You Can Easily Operate This Typewriter Yourself

Don't worry your correspondent.

Don't write him anything by hand that takes him time to make out—that may leave him in doubt—that he can't easily read.

And don't fill out legal papers or card memos—or make out accounts or hotel menus in your own handwriting.

It looks bad, reflects on your standing, makes people think you can't afford a stenographer, and is sometimes ambiguous.

You can write out your letters—make out an abstract—fill in an insurance policy—enter your card memos—make out your accounts, or a hotel menu—or do any kind of writing you need, on any kind, size or thickness of paper, and space any way you want on

The OLIVER Typewriter

The Standard Visible Writer

You can write any of these things yourself if you do not happen to have a stenographer.

For you can easily learn, with a little practice, to write just as rapidly, and as perfectly, as an expert operator on the OLIVER. Because the OLIVER is the simplified typewriter. And you can see every word you write. About 80% more durable than any other typewriter, because it has about 80% less wearing parts than most other typewriters.

80% easier to write with than these other complicated, intricate machines that require "humoring"—technical knowledge—long practice and special skill to operate.

Than machines which cannot be adjusted to any special space—with which it is impossible to write abstracts, insurance policies, or odd-sized documents except you buy expensive special attachments requiring experts to operate.

You can adjust the OLIVER to any reasonable space—you can write on any reasonable size and thickness of paper, right out to the very edge, without the aid of any expensive attachment or special skill, and your work will be neat appearing, legible and clear.

For the OLIVER is the typewriter for the doctor, the lawyer, the insurance agent, the merchant, the hotel proprietor—or any man who does his own writing.

Write us now for our booklet on the simplified features of the OLIVER.

The OLIVER Typewriter Co.
310 Broadway

IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

[Owing to a delay at the Patent Office the text and cuts of the United States patents were not received in time to appear this week.—EDITOR.]

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1906, FROM THE Illustrated Official Journal.)

ISSUE OF DEC. 19, 1906.

17,612. DRESS-PINS, HAIR-PINS. E. H. SURRIAGE, Natal, South Africa. Aug. 31.

A hat-pin, applicable also as a hair-pin, consists of a central pin 1, having barbs 3 near the point projecting through apertures in a tubular sheath 4.

The barbs are withdrawn into the sheath, or caused to protrude therefrom, by movement of the head 10, which is connected to the pin and is mounted so as to slide on a collar 6 fixed to the sheath.

17,817. JEWELRY, ETC. B. R. SIMMONS, Birmingham. Sept. 4.

The bezels of the miniatures and other ornaments are attached without the use of solder to safety, scarf, hat or hair-pins, etc., by flattening or enlarging the wire parts which are engaged by the pierced or slotted bezel. A miniature and a

blank D, Fig. 5, having been inserted in the bezel B, Fig. 3, the flattened part a² of the safety-pin A, Fig. 4, is fitted in the slots b². A plain disk is then added, and the edge of the bezel turned in. The part a² may be given an S-shape.

In the application to other pins, the projecting end of the pin opposite to the point may be enlarged and ornamented. Otherwise, the bezel may have only one piercing, and the end of the pin F, Fig. 10, may have an enlargement f² to fit in a slot h in a blank H secured between back and front blanks in the bezel. Miniatures may be arranged on both sides of the pin, the head of which may be formed as a ring. With strong

miniatures, the front blank D may be dispensed with.

17,823. NECKLACE, ETC., FASTENINGS. E. SWAN, Birmingham. Sept. 4.
Necklaces and the like are fastened by means of

a snap 10, which has recesses 11, Fig. 1, or projections 11a Fig. 4, engaging projections or recesses at the opening 9 at the end of the cylinder 7.

17,826. ELECTRIC CLOCKS, ETC. I. H. PARSONS and A. E. J. BALL, Leicester. Sept. 4.

Electric clocks and the like are provided with a warning and delay device, which acts if the periodic current become too weak for its work and is in consequence prolonged by failure or delay of the automatic brake. The device comprises a heavy armature lever A on the pivot B of the armature D of an electromagnet C, connected by a link 11, with a pendulum E having a weight F and counterpoise F¹. The normal

short currents fail to overcome the inertia of the apparatus, but a prolonged current causes the pendulum to strike a gong I or expose a flag or the like, and with this action a resistance may be cut out or a second battery be switched in. As a modification, the device is operated by the gravity

lever which drives the clock. The device may be used with the electric clocks described in Specification No. 24,620, A.D. 1904. For the purpose of increasing the current, the clock may be modified as shown in Fig. 3, by the introduction of an intermediate lever R, which closes the contacts K, K¹.

17,899. BROOCHES, FLOWER HOLDERS, ETC. J. H. WYNN, Birmingham. Sept. 5.
A brooch 3 has a hollow or curved part 7,

formed independently of the front plate 3, to provide

vide increased space for dress material, flowers, etc., and to avoid distortion of the pin 4.

Complete specifications accepted Dec. 12, 1906.

- 1905.
- 25,296. TIME-RECORDER. MOOSMANN.

*The Great Driving Wheel of a
LOCOMOTIVE* traveling a mile a minute,
makes 403,361 revolutions in twenty-four hours:

*The Tiny Balance Wheel of a
WALTHAM WATCH* makes 432,000
vibrations in the same time:

The immense power and high speed
of the locomotive are rendered prac-
ticable only by the wonderful precision
of the watch.

*WALTHAM WATCHES are made
to fully meet the most exacting requirements.*

THE HOROLOGICAL REVIEW

Elementary Dialing.

By JAMES ARTHUR, in *Machinery*.

THE sun-dial is probably the oldest means of marking time, and its history is lost in the remote past. The moving shadows of fixed objects must have been observed by primitive man as indicating the passage of the day, and a very natural step after this was to place marks to be reached successively by the shadows, thus dividing the day into periods, ultimately settling down to our 24-hour method. To-day farmers in out-of-the-way places have their "noon marks" reached by the shadow of a tree trunk or other fixed object; and, as any

FIG. 1.
Round faced dial for latitude of New York.

vertical object gives noon just as accurately as a dial, the method is still good.

Among the ancient references to dials is that to "The Dial of Ahaz" in the Old Testament, and it would be pretty safe to say that that was the only one on which the sun ever went backwards. Coming nearer our times, dials cut on stone become numerous, and those cut on the walls of churches and public buildings are comparatively modern. A very quaint one of this kind may be seen in Amsterdam, Holland, and one on the old church in St. Augustine, Florida.

The old cyclopedias nearly always had a large section on "Dialing," and their steel and copper plate engravings were often equal to our best work of to-day. Among books on dials may be mentioned "Sundials and Roses of Yesterday," by Earle, and "The Time Piece of Shadows," by Spackman, both rich in illustrations.

The development of the modern clock

caused the dial to decline to a garden ornament, but within a few years there has been a distinct revival, and this is good; for the dial and its supporting column give opportunities for original and artistic treatment to an unlimited extent. As a scientific amusement the construction and setting of dials could hardly be surpassed, since the higher branches require astronomical and mathematical knowledge. The fundamental principles, however, are simple, as I shall try to show.

Referring to Fig. 2, let $N E S W$ represent a great circle of the earth corresponding with the meridian of New York City Hall. $S N$ is the axis, and at the north

FIG. 2.
Basic principle of sun-dial illustrated.

pole, N , we will erect a horizontal dial, as shown at $A B$, and lining with the axis is the vertical wire C , forming the "style" of the dial, being the part which casts the shadow on the dial plate $A B$. We will assume that the earth rotates exactly in just 24 hours. In midsummer when the sun's rays fall on this dial as per arrow C the shadow at 12 noon (or when the sun passes the New York meridian) would fall towards B on the 12 o'clock line of the dial.

Now, if this dial is divided equally into 24 parts, the shadow of the style C will fall on the lines uniformly each hour for the entire 24 hours, since the sun does not set on the north pole during our Summer. If you will stick a pin in the center of Fig. 3 you will have this dial. Now we will erect a dial the same on the equator at W , but we must keep the same relative position to the axis of the earth and the equator—that is, the style $C' C''$ must be parallel to the axis $S N$ and the dial plate $A B'$ parallel to the equator, $W E$.

The beginner must grasp these elementary steps thoroughly before proceeding further, *viz.*, that any number of dials of this pattern may be erected on the surface of the earth with the plates parallel to the equator, and wires, or styles, parallel to the earth's axis, and that they are all divided into 24 equal spaces for the hours, and will mark the sun time. In the case of the dial at W the effect is the same as if the 24-hour rotation took place on the line $C' C''$ and similarly with all the dials. Note that the dial at W is fastened by its edge to the column so as to get it in the same relative position as the north pole dial at N . The dial at W is double, so that the Summer sun as per arrow C'' falls on its north side, while the sun at the Equinox falls on its edge as per arrow A' and during Winter on the south side as per arrow C' .

This is all very simple; the styles standing up square in the centers of the dials and the 24 hours divided equally like the spokes of a wheel, as $K R L Q$ in Fig. 3. This brings us to the point which puzzles many persons of education—that is the varying spaces of the hours on a horizontal dial at New York. At D (which is the latitude of New York, 40 degrees 43 minutes) is shown a regular horizontal dial, $H I$, the style $F G$ being parallel to the earth's axis, $S N$, and this is the universal and necessary characteristic of all true dials; so the three dials described all have their styles pointing to the pole star, and dials may be set on a clear night by viewing the edges of their styles to the pole star.

To illustrate the fact that all dials have their lines equally divided, refer to Fig. 3, representing a cylinder, side elevation, $J K$, and end elevation $K L$, which we will suppose to be built up of white wood in 24 sections, 1, 2, 3, 4, etc., all glued up with dark-colored glue. The end of this cylinder $K L$ represents the two dials W and N , Fig. 2, the glued joints being the hour lines. Now cut this cylinder on line $M O$, being 40 degrees 43 minutes to its axis $J K$ and the section will be the ellipse Fig. 4, which is a horizontal dial for New York. To show that these lines are correct, a dial of ordinary proportions is shown within the elliptical section, its hours being the glued joint lines.

Further, cut the cylinder to the latitude of any place you please and the section will be a horizontal dial for that place. Still further, you may cut it irregularly, as per line P , like the face of a rock at the seashore, and it will be a correct dial. You may even turn it on its axis $J K$ and set any

of the
World

Indispensable to modern life, the Elgin Watch is ever in increasing demand—and the balance of business goes to the store that carries a full stock of Elgin Watches.

See Jobbers' list for prices or write the Company.

Every dealer is invited to send for the Elgin Art Booklet, "Timemakers and Timekeepers," illustrating the history and development of the watch.

ELGIN NATIONAL WATCH COMPANY

Factories, Elgin, Illinois, U. S. A.
General Offices, 131 Wabash Ave., Chicago.

New York Office, 11 John Street.
San Francisco Office, 704 Market St.

of the glue joints on the meridian and mark that joint 12 o'clock, and it will still be correct. Only one thing you cannot change—the axis *J K*, which we will assume to be a stiff wire, must be parallel to the earth's axis.

FIG. 3
Development of dial for latitude of New York.

Imagine the globe, Fig. 2, to be glued up of 24 sections, the meridians being the joints. If this globe is cut on line *XII*, it will give the lines for a horizontal dial at New York the same as Fig. 4, the axis *VI*, *V* being the style of this 8,000-mile dial, but this might look a little more difficult to the beginner. This explains the very irregular lines on dials which are cut on the walls of buildings or even on the face of a rough rock cliff. Set up a round stiff rod pointing to the pole star or a solid piece with its edge so pointing. Now, project imaginary planes from this rod or edge by viewing it at intervals of 15 degrees, but take the first view north for your 12 o'clock line.

Where the planes (or views) cut surrounding objects, such as the wall of a building, a rock, or a pavement, cut or paint lines and you have a correct dial. Some of these lines would look very wild, but viewed from the style as the shadow strikes them they are straight lines, just

FIG. 4.

showing part of elliptical section used in dial face.

like the glued joints in Fig. 3. All this is to establish the fact that the hours are angles of 15 degrees (or 1-24 the circle) evenly divided around the style. But this glued-up cylinder is only a graphic illustration and need not be made. Let *T*, Fig. 5, be a solid

cylinder mounted in the milling machine as shown and milled off to 40 degrees 43 minutes on section *V U*, being the same as section *M O* on Fig. 3. Set the machine to 24 and scratch off hair lines by the surface gauge *X* as you register each 24th and

the result will be exactly Fig. 4, which is a New York horizontal dial.

One step more, even the portion of a cylinder, *T*, is not necessary, but is intended to keep the illustration clear. Any piece of wood or metal fastened to the face plate of

FIG. 5.
Scribing the master dial.

the machine in place of *T*, so long as you can mill a portion of it off to angle *V U*, will be sufficient. Now place on this surface a polished brass plate, *V U*, and proceed to scratch hair lines on it by surface gauge, and you will have a *master dial plate* for New York, from which dials may be made in any number by mere copying. In other words, when you understand the fundamental principle you may fasten the master dial plate in the machine by any blocking or angle pieces at hand, but it must be 40 degrees 43 minutes to axis of the dividing head if you want a New York horizontal master dial.

These hair lines made by the surface gauge, of course, require to be cut in a little by using a steel straight-edge and a hard sharp point, so as to make this master dial permanent. So far this is done by the milling machine as in general use, but an attachment can be designed which would enable us to mount the dial plate parallel to the table of the machine, and then the lines could be cut in by the machine just as we now engrave degrees on a circle. With this attachment, which could be set to the latitude of any desired place, we would have what might be called a dial-engraving machine.

Fig. 1 is a photo-engraving of a complete horizontal dial for New York City made in every respect as described, the lines being engraved on the milling machine. Fig. 6 has same lines, but projected on a square plate, which is merely a matter of taste, as

the dial plate may be of any plain or fanciful shape.

The books contain methods of laying down a dial on the drawing board, but this method in the milling machine is as accurate as the machine itself and for practical purposes perfect, and free from the personal error in laying down intersecting lines and then drawing final lines through these intersections. It is hardly necessary to point out that for half hours, quarters and five-minute marks the same methods apply, but as this is an elementary chapter on dialing the illustrations are simpler and clearer by showing only hours. For quarter hours set the machine to 96, and for five-minute marks to 288.

For similar reasons the variations in sun time, amounting to about half an hour during the year, corrections for position of "pole star" and errors caused by atmospheric refraction, etc., as well as minute practical instructions for making and setting up dials cannot be gone into here.

[We consider the foregoing article unique, being, as it is, on the theory of the oldest and most primitive device known to man for marking time, and at the same time

showing a scientific method of using a modern machine tool—the milling machine—to lay out a master dial plate for any latitude. The sun-dial is an interesting example of projection, the normal dial, as explained, being an evenly divided 24-space

FIG. 6
An attractive alternative design of dial.

circle at right angles to the polar axis, while the working dial is a projection of the normal dial on a plane tangent to the earth's radius for whatever latitude required.

The described method of projection for making the master dial uses a milling machine dividing head in which a wooden

block is held and milled off at the required latitude angle to support the master dial blank during the marking-off process. Making the supporting wooden block a composite structure with 24 sectors simply showed the principle clearer. The transfer of divisions from the master dial to a working dial is readily done with dividers.

Mr. Arthur, the writer of the article, as some of our readers know, is a machine shop proprietor in New York City, who is employing part of his leisure time in the study and construction of various horological devices, and the sun dial is the type of time-keeper which he has only recently taken up, and this he is attacking in a characteristically thorough manner. The writer has seen the master plate made for the latitude of New York City, and a demonstration of the method by which it was laid out.

It is obvious from the foregoing description that this simple mechanical method of projection eliminates the liability of error, which, of course, is present in the ordinary drawing-board method. It should not be inferred, however, that a slight error is of any great consequence in a sun dial, but it is of interest to know that Mr. Arthur has gone at the construction of this ancient time-keeper by scientific and accurate machine shop methods, doing what is probably absolutely new and unique in this direction. —EDITOR.]

On Brass.

(Written exclusively for THE JEWELERS' CIRCULAR-WEEKLY by H. REINECKE.)

THE number of alloys of copper which come under the generic name of brass amount to many, and are of the greatest importance, not only to every mechanic, but also to the artisan, among which latter class the horologist belongs. This alloy involves the use of the following different metals (each of which is required in a greater or less proportion to suit the variety of operations where brass is indispensable), namely, copper, zinc, tin, lead and sometimes antimony and nickel. The first metals are those in greatest request for mechanical purposes. The principal metal, copper, was known to the ancients previous to the discovery of malleable iron, and was applied to all the purposes for which the latter metal is now used.

Although we find brass spoken of in the Scriptures, as in many other historical writings, yet it is well ascertained that this refers to copper or bronze; the brass of the present day being a discovery of a much later date.

In Germany, brass appears to have been made for centuries before its manufacture was introduced into England. The introduction of brass to the latter country is stated to have been made by a German who worked at Esher, in the County of Surrey, in the year 1649. The analysis of a few pieces of bronze found at Delhi and some other places, and now in the British Museum, show about 88 per cent. of copper and about 12 or 13 per cent. of tin. Similar figures are shown by the analysis of some bronzes in France many years ago.

It is supposed that yellow brass and alloy of copper with tin was first manufactured in the latter part of the 13th century, when

zinc was first mined. Zinc is said to have been first mined in the Hartz Mountains. Brass of a yellow color is produced by an addition to copper of from 15 to 30 per cent. of zinc. An excess of this proportion of zinc imparts to brass a whitish tint, and in a less quantity it produces brass of a reddish color. Brass of any grade composed of copper and zinc only is malleable and ductile in proportion to the purity of its component metals. Brass containing about two-thirds of copper and one-third of zinc is considered good yellow brass. This, with the addition of 1 per cent. of lead, is generally used for the better class of clock plates. The lead is added on account of its tendency to facilitate filing and turning. More lead is added to as high as three per cent. when brass is to be used for punching, as this saves the cutting edges of the punches, which become dulled when the brass is too ductile.

The alloying of brass, as a business, is beset with a host of empirical rules to an extent which naturally surprises the educated, who imagine that the alloying of metals ought to be subject to scientific rules. That such is not the case has long been known to those who do the alloying of the precious metals, where often costly experiments are the only teachers. The development of the science of metallurgy of late years has shown some decidedly interesting phenomena, among which may be mentioned that silver will melt in molten lead at a much lower temperature than it can by itself, etc., etc. In like manner the melting point of brass composed of copper and zinc is lowered by the addition of a percentage of tin, which at the same time hardens the brass. Common pins are made of some such brass; and freely melting gold solder is further improved by the addition of some brass pins to the alloy.

All metals possess two natural properties—one chemical and the other physical, or mechanical. The most important changes effected by the alloying of metals are those which influence their physical properties. The physical or mechanical properties which the metal worker has to do with are: fusibility, malleability, ductility, hardness and density. As to chemical properties he is most concerned with the action of the atmosphere and chemical elements. Thus an alloy of brass which is considered to be nearly a chemical compound is composed of 60 per cent. of copper and 40 per cent. of zinc (it is known in commerce as a sheathing metal for the bottoms of ships, as it resists the action of sea water fairly well and better than any other alloy of brass). All other alloys coming under the head of brass may be considered mechanical or physical mixtures.

Among the long list of the different alloys constituting brass a choice for clock and watch works is extremely difficult. A few general rules and some experience in horological matters serve one's purpose as well as any other. For ordinary castings a mixture of equal parts copper and zinc are generally used. Lead and tin are often added. Lead makes the castings work freely; tin is used for increasing the fusibility and for hardening. Sheet brass generally contains 60 per cent. of copper and 34 per cent. of zinc; such brass is considered good

brass, and is generally used for mechanical purposes. Clock wheel blanks are sometimes cast, for which an alloy containing 63.70 per cent. of copper, 33.50 per cent. of zinc, 2.50 per cent. of tin and 0.30 per cent. of lead are used. For the better class of horological work brass contains 71 parts of copper, 25.28 parts of zinc, 2.37 parts of tin and 0.91 parts of lead are used. Less tin and more zinc again is also often used.

A very noteworthy item in regard to the use of brass for escape wheels and other parts of watches and chronometers in the earlier part of the development of horology in England is the statement that most of the brass used for such purposes was imported from Holland in the form of "kettle" brass. It consisted of long-used domestic utensils. The only theory offered for this brass being of a very superior quality was the continuous daily heating in connection with hot fat. The superior quality of this brass manifested itself more particularly in the verge escapement. The verges suffered less wear in contact with escape wheels made of such brass than of any other.

Experiments elsewhere have somewhat confirmed the correctness of this theory, and it is to be regretted that no authentic analysis of this "kettle" brass has ever been published. The advanced theory in these later experiments is that the impurities in the brass have a greater affinity for the fat than for the component metals of the alloy.

Probably the best informed experts on the founding of brass are the foremen in the large brass foundries at Waterbury, Conn. This place has acquired the title of the "City of Brass." It is asserted that Waterbury does the largest business in brass of any locality in the world.

Horological Notes.

COUNCILS' Committee on City Property, of Philadelphia, Pa., approved a proposition recently to repeat the experiment of erecting a dummy clock on the west wall of Independence Hall, to represent the real clock originally there, which raised such a storm of public indignation that it had to be taken down. The proposition escaped attention by being buried in an item of the budget of the Bureau of City Property for next year. The item calls for an appropriation of \$1,000 "to improve Independence Hall, including the erection of an imitation clock on the west side of the building to represent the clock originally there."

Dr. D. W. Avery, Sapulpa, Okla., is the possessor of what is probably the oldest clock in Oklahoma. It is a "grandfather's clock," and is of the same sort mentioned in Longfellow's famous poem. The clock was brought to the Territory by Dr. Avery when he came here, and was made by his great-grandfather at least 150 years ago in the town of Preston, Conn. The works are of brass, and run eight days. The case is of solid cherry, while the face is made of one solid piece of brass composition, hammered out by hand, then plated, and finally hand engraved in elaborate style. It is some eight feet high, and is intended to stand on the floor. Besides indicating the minutes and hour, it has a second hand, also a calendar dial that tells the day of the month. The old clock still keeps as good time as ever.

Up-to-Date Methods in Selling Watches

EACH NEW YEAR marks a milestone of advance with progressive business houses. Where new and improved methods are available, they are adopted; where former methods were the best, their continuance is confirmed; where success has crowned the past, plans are made to eclipse that success in the months that lie ahead.

Such are the sentiments animating these offices as they look forward to the watch business of 1907. The interests of the trade will continue to be conserved in the best manner, with a service always abreast of the times—if not ahead of them.

Making the Rockford Sell

Of course, you know all about the Rockford Watch—

No use telling you what you already know—that the Rockford is a very superior watch.

But we do want you to know that we are reaching 17,000,000 readers of the best periodical publications every month with advertisements like these.

We are telling people why the Rockford is such a reliable watch.

Why? To make it easier for you to sell them.

If a man came in to-day and asked for a Rockford Watch, could you sell him one?

If not, write us at once, because you are going to have calls for Rockford Watches—from people who will prefer a Rockford over any other watch.

Don't wait and see—have a Rockford to sell when you're called on for a Rockford.

Write for illustrated book of movements and prices.

You can always sell Rockford Watches on merit. You can always get Rockford Parts for repairing. The Rockford Watch Co. is making high-grade watches, and is ready to guarantee the trade reliable watches and satisfactory treatment.

Types of Congenital Symbol Amblyopia.

(Lecture delivered by J. HERBERT CLAIBORNE, M.D., New York, in the Section on Diseases of Children of the American Medical Association at the 57th Annual Session, June, 1906.)

(Continued from issue of Jan. 2, 1907.)

GENERATIONS of musical habit beget musical inclinations and talent. Some nations appear to be more musical than others. That nation which has attained homogeneity and is ancient seems to be musical and in direct proportion to its homogeneity and antiquity. It seems that the Italian race has had the greatest homogeneity, antiquity and culture and its musical talent and love of music is practically universal. Almost all Italians sing and play some instrument; many play several. The German appears next in order. If musical training were a part of the education in our schools, music would in several generations become an intellectual habit and we would establish a distinctly American school of music.

The condition of defective musical appreciation has been called *amusia*, obviously quite incorrect; the "a" privative is too sweeping. Complete loss of musical sense may be called *amusia*, but defective musical sense is *amblymusia*. In all probability there is a center for the appreciations and memory of musical notes, and it is obvious that many have imperfect memory for them. This should be classed with word and mathematical symbol amblyopia.

All these things are interesting and of importance in the training of children. When cases of this description are observed they should be carefully differentiated and similar cases should be grouped together. Methods of teaching should be instituted to waken the torpid cells into activity, and I believe the basis of the instruction should be repetition.

LEFT-HANDEDNESS.

I have, however, a suggestion to make in the matter of treatment which is more radical than the foregoing, but which may be intelligently combined with it. It appears universally admitted that in right-handed people the centers for speech and allied acts lie on the left side of the brain, in the territory supplied by the middle meningeal artery and its branches. When symbol or auditory amblyopia exists in such children, it is a reasonable idea that they may be taught to be left-handed. It is improbable that the corresponding cells on the right side are similarly affected, and thus the speech center and the centers for symbols and sounds may be transferred entirely to that side, or the right side be

so educated that it takes command. Experimentation should be made along these lines, and it is my purpose to put this idea into execution in one of the cases described.

At present no postmortem corroboration of the assumed congenital lesions is extant.

CONCLUSIONS.

(1) There is an incomplete word-blindness which is congenital and which should be called word-amblyopia.

(2) There is doubtless an incomplete congenital figure-blindness, which may be called figure-amblyopia. This may be the basis of the inability of some children to learn mathematics as easily as their general intelligence would lead one to expect.

(3) These two forms of amblyopia may be called symbol-amblyopia.

(4) There is an incomplete congenital word-deafness which should be called amblykusic to parallel the term amblyopia.

(5) There is doubtless an incomplete congenital musical-note deafness which may be the basis of the inability of some people to remember and appreciate musical notes; this should be called music amblykusic, or amblymusia.

(6) When cases of these kinds are met in the schools they should be carefully differentiated, properly grouped and instructed.

(7) The basis of the instruction should be repetition, coupled with patience.

(8) It is reasonable to teach such children to become left-handed, in order that the speech, symbol and sound centers on the right side of the brain may be cultivated to the exclusion of those on the left, or as supplemental to the defects on the left.

DISCUSSION.

Dr. T. W. Kilmer, New York City, said that diagnosis is very difficult. It is a hard proposition to have a child brought into the clinic with the statement that it cannot read. He has had several such cases and has not recognized them. When he was at college mathematics was his worst branch. He has always had special difficulty with the infant-feeding formulas because of the figures. Also, much money has been spent on his musical education. He plays by ear on several instruments, but does not know a note. Probably he has amblykusic, which Dr. Claiborne mentioned. He asked regarding prognosis and treatment, whether the prognosis is good, and whether Dr. Claiborne advocates removing the children from school. With reference to the ingenious plan of teaching a child to be left-handed, he asked whether Dr. Claiborne has carried it out or has just begun it.

Dr. J. H. W. Rhein, Philadelphia, Pa., said that in Dr. Claiborne's second case it would seem that the nature of the labor would have some bearing on the etiology of the condition which Dr. Claiborne described as congenital word blindness. If the child had had a hemorrhage which caused pressure in the region of the temporal convolutions on one side, it would readily explain some of the symptoms described. Whether the birth

was easy or difficult, whether forceps were used, and whether there were symptoms immediately after birth indicating injury at the time of birth are important facts to be considered in explaining the nature of the interesting phenomena described.

Dr. J. H. Claiborne, New York City, said that, not being an authority on the subject, it was difficult for him to express a definite opinion of prognosis. Inasmuch as each patient could recognize simple words like cat and dog, which had been constantly repeated to them by their teachers, it was clear that by repetition something could be done for them. He believed that in proportion as an impression can be produced on their minds by repetition, in that proportion can a good prognosis be made. Dr. Claiborne said that Dr. Kilmer has good musical sense, but has what might be called symbol amblyopia. Dr. Rhein has suggested a new thought in speaking of the nature of the labor.

Cases should be studied and the labor should be inquired about, so as to ascertain where the harm was done, and on which side. Dr. Claiborne does not think that children should be set down as deficient in the public schools with no specialization of their deficiency. While they are classed to some extent in the public schools, no one has yet pointed out exactly in what respect they are deficient. Obviously they cannot be treated until it is known in what respect they are deficient.

If they have symbol amblyopia for letters or reading, such children should be put together and by repeating words and sounds, he believes they could be taught to read. In the matter of musical sense, of course, if one does not wish to study music, one should not be compelled. One of the greatest professors of the universities told him that he not only could not understand music nor appreciate it, but that it was painful to him.

Dr. Claiborne added that this is the first time the subject has been discussed in the United States. It has been brought forward in England, in Germany and in South America.

(The End.)

An Optical Query Answered.

AUSTIN, Tex., Dec. 26, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY

Please advise me what the principle is on which optometers are made which have a metallic disk with small dots and the words "count the dots," which disk slides back and forth, and is so much used in country stores for testing eyes.

ANSWER:—The normal eye can distinguish two points as two points at five inches distance if they are separated by a space equal to 1/1000 of an inch. Again, an eye can see clearly any object included in a five-minute angle. It is these phenomena that enter into the principle of the optometer. You will find upon carefully made instruments that the dots would just fit in a five-minute angle when set at the usual working distance. Dots are used because they are more easily printed than would be fine type; fine reading type in the place of the dots would constitute a better test, but the type would have to be printed very clearly, and this could not be done readily on the celluloid used in the average optometer.

Optical Department.

Opticians of the Old School and Some of Their Teachings.

(By DR. P. PANSIER, of Avignon, in the *Canadian Optician*.)

At the end of the 18th century important works and learned researches on the subject of ocular optics were published in England. There was in England at this time a number of opticians who joined deep scientific knowledge to a considerable professional ability. The most ancient and most famous of these opticians were the Dollonds. John Dollond (1706-1761) had the most important optical workshop in London. His son, Peter (1730-1820), managed the business after him and entered into partnership with his brother John. The latter having died in 1784, was replaced by his nephew, George Huggins, who took the name of George Dollond. It is this Dollond who made the first periscope glass.

The optician Berton, of London, is only known as the master under whom Ramsden served his apprenticeship. Ramsden (1735-1800) made for himself a well-deserved reputation by his studies in optics and his construction of lenses. He married the daughter of Peter Dollond. Besides Ramsden we have to give the name of his modest assistant, Samuel Pierce. The latter had acquired a great skill in the practice of making spectacles. His friend, Kitchiner, collected and edited some of Pierce's manuscripts.

The list of English opticians closes with the Adams'. Adams, senior, died in 1789 and his son in 1796. The latter had published in 1789 an interesting work on vision, in which the question of spectacles was studied at some length. (George Adams. "An Essay on Vision." London, 1789.) Among the physicians who studied these questions we can cite Crisp (Crisp "On Vision." London, 1796), Ware (Philosophical Transactions. V. 163, p. 31), and Wells (W. Wells. An Essay on Single Vision. London, 1792).

The works of these different authors furnish an interesting chapter, and more so as the German school caused the results of their wisdom to be quickly forgotten.

SPECTACLES FOR MYOPIA AND PRESBYOPIA ACCORDING TO THE ENGLISH SCHOOL AT THE END OF THE 18TH CENTURY.

"Myopia," writes Adams, "is a defect which has no connection whatever with the age of the subject, and for which there is no fixed rule permitting us to determine, *a priori*, the glass appropriate to the patient's sight. Myopes ought to try different glasses and to select those which are best suited to them, and allow to see distinctly objects at different distances."

Ware observes that myopia generally appears between the age of 10 and 18. According to all English authorities it is caused by a defect in the construction of the dioptric apparatus of the eye.

Wells states that slightly myopic persons, on arriving at a certain age, although they are still obliged to wear concave glasses for distant vision, are compelled to take off their spectacles when they wish to read. Here is how he explains this fact:

"The power of the eye of adapting itself

to different distances being abolished, or at least considerably diminished, the point or the small intervals of distinct vision, being at a short distance, coincides with the distance at which the patient is accustomed to read."

From this we must conclude that myopia diminishes with age:

"The opinion that myopia diminishes with age appears to me without foundation. From the fact that those who have good vision in their youth become presbyopic, either by a flattening of their cornea or by some changes in the structure of their eyes, one coincides that myopes, experiencing the same changes, must become capable of seeing far-distant objects. Nature seems to follow a quite different method. I know four myopic persons, 54 and 60 years old. Two of them have never observed any change in their sight since their youth; the two others noticed that their myopia increased with their age."

Ware observed with himself that myopia does not diminish with age; at 55 he was obliged to take a stronger concave glass. Adams says that he did not know of a single myopic person whose myopia decreased with age. On the contrary, he often observed the necessity which subjects, advancing in years, had of taking stronger concave glasses to correct their increasing myopia. However, according to Adams, concave glasses are neither as perfect nor as advantageous as convex glasses:

"Myopes do not derive as much advantage from concave glasses as presbyopes do from convex glasses. The latter glasses not only enlarge objects, but still allow more light to enter the eye. Concave glasses diminish objects and decrease the amount of light entering the eye by rendering the rays divergent. Thus, when the objects are neither big nor strongly illuminated, a myope does not see them as well. It is their small size and the want of illumination that cause objects to appear indistinct, and these two conditions are exaggerated by concave glasses."

Ware warns myopic persons against the use of too strong concave glasses. Of two glasses giving the same distinctness of vision one must always take the weaker; too strong concave glasses have a tendency to increase myopia.

It may happen that a myope wishing to procure glasses, has no optician at hand. In this case here is what is to be done, according to Adams: The subject sends his distance for distinct vision. This measure is multiplied by the distance at which he wants to see with the glass, and the product is divided by the difference of these two numbers. The quotient is the focal length of the correcting lens.

This empirical rule appears exact to me. I verified it on myself. My left eye has 3.00 D. of myopia, and I am unable to read at more than 16 cm. I want to read at 30 cm. According to Adams' rule, $30 \times 16 = 486$. On the other hand, $30 - 16 = 14$ and $\div 14$ equals 34, which corresponds to a glass of 3.00 D. It is evident that with this glass my punctum remotum is situated at about 30 cm.

Presbyopes must use convex glasses as soon as the want of them makes itself felt. Wells says:

"Glasses relieve the eyes and delay their

flattening. When they are not used the flattening considerably increases, and the eyes become weakened by the effort to which they are submitted. Delay is dangerous, and the more those who feel the want of glasses delay their use the more they increase the weakening of their sight."

Adams repeats Wells' advice:

"When the eye has become noticeably flattened, delay is dangerous; the more those who need recourse to this artificial means delay taking it, the more the weakening of their sight increases. Too many people retard taking spectacles until at last they are obliged to use glasses of 10 or 13 inches focal length instead of glasses of 36 or 40, which would have been sufficient at first. They create an infirmity to prevent an imaginary evil."

To support his opinion, Adams reports Thomin's observations. Thomin saw a young lady who had delayed taking spectacles. When she became compelled to use them she was obliged to take those which are usually ordered people operated on for cataract. And, according to Thomin, the case is not rare. On the other hand, Adams gives frequent cases of persons who, from the first symptoms of weakening of sight, have taken glasses of great focal length and have, by this means, brought their eyes back to their former condition and have been able, after a few years, to leave glasses aside entirely.

By what signs is it possible to recognize that the want of spectacles begins to make itself felt? Adams enumerates as follows:

(1) When it is necessary to remove small objects away from the eye in order to see them distinctly.

(2) When more light is needed to perform the ordinary near-work.

(3) When the near objects look blurred and as if they were seen through a fog.

(4) When, while reading or writing, the characters seem to overlap each other or appear double.

(5) When the eyes are so quickly tired that the work has to be frequently interrupted.

(To be continued.)

A Correction.

IN a communication published last week a correspondent, in referring to the library of the Physiological Section of the A. A. O., quoted the price of the book entitled "Ocular Muscles," by Maddox, at \$3, which was the amount paid for the book at the time the writer made his purchase. The Keystone Publishing Co., Philadelphia, Pa., informs us that it has been selling the book at \$1.50 during the past year, and that it has purchased all the rights of the book from an English concern, which formerly issued it and sold it at \$3.

The Cousins-Carrel Jewelry Co., Bessemer, Ala., has dissolved partnership. The business will be continued by A. S. Carrel alone.

Early on the morning of Dec. 21, five stores were robbed in the village of Suncook, Mass., including the jewelry stores of J. E. Chickering and J. R. Painc. The amount of the losses is unknown.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

How the Jeweler Can Meet the Competition of the Mail-Order House.

(Continued from issue of Dec. 19, 1906.)

DID you ever stop to think what you could do towards keeping all your trade at home if all the merchants of your town would hold together closely? Mail-order houses would have no business in your section of the country if your home dealers would stop treating each other as though each suspected the other of all the crimes enumerated in the criminal code, and would instead put their shoulder to the wheel and try to build up the trade of the town.

One of the first excuses you hear for sending to a mail-order house for goods is the fact that the exact article wanted cannot be bought at home. This is a splendid excuse, if it is just, as you cannot expect people to put up with something they do not want when it is just as easy for them to get the exact article desired. If they would order only that particular article by mail you would not be interested, but the entire family will get together and order everything that is needed to make the order big enough to get the express prepaid. Thus they cut down the business of every retailer in your town, and all because some single article out of the entire list ordered from the catalogue house happens not to be on sale at your point.

By getting close together your merchants can, in a great measure, overcome this, for they can agree among themselves what lines of goods each will be allowed to handle exclusively, and thus make the stock on sale in the city more varied. Suppose each dealer continued to handle all lines now stocked, even if a number of them were selling the same goods, and upon consultation it was found that there was some demand for eight or 10 different lines not in stock at all. There would be no money in it if each dealer ordered a complete assortment of each of these lines; but suppose the dealers all agree that one of these additional lines shall be taken up by one dealer exclusively, another by another dealer, and so on. This will give each retailer a chance to increase his business a little, by adding to his investment, and at the same time he will feel that the business in that particular line will be his exclusively.

A continuation of this policy would soon make a veritable department store out of your town, and the consumers could there find almost everything they would need. This takes away from them one of their

best excuses for patronizing mail-order houses, and it will keep their money at home to increase the business of your city. And the percentage of profit of the increase would probably make business profitable to some of the retailers who are now clearing up but little.

People who have cash to spend surely have the right to spend it on anything their fancy may turn to. It is up to your town to come as near as possible to handling the goods; and handling them at a profit will not mean that you will necessarily ask more for them than the mail-order houses do.

This is only one out of hundreds of ways you can find to aid the town, and thus help yourselves, if you will but get together and work together. Suppose you start out, by having a monthly dinner. After the dinner discuss business matters which interest all of you. This should soon show you all what there is to be gained by united effort, if you are but willing to act as men with each other, not attempting to profit by underhanded methods in preference to a good square business fight for supremacy. An open fight for business will build up the business of your town, and each will get a share. An underhanded fight will eventually drive business away.

If you are really in earnest, and want to do something to keep your neighbors from sending their money away to the mail-order houses, suppose you get out and talk to the other merchants of your town. This will cost you nothing but time. Get them to see where it will be to their advantage to get together on a policy which will enable each one to add a few additional lines to the stock already carried, with the understanding that each be allowed to stock such lines *exclusively*, but each time a retailer feels the need of adding something else in future he can take up some line not yet handled in the town.

After the retailers have reached this point of agreement, and are really able to get together on such a plan, the rest is plain sailing, as it is merely a question of correct advertising. Of course, there is no use adding these new lines to the various stocks unless the retailers advertise the fact. The right thing to do then would be to get together on an advertising campaign, each merchant starting out by advertising well all new lines added, giving prices in every advertisement, first carefully comparing the prices with those in the mail-order catalogues, so that there can be no odious comparisons made by regular mail-order customers.

F. A. P.

(To be continued.)

A Representative Retail Jewelry Establishment of Tacoma, Wash.

THE attractiveness of the store of S. A. Andrews, Tacoma, Wash., is fairly well shown by the two illustrations opposite.

The front of the store shows a reflection of the buildings opposite, but one can understand the construction of the windows by viewing the one on the right in the photograph. From the marble base to the ceiling of the window is just 10 feet, and above the windows are three large panes of prismatic glass throwing a splendid white light to the furthestmost portion of the store. The windows are eight feet wide in front and 10 feet wide at the door-way, running back to a depth of 10 feet. The base in front of the store is of red marble, while the entrance is white tiling with a black border and "Swastika" design.

As to the construction of the interior of the windows it will be noticed that they are built low. A space of eight inches exists between the glass and the covered stand in the window so as to permit the display of small articles of silver, cut glass, hand-painted china, carriage clocks or other small articles without interfering with the display above. The stand or base of the window is built in sections and is covered with expensive black broadcloth. This base is 22 inches high, six inches wide (with a six-inch bevel), and 18 inches wide on top.

The interior of the window—the casings, ceiling and trimmings—are all of quartered oak. The window ceilings are beautifully paneled. Each window has one Nestlé light in the center surrounded by 10 1/2 candle power incandescent globes with cut glass shades. The doors are of heavy solid oak with one inch and a half French beveled glass. As one enters the store one notices two rooms finished in oak, with heavy plate glass windows. The room on the right is occupied by the watchmaker, while further to the front, in the recess of the window, sits the engraver. On the left is the diamond room, which contains diamond scales, a table, and heavy leather upholstered chairs for the convenience of customers. The floor is covered with heavy rugs. The wall cases are of heavy quartered oak, finished with spindle effect. Each case contains four electric lights with cut glass shades, which throw the light over the entire case. The show cases are similarly arranged, and, with the exception of one case, each has two shelves, making in all three display shelves, thereby permitting a large portion of the stock to be seen to the very best advantage.

Storekeeping Department.

Immediately above the wall cases and resting thereon are 50 plaster figures, artistically arranged. The walls are tinted a light Venetian blue and divided off in sections of 11 panels. Between each panel is a solid oak pilaster. The panels proper are made of a composition of plaster of Paris and gypsum, and, while pliable, are strong and durable. The design was made by the firm and consists of two mermaids on each side of an electric light, which occupies the center. The light sets in a shell design, lined with blue and tipped with gold. Extending from the shell and artistically arranged are scrolls from which hang bunches of tea roses. The scrolls come together at the bottom of the panel and are tied with gold ribbons with a rosette of gold on each side. All this is in bold relief, and, with the tints in blue, gold and pink, presents a most striking effect.

The ceiling is of steel, the center being colored a very light blue tint, while the borders are of a light creamy hue. The floor is white tiled with a blue border, and harmonizes with the rest of the interior decorations.

The store proper is 80 feet deep by 25 feet wide. The rear is finished in quartered oak. On each side of the building and in direct line with the show cases are two large safes paneled off and set into the wall. Back of his partition are the store rooms, the watchman's room and the workshop. Above the partition, in the rear of the store, is a large mirror, 23 feet long and five and a half feet high, extending from one side of the store to the other. It is tiled two inches out of plumb, and, when standing in the front part of the store, gives the store the appearance of being twice its actual depth. At night the lights are reflected and the

effect is most dazzling. Directly underneath this mirror and in the center of the store is another glass, similarly arranged in order

to accomplish the same result as the one above. This view is obscured by the floral horseshoe shown in the illustration. There

A VIEW OF THE EXTERIOR OF THE STORE OF S. A. ANDREWS, TACOMA, WASH.

INTERIOR VIEW OF THE STORE OF S. A. ANDREWS, TACOMA, WASH.

is also a reception room where customers may rest, attend to their correspondence or use the telephone.

There are three large safes and one vault in the store. Nearly 200 electric lights and five Humphrey gas lights are so arranged that they are reflected in the mirrors.

On the opening day several thousand persons visited the store between the hours of 7 P. M. and 11.30 P. M.

The Way of the Enterprising.

DURING the holiday season T. C. Tanke, Buffalo, N. Y., introduced a novel plan to save Christmas shoppers worry. It was the "gift certificate." Anybody desiring to purchase a present for a friend and in doubt as to what gift was most suitable could buy a certificate of any denomination and make that his present. The recipient of the certificate called at Tanke's at his or her leisure and selected any article desired.

* * *

P. T. Ives, Meriden, Conn., during the holiday season, had arranged a dining room in the basement of his store, where his clerks were served with meals gratis. Those who desired to go home were allowed to do so, but most of the salesmen preferred to retire to the improvised "rathskellar" and partake leisurely of a generous repast.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1740.—Real Speculum Metal.—Kindly give me the alloy of real speculum metal.

ANSWER:—This metal is white, fine grained and very hard, and the highest degree of polish can be obtained. The composition is copper, 68.21 per cent., and tin, 31.7 per cent. By increasing the percentage of copper the color gradually shades into yellow; with a larger amount of tin, into blue. It is dangerous to increase the tin too much, as this changes the other properties of the alloy, and it becomes too brittle to be worked.

QUESTION No. 1741.—Brass Solution for Plating.—Please give me the formula for making a good brass solution for depositing brass on iron and other metals.

ANSWER:—A good solution for brass plating various metal objects is made by taking 120 parts of water and dissolving in it 12 parts of cyanide of potassium. In 380 parts of water dissolve 6.10 parts of carbonate of potash, 48 parts sulphate of zinc, 25 parts of chloride of copper, by warming the water to about 150° F. When the salts are dissolved add to the solution 305 parts of nitrate of ammonia and stir well together. The two solutions are then mixed together and allowed to remain standing a few days before using; the clear liquor is then separated from any sediment that may have been deposited at the bottom of the vessel. In making up this solution the following general conditions are to be observed, according to the proportions given: Fluid ounces of liquids are intended and avoirdupois for the solids.

QUESTION No. 1742.—Gold Coloring for Jewelry.—Please give me a formula for coloring gold jewelry by immersion.

G. C. J.

ANSWER:—For coloring gold prepare a solution consisting of potassium nitrate, 12 ounces; common salt, six ounces; hydrochloric acid, three ounces. The nitrate and salt are pounded to a fine powder and placed in a previously warmed plumbago crucible, then stirred with a wooden spoon for a minute or two. The acid is then added with about one ounce of boiling water, the mass constantly stirred until it boils up to the top of the pot. The work, which has previously been cleaned in hot potash or soda solution, is then suspended in the coloring liquid by means of a silver or platinum wire for about one minute. It is then well swilled in boiling water. A little more water is added to the color pot, and when the liquid boils up the work is again immersed for another minute and swilled in boiling water as before. This operation of dipping and swilling is repeated several

times, the coloring liquid being weakened by adding water before each immersion until the desired appearance is obtained. The work is finally well washed in hot water and dried in boxwood sawdust. The whole process takes from five to seven minutes. The colored work is next scratch brushed on a lathe, with a circular brush made of very fine brass wire and having stale beer dropping on it. If the coloring has been properly conducted a beautiful rich and dead color will be produced.

QUESTION No. 1743.—Prepared Borax for Soldering.—How can I prepare borax for flux and soldering, so that it will not swell when being used. I use the borax moistened with water, but when the flame strikes it it will swell and cause the joints to separate. I know there is some way to prevent this, and I apply to you for information.

P. B. S.

ANSWER:—The swelling of the borax can be prevented if the borax is first heated in a metallic receiver until it has lost its water by crystallization; then mixed with calcined kitchen salt and potash in the proportion of eight parts of the first and two parts of the others. Grind the whole fine in a mortar, after which this can be used by mixing with water into a paste and applied in the usual way.

QUESTION No. 1744.—Six and Eight Karat Gold.—Are there any special recipes for alloying six and eight karat gold?

B. R.

ANSWER:—There are no special recipes for alloying six and eight karat gold. The only thing positive is that the principal alloy for low-karat gold is copper. For special uses, where ductile or soft gold is needed, silver, brass and zinc are used. Every jeweler will find out by experiment which alloy will suit him best. Six and eight karat gold are tested on a touch stone with nitric acid, but as nitric acid would eat all the alloy and leave but very little gold, the rubbing of the gold on the touch stone must be pretty liberal, and the amount of the test needle and the amount of the gold to be tested should be equal as near as possible, as the amount of gold remaining on the touch stone indicates the karat.

QUESTION No. 1745.—Flux for Soft Solder.—Kindly tell me of a good flux to use for soft soldering. I want to use it for repairing hat pins and ornaments, made of soft metal, plated.

S. S.

ANSWER:—One of the fluxes for soft soldering is composed of glycerine, three parts, and muriatic acid, one part. This may be mixed together, and is then ready for use. If a little zinc has been dissolved in the acid before mixing, the flux will flow

more freely. This flux has the advantage over the pure chloride of zinc flux in that it will not discolor the work and will also cause the solder to hold where there has been no scraping. The pieces, after having been soldered and while warm, may be wiped clean with a soft cloth, thereby dispensing with washing, which very often will discolor bronzed or colored pieces. The best soft solder for this purpose is the kind manufactured by the silver plate manufacturers for their own purpose, which can be purchased from them by any jeweler.

QUESTION No. 1746.—Removing Lacquer.—How can I best remove lacquer from silverware or clock cases? I want something that will not discolor the articles. I have tried strong potash, but it discolored the clock cases so I had to have them re-polished.

R. L.

ANSWER:—To remove lacquer from any article without discoloring the pieces, it is best to immerse the pieces in wood alcohol, or, better, into lacquer thinner, when possible. When a jeweler has not enough alcohol or thinner in which to completely immerse the larger pieces, plunge the articles into clean boiling water, allowing them to remain there long enough to thoroughly dissolve and melt off all the lacquer. Many lacquered articles have been subjected to a baking process, which causes the lacquer to adhere tenaciously. It requires some time to dissolve in order to remove it completely. Strong potash may be used on the silverware with precaution, but it is not advisable to use with any gilt or bronze plated pieces on account of the discoloring by the strong lye.

Soft Oxidizing for French Gray on Silver.

IN the manufacture of cheap silver novelties with the French gray finish, a good silver deposit must be put on the work because the oxidizing with liver of sulphur attacks the silver to such an extent that, unless the silver is sufficiently thick, it will cut through upon relieving. In many of the establishments which make novelties it is frequently the case that French gray work actually costs more than ormolu gold.

Manufacturers are now and then found who are obliged to give their goods a 40-minute silver deposit, or even longer, in order to have silver enough left after oxidizing to prevent cutting through.

It has been found that the addition of a small quantity of ammonia to the liver of sulphur oxidizing solution will give a soft black which is easily relieved on the wheel. It relieves far more easily than the black produced without the use of ammonia. All that is necessary to do is to add about four or five teaspoonfuls of aqua ammonia to five gallons of the liver of sulphur dip. A 10-minute silver deposit may then be used for French gray work without danger of cutting through in relieving.—*The Brass World.*

THE CONNOISSEUR

Devoted to Art Pottery, China, Marbles, Bronzes, Cut and Decorated Glass Ware, Bric-à-Brac, Lamps, Art Metal Wares, Fancy Goods and Kindred Lines.

Characteristics of Tin Enameled Pottery.

IN his most valuable pamphlet on "Tin Enameled Pottery,"* which forms one of the Art Primers of the Pennsylvania Museum, Edwin Atlee Barber, the curator of the museum, takes up the subject of majolica, Delft and other stanniferous ware, with a clear, concise and at the same time lucid explanation of the salient features of the various wares included under these categories. He goes into the history and origin of the various wares of this class,

Italy, Spain and Mexico, and the Delft includes the products of both Holland and England. Of the article on the latter some full extracts will begin in the next issue of THE CIRCULAR-WEEKLY.

