$$\begin{aligned}\text{km}^2 &= (\text{km})^2 = (1000 \text{ m})^2 = 10^6 \text{ m}^2 \\&\text{not } 1000 \text{ m}^2\end{aligned}$$

Some common units defined in terms of SI units are given in **Table 4** (the definitions in the fourth column are exact).

## Conversion factors for the measurement systems

This Encyclopedia has retained the U.S. Customary and metric systems, but has incorporated SI units in many cases. Conversion factors between the three measurement systems are given in **Table 5** for some prevalent units; in each of the subtables the user proceeds as follows:

To convert a quantity expressed in a unit in the left-hand column to the equivalent in a unit in the top row of a subtable, multiply the quantity by the factor common to both units. For example, to convert 7 ft to the equivalent in meters, go to subtable A, "Units of length," and find 1 ft in the left-hand column and m in the top row. The conversion factor common to these units is 0.3048. Therefore,  $7 \text{ ft} = 7 \times 0.3048 = 2.1336 \text{ m}$ .

The conversion factors have been carried out to seven significant figures, as derived from the fundamental constants and the definitions of the units. However, this does not mean that the factors are always known to that accuracy. Numbers followed by ellipses are to be continued indefinitely with repetition of the same pattern of digits. Factors written with fewer than seven significant digits are exact values. Numbers followed by an asterisk are definitions of the relation between the two units.

TABLE 1. Base units of the International System

Quantity	Name of unit	Unit symbol
length	meter	m
mass	kilogram	kg
time	second	s
electric current	ampere	A
temperature	kelvin	K
luminous intensity	candela	cd
amount of substance	mole	mol

TABLE 2. Derived units of the International System\*

Quantity	Name of unit	Unit symbol, or unit expressed in terms of other SI units	Unit expressed in terms of SI base units
plane angle	radian	rad	m/m = 1
solid angle	steradian	sr	m <sup>2</sup> /m <sup>2</sup> = 1
area	square meter		m <sup>2</sup>
volume	cubic meter		m <sup>3</sup>
frequency	hertz	Hz	s <sup>-1</sup>
density	kilogram per cubic meter		kg/m <sup>3</sup>
velocity	meter per second		m/s
angular velocity	radian per second	rad/s	m/(m · s) = s <sup>-1</sup>
acceleration	meter per second squared		m/s <sup>2</sup>
angular acceleration	radian per second squared	rad/s <sup>2</sup>	m/(m · s <sup>2</sup> ) = s <sup>-2</sup>
volumetric flow rate	cubic meter per second		m <sup>3</sup> /s
force	newton	N	kg · m/s <sup>2</sup>
surface tension	newton per meter, joule per square meter	N/m, J/m <sup>2</sup>	kg/s <sup>2</sup>
pressure	pascal, newton per square meter	Pa, N/m <sup>2</sup>	kg/(m · s <sup>2</sup> )
viscosity, dynamic	pascal-second, newton-second per square meter	Pa · s, N · s/m <sup>2</sup>	kg/(m · s)
viscosity, kinematic	meter squared per second		m <sup>2</sup> /s
work, torque, energy, quantity of heat	joule, newton-meter, watt-second	J, N · m, W · s	kg · m <sup>2</sup> /s <sup>2</sup>
power, heat flux	watt, joule per second	W, J/s	kg · m <sup>2</sup> /s <sup>3</sup>
heat flux density	watt per square meter	W/m <sup>2</sup>	kg/s <sup>3</sup>
volumetric heat release rate	watt per cubic meter	W/m <sup>3</sup>	kg/(m · s <sup>3</sup> )
heat transfer coefficient	watt per square meter kelvin	W/(m <sup>2</sup> · K)	kg/(s <sup>3</sup> · K)
heat capacity (specific)	joule per kilogram kelvin	J/kg · K)	m <sup>2</sup> /(s <sup>2</sup> · K)
capacity rate	watt per kelvin	W/K	kg · m <sup>2</sup> /(s <sup>3</sup> · K)
thermal conductivity	watt per meter kelvin	W/(m · K), $\frac{J \cdot m}{s \cdot m^2 \cdot K}$	kg · m/(s <sup>3</sup> · K)
quantity of electricity	coulomb	C	A · s
electromotive force	volt	V, W/A	kg · m <sup>2</sup> /(A · s <sup>3</sup> )
electric field strength	volt per meter	V/m	kg · m/(A · s <sup>3</sup> )
electric resistance	ohm	Ω, V/A	kg · m <sup>2</sup> /(A <sup>2</sup> · s <sup>3</sup> )
electric conductance	siemens	S, A/V	A <sup>2</sup> · s <sup>3</sup> /(kg · m <sup>2</sup> )
electric conductivity	ampere per volt meter	A/(V · m)	A <sup>2</sup> · s <sup>3</sup> /(kg · m <sup>3</sup> )
electric capacitance	farad	F, A · s/V	A <sup>2</sup> · s <sup>4</sup> /(kg · m <sup>2</sup> )
magnetic flux	weber	Wb, V · s	kg · m <sup>2</sup> /A · s <sup>2</sup>
inductance	henry	H, V · s/A	kg · m <sup>2</sup> /(A <sup>2</sup> · s <sup>2</sup> )
magnetic permeability	henry per meter	H/m	kg · m/(A <sup>2</sup> · s <sup>2</sup> )
magnetic flux density	tesla, weber per square meter	T, Wb/m <sup>2</sup>	kg/(A · s <sup>2</sup> )
magnetic field strength	ampere per meter		A/m
magnetomotive force	ampere		A
luminous flux	lumen	lm, cd · sr	cd · m <sup>2</sup> /m <sup>2</sup> = cd
luminance	candela per square meter		cd/m <sup>2</sup>
illumination	lux, lumen per square meter	lx, lm/m <sup>2</sup> , cd · sr/m <sup>2</sup>	cd · m <sup>2</sup> /m <sup>4</sup> = cd/m <sup>2</sup>
activity (of radionuclides)	becquerel	Bq	s <sup>-1</sup>
absorbed dose	gray	Gy, J/kg	m <sup>2</sup> /s <sup>2</sup>
dose equivalent	sievert	Sv, J/Kg	m <sup>2</sup> /s <sup>2</sup>
catalytic activity	katal	kat	mol/s

\*The degree Celsius (°C), listed in Table 4, is also a derived unit of the International System.

TABLE 3. Prefixes for units in the International System

Prefix	Symbol	Power	Example	Prefix	Symbol	Power	Example
yotta	Y	$10^{24}$		deci	d	$10^{-1}$	
zetta	Z	$10^{21}$		centi	c	$10^{-2}$	centimeter (cm)

TABLE 4. Some common units defined in terms of SI units

Quantity	Name of unit	Unit symbol	Definition of unit
length	inch	in.	$2.54 \times 10^{-2}$ m
mass	pound (avoirdupois)	lb	0.45359237 kg
force	kilogram-force	kgf	9.80665 N
pressure	atmosphere	atm	101325 Pa
pressure	torr	torr	(101325/760) Pa
pressure	conventional millimeter of mercury*	mmHg	$13.5951 \times 980.665 \times 10^{-2}$ Pa
energy	kilowatt-hour	kWh	$3.6 \times 10^6$ J
energy	thermochemical calorie	cal	4.184 J
energy	international steam table calorie	cal <sub>IT</sub>	4.1868 J
thermodynamic temperature ( <i>T</i> )	degree Rankine	°R	(5/9) K
customary temperature ( <i>t</i> )	degree Celsius	°C	$t(^{\circ}\text{C}) = T(\text{K}) - 273.15$
customary temperature ( <i>t</i> )	degree Fahrenheit	°F	$t(^{\circ}\text{F}) = [1.8 \times t(^{\circ}\text{C})] + 32 = T(^{\circ}\text{R}) - 459.67$
radioactivity	curie	Ci	$3.7 \times 10^{10}$ Bq
energy <sup>†</sup>	electronvolt	eV	$eV = 1.60218 \times 10^{-19}$ J
mass <sup>†</sup>	unified atomic mass unit	u	$u = 1.66054 \times 10^{-27}$ kg

\*The conventional millimeter of mercury, symbol mmHg (not mm Hg), is the pressure exerted by a column exactly 1 mm high of a fluid of density exactly  $13.5951 \text{ g cm}^{-3}$  in a place where the gravitational acceleration is exactly  $980.665 \text{ cm} \cdot \text{s}^{-2}$ . The mmHg differs from the torr by less than  $2 \times 10^{-7}$  torr.

<sup>†</sup>These units defined in terms of the best available experimental values of certain physical constants may be converted to SI units. The factors for conversion of these units are subject of change in the light of new experimental measurements of the constants involved.

## Units of temperature in measurement systems

Temperature is a basic physical quantity. It is a measure of the thermal energy of random motion of particles in a system. As such it has been chosen as one of the base quantities in the SI. It is to be treated as are the units of length, mass, time, electric current, and luminous intensity. In the SI the unit of length is the meter, the unit of time the second, and so on. The question arises as to the choice of the unit of temperature in the SI.

In the past it was customary to refer to scales of temperature, for example, the Celsius and Fahrenheit scales. On the Celsius scale, 0 designates the freezing point (ice point) and 100 the boiling point (steam point) of water. Corresponding numbers on the Fahrenheit scale are 32 and 212. There are 100 units between the ice point and steam point on the Celsius scale, and 180 units between these points in the Fahrenheit system.

By measuring the volume changes of a gas within the 100-unit interval for the ice point and steam point of water on the Celsius scale, it was found that a numerical value could be assigned for a basic unit of temperature. Careful measurement of this ice-steam interval in a gas thermometer determined that the ice point of water should be assigned the value of 273.15 kelvins. The unit of temperature was thus called the kelvin with the symbol K. Further experiments led to the decision to define the kelvin in the SI along the same lines but in terms of the triple point of water. This is the temperature and pressure at which ice, liquid water, and water vapor coexist at equilibrium. The triple point was chosen because it was a more reproducible value than the ice point.

This change led to the SI definition of temperature in terms of the temperature of the triple point of water, which contains exactly 273.16 kelvins.

It follows that the Celsius temperature ( $^{\circ}\text{C}$ ) is an intermediate scale. It is useful in defining Kelvin temperature in the SI. Celsius

temperature ( $t$ ) is related to Kelvin temperature ( $K$ ) as follows:

$$\begin{aligned} t_{\text{ice point}} &= 0^{\circ}\text{C} \\ t_{\text{steam point}} &= 100^{\circ}\text{C} \\ 0\text{ K} &= -273.15^{\circ}\text{C} \end{aligned}$$

A summary of the conventions in the SI as proposed in the Thirteenth General Conference of Weights and Measures pertaining to temperature units is given below.

1. The unit of SI temperature is the kelvin, symbol K.
2. The word "scale" is not to be used except in terms of measurement of temperature between certain fixed points on the Celsius scale.
3. The terms "thermodynamic scale" or "absolute scale" are not to be used to describe temperature. The degree sign is to be eliminated with the symbol K.
4. When Celsius temperatures are used ( $^{\circ}\text{C}$ ), it is understood that the temperature unit is the kelvin.

Not all scientists and engineers have adopted the SI of temperature terminology. Furthermore, many engineers in the United States still use the Fahrenheit system in discussing practical engineering systems.

In converting Fahrenheit ( $^{\circ}\text{F}$ ) to Celsius ( $^{\circ}\text{C}$ ) the following formula applies.

$$^{\circ}\text{C} = \frac{^{\circ}\text{F} - 32^{\circ}}{1.8}$$

In converting Celsius to Fahrenheit the following formula can be used.

$$^{\circ}\text{F} = (^{\circ}\text{C} \times 1.8) + 32^{\circ}$$

In changing from Celsius terminology ( $t$ ) to kelvin units ( $K$ ) the following formula can be used.

$$K = t + 273.15$$

# Chemistry

## Symbols for the chemical elements

The mass number, atomic number, number of atoms, and ionic charge of an element are often indicated by means of four indices placed around the symbol. The positions occupied are left upper index, mass number; left lower index, atomic number; right upper index, ionic charge; and right lower index, number of atoms of an element in a molecule or formula unit of a given species: for example,  $^{12}_6\text{C}$ ,  $\text{Ca}^{2+}$ ,  $\text{O}_2$ , and  $\text{Al}_2\text{O}_3$ . The atomic number, which is redundant, is omitted in most cases: that is,  $^{12}\text{C}$  can be written as  $^{12}\text{C}$ .

Ionic charge is indicated by a plus or minus superscript following the symbol of the ion; for multiple charges an arabic superscript numeral precedes the plus or minus sign, for example,  $\text{Na}^+$ ,  $\text{NO}_3^-$ ,  $\text{Ca}^{2+}$ ,  $\text{PO}_4^{3-}$ .

An alphabetical list of the elements, their symbols, and their atomic numbers is shown in **Table 6**. Elements 111 and 112 have been reported, but no official names have been assigned.

## Chemical nomenclature

The International Union of Pure and Applied Chemistry (IUPAC) has established definitive rules for chemical

nomenclature. Chemical species are identified in the Dictionary by a systematic name, frequently accompanied by a formula. Occasionally common names are used.

For inorganic compounds, systematic names of compounds are formed by identifying the constituents and their proportions in a specific order, for example, dinitrogen oxide ( $\text{N}_2\text{O}$ ). Also accepted by IUPAC is Stock's system, in which the proportions of the constituents are indicated indirectly, and roman numerals are used to represent the oxidation number or stoichiometric valence of an element, for example, iron(II) chloride ( $\text{FeCl}_2$ ). Complex compounds are also named according to rules specified by IUPAC; an example is potassium oxodichloroimidophosphate,  $\text{K}[\text{POCl}_2(\text{NH})]$ . Examples of accepted trival names are diborane ( $\text{B}_2\text{H}_6$ ), silane ( $\text{SiH}_4$ ), and ammonia ( $\text{NH}_3$ ).

There also are definitive rules for naming organic compounds. Because of the infinite variety of disciplines and industrial applications involving organic compounds, the rules encompass different types of names. Sometimes a single compound can correctly be identified by a number of names; for example, chloral hydrate is also known as 2,2,2-trichloro-1,1-ethanediol and trichloroacetaldehyde monohydrate.

TABLE 6. The chemical elements

Name	Symbol	At. no.	Name	Symbol	At. no.	Name	Symbol	At. no.
Actinium	Ac	89	Germanium	Ge	32	Praseodymium	Pr	59
Aluminum	Al	13	Gold	Au	79	Promethium	Pm	61
Americium	Am	95	Hafnium	Hf	72	Protactinium	Pa	91
Antimony	Sb	51	Hassium	Hs	108	Radium	Ra	88
Argon	Ar	18	Helium	He	2	Radon	Rn	86
Arsenic	As	33	Holmium	Ho	67	Rhenium	Re	75

Francium	Fr	87	Plutonium	Pu	94	Zirconium	Zr	40
Gadolinium	Gd	64	Polonium	Po	84			
Gallium	Ga	31	Potassium	K	19			

\*This element does not have an official name or symbol.

## Symbols in scientific writing

Symbols commonly encountered in scientific writing are listed in **Table 7**. Symbols following the ellipses and separated by commas are alternatives that are used only when there is some reason for not using the symbol given first. The letters of the Greek alphabet, frequently used to represent terms, are shown in **Table 8**.

Some frequently encountered symbols for particles and quanta are as follows:

neutron	$n$	pion	$\pi$
proton	$p$	muon	$\mu$
deuteron	$d$	electron	$e$
triton	$t$	neutrino	$\nu$
alpha particle	$\alpha$	photon	$\gamma$

The meaning of abbreviated notations for nuclear reactions should be the following:

initial nuclide (incoming particle(s) or quanta,  
outgoing particle(s) or quanta) final nuclide

Some examples are:

TABLE 7. Commonly used symbols in scientific writing

**Space, time, mass, and related quantities**

length  $l$   
 height  $h$   
 radius  $r$   
 diameter  $d$   
 path, length of arc  $s$   
 plane angle  $\alpha, \beta, \gamma, \theta, \phi, \psi$   
 solid angle  $\omega$   
 area  $A, S$   
 volume  $V \dots v$   
 specific volume  $v$   
 wavelength  $\lambda$   
 wavenumber  $\sigma, \nu$   
 time  $t$   
 period or other characteristic interval  $T, \tau$   
 frequency  $\nu, f$   
 angular frequency ( $2\pi\nu$ )  $\omega$   
 velocity  $v \dots u, w$   
 angular velocity  $\omega$   
 acceleration  $a$   
 acceleration of free fall  $g$   
 mass  $m$   
 moment of inertia  $I$   
 density  $\rho$   
 relative density  $d$

**Molecular and related quantities**

molecular mass  $m$   
 molar mass  $M$   
 Avogadro's number  $N_0, L, N$   
 number of molecules  $N$   
 number of moles  $n$   
 mole fraction  $x \dots X, y$   
 molality  $m$   
 concentration  $c$   
 molar concentration of substance B  $c_B, [B], c(B)$   
 molecular concentration  $C$   
 partition function  $Q$   
 statistical weight  $g \dots p$   
 symmetry number  $\sigma$   
 characteristic temperature  $\theta$   
 diameter of molecule  $\sigma \dots D$   
 mean free path  $l$   
 diffusion coefficient  $D$   
 osmotic pressure  $\Pi$   
 surface concentration  $\Gamma$

**Mechanical and related quantities**

force  $F$   
 force due to gravity (weight)  $G \dots W$   
 moment of force  $M$   
 power  $P$   
 pressure  $p, P$   
 traction  $\sigma$   
 shear stress  $\tau$   
 modulus of elasticity  $E$   
 shear modulus  $G$   
 compressibility  $\kappa$   
 compression modulus ( $1/\kappa$ )  $K$   
 viscosity  $\eta$   
 fluidity  $\phi$   
 kinematic viscosity  $\nu$   
 friction coefficient  $f$   
 surface tension  $\gamma \dots \sigma$   
 angle of contact  $\theta$

**Thermodynamic and related quantities**

temperature  $\theta \dots t$   
 temperature, absolute  $T$   
 gas constant  $R$   
 Boltzmann constant  $k$   
 heat  $q, Q$   
 work  $w, A$   
 energy (Gibbs  $e$ )  $E \dots U$   
 entropy (Gibbs  $\eta$ )  $S$   
 \*Helmholtz free energy (Gibbs  $\Psi$ )  $A$   
 enthalpy (Gibbs  $\chi$ )  $H$   
 \*Gibbs function ( $\zeta$ )  $G \dots F$   
 heat capacity  $C$   
 specific heat at constant pressure  $c_p$   
 specific heat at constant volume  $c_v$   
 ratio of specific heats  $c_p/c_v$   $\gamma, \kappa$   
 chemical potential  $\mu$   
 activity, absolute  $\lambda$   
 activity, relative  $a$   
 activity coefficient  $f, \gamma$   
 osmotic coefficient  $g, \phi$   
 thermal conductivity  $\gamma$   
 Joule-Thomson coefficient  $\mu$

\*The terms for the Helmholtz and Gibbs energies were modified by action of the IUPAC Council, Montreal, August 1961, as follows:  
 Helmholtz energy (Gibbs  $\Psi = E_2TS$ ):  $A$       Gibbs energy (Gibbs  $\zeta = H_2TS$ ):  $G$

**TABLE 7. Commonly used symbols in scientific writing (cont.)**

Chemical reactions	Electricity and magnetism
stoichiometric number of molecules (negative for reactants, positive for products) $\nu$	elementary charge $e$
standard equation of chemical reaction $\sum \nu_B B = 0$	quantity of electricity $Q$
affinity ( $-\sum \nu_{B,\mu} B$ ) of a reaction $A$	change density $\rho$
equilibrium constant $K$	surface charge density $\sigma$
equilibrium quotient or equilibrium product (of molalities) $Q$	electric current $I \dots i$
extent of reaction ( $dn_B = \nu_B d\xi$ ) $\xi$	electric current density $J$
degree of reaction (e.g., degree of dissociation) $\alpha$	electric potential $V$
rate constant $k$	electric field strength $E$
collision number (collisions per unit volume and unit time) $Z$	electric displacement $D$
rate constant corresponding to the rate $Z$ $z$	electrokinetic potential $\zeta$
rate of reaction $\nu \dots r, s, J$	capacitance $C$
	permittivity (dielectric constant) $\epsilon$
	dielectric polarization $P$
	dipole moment $\mu$
	electric polarizability of a molecule $\alpha, \gamma$
	magnetic field strength $H$
	magnetic induction $B$
	magnetic permeability $\mu$
	magnetization $M$
	magnetic susceptibility $\chi$
	resistance $R$
	resistivity $\rho$
	self inductance $L$
	mutual inductance $M, L_{12}$
	reactance $X$
	impedance $Z$
	admittance $Y$
<b>Light</b>	
Planck's constant $h$	
Planck's constant divided by $2\pi$ $\hbar$	
quantity of light $q$	
radiant power, flux of light ( $dQ/dt$ ) $\Phi$	
illumination ( $d\Phi/dS$ ) $E$	
luminance $L, B$	
luminous emittance $H$	
absorption factor (fraction of incident radiant power which is absorbed) $\alpha$	
reflection factor (fraction of incident radiant power which is reflected) $\rho$	
transmission factor (fraction of incident radiant power which is transmitted) $\tau$	
transmittance ( $T = I/I_0$ ) $T$	
absorption (extinction) coefficient [ $\kappa/c = \ln(1/T)$ ] $\kappa$	
absorbance (extinction) [ $A = \log(1/T)$ ] $A \dots E$	
absorptivity (specific absorbance) [decadic absorption or extinction coefficient] $a$	
molar absorptivity (molar decadic absorption or extinction coefficient) [ $\epsilon/c = A$ ] $\epsilon$	
refraction index $n$	
refractivity $r$	
angle of optical rotation $\alpha$	
	<b>Electrochemistry</b>
	Faraday's constant (the faraday) $F$
	charge number of an ion, plus or minus $z$
	degree of electrolytic dissociation $\alpha$
	ionic strength $I \dots \mu$
	electrolytic conductivity (specific conductance) $\kappa$
	equivalent or molar conductance of electrolyte or ion $A$
	transport number $t, T$
	electromotive force $E$
	overpotential $\eta$

**TABLE 8. Greek alphabet**

Upper and lower cases	Name	Upper and lower cases	Name
A $\alpha$	Alpha	N $\nu$	Nu
B $\beta$	Beta	$\Xi$ $\xi$	Xi
$\Gamma$ $\xi$	Gamma	O $\omicron$	Omicron
$\Delta$ $\delta$ $\partial$	Delta	$\Pi$ $\pi$	Pi
E $\epsilon$ $\varepsilon$	Epsilon	P $\rho$	Rho
Z $\zeta$	Zeta	$\Sigma$ $\sigma$	Sigma
H $\eta$	Eta	T $\tau$	Tau
$\Theta$ $\theta$	Theta	Y $\upsilon$	Upsilon
I $\iota$	Iota	$\Phi$ $\phi$ $\varphi$	Phi
K $\kappa$	Kappa	X $\chi$	Chi
$\Lambda$ $\lambda$	Lambda	$\Psi$ $\psi$	Psi
M $\mu$	Mu	$\Omega$ $\omega$	Omega

# Mathematics

## Mathematical signs and symbols

Symbol	Definition	Symbol	Definition	Symbol	Definition
+	plus (sign of addition)	$\neq$	not equal to	$\partial u/\partial x$	partial derivative of $u$ with respect to $x$
+	positive	$\rightarrow \doteq$	approaches	$\int$	integral of
-	minus (sign of subtraction)	$\propto$	varies as	$\int_a^b$	integral of, between limits $a$ and $b$
-	negative	$\infty$	infinity	$\oint$	line integral around a closed path
$\pm$ ( $\mp$ )	plus or minus (minus or plus)	$\sqrt{\quad}$	square root of	$\Sigma$	(sigma) summation of
$\times$	times, by (multiplication sign)	$\sqrt[3]{\quad}$	cube root of	$f(x), F(x)$	functions of $x$
$\cdot$	multiplied by	$\therefore$	therefore	$\nabla$	del or nabla, vector differential operator
$\div$	sign of division	$\parallel$	parallel to	$\nabla^2$	Laplacian operator
/	divided by	$() [] \{ \}$	parentheses, brackets and braces; quantities enclosed by them to be taken together in multiplying	$\mathcal{E}$	Laplace operational symbol
:	ratio sign, divided by, is to		dividing, etc.	$4!$	factorial $4 = 1 \times 2 \times 3 \times 4$
$::$	equals, as (proportion)	$\overline{AB}$	length of line from $A$ to $B$	$ x $	absolute value of $x$
$<$	less than	$\pi$	(pi) = 3.14159 +	$\dot{x}$	first derivative of $x$ with respect to time
$>$	greater than	$^\circ$	degrees	$\ddot{x}$	second derivative of $x$ with respect to time
$\ll$	much less than	'	minutes	$\mathbf{A} \times \mathbf{B}$	vector product; magnitude of $\mathbf{A}$ times magnitude of $\mathbf{B}$ times sine of the angle from $\mathbf{A}$ to $\mathbf{B}$ ; $AB \sin \overline{AB}$
$\gg$	much greater than	"	seconds	$\mathbf{A} \cdot \mathbf{B}$	scalar product of $\mathbf{A}$ and $\mathbf{B}$ ; magnitude of $\mathbf{A}$ times magnitude of $\mathbf{B}$ times cosine of the angle from $\mathbf{A}$ to $\mathbf{B}$ ; $AB \cos \overline{AB}$
$=$	equals	$\angle$	angle		
$\equiv$	identical with	$dx$	differential of $x$		
$\sim$	similar to	$\Delta$	(delta) difference		
$\approx$	approximately equals	$\Delta x$	increment of $x$		
$\cong$	approximately equals, congruent				
$\leq$	equal to or less than				
$\geq$	equal to or greater than				

## Mathematical notation

### Mathematical logic

$p, q, P(x)$	Sentences, propositional functions, propositions
$\neg p, \sim p, \text{non } p, Np$	Negation, read "not $p$ " ( $\neq$ : read "not equal")
$p \vee q, p + q, Apq$	Disjunction, read " $p$ or $q$ ," " $p, q$ ," or both
$p \wedge q, p \cdot q, p \& q, Kpq$	Conjunction, read " $p$ and $q$ "
$p \rightarrow q, p \supset q, p \Rightarrow q, Cpq$	Implication, read " $p$ implies $q$ " or " $p$ then $q$ "
$p \leftrightarrow q, p \equiv q, p \Leftrightarrow q, Epq, p \text{ iff } q$	Equivalence, read " $p$ is equivalent to $q$ " or " $p$ if and only if $q$ "
n.a.s.c.	Read "necessary and sufficient condition"
$() , [] , \{ \} , \dots$	Parentheses
$\forall, \forall, \Sigma$	Universal quantifier, read "for all" or "for every"
$\exists, \exists, \Pi$	Existential quantifier, read "there is a" or "there exists"
$\vdash$	Assertion sign ( $p \vdash q$ : read " $q$ follows from $p$ "; $\vdash p$ : read " $p$ is or follows from an axiom," or " $p$ is a tautology")
0, 1	Truth, falsity (values)
$=$	Identity
$\stackrel{\text{df}}{=} , \stackrel{\text{df}}{=} , \stackrel{\text{df}}{=} , \equiv$	Definitional identity
■	"End of proof"; "QED"

### Set theory, relations, functions

$X, Y$	Sets
$x \in X$	$x$ is a member of the set $X$
$x \notin X$	$x$ is not a member of $X$
$A \subset X, A \subseteq X$	Set $A$ is contained in set $X$
$A \not\subset X, A \not\subseteq X$	$A$ is not contained in $X$
$X \cup Y, X + Y$	Union of sets $X$ and $Y$
$X \cap Y, X \cdot Y$	Intersection of sets $X$ and $Y$
$+, +, \circ$	Symmetric difference of sets
$\cup X_i, \Sigma X$	Union of all the sets $X_i$
$\cap X_i, \Pi X_i$	Intersection of all the sets $X_i$
$\emptyset, 0, \Lambda$	Null set, empty set
$X', [X, CX$	Complement of the set $X$
$X - Y, X \setminus Y$	Difference of sets $X$ and $Y$
$\mathcal{X}(P(x)), \{x P(x)\}, \{x:P(x)\}$	The set of all $x$ with the property $P$
$(x,y,z), (x, y, z)$	Ordered set of elements $x, y, \text{ and } z$ ; to be distinguished from $\{x,z,y\}$ , for example
$\{x,y,z\}$	Unordered set, the set whose elements are $x, y, z, \text{ and } \text{no others}$
$\{a_1, a_2, \dots, a_n\}, \{a_i\}_{i=1,2,\dots,n}, \{a_i\}_{i=1}^n$	The set whose members are $a_i$ , where $i$ is any whole number from 1 to $n$
$\{a_1, a_2, \dots\}, \{a_i\}_{i=1,2,\dots}, \{a_i\}_{i=1}^\infty$	The set whose members are $a_i$ , where $i$ is any positive whole number
$X \times Y$	Cartesian product, set of all $(x,y)$ such that $x \in X, y \in Y$

$\{a_i\}_{i \in I}$	The set whose elements are $a_i$ , where $i \in I$
$xRy, R\{x,y\}$	Relation
$\equiv, \cong, \sim, \approx$	Equivalence relations, for example, congruence
$\geq, \leq, >, <, \varepsilon, \gg, \ll, \leq, <$	Transitive relations, for example, numerical order
$f: X \rightarrow Y, X \xrightarrow{f} Y, X \rightarrow Y, f \in Y^X$	Function, mapping, transformation
$f^{-1}, f^{-1}, X \xleftarrow{f^{-1}} Y$	Inverse mapping
$g \circ f$	Composite functions: $(g \circ f)(x) = g(f(x))$
$f(X)$	Image of $X$ by $f$
$f^{-1}(X)$	Inverse-image set, counter image
1-1, one-one	Read "one-to-one correspondence"
$X \xrightarrow{f} Y$ $\phi \downarrow \downarrow \psi$ $W \xrightarrow{g} Z$	Diagram: the diagram is commutative in case $\psi \circ f = g \circ \phi$
$f _A$	Partial mapping, restriction of function $f$ to set $A$
$=$	Cardinal of the set $A$
$X, \text{card } X,  X $	Cardinal of the set $A$
$\aleph_0, d$	Denumerable infinity
$c, c, 2^{\aleph_0}$	Power of continuum
$\omega$	Order type of the set of positive integers
$\sigma$	Read "countably"

**Number, numerical functions**

1.4; 1.4; 1-4	Read "one and four-tenths"
1(1)2(10)100	Read "from 1 to 20 in intervals of 1, and from 20 to 100 in intervals of 10"
const	Constant
$A \cong 0$	The number $A$ is nonnegative, or the matrix $A$ is positive definite, or the matrix $A$ has nonnegative entries
$x y$	Read "x divides y"
$x \equiv y \pmod p$	Read "x congruent to y modulo p"
$a_0 + \frac{1}{a_1} + \frac{1}{a_2} + \dots$	Continued fractions
$a_0 + \frac{1}{ a_1} + \dots$	
$[a,b]$	Closed interval
$[a,b), [a,b[$	Half-open interval (open at the right)
$(a,b), ]a,b[$	Open interval
$[a,\infty), [a,\rightarrow[$	Interval closed at the left, infinite to the right
$(-\infty, \infty), [\leftarrow, \rightarrow[$	Set of all real numbers
$\max_{x \in X} f(x), \max \{f(x)   x \in X\}$	Maximum of $f(x)$ when $x$ is in the set $X$
min	Minimum
sup, l.u.b.	Supremum, least upper bound
inf, g.l.b.	Infimum, greatest lower bound
$\lim_{x \rightarrow a} f(x) = b, \lim_{x \rightarrow a} f(x) = b,$ $f(x) \rightarrow b$ as $x \rightarrow a$	$b$ is the limit of $f(x)$ as $x$ approaches $a$
$\lim_{x \rightarrow a} f(x), \lim_{x \rightarrow a-0} f(x), f(a-)$	Limit of $f(x)$ as $x$ approaches $a$ from the left
$\lim \sup, \overline{\lim}$	Limit superior
$\lim \inf, \underline{\lim}$	Limit inferior
i.i.m.	Limit in the mean
$z = x + iy = re^{i\theta}, \xi = \xi + i\eta,$ $w = u + iv = \rho e^{i\phi}$	Complex variables
$z^*$	Complex conjugate
Re, $\Re$	Real part
Im, $\Im$	Imaginary part
arg	Argument
$\frac{\partial(u,v)}{\partial(x,y)}, \frac{D(u,v)}{D(x,y)}$	Jacobian, functional determinant
$\int_E f(x) d\mu(x)$	Integral (for example, Lebesgue integral) of function $f$ over set $E$ with respect to measure $\mu$
$f(n) \sim \log n$ as $n \rightarrow \infty$	$f(n)/\log n$ approaches 1 as $n \rightarrow \infty$
$f(n) = O(\log n)$ as $n \rightarrow \infty$	$f(n)/\log n$ is bounded as $n \rightarrow \infty$
$f(n) = o(\log n)$	$f(n)/\log n$ approaches zero
$f(x) \nearrow b, f(x) \uparrow b$	$f(x)$ increases, approaching the limit $b$
$f(x) \downarrow b, f(x) \searrow b$	$f(x)$ decreases, approaching the limit $b$

a.e., p.p.	Almost everywhere
ess sup	Essential supremum
$C^0, C^0(X), C(X)$	Space of continuous functions
$C^k, C^k[a,b]$	The class of functions having continuous $k$ th derivative (on $[a,b]$ )
$C'$	Same as $C^1$
Lip $_\alpha, \text{Lip } \alpha$	Lipschitz class of functions
$L^p, L_p, L^p[a,b]$	Space of functions having integrable absolute $p$ th power (on $[a,b]$ )
$L^1$	Same as $L^1$
$(C, \alpha), (C, p)$	Cesàro summability

**Special functions**

$[x]$	The integral part of $x$
$\binom{n}{k}, {}^nC_k, nC_k$	Binomial coefficient $n!/k!(n-k)!$
$\left(\frac{n}{p}\right)$	Legendre symbol
$e^x, \exp x$	Exponential function
$\sinh x, \cosh x, \tanh x$	Hyperbolic functions
$\text{sn } x, \text{cn } x, \text{dn } x$	Jacobi elliptic functions
$\wp(x)$	Weierstrass elliptic function
$\Gamma(x)$	Gamma function
$J_\nu(x)$	Bessel function
$\chi_X(x)$	Characteristic function of the set $X$ : $\chi_X(x) = 1$ in case $x \in X$ , otherwise $\chi_X(x) = 0$
sgn $x$	Signum: $\text{sgn } 0 = 0$ , while $\text{sgn } x = x/ x $ for $x \neq 0$
$\delta(x)$	Dirac delta function

**Algebra, tensors, operators**

$+, \cdot, \times, \circ, \tau, \tau$	Laws of composition in algebraic systems
$e, 0$	Identity, unit, neutral element (of an additive system)
$e, 1, I$	Identity, unit, neutral element (of a general algebraic system)
$e, e, E, P$	Idempotent
$a^{-1}$	Inverse of $a$
$\text{Hom}(M, N)$	Group of all homomorphisms of $M$ into $N$
$G/H$	Factor group, group of cosets
$[K:k]$	Dimension of $K$ over $k$
$\oplus, +$	Direct sum
$\otimes$	Tensor product, Kronecker product
$\wedge$	Exterior product, Grassmann product
$\vec{x}, \underline{x}, \tau, x$	Vector
$\vec{x} \cdot \vec{y}, \mathbf{x} \cdot \mathbf{y}, (\tau, \delta)$	Inner product, scalar product, dot product
$\mathbf{x} \times \mathbf{y}, [\tau, \delta], \mathbf{x} \wedge \mathbf{y}$	Outer product, vector product, cross product
$ \mathbf{x} ,  x , \ \mathbf{x}\ , \ \mathbf{x}\ _p$	Norm of the vector $x$
$Ax, xA$	The image of $x$ under the transformation $A$
$\delta_{ij}$	Kronecker delta: $\delta_{ij} = 1$ , while $\delta_{ij} = 0$ for $i \neq j$
$A', tA, A', 'A$	Transpose of the matrix $A$
$A^*, \bar{A}$	Adjoint, Hermitian conjugate of $A$
$\text{tr } A, \text{Sp } A$	Trace of the matrix $A$
$\det A,  A $	Determinant of the matrix $A$
$\Delta^n f(x), \Delta_\kappa^n f, \frac{\Delta^n f(x)}{h^n}$	Finite differences
$[x_0, x_1], [x_0, x_1, x_2], \frac{\Delta u_{x_0}}{x_1}, [x_0, x_1]_r$	Divided differences
$\nabla f, \text{grad } f$	Read "gradient of $f$ "
$\nabla \cdot \mathbf{v}, \text{div } \mathbf{v}$	Read "divergence of $\mathbf{v}$ "
$\nabla \times \mathbf{v}, \text{curl } \mathbf{v}, \text{rot } \mathbf{v}$	Read "curl of $\mathbf{v}$ "
$\nabla^2, \Delta, \text{div grad}$	Laplacian
$[X, Y]$	Poisson bracket, or commutator, or Lie product
$\text{GL}(n, R)$	Full linear group of degree $n$ over field $R$
$O(n, R)$	Full orthogonal group
$\text{SO}(n, R), O^+(n, R)$	Special orthogonal group

**Topology**

$E^n$	Euclidean $n$ space
$S^n$	$n$ sphere
$\rho(p,q), d(p,q)$	Metric, distance (between points $p$ and $q$ )
$\bar{\phantom{x}}, X^-, \text{cl } X, X^c$	Closure of the set $X$
$\text{Fr}X, \text{fr}X, \partial X, \text{bdry } X$	Frontier, boundary of $X$
$\text{int } X, \overset{\circ}{X}$	Interior of $X$
$T_2$ space	Hausdorff space
$F_\sigma$	Union of countably many closed sets
$G_\delta$	Intersection of countably many open sets
$\dim X$	Dimensionality, dimension of $X$
$\pi_1(X)$	Fundamental group of the space $X$
$\pi_n(X), \pi_n(X,A)$	Homotopy groups
$H_n(X), H_n(X,A;G), H_*(X)$	Homology groups
$H^p(X), H^p(X,A;G), H^*(X)$	Cohomology groups

**Probability and statistics**

$X, Y$	Random variables
$P(X \leq 2), \text{Pr}(X \leq 2)$	Probability that $X \leq 2$
$P(X \leq 2 Y \geq 1)$	Conditional probability
$E(X), E(X)$	Expectation of $X$
$E(X Y \geq 1)$	Conditional expectation
c.d.f.	Cumulative distribution function
p.d.f.	Probability density function
c.f.	Characteristic function
$\bar{x}$	Mean (especially, sample mean)
$\sigma, \text{s.d.}$	Standard deviation
$\sigma^2, \text{Var, var}$	Variance
$\mu_1, \mu_2, \mu_3, \mu_i, \mu_{ij}$	Moments of a distribution
$\rho$	Coefficient of correlation
$\rho_{12,34}$	Partial correlation coefficient

**Fundamental constants**

Recommended values (2002) of selected fundamental constants of physics and chemistry<sup>a</sup>

Quantity	Symbol	Numerical value <sup>b</sup>	Unit <sup>c</sup>	Relative uncertainty (standard deviation)
<b>UNIVERSAL CONSTANTS</b>				
Speed of light in vacuum	$c, c_0$	299 792 458	$\text{m s}^{-1}$	(exact)
Magnetic constant	$\mu_0$	$4\pi \times 10^{-7}$ $= 12.566 370 614 \dots \times 10^{-7}$	$\text{N A}^{-2}$	(exact)
Electric constant, $1/\mu_0 c^2$	$\epsilon_0$	$8.854 187 817 \dots \times 10^{-12}$	$\text{F m}^{-1}$	(exact)
Characteristic impedance of vacuum, $\sqrt{\mu_0/\epsilon_0} = \mu_0 c$	$Z_0$	376.730 313 461 ...	$\Omega$	(exact)
Newtonian constant of gravitation	$G$	$6.6742(10) \times 10^{-11}$	$\text{m}^3 \text{kg}^{-1} \text{s}^{-2}$	$1.5 \times 10^{-4}$
	$G/\hbar c$	$6.7087(10) \times 10^{-39}$	$(\text{GeV}/c^2)^{-2}$	$1.5 \times 10^{-4}$
Planck constant	$h$	$6.626 0693(11) \times 10^{-34}$	J s	$1.7 \times 10^{-7}$
in eV s		$4.135 667 43(35) \times 10^{-15}$	eV s	$8.5 \times 10^{-8}$

<b>NON-SI UNITS ACCEPTED FOR USE WITH THE SI</b>				
Electronvolt: (e/C) J	eV	$1.602\ 176\ 53(14) \times 10^{-19}$	J	$8.5 \times 10^{-8}$
(Unified) atomic mass unit: $1\ \text{u} = m_u = \frac{1}{12} m(^{12}\text{C})$	u	$1.660\ 538\ 86(28) \times 10^{-27}$	kg	$1.7 \times 10^{-7}$

<sup>a</sup>This table presents a selection of the values of the fundamental constants recommended by the Committee on Data for Science and Technology (CODATA). These "2002 CODATA recommended values" form a self-consistent set based on the data available through December 31, 2002, and are generally recognized for use in all fields of science and technology. A detailed description of the data and analysis that led to these results will be published in 2004. The 2002 adjustment was carried out under the auspices of the CODATA Task Group on Fundamental Constants. The recommended values are available on the World Wide Web at <http://physics.nist.gov/cuu/Constants/index.html>.

<sup>b</sup>The digits in parentheses represent one-standard-deviation uncertainties in the final two digits of the quoted values.

<sup>c</sup>A = ampere, C = coulomb, F = farad, Hz = hertz, J = joule, K = kelvin, kg = kilogram, m = meter, mol = mole, N = newton, Pa = pascal, s = second, T = tesla, W = watt, Wb = weber,  $\Omega$  = ohm, eV = electronvolt, u = (unified) atomic mass unit. Prefixes: k = 10<sup>3</sup>, M = 10<sup>6</sup>, G = 10<sup>9</sup>.

<sup>d</sup>The conventional value of the Josephson constant, adopted internationally for realizing representations of the volt using the Josephson effect, is  $K_{J-90} = 483\ 597.9\ \text{GHz V}^{-1}$ .

<sup>e</sup>The conventional value of the von Klitzing constant, adopted internationally for realizing representations of the ohm using the quantum Hall effect, is  $R_{k-90} = 25\ 812.807\ \Omega$ .

<sup>f</sup>Value recommended by the Particle Data Group in the 2002 Review of Particle Physics [K. Hagiwara et al. (Particle Data Group), *Physical Review D*, vol. 66, Paper 010001, 2002 (<http://pdg.lbl.gov>)].

<sup>g</sup>This and all other values involving  $m_e$  are based on the value of  $m_e c^2$  in MeV recommended by the Particle Data Group in the 2002 Review of Particle Physics (*ibid.*), but with a standard uncertainty of 0.29 MeV rather than the quoted uncertainty of  $-0.26\ \text{MeV}$ ,  $+0.29\ \text{MeV}$ .

<sup>h</sup>Based on nuclear magnetic resonance (NMR) frequency of protons in a sphere of pure water (H<sub>2</sub>O) at 25°C surrounded by vacuum.

<sup>i</sup>The numerical value of  $F$  to be used in coulometric chemical measurements is 96 485.336(16) [relative uncertainty =  $1.7 \times 10^{-7}$ ] when the relevant current is measured in terms of representations of the volt and ohm based on the Josephson and quantum Hall effects and the conventional values of the Josephson and von Klitzing constants,  $K_{J-90}$  and  $R_{k-90}$ .

The fundamental particles <sup>a</sup>						
<b>Gauge bosons</b>		$J_C^P = 1_{-}$	Self-conjugate except $\bar{W}^{\pm} = W^{\mp}$ .			
Name	Symbol	Charge <sup>b</sup>	Mass and width, GeV		Couplings	
Photon	$\gamma$	0	0		$A \Rightarrow \gamma A$	
Gluon <sup>c</sup>	$g$	0	0		$A \Rightarrow gA'$	
<b>Weak bosons</b>						
Charged <sup>d</sup>	$W^{\pm}$	$\pm 1$	80.4, 2.1		$U \Rightarrow W^+ D$	
Neutral <sup>e</sup>	$Z^0$	0	91.2, 2.5		$A \Rightarrow Z^0 A$	
<b>Fermions<sup>f</sup></b>		$J = 1/2$	All have distinct antiparticles, except perhaps the neutrinos.			
Name	Charge <sup>b</sup>	Symbol and mass, GeV		Symbol and mass, GeV		Symbol and mass, GeV
<b>Leptons</b>						
Neutrinos	0	$\nu_e$	$< 3 \times 10^{-9}$	$\nu_{\mu}$	$< .0002$	$\nu_{\tau}$ $< .02$
Charged leptons <sup>g</sup>	-1	$e$	.00051	$\mu$	.106 <sup>h</sup>	$\tau$ 1.78 <sup>h</sup>
<b>Quarks<sup>c</sup></b>						
Up type	$2/3$	$u$	.0015-.004	$c$	1.55-1.35	$t$ 170-180 <sup>i</sup>
Down type	$-1/3$	$d$	.004-.008	$s$	.08-.13	$b$ 4.1-4.4
<sup>a</sup> The graviton, with $J_C^P = 2_{+}^{+}$ , has been omitted, since it plays no role in high-energy particle physics. <sup>b</sup> In units of the proton charge. <sup>c</sup> The gluon is a color SU <sub>3</sub> octet (8); each quark is a color triplet (3). These colored particles are confined constituents of hadrons; they do not appear as free particles. <sup>d</sup> The branching ratios (%) of the decay modes of the $W^+$ are: $u\bar{d}, c\bar{s}$ 34 each $\nu_e e^+, \nu_{\mu} \mu^+, \nu_{\tau} \tau^+$ 11 each <sup>e</sup> The branching ratios (%) of the decay modes of the $Z^0$ are: $d\bar{d}, s\bar{s}, b\bar{b}$ 16.6 each $u\bar{u}, c\bar{c}$ 10.1 each $\nu_e \bar{\nu}_e, \nu_{\mu} \bar{\nu}_{\mu}, \nu_{\tau} \bar{\nu}_{\tau}$ 6.7 each $e^+ e^-, \mu^+ \mu^-, \tau^+ \tau^-$ 3.4 each <sup>f</sup> The three known families (generations) of fermions are displayed in three columns. <sup>g</sup> Any further charged leptons have mass greater than 40 GeV. <sup>h</sup> The $\mu$ and $\tau$ leptons are unstable, with the following mean life and principal decay modes (branching ratios in %): $\mu$ $\tau_{\mu} = 2.2 \times 10^{-6}$ s $e \bar{\nu}_e \nu_{\mu}$ 100 $\tau$ $\tau_{\tau} = 2.9 \times 10^{-13}$ s $\mu \bar{\nu}_{\mu} \nu_{\tau}$ 17, $e \bar{\nu}_e \nu_{\tau}$ 18, (hadrons) $\bar{\nu}_{\tau}$ 63 <sup>i</sup> The $t$ quark has a width $\approx 1.4$ GeV, with dominant decay to $Wb$ .						

## Geologic time scale and related aspects

Eon	Era	Period (Interval length, × 10 <sup>6</sup> years)	Epoch	Beginning of epoch, × 10 <sup>6</sup> years ago	Forms of life	Other features	
Phanerozoic	Cenozoic "Age of Mammals"	Quaternary (1.8)	Recent	0.01	Modern humans	Extensive glaciation during portions of Quaternary  Formation of most present mountain ranges	
			Pleistocene	1.8	Early humans		
		Tertiary (63.2)	Pliocene	5.3	Large carnivores		
			Miocene	23.8	Whales, apes, grazing animals		
			Oligocene	33.7	Large browsing animals		
			Eocene	54.8	Rise of modern floras		
			Paleocene	65	First placental mammals		
	Mesozoic "Age of Reptiles"	Cretaceous (79)	Upper (Base Santonian)	144	Last of dinosaurs	Widespread seas over much of present-day Europe, North Africa, and North America  Beginning of formation of Atlantic Ocean	
			Middle (Base Albian)		Last of ammonites		
			Lower		Rise of flowering plants		
		Jurassic (62)	Upper (Base Callovian)	206	Toothed birds		
			Middle (Base Bajocian)		Flying reptiles		
			Lower		First primitive mammals		
		Triassic (44)	Upper	250	Rise of dinosaurs		
			Middle		Rise of ammonites		
			Lower		Rise of cycads		
	Paleozoic "Age of Invertebrates"	Permian (40)	Upper (Base Ochoan)	290	Primitive reptiles	Mountain building during late Paleozoic  Widespread coal swamps	
			Middle (Base Guadalupian)		Last of trilobites		
			Lower		Glossopteris flora		
		Carboniferous <sup>a</sup>	Pennsylvanian (32)	Upper	322		Spread of amphibians
				Middle			Great coal forests
				Lower			Climax of spore-forming plants
		Mississippian (32)	Upper	354	Abundant sharks		
			Middle		Climax of crinoids and blastoids		
			Lower				
		Devonian (63)	Upper	417	First forests		
			Middle		Rise of ferns		
			Lower		Earliest known amphibians		
		Silurian (26)	Upper	443	Appearance of land plants		
			Middle		First known scorpions		
			Lower		Expansion of brachiopods and corals		
	Ordovician (47)	Upper	490	Appearance of primitive fishes			
		Middle		Climax of trilobites			
Lower		Rise of cephalopods					
Cambrian (53)	Upper (Base Croixian)	543	Abundant trilobites				
	Middle		Many kinds of shelled invertebrates				
	Lower						
Proterozoic	Precambrian	Neoproterozoic (357 <sup>b</sup> )	900	Marine algae, wormlike organisms, other simple forms	Extensive glaciation Oldest dated rocks (Greenland)		
		Mesoproterozoic (700 <sup>b</sup> )	1600				
		Paleoproterozoic (900 <sup>b</sup> )	~2500				
Archean <sup>c</sup>		Late (500 <sup>b</sup> )	3000	Blue-green algae (cyanobacteria)	Abundant dark sediments Formation of earliest known rocks		
		Middle (400 <sup>b</sup> )	3400				
		Early (>400 <sup>b</sup> )	>3800	Bacteria			

<sup>a</sup>The period known as Carboniferous in Europe is divided into two periods in North American usage.

<sup>b</sup>Length of epoch, × 10<sup>6</sup> years.

<sup>c</sup>The beginning of the Archean corresponds to the age of the oldest preserved continental crust.

# Biographical Listing

- Abbe, Ernst** (1840–1905), German physicist. Developed optical instruments, such as an apochromatic objective and a crystal refractometer.
- Abel, Frederick Augustus** (1827–1902), English chemist. Expert on the chemistry of explosives; originated the Abel test for determination of the flash point of petroleum.
- Abel, John Jacob** (1857–1938), American pharmacologist and physiologist. Isolated epinephrine, and insulin in crystal form.
- Abel, Niels Henrik** (1802–1829), Norwegian mathematician. Contributed to the theory of elliptical functions.
- Abell, George Ogden** (1927–1983), American astronomer. Research in problems relating to organization, structure, and distribution of galaxies; observational cosmology; and planetary nebulae.
- Abney, William de Wiveleslie** (1843–1920), English photographic chemist and physicist. Photographed the infrared solar spectrum.
- Abrikosov, Alexei A.** (1928– ), Russian-born American physicist. Applied the Ginzburg-Landau theory to explain the behavior of type II superconductors. Nobel Prize, 2003.
- Adams, John Couch** (1819–1892), English astronomer. Discovered, independently of U. J. J. Leverrier, Neptune.
- Adanson, Michel** (1727–1806), French naturalist. Classified plants in his *Les Familles Naturelles des Plantes*.
- Addison, Thomas** (1793–1860), English physician. Identified pernicious anemia and Addison's disease of the adrenal cortex.
- Adler, Alfred** (1870–1937), Austrian psychiatrist and psychologist. Founded the school of individual psychology.
- Adrian of Cambridge, Edgar Douglas Adrian, Baron** (1889–1977), English physiologist. Investigated physiology of nervous system; showed that change in electric potential in electroencephalograph is due to electrical activity of cortex; Nobel Prize, 1932.
- Afzelius, Adam** (1750–1837), Swedish botanist. Founded the Linnaean Institute.
- Agassiz, Jean Louis Rudolphe** (1807–1873), Swiss-born American naturalist. Wrote books on ichthyology, especially relating to classification.
- Agnesi, Maria Gaetana** (1718–1799), Italian mathematician. Author of *Istituzioni Analitiche*, a complete treatment of algebra and analysis; shared in the discovery of a cubic curve ("witch of Agnesi").
- Agre, Peter** (1949– ), American medical doctor and scientist. Discovered water channels in cell membranes; Nobel Prize, 2003.
- Agricola, Georgius**, real name Georg Bauer (1494–1555), German physician and mineralogist. Known as the father of systematic mineralogy.
- Ahlfors, Lars Valerian** (1907–1996), Finnish-American mathematician. Did research on covering surfaces related to Riemann surfaces of inverse functions of entire and meromorphic functions; opened up new fields of analysis; Fields Medal, 1936.
- Airy, George Biddell** (1801–1892), English astronomer. Discovered inequality in the motions of Venus and the Earth; determined the mass of the Earth.
- Aitken, John** (1839–1919), Scottish physicist. Studied dust particles in the atmosphere, known as Aitken nuclei.
- Aitken, Robert Grant** (1864–1951), American astronomer. Discovered more than 3000 binary stars.
- Alder, Kurt** (1902–1958), German chemist. Co-developer of the Diels-Alder reaction for diene synthesis; contributed to stereochemistry; Nobel Prize, 1950.
- Alembert, Jean le Rond d'** (1717–1783), French mathematician. Developed d'Alembert's principle and the calculus of partial differences.
- Alferov, Zhores Ivanovich** (1930– ), Russian physicist and electronics engineer. Developed semiconductor heterostructures used in high-speed and opto-electronics, including fast transistors, laser diodes, and light-emitting diodes; Nobel Prize, 2000.
- Alfvén, Hannes Olof Gösta** (1908–1995), Swedish physicist. Studies in magnetohydrodynamics, planetary physics, antiferromagnetism, and ferrimagnetism; Nobel Prize, 1970.
- Alhazen** (965–1038), Arab mathematician and astronomer. Provided the first accounts of atmospheric refraction and reflection from concave surfaces; constructed spherical and parabolic mirrors.
- al-Khwarizmi** (780–850), Arab mathematician. Wrote treatises on arithmetic and algebra, which were important in the mathematical knowledge of medieval Europe.
- Allen, Edgar** (1892–1943), American biologist. Discovered estrogen; investigated hormonal mechanisms controlling female reproductive cycle.
- Allen, Willard Myron** (1904–1993), American physician. With G. W. Corner, discovered progesterone, and proved it necessary for development of embryo in early pregnancy; with O. Wintersteiner, synthesized crystalline progesterone.
- Altman, Sidney** (1939– ), American chemist. Discovered an unusual enzyme that contains ribonucleic acid (RNA) in addition to a protein, leading to the discovery that RNA molecules have catalytic properties similar to those of enzymes; Nobel Prize, 1989.
- Alvarez, Luis Walter** (1911–1988), American physicist. Pioneer in building liquid hydrogen bubble chambers, and in developing measurement devices and computer systems to analyze data from these chambers; discovered large numbers of short-lived elementary particles; Nobel Prize, 1968.
- Amagat, Émile** (1841–1915), French physicist. Investigated relationship of pressure, density, and temperature in gases and liquids, particularly at high pressure.
- Amici, Giovanni Battista** (1786–1863), Italian astronomer, optician, and naturalist. Invented the Amici microscope; designed parabolic mirrors for reflecting telescopes.
- Ampère, André Marie** (1775–1836), French physicist and mathematician. Founder of electrodynamics; formulated Ampère's law; invented the astatic needle.
- Anaximander** (611–547 B.C.), Greek astronomer and mathematician. Reputed inventor of geographical maps; formulated the concept of the universe as infinite (apeiron).
- Anderson, Carl David** (1905–1991), American physicist. Discovered the meson in cosmic rays; discovered the positron; Nobel Prize, 1936.
- Anderson, Philip Warren** (1923– ), American physicist. Demonstrated existence of electronic localization in disordered solids, and of localized magnetism in metals; Nobel Prize, 1977.
- Andrade, Edward Neville da Costa** (1887–1971), English physicist. Discovered Andrade's creep law and a law governing variation of viscosity of liquids with temperature.
- Andrews, Roy Chapman** (1884–1960), American naturalist. Discovered many plant and animal fossils.
- Anfinsen, Christian Boehmer** (1916–1995), American biochemist. Discovered how three-dimensional structures of ribonuclease and other proteins are formed; Nobel Prize, 1972.
- Angström, Anders Jonas** (1814–1874), Swedish physicist. Mapped the solar spectrum; discovered hydrogen in the solar atmosphere.
- Apollonius of Perga** (247–205 B.C.), Greek mathematician. Wrote about conic sections; coined the terms parabola, ellipse, and hyperbola.
- Appleton, Edward Victor** (1892–1965), English physicist. Demonstrated the existence of the ionosphere and discovered its region known as the Appleton layer; contributed to the development of radar; Nobel Prize, 1947.
- Arago, Dominique François** (1786–1853), French astronomer and physicist. Discovered the magnetic properties of nonferrous materials, and the production of magnetism by electricity.
- Arber, Werner** (1929– ), Swiss molecular biologist. Determined the molecular mechanism of host-controlled restriction modification of bacterial viruses and discovered the restriction enzymes; Nobel Prize, 1978.
- Archimedes** (287–212 B.C.), Greek physicist and mathematician. Formulated Archimedes' principle; invented the compound pulley and Archimedes' screw.
- Argand, Jean Robert** (1768–1822), Swiss mathematician. Developed the Argand diagram.
- Argelander, Friedrich Wilhelm August** (1799–1875), German astronomer. Prepared a star catalog; introduced decimal division of stellar magnitudes.
- Aristarchus of Samos** (310–250 B.C.), Greek astronomer. Invented the hemispherical sundial; determined the movement of the Earth around the stationary Sun; added a correction factor of 1/1623 of a day to the length of the year.
- Aristotle** (384–322 B.C.), Greek philosopher. Exponent of the methodology and division of sciences; contributed to physics, astronomy, meteorology, psychology, and biology.
- Arkwright, Richard** (1732–1792), English inventor. Developed the first practical mechanized spinning frame, utilizing rollers.
- Arrhenius, Svante August** (1859–1927), Swedish physicist and chemist. Developed theory of electrolytic dissociation; investigated osmosis and viscosity of solutions; Nobel Prize, 1903.
- Arsonval, Jacques Arsène d'** (1851–1940), French physicist and physiologist. Pioneered in electrotherapy; invented d'Arsonvalgalvanometer.
- Aston, Francis William** (1877–1945), English physicist and chemist. Discovered isotopes in non-radioactive elements by using the mass spectrograph he invented; Nobel Prize, 1922.
- Atiyah, Michael Francis** (1929– ), British mathematician. Work centered on the interaction between geometry and analysis; developed K theory in collaboration with F. Hirzebruch; with I. M. Singer, proved the index theorem concerning elliptic differential operators on compact differentiable manifolds, which was later seen to have applications to theoretical physics; Fields Medal, 1966; Abel Prize, 2004.
- Atwood, George** (1746–1807), English mathematician. Invented the Atwood machine.
- Audubon, John James** (1785–1851), Haitian-born American ornithologist and artist. Made drawings and paintings of birds and animals.
- Auger, Pierre Victor** (1899–1993), French physicist. Discovered the Auger effect.
- Avicenna** (979–1037), Arab physician. Wrote the medical text *Canon Medicinae*.
- Avogadro, Amedeo** (1776–1856), Italian physicist. Formulated Avogadro's law.
- Axel, Richard** (1946– ), American molecular biologist. Recognized along with Linda Buck for pioneering research of the olfactory system, which led to the discovery of the genes and proteins involved in the transmission of olfactory information. Later independent work clarified the cellular and molecular mechanisms underlying the olfactory system. Nobel Prize, 2004.
- Axelrod, Julius** (1912– ), American biochemist and pharmacologist. Showed that many drugs act by modifying storage of neurotransmitters at nerve terminals; made discoveries concerning metabolism, and mechanisms for formation and inactivation of norepinephrine; Nobel Prize, 1970.
- Ayrton, William Edward** (1847–1908), English physicist and electrical engineer. Invented the ammeter, voltmeter, and other electrical measuring instruments.

- Baade, Walter** (1893–1960), German-born American astronomer. Formulated concept of stellar populations; increased distance scale of universe by factor of 2.
- Babbage, Charles** (1792–1851), English mathematician. Devised a primitive computer to calculate and print mathematical and astronomical tables.
- Babcock, Harold Delos** (1882–1968) and **Horace Welcome** (1912–2003), American astronomers. Invented the Babcock magnetograph, observed weak solar magnetic fields, and discovered stellar magnetic fields.
- Babcock, Stephen Moulton** (1843–1931), American agricultural chemist. Pioneer in nutrition; devised the Babcock test to measure fat content in milk.
- Babinet, Jacques** (1794–1872), French physicist. Invented a polariscope and a goniometer.
- Back, Ernst E. A.** (1881–1959), German physicist. Developed improved spectrographs; made spectroscopic observations leading to Paschen-Back effect.
- Badger, Richard McLean** (1896–1974), American physical chemist and spectroscopist. Studied structures of polyatomic molecules; formulated Badger's rule concerning molecular bonds.
- Baekeland, Leo Hendrik** (1864–1944), Belgian-born, American chemist. Invented the phenol-formaldehyde polymer, Bakelite, the first commercial synthetic polymer.
- Baer, Karl Ernst von** (1792–1876), Estonian embryologist. Discovered the mammalian ovum and the notochord; developed the theory of embryonic germ layers.
- Baeyer, Johann Friedrich Wilhelm Adolf von** (1835–1917), German chemist. Synthesized indigo and hydroaromatic compounds; Nobel Prize, 1905.
- Baily, Francis** (1774–1844), English astronomer. A founder of the Royal Astronomical Society; first observed phenomenon of Baily's beads.
- Baire, René Louis** (1874–1932), French mathematician. Contributed to theory of functions of real variables; introduced concept of Baire functions.
- Baker, Alan** (1939– ), British mathematician. Proved a generalization of the Gelfond-Schneider theorem; from this work, generated transcendental numbers not previously identified and solved problems in the theory of Diophantine equations; Fields Medal, 1970.
- Balfour, Francis Maitlant** (1851–1882), English biologist. Founder of comparative embryology.
- Balmer, Johann Jakob** (1825–1898), Swiss physicist. Expressed the mathematical formula for frequencies of hydrogen lines in the visible spectrum.
- Baltimore, David** (1938– ), American virologist. Investigated interaction between ribonucleic acid tumor viruses and genetic material; independently of H. M. Temin, discovered reverse transcriptase; Nobel Prize, 1975.
- Banach, Stefan** (1892–1945), Polish mathematician. Laid foundations of contemporary functional analysis; introduced concept of Banach space and discovered its fundamental properties.
- Bang, Bernhard Laurits Frederik** (1848–1932), Danish veterinarian. Discovered method of eradicating bovine tuberculosis; discovered *Brucella abortus*, the agent of contagious abortion (Bang's disease) and brucellosis.
- Banting, Frederick Grant** (1891–1941), Canadian physician. With J. J. R. Macleod and C. H. Best, discovered insulin and its role in diabetes; Nobel Prize, 1923.
- Barány, Robert** (1876–1936), Austrian physician. Developed new methods of diagnosing ear diseases; Nobel Prize, 1914.
- Bardeen, John** (1908–1991), American physicist. With L. N. Cooper and J. R. Schrieffer, formulated a theory of superconductivity; invented the transistor; Nobel Prize, 1956 and 1972.
- Barkhausen, Heinrich Georg** (1881–1956), German electronic engineer and physicist. Contributed to theory and application of electron tubes; with K. Kurz, developed Barkhausen-Kurz oscillator; discovered Barkhausen effect.
- Barkla, Charles Glover** (1877–1944), English physicist. Described characteristics of x-rays and other short-wave emissions of elements.
- Barnard, Edward Emerson** (1857–1923), American astronomer. Discovered 16 comets, the fifth satellite of Jupiter, and dark nebulae; contributed to celestial photography.
- Barnett, Samuel Jackson** (1873–1956), American physicist. Discovered Barnett effect and used it to measure the gyromagnetic ratio of ferromagnetic materials; gave experimental proof of existence of ionosphere.
- Barr, Murray Llewellyn** (1908–1995), Canadian anatomist. Discovered the Barr body on the X chromosome of the human female.
- Bartholin, Kaspar** (1655–1738), Danish physician. Discovered Bartholin's glands of the vagina and a sublingual duct.
- Bartholin, Thomas** (1616–1680), Danish physician. Discovered lymphatic glands; described the lymphatic system.
- Bartlett, James Holly** (1904–2000), American physicist. Introduced concept of Bartlett force; did research on nuclear shell model, electrochemical potentiostat, and restricted three-body problem.
- Barton, Derek Harold Richard** (1918–1998), British chemist. Developed and expanded concept of conformation to include large molecules with complex ring systems; Nobel Prize, 1969.
- Basov, Nicolai Gennediyevich** (1922–2001), Soviet physicist. Conducted fundamental studies in quantum electronics; with A. M. Prokhorov, developed quantum optical generators; Nobel Prize, 1964.
- Bassham, James Alan** (1922– ), American chemist. Helped to elucidate basic photosynthetic carbon cycle.
- Bates, Henry Walter** (1825–1892), English naturalist. Discovered Batesian mimicry among butterflies and moths.
- Baudot, Émile** (1845–1903), French engineer. Invented an improved telegraph transmitter.
- Baumé, Antoine** (1728–1804), French chemist. Invented a graduated hydrometer which utilizes the Baumé scale.
- Bautz, Laura Patricia** (1940– ), American astronomer. Collaborated with W. W. Morgan in developing Bautz-Morgan classification of galaxy clusters.
- Bayer, Johann** (1572–1624), German astronomer. Charted 12 constellations; first to use Greek letters to designate the order of brightness of stars in a constellation.
- Bayes, Thomas** (1702–1761), English mathematician. Formulated a basis for statistical inference.
- Bayliss, William Maddock** (1860–1924), English physiologist. Did research on electrophysiology of heart action; discovered the hormone secretin.
- Beadle, George Wells** (1903–1989), American geneticist. With E. L. Tatum, proved that genes affect heredity by controlling cell chemistry; Nobel Prize, 1958.
- Beams, Jesse Wakefield** (1898–1977), American physicist. Developed vacuum-type ultracentrifuges, used in purification and molecular weight determination of large-molecular-weight substances, isotope separation, and determination of the gravitational constant.
- Beattie, James Alexander** (1895–1981), American chemist and physicist. Studied ionic theory and thermodynamics; with P. W. Bridgman, proposed Beattie and Bridgman equation for gases.
- Beaufort, Francis** (1774–1857), English hydrographer. Devised scale of wind velocity.
- Beaumont, William** (1785–1853), American physician. Did pioneering studies of digestion and gastric juices.
- Béchamp, Pierre Jacques Antoine** (1816–1908), French chemist. Discovered a method of preparing aniline.
- Beckmann, Ernst Otto** (1853–1923), German chemist. Discovered Beckmann molecular transformation; invented the Beckmann thermometer.
- Becquerel, Antoine César** (1788–1878), French physicist. Pioneer in electrochemistry; first to extract metals from ore by electrolysis.
- Becquerel, Antoine Henri** (1852–1908), French physicist. A discoverer of radioactivity in uranium.
- Bednorz, Johannes Georg** (1950–), German physicist. With K. A. Müller, discovered high-temperature superconductivity in copper oxide ceramic materials; Nobel Prize, 1987.
- Beebe, Charles William** (1877–1962), American naturalist. Pioneer in deep-sea exploration; made ornithological collections.
- Beer, August** (1825–1863), German physicist. Discovered Beer's law of light absorption.
- Behring, Emil Adolph von** (1854–1917), German bacteriologist. Produced diphtheria and tetanus antitoxins; Nobel Prize, 1901.
- Békésy, Georg von** (1889–1972), Hungarian-born American physicist. Studied hearing processes, especially inner-ear mechanics; Nobel Prize, 1961.
- Bell, Alexander Graham** (1847–1922), Scottish-born American inventor. Invented the telephone, pho-to-phonograph, graphophone, and one of the earliest gramophones.
- Bell, Charles** (1774–1842), Scottish anatomist. Discovered that sensory and motor nerves are anatomically and functionally distinct.
- Bellman, Richard Ernest** (1920–1984), American mathematician. Research in analytic number theory, differential equations, stochastic processes, dynamic programming, and mathematical biosciences; discovered Bellman's principle of optimality.
- Benacerraf, Baruj** (1920–), American immunologist. Discovered immune-response (I<sub>r</sub>) genes that control specific immune responses to thymus-dependent antigens; Nobel Prize, 1980.
- Benioff, Hugo** (1899–1968), American geophysicist. Investigated earthquakes, particularly through instrumental seismology.
- Bentham, George** (1800–1884), English botanist. With J. Hooker, wrote *Genera Plantarum*.
- Berg, Paul** (1926– ), American biochemist. Investigated the biochemistry of deoxyribonucleic acid (DNA) and designed a technique for gene splicing; Nobel Prize, 1980.
- Bergey, David Hendricks** (1860–1937), American bacteriologist. Authority on classification of bacteria.
- Bergius, Friedrich** (1884–1949), Polish-born German chemist. Developed Bergius process for hydrogenation of coal to a petroleumlike oil; Nobel Prize, 1931.
- Bergström, Sune Carl** (1916–2004), Swedish biochemist and medical scientist. Studied the metabolism of unsaturated fatty acids and determined the chemical structure of prostaglandins; Nobel Prize, 1982.
- Bernard, Claude** (1813–1878), French physiologist. Studied digestion; discovered that glycogen is produced by the liver.
- Berners-Lee, Tim** (1955– ), British-born physicist and software engineer. Proposed the World Wide Web, and then invented hypertext markup language (HTML), HyperText Transfer Protocol (HTTP), the Internet addressing scheme (Universal Resource Locator or URL), and the first Web browser.
- Bernoulli, Daniel** (1700–1782), Swiss mathematician born in the Netherlands. Founder of mathematical physics; worked on hydrodynamics and differential equations; formulated the Bernoulli equation.
- Bernoulli, Jacques or Jacob** (1654–1705), Swiss mathematician. Contributed to mathematics of curves, calculus, and probability; developed the Bernoulli number.
- Bernoulli, Jean or Johann** (1667–1748), Swiss mathematician. A founder of calculus of variations; contributed to exponential calculus, complex numbers, geodesics, and trigonometry.
- Berthelot, Pierre Eugène Marcellin** (1827–1907), French chemist. Founder of thermochemistry; first to synthesize organic compounds; demonstrated nitrogen fixation.
- Bertrand, Joseph Louis Francois** (1822–1900), French mathematician. Contributed to analysis, differential geometry, and probability theory.
- Berzelius, Jöns Jakob** (1779–1848), Swedish chemist. Discovered the elements cerium,

- selenium, thorium, and silicon; developed a system for classification and nomenclature of compounds.
- Bessel, Friedrich Wilhelm** (1784–1846), German astronomer and mathematician. Developed Bessel functions; determined parallax of the star 61 Cygni; postulated existence of Neptune and dark stars.
- Bessemmer, Henry** (1813–1898), English engineer. Invented the Bessemmer process, the first method for manufacturing steel on a large scale.
- Best, Charles Herbert** (1899–1978), Canadian physiologist and medical researcher. Associated with F. G. Banting and J. J. R. Macleod in the discovery of insulin.
- Bethe, Hans Albrecht** (1906– ), German-born American physicist. Formulated the theory of energy production in stars; research on nuclear physics; Nobel Prize, 1967.
- Bhabha, Homi Jehangir** (1909–1966), Indian physicist. With W. Heitler, developed theory of cascade showers of cosmic rays; observed slowing of decay rate of high-velocity mesons.
- Bianchi, Luigi** (1856–1928), Italian mathematician. Contributed to differential geometry and study of noneuclidean geometries; discovered Bianchi identity.
- Bichat, Marie François Xavier** (1771–1802), French anatomist and physiologist. Founder of animal histology; originated the term “tissues,” and distinguished 21 types in his particular scheme.
- Bieberbach, Ludwig** (1886–1982), German mathematician. Research on complex function theory, differential equations, geometry, and algebra; postulated Bieberbach’s conjecture.
- Bienaymé, Irénée Jules** (1796–1878), French mathematician. Studied calculus of probabilities and its application to financial science; with P. L. Chebyshev, discovered Bienaymé-Chebyshev inequality.
- Billet, Felix** (1808–1882), French physicist. Invented Billet split lens.
- Binet, Alfred** (1857–1911), French psychologist. Investigated development and measurement of intelligence.
- Binnig, Gerd** (1947– ), German physicist. With H. Rohrer, developed scanning tunneling microscope; Nobel Prize, 1986.
- Biot, Jean Baptiste** (1774–1862), French mathematician and physicist. Discovered circular polarization of light; invented a polariscope; with D. Brewster, discovered biaxial crystals; helped formulate Biot-Savart law.
- Birkhoff, George David** (1884–1944), American mathematician. Investigated differential equations, dynamical systems, ergodic theory, mechanics of fluids, and foundations of relativity and quantum mechanics.
- Bishop, John Michael** (1936– ), American virologist and biochemist. With H. Varmus, researched the genetic basis of human cancers; their work led to the identification of over 50 cellular genes that can become oncogenes; Nobel Prize, 1989.
- Bjerknes, Vilhelm Fremann Doren** (1862–1951), Norwegian physicist. Research on electric waves; originated the polar-front theory in meteorology.
- Black, James** (1924– ), British pharmacologist. Developed the first beta blocker drug, propranolol; also credited with the discovery of another important class of drugs, the H<sub>2</sub> antagonists; Nobel Prize, 1988.
- Black, Joseph** (1728–1799) Scottish physicist and chemist. Established the concepts of latent heat and specific heat, and discovered carbon dioxide.
- Blackett, Patrick Maynard Stuart** (1897–1974), English physicist. Built an improved cloud chamber used to photograph tracks of a nuclear disintegration and of a cosmic-ray shower; discovered the positron; Nobel Prize, 1948.
- Blobel, Günter** (1936– ), German-born American cell and molecular biologist. Discovered that proteins carry signals that help direct their movement among the organelles of the cell; Nobel Prize, 1999.
- Bloch, Felix** (1905–1983), Swiss-born American physicist. Discovered a technique for studying magnetism of atomic nuclei in normal matter; Nobel Prize, 1952.
- Bloch, Konrad Emil** (1912–2000), German-born American biochemist. Traced the transformations of fat and carbohydrate metabolites to cholesterol; Nobel Prize, 1964.
- Blodgett, Katharine Burr** (1898–1979), American chemical physicist. Studied surface science, and is best known for her work with Irving Langmuir and the development of the Langmuir-Blodgett film.
- Bloembergen, Nicolaas** (1920– ), Netherlands-born American physicist. Contributed to development of maser; made extensive contributions to theoretical and experimental development of nonlinear optics; Nobel Prize, 1981.
- Blumberg, Baruch Samuel** (1925– ), American physician and biologist. Research leading to a test for hepatitis viruses in blood and to an experimental hepatitis vaccine; Nobel Prize, 1976.
- Boas, Franz** (1858–1942), American anthropologist. Pioneered in physical anthropology; contributed to stratigraphic archeology in Mexico; emphasized importance of linguistic analysis.
- Bobillier, Étienne** (1798–1840), French mathematician and physicist. Contributed to geometry and statics; discovered Bobillier’s law.
- Bode, Johann Elert** (1747–1826), German astronomer. Prepared a celestial atlas showing about 17,000 stars; formulated Bode’s law.
- Boerhaave, Hermann** (1668–1738), Dutch physician. A great teacher at the University of Leyden; wrote the physiology textbook *Institutiones Medicae*.
- Bohm, David** (1917–1992), American-born British physicist. Research in quantum theory and new modes of description in physics.
- Bohr, Aage** (1922– ), Danish physicist. With B. R. Mottelson, developed theory which unifies shell and liquid-drop models of the atomic nucleus, and which explains nonspherical nuclei; Nobel Prize, 1975.
- Bohr, Niels** (1885–1962), Danish physicist. Devised an atomic model; codveloped the quantum theory, applying it to atomic structure in Bohr’s theory; Nobel Prize, 1922.
- Boltzmann, Ludwig Eduard** (1844–1906), Austrian physicist. An authority on the kinetic theory of gases; demonstrated the Stefan-Boltzmann law of blackbody radiation, Boltzmann’s law of energy, and the Boltzmann constant.
- Bolyai, János** (1802–1860), Hungarian mathematician. Independently of K. F. Gauss and N. I. Lobachevski, originated a system of noneuclidean geometry.
- Bolzano, Bernard** (1781–1848), Czechoslovakian philosopher, logician, and mathematician. Contributed to theory of real functions; proved Bolzano’s theorem and Bolzano-Weierstrass theorem.
- Bombieri, Enrico** (1940– ), Italian mathematician. Made major contributions to the study of prime numbers, partial differential equations and minimal surfaces, univalent functions and the local Bieberbach conjecture, and functions of several complex variables; Fields Medal, 1974.
- Bond, George Phillips** (1825–1865), American astronomer. Introduced concept of Bond albedo; pioneered astronomical photography.
- Boole, George** (1815–1864), English mathematician and logician. Developed new system of mathematical logic, which is known as Boolean algebra.
- Borchers, Richard Ewan** (1959– ), British mathematician. Worked in algebra and geometry; proved the moonshine conjecture, which relates the so-called monster group and elliptical curves, using methods borrowed from string theory in theoretical physics; Fields Medal, 1998.
- Borda, Jean Charles** (1733–1799), French physicist and mathematician. Introduced Borda mouthpiece; developed instruments for navigation, geodesy, and determination of weights and measures.
- Bordet, Jules Jean Baptiste Vincent** (1870–1961), Belgian physiologist. Made discoveries in immunology; with O. Gengou, developed the technique of the complement fixation reaction; Nobel Prize, 1919.
- Borel, Félix Edouard Émile** (1871–1956), French mathematician. Work in infinitesimal calculus and the calculus of probabilities.
- Born, Max** (1882–1970), German-born British theoretical physicist. Pioneered in the development of quantum mechanics; Nobel Prize, 1954.
- Bosch, Carl** (1874–1940), German chemist. Developed chemical high-pressure methods, and the Haber-Bosch process for ammonia synthesis; Nobel Prize, 1931.
- Bose, Jagadis Chandra** (1858–1937), Indian plant physiologist and physicist. Founded the Bose Research Institute in Calcutta; investigated photosynthesis, “nervous mechanism” of plants, and other plant subjects.
- Bose, Satyendra Nath** (1894–1974), Indian physicist. Originated Bose-Einstein statistics to describe photons.
- Bothe, Walter** (1891–1957), German physicist. Devised the coincidence method for the investigation of nuclear reactions and cosmic radiation; Nobel Prize, 1954.
- Bouguer, Pierre** (1698–1758), French geodesist, hydrographer, and physicist. Laid foundations of photometry; discovered Bouguer-Lambert law of light intensity.
- Bourdon, Eugène** (1808–1884), French inventor. Invented Bourdon pressure gage.
- Bourgain, Jean** (1954– ), Belgian mathematician. Worked in several areas of mathematical analysis, including the geometry of Banach spaces, convexity in high dimensions, harmonic analysis, ergodic theory, and nonlinear partial differential equations; Fields Medal, 1994.
- Boussinesq, Joseph Valentin** (1842–1929), French mathematical physicist. Research in hydrodynamics; introduced Boussinesq approximation.
- Bovet, Daniel** (1907–1992), Swiss-born Italian pharmacologist. Research on synthetic compounds that inhibit the action of the vascular system and skeletal muscles; Nobel Prize, 1957.
- Bowditch, Nathaniel** (1773–1838), American navigator and mathematician. Produced navigation guide; translated and improved P. S. de Laplace’s *Mécanique céleste*.
- Bowen, Norman Levi** (1887–1956), Canadian-born American geologist. Studied physical chemistry of geological processes and phase equilibria of silicates; discovered significance of reaction principle in petrogenesis.
- Boyer, Paul D.** (1918– ), American chemist. Made major contributions toward elucidating the enzymatic mechanism underlying the synthesis of adenosine triphosphate (ATP) by proposing the binding change mechanism; Nobel Prize, 1997.
- Boyle, Robert** (1627–1691), British physicist and chemist. Conducted experiments on properties of the air pump; his law concerning gases is named for him; advanced the atomistic theory of matter.
- Bradley, James** (1693–1762), English astronomer. Discovered aberration of light due to the Earth’s motion, and nutation of the Earth’s axis; prepared astronomical tables and star catalogs.
- Bragg, William Henry** (1862–1942), English physicist. Codeveloper, with W. L. Bragg, of the x-ray spectrometer; used x-ray diffraction to determine crystal structure; Nobel Prize, 1915.
- Bragg, William Lawrence** (1890–1971), British physicist. With W. H. Bragg, developed x-ray analysis of the atomic arrangement in crystalline structures; Nobel Prize, 1915.
- Brahe, Tycho or Tyge** (1546–1601), Danish astronomer. Made painstaking observations of the planetary system; wrote *Astronomiae Instauratae Progymnasmata*.
- Brattain, Walter Houser** (1902–1987), American physicist. Investigated properties of semiconductors; research on surface properties of solids; Nobel Prize, 1956.
- Braun, Karl Ferdinand** (1850–1918), German physicist. Research on cathode rays and wireless telegraphy; Nobel Prize, 1909.

- Bravais, Auguste** (1811–1863), French physicist. Studied relationship between crystal form and structure; derived Bravais lattices.
- Breit, Gregory** (1899–1981), Russian-born American physicist. Research on quantum theory, quantum electrodynamics, hyperfine structure, and ionosphere.
- Brenner, Sydney** (1927– ), South African-born British molecular biologist. Established the nematode *Caenorhabditis elegans* as an experimental model system for studying genetic regulation of cell division, cell specialization, and organ development in multicellular animals. Also credited with the identification of messenger ribonucleic acid (mRNA). Nobel Prize, 2002.
- Breuer, Josef** (1842–1925), Austrian neurologist. Evolved abreaction method for treatment of neuroses.
- Brewster, David** (1781–1868), Scottish physicist. Formulated Brewster's law on polarization of light; codiscoverer, with J. B. Biot, of biaxial crystals.
- Brianchon, Charles Julien** (1783–1864), French mathematician. Proved Brianchon's theorem.
- Bridgman, Percy Williams** (1882–1961), American physicist. Worked in high-pressure physics and thermodynamics of liquids; Nobel Prize, 1946.
- Briggs, Henry** (1561–1631), English mathematician. Prepared logarithmic tables (later known as common logarithms); devised sophisticated interpolation techniques.
- Bright, Richard** (1789–1858), English physician. Made biochemical study of disease; researched Bright's disease of the kidneys.
- Brillouin, Leon** (1889–1969), French physicist. With G. Wentzel and H. A. Kramers, developed Wentzel-Kramers-Brillouin method; originated concept of Brillouin zones.
- Brillouin, Louis Marcel** (1854–1948), French physicist. Work on crystal structure, viscosity of liquids and gases, radiotelegraphy, and relativity.
- Brinell, Johann August** (1849–1925), Swedish engineer. Invented the Brinell machine to measure the hardness of alloys and metals in terms of the Brinell number.
- Brockhouse, Bertram Neville** (1918–2003), Canadian physicist. Developed slow neutron spectroscopy technique for studying dynamics of atoms in solids and liquids; Nobel Prize, 1994.
- Broglie, Louis Victor de** (1892–1987), French physicist. Worked in nuclear physics; first to link wave and corpuscular theory; Nobel Prize, 1929.
- Bromwich, Thomas John l'Anson** (1875–1929), English mathematician. Showed how the Heaviside calculus could be developed in a manner acceptable to pure mathematicians through use of contour integrals.
- Brønsted, Johannes Nicolaus** (1879–1947), Danish chemist. Researched kinetic properties of ions, catalysis, and nitramide; formulated the Brønsted theory of acid-base reactions.
- Brown, Herbert Charles** (1912– ), British-born American chemist. Developed methods for chemical synthesis of diborane and organoboranes; Nobel Prize, 1979.
- Brown, Michael S.** (1941– ), American biochemist and geneticist. With Joseph L. Goldstein, discovered low-density lipoprotein receptors and their function in cholesterol metabolism; Nobel Prize, 1985.
- Browning, John Moses** (1855–1926), American inventor. Invented the Browning machine gun.
- Brun, Viggo** (1885–1978), Norwegian mathematician. Worked in number theory, introducing what is now known as the Brun's sieve, which made some progress in the resolution of such problems as Goldbach's conjecture and the twin prime problem.
- Brunauer, Stephen** (1903–1986), Hungarian-born American chemist. Contributed to surface and colloid chemistry; with P. H. Emmett and E. Teller, developed Brunauer-Emmett-Teller equation for surface area determinations.
- Brunel, Isambard Kingdom** (1806–1859), English engineer. Constructed great bridges in England; designed important steamships.
- Buchner, Eduard** (1860–1917), German chemist. Studied alcoholic fermentation of sucrose; Nobel Prize, 1907.
- Buck, Linda** (1947– ), American molecular biologist. Recognized along with Richard Axel for pioneering research of the olfactory system, which led to the discovery of the large gene family encoding the different odorant receptors located on the membrane of olfactory receptor cells. Later independent work clarified the olfactory system, from the molecular level to the organization of the cells. Nobel Prize, 2004.
- Buckingham, Edgar** (1867–1940), American physicist. Worked on thermodynamics and dimensional analysis; derived Buckingham's  $\pi$  theorem.
- Buffon, Georges Louis Leclerc, Comte de** (1707–1788), French naturalist. Compiled *Histoire Naturelle*, a monumental work on natural history.
- Bullen, Keith Edward** (1906–1976), Australian applied mathematician. Carried out mathematical studies of earthquake waves; with H. Jeffreys, prepared the Jeffreys-Bullen tables on seismic travel time.
- Bunsen, Robert Wilhelm** (1811–1899), German chemist. Discovered, with G. R. Kirchhoff, spectrum analysis; invented the Bunsen burner, Bunsen cell, and Bunsen ice calorimeter; formulated law of reciprocity with H. E. Roscoe.
- Burbank, Luther** (1849–1926), American horticulturist. Experimented on crossing and in-breeding of plant varieties.
- Burnet, Frank Macfarlane** (1899–1985), Australian immunologist. With P. B. Medawar, studied the body's tolerance of antigenic substances; Nobel Prize, 1960.
- Bush, Vannevar** (1890–1974), American electrical engineer. Originated the concept of hypertext.
- Butenandt, Adolph Friedrich Johann** (1903–1995), German chemist. Researched sex hormones; Nobel Prize (declined), 1939.
- Buys-Ballot, Christoph Hendrik Didericus** (1817–1890), Dutch meteorologist. Devised a system of storm signals; formulated Buys-Ballot's law for determination of wind direction.
- Byron, Augusta Ada, Countess of Lovelace** (1815–1852), English mathematician. Daughter of the poet Lord Byron; wrote the first program for Charles Babbage's analytical engine; often described as the first computer programmer.
- Cailletet, Louis Paul** (1832–1913), French chemist. Researched liquefaction of gases; first to obtain liquid oxygen, hydrogen, nitrogen, and air.
- Callendar, Hugh Longbourne** (1863–1930), English physicist and engineer. Developed platinum resistance thermometer and continuous-flow calorimeter.
- Callow, John Michael** (1867–1940), English-born American mining engineer and metallurgist. Invented Callow flotation cell and Callow screen.
- Calvin, Melvin** (1911–1997), American chemist. With J. A. Bassham, traced the path of carbon in photosynthesis; Nobel Prize, 1961.
- Cannizzaro, Stanislao** (1826–1910), Italian chemist. Promulgated Avogadro's work as related to atomic weights; discovered Cannizzaro's reaction in organic chemistry.
- Cantor, Georg** (1845–1918), Russian-born German mathematician. Founded set theory; introduced fundamental concepts in topology; worked on the theory and representations of real numbers.
- Carathéodory, Constantin** (1873–1950), German mathematician. Developed calculus of variations for curves with corners; introduced Carathéodory outer measure; gave mathematical formulation of second law of thermodynamics (Carathéodory's principle).
- Cardano, Geronimo, or Jerome Cardan** (1501–1576), Italian physician and mathematician. Wrote on algebra, medicine, and astronomy; invented the Cardan shaft.
- Carlsson, Arvid** (1923– ), Swedish pharmacologist. Did research on dopamine, leading to the discovery of its role as a key neurotransmitter in the brain and in the control of movement; the development of L-dopa, a precursor of dopamine, into a drug to treat Parkinson's disease; the elucidation of the mode of action of antipsychotic drugs, which affect synaptic transmission by blocking dopamine receptors; did work (along with that of Paul Greengard and Eric Kandel) leading to the elucidation of the molecular mechanisms involved in slow synaptic transmission in the nervous system; Nobel Prize, 2000.
- Carnot, Nicolas Léonard Sadi** (1796–1832), French physicist. Formulated Carnot's theorems in thermodynamics.
- Carrel, Alexis** (1873–1944), French surgeon and biologist. Worked on transplanting organs, suturing blood vessels, treating deep wounds, and prolonging tissue life; Nobel Prize, 1912.
- Carrington, Richard Christopher** (1826–1875), English astronomer. Investigated motions of sunspots.
- Carver, George Washington** (1864–1943), American botanist. Did research on industrial uses of the peanut.
- Cassegrain, N.** (17th century), French physician. Designed the Cassegrain reflecting telescope.
- Cassini, Jean Dominique** (1625–1712), Italian-born French astronomer. Director of the Paris Observatory; discovered four new satellites of Saturn and the Cassini division in Saturn's ring; conducted pendulum experiments related to the shape of the Earth.
- Castigliano, Carlo Alberto** (1847–1884), Italian structural engineer. Proved Castigliano's theorem.
- Cauchy, Augustin Louis, Baron** (1789–1857), French mathematician. Wrote extensively on wave propagation, calculus, and elasticity.
- Cavendish, Henry** (1731–1810), English physicist and chemist. Determined the density of the Earth and the composition of the atmosphere; studied properties of carbon dioxide and hydrogen.
- Cayley, Arthur** (1821–1895), English mathematician. Proposed the theory of matrices; developed the theory of invariants and covariants; worked on quantics and the theory of groups.
- Cech, Thomas R.** (1947– ), American chemist. By studying the single-cell organisms *Tetrahymena* and *Thermophila*, discovered that molecules of ribonucleic acid (RNA) have catalytic properties similar to those of enzymes; Nobel Prize, 1989.
- Celsius, Anders** (1701–1744), Swedish astronomer. Constructed the thermometer using the Celsius (centigrade) scale.
- Cerenkov, Pavel Alexeyevich** (1904–1990), Soviet physicist. Discovered the Cerenkov effect of radiation; devised the Cerenkov counter for particle detection; Nobel Prize, 1958.
- Cerf, Vinton G.** (1943– ), American computer scientist. Co-invented (with Robert E. Kahn) Transmission Control Protocol/Internet Protocol (TCP/IP).
- Cesalpino, Andrea** (1519–1603), Italian physician and botanist. First to attempt to classify plants according to characteristics of fruit and seed in his *De Plantis*.
- Cesàro, Ernesto** (1859–1906), Italian mathematician. Formulated an intrinsic geometry; introduced the Cesàro summation.
- Ceva, Giovanni** (1647?–1734), Italian mathematician. Formulated a theorem on the concurrency of straight lines passing through the vertices of a triangle.
- Chadwick, James** (1891–1974), English physicist. Established experimentally the existence of the neutron; Nobel Prize, 1935.
- Chain, Ernst Boris** (1906–1979), German-born British biochemist. With H. W. Florey, worked on the chemical structure of penicillin and its first clinical trials; Nobel Prize, 1945.
- Chamberlain, Owen** (1920– ), American physicist. With E. G. Segrè, demonstrated the existence of the antiproton; Nobel Prize, 1959.
- Chamberlin, Thomas Chrowder** (1843–1928), American geologist. Studied the fundamental geology of the solar system.
- Chandler, Seth Carlo** (1846–1913), American astronomer. Discovered the Chandler wobble.
- Chandrasekhar, Subrahmanyan** (1910–1995), Indian astrophysicist. Developed a theory of white dwarf stars; Nobel Prize, 1983.

