KULTUR PUBLISHING

Each of Harun Yahya's more than 170 publications on matters of science, faith and politics can change the way a person looks at the world. His scientific books demonstrating the proofs of creation to be seen in the universe, his works about Islamic moral teaching composed with reference to the verses of the Qur'an, and his political books that expose the hidden side of historical events have addressed millions of people of every nation, language and religion. These works have stimulated a wide response throughout the world.

Whether in America, Britain, Russia, Kazakhstan, South Africa, Brazil, Indonesia, Singapore, Malaysia, France, Nigeria, Canada or Lebanon, you can find books and magazine and newspaper articles by Harun Yahya in various languages in bookstores in most countries in the world. Documentaries and narrations based on Harun Yahya's works, which are broadcast on many radio and television stations, have also aroused great interest throughout the world.

The works of this author have been translated into French, German, Italian, Russian, Albanian, Spanish, Portuguese, Polish, Serbo-Croat, Indonesian, Malay, Urdu, Estonian, Arabic, Swahili and Bengali, and further translations into many other languages are progressing quickly. The purpose of this is to distribute all these books throughout the world in order to inform all people of the existence of God, the beauty of the moral teachings of the Qur'an, the existence of the hereafter and the lie of Darwinism.

Harun Yahya, who has written his works in order to spread the message of the Qur'an to the whole world and to encourage people to think about matters of faith, such as the existence of God and His Oneness, aims to make them easily accessible to everyone. With this purpose in mind, Internet sites have been opened that render a great service to thousands of people every day. On these sites, the more than 170 books written by Harun Yahya, complete with their full texts and illustrations, are available free of charge to Internet users, in addition to documentaries and audio narrations.

The book, which includes the Internet pages of those Islamic organizations, scientific institutions and various universities where you can find Harun Yahya's works, and reviews written by various scholars or the directors of various leading organizations and institutions, together with an account of the reactions from the fairs and conferences that have presented the author's works covers only a limited amount of material. Indeed, the scale of these reactions has been far greater than might have been expected.

ABOUT THE AUTHOR

The author, who writes under the pen-name Harun Yahya, was born in Ankara in 1956. He studied arts at Istanbul's Mimar Sinan University and philosophy at Istanbul University. Since the 1980s, the author has published many books on political, faith-related and scientific issues. Some of the books of the author have been translated into more than 20 languages and published in the countries concerned. Harun Yahya's books appeal to all people, Muslims and non-Muslims alike, regardless of their age, race, and nationality, as they center around one goal: to open the readers' mind by encouraging them to think about some critical issues such as the existence of God and His unity, and to display the decrepit foundations and perverted works of godless systems.

ABOUT THE AUTHOR

The author, who writes under the pen-name HARUN YAHYA, was born in Ankara in 1956. Having completed his primary and secondary education in Ankara, he then studied arts at Istanbul's Mimar Sinan University and philosophy at Istanbul University. Since the 1980s, the author has published many books on political, faith-related and scientific issues. Harun Yahya is well-known as an author who has written very important works disclosing the imposture of evolutionists, the invalidity of their claims and the dark liaisons between Darwinism and bloody ideologies such as fascism and communism.

His pen-name is made up of the names "Harun" (Aaron) and "Yahya" (John), in memory of the two esteemed prophets who fought against lack of faith. The Prophet's seal on the cover of the author's books has a symbolic meaning linked to the their contents. This seal represents the Qur'an, the last Book and the last word of God, and our Prophet, the last of all the prophets. Under the guidance of the Qur'an and Sunnah, the author makes it his main goal to disprove each one of the fundamental tenets of godless ideologies and to have the "last word", so as to completely silence the objections raised against religion. The seal of the Prophet, who attained ultimate wisdom and moral perfection, is used as a sign of his intention of saying this last word.

All these works by the author centre around one goal: to convey the message of the Qur'an to people, thus encouraging them to think about basic faith-related issues, such as the existence of God, His unity and the hereafter, and to display the decrepit foundations and perverted works of godless systems.

Harun Yahya enjoys a wide readership in many countries, from India to America, England to Indonesia, Poland to Bosnia, and Spain to Brazil. Some of his books are available in English, French, German, Italian, Spanish, Portuguese, Urdu, Arabic, Albanian, Russian, Serbo-Croat (Bosnian), Polish, Malay, Uygur Turkish, and Indonesian, and they have been enjoyed by readers all over the world.

Greatly appreciated all around the world, these works have been instrumental in many people putting their faith in God and in many others gaining a deeper insight into their faith. The wisdom, and the sincere and easy-to-understand style employed give these books a distinct touch which directly strikes any one who reads or examines them. Immune to objections, these works are characterised by their features

The page is framed by an ornate border. At the top center is a globe showing the Earth. On the right side, there is a golden teapot (dudhni) on a decorative stand. The background of the page is a light blue sky with white clouds. The text is in a black serif font.

of rapid effectiveness, definite results and irrefutability. It is unlikely that those who read these books and give a serious thought to them can any longer sincerely advocate the materialistic philosophy, atheism and any other perverted ideology or philosophy. Even if they continue to advocate, this will be only a sentimental insistence since these books have refuted these ideologies from their very basis. All contemporary movements of denial are ideologically defeated today, thanks to the collection of books written by Harun Yahya.

There is no doubt that these features result from the wisdom and lucidity of the Qur'an. The author certainly does not feel proud of himself; he merely intends to serve as a means in one's search for God's right path. Furthermore, no material gain is sought in the publication of these works.

Considering these facts, those who encourage people to read these books, which open the "eyes" of the heart and guide them in becoming more devoted servants of God, render an invaluable service.

Meanwhile, it would just be a waste of time and energy to propagate other books which create confusion in peoples' minds, lead man into ideological chaos, and which, clearly have no strong and precise effects in removing the doubts in peoples' hearts, as also verified from previous experience. It is apparent that it is impossible for books devised to emphasize the author's literary power rather than the noble goal of saving people from loss of faith, to have such a great effect. Those who doubt this can readily see that the sole aim of Harun Yahya's books is to overcome disbelief and to disseminate the moral values of the Qur'an. The success, impact and sincerity this service has attained are manifest in the reader's conviction.

One point needs to be kept in mind: The main reason for the continuing cruelty and conflict, and all the ordeals the majority of people undergo is the ideological prevalence of disbelief. These things can only come to an end with the ideological defeat of disbelief and by ensuring that everybody knows about the wonders of creation and Qur'anic morality, so that people can live by it. Considering the state of the world today, which forces people into the downward spiral of violence, corruption and conflict, it is clear that this service has to be provided more speedily and effectively. Otherwise, it may be too late.

It is no exaggeration to say that the collection of books by Harun Yahya have assumed this leading role. By the Will of God, these books will be the means through which people in the 21st century will attain the peace and bliss, justice and happiness promised in the Qur'an.

"BOOKS BY HARUN YAHYA ARE BASICALLY A MEANS OF BRINGING THE MESSAGE OF QURAN THROUGH SCIENTIFIC METHODS"

The way today's society is declining is felt by every compassionate and sensible person. Due to this moral decline the social peace is ruined and it brings a direct impact on the social stability. Every wise person thinks and tries to improve this situation.

The books by Harun Yahya which I have read (For Men of Understanding, Perished Nations, The Truth of the Life of This World, Evolution Deceit) reveal that he is a person who has the compassion for this nation. Books by Harun Yahya are basically a means of bringing the message of Quran through scientific methods.

The word Islam is derived from "Salama" which means peace and through Quran the education of peace is being given to the whole humanity. The matter of Harun Yahya's books revolve around these basic teachings. In my opinion the books of Harun Yahya are a means of improving the character and morality in the society and a source of bringing peace.

In any society it is the duty of every responsible citizen to improve the character and morality of the people. The books by Harun Yahya are a big step in connection with the service of the nation and country. As a journalist these are some of my comments on the books by Harun Yahya...

"I SHOWED SOME OF HARUN YAHYA'S WRITINGS TO MANY UNIVERSITY PROFESSORS AND STUDENTS IN USA, THEY WERE VERY MUCH IMPRESSED"

*A*s a professor of biological sciences, and a scholar who was trained all my life at the American University in Beirut, and then from the University of Illinois, USA, I was fascinated and very much impressed with the writings of Professor Harun Yahya. The number of books and videos that he has written and translated is beyond imagination.

I wish to congratulate Turkey and the people of Turkey for having a professor and a scholar like Dr. Harun Yahya. Moreover, I wish to congratulate the government of Turkey for having a professor of this nature.

If Turkey wishes to be recognized internationally, his name should be submitted for the King of Faisal Award, and to the committee of Nobel Prize winners. He deserves to be appreciated for his contributions in the field of biological sciences. In so doing, Turkey will be among the leading countries in having some of its scholars being in the front lines internationally.

I, as an American citizen, who have already published 52 books and booklets, am so much impressed with his writings. I also showed some of his writings to many university professors and students in USA. They were very much impressed, and they want the rest of his writings to be distributed worldwide. God bless Turkey and all. Ameen.

**"HARUN YAHYA TAKES US ON A REMARKABLE TRIP THROUGH THE
SIGNS IN THE HEAVENS AND ON THE EARTH"**

Of the books by Harun Yahya which I have read "For Men of Understanding", "Allah is Known Through Reason" and "The Truth of the Life of this World" stand out as powerful treaties on the proofs of God in the Universe. Harun Yahya's scholarship proves fascinating and his style of writing infinitely readable. His books have a great impact because of the clarity and logic with which they make their appeal.

Quoting the verses of Quran and sources as diverse as Bertrand Russell and Lenin, Harun Yahya takes us on a remarkable trip through the signs in the heavens and on the earth. The author's approach to Quranic wisdom is scientific. One of the remarkable aspects of his writings is his copious illustration of Quranic teachings with examples which are scientifically verifiable facts of nature.

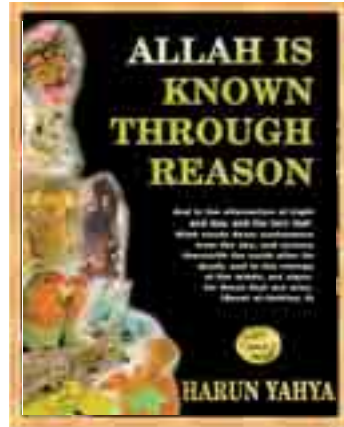

It is one of the ironies of life that man may observe nature right from his birth, but he seldom experiences a sense of awe in contemplating it. Though even the tiniest example in nature is enough to testify to the greatness of God, people often remain unaware of this. Harun Yahya's books, such as "The Miracle of Ant", "The Miracle of the Spider", etc. perform a great service both to the unenlightened and to the cause of religion by bringing out this reality in an excellent, easily comprehensible and convincing manner.

The author deftly presents facts upon fact, until we reach the conclusion that one of the greatest and most essential of human objectives is to recognize and interpret the numerous signs of Allah scattered not only throughout the entire universe, but also within our own selves.

He writes about this subject in such a compelling way-the text also enlivened with beautiful pictures-that the whole idea comes alive, leaving a lasting impression on the reader's mind. The reader, induced to think deeply about the hidden truths of nature, ultimately experiences an increase in his or her faith.

We pray that God may reward him for all the good works that he is doing and give him good health and a long life. And, God willing, may his pen never run dry.

"HARUN YAHYA'S *EVOLUTION DECEIT* IS THE SCIENTIFIC, INTELLECTUAL AND ACADEMIC DEATH BLOW TO CHARLES DARWIN'S THEORY OF EVOLUTION"

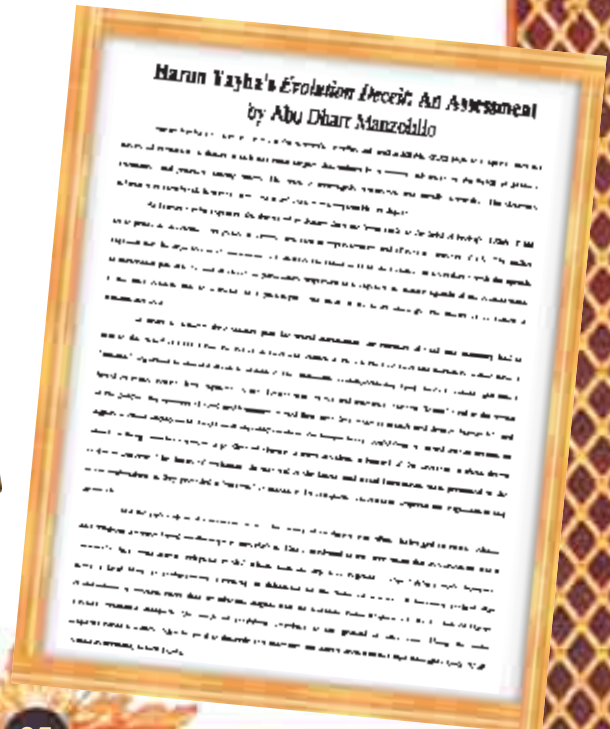

The Evolution Deceit demonstrates with evidence that the idea of evolution is a materialist dogma. It has been translated into many languages.

*H*arun Yahya's *Evolution Deceit* is the scientific, intellectual and academic death blow to Charles Darwin's theory of evolution, a theory which has been largely discredited by scientific advances in the fields of physics, chemistry and genetics, among others. The book is thoroughly researched and solidly scientific

As Harun Yahya explains, the theory of evolution does not limit itself to the field of biology; rather, it has socio-political, economic, religious, scientific, and ethical repercussions and effects [in] all spheres of life. The author explains that the objective of evolutionism is to destroy the belief in God, the Creator, in accordance with the agenda of materialist atheists. *Evolution Deceit* is particularly important as it exposes the hidden agenda of the evolutionists. It becomes evident that as a thesis, as a philosophy, but most of all as an ideology, the theory of evolution is intrinsically evil.

Until the publication of *Evolution Deceit*, the theory of evolution was often challenged on moral, ethical, and religious grounds based on theological speculation. This contributed to the impression that evolutionism was a "scientific fact" well above "religious myths" which were the object of ridicule. Harun Yahya's work, however, gives a fatal blow to evolutionism, exposing its falsehood on the basis of science. It becomes evident that evolutionism is nothing more than an atheistic dogma with no scientific basis whatsoever. As a result of Harun Yahya's extensive research, the myth of evolution crumbles to the ground in utter ruin. Using the same unquestionable scientific rigor he used to discredit evolutionism, the author demonstrates that Almighty God, Allah, created everything, which exists.

"THE BOOK IS FILLED WITH AMAZING FACTS AND LOGICAL EXPLANATIONS AND ATTRACTIVE PICTURES, WRITTEN IN A LANGUAGE THAT IS NOT CONFUSING BUT COMFORTING AND SATIATING"

I had heard about Harun Yahya for quite some time, but it was only a few months ago I came to realize the greatness and painstaking scholarship of this marvelous writer, when the Imam of the Islamic Center, Sheikh Hamid Abu Malek Slimi, gave me a copy of his book "The Evolution Deceit" as a gift. The Imam whetted my curiosity saying "when you start reading this book, you wouldn't put it away until you had finished reading it in its entirety". It transpired that the Imam is an ardent reader of Harun's works and said that Harun's books would make the Muslim youth growing up in the West, proud to be Muslims.

After I finished reading the book, I reminisced the days of my youth with much sadness, as I had spent many years wondering if in fact God existed. I had searched for an answer in other religions as well, especially Christianity,

Another striking book by Harun Yahya on the proofs of God's existence and the quandaries facing the theory of evolution.

The book is filled with amazing facts and logical explanations and attractive pictures, written in a language that is not confusing but comforting and satiating. What's more, several other master pieces have also taken wings through the pens of Yahya, enriching the modern knowledgebase of Muslims and filling young minds with a treasure trove of information on Science, Islam and many other subjects.

Hinduism and Buddhism, but this journey brought me no enlightenment, until one day during my math class at the University of Kyoto, Japan, the Theory of Chances was explained and it was as if an electric bulb lit up in my brains...