Not the least important part of the pamphlet is the table at the end, which is arranged so as to show at a glance the principal features of all tin-enameled pottery, its decorations, shapes and the markings, as follows:

exotic birds and branches in panels, with gilt-scroll borders, dark blue scale-pattern ground, 68 guineas; three Derby dinner services, with panels of flowers in colors on dark blue ground, realized 95 guineas, 110 guineas and 52 guineas, respectively; a pair of white Bow statuettes of Kitty Clive and Woodward, 10½ inches high, 74 guineas; six Yarmouth ware plates, inscribed "Thomas and Mary Bingham in Yarmouth, 1742," 24 guineas; a Hochst group of hounds attacking a lion, seven inches high, 52 guineas; 11 Delft plates, painted with the herring fleet in blue, 73 guineas; a Della-Robbia plaque, with the

PRINCIPAL FEATURES OF TIN ENAMELED POTTERY.

| COUNTRIES. | BODY. | ENAMEL. | DECORATION. | SHAPES. | MARKS. |
|---------------------------------------|--|---|---|--|---|
| MAJOLICA. ITALY..... SPAIN..... | Medium softness | White, the Italian ware covered with a thin coating of lead glaze; frequently with metallic lustre. | Incorporated in the enamel (underglaze). Blue, yellow and green predominating. | Drug jars, vases, plates, plaques, salt cellars, etc. | Names of Fabriques crudely painted with brush; arbitrary signs, monograms and dates. Frequently unmarked. |
| | MEXICO..... Medium hardness and pinkish tint. | Heavy, irregular; no lead glaze. | Crudely painted in raised blue or polychrome. | Similar to above. | Unmarked. |
| DELFT. HOLLAND..... | Soft, easily cut with knife. | White or tinted; no lead glaze. | Incorporated in the enamel (underglaze). Polychrome paintings, sometimes with gold. Blue predominating. | Covered jars, vases, tiles, dishes, figures, etc. | Initials and names of makers; symbols of factories; often unmarked. |
| | ENGLAND..... Harder, less easily scratched with point; pinkish tint where enamel is thin. | White; thin coating of lead glaze. | Painted between the fired enamel and lead glaze, or transfer printed. Blue predominating. Bristol often with bianco-sopra-bianco traceries. | Candle urns, posset pots, puzzle mugs, plates, punch bowls, tiles, etc. | Rarely marked. |
| FABLENCE. FRANCE..... | Medium softness (excepting Nevers, which is harder) | White or tinted; no lead glaze. | | Tureens, vases, plates, platters, figures, etc.; modeled feet, handles and lids. | Names and initials of makers and factories. |
| | Nevers..... | | Italian and Persian styles. Incorporated in the enamel (underglaze). No red. | | |
| | Rouen..... | | Lambrequins, armorial, cornucopia and quiver. Incorporated in the enamel (underglaze). Blue and red predominating. | | |
| | Moustiers..... | | Minute figures, grotesque style, in camaleu and polychrome. Incorporated in the enamel (underglaze). | | |
| | Strasburg..... | | Polychrome paintings, frequently with fine black outlines, occasionally gold on the enamel (overglaze). | | |
| | Marseilles..... | | Colors in slight relief on the enamel. | | |
| | Niderviller..... | | Imitation of wood-graining, etc. | | |
| | Sceaux..... | | Cupids and flowers, painted on the enamel, often with gold. | | |
| | St. Amand..... | | Bianco-sopra-bianco or raised white traceries. | | |
| | GERMANY..... | | Purple and blue predominating. Frequently mottled grounds. | Tureens, mugs, wine jugs, plates, plaques, figures, etc. | Names and initials of makers and factories. |
| SWEDEN..... | | Purple predominating. Relief flowers and figures. | Vases, plates, figures, jugs, etc. | Names or initials of factories and dates. | |
| DENMARK..... | | Swedish style. | Milk jugs, etc. | Name of place and initials of painters. | |
| BELGIUM..... | | Dark blue ground. Painted and printed panels. Sprays of flowers on white. | Mugs, etc. | Names of place and makers. | |
| HUNGARY..... | | Solid yellow ground, reserved medallions, often in Marseilles style. | Plates, dishes, trays. | Initials; H in combination with other letters. | |

and gives a description of their essential features. With the text will be found beautiful half-tone illustrations of specimens of the various lines of pottery treated, which are in the possession of the museum at the present time.

The majolica which he treats is that of

*These pamphlets are now published by Doubleday, Page & Co., New York, and are copyrighted by the Pennsylvania Museum.

Old English Porcelain Sold in London.

THE London auctioneers, Christie, Manson & Woods, recently sold the collections of old English pottery and porcelain formed by the late W. F. A. Wilson, F. S. A., London, 300 lots realizing £4,379 1s. 6d.

The principal lots included a pair of Worcester shaped jardinières painted with

Virgin and infant Saviour in relief, 24 inches by 18 inches, 52 guineas, and three equestrian statuettes of Chinese warriors, enameled in green and other colors, eight inches high, Kang-He, 300 guineas.

A satchel containing about \$100 worth of jewelry was recently lost by Phillip Rockmaker, Hazleton, Pa., while on a trip to Lattimer.

Look for the Pouyat Marks

Some of the reasons why dealers in Art-Porcelains should be interested in Pouyat China :

It is a notable ware historically; famous since 1783.
 It is recognized as the finest modern product of the celebrated Limoges potteries.
 Its unflinching supremacy is certified by a long series of medals and awards, including five bestowals of the Cross of the Legion of Honor upon successive heads of the Pouyat house.
 It offers the widest choice of artistic designs, the widest range of prices.
 Finally, all Pouyat ADVERTISING is designed to stimulate the business of LOCAL DEALERS.
 If your jobber does not handle Pouyat China, we will inform you where to obtain it.

Lead and Tin Glazed Pottery.

SINCE man first made ware, the question of how to provide the porous, rough, unpleasant-feeling surface of the biscuit with a smooth, impervious, easily cleaned skin has been a matter of study and experiment. The hard, semi-vitreous clays, resisting a high temperature, and rich in silic, lent themselves readily enough to salt glazing; but this is an expensive, difficult and somewhat risky process, says a contributor to the *Keramic Studio*. The suitable clay was not always to be found, and salt, especially in those countries where it is taxed, was a by no means economical article to use for the purpose. Some one having a softer and less refractory clay to lead with hit upon the use of galena; some one else tried red lead, and a vast quantity of cooking ware were and still are made on these lines.

The surface of galena and lead-glazed wares is excellent—bright, clean, generally incrazed and easily washed—but it leaves a good deal to be desired; it is transparent, and the dark red or yellow of the ordinary biscuit takes on a still deeper tone. Then, again, they are both very readily attacked by acids, some of the lead glaze being easily dissolved by lemon juice. This, however ignorant the peasant might be, he discovered, and was eager to find a ware free from this serious defect, and more pleasant to the eye than the rough red ware. Some one, who can never be known, discovered that by fusing metallic tin and lead together, oxidizing the mass, adding to the combined oxide a little salt and silica, mixing these together and grinding up the result to a fine powder, produced an opaque glaze that gave to the commonest clays a superior appearance. Slowly, inch by inch, it is the case with all human discoveries,

finer and finer frit was discovered, a purer and purer glaze obtained; till at last a glaze, so white, so pure and brilliant was evolved that it compared, and not unfavorably, with the white porcelain of the east. Away back in the Middle Ages the Italian potters produced results that have never been surpassed, so much that for the last two or three centuries this class of ware has made no progress whatever.

The cheapening of white earthen ware has doubtless had to do with this, for the French, Italian and Iberian makers of "tin-glazed" wares have really retrograded from the positions of their forefathers. A few, such as the manufacturers at Nevers and Blois, make a really high-class and artistic ware, but the great majority confine themselves to making cheap basins, plates and cooking vessels, sold for a few pence in the markets of their little country towns.

The decoration, of the roughest and crudest character, is, as almost all national pottery is, of strong and glaring colors; or this glaze readily lends itself to colors that are almost the despair of the white earthen ware maker. The brilliant scarlet, which is the desire of our home potter, is easily produced on this class of goods, and the greens, blues and oranges take on a brilliancy and purity all their own.

The ware to be seen in any market town of Southern France, Spain, Portugal or Italy, is almost invariably of an inferior, dirty yellow gray color, and consists of

bowls, plates and jugs, made on the wheel, and showing in the form and outline a certain pleasantness to the eye, which is almost always the characteristic of a purely hand-made article. The decoration, done with a few sweeps of a dauber, is crude; a cottage with a tree, roughly sketched flowers, or those primitive forms that the peasant farmer of every land seems to like. In Brittany one or two factories make a quantity of rough ornaments, many of which, owing to tourists, are brought over to England as mementoes. These are a little better; but with very few exceptions the ware is of the roughest and crudest character.

Those who have seen really fine specimens of this pottery would scarcely recognize the kinship of the present degenerate wares. There are in existence specimen plates (the writer has in memory the remains of a dinner service) on exhibition in a little place abroad, which it would puzzle any man to distinguish from first class china or earthen ware, so long as he was not permitted to handle it; and which is quite equal in appearance to any first class white ware. Of course, it is softer, and more easily chipped and broken, yet the pieces, for there are several, are wonderfully free from crazing, though a century or more old.

This ware, except in the hands of a few specialists, it is probable, will gradually die out of common use. A few who work in reproducing copies of the great masters of the art, or making ornamental pieces on the same lines, may continue for many years to come, but the ware seems likely, as an ordinary article of commerce, to be doomed. Its makers are seeking new means and methods; for although to produce a poor article is very easy indeed, the purity and beauty of the best extant specimens are difficult and expensive to attain. The increasing price of tin and the cheapening of ordinary white ware must bring it to an end.

Amber in Santo Domingo.

IT is an interesting fact that Santo Domingo is one of the few places in the world where amber occurs in any considerable quantities, says *Cassier's Magazine*. As is well known, the bulk of the supply used in the arts comes from the neighborhood of Konigsberg, on the Baltic seacoast.

There it occurs in the lower oligocene, and appears to have been deposited originally in glauconitic beds of a clayey nature, which was afterward eroded by wave action and the amber distributed, though much of it is taken from beds in which it was originally entombed.

Amber is simply fossilized rosin, derived apparently from certain coniferous trees. The conditions under which it occurs in Santo Domingo do not appear to differ substantially from those on the Baltic seacoast.

It is found near Santiago City, associated with lignite, sandstone and conglomerates. These beds probably belong to the oligocene formation, and are found containing amber at a number of places on the north coast, as well as on both flanks of the Monte Cristi range. It also frequently occurs in the streams flowing through these beds.

The amber is usually in ovate lumps, ranging from the size of a pea to a man's fist, often covered with a brownish crust.

DOMESTIC ELECTROLIERS
OF IMITATION BRONZE.

AMONG the many exhibits in art metal work at the salesrooms of the Bradley & Hubbard Mfg. Co., 26 Park Place, New York, is a reproduction in imitation bronze representing Hebe, the goddess of youth. A rounded base supports a pedestal, decorated in heavy pattern work, on which stands the figure of the goddess. The arms are raised high above the head and support a vine on which are three rich clusters of grapes, one of which is held in the hands of the figure. The grape vine, which is in the natural color, forms an arch above the goddess, and falls gracefully to either side. The grapes are made of colored glass and in the center of each cluster is an electric light bulb, which, when turned on, produces a most pleasing effect. Other offerings include a figure of Lulli, the boy musician, reproduced in imitation bronze, after a model by a Norman artist. A figure of Titania, worked in the same metal, is also on exhibition.

FRENCH BRONZES IN
MANY SUBJECTS.

INCLUDED in the attractive display of French bronzes in the salesrooms of Bawo & Dotter, 30 Barclay St., New York, is an ornate piece of statuary which is called Fleurs D'Antoine. It is a reproduction from a French model, and represents a young woman standing on a rough pedestal, supported by a heavy rounded base. She holds in her hand a basket of flowers, and above her head is an arch formed by grapevines, from which hang clusters of grapes in their natural colors. Electric lights with clouded bulbs are hidden in the grape clusters. "Le Semeur" is another excellent example of French bronze shown by the same firm. It represents a farmer sowing grain from a bag which he carries at his side.

A RICH GLASS PUNCH
SET.

A PUNCH bowl set at the new store of the Alvin Mfg. Co., Fifth Ave. and 35th St., New York, has attracted the attention of visitors. The bowl is made of fine ruby glass and is overlaid with a partial covering of silver, wrought into an elaborate open-work design, through which the colored glass shows. A set of cups of the same style and a gold lined ladle, having a handle of ruby glass overlaid with silver, complete the set. Included in the articles so made are clocks, candelabra, jewel cases, fern dishes, trays, inkstands, ash trays and paper weights, all modeled in attractive shapes and finished in pleasing color effects.

ALVIN SILVER

The "William Penn"

A New Pattern of Flatware

A most artistic pattern in the Colonial style.

Into this pattern the designers have put much beauty and style. It is especially suitable for a gift. We predict this will become a standard family pattern with as much popularity as the celebrated English Kings pattern, that has never gone out of style.

This pattern is made only in bright silver finish, in full line, fancy pieces and cutlery.

When our salesmen call ask to see it.

The
Wadsworth
25-Year
"Pilot"
Watch
Case

—

A
 QUARTER
 OF
 A
 CENTURY

TWENTY-FIVE YEARS is the period most people have in mind in buying a Watch Case. Cases guaranteed for that time are the most popular on the market. Among the many makes offered in this class it is simply a problem of selection. Wise selection can only be made after intelligent examination and comparison, balancing values and prices.

Here is the Case that has won pre-eminence in the 25-year field. The WADSWORTH "PILOT" has forged to the front on its points of merit alone—unaided by any fictitious considerations. Right in designs, models, workmanship and price.

FACTORY, DAYTON, KY.

IT is the unanimous opinion of those jewelers who have examined the new O and 12 size movements of the ILLINOIS WATCH CO. that they are the best watches in these sizes ever manufactured in America.

No. 3.

“Every time anyone thinks of me, or mentions my name, my capital is increased.”

SO SAYS EX-GOVERNOR DOUGLAS, of Massachusetts, who sells more shoes than any other man in the world, and who is probably the largest advertiser. How much would it increase your capital to have 8,000 of the leading high class jewelers think of you every week—fifty-two times a year? If these jewelers are not thinking of you, they are thinking of your competitors who advertise. People soon forget—they are too busy to remember who was who ten years or one year ago; they only know *who is who to-day*.

¶ Many a man clings to the mistaken idea that his business is peculiar—that while others have made and are making fortunes through advertising, his position is different. This is not true. What will sell one thing will sell another. Every good business can be advertised profitably. You should reach out for all the trade there is, and while no one can get it all, enough can be secured to score a brilliant business triumph. Advertising for business is the way to get business—it is only a question of proper advertising methods that stands between any manufacturer, importer or dealer of good goods and success.

¶ Advertising should be judged by results and not by the initial cost; it should not be considered as an expense, but as an investment. There are some, otherwise shrewd and far-sighted, who hold a rate card so near the eye that the cost per week eclipses and blots out future profits of thousands of dollars. A regular page advertisement in THE JEWELERS' CIRCULAR-WEEKLY costs \$4.25 per thousand readers; a quarter page, \$1.25 per thousand. By what other means can you reach the jewelry buyers at so little expense? Even a postal card, the poorest of all advertising literature, costs \$10.00 per thousand, exclusive of the cost of printing and addressing. Circulars and booklets cost much more, according to the amount of work expended on them; and no circular or booklet, however original or beautiful, can make the same appeal and have the same guarantee of being read as an advertisement in a recognized trade journal—and the greater respect in which the paper is held by its readers the greater attention will be paid to its advertising, for the prestige of a periodical redounds to the advertisement.

¶ THE JEWELERS' CIRCULAR-WEEKLY will circulate your advertisement from the Atlantic to the Pacific, and will insure for it the attention of 8,000 dealers, who buy fully 90 per cent. of all the goods sold in the entire jewelry trade. Any one who doubts the power of advertising, or who thinks the rates high, should do a little figuring. If advertising is not effective, or too costly to be profitable, how is it that so many firms are continually building up immense businesses and growing wealthy by advertising? How is it that we see the same familiar names year after year in the advertising columns?

Drop us a card and we will tell you how The Jewelers' Circular-Weekly can help to increase YOUR business, and we will send advertising rates or have a representative call.

The Adam Pattern

AN ORIGINAL NOVELTY IN FLATWARE.

THE WHITING COMPANY take pleasure in confidently directing the attention of the Jewelry Trade to the prepossessing qualities of their radically new departure in flatware design, now introduced as the Adam pattern.

RECOGNIZING the insistent demand for a line of table silverware that shall fitly harmonize with the increasingly popular Adam Furniture and Decoration, the Company have originated a pattern designed in accord with the principles formulated by those celebrated Eighteenth Century architects, the brothers Robert and James Adam.

A FURTHER claim to consideration may be advanced on its behalf: The elegance of its form and the delicacy of its low relief ornamentation, emphasized by the simplicity of the back, unadorned save by the characteristic "swedge," combine to ensure its welcome by all people of taste and refinement.

A COMPLETE line of the Adam pattern, including Individual and Serving Pieces, is offered and ready for delivery.

DOMINICK & HAFF

SILVERSMITHS

FACTORY AND SALESROOM, 543-5-7 WEST 23D STREET, NEW YORK

The Sun.

SUNDAY, JANUARY 6, 1907.

Entered at the Post Office at New York as Second Class Mail Matter.

Sixty Years Ago.

The Meriden Britannia Company has reprinted in its little periodical, the *Silver Standard*, and has now gathered in book form, divers facts of human and sociological interest about the United States of 1847. THE SUN is one of the authorities cited. Another authority, an old friend that has joined the majority, is *Gleason's Pictorial*, which, with *Ballou's Drawing Room Companion*, is gratefully remembered by many persons who are—well, older than BEVERIDGE. We shall amuse ourselves by plucking a few trifles that bear the form and pressure of the time.

Mr. HORACE GREELEY, the true effigy of whom, whiskerless and with a dithyrambic cravat, adorns the page, writes of "the existing destitution, often suffering, of a large proportion of the Laboring Class." He rejoices that the arrival of a steamship is announced in New York "some minutes earlier than the actual date of the arrival." He hears with an open mind that "some one in Cincinnati has just invented a means of transporting, at a very moderate expense, a traveller from that city to New York within two hours." Dreams from the ivory gate seem to have nestled in Cincinnati. A master of figures and prophecy estimates that it will have a population of 4,066,667 in 1904. There is a long sick list at West Point. The surgeon gives two reasons: The cadets smoke too much, and the tightness of their pantaloons around the waist interferes with digestion. The manager of a company of barnstormers has run against the stern and rockbound Puritans of Manchester, Conn., and had to pay a fine of \$60 because, as he puts it, he "with a view of gain did cause certain females, dressed in women's clothes, to whirl around swiftly on one foot, with the other extended at right angles and in a horizontal position." What did the ballet among those crabbed Nutmegs?

THE SUN "has in the course of five years expended the large amount of \$20,000 in running steam expresses"—\$20,000 was a large sum in those frugal days. Mr. PRESCOTT's history is passing through the press. Thousands of New Yorkers have gone to see the Aztec children, "wonderful representations of ancient ADAM," the resemblance of whose lineaments to those in "many of the sculptured monuments of Central America" is clear to the press agent. Dear old show business! "The more it changes the more it is the same."

Mr. DANIEL WEBSTER opposes the Mexican war because he wants to be President. Mr. JOHN QUINCY ADAMS's health is "still equable and vigorous." Mr. ELI WHITNEY is making 1,000 Colt's revolving pistols at New Haven for the Government. A resolution introduced into the Kentucky Legislature provides that every convict's nose shall be painted and kept perfectly black until one month before the end of his term. Many Maine teamsters have pledged themselves not to haul ardent spirits; and an "elegant silver pitcher" has just been given to the Hon. NEAL DOW, Mayor of Portland. There are 2,350 miles of telegraph lines in the United States. The Cunard company is to make Jersey City the terminus of a line of steam packets. The extent of the omnibus business in New York is "scarcely to be imagined." There are 326 omnibuses, "coaches," and 800 employees. May we not insert here the theory that New York without those old stages will never be entirely satisfactory to the praisers of past time? An English journalist admires "the pretty faces and figures of the New York ladies," but regrets that they "follow the abominable practice of chewing the gum of the spruce fir." Their jaws move perpetually and they lose their teeth early.

A famous victory of tragedy over lighter letters is thus recorded:

"EDWIN FORREST, the tragedian, knocked down and cowhided N. P. WILLIS, the poet, last Monday evening at the Washington Parade Ground."

General WINFIELD SCOTT is 61. DANIEL WEBSTER is 66 (65). Mr. WINANS of Baltimore has just built for the Reading Railroad two locomotives that are to burn anthracite coal. A bill in the New York Legislature to tax bachelors—the same old and ever young bill—defines a bachelor as:

"Every unmarried white male unconvicted of crime, of good health and fair physical proportions, and who is between the ages of 20 and 56."

The first American mail steamer sails from New York in June. She is 230 feet long, 2,000 tons burden, "the most splendid steamer afloat." A statue of WASHINGTON is her figurehead. Mr. LONGWORTH of Cincinnati made 6,000 bottles of champagne from his Catawba grapes. The stockholders of the Fall River Railroad have resolved that their road shall not transport rum.

While Mrs. SIGOURNEY, the poetess, was making a speech to President POLK at Hartford, her house was robbed of "valuable jewelry." As for this man POLK:

"Why are the heroes of the present war forgotten and neglected, the men who, ragged, sunburnt and unshorn, were toiling, without pay or sustenance, over the sands of New Mexico, while the kid glove politicians, clerks and hangers-on of Pennsylvania avenue are promoted to the offices?"

Chicago has a population of 17,000, Cleveland of 12,769, Jersey City of 5,862, "an increase of 444 in one year." July 26 MOSES G. FARMER exhibited an electric passenger car at Dover, N. H. "A Mr. STAITE has secured a patent in London for rendering light available by electricity." Flour in California is \$40 a barrel. The streets of St. Louis were lighted with gas for the first time November 3. Before this candle which we have borrowed to light that old time dies out, we get a peep at "Lord" TIMOTHY DEXTER's house in Newburyport, just sold for \$7,000. General WASHINGTON in uniform stands on a Roman arch in front of the house, with JEFFERSON to his left and JOHN ADAMS, uncovered, on the right. The garden is full of columns bearing the statues of philosophers, Generals, statesmen, Indian chiefs, and now and then a goddess standing all naked in the open air. We should have liked to see that gallery, including TIMOTHY's own statue. He is a man to be honored by the friends of literature, for he kept a poet laureate; and we dare say that he was no crazier than most folks and might have been a great public man in these more indulgent times. But he had been dead more than forty years in 1847, and perhaps his wooden statuary had been dispersed.

No Money Could Buy

the editorial space in the NEW YORK SUN, devoted, as shown in the reproduction above, to a review of THE SILVER STANDARD, the little magazine that advertises "1847 ROGERS BROS." silver plated flatware. Some of the other newspapers and prominent men that have kind words for The Standard are Cincinnati Commercial Tribune; Springfield (Mass.) Republican; Postmaster-General Cortelyou; Edward Bok, Editor of the Ladies' Home Journal; Col. George Harvey, Editor North American Review; Henry Mills Alden, Editor Harper's Magazine; Albert Shaw, Editor of Review of Reviews; John S. Phillips, Editor The American Magazine; Arthur Brisbane, Editor of the New York Journal; Elbert Hubbard, of Philistine fame; Joel Chandler Harris (Uncle Remus); V. S. Mulford, of the Jewelers' Circular-Weekly; B. Thorpe, Editor of the Keystone, and many others.

Any dealer in silverware who has not received a copy of The Standard should write to EDITOR SILVER STANDARD, MERIDEN, CONN.

Prosperity for You in 1907

No. 3542.

Will greatly depend on your ability to select for your stock timely articles for timely occasions.

The successful jeweler carries a varied stock of household specialties suitable for all occasions.

Are you as successful as you might be?

Sternau specialties excite curiosity and add to your sales.

The Chafing-dish is a necessary commodity for the household and sells at all times.

This is only one of the many specialties that we make.

Our catalogue, No. 21 B, will aid you in your selection.

Write for it.

If It Burns Alcohol, We Make It

TRADE MARK
STERLING 100%

AT THIS SEASON *of the* YEAR

There is the usual after-holiday lull throughout the trade. Insure prompt and early delivery of your spring silverware by placing your order now—avoiding the natural congestion that is due in the immediate future.

TRADE MARK
STERLING 100%

This Company's product appeals to that class of buyers who appreciate distinctiveness and quality.

We are prepared to submit designs and estimates on special work of all sorts.

FRANK W. SMITH CO.

GARDNER, MASS. Manufacturers of Sterling Silverware

We are now well over the threshold of 1907. Trade prospects are even brighter than at this time last year. The buying public in general and wage earners in particular, are spending more money and calling for higher grade goods.

That fact, coupled with another—viz: the unusually good demand for men's jewelry, including vest chains and fobs, furnishes a strong reason why you should carry and push the best grade gold filled goods there is.

If you have any doubt in the matter—just see the spring line of Simmons Chains and Fobs.

Almost any prominent wholesale jewelry house will show you the Simmons line.

R. F. SIMMONS COMPANY

Main Office and Works,

ATTLEBORO, MASS.

BRACELETS

Actual Size—Best Quality Rolled Plate

Are one of the leading money makers of the present prosperous season.

Our experience in the making reaches back for years—and our present line, comprising over 600 different styles, bears ample proof that we have profited by this long prestige, and that it is not a hit-or-miss proposition we present to you, but definite and clear-cut ideas, artistically and intelligently carried out.

Any leading jobber will be glad to show you these goods—and an inspection of the goods will prove conclusively their worth to you.

WHITING & DAVIS

PLAINVILLE, MASS.

New York Office - - 7 Maiden Lane

Jewelers! School Seals are Popular.

Seals are very popular, and we show here only a few of the many made for the different schools last year.

For a State School or University no pin would be more appropriate than one with the Coat of Arms of the State in the center. If the school has no official seal, let us make a pin for you showing the characteristics of this design. If you do not care to have pin made in either of these ways, substitute the year and class initials and have the class motto in the circle.

We make seals in two sizes and three different ways, as you will see by the illustrations. Advise us regarding your wishes, stating quality and quantity desired, and we will be pleased to have prepared a colored sketch embodying your ideas, and forward with prices.

Send for our new catalog of Flag and Class pins. You can make more money handling Bastian's than any other. Special designs and estimates free of charge.

BASTIAN BROS. CO., N. 21 South Ave., Rochester, N. Y.

1906 has hardly taken its place with the years that have passed, before the hustling and bustling for 1907 are upon us. We have not lost a minute's time, but have been busy right along on our new stock, and will be prepared to show same to the trade at an early date. In the meantime, we are pleased now, as always, to take care of your orders in our office here and ship you promptly anything desired in the line of Diamonds, Watches or Jewelry. Our lines of Elk and Eagle goods are stronger than ever.

HENRY FREUND & BRO.

"SELLERS OF SELLERS"

71 Nassau Street, New York

Our Trade-Mark, the Rose, Stands for Quality and Excellence

D. Lisner & Co.

Creating Importers of

Jewelry Novelties

One-Forty Fifth Avenue, cor. 19th St., NEW YORK

*Some
Notable
Lines*

THE DISTINCTIVE QUALITIES in Lisner imported effects merit the especial attention of the trade. The stone combinations and color tones are always impressive and the designs are historically as well as intrinsically interesting. The artificial stones are always selected with discrimination and are always the best of their kind. These characteristic qualities are admirably exemplified in the Oriental Necklaces and Bracelets.

Certain stones, not artificial, are specialized by this house with excellent results. The showings in Garnet and Japanese Coral receive unqualified praise. In Jet the artificial is preferred to the natural product, owing to the former's superior brilliancy which is not impaired by wear. Every jeweler has a constituency for Lisner products which do credit to his establishment.

The Virtues of Specialization

LIMITATION is an incident of good work. The man who tries to do everything seldom does anything well. This house does not attempt to make everything in jewelry—not even everything in gold jewelry. There is specialization also as to grade: 14 Karat only.

Generally speaking, we make such jewelry as is demanded by The Niceties of Dress, including combs, necklaces, buckles, scarf-pins, cuff links, etc. Our customers will confirm the high standards that prevail.

Graceful Cup Presented to Gov. Pennypacker.

PHILADELPHIA, Pa., Jan. 9.—Governor Pennypacker, who retires soon to be succeeded by Governor-elect Stuart, was made the recipient last week of a handsome loving cup furnished by J. Warner Hutchins, 728 Sansom St.

The cup was presented to the retiring Governor by the members of his staff, and is regarded as one of the finest cups ever made for such presentation in this city in recent years. It is a three-handled affair, of solid silver, 20 inches in height and exquisitely etched.

One of the three sides contains the names of those who comprise the outgoing Governor's staff. Another side contains an etching of the State Capitol and the other side an etching of the coat-of-arms of the State of Pennsylvania. The cup is gold lined.

The presentation ceremonies were elaborate. Mr. Hutchins was a guest at the accompanying banquet.

Coral in Italian Markets.

REPORTING from Genoa, Italy, Consul James Jeffrey Roche, in a recent letter, explains the grades and values of coral sold in Italy, as follows:

The color of Italian coral is generally of a pale red tint. It is usually manufactured in spherical beads, made into necklaces measuring about 55 centimeters (centimeter, 0.3937 inch) and weighing from 10 to 50 grams (gram, 15½ grains). These are sold at from 30 cents to \$5, according to the size of the beads. The highest price of Italian coral is 1 lira, or about 20 cents per gram.

There are three colors of Japanese coral—red, pink and white. The prices are as follows: Rough, *i. e.*, unmanufactured, red, 50 lira (about \$10) per kilo (2½ pounds); pink, 300 to 5,000 lira (about \$60 to \$1,000) per kilo; white, 25 lira (about \$5) per kilo. Manufactured, red and deep red, 1.50 lira (about 30 cents) per gram; deep pink, 2 lira (about 40 cents) per gram; pink, 3 lira (about 60 cents) per gram; light pink, 3.50 to 4 lira (about 70 to 80 cents) per gram; pure pink, 5 to 60 lira (about \$1 to \$12) per gram; white, almost pink, 0.30 to 1 lira (about 6 to 20 cents) per gram; pure white marble, 0.20 lira (about 4 cents) per gram. As a rule Japanese coral has some white spots somewhere. Italian coral has no white spots.

"I am informed," says Consul Roche, that white coral (Japanese) has been exported in large quantities to the United States from the district of Naples, for use in the manufacture of fancy buttons, and artificially colored by means of aniline. When so colored they have brought high prices, about 25 times what they would bring in their natural color, but the color

is short lived and fades in a few weeks."

Italian and Japanese coral are manufactured in the provinces of Genoa, Leghorn and Naples. Italian coral is found at Sciacca, in the province of Gurgenti, Sicily and the island of Sardinia.

A Notable Trophy of the Chicago Horse Show.

ONE of the notable cups of the season is the Tichenor-Grand Challenge Trophy, which was awarded at the Chicago

and driver, while on the reverse side appears the inscription, "Tichenor-Grand Challenge Trophy. For Best Gig Horse, Chicago Horse Show," beautifully wrought in relief.

The essential decoration on the body of the cup consists of clover leaves and blossoms, while on the handles appear grape leaves and fruit. The cup is considered an excellent specimen of modern hand-wrought silver, and was furnished by C. D. Peacock, of this city, and who placed the order with the eastern silversmiths.

TICHENOR-GRAND CHALLENGE TROPHY FOR GIG HORSES.

Horse Show recently for the best gig horse. This cup, which stands 23 inches high, was made for the occasion by Reed & Barton, Taunton, Mass. It is simple and graceful in design, with slight ornamentation. On one side appears in bold relief a hand-chased panel representing the horse, gig

The cup has been one of the most admired of all the prizes given at the horse show.

The uncollected book accounts of Wm. H. Saxton, formerly a retail jeweler of Middletown, N. Y., were sold at auction recently.

We wish good luck to all
the jewelry trade for the

Simple Method of Testing Gems.

How the Jeweler May Quickly Distinguish All Imitations Made of Glass from Genuine, Reconstructed or Scientific Stones.

THE question of distinguishing quickly and accurately imitations of precious stones from genuine gems, always of vital interest to the jeweler, has been the subject of considerable work and research on the part of several prominent members of the trade, from time to time, and probably no one has given more thought or attention to the matter than Meyer D. Rothschild, a well-known gem expert and of the trade in New York, as well as the author of the "Hand Book of Precious Stones." Since the introduction into the market, in the past year or so, of a vast amount of fine glass imitations, which are made and sold under the name of "reconstructed," Mr. Rothschild has given considerable time to discover a simple method by which the glass imitations may quickly be told from the real, "reconstructed" stones or genuine gems.

Though rubies are the only gems which have been "reconstructed" in commercial quantities, in the proper sense of the term, or made scientifically from elements which compose the genuine stone, the term has been applied to imitations of sapphires, emeralds and even to diamonds, though the use of such a term in the latter case does not seem to have gone beyond the invoices which described the stones in question. As has been noted in THE CIRCULAR-WEEKLY many times, many of these so-called "reconstructed" stones and gems are made of glass of extraordinary hardness that is apt to deceive the man who makes a casual examination or uses the ordinary file test, while others are no more than ordinary doublets. Now, while it is possible and not even difficult to determine absolutely that these imitations are not "scientific" or "reconstructed" stones, as the case may be, by the use of the tests indicated and outlined in his journal in previous articles, nevertheless this work requires certain instruments, like the dichroscope, certain prepared liquids for testing specific gravity, etc., and to a certain extent requires a trained hand and eye; therefore in order that the jeweler who has not these instruments or has not the time and ability to make the tests should be in a position to determine whether or not a gem shown to him is genuine or "reconstructed" on the one hand, or a glass imitation on the other, it is necessary to find some simple test such as any one can make without difficulty.

With this end in view, Mr. Rothschild has been working for a number of months, and at last has hit upon a simple method by which the glass imitations can be detected quickly, absolutely and accurately, and the beauty of his test lies in the fact that in making it the jeweler does not run the risk of injuring the gold in which the stone is mounted, nor of injuring the stone in any way provided it be a genuine diamond, ruby, emerald, sapphire, spinel, tourmaline, etc. The test cannot be applied to turquoises or opals, while with quartz gems there might be a slight interference with the brilliancy of the stone that would necessitate repolishing.

When seen at his office last week Mr. Rothschild said he was convinced as a result of his experiments that the jeweler should have no difficulty in future in telling glass imitations and no excuse for being imposed upon. Speaking of the subject generally, he said:

"Imitation precious stones, no matter how nearly perfect their resemblance to gems, can be readily distinguished from the genuine by any expert who is prepared to apply the tests of specific gravity, hardness, dichroism and the microscope.

"Such tests, while invaluable, require special apparatus and take considerable time. Any test, therefore, which will quickly differentiate between glass and most of the precious stones will materially assist the jeweler in an ever recurring important function of his business.

"With the exception probably only of the so-called 'reconstructed' rubies all imitations of precious stones are glass. Most of the doublets of commerce are garnet above and glass below the edge or girdle.

"Now, to detect glass imitations all the jeweler need have in his possession is an acid—sometimes used by manufacturing jewelers and largely used in etching glass; this acid (hydrofluoric), which is also often combined with ammonia and then is commonly known as 'white acid,' does not effect gold in any way, even to the extent of interfering with the finish. To detect glass imitations the jeweler can use either hydrofluoric or 'white acid,' preferably the latter, and a one minute immersion of the gem is sufficient to destroy the polish of any imitation composed entirely or largely of glass.

"The following stones cannot be injured by these acids: Diamond, ruby, sapphire, spinel, emerald, aquamarine, precious topaz, tourmaline, garnet and kunzite. Turquoise and opal are rapidly etched and eaten away by it, and the quartz gems, such as amethyst, topaz and crystal, also peridots, are slightly etched and lose some of their brilliancy. So-called 'reconstructed' aquamarines, sapphires and emeralds which have fallen into the writer's hands were all attacked by these acids.

"A word of warning should, however, be addressed to persons who are not used to handling acids. Hydrofluoric and 'white' acids are to be carefully handled with rubber gloves or rubber finger tops, as the strong acid acts violently upon the skin and the fumes of the gas are dangerous. A little care, however, will minimize these risks, and the knowledge that the test cannot destroy or injure the genuine varieties above referred to is extremely valuable.

"It is a stubborn fact that the ruby has been imitated so as to present nearly every quality of the true stone, although most of the so-called 'reconstructed' rubies are not at all 'reconstructed,' but are chemically manufactured from alumina. This so-called 'reconstructed' ruby has a place in the jeweler's art, and its hardness makes cutting and polishing expensive. This added expense puts the scientific 'reconstructed' ruby in a

special class of imitation stones, although no expert who thoroughly examines one of them is ever deceived. Other so called 'reconstructed' sapphires, emeralds and aquamarines have up to the present time been made of glass and fraudulently represented as being 'built up of particles of the true stones melted together.' This, of course, to enable dishonest dealers to sell the stones at carat prices, whereas had the true facts been known the values would be very little and the imitation gems unsalable. People who have purchased these imitation so-called 'reconstructed' gems are certainly entitled to recover their money from the sellers and possibly the statute governing false advertising might also be successfully invoked."

By the use of this acid test many jewelers will not only be able to protect themselves, but will also be able to convince customers that certain concerns are misrepresenting their products and offering, under fancy names, at high prices, cheap imitation stones which the consumer would not think of purchasing from a regular dealer.

Comparison of the Yield of the Various South African Diamond Mines.

Comparison of the yield of the principal diamond mines in South Africa, showing the average recovery of diamonds from each 100 loads of earth, with the values, based on late reports, are given in a recent issue of *The African World*, as follows:

| Mine. | Yield carats per 100 loads. | Value | |
|---------------------|-----------------------------------|------------|----------------|
| | | per carat. | per 100 loads. |
| | | s. d. | £ s. d. |
| Jagersfontein | 10.95 | 70 0 | 38 6 6 |
| Dutoitspan | 26 | 69 10 | 90 15 8 |
| De Beers | 46 | 52 10 | 121 10 4 |
| Bultfontein | 41 | 34 11 | 71 11 7 |
| Wessleton | 28.4 | 36 11 | 51 13 8 |
| Premier | 30 | 30 0 | 45 0 0 |
| Lace | 12 | 40 0 | 24 0 0 |
| Voorspoed | 24 | 30 0 | 36 0 0 |
| Roberts Victor..... | 69.8 | 75 0 | 258 15 0 |

The *African World's* holiday Annual has been received in New York, and as usual is a voluminous, comprehensive and creditable publication. The offices of the weekly publication, which is devoted entirely to the affairs of South Africa, are in London. The Annual includes nearly 400 pages of reading matter, illustrations and advertising. Many entertaining and instructive articles in relation to the diamond fields and gold mines of South Africa are included, and the reading matter also comprises much of a general character in relation to the industrial and social affairs of the British and neighboring colonies. The statistics in relation to the output of the diamond, gold and coal mines published under the title of "The Mining Guide," is not the least valuable feature of the book. The financial conditions of the various companies are also exploited for the benefit of investors. A handsome and lifelike photograph of Alfred Beit, who was at the head of the De Beers Consolidated Mines, Ltd., prior to his death some months ago, accompanies the book as a supplement. One of the articles is in the nature of a memorial of Mr. Beit, and is illustrated with pictures representing scenes in his active career and his office, showing "the empty chair six months later." A large picture of Cecil Rhodes is also given and underneath the motto, "Lest we forget."

The News From London

Volume of Trade in 1906 Great, But Raw Material Costly—Sheffield Refuses to Lower Quality Standard Under Competitive Stress—Precious Metals Alone Permitted in Watch-cases Under "Plate" Decision—New Law Against Secret Commissions.

LONDON, Jan. 2.—Now that Christmas is over, one must say frankly that all the anticipations have not been realized, for, although taken altogether the general trade has been good, just before the festive season came on it had dropped off somewhat. Nevertheless we must not complain because the volume of trade done was considerably greater than had been the case for many years past.

In reviewing the trade for the year one cannot help remarking upon the great increase which has taken place in every branch so far as material is concerned. Silver, which opened the year at 30 1-16 per ounce, closed, as I write to-day (the 27th), at 32³/₈. Of course, this affects both the silver and electroplating trades. Then there has been a remarkable increase in the price of copper. In February the price was £78 per ton; that was the lowest price recorded, while the highest price was £106 17s. 6d on the 19th inst. B. S. copper, which Sheffield manufacturers and electroplate makers generally use, is £6 per ton dearer, and to this has to be added carriage, etc. Tin, which is so essential to the Britannia metal trade of Sheffield, has increased to a remarkable extent, for the price is £40 above that of a year ago. The lowest price recorded was £16 15s. in March last and the highest £215 per ton in May. One result of the boom is the revival of the Cornish tin mining industry. The cutlery trade of Sheffield has on the whole been fairly good, and the outlook is satisfactory from the point of view of employment, but manufacturers have found their profits cut to a minimum, experiencing the same difficulty as the silversmiths in getting the purchaser to understand that the cost of material has very considerably increased. In this connection one may point to the fact that ivory stands at remarkable figures, and at each sale there has been an increase in the price.

In October the ivory sales at Liverpool showed an increase of from £10 to £15 per cwt., while in London the sales showed an advance of from £12 to £15, and a record was established for soft Zanzibar teeth, viz., £90 10s. per cwt. It is stated here that the high price at which ivory stands is due to the large purchases which have been made for America. By the way, the sales for 1907 are fixed to take place in Liverpool on the 22d of January, the 16th of April, 16th of July and 15th of October; in London, 20th of January, 23d of April, 23 of July, 22d of October, and in Antwerp, 5th of February, 30th of April, 30th of July and 29th of October. Mother-of-pearl shell showed for some time a decline in price, but, as the year closed, prices stiffened and increased. Australian and Macassar shells selling at an increase of 10s. to 20s. per cwt. As a matter of fact, the latter are now, according to quality, 20s. to 50s. dearer than in January. The only fall which can be recorded in material for the use of cutlers was in East India deer horn, but it was only a few shillings.

* * *

It is interesting to note that the Sheffield

cutlers are determined to make a bold stand against the competition of Germany, and will refuse to accept the advice of so-called experts, who suggest that they should make goods to sell and please the eye. Sheffield has a reputation running over the centuries, and it is satisfactory to learn that the great Sheffield cutlery firms refuse to lower the standard of quality and thus injure the reputation which Sheffield cutlery has earned for itself the world over. Some interesting meetings have been held in Sheffield to deal with the question of amending the Merchandise Marks Act. Various suggestions have been made as to how this could be done, and the workmen are (in my opinion stupidly) suggesting that all goods should bear the name of the place of origin. As if we had not heard enough of "Made in Germany," and realized how, by an act of Parliament, we gave the Fatherland the best and freest advertisement it could ever get. Meanwhile, Sheffield is pleased with the increasing trade she is doing with the United States.

* * *

The decision of the Court of Appeals in the hall marking of foreign watches gives one food for thought, more especially because it shows what a terrible tangle the law is to unravel and what a great muddle can be brought about. In my former notes I referred to the fact briefly because I was unable to deal at any length with the matter owing to a severe attack of influenza, but now it would be well if I point out how very serious the position is. Perhaps it does not touch American makers, by any means, so much as it does the Swiss, but the effect of the decision, if upheld by the supreme tribunal, the House of Lords, will be very far-reaching. For instance, every watch case will have to be made completely of either gold or silver, and that only of the particular karats which the British assay office recognize. No longer will base metal domes, bows or crowns be allowed. Some say this is a good thing, others object that a metal dome forms a reasonable strengthener to a gold case. But the greatest trouble of all would be in the fact that the watch case would have to be sent, in the rough, to one or other of the British halls to be assayed. The very light cases of a cheap kind which have been sold by auctioneers, and cheap jacks would not, of course, stand the test. And it would be indeed a good thing if these were got out of the market. But cases, such as the Swiss and French, which *must* go to the Control in Switzerland or France and be assayed and marked, would have to undergo the same ordeal here, and it has rightly been pointed out that this is asking for something which will act as a form of protection of the worst possible type. It is therefore not surprising that the average man engaged in the British watch trade resents such a method of dealing with foreign competition. We have in Great Britain from 23,000 to 25,000 bona fide watchmakers and jewelers retailing watches, and it is estimated that the stock of foreign-made gold and silver

watches held by these and the importers and factors must be between £3,000,000 and £3,500,000 in value. As a consequence, if the House of Lords should uphold the decision of the Court of Appeal this large capital would represent so much stock which in Great Britain possessed an unmarketable value. Having been made for the British market, these goods would be practically unsalable on the Continent, since, as is pretty well known, red gold, for instance, is preferred in France to the yellow which is preferred here, and so on.

To show the muddle of the law, although the Court of Appeals has stated that watches are plate, yet the Merchandise Marks Act compels them to be marked with a special mark, across the center of which is the word foreign, *providing the importer wishes his watch to be marked at the British Halls*. If foreign watches are plate, then surely they should come under the denomination of foreign plate and receive the special marks, which were passed and became operative just over two years ago. And the question is very pertinently asked why there should be two sets of hall marks for foreign "plate." Several thoughtful Englishmen rightly observe that very little good can come out of this kind of legal warfare, and that it is the height of absurdity to give to a foreign-made article a British guarantee. They say rightly enough, let an English watch sell on its merits as against one which is plainly a Swiss or an American. And they point to the fact that the Waltham, Keystone-Elgin or Rockford watches are sold because of the value attaching to the name; they are offered on their merits, and so are the Swiss watches, and the unscrupulous dealer could have been dealt with much better by the Merchandise Marks Act than by this expensive appeal to law, especially after the Goldsmiths' Company have done nothing to enforce their powers for a very great number of years.

* * *

On New Year's Day there came into operation an act of parliament "To Prevent Corruption;" in other words, an "Illicit Commissions" Act, which, framed in a remarkably terse manner, will have a very far-reaching effect. For a long time the giving of considerations, or, to put it bluntly, percentages on purchases, to buyers and assistants, has been rampant in every branch of British industry, and, of course, the jewelry, silver, watch, optical and allied trades have had their black sheep. I know of one instance where a buyer in a London house actually offered to buy silverware if the seller would give him 7½ per cent. on all purchases made by him! Asked why he made this stipulation, he answered, "So-and-So gives me 5." This is the kind of unfaithful steward who, if he persists in his methods of conducting his master's business, will find himself in prison possibly for two years with hard labor, besides having to disgorge his ill-gotten gains to the extent of £500. It may be said that it is the ill-paid servant who is tempted to act in this way. That may sometimes be the case, but in the instance I give, from my own personal experience, the man was drawing one of the biggest salaries paid in the West End.

Pittsburg Jewelry Salesman Recently Convicted of Larceny Receives Additional Sentences on Forgery Charges.

PITTSBURG, Pa., Jan. 9.—B. S. Jaffe, a jewelry salesman formerly employed by the Castleberg Jewelry Co., Smithfield St., this city, was called yesterday before Judge Kennedy for additional sentence on the charge of larceny and forgery. In all Jaffe received a term of four years in the workhouse.

Jaffe's flight from Pittsburg and his capture several weeks later in New York was fully told in THE CIRCULAR—WEEKLY at the time. His peculations cost the firm, according to statements made by the prosecutor, over \$4,000.

Jaffe was taken before Judge Kennedy yesterday and pleaded guilty to four charges of forgery and one of larceny. These pleas were in addition to one he made last November when he admitted being guilty of the larceny of a number of gold watches and chains and other valuable jewelry, at which time he was sentenced to the workhouse for two years. Jaffe had been employed as an agent by the Castleberg Jewelry Co. to sell jewelry on commission, and he admitted that it was his practice to forge fictitious names to leases. He pocketed the jewelry and then pawned it. Before sentence was passed upon him he explained to the court that there were extenuating circumstances for the forgery, and said that it was simply a case of cause and effect, as, in order to cover up larceny, he was compelled to forge some persons' names to the leases. The judge remarked that Jaffe was quite a philosopher, but that his brand of philosophy would not hold good, as it failed in any way to justify the crimes with which he was charged.

The judge then sentenced Jaffe two years additional to the workhouse, one year for larceny and one for forgery. He was sentenced one year on each of the other charges, those sentences, however, running concurrent, making a total of four years.

Jewelers Board of Trade to Hold Annual Meeting and Elect Directors and Officers, Jan. 31.

The annual election of directors of the Jewelers Board of Trade will take place Jan. 31 at its rooms, 170 Broadway, New York. The nominating committee will submit the names of the present members of the board, as follows:

C. G. Alford, of C. G. Alford & Co.; H. A. Bliss, of the Gorham Mfg. Co.; M. L. Bowden, of J. B. Bowden & Co.; O. G. Fessenden, of H. W. Wheeler & Co.; W. T. Gough, of Carter, Howe & Co.; C. R. Jung, of Jung & Klitz; F. H. Larter, of Larter & Sons; S. H. Levy, of L. & M. Kahn & Co.; Ludwig Nissen, of Ludwig Nissen & Co.; Adolphe Schwob, of Adolphe Schwob; A. K. Sloan, of Sloan & Co.; Leopold Stern, of Stern Bros. & Co.; G. W. Street, of Geo. O. Street & Sons; S. E. Thomas, of the Seth Thomas Clock Co.; Leo Wormser, of Julius King Optical Co., all of New York.

Benj. Allen, of Benj. Allen & Co.; C. J. Dodshun, of the Waterbury Clock Co.; J. H. Hardin, of F. A. Hardy & Co.; W. F. Juergens, of the Juergens & Andersen Co.;

M. A. Mead, of M. A. Mead & Co.; A. L. Sercomb, of the International Silver Co., all of Chicago.

G. H. Cahoon, of Geo. H. Cahoon & Co.; W. A. Copeland, of Martin, Copeland Co.; Harry Cutler, of the Cutler Jewelry Co.; T. W. Foster, of T. W. Foster & Bro. Co., all of Providence, R. I.

T. S. Carpenter, of the Horton, Angell Co., Attleboro, Mass.; G. K. Webster, of the Webster Co., North Attleboro, Mass.

The nominating committee consists of: D. C. Townsend, chairman; R. W. Adams, J. C. Aikin, E. R. Crippen, David Kaiser and St. John Wood.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Jan. 9.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Berlin: 5 cases clocks, \$216.
Bremen: 1 case jewelry, \$120; 9 cases plated ware, \$792.

Bueno Ayres: 5 cases plated ware, \$237; 6 packages optical goods, \$3,783.

Calcutta: 31 cases clocks, \$624; 136 cases clocks, \$2,141; 7 cases clocks, \$151; 10 cases clocks, \$160.

Callao: 2 cases plated ware, \$103; 1 case watches, \$425; 38 cases clocks, \$1,476.

Chaux de Fonds: 1 case watches, \$398.

Christiania: 9 cases clocks, \$126.

Glasgow: 52 cases clocks, \$485.

Guayaquil: 1 case jewelry, \$170.

Hamburg: 1 case plated ware, \$200; 6 packages optical goods, \$2,260; 13 packages jewelers' sweepings, \$7,500; 4 cases jewelry, \$858; 1 case watches, \$290.

Havre: 2 cases jewelry, \$750.

Havana: 2 cases plated ware, \$140; 1 case thermometers, \$120.

La Guayra: 3 cases plated ware, \$101; 3 cases clocks, \$132.

Lisbon: 62 cases clocks, \$665.

Liverpool: 1 case plated ware, \$446; 26 cases clocks, \$285; 3 cases jewelry, \$1,120; 2 cases watches, \$300; 12 packages jewelers' ashes, \$7,650; 173 cases clocks, \$2,082.

London: 4 cases thermometers, \$236; 10 cases clocks, \$375; 29 cases watches, \$5,173; 8 packages optical goods, \$3,548; 1 case jewelry, \$167; 1 case jewelry, \$250; 124 cases clocks, \$2,241; 2 packages optical goods, \$506; 1 case jewelry, \$150; 62 cases clocks, \$2,321; 3 packages scopes and views, \$735.

Melbourne: 145 cases clocks, \$2,786; 22 cases plated ware, \$605; 108 cases clocks, \$2,548.

Para: 1 case watches, \$316.

Panama: 9 cases clocks, \$248.

Rio de Janeiro: 1 case watches, \$338; 3 cases plated ware, \$238; 1 case jewelry, \$278; 3 cases watches, \$926.

Sydney: 5 cases clocks, \$168.

Trinidad: 2 cases plated ware, \$158; 3 cases jewelry, \$138.

Valparaiso: 35 cases plated ware, \$3,628; 45 cases clocks, \$823; 10 cases watches, \$2,591; 2 cases jewelry, \$252.

George B. Bement, Brodhead, Wis., Goes Into Bankruptcy.

BRODHEAD, Wis., Jan. 9.—George B. Bement, a local jeweler, has gone into bankruptcy after a long career here. Mr. Bement succeeded J. J. Pfister in 1890, and later formed the firm of Bement & Smith, which firm was dissolved in 1902. Since that time Mr. Bement has continued alone.

In addition to the jewelry business Mr. Bement also dealt in boots and shoes, though he is a practical watchmaker and able jeweler.

C. E. Mudgett, Enosburgh Falls, Vt., is making extensive improvements in his store.

Members of the Jewelers' Safety Fund Society Hold Annual Meeting and Elect Directors.

At the annual meeting held Wednesday of last week by the Jewelers' Safety Fund Society, held Wednesday in its office, 11 John St., New York, reports of officers were read and showed the affairs of the association to be in a healthful condition. The following directors were re-elected:

Ira Goddard, James C. Aikin, of Aikin, Lambert & Co.; Charles G. Alford, of C. G. Alford & Co., Inc.; Jas. P. Snow, of Snow & Westcott; Louis Kahn, of L. & M. Kahn & Co.; Frederick H. Larter, of Larter & Sons; Oliver G. Fessenden, of Hayden W. Wheeler & Co.; William T. Gough, of Carter, Howe & Co.; Albert V. Huyler, of N. H. White & Co.; August Oppenheimer, of Oppenheimer Bros. & Veith; M. Luther Bowden, of J. B. Bowden & Co.

