide and position ourselves to watch the water drop rapidly and miles of reef appear suddenly, as if rising from the sea. This is a fantastic opportunity to spot wildlife such as cormorants, egrets, sea turtles, and reef sharks as they forage for creatures trapped on the reef. Continue to Raft Point, where we climb up to a saddle of rock filled with ancient rock art. Trace the lore of the sacred Wandjina ancestors and their 'great fish chase' in paintings depicting spirits and native creatures. (B, L, D)

DAY 11 TALBOT BAY AND HORIZONTAL WATERFALLS

Sail into the Buccaneer Archipelago to witness an extraordinary phenomenon: the "horizontal waterfalls" of Talbot Bay. These double waterfalls, created by the sudden tidal rise and fall when conditions are right, surge up to ten or more feet, as the trapped water pushes inland or cascades out through the narrow gaps to the ocean side. Hop into Zodiacs to experience this exhilarating event. Later in the day, join our naturalists on an excursion to Cyclone Bay to explore the twisted geological folds of the ancient seabed. (B, L, D)

The new *National Geographic Orion*

DAY 12 NARES POINT AND CROCODILE CREEK

INTRODUCING OUR NEWEST FAMILY ADVENTURES

We're thrilled to introduce six new, immersive expeditions designed to engage the whole family. We've carefully crafted each itinerary to appeal to all ages, combining meaningful interactions with local people, hands-on exploration, and family fun—whether you're rafting through landscapes in China that inspired *Avatar* or listening to Maasai storytellers in the eastern Serengeti. What can you expect on our new family trips?

- Along with our expedition leader, a Young Explorer Leader is always on hand to organize and facilitate fun learning activities like scavenger hunts, craft projects, and stargazing walks that help young explorers get the most out of the places we go.
- Each trip is filled with hands-on experiences and interactions with fascinating people in the field. We'll meet a volcanologist in Iceland to find out how volcanoes continue to sculpt the land, try out a martial art with a master in China, and practice ancient weaving techniques with a traditional Andean weaver in Peru.
- A Kid to Kid Connection: Before the trip, we'll link each young traveler with a pen pal of about the same age in our destination. After corresponding by email (or snail mail!) from afar, we'll meet our pen pals in person and share our cultures through games, crafts, or even a cooking lesson!

Picture your family scanning the rain forest canopy for howler monkeys in Costa Rica, or exploring the ancient underground cities of Cappadocia, Turkey. Amazing moments happen every day on our new family trips, and they make for memories your family will treasure far into the future.

Above photos, left to right: a toucan alights in Costa Rica; a family white-water rafting adventure; a girl catches her balance on a jungle canopy walkway; a Peruvian mother and child. Background photo: a trio of Burchell's zebras stands at attention on the Tanzanian plain.

Responsibility

The National Geographic Society will provide educational enrichment for National Geographic Expeditions as outlined in this catalog as a sponsoring organization and has licensed qualified professional tour operators to organize and administer National Geographic Expeditions. The designated tour operator(s), in turn, acts only as an agent for any transportation carrier, hotel, ground operator, or other suppliers of services connected with these tours ("other providers"), and the other providers are solely responsible and liable for providing their respective services. The passenger tickets in use by the carriers shall constitute the sole contract between the carriers and the passenger; the carriers are not responsible for any act, omission, or event during the time participants are not aboard their conveyances.

The National Geographic Society and its designated tour operator and tour administrator shall not be held liable for (A) any damage to, or loss of, property or injury to, or death of, persons occasioned directly or indirectly by an act or omission of any other provider, including but not limited to any defect in any aircraft, watercraft, or vehicle operated or provided by such other provider; and (B) any loss or damage due to delay, cancellation, or disruption in any manner caused by the laws, regulations, acts or failures to act, demands, orders, or interpositions of any government or any subdivision or agent thereof, or by acts of God, strikes, fire, flood, war, rebellion, terrorism, insurrection, sickness, quarantine, epidemics, theft, or any other cause(s) beyond their control. The participant waives any claim against the National Geographic Society and/or its designated tour operator and tour administrator for any such loss, damage, injury, or death.

By registering for a National Geographic Expedition, the participant certifies that he/she does not have any mental, physical, or other condition or disability that would create a hazard for him/herself or other participants. The National Geographic Society and its designated tour

operator reserve the right in their sole discretion to accept, decline to accept, or remove any participant on a National Geographic Expedition. The National Geographic Society and the tour operator reserve the right, without penalty, to make changes in the published itinerary whenever, in their judgment, conditions warrant or if they deem it necessary for the comfort, convenience, or safety of participants.

Neither the National Geographic Society, its designated tour operator, nor its tour administrator shall be liable for any air carrier's cancellation penalty incurred by the purchase of a nonrefundable ticket to or from the participant's National Geographic Expedition departure city. Baggage and personal effects are at all times the sole responsibility of the participant.

Terms and Conditions

Basis of Rates: All prices are based on two persons sharing a room or cabin. All prices and fares are quoted in U.S. dollars. The rates are based on current tariffs and are subject to change due to unforeseen circumstances. While we will do everything possible to maintain the listed prices, if it is necessary to levy a surcharge, we reserve the right to do so, and notification will be given at the time of final invoicing.