I would rather let the anxious reader imbibe the nectar of this book, which explains far more eloquently than I could, in scientific and logical terms to the enquiring mind, that, without an iota of doubt, God Almighty exists. Today, no one has to go through the agonizing times I went through, trying to get a logical, scientific answer to my troubling quest.

"HARUN YAHYA'S BOOKS MAKE MANKIND REFLECT ON THE
WORDS OF THE GOD"

*I*n the Qur'an, it teaches the believers to call to Islam with wisdom and fair preaching, to call others to worship The Living god and not to ascribe partners in worship with Him. Harun's books clearly does this. He uses The Qur'an and Science to reach the people's intellect, to make them ponder and reflect on the verses of The Qur'an. I have come across only a few books of this magnitude, which reach the heart as well as the intellect. Not just by words only, but giving a visual effect.

Many of us read but cannot envision or imagine what we read. But when you have pictures along with the words, it reaches the heart as well as the mind. The God tells mankind in innumerable verses, to look at the sun, the moon, the earth, animals and even ourselves, for there are signs in all of these things for those who reflect and ponder. So, Harun is clearly doing that which The God commands.

Books by Harun Yahya encourage people to consider the miracles of creation, from the smallest matter on earth to the perfect systems in our bodies.

In my opinion, Harun's books make mankind reflect on the words of The God. Reflect on His Greatness and Omnipotence. That which science tries to explain away, Harun uses to show that One with complete Knowledge and Wisdom creates all that exists. The All Knowing, The All Wise, The All Powerful, All Seeing, All Hearing Lord and Creator.

May The God continually bless and enrich Harun Yahya in his work. May The God grant him the best in this world, in his grave, and in the hereafter. He is truly one who calls to the worship of The God.

"NEW BOOKS [BY HARUN YAHYA] ENRICH AIITC LIBRARY"

(Albanian Institute of Islamic Thought & Civilisation)

Last times a lot of valuable books from different fields of life and science have enriched the fund of books of AIITC and among them the books of the well-known writer Harun Yahya in English and Turkish. These books are scientific approach to Islam lessons. Who can read this literature will notice that the author's outlooks are well based in special surveys, experiments and analysis, result of his long term studies in the respective fields.

The books are recently published, 99-2000. Many illustration help to assimilate the problems handled in the books and rise up their functional side.

The content of the books: DEEP THINKING, THE MIRACLE IN THE ANT, PERISHED NATIONS, NEVER PLEAD IGNORANCE etc, have attracted the attention of Albanian readers that evaluate the seriousness of the scientific based interpretations of Harun Yahya.

For AIITC opinion Islam library thanks to these books enters the new millennium with a special treasure of modern-scientific literature. In this occasion AIITC thanks all those persons that have contributed for making this possible and also wishes to the author long life and further successes in his scientific work.

I have read Mr. Harun Yahya's books: "Evolution Deceit", "Perished Nations", "The Truth of the Life of this World", "Ever Thought about the Truth", and "The Basic Concepts in the Qur'an". I found these books in compliance with Islam's teaching. Mr. Yahya is quoting Quranic statements and drawing the attention of the reader to the facts embedded in these statements to prove the truthfulness of God's message, Islam.

"THIS BOOK IS ONE OF THE BEST DESCRIPTION OF MUSLIM UNDERSTANDING OF DEATH, RESURRECTION AND HELL"

The Polish edition of *Death Resurrection Hell* gives a clear insight into these issues.

Poland is one the biggest catholic country in the heart of Central and Eastern Europe. It has also one of the oldest Muslim minority within its border. But the 600 — years old tradition of coexistence of Muslims and Non-Muslims still does not bring the mutual understanding of each others. People do not know much about Islamic values and standards and they are afraid, due to stereotypes, of Muslim values. Therefore we, Polish Muslims, have established in 1990 an association which main

goal is to bring better understanding of each ones' values and ideas and also to bring peace between the followers of different religions and culture. In our opinion knowledge is the best protection of the peace. Harun Yahya's effort on this protection is one of the most recognized in our time.

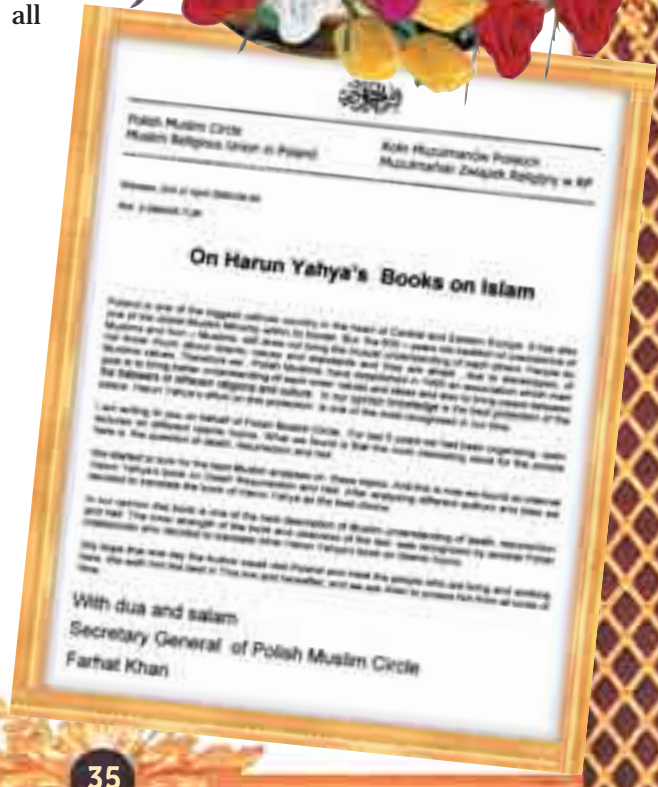

I am writing you on behalf of Polish Muslim Circle. For last 5 years we had been organizing open lectures on different Islamic topics. What we found is that the most interesting issue for the people here is the question of death, resurrection and hell.

We started to look for the best Muslim analyses on these topics. And this is how we found on internet Harun Yahya's book on Death Resurrection and Hell. After analyzing different authors and titles we decided to translated the book of Harun Yahya as the best choice.

In our opinion this book is one of the best description of Muslim understanding of death, resurrection and hell. The inner strength of the book and clearness of the text was recognized by several Polish intellectuals who decided to translate other Harun Yahya's books on Islamic topics.

We hope that one day the Author could visit Poland and meet the people who are living and working here. We wish him the best in this life and hereafter, and we ask Allah to protect him from all kinds of fitna.

**"I USE THESE BOOKS IN INVITING AMERICANS IN UNIVERSITIES
AND HIGH SCHOOLS TO ISLAM"**

I am frequently invited to speak about Islam in schools, churches, in Dallas/Fort Worth metroplex, I am usually faced with questions about views of Islam on evolution, creation, women, morality, marriage, and some other subjects. I do my best in answering these questions but those who ask wanted something in writing to explain the subjects in more details.

I kept searching the Internet for good books and finally found the books of Harun Yahya. The books are directed to the exact points of interest of the new generations. This analysis is logic and is supported with ample scientific evidences. Since then, I am giving his books free to the students who asked the most intelligent questions.

Please find below my assessment about the books below authored by Harun Yahya (Adnan Oktar). I use

these books in inviting Americans in Universities and High Schools to Islam.

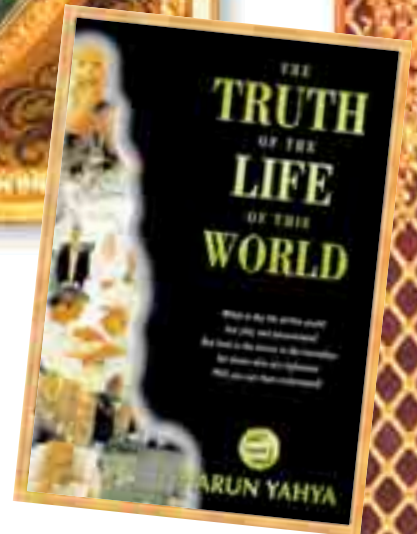

1. The books are great scientific analysis that explains most involved concepts in a simple, easy to understand progression.

2. The books are presented in a high quality of finish, colours, graphics and pictures. They proved to be very attractive and effective.

3. The main themes in the Books are:

a. The existence and unity of Allah

b. Evidences of creation and metaphysical issues

c. Moral obligations of believers in accordance with the Qur'anic verses

Books that I used so far:

1. PERISHED NATIONS
2. THE TRUTH OF THE LIFE OF THIS WORLD
3. EVOLUTION DECEIT

The Truth of the Life of This World explains with concrete examples that the real abode of man is the eternal life of the hereafter, and that the life of this world is but only temporary.

"THE WRITER IN THESE BOOKS ADHERES TO A PRINCIPLE OF THE HOLY QUR'AN, WHICH IS OBLIGATORY FOR ALL MUSLIMS ON THE WORLD"

Report on the Religious-Scientific Value of the Following Books of HARUN YAHYA:

- Perished Nations
- Evolution Deceit
- The Basic Concepts in the Qur'an
- For Men of Understanding
- Never Plead Ignorance

As the names suggest, these books bear a high intellectual value written with a responsibility felt towards the society arising from the disbelief, anti-rational understanding of Religion, and the general moral degeneration existing in the actual society, everywhere.

Also, in these books, in my point of view, there is nothing contrary to the general Islamic understanding, otherwise, the writer in these books adheres to a principle of the Holy Qur'an, which is obligatory for all Muslims on the World.

Finally, I want to declare here that I have just published, in Portugal, the Portuguese version of the book of Harun Yahya entitled "Perished Nations".

PREDOMINANCE ON THE MINDS OF THOSE STUDYING THE
ORIGINS OF LIFE"**

I would like to take this opportunity to express my own humble, unqualified views on how I personally feel about the excellent works written by brother Adnan Oktar (Harun Yahya).

The books I have studied, and the articles which I have read over the internet are a valuable source of treasure for those seeking the truth. The rich information which he has produced regarding Evolution, convincingly and without a doubt clarifies that the theory of Darwin is a totally refutable and unacceptable.

The research which the author has compiled on the Miracles of the Holy Quran and the wonders of the universe, are mesmerizing and impressive for those who are pursuing answers to their questions, enabling them proximity to Allah (SWT).

May Allah (SWT) grant you success in this world and the hereafter for your services in the propagation of this great religion of Islam. I pray to Allah (SWT) and sincerely hope that all the writings of Harun Yahya become available in English in the near future, for I truly believe that his methodology of literature is captivating to the reader, and useful for Muslims and non-Muslims alike.

From my own encounters with those living in Western societies, his valuable works have transformed peoples way of thinking, leaving a permanent predominance on the minds of those studying the origins of life.

In conclusion I pray to Allah (SWT) that you attain success in your endeavours in disseminating the truth.

"THE WAY HARUN YAHYA HAS APPROACH THE TOPIC OF EVOLUTIONISM,
MAKES IT A VALUABLE SOURCE FOR LEARNING"

Harun Yahya has done a great contribution to the advancement of Islam through his many writings.

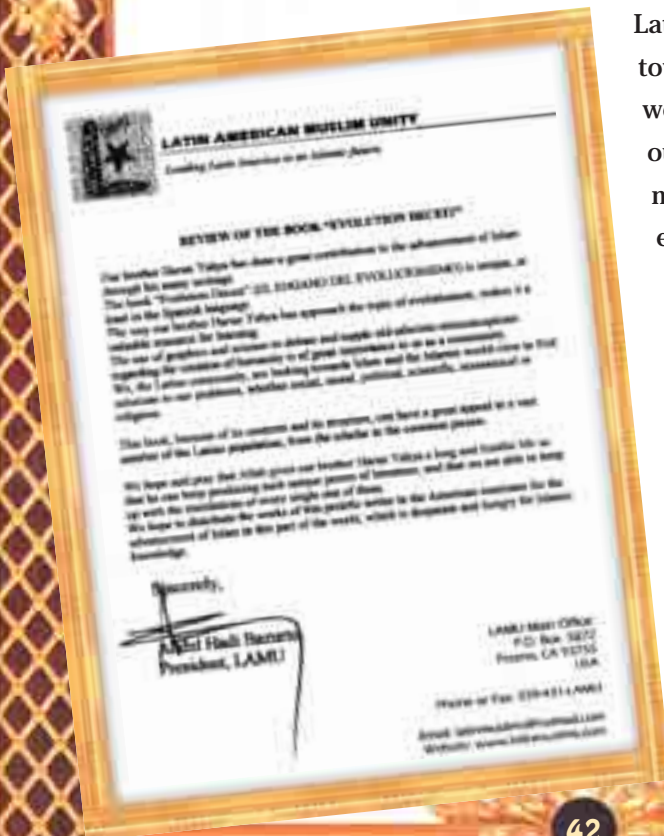

The book "Evolution Deceit" (EL ENGAÑO DEL EVOLUCIONISMO) is unique, at least in the Spanish language.

The way our brother Harun Yahya has approach the topic of evolutionism, makes it a valuable resource for learning.

The use of graphics and science to debate and topple old-atheistic-misconceptions regarding the creation of humanity is of great importance to us as a community. We, the Latino community, are looking towards Islam and the Islamic world-view to find solutions to our problems, whether social, moral, political, scientific, economical or religious.

This book, because of its contents and its structure, can have a great appeal to a vast number of the Latino population, from the scholar to the common person.

We hope and pray that Allah gives our brother Harun Yahya a long

and fruitful life so that he can keep producing such unique pieces of literature; and that we are able to keep up with the translations of every single one of them.

We hope to distribute the works of this prolific writer in the American continent for the advancement of Islam in this part of the world, which is desperate and hungry for Islamic knowledge.

"HARUN YAHYA'S BOOKS ARE REFRESHING TO READ"

SUBJECT: Overview of the following books by Harun Yahya:

Perished Nations
The Evolution Deceit
The Truth of the Life of this World
For Men of Understanding

When the first book by Harun Yahya was published in the UK, it was read avidly by a wide readership, who excitedly anticipated the release of the subsequent books published by Taha Publishers.

Their popularity is surely due to the fact that within the framework of Islam they address many subjects: archaeology, biology, chemistry, natural history, paleontology and sociology are but a few. They are refreshing to read, in that the author has cleverly managed to escape the narrow confines of modern religious expression. In other words, the books reflect the fact that Islam does in fact talk about all subjects, both "worldly" and "spiritual".

In the past, the Muslim World flourished on account of this understanding, and made great leaps in the fields of scientific discovery, medicine, astronomy, engineering, etc. They were spurred on by religious conviction and the commandment to seek knowledge.

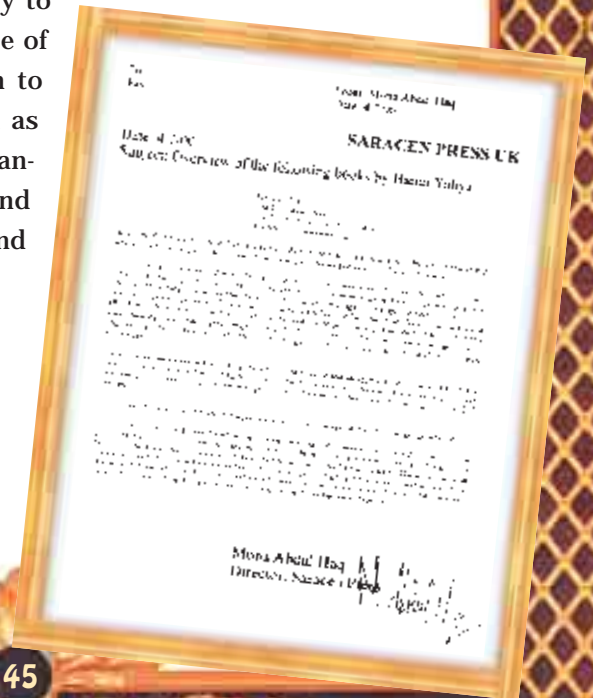

Harun Yahya has succeeded in putting the love of the Creator and an appreciation of the created world back into the sciences, as the starting point for any field of endeavor. As such, his books help to inject new energy into the pursuit of knowledge, to carry forward all branches of learning into the 21st century.