The board of directors met Thursday and re-elected the officers and executive committee as follows: James C. Aikin, president; William T. Gough, vice-president; Louis Kahn, second vice-president; Ira Goddard, secretary and treasurer; Fred L. Goddard, assistant secretary and treasurer.

Executive Committee—Louis Kahn, Frederick H. Larter, Oliver G. Fessenden, James P. Snow and Charles G. Alford.

The Jewelers' Protective Union is to hold its annual meeting in the same offices March 5.

Victor Enholm, Worcester, Mass., Makes a General Assignment.

WORCESTER, Mass., Jan. 9.—Victor Enholm, a retail jeweler, whose store is at 84 Belmont St., has made a general assignment under Massachusetts laws to L. M. Katz. No official statement of his assets and liabilities have been issued, and the assignment will not become permanent until sanctioned by his creditors.

Mr. Enholm has been in business here about three years, and formerly was well known in Connecticut and New York. He was for 14 years employed by Geo. M. Joyce, New York, and then commenced business in East Hampton in 1902, moving here the following year. He is a practical man, highly regarded in the trade and community, and it is hoped by his many friends that his embarrassment is but temporary.

W. A. Brasfield, Gainsville, Tex., Becomes a Voluntary Bankrupt.

GAINSVILLE, Tex., Jan. 9.—W. A. Brasfield, a well-known jeweler of this section, has filed a voluntary petition in bankruptcy, with schedules showing assets of \$4,500 and liabilities of \$3,500.

Mr. Brasfield has been in the jewelry business a long time, having started at Adamsville, Tex., in 1866, and later was located at Kenton, Kenderson and Covington, Tenn. In the latter place he was a partner in the firm of Brasfield & White, who were succeeded in 1899 by the partnership known as W. A. Brasfield & Son. The firm moved to Gainsville in the Spring of 1901, at which time the son withdrew and the elder Mr. Brasfield continued for a short time, later admitting his daughter Fannie E. as a partner.

Jewelers Elected to Office by National and State Banks of New York City.

Annual elections were held last week by the national and State banks. In the banks which have the bulk of the business of the wholesale jewelers in New York there were few changes, except at the Mercantile National Bank, which elected a new president and placed several new men in the directorate.

Following were the results of some of the elections:

Chatham National Bank—George M. Hard, Dan B. Smith, John H. Washburn, Henry P. Doremus, Sanford H. Steele, Frank R. Lawrence, Daniel J. Carroll, John D. Verneule, G. P. Morosini, Henry F. Shoemaker, William B. Conrad, Franklin S. Jerome, Frank J. Heaney, Samuel Weil, Lewis Coon. The last four-named directors are new members of the board, all the others having been re-elected. George M. Hard was re-elected president.

Mercantile National Bank—The officers elected were: F. Augustus Heinze, president; Miles M. O'Brien, first vice-president; Edward R. Thomas, second vice-president; Chester Glass, third vice-president; Emil Klein, cashier; Alfred W. Day, assistant cashier; directors, William Ballin, Wm. F. Carlton, Stanley Gifford, Chester Glass, A. P. Heinze, John F. Kehoe, Seth M. Miliken, Charles W. Morse, Harry F. Morse, Miles M. O'Brien, Dick S. Ramsay, Max H. Schultz, William Skinner, Edward R. Thomas, O. F. Thomas, Robert M. Thompson, Warner Van Norden, F. Augustus Heinze.

Oriental Bank—Nelson G. Ayres, Charles K. Beekman, Samuel Bettle, Eugene Britton, Stephen R. Halsey, Isidore Hensheim, Erskine Hewitt, R. W. Jones, Jr., George E. Keeney, Hugh Kelly, Richard B. Kelly, Charles E. Levy, William McCarroll, Alexander McDonald, Ludwig Nissen, Andrew W. Preston, John C. Whitney.

In other banks the new boards of directors include the following men identified with the jewelry trade, nearly all of whom have been re-elected:

Market and Fulton National Bank—Leopold Stern, of Stern Bros. & Co.

New York National Exchange Bank—Lee Kohns, of L. Straus & Sons.

Merchants' National Bank—Edward Holbrook, of the Gorham Mfg. Co.

Aetna National Bank—William S. Pitcairn, H. Endemann, of Endemann & Churchill.

National Park Bank—Francis R. Appleton, of Robbins & Appleton.

Mechanics and Traders' Bank and Consolidated National Bank—Orlando F. Thomas, formerly of the International Silver Co.

Mount Morris Bank—Francis R. Appleton, of Robbins & Appleton.

Nassau Bank—Frank H. Richardson, of Enos Richardson & Co., re-elected president and director.

In Newark, N. J., the following are members of the new boards of directors:

Union Bank—Julius A. Lebkuecher, of Krementz & Co.; Theodore M. Woodlard, of Kent & Woodland.

Merchants National Bank—Harry Durand, of Durand & Co.; Joseph M. Riker, of Riker Bros.

Manufacturers' National Bank—Herman Unger, of Unger Bros.

National State Bank—Charles C. Champenois, of Champenois & Co.

Annual Meeting of the Jewelry Travelers' Association Held in New York.

The Jewelry Travelers' Association (formerly the Brotherhood Auxiliary) held its annual meeting Tuesday of last week in the offices of Sloan & Co., 21 Maiden Lane, New York. Frank Sloan, the president, was in the chair, and there was a representative attendance of the members. Reports of officers were read indicating that the organization has been carrying out its work satisfactorily.

The following new officers were elected to serve for the year of 1907: President, Albert F. Carter; secretary and treasurer, Harry A. Bliss; board of directors, Albert F. Carter, C. M. Perley and Charles F. Brinck.

In the last year there has been only one death in the ranks of the society, that of Albert Stevens. A letter was read from his widow, expressing her appreciation of the services and sympathy extended by the association at the time of her bereavement.

The officers are desirous of increasing the membership, which is limited to those who are also of the Brotherhood of Traveling Jewelers. All members of the latter organization who have not affiliated themselves with the Jewelry Travelers' Association are invited to do so.

The object of the Jewelry Travelers' Association, as before explained, is to give immediate assistance to the families of members who die. It is recognized that when a salaried man dies, there is likely to be a lack of funds available at once for the extraordinary expenses then incurred. Even when there is considerable money to come from life insurance and other assets, cash may not be at hand just when it is most urgently needed. It is at this precise moment that the organization steps forward with relief. The assistance coming, just when it is needed, will be of much greater value than larger sums paid at other times.

Altoona, Pa., Jewelers Sued for Alleged Slander by Customers Accused of Theft.

ALTOONA, Pa., Jan. 9.—Breneman & Alderfer, 1416 Eleventh Ave., this city, have been made defendants in a suit for \$10,000 damages brought by Elizabeth Frieman and James O'Mally, who asked this amount as balm for alleged slander.

According to the complaint the two plaintiffs visited the store of the jewelers on Dec. 12, for the purpose of purchasing a Christmas present, and after they had returned to Miss Frieman's home, they claim, an officer, accompanied by Mr. Breneman, called there and Mr. Breneman, it is said, accused both of stealing a back comb while in the store.

The plaintiffs allege that this charge lowered them in the estimation of their friends and caused them much suffering, for which they ask damages.

M. M. Stern and H. Zwelling, clothier, Pocatello, Idaho, have consolidated their stocks.

Bankruptcy Petition Filed Against Frank B. Thayer, Memphis, Tenn., When He Fails to Carry Out Settlement.

MEMPHIS, Tenn., Jan. 11.—Frank B. Thayer, a well-known jeweler, who conducts a store in this city, is named in bankruptcy petition, filed in the United States Court, this city. Mr. Thayer has been operating under an extension of credit, and the petition resulted from the fact that he was unable to make the January payments on his indebtedness. Creditors began bankruptcy proceedings, making the usual allegations. About 15 per cent. of the old indebtedness has been paid. The exact figures as to the assets and liabilities have not yet been made public.

The business which Mr. Thayer conducts is an old one, and was established by his father, Nathan E. Thayer, in 1876. The elder Mr. Thayer was forced to the wall twice, and was succeeded by the Thayer Jewelry Co. in 1893, which company made an assignment in December, 1905. The following year Frank B. Thayer, who had been employed by the old concern, purchased the stock from the assignee and began business on his own account.

When Mr. Thayer asked for an extension from his creditors in July last, the assets were said to be worth \$25,000, while the liabilities were slightly over \$16,000. The terms of extension were terms of five per cent. on Sept. 1, Oct. 1 and Dec. 1, 1906, which payments have been made, and 10 per cent. in January this year, five per cent. in March, 10 per cent. in April and May, five per cent. in June, July and August and 10 per cent. in September, 1907.

Mr. Thayer is widely known in this section and highly respected.

Burglar Alarm at Philadelphia Optician's Store Leads to Capture of One of a Gang of Burglars.

PHILADELPHIA, Pa., Jan. 14.—An admirable system of burglar alarm wires Thursday last thwarted the efforts of three young men to rob the optical establishment of D. V. Brown, 740 Sansom St. Wholesale jewelers on Sansom St., between 7th and 8th Sts., breathed sighs of relief when one of the thieves was captured.

It was believed that it was the object of the thieves to rob many of the Sansom St. houses, and that they began first at D. V. Brown's store, because it appeared the easiest of access. But Mr. Brown has had experience with thieves before and has profited by his experience, with the result that a perfect system of burglary alarms was installed. The thieves set an alarm off and attracted the attention of a policeman, and in addition brought assistance from the American District Telegraph Co. The capture of one of the men was then made.

The prisoner gave his name as John White and is held under \$2,000 bail.

The police are trying to find out something of his history. The other two made their escape.

Nothing was taken from the optical establishment.

E. M. Schwenke will soon close out his stock in New Richland, Minn.

Death of Edgar A. Woodmaney.

PROVIDENCE, R. I., Jan. 12.—Although it was known that he was seriously ill, news of the death of Edgar A. Woodmaney, secretary of the Potter & Buffinton Co., came as a shock to his many friends in the trade. The end came last Thursday, after a protracted illness. Mr. Woodmaney had for about six years been a sufferer from diabetes, but it was not until last August that the disease appeared in an acute form. Since that time it was generally recognized that there was a strong probability that the disease could never be cured.

Born in Richmond, R. I., in October, 1851, Mr. Woodmaney was in his 56th year at the time of his death. He received his preliminary education in the public schools of his native town and then came to this city, where he attended Schofield's Business College. His training here fitted him for a position as bookkeeper with a local book firm, and October, 1872, he left this concern to enter the employ of Potter & Buffinton in a similar capacity. His duties were not wholly confined to his books, however, for he was sent frequently on trips to Boston and other New England places in the interest of the house, and in 1896 he was taken in as a stockholder of the concern. Some years ago the firm was incorporated and Mr. Woodmaney was made secretary.

Mr. Woodmaney was a member of the New England Manufacturing Jewelers and Silversmiths' Association, one of the directors of the Manufacturing Jewelers' Board of Trade, and a member of the Providence Central Club and the Trade Club of Boston. He was a man of especially gentle and kindly disposition, and those who knew him best loved him the most. The funeral was held on Monday, and the deceased is survived by a widow and one son.

Death of Joseph Graham Hutchinson.

ATTLEBORO, Mass., Jan. 12.—Joseph Graham Hutchinson, one of this town's best known jewelry salesmen, died at 5 o'clock Friday afternoon at his home on County St. Death was the result of a shock sustained two weeks previous.

Mr. Hutchinson's long traveling experience gave him the acquaintance and friendship of nearly every jewelry firm in the trade. Deceased was 52 years of age, and was born in Providence, Jan. 26, 1854. During his early life he was an expert stage carpenter, and followed that profession until he came to Attleboro in 1885, when he accepted the management of the Bates Opera House. Mr. Hutchinson's main work in Attleboro, however, was in the jewelry business. His first position was with the Bates Button Co. in the capacity of salesman. Later he accepted a similar position with J. C. Cummings & Co.

Prior to the fire which destroyed the factory district, in 1898, he went into business on his own account, locating his factory in the Hayward building. His firm was burned out in the fire and was not continued. Mr. Hutchinson later accepted a position with D. A. White & Co., which he held until he joined the firm of Smith & Crosby. He held this latter position until his death.

Deceased is survived by a widow, three children, Albert, Lena and Bessie Hutchinson, and a brother, James, in Providence. He was a member of Attleboro Council, Royal Arcanum.

Death of John B. Rettenbury.

DUNSTON, Pa., Jan. 11.—John B. Rettenbury, who died recently in this town, was long engaged in the jewelry business in this section, and had conducted a store here continuously for nearly 30 years. The funeral was largely attended by the business and social friends, who held the deceased in high regard.

Mr. Rettenbury was born in Devonshire, England, and came to the United States when he was about nine years old. He first settled in the western part of New York State, and entered the jewelry trade as a young man; in 1877 he went to Monroeton, and in 1881 came to Dashore and purchased the business which had previously been conducted by Charles Maustauk, conducting it under his own name, until his death.

In the year that he came here Mr. Rettenbury married Miss Berenice Kellogg, of Monroeton, who survives him.

John W. Hardwick, Walla Walla, Wash., Makes a General Assignment.

WALLA WALLA, Wash., Jan. 11.—John W. Hardwick, who conducted a retail jewelry store in this city, has made a general assignment under the State laws to Amos K. Dice. No official statement of liabilities and assets has been issued as yet by the assignee, nor could it be learned definitely whether or not the assignment would lead to bankruptcy proceedings on the part of the creditors.

Mr. Hardwick, who was originally in business in Dallas, Ore., came here in 1896 and began business in the name of his wife, E. Hardwick. Later on he took over the business himself, and for the last five years conducted it under his own name.

A meeting of creditors will be held in this city, Jan. 18, at which it will be definitely decided what shall be done in regard to the continuing of the business or settling up.

Death of C. T. Cuny.

CHICAGO, Jan. 14.—C. T. Cuny, of C. T. Cuny & Co., manufacturing jewelers, 78 State St., died at his residence, 235 Grace St., Thursday, of pneumonia, after an illness of six days. The interment took place yesterday at St. Boniface Cemetery.

Mr. Cuny's sudden death came as a great shock to his many friends here. Deceased was born in Chicago 37 years ago, and started first with the Blauer Watch Case Co. Subsequently he went with the Shourds, Adeck & Teufel Co. and later engaged in business for himself, the Co. being nominal. He leaves a widow and two children. Mrs. Cuny intends to carry on the business.

The store of Smith & Case, 1405 Central Ave., Central City, Kans., was broken into early one morning recently and jewelry worth \$250 was stolen. The glass in the front door was found broken the next morning, and an iron bar was lying on the floor inside.

Death of James K. Lemon.

LOUISVILLE, Ky., Jan. 11.—The news received here late Tuesday night to the effect that James K. Lemon, this city's most prominent jeweler and one of the leading merchants of Kentucky, had passed away on that afternoon at Battle Creek, Mich., caused unusual sorrow and regret in the business community and among the deceased's many friends throughout this section. Mr. Lemon died in a sanitarium at Battle Creek, where he had been spending the past three months in the hope of regaining his health. Some time ago he contracted a severe cold, which developed into bronchitis, and this, combined with the trouble with the nerves of his eye from which he had been suffering for some time, greatly weakened him so that his illness had a fatal termination.

The remains were brought here from Battle Creek and the funeral took place yesterday afternoon from the Second Presbyterian Church, the services being in charge of the Rev. Egbert Watson Smith, assisted by the Rev. Dr. Chas. R. Hempell. The active pallbearers were the deacons of the church and the honorary pallbearers were the elders. The interment took place in Cave Hill Cemetery.

Mr. Lemon had not only spent his whole life in the jewelry business, but his father before him, the late James I. Lemon, had been a prominent member of the trade and one of the pioneer jewelers of Louisville. The deceased was born in this city 65 years ago and received his education at the public schools and high school here; after graduating he started to work for his father in the business that the latter had established in the year 1828. The firm, then known as James I. Lemon & Co., was changed later to James I. Lemon & Son, when James K. was admitted to the partnership. After the death of the elder Mr. Lemon, James K. Lemon continued the business alone, until he admitted his son, Brainard Lemon, to an interest in 1889, since which time the business has gone under the name of James K. Lemon & Son.

Outside of business the deceased was prominent in religious work, having been a staunch member of the Second Presbyterian Church since his early youth. For many years he was a deacon in the church, and later was made an elder. Inheriting from his father the highest ideals of commercial honor that had made the latter one of the most highly respected men in the south, he built up a reputation for honesty, integrity and sterling worth such as any man might be proud to possess. He held the confidence and admiration of a large circle of friends in the business and social world to all of whom his death is a distinct personal loss.

Market Price of Silver Bars.

LETTERS TO THE EDITOR.**An Important Suggestion as to When the Jeweler Should do Jury Duty.**

NEW YORK, Jan. 9, 1907.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

Permit me the liberty of addressing you on a subject of some importance. I noticed a reference in this week's CIRCULAR—WEEKLY to the fact that a considerable number of jewelers had been summoned to do jury service during the holiday season. This reminded me of a similar experience that I had a few years ago, which brought home to me very forcibly the conviction that the laws governing the matter were lax and unjust in their operation.

The common impression that only a minority of citizens perform this duty seems to me to be correct. A considerable number of citizens are legally exempt, but a very much larger number, who are not exempt, succeed in evading or shirking this duty. The thought suggests itself that if all citizens who ought to serve could be compelled to do so, the call on each one of us would not be so frequent, and the matter would lose its serious importance.

My plea, however, is not based so much on the necessity for bringing the unpatriotic citizen to a sense of his duty as it is to consider the rights of the good citizen, who is willing to serve the State, but who also demands some protection in his right to devote himself to his own affairs. When the country is in danger, as in time of war, the convenience or the welfare of the citizen is not to be considered. At such a time the nation is entitled to the very lives of its citizens. But in times of peace the country should protect not only the lives of its citizens but should protect them from unnecessary intrusion or interruption in their daily pursuits. To call on the retail jeweler to do jury duty in December may possibly entail serious financial loss. On the outcome of the December business may depend his year's profits. To call upon him at such a time, in view of his willingness to serve at any other time during the other 11 months of the year, is a grave injustice.

If a jeweler who is summoned to serve in December succeeds in impressing the judge he may be excused. A business excuse, however, is not legal, and he is then excused as a favor. It seems to me that he should be *legally* entitled to freedom to serve his own interests at such a time.

I recollect reading in some daily paper about a year ago of a proposed bill which had been presented in the State Legislature, giving the citizen an opportunity to state at what time of the year he could be relied upon to do jury duty. I could not then, nor do I now, see any possible objection to such a measure. For my part, I am willing to serve as a jurymen any time during the year, with the exception of the month of December. I am sure that every retail jeweler is in the same position.

I call upon THE CIRCULAR—WEEKLY to champion a measure of this kind. And permit me to add that my plea is not based only on justice to the citizen; I believe that the jury system itself will be materially benefited, for many men of intelligence now shirk this duty for fear of being called upon to serve at an unreasonable time. In calling attention to this fact I do not wish

to be understood as justifying their action, but it does seem best that we should have laws that represent the common sense of the community, for such laws are respected. If we can secure a better class of citizens on our juries, by making it easier for these men to perform this duty, it seems to me to be wise to do so.

Trusting that I have not imposed too much on your valuable time, and extending my best compliments to THE CIRCULAR—WEEKLY, I remain, very truly yours

EMIL W. KOHN.

J. E. Caldwell & Co., Philadelphia. Win Important Suit Against an Express Company.

PHILADELPHIA, Pa., Jan. 9.—A case of much interest to jewelers throughout the country was tried in this city this week. It was a suit brought by J. E. Caldwell & Co., leading retailers, against the United States Express Co. to recover damages for jewelry lost in transit and resulted in a victory for plaintiffs.

The gist of the controversy was that a Mrs. Richmond Jones, of Reading, Pa., had been shipped three rings on approval from J. E. Caldwell & Co., and as she did not wish any of them and reshipped them through the United States Express Co., together with a ring of her own which she wished to have reset. The rings never reached the jewelers, and upon inquiry it was learned that Mrs. Jones had sent them on, and that they were lost in transit or stolen.

In sending the package of jewelry Mrs. Jones had refused to set a value on it, so at the trial the company's officials claimed that because of her failure to do so the package could be given only a nominal value of \$50.

The attorney for the defense, however, insisted that the package was lost solely through the negligence of the express company and the judge and the jury took the same view of the case, with the result that a verdict of \$425 was returned in favor of J. E. Caldwell & Co.

Bill to Provide a School for Jewelry Workers in the Attleboros to be Introduced in Massachusetts Legislature.

NORTH ATTLEBORO, Mass., Jan. 12.—Representative Frank O. Coombs will introduce a bill into the present Legislature that will be of vital interest to all in the Attleboros associated with the jewelry business. It will provide for the establishment of a trade school that will prepare the young men and girls to become better fitted to take an active part in the jewelry industry. The school will be for the jewelry trade what the Lowell textile school is for the cotton and woolen industry.

The establishment of the school will, beyond doubt, have a tendency to spread the fame of the Attleboros as makers of jewelry, as it will sharpen the wits and increase the efficiency of the young recruits both in making designs and patterns and also in the finishing of the staple article.

J. M. Thompson, Wells, Minn., has closed out his stock of jewelry.

No Trace Obtained of Jacob M. Gottfursch the Missing Pittsburg Jeweler.

PITTSBURG, Pa., Jan. 12.—It was learned to-day that Joseph M. Gottfursch, the missing jeweler of Butler St., owes creditors between \$6,000 and \$7,000. It is also said that Pittsburg firms are the heaviest involved. This is the third time he has gone away, having left twice before on account of some domestic trouble.

Gottfursch, or Gottfurcht, as he is also called, as told in the last issue of THE JEWELERS' CIRCULAR—WEEKLY, went away the first of the year, and what stock he left in the store was sold this week. A Mr. Mead, of Scottsdale, Pa., bought it, paying \$510, exclusive of the safe in the store. There is a lien against the safe.

That the jeweler had planned his departure is the belief of many. Moritz Biederman, a well known south side jeweler, is a brother-in-law of the missing man, and a few days before Gottfursch went away the latter called on Mr. Biederman, according to the latter's statement to THE CIRCULAR—WEEKLY's correspondent, and requested that he be given a photograph which Mr. Biederman had in his possession. In fact, it is stated that Gottfursch took all of his photographs with him, or destroyed them before his departure, so as to leave nothing behind that would aid in detecting him. In addition to securing the photograph from his brother-in-law he also secured the loan of \$100.

Mr. Biederman says that Gottfursch is a native of Germany, and that if he went back to his native land the Government would lay claim on him for military service. Mr. Gottfursch and her child have gone to live with her parents in this city.

Stationers' Board of Trade Holds Thirty-Second Annual Meeting.

At the 32d annual meeting, held Tuesday of last week by the Stationers' Board of Trade, the chair was occupied by the president, Henry C. Bainbridge. Fifty members were present or represented by proxy. All the former trustees, with one exception, were unanimously re-elected.

The report of the executive committee, of which James C. Aikin was chairman, showed that in the Bureau of Information the reports now on file number 83,170, of which 2,754 are new names received during the year. The number of reports furnished to members during the year was 17,075, as compared with 16,150 in the preceding year.

In the collection department there were received 3,773 claims aggregating \$177,322. Collections were made to the amount of \$65,003 and \$46,000 was paid direct to members as a result of the committee's work. The number of uncollectable claims returned was 1,012, while 957 claims are still open.

In the bankruptcy department there were 345 new cases. In 41 cases the claims, amounting to \$6,858, were paid in full. In 168 cases the claims, amounting to \$65,540, were compromised or settled. In 107 cases claims, amounting to \$16,315, were returned as worthless.

H. M. Condit, secretary-treasurer, in his report, showed a total income of \$15,064. The surplus in the statement of assets and liabilities, Nov. 30, was \$1,775.

The Diamond Markets.

ANTWERP, Jan. 3.—The opening of the new year saw little change in the condition of the diamond market in this city. Some sales were made in good m \acute{e} l \acute{e} e and roses, and also in small white six faces. Local diamond factories continue to employ all their hands.

It is rumored that several diamond cutters are preparing to open small factories in villages near Antwerp. It is feared that this will endanger the general prosperity of the city.

Among the foreign buyers in the city during the past fortnight were: Messrs Horowitz, Matheassian, B. Rapaport, Vanderhey, L. Van Moppes, G. Gerson, Monnikendam, Effer, Weinstok, Ad. Levy, G. Woelfling, De Haan, Koscher, all of Paris; Mr. Belluschi, Milan; Mr. Abend and Mr. Moschkowitch, Berlin; Messrs. Metnikoff, Kauffmann, Goldberg and Tufeld, London; Mr. Schettino, Naples; Mr. Pevsner, Bakau; Mr. Mendelsohn, Manchester; Mr. Van Gulk, Goeh; Mr. Azavey, Milan; Mr. Herzfelder and Mr. Probststein, New York; Mr. Brueder and Mr. Gamek, Vienna.

PARIS, Jan. 3.—The old year ended quietly, as was expected, but everyone seems to be prepared for good business during the new year. There is no decrease in the prices; in fact, it is expected that there will be another rise in rough goods. The financial condition of the market is good.

The firm of De Soye & Co., 19 Rue Chapon, was dissolved recently.

Isidore Emerique, member of the Professional Syndicate of Precious Stone Merchants and Brokers, is dead at the age of 75.

AMSTERDAM, Jan. 2.—The market has been very quiet, but the outlook for the month is very bright. Rose diamonds are being called for by foreign and local merchants. The demand for polished brilliants in general is expected to be very large, especially by American and European buyers.

Members of the Manufacturing Jewelers' Board of Trade Hold Enjoyable Banquet and Annual Meeting.

PROVIDENCE, R. I., Jan. 12.—The 22d annual dinner and meeting of the Manufacturing Jewelers' Board of Trade was held at the Eloise in this city this evening, and was attended by over 100 of the most solid and substantial jewelers of Providence and the Attleboros. During the course of the meeting, which was held subsequent to the banquet, a board of directors and three trustees were elected for the ensuing year, and the committee on the revision of by-laws presented a series of amendments to the old by laws whereby any member of a firm allied to the jewelry trades may become a member of the organization.

The banquet itself, from the oysters to the coffee, was an excellent one, and full justice to the menu was accorded by the guests. After the cigars were lighted, President Robert E. Budlong, in a brief speech, traced the history of the organization and spoke of the beneficial effects a membership in it has on the jewelry trade. He said that the Board of Trade was the pioneer and leading organization of its kind in the country. "It was instituted primarily," said he, "to investigate and put a stop to several dishonest failures which occurred in the trade in the early 80's."

The report of Marcus W. Morton, secretary and treasurer, was an interesting document, inasmuch as it was a practical survey of the jewelry situation in the entire country for the past year, showing the number of firms which have failed, the causes of failure and the settlement of any financial difficulties they may have gotten into.

In connection with the work of the board in so far as furnishing reports of credit of firms is concerned, Mr. Morton had this to say:

It is gratifying to state that the great amount of labor devoted to this department is producing good results as is evidenced by the steady increase of inquiries, made for credit reports and the vast amount of information voluntarily placed in possession of members. During the year there has been received and answered 5,010 special inquiries, and a large majority have been answered upon the day of their receipt, giving complete and detailed information. To do this there have been written 3,997 reports, while the total number of reports issued to members is 24,964.

Regarding the general jewelry situation he said that in common with all other industries those represented by the Board of Trade have enjoyed to a great degree the general prosperity of the nation.

Getting down to the practical workings of the organization his report says:

In passing, it may not be inappropriate to call your attention to the fact that we stand well to the front as being among the oldest of trade credit organizations, having for its purpose the diffusion among its members of accurate information relative not only to the credit and general business standing of persons, firms and corporations, but also valuable information as to amount of purchases of said parties, the payment of their accounts, amount overdue, etc. This information is accessible to every member and as appears by the record is being more and more used as its importance is understood. By our methods and their adaptation, we claim and assert that the interests of manufacturing jewelers and allied trades can be best protected and maintained by membership in our Board.

Our Address Book is issued twice during the year, and as a means of general information as well as correct address, is coming to be relied

upon by the traveling salesman as well as night indispensable as his trunk or grip.

Another feature of the office is the record and announcement of the arrival of jewelry buyers, which information is obtainable upon application by members, and very many daily avail themselves of this privilege and thus keep in touch with and are able to make early appointments with buyers."

The following were elected directors of the organization by the casting of one ballot: Robert E. Budlong, Henry Fletcher, William A. Schofield, W. P. Chapin, Everett L. Spencer, Frank B. Reynolds, Charles D. Waite, L. H. Bosworth, Edward B. Hough, George H. Holmes, Alfred K. Potter, Howard D. Wilcox, Ernest D. Gilmore, F. P. Daughaday, C. J. McClatchey, Herbert C.

ROBERT E. BUDLONG, PRESIDENT.

Bliss, Fred E. Sturdy, George W. Cheever, W. W. Sherman and H. P. Kent. The directors will meet within the next 10 days to elect officers. The trustees of the special fund were elected as follows: Howard D. Wilcox, W. P. Chapin and W. H. Waite.

Henry Fletcher, for the committee on the revision of by-laws, reported that the committee suggested amendments whereby any person who is a member of a firm allied to the jewelry trades can join the organization, and a person who has formerly been a member can rejoin without paying the entrance fee, providing he shall have been in good standing when he resigned. An amendment which called for some discussion was the time of the annual meeting. It was finally decided that, to accommodate Western travelers, the meeting shall be held in the future on the last Saturday of January annually. All of the amendments were carried without opposition.

Champ S. Andrews, a New York attorney who has just returned from an extended tour of China and Japan addressed the

assembly on "Trade relations between the United States, China and Japan." He said that in this country it is the commercial and business man, while in China it is the literary man who is the honored person. In Japan the national spirit is purely martial, and even at the present day it is the warrior and not the merchant who has the respect of the nation. He said that the United States would have a hard task before it to compete with Japan in commercial affairs, as a Japanese is unscrupulous and has to be tied hard and fast to any agreement. A merchant trying to get a market in Japan has to compete with the nation, and does not have the "square deal" that he has in this country.

At the conclusion of Mr. Andrews' remarks Referee in Bankruptcy Chester W. Barrows was introduced and explained in detail the operation and intent of the bankruptcy laws. He said that it spoke well of the jewelry industry that very few firms in that line of work are called into his court. "It is no disgrace to fail," said he, "if you fail honestly. But it is a disgrace and a crime to fail dishonestly. The purpose of the bankruptcy laws is to collect and distribute the estate of the debtor and return it to the creditor. It was one of the various methods which can be adopted to settle up business firms which are in difficulties."

At the conclusion of Mr. Barrows' remarks the meeting adjourned.

"**G**EMFINDER" takes a melancholy pleasure in referring the trade to his advertisement of April 25th last, in the "Jewelers' Circular." Unfortunately, his prophecy has been fulfilled. Not only have Precious Stones advanced, but the end has not yet been reached. Sapphires have gone up at least 25 per cent. in the last six months, and they will go still higher.

"Gemfinder" again warns prospective buyers not to delay. All kinds of Precious Stones are scarce and prices on some may become prohibitive.

Man Who Held Up Muskegon, Mich., Jeweler Quickly Arrested and Sentenced to a Long Term in Prison.

MUSKEGON, MICH., Jan. 9.—John Johnson, alias J. F. Wilson, charged with being the man who as told in THE CIRCULAR-WEEKLY of last week held up James V. Wallace in the latter's store, 11 South Terrace St., and escaped with a tray of jewelry, was arrested in Grand Rapids, Mich., brought to this city Monday to answer the charge and has been tried, convicted and sentenced. A search of the prisoner resulted in the finding of most of the diamonds taken from Mr. Wallace's store, the jewelry being concealed in the lining of the prisoner's coat. He had pawned some of them, but it is said, a large part of the "swag" had been recovered. On his way to this city the man confessed.

Wilson or Johnson on arriving here was quickly bound over to the Circuit Court. He immediately pleaded guilty and was sentenced to not less than 10 nor more than 20 years at hard labor in Jackson prison.

Credit for the capture of the man is given to Charles Morgan, an employe in the Union depot in Grand Rapids. Morgan had just finished reading the story of the robbery when he noticed a man throw off his coat in a way that disclosed the butts of two revolvers. This and the suspicious appearance of the man caused Morgan to notify the police. Although the man disappeared before they arrived he was later arrested while attempting to board a train for Detroit.

The prisoner is a young man, 5 feet 9 inches high, weighing 160 pounds. Although he gave his age as 21 he looks nearer 30. He has a dark complexion, dark eyes and a rather fierce expression.

Involuntary Bankruptcy Proceedings Brought Against Missing Jeweler of Tonawanda, N. Y.

TONAWANDA, N. Y., Jan. 11.—An involuntary petition in bankruptcy has been filed against Cummings Mundie, a local jeweler, who disappeared from this town on New Year's Day and has not been heard of since. The petitioners are the First National Bank of this town and Frank J. Litzenburg, of Buffalo. The bank has a claim of \$1,722 on a note issued by Mr. Mundie, and Mr. Litzenburg has a claim for rent. The petition alleges that Dec. 27 Mr. Mundie, being insolvent at that time, paid \$305 to Laubheim & Bros., and thereby committed an act of bankruptcy.

Henry P. Smith has been appointed receiver of the jeweler's assets, and has taken charge of Mr. Mundie's store on Niagara St. The stock is thought to be worth about \$5,000.

Cummings Mundie is a brother of John and James Mundie, and until the Spring of 1904 was associated with the latter in business; on that date he withdrew from the concern and opened a store of his own on South Niagara St. As he was a practical watchmaker and had an excellent reputation as a business man, it was believed that he would succeed in his venture. Therefore, his disappearance and the bankruptcy proceedings which followed have been a great surprise and shock to his friends. Mr. Mundie's wife claims to have heard nothing from him since he went away.

Security Alliance Meets.

Its 24th Annual Session Held and Reports Are Presented Showing Steady Growth of the Organization—
President A. K. Sloan and Other Officers Re-elected.

The 24th annual meeting of the Jewelers Security Alliance, was held at the office, 9 Maiden Lane, last Friday, and was marked by reports indicative of prosperous conditions and growth in many directions. The president, A. K. Sloan, delivered his annual address, expressing satisfaction with the year's record, as follows:

PRESIDENT'S ADDRESS.

To the Members of the Jewelers' Security Alliance:

Gentlemen—We have assembled to-day for our 24th annual meeting, and I again have the pleasant duty of congratulating you upon another successful year.

We have increased our numbers to a considerable extent during the past 12 months, thus enlarging the usefulness and influence of the organization, and but one of our members has suffered from the attacks of safe burglars, his loss being very small.

The report of the executive committee will give you the details of the year's work, and I trust you will give it the thorough consideration which the careful attention to your interests certainly merits.

There is a well known saying, "Happy is that nation which has no history," because for the making of history, wars, revolutions and other similar unfortunate occurrences are required. In like manner I think you will agree with me in saying, fortunate is the Alliance when the president's annual message is confined to a short statement of progress during a comparatively uneventful year, since any sensational safe burglaries which make it longer and more interesting perhaps, would necessarily be attended with loss and trouble to the unfortunate victims.

May I call your attention to the fact that we shall reach our 25th anniversary at the next annual meeting, and urge you to make a special effort to influence your friends and neighbors in the trade to join the Alliance, so that we can round out the quarter century with a membership of 5,000. Of course, it will require united and earnest effort to add the requisite number, but we can do it if we will all try.

The annual report of the executive committee was then presented by the chairman, H. H. Butts, as follows:

EXECUTIVE COMMITTEE'S REPORT.

During the year past we have held 11 regular meetings, at which 548 new members were admitted; two were reinstated and 67 withdrew, leaving a total membership, Jan. 1, 1907, of 3,963, a net gain of 483 during the year.

There were fewer safe burglaries among jewelers, last year, than for a number of years; 20 cases, however, were reported in the trade papers in which attempts were made to break into jewelers' safes.

Only one of our members was so visited, I. A. Griffie, Boone, Ia., whose store was broken into the night of July 6, through a rear window, and in some way the burglars succeeded in working the combination of the safe without breaking or damaging it and got it open. They took out the stock and carried it to the back of the store, apparently for the purpose of packing, preparatory to carrying it away, but were evidently frightened, or they left the bulk of the goods, taking only about \$100 in cash and a fine watch movement.

Considerable work has been done on this case without success, it being very difficult to connect any one with this case because no tools were used in opening the safe. The men were not seen and only one item was taken. An ex-convict who was in town about that time was suspected of being connected with this job. He has since disappeared and so far we have not succeeded in locating him.

The jewelry trade has cause to congratulate itself that during the past year it has been more fortunate in its experiences with burglars than have the bankers, the reports showing that 75 banks were attacked and robbed of nearly \$100,000,

while only 20 jewelry stores were so visited in the same period, only one of which was that of a member, which makes an interesting comparison and gives some basis for estimating the value of the Alliance membership and the sign which a member displays as a preventative.

When we come to consider the petty burglars who do not attempt to break into safes, the statistics of the past year show about the usual number in the jewelry trade, 366 stores having suffered loss in this way, of which 61 were members and it is not surprising, therefore, that we have been called upon to pay \$2,300 in rewards.

This reward was decided upon and adopted by your executive committee after very careful consideration in March, 1905. As a result a number of professionals have been "placed behind the bars" and our members report that in most of these cases it has been the direct cause of the detection and conviction of the burglars. No reward is paid until the member submits evidence of the conviction of the thief and designates to whom the reward shall be paid.

The following itemized list will give in detail the particulars of each case where convictions have been secured and the reward paid: Three hundred and sixty-six cases were reported of petty burglaries; 97 were due to window smashing, mostly at night. Of the 61 Alliance members so attacked, 34 had their windows smashed, and of the 23 rewards paid, 11 were for the conviction of window smashers, all at night after the store was closed.

The great prevalence of window smashing thus shown makes it self-evident that the jeweler is, to say the least, *not careful*, and that many were *very careless* in leaving valuable goods in their show windows after business hours, which naturally attracts those easily tempted and many times is the cause of the attempted burglary. For this reason, which must be apparent to every member who will consider the subject, valuable goods of any kind should not be left in the window out of business hours. Even the display of inexpensive articles has been the direct temptation to break a \$50 window to secure goods not worth \$5.

Hereafter the reward of \$100 will not be paid in any case of window smashing, out of business hours, where goods are displayed in the window.

The usual amount of preventative work has been done, which cannot be given in detail, and warnings have been sent to a number of members regarding plans to rob them, thus enabling them to adopt precautions, which probably saved them from loss.

As mentioned in our annual report, last year, an effort is being made by your Alliance, the American Bankers' Association and the Pinkerton National Detective Agency, to have the following amendment to penal codes of each State of the Union adopted, in order to deter the operation of the so-called "Yegg" vault and safe burglar:

"Burglary with explosives: A person who, with intent to commit burglary, breaks and enters, in the night time, a building in which there is a human being, and commits a burglary by the use of nitro-glycerine, dynamite, gunpowder, or any other high explosive, is guilty of burglary with explosives.

"Burglary with explosives, how punished: Burglary with explosives is punishable by imprisonment in State prison for not less than 25 years and not more than 40 years."

Through our united efforts a bill was recently introduced in the Maryland Legislature, and on April 6, 1906, became a law in that State, and endeavors are now being made to have a similar bill passed in all States.

This bill was quite recently introduced in the New York State Legislature by Assemblyman Wainwright, and it is confidently expected to become a law. It is our opinion that the operations of the "Yegg" burglar will readily be suppressed in the States in which this bill becomes a law.

It is desirable to have this amendment adopted in all States, and each member can assist by conferring with the local bank or banks and uniting with them in an effort to have this done.

The meeting then proceeded to the election of officers, and the following were chosen by an unanimous vote of those present: President, A. K. Sloan; first vice-president, H. H. Butts; second vice-president, C. F. Wood; third vice-president, C. C. Champenois; treasurer, Bernard Karsch; members of executive committee, A. L. Brown, C. C. Champenois and M. L. Bowden.

Henry Untermeyer and Edward S. Smith were reappointed as the auditing committee for the ensuing year.

A vote of thanks was passed to the trade papers for their courtesy and liberality in publishing various items of interest regarding Alliance matters during the past year, and the meeting then adjourned.

The meeting of the executive committee was held after the annual meeting, at which H. H. Butts was re-elected chairman.

The following new members were accepted: Henry Cohen, Richmond, Va.; J. N. Drake, Preston, Minn.; A. O. Gott, Alameda, Cal.; C. W. Havlicek, Crete, Nebr.; J. C. Ladds, Oil City, Pa.; Joseph F. Oyer, Kingfisher, Okla.; Harry Short, New Palestine, Ind.; Nofzinger Jewelry Co., Swanton, O.

The following reward of \$100 was ordered paid:

No. 26. To Officer George Reynolds, for the arrest and conviction of Joseph Yurkosky, who broke into the store of Wallace H. Miller, Uniontown, Pa., and stole three gold watches, which were recovered, and attempted to break into the cash register, when the scratching of the screw-driver with which he was trying to open it attracted the attention of the patrolman and resulted in his arrest and conviction, following which he was sentenced to three years in the Western Penitentiary.

Arritt & Co., Newport News, Va., Make an Assignment After Being Robbed.

NEWPORT NEWS, Va., Jan. 9.—Arritt & Co., 2907 Washington Ave., have made a general assignment to Charles Barclay as trustee for the benefit of the creditors. The news of the failure followed closely on the publication of the fact that the concern had been robbed of money and jewelry, amounting to more than \$6,000, on Christmas night. Owing to this loss Mr. Arritt made a trip north for the purpose of arranging his affairs with the creditors, and the assignment was the result.

The news of the robbery was kept quiet for almost two weeks, and although Pinkerton detectives had worked on the case since Christmas, the local police were not notified until Jan. 7. The thieves, it seems, pried their way into the store with a jimmy, and owing to the fact that there was a screen in front of the safe, were able to break open the doors and get away with cash to the amount of \$2,000 and diamonds and other jewelry worth about \$4,000.

The firm's liabilities are said to be not more than \$10,000, while the assets are reported to be nominally worth about \$7,000. The business of Arritt & Co. is controlled by Everitt F. Arritt, who came here with his brother, B. F. Arritt, from Covington, Va., in May, 1904, and started under the style now used. Owing to his ill-health B. F. Arritt withdrew from the firm and E. F. Arritt continued alone.

Thieves at an early hour one morning last week made an unsuccessful attempt to rob the show window in the store of the G. A. Bahn Optical & Diamond Co., Austin, Tex. The glass window was shattered, but the noise attracted several persons to the scene before the thieves could complete their plans.

FROM MINES TO MARKET

Schmidt Bros. are about to open a store in Redfield, S. Dak.

J. L. Woolford has started in business as an optician in Parsons, Kans.

Morgan D. Wise, optician, Rockford, Ill., recently added a line of jewelry.

Max Newman will shortly begin business at 909 Market St., Philadelphia, Pa.

William M. Sawyer has opened a watch repairing shop on S. State St., near Logan Ave., Belvidere, Ill.

The Hoboken Jewelry & Music Co. has begun business in Chariton, Ia. The owners are C. O. Arnold and Charles Hobson.

The American Wholesalers' Co., Manhattan, was incorporated last week with authority to manufacture watches, charms, chains, etc., with a capital of \$25,000. The incorporators are: A. J. Gulotta, R. R. Purman and J. R. Watts, New York.

The Beresford-Sindera Co. was incorporated last week in New York to deal in diamonds and jewelry, with a capital of \$10,000. The incorporators are: Frank M. Van Wagoner, 467 W. 152d St.; Philip S. Hill, 605 W. 115th St., both of New York and B. L. Mason, East Orange, N. J.

Billy Wolf, traveling representative in Hirsch & Kaiser, San Francisco, Cal., and George A. Dolan, of the same firm, have gone into business for themselves in the manufacture of probus, a preservative paint for the use of jewelers, opticians and photographers. This paint, the makers say, is proof against acids, alkalis, water or climatic conditions. Wolf & Dolan have located their factory at 1459 Broderick St. San Francisco, Cal.

Judson H. Stafford, Troy, N. Y., Goes Into Voluntary Bankruptcy.

UTICA, N. Y., Jan. 12.—Judson H. Stafford, a jeweler at Saratoga, filed a petition in voluntary bankruptcy late to-day, in which he gave his liabilities as \$17,692, of which there is \$16,212 owing merchants and other general creditors. Stafford placed the value of his assets at \$5,601.98. His stock, the bankrupt values at \$5,500, and there are uncollected accounts, said to be good, of \$100, and there is a bank deposit of \$1.08.

Frank M. Colgrove, of Saratoga Springs is a secured creditor for \$250. His security is a mortgage on the fixtures in Stafford's store and the contents of a Summer cottage at Point Breeze, on Saratoga Lake. Stafford's liabilities also include \$1,200 on note and bills due.

Mr. Stafford began business as a member of the firm of Tulmie & Stafford, in 1881. Mr. Tulmie died three years later and since 1887 Mr. Stafford had continued the business alone.

A. A. Marshall, optician, London, Ont. has removed to Chicago.

Recent Decision by General Appraisers on Jewelry and Kindred Lines.

Decisions of the Board of United States General Appraisers, New York, in cases involving duties on jewelry and kindred lines, have been announced in the last week as follows:

ONYX SETTINGS—PRECIOUS STONES.—Protest of Frederies against the assessment of duty by the Collector of Customs at New York. The protest related to onyx cut in the shape of crosses, unset, but suitable for setting into articles of jewelry. On the authority of G. A. 5915 (T. D. 26014) the Board held these articles dutiable as precious stones, cut, but not set, under Par. 435, Tariff Act of 1897, as claimed by the importers.

JEWELRY—SILVER CHATELAINES BAGS.—Protest of A. Van der Laan & Co. against the assessment of duty by the Collector of Customs, New York. The Board held silver chataleine bags to have been properly classified as jewelry under Par. 434 of the Tariff Act of 1897.

TOY JEWELRY—LITHOGRAPHIC PICTURES—TOILETS.—Protest of A. Straus & Co. against the assessment of duty by the Collector of Customs at New York. As claimed by the importers, the Board held: (1) That on the authority of G. A. 6297 (T. D. 27156) and Abstract 10446 (T. D. 27114) that certain necklaces, chains and mirrors were dutiable as toys under Par. 418 of the Tariff Act of 1897; (2) that framed lithographic prints with glass covers, similar to the goods in class 1, G. A. 6064 (T. D. 26446), were dutiable as manufactures of glass or metal; (3) that brass snaps for toy necklaces, similar to those in class 1, G. A. 6330 (T. D. 27255), were dutiable as manufactures of metal under Par. 193, and (4) that toilets comprising a small comb and other articles of horn and a small mirror, contained in a paper case lined with cotton cloth, were dutiable as manufactures of horn under Par. 449 of the Tariff Act of 1897.

JEWELRY—ARTICLES SET WITH GARNETS.—Protest of Jos. G. Darlington & Co. against the assessment of duty by the Collector of Customs at Philadelphia. The protest related to silver chains and to hair clasps, both mounted with garnets. The Board held these goods to have been properly classed as jewelry under Par. 434 of the Tariff Act of 1897.

JEWELRY—SILVER BAGS.—Protest of Jos. G. Darlington & Co. against the assessment of duty by the Collector of Customs at Philadelphia. The protest related to clasps, buckles, chains, pins, belts and collars, all composed of silver. The Board held these goods to have been properly classified as jewelry under Par. 434 of the Tariff Act of 1897.

WATCHES WITH CAP JEWELS.—Protest of Emil Geist against the assessment of duty by the Collector of Customs at St. Paul. Sharretts, General Appraiser: The protest in this case is as follows: "I hereby give you notice that I protest against paying a duty of 35 cents on each of the 24 so-called Rosskopf watches. They have only one top cap jewel and are otherwise unjeweled." At the hearing in the case the importer testified that the so-called cap jewels added nothing to the value of the watches, and were, in fact, glass and not jewels, nor were

they used as pivots, but were superficially set in steel for show. We do not regard this point as essential, inasmuch as Par. 191 provides for all watch movements containing less than seven jewels. The movements in question may or may not contain one jewel; at any rate, they contain less than seven jewels. The protest not pointing out what particular paragraph other than 191 under which duty is claimed, we overrule the same and affirm the Collector's decision.

PLATED PINS.—Protests of G. W. Sheldon & Co. against the assessment of duty by the Collector of Customs at Chicago. The goods were claimed to be dutiable under Par. 188 of the Tariff Act of 1897, relating to pins not plated. Protests overruled, it appearing that the articles in question were plated.

Death of Benjamin S. Many.

Benjamin S. Many, one of the oldest jewelers in the country, died at Red Bank, N. J., yesterday morning, in his 91st year.

Deceased's father and grandfather were born in New York, where he was also born, in Greenwich St., in August, 1816. He went as an apprentice to the jewelry trade in 1830, and two years before the late Charles L. Tiffany started in business he had a business in Ann St., the firm name being Clark & Many. In 1850 he left the manufacturing for the retail trade, and under the firm name of Jackson & Many had a jewelry store at 150 Bowery, corner Broome St. He left here in 1859 and opened a store opposite Ball, Black & Co.'s store, at Broadway and Prince St. The war came on two years later, and in 1862 the firm went out of business.

Mr. Many leaves five children, as well as grandchildren and great grandchildren, his descendants numbering in all 52.

New Officers Elected by the International Silver Co.

MERIDEN, CONN., Jan. 14.—The board of directors of the International Silver Co. held a meeting Saturday to fill the vacancy in the list of officers caused by the death of Samuel Dodd, and the unanimous choice was George H. Wilcox, who had been the first vice-president since the company was formed. George C. Edwards, Bridgeport, was chosen vice-president, to fill the vacancy caused by Mr. Wilcox's promotion; Charles A. Hamilton, of New York, was chosen second vice-president, and C. H. Tibbitts, of Wallingford, third vice-president. C. E. Breckenridge, New York manager, was elected assistant treasurer.

Mr. Wilcox, the new president, was the president of the Meriden Britannia Co., the largest of the constituent companies which were absorbed by the International at the time of its formation. His father, the late Horace C. Wilcox, was the founder of the Meriden Britannia Co.

George C. Wilcox was born in this city Aug. 22, 1856. He prepared for college at Gunnery, in Washington, Conn., and at the Hopkins Grammar School, in New Haven. He was graduated from the Sheffield Scientific School, Yale, in 1875. He has been identified with the First Congregational Church in Meriden, and is a Mason of the Knights Templar degree.

New York Importers of Swiss Watches Advance Prices on Cheaper Grades.

New York importers of Swiss watches in the cheaper grades have in the last week or so advanced prices. Two or three of these importers said that their advances vary from 5 to 10 per cent. Another said that the increase ranges from 5 to 40 cents a watch, which probably amounts to practically the same percentage.

Several importers who handle the higher grades of watches said that they had made no changes in prices. One or two who sell cheaper grades said that they had not put up their prices because they had been selling at a higher figure than others, and that the advances now declared by the latter simply bring about more even conditions in the trade.

Where advances have been declared they have been made necessary, the importers say, by the increased prices which they are obliged to pay to the Swiss manufacturers. The latter in turn, it is explained, have been forced to demand more money for the product by the additional cost of late of the materials employed in manufacture. It is also said that Swiss labor is costing more than it did. The situation is said to be somewhat similar to that of the clock manufacturers in this country; who recently advanced the prices of timepieces about 10 per cent.

The Swiss manufacturers began six months or more ago to put up their prices, and for a time the importers here assumed the extra burden, said one of their number, but the time has now come when they must get higher prices from the retailers in order that there may be a reasonable margin of profit.

The watches chiefly affected are those selling at wholesale from \$1.50 to \$4, having cases of silver, nickel or gun metal. They are generally imported complete, movement and case together.

United States Court Orders Forfeiture of Emeralds Seized from Manuel Suarez.

Manuel Suarez, of the United States of Colombia, who had a quantity of emeralds concealed in his clothing when he arrived in New York early in October from England, has lost his case in the United States Circuit Court, which decided last Saturday that the stones should be forfeited to the United States. There are 218½ carats of the emeralds that are soon to be sold unless Suarez appeals. A quantity of uncut emeralds which he had on arrival were separated from the others and returned to him, because there is no duty on the rough or uncut stones.

Judge Holt says in his opinion that the charge of making a false invoice was not sustained, but that the amended charge of an attempt to evade the payment of duties by not declaring the stones was proved. Counsel for Suarez claimed that under the old Keck decision there could be no smuggling unless the articles were actually carried outside the customs lines. The judge finds that the failure of Suarez to mention the emeralds in response to the questions of the customs inspectors brought the case within that statute.

THE GORHAM COMPANY

PRODUCTIONS IN GOLD.

¶ Recognizing that the popular demand for gold wares of every description is a rapidly growing and an insistent one, the Gorham Company has so increased its goldsmithing facilities that it is amply prepared to meet all requirements in this direction.