- Chaplygin, Sergel Alekseevich** (1869–1942), Russian physicist, engineer, and mathematician. Made contributions to fluid mechanics, particularly aerodynamics.
- Chapman, Sydney** (1888–1970), English mathematician and physicist. Discovered (independently of D. Enskog) gaseous thermal diffusion; studied the daily variations of the geomagnetic field and magnetic storms.
- Chaptal, Jean Antoine Claude, Comte de Chanteloup** (1756–1832), French chemist. Wrote on technical chemistry; introduced the metric system after the Revolution.
- Charcot, Jean Martin** (1825–1893), French neurologist. Director of the Salpêtrière clinic, where he made systematic clinical studies of chronic nervous disorders, including cerebrospinal disease.
- Charles, Jacques Alexandre César** (1746–1823), French physicist, chemist, and inventor. Formulated Charles' law, relating gas volume to pressure.
- Chapak, Georges** (1924– ), French physicist. Invented the multiwire proportional chamber, used as a detector in high-energy physics experiments; Nobel Prize, 1992.
- Chebyshev, Pafnuti Lvovich** (1821–1894), Russian mathematician. Research on convergence of Taylor series, prime numbers, probability theory, quadratic forms, and integral theory.
- Chladni, Ernst Florenz Friedrich** (1756–1827), German physicist. Discovered Chladni's figures and used them to study vibrations of solid plates.
- Christoffel, Elwin Bruno** (1829–1900), Swiss mathematician. Worked in higher analysis, geometry, mathematical physics, and geodesy.
- Chu, Ching-Wu** (1941– ), Chinese-born American physicist. Discovered superconductivity at temperatures over 90 K (–298°F) in yttrium-barium-copper-oxygen compounds.
- Chu, Steven** (1948– ), American physicist. Developed a system of opposed laser beams to cool atoms to extremely low temperatures, and a magneto-optical trap to capture them; Nobel Prize, 1997.
- Ciechanover, Aaron** (1947– ), Israeli medical doctor and scientist. Discovered ubiquitin-mediated protein degradation; Nobel Prize, 2004.
- Clairaut, Alexis Claude** (1713–1765), French mathematician. Studied the shape of the Earth, evolving Clairaut's theorem; made astronomical calculations concerning Halley's comet.
- Claisen, Ludwig** (1851–1930), German organic chemist. Developed Claisen condensation; contributed to understanding of tautomerism; worked on rearrangement of allyl aryl ethers into phenols.
- Clapeyron, Benoit Paul Émile** (1799–1864), French engineer. Developed N. L. S. Carnot's concept of a universal function of temperature.
- Clarke, Alexander Ross** (1828–1914), British geodesist. Worked on the triangulation of the British Isles; proposed Clarke ellipsoids as geodetic standards.
- Claude, Albert** (1899–1983), American cytologist, born in Luxembourg. Pioneered in applying electron microscopy to cell studies and in using centrifuge to separate cell components; Nobel Prize, 1974.
- Clausius, Rudolf Julius Emmanuel** (1822–1888), German physicist. A founder of thermodynamics; worked out the Clausius-Clapeyron equation for the universal temperature function.
- Clebsch, Rudolf Friedrich Alfred** (1833–1872), German mathematician. Contributions to theory of invariants and algebraic geometry.
- Cockcroft, John Douglas** (1897–1967), English physicist. With E. T. S. Walton, split nuclei by bombarding them with accelerated protons.
- Cohen, Paul Joseph** (1934– ), American mathematician. Proved that the axiom of choice is independent of the other axioms of set theory, and that the continuum hypothesis is independent of the axiom of choice, a result with profound implications for the foundations of mathematics; Fields Medal, 1966.
- Cohen, Stanley** (1922– ), American biochemist. With R. Levi-Montalcini, made landmark studies of nerve growth factor and its functions; Nobel Prize, 1986.
- Cohen-Tannoudji, Claude** (1933– ), French physicist. Helped develop methods to cool and trap atoms with laser light, and explained how atoms could be cooled to temperatures lower than the previously calculated theoretical limits; Nobel Prize, 1997.
- Cohn, Ferdinand Julius** (1828–1898), German botanist. A founder of bacteriology; did research in plant pathology; first to classify bacteria according to genus and species.
- Cole, Kenneth Stewart** (1900–1984), American biophysicist. Research on structure and function of living cell membranes and nerve membranes in particular, concentrating on electrical approach; with brother, R. H. Cole, introduced Cole-Cole plot of dielectric behavior.
- Cole, Robert Hugh** (1914–1990), American chemist and physicist. Research on dielectric properties of matter and intermolecular forces; with brother, K. S. Cole, introduced Cole-Cole plot of dielectric behavior.
- Collins, Samuel Cornette** (1898–1984), American engineer. Invented Collins helium liquefier.
- Compton, Arthur Holly** (1892–1962), American physicist. Discovered the Compton effect of x-rays; studied cosmic rays; helped develop the atomic bomb; Nobel Prize, 1927.
- Conant, James Bryant** (1893–1978), American chemist. Researched free radicals, hemoglobin, and chlorophyll; contributed to atomic energy development.
- Condon, Edward Uhler** (1902–1974), American physicist. Contributed to the Franck-Condon principle, by extending and giving quantum-mechanical treatment to J. Franck's concept of nuclear motion to molecules in transition from one energy level to another.
- Connes, Alain** (1947– ), French mathematician. Did fundamental work on the theory and application of operator algebras, particularly von Neumann algebras; Fields Medal, 1982.
- Coolidge, William David** (1873–1975), American physicist. Invented Coolidge tube; discovered method for making tungsten strong and ductile.
- Cooper, Leon N.** (1930– ), American physicist. Showed that electrons could form Cooper pairs; with J. R. Schrieffer and J. Bardeen, formulated a theory of superconductivity; Nobel Prize, 1972.
- Copernicus, Nicolaus** (1473–1543), Polish (or Prussian) astronomer. Proposed the Copernican system, with the Sun as the center of planetary orbits.
- Corey, Elias James** (1928– ), American chemist. Developed theories and methods of organic chemical synthesis that have made possible the production of a wide variety of complex biologically active substances and useful chemicals; Nobel Prize, 1990.
- Cori, Carl Ferdinand** (1896–1984), and **Cori, Gerty Theresa Radnitz** (1896–1957), Czechoslovakian-born American biochemists. Discovered the enzymatic mechanism of glucose-glycogen interconversion and the effects of hormones on this mechanism; Nobel Prize, 1947.
- Coriolis, Gaspard Gustave de** (1792–1843), French physicist. Contributed to theoretical and applied mechanics; clarified and supplied concepts of work and kinetic energy; derived Coriolis acceleration.
- Cormack, Allan MacLeod** (1924–1998), American physicist. Contributed to the development of computerized axial tomography; Nobel Prize, 1979.
- Cornell, Eric Allin** (1961– ), American physicist. With C. E. Wieman, succeeded for the first time in producing Bose-Einstein condensates in a dilute gas of alkali (rubidium) atoms, and carried out fundamental studies of their properties, including studies of collective excitations and vortex formation in condensates; Nobel Prize, 2001.
- Corner, George Washington** (1889–1981), American medical biologist. Contributed to understanding of anatomical details of menstrual cycle and functions of estrogen and progesterone.
- Cornforth, John Warcup** (1917– ), Australian-born British chemist. Investigated stereochemistry of enzyme-catalyzed reactions; Nobel Prize, 1975.
- Cornu, Marie Alfred** (1841–1902), French physicist. Used Cornu spiral for determination of intensities in interference phenomena.
- Coster, Dirk** (1889–1950), Dutch physicist. Work in x-ray spectroscopy; with G. von Hevesy, discovered hafnium; with R. Kronig, discovered Coster-Kronig transitions.
- Cottrell, Frederick Gardner** (1877–1948), American chemist. Invented the Cottrell process for precipitation of particles from gas; researched nitrogen fixation, liquefaction of gases, and recovery of helium.
- Coulomb, Charles Augustin de** (1736–1806), French physicist. Formulated Coulomb's law of electric charges.
- Courant, Richard** (1888–1972), German-born American mathematician. Research in geometric function theory, differential equations of mathematical physics, and transition by limiting processes from finite difference equations to differential equations.
- Cournand, André Frédéric** (1895–1988), French-born American physician. Studied normal and abnormal human cardiovascular and pulmonary functions; Nobel Prize, 1956.
- Cowan, Clyde L., Jr.** (1919–1974), American physicist. With F. Reines, made first detection of the neutrino, a fundamental particle.
- Crafts, James Mason** (1839–1917), American chemist. With C. Friedel, discovered the Friedel-Crafts reaction, wherein anhydrous aluminum chloride acts as a catalyst.
- Cram, Donald J.** (1919–2001), American chemist. Expanded the field of crown ether chemistry by using crown ethers to synthesize structures that mimic the action of biological molecules; Nobel Prize, 1987.
- Cramer, Gabriel** (1704–1752), Swiss mathematician. Contributed to Cramer's rule for solving linear equations.
- Crick, Francis Harry Compton** (1916–2004), English molecular biologist. With J. D. Watson, proposed a double-helix structure for the deoxyribo-nucleic acid molecule; Nobel Prize, 1962.
- Cronin, James Watson** (1931– ), American physicist. Collaborated with V. L. Fitch on experiment showing that the principle of time-reversal invariance is violated in the decay of neutral *K* mesons; Nobel Prize, 1980.
- Cronstedt, Axel Fredrik, Baron** (1722–1765), Swedish mineralogist. Discovered nickel; developed a chemical classification system for minerals.
- Crookes, William** (1832–1919), English physicist and chemist. Invented Crookes tube to study electrical discharges in high vacuum, and a radiometer; discovered thallium.
- Cruzen, Paul J.** (1933– ), Dutch chemist. Demonstrated that nitrogen oxides react catalytically with ozone, thus accelerating the rate of reduction of the ozone layer; Nobel Prize, 1995.
- Curie, Marie, born Marya Skłodowska** (1867–1934), Polish physical chemist in France. Explored nature of radioactivity; codiscoverer of radium, and first to separate polonium; Nobel Prize, 1903 and 1911.
- Curie, Pierre** (1859–1906), French chemist and physicist. Codiscoverer of radium; formulated the Curie point, relating magnetic properties and temperature; discovered the piezoelectric effect; Nobel Prize, 1903.
- Curl, Robert F., Jr.** (1933– ), American chemist. Made major contributions toward the discovery of fullerenes; Nobel Prize, 1996.
- Cushing, Harvey** (1869–1930), American surgeon. Innovator in neurosurgical techniques; research on function and diseases of the pituitary gland.
- Cuvier, Georges Léopold Chrétien Frédéric Dagobert, Baron** (1769–1838), French naturalist. Made a detailed classification of the animal kingdom; wrote on comparative anatomy.

- Daguerre, Louis Jacques Mandé** (1787–1851), French inventor. Invented the daguerreotype photographic process.
- Dale, Henry Hallett** (1875–1968), British pharmacologist and physiologist. Isolated acetylcholine and recognized its effect to be similar to that brought about by parasympathetic nerves; Nobel Prize, 1936.
- Dalén, Nils Gustaf** (1869–1937), Swedish physicist. Invented automatic gas lighting for unsuper-vised lighthouses and railroad signals; Nobel Prize, 1912.
- Dalitz, Richard Henry** (1925– ), Australian-born British theoretical physicist. Research on properties of mesons and baryons and nuclear interactions of the lambda hyperon; proposed models for elementary particles; introduced the Dalitz plot.
- Dalton, John** (1766–1844), English chemist and physicist. Proposed the atomic theory of chemical reactions; developed the law of partial pressures of gases; studied color-blindness.
- Dam, Carl Peter Henrik** (1895–1976), Danish biochemist and nutritionist. Discovered vitamin K and studied its role in human hemorrhagic disease; Nobel Prize, 1943.
- Danckwerts, Peter Victor** (1916–1984), British chemical engineer. Proposed the surface-renewal model of liquids.
- Daniell, John Frederic** (1790–1845), English physicist and chemist. Invented the Daniell cell.
- Darwin, Charles Robert** (1809–1882), English naturalist. Proposed far-reaching theory of evolution of species and theory of natural selection in his *Origin of Species*.
- Darwin, George Howard** (1845–1912), English mathematician and astronomer. Applied detailed dynamical analysis to cosmological and geological problems.
- Dausset, Jean** (1916– ), French biologist and medical scientist. Studied antigen in human leukocytes and their role in transplant acceptance or rejections; Nobel Prize, 1980.
- Davis, Raymond, Jr.** (1914– ), American physicist. Developed pioneering experiments to detect solar neutrinos, and observed deficit in their number. Nobel Prize, 2002.
- Davison, Clinton Joseph** (1881–1958), American physicist. Studied magnetism, radiant energy, and electricity; independent of G. P. Thomson, discovered electron diffraction by crystals; Nobel Prize, 1937.
- Davy, Humphry** (1778–1829), English chemist. Discovered potassium and sodium; invented the Davy safety lamp for use in coal mines; proposed theoretical explanations of electrolysis and voltaic action.
- Debye, Peter Joseph William** (1884–1966), American physical chemist born in the Netherlands. Worked on dipole moments and the diffraction of x-rays in gases; formulated Debye-Hückel theory on the behavior of strong electrolytes; Nobel Prize, 1936.
- Dedekind, Julius Wilhelm Richard** (1831–1916), German mathematician. Worked in number theory and analysis, particularly with algebraic integers, algebraic functions, and ideals; defined real numbers by Dedekind cuts.
- de Duve, Christian René** (1917– ), Belgian biochemist and cytologist. Refined centrifuge technique for studying cell components; discovered lysosomes; Nobel Prize, 1974.
- De Forest, Lee** (1873–1961), American inventor. Pioneer in radio technology; invented audio amplifier and the four-electrode valve; incorporated the grid into the thermionic valve.
- de Gennes, Pierre-Gilles** (1932– ), French physicist. Applied physical principles to the study of complex systems, including liquid crystals and polymers; Nobel Prize, 1991.
- de Haas, Wander Johannes** (1878–1960), Dutch physicist. Demonstrated the Einstein-de Haas effect; worked on production of extremely low temperatures by adiabatic demagnetization; with P. Van Alphen, discovered de Haas-Van Alphen effect.
- Dehmelt, Hans Georg** (1922– ), German-born American physicist. Developed the Penning trap, which uses magnetic and electric fields to hold ions in a small volume; used the traps to isolate a single electron and carry out extremely accurate measurements of atomic properties; Nobel Prize, 1989.
- Deisenhofer, Johann** (1943– ), German chemist. With R. Huber and M. Hartmut, elucidated the structure of a bacterial protein that performs photosynthesis; Nobel Prize, 1988.
- Delbruck, Max** (1906–1981), German-born American biologist. Pioneered in molecular biology; research on bacterial viruses; Nobel Prize, 1969.
- Deligne, Pierre René** (1944– ), Belgian mathematician. Solved three conjectures of A. Weil concerning generalizations of the Riemann hypothesis to finite fields—work which brought together algebraic geometry and algebraic number theory; Fields Medal, 1978.
- Demoivre, Abraham** (1667–1754), French-born English mathematician. Originated two theorems on expansions of trigonometrical expansions; proposed methods to approximate functions of large numbers, and the concept of the normal distribution curve.
- De Morgan, Augustus** (1806–1871), English mathematician. Wrote textbooks and treatises on arithmetic, algebra, and trigonometry; formulated the De Morgan theorem.
- Desargues, Gérard** (1593–1662), French mathematician. A founder of modern geometry; proposed the theory of involution and transversals.
- Descartes, René** (1596–1650), French mathematician. Originated cartesian, or coordinate, geometry.
- de Sitter, Willem** (1872–1934), Dutch astronomer. Worked on the application of Einstein's theory to the problems of the universe; computed the size of the universe.
- De Vries, Hugo** (1848–1935), Dutch botanist. Formulated the mutation theory of evolution.
- Dewar, James** (1842–1923), British chemist. Made pioneering studies of matter at low temperatures; first to liquefy hydrogen; invented the Dewar vacuum flask.
- Dick, George Frederick** (1881–1967), American physician and bacteriologist. Isolated scarlet fever streptococci, developed scarlet fever streptococcus antitoxin, and developed Dick test.
- Dicke, Robert Henry** (1916–1997), American physicist. Developed new relativistic theory of gravitation with C. Brans; investigated cosmic blackbody radiation; worked on development of radar.
- Diels, Otto Paul Hermann** (1876–1954), German chemist. Codiscoverer of the Diels-Alder reaction (diene synthesis); worked on sterol chemistry; discovered carbon suboxide; Nobel Prize, 1950.
- Diesel, Rudolf** (1858–1913), German inventor. Designed and built the diesel engine.
- Deisenhofer, Johann** (1943– ), German chemist. With R. Huber and M. Hartmut, elucidated the structure of a bacterial protein that performs photosynthesis; Nobel Prize, 1988.
- Diocles** (2d century B.C.), Greek mathematician. Contributions to theory of conics and geometry.
- Diophantus of Alexandria** (3d century), Greek mathematician. Known as the father of algebra; the first to use conventional algebraic notation.
- Dirac, Paul Adrien Maurice** (1902–1984), English physicist. Worked in quantum mechanics; his theory of negative-energy holes predicted existence of the positron; Nobel Prize, 1933.
- Dirichlet, Peter Gustave Lejeune** (1805–1859), German mathematician. Applied higher analysis to the theory of numbers; work on definite integrals.
- Djerassi, Carl** (1923– ), Austrian-born, American chemist. Synthesized the first oral contraceptive.
- Dobzhansky, Theodosius** (1900–1975), Russian-born American biologist. Elucidated the mechanisms of heredity and variation through studies of *Drosophila*.
- Doherty, Peter C.** (1940– ), Australian-born American immunologist. Collaborated with R. M. Zinkerngael in the discovery of specificity of cell-mediated immune defense; Nobel Prize, 1996.
- Dolsy, Edward Adelbert** (1893–1986), American biochemist. Isolated pure crystalline compounds important to human health, such as sex hormones and vitamins; Nobel Prize, 1943.
- Domagk, Gerhard** (1895–1964), German biochemist. Discovered sulfamidocryosidin, the first synthetic microbial of broad clinical usefulness. Nobel Prize (declined), 1939.
- Donaldson, Simon Kirwan** (1957– ), British mathematician. Worked on topology of four-manifolds and showed that there exist exotic four-spaces, that is, four-dimensional differentiable manifolds that are topologically but not differentially equivalent to the standard Euclidean four-space; Fields Medal, 1986.
- Donati, Giovanni Battista** (1826–1873), Italian astronomer. Studied stellar spectra; discovered six comets.
- Donnan, Frederick George** (1870–1956), Irish chemist born in Ceylon. Research in chemical kinetics; originated the Donnan theory of membrane equilibrium.
- Doppler, Christian Johann** (1803–1853), Austrian physicist and mathematician. Formulated Doppler's principle, relating the frequency of wave motion to velocity; described the Doppler effect.
- Douglas, Jesse** (1897–1965), American mathematician. Solved the Plateau problem (the problem of determining the existence of a minimal surface with a given space curve as its boundary) about the same time as T. Radó and studied generalizations of this problem; Fields Medal, 1936.
- Drake, Frank Donald** (1930– ), American astronomer. Research on solar system, 21-centimeter radio line, search for extraterrestrial intelligence (introduced Drake equation), and radio telescope development.
- Draper, Henry** (1837–1882), American scientist. Research in spectroscopy; the Draper catalog is named in his honor.
- Drinfeld, Vladimir Gershonovich** (1954– ), Ukrainian mathematician. Worked in algebraic geometry, number theory, and the theory of quantum groups; proved a special case of the Langlands conjecture; Fields Medal, 1990.
- Drude, Paul Karl Ludwig** (1863–1906), German physicist. Attempted to correlate and account for optical, electrical, thermal, and chemical properties of substances; developed theory of properties of metals based on free electrons treated as a gas.
- Duane, William** (1872–1935), American physicist and radiologist. Developed treatment of cancer by radioisotopes and x-rays; with F. L. Hunt, discovered Duane-Hunt law of x-rays.
- Du Bois-Reymond, Emil** (1818–1896), German physiologist. Pioneer work in electrical properties of living tissues, especially nerves.
- DuBridge, Lee Alvin** (1901–1994), American physicist. Developed Fowler-DuBridge theory of photoelectric emission.
- Ducrey, Augusto** (1860–1940), Italian dermatologist. Discovered *Hemophilus ducreyi*, the agent of chancroid.
- Dufay, Charles François de Cisternay** (1698–1739), French chemist. Discovered positive and negative types of electricity.
- Dulbecco, Renato** (1914– ), Italian-born American virologist. Developed techniques for studying animal viruses; investigated interaction between deoxyribonucleic acid tumor viruses and genetic material; Nobel Prize, 1975.
- Dulong, Pierre Louis** (1785–1838), French chemist and physicist. With A. T. Petit, formulated the law of the constancy of atomic heats; developed the Dulong formula for heat value of fuels.
- Dumas, Jean Baptiste André** (1800–1884), French chemist. Research on organic compounds; determined many atomic weights.
- Dürer, Albrecht** (1471–1528), German painter, graphic artist, and mathematician. Work on scientific perspective and mathematical proportion.
- du Vigneaud, Vincent** (1901–1978), American biochemist. Synthesized a polypeptide hormone, oxytocin; worked on other biologically important sulfur compounds; Nobel Prize, 1955.

- Eccles, John Carew** (1903–1997), Australian physiologist. Elucidated the action of nerve impulses across zones of close contact between nerve cells; Nobel Prize, 1963.
- Eddington, Arthur Stanley** (1882–1944), English astronomer and writer. Theoretical research on stellar movements and internal makeup of stars; wrote on theory of relativity.
- Edelman, Gerald Maurice** (1929– ), American biochemist. Worked to determine chemical structure of immunoglobulins; Nobel Prize, 1972.
- Edison, Thomas Alva** (1847–1931), American electrician and inventor. Invented the gramophone, carbon transmitter for the telephone, incandescent electric lamp, moving pictures, and the duplex method of telegraphy.
- Ehrenfest, Paul** (1880–1933), Austrian-born Dutch theoretical physicist. Contributed to statistical mechanics and quantum mechanics; developed Ehrenfest's principle; proved Ehrenfest's theorem.
- Ehrlich, Paul** (1854–1915), German bacteriologist. Research in chemotherapy, notably the discovery of Salvarsan for treatment of syphilis; pioneered in the study of hematology and immunity; Nobel Prize, 1908.
- Eigen, Manfred** (1927– ), German chemist. Devised relaxation techniques to study high-speed chemical reactions; Nobel Prize, 1967.
- Eijkman, Christiaan** (1858–1930), Dutch physician. Studied dietary deficiency disease, in particular beriberi; Nobel Prize, 1929.
- Einstein, Albert** (1879–1955), German-born American physicist. Proposed the theory of relativity; extended the application of quantum theory; Nobel Prize, 1921.
- Einthoven, Willem** (1860–1927), Dutch physiologist born in Java. Used the string galvanometer to record electrical activity of the heart, thereby inventing the electrocardiograph; Nobel Prize, 1924.
- Elion, Gertrude Belle** (1918–1999), American biochemist. With G. H. Hitchings, pioneered research that led them to the development of drugs for the treatment of leukemia, malaria, gout, herpes, bacterial and fungal infections, and autoimmune diseases and organ-transplant rejection; Nobel Prize, 1988.
- Elsasser, Walter Maurice** (1904–1991), German-born American geophysicist. Formulated the dynamo theory of the Earth's permanent terrestrial magnetic force.
- Elster, Johann Philipp Ludwig Julius** (1854–1920), German experimental physicist. With H. F. Geitel, studied atmospheric electricity, radioactivity, and photoelectricity, and invented photocell.
- Emmett, Paul Hugh** (1900–1985), American chemist. Worked on catalysts for ammonia synthesis and the water-gas conversion reaction; with S. Brunauer and E. Teller, formulated Brunauer-Emmett-Teller equation for surface area determinations.
- Encke, Johann Franz** (1791–1865), German astronomer. Determined period of revolution of Encke's comet, discovered by J. L. Pons; measured the distance of the Sun from the Earth.
- Enders, John Franklin** (1897–1985), American microbiologist. With F. C. Robbins and T. H. Weller, discovered the capacity of poliomyelitis virus to grow in various tissue cultures; Nobel Prize, 1954.
- Enskog, David** (1884–1947), Swedish physicist. With S. Chapman, developed the Chapman-Enskog theory for solving the Boltzmann transport equation.
- Eötvös, Roland, Baron** (1848–1919), Hungarian physicist. Research on gravitation and terrestrial magnetism; formulated a law which relates surface tension to temperature of liquids; designed the Eötvös torsion balance.
- Erasistratus** (3d century B.C.), Greek physician and anatomist. Founder of physiology; distinguished between the cerebrum and cerebellum, and sensory and motor nerves.
- Eratosthenes** (3d century B.C.), Greek astronomer. Suggested an extra day in the calendar every fourth year; made a determination of the size of the Earth; measured obliquity of the ecliptic.
- Erdős, Paul** (1913–1996), Hungarian mathematician. Did wide-ranging work in algebra, analysis, combinatorial theory, geometry, topology, number theory, and graph theory; with A. Selberg, gave an elementary proof of the prime number theorem.
- Erlanger, Joseph** (1874–1965), American physiologist. With H. S. Gasser, created new methods for amplifying and recording electrical impulses in nerves; research on the function of the synapse; Nobel Prize, 1944.
- Erlenmeyer, Richard August Carl Emil** (1825–1909), German organic chemist. Research on synthesis and constitution of aliphatic compounds; introduced modern structural notation; invented Erlenmeyer flask.
- Ernst, Richard R.** (1933– ). Swiss chemist. Developed methods that transformed nuclear magnetic resonance (NMR) spectroscopy from a tool with a narrow application to a key analytical technique in chemistry as well as many other fields; Nobel Prize, 1991.
- Esaki, Leo** (1925– ), Japanese physicist. Discovered a new negative-resistance characteristic in semiconductor *pn* junctions, leading to the discovery of the tunnel, or Esaki, diode; Nobel Prize, 1973.
- Euclid** (ca. 330-ca. 275 B.C.), Greek mathematician. Wrote geometry textbooks; euclidean geometry is named after him.
- Eudoxus of Cnidus** (ca. 408-ca. 355 B.C.). Greek astronomer and mathematician. Expounded theory of motion of planets based on homocentric spheres; developed theory of proportions and methods of measuring areas and volumes of geometrical figures.
- Euler, Leonhard** (1707–1783), Swiss mathematician. Contributed to algebraic series and differential and integral calculus; realized the significance of coefficients (Euler numbers) of certain trigonometrical expansions.
- Euler-Chelpin, Hans Karl August Simon von** (1873–1964), German-Swedish chemist. Research on enzyme action and fermentation of sugars; Nobel Prize, 1929.
- Ewald, Paul Peter** (1888–1985), German-born American physicist. Developed dynamic theory of x-ray interference in crystals.
- Ewing, William Maurice** (1906–1974), American geophysicist. Made fundamental contributions to seismology, geodesy, oceanography, and submarine geology.
- Eyring, Henry** (1901–1981), Mexican-born American chemist. Pioneered in the application of quantum and statistical mechanics to chemistry; conceived the theory of absolute reaction rates and the significant structures theory of liquids.
- Fabrizius, Hieronymus, or Girolamo Fabrizio** (ca. 1533–1619), Italian anatomist. Made painstaking descriptions of valves in veins; did comparative research in animal embryology.
- Fabry, Charles** (1867–1945), French physicist. With A. Pérot, invented Fabry-Pérot interferometer; experimentally verified Doppler broadening and Doppler effect.
- Fahrenheit, Gabriel Daniel** (1686–1736), German physicist. Constructed thermometers; invented the Fahrenheit temperature scale.
- Fallopio, Gabriele** (1523–1562), Italian anatomist. Discovered Fallopian tubes; gave first clear description of organs of inner and middle ear.
- Faltings, Gerd** (1954– ), German mathematician. Used methods of arithmetic algebraic geometry to prove the Mordell conjecture, which states that there are only finitely many rational points on a curve of genus greater than 1; this was a step toward the later proof of Fermat's last theorem by A. Wiles; Fields Medal, 1986.
- Fanning, John Thomas** (1837–1911), American civil engineer. Designed water works and water supply systems.
- Faraday, Michael** (1791–1867), English chemist and physicist. Discovered electromagnetic induction; formulated two laws of electrolysis; invented the dynamo.
- Fechner, Gustav Theodor** (1801–1887), German psychologist. Founded psychophysics; developed the Fechner law concerning intensity of sensation produced by a stimulus.
- Fefferman, Charles Louis** (1949– ), American mathematician. Worked in Fourier analysis, partial differential equations, and the theory of functions of several complex variables; discovered the dual of the Hardy space  $H^1$ ; Fields Medal, 1978.
- Feit, Walter** (1930–2004), Austrian-born American mathematician. Worked in group theory; with J. G. Thompson, proved that all noncyclic finite simple groups have even order.
- Fenn, John B.** (1917– ), American chemist. Developed soft desorption ionization method for mass spectrometric analyses of biological macromolecules; Nobel Prize, 2002.
- Fermat, Pierre de** (1601–1665), French mathematician. Founder of the modern theory of numbers; originated Fermat's last theorem, and Fermat's principle in optics.
- Fermi, Enrico** (1901–1954), Italian-born American physicist. Research on producing radioactive isotopes by neutron bombardment; directed construction of the first atomic pile; Nobel Prize, 1938.
- Feynman, Richard Phillips** (1918–1988), American physicist. Proposed a theory to eliminate difficulties that had arisen in the study of the interaction of electrons, positrons, and radiation; Nobel Prize, 1965.
- Fibiger, Johannes Andreas Grib** (1867–1928), Danish pathologist. First to produce cancer experimentally; Nobel Prize, 1926.
- Finsen, Niels Ryberg** (1860–1904), Danish physician. Originated ultraviolet light therapy for certain diseases; Nobel Prize, 1903.
- Fischer, Edmond H.** (1920– ), American biochemist. With E. G. Krebs, discovered phosphorylation processes that play a critical role in cell-protein regulation; they isolated the first protein kinase, a class of enzymes that transfer phosphate from adenosinetriphosphate to proteins; Nobel Prize, 1992.
- Fischer, Emil Hermann** (1852–1919), German chemist. Synthesized many natural substances, including purines, D-glucose and other sugars, and the first nucleotide; studied polypeptides and proteins; Nobel Prize, 1902.
- Fischer, Ernst Otto** (1918– ), German chemist. Studied how metals and organic molecules combine to form unique molecules with sandwichlike structures; Nobel Prize, 1973.
- Fischer, Hans** (1881–1945), German organic chemist. Investigated and synthesized pyrrole pigments; studied structure of chlorophylls; Nobel Prize, 1930.
- Fisher, Ronald Aylmer** (1890–1962), English geneticist and statistician. Developed statistical techniques for analysis of variance, and for use and validation of small samples; developed theory of the evolution of dominance.
- Fitch, Val Logsdon** (1923– ), American physicist. Collaborated with J. W. Cronin on experiment showing that the principle of time-reversal invariance is violated in the decay of neutral *K* mesons; Nobel Prize, 1980.
- FitzGerald, George Francis** (1851–1901), Irish physicist. Proposed Lorentz-FitzGerald contraction, relating to a material moving through an electromagnetic field.
- Fizeau, Armand Hippolyte Louis** (1819–1896), French physicist. First to accurately measure the velocity of light; conducted experiments on the velocity of electricity, use of light wavelength to measure length, and measurement of diameter of stars through the method of interference.
- Flamsteed, John** (1646–1719), English astronomer. Made a trustworthy catalog of stars; invented conical projection in mapmaking.
- Fleming, Alexander** (1881–1955), British bacteriologist. Discovered lysozyme and penicillin; Nobel Prize, 1945.
- Fleming, John Ambrose** (1849–1945), English electrical engineer. Invented the thermionic valve; contributed to widespread application of electric lighting and heating.

- Florey, Howard Walter** (1898–1968), British pathologist born in Australia. Contributed, with E. B. Chain, to development of penicillin as a chemotherapeutic agent; Nobel Prize, 1945.
- Flory, Paul John** (1910–1985), American physical chemist. Developed analytic techniques to explore properties and molecular structures of long-chain molecules; Nobel Prize, 1974.
- Fock (Fok), Vladimir Alexandrovitch** (1898–1974), Soviet theoretical physicist. Contributions to quantum electrodynamics, quantum field theory, electromagnetic diffraction and propagation, and general relativity; developed Hartree-Fock approximation of wave functions.
- Forbush, Scott Ellsworth** (1904–1984), American geophysicist. Discovered the worldwide decrease in cosmic-ray intensity associated with some magnetic storms.
- Forssmann, Werner Theodor Otto** (1904–1979), German physician. Developed the technique of cardiac catheterization; Nobel Prize, 1956.
- Foucault, Jean Bernard Léon** (1819–1868), French physicist. Accurately determined the velocity of light; constructed the Foucault pendulum and the Foucault prism; determined experimentally the rotation of the Earth.
- Fourier, Jean Baptiste Joseph, Baron** (1768–1830), French geometer and physicist. Proposed the Fourier series on arbitrary functions; formulated the law of heat propagation.
- Fowler, Ralph Howard** (1889–1944), English physicist. Applied statistical mechanics to matter at high temperatures and high pressures; explained structure of white dwarf stars; with E. A. Guggenheim, R. F. Peierls, and others, developed Ising model.
- Fowler, William Alfred** (1911–1995), American physicist. Fundamental contributions to understanding of nuclear reactions that generate the energy of stars and synthesize the elements of the universe; Nobel Prize, 1983.
- Franck, James** (1882–1964), German physicist. With G. Hertz, studied energy transfer in collisions of molecules; formulated Franck-Condon principle of transition from one energy state to another; Nobel Prize, 1925.
- Frank, Ilya Mikhailovich** (1908–1990), Soviet physicist. With I. Y. Tamm, proposed a theoretical interpretation of Cerenkov radiation; Nobel Prize, 1958.
- Franklin, Benjamin** (1706–1790), American physicist, oceanographer, meteorologist, and inventor. Formulated a theory of general electrical “action”; introduced principle of conservation of charge; showed that lightning is an electrical phenomenon; invented lightning rod.
- Fraunhofer, Joseph von** (1787–1826), German optician and physicist. First to study the dark lines in the solar spectrum (Fraunhofer lines); invented a heliometer; improved the spectroscope.
- Fredholm, Eric Ivar** (1866–1927), Swedish mathematician. Developed the theory of integral equations (Fredholm equations).
- Freedman, Michael Hartley** (1951– ), American mathematician. Developed new methods for topological analysis of four-manifolds and applied them to prove the Poincaré conjecture for dimension 4; Fields Medal, 1986.
- Frenet, Jean Frédéric** (1816–1900), French mathematician. Helped to develop Frenet-Serret formulas.
- Frenkel, Yakov Ilyich** (1894–1954), Soviet physicist. Pioneered in modern atomic theory of solids; developed quantum-mechanical explanations for electron mean free path in metals, and for paramagnetism and ferromagnetism; postulated excitons, Frenkel excitons, and Frenkel defects.
- Fresnel, Augustin Jean** (1788–1827), French physicist. Investigated effects (Fresnel’s fringes) due to the interference of light; developed a wave theory of light; originated Fresnel’s reflection formula.
- Freud, Sigmund** (1856–1939), Austrian psychoanalyst. Founder of psychoanalysis, with emphasis on dream interpretation and free association; developed a theory of personality involving id, ego, and superego, and stressing importance of the libido.
- Friedel, Charles** (1832–1899), French chemist and mineralogist. With J. M. Crafts, described the Friedel-Crafts reaction; work on artificial production of minerals; studied crystals, ketones, and aldehydes.
- Friedman, Jerome Isaac** (1930– ), American physicist. Collaborated in experiments that demonstrated that protons, neutrons, and similar particles are made up of quarks; Nobel Prize, 1990.
- Frisch, Karl von** (1886–1982), Austrian zoologist. Discovered means by which bees communicate information about the distance and direction of food; Nobel Prize, 1973.
- Frobenius, Georg Ferdinand** (1849–1917), German mathematician. Developed representation theory of finite groups and method for solving linear homogeneous ordinary differential equations.
- Froude, William** (1810–1879), English engineer. Discovered the Froude law of comparison, concerning the towing of an object in a liquid.
- Fubini, Guido** (1879–1943), Italian mathematician. Worked in algebra, analysis, and differential projective geometry; proved Fubini’s theorem.
- Fukui, Kenichi** (1918–1998), Japanese chemist. Developed frontier orbital theory, a quantum-mechanical model useful in prediction of the combinative properties of molecules; Nobel Prize, 1981.
- Fuller, R. Buckminster** (1895–1983), American engineer and architect. Designed geodesic dome; the carbon molecular form  $C_{60}$  was named buckminsterfullerene because of its structured resemblance to the geodesic dome, and the name fullerene was given to any closed-cage molecule containing an even number of carbon atoms.
- Furchgott, Robert F.** (1916– ), American pharmacologist. Discovered endothelium-derived relaxing factor (EDRF), a signaling molecule in the cardiovascular system that makes vascular smooth muscle cells relax (Louis J. Ignarro, working independently and with Furchgott, later concluded that EDRF was nitric oxide); Nobel Prize, 1998.
- Gabor, Dennis** (1900–1979), Hungarian-born British physicist and engineer. Invented holography; Nobel Prize, 1971.
- Gajdusek, Daniel Carleton** (1923– ), American physician and virologist. Discovered causal virus and transmission mechanism of kuru; Nobel Prize, 1976.
- Galen** (2d century), Greek physician and medical writer. Wrote treatises long used as textbooks; experimented on animal nervous systems; made anatomical descriptions of structure and functions of body parts.
- Galileo Galilei** (1564–1642), Italian astronomer. First to use the telescope for observational purposes; made many discoveries related to the planets and the Sun; did theoretical work on classical physics.
- Galois, Evariste** (1811–1832), French mathematician. Developed Galois theory of polynomials.
- Gamow, George** (1904–1968), Russian-born American physicist. Made theoretical contributions to nuclear physics, astronomy, and biology; with E. Teller, formulated the selection rule for beta emission; proposed theoretically the genetic code.
- Garvey, Gerald Thomas** (1935– ), American physicist. Research in experimental nuclear physics, particularly nuclear reactions, isobaric spin studies, and weak interactions in nuclear systems.
- Gasser, Herbert Spencer** (1888–1963), American physiologist. With J. Erlanger, provided a new method for recording electrical impulses of nerves; studied functions of nerve fibers; Nobel Prize, 1944.
- Gatterman, Friedrich August Ludwig** (1860–1920), German chemist. Originated Gatterman-Koch synthesis of aldehydes; isolated and analyzed nitrogen trichloride; synthesized aromatic carboxylic acids, thionaphthalene, and thioanilide.
- Gauss, Karl Friedrich** (1777–1855), German mathematician, astronomer, and physicist. Formulated the Gauss theorem in the mathematics of electricity; made many contributions to pure and applied mathematics; determined orbits of planets and comets from observational data.
- Gay-Lussac, Joseph Louis** (1778–1850), French chemist and physicist. Discovered the law of expansion of gases by heat, and the law of combining volumes of gases; studied chemistry of iodine and cyanogen.
- Geiger, Hans Wilhelm** (1882–1945), German physicist and inventor. Invented the Geiger counter to detect alpha particles; investigated properties of alpha particles, cosmic rays, and artificial radiation.
- Geissler, Johann Heinrich Wilhelm** (1815–1879), German instrument maker. Developed Geissler pump and Geissler tube.
- Geitel, Hans Friedrich** (1855–1923), German experimental physicist. With J. Elster, studied atmospheric electricity, radioactivity, and photoelectricity, and invented photocell.
- Gell-Mann, Murray** (1929– ), American physicist. Proposed law of conservation of strangeness; used unitary symmetry to classify and explain elementary particles; postulated concept of quarks; Nobel Prize, 1969.
- Gesner, Konrad von** (1516–1565), Swiss naturalist. Wrote *Historia Animalium*, beginning zoology as a science.
- Giacconi, Riccardo** (1931– ), Italian-born American astrophysicist. Pioneered the field of x-ray astronomy, working out the principles of an x-ray telescope and leading the development of the early x-ray telescopes. Nobel Prize, 2002.
- Giaever, Ivar** (1929– ), Norwegian-born American physicist. Discovered that current-voltage characteristics of an electron tunneling across a thin insulating film separating two metals, one or both of which is in a superconducting state, can be used to obtain electron density of states of superconductors; Nobel Prize, 1973.
- Giauque, William Francis** (1895–1982), Canadian-born American chemist. Developed adiabatic demagnetization technique for production of extremely low temperatures; collaborated in discovery of isotopes of oxygen; Nobel Prize, 1949.
- Gibbs, Josiah Willard** (1839–1903), American mathematician and physicist. Made a mathematical treatment of chemical subjects, notably thermodynamics; worked on statistical mechanics, leading to the basis for the phase rule of heterogeneous equilibria.
- Gilbert, Walter** (1932– ), American biochemist. Developed methods for determining nucleotide sequence (independently of F. Sanger), advancing the technology of DNA recombination; Nobel Prize, 1980.
- Gilman, Alfred G.** (1941– ), American pharmacologist. With M. Rodbell, discovered G-proteins and their role in cellular signal transduction; Nobel Prize, 1994.
- Ginzburg, Vitaly Lazarevich** (1916– ), Soviet physicist. Developed Ginzburg-Landau and Ginzburg-London theories of superconductivity; Nobel Prize, 2003.
- Giorgi, Giovanni** (1871–1950), Italian electrical engineer, physicist, and mathematician. Developed the meter-kilogram-second-ampere system of units.
- Glaser, Donald Arthur** (1926– ), American physicist. Invented the bubble chamber for detecting the paths of high-energy atomic particles; Nobel Prize, 1960.
- Glashow, Sheldon Lee** (1932– ), American physicist. Contributed to development of theory uniting electromagnetism and weak nuclear interactions; postulated existence of charmed particles; Nobel Prize, 1979.
- Glauber, Johann Rudolf** (1604–1670), German chemist. Discovered Glauber’s salt (sodium sulfate) and hydrochloric acid; conducted experiments on compounds of mercury, arsenic, and antimony.
- Gmelin, Leopold** (1788–1853), German chemist. Wrote *Handbuch der Chemie*, first systematic treatment of chemical knowledge; devised

- Gmelin's test for presence of bile pigments; studied cyanides.
- Goldbach, Christian** (1690–1764), German-born Russian mathematician. Research on number theory and analysis; proposed the Goldbach conjecture.
- Goldhaber, Maurice** (1911– ), Austrian-born American physicist. With J. Chadwick, discovered photodisintegration and disintegration of light elements by slow neutrons; with L. Grodzins and A. W. Sunyar, discovered that the neutrino has left-handed spin.
- Goldstein, Joseph L.** (1940– ), American biochemist and geneticist. With M. S. Brown, discovered low-density lipoprotein receptors and their function in cholesterol metabolism; Nobel Prize, 1985.
- Golgi, Camillo** (1843–1926), Italian physician. Pioneered in the study of histology of the nervous system; discovered the Golgi bodies; Nobel Prize, 1906.
- Gordan, Paul Albert** (1837–1912), German mathematician. Worked on the theory of invariants and on solutions of algebraic equations and their groups of substitutions.
- Gordon, Walter** (1893–1940), German-born Swedish physicist. Contributed to relativistic quantum theory; with O. B. Klein, originated the Klein-Gordon equation.
- Goudsmit, Samuel Abraham** (1902–1978), Dutch-born American physicist. With G. E. Uhlenbeck, discovered electron spin.
- Gowers, William Timothy** (1963– ), British mathematician. Contributed to functional analysis, in particular, to the theory of Banach spaces, using methods of combinatorial theory; Fields Medal, 1998.
- Gram, Hans Christian Joachim** (1853–1938), Danish physician. Developed the Gram method for staining and differentiating bacteria.
- Gram, Jorgen Pedersen** (1850–1916), Danish mathematician. Worked in number theory and analysis; with E. Schmidt, originated Gram-Schmidt process for obtaining orthogonal set of vectors.
- Granit, Rangar Arthur** (1900–1991), Finnish-born Swedish physiologist. Research on vision and on motor control by afferent neurons; Nobel Prize, 1967.
- Grashof, Franz** (1826–1893), German mechanical engineer. Applied mathematics and physics to engineering problems; derived fundamental equations in the theory of elasticity; introduced Grashof number.
- Gray, Henry** (1825–1861), English anatomist. Wrote *Anatomy of the Human Body*.
- Green, George** (1793–1841), English mathematician. Worked in analysis; derived Green's theorem and Green's identities; introduced Green's function.
- Greengard, Paul** (1925– ), American neurobiologist. Discovered the mechanism by which dopamine and other chemical neurotransmitters (such as norepinephrine and serotonin) affect the nervous system—work contributing to the elucidation of the molecular mechanisms involved in slow synaptic transmission in the nervous system; Nobel Prize, 2000.
- Gregory, James** (1638–1675), Scottish geometer. Provided first proof of the theorem of calculus; gave first description of the reflecting telescope; discovered the series from which  $\pi$  can be calculated.
- Grignard, François Auguste Victor** (1871–1935), French chemist. Discovered organomagnesium compounds, or Grignard reagents, useful in synthesis of organic and organometallic compounds; Nobel Prize, 1912.
- Gross, David J.** (1941– ), American physicist. Discovered asymptotic freedom in the strong interactions (in collaboration with F. Wilczek, and independent of H. D. Politzer). Nobel Prize, 2004.
- Grothendieck, Alexander** (1928– ), German-born French mathematician. Made fundamental advances in algebraic geometry and related fields, providing unifying themes in geometry, number theory, topology, and complex analysis; introduced the idea of K theory; revolutionized homological algebra; developed theory of schemes, allowing conjectures in number theory to be solved; Fields Medal, 1966.
- Gruneisen, Eduard** (1877–1949), German physicist. Formulated laws relating specific heat and other properties of solids.
- Guillaume, Charles Edouard** (1861–1938), Swiss-born French physicist. Studied nickel-steel alloys and invented Invar; Nobel Prize, 1920.
- Guillemin, Ernst Adolph** (1898–1970), American electrical engineer. Worked on network analysis and synthesis problems; invented Guillemin line; developed network to produce loran pulses.
- Guillemin, Roger Charles Louis** (1924– ), French-born American physiologist. With A. V. Schally, isolated and analyzed peptide hormones secreted in hypothalamic region of brain which control anterior pituitary hormone secretion; Nobel Prize, 1977.
- Gullstrand, Allvar** (1862–1930), Swedish ophthalmologist. Discovered intracapsular accommodation of the eye lens; improved techniques for studying eye structure; Nobel Prize, 1911.
- Gunn, John Battiscombe** (1928– ), Egyptian-born American physicist. Discovered Gunn effect and used it to develop Gunn oscillator.
- Gunter, Edmund** (1581–1626), English mathematician and astronomer. Invented Gunter's chain used in surveying, and the logarithmic scale (Gunter's scale) which is the principle of the slide rule.
- Gutenberg, Johann** (ca. 1397–1468), German inventor. Invented the movable-type printing press.
- Haar, Alfred** (1885–1933), Hungarian mathematician. Studied orthogonal systems of functions, complex functions, partial differential equations, and calculus of variations; introduced the Haar measure on groups.
- Haber, Fritz** (1868–1934), German chemist. Developed the Haber-Boch process for synthesis of ammonia; made electrochemical studies; Nobel Prize, 1918.
- Hadamard, Jacques** (1865–1963), French mathematician. Proved theorem on the asymptotic behavior of the function giving the number of prime numbers less than a given number; introduced concept of "the problem correctly posed" in the solution of partial differential equations.
- Haeckel, Ernst Heinrich** (1834–1919), German biologist. Studied various invertebrates; classified animals as uni- and multicellular organisms; proposed the theory of recapitulation: ontogeny repeats phylogeny.
- Hagen, Carl Ernst Bessel** (1851–1923), German physicist. With H. Rubens, conducted experiments confirming Maxwell's electromagnetic theory of light, permitting determination of electrical conductivity of metals by optical measurements alone.
- Hagen, Gotthilf Heinrich Ludwig** (1797–1884), German hydraulic engineer. Discovered Hagen-Poiseuille law independently of J. L. M. Poiseuille; directed construction of dikes, harbor installations, and dune fortifications.
- Hahn, Hans** (1879–1934), Austrian mathematician. With S. Banach, proved the Hahn-Banach theorem of linear functionals.
- Hahn, Otto** (1879–1968), German chemist. With L. Meitner and F. Strassman, discovered that fission of heavy nuclei was possible by irradiation with neutrons; discovered protactinium with Meitner; Nobel Prize, 1944.
- Hahnemann, Christian Friedrich Samuel** (1775–1843), German physician. Founder of homeopathy.
- Haldane, John Bourdon Sanderson** (1892–1964), British geneticist and physiologist. Pioneered in mathematical treatment of population genetics; studied respiration in humans; wrote about enzymes.
- Haldane, John Scott** (1860–1936), British physiologist. Research on respiration, particularly the effects of high and low atmospheric pressures.
- Hale, George Ellery** (1868–1938), American astronomer. Established the Mount Wilson and Mount Palomar observatories; proved existence of magnetic fields in sunspots; invented the spectroheliograph.
- Hall, Charles Martin** (1863–1914), American commercial chemist. Discovered Hall process for extracting aluminum.
- Hall, Edwin Herbert** (1855–1938), American physicist. Discovered Hall effect and conducted studies of this and other galvanomagnetic and thermomagnetic effects.
- Halley, Edmond** (1656–1742), English astronomer. Published a southern star catalog; computed orbits of 24 comets; discovered Halley's comet.
- Hamel, Georg Karl Wilhelm** (1877–1954), German mathematician. Research on analysis and applied mathematics; introduced Hamel basis of vectors.
- Hamilton, William Rowan** (1805–1865), Irish mathematician and mathematical physicist. Discovered quaternions; developed mathematical theories encompassing wave and particle optics and mechanics; introduced Hamilton's principle and a form of the Hamilton-Jacobi theory.
- Hankel, Hermann** (1839–1873), German mathematician. Studied complex and hypercomplex numbers, theory of functions, and Hankel functions; proved that no hypercomplex number system can satisfy all the laws of ordinary arithmetic.
- Hansen, Armauer** (1841–1912), Norwegian bacteriologist. Discovered the bacillus of leprosy, or Hansen's disease.
- Harden, Arthur** (1865–1940), English chemist. Research on enzymes and alcoholic fermentation; Nobel Prize, 1929.
- Hardy, Godfrey Harold** (1877–1947), English mathematician. With S. Ramanujan, discovered formula for number of ways of writing a positive integer as the sum of positive integers; proved that the Riemann zeta function has an infinite number of zeros with real part equal to 1/2.
- Harker, David** (1906–1991), American crystallographer. Completed development of Patterson-Harker method of x-ray diffraction analysis of crystal structure.
- Hartley, Ralph Vinton Lyon** (1888–1970), American electrical engineer. Invented Hartley oscillator; developed Hartley principle in information theory.
- Hartline, Haldan Keffer** (1903–1983), American biophysicist. Elucidated cellular electrical activity in the eye and optic nerve; Nobel Prize, 1967.
- Hartmann, Johannes Franz** (1865–1936), German astronomer. Derived Hartmann dispersion formula relating index of refraction and wavelengths; devised Hartmann test for telescope mirrors; gave first observational proof of interstellar matter.
- Hartree, Douglas Rayner** (1897–1958), English mathematician and mathematical physicist. Developed methods of numerical analysis which made it possible to apply Hartree method to calculation of atomic wave functions.
- Hartwell, Leland H.** (1939– ), American geneticist. Discovered more than 100 genes that control the cell cycle and introduced the concept of cell cycle checkpoints, ordered groups of genes and protein which halt progress through the cell cycle if DNA is damaged, allowing time for DNA repair; Nobel Prize, 2001.
- Harvey, William** (1578–1657), English anatomist and physician. Described the true circulation of blood and the action of the heart.
- Hassel, Odd** (1897–1981), Norwegian chemist. Developed concept of conformation by studying three-dimensional structure of cyclohexane molecule, and explaining the orientation of attached atoms or functional groups; Nobel Prize, 1969.
- Hauptman, Herbert A.** (1917– ), American chemist. With J. Karle, developed computer-aided mathematical techniques for use in x-ray crystallography to determine three-dimensional structures of molecules; Nobel Prize, 1985.
- Hausdorff, Felix** (1868–1942), German mathematician. Founded and advanced general topology and the general theory of metric spaces.

- Haüy, René Just, Abbé** (1743–1822), French mineralogist. Formulated the geometrical law of crystallization; pioneer in the science of crystallography.
- Havers, Clopton** (1665–1702), English osteologist. Provided the first full discussion of Haversian lamellae and Haversian canals.
- Haworth, Walter Norman** (1883–1950), English chemist. Synthesized ascorbic acid; studied carbohydrates, including the structure of sugars; Nobel Prize, 1937.
- Heaviside, Oliver** (1850–1925), English physicist. Proposed the Heaviside layer in the upper atmosphere.
- Heeger, Alan J.** (1936– ), American physicist. Discovered and developed conductive polymers with Alan MacDiarmid and Hideki Shirakawa; Nobel Prize, 2000.
- Hefner-Alteneck, Friedrich Franz von** (1845–1904), German engineer. Invented Hefner candle as a standard of luminous intensity.
- Heine, Heinrich Eduard** (1821–1881), German mathematician. Formulated concept of uniform continuity.
- Heisenberg, Werner** (1901–1976), German physicist. Founder of quantum mechanics; studied structure of the atom and the Zeeman effect; formulated the principle of indeterminacy in nuclear physics; Nobel Prize, 1932.
- Heitler, Walter Heinrich** (1904–1981), German-born Swiss theoretical physicist. Developed Heitler-London covalence theory of chemical bonding.
- Helmholtz, Hermann Ludwig Ferdinand von** (1821–1894), German physicist, anatomist, and physiologist. Physiological research on the nervous system and the human eye and ear, and theoretical work on conservation of force in physics; invented the ophthalmoscope.
- Hench, Philip Showalter** (1896–1965), American physiologist. Discovered that ACTH and cortisone could be used to treat rheumatoid arthritis; Nobel Prize, 1950.
- Henle, Friedrich Gustav Jacob** (1809–1885), German pathologist and anatomist. Wrote *Handbuch der Rationellen Pathologie*, integrating the study of physiology and pathology; discovered looped portion of the kidney tubules, and the epithelium.
- Henry, Joseph** (1797–1878), American physicist. Studied electromagnetic induction, solar phenomena, meteorology, and acoustics.
- Henry, William** (1775–1836), English chemist and physician. Formulated Henry's law of solubility of gases in liquid.
- Heney, Louis George** (1910–1970), American astronomer. Research on reflection nebulae, interstellar matter, stellar atmospheres and evolution, and optical design.
- Hermite, Charles** (1822–1901), French mathematician. First to solve a fifth-degree equation; investigated  $e$ , the base of natural logarithms.
- Hero of Alexandria** (3d century or earlier), Greek mathematician. Wrote on the geometry of plane and solid figures, mechanics, and simple machines; showed that the angle of incidence equals the angle of reflection.
- Hérault, Paul Louis Toussaint** (1863–1914), French metallurgist. Designed the Hérault furnace for electric steel; developed the Hérault process for aluminum extraction.
- Herschbach, Dudley R.** (1932– ), American chemist. With Y. T. Lee, developed crossed molecular-beam technique for tracing chemical reactions; Nobel Prize, 1986.
- Herschel, John Frederick William** (1792–1871), English mathematician, physicist, and astronomer. Discovered many nebulae and clusters; pioneered in celestial photography.
- Herschel, William or Friedrich Wilhelm** (1738–1822), German-born English astronomer. Discovered Uranus, two of its satellites, and two satellites of Saturn; discovered the Sun's intrinsic motion; proposed the concept of the form of the Milky Way.
- Hershey, Alfred Day** (1908–1997), American biologist. With M. Chase, experimented with bacteriophage, confirming earlier indications that the material basis of heredity is contained in nucleic acids; Nobel Prize, 1969.
- Hershko, Avram** (1937– ), Israeli medical doctor and scientist. Discovered ubiquitin-mediated protein degradation; Nobel Prize, 2004.
- Hertz, Gustav** (1887–1975), German physicist. With J. Franck, studied effects of electron impacts on atoms; Nobel Prize, 1925.
- Hertz, Heinrich Rudolph** (1857–1894), German physicist. Discovered Hertzian waves in the ether; proved experimentally Maxwell's theories of electricity and magnetism.
- Hertzprung, Ejnar** (1873–1967), Danish astronomer. Discovered method of spectroscopic parallax for measuring stellar distances; determined relation between color and luminosity of stars; with H. N. Russell, developed Hertzsprung-Russell diagram.
- Hertzberg, Gerhard** (1904–1999), German-born Canadian physicist. Determined electronic structure and geometry of diatomic and polyatomic molecules, particularly free radicals; Nobel Prize, 1971.
- Hess, Victor Franz** (1883–1964), Austrian physicist. Studied alpha particles from radium; discovered cosmic rays; Nobel Prize, 1936.
- Hess, Walter Rudolf** (1881–1973), Swiss physiologist. Discovered the organizer function of the middle brain in coordinating activity of internal organs; developed technique of using electrodes to stimulate localized brain areas; Nobel Prize, 1949.
- Hevelius or Hewel, Johannes** (1611–1687), Danzig-born astronomer. Discovered four comets; charted surface of the Moon; cataloged numerous stars.
- Hevesy, George von** (1886–1966), Hungarian chemist. Experimented with radioisotope indication, leading to the technique of isotope tracing of biological and chemical processes; Nobel Prize, 1943.
- Hevroský, Jaroslav** (1890–1967), Czechoslovakian physical chemist. Developed the technique of polarographic analysis; Nobel Prize, 1959.
- Hewish, Antony** (1924– ), British astronomer. Pioneered in discovery of pulsars, by means of radio telescopes; Nobel Prize, 1974.
- Heymans, Corneille** (1892–1968), French-Belgian physiologist. Investigated the carotid sinus in connection with the mechanism of breathing; Nobel Prize, 1938.
- Hilbert, David** (1862–1943), German mathematician. Contributed to theory of numbers and theory of invariants; applied integral equations to physical problems.
- Hill, Archibald Vivian** (1886–1977), English physiologist. Worked on heat loss and oxygen consumption in muscle contraction; Nobel Prize, 1922.
- Hinshelwood, Cyril Norman** (1897–1967), British chemist. Elucidated chain reaction and chain branching mechanisms; Nobel Prize, 1956.
- Hippias of Elis** (5th century B.C.), Greek philosopher and mathematician. Discovered quadratrix.
- Hipparchus of Rhodes** (fl. 130 B.C.), Greek astronomer. Calculated the inclination of the ecliptic and the precession of the equinoxes; invented trigonometry; made the first star catalog.
- Hippocrates** (460?–377 B.C.), Greek physician. Known as the father of medicine; writings attributed to him contain clinical observations of diseases, descriptions of surgical practice, and the Hippocratic doctrine of the four humors.
- Hironaka, Heisuke** (1931– ), Japanese-American mathematician. Worked in algebraic geometry; solved the problem of the resolution of singularities on an algebraic variety for algebraic varieties of any dimension over a field of characteristic 0, generalizing work of O. Zariski; Fields Medal, 1970.
- Hirzebruch, Friedrich Ernst Peter** (1927– ), German mathematician. Collaborated with M. F. Atiyah in the development of K theory.
- Hitchings, George Herbert** (1905–1998), American biochemist. With G. B. Elion, pioneered research that led them to the development of drugs for the treatment of leukemia, malaria, gout, herpes, bacterial and fungal infections, and autoimmune diseases and organ-transplant rejection; Nobel Prize, 1988.
- Hittorf, Johann Wilhelm** (1824–1914), German physicist. Described effects of Hittorf rays in vacuum tubes; studied electrolysis, and electrical discharge in rarefied gases with the Hittorf tube.
- Hodgkin, Alan Lloyd** (1914–1998), British biophysicist. With A. Huxley, devised a system of mathematical equations describing the nerve impulse; presented evidence for the sodium theory of nervous conduction; Nobel Prize, 1963.
- Hodgkin, Dorothy Crowfoot** (1910–1994), Egyptian-born British chemist. Determined the structure of the vitamin B<sub>12</sub> molecule through x-ray crystallographic analysis; Nobel Prize, 1964.
- Hodgkin, Thomas** (1798–1866), English physician. First to describe Hodgkin's disease, a glandular disorder.
- Hoffmann, Roald** (1937– ), Polish-born American chemist. Developed methods for predicting whether a chemical reaction is possible based on molecular orbital models; Nobel Prize, 1981.
- Hofmann, August Wilhelm von** (1818–1892), German chemist. Studied reactions of derivatives; developed the Hofmann reaction for preparing primary amines.
- Hofmeister, Wilhelm Friedrich Benedict** (1824–1877), German botanist. Did fundamental work on plant embryology; explained the alternating life cycles of mosses and ferns.
- Hofstadter, Robert** (1915–1990), American physicist. Investigated the properties and behavior of the proton and neutron; determined the size and shape of many nuclei; discovered the construction scheme of fundamental atomic nuclei; Nobel Prize, 1961.
- Hölder, Otto Ludwig** (1859–1937), German mathematician. Contributed to analysis and group theory; introduced Hölder condition; proved Hölder inequality and Jordan-Hölder theorem.
- Holley, Robert William** (1922–1993), American biochemist. With coworkers, made first determination of a nucleotide sequence of a nucleic acid; Nobel Prize, 1968.
- Holmberg, Erik Bertil** (1908–2000), Swedish astronomer. Investigations of galaxies, especially photometry of galaxies.
- Hooke, Robert** (1635–1703), English inventor. Invented the compound microscope, wheel barometer, universal (Hooke's) joint, and the reflecting telescope; formulated theories on light and on the motion of the Earth.
- Hooker, Joseph Dalton** (1817–1911), English botanist. With G. Benthams, wrote *Genera Plantarum*; prepared works on the flora of New Zealand, Antarctica, and India.
- Hopkins, Frederick Gowland** (1861–1947), English biochemist. Discovered the amino acid tryptophan and the tripeptide glutathione; did experimental work leading to the discovery of vitamins; Nobel Prize, 1929.
- Hopper, Grace** (1906–1992), American mathematician and computer scientist. Pioneered in the development of computer software, including the invention of the first compiler. Credited with having discovered the first computer "bug," a moth that literally had to be removed from the wiring of an early computer.
- Hörmander, Lars** (1931– ), Swedish mathematician. Worked on partial differential equations; in particular, made major contributions to the general theory of linear differential operators; Fields Medal, 1962.
- Horvitz, H. Robert** (1947– ), American geneticist and neurobiologist. Identified and characterized the genes controlling programmed cell death in the nematode *Caenorhabditis elegans*. Showed that these genes interact with each other in cell death and correspond to existing genes in humans. Nobel Prize, 2002.
- Houdry, Eugene J.** (1892–1962), French-born American engineer. Devised catalytic method of producing oil.
- Hounsfield, Godfrey Newbold** (1919–2004), British electronics engineer. Invented computerized axial tomography; Nobel Prize, 1979.

- Houssay, Bernardo Alberto** (1887–1971), Argentine physiologist. Research on the functions and effects of the hypophysis, including its relationship to carbohydrate metabolism; Nobel Prize, 1947.
- Howell, William Henry** (1860–1945), American physiologist. Discovered heparin; isolated thrombin and thromboplastin; discovered Howell-Jolly bodies; proved that blood platelets are formed in lungs.
- Hubble, Edwin Powell** (1889–1953), American astronomer. Studied nebulae; formulated Hubble's law of extragalactic nebulae.
- Hubel, David Hunter** (1926– ), American neurobiologist. Contributed to the study of the processing of visual information in the brain; Nobel Prize, 1981.
- Huber, Robert** (1937– ), German chemist. With J. Deisenhofer and M. Hartmut, elucidated the structure of a bacterial protein that performs photosynthesis; Nobel Prize, 1988.
- Hückel, Erich** (1896–1980), German chemist. With P. J. W. Debye, formulated Debye-Hückel theory of strong electrolytes; devised theoretical explanation of electron properties of aromatic hydrocarbons.
- Huggins, Charles Brenton** (1901–1997), Canadian-born American surgeon and cancer researcher. Developed treatment of cancers using endocrinologic methods; Nobel Prize, 1966.
- Hughes, David Edward** (1831–1900), English-born American inventor. Invented the Hughes electromagnet, a printing telegraph, microphone, and induction balance.
- Hugoniot, Pierre Henry** (1851–1887), French physicist. Developed theory of shock waves.
- Hulse, Russell A.** (1950– ), American astronomer and physicist. With J. H. Taylor, discovered the binary pulsar and studied it to observe phenomena predicted by general relativity; worked in plasma physics; Nobel Prize, 1993.
- Humboldt, Friedrich Heinrich Alexander, Baron von** (1769–1859), German naturalist. Founder of physical geography; made scientific explorations of South America and Central Asia.
- Hume-Rothery, William** (1899–1968), English metallurgist and chemist. Discovered Hume-Rothery rule concerning electron compounds.
- Hunt, Franklin Livingston** (1883–1973), American physicist. Research on x-ray spectroscopy; with W. Duane, discovered and applied Duane-Hunt law.
- Hunt, R. Timothy** (1943– ), British biologist who discovered cyclins, proteins that regulate cyclin-dependent kinase activity, and found that their periodic degradation is an important general control mechanism of the cell cycle; Nobel Prize, 2001.
- Hurwitz, Adolf** (1859–1919), German-born Swiss mathematician. Worked on modular functions, number theory, Riemann surfaces, complex function theory, and analytic number theory; formulated condition satisfied by Hurwitz polynomials.
- Huxley, Andrew Fielding** (1917– ), British physiologist. With A. L. Hodgkin, discovered the ionic mechanism involved in excitation in the cell membrane of peripheral nerves; Nobel Prize, 1963.
- Huygens, Christiaan** (1629–1695), Dutch mathematician, physicist, and astronomer. Discovered Saturn's rings; contributed to dynamics and optics; proposed the wave theory of light.
- Hylleraas, Egil Andersen** (1898–1965), Norwegian physicist. Applied quantum theory to helium atom, negative hydrogen ion, and other atoms, molecules, and crystals; developed variational method and other methods for mathematical solution of quantum-mechanical problems.
- Ignarro, Louis J.** (1941– ), American pharmacologist. Working independently and with Robert Furchgott, he concluded that endothelium-derived relaxing factor was identical to nitric oxide; Nobel Prize, 1998.
- Ingenhousz, Jan** (1730–1799), Dutch physician and naturalist. Demonstrated the cycle of photosynthesis in plants.
- Ising, Ernest** (1900–1998), German-born American physicist. Introduced Ising model of ferromagnetic material; research in solid-state physics and ferromagnetism.
- Itô, Kiyosi** (1915– ), Japanese mathematician. Studied stochastic processes; introduced Itô's integral and Itô's formula.
- Jacob, François** (1920– ), French biologist. Discovered episomes, a class of genetic elements; with J. Monod, proposed the concepts of messenger ribonucleic acid and of the operon; Nobel Prize, 1965.
- Jacobi, Karl Gustav Jacob** (1804–1851), German mathematician. Worked on elliptic functions and differential equations; developed the theory of determinants.
- Jacquard, Joseph Marie** (1752–1834), French inventor. Designed and built the Jacquard loom for figured weaving.
- Jaeger, Frans Maurits** (1877–1945), Dutch crystallographer and physical chemist. Measured physical properties of molten salts and silicates at extremely high temperatures.
- James, William** (1842–1910), American psychologist and writer. Coformulator of James-Lange theory that emotions are the perception of physiological changes.
- Janet, Pierre Marie Félix** (1859–1947), French psychologist. Studied hysteria, obsession, and neurosis; wrote a textbook on the theory of hysteria.
- Jeans, James Hopwood** (1877–1946), English physicist and astronomer. Worked in stellar dynamics; proposed the tidal theory of the origin of planets.
- Jenner, Edward** (1749–1823), English physician. Discovered vaccination.
- Jensen, J. Hans D.** (1906–1973), German physicist. With M. G. Mayer, formulated the nuclear shell model; Nobel Prize, 1963.
- Jerne, Niels Kaj** (1911–1994), Swiss immunologist. Formulated three important theories involving the immune system: how the body produces specific antibodies, how the immune system develops and matures, and how the various interrelated aspects of the immune response are coordinated by the body; Nobel Prize, 1984.
- Johnson, Harold Lester** (1921–1980), American astronomer. Research in astrophysics, astronomical photometry, infrared astronomy, applications of electronics to astronomy, and Fourier transform spectroscopy; collaborated with W. W. Morgan in developing Johnson-Morgan system of stellar magnitudes.
- Joliot-Curie, Irène** (1897–1956), French physicist. With M. Curie, discovered projection of atomic nuclei by neutrons; with J. F. Joliot-Curie, discovered artificial radiation; Nobel Prize, 1935.
- Joliot-Curie, Jean Frédéric** (1900–1958), French physicist. With I. Joliot-Curie, produced an artificial radioactive substance by bombarding boron with fast alpha particles; Nobel Prize, 1935.
- Jones, Vaughn Frederick Randal** (1952– ), New Zealand-American mathematician. Proved an index theorem for von Neumann algebras, discovered a relationship between these algebras and geometric topology, and discovered a new polynomial invariant for knots; this work provided a connecting link for widely separated areas of mathematics and physics; Fields Medal, 1990.
- Jordan, Camille** (1838–1921), French mathematician. Discovered many fundamental results in group theory; gave a proof of the Jordan curve theorem (later shown to be incorrect).
- Jordan, Pascual** (1902–1980), German physicist. Contributed to formulation of quantum mechanics; introduced Jordan algebra in an attempt to generalize quantum mechanics.
- Josephson, Brian David** (1940– ), British physicist. Predicted the Josephson effect concerning electron pairs; Nobel Prize, 1973.
- Joukowski, Nikolai Jegorowitch** (1847–1921), Russian applied mathematician and aerodynamicist. Helped to introduce concept of Kutta-Joukowski airfoil and to prove Kutta-Joukowski theorem.
- Joule, James Prescott** (1818–1889), English physicist. Formulated a mechanical theory of heat; demonstrated Joule-Thomson effect relating to the fall in temperature of a gas; first to estimate the velocity of a gas molecule.
- Jung, Carl Gustav** (1875–1961), Swiss psychologist and psychiatrist. Evolved a theory of complexes; founded the analytical school of psychoanalysis and psychotherapy.
- Jussieu, Antoine Laurent de** (1748–1836), French botanist. Wrote *Genera Plantarum*, the basis of modern natural botanical classification.
- Kahn, Robert E.** (1938– ), American electrical engineer. Co-invented (with Vinton G. Cerf) Transmission Control Protocol/Internet Protocol (TCP/IP).
- Kalman, Rudolf Emil** (1930– ), Hungarian born American mathematician and electrical engineer. Worked on mathematical theory of control systems; developed the Kalman filter; introduced concepts of controllability and observability.
- Kaluza, Theodor Franz Eduard** (1885–1954), German mathematical physicist. Developed theory which attempted to unify gravitation and electromagnetism.
- Kamerlingh Onnes, Heike** (1853–1926), Dutch physicist. Research on cryogenics, critical phenomena, and low temperatures; discovered the phenomenon of superconductivity; Nobel Prize, 1913.
- Kandel, Eric R.** (1929– ), Austrian-born American neurobiologist. Discovered that protein phosphorylation plays an important role in the molecular mechanisms underlying learning and memory formation; his work contributed to the elucidation of the molecular mechanisms involved in slow synaptic transmission in the nervous system; Nobel Prize, 2000.
- Kapitza, Pjotr Leonidovich** (1894–1984), Russian physicist. Studied magnetism and low temperature; designed hydrogen and helium liquefaction plants; Nobel Prize, 1978.
- Kapteyn, Jacobus Cornelius** (1851–1922), Dutch astronomer. Studied the proper motion of stars; with P. J. van Rhijn, evolved a theory of the universe.
- Karle, Jerome** (1918– ), American crystallographer. With H. A. Hauptman, developed computer-aided mathematical techniques for use in x-ray crystallography to determine three-dimensional structures of molecules; Nobel Prize, 1985.
- Karrer, Paul** (1889–1971), Swiss chemist. Pioneering research on vitamins A and B<sub>2</sub> and on the flavins and carotenoids; Nobel Prize, 1937.
- Kastler, Alfred** (1902–1984), French physicist. Developed a double-resonance method to study energy levels of atoms in excited states; Nobel Prize, 1966.
- Kater, Henry** (1777–1835), English geodesist. Developed Kater's reversible pendulum to obtain accurate values of acceleration of gravity.
- Katz, Bernard** (1911–2003), German-born British physiologist. Made discoveries concerning mechanism for release of transmitter substances at nerve-muscle junction; Nobel Prize, 1970.
- Keesom, Willem Hendrik** (1876–1956), Dutch physicist. Worked in low-temperature physics; first to solidify helium; studied molecular structure of liquids and compressed gases.
- Kekulé von Stradonitz, Friedrich August** (1829–1896), German chemist. A founder of structural organic chemistry; made theoretical proposal of the structure of benzene.
- Kelvin, William Thomson, 1st Baron** (1824–1907), British mathematician and physicist. Invented the Kelvin balance; formulated Kelvin's laws concerning electric cables; contributed to thermodynamics.
- Kendall, Edward Calvin** (1886–1972), American biochemist. Chemical investigation of the adrenal cortex, leading to the isolation of crystalline cortical hormones, especially cortisone; Nobel Prize, 1950.
- Kendall, Henry Way** (1926–1999), American physicist. Collaborated in experiments that

- demonstrated that protons, neutrons, and similar particles are made up of quarks; Nobel Prize, 1990.
- Kendrew, John Cowdery** (1917–1997), British molecular biologist. First to successfully determine the structure of a protein; Nobel Prize, 1962.
- Kennelly, Arthur Edwin** (1861–1939), American electrical engineer. Discovered the ionized layer in the atmosphere, independently of O. Heaviside; proposed the theory of alternating currents.
- Kepler, Johannes** (1571–1630), German astronomer. Proposed Kepler's three laws of planetary motion; worked in optics.
- Kerr, John** (1824–1907), Scottish physicist. Discovered the Kerr magnetooptic effect.
- Ketterle, Wolfgang** (1957– ), German physicist. Produced Bose-Einstein condensates in a dilute gas of sodium atoms (independent of the work of E. A. Cornell and C. E. Wieman) and carried out fundamental studies of their properties, including the production of interference patterns and atom lasers; Nobel Prize, 2001.
- Khorana, Har Gobind** (1922– ), Indian-born American biochemist. Synthesized complicated nucleic acids; proved that genetic code consists of nonoverlapping triplets of bases without gaps between triplets; Nobel Prize, 1968.
- Kilby, Jack St. Clair** (1923– ), American physicist, electronics engineer, and inventor. Participated in the invention of the integrated circuit; Nobel Prize, 2000.
- Kirchhoff, Gustav Robert** (1824–1887), German physicist. With R. W. Bunsen, discovered method of spectrum analysis; formulated Kirchhoff's law of electric currents and electromotive forces in a network.
- Kirkwood, Daniel** (1814–1895), American astronomer. Discovered Kirkwood gaps; studied nature, origin, and evolution of solar system, particularly role of asteroids, comets, meteors, and meteorites.
- Kitasato, Shibasaburo** (1852–1931), Japanese bacteriologist. Independently of A. E. J. Yersin, discovered the bacillus of bubonic plague; isolated bacilli of symptomatic anthrax, dysentery, and tetanus.
- Klebs, Edwin** (1834–1913), German pathologist. Described diphtheria (Klebs-Löffler) bacillus; studied bacteriology of malaria, anthrax, and tuberculosis.
- Klein, Christian Felix** (1849–1925), German mathematician. Contributed to function theory, nonEuclidean geometry, group theory, and applied mathematics; introduced Klein bottle.
- Klein, Oskar Benjamin** (1894–1977), Swedish physicist. Codeveloper of Klein-Gordon equation. Klein-Nishina formula, and Klein-Rydberg method; proposed theory of overall structure of the universe.
- Kleinrock, Leonard** (1934– ), American electrical engineer. Developed the basic principles of packet switching for communication networks, the underlying technology of the Internet.
- Klitzing, Klaus von** (1943– ), German physicist. Discovered quantum Hall effect; Nobel Prize, 1985.
- Klug, Aaron** (1926– ), South African-born British biochemist. Developed crystallographic electron microscopy and elucidated biologically important nucleic acid-protein complexes; Nobel Prize, 1982.
- Knowles, William S.** (1917– ), American chemist. Developed chirally catalyzed hydrogenation reactions; Nobel Prize, 2001.
- Knudsen, Martin Hans Christian** (1871–1949), Danish physicist and hydrographer. Studied flow and diffusion of gases at low pressure; developed Knudsen cell and Knudsen gage; developed methods to measure the properties of seawater.
- Koch, Robert** (1843–1910), German physician and bacteriologist. Studied cholera, tuberculosis, and bubonic plague; showed a specific bacillus to be the cause of anthrax; discovered the tubercle bacillus; Nobel Prize, 1905.
- Kocher, Emil Theodor** (1841–1917), Swiss surgeon. Studied the functions and malfunctions of the thyroid gland; Nobel Prize, 1909.
- Kodaira, Kunihiko** (1915–1997), Japanese mathematician. Did research on harmonic integrals and harmonic forms with applications to Kählerian and more specifically algebraic varieties; demonstrated, by sheaf cohomology, that such varieties are Hodge manifolds; Fields Medal, 1954.
- Köhler, Georges J. F.** (1946–1995), Swiss immunologist. With C. Milstein, discovered a laboratory technique for producing monoclonal antibodies, highly uniform immune bodies that are selective in responding to target substances; Nobel Prize, 1984.
- Kohn, Walter** (1923– ), Austrian-born American physicist. Developed density-functional theory, which solves equations for electron density rather than positions of individual electrons; it is one of the developments that has significantly sped up computational quantum chemistry; Nobel Prize, 1998.
- Kolbe, Adolf Wilhelm Hermann** (1818–1884), German chemist. Contributed to the synthesis concept of compound formation, doing much to eliminate the division of chemistry into two branches: organic and inorganic.
- Kolmogorov, Andrei Nikolaevich** (1903–1987), Soviet mathematician. Formulated set-theoretic basis of probability theory.
- Kontsevich, Maxim** (1964– ), Russian mathematician and mathematical physicist. Worked in algebraic geometry, algebraic topology, string theory, and quantum field theory; demonstrated equivalence of two models of quantum gravitation; discovered an invariant for classifying knots; Fields Medal, 1998.
- Kornberg, Arthur** (1918– ), American biochemist. Discovered deoxyribonucleic acid polymerase, providing the first rational enzymatic mechanism for the replication of genetic material of the cell; Nobel Prize, 1959.
- Korteweg, Diederik Johannes** (1848–1941), Dutch mathematician. Worked in applied mathematics, mechanics, and hydrodynamics; with G. de Vries, proposed equation of wave motion with soliton solution.
- Kosiba, Masatoshi** (1926– ), Japanese physicist. Developed large water detectors (Kamiokande and Super Kamiokande) that observed solar and atmospheric neutrinos and neutrinos from Supernova 1987A, and found evidence for neutrino oscillations. Nobel Prize, 2002.
- Kossel, Albrecht** (1853–1927), German chemist. Investigated the chemistry of cells and of proteins; Nobel Prize, 1910.
- Krafft-Ebing, Richard, Baron von** (1840–1902), German neurologist. Authority on psychological disorders and their forensic implications; wrote *Psychopathia Sexualis*, a collection of case histories.
- Kramers, Hendrik Anthony** (1894–1952), Dutch physicist. Developed quantum theory of dispersion, establishing Kramers-Kronig relation; with G. Wentzel and L. Brillouin, developed Wentzel-Kramers-Brillouin method.
- Krebs, Edwin Gerhard** (1918– ), American biochemist. With E. H. Fischer, discovered phosphorylation processes that play a critical role in cell-protein regulation; they isolated the first protein kinase, a class of enzymes that transfer phosphate from adenosine triphosphate to proteins; Nobel Prize, 1992.
- Krebs, Hans Adolf** (1900–1981), German-born British biochemist. Elucidated metabolic pathways, including the tricarboxylic acid cycle; Nobel Prize, 1953.
- Kroemer, Herbert** (1928– ), German-American physicist and electronics engineer. Developed semiconductor heterostructures used in high-speed and opto-electronics, including fast transistors, laser diodes, and light-emitting diodes; Nobel Prize, 2000.
- Krogh, Schack August Steenberg** (1874–1949), Danish physiologist. Discovered the regulation of the vasomotor mechanism of capillaries; devised the nitrous oxide method for measuring human circulation; Nobel Prize, 1920.
- Kronecker, Leopold** (1823–1891), German mathematician. Contributed to theory of elliptical functions, algebra, and number theory, and attempted to unify these disciplines; attempted to base all mathematics on integers and finite processes.
- Kroto, Harold W.** (1939– ), British chemist. Studied long-chain molecules found in radioastronomy by using microwave spectroscopy, which ultimately led to the discovery of fullerenes; Nobel Prize, 1996.
- Kruskal, Martin David** (1925– ), American mathematician and physicist. Research in plasma physics, asymptotic phenomena, relativity, and minimal surfaces.
- Kuhn, Richard** (1900–1967), German chemist. Research on the structures and synthesis of vitamins and carotenoids; Nobel Prize, 1938 (declined).
- Kundt, August Adolph** (1839–1894), German physicist. Used Kundt tube to determine speed of sound in gases; determined ratio of specific heats of monatomic gases; with W. K. Röntgen, demonstrated Faraday effect in gases.
- Kurchatov, Igor Vasilievich** (1903–1960), Soviet physicist. Discovered nuclear isomers; studied nuclear reactions; developed nuclear weapons and nuclear power.
- Kusch, Polykarp** (1911–1993), German-born American physicist. Precisely determined the magnetic moment of the electron; Nobel Prize, 1955.
- Kutta, Wilhelm Martin** (1867–1944), German applied mathematician. Helped introduce concept of Kutta-Joukowski airfoil, prove Kutta-Joukowski theorem, and develop Runge-Kutta method.
- Kwolek, Stephanie** (1923– ), American polymer chemist. Developed Kevlar, poly(*p*-phenylene terephthalamide), a lightweight synthetic fiber that is stronger than steel.
- Lacaille, Nicolas Louis de** (1713–1762), French astronomer and geodesist. Determined positions of nearly 10,000 stars in southern skies; measured lunar and solar parallax; showed that Earth has equatorial bulge.
- Lafforgue, Laurent** (1966– ), French mathematician. Proved the global Langlands correspondence for function fields, a major advance toward the realization the Langlands program, which deals with deep connections between number theory, analysis, and group representation. Fields Medal, 2002.
- Lagrange, Joseph Louis, Count** (1736–1813), French geometer and astronomer. Invented the calculus of variations; studied the mathematics of sound; wrote *Mécanique Analytique*, concerning statics and dynamics.
- Laguerre, Édmond Nicolas** (1834–1886), French mathematician. Discovered Laguerre's differential equations and Laguerre polynomials.
- Lamarck, Jean Baptiste Pierre Antoine de Monet, Chevalier de** (1744–1829), French naturalist. Proposed theory that changes in animal and plant structure are caused by changes in environment; classified animals into vertebrates and invertebrates.
- Lamb, Willis Eugene, Jr.** (1913– ), American physicist. Made precise atomic measurements leading to a new understanding of the theory of electron interactions and electromagnetic radiation; Nobel Prize, 1955.
- Lambert, Johann Heinrich** (1728–1777), German physicist. Formulated the Lambert theorem concerning the illumination of a surface.
- Lamé, Gabriel** (1795–1870), French mathematician, physicist, and engineer. Introduced curvilinear coordinates and applied them to differential equations, elasticity, thermodynamics, and number theory.
- Landau, Lev Davydovich** (1908–1968), Soviet physicist. Made theoretical explanation of the nature and properties of liquid helium; investigated condensed matter; Nobel Prize, 1962.
- Landé, Alfred** (1888–1975), German-born American physicist. Introduced Landé *g* factor; discovered Landé interval rule and Landé  $\Gamma$ -permanence rule.
- Landsteiner, Karl** (1868–1943), Austrian-born American pathologist. Discovered human blood