This is not only a source of pride, but equally a source of encouragement to the younger generation.

I can honestly say that I have found in these books nothing inflammatory or opposed to the common good. However, to claim that they are perfect would be a foolish assertion. The only book in the history of the world that contains no errors is the Qur'an itself. As for the books by Harun Yahya, what is clearly manifest is the author's intention, which is simply to highlight the wisdom and advice of the Qur'an and draw attention to certain undisputed facts, such as the existence of Allah, the transitory nature of creation, life and death, the secrets of the past and mechanisms of nature.

"HARUN YAHYA'S BOOKS ARE A GREAT CONTRIBUTION TOWARDS THE WELL-BEING OF NOT ONLY THE MUSLIMS BUT THE WORLD IN GENERAL"

We are one of the largest mail-order and in-house bookstores selling books on Islam and the Muslim World both retail and wholesale in the United States. We carry books by the Turkish writer Harun Yahya. These books are in great demand by Muslims as well as non-Muslims here.

The author has very graphically illustrated the passing nature of this world and drawn the attention of his readers towards living a moral life. His books focus on scientific facts and the essence of Qur'anic values. His books are a great contribution towards the well-being of not only the Muslims but the world in general.

The Turkish people are very fortunate to have a great author like him.

**"I AM PLEASED TO RECOMMEND THIS BOOK
TO ALL INTELLECTUALS"**

I have read Harun Yahya's book *The Evolution Deceit: The Scientific Collapse of Darwinism and its Ideological Background* published by Okur Publications 1999. The author has very ably shown the scientific flaws in the evolutionary theory. The book is clear and thought provoking. It is written in a passionate yet academic style.

This book is excellent not only in presenting the Islamic viewpoint on evolution, but it could also be very useful for the people of all faiths who have a common creationist perspective with Muslims.

"HARUN YAHYA HAS BECOME A HOUSEHOLD NAME IN THE UK"

After *Perished Nations* ran to four editions in the UK in only years, Ta-Ha Publishers expanded their range of Harun Yahya books.

With the publication of just four books in the English language, Harun Yahya has become a household name in the U.K. The exceptional quality of research, content and style are astounding, and a pleasure to read. Their success lies surely in that they appeal to people at all levels — those with knowledge and those without, the academic and layperson, the young and the old.

It is to be hoped that these unique books will gain universal appeal and make a significant contribution to international relations and understanding in all spheres of life.

**"THIS IS PROBABLY THE MOST IMPORTANT BOOK PUBLISHED BY ANY
ISLAMIC PUBLISHER FOR MANY YEARS"**

I have now had the opportunity to look through "The Evolution Deceit". Without having had the time to read the book from cover to cover, I can see that this is probably the most important book published by any Islamic Publisher for many years. I am not sure how far our fellow Muslims understand the threat which evolutionary theory poses to religious faith, but this theory has done more than anything else to destroy belief in God among Westerners. I think that many educated Muslims simply take the theory for granted without fully considering its implications. What the author of this marvellous book has done is to bring together, in a very readable way, all the latest evidence (often derived from evolutionary scientists) which undermines the whole theory.

I should be grateful for a review copy. I shall in any case have to purchase two or three more copies for friends. I have for example a friend living in Cairo, an English Muslim of my age who nominally accepted Islam many years ago, but who told me recently in a letter that he cannot really "believe" because he accepts totally the theory of evolution and cannot reconcile this with the faith of Islam. It has seemed almost like a small miracle that "The Evolution Deceit" has turned up at this very moment.

I congratulate you warmly on having published the book. In fact I feel that I owe you a debt of thanks for doing so.

"HARUN YAHYA HAS PROVIDED THE WORLD WITH THE WINDOW INTO THE REALITY OF EXISTENCE, LIFE AND OUR PURPOSE FOR BEING IN THIS UNIVERSE."

After reading many of the books produced by Harun Yahya, I have been encouraging my students and the scholars of Islam around the world to take a closer look at these remarkable works. There is no doubt in my mind that these are the very tools needed to bring the people at large around to the correct way of thinking. If anyone could read the material presented in such a clear and concise manner and then reflect upon it seriously, they would have to conclude that the evidences provided leave no room for dispute of any kind.

I use many of

the evidences provided by Harun Yahya's books within my lectures, seminars and classes around the world. Everywhere I travel throughout the world, the people who have discovered and enjoyed his books have expressed the very same sentiments. By far

we can say that this work is for all humans on this planet and a very much needed source of information in these most trying times. There should be a concerted force to bring about a world wide distribution of these books in all languages, particularly English, Spanish, French, Dutch, German, Italian, Russian, Arabic, Korean and Japanese.

Harun Yahya has provided the world with the window into the reality of existence, life and our purpose for being in this universe. I highly applaud his efforts and the efforts of those who are working so hard to publish and distribute his works. May Allah grant guidance to all those who read these books and may Allah grant mercy to all those who assist in sharing it with other, ameen.

"FOR A YOUNG PERSON, READING THE WORKS OF HARUN YAHYA OPENS SEEMINGLY CLOSED DOORS"

The works of Harun Yahya are indeed a great contribution to the reshaping of thinking and understanding of the world around us.

Our belief in Allah and His Oneness becomes that much more powerful, relevant and invigorating when it is the product of a vigorous mental exercise in which logic and reasoning are applied. This kind of mental effort is in compliance with exhortations found in the Holy Quraan. Man is required to think, ponder and deliberate the universe and his own existence within the universe.

Islam is distinguished by the fact that we must not only be at peace with others but also with ourselves. This is the necessary effect of a Muslim's total submission to the Will of Allah.

For a young person reading the works of Harun Yahya opens seemingly closed doors showing that there is hope and many wonders ahead by understanding and appreciating the wonders of Allah's creation within and around us.

"MANY OF THE WORKS OF HARUN YAHYA BRING OUT THE
HIDDEN CONCEPTS OF SCIENCE IN QUR'AN"

Harun Yahya has done a monumental task of conducting analysis of numerous Qur'anic concepts while challenging western philosophies that appear to confront them. In many instances comes out bold to challenge western writers through his logical arguments on the basis of Qur'anic concepts. The selected examples of his facing such challenges are the concepts of evolution, relativity, and timelessness.

In relativity and timelessness he builds numerous examples, based on Qur'anic concepts, in explaining the concepts of relativity through examples of the differentiated operation periods of the entire system of material existence. He then goes on to explain that the concept of time depends on the perception of a given instance or an event. He thus goes on to accept the challenge of the Qur'an to all its readers to constantly think and attempt to understand the various signs of Allah (Subhana Wa Ta'ala).

Many of the works of Harun Yahya bring out the hidden concepts of science in Qur'an through critically review signs of Allah through direct references to various creations in Nature. This is what is exactly needed to convince the young mind in particular about the depth in which the Qur'an is brought to them.

"HARUN YAHYA IS A DIFFERENT AUTHOR WHO CAN EXERT LASTING IMPACT ON THE MINDS OF THOSE WHO ARE IN SEARCH OF TRUTH"

Harun Yahya is exceptionally a great advocate of ALLAH's signs in the Universe. His scholarly works in this area have made great impact in the world of science and reason. His main focus is to show that the concept of materialism is not only repugnant to human logic but also have no scientific grounds. Haroon Yahya, thoroughly examines the universe and what exists therein, from logical and scientific point of view and presents his arguments based on current scientific knowledge and irrefutably proves that the Universe has a beginning and therefore is created by ALLAH.

He examines all elements of the subject and tests all possibilities with logic and science and draws highly convincing conclusions. All his works I have read are the treasure of information and an example of his powerful but simple style without any prejudices.

Being a humble student of the Qur'an, I was enlightened by his writings a great deal. I have the honour of reading some of his books like "Evolution Deceit; The Creation of the Universe; Allah is Known Through Reason; For Men of Understanding."

I will advise every conscientious Muslim to read his books to find that Harun Yahya is a different author who can exert lasting impact on the minds of those who are in search of truth.

"HARUN YAHYA'S BOOKS CLEARLY PORTRAY THE TRUE MEANING OF ISLAM AND HOW THE ONE 'GOD' IS OUR ONLY CREATOR"

Since quite some time Islam has been facing a tremendous negative impulse from all over the world. Throughout this time there had been no strong voice against all of this.. until brother Harun Yahya came. Islam needed a powerful subliminal voice to speak for itself amidst all this nonsense. Harun Yahya's works have progressed over time, his word reaches out to the rest of the world be it for Muslims or people in general. His books and vide clearly portray the true meaning of Islam and how the one "God" is our only creator. His work is balanced and speaks with a lot of proof. Harun Yahya puts a lot of research into his materials and justifies it with the logical presence of "God" and his miracles in our existence.

We wish him all the best of luck and pray for him to write and produce more successful projects so that the entire world will know that real Islam is.

"READING THE BOOKS OF HARUN YAHYA HAS ALWAYS BEEN
A SOURCE OF IMMENSE PLEASURE"

Reading the books of Harun Yahya has always been a source of immense pleasure thanks to the invaluable insights he artfully and cleverly gave us into authentic Islamic values, rational thinking and genuine teachings.

Thousands of books have been written about Islam, but few could claim to have made the impact of his books on the ideologies and thinking of thousands of people.

One of the greatest merits of Harun Yahya is that he builds up his arguments carefully and logically, with [taking] the average reader always into consideration. He provides background information when needed, and avoids repetition and pompous expressions to keep the reader in focus. He never loses sight of the main idea and always steers away from emotional traps.

It is the ability to generate interest and the keenness to respect the reader's intelligence that help make him one of the most outstanding writers about genuine Islam and relevant Islamic themes.

Please find in this missive my deep gratitude for all the highly significant books and articles.

HARUN YAHYA HAS ADDED A NEW CHAPTER TO THE ISLAMIC LITERATURE

Many people had been observing an apple falling down from a tree to the ground, however it was only Newton who had the capacity to think, discover and define the laws of gravity as result of this observation. In Quraan it has been said time and again to "think" on various aspects of His creations. However it is only few who have thought about Allah's creations and could find His "miracles" and the proof of His existence. There had been some efforts by scholars particularly the Muslim scholars in this direction but Harun Yahya has given it a new direction. I can confidently say that he has added a new chapter to the Islamic literature.

Religion has always been considered in opposition to science. Even today there are many schools of thought who consider religion and science not in congruence with each other. Unfortunately some Muslim "scholars" have also fallen victim of this propaganda. However Islam is the only religion, which has considered science as part and parcel of its belief. Religion has been expressed, propagated and advocated by Muslim scholars in different ways. However there had been little effort in explaining religion in light of the cre-

ations of Allah, be it living or non-living. In Quraan it has been said time and again to "think" and "ponder" on various aspects of the universe.

When I read and study various writings of Harun Yahya the basis appears to be one word of the Holy Quraan i.e. "Yathafakkaroon" which has been repeated more than a dozen times and means -- "think". His writings are so appealing thought provoking that one is compelled to start thinking about his creator and the creator of the universe. It also makes you think about the reason of creation of human beings and the universe. It clarifies that scientific discoveries are revealing more and more "proofs" of the Truth of Islam. There is nothing in science which is contradictory to Islam. In fact every new scientific understanding is revealing the secrets of the "creations" of Allah and thus is a source of strength for our "belief".

The books of Harun Yahya cover a wide variety of subjects. On one hand it makes you ponder on the miracles in human body (like "miracles in Immune system" and "miracles in the eye") while the other he makes you think about the harmony and secrets in Universe (like "creation of the universe" and "miracles in the atom").

He has very effectively challenged all aspects of "Darwinism" and has undoubtedly thrashed his theory of evolution with reasons and facts, also exposing the forgery committed by the "scholars" propagating Darwinism. He is a writer, who has looked at Islam from a new angle and expressed it very effectively based on scientific evidence and reasons. In medical literature we have "evidence based medicine". Harun Yahya has exactly done the same and produced "evidence based Islam". The evidence has been gathered and produced from "nature" and the everlasting laws, which are operating in nature since Allah created it.

May Allah give him the reward of his efforts on "The Day After". Our duty is, to at least study and strengthening his thoughts by propagating and supporting this new addition to the Muslim literature.

"HARON YAHYA'S WORKS ARE WELL-READ THROUGH THE WORLD AND MANY PEOPLE ARE MOVED AND HAVE 'SURRENDERED TO THE WILL OF GOD'"

The world is in the midst of crisis. Human beings are facing multitude of crisis because of their rejection of God and His system. The worldwide socio-economic and environment problems, moral degradation and spiritual crisis are some of the manifestations of the rejection. Ever since science detached itself from the Islamic root and follow the agnostic and atheistic system of the West, it created more problems than benefit. Science with the western perspectives strengthened the ancient Greek doctrine of materialism which led to the formulation of various atheistic philosophies. Human beings were misled into following these philosophies such as utilitarianism, hedonism, individualism, fascism and many others which trapped the people into the endless problems and miseries. Is there any glimpse of hope that humanity could be saved from the oblivion? Yes if human being accepts God and His system.

Haron Yahya's works have contributed to this glimpse of hope for the salvation of humanity. Haron's works are well-read through the world and many people are moved and have "surrendered to the will of God". The books on science and the Quran and other related topics written by Haron have demolished the notion that empiricism is the only trustworthy and believable source of knowledge. The Qur'an which ever since its revelation has "mesmerized" multitude of people, such as al-Walid bin Mughairah, the Arabian noble laureate, and Omar Khattab, for its language, eloquence, and yet again at this modern age, the Qur'an has shown its miracles in terms of science. Haron's work in this topic is very much commendable and should be read by those who aspire to know Islam and its teaching.

"HARUN YAHYA'S BOOKS MAKE UP A RICH AND BENEFICIAL INFORMATION SOURCE FOR UNIVERSITY AND HIGH SCHOOL STUDENTS"

*H*arun Yahya, the well known scientific writer from Turkey, is the scholar who has waged the most effective scientific war against the lie of evolution over the last decade. With scientific facts and sound evidence, the author clearly exposes the lie of evolution, which lacks any scientific proof, and shows the clear signs and might of God the Almighty, the Lord of all the worlds, known and unknown to man.

With their easygoing and fluent style, Harun Yahya's books that have been translated into Russian are easily understandable by both scholars and lay readers. They are therefore very popular among Russian people. These books further constitute a rich and beneficial source of information for university and high school students. It will be a great success for the future if these books are included in the educational curricula of schools and academic institutions.

NEWSPAPERS AND MAGAZINES**

ARTICLES

ITALY - MARCO POLO

*M*arco Polo is an international political magazine published in Venice, Italy. It is published by a foundation called TRACECA (Transport Corridor Europe Caucasus Asia-A Programme of the European Commission External Relations Directorate-General) This foundation is a European Union plat-

form for the organization of commercial and cultural relations between European countries and Central Asia. The December, 2001, edition of the magazine published Harun Yahya's article on terror.

God calls to the Abode of Peace
and He guides whom He wills to a
straight path.
(Qur'an, 10:25)

*"Harun Yahya is a well known writer from Istanbul who has written numerous books and articles on Islam, which includes the marvels of Allah's creations, the evolution theory, and politics. His articles have been published, not only in Turkey, but in other countries as well. His study aims to convey the message of the Qur'an, and to encourage people to think on issues such as the existence and the unity of God, and the Hereafter."
(The Middle Path, October 2000)*

Another article that appeared in the October, 2000, edition of The Middle Path was "From Caterpillar to Butterfly," which describes the marvelous stages in the metamorphosis from caterpillar to the perfect shape of a butterfly. The article also discusses the wondrous proofs of creation in the lace-like wings of the butterfly and the artistry of their color, shape and symmetry.