¶ The special attention which is paid to its goldsmiths' department enables it, not only to undertake all special commissions, such as Presentation Vases, Loving Cups, etc., but also to offer to the Trade a complete line of such articles as most appropriately represent the very highest achievement of modern goldsmithing.

¶ These include several specially attractive patterns in Men's and Women's Toilet Sets, as well as Manicuring Articles, Cigarette Cases, Match Boxes, Cigar Cutters, Pocket Knives, etc., etc.

38TH ANNIVERSARY NUMBER

In accordance with its regular custom THE JEWELERS' CIRCULAR-WEEKLY will celebrate its anniversary with the issue of February 6.

These yearly specials have become a well-recognized feature, and are anticipated and read with thorough appreciation. The many special articles, the numerous half-tone illustrations and the other unusual features attract the closest attention of the trade, thus offering extraordinary advantages to advertisers. There is no other possible means by which you can circulate your announcement so effectively and at so small cost.

Advertising space in this number should be reserved as soon as possible. All copy for new, and changes for old advertisements must be received by January 28 to insure publication.

South Africa Wants IN an issue of the *Transvaal Leader* received last week in New York is a long article urging the establishment of a diamond-cutting industry in South Africa and claiming that "influential" support for the project has been enlisted in government circles. The plan proposed is to impose an export tax of an English pound (nearly \$5) per carat on rough diamonds in order to give an advantage to stones cut in that country.

It is argued by the South African writer that the United States is now the principal purchaser of diamonds, and that the 10 per cent. duty imposed here on cut diamonds is gradually diverting the industry from Amsterdam and Antwerp to New York. He adds that if there is to be a diversion it should be to South Africa and not to New York.

The papers at Kimberley, Cape Colony, take the attitude that the scheme is visionary and that political reasons in that country stand in the way.

Defaults in the Jewelry Trade in 1906.

NOT only was last year one of the best as far as general business is concerned that the jewelry trade has experienced in over a decade, but there were few years which have made so good a showing as to the failures and defaults of retail merchants, as did this. Altogether the total failures among the dealers in jewelry and clocks for the entire 12 months was reported to number about 158, the total liabilities of these being \$1,416,011, or an average of only \$8,962. How well this compares with previous years is to be seen from the fact that the failures in these lines, as reported by *Dun's Review*, numbered 193 in 1905, with liabilities of \$1,639,554; 216 in 1904, with liabilities of \$1,681,230; 180 in 1903, with liabilities of \$1,381,338; 181 in 1902, with liabilities of \$2,029,481.

An unusually good showing was also made by this trade in the month of Decem-

ber, there being recorded but 14 failures, with liabilities of \$107,631; as against 16 failures in the last month of 1905, with liabilities of \$91,288; 15 failures in December, 1904, with liabilities of \$100,923; 30 failures in December, 1903, with liabilities of \$273,989, and 10 failures in December, 1902, with liabilities of \$132,909.

In this regard it might be mentioned in passing that the year has opened remarkably well, the number of defaults and suspensions so far being below the average and with but very few exceptions were confined to small dealers of little financial strength or no marked reputation for honesty. Altogether, with the financial condition, as indicated by the failures, and the business condition, as indicated by the trade, thus far enjoyed, the year 1907 opens as auspiciously as could be desired.

Proposed Stamping Law for All States.

IN the next issue THE JEWELERS' CIRCULAR-WEEKLY will keep its promise to the trade, made some months ago, by presenting the text of a bill to be introduced in the legislatures of the various States that will so supplement the National Stamping Law introduced by Hon. E. B. Vreeland last year and signed by the President, June 13, as to absolutely perfect and complete the legislation anent the stamping of precious metals in this country.

This bill, which has been drawn with the greatest of care and conforms in every way to the national law, covers, we confidently believe, every essential point that has been raised on the question of legislation since the first fight for a law was made over 13 years ago. The man from whose hands it comes, F. L. Crawford, an attorney who is probably better versed on the question of stamping legislation and its history than any man in the United States, is the author of the present New York gold law and of the national law proposed by THE JEWELERS' CIRCULAR-WEEKLY last year. A careful perusal of the sections will show that the bill covers the question of the marking of gold, silver

ON MEMORANDUM

After the Holiday Clean-out

Your cases need filling up. We will send you on approval anything you want in Diamonds and Diamond Jewelry to fill up. There's no question that prices will go still higher, so you'll be the gainer if you let us know at once just what you need.

Do Your Mounted Diamonds Look as Bright as They Should?

Try setting them in Arch Crowns, which are being used by most of the larger jewelers throughout the country.

Platinum-tipped Arch Crown Mountings are especially desirable, as the tips blend with the surface of the stone and make the diamond seem larger.

Perfect stone setting is assured, as stones are set in the COMPLETED BEARINGS without cutting or filing.

A Postal Will Bring Samples for Your Inspection

ARCH CROWN MFG. CO., 26 Camp St., Newark, N. J.

and plated ware more clearly and carefully than any bill on the statute books in any State at present, and therefore its introduction even into the legislature of those States which already have stamping laws can do no harm whatever.

As the National Law will practically stop interstate commerce in all articles improperly marked as to quality, the purport of this proposed State legislation is to prevent the manufacture and sale within a State of articles which could not be sent beyond the boundary lines of the commonwealth, putting manufacturers and dealers in all parts of the country on an absolutely equal footing.

Owing to the fact that THE CIRCULAR-WEEKLY's proposed law conforms absolutely with the national law and covers the subject thoroughly and justly, the bill should meet with little or no opposition among honest men in any legislature. It is so drafted that no matter when it is passed it will not involve criminal proceedings against the man who has purchased, in good faith, articles made before the date of the Federal statute. We urge upon all readers the necessity of advocating and supporting this bill in every possible way, and also requesting their local organizations to take up, consider and indorse the measure as promptly as possible.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY each day posts in its office a bulletin of the latest buyers visiting New York, which every member of the trade is cordially invited to copy.

- ALBANY, N. Y., O. H. Fasoldt, Ashland.
- BALTIMORE, MD., W. W. Frederick (Stewart & Co.), Navarre.
- CHICAGO, R. A. Kettle (Kettle & Long), Hoffman, S. Caro (G. & S. Caro), Herald Sq.
- CLEVELAND, O., S. S. Samphner, Broadway Central.
- ELMHRA, N. Y., J. Roseman (A. Roseman), Astor House.
- HAMILTON, ONT., J. Levy (Levy Bros. Co.), Victoria.
- HARTFORD, CONN., P. H. Stevens, Union St.
- HOMESTEAD, PA., J. N. Hoffer, Astor House.
- ILION, N. Y., G. H. P. Stone, Broadway Central.
- INDIANAPOLIS, IND., C. G. Smith (Pettis Dry Goods Co.), 2 Walker St.
- JOHNSTOWN, N. Y., G. E. Camm, Albert
- ONEONTA, N. Y., E. D. Lewis, Herald Sq.
- PHILADELPHIA, PA., A. Dilsheimer (A. Dilsheimer & Co.), Astor House.
- PITTSBURG, PA., S. Cerf (S. Cerf & Co.), Astor House, J. R. Reed (J. R. Reed & Co.), Gilsey.
- ROCHESTER, N. Y., J. Kopelwich, Astor House.
- SANDY HILL, N. Y., F. W. Stockton, Grand
- WASHINGTON, D. C., J. H. Diehl (Parker, Bridget & Co.), Breslin.
- WHEELING, W. VA., H. H. Sheff (Sheff Bros.), Navarre.
- WILKES-BARRE, PA., J. Leibson, Marlboro.

A new tower clock to be placed in Casimian Hall, Florence, Mass., has been presented to the citizens of that place by Arthur S. Warner, of New York, in memory of his deceased father, the late John F. Warner, of Florence. The donor in a formal letter to the mayor of Northampton agrees to pay all the expenses incident to the installation of the clock, and also to keep the timepiece in good condition.

New York Notes.

Charles M. Levy, 90 William St., has received a patent on a locket signet ring.

A. E. Tyler will move Feb. 1 from 640 Broadway to 170 Fifth Ave., corner of 22d St.

Byron L. Strasburger, of Byron L. Strasburger & Co., is confined to his home by illness.

David Feiss, representative in the far west and on the coast for Ingomar Goldsmith & Co., is in the city.

Samuel Wallach, formerly of Wallach & Schiele, has been added to the staff of Stern Bros. & Co.

Sol. Bergman, wholesale jeweler, Omaha, Neb., is in New York, the guest of his brother, James Bergman, 37 Maiden Lane.

M. Tushnett, formerly at 693 Wendover Ave., was succeeded recently by Tushnett Bros., who have opened a jewelry factory at 122 Nassau St.

A specific denial was made last week of a report published in a daily paper that control of the Chatham National Bank had passed to F. Augustus Heinze.

M. Michaelson, of M. Michaelson & Co., Montreal, was in the city last week, and sailed Saturday on the *New York* for his annual buying trip in Europe.

Resolutions thanking Herman C. Schwartz, the retiring secretary of the Brotherhood of Traveling Jewelers, are to be engrossed by a committee appointed for that purpose.

Frederick B. Schenck and James V. Lott, who were president and cashier of the Mercantile National Bank, resigned last week and at once assumed similar positions at the Liberty National Bank.

J. H. Ling and J. M. Stewart have formed a partnership, under the style of Ling & Stewart, and will represent, at 68 W. Broadway, the Wayne Cut Glass Co. The store was occupied for some years by the J. B. Owens Pottery Co.

A silver teapot, bearing the date 1776, was dug up last week on the premises of Capt. Nathan P. Hand, Sag Harbor, L. I. A number of silver pieces, apparently of colonial workmanship, have been unearthed in that locality from time to time.

H. F. Huber & Co., 382 Fifth Ave., reported last week that a thief had stolen a large and valuable clock, without being seen by the people of the store. The clock was said to weigh at least 100 pounds, being made of brass with gilded ornamentations.

M. Newhouse, western representative for Schultz, Leiss & Co., 12 John St., is in New York on a business trip. Mr. Newhouse, who has his office in the Columbus Memorial building, Chicago, says that the outlook for 1907 is all that could be desired.

Henry Kryn, of Jac. Kryn & Wauters Bros., diamond cutters, Brooklyn, has been nominated on an independent ticket for governor of the Crescent Athletic Club, in that borough, and a remarkably lively contest is being conducted for and against him. The election will take place Saturday night.

Notice was sent to the trade recently that Julius Caesar & Co., Idar, Germany, have discontinued their branch office at 68 Nassau St., New York, and that Low & Florinzie, 37 Maiden Lane, have succeeded to

the company's American business, the latter firm adding the entire stock of pearls to its own lines.

Miss Esther Berkman, 219 E. 18th St., who last Saturday caused the arrest of Frank Robalowski, 417 E. 60th St., on the charge of stealing \$335, said that she intended to use the money in her business of selling diamonds on commission. The money was stolen from her on the street by a stranger, afterward said to be Robalowski.

Jewel boxes made of cut glass and metal which were imported by A. C. McClurg & Co., Chicago, are subject to 60 per cent. ad valorem duty as jewelry under a decision announced Saturday by the Board of United States General Appraisers, New York. The importers tried to get a 45 per cent. duty under the clauses in the tariff law relating to manufactures of glass and metal.

Samuel Leukowsky, 80 Stanton St., appeared in the Essex Market court last week and testified that the check which bore his name and had been presented by Joseph Dubosar at the State Bank a few days before, was a forgery. Dubosar, who had been employed as clerk in another jeweler's store, was held in \$1,500 bail for the Grand Jury, and was locked up, being unable to furnish a bond.

Creditors of Joseph Fuchs, agent at 62 7th St., who formerly kept a pawnbroker's sales store at 134 Park Row, and who filed a petition in bankruptcy Tuesday of last week, with total liabilities of \$2,293, as noted in the last issue, include Alois Kohn & Co., \$147; A. Schwob, \$249; Korones Bros., \$135; Aisenstein & Woronock, \$284; Kleinberg & Probstein, \$433. Jacob Ruzer is the petitioner's attorney.

Charles L. Trout & Co.'s traveling force for the present year comprises Ira C. Jones, who will travel on the northwest coast; Frank H. Moore, on the southwest coast; Frank C. Shimm, in the middle north; Geo. W. Rowley, south Atlantic coast, and Arthur W. Payne, formerly manager of the E. Howard Clock Co., Chicago, who will cover the southwest territory in the place of F. E. Chase, resigned.

John H. Goodale, for the past 17 years in charge of the repairing shop of Theodore A. Kohn & Son, 321 Fifth Ave., died Jan. 7 at his residence, 474 Marion St., Brooklyn. He was one of the old school of workmen. Coupled with great ingenuity and rare intelligence in the restoration of fine old jewelry, was a conscientious spirit and a loyalty that won and maintained the esteem of his employers and his associates. A widow, one daughter and one son survive.

Twenty-four gold watches of French manufacture were taken from J. Nieves Caballero, who is said to be a South American ranch owner, and who arrived in New York Monday of last week, by Customs Inspector Donohue. The watches were suspended from hooks fastened to two belts which were worn inside the ranchman's clothing. He declared that it had been his intention to take the watches to his home in order to give them to relatives and friends. The inspector allowed him to go but the timepieces were retained.

The store of Abraham Rose, who was a

manufacturer of jewelry and a diamond dealer at 268 Broome St., was closed recently. A number of creditors held a meeting one day last week, at which it was said that Mr. Rose was willing to pay 20 per cent. in settlement of claims. No conclusion was reached. It is said that Mr. Rose owes about \$8,000 and that the stock in the store is of slight value. Mr. Rose is a young man, who has been in business on Broome St. for a couple of years, most of his trade being with East Side brokers.

At the regular monthly meeting of the Board of Directors of the Jewelers Board of Trade, the following firms were unanimously elected to membership: J. F. Braun, New York; W. W. Fulmer, Philadelphia, Pa.; Fox Optical Mfg. Co., Philadelphia, Pa.; Henry Lederer & Bro. Co., Providence, R. I.; Edwin Lowe Gold Plate Co., Providence, R. I.; Morris May & Co., New York; Southbridge Spectacle Mfg. Co., Southbridge, Mass.; Wallenstein, Mayer & Co., Cincinnati, O.; The *Association Jeweler*, Detroit, Mich. (Associated).

A. Henius, of the Bruhl Bros. & Henius Co., recently bought the entire stock of cut diamonds of M. L. Quiros, Jr., in Amsterdam. Because of ill-health, Mr. Quiros decided to give up his cutting and polishing factory and to sell the stock on hand. It happened that Mr. Henius was in Amsterdam at that time and heard of the determination of Mr. Quiros to withdraw from the business, so a sale of the stock in bulk was brought about. Mr. Henius was in New York one day last week and before returning to his home in Providence, confirmed the report of sale, which was one of the largest ever effected in Amsterdam.

Benjamin Raff, 455 Sixth Ave., was called to the West Side Police Court last Wednesday on complaint of Mrs. Jennie La Vezzi, who said the jeweler had sold her for \$4.98 a cigarette case stamped "sterling," the material being, she claimed, a cheap imitation of silver, while she supposed when she made the purchase that it was real silver. At the examination before Magistrate Whitman the jeweler and his clerk explained that they sold the case as "sterline," which is a mixture of metals. The complaint was dismissed, the magistrate suggesting to the complainant that she begin a civil suit. The jeweler said that the cigarette case was sold for \$4.48, and that he offered to exchange it for other goods to the value of the purchase price.

Morris Jones, 120 Sackett St., Brooklyn, was the complainant in the Adams St. Court last week against Francis Calabro, of 71 Sackett St., who had been arrested on a charge of larceny. Mr. Jones says that he recognizes Calabro as a young man who visited his store on several occasions during the last few weeks. The first visit was to have a stone set in a ring. Later the young man returned and asked that another stone be set to replace the first gem, which had been split. When he returned for the ring, a few days later, the young man said that he thought something of buying a diamond engagement ring. Mr. Jones took from the window a tray containing 35 rings, including diamonds, garnets and opals, etc. The young man seized the tray and, dashing to the street, disappeared. Calabro was

New York Notes.

(Continued from page 57.)

held by Magistrate Geismar in \$2,000 bail for further examination. The rings have not been found.

Emanuel Jacobson, of Jacobson Bros., has returned from Europe.

Herbert K. Smith, Lawrence, L. I., last week filed a voluntary petition in bankruptcy. The schedules show debts amounting to \$6,079 and assets of \$196.45. The business with which Mr. Smith is now connected is not affected by this proceeding.

When B. Eypel, who is located at 28 Jackson Ave., Long Island City, opened his store Monday morning he found that burglars had cut a hole in the back of his safe and carried off diamonds and jewelry valued at \$1,500. The robbery is believed to have been the work of expert cracksmen, who were provided with the most up-to-date tools.

Charles T. Dougherty withdrew this week as vice-president of William L. Sexton & Co., 7 Maiden Lane, in order to engage in a new line of business, outside the jewelry trade. He has been for 20 years with the company, traveling extensively during that time, so that he is widely known. George A. Briggs, who has been the company's city salesman in the last year, was chosen vice-president to succeed Mr. Dougherty.

An outside show case belonging to the Cohn Mfg. Co., at 59 Nassau St., was rifled yesterday between 9:30 A. M. and 12 noon, and a quantity of gold bracelets and gold-mounted combs, valued at \$100, was stolen. A cut glass bowl in the same case was left behind by the thieves. The thieves forced open the lock of the door of the case. Many people are passing constantly, the location being close to the corner of Maiden Lane. Detectives are working on the case.

Reports published in some of the daily papers to the effect that the new Jagersfontein Mining & Exploration Co.'s diamonds had been advanced 10 per cent. in price in the rough to an average of 77 shillings a carat were not confirmed yesterday by the New York dealers who buy the stones in the rough. If there has been an advance these houses have not been notified, and they say that this would be strange, as they have always had the first notices received in this country of advances. They cannot say that there really has been no advance such as the papers report, but their opinion is that the story is a canard, pure and simple.

Louis H. Cohn, who for 45 years has traveled in the southern territory for jewelry houses, the last 28 years with Adolph Goldsmith & Son, 68 Nassau St., recently retired, intending to enjoy a period of rest earned by so many years of activity, and he has made his home with his brother, William E. Cohn, of the Cohn Mfg. Co., 59 Nassau St. A handsome silver loving cup, standing 20 inches high and bearing a suitable inscription, was presented Saturday by Adolph Goldsmith & Son to their retiring salesman. Accompanying the cup was a letter from the company, testifying to the high regard in which Mr. Cohn was held by the firm.

Harry Perine, 35 Third Place, Brooklyn,

appeared in the Central Market Police Court, Manhattan, last Friday to answer a complaint made by Clarke Bros., brokers, in the Tribune building. They claimed that they had cashed two checks for Mr. Perine, aggregating \$1,000, drawn on the Union Bank of Brooklyn, which subsequently refused payment. Mr. Perine said several times he had given checks to Clarke Bros., when he had not the money in the bank, and that the brokers, according to agreement held the checks until he had deposited the funds required. In return for this favor, he claimed, he paid a special rate of interest. In the case of the checks in controversy he said that it had been his intention to meet them in a similar manner, but that the brokers were too hasty in asking for the cash. No decision was reached in the case.

The store conducted at 5617 Third Ave., Brooklyn, under the name of H. Sjöberg passed several days ago into the possession of Isaac N. Sievwright as the receiver appointed by the United States District Court in the bankruptcy proceedings brought by creditors. The ownership of the store has been attributed at times to Mrs. Helga Sjöberg, and at other times to the husband, C. H. Sjöberg. The creditors have not been able to learn the present whereabouts of either since the troubles began, as noted in last week's issue, but it has been reported that they are now in Norway. Oscar Friedholm, 306 7th St., who was in charge of the store when the creditors started proceedings, said that he had been engaged a few weeks before at a salary of \$30 a week. Prior to that time he had been a carpenter. When the jeweler went away, early in December, he said that he would be back in two weeks. An inventory is being made and articles left for repair are to be returned on proof of ownership. It is said, however, that many articles left by customers are missing, including some pieces of jewelry of considerable value. The liabilities are said to be over \$50,000.

No nominations have yet been officially announced for the annual election of officers of the Jewelers' Club of Philadelphia, to be held next month. Nominations were made at the meeting last week. Those nominated were notified, but it was foreseen that many of them would decline, especially since there appeared to be a disposition to make a fight for the elections. The presidential nominees, so far as can be learned, are J. Warner Hutchins, Philadelphia, and Harry Larter, of Larter & Son, New York. A. G. Lee, of the Imperial Cut Glass Co., Wayne Junction, this city, together with Henry Bodenheimer, of Fink, Bodenheimer & Co., was nominated for the vice-presidency. Mr. Lee has since withdrawn, believing that inasmuch as he has been vice-president for three years that it is proper to withdraw in favor of another candidate, especially one as popular as Mr. Bodenheimer. A. J. Le Jambre, the present secretary of the club, seems at present to have the call, and will probably be re-elected. William H. Long, the treasurer, is unopposed for re-election. There is considerable of a contest for election to the board of governors. The club officials are waiting to hear whether all the nominees mean to stand or whether some will withdraw.

Trans-Atlantic Voyagers.

TO EUROPE.

M. Goodfriend, of Goodfriend Bros., sailed recently on *La Provence*.

A. Max Holzheimer, of the Chicago office of the Omega Watch Co., sailed recently.

M. Michalson, of M. Michalson & Son, Montreal, sailed Saturday on the *New York*.

F. Goldsmith, of Ingomar, Goldsmith & Co., New York, sailed Jan. 5 on the *St. Paul*.

Frank Glaenger, of Glaenger & Co., New York, sailed recently on the *Kronprinz Wilhelm*.

N. J. Weil, New York, accompanied by his wife and child, sailed recently on the *Lucania*.

B. Konijn and L. D. Frank, of Konijn, Frank & Shire, New York, sailed Jan. 5 on the *Amerika*.

Sailing Jan. 8 on the *Kaiser Wilhelm II.* were Abel King, of Emrich, King & Schorsch, New York; B. H. Davis, of B. H. Davis & Co., and wife, New York; Harry S. Morris, of the S. Cottle Co., New York; D. De Sola Mendes, of the De Sola Mendes Co., New York.

FROM EUROPE.

Emanuel Jacobson, of Jacobson Bros., New York, returned recently on the *Teutonic*.

Returning recently on the *Kaiser Wilhelm II.* were Albert Lorsch, of Albert Lorsch & Co., New York, and Mrs. Lorsch; also William Hoehster, of Rice & Hoehster.

Trade Gossip.

The Forman Co., New York, recently compiled and published an attractive booklet, containing photographs of several of its signs in metal and wood. The outside front cover is of heavy glazed paper, and is artistically decorated with a lion seal in silver on a buff and white background. The illustrations shown on the inside of the 24 pages have been carefully selected.

The Navy is a new monthly publication, which makes its initial bow with the January number, and does so with a degree of grace that promises well for its future. The new monthly will be devoted to the interests of the United States naval service and to the discussion of international questions affecting American interests and American foreign policy, thereby offering something that within these limits is not provided by any other publication. While many of the articles will necessarily treat of technical matters, it is announced that the treatment will be such as to appeal to all. The human side of life aboard ship is not to be overlooked, and trade questions will naturally be of importance. It may be said that the jeweler and the silversmith furnishing a part of the supplies aboard ship, especially those of an ornamental character, join with the other classes of business men in having an especial interest in naval developments. The illustrations are strong features of the first issue, which is handsomely printed. Among the articles is a timely one on "The Key to the Open Door, the Philippines," written by Benj. Baker. The new monthly will be of special value to advertisers seeking to reach the men of the navy.

Providence.

Among buyers in town last week were S. Cerf of Pittsburg, H. Bloomfield of Montreal, Mr. Hervitz, of Rochester, and C. Meister of Pittsburg.

A. A. Remington was last week elected chairman of the executive committee of the Pomham Club, while E. B. Hough and Walter S. Hough also received committee places.

Everett I. Rogers was recently elected one of the board of directors of the United National Bank, and Dutee Wilcox was elected to a similar position in the National Bank of Commerce.

Theodore W. Foster, who was appointed by Gov. Utter one of the Rhode Island delegates to attend the conference at Washington, D. C., for the consideration of ways and means for developing our export trade, left Saturday with the other delegates.

The William A. Read Co., successor to Read & Lincoln, Chestnut St., has taken out articles of incorporation, the amount of capital stock being placed at \$25,000. The incorporators are William A. Read, Thomas S. Jackson and John Wright. The concern will remain in its present location.

An incident a bit out of the ordinary occurred at the office of D. Wilcox & Co., Saturday afternoon, when Harvey J. Flint was presented with a loving cup which had been suitably inscribed. Mr. Flint has resigned his position with the firm in order, it is understood, to engage in business for himself in the jewelry line.

Formal notices were recently sent to the creditors of the Newell & Fisher Mfg. Co., announcing that the composition agreement offered by its firm had been accepted by all creditors, and that Lewis A. Waterman, the assignee, had under the terms of this agreement transferred to the firm the assets which were held by him.

At a recent meeting of the Jewelry Workers' Union the following officers were nominated for the ensuing year: President, Albert Fournier; vice-president, Mr. Stalk; recording corresponding secretary, Edward J. O'Connors; financial secretary, E. McDonald; treasurer, Mr. Murphy; executive board, George E. Brady, John Moran, Joseph Fish, William Alverson, William Arnold and Mr. Meehan; trustees, George E. Brady, Mr. Murphy and William Earle; auditors, John Moran, Joseph Fiske and Mr. Folke.

Nicole Bellaman, a young Italian, was arrested in the jewelry shop of Julius Eichenberg, 31 Mathewson St., Sunday night by police of the Central Station. Mr. Eichenberg had occasion to visit the shop, and on coming out noticed that the door had been tampered with. He promptly notified the police. They visited the place, found the Italian there and placed him under arrest. On his person a quantity of jewelry valued at about \$12.50 was found. He was arraigned Monday in the Sixth District Court before Judge Lee. He pleaded guilty and was held in \$1,000 for the Grand Jury.

Charles A. Champlin, the East Providence Town Councilman who died last Friday as a result of injuries received by falling from a staging nearly a month ago, was at one time identified with the jewelry trade. He was born Nov. 6, 1863, and after receiving

his early education learned the jewelry trade, remaining in it for some time. He withdrew from it to start a stable, later sold the latter and entered the jewelry business again. About two years ago he left the jewelry business to form the contracting firm of J. Henry Champlin & Co. It was while he was at work at his calling that he received the injury which resulted fatally.

In the Superior Court recently J. G. Fuller appeared to bring an action against Frederick E. Perkins and others, trustees of the estate of Charles E. Perkins, as the result of certain stock transactions. The case came before Judge Brown, and it appeared from the evidence that Mr. Fuller had given a note for \$6,500 to Charles E. Perkins to enable him to carry on the business of the J. G. Fuller Co. As collateral he put up 185 shares of stock in the company. After Mr. Perkins' death the company went into liquidation, and it is alleged that one of the defendants informed Mr. Fuller that the 185 shares were not enough to cover the note, and asked him to give up the 65 remaining shares that he held. He asserts that it was stipulated that if this was done he would be given all the surplus over and above the value of the stock as compared with the note. This agreement, he alleges, has not been carried out.

Connecticut.

Wm. H. White has been elected treasurer of the New England Watch Co., Waterbury.

The International Silver Co. recently sold to M. R. Budd a parcel of real estate near the corner of Broad and Pratt Sts., in Meriden.

O. E. Rudolph, New Haven, is convalescent, after having been confined to his home for several days with a serious attack of influenza.

Henry Hutchinson, at one time a well-known clockmaker in the State of Connecticut, died Wednesday at his home, in Bristol, of heart disease.

Edward T. Abbott, superintendent of the International Silver Co., Bridgeport, was the guest, on Sunday of last week, of W. N. Haskell, of Danbury.

E. Bliss, of the A. E. Bliss Co., Meriden, who formerly looked after the interests of the concern in New York, has decided to take up his residence in Meriden.

Representative James G. Woodruff, who is also president of the Wm. L. Gilbert Clock Co., Winsted, was unable to attend the opening session of the General Assembly in Hartford, owing to a severe attack of rheumatism.

Enoch Leigh, for many years in the employ of the Meriden Britannia Co., died recently at his home in Hartford, aged 82 years. The deceased was a native of Staffordshire, Eng., and was well known as an expert engraver.

One of the store houses of the Seth Thomas Clock Co., Thomaston, is being removed and the building shortened in order to make room for the sidewalk, which is necessary, owing to the laying of a trolley line into Thomaston.

Dana Redmond, formerly of Wallingford, has taken over his father's business, consisting of the National Jewelry Co. and the McKenney Jewelry Co., both of Portland.

Me.; the H. M. Hill Co., of Lynn, Mass., and the A. R. Hill Co., of Amsterdam, N. Y.

The building now occupied by the Ford Co., New Haven, has been sold to a railroad company and will be taken over Feb. 1. The jewelers have leased a large and spacious store in the Knights of Columbus building, between Temple and College Sts.

Clifford W. Leavenworth has been elected a member of the Board of School Visitors in Wallingford to fill the vacancy caused by the death of Judge L. M. Hubbard. Mr. Leavenworth is treasurer of the R. Wallace & Sons Mfg. Co., and president of the Wallingford Co., Inc.

W. E. Sessions, president of the Sessions Clock Co., Forestville, who was at the head of a movement to organize a company to be known as the Bristol Trust Co., to engage in a general banking and trust business, has engaged F. A. Beach, of Middletown, to take charge of the new institution.

George M. Hallenbeck, who is in charge of the plant of the S. L. & G. H. Rogers Silver Co., in Wallingford, is one of those at the head of a movement to have the company reorganized. It is alleged by Mr. Hallenbeck and others that the Hartford factory is not conducted profitably, while the Wallingford plant pays well. A meeting of the company will be held in Portland, Me., Jan. 26, when an effort will be made to elect new officers. In the plan of reorganization as outlined by Mr. Hallenbeck it is proposed to make the concern a Connecticut corporation instead of a Maine corporation, as it is at the present time.

At a largely attended meeting of the members of the Employes' Aid Association of the Waterbury Clock Co. in Concordia Hall, Waterbury, recently, the annual reports were read, after which officers were elected for the coming year. By the report it was shown that over \$3,000 in benefits had been paid out during the past year to those members who have been unable to work on account of accident or sickness. Ninety-three members have been added in the year just passed, making the total membership 626. At the close of the regular business a social session was held. The committee in charge of the annual dance and concert to be given at the Auditorium Thursday, Jan. 24, reported a large sale of tickets, and there is every reason to believe that a large attendance will be on hand.

Included among the National bank directors elected in New Haven on Tuesday of last week are: Gen. George H. Ford, Merchants' Bank; Chas. T. Dodd, elected to succeed his father, the late Samuel Dodd, at the Home Bank, Meriden; C. W. Bradley, C. B. Rogers and W. H. Lyon, First National, Meriden; Walter Hubbard, Edward Miller, George M. Curtis and B. W. Collins, Home Bank, Meriden; George H. Wilder, Meriden National; George M. Landers, New Britain National; Albert T. Judd, Frank A. Wallace, C. H. Tibbetts, W. H. Newton, G. M. Hallenbeck, C. W. Leavenworth and W. H. Edsal, First National, Wallingford; George E. Edwards, City National, Bridgeport; H. L. Wade and Henry S. Chase, Waterbury National; Henry S. Chase, New Haven National Bank; Charles D. Morris was elected second vice-president of the Dime Savings Bank in Wallingford.

Philadelphia.

B. Brunstein, watchmaker, 508 Mifflin St., has resigned his position with G. Garfinkle & Co.

Marcus Golden, watchmaker, has resigned his position with Riggs & Bro., 3d and Market Sts.

John A. Large, 4618 Lancaster Ave., is making extensive alterations and improvements in his store.

Karl Kempter, 429 Poplar St., is receiving the condolences of the trade owing to the death last week of his mother.

Peter Lane, Jr., widely known as a Republican politician, who died last week at Atlantic City, was at one time in the jewelry business.

William Gibbons, retailer, 40th and Market Sts., departed Saturday for a pleasure trip to Bermuda to recuperate from the strain of the holiday trade.

Gus Lanz, Jr., son of Gus Lanz, Norris-town, is reported to be preparing to open an optical store as an adjunct to his father's retail store. The two stores will adjoin.

Among the out-of-town retailers in the city purchasing stock during the past week were: E. Allez, Millville, N. J.; E. K. Bean, Lansdale, Pa.; J. W. Parrish, Newark, Del.

The American Pearl Mfg. Co. made formal announcement last week that Sigmund M. Rosin and Julius Rosin have been admitted to partnership in the firm, beginning Jan. 1.

About 30 members of the Jewelers' Club of this city have accepted invitations to attend the annual banquet of the 24-Karat Club in New York City. They will go to New York in a body.

The retail store of J. L. Josse, 1218 N. 9th St., was visited by thieves early Monday morning. The show case was smashed and a quantity of watch cases and chains were stolen. Six weeks ago the place was robbed in a similar manner.

S. J. Schless, who has retail stores on 7th St. above Market St., has leased the store at 909 Market St., in the most congested shopping district, and is making elaborate improvements in the nature of new fixtures, etc., with a view of opening this as an additional branch about the middle of next month.

The entire stock of M. Hamberg's retail store at 2013 Orthodox St., Frankford, was disposed of at public auction last week at the auction rooms of Freeman & Sons, 12th and Walnut Sts. Mr. Hamburg retires from business. The stock included gold and silver watches, a large stock of locks and all kinds of jewelry as well as 50 repaired watches.

The annual report of Superintendent Lanis of the Philadelphia mint, made public last week, shows unusual activity in gold coinage for 1906. There were 5,760,000 pieces, representing \$20,187,583.33, coined. His output establishes a new record for the mint in this city. The large demand for gold coins was caused by the scarcity of small notes. Not a single silver dollar was coined.

J. Warner Hutchins, 728 Sansom St., left Monday for Harrisburg to attend the inaugural ceremonies of Governor Stuart. Mr. Hutchins accompanied a number of

members of the Union League who went to the State capital to honor their former president. Mr. Hutchins addressed a large gathering at the rooms of the Sunday Breakfast Association, a charitable organization for the reclaiming of wrecked men Sunday evening.

Max Newman, watchmaker, formerly with J. E. Caldwell & Co., of this city, who left here to accept a position at El Paso, Tex., has notified his friends in the trade here that he is now in Mexico City, where he has secured an excellent position with a prominent American jeweler, A. C. Smith. Mr. Newman reports that there is a great field for young watchmakers in the southwest and in Mexico, especially those who come with good recommendations from leading eastern retailers.

F. L. Wood, with the Bailey, Banks & Biddle Co., who has been a chum of Francis X. De Lone, the young man who mysteriously disappeared in the Park last week, and the horse which he had been riding, as was his afternoon custom, found running at large, is bending all his efforts to endeavor to clear up the mystery and is giving the police and the detectives all the assistance in his power. The belief gains ground that Mr. De Lone, who was wealthy, was thrown by his horse into the Schuylkill River and drowned.

The Bailey, Banks & Biddle Co. made the gold baton which was presented at the inaugural ceremonies at Harrisburg Tuesday of last week to William S. Vare, chief marshal of the South Philadelphians, who paraded in honor of Governor Stuart, one of their neighbors. The baton was of original design and a costly as well as an artistic souvenir of the occasion and a tribute to Mr. Vare, whose efforts were bent to have the neighbors of the new Governor do him the greatest possible honor on the occasion of his inauguration.

The Bailey, Banks & Biddle Co. offered a reward last week of \$500 for the return of several valuable gold mesh bags left recently by a young society woman, one of their best patrons, on a train. The lost jewelry is valued at \$2,000. It consisted of one gold chain mesh purse, and three gold chain mesh bags. All were set with precious stones. The articles had been sent to her on approval. She was not satisfied with them and started to return to town with them from Germantown. While she was entrained the package was lost. The Bailey, Banks & Biddle Co. refused to divulge the name of the woman who lost the articles.

The annual meeting of the stockholders of the Keystone Watch Case Co., Friday of next week, will be of especial interest to the trade, since a director will probably be chosen to succeed Amos R. Little, who died recently, and who was a financier of note and also a member of the Bailey, Banks & Biddle Co., but in both the capacity of a silent partner. In addition the stockholders will be called upon to approve of the recommendations of the board of directors that a portion of the real estate now owned by the company on Wylie St. above 19th St. be sold. The company has recently made extensive improvements to its establishment, and has no longer any need for the property in question.

North Attleboro.

J. J. Sommer has returned from a western trip.

John H. Peckham will be a candidate for the Board of Selectmen.

John E. Tweedy has returned from an extended visit to New York.

M. Sickles, of M. Sickles & Co., Philadelphia, was the guest, last week, of G. Herbert French.

Frank A. Brown was honored, last week, by election as president of the New England aerie of Eagles.

At the meeting of the Republican town committee Wednesday, Frank G. Pate was chosen chairman and George G. Wheeler secretary.

The W. & S. Blackinton Co. as a corporation purchased at public auction on Saturday noon the 285 shares formerly owned by Louis A. Blackinton. The sale was to satisfy indebtedness to the concern.

Joseph L. Sweet, William H. Riley, Fred E. Sturdy, Walter B. Ballou, George K. Webster, Fred A. Howard, E. A. Coddling, John P. Bonnett and Woodbury Melcher were elected directors of the Jewelers' National Bank last week.

As a testimonial of their appreciation of the excellent work accomplished by the firemen at the Thompson & Remington fire last week the following concerns have raised a fund for the relief association: Maintain Bros. & Elliot, Scofield, Melcher & Scofield, Thompson & Remington, Robinson Bros., Plainville Stock Co. and Whiting & Davis.

The H. F. Barrows Co. is having its new factory pushed forward rapidly. There will be two big wings, one 130 feet long, while the other will extend back 170 feet. Where they join will be located the office of the concern, to be a two-story structure. The Seth Thomas Clock Co. has been given the contract to place a big clock on the office section of the building.

A jobber who intends making an extended trip through South America has been endeavoring during the past few weeks to impress upon the local manufacturers of the wide and fertile field that lies before them in the southern continent. Without exception the makers of the high-class goods were of the opinion that while in some future day the coast cities of South America may provide a prosperous business, the time is not ripe for making any concerted and determined effort to open the markets. Manufacturers of the cheaper grades of jewelry expect to be able to do something in that direction.

Baltimore.

Louis Freeman, who claimed to be a jewelry salesman from Washington, was fined \$50 in the Central police station in this city, recently, on a charge of creating disorder on a crowded passenger train from Washington. He was released upon payment of the fine.

Maurice L. Reeder has brought suit in the Court of Common Pleas against Arthur C. Fry for alleged slander, claiming \$10,000 damages. The plaintiff alleges that Mr. Fry called him a thief during a dispute about a piece of jewelry which Mr. Fry purchased from him.

Lancaster, Pa.

Emil Marks has gone to Pittsburg to take a position as engraver.

H. Z. Rhoads, Lancaster's oldest jeweler, is confined to his house by illness.

George R. Weber, of Louis Weber & Son, is confined to the house by illness.

Henry Weeber, who has been ill, expects to return to his store before the end of another week.

William J. O'Connor, formerly of Lancaster, now a Cincinnati jeweler, is visiting relatives here.

Clarence Halbach, of Lancaster, has taken a position as watchmaker with E. G. Hoover, Harrisburg, Pa.

L. C. Reisner has moved his office to Millersville, near Lancaster. Mr. Reisner visited New York last week.

Eugene H. Keller has recovered from the effects of a serious accident which occurred a couple of weeks ago.

Vernon T. Stevens, of the Ezra F. Bowman Technical School, has gone to his home, Covington, Mass., on a visit.

B. Frank Hershey, with John B. Roth, Jr., acted as master of ceremonies at last Friday night's big ball at Hotel Rossmere.

Michael Lang, late a traveling salesman with Charles P. Goldsmith & Co., has taken a similar position with the H. S. Meiskey Co.

The annual banquet of the Lancaster Board of Trade, Jan. 10, was attended by T. Wilson Dubbs, S. Kurtz Zook and A. F. Moyer.

Logan White, engraver with G. William Reisner, is on the sick list with la grippe. Elmer P. Shertzer, jeweler for T. Wilson Dubbs, is also ill with the same disease.

Daniel Weaver, for a number of years proprietor of a jewelry store at Fairmount, but now residing in Iowa, is spending several weeks among old friends at Vogansville.

Fred. A. Wheeler, of the Non-Retailing Co., has started on a western trip. E. R. Kant and Charles Foose, traveling representatives of the same house, with their wives, have just returned home from a visit to New York.

A handsome solid brass altar cross recently presented to Christ Lutheran Church, Elizabethtown, by H. W. Lewis, president of the Farmers' and Merchants' National Bank, Philadelphia, was furnished by Augustus Rhoads, of this city.

A man claiming to be Charles Grumbine, Philadelphia, was arrested last week for attempting to dispose of a quantity of solid silver ware at suspiciously low prices. He was held a couple of days in the belief that he had stolen the articles, but as nothing was found against him he was discharged.

Among the jewelers who recently visited Lancaster were: H. L. Oberlin, of Howard L. Oberlin & Bro.; H. C. Fohl and M. Kaufhold, of Kaufhold & Brubaker, Columbia; E. P. Zane, Christiana; A. T. Heberling, Parkersbury; S. H. Miller, Mt. Joy; R. S. Gitt, Harrisburg; John Eimerbrink, York; J. A. Kirk, Quarryville; H. S. Landes, Fredericksburg, Mo.; Jacob Esch, Intercourse.

The manager of George F. Blakeslee's jewelry store at Tonopah, Nev., which was robbed in a daring manner on the evening of Dec. 31, as told in last issue, is

James E. Ziegler, formerly of this city, where he was employed by John B. Roth. Last February he took a position with Mr. Blakeby as a manufacturing jeweler, and when Mr. Blakeslee became ill he made Mr. Ziegler manager.

Syracuse.

About \$400 has been collected by the trustee of Wm. D. Oertel, who was forced into bankruptcy some time ago. An order of distribution has been made.

At the meeting of the Day Time Register Co., held recently, all the directors but two resigned, and new ones were chosen. The board then elected Geo. W. Fairchild, president; W. M. Rockwell, vice-president; A. W. Lord, secretary; and Harlow E. Bundy, treasurer and general manager. These changes are the result of the purchase of the concern by the International Time Recording Co., of New York.

Creditors of the Benedict Co. received 40 cents on their claims under a composition arranged by persons who settled the liabilities and reorganized the business at East Syracuse. Among the company's creditors which received 40 cents on a dollar upon promissory notes of the company, indorsed by Harry L. Benedict were several banks. These banks have now filed claims on the same notes against Harry L. Benedict's estate, and they claim that they should be entitled to share pro rata with other creditors of Mr. Benedict. Objections have been filed to the banks participating in this estate. Should the banks be excluded, the creditors will get about 20 per cent., but if the banks are entitled to come in the dividend will be greatly depreciated. Referee Stone has reserved his decision.

Boston.

L. R. Sancton, formerly in the suburb of Hyde Park, has removed to Moncton, N. B., to engage in business.

Charles H. Crump, of Shreve, Crump & Low Co., has returned from a recreation trip after the holidays to Claremont, N. J.

Mr. Carl, formerly with J. L. Williamson, of this city, has taken a position as watchmaker with A. W. Flye, Gloucester, Mass.

The date of the Boston Jewelers' Club's annual dinner will be Feb. 12, and it has been decided to have the gathering at Young's hotel this year. A number of prominent speakers will address the club.

The E. Howard Clock Co. recently installed a four-dial illuminated clock in the new custom-house and postoffice building at Richmond, Ky.; also a quarter-hour chiming tower clock for St. Paul's Presbyterian church at Hamilton, Ont.

At the annual meeting of the Waltham Watch Factory Mutual Relief Association, held in Waltham recently, the old officers were re-elected as follows: President, W. M. Fuller; vice-president, W. R. Sawtelle; treasurer, Leonard C. Lane; secretary, Miss S. F. Ray. The report of President Fuller showed that nearly \$7,000 had been paid out in benefits.

Joseph Duckat, Rahway, N. J., has given a chattel mortgage for \$1,000.

Pittsburg.

Joseph C. Wasson, of the Joseph Horne Co., is home from New York, where he bought Spring stock.

J. T. Kirtland and E. J. Garsia, who recently joined the traveling force of the W. J. Johnston Co., to cover southern territory, spent a few days last week in Pittsburg and started out on the road Monday.

The store of M. Harris at Mahoningtown was entered one night last week and a number of watches, a quantity of jewelry and other goods were stolen. Part of the plunder was found back of a barn near the store.

The bankrupt stock of Davis Bros., at Galion, O., bought by the Marsh, Brown Mather Co. of this city, will be disposed of within a few days by the latter. This house is enlarging its Pittsburg quarters adding an additional room, new fixtures and two new safes.

The members of the Bloomfield Board of Trade met last week and elected F. J. Porter president; H. E. Juergens, secretary and J. J. Danes, treasurer. The Merchant and Manufacturers' Association gave a banquet Monday of last week, which was attended by a number of jewelers.

Among the out-of-town merchants visiting Pittsburg last week were the following: W. H. Bowser, Ford City; F. R. Brock, Donora; B. E. Brown, St. Marys; T. H. McNary, Washington; Mr. Furtwangler, Greensburg; E. F. Price, Homestead; H. C. Morrison, Mt. Morris; R. V. Marshall, Freeport.

Edward Doe, Newark, O., was in Pittsburg last week buying Spring stock, the first time he ever came here for that purpose. Local wholesalers say that merchant east and west of Pittsburg for hundreds of miles are coming here to buy goods, because of the excellent selections kept and because shipments are being made more rapidly from this district than from many other sections of the country.

S. W. McKinley, aged 34, a son of Samuel McKinley, the first jeweler who ever did business at Washington, Pa., died Monday of last week at his home in Turtle Creek, Pa., near Pittsburg. The deceased was also engaged at one time in the jewelry business and was well known. At the time of his death he was a shipping clerk for the Westinghouse Electric & Mfg. Co. and was a member of the Second Presbyterian Church of Washington. Mr. McKinley is survived by a widow and one child.

Erma Kingsbacher, the daughter of Morris Kingsbacher, of Kingsbacher Bros., was married early last week to Ernest William Stix, of St. Louis, in the ballroom of the Hotel Schenley, the wedding being one of the most brilliant society events of the present season. The bride is a graduate of Bryn Mawr of the class of '06. The ceremony was performed by the Rev. Dr. J. Leonard Levy. Paul Tremman, of St. Louis, was best man, and Miss May Goldsboro, of the same city, was maid of honor. Mr. and Mrs. Stix started for California on their wedding trip, and on their return will live in St. Louis.

D. A. Curtis has sold his store in Knoxville, Ia., to Luke & Smith.

Newark.

Slight damage was caused recently by a fire in the store of F. Paparozza, 99 Seventh Ave.

Employees of the New York Standard Watch Co., Jersey City, will give their annual reception Feb. 1, in Columbia Hall. It is expected that nearly 1,000 persons will be present.

Among the buildings completed this winter is the new jewelry factory of L. A. Meyer, Jr., at 1th Ave. and Ogden St., and the new factory of Strobell & Crane, Orchard St. The latter building stands on a site 50 by 125 feet, is four stories high, and cost about \$30,000.

Water pipes in the third floor of the jewelry factory of Charles A. Becker & Co., 829 Broad St., broke early Tuesday morning of last week, and the water flooded through the building. A passing policeman saw the dripping water and summoned a fireman, who shut off the service.

Henry Berlovitz, Paterson, last week offered to turn his stock over to his creditors, and it is understood that they will accept the proposition. He began business at 242 Main St., in that city, a few months ago. Prior to that time he had been a member of a firm at Newburg, N. Y.

Leo Slonim, Plainfield, who was robbed and was shot in the arm by a burglar, on the evening of Dec. 3, has made an inventory of his stock and places his loss at \$585. While Mr. Slonim was struggling with the burglars diamonds were scattered and some of them have been lost. The man who is accused of the crime is now being held by the Elizabeth authorities.

The assembling room of the Trenton Watch Co., at Trenton, was started in operation last week, and it is said that work will soon begin in the other departments. The business is now being conducted by the two receivers, John M. Cutter and Lewis A. Thompson, as noted in last week's issue. It was said at the factory that there are 46,000 watches in hand, and of these 23,000 have reached the assembling room.

A bold robbery took place between eight and nine o'clock Saturday night at the jewelry store of Benjamin F. Spink, 675 Broad St. While crowds were passing, a thief or thieves pried open a show case near the front door and got away, unobserved, with a velvet pad having on it between five and six dozen lodge emblems made in the form of watch charms. They are valued at \$100. The manager examined the show case at eight o'clock and found it all right. At nine o'clock when he looked at it again its two locks were broken and the door was open.

Allsopp Bros., last week, received an odd check drawn by F. Dientsbier & Co., St. Louis, for \$229.74, the peculiarity consisting in the fact that the order was written on the back of a common white linen cuff. The check was drawn on the National Bank of Commerce of St. Louis, and as the signature of the drawer was well known in the banks there was no trouble about the Newark firm getting the cash just as readily as if the order had been drawn on the regular printed form. Mr. Dientsbier is an old customer of the Newark firm and, being

a man of jolly temperament, enjoys an occasional joke. At the local bank, where the check was deposited, it was said that various freak orders had been received on clam shells, soles of shoes and other unexpected articles, but never before for so large an amount.

Attleboro.

TRADE CONDITIONS.

Representatives of the leading jewelry concerns declare that all the indications point to a remarkably busy year. They assert that there has never been a period so active as the past year, and many are making tentative plans for increasing their floor space and facilities.

The Peole Silver Co., Taunton, has resumed operations after annual stock taking.

William H. Blake, of the James E. Blake Co., will leave for the West with his samples in a few days.

The employees of McRae & Keeler have organized a relief association, for mutual benefit in time of illness.

A lawsuit brought by W. H. Leland & Co., Providence, against the W. H. Saart Co., has been adjusted and withdrawn.

Frank A. Saart, for years a skilled employe in local factories, died last week. He leaves four sons, one William H. Saart of the W. H. Saart Co.

Walter B. Knight, formerly a jeweler in this town, is held in Plymouth jail for alleged forgery, resulting from seven complicated real estate deals.

The Rhode Island Trust Co. has been made administrator of the \$80,000 estate left by the late Henry Wexel, of H. Wexel & Co. His widow is chief legatee.

Charles E. Bliss, formerly of Bliss Bros., issued an open letter last week saying he would not again be a candidate for the school board, on which he served 12 years.

The West Silver Co., Taunton, formerly chiefly owned by the heirs of the late Lewis Williams, has become the property of Herman E. Nearing, Carlton A. Woodward, Arthur H. Williams and William J. Davison.

Ambrose Salt, for many years the holder of a responsible place with the Gorham Mfg. Co., died in this town last week. He had lived here nearly 15 years, the greater part of that time being in the employ of G. K. Webster & Co.

Clarence L. Watson, of the Watson & Newell Co., was last week elected president of the First National bank. Other jewelers placed on the directorate are David E. Makepeace, of the D. E. Makepeace Co.; Harvey Clap of the Daggett & Clap Co.; Raymond M. Horton, Albert A. Bushee, of A. Bushee & Co.; Samuel M. Einstein, of the Attleboro Mfg. Co.

The Indiana State Optometrical Society has adopted the following resolutions on the death of the late John Wimmer:

Whereas, In the course of events, the inevitable but unwelcome guest has entered the home and called away our worthy and esteemed colaborer; and

Whereas, By his death we have lost an honored and valued helper; therefore, be it

Resolved, That the Indiana State Optometrical Society, in regular session, does offer condolence to the grief-stricken family in this their sad hour of bereavement, and point them for comfort to the Father of all, who notices even the fall of a sparrow.

Canada Notes.

G. E. Jacques, jeweler, of Calgary, Alta., is selling out.

W. R. Noble & Co., Ltd., Winnipeg, Man., have been burned out.

Harry Miller, Ottawa, is offering to compromise at 25 cents on the dollar.

Joseph H. De Silberg, optician, Ottawa, has given a renewal chattel mortgage to Bell Goldman for \$1,590.

W. G. Kent, manager of the Toronto Jewelry Mfg. Co., Toronto, Ont., has gone to New York on a purchasing trip.

John F. Logan and John B. Easson, traveling representatives of the Goldsmiths' Stock Co., for Ontario, started on their respective trips last week.

Wm. Coutts, manager of the stationery department of Ryrie Bros., Ltd., Toronto, Ont., has gone to New York to place large orders for the Spring trade.

C. E. Vanstone has taken a position as traveling representative of the Meriden Britannia Co., Hamilton, Ont., in place of N. F. Grundy, who recently resigned his position.

J. L. Eaves, representing Edmund Eaves, Ltd., Temple building, Montreal, Can., is on a purchasing trip to Attleboro, Mass., and is staying at the Narragansett Hotel, Providence.