- groups and factors M and N; with A. S. Weiner, discovered the Rh factor; Nobel Prize, 1930.
- Lange, Carl Georg** (1834–1900), Danish physician and psychologist. With W. James, proposed the James-Lange theory of emotion.
- Langerhans, Paul** (1847–1888), German pathologist and anatomist. Studied human and animal microscopical anatomy, particularly structures of skin and pancreas; discovered islets of Langerhans.
- Langevin, Paul** (1872–1946), French physicist. Developed quantitative theories of paramagnetism and diamagnetism; helped to elucidate the theory of relativity; contributed to the development of sonar.
- Langley, Samuel Pierpont** (1834–1906), American astronomer and airplane pioneer. Studied infrared solar spectrum; constructed in 1896 the first mechanical heavier-than-air machine to fly.
- Langmuir, Irving** (1881–1957), American chemist. With G. N. Lewis, proposed the Lewis-Langmuir atomic theory; studied surface chemistry and thermionic emission; Nobel Prize, 1932.
- Laplace, Pierre Simon, Marquis de** (1749–1827), French astronomer and mathematician. Contributed to celestial mechanics, especially to the study of the Moon, Saturn, and Jupiter; formulated the theory of probability; discovered the Laplace differential equation.
- Larmor, Joseph** (1857–1942), British physicist. Developed electron theory which fused electromagnetic and optical concepts; introduced Larmor precession and derived Larmor formula.
- Latimer, Louis Howard** (1848–1928), American inventor. A collaborator of Alexander Graham Bell and Thomas Edison, this self-educated son of an escaped slave is best known for key inventions in the field of electric lighting.
- Laue, Max Theodor Felix von** (1879–1960), German physicist. Proposed the theory of x-ray diffraction by crystals; developed the Laue method of investigating crystal structure; Nobel Prize, 1914.
- Laughlin, Robert Betts** (1950– ), American physicist. Provided a theoretical explanation for the fractional quantum Hall effect by showing how electrons acting together in strong magnetic fields can form new types of quasiparticles with charges that are fractions of electron charges; Nobel Prize, 1998.
- Laurent, Pierre Alphonse** (1813–1854), French mathematician and physicist. Introduced Laurent series; research on wave theory of light.
- Lauterbur, Paul C.** (1929– ), American chemist. Discovered that it was possible to create a two-dimensional image of the body with magnetic resonance by introducing gradations in the external magnetic field, providing the basis for the development of magnetic resonance as a useful medical imaging technique. Nobel Prize, 2003.
- Laveran, Charles Louis Alphonse** (1845–1922), French physician. Discovered the malaria parasite; researched sleeping sickness; Nobel Prize, 1907.
- Lavoisier, Antoine Laurent** (1743–1794), French chemist. The founder of modern chemistry; studied combustion and respiration; published a table of the elements.
- Lawrence, Ernest Orlando** (1901–1958), American physicist. Discovery, development, and use of the cyclotron; Nobel Prize, 1939.
- Lebesgue, Henry Léon** (1875–1941), French mathematician. Developed theory of measure and integration; studied trigonometric series.
- Le Chatelier, Henry Louis** (1850–1936), French chemist and metallurgist. Research on cement chemistry, gas combustion, blast furnace reactions, chemical equilibria, alloy properties, and chemistry and metallurgy of iron and steel; formulated Le Chatelier's principle.
- Leclanché, Georges** (1839–1882), French chemist and electrician. Invented the Leclanché galvanic cell.
- Lederberg, Joshua** (1925– ), American geneticist. With E. L. Tatum, discovered genetic recombination in bacteria and organization of genetic material; Nobel Prize, 1958.
- Lederman, Leon Max** (1922– ), American physicist. Collaborated in experiment that demon-
- strated the existence of two types of neutrino; led an experiment that discovered the upsilon particle; Nobel Prize, 1988.
- Lee, David Morris** (1931– ), American physicist. With D. D. Osheroff and R. C. Richardson, discovered superfluidity in helium-3; Nobel Prize, 1996.
- Lee, Tsung-Dao** (1926– ), Chinese-born American physicist. With C. N. Yang disproved the parity principle; worked on statistical mechanics, astrophysics, nuclear and subnuclear physics, and field theory; Nobel Prize, 1957.
- Lee, Yuan Tseh** (1936– ), American chemist. With Dudley R. Herschbach, developed crossed molecular-beam technique for tracing chemical reactions; Nobel Prize, 1986.
- Legendre, Adrien Marie** (1752–1833), French mathematician. Worked on elliptic functions, the theory of numbers, and the method of least squares.
- Leggett, Anthony J.** (1938– ), British and American physicist. Developed a theory explaining the complex behavior of superfluid helium-3. Nobel Prize, 2003.
- Lehn, Jean-Marie** (1939– ), French chemist. Studied crown ethers and developed the synthesis of related structures known as cryptands; Nobel Prize, 1987.
- Leibniz, Gottfried Wilhelm, Baron von** (1646–1716), German mathematician. Contributed to the development of differential calculus.
- Leloir, Luis Federico** (1906–1987), French-born Argentine biochemist. Discovered sugar nucleotides and their role in carbohydrate biosynthesis; Nobel Prize, 1970.
- Lenard, Philipp Eduard Anton** (1862–1947), Hungarian-born German physicist. Studied cathode rays outside the discharge tube; worked on photoelectricity; Nobel Prize, 1905.
- L'Enfant, Pierre Charles** (1754–1825), French engineer. Designed Washington, D.C.
- Lennard-Jones, John Edward** (1894–1954), English physicist and chemist. Proposed Lennard-Jones potential for interatomic forces; contributed to quantum theory of molecular structure and statistical mechanics of liquids, gases, and surfaces.
- Lenz, Heinrich Friedrich Emil** (1804–1865), German physicist. Formulated Lenz's law governing induced current.
- Leverrier, Urbain Jean Joseph** (1811–1877), French astronomer. Studied Mercury, Uranus, and Neptune; credited, with J. C. Adams in England, as discoverer of Neptune.
- Levi-Civita, Tullio** (1873–1941), Italian mathematician and mathematical physicist. With G. Ricci-Curbastro, developed tensor analysis; introduced concept of parallelism in curved spaces.
- Levi-Montalcini, Rita** (1909– ), Italian biologist. With S. Cohen, made landmark studies of nerve growth factor and its functions; Nobel Prize, 1986.
- Lewis, Edward B.** (1918–2004), American geneticist. Shared in discoveries showing the genetic involvement of early embryonic development with C. Nusselin-Volhard and E. F. Wieschaus; Nobel Prize, 1995.
- Lewis, Gilbert Newton** (1875–1946), American chemist. Collaborated in developing the Lewis-Langmuir atomic theory; worked on the electronic theory of valency and chemical thermodynamics.
- Leydig, Franz von** (1821–1908), German histologist and anatomist. Founder of comparative histology; promoted use of microscope in anatomical study; described cells in testes believed to secrete male hormones.
- L'Hôpital (l'Hôpital), Guillaume François Antoine de, Marquis de Sainte-Mesme, Comte d'Entremont** (1661–1704), French mathematician. Wrote first textbook on differential calculus, which gives l'Hôpital's rule.
- Libby, Willard Frank** (1908–1980), American chemist. Developed the method of radiocarbon dating; Nobel Prize, 1960.
- Lie, Marius Sophus** (1842–1899), Norwegian mathematician. Originated the theory of tangential transformations.
- Liebig, Justus, Baron von** (1803–1873), German chemist. Discovered chloroform and chloral;
- founded agricultural chemistry; invented the Liebig condenser.
- Linnaeus, Carolus, real name Carl von Linné** (1707–1778), Swedish botanist. Developed the Linnaean system of biological classification.
- Lions, Pierre-Louis** (1956– ), French mathematician. Made important contributions to the theory of nonlinear partial differential equations; Fields Medal, 1994.
- Liouville, Joseph** (1809–1882), French mathematician. Proved existence of transcendental functions; developed concept of geodesic curvature; originated theory of doubly periodic functions.
- Lipmann, Fritz Albert** (1899–1986), German-born American biochemist. Formulated general rules for the biotechnology of energy transmission; discovered coenzyme A; Nobel Prize, 1953.
- Lippmann, Gabriel** (1845–1921), French physicist. Produced the first colored photograph of the light spectrum; invented the Lippmann capillary electrometer; Nobel Prize, 1908.
- Lipscomb, William Nunn, Jr.** (1919– ), American physical chemist. Studied structure and bonding of boranes, providing insight into nature of chemical bonding; Nobel Prize, 1976.
- Lissajous, Jules Antoine** (1822–1880), French physicist. Invented the vibration microscope, involving Lissajous figures.
- Lister, Joseph, 1st Baron** (1827–1912), English surgeon. Introduced antiseptics to surgery; pioneered in bacteriology.
- Littlewood, John Endensor** (1885–1977), British mathematician. Work on diophantine approximation, Tauberian theorems, Fourier series and associated function theory, the zeta function, additive number theory, and inequalities.
- Littrow, Joseph Johann von** (1781–1840), Austrian astronomer. Studied light refraction; worked on telescope construction.
- Lloyd, Humphrey** (1800–1881), Irish physicist. Discovered Lloyd's mirror interference; verified W. R. Hamilton's prediction of conical refraction.
- Lobachevski, Nikola Ivanovich** (1793–1856), Russian mathematician. Originated the first comprehensive system of noneuclidean geometry.
- Loewi, Otto** (1873–1961), German pharmacologist. Investigated nerve impulses; proved the role of ace-tylcholine in nerve impulse transmission; Nobel Prize, 1936.
- Löffler, Friedrich August Johannes** (1852–1915), German bacteriologist. Isolated the diphtheria (Klebs-Löffler) bacillus; developed protective serum against foot-and-mouth disease.
- London, Fritz** (1900–1954), German-born American physicist. Developed, with W. Heitler, theory of covalent bonding; with H. London, theory of superconductivity; and theory of superfluidity.
- London, Heinz** (1907–1970), German-born English physicist. Research on electrodynamic and thermodynamic behavior of superconductors and properties of superfluid helium.
- Lorentz, Hendrik Antoon** (1853–1928), Dutch physicist. Proposed the electron theory to explain electromagnetic properties of materials; proposed the Lorentz-FitzGerald contraction and the Lorentz transformation, contributing to the theory of relativity; studied Zeeman effect; Nobel Prize, 1902.
- Lorenz, Konrad Zacharias** (1903–1989), Austrian zoologist. Pioneered in study of animal behavior patterns; discovered imprinting in birds; Nobel Prize, 1973.
- Loschmidt, Johann Joseph** (1821–1895), Austrian physicist and chemist, born in Bohemia. Worked on graphical and structural molecular formulas; attempted to estimate size of air molecules and number of air molecules per unit volume.
- Lowry, Thomas Martin** (1874–1936), British chemist. Simultaneously with Johannes Brønsted, defined acid-base theory in terms of proton transfer—the Brønsted-Lowry theory (of acids and bases).
- Lummer, Otto Richard** (1860–1925), German physicist. Codeveloper of Lummer-Brodhun sight box and Lummer-Gehrcke plate; constructed an improved bolometer.
- Luria, Salvador Edward** (1912–1991), Italian-born American biologist. Devised fluctuation test

- to demonstrate and study spontaneous mutations in bacteria and viruses; Nobel Prize, 1969.
- Lwoff, André Michael** (1902–1994), French biologist. Explained the phenomenon of lysogeny in bacteria; Nobel Prize, 1965.
- Lyapunov, Aleksandr Mikhailovich** (1857–1918), Soviet mathematician and physicist. Determined in what cases linear approximations can be used to solve the problem of stability of a mechanical system with a finite number of degrees of freedom; proved existence of various figures of equilibrium for a rotating liquid.
- Lyell, Charles** (1797–1875), British geologist. Wrote *Principles of Geology*, refuting catastrophic theory of geological changes.
- Lyman, Theodore** (1874–1954), American physicist. Observed ultraviolet spectra; clarified nature of Lyman ghosts; discovered Lyman series.
- Lynen, Feodor** (1911–1979), German biochemist. Research on the formation of the cholesterol molecule; discovered chemistry of biotin; Nobel Prize, 1964.
- Lyot, Bernard Ferdinand** (1879–1952), French astronomer. Invented the coronagraph and developed monochromatic filters that greatly extended knowledge of the solar corona.
- MacDiarmid, Alan G.** (1927– ), New Zealand-born American chemist. Discovered and developed conductive polymers with Hideki Shirakawa and Alan Heeger; Nobel Prize, 2000.
- Mach, Ernst** (1838–1916), Austrian physicist. Research on supersonic flight, leading to Mach angle and Mach number; studied airflow over objects at high speeds.
- MacKinnon, Roderick** (1956– ), American medical doctor and scientist. Determined structure and mechanism of ion channels in cell membranes; Nobel Prize, 2003.
- Maclaurin, Colin** (1698–1746), Scottish mathematician. Systematized and developed Newton's calculus; introduced Maclaurin series and Maclaurin-Cauchy test.
- Macleod, John James Rickard** (1876–1935), Scottish physiologist. Shared in discovery of insulin with F. G. Banting and C. H. Best; Nobel Prize, 1923.
- Magnus, Heinrich Gustav** (1802–1872), German physicist and chemist. Made first quantitative analysis of blood gases; showed that arterial blood has higher oxygen content than venous blood; discovered Magnus effect.
- Majorana, Ettore** (1906–1938), Italian physicist. Studied properties of elementary particles; postulated Majorana force.
- Maksutov, Dmitry Dmitrievich** (1896–1964), Soviet physicist and astronomer. Developed general theory of aplanatic optical systems; developed Maksutov system.
- Malpighi, Marcello** (1628–1694), Italian anatomist. Discovered the capillaries; made microscopic studies in embryology; discovered the Malpighian layer of the epidermis and the Malpighian corpuscles in the kidney.
- Malus, Étienne Louis** (1775–1812), French engineer and physicist. Formulated Malus' cosine-squared law concerning polarized light and Malus' law of rays.
- Mandelstam, Stanley** (1928– ), American physicist, born in South Africa. Research in theoretical physics of elementary particles; introduced Mandelstam plane and Mandelstam representation.
- Mansfield, Peter** (1933– ), British physicist. Developed mathematical techniques for capturing, analyzing, and processing magnetic resonance signals more efficiently, making it possible to produce three-dimensional images of internal organs. Nobel Prize, 2003.
- Marconi, Guglielmo, Marquis** (1874–1937), Italian electrician and inventor. Developed commercial wireless telegraphy; Nobel Prize, 1909.
- Margulis, Gregori Aleksandrovich** (1946– ), Russian mathematician. Worked in combinatorics, differential geometry, ergodic theory, dynamical systems, and Lie groups; developed innovative analysis of the structure of Lie groups, describing their discrete subgroups; Fields Medal, 1978.
- Mariotte, Edmé** (?–1684), French physicist and physiologist. Discovered blind spot; studied circulation of sap in plants, collisions of bodies, properties of air, refraction and color of light, hydrostatics, hydraulics, and meteorology.
- Marcus, Rudolph Arthur** (1923– ), Canadian-born American chemist. Developed the mathematical analysis for electron transfer reactions in chemical systems; Nobel Prize, 1992.
- Mark, Herman Francis** (1895–1992), Austrian-born American chemist. Elucidated molecular structures of natural and synthetic polymers; developed theory of polymerization; studied relation between structure and properties of macromolecular systems.
- Markov, Andrei Andreevich** (1856–1922), Russian mathematician. Formulated rigorous proofs of law of large numbers and central-limit theorem; introduced Markov chain.
- Martin, Archer John Porter** (1910–2002), English chemist. With R. L. M. Synge, developed partition chromatography; Nobel Prize, 1952.
- Mascheroni, Lorenzo** (1750–1800), Italian mathematician. Calculated Euler's constant; proved that all plane construction problems that can be solved with a ruler and compass can also be solved with a compass alone.
- Mathieu, Emile Leonard** (1835–1890), French mathematician and physicist. Worked on solution of partial differential equations; research in celestial and analytical mechanics; studied Mathieu equation and introduced Mathieu functions.
- Matthias, Bernd Teo** (1919–1980), German-born American physicist. Tested metals and alloys for superconductivity; developed empirical rules to predict new superconducting materials.
- Mauder, Edward Walter** (1851–1928), British astronomer. Observations of the sun, sunspots and eclipses.
- Maupeirtuis, Pierre Louis Moreau de** (1698–1759), French mathematician and astronomer. Discovered the principle of least action; mathematical writings on the properties of curves.
- Maxwell, James Clerk** (1831–1879), Scottish physicist. Formulated the electromagnetic theory of light and the Maxwell distribution of molecular velocities of gases; invented the Maxwell disk concerning color vision.
- Mayall, Nicholas Ulrich** (1906–1993), American astronomer. Research on nebulae, globular star clusters, and external galaxies.
- Mayer, Julius Robert von** (1814–1878), German physicist. Discovered the principle of conservation of energy.
- Mayer, Maria Goeppert** (1906–1972), German-born American nuclear physicist. With J. H. D. Jensen, discovered nuclear shell structure; Nobel Prize, 1963.
- McClintock, Barbara** (1902–1992), American geneticist. Discovered mobile genetic elements known as jumping genes; Nobel Prize, 1983.
- McCoy, Elijah** (1844–1929), Canadian-born American inventor. Educated in Scotland as a mechanical engineer, this son of former slaves is best known for inventing automatic lubricating systems for steam engines and industrial machines, greatly advancing the Industrial Revolution; the popularity of his products is believed to have led to the American expression "the real McCoy."
- McMillan, Edwin Mattison** (1907–1991), American physicist. Discovered element 93 (neptunium), which led to the creation of element 94 (plutonium); conceived the theory of phase stability; Nobel Prize, 1951.
- McMullen, Curtis Tracy** (1958– ), American mathematician. Worked in hyperbolic geometry and in complex dynamics, also known as chaos theory; Fields Medal, 1998.
- Meckel, Johann Friedrich** (1781–1833), German anatomist and embryologist. Gave first comprehensive description of birth defects; described Meckel's cartilage; discovered Meckel's diverticulum.
- Medawar, Peter Brian** (1915–1987), Brazilian-born British biologist and medical scientist. Discovered acquired immunological tolerance; Nobel Prize, 1960.
- Meissner, Alexander** (1883–1958), Austrian-born German radio engineer. Helped develop improved electrical insulators and continuous-wave transmission; invented Meissner oscillator.
- Meissner, Walther** (1882–1974), German physicist. Research in low-temperature physics; discovered Meissner effect.
- Meitner, Lise** (1878–1968), German physicist. With O. Hahn, discovered protactinium; found evidence of four other radioactive elements; with Hahn and F. Strassmann, accomplished fission of uranium.
- Mendel, Gregor Johann** (1822–1884), Austrian botanist. Formulated Mendel's laws of heredity, the foundation of genetics.
- Mendeleev, Dmitri Ivanovich** (1834–1907), Russian chemist. Formulated Mendeleev's periodic law and table of the elements; research on interatomic and intermolecular forces.
- Menelaus of Alexandria** (1st century), Greek mathematician and astronomer. Founded spherical trigonometry.
- Mercator, Gerhardus, real name Gerhard Kremer** (1512–1594), Flemish geographer. Created a chart of the world (Mercator projection); made surveying instruments.
- Mercer, John** (1791–1866), English chemist. Invented the mercerizing process for cotton.
- Merrifield, Robert Bruce** (1921– ), American biochemist. Developed methods of protein synthesis, including solid-phase peptide synthesis that produces proteins by assembling amino acids sequentially into peptide chains; Nobel Prize, 1984.
- Mersenne, Marin** (1588–1648), French physicist. Showed that pitch is proportional to frequency and calculated frequencies of musical notes; discovered Mersenne's law for vibrating strings, and similar relations for wind and percussion instruments.
- Messier, Charles** (1730–1817), French astronomer. Credited with discovering 21 comets; compiled a catalog of nebulae.
- Metchnikoff, Élie** (1845–1916), Russian-born French zoologist and bacteriologist. Work on cholera and immunology; Nobel Prize, 1908.
- Meusnier de la Place, Jean Baptiste Marie Charles** (1754–1793), French mathematician, physicist, and chemist. Derived Meusnier's theorem of curvature of surface curve; with A. L. Lavoisier, did research on analysis and synthesis of water.
- Meyerhof, Otto Fritz** (1884–1951), German physiologist. Studied the glycogen-lactic acid cycle of muscles; Nobel Prize, 1923.
- Michaelis, Leonor** (1875–1949), German-born American biochemist. Developed theory of kinetics of enzyme-catalyzed reactions.
- Michel, Hartmut** (1948– ), German chemist. With J. Deisenhofer and R. Huber, elucidated the structure of a bacterial protein that performs photosynthesis; Nobel Prize, 1988.
- Michelson, Albert Abraham** (1852–1931), American physicist. Experimented on the velocity of light with S. Newcomb; invented the Michelson interferometer; performed, with E. W. Morley, an experiment to determine the Earth's motion through the ether; Nobel Prize, 1907.
- Mie, Gustav** (1868–1957), German physicist. Carried out rigorous electrodynamic calculation of Mie scattering; attempted to formulate theory of matter.
- Miller, William Hallows** (1801–1880), British crystallographer and mineralogist. Introduced Miller indices for identifying crystallographic planes.
- Millikan, Robert Andrews** (1868–1953), American physicist. Determined an accurate value for Planck's constant; originated the "oil drop" experiment to measure electronic charge; work on x-rays and cosmic rays; Nobel Prize, 1923.
- Milnor, John Willard** (1931– ), American mathematician. Proved that a seven-dimensional sphere can have several differential structures, opening up the new field of differential topology; contributions to algebraic K theory, differential

- geometry, and algebraic topology; Fields Medal, 1962.
- Milstein, César** (1927–2002), British immunologist. With Georges J. F. Köhler, discovered a laboratory technique for producing monoclonal antibodies, highly uniform immune bodies that are selective in responding to target substances; Nobel Prize, 1984.
- Minkowski, Hermann** (1864–1909), Russian-born German mathematician. Studied the mathematical basis of relativity, notably the concept of the space-time continuum.
- Minot, George Richards** (1885–1950), American physician. With W. P. Murphy, first to recognize the value of liver therapy for pernicious anemia; studied arthritis, cancer, and vitamin B deficiency; Nobel Prize, 1934.
- Mitchell, Peter** (1920–1992), British chemist. Explained how plant and animal cells store and transfer energy by creating protonic gradients in the oxidative and photosynthetic phosphorylation processes; Nobel Prize, 1978.
- Möbius, August Ferdinand** (1790–1868), German mathematician and astronomer. Founder of topology; developed the Möbius strip.
- Mohl, Hugo von** (1805–1872), German botanist. Worked on the anatomy and physiology of higher plant forms; discovered protoplasm.
- Mohorovičić, Andrija** (1857–1936), Yugoslav meteorologist and seismologist. Discovered Mohorovičić seismic discontinuity.
- Mohr, Carl Friedrich** (1806–1879), German chemist. Developed titration procedures, including use of Mohr's salt.
- Mohr, Christian Otto** (1835–1918), German civil engineer. Studied stresses and strains of bodies, and failure of materials; introduced Mohr's stress circle.
- Mohs, Friedrich** (1773–1839), German mineralogist. Developed Mohs scale of hardness.
- Moissan, Ferdinand Frédéric Henri** (1852–1907), French chemist. First to isolate fluorine; invented an electric furnace and used it to produce synthetic metal compounds and samples of less common metals; Nobel Prize, 1906.
- Molina, Mario J.** (1943– ), American chemist. Demonstrated that chemically inert chlorofluorocarbon (CFC) could be transported up to the ozone layer and could react with ultraviolet light and deplete the ozone layer; Nobel Prize, 1995.
- Mollier, Richard** (1863–1935), German physicist and engineer. Presented properties of thermodynamic media in form of charts and diagrams; introduced concept of enthalpy and Mollier diagram.
- Moniz, Antonio Egas** (1874–1955), Portuguese neurosurgeon. Developed cerebral angiography; introduced the prefrontal lobotomy; Nobel Prize, 1949.
- Monod, Jacques** (1910–1976), French biologist. With F. Jacob, proposed the concepts of messenger ribonucleic acid and of the operon; Nobel Prize, 1965.
- Moody, Lewis Ferry** (1880–1953), American hydraulic engineer. Made improvements in hydraulic turbines, pumps, and accessories.
- Moore, Stanford** (1913–1982), American biochemist. With W. H. Stein, developed technique for determining amino acid sequence in proteins, and applied it to ribonuclease; Nobel Prize, 1972.
- Mordell, Louis Joel** (1888–1972), American-born British mathematician. Worked in number theory; proved the finite basis theorem concerning the finite generation of the group of rational points on an elliptic curve; conjectured that there are only finitely many rational points on a curve of genus greater than 1 (the Mordell conjecture).
- Morgagni, Giovanni Battista** (1682–1771), Italian anatomist. Founded pathological anatomy; first to describe liver cirrhosis.
- Morgan, Thomas Hunt** (1866–1945), American geneticist, embryologist, and zoologist. Proposed the chromosome theory of heredity; Nobel Prize, 1933.
- Morgan, William Wilson** (1906–1994), American astronomer. Developed methods for investigating more precisely the structure of the Milky Way Galaxy and of other galaxies; collaborated in developing the Johnson-Morgan system of stellar magnitudes (with H. L. Johnson) and Bautz-Morgan classification of galaxy clusters (with L. P. Bautz).
- Mori, Shigefumi** (1951– ), Japanese mathematician. Worked in algebraic geometry, particularly on the classification of algebraic varieties of dimension three; Fields Medal, 1990.
- Morley, Edward Williams** (1838–1923), American chemist and physicist. Associated with A. A. Michelson in an experiment on ether drift; research on variations of atmospheric oxygen content.
- Morse, Samuel Finley Breese** (1871–1872), American inventor. Invented the receiving and sending instruments for the telegraph, and a code for sending messages.
- Moseley, Henry Gwyn Jeffries** (1887–1915), English physicist. Discovered Moseley's law for frequency of x-ray spectral lines.
- Mössbauer, Rudolf Ludwig** (1929– ), German physicist. Discovered the property of recoilless resonance absorption, the ability of some nuclei to emit and absorb gamma rays without energy loss; Nobel Prize, 1961.
- Mossotti, Ottaviano Fabrizio** (1791–1863), Italian physicist. Developed theory of dielectrics, from which he derived the Clausius-Mossotti equation.
- Mott, Nevill Francis** (1905–1996), British physicist. Applied quantum mechanics to study of charged particle scattering; with R. W. Gurney, developed Gurney-Mott theory of photographic process; introduced fundamental concepts elucidating electronic properties of disordered materials; Nobel Prize, 1977.
- Mottelson, Ben Roy** (1926– ), American-born Danish physicist. With A. Bohr, developed theory which unifies shell and liquid-drop models of atomic nucleus, and which explains nonspherical nuclei; Nobel Prize, 1975.
- Muller, Hermann Joseph** (1890–1967), American geneticist. Studied genetic mutation rates under natural and artificial conditions; discovered the effect of x-rays on mutation rate; Nobel Prize, 1946.
- Müller, Johannes Peter** (1801–1858), German physiologist and anatomist. Proposed the principle of specific nerve energies, concerning stimuli to sense organs; discovered the Müllerian duct, an early embryonic structure.
- Müller, Karl Alex** (1927– ), Swiss physicist. With J. G. Bednorz, discovered high-temperature superconductivity in copper oxide ceramic materials; Nobel Prize, 1987.
- Müller, Paul Hermann** (1899–1965), Swiss chemist. Discovered the insecticidal properties of DDT; Nobel Prize, 1948.
- Mulliken, Robert Sanderson** (1896–1986), American chemist. Applied principles of quantum mechanics to study of chemical bonding; with F. Hund, systematized electronic states of molecules in terms of molecular orbitals; Nobel Prize, 1966.
- Mullis, Kary B.** (1944– ), American chemist. Invented the polymerase chain reaction (PCR) method used for studying DNA molecules; Nobel Prize, 1993.
- Mumford, David Bryant** (1937– ), American mathematician. Worked in algebraic geometry, especially on problems of the existence and structure of varieties of moduli and on the theory of algebraic surfaces; Fields Medal, 1974.
- Murad, Ferid** (1936– ), American pharmacologist. Analyzed the action of nitroglycerin and related vasodilating compounds, leading to the discovery that they release nitric oxide, which relaxes smooth muscle cells; his work, along with the research of Robert F. Furchgott and Louis J. Ignarro, led to the discovery of nitric oxide as a signaling molecule in the cardiovascular system; Nobel Prize, 1998.
- Murchison, Roderick Impey** (1792–1871), British geologist. Studied the order of rock formations in Great Britain; with A. Sedgwick, differentiated the Silurian and Devonian.
- Murphy, William Parry** (1892–1987), American physician. With G. R. Minot, first to suggest liver diet as a treatment for pernicious anemia; Nobel Prize, 1934.
- Murray, Joseph** (1919– ), American physician. Performed the first successful transplant of a human organ, a kidney; with E. D. Thomas, helped define and then overcome the immunological mechanisms behind organ rejection; Nobel Prize, 1990.
- Napier or Neper, John, Laird of Merchiston** (1550–1617), Scottish mathematician. Invented the theory of logarithms and developed methods to compute them.
- Nathans, Daniel** (1928–1999), American biologist. Pioneered in the use of restriction enzymes to study the structure and functions of deoxyribonucleic acid (DNA) molecules; Nobel Prize, 1978.
- Natta, Giulio** (1903–1979), Italian chemist. Discovered stereospecific polymerization, making possible the production of new classes of macromolecules from inexpensive raw materials; Nobel Prize, 1963.
- Navier, Claude Louis Marie Henri** (1785–1836), French physicist and engineer. Studied analytical mechanics and its application to strength of materials, machines, and motion of solid and liquid bodies; formulated Navier-Stokes equations.
- Néel, Louis Eugène Félix** (1904–2000), French physicist. Proposed the theory of behavior of antiferromagnetic and other ferrimagnetic materials in which the crystal lattice is divided into one or more sublattices; Nobel Prize, 1970.
- Neher, Erwin** (1944– ), German biophysicist. With B. Sakmann, using the "patch clamp" technique they developed, showed how individual ion channels control the passage of charged ions into and out of cells; Nobel Prize, 1991.
- Nernst, Hermann Walther** (1864–1941), German chemist. Proposed the heat theorem (third law of thermodynamics); determined the specific heat of solids at low temperatures; proposed the chain reaction theory in photochemistry; Nobel Prize, 1920.
- Neumann, Carl Gottfried** (1832–1925), German mathematician. Believed to be founder of logarithmic potentials; developed the potential theory.
- Newcomb, Simon** (1835–1909), American astronomer. With A. A. Michelson, determined the velocity of light; studied the motions of the Moon and planets.
- Newton, Isaac** (1642–1727), English mathematician. Proposed a dynamical theory of gravitation; discovered three basic laws of motion which are the foundation of practical mechanics; made discoveries in optics and mathematics.
- Neyman, Jerzy** (1894–1981), Russian-born American statistician. Developed methodology for making decisions based only on results of experiments or observations subject to chance.
- Nicholson, Seth Barnes** (1891–1963), American astronomer. Discovered four satellites of Jupiter; with E. Petit, invented a thermocouple to measure surface temperature of planets.
- Nicol, William** (1763–1851), Scottish physicist. Invented the Nicol prism for investigating the polarization of light.
- Nicolle, Charles Jules Henri** (1866–1936), French physician. Discovered the louse to be the transmission vector of typhus; Nobel Prize, 1928.
- Nicomedes** (3d century B.C.), Greek mathematician. Discovered the conchoid.
- Nirenberg, Marshall Warren** (1927– ), American biochemist. Pioneered in deciphering genetic code; Nobel Prize, 1968.
- Nishina, Yoshio** (1890–1951), Japanese physicist. Pioneer in study of cosmic rays; with O. B. Klein, originated the Klein-Nishina formula.
- Nobel, Alfred Bernhard** (1833–1896), Swedish chemist and engineer. Invented dynamite and a blasting gelatin containing nitroglycerin; established the annual Nobel prizes.
- Noguchi, Hideyo** (1876–1928), Japanese bacteriologist. First to produce pure cultures of syphilis spirochetes; discovered the parasite of yellow fever.
- Norrish, Ronald George Wreyford** (1897–1978), British physical chemist. With G. Porter and colleagues, developed methods of flash photolysis

- and kinetic spectroscopy for the study of very fast reactions; Nobel Prize, 1967.
- Northrop, John Howard** (1891–1987), American biochemist. Isolated several enzymes and proved them to be proteins; isolated the first bacterial virus; established the chemical nature of enzymes and viruses; Nobel Prize, 1946.
- Novikov, Sergi Petrovich** (1938– ), Russian mathematician. Worked in algebraic topology; proved the topological invariance of the Pontryagin classes of a differentiable manifold; studied the cohomology and homotopy of Thom spaces; Fields Medal, 1970.
- Noyce, Robert Norton** (1927–1990), American physicist, electronics engineer, and inventor. Participated in the invention of the integrated circuit.
- Noyori, Ryoji** (1938– ), Japanese chemist. Developed chirally catalyzed hydrogenation reactions; Nobel Prize, 2001.
- Nurse, Paul M.** (1949– ), British biologist. Identified, cloned, and characterized a key regulator of the cell cycle, cyclin-dependent kinase; Nobel Prize, 2001.
- Nusselt, Ernst Kraft Wilhelm** (1882–1957), German mechanical engineer and physicist. Used dimensional analysis to derive functional form of solutions to equations for heat flux in a flowing fluid.
- Nüsslein-Volhard, Christiane** (1942– ), German developmental biologist. Using *Drosophila*, she and Eric Wieschaus identified and classified a small number of genes that are important in determining the body plan and the formation of body segments; their work, along with that of American developmental biologist Edward B. Lewis, led to the discovery of important genetic mechanisms which control early embryonic development; Nobel Prize, 1995.
- Nyquist, Harry** (1889–1976), Swedish-born American physicist and engineer. Discovered conditions necessary to keep feedback control circuits stable; determined Nyquist rate for communications channels.
- Ochoa, Severo** (1905–1993), Spanish-born American biochemist. Discovered a bacterial enzyme that synthesizes ribonucleic acid from nucleoside diphosphates; first to synthesize a ribonucleic acid; Nobel Prize, 1959.
- Ockham, William** of (ca. 1284–1347), English philosopher and theologian. Developed nominalist school of thought; postulated Ockham's razor.
- Oersted, Hans Christian** (1777–1851), Danish physicist, chemist, and electromagnetist. Discovered a fundamental principle of electromagnetism: a magnetic needle turns at right angles to an electric current.
- Ohm, Georg Simon** (1787–1854), German physicist. Discovered Ohm's law relating electrical resistance to voltage and current.
- Olah, George A.** (1927– ), American chemist. Made fundamental contributions in carbocation chemistry; Nobel Prize, 1994.
- Olbers, Heinrich Wilhelm Matthias** (1758–1840), German astronomer. Devised new method for computing cometary orbits; proposed Olbers' paradox.
- Onsager, Lars** (1903–1976), Norwegian-born American chemist. Laid the foundation of irreversible thermodynamics; contributed to theories of dielectrics, electrolytes, and cooperative phenomena; Nobel Prize, 1968.
- Oort, Jan Hendrik** (1900–1992), Dutch astronomer. Research on the structure and dynamics of the galactic system; investigated the origin of comets.
- Oppenheimer, J. Robert** (1904–1967), American physicist. Research on nuclear disintegration, quantum theory, cosmic rays, and relativity; directed production of the atomic bomb.
- Orr, John Boyd, Baron** (1880–1971). Scottish physiologist and nutritionist. Work on animal nutrition; pioneer in science of human nutrition; Nobel Peace Prize, 1949.
- Osheroff, Douglas D.** (1945– ), American physicist. With D. M. Lee and R. C. Richardson, discovered superfluidity in helium-3; Nobel Prize, 1996.
- Ostwald, Friedrich Wilhelm** (1853–1932), German chemist born in Latvia. Researches on affinity and mass action; discovered the Ostwald dilution law; worked on the catalytic oxidation of ammonia; Nobel Prize, 1909.
- Otto, Nikolaus August** (1832–1891), German inventor. Built the first four-stroke internal combustion engine.
- Paget, James** (1814–1899), English surgeon and pathologist. Studied pathology of tumors and bone and joint diseases; described osteitis deformans (Paget's disease).
- Palade, George Emil** (1912– ), Rumanian born American cytologist. Applied electron microscope and centrifuge techniques to study of ultrastructure of cells; discovered ribosomes; Nobel Prize, 1974.
- Papanicolaou, George Nicholas** (1883–1962), Greek-born American cytologist and anatomist. Developed the Papanicolaou test for diagnosis of uterine cervical and endometrial cancer.
- Pappus, Alexandrinus** (ca. 3d–4th century), Greek mathematician. Wrote *Mathematical Collection*, an account of Greek geometry; formulated Pappus' theorems.
- Paracelsus, Philippus Aureolus, real name Theophrastus Bombastus von Hohenheim** (1493–1541), Swiss physician. Emphasized use of chemicals in medicine; advocated that diseases are specific and require specific remedies.
- Paré, Ambroise** (1509–1590), French surgeon. Advocated the treatment of wounds by tying arteries with ligatures rather than by cauterization; proposed improvements in operating methods.
- Parkinson, James** (1755–1824), English physician and paleontologist. Described parkinsonism.
- Parseval des Chenes, Marc Antoine** (1755–1836), French mathematician. Introduced an equation from which the theorem now known as Parseval's theorem is derived.
- Pascal, Blaise** (1623–1662), French mathematician and physicist. Contributed to the geometry of conics; formulated Pascal's law, relating to the pressure of a liquid at rest; applied Pascal's triangle to the calculation of probabilities.
- Paschen, Louis Carl Heinrich Friedrich** (1865–1947), German physicist. Established Paschen's law; with E. Back, discovered Paschen-Back effect; verified predictions of relativistic fine structure made by Bohr-Sommerfeld theory.
- Pasteur, Louis** (1822–1895), French biologist. Founder of microbiology; discovered the role of bacteria in fermentation; discovered anaerobic bacteria; developed the pasteurization process; demonstrated the efficacy of vaccination, especially for rabies.
- Patterson, Arthur Lindo** (1902–1966), New Zealand-born American physicist and crystallographer. Developed Patterson-Harker method of x-ray diffraction analysis of crystal structure.
- Paul, Wolfgang** (1913–1993), German physicist. Invented the Paul trap, which uses radio-frequency radiation to hold ions in a small volume; Nobel Prize, 1989.
- Pauli, Wolfgang** (1900–1958), Austrian-born American physicist. Worked on quantum theory; formulated the Pauli exclusion principle; contributed to matrix mechanics; Nobel Prize, 1945.
- Pauling, Linus Carl** (1901–1994), American chemist. Applied quantum theory to chemistry; research on molecular structure and chemical bonds; contributed to electrochemical theory of valency; Nobel Prize, 1954; Nobel Peace Prize, 1963.
- Pavlov, Ivan Petrovich** (1849–1936), Russian pathologist. Discovered the nerve fibers affecting heart action and the secretory nerves of the pancreas; research on the physiology of digestive glands; studied conditioned reflexes; Nobel Prize, 1904.
- Peano, Giuseppe** (1858–1932), Italian mathematician. Pioneer in symbolic logic and foundations of mathematics; promoted axiomatic method in mathematics; formulated postulates for natural numbers.
- Pearl, Raymond** (1879–1940), American biologist and statistician. Applied statistics to the study of population changes; introduced logistic curve describing population growth.
- Pearson, Karl** (1857–1936), English applied mathematician, statistician, and biometrician. Pioneered in application of statistics to biology; introduced chi-square test.
- Pedersen, Charles J.** (1904–1989), American chemist. Developed the synthesis of cyclic polyethers known as crown ethers; Nobel Prize, 1987.
- Peierls, Rudolf Ernst** (1907–1995). German-born British physicist. Developed theory of heat conduction in nonmetallic crystals; with O. R. Frisch, calculated critical mass of uranium-235.
- Peirce, Charles Santiago Sanders** (1839–1914), American mathematician, logician, and physicist. Laid foundation for logical analysis of mathematics; contributed to probability theory.
- Pelletier, Pierre Joseph** (1788–1842), French chemist. Discovered quinine, strychnine, and other alkaloids.
- Peltier, Jean Charles Athanase** (1785–1845), French physicist. Discovered the Peltier effect in thermoelectricity.
- Penrose, Roger** (1931– ), British mathematician and physicist. Developed twistor theory of space-time geometry; studied singularities in classical general relativity theory.
- Penzias, Arno A.** (1933– ), American astrophysicist. With R. W. Wilson, discovered cosmic background radiation, confirming the big bang theory of the origin of the universe; Nobel Prize, 1978.
- Perl, Martin L.** (1927– ), American physicist. Discovered the tau lepton, a fundamental particle; Nobel Prize, 1995.
- Pérot, Jean Baptiste Gaspard Gustav Alfred** (1863–1925), French physicist. With C. Fabry, developed Fabry-Pérot interferometer.
- Perrin, Jean Baptiste** (1870–1942), French physicist. Research on the particle nature of cathode rays; found values for Avogadro's number, thereby proving the existence of molecules; Nobel Prize, 1926.
- Perutz, Max Ferdinand** (1914–2002), Austrian-born British crystallographer and molecular biologist. Worked on the structure of hemoglobin; introduced the method of isomorphous replacement with heavy atoms into protein crystallography; Nobel Prize, 1962.
- Petit, Alexis Thérèse** (1791–1820), French physicist. With P. L. Dulong, formulated the law of constancy of atomic heats; devised methods for determining thermal expansion and specific heats of solids.
- Pettit, Edison** (1890–1962). American astronomer. Studied the Sun and formulated laws alleged to govern the movement of prominences; constructed the interference polarizing monochromator; with S. B. Nicholson, devised a sensitive thermocouple to measure the surface temperatures of planets.
- Pfaff, Johann Friedrich** (1765–1825), German mathematician. Developed theory of Pfaffian differential equations, which is basic to general solution of partial differential equations.
- Pfeiffer, Richard Friedrich Johann** (1858–1945), German bacteriologist. Discovered Pfeiffer's bacillus in influenza; described Pfeiffer's reaction for determination of cholera.
- Phillips, William Daniel** (1948– ), American physicist. Developed a method of slowing and trapping atoms in an atomic beam by using an opposed laser beam and a magnetic trap, and cooled these atoms to temperatures lower than the previously calculated theoretical limits; Nobel Prize, 1997.
- Piaget, Jean** (1896–1980), Swiss psychologist. Elucidated development of cognitive functions in the child.
- Picard, Charles Émile** (1856–1941), French mathematician. Formulated Picard's theorem relating to functions.
- Piccard, Auguste** (1884–1962), Swiss physicist. Conducted a data-collecting exploration of the stratosphere in an airtight gondola of a balloon; constructed and tested a bathysphere for deep-sea exploration.

- Pickering, Edward Charles** (1846–1919), American astronomer. Invented the meridian photometer; pioneered in stellar spectroscopy.
- Pierce, George Washington** (1872–1956). American physicist and electronic engineer. Developed theoretical basis of electrical communications; developed Pierce oscillator; with A. E. Kennelly, discovered concept of motional impedance.
- Pitzer, Kenneth Sanborn** (1914–1997), American chemist. Pioneered in the development of useful approximations which made possible the calculation of chemical thermodynamic properties of broad classes of chemical substances.
- Planck, Max Karl Ernst Ludwig** (1858–1947), German physicist. Presented the quantum theory; introduced Planck's constant, or quantum of action.
- Planté, Gaston** (1834–1889), French physicist. Constructed a storage battery, the first primitive accumulator.
- Plateau, Joseph Antoine Ferdinand** (1801–1883), Belgian physicist. Experimented with soapy films bounded by wires, noting that the surfaces formed were minimal surfaces; from this he formulated the Plateau problem (the problem of determining the existence of a minimal surface with a given space curve as its boundary).
- Podolsky, Boris** (1896–1966), Russian-born American physicist. Collaborated in formulation of Einstein-Podolsky-Rosen paradox; research on quantum electrodynamicism.
- Poggendorff, Johann Christian** (1796–1877), German physicist. Introduced the small mirror on a suspended system to magnify small deflections of a light beam; invented the galvanometer.
- Poincaré, Jules Henri** (1854–1912), French mathematician. Worked on the theory of functions, on differential equations, and on the theory of orbits in astronomy.
- Poinsoot, Louis** (1777–1859), French mathematician. Originated theory of couples.
- Poiseuille, Jean Léonard Marie** (1797–1869), French physiologist and physicist. Studied physiology of arterial circulation; invented improved methods for measuring blood pressure; discovered Hagen-Poiseuille law independently of G. H. L. Hagen.
- Poisson, Siméon Denis** (1781–1840), French mathematician. Worked on mathematical physics; contributed to the wave theory of light; formulated the Poisson ratio concerning the elasticity of materials.
- Poltzer, H. David** (1949– ), Discovered asymptotic freedom in the strong interactions (independent of D. J. Gross and F. Wilczek). Nobel Prize, 2004.
- Polonyi, John C.** (1929– ), Canadian chemist. Studied chemiluminescence, a phenomenon in which the energy states of excited molecules are revealed by their emission of light; Nobel Prize, 1986.
- Pomeranchuk, Isaak Yakolevich** (1913–1966), Soviet physicist. Showed that energy of cosmic-ray electrons reaching the atmosphere is limited by their radiation in Earth's magnetic field; proved the Pomeranchuk theorem for scattering cross sections.
- Pons, Jean Louis** (1761–1831), French astronomer. Discovered 37 comets, including Encke's comet.
- Pople, John A.** (1925–2004), British-born chemist. Developed computational methods in quantum chemistry; Nobel Prize, 1998.
- Porro, Ignazio** (1801–1875), Italian topographer, geodesist, and physicist. Invented optical surveying instruments, Porro prism erecting system, and modern prism binoculars.
- Porter, George** (1920–2002), British chemist. With R. G. W. Norrish, developed the technique of flash photolysis to initiate and record very fast chemical reactions; Nobel Prize, 1967.
- Porter, Rodney Robert** (1917–1985), British biochemist. Research to determine chemical structure of immunoglobulins; Nobel Prize, 1972.
- Powell, Cecil Frank** (1903–1969), British physicist. Made practical the use of photographic emulsions in nuclear research; with G. P. S. Occhialini and others, discovered and investigated production of pions from cosmic radiation in the Earth's atmosphere; Nobel Prize, 1950.
- Poynting, John Henry** (1852–1914), English physicist. Determined the constant of gravitation and explained why a comet's tail points away from the Sun.
- Prandtl, Ludwig** (1875–1953), German physicist. Contributed to fluid mechanics, particularly aerodynamics; introduced concept of boundary layer.
- Pregl, Fritz** (1869–1930), Austrian chemist. Developed microchemical methods of analysis; Nobel Prize, 1923.
- Prelog, Vladimir** (1906–1998), Yugoslavian-born Swiss chemist. Investigated stereochemistry of organic molecules and reactions; Nobel Prize, 1975.
- Prevost, Pierre** (1751–1839), Swiss physicist. Developed theory of exchanges, explaining nature of heat.
- Priestley, Joseph** (1733–1804), English chemist and physicist. Discovered oxygen, ammonia, oxides of nitrogen, hydrochloric acid gas, nitrogen, carbon monoxide, and sulfur dioxide.
- Prigogine, Ilya** (1917–2003), Soviet-born Belgian chemist. Contributed to nonequilibrium thermodynamics, particularly the theory of dissipative structures; Nobel Prize, 1977.
- Prokhorov, Aleksandr Mikhailovich** (1916–2002), Soviet physicist. With N. G. Basov, devised a new method for amplifying electromagnetic radiation; Nobel Prize, 1964.
- Prout, William** (1785–1850), English physician and chemist. Formulated Prout's hypothesis concerning atomic weights.
- Prusiner, Stanley B.** (1942– ), American neurologist. Discovered prions, a new biological agent of infection; Nobel Prize, 1997.
- Ptolemy** (2d century), Greco-Egyptian astronomer, geographer, and geometer at Alexandria. Proposed the Ptolemaic system, with the Earth as the center of the universe.
- Pupin, Michael** (1858–1935), Yugoslavian-born American physicist and electrical engineer. Developed inductance coils for telephone lines; contributed to x-ray fluoroscopy, design of radio transmitters, and network theory.
- Purcell, Edward Mills** (1912–1997), American physicist. Developed the method of nuclear resonance absorption; Nobel Prize, 1952.
- Purkinje, Johannes Evangelista** (1787–1869), Czech physiologist. Discovered the Purkinje effect in eye physiology and Purkinje cells in the cerebral cortex.
- Pythagoras** (6th century B.C.), Greek mathematician. Originated a system of geometry, including the Pythagorean theorem.
- Quételet, Lambert Adolphe Jacques** (1796–1874), Belgian statistician. Did pioneer work on statistics; applied the calculus of probabilities to sociological studies.
- Quillen, Daniel Gray** (1940– ), American mathematician. Developed algebraic K-theory, an extension of ideas of A. Grothendieck to commutative rings, which employed geometric and topological methods and ideas to formulate and solve major problems in algebra, particularly ring theory and module theory; Fields Medal, 1978.
- Rabi, Isidor Isaac** (1898–1988), Austrian-born American physicist. Research on neutrons, magnetism, quantum mechanics, and nuclear physics; Nobel Prize, 1944.
- Radó, Tibor** (1895–1965), Hungarian-American mathematician. Solved the Plateau problem (the problem of determining the existence of a minimal surface with a given space curve as its boundary) about the same time as J. Douglas.
- Radon, Johann** (1887–1956), Bohemian-born Austrian mathematician. Work in calculus of variations and integration theory.
- Rainwater, Leo James** (1917–1986), American physicist. Suggested that shell-model potentials of certain atomic nuclei are not spherical but are deformed into spheroids, and proposed mechanism for this distortion; Nobel Prize, 1975.
- Raman, Chandrasekhara Venkata** (1888–1970), Indian physicist. Research on diffraction and oscillation; discovered the Raman effect; Nobel Prize, 1930.
- Ramón y Cajal, Santiago** (1852–1934), Spanish histologist. Isolated the neuron and made discoveries concerning nerve cells in gray matter and the spinal cord; Nobel Prize, 1906.
- Ramsay, William** (1852–1916), British chemist. With J. W. S. Rayleigh, discovered argon; with M. W. Travers, discovered neon, krypton, and xenon; Nobel Prize, 1904.
- Ramsden, Jesse** (1735–1800), English mathematical-instrument maker. Invented an eyepiece containing cross-wires as a measuring scale; introduced equatorial mounting for telescopes.
- Ramsey, Norman Foster** (1915– ), American physicist. Invented an accurate method of measuring differences between atomic energy levels that formed the basis for the cesium atomic clock; worked on the hydrogen maser; Nobel Prize, 1989.
- Rankine, William John Macquorn** (1820–1872), Scottish civil engineer. Contributed to thermodynamics and theories of elasticity and waves; wrote textbooks on the steam engine and civil engineering.
- Raoult, François Marie** (1830–1901), French chemist. Formulated Raoult's law concerning vapor pressure of a solution.
- Rathke, Martin Heinrich** (1793–1860), German biologist. Discovered gill slits and gill arches in embryo birds and mammals, and Rathke's pocket in developing vertebrates.
- Ray or Wray, John** (1627?–1706), English naturalist. Identified the difference between mono- and dicotyledons; arranged plants according to their natural form, the foundation of the natural system of classification.
- Rayleigh, John William Strutt, 3d Baron** (1842–1919), English physicist. Worked on the theory of sound and on physical optics; with W. Ramsay, discovered argon; Nobel Prize, 1904.
- Réaumur, René Antoine Ferchault de** (1683–1757), French entomologist. Worked in biology and metallurgy; invented the Réaumur thermometer scale.
- Regge, Tullio** (1931– ), Italian physicist. Played a role in introducing the idea of complex angular momenta into elementary particle physics.
- Regiomontanus, real name Johann Müller** (1436–1476), German astronomer. Erected the first European observatory, in 1471 in Nürnberg; produced mathematical tables.
- Reichstein, Tadeus** (1897–1996), Polish-born Swiss organic chemist. Isolated about 30 of the 40 substances produced by the adrenal cortex; synthesized and described the structure and properties of many of these substances; Nobel Prize, 1950.
- Reines, Frederick** (1918–1998), American physicist. With C. L. Cowan, made first detection of the neutrino, a fundamental particle; Nobel Prize, 1995.
- Reynolds, Osborne** (1842–1912), British engineer and physicist. Demonstrated streamline and turbulent flow in pipes, and showed that transition between them occurs at a critical velocity determined by Reynolds' number; introduced Reynolds' analogy.
- Riccati, Jacopo Francesco** (1676–1754), Italian mathematician. Research on analysis, particularly differential equations, and geometry.
- Ricci-Curbastro, Gregorio** (1853–1924), Italian mathematician and mathematical physicist. Developed theory of tensor analysis, providing mathematical foundation for general relativity.
- Richards, Dickinson Woodruff** (1895–1973), American physician. With A. F. Courmand, utilized the technique of cardiac catheterization and proved its value as a diagnostic tool; Nobel Prize, 1956.
- Richards, Theodore William** (1868–1928), American chemist. Worked on atomic weights; experimentally confirmed the existence of isotopes of lead from uranium and thorium; Nobel Prize, 1914.

- Richardson, Owen Willans** (1879–1959), English physicist. Studied the emission of electricity from hot bodies and the electron theory of matter; Nobel Prize, 1928.
- Richardson, Robert Coleman** (1937– ), American physicist. With D. M. Lee and D. D. Osheroff, discovered superfluidity in helium-3; Nobel Prize, 1996.
- Richet, Charles Robert** (1850–1935), French physiologist. Studied serum therapy and discovered anaphylaxis; Nobel Prize, 1913.
- Richter, Burton** (1931– ), American physicist. Independently of S. C. C. Ting, discovered a new heavy elementary particle, which he named the psi particle; Nobel Prize, 1976.
- Richter, Jeremias Benjamin** (1762–1807), German chemist. Discovered the law of equivalent proportions.
- Riemann, Georg Friedrich Bernhard** (1826–1866), German mathematician. Originated Riemannian geometry, a nonEuclidean system.
- Riesz, Frigyes or Frederic** (1880–1956), Hungarian mathematician. Did research on abstract and general theories related to mathematical analysis, particularly functional analysis; independently of E. Fischer, discovered Riesz-Fisher theorem.
- Righi, Augusto** (1850–1920), Italian physicist. Discovered magnetic hysteresis and Righi-Leduc effect, independently of S. A. Leduc; demonstrated that microwaves have all properties characteristic of light waves.
- Ritchev, George Wills** (1864–1945), American astronomer. Made important astronomical observations, particularly on the Andromeda nebula; with H. Chrétien, developed Ritchey-Chrétien optics.
- Ritz, Walter** (1878–1909), Swiss-born German physicist. Introduced Ritz combination principle; developed Ritz method for numerical solution of boundary-value problems.
- Robbins, Frederick Chapman** (1916–2003), American microbiologist. Discovered that poliomyelitis virus can be grown in various human tissue cultures; Nobel Prize, 1954.
- Roberts, Richard J.** (1943– ), British geneticist. Independently of P. Sharp, discovered split genes; Nobel Prize, 1993.
- Robinson, Robert** (1886–1975), English chemist. Worked on plant pigments, alkaloids, and phenanthrene derivatives; Nobel Prize, 1947.
- Roche, Edouard Adelbert** (1820–1883), French physicist, mathematician, and meteorologist. Studied the internal structure and free-surface form of the celestial bodies; applied results to study of cosmogonic hypotheses.
- Rodbell, Martin** (1925–1998), American pharmacologist. With A. Gilman, discovered G-proteins and the role of these proteins in cellular signal transduction; Nobel Prize, 1994.
- Rohrer, Heinrich** (1933– ), Swiss physicist. With G. Binnig, developed scanning tunneling microscope; Nobel Prize, 1986.
- Rolle, Michel** (1652–1719), French mathematician. Worked on Diophantine analysis and algebra of equations.
- Röntgen, Wilhelm Konrad** (1845–1923), German physicist. Discovered x-rays; Nobel Prize, 1901.
- Roscoe, Henry Enfield** (1833–1915), English chemist. With R. W. Bunsen, evolved the law of reciprocity and invented the actinometer; first to isolate metallic vanadium.
- Rose, Irwin** (1926– ), American biochemist. Discovered ubiquitin-mediated protein degradation; Nobel Prize, 2004.
- Rosen, Nathan** (1909–1995), American-born Israeli physicist. Collaborated in formulation of Einstein-Podolsky-Rosen paradox; research on general relativity and gravitational waves.
- Ross, Ronald** (1857–1932), British physician. Proved that malaria is transmitted by the female *Anopheles* mosquito; Nobel Prize, 1902.
- Rosby, Carl Gustaf Arvid** (1898–1957), Swedish-born American meteorologist. Formulated theories of large-scale air movements; derived the Rossby formula, relating speed of propagation of perturbations to airflow and wavelengths of perturbations; devised the Rossby diagram, used to plot air mass properties.
- Roth, Klaus Friedrich** (1925– ), German-born British mathematician. Solved a problem previously studied by A. Thue and C. Siegel concerning the approximation to algebraic numbers by rational numbers; proved that a sequence with no three numbers in arithmetic progression has zero density; Fields Medal, 1958.
- Rous, Francis Peyton** (1879–1970), American physician and virologist. Produced cancer in chickens by inoculating them with filterable virus procured from tissue of chickens with tumors; Nobel Prize, 1966.
- Routh, Edward John** (1831–1907), British mathematical physicist. Made contributions to classical mechanics, including procedure for eliminating cyclic coordinates from equations of motion.
- Roux, Pierre Paul Emile** (1853–1933), French physician and bacteriologist. Helped develop modern serum therapeutics, especially concerning diphtheria.
- Rowland, F. Sherwood** (1927– ), American chemist. Demonstrated that chemically inert chlorofluorocarbon (CFC) could be transported up to the ozone layer and could react with ultraviolet light and deplete the ozone layer; Nobel Prize, 1995.
- Rowland, Henry Augustus** (1848–1901), American physicist. Developed the Rowland grating in spectroscopy; studied electromagnetism and heat.
- Rubbia, Carlo** (1934– ), Italian physicist. Principal architect of experiment that first detected intermediate vector bosons, an important step in confirming theory uniting electromagnetic and weak nuclear interactions; Nobel Prize, 1984.
- Rubens, Heinrich** (1865–1922), German physicist. With E. B. Hagen, conducted electromagnetic experiments; built new types of galvanometer and bolometer.
- Rumford, Benjamin Thompson, Count** (1753–1814), British physicist. Carried out research on heat.
- Runge, Carl David Tolme** (1856–1927), German mathematician and physicist. Research on theoretical and experimental spectroscopy, particularly data reduction and development of series formulas; developed methods for numerical and graphical computation, including Runge-Kutta method.
- Ruska, Ernst** (1906–1988), German electronic engineer. Developed the electron microscope; Nobel Prize, 1986.
- Russell Bertrand Arthur William** (1872–1970), English mathematician and philosopher. With A. N. Whitehead, pioneered in study of mathematical logic.
- Russell, Henry Norris** (1877–1957), American astronomer and physicist. Analyzed eclipsing binary stars; with E. Hertzsprung, introduced Hertzsprung-Russell diagram; determined abundance of chemical elements in solar atmosphere; with F. A. Saunders, devised theory of Russell-Saunders coupling.
- Rutherford, Ernest, 1st Baron** (1871–1937), British physicist. Discovered alpha, beta, and gamma rays; suggested the divisible nuclear atom; effected the transmutation of an atom; Nobel Prize, 1908.
- Ružička, Leopold** (1887–1976), Swiss chemist born in Croatia. Research on many-membered rings and higher terpenes (including male sex hormones); Nobel Prize, 1939.
- Rydberg, Johannes Robert** (1854–1919), Swedish physicist. Developed a formula for series of spectral lines, involving Rydberg's constant.
- Ryle, Martin** (1918–1984), British astronomer. Devised aperture synthesis method in radiotelescope; designed equipment and made observations in radio astronomy; Nobel Prize, 1974.
- Sabatier, Paul** (1854–1941), French chemist. Discovered, with J. B. Senderens, the process for catalytic hydrogenation of oils to solid fat; Nobel Prize, 1912.
- Sabin, Albert Bruce** (1906–1993), Polish-born American physician and virologist. Studied nature, mode of transmission, and epidemiology of human poliomyelitis; developed oral polio virus vaccine.
- Sabine, Edward** (1788–1883), British physicist and astronomer. Headed a magnetic survey of the world which discovered a connection between sunspots and terrestrial magnetic disturbances.
- Sabine, Wallace Clement Ware** (1868–1919), American physicist. Pioneered in architectural acoustics; discovered law determining reverberation time in acoustics.
- Sachs, Julius von** (1832–1897), German botanist. Studied the connection between sunlight and chlorophyll; worked on heliotropism and geotropism.
- Saha, Meghnad** (1894–1956), Indian physicist. Developed theory for degree of ionization of hot gases, a basic component of modern astrophysics.
- Sakmann, Bert** (1942– ), German physiologist. With E. Neher, using the "patch clamp" technique they developed, showed how individual ion channels control the passage of charged ions into and out of cells; Nobel Prize, 1991.
- Salam, Abdus** (1926–1996), Pakistani physicist. Independently of S. Weinberg, developed theory uniting two of the basic forces of nature, electromagnetism and the weak nuclear interactions; Nobel Prize, 1979.
- Salk, Jonas Edward** (1914–1995), American physician. Produced killed-virus vaccine effective in preventing poliomyelitis.
- Salpeter, Edwin Ernest** (1924– ), Austrian-born American physicist. Research in quantum theory of atoms, quantum electrodynamics, nuclear theory, energy production of stars, and theoretical astrophysics; with H. A. Bethe, introduced Bethe-Salpeter equation.
- Samuelsson, Bengt Ingemar** (1934– ), Swedish biochemist and medical scientist. Studied prostaglandin metabolism and the formation of prostaglandin from arachidonic acid; Nobel Prize, 1982.
- Sanctorius, real name Santorio Santorio** (1561–1636), Italian physician. Invented the clinical thermometer; experimented with metabolism.
- Sanger, Frederick** (1918– ), English chemist. Determined the exact order of amino acids in insulin; first to establish amino acid sequence for a protein; developed methods for determining nucleotide sequences (independently of W. Gilbert), advancing the technology of DNA recombination; Nobel Prizes, 1958 and 1980.
- Savart, Félix** (1791–1841), French physicist. Helped formulate the Biot-Savart law in electromagnetism.
- Schally, Andrew Victor** (1926– ), Polish-born American physiologist. With R. Guillemin, isolated and analyzed peptide hormones secreted in hypothalamic region of brain which control anterior pituitary hormone secretion; Nobel Prize, 1977.
- Schawlow, Arthur Leonard** (1921–1999), American physicist. Contributed to invention of laser; made numerous contributions to laser spectroscopy, particularly the development of Doppler-free spectroscopy; Nobel Prize, 1981.
- Scheele, Karl Wilhelm** (1742–1786), Swedish chemist. Made many discoveries, including oxygen (independently of J. Priestley), chlorine, and glycerin; synthesized many organic acids.
- Schiaparelli, Giovanni Virginio** (1835–1910), Italian astronomer. Discovered the connection between comets and meteorites, and the "canals" of Mars.
- Schiff, Hugo Josef** (1834–1915). German-born Italian organic chemist. Discovered Schiff bases; devised Schiff test; devised an improved nitrometer.
- Schmidt, Bernhard Voldemar** (1879–1935), Estonian-born German astronomer. Invented Schmidt system for astronomical telescopes.
- Schmidt, Erhard** (1876–1959), German mathematician. Extended D. Hilbert's work on integral equations; formalized and developed concept of Hilbert space.

- Schoenflies, Arthur Moritz** (1853–1928), German mathematician and crystallographer. Classified the 230 crystallographic space groups.
- Schottky, Walter** (1886–1976), Swiss-born German physicist. Discovered Schottky effect; invented screen grid and tetrode; developed Schottky theory of semiconductor-metal junctions.
- Schrieffer, John Robert** (1931– ), American physicist. With J. Bardeen and L. N. Cooper, formulated a theory of superconductivity; Nobel Prize, 1972.
- Schrödinger, Erwin** (1887–1961), German physicist. Proposed concept of atomic structure based on wave mechanics; contributed to quantum theory and color theory; Nobel Prize, 1933.
- Schur, Issai** (1875–1941), Russian-born German mathematician. Contributed to representation theory of groups; research on group theory, matrices, algebraic equations, and number theory.
- Schwartz, Laurent** (1915–2002), French mathematician. Developed the theory of distributions, which provided an abstract and rigorous mathematical foundation for methods of formal calculation such as the Dirac delta function, and greatly extended their range of application; Fields Medal, 1950.
- Schwartz, Melvin** (1932– ), American physicist. Collaborated in an experiment that demonstrated the existence of two types of neutrino; Nobel Prize, 1988.
- Schwarz, Hermann Amandus** (1843–1921), German mathematician. Introduced Schwarz-reflection principle and Schwarz's lemma while proving the Riemann mapping theorem.
- Schwarzschild, Karl** (1873–1916), German astronomer. Developed photographic methods for measuring brightness of stars; discovered Schwarzschild solution of equations of general relativity.
- Schwarzschild, Martin** (1912–1997), German-born American astronomer. Numerical studies of the internal structure and evolution of stars; astronomical observations with balloon-borne telescopes.
- Schwinger, Julian Seymour** (1918–1994), American physicist. Made fundamental contributions to the quantum theory of radiation; worked out the mathematical formalism of interaction between charged particles and an electromagnetic field; Nobel Prize, 1965.
- Seaborg, Glenn Theodore** (1912–1999), American chemist. Synthesized and identified eight transuranium elements and over a hundred isotopes; Nobel Prize, 1951.
- Secchi, Pietro Angelo** (1818–1878), Italian astronomer. Originated the spectroscopic survey of the heavens; made the first classification of stars according to spectral type.
- Sedgwick, Adam** (1785–1873), English geologist. With R. I. Murchison, established the Devonian system.
- Seebeck, Thomas Johann** (1770–1831), German physicist. Investigated thermoelectricity and invented the thermocouple.
- Segrè, Emilio Gino** (1905–1989), Italian-born American physicist. Codiscovered the elements technetium, astatine, and plutonium, slow neutrons, and the antiproton; Nobel Prize, 1959.
- Seidel, Philipp Ludwig von** (1821–1896), German astronomer and mathematician. Developed theory of aberrations; made first accurate photometric measurements of stars and planets, and evaluated them with probability theory.
- Selberg, Atle** (1917– ), Norwegian-American mathematician. Worked on generalizations of the sieve methods of V. Brun; proved major results on zeros of the Riemann zeta function; with P. Erdős, gave an elementary proof of the prime number theorem, with a generalization to numbers in an arbitrary arithmetic progression; Fields Medal, 1950.
- Semenov, Nikolai Nikolaevich** (1896–1986), Soviet chemist. Elucidated the mechanisms of chemical reactions, especially the chain mechanism; Nobel Prize, 1956.
- Senderens, Jean Baptiste** (1856–1937), French chemist. With P. Sabatier, discovered hydrolysis of oils by catalysis.
- Serber, Robert** (1909–1997), American physicist. Laid foundations of orbit theory of high-energy particle accelerators; introduced Serber potential to describe nuclear forces.
- Serre, Jean-Paul** (1926– ), French mathematician. Applied spectral sequences to discover fundamental connections between the homology groups and homotopy groups of a space and to prove important results on the homotopy groups of spheres; reformulated and extended some of the main results of complex variable theory in terms of sheaves; Fields Medal, 1954; Abel Prize, 2003.
- Serret, Joseph Alfred** (1819–1885), French mathematician and astronomer. Helped develop Frenet-Serret formulas in the theory of space curves.
- Servetus, Michael** (1511–1553), Spanish physician. Discovered the pulmonary circulation and the purification of the blood by the lungs.
- Shannon, Claude Elwood** (1916–2001), American mathematician. Developed mathematical theory of communication, making use of analogy between concepts of entropy and information.
- Shapley, Harlow** (1885–1972), American astronomer. Worked on a theory to explain cepheid variables; made an estimate of the size of the universe; provided a description of the universe's form of construction.
- Sharp, Phillip A.** (1944– ), American geneticist. Independently of R. Roberts, discovered split genes; Nobel Prize, 1993.
- Sharpless, K. Barry** (1941– ), American chemist. Developed chirally catalyzed oxidation reactions; Nobel Prize, 2001.
- Sherrington, Charles Scott** (1861–1952), English physiologist. Studied the neuron and its function and other aspects of the nervous system; Nobel Prize, 1932.
- Shirakawa, Hideki** (1936– ), Japanese polymer scientist. Discovered and developed conductive polymers with Alan Heeger and Alan MacDiarmid; Nobel Prize, 2000.
- Shockley, William** (1910–1989), English-born American physicist. Discovered the transistor effect for electronic amplification by means of solid-state semiconductors; Nobel Prize, 1956.
- Shor, Peter** (1959– ), American mathematician. Worked in combinatorial analysis and the theory of quantum computing; developed a computational method for factorizing large numbers on quantum computers, which, theoretically, could be used to break many of the coding systems currently employed.
- Shubnikov, Aleksei Vasilevich** (1887–1970), Soviet crystallographer. Classified Shubnikov groups; developed techniques for growing crystals, including synthetic rubies used in lasers.
- Shull, Clifford G.** (1915–2001), American physicist. Developed the neutron diffraction technique for studying the atomic structure of solids and liquids; Nobel Prize, 1994.
- Siegbahn, Kai Manne Börje** (1918– ), Swedish physicist. Pioneered the development of high-resolution electron spectroscopy; Nobel Prize, 1981.
- Siegbahn, Karl Manne Georg** (1886–1978), Swedish physicist. Studied x-ray spectroscopy, in which he discovered the M series; Nobel Prize, 1924.
- Siegel, Carl Ludwig** (1896–1981), German mathematician. Worked on number theory, functions of one or several complex variables, and differential equations.
- Siemens, Ernst Werner von** (1816–1892), German engineer and electrician. Developed telegraphy and self-acting dynamo.
- Siemens, William or Karl Wilhelm** (1823–1883), German inventor in London. Made many inventions, including a differential governor, bathometer, dynamometer, and electric furnace.
- Simpson, Thomas** (1710–1761), English mathematician. Formulated the Simpson rule for finding the area of a figure, given only a limited number of data.
- Singer, Isadore Manual** (1924– ), American mathematician. Worked in global analysis, especially the theory of elliptic operators and their applications to topology and geometry, and in mathematical physics; collaborated with M. F. Atiyah in proving the index theorem; Abel Prize, 2004.
- Skou, Jens C.** (1918– ), Dutch chemist. Discovered an ion-transporting enzyme—sodium, potassium-stimulated adenosine triphosphatase (Na<sup>+</sup>, K<sup>+</sup>-ATPase)—maintaining the balance of sodium and potassium ions in the living cell; Nobel Prize, 1997.
- Slater, John Clarke** (1900–1976), American physicist. Introduced Slater determinant describing many-electron systems; developed theory of magnetrons.
- Smale, Stephen** (1930– ), American mathematician. Worked in differential topology, differential equations, and dynamical systems; proved that the sphere can be turned inside out and that the generalized Poincaré conjecture is valid for dimensions greater than 4; discovered strange attractors that lead to chaotic dynamical systems; Fields Medal, 1966.
- Smalley, Richard E.** (1943– ), American chemist. Designed and built a special laser-supersonic cluster beam apparatus that was used in the discovery of fullerenes; Nobel Prize, 1996.
- Smith, Hamilton Othanel** (1931– ), American geneticist. Isolated a restriction enzyme that cleaves deoxyribonucleic acid (DNA) molecules at a specific site; Nobel Prize, 1978.
- Smith, Michael** (1927–2000), Canadian chemist. Made fundamental contribution toward oligonucleotide-based, site-directed mutagenesis and its development for protein studies within DNA-based chemistry; Nobel Prize, 1993.
- Smith, Robert** (1689–1768), English physicist. Developed a particulate theory of light; developed geometric propositions for computing properties of optical systems; derived a special case of the Smith-Helmholtz law.
- Snell, George Davis** (1903–1996), American immunogeneticist. Demonstrated the x-ray induction of mutational changes in a mammal; contributed to the study of immunological systems and to the development of transplant immunology; Nobel Prize, 1980.
- Snell, Willebrod van Roijen** (1591–1626), Dutch mathematician. Formulated Snell laws concerning angles of incidence and refraction; conceived the idea of measuring the Earth by triangulation.
- Soddy, Frederick** (1877–1956), English chemist. With E. Rutherford, developed theory of atomic disintegration of radioactive substances; research on isotopes; Nobel Prize, 1921.
- Solvay, Ernest** (1838–1922), Belgian industrial chemist. Developed the Solvay process for production of sodium carbonate.
- Sommerfeld, Arnold** (1868–1951), German physicist. Developed quantum theory, especially in its application to spectral lines and the Bohr atomic model.
- Sørensen, Sören Peter Lauritz** (1868–1939), Danish biochemist. Did pioneer work on hydrogen ion concentration; invented the symbol pH.
- Spemann, Hans** (1869–1941), German zoologist. Studied embryonic development and discovered the organizer function of certain tissues; Nobel Prize, 1935.
- Sperry, Roger Wolcott** (1913–1994), American neuroscientist. Discovered the functional split between the left and right hemispheres of the brain; Nobel Prize, 1981.
- Spörer, Gustav Friedrich Wilhelm** (1822–1895), German astronomer. Observations of the sun and sunspots.
- Stanley, Wendell Meredith** (1904–1971), American biochemist. Discovered that a virus is a nucleoprotein and can be crystallized; Nobel Prize, 1946.
- Stanton, Thomas Ernest** (1865–1931), English engineer. Studied surface friction of fluids; built

- wind tunnel for wind velocity investigations; studied strength of materials, heat transmission, and lubrication.
- Stark, Johannes** (1874–1957), German physicist. Studied radiation and atomic theory; discovered the Stark effect on spectrum lines and the Doppler effect in canal rays; Nobel Prize, 1919.
- Staudinger, Hermann** (1881–1965), German chemist. Conceived and elaborated the explanation of phenomenon of polymerization; Nobel Prize, 1953.
- Steenrod, Norman Earl** (1910–1971), American mathematician. Worked in topology; introduced Steenrod algebra.
- Stefan, Josef** (1835–1893), Austrian physicist. Originated Stefan's (or Stefan-Boltzmann) law of blackbody radiation; proposed theory of diffusion of gases; studied gas conductivity.
- Stein, William Howard** (1911–1980), American biochemist. With S. Moore, developed technique for determining amino acid sequence in proteins, and applied it to ribonuclease; Nobel Prize, 1972.
- Steinberger, Jack** (1931– ), German-born American physicist. Collaborated in an experiment that demonstrated the existence of two types of neutrino; Nobel Prize, 1988.
- Steinmetz, Charles Proteus** (1865–1923), German-born American electrical engineer. Developed complex number technique for analyzing alternating-current circuits; made numerous electrical inventions; applied mathematical methods to solution of electrical engineering problems.
- Stern, Otto** (1888–1969), German-born American physicist. Developed the molecular beam method and used it to prove directly the existence of the magnetic moment of atoms and nuclei and to measure their magnitudes; Nobel Prize, 1943.
- Stieltjes, Thomas Jan** (1856–1894), Dutch-born French mathematician. Developed analytic theory of continued fractions, and Stieltjes integral as a tool for their study.
- Stirling, James** (1692–1770), British mathematician. Discovered Stirling's formula and Stirling's interpolation formula.
- Stokes, George Gabriel** (1819–1903), British mathematician and physicist. Originated the idea of determining the chemical composition of the Sun and stars from their spectra; studied double refraction and electromagnetic waves.
- Stone, Marshall Harvey** (1903–1989), American mathematician. Studied structural aspects of mathematical situations having origins in classic problems of analysis, geometry, and logic.
- Störmer, Carl Fredrik Mülertz** (1874–1957), Norwegian mathematician and geophysicist. Studied atmospheric phenomena; discovered the Stormer cone concerning cosmic rays.
- Störmer, Horst Ludwig** (1949– ), German-American physicist. With D. C. Tsui, discovered the fractional quantum Hall effect, a manifestation of a new form of quantum fluid with fractionally charged excitations; Nobel Prize, 1998.
- Strassman, Fritz** (1902–1980), German chemist. With O. Hahn and L. Meitner, discovered nuclear fission; research on uranium and thorium isotopes.
- Strömgren, Bengt Georg Daniel** (1908–1987), Swedish-born American astronomer. Developed theory of nebululae consisting of hydrogen ionized by hot stars.
- Struve, Friedrich Georg Wilhelm von** (1793–1864), German-born Russian astronomer. Authority on double stars and nebulae; one of the first to measure a stellar parallax.
- Struve, Otto Wilhelm von** (1819–1905), Russian astronomer. Discovered some 500 new double stars; calculated the constant of precession.
- Sturgeon, William** (1783–1850), English electrician and inventor. Constructed the first useful electromagnet and the first moving-coil galvanometer.
- Sturm, Jacques Charles François** (1803–1855), French mathematician. Formulated the Sturm theorems, concerning real roots of an equation.
- Suhl, Harry** (1922– ), German-born American physicist. Discovered Suhl effect; invented Suhl amplifier; studied resonance in magnetic materials, superconductivity, and general theory of magnetism.
- Sulston, John E.** (1942– ), British geneticist. Using the nematode *Caenorhabditis elegans* as a model system, discovered that specific cells in the cell lineage always die through programmed cell death. Described the visible steps in the cellular death process and demonstrated the first mutations of genes participating in programmed cell death. Nobel Prize, 2002.
- Sumner, James Batcheller** (1887–1955), American biochemist. First to isolate an enzyme in pure, crystalline form and characterize it as a protein; Nobel Prize, 1946.
- Sutherland, Earl Wilbur, Jr.** (1915–1974), American physiologist. Uncovered intermediary role of cyclic adenylic acid in the mechanism of hormone control over human metabolic activities; Nobel Prize, 1971.
- Svedberg, Theodor** (1884–1971), Swedish chemist. An authority on colloid chemistry (dispersed phase); developed a centrifuge for colloidal particles and protein molecules; Nobel Prize, 1926.
- Sydenham, Thomas** (1624–1689), English physician. Gave classic descriptions of gout, venereal disease, fevers, hysteria, and Sydenham's chorea.
- Syngé, Richard Laurence Millington** (1914–1994), English chemist. Developed partition chromatography with A. J. P. Martin; Nobel Prize, 1952.
- Szent-Györgyi, Albert von Nagrapolt** (1893–1986), Hungarian biochemist. Isolated vitamin C; research on combustion processes in plant and animal tissues, muscular contraction, and cell division; Nobel Prize, 1937.
- Talbot, William Henry Fox** (1800–1877), English inventor and mathematician. Invented the calotype photographic process.
- Tamm, Igor Yevgenevich** (1895–1971), Soviet physicist. With I. M. Frank, formulated the mathematical theory explaining the physical origin and properties of Cerenkov radiation; Nobel Prize, 1958.
- Tanaka, Koichi** (1959– ), Japanese engineer. Developed soft desorption ionization method for mass spectrometric analyses of biological macromolecules; Nobel Prize, 2002.
- Tatum, Edward Lawrie** (1909–1975), American biochemist and geneticist. Researched the relation of genes to biochemical reactions in bacterial, yeast, and mold cells; with G. W. Beadle, discovered the phenomenon of genetic recombination in bacteria; Nobel Prize, 1958.
- Taube, Henry** (1915– ), American chemist. Elucidated the mechanisms of electron transfer reactions, especially in metal complexes; Nobel Prize, 1983.
- Taylor, Brook** (1685–1731), English mathematician. Formulated Taylor's theorem and worked on mathematics of physical problems.
- Taylor, Geoffrey Ingram** (1886–1975), British mathematician. Work in theoretical hydrodynamics, particularly turbulence and effect of rotation on fluid flow.
- Taylor, Joseph Hooten, Jr.** (1941– ), American astronomer. With R. A. Hulse, discovered a binary pulsar and studied it to observe phenomena predicted by general relativity; Nobel Prize, 1993.
- Taylor, Richard Edward** (1929– ), American physicist. Collaborated in experiments that demonstrated that protons, neutrons, and similar particles are made up of quarks; Nobel Prize, 1990.
- Taylor, Richard Lawrence** (1962– ), British mathematician. Assisted A. Wiles in the proof of Fermat's last theorem; collaborated with C. Breuil, B. Conrad, and F. Diamond in extending this work by proving the Taniyama-Shimura conjecture on elliptic curves.
- Teisserenc de Bort, Léon Philippe** (1855–1913), French meteorologist. Discovered the stratosphere.
- Teller, Edward** (1908–2003), Hungarian-born American physicist. With associates, developed the concept which led to the construction of the first hydrogen bomb; with G. Gamow, proposed the Gamow-Teller interaction and Gamow-Teller selection rules.
- Temin, Howard Martin** (1934–1994), American virologist. Proposed that genetic information is transferred from ribonucleic acid tumor viruses to deoxyribonucleic acid; independently of D. Baltimore, discovered reverse transcriptase; Nobel Prize, 1975.
- Tesla, Nikola** (1856–1943), American inventor born in what is now Croatia of Serbian parents. Invented the induction motor, a high-frequency electric coil; improved design of dynamos, transformers, and electric bulbs.
- Thales** (ca. 640-ca. 546 B.C.), Greek mathematician and astronomer. First to scientifically predict an eclipse of the Sun; discovered static electricity; credited with formulating several theorems.
- Theiler, Max** (1899–1972), South African physician and virologist. Developed a vaccine to prevent human yellow fever; Nobel Prize, 1951.
- Theorell, Axel Hugo Teodor** (1903–1982), Swedish biochemist. Made discoveries concerning the nature and mode of action of oxidative enzymes; Nobel Prize, 1955.
- Thiele, F. K. Johannes** (1865–1918), German chemist. Research on nitrogen compounds and the theory of unsaturated organic molecules.
- Thom, René** (1923–2002), French mathematician. Invented and developed the theory of cobordism in algebraic topology, a classification of manifolds that used homotopy theory in a fundamental way; developed catastrophe theory; Fields Medal, 1958.
- Thomas, Edward Donnell** (1920– ), American physician. Performed the first successful transfer of bone marrow from one individual to another; with J. Murray, helped define and then overcome the immunological mechanisms behind organ rejection; Nobel Prize, 1990.
- Thomas, Llewellyn Hilleth** (1903–1992), English-born American physicist. Discovered Thomas precession; with E. Fermi, developed Thomas-Fermi atomic model; developed basic theory for Thomas cyclotron.
- Thompson, John Griggs** (1932– ), American-British mathematician. Worked on theory of finite groups; with W. Feit, proved that all noncyclic finite simple groups have even order; determined the finite simple groups whose proper subgroups are solvable (minimal simple groups); Fields Medal, 1970.
- Thomson, George Paget** (1892–1975), English physicist. Discovered, independently of C. J. Davison, the diffraction of electrons by crystals; Nobel Prize, 1937.
- Thomson, Joseph John** (1856–1940), English physicist. Discovered that cathode rays consist of negatively charged particles, or electrons; Nobel Prize, 1906.
- 't Hooft, Gerardus** (1946– ), Dutch physicist. With M. J. G. Veltman, elucidated the quantum structure of the electroweak interactions, placing the theory of these interactions and similar particle physics theories on a firmer mathematical foundation by showing how they may be used for precise calculations of physical quantities; Nobel Prize, 1999.
- Thouless, David James** (1934– ), British physicist. Studied many-body problem and its applications to nuclear and condensed matter physics, including phase transitions in superfluid helium films and electrons in disordered systems.
- Thue, Axel** (1863–1922), Norwegian mathematician. Worked on number theory, especially algebraic numbers and Diophantine equations.
- Thurston, William Paul** (1946– ), American mathematician. Advanced the study of topology in two and three dimensions, showing relationships between analysis, topology, and geometry; suggested that a very large class of closed three-manifolds carry a hyperbolic structure; Fields Medal, 1982.
- Tinbergen, Nikolaas** (1907–1988), Dutch-born British zoologist. Pioneered in study of social behavior of animals and their responses to complex

- stimuli; conducted experimental studies of the effects of selection pressures and evolutionary response to them; Nobel Prize, 1973.
- Ting, Samuel Chao Chung** (1936– ), American physicist. Independently of B. Richter, discovered a new heavy elementary particle, which he named the J particle; Nobel Prize, 1976.
- Tiselius, Arne Wilhelm Kaurin** (1902–1971), Swedish biochemist. Research on electrophoresis and absorption analysis; made discoveries concerning the complex nature of serum proteins; Nobel Prize, 1948.
- Todd of Trumpington, Alexander Robertus Todd, Baron** (1907–1997), British chemist. Worked on the structure and synthesis of nucleotides, and nucleotide coenzymes, and the related problem of phosphorylation; Nobel Prize, 1957.
- Tomlinson, Ray** (1941– ), American computer engineer. Invented electronic mail, including the use of @ in the address.
- Tomonaga, Sin-Itiro** (1906–1979), Japanese physicist. Showed the modern theory of quantum electrodynamics to be quantitatively consistent with observed physical phenomena; Nobel Prize, 1965.
- Tonegawa, Susumu** (1939– ), Japanese immunologist. Discovered how a limited number of genes are capable of producing a vast number of diverse antibodies, each designed for a specific invading foreign substance; Nobel Prize, 1987.
- Torricelli, Evangelista** (1608–1647), Italian physicist. Invented the mercury barometer.
- Townes, Charles Hard** (1915– ), American physicist. Invented the maser; Nobel Prize, 1964.
- Townsend, John Sealy Edward** (1868–1957), British physicist. Developed collision theory of ionization of gases in an electric field.
- Travers, Morris William** (1872–1961), English chemist. Discovered, with W. Ramsay, krypton, xenon, and neon; investigated low-temperature phenomena.
- Ts'ai Lun** (fl. 105), Chinese inventor. Invented paper.
- Tsui, Daniel Chee** (1939– ), Chinese-born American physicist. With H. L. Störmer, discovered the fractional quantum Hall effect, a manifestation of a new form of quantum fluid with fractionally charged excitations; Nobel Prize, 1998.
- Turing, Alan Mathison** (1912–1954), English mathematician. Developed concept of Turing machine; research on mathematical logic, group theory, and computer technology.
- Tychonoff (Tikhonov), Andrei Nikolaevich** (1906–1993), Soviet mathematician and geophysicist. Proved Tychonoff theorem in topology and introduced concept of Tychonoff space.
- Tyndall, John** (1820–1893), British physicist. Studied temperature waves in metals and diathermancy of gases; discovered the effect of atmospheric density on sound transmission.
- Uhlenbeck, George Eugene** (1900–1988), Javanese-born American physicist. With S. Goudsmit, developed hypothesis of electron spin.
- Urey, Harold Clayton** (1893–1981), American chemist. Isolated heavy water and thus discovered the heavy isotope of hydrogen; Nobel Prize, 1934.
- Urysohn, Pavel Samuilovich** (1898–1924), Soviet mathematician. Proved Urysohn's lemma in topology.
- Van Allen, James Alfred** (1914– ), American physicist. Discovered that the Earth is circled by two high-energy radiation belts, leading to major revisions in concepts of the Earth's atmosphere and magnetic field.
- Van de Graaff, Robert Jemison** (1901–1967), American physicist. Contributed to the development of the direct particle accelerator and invented the electrostatic belt generator.
- van der Meer, Simon** (1925– ), Dutch physicist. Devised method to ensure frequent and efficient collision of accelerated protons and antiprotons in the superproton synchrotron at CERN, contributing to discovery of intermediate vector bosons; Nobel Prize, 1984.
- Vandermonde, Alexandre Théophile** (1735–1796), French mathematician. Gave first logical exposition of theory of determinants; developed methods to test solvability of algebraic equations.
- van der Waals, Johannes Diderik** (1837–1923), Dutch physicist. Formulated van der Waals equation; investigated van der Waals forces, concerning intermolecular attraction; Nobel Prize, 1910.
- Vane, John Robert** (1927– ), English pharmacologist. Discovered prostaglandin X (prostaglandin) and the role of aspirinlike drugs as blocking agents in the prostaglandin synthesis; Nobel Prize, 1982.
- van Rhijn, Pieter Johannes** (1886–1960), Dutch astrophysicist. With J. C. Kapetyn, evolved a theory of the universe.
- van't Hoff, Jacobus Hendricus** (1852–1911), Dutch chemist. Pioneered in the study of stereochemistry; studied reaction rates, thermodynamics applied to chemistry, and the theory of dilute solutions; Nobel Prize, 1901.
- Van Vleck, Jan Hasbrouck** (1899–1980), American mathematical physicist. Pioneer in the development of the modern quantum-mechanical theory of magnetism; Nobel Prize, 1977.
- Varmus, Harold** (1939– ), American researcher in molecular virology and oncogenesis. With J. M. Bishop, researched the genetic basis of human cancers; their work led to the identification of over 50 cellular genes that can become oncogenes; Nobel Prize, 1989.
- Vauquelin, Louis Nicola** (1763–1829), French chemist. Discovered chromium and its compounds and beryllium compounds.
- Vega, George, Baron von** (1756–1802), Austrian mathematician. Prepared logarithmic tables.
- Veltman, Martinus J. G.** (1931– ), Dutch physicist. With G. 't Hooft, elucidated the quantum structure of the electroweak interactions, placing the theory of these interactions and similar particle physics theories on a firmer mathematical foundation by showing how they may be used for precise calculations of physical quantities; Nobel Prize, 1999.
- Verdet, Marcel Emile** (1824–1866), French physicist. Determined dependence of Faraday effect on magnetic field strength, wavelength of the light, and index of refraction of the material.
- Vernier, Pierre** (1580–1637), French technician. Invented the Vernier scale.
- Vesalius, Andreas** (1514–1564), Belgian anatomist in Italy. Known as the father of modern anatomy; corrected many of Galen's mistaken doctrines.
- Viète, François, or Franciscus Vieta** (1540–1603), French mathematician. Worked on the solution of equations up to the fourth degree and laid the foundation of modern algebra.
- Virtanen, Artturi Ilmari** (1895–1973), Finnish biochemist. Research on problems of human nutrition and agriculture; investigated acidity (pH) and biological nitrogen fixation; Nobel Prize, 1945.
- Voevodsky, Vladimir** (1966– ), Russian mathematician. Developed a new cohomology theory for algebraic varieties, which represented an important advance in number theory and algebraic geometry. Fields Medal, 2002.
- Vogel, Hermann Wilhelm** (1834–1898), German photochemist. Invented the orthochromatic photographic plate and designed a photometer.
- Voigt, Woldemar** (1850–1919), German physicist. Introduced transformation equations (later known as Lorentz transformations).
- Volta, Alessandro, Count** (1745–1827), Italian physicist. Invented the voltaic pile; developed the theory of current electricity.
- Volterra, Vito** (1860–1940), Italian mathematician. Developed method of solving Volterra equations; pioneered in developing functional analysis.
- Von Braun, Wernher** (1912–1977), German-born American rocket engineer. Directed development of the German V-2 and Wassefall missiles; instrumental in launch of *Explorer 1*, first American artificial satellite; supervised development of Saturn rockets for the Apollo program.
- Von Euler, Ulf Svante** (1905–1983), Swedish physiologist. Identified norepinephrine as neurotransmitter of sympathetic nervous system; isolated and characterized norepinephrine storage granules in nerves; Nobel Prize, 1970.
- von Kármán, Theodore** (1881–1963), American aerodynamicist. Theoretical contributions to aerodynamics; formulated von Kármán's theory of vortex streets, an early step in the mathematical treatment of turbulent motion.
- von Neumann, John** (1903–1954), Hungarian-born American mathematician. Research in logic, theory of quantum mechanics, theory of high-speed computing machines, and mathematical theory of games and strategy.
- Wagner von Jauregg (Wagner-Jauregg), Julius** (1857–1940), Austrian psychiatrist. Developed use of malarial infection to treat general paresis; Nobel Prize, 1927.
- Waksman, Selman Abraham** (1888–1973), Russian-born American bacteriologist. Isolated the antibiotic streptomycin; Nobel Prize, 1952.
- Wald, George** (1906–1997), American biologist and biochemist. Discovered the role of vitamin A in vision; Nobel Prize, 1967.
- Walker, John E.** (1941– ), British chemist. Made major contributions toward elucidating the enzymatic mechanism underlying the synthesis of adenosine triphosphate (ATP) by clarifying the structural conditions of the enzyme; Nobel Prize, 1997.
- Wallace, Alfred Russel** (1823–1913), English naturalist. Originated, independently of C. Darwin, theory of natural selection; postulated Wallace's line regarding geographical distribution of animals.
- Wallach, Otto** (1847–1931), German chemist. Research on essential oils and the terpenes; Nobel Prize, 1910.
- Wallis, John** (1616–1703), English mathematician. Worked on algebraic curves, interpolation, evaluation of integrals, infinite series, mechanics, and algebra; derived Wallis product and Wallis formulas.
- Walton, Ernest Thomas Sinton** (1903–1995), British physicist. With J. D. Cockcroft, devised high-voltage apparatus capable of producing fast atomic particles with energies up to 700,000 electronvolts; showed the capability of these particles to disintegrate many light elements; Nobel Prize, 1951.
- Wannier, Gregory Hugh** (1911–1983), Swiss-born American physicist. Developed harmonization of localized and nonlocalized descriptions of electrons in solids.
- Warburg, Otto Heinrich** (1883–1970), German physiologist. Worked on chemistry of respiration and on cancer; Nobel Prize, 1931.
- Wassermann, August von** (1866–1925), German physician. Discovered the Wassermann test for the detection of syphilis.
- Watson, James Dewey** (1928– ), American biochemist. With F. H. C. Crick, determined the double-helix structure of deoxyribonucleic acid; Nobel Prize, 1962.
- Watson, John Broadus** (1878–1958), American psychologist. Founded the behaviorist school of psychology.
- Watt, James** (1736–1819), Scottish inventor. Improved the steam engine, making it a commercial success.
- Weber, Ernst Heinrich** (1795–1878), German anatomist and physiologist. Discovered Weberian apparatus; applied hydrodynamics to study of blood circulation; discovered inhibitory power of vagus nerve; proposed Weber's law of stimuli.
- Weber, Heinrich** (1842–1913), German mathematician. Introduced Weber differential equation; demonstrated Abel theorem in its most general form; proved that absolute Abelian fields are cyclotomic.
- Weber, Wilhelm Eduard** (1804–1891), German physicist. Devised instruments for measurement of electrical and magnetic quantities; formulated absolute electrical and magnetic units.

