Master Creation/Anti-Evolution Bibliography

This is a bibliography of English-language books and monographs written by creationist or anti-evolution authors, and other books of significance to creationists (e.g., works by Lerner and Numbers). Except where noted all authors are presumed to be professing Christians adhering to the Recent Creation view. **This list is not an endorsement of any sort.** Creation science is a rapidly developing paradigm and anything more than a few years old is more or less outdated. Some recent material is also of poor quality and inaccurate. Please see the [Bookstore](#) list for recommended titles.

As we complete a book report/review for each title we will link the report using the title in the bibliography as the link.

Children's books are not included.

Author names are color-coded according to their position on origins. This information may not be 100% accurate - let me know if you see an inaccuracy. Note that some people virtually defy such simple categorizations, and there can be great differences of opinion and viewpoint within each of these basic factions.

1. **Black = Orthodox Christian (Recent Creation/Young-Earth).**
2. **Green = Exact Position Unknown.**
3. **Orange = Evolutionists.**
4. **Purple = Old-Earth Creationists.**
5. **Red = Non-Christian Young-Earth Creationists.**

Hint: Use the "Find" command in your browser to help search for authors, publishers, dates, and titles.

Many of the books listed below can be obtained from a variety of creation science outlets. We encourage you to visit their sites for more information and to place orders. Many recent books even have their own websites, and some are available in complete form online! Here are some of the major outlets:

- [Answers in Genesis \(AiG\)](#)

- [The Creation Research Society \(CRS\)](#)
- [Revolution Against Evolution Bookstore](#)
- [The Institute for Creation Research \(ICR\)](#)

If you are interested in obtaining any of the books listed below I suggest checking these sites first. In some cases obscure or special-interest books may be obtained at other sites; such sites and websites with extensive information about the book are listed after the bibliographic information. Finally, [Amazon.com](#) is an excellent source for creationists books and reviews posted there help those who produce them.