The following out-of-town buyers called on the Toronto, Ont., trade last week: J. S. Smith, St. Catharines, Ont.; E. Smith, Oakville, Ont.; Frank F. Sills, Acton, Ont., and J. R. Orr, Souris, Man.

The four burglars who broke a window in David Ward's store, Toronto, and tried to steal a number of diamonds, were sentenced on Monday. Joseph Warren, the principal, who has a long criminal record, having spent 19 years of his life in the penitentiary, was given seven years' imprisonment. His accomplices, John Warren, Frederick Marsh and John Milligan got three years each. Other charges against John Warren and Frederick Marsh of stealing watches were withdrawn for want of evidence.

Toledo, O.

F. J. Gould, manager of the optical company of the same name, will shortly move into a new residence he is erecting on Robinwood Ave.

J. J. Freeman & Co. are arranging to move into their new building about Feb. 1. The moving date is being prefaced by a "monster" sale, which is probably larger than any similar jewelry sale in the history of Toledo.

Among the landmarks on Summit St. is the large street clock which stands in front of the jewelry store of the M. Judd Co. This clock has been there for years, and in many respects is considered the official time giver of the city. The Board of Education is arranging to install a new clock in its new office building on Empire St.

A man about 23 years of age recently visited the store of J. P. Stein, Alliance, O., and secured a certain amount of stock and cash by means of a worthless check bearing the name of the Alliance Machine Co., and made out in favor of R. Moore. The police were notified.

Cleveland.

V. R. A. Wortman, a jeweler of Canton, recently underwent a delicate surgical operation on his brain at the Lake Side Hospital.

W. Sumner Blackinton, traveler for S. O. Bigney & Co., is critically ill at a hospital in this city, and his condition is causing great concern to his many friends throughout this section. He is widely known in the trade, and was for years a partner in the old chain house of W. & S. Blackinton, and for a time represented that concern on the road after the business was incorporated under the present style.

The store of Arthur Miles, 1839 W. 25th St., N. W., was closed recently and Mr. Miles is said to have left the city. He has been in business here since 1898, and was formerly located at 863 Lorraine St., at which place he succeeded E. T. Bates in business. In April, 1905, creditors brought bankruptcy proceedings against him, and since that time he has done business on a smaller scale. He is supposed to have earned a stock worth \$2,500.

Webb C. Ball, of the Webb C. Ball Watch Co., recently announced that within a year the retail business of his firm will be moved from its present location to the Kingmoore building at Euclid Ave. and E. 9th St. The Kingmoore building was purchased by the Ball concern and extensive improvements will be made, among which will be an addition of four stories to the three which the building now has. The present location of the company, 242 Superior Ave., N. W., which has been occupied by Mr. Ball for 24 years, will be retained for the wholesale business, and the railroad watch business which he controls.

New Orleans, La.

Harry Cohen and M. D. Jacobs will hereafter travel for Leonard Krower, covering the territories formerly visited by J. T. Kirtland and E. J. Garsia.

Weinfurter's Jewelry Palace suffered another visit from a thief several nights ago. A negro loafer smashed in one of the large show windows of the establishment, grabbed a tray of jewels and started to run away. A police officer who had heard the crash of glass pursued the thief, captured him, and recovered the booty.

D. J. Molassanas, the jeweler at 1005 Canal St., was before Judge Fogarty of the First Recorder's Court recently on the charge of conducting his business without a license. He was given the alternative of paying a fine of \$5 or serving 30 days in the Parish Prison. Molassanas, it is said, had a license, but Thursday when an officer entered his place and asked him if he had one the jeweler only laughed, and later refused to show his license, saying that it was in his safe. Judge Fogarty, in passing sentence, said that the jeweler should not have acted in such a contrary manner, and, having a license, should have displayed it.

Joseph F. Noonan, formerly employed in the United States Commissary Department at Fort Sam Houston, was placed in the Parish Prison in this city several days ago by a Pinkerton detective and held as a fugitive from justice from Baltimore. It is

alleged that Noonan went to the establishment of the Castellberg National Jewelry Co., Baltimore, Md., and, representing himself as a Joseph Norton, a well-known stationer, obtained a diamond ring worth \$130. Later he worked the same game successfully in the same city in the store of Isaac Benesch & Sons, obtaining a diamond ring worth \$150. At the store of J. Katz & Co. he used the name of Owen Bernard Carney, and secured diamonds and jewelry worth several hundred dollars, after which he skipped out. Noonan was taken back to Baltimore Friday.

Washington, D. C.

W. W. Birth, of the Oldest Inhabitants' Association, celebrated his 91st anniversary last week. In 1839 he was engaged in the jewelry business in this city.

The meeting of the American Institute of Architects in this city was made the occasion last week for the presentation of a gold medal to Sir Ashton Webb, architect to King Edward VII., at the Corcoran Art Gallery, the intention of the presentation of the medal being to mark distinguished achievement in architecture.

It was said here last week that friends and relatives of Robert C. Castleberg, the missing jeweler, who is reported to have been located in Shanghai, China, know nothing about the man except what they have seen in the stories published in the newspapers. It is said that Castleberg's family have had no news from him since a month after he disappeared in July, 1905.

Representative Bartholdt has been presented with a bronze medal from Baron d'Estournelle de Constant, the President General of the Council General of the Association for International Conciliation. Representative Bartholdt is chairman of the American branch of the Interparliamentary Union, and the medal is a recognition of the splendid work he has done in that capacity.

The police are investigating the circumstances connected with an arrest made here recently of Edwin Lechmere, alias Brown, Kansas City, Mo., for the theft of some diamond crystals, \$126 worth of gold coins, \$80 in gold dust, silver bars, some carbonado and a quantity of other specimens from the Smithsonian Institution. The prisoner was found with some of the items named in his possession, although he claims that they will find it difficult to make out a case against him, and he appears very indifferent to the entire matter. He claims to be a graduate of Leland Stanford University, Cal., and of the School of Mines, also of that State.

Harrisburg, Pa.

The auction house of William H. Stone-sifer in Carlisle was robbed recently of about \$150 worth of goods, including clocks and jewelry.

There are 160 clocks throughout the new State capitol, including the ornamental clocks and the various wall clocks, which are of mahogany and in the shape of a keystone. These clocks are all adjusted and wound once a week.

P. G. Diener will gain possession of his

new quarters at 408 Market St. on April 1 next, the present tenants having secured a new location. Mr. Diener is now located at 410 Market St., and the new store will give him much-needed additional room for his growing business.

In commemoration of the inauguration of Governor Stuart this week the Harrisburg Board of Trade issued an aluminum keystone medal showing an excellent likeness of the new Governor, who became Pennsylvania's 26th executive, and on the reverse side a picture of the new capitol.

Masked burglars entered the Beaver Meadow store of the Van Sickle Mining Co. on the night of Jan. 11, bound and gagged the sleeping manager, Mills Harold, and then proceeded to loot the store of a large quantity of jewelry and about \$500, which was taken from the safe. There were six men in the party.

Pacific Coast Notes.

N. M. Johnson, Kingsburg, Cal., has installed oak wall cases and otherwise improved the interior of his store.

Robert J. Taupert, Las Vegas, N. Mex., has been seriously ill with pneumonia, but is now believed to be slightly better.

H. C. Yontz has moved from the west side of the Plaza, in Santa Fe, N. Mex., to the Laughlin block, in the same town.

The store of I. E. Kring, 714 W. 3d St., Los Angeles, Cal., was slightly damaged last week by fire, which originated in the dwelling rooms of Mr. Kring, in the rear of the store.

The Hansen-Pierce Jewelry Co., formerly of Illinois, has opened an attractive store in Berkeley, near the corner of Telegraph Ave. and Bancroft Way. This part of Berkeley is comparatively new as a business section, and the Hansen-Pierce Co. will have the first jewelry store in that vicinity.

The officers of Red Bluff have secured additional evidence against the man under arrest for the robbery of P. H. Shucy's store, Red Bluff, Cal. After a search of the neighborhood where the officers first saw him, a considerable portion of the stolen jewelry was found. In a water hole tied in an old handkerchief were found a pair of earrings, several stick pins, 10 chains and nine lockets. About half of the property is still missing.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Jan. 12, 1907.

The U. S. Assay Office reports:
Gold bars exchanged for gold coin....\$156,654.83
Gold bars paid depositors..... 375,105.67

| | |
|--|--------------|
| Total | \$531,760.50 |
| Of this the gold bars exchanged for gold coin are reported by the Sub-Treasury as follows: | |
| Jan. 7..... | \$41,516.15 |
| " 8..... | 188,120.09 |
| " 9..... | 57,181.24 |
| " 10..... | 76,217.13 |
| " 11..... | 15,406.61 |
| " 12..... | 46,184.43 |
| Total | \$375,105.67 |

Edward F. Fowler, Boise City, Idaho, recently moved his stock from his old quarters on Main St. into a newly furnished store in the Alaska building, on the same thoroughfare.

News Gleanings.

S. Yaffee, Lynn, Mass., was recently burned out. The insurance amounted to \$3,000.

A. L. Despres, father of Emile Despres, of Despres, Bridges & Noel, Chicago, died Monday morning of old age, aged 88.

The store of A. S. Orr, Greenfield, Ind., was destroyed by fire about a week ago. Most of the stock was saved.

A meeting of the creditors of L. Lindauer, Savannah, Ga., will be held in the office of R. L. Colding, in that city, to-day.

Roy Greenhalgh, La Crosse, Wis., has discontinued business at that place and offers to turn his stock over to creditors.

Jewelers of Mankato, Minn., have agreed to close their stores at 6.30 p. m. daily except Saturdays, until further announced.

The store of J. C. Slaughter, Forrester City, Ark., has been damaged by fire to the extent of \$1,100. The insurance amounts to \$500.

H. W. Heilman, Springfield, Ill., who has been working for E. L. Marsh, in Fort Dodge, Ia., has bought an interest in the business.

E. E. Ross, Connellsville, Pa., convicted of assault and battery and larceny by bailee, has been sentenced to six months' imprisonment in the local workhouse.

Adam J. Hood, who for a number of years had a retail store in East Orange, N. J., died recently in his home, 83 Burnet St., in that city, at the age of 62 years.

Cave & Plunket are rapidly completing plans for the opening of a retail jewelry store at 617 Main St., Houston, Tex. The store will be formally opened about Jan. 21.

Jesse L. Cross, Staples, Minn., spent Christmas at his old home in Campbell, Minn., and returned with a bride. Mr. Cross has also bought the interest of his partner, F. W. Zimmerman.

J. K. Roumain, who has now a jewelry establishment on Main St., Baton Rouge, La., has purchased from L. J. Gimler a lot and building on 3rd st. for \$14,000, and will have an establishment on that thoroughfare.

George J. Johnson, Wentworth, S. Dak., who recently went into bankruptcy, had been in the jewelry business about three years. He started at Wentworth in the drug line about 1900, and later added a jewelry department.

The J. S. Johnson Jewelry Co., Greeley, Colo., now in bankruptcy, is controlled by J. S. Johnson, who began business there under that style early last year. He carried a stock of about \$2,000, and is also interested in a grocery business.

An involuntary bankruptcy petition was filed last week against R. M. Vail, Scranton, Pa. Mr. Vail was formerly in the employ of Oscar Hyer, and succeeded the latter in business November 20, 1902, at which time he bought out Mr. Hyer's interest.

F. W. Whitehead, 344 Yonge St., Toronto, Ont., will, it is said, lose the sight of his right eye as the result of striving to eject from his establishment a man named Pollock, who thrust the point of an umbrella in the organ. The offender escaped.

At a recent meeting of the executive committee of the Milwaukee Jewelers' Club, it was decided to hold monthly banquets, following out the plan adopted last year. The

first banquet was given Wednesday last at the Hotel Blatz, and proved successful in every way.

Rensalaer Elwood, who conducted a jewelry business at Albion, Mich., for over a quarter of a century, died in the Michigan State Asylum in Kalamazoo recently. The remains were brought to Albion for interment. The deceased, who was about 66 years old, is survived by no near relatives.

A. W. Voedisch, Aberdeen, S. Dak., entertained his competitors in the jewelry business in that city at lunch recently. Those present were O. B. Tripp, D. G. Gallett and Charles A. Sauer. They have arranged to close their stores at 6.30 p. m. during the Winter months.

J. W. Beaman was recently appointed trustee in the bankruptcy of F. W. G. Bartlett, Sayre, Pa., at a meeting of the creditors at Tonawanda before Referee Coddling. Mr. Beaman was instructed to bring action against the First National Bank of Sayre for \$840 which Mr. Bartlett had deposited to apply on a judgment note.

One of the attractive calendars presented to the trade is that designed by the International Gem Co., New York. The calendar is mounted on drab cardboard, nine inches long, and six and one-half inches wide. Above the calendar, surrounding the figure of an infant, appear, against a white background, the 12 month stones in their natural colors.

A runaway horse plunged through one of the plate glass show windows in the store of Leo Lando, 143 N. Pennsylvania St., Indianapolis, Ind., last week. In addition to the wrecking of the window, opera glasses and other stock were damaged. Mrs. Isabelle Fowler, an aged woman, was knocked down by the animal and seriously injured. The loss was about \$300.

A large clock has just been installed in the Winnebago National Bank building, Rockford, Ill., by the Seth Thomas Clock Co. The timepiece has three dials, each about two feet in diameter, and will be illuminated at night. The clock is located at the corner of a building and extends diagonally across the sidewalk, being supported by large steel brackets.

Samuel Stone, of Fall River, Mass., has brought suit against a street railway company, claiming a cash register in a street-car accidentally fell on his head, causing him serious injury. He is a jeweler and claims his eyesight is so badly affected his expert judgment of precious stones is impaired, and his hearing is so affected he cannot hear distinctly the ticking of clocks and watches left with him for repairs, which badly handicaps his work.

W. L. DeGraff and J. K. Quantrell, who formerly conducted business at 616 N. Ottawa St., Grand Rapids, Mich., under the firm name of DeGraff & Quantrell, have dissolved partnership by mutual consent. The hardware and jewelry business will be continued by W. L. DeGraff under the name of the DeGraff Hardware Co., to whom all debts are to be paid and upon whom all demands of the partnership are to be presented for payment.

Early one morning recently the Springfield, Ill., police discovered a large hole in the ceiling of the boys' ward, and upon investigation ascertained that one of the

prisoners, Louis Potts, had made his escape. Potts, together with his brother Charles, had been arrested on a charge preferred against them by their father, claiming that they had stolen jewelry from a St. Louis jewelry house. They live in that city, and were arrested in Springfield.

The funeral of James Mix, the veteran Albany, N. Y., jeweler, whose obituary was published in last week's issue of THE CIRCULAR WEEKLY, occurred on the afternoon of Jan. 7 from his late home, 688 Madison Ave., Albany, and the services were among the most largely attended ever held in this city. The officiating clergyman was Rev. Edward A. Collier, while the pallbearers were: Leland D. Mix, Fred L. Mix, Edward D. Mix, William B. Wackerhagen, William Vrooman of Schenectady and Ernest Hoagland. Interment was in Rural cemetery.

E. G. Kemmerer, Wilkes-Barre, Pa., has been made the defendant in a suit for \$5,000 damages brought against him by Miss Anna G. Jonson. The plaintiff alleges that during the holiday rush, when the store was crowded with customers, a bracelet was missed and she was accused of having stolen it. She demanded to be searched, and alleges that the bracelet was not found upon her, but was later discovered where a clerk had absent-mindedly placed it. Miss Jonson claims that her treatment in the store humiliated her and damaged her reputation.

The arrest and conviction of Frank Havalin and Thomas Blair, who recently robbed a jewelry store in Tekoa, Wash., has brought forth another claimant for a share of the reward offered. This is Sheriff Joseph Cannutt, of Whitman County, who alleges that the value of the property recovered is about \$600, and that he is entitled to one-half of the \$800 reward. Jewelers in Tekoa claim that the value of the goods which Cannutt recovered is only \$50. The local force of deputies recently signed an agreement according to which the award was to be divided equally among Sheriffs McPugh, C. M. Delamater, W. H. Reynolds and T. H. McDermott.

Frank Redmond, formerly a jeweler of Springfield, Ill., but who is now a merchant policeman of that city, recently interrupted a couple of robbers in the act of breaking a show window with the result that one of the men fired at him, the bullet taking effect in his right shoulder just above the lung. Policeman Redmond started in pursuit of the men, but, overcome by weakness from loss of blood, he was forced to stop and telephone for the patrol, so the men got away. A physician who examined Redmond's wound declared that it was painful but not very dangerous, and he was removed to St. John's Hospital. Later four men were arrested by the local police. Mr. Redmond, before joining the merchants' police force, was a watch repairer with J. G. Pierik & Co.

Voluntary Bankruptcy Petition Filed by A. M. and H. J. Zarle.

CLEVELAND, O., Jan. 11.—A petition in voluntary bankruptcy was filed in the United States District Court yesterday by Arthur M. Zarle and Herbert J. Zarle, doing business as A. M. Zarle & Co., jewelers, at 4116 Lorain Ave. Their debts aggregate \$12,-118.15, while their assets are \$7,083.

You Can Easily Operate This Typewriter Yourself

Don't worry your correspondent.

Don't write him anything by hand that takes him time to make out—that may leave him in doubt—that he can't easily read.

And don't fill out legal papers or card memos—or make out accounts or hotel menus in your own handwriting.

It looks bad, reflects on your standing, makes people think you can't afford a stenographer, and is sometimes ambiguous.

You can write out your letters—make out an abstract—fill in an insurance policy—enter your card memos—make out your accounts, or a hotel menu—or do any kind of writing you need, on any kind, size or thickness of paper, and space any way you want on

The OLIVER Typewriter

The Standard Visible Writer

You can write any of these things yourself if you do not happen to have a stenographer.

For you can easily learn, with a little practice, to write just as rapidly, and as perfectly, as an expert operator on the OLIVER. Because the OLIVER is the simplified typewriter. And you can see every word you write. About 80% more durable than any other typewriter, because it has about 80% less wearing points than most other typewriters.

80% easier to write with than these other complicated, intricate machines that require "humoring"—technical knowledge—long practice and special skill to operate.

Than machines which cannot be adjusted to any special space—with which it is impossible to write abstracts, insurance policies, or odd-sized documents except you buy expensive special attachments requiring experts to operate.

You can adjust the OLIVER to any reasonable space—you can write on any reasonable size and thickness of paper, right out to the very edge, without the aid of any expensive attachment or special skill, and your work will be neat appearing, legible and clear.

For the OLIVER is the typewriter for the doctor, the lawyer, the insurance agent, the merchant, the hotel proprietor—or any man who does his own writing.

Write us now for our booklet on the simplified features of the OLIVER.

YOUR MEMO. ORDERS ARE SOLICITED

NEW YORK, 41 Maiden Lane.

A Most Interesting and Unique Volume.

VOLUME II of *The Silver Standard*, that most unique and entertaining periodical published by the Meriden Britannia Co., has been issued in book form, and constitutes one of the most interesting volumes we have seen in a long time. *The Silver Standard* is so different from any other magazine that it is in a class by itself and certainly no other house organ can approach it in entertaining and instructive literature. The *New York Sun* devoted over a column of its editorial page in a recent Sunday edition to a review of *The Silver Standard*. This is a testimonial that no other house publication, or no form of advertising literature has ever received before, and that any magazine or publication of any character might well be proud of.

The Meriden Britannia Co. has also received complimentary letters from Postmaster General Cortelyou, Colonel George Harvey, editor of the *North American Review*, John S. Phillips, editor of the *American Magazine*; Arthur Brisbane, editor of the *New York Evening Journal*; Edward Bok, editor of the *Ladies' Home Journal*, and many other editors, publishers and prominent men, all praising *The Silver Standard* in the highest terms.

The year 1847 was one of the most interesting in the history of the country, but one does not begin to appreciate fully how many important things happened at that period, or were then under discussion until one glances through Vol. II of *The Silver Standard*. In the first number of this volume is a review of the year by Horace Greeley with a characteristic portrait of the author, showing his usual carelessness in dress and unstudied simplicity. There is an article on the "Future of Texas," in which the question of how this country is to govern the recently annexed territory is discussed, with opinions from the north and south. "Emigration to California," "Morals in Connecticut," "Tight Pantaloon and Tobacco," "The Sun's Express," "Recall of General Taylor," and "Daniel Webster and the War" are a few of the interesting headlines. There is also a description of an aerial ferry, with illustrations and text showing the progress in building structure in Philadelphia since 1847.

In No. 2 we see that the tariff question was even then uppermost as a subject of discussion, for the main article in this issue is "The Evils of the Present Tariff." "To Prevent Railroad Accidents" shows that though the railroad was then in its infancy the prevention of accidents was a matter of thought, the same as it is to-day. There is an illustration of a unique single rail device. Chicago 60 years ago and to-day is graphically shown. "The Omnibus Business of New York," "Cunard Steamers at Jersey City," an illustration of a new railroad chair, "Locomotives Built to Burn Coal," "Bill to Tax Bachelors" are some of the subjects treated.

The June number tells of the urgent need for reform in the Postoffice and for the reduction in postal rates. A view of San Francisco in 1847 and before the recent fire shows the remarkable development of the Pacific coast metropolis. "How Dandies Are Made" and "First American Mail Steamer" are also described.

Cincinnati is the subject of an interesting descriptive narrative in No. 4, in which the startling prediction is made that in 1904 the population of the Queen City will exceed 4,000,000 people. A description of the first electric car exhibited in 1847 in Dover, N. H.; illustrations of St. Paul at that time and to-day, and a wood cut of a proposed elevated railroad, are some of the interesting features of this number.

The enormous increase in immigration during the year 1846 seems to have alarmed the people of that day, and the statistics published in No. 5 show that over 100,000 immigrants arrived during the previous year, over 40 per cent. of which were from Germany and 40 per cent. from Ireland. "The Growth of Detroit," which ceased to be the capital of Michigan in 1847, is shown in pictures and statistics. "The Reappearance of Mr. Clay," "Latest News from Mexico," "The First Typewriter," "Slavery in New England," "Steam Factory in Hartford," were matters of absorbing interest at this time.

The December issue shows an illustration of Lord Timothy Dexter's house surrounded by columns bearing statues of the presidents and other notables. This must have been a remarkable estate, almost as picturesque as Lord Dexter himself. Atlanta received its charter in 1847, and the city as it was at that time and it is to-day is described in this number. We find a new device to prevent the smoke nuisance of locomotives was invented in this year; that the peace terms with Mexico were considered severe; that Jersey City had a population of 5,862, and that President Polk in his annual message advocated a full indemnity for Mexico for the cost of the war; that John Calhoun was named for President; that the streets of St. Louis were lighted with gas for the first time.

These are some of the subjects that appear in Vol. II of *The Silver Standard*, and will give an idea of the fascination of this little publication, and show that W. G. Snow, the editor, not only has searched most carefully and thoroughly among the periodicals of the day to obtain the data for the articles, but that he has the true editorial faculty of deciding what will be most interesting to his readers. Any jeweler who does not receive *The Silver Standard* should write to the Meriden Britannia Co., Meriden, Conn., at once to be placed on its mailing list.

Hirsch & Kaiser, San Francisco, Cal., have secured the lease of a building now being erected on Post St., near Grant Ave., adjoining the Shreve building. When finished, the new store will be five stories high, 122½ feet in depth, with a frontage of 55 feet. It is to be a first-class structure, and will probably be about a year more in course of construction. The firm will occupy the whole building, and expects to make it the finest and most complete optical and photographic establishment west of the Rocky Mountains. The present location of Hirsch & Kaiser on Fillmore St., near Sutter St., though a good situation for business under present conditions, is inadequate in space, and as the city rebuilds, will be too remote for a large business.

Optical Notes and Briefs

F. W. Poole, optician, Newport, R. I., on Monday opened a branch store on Broadway. He has closed his establishment on Bellevue Ave., and will not reopen it until June.

Dr. J. M. Ness, Wahpeton, N. Dak., and A. O. Wold, Langdon, N. Dak., have been appointed members of the State Board of Optometry. Mr. Wold has been made secretary.

Maurice Cross was recently taken into custody in Philadelphia, Pa., accused of attempting to extort \$100 from Josephine C. Wheeler, of 524 S. 11th St., that city, who alleged that the defendant demanded that price for two pairs of eyeglasses, asserting that he was an inspector from the Board of Health. The impostor declared that the plaintiff could be forced to spend three weeks in a dark room in the Municipal Hospital if she did not agree to buy the glasses.

William H. Spangler, an optician, whose place of business is in Penn Ave., died last Wednesday morning at 8.30 o'clock at his home in Woodland Ave., Allegheny. He was born on the North Side in 1874 and had been in business for a number of years. Mr. Spangler was a member of the First Christian Church, of Allegheny, and was also a member of the F. & A. M. and of the Royal Arcanum. Five years ago he married Miss Jennie Elizabeth Dodds, who, with a daughter, Alice King, his father, George C. Spangler, and four sisters, survive him. The funeral took place Friday afternoon from his family residence. Interment was at Uniondale Cemetery, Allegheny.

The annual report of C. A. Snell, secretary of the Minnesota State Board of Optometry, tells of 43 candidates taking the examination during the past year, and 20 who succeeded in passing. Two who succeeded had been before the board twice the previous year and two others once. Three others were at both examinations this year, so that but 13 passed on their first attempt. Of the 23 who failed, one had made four previous attempts, another two, and two others one each. Jan. 1, 1906, there were 340 registered optometrists, and 22 were added during the year. Nineteen licenses were revoked and three died during the year. The present registration is 339. There were five prosecutions during the year, all being successful.

The Pennsylvania Optical Society will hold its next annual examination for the "Dioptical Grade" at the Continental Hotel, Philadelphia, Pa., Tuesday, March 12, 1907, at 10 A. M. Applicants are examined in the theory of optics, refraction, the practical use of the trial case and frame fitting. The examination will be both written and oral. To all who pass a handsomely engraved certificate is given, which, besides being a voucher for proficiency, also shows that the holder has the indorsement of the State society. Only members of the association can take this examination and obtain the certificate, but any optician who applies for membership in the association at the next meeting of the executive committee, occurring Tuesday, Feb. 12, can be admitted in time to join the examination.

Ball's Official Standard R. R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan:

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

The watch will win you his business and friendship for always.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

Chicago Notes.

J. A. Limbach, representing the Theodore W. Foster & Bro. Co., is making an eastern trip.

H. E. King, representing the Queen City Silver Co., is making a trip through the central west.

"Archie" Barringer, representing Henry Paulson & Co., is making a trip through the central States.

Fred A. Spies, of Spies Bros., is making a brief business trip to Omaha, Des Moines and Council Bluffs.

J. J. Burke, of the Brooks Jewelry & Optical Co., St. Louis, visited friends in the trade here last week.

George Marshall, of E. V. Roddin & Co., has been confined to his home on account of an attack of acute bronchitis.

C. E. Hobson, Chariton, Ia., has sold one-half interest in his store to Mr. Arnold, of the Arnold Jewelry & Music Co., Ottumwa, Ia.

Masover & Pokrass, manufacturing jewelers in the McVickers building, will remove March 1 to the new Mentor building at Monroe and State Sts.

C. J. Roehr, manager of the Chicago office of the Bassett Jewelry Co., is making a visit to the factory at Providence, R. I., and other eastern points.

Charles Lester, who, it will be recalled, recently resigned from the New England Watch Co., has decided to go to Pasadena, Cal., and leaves this week.

D. A. Wilkins, of the Chicago office of the Ostby & Barton Co., is on a trip to the Pacific coast, with stopping points at St. Louis, Denver and Los Angeles.

W. E. Bell is opening a jewelry store at Little Rock, Ark., and was here recently buying his stock. Mr. Bell was formerly employed in a store at Little Rock.

Frank S. Boyden & Co., manufacturing jewelers, and C. L. Jerome, diamond broker, have removed from the old *Interocan* building to room 1312, Heyworth building.

R. A. Knight, who sold his store at Waterloo, Ia., about a year ago, has opened up a store at Humboldt, Ia., and was in this city recently buying his opening stock.

J. Ziegler, of J. Ziegler & Co., is at West Palm Beach, Fla., where he has gone with his 12-year-old son Harold. The latter's health is not of the best, and Mr. Ziegler hopes that the mild climate of Florida will be beneficial to him.

George C. Bynner has been engaged by

Sproehle & Co. to cover the southern territory for them. Mr. Bynner comes from B. S. Freeman & Co., Attleboro, Mass. All of the Sproehle traveling force will be on their respective territories this week.

The first meeting of the creditors of J. F. Dailey & Co. will be held Jan. 22 at 10.30 A. M. in the office of Referee in Bankruptcy S. C. Eastman, Room 905, Monadnock block, 98 Jackson building, at which creditors may prove their claims, elect a trustee, etc.

J. M. Stanley, representative here of the Manser Mfg. Co., is now at the Presbyterian Hospital undergoing treatment, and probably an operation will be performed. His territory for this season will be covered by J. S. Mayer, who starts for the coast from St. Louis soon.

John B. Renker has been engaged to cover southwestern territory for the American Silver Co.; J. W. Brooks, who comes from Jennings Bros. Mfg. Co., Bridgeport, Conn., also goes with the American Silver Co., and will cover the States of Wisconsin, Minnesota and North and South Dakota.

At the annual meeting of the Chicago banks, held in this city Jan. 8, the following members of the trade here were re-elected directors: Bankers' National Bank, F. A. Hardy; Corn Exchange National, Charles H. Hulburd; First National Bank, Benjamin Allen; Chicago Savings Bank, C. D. Peacock; First National of Englewood, C. H. Knights.

Under the auspices of the National Civic Federation a conference between labor and capital was held here on Saturday, Jan. 12, at the residence of Mrs. Potter Palmer. Among the employers present were Charles H. Hulburd, president of the Elgin National Watch Co., and J. P. Byrne, of Lyon & Healy, who is the president of the Chicago Jewelers' Association.

The invitations for the 30th annual banquet of the Chicago Jewelers' Association are out and read as follows: "The Chicago Jewelers' Association cordially invite you to attend their 30th annual banquet at half after six o'clock, Saturday evening, Jan. 19, 1907. The Auditorium. Banquet Committee—L. W. Flershem, chairman; M. A. Mead, A. L. Sercomb, J. P. Byrne, ex-officio."

Martin Priban, who has been employed in the shop of A. L. Williams & Co. for the past 18 years, has resigned his position with the latter firm to enter into partnership with James F. Peters under the firm

name of Peters & Priban. Mr. Peters was employed by Pines & Hanson until last November, when he started in business on his own account. The new firm is located at room 913 Silversmith building.

Paul Braude, of the firm of Emil Braude & Bro., met with a severe accident as he was going to his office in the Heyworth building Sunday morning, Jan. 6. He entered the elevator car of the building with four other men all bound for the seventh floor. When the car stopped at this floor three of the men stepped out, and as Mr. Braude stepped forward to go out the car started up, and his life was only saved by the timely aid of the other man in the car, who succeeded in pulling Braude back, but not in time to prevent him from receiving a severe cut in the head. Mr. Braude is now in the hospital, and it will be some time before he gets back to his work.

Denver.

Charles Wathen & Co. will send S. L. Harrod and Leopold Shupe on the road this week.

A. H. Leverel, with Watson & Newell Co., has just returned from a business trip to Chicago.

Edward Lehman, of the Edward Lehman Jewelry Co., left Wednesday for a business trip through the east.

William Fulton, with the Lewis Jewelers' Supply Co., has been appointed receiver for the stock of the J. S. Johnson Jewelry Co., Greeley, Colo.

F. L. Bentz and J. A. Hamilton, of W. W. Hamilton & Co., have left on their respective trips. F. L. Bentz has entirely recovered from his recent serious illness.

The Denver Watch Case Co. is enlarging its quarters. The additional rooms will double the present floor space. The new rooms have plenty of light and will allow the employment of several extra workmen.

Out-of-town jewelers who visited the local trade during the past week included: Morris Bloch, Hot Springs, S. Dak.; Solomon Levinson & Son, Deadwood, S. Dak.; W. J. Crosby, Loveland, Colo.; W. G. Burnett, Lander, Wyo.; W. R. Livingston, Brush, Colo.; French Heard, Providence, R. I.; Joseph Cohn, Leadville, Colo.; A. J. Dawson, El Paso, N. Mex.; Mr. Carpenter, Southwestern Mercantile Co.; E. C. Veysey, Boulder, Colo.; J. S. Johnson, Greeley, Colo.; Frank T. Stedman, New Windsor, Colo.

SWARTCHILD & CO.

ESTABLISHED 1870

138 Wabash Avenue

CHICAGO, ILL.

Watchmakers', Jewelers' and Engravers' Supplies.

Our new 432 double-size page catalogue containing 20,000 illustrations will be sent to you gratis (prepaid) on application.

FEATURES

"BLACK SHIELD" MAINSPRINGS are packed in the following manner: Each spring is wrapped separately in oiled paper, and placed in an individual envelope printed with the name and size of movement for which it is intended. Twelve envelopes, or one dozen mainsprings, are contained in a well-made strong box properly labeled. Useless handling of the springs is avoided, thereby preventing rust or mixing of stock. The name, "BLACK SHIELD" is scratched on every spring.

THE NEW MAINSPRING

"BLACK SHIELD"

MAIN-SPRINGS

FOR ALL AMERICAN WATCHES.

The Product of the Highest Attainment in Mainspring Making

TESTS

In selecting the "BLACK SHIELD" MAINSPRINGS, we were guided not alone by our own severe tests and judgment, but we distributed samples to dozens of expert watchmakers throughout the country. The opinion of all was that the "BLACK SHIELD" MAINSPRINGS are the finest ever introduced in this country. That they are even, properly tempered, carefully finished, correctly gaged, and tips and length positively accurate. They are of wine color, well polished, and will fit the respective movements without any filing or change whatsoever.

"Black Shield" Mainsprings are manufactured for us only by the oldest and most reputable maker in Switzerland
Per Dozen, \$1.25 Per Gross, \$13.50

Fac-Simile of Box Containing One Dozen "Black Shield" Mainsprings

"Black Shield" Mainsprings are guaranteed in every respect. No better can be had at any price Per Gross, with 4-Drawer Cabinet (capacity, 48 dozen), \$15.00

Silversmiths' Bldg.,
131-137 Wabash Ave.

Kansas City.

John Switlik has taken a position as working jeweler with the Hassig & Krieke Jewelry Co.

Mary Eubanks, with C. A. Kiger, has returned from a holiday vacation spent in Siloam Springs, Ark.

The stock of jewelry of Louis Alisky, 516 Main St., has been destroyed by fire. He states that his loss was \$1,000.

Mr. Cook, with E. L. White, Guthrie, Okla., passed through this city last week on his return from a vacation visit.

The Jones Dry Goods Co., which has a large jewelry department, has discontinued its branch store in Topeka, Kans.

C. M. Weed, of the office force of the Woodstock-Hoefler Watch & Jewelry Co., is ill, being threatened with typhoid fever.

L. B. Murray, formerly a traveling representative for John C. Humes, in the china ware line, has taken a position with C. A. Kiger.

E. C. Cleveland and E. H. Snow, travelers for the Woodstock-Hoefler Watch & Jewelry Co., have just started out for their respective territories.

The jewelry store of Smith & Case, 1405 Central Ave., Kansas City, Kans., was broken into a few nights ago, and jewelry valued at \$250 was stolen.

Albert Klein, formerly with the Bauman-Massa Jewelry Co., St. Louis, Mo., has taken a position in the material department of the Edwards & Sloane Jewelry Co.

All the traveling representatives of the Edwards & Sloane Jewelry Co. have packed their trunks and gone out on the road, with the exception of Mr. Whitney, who will remain here a week.

Dr. S. W. Lane, of the Southwestern Optical College, leaves the last of this week for Nebraska, where he will attend the meeting of the State Optical Association, and deliver several lectures.

Garrett Owens, who has been in the watchmaking department of the Jaccard Jewelry Corporation, has gone to San Francisco, Cal., where he will take a position with the Bohm-Bristol Jewelry Co.

The following pupils were enrolled during the past week at the Southwestern Optical College: J. T. Doyle, Shelbyville, Mo.; C. J. William Karbach, M.D., Kansas City, Kans.; Mont. O. Stanley, Gallatin, Mo.

The Barr Jewelry Co. has succeeded to the business of the Barr-DeVault Jewelry Co., and will continue at the same location. Mr. DeVault has not yet decided what he will do, and will first make a trip to Mexico.

The following new pupils have just enrolled at the Kansas City Horological School: Edgar Duncan, Globe, Ariz.; M. L. Colbert, Bosworth, Mo.; O. Garrison, Waverly, Kans.; E. R. Bigelow, Mincos, Ind. T.

A. J. Levin, St. Joseph, Mo., who has been fitting up a jewelry store in this city for some time on Walnut St., between 8th and 9th Sts., is in the city this week, stocking up the establishment. He intended to open the store Dec. 1, but could not get the fixtures in time.

The following representatives of C. A. Kiger have just left for their territories: M. S. Murray, covering Missouri, Indian Territory, Oklahoma and Texas territory;

Howard Potts, in Missouri and Iowa; Lute Potts, in Northern Kansas and Colorado; Harry Clark, in southern Kansas and Colorado; P. F. Murray, in Nebraska, and H. A. Maxwell, in Arkansas, Mississippi, Louisiana and Texas.

The following out-of-town jewelers called on the trade here last week: B. G. Gustafson, Lawrence, Kans.; F. G. Mitchell, Marshall, Mo.; Mrs. J. H. Fuoss, Brookfield, Mo.; L. Megede, Richmond, Mo.; S. J. Huey, Excelsior Springs, Mo.; W. H. Meyer, Lawson, Mo.; George Young, Moberly, Mo.; H. Kennedy, Aurora, Mo.; C. L. Dockhorn, Oskaloosa, Kans.; F. W. Galer, Nowata, Ind. T.; E. A. Church, Claremore, Ind. T.; G. H. Church, Oak Grove, Mo.

J. R. Mercer, accompanied by Mrs. Mercer, left yesterday for a trip to Mexico. Mr. Mercer will go down with the Shriners, and will assist in the initiation of President Diaz into that degree of Masonry. Mr. Mercer announces that he has arranged to rent the first two floors of his Hewson building to the National Bank of Commerce. This will necessitate the removal of C. A. Kiger from his present quarters on the second floor, but Mr. Mercer hopes to keep him in the building, just moving him a floor higher.

Cincinnati.

William Weinburg has moved his factory from 7 Race St. to the fifth floor of the Glen building.

Myer Cohn has become a traveling representative in Texas and the southwest for D. Jacobs & Co.

Joseph Hornback will travel for Rudolph Jacobs & Co., and not D. Jacobs & Co., as previously reported.

The Duhme Jewelry Co. has just completed a handsome diamond necklace valued at \$12,000, containing 100 stones.

Joseph Phillips and M. D. Geigerman, of the Sterling Glass Co., have gone on their respective trips north and south.

G. H. Hansgen and family, Bethel, O., stopped here last week on their way to Florida, where they will stay several weeks.

Harry Walton, Cincinnati manager for the Philadelphia Watch Case Co., is now representing the Crescent Watch Case Co. as well.

Lee Loeb, of Herman & Loeb, has recovered sufficiently from the effects of a serious fall which he recently sustained to visit his customers in the west.

Among the recent visitors to the trade here were: T. Zurbrugg, president of the Philadelphia Watch Case Co. and the Keystone Watch Case Co., also C. M. Fogg, of the latter company; S. O. Bigney, of S. O. Bigney & Co., and J. T. Inman, of J. T. Inman & Co.

The Gustave Fox Co. has taken a contract to furnish 75 gold medals for the mid-winter carnival of the Cincinnati Gymnasium. A. A. Spiegel, formerly of this house, but now of A. A. Spiegel & Co., will continue to represent his former company as heretofore in the south.

Edward Ness, one of the nine men who escaped from the Hamilton County jail at Cincinnati, Dec. 23, but afterward surrendered to the police, has been sentenced to the State penitentiary for 13 months on a charge of grand larceny. Last Fall he

robbed Michael Reitman, an engraver at 1402 John St., of eight gold watches. The second sentence was the same as the first, imposed the day before his escape.

Out-of-town retailers here the past week buying stock included: A. Bland, Greenfield, O.; E. Robertson, Augusta, Ky.; L. C. Diefenbach, Lewisburg, Ind.; B. Zimmerman, Bainbridge, O.; E. Mueller, Hamilton, O.; J. E. Zimmerman, New Holland, O.; G. W. Bowers, Marion, O.; Guy C. Fitz, Gainesville, O.; F. G. Meyer, Dayton, O.; Frank L. Horning, Brookville, Ind.; J. B. Hesselbrock, Liberty, Ind.; Charles Sieglitz, Vevay, Ind.

The police are looking for a swindler who uses a \$50 bill, with which he operates cleverly. During the past week this man, who is young in appearance and well dressed, called at Charles Nurte's store, 1214 Main St., and purchased a \$4.50 ring. He presented a \$50 bill to the clerk, but after receiving his change decided not to take the ring. His \$50 bill was then returned to him, for which the clerk received what he supposed was his correct change. The stranger made a hasty departure, and the clerk then discovered that he had withheld \$19 from the change he returned.

At yet there is no clue to the thieves who robbed Ben Schneider's store at 1411 Vine St., of \$1,500 worth of jewelry in the past week. The robbery occurred at an early hour in the morning, and it is thought from the procedure of the thieves that their work had been carefully planned. Entrance to the building was gained through a coal hole in the alley, leading to the cellar. The thieves then cut the panels from the door which blocked their way to the store. When they got into the store they emptied every show case, taking solid gold and silver goods, bracelets, canes, goblets, charms, lockets, rings and other articles.

Minneapolis and St. Paul.

L. L. Williamson, Minneapolis, recently welcomed a little baby girl to his home.

Bert Barker, Minneapolis, has gone to Bemidji, Minn., to visit his brother, Earl Barker.

Alex. Madsen, Minneapolis, has gone to Chicago to spend a week with his firm, Rettig, Hess, & Madsen.

O. H. Arosin, St. Paul, fell and painfully injured his left arm one day last week. The arm narrowly escaped being fractured.

The wife of C. M. Erickson, South Minneapolis, has just recovered from a long siege of typhoid fever, having been in the hospital for some weeks.

Among the out-of-town jewelers in the Twin Cities during the past week were: Julius Anderson, Mora, Minn.; Jesse L. Cross, Staples, Minn.; W. W. Winchester, Amery, Wis.; Scott Jewelry Co., Stillwater, Minn.; Peter Kraemer, Minnesota Lake, Minn., and Oscar Holmes, Cambridge, Minn.

About the first of the year J. M. Washburn bought out the store of W. S. Spruill & Co., 320 S. Mulberry St., Muncie, Ind., which has been restocked with a line of diamonds, watches and novelties, and will be run in connection with the business of the Washburn Jewelry Co., Anderson, Ind.

St. Louis.

M. Meisch, Muskogee, Ind. T., was a recent visitor in this city.

L. B. Hale, with William Weidlich & Bro., is now making a southern trip.

James J. Burke, president of the Brooks Jewelry & Optical Co., spent the latter part of the week in Chicago.

Jacob Bunn, president of the Illinois Watch Co., Springfield, Ill., was here last week on personal business.

The Retail Jewelers' Association of Missouri probably will meet next week to decide upon plans for the annual meeting.

L. W. Waldecker, manager of the silverware department of F. W. Drost & Co., took part in a recent 24-hour endurance bowling contest.

David Lowinsky, residing at 1325 Whittier St., this city, dropped dead recently at the corner of Whittier St. and Eastman Ave. Death was caused by heart failure.

J. T. Wells, for two years with the Bauman-Massa Jewelry Co., is now with the L. Bauman Jewelry Co., covering the same territory—Kansas, Oklahoma and Indian Territory.

Rev. L. R. Vercoe, well known as a former salesman for the Mermod, Jaccard & King Jewelry Co., has been appointed hospital missionary by Bishop Tuttle, of the Episcopal Diocese.

Frank B. Thayer, Memphis, Tenn., who filed a petition in bankruptcy recently, is well known in this city, where he has been a frequent visitor. Among his creditors are the Eisenstadt Mfg. Co., Sidney L. & Morris Bauman and the St. Louis Clock & Silverware Co., of this city.

Mrs. Al. Frech, wife of Vice-President Frech of the Eisenstadt Mfg. Co., is reported as improving rapidly. She was seriously injured in an accident a short time ago. J. M. Friede, also vice-president of the same company, and wife have returned from a pleasure trip to Virginia and Pennsylvania.

S. H. Bauman, president of the Bauman-Massa Jewelry Co., has gone to New York and other eastern points on a business trip. A. V. Bauer, for several years with this firm, and more recently in charge of the watch department, is now on the road, succeeding J. T. Wells, with territory in Kansas, Oklahoma and Indian Territory.

A bill has been introduced into the Missouri Legislature in session at Jefferson City by Representative Busche, of St. Louis, which seeks to prohibit the issuance of trading stamps, except the same are the tickets or cards of the merchant, issued, distributed and redeemed by no one else, or bear upon their face their redeemable cash value.

A surprise was recently given N. Roitman, 509 Olive St., when a man walked into his store and demanded a watch. The intruder was ordered from the store and departed with the information that he had but recently been released from the Illinois State prison, and with the invitation to the jeweler to come into the street and he would take his watch and stud from him. The police are looking for the stranger.

The following members of the traveling staff of the Eisenstadt Mfg. Co. started out last week for their respective territories: A. F. Eisenbess, Missouri and Texas; N. W.

Hagnauer, Arkansas; R. R. Evans, Missouri, Kansas, Nebraska and Oklahoma; C. J. Cederstrom, Minnesota, Wisconsin and the Dakotas; F. J. Longden, Indiana, Ohio and Michigan; O. K. Steuwer, Missouri, Kentucky, Tennessee, Georgia, Mississippi and Louisiana.

The Mermod, Jaccard & King Jewelry Co. donated a silver cup that was contested for at the St. Louis poultry show, in session last week. F. A. Durgin, manager of the silverware department of this firm, has returned to his duties after a short illness. Walter L. Ely, of the repairing department of this firm, has been removed from his home to St. Vincent's Hospital. He is suffering from a nervous breakdown, and has been growing worse.

The police recovered 28 watch chains, two breastpins, one pair of cuff buttons, four rings, two bracelets, one combined cross and necklace and 12 scarf pins recently, after the arrest of a man who said he was Harvey White, and who confessed, the police say, that he had stolen the jewelry from the Providence Jewelry Co., Room 316, Granite building, 4th and Market Sts. White went to the second-hand store of Frank Goodman, 715 Market St., and contracted to sell part of a collection for \$20. Goodman paid him \$5 and told him to return later for the balance. Goodman then notified the police, and White was arrested at 1210 Linden St., in company with a woman to whom he had given some pins and the bracelets. He entered the jewelry store by climbing through a transom. He is a prisoner at Central Police Station.

Omaha.

John J. Brown, Hannibal, Mo., is visiting friends in this city.

Mr. Schwancr, Ord, Neb., was in this city for a few days of last week, on his way east.

T. L. Combs, of T. L. Combs & Co., has returned from a pleasure trip to Denver, Colo.

Harry Holmes, with Fred. Brodegaard & Co., is suffering with blood poisoning of the hand.

Geo. W. Ryan, of the Mawhinney & Ryan Co., went to Fairbury, Nebr., on business, last week.

A. M. Church, general watch inspector for the N. W. & W. railroad, was a visitor here last week.

W. J. Taylor, with the Sol Bergman Jewelry Co., is making a month's business trip through the State.

Miss Ella Gurnee, niece of S. W. Lindsay, has returned to her home in Chicago, after spending the holidays in this city.

W. H. Whittington, formerly watchmaker for Henry Copley, has resigned his position and returned to his old home at Columbus, O.

Albert Edholm will leave shortly, with Mr. Luce, in the private car, "Tenza," for an extended trip to the City of Mexico, Vera Cruz and other places of interest in Mexico.

H. S. Knapp, with the Shook Mfg. Co., is out on a three months' trip through Nebraska. Mr. Knapp recently sold his store at Bertrand, Nebr., to C. E. Ellis, Broken Bow, Nebr.

Robert Easley, Alexandria, Nebr., has sold out to Simons & Beere. Mr. Easley intends coming to this city shortly, to take a course in watchmaking. Later on he will open a new store in some town in this State.

The following out-of-town jewelers were in this city, last week, purchasing stock: J. W. Crabill, Plattsburgh; Mr. Farnam, Blair; A. W. Neihart, Elmwood; A. Zimmerman, Spalding; J. H. Saunders, Shendoah, Ia.; Mr. Sutton, Manilla, Ia.; and C. W. Loper, Cumberland, Ia.

The Huteson Optical Co., this city, tendered a banquet to about 25 opticians of Omaha at the Chesapeake Cafe, Jan. 8. The evening was spent in general conviviality, speeches being delivered by Mr. Huteson and others. Business matters were discussed and those present agreed to form themselves into a local organization, with Frank E. Colby as president; B. E. Wurn, vice-president, and J. C. Huteson, secretary and treasurer. Meetings will be held monthly and all matters pertaining to business will be brought up and discussed.

San Francisco.

Max Noack, Santa Rosa, Cal., purchased stock here last week.

The California Jewelry Co. now closes its doors during the noon hour.

Carl Landecker, St. Helena, was in this city recently, replenishing stock.

Paul V. Garin has put up a large electric sign in front of his Fillmore St. store.

Mr. Barbier, of the W. K. Vandershee Co., will go east shortly to purchase new stock.

San Francisco jobbers generally report that money is coming in from country jewelers unusually well this Winter.

Mr. Mayer and Sidney Weinschenk, of Mayer & Weinschenk, have just returned from an extensive trip through the northwest.

J. J. Valentine, of A. I. Hall & Son, who has heretofore looked after this firm's city trade, will, after this, go on the road with manufactured lines. The city trade will hereafter be in charge of G. F. Arnold.

Colonel Andrews, the oldest retail jeweler in this city, is in receipt of a cablegram from Nice, France, announcing the death of his daughter, Mrs. Rose Hastings, at that place. Mrs. Hastings was married to George Golden Hastings, of New York, about five months ago.

Ray E. Hoffman, a former employe of Shreve & Co., pleaded guilty on two counts of petty larceny last week. He was discovered appropriating money received for goods sold in Shreve's store during the holiday rush, and later was found to have stolen goods and pawned them on Fillmore St. He is the second culprit whom Shreve & Co. have apprehended within the last month.

The retail jewelry store of Fred. Strauss, Bismarck, N. Dak., was recently the scene of the first burglary committed in that town for several years. The store was entered about a week ago by burglars, who stole stock valued at \$350 from the show cases. An attempt was also made to enter the jewelry store of J. B. Cook & Co., of the same place, but the thieves were apparently frightened away before gaining entrance.

CASH FOR WATCHES and diamonds; send them at once and get your money by return mail. Joseph Brown & Co., Fifth Ave. and Madison St., Chicago, Ill.

FOR SALE, jewelry store in western Washington town of 15,000 population; a clean, first class and up-to-date stock of goods and fixtures; the reason for selling, failing health; stock about \$15,000; answer only if you mean business. Address "E. P., 8923," care Jewelers' Circular-Weekly.

FOR SALE, my jewelry stock, situated in the Berkshire Hills, Mass.; a fine opportunity for a young man; fixtures almost new; clean stock, no old goods; the reason for selling, I wish to retire after being in business 35 years; stock and fixtures \$6,000, can be reduced \$1,000. Address Hayden W. Wheeler & Co., 2 Maiden Lane, New York.

AT ONCE, one of the best jewelry stores in Indian Territory, located in the center of oil field; invoice about \$5,000; sales last year over \$11,000; population, 7,000, and growing fast; fine opening for optician; reason for selling, interested in oil business; write for further particulars if you mean business. Address "B. C., 8912," care Jewelers' Circular-Weekly.

FOR SALE; owing to failing health, from too close attention to business, I offer for sale a clean, well selected stock, in live railroad and manufacturing town of 4,500 people, in central south; fine climate; stock and fixtures worth \$4,000; watch inspection; own store building which I will rent at moderate price. Address "O., 8974," care Jewelers' Circular-Weekly.

WATCHMAKER and salesman, with good trade, wants to invest from \$1,500 to \$2,000 as active partner in retail jewelry business in New York City; answers requested from merchants who can prove a clear profit in the past year, and able to demonstrate that with increased capital, brains and hard work business can be doubled in a short time. "Confidential, 8992," care Jewelers' Circular-Weekly.

FOR SALE, jewelry stock, fixtures, tools and materials, in a good Ohio river manufacturing town of about 10,000 population; good fixtures and a nice clean stock, which will invoice about \$3,000; bench work good; fine opening for a good optician; one other jewelry store in town; this is a snap for some one; poor health only reason for selling. Address "R., 8937," care Jewelers' Circular-Weekly.