- Wegener, Alfred Lothar** (1880–1930), German geologist. Presented the idea of continental drift.
- Welerstrass, Karl Theodor** (1815–1897), German mathematician. Worked on the theory of functions and on the calculus of variations.
- Weil, Adolf** (1848–1916), German physician. Gave classic description of Weil's disease.
- Weil, André** (1906–1998), French-born American mathematician. Laid the foundations for abstract algebraic geometry and the modern theory of algebraic varieties, starting a rapid advance in both algebraic geometry and number theory.
- Weinberg, Steven** (1933– ), American physicist. Independently of A. Salam, developed theory uniting two of the basic forces of nature, electromagnetism and the weak nuclear interactions; Nobel Prize, 1979.
- Weismann, August** (1834–1914), German biologist. Contributed to the theory of heredity, which he attributed to variations in "germ-plasm."
- Weiss, Pierre** (1865–1940), French physicist. Developed phenomenological theory of ferromagnetism.
- Weizsäcker, Carl Friedrich von** (1912– ), German physicist. Helped develop method for calculating bremsstrahlung in high-energy collisions; developed a theory of origin of solar system.
- Weller, Thomas Huckle** (1915– ), American virologist and parasitologist. Isolated the virus of chickenpox and herpes zoster and proved the common etiology of the two diseases; first to propagate German measles virus; Nobel Prize, 1954.
- Wentzel, Gregor** (1898–1978), German-born American physicist. Helped develop Wentzel-Kramers-Brillouin method; research on theory of atomic spectra, wave mechanics, quantum electrodynamics, meson field theories, and statistical mechanics of many-body problems, especially superconductivity.
- Werner, Alfred** (1866–1919), Swiss chemist. Formulated the coordination theory of valency; Nobel Prize, 1913.
- Weyl, Hermann** (1885–1955), German-born American mathematician and mathematical physicist. Basic research on group representations and Riemann surfaces.
- Wheatstone, Charles** (1802–1875), English physicist and inventor. Conducted experiments on sound; invented Wheatstone's bridge, an instrument for comparing electrical resistances.
- Wheeler, John Archibald** (1911– ), American physicist. Introduced the concepts of the scattering matrix and resonating group structure into nuclear physics; with N. Bohr, elucidated the mechanism of nuclear fission and predicted the fissibility of plutonium.
- Whewell, William** (1794–1866), British astronomer. Work on the tides, and on the history and philosophy of science.
- Whipple, George Hoyt** (1878–1976), American pathologist. Studied anemia and liver treatment; Nobel Prize, 1934.
- Whitehead, Alfred North** (1861–1947), English mathematician, physicist, and philosopher. With B. Russell, pioneered in mathematical logic and foundations of mathematics.
- Whittaker, Edmund Taylor** (1873–1956), British mathematician and physicist. Studied special functions of mathematical physics and equations satisfied by them, particularly Whittaker's differential equation; found general integral representation for harmonic functions; made major contributions to analytical dynamics.
- Wiedemann, Gustave Heinrich** (1826–1899), German physicist and physical chemist. With R. Franz, discovered Wiedemann-Franz law of thermal conductivity of metals; discovered Wiedemann effect.
- Wieland, Heinrich** (1877–1957), German chemist. Studied bile acids, chlorophyll, and hemoglobin; Nobel Prize, 1927.
- Wieman, Carl Edwin** (1951– ), American physicist. With E. A. Cornell, succeeded in producing Bose-Einstein condensates in a dilute gas of alkali (rubidium) atoms, and carried out fundamental studies of their properties, including studies of collective excitations and vortex formation in condensates; Nobel Prize, 2001.
- Wien, Wilhelm** (1864–1928), German physicist. Formulated the two Wien laws pertaining to radiation from blackbodies; Nobel Prize, 1911.
- Wiener, Norbert** (1894–1964), American mathematician. Formulated a mathematical theory of Brownian motion; founded science of cybernetics.
- Wieschaus, Eric F.** (1947– ), American developmental biologist. Using *Drosophila*, he and the German developmental biologist Christiane Nüsslein-Volhard identified and classified a small number of genes that are important in determining the body plan and the formation of body segments; their work, along with that of American developmental biologist Edward B. Lewis, led to the discovery of important genetic mechanisms which control early embryonic development; Nobel Prize, 1995.
- Wiesel, Torsten Nils** (1924– ), Swedish physiologist. Contributed to the study of the processing of visual information in the brain; Nobel Prize, 1981.
- Wigner, Eugene Paul** (1902–1995), Hungarian-born American mathematical physicist. With G. Breit, worked out the Breit-Wigner formula for resonant nuclear reactions; proposed the Wigner theorem of conservation of the angular momentum of electron spin; Nobel Prize, 1963.
- Wilczek, Frank** (1951– ), Discovered asymptotic freedom in the strong interactions (in collaboration with D. J. Gross, and independent of H. D. Politzer); Nobel Prize, 2004.
- Wiles, Andrew John** (1953– ), British mathematician. Proved Fermat's last theorem with assistance of R. Taylor.
- Wilkins, Maurice Hugh Frederick** (1916–2004), English biophysicist born in New Zealand. Made x-ray diffraction studies that contributed to the structural determination of deoxyribonucleic acid; Nobel Prize, 1962.
- Wilkinson, Geoffrey** (1921–1996), British chemist. Research to determine how metals and organic molecules combine to form unique molecules which have sandwichlike structures; Nobel Prize, 1973.
- Williamson, William Crawford** (1816–1895), English naturalist. Laid the foundation for paleobotany and showed the importance of plant life forms in coal.
- Willstätter, Richard** (1872–1942), German chemist. Worked on plant pigments; investigated alkaloids and their derivatives; Nobel Prize, 1915.
- Wilson, Charles Thomson Rees** (1869–1959), British physicist. Worked on ionization; originated the cloud chamber method of studying ionized particles; Nobel Prize, 1927.
- Wilson, Kenneth Geddes** (1936– ), American physicist. Used renormalization group theory to analyze critical phenomena in the behavior of matter at phase transitions; Nobel Prize, 1982.
- Wilson, Robert Woodrow** (1936– ), American astrophysicist. With A. A. Penzias, discovered cosmic background radiation, confirming the big bang theory of the origin of the universe; Nobel Prize, 1978.
- Windaus, Adolf** (1876–1959), German chemist. Worked on sterols; discovered that ultraviolet light activates ergosterol and gives vitamin D<sub>2</sub>; Nobel Prize, 1928.
- Witten, Edward** (1951– ), American mathematical physicist. Applied advanced mathematical tools to theoretical physics, particularly quantum field theory, supersymmetry, and string theory; his physical insights were the basis for major developments in mathematics; Fields Medal, 1990.
- Wittig, Georg** (1897–1987), German chemist. Work on the linking of carbon and phosphorus (Wittig reaction) made it possible to synthesize new types of compounds, including metal-organic complex compounds; Nobel Prize, 1979.
- Wöhler, Friedrich** (1800–1882), German chemist. First to synthesize an organic compound, urea.
- Wolf, Maximilian Franz Joseph Cornelius** (1863–1932), German astronomer. Invented the photographic method of discovering asteroids.
- Wollaston, William Hyde** (1766–1828), English chemist and physicist. Discovered the lines in the solar spectrum; discovered palladium and rhodium; invented the Wollaston lens.
- Woodward, Robert Burns** (1917–1979), American chemist. Contributed to the development of total synthesis of complex natural products, and structural determination of several complex natural molecules, later confirmed by total synthesis; Nobel Prize, 1965.
- Wright, Almroth Edward** (1861–1947), British physician and pathologist. Studied parasitic disease; introduced inoculation against typhoid.
- Wright, Wilbur** (1867–1912) and **Orville** (1871–1948), American pioneers in aviation. Built the first successful airplane, which each flew at Kitty Hawk, North Carolina, on Dec. 17, 1903.
- Wundt, Wilhelm Max** (1832–1920), German physiologist and psychologist. Founded the first laboratory for experimental psychology.
- Wurtz, Charles Adolphe** (1817–1884), French chemist. Discovered methyl and ethyl amines; evolved the Wurtz reaction for synthesis of hydrocarbons.
- Wüthrich, Kurt** (1938– ), Swiss chemist. Developed nuclear magnetic resonance spectroscopy for determining the three-dimensional structure of biological macromolecules in solution; Nobel Prize, 2002.
- Yalow, Rosalyn Sussman** (1921– ), American medical physicist. Developed a radioimmunoassay technique to detect and measure minute levels of substances such as hormones in the body; Nobel Prize, 1977.
- Yang, Chen Ning** (1922– ), Chinese-born American physicist. With T. Lee, disproved the law of conservation of parity for weak interactions; Nobel Prize, 1957.
- Yau, Shing-Tung** (1949– ), Chinese-born American mathematician. Worked in differential geometry and partial differential equations; solved the Calabi conjecture in algebraic geometry and the positive mass conjecture of general relativity theory; Fields Medal, 1982.
- Yersin, Alexandre Émile Jean** (1863–1943), Swiss bacteriologist. Discovered the bubonic plague bacillus in Hong Kong, working independently of S. Kitasato, and developed a serum for it.
- Yoccoz, Jean-Christophe** (1957– ), French mathematician. Worked on the theory of dynamical systems; Fields Medal, 1994.
- Young, Thomas** (1773–1829), English physicist and physician. Discovered the effect of the ciliary muscle on the shape of the eye lens (the mechanism of accommodation).
- Yukawa, Hideki** (1907–1981), Japanese physicist. Postulated the existence of a new fundamental particle, the meson; Nobel Prize, 1949.
- Zariski, Oscar** (1899–1986), Russian-born American mathematician. Worked in algebraic geometry, in particular, on local uniformization and reduction of singularities of algebraic varieties.
- Zeeman, Pieter** (1865–1943), Dutch physicist. Discovered the Zeeman effect in magnetooptics; Nobel Prize, 1902.
- Zelmanov, Efim Isaakovich** (1955– ), Russian mathematician. Contributed to the theory of Jordan algebras and the theory of Lie algebras; solved the restricted Burnside problem, one of the fundamental questions in group theory; Fields Medal, 1994.
- Zener, Clarence Melvin** (1905–1993), American physicist. Proposed mechanism of Zener breakdown.
- Zeno of Elea** (ca. 490–425 B.C.), Greek philosopher and mathematician. Formulated a group of paradoxes, important for their stimulation of philosophical and mathematical thought, which appear to deny the possibility of motion.
- Zernike, Fritz** (1888–1966), Dutch physicist. Developed the phase-contrast microscope, making possible the first microscopic examination of the internal structure of living cells; Nobel Prize, 1953.

**Zewail, Ahmed H.** (1946– ), Egyptian-born American chemist. Studies the transition states of chemical reactions using femtosecond spectroscopy; Nobel Prize, 1999.

**Ziegler, Karl** (1898–1973), German organic chemist. Developed a low-pressure process for production of polyethylene; Nobel Prize, 1963.

**Zinkernagel, Rolf M.** (1944– ), Swiss-born American immunologist and physician. Shared in the discovery of the specificity of cell-mediated immune defense with P. C. Doherty; Nobel Prize, 1996.

**Zinsser, Hans** (1878–1940), American bacteriologist. Developed methods of immunization against typhus.

**Zsigmondy, Richard** (1865–1929), German chemist. Studied colloidal solutions; introduced the ultramicroscope; Nobel Prize, 1925.

**Zworykin, Vladimir Kosma** (1889–1982), Russian-born American physicist. Pioneer in the development of television and the electron microscope.

# Contributor Initials

Each article in the Encyclopedia is signed with the contributor's initials; coauthors' initials are separated by semicolons. The section below, Contributor Initials, gives all such initials, alphabetized according to the capital letters in each initials combination (lowercase letters have been added to differentiate contributors with like initials). The contributor's name is provided. The contributor's affiliation can then be found by turning to the next section, Contributor Affiliations.

# Contributor Affiliations

The list below comprises an alphabetical sequence, according to surname, of all contributors to the Encyclopedia. A brief affiliation is provided for each author. This list may be used in conjunction with the previous section, Contributor Initials, to fully identify the contributor of each article.

## A

- Aagaard, Prof. Knut.** Department of Oceanography, University of Washington.
- Abbott, Dr. Donald P.** Professor of Biology, Hopkins Marine Station, Stanford University, Pacific Grove, California.
- Able, Dr. Kenneth P.** Department of Biological Sciences, State University of New York, Albany.
- Abraham, Dr. Bernard M.** Solid State Science Division, Argonne National Laboratory, Argonne, Illinois.
- Abrahams, David H.** Dexter Chemical Corporation, Bronx, New York.
- Abrahams, Prof. Elihu.** Department of Physics, Rutgers University.
- Abrahamson, Prof. Warren G., II.** Department of Biology, Bucknell University, Lewisburg, Pennsylvania.
- Abramovitch, Dr. Rudolph A.** Department of Chemistry and Geology, Clemson University.
- Abzug, Dr. Malcolm J.** Senior Staff Engineer, Systems Group, TRW, Inc., Redondo Beach, California.
- Achey, Prof. Phillip M.** Institute of Food and Agricultural Sciences, University of Florida.
- Ackerman, Dr. Edward A.** Deceased; formerly, Carnegie Institution of Washington.
- Adair, Dr. Robert K.** Department of Physics, Yale University.
- Adams, Dr. Chris.** Unilever Research, Merseyside, England.
- Adams, Prof. Douglas P.** Department of Mechanical Engineering, Massachusetts Institute of Technology.
- Adams, Dr. E. Dwight.** Department of Physics, University of Florida.
- Adams, Dr. Elijah.** Professor and Head, Department of Biological Chemistry, School of Medicine, University of Maryland.
- Adams, Prof. M. W.** Department of Crop and Soil Sciences, Michigan State University.
- Adams, Dr. Raymond D.** Bullard Professor Emeritus of Neuropathology, Massachusetts General Hospital.
- Adamson, Prof. Arthur W.** Department of Chemistry, University of Southern California.
- Addicott, Prof. Fredrick T.** Department of Botany, University of California, Davis.
- Addison, Cyril C.** Professor of Inorganic Chemistry, University of Nottingham, England.
- Adelberg, Dr. Edward A.** Department of Microbiology, Yale University.
- Adelman, Dr. William J., Jr.** National Institutes of Health, Bethesda, Maryland.
- Ader, Prof. Robert.** Department of Psychiatry, University of Rochester, New York.
- Adewumi, Prof. Michael A.** Petroleum and Natural Gas Engineering, Pennsylvania State University.
- Adkins, George G.** Retired; formerly, Chief, Department of River Basins, Bureau of Power, Federal Power Commission.
- Adler, Dr. David.** Department of Electrical Engineering, Massachusetts Institute of Technology.
- Adler, Dr. Ronald J.** Lockheed Palo Alto Research Laboratories, Palo Alto, California.
- Adrain, Dr. Jonathan.** University of Iowa, Department of Geosciences, Iowa City.
- Agarwal, Dr. Gyan C.** Department of Electrical Engineering, University of Illinois.
- Agrios, Dr. George N.** Department of Plant Pathology, University of Massachusetts.
- Aguiar, Jose L.** Farm Advisor, University of California Cooperative Extension, Riverside County, Indio.
- Ahearn, Prof. Gregory A.** Department of Zoology, University of Hawaii, Manoa.
- Ahlstrom, Dr. Elbert H.** Deceased; formerly, Fishery Oceanography Center, U.S. Bureau of Commercial Fisheries, La Jolla, California.
- Ahmadjian, Dr. Vernon.** Department of Biology, Clark University, Worcester, Massachusetts.
- Ahuja, Prof. Narendra.** Department of Electrical and Computer Engineering, Beckman Institute and Coordinated Science Laboratory, University of Illinois, Urbana.
- Ajmone-Marsan, Dr. Cosimo.** Chief, Branch of Electroencephalography and Clinical Neurophysiology, National Institute of Neurological Diseases and Stroke, National Institutes of Health, Bethesda, Maryland.
- Ajzenberg-Selove, Prof. Fay.** Physics Department, University of Pennsylvania.
- Akasofu, S.-I.** Director, International Arctic Research Center, University of Alaska, Fairbanks.
- Akers, Dr. Donald L.** School of Medicine, Tulane University.
- Akesson, Dr. Norman G.** Agricultural Engineering Department, University of California, Davis.
- Albert, Dr. Henry J.** Manager, Physics and Metallurgy Laboratory, Research and Development Department, Engelhard Industries Division, Engelhard Minerals and Chemicals Corporation, Newark, New Jersey.
- Albright, Dr. Louis D.** Department of Agricultural and Biological Engineering, Cornell University, Ithaca, New York.
- Albright, Dr. Lyle F.** Department of Chemical Engineering, Purdue University.
- Alcorn, Prof. Stanley M.** Department of Plant Pathology, College of Agriculture, University of Arizona.
- Aldridge, Dr. R. J.** Department of Geology, University of Nottingham, England.
- Aldwinckle, Prof. H. S.** Department of Plant Pathology, Cornell University.
- Alexander, Dr. Gene.** Laboratory of Neurosciences, National Institutes of Aging and Health, Bethesda, Maryland.
- Alexander, Prof. R. McNeill.** Department of Biology, University of Leeds, England.
- Alexander, Dr. Vera.** Institute of Marine Science, University of Alaska.
- Alexeff, Prof. Igor.** Department of Electrical and Computer Engineering, University of Tennessee, Knoxville.
- Alger, Prof. Philip L.** Deceased; formerly, Consulting Professor of Electrical Engineering, Rensselaer Polytechnic Institute.
- Algermissen, Dr. S. T.** Aurora, Colorado.
- Allan, Roger.** Executive Editor, "Electronic Design Magazine," Rochelle Park, New Jersey.
- Allan, William.** Dean (retired), School of Engineering, City College of the City University of New York.

- Allredge, Alice L.** Department of Biological Sciences, University of California, Santa Barbara.
- Allen, Dr. John A.** U.M.B.S.M., Marine Station, Isle of Cumbrae, Scotland.
- Allen, Prof. Lawrence H.** Department of Astronomy, University of California, Los Angeles.
- Allen, Prof. Leland C.** Department of Chemistry, Princeton University.
- Allen, Prof. Phillip E.** School of Electrical and Computer Engineering, Georgia Institute of Technology, Atlanta.
- Allenby, Dr. Braden R.** Vice President, AT&T Environment, Health and Safety, Basking Ridge, New Jersey.
- Alley, Prof. Charles L.** Department of Electrical Engineering, University of Utah.
- Allfrey, Dr. Vincent G.** Department of Cell Biology, Rockefeller University.
- Allport, H. Burnham.** Union Carbide Chemical Company, Cleveland, Ohio.
- Allred, Dr. Albert L.** Department of Chemistry, Northwestern University.
- Almgren, Dr. Frederick J., Jr.** Department of Mathematics, Princeton University.
- Almond, Dr. Peter R.** Department of Biophysics, University of Texas, Houston.
- Aloia, Dr. John F.** Department of Medicine, Winthrop-University Hospital, Mineola, New York.
- Alpern, Milton.** Manager, Special Projects Division, Shah Associates, P.C., Bellmore, New York.
- Altaian, Dr. David.** Division Vice President and Technical Director, United Technology Center, Sunnyvale, California.
- Altamuro, Vincent M.** President, Robotics Research, Division of VMA, Inc., Toms River, New Jersey.
- Altrock, Dr. Richard C.** National Optical Astronomy Observatories, National Solar Observatory/Sacramento Peak, Sunspot, New Mexico.
- Alvim, Dr. Paulo dc T.** Centre de Pesquisas Do Cacau (CEPEC), Itabuna. Bahia, Brazil.
- Alvord, Dr. Ellsworth C., Jr.** Department of Neuropathology, University of Washington.
- Ammons, Dr. Nelle.** Retired; Department of Biology, West Virginia University.
- Amsden, Dr. Thomas W.** Geologist, Oklahoma Geological Survey, Norman.
- Anagnostakis, Dr. Sandra L.** Department of Pathology & Ecology, Connecticut Agriculture Experimental Station, New Haven.
- Anders, James E., Sr.** President, Hydraulics Associates, Bethlehem, Pennsylvania.
- Andersen, Prof. David R.** Department of Electrical and Computer Engineering, University of Iowa, Iowa City.
- Anderson, Prof. Alan P.** Department of Electronic and Electrical Engineering, University of Sheffield, England.
- Anderson, Dr. Alfred T., Jr.** Department of Geophysical Sciences, University of Chicago.
- Anderson, Prof. Dana Z.** Joint Institute for Laboratory Astrophysics, University of Colorado.
- Anderson, Harry R.** H. R. Anderson and Associates, Inc., Consulting Engineers, Eugene, Oregon.
- Anderson, Jr., Dr. John D.** Jet Propulsion Laboratory, California Institute of Technology.
- Anderson, Dr. O. Roger.** Lamont-Doherty Geological Observatory, Palisades, New York.
- Anderson, Dr. Paul M.** Department of Electrical and Computer Engineering, Arizona State University.
- Anderson, Prof. Richard G. W.** Department of Cell Biology and Neuroscience, University of Texas Southwestern Medical Center, Dallas.
- Andors, Dr. Allison V.** Department of Ornithology, American Museum of Natural History, New York.
- Andreasen, Dr. Christian.** Bureau Hydrographique International, Monaco.
- Andrew, Dr. Warren.** Chairman, Department of Anatomy, School of Medicine, Indiana University.
- Andrews, Dr. Lester.** Department of Chemistry, University of Virginia.
- Andrews, Dr. Peter.** Department of Palaeontology, British Museum (Natural History), London.
- Andriole, Dr. Stephen J.** Department of Information Systems and Systems Engineering, George Mason University, Fairfax, Virginia.
- Andrus, Dr. C. F.** Agricultural Consultant; formerly, U.S. Department of Agriculture, Charleston, South Carolina.
- Angelakos, Dr. Diogenes J.** Deceased; formerly, College of Engineering, University of California, Berkeley.
- Anglin, Donald L.** Consultant, Automotive and Technical Writing, Charlottesville, Virginia.
- Angrisano, Rear Admiral Guisepp.** Bureau Hydrographique International, Monaco.
- Angus, James W.** Staff Engineer, Avionics Division, Kollsman Instrument Corporation, Elmhurst, New York.
- Ansombe, Prof. Francis J.** Department of Statistics, Yale University.
- Anthes, Prof. Richard A.** Department of Meteorology, College of Earth and Mineral Sciences, Pennsylvania State University.
- Antoni, Dr. Charles M.** Department of Civil Engineering, Syracuse University.
- Anwyl, Robert D.** Retired; formerly, Photographic Consultant, Eastman Kodak Company, Rochester, New York.
- Apfel, Prof. Robert E.** Department of Engineering and Applied Science, Yale University.
- Apker, Dr. L.** General Electric Research Laboratory, Schenectady, New York.
- Appel, Dr. Max J. G.** James A. Baker Institute for Animal Health, Cornell University, Ithaca, New York.
- Appenzeller, Dr. Otto.** Department of Neurology, University of New Mexico School of Medicine.
- Appleby, Dr. Anthony J.** Center for Electrochemical Systems and Hydrogen Research, Texas Engineering Experiment Station, Texas A & M University System.
- Appleby, Dr. Arnold P.** Professor Emeritus of Crop Science, Oregon State University, Corvallis.
- Applegate, Charles E.** Consulting Engineer, Weston, Maryland.
- Applequist, Dr. Thomas.** Sloane Laboratory, Department of Physics, Yale University.
- Arbuckle, P. Douglas.** NASA, Langley Research Center, Hampton, Virginia.
- Arbuckle, Earl F., III.** Engineering Supervisor, WPIX, Inc., New York, New York.
- Arbuckle, Prof. Wendell S.** Deceased; formerly, Department of Dairy Science, University of Maryland.
- Archer, Mary D.** Grantchester, Cambridge, United Kingdom.
- Archibald, Dr. J. David.** Department of Biology, San Diego State University, San Diego, California.
- Ardema, Dr. Mark D.** Research Scientist, National Aeronautics and Space Administration, Ames Research Center, Moffett Field, California.
- Arey, Prof. Leslie B.** Professor Emeritus of Anatomy, Northwestern University.
- Armstrong, Dr. Richard L.** Institute of Arctic and Alpine Research, University of Colorado.
- Arndt, Dr. Kenneth A.** Department of Dermatology, Beth Israel Hospital, Boston, Massachusetts.
- Arney, Cyril.** Engineering & Technology, Marathon Oil Company, Houston, Texas.
- Arnold, Dr. Chester A.** Professor of Botany and Geology and Curator of Paleobotany, University of Michigan.
- Arnstein, Dr. Karl.** Vice President in Charge of Engineering (retired), Goodyear Aircraft Corporation, Akron, Ohio.
- Aron, Dr. Walter.** Consultant, Menlo Park, California.
- Arthur, Dr. Michael A.** Graduate School of Oceanography, University of Rhode Island.
- Ashton, Dr. Mark S.** Yale School of Forestry and Environmental Studies, New Haven, Connecticut.
- Asik, Dr. Joseph R.** Scientific Research Laboratories, Ford Motor Company, Dearborn, Michigan.
- Askey, Dr. Richard.** Mathematics Research Center, University of Wisconsin.
- Aspnes, Dr. David E.** Department of Physics, North Carolina State University, Raleigh.
- Aston, Dr. James.** Deceased; formerly, Consulting Metallurgist, A. M. Beyers Company.
- Astrom, Prof. Karl J.** Department of Automatic Control, Lund Institute of Technology, Lund, Sweden.

**Athenstaedt, Dr. Herbert.** Director, Institut für Molekular-Physikalische Physiologie, Hanover, Germany.

**Atkins, Dr. Elisha.** School of Medicine, Yale University.

**Atkins, Dr. P. W.** Department of Chemistry, Oxford University, England.

**Atlas, Dr. Ronald M.** Department of Biology, University of Louisville, Kentucky.

**Atoda, Dr. Kenji.** Professor of Zoology, Tohoku University, Sendai, Japan.

**Atwood, Dr. Ronald L.** Foote Mineral Company, Kings Mountain, North Carolina.

**Au, Dr. Whitlow W. L.** Marine Mammal Research Program, Hawaii Institute of Marine Biology, Kailua.

**Audus, Dr. Leslie J.** Professor of Botany (retired), Bedford College, University of London, England.

**Austrian, Dr. Robert.** Department of Research Medicine, School of Medicine, University of Pennsylvania.

**Averbach, Prof. Benjamin L.** Department of Materials Science and Engineering, Massachusetts Institute of Technology.

**Axley, Milton J.** Department of Health and Human Services, National Heart, Lung and Blood Institute, Bethesda, Maryland.

**Ayers, Arthur R.** Assistant Professor, Cellular and Development Biology, Harvard University.

**Ayers, Dr. Walter B.** Bureau of Economic Geology, University of Texas, Austin.

**Azarnoff, Dr. Daniel L.** President, Searle Research and Development, G. D. Searle & Co., Skokie, Illinois.

## B

**Bachinski, Dr. Sharon W.** Department of Geology, University of New Brunswick, Fredericton, Canada.

**Back, Dr. Thomas G.** Department of Chemistry, Faculty of Science, University of Calgary, Alberta, Canada.

**Backer, Dr. Donald C.** Department of Astronomy, University of California.

**Backstrom, Prof. Gunnar.** Institute of Physics, University of Umea, Sweden.

**Bada, Dr. Jeffrey L.** Scripps Institution of Oceanography, University of California, San Diego-La Jolla.

**Badgley, Dr. Peter C.** Earth Science Division, Office of the Naval Reserve, Arlington, Virginia.

**Baer, Prof. Charles J.** Department of Mechanical Engineering, University of Kansas.

**Baer, Dr. Donald R.** Jackson Laboratory, Organic Chemical Department, E. I. du Pont de Nemours and Company, Wilmington, Delaware.

**Baer, Dr. Norbert S.** Conservation Center of the Institute of Fine Arts, New York University.

**Bagley, Dr. Brian G.** Bell Laboratories, Murray Hill, New Jersey.

**Bagnall, Dr. Kenneth W.** Research Chemist, Atomic Energy Research Establishment, Harwell, England.

**Bahcall, Dr. John N.** Institute for Advanced Studies, Princeton, New Jersey.

**Bahr, Dr. Janice M.** Professor of Animal Science and Physiology, Department of Animal Sciences, College of Agriculture, University of Illinois, Urbana-Champaign.

**Bai, Dr. Er-Wei.** Department of Electrical & Computer Engineering, University of Iowa, Iowa City.

**Bailar, Prof. John C., Jr.** Deceased; formerly, School of Chemical Sciences, University of Illinois, Urbana-Champaign.

**Bailey, Prof. A. Earle.** Department of Electrical Engineering, University of Southampton, England.

**Bailey, Prof. A. G.** Department of Electrical Engineering, University of Southampton, England.

**Bailey, Prof. Catherine H.** Department of Horticulture, Rutgers University.

**Bailey, Frederick G.** Large Steam Turbine-Generator Department, General Electric Company, Schenectady, New York.

**Bailey, Prof. Milton E.** Department of Food Science and Nutrition, College of Agriculture, University of Missouri-Columbia.

**Bailey, Dr. Reeve M.** Deceased; formerly, Curator of Fishes, Museum of Zoology, University of Michigan.

**Bailey, Dr. S. W.** Department of Geology, University of Wisconsin.

**Baker, Edward W.** Entomology Research Division, Agricultural Research Service, U.S. Department of Agriculture.

**Baker, Dr. Paul A.** Department of Geology, Duke University.

**Baker, Dr. M. Pauline.** National Center for Supercomputing Applications, University of Illinois, Urbana.

**Baker, Dr. Victor R.** Department of Geosciences, University of Arizona.

**Bakken, Prof. George S.** Center Director, Center for Biodiversity Studies, Indiana State University, Terre Haute.

**Balakrishnan, Dr. V. K.** Department of Mathematics, University of Maine.

**Balch, Dr. Alan L.** Department of Chemistry, University of California, Davis.

**Balderes, Dr. T.** Engineering Specialist, Grumman Aerospace Corporation, Bethpage, New York.

**Baldi, Dr. Bruce G.** Plant Hormone Laboratory, U.S. Department of Agriculture, Beltsville, Maryland.

**Baldrige, Dr. W. Scott.** Earth and Space Science Division, Los Alamos National Laboratory.

**Baldwin, Harry L., Jr.** Department of Mathematics, San Diego City College, San Diego, California.

**Bales, Robert A.** Center for Advanced Aviation Development, MITRE Corporation, McLean, Virginia.

**Balick, Prof. Bruce.** Department of Astronomy, University of Washington, Seattle.

**Baliga, Prof. B. Jayant.** Department of Electrical and Computer Engineering, North Carolina State University.

**Ball, Dr. John E. D.** Telecommunications Consultant, Vienna, Virginia.

**Ballard, Prof. William W.** Department of Biological Sciences, Dartmouth College.

**Ballou, Prof. Clinton E.** Department of Molecular and Cell Biology, University of California, Berkeley.

**Bally, Dr. John.** Center of Astrophysics and Space Astronomy, University of Colorado, Boulder.

**Baltay, Dr. Charles.** Department of Physics, Yale University.

**Balzani, Prof. Vincenzo.** Dipartimento de Chimica, Università di Bologna, Italy.

**Bambach, Dr. Richard A.** Department of Geological Sciences, Virginia Polytechnic Institute.

**Bamburg, Prof. James R.** Department of Biochemistry, Colorado State University.

**Banerjee, Dr. Pat.** Associate Professor, Mechanical Engineering, University of Illinois, Chicago.

**Banks, Dr. Harlan P.** Emeritus Professor of Botany, Division of Biological Sciences, Cornell University.

**Banks, Prof. William P.** Chairperson, Department of Psychology, Pomona College, Claremont, California.

**Banner, Dr. Donald W.** Banner, Birch, McKie and Beckett, Washington, D.C.

**Bar-Sela, Dr. Shlomo.** Department of Medicine, Allergy-Immunology Section, Medical College of Wisconsin.

**Barash, Prof. David P.** Department of Psychology, University of Washington, Seattle.

**Barber, Dr. Richard T.** Duke University Marine Laboratory.

**Barbosa, Dr. Pedro.** Department of Entomology, College of Life Sciences, University of Maryland.

**Barbour, Dr. Neil.** Charles Stark Draper Laboratory, Inc., Cambridge, Massachusetts.

**Barclay, Dr. Harriet G.** Professor of Botany, Department of Life Sciences, University of Tulsa.

**Bard, Dr. Allen J.** Department of Chemistry, College of Natural Sciences, University of Texas, Austin.

**Bardsley, Dr. James Norman.** Lawrence Livermore National Laboratory, University of California.

**Barer, Prof. Robert.** Department of Human Biology and Anatomy, University of Sheffield, England.

**Bargellini, Dr. Pier L.** Retired; formerly, COMSAT Laboratories, Clarksburg, Maryland.

**Barger, Prof. Vernon D.** Department of Physics, University of Wisconsin, Madison.

**Barghoorn, Prof. Elso S.** Department of Biology and Botanical Museum, Harvard University.

- Barkalow, Dr. David G.** Department of Biochemistry, Purdue University.
- Barker, Prof. Daniel S.** Department of Geological Sciences, University of Texas, Austin.
- Barker, Dr. Fred.** Geological Survey, U.S. Department of the Interior, Denver, Colorado.
- Barker, Dr. Horace A.** Department of Biochemistry, University of California, Berkeley.
- Barker, Dr. Joseph W.** Chairman of the Board (retired), Research Corporation, New York, New York.
- Barker, Dr. R. W. J.** Department of Electrical and Electronic Engineering, Trent Polytechnic, Peterborough, Ontario, Canada.
- Barkley, Prof. T. M.** Division of Biology, Kansas State University.
- Barksdale, Dr. Lane.** Department of Microbiology, School of Medicine, New York University Medical Center.
- Barnard, Dr. J. Laurens.** Curator of Crustacea, Smithsonian Institution.
- Barnes, Dr. Robert K.** Research and Development Department, Chemicals and Plastics Operations Division, Union Carbide Corporation, South Charleston, West Virginia.
- Barnes, Dr. Ted.** Physics Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Barnes, Ivan.** Water Resources Division, Geological Survey, U.S. Department of the Interior, Menlo Park, California.
- Barnett, Peter D.** Forensic Science Associates, Richmond, California.
- Barnitz, Edward S.** Consultant in Vacuum Engineering, Rochester, New York.
- Barr, Dr. David.** Department of Entomology, Royal Ontario Museum, Toronto, Ontario, Canada.
- Barr, Dr. Donald J. S.** Principal Research Scientist, Centre for Land and Biological Resources Research, Ottawa, Ontario, Canada.
- Barrett, Dr. A. G. M.** Department of Chemistry, Northwestern University.
- Barron, Prof. Eric.** Director, Earth System Science Center, Pennsylvania State University, University Park.
- Barronet, Dr. Alain.** Centre de Recherche sur les Mécanismes de la Croissance Cristalline, Marseille, France.
- Barry, Brother B. Austin.** Civil Engineering Department, Manhattan College.
- Barry, Dr. Michelle M.** Department of Medical Microbiology and Immunology, University of Alberta, Edmonton, Canada.
- Bars, Dr. Itzhak.** Department of Physics, Yale University.
- Barth, Prof. T. F. W.** Deceased; formerly, Geologic Museum, Oslo.
- Bartlett, Prof. Robert W.** Dean, College of Mines, University of Idaho, Moscow.
- Barton, Dr. Jennifer Kehlet.** Biomedical Engineering Program, University of Arizona, Tucson.
- Barton, Dr. Mark D.** Department of Earth and Space Sciences, University of California, Los Angeles.
- Barton, Richard L.** National Aeronautics and Space Administration, Lyndon B. Johnson Space Center, Houston, Texas.
- Bash, Dr. Jack.** University–National Oceanographic System Office, University of Rhode Island, Saunterstown.
- Basolo, Prof. Fred.** Department of Chemistry, Northwestern University.
- Bass, Prof. Henry E.** National Center for Physical Acoustics, University of Mississippi.
- Bass, Prof. Jack.** Department of Physics and Astronomy, Michigan State University.
- Bassett, Dr. C. Andrew L.** Department of Orthopaedic Surgery, Bioelectric Research Center, Columbia University, Riverdale.
- Bates, Dr. Robert L.** Department of Geology, Ohio State University.
- Battles, Byron W.** The Battles Group, LLC, Silver Spring, Maryland.
- Bauer, Prof. E.** Department of Physics, Arizona State University, Tempe.
- Bauer, Dr. Simon H.** Department of Chemistry, Cornell University.
- Baumeister, Prof. Theodore.** Deceased; formerly, Consulting Engineer; Stevens Professor of Mechanical Engineering, Emeritus, Columbia University; Editor in Chief, "Standard Handbook for Mechanical Engineers."
- Baumgarten, Dr. Alexander.** Department of Laboratory Medicine, School of Medicine, Yale University.
- Baumiller, Dr. Tomasz.** Department of Geological Sciences, University of Michigan, Ann Arbor.
- Baver, Prof. Leonard D.** Retired; formerly, Agronomy Department, Ohio State University.
- Bayfield, Dr. James E.** Department of Physics, University of Pittsburgh.
- Beall, Christine.** Consulting Architect, Columbus, Texas.
- Beam, Dr. Charles F.** Department of Chemistry, College of Charleston, South Carolina.
- Beams, Dr. Jesse.** Deceased; formerly, Department of Physics, University of Virginia.
- Bean, Howard S.** Deceased; formerly, Consultant on Fluid Metering, Liquids and Gases, Sedona, Arizona.
- Beard, Dr. Benjamin H.** Agronomy and Range Science Extension, University of California, Davis.
- Beatty, J. Kelly.** Consultant, Chelmsford, Massachusetts.
- Beaty, H. Wayne.** Consultant, Fairfax, Virginia.
- Beaumont, Robert T.** Director of Meteorological Operations, E. G. G., Inc., Boulder, Colorado.
- Beaumont, Prof. Ross A.** Department of Mathematics, University of Washington.
- Beaver, Dr. Wallace W.** Deceased; formerly, Director of Research and Development, Brush Beryllium Company, Cleveland, Ohio.
- Beck, Dr. Charles B.** Professor of Botany, University of Michigan.
- Beck, Prof. Curt W.** Department of Chemistry, Amber Research Laboratory, Vassar College, Poughkeepsie, New York.
- Beck, James.** Boeing Defense and Space Group, Rocketdyne Division, Boeing North American Inc., Canoga Park, California.
- Beck, Karl M.** Abbott Laboratories, North Chicago, Illinois.
- Becken, Eugene D.** Vice President, Operations, RCA Global Communications, Inc., New York.
- Becker, Dr. Elery R.** Deceased; formerly, Division of Life Sciences, Arizona State University.
- Becker, Dr. Henry A.** Department of Chemical Engineering, Queen's University, Kingston, Ontario, Canada.
- Becker, Dr. Philippe.** AT&T Bell Laboratories, Murray Hill, New Jersey.
- Bederson, Dr. Benjamin.** Department of Physics, New York University.
- Beer, Dr. Steven V.** Department of Plant Pathology, College of Agriculture and Life Sciences, Cornell University.
- Belfit, Dr. Robert W.** Manager, Quality Standards, Quality Assurance Department, Dow Chemical Company, Midland, Michigan.
- Bell, Morton A.** American Air Filter Company, Inc., New York.
- Bell, Prof. Norman R.** Department of Electrical Engineering, North Carolina State University.
- Bell, Robin E.** Lamont-Doherty Geological Observatory of Columbia University, Palisades, New York.
- Bell, Dr. William E.** Department of Pediatrics, University of Iowa.
- Belrose, Dr. John S.** Communications Research Centre, Department of Communications, Ottawa, Ontario, Canada.
- BeMiller, Prof. James N.** Director, Whistler Center for Carbohydrate Research, Purdue University.
- Bemis, Dr. David A.** Director, Clinical Bacteriology and Mycology Services, University of Tennessee, Knoxville.
- Bender, Prof. Myron L.** Department of Chemistry, Northwestern University.
- Bender, Prof. Paul J.** Professor of Physical Chemistry, University of Wisconsin.
- Benedict, Dr. Manson.** Institute Professor Emeritus, Department of Nuclear Engineering, Massachusetts Institute of Technology.
- Bengston, Dr. Stefan.** Senior Curator (Invertebrate Fossils), Swedish Museum of Natural History, Department of Palaeozoology, Stockholm, Sweden.
- Benito, Dr. Jesús.** Department of Animal Biology I—Zoology of Invertebrates, University Complutense, Madrid, Spain.
- Benner, Dr. Frank C.** Assistant Director, Research and Development Department, Norton Company, Worcester, Maine.

- Bennett, Prof. Albert F.** Department of Ecology and Evolutionary Biology, University of California, Irvine.
- Bennett, Dr. H. Stanley.** Department of Molecular, Cellular and Developmental Biology, University of Colorado.
- Bennett, Prof. Joan W.** Department of Cell and Molecular Biology, Tulane University, New Orleans, Louisiana.
- Bennett, Dr. M. B.** Senior Lecturer, Anatomical Sciences, University of Queensland, Brisbane, Australia.
- Bennett, Prof. Michael V. L.** Department of Neuroscience, Albert Einstein College of Medicine, New York.
- Bennett, Dr. Orus L.** Vice President, GRC Panels Unlimited, Leeds, Alabama.
- Benninghoff, Dr. William S.** Department of Botany, University of Michigan.
- Benny, Dr. Gerald L.** Department of Plant Pathology, University of Florida, Gainesville.
- Benson, Prof. Frank A.** Department of Electronic and Electrical Engineering, University of Sheffield, England.
- Bent, Prof. Brian E.** Department of Chemistry, Columbia University, New York.
- Beranek, Dr. Leo L.** Chief Scientist (retired), Bolt Beranek and Newman, Inc., Cambridge, Massachusetts.
- Beresford, Dr. William A.** Department of Anatomy, West Virginia University.
- Berg, Dr. Clyde.** Clyde Berg and Associates, Long Beach, California.
- Berger, Dr. France B.** Kearfott Division, The Singer Company, Little Falls, New Jersey.
- Berger, Harold.** Industrial Quality, Inc., Gaithersburg, Maryland.
- Berger, Dr. Richard D.** Department of Plant Pathology, University of Florida.
- Berger, Prof. Wolfgang H.** Geological Research Division, Scripps Institution of Oceanography, La Jolla, California.
- Bergren, Dr. W. A.** Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.
- Bergh, Dr. Berthold O.** Department of Plant Sciences, University of California, Riverside.
- Berglund, Neil.** Manager of Technology Development, Intel Corporation, Aloha, Oregon.
- Bergmann, Prof. Peter G.** Department of Physics, Syracuse University.
- Berkowitz, Dr. Gerald A.** Institute for Photobiology of Cells and Organelles, Brandeis University.
- Bernard, Dr. E. N.** National Oceanic and Atmospheric Administration, Pacific Marine Environmental Laboratory, Seattle, Washington.
- Berner, Dr. Elizabeth K.** Department of Geology and Geophysics, Yale University.
- Berner, Prof. Lewis.** Acting Director, Division of Biological Sciences, University of Florida.
- Berner, Dr. Robert A.** Department of Geology and Geophysics, Yale University.
- Bernson, Dr. Laurence.** Environmental Management Department, AT&T Bell Laboratories, Murray Hill, New Jersey.
- Bernstein, Dr. I. M.** Department of Metallurgy and Materials Science, Carnegie-Mellon University.
- Bernstein, Dr. Robert I.** Professor of Electrical Engineering and Associate Director, Electronics Research Laboratories, Columbia University.
- Berry, Dr. Spencer J.** Department of Biology, Wesleyan University.
- Berry, Dr. William B. N.** Museum of Paleontology, University of California, Berkeley.
- Bertsch, Dr. George F.** Department of Physics, Michigan State University.
- Bethe, Prof. Hans A.** Floyd R. Newman Laboratory of Nuclear Studies, Cornell University.
- Betts, Dr. Russell.** Argonne National Laboratory, Argonne, Illinois.
- Beutler, Dr. Bruce.** Howard Hughes Medical Institute, University of Texas, Dallas.
- Bever, Prof. Michael B.** Department of Materials Science and Engineering, Massachusetts Institute of Technology.
- Bewley, Dr. Loyal V.** Dean (retired), College of Engineering, Lehigh University.
- Beyer, Dr. Ann L.** Department of Microbiology, University of Virginia.
- Bichsel, Dr. Hans.** Department of Radiology, University of Washington.
- Bicknell, Prof. Joseph.** Department of Aeronautics and Astronautics, Massachusetts Institute of Technology.
- Biederman, Dr. Joseph.** Pediatric Psychopharmacological Unit, Massachusetts General Hospital, Boston.
- Biegel, Prof. John E.** Department of Engineering, University of Central Florida.
- Bieler, David B.** Department of Geology and Geophysics, Centenary College of Louisiana, Shreveport.
- Bienenstock, Dr. Arthur.** Professor of Applied Physics, Stanford University; Director, Stanford Synchrotron Radiation Laboratory.
- Biermann, Dr. Christopher.** Department of Forest Products, Forest Research Laboratory, Oregon State University, Corvallis.
- Bigeleisen, Prof. Jacob.** Department of Chemistry, University of Rochester.
- Bignami, Prof. Giovanni F.** Istituto per Ricerche in Fisica Cosmica e Tecnologie Relative, Milan, Italy.
- Billet, Prof. Michael.** Head, Fluid Dynamics Department, Applied Research Laboratory, Pennsylvania State University, State College.
- Billig, Dr. Frederick S.** Applied Physics Laboratory, Johns Hopkins University, Laurel, Maryland.
- Billingham, Dr. Rupert E.** Department of Biology, University of Texas Health and Science Center, Dallas.
- Billings, Dr. Bruce H.** Special Assistant to the Ambassador of Science and Technology, Embassy of the United States of America, Taipei.
- Billington, Dr. Douglas S.** Senior Staff Advisor for Materials Science, Metals and Ceramics Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Bing, Prof. R. H.** Department of Mathematics, University of Wisconsin.
- Bingham, Prof. Carol.** Department of Physics, University of Tennessee, Knoxville.
- Bingham, Dr. Richard.** Department of Chemistry, Princeton University.
- Bird, Dr. Thomas D.** University of Washington, School of Medicine, Seattle.
- Birkenheuer, Dr. Daniel L.** Lakewood, Colorado.
- Birkhoff, Prof. Garrett.** Department of Mathematics, Harvard University.
- Birks, Dr. L. S.** Retired; formerly, Radiation Technology Division, Naval Research Laboratory, Washington, D.C.
- Biscaye, Dr. Pierre E.** Lamont-Doherty Geological Observatory, Palisades, New York.
- Bisno, Dr. A. L.** Veterans Administration Medical Center, Miami, Florida.
- Bisplinghoff, Raymond L.** Dean, School of Engineering, Massachusetts Institute of Technology.
- Black, Dr. Harold S.** Communications Consultant, Summit, New Jersey.
- Black, Prof. Paul H.** Department of Mechanical Engineering, Ohio University.
- Black, Dr. Robert F.** Department of Geology, University of Connecticut.
- Blackburn, J. Lewis.** Consulting Engineer, Bothell, Washington.
- Blackwell, Dr. Meredith.** Department of Plant Biology, Louisiana State University, Baton Rouge.
- Blad, Dr. Blaine L.** Agricultural Meteorology Section, University of Nebraska.
- Blades, Dr. Brooke.** Department of Anthropology, University of Maryland, College Park.
- Blain, Dr. Andrew.** Institute of Astronomy, Cambridge, United Kingdom.
- Blake, Dr. Daniel B.** Department of Geology, University of Illinois, Urbana.
- Blandford, Prof. Roger D.** Department of Theoretical Astrophysics, California Institute of Technology, Pasadena.
- Blankenship, Dr. James E.** Department of Physiology and Biophysics, Marine Biomedical Institute, University of Texas, Galveston.
- Blanton, J. W.** General Manager, Advanced Component Technology Department, General Electric Company, Cincinnati, Ohio.
- Blaser, Prof. H. Weston.** Department of Botany, University of Washington.
- Blass, Dr. Elliott M.** Department of Psychology, Johns Hopkins University.
- Blatt, Prof. Frank J.** Department of Physics, Michigan State University.
- Blatt, Dr. Harvey.** Hebrew University of Jerusalem, Givat Ram, Jerusalem, Israel.

- Bleiweis, John J.** Consultant, Great Falls, Virginia.
- Blencoe, Dr. James G.** Chemistry Division, Oak Ridge National Laboratory.
- Blitz, Dr. Leo.** Laboratory for Millimeter-Wave Astronomy, University of Maryland.
- Blobel, Dr. Günter B.** Department of Cell Biology, Rockefeller University, New York; Nobelist.
- Bloch, Dr. Spencer J.** Department of Mathematics, University of Chicago.
- Block, Dr. Ira.** Department of Textiles-Consumer Economics, University of Maryland.
- Bloomfield, Prof. Philip E.** Department of Physics, University of Pennsylvania; City College of the City University of New York, Bloomfield.
- Blough, Prof. Donald S.** Department of Psychology, Brown University.
- Blouin, Dr. Edmour F.** College of Veterinary Medicine, Oklahoma State University, Stillwater.
- Bluestein, Prof. Howard B.** Department of Meteorology, University of Oklahoma.
- Blumenthal, Prof. Leonard M.** Deceased; formerly, Defoe Distinguished Professor of Mathematics, University of Missouri.
- Blumenthal, Warren B.** Blumenthal-Zirconium, North Tonawanda, New York.
- Boast, Dr. Warren B.** Anson Marston Distinguished Professor Emeritus of Electrical Engineering, Iowa State University.
- Bobart, George F.** Manager, Induction Heating and Ultrasonic Cleaning Department, Westinghouse Electric Corporation, Sykesville, Maryland.
- Bobbitt, Dr. James M.** Department of Chemistry, University of Connecticut.
- Bochner, Dr. Salomon.** Deceased; formerly, Department of Mathematics, Rice University.
- Bock, Dr. Walter J.** Professor of Evolutionary Biology, Department of Biological Sciences, Columbia University.
- Bocko, Dr. Mark F.** Department of Physics and Astronomy, College of Arts and Science, University of Rochester.
- Boell, Dr. Edgar J.** Department of Biology, Yale University.
- Boero, Dr. Ferdinando.** Professor of Zoology, Università di Lecce, Dipartimento di Biologia, Stazione di Biologia Marina, Lecce, Italy.
- Boggs, Dr. Paul T.** Computational Sciences and Mathematics Research Department, Sandia National Laboratories, Livermore, California.
- Bogucki, Dr. Peter.** Department of Anthropology, Princeton University, Princeton, New Jersey.
- Bohach, Dr. Greg.** Department of Microbiology, Molecular Biology, and Biochemistry, University of Idaho, Moscow.
- Bohme, Prof. M.** Department of Chemistry, Friedrich-Wilhelms University, Germany.
- Boke, Dr. Norman H.** George Lynn Cross Research Professor of Botany, University of Oklahoma.
- Boles, Prof. James R.** Department of Geological Sciences, University of California, Santa Barbara.
- Bolin, Dr. Steven R.** Research Leader, Virolgy Cattle Research, Agricultural Research Service, U.S. Department of Agriculture, Ames, Iowa.
- Bolt, Prof. J. A.** Department of Mechanical Engineering, University of Michigan.
- Bond, Dr. Gerard.** Lamont-Doherty Geological Observatory, Palisades, New York.
- Bondybey, Dr. Vladimir E.** Bell Laboratories, Murray Hill, New Jersey.
- Bonner, Dr. Walter D., Jr.** Department of Biochemistry and Biophysics, School of Medicine, University of Pennsylvania.
- Boothroyd, Dr. Carl W.** Department of Plant Pathology, Cornell University.
- Bormann, Dr. Bernard T.** Department of Forest Sciences, Oregon State University, Corvallis.
- Borowiecki, Prof. Barbara Z.** Department of Geography, University of Wisconsin, Milwaukee.
- Borrello, Sebastian R.** Central Research Laboratories, Texas Instruments Inc., Dallas, Texas.
- Borst, Henry V.** Henry V. Borst & Associates, Wayne, Pennsylvania.
- Bortman, Dr. Marci L.** Waste Management Institute, Marine Sciences Research Center, State University of New York, Stony Brook.
- Bosart, Prof. Lance F.** Department of Atmospheric Sciences, State University of New York, Albany.
- Boshkov, Prof. Stefan H.** Henry Krumb School of Mines, Columbia University.
- Boss, Dr. Alan P.** Carnegie Institution of Washington, Department of Terrestrial Magnetism, Washington, D.C.
- Bothwell, Dr. Mark.** Biochemical Sciences Laboratory, Princeton University.
- Botset, Holbrook G.** Professor Emeritus of Petroleum Engineering, University of Pittsburgh.
- Bouchard, Prof. Thomas J.** Chairman, Department of Psychology, University of Minnesota.
- Bouldin, Dr. Donald W.** Electrical and Computer Engineering, University of Tennessee.
- Bouwkamp, Dr. John C.** Department of Horticulture, College of Agriculture, University of Maryland.
- Bowler, Dr. Bruce E.** Division of Chemistry and Chemical Engineering, California Institute of Technology.
- Bowman, Richard G.** Deceased; formerly, Technical Assistant to the President, Republic Aviation Corporation, Farmingdale, New York.
- Bowman, Rush A.** Consulting Engineer, Memphis, Tennessee.
- Bowman, Dr. Thomas E.** Division of Crustacea, Smithsonian Institution.
- Bowman, Waldo G.** Editor (retired), "Engineering News Record." Boyd, Dr. F. R. Geophysical Laboratory, Washington, D.C.
- Box, Dr. Elgene O.** Department of Geography, University of Georgia.
- Boyd, Dr. Richard H.** Department of Chemical Engineering, University of Utah.
- Boyden, Prof. Edward A.** Department of Biological Structure, School of Medicine, University of Washington.
- Boynton, Dr. Robert M.** Department of Psychology, University of California, San Diego.
- Boynton, Dr. Robert S.** National Lime Association, Washington, D.C.
- Bozarth, Dr. Robert F.** Department of Life Science, Indiana State University, Terre Haute.
- Bozorth, Dr. Richard M.** Research Physicist (retired), Bell Telephone Laboratories, Murray Hill, New Jersey.
- Bracewell, Dr. Ronald N.** Professor of Electrical Engineering, Emeritus, Stanford University, Stanford, California.
- Bradley, Dr. Robert L., Jr.** Department of Food Science, College of Agricultural and Life Sciences, University of Wisconsin.
- Bradley, Prof. S. Gaylen.** Department of Microbiology and Immunology, Virginia Commonwealth University, Richmond.
- Bradley, Prof. William F.** Department of Chemical Engineering, University of Texas, Austin.
- Bradley, Prof. William W.** Department of Civil Engineering and Institute of Colloid and Surface Science, Clarkson College of Technology.
- Bradner, Mead.** Technical Director, Foxboro Company, Foxboro, Massachusetts.
- Bradsher, Prof. Charles K.** Department of Chemistry, Duke University.
- Bragg, Prof. Michael B.** Department of Aeronautical and Astronautical Engineering, University of Illinois at Urbana-Champaign.
- Brainard, Dr. George C.** Department of Neurology, Thomas Jefferson University, Jefferson Medical College, Philadelphia, Pennsylvania.
- Bralla, J. R. Casey.** Consultant, Mechanical Engineering, Martinez, Georgia.
- Brammer, Dr. Anthony J.** Institute for Microstructural Science, National Research Council of Canada, Ottawa, Ontario.
- Brand, Dr. Louis.** Deceased; formerly, M. D. Anderson Professor of Mathematics, Department of Mathematics, University of Houston.
- Brandt, Dr. G. Donald.** Professor Emeritus, City University of New York.
- Brandt, Prof. John C.** Department of Physics and Astronomy, Institute for Astrophysics, University of New Mexico, Albuquerque.
- Brandt, Dr. Philip W.** Department of Anatomy, College of Physicians and Surgeons, Columbia University.
- Brassell, Prof. Simon C.** Professor of Geological Sciences, Biogeochemical

- Laboratories, Indiana University, Bloomington.
- Brasseur, Dr. Guy P.** Director, Atmospheric Chemistry Division, National Center for Atmospheric Research, Boulder, Colorado.
- Breed, Dr. Michael D.** Environmental Population and Organismic Biology, University of Colorado.
- Breen, Dr. Patrick J.** Department of Horticulture, Oregon State University.
- Breger, Dr. Irving A.** Deceased; formerly, Office of Energy Resources, U.S. Geological Survey, Reston, Virginia.
- Breier, Dr. Alan.** Department of Psychiatry, Yale University School of Medicine, and Connecticut Mental Health Center, New Haven.
- Breinan, Dr. Edward M.** Materials Science Laboratory, United Technologies Research Center, East Hartford, Connecticut.
- Breman, Dr. Joel D.** Division of Parasitic Diseases, Centers for Disease Control, Department of Health and Human Services, Atlanta, Georgia.
- Breslin, Dr. Vincent T.** Waste Management Institute, Marine Sciences Research Center, State University of New York, Stony Brook.
- Breslow, Dr. David S.** David S. Breslow Associates, Wilmington, Delaware.
- Bressler, Dr. Peter E.** Endocrine & Diabetes Associates of Texas, Dallas.
- Brett, Dr. Carlton.** Department of Geological Sciences, University of Rochester.
- Breuer, Glenn D.** Consulting Engineer, Transmission Systems Development and Engineering Department, General Electric Company, Schenectady, New York.
- Brewer, Dr. Charles P.** Shell Development Corporation, Emeryville, California.
- Brewer, S. Theodore.** Deceased; formerly, Head, Undersea and Lightwave Engineering Department, Bell Laboratories, Holmdel, New Jersey.
- Brian, Dr. M. V.** Institute of Terrestrial Ecology, Furzebrook Research Station, Wareham, England.
- Brickley, Robert L.** Marketing Manager, Westinghouse Electric Corporation, Springfield, Massachusetts.
- Bridges, Prof. Patricia S.** Deceased; formerly, Department of Anthropology, Queens College and CUNY Graduate Center, Flushing, New York.
- Bridgman, Prof. Percy W.** Deceased; formerly, Harvard University.
- Briggs, Dr. Derek E. G.** Department of Geology, University of Nottingham, England.
- Briggs, Dr. John D.** Department of Entomology, Ohio State University.
- Briggs, M. Michael.** Missile Systems Division, Integrated Systems Inc., Santa Clara, California.
- Briggs, Dr. Winslow R.** Department of Plant Biology, Carnegie Institution of Washington, Stanford, California.
- Brimacombe, Dr. R.** Max-Planck Institut für Molekulare Genetik, Berlin, Germany.
- Brindley, Dr. George W.** Department of Geosciences, Pennsylvania State University.
- Brintzinger, Dr. Hans.** Fachbereich Biologie-Chemie, Universität Konstanz, Germany.
- Brisbin, Dr. I. Lehr.** Savannah River Ecology Laboratory, University of Georgia, Aiken, South Carolina.
- Broadus, Dr. Arthur E.** Associate Professor of Medicine, Department of Medicine, Yale University.
- Brockenbrough, Dr. Roger L.** R. L. Brockenbrough Associates, Inc., Pittsburgh, Pennsylvania.
- Brockhouse, Dr. Bertram N.** Institute for Materials Research, McMaster University.
- Brockway, Prof. Lawrence O.** Deceased; formerly, Department of Chemistry, University of Michigan.
- Brod, Dr. Chris.** Glen Canyon Environmental Studies, Bureau of Reclamation, Flagstaff, Arizona.
- Brodersen, Prof. Klaus.** Professor of Inorganic and Analytical Chemistry, University of Erlangen-Nurnberg, Germany.
- Brodsky, Dr. Barbara.** Department of Biochemistry, UMDNJ-Robert Wood Johnson Medical School, Piscataway, New Jersey.
- Brodsky, Dr. William A.** Mount Sinai School of Medicine of the City University of New York; Institute for Medical Research and Studies, New York.
- Brofman, Dr. Peter J.** Senior Engineering, General Technology Division, IBM Corp., Hopewell Junction, New York.
- Bromley, Prof. D. Allan.** Science Adviser to the President of the United States.
- Bromley, Willard S.** Consulting Forester and Association Consultant, New Rochelle, New York.
- Bronstein, Dr. Judith.** Department of Ecology and Evolutionary Biology, University of Arizona, Tucson.
- Brook, Dr. Marx.** Department of Physics, New Mexico Institute of Mining and Technology, Socorro.
- Brook, Rollins.** Bolt Beranek and Newman Inc., Canoga Park, California.
- Brooke, Dr. M. M.** Deceased; formerly, Deputy Chief, Licensure and Development Branch, Center for Disease Control, U.S. Public Health Service, Atlanta, Georgia.
- Brooks, Dr. Frank D.** Department of Physics, University of Capetown, Rondebosch, South Africa.
- Brooks, Prof. Philip R.** Department of Chemistry, Wise School of Natural Sciences, Rice University.
- Brotner, Dr. William W.** Research Advisor, Eli Lilly and Company, Indianapolis, Indiana.
- Brouwer, Prof. Dirk.** Deceased; formerly, Director, Observatory, Yale University.
- Browder, Dr. James Steve.** Department of Physics, Division of Science and Mathematics, Jacksonville University, Jacksonville, Florida.
- Brown, Prof. Frederick C.** Department of Physics, University of Illinois.
- Brown, Dr. Glenn H.** Professor of Chemistry and Director of the Liquid Crystal Institute, Kent State University.
- Brown, Prof. Herbert C.** Department of Chemistry, Purdue University.
- Brown, Dr. Jason W.** Institute for Research in Behavioral Neuroscience, Department of Neurology, New York University Medical Center.
- Brown, Michael D.** Department of Biochemistry and Molecular Biology, Colorado State University.
- Brown, Dr. Perry.** Dean, School of Forestry, Montana Forest and Conservation Experiment Station, University of Montana, Missoula.
- Brown, Dr. Robert L.** National Radio Astronomy Observatory, Charlottesville, Virginia.
- Brown, Dr. Steven S.** National Oceanic and Atmospheric Administration Aeronomy Laboratory, Boulder, Colorado, and Cooperative Institute for Research in the Environmental Sciences, University of Colorado, Boulder.
- Brown, Dr. William L., Jr.** Emeritus Professor of Entomology, Cornell University.
- Brownell, Dr. Gordon L.** Head, Physics Research Laboratory, Massachusetts General Hospital, Boston.
- Browning, Dr. Keith A.** Chief, Meteorological Office, Radar Research Laboratory, Royal Signals and Radar Establishment, Worcester, England.
- Brownlee, Dr. Donald E., II.** Department of Astronomy, University of Washington, Seattle.
- Brubaker, Prof. Robert R.** Department of Microbiology, Michigan State University, East Lansing.
- Bruce, Bill.** LID Standards Laboratory, Hewlett-Packard, Loveland, Colorado.
- Brummett, Prof. Anna Ruth.** Associate Professor of Biology and Associate Dean, Oberlin College.
- Brunner, Dr. J. Robert.** Department of Food Science and Human Nutrition, Michigan State University.
- Bruno, Michael H.** Graphics Arts Consultant, Bradenton, Florida.
- Brunski, Dr. John B.** Department of Biomedical Engineering, Rensselaer Polytechnic Institute.
- Brush, Dr. Alan H.** Department of Biology, University of Connecticut.
- Bruun, Dr. Hans H.** Department of Mechanical and Medical Engineering, University of Bradford, United Kingdom.
- Bryan, Prof. Leslie A.** Director, Institute of Aviation, University of Illinois.
- Brylawski, Prof. Thomas.** Department of Mathematics, University of North Carolina.
- Bryson, Prof. Arthur E., Jr.** Chairman, Department of Aeronautics and Astronautics, Stanford University.

**Brzozowski, Dr. Victor J.** Electronic Systems Group, Baltimore, Maryland.

**Brézin, Dr. Edouard.** Laboratoire de Physique Theorique, Ecole Normale Supérieure, Paris, France.

**Bube, Dr. Richard H.** Professor of Electrical Engineering, Department of Material Sciences, Stanford University.

**Buchanan, Prof. Bruce.** Computer Science Department, University of Pittsburgh, Pennsylvania.

**Bucher, Dr. Martin A.** Department of Physics, Princeton University.

**Buchroeder, Dr. Richard A.** Optical Design Service, Tucson, Arizona.

**Buck, Dr. Richard P.** Department of Chemistry, University of North Carolina.

**Buede, Dr. Dennis.** Department of Systems Engineering, George Mason University, Fairfax, Virginia.

**Buell, Dr. Heinz.** Plessey Electronic Systems Corporation, Wayne, New Jersey.

**Buermann, Thomas M.** President, Gibbs & Cox, Inc., New York, New York.

**Bukowski, Richard W.** U.S. Department of Commerce, Washington, D.C.

**Bunge, Prof. Mario.** Foundations and Philosophy of Science Unit, McGill University, Montreal, Canada.

**Bunnett, Prof. Joseph F.** Department of Chemistry, University of California, Santa Cruz.

**Bunshah, Dr. Rointan F.** Department of Material Science and Engineering, University of California, Los Angeles.

**Burdett, Prof. Jeremy K.** Department of Chemistry, University of Chicago.

**Bureau of Reclamation.** U.S. Department of the Interior, Denver, Colorado.

**Burgdorfer, Dr. Willy.** Scientist Emeritus, Laboratory of Pathology, Rocky Mountain Laboratories, National Institutes of Health, Department of Health and Human Services, Hamilton, Montana.

**Burghard, Ronald A.** Gould Semiconductors, Pocatello, Indiana.

**Burke, Dr. James D.** Jet Propulsion Laboratory, California Institute of Technology.

**Burke, Prof. Kevin C.** Department of Geosciences, University of Houston.

**Burkhalter, Dr. Alan.** Department of Pharmacology, School of Medicine, University of California, San Francisco.

**Burkhart, Dr. Harold E.** Department of Forestry, College of Forestry and Wildlife Resources, Virginia Polytechnic Institute and State University, Blacksburg.

**Burnett, Peter G.** Petroleum Engineer, Chicago, Illinois.

**Burnham, Prof. Charles W.** Department of Earth and Planetary Sciences, Harvard University.

**Burns, Dr. C. Patrick.** Professor and Director, Division of Hematology, Oncology, and Blood and Marrow Transplantation, Department of Medicine and University of Iowa Cancer Center, Iowa City.

**Burns, Roger G.** Department of Earth Science, Massachusetts Institute of Technology.

**Burns, Prof. Stanley G.** Department of Electrical Engineering and Computer Engineering, Iowa State University.

**Bursey, Prof. Maurice M.** Department of Chemistry, University of North Carolina.

**Bursky, Dave.** "Electronic Design Magazine," Sunnyvale, California.

**Burstyn, Dr. Judith N.** Department of Chemistry, University of Wisconsin, Madison.

**Burton, Prof. Ralph A.** Chairman, Department of Mechanical Engineering and Astronautical Sciences, Northwestern University.

**Burwell, Dr. Robert L.** Department of Chemistry, Northwestern University.

**Busch, Prof. Daryle H.** Department of Chemistry, Ohio State University.

**Bushnell, Dennis M.** Langley Research Center, National Aeronautics and Space Administration, Hampton, Virginia.

**Busta, Dr. Francis F.** Department of Food Science and Human Nutrition, University of Florida.

**Butler, Charles.** Consultant, Pescadero, California.

**Butler, Dr. G. W.** Olin Rocket Research Company, Redmond, Washington.

**Butler, Dr. Percy M.** Egham, Surrey, United Kingdom.

**Butler, Dr. R. Paul.** Staff Scientist, Carnegie Institute of Washington, Terrestrial Magnetism, Washington, D.C.

**Butler, Dr. Robert W.** Department of Psychology, Child Development and Rehabilitation Center, Oregon Health Sciences University, Portland.

**Butts, Prof. Allison.** Professor Emeritus of Metallurgy and Materials Science, Lehigh University.

**Byers, Dr. Charles W.** Department of Geology, University of Wisconsin.

## C

**Cable, Prof. Raymond M.** Department of Biological Sciences, Purdue University.

**Cabrera, Dr. Blas.** Department of Physics, Stanford University.

**Cady, Dr. Gilbert H.** Deceased; formerly, Consulting Coal Geologist, Urbana, Illinois.

**Cain, Dr. Joseph C.** Department of Geology, Florida State University.

**Cain, Dr. William S.** John B. Pierce Foundation Laboratories, New Haven, Connecticut.

**Caine, Dr. Edsel A.** Associate Professor of Marine Sciences, University of South Carolina.

**Caine, Nel.** Institute of Arctic and Alpine Research, University of Colorado at Boulder.

**Calabrese, Dr. Ronald L.** Department of Biology, Emory University.

**Calderwood, Dr. James H.** Department of Electronic Engineering, University College, Galway, Ireland.

**Caldwell, Prof. C. Denise.** Department of Physics, Yale University.

**Callahan, Dr. Michael.** Director, Emergency Medical Services, School of Medicine, University of California, San Francisco.

**Callaway, Prof. Joseph.** Department of Physics and Astronomy, Louisiana State University.

**Caller, Dr. Bernard A.** Computing Center, University of Michigan.

**Calnek, Dr. Bruce W.** Chairperson, Department of Avian and Aquatic Animal Medicine, College of Veterinary Medicine, Cornell University.

**Cambel, Dr. Ali B.** Executive Vice President for Academic Affairs, Wayne State University.

**Cameron, Dr. A. G. W.** Associate Director for Planetary Sciences, Center for Astrophysics, Harvard College Observatory.

**Camín, Dr. Joseph H.** Department of Entomology, University of Kansas.

**Campana, Dr. Richard J.** Department of Botany and Plant Pathology, University of Maine.

**Campanella, Dr. Angelo J.** Campanella Associates, Hilliard, Ohio.

**Campanella, Dr. S. Joseph.** Retired; formerly, COMSAT Laboratories, Clarksburg, Maryland.

**Campbell, Dr. Andrew C.** Department of Zoology and Comparative Physiology, Queen Mary College, University of London, England.

**Campbell, Dr. Eleanor.** Max-Born-Institut, Berlin, Germany.

**Campbell, Harold E.** Senior Engineer, Power Distribution Systems Engineering, General Electric Company, Schenectady, New York.

**Campbell, Dr. Howard W.** National Fisheries and Wildlife Laboratory, Gainesville, Florida.

**Campbell, Dr. John S.** Department of Biological Sciences, University of Lethbridge, Alberta, Canada.

**Campbell, Dr. Laurence J.** Low Temperature Physics Group, Los Alamos Scientific Laboratory, Los Alamos, New Mexico.

**Campbell, Dr. Wallace H.** U.S. Geological Survey, Denver, Colorado.

**Campbell, Dr. William B.** Professor and Chairman, Department of Pharmacology and Toxicology, Medical College of Wisconsin, Milwaukee.

**Cannell, Prof. David S.** Department of Physics, University of California, Santa Barbara.

**Cannon, Dr. Robert H., Jr.** Assistant Secretary of Transportation.

**Canter, Prof. Gerald J.** Department of Communicative Disorders, Northwestern University.

**Capellen, Dr. Jennings.** Rare Earth Information Center, Iowa State University.

- Capra, Dr. J. Donald.** Department of Microbiology, Southwestern Medical School, University of Texas, Dallas.
- Carberry, Dr. James J.** Department of Chemical Engineering, University of Notre Dame.
- Carbone, Dr. Richard E.** Director, Atmospheric Technology Division, National Center for Atmospheric Research, Boulder, Colorado.
- Cardullo, Dr. Frank.** Watson School, Engineering Technology, State University of New York.
- Carew, Dr. H. John.** Professor of Horticulture, Michigan State University.
- Carlson, Dr. Don M.** Division of Biological Sciences, University of California, Davis.
- Carlson, Dr. Jack H.** Rhone Merieux, Inc., Athens, Georgia.
- Carlson, Dr. Sandra J.** Associate Professor and Research Geologist, Department of Geology/University of California, Davis.
- Carlson, William C.** Tree Physiologist, Weyerhaeuser Company, Hot Springs, Arkansas.
- Carlsson, Prof. Anders E.** Department of Physics, Washington University, St. Louis, Missouri.
- Carlsson, Dr. D. J.** National Research Council of Canada, Ottawa, Ontario.
- Carlton, Dr. Peter L.** Department of Psychiatry, University of Medicine and Dentistry of New Jersey, Rutgers Medical School.
- Carney, Prof. Bruce W.** Department of Physics & Astronomy, University of North Carolina, Chapel Hill.
- Carpenter, Dr. C. J.** Bath, Avon, England.
- Carpenter, Dr. Frank M.** Department of Biology, Harvard University.
- Carris, Dr. Lori M.** Department of Plant Pathology, Washington State University, Pullman.
- Carroll, Dr. C. Ronald.** Institute of Ecology, University of Georgia, Athens.
- Carroll, Dr. John M.** Department of Computer Science, University of Western Ontario, Canada.
- Carroll, Robert G., Jr.** Manager of Technical Development, Mirafi, Inc., Charlotte, North Carolina.
- Carroll, Dr. Robert L.** Redpath Museum, McGill University, Montreal, Quebec, Canada.
- Carruthers, Dr. Marvin H.** Department of Chemistry, University of Colorado.
- Carson, Dr. John W.** President, Jenike & Johanson Inc., North Billerica, Massachusetts.
- Carson, Robert W.** Formerly, Managing Editor, "Product Engineering," New York.
- Carter, Archie N.** Buan, Carter & Associates, Inc., Minneapolis, Minnesota.
- Carter, Dr. G. R.** Professor Emeritus, Department of Patho-biology, Virginia-Maryland Regional College of Veterinary Medicine, Virginia Polytechnic Institute and State University, Blackburg.
- Carter, Dr. Joseph G.** Department of Geology, University of North Carolina.
- Carter, Prof. Herbert E.** Vice Chancellor for Academic Affairs, University of Illinois.
- Casasent, Prof. David.** Department of Electrical and Computer Engineering, Carnegie-Mellon University.
- Casey, Dr. H. C., Jr.** Department of Electrical Engineering, Duke University.
- Cassens, Prof. Linda J.** Department of Plant Sciences, College of Agriculture, University of Arizona.
- Catania, Prof. A. Charles.** Department of Psychology, University of Maryland.
- Catchpole, Dr. John.** Admiralty Materials Laboratory, Dorset, England.
- Caughey, Prof. David A.** Sibley School of Mechanical and Aerospace Engineering, Cornell University, Ithaca, New York.
- Caughlan, Prof. Georgeanne R.** Department of Physics, Montana State University.
- Cavanagh, Dr. Dale E.** Naples, Florida.
- Cave, Dr. M. Donald.** Department of Anatomy, University of Arkansas for Medical Sciences.
- Cavender, Ted M.** Museum of Zoology, University of Michigan.
- Cavey, Michael J.** Department of Biology, University of Calgary, Alberta, Canada.
- Cavin, Dr. Ralph K., III.** Director, Design Sciences, Semiconductor Research, Research Triangle Park, North Carolina.
- Celander, Dr. Daniel W.** Department of Microbiology, University of Illinois, Urbana.
- Celler, Dr. George K.** AT&T Laboratories, Murray Hill, New Jersey.
- Chace, Dr. Fenner A., Jr.** Senior Zoologist, Department of Invertebrate Zoology, Smithsonian Institution.
- Chakoumakos, Dr. Bryan C.** Department of Geology, Northrup Hall, University of New Mexico.
- Chambers, Dr. James P.** Research Scientist and Research Assistant Professor of Mechanical Engineering, University of Mississippi.
- Chambon, Dr. Jean-Claude.** Laboratoire de Chimie Organo-Minérale, Institut le Bel, Université Louis Pasteur, Strasbourg, France.
- Chameides, Prof. William L.** School of Earth and Atmospheric Sciences, Georgia Institute of Technology, Atlanta.
- Chan, Dr. Moses H. W.** Department of Physics, Pennsylvania State University.
- Chang, Dr. Alan J.** Chief Curator of Fossil Amphibians, Reptiles and Birds, British Museum, London, England.
- Chang, Prof. Howard H.** Department of Civil and Environmental Engineering, San Diego State University, San Diego, California.
- Chang, Prof. Kang-tsung.** Department of Geography, University of Idaho, Moscow.
- Chang, Dr. Luke L. Y.** Department of Geology, University of Maryland, College Park.
- Chang, Dr. M. C.** Worcester Foundation for Experimental Biology, Shrewsbury, Massachusetts.
- Chang, Prof. S. S. L.** Department of Electrical Sciences, State University of New York, Stony Brook.
- Chao, Dr. Edward C. T.** Geological Survey, U.S. Department of the Interior, Reston, Virginia.
- Chapman, Dr. Carleton A.** Department of Geology, University of Illinois.
- Chapman, Dr. Clark R.** Planetary Science Institute, Tucson, Arizona.
- Chapman, Dr. Richard A.** Central Research Laboratories, Texas Instruments Inc., Dallas, Texas.
- Chapman, Dr. Robert D.** Section Head, Laboratory for Solar Physics and Astrophysics, NASA Goddard Space Flight Center, Beltsville, Maryland.
- Chapman, Prof. Russell L.** Chairperson, Department of Botany, Louisiana State University, Baton Rouge.
- Chapman, Dr. Sydney.** Deceased; formerly, High Altitude Observatory, University of Colorado.
- Chappell, Dr. Charles F.** University Corporation for Atmospheric Research, COMET, Boulder, Colorado.
- Charlton, Dr. Ernest E.** Research Engineer (retired), Schenectady, New York.
- Charney, Dr. Dennis S.** Department of Psychiatry, Yale University School of Medicine, and Connecticut Mental Health Center, New Haven.
- Charnock, Dr. Henry.** Department of Oceanography, University of Southampton, England.
- Charrier, Dr. J. M.** Department of Chemical Engineering, McGill University, Montreal, Quebec, Canada.
- Chaudhari, Dr. Nirupa.** University of Miami School of Medicine, Department of Physiology and Biophysics, Rosentiel Medical Sciences Building, Miami, Florida.
- Chaudhari, Praveen.** Thomas J. Watson Research Center, IBM, Yorktown Heights, New York.
- Cheadle, Prof. Vernon I.** Chancellor, University of California, Santa Barbara.
- Chellis, Robert D.** Deceased; formerly, Structural Engineer, Wellesley Hills, Massachusetts.
- Chen, Dr. Albert Fu-Tai.** Principal Research Chemist, Applied Research Department, Beckman Instruments, Brea, California.
- Chen, Dr. Chong-maw.** Department of Life Sciences, Biological Sciences/Biomedical Research Institute, University of Wisconsin, Parkside.
- Chen, Dr. H. S.** AT&T Bell Laboratories, Murray Hill, New Jersey.
- Chen, Prof. Peter P.** Director of the Institute of Computer and Information Systems Research, Louisiana State University.
- Chen, Dr. Robert T.** Medical Epidemiologist, Infant Immunization Section, Centers for Disease Control, Surveillance Investigations and Research Branch, Atlanta, Georgia.

- Chen, Dr. Shoen-Sheng.** Argonne National Laboratory, Argonne, Illinois.
- Chenault, Roy L.** Chief Research Engineer (retired), Oilwell Division, U.S. Steel Corporation, Dallas, Texas.
- Cheng, Dr. T. C.** Department of Electrical Engineering, University of Southern California.
- Cherlin, Dr. Gregory L.** Mathematical Sciences Research Institute and Rutgers University, Berkeley, California.
- Chern, Prof. S. S.** Mathematical Sciences Research Institute, University of California, Berkeley.
- Chernosky, Prof. J. V.** Department of Geological Science, University of Maine.
- Chickering, Dr. Arthur M.** Museum of Comparative Zoology, Harvard University.
- Chien, Dr. Shu.** Institute for Biomedical Engineering, University of California, La Jolla, California.
- Chin, Dr. Gilbert Y.** AT&T Bell Telephone Laboratories, Murray Hill, New Jersey.
- Chinitz, Dr. Wallace.** Department of Mechanical Engineering, Cooper Union.
- Chiodo, Prof. Louis A.** Chairperson, Department of Pharmacology, Texas Tech University Health Sciences Center, Lubbock.
- Chipkin, Dr. Richard E.** Department of Pharmacology, Schering Corporation, Bloomfield, New Jersey.
- Chironis, Nicholas P.** Senior Editor, "Coal Age," McGraw-Hill, Inc., New York.
- Chisholm, Dr. Malcolm.** Department of Chemistry, Indiana University.
- Chobor, Karen L.** Institute for Research in Behavioral Neuroscience, Department of Neurology, New York University Medical Center.
- Chodos, Dr. Alan.** Department of Physics, Yale University.
- Chokroverty, Prof. Sudhansu.** Chief, Neurology Service, VA Medical Center, Lyons, New Jersey.
- Choueiri, Dr. Edgar Y.** Electric Propulsion Laboratory, Engineering Quadrangle, Princeton University.
- Chow, Dr. Wen L.** Department of Mechanical Engineering, College of Engineering, Florida Atlantic University, Boca Raton.
- Choy, Dr. Patrick C.** Department of Biochemistry, University of Manitoba Faculty of Medicine, Winnipeg, Canada.
- Christ, Dr. Charles L.** Physicist, U.S. Geological Survey.
- Christensen, Dr. Bruce M.** Assistant Professor, Department of Veterinary Science, University of Wisconsin, Madison.
- Christensen, Dr. Martha.** Professor Emeritus, Department of Botany, University of Wyoming, Laramie.
- Christenson, Dr. Todd R.** Photonics and Microfabrication Department, Sandia National Laboratories, Albuquerque, New Mexico.
- Christiansen, Dr. Kenneth.** Professor Emeritus of Biology, Department of Biology, Grinnell College, Iowa.
- Christiansen, Dr. R. L.** Petroleum Engineering Department, Colorado School of Mines, Golden.
- Christie, Dr. John M.** Department of Geology, University of California, Los Angeles.
- Christie, Richard W.** Hardesty & Hanover, New York.
- Christie-Blick, Dr. Nicholas.** Professor of Geology, Lamont-Doherty Earth Observatory, Columbia University, Palisades, New York.
- Christophorou, Dr. L. G.** Head, Atomic, Molecular and High Voltage Physics Group, Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Christou, Dr. George.** Department of Chemistry, Indiana University.
- Christy, Dr. Nicholas.** College of Physicians and Surgeons, Columbia University.
- Chu, Prof. Benjamin.** Department of Chemistry, State University of New York, Stony Brook.
- Chu, Dr. Steven.** Department of Physics, Stanford University.
- Chu, Dr. T. Ming.** Roswell Park Memorial Institute, Buffalo, New York.
- Ciechanover, Dr. Aaron J.** Department of Biochemistry, The Bruce Rappaport Faculty of Medicine, Technion-Israel Institute of Technology.
- Ciegler, Dr. Alex.** Southern Regional Research Center, USDA Science and Education Administration, New Orleans.
- Civardi, Dr. Frank P.** Civardi Engineers, Wayne, New Jersey.
- Clack, Dr. Jennifer A.** University Museum of Zoology, Cambridge, England.
- Clapp, Philip F.** National Weather Service, National Oceanic and Atmospheric Administration, Washington, D.C.
- Claridge, Dr. Elmond L.** Retired; formerly, Director of Graduate Program in Petroleum Engineering, Chemical Engineering Department, University of Houston Central Campus, Houston.
- Clark, Dr. David A.** Department of Medicine, McMaster University, Ontario, Canada.
- Clark, Prof. Francis.** Department of Microbiology, University of Illinois.
- Clark, Prof. George L.** Deceased; formerly, Emeritus Research Professor of Analytical Chemistry, University of Illinois.
- Clark, Prof. John F.** Director, Graduate Studies, and Professor, Space Systems, Spaceport Graduate Center, Florida Institute of Technology, Satellite Beach.
- Clark, Dr. Nancy Barnes.** Department of Physiology and Neurobiology, University of Connecticut.
- Clark, Noel A.** Department of Physics, University of Colorado at Boulder.
- Clark, Richard F.** Division of Physics, National Research Council of Canada, Ottawa, Ontario.
- Clark, Prof. Wallis H., Jr.** Director, Aquaculture Program, University of California, Davis.
- Clarke, Dr. J. Harold.** Horticulturist, Clarke Nursery, Long Beach, Washington.
- Clarke, Prof. John.** Department of Physics, University of California, Berkeley.
- Clemence, Dr. Gerald M.** Deceased; formerly, Observatory, Yale University.
- Clemens, Dr. William A.** Museum of Paleontology, University of California, Berkeley.
- Clements, Dr. Leo P.** Emeritus Professor of Anatomy, School of Medicine, Creighton University.
- Cleminshaw, Dr. Clarence H.** Deceased; formerly, Director Emeritus, Griffith Observatory, Los Angeles, California.
- Cleve, Dr. Hartwig.** Institute for Anthropology and Human Genetics, University of Munich, Germany.
- Cleveland, Prof. L. F.** Department of Electrical Engineering, Northeastern University.
- Cleveland, Dr. Robin.** Department of Aerospace And Mechanical Engineering, Boston University, Boston, Massachusetts.
- Cline, Dr. Douglas.** Nuclear Structure Laboratory, University Of Rochester, New York.
- Cloud, Dr. Preston E., Jr.** Department of Geology, University of California, Santa Barbara.
- Clowes, Dr. F. A. L.** Botany Department, University of Oxford, England.
- Clydesdale, Dr. Fergus M.** Department of Food Science and Nutrition, University of Massachusetts.
- Coates, Dr. Peter B.** Retired; formerly, Division of Electrical Science, National Physical Laboratory, Teddington, United Kingdom.
- Cobine, Dr. James D.** Deceased; formerly, Professor and Senior Scientist, Atmospheric Sciences Research Center, State University of New York, Albany.
- Cochran, Dr. James R.** Lamont-Doherty Earth Observatory, Columbia University, Palisades, New York.
- Cocks, Dr. George.** Los Alamos National Laboratory, Los Alamos, New Mexico.
- Cocks, Dr. L. R. M.** Department of Palaeontology, Natural History Museum, London, United Kingdom.
- Coddington, Dr. Jonathan A.** National Museum of Natural History, Smithsonian Institution, Washington, D.C.
- Cohen, Dr. Alan S.** Director, Thorndike Memorial Laboratory, Boston City Hospital, Boston, Massachusetts.
- Cohen, Charles A.** Research Associate (retired), Exxon Research and Engineering Company, Florham Park, New Jersey.
- Cohen, Dr. David.** National Magnetic Laboratory, Massachusetts Institute of Technology.
- Cohen, Dr. Donald J.** Assistant Professor, Child Study Center, Yale University.
- Cohen, Dr. E. Richard.** Rockwell International Science Center, Thousand Oaks, California.