In "The Expansion of the Universe," published in the same issue, scientific proof is given of a beginning to the universe and its continual expansion. In Harun Yahya's book The Creation of the Universe the topics discussed in that article are examined in greater detail, showing that life on earth emerged as a result of God's flawless creation and that it is under His control.

UNITED KINGDOM - IMPACT INTERNATIONAL

*I*mpact International is an independent magazine published in the UK and distributed to more than 100,000 readers in 18 countries including America, Canada, Germany, Kuwait, Pakistan, India, Mauritius and Sri Lanka. In its May 2001 issue, it published an article by Harun Yahya entitled "The Kosova-Serbia-Macedonia Triangle," which analyzes the latest developments in the Balkans.

May 2001

In Harun Yahya's "Common Material, Design and Designer," which appeared in the August 2000 issue of the magazine, the latest developments in the Genome Project were discussed. The following is an extract from the article:

"The recent completion of the human gene map within the scope of the Human Genome Project is an important scientific development. However, some results of this project are being distorted in some evolutionist publications. It is claimed that the genes of chimpanzees are 98% similar to human genes, and this is presented as an evidence for the claim that apes are close to humans, and therefore, logical ancestors of humans as claimed by Darwin's theory of evolution. The argument is misleading... The claim of 98% similarity is deceptive. To claim that the genetic make-ups of man and chimpanzee bear 98% similarity to each other the genome of the chimpanzee also has to be mapped just as that of man and the two have to be compared. However no such comparison results are available, because, so far, only the gene of the human has been mapped. No such research for the chimpanzee has been done yet. ...Darwinists are distorting the results of the Human Genome Project. Life did not originate as a result of unconscious coincidences as evolution claims, but as the result of the creation of Allah, the Almighty, the Owner of infinite knowledge and wisdom."

USA - GETTING BACK TO QUR'AN & THE SUNNAH

A number of Harun Yahya's articles have appeared in the American monthly magazine Getting Back to Qu'ran and the Sunnah. "The World and the Hereafter," published in the fourth edition, says that God created this world as a temporary place where believers are tested. The article "Solution: Morals of the Qur'an", which appeared in the eighth edition of the magazine, relates that in the Qur'an, there is no discrimination between human beings based on sex or material wealth. A person's status is determined by his piety and closeness to God. In another edition of the magazine, an article by Harun Yahya entitled "The Moral Values of the Qur'an" discussed worshipping God in the best way and the behavior appropriate to a believer.

USA - AFTAB

*A*ftab is the magazine of the New York University Students' union. It has also published various articles by Harun Yahya. Its December-January, 2001, issue carried an article by Harun Yahya entitled "The Signs in the Heaven and the Earth." This article says that everything, from the smallest piece of matter to the immense galaxies that contain millions of stars, works according to an order, and that this order is under the control of God. In the February-March, 2001, issue of the magazine, an article entitled "The Expansion of the Universe" presented a discussion, based on scientific evidence and observation, of the fact that God created the universe from nothing.

The author, Haroon Yahya, has published numerous books and booklets explicitly proving the existence of Allah, emphasizing the marvelous creation of Allah against the materialistic and atheistic ideologies, and of course their most efficient and significant view: the Evolution Theory. Harun Yahya is well known throughout the world and his organization was gracious enough to contribute articles as well as books for our Islamic Center.

GERMANY - KAABA

*K*aaba is a magazine read by university students in Germany and is circulated throughout the country, particularly to universities. As well as publishing articles by Harun Yahya, it also runs articles which make use of his works.

In its April, 2002, issue it ran Harun Yahya's article "Islam is Peace" as its cover story. This article provides an insight into the concepts of war and jihad in Islam, and maintains that all forms of

barbarism, unnecessary acts of violence and unjust aggression are forbidden by Islam. Another article in the same issue, titled "The Real Ideological Roots of Terrorism: Darwinism and Materialism," examines the disasters Darwinism has visited on the world and reveals its connection with terrorism, one of the most important global problems in our time.

AUSTRALIA - SALAM

*S*alam is published every two months and is Australia's largest magazine devoted to the presentation of Islam. Almost every issue of this internationally circulated magazine contains articles by Harun Yahya: The November-December, 1999, issue contains an article entitled "Philosophies that Made the Mistake of Denying Allah," which discusses those scientists who deny the existence of God even though they have closely observed the clear evidence for it; The May-June, 2000,

issue contained an article entitled "A New World," in which some prejudices with regard to religion are dealt with. It says that religion is not only the concern of the elderly, but of the whole of society and that when man comes to know God, Who created him, he will be saved from the false idea that religion is to be avoided; The July-August, 2000, issue carries an article called "Pondering on the Qur'an;" The September-October, 2000, issue published an article entitled "Darwinists are distorting the results of the Human Genome Project: THE APE-MAN SIMILARITY IS A TALE!". This article shows clearly that human beings did not evolve from apes but were created

by God. The article "A Living Planet," in the January-February, 2001, issue, demonstrated that God created the world in a perfect balance so that human beings could live in it most comfortably; The March-April issue ran an article entitled "Why Does Darwin's Theory of Evolution Contradict With Religion?" and the September-October 2001 issue carried the article "The Real Ideological Root of Terrorism: DARWINISM AND MATERIALISM". Samples of articles by Harun Yahya that have appeared in this magazine can be seen below.

PORTUGAL - AL FURQAN

A foundation called Al Furqan that operates in Lisbon, the Portuguese capital, serialized Harun Yahya's Perished Nations in Portuguese in its magazine. This magazine follows this author's work carefully, and also publishes his articles dealing with evolution.

INDIA - ISLAMIC VOICE

*I*slamic Voice is a monthly publication in India. In its September, 2000, issue an article by Harun Yahya, "The Obvious Signs in the Lake of Lut," appeared in the "Qur'an and Science" section. This article examines, in the light of archaeological evidence, how the people of

Lut were destroyed. In the July, 2001, issue, Harun Yahya's "Miracles in the Eye" appeared. Articles by this author are published regularly in this magazine.

PAKISTAN - RENAISSANCE

Harun Yahya's "Pondering on the Qur'an" appeared in the September, 2000, issue of this English-language magazine published in Pakistan. Below is an extract from that article:

"Therefore, what is needed in the first place is to correct the wrong point of view about the Qur'an and make people understand that the Qur'an is not a book which is addressed only to the Prophet (saws) but to all people who consider themselves Muslims. Any person who utters this statement: "I'm a Muslim, alhamdulillah" must read the Qur'an and try to understand the meaning of the verses. In the Qur'an, the importance of learning verses and reciting them are especially emphasized.

...Some people believe that the Qur'an addresses only Muslims of the 7th century and some others think that only a small part of the verses addresses people other than the Muslims of the 7th century. A person having such an approach gets satisfied with reading the Qur'an and thinks he fulfils his religious duties by doing so. However, this is not only a matter of learning what is inside of the Qur'an, but also putting them into practice, fulfilling the duties ordered in the Qur'an, adapting moral standards explained in the Qur'an; briefly, bringing the Qur'an into one's own everyday life."

PAKISTAN - ALBALAGH

The August, 1999, issue of the monthly magazine Albalagh, published in Pakistan, carried Harun Yahya's article "Hell." Here is a paragraph from that article:

"As many beauties and blessings there are in Paradise, that much ugliness and torment Hell is full with. Those who have denied Allah as their Creator are punished with an endless penalty in Hell. ...The common characteristic of the unbelievers who deserve Hell is their rejection when they have been invited to religion."

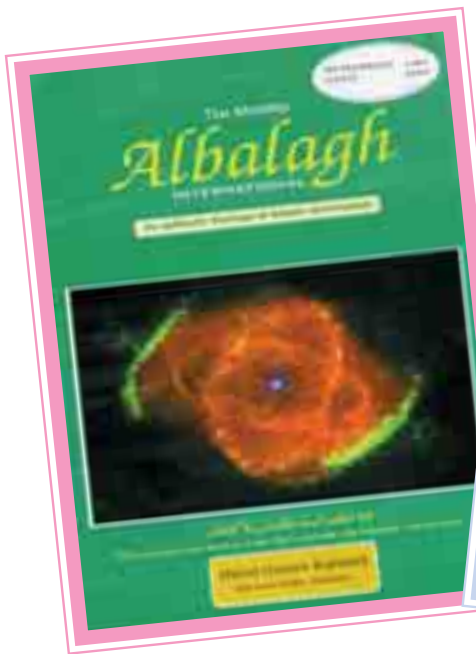

The March, 2000, issue published Harun Yahya's "The Expansion of the Universe," and in the April, 2000, issue an article entitled "About the Rain" appeared. This article uses scientific discoveries and relevant verses from the Qur'an to show that every year the same amount of rain falls on the earth and that the stages in the formation of rain correspond to the Qur'an. "Past Civilizations," serialized in the May and June, 2000, issues gives an account of some of the destructive events suffered by

"The 77% of nitrogen, 21% oxygen and 1% of carbon dioxide as well as other gasses readily available in the atmosphere represent the ideal figures necessary for the survival of living beings. Oxygen, a gas that is vital for living beings, helps food to be burned and converted into energy in our bodies.

If the oxygen quantity in the atmosphere were greater than 21%, the cells in our body would soon start to suffer great damages. The vegetation and hydrocarbon molecules needed for life would

USA - IQRA

*I*qra is the magazine of the South Bay Islamic Organization (SBIA) in San Jose, California, a non-profit organization dedicated to weaving the universal teachings of Islam into the fabric of American society. Harun Yahya's article published in the April, 2002, issue of the magazine was titled "In Every Age There Existed an Ignorant Society". An extract from the article reads:

From the time man was created, there have always been two distinct societies: the ignorant society and the community of believers. All those who fail to observe the limits set by religion, constitute the ignorant society. Despite discrepancies in beliefs, thoughts and ways of living, one fundamental rationale lays the groundwork for the life of all ignorant societies: not to adhere to true religion.

Harun Yahya is a regular contributor of this magazine.

USA- MIRROR INTERNATIONAL

*M*irror International is a message-oriented weekly newspaper published from New York. 40,000 copies are distributed every week in more than 115 cities in the US and Canada. It aims to encourage Muslims to interact with American society and politics, and to provide intellectual interaction with the non-Muslim elite and masses alike.

Harun Yahya's articles published in this newspaper address faith-related and political topics. The article titled "Evaluating Everything From the Point of View of the Qur'an" maintains that everything takes place in accordance with the destiny Allah has determined, and that therefore everything has a purpose. What believers should do, according to the author, is to interpret each event in the light of the Qur'an and react in the way the Qur'an prescribes.

SINGAPORE - THE MUSLIMS' DIGEST

The Muslims' Digest is a monthly magazine of social topics that concern Muslims. This English-language magazine deepens its readers' awareness of questions concerning belief and science by publishing articles by Harun Yahya on these issues. In its May, 2000, issue it carried Harun Yahya's "Never Plead Ignorance About the Apparent Existence of Allaah," which says that when a person looks at the world he finds God in every detail, and that God holds everything under His con-

trol; He is aware of everything and He has made human beings aware of His existence through the perfection of His creation. In another issue of The Muslims' Digest (left), the article "Cities Turned Upside Down" discusses the various ways in which those societies that acted arrogantly towards God were destroyed. The article "The Design in Water" describes how water was specifically created for human life; "The Disaster of Pompeii"

POLAND - THE MUSLIM WORLD REVIEW

In the April, 1999, issue of this magazine, an article was carried entitled "Co-operation Between Animals and Plants," which discussed the life that plants and animals have in common. Here is an extract from that article:

"..One good example is the pitcher plant (Nepenthes bicalcarata) that grows in Eastern India. This plant, that is exactly in the shape of carafe, houses ant colonies in its body. It feeds on insects by seizing the ones that perch on it, captures them and in the end digests them. On the other hand, the guest ants have privilege for this carnivorous plant. The pitcher plant ignores the existence of ants in an incomprehensible manner. Truly the ants and the plant have a deal with each other for their mutual benefit. The ants are under the threat of being eaten by the plant, nevertheless they have gained a home for themselves. On the other hand, the plant leaves remnants of some tissues and insects for the ants and in return, it gains the right to get protected from its enemies by the ants. This example defines the main features of symbiosis between the ants and the plant. The anatomy and physiological structures of the ants and the plant hosting them are so designed as to provide a mutual relationship. However the evolutionists claim that such relationship gradually became widespread in millions of years, assuming an obvious illogical thesis that two living beings lacking intelligence made an agreement and planned such 'mutual benefit' system-somehow."

In one of its issues, the magazine presented the author Harun Yahya with an article titled "Who is Adnan Oktar?"

INDONESIA - DIALOG JUMAT

*D*ialog Jumat is published on Fridays as a supplement to Indonesia's largest newspaper, Republika. The articles by Harun Yahya published in that supplement dealt with the miraculous aspects of the life of ants and plants.

UNITED KINGDOM - DISCOURSE

Discourse magazine is published monthly in Britain. In the April, 2001, issue Harun Yahya's article "Darwin's Theory of Evolution: Contradiction with Religion" was run as the cover story. This article discusses the misconception of evolution, and how it contradicts religion. People who believe in God are warned against the dangerous implications of this theory. Harun Yahya's article published in the May, 2002, issue, was titled "The Only Solution to Moral Degeneration: The Values of the Qur'an." Articles by the author are regularly published in this magazine.

ALBANIA - FAMILJA

In the magazine Familja, published in the Albanian capital Tirana, regularly carries articles by Harun Yahya. One of the Harun Yahya articles published in this magazine describes the transitory nature of life in this world:

"...Mortality is surely a grave topic to ponder. Until this moment in his life, it may well be that the person is unaware of the significance of this reality. But it is never too late to repent to Allah, and to re-orient all one's deeds and the conduct of one's life in submission to the will of Allah. Life is short; the human soul is eternal. During this short period, one should not allow temporary passions to control one. A person should resist temptation and keep himself away from everything that will strengthen his bonds to this world. It is surely unwise to neglect the next world just for the sake of the temporary joys of this one...."

THE FOSSIL RECORD REFUTES EVOLUTION TEXT

BY HARUN YAHYA

Harun Yahya is a world-renowned Muslim scholar from Turkey. It is a pleasure for 'The Miracle' to have him as our guest writer

According to the theory of evolution, every living species has sprung from a predecessor. A previously existing species mutated into something else. In time, and all species have come into being in this way. According to the theory, the transformations (process) gradually over millions of years.

If this was the case, then intermediate-species should have existed and fossil remains (the living transition

stages) should have been found in the past, which had required some biological transition in addition to the fact that they already had. Or there should have existed some hybrid fossils which included some bird traits in addition to the reptilian traits they already had. For paleontologists to have discovered creatures which they believe to have

evolved to the point of "transitional forms".

If such animals had really existed, there should be millions and even billions of them in mudstone and sandstone. Most importantly, the remains of these strange creatures should be present in the fossil record. The number of these transitional forms should have been over a billion. But the present animal species and their remains should be found all over the world. In *The Origin of Species*, Darwin explained it very clearly by using an illustration: immediately consider, looking back closely all of the species of the same group together, their ancestry has created...

Consequently, evidence of their common ancestor should be found only among fossil remains.

111 Even Darwin himself was aware of the absence of such transitional forms. It was his hope that they would be found in the future. Darwin has

implied, he stated that the biggest stumbling block in his theory was the missing transitional forms. In his book *The Origin of Species* he wrote the following in the chapter "Difficulties of the Theory": "Why if species have descended from other species by insensible gradations, do we not everywhere see insensible transitional forms? Why is not all nature in confusion, instead of the species being, as we see them, well defined? But, as by the theory every insensible transitional form must have existed, why do we not find them embedded in countless numbers in the course of the earth? But, by the theory, their regions, having become distinct, could some of the why do we not find them closely linking intermediate varieties? This difficulty for a long time galled and troubled me."

112 The single explanation Darwin could come up with to account for this situation was the "discovery" that all

USA - THE RISING STAR

The Rising Star, published in English in the US, has a circulation of about 9,000. It appears every two months and is distributed in several US states. The magazine usually deals with national and international topics, and frequently prints Harun Yahya's articles on scientific issues.