A FINE jewelry, optical and repair business, established over 20 years, is now on the market for sale; is in a fine Ohio town of 4,000; practically no competition; a chance of a lifetime for a young man looking for a good location; I must quit the business, as I have served my time; can reduce stock and fixtures to \$1,000 if so desired; rent is \$20 per month; must be good workman, as it is a railroad center; those answering must mean business. Address "O., 8985," care Jewelers' Circular-Weekly.

FOR SALE, good paying jewelry and optical business; age and failing eyes impel owner to retire; best city in Kansas; every advantage; no auction chestnuts; stock mostly staple; exceptional opening with finest future prospects; don't write unless you have at least \$3,000; will consider productive realty trade. "Jeweler," 316 Douglas Ave., Wichita, Kans.

DO YOU WISH TO RETIRE? We buy jewelry stores to any amount; also entire stocks of jewelry, diamonds, watches, silverware, fixtures, etc.; we are known all over the United States to pay highest spot cash; notify us, we will call on you at once; all business transacted we handle strictly confidential. Address, Brooklyn Purchasing Syndicate, 608 Broadway, Brooklyn, N. Y., or Tel. 2328, Williamsburg.

For Sale.

IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

ISSUE OF JAN. 1, 1907.

839,831. GUARD FOR EYEGLASSES. EDGAR J. GEORGE, Chicago. Filed Jan. 22, 1906. Serial No. 297,347.

A guard for eyeglasses having main arms or bearing portions, and upwardly and inwardly extending spring-arms connected therewith by bends approximately parallel with said main arms.

839,998. BIFOCAL LENS. HENRY C. JOERDEN, Marlino, Mo. Filed March 13, 1906. Serial No. 305,836.

A compound bifocal lens including an incomplete member, the incomplete portion being protected by another member of the lens.

840,096. WATCH CASE PENDANT. ADAM A. STENHOUSE, Montreal, Quebec, Can. Filed April 29, 1905. Serial No. 258,054.

In a watch case, the combination of a hollow pendant, a sleeve provided with a bore and secured within said pendant, a stem mounted in the bore of said sleeve, a crown carried by said stem and fitting over said sleeve, and a bow integral with said pendant.

840,435. BACK FOR BRUSHES. CHARLES E. CONDER, Cambridge, Mass. Filed June 28, 1906. Serial No. 323,811.

A brush-back comprising a body portion having formed therein a series of implement-receiving compartments, a cover hingedly connected to said back or body portion and adapted to be closed over said compartments, said cover having means for retaining articles disposed within said compartments in position and means for retaining said cover in a closed position.

840,456. FOUNTAIN-PEN. BYRON B. GOLDSMITH, New York. Filed Nov. 20, 1903. Serial No. 181,988.

In a fountain-pen, a removable ink-reservoir having a cylindrical tubular neck and a separately-removable pen-carrying feed plug fitting into the whole length of the neck and constituting a stopper or closure for the feeding end of said reservoir, substantially as described.

DESIGNS.

ISSUE OF JAN. 1, 1907.

38,391. SHIELD. WILLIAM C. CODMAN, Providence, R. I., assignor to the Gorham Mfg. Co., Providence, R. I. Filed Nov. 30, 1906.

Serial No. 345,844. Term of patent 7 years.

38,392. FRAME. GEORGE H. RICE, New York. Filed Nov. 16, 1906. Serial No. 343,770.

Term of patent 3 1/2 years.

38,394. FRAME. GEORGE H. RICE, New York. Filed Nov. 16, 1906. Serial No. 343,771.

Term of patent 3 1/2 years.

38,396. BELT. MAX ISENSTEIN, New York. Filed Nov. 28, 1906. Serial No. 345,575. Term of

patent 3 1/2 years.

ISSUE OF JAN. 8 1907.

840,487. TAG FOR JEWELERS' USE. DANIEL GOLDSMITH, New York, assignor of one-half to Charles P. Goldsmith and one-half to Isaac Loeb, New York. Filed May 5, 1903. Serial No. 155,716.

The herein-described marking-tag for fingerings comprising the two tablet portions A of

celluloid and the connecting strap portion b in combination with the fastening-rivet D, uniting the

two tablet portions at their edge remote from the strap, all as described to permit the tag to swing freely on the ring and to prevent the same from catching in the tray when the ring is restored to place.

840,495. TIME-RECORDER. ALFONSO L. JAYNES, Toronto, Ont., Can. Filed Jan. 10, 1906. Serial No. 295,459.

In a time-recorder the combination of a card-holder laterally movable; means for automatically moving said card-holder in one direction at predetermined intervals; means for automatically re-

turning the card-holder to its original position at a predetermined time; and means for locking said card-holder in each position; said means permitting a limited backward movement of the card-holder from each position other than the first.

840,539. SEAL. CLARENCE E. WHITMORE, Bar Harbor, Me. Filed March 2, 1906. Serial No. 303,890.

A seal, die or stamp comprising a head provided with a countersink or recess, and an initial-plate adapted to be fitted snugly within said countersink and having a groove near its outer edge

to form a thin edge or rim exterior to said groove, said plate being retained in place by crimping the rim of the head surrounding the countersink and at the same time crimping the rim surrounding the groove of the initial-plate.

840,551. UMBRELLA-CLASP. ALBERT BAUMGARTEN, Freeport, Ill. Filed Aug. 15, 1904. Serial No. 220,765.

The combination with an umbrella, of a resilient clasp secured at one of its ends to the

fabric of the umbrella, having a part formed to lie around the folds of the cover to retain them in close relation, and having an opening through which the umbrella may be passed into said clasp.

840,681. HAIR-RIBBON HOLDER. IDA BECKER, Hagen, Germany. Filed Oct. 11, 1906. Serial No. 338,406.

A holder for hair-ribbons composed of an upper comb having its teeth set in a concave plane, a

lower slotted comb having its teeth set in a parallel concave plane, means for pivotally connecting the combs, and a catch for interlocking the comb.

840,871. BRACELET-LOCKET. LOUIS E. SADLER, Attleboro, Mass., assignor to the F. H.

It's the Little Things that count.

The dainty little things that appeal at once to the casual observer. If it's useful, as well as ornamental, so much the better. Here is a LITTLE THING, so very useful and so pretty in design and finish, that you have but to show one to make a sale, and it yields a BIG PROFIT. It is called

The Automatic Eye-Glass Holder

Can be used as well for a Pencil Holder. It is made in Enamel, Gold, Silver and Rolled Plate, in a variety of artistic designs. We fully guarantee every Holder. We mean it, and will replace any Holder that fails to satisfy. Samples sent upon request. Send for catalogue.

Serial No. 347,902. Term of patent 7 years. 84,011. SHIELD. WILLIAM C. COOMAN, Providence, R. I., assignor to the Gorham Mfg.

Co., Providence, R. I. Filed Dec. 14, 1906.

Serial No. 347,903. Term of patent 7 years. 38,399. INSIGNIA. FRANK B. BOWER, Philadelphia, Pa., assignor to Phi Kappa Sigma

Fraternity, Philadelphia, Pa. Filed Sept. 17, 1906. Serial No. 335,043. Term of patent 14 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 29, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark ought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefore, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing herein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessors from whom he derived title for 10 years next preceding the passage of this act."]

PUBLISHED JAN. 1, 1907.

HUSTLING SALESMEN for SOUTH BEND WATCH COMPANY

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1905, FROM *The Illustrated Official Journal.*)

ISSUE OF DEC. 28, 1906

18,109. INDICATING. S. H. PARKS, Eastbourne, Sussex. Sept. 7.

In a method of setting hands or indicators moving over a dummy clock face or the like, the spindle of the hands, etc., is connected by gearing B to a setting pivot pin D, placed outside the clock

face, and actuated by a suitable key, which may be removed to prevent tampering with the indication. According to the Provisional Specification, the key may be irremovable, access to the key being obtained by opening the casing.

18,278. TEA-POTS, ETC. D. M. DUNDONALD, B.H.C., London. Sept. 9.

Tea or coffee pots as described in Specification No. 1926, A.D. 1901, are formed with a hollow top *d*, which, with a tray *t*, forms a receptacle for the tea, etc. The pot is closed by a lid *l*, with a

partition *l* for closing the infusion-chamber. The second base is formed by the handle *h* and projections *p*. A hinged flap attached to the top of the pot may replace the partition *l*, and the tray *t* may incline upwards and outwards.

18,322. DIAMOND AND LIKE TOOLS. W. R. PAIGE and E. C. STRONG, Sheffield. Sept. 11.

Relates to a diamond-holder for use in dressing stone, emery wheels, etc. The diamond *h* protrudes through a hole *g* in the crown of a metal cap *k* which screws on to the end *b* of a long rod

or handle *a*. The end of the rod *a* is formed with a cavity *c*, into which one angle of the diamond fits. By screwing the rod *a* into the cap, the diamond is firmly held in position between the cap and the rod. A lock-nut *m* may be used to keep the cap in position. The cap may be conical in shape.

18,344. FORKS AND SPOONS. H. SZAJA and W. GORSKI, Czenstochau, Russia. Sept. 1.

Table forks and spoons are made of two thin sheets *a* of metal of the requisite form, folded and soldered together, the intermediate space being filled with a layer *b* of light non-conducting

material, such as pasteboard. A wire may be inserted in the narrow portion of the handle as

shown. Fig. 1 illustrates the invention as applied to a spoon.

18,371. FOUNTAIN-PEN, ETC., CLIPS. A. MYERS, L. MYERS and F. R. BAKER, Birmingham. Sept. 12.

A pocket clip for fountain pens, pencils, etc., is formed from a split circular part A, Fig. 2, to

grip the pen, etc., provided with ears *f* and a spring tongue *d*, by which a lever *C* having pivots *k* is caused to clip the pocket by the end *i*. The tongue *d* may be set horizontally as shown, or vertically.

18,398. SAFETY-PINS, JEWELRY. J. ZUMWINKEL, Mülhausen, Thüringen, Germany. Sept. 12.

A safety-pin or brooch fastening consists of two pins 1, 2, pressed point to point by helical springs 3, 4. The pins are formed in one piece with the springs, which are attached to a central washer 5. Two bars, 7, 8, loosely engaging one another by claws 9 slide within the springs, to give lateral

rigidity. The outer ends of these bars are formed into buttons 10 which serve as handles for pulling out the pins. The washer 5 may be dispensed with, the pins 1, 2 being formed in one piece with a single helical spring. In modifications; (1) the springs are arranged in separate chambers of a common sleeve; (2) the springs are arranged in a common sleeve on which are guided two outer sleeves; (3) the pin guide-shanks 24, 25, Fig. 9, overlap and are connected to the ends of a common spring arranged in two sleeves 27, 28, sliding one on the other, so that when the sleeves are pressed inwards the spring is extended and the pins opened; (4) the pin guide-shanks overlap and form handles which, when pressed together extend the spring and open the pins. In all modifications, the helical springs may be flat as shown in Fig. 13.

Complete specification accepted Dec. 19, 1906.

3,018. TIME-RECORDER FOR VEHICLES. WHALEN.

Applications filed Dec. 10 to Dec. 15, 1906.

28,068. TEA AND COFFEE BREWER. W. J. LLOYD, Stoke-on-Trent.

28,119. CANDLE HOLDER. B. J. BACON, London. Complete specification.

28,152. HAIR-PIN. LOUISA OLDFIELD, Manchester.

28,224. UMBRELLA. J. B. HALL, London. Complete specification.

28,251. STUD. J. R. BROMLEY, Liverpool.

28,288. FOUNTAIN-PEN. THOMAS McDONALD, Middlesborough.

28,388. MATCH-BOX. R. H. WORLEY, London.

28,432. CHRONOGRAPH. H. J. ROBINSON & KYNOCH, LTD., Birmingham.

28,476. TIME-KEEPER. C. E. COPPLESTONE, London. Complete specification.

28,517. TIME-RECORDER. G. C. JERMYN, Norwich.

28,538. STUD. C. H. ABBOTT, Birmingham.

28,540. FOUNTAIN PEN. W. H. TANT, Birmingham.

28,708. FOUNTAIN-PEN. EVELYN DE LA RUE, London.

Designs issued July 7, 1903, for 3½ years.

36,407. BADGE. OSCAR BERNINGHAUS, St. Louis, Mo., assignor to the Louisiana Purchase Exposition Co., same place.

36,410. BADGE. C. C. PENFOLD, Buffalo, N. Y.

36,411. BROOCH. P. O. DICKINSON, Newark, N. J.

Souvenirs of the Season.

"HEALTH, happiness and prosperity, may 100 per cent. of each be yours for 1907." This was the New Year's greeting sent to his trade by George E. Darling, Providence, R. I.

New Year's greetings were sent to the trade by Koshland & Italia Co., Philadelphia, Pa., in the form of attractive folders with an appropriate quotation from "Poor Richard."

C. F. Rumpp & Sons, whose New York salesrooms are at 685 Broadway, have presented to their patrons neat and convenient engagement books, bound in black leather covers, 7 by 3½ inches. There is a separate page for each week of the year with space to note the daily engagements. On the outside, printed in gold, is the word "Reminder." On the inside of the front cover is a picture of the company's factory at 5th and Cherry Sts., Philadelphia. A holder and pencil are combined with the book.

Among the calendars sent out by manufacturers one of those that will be most highly prized by the recipients came from L. Heller & Son, 51 Maiden Lane, New York. Each month has a separate sheet on the upper part of which is depicted a New York scene, while below is the calendar. The scenes vary in each month, and altogether comprise a comprehensive collection of city views. The pictures are in half tone. The paper is in ecru and the typography in blue. The month's birthstone, with its significance, is mentioned at the foot of each calendar page.

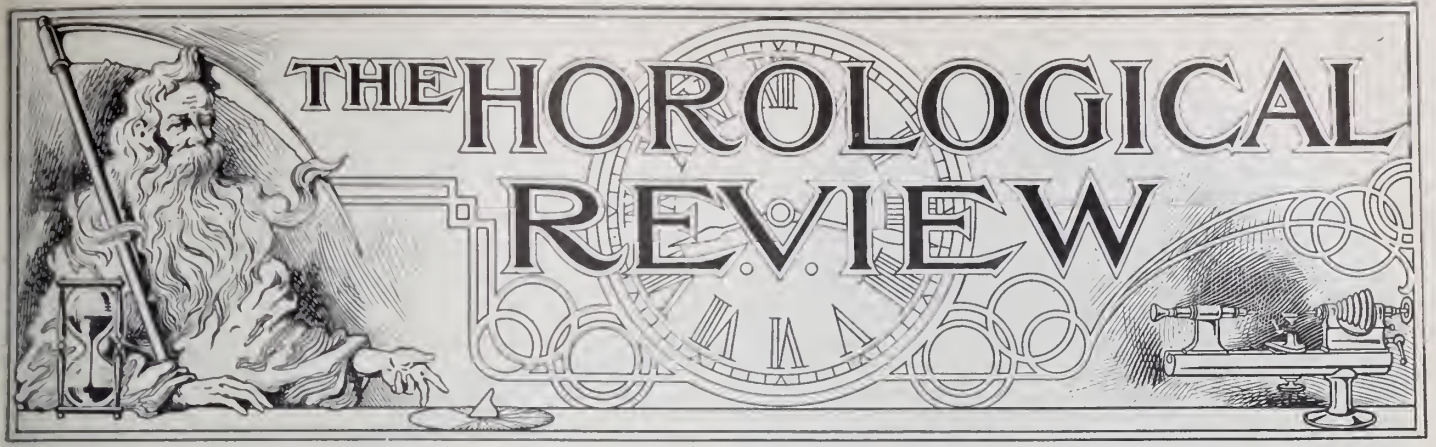

*The Great Driving Wheel of a
LOCOMOTIVE* traveling a mile a minute,
makes 403,361 revolutions in twenty-four hours:

*The Tiny Balance Wheel of a
WALTHAM WATCH* makes 432,000
vibrations in the same time:

The immense power and high speed
of the locomotive are rendered prac-
ticable only by the wonderful precision
of the watch.

*WALTHAM WATCHES are made
to fully meet the most exacting requirements.*

THE HOROLOGICAL REVIEW

Bohemian Glass-Cutter Makes Clock Entirely of Glass After Six Years' Arduous Labor

CLOCKS constructed entirely of wood, bone or ivory are already known to us; hitherto, however, we have not seen one made of glass. Even persons wishing to produce something quite out of the common have not ventured to handle this very brittle

all the details as the finely polished glass presented many reflections during the process of photographing, and some parts were covered by the hands. Everything in the clock (which is about 50 centimeters high) is made of glass except the mainspring, the balance spring and the pivots. The barrel, the wheels, the pinions, the escape-wheel, the pallets and the balance are all cut out of glass and polished. The plates and pillars are screwed on with glass nuts or fastened with glass wedges. Even the winding key, the little disks for the hands, and, of course, the hands are of glass.

The teeth and leaves are cut very clean and have approximately the proper shape. The escape-wheel alone is somewhat heavy in appearance, but the balance vibrates quite smoothly. The maker, a plain man, now 71 years old and blind on one eye, has worked at the clock for six years. Frequently a wheel had to be made 40 times before it would perfectly answer its purpose.

The price now asked for the clock is 3,500 marks. The clock will be on view in Leipsic for some time longer.

A CLOCK MADE ENTIRELY OF GLASS.

and intractable substance, and the most experienced clockmaker would never have succeeded in making a clock from it.

An old glass-cutter, Josef Bayer, of Theresienthal in Bavaria, has proved, however, that with patience and practical knowledge of treating glass a clock can be constructed out of this material. We reproduce herewith from the *Leipziger Uhrmacher Zeitung* a woodcut of this clock, now on exhibition at the well-known establishment of L. Doring, Leipsic, and kindly furnished by the proprietor, Mr. Herrmann, for the purpose of illustration.

The drawing unfortunately does not show

Gravity Escapements.

(From the London Horological Journal.)

AT the British Horological Institute, Northampton Sq., E. C., Dec. 4, a lecture was delivered by H. Cunynghame, C. B., of the Home Office, on "Gravity Escapements." There was a very large attendance. Mr. Desbois, who presided, having briefly introduced the lecturer, Mr. Cunynghame said if he was to deal fully with the subject that evening he would have to deal first with pendulums. In fact, it would be the subject for a long lecture in itself—the compensating of pendulums.

People thought that to compensate a pendulum all one had to do was to add a little weight either one side or the other. He would assume that evening, however, that they had succeeded in getting a perfect pendulum that had been properly compensated—which was a very delicate operation, instead of being the easy matter that some people thought. It was not the slightest use to make an escapement until the pendulum was right. The business of the escapement was to keep the pendulum going with as little disturbance as possible. He thought he had better say something about the motion. In a very rough way they could easily see why the pendulum swings equally.

The action of gravity in pulling down the pendulum was diametrically equivalent to the strength of the spring in pulling it into a horizontal direction. Again, if one pushed the pendulum aside with the finger the force exercised against the finger was proportional to the distance traveled by the pendulum. If they wanted to make a clock go approximately right, they would take, say, a grandfather's clock, and after putting a pendulum and an escapement on it, they would find it would go very well without much attention; but if they wanted to make a clock keep time to, say, the 30th of a second a day, the ordinary process of compensating would not do at all.

They would have to devote a much more careful study to the subject. They then find that the ordinary pendulum and escapement is inadequate, and a flexible spring must be used, and the best spring was one with a cycloid arc; and then they had to inquire into the matter of how much a variation in the cycloid arc threw the clock out of time. If they had a pendulum that swung on one side one degree out, so long as it was counterbalanced on the other side by that one degree, it would keep time; but supposing the escapement became stiff, and the arc was thereby varied by

Clockmaking in Japan.

THE manufacture of clocks at Nagoya is being carried on with considerable prosperity despite the fact that the manufacturers have great difficulties to contend with, says the *London Watchmaker*. During March of this year there were produced at Nagoya no less than 32,385 pieces.

At one time Japanese clocks lacked the essential qualities of a timepiece, and, strange as it may seem, that detail which in other wares the Japanese have been so famous for, but of later years they have acquired the faculty for detail in manufacture of horological pieces and, as a consequence, it has been found upon inspection that less than one per cent. has been rejected.

The price at present for the clocks made at Nagoya is 29 yen per dozen, showing an increase largely due to the rising price of copper.

The Horological Journal, 35 Northampton Sq., London, Eng., is now published on the 10th instead of the 1st of every month. The new schedule went into effect Jan. 1, 1907.

Time is Life

nine-tenths of a degree, what effect would that have on the going of the clock?

In order to examine that question he would have to put before them what looked like a formidable and terrible mathematical chart. Although it looked very formidable it was much less formidable than it looked. (Laughter.) He believed, too, it was much simpler than the charts generally presented in connection with the matter. He was not inflicting the chart upon them, unnecessarily. A body lifted up a certain height required a certain amount of work or force, and the speed of a weight falling down a curve would depend upon the height of the curve; and so if they went nearer the equator they would get a longer swing with the pendulum, according as the gravity increased. They would find a considerable difference near the equator, as instead of taking the arc down a cycloid they would have to take the arc down a circle, but the arc of the circle was not different from the cycloid, when they had a rather different swing.

The gravitational force of the earth varied even in different parts of the United Kingdom. It was different at Aberdeen to what it was at Greenwich; and then again it was different at Greenwich to what it was at Paris. Therefore their pendulums had to be rather smaller than the length given in the books. For every one-tenth of a degree there would be a variation in time of half a second. If they wanted their clock to go true to the 30th of a second they must not have a variation in the swing of the pendulum of more than 1/150th of an inch. They would have to use the microscope on the arc of the pendulum and weight it. They would find that they could load it very considerably without altering the swing the 1/100th of an inch, and every practical watchmaker knew what that meant. They could never make a perfect going astronomical clock unless they had a perfect pendulum, and unless they provided a mechanism that would not allow the arc of the pendulum to vary more than the 1/100th of an inch.

When pendulums were first invented various ideas struck people. In the first place there was Galileo, who used a simple form of pendulum. He had a model of the mechanism that was used by Galileo in his clocks. They would see that he used a wheel with teeth, and a ratchet which engaged each tooth of the wheel. The whole thing, however, was childishly poor, but for all that it contained the germs of our best modern escapements. The escapement, when Galileo lived, was the old crown wheel escapement. It went round horizontally. It was really like the balance wheel of a watch without a spring. They had, of course, huge clocks in those days, but they were built on an imperfect system. Then after Galileo followed Hygens, who invented swinging weights.

The next step was made by Hook, who made the anchor escapement. He was the first man to see that a small circular arc was the first step towards the cycloidal arc. The next man was Graham, who gave them the best escapement in existence. A clock-maker at Leyden had made a Graham escapement which was marvelously accurate.

The theory of the Graham escapement was investigated by Sir George Airey about

50 years ago. He then pointed out that if they had a pendulum receiving its impulse from both sides it got over the question of gravity. Sir George Airey would not deal with the question of friction. Like a good many more brilliant mathematicians, he left out the most important constituent of the whole affair. If the escape wheel was driven harder round they would get greater impulse on the impulse face. That would tend to increase the arc of swing, but then friction becomes an inconvenient factor.

The wheel of the Graham escapement is so nearly counterbalanced on each side, that when you add a little weight to the driving force the friction on one face is greater than on the other. It reminded him of the clock in a celebrated institution which was fitted with a Graham escapement. The escapement was made by one man and the pendulum was made by another, consequently they did not agree. (Laughter.) The fact could not be gainsaid, that they must experiment and experiment until the driving weight was so balanced that when you added to the driving weight it did not affect the arc of circle.

The old makers, when they worked upon this problem, did so by an extended series of trials, they fixed upon certain dimensions, and then others were made according to model, so that we were reaping the results of those experiments. If they wanted a Graham clock to go well, the best way was to add a little weight to the driving wheel on the one side, and a little weight to the pendulum on the other side, until they reached the correct ratios; but it would have to be done with the assistance of the microscope.

In making a Graham clock it was unwise to depart from the dimensions given, unless they wanted a lot of trouble in the adjustment. It had long been seen by a number of people that inasmuch as the going of a clock was very much affected by differences in the driving force, it would be very desirable to see if they could not make the driving force on the pendulum invariable, so as not to make it depend upon variations of the train. They might try experiments by putting on a little linseed oil, and watching the result. They would find that they could make a difference of 10 per cent. if they did. If they got those inequalities in the driving force they would get differences in arc, and consequently differences in working and going.

So far as he was aware, Mudge was the first man to make a gravity escapement. Lord Grimthorpe dropped that escapement, because he said it would "trip," but that was all nonsense. Dents had one for 60 years, but it did not trip at all; however, it had objections of another kind, to which Lord Grimthorpe's was not free. The real difficulty in the Mudge escapement is that the amount of friction was considerable. If one added a little weight to the Mudge escapement it made the arc smaller, and one had only to add enough weight to stop the clock altogether. If it was made too light the clock would move too fast.

Bloxham the barrister saw the difficulty of the Mudge escapement, and made an improvement on it, but with his escapement a difficulty sometimes arose through it slipping. Lord Grimthorpe got over the diffi-

culty by putting a little fly behind it, so that Lord Grimthorpe's escapement was really Bloxham's. When one reflected upon the legal ability and obstinacy of Lord Grimthorpe, they could readily understand how he overcame all obstacles and managed to get the job of the Westminster clock. The clock was still going, but he would not comment upon it. When one considered the weight of the hands, and how they were exposed to the wind and the rain, it went remarkably well. Sir George Airey also invented an escapement, and there was another invented by a man whose name was not known; but all these escapements were to his mind imperfect. The one he had there on view was very nice. It had a chronometer swing, the impulse only occurring in the middle of the pendulum. The pendulum would always accommodate itself to the force, if let alone, but the arc must not be altered. If they got oil congealed in a clock they would get a difference in the arc, and consequently a difference in the time.

The Graham escapement was an excellent one for a household clock; but if they wanted astronomical regulators of a higher order he doubted if they would get good going out of the Graham. The question was, therefore, to find out if they could not make another proposition which would have the advantages of the gravity escapement, and at the same time be free from the various difficulties which they had been obliged to recognize.

The one he presented to the meeting was one that he submitted as a solution to the difficulty. It had a little flipper at the top, and at every forward push of the pendulum the little arm was pushed aside. As far as his limited experiments had gone, one could load the escapement as much as they liked and it would not make any difference. They could see the movement for themselves and examine it after the meeting, and he believed they would find that it fulfilled the conditions he had described. The second hand of the clock could also be moved, so that it would synchronise with the minute hand.

Nothing was more annoying than to have a clock that showed the second hand on the black line when the minute hand was between the black lines. There was another point he should like to mention, and that was, to get clocks to go accurately they had to allow for temperature. They would find that the effect of barometric changes upon the going of a clock depended upon the shape and weight of the pendulum and the specific gravity of the pendulum. It was a delicate piece of mathematics to say what amount of change in the going of a clock the rise or fall of a degree in temperature would make. A change of an inch in the barometer would make a change in the going of a clock of about one-third of a second per day.

They made series of observations at Neuchatel on various clocks, and found that on an average a change of one inch in the temperature made a clock vary about one-third of a second per day. The question was—how could they compensate that? In his opinion the best plan was to shut the clock up in an air tight case, and then take an inch of the pressure off. If they took off

more it would probably be disastrous, as it would induce the air outside to enter the box. They should be content and take the pressure down to 29 inches. They would then find that the clock would be constant, and that was all they wanted.

With a bicycle pump they could occasionally gauge it up. They would find that if they put the clock in an air-tight case it would save endless worry and trouble with changes of temperature. With a clock of that kind they could make many interesting experiments. They could observe the arc by fixing up the microscope, and they could also observe the impulse arm. Then they could put on tiny weights and see how it increased the arc; 1/30th of a gramme so much, 1/20th of a gramme so much, and 1/10th of a gramme so much. They could measure exactly how much increase of arc would be affected by a certain increase of weight, and then they could calculate how much the going of the clock would be affected by a particular increase of arc.

Suppose, for instance, a particular increase of arc increases the going of a clock by one-third of a second per day. That would be a certain increase of arc. Observe how much weight would be required to produce that, and then arrange that the fall of an inch in the mercury will put that weight on. The best plan was to fix a little spring of gold, or other metal that is suitable for the purpose, on an aneroid barometer, and then, when the mercury fell an inch, the spring would be shortened by a certain amount. The shortening of the spring would diminish the pressure to a given amount. They could arrange so that, say, one inch or a proportional amount of a fall, would proportionately increase the weight of the driving arc, and so decrease the arc. None of the things he had shown them that evening were patented, and anybody was at liberty to make use of them. He thought the Hope Jones electrical escapement a good one, and it would not be difficult to make an astronomical clock out of his electrical clocks. The considerations he had to bring before them were, as to the requirements of the pendulum that it was better to apply the force to the bottom of the pendulum than to apply it higher up. The impulse should be given in the middle of the swing. This impulse should take place at the same instant as the unlocking takes place, and it should unlock in the center if possible, at the same time that the impulse was being given. The pendulum should be free, and the escapement attached.

There should be no oil on the escapement. They must get an attachment by which the gravity escapement is free from oil, and free from variations in Winter and Summer, and the unlocking of the crown must be done in an independent way by the residue of the force in the fall after it has completed its work of driving the pendulum.

Those were the principles that should govern all gravity escapements, and one could only hope that the labor of those engaged in the industry would give them something more definite and more tangible to deal with in the future. (Applause.)

Mr. Desbois proposed a vote of thanks to the lecturer, and Mr. Wright seconded. The lecturer briefly replied, and the meeting was then concluded.

During the delivery of the lecture, the lecturer referred to a number of models and diagrams which he had on the platform, and at the conclusion of the meeting great interest was evinced by the audience in the various models, which were critically examined and commented upon by interested groups of students and others.

Two Watches Possessing Historic Interest.

THE Danish *Tidsskrift for Uhrmagere* has a description and a drawing of a watch possessing remarkable interest from

A WATCH ONCE OWNED BY THE FRENCH REVOLUTIONIST, MARAT.

an historical point of view, having been formerly the property of the notorious Marat, one of the leaders of the French Revolution. The journal in question says:

At 8 o'clock on the evening of July 13, 1793, Charlotte Corday was admitted into the chamber of Marat, who was at that moment editing his political journal. What followed may be seen in David's celebrated

which the day and night together were divided into 10 hours, the hour containing 100 minutes, and the minutes, 100 seconds.

Horological Notes.

ON the stroke of the clock they light their streets in Bath, Eng. An automatic gas controller has been patented, which reduces the cost of public lighting by half. It is said to be adaptable to any type of incandescent burner, to fit any lamp, and to be instantaneous in its lighting and extinguishing. The mechanism consists of a clock, which can be so set as to light the gas each night and extinguish it each morning, so as to make an automatic variation of the time of lighting and extinguishing, according to the calendar. In short, by means of a clock the street lights are turned on and off, lighted and extinguished, at a different minute each day throughout the year, according to the season. One adjustment a year suffices. The controller requires no attention save a weekly or bi-weekly winding.

A clock pendulum made from invar needs no compensation, since its length is unaffected by variations of temperature. It is found that a rod of invar very slowly increases in length when kept at a constant temperature; this change extends over many years, but is not of sufficiently large magnitude to form a drawback to the use of invar in ordinary instruments of precision, although it renders this substance unsuitable for the construction of ultimate standards of length. Invar is destined to play an important part in ordinary geodetical measurements; here, the small progressive expansion mentioned above is of little consequence, since the standards of length can be periodically compared with an ultimate standard; on the other hand, the increase in accuracy is very marked.

An interesting article on Steel will shortly be announced in this department.

ANOTHER CURIOUS OLD WATCH.

picture. The painter has, however, forgotten one little detail, viz., Marat's watch, which was hanging on a nail at the head of the bath, and an illustration of which is shown herewith. This remarkable watch, the genuineness of which is beyond question, consists of two silver cases, made in the shape of a Phrygian cap. On the exterior of the case a narrow border bears the inscription, "N'aimez que la Patrie" (Love nothing but your country), and "N'obeir qu a la loi" (Obey nothing but the law).

It was the sole inheritance of the sister of the "Peoples Friend." A few decades ago it was sold at a public auction in Marat's native town in the Swiss Jura, and passed into the hands of M. Dardenne de la Grangerie. After his death it was sold in 1873 to M. Ramond, Councillor-General of

Up-to-Date Methods in Selling Watches

EACH NEW YEAR marks a milestone of advance with progressive business houses. Where new and improved methods are available, they are adopted; where former methods were the best, their continuance is confirmed; where success has crowned the past, plans are made to eclipse that success in the months that lie ahead.

Such are the sentiments animating these offices as they look forward to the watch business of 1907. The interests of the trade will continue to be conserved in the best manner, with a service always abreast of the times—if not ahead of them.

COMPARATIVE PROFITS FROM THE

THREE GRADES OF WATCHES

Profits on the cheap clock watches are comparatively small, for while they may sell fairly well, you make very little on each individual watch.

The profits on your expensive jeweled watches are somewhat larger, of course, but you have only a limited demand for these high-priced timepieces, which keeps the total profits down.

The greatest Demand of all—hence, the greatest profits of all—comes from your medium-priced watches.

New England

“The Watch for the Great American People”

The **NEW ENGLAND** is the very highest-grade medium-priced watch produced to-day.

The **NEW ENGLAND** line provides you with the largest and most attractive assortment of medium-cost watches. It enables you to sell from hundreds of men's and women's styles on a very liberal profit basis. We give you the most accurate, reliable and durable movement and case to sell at moderate cost, and we advertise **NEW ENGLANDS** broadcast so that your stock moves rapidly. Our 1907 advertising will continue our remarkably successful policy of advertising to the consumer and giving the dealer the full benefit of it.

If **NEW ENGLANDS** are missing from your line of medium-priced watches you are missing immense profit-possibilities. To make the most money out of your watch department you must have a complete assortment of medium-priced watches. No assortment of watches is complete without **NEW ENGLANDS**. Therefore let **NEW ENGLANDS** be your leaders—they please the people best and will pay you best.

Sit down at your desk now and write us for our catalogue and full information. Let us tell you about our Retailer's Aid Department—the most effective selling plan for watch dealers ever devised. Write us to-day. Address:

OPTICAL DEPARTMENT

THE EXAMINATION OF SCHOOL CHILDREN'S EYES AS REGULATED BY LAW IN SEVERAL STATES.

By F. ALLPORT, M. D., Chicago, in the "Ophthalmic Record."

THE annual systematic examination of school children's eyes, ears, etc., by school teachers has grown into a recognized necessity in most cities and States, even where such examinations are not required by the proper health or educational authorities or by an act of the Legislature. Thousands of teachers perform these examinations of their own volition, without even a suggestion from their superior officers. Nevertheless, these examinations should be made under proper authority and control, and should be recognized as an essential part of each year's curriculum. As is well known, the following resolution has been passed by many State boards of education and health and by many State medical societies:

Whereas, The value of perfect sight and hearing is not fully appreciated by educators, and neglect of the delicate organs of vision and hearing often leads to disease of these structures; therefore, be it

Resolved, That it is the sense of the American Medical Association that measures be taken by boards of health, boards of education and school authorities, and, where possible, legislation be secured, looking to the examination of the eyes and ears of all school children that disease in its incipency may be discovered and corrected.

In order that it may be clearly understood how the various States stand on this matter, I have prepared the following table, which will demonstrate just which State boards of education and health have passed the above resolution, and which State medical societies have done the same.

| State boards of education which have endorsed the tests. | State boards of health which have endorsed the tests. | State medical societies which have endorsed the tests. | State legislatures which have ordered the tests to be made. |

It will also show which State Legislatures have passed the idea as a law, and it should not be forgotten that the American Medical Association, the State and Provincial Boards of Health of North America and the American Public Health Association have indorsed the plan.

The best law which has yet been passed is the one recently enacted in Vermont, and I would recommend this is a model law, at least from our present standpoint. Of course, the appropriation for the furnishing of the proper testing apparatus, etc., would have to be increased in larger and more thickly populated States than Vermont. The Vermont law is here given:

Section 1. The State Board of Health and the Superintendent of Education shall prepare, or cause to be prepared, suitable test-cards, blanks, record books and other needful appliances to be used in testing the sight and hearing of pupils in public schools, and necessary instructions for their use; and the Superintendent of Education shall furnish the same free of expense to every school in the State. The superintendent, principal or teacher in every school, during the month of September of each year, shall test the sight and hearing of all pupils under his charge, and keep a record of such examinations according to the instruction furnished, and shall notify, in writing, the parent or guardian of every pupil who shall be found to have any defect of vision or hearing, or diseases of eyes or ears, with a brief statement of such defect or disease, and shall make a written report of all such examinations to the Superintendent of Education, as he may require.

Section 2. The State Auditor is hereby directed to draw his order on the State Treasurer for such sums and at such times as the Superintendent of Education (with the approval of the State Board of Health) may require to carry out the provisions of this act. The total expense under this act shall not exceed \$600 in any biannual term ending June 20.

Section 3. This act shall take effect July 1, 1905.

Inasmuch as this matter is now quite gen-

erally and thoroughly understood, and has already made a significant impression in many States, it would seem as if the time was ripe for a general effort in medical circles to still further emphasize the plan, with the ultimate purpose of legislative indorsement. Probably the most encouraging field for such efforts will be in those States where considerable work has already been done. For instance, in Minnesota the plan has been indorsed by both the Board of Health and the Board of Education, and also by the State Medical Society. It should, therefore, with this backing, be easy to go before the Legislature at its next meeting and secure the passage of a law similar to that of Vermont. I understand that it is now quite certain that this will be done in Colorado.

In Kansas (the State boards of education and health having indorsed the idea) the physicians of the State should secure action in their State Medical Society, and then go before the Legislature for its approval. The same is true of Wisconsin and North Carolina. Illinois physicians should convince the State Board of Education of the necessity of such action and then attack the Legislature. The same is true of New York, Montana, Indiana, Michigan, North Dakota, Rhode Island, Alabama and New Jersey. I understand they have great hopes of a law in New Jersey at the next meeting of the Legislature. It is unnecessary to draw further deductions from my table, but it is evident that the pioneer work of this movement has been done, and that it only remains for our profession to press energetically forward in order to reap the benefits of such labor.

Let me urge that the different States take the matter up at once, as some Legislatures meet this Winter, and that at the next meeting of the American Medical Association a central committee be appointed which shall be duly authorized to solicit action in the various States.

Eye-Glasses in The Reichstag.

A BERLIN journalist has just been taking a census of the short-sighted members of the Reichstag, and he finds that out of 397 Deputies 105 use glasses. Party politics may be determined, according to the German statistician, by the kind of glasses affected. The eyeglasses, he declares, mark the Anglophile, and are rarely seen. Spectacles are very popular, and are generally worn by the party of the center. The pince-nez seem to indicate socialism and revolutionary tendencies.

Optical Department.

Opticians of the Old School and Some of Their Teachings.

(By DR. P. PANSIER, of Avignon, in the *Canadian Optician*.)

(Continued from issue of Jan. 9.)

AS to the rules to be followed in the selection of convex glasses, Adams says:

"The important point is to understand that magnification is not the only consideration. On the contrary, in order that spectacles be suitable, they ought to allow us to see clearly and easily at the distance we used to work before taking them."

They are too strong when they magnify objects and oblige us to bring these objects much too near the eyes. As the flattening of the eyeball increases, stronger convex glasses must be taken.

When he has no optician near at hand, the presbyope will do as the myope; he will send both distances of distant vision and the distance at which he wishes to see. These two distances are multiplied, and the product is divided by their difference. The quotient is the focal length of the required glass.

During the 18th century, says Thomin, an empirical scale giving the glass corresponding to the age of a subject has been established. Pierce shows the danger of such a practice and the mistakes which may result from it:

"It is impossible to give a fixed rule for determining the glass corresponding to the age. In every subject the sight is more or less weakened. Many young men, under 20, have come to me because they could not read or write without glasses of six to eight inches, whereas I have known old men 80 years old who could read the finest print without glasses. I have known a person who began to use glasses when 40; some time after this person was compelled to change her glasses and take stronger ones, and now—although she is 80 years old, the latter glasses (14-inch focal length) allow her to see small print distinctly."

SPECTACLES USED AFTER CATARACT OPERATIONS.

People having been operated upon for cataract, says Adams, want strong glasses to distinguish distant objects. Generally they want spectacles for near vision and spectacles for distant vision. The necessary focal length varies between six inches and an inch and a half.

From the complete absence of accommodative power in people having been operated upon for cataract, Adams concludes that the crystalline lens plays an important part in the act of accommodation.

Many subjects really want spectacles, but there are many others who will wear spectacles without the slightest want of them. Ramsden used to relate to Kitchiner that he often had more trouble to persuade people that they did not require glasses than to find the proper glasses for really defective eyes. After having tried the whole series of lenses, he finally gave to these anxious people plain glasses, and then the patient exclaimed: "At last, I see perfectly well. Why did not you try those sooner?"

There are also old men who consider as

a calamity the fact of being able to read without glasses. Ramsden had the visit of a lady one day who asked him to find her a pair of spectacles. In vain she had been to see several opticians, but she had found nothing to suit her. After having tried the whole series of glasses, either concave or convex, the old lady exclaimed with a sigh: "No, no; none of these glasses suit me; I see much better with my eyes. How unhappy I am, at my age, not to be able to find glasses to read!" Ramsden, in order to console her, observed that many old people had, like her, the sight weakened to such an extent as to make them unable to read. "But you are mistaken," answered the lady. "I did not tell you that I did not see enough to read. I read perfectly well and as long as I desire. I only complain to be obliged to read without spectacles at my age."

As frames, the English oculists and opticians recommend the folder or the spectacles. They consider as a dangerous practice the use of the monocle or single eye-glass. Adams relates that he did not know a single myopic person who had to take stronger concave glasses if spectacles had been used, whereas he could give numerous examples of people who, having used a monocle, had been obliged to increase frequently the strength of concave glasses.

The end of the 18th century saw the birth of a new combination—the stenopaic spectacle. It was only the stenopaic hole combined with a glass, as it had been indicated by Dacca de Valdes. Adams says:

"The natural wish of dealers of enlarging their trade and of increasing their reputation, was the cause of many inventions and modifications which have been equally bad for science and for the public. Among these inventions are the stenopaic spectacles. The inventor of these spectacles succeeded in persuading numerous people attracted by the novelty that they were of an incontestable value and of great utility. But at last these spectacles were estimated at their just value and their evil action is so well known that a few persons only who have become used to them continue them.

According to Adams, colored glasses must share the fate of the stenopaic spectacles. Two reasons led to the use of green glasses: First, the belief in the beneficent actions of green on the sight, and also the idea that one could, in this way, soften the light arriving upon the retina. Spectacles, in order to fulfil the first indication, ought to color objects and to give them the particular qualities of green, which is an impossibility. Moreover, because of the law of contrast, Adams thinks that when green spectacles are put aside objects must appear with a red coloration. The retina thus tired rather than rested.

Crisp studied the effect produced on the eye by the wearing of spectacles with differently colored glasses. The object is seen with a color intermediate between those which affect the retina. A blue glass and a yellow glass superimposed give strong green, but with spectacles having one blue glass and one yellow glass the intermediate color is green, but not so pure and washed with white. These are only experiments, and the wearing of such spectacles cannot be anything but bad for the sight.

A Case for the Physician.

PITTSBURG, Pa., Jan. 9, 1907.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

Kindly give me your advice regarding the following case: The patient is a man 48 years old. The eyes are rather small and prominent, with somewhat of a fixed stare. He claimed he had fine sight until lately. He worked where there is grit and heat and got something in his eye. I found grit and a hair holding quite fast to the cornea. This attended to, I bathed his eye with salt water and told him to call again. Using the test type 20/200, vision was fair. The left eye was slightly better than right when tried separately,

With glasses—

R + 25 \ominus cyl. + 25 ax. 90° }
L + 25 \ominus cyl. + 25 ax. 90° }

secs 20/70

I tried stronger plus with no improvement; then stronger cylinders with still no improvement. I also tried minus with the same results. Pin hole gave no improvement. The patient sees double with or without glasses, when he looks at the test card. I next tried prisms, but could not produce single vision. My experience is only as a beginner, and having bought a DeZeng ophthalmoscope I tested him, with the following results: Without glasses the reflex was rather pinkish, and from above appeared a dark crescent. The other eye was in about the same condition, except it appears to have a slight seam across the center. Besides that I detected a black spot or so, and also something resembling several small oval-shaped spots. With above glasses the seam appeared to vanish, also the small spots. Still I could not clear the reflex either by + or — in the ophthalmoscope. I now tried the indirect method and on drawing the lens away the crescent darkened to a dark steel blue and seemed to enlarge. S. N. D.

ANSWER:—You should bring to bear the greatest judgment possible in a case such as you describe. You are aware, no doubt, of the strained feelings that exist between optometrists and oculists. Much of this is due to the optometrists' not carefully differentiating between optometrical and medical cases. An experienced optometrist would have immediately recognized the case you refer to as one demanding medical treatment for many unquestionable reasons which you failed to note. While one may gain a first-class theoretical knowledge of optometry from books alone, we believe that you would be wise to place yourself in the hands of a competent instructor, who alone can give you the necessary details of the practical applications of the principles involved. When you bathed his eye with salt water you were illegally practicing medicine and could be prosecuted. When a patient requires only +.25 +.25 and sees only 20/200, is it not evident that something other than a reverberatory exists? If the pin hole does not improve vision, it is almost an infallible sign that there is a disease of some sort present. The fact that sight fails testing is also evidence enough to warrant your not touching the case. For some valuable points on pin hole tests see issue of THE CIRCULAR—WEEKLY, Feb. 7, 1906, page 199.

[THE END.]

Optical Department.

Meeting of the Optometrical Society of the City of New York.

THE last meeting of the Optometrical Society of the City of New York was held Jan. 9, 1907, in room 16 of the Fifth Ave. Hotel, New York.

The president, Mr. Fisher, called the meeting to order. The society is nearly through with Henderson's Lessons on the Eye. The Educational Committee, of which Mr. Ryer is chairman, was reminded to decide on the second book of the course, which will be a book on optometry.

On a motion made by Mr. Wenzel, and seconded by Mr. Levin, and carried, an auditing committee was appointed to audit the books of the treasurer and financial secretary for 1906. The president appointed Messrs. Frankel, Michel and Hotaling. The receipts were large and bills and disbursements were ordered paid on motion made by Mr. Dilworth, seconded by Mr. Frankel, and carried.

Wm. B. Flect, of 152½ Madison St., Brooklyn, was elected a member of the society. Application for membership was received from J. B. Braunstein, 253 Grand St., New York City, and laid over for action at the next meeting.

The San Francisco Society of Optometrists sent in a request for a copy of the society's code of ethics, which the secretary was instructed to send. A. Weiner, 2827 Third Ave., New York, sent in his resignation as a member, which was accepted.

Mr. Michel made a motion that a committee of three or five be appointed as an examination committee, in order that any person desiring to become a member of the society will have to pass an examination to show his possession of some knowledge of optometry, and to qualify as a person of good habits, character, and so forth.

This subject was thoroughly and fully discussed and almost generally favored by all the members. After this discussion it was decided that Mr. Michel's motion was out of order, as the constitution permits any person engaged in optical pursuits, of good moral character, aged 21 or over, vouched for by two members of the society, to join the society, without any provision for an examination.

Mr. Ryer thereupon moved, with motion seconded by Mr. Levin, that the motion be referred to the executive committee to draft a change in the constitution, embodying the idea set forth by Mr. Michel. This motion was carried.

Upon motion of Mr. Frankel it was agreed that parlor D R be engaged for the meeting room for the balance of this year.

The hour being late, Mr. Ryer did not deliver his usual lecture, but it will be delivered before the quiz at the next meeting. Lessons 20, 21 and 22 are to be studied for the next meeting.

Professor Lockwood then began his quiz on lessons 17, 18 and 19 of Henderson's Lessons on the Eye, and the questions were ably answered by the members present.

The following are some of the principal questions:

QUIZ QUESTIONS.

1. What is Photophobia?
2. How is Corneal Opacity detected?
3. What is Bлеpharospasm?
4. What is Staphyloma?
5. What is Hyperemia?
6. What is Synecchia?
7. What is Lacrymation?
8. What are some of the effects of a Corneal Ulcer?
9. What is Pannus and what is the supposed cause?
10. What is total Staphyloma?
11. What is an Arcus Senilis?
12. What is Keratoconus?

Indiana Optometrical Society Vigorously Seeks Legislation Governing Practice of Optometry.

INDIANAPOLIS, Ind., Jan. 9.—The 10th midwinter meeting of the Indiana Optometrical Society was held at the Denison Hotel yesterday, President J. H. Ellis, of South Bend, presiding, and Margaret Erisman, Lafayette, acting as secretary. Twenty-five members were present.

President Ellis made his annual address, in which he said that the society has prospered during the past years. Both membership and revenues, he said, show an increase. Never before, he added, was the society in such a healthy condition. The need of State legislation was then explained by Mr. Ellis, who referred briefly to the attempt of the society four years ago to get a law enacted to define and regulate the practice of optometry. A satisfactory bill was passed, he said, by both branches of the legislature, but was vetoed by Governor W. T. Durbin, who stood opposed at that time to all State boards.

President Ellis then declared that the prospects for securing the passage of a similar bill by the General Assembly that convenes to-morrow are good. Governor Hanly, he said, will not oppose the measure if the Legislature considers it favorably. Upon the suggestion of President Ellis the society then resolved itself into a legislative committee to analyze a bill that had been prepared by a committee of the society of which H. E. Woodward, of this city, was chairman.

This bill is for an act to define and regulate the practice of optometry and Section 1 provides that the practice of optometry be defined as follows: "The employment of skilled means to determine the accommodative and refractive conditions of the eye, its requirements, the scope of its functions in general, and the act of adapting lenses for the relief of eyestrain and the betterment of vision.

According to Section 2 nothing in the act shall be considered to apply to physicians and surgeons authorized to practice under the laws of the State of Indiana, nor to resident merchants so long as they sell spectacles as any other piece of merchandise without representation of qualification on the part of the seller.

Section 3 provides that it shall be unlawful for any person to practice optometry in the State unless he shall first obtain a certificate of registration from the board, created by the act, and file the same with the clerk of the circuit court of the county in which he proposes to practice, and Sec-

tion 4 creates a board which shall be known as the Indiana State Board of Registration and Examination in Optometry, whose duty it shall be to carry out the provisions of the act. The board shall consist of five members who shall have been resident opticians, engaged in the actual practice of optometry in the State for a period of five years prior to their appointment. The appointments shall be made, one by the Governor, one by the Indiana State Board of Health, and three by the Indiana State Optical Society.

Section 6 provides that every person before beginning to practice optometry in the State shall pass an examination before the State Board of Examiners. Such examination shall be confined to such knowledge as is essential to the practice of optometry. A fee of \$10 shall be required of each applicant examined and an additional fee of \$15 shall be required of the successful ones before certificates are given them.

By Section 7 every person who is engaged in the practice of optometry at the time of the passage of the act shall, within 90 days thereafter, file affidavit in proof thereof with the board, which shall issue certificates to such practicing opticians in the consideration of the payment of \$5. In case of change of residence from one county to another, the holder of an optician's license may obtain a new license without charge.

It is provided that every person to whom a certificate of examination or registration is granted shall display the same in a conspicuous part of his office; and that the members of the board may receive as compensation the sum of \$5 for each day actually engaged in the duties of the office, such funds to be drawn from the revenues of the office. Mileage is also allowed the board members. Moneys received by the board in excess of \$500 shall be paid annually into the general school fund.

Registered opticians shall pay an annual fee of \$2 and the board shall refuse to grant a certificate to any person stigmatized by crime, immorality, habitual drunkenness, gross incompetency or contagious diseases, and may revoke licenses for like cause. For violations of the act a fine of not less than \$10 or more than \$100 shall be imposed.

A committee, of which C. M. Jenkins, Richmond, was made chairman, was appointed to place copies of the proposed law in the hands of each legislator and to push the bill through the General Assembly.

Officers of the society were re-elected as follows: President, J. H. Ellis, South Bend; first vice-president, H. E. Woodard, Indianapolis; second vice-president, E. C. Canada, Winchester; secretary, Margaret Erisman, Lafayette; treasurer, M. C. Kline, Crawfordsville, and chairman of the executive committee, William Edwards, Knightstown.

The next meeting of the society will be held in this city in April, when Henderson's work on the eye will be taken up and reviewed. President Ellis was authorized to appoint nine "quiz" masters, who will conduct a number of oral examinations at the meeting.

Edwin M. Flye, a jeweler of Holbrook, Mass., narrowly escaped serious injuries during a fire which broke out at his cottage at Saginaw Hill, Nantasket, recently. The house and contents were entirely destroyed.