- Cohen, Dr. Gene.** National Institute on Aging, National Institutes of Health, Bethesda, Maryland.
- Cohen, Dr. Jay O.** Deceased; formerly, Microbiologist, Department of Health and Human Services, Public Health Service, Centers for Disease Control, Atlanta, Georgia.
- Cohen, Dr. Jerome.** Department of Psychiatry, Medical School, Northwestern University.
- Cohen, Dr. Jerry D.** Plant Hormone Laboratory, U.S. Department of Agriculture, Beltsville, Maryland.
- Cohen, Dr. Lisa M.** Department of Dermatology, Beth Israel Hospital, Boston, Massachusetts.
- Cohen, Dr. Steven A.** Senior Research Scientist, Polymers Business Group, Amoco Corporation, Alpharetta, Georgia.
- Colby, Dr. Kenneth Mark.** Department of Psychiatry and Behavioral Sciences, School of Medicine, University of California, Los Angeles.
- Cole, Dr. Edward H.** Department of Immunopathology, Scripps Clinic and Research Foundation, La Jolla, California.
- Coleal, Dr. Ernest.** Formerly, Assistant for Facilities Development, Flight Research Division, Edwards Air Force Base, California.
- Coleman, Dr. David C.** Department of Entomology, University of Georgia.
- Coleman, Dr. Robert E.** Staff Scientist, Sugar Crops Production, National Program Staff, BARC-WEST, Beltsville, Maryland.
- Collier, R. J.** Bell Telephone Laboratories, Murray Hill, New Jersey.
- Collins, Dr. Dean R.** Director, CCD Technology Laboratory, Central Research Laboratories, Texas Instruments Inc., Dallas, Texas.
- Collins, Dr. Francis.** Department of Health and Human Services, National Human Genome Research Institute, Bethesda, Maryland.
- Collins, Prof. J. H.** Department of Electrical Engineering, University of Texas, Arlington.
- Collins, Dr. Steven J.** Department of Clinical Neurosciences, St. Vincent's Hospital, Melbourne, and Department of Pathology, University of Melbourne, Australia.
- Collinson, Dr. Charles.** Department of Geology, University of Illinois.
- Colwell, Dr. Rita R.** Department of Microbiology, Division of Agricultural and Life Sciences, University of Maryland.
- Comeau, Richard.** The Foxboro Company, Foxboro, Massachusetts.
- Comer, Prof. Jonathan.** Department of Geography, Oklahoma State University, Stillwater.
- Comings, Dr. Edward W.** University of Petroleum and Minerals, Dhahran, Saudi Arabia.
- Commins, Prof. Eugene D.** Department of Physics, University of California, Berkeley.
- Compton, Robert D.** Electro-Optical Systems Design, Milton S. Kiver Publications, Inc., Chicago, Illinois.
- Condie, Dr. Kent C.** Department of Earth and Environmental Sciences, New Mexico Institute of Mining and Technology, Socorro.
- Confer, Prof. Anthony W.** Head, Department of Veterinary, Pathology, Oklahoma State University, Stillwater.
- Connors, Dr. James F.** Propulsion Aerodynamics Division, National Aeronautics and Space Administration.
- Conrad, Prof. Albert G.** Dean Emeritus and Professor of Electrical Engineering, College of Engineering, University of California, Santa Barbara.
- Constabel, Dr. Fred.** Plant Biotechnology Institute, National Research Council, Saskatoon, Saskatchewan, Canada.
- Converse, Dr. Richard H.** Department of Botany, Oregon State University.
- Conway Morris, Dr. Simon.** Department of Earth Sciences, The Open University, Milton Keynes, England.
- Conwell, Dr. Esther M.** Xerox Webster Research Center, Rochester, New York.
- Cook, Dr. Charles G.** Research Geneticist, Agricultural Research Service, U.S. Department of Agriculture, Weslaco, Texas.
- Cook, Dr. Frank.** Research Assistant Professor, Department of Veterinary Science, Gluck Equine Research Center, University of Kentucky, Lexington.
- Cook, Dr. Gerald.** Department of Electrical and Computer Engineering, George Mason University, Fairfax, Virginia.
- Cook, Philip H.** Plastics Department, Texas Division, Dow Chemical U.S.A., Freeport, Texas.
- Cook, Dr. Richard K.** Formerly, National Bureau of Standards.
- Cooley, Dr. William E.** Winton Hill Technical Center, Proctor and Gamble Company, Cincinnati, Ohio.
- Cooley, Prof. Hollis R.** Professor Emeritus of Mathematics, New York University.
- Coombs, Dr. Sheryl.** Professor of Hearing Sciences, Parmlly Hearing Institute, Loyola University, Chicago, Illinois.
- Cooper, Dr. Arthur W.** Department of Botany, North Carolina State University.
- Cooper, Prof. W. Charles.** Department of Metallurgical Engineering, Queens University, Kingston, Ontario, Canada.
- Copel, Michel.** Acoustronics, Inc., Huntington, New York.
- Copeland, Prof. Miles A.** Faculty of Engineering, Carleton University, Ottawa, Ontario, Canada.
- Coppens, Dr. Alan B.** Associate Professor of Physics, U.S. Navy Post Graduate School, Pacific Grove, California.
- Corben, Dr. Herbert C.** Deceased; formerly, Ramo-Wooldridge Corporation, Los Angeles, California.
- Corbitt, Robert A.** Associate, Metcalf & Eddy, Inc., Atlanta, Georgia.
- Core, Prof. Earl L.** Professor of Botany, Department of Biology, West Virginia University.
- Corliss, Dr. John O.** Department of Zoology, University of Maryland.
- Costantino, Dr. James.** Intelligent Transportation Society of America, Washington, D.C.
- Costerton, Dr. J. William F.** Department of Biology, University of Calgary, Alberta, Canada.
- Cotterill, Carl H.** Chief, Division of Statistical and Technical Services, Bureau of Mines, U.S. Department of the Interior.
- Couch, Dr. John C.** Matson Navigation Company, San Francisco, California.
- Couch, Dr. Richard B.** Professor of Naval Architecture and Marine Engineering, Ship Hydrodynamics Laboratory, University of Michigan.
- Couclelis, Prof. Helen.** Department of Geography, University of California, Santa Barbara.
- Coulombe, Dr. Mary J.** Director, Timber Access and Supply, American Forest and Paper Association, Washington, D.C.
- Coulter, Earl E.** Manager, Mechanical Technology, Babcock and Wilcox Company, Barberton, Ohio.
- Coursen, D. Linn.** Dynatec Explosives Consultants, Inc., Española, New Mexico.
- Court, Dr. Arnold.** Retired; formerly, Department of Climatology, California State University.
- Cowan, Dr. Thomas E.** General Atomics, Photonics Division, San Diego, California.
- Cowles, Prof. Philip B.** Professor Emeritus of Microbiology, School of Medicine, Yale University.
- Cox, Dr. Charles S.** Department of Oceanography, University of California, San Diego.
- Coxeter, Prof. H. S. M.** Department of Mathematics, University of Toronto, Ontario, Canada.
- Coyle, Harold P.** Harvard-Smithsonian Center for Astrophysics, Harvard College Observatory, Cambridge, Massachusetts.
- Coyle, Dr. Heather.** Connecticut State Police Forensic Science Laboratory, Meriden.
- Coyne, Dr. Michael J.** Senior Veterinarian Technical Services, SmithKline Beecham Animal Health, Exton, Pennsylvania.
- Cozzens, Christine S.** Biology Laboratory, Harvard University.
- Crabill, Dr. Ralph E., Jr.** Curator and Supervisor of the Division of Myriapoda and Arachnida, Department of Entomology, Smithsonian Institution, National Museum of Natural History.
- Cracraft, Dr. Joel.** Department of Ornithology, American Museum of Natural History, New York.
- Crafts, Dr. Alden S.** Professor Emeritus, Department of Botany, University of California, Davis.
- Craig, Prof. Homer V.** Department of Mathematics, University of Texas, Austin.
- Craine, Dr. Eric R.** Western Research Company, Inc., Tucson, Arizona.

**Cramer, Dr. Friedrich.** Max Planck Institut für Experimentelle Medizin, Göttingen, Germany.

**Cramer, Dr. William S.** Ship Acoustics Department, Naval Ship Research and Development Center, Washington, D.C.

**Crane, Julian C.** Professor of Pomology, Agricultural Experimental Station, University of California, Davis.

**Cranwell, Dr. Lucy M.** Department of Geosciences, University of Arizona.

**Crawford, Prof. Michael H.** Chief, Division of Cardiology, University of New Mexico School of Medicine, Albuquerque.

**Cremer, Prof. Sheldon E.** Department of Chemistry, Marquette University.

**Creutz, Dr. Carol.** Department of Chemistry, Brookhaven National Laboratory, Associated University Inc., Upton, New York.

**Crittenden, Dr. Charles V.** Geographer, Economic Development Administration, U.S. Department of Commerce.

**Crocker, Dr. Burton B.** Monsanto Company, St. Louis, Missouri.

**Crocker, Prof. Malcolm J.** Department of Mechanical Engineering, Purdue University.

**Cronin, Dr. Thomas.** Department of Biological Sciences, University of Maryland, Baltimore County.

**Cronquist, Dr. Arthur.** Director of Botany, New York Botanical Gardens, Bronx, New York.

**Cross, Dr. Chester E.** Agricultural Experiment Station, University of Massachusetts.

**Crouse, William H.** Consulting Editor, Automotive Books, McGraw-Hill Book Company, New York.

**Crow, Dr. James F.** Department of Genetics, University of Wisconsin.

**Crowe, Prof. Clayton T.** Department of Mechanical and Materials Engineering, Washington State University, Pullman.

**Crowe, Dr. John H.** Department of Zoology, University of California, Davis.

**Crowell, Dr. Sears.** Department of Zoology, Indiana University.

**Crowson, Dr. Roy A.** Department of Zoology, University of Glasgow, Scotland.

**Cruickshank, Dr. Michael J.** Look Laboratory, University of Hawaii.

**Crum, Dr. Howard.** Herbarium, University of Michigan.

**Csanady, Dr. G. T.** Department of Physical Oceanography, Old Dominion University, Norfolk, Virginia.

**Cuckler, Lee E.** Interdivisional Coordinator, Aeronautical and Instrument Division, Robertshaw Controls Company, Anaheim, California.

**Cuffey, Dr. Roger J.** Department of Geology and Geophysics, Pennsylvania State University.

**Culbertson, Dr. Joseph O.** Assistant Chief (retired), Oil-seed and Industrial Crops Research Branch, Crops Research Division, U.S. Department of Agriculture, Beltsville, Maryland.

**Culotta, Prof. Valeria Cizewski.** Associate Professor, Johns Hopkins University School of Public Health, Department of Environmental Health Sciences, Baltimore, Maryland.

**Cumberland, Prof. Kenneth B.** Professor of Geography, University of Auckland, New Zealand.

**Cummings, Dr. Michael R.** Department of Biological Sciences, University of Illinois.

**Cummins, Dr. Denise Dellarosa.** Department of Psychology, University of Arizona.

**Cummins, Prof. Harold.** Professor Emeritus, School of Medicine, Tulane University.

**Cunnane, William P.** Assistant Commissioner, Office of Network Services, Information Resources Management, General Services Administration, Washington, D.C.

**Cunningham, Prof. Burris B.** Deceased; formerly, Radiation Laboratory, University of California, Berkeley.

**Curkendall, Dr. David W.** NASA Jet Propulsion Laboratory, Pasadena, California.

**Curray, Dr. Joseph R.** Scripps Institution of Oceanography, University of California, La Jolla.

**Curtin, Dr. Charles B.** Department of Biology, Creighton University.

**Curtis, Prof. Charles F.** Department of Chemistry, University of Wisconsin.

**Curtiss, Leon F.** Formerly, National Bureau of Standards.

**Cushman, Dr. Pauline K.** College of Integrated Science and Technology, James Madison University, Harrisonburg, Virginia.

**Cushman-Roisin, Dr. Benoit.** Thayer School of Engineering, Dartmouth College, Hanover, New Hampshire.

**Cutler, Prof. Chapin C.** Professor of Applied Physics, Stanford University.

**Cutler, Dr. Edward B.** Department of Biology, Utica College of Syracuse University.

**Cutter, Dr. Elizabeth G.** Department of Cryptogamic Botany, University of Manchester, England.

**Czamanske, Dr. Gerald K.** U.S. Geological Survey, Menlo Park, California.

**Czarnik, Dr. Anthony W.** Senior Director, Chemistry, IRORI Quantum Microchemistry, La Jolla, California.

## D

**Dabberdt, Dr. Walter F.** Atmospheric Technology Division, National Center for Atmospheric Research, Boulder, Colorado.

**Dabbs, Dr. David J.** Pathologist, Department of Pathology, University of Washington.

**Dahl, Dr. Lawrence F.** Department of Chemistry, University of Wisconsin.

**Dahl, Dr. Leslie R.** Consultant, General Electric Company, San Jose, California.

**Dahl, Dr. Peter S.** Department of Geology, Kent State University, Kent, Ohio.

**Daiber, Dr. Franklin C.** College of Marine Studies, University of Delaware.

**Daigle, Dr. Gilles A.** National Research Council, Institute for Microstructural Sciences, Ottawa, Canada.

**Dale, Dr. James B.** Veteran Affairs Medical Center, Memphis, Tennessee.

**Dalitz, Prof. Richard H.** Department of Theoretical Physics, Oxford University.

**Dalrymple, Dr. David L.** Department of Chemistry, University of Delaware.

**Dalton, Dr. David R.** Department of Chemistry, College of Arts and Sciences, Temple University.

**Dalziel, Dr. Ian W. O.** Department of Geological Sciences, University of Texas at Austin.

**Damberger, Dr. Heinz H.** Illinois State Geological Survey, Coal Section, Champaign.

**Damian, Dr. Raymond T.** Department of Zoology, Franklin College of Arts and Sciences, University of Georgia.

**Damman, Prof. Antoni W. H.** Department of Biology, University of Connecticut.

**Danby, Dr. J. M. A.** Department of Mathematics, North Carolina State University.

**Daney, Dr. David E.** Los Alamos National Laboratory, Los Alamos, New Mexico.

**Daniel, James R.** Department of Biochemistry, Purdue University.

**Daniels, Dr. D. J.** ERA Technology, Leatherhead, Surrey, England.

**Daniels, Dr. Farrington.** Deceased; formerly, Professor Emeritus, Solar Energy Laboratory, University of Wisconsin.

**Daniels, Prof. James M.** Department of Physics, University of Toronto.

**D'Arcangelo, Prof. Amelio M.** Department of Naval Architecture, University of Michigan.

**Darwin, Dr. C. J.** Experimental Psychology, University of Sussex, England.

**Date, Prof. Hikaru.** Acoustics Department, Kyushu Institute of Design, Fukuoka, Japan.

**Daubechies, Dr. Ingrid.** AT&T Bell Laboratories, Murray Hill, New Jersey.

**Davidson, Dr. Jaime A.** Endocrine & Diabetes Associates of Texas, Dallas, Texas.

**Davies, David H.** DataPlay Inc., Boulder, Colorado.

**Davies, Dr. Peter J.** Department of Botany, Cornell University.

**Davies-Jones, Dr. Robert P.** Meteorologist, National Severe Storms Laboratory, U.S. Department of Commerce, Norman, Oklahoma.

**Davis, Dr. Andrew M.** Enrico Fermi Institute, University of Chicago, Illinois.

**Davis, Dr. Bernard D.** Deceased; formerly, Bacterial Physiology Unit, Harvard Medical School.

- Davis, D. Dwight.** Deceased; formerly, Curator of Vertebrate Anatomy, Chicago Museum of Natural History.
- Davis, Dr. George H.** Department of Geological Sciences, University of Arizona.
- Davis, Prof. Gregory A.** Department of Geological Sciences, University of Southern California.
- Davis, Dr. Jack.** Deceased; formerly, Research and Development, Bright Star Industries, Inc., Clifton, New Jersey.
- Davis, Dr. John H.** Professor Emeritus of Botany, University of Florida.
- Davis, Prof. Kenneth P.** Deceased; formerly, School of Forestry, Yale University.
- Davis, Dr. Richard A., Jr.** Department of Geology, University of South Florida.
- Davis, Dr. Simon J. M.** Ancient Monuments Laboratory, Saville Row, London, England.
- Dawood, Dr. M. Yusoff.** Department of Obstetrics and Gynecology, University of Illinois College of Medicine, Chicago.
- Dawson, Dr. David M.** West Roxbury Veterans Affairs Medical Center, West Roxbury, Massachusetts.
- Dawson, Prof. Kerry J.** Environmental Horticulture, University of California, Davis.
- Dawson, Dr. Todd E.** Ecology and Systematics, Cornell University, Carson Hall, Ithaca, New York.
- Day, Dr. William H.** Manager, Advanced Industrial Programs, Pratt & Whitney, East Hartford, Connecticut.
- Dayton, Benjamin B.** Consulting Physicist, East Flatrock, North Carolina.
- Deacon, Margaret.** Department of Oceanography, University of Southampton, United Kingdom.
- Deacon, T. A.** Deceased; formerly, Division of Electrical Science, National Physical Laboratory, Teddington, Middlesex, England.
- Deakins, Dr. Ralph R.** Director, Computer-Aided Systems, Rockwell International Corporation, El Segundo, California.
- Dean, Dr. Thomas S.** Architectural Engineer, Lawrence, Kansas.
- Dean, Dr. Walter E.** U.S. Geological Survey, Denver Federal Center, Denver, Colorado.
- de Boor, Dr. Carl.** Mathematical Research Center, University of Wisconsin.
- DeCarli, Dr. P. S.** Poulter Laboratory, Stanford Research Institute.
- De Cicco, John.** Department of Mathematics, Illinois Institute of Technology.
- DeClaris, Dr. Nicholas.** Division of Emerging Energy Technologies, National Science Foundation, Washington D.C.
- DeFacio, Prof. Brian.** Department of Physics and Astronomy, University of Missouri.
- de Freitas, Prof. Duarte Mota.** Department of Chemistry, Loyola University, Chicago, Illinois.
- Dehmelt, Dr. Hans.** Department of Physics, University of Washington.
- De Jong, Dr. Theodore M.** Pomology Department, University of California, Davis.
- Dekker, Dr. Adrianus J.** Professor of Solid State Physics, University of Groningen, Netherlands.
- de la Cruz, Felix.** Chief, Mental Retardation and Development Disabilities Branch, National Institute of Child Health and Human Development, Bethesda.
- Delahay, Prof. Paul.** Department of Chemistry, New York University.
- Deland, Dr. Raymond J.** Retired; formerly, Department of Meteorology and Oceanography, New York University.
- de Levie, Prof. Robert.** Department of Chemistry, Georgetown University, Washington, DC.
- Dell'Arciprete, Dr. Patricia.** Central Nacional Patagónico (CONICET), Chubut, Argentina.
- DeLong, Dr. Dwight M.** College of Biological Sciences, Ohio State University.
- Delson, Dr. Eric.** Department of Vertebrate Paleontology, American Museum of Natural History.
- DeLuca, Dr. Hector F.** Department of Biochemistry, University of Wisconsin, Madison.
- Demar, Dr. Robert E.** Department of Geology, University of Illinois, Chicago.
- Dempsey, Prof. Mary E.** Department of Biochemistry, University of Minnesota Medical School, Minneapolis.
- de Neufville, Dr. John P.** President, Voltaix, Inc., North Branch, New Jersey.
- Dengler, Dr. Nancy G.** Department of Botany, University of Toronto, Ontario, Canada.
- Den Hartog, Prof. J. P.** Retired; formerly, Department of Mechanical Engineering, Massachusetts Institute of Technology.
- Denison, Dr. Robert H.** Deceased; formerly, Curator of Fossil Fishes, Field Museum of Natural History, Chicago, Illinois.
- Denniston, Dr. Carter L.** Department of Medical Genetics, University of Wisconsin, Madison.
- Deno, Dr. Richard A.** Professor of Pharmacognosy, University of Michigan.
- Dent, Dr. William.** Department of Physics and Astronomy, University of Massachusetts.
- DePaolo, Dr. Donald J.** Department of Geology and Geophysics, University of California, Berkeley.
- DePlasco, Mark A.** Air Force Flight Standard Agency, Washington, D.C.
- Derge, Prof. Gerhard.** Department of Metallurgy and Material Science, Carnegie-Mellon University.
- Dershowitz, Dr. Nachum.** Department of Computer Science, Illinois Institute of Technology, Chicago.
- Des S. Thomas, Dr. Donovan.** Department of Biology, University of Windsor, Ontario, Canada.
- deSatnick, Steve.** Vice President, Operations and Engineering, KCET-TV, Los Angeles, California.
- Destree, Thomas M.** Editor in Chief, Graphic Arts Technical Foundation, Sewickley, Pennsylvania.
- DeVaney, Fred D.** Consulting Metallurgist, Duluth, Minnesota.
- DeVolpi, Dr. A.** Argonne National Laboratory, Argonne, Illinois.
- DeVore, Dr. George W.** Department of Geology, Florida State University.
- DeVries, Dr. Arthur L.** Department of Physiology and Biophysics, University of Illinois, Urbana-Champaign.
- de Week, Dr. A. L.** Institut für Klinische Immunologic Inselspital, Universität Bern, Switzerland.
- Dewsbury, Dr. Donald A.** Department of Psychology, University of Florida, Gainesville.
- Dexter, Dr. Theodore H.** Research Supervisor, Inorganic Chemistry, Hooker Chemical Corporation Research Center, Niagara Falls, New York.
- Dhir, Prof. Vijay K.** Department of Mechanical and Aerospace Engineering, University of California, Los Angeles.
- Diamond, Dr. Seymour.** Director, Diamond Headache Clinic, Ltd., Chicago, Illinois.
- DiBiase, Dr. David.** Department of Geography, Pennsylvania State University, University Park.
- Dick, Prof. B. Gale.** Department of Physics, University of Utah.
- Dick, Dr. Henry J. B.** Senior Scientist, Department of Geology and Geophysics, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.
- Dickinson, Prof. Robert E.** Department of Atmospheric Physics, University of Arizona, Tucson.
- Dickinson, Dr. W. R.** Department of Geosciences, University of Arizona, Tucson.
- Dieke, Prof. G. H.** Deceased; formerly, Chairman, Department of Physics, Johns Hopkins University.
- Diekema, Dr. Daniel James.** University of Iowa College of Medicine, Department of Pathology, Division of Medical Microbiology, Iowa City.
- Dietrich-Buchecker, Dr. C. O.** Laboratoire de Chimie Organo-Minérale, Institut le Bel, Université Louis Pasteur, Strasbourg, France.
- Di Fiore, Dr. Anthony.** Department of Anthropology, New York University, New York.
- Di Giulio, Edmund M.** Cinema Products Corporation, Los Angeles, California.
- Dill, Dr. Robert F.** Ocean Mining Administration, U.S. Department of the Interior.
- Dille, Dr. James M.** Deceased; formerly, Professor and Chairman, Department of Pharmacology, School of Medicine, University of Washington.
- Dillman, Prof. Norman G.** Department of Electrical and Computer Engineering, Kansas State University, Manhattan.
- Dillon, J. F., Jr.** Bell Telephone Laboratories, Murray Hill, New Jersey.

- DiMichele, Dr. William A.** Department of Paleobotany, Smithsonian Institution, Washington, D.C.
- Dimmel, Prof. Donald R.** Research Associate, Wood Sciences, Chemical Sciences Division, Institute of Paper Chemistry, Appleton, Wisconsin.
- Dine, Dr. Michael.** Physics Department, City College of New York.
- Dingle, Prof. Hugh.** Department of Entomology, College of Agricultural and Environmental Sciences, University of California, Davis.
- Dinsmore, Robertson P.** International Ice Patrol, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.
- DiTallo, Cynthia.** United Technologies, Otis Elevator Company, Farmington, Connecticut.
- Dix, Dr. Cyril H.** Bishop Monkton, North Yorkshire, England.
- Doane, Dr. J. William.** Liquid Crystal Institute, Kent State University, Kent, Ohio.
- Dodds, Robert H.** Deceased; formerly, Personnel Manager, Gibbs and Hill, Inc., New York.
- Dogramaci, Prof. AH.** Department of Industrial and Management Engineering, Columbia University.
- Doherty, Dr. Michael F.** Head, Department of Chemical Engineering, University of Massachusetts.
- Domning, Dr. Daryl P.** Department of Anatomy, Howard University, Washington, DC.
- Donaldson, Dr. Alex I.** Pirbright Laboratory, Pirbright, Surrey, United Kingdom.
- Donaldson, Dr. James A.** Professor and Chairman, Department of Otolaryngology, School of Medicine, University of Washington.
- Donovan, Dr. Nowell.** Department of Geology, Texas Christian University, Fort Worth.
- Doob, Prof. Joseph L.** Department of Mathematics, University of Illinois, Urbana-Champaign.
- Doolan, Barry L.** Department of Geology, Memorial University of Newfoundland, St. John's, Canada.
- Dooley, H. D.** Marine Laboratory, Department of Agriculture and Fisheries, Aberdeen, Scotland.
- Doornbos, Dr. Durk J.** Deceased; formerly, Institute for Geophysics, University of Oslo, Norway.
- Dorf, Prof. Erling.** Department of Geology, Princeton University.
- Dorf, Dean Richard C.** Division of Extended Learning, University of California, Davis.
- Dorfman, Dr. Ralph I.** Senior Vice President and Director, Syntex Research Center, Palo Alto, California.
- Dorsey, Prof. John G.** Department of Chemistry, Florida State University, Tallahassee.
- Doscher, Dr. Todd M.** Department of Petroleum Engineering, University of Southern California.
- Dossel, Dr. William E.** Professor and Chairman, Department of Anatomy, School of Medicine, Creighton University.
- Dott, Dr. Robert H., Jr.** Department of Geology, University of Wisconsin.
- Doubiel, Dr. Russell F.** Geological Survey, U.S. Department of the Interior, Denver, Colorado.
- Doudoroff, Dr. Michael.** Deceased; formerly, Department of Bacteriology, University of California, Berkeley.
- Douglas, Donald W., Jr.** Corporate Vice President—Administration, McDonnell Douglas Corporation, St. Louis, Missouri; Chairperson and President, Douglas Aircraft Company of Canada, Toronto, Ontario.
- Douglas, Prof. David H.** Department of Physics and Astronomy, College of Art and Science, University of Rochester.
- Douglass, Prof. Raymond D.** Department of Mathematics, Massachusetts Institute of Technology.
- Dover, Dr. Carl B.** Department of Physics, Brookhaven National Laboratory, Upton, New York.
- Doviak, R. J.** National Severe Storms Laboratory, National Oceanic and Atmospheric Administration, Norman, Oklahoma.
- Downey, Dr. Joe.** Dow Chemical Company, Midland, Michigan.
- Downey, Dr. R. K.** Agricultural Research Station, Saskatoon, Saskatchewan, Canada.
- Doyle, Prof. James A.** Department of Biological Sciences, University of California, Davis.
- Doyle, Laurence.** Senior Scientist, ITT Aerospace/Communications, Clifton, New Jersey.
- Doyle, Prof. Michael P.** Director, Center for Food Safety and Quality Enhancement, University of Georgia, Griffin.
- Drake, A. E.** Division of Electrical Science, National Physical Laboratory, United Kingdom.
- Drake, Prof. John C.** Department of Geology, University of Vermont.
- Drake, Dr. Michael V.** Department of Ophthalmology, School of Medicine, University of California, San Francisco.
- Draper, Dr. Clifton W.** Laser Studies Group, Western Electric Company, Princeton, New Jersey.
- Dreschel, Dr. Thomas W.** Biologist/Chemist, Bionetics Corporation, Environmental Monitoring and Research Program, Kennedy Space Center, Florida.
- Dresden, Prof. Max.** Institute for Theoretical Physics, State University of New York, Stony Brook.
- Drexter, Dr. Eric.** Foresight Institute, Palo Alto, California.
- Dropping, Barry.** Hewlett-Packard, Santa Clara, California.
- Duby, Prof. Paul.** Henry Krumb School of Mines, Columbia University.
- Duckworth, Dr. Henry E.** Department of Physics, University of Manitoba, Canada.
- Dugan, Dr. Frank M.** American Type Culture Collection, Manassas, Virginia.
- Duguay, Dr. Michel A.** Laser Development, Sandia Laboratories, Albuquerque, New Mexico.
- Duke, Dr. C. B.** Manager, Molecular and Organic Materials Area, Xerox Corporation, Rochester, New York.
- Duke, Kenneth L.** Department of Anatomy, Duke University Medical Center.
- Dunbar, Prof. Carl O.** Deceased; formerly, Professor Emeritus of Paleontology and Stratigraphy, Yale University.
- Duncan, Prof. William G.** Department of Agronomy, University of Kentucky.
- Duncombe, Dr. Raynor L.** Department of Aerospace Engineering, University of Texas, Austin.
- Dunlop, Prof. David J.** Department of Physics, University of Toronto, Ontario, Canada.
- Dunn, Prof. Bruce.** Department of Materials Science & Engineering, University of California, Los Angeles.
- Dunn, Prof. Floyd.** Department of Electrical and Computer Engineering, University of Illinois at Urbana-Champaign.
- Dunning, Dr. John B., Jr.** Department of Forestry and Natural Resources, Purdue University.
- DuPont, Dr. Herbert L.** Medical School, University of Texas, Houston.
- Duren, Prof. Peter L.** Department of Mathematics, University of Michigan.
- Durst, Prof. Richard A.** Director, Analytical Chemistry Laboratories, New York State Agricultural Experimental Station, Cornell University, Geneva.
- Dutro, Dr. J. Thomas, Jr.** Museum of Natural History, U.S. Department of the Interior, Washington, D.C.
- Duwez, Dr. Pol E.** Deceased; formerly, W. M. Keck Laboratory of Engineering Materials, California Institute of Technology.
- Dyer, Dr. K. R.** Institute of Oceanographic Sciences, Somerset, England.
- Dym, Prof. C. L.** Department of Civil Engineering, University of Massachusetts.
- Dzuiba, Ronald.** Senior Member, Electrical Measurements Laboratory, National Institute of Standards and Technology, Gaithersburg, Maryland.

## E

- Easterbrook, Don J.** Department of Geology, Western Washington University, Bellingham.
- Eberl, Dr. Dennis D.** U.S. Geological Survey, Denver Federal Center, Denver, Colorado.
- Eberts, Prof. Ray.** Department of Industrial Engineering, Purdue University.

- Eckels, Dr. Arthur R.** Department of Electrical Engineering, North Carolina State University.
- Economou, George A.** Formerly, J. W. Pecker Division, American Optical Company, Pittsburgh, Pennsylvania.
- Edelman, Robert I.** Corporate Communications, Eastman Kodak Company, Rochester, New York.
- Edelson, Dr. Marshall.** Department of Psychiatry, Yale University.
- Edgecombe, Gregory D.** American Museum of Natural History, New York.
- Edgerton, Dr. Harold E.** Institute Professor, Emeritus, Massachusetts Institute of Technology.
- Edmonds, Dr. Robert L.** College of Forest Resources, University of Washington, Seattle.
- Edwards, Alan F.** Freeport-McMoran Inc., New Orleans, Louisiana.
- Edwards, Prof. John O.** Department of Chemistry, Brown University.
- Edwards, Dr. Peter A.** Department of Biological Chemistry, University of California School of Medicine, Los Angeles.
- Edwards, Dr. Russell K.** Argonne National Laboratory, Argonne, Illinois.
- Edwards, Dr. Steven.** Department of Virology, Central Veterinary Laboratory-Weybridge, United Kingdom.
- Eesley, Dr. Gary L.** GM Research and Development Center, Warren, Michigan.
- Egan, Patrick.** Department of Physics, Yale University.
- Ehernberger, L. J.** NASA Dryden Flight Research Facility, Edwards, California.
- Ehrlich, Dr. John.** Formerly, Laboratory Director in Antibiotic Research, Parke, Davis and Company, Detroit, Michigan.
- Ehrlich, Dr. Paul R.** Professor of Biological Sciences and Curator of the Entomological Collections, Stanford University.
- Ehrlich, Dr. Stanley L.** Middletown, Rhode Island.
- Ehrmann, Dr. David A.** Department of Medicine, Section of Endocrinology, University of Chicago Medical Center.
- Eichorn, Dr. Gunther L.** Gerontology Research Center, National Institutes of Health, Baltimore, Maryland.
- Eidson, Dr. Millicent.** Veterinarian, Santa Fe, New Mexico.
- Eilers, Carl G.** Manager, Electronics Systems Research and Development, Zenith Radio Corporation, Glenview, Illinois.
- Einaudi, Prof. Marco T.** Department of Applied Earth Science, Stanford University.
- Eirich, Dr. F. R.** Chemistry/Life Sciences Department, Polytechnic University, New York.
- Eisenbud, Dr. Merrill.** Institute of Environmental Medicine, New York University Medical Center.
- Ekdale, Dr. Allan A.** Department of Geology and Geophysics, College of Mines and Earth Sciences, University of Utah.
- Eldeib, Dr. Hany K.** Department of Electrical and Computer Engineering, George Mason University, Fairfax, Virginia.
- Elderfield, Prof. Robert C.** Deceased; formerly, Department of Chemistry, University of Michigan.
- Eldredge, Dr. Niles.** American Museum of Natural History, New York.
- Elgomayel, Prof. Joseph.** School of Industrial Engineering, Purdue University.
- Eliel, Prof. Ernest L.** Department of Chemistry, University of North Carolina.
- Ellen, Dr. C. Wayne.** Department of Plant Pathology, Ohio State University.
- Ellis, Dr. David E.** Research and Development Department, Continental Oil Company, Ponca City, Oklahoma.
- Ellis, Dr. Gordon W.** Department of Biology, School of Art and Sciences, University of Pennsylvania, Leidy Laboratory of Biology, Philadelphia.
- Ellis, Dr. Walther R.** Division of Chemistry and Chemical Engineering, California Institute of Technology.
- El-Mansy, Youssef.** Intel Corporation, Aloha, Oregon.
- Elston, Dr. Stuart B.** Department of Physics and Astronomy, University of Tennessee, Knoxville.
- Eltoweissy, Dr. Mohamed Y.** Department of Computer Science, James Madison University, Harrisonburg, Virginia.
- Ely, F. G.** Retired; Research and Development Division, Babcock and Wilcox Company.
- Emanuel, Dr. Kerry Andrew.** Department of Earth, Atmospheric and Planetary Sciences, Massachusetts Institute of Technology.
- Emerson, Lewis P.** Engineer in Charge of Flow Measurement, Foxboro Company, Foxboro, Massachusetts.
- Emerson, Dr. Steven.** Department of Oceanography, University of Washington.
- Encleson, Stephen C.** Technical Editor, Corporate Communications, Dow Chemical Company, Midland, Michigan.
- Endicott, Prof. John F.** Department of Chemistry, Wayne State University.
- Engels, Dr. William R.** Department of Genetics, University of Wisconsin, Madison.
- English, Prof. Van H.** Department of Geography, Dartmouth College.
- Engstrom, Prof. Arne.** Head, Department of Medical Physics, Karolinska Institute, Stockholm, Sweden.
- Engstrom, Dr. Ralph W.** Electro-Optics and Devices, RCA Laboratories, Lancaster, Pennsylvania.
- Enkenfelder, Dr. W. Wesley, Jr.** Eckenfelder, Inc., Nashville, Tennessee.
- Enlander, Dr. Derek.** New York, New York.
- Enrich, Fredric F.** Aircraft Engine Business Group, General Electric Company, Lynn, Massachusetts.
- Enslow, Prof. Philip H., Jr.** School of Information and Computer Science, Georgia Institute of Technology.
- hEocha, Colm.** Department of Biochemistry, University College, Galway, Ireland.
- Epperly, W. R.** Exxon Research and Engineering, Annandale, New Jersey.
- Epstein, Dr. W. W.** Department of Chemistry, University of Utah.
- Erasmus, Dr. Baltus J.** Head, Onderstepoort Vaccine Factory, Republic of South Africa.
- Erb, Dr. Karl A.** Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Erdelyi, Prof. A.** Professor of Mathematics, University of Edinburgh, Scotland.
- Erdman, Dr. Arthur.** Department of Mechanical Engineering, University of Minnesota.
- Erickson, Dr. Robert P.** Department of Pediatrics, University of Arizona College of Medicine, Tucson.
- Eriksson, Dr. Kenneth A.** Department of Geology, University of Texas, Richardson.
- Ernst, Dr. Ralph A.** Extension Poultry Specialist, Avian Sciences, University of California, Davis.
- Ernster, Dr. Virginia L.** Department of Epidemiology and International Health, School of Medicine, University of California, San Francisco.
- Esaki, Leo. Thomas J.** Watson Research Center, IBM, Yorktown Heights, New York.
- Esau, Prof. Katherine.** Department of Botany, University of California, Santa Barbara.
- Essene, Prof. Eric J.** Department of Geological Sciences, University of Michigan, Ann Arbor.
- Ethridge, Dr. Frank G.** Department of Earth Resources, Colorado State University.
- Ettenberg, Dr. Eugene M.** Formerly, Lecturer in Graphic Arts, New York.
- Etter, Robert J.** David W. Taylor Naval Ship Research and Development Center, Bethesda, Maryland.
- Evans, Doris L.** Deceased; formerly, Research and Development Division, Corning Glass Works, Corning, New York.
- Evans, Dr. Doyle J.** Chief, Bacterial Enteropathogens Laboratory, Veterans Affairs Medical Center, Houston, Texas.
- Evans, Prof. Francis C.** Division of Biological Sciences, University of Michigan.
- Evans, Dr. Ginger.** Denver, Colorado.
- Evans, Prof. Robley D.** Retired; Department of Physics, Massachusetts Institute of Technology.
- Evenson, Dr. Kenneth M.** Time and Frequency Division, National Institute of Standards and Technology, Boulder, Colorado.
- Evenson, Dr. Paul.** Bartol Research Institute, University of Delaware.
- Everetts, Dr. John Jr.** Professor of Architectural Engineering, Pennsylvania State University.
- Ewing, Dr. Maurice.** Deceased; formerly, Lamont-Doherty Geological Observatory, Palisades, New York.
- Ewing, Prof. Rodney.** Department of Earth and Planetary Sciences, University of New Mexico, Albuquerque.
- Eyde, Dr. Richard H.** Department of Botany, Smithsonian Institution.

- Eyring, Dr. Edward M.** Department of Chemistry, University of Utah.
- Eyring, Prof. Henry.** Deceased; formerly, Institute for the Study of Rate Processes, University of Utah.
- Ezzell, Dr. John W.** Chief, Special Pathogens Branch, U.S. Army Medical Research Institute, Fort Detrick, Maryland.

## F

- Failla, Dr. Gioacchino.** Deceased; formerly, Argonne National Laboratory, Argonne, Illinois.
- Fairbank, Prof. Henry A.** Department of Physics, Duke University.
- Falchuck, Dr. Kenneth A.** Center for Biochemical and Bio-physical Sciences and Medicine, Harvard Medical School.
- Faller, Dr. John W.** Department of Chemistry, Yale University.
- Fan, Prof. Hsu Y.** Department of Physics, Purdue University.
- Fankhauser, Dr. Gerhard.** Deceased; formerly, Department of Biology, Princeton University.
- Fano, Prof. U.** Deceased; formerly, James Franck Institute, University of Chicago.
- Fanta, Prof. Paul E.** Department of Chemistry, Illinois Institute of Technology.
- Farmer, Dr. David M.** Department of the Environment, Pacific Region, Institute of Ocean Sciences, Sidney, British Columbia, Canada.
- Farmer, Richard G.** Department of Electrical Engineering, Arizona State University, Tempe.
- Farrel, Dr. Nicholas.** Department of Chemistry, Virginia Commonwealth University, Richmond.
- Farrell, R. F.** General Manager, Glidden Coatings and Resins, Division of SCM Corporation, Charlotte, North Carolina.
- Faure, Dr. Gunter.** Department of Geological Sciences, Ohio State University.
- Faw, Prof. Richard E.** Head, Department of Nuclear Engineering, Kansas State University.
- Fawcett, Prof. Eric.** Department of Physics, University of Toronto, Ontario, Canada.
- Fay, Dr. Richard R.** Parmlly Hearing Institute and Department of Psychology, Loyola University of Chicago, Illinois.
- Fayyad, Dr. Usama.** Microsoft Research, Redmond, Washington.
- Feduccia, Dr. Alan.** Department of Biology, University of North Carolina, Chapel Hill.
- Fehr, Prof. Walter R.** Department of Agronomy, Iowa State University.
- Feigenbaum, Mitchell J.** Professor, Department of Physics, Cornell University.
- Fein, Dr. Jay S.** Division of Atmospheric Sciences, National Science Foundation, Washington, D.C.
- Feist, Dr. Blake E.** Northwest Fisheries Science Center, Environmental Conservation Division—Watershed Program, Seattle, Washington.
- Feldberg, Dr. Steven W.** Department of Applied Science, Brookhaven National Laboratory, Upton, New York.
- Feldman, Dr. Barry J.** Los Alamos Scientific Laboratory, Los Alamos, New Mexico.
- Feldman, Leonard.** Electronics Laboratories, Great Neck, New York.
- Feldman, Dr. Leonard C.** AT&T Bell Laboratories, Murray Hill, New Jersey.
- Feldmann, Dr. Rodney M.** Department of Geology, Kent State University, Kent, Ohio.
- Fell, Prof. Howard B.** Museum of Comparative Zoology, Harvard University.
- Fell, Dr. Jack W.** University of Miami, Rosenstiel School of Marine and Atmospheric Science, Marine Biology and Fisheries, Key Biscayne, Florida.
- Feller, Prof. William.** Deceased; formerly, Department of Mathematics, Princeton University.
- Felver, Prof. Richard I.** Designer, Carnegie Institute of Technology.
- Fendler, Dr. Janos H.** Department of Chemistry, Center for Research in Membranes and Colloid Science, Syracuse University.
- Ferguson, Prof. J. Homer.** Department of Biological Science, University of Idaho.
- Ferguson, Dr. Louise.** Extension Pomologist, Kearney Agricultural Center, University of California, Parlier.
- Fernando, Dr. Quintus.** Department of Chemistry, University of Arizona.
- Ferrell, Dr. James E., Jr.** Department of Molecular Pharmacology, Stanford University, School of Medicine.
- Ferrell, Prof. Thomas L.** Health and Safety Research Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Ferris, Prof. Gordon F.** Deceased; formerly, National History Museum, Stanford University.
- Ferry, Dr. James F.** Department of Biology, Madison College.
- Feshbach, Dr. Herman.** Department of Physics, Massachusetts Institute of Technology.
- Fetz, Dr. Eberhard E.** Department of Physiology and Biophysics, University of Washington School of Medicine.
- Few, Prof. Arthur.** Department of Space Physics and Astronomy, Rice University.
- Fiala, Dr. Alan D.** U.S. Naval Observatory, Washington, D.C.
- Fidecaro, Dr. Giuseppe.** EP Division, CERN, Geneva, Switzerland.
- Fiedler, Dr. Peggy L.** Piedmont, California.
- Fields, Paul R.** Senior Chemist, Argonne National Laboratory, Argonne, Illinois.
- Fields, Thomas H.** Physics Division, Argonne National Laboratory, Argonne, Illinois.
- Fincham, Prof. J. R. S.** Department of Genetics, University of Leeds, England.
- Findlay, Dr. David M.** Department of Orthopedics and Trauma, University of Adelaide, Royal Adelaide Hospital, Adelaide, Australia.
- Finegold, Dr. Sydney M.** Chief, Infectious Disease Section, Veterans Administration Wadsworth Hospital Center, Los Angeles, California.
- Fingerman, Dr. Milton.** Department of Biology, Tulane University.
- Fink, Donald G.** Director Emeritus, IEEE; Editor in Chief, "Electronics Engineers' Handbook," McGraw-Hill Book Company, New York.
- Fink, Prof. Jordan N.** Chief, Allergy-Immunology Section, Department of Medicine, Medical College of Wisconsin.
- Finkelstein, Prof. L.** Department of Physics, The City University, London, England.
- Finkelstein, Dr. Richard.** Department of Microbiology, University of Missouri School of Medicine, Columbia.
- Finks, Dr. Robert M.** Department of Geology, Queens College, City University of New York.
- Finotello, Dr. Daniele.** Liquid Crystal Institute, Kent State University, Kent, Ohio.
- Firebaugh, Millard S.** Naval Sea Systems Command, Washington, D.C.
- Firk, Prof. Frank W. K.** Electron Accelerator Laboratory, Yale University.
- Firor, Dr. John W.** Director, Advanced Study Program, National Center for Atmospheric Research, Boulder, Colorado.
- Fischer, Prof. Alfred G.** San Pedro, California.
- Fischer, Harold.** General Motors Corporation, Flint, Michigan.
- Fischer, Henry W.** Hardesty & Hanover, New York.
- Fischer, Prof. J. E.** Department of Materials Science and Engineering, University of Pennsylvania, Philadelphia.
- Fisher, Dr. Jack B.** Fairchild Tropical Garden and Research Center, Miami, Florida.
- Fisher, Dr. Robert A.** Los Alamos Scientific Laboratory, Los Alamos, New Mexico.
- Fisher, Dr. Robert L.** Geological Research Division, Scripps Institution of Oceanography, La Jolla, California.
- Fisher, Prof. Russell A.** Department of Physics, Northwestern University.
- Fisher, Dr. William L.** Department of Geological Science, University of Texas, Austin.
- Fisk, Prof. Nelson S.** Department of Civil Engineering, Columbia University.
- Fiske, Capt. Richard P.** Retired; formerly, Director of Ocean Engineering/Supervisor of Salvage and Diving, U.S. Navy.
- Fitch, Prof. Val.** Department of Physics, Princeton University.
- Fitzsimons, James T.** Physiological Laboratory, University of Cambridge, United Kingdom.
- Flathers, George W., II.** MITRE Corporation, McLean, Virginia.
- Fleischer, Dr. R. L.** Physical Science Branch, General Physics Laboratory, General Electric Company, Schenectady, New York.

- Fleminger, Dr. Abraham.** Research Biologist, Scripps Institution of Oceanography, La Jolla, California.
- Flessa, Dr. Karl Walter.** Division of Earth Sciences, National Science Foundation, Washington, D.C.
- Flint, Dr. Richard F.** Department of Geology and Geophysics, Yale University.
- Flint, Robert B.** VORTAC Consultant, Havana, Illinois.
- Floe, Prof. Carl f.** Department of Metallurgy, Massachusetts Institute of Technology.
- Flye, Prof. M. Wayne.** Surgery, Microbiology and Immunology, Washington University School of Medicine, St. Louis, Missouri.
- Flynn, Dr. Thomas M.** Consultant, Cryogenic Engineering, Boulder, Colorado.
- Focht, Prof. Dennis D.** Department of Soil and Environmental Sciences, University of California, Riverside.
- Fogel, Dr. David B.** Natural Selection, Inc., La Jolla, California.
- Foon, Dr. Kenneth A.** Roswell Park Memorial Institute, Buffalo, New York.
- Ford, Prof. Derek C.** Department of Geography, McMaster University, Hamilton, Ontario, Canada.
- Ford, Prof. E. B.** Deceased; formerly, Genetics Laboratory, Department of Zoology, Oxford University, England.
- Ford, Dr. Karen Grady.** Department of Biology, College of Charleston, South Carolina.
- Forey, Dr. Peter.** Department of Paleontology, Natural History Museum, London, England.
- Forster, Dr. Denis.** Monsanto Company, St. Louis, Missouri.
- Foster, Prof. Jackson W.** Deceased; formerly, Professor of Microbiology, University of Texas.
- Foster, Dr. Mark G.** Retired; Department of Electrical Engineering, School of Engineering and Applied Science, University of Virginia.
- Foster, Prof. Merrill W.** Department of Geology, Bradley University.
- Foster, Dr. Robert J.** Department of Physics, San Jose State University.
- Fountain, Dr. David M.** Department of Geology and Geophysics, University of Wyoming.
- Fourtner, Dr. Charles R.** Department of Biological Science, State University of New York, Buffalo.
- Fowler, Prof. W. Beall.** Department of Physics, Lehigh University.
- Fox, Dr. Christopher.** Department of Computer Science, James Madison University, Harrisonburg, Virginia.
- Fox, Dr. Marye Anne.** Department of Chemistry, University of Texas, Austin.
- Fox, Dr. Richard.** Department of Biological Sciences, University of Alberta, Edmonton, Canada.
- Fox, Dr. Robert M.** Department of Electrical Engineering, College of Engineering, University of Florida.
- Fradkin, Dr. David M.** Department of Physics, Wayne State University.
- Frailey, Dr. Dennis J.** Texas Instruments, Inc., Austin, Texas.
- Frakes, Dr. William B.** Virginia Tech, Northern Virginia Center, Falls Church.
- Frame, Prof. J. Sutherland.** Professor Emeritus of Mathematics, Michigan State University.
- Franc, Dr. Jean-Marie.** Laboratoire d'Histologie et Biologie Tissulaire, Université Claude Bernard, Villeurbanne, France.
- France, Dr. Diane L.** Fort Collins, Colorado.
- Francis, Dr. Arthur W.** Union Carbide Corporation, Tarrytown, New York.
- Frank, Prof. Bernard.** Deceased; formerly, Professor of Watershed Management, Colorado State University.
- Franklin, David.** Program Manager, Nuclear Systems and Materials, Electric Power Research Institute, Palo Alto, California.
- Franzese, Dr. Kenneth.** Research and Development, Bright Star Industries, Inc., Clifton, New Jersey.
- Franzini, Dr. Paolo.** Dipartimento di Fisica, Università di Roma I, Italy.
- Freeman, Dr. A. E.** Department of Animal Science, Iowa State University.
- Freedman, Dr. Daniel X.** Department of Psychiatry and Behavioral Sciences, University of California School of Medicine.
- Freeman, Harry M.** Chief, Waste Minimization Branch, Risk Reduction Engineering Laboratory, U.S. Environmental Protection Agency, Cincinnati, Ohio.
- Freeman, Prof. Jeremiah P.** Department of Chemistry, University of Notre Dame.
- Freeman, Prof. Ralph L.** Retired; Department of Mechanical Engineering, Iowa State College.
- Freedman, Dr. Wendy L.** Observatories of the Carnegie Institution of Washington, Pasadena, California.
- Freire, Prof. Ernesto.** Director, Biocalorimetry Center, Johns Hopkins University, Baltimore, Maryland.
- Freiser, Prof. Henry.** Department of Chemistry, University of Arizona, Tucson.
- Fremed, Raymond F.** Burson-Marsteller Associates, New York.
- French, Dr. J. Bruce.** Department of Physics, University of Rochester.
- Fretter, Prof. William B.** Department of Physics, University of California, Berkeley.
- Freudenstein, Dr. Ferdinand.** Department of Mechanical Engineering, Columbia University.
- Freundt, Dr. E. A.** Institute for Medical Microbiology, Aarhus University, Denmark.
- Frey, Dr. Kenneth J.** Department of Agronomy, Iowa State University.
- Fribourg, Prof. Henry A.** Department of Plant and Soil Science, University of Tennessee, Knoxville.
- Frick, Dr. Oscar L.** Department of Pediatrics, University of California Medical Center.
- Fridovich, Dr. Irwin.** Department of Biochemistry, Duke University Medical Center.
- Fried, Dr. George H.** Brooklyn College, City University of New York.
- Fried, Dr. Sherman.** Chemistry Division, Argonne National Laboratory, Argonne, Illinois.
- Fried, Walter R.** Deceased; formerly, Navigation Systems Consultant, Hughes Aircraft Company, Santa Ana, California.
- Friedlander, Prof. Sheldon K.** Department of Chemical Engineering, University of California, Los Angeles.
- Friedman, Prof. Harold L.** Department of Chemistry, State University of New York, Stony Brook.
- Friedman, Lewis.** Brookhaven National Laboratory, Upton, New York.
- Friedman, Norman.** U.S. Naval Institute, Annapolis, Maryland.
- Frisancho, Dr. A. Roberto.** Center for Human Growth and Development, University of Michigan, Ann Arbor.
- Fritsch, J. Michael.** Associate Professor, Department of Meteorology, College of Earth and Mineral Sciences, Pennsylvania State University.
- Froes, Dr. F. H. Sam.** Director, Institute for Materials and Advanced Processes, University of Idaho.
- Fromkin, Dr. Victoria A.** Dean, Vice Chancellor, Graduate Programs, Department of Linguistics, University of California, Los Angeles.
- Frondel, Prof. Clifford.** Retired; Department of Geological Sciences, Harvard University.
- Frost, Dr. Thomas M.** Center for Limnology, University of Wisconsin.
- Fruchter, Dr. Benjamin.** Department of Educational Psychology, University of Texas, Austin.
- Frumhoff, Dr. Peter.** Department of Entomology, University of California, Davis.
- Fry, Prof. Albert J.** Department of Chemistry, Wesleyan University, Middletown, Connecticut.
- Fry, Prof. Edward S.** Department of Physics, Texas A&M University.
- Frye, Gene.** Retired; formerly, Technical Staff, Collins Division, Rockwell International, Cedar Rapids, Iowa.
- Fryer, Dr. Geoffrey.** Freshwater Biological Association, Cumbria, United Kingdom.
- Fröhlich, Dr. Claus.** Physikalisch-Meteorologisches Observatorium Davos, World Radiation Center, Davos Dorf, Switzerland.
- Fuchs, Prof. Ronald.** Department of Physics, Iowa State University.
- Fudenberg, Dr. H. Hugh.** Section of Hematology and Immunology, San Francisco Medical Center, University of California.
- Fulford, Prof. George D.** Department of Chemical Engineering, University of Waterloo, Ontario, Canada.
- Fulks, J. R.** Retired; formerly, National Weather Service, Chicago, Illinois.

**Fuller, Prof. Dudley D.** (Retired)  
Department of Mechanical Engineering,  
Columbia University.

**Fuller, Dr. Mark Roy.** Patuxent Wildlife  
Reserve Center, Laurel, Maryland.

**Fuller, Dr. Thomas C.** Retired; formerly,  
Supervisor, Botany and Seed Laboratories,  
California Department of Food and  
Agriculture, Sacramento.

**Fulton, Dr. James W.** Monsanto Company,  
St. Louis, Missouri.

**Fung, Prof. Y. C.** Department of Applied  
Mechanics, University of California, San  
Diego.

**Furter, Dr. W. F.** Dean of Graduate Studies  
and Research, Royal Military College of  
Canada.

**Fusco, Roberto.** Istituto Guido Donegani,  
EniChem, Polymeric Materials Department,  
Novara, Italy.

**Futral, Prof. J. G.** Department of  
Agricultural Engineering, Georgia  
Agricultural Experiment Station,  
Experiment, Georgia.

**Futuyma, Dr. Douglas J.** Section of  
Ecology and Systematics, Cornell  
University.

## G

**Gaasch, Dr. William H.** Director of  
Cardiovascular Research, Section of  
Cardiovascular Diseases, Labey Clinic,  
Burlington, Massachusetts.

**Gagliardo, Reginald S.** Vice President,  
Engineering, Burns & Roe Enterprises, Inc.,  
Oradell, New Jersey.

**Gagne, Dr. Raymond J.** Systematic  
Entomology Laboratory, U.S. Department of  
Agriculture.

**Gaines, Dr. Alan M.** National Science  
Foundation.

**Gaines, Dr. George L.** Research and  
Development Center, General Electric  
Company, Schenectady, New York.

**Galambos, Prof. Theodore V.** Emeritus  
Professor, Department of Civil  
Engineering, University of Minnesota,  
Minneapolis.

**Gale, Dr. Douglas S.** National Science  
Foundation, Washington, D.C.

**Gale, Peter A.** Chief Naval Architect, John  
J. McMullen Associates, Inc., Arlington,  
Virginia.

**Gallant, Dr. Donald M.** Department of  
Psychiatry and Neurology, Tulane  
University School of Medicine.

**Galli, Prof. Stephen J.** Department of  
Pathology, Beth Israel Hospital, Boston,  
Massachusetts.

**Galston, Dr. Arthur W.** Department of  
Biology, Yale University.

**Gamble, Dr. Joe D.** National Aeronautics  
and Space Administration, Lyndon B.  
Johnson Space Center, Houston,  
Texas.

**Gamble, Dr. John.** Department of Geology,  
Victoria University, Wellington, New  
Zealand.

**Gambs, Gerard C.** Vice President (retired),  
Ford, Bacon, & Davis, Inc., New York.

**Garbassi, Fabio.** Istituto Guido Donegani,  
EniChem, Polymeric Materials Department,  
Novara, Italy.

**Garcia, Dr. John.** Department of  
Psychology, University of California, Los  
Angeles.

**Gardiner, Dr. Brian.** Linnean Society of  
London, Burlington House, Piccadilly,  
London, United Kingdom.

**Gardiner, Dr. Kathleen.** Eleanor Roosevelt  
Institute for Cancer Research, Denver,  
Colorado.

**Gardner, Prof. Chester S.** Department of  
Electrical Engineering and Computer  
Science, University of Illinois, Urbana.

**Gardner, Dr. Frank E.** Horticulturist,  
Agricultural Research Service, U.S.  
Department of Agriculture, Orlando,  
Florida.

**Gardner, Dr. Julian W.** Director of  
Nanotechnology Centre, Department of  
Engineering, University of Warwick,  
Coventry, United Kingdom.

**Gardner, Dr. Walter H.** Department of  
Agronomy and Soils, Washington State  
University.

**Garetz, Dr. Bruce A.** Department of  
Chemistry, Polytechnic University, New  
York.

**Garfield, Dr. Sol L.** Department of  
Psychology, Washington University.

**Garland, Dr. John.** Professor, Department  
of Forest Engineering, Oregon State  
University, Corvallis.

**Garrett, Prof. Alfred B.** Department of  
Chemistry, Ohio State University.

**Garrett, Dr. Roger E.** Department of  
Agricultural Engineering, University of  
California, Davis.

**Gasaway, Donald C.** E.A.R. Division,  
Cabot Corporation, San Antonio,  
Texas.

**Gass, Dr. Saul I.** Potomac, Maryland.

**Gastaldo, Dr. Robert A.** Department of  
Geology, Auburn University, Auburn,  
Alabama.

**Gastony, Prof. Gerald J.** Department of  
Plant Sciences, Indiana University.

**Gatchell, Charles J.** U.S. Department of  
Agriculture Forest Service, Forestry Sciences  
Laboratory, Princeton, West Virginia.

**Gaudin, Dr. Tim.** Department of Biological  
and Environmental Science, University of  
Tennessee, Chattanooga.

**Gauss, Dr. D.** Max-Planck Institut für  
Experimentelle Medizin, Göttingen,  
Germany.

**Gauss, F. Stephen.** Director, Astrometry  
Department, U.S. Naval Observatory,  
Washington, D.C.

**Gaylord, Prof. Charles N.** Deceased;  
formerly, Chairman, Department of Civil  
Engineering, University of Virginia.

**Gazzaniga, Dr. Michael S.** Professor of  
Psychology and Social Sciences in

Medicine, State University of New York,  
Stony Brook.

**Geiger, Prof. Randall L.** Department of  
Electrical Engineering, Texas A&M  
University.

**Geist, Jon.** Radiometric Physics Division,  
National Institute of Standards and  
Technology, Washington, D.C.

**Gelfand, Prof. Erwin W.** Chief, Division of  
Immunology and Rheumatology, Hospital  
for Sick Children, Toronto, Ontario,  
Canada.

**Gemmell, Dr. Donald S.** Physics Division,  
Argonne National Laboratory, Argonne,  
Illinois.

**Genito, Dennis.** Pasture Systems and  
Watershed Management Research  
Laboratory, U.S. Department of  
Agriculture-Agricultural Research Service,  
University Park, Pennsylvania.

**Gensler, Prof. Walter J.** Deceased;  
formerly, Department of Chemistry, Boston  
University.

**George, Dr. Kathleen F.** Union Carbide  
Chemicals and Plastics Company, Inc.,  
South Charleston, West Virginia.

**George, Dr. Melvin R.** Agronomy and  
Range Science Extension, University of  
California, Davis.

**Georgorapadakou, Dr. Nafsika H.**  
Department of Infectious Diseases, DuPont  
Research Laboratories, Wilmington,  
Delaware.

**Gepts, Dr. Paul.** Department of Agronomy  
and Range Science, University of  
California, Davis.

**Gerber, Leah R.** National Center for  
Ecological Analysis and Synthesis, Santa  
Barbara, California.

**Gergely, Dr. John.** Department of Muscle  
Research, Boston Biomedical Research  
Institute, Boston, Massachusetts.

**Gerjuoy, Dr. Edward.** Department of  
Physics, University of Pittsburgh.

**Gerlach, Dr. Arch C.** Chief Geographer,  
Geological Survey, U.S. Department of the  
Interior.

**Gerrity, Dr. Joseph P.** National  
Meteorological Center, National Oceanic  
and Atmospheric Administration, Camp  
Springs, Maryland.

**Gersh, Prof. Isidore.** Research Professor,  
Department of Animal Biology, School of  
Veterinary Medicine, University of  
Pennsylvania.

**Gershoff, Prof. Stanley N.** Department of  
Nutrition, Harvard School of Public Health,  
Boston, Massachusetts.

**Gertler, Dr. Janos.** Department of Electrical  
and Computer Engineering, George Mason  
University, Fairfax, Virginia.

**Gertsch, Dr. Willis J.** American Museum of  
Natural History, New York.

**Gerwartowski, James W.** Bell Telephone  
Laboratories, Murray Hill, New Jersey.

**Getman, Dr. Thomas D.** Department of  
Chemistry, Northern Michigan University.

**Ghiorso, Dr. Albert.** Department of  
Chemistry, Lawrence Berkeley Laboratory,  
University of California, Berkeley.

- Giallorenzi, Dr. Thomas G.** Superintendent, Optical Science Division, Department of the Navy, Naval Research Laboratory, Washington, D.C.
- Giannasi, Dr. David E.** Department of Botany, University of Georgia.
- Gibbons, Dr. Ian.** Kewala Laboratory, University of Hawaii.
- Gibbs, Dr. Martin.** Institute for Photobiology of Cells and Organelles, Brandeis University.
- Giblon, Robert P.** President, George G. Sharp, Inc., New York.
- Gibson, Dr. John E.** Dean of Engineering, Oakland University.
- Giese, Raymond.** Department of Mechanical Engineering, University of Minnesota.
- Gigg, Roy H.** Chemistry Division, National Institute for Medical Research, London, England.
- Giguere, Paul A.** Emeritus Professor, St. Petersburg Beach, Florida.
- Gilardi, Dr. Gerald L.** Microbiology Laboratory, North General Hospital, New York.
- Gilbert, Barrie.** Analog Devices, Inc., Northwest Laboratories, Beaverton, Oregon.
- Gilbert, Dr. Edgar N.** Deceased; formerly, AT&T Bell Telephone Laboratories, Murray Hill, New Jersey.
- Gill, Dr. D. Michael.** Department of Molecular Biology and Microbiology, Tufts University.
- Gillespie, Dr. Ronald J.** Department of Chemistry, McMaster University, Hamilton, Ontario, Canada.
- Gilloteaux, Dr. Jacques.** Professor of Cell Biology and Anatomy, Lake Erie College of Osteopathic Medicine, Erie, Pennsylvania.
- Gingrich, Prof. Newell S.** Department of Physics, University of Missouri.
- Ginsburg, Dr. Robert N.** Rosenstiel School of Marine and Atmospheric Science, University of Miami.
- Girvin, Prof. Steven M.** Department of Physics, Indiana University, Bloomington.
- Glantz, Dr. Michael.** National Center for Atmospheric Research, Boulder, Colorado.
- Glasford, Prof. Glenn M.** Department of Electrical and Computer Engineering, Syracuse University.
- Glass, Dr. Roger I.** Chief, Viral Gastroenteritis Unit, Centers for Disease Control and Prevention, Atlanta, Georgia.
- Glasscock, Dwight L.** Deceased; formerly, Harza Engineering Company, Chicago, Illinois.
- Gledhill, Dr. S. J.** Harpenden Herts, United Kingdom.
- Glick, Dr. Benjamin.** University of Chicago, Cummings Life Science Center, Chicago, Illinois.
- Glowatz, Dr. Michael, Jr.** Environmental Health and Safety Department, AT&T Bell Laboratories, Murray Hill, New Jersey.
- Gnade, Dr. Bruce E.** Defense Advanced Research Projects Agency, Arlington, Virginia.
- Goddu, Dr. Robert F.** Manager, Fibers and Film Research Division, Hercules, Inc., Wilmington, Delaware.
- Goebel, Prof. Charles.** Department of Physics, University of Wisconsin.
- Goff, Dr. Fraser.** Los Alamos National Laboratories, Los Alamos, New Mexico.
- Gokel, Prof. George W.** Department of Molecular Biology & Pharmacology, Washington University School of Medicine, St. Louis, Missouri.
- Goland, Dr. Leonard.** Executive Vice President, Dynasciences Corporation, Los Angeles, California.
- Gold, Dr. Ronald.** Hospital for Sick Children, Toronto, Ontario, Canada.
- Goldberg, Prof. David E.** Department of General Engineering, University of Illinois, Urbana.
- Goldberg, Dr. Ira J.** Department of Medicine, Columbia College of Physicians and Surgeons, Division of Metabolism and Nutrition, New York.
- Goldenberg, Dr. Victor E.** Associate Professor in Pathology, University Hospital, Seattle.
- Goldfarb, Dr. Marjorie S.** School of Oceanography, University of Washington, Seattle.
- Goldhaber, Dr. Gerson.** Lawrence Berkeley Laboratory, University of California, Berkeley.
- Goldich, Dr. Samuel S.** Department of Geology, Colorado School of Mines, Golden.
- Goldman, Dr. Marvin.** Emeritus Professor, Department of Radiological Sciences, University of California, Davis.
- Goldstein, Dr. D. J.** Department of Biomedical Science, University of Sheffield, England.
- Goldstein, Dr. Irving S.** Department of Wood and Paper Science, North Carolina State University, Raleigh.
- Golley, Dr. Frank B.** Institute of Ecology, Athens, Georgia.
- Golub, Dr. Leon.** Harvard Smithsonian Center for Astrophysics, Smithsonian Astrophysical Observatory, Cambridge, Massachusetts.
- Gomer, Prof. Robert.** James Franck Institute, University of Chicago.
- Gonser, Dr. Bruce W.** Battelle Memorial Institute, Columbus, Ohio.
- Good, Dr. Irving J.** Department of Statistics and Statistical Laboratory, College of Arts and Sciences, Virginia Polytechnic Institute.
- Good, Prof. Roland H., Jr.** Department of Physics, Pennsylvania State University.
- Goodbody, Dr. Ivan.** Department of Zoology, University of the West Indies, Jamaica.
- Goodchild, Dr. Chauncey G.** Candler Professor of Biology, Emory University.
- Goodenough, Prof. John B.** Center for Materials Science and Engineering, University of Texas, Austin.
- Goodglass, Dr. Harold.** Director, Psychology Research, Veterans Administration Hospital, Boston, Massachusetts.
- Goodheart, Prof. Clarence F.** Department of Electrical Engineering, Union College.
- Gooding, Dr. James L.** Space Scientist, Planetary Materials Branch, NASA Lyndon B. Johnson Space Center, Houston, Texas.
- Goodison, Dr. Barry E.** Superintendent, Hydrometeorological Impact and Development Section, Canadian Climate Centre, Atmospheric Environment Service, Downsview, Ontario.
- Goodman, Prof. Bernard.** Department of Physics, University of Cincinnati.
- Goodman, Dr. Joseph W.** Stanford Electronics Laboratories, Stanford University.
- Goodman, Dr. Matthew S.** Bell Communications Research, Inc., Morristown, New Jersey.
- Goodman, Dr. Morris.** Department of Anatomy, Wayne State University College of Medicine, Detroit, Michigan.
- Goodman, Dr. Ralph R.** Naval Research Laboratory, Stennis Space Center, Mississippi.
- Goodman, Dr. Richard A.** Division of Public Health, Emory University.
- Goodman, Sidney H.** Manager, Materials Products Department, Technology Support Division, Hughes Aircraft Co., Culver City, California; Senior Lecturer, Department of Chemical Engineering, University of Southern California.
- Goodman, Dr. Steven R.** Chair, Department of Cell Biology and Neuroscience, University of South Alabama College of Medicine, Mobile, Alabama.
- Goodstein, David H.** Director, Inter/Consult, Cambridge, Massachusetts.
- Goosby, Dr. Eric P.** AIDS Education and Training Centers Program, U.S. Public Health Service, Rockville, Maryland.
- Gordon, Dr. Arnold L.** Lamont-Doherty Geological Observatory, Palisades, New York.
- Gordon, Dr. Gary D.** Program Development, Communication Satellite Corporation, Clarksburg, Maryland.
- Gordon, Prof. Louis.** Deceased; formerly, Case Institute of Technology.
- Gordon, Dr. William E.** Associate Professor of Physical Chemistry, Pennsylvania State University, and Consultant.
- Gore, Edward W., Jr.** Vice President, International Market Requirements, Office Products Division, IBM, Franklin Lakes, New Jersey.
- Gosling, Dr. William.** Consultant, Radio Communications, Rode, Bath, England.
- Gossard, Prof. Arthur C.** Materials Department, University of California, Santa Barbara.
- Gotelli, Dr. Nick.** Department of Biology, University of Vermont, Burlington.
- Gots, Dr. Joseph S.** Department of Microbiology, School of Medicine, University of Pennsylvania.

- Gould, Dr. Richard A.** Department of Anthropology, University of Hawaii.
- Gould, Dr. Stephen J.** Professor of Geology, Museum of Comparative Zoology, Harvard University.
- Goulding, Dr. Frederick S.** Lawrence Berkeley Laboratory, University of California.
- Govindjee, Dr.** Department of Botany and Department of Physiology and Biophysics, University of Illinois, Urbana.
- Govindjee, Dr. Rajni.** Retired; formerly, Department of Botany, University of Illinois, Urbana.
- Grabowski, Dr. Martha R.** Center for Industrial Innovation, Department of Decision Sciences and Engineering Systems, Rensselaer Polytechnic Institute, Troy, New York.
- Grace, Dr. Neville.** Biotechnology Division, Department of Scientific and Industrial Research, Palmerston North, New Zealand.
- Graham, Dr. Jeffrey B.** Scripps Institution of Oceanography, La Jolla, California.
- Grande, Dr. Lance.** Field Museum of Natural History, Chicago, Illinois.
- Granicher, Prof. H.** Laboratory of Solid State Physics, Swiss Federal Institute of Technology, Zurich.
- Granick, Dr. S.** Department of Biochemistry, Rockefeller University.
- Grasshoff, Dr. K.** Institut für Meereskunde an der Universität Kiel, Germany.
- Grau, Dr. Fred V.** Consulting Agronomist, College Park, Maryland.
- Graves, Dr. Arthur H.** Deceased; formerly, Consultant in Genetics, Connecticut Agricultural Experiment Station.
- Graves, Prof. Lawrence M.** Professor Emeritus of Mathematics, University of Chicago.
- Graves, Walter L.** San Diego, California.
- Gray, Dr. Ernest.** Variety Club Children's Hospital, Department of Pediatrics, University of Minnesota.
- Gray, G. Ronald.** Director, Syncrude Canada Ltd., Edmonton, Alberta, Canada.
- Gray, Dr. Gerald J.** Vice President, Forest Policy Center, American Forests, Washington, D.C.
- Gray, Dr. Harry B.** Division of Chemistry and Chemical Engineering, California Institute of Technology.
- Green, Dr. David M.** Graduate Research, Department of Psychology, University of Florida.
- Green, Dr. Louis C.** Department of Astronomy, Haverford College.
- Green, Dr. Richard F.** National Optical Astronomy Observatory, Tucson, Arizona.
- Green, Prof. Sheldon I.** Department of Mechanical Engineering, University of British Columbia, Vancouver, Canada.
- Greenberg, Prof. David M.** Department of Biochemistry, School of Medicine, University of California, San Francisco.
- Greenberger, Prof. Daniel M.** Department of Physics, City College of the City University of New York.
- Greenfield, Dr. Lazar J.** Department of Surgery, University of Michigan Hospitals, Ann Arbor.
- Greenler, Dr. Robert.** Department of Physics, University of Wisconsin.
- Greensfelder, Dr. Bernard S.** Deceased; formerly, Director of Oil Research, Shell Development Company, Emeryville, California.
- Greenspan, Prof. Ehud.** Department of Nuclear Engineering, University of California, Berkeley.
- Greenspan, Martin.** National Bureau of Standards.
- Greenstein, Prof. Jesse L.** Hale Observatories, Pasadena, California.
- Gregory, Dr. Bob Lee.** Sandia National Laboratories, Albuquerque, New Mexico.
- Gregory, Dr. Joseph T.** Professor of Paleontology and Curator of Lower Vertebrates, Museum of Paleontology, University of California, Berkeley.
- Greiling, Dr. Paul T.** Hughes Research Laboratories, Malibu, California.
- Greiner, Dr. Dale L.** Professor of Medicine, University of Massachusetts Medical School, Worcester.
- Greiner, Dr. Walter.** Institut für Theoretische Physik, Universität Frankfurt, Germany.
- Grest, Dr. Gary S.** Exxon Research and Engineering Company, Annandale, New Jersey.
- Grey, Jerry.** President, Greyrad Corporation, Princeton, New Jersey.
- Grierson, Dr. William.** Institute of Food and Agricultural Sciences, University of Florida.
- Griffen, Prof. Dana T.** Department of Geology, Brigham Young University, Provo, Utah.
- Griffin, Dr. James.** Graduate School of Oceanography, University of Rhode Island, Charleston.
- Griffiths, Dr. A. J. F.** Department of Botany, University of British Columbia, Vancouver, Canada.
- Griffiths, Prof. Peter R.** Chairman, College of Letters and Science, Department of Chemistry, University of Idaho.
- Grigg, Prof. Neil S.** Head, Department of Civil Engineering, Colorado State University, Fort Collins.
- Grilo, Dr. Carlos M.** Director of Psychology, Yale Psychiatric Institute, New Haven, Connecticut.
- Grim, Dr. Ralph E.** Department of Geology, University of Illinois, Urbana.
- Grimm, Robert A.** AC Spark Plug Division, General Motors Corporation, Flint, Michigan.
- Grindlay, Dr. Jonathan E.** Center for Astrophysics, Harvard University.
- Grine, Dr. Frederick E.** Department of Anthropology, State University of New York, Stony Brook.
- Grissino-Mayer, Dr. Henri D.** Department of Physics, Astronomy, and Geosciences, Valdosta State University, Valdosta, Georgia.
- Grivell, Dr. Les. A.** Afdeling Moleculaire Biologie, Laboratorium voor Biochemie, Universiteit van Amsterdam, Netherlands.
- Grodzins, Dr. Lee.** Physics Department, Massachusetts Institute of Technology.
- Grogan, Dr. R. G.** Department of Plant Pathology, University of California, Davis.
- Groggins, P. H.** Deceased; formerly, Chemical Division, Food Machinery and Chemical Corporation.
- Gronstol, Prof. Hallstein.** Department of Large Animal Clinical Sciences, Norwegian College of Veterinary Medicine, Oslo, Norway.
- Groody, Dr. E. Patrick.** Integrated Genetics, Framingham, Massachusetts.
- Grosch, Prof. Daniel S.** Department of Genetics, North Carolina State University.
- Gross, Prof. Jonathan L.** Department of Mathematics, Columbia University.
- Gross, Marjorie K.** Newport, North Carolina.
- Gross, William H.** Technical Editor, Corporate Communications, Dow Chemical Company, Midland, Michigan.
- Grossman, Dr. Lawrence.** Department of Geophysical Sciences, University of Chicago.
- Grosswald, Prof. Emit.** Deceased; formerly, Department of Mathematics, Temple University.
- Grotzinger, Dr. John.** Department of Earth, Atmosphere, and Space Sciences, Massachusetts Institute of Technology.
- Groves, Dr. Gordon W.** Institute de Geofisica, Torre de Ciencias, Ciudad Universitaria, Mexico.
- Gruen, Dr. Dieter M.** Argonne National Laboratory, Argonne, Illinois.
- Grunberg, Dr. Emanuel.** Director, Department of Chemotherapy, Hoffmann-LaRoche, Inc., Nutley, New Jersey.
- Gruver, Prof. William A.** School of Engineering Science, Simon Fraser University, Burnaby, British Columbia, Canada.
- Grzymala-Busse, Prof. Jerzy W.** Department of Computer Science, University of Kansas.
- Gschneider, Prof. Karl A., Jr.** Ames Laboratory, Iowa State University.
- Guggenheim, Prof. Stephen.** Department of Geological Sciences, University of Illinois, Chicago.
- Guido, Prof. Louis.** Associate Professor, Electrical and Computer Engineering, Virginia Tech, Blacksburg.
- Guidry, Dr. Mark R.** Fairchild Camera & Instrument Corp., Mountain View, California.
- Gunckel, Prof. James E.** Department of Botany, Rutgers University.
- Gunkler, Dr. Albert A.** Chief Process Engineer, Midland Division, Dow Chemical Company, Midland, Michigan.
- Gunning, Dr. Brian E. S.** Department of Botany, Queen's University, Belfast, Ireland.

- Gunning, Dr. Robert C.** Department of Mathematics, Princeton University.
- Gupta, Dr. Madan M.** Intelligent System Research Laboratory, College of Engineering, University of Saskatchewan, Saskatoon.
- Gupta, Dr. Y. M.** Department of Physics, Shock Dynamics Laboratory, Washington State University.
- Gurevich, Michael.** Masonary Consultants, Fair Lawn, New Jersey.
- Gurney, Dr. Ashley B.** Systematic Entomology Laboratory, Entomology Research Division, U.S. Department of Agriculture.
- Gustafson, Dr. David A.** Department of Computing and Information Science, Kansas State University, Manhattan.
- Gutzwiller, Dr. Martin C. T. J.** Watson Research Center, IBM Corporation, Yorktown Heights, New York.
- Guy, Dr. Arthur W.** Bioelectromagnetism Research Laboratory, School for Medicine and College of Engineering, University of Washington, Seattle.
- Guzinski, Dr. Gay M.** Chief, Section of Benign Gynecology, Department of Obstetrics and Gynecology, School of Medicine, University of Maryland, Baltimore.
- Gyakum, Dr. John R.** Department of Meteorology, McGill University, Montreal, Quebec, Canada.
- Gyftopoulos, Dr. Elias P.** Thermo Electron Corporation, Waltham, Massachusetts.
- Gönen, Prof. Turan.** Department of Electrical & Electronic Engineering, California State University, Sacramento.
- Gür, Dr. Turgut M.** Senior Research Associate, Department of Materials Science and Engineering, Stanford University.
- H**
- Haber, Bernard.** Hardesty & Hanover, New York.
- Hackl, Ralph R.** Manager, R&D Laboratory, Giant Bay Biotech, Burnaby, British Columbia, Canada.
- Hader, Rodney N.** Secretary, American Chemical Society, Washington, D.C.
- Hadler, Jacques B.** Webb Institute of Naval Architecture, Glen Cove, New York.
- Hadley, Dr. Elbert H.** Assistant Dean (retired), College of Liberal Arts and Sciences, and Professor of Chemistry, Southern Illinois University.
- Hadni, A.** Laboratoire Infrarouge Lointain, Université de Nancy I, France.
- Hagan, Dr. Maura.** National Center for Atmospheric Research, Boulder, Colorado.
- Hagan, Dr. William J., Jr.** Department of Chemistry, College of St. Rose, Albany, New York.
- Hagar, Prof. Charles F.** Department of Physics and Astronomy, San Francisco State University.
- Hagen, Dr. John P.** Department of Astronomy, Pennsylvania State University.
- Haggerty, Dr. Stephen E.** Department of Geology and Geography, University of Massachusetts.
- Hagist, Prof. Warren M.** Retired; formerly, Department of Mechanical Engineering, University of Rhode Island.
- Hagood, Mel A.** Irrigated Agriculture Research and Extension Center, Washington State University.
- Hague, Wilbur.** Oxy Metal Industries Corporation, Warren, Michigan.
- Hahn, Dr. John F.** Department of Psychology, University of Virginia.
- Haile, Dr. William.** Swales Aerospace, Inc., Beltsville, Maryland.
- Hailpern, Dr. Brent T.** IBM Research Laboratory, Yorktown Heights, New York.
- Haines, John E.** Deceased; formerly, Vice President, Minneapolis-Honeywell Regulator Company.
- Haines, Prof. Malcolm G.** Blackett Laboratory, Imperial College of Science and Technology, London, England.
- Haines, Roger W.** Professional Engineer, Laguna Hills, California.
- Hainline, Bernard C.** Systems Technology, Boeing Commercial Airplane Company, Seattle, Washington.
- Halbedel, Dr. Elaine M.** Carralitos Observatory, Los Cruces, New Mexico.
- Halbouty, Dr. Michael T.** Consulting Geologist and Petroleum Engineer, Houston, Texas.
- Halde, Dr. Carlyn.** Department of Microbiology and Immunology, School of Medicine, University of California, San Francisco.
- Hale, Dr. Mason E., Jr.** Smithsonian Institution.
- Hales, Dr. Milton R.** Professor of Pathology, School of Medicine, West Virginia University.
- Halkias, Prof. Christos C.** Chair of Electronics, National Technical University, Athens, Greece.
- Hall, Prof. Dennis G.** Director, The Institute of Optics, University of Rochester, New York.
- Hall, Dr. Richard P.** Deceased; formerly, Professor of Zoology, University of California, Los Angeles.
- Hall, Prof. Robert.** Director, SE Asia Research Group, Department of Geology, University of London, Egham, Surrey, United Kingdom.
- Hallam, Dr. Anthony.** Department of Geology, University of Birmingham, England.
- Haller, Prof. Gary L.** Professor of Engineering and Applied Science, Jonathan Edwards College, Yale University, New Haven, Connecticut.
- Hallet, Dr. John.** Director, Atmospheric Ice Physics Laboratory, Desert Research Institute, Atmospheric Sciences Center, University of Nevada.
- Halliday, Dr. Alex.** Department of Geological Sciences, University of Michigan, Ann Arbor.
- Halstead, Dr. Thora Waters.** American Society of Gravitational and Space Biology, Arlington, Virginia.
- Halvorson, Dr. Harlyn O.** Department of Biochemistry, University of Minnesota.
- Hamad, Dr. Falk.** Department of Mechanical and Medical Engineering, University of Bradford, United Kingdom.
- Hamer, Dr. Walter J.** Institute for Basic Standards, National Bureau of Standards.
- Hamilton, Prof. C. Howard.** Department of Mechanical and Materials Engineering, Washington State University, Pullman.
- Hamilton, Dr. Howard L.** (Retired) Department of Biology, University of Virginia.
- Hamilton, Dr. John.** Gemini Observatory, Hilo, Hawaii.
- Hamilton, Dr. Joseph H.** Department of Physics-Astronomy, Vanderbilt University.
- Hamilton, Dr. Mark F.** Department of Mechanical Engineering, University of Texas, Austin.
- Hamilton, Dr. R. I.** Research Branch, Agriculture Canada, Vancouver, British Columbia, Canada.
- Hammar, Dr. Samuel P.** The Diagnostic Specialties Laboratory, Washington.
- Hammen, Dr. C. S.** Department of Zoology, University of Rhode Island.
- Hammer, Edward E.** Retired; formerly, Fluorescent and High Intensity Systems Department, General Electric Company, Cleveland, Ohio.
- Hammond, Prof. Edwin H.** Department of Geography, University of Tennessee.
- Hand, Dr. Cadet.** Bodega Marine Laboratory, University of California, Bodega Bay.
- Handsfield, Dr. H. Hunter.** Director, Sexually Transmitted Disease Control Program, Seattle-King County Public Health Department, Harborview Medical Center, Seattle, Washington.
- Haney, Dr. Robert L.** Department of Meteorology, Naval Postgraduate School, Monterey, California.
- Hang, Prof. C. C.** Centre for Intelligent Control, Department of Electrical Engineering, National University of Singapore.
- Hankley, Prof. William.** Department of Computing and Information Science, Kansas State University, Manhattan.
- Hanlin, Dr. Richard T.** Department of Plant Pathology, University of Georgia, Athens.
- Hanna, Dr. Michael.** Assistant Professor of Biology, Rensselaer Polytechnic Institute.
- Hanna, Dr. Steven R.** Sigma Research Corporation, Concord, Massachusetts.
- Hanor, Jeffrey S.** Department of Geology, Louisiana State University.
- Hansch, Dr. Theo W.** Department of Physics, Stanford University.

- Hansel, Dr. Ardith K.** Illinois State Geological Survey, Champaign.
- Hansen, Arthur G.** President, Georgia Institute of Technology.
- Hansen, Dr. John.** Department of Neurobiology and Anatomy, University of Rochester Medical Center.
- Hansen, Dr. Katherine J.** Department of Earth Sciences, Montana State University, Bozeman.
- Hanson, Prof. Allen L.** Department of Chemistry, Saint Olaf College.
- Hanson, Dr. Clarence H.** Agricultural Research Service, U.S. Department of Agriculture, Beltsville, Maryland.
- Hanson, Dr. Phyllis.** Department of Cell Biology and Physiology, Washington University School of Medicine, St. Louis, Missouri.
- Happer, Dr. William.** Department of Physics, Columbia University.
- Haq, Dr. Bilal U.** Department of Marine Geology and Geophysics, National Science Foundation, Washington, D.C.
- Hardesty, Egbert R.** Hardesty & Hanover, New York.
- Hardgrove, Ralph M.** Sales Engineer, Stock Equipment Company, Cleveland, Ohio.
- Hardy, Prof. John.** Cyclotron Institute, Texas A & M University, College Station.
- Hardy, Dr. John W.** Lexington, Massachusetts.
- Hare, Dr. Jonathan.** School of Chemistry and Molecular Sciences, University of Sussex, United Kingdom.
- Hargis, Dr. William J., Jr.** Department of Marine Science, University of Virginia.
- Harker, Dr. Robert I.** Department of Geology, University of Pennsylvania.
- Harleman, Dr. Donald R. F.** Department of Civil Engineering, Massachusetts Institute of Technology.
- Harman, Prof. Jay R.** Department of Geography, Michigan State University, East Lansing.
- Harper, Dr. Michael J. K.** Department of Obstetrics and Gynecology, University of Texas Health Science Center, San Antonio.
- Harrigan, Prof. Kevin.** TeleLearning Network of Centres of Excellence, Department of Computer Science, University of Waterloo, Ontario, Canada.
- Harrington, Roy L.** Newport News, Virginia.
- Harrington, Clifford.** Shaw Pittman, McLean, Virginia.
- Harris, Dr. Cyril M.** Professor of Electrical Engineering and Architecture, Department of Electrical Engineering, Columbia University.
- Harris, Denise B.** Senior Mechanical Engineer, Westinghouse Electronic Systems Group, Baltimore, Maryland.
- Harris, Dr. Forest K.** Electrical Measurements Laboratory, National Institute of Standards and Technology, Gaithersburg, Maryland.
- Harris, Dr. J.** Postgraduate School of Studies in Chemical Engineering, University of Bradford, England.
- Harris, Prof. J. Donald.** U.S. Navy Submarine Medical Laboratory, Groton, Connecticut.
- Harris, Dr. J. Milton.** Department of Chemistry, University of Alabama, Huntsville.
- Harris, Lawrence A.** Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Harris, Prof. Richard W.** Department of Environmental Horticulture, University of California, Davis.
- Harrison, David B.** Public Relations Department, Goodyear Tire and Rubber, Akron, Ohio.
- Harrison, Prof. Edward R.** Department of Physics and Astronomy, University of Massachusetts.
- Harrison, George R.** Deceased; formerly, Dean Emeritus, School of Science, Massachusetts Institute of Technology.
- Harrison, Prof. John P.** Department of Physics, Queen's University, Ontario, Canada.
- Harrison, Dr. Marcia.** Department of Biology, Washington University, St. Louis, Missouri.
- Harrison, Prof. Terry.** Department of Anthropology, New York University, New York.
- Harrison, Dr. Walter A.** Department of Applied Physics, Stanford University.
- Hart, Prof. Gerald W.** Chair, Department of Biochemistry and Molecular Genetics, University of Alabama, Birmingham.
- Hart, Dr. Harold.** Professor Emeritus, Department of Chemistry, Michigan State University.
- Hartley, Dr. A. M.** Department of Chemistry and Chemical Engineering, University of Illinois, Urbana.
- Hartman, Dr. Olga.** Deceased; formerly, Allan Hancock Foundation, University of Southern California.
- Hartman, Dr. Standish C.** Department of Chemistry, Boston University.
- Hartman, Dr. Willard D.** Associate Professor of Biology and Curator in Invertebrate Zoology, Peabody Museum of Natural History, Yale University.
- Hartmann, Dr. Dennis L.** Department of Atmospheric Sciences, University of Washington, Seattle.
- Hartmann, Prof. Dieter H.** Department of Physics and Astronomy, Clemson University, Clemson, South Carolina.
- Hartmann, Prof. Hudson T.** Pomology Extension, University of California, Davis.
- Hartmann, Dr. William M.** Michigan State University, Department of Physics, East Lansing.
- Hartstein, Dr. Jack.** Assistant Professor of Clinical Ophthalmology, Washington University School of Medicine; Chairman of Ophthalmology, Missouri Baptist Hospital, St. Louis.
- Hartung, Dr. Walter H.** Formerly, Professor of Pharmaceutical Chemistry, Medical College of Virginia.
- Hartwig, Dr. William H.** Department of Electrical Engineering, University of Texas, Austin.
- Harvey, Dr. E. Newton.** Deceased, formerly, Henry Fairfield Osborne Professor of Biology, Princeton University.
- Harvey, Dr. John A.** Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Harvey, Dr. Paul H.** Department of Zoology, University of Oxford, United Kingdom.
- Harvey, Dr. Philip D.** Professor of Psychiatry, Mount Sinai School of Medicine, New York.
- Hasey, Dr. Janine K.** Cooperative Extension, University of California, Yuba City.
- Hasler, Dr. Arthur D.** Laboratory of Limnology, University of Wisconsin.
- Hassialis, M. D.** Krumb School of Mines, Columbia University.
- Hassibi, Dr. Babak.** Information Systems Laboratory, Stanford University, Stanford, California.
- Hassid, Prof. William Z.** Deceased; formerly, Department of Biochemistry, University of California, Berkeley.
- Hastings, Dr. Alan.** Division of Environmental Studies, University of California at Davis.
- Hastings, Prof. J. Woodland.** Biological Laboratories, Department of Cellular and Development Biology, Harvard University.
- Hatsopoulos, Dr. George N.** Thermo Electron Corporation, Waltham, Massachusetts.
- Haug, John R.** Motorola, Schaumburg, Illinois.
- Hausner, Henry H.** Consulting Engineer, New York.
- Haut, Dr. Arthur.** Professor of Medicine, Division of Hematology and Oncology, University of Arkansas for Medical Sciences.
- Havens, Dr. Donald P.** Filter Products, Rockwell International Corporation, Costa Mesa, California.
- Hawkins, Dr. W. Lincoln.** Bell Laboratories, Murray Hill, New Jersey.
- Hawksworth, Dr. Frank G.** U.S. Forest Service, Fort Collins, Colorado.
- Hawley, Dr. R. Scott.** Department of Genetics, Section of Molecular and Cellular Biology, University of California at Davis.
- Hawthorne, Dr. Frank C.** Department of Geological Sciences, University of Manitoba, Winnipeg, Canada.
- Hay, Prof. George W.** Department of Chemistry, Queen's University, Ontario, Canada.
- Hayes, Dr. Dennis E.** Lamont-Doherty Geological Observatory, Columbia University, Palisades, New York.
- Hayes, Prof. John P.** Department of Electrical Engineering and Computer Science, University of Michigan, Ann Arbor.
- Hayes, Dr. Thomas L.** Donner Laboratory, University of California, Berkeley.
- Hayes, William C.** Formerly, Editor in Chief, "Electrical World," McGraw-Hill Publications Company, New York.