November 2001

*A*alim (The Scholar) is the quarterly publication of the Islamic Research Foundation International, located in Louisville, Kentucky. The purpose of this foundation is to promote the intellectual growth of the Muslim world. Harun Yahya's article "The Expansion of the Universe" was published in the Fall, 2001, issue of Aalim.

USA - AL MANASSAH

*A*l Manassah is a bi-weekly newspaper with a circulation of 20,000 published in Arabic and English. The newspaper is based in New Jersey and is distributed throughout the USA, as well as the Middle East. Harun Yahya's article "Islam is not the Source of Terrorism, but Its Solution," published in the first January, 2002, issue of the newspaper, explains that the source of terrorism is definitely not a divine religion, and that there is no room for terrorism in Islam.

USA - AL JUMUAH

*A*l-Jumuah Magazine is a monthly, English-language based, full-color Islamic magazine that has been published since 1991. It has a readership of over 15,000, that includes a paid circulation throughout the United States, Canada, the UK, the Middle East, and part of Africa. In addition, it has reseller distribution and reading-room placement in public librarires, schools, universities, Islamic schools, and Islamic centers.

Al-Jumuah Magazine's focus is to provide Islamic knowledge based on the Qur'an and Sunnah for both Muslims and non-Muslims. Harun Yahya's articles, which are regularly published in this magazine, one of the most popular Islamic magazines in the USA, give an insight into science and faith related issues with quotes from the Qur'an and the Hadith of the Prophet. One article published in this magazine titled "Communicating Wonders of Allah's Creation" reads:

It is exceedingly important that true believers should be on their guard against trends of thought that oppose Allah and religion. The duty of a Muslim in the face of Darwinism is to destroy that great lie and to proclaim the truth of creation.

When we look at the life of Allah's

Messenger, in whom there is "an excellent model for believers" (Surat al-Ahzab: 21), we see that he often thought about the glory of Allah's creation and shared his contemplations with the believers around him. We learn from ahadiths of Allah's Messenger (saas) that he "stood up amongst the believers for a long period and informed them about the beginning of creation" (Sahih Bukhari, Book 54, Volume 4, Book 54, Number 414)

So, a great and important responsibility falls to people of good conscience to wage a scientific fight and make a great effort to do away with the Darwinist, materialist thought that opposes the Qur'an.

SAUDI ARABIA - AL-DAAWAH

*A*l-Daawah, a weekly publication devoted to Islamic and social affairs, is published in Saudi Arabia and distributed across the world, including Saudi Arabia, other Arab states, the United Kingdom, France, the USA, Canada and other countries. This attractively presented magazine

has been making enormous efforts to present Islam in the best possible manner for 11 years. Harun Yahya's scientific articles in this magazine contribute to this aim by opening the reader's mind and showing him the glorious artistry in God's creation. One article says:

Water is "just right" for life to a degree that cannot be compared with any other liquid. The larger part of this planet, a world whose other attributes (temperature, light, electromagnetic spectrum, atmosphere, surface, etc.) are all suitable for life, has been filled with just the right amount of water necessary for life. It should be obvious that this cannot all be accidental and that there must instead be intentional design.

USA - AL-AKHBAR

*A*l-Akhabar, an Arab-American publication published by the Arab Information & Communication (AIC) located in California, regularly carries articles by Harun Yahya. Those carried in this newspaper elaborate on scientific subjects such as the perfect order in the universe and God's artistry in creation.

USA - ARIZONA MUSLIM VOICE

And He (God) has made everything in the heavens and everything on the earth subservient to you. It is all from Him. There are certainly signs in that for people who reflect. (Qur'an, 45: 13)

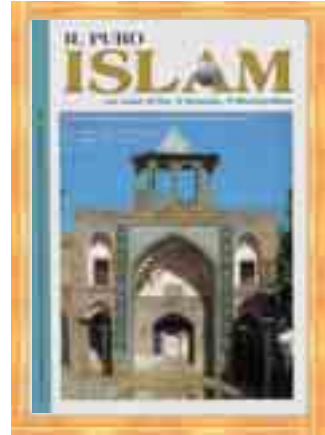

Arizona Muslim Voice is a monthly newspaper serving the Arizona Muslim community. Harun Yahya's articles published in this newspaper aim to raise readers' awareness of the wonders of God, thus helping them to understand more of His greatness and grace and to turn to Him.

ITALY - IL PURO ISLAM

*I*l Puro Islam, one of the leading Islamic journals in Italy, is published by the Islamic Association of Ahl-al-Bayt (Associazione Islamica 'Ahl-al-Bayt') in Naples. The magazine published a review of the Italian version of The Evolution Deceit (L'Inganno Dell' Evoluzione) which reads:

"The author demonstrates that the advocates of the materialism have always supported the idea of evolution even if this theory has been refuted by scientific facts. Contrary the views of evolutionists, the book proves with evidence that life has been made possible thanks to the Creator. The signs of an extraordinary wisdom are visible in all living beings, which evidently reveal the existence of a Creator in whose hands is the government of the entire universe."

The magazine also publishes various articles by Harun Yahya in Italian on a regular basis.

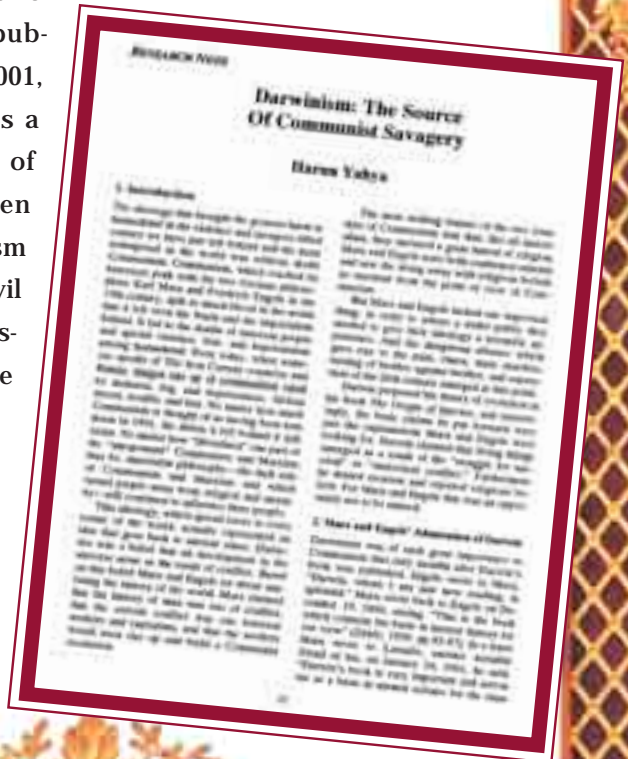

JAPAN - THE JOURNAL OF ISLAMIC GUIDANCE

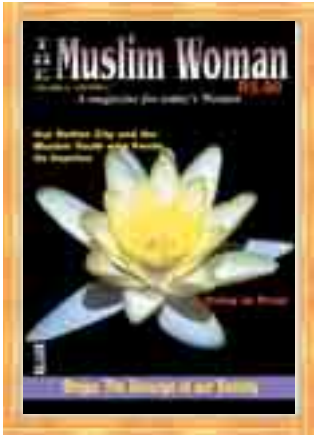

The Journal of Islamic Guidance (al-Irshaad) is a scholarly journal published twice a year, in June and December. As its title indicates, the journal aims to provide general Islamic guidance. It is published by the Islamic Guidance Society based in Japan, which plays an important role in the acceptance of Islam in Japan. The journal includes papers and essays in English, Japanese, French and Arabic from scholars inside and outside the archipelago. Harun Yahya's essay titled

"Darwinism: The Source of Communist Savagery," published in the December, 2001, issue of the journal, gives a comprehensive overview of the relationship between Darwinism and communism and describes how this evil alliance inflicted terrible disasters on humanity in the 20th century.

SOUTH AFRICA - THE MUSLIM WOMAN

The Muslim Woman, published in South Africa is a magazine covering social issues related to Muslim women. Harun Yahya, who is a regular contributor to this magazine, publishes articles on faith-related issues in it. His article "Pondering on the Qur'an" states:

In most of the countries where Muslims are the minority and Arabic is not the spoken language, only a small percentage of people know the content of the Qur'an and ponder on the

Qur'an as required. As a result, people who are ignorant of the real message of the Qur'an attribute different meanings to it. Many people believe some traditions to have their origin from the Qur'an, although they may be contradictory to the very nature of the Quranic message.

GUYANA - THE MUSLIM JOURNAL

The Muslim Journal is published on a quarterly basis by The Muslim Youth League of Guyana. Its aim is to increase the Islamic knowledge of Guyanese Muslims, to bring them news about the world of Islam and to keep Guyanese people overseas well informed about Muslim affairs in Guyana. The Muslim Journal reaches over 30 countries worldwide, and is the only Islamic Magazine in Guyana.

Harun Yahya's article "Superiority Comes From Character, not Race" published in the Oct/Nov., 2001, issue of the magazine states that "all human beings are created the same and in Allah's sight, the only superiority is a person's character, his avoiding all types of sin and rebellion, degeneracy, and deviation and the superior morality deriving from his piety."

Harun Yahya is a pen name used by Adnan Oktar, a prominent Turkish intellectual born in 1956. Oktar started his intellectual struggle in 1979 at Mimar Sinan University's Academy of Fine Arts, where he carried out detailed research into the prevalent materialistic philosophies and ideologies around him. His dedicated intellectual effort against Darwinism and materialism has grown out to be a worldwide phenomenon.

KAZAKHSTAN - DİL

*D*il is a weekly newspaper published in the Kazakh language. Harun Yahya's article published in this newspaper on May 3, 2002, is about Noah's flood and the way it is described in the Qur'an.

RUSSIA - TURKISH WORLD

*T*urkish World is a monthly journal published in Russian. The purpose of the journal is to keep the Turkish community in Russia informed about the Turkish world and about Islamic activities taking place in Russia. Harun Yahya is a regular contributor with his articles in Russian. Articles by him that the journal has published include "Islam Denounces Terrorism," "Perished Nations," and "The Collapse of the Theory of Evolution".

KAZAKHSTAN - ALMATY HERALD

*A*lmaty Herald is a weekly English-language newspaper in Kazakhstan and Central Asia. It focuses on global events and a wide range of political and economic issues. The following article by Harun Yahya published by the newspaper talks about the clear signs of God's existence in the universe and how discovering these signs make scientists turn to God. An extract from the article reads:

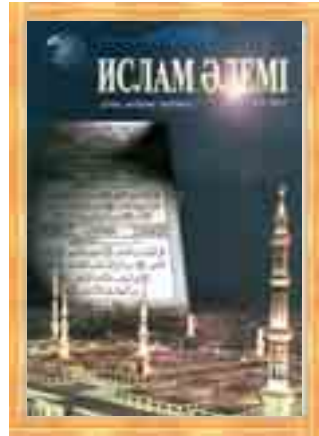

The attributes of the universe discovered by science point to the existence of God. Science leads us to the conclusion that the universe has a Creator and this Creator is perfect in might, wisdom and knowledge. It is religion that shows us the way in knowing God. It is therefore possible to say that science is a method we use to better see and investigate the realities addressed by religion.

In the same issue, the newspaper also gave detailed information about the author and other activities inspired by his works.

KAZAKHSTAN - THE WORLD OF ISLAM

The World of Islam is a bi-monthly Kazakh-language journal. It includes news from the world of Islam, as well as stories on faith related issues and activities carried out by the Muslims in Kazakhstan. Harun Yahya's articles published in this magazine feature the peaceful nature of Islam and emphasize that there is no room for terrorism in Islam. The journal also published a short biography of the author under the title "Who is Harun Yahya?"

KAZAKHSTAN - JULDIZ

Juldiz, another journal in Kazakh, is one of the leading magazines of Kazakhstan. Harun Yahya's article, published in the February, 2002, issue, is about the life of the Prophet Abraham. One part of the article reads:

The prophet Ibrahim is often referred to in the Qur'an and is distinguished by God as an example to people. He conveyed the message of Allah to his people who worshipped idols and he warned them so that they might fear God. His people did not listen to his warnings but, on the contrary, opposed him. When the oppression of his people increased, Ibrahim had to move elsewhere with his wife, the prophet Lut and possibly a few other people who went with them.

KAZAKHSTAN - RUHANI OMUR

*R*uhani Omur is a bi-weekly publication in Kazakh on historical, scientific and religious subjects. Harun Yahya's article in the February, 2002, issue was about the creation of the universe. Another article published in July was about the miracles of creation.

TATARSTAN - ISLAM AND LIFE

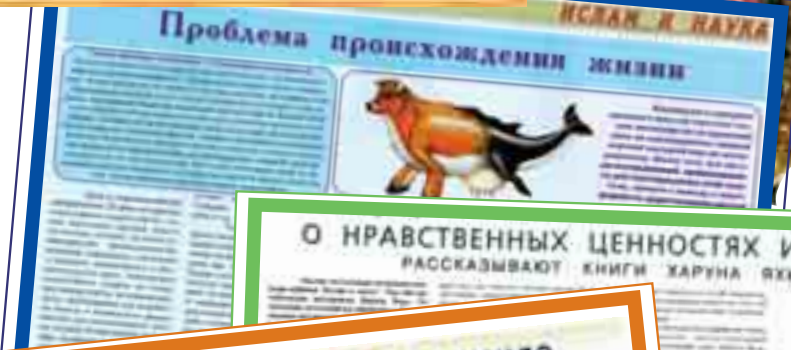

*I*slam and Life magazine deals with scientific and faith related subjects. Harun Yahya's article titled "Scientists are Turning to God" establishes that many noted scientists, such as Einstein, Newton and Galileo, who were pioneers of science, believed as a result of their observations and research that the universe was created and ordered by God and is governed under His control. Harun Yahya's article "The Noah Flood" gives some interesting facts about the flood, which caused the people of Noah to drown.

TATARSTAN - NOVOSTI

Novosti is a monthly newspaper that aims to keep the Tatars in the Russian Federation informed about political and cultural matters. It was established in 1993 and has been publishing Harun Yahya's articles regularly. Harun Yahya's articles published in this newspaper deal with the fallacy of the idea of evolution, the refutation of the basic claims of Darwinism, the signs of creation in living things and the basic tenets of Islam.

The background of the entire page is a lush tropical scene featuring a waterfall cascading down a rocky ledge. The water is a vibrant blue-green, and the surrounding foliage is dense and green. This scene is viewed through a large, arched opening in a reddish-brown stone or brick wall. The arch is supported by two pillars on either side. The overall lighting is bright and natural, suggesting a sunny day in a jungle or rainforest.

Media Coverage

The works of Harun Yahya, written to expose the fallacy of the theory of evolution, have attracted great attention in the foreign press, and press organizations have devoted a lot of space to them. Some have printed lectures and books showing how 20th century science has invalidated the theory, and others have devoted space to reviews of these books in order to inform their readers that there is no such process as evolution.

USA - SCIENCE

The influence of Harun Yahya's books on evolution, and especially his internationally renowned *The Evolution Deceit*, is reflected in the well-known scientific evolutionary magazine *Science*. In an article in the May 18 edition by Robert Koenig, entitled "Creationism Takes Root Where Europe, Asia Meet," the author gives a lengthy account of Harun Yahya's struggle against the deception of the theory of evolution, the international success of his book *The Evolution Deceit* and of the defeat of evolutionists in Turkey. The article emphasizes that this broad academic endeavor-"One of the world's strongest anti-evolution movements outside North America"-aims to cause the collapse of the theory of evolution on the scientific front, and that it is making inroads in other Muslim countries. Another topic dealt with in this article is the international success of *The Evolution Deceit*. It says that some evolutionist scientists in Turkey complain that "books by Harun Yahya such as *The Evolution Deceit* have become more influential than textbooks in certain parts of Turkey". In the article, the concerns of Turkish evolutionists are expressed in these words "...Many evolutionist scientists fear they are losing ground to creationists in public opinion".