RETAIL JEWELERS ADVERTISING

Early Suggestions for St. Valentine's Day Advertising.
A Review of Some Persistent Western Holiday Advertising.

VALENTINE'S DAY advertising is just about due and the enterprising jeweler will lose no time in laying out his advertising campaign to secure a large part of

ing their advertising, forgetting the lucrative business accruing from timely advertising before St. Valentine's Day. It is often advisable for the jeweler, particularly if lo-

of novelties manufactured for the occasion, such as gold heart-shaped lockets, brooches, signet rings and the more expensive brooches, consisting of large heart-shaped stones surrounded by pearls, twin heart brooches, scarf pins, heart-shaped cut glass nappies and a thousand and one other novelties too numerous to mention in this limited space.

It is an excellent idea to mount valentine gifts on heart-shaped cards, bearing the inscription "To My Valentine." Among the articles which may be offered in this way are lockets, cuff links, bracelets and small sewing sets, consisting of scissors, thimble and emery.

The captions in the advertisements should in some manner suggest the day. The following might be used: "St. Valentine Jewels," "For Your Valentine," "Valen-

Christmas Gifts

AS CHRISTMAS draws nearer, and there are now but thirteen shopping days, the rush for gift buying becomes more strenuous. In the selection of gifts it is the desire of everyone to see the greatest variety with the least trouble and the greatest possible haste. Here in this jewelry store you have the most varied opportunities for gift buying. Intimate knowledge on our part, of the wants of the people, and our resources, enable us to greatly simplify your jewelry buying, and you will find that we have provided this year the greatest quantity of good gifts we have ever shown. The range of selection is much greater than can be found in most stores, beginning at the least expensive good things, and going upward in elaborate articles to those of greatest worth and cost.

Consider this Fact—Every Article in this Store is Guaranteed.

No element of risk can enter into your buying, for everything is sold on its merits, with the plain truth told about it. If you are not entirely satisfied, we will willingly exchange the article at any time.

Watches, Clocks, Rings, Diamonds, Brooches, Cut Glass, Chains, Art China, Bracelets, Opera Glasses, Umbrellas. Articles will be laid aside until Christmas if you so desire.

Hugo S. Feczheimer

ANOTHER GROUP OF RETAIL JEWELERS' ADVERTISEMENTS USED DURING THE HOLIDAY SEASON.

business which judicious advertising will bring his way on this occasion. The time has passed when people confine themselves solely to the giving of valentines, the jeweler's shop now being sought for attractive little gifts as well. After the holiday rush many jewelers are liable to postpone resum-

ing their advertising, forgetting the lucrative business accruing from timely advertising before St. Valentine's Day. It is often advisable for the jeweler, particularly if lo-

ing their advertising, forgetting the lucrative business accruing from timely advertising before St. Valentine's Day. It is often advisable for the jeweler, particularly if lo-

ing their advertising, forgetting the lucrative business accruing from timely advertising before St. Valentine's Day. It is often advisable for the jeweler, particularly if lo-

ing their advertising, forgetting the lucrative business accruing from timely advertising before St. Valentine's Day. It is often advisable for the jeweler, particularly if lo-

Retail Advertising Department.

CIRCULAR-WEEKLY will be published in the issue of Jan. 23.

The holiday advertising was so strenuous and persistent that it is difficult to forget it. Here are still more ads, which were used to good advantage. The first, that of Leon Levi, Baltimore, Md., occupied a space 11 inches, double column. It is well illustrated and accompanied by attractive prices.

The ad. of Hugo S. Feehlmeier, Detroit, Mich., was used in a space of four and one-half inches, double column. The illustration, it seems, is more adapted for advertising during the wedding season. "The new Jewelry Shop, 12 John R. St., just around the corner from the Gas Co.," is certainly a facetious style of giving directions to the prospective purchaser.

Chris. Hewig, Evansville, Ind., manifests excellent taste in the selection of the borders used in his announcement of 15½ inches by 8¾ inches. The articles illustrated in this border, drawn in a rather up-to-date manner, offer many suggestions to the buyer and allow the advertiser to dispense with the use of cuts in the body of the text. For that reason this border is desirable in holiday advertising when it is the purpose of the jeweler to adopt a general style of advertising and at the same time to economize space. The two different sizes of type used in the introduction do not enhance the appearance of the ad. This should always be avoided. If the space is insufficient the whole introduction should be printed in smaller type or cut down.

Weld & Sons, Minneapolis, Minn., have a neat art nouveau border in their advertisement of four and three-quarter inches, double column. The advice given to buyers to make purchases without delay was timely.

The La Valliere chain makes a suitable border for the advertisement of the Cady & Olmstead Jewelry Co., Kansas City, Ky., who are advertising these articles exclusively in this ad. Exception might be taken to the spelling of the word La Valliere in the caption. The text is literally as follows: "Lavallier Necklaces an appreciated gift. Dear to the feminine heart is a Lavallier necklace. Such is its beauty that the admiration it compels is not measured by its moderate price. For gifts which give lasting pleasure these jeweled ornaments are incomparable. There is a certain refined taste which these Lavallier necklaces always satisfy completely. The graceful chain from which depends the delicate ornamentation is of gold, and for the stones may be had diamonds, pearls, opals, amethysts, tourmalines and aquamarines. Beautiful for Christmas presents. They range in price from \$8 to \$500."

The ad. occupied a space of four inches double column.

The headpiece and introduction in the ad. of P. J. Koke, Grand Rapids, Mich., is marred by printing lengthwise on the left of the cut the word "diamonds." The ad., which occupies five and three-quarter inches, double column, would look better had this strained attempt at originality been omitted.

See next week's issue for an original window display for St. Valentine's Day.

Advertising Literature Extolled.

THE writing of advertising literature was ably discussed at the recent 83d dinner of the Sphinx Club, held at the Waldorf-Astoria. Robert C. Ogden, of Wanamaker's, said that a simple definition of advertising literature was the presentation of goods or services by means of the English language. Continuing Mr. Ogden said:

"The snobs of literature might possibly look down with contempt upon a gathering of advertising men. Nevertheless, advertising presents a special field for literary art. There was current history for Gladstone in the advertising pages of the American editions of English magazines, which he said he read. This is an evidence of the literature in advertising.

"There is some reason for the contempt of literary snobs in some of the drivel, overstatement and bad English that brings advertising under suspicion. In quality of composition the advertising pages should equal the editorial. An advertising editor to make material acceptable and to keep out the unacceptable would be an admirable thing. An advertiser should have an open mind and a broad knowledge of literature that would not result in imitation of words, but in inspiration."

Arthur Brisbane said that the advertising writer had a harder job than the purely literary writer. "The literary writer has already sold the goods when his writing is printed," he said. The advertising writer's job has only begun at that stage. He has to persuade people to buy something else. The advertising writer, as the voice of the merchant, the most active agent in solving the great problem of distribution, is doing a great work."

Do Not Let Down After the Holidays.

THERE is a very important time to be considered just now that will really mean more in the end to the merchant than either of the holidays. That time is the period after the holidays. After Thanksgiving comes a lull until Christmas, and after Christmas comes another lull. At these times merchants are only too apt to grow a little careless and to disregard many important things.

It is well to merely call attention to that fact right here and warn readers that after the rush and the hurry and worry of the holidays, greater effort must be made than ever before to see that the prestige gained and the new business attracted at these times continues our way for other business.

Advertising after the holidays is of a most difficult sort. It is harder to advertise after the holidays and during the dull spells than at any time, but still the store must be kept plainly before the public and every effort must be made to keep the store busy every minute. The profits taken during the holidays will soon fade away after the holidays are over unless something is done to keep things going.

Just as a gentle reminder, do not shut off the steam and set the brakes after the holidays have passed. Keep the throttle open, pile on more coal, steam up and push harder than you did before.—*General Merchants' Review.*

What Some Jewelers Say.

CUT Glass That's Rich and Artistic, but Not Costly!—We carry a selection that the best store in the United States could be proud of showing. The quality is white and pure, and the designs are the most artistic and up to date. The blanks are cut exceptionally heavy and deep, to give a very rich and brilliant effect. Water sets, sugar and cream sets, fruit bowls, punch bowls, vases, flower baskets, bonbon dishes, etc. We prefer a modest profit and the good will that has made this the most popular store in Detroit. That's why our prices are 25 per cent. less than you will get elsewhere.—Hugh Connolly, Detroit, Mich.

Diamonds.—The grade of diamonds that we sell appeals not only to those who admire the natural beauty of a fine stone, but also to those who are seeking an investment for their money and who desire above all things an absolute assurance of the security of their investment. The diamonds we sell are carefully registered with name of purchaser, date of sale and an accurate description of the diamond itself. At any time in the future, one month or 10 years, the length of time makes no difference, the diamond we sell is worth its full cash value to us for anything we have in our store, or can be applied in the same manner toward a larger diamond if the customer so desires. This guarantee of ours makes your diamond a readily convertible asset, and aside from the natural increase in value that characterizes fine diamonds, you are entirely protected from any loss or depreciation. Poor diamonds are always plentiful, because as soon as the owner becomes aware of the inferior quality of the stone he is naturally quite anxious to sell, trade or dispose of it in some manner, and is frequently willing to sacrifice a considerable portion of the price originally paid. Our expert knowledge of diamonds and the reputation and responsibility of this house will safeguard your interests more than a casual buyer would perhaps realize at the time.—Henry Plumb, Des Moines, Ia.

The remarkable accuracy of a great many of the watches that we have sold during the past few years we attribute almost entirely to the system of examination and inspection that all of the watch movements we buy must undergo before they are put into our show cases. As the watch movements come to us from the factories, they are fitted in the gold or silver cases in which they are to be sold, and then set aside in our safes and carefully timed and inspected for a period of a week or 10 days. Any imperfections are noted by our watch expert, and no matter how slight the defect is the watch movement is at once rejected by us and returned to the factory. We do not see how it is possible for any watch movement that has successfully undergone such a series of tests to fail in keeping the most accurate time. Only the watch movements that are capable of the most careful adjustment and regulation are sold to our customers, and we believe that if you intend investing \$12, \$15, \$20 or upward in a watch, you will secure the full value of your money in purchasing one of these "time tested" watches sold by this store.—Henry Plumb, Des Moines, Ia.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Minor Economies

A Practical Storekeeper's Advice Regarding Various Ways of Curtailing Business Expenses

It has been wisely said that our financial success is dependent not upon what we make, but what we save. Almost any man can make money, but it takes a good man to save it.

In the matter of economy we are likely to look to the greater savings and ignore the smaller ones. They talk a good deal about the penny wise and pound foolish way, but the most of business men are more apt to be pound wise and penny foolish. The little leaks are the ones that sink the ship.

It is easy to see where the big leaks are. We have no trouble in finding out in what ways we can make big cuts in expenses, but the little expenses we forget about. We fail to realize their importance.

In the first place, it is not wisdom to cut off large expenses which have proved themselves to be profitable expenses. We could not do without paying rent or light bills. The advertising bill is one that a good many merchants have tried to cut into to add to their profits, and in the end they have found that they cut down the business more than they saved by cutting off the expense.

Think well before cutting off anything that is adding to the amount of business that you are doing. Examine the expenses connected with such things closely, and if there is a chance to get the same results at less cost, that, of course, is desirable, but you don't want to spare any of the results.

In the matter of small expenses there are a thousand and one ways that a big store and nearly as many in a small store where the money can dribble away unnoticed. It is needful that these little wastes be located and stopped if you would make your profits what they should be.

There is a happy medium between stinginess and wastefulness in store management, and this is where safety lies. You cannot cut out the expenses caused by progressive methods without putting your store behind the times. You must have modern conveniences and a comfortable store, or you will lose more than the expense of the conveniences.

Perfect system in all parts of the store will cut out useless expense and extravagance to a great extent. Systematize all the store work and arrange for a full ac-

counting for all supplies for all purposes. The waste that goes with an unlimited supply of stock to draw on for any purpose is as sure as it is useless. The employe who replenishes the supply of wrapping paper or of twine or of many other things used in your store in the same way, with the idea that they cost nothing, will be pretty apt to waste, unless held in check by a system which calls for an accounting for every bit of stock used.

There is a great waste in advertising from one cause and another and it can be checked very easily. There is no excuse for the continued mailing of folders or booklets to names of people long since dead or removed from town. There is no object in having the same people on the list two or three times. There is one big New York department store which puts four copies of its annual catalogue into the writer's possession regularly. They cost a lot of money, and the postage is 11 cents apiece.

How can a store with a management that does not check that kind of waste in some way hope to make big profits? If their expenses are proportionately large in other directions they will not last long.

Another advertising waste is in the wrong choice of mediums. You may be buying space in a paper which has about half the circulation that you pay for. See that you get the real circulation figures and make them tally with the rate card before you sign a contract.

Many advertisers who think that dodgers are good advertising send them out by small boys, who dump 10 into every ash can they pass and never give out less than three or four at a time. Dodgers ought to be handled by responsible parties. They are cheap, but if they didn't cost a cent you couldn't get any good out of them in ash cans or gutters. You waste the dodgers and you lose the results that you expected to get.

Into every store come supplies of good advertising matter put out by the big advertisers of the country, the firms who are manufacturing many of your steadily selling goods. These bundles of good-printed matter which ought to go in parcels or be distributed in the farmers' wagons are

dumped by the lazy clerk into the ash heap. Too much trouble to put them into circulation. This advertising costs you nothing, but you lose the effects that it would produce. That's a loss and a waste.

Goods are left too long in a window—delicately colored goods that are easily affected by the light. Some are put too near to the glass and are faded or spoiled by the effect of the heat from without. That waste ought to be easily cut off.

Then the wasteful window-dresser will throw away materials used in the window before they have been used up. The life of window-dressing stuff is not limited to once using or to twice. It is good as long as it will dress the window without giving it anything but the desired effect.

In the matter of heat in winter, the store that is overheated is wasting fuel. It is foolish to run the thermometer up to the top and then run it down again by opening all the doors and windows. It is waste to keep the store too cool. That wastes trade by keeping the public out.

Dust and dirt eat up a lot of goods every year in most stores. There are cobwebs on the top shelves and dust everywhere, unless it is prevented by oiled or waxed floors very carefully swept every morning. Cover everything up that you can for the sweeping and leave it covered until the dust is settled. Then shake the coverings outside, fold them up and put them where they will keep clean. Wipe the dust with cloths and don't spread it around with the old-fashioned feather duster. If you oil the floors, don't, for heaven's sake, have them so oily that every woman who comes in will ruin her skirt, while everything dropped on the floor is instantly spoiled. A good hardwood floor, maple for choice, scrubbed or mopped every morning, is the floor that can't be bettered.

Waste of light sometimes comes from globes that are not sufficiently transparent or from poor care of the lamps or apparatus. This depends upon the kind of light used. See that you get all the light that you pay for and all that you need, for it's a waste to have a dark store.

(To be continued.)

Spigel Bros., Spartanburg, S. C., are about to move their stock into larger and newly furnished quarters.

Half a dozen diamonds, which were wrapped in tissue paper, were stolen a short time ago from the store of Charles W. Hotelkiss, Ardmore, Ind. T. The gems are worth about \$1,000. There is no clue to the thieves.

Storekeeping Department.

Attractive Window Display Made by a Jeweler of Pittsburg, Pa.

"MUSIC hath its charms to soothe the savage breast," was the fitting title for a striking window display made, a short time ago, by Henry Terheyden, Pittsburg, Pa. It attracted a great deal of attention and crowds congregated about the window at all hours of the day.

The sides of the window were decorated with natural autumn leaves, the display being in the nature of an autumn exhibit. A hand-worked Japanese shawl was used as a background, and this in itself had a tendency to attract women, who are always interested in fancy work of this character. Then in the center of the window was arranged a miniature flight of steps, which were covered with white silk. On either side of the steps were placed bronzes of different designs, representing principally animals, such as elephants, lions, deer, etc. At the head of the steps stood the bronze figure of a Hindu, playing a two-stringed instrument, and other Hindu bronzes were arranged tastefully.

The appearance of the musician, of course, was significant and caused many persons to remark that the quotation above given was a most fitting one. The accompanying illustration shows only one side of the store front. The window was well lighted by electric flower pots of different color and design and the light was not only soothing to the eye, but attractive. One of the bronze pieces shown was a handsome one in detail work imported from France.

The window proved such an attraction that the display was shown for more than a week.

The Value of Proper Store Ventilation.

THE importance of proper ventilation of the store is a matter which has been neglected for a long time, and it seems that it is only now being given the attention which it deserves. This is particularly true of the larger establishments, where it is desired that patrons should linger in order that they may inspect the extensive displays of goods. If the atmosphere of the place is of such a character that visitors are made uncomfortable there is little use in employing decorators, as is done in the more pretentious marts, and it is a waste of gray matter by the proprietors of the smaller ones to endeavor to catch the eye of visitors, and incidentally their dollars, by the attractive arrangement of the goods.

Persons stepping in from the fresh air of outdoors are very quick to notice a foul atmosphere, and in many cases the prospective purchasers turn on their heels and leave at once. If, however, one is hardy enough to penetrate further into the interior an overwhelming sense of weariness is soon experienced, often without understanding the reason, and the person is compelled to start for home, probably without having completed the errand. A clean, invigorating atmosphere alone induces a prolonged stay and consequent investment of money naturally resulting from an inspection of the goods on show.

This matter has been very carefully looked after in the construction of many new stores which have been erected in New York. The newest plant of this kind, a Fifth Ave. establishment, is supplied with a very complete system of ventilation which is thought will result in a generous supply of fresh air being delivered to every part

large room where in the Winter time it is heated and in Summer chilled. From this point the air is delivered to all parts of the lower floors by means of four 16 foot blowers of 50-horsepower each.

This plant supplies only the basement and the first floor, which are the active centers of all establishments of this character. The

A WINDOW DISPLAY BY HENRY TERHEYDEN, PITTSBURG, PA.

of the store at all times. The main feature of this system is a large duct extending from the sub-basement to the roof, through which the fresh air is drawn. When the air has reached the basement it is filtered through sheets which catch all particles of foreign matter, then it is carried into a

heating of the upper floors of the building is effected by means of concealed steam pipes, while the exhaust air is drawn off by means of fans.

Such a plant as this represents the investment of considerable money, but it is regarded as money well spent.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1747.—Ounce Metal.—Please give me the alloy known as "ounce metal." For what is it used? J. C. R.

ANSWER:—Ounce metal is composed of three metals, one ounce of each—copper, zinc and lead—and comes very near what is known as composition. It is of a good color, turns well, and is especially suitable for ordinary valve work.

QUESTION No. 1748.—Bright Silver Paint for Glass.—Please give me a good recipe for silver paint, such as can be used for deposit work on glass. B. S. P.

ANSWER:—The Metal Industry gives the following formula for depositing on glass: Silver powders, one ounce; gold alloy flux, five pennyweights; nitrate of bi-muth, 40 grains; finely powdered borax, 18 grains; powdered glass, one pennyweight. This composition is well mixed together by grinding in a muller and is then thoroughly incorporated with equal parts of Dresden thick oil and fat oil of turpentine. For use it is thinned down with refined oil of turpentine. It is allowed to dry, and then fired in the usual manner in a gas retort. The silver powder may be made by reducing nitrate of silver solution with strips of copper and then dried. Dealers in chemicals for china and glass manufacturers can furnish the compositions mentioned.

QUESTION No. 1749.—Isinglass Cement for Metal.—How can I make a good cement that will be useful for cementing broken metal objects together, such as statuary, out of bronze or perotes? I. C.

ANSWER:—A very good cement for the purpose consists of 100 parts isinglass solution and one part nitric acid. Stir the nitric acid evenly in a very thick isinglass solution and paint the metallic surfaces with this liquid. The surfaces must be firmly pressed together. The object of the nitric acid is to make the surfaces rough by corrosion. Its use, however, is attended with this disadvantage, namely, that it hinders the drying of the cement. It is therefore necessary to expose the cemented metallic surfaces to a higher temperature for a time in order to hasten the drying.

QUESTION No. 1750.—To Oxidize Silver for Engraving.—I often have pieces of silver that require a black background for bright letters, or sometimes to engrave a monogram which should be oxidized. Please give me a good formula for the oxidizing. T. O. S.

ANSWER:—The oxidizing of silver for engraving purposes can be accomplished by the use of the following formulas: (1) Place the articles to be oxidized in a solution of liver of sulphur diluted with spirits of salammoniac. Having left the article in the

solution a sufficient time for the chemicals to act, remove and thoroughly roast, dry and polish. This will produce a blue-black tint, while a solution of equal parts of salammoniac and blue vitriol in vinegar produces a brown shade. (2) Salammoniac, two parts; sulphate of copper, two parts; saltpeter, one part. These ingredients are reduced to a fine powder and dissolved in acetic acid. If the article is to be entirely oxidized, it may be dipped in the boiling mixture, which will act very quickly. If only parts are to be oxidized, both the mixture and articles to be oxidized are to be warmed, and the former applied to the latter with camel's-hair pencil.

QUESTION No. 1751.—Phosphor Bronze.—Kindly give me the alloy of phosphor bronze. P. B.

ANSWER:—Phosphor bronze is especially suitable for statuary or outdoor ornaments on account of its assuming a beautiful closely adhering patina upon exposure to the open air. There are three different alloys: (1) Copper, 90.34 parts; tin, 8.90 parts; phosphorus, 0.76 parts. (2) Copper, 90.86 parts; tin, 8.56 parts; phosphorus, 0.196 parts. (3) Copper, 94.71 parts; tin, 1.39 parts; phosphorus, 0.953 parts.

QUESTION No. 1752.—Cleaning Copper Articles.—We have some copper articles, such as chafing dishes and copper smoking sets, that have become dull from exposure. Please give me some simple way to clean them. C. C. A.

ANSWER:—The cleaning of some copper objects with powder or other substances is attended with difficulty on account of their worked and ornamented surfaces. At times, however, success is reached by means of acids. If the object is greasy the grease must first be removed by a hot solution of soda, and then immersed in water. The bath designed for restoring brilliancy is composed of: Nitric acid, two parts; salammoniac, one part; or else nitric acid, one part, and salammoniac, one part, and one part water. The salammoniac is to be dissolved in water so as to obtain a saturated solution. The objects should not be left immersed in the bath more than two seconds, and should afterwards be rinsed, first in cold water, then in hot water, and dried with soft towels, or in warm sawdust.

QUESTION No. 1753.—Bright Cut Engraving.—I notice that much of the engraving on silver-plated ware has very large cuts that are perfectly smooth. They look as if they had been burnished. How can I produce this bright cutting? I have done engraving on jewelry, but have had no experience on silverware. B. C. E.

ANSWER:—In order to produce the bright

cuts on silverware, tools differing in shape from those used on jewelry are used. The tools are ground so that very wide cuts may be made, and the surfaces of the engravers are highly polished, which reproduces a bright engraving. The tools are usually polished on crocus cloth, which has been glued to a piece of plate glass. The higher the polish on the tools the brighter will be the cuts produced. The engraving tool should be polished up after making 10 or 12 cuts, which will keep the tool in good shape.

QUESTION No. 1754.—Polish for Silverware.—How can I make a liquid polish for silver and plated ware—something that does not scratch? I have tried powders, but these give no satisfaction. P. S. W.

ANSWER:—Neither whitening nor powder of any kind should be used for silverware in the store, although these substances are suitable for the household. To restore the brilliancy of silverware that has become somewhat tarnished in the cases it is best to make a preparation of cyanide of potassium, three or four drachms, dissolved, and eight to 10 grains of nitrate of silver in four ounces of water. Apply with a soft brush, wash the object thoroughly with water, dry with a soft linen cloth, and polish with a chamois skin. For solid silver a little precipitated chalk may be added to the solution.

QUESTION No. 1755.—To Color Horn.—How can I give horn a brown color? T. B.

ANSWER:—To give horn a brown color, brush over with a solution of nitrate of mercury. To blacken horn, use a solution of silver in nitric acid.

Horizon Glasses, Contrary to Importers' Claim, Not Dutiable as Discs.

THE protest of Davies, Turner & Co. against an assessment of duty on an importation of sextant index glasses or horizon glasses, red and green shades, and neutral glasses, has been overruled by the Board of General Appraisers. The importers claimed that they should have been dutiable as plates or disks rough cut, but inasmuch as the sextant and horizon glasses were silvered and painted on the back, being mirrors used for reflecting lights in nautical instruments, and the other articles also used in nautical instruments are employed to modify the rays of light reflected by the above-described mirrors, the Board did not take the same view of their condition.

Martin May and Joseph Epler, the latter a pawnbroker, of Atlanta, Ga., were recently taken into custody and fined \$50 in the police court on a charge of disorderly conduct. The fines were paid and the men were released.

E. Cohen, a jeweler of Second Ave., S., Seattle, Wash., was recently arrested charged with conducting a pawnshop without a license. He was released after paying \$100 in cash bail to appear in court the following day. The accused stated that he did not conduct a regular pawnshop, according to the interpretation of the law, and consequently did not consider it necessary to secure a license.

DELFT, *Its CHARACTERISTICS and HISTORY**

By EDWIN ATLEE BARBER

Copyright, 1906, by the Pennsylvania Museum and School of Industrial Art.

THE word Delft is derived from the name of the town in Holland where the ware was first produced, and which for several centuries continued to be the chief center of the industry. Delft ware was

appearance of having been fashioned from common mud, and can be easily cut with a knife. The thick enamel entirely covers the ware, and is found spread over the under sides of plates, as well as on the up-

per surface. So perfectly was the enamel adapted to the body that crazing, or cracking of the surface, seldom occurred. Plates and other pieces were separated or supported in the kiln by three bars of fire clay, which in being detached usually left

three equidistant, long, rough scars on the under side, where the enamel was torn away. This peculiarity is noticeable in a large proportion of the pieces made in Holland. While some of the Holland faience was decorated in polychrome, the blue color predominates to a marked extent.

FIG. 1.—DELFT DISH, 18TH CENTURY.

FIG. 2.—CHEESE DISH AND TRAY.

FIG. 3.—WINE JUG IN POLYCHROME AND GOLD.

probably made as early as the latter end of the 15th century, but little is known of it until about 100 years later. From that time down to the present it has been manufactured at many establishments. The origin of this faience was the attempt of the Dutch potters to imitate the more costly porcelain which had been brought from the Far East. At first the blue color only was used, but later other colors, green, red, yellow, brown, purple and gold were added. The decorations were neither *over* nor *under* the enamel, but *in* it, the colors and enamel being liquefied and fixed at one firing. The decorative process may, therefore, be properly expressed by the term *inglaze* painting.

HOLLAND.

The Delft ware of Holland, made in the town of Delft and several other places of lesser importance, is distinguished by a porous and friable body, light in weight and of a yellowish or pale brown color, in which carbonate of lime enters largely, so that on the application of acid it effervesces. It is usually so soft that it has the

per surface. So perfectly was the enamel adapted to the body that crazing, or cracking of the surface, seldom occurred. Plates and other pieces were separated or supported in the kiln by three bars of fire clay, which in being detached usually left

Delft ware occurs in a great variety of forms—vases of various designs, often imitating Oriental shapes, frequently gracefully fluted, with covers surmounted by figures of animals; plates and plaques; ornamental figures; drug and tobacco jars;

tea canisters; candlesticks; punch bowls; dishes of various forms; covered boxes; trays and utensils for table and household use. Frequently vases and jars were made in sets of three, five or seven, for the adornment of the mantel shelf or cabinet, in the Chinese manner. Some of the circular dishes are fluted or lobed, like those produced at some of the German factories (See Fig. 1, page 99).

Tin enameled tiles, in blue or purple monochrome, were among the earliest productions of the Dutch potters. These were embellished usually with scriptural subjects.

Faience, with blue decorations in the enamel, mainly in the Oriental style, was produced extensively in the 17th and 18th centuries.

Afterwards the decorations were in various colors and gold over the enamel, imitating Chinese porcelain. A wine jug of this style in the Museum collection is elaborately painted in red, green, black, brown, purplish blue and gold. It has a lobed body and plaited handle.

Black enameled Delft, with painted designs in polychrome, in the Chinese style, was produced at several potteries in the latter part of the 17th century and the beginning of the 18th. Examples of this variety are now rare.

The best examples of Delft ware are faithful copies of Chinese and Japanese porcelains, which at a short distance can only with difficulty be distinguished from the Oriental. The enamel is particularly brilliant; and is so characteristic that a practised eye will have no difficulty in recognizing the Dutch Delft wherever seen.

The curious custom of naming the factories after natural or artificial objects prevailed among the Dutch potters in the 17th and 18th centuries, and the marks which they adopted to distinguish their wares were frequently the pictorial representations, or the names or initials, of these objects. The pottery of Huibrecht Brouwer, for instance, was called "The Porcelain Hatchet" (mark, the outlines of an axe); P. Verberg adopted for his works the name of "The Golden Flowerpot" (*De vergulde Blompot*), and his wares were frequently marked with the word "Blompot"; the mark of "The Three Bells" consisted of rude drawings of three bells; the productions of "The Water Can" (*De Lampetkan*) were usually marked with the initials L P K; "The Metal Pot" (*De Metaale Pot*) used for one mark the letters M. P., and "The Peacock" works employed the Dutch name of that bird, Pauw, either written out in full, or arranged in a monogram. Other potters, however, used the initials or monograms of their own names, although their establishments were known by fanciful titles, such as "The Double Pitcher," "The Old Moor's Head," "The Young Moor's Head," "The Boat," "The Roman," "The Two Ships," and "The Two Wild Men."

From a large collection of Delft in the Museum collections a few of the more striking forms have been selected for illustration. Fig. 1 shows one of a pair of ornamental dishes decorated in blue in the Chinese style, by Huibrecht Brouwer, 18th century. Fig. 4 shows lobed dishes with

polychrome decoration. Fig. 2 shows modern cheese dish and tray, blue and green decoration in relief, by P. van der Stroom, early 18th century, of the "Vergulde Blompot" (the Golden Flowerpot) factory.

(To be continued.)

The Pigments in Ancient Vases.

THE ancient Greek vase painter's palette only contained three fundamental colors—black, white, purple-black. These tones were sufficient for the ceramic production of long centuries. That they did not try to introduce the entire gamut of fresco colors—blue, vermilion, green, yellow—was because these colors did not stand the baking necessary for pottery.

In time one discovered expedients to incorporate them, and we see in the fifth century above all, on vases of white foundation, polychromatic enrichment with new bright tones—blue, rose, brown, gold, etc. But it is proven that these colors remained essentially delicate and tended to make the vase more an object of luxury than practical use. The epoch of beautiful productions, those of the fifth and sixth centuries, anterior to the Median wars contained three colors that amalgamated with the clay to an unalterable condition. Utility at that time dominated art.

The black remained always the primordial element. Employed in bold silhouettes on a clear background, it held a preponderating influence to the end.

The representation of black and red figures, similar to those on vases, in frescoes of temples and public edifices, is altogether false in conception. Since the Mycenaean epoch, which saw the discovery of this admirable and indestructible pigment, black constitutes the correct character for painting ceramics.

In spite of all the researches made, we do not yet know how this color was made. It is to be regretted, for in these modern times it could render great service to the industry. It has been analyzed; oxide of iron, silica and alkali have been traced. A color even has been recomposed with these chemical elements, and the Sèvres Museum possesses vases executed under the direction of the chemist Salvétat. But they have a harsh tone, cold and uniform, not reproducing the velvety softness and the olive tints of the antique black.

To sum up, one is completely ignorant from whence the ancients obtained this color. It is probable that, not being furnished with chemicals as we moderns are, they found it in abundance all around them and almost in a natural state. At the moment of application the black had to have a *mat* tone. The brilliant gloss is given it by the final varnishing operation, which brightened at the same time the background and the painting in their entirety.

A safe was removed from the store of A. C. Lemeille, on Main St., New London, Conn., recently to satisfy a judgment given against the jeweler a short time ago.

Six diamonds were stolen recently from the store of A. V. Graves & Co., Nevada, Ia., while the proprietor was waiting on a customer.

ART IN AMERICAN IMITATION BRONZE.

THE skill shown in the manufacture of imitation bronzes has reached an advanced stage. Samples representing the output of the Brainard & Wilson Co.'s factory at Danbury, Conn., were displayed in New York a few weeks ago. The figures are first cast in an alloy of metal, having practically the same weight as the genuine bronze, and are then subjected to an electroplate bath composed of genuine bronze. The plated surface is declared to be durable, holding its color and finish. The process is, of course, inexpensive as compared with the production of genuine bronze.

SMOKER'S SETS IN MANY STYLES.

SMOKER'S sets in a wide variety of designs are shown. Included in the exhibit is a brass set, having a holder raised to a convenient height by a round rod resting upon a rounded base. The tray or holder is about an inch deep, and has receptacles for tobacco, cigars, matches and ashes. The only decorative work is a dog's head design in relief. Numerous other offerings in colonial brass and antique designs are shown. A vase, intended for ornamental use, is made of a metal alloy, electroplated in brass and covered with a transparent coating which gives it a glazed appearance. The trimmings are wrought in Etruscan style and gold plated.

MARBLES AND POTTERY IN ATTRACTIVE DESIGNS.

THE exhibit of art objects in white Italian marble in the salesrooms of the New York importing houses will be larger and more varied than usual this season. A figure of Cupid standing on a heavy rounded base and resting one knee upon a dove cote within which is a dove standing before a nest, is one of the attractive subjects of the season. Cupid has his usual quiver filled with arrows and slung across the right shoulder. Lines of Teplitz pottery will be shown by several firms. An exhibit of Amphora ware is proving especially attractive. Vases in antique shapes with raised work ornamentation are shown, with fruit and flowers in the greater part of the decorative designs. One large piece of Amphora ware is about three and one-half feet high, with fluted top. It rests on a base of heavy proportions. The figure of a girl with wings resembling those of a butterfly forms a part of the decorative design. A display of imitation Indian pottery imported from Austria is among the novelties of the season.

WADSWORTH

The Wadsworth Watch Case Co.

49 Maiden Lane, NEW YORK

CHICAGO
Columbus Building

SAN FRANCISCO
717 Market St.

FACTORY, DAYTON, KY.

**ATTAINS
ITS
MAJORITY**

THERE ARE MANY ARGUMENTS in favor of
The WADSWORTH 20-YEAR CASE

It falls within those grades which may be termed strictly "high class." This case is made to be sold by a discriminating trade to well-to-do consumers who still are disposed to buy economically. Costing less than the 25-year and highest grade cases, it nevertheless possesses superior style, workmanship and wear. As to the last item, the time limit is conservative. It "attains its majority." At once creditable and profitable.

***The* WADSWORTH
WATCH CASE CO.**

49 Maiden Lane, New York

CHICAGO
Columbus Building

SAN FRANCISCO
717 Market Street

Factory, DAYTON, KY.

IT is the unanimous opinion of those jewelers who have examined the new O and 12 size movements of the ILLINOIS WATCH CO. that they are the best watches in these sizes ever manufactured in America.

Some trade-marks are worth a million dollars, some are worth nothing

THE DIFFERENCE is represented not so much by the quality that the trade-mark stands for as by the publicity that has been given to the mark. A trade-mark has no intrinsic value, and while it may be stamped on goods of the highest qual-

ity, it can never be considered as an asset until it is so well known that it carries with it a reputation that has made an indelible impression on the minds of the buyers.

Have you a trade-mark? How many jewelers know your trade-mark? It is surprising the number of inquiries which we are constantly receiving from the leading jewelers asking us to identify marks which have been in use for many years, and which the manufacturers probably think are known to the entire trade. Unless your trade-mark is known, it is worthless, and there is but one way to make it of great value, and that is to advertise it constantly.

The gold stamping law which goes into effect next June will make it almost imperative for the manufacturer to stamp his goods with a trade-mark; the retail jeweler, being responsible for the quality of the goods which he sells, will insist that these goods bear the stamp of the manufacturer, so that the identity of the maker can be easily established. Our advice to all manufacturers is to adopt a trade-mark, and then by advertising thoroughly familiarize the trade with the mark and the good qualities for which it stands.

Through the advertising columns of THE JEWELERS' CIRCULAR-WEEKLY you can keep your trade-mark before the eyes of 8,000 of the leading jewelers of the country every week; you can make it indelibly known to them, and create the impression in their minds that it stands for high quality. Merit alone will not sell goods unless you make it known. By persistent advertising, by constantly pointing out the little points of superiority of your goods, you can make your trade-mark a valuable asset; you can make it so familiar to the trade that buyers will select goods with your mark in preference to those with a mark they do not recognize.

Drop us a card and we will tell you how The Jewelers' Circular-Weekly can help to increase YOUR business, and we will send advertising rates or have a representative call.

FACTORY AND SALESROOM-543-5-7-W-23RD STREET NEW YORK

The Call for Quality

IN the jewelry trade, QUALITY will have the call this year—there can be no mistaking that fact.

The great middle class—the neither rich nor poor—upon which the average jeweler most depends, has never been more numerous, nor better able to afford the possession of good jewelry, fine watches, table silver and the like.

Without question, the demand for all these things will be strong—and also, you may be sure, will be the insistence upon *quality*. The public will want full value for its money—goods of actual worth and undoubted dependability.

For that reason—among other good reasons—SIMMONS CHAINS will be an especially good selling proposition during 1907.

They are the acknowledged standard among high-grade gold-filled goods. Their merits are *known*. Not only to the trade, but to a very considerable contingent of the public at large, the name *Simmons*, in connection with watch chains, is a synonym for quality and dependability.

The moral is obvious.

This illustration is a reproduction of the front cover of a booklet that we are furnishing, without charge, to those who stock the Sternau Coffee Machines and Percolating Coffee-pots.

The booklet contains practical knowledge useful for the housewife who wishes to make perfect coffee, always of a quality that never varies.

It tells HOW coffee should be made, and WHY coffee should not be boiled.

It is interesting many and is sure to create a larger demand for Sternau Coffee Machines wherever it is distributed.

Sternau Coffee Machines and Percolating Coffee-pots make coffee on the table and can be used by any one, being simple in construction.

Prices, illustrations and copy of booklet sent on request.

**POPULAR
CHINESE
JADE**

**THE
SEASON'S
FAVORITE**

JF JAPANESE Coral is the pink of perfection, Chinese Jade is the *green* of perfection. This is the Jade *par excellence*. Green, a charming color in itself, here finds its most pleasing embodiment. Strong as has been the recent demand for Jade, the opening season will witness a positive and insistent vogue for which it is well to be prepared. While the stones here provided are frankly artificial, they are identical in appearance with Nature's creations. Mounted in characteristic Chinese and rich Oriental effects. The line will more than repay inspection.

D. Lisner & Co. *Creating Importers of* **Jewelry Novelties**
One-Forty Fifth Avenue, cor. 19th St., NEW YORK

TRADE MARK
STERLING 925

AT THIS SEASON *of the* YEAR

TRADE MARK
STERLING 925

There is the usual after-holiday lull throughout the trade. Insure prompt and early delivery of your Spring silverware by placing your order now—avoiding the natural congestion that is due in the immediate future.

This Company's product appeals to that class of buyers who appreciate distinctiveness and quality. We are prepared to submit designs and estimates on special work of all sorts.

FRANK W. SMITH CO.
GARDNER, MASS. Manufacturers of Sterling Silverware

1906 has hardly taken its place with the years that have passed, before the hustling and bustling for 1907 are upon us. We have not lost a minute's time, but have been busy right along on our new stock, and will be prepared to show same to the trade at an early date. In the meantime, we are pleased now, as always, to take care of your orders in our office here and ship you promptly anything desired in the line of Diamonds, Watches or Jewelry. Our lines of Elk and Eagle goods are stronger than ever.

B A G S

THE NEW YEAR finds Bags more of a necessity than ever—and we have been working night and day to replenish stocks which the holiday rush depleted. In addition to our previous immense line of them, we have added a number of new styles, maintaining, beyond all competition, our supremacy in assortment, quality and style.

Look for the W. & D. stamp on Sterling, or German Silver, Roman or Silver Finish, Plain or Shirred Bags, and be assured that you have the best.

Qualities of Effective Decoration

DECORATION in jewelry should not only show discrimination in the selection of style, but the execution also should be worthy. It is not too much to claim that this house has achieved very gratifying results in its decorative work—results which the trade has not been slow to recognize and avail itself of.

The qualities which make effective decoration are not easy to define in words. Skill in this direction is a gift—a distinct endowment. We invite your judgment as to whether the tastefulness of our designs is not worthy of a true craftsman.

Chopard Frères' New Year's Proclamation to Dealers

Those who have followed our announcements from time to time realize that we are leaders and not followers, that our product is always a little better than the other fellow's best, and that we are the first to bring out the latest and noblest Parisian creations.

Although our facilities for doing this are unsurpassed by any other manufacturer, still in line with our aggressive and liberal policy, we have improved our system by such methods as will enable us to give our patrons the most recent French productions simultaneously with their appearance in Paris.

Our semi-monthly illustrated bulletin will keep you in cable touch with Paris and a postal card request brings it to you gratis. We especially invite attention to our next circular, picturing JET COLLARS and STRING PEARLS, which challenge comparison.

Selection Packages Forwarded to Dealers Upon Request

Prof. Bonsall Gives an Interesting Lecture on the Diamond.

"THE Diamond" was the title of a popular lecture delivered in the Chemistry Building, Montreal, at McGill University by Prof. J. Bonsall Porter, on the evening of Jan. 7, before a large audience. The lecture was accompanied with lantern pictures which illustrated the subject very completely, showing that much-prized stone in various forms, the rough, uncut crystals of several types and the best forms of the cut diamond. There was also a series of slides which showed the extent and method of working in the great Kimberley mines. To demonstrate the hardness of the diamond, the garnet, which is a stone of known hardness, was placed between the jaws of a pair of steel pliers, which crushed it to atoms, while a small diamond in the same pliers imbedded itself in the hard steel.

Prof. Porter sketched the early history of the diamond, which is vaguely alluded to in several parts of the Scriptures, but he found no definite reference until about the third century before Christ, when it was mentioned as being so precious that only the most powerful king could own one. At that time, too, and for many centuries later, it could not be cut, and the most careful polishing by rubbing could not make it a very beautiful stone.

It was only in 1465 that a jeweler of Bruges worked out the theory of the light in the diamond and succeeded in perfecting it by cutting. The first famous stone cut was the property of Charles the Bold of Burgundy, and being lost by him in battle, was found and sold by a Swiss soldier for a single florin. It had many wanderings, being in turn in possession of the sovereigns of Portugal, England and France, and at last was sold for a large sum to an Indian prince, and thus returned to the land whence it originally had come.

Prof. Porter said that diamonds must have existed at one time in Canada. None have been found here, but they have been found in the United States in alluvial deposits, and all found there show evidence of having been transferred from Canada, perhaps from moving of ice masses. Diamonds had been found in the Far West of the United States, California and Oregon, also in the Central States, particularly in Indiana and Ohio, and some few in New York and the East. With the exception of California, all the stones found in the United States had been definitely traced by geological indications to Canada. They had occurred in company with minerals which showed evidence of transportation for a great distance by ice, and Dr. Adams had definitely determined them as having come from Central Ontario, or, rather, the min-

erals with which they were found were identical with those found there.

The rubbish left by the wearing away of rock masses is the common resting place of this precious stone, and only at Kimberley had it been found in its original state. There diamonds had been found right through from the surface to a great depth in the earth, the deepest pit in Kimberley going to about half a mile below the surface.

Some attempts to manufacture diamonds from iron have recently been made, but as the method has failed to produce anything but the most minute crystals, they are of little practical value.

That the industry is one of the greatest importance is shown by the fact that in the last 20 years 140,000,000 carats of stones have been discovered, aggregating a total value of \$525,000,000 in crude form or \$750,000,000 when cut. As a contrast with these figures, the total annual metallic output in Canada has an aggregate value of \$30,000,000 only. Nearly the whole stock of diamonds ever found are still in existence, for they practically never were cut, but the growing wealth of the world enlarges the demand for them continually and values continue to move up.

As to the question of wherein lay the intrinsic value of the diamond, Prof. Porter confessed it to be a mooted point, and he quoted an argument between Lord Randolph Churchill and Cecil Rhodes as to whether it was chiefly valuable because of the vanity of women or the depravity of men.

Accidents Among Jewelry Workers in France.

THE current report of the French Minister of Labor, just received by the Attleboro jewelry manufacturers, shows that the government there keeps strict supervision over the matter of accidents in industrial establishments. Three kinds of accidents must be promptly reported, those resulting in death, in permanent disability, or in disability for four days or more.

The latest statement shows that for the past year in the ranks of French precious metal workers there were one fatal accident, eight producing permanent disability and 292 causing temporary disability. Among the lapidaries there were 32 accidents causing temporary disability and none of the other and more serious cases. Among the precious stone cutters and polishers there were two fatalities, 18 accidents causing permanent disability and 958 causing temporary disability.

Another section of the report shows that far the largest number of accidents was to male workers, and the proportion of those hurt who were under 18 was notably large. The report also points out a strong tendency to reduce the hours of labor, especially

in the establishments where 10½ to 12 hours a day have been the rule.

Notable Racing and Regatta Trophies by a Hamburg Artist.

SOME unique and interesting horse and yacht racing trophies, embodying very clever new ideas, have recently been fashioned by the well-known Hamburg artist, Alexander Schönauer, gold and silver smith to the Senate of that venerable city, which still bears the proud title of "free and Hanseatic." There are in all three prizes, a first and second for the Empress Augusta Victoria steeplechase, and one for the sailing regatta on the lower Elbe.

The prizes for the Empress Augusta Victoria race are an epergne, 68 centimeters high and 46 in diameter, richly gilded and decorated with a great variety of figures; and a drinking horn, 75 centimeters in height, of black buffalo horn. The epergne, or table center, the first prize, is surmounted by figures representing the story of St. Hubert. On a green hill, carved out from a single block of malachite, the hunter appears on his knees before the dazzling apparition of the stag, bearing the lofty cross. The majestic pose of the stag, and the reverent attitude of the praying knight, are most expressive; and the gold and malachite make a beautiful harmony of color. A spreading pine tree crowns the hill, and its base is framed in by conventionalized gilded flowers. The capital supporting the group rests upon a broad silver basin, on the edge of which is the inscription in heavy gothic letters: "*Ehrenpreis der freien und Hansestadt Hamburg für das Kaiserin Auguste Victoria-Rennen, 1906.*"

The basin has a round support, on which is depicted, in filigree work and relief, a hunt. A stag is seen breaking through the trees of a forest, hotly pursued by dogs, while close behind come two huntsmen, one on foot, blowing his horn, the other mounted.

The pedestal of the epergne is gilded, with bosses of silver, and is joined to the upper part by six conventionalized pine trees, whose roots encircle little blocks of malachite, similar in kind and color to that from which the hill at the top of the piece is cut.

(To be continued.)

A professional hotel thief, with many aliases, has been arrested in Painesville, O., charged with the theft of \$1,000 worth of diamonds from the room of Herbert Kennedy, a jewelry salesman in the Travelers' Hotel at Cranesville, Pa., on the night of Jan. 10. Four of the diamonds were found on the man and two others recovered in a pawnshop in Ashtabula, O. The man will be extradited to Crawford County for trial. It is possible that the same man robbed two other hotels near Cranesville.

Josh Billings once said:
"Tell the truth in all your ads,
and you will get bizness."

We thoroughly believe in
this idea, and in all of our
many years of advertising
in the Jewelers' Circular
we have been careful to
state nothing but the truth
regarding our various lines
of jewelry.

To back up any statement
we have made, or may
make, we stamp our Regis-
tered Trade-mark on every
piece of goods we produce.
Hence, we do not hesitate to
say that when price, pattern,
finish and construction are
considered, there are

Assets and Liabilities of Judson H. Stafford, Saratoga Springs, N. Y.

UTICA, N. Y., Jan. 19.—Referee in Bankruptcy Scott has issued a call for the first meeting of the creditors of Judson H. Stafford, the Saratoga Springs, N. Y., jeweler, whose failure was briefly announced last week. The meeting will be held at Referee Scott's office in Saratoga Springs on Jan. 26 at 2 o'clock. Claims of creditors will be filed and a trustee appointed.

Stafford's liabilities, which are largely represented by notes, aggregate \$17,692, while the nominal value of his stock is \$5,601. Among Stafford's assets is \$900 stock in the Saratoga Wrapper & Mfg. Co., a concern which went into voluntary liquidation about one year ago. Stafford's store is at 402 Broadway.

Frank M. Colgrove, a local creditor for \$250, holds a chattel mortgage on Stafford's stock and the contents of the Stafford cottage at Point Breeze on Saratoga Lake. Colgrove's claim is for note indorsement.

Among the merchandise creditors are: J. Wolf, \$22; Rosenzweig Bros., notes, \$1,999; Aikin-Lambert Jewelry Co., \$208; Joseph Goldberg, \$381; Arnstein Bros. & Co., \$578; A. Roseman & Co., \$114; American Publishing & Engraving Co., \$28; Henry Cowan, \$1,625; American Soda Fountain Co., \$21; Joseph Cowan, \$148; Eliasoff Bros. & Co., \$585; Von Etten & Son, \$23; Woodman-Cook Co., \$89; International Silver Co., \$40; Watson & Newell Co., \$44; A. M. Wright, \$75; Shepard Mfg. Co., \$65; J. Hoare & Co., \$43; Illinois Watch Co., \$21; Treyz, Yager & Co., \$203; Arcadian Cut Glass Co., \$100; Brainard & Wilson Co., \$26; John Wayman, notes, \$4,328, secured in part by real estate and chattel mortgage; Fred. Hammond, \$1,649; Rhoda Howland, \$189; George Ellsworth, \$1,414; Calvin Collins, \$1,300; A. L. Churchill, \$360; Walter P. Butter, \$123; J. W. Northrup, \$100; Henry Gibbs, notes, etc., \$210.

W. P. Face, optician, 712 Penn St., Reading, Pa., during the holidays distributed free to each of 1,850 children a half pound box of candy.

Novelties and Fashions in Jewelry and Gems Now Popular in Paris.

AMONG the most interesting novelties in Paris jewelry are charming bracelets of unusual shape. They are intended to hold long gloves in position on the arm, and are made in a slender ring of mother-of-pearl in the allegoric form of a serpent biting its own tail; the mother-of-pearl is in different tints—red, gray, opalescent or greenish. The serpent's head is finely chased, with projecting eyes formed of rubies. The two rings can be matched or chosen in different shades.

The gloved hand is passed through them and they come up on the arm high enough to hold the glove in place. It is a practical and charming fancy, which suggests Cleopatra's asp.

The subject of jewelry is an absorbing one with the resumption of social life, receptions, formal dinners and theater parties. It is almost unnecessary to say that it is always stylish to wear jewelry even with high-necked dresses. We are assured that to preserve the luster and beauty of fine pearls they must be worn continually, not laid aside, that they may always feel the heat of the body.

It is incontestable that for some years ladies have worn jewelry in colors in the daytime because they have found that their limpidity harmonizes well with the changeable dress fabrics, with the feathers and brilliant flowers in their hats.

Thirty years ago they would never have risked displaying the costly necklaces, brooches, rings, earrings, etc., which are so boldly worn to-day; they hardly dared keep on the diamond earrings which they wore the day after marriage, and they wore several handsome rings on their fingers only because of the gloves which covered them and concealed them from public gaze.

To-day the jewels worn are rich and numerous, made of large stones, sapphires, emeralds, and especially rubies, delicately set and surrounded by diamonds and with the addition of pendants.

The carcanet (necklace) of jewels is not so much in vogue as formerly, when the then future Queen of England brought it so generally into fashion.

Large bezels ("chatons"), spaced off in rows, delicately mounted in platinum, are given the preference. As to pearls, they continue to take the honors; never have they been so much worn. We have seen a magnificent large one, of exquisite orient, but irregular in shape, set in a stem girdled with precious stones and susceptible of being worn as a pendant or as a pin. Irregular (baroque) pearls now find various uses; one becomes a cat, another a bird, elephant, duck, etc., according as its form lends itself to one or other of those shapes.

Chains of gold and pearls are made very long, some even five or six yards in length, winding around the neck several times. Sometimes they are worn laid up together in strands, with the addition of tassels.

For evening wear, at official functions, at the opera, at grand dinners or at the embassies, the diadem and the small crown are in high favor; the style most esteemed is

Louis XVI., which modern jewelers have succeeded in interpreting in clever and artistic ways.

After pearls, which hold the first rank, emeralds are the most sought for at the moment. They are made into necklaces, pendants, waist-fronts and, united with diamonds, into rings.

The emerald is fashionable; it ornaments the engagement ring and that which the young lady gives to the object of her affections. This exchange of rings is something new.

For women the emerald is in a setting of small diamonds. Men's rings, which are more massive, are set in the old way—a large circle of solid gold slightly rounded out, in the center of which is the emerald. There are few perfect ones; they are for the most part marred by certain faults within, which detract from their brilliancy and their purity. When a perfect one is found it is very valuable.