- Hayes-Roth, Dr. Frederick.** Executive Vice President, Technology, Teknowledge Inc., Palo Alto, California.
- Hayflick, Prof. Leonard.** Center for Gerontological Studies, University of Florida.
- Haynes, David O.** Deceased; formerly, Consulting Industrial Engineer, Tucson, Arizona.
- Hazel, Prof. Jeffrey R.** Department of Zoology, Arizona State University.
- Hazen, Prof. David C.** Department of Aerospace-Mechanical Science, Princeton University.
- Hazen, Richard.** Hazen and Sawyer, Consulting Engineers, New York.
- Hazen, Ronald.** Consultant (retired), Indianapolis, Indiana.
- Heaney, Dr. Peter J.** Department of Geological and Geophysical Sciences, Princeton University.
- Hearmon, R. F. S.** Formerly, Timber Mechanics Section, Forest Products Research Laboratory, Princes Risborough, Bucks, England.
- Hearn, Dr. C. Jack.** Research Geneticist, Horticultural Research Laboratory, U.S. Department of Agriculture, Orlando, Florida.
- Heath, Michelle.** Canadian Energy Research Institute, Calgary, Alberta, Canada.
- Heckel, Dr. P. H.** Department of Geology, University of Iowa.
- Hedger, Dr. Mark.** Institute of Reproduction and Development, Monash University, Clayton, Australia.
- Hedgpeth, Dr. Joel W.** Marine Science Center, Oregon State University.
- Heezen, Dr. Bruce C.** Deceased; formerly, Lamont-Doherty Geological Observatory, Palisades, New York.
- Hein, Dr. James R.** U.S. Geological Survey, Branch of Pacific Marine Geology, Menlo Park, California.
- Heiney, Prof. Paul A.** Department of Physics, University of Pennsylvania, Philadelphia.
- Heinrich, Dr. Bernd.** Division of Entomology and Parasitology, College of Natural Resources, University of California, Berkeley.
- Heinrich, Dr. E. William.** Department of Geology and Mineralogy, University of Michigan.
- Heinrikson, Dr. Robert L.** Department of Biochemistry, University of Chicago.
- Heinzel, Dr. Frederick P.** Department of Medicine, Division of Infectious Diseases, University of California, School of Medicine, San Francisco.
- Held, Dr. Gilbert.** Director, 4-Degree Consulting, Macon, Georgia.
- Heldman, Dr. Dennis R.** Executive Vice President, Scientific Affairs, National Food Processors Association, Washington, D.C.
- Helfman, Dr. Gene S.** Department of Zoology, University of Georgia.
- Hellmers, Dr. Henry.** Botany Department, Duke University.
- Helman, Marc L.** Department of Geological Sciences, University of Durham, England.
- Helmers, Dr. Carl J.** Vice President, Applied Automation, Inc., Bartlesville, Oklahoma.
- Henker, Kevin J.** Department of Materials Science and Engineering, Stanford University.
- Henriquez, Oscar.** California State University of Long Beach, Department of Civil Engineering, Long Beach, California.
- Henry, Dr. Alyson E.** Department of Psychology, University of Illinois, Chicago.
- Henry, Dr. Charles H.** Bell Laboratories, Murray Hill, New Jersey.
- Herakovitch, Prof. Carl T.** Civil Engineering and Applied Mechanics, University of Virginia, Charlottesville.
- Herber, Prof. Rolfe H.** Department of Chemistry, Rutgers University.
- Herberman, Dr. Ronald B.** Chief, Biological Development Branch, National Cancer Institute, Frederick Cancer Research Facility, Frederick, Maryland.
- Herbst, Dr. Jan F.** Physics Department, General Motors Research Laboratories, Warren, Michigan.
- Hermach, Dr. F. L.** National Institute of Standards and Technology, Gaithersburg, Maryland.
- Herman, C. J.** Consulting Engineer, Advanced Processes and Products, Insulating Materials Department, General Electric Co., Schenectady, New York.
- Herring, Dr. Thomas A.** Department of Earth, Atmospheric, and Planetary Sciences, Massachusetts Institute of Technology, Cambridge.
- Herron, Dr. Norman.** Central Research and Development, DuPont Research, Wilmington, Delaware.
- Hersey, Dr. John B.** Office of Naval Research, U.S. Department of the Navy.
- Hershkowitz, Prof. Noah.** Department of Nuclear Engineering, University of Wisconsin, Madison.
- Hershleider, William.** Consulting Construction Engineer, New York.
- Herz, Prof. Carl S.** Department of Mathematics, McGill University.
- Herzberger, Max J.** Deceased; formerly, Consulting Professor, Department of Physics, Louisiana State University.
- Herzog, Prof. Gregory F.** Department of Chemistry, Rutgers University, Piscataway, New Jersey.
- Hess, Garry C.** Motorola, Schaumburg, Illinois.
- Hess, Dr. Ronald A.** Department of Mechanical and Aeronautical Engineering, University of California, Davis.
- Hesseltine, Dr. C. W.** Fermentation Laboratory, Agricultural Research Service, U.S. Department of Agriculture, Peoria, Illinois.
- Hester, Dr. Jeff.** Department of Physics and Astronomy, Arizona State University, Tempe.
- Hewson, Dr. E. Wendell.** Chairman, Department of Atmospheric Sciences, Oregon State University.
- Heyn, Dr. A. N. J.** Department of Biological Sciences, Louisiana State University.
- Heyne, Prof. E. G.** Professor of Plant Breeding, Department of Agronomy, Kansas State University.
- Heyneman, Dr. Donald.** Chair, Health and Medical Sciences Program, University of California, Berkeley.
- Hibbard, Robert R.** Technical Consultant for Propulsion Chemistry Division, NASA Lewis Research Center, Cleveland, Ohio.
- Hickman, Dr. Howard M.** Section Manager, Research and Development, Sherex Chemical Company, Dublin, Ohio.
- Hicks, Dr. Bruce B.** Atmospheric Turbulence and Diffusion Division, National Oceanic and Atmospheric Administration, Oak Ridge, Tennessee.
- Hicks, Dr. Glenn R.** Associate Director, Plant Biotechnology, Exelixis Pharmaceuticals, South San Francisco, California.
- Hicks, Dr. Philip E.** President, Hicks & Associates, Consulting Industrial Engineers, Orlando, Florida.
- Hicks, Steacy D.** Sterling, Virginia.
- Hicks, Tyler G.** Formerly, Publisher, Professional and Reference Book Division, McGraw-Hill, Inc., New York.
- Hieftje, Dr. Gary M.** Department of Chemistry, Indiana University.
- Higgins, Dr. Robert P.** Curator, Department of Invertebrate Zoology, National Museum of Natural History, Smithsonian Institution.
- Hildebrand, Dr. Joel H.** Deceased; formerly, Department of Chemistry, University of California, Berkeley.
- Hill, Dr. Armin J.** Dean, College of Physical and Engineering Sciences, Brigham Young University.
- Hill, Prof. Dorothy.** Research Professor, Department of Geology and Mineralogy, University of Queensland, Brisbane, Australia.
- Hill, Prof. Edward L.** Deceased; formerly, Professor of Physics and Mathematics, School of Physics, University of Minnesota.
- Hill, Dr. Lawrence S.** Department of Management, California State University.
- Hill, Robert T.** Radar Consultant, Bowie, Maryland.
- Hill, Dr. Rolla B., Jr.** Professor and Chairman, Department of Pathology, Upstate Medical Center, Syracuse.
- Hilliard, Dr. Ron.** Optomechanics Research, Inc., Vail, Arizona.
- Hines, Dr. M. E.** Vice President, Microwave Associates, Inc., Burlington, Massachusetts.
- Hingorani, Dr. Narian G.** Electric Power Research Institute, Palo Alto, California.
- Hinrichs, Thomas C.** Vice President, Magma Power, San Diego, California.
- Hinsch, Dr. Gertrude W.** Department of Biology, University of South Florida.
- Hintz, Dr. Kenneth J.** Department of Electrical and Computer Engineering,

- George Mason University, Fairfax, Virginia.
- Hipel, Prof. Keith W.** Departments of Systems Design Engineering and Statistical Actuarial Science, University of Waterloo, Ontario, Canada.
- Hirschberg, Prof. Daniel S.** Information and Computer Science, University of California, Irvine.
- Hirschfelder, Dr. J. O.** Department of Chemistry, University of Wisconsin.
- Hitchman, Dr. Matthew H.** Department of Meteorology, University of Wisconsin, Madison.
- Hodgdon, Dr. James.** Naval Health Research Center, San Diego, California.
- Hodge, Prof. Paul.** Department of Astronomy, University of Washington, Seattle.
- Hodge, Prof. Philip.** Chair of Polymer Chemistry, Department of Chemistry, University of Manchester, England.
- Hodges, Prof. Kip.** Department of Earth, Atmospheric, and Planetary Sciences, Massachusetts Institute of Technology, Cambridge.
- Hodgin, David M.** Senior Member, Institute of Electrical and Electronics Engineers, Cedar Rapids, Iowa.
- Hodgson, Brain J.** C & P Telephone, Bell Atlantic Company, Washington, D.C.
- Hodos, Dr. William.** Department of Psychology, University of Maryland, College Park.
- Hoering, Dr. Thomas C.** Geophysical Laboratory, Carnegie Institution of Washington.
- Hoff, Prof. C. Clayton.** Department of Biology, University of New Mexico.
- Hoffman, Dr. Edward G.** Hoffman & Associates, Colorado Springs, Colorado.
- Hoffman, Dr. Paul.** Department of Earth and Planetary Sciences, Harvard University.
- Hoffman, Dr. Paul.** Department of Microbiology and Immunology, Faculty of Medicine, Dalhousie University, Halifax, Nova Scotia, Canada.
- Hoffman, Dr. Ralph E.** Yale Psychiatric Institute, School of Medicine, Yale University.
- Hoffman, Richard A.** Senior Staff Engineer, Martin Marietta Aerospace, Denver, Colorado.
- Hoffman, Prof. Richard L.** Department of Biology, Radford College.
- Hofstadter, Dr. Robert.** Department of Physics, Stanford University.
- Hogan, Dr. Brigid.** Mill Hill Laboratories, Imperial Cancer Research Fund, London.
- Hogan, Dr. Robert.** Department of Psychology, Johns Hopkins University.
- Hogg, Dr. Helen S.** David Dunlap Observatory, University of Toronto.
- Hoist, Per A.** Foxboro Company, Foxboro, Massachusetts.
- Hold, Dr. Robert D.** Museum of Natural History, University of Kansas.
- Holdaway, Dr. M. J.** Department of Geological Sciences, Southern Methodist University.
- Holdeman, Dr. Louis B.** Communications Satellite Corporation (COMSAT), Clarksburg, Maryland.
- Holder, Dr. Nigel.** Anatomy and Human Biology Group, Biomedical Sciences Division, Kings College, University of London.
- Holland, Dr. Timothy J. B.** Department of Mineralogy and Petrology, University of Cambridge, England.
- Hollowell, Eugene A.** Consultant in Agronomy, Port Republic, Maryland.
- Hollweg, Prof. Joseph V.** Space Science Center, University of New Hampshire.
- Holmes, Dr. Jack K.** Holmes Associates, Los Angeles, California.
- Holmes, Dr. Robert W.** Department of Biological Sciences, University of California, Santa Barbara.
- Holt, Dr. Donald L.** Monsanto Company, St. Louis, Missouri.
- Holt, Dr. Perry C.** Department of Biology, Virginia Polytechnic Institute.
- Holton, Dr. Gerald.** Department of Physics, Harvard University.
- Holton, Prof. James R.** Department of Atmospheric Sciences, University of Washington.
- Holtzman, Dr. Eric.** Deceased; formerly, Department of Biological Sciences, Columbia University.
- Homann, Prof. Peter H.** Institute of Molecular Biophysics, Florida State University.
- Hooke, Dr. Roger LeB.** Deer Isle, Maine.
- Hoover, J. Edgar.** Deceased; formerly, Director, Federal Bureau of Investigation, U.S. Department of Justice.
- Horan, Dr. Michael.** National Heart, Lung and Blood Institute, National Institutes of Health, Bethesda, Maryland.
- Horen, Dr. D. J.** Nuclear Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Horn, Dr. David J.** Department of Entomology, College of Agriculture, Ohio State University.
- Horsfall, Dr. James G.** Director, Connecticut Agricultural Experiment Station, New Haven.
- Horsnail, Dr. R. F.** Amax Exploration, Inc., Denver, Colorado.
- Horst, Dr. R. K.** Department of Plant Pathology, Cornell University.
- Horstadins, Prof. Sven.** Professor Emeritus of Zoology, University of Uppsala, Sweden.
- Horton, Prof. Derek.** Department of Chemistry, American University, Washington, D.C.
- Horton, G. A.** Manager, Engineering Laboratories, Westinghouse Electric Corporation, Cleveland, Ohio.
- Horton, Dr. William A.** Department of Pediatrics, Medical School, Health Science Center at Houston, University of Texas.
- Horwich, Dr. Arthur.** Yale University School of Medicine, Howard Hughes Medical Institute, New Haven, Connecticut.
- Hosford, Prof. William F.** Department of Materials Science and Engineering, College of Engineering, University of Michigan, Ann Arbor.
- Hotchkiss, Grosvenor.** Coordinating Engineer (retired), Western Union Telegraph Company, New York.
- Hotchkiss, Prof. Rollin D.** Department of Cellular Physiology, Rockefeller University.
- Hough, Dr. L. F.** Research Professor in Pomology, Department of Horticulture and Forestry, Rutgers University.
- Houghton, Dr. David D.** Department of Meteorology, University of Wisconsin, Madison.
- Hougie, Dr. Cecil.** Professor of Pathology, School of Medicine, University of California, San Diego.
- Howe, Prof. Carl E.** Deceased; formerly, Professor Emeritus of Physics, Oberlin College.
- Howell, Dr. Benjamin F., Jr.** Department of Geosciences, Pennsylvania State University.
- Howell, William E.** NASA Langley Research Center, Hampton, Virginia.
- Howells, Dr. T.** A Director of Continuing Education (retired), Institute of Paper Chemistry, Appleton, Wisconsin.
- Howells, Dr. William W.** Peabody Museum of Archeology and Ethnology, Harvard University.
- Hoxton, Prof. Llewellyn G.** Deceased; formerly, Professor Emeritus of Physics, University of Virginia.
- Hrones, Dr. John A.** Provost of Science and Technology, Case Western Reserve University.
- Hsieh, Dr. Samuel C.** Department of Computer Science, Southwestern Oklahoma State University, Weatherfort.
- Hu, Dr. A. S. L.** Department of Biochemistry, University of Kentucky.
- Hubbard, Dr. W. M.** Bell Communications Research (Bell-core), Red Bank, New Jersey.
- Hubert, Prof. John F.** Department of Geosciences, University of Massachusetts, Amherst.
- Hudlicky, Dr. Tomas.** Department of Chemistry, Illinois Institute of Technology.
- Hudson, Dr. Hugh S.** Institute of Space and Astronautical Science/Yohkoh, Sagamihara-shi, Kanagawa, Japan.
- Hudson, Dr. Ralph P.** Retired; formerly, Bureau International des Poids et Mesures, Sevres, France.
- Huebler, Dr. Jack.** Senior Vice President, Institute of Gas Technology, IIT Center, Chicago, Illinois.
- Huelsman, Prof. Lawrence P.** Department of Electrical and Computer Engineering, College of Engineering and Mines, University of Arizona.
- Huffman, E. O.** Consultant, Fertilizer Research and Development, Florence, Alabama.
- Hughes, Dr. John M.** Associate Dean, College of Arts and Science, Department of Geology, Miami University, Oxford, Ohio.

**Huizenga, Dr. John R.** Nuclear Structure Research Laboratory, University of Rochester.

**Hulbary, Dr. Robert L.** Department of Botany, University of Iowa.

**Hultsch, Dr. Roland A.** Department of Physics, University of Missouri.

**Humes, Dr. Arthur G.** Department of Biology, Boston University.

**Hummon, Dr. William D.** Department of Zoological and Biomedical Sciences, Ohio University.

**Hundhausen, Dr. Arthur J.** High Altitude Observatory, National Center for Atmospheric Research, Boulder, Colorado.

**Hungate, Prof. Robert E.** Department of Bacteriology, University of California, Davis.

**Hunter, Prof. Lloyd P.** Department of Electrical Engineering, University of Rochester.

**Hunter, Dr. R. H. F.** School of Agriculture, University of Edinburgh, Scotland.

**Huntington, Prof. H. B.** Department of Physics, Rensselaer Polytechnic Institute.

**Hurlbut, Prof. Cornelius S., Jr.** Professor of Mineralogy, Department of Geological Sciences, Harvard University.

**Hurley, Joseph D.** Westinghouse Electric Corporation, Orlando, Florida.

**Hurll, John.** Measurements Standards Laboratory, Marconi Instruments Ltd., Stevenage, Hertfordshire, England.

**Hurst, Dr. G. S.** Department of Physics, Oak Ridge National Laboratory, Oak Ridge, Tennessee.

**Hurst, Prof. James K.** Department of Biochemistry and Biophysics, Washington State University, Pullman.

**Hutcheon, Dr. Ian D.** Isotope Sciences Division, Lawrence Livermore National Laboratory, University of California, Livermore.

**Hutchinson, Prof. Ian H.** Massachusetts Institute of Technology, Plasma Science and Fusion Center, Cambridge, Massachusetts.

**Hutchison, Dr. Keith.** Department of Biology, Brandeis University.

**Hwang, Dr. Patrick.** Rockwell International, Cedar Rapids, Iowa.

**Hwang, Dr. Richard N.** Moh and Associates, Inc., Taipei, Taiwan.

**Hyde, Dr. Earl K.** Lawrence Berkeley Laboratory, University of California, Berkeley.

**Hyde, Dr. Geoffrey.** Retired; formerly, COMSAT Laboratories, Clarksburg, Maryland.

**Hynek, Dr. J. Allen.** Deceased; formerly, Department of Astronomy, Northwestern University.

## I

**Iachello, Dr. Franco.** Department of Physics, Yale University.

**Ibrahim, Dr. Aly M.** Agricultural Research Service, Western Region, U.S. Department of Agriculture, Salinas, California.

**Illis, Alexander.** Director, Process Technology, International Nickel Company of Canada, Ltd., Toronto, Ontario.

**Imai, Noriyoshi.** Toyo Ink Manufacturing Company, Tokyo, Japan.

**Imbembo, Prof. Anthony L.** Chairperson, Department of Surgery, University of Maryland Hospital, Baltimore.

**Ingels, Chuck A.** University of California Cooperative Extension, Sacramento.

**Ingersoll, Dr. Raymond V.** University of California at Los Angeles, Department of Earth and Space Science.

**Ingerson, Dr. Earl.** Department of Geology, University of Texas, Austin.

**Ingram, Dr. B. Lynn.** Department of Geology and Geophysics, University of California, Berkeley.

**Inman, Dr. Douglas L.** Professor of Oceanography, Scripps Institution of Oceanography, La Jolla, California.

**Irene, Dr. Eugene A.** Department of Chemistry, University of North Carolina.

**Ishida, Dr. Nakao.** Department of Bacteriology, Tohoku University School of Medicine, Sendai, Japan.

**Ishihara, Prof. Teruo.** Department of Mechanical and Aerospace Engineering, Rose Polytechnic Institute.

**Isley, Dr. Duane.** Department of Botany, Iowa State University.

**Israel, Dr. Yedy.** Department of Pharmacology, University of Toronto, Ontario, Canada.

**Issel, Dr. Charles J.** College of Agriculture, Veterinary Science, Gluck Equine Research Center, University of Kentucky, Lexington.

**Itano, Dr. Wayne M.** U.S. Department of Commerce, Time and Frequency Division, National Institute of Standards and Technology, Boulder, Colorado.

**Iverson, Dr. Brent L.** Department of Chemistry and Biochemistry, University of Texas, Austin.

**Ives, Dr. Anthony R.** Department of Zoology, University of Wisconsin, Madison.

**Izadian, Dr. Jamal S.** AntennaEM Communication, LLC, San Jose, California.

## J

**Jackiw, Prof. Roman.** Department of Physics, Massachusetts Institute of Technology.

**Jackson, Donald C.** Division of Biology and Medicine, Brown University.

**Jackson, G. A.** Deputy Division Manager, ERA Technology Ltd., Surrey, England.

**Jackson, Dr. Kenneth A.** AT&T Bell Telephone Laboratories, Murray Hill, New Jersey.

**Jackson, Dr. M. P. A.** Senior Research Scientist, Bureau of Economic Geology, University of Texas, Austin.

**Jackson, Dr. William D.** President, HMJ Corporation, Chevy Chase, Maryland.

**Jacobs, Prof. Stephen F.** Optical Sciences Center, University of Arizona.

**Jacobson, Prof. Nathan.** Department of Mathematics, Yale University.

**Jacobson, Dr. Robert.** Chief of the Clinical Branch, Department of Health and Human Services, Gillis W. Long Hansen's Disease Center, Carville, Louisiana.

**Jaep, William F.** Central Research Department, Experimental Station, E. I. du Pont de Nemours and Company, Wilmington, Delaware.

**Jafarey, Prof. S.** Behlen Laboratory of Physics, University of Nebraska.

**Jaffe, Prof. Robert L.** Department of Physics, Massachusetts Institute of Technology, Cambridge.

**Jahns, Dr. Richard H.** Department of Earth Sciences, Stanford University.

**Jain, Dr. P. C.** Central Electronics Engineering Research Institute, Pilani, India.

**Jain, Dr. Subodh K.** Department of Agronomy and Range Science, University of California, Davis.

**Jakobi, Prof. Hans.** Professor of Animal Physiology, Department of Zoology, University of Parana, Brazil.

**James, Prof. Arthur M.** Department of Chemistry, Bedford College, London, England.

**James, Dr. Gideon T.** Department of Earth Sciences, East Texas State University.

**James, John W.** Vice President, Research, McDonnell and Miller, Inc., Chicago, Illinois.

**James, Dr. Mark A.** Corriebruch House, Perthshire, United Kingdom.

**James, Dr. Richard W.** Head, Forecasting Branch, Oceanographic Prediction Division, U.S. Naval Oceanographic Office.

**Jamshidi, Dr. Mohamed.** Director, CAD Laboratory for Systems and Robotics, Department of Electrical and Computer Engineering, University of New Mexico.

**Janick, Prof. Jules.** Department of Horticulture, Purdue University.

**Janis, Dr. Christine.** Department of Ecology and Evolutionary Biology, Brown University, Providence, Rhode Island.

**Janna, Prof. William S.** Department of Mechanical Engineering, Memphis State University, Tennessee.

**Jannasch, Dr. Holger W.** Senior Scientist, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.

**Japikse, Dr. David.** President, Concepts ETI, Inc., Norwich, Vermont.

**Japuntich, Daniel A.** Occupational Health and Safety Products Division, 3M Company, St. Paul, Minnesota.

**Jarvis, J. Gordon.** Corporate Communications, Eastman Kodak Company, Rochester, New York.

**Jarvis, Dr. John F.** Robotics Systems Research Department, Bell Laboratories, Holmdel, New Jersey.

**Jeffries, Dr. R. P. S.** Department of Paleontology, British Museum of Natural History, London, England.

**Jegla, Dr. Dorothy E.** Department of Biology, Kenyon College, Gambier, Ohio.

**Jen, Dr. C. K.** Supervisor, Microwave Physics Group, Applied Physics Laboratory, Johns Hopkins University.

**Jenike, Andrew W.** Jenike & Johanson, Inc., North Billerica, Massachusetts.

**Jenike, Dr. Michael A.** Research Psychiatrist, Massachusetts General Hospital, Harvard Medical School.

**Jenkins, Prof. Francis A.** Deceased; formerly, Department of Physics, University of California, Berkeley.

**Jenkins, Dr. Julian L.** Director of Research, Bell Helicopter Company, Fort Worth, Texas.

**Jennings, Dr. Donald A.** Time and Frequency Division, National Institute of Standards and Technology, Boulder, Colorado.

**Jennings, Dr. J. B.** Department of Pure and Applied Zoology, University of Leeds, England.

**Jensen, Prof. Arthur R.** School of Education, University of California, Berkeley.

**Jensen, Dr. Howard B.** Research Supervisor, Laramie Energy Research Center, Energy Research and Development Administration, Wyoming.

**Jensen, Richard L.** Sirius Satellite Radio, New York.

**Jespersen, Dr. Neil D.** Department of Chemistry, St. John's University, New York.

**Joel, Amos E., Jr.** AT&T Bell Telephone Laboratories, Holmdel, New Jersey.

**Johansen, Dr. Kjell.** Department of Zoophysiology, University of Aarhus, Denmark.

**Johnson, Prof. Carl R.** Department of Chemistry, Wayne State University.

**Johnson, Dr. Donald Lee.** Department of Geography, University of Illinois, Urbana.

**Johnson, Dr. Edward.** Department of Cell Biology, Rockefeller University.

**Johnson, Dr. Ellis L.** Thomas J. Watson Research Center, IBM Corporation, Yorktown Heights, New York.

**Johnson, Dr. Francis S.** Acting President, University of Texas, Dallas.

**Johnson, Dr. Giles.** School of Biological Sciences, University of Manchester, United Kingdom.

**Johnson, Dr. James E.** Department of Chemistry, Texas Woman's University, Denton.

**Johnson, Dr. James G.** Department of Geology, Oregon State University.

**Johnson, Dr. Jon D.** Department of Forestry, University of Florida, Gainesville.

**Johnson, K. W.** President, Vibra-Grip Corporation, Jamestown, Ohio.

**Johnson, Philip C.** Research and Development Department, Chemicals and Plastics Operations Division, Union Carbide Corporation, South Charleston, West Virginia.

**Johnson, Dr. W. Hilton.** Department of Geology, University of Illinois, Urbana-Champaign.

**Johnson, Prof. Walter C.** Department of Electrical Engineering, Princeton University.

**Johnston, Dr. James D.** Senior Research Advisor, Pioneering Research, Ethyl Corporation, Baton Rouge, Louisiana.

**Johnston, Prof. Keith.** Department of Chemical Engineering, University of Texas, Austin.

**Joklik, Dr. W. K.** Department of Microbiology and Immunology, Duke University Medical Center.

**Jones, Prof. B. Frank, Jr.** Department of Mathematics, Weiss School of Natural Sciences, Rice University.

**Jones, Dr. Clive G.** Institute of Ecosystem Studies, New York Botanical Garden, Millbrook, New York.

**Jones, Dr. Daniel J.** Professor and Chairman, Department of Earth Sciences, California State College, Bakersfield.

**Jones, Dr. David R.** Department of Zoology, University of British Columbia, Canada.

**Jones, Dr. E. Ruffin.** Department of Zoology, University of Florida.

**Jones, Dr. Edwin C., Jr.** Department of Electrical and Computer Engineering, Iowa State University.

**Jones, Dr. Hugh D.** School of Biological Sciences, University of Manchester, United Kingdom.

**Jones, Dr. Jeremy B.** Department of Biological Sciences, University of Nevada, Las Vegas.

**Jones, Prof. Lawrence W. Harrison M.** Randall Laboratory of Physics, University of Michigan.

**Jones, Dr. Meredith L.** National Museum of Natural History, Smithsonian Institution, Washington, D.C.

**Jones, Dr. Morton E.** Director, Physical Sciences Research Laboratory, Texas Instruments, Inc., Dallas.

**Jones, Dr. Norman S.** Senior Lecturer, Marine Biological Station, University of Liverpool, England.

**Jones, Dr. Owen C.** Superintendent, Division of Electrical Science, National Physical Laboratory, Teddington, England.

**Jones, Dr. Patricia M.** Department of Mechanical and Industrial Engineering, University of Illinois, Urbana-Champaign.

**Jones, Prof. R. Alan.** School of Chemical Sciences, University of East Anglia, England.

**Jones, Dr. R. Gareth.** Division of Electrical Science, National Physical Laboratory, Teddington, England.

**Jones, Dr. Richard T.** Department of Biochemistry, University of Oregon Medical School.

**Joppa, Prof. Robert G.** Department of Aeronautics, University of Washington.

**Joravsky, Prof. David.** Professor of History, Northwestern University.

**Jordan, Dr. Elke.** Department of Health and Human Services, National Human Genome Research Institute, Bethesda, Maryland.

**Jory, Howard R.** Varian Associates, Palo Alto, California.

**Joseph, Earl C.** President, Planning and Development, Anticipatory Sciences Inc., Minneapolis, Minnesota.

**Joseph, Leonard M.** Lev Zetlin Associates, New York, New York.

**Joseph, Dr. Simpson.** Department of Chemistry and Biochemistry, University of California, La Jolla.

**Juang, Dr. Biing Hwang.** Lucent Technologies, Bell Laboratories, Murray Hill, New Jersey.

**Judd, Dr. Deane B.** Deceased; formerly, Office of Colorimetry, National Bureau of Standards.

**Judd, Dr. W. John.** Department of Pathology, University of Michigan, Ann Arbor.

**Judd, Dr. William R.** School of Civil Engineering, Purdue University.

**Juranek, Dr. Dennis D.** Center for Disease Control, Atlanta, Georgia.

**Jurisson, Dr. Silvia S.** Department of Chemistry, University of Missouri, Columbia.

**Just, Prof. Evan.** Department of Mining and Geology, Stanford University.

**Juvet, Prof. Richard S., Jr.** Department of Chemistry, Arizona State University.

## K

**Kaesler, Dr. Roger L.** Department of Geology, University of Kansas, Lawrence.

**Kahn, Dr. Bernd.** Environmental Resources Center, Georgia Institute of Technology, Atlanta.

**Kailath, Prof. Thomas.** Information Systems Laboratory, Stanford University, Stanford, California.

**Kaler, Prof. James B.** Department of Astronomy, College of Liberal Arts and Sciences, University of Illinois, Urbana-Champaign.

**Kalhammer, Dr. Fritz.** Electric Power Research Institute, Palo Alto, California.

**Kallen, Dr. Bengt.** Department of Embryology, University of Lund, Sweden.

**Kallio, Dr. R. E.** School of Life Sciences, University of Illinois, Urbana.

**Kalpakjian, Prof. Serope.** Mechanical and Aerospace Engineering Department, Illinois Institute of Technology.

**Kaminow, Dr. Ivan P.** Bell Telephone Laboratories, Holmdel, New Jersey.

**Kamrin, Dr. Michael A.** Center for Environmental Toxicology, Department of Pathology, Michigan State University.

**Kana, Dr. Todd M.** Horn Point Laboratory, Cambridge, Maryland.

**Kan-Mitchell, Dr. June.** School of Medicine, University of Southern California.

**Kanury, Dr. A. Murty.** Senior Mechanical Engineer, Stanford Research Center, Menlo Park, California.

- Kanzig, Prof. Werner.** Department of Physics, Massachusetts Institute of Technology.
- Kaplan, Dr. Louis.** Senior Chemist, Argonne National Laboratory, Argonne, Illinois.
- Kaplan, Robert A.** Vice President in Charge of Engineering, Automatic Burner Corporation, Chicago, Illinois.
- Kaplan, Prof. Thomas A.** Department of Physics and Astronomy, Michigan State University, East Lansing.
- Kapner, Robert S.** Department of Chemical Engineering, Cooper Union, New York.
- Kaprelian, Edward K.** Vice President and Technical Director, Keuffel and Esser Company, Morristown, New Jersey.
- Kapur, Prof. Kallash C.** Director, Industrial Engineering, University of Washington, Seattle.
- Karady, Dr. George G.** Department of Electrical Engineering, Arizona State University.
- Karash, Joseph I.** Manufacturing Engineer (retired), Reliance Electric Company, Wickliffe, Ohio.
- Kareiva, Prof. Peter.** Department of Zoology, University of Washington, Seattle.
- Karlson, Dr. Peter.** Institut für Physiologische Chemie, Philipps-Universität, Marburg, Germany.
- Karner, Dr. Garry D.** Lamont-Doherty Earth Observatory, Palisades, New York.
- Karni, Prof. Shlomo.** Department of Electrical and Computer Engineering, University of New Mexico.
- Karovska, Dr. Margarita.** Harvard-Smithsonian Center for Astrophysics, Cambridge, Massachusetts.
- Karp, Dr. Alan H.** IBM Scientific Center, Palo Alto, California.
- Katz, Dr. Jack L.** Department of Psychiatry, Montefiore Hospital and Medical Center, Bronx, New York.
- Katz, Dr. Joseph J.** Chemistry Division, Argonne National Laboratory, Argonne, Illinois.
- Katz, Dr. Leonard A.** Health Care Plan Medical Center, Buffalo, New York.
- Kaufmann, R. H.** Deceased; formerly, Consultant, Schenectady, New York.
- Kayan, Prof. Carl F.** Deceased; formerly, Department of Mechanical Engineering, School of Engineering, Columbia University.
- Kayden, Dr. Herbert J.** Department of Medicine, New York University School of Medicine, New York.
- Kays, Prof. John M.** Animal Industries Department, University of Connecticut.
- Keating, Richard E.** Time Service Division, U.S. Naval Observatory, Washington, D.C.
- Keddy, Prof. Rex J.** Schonland Research Center for Nuclear Sciences, University of Witwatersrand, Johannesburg, South Africa.
- Keefe, Dr. Richard S. E.** Department of Psychiatry, Duke University Medical Center, Durham, North Carolina.
- Keeton, Dr. William T.** Deceased; formerly, Professor and Chairman, Section of Neurobiology and Behavior, Langmuir Laboratory, Division of Biological Science, Cornell University.
- Keffer, Prof. Frederic.** Department of Physics, University of Pittsburgh.
- Keil, Dr. Stephen L.** Chief, Solar Research Branch, National Optical Astronomy Observatories, National Solar Observatory, Air Force Geophysics Laboratory, Sunspot, New Mexico.
- Keiser, Bernhard E.** President, Keiser Engineering, Inc., Vienna, Virginia.
- Keller, George V.** Department of Geophysics, Colorado School of Mines.
- Keller, Harold W.** Associate Professor, Department of Microbiology and Immunology, Wright State University.
- Keller, Dr. Joseph M.** Department of Physics, Iowa State University.
- Keller, Prof. Walter D.** Department of Geology, University of Missouri.
- Keller, Dr. William E.** Los Alamos Scientific Laboratory, Los Alamos, New Mexico.
- Kelley, Prof. Michael C.** Engineering and Theory Center, Cornell University.
- Kellogg, Dr. Douglas S.** Center for Disease Control, Atlanta, Georgia.
- Kells, Prof. Lyman M.** Deceased; formerly, Professor Emeritus, U.S. Naval Academy.
- Kelman, Dr. Arthur.** Department of Plant Pathology, University of Wisconsin.
- Kempers, Dr. Roger D.** Department of Obstetrics and Gynecology, Mayo Foundation, Mayo Graduate School of Medicine, Rochester, Minnesota.
- Kempainen, Prof. Robert J.** Department of Anatomy, Physiology and Pharmacology, Auburn University of Veterinary Medicine, Auburn, Alabama.
- Kendeigh, Dr. S. Charles.** Department of Zoology, University of Illinois, Urbana.
- Kenning, Dr. David B. B.** Department of Engineering Science, Oxford, United Kingdom.
- Kensler, Dr. Charles J.** Senior Vice President, Life Science Division, Arthur D. Little, Inc., Cambridge, Massachusetts.
- Kent, Dr. George C., Jr.** Professor Emeritus, Louisiana State University; Authors' Services, Inc., Baton Rouge, Louisiana.
- Ker, Dr. Robert F.** Department of Pure and Applied Biology, University of Leeds, United Kingdom.
- Kerr, Dr. Marilyn S.** Department of Biology, Syracuse University.
- Kerst, Prof. Donald W.** Department of Physics, University of Wisconsin.
- Kerstein, Prof. Morris. D.** Director, Graduate and Postgraduate Medical Education Programs, Department of Surgery, Hahnemann University, Philadelphia, Pennsylvania.
- Kessler, Prof. Edwin.** Director, National Severe Storms Laboratory, Norman, Oklahoma.
- Kessler, George W.** Vice President, Engineering and Technology, Power Generation Division, Babcock and Wilcox Company, Barberton, Ohio.
- Kester, Dr. Dale E.** Department of Pomology, College of Agriculture, University of California, Davis.
- Ketterle, Prof. Wolfgang.** Department of Physics, Massachusetts Institute of Technology, Cambridge.
- Ketterson, Dr. J. B.** Department of Physics, Northwestern University.
- Khan, Dr. Tanveer N.** Senior Plant Breeder, Division of Plant Industry, Western Australian Department of Agriculture.
- Kharasch, Prof. Norman.** Department of Biomedical Chemistry, University of Southern California.
- Kibble, Dr. Bryan P.** Division of Electrical Science, National Physical Laboratory, Teddington, Middlesex, England.
- Kilbey, Dr. Brian J.** Department of Genetics, Institute of Animal Genetics, University of Edinburgh, Scotland.
- Kilgore, Dr. Lee A.** Retired; formerly, Westinghouse Electric Corporation, East Pittsburgh, Pennsylvania.
- Kim, Prof. Chung W.** Department of Physics, Johns Hopkins University.
- Kimbark, Dr. Edward W.** Deceased; formerly, Head, Systems Analysis Group, Bonneville Power Administration, Portland, Oregon.
- Kinard, Joseph R.** Consultant, Darnestown, Maryland.
- Kindstedt, Dr. Paul S.** Agricultural Experiment Station, Department of Animal Sciences, University of Vermont, College of Agriculture and Life Sciences, Burlington.
- King, Dr. Bryan H.** Professor of Psychiatry and Pediatrics, Department of Psychiatry, Dartmouth Hitchcock Medical Center, Lebanon, New Hampshire.
- King, Dr. C. Judson.** Department of Chemical Engineering, University of California, Berkeley.
- King, Dr. Donald W., Jr.** Richard T Crane Professor of Pathology, Department of Pathology, University of Chicago.
- King, Dr. Elbert A.** Department of Geology, University of Houston.
- Kinnard, Dr. Isaac F.** Deceased; formerly, Manager of Engineering, Instrument Department, General Electric Company, Lynn, Massachusetts.
- Kinoshita, Prof. Toichiro.** Laboratory of Nuclear Studies, Cornell University.
- Kinsler, Prof. Lawrence E.** Professor of Physics, U.S. Naval Postgraduates School, Monterey, California.
- Kinsman, Prof. Blair.** College of Marine Studies, University of Delaware.
- Kirby, Dr. H. W.** Mound Facility, Monsanto Research Corporation, Miamisburg, Ohio.
- Kirby, Robert S.** Research Laboratories, NOAA, U.S. Department of Commerce, Boulder, Colorado.
- Kirby, Dr. Seth.** Dixon Spice Farms, Dixon, California.
- Kirk, Prof. Wiley P.** Department of Physics, Texas A & M University.

- Kirschner, Prof. Stanley.** Department of Chemistry, Wayne State University.
- Kissel, Dr. David E.** Department of Agronomy, Kansas State University.
- Kit, Dr. Saul.** Novagene Inc., Houston, Texas.
- Klein, Dr. Barbara P.** Department of Foods and Nutrition, University of Illinois.
- Klein, Cornelius.** Department of Geology, University of New Mexico.
- Klein, Dr. David H.** Department of Chemistry, Hope College.
- Klein, Dr. Jan.** Max Planck Insitut für Biologie, Abteilung Immunogenetik, Tubingen, Germany.
- Klein, Prof. Richard G.** Department of Anthropology, University of Chicago.
- Klein, Prof. Richard M.** Department of Botany, University of Vermont.
- Kleiner, Dr. Mendel.** Chalmers University of Technology, Applied Acoustics, Gotheberg, Sweden.
- Kleinsmith, Prof. Lewis J.** Division of Biological Sciences, University of Michigan.
- Klemens, Dr. Paul G.** Department of Physics, University of Connecticut.
- Klepper, Dr. David Lloyd.** Klepper Marshall King Associates, Inc., White Plains, New York.
- Kleppner, Prof. Daniel.** Department of Physics, Massachusetts Institute of Technology, Cambridge.
- Klich, Dr. Maren.** Microbiologist, Food and Feed Safety Research, U.S. Department of Agriculture–Agricultural Research Service, New Orleans, Louisiana.
- Klick, Dr. Clifford C.** Superintendent, Solid Sate Division, U.S. Naval Research Laboratory.
- Kliwer, Prof. K. L.** Department of Physics, Iowa State University.
- Klinger, Dr. Terry.** Friday Harbor Laboratories, Friday Harbor, Washington.
- Klivans, Dean S.** Rockwell International, El Segundo, California.
- Klock, Dr. Harold F.** Department of Electrical Engineering, Ohio University.
- Klutke, Dr. Georgia-Ann.** Associate Professor and Director, Institute for Manufacturing Systems, Department of Industrial Engineering, Texas A & M University, College Station.
- Knapp, Prof. Anthony W.** Department of Mathematics, Cornell University.
- Knebelman, Prof. Morris S.** Professor of Mathematics, Bucknell University.
- Knight, Dr. R. B. D.** Retired; formerly, Division of Electrical Science, National Physical Laboratory, Teddington, Middlesex, England.
- Knoteck, Dr. M. L.** Sandia National Laboratories, Albuquerque, New Mexico.
- Knowles, Prof. Paulden F.** Department of Agronomy and Range Science, University of California, Davis.
- Kobayashi, Dr. George.** Washington University School of Medicine, Saint Louis, Missouri.
- Kocan, Prof. Katherine M.** Department of Veterinary Pathology, Oklahoma State University, Stillwater.
- Koch, Prof. Arthur L.** Department of Biology, Indiana University.
- Koch, Dr. Peter M.** Department of Physics, State University of New York at Stony Brook.
- Koerker, Frederick W.** Technical Expert (retired), Dow Chemical Company, Midland, Michigan.
- Kogel, Dr. Jessica Elzea.** Thiele Kaolin Company, Sandersville, Georgia.
- Koglenik, Dr. Herwig.** Crawford Hill Laboratory, Bell Laboratories, Holmdel, New Jersey.
- Kohl, Arthur L.** Project Engineer, Advanced Development, Atomics International Division, North American Rockwell, Woodland Hills, California.
- Kohlmeier, Dr. Martin.** Department of Nutrition, University of North Carolina at Chapel Hill.
- Kohls, Dr. Glen M.** Sanitarian Director (retired), U.S. Public Health Service, Rocky Mountain Laboratory, Hamilton, Montana.
- Kohnhorst, Lloyd L.** Retired; formerly, Senior Research Specialist, Rockwell International, Columbus, Ohio.
- Koller, Dr. Noemie.** Department of Physics, Rutgers University.
- Kolvoord, Dr. Robert A.** College of Integrated Science and Technology, James Madison University, Harrisonburg, Virginia.
- Komai, Dr. Taku.** Professor Emeritus, Kyoto University, Japan.
- Kominz, Michelle.** Lamont-Doherty Geological Observatory, Palisades, New York.
- Koneman, Dr. Elmer W.** Department of Pathology, Denver Veterans Affairs Hospital, University of Colorado Medical School, Denver.
- Konigsberg, Dr. William H.** Department of Molecular Biophysics, Yale University.
- Konopka, Dr. Allan E.** Department of Biological Sciences, Purdue University.
- Konz, Dr. Stephan A.** Department of Industrial Engineering, Kansas State University.
- Konzo, Prof. Seichi.** Department of Mechanical Engineering, University of Illinois.
- Koopman, Dr. Karl F.** Department of Mammalogy, American Museum of Natural History, New York.
- Koral, Dr. Richard L.** Visiting Associate Professor, Pratt School of Architecture; Coordinator, Apartment House Institute, New York City Community College.
- Korth, Dr. Henry F.** Head, Database Principles Research, Murray Hill, New Jersey.
- Korth, Dr. William W.** Rochester Institute of Vertebrate Paleontology, Penfield, New York.
- Korus, Dr. Roger A.** Chairperson, Department of Chemical Engineering, College of Engineering, Buchanan Engineering Laboratory, University of Idaho.
- Kosikowski, Prof. Frank V.** Department of Food Science, Cornell University.
- Kosow, Dr. Irving L.** Series Editor, Electrical Engineering Technology, John Wiley & Sons, Marietta, Georgia.
- Kotter, Dr. F. Ralph.** National Bureau of Standards.
- Kovar, Dr. Dennis.** Hahn-Meitner Institut für Kernforschung, Berlin, Germany.
- Kow, Dr. Yoke Wah.** Department of Biochemistry, University of Wisconsin.
- Kowal, Dr. Charles T.** Department of Astrophysics, California Institute of Technology.
- Kraehenbuehl, Prof. John O.** Professor Emeritus of Electrical Engineering, University of Illinois, Urbana.
- Kramar, Dr. Ernst.** Deceased; formerly, Standard Elektrik Lorenz Aktien-gesellschaft, Stuttgart, Germany.
- Krasan, Dr. Graham P.** Lecturer in Pediatrics and Communicable Diseases, University of Michigan Medical School, Ann Arbor.
- Krauss, Prof. George.** Colorado School of Mines, Golden.
- Krauss, Dr. Lawrence M.** Center for Theoretical Physics, Yale University.
- Kreek, Dr. Mary Jeanne.** Rockefeller University.
- Krefeld, Prof. William J.** Deceased; formerly, Professor of Civil Engineering, Columbia University.
- Kreilik, Dr. Robert.** Department of Chemistry, University of Rochester.
- Kretschmann, Dr. David E.** Forest Products Laboratory, U.S. Department of Agriculture Forest Service, Madison, Wisconsin.
- Kreutel, Dr. Randall W.** Mechanical Engineering Manager, Atlanta Instrumentation Division, Atlanta, Georgia.
- Krider, Prof. E. Philip.** Director, Institute of Atmospheric Physics, University of Arizona.
- Krishnamurti, Dr. T. N.** Department of Meteorology, Florida State University.
- Kristensen, Dr. Reinhardt Møbjerg.** Zoological Museum, University of Copenhagen, Denmark.
- Kristofferson, Karl.** Public Information Branch, John F. Kennedy Space Center, Cape Canaveral, Florida.
- Krol, Dr. Edward.** Department of Computer Science, University of Illinois, Urbana.
- Krombein, Dr. Karl V.** Chairman, Department of Entomology, National Museum of Natural History, Smithsonian Institution.
- Kroto, Harold W.** School of Chemistry and Molecular Sciences, University of Sussex, United Kingdom.
- Kruse, Dr. Paul W.** Consultant, Infrared Technology, Edina, Minnesota.
- Krusius, Prof. Matti.** Low Temperature Laboratory, Helsinki University of Technology, Finland.

- Kryter, Dr. Karl D.** Director, Sensory Sciences Research Center, Stanford Research Institute, Menlo Park, California.
- Krzysztofowicz, Dr. Roman.** Department of Systems Engineering, University of Virginia.
- Kuchner, Dr. Marc J.** Department of Astronomy, California Institute of Technology, Pasadena, California.
- Kudo, Prof. Albert M.** Department of Earth and Planetary Sciences, University of New Mexico, Albuquerque.
- Kuhn, Dr. Wayne E.** Professional Engineer, Portland, Oregon.
- Kuis, Wietse.** Department of Molecular and Experimental Medicine, Research Institute of Scripps Clinic, La Jolla, California.
- Kulkarni, Prof. Shrinivas.** Department of Astronomy, California Institute of Technology, Pasadena, California.
- Kulkarni, Sudhir S.** Corporate Research Center, UOP Inc., Des Plaines, Illinois.
- Kullerud, Dr. Gunnar.** Department of Geosciences, Purdue University.
- Kulp, J. Laurence.** President, Teledyne Isotopes, Westwood, New Jersey.
- Kuntz, Glenn.** Regional Director, ETI of North America, Inc., Washington, D.C.
- Kunz, Dr. Kaiser S.** Research Professor of Physics, New Mexico State University.
- Kuo, Dr. Benjamin C.** Formerly, Department of Electrical Engineering, University of Illinois, Champaign.
- Kuo, Prof. John T.** Department of Mining Engineering, Columbia University.
- Kupchan, Prof. S. Morris.** Deceased; formerly, Department of Chemistry, University of Virginia.
- Kupke, Dr. Donald W.** Department of Biochemistry, School of Medicine, University of Virginia.
- Kupper, Dr. Walter E.** Manager, Technical Marketing Services, Mettler Instrument Corporation, Hightstown, New Jersey.
- Kusch, Prof. Polykarp.** Department of Physics, Columbia Radiation Laboratory, Columbia University.
- Kushner, Dr. D. J.** Department of Microbiology, University of Toronto, Ontario, Canada.
- Kusters, Dr., N. L.** Division of Electrical Engineering, National Research Council, Ottawa, Ontario, Canada.
- Kutal, Dr. Charles.** Department of Chemistry, University of Georgia.
- Kutzbach, Prof. John E.** Department of Meteorology, University of Wisconsin.
- Laarhoven, Prof. William H.** Department of Organic Chemistry, University of Nijmegen, The Netherlands.
- Labandeira, Dr. Conrad C.** Department of Paleobiology, National Museum of Natural History, Smithsonian Institution, Washington, DC.
- LaBerge, Dr. Stephen.** Department of Psychology, Stanford University, Stanford, California.
- Labi, Prof. Samuel.** Graduate Research Assistant, Purdue University, Civil Engineering, West Lafayette, Indiana.
- Labotka, Dr. Theodore C.** Department of Geological Sciences, College of Liberal Arts, University of Tennessee.
- Lacis, Dr. Andrew A.** NASA Goddard Institute for Space Studies, New York.
- Lackman, Dr. Leslie. M.** Rockwell International, El Segundo, California.
- Ladd, Dr. Carll.** Connecticut State Police Forensic Science Laboratory, Meriden.
- Ladd, Dr. Harry S.** (Retired) National Museum, Smithsonian Institution.
- LaFrey, Raymond R.** Lincoln Laboratory, Massachusetts Institute of Technology, Lexington.
- Lagler, Prof. Karl F.** School of Natural Resources, University of Michigan.
- Lagowski, Dr. J. J.** Department of Chemistry, University of Michigan.
- Lagunoff, Dr. David.** Department of Pathology, School of Medicine, University of Washington.
- Laidler, Dr. James J.** Director, Chemical Technology Division, Argonne National Laboratory, Argonne, Illinois.
- Laitinen, Prof. Herbert A.** Department of Chemistry, University of Florida.
- Lam, Dr. Stephen W.** Center for Excellence for Document Analysis and Recognition, University of Buffalo, Amherst, New York.
- Lamb, Prof. Dennis.** Department of Meteorology, Pennsylvania State University.
- Lamb, Prof. Richard C.** Space Radiation Laboratory, California Institute of Technology, Pasadena.
- Lambert, Dr. Jack L.** Department of Chemistry, Kansas State University.
- Lambert, Dr. Samuel.** Air Force Research Laboratory, Munition Directorate, Eglin Air Force Base, Florida.
- Lambert, Dr. W. David.** Louisiana School of Math, Science, and the Arts, Natchitoches.
- LaMotte, Dr. Clifford E.** Botany Department, Iowa State University.
- LaMotte, Dr. Robert.** Department of Anesthesiology, School of Medicine, Yale University.
- Land, Dr. Cecil E.** Sandia Laboratories, Kirtland Air Force Base East, Albuquerque, New Mexico.
- Landes, Dr. Hugh S.** Department of Electrical Engineering, University of Virginia.
- Landsberg, Dr. H. E.** Deceased; formerly, Institute for Physical Science and Technology, University of Maryland.
- Lane, Dr. John C.** Research and Development Department, Research Laboratories, Ethyl Corporation, Ferndale, Michigan.
- Lane, Dr. Meredith A.** Director, University of Kansas Herbarium, Lawrence.
- Lane, Dr. N. Gary.** Indiana University.
- Lanford, Dr. Pamela.** National Institute on Deafness and Other Communication Disorders, Rockville, Maryland.
- Lanford, Prof. William A.** Department of Physics, State University of New York, Albany.
- Lang, Dr. Anton.** Department of Botany, MUS-DOE Plant Research Laboratory, Michigan State University.
- Lang, Dr. Karl.** Director, Department of Invertebrates, Swedish State Museum of Natural History, Stockholm, Sweden.
- Langenberg, Prof. D. N.** Department of Physics, University of Pennsylvania.
- Langenheim, Prof. Jean H.** Division of Natural Sciences, University of California, Santa Cruz.
- Langford, Prof. George M.** Department of Biological Sciences, Dartmouth University.
- Lapedes, Daniel N.** Deceased; formerly, Editor in Chief, "McGraw-Hill Encyclopedia of Science and Technology," McGraw-Hill, Inc., New York.
- Laport, Edmund A.** Director, Communications Engineering, RCA, Princeton, New Jersey.
- Lappin-Scott, Hilary.** Department of Biology, University of Calgary, Alberta, Canada.
- Lapple, Charles E.** Consultant (retired), Fluid and Particle Technology, Air Pollution and Chemical Engineering, Los Altos, California.
- Larimer, Dr. J. L.** Department of Zoology, University of Texas, Austin.
- Larive, Dr. Cynthia K.** Department of Chemistry, University of Kansas, Lawrence.
- Larsen, Dr. David M.** Department of Physics and Applied Physics, University of Lowell, Massachusetts.
- Larsen, Prof. Edwin M.** Department of Chemistry, University of Wisconsin.
- Larsen, Dr. R. Paul.** Superintendent and Horticulturist, Tree Fruit Research Center, Washington State University.
- Larsen, Dr. Robert G.** Assistant to the Vice President, Shell Development Company, Emeryville, California.
- Larson, Dr. Roy A.** Department of Horticulture, North Carolina State University.
- Lass, Dr. Harry.** Research Specialist, Jet Propulsion Laboratory, California Institute of Technology.
- Lassila, Prof. Kenneth E.** Department of Physics, Iowa State University.
- Last, Prof. John M.** Faculty of Health Sciences, School of Medicine/Epidemiology and Community Medicine, University of Ottawa, Ontario, Canada.
- Latanision, Prof. R. M. H. H.** Ublig Corrosion Laboratory, Department of Materials Science and Engineering, Massachusetts Institute of Technology.
- Latham, Dr. David W.** Center for Astrophysics, Cambridge, Massachusetts.
- Lathl, Prof. B. P.** Department of Electrical and Electronic Engineering, California State University, Sacramento.

## L

- Lattman, Dr. Laurence H.** Dean of Mines, University of Utah.
- Laves, Dr. Friz H.** Deceased; formerly, Eidgenössische Technische Hochschule, Institut für Kristallographie und Petrographie, Zurich, Switzerland.
- Lavin, Prof. Stephen.** Department of Geography, University of Nebraska, Lincoln.
- Lavoie, Dr. Ronald L.** Chief, Program Requirements and Development Division, U.S. Department of Commerce, National Oceanic and Atmospheric Administration, Silver Spring, Maryland.
- Lawley, Dr. Alan.** College of Engineering, Drexel University.
- Lawrence, Dr. J. Dennis.** Lawrence Livermore Laboratory, University of California.
- Layton, Dr. J. Preston.** Deceased; formerly, RCA Astro-Electronics, Conceptual Design, Princeton, New Jersey.
- Layzer, Prof. David.** Department of Astronomy, Harvard University.
- Lazadder, Prof. Warren J.** Department of Engineering Graphics, Purdue University.
- Lazarides, Dr. E.** Department of Biology, California Institute of Technology.
- Leach, Dr. Richard E.** Fellow, Reproductive Endocrinology and Fertility, Department of Obstetrics and Gynecology, Mayo Graduate School of Medicine, Rochester, New York.
- Leach, Prof. William Marshall, Jr.** School of Electrical and Computer Engineering, Georgia Institute of Technology, Atlanta.
- Leadbetter, Prof. E. R.** Department of Biology, Amherst College.
- Leader, Dr. Robert W.** Center for Environmental Toxicology, Department of Pathology, Michigan State University.
- Lebowitz, Dr. Michael D.** Professor of Medicine and Associate Center Director, Respiratory Sciences Center, University of Arizona.
- LeBuhn, Dr. Gretchen.** Department of Biological Sciences, Florida State University, Tallahassee.
- Ledig, Dr. F. Thomas.** School of Forestry, Yale University.
- Lee, Prof. David M.** Department of Physics, Cornell University; Nobelist.
- Lee, Dorothy B.** Lyndon B. Johnson Space Center, National Aeronautics and Space Administration.
- Lee, Dr. Henry C.** Director, Connecticut State Police Forensic Laboratory, and Commissioner, Department of Public Safety, Middletown, Connecticut.
- Lee, Dr. J. T.** Cooperative Institute for Mesoscale Meteorological Studies, National Oceanic and Atmospheric Administration, University of Oklahoma.
- Lee, Lyndon C. L. C. Lee & Associates, Inc.,** Seattle, Washington.
- Lee, Dr. Roberto.** Monsanto Company, St. Louis, Missouri.
- Lee, Prof. T. H.** Centre for Intelligent Control, Department of Electrical Engineering, National University of Singapore.
- Lee, Dr. Tae Young.** Department of Chemistry, Seoul National University, Seoul, Korea.
- Lee, Dr. Thomas H.** Strategic Planning Operation, General Electric Company, Fairfield, Connecticut.
- Lee, Dr. W. John.** Professor and L. F. Peterson Chair, Department of Petroleum Engineering, Texas A & M University, College Station.
- Leete, Prof. Edward.** Deceased; formerly, Department of Chemistry, University of Minnesota.
- Lefkowitz, Prof. Irving.** Systems Engineering Department, Case Western Reserve University.
- Legget, Prof. Anthony.** Department of Physics, University of Illinois, Urbana.
- Lehiste, Prof. Use.** Department of Linguistics, Ohio State University.
- Lehmann, Prof. Justus F.** Department of Rehabilitation Medicine, School of Medicine, University of Washington, Seattle.
- Lehn, Prof. Jean-Marie.** Collège de France, Paris, and Institut de Science et Ingénierie Supramoléculaires-Université Louis Pasteur, Strasbourg, France; Nobelist.
- Lehto, Dr. Mark R.** School of Industrial Engineering, Purdue University.
- Leibovich, Prof. Sidney.** Mechanical & Aerospace Engineering, Cornell University.
- Leigh, Dr. Hoyle.** Department of Psychiatry, University of California, San Francisco, and Director, Fresno Division, Fresno, California.
- Leland, Dr. Henry.** Department of Psychology, Ohio State University.
- Leland, Dr. Jonathan K.** IGEN, Inc., Rockville, Maryland.
- Lemont, Prof. Harvey.** Chairman, Department of Podiatric Medicine, Pennsylvania College of Podiatric Medicine, Philadelphia.
- Lenel, Dr. F. V.** Professor Emeritus, Department of Materials Engineering, Rensselaer Polytechnic Institute.
- Lennert, Richard.** Department of Chemical Engineering, University of Texas, Austin.
- Le Noble, Dr. William J.** Department of Chemistry, State University of New York, Stony Brook.
- Leon, Prof. Roberto T.** Roswell, Georgia.
- Leonard, Dr. Edward F.** Chemical Engineering Department, Columbia University.
- Leontis, Dr. Thomas E.** Magnesium Research Center, Battelle Columbus Laboratories, Columbus, Ohio.
- Leopold, Dr. Luna B.** Department of Geology and Geophysics, University of California, Berkeley.
- Lepard, Paul E.** Mettler Instrument Corporation, Hightstown, New Jersey.
- Lerner, Dr. I. Michael.** Department of Genetics, University of California, Berkeley.
- Lerner-Lam, Dr. Art.** Lamont-Doherty Geological Observatory of Columbia University, Palisades, New York.
- Lesins, Dr. Glen.** Department of Oceanography, Dalhousie University, Halifax, Nova Scotia, Canada.
- Lesso, Dr. William G.** Department of Mechanical Engineering, University of Texas, Austin.
- Levasheff, V. V.** American Potash and Chemical Corporation, Whittier, California.
- Levi, Prof. Herbert W.** Curator in Arachnology, Museum of Comparative Zoology, Agassiz Museum, Harvard University.
- Levine, Dr. I. E.** Chevron Research Company, Richmond, California.
- Levine, Prof. Ira N.** Department of Chemistry, Brooklyn College.
- Levine, Dr. Norman D.** College of Veterinary Medicine, University of Illinois, Urbana.
- Levine, Dr. Rachmiel.** City of Hope National Medical Center, Duarte, California.
- Levitan, Dr. Max.** Department of Cell Biology, Mount Sinai School of Medicine, New York.
- Lew, Dr. I. Paul.** Thornton-Tomasetti, Engineers, New York, New York.
- Lewandowski, Dr. Scott M.** Department of Computer Science, Brown University, Providence, Rhode Island.
- Lewis, Dr. Alcinda C.** Institute of Ecosystem Studies, New York Botanical Garden, Millbrook.
- Lewis, Prof. Edward B.** Department of Biology, California Institute of Technology; Nobelist.
- Lewis, Frank D.** Consultant, Lexington, Massachusetts.
- Lewis, Dr. Frank L.** School of Electrical Engineering, Georgia Institute of Technology.
- Lewis, Dr. James K.** Department of Animal Science, South Dakota State University.
- Lewis, Dr. John H.** Pratt & Whitney, East Hartford, Connecticut.
- Lewis, Prof. M. J.** Department of Food Science and Technology, University of California, Davis.
- Lewis, Dr. Richard S.** Department of Psychology, Pomona College, Claremont, California.
- Leventis, Nicholas.** Department of Chemistry, University of Missouri, Rolla.
- Ley, Dr. Willy.** Deceased; formerly, Fairleigh Dickinson University.
- Li, Dr. Ching Chun.** Graduate School of Public Health, University of Pittsburgh.
- Li, Prof. Choh Hao.** Deceased; formerly, Hormone Research Laboratory, University of California Medical Center, San Francisco.
- Li, Norman N.** Director, Separations Research, UOP Inc., World Headquarters, Des Plaines, Illinois.
- Lichtenberg, Dr. Don B.** Department of Physics, Indiana University.
- Liddicoat, Richard T., Jr.** Gemological Institute of America, Los Angeles, California.

- Liebman, Dr. Joel F.** Department of Chemistry and Biochemistry, University of Maryland, Baltimore.
- Liedholm, George E.** Department Head (retired), Petroleum Processing, Shell Development Company, Emeryville, California.
- Lieth, Dr. Helmut.** Department of Biochemistry, University of North Carolina.
- Liggett, Prof. James A.** School of Civil and Environmental Engineering, Cornell University, Ithaca, New York.
- Likens, Prof. Gene E.** Director, Institute of Ecosystem Studies, The New York Botanical Garden, Millbrook, New York.
- Liley, Prof. Peter E.** Lafayette, Indiana.
- Limpel, Eugene J.** Consulting Electrical Engineer, Eagle River, Wisconsin.
- Lin, Wen-Hwang.** Rocketdyne Propulsion & Power, The Boeing Company, Canoga Park, California.
- Linde, Dr. Ronald K.** President, Envirodyne, Inc., Los Angeles, California.
- Lindenmaier, Dr. Werner A.** Hoffmann-LaRoche, Inc., Nutley, New Jersey.
- Linderorth, Prof. L. Sigfred, Jr.** (Retired) Department of Mechanical Engineering, Duke University.
- Lindner, Dr. Hans R.** Department of Biodynamics, Weizmann Institute of Science, Rehovoth, Israel.
- Lindsey, J. S.** Liquid Carbonic Corporation, Chicago, Illinois.
- Lindsay, Prof. R. Bruce.** Deceased; formerly, Hazard Professor of Physics, Emeritus, Brown University.
- Lindzen, Prof. Richard S.** Center for Meteorology and Physical Oceanography, Massachusetts Institute of Technology.
- Lineback, Dr. David R.** Department of Food Science, North Carolina State University.
- Lineberger, Dr. W. C.** Joint Institute for Laboratory Astrophysics, National Institute for Standards and Technology, University of Colorado.
- Lines, Malcom E.** Bell Telephone Laboratories, Murray Hill, New Jersey.
- Linskey, Dr. Jeffrey.** Department of Astrophysics, University of Colorado, Boulder.
- Linsley, Prof. Ray K.** Department of Civil Engineering, Stanford University.
- Linthicum, Jack M.** Office of Science and Technology, Federal Communications Commission.
- Liou, Dr. J. G.** Department of Earth and Planetary Sciences, Tokyo Institute of Technology, Japan.
- Liou, Juhn G.** Department of Geology, Stanford University.
- Liou, Prof. Kuo-Nan.** Department Chair, Department of Atmospheric Sciences, University of California, Los Angeles.
- Lipin, Bruce R.** U.S. Department of the Interior, Reston, Virginia.
- Lipkens, Dr. Bart.** Assistant Professor, Department of Mechanical Engineering, Virginia Commonwealth University, Richmond, Virginia.
- Lipkowitz, Prof. Kenneth B.** Department of Chemistry, Indiana-Purdue University, Indianapolis.
- Lipner, Prof. Harry J.** Department of Biological Science, Florida State University.
- Lipshutz, Prof. Bruce H.** Department of Chemistry, University of California, Santa Barbara.
- Lister, Prof. C. J. A. W.** Wright Nuclear Structure Laboratory, Physics Department, Yale University.
- Litherland, Prof. Albert E.** Director, Isotrace Laboratory, Department of Physics, University of Toronto, Ontario, Canada.
- Little, Elbert L., Jr.** Dendrologist, Forest Service, U.S. Department of Agriculture.
- Little, Dr. James N.** Research Division, Waters Associates, Milford, Massachusetts.
- Liu, Benjamin Y. H.** Department of Mechanical Engineering, University of Minnesota.
- Liu, Prof. Clark C. K.** Department of Civil Engineering, University of Hawaii at Manoa.
- Liu, Dr. Sam H.** Department of Physics, Iowa State University.
- Liu, Dr. Tanzhuo.** Lamont-Doherty Earth Observatory, Columbia University, Palisades, New York.
- Livingston, Dr. William C.** National Optical Astronomy Observatories, National Solar Observatory, Tucson, Arizona.
- Ljung, Dr. Donovan A.** Fermi National Accelerator Laboratory, Batavia, Illinois.
- Lochhead, Dr. Allan G.** Microbiology Research Institute, Canada Department of Agriculture, Ottawa, Ontario.
- Lochhead, Dr. John H.** London, England.
- LoCicero, Prof. Joseph L.** Illinois Institute of Technology, Electrical and Computer Engineering Department, Chicago.
- Lockhart, Prof. Frank J.** Department of Chemical Engineering, University of Southern California.
- Loeb, John L.** ACLS Corporation, Silver Spring, Maryland.
- Loeblich, Dr. Alfred R., Jr.** Department of Earth and Space Sciences, University of California, Los Angeles.
- Loewenstein, Dr. Werner R.** College of Physicians and Surgeons, Columbia University.
- Loftus, Dr. Douglas J.** Laboratory of Cell Biology, National Cancer Institute, Bethesda, Maryland.
- Loftus, Prof. Elizabeth F.** Professor of Psychology, Department of Psychology, University of Washington, Seattle.
- Logan, Prof. Earl, Jr.** Department of Aerospace and Mechanical Engineering, Arizona State University, Tempe.
- Loneragan, Prof. J. F.** School of Environmental and Life Science, Murdoch University, Perth, Australia.
- Long, Prof. Franklin A.** Formerly, Department of Chemistry, Cornell University.
- Long, Joseph B.** Consultant, Columbus, Ohio.
- Longacre, Alan.** (Retired) Fluor Engineers and Constructors, Irvine, California.
- Longmoore, Dr. Kenneth.** Department of Chemistry, University of Massachusetts.
- Longo, Dr. Dan L.** Director, National Cancer Institute, Frederick Cancer Research Facility, Maryland.
- Longo, Luca.** Instituto Guido Donegani, EniChem, Polymeric Materials Department, Novara, Italy.
- Lonngren, Prof. Karl E.** Department of Electrical and Computer Engineering, University of Iowa, Iowa City.
- Lonsdale, Dr. Carol J.** Infrared Processing & Analysis Center, California Institute of Technology, Pasadena.
- Lonsdale, Dr. Peter.** Scripps Institution of Oceanography, La Jolla, California.
- Loope, Dr. David B.** Department of Geology, University of Nebraska Medical Center.
- Lopiano, Dr. Michael.** Chairman, Public Information Committee, American College of Radiology, Reston, Virginia.
- Lopresti, Dr. Philip V.** Retired; formerly, Engineering Research Center, AT&T Bell Laboratories, Princeton, New Jersey.
- Lorand, Dr. L.** Department of Biochemistry and Molecular Biology, Northwestern University.
- Lord, Prof. Richard C.** Department of Chemistry, Massachusetts Institute of Technology.
- Lordi, George M.** Department of Medicine, College of Medicine and Dentistry, Newark, New Jersey.
- Lorenz, Prof. Oscar A.** Department of Vegetable Crops, University of California, Davis.
- Lotz, Dr. Martin.** Department of Molecular and Experimental Medicine, Research Institute of Scripps Clinic, La Jolla, California.
- Loughlin, James E.** Chemical Process Pilot Plant, Textile Research Center, Texas Tech University.
- Love, Dr. Jeffrey J.** Institute of Geophysics and Planetary Physics, University of California, San Diego.
- Lovell, Dr. Mark A.** Director, Diagnostic Molecular Pathology Laboratory, Department of Pathology, University of Virginia Health Sciences Center, Charlottesville.
- Lowan, Dr. Arnold N.** Deceased; formerly, Chairman, Department of Physics, Yeshiva University.
- Lowe, Christopher R.** Institute of Biotechnology, Cambridge University, England.
- Lowe, Dr. David A.** Department of Fermentation Development, Industrial Division, Bristol-Myers Squibb Company, Syracuse, New York.
- Lowell, Cadence A.** Department of Biology, Central State University, Wiberforce, Ohio.
- Lowell, Prof. Wayne R.** Department of Geology, Indiana University.
- Lowenstein, Prof. Otto E.** Department of Zoology, University of Birmingham, England.

**Lowenthal, Dr. David.** Research Associate, American Geographical Society, New York.

**Luanda, Dr. Robert E.** Director of Extractive Research and Development, Zinc Smelting Division, St. Joseph Minerals Corporation, Monaca, Pennsylvania.

**Luban, Prof. Naomi L. C.** Department of Laboratory Medicine, Transfusion Medicine, Children's Hospital, George Washington University Medical Center, Washington, D.C.

**Luborsky, Dr. Fred E.** Research and Development Center, General Electric Company, Schenectady, New York.

**Lucas, Dr. Spencer G.** New Mexico Museum of Natural History, Albuquerque, New Mexico.

**Luckenbach, Edward C.** Exxon Research and Engineering Company, Florham Park, New Jersey.

**Ludlam, Prof. Frank H.** Deceased; formerly, Department of Meteorology, Imperial College, London, England.

**Ludvik, Dr. George F.** Insecticide Application Research, Agricultural Research and Development Department, Monsanto Company, St.

**Luebbers, Dr. Ralph H.** Department of Chemical Engineering, University of Missouri.

**Lunte, Dr. Susan M.** Associate Director, Center for Bioanalytical Research, University of Kansas, Lawrence.

**Luo, Dr. Zhexi.** Section of Vertebrate Fossils, Carnegie Museum of Natural History, Pittsburgh, Pennsylvania.

**Lusted, Dr. Lee B.** Department of Radiology, University of Chicago.

**Luth, Dr. William.** Department of Earth Sciences, Stanford University.

**Luthin, Prof. James N.** Department of Civil Engineering, University of California, Davis.

**Lutter, Dr. Leonard.** Molecular Biology Research Program, Henry Ford Hospital, Detroit, Michigan.

**Luttge, Prof. Ulrich.** Institut für Botanik, Technische Hochschule Darmstadt, Darmstadt, Germany.

**Luu, Dr. Jane.** Astronomy Department, University of Leiden, Netherlands.

**Lykken, Dr. David T.** Department of Psychiatry, University of Minnesota, Minneapolis.

**Lyman, Prof. Charles P.** Department of Medical Sciences, Harvard University.

**Lyman, Dr. John.** Department of Oceanography, University of North Carolina.

**Lynds, Dr. Beverly T.** Center for Astrophysics and Space Astronomy, University of Colorado.

**Lyon, Dr. W. S.** Analytical Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee.

**Lyon, Dr. Waldo.** Arctic Submarine Research Laboratory, Naval Undersea Warfare Center, San Diego, California.

**Lyons, Prof. Walter.** Consultant in Telecommunications, Flushing, New York.

**Lyons, Dr. Walter A.** Certified Consulting Meteorologist, Forensic Meteorology Associates, Fort Collins, Colorado.

## M

**Ma, Dr. Yi Hua.** Department of Chemical Engineering, Worcester Polytechnic Institute.

**MacCarthy, Donnell D.** Manager, Voltage Regulator Engineering, Voltage Regulator Product Section, General Electric Company, Pittsfield, Massachusetts.

**MacCough, Neil.** Deceased; formerly, Lecturer in Mechanical Engineering, Columbia University.

**MacCrone, Prof. Robert K.** Department of Physics, Rensselaer Polytechnic Institute.

**MacDaniels, Dr. Lawrence H.** Professor Emeritus of Floriculture and Ornamental Horticulture, Cornell University.

**Macdonald, Dr. Gordon A.** Deceased; formerly, Institute of Geophysics, University of Hawaii.

**MacDonald, Dr. J. M.** Small Animal Clinic, Auburn University, Auburn, Alabama.

**MacDonald, Prof. Robert C.** Department of Biochemistry, Molecular and Cell Biology, Northwestern University.

**MacDonald Ruby I.** Department of Biochemistry, Molecular, and Cell Biology, Northwestern University.

**Macdoughall, Prof. J. Douglas.** Geological Research Division, Scripps Institution of Oceanography, La Jolla, California.

**MacDowell, Dr. Samuel W.** Department of Physics, Yale University.

**Macher, Dr. Abe M.** Medical Consultant, AIDS Education and Training Centers Programs, U.S. Public Health Service, Rockville, Maryland.

**Machiels, Albert.** Nuclear Engineer, Nuclear Radiation Laboratory, University of Illinois, Urbana-Champaign.

**Machlin, Dr. Laurence J.** Department of Vitamins and Clinical Nutrition, Hoffmann-LaRoche, Inc., Nutley, New Jersey.

**Mackay, Dr. Ian R.** Center for Molecular Biology and Medicine, Monash University, Clayton, Australia.

**MacKenzie, Prof. Innes K.** Department of Physics, University of Guelph, Ontario, Canada.

**Mackey, Prof. George W.** Department of Mathematics, Harvard University.

**MacKham, Prof. Guy Mead.** Neurology Department, Johns Hopkins Hospital, Baltimore, Maryland.

**Madanshetty, Prof. Sameer I.** Department of Aerospace and Mechanical Engineering, Boston University, Boston, Massachusetts.

**Maddalon, Dal V.** NASA Langley Research Center, Hampton, Virginia.

**Maderson, Dr. Paul F.** Department of Biology, Brooklyn College.

**Madestau, L.** Deceased; formerly, Chemicals and Plastics Division, Union Carbide Corp., Bound Brook, New Jersey.

**Madin, Dr. Laurence P.** Associate Science, Biology Department, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.

**Madison, Dr. John H.** Environmental Horticulture Department, University of California, Davis.

**Madison, Dr. Vincent.** Department of Medicinal Chemistry, School of Pharmacy, University of Illinois, Chicago.

**Madore, Dr. Barry F.** NASA/IPAC Extragalactic Database, Jet Propulsion Laboratory, California Institute of Technology, Pasadena, California.

**Magee, Paul T.** Department of Microbiology, School of Medicine, Yale University.

**Maggenti, Dr. Armand R.** Division of Nematology, University of California, Davis.

**Mahle, Dr. Christoph E.** COMSAT Laboratories, Clarksburg, Maryland.

**Mahmoud, Dr. Aly A.** School of Engineering, Indiana University-Purdue University of Fort Wayne.

**Mahoney, Dr. Lee R.** Chemistry Department, Ford Motor Company, Dearborn, Michigan.

**Maisey, Dr. John G.** Assistant Curator, American Museum of Natural History, New York.

**Major, Dr. Jack.** Department of Botany, University of California, Davis.

**Makulec, Alfred.** Product Planning and Application Specialist, Large Lamp Department, General Electric Company, Cleveland, Ohio.

**Malacinski, Dr. George M.** Department of Biology, Indiana University.

**Maldonado-Moll, Dr. Jose F.** Special Assistant for Science and Technology, Sistema Universitario de la Fundacion Educativa Ana G. Mendez Rio Piedras, Puerto Rico.

**Malin, Dr. David F.** Anglo-Australian Observatory, Epping, Australia.

**Malina, Prof. Robert M.** Department of Anthropology, University of Texas.

**Mamantov, Dr. Gleb.** Chemistry Department, University of Tennessee.

**Mamay, Dr. Sergius H.** U.S. Geological Survey, National Museum.

**Mandel, Dr. Manley.** Department of Biology, M.D. Anderson Hospital, Houston, Texas.

**Mandler, Dr. George.** Department of Psychology, University of California, San Diego.

**Mangion, Charles.** Technology Laboratory, Science and Technology Division, Systems Group, TRW, Inc., Redondo Beach, California.

**Mangum, B. W.** Leader, Thermometry Group, Prouss Measurement Division, National Institute of Standards and Technology, Gaithersburg, Maryland.

**Mann, Prof. Alfred K.** Department of Physics, University of Pennsylvania.

- Mann, Dr. Kenneth H.** Fisheries Research Board of Canada, Dartmouth, Nova Scotia.
- Mann, Prof. Robert W.** Department of Mechanical Engineering, Massachusetts Institute of Technology.
- Mann, Prof. Stephen.** School of Chemistry, University of Bath, United Kingdom.
- Mann, William R.** Rockwell International Corporation, New Port Beach, California.
- Mannheim, Prof. Walter. Med.** Zentrum für Hygiene, Universität Marburg, Germany.
- Manning, Dr. James M.** Department of Biochemistry, Rockefeller University.
- Manning, Dr. Kenneth V.** Professor Emeritus, Pennsylvania State University.
- Manning, Dr. Paul D. V.** Professor of Chemical Engineering (retired), California Institute of Technology.
- Mansfield, Steve.** American Radio Relay League, Inc., Newington, Connecticut.
- Manson, Dr. John A.** Deceased; formerly, Department of Chemistry, Lehigh University.
- Mansouri, Freydoon.** Department of Physics, Yale University.
- Manspeizer, Prof. Warren.** Department of Geological Sciences, Faculty of Arts and Sciences, Rutgers University.
- Mantell, Dr. Charles L.** President, C. L. Mantell and Associates, Manhasset, New York.
- Mantler, Dr. Michael.** Institut für Angewandte und Technische Physik, Technische Universität Wien, Austria.
- Manwell, Dr. Reginald D.** Department of Zoology, College of Liberal Arts, Syracuse University.
- Maple, M. Brian.** Department of Physics, University of California, San Diego.
- Maramorosch, Dr. Karl.** Department of Entomology, Rutgers University, New Brunswick, New Jersey.
- March-Russell, Dr. John.** Theory Division, CERN, Geneva, Switzerland.
- Marchalonis, Dr. John J.** Chairperson, Department of Biochemistry, Medical University of South Carolina.
- Marchand, Prof. Alan P.** College of Arts and Sciences, Department of Chemistry, University of Texas, Denton.
- Marcus, Prof. Ernesto.** Deceased; formerly, Department of Zoology, University of Sao Paulo, Brazil.
- Marcus, Eveline.** Department of Zoology, University of Sao Paulo, Brazil.
- Marcus, Prof. Marvin.** Department of Computer Science, University of California, Santa Barbara.
- Marden, Dr. Albert.** School of Mathematics, University of Minnesota.
- Marek, Dr. John M.** Independent Mining Consultants, Inc., Tucson, Arizona.
- Margai, Prof. Florence Lansana.** Department of Geography, State University of New York at Binghamton.
- Margenau, Prof. Henry.** Department of Physics, Yale University.
- Margolis, Prof. Simeon.** Endocrinology and Metabolism, Johns Hopkins University, Baltimore, Maryland.
- Margollash, Dr. E.** Department of Biochemistry, Northwestern University.
- Margon, Dr. Bruce.** Space Sciences Laboratory, University of California, Berkeley.
- Margrave, Prof. John L.** Dean of Research, Rice University.
- Marino, Dr. Paul.** Department of Biology, College of Charleston, South Carolina.
- Mariño, Prof. Miguel A.** Hydrology Program, University of California, Davis.
- Maris, Prof. Humphrey J.** Department of Physics, Brown University.
- Mark, Dr. J. Carson.** Member of the Advisory Committee, Reactor Safeguards of U.S. Nuclear Regulatory Commission, Los Alamos, New Mexico.
- Markert, Prof. Clement L.** Department of Biology, Yale University.
- Markovitz, Dr. Hershel.** Department of Chemistry, Carnegie-Mellon University.
- Markowitz, Dr. William.** Oceanographic Center, Nova University; Editor, "Geophysical Surveys." Marks, Lawrence E. Pierce Foundation, New Haven, Connecticut.
- Marks, Dr. Jonathan.** Department of Sociology and Anthropology, University of North Carolina at Charlotte.
- Marks, Dr. Tobin J.** Department of Chemistry, Northwestern University.
- Markus, John.** Deceased; formerly, Consultant (retired), Sunnyvale, California.
- Marsh, Don.** Media Services Representative, Portland Cement Association, Skokie, Illinois.
- Marsh, Dr. Kenneth N.** Thermodynamic Research Center, Texas A & M University.
- Marshak, Dr. Harvey.** National Bureau of Standards.
- Marshall, Dr. H. G.** Crops Research Division, Agricultural Research Service and Department of Agronomy, Pennsylvania State University.
- Marshall, Dr. Norman B.** Retired; formerly, Senior Principal Scientific Officer, British Museum of Natural History, London, England.
- Marshall, Peter L.** Independent Consultant, Granville, Ohio.
- Marshall, Prof. William R., Jr.** Associate Dean, College of Engineering, University of Wisconsin.
- Marsland, Charles R.** Chief Technical Consultant, Handy and Harman, Fairfield, Connecticut.
- Martell, Dr. A. E.** Department of Chemistry, Texas A&M University.
- Martin, Prof. C. Samuel.** School of Civil Engineering, Georgia Institute of Technology, Atlanta.
- Martin, Dr. Daniel W.** Acoustics Consultant, Cincinnati, Ohio.
- Martin, Franklin W.** Mayaguez Institute of Tropical Agriculture, Mayaguez, Puerto Rico.
- Martin, Dr. Peter G.** McLennon Physical Laboratories, Canadian Institute for Theoretical Physics, University of Toronto, Canada.
- Martin, Prof. R. D.** Anthropologisches Institut, Universität Zurich-Irchel, Zurich, Switzerland.
- Martin, R. G.** National Institutes of Health, Bethesda, Maryland.
- Martin, Prof. Richard J.** Division of Neonatology, Rainbow Babies and Childrens Hospital, University Hospitals of Cleveland, Ohio.
- Martin, Stanley B.** Stanford Research Center, Menlo Park, California.
- Martínez-Carrera, Dr. D.** College of Postgraduates in Agricultural Sciences, Mushroom Biotechnology, Puebla, Mexico.
- Maruyama, Prof. Shige.** Department of Earth and Planetary Sciences, Tokyo Institute of Technology, Tokyo, Japan.
- Marvier, Dr. Michelle A.** Department of Biology, Santa Clara University, Santa Clara, California.
- Marx, Dr. Preston A.** California Primate Research Center, University of California, Davis.
- Marzilli, Dr. Luigi G.** Department of Chemistry, Emory University.
- Marzilli, Dr. Patricia A.** Department of Chemistry, Emory University.
- Mascarenhas, Prof. Joseph P.** Department of Biological Sciences, State University of New York, Albany.
- Mashoon, Prof. Bahram.** Department of Physics and Astronomy, College of Arts and Sciences, University of Missouri—Columbia.
- Mason, Dr. Basil J.** Program Director, Center for Environmental Technology, Imperial College of Science and Technology, London, England.
- Massey, Dr. Vincent.** Department of Biological Chemistry, University of Michigan.
- Massion, Dr. Jean.** Laboratoire de Neurobiologie et Mouvements, Centre de Recherche en Neurosciences Cognitives, Marseille, France.
- Mast, Dr. Roy C.** Miami Valley Laboratories, Proctor and Gamble Company, Cincinnati, Ohio.
- Masters, Dr. Colin L.** Head of the National Creutzfeldt-Jakob Disease Registry, Department of Pathology, University of Melbourne, Australia.
- Masucci, Dr. Maria G.** Microbiology and Tumor Biology Center, Karolinska Institute, Stockholm, Sweden.
- Mata-Toledo, Dr. Ramon A.** Associate Professor of Computer Science, James Madison University, Harrisonburg, Virginia.
- Mattei, Dr. Janet Akyüz.** Director, American Association of Variable Star Observers, Cambridge, Massachusetts.
- Matyas, Stephen M.** IBM Systems Communications Division, Kingston, New York.
- Mauchline, Dr. John.** Scottish Association for Marine Science, Argyll, Scotland.
- Mauk, Dr. Craighton S.** Research Associate, Department of Horticultural Science, Mountain Horticultural Crops Research and Extension Center, School of

- Agriculture and Life Sciences, North Carolina State University, Fletcher.
- Maul, Prof. George A.** Director, Division of Marine and Environmental Systems, Florida Institute of Technology, Melbourne.
- Maurer, Dr. Brian A.** Department of Fisheries and Wildlife, Michigan State University, East Lansing.
- Mausner, Dr. Leonard F.** Radionuclide/Radiopharmaceutical Research, Brookhaven National Laboratory, Upton, New York.
- May, Prof. Bella J.** Department of Physical Therapy, Medical College of Georgia, Augusta.
- May, F. H.** Consultant, Kerr-McGee Corporation, Whittier, California.
- May, James E.** Lockheed-California Company, Burbank, California.
- Mayall, Robert N.** Director, Planning and Research Associates, Boston, Massachusetts.
- Mayer, Dr. Rudolph L.** Deceased; formerly, Leonard Wood Memorial Hospital, Washington, D.C.
- Maykuth, Daniel.** Tin Research Institute, Inc., Columbus, Ohio.
- Maynard, Dr. Harold B.** President, Maynard Research Council, Inc., Pittsburgh, Pennsylvania.
- Mays, Rolland L.** Materials Systems Division, Union Carbide Corporation, Tarrytown, New York.
- Mazzo, Anthony.** Urban Substructures, Inc., East Elmhurst, New York.
- McAlister, Prof. Harold A.** Director, Center for High Angular Resolution Astronomy, Georgia State University, Atlanta.
- McBride, Dr. Earle F.** Department of Geology, University of Texas, Austin.
- McCabe, Dr. Allyssa.** Eliot-Pearson Department of Child Study, Tufts University.
- McCabe, Dr. Warren L.** Deceased; formerly, Department of Chemical Engineering, North Carolina State University.
- McCann, Dr. Mary B.** Nutrition Program, Center for Disease Control, Health Services and Mental Health Administration, U.S. Department of Health, Education and Welfare, Rockville, Maryland.
- McCarthy, Dr. Dennis D.** Time Service Division, U. S. Naval Observatory, Washington, D.C.
- McCarthy, Dr. John.** National Center for Atmospheric Research, Boulder, Colorado.
- McCarthy, Prof. Kathryn A.** Professor of Physics, and Dean of Graduate School of Arts and Sciences, Tufts University.
- McCarty, Dr. John E.** Structure Staff Supervisor, Boeing Company, Renton, Washington.
- McClain, Prof. Thomas E.** Head, Department of Forest Products, Oregon State University, Corvallis.
- McClellan, Leslie N.** Consulting Engineer, Engineering Consultants, Inc., Denver, Colorado.
- McClung, Dr. Leland S.** Professor Emeritus, Department of Microbiology, Indiana University.
- McClure, Dr. Michelle.** Northwest Fisheries Science Center, Seattle, Washington.
- McConnaughy, Dr. Bayard H.** Department of Biology, University of Oregon.
- McCormick, Prof. Barnes W., Jr.** Department of Aerospace Engineering, Pennsylvania State University.
- McCormick, Dr. Thomas R.** Department of Biomedical History, School of Medicine, University of Washington.
- McCoy, Prof. Barry M.** Division of Engineering and Applied Physics, Harvard University.
- McDonald, Prof. Alan T.** School of Mechanical Engineering, Purdue University.
- McDonald, Prof. John J.** Retired; formerly, Head, Textile Engineering Department, University of Lowell.
- McDowell, Dr. Robin S.** Senior Chief Scientist, Chemical Structure and Dynamics, Molecular Science Research Center, Battelle Pacific Northwest Laboratories, Richland, Washington.
- McEivilly, Dr. Thomas V.** Department of Geology, University of California, Berkeley.
- McEwan, Prof. Robert S.** Deceased; formerly, Professor Emeritus, Oberlin College.
- McEwen, Dr. Bruce.** Harold and Margaret Milliken Hatch Laboratory of Neuroendocrinology, Rockefeller University, New York.
- McFarland, Dr. Richard H.** Director Emeritus, Avionics Engineering Center, Ohio University, Athens.
- McGannon, Harold E.** Technical Editor, Research and Technology Division, United States Steel Corporation, Pittsburgh, Pennsylvania.
- McGaugh, Dr. James L.** Department of Psychobiology, University of California, Irvine.
- McGinley, Dr. John A.** Chief, Forecast Research Group, National Oceanic and Atmospheric Administration, Environmental Research Laboratory, Boulder, Colorado.
- McGinnies, Dr. William G.** Professor of Dendrochronology and Arid Land Ecologist, Office of Arid Land Studies, University of Arizona.
- McGinnis, Prof. William.** Department of Molecular Biophysics and Biochemistry, Yale University.
- McGuire, Ann B.** Aquaculture Program, University of California, Davis.
- McHugh, Dr. J. L.** Marine Sciences Research Center, State University of New York, Stony Brook.
- McIntire, Prof. Larry V.** Chairperson, Institute of Biosciences and Bioengineering, Rice University, Houston, Texas.
- McIntosh, Prof. J. Richard.** Department of Molecular, Cellular and Developmental Biology, Laboratory for High-Voltage Electron Microscopy, University of Colorado at Boulder.
- McIntyre, Dr. Andrew.** Lamont-Doherty Geological Observatory, Palisades, New York; Queens College of the City University of New York.
- McKenna, Dr. Malcolm C.** Frick Curator, American Museum of Natural History, New York.
- McKesson, Chris B.** John J. McMullen Associates, Bremerton, Washington.
- McKinney, Dr. Chester M.** Retired; formerly, Applied Research Laboratories, University of Texas, Austin.
- McKinney, Prof. Frank K.** Department of Geology, Appalachian State University, Boone, North Carolina.
- McKnight, Prof. Tom.** Department of Geography, University of California, Los Angeles, California.
- McLaughlin, Dr. Patsy.** Shannon Point Marine Center, Western Washington University, Anacortes.
- McMahon, Dr. John F.** Deceased; formerly, New York State Technical Service Program, Alfred, New York.
- McNamara, Dr. Ken J.** Senior Curator, Invertebrate Paleontology, Western Australian Museum, Perth, Western Australia.
- McNamara, Dr. Peter.** Department of Medical Microbiology, University of Wisconsin, Madison.
- McNaughton, Prof. Samuel J.** Department of Biology, Syracuse University.
- McNellis, Dr. Donald.** Center for Research of Mothers and Children, National Institute of Child Health and Human Development, National Institutes of Health, Bethesda, Maryland.
- McPartland, Brian J.** Electrical Design and Installation, Englewood Cliffs, New Jersey.
- McPartland, Joseph F.** Electrical Design and Installation, Englewood Cliffs, New Jersey.
- McPherson, Prof. George, Jr.** Department of Electrical Engineering, School of Engineering, University of Missouri.
- McQuillan, James P.** AT&T Federal Systems, Washington, D.C.
- McVey, Charles I.** Fluorescent and High Intensity Systems Department, General Electric Company, Twinsburg, Ohio.
- McWilliams, Dr. Michael O.** Department of Geophysics, School of Earth Sciences, Stanford University.
- Meade, Dr. Thomas J.** Division of Chemistry and Chemical Engineering, California Institute of Technology.
- Mebus, Dr. Charles A.** Laboratory Chief, Foreign Animal Disease Diagnostic Laboratory, U.S. Department of Agriculture, Greenport, New York.
- Meeus, Dr. Jean.** Consultant, Erps-Kwerps, Belgium.
- Meuse, Dr. Bastiaan J. D.** Department of Botany, University of Washington.
- Meggers, Dr. William F.** Deceased; formerly, National Bureau of Standards.