"Creating a stir – Books like *The Evolution Deceit* appear to be gaining readership."

USA - NCSE REPORTS

*N*CSE Reports is a magazine published by an education center named The National Center for Science Education based in Berkeley, California. This magazine is supported by the American Academy of Scientists, and despite the fact that the group is essentially evolutionist, the November-December, 1999, issue was devoted to the works of Harun Yahya dealing with the collapse of the theory of evolution. The cover bears the title, "Islamic Creationism in Turkey" and gives this introduction:

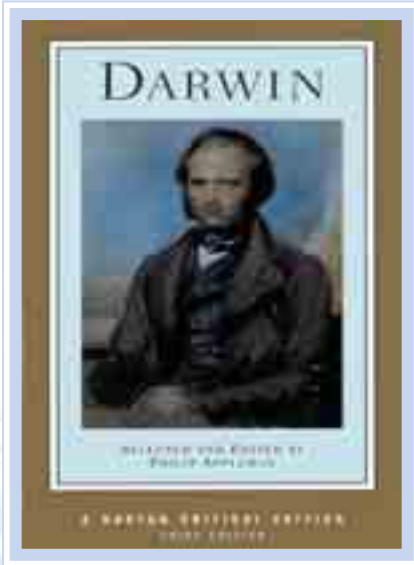

"... Most representative is Harun Yahya's text The Evolution Deceit. The book comes in 2 version - a large, attractive 370-page volume notable for its many full-color illustrations and slick appearance (Yahya 1997) and an abridged 128-page booklet with fewer illustrations, which was widely distributed free of charge to the public (Yahya 1998)..."

Observing the awesome and orderly aspects of nature - the heavens and the stability of the earth, lightning and rain, useful plant and fruits, and so on - prompts common sense to conclude that all this must be designed for a purpose (13 Ar-Rad 2, 3; 30 Ar-Rum 20-27)..."

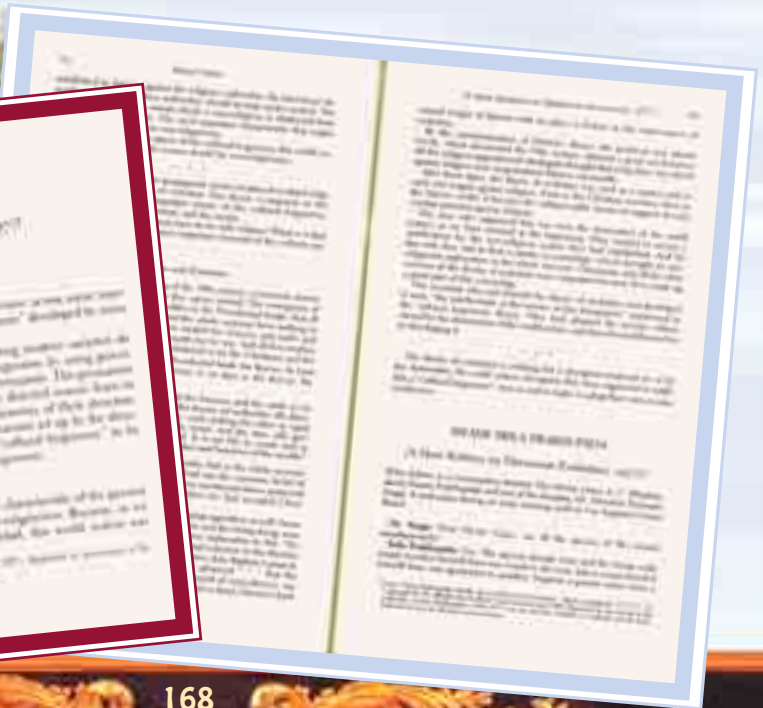

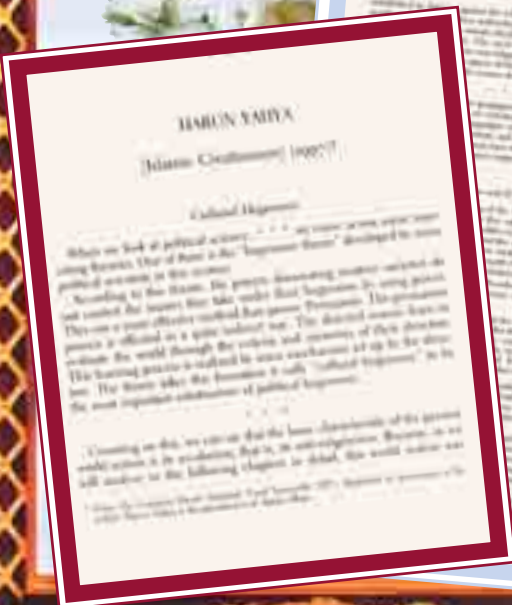

WHO IS HARUN YAHYA? Adnan Oktar, using the pen-name "Harun Yahya" devoted his life to explaining the existence and the unity of Allah and the magnificence of the morals of the Qur'an. He spent all his life serving for this purpose from his early ages. He has never given up against the difficulties he faced. The biography states that Oktar entered university in 1979 and has authored over 100 books since 1986 – a remarkable output indeed for a single person.

USA - W.W.NORTON & COMPANY

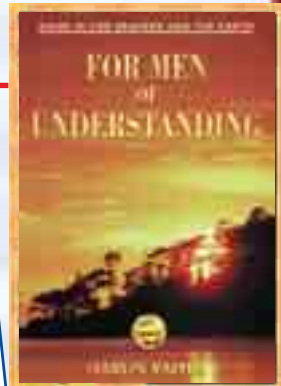

*D*arwin, a book edited by Philip Appleman, a distinguished professor emeritus at Indiana University, and published by W.W. Norton & Company, one of the leading publishers in the USA, included an extract from Harun Yahya's *The Evolution Deceit* under the title *Islamic Creationism*. The book includes essays by and extracts from various scholars and professionals for and against the theory of evolution. Harun Yahya's essay published in this book focuses on the anti-religionist aspect of the theory of evolution and how it was used as a master card in each war waged against religion after Darwin.

YUGOSLAVIA - HORIZONT

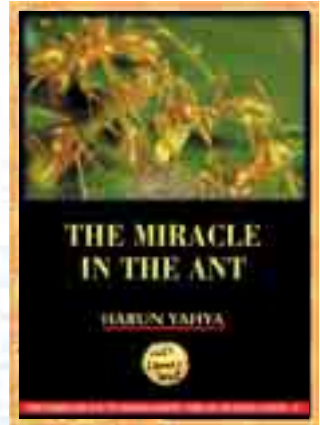

*H*orizont is a creationist magazine published in Belgrade, Yugoslavia. Published in Serbian, it carried in its April, 2002, issue a review of the book For Men of Understanding by Harun Yahya and the documentary film The Fact of Creation based on Harun Yahya's works. These works are currently being prepared in Serbo-Croat and will be released in Yugoslavia soon.

UNITED KINGDOM - CRESCENT INTERNATIONAL

Crescent International is a newspaper published every fortnight from its headquarters in London. It is also distributed in Nigeria, Canada, South Africa and Pakistan. On the book review page of the 16-31 March, 2000, issue Harun Yahya's *The Truth of the Life of This World* was discussed. The review by Imtiaz Adam, the editor of the magazine, reads:

In this fascinating book, Harun Yahya has written a remarkable and extremely effective reminder of "the truth of the life of this world". Throughout, the text is clear and readable and the marshalling and use of Qur'anic ayaat extremely effective.

The book is superbly presented, with numerous full-colour photographs, illustrations and diagrams, beautifully designed. This book is one of the very few that is likely to be convincing to skeptical readers steeped in western propaganda, be they Muslim or non-Muslim. That alone is a very considerable achievement.

In the 1-15 April, 2000, issue a reader sent an e-mail concerning the book to the "Letters to the Editor" page, which can be seen opposite.

The 16-30 September,

2000, issue of the newspaper published a review of Harun Yahya's book *The Miracle of the Ant*.

The 1-15 July, 2001, issue of *Crescent International* introduced its readers to Harun Yahya's book *The Evolution Deceit*, that has provoked such great interest throughout the world. The review stated:

Harun Yahya's Evolution Deceit is a scientific, intellectual and academic deathblow to the modern theory of evolution... The book is thoroughly researched and solidly scientific. The dogmatic defenders of falsehood, however, will find it difficult or impossible to digest.

Harun Yahya's book on life

The review of Harun Yahya's book in your last issue (March 16-31, 2000) was excellent. I immediately bought a copy. Sometimes, there is so much political and other worldly news in *Crescent* that it is easy to forget the full scope of the Islamic worldview. Brother Yahya's book is indeed a reminder of the true nature of life. It is also very well written and produced, and attractive and convincing to young Muslims educated in the western system. My teenage children were both fascinated and convinced.

THE MIRACLE OF THE ANT
By Harun Yahya. Publ. Dar-Il-Ifta Publications Ltd., 1 Wynne Road, London SW10 0BB. Pp. 105. Pbk. £4.95.

The Turkish author Harun Yahya is among the Darwin's most assiduous defenders of the Western religion of evolution. This is among the many books on the subject, newly translated from Turkish and presented in a superb, full-colour volume with numerous and excellent illustrations. Yahya's object is to examine the ant's complex and sophisticated social systems in order to show that they can only be explained by the miracle of Divine creation rather than the influence of natural selection and evolution.

UNITED KINGDOM - THE MUSLIM WORLD BOOK REVIEW

The Muslim World Book Review is a quarterly publication of the Islamic Foundation. The Muslim World Book Review aims to present the Muslim viewpoint on books and issues which concern Islam and Muslims. This review journal aspires to inform and stimulate lay readers and scholars alike through detailed critical reviews, brief introductions and select bibliographies on recent and contemporary publications.

It has published reviews of various books by Harun Yahya. The review of *The Evolution Deceit* by Maryam Jameelah, the American essayist and journalist, reads:

Scientifically, with appropriate illustrations, the author proves that each organism of every species was Divinely created perfect and complete from its very inception with everything required for a successful life.

Ruqaiyyah Waris Maqsood, the renowned Islamic writer, recommends

Harun Yahya's books to young readers, and writes the following in her review of *Deep Thinking and Never Plead Ignorance* in another issue of *The Muslim Book Review*:

Harun Yahya has put together a vast range of books which tackle the very subjects that have bothered me, and for that, I am sure many similar students will take great benefit. The style of the books is not that of dry academia, but is readable and straightforward, so that even youngsters can study and benefit from the thoughts contained therein. The message is added to by the many colourful and relevant photographs, which not only enliven the page but are also good thought-provokers in themselves. This is the major function of the Harun Yahya books, I feel-to widen our consciousness, give us material to ponder on which we may not have known before, and, thus, help us to understand a little more of the Greatness and Grace of Allah.

They are so simple and clear, and so easy to understand in the mind of the reader. The author's goal is to present to the world a simple example of the wisdom of the created universe, and use them as pointers to the existence of the Creator.

Since the attack on the Theory of Evolution in Harun Yahya's book, most of the books also include a copy of the Chapter 'The Evolution Theory: If you cannot think in this world, you cannot be extremely ignorant and useful, as a result of all the so-called evidence presented in the theory of evolution, presented by the arguments of the process of Allah. Readers who wish to know more about the subject would do well to open the book back the page to that title. Evolution Theory.'

Never Plead Ignorance

by Harun Yahya

Ta Ha Publishers, London, 2000, 103 pp

This book deals with many subjects such as the creation of Adam, the idea of sin, the concept of a covenant and Allah's command to worship Him. The fact that an individual won't stay in this world for a long time, the fact that death is inevitable, the Qur'an as a just book and Allah's command to worship Him. The book is a good book and Allah commands us to read it. The book is a good book and Allah commands us to read it. The book is a good book and Allah commands us to read it.

available in paperback, in every language. The author explained why a special chapter is included in the book on the basis of evolution and stated that the book contains the basis of all anti-evolutionist arguments. The book is a good book and Allah commands us to read it. The book is a good book and Allah commands us to read it. The book is a good book and Allah commands us to read it.

By Harun Yahya. This book is a masterpiece and a great work.

Reason*

Harun Yahya

Code: AD100

Paperback: 208 pages;

Publ. Price Rs.345

CLUB PRICE Rs.250

How do we know of the existence of Allah? How is it possible to think that the balance in the world came about by coincidence when the extraordinary harmony of nature is observable even with the naked eye? This book is a summons to think about the universe and the living things Allah has created and to see the perfection in their creation.

SOME E-MAILS RECEIVED AT www.harunyahya.com:

KHURRAM JAHANGIR / PAKISTAN

It's a great job to explore the truths and astonishing aspects of Holy Qur'an and not only the non believers but even muslims need to strengthen their beliefs. I appreciate the work you are doing.

MUSODIQ BELLO / USA

Accept my commendation for the very good job you're doing by challenging age long scientific "truths"! The first book I read from your series was "Evolution Deceit". I was in Nigeria then and I could not leave it until I almost finished the book. It was when I came here to the US that I discovered your website and have downloaded a couple of books from there. However, I will really like my colleagues back in Nigeria, especially those in the university environment, to have the opportunity of reading your books and hopefully, be positively influenced by them. Many of us studying for higher degrees see you as a role model in applying our scientific knowledge for the progress of Islam.

AMDIAR AMIR / INDONESIA

I'am very very interested with what you have written in so many books. I have downloaded about 30 books from the internet. May Allah bless you with the service that you have done for Islam and the Muslim and the whole mankind.

UNIVERSAL MUSLIM ASSEMBLY / NIGERIA

We are overwhelmingly impressed with your works, and we pray that ALLAH (A.W.) continues to guide you, increase you in Iman and knowledge (amin). Your books are of utmost interest to us.

ZHU GUANGLEI, DEAN, SCHOOL OF LAW AND GOVERNMENT, NANKAI UNIVERSITY, PROFESSOR IN POLITICAL SCIENCE, CHINA

Mr. Harun Yahya's books are very important. My major field is Chinese government and politics, so I have to need time to reading his books and thinking some questions. I will collect and read them for long time.

SOHAIB JAMAL KHAN / USA

I am a born Muslim who has lived in the U.S. most of my life. By the Guidance and Mercy of Allah, me and my brother Omair began reading on Islam and we came across your videos and your books. Although I have always been a muslim I had never read the Quran, and once again b/c of ALLAH's mercy I saw your tapes and have begun to read the Quran. This may not mean much, but I have great respect for what you are doing and if there is anything I can do to help, Please let me know...

SINA DAIRO / UK

I watched your documentary on our National Television Station on Friday 24th May 2002, on Our Maolud Nabiiyyi day. Please I will like to know how to get these following books/video tapes.

HUSMAN BACCHUS / USA

I have read several of your books and am amazed by the length, breadth and depth of your knowledge. This is a special privilege from Allah to you and must be cherished. May Allah reward you for all of your good works and increase you in knowledge. Ameen.

JOSE ESTEVES PEREIRA / PORTUGAL

I would like express my thanks concerning the books of Mr. Harun Yahya. I think it is a great meditation about our problematic world at this time of sorrow and hope also. I deeply recommend the books of Mr. Harun Yahya.

SURASIT ISSARACHAI, MD / USA

I am Muslim Physician who is finishing my training in the US. I would like to ask the information about and how to get permission to translate the book by brother Harun Yahya into Thai languages. It is estimated that more than a millions of muslim living in Thailand. We need to have access in the book that can bring the truth of islam, Quran and Sunnah in matter of things surround us to the People.

NOSHEEN MIRZA / UK

I am very grateful for your website and books for they have given me so much knowledge and understanding. Being a muslim in England it is still

very hard to find information on Islam in a language I can read. Your books help me to see everyday things in a different light. I have recommended your website/books to all my friends. May Allah reward you for what you are doing.

