

## The Most Important CD-ROM produced in America!

The amazing claim made for this CD-ROM -- that it is the most important CD-ROM produced in America -- is made because the facts presented in the books on this CD show clearly the great threat to our Nation from International Criminal Priestcraft. The greatest threat to the future of America, and the world, is over population. The need to control world population is vital if the United States is to survive as a leader in a peaceful world.

The world population problem is well known to all who are concerned with the future of humanity. This problem was being successfully address by the United States Government on behalf of all mankind, until the most powerful enemies of reason and humanity destroyed it. The great success being made by American efforts to curb population growth world wide was most encouraging, it was done by simply providing the people of the world with the information and means of preventing conception. This information allowed a family to limit the number of children they would have to what the family wanted and could adequately provide for. It was entirely voluntary on the part of each family, it was not an enforced mandate of limitation such as was deemed necessary in China to bring the population of that great nation within reasonable proportions with resources and food supply.

The best book I had ever read on Americas humane efforts to allow the peoples of the world to voluntarily limit the number of children they produce, and the evil international force that destroyed that vital program, was '**American Democracy & The Vatican: Population Growth & National Security**' by Dr. Stephen D. Mumford. I wanted to include that important book on this CD-ROM because it explained so clearly the threat of world population to the security of the United States. With little hope of success I wrote to Dr. Mumford asking permission to include his book on this CD-ROM. Dr. Mumford's immediate response was to not only to give permission to reproduce the book I had ask for, but offered other of his books on this vital subject if I wished to include them also. I gladly accepted his offer and have included three of his books on this CD-ROM. Dr. Mumford has given permission for the reproduction of his books free; he asked no fee and no royalty or commission from the sale of this CD, his only concern is to have this vital information distributed as far and wide as possible. Words cannot describe my admiration for Dr. Mumford and the vital work he is doing.

We now have the intelligence and scientific ability to make this little world we live on an ongoing paradise for our children and for all future generations. In order to keep the beauty of our world we must preserve the rustic, unspoiled, areas -- the deserts, jungles, forests, etc., and with these areas the almost endless varieties of animals that inhabit these vastly different habitats. If humanity continues to breed and reproduce, as the largest and most powerful religions demand, nature will be destroyed, and the earth will become an endless ugly slum of suffering humanity.

There are religious people who will insist that population control is unnecessary, that humanity can irrigate the deserts, cut the trees and clear more and more land to plant and feed more and more people -- they are insane. Even granting them the absurd fallacy that world population can stand to double again; what after that? Shall we continue to grow by paving over the rivers and make them but sewers? Shall we build one bee-hive apartment that will cover an entire continent, and hope to feed people with what can be grown on the roof? Shall we have signal lights to tell half the people to breath out as the other half breaths in, least they create a vacuum? Ridiculous? Of course it is, but no more so than to think that human population can continue to increase without end, and yet the world not become overpopulated. We no longer need worry that the world may become overpopulated for it is already so, we need only worry now that it is becoming ever more so.

There are books included on this CD that expose the evil history and practices of some of the religious denominations at work in the United States. The choice of these books was entirely mine. These religious denominations are made up of good people, and the facts presented are for their information as well as for the general public. To ignore the threat of National, and International, Criminal Priestcraft is like ignoring cancer in the body of a loved one. The American Patriot will make himself or herself aware of the awful facts and will seek to find a cure.