- Mehra, Prof. Raman K.** President, Scientific Systems, Inc., Cambridge, Massachusetts.
- Meijer, Prof. Paul H. E.** Department of Physics, Catholic University of America.
- Meijer, Dr. Roelof J.** Assistant Director of Research, Philips Research Laboratories, Eindhoven, Netherlands.
- Meiklejohn, Dr. Jane.** Senior Research Fellow, University College, Salisbury, Rhodesia.
- Meinke, Dr. David.** Department of Botany and Microbiology, Oklahoma State University.
- Meinke, Dr. W. Wayne.** Analytical Chemistry Division, National Bureau of Standards.
- Meinwald, Dr. J.** Department of Chemistry, Cornell University.
- Meisel, Dr. David D.** Department of Physics and Astronomy, State University of New York, Genesee.
- Meisel, Dr. Jerome.** Department of Electrical and Computer Engineering, Wayne State University.
- Meissner, Dr. Hans W.** Department of Physics, Stevens Institute of Technology, Hoboken, New Jersey.
- Meixner, Dr. Josef.** Director, Institute of Theoretical Physics, Aachen, Germany.
- Melander, John.** Portland Cement Association, Skokie, Illinois.
- Mellichamp, Prof. Duncan.** Department of Chemical and Nuclear Engineering, University of California, Santa Barbara.
- Melnick, Dr. Joseph L.** Department of Virology and Epidemiology, Baylor College of Medicine.
- Melosh, Prof. H. J.** Lunar and Planetary Laboratory, University of Arizona, Tucson.
- Meltzer, Dr. David J.** Department of Anthropology, Southern Methodist University, Dallas, Texas.
- Menkes, Joshua.** Science and Technology Division, Institute for Defense Analyses, Arlington, Virginia.
- Menzies, Dr. Robert J.** Department of Zoology, Duke University.
- Merold, John.** M. Rosenblatt and Son, Inc., Arlington, Virginia.
- Merritt, Frederick S.** Consulting Engineer, West Palm Beach, Florida.
- Merwin, Earl J.** McCormick and Company, Hunt Valley, Maryland.
- Mescher, Prof. Anthony L.** Anatomy Section, School of Medicine, Medical Sciences Program, Indiana University.
- Messenger, Dr. George C.** Vice President and Technical Director, Messenger & Associates, Las Vegas, Nevada.
- Messenger, Dr. John B.** Department of Zoology, University of Sheffield, United Kingdom.
- Messerschmitt, Prof. David.** Department of Electrical Engineering and Computer Science, University of California, Berkeley.
- Metcalf, William G.** Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.
- Metzger, Dr. James D.** Research Physiologist, U.S. Department of Agriculture, Agricultural Research Service, Biosciences Research Laboratory, Fargo, Indiana.
- Meyer, Dr. Bernard S.** Department of Botany, Ohio State University.
- Meyer, Dr. Carl H.** Advisory Engineer, IBM Systems Communications Division, Kingston, New York.
- Meyer, Dr. David B.** Department of Anatomy, Wayne State University School of Medicine.
- Meyer, Prof. Henry O. A.** Department of Earth and Atmospheric Sciences, Purdue University.
- Meyer, Dr. John F.** Department of Electric Engineering and Science, College of Engineering, University of Michigan.
- Meyer, Dr. Judy L.** Institute of Ecology, University of Georgia.
- Meyer, Dr. Karl F.** Deceased; formerly, Professor Emeritus of Experimental Pathology, George Williams Hooper Foundation, San Francisco Medical Center, University of California.
- Meyers, Dr. Edward.** Research Group Leader, Department of Microbiology Squibb Institute, New Brunswick, New Jersey.
- Miall, Dr. Andrew D.** Department of Geology, University of Toronto, Ontario, Canada.
- Michalec, James R.** American Electric Power Company, Columbus, Ohio.
- Middleton, Dr. Gerard V.** Department of Geology, McMaster University, Hamilton, Ontario, Canada.
- Mikos, Prof. Antonios G.** Director of John W. Cox Laboratory of Biomedical Engineering, Department of Chemical Engineering, Rice University, Houston, Texas.
- Miles, Lawrence D.** Engineering Consultant, Easton, Maryland.
- Miles, Thomas K.** Shell Development Company.
- Mill, Dr. George S.** Research Chemist, Shell Oil Company, New York.
- Miller, Barry.** Formerly, Senior Editor, "Aviation Week and Space Technology," McGraw-Hill Publications Company, Los Angeles, California.
- Miller, Dr. Clyde A.** Falls Church, Virginia.
- Miller, Dr. David A. B.** AT&T Bell Laboratories, Holmdel, New Jersey.
- Miller, Dr. Dorothy A.** Wayne State University School of Medicine, Center for Molecular Medicine and Genetics, Detroit, Michigan.
- Miller, Prof. Erwin W.** Deceased; formerly Department of Physics, Pennsylvania State University.
- Miller, Dr. Frederick R.** Department of Soil and Crop Sciences, Texas A&M University.
- Miller, Dr. Glenn H.** Weapons Effects Division, Sandia National Laboratories, Albuquerque, New Mexico.
- Miller, Prof. J. Creighton, Jr.** Texas Agricultural Experiment Station, Department of Horticultural Science, College of Agriculture, Texas A & M University.
- Miller, Dr. Julian C.** Department of Horticulture, Louisiana State University.
- Miller, Prof. Maynard M.** Department of Geology, Michigan State University; Director, Foundation for Glacial and Environmental Research, Seattle, Washington.
- Miller, Dr. Milton A.** Department of Zoology, University of California, Davis.
- Miller, Prof. Orlando J.** Wayne State University School of Medicine, Center for Molecular Medicine and Genetics, Detroit, Michigan.
- Miller, R. A.** Engineering Department, Babcock and Wilcox, Barberton, Ohio.
- Miller, Dr. Regis B.** Project Leader, Center for Wood Anatomy Research, Forest Products Laboratory, U.S. Department of Agriculture, Forest Service, Madison, Wisconsin.
- Miller, Dr. Richard A.** Lawrence Berkeley National Laboratory, University of California, Berkeley.
- Miller, Dr. Shelby A.** Argonne National Laboratory, Argonne, Illinois.
- Miller, Prof. Sidney I.** Department of Chemistry, Illinois Institute of Technology.
- Miller, Terry A.** AT&T Bell Laboratories, Murray Hill, New Jersey.
- Miller, Thomas E.** Department of Biological Sciences, Florida State University, Tallahassee.
- Milliard, Dr. Ron.** Optomechanics Research Inc., Vail, Arizona.
- Milligan, Dr. W. O.** Robert A. Welch Foundation, Houston, Texas.
- Millman, Dr. Jacob.** Department of Electrical Engineering, Columbia University.
- Mills, Dr. Dennis.** Advanced Photon Source, Argonne National Laboratory, Argonne, Illinois.
- Mills, Dr. Harlow B.** State Natural History Survey, Urbana, Illinois.
- Mills, Prof. Ian M.** Department of Chemistry, University of Reading, United Kingdom.
- Mills, Thomas B.** National Semiconductor Corporation, Santa Clara, California.
- Milsom, Dr. William K.** Department of Zoology, University of British Columbia, Vancouver, Canada.
- Milstein, Prof. Laurence B.** Department of Electrical and Computer Engineering, University of California, San Diego.
- Milster, Dr. Tom D.** Optical Data Storage Center, Optical Sciences Center, University of Arizona, Tucson.
- Milus, Dr. E. A.** Department of Plant Pathology, University of Arkansas, Fayetteville.
- Minifie, Bernard W.** Knechtel Laboratories, Bristol, England.
- Minkler, Ward W.** Vice President, TIMET, Pittsburgh, Pennsylvania.
- Minnis, Dr. Wesley.** Formerly, Assistant to the Director of Research and Development, Allied Chemical Corporation, New York.

- Mitchell, Dr. Charles E.** Department of Geology, State University of New York at Buffalo.
- Mitchell, Dr. Jeffrey C.** Spaceport Graduate Center, Florida Institute of Technology, Satellite Beach.
- Mitchell, Dr. Malcolm S.** Comprehensive Cancer Center, Kenneth Norris, Jr. Cancer Research Institute, University of Southern California, Los Angeles.
- Mitsch, Prof. William J.** Graduate Program Environmental Science, School of Natural Resources, Ohio State University, Columbus.
- Mitterer, Dr. Richard M.** Department of Geosciences, University of Texas, Dallas.
- Miyawaki, Dr. Ritsuro.** Department of Geology, National Science Museum, Tokyo, Japan.
- Mizell, Dr. David W.** Project Leader, University of Southern California/Information Sciences Institute, Marina del Rey.
- Moder, Dr. Joseph J.** Chairman, Department of Management Science, University of Miami.
- Moe, Dr. Richard L.** Department of Botany, University of California, Berkeley.
- Moffat, Dr. Anthony F. J.** Department de Physique, Université
- Moffett, Dr. Mark B.** Naval Underwater Systems Center, New London Laboratory, New London, Connecticut.
- Moh, Dr. Za-Chieh.** Moh & Associates, Inc., Oriental Technopolises Tower, Taipei, Taiwan.
- Mohanakumar, Dr. T.** Department of Surgery, Washington University School of Medicine, St. Louis, Missouri.
- Mohr, Prof. David W.** Department of Geology, Texas A & M University.
- Mohr, Prof. Peter.** Department of Physics, Yale University.
- Moll, Dr. Gary A.** Director, Urban and Community Forestry, American Forestry Association, Washington, D.C.
- Møllar, Prof. Aage R.** Department of Neurological Surgery, University of Pittsburgh.
- Moment, Dr. Gairdner B.** Department of Biological Sciences, Goucher College, Towson, Maryland.
- Montville, Dr. Thomas J.** Department of Food Science, Cook College, Rutgers University.
- Mood, Dr. Alexander M.** Director, Public Policy Research Organization, University of California, Irvine.
- Moody, Capt. Alton B.** Navigation Consultant, La Jolla, California.
- Mook, Dr. Douglas G.** Department of Psychology, University of Virginia.
- Moore, Dr. Alice E.** Sloan-Kettering Institute of Cancer Research, New York.
- Moore, Prof. Charles A.** Department of Civil Engineering, Ohio State University.
- Moore, Prof. Clyde H., Jr.** Director, Applied Carbonate Research Program, Department of Geology, Agricultural and Mechanical College, Louisiana State University.
- Moore, Dr. James Alexander.** Department of Chemistry, University of Delaware.
- Moore, Dr. Jeffrey S.** Department of Chemistry, University of Illinois, Urbana-Champaign.
- Moore, Dr. Paul B.** Department of the Geophysical Sciences, University of Chicago.
- Moore, Dr. Raymond C.** Deceased; formerly, Department of Geology, University of Kansas.
- Moore, Dr. Richard K.** Center for Research in Engineering Science, University of Kansas.
- Moore, Dr. W. J. M.** Division of Electrical Engineering, National Research Council of Canada, Ottawa, Ontario.
- Moorer, Daniel F., Jr.** Ball Aerospace & Technologies, Boulder, Colorado.
- Mordes, Dr. J. P.** Department of Medicine, University of Massachusetts Medical School, Worcester.
- Moreno, Dr. Giuliana.** Institute of Cellular Pathology, Paris, France.
- Morgan, Dr. Anne H.** Deceased; formerly, Mount Holyoke College.
- Morgan, Prof. John W.** Department of Mathematics, Columbia University.
- Morgan, Dr. Karl Z.** Neely Professor, School of Nuclear Engineering, Georgia Institute of Technology.
- Moritz, Prof. Helmut.** Technische Universität Graz, Abteilung für Physikalische Geodäsie, Graz, Austria.
- Morrell, A. M.** Manager, Tube Development, Picture Tube Division, RCA Corporation, Lancaster, Pennsylvania.
- Morrell, Dr. Jeffrey J.** Department of Forest Products, Oregon State University, Corvallis.
- Morris, Prof. J. W., Jr.** Department of Materials Sciences and Mineral Engineering, University of California, Berkeley.
- Morris, Prof. Philip J.** Department of Aerospace Engineering, Pennsylvania State University, University Park.
- Morris, S. B.** Marconi Research Centre Materials Group, Towcester, Northants, England.
- Morris, Dr. William F.** Department of Zoology, Duke University, Durham, North Carolina.
- Morrison, Dr. David C.** Associate Director, Basic Research Programs, Department of Microbiology, University of Kansas Medical Center, Kansas City.
- Morrison, Dr. George H.** Professor of Chemistry and Director, Analytical Facility of Materials Science Center, Cornell University.
- Morrison, Dr. Kenneth J.** Cooperative Extension Service, Washington State University.
- Morse, Dr. Robert W.** Associate Director and Dean of Oceanographic Studies, Woods Hole Oceanographic Institute, Woods Hole, Massachusetts.
- Morse, Dr. Roger A.** Department of Entomology, Cornell University.
- Morse, Dr. Roy Earl.** Food Science Department, Cook College.
- Morse, Dr. Stephen A.** Director, Division of Sexually Transmitted Diseases Laboratory Research, Centers for Disease Control and Protection, Atlanta, Georgia.
- Mortenson, Leonard E.** Department of Biological Sciences, Purdue University.
- Morton, Dr. Andrew.** Department of Geology and Petroleum Geology, University of Aberdeen, Kings College, Aberdeen, United Kingdom.
- Moscovitz, Dr. Albert.** Department of Chemistry, University of Minnesota.
- Moseley, Dr. Steve L.** Department of Microbiology, University of Washington School of Medicine, Seattle.
- Moshell, Dr. Alan.** Director, Skin Diseases Program, National Institute of Arthritis and Musculoskeletal and Skin Diseases, National Institutes of Health, Bethesda, Maryland.
- Mosher, Dr. William.** Deceased; formerly, Chairman, Department of Chemistry, University of Delaware.
- Mossman, Prof. Harland W.** Emeritus Professor, Department of Anatomy, University of Wisconsin.
- Motekaitis, Dr. R. J.** Department of Chemistry, Texas A&M University.
- Mottershead, Dr. Allen.** Physical Science Department, Cypress College, California.
- Mottet, Dr. N. Karle.** Professor of Pathology and Director of Hospital Pathology, University Hospital, University of Washington.
- Moyer, Dr. Kenneth E.** Department of Psychology, Carnegie-Mellon University.
- Moyer, Dr. William W.** Applied Research Laboratory, Pennsylvania State University.
- Mrak, Dr. Emil M.** Office of Chancellor Emeritus, University of California, Davis.
- Mulligan, Dr. Pamela K.** Formerly, Department of Biochemistry, University of North Carolina.
- Mulliken, Prof. Robert S.** Institute of Molecular Biophysics, Florida State University.
- Munger, Prof. H. M.** Department of Plant Breeding and Biometry, New York State College of Agriculture and Life Sciences, Cornell University.
- Munson, Prof. Bruce R.** Department of Aerospace Engineering and Mechanics, Iowa State University, Ames.
- Murgatroyd, Dr. R. J.** Meteorological Office, Bracknell, England.
- Murphy, Dr. Frederick A.** Centers for Disease Control, Department of Health and Human Services, Tucker, Georgia.
- Murphy, Dr. Glenn.** Department of Nuclear Engineering, Iowa State University.
- Murphy, Dr. Robert L.** Division of Infectious Diseases, Northwestern University Medical School, Chicago, Illinois.
- Murphy, Dr. Terence M.** Department of Anesthesiology, School of Medicine, University of Washington.

- Murray, Dr. Haydn H.** Executive Vice President, Georgia Kaolin Company, Elizabeth, New Jersey.
- Murray, Dr. James W.** School of Oceanography, University of Washington, Seattle.
- Murray, Prof. M. John.** Department of Medicine, University of Minnesota Medical School, Minneapolis.
- Murray, Dr. Merritt J.** Formerly, A. M. Todd Company, Kalamazoo, Michigan.
- Murray, Prof. R. G. E.** Department of Microbiology and Immunology, Health Sciences Centre, University of Western Ontario, London, Canada.
- Murray, Dr. Royce W.** Department of Chemistry, University of North Carolina.
- Murray, Stephen S.** Center for Astrophysics, Harvard College Observatory, Cambridge, Massachusetts.
- Murray, Dr. Thomas P.** Applied Research Laboratory, United States Steel Corporation, Monroeville, Pennsylvania.
- Murray, Dr. William.** Teknowledge Corporation, Palo Alto, California.
- Musacchia, Dr. X. J.** Department of Physiology and Space Science Research Center, University of Missouri.
- Mushlitz, R. D.** Ore Department, American Smelting and Refining Company, New York.
- Muther, Richard.** Executive Director, Richard Muther & Associates, Inc., Kansas City, Missouri.
- Mutter, Dr. Carolyn Z.** Associate Research Scientist, Lamont-Doherty Earth Observatory, Columbia University, Palisades, New York.
- Mutter, Dr. John.** Lamont-Doherty Geological Observatory, Columbia University, Multichannel Seismics Group, Palisades, New York.
- Muus, Dr. Bent J.** Research Biologist, Danish Institute for Fishery and Marine Research, Charlottenund, Denmark.
- Myers, Prof. A. L.** Department of Chemical Engineering, University of Pennsylvania.
- Myklebust, Prof. Arvid.** Mechanical Engineering Department, Virginia Polytechnic Institute.
- Mynleiff, Dr. Michelle.** Department of Biology, Marquette University, Milwaukee, Wisconsin.
- N**
- Nacamulli, Laurette.** IGEN, Inc., Rockville, Maryland.
- Nace, Dr. Raymond L.** Geological Survey, U.S. Department of the Interior, Raleigh, North Carolina.
- Nachtrieb, Prof. Norman H.** Chairman, Department of Chemistry, University of Chicago.
- Nagel, David J.** Superintendent, Condensed Matter and Radiation, Sciences Division, Naval Research Laboratory, Department of the Navy, Washington, D.C.
- Nagel, Suzanne R.** Engineering Research Center, AT&T Bell Laboratories, Princeton, New Jersey.
- Nagel, Dr. Walter R.** NASA Goddard Space Flight Center, Greenbelt, Maryland.
- Naistat, Dr. Samuel S.** Department of Chemistry, Stephen F. Austin State College Nacogdoches, Texas.
- Namias, Jerome.** Climate Research Group, Scripps Institution of Oceanography, La Jolla, California.
- Napp-Zinn, Prof. Klaus.** Botanical Institute, Cologne, Germany.
- Nash, Dr. Irwin.** School of Medicine, Yale University.
- Nachtsheim, Dr. Philip R.** NASA Ames Research Center, Moffett Field, California.
- Natland, Prof. James H.** Rosentiel School of Marine and Atmospheric Science, University of Miami, Florida.
- Naumann, Dr. Robert J.** NASA Marshall Space Flight Center, Huntsville, Alabama.
- Navrotsky, Dr. Alexandra.** Department of Geological and Geophysical Sciences, Princeton University.
- Naylor, Dr. Arch.** Department of Electrical Engineering, University of Michigan.
- Naylor, Dr. Ernest.** Reader in Zoology, University College of Swansea, Wales.
- Nealson, Dr. Kenneth H.** Center for Great Lakes Studies, University of Wisconsin.
- Nedelsky, Prof. Leo.** Department of Physical Science, University of Chicago.
- Nedungadi, Dr. Ashok P.** Integrated Electronics Facility, Schlumberger Well Services, Houston, Texas.
- Nelms, Dr. W. P.** Deputy Chief, Aircraft Technology Division, National Aeronautics and Space Administration, Ames Research Center, Moffett Field, California.
- Nelson, Dr. Donna C.** Intelligent Transport Society of America, Washington, D.C.
- Nelson, Elton G.** Collaborator (WOC), Crops Research Division, U.S. Department of Agriculture, Beltsville, Maryland.
- Nelson, Dr. George C.** Department of Mathematics, University of Iowa, Iowa City.
- Nelsen, Dr. Olin E.** Department of Biology, University of Pennsylvania.
- Nelson, Prof. Raymond J.** Professor of Mathematics and Philosophy, Case Institute of Technology.
- Nelson, Dr. Richard B.** Chief Engineer, Varian Associates, Palo Alto, California.
- Nergaard, Dr. Leon S.** Director, Microwave Research Laboratory, RCA Laboratories, Princeton, New Jersey.
- Nesbitt, Dr. Herbert H. J.** Dean, Faculty of Science, Carleton University, Ottawa, Ontario, Canada.
- Nestle, Dr. Marion.** Chairperson, Department of Home Economics and Nutrition, Division of Education, New York University.
- Netravali, Dr. Arun.** President, Bell Laboratories, Murray Hill, New Jersey.
- Neubecker, T. F.** Manager, Engineering, High Intensity and Quartz Lamp Department, General Electric Company, Twinsburg, Ohio.
- Neudeck, Prof. Gerald W.** Department of Electrical Engineering, Purdue University.
- Neuhauser, Robert G.** Solid State Division, Electro Optics and Devices, RCA, Lancaster, Pennsylvania.
- Nevins, Dr. James L.** Charles Stark Draper Laboratory, Cambridge, Massachusetts.
- New, Dr. Ronald.** NOAA, U.S. Department of Commerce, Rockville, Maryland.
- Newcomb, Prof. Robert W.** Microsystems Laboratory, Electrical Engineering Department, University of Maryland.
- Newell, Dr. Allen.** Department of Computer Science, Carnegie-Mellon University.
- Newell, Dr. Homer E.** National Aeronautics and Space Administration Headquarters, Washington, D.C.
- Newhouse, Alan R.** Retired; formerly, U.S. Department of Energy.
- Newton, Dr. Chester W.** National Center for Atmospheric Research, Boulder, Colorado.
- Newton, Dr. R. C.** Department of the Geophysical Sciences, University of Chicago.
- Newton, Prof. Roger G.** Department of Physics, Indiana University, Bloomington.
- Ng, Dr. Tai P.** New Ground Resources Ltd., Alberta, Canada.
- Nicodemus, Dr. Fred E.** Deceased; formerly, Physicist, Optical Radiation Section, Heat Division, Institute for Basic Standards, National Bureau of Standards.
- Niebel, Benjamin W.** Professor Emeritus of Industrial Engineering, Pennsylvania State University; Industrial Engineering Consultant, State College, Pennsylvania.
- Nier, Prof. Alfred O.** School of Physics and Astronomy, University of Minnesota.
- Niesz, Dr. Dale E.** Director, Center for Ceramics Research, College of Engineering, Rutgers University.
- Nigrelli, Dr. Ross F.** Osborn Laboratories of Marine Sciences, New York Aquarium, New York.
- Nippes, Prof. Ernest F.** Department of Materials Engineering, Rensselaer Polytechnic Institute.
- Nix, Prof. William D.** Associate Chairman, Department of Materials Science and Engineering, Stanford University.
- Noback, Dr. Charles R.** Department of Anatomy, Columbia University.
- Nobel, Prof. Park S.** Department of Biology, University of California, Los Angeles.
- Noble, Dr. James A.** Geological Sciences, California Institute of Technology.
- Noble, R. H.** Optical Division, Institute National Astrofis, Puebla, Mexico.
- Noguchi, Dr. Thomas T.** Pasadena, California.
- Nolan, Dr. Robert P.** Environmental Sciences Laboratory, Brooklyn College, Brooklyn, New York.

- Noll, Dr. Kenneth.** Department of Microbiology, University of Illinois, Urbana-Champaign.
- Norberg, Dr. Ulla M.** Department of Zoomorphology, Zoological Institute, University of Goteborg, Sweden.
- Norcross, Prof. Neil L.** College of Veterinary Medicine, Cornell University, Ithaca, New York.
- Nordman, Prof. James E.** Department of Electrical and Computer Engineering, University of Wisconsin, Madison.
- Norris, Dr. H. Thomas.** Chairman, Department of Clinical Pathology and Diagnostic Medicine, East Carolina University School of Medicine.
- North, Dr. Gerald R.** Director, Climate System Research Program, Department of Meteorology, Texas A&M University.
- Northcutt, Dr. R. Glenn.** Department of Anatomy, Case Western Reserve University.
- Norton, Dr. Jeanette.** Department of Plants, Soils and Biometerology, Utah State University, Logan.
- Novikoff, Dr. Phyllis.** Department of Pathology, Albert Einstein College of Medicine, Bronx, New York.
- Novotny, Prof. Donald W.** Department of Electrical and Computer Engineering, University of Wisconsin, Madison.
- Noy, Dr. Noa.** Division of Nutritional Sciences, Cornell University, Ithaca, New York.
- Noyes, Richard M.** Department of Chemistry, College of Arts and Sciences, University of Oregon.
- Noyes, Dr. Robert W.** Harvard-Smithsonian Center for Astrophysics, Smithsonian Astrophysical Observatory, Harvard College Observatory, Cambridge, Massachusetts.
- Nuccitelli, Prof. Richard.** Zoology Department, University of California, Davis.
- Nussbaumer, Prof. Harry.** Institut für Astronomie, Zürich, Switzerland.
- Nygren, Dr. David R.** Physics Division, Lawrence Berkeley Laboratory, University of California, Berkeley.
- Nygren, Stephen.** Bell Telephone Laboratories, Reading, Pennsylvania.
- Nyhan, Prof. William L.** Department of Pediatrics, University of California, La Jolla.
- Nyman, Dr. Matthew W.** Senior Research Associate, Department of Earth and Planetary Sciences, University of New Mexico, Albuquerque.
- O'Connor, Dr. Donald J.** Department of Civil Engineering, Manhattan College.
- O'Donnell, Franklin.** Jet Propulsion Laboratory, Pasadena, California.
- Odom, Dr. Robert W.** Charles Evans Associates, Redwood City, California.
- Ogburn, Charles B.** Cooperative Extension Service, Auburn University.
- Ogle, Dr. Kenneth N.** Section of Biophysics, Mayo Clinic, Rochester, Minnesota.
- O'Hagan, Dr. David.** Department of Chemistry, University of Durham, United Kingdom.
- Ohlendorf, Dr. Douglas H.** Genex Corporation, Gaithersburg, Maryland.
- Ojemann, Dr. Linda M.** Regional Epilepsy Center, Harborview Medical Center, University of Washington.
- Okandan, Dr. Ender.** Department of Petroleum and Natural Gas Engineering, Middle East Technical University, Ankara, Turkey.
- Olcott, John W.** Editor and Publisher, Business and Commercial Aviation Aerospace and Defense Group, McGraw-Hill, White Plains, New York.
- Old, Dr. Bruce S.** Senior Vice President, Arthur D. Little, Inc., Cambridge, Massachusetts.
- Oldenburger, Prof. Rufus.** Director, Automatic Control Center, Purdue University.
- O'Leary, Dr. John E.** Department of Forest Engineering, Oregon State University.
- O'Lenic, Dr. Edward A.** Climate Analysis Center, National Weather Service, U.S. Department of Commerce, Washington, D.C.
- Oliver, Prof. John E.** Department of Geography, Geology, and Anthropology, Indiana State University, Terre Haute, Indiana.
- Olmstead, Prof. Richard.** Department of Botany, University of Washington, Seattle.
- Olness, Dr. John W.** Brookhaven National Laboratory, Associated Universities, Inc., Upton, New York.
- Olsen, Dr. Edward J.** Department of Geology, Field Museum of Natural History, Chicago, Illinois.
- Olson, Prof. Edward C.** Department of Astronomy, University of Illinois, Urbana.
- Olson, Dr. Everett C.** Department of Zoology, University of California, Los Angeles.
- Olson, Dr. Harry F.** Deceased; formerly, Staff Vice President, Acoustical and Electromechanical Research, RCA Laboratories, Princeton, New Jersey.
- Olson, Dr. Jerry S.** Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Olson, Dr. Norman.** Department of Food Science, University of Wisconsin.
- Onishi, Steven.** Fairchild Imaging, Milpitas, California.
- Oosthuizen, Dr. Patrick H.** Department of Mechanical Engineering, Queen's University, Kingston, Ontario, Canada.
- Oppenheimer, Dr. Ben R.** Department of Astronomy, University of California, Berkeley.
- Oppenheimer, Dr. Steven B.** Department of Biology, California State University, Northridge.
- O'Rahilly, Dr. Ronan.** Carnegie Embryological Laboratories, University of California, Davis.
- Orians, Dr. Gordon.** Department of Zoology, University of Washington, Seattle.
- Oris, Dr. James T.** Department of Zoology, Miami University, Oxford, Ohio.
- Orkin, Dr. Frederick K.** University of California, San Francisco, The Medical Center at the University of California School of Medicine.
- Orrego, Dr. Cristian.** Department of Biology, Brandeis University.
- Orr-Weaver, Dr. Terry.** Whitehead Institute for Biomedical Research, Cambridge, Massachusetts.
- Orville, Dr. Harold D.** Institute for Atmospheric Science, South Dakota School of Mines, Rapid City, South Dakota.
- Orville, Prof. Richard E.** Director, Cooperative Institute for Applied Meteorological Studies, Texas A & M University, College Station.
- Osberg, Prof. Philip H.** Department of Geological Sciences, University of Maine.
- Osborn, Dr. Jeffrey M.** Division of Science, Northeast Missouri State University, Kirksville.
- O'Shaughnessy, Dr. Douglas.** INRS-Telecom, Place Bonaventure, Montreal, Canada.
- Osofsky, Dr. Michael.** Naval Research laboratory Washington, D.C.
- Oster, Prof. Gerald.** Mount Sinai School of Medicine, City University of New York.
- Ostergaard, Dr. H. L.** Department of Biology, University of California, Los Angeles.
- Ostro, Dr. Steven J.** Jet Propulsion Laboratory, California Institute of Technology, Pasadena.
- Ostrom, Dr. John H.** Division of Vertebrate Paleontology, Peabody Museum of Natural History, Yale University.
- Othmer, Prof. Donald F.** Deceased; formerly, Department of Chemical Engineering, Polytechnic Institute of Brooklyn.
- Otis, Dr. Arthur B.** Department of Physiology, College of Medicine, University of Florida.
- Otten, Prof. Ernst Wilhelm.** Institut für Physik, Johannes Gutenberg-Universität Mainz, Germany.
- Otto, Dr. Gilbert F.** Zoology Department, University of Maryland.
- Otto, Dr. Norman.** Ford Motor Research Laboratory, Dearborn, Michigan.
- Over, Dr. Jeff.** Department of Geological Sciences, State University of New York at Geneseo.
- Overhauser, Dr. Albert W.** Department of Physics, Purdue University.

## O

- Obery, Leonard J.** Chief, Plans and Programs Offices, National Aeronautics and Space Administration, Cleveland, Ohio.
- O'Brien, Prof. Michael.** Department of Agricultural Engineering, University of California, Davis.
- O'Connell, Prof. John P.** Department of Chemical Engineering, University of Florida.

- Ovshinsky, Stanford R.** President, Energy Conversion Devices, Inc., Troy, Michigan.
- Owen, Dr. Denis F.** Department of Biology, Oxford Polytechnic.
- Owen, Prof. Guillermo.** Department of Mathematical Sciences, Rice University.
- Owen, Dr. Tobias C.** Department of Earth and Space Sciences, State University of New York, Stony Brook.

## P

- Pacella, Gary.** AMSTA-AR-CCH-C, United States Army Armament Research Development and Engineering Center, Picatinny Arsenal, New Jersey.
- Packer, Dr. Lester.** University of California, Department of Molecular and Cell Biology, Berkeley, California.
- Padian, Prof. Kevin.** Museum of Paleontology, University of California, Berkeley.
- Page, Dr. Roy C.** Research Center in Oral Biology, School of Medicine, University of Washington.
- Pake, Dr. George E.** Vice President, Xerox Corporation; General Manager, Xerox Palo Alto Research Center, Palo Alto, California.
- Palermo, Dr. David S.** Department of Psychology, Pennsylvania State University.
- Palevsky, Dr. Gerald.** Consulting Professional Engineer, Hastings-on-Hudson, New York.
- Palmer, Dr. Allison R.** Department of Earth and Space Sciences, State University of New York, Stony Brook.
- Palmer, Prof. Darwin L.** Chief, Veterans Administration Hospital, Medical Center, Department of Medicine, Infectious Disease Division, University of New Mexico School of Medicine.
- Palmer, Prof. Fred.** Lighting Research Center, Osram Sylvania, Beverly, Massachusetts.
- Palmer, Lawrence M.** Federal Communications Commission, Washington, D.C.
- Palmerlee, Prof. Albert S.** Deceased; formerly, Professor of Engineering Drawing, School of Engineering and Architecture, University of Kansas.
- Palzkill, Dr. David A.** Department of Plant Sciences, University of Arizona.
- Pandolfi, Dr. John M.** Department of Paleobiology, National Museum of Natural History, Smithsonian Institution, Washington, D.C.
- Pang, Prof. Stella.** Department of Electrical Engineering and Computer Science, University of Michigan, Ann Arbor.
- Pangbom, Dr. Jon B.** Director, Alternative Energy Systems Research, Institute of Gas Technology, Chicago, Illinois.
- Panish, Dr. Morton B.** Head, Materials Science Research Department, AT&T Bell Laboratories, Murray Hill, New Jersey.
- Pantell, Dr. Richard.** Electrical Engineering Department, Stanford University.
- Papageorgiou, George.** Research Associate, Department of Botany, University of Illinois, Urbana.
- Papagiannis, Prof. Michael D.** President, IAU Commission 51, Department of Astronomy, Boston University.
- Papendick, Dr. Robert I.** Research Leader, U.S. Department of Agriculture, Agricultural Research Service, Washington State University.
- Parente, Michael.** MP Technologies, Hendersville, North Carolina.
- Park, Prof. David.** Department of Physics, Williams College.
- Parker, Dr. Ingrid M.** Department of Biology, Earth and Marine Sciences, University of California, Santa Cruz.
- Park, Prof. Jae-Woo.** Department of Civil Engineering, University of Hawaii at Manoa.
- Parker, Sybil P.** Formerly, Editor in Chief, "McGraw-Hill Encyclopedia of Science and Technology," McGraw-Hill Book Co., New York.
- Parker, Dr. Thomas E.** National Institute of Standards and Technology, Time and Frequency Division, Boulder, Colorado.
- Parma, Dr. Ana.** International Pacific Halibut Commission, Seattle, Washington.
- Parmentier, Prof. E. Mark.** Department of Geological Sciences, Brown University, Providence, Rhode Island.
- Parmesan, Dr. Camille.** National Center for Ecological Analysis and Synthesis, Santa Barbara, California.
- Parpia, Prof. Jeevak M.** Department of Physics, Cornell University.
- Parr, Dr. J. F.** Biological Waste Management and Organic Resources Laboratory, Beltsville, Maryland.
- Parr, Prof. Robert G.** Department of Chemistry, University of North Carolina.
- Parrish, Dr. Judith Totman.** Department of Geosciences, University of Arizona.
- Parry, Prof. David A. D.** Department of Structural Biology, Rosenstiel Basic Medical Science Research Center, Brandeis University, Waltham, Massachusetts.
- Parsons, Dr. Thomas S.** Department of Zoology, University of Toronto, Ontario, Canada.
- Partridge, Dr. Edward G.** Redondo Beach, California.
- Parvainen, Dr. Pekka.** Polar Image, Turku, Finland.
- Pasachoff, Dr. Jay M.** Hopkins Observatory, Williams College.
- Pascual, Dr. Miguel.** Centro Nacional Patagónico (CONICET), Chubut, Argentina.
- Pasternak, Dr. Gavril W.** Attending Neurologist, Department of Neurology, Memorial Hospital, Sloan-Kettering Institute Cancer Center, New York.
- Pasto, Prof. Daniel J.** Department of Chemistry, University of Notre Dame.
- Patel, Dr. C. K. N.** Bell Laboratories, Murray Hill, New Jersey.
- Paterson, Eric.** Iowa Institute of Hydraulic Research and Department of Mechanical Engineering, University of Iowa, Iowa City.
- Patrick, Norman W.** RCA Corporation, Lancaster, Pennsylvania.
- Patterson, Dr. David J.** Department of Zoology, University of Bristol, England.
- Patton, Dr. Donald J.** Department of Geography, Florida State University.
- Patton, Dr. Harry D.** Chairman, Department of Physiology-Biophysics, School of Medicine, University of Washington.
- Patton, Peter C.** Minnesota Supercomputer Institute, University of Minnesota.
- Patzkowsky, Dr. Mark E.** Department of Geosciences, Pennsylvania State University, University Park.
- Paul, Prof. Burton.** Department of Mechanical Engineering, University of Pennsylvania.
- Paul, Dr. Jacques.** Commissariat à l'Énergie Atomique, Direction des Sciences de la Matière, Gif-sur-Yvette, France.
- Payne, Prof. Joseph N.** School of Education, University of Michigan, Ann Arbor.
- Payne, Prof. Peter A.** Retired; formerly, Vice President for Academic Development, Department of Instrumentation and Analytical Science, University of Manchester, Institute of Science and Technology, Manchester, England.
- Peacey, Dr. John G.** Centre de Recherche Noranda, Pointe-Claire, Quebec, Canada.
- Pecor, Dr. Donald R.** Department of Geology, University of Michigan.
- Pearce, Prof. R. H.** Department of Pathology, Faculty of Medicine, University of British Columbia, Canada.
- Peaslee, Dr. Robert L.** Vice President, Stainless Steel Division, Wall Colmonoy Corp., Detroit, Michigan.
- Pecar, Dr. Joseph A.** Joseph A. Pecar & Associates, Inc., Potomac, Maryland.
- Pechenik, Dr. Jan.** Department of Biology, Tufts University, Medford, Massachusetts.
- Peck, Prof. Raymond E.** Department of Geology, University of Missouri.
- Peck, Dr. Stewart B.** Department of Biology, Carleton University, Ottawa, Ontario, Canada.
- Pecora, Prof. Robert.** Department of Chemistry, Stanford University.
- Pecoraro, Dr. Vincent.** Department of Chemistry, University of Michigan.
- Pedersen, Prof. Niels C.** School of Veterinary Medicine, University of California, Davis.
- Pegg, Prof. David J.** Department of Physics and Astronomy, University of Tennessee, Knoxville.
- Pehlke, Dr. Robert D.** Department of Materials Science and Engineering, University of Michigan.
- Peirce, Dr. G. R.** Engineer, Champaign, Illinois.

- Pelletier, Dr. S. William.** Director, Institute for Natural Product Research, University of Georgia, Athens.
- Pelosi, Dr. James J.** Colonel, U.S. Army, Retired, Houston, Texas.
- Pennak, Dr. Robert W.** Department of Biology, University of Colorado.
- Penneman, Dr. Robert A.** Los Alamos Scientific Laboratory, Los Alamos, New Mexico.
- Penner-Hahn, Prof. James E.** Department of Chemistry, University of Michigan, Ann Arbor.
- Penrose, Prof. Roger.** Mathematical Institute, University of Oxford, England.
- Pepper, Prof. Darrell W.** Department of Mechanical Engineering, University of Nevada, Las Vegas.
- Perch, Michael.** Koppers Company, Inc., Monroeville, Pennsylvania.
- Perl, Prof. Martin L.** Stanford Linear Accelerator Center, Stanford, California.
- Perlmann, Dr. Gertrude E.** Deceased; formerly, Rockefeller University.
- Perrin, Arthur M.** Deceased; formerly President, National Conveyors Company, Inc., Fairview, New Jersey.
- Perry, Astor.** Extension Agronomy Specialist, North Carolina State University.
- Perry, Stephen F.** Exxon Research, Florham Park, New Jersey.
- Perryman, Dr. Michael A. C.** Space Science Department, European Space Agency, ESTEC (SCI-SA), Noordwijk, Netherlands.
- Peskin, Prof. Michael E.** Stanford Linear Accelerator Center, Menlo Park, California.
- Peters, Prof. Philip C.** Department of Physics, University of Washington.
- Peters, Dr. William C.** Professor Emeritus, Mining and Geological Engineering, University of Arizona.
- Petershack, Dr. Victor D.** Rexnord, Inc., Milwaukee, Wisconsin.
- Peterson, Dr. Benjamin B.** Department of Engineering, United States Coast Guard Academy, New London, Connecticut.
- Peterson, Dr. Kirk D.** Department of Engineering, Calvin College, Grand Rapids, Michigan.
- Peterson, Dr. R. L.** Department of Botany, University of Guelph, Ontario, Canada.
- Petschek, Prof. Albert G.** Department of Physics, New Mexico Institute of Mining and Technology, Socorro.
- Pfaffmann, Dr. Carl.** Department of Psychology, Rockefeller University.
- Pfeffer, Dr. Robert A.** U.S. Army, Nuclear and Chemical Agency, Springfield, Virginia.
- Pfleeger, Dr. Charles P.** Trusted Information Systems, Inc., Computer and Communications Security, Networking Telecommunications, Glenwood, Maryland.
- Phadke, Prof. Arun G.** Director, Center for Power Engineering, Virginia Polytechnic Institute and State University, Blacksburg.
- Phaff, Dr. Herman J.** Department of Food Science and Technology, College of Agriculture and Environmental Science, University of California, Davis.
- Phaneuf, Prof. Ronald A.** Chair, Department of Physics, University of Nevada, Reno.
- Phelan, Prof. Richard M.** Department of Mechanical Systems and Design, Cornell University.
- Philander, Prof. S. George.** Program in Atmospheric and Oceanic Sciences, Princeton University.
- Philip, Dr. Cornelius B.** Department of Entomology, California Academy of Sciences, San Francisco.
- Philpison, Dr. William R.** Department of Botany, University of Canterbury, Christchurch, New Zealand.
- Phillips, Dr. James A.** CTR-Division Office, Los Alamos Scientific Laboratory, Los Alamos, New Mexico.
- Phillips, Prof. Tom L.** Department of Botany, University of Illinois, Urbana.
- Phillips, Dr. William D.** National Institute of Standards and Technology, Gaithersburg, Maryland; Nobelist.
- Phillips, William H.** NASA Langley Research Center, Hampton, Virginia.
- Pielou, Dr. E. C.** Department of Biology, University of Lethbridge, Alberta, Canada.
- Pience, Roger D.** Watson Technology, Portland, Maine.
- Pierce, Prof. Allan D.** School of Mechanical Engineering, Georgia Institute of Technology.
- Pierce, Prof. E. Lowe.** Department of Zoology, University of Florida.
- Pierce, Dr. F. J.** Department of Crop and Soil Sciences, Michigan State University, East Lansing.
- Pierotti, Prof. Robert A.** Department of Chemistry, Georgia Institute of Technology.
- Pierre, Dr. Donald A.** Department of Electrical Engineering, College of Engineering, Montana State University.
- Pierscionek, Dr. Barbara K.** Department of Biomedical Sciences, University of Bradford, United Kingdom.
- Pike, Dr. Andrew C.** Neotronics Scientific Ltd., United Kingdom.
- Pike-Tay, Dr. Anne.** Department of Anthropology, Vassar College, Poughkeepsie, New York.
- Pilbrow, Prof. John R.** Head, Department of Physics, Monash University, Clayton, Victoria, Australia.
- Pimm, Dr. Stuart.** Department of Zoology, University of Tennessee, Knoxville.
- Pinder, Dr. George F.** Department of Civil and Geological Engineering, Princeton University.
- Pinedo, Prof. Michael.** Statistics and Operations Research Department, Stern School of Business, New York University, New York.
- Pinkava, Dr. Donald J.** Director, ASU Herbarium, Department of Botany, Arizona State University.
- Pinkel, Benjamin.** Consulting Engineer, Santa Monica, California.
- Pinker, Prof. Rachel T.** Department of Meteorology, University of Maryland.
- Pionke, Dr. Harry B.** Pasture Systems and Watershed Management Research Laboratory, U.S. Department of Agriculture-Agricultural Research Service, University Park, Pennsylvania.
- Pipkin, Prof. Francis M.** Department of Physics, Harvard University.
- Pitchford, Dr. Leanne C.** Sandia National Laboratories, Albuquerque, New Mexico.
- Pitman, Waker C., III.** Lamont-Doherty Geological Observatory, Palisades, New York.
- Platt, Donald.** Adjunct Professor of Space Systems, Spaceport Graduate Center, Florida Institute of Technology, Satellite Beach.
- Plaut, Dr. Gerhard W. E.** Professor Emeritus of Biochemistry, Temple University School of Medicine, Philadelphia, Pennsylvania.
- Pleasants, Dr. Julian R.** International Committee on Laboratory Animals, Lobund Laboratory, University of Notre Dame.
- Plecnik, Prof. Joseph M.** Department of Civil Engineering, California State University at Long Beach.
- Plesset, Dr. Michael.** Aerospace Corporation, Los Angeles, California.
- Ploem, Dr. Johan S.** Laboratorium voor Cytochemie en Cytometrie, Rijksuniversiteit Leiden, Wassenaarseweg, Netherlands.
- Plotnick, Dr. Roy E.** Department of Geological Sciences, College of Liberal Arts and Sciences, University of Illinois.
- Plueddemann, Dr. Edwin P.** Organic Laboratories, Dow Corning Corporation, Midland, Michigan.
- Pocius, Dr. Alphonsus V.** AC&S Division, 3M Company, St. Paul, Minnesota.
- Pohl, Dr. D. W.** IBM Research Division, Zurich Research Laboratory, Ruschlikon, Switzerland.
- Pohl, Prof. Robert O.** Laboratory of Atomic and Solid State Physics, Cornell University.
- Pohlmann, Prof. Kenneth C.** School of Music, University of Miami, Coral Gables, Florida.
- Poknivar, Adolph L.** Formerly, Manager, Technical Publications, International Lead Zinc Research Organizations, Inc., New York.
- Polchinski, Prof. Joseph.** Institute for Theoretical Physics, University of California, Santa Barbara.
- Policy, Dr. Margaret J.** Department of Medicine, Cornell Medical Center, New York.
- Polking, Dr. John C.** Department of Mathematics, Rice University.
- Pollack, Dr. Henry N.** Department of Geological Sciences, University of Michigan.
- Pollack, Dr. James B.** Ames Research Center, Moffett Field, California.
- Pollard, Dr. Thomas.** Department of Cell Biology and Anatomy, Johns Hopkins

- University School of Medicine, Baltimore, Maryland.
- Pollard, Dr. William G.** Oak Ridge Associated Universities.
- Polly, Dr. P. David.** Department of Anatomy, Queen Mary and Westfield College, London, United Kingdom.
- Pomykalski, Dr. James J.** Assistant Professor, Integrated Science and Technology and Computer Science Programs, James Madison University, Harrisonburg, Virginia.
- Ponikvar, Ade L.** Formerly, Editor, Production and Drilling, "Petroleum Week," New York.
- Pont-Lezica, Dr. Rafael.** Department of Biology, Washington University, St. Louis, Missouri.
- Pontecorvo, Dr. Guido.** Imperial Cancer Research Fund Laboratories, London, England.
- Poole, Prof. Colin F.** Department of Chemistry, Wayne State University, Detroit, Michigan.
- Pope, Dr. Joseph.** Pope Engineering Company, Newton Centre, Massachusetts.
- Pope, Michael.** Pope, Evans and Robbins, Consulting Engineers, New York.
- Popelka, Dr. Gerald R.** Head of Audiology, Research Laboratories, Central Institute for the Deaf, St. Louis, Missouri.
- Popper, Dr. Arthur N.** Director, Neuroscience and Cognitive Science Program, Department of Biology, University of Maryland, College Park.
- Popper, Dr. Daniel M.** Department of Astronomy, University of California, Los Angeles.
- Porges, Dr. Steven.** Department of Human Development, University of Maryland, College Park.
- Porter, Dr. Richard D.** Chair, Department of Mathematics, Northeastern University, Boston, Massachusetts.
- Posada, German.** Research Associate, Department of Psychology, State University of New York, Stony Brook.
- Postgate, Prof. John R.** Department of Microbiology, University of Sussex, England.
- Postow, Dr. Elliot.** National Institutes of Health, Bethesda, Maryland.
- Potter, Dr. Kathleen N.** Department of Microbiology, University of Texas Southwestern Medical Center, Dallas.
- Potter, Prof. M. David.** School of Business, San Francisco State College.
- Potter, Prof. Norman N.** Department of Food Science, Cornell University.
- Potts, Dr. Kevin T.** Department of Chemistry, Rensselaer Polytechnic Institute.
- Poulson, Dr. Donald F.** Department of Biology, Yale University.
- Povey, Dr. Sue.** Galton Laboratory, University College, London, England.
- Povh, Dr. Bogdan.** Max Planck Institut für Kernphysik, Saupfercheckweg, Germany.
- Powell, Claud.** Consultant, Navigation, Bourton-on-the-Water, Gloucestershire, England.
- Powell, Jeffrey R.** Department of Biology, Yale University.
- Powell, Robert C.** Consultant, Physics, Gaithersburg, Maryland.
- Powell, Dr. Wayne B.** Vice President for Research and Associate Dean of the Graduate College, Oklahoma State University, Stillwater.
- Powers, Dr. Kerns H.** RCA David Sarnoff Laboratories, Princeton, New Jersey.
- Pozar, Prof. David M.** Department of Electrical and Computer Engineering, University of Massachusetts, Amherst.
- Pozos, Dr. Robert S.** Sustained Performance Program Manager, Department of the Navy, Naval Health Research Center, Department of Defense, San Diego, California.
- Praston, Dr. Lincoln F.** Research Scientist, Institute of Arctic and Alpine Research, Department of Geology, University of Colorado, Boulder.
- Prescott, David M.** Department of Molecular, Cellular and Developmental Biology, Boulder, Colorado.
- Prescott, Dr. Gerald W.** Department of Botany, University of Wisconsin.
- Presley, Dr. John.** McGill University, Department of Anatomy and Cell Biology, Montreal, Canada.
- Price, Dr. James F.** Department of Physical Oceanography, Woods Hole Oceanographic Institution, Massachusetts.
- Price, Dr. P. Buford, Jr.** Lawrence Berkeley Laboratory, University of California, Berkeley.
- Price, Dr. Peter W.** Department of Entomology, Northern Arizona University.
- Priester, Gayle B.** Consulting Engineer, Baltimore, Maryland.
- Primack, Prof. Joel R.** Physics Department, University of California, Santa Cruz, California.
- Princen, L. H.** Associate Center Director, North Regional Research Center, Department of Agriculture, Peoria, Illinois.
- Prinn, Prof. Ronald G.** Department of Earth, Atmosphere and Planetary Sciences, Massachusetts Institute of Technology, Cambridge.
- Prisbrey, Prof. Keith A.** Department of Metallurgical and Mining Engineering, College of Mines and Earth Resources, University of Idaho, Moscow.
- Pritchard, Prof. David E.** Department of Physics, Massachusetts Institute of Technology, Cambridge.
- Pritchard, Tram C.** Lockheed Missiles and Space Company, Sunnydale, California.
- Pritchett, Prof. Wilson S.** Senior Project Engineer, Noller Control Systems, Inc., Richmond, California.
- Pritsker, Prof. A. Alan B.** School of Industrial Engineering, Purdue University.
- Proctor, Mary C.** Department of Surgery, University of Michigan Hospitals, Ann Arbor.
- Prothero, Dr. Donald R.** Chair, Department of Geology, Occidental College, Los Angeles, California.
- Puchstein, Albert F.** Deceased; formerly, Consulting Engineer, Columbus, Ohio.
- Puck, Dr. Theodore T.** Department of Biophysics, University of Colorado Medical Center, Denver.
- Pugel, Andrew.** California State University at Long Beach, Department of Civil Engineering, Long Beach, California.
- Pullen, Dr. Keats A., Jr.** Ballistic Research Laboratories, Aberdeen Proving Ground, Maryland.
- Purchon, Dr. Richard D.** Department of Zoology, Chelsea College, University of London, England.
- Purvis, Dr. Andy.** Department of Zoology, University of Oxford, United Kingdom.
- Putnam, Prof. Russell C.** Professor Emeritus, Case Institute of Technology.
- Putterman, Dr. Seth.** Department of Physics, University of California, Los Angeles.
- Pyeritz, Prof. Reed E.** Director, Center for Medical Genetics, Allegheny Health, Education and Research Foundation, Pittsburgh, Pennsylvania.
- Pyrke, John K. M.** Slocum and Fuller, New York.

## Q

- Quaife, Carol.** Department of Pathology, University of Washington.
- Qualset, Dr. Calvin O.** Department of Agronomy and Range Science, University of California, Davis.
- Quarles, Dr. John M.** Department of Medical Microbiology & Immunology, Texas A & M University, College Station.
- Que, Prof. Lawrence Jr.** Center for Metals in Biocatalysis, University of Minnesota, Minneapolis.
- Quigg, Dr. Chris.** Lawrence Berkeley Laboratory, University of California, Berkeley.
- Quimby, Dr. Edith H.** Department of Radiology, College of Physicians and Surgeons, Columbia University.
- Quinn, Dr. T. J.** Bureau International des Poids et Mesures, Pavillion de Breteuil, Sèvres, France.
- Quirin, Edward J.** Consulting Engineer, Besier, Gibble & Quirin, Old Saybrook, Connecticut.
- Quiroga, Dr. Carlos.** Pacific Technical Documentation, Windsor, California.

## R

- Raab, Dr. Frederick H.** President and Owner, Green Mountain Radio Research Company, Winooski, Vermont.
- Raad, Prof. Peter E.** Mechanical Engineering Department, School of

- Engineering and Applied Science, Southern Methodist University, Dallas, Texas.
- Rabb, David D.** Mining Engineer-Metallurgist, Tucson, Arizona.
- Rabinowicz, Prof. Ernest.** Department of Mechanical Engineering, Massachusetts Institute of Technology.
- Rachubinski, Dr. Richard A.** Department of Cell Biology and Anatomy, University of Alberta, Edmonton, Alberta, Canada.
- Rademacher, Prof. Hans.** Deceased; formerly, Professor Emeritus of Mathematics, University of Pennsylvania.
- Radforth, Dr. Norman W.** Muskeg Research Institute, University of New Brunswick, Canada.
- Radin, Harley W.** Chairperson and Chief Executive, Direct Broadcasting Satellite Corporation, Washington, D.C.
- Radke, Dr. Rodney O.** Agricultural Product Research Laboratory, Monsanto Company, St. Louis, Missouri.
- Radok, Dr. Uwe.** Environmental Research (CIRES), University of Colorado.
- Rae, Dr. Peter M. M.** Molecular Diagnostics, Inc., West Haven, Connecticut.
- Raffel, Dr. Sidney.** Department of Medical Microbiology, School of Medicine, Stanford University.
- Rafferty, Vincent F.** Siemens Enterprise Networks, Reston, Virginia.
- Rahenkamp, Robert A.** International Business Machines, Lexington, Kentucky.
- Rahn, Frank J.** Nuclear Power Division, Electric Power Research Institute, Palo Alto, California.
- Raikhel, Dr. Natasha V.** Department of Energy, Michigan State University, East Lansing.
- Rajagopal, Dr. Krishna.** Lyman Laboratory of Physics, Harvard University.
- Rajan, Prof. Krishna.** Materials Engineering Department, Rensselaer Polytechnic Institute, Troy, New York.
- Raju, Prof. G. V. S.** Director, Division of Engineering, University of Texas, San Antonio.
- Rakovan, Prof. John.** Department of Geology, Miami University, Oxford, Ohio.
- Ram, Dr. Prahlad T.** Department of Pharmacology, Mount Sinai School of Medicine, New York.
- Ramberg, Dr. Edward G.** RCA Laboratories, Princeton, New Jersey.
- Ramdas, Prof. Anant K.** Department of Physics, Purdue University, West Lafayette, Indiana.
- Ramey, Dr. Robert L.** Department of Electrical Engineering, University of Virginia.
- Ramsey, Dr. Norman F.** Department of Physics, Harvard University.
- Randerson, Dr. Peter.** Department of Applied Biology, University of Wales Institute of Science and Technology, Cardiff.
- Rao, Dr. V. N. M.** Dupont Central Research and Development, Wilmington, Delaware.
- Raper, Dr. John R.** Professor of Botany, Harvard University.
- Rapp, Prof. George, Jr.** Dean, College of Letters and Science, University of Minnesota.
- Raps, Dr. Shirley.** Department of Biological Sciences, Hunter College, City University of New York.
- Raski, Dr. Dewey J.** Department of Nematology, University of California, Davis.
- Rasmussen, Dr. D. Tab.** Department of Anthropology, Washington University, St. Louis, Missouri.
- Rasmussen, Dr. Howard.** Department of Biochemistry, School of Medicine, University of Pennsylvania.
- Rasmussen, Dr. Norman C.** Department of Nuclear Engineering, Massachusetts Institute of Technology.
- Rasmussen, Dr. Eugene M.** Geophysical Fluid Dynamics Laboratory, Environmental Science Services Administration, Princeton, New Jersey.
- Ratay, Dr. Robert T.** Consulting Engineer, Manhasset, New York.
- Ratliff, Dr. Floyd.** Department of Psychology, Rockefeller University.
- Ratnoff, Dr. Oscar D.** Department of Medicine, Case Western Reserve University.
- Rau, Prof. A. R. P.** Department of Physics, Louisiana State University, Baton Rouge.
- Rauber, Prof. Robert M.** Department of Atmospheric Science, University of Illinois at Urbana-Champaign, Urbana.
- Rauchfuss, Dr. T. B.** School of Chemical Sciences, University of Illinois, Urbana.
- Raum, Dr. Donald.** Center for Blood Research, Boston, Massachusetts.
- Ravishankara, Dr. A. R.** National Oceanic and Atmospheric Administration, Aeronomy Laboratory, Boulder, Colorado.
- Rayner, Dr. G. H.** Consultant, Teddington, Middlesex, England.
- Raz, Prof. Tzvi.** Faculty of Management, Tel Aviv University, Ramat Aviv, Israel.
- Read, Prof. Clark P.** Deceased; formerly, Department of Biology, Rice University.
- Reay, Dr. Donald T.** King County Medical Examiner, Harborview Hospital, Seattle, Washington.
- Rebbi, Dr. Claudio.** Department of Physics, Brookhaven National Laboratory, Upton, New York.
- Rechtin, Dr. Eberhardt.** Retired; formerly, Department of Industrial and Systems Engineering, School of Engineering, University of Southern California.
- Reddish, Dr. George F.** Deceased; formerly, St. Louis College of Pharmacy and Allied Sciences.
- Redhead, Dr. Scott A.** Mycologist, Biosystematics Research Centre, Agriculture Canada, Research Branch, Central Experimental Farm, Ottawa, Ontario, Canada.
- Reed, Oscar, Jr.** Consulting Engineer, Telecommunications, Silver Spring, Maryland.
- Reed, Dr. Randall.** Department of Molecular Biology and Genetics, School of Medicine, Johns Hopkins University.
- Reeder, Dr. Richard J.** Geosciences Program, Department of Earth and Space Sciences, State University of New York, Stony Brook.
- Reed-Hill, Dr. Robert E.** Department of Metallurgical Science and Engineering, University of Florida.
- Rees, Dr. Bryant E.** Professor of Biology, Fresno State College.
- Rees, Jack.** Corporate Services Staff, Exxon Research and Engineering Company, Florham Park, New Jersey.
- Reeve, Dr. Roger M.** Western Regional Research Laboratory, U.S. Department of Agriculture, Albany, California.
- Regnery, Dr. Russell.** Supervisory Research Microbiologist, Viral and Rickettsial Zoonoses Branch, Department of Health and Human Services, Centers for Disease Control and Prevention, Atlanta, Georgia.
- Reich, Prof. Herbert J.** (Retired), Department of Engineering and Applied Science, Yale University.
- Reichman, Lee B.** Department of Medicine, College of Medicine and Dentistry, Newark, New Jersey.
- Reichmann, Dr. M. E.** Department of Microbiology, University of Illinois.
- Reid, Dr. David A.** Agricultural Research Service, U.S. Department of Agriculture, Tucson, Arizona.
- Reid, Prof. Evans B.** Professor Emeritus, Department of Chemistry, Colby College.
- Reid, Joseph L.** Scripps Institution of Oceanography, La Jolla, California.
- Reid, Dr. Walter V.** World Resources Institute, Washington, D.C.
- Reiling, Dr. Gilbert H.** Lighting Research and Technical Services Operation, General Electric Company, Cleveland, Ohio.
- Reilly, John C., Jr.** Naval Historical Center, Navy Department, U.S. Department of Defense.
- Reingold, Dr. Edward M.** Chairman, Department of Computer Science, Illinois Institute of Technology, Chicago, Illinois.
- Reinhardt, Dr. Nicholas.** Consultant, Lexington, Massachusetts.
- Reintjes, John F.** Naval Research Laboratory, Washington, D.C.
- Reischmann, Rev. Placidus G., O.S.B.,** Head, Department of Biology, St. Martin's College, Olympia, Washington.
- Reiter, Dr. Elmar R.** Department of Atmospheric Science, Colorado State University.
- Reitz, Dr. Louis P.** (Retired) Corps Research Division, Agricultural Research Service, U.S. Department of Agriculture, Beltsville, Maryland.
- Remde, Dr. Harry F.** Chief, Basic Physics Research Section, Johns-Manville Research and Engineering Center, Manville, New Jersey.
- Remley, Frederick M., Jr.** Retired; formerly, Center for Information Technology Integration, University of Michigan.
- Retallack, Dr. Gregory J.** Department of Geological Sciences, College of Arts and Sciences, University of Oregon.

- Rettinger, Michael.** Deceased; formerly, Consultant on Acoustics, Encino, California.
- Reynolds, Gardner M.** Dames & Moore, Los Angeles, California.
- Reynolds, Mark F.** Graduate Research Assistant, Department of Chemistry, University of Wisconsin, Madison.
- Ribbe, Dr. Paul H.** Department of Geological Sciences, Virginia Polytechnic Institute.
- Rich, Prof. Arthur.** Deceased; formerly, Department of Physics, University of Michigan.
- Rice, Dr. Mary E.** Associate Curator, Division of Worms, Smithsonian Institution.
- Rice, Dr. Michael.** Department of Fish, Animal and Veterinary Science, University of Rhode Island, Kingston, Rhode Island.
- Rich, Dr. Saul.** Connecticut Agricultural Experiment Station, New Haven, Connecticut.
- Richards, Dr. Frank F.** Department of Medicine, Yale University.
- Richards, Dr. Oscar W.** (Retired) College of Optometry, Pacific University.
- Richardson, Dr. Philip.** Department of Physical Oceanography, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.
- Richter, Reinhard H.** Manager, Polyurethane Research, Dow Chemical U.S.A., North Haven Laboratories, North Haven, Connecticut.
- Rickert, Richard M.** AT&T Consumer Products Laboratories, Indianapolis, Indiana.
- Ricksecker, Ralph E.** Director of Metallurgy, Chase Brass and Copper Company, Cleveland, Ohio.
- Riddle, Dr. Mark A.** Department of Psychiatry and Behavioral Sciences, Johns Hopkins Medical Institutions, Baltimore, Maryland.
- Riedel, Dr. Rupert J.** Department of Zoology, University of North Carolina.
- Ries, Dr. Harold C.** Stanford Research Institute, Menlo Park, California.
- Rigby, Dr. J. Keith.** Department of Geology, Brigham Young University.
- Riggs, Dr. Austen F.** Department of Zoology, University of Texas, Austin.
- Riggs, Dr. Lorrin A.** Department of Psychology, Brown University.
- Rijnsdorp, Prof. Johannes E.** University of Twente, Enschede, Netherlands.
- Riley, Frank.** Senior Vice-President, Bodine Assembly Systems, Bridgeport, Connecticut.
- Riley, Dr. Pete.** Science Applications International Corporation, San Diego, California.
- Riley, Dr. Ralph.** Plant Breeding Institute, Cambridge, England.
- Riley, Dr. Reed F.** Quantum Electronics Group, General Telephone and Electronics, Bayside, New York.
- Rillema, Prof. James A.** Professor of Physiology, Department of Physiology, School of Medicine, Wayne State University.
- Rindler, Dr. Michael.** Associate Professor of Cell Biology, New York University School of Medicine, New York.
- Riordan, Prof. James.** Center for Biochemical and Biophysical Sciences and Medicine, Harvard Medical School, Boston, Massachusetts.
- Risebrough, Dr. Robert W.** Research Ecologist, Bodega Marine Laboratory, University of California, Berkeley.
- Riser, Dr. Stephen C.** School of Oceanography, University of Washington, Seattle.
- Risser, Dr. Paul G.** Vice President for Research, University of New Mexico.
- Ritchey, Dr. H. W.** President, Thiokol Chemical Corporation, Ogden, Utah.
- Ritchie, Dr. J. C.** Department of Biology, Trent University, Peterborough, Ontario, Canada.
- Ritchie, Dr. Rufus H.** Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Rizack, Dr. Martin A.** Department of Medicine, Rockefeller University.
- Robb, D. D. D. D.** Robb and Associates, Consulting Engineers, Electric Power Systems, Salina, Kansas.
- Robbins, Dr. John A.** Great Lakes Environmental Research Laboratory, National Oceanic and Atmospheric Administration, Ann Arbor, Michigan.
- Robbins, Nathaniel, Jr.** Director of Engineering, Residential Division, Honeywell, Inc., Minneapolis, Minnesota.
- Roberts, Dr. Andrew.** Department of Oceanography, University of Southampton, Southampton Oceanography Centre, United Kingdom.
- Roberts, Dr. Arthur.** National Accelerator Laboratory, Batavia, Illinois.
- Roberts, J. K.** (Retired) Research and Development Department, Standard Oil Company, Chicago, Illinois.
- Roberts, Prof. Louis D.** Department of Physics, University of North Carolina.
- Roberts, Dr. Richard J.** Cold Spring Harbor Laboratories, Cold Spring Harbor, New York.
- Robertson, Dr. J. David.** Department of Anatomy, Duke University Medical Center.
- Robertson, Dr. James S.** Medical Department, Medical Physics Division, Brookhaven National Laboratory, Upton, New York.
- Robertson, Lemuel C.** Newport News Shipbuilding and Dry Dock Company, Newport News, Virginia.
- Robinovitch, Dr. Murray.** Department of Oral Biology, University of Washington School of Dentistry, Seattle.
- Robinson, Prof. Arthur H.** Department of Geography, University of Wisconsin.
- Robinson, Prof. Richard W.** Department of Seed and Vegetable Sciences, New York State Agricultural Experiment Station, Cornell University.
- Robinson, W. V.** Processor Technology Research Group, Bell Laboratories, Whippany, New Jersey.
- Rochow, Prof. Eugene G.** (Retired) Department of Chemistry, Harvard University.
- Rock, Dr. Irwin.** Department of Psychology, University of California, Berkeley.
- Rockett, Frank H.** Engineering Consultant, Charlottesville, Virginia.
- Rodden, Dr. William P.** Consulting Engineer, La Canada-Flintridge, California.
- Roddiss, Louis H., Jr.** President, Consolidated Edison Company of New York, Inc.
- Rodier, Dr. Patricia M.** Department of Anatomy, School of Medicine, University of Virginia.
- Rodman, Dr. James.** Program Director for Systematic Biology, National Science Foundation, Arlington, Virginia.
- Roe, K. Keith.** Chairman and President, Burns & Roe, Inc., Oradell, New Jersey.
- Roehl, Dr. Bernie.** Department of Electrical and Computer Engineering, University of Waterloo, Ontario, Canada.
- Rogallo, Francis M.** (Retired) NASA Langley Research Center, Hampton, Virginia.
- Rogers, Dr. Harry C.** Department of Metallurgical Engineering, Drexel University, Philadelphia, Pennsylvania.
- Rogowski, Prof. Augustus R.** Department of Mechanical Engineering, Massachusetts Institute of Technology.
- Rohde, Dr. Richard A.** Department of Plant Pathology, University of Massachusetts.
- Rohlf, Dr. James W.** Department of Physics, Boston University.
- Rohrlich, Prof. F.** Department of Physics, Syracuse University.
- Roller, Dr. Duane E.** Deceased; formerly, Harvey Mudd College, Claremont, California.
- Romano, Frank.** Consultant, Graphic Arts, Salem, New Hampshire.
- Romer, Prof. Alfred S.** Deceased; formerly, Museum of Comparative Zoology, Harvard University.
- Romick, Dr. Gerald J.** Applied Physics Laboratory, Johns Hopkins University, Laurel, Maryland.
- Rosen-Runge, Prof. Edward C.** Department of Biological Structure, School of Medicine, University of Washington.
- Roper, Dr. Stephen D.** University of Miami School of Medicine, Department of Physiology and Biophysics, Miami, Florida.
- Roper, Paul J.** Department of Geology, University of Southwestern Louisiana.
- Rosa, Dr. Patricia.** National Institutes of Health and Allergies, Rocky Mountain Laboratories, Hamilton, Montana.
- Rose, Dr. William Ingersoll, Jr.** Department of Geology and Geological Engineering, Michigan Technological University.
- Rosen, Prof. Barry.** Department of Biological Chemistry, University of Maryland.
- Rosen, Dr. Fred S.** President, Center for Blood Research, Department of Pediatrics, Harvard Medical School, Children's

- Hospital Medical Center, Boston, Massachusetts.
- Rosen, Dr. Kenneth H.** AT&T Laboratories, Holmdel, New Jersey.
- Rosen, Dr. Robert.** Department of Physiology and Biophysics, Faculty of Medicine, Dalhousie University, Halifax, Nova Scotia, Canada.
- Rosenbaum, Prof. Fred J.** Department of Electrical Engineering, Washington University.
- Rosenberg, Dr. Eugene.** Department of Microbiology, George S. Wise Faculty of Life Sciences, Tel Aviv University, Israel.
- Rosenberg, Leon T.** Senior Consultant, Generator Design, Generation, Installation, and Service, Allis-Chalmers Manufacturing Company, Milwaukee, Wisconsin.
- Roskoski, Dr. Robert, Jr.** Department of Biochemistry and Molecular Biology, Louisiana State University, New Orleans.
- Ross, Dr. Charles A.** Department of Geology, Western Washington State College.
- Ross, Dr. Edward S.** California Academy of Sciences, San Francisco.
- Ross, Dr. Herbert H.** Illinois State Natural History Survey, Urbana.
- Ross, Dr. J.** Central Science Laboratory, Surrey, United Kingdom.
- Ross, Dr. Malcolm.** Washington, D.C.
- Ross, Dr. Robert S.** Environmental Structures, Inc., Cleveland, Ohio.
- Ross, Prof. Sidney.** Department of Chemistry, Rensselaer Polytechnic Institute.
- Rosby, Prof. H. Thomas.** Graduate School of Oceanography, University of Rhode Island, Kingston.
- Rossing, Dr. Thomas D.** Department of Physics, Northern Illinois University, DeKalb.
- Rossini, Dr. Aldo A.** Professor of Medicine, and Director, Division of Diabetes, University of Massachusetts Medical School, Worcester.
- Rossmessl, Dr. Paul G.** Senior Research Scientist, American Institute for Research, Washington, D.C.
- Rostoker, Dr. William.** Department of Materials Engineering, University of Illinois, Chicago.
- Roth, Willard.** Engineer, Sunbeam Equipment Corporation, Meadville, Pennsylvania.
- Rothblum, Richard Stone.** David W. Taylor Naval Ship Research and Development Center, Bethesda, Maryland.
- Rothschild, Dr. Bruce M.** Youngstown, Ohio.
- Roundhill, Dr. D. Max.** Department of Chemistry, Tulane University.
- Rowe, Prof. D. M.** NEDO Centre for Thermoelectric Engineering, Division of Electronic Engineering, University of Wales, Cardiff, United Kingdom.
- Rowell, Prof. A. J.** Department of Geology, University of Kansas.
- Rowell, Prof. Roger M.** Project Leader, Modified Lignocellulosic Materials, Forest Products Laboratory, University of Wisconsin-Madison.
- Rowen, Prof. Alan L.** Webb Institute of Naval Architecture, Glen Cove, New York.
- Rowley, Dr. W. R. C.** Department of Trade and Industry, Division of Mechanical and Optical Metrology, National Physical Laboratory, Teddington, Middlesex, England.
- Rownd, Dr. Robert H.** Department of Molecular Biology, Northwestern Medical School.
- Roy, Natalie, U.** Director of Recycling and Legislative Affairs, Glass Packaging Institute, Washington, D.C.
- Rozeanu, Prof. L.** Department of Material Science, Technion, Israel Institute of Technology.
- Rubinstein, Sue R.** Marketing Program Services Group, The Aries Group, Rockville, Maryland.
- Rubis, Prof. David D.** Department of Plant Sciences, College of Agriculture, University of Arizona.
- Ruch, Prof. Fritz.** Department of General Botany, Swiss Federal Institute of Technology, Zurich.
- Ruch, Prof. Theodore C.** Director, Regional Primate Research Center; Professor, Department of Physiology and Biophysics, School of Medicine, University of Washington.
- Ruddat, Dr. Manfred.** Department of Molecular Genetics and Cell Biology, University of Chicago, Barnes Laboratory.
- Ruderman, Dr. Audrey J.** Department of Psychology, University of Illinois, Chicago.
- Rudnick, Dr. Dorothea.** Department of Biology, Albertus Magnus College, Yale University.
- Ruffing, Jaime.** AMSTA-AR-ASP, U.S. Army Armament Research Development and Engineering Center, Picatinny Arsenal, New Jersey.
- Rulfs, Dr. Charles L.** Department of Chemistry, University of Michigan.
- Rumble, Dr. Douglas, III.** Petrologist, Geophysical Laboratory, Carnegie Institution, Washington, D.C.
- Rumsey, Dr. James W.** Department of Agricultural Engineering, University of California, Davis.
- Rundman, Prof. Karl.** Department of Metallurgical Engineering, Michigan Technological University.
- Runham, Dr. Norman.** Department of Zoology, University College of North Wales, Bangor.
- Runnegar, Dr. Bruce.** Department of Earth and Space Sciences, University of California, Los Angeles.
- Ruoff, Dr. Kathryn L.** Francis Blake Bacteriology Laboratories, Department of Microbiology and Molecular Genetics, Massachusetts General Hospital, Harvard Medical School, Boston, Massachusetts.
- Rupp, Arthur F.** Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Rusk, Dr. Rogers D.** Mount Holyoke College.
- Russell, Dr. Allen S.** Vice President, Alcoa Laboratories, Aluminum Company of America, Pittsburgh, Pennsylvania.
- Russell, Dr. Howard W.** Deceased; formerly, Technical Director, Battelle Memorial Institute, Columbus, Ohio.
- Russell-Hunter, Prof. W. D.** Professor of Zoology, Department of Biology, Syracuse University.
- Rust, Dr. Brian R.** Department of Geology, University of Ottawa, Ontario, Canada.
- Rust, Dr. David M.** Applied Physics Laboratory, Johns Hopkins University, Laurel, Maryland.
- Rutger, J. N.** Department of Agronomy, University of California, Davis.
- Ruthroff, Clyde L.** Consultant, Holmdel, New Jersey.
- Rutkow, Dr. Ira M.** Hernia Center, Freehold, New Jersey.
- Rutledge, Dr. Steven A.** Department of Atmospheric Science, Colorado State University, Fort Collins.
- Ryan, Prof. James J.** Professor Emeritus of Mechanical Engineering, University of Minnesota.
- Ryan, Dr. Kenneth J.** Department of Pathology, University of Arizona Medical Center, Tucson.
- Ryge, Dr. Peter.** Vice President for Engineering, Ancore Corporation, Santa Clara, California.
- Ryland, Prof. John S.** Head of Biology, School of Natural Resources, University of the South Pacific, Laucala Bay, Suva, Fiji.

## S

- Saad, Prof. Michael L.** Department of Mechanical Engineering, Santa Clara University, Santa Clara, California.
- Saaty, Prof. Thomas L.** Graduate School of Business, University of Pittsburgh.
- Sabo, Dr. John L.** National Center for Ecological Analysis and Synthesis, Santa Barbara, California.
- Sadaway, Prof. Donald R.** Massachusetts Institute of Technology, Department of Materials Science and Engineering, Cambridge.
- Sadwick, Dr. Laurence P.** Electrical Engineering Department, University of Utah, Salt Lake City.
- Saenger, Dr. Peter.** Centre for Coastal Management, University of New England, Northern Rivers, Lismore, Australia.
- Saenger, Dr. Wolfram.** Max Planck-Institut für Experimentelle Medizin, Göttingen, Germany.
- Sage, Prof. Andrew P.** Founding Dean Emeritus and First American Bank Professor. University Professor, School of Information Technology and Engineering, George Mason University, Fairfax, Virginia.
- Saito, Dr. Tsunemasa.** Lamont-Doherty Geological Observatory, Palisades, New York.

- Šajgalík, Dr. Pavol.** Institute of Organic Chemistry, Slovak Academy of Sciences, Bratislava Slovak Republic, Bratislava, Czechoslovakia.
- Salam, Prof. Abdus.** Deceased; formerly, Director, International Centre for Theoretical Physics, Trieste, Italy.
- Salazar, Prof. Deborah A.** Department of Geography, Oklahoma State University, Stillwater.
- Salisbury, Dr. Alan B.** Chairman, Learning Tree International, Reston, Virginia.
- Salisbury, Dr. Frank B.** Plant Science Department, Utah State University.
- Salkin, Dr. Ira F.** Wadsworth Center, New York Department of Health, Albany, New York.
- Saltzman, Dr. W. Mark.** Department of Chemical Engineering, G. W. C. Whiting School of Engineering, Johns Hopkins University, Baltimore, Maryland.
- Salutsky, Dr. Murrell L.** Vice President, Research, Dearborn Chemical Division, W. R. Grace and Company, Lake Zurich, Illinois.
- Samios, Dr. Nicholas P.** Brookhaven National Laboratory, Upton, New York.
- Samson, Prof. Perry.** Department of Atmospheric, Oceanic, and Space Sciences, University of Michigan, Ann Arbor.
- Samter, Dr. Max.** Institute of Allergy and Clinical Immunology, Grant Hospital of Chicago.
- San Martin, Robert L.** Deputy Assistant Secretary for Renewable Energy, Department of Energy, Washington, D.C.
- Sanchez, Dr. Anthony.** Research Officer, Department of Health and Human Services, Centers for Disease Control and Prevention, Atlanta, Georgia.
- Sanchez-Sinencio, Dr. Edgar.** Department of Electrical Engineering, Texas A & M University.
- Sandage, Dr. Allan.** Mount Wilson and Palomar Observatories, Pasadena, California.
- Sandberg, Dr. Charles.** U.S. Geological Survey, Denver, Colorado.
- Sandberg, Dr. Philip A.** Department of Geology, University of Illinois at Urbana-Champaign.
- Sanders, Dr. Frederick.** Department of Meteorology, Massachusetts Institute of Technology.
- Sanders, Dr. Robert W.** Department of Zoology, University of Georgia.
- Sanders, Prof. Tom H., Jr.** Department of Materials Engineering, Purdue University.
- Sandier, Prof. Stanley I.** Department of Chemical Engineering, University of Delaware.
- Sandretto, Brig. Gen. Peter C.** Deceased; formerly, Director, Engineering Management, International Telephone and Telegraph Corporation.
- Sankey, Dr. Bruce M.** Petroleum Products Division, Imperial Oil, Ltd., Sarnia, Ontario, Canada.
- Sankey, E. W.** Marion Power Shovel Division, Dresser Industries, Inc., Marion, Ohio.
- Sarachik, Prof. Edward S.** Department of Atmospheric Sciences, University of Washington, Seattle.
- Sargent, Dr. Anneila I.** Owens Valley Radio Observatory, California Institute of Technology, Pasadena.
- Sasian, Prof. Jose M.** Optical Sciences Center, University of Arizona, Tucson.
- Sass, Prof. Stephen L.** Department of Materials Science and Engineering, Cornell University.
- Sathish, Dr. Shamachary.** University of Dayton Research Institute, Dayton, Ohio.
- Satir, Dr. Peter.** Chairman, Department of Anatomy and Structural Biology, Albert Einstein College of Medicine.
- Saucer, Prof. Helmut.** Department of Biology, Texas A&M University.
- Sauer, Fred.** Technical Service Department, Pfizer, Inc., Groton, Connecticut.
- Saul, Dr. Everett L.** Director of Scientific Liaison, Products Division, Bristol-Myers Company.
- Saunders, Dr. Gary W.** Department of Biology, University of New Brunswick, Fredericton, New Brunswick, Canada.
- Saunders, Dr. R. Stephen.** Jet Propulsion Laboratory, California Institute of Technology.
- Sauvage, Dr. Jean-Pierre.** Laboratoire de Chimie Organo-Minérale, Institut le Bel, Université Louis Pasteur, Strasbourg, France.
- Savage, Prof. Blair D.** Washburn Observatory, Department of Astronomy, University of Wisconsin.
- Savage, Dr. Donald E.** Department of Paleontology, University of California, Berkeley.
- Savage, Dr. George M.** Director, Product Research and Development, Upjohn International Inc., Kalamazoo, Michigan.
- Savage, Dr. Jay M.** Department of Biological Sciences, University of Southern California.
- Sawhney, Dr. V. K.** Department of Biology, University of Saskatchewan, Saskatoon, Canada.
- Sawyer, Dr. Donald.** Distinguished Professor, Department of Chemistry, Texas A&M University.
- Sayeed, Prof. Ali H.** Department of Electrical Engineering, University of California, Los Angeles.
- Sayler, Prof. John H.** Electrical Engineering and Computer Science Department, University of Michigan, Ann Arbor.
- Sayre, Dr. Albert N.** Deceased; formerly, Consulting Groundwater Geologist, Behre Dolbear and Company.
- Sayre, Prof. Lawrence M.** Department of Chemistry, Case Western Reserve University, Cleveland, Ohio.
- Scalzi, Dr. John B.** Program Director, National Science Foundation, Washington, D.C.
- Scanlan, Prof. J. O.** Department of Electrical and Electronic Engineering, University College, Dublin, Ireland.
- Schachter, Dr. Julius.** Department of Laboratory Medicine, University of California, San Francisco.
- Schaefer, Dr. Henry P., III.** Department of Chemistry, University of California, Berkeley.
- Schaeffer, Dr. Bobb.** Chairman and Curator, American Museum of Natural History, New York.
- Schaumann, Prof. Rolf.** Department of Electrical and Computer Engineering, Portland State University, Portland, Oregon.
- Schawlow, Prof. Arthur L.** Department of Physics, Stanford University.
- Scheeline, Dr. Alexander.** School of Chemical Sciences, University of Illinois, Urbana-Champaign.
- Scheer, Dr. Bradley T.** Professor Emeritus, Department of Biology, University of Oregon.
- Schelleng, John C.** (Retired) Bell Telephone Laboratories.
- Scheltema, Amelie H.** Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.
- Scher, Dr. Robert M.** Senior Project Engineer, John J. McMullen Associates, Inc., Arlington, Virginia.
- Schetz, Prof. Joseph A.** Department of Aerospace and Ocean Engineering, Virginia Polytechnic Institute and State University, Blacksburg.
- Schimmel, Dr. Curt.** Silicon Graphics, Inc., Mountain View, California.
- Schindler, Dr. Anton.** Camille Dreyfus Laboratory, Research Triangle Institute, Research Triangle Park, North Carolina.
- Schindler, Dr. James E.** Department of Biological Sciences, College of Sciences, Clemson University.
- Schlecht, Dr. Matthew F.** Section Research Chemist, E. I. du Pont de Nemours & Company, Inc., Agricultural Products Department, Newark, Delaware.
- Schlitt, Dr. William Joseph.** Process Manager/Kvaerner Metals, Davy Nonferrous Division, San Ramon, California.
- Schmerling, Dr. Louis.** Research Associate, Universal Oil Products Company, Des Plaines, Illinois.
- Schmid, Dr. Rudolf.** Department of Botany, University of California, Berkeley.
- Schmidlin, Dr. Francis.** National Aeronautics and Space Administration, Observational Science Branch, Laboratory for Oceans, Goddard Space Flight Center, Wallops Flights Facility, Wallops Island, Virginia.
- Schmidt, Dr. Paul W.** Department of Physics, University of Missouri.
- Schmidt-Nielsen, Dr. Bodil.** Department of Zoology, Duke University.
- Schmitt, Dr. Raymond.** Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.