SABINA KHAN / PAKISTAN

Alhamdulillah you are doing an excellent job. May Allah reward you for this and may He give us strength to participate in spreading the words of Allah. We are arranging a programme for children colors of Islam summer camp. We desperately need your videos.

OMAR ZAHABY / SAUDI ARABIA

I have read the Book titled "The Evolution Deceit" and there is no need to describe how delighted I was by reading it. I have already distributed 10's of copies to everyone I know at work by purchasing it from the book store here in Riyadh.

RODICA MARIN SHAHABASI / USA

I live in the USA and I want to buy some books in order to spread Islam to my family who lives in Romania. May Allah reward you, inshAllah.

EVI KURNIAWATI / INDONESIA

As long as I've read your website, I've been glad that Islam has good scientists who can speak honestly about the truth. I'm a student at Padjadjaran University, my departement is Biology. So I like to read your books. The books give me some knowledges which I've not been known.

MUHAMMAD WAIS PAYAB / PAKISTAN

I am a student of Computer Sciences at International Islamic University Islamabad Pakistan. I am really pleased and felt a whole heartedly joy by exploring ur site and watching & listening to the documentaries that are based on the topics related to science and islam. I really appreciate ur efforts, ur efforts could turn the way of thinking of muslims all around the world. You have the ability to represent islam in a way that it should be presented, so that one could get inspired of Its reality, and ur efforts are a true picture of our beautiful and complete revealed Religion, that is Islam.

AFTAB SHABIR / UK

I have read quite a few of Harun Yahya's books and I have learnt a lot because it has given me a different understanding about this world. I am glad that I have learnt all this at such an early stage of my life and I can pass this on to other people during my life. I personally think his work is brilliant and I will carry on reading his books.

EECHZAAN / INDONESIA

I am studying at Engineering Geophysics at Bandung Institute of Technology, Bandung, West Java, Indonesia. I write this letter to You to express my unlimited happiness that at last there is a Moslem Channel for Global Islamic Science and Education, which relates between General knowledge and Islamic Teachings. I'm very impressed about it. I don't deny that probably there are a lot of websites such as Yours, but I think this is the complete and objective one.

HAMID JAOUHAR / FRANCE

Salam alaykum brothers and sisters I just want to thank you for the wonderful work you have done, may Allah reward you in this life and the after.

AMIN ALIBHAI / CANADA

I have watched a few of your video documentaries on my computer (courtesy of my son Sameer), and am absolutely amazed. The one titled Architects in Nature is both eye- and mind-opening. Please keep up the good work.

SHAHEEDAH / SWEDEN

I'm so happy that such a website like this exists. I hope many can learn from this site and clear their misconceptions of our beloved religion Islam.

WAQAS BIN NAJIB / GERMANY

First of all I would like to appreciate all of your team for doing such a remarkable job for Islam. May Allah give you all the blessings and accept your act in the day of judgement. It has guided me and took me out of the self-deceived concepts. I started taking evolution and materialistic theo-

ries as a part of science which were so hard for me to refute due to my little knowledge. Allhamdulillah, now I have reestablished my faith. JazakAllahukhair. I am a student in Germany of Engineering (Energy Conversion) and have come from Pakistan.

FEHMINA ARSHAD / PAKISTAN

The entire work of Mr Harun Yahya is really very essential for every muslim in the present era. I came to know him just yesterday when I watch one of the programme on TV and I must say that I am now very eager to get his books.

ABU ZAKARIA / BELGIUM

I just discovered your site and the books you wrote. I'm very impressed and wish to thank you for the beautiful and interesting books you made. I owe a bookstore in Belgium.

ABDULLAH TORSTEN BEHRENS / GERMANY

I am a German Muslim, living in a small town in Northern Germany and I would like to learn more about Harun Yahya and want to read more of his books. I have converted to Islam three years ago and have already brought some German friends to embrace to Islam as well, but my knowledge in Islam is not that big as it should be.

CHARLES REID / USA

Aloha from Hawaii! I have been involved in biology for more than thirty years and agree with your writings. Good work.

ASMAA ALMALIKI / KUWAIT

The Title of your book Allah is known through reasons caught up my eyes, while I was book shopping one day. I bought it, I loved it. I bought 4 more copies and gave them as gifts to a new Moslem convert of my friends where I work, and other non Moslems to explore that Islam through logic. May Allah bless your heart; keep you safe to serve the truth and the word of Allah subhan watallah.

CARLO MARIA MAZZONI / ITALY

Your books are so well-organised and far from personal ideas. This makes me trust you. When I read something in your book, I am sure that it is correct. I wish the continuation of your studies.

CHRISTOPHER BOHAR

Excellent job on "Evolution Deceit", I am a Christian yet I still respect Harun Yahya's tedious work to disprove evolution.

ZUBAIR AHMAD / PAKISTAN

After watching your documentaries and reading books on the internet my point of view about this world have changed abruptly. You people are doing excellent work. I myself want to become a helper in the propagation of this noble work in all over the world. I am a pharmacist working in Peshawar. If I can do anything in this regard please let me know. So that I may also share "sawab" with you.

NAVAID SIDDIQUI / PAKISTAN

I've been trying to turn Christians to Muslim and I'm thankful to you because your this great website has made it possible to explain them about Islam in detail. Thanks a lot to create such a great site CONGRATULATIONS I love this site and I'm trying from today to let everyone inform about this website. Allah will bless you for this service.

SYED ALI JAWAD SHAH / PAKISTAN

I intend to purchase books of Mr. Harun Yahya. They are very informative books and are worth keeping in the library for the generations to take advantage there from.

YADI PURWANTO, DEAN OF PSYCHOLOGY FACULTY OF
MUHAMMADIYAH UNIVERSITY OF SURAKARTA / INDONESIA

I have 8 of all Harun Yahya's VCDs, they are very superb. After seeing them, I feel that my belief increased and I understood about Allah, The Creator. And now, in our campus, Harun Yahya's VCDs are used for human philosophy lesson. Every student must watch this VCD especially about Darwinism. And

we want to collect your all VCDs and Books, especially Indonesian version.

ZUBAIR MOHAMMED / UK

I have read a few books by Harun Yahya including 'The Evolution Deceit'. The work of the author has removed what little doubts I had about the evolution theory and opened up a new world of understanding to my mind. I wish to thank the author for this-keep up the good work. The work of Harun Yahya is one of the most commonly talked about subject around where I live.

DAVID BILDERBERG / USA

May Allah reward you for your work brother. I am a 46 year old convert to Islam from Florida and I enjoy your site very much and make sure I tell about it to everyone I know .

MOHAMED ALAOU / NETHERLANDS

I am a devoted reader of Harun Yahya's books, since the time I found your web site by chance I always visit it and I almost downloaded all the materials you have there. I would like to thank you from all my heart for your efforts you really do change my way of life and open my eyes to many things that I forgot about my religion Islam.

JAMIU BABATUNDE ABDUR RAFIU / NIGERIA

I give kudos to you for the encouragement you are given to Muslims all over the world. I am thrilled after watching the well documented video cassette (Miracle in the Koran and the creation of the universe given to us by a brother in Islam it was amazing , seeing the effect it will have on the unbelievers and the believers of Islam alike consequently we had produced more copies for distribution within and environ.

JENNIFER DWYER / QATAR

My name is Jennifer Dwyer, I work as Assistant Director of QCPI, (Dawa section in Doha Qatar). I just want to say that your website is excellent and you are really able to reach out to the average non-Muslim in a way that they understand! MashAllah. This isn't always the case with other Islamic websites or lectures. May Allah reward you for your efforts!

Islam Denounces Terrorism.com

"Those who make mischief in the earth: theirs is the curse" (Koran, 13/25)

Islam Is Not The Source of Terrorism, but Its Solution...

Those who resort to or support terrorism in the name of Islam are in a great error. They are committing a crime which God has cursed in the Koran. All true Muslims denounce terrorism of any kind, and share the sorrows of its victims.

A Muslim Call To The Israelis

The conflict between Israel and Palestine has taken on the identity of a religious war between Jews and Muslims, whereas in fact there is absolutely no reason for such a war of religion. Both Jews and Muslims believe in God, love and respect the same prophets, and possess the same moral principles.

Islam Denounces Terrorism
Read or download full text of the recent book by Harun Yahya.

The True Islamic Morals

In the Koran, God teaches Muslims to be tolerant and helpful to all other people. Mercy, love and justice are the basic tenets of Islam.

The Pacifism of Islam

According to the Koran, violence and brutality are against the will of God. War is acceptable only as defense and should be humane and just.

"People of The Book" for the Muslims

In the Koran, Christians and Jews are called "People of the Book". Muslims are in alliance with them, because they believe in the same God and the same moral values.

The True Origin of Terrorism: Darwinism & Materialism

The source of terrorism is atheism, not Islam. The Darwinists and materialist philosophers justify violence by referring to it as "survival of the fittest".

The Most Innocent Victims of Terror

Thousands of children have been orphaned.

Harun Yahya he is the greatest!! Muslim scholar I have ever seen. May Allah bless you, and keep on writing your wonderful books.

SHAHID RIAZ BHATTI / PAKISTAN

Dear Haroon, I am student and I have just read ur articles. I am Muslim, but unfortunately I was not able to tell my non-Muslim friend that Islam is against terrorism, but now I have send ur pages to all of my friend around the world. u did a great job sir, and we solute u.

DR. A SHAKOOR / UK

Brother Yahya it is very valuable to read your article following the recent events. Your knowledge of Islam is scholarly and allows people to get a true understanding of ALLAH's Deen. Your other work on scientific issues will have a huge impact on those who read and God Willing closer to their Creator. May ALLAH THE MOST MERCIFUL AND KIND give your more energy and good health to produce more authentic and sound literature for all people to read.

NAEEM MIRZA / UK

I would just like to say that this website speaks for a lot of innocent Muslims worldwide. It shows Islam to be a peaceful religion. May Allah bless you for the work put into this site.

JIM / USA

I have learned a lot about Islam since Sept. 11th. I am pleased to see this website. To do my part as an American citizen I explain to others that these acts of terror and religion should not be connected. All legitimate religions preach peace and brotherhood.

ALI SHAFEEQ / MALDIVES

Instead of concentrating on "Who committed the acts" you have concentrated "Why such things are happening".That is great!

Most people think and lives islam in definite times, during the preyers, ramadan, reading Quran...And they do not remember Quran in other circumstances. What i see in you is, you do not live islam only in definite times. But you live islam starting from the time you wake up till you sleep everyday. And that's the right way.

FRED COVONER / SWITZERLAND

Your works are notifying everyone about the reality of Islam. People would live best if they live islam. People would think their brothers and sisters before doing something, they would care their brothers and sisters more than they care themselves. You explain these in a brilliant way in your books. Regards.

SHIMON ZANG / ISRAEL

I am living in Tel Aviv. We, Jewish people, do fell respect to people who have helped to our brothers in past. As it is written in your site, Ottoman Empire was land of piece for all religions because Islam advises people to be fair, peaceful, helpful, conciliative, as those are the values all religions advise. We are all in the same way believing in the same values. We all are agains atrocity to blameless people. Congratulations for your hearty studies.

MUHAMMAD NADEEM JAHANGIR / PAKISTAN

It is a very interesting and spectacular website. I hope it will play a vital role in clearing any confusion or any doubt from the minds of people of the world against teachings of Islam. In this site HARUN YAHYA's articles have clearly and widely opens the doors of the reality in front of the people. This website it self fighting a "Jihad-bil-Qalam" (intellectual struggle) against terrorism.

FRANK BANALES / USA

I am pleased and take great comfort in your effort to explain to those that wish to know the true meaning of Islam. I am self taught and everything I have learned, including my reading and writing, was through the in-

spiration I received reading the Quran. I continue to learn and be inspired by the Quran but also by books written by Harun Yahya.

JAMES PHILLIPS / AUSTRALIA

An excellent site. A real eye opener, and has reinforced my belief that all should be tolerated no matter what religion. As a buddhist I have never lost faith and respect for my Muslim brothers and sisters but this has reinforced my love for all peoples.

NAHAS SALAM / INDIA

This is a great job u are doing, wish u every best in this path . May ALLAH bless all of us to convey the right path of ISLAM to all the world

KATHERINE / ISRAEL

DAVID ROUG / USA

A very enlightening site about enlightened Islam.. Nice job!

MOHAMMED ADEL / EGYPT

This is my first site coz its the best..many people from many countries chat with me about islam...wanting to know more or saying its a terrorism religion and i answer them goodly....but this site answers better....thanx and keep on...

FIONA MILNE / AUSTRALIA

Thankyou for this website. It is a good resource for informing my students of true information about the Islam Religion. It also has great answers regarding Darwinism. I have been looking for this for some time now as Darwinism is included in our curriculum and I wanted other information to show the students than mere textbooks.

HANNAH GRAHAM / UK

After reading Harun Yahya's extracts on Antisemitism I felt very hopeful of the future of Jewish/ Muslim relations.

SIDEEQAH TUNDE LAWAL / NIGERIA

The creation of this Website is the best thing that can happen to the ummah. It is a new dimension in Islamic education.

FAIZAN / PAKISTAN

Haven't seen the site like this ever in my life... This site has every thing... Thanks to all the people esp. Haroon Yahya.. and to the people who made their efforts in designing this site, uploading, writing, collecting the data... Now this site is so great i will try to spend more time reading articles in it! And i use to refer this site to the unbelievers and y they should believe in one an only God ALLAH!

MOHAMMED BHANA / UK

Thanks to this web site and Harun Yahya's books i continue to be inspired and show people Islam

RUPERT TUNE / UK

Nice to see a site like this. I especially liked the argument against authoritarianism.

Islam Denounces Antisemitism .com

Language

Antisemitism is a fanatical hatred felt for the Jewish people. This racist ideology has caused millions of innocent Jews to be killed, persecuted, exiled and threatened over the centuries.

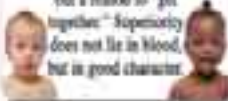

Islam aims to bring justice to the world. Just as it denounces all kinds of racism, so it denounces antisemitism. Muslims criticize Zionism, but defend the right of Jews to live in peace and security.

Islam and the People of the Book

Islam approaches Christians and Jews, "the People of the Book" according to the Koran, with kindness and respect. All of these three religions believe in God and defend the same moral values.

Koran Opposes Racism

According to the Koran, racial and ethnic differences between people are not a reason for conflict but a reason to "get together." Superiority does not lie in blood, but in good character.

The Pagan Roots of Antisemitism

Antisemitism is an ideology that decries monotheistic religions and longs for paganism. It is the hatred of Therism that brings "hatred of the Jews."

Racism and Social Darwinism

Racist ideologists derive their inspiration from Darwinism, which describes human races as in different "evolutionary stages."

SAIF / NETHERLANDS

Truth can never be hidden and these sites would go a long way in removing the misconceptions & misrepresentations of Islam & Muslims. Not only are these important for the Non-Muslims, but more so for Muslims.

DAVID HEGHER / USA

The main idea in your political studies are based on the right ground. There is Darwinism behind every kind of cruelty; racism, antisemitism, fascism, communism...

SHAK / UK

The Islamic world is desperately in need of people like Harun Yahya who can explain the true essence of Islam to both Muslims and non-Muslims.

SANZAR / USA

A beautiful step towards correcting the deluge of incorrect propaganda against Islam.

RACHEL HARRIET SILVER / UK

As a Jew, I am so relieved to be reading this page. Thank you for showing a more rounded view - it gives me some hope.

HAEL (RAFI) ANIDJAR / ISRAEL

I very sincerely love your site since it has a lot of truth and is clear, open minded without prejudices.

SOHAIB SAEED / SCOTLAND

I truly hope that this site becomes known to as many as possible of our Jewish cousins.