Eligibility: Participation in a National Geographic Expedition is a benefit of membership in the National Geographic Society. Membership dues for 2014 are \$39. Anyone under 18 must be accompanied by a parent or guardian for the entire journey.

Included in Expedition Cost: Accommodations and meals as indicated in the itinerary (B=breakfast, L=lunch, D=dinner); educational materials; pre-departure information; entrance fees, excursions, and sightseeing noted as included in the itinerary; all gratuities except those for train or ship's crew, unless otherwise noted on the itinerary page; ground transportation during the expedition; transfers to and from group flights where applicable; services of National Geographic experts, lecturers, guides, expedition manager, and any other staff; and taxes, port charges, baggage handling, and service charges. Please note: the "B, L, D" notations apply to the period during the expedition only and do not include any meals on flights to/from the trip. Internal airfare is included on some international expeditions as indicated in the itinerary.

Not Included: Air transportation and related fees (except as indicated in the itinerary); activities noted as optional in the itinerary; gratuities for train or ship's crew, unless otherwise noted on the itinerary page; passport and visa expenses; baggage/accident/cancellation insurance; personal expenses, such as laundry, telephone calls, and alcoholic beverages; and any other items not specifically noted as included.

Single/Shared Accommodations: A limited number of single rooms/cabins are available at an extra cost on a first-come, first-served basis. We will assist persons requesting a roommate. Participants will be notified if a suitable roommate is not available, in which case the single rate will be charged.

Payments, Cancellations, and Refunds: To reserve space on a National Geographic Expedition, a \$500 per-person deposit is required for trips that are nine days or less, and a \$750 per-person deposit is required for trips that are ten days or more except if noted on the itinerary page. Final payment is due no later than 90 days prior to departure. Payments must be made by credit card. Your reservation may be canceled if full payment has not been received by 90 days prior to departure. For reservations made within 90 days of the departure date, full payment

is required when the reservation is accepted. All cancellation notices must be received in writing and will become effective as of the date of the postmark. If you cancel 120 days or more prior to departure, a refund less an administrative fee of 50% of your deposit will be made. Per-person charges for cancellations that occur less than 120 days prior to departure ("Cancellation Penalty Period") are as follows: 91-119 days prior to departure: 100% of your deposit amount; 45-90 days prior to departure: 50% of the expedition cost; 44 or fewer days prior to departure: 100% of the expedition cost. This policy also applies to pre- and post-trip extensions. Any revisions made within the Cancellation Penalty Period, such as a change in departure date or choice of trip, are subject to this cancellation policy. Any airline tickets issued are subject to the carrier's refund policy. Leaving an expedition in progress, for any reason whatsoever, will not result in a refund, and no refunds will be made for any unused portions of an expedition. We reserve the right to cancel any trip because of inadequate enrollment that makes the trip economically infeasible to operate or because of good-faith concerns with respect to the safety, health, or welfare of the participants. If an expedition is canceled prior to departure, the tour operator will provide you with a full refund of monies paid to the tour operator; except in the event that the cancellation is due to a significant event that makes it infeasible to operate the expedition as planned, in which case the tour operator will provide you with a refund and/or credit toward a future National Geographic Expedition equivalent to monies paid to the tour operator. If we cancel the trip in progress, you will receive a prorated refund based on the number of days not completed on the expedition. We will not be responsible for any refund for nonrefundable airline tickets or for any airline tickets purchased by the passenger directly from an airline or travel agent.

Trip-cancellation insurance is available at an additional cost and is strongly recommended. For more information and to enroll, visit the "Travel Insurance" section of our website at www.nationalgeographicexpeditions.com.

Itinerary Changes: The itineraries and staff presented in this catalog are subject to modification and change by the National Geographic Society or its designated tour operator. Every reasonable effort will be made to operate programs as planned, but alterations may still occur after final itineraries are sent.

Health Requirements: You must be in good physical and mental health. Any physical condition, diet, or treatment requiring special attention must be reported in writing when the reservation is made.

Photography: We reserve the right to take photographs or videos during the operation of any expedition or part thereof and to use the resulting photography, videos, or recordings for promotional or commercial use. By making a reservation on a National Geographic Expedition, the participant agrees to allow his/her likeness to be used by the National Geographic Society, National Geographic Society-authorized third parties, and the Tour Operator without compensation to the participant. If the participant prefers that his/her likeness not be used, he/she must notify us in writing prior to departure of the trip.

Copyright in all photographs, video, and related materials created by the participant ("Expedition Materials") shall belong to the participant upon creation. The participant grants to the National Geographic Society a non-exclusive, worldwide, irrevocable license to use any Expedition Materials provided to the National Geographic Society and/or the Tour Operator in any media for the following limited purposes: editorial use, promotion of this editorial use, promotion of National Geographic's travel programs, or promotion of the mission of the National Geographic Society.

Other: Other Terms and Conditions may apply to some expeditions and will be provided with pre-trip mailings.

By registering for a National Geographic Expedition, the participant agrees to the Responsibility statement and the Terms and Conditions herein.

Mailing List: If you are receiving duplicate catalogs, have address updates, or would like to be removed from future National Geographic Expeditions mailings, please call toll-free 1-888-966-8687.