- Schmitt, Dr. Waldo L.** Deceased; formerly, Zoologist Emeritus, Department of Zoology, Smithsonian Institution.
- Schnabel, Dr. Ronald.** Pasture Systems and Watershed Management Research Laboratory, U.S. Department of Agriculture–Agricultural Research Service, University Park, Pennsylvania.
- Schneider, Dr. Thomas R.** Electric Power Research Institute, Palo Alto, California
- Schneidewind, Dr. Norman F.** Computer Scientist, Computer Research, Pebble Beach, California.
- Schoch, Dr. Robert.** Attleboro, Massachusetts.
- Schoeffler, Dr. James D.** Department of Computer and Information Science, Cleveland State University.
- Scholle, Prof. Peter A.** Department of Geological Sciences, Southern Methodist University, Dallas, Texas.
- Scholz, Christopher H.** Lamont-Doherty Geological Observatory, Palisades, New York.
- Scholz, Dr. Nathaniel.** Northwest Fisheries Science Center, Environmental Conservation Division, Seattle, Washington.
- Schooler, Dr. Jonathan.** Learning, Research, and Development Center, University of Pittsburgh.
- Schoonmaker, G. R.** Retired; formerly, Vice President, Production-Exploration, Marathon Oil Company, Findlay, Ohio.
- Schowalter, Prof. Timothy D.** Department of Entomology, Oregon State University, Corvallis.
- Schreiber, Prof. B. Charlotte.** Department of Earth and Environmental Sciences, Queens College, New York.
- Schreibman, Dr. Martin P.** Department of Biology, Brooklyn College, City University of New York.
- Schroeder, Dr. Charles A.** Department of Botanical Sciences, University of California, Los Angeles.
- Schroeder, Dr. Lee S.** Lawrence Berkeley Laboratory, Berkeley, California.
- Schroeder, Dr. Thomas E.** Friday Harbor Laboratories, University of Washington.
- Schubert, Dr. Jack.** Radiation Health, Graduate School of Public Health, University of Pittsburgh.
- Schuchardt, Dr. Lee F.** Merck, Sharp, and Dohme, West Point, Pennsylvania.
- Schueler, Dr. Donald G.** Sandia Laboratories, Albuquerque, New Mexico.
- Schugar, Dr. Harvey.** Department of Chemistry, Wright and Rieman Laboratories, New Brunswick, Rutgers University.
- Schuller, Dr. Ivan K.** Physics Department, University of California, La Jolla.
- Schulman, Dr. James H.** U.S. Naval Research Laboratory.
- Schultz, Dr. Cheryl.** National Center for Ecological Analysis and Synthesis, University of California, Santa Barbara.
- Schultz, Dr. Jack.** Gypsy Moth Research Center, Department of Entomology, College of Agriculture, Pesticide Research Laboratory and Graduate Study Center, Pennsylvania State University.
- Schultz, Robert M.** General Manager, William Langer Jewel Bearing Plant, Bulova Watch Company, Inc., Rolla, North Dakota.
- Schultze, Dr. Hanns-Peter.** Curator of Vertebrate Paleontology, Museum of Natural History, University of Kansas.
- Schur, Dr. Peter H. Robert B.** Brigham Hospital, Boston, Massachusetts.
- Schuster, Prof. Frederick L.** Department of Biology, Brooklyn College.
- Schwab, Robert W.** Boeing Company, Commercial Airplane Group, Seattle, Washington.
- Schwartz, Dr. Karlene V.** Department of Biology, University of Massachusetts, Boston.
- Schwartz, Mel.** Materials Consultant, United Technologies Corporation, Stratford, Connecticut.
- Schwartz, Dr. Mel M.** Rohr Industries, Inc., Chula Vista, California.
- Schwartz, Dr. Morton K.** Department of Biochemistry, Memorial Hospital, New York.
- Schweizer, Ernest.** President, Schweizer Aircraft Corporation, Elmira, New York.
- Scotese, Dr. Christopher R.** Department of Geology, University of Texas, Arlington.
- Scott, Prof. Alwyn.** Program in Applied Mathematics, University of Arizona, Tucson.
- Scott, Dave.** Industrial Engineering Manager, Modular Computer Systems, Inc., Fort Lauderdale, Florida.
- Scott, Dr. Edward R. D.** Institute of Meteoritics, Department of Geology, University of New Mexico.
- Scott, Prof. James F.** Department of Physics, University of Colorado.
- Scott, Dr. John E., Jr.** Department of Aerospace Engineering and Engineering Physics, University of Virginia.
- Scott, Dr. John P.** Director, Center for Research on Social Behavior, Bowling Green State University.
- Scott, Dr. Richard A.** U.S. Geological Survey, Department of the Interior, Denver, Colorado.
- Scott, Prof. Robert L.** Department of Chemistry, University of California, Los Angeles.
- Scouten, Dr. Charles W.** Stoelting Company, Oakwood Centre, Wood Dale, Illinois.
- Scrutton, Dr. Colin T.** Department of Geological Sciences, University of Durham, United Kingdom.
- Seaborg, Dr. Glenn T.** Lawrence Berkeley Laboratory, University of California, Berkeley.
- Seagle, Stanley.** Vice President, Research and Technical Development, RMI Company, Niles, Ohio.
- Searles, Dr. Robert.** Rheumatology Division, University of New Mexico School of Medicine.
- Searson, Dr. Peter C. H. H.** Uhlig Corrosion Laboratory, Department of Materials Science and Engineering, Massachusetts Institute of Technology.
- Sebald, Joseph F.** Consulting Engineer and President, Heat Power Products Corporation, Bloomfield, New Jersey.
- Seed, Prof. John Richard.** Department of Epidemiology, School of Public Health, University of North Carolina, Chapel Hill.
- Segal, Dr. Bernard L.** Professor of Medicine, Cardiovascular Institute, Hahnemann Medical College and Hospital, Philadelphia, Pennsylvania.
- Segal, Dr. Nancy L.** Department of Psychology, California State University, Fullerton.
- Segeler, C. George.** Director, Technical Service, Dave Sage, Inc., New York.
- Sehgal, Dr. Amita.** Howard Hughes Medical Institute, Department of Neuroscience, University of Pennsylvania School of Medicine, Philadelphia.
- Seidelmann, Dr. P. K.** Director, Nautical Almanac Office, U.S. Naval Observatory, Washington, D.C.
- Seitz, Dr. W. Rudolf.** Department of Chemistry, College of Engineering and Physical Sciences, University of New Hampshire.
- Sekera, Prof. Zdenek.** Deceased; formerly, Department of Meteorology, Institute for Geophysics and Planetary Physics, University of California, Los Angeles.
- Selamet, Prof. Ahmet.** Center for Automotive Research, Ohio State University, Columbus.
- Selby, Prof. Michael J.** Department of Earth Science, University of Waikato, New Zealand.
- Seliskar, Dr. Denise M.** Associate Research Scientist, College of Marine Studies, University of Delaware.
- Sell, Dr. Heinz G.** Metals Development Section, Westinghouse Lamp Divisions, Bloomfield, New Jersey.
- Sellers, Dr. John R.** Manager, Engineering Mechanics Operations, TRW, Inc., Redondo Beach, California.
- Sellin, Dr. Ivan A.** Department of Physics, University of Tennessee.
- Sellmyer, Prof. David J.** Behlen Laboratory of Physics, University of Nebraska.
- Selverstone, Dr. Jane.** Department of Earth and Planetary Sciences, Hoffman Laboratory, Harvard University.
- Sepkoski, Dr. J. John, Jr.** Department of Geophysical Sciences, Henry Hinds Laboratory, University of Chicago.
- Seshadri, Sridhar.** Operations Management Department, Stern School of Business, New York University, New York.
- Sessions, Dr. John.** Department of Forest Engineering, Oregon State University, Corvallis.
- Sessler, Dr. Gerhard M.** Institut für Übertragungstechnik Elektroakustik, Technische Hochschule, Darmstadt, Germany.

- Sethares, Dr. William A.** Department of Electrical and Computer Engineering, University of Wisconsin, Madison.
- Setlow, Dr. Richard B.** Brookhaven National Laboratory, Upton, New York.
- Shack, Prof. Roland V.** Optics Science Center, University of Arizona.
- Shaffer, Dr. Albert L.** Clinical Professor of Medicine, Brigham and Women's Hospital, Boston, Massachusetts.
- Shanmugam, Dr. G.** Mobil Research and Development Corporation, Research Department, Dallas Research Laboratory, Dallas, Texas.
- Shannon, L. R.** "The New York Times," New York.
- Shannon, Prof. Robert R.** Optical Sciences Center, University of Arizona.
- Shapere, Prof. Dudley.** Wake Forest University, Winston-Salem, North Carolina.
- Shapiro, Hymin.** Research and Development Department, Ethyl Corporation, Baton Rouge, Louisiana.
- Sharkey, Dr. Thomas D.** Department of Botany, University of Wisconsin.
- Sharon, Prof. Nathan.** Department of Membrane Research and Biophysics, Weizmann Institute of Science, Rehovot, Israel.
- Sharpe, Dr. Ralph H.** Gainesville, Florida.
- Shaw, Brian R.** BHP Petroleum (Americas) Inc., Houston, Texas.
- Shaw, Dr. Cheng-Mei.** Laboratory of Neuropathy, Department of Pathology, University of Washington School of Medicine.
- Shaw, Jeffrey S.** 3M Industrial Tape & Specialties Division, Stopaul, Minnesota.
- Shaw, Prof. Peter.** Department of Physics, Pennsylvania State University.
- Shaw, Dr. Robert A.** Department of Chemistry, Birkbeck College, University of London, England.
- Shearer, Dr. Charles K.** Institute of Meteorites, Department of Earth and Planetary Sciences, University of New Mexico, Albuquerque.
- Shedlock, Dr. Kaye M.** U.S. Geological Survey, Administrative Officer, Denver, Colorado.
- Sheeley, Dr. Neil R., Jr.** Naval Research Laboratory, Washington, D.C.
- Sheffield, Dr. Harley G.** Laboratory of Parasitic Diseases, National Institutes of Health, Bethesda, Maryland.
- Sheft, Dr. Irving.** Chemistry Division, Argonne National Laboratory, Argonne, Illinois.
- Sheingold, Daniel H.** Analog Devices, Inc., Norwood, Massachusetts.
- Shelton, Dr. Frank H.** Chief Scientist, Kaman Sciences Corporation, Colorado Springs, Colorado.
- Shenoy, Dr. Gopal.** Senior Scientific Director, The Advanced Photon Source, Argonne National Laboratory, Illinois.
- Shephard, Dr. Bruce D.** Diplomates, American College of Obstetricians and Gynecologists, Tampa Obstetrics and Gynecology Associates, Tampa, Florida.
- Shepherd, Dr. Gordon M.** Yale University Medical School.
- Sheppard, Dr. Edith M.** Senior Lecturer in Zoology (retired), University of South Wales and Monmouthshire.
- Shergold, Dr. John. H.** Chairman, International Subcommittee on Cambrian Stratigraphy, Masseret, France.
- Sheridan, Prof. Thomas B.** Department of Mechanical Engineering, Massachusetts Institute of Technology.
- Sheriff, Dr. Robert E.** Department of Geology, University of Houston.
- Sherwood, Robert S.** Deceased; formerly, Manager of Engineering, Steam Turbine Division, Worthington Corporation, Harrison, New York.
- Shevell, Prof. Richard S.** Department of Aeronautics, Stanford University.
- Sheviak, Dr. Charles J.** Senior Scientist and Curator of Botany, New York State Museum, Albany.
- Shiino, Dr. Suelo M.** Faculty of Fisheries, Prefectural University of Mie, Japan.
- Shimek, Dr. Ronald L.** Reef Safe Enterprises, Inc., Wilsall, Montana.
- Shipman, Dr. Harry L.** Department of Physics, University of Delaware.
- Shires, Dr. G. Tom.** Department of Surgery, Texas Technical University, Lubbock.
- Shirley, Prof. David A.** Deceased; formerly, Department of Chemistry, University of Tennessee.
- Shivaram, Dr. Bellave S.** Department of Physics, John S. Beams Laboratory, University of Virginia.
- Shive, Prof. William.** Department of Chemistry and Clayton Foundation Biochemical Institute, University of Texas, Austin.
- Shively, R. R.** Supervisor, Processor Technology Research Group, Bell Laboratories, Whippany, New Jersey.
- Shoemaker, Dr. William C.** Martin Luther King, Jr./Charles R. Drew Medical Center, Los Angeles, California.
- Shortman, Dr. Ken.** Head, Lymphocyte Differentiation Unit, The Walter and Eliza Hall Institute of Medical Research, Melbourne, Australia.
- Shortreed, Dr. John.** Director, Institute for Risk Research, Waterloo, Ontario, Canada.
- Shprintzen, Dr. Robert J.** Director, Center for Crainofacial Disorders, Montifiore Medical Center, Albert Einstein College of Medicine, New York, New York.
- Shreve, Prof. R. Morris.** Professor Emeritus of Chemical Engineering, Purdue University.
- Shuman, E. C.** Regional Professional Engineer, State College, Pennsylvania.
- Shuman, Dr. Frederick B.** Director, National Meteorological Center, National Oceanic and Atmospheric Administration, Washington, D.C.
- Shuster, Dr. Carl N., Jr.** Ecologist (retired), Bureau of Water Hygiene, U.S. Public Health Service, Cincinnati, Ohio.
- Siebein, Dr. Gary W.** Department of Architecture, University of Florida, Gainesville.
- Siegbahn, Prof. Kai.** Institute of Physics, University of Uppsala, Sweden.
- Siegel, Prof. Benjamin M.** Department of Applied Physics, Cornell University.
- Siegel, Dr. Richard W.** Materials Science Division, Argonne National Laboratory, Argonne, Illinois.
- Siegman, Dr. A. E.** Stanford, California.
- Siegmund, C. W.** Exxon Research and Engineering Company, Linden, New Jersey.
- Siegmund, Dr. Walter P.** Director, Research and Development, Schott Fiber Optics, Inc., Southbridge, Massachusetts.
- Sieh, Prof. Kerry.** Seismological Laboratory, California Institute of Technology, Pasadena.
- Siekevitz, Dr. Philip.** Department of Cell Biology, Rockefeller University, New York.
- Sienko, Dr. Michell J.** Deceased; formerly, Department of Chemistry, Cornell University.
- Siever, Dr. Raymond.** Department of Geological Sciences, Harvard University.
- Siggia, Prof. Sidney.** Department of Chemistry, University of Massachusetts.
- Signorini, Dr. Sergio R.** Division of Ocean Sciences, National Science Foundation, Arlington, Virginia.
- Silberschatz, Dr. Abraham.** Information Sciences Research Center, Murray Hill, New Jersey.
- Šiljak, Prof. Dragoslav D.** School of Engineering, Santa Clara University, California.
- Silk, Dr. Joseph.** Department of Astronomy, University of California, Berkeley.
- Silman, Robert.** Robert Silman Associates, P.C., New York.
- Silva, Dr. Paul C.** Department of Botany, University of California, Berkeley.
- Silverman, Dr. Joseph.** Department of Chemical Engineering, University of Maryland.
- Simberloff, Prof. Daniel.** Department of Biological Science, Florida State University.
- Simmons, Dr. James A.** Walter S. Hunter Laboratory of Psychology, Brown University.
- Simmons, Dr. Nancy.** Department of Mammology, American Museum of Natural History, New York.
- Simmons, Dr. William H.** Department of Biochemistry and Biophysics, Loyola University Medical Center, Maywood, Illinois.
- Simon, Dr. Barry.** Department of Mathematics, Princeton University.
- Simon, Dr. George W.** Space Physics Division, Phillips Laboratory (AFSC), National Solar Observatory, New Mexico.
- Simon, Dr. Steven.** Department of Geophysical Science, University of Chicago, Illinois.
- Simonson, Dr. Roy W.** Director (retired), Soil Classification and Correlation, U.S.

- Department of Agriculture, Hyattsville, Maryland.
- Simpson, Dr. Carol.** Department of Earth and Planetary Sciences, Johns Hopkins University.
- Simpson, Dr. Joanne.** Head, Severe Storms Branch, Goddard Space Flight Center, NASA, Greenbelt, Maryland.
- Simpson, Prof. Robert H.** Retired; formerly, Director, Experimental Meteorology Laboratory, National Weather Service, Miami, Florida.
- Simpson, Prof. Stephen G.** Department of Chemistry, Massachusetts Institute of Technology.
- Sims, Dr. Chester T.** Department of Materials Engineering, Rensselaer Polytechnic Institute, New York.
- Sims, Dr. G. K.** Agricultural Research Service, U.S. Department of Agriculture, Urbana, Illinois.
- Sincerbox, Prof. Glenn T.** Optical Data Storage Center, Optical Sciences Center, University of Arizona, Tucson.
- Sinclair, Dr. Malcom W.** Procurement Executive, Ministry of Defense, Royal Signals and Radar Establishment, Great Malvern, Worcestershire, England.
- Singer, Dr. S. F.** Formerly, Deputy Assistant Secretary, U.S. Department of the Interior.
- Singer, Prof. Stanley.** Director, ATHENEX Research Associates.
- Singleton, John D.** Supervisor of Programming, Radio Division, National Broadcasting Company, New York.
- Sinha, Prof. Kumares C.** Professor and Head, Transportation and Infrastructure Systems Engineering, Purdue University, West Lafayette, Indiana.
- Sinha, Prof. P. K.** Department of Engineering, University of Reading, Whiteknights, Reading, England.
- Sinton, Dr. William M.** Department of Astronomy, University of Hawaii.
- Sircar, Dr. S.** Senior Research Associate, Air Products and Chemicals, Inc., Allentown, Pennsylvania.
- Sirignano, Prof. William A.** Dean of Engineering, University of California, Irvine.
- Sisler, C. W.** Corporate Engineering Department Monsanto Company, St. Louis, Missouri.
- Sisler, Dr. Harry H.** Department of Chemistry, University of Florida.
- Sisler, Dr. Hugh D.** Department of Botany, Division of Agricultural and Life Sciences, University of Maryland.
- Sistare, George, Jr.** (Retired) Consultant, Handy and Harman, Fairfield, Connecticut.
- Sittig, Marshall.** Assistant Director, Office of Research Project Administration, Princeton University.
- Sittner, Dr. W. Rex.** President, Electro Medical Systems, Inc.
- Skalak, Dr. Richard.** Deceased; formerly, Founding Director, Institute for Mechanics and Materials, University of California, San Diego.
- Skelly, Dr. David.** School of Forestry and Environmental Studies, Yale University, New Haven, Connecticut.
- Skilling, Prof. Hugh H.** Department of Electrical Engineering, Stanford University.
- Skinner, A. Douglas.** Head of Measurement Standards Laboratory, Marconi Instruments, Ltd., Stevanage, England.
- Skinner, Prof. Brian J.** Department of Geology and Geophysics, Yale University, New Haven, Connecticut.
- Skinner, E. N.** Assistant to the Director, Product Research and Development, International Nickel Company, Inc., New York.
- Skinner, Dr. Harry B.** Department of Orthopedic Surgery, School of Medicine, University of California, San Francisco.
- Skotland, Dr. C. B.** Irrigated Agriculture Research and Extension Center, Washington State University.
- Skrutskie, Dr. Michael F.** Department of Physics and Astronomy, University of Massachusetts, Amherst.
- Slabaugh, Dr. Wendell H.** Deceased; formerly, Department of Chemistry, Oregon State University.
- Slichter, Dr. Charles P.** Department of Physics, University of Illinois, Urbana.
- Slichter, Prof. Louis B.** Deceased; formerly, Institute of Geophysics, University of California, Los Angeles.
- Slocum, Dr. Donald W.** Argonne National Laboratory, Argonne, Illinois.
- Slomp, Dr. George.** Physical and Analytical Chemistry Division, Upjohn Company, Kalamazoo, Michigan.
- Slonecker, Dr. Charles E.** Associate Professor of Anatomy, University of British Columbia, Canada.
- Sluder, Dr. Greenfield.** Senior Scientist, Worcester Foundation for Experimental Biology, Shrewsbury, Massachusetts.
- Smartt, Dr. Raymond N.** National Solar Observatory, Sunspot, New Mexico.
- Smith, Dr. Andrew B.** Department of Paleontology, British Museum of Natural History, London, England.
- Smith, Prof. David M.** Morris K. Jeesup Professor of Silviculture, School of Forestry, Yale University.
- Smith, Fred W.** Western Union Telegraph Company, Rahway, New Jersey.
- Smith, Gaylord,** Director, High Nickel Alloys and Precious Metals, Product Development and Research Division, International Nickel Company, New York.
- Smith, Dr. Guy D.** Deceased; formerly, Soil Conservation Service, U.S. Department of Agriculture.
- Smith, Prof. Harlan J.** Department of Astronomy, University of Texas, Austin.
- Smith, Dr. Jerome A.** Marine Physics Laboratory, Scripps Institution of Oceanography, University of California, La Jolla.
- Smith, Dr. John Ward.** Deceased; formerly, Research Supervisor, Laramie Energy Research Center, Energy Research and Development Administration, Laramie, Wyoming.
- Smith, Prof. Julian C.** Department of Chemical Engineering, Cornell University.
- Smith, Dr. Julius O., III.** Center for Computer Research in Music and Acoustics, Department of Music, Stanford University, Stanford, California.
- Smith, Prof. Karl U.** Director, Behavioral Cybernetics Laboratory, and Professor of Psychology, University of Wisconsin.
- Smith, Dr. Kathleen K.** Department of Biological Anthropology and Anatomy, Duke University Medical Center, Durham, North Carolina.
- Smith, Rear Adm. Levering.** Director of Strategic Systems Project Office, U.S. Department of the Navy.
- Smith, Dr. Michael S.** Leader, Nuclear Astrophysics Research Group, Physics Division, Oak Ridge National Laboratory, Tennessee.
- Smith, Prof. Norman D.** Department of Geosciences, University of Nebraska, Lincoln.
- Smith, Prof. Paul G.** Department of Vegetable Crops, College of Agricultural and Environmental Sciences, University of California, Davis.
- Smith, Dr. Richard T.** Southwest Research Institute, San Antonio, Texas.
- Smith, Dr. Robert L.** College of Oceanic and Atmospheric Sciences, Oregon State University, Corvallis.
- Smith, Dr. Warren E.** Science Applications International Corporation, Tucson, Arizona.
- Smith, Dr. William F.** Department of Mechanical Engineering and Aerospace Sciences, College of Engineering, University of Central Florida, Orlando.
- Smithson, Dr. T. R.** Head of School, Science Maths and Information Technology, Cambridge Regional College, Kings Hedges Campus, Cambridge, United Kingdom.
- Smullyan, Dr. Raymond M.** Oscar Ewing Professor of Philosophy Emeritus, Indiana University, Bloomington.
- Smythe, Dr. William R.** Department of Physics, California Institute of Technology.
- Snavelly, Dr. Dianne.** Center for Photochemical Sciences, Bowling Green State University, Bowling Green, Ohio.
- Snelgrove, Prof. Martin.** Department of Electronics, Carleton University, Ontario, Canada.
- Snell, Dr. Arthur H.** Associate Director, Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Snell, Dr. Esmond E.** Department of Biochemistry, University of California, Berkeley.
- Snoke, Dr. David.** Los Angeles, California.
- Snook, Dr. Theodore.** Department of Anatomy, School of Medicine, University of North Dakota.
- Snow, William W.** Consulting Engineer, William W. Snow Associates, Inc., Woodside, New York.

- So, Dr. E.** Institute for National Measurement Standards, National Research Council of Canada, Ottawa, Ontario.
- Sochacki, Dr. James.** Department of Mathematics, James Madison University, Harrisonburg, Virginia.
- Soderblom, Dr. David.** Space Telescope Science Institute, Baltimore, Maryland.
- Sohon, Dr. Harry.** Deceased; formerly, Moore School, University of Pennsylvania.
- Sokol, Dr. Pamela A.** Department of Microbiology and Infectious Diseases, University of Calgary Health Sciences Center, Calgary, Alberta, Canada.
- Solberg, Dr. Myron.** Department of Food Science, Rutgers University, New Brunswick, New Jersey.
- Soldate, Dr. Mark.** Department of Physics, Yale University.
- Solem, Dr. G. Alan.** Curator and Head, Division of Invertebrates, Field Museum of Natural History, Chicago, Illinois.
- Solomon, Dr. James C.** Associate Curator, Missouri Botanical Garden, St. Louis.
- Somlo, Dr. Peter I.** CSIRO Division of Applied Physics, Lindfield, New South Wales, Australia.
- Somlyo, Dr. Andrew Paul.** Department of Physiology, School of Medicine, University of Virginia.
- Sommer, Dr. Alfred.** Director, International Center for Epidemiology and Preventive Ophthalmology, Dana Center, Wilmer Institute, Johns Hopkins School of Hygiene and Public Health, Baltimore, Maryland.
- Sommer, Dr. Alfred H.** Thermo Electron Corporation, Waltham, Massachusetts.
- Soost, Dr. R. K.** Department of Plant Science, University of California, Riverside.
- Sorensen, Dr. Robert M.** Coastal Engineering Research Center, Department of the Army, Fort Belvoir, Virginia.
- Sorensen, Prof. Robert M.** Department of Civil Engineering, Lehigh University, Bethlehem, Pennsylvania.
- Sorenson, Prof. S.** Department of Physics, University of Tennessee, Knoxville.
- Souder, Dr. Paul A.** Department of Physics, Yale University.
- Souders, Dr. Mott.** Deceased; formerly, Director, Oil Development, Shell Oil Company, Emeryville, California.
- Soulen, Dr. Robert J., Jr.** Naval Research Laboratory, Washington, D.C.
- Southwick, Dr. Stephen M.** Department of Pomology, University of California, Davis.
- Southwick, Dr. Steven.** Department of Psychiatry and Connecticut Mental Health Center, School of Medicine, Yale University.
- Sovonick-Dunford, Dr. S.** Department of Biological Sciences, University of Cincinnati.
- Spackman, Dr. William.** Department of Geology, Pennsylvania State University.
- Spearman, Dr. M. Leroy.** NASA Langley Research Center, Hampton, Virginia.
- Spector, Dr. David L.** Senior Staff Scientist, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York.
- Spedding, Prof. Frank H.** Deceased; formerly, Ames Laboratory, Energy Research and Development Administration, Iowa State University.
- Speer, Dr. J. Alexander.** Department of Marine, Earth, and Atmospheric Sciences, School of Physical and Mathematical Sciences, North Carolina State University.
- Speight, Dr. James G.** Western Research Institute, Laramie, Wyoming.
- Spergel, Dr. David N.** Department of Astrophysics, Princeton University.
- Spiegel, Dr. Allen M.** National Institute of Diabetes and Kidney Diseases, National Institutes of Health, Bethesda, Maryland.
- Spiegel, Dr. Carol A.** Director, Clinical Microbiology, Department of Pathology and Laboratory Medicine, University of Wisconsin Hospital and Clinics, Madison.
- Spink, Dr. Wesley W.** Regents, Professor of Medicine, School of Medicine, University of Minnesota.
- Spinrad, Dr. Bernard I.** Department of Nuclear Engineering, Oregon State University.
- Splitstoesser, Dr. Don F.** New York State Agricultural Experiment Station and Department of Food Science and Technology, Cornell University.
- Sposito, Dr. Garrison.** Department of Plant and Soil Biology, University of California, Berkeley.
- Sprague, Prof. G. F.** Department of Agronomy, University of Illinois, Urbana.
- Sprague, Dr. Howard B.** Agricultural Consultant, Washington, D.C.
- Spratt, Dr. Nelson T., Jr.** Department of Zoology, University of Minnesota.
- Spreadbury, Dr. Peter J.** Department of Engineering, University of Cambridge, United Kingdom.
- Sprinkle, Dr. James.** Department of Geological Sciences, University of Texas, Austin.
- Spurgin, Robert A.** President, Spurgin & Associates, Irvine, California.
- Sreenivasan, Prof. K. R.** Engineering and Applied Sciences, Yale University.
- Srihari, Dr. Sargur N.** Center of Excellence for Document Analysis & Recognition, University of Buffalo, Amherst, New York.
- St. Geme, Dr. Joseph W.** Associate Professor of Pediatrics and Molecular Microbiology, Department of Pediatrics, Washington University School of Medicine, St. Louis, Missouri.
- St. Jean, Dr. Joseph, Jr.** Department of Geology, University of North Carolina.
- St. Pierre, Prof. George R.** Department of Metallurgical Engineering, Ohio State University.
- Stadtman, Dr. Theresa C.** Department of Health and Human Services, National Heart, Lung and Blood Institute, National Institutes of Health, Bethesda, Maryland.
- Stage, Dr. Steven A.** Baton Rouge, Louisiana.
- Stahnke, Dr. Herbert L.** Director, Poisonous Animal Research Laboratory, Arizona State University.
- Stall, Prof. Robert E.** Plant Pathology Department, Institute of Food and Agricultural Sciences, University of Florida.
- Stamm, Dr. Lola.** Department of Epidemiology, School of Public Health, University of North Carolina, Chapel Hill.
- Standiford, Ferris C., Jr.** W. L. Badger Associates, Inc., Consulting Engineers, Ann Arbor, Michigan.
- Stanford, Prof. John L.** Department of Physics and Astronomy, Iowa State University, Ames.
- Stanley, Dr. Bruce A.** Department of Cellular and Molecular Physiology, College of Medicine, Pennsylvania State University, Hershey.
- Starr, Dr. Eugene C.** Bonneville Power Administration, U.S. Department of the Interior, Portland, Oregon.
- Stauffer, Dr. Randy C.** Halogens Research Laboratory, Dow Chemical Company, Midland, Michigan.
- Stebbins, Prof. G. Ledyard.** Department of Genetics, College of Agriculture, University of California, Davis.
- Steele, Dr. William A.** Department of Chemistry, Pennsylvania State University.
- Steenrod, Norman E.** Department of Mathematics, Princeton University.
- Stefanovic, Dr. Victor R.** Electrical Engineering Department, University of Missouri.
- Stein, Prof. Dale F.** Retired; formerly, President Emeritus, Michigan Technological University, Houghton.
- Stein, Dr. Gary S.** Department of Biochemistry and Molecular Biology, J. Hillis Miller Health Center, College of Medicine, University of Florida.
- Stein, Dr. Janet L.** Department of Biochemistry and Molecular Biology, J. Hillis Miller Health Center, College of Medicine, University of Florida.
- Stein, Dr. Murray B.** Anxiety & Traumatic Stress Disorders Research Program, University of California, La Jolla.
- Steinberg, Dr. Aephrim M.** Department of Physics, University of California, Berkeley.
- Steinberg, Dr. Ellis P.** Senior Scientist, Argonne National Laboratory, Argonne, Illinois.
- Steinert, Emil F.** (Retired) Arc Welding Division, Westinghouse Electric Corporation.
- Steinschneider, Alfred.** President, American Sudden Infant Death Syndrome Institute, Atlanta, Georgia.
- Stephenson, Dr. R. J.** Department of Physics, Wooster College.
- Stepniowski, Wieslaw Z.** Aeronautical Consultant, Springfield, Pennsylvania.
- Steponkus, Prof. Peter L.** Department of Agronomy, Cornell University.
- Stern, Prof. Fred.** Iowa Institute of Hydraulic Research, University of Iowa, Iowa City.
- Stern, Dr. Robert J.** Department of Geosciences, University of Texas, Richardson.

- Sternberg, Dr. James C.** Applied Research Department, Beckman Instruments, Brea, California.
- Sternheim, Dr. Charles E.** Director of Undergraduate Studies, Department of Psychology, University of Maryland, College Park.
- Sterrer, Dr. W. E.** Bermuda Biological Station, St. George's West.
- Stevens, Dr. C. E.** College of Veterinary Medicine, North Carolina State University, Raleigh.
- Stevens, Dr. Calvin H.** Department of Geology, San Jose State University.
- Stevens, Dr. Mary Betty.** Division of Rheumatology, Johns Hopkins University School of Medicine, Baltimore, Maryland.
- Stevenson, Dr. Edward C.** Deceased; formerly, Department of Electrical Engineering, School of Engineering and Applied Sciences, University of Virginia.
- Steward, Dr. John W.** Department of Physics, University of Virginia.
- Stewart, Dr. David B.** Experimental Geochemistry and Mineralogy Branch, U.S. Geological Survey, Department of the Interior.
- Stewart, Dewey.** Crops Research Division, Agricultural Research Service, U.S. Department of Agriculture, Beltsville, Maryland.
- Stewart, Scott R. L.** C. Lee & Associates, Inc., Seattle, Washington.
- Steyn, Dr. Julian J.** Energy Resources International, Inc., Washington, D.C.
- Stidd, Prof. Benton M.** Department of Biological Science, Western Illinois University, Macomb, Illinois.
- Stiles, Dr. Martin.** Department of Chemistry, University of Kentucky.
- Stillman, Dr. Gregory E.** Department of Electrical Engineering, University of Illinois, Urbana.
- Stirton, Dr. Robert I.** Vice President (retired), Roger Williams Technical and Economic Services, Inc., Berkeley, California.
- Stirton, Prof. Ruben A.** Director, Museum of Paleontology, University of California, Berkeley.
- Stock, Prof. David.** School of Mechanical and Materials Engineering, Washington State University, Pullman, Washington.
- Stock, Prof. John T.** Department of Chemistry, University of Connecticut.
- Stocum, Dr. David L.** Department of Genetics and Development, University of Illinois.
- Stoller, Dr. Marshall L.** Department of Urology, University of California, San Francisco.
- Stoloff, Dr. Norman S.** Department of Materials Engineering, Rensselaer Polytechnic Institute.
- Stolper, Dr. Edward M.** Division of Geological and Planetary Science, California Institute of Technology.
- Stone, Prof. A. Douglas.** Department of Applied Physics, Yale University.
- Stone, Dr. Anthony J.** Department of Chemistry, University of Cambridge, University Chemical Laboratory, Cambridge, England.
- Stone, Dr. Jeffrey K.** Department of Botany and Plant Pathology, Oregon State University, Corvallis.
- Stone, Prof. Kenneth G.** Deceased; formerly, Department of Chemistry, Michigan State University.
- Storch, Dr. Henry H.** Deceased; formerly, Assistant Professor of Chemistry, New York University.
- Storer, Dr. Tracy I.** Deceased; formerly, Department of Zoology, University of California, Davis.
- Storey, Prof. William B.** Department of Botany and Plant Sciences, University of California, Riverside.
- Stott, Dr. Jeffrey L.** Department of Veterinary Microbiology and Immunology, School of Veterinary Medicine, University of California, Davis.
- Stout, Gary J.** AT&T Submarine Systems, Inc., Morristown, New Jersey.
- Strandness, Dr. D. Eugene, Jr.** Department of Surgery, University of Washington School of Medicine, Seattle.
- Strandtmann, Prof. Russell W.** Department of Biological Sciences, Texas Technological College.
- Stranks, Prof. Donald R.** Department of Physical and Inorganic Chemistry, University of Adelaide, Australia.
- Straus, Dr. Reuben.** Providence Medical Center, Portland, Oregon.
- Strausbaugh, Prof. Carl A.** Kimberly Research and Extension Center, University of Idaho, Kimberly.
- Streeter, Prof. Victor L.** Department of Civil Engineering, College of Engineering, University of Michigan.
- Strock, Dr. O. J.** Consultant, Sarasota, Florida.
- Strohl, Robert, J.** Senior Research Scientist, Battelle Laboratories, Columbus, Ohio.
- Stroke, Dr. George W.** Department of Electrical Sciences and Head, Electro-Optical Sciences Center, State University of New York, Stony Brook.
- Strom, Dr. Robert G.** Department of Planetary Sciences, Lunar and Planetary Laboratory, University of Arizona.
- Stroyan, Dr. Henry L. G.** Entomology Department, Ministry of Agriculture, Fisheries and Food, Harpenden, England.
- Stuart, Dr. Alastair M.** Department of Zoology, University of Massachusetts.
- Stuart, Dr. Edward G.** Deceased; formerly, West Virginia School of Medicine.
- Stuart, William T.** Deceased; formerly "Electrical Construction and Maintenance," McGraw-Hill Publications Company, New York.
- Stubbings, Dr. H. G.** Poole, England.
- Stuckas, Kenneth J.** Engineering Consultation Services, Jacksonville, Florida.
- Stumm, Prof. Erwin Charles.** Deceased; formerly, Department of Geology and Mineralogy, Museum of Paleontology, University of Michigan.
- Stunkard, Dr. Horace W.** Research Associate, American Museum of Natural History, New York.
- Sturges, Thomas B., III.** Pennsylvania Drilling Company, McKees Rock.
- Sturges, Dr. Wilton.** Department of Oceanography, Florida State University.
- Sturtevant, Prof. Alfred H.** Thomas Hunt Morgan Professor of Biology, Emeritus, California Institute of Technology.
- Sudarshan, Dr. S.** Computer Science and Engineering Department, Indian Institute of Technology-Bombay, Mumbai, India.
- Sudds, Dr. Richard.** Department of Biological Sciences, State University of New York, Pittsburgh.
- Sullivan, Prof. Michael J., Jr.** Department of Mathematics, Chicago State University, Chicago, Illinois.
- Sumi, Dr. S. Mark.** Professor of Neuropathology, School of Medicine, University of Washington.
- Summers, Dr. B. A. James A.** Baker Institute for Animal Health, Cornell University, Ithaca, New York.
- Sumners, Dr. Thomas E.** Plant Pathologist, Agricultural Research Service, U.S. Department of Agriculture.
- Suppe, John.** Department of Geological Sciences, Princeton University.
- Surles, Dr. Terry.** Limnetics, Inc., Milwaukee, Wisconsin.
- Suslick, Dr. Kenneth S.** Professor, School of Chemical Sciences, Noyes Laboratory, University of Illinois, Urbana.
- Sutherland, J. R.** Power Transformer Department, General Electric Company, Pittsfield, Massachusetts.
- Sutherland, Dr. S. S.** Senior Research Officer, Animal Health Laboratories, Department of Agriculture, Western Australia.
- Sutton, Dr. B. C.** Head of Taxonomic and Identification Services, Mycological Institute, Ferry Lane, Surrey, United Kingdom.
- Sutton, George P.** Consulting Engineer, Danville, California.
- Suzuki, Dr. Yoichiro.** Kamioka Observatory, Institute for Cosmic Ray Research, University of Tokyo, Higashi-Mozumi, Kamioka Gifu, Japan.
- Swanson, Dr. Eric.** Vice President, Technology, Crystal Semiconductor Corporation, Austin, Texas.
- Swanson, Dr. M. L.** Department of Physics and Astronomy, University of North Carolina.
- Swanson, Dr. R. Lawrence.** Director, Waste Management Institute, Marine Sciences Research Center, State University of New York, Stony Brook.
- Swearingen, Dr. Will.** NASA-Montana State University TechLink, Bozeman, Montana.
- Sweat, F. W.** Department of Chemistry, University of Utah.
- Swets, Dr. John A.** Bolt Beranek and Newman, Inc., Cambridge, Massachusetts.

**Swider, Dr. William, Jr.** Space Physics Division, Air Force Geophysics Laboratory, Hanscom Air Force Base, Bedford, Massachusetts.

**Swift, Dr. Gregory W.** Condensed Matter and Thermal Physics, Los Alamos National Laboratory, New Mexico.

**Switzer, Dr. George.** Curator, Department of Mineral Sciences, National Museum of Natural History, Smithsonian Institution.

**Sydenham, Dr. Peter H.** Systems Engineering and Evaluation Centre, University of South Australia, School of Electrical and Information Engineering, Mawson Lakes, Adelaide.

**Symko, Orest G.** Department of Physics, University of Utah.

**Symons, Dr. Frank.** Applied Research Laboratory, Pennsylvania State University, State College.

**Symons, Dr. Robert S.** Litton Electrical Devices Division, San Carlos, California.

**Sytsma, Prof. Kenneth J.** Department of Botany, University of Wisconsin at Madison.

**Szalay, Dr. Frederick S.** Department of Vertebrate Paleontology, American Museum of Natural History, New York.

**Szeri, Dr. Andras Z.** Professor and Chairperson, Department of Mechanical Engineering, University of Delaware, Newark.

**Szody, Dr. Paula.** Department of Astronomy, University of Washington, Seattle.

## T

**Tabor, Paul.** Soil Conservation Service, Athens, Georgia.

**Tait, Dr. David L.** Department of Obstetrics and Gynecology, Vanderbilt University Medical Center, Nashville, Tennessee.

**Talbot, Prof. Lawrence.** Department of Mechanical Engineering, University of California, Berkeley.

**Tan, Prof. K. C.** Centre for Intelligent Control, Department of Electrical Engineering, National University of Singapore.

**Tang, Prof. K. Y.** Deceased; formerly, Department of Electrical Engineering, Ohio State University.

**Tanihata, Dr. Isao.** Accelerator Facility, Institute of Physical and Chemical Research, Saritama, Japan.

**Tannas, Lawrence E., Jr.** Aerojet Electro Systems Company, Azusa, California.

**Tao, Dr. B. Y.** School of Agricultural and Biological Engineering, Purdue University, West Lafayette, Indiana.

**Tarling, Dr. D. H.** Department of Geophysics and Planetary Physics, University of Newcastle, England.

**Taube, Dr. Henry.** Department of Chemistry, Stanford University.

**Taylor, Prof. Angus E.** President's Office, University of California, Berkeley.

**Taylor, Dr. Danny L.** Chairperson, Department of Mining Engineering, Mackay School of Mines, University of Nevada.

**Taylor, Dr. Gordon S.** Connecticut Agricultural Experiment Station, Windsor.

**Taylor, Prof. J. Herbert.** Institute of Molecular Biophysics, Florida State University.

**Taylor, Prof. John W.** Department of Plant Biology, University of California, Berkeley.

**Taylor, Dr. R. E.** Associate Professor and Director, Radiocarbon Laboratory, University of California, Riverside.

**Taylor, Dr. Robert J.** Consultant, Microscopy, Falls Church, Virginia.

**Taylor, Dr. Stuart Ros.** Department of Geology, Australian National University, Canberra, Australia.

**Taylor, Prof. Thomas N.** Department of Biology, University of Kansas, Lawrence.

**Tchobanoglous, Prof. George.** Department of Civil Engineering, University of California, Davis.

**Teagarden, Dr. Dennis E.** Professor Emeritus of Forestry, University of California, Berkeley.

**Tease, Samuel C.** Pennsalt Chemicals Corporation, Philadelphia, Pennsylvania.

**Tedesco, Dr. Edward F.** Jet Propulsion Laboratory, California Institute of Technology.

**Tedford, Dr. Richard H.** Department of Vertebrate Paleontology, American Museum of Natural History, New York.

**Teichert, Dr. Curt.** Department of Geological Sciences, University of Rochester.

**Teleki, Dr. Geza.** Deceased; formerly, Department of Geology, George Washington University.

**Telionis, Prof. Demetri P.** Department of Engineering Science and Mechanics, Virginia Polytechnic Institute and State University, Blacksburg.

**Teller, Dr. Aaron J.** Teller Environmental Systems, Worcester, Massachusetts.

**Temin, Dr. Howard M.** McArdle Laboratory for Cancer Research, University of Wisconsin Medical Center.

**Teng, Lee C.** Fermi National Accelerator Laboratory, Batavia, Illinois.

**Tenney, Dr. Gerold H.** American Society for Nondestructive Testing, Inc., Los Alamos, New Mexico.

**Terrell, Dr. James.** Los Alamos National Laboratory, Los Alamos, New Mexico.

**Terrill, Dr. Clair E.** Chief, Sheep and für Animal Research Branch, U.S. Department of Agriculture, Beltsville, Maryland.

**Thelemaque, L. E.** Product Family Systems Engineering Center, AT&T Information Systems, Lincroft, New Jersey.

**Thiess, Helmut E.** Washington, D.C.

**Thomann, Dr. Gary C.** Power Technologies, Inc., Schenectady, New York.

**Thomas, Dr. David A.** Department of Materials Science and Engineering, Lehigh University, Bethlehem, Pennsylvania.

**Thomas, Dr. David Hurst.** American Museum of Natural History, New York.

**Thomas, Dr. J. Kerry.** Department of Chemistry, University of Notre Dame.

**Thompson, Prof. Gerald L.** Professor of Applied Mathematics and Industrial Administration, Graduate School of Industrial Administration, Carnegie-Mellon University.

**Thompson, Dr. Margaret R.** Departments of Medical Genetics and Pediatrics, University of Tronoto and the Hospital for Sick Children, Toronto, Ontario, Canada.

**Thompson, Dr. Stanley G.** Senior Staff Member, Lawrence Berkeley Laboratory, University of California, Berkeley.

**Thompson, Dr. T. E.** Department of Zoology, University of Bristol, England.

**Thompson, Tom.** Senior Training Specialist, Metrowerks, Hollis, New Hampshire.

**Thompson, William I., III.** Senior Systems Engineer, Science Applications International Corporation, Falls Church, Virginia.

**Thomson, Dr. Keith S.** President, Academy of Natural Sciences, Philadelphia, Pennsylvania.

**Thomson, Prof. Robb M.** Chairman, Department of Materials Science, State University of New York, Stony Brook.

**Thorn, Dr. Robert J.** Divisions of Chemistry and Materials Science, Argonne National Laboratory, Argonne, Illinois.

**Thorogood, Dr. Robert M.** Department of Chemical Engineering, North Carolina State University, Raleigh.

**Throp, Prof. H. Holden.** Department of Chemistry, University of North Carolina, Chapel Hill.

**Tibbitts, Capt. Barry F.** Retired, U.S. Navy.

**Tichy, Prof. Jiri.** Graduate Program in Acoustics, Pennsylvania State University, State College.

**Tigner, Dr. Maury.** Laboratory of Nuclear Studies, Cornell University.

**Tikofsky, Dr. Ronald S.** Department of Radiology, Medical College of Wisconsin, Milwaukee.

**Timoney, Dr. John F.** Department of Veterinary Science, University of Kentucky, Lexington.

**Ting, Dr. Irwin P.** Department of Botany and Plant Sciences, University of California, Riverside.

**Ting, Prof. Samuel C. C.** Department of Physics, Massachusetts Institute of Technology.

**Tinsley, Dr. Brian A.** Center for Space Science, Department of Physics, University of Texas, Dallas.

**Tolstoy, Dr. Alexandra I.** ATolstoy Sciences, Annandale, Virginia.

**Tomasetti, Richard L.** Senior Vice President, Lev Zetlin Associates, Inc. New York, New York.

**Tonkay, Prof. Gregory L.** Department of Industrial Engineering, Lehigh University, Bethlehem, Pennsylvania.

**Tonndorf, Prof. Jucrgcn.** Deceased; formerly, Department of Otolaryngology, College of Physicians and Surgeons, Columbia University.

**Toole, Dr. Floyd.** Oak Park, California.

**Torres, Dr. Alfonso.** Head, Diagnostic Services Section, National Veterinary Services Laboratory, U.S. Department of Agriculture, Greenport, New York.

**Toth, Dr. Nicholas.** Department of Anthropology, Indiana University.

**Townes, Prof. Charles H.** Department of Physics, University of California, Berkeley.

**Toy, Dr. Pearl.** San Francisco General Hospital, San Francisco, California.

**Toy, Dr. T. J.** Department of Geography, University of Denver, Colorado.

**Träbert, Prof. Elmar.** Experimentalphysik III, Ruhr-Universität Bochum, Germany.

**Tracy, Robert J.** Department of Geological Sciences, Harvard University.

**Trappe, Dr. James M.** Department of Forest Science, Oregon State University, Corvallis.

**Trautman, W. Dean.** Manager, Laboratory Administration Research and Development, Brush Beryllium Company, Cleveland, Ohio.

**Treffers, Dr. Henry P.** Professor of Pathology, School of Medicine, Yale University.

**Treiman, Prof. Sam B.** Deceased; formerly, Department of Physics, Princeton University, Princeton, New Jersey.

**Trendall, Dr. Alec.** Adjunct Professor, Department of Applied Physics, Curtin University of Technology, Perth, Western Australia.

**Treybal, Robert E.** Deceased; formerly, Department of Chemical Engineering, New York University.

**Triebe, Edward J.** Deceased; formerly, Kingsport Press, Inc., Kingsport, Tennessee; Consultant, Franklin Book Programs, Inc.

**Trinkaus, Dr. Erik.** Department of Anthropology, University of New Mexico.

**Trivett, Dr. Mary L.** Department of Environmental and Plant Biology, Ohio University, Athens.

**Trolinger, Dr. James D.** Vice President, Spectron Development Laboratories, Costa Mesa, California.

**Trowsdale, Dr. John.** Professor of Immunology, Department of Pathology, Cambridge University.

**Truant, J. P.** Advance Medical & Research Center, Inc., Pontiac, Michigan.

**Truax, Dr. Robert C.** Truax Engineering Company, Saratoga, California.

**Truman, Dr. James W.** Department of Zoology, University of Washington, Seattle.

**Trump, Benjamin F.** Professor and Chairman, Department of Pathology, University of Maryland Medical Center.

**Tsaur, Dr. Bor-Yeu.** Lincoln Laboratories, Lexington, Massachusetts.

**Tsong, Dr. Tien-Tzou.** Distinguished Research Fellow, Institute of Physics, Academia Sinica, Taipei, Taiwan.

**Tsuchiya, Prof. Henry M.** Department of Chemical Engineering, University of Minnesota.

**Tucker, Dr. David H.** Agriculture Research and Education Center, University of Florida.

**Tucker, John T.** (Retired) Beltsville Parasitological Laboratory, Agricultural Research Center, Beltsville, Maryland.

**Tucker, Dr. Wallace.** Harvard-Smithsonian Center for Astrophysics, Cambridge, Massachusetts.

**Tukey, Dr. Harold B.** Deceased; formerly, Professor Emeritus, Department of Horticulture, Michigan State University.

**Tully, Dr. R. Brent.** Institute for Astronomy, University of Hawaii at Manoa.

**Tur, Dr. Moshe.** School of Engineering, Tel Aviv University, Israel.

**Turk, Prof. J. L.** Department of Pathology, Royal College of Surgeons of England.

**Turley, Dr. J. A.** Marathon Oil Company, Littleton, Colorado.

**Turnbull, Prof. David.** Department of Applied Physics, Harvard University.

**Turner, Dr. Charles E.** Agricultural Research Service, U.S. Department of Agriculture, Albany, California.

**Turner, Prof. J. R. G.** Department of Genetics, University of Leeds, United Kingdom.

**Turner, Prof. John D.** Transport Research Laboratory, Crowthorne, Berks, United Kingdom.

**Turner, Joyce B.** Institute for Advanced Study.

**Turner, Dr. Noel H.** Chemistry Division, Naval Research Laboratory, Washington, D.C.

**Turner, Dr. Ruth D.** Museum of Comparative Zoology, Harvard University.

**Turner, Dr. Shirley.** National Institute of Standards and Technology, U.S. Department of Commerce, Gaithersburg, Maryland.

**Turner, Dr. Thomas B.** Professor of Microbiology and Dean Emeritus, School of Medicine, Johns Hopkins University.

**Turok, Dr. Neil.** Department of Physics, Joseph Henry Laboratories, Princeton University.

**Turro, Prof. Nicholas J.** Department of Chemistry, Columbia University.

**Turturro, Dr. Angelo.** National Center for Toxicological Research, Department of Health and Human Services, Jefferson, Arkansas.

**Tuttle, Alan H.** Vocational Division, State University of New York Agricultural and Technical Institute, Wellsville.

**Tuttle, Douglas E.** Pamarco, Roselle, New Jersey.

**Tuttle, Russell H.** Professor in Anthropology, Evolutionary Biology and The College, University of Chicago.

**Tyler, Prof. Albert.** Deceased; formerly, Division of Biology, California Institute of Technology.

**Tyrer, Dr. Louise B.** Medical Affairs Coordinator, Planned Parenthood Federation of America, New York.

## U

**Uchida, Dr. Tohru.** Professor of Zoology, Hokkaido University.

**Uebersax, Dr. Mark A.** Department of Food Sciences and Human Nutrition, Michigan State University.

**Uhl, Dr. Vincent W.** Department of Chemical Engineering, University of Virginia.

**Uhler, Dr. Michael D.** Department of Biological Chemistry, University of Michigan, Ann Arbor.

**Uhrhammer, Dr. Robert A.** Seismological Laboratory, University of California, Berkeley.

**Ullman, Dr. John E.** Department of Marketing-Management, Hofstra University.

**Ullrich, Dr. Robert C.** Department of Botany, University of Vermont, Burlington.

**Underwood, Dr. Erwin E.** Alcoa Professor, Georgia Institute of Technology, Inger, Walter H. Anaconda Company, Denver, Colorado.

**Underwood, Dr. James H.** Center for X-Ray Optics, Lawrence Berkeley National Laboratory, University of California, Berkeley.

**Unwin, Dr. Stephen C.** Owens Valley Radio Observatory, California Institute of Technology, Pasadena.

**Uppgren, Prof. Arthur R.** Van Vleck Observatory, Wesleyan University, Middletown, Connecticut.

**Upton, Dr. Arthur C.** Institute of Environmental Medicine, New York University Medical Center.

**U.S. Army Corps of Engineers.** Office of the Secretary of the Army, Washington, D.C.

**Uzsoy, Prof. Reha.** School of Industrial Engineering, Purdue University, West Lafayette, Indiana.

## V

**Vaanky, Dr. Kalman.** Botanisches Institut, Universität Tübingen, Germany.

**Vaickus, Dr. Louis.** Roswell Park Memorial Institute, Buffalo, New York.

**Valenti, Dr. Jeff A.** Space Telescope Science Institute, Baltimore, Maryland.

**Valentine, Dr. J. W.** Department of Geology, University of California, Santa Barbara.

**Vallee, Dr. Richard.** Principal Scientist, Worcester Foundation for Experimental Biology, Shrewsbury, Massachusetts.

**Van Allen, Dr. Margot I.** Staff Geneticist, Genetics Division, Hospital for Sick Children, Toronto, Ontario, Canada.

**Van Andel, Dr. Tjeerd H.** Department of Geology, Stanford University.

**Van Campenhout, Prof. Ernest L.** Deceased; formerly Professor of Anatomy,

- Histology, and Embryology, School of Medicine, University of Louvain, Belgium.
- Vanderkool, Dr. Jane M.** Department of Medicine, School of Medicine, University of Pennsylvania.
- Van der Pluijm, Prof. Ben.** Department of Geological Sciences, University of Michigan, Ann Arbor.
- Van der Spiegel, Prof. Jan.** Moore School of Electrical Engineering, University of Pennsylvania, Philadelphia.
- Vanderzee, Dr. Cecil E.** Department of Chemistry, University of Nebraska.
- Van Etten, Dr. James P.** Navigation Consultant, Nutley, New Jersey.
- Van Fleet, Dr. D. S.** Department of Botany, University of Georgia.
- Van Houten, Prof. Franklyn B.** Department of Geology, Princeton University.
- Vanick, James S.** Consultant, Foundry Castings, Sea Girt, New Jersey.
- Van Niel, Dr. Cornelius B.** Deceased; formerly, Hopkins Marine Station, Pacific Grove, California.
- Van Peteghem, Dr. Peter M.** Deceased; formerly, Electrical Engineering Department, Texas A&M University.
- Van Schmus, Prof. W. Randall.** Department of Geology, University of Kansas.
- Van Valkenburg, Dr. Mac E.** Department of Electrical Engineering, University of Illinois, Urbana.
- Van Vlack, Prof. Lawrence H.** Department of Materials Engineering, University of Michigan.
- Van Wagendonk, Dr. Willem J.** Veterans Administration Hospital, Miami, Florida.
- Van Wazer, Dr. John R.** Department of Chemistry, Vanderbilt University.
- Van Winkle, Prof. Quentin.** Department of Chemistry, Ohio State University.
- Vaughan, Prof. Wyman R.** Head, Department of Chemistry, University of Connecticut.
- Vaya, Dr. Jacob.** Migal-Galilee Technological Center, Rosh-Pina, Israel.
- Veale, Dr. Chris A.** Zeneca, Inc., Wilmington, Delaware.
- Veblen, Dr. David R.** Department of Earth and Planetary Sciences, Johns Hopkins University.
- Veillon, Dr. Claude.** Biophysics Research Laboratory, Peter Bent Brigham Hospital, Harvard Medical School.
- Vellozzi, Dr. Joseph.** Consulting Engineer, Ardsley, New York.
- Venditti, Dr. Ferdinand, Jr.** Head, Section of Cardiovascular Diseases, Lahey Clinic, Burlington, Massachusetts.
- Venkatesh, Prof. Alladi.** Graduate School of Management, University of California, Irvine.
- Ventura, Dr. Jose A.** Department of Industrial and Management Systems Engineering, Pennsylvania State University, University Park.
- Verma, Dr. Pramode K.** AT&T Information Systems, Morristown, New Jersey.
- Vessey, Dr. Judith A.** Department of Physiological Nursing, University of California School of Nursing, San Francisco.
- Vestal, Prof. Paul A. A. G.** Bush Professor of Science, A. G. Bush Science Center and Department of Biology, Rollins College, Winter Park, Florida.
- Veverka, Prof. Joseph.** Laboratory for Planetary Studies, Cornell University.
- Vickers, Douglas B.** Annapolis, Maryland.
- Vickers, Dr. Mary Lynne.** Department of Veterinary Science, Livestock Disease Diagnostic Center, University of Kentucky, Lexington.
- Vidone, Dr. Romeo A.** Chairman, Department of Pathology, School of Medicine, Yale University.
- Vierstra, Dr. Richard.** Horticulture Department, University of Wisconsin.
- Villiger, Peter.** Research Associate, Department of Molecular and Experimental Medicine, Research Institute of Scripps Clinic, La Jolla, California.
- Vinson, Prof. S. B.** Department of Entomology, Texas A & M University.
- Viro, Dr. Felix.** Kind & Knox, Sioux City, Iowa.
- Vitek, Dr. Charles.** Medical Epidemiologist, HIV Vaccine Section, Division of HIV/AIDS Prevention, Centers for Disease Control and Prevention, Atlanta, Georgia.
- Voelker, Dr. Richard P.** Science and Technology Corporation, Columbia, Maryland.
- Vogel, Dr. Friedrich.** Institute for Anthropology and Human Genetics, Im Neuenheimer Feld, Germany.
- Vogel, Prof. Steven.** Department of Zoology, Duke University, Durham, North Carolina.
- Vogt, Dr. Peter.** Department of the Navy, Naval Research Laboratory, Washington, D.C.
- Vogtle, Dr. Fritz.** Department of Chemistry, Friedrich-Wilhelms University, Bonn, Germany.
- Voit, Dr. Mark.** Space Telescope Science Institute, Baltimore, Maryland.
- Volk, Dr. Herbert F.** Carbon Products Division, Union Carbide Corporation, Parma, Ohio.
- Volk, Dr. Wesley A.** Department of Microbiology, School of Medicine, University of Virginia.
- Volkmar, Dr. Fred R.** Child Study Center, Yale University.
- Von Doenhoff, Albert E.** Deceased; formerly, Staff Scientist, National Aeronautics and Space Administration.
- Von Graevenitz, Alexander W. C.** Department of Medical Microbiology, University of Zurich, Switzerland.
- Von Puttkamer, Jesco.** Advanced Programs, Office of Space Transportation Systems, National Aeronautics and Space Administration, Washington, D.C.
- Vonder Haar, Prof. Thomas H.** Department of Atmospheric Sciences, Colorado State University.
- Vonnegut, Dr. Bernard.** Retired; formerly, Atmospheric Sciences Research Center, State University of New York, Albany.
- Voorhees, Dr. Frank R.** Department of Biology, Central Missouri State College.
- Vos, Dr. Willem L.** Geophysical Laboratory and Center for High Pressure Research, Carnegie Institution, Washington, D.C.
- Voss, Prof. Edward W., Jr.** Department of Microbiology, University of Illinois, Urbana.

## W

- Waddington, Prof. Thomas C.** Deceased; formerly, Department of Chemistry, University of Durham.
- Wade, Dr. Charles Edwin.** NASA Ames Research Center, Moffett Field, California.
- Waggoner, Dr. Ben.** Department of Biology, University of Central Arkansas, Conway.
- Wagner, Dr. Frank.** Technical Center, Celanese Chemical Company, Corpus Cristi, Texas.
- Wagner, Dr. Henry N., Jr.** Director, Divisions of Nuclear Medicine and Radiation Health Sciences, Johns Hopkins Medical Institutions.
- Wagner, Dr. Richard S.** AT&T Telephone Laboratories, Murray Hill, New Jersey.
- Wagner, Dr. Robert P.** Department of Zoology, University of Texas, Austin.
- Wagner, Dr. Warren H., Jr.** Department of Botany, University of Michigan.
- Wahl, Prof. Floyd M.** Professor and Chairman, Department of Geology, University of Florida.
- Waidelich, Dr. Donald L.** Department of Electrical Engineering, University of Missouri.
- Wainwright, Howard W.** Coal Research Center, U.S. Bureau of Mines, Morgan-town, West Virginia.
- Waisel, Prof. Y.** Department of Botany, Tel Aviv University, Israel.
- Wakeham, Dr. W. A.** Department of Chemical Engineering and Chemical Technology, Imperial College of Science and Technology, London, England.
- Walbot, Dr. Virginia.** Department of Biological Sciences, Stanford University.
- Walczak, Mary M.** Department of Chemistry, Iowa State University of Science and Technology.
- Wald, Prof. Robert M.** Department of Physics, University of Chicago, Illinois.
- Waldmann, Katherine S.** National Institutes of Health, Department of Health and Human Services, Bethesda, Maryland.
- Waldmann, Dr. Thomas A.** Chief, Metabolism Branch, National Institutes of Health, Department of Health and Human Services, Bethesda, Maryland.
- Walker, J. H.** Vice President, Portland Cement Association, Skokie, Illinois.
- Walker, Michelle Y.** Davis, California.
- Walker, Dr. R. M.** Department of Physics, Washington University.

- Walker, Dr. Warren F., Jr.** Department of Biology, Oberlin College.
- Walkley, Dr. S. U.** Department of Neuroscience, Rose F. Kennedy Center for Research in Mental Retardation and Human Development, Albert Einstein College of Medicine, Bronx, New York.
- Walkup, Dr. John T.** Yale University School of Medicine, New Haven, Connecticut.
- Walkup, Dr. Robert D.** Department of Chemistry and Biochemistry, Texas Tech University.
- Wall, Dr. Joseph S.** Northern Regional Research Center, U.S. Department of Agriculture, Peoria, Illinois.
- Wallace, Prof. John F.** Division of Metallurgy and Material Science, Case Western Reserve University.
- Wallace, Dr. John M.** Department of Atmospheric Sciences, University of Washington, Seattle.
- Walsh, John J.** Brookhaven National Laboratories, Upton, New York.
- Walsh, Prof. Joseph L.** Deceased; formerly, Department of Mathematics, University of Maryland.
- Walsh, Dr. Michael A.** Department of Biology, Utah State University.
- Walsh, Dr. Peter J.** Department of Physics, Fairleigh Dickinson University.
- Walstedt, Dr. R. E.** Bell Laboratories, Murray Hill, New Jersey.
- Walt, Prof. Alexander J.** Department of Surgery, Harper Hospital, Wayne State University, Detroit, Michigan.
- Walt, Dr. Martin.** Physical Sciences Laboratory, Lockheed Missiles and Space Company, Palo Alto, California.
- Walton, Dr. Peter D.** Department of Plant Science, University of Alberta, Edmonton, Canada.
- Walworth, Vivian K.** Polaroid Corporation, Cambridge, Massachusetts.
- Walz, Arthur H., Jr.** U.S. Committee on Large Dams, Corps of Engineers, Washington, D.C.
- Wamser, Prof. Carl C.** Department of Chemistry, California State University.
- Wane, Dr. Malcolm T.** Krumb School of Mines, Columbia University.
- Wang, Prof. C. Y.** Departments of Mathematics and Mechanical Engineering, Michigan State University, East Lansing.
- Wang, Dr. Changchang.** Visiting Scholar, Department of Electrophysics, University of Southern California, Los Angeles.
- Wang, Prof. K. K.** Sibley School of Mechanical and Aerospace Engineering, Cornell University.
- Wang, Prof. William S. Y.** Project On Linguistic Analysis, University of California, Berkeley.
- Ward, Dr. David.** Atomic Energy of Canada Limited, Chalk River Nuclear Laboratories, Ontario, Canada.
- Ward, Jeffrey.** American Radio, Newington, Connecticut.
- Ware, Dr. Bennie R.** Department of Chemistry, Syracuse University.
- Warf, Dr. James C.** Department of Chemistry, University of Southern California.
- Warner, Deborah Jean.** Curator, History of Astronomy, National Museum of American History, Washington, D.C.
- Warner, Dr. Frank L.** Royal Signals and Radar Establishment, Great Malvern, Worcestershire, England.
- Warner, Dr. Robert M.** Department of Horticulture, University of Hawaii at Manoa.
- Warren, Prof. Bertram E.** Department of Physics, Massachusetts Institute of Technology.
- Warren, Dr. John J. K.** Resources Pty. Ltd., Mitcham, Australia.
- Warren, Dr. Mial E.** Sandia National Laboratories, Albuquerque, New Mexico.
- Wartik, Prof. Thomas.** Department of Chemistry, Pennsylvania State University.
- Wasserman, Dr. Zelda R.** Department of Central Research and Development, E. I. du Pont de Nemours and Company, Wilmington, Delaware.
- Waters, Dr. Everett.** Department of Psychology, State University of New York, Stony Brook.
- Watkins, Dr. Thomas D.** Chabot College, Hayward, California.
- Watson, William W.** Professor Emeritus of Physics, Yale University.
- Wattenberg, Ben J.** President, Fairfield Publishers, Inc.
- Watterson, Dr. Ray L.** Department of Zoology, University of Illinois, Urbana.
- Watts, Dr. Anthony B.** Department of Earth Sciences, University of Oxford, England.
- Watts, Michael.** National Aeronautics and Space Administration, Ames Research Center, Moffett Field, California.
- Way, George H.** Retired; formerly, Vice President of Research and Test Development, Association of American Railroads, Washington, D.C.
- Wayne, Dr. Andrew W.** Department of Haematology, Kings College Hospital, London, England.
- Weaver, Prof. David L.** Department of Physics, Tufts University.
- Weaver, Dr. E. Eugene.** Research Scientist, Product Development Group, Ford Motor Company, Dearborn, Michigan.
- Weaver, James L.** Lockheed Missiles and Space Company, Palo Alto, California.
- Weaver, Prof. Robert J.** Department of Viticulture and Enology, College of Agricultural and Environmental Sciences, University of California, Davis.
- Weaver, S. E.** Northrop Aircraft, Inc.
- Webb, Prof. J. E.** Professor of Zoology, University College, Ibadan, Nigeria.
- Webb, Dr. Jacqueline.** Villa Nova, Pennsylvania.
- Webb, Dr. Richard A.** IBM Research Division, Thomas J. Watson Research Center, IBM Corporation, Yorktown Heights, New York.
- Webber, Bonnie.** Department of Computer and Information Science, Moore School, University of Pennsylvania.
- Weber, Erwin L.** Deceased; formerly, Trust Department, National Bank of Commerce, Seattle, Washington.
- Weber, Harold C.** Chemical Engineer, Boston, Massachusetts.
- Webster, Dr. Douglas B.** Department of Otorhinolaryngology and Biocommunication, Louisiana State University Medical Center.
- Wedell, Dr. Nina.** School of Biology, University of Leeds, United Kingdom.
- Wedgewood, Prof. Lewis E.** Department of Chemical Engineering, University of Washington, Seattle.
- Wefer, Dr. Gerold.** Department of Geosciences, Universität Bremen, Germany.
- Wegner, Dr. Harvey E.** Physics Division, Brookhaven National Laboratory, Upton, New York.
- Weibell, Dr. Fred J.** Biomedical Engineering Society, Culver City, California.
- Weichert, Dr. Charles K.** Professor of Zoology and Dean, College of Arts and Sciences, University of Cincinnati.
- Weigel, Dr. Fritz.** Institut für Anorganische Chemie, Universität München, Germany.
- Weil, Dr. Andrew T.** Division of Social Perspectives in Medicine, University of Arizona Health Science Center, Tucson.
- Weil, Jonathan F.** Staff Editor, "McGraw-Hill Encyclopedia of Science and Technology," McGraw-Hill, New York.
- Weil, Robert T., Jr.** Deceased; formerly, Dean, School of Engineering, Manhattan College.
- Weil, Rolf.** Department of Material and Metallurgical Engineering, Stevens Institute of Technology.
- Weiler, Dr. J. Marvin.** Professor Emeritus, Department of Geophysical Sciences, University of Chicago.
- Weiler, Prof. Robert A. A. W.** Wright Nuclear Structure Laboratory, Yale University.
- Weinberger, Dr. Peter.** Swales Aerospace, Inc., Beltsville, Maryland.
- Weiss, Dr. Allison.** Department of Molecular Genetics, Biochemistry, and Microbiology, University of Cincinnati, Ohio.
- Weiss, Prof. Gerald.** Department of Electrical Engineering, Polytechnic Institute of New York.
- Weiss, Dr. Marc.** National Institute of Standards and Technology, Time and Frequency Division, Boulder, Colorado.
- Weiss, Dr. Theodore J.** Technical Manager, Food Department, Hunt-Wesson Foods, Inc., Fullerton, California.
- Weitz, Dr. Martin.** Sektion Physik, Ludwig-Maximilians-Universität, München, Germany.
- Weitzenhoffer, Dr. Andre M.** Veterans Administration Hospital, Oklahoma City, Oklahoma.

- Wejsa, James.** AMSTA-AR-FSA-M, United States Army Armament Research Development and Engineering Center, Picatinny Arsenal, New Jersey.
- Welch, Dr. Winona H.** Department of Botany and Bacteriology, De Pauw University.
- Welham, Dr. Chris J.** Druck Ltd., United Kingdom.
- Welhener, Dr. Herb.** Independent Mining Consultants, Inc., Tucson, Arizona.
- Weller, Prof. Gunter.** Global Change and Arctic Systems, University of Alaska, Fairbanks.
- Wellner, Dr. Daniel.** Department of Biochemistry, Cornell University Medical College.
- Wellstead, Dr. Carl F.** Doane College, Crete, Nebraska.
- Wendlandt, Prof. Wesley W.** Department of Chemistry, University of Houston.
- Wendler, Dr. Helen E.** Department of Biology, Massachusetts Institute of Technology.
- Wenkert, Prof. Ernest.** Department of Chemistry, Indiana University.
- Wenner, Prof. Adrian M.** Department of Biological Sciences, University of California, Santa Barbara.
- Wentorf, Robert H., Jr.** General Electric Research and Development, Schenectady, New York.
- Wenzel, Dr. Elizabeth M.** Ames Research Center, National Aeronautics and Space Administration, Moffett Field, California.
- West, Dr. William.** Eastman Kodak Company, Rochester, New York.
- Westfall, Dr. Richard S.** Department of History and Philosophy of Science, Indiana University.
- Westheimer, Prof. F. H.** Chemistry Department, Harvard University, Cambridge, Massachusetts.
- Wetzel, Dr. Richard.** College of William and Mary, Virginia Institute of Marine Science, School of Marine Science, Gloucester Point, Virginia.
- Whaley, Dr. W. Gordon.** Cell Research Institute, University of Texas, Austin.
- Wheeler, Dr. Harry E.** Department of Plant Pathology, University of Kentucky.
- Whelan, Dr. Jean K.** Senior Research Specialist, Department of Chemistry, Woods Hole Oceanographic Institution, Woods Hole, Massachusetts.
- Whinnery, Prof. John R.** Department of Electrical Engineering and Computer Science, College of Engineering, University of California, Berkeley.
- Whistler, Prof. Roy L.** Department of Biochemistry, Purdue University.
- Whitcomb, Dr. Richard T.** NASA Langley Research Center, Langley Field, Virginia.
- White, Donald R. J.** International Training Centre, Don White Consultants, Inc., Gainesville, Virginia.
- White, Dr. Abraham.** Consulting Professor of Biochemistry, Stanford University; School of Medicine; Distinguished Scientist, Institute of Biological Sciences, Syntex Research.
- White, Prof. Colin.** Department of Epidemiology and Public Health, Yale University.
- White, Dr. C. Langdon.** Professor of Geography, Stanford University.
- White, Dr. Lawrence R.** Technical Director, "Popular Photography," New York.
- White, Dr. K. Preston, Jr.** Department of Systems Engineering, University of Virginia.
- White, Prof. Robert M.** Head, Department of Electrical and Computer Engineering, Carnegie-Mellon University, Pittsburgh, Pennsylvania.
- White, Dr. Sidney E.** Department of Geology and Mineralogy, Ohio State University.
- White, Dr. Stanley A.** President, Signal Processing and Controls Engineering, San Clemente, California.
- White, Dr. Stephanie.** Northrop Grumman, Bethpage, New York.
- White, Dr. Tim.** School of Forest Resources, University of Florida, Gainesville.
- Whitehead, Prof. W. Dexter.** Department of Physics, Center for Advanced Studies, University of Virginia.
- Whitmore, Dr. T. C.** Department of Geography, University of Cambridge, United Kingdom.
- Whitney, Eugene C.** Consulting Engineer, Pittsburgh, Pennsylvania.
- Whittingham, Dr. M. Stanley.** Director, Materials Research Center, State University of New York, Binghamton.
- Wicks, Dr. Fred J.** Department of Mineralogy, Royal Ontario Museum, Ontario, Canada.
- Wickstrom, Dr. Conrad.** Department of Biological Sciences, Kent State University.
- Widder, Prof. David V.** Department of Mathematics, Harvard University.
- Widom, Dr. Jennifer.** IBM Almaden Research Center, San Jose, California.
- Wiegand, Dr. Clyde E.** Lawrence Berkeley Laboratory, University of California, Berkeley.
- Wiens, Prof. Herold J.** Deceased; formerly, Department of Geography, Yale University.
- Wienski, Robert M.** District Manager, ISDN Architecture Planning, Bell Communications Research, Red Bank, New Jersey.
- Wiest, Dr. John M.** Department of Chemical Engineering, University of Alabama, Tuscaloosa.
- Wightman, Prof. Arthur S.** Department of Physics, Joseph Henry Laboratories, Princeton University.
- Wikle, Prof. Thomas A.** Professor and Head, Department of Geography, Oklahoma State University, Stillwater.
- Wilbur, Donald A., Sr.** Emeritus Professor of Entomology, Kansas State University.
- Wilbur, Prof. Paul J.** Department of Mechanical Engineering, Colorado State University.
- Wilcox, Dr. Hugh.** State University College of Forestry, Syracuse University.
- Wilcox, Dr. Kimerly J.** Dight Laboratories, University of Minnesota.
- Wilcox, Prof. William R.** Department of Chemical Engineering, Clarkson College of Technology.
- Wilczek, Prof. Frank.** Institute for Advanced Study, Princeton, New Jersey.
- Wilder, Dr. George J.** Department of Biological Sciences, University of Illinois, Chicago.
- Wildhack, William A.** Consultant; formerly, Associate Director, Institute for Basic Standards, National Bureau of Standards.
- Wilen, Dr. Samuel H.** Department of Chemistry, City University of New York.
- Wiles, Dr. D. M.** National Research Council of Canada, Ottawa, Ontario.
- Wiley, Prof. Edward O., III.** Curator, Natural History Museum, University of Kansas, Lawrence.
- Wilhelm, Dr. Harley A.** Principal Scientist, EMRR Institute and Ames Laboratory of U.S. Department of Energy, Iowa State University.
- Wilhoit, Dr. Randolph C.** Thermodynamics Research Center, Texas A & M University.
- Wilkening, Dr. M.** Department of Physics, New Mexico Institute of Mining and Technology.
- Wilkinson, Dr. Brian J.** Department of Biological Sciences, Illinois State University.
- Wilkinson, Prof. Denys H.** Department of Nuclear Physics, Oxford University, England.
- Wilkinson, Dr. Michael K.** Associate Director, Solid State Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee.
- Willett, Prof. Hilda P.** Director of Graduate Studies, Department of Microbiology, Duke University Medical Center, Durham, North Carolina.
- Willett, Prof. Kurd C.** Department of Meteorology, Massachusetts Institute of Technology.
- Willey, Dr. Robert B.** Department of Biological Sciences, University of Illinois.
- Williams, Dr. D. B.** Department of Materials Science and Engineering, Lehigh University, Bethlehem, Pennsylvania.
- Williams, Prof. Dudley.** Department of Physics, Kansas State University.
- Williams, Dr. Earl G.** Structural Acoustics, Naval Research Laboratory, Washington, D.C.
- Williams, Dr. Earle R.** Department of Earth, Atmospheric and Planetary Sciences, Massachusetts Institute of Technology, Center for Meteorology and Physical Oceanography.
- Williams, Prof. Gary A.** Department of Physics, University of California, Los Angeles.
- Williams, Dr. Jack M.** Chemistry Division, Argonne National Laboratory, Argonne, Illinois.
- Williams, Dr. Kathleen M.** Extension Pomologist, Tree Fruit Research and

- Extension Center, Washington State University, Wenatchee.
- Williams, Dr. Peter.** Department of Chemistry, Arizona State University.
- Williams, Dr. Roger J.** Deceased; formerly, Department of Chemistry, University of Texas, Austin.
- Williams, S. A.** Department of Physics, Iowa State University.
- Williams, Prof. Todd D.** Department of Chemistry, University of Kansas, Lawrence.
- Williamson, Dr. K. D.** Los Alamos Scientific Laboratory, Los Alamos, New Mexico.
- Willingham, Dr. Mark C.** National Institutes of Health, National Cancer Institute, Bethesda, Maryland.
- Willis, Dr. William J.** European Organization for Nuclear Research (CERN), Geneva, Switzerland.
- Wilson, Dr. B. F.** Department of Forestry and Wildlife Management, University of Massachusetts.
- Wilson, Dr. Curtis B.** Department of Immunopathology, Scripps Clinic and Research Foundation, La Jolla, California.
- Wilson, Prof. George S.** Department of Chemistry, University of Kansas, Lawrence.
- Wilson, Grady W.** Deputy Director and Chief Test Pilot, Raspet Flight Research Laboratory, Mississippi State University.
- Wilson, Dr. Irwin B.** Department of Chemistry and Biochemistry, University of Colorado.
- Wilson, Dr. James B.** Department of Forest Products, Oregon State University, Corvallis.
- Wilson, Dr. James L.** Department of Geology and Mineralogy, University of Michigan.
- Wilson, Dr. Leonard R.** George Lynn Cross Research Professor of Geology and Geophysics, School of Geology and Geophysics, University of Oklahoma.
- Wilson, Prof. Mason P., Jr.** Department of Mechanical Engineering, University of Rhode Island, Kingston.
- Wilson, Dr. Therese.** Biological Laboratories, Harvard University.
- Wilt, Dr. Fred.** Department of Zoology, University of California, Berkeley.
- Winch, Prof. Ralph P.** Department of Physics, Williams College.
- Wing, Dr. Robert F.** Department of Astronomy, Ohio State University, Columbus.
- Winick, Dr. Herman.** Deputy Director, Stanford Synchrotron Radiation Laboratory, Stanford, California.
- Winn, Kevin.** American Sudden Infant Death Syndrome Institute, Atlanta, Georgia.
- Winston, Dr. Judith E.** Assistant Curator, Department of Invertebrates, American Museum of Natural History, New York.
- Winter, Dr. John M., Jr.** Department of Materials Science and Engineering, Johns Hopkins University, Baltimore, Maryland.
- Winter, Prof. Rolf G.** Department of Physics, College of William and Mary.
- Winter, Dr. Thomas C.** U.S. Geological Survey, Department of the Interior, Denver, Colorado.
- Winterer, Dr. Edward L.** Geological Research Division, Scripps Institution of Oceanography, La Jolla, California.
- Wise, Edmund M.** Consultant; formerly, Assistant to Vice President of Research, International Nickel Company, Inc., New York.
- Wittmann, H. G.** Max-Planck Institut für Molekulare Genetik, Berlin, Germany.
- Wittmers, Dr. L. E.** School of Medicine, University of Minnesota.
- Wnek, Prof. Gary E.** Director, Polymer Science and Engineering Program, Department of Chemistry, School of Science, Rensselaer Polytechnic Institute.
- Wold, Dr. Marc.** Department of Biochemistry, University of Iowa College of Medicine, Iowa City.
- Wolf, Dr. Peter.** IBM Zurich Research Laboratory, Switzerland.
- Wolf, Dr. Werner P.** Department of Physics, Yale University.
- Wolfe, Dr. Ralph S.** Marine Biological Laboratory, Woods Hole, Massachusetts.
- Wolfe, Dr. William L.** Optical Sciences Center, University of Arizona.
- Wolferz, Alfred H.** Chief (retired), Tachometer Systems Development, Weston Instruments Division, Daystrom, Inc., Newark, New Jersey.
- Wolford, Dr. James C.** Mechanical Engineering Department, University of Nebraska.
- Wollersheim, Prof. David.** Department of Mechanical and Aerospace Engineering, University of Missouri.
- Wollnik, Prof. H.** Physikalisches Institut, Justus Liebig-Universität, Giessen, Germany.
- Wolovich, Dr. William.** Department of Engineering, Brown University.
- Wonders, Dr. William C.** Department of Geography, University of Alberta, Canada.
- Wones, Dr. David R.** Department of Geological Sciences, Virginia Polytechnic Institute and State University.
- Wong, Dr. George S. K.** Acoustical Standards, Institute for National Measurement Standards, Ottawa, Ontario, Canada.
- Wood, Dr. Albert E.** (Retired) Department of Biology, Amherst College.
- Wood, Dr. B. J.** Department of the Geophysical Sciences, University of Chicago.
- Wood, Dr. Chris.** Electric Power Research Institute, Palo Alto, California.
- Wood, Dr. Earl H.** Mayo Foundation, Graduate School of Medicine, University of Minnesota.
- Wood, Dr. Frank B.** Department of Physics and Astronomy, University of Florida.
- Wood, Dr. H. William.** Consultant, Aerospace, Roaring Gap, North Carolina.
- Woodall, James E.** Division Manufacturing Manager, Westinghouse Electric Corporation, Pittsburgh, Pennsylvania.
- Woodall, Prof. Jerry M.** Yale University, Department of Electrical Engineering, New Haven, Connecticut.
- Woodcock, C. L. F.** Professor of Zoology, University of Massachusetts.
- Woods, Dr. Jon P.** Assistant Professor, Department of Medical Microbiology and Immunology, University of Wisconsin Medical School, Madison.
- Woodward, Prof. John B., III.** Department of Naval Architecture and Marine Engineering, University of Michigan.
- Woody, Dr. R. W.** Department of Biochemistry, Colorado State University.
- Wosley, Prof. Stan E.** Lick Observatory, Santa Cruz, California.
- Woram, John M.** Woram Audio Associates, New York.
- Wray, Dr. John L.** Marathon Oil Company, Littleton, Colorado.
- Wright, Elliott F.** Consulting Engineer (retired), Advanced Products Division, Studebaker-Worthington Corporation, Harrison, New Jersey.
- Wright, James A.** Strategic Marketing Manager, Motorola, Inc., Boynton Beach, Florida.
- Wright, Michael E.** National Semiconductor Corporation, Santa Clara, California.
- Wright, Prof. Raymond.** Department of Civil and Environmental Engineering, University of Rhode Island, Kingston.
- Wu, Prof. Tai Tsun.** Division of Engineering and Applied Physics, Harvard University.
- Wuensch, Dr. Bernhardt J.** Department of Metallurgy and Materials Science, Massachusetts Institute of Technology.
- Wulff, Dr. Verner J.** Associate Director of Research, Masonic Medical Research Laboratory, Utica, New York.
- Wurtele, Prof. Morgan G.** Department of Atmospheric Sciences, University of California, Los Angeles.
- Wyant, Prof. James C.** Optical Sciences Center, University of Arizona.
- Wygodzinsky, Dr. Pedro W.** Department of Entomology, American Museum of Natural History, New York.
- Wyke, Dr. John A.** Wolfson Laboratory for Molecular Pathology, The Beatson Institute for Cancer Research, Glasgow, Scotland.
- Wyllie, Dr. Peter J.** Chairman, Department of Geophysical Sciences, University of Chicago.
- Wyman, Dr. Richard E.** Director of Research, Canadian Hunter Exploration, Ltd., Calgary, Alberta.
- Wyrтки, Dr. Klaus.** Department of Oceanography, University of Hawaii, Manoa.
- Wüest, Dr. Alfred Johnny.** Applied Aquatic Ecology (APEC), Kastanienbaum, Switzerland.

## Y

**Yagi, Prof. Takehiko.** Institute of Solid State Physics, University of Tokyo, Japan.

**Yalow, Dr. Rosalyn S.** Senior Medical Investigator, Veterans Administration Hospital, New York.

**Yamaguchi, Prof. M.** Department of Vegetable Crops, University of California, Davis.

**Yang, Hongjun.** IGEN, Inc., Rockville, Maryland.

**Yankee, Prof. Herbert W.** Mechanical Engineering Department, Worcester Polytechnic Institute.

**Yates, Dr. S. F.** Allied Signal Research Center, Inc., Des Plaines, Illinois.

**Yeatman, Dr. Harry C.** Department of Zoology, University of the South, Sewanee, Tennessee.

**Yegulalp, Prof. Tuncel M.** Henry Krumb School of Mines, Columbia University, New York.

**Yell, Dr. Ralph W.** National Physical Laboratory, Teddington, Middlesex, England.

**Yelles, Marvin.** Formerly, Editor, "McGraw-Hill Encyclopedia of Science and Technology," McGraw-Hill Book Company, New York.

**Yellott, John I.** Emeritus Professor, College of Architecture, Arizona State University.

**Yeomans, Dr. Donald K.** Jet Propulsion Laboratory, California Institute of Technology.

**Yin, Prof. Frank C.-P.** Department of Medicine, Johns Hopkins Schools of Medicine, Baltimore, Maryland.

**Yochelson, Dr. Ellis L.** Geological Survey, U.S. Department of the Interior, Washington, D.C.

**Yokelson, Dr. Howard B.** Research and Development Department, Amoco Chemical Company, Naperville, Illinois.

**Yost, Prof. Don M.** Formerly, California Institute of Technology.

**Yost, Dr. William A.** Director, Parmlly Hearing Institute, Loyola University.

**Young, Dr. Anne B.** Department of Neurology, University of Michigan.

**Young, Dr. David A.** Department of Entomology, North Carolina State University.

**Young, Edward M.** Deceased; formerly, Associate Editor, "Engineering News Record," McGraw-Hill, Inc., New York.

**Young, Prof. Grant M.** Department of Earth Sciences, University of Western Ontario, London, Ontario, Canada.

**Young, Prof. N. J.** Department of Mathematics and Statistics, University of Lancaster, England.

**Young, Dr. Robert W.** Associate Editor, "Journal of the Acoustical Society of America," San Diego, California.

**Young, Prof. Thomas F.** Deceased; formerly, Department of Chemistry, of Chicago.

**Young, Wayne.** Director, Environmental Dredging, Maryland Environmental Service, Annapolis.

**Yunker, Dr. Leland W.** Earth Science Department, Lawrence Livermore National Laboratory, University of California.

**Yu, Dr. Ching-Sung.** Deceased; formerly, Professor Emeritus of Astronomy, Hood College.

**Yu, Dr. Robert K.** Department of Biochemistry and Molecular Biophysics, Virginia Commonwealth University School of Medicine, Richmond.

**Yuen, Prof. Horace P.** Department of Electrical Engineering and Computer Science, Northwestern University.

**Yungul, Dr. Sulhi H.** Chevron Resources Company, San Francisco, California.

## Z

**Zaitlin, Dr. Milton.** Associate Director, Biotechnology Program, Plant Pathology, Cornell University.

**Zander, Dr. Andrew T.** Varian Associates, Palo Alto, California.

**Zangerl, Dr. Rainer.** Chief Curator (retired), Department of Geology, Field Museum of Natural History, Chicago, Illinois.

**Zanoni, Thomas A.** Taxonomist, Jardín Botánico Nacional, Santo Domingo, Dominican Republic; and Honorary Research Associate, New York Botanical Garden.

**Zapffe, Dr. Carl A.** Consultant, Baltimore, Maryland.

**Zbar, Dr. Frederick.** Chevy Chase, Maryland.

**Zebroski, Dr. Edwin L.** Los Altos, California.

**Zeitlin, Dr. Andrew D.** MITRE Corporation, McLean, Virginia.

**Zelitch, Dr. Israel.** Department of Biochemistry and Genetics, Connecticut Agricultural Experiment Station, New Haven.

**Zelkowitz, Prof. Marvin V.** Department of Computer Science, University of Maryland, College Park Maryland.

**Zeller, Dr. Andreas.** Universität Passau, Lehrstuhl für Software-Systeme, Passau, Germany.

**Zeller, Prof. Michael E.** Department of Physics, Yale University.

**Zelnick, Dr. Ernest.** Dispensing Audiologist, New York.

**Zhang, Dr. Ruyuan.** Department of Geological and Environmental Sciences, Stanford University, Stanford, California.

**Zhao, Prof. Wei.** Department of Computer Science, Texas A & M University, College Station.

**Ziemer, Prof. Rodger, E.** Chairperson, Department of Electrical and Computer Engineering, University of Colorado, Colorado Springs.

**Zifcak, John H.** The Foxboro Company, Foxboro, Massachusetts.

**Zimmerman, Dr. John R.** Department of Mechanical Engineering, Pennsylvania State University.

**Zimmerman, Dr. Leroy H.** (Retired) U.S. Department of Agriculture, Tucson, Arizona.

**Zinder, Dr. Norton D.** Department of Microbial Genetics, Rockefeller University.

**Zink, Dr. Frank W.** Department of Vegetable Crops, University of California, Davis.

**Zinner, Dr. Ernst.** McDonnell Center for the Space Sciences, Washington University, St. Louis, Missouri.

**Zirin, Dr. Harold.** Department of Physics, California Institute of Technology.

**Zissis, Dr. George J.** Chief Scientist, Environmental Research Institute of Michigan, Ann Arbor.

**Zlotnik, Dr. I.** Microbiological Research Establishment, Wilts, England.

**Zohar, Dr. Joseph.** Deputy Director, Beer Sheva Mental Health Center, Beer Sheva, Israel.

**Zubay, Dr. Geoffrey.** Sherman Fairchild Center for the Life Sciences, Department of Biological Sciences, Columbia University.

**Zuk, Dr. William.** School of Architecture, University of Virginia.

**Zuman, Dr. Petr.** Department of Chemistry, Clarkson College of Technology.

**Zumberge, Dr. Mark A.** Institute of Geophysics and Planetary Physics, Scripps Institution of Oceanography, La Jolla, California.

**Zurek, Dr. Wojciech H.** Los Alamos National Laboratory, Los Alamos, New Mexico.

**Zweifel, Dr. Richard G.** Curator, Department of Herpetology, American Museum of Natural History, New York.

**Zwerman, Prof. Paul J.** Department of Agronomy, Cornell University.