JAKE / USA

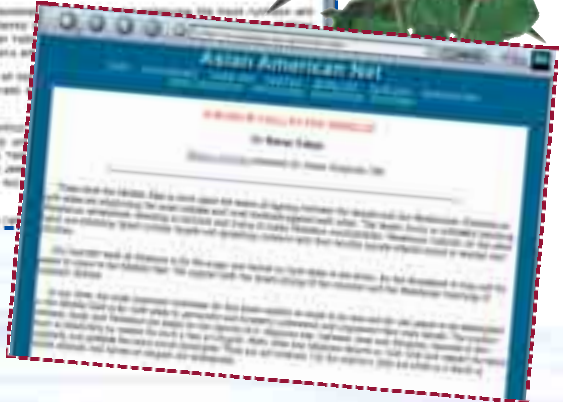

I love your website and that after reading your material I am seriously thinking of converting to Islam! thank you, thank you, thank you!!!

SAGRA ZUCKERMAN / GERMANY

You have stated the concealed part of the truth in a brilliant way.

Some e-mails in response to this article:

LARRY PAUL, MEMBER OF THE PEACE DIALOG GROUP , ISRAEL

I read with great interest your article entitled "A Muslim Call To The Israelis" written by HARUN YAHYA. It truly warmed my heart to read that this Turkish Muslim intellectual has so much love and support to offer.

**ALISON QUITO ZIEGLER, BURMA PROJECT,
SOUTHEAST ASIA INITIATIVE, USA**

Thank you for sending me this article. If only it could go straight to the ears and hearts of those in power in the Middle East. Then we wouldn't continue reading such disheartening headlines each day.

CHRISTINA LEE, RELIGION NEWS SERVICE, USA

It is indeed a thoughtful commentary and makes some good points. Thank you for sharing.

DR. ARYEH FINKELBERG, TEL AVIV UNIVERSITY, ISRAEL

It is greatly encouraging for me as an Israeli to find out that there are

Muslim intellectuals who earnestly try to form an objective opinion about the Israeli-Arab conflict and propose a way out from the terrible situation. Your sincere appeal to Israeli people deeply touched me. I appreciate your and the author's of the Call good will and humanistic and moral stand.

DR. PAUL HOLMAN, MARSHALL CENTER, USA

Many thanks! This is a very thoughtful article. I very much agree with the author's position. All best wishes to you!

RABBI JOSEPH S. TOPEK, USA

I thank you for your thoughts and hope that together we sons of Abraham/Ibrahim will find a way to resolve this political conflict and stand together serving the God that we both revere.

PHILIP C. WILCOX, JR., PRESIDENT,
FOUNDATION FOR MIDDLE EAST PEACE, USA

Thanks for the message. I read it with interest. Muslims, Jews and Christians all believe in peace and the dignity of man. It is a pity that these values are being ignored by extremists who stand in the way of a just peace between Israelis and Palestinians.

REID HELLER, USA

Thank you for sharing the proposal below. I admire its moderate tone, its respect for Judaism and its interest in Jewish-Muslim co-existence. These are noble aspirations shared by all Jews and particularly Israelis. I sincerely hope that the moderate spirit that inspired the words below finds a home among in the community of nations.

DR. FRED SINGER, THE SCIENCE AND ENVIRONMENTAL
POLICY PROJECT, USA

After reading two of Harun Yahya's books recently, I would agree that he represents the true Islamic spirit. But I hope his message reaches beyond just intellectuals in the Islamic world.

PROF. BEN-AMI SHILLONY, HEBREW UNIVERSITY, ISRAEL

I agree with what you wrote and I am happy that there are thoughtful Muslims who think like you. In the present atmosphere of blind hatred on both sides it is wonderful to hear clever words like yours. I hope your voice will be louder than that of those who in the name of God defy the moral orders of our common God.

MINDELLE JACOBS, THE EDMONTON SUN COLUMNIST, CANADA

Thanks for writing. Now if only there were more people like this in the Middle East.

MARILYN P. SAFIR, PH. D., UNIVERSITY OF HAIFA, ISRAEL

Many thanks for your email. I have posted this on my University's enet. I think it is a wonderful statement and it is important for all sides to see such a well balanced approach. Many Thanks.

MARCUS RASKIN, INSTITUTE FOR POLICY STUDIES, USA

Thank you for sending the Muslim Call to me. It is relevant and important. I am working with congressman Conyers and other members as well as representatives of different faiths to protect the Holy Sites in Jerusalem.

PROFESSOR NAOMI CHAZAN, DEPUTY SPEAKER OF THE KNESSET

Thank you for the article you sent, which I read with great interest. As you know, an interfaith conference held in Alexandria several months ago was launched in very much the same spirit. Thank you for sending me this piece. I agree with the two-state solution it seeks to promote.

SIMON FEIL, COLUMBIA UNIVERSITY HILLEL, USA

The letter you sent me was very thought provoking and interesting. I would love to discuss it further.

SANDOR GOODHART, PURDUE UNIVERSITY, USA

I have read your piece. What I find most impressive in it is the sen-

tence "Is it not a duty in the eyes of God to put an end to the fighting, which is dragging both sides deeper into satanic violence?" I completely agree with that idea. Thanks for showing this essay to me.

SHMUEL SHULMAN, BAR-ILAN UNIVERSITY, ISRAEL

Thank you for your thoughtful letter and sincere concern. would we get more letters like yours, to my opinion, the situation in our region was different. I hope your proposal is seriously considered and we can start seeing some light.

AMIRAM GOLDBLUM, PH.D, THE HEBREW UNIVERSITY, ISRAEL

Thank you very much for your comments and for the statement draft that you sent me. It is absolutely impressive and moving, and I wish that this call could find reverberations in as many hearts as possible among Israelis and Palestinians.

CHARLES MORRISON, EAST WEST CENTER, USA

Thank you for sending me a copy of your eloquent call for peace and reconciliation. I hope for your success with this endeavor. Sincerely.

HERB LACHMAN, M.D., ALBERT EINSTEIN
COLLEGE OF MEDICINE, USA

I wish the rest of the world could be as thoughtful and rational as this message.

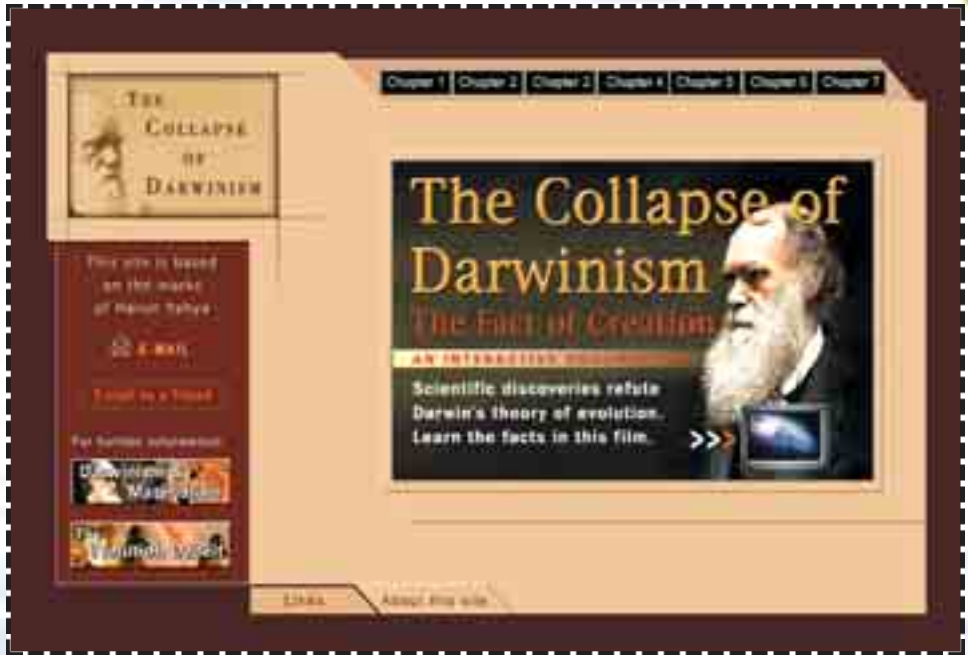

RICHARD FALK, PRINCETON UNIVERSITY, USA

Thanks so much for sharing the Muslim call for peace, which I found moving and relevant, and very important to avoid a false encounter of religions.

BENJAMIN PERL, TEL AVIV UNIVERSITY, ISRAEL

Thank you very much for sharing with me the article. In the main, I fully endorse the spirit of this article, and I find it encouraging that such voices are to be heard in the Muslim world.

The Qur'an is the word of God and it has many miraculous attributes proving this fact. One of these attributes is the fact that a number of scientific truths that we have only been able to uncover by the technology of the 20th century were stated in the Qur'an 1,400 years ago. Of course the Qur'an is not a book of science. However, many scientific facts that are expressed in an extremely concise and profound manner in its verses have only been discovered with the technology of the 20th century. These facts could not have been known at the time of the Qur'an's revelation, and this is still more proof that the Qur'an is the word of God.

THE QUR'AN AND ASTRONOMY

Many facts point to the existence of the universe from geology, the development of the universe and the birth of the planets in the universe, that have only been discovered by modern astronomy, mentioned in the Qur'an 1,400 years ago!

THE QUR'AN AND PHYSICS

Did you know that the structure of our universe is like a diamond? It is also in a state of expansion and that there is a hidden message? The Qur'an points to all of these scientific facts.

THE QUR'AN AND THE EARTH

Many scientific facts from the layers of the atmosphere to the geological formation of mountains from lava can come to the attention of the sciences world, as explained in the verses of the Qur'an.

THE QUR'AN AND BIOLOGY

The Qur'an refers to the development of a human embryo in the womb, which is a fact completely parallel to the findings of modern embryology.

ACERCA DEL AUTOR

Quien ha escrito esta obra bajo el seudónimo de Harun Yahya, ha puesto en circulación numerosos libros sobre cuestiones que hacen a los fundamentos de la fe, que hacen a la política de la *umma* y que hacen a la grandiosa creación de Dios, especialmente frente al engaño del evolucionismo. La intención de Harun Yahya es relatar todas las suposiciones fundamentales de los sistemas que se oponen al Corán, con lo cual busca expresar "la última palabra" que pondría fin a las afirmaciones de los impíos, idólatras y paganos en la materia (El seudónimo compuesto con los nombres "Harun" (Aarón) y "Yahya" (Juan) fue elegido en memoria de los dos estimados profetas que combatióron las ideas perversas y hostiles).

Este escritor ha publicado numerosos libros y folletos que prueban explícitamente la existencia de Dios. En ellos enfatiza la maravillosa creación de Dios frente a lo que plantean las ideologías materialistas y ateas, las cuales tienen como el argumento más significativo y eficaz la

The Miraculous Journey

Islam Online-Istanbul, Turkey

In the Quran, Allah calls us to give attention to birds with His verse, "Do they not observe the birds above them, spreading their wings and folding them in? None can uphold them except (Allah) Most Gracious. Verily, He is the all-Seer of everything (Surat al-Mulk: 18)." Herewith, we will particularly review migratory birds; we will describe how perfect balances they establish traveling in the skies and the systems their bodies are endowed with, and focus on the wonder of Allah's upholding them "in the sky."

Making Islam A Means Of Prosperity

*By Harun Yahya
Islam Online, Turkey*

One of the most significant characteristics of the 20th century we left behind is the advancement of technology. Whereas a concept like the computer did not exist 100 years ago, computer technology is utilized today in service sectors just as education and health. Correspondingly, while the telegraph was the most advanced means of communication in the previous century, telephone apparatuses manufactured with better technology every day are being used. This is especially true for the last decade. Even telephones with visual components, which were the subject of space-age films, 70 to 85 years ago, are a part of many houses today.

Although TrueOrigin is unreservedly committed to the biblical Christian faith and worldview, the following article by a well-read Muslim scholar not only demonstrates excellent analysis of National Geographic's unscientific practices, but is also clear evidence that objections to evolution are not limited to any particular religious foundation: Evolution fails primarily on the basis of the facts, not one's faith.

TrueOrigin was established to provide an intellectually honest response to the claims of the proponents of Neo-Darwinism. It is one of the best-known reference sites on the refutation of Darwinism. The site refers to Harun Yahya as follows:

Harun Yahya's main focus has been the refutation of Darwinism and materialism, two modern myths which are imposed to conceal the fact of Creation, a truth both revealed in the Bible and the Koran.

The Revival On-Line is the website of one of the UK's biggest and brightest newsletters. The Revival deals with the issues facing young Muslims today. It came into existence with the aim of producing Islamic literature which was down to earth, readable and entertaining, as well as educational. Harun Yahya's articles that are published on this website deal with scientific and faith related topics.

The purpose of Ummah.com is to provide services for the Muslim community world-wide, as well as anyone looking for information on Islam. The BICNews Global Newsletter Service, a sub-section of the site, broadcasts news and analysis around the clock, covering the whole world. Harun Yahya is a regular BICNews columnist.

MR. HARUN YAHYA is a very well known and prolific author from Istanbul, Turkey.

Under the pseudonym Harun Yahya, he has written numerous books on basic faith topics, political issues concerning ummah and the marvels of creation of God against the evolution deceit. Harun Yahya intends to refute all the basic claims of the anti-Quranic systems and utter the "last word" which will end the assertions of *kufur*. The stamp of Rasul Allah (the Prophet Muhammad), which is placed on all his books, intends to be the due to say this last word. (The pseudonym is made up of the names of 'Harun' and 'Yahya' in the esteemed memory of the two Prophets struggling against the antagonistic, distorted thought.)

The author has published numerous books and booklets explicitly proving the existence of God, emphasizing the marvellous creation of Allah against the materialistic and atheistic thinking, and of course their most efficient and significant view - the Evolution Theory. Harun Yahya's book, *Evolution Deceit* is an important step taken in order to totally refute this false theory. *The End of Materialism, The Collapse of Evolution, The Truth of Creation, Microbiological Collapse of Evolution, Collapse of Materialism, Darwinism, The Greatest Scientific Fallacy, The Fallacies of the Evolutionists, Secrets of Atom, Destruction of the Societies, For the Man of Understanding* are his booklets which again refute the evolution theory.

Harun Yahya has also published books on the political concerns such as *National Strategy for Turkey, The Kurdish Card of Israel, Hidden Hood in Bosnia, Holocaust Deception, New Masonic Order, Masonry and Capitalism, Religion of Satan: Masonry, Judaism and Masonry, Sons of Yehova and Masonry*.

The author has also released various studies regarding belief in Allah. The books of the author that have been published till now are, *Ever Thought About the Truth, Devoted to Allah, Abandoning the society of Ignorance-Jahiliyya, Paradise, Theory of Evolution, Moral Values of the Quran, Quranic Index, The Hegira in the Quran, Hypocrites in the Quran, Communicating the Quranic Message, Basic Concepts in*

CONCLUSION

Conclusion

Throughout this book, we have seen the reaction that Harun Yahya's works have received around the world and the ever-growing interest in them. We have seen a few reflections of this great interest in newspapers, magazines, on Internet sites and in letters from readers.

There are several important reasons for the great influence that these works have had on those who have read them. First, because of their intimate and attractive style, they can be simply and easily understood by people from every walk of life and of every age group. The author has taken the wisdom and the striking narrative style of the Qur'an as a model for himself. The second reason must be the variety of his works, that attract the interest of all sections of society with the importance of their themes. For example, Harun Yahya's series of works is not only of importance to those who want to learn about Islam or deepen their knowledge of the Qur'an, but are also a source of reference for those who want to have true Qur'an-based knowledge about topics such as the true face of evolution, biology, astronomy, physics, world and present-day history and international relations.

The basic point about Harun Yahya's works is that they were written with only the will of God in mind. They have been prepared without any commercial interest or expectation of profit and as a result their sincerity has an immediate effect on the hearts of their readers.

For this reason, reading these works and introducing and recommending them to others is a very important service. Anything that can be done in this direction will be a step towards eliminating the environment of cruelty and chaos in which the world has become immersed and, with God's help, this will eventually happen.

God willing, the works of Harun Yahya will reach an even greater audience in the 21st century, and will be a means whereby people will be able to attain that life of well-being, justice and peace that they have longed for down the years.