In a great jeweler's display window there was lately to be seen a tight-fitting necklace of diamonds, in trellis shape, having between the lattice work "pampilles" and emeralds of intermittent mobility. This necklace was a marvel of pliability in its setting, each stone being articulated in such a way as to give to the whole the appearance of a ribbon. Another one, whose component parts encircle the neck, is made of knots and arabesques of diamonds; five emeralds and uncut stones are placed at the ends of the rays of diamonds. Magnificent ornaments are also made with a very clever setting which admits of using all the stones as different articles of jewelry, brooches or pendants.

The following style of setting jewels is quite practical and very much in vogue: The emerald is almost always set in gold enclosed by a circle, in the ancient style, rarely with claws. Diamonds are generally set in platinum; emeralds alone are set in gold. A platinum setting gives jewels an incomparable lightness and brilliancy.

In general, pendants are set in platinum in the style of Louis XVI.; for instance, a fine stone surrounded with diamonds is attached about the neck by a small platinum chain.

Persons sufficiently ostentatious to change the contents of their jewel-boxes will give their diamonds to their jewelers to have them made into necklaces different from the common "dog collar." We lately saw at the opera a charming design made of "marguerites" (daisy) in diamonds, set in larger stones to increase the importance of the piece. Another very original necklace represented a peacock's feather, in different shades of gold and in diamonds, adjacent to a large design in diamonds on the front side. We also saw a necklace composed of two separate designs in diamonds and turquoises.

On that same day, which was the occasion of the first representation of *Ariane*, a lady of the foreign colony wore a marvelous necklace of exquisite flexibility, made up of

branches of maiden's hair in diamonds. This piece of jewelry made a sort of cravat aided by large lappets of diamonds, hanging down like ribbons, and finished off with larger stones cut pear shape. There were also brooches in the form of orchids entirely of diamonds and rubies.

As to rings, their settings vary infinitely; yet the fashion is to underline the large stones with a row of diamonds or stones of so even a size that the setting is not apparent, but makes an uninterrupted line. The emerald and ruby are most in request; preference in shape generally runs to height. A novelty much sought for is the cutting of the stone in "navette," or in pear shape.

It is good form to wear only a few rings, but those of the highest quality; and, in any case, if one desires to adorn one's self with them, never to wear one on the index finger, whatever effort may have been made to introduce this style.

It was to be foreseen that the swing given to "cambriolage" for the past few years would give rise to divers industries by the side of this prosperous one.

Here is a new one which comes from London. Ladies in high society, knowing by hearsay, if not by experience, that there is no hiding-place secret enough to escape the search of thieves, make no effort to keep their jewels at home. They have prevailed upon the large banks in the city to keep their safe-deposit vaults open every night in order that they may deposit their jewels there after the theater or after the ball.

CONSTANCE DE FASELLE.

Decisions by General Appraisers on Fountain Pens and Statuary.

Decisions of the Board of United States General Appraisers, New York, in cases involving duties on statuary, fountain pens, pocket knives and glass have been announced as follows:

GUTTA-PERCHA FOUNTAIN PENS.—Protest of R. F. Lang against the assessment of duty by the Collector of Customs at New York. Protest overruled on authority of Abstract 13283 (T. D. 27685) and Abstract 13513 (T. D. 27729), relating to gutta-percha fountain pens.

STATUARY—METAL CANDELABRA.—Protest of B. Muller Thym & Co. against the assessment of duty by the Surveyor of Customs at Kansas City. The protest related to metal candelabra, which were claimed to be free of duty under the provision in Par. 647 of the Tariff Act of 1897 as church statuary. Protest sustained. Fischer, General Appraiser: It appears that the statues are figures of angels, which are so formed as to support the candelabra in the hands of the figures—that is to say, the candelabra are part of the statues, which are incomplete without them, and the statues having been properly admitted free of duty the candelabra should likewise be free. In an unpublished decision dated April 3, 1903, the Board held that a marble statue from Italy was entitled to entry at 15 per cent. under Par. 454 as statuary of the kind therein specified, notwithstanding that it bore metal mountings.

Extensive improvements are being made in the interior of the store of Scarborough & Strange, Sandersville, Ga.

The Sun.

SUNDAY, JANUARY 6, 1907.

Entered at the Post Office at New York as Second Class Mail Matter.

Sixty Years Ago.

The Meriden Britannia Company has reprinted in its little periodical, the *Silver Standard*, and has now gathered in book form, divers facts of human and sociological interest about the United States of 1847. THE SUN is one of the authorities cited. Another authority, an old friend that has joined the majority, is *Gleason's Pictorial*, which, with *Ballou's Drawing Room Companion*, is gratefully remembered by many persons who are—well, older than BEVERIDGE. We shall amuse ourselves by plucking a few trifles that bear the form and pressure of the time.

Mr. HORACE GREELEY, the true effigy of whom, whiskerless and with a dithyrambic cravat, adorns the page, writes of "the existing destitution, often suffering, of a large proportion of the Laboring Class." He rejoices that the arrival of a steamship is announced in New York "some minutes earlier than the actual date of the arrival." He hears with an open mind that "some one in Cincinnati has just invented a means of transporting, at a very moderate expense, a traveller from that city to New York within two hours." Dreams from the ivory gate seem to have nestled in Cincinnati. A master of figures and prophecy estimates that it will have a population of 4,066,667 in 1904. There is a long sick list at West Point. The surgeon gives two reasons: The cadets smoke too much, and the tightness of their pantaloons around the waist interferes with digestion. The manager of a company of barnstormers has run against the stern and rockbound Puritans of Manchester, Conn., and had to pay a fine of \$60 because, as he puts it, he "with a view of gain did cause certain females, dressed in women's clothes, to whirl around swiftly on one foot, with the other extended at right angles and in a horizontal position." What did the ballet among those crabbed Nutmegs?

THE SUN "has in the course of five years expended the large amount of \$20,000 in running steam expresses"—\$20,000 was a large sum in those frugal days. Mr. PRESCOTT's history is passing through the press. Thousands of New Yorkers have gone to see the Aztec children, "wonderful representations of ancient ADAM," the resemblance of whose lineaments to those in "many of the sculptured monuments of Central America" is clear to the press agent. Dear old show business! "The more it changes the more it is the same."

Mr. DANIEL WEBSTER opposes the Mexican war because he wants to be President. Mr. JOHN QUINCY ADAMS's health is "still equable and vigorous." Mr. ELI WHITNEY is making 1,000 Colt's revolving pistols at New Haven for the Government. A resolution introduced into the Kentucky Legislature provides that every convict's nose shall be painted and kept perfectly black until one month before the end of his term. Many Maine teamsters have pledged themselves not to haul ardent spirits; and an "elegant silver pitcher" has just been given to the Hon. NEAL DOW, Mayor of Portland. There are 2,350 miles of telegraph lines in the United States. The Cunard company is to make Jersey City the terminus of a line of steam packets. The extent of the omnibus business in New York is "scarcely to be imagined." There are 326 omnibuses, "coaches," and 800 employees. May we not insert here the theory that New York without those old stages will never be entirely satisfactory to the praisers of past time? An English journalist admires "the pretty faces and figures of the New York ladies," but regrets that they "follow the abominable practice of chewing the gum of the spruce fir." Their jaws move perpetually and they lose their teeth early.

A famous victory of tragedy over lighter letters is thus recorded:

"EDWIN FORREST, the tragedian, knocked down and cowhided N. P. WILLIS, the poet, last Monday evening at the Washington Parade Ground."

General WINFIELD SCOTT is 61. DANIEL WEBSTER is 66 (65). Mr. WINANS of Baltimore has just built for the Reading Railroad two locomotives that are to burn anthracite coal. A bill in the New York Legislature to tax bachelors—the same old and ever young bill—defines a bachelor as:

"Every unmarried white male unconvicted of crime, of good health and fair physical proportions, and who is between the ages of 29 and 56."

The first American mail steamer sails from New York in June. She is 230 feet long, 2,000 tons burden, "the most splendid steamer afloat." A statue of WASHINGTON is her figurehead. Mr. LONGWORTH of Cincinnati made 6,000 bottles of champagne from his Catawba grapes. The stockholders of the Fall River Railroad have resolved that their road shall not transport rum.

While Mrs. SIGOURNEY, the poetess, was making a speech to President POLK at Hartford, her house was robbed of "valuable jewelry." As for this man POLK:

"Why are the heroes of the present war forgotten and neglected, the men who, ragged, sunburnt and unshorn, were toiling, without pay or sustenance, over the sands of New Mexico, while the kid glove politicians, clerks and hangers-on of Pennsylvania avenue are promoted to the offices?"

Chicago has a population of 17,000, Cleveland of 12,769, Jersey City of 5,862, "an increase of 444 in one year." July 26 MOSES G. FARMER exhibited an electric passenger car at Dover, N. H. "A Mr. STAITE has secured a patent in London for rendering light available by electricity." Flour in California is \$40 a barrel. The streets of St. Louis were lighted with gas for the first time November 3. Before this candle which we have borrowed to light that old time dies out, we get a peep at "Lord" TIMOTHY DEXTER's house in Newburyport, just sold for \$7,000. General WASHINGTON in uniform stands on a Roman arch in front of the house, with JEFFERSON to his left and JOHN ADAMS, uncovered, on the right. The garden is full of columns bearing the statues of philosophers, Generals, statesmen, Indian chiefs, and now and then a goddess standing all naked in the open air. We should have liked to see that gallery, including TIMOTHY's own statue. He is a man to be honored by the friends of literature, for he kept a poet laureate; and we dare say that he was no crazier than most folks and might have been a great public man in these more indulgent times. But he had been dead more than forty years in 1847, and perhaps his wooden statuary had been dispersed.

No Money Could Buy

the editorial space in the NEW YORK SUN, devoted, as shown in the reproduction above, to a review of THE SILVER STANDARD, the little magazine that advertises "1847 ROGERS BROS." silver plated flatware. Some of the other newspapers and prominent men that have kind words for The Standard are Cincinnati Commercial Tribune; Springfield (Mass.) Republican; Postmaster-General Cortelyou; Edward Bok, Editor of the Ladies' Home Journal; Col. George Harvey, Editor North American Review; Henry Mills Alden, Editor Harper's Magazine; Albert Shaw, Editor of Review of Reviews; John S. Phillips, Editor The American Magazine; Arthur Brisbane, Editor of the New York Journal; Elbert Hubbard, of Philistine fame; Joel Chandler Harris (Uncle Remus); V. S. Mulford, of the Jewelers' Circular-Weekly; B. Thorpe, Editor of the Keystone, and many others.

Any dealer in silverware who has not received a copy of The Standard should write to EDITOR SILVER STANDARD, MERIDEN, CONN.

Proposed Stamping Law for All States.

Full Text of the Law Proposed by the Jewelers' Circular-Weekly to Supplement the National Law and Provide Uniform State Legislation on Stamping of Gold and Silver.

After several months of careful work the draft of THE CIRCULAR-WEEKLY'S bill for State legislation to supplement the national law regulating the marking of gold and silver, has been completed and is published herewith. This law absolutely conforms to and is in harmony with the National Law introduced by Representative Vreeland last year and signed by the President June 13, 1906, and its enactment by all or even a large majority of the State legislatures will cover every loophole by which a dishonest maker or dealer in spuriously marked articles of gold or silver could escape paying the penalty for the acts.

While the National Law covers all cases in which spuriously marked articles are made in one State and shipped in interstate commerce to another State or country, it does not and could not be made to cover articles made and sold in the same State, therefore supplementary legislation on behalf of the States is necessary. The bill presented herewith will be sent to the leading jewelers in every State and to the national and State organizations of jewelers, with the request that they urge its enactment at the earliest possible moment. Even in some of the States that have silver laws or gold laws at present it may be well to introduce this act in order that the legislation throughout the country will be absolutely uniform, and there will be no chance of a man being permitted to commit a wrong within his State that he would be forbidden to commit if dealing with a customer in another State.

Copies of this bill will be supplied by THE JEWELERS' CIRCULAR-WEEKLY to all members of the trade who desire it, and we urgently call upon our readers to write to their representatives in their State legislatures urging the necessity of the enactment of a bill such as this for the protection of the people and for the benefits that will be derived from uniform legislation.

The bill has been carefully drawn by Frank L. Crawford, a well-known attorney of New York, who is the author of the Gold Law of New York, and who also drew the original National Law offered by THE CIRCULAR-WEEKLY, which in a more developed and perfected form was finally introduced by Representative Vreeland and passed by Congress. Mr. Crawford was the counsel for the joint committee from the three jewelry centers which had charge of the interests of the trade in connection with the fight for this measure, and is conversant with every phase and feature of the past and present legislation on the subject.

The proposed law for the States offered herewith was drawn so as to meet every point which has been raised in connection with former legislation, and at the same time be in absolute harmony and conformity with the National Law. Therefore, in having this introduced into State legislatures no amendments or changes should be countenanced except after the most careful con-

sideration, as not only has every word in the act been carefully weighed, but attempts to change for one State without changing the law as introduced in every State would spoil the advantage which could be obtained by absolute uniform legislation.

THE CIRCULAR-WEEKLY'S BILL.

Section 1. Any person, firm, corporation or association, who or which makes for sale, or sells, or offers to sell or dispose of, or has in his, her or its possession with intent to sell or dispose of, any article of merchandise made in whole or in part of gold or any alloy of gold, and having stamped, branded, engraved or imprinted thereon, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which said article is encased or enclosed any mark, indicating, or designed or intended to indicate, that the gold, or alloy of gold, in such article is of a greater degree of fineness than the actual fineness or quality of such gold or alloy, unless the actual fineness of such gold or alloy, in the case of flat ware and watch cases, be not less by more than three one-thousandths parts, and in the case of all other articles be not less by more than one-half karat than the fineness indicated by the marks stamped, branded, engraved or imprinted upon any part of such article, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which such article is encased or enclosed according to the standards and subject to the qualifications hereinafter set forth, is guilty of a misdemeanor; provided that, in any test for the ascertainment of the fineness of the gold or its alloy in any such article, according to the foregoing standards, the part of the gold or of its alloy taken for the test, analysis or assay shall be such part or portion as does not contain or have attached thereto any solder or alloy of inferior fineness used for brazing or uniting the parts of said article; provided further, and in addition to the foregoing tests and standards, that the actual fineness of the entire quantity of gold and of its alloys contained in any article mentioned in this section (except watch cases and flat ware), including all solder or alloy of inferior metal used for brazing or uniting the parts of the article (all such gold, alloys and solder being assayed as one piece) shall not be less by more than one karat, than the fineness indicated by the mark stamped, branded, engraved or imprinted upon such article, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which said article is encased or enclosed.

Sec. 2 (a). Any person, firm, corporation or association, who or which makes for sale, or sells, or offers to sell or dispose of, or has in his, her or its possession with intent to sell or dispose of, any article of merchandise made in whole or in part of silver or of any alloy of silver and having marked, stamped, branded, engraved or imprinted thereon, or upon any tag, card or label attached thereto or upon any box, package, cover or wrapper in which said article is encased or enclosed, the words "sterling silver" or "sterling," or any colorable imitation thereof, unless 925-1,000ths of the component parts of the metal appearing or purporting to be silver, of which such article is manufactured are pure silver, subject to the qualifications hereinafter set forth, is guilty of a misdemeanor, provided that in the case of all such articles there shall be allowed a divergence in fineness of 4-1,000ths parts from the foregoing standard.

(b). Any person, firm, corporation or association, who or which makes for sale, or sells, or offers to sell or dispose of, or has in his, her or its possession with intent to sell or dispose of, any article of merchandise made in whole or in part of silver or of any alloy of silver and having marked, stamped, branded, engraved or imprinted thereon, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which such article is encased or enclosed, the words "coin" or "coin silver," or any colorable imitation thereof, unless 900-1,000ths of the component parts of the metal appearing or purporting

to be silver, of which such article is manufactured are pure silver, subject to the qualifications hereinafter set forth, is guilty of a misdemeanor; provided that in the case of all such articles there shall be allowed a divergence in fineness of 4-1,000ths parts from the foregoing standards.

(c). Any person, firm, corporation or association, who or which makes for sale, or sells, or offers to sell or dispose of, or has in his, her or its possession with intent to sell or dispose of, any article of merchandise made in whole or in part of silver or of any alloy of silver, and having stamped, branded, engraved or imprinted thereon, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which said article is encased or enclosed, any mark or word (other than the word "sterling" or the word "coin") indicating, or designed or intended to indicate, that the silver or alloy of silver in said article, is of a greater degree of fineness than the actual fineness or quality of such silver or alloy, unless the actual fineness of the silver or alloy of silver of which said article is composed be not less by more than 4-1,000th parts than the actual fineness indicated by the said mark or word (other than the word "sterling" or "coin") stamped, branded, engraved or imprinted upon any part of said article, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which said article is encased or enclosed, subject to the qualifications hereinafter set forth, is guilty of a misdemeanor.

(d). Provided that, in any test for the ascertainment of the fineness of any such article mentioned in this section, according to the foregoing standards, the part of the article taken for the test, analysis or assay, shall be such part or portion as does not contain or have attached thereto any solder or alloy of inferior metal used for brazing or uniting the parts of such article, and provided further and in addition to the foregoing test and standards, that the actual fineness of the entire quantity of metal purporting to be silver contained in any article mentioned in this section, including all solder or alloy of inferior fineness used for brazing or uniting the parts of any such article (all such silver, alloy or solder being assayed as one piece) shall not be less by more than 10-1,000ths parts than the fineness indicated according to the foregoing standards, by the mark stamped, branded, engraved or imprinted upon such article, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which said article is encased or enclosed.

Sec. 3. Any person, firm, corporation or association, who or which makes for sale, or sells or offers to sell or dispose of, or has in his, her or its possession with intent to sell or dispose of, any article of merchandise made in whole or in part of inferior metal having deposited or plated thereon or brazed or otherwise affixed thereto a plate, plating, covering or sheet of gold or of any alloy of gold, and which article is known in the market as "rolled gold plate," "gold plate," "gold filled," or "gold electroplate," or by any similar designation, and having stamped, branded, engraved or imprinted thereon, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which said article is encased or enclosed, any word or mark usually employed to indicate the fineness of gold, unless said word be accompanied by other words plainly indicating that such article or some part thereof is made of rolled gold plate, or gold plate, or gold electroplate, or is gold filled, as the case may be, is guilty of a misdemeanor.

Sec. 4. Any person, firm, corporation or association, who or which makes for sale, or sells, or offers to sell or dispose of, or has in his, her or its possession with intent to sell or dispose of, any article of merchandise made in whole or in part of inferior metal having deposited or plated thereon or brazed or otherwise affixed thereto, a plate, plating, covering or sheet of silver or of any alloy of silver, and which article is known in the market as "silver plate" or "silver electroplate," or by any similar designation, and having stamped, branded, engraved or imprinted thereon, or upon any tag, card or label attached thereto, or upon any box, package, cover or wrapper in which said article is encased or enclosed the word "sterling" or the word "coin," either alone or in conjunction with any other words or marks, is guilty of a misdemeanor.

Sec. 5. Every person, firm, corporation or association guilty of a violation of any one of the preceding sections of this act, and every officer, manager, director or managing agent of any such person, firm, corporation or association

We wish to inform the trade that we are located at our new offices and cutting works

directly participating in such violation or consenting thereto, shall be punished by a fine of not more than \$500 or imprisonment for not more than three months, or both, at the discretion of the court; provided that if the person charged with violation of this act shall prove that the article concerning which the charge is made was manufactured prior to the 13th day of June, 1907, then the charge shall be dismissed.

Sec. 6. This Act shall take effect July 1, 1907.

Bankrupt Jeweler of Pittsburg, Pa., Charged With Secreting His Stock.

PITTSBURG, Pa., Jan. 17.—The filing of a petition in voluntary bankruptcy on the part of Morris B. Davidson, at 2809-11 Penn Ave., several weeks ago, as told in THE CIRCULAR-WEEKLY at the time, has culminated in an information being lodged against him on a charge of "fraudulent removal and secretion of goods." The complaint was laid before Alderman Louis Alpern, who arraigned Davidson for a hearing several days ago, and held him for court in the sum of \$2,500 bail. Davidson denies the charge against him.

Paul Friedman, who lives across the street from the Davidson store, testified at the hearing that he and his wife saw Davidson packing goods in boxes at 2 o'clock in the morning on the Saturday before he failed. It was this evidence that induced the alderman to hold Davidson for the action of the Grand Jury. It was also asserted that previous to the time Davidson filed his petition the stock in his store was valued at \$3,000, but that when the store closed the stock had dwindled in value to \$500. The charge against Davidson was made on this information, and he was in jail two days before he succeeded in getting bail. So far as known, no one saw Davidson removing anything from his place of business.

Woman Accused of Larceny by Washington, D. C., Jewelers, Commits Suicide Rather Than Face Trial.

WASHINGTON, D. C., Jan. 16.—Some few weeks ago Harris & Co., jewelers, of this city, had a quantity of jewelry stolen from them by a Miss Burke, who had been a customer of their store. The method she employed was simple; she had taken the jewelry in her hands for examination, and when the clerk's attention was called elsewhere, walked away with it. The jewelry was pawned, it is said, for a sum between \$500 and \$600, on the proceeds of which the woman went to New York, and returned again to this city a few days ago.

Miss Burke was arrested Saturday, and before leaving the house to accompany the police officer to headquarters, made an unsuccessful effort to commit suicide. This was averted, and she was held in \$1,000 bond to answer the charge of grand larceny Monday morning, but rather than face the examination she made another attempt to commit suicide, and this time it was successful. The body has been turned over to relatives for burial.

H. Hart, proprietor of the Aetna Jewelry Co., Kansas City, Mo., has mysteriously disappeared, and his whereabouts is unknown.

Federal Census Statistics as to the Jewelry Trade of Pennsylvania.

No federal statistics are needed to convince the American public of the tremendous growth of the industries in Pennsylvania, a growth in which the jewelry and kindred industries, located in the State, have their share. Yet the figures are now at hand to bear out the general impression in the minds of all that the State is leaping ahead with giant power in every industrial line.

Federal census statistics were given out last week, which show the condition of the jewelry, clock, optical, silverware and watch case business in the Keystone State. Unfortunately the corresponding figures of past years are not given, but the introduction to this part of the report leaves no doubt in the mind of the reader that the business men in these lines are more than holding their own.

It is not claimed in the report that every concern engaged in the above-mentioned lines of business was interviewed. It is true, however, that the figures give quite a comprehensive idea of the five industries. The figures from the report briefly tell their own story. They follow:

| | Jewelry: | Clocks. | Optical goods. | Silverware. | Watch cases. |
|--------------------------------------|-------------|----------|----------------|-------------|--------------|
| Number of establishments..... | 43 | 3 | 18 | 4 | 3 |
| Capital | \$761,518 | \$49,706 | \$628,589 | \$105,004 | \$2,724,062 |
| Land | \$13,100 | | \$41,300 | | \$150,000 |
| Buildings | \$10,000 | | \$53,989 | | \$206,670 |
| Machinery and tools..... | \$197,551 | \$15,786 | \$306,083 | \$31,500 | \$505,398 |
| Cash and sundries..... | \$340,867 | \$33,920 | \$227,217 | \$73,504 | \$1,861,994 |
| Number of proprietors | 60 | 3 | 20 | 4 | 2 |
| Salaried officials | 51 | 1 | 49 | 8 | 102 |
| Their salaries | \$42,712 | \$995 | \$54,564 | \$10,200 | \$105,946 |
| Wage earners | 492 | 55 | 352 | 73 | 743 |
| Their wages | \$295,504 | \$26,972 | \$120,493 | \$36,103 | \$345,680 |
| Men over 16 employed..... | 379 | 47 | 110 | 65 | 463 |
| Their wages | \$263,789 | \$24,700 | \$61,917 | \$33,951 | \$266,624 |
| Women over 16 employed..... | 74 | 6 | 183 | 5 | 262 |
| Their wages | \$25,709 | \$1,872 | \$47,514 | \$1,632 | \$76,448 |
| Children under 16 employed..... | 39 | 2 | 59 | 3 | 18 |
| Their wages | \$6,006 | \$400 | \$11,062 | \$,520 | \$2,608 |
| Rent of works | \$35,153 | \$19,200 | \$9,591 | \$2,875 | \$590 |
| Taxes | \$355 | \$3 | \$2,681 | | \$2,828 |
| Rent of offices..... | \$25,879 | \$9,888 | \$29,636 | \$5,596 | \$114,854 |
| Contract work | \$4,685 | | | | |
| Cost of principal materials..... | \$472,758 | \$31,057 | \$149,939 | \$54,261 | \$774,404 |
| Fuel and rent of power and heat..... | \$9,773 | \$687 | \$5,178 | \$1,500 | \$8,226 |
| Value of output for one year..... | \$1,040,029 | \$82,292 | \$471,449 | \$133,679 | \$1,466,217 |

Death of Byron E. Cully.

CLEVELAND, O., Jan. 16.—Byron E. Cully, who died at his residence, E. 22d St. and Scoville Ave., Saturday, was formerly in the jewelry trade for a number of years, and was well known in business circles in this city. Mr. Cully's death was due to tuberculosis, from which he had suffered for several years.

The deceased was about 30 years old and was a practical jeweler of ability. He was for a number of years employed by F. J. Bender, and in the fall of 1892, with Alexander Brown, formed the firm of B. E. Cully & Co., and succeeded Mr. Bender. The concern conducted a manufacturing and repairing business for the trade at 32 Public Square, and later at Euclid Ave., where Mr. Cully remained active in this work until the condition of his health caused him to retire about a year and a half ago. For the past five months he has been confined to his home.

Mr. Cully was very prominent in Masonic circles and was a member of Halcyon Lodge, 498, F. & A. M.; Fletcher Chapter No. 101, R. A. M.; Forest City Comman-

dery No. 340, K. T.; Al Koran Temple, Mystic Shrine, and of Lake Erie Consistory, A. A. S. R.

The funeral services were held Monday, and were conducted by the Forest City Commandery, K. T. He is survived by a widow.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Jan. 16.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Algoa Bay: 2 cases watches, \$234; 58 cases clocks, \$784.
- Auckland: 3 cases plated ware, \$140; 2 packages optical goods, \$122; 145 cases clocks, \$2,506; 6 packages scopes and views, \$246; 8 cases watches, \$1,211; 163 cases clocks, \$2,665.
- Barbados: 10 cases clocks, \$111.
- Bergen: 4 cases clocks, \$110.
- Bremen: 1 case jewelry, \$325.
- Calcutta: 139 cases clocks, \$1,914.
- Christiania: 16 cases clocks, \$216.
- Glasgow: 28 cases clocks, \$267.
- Guayaquil: 29 cases clocks, \$841.
- Hamburg: 7 cases jewelry, \$1,221; 4 packages optical goods, \$1,326.
- Havana: 4 cases plated ware, \$503; 2 packages

optical goods, \$112; 4 cases jewelry, \$1,978; 10 cases clocks, \$156; 2 cases jewelry, \$236; 1 package gold foil, \$283; 3 cases jewelry, \$725.

Havre: 1 package optical goods, \$300; 2 cases jewelry, \$246; 19 packages pearl waste, \$440.

Hobart: 3 cases clocks, \$148.

Liverpool: 2 cases silverware, \$250; 1 case jewelry, \$500; 1 case silverware, \$471; 67 cases clocks, \$1,817.

London: 16 packages optical goods, \$7,734; 45 cases clocks, \$1,077; 1 case jewelry, \$689; 2 packages scopes and views, \$137; 39 cases watches, \$7,378; 2 cases watches, \$500; 16 cases clocks, \$104.

Malta: 10 cases clocks, \$105.

Manchester: 60 cases clocks, \$505.

Melbourne: 5 cases plated ware, \$617; 277 cases clocks, \$3,704; 2 cases jewelry, \$488; 8 packages scopes and views, \$600; 1 case watches, \$435.

New Castle: 5 cases clocks, \$105.

Rio de Janeiro: 1 case jewelry, \$246; 1 case jewelry, \$312; 28 cases clocks, \$341.

Rome: 2 cases silverware, \$1,000.

Santiago: 1 case plated ware, \$112; 6 cases clocks, \$176.

Sydney: 4 cases plated ware, \$381; 21 cases clocks, \$227; 247 cases clocks, \$5,124; 8 cases plated ware, \$287; 289 cases clocks, \$2,641; 5 packages optical goods, \$922; 5 packages thermometers, \$252; 1 case watches, \$801.

Trinidad: 3 cases plated ware, \$107; 6 cases clocks, \$121.

Vera Cruz: 4 cases plated ware, \$364; 5 cases plated ware, \$400; 12 cases clocks, \$252; 1 package gold leaf, \$200.

Career of the Late Benjamin S. Many.

Benjamin S. Many, one of the oldest jewelers in the country, who died Jan. 15 at the home of his son, Millard F. Many, at Red Bank, N. J., as noted in the last issue of *THE CIRCULAR-WEEKLY*, was a direct descendant of the de Mauney family, who fled from France soon after the Edict of Nantes was revoked. The family name was changed about 200 years ago to Many and has so continued.

Deceased was born Aug. 16, 1816, in Greenwich St., New York, in which city his father and grandfather had been born, and there his early life was spent. In 1830 he went as an apprentice in the jewelry trade. Two years previous to the time

THE LATE BENJAMIN S. MANY.

that the late Charles L. Tiffany began business he had a business in Ann St., the firm name being Clark & Many. In 1850 Mr. Many took up the retail trade, and under the firm name of Jackson & Many, conducted a jewelry store at 150 Bowery, at the corner of Broome St. He left there in 1859 and opened a store opposite Ball & Black's, Broadway and Prince St. With the beginning of the war, two years later, the firm went out of business.

Benjamin Many was a member of the Dutch Reformed Church at the time when the Rev. Theodore Cuyler was rector. He was an earnest church worker, and counted many of the church members among his friends. He joined the 27th Regiment Militia, which later was merged into the Seventh Regiment, and did duty as a militiaman during the big fire in New York City in 1832. He was next to the oldest resident of Red Bank, N. J., and for the past four years was blind, but he retained his mental faculties remarkably and often entertained his friends and relatives with stories of his boyhood days. He was a great lover of home life, of cheerful disposition, and a general favorite with all who knew him. His death at the ripe age of 91 years brought to a close the career of a man loved and respected by a wide circle of acquaintances.

Mr. Many leaves one son, M. F. Many, with whom he made his home during the latter years of his life, four daughters, 27 grandchildren, and 22 great grandchildren. His oldest daughter, who died about two years ago, was the wife of J. H. Johnson, of J. H. Johnson & Son, 12 John St.

The funeral services were held Thursday evening at the home of his son. Interment was in Greenwood Cemetery the following morning.

Death of Sully W. Werden.

ROCHESTER, N. Y., Jan. 17.—The friends of Sully W. Werden, a well-known jeweler and taxidermist, who conducted a store at 515 Main St., E., were shocked to learn to-day that he had died two or three days ago, alone, and nothing was known of it until his body was found last night. Mr. Werden was somewhat of a recluse and lived in the rear room behind his establishment. The discovery of his death was made by a close friend, C. H. Moody, who on going to the house found that the jeweler had passed away, and his two spaniels, who stood guarding the body, were nearly dead from starvation.

A search of the room revealed a will, which shows that the dead man's property was left to Miss Kitty Liebert, a former clerk of the deceased.

Mr. Werden was about 56 years old and had been in business here for more than a quarter of a century. Since he began his career in this city in 1880 he had been highly regarded by friends and associates, and had built up a good trade both as a jeweler and a taxidermist. His health began to decline about a year ago, and for some months past he had been preparing to discontinue business, and to some extent had cleared out his stock. He was an expert in both lines which he followed, and was a noted practical repairer of ability.

Pennsylvania Retail Jewelers' Association to Meet Feb. 12, and Discuss State Stamping Legislation.

PITTSBURG, Pa., Jan. 18.—A meeting of the Pennsylvania Retail Jewelers' Association will be held at the Hotel Anderson, 6th St. and Penn Ave., this city, Tuesday, Feb. 12, 7.30 P. M. A number of important questions will be discussed, principally the proposed uniform State Stamping law, which jewelers desire so much to have passed. Plans for the holding of an exposition of jewelry at the annual meeting of the association, to be held during the coming Summer, will also be taken up. The association desires to make the annual meeting an attractive one, and it is believed that if manufacturers can be induced to exhibit their goods, it will create intense interest in the association. The indications are that the special meeting called for next month will be largely attended.

Secretary C. S. Wiley of the State organization said that he was very much pleased to notice in the last issue of *THE CIRCULAR-WEEKLY* that a State act was being prepared by this journal. "I hope that we will have copies of it before our next meeting," said Mr. Wiley. "The jewelers are in favor of such a measure. *THE CIRCULAR-WEEKLY* did a splendid thing for the trade when it succeeded in having a national act passed,

but under the law there is nothing to prevent a manufacturer in Pennsylvania violating it, provided he does not do an interstate business. The Pennsylvania Association will no doubt take pleasure in having the act presented to the State Legislature. It will in any event form a very interesting discussion."

R. F. Simmons Co. Makes Annual Distribution of Profits to Its Employees.

ATTLEBORO, Mass., Jan. 21.—The R. F. Simmons Co. distributed to its employees last week their semi-annual dividend, the result of establishing in the factory some years ago a profit-sharing system. With the money the female help received chocolates and the male help cigars. The corporation sent with the dividends the following document:

To Our Employees:

I am gratified to be able to announce to you that the directors of our company, at their meeting, Jan. 16, 1907, voted an employees' dividend of five per cent. on the total wages paid from July 1, 1906, to Jan. 1, 1907, to those who have fulfilled the conditions under which our profit sharing plan was originally introduced in 1902. This is the 10th consecutive semi-annual dividend paid our employees and exceeds by more than \$2,500 the largest heretofore declared.

When we commenced this arrangement we did not expect, as a result, the impossible, but hoped to accomplish an increased interest in the character of the goods we were manufacturing and a reasonable pride in the reputation thereof. Sufficient has been accomplished along these lines to encourage us to continue the plan another year and the directors have so voted.

The total wages paid from July 1, 1906, to Jan. 1, 1907, were \$114,276.11. Five per cent. of this amount equals \$5,713.80 as the employees' dividends. Your wages for the period mentioned are noted on a card accompanying this letter and your dividend of 5 per cent. thereon is herewith handed you in cash. Kindly return both the old and new cards to the office as soon as you have verified the figures and be sure to sign the new card.

The prospects for a good year are very bright, and at the present time we could do a much larger business could sufficient skilled help be obtained.

In this connection we would call especial attention to the excellent jewelry and silverware department in the Rhode Island School of Design, and urge any of our employees who can do so to avail of the splendid technical training afforded by this institution. We shall be glad to assist in any way we can, anyone who desires to take up this work. Bear in mind that it is the person who has had the special training and can successfully apply it, who is always in demand.

With best wishes for the new year,

HAROLD E. SWEET, Treasurer.

Death of William P. Grimshaw.

RICHMOND Va., Jan. 16.—Wm. P. Grimshaw, a prominent merchant of Danville, who died Friday afternoon, was well known in the jewelry trade and was considered one of the most enterprising business men of this section.

Mr. Grimshaw was about 35 years old and originally started in the grocery business near Lynchburg. Owing to the failure of his former partner, whom he had bought out, Mr. Grimshaw was forced to drop this line and then started in the watch repairing business in a small way in which he immediately met with success. Later on he added a jewelry stock and by his integrity and general ability built up an excellent business in Danville. For a while he had a store at 618 N. Main St., but in March last he moved to 408 Main St., where he continued until his sudden death.

Mr. Grimshaw is survived by a widow and children.

1906 — GREETINGS — 1907

TO our Friends and Patrons—Please accept our sincere wishes for a happy and prosperous New Year.

Death of Frank H. Richardson.

Frank H. Richardson, whose name and that of his father has been associated with the jewelry business for scores of years, died at 9 o'clock last Wednesday night at the Grand Hotel on Broadway, New York, where he had made his home for three decades. Besides being the proprietor of Enos Richardson & Co., 21 Maiden Lane, New York, and the president of the Richardson Mfg. Co., the corporation operating the factory at Newark, N. J., he was actively engaged in the banking business, as the president of the Nassau Bank, at Nassau and Beekman Sts., New York.

The death of Mr. Richardson came as a shock to the wholesale jewelry district of New York, in which he had been for so many years a familiar figure, being known personally to practically all the jewelers in that part of the city. In September last he had a severe attack of stomach trouble, but recovered and was apparently in his usual health up to Friday preceding his death. He went home that day after saying that he was feeling well, and he did not return to business. It was supposed that he would be about in a few days, and on Monday he sent to the office for some books on which he worked for a time. Wednesday evening he had an unexpected sinking spell and lay down on the sofa, two doctors being summoned, but he died a short time later, the immediate cause of death being an internal hemorrhage.

Mr. Richardson was the son of the late Enos Richardson, a native of Attleboro, Mass., who in 1841 made his entry into the jewelry business as a member of the old firm of Daggett, Robinson & Co., who had their factory in that city. In 1847 the elder Mr. Richardson with others established the firm of Palmer, Richardson & Co., who in 1848 moved their offices to 23 Maiden Lane, New York, and in the same year moved the factory from Attleboro to Newark, where it has since been conducted. The present style, Enos Richardson & Co., was adopted in 1866 when Frank H. Richardson was admitted to the firm. In 1890 the father and son became the sole owners of the business. Enos Richardson retired in 1899, as was noted in the issue of this paper published Jan. 18 of that year, and he died March 27 of the same year. Since that time Frank H. Richardson had conducted the business. The manufacture of solid gold jewelry has been carried on so many years by the firm that it is known only for this kind of work to which it has confined itself since 1866.

Frank H. Richardson was born in South Attleboro, May 21, 1844, and was brought to New York at the age of three or four years by his father, the family shortly afterwards making its home in Brooklyn. The son early in life showed an inclination to learn thoroughly the jewelry business, and he was about 18 years of age when his father took him into the office. The youth applied himself to the business with results so satisfactory that about four years later he was admitted to his father's firm.

To Frank H. Richardson's ability, shown both in partnership and as proprietor, was due in a large measure the expansion of the business. In 1900 he caused the old building at Green and Columbia Sts., Newark,

which had been used as the factory since 1848, to be torn down and on the site he constructed a substantial six-story and basement building. He was active in jewelry organizations, being a member of the Jewelers Board of Trade and of the Jewelers Protective Union. He was also a member of the Drug & Chemical Club.

In the Nassau Bank, Enos Richardson was a director from 1857 until his death, so it was natural that the son should enter the bank's directorate, which he did in 1895. The next year Frank H. Richardson was chosen vice-president, and in 1898 he became president, a position which he had since filled with the greatest credit. The week

THE LATE FRANK H. RICHARDSON.

before his death he was re-elected to this office for the 10th time, it being understood that if his health required he would be relieved for a time of the more onerous duties of the position.

In 1864 Mr. Richardson married Miss Goodridge, who with one daughter survives him. He is also survived by a sister, one nephew and a niece.

When Mr. Richardson's friends are asked what were his characteristics, the answer is that he was essentially a domestic man and a business man. Between the jewelry trade and the bank he divided the hours of the day, and the evenings were given to his wife and home. Thus had passed the years during which he won the esteem of those about him. While not the sort of man who makes friends quickly, he had the faculty of tying in close bonds of friendship those who were brought directly within his influence, and to many such as well as to his family his death is a grievous affliction.

The funeral, which took place Saturday, was private.

A. G. Schultz & Co., 101 N. Frederick St., Baltimore, Md., have purchased a lot at Lombard and Hollingsworth Sts., that city, which is to be improved by a four-story factory

Career of Thomas J. Bristol.

CHICAGO, Jan. 19.—Thomas J. Bristol, who died recently at Bainbridge, Ga., was one of the best known and best liked jewelry salesmen who ever traveled out of Chicago. He was born 54 years ago at Dunkirk, N. Y., and in his early days traveled for 10 years for Joseph Nelson & Co., jobbers, at that place. He then came west and for 20 years traveled for C. H. Knights & Co., of Chicago. About eight years ago he left C. H. Knights & Co. to go on the road for M. F. Barger & Co., and after being with that firm for two years retired from business. This was about two years ago.

About 20 years ago he opened a retail jewelry store at Ashland, Wis., under the name of E. J. Born & Co., E. J. Born being his partner, and remained in business for some time. Mr. Bristol was an ardent sportsman and just before his death was with a party of friends at the club house of the Knight Shooting Club, about 12 miles from Bainbridge. His heart had become affected from a previous sickness and the day before he died he had been out hunting. At about 3 o'clock the next morning he complained that he was not feeling well and died within an hour. The remains were shipped to Dunkirk, N. Y., where the interment took place.

Deceased left an estate of about \$40,000, and is survived by a brother, W. D. Bristol, Lisbon, O., and two sisters who live at Dunkirk, N. Y.

Mr. Bristol was one of the most genial and whole-souled men who ever traveled out of Chicago. He never married, was always fond of good company and as a salesman had few equals. He was a 32d degree Mason and was always ready to stand by a friend. His death is universally mourned in the jewelry trade here.

Important Smuggling Decision.

Opinion of Judge Holt in Recent Emerald Case Discusses Many Interesting Points Under the Customs Laws.

It was noted in last week's issue that in the case of the United States against 218½ carats of loose emeralds brought into New York by Manuel J. Suarez, a resident of Bogota, Republic of Colombia, a decision had been handed down by Judge Holt, of the United States District Court, declaring that the United States Government is entitled to a judgment of forfeiture. Judge Holt's opinion has since become available for publication. It is an extended and comprehensive treatment of several questions relating to smuggling.

The trade will be especially interested in learning that Judge Holt does not give to the decision in the old Keck case the wide scope as a precedent for which some lawyers, including the counsel for Suarez, have contended. These lawyers have claimed that in accordance with the decision of the United States Supreme Court in the Keck case there can be no smuggling and no forfeiture of goods unless the articles have been carried by the smuggler entirely outside of the custom lines, which are commonly established on the docks. Customs inspectors and examiners have declared that if this were the law it would be extremely difficult or impossible to detect smugglers who conceal precious stones and jewelry in their clothing. The secret service and other Treasury agents are constantly receiving tips and information of various kinds about the doings of supposed smugglers. Persons against whom suspicions are directed, say the officers, are readily searched on the ship or on the dock, but after they leave the dock the searching becomes difficult or impracticable.

Of the whole number of persons suspected comparatively few are guilty. If the inspectors chased after all the suspected persons and searched them after leaving the customs lines there would be all kinds of trouble, criticism and remonstrance. In the present practice, the searching within the lines is largely a matter of course.

Judge Holt, in his opinion, reviews the facts that Suarez had a trunk, a box and two hand bags tied together. In his declaration he said that he had three pieces of baggage; that he wished to leave the trunk and box with the Collector, retaining only the hand bags during his stay in New York. After Suarez had specifically denied having any precious stones or jewelry about him the inspector took him back to the ship where the package of emeralds was found in a pocket of his overcoat.

Judge Holt's opinion makes a new distinction as to Section 9 of the Customs Administration Act. He holds that the first part of the section, as to making an entry under cover of a fraudulent statement or practice, applies only to false invoices or practices employed in connection with the open entry of merchandise, but does not relate to cases where the merchandise is concealed. Consequently Suarez did not violate this part of the section.

The latter part of the section was violated, the judge holds, because in neglecting

to mention the emeralds in his declaration of baggage and thereafter in denying that he had any jewelry or precious stones, Suarez had been guilty of an act or omission intended to deprive the United States of lawful duties.

The judge next considers the additional grounds on which the Government claims a forfeiture. In the second cause it is charged that the emeralds were found in the pockets of Suarez and that he had not mentioned them in making entry of such baggage. The judge says that these stones, loose and unpierced, could not be used for personal purposes, and so did not constitute baggage in the common law sense of the term. In fact, the emeralds were merchandise.

The statutes contain no specific division applicable to merchandise carried on the person, the general provisions of the statutes having regard to the ordinary importation of merchandise as part of a cargo of a ship. Judge Holt says, however, that within the sense of the customs law, he considered these emeralds to be baggage which the passenger was bound to declare just the same as articles in his trunk. So the finding on the second cause was also against Suarez.

On the third cause of forfeiture, the court again found against Suarez. It was charged that he had unloaded merchandise within a permit of any collector or naval officer. Judge Holt holds that as the emeralds were really merchandise, the passenger carrying them in his pocket should have declared them before he left the ship, thus providing for the duty and getting the necessary permit.

Then the court comes to the fourth cause of forfeiture, that Suarez unlawfully smuggled the emeralds into the United States. Counsel for Suarez had cited the Keck decision to the effect that goods are not smuggled until they have actually left the ship and reached the shore. In the Keck case diamonds that had not been declared were seized by customs inspectors before the stones left the ship. Counsel for Suarez claimed that the Keck case was controlling in the present suit. The evidence showed that although the emeralds had been taken by Suarez off the ship they had not been taken outside the customs lines. The judge in deciding against Suarez on this cause, says:

It is argued that the custom house lines on the dock are simply established for the convenience of passengers; that the custom house officers might examine the property on the vessel; that until any property has passed the custom house lines, it is to be regarded as being on the vessel, and that therefore the smuggling act does not apply to these emeralds. But, in my opinion, the fact that these emeralds were taken off the ship to the shore is sufficient to make them subject to the provisions of the section prohibiting smuggling.

Suarez took them with him on the dock. He had them with him when his baggage was examined. He was particularly interrogated as to whether he had any such stones with him, and denied it. The argument of the claimant's counsel would go the length of saying that under those circumstances the customs authorities could do nothing, and must wait until he had gone out through the custom house lines before they could arrest the person of the passenger or seize the precious stones concealed upon his person.

I think that when the proper officer of the customs examined his baggage and put to him the questions whether he had any personal property which he had not declared, or any precious stones upon his person or in his pockets, he was obliged to state the truth, and that when that examination was finished, and he still had these emeralds in

his pocket, without having admitted it, the act of smuggling was complete.

A Word of Warning as to the Use of Hydrofluoric and "White" Acids.

SINCE the publication last week of the results of the experiments of M. D. Rothschild, which led to the discovery that hydrofluoric or "white" acids can be used as an absolute test to determine when imitation precious stones are made of glass, several inquiries have come to THE CIRCULAR-WEEKLY in regard to these acids and a number of warnings have been received from people who thought that more attention should have been called in the article of the danger that might result from the careless use of either chemical.

In answer to the questions of those who wish to know of what hydrofluoric acid is composed, we would state it is a compound of hydrogen and fluorine. It is obtained by distilling a mixture of the mineral fluorspar with sulphuric acid. Hydrofluoric acid has the power to dissolve glass and silica, and, hence, it is and should be kept in bottles of lead, silver, platinum or pure gutta-percha. For this reason we would state to those who thought we should have warned jewelers not to put this in glass bottles, that there is little danger, of any one doing so, because the acid is sold only in bottles of gutta-percha or lead.

The acid is highly corrosive and its vapor is poisonous to a certain extent, so care should be taken in using it to see that the receptacle containing the acid is kept corked and that it is kept away from the head of the user.

Hydrofluoric acid is colorless and evaporates at 590 degrees in dense white fumes when exposed to the air. It has a powerful affinity for water.

White acid, as stated before, is a combination of hydrofluoric acid and ammonia.

Death of Richard Cahill.

LISBON, Jan. 16.—Richard Cahill, an old and well-known jeweler, who had been in business in Lisbon upwards of 30 years, died at his home here Monday morning. Death was due to tuberculosis, which developed from an illness with pneumonia 14 years ago. Until within a short time, however, he was able to be in his place of business.

Mr. Cahill was born 78 years ago. His parents moved from Massachusetts to Steuben County, N. Y., shortly after his birth, and here he grew to manhood. He was twice married.

Ignatius Fried, Mobile, Ala., Goes Into Bankruptcy.

MOBILE, Ala., Jan. 21.—Ignatius Fried, a jeweler of this city, is named in a bankruptcy petition filed in the United States Court.

Mr. Fried, who is a young man, began business in May, 1902, with H. Gabriel under the style of Gabriel & Fried, but the firm dissolved in July last year, Mr. Fried retiring. He later started in business by himself, but did not meet with success.

E. S. Walker, Calgary, Alberta, was burned out recently.

"GEMFINDER" takes a melancholy pleasure in referring the trade to his advertisement of April 25th last, in the "Jewelers' Circular." Unfortunately, his prophecy has been fulfilled. Not only have Precious Stones advanced, but the end has not yet been reached. Sapphires have gone up at least 25 per cent. in the last six months, and they will go still higher.

"Gemfinder" again warns prospective buyers not to delay. All kinds of Precious Stones are scarce and prices on some may become prohibitive.

30th Annual Convention.

Members of Jewelers' League of New York Meet and Elect Officers for the Ensuing Year.

Members of the Jewelers' League of New York met in annual convention for the 30th time last night in the assembly hall of the United Charities Building, 109 E. 22d St., New York. The meeting was called to order by President George W. Street, and the reading of the minutes of the last meeting having been dispensed with on motion, Mr. Street delivered his annual address.

PRESIDENT'S REPORT.

Gentlemen—We are to be congratulated upon having reached this, our 30th anniversary, and it affords me great pleasure to inform you that your action taken at the last annual meeting has been more successful than predicted by many, and is sure to prove, with your hearty co-operation, a great success.

The number of members in the league, Jan. 1, 1907, was 1,630, representing \$7,247,750.00 insurance.

We have paid the widows, orphans and other beneficiaries of deceased members, \$240,659.31, and for deaths since organization, \$3,375,146.69. Our reserve fund is \$275,750.57.

The latest reports from insurance departments show that the fraternalists that furnish insurance at cost have been making wonderful progress; they are even outstripping the old liners in the race for business. They are without doubt one of the greatest powers for good government and the protection of the home that we have in the country. We would ask that our members hear these facts in mind, and exert themselves the coming year to increase our membership.

Since our last annual meeting, George R. Howe, known to many of you as one who has taken a keen interest in the welfare of the league from its organization, has asked if it would not be well to submit at our next annual meeting a plan giving a proposed member the option of paying the monthly assessments on the present yearly step-rate basis, or on a level or flat-rate plan, which is a stated monthly rate for the full period of life.

Your executive committee think well of this and suggests that all who are interested in the matter, communicate with the secretary during this year, so that, should it be deemed advisable, it may be acted upon at the annual meeting in 1908.

Gentlemen, as we have been prosperous in the past 12-month, so will we hope to be much more so in the coming year; and I trust that we will all with one accord make strenuous efforts for the good and growth of our splendid fraternal brotherhood, the Jewelers' League.

Owing to the fact that the report of the treasurer was presented and submitted to the members, the reading of this was also dispensed with. The report shows:

F. A. MARSELLUS, Treas.

Accompanying the treasurer's report was that of the Examining Finance Committee, as follows:

NEW YORK, Jan. 11, 1907.

We, the undersigned, have examined the books of the Jewelers' League, and find the balances correctly set forth in the treasurer's report. We also find that the bonds as specified are deposited in the vaults of the Maiden Lane Safe Deposit Co. as the property of the Jewelers' League of New York.

R. A. BREIDENBACH,
 J. R. GREASON, JR.,
 ANDREW McLEOD,
 Examining Finance Committee.

No report was made by the Executive Committee, as there was nothing particular to recommend to the members.

The new step rate plan of assessment, which went into effect by the amendments attached last year, has proved successful in several ways. The election of officers was then in order, and the Nominating Committee having reported the following, all were re-elected to office unanimously.

President, Geo. W. Street; first vice-

president, John R. Greason; second vice-president, Leo Wormser; third vice-president, Geo. H. Hodenpyl; fourth vice-president, Bernard Karsch.

Executive Committee, one year, Stephen B. Kent; two years, Samuel H. Levy, M. L. Bowden and Chas. R. Jung.

Advisory Board, one year, Harry A. Bliss; two years, Geo. W. Parks, F. L. Wood, S. A. Baldwin, R. A. Breidenbach, H. Freund, E. B. Eaton, F. H. Dana, C. C. Champenois and Morris Lissauer.

Customs Fight as to Duty on Millinery Ornaments, Etc., May be Reopened.

New cases involving the so-called millinery jewelry are to be brought before the Board of United States General Appraisers, New York, which has just disposed of upward of 10,000 cases of a similar character. It was supposed by the members of the Board that the principles involved in the importation of millinery, dress and hair ornaments had been quite well settled, as test cases had gone through the courts.

The thousands of protests that had been filed were held up pending the decisions of the courts, and nearly a year ago such decisions had been received. The acquiescence of the government and importers since that time has enabled the Board to clear its calendar of all the back cases. Now some of the importers propose to raise new questions with reference to hat pins, having ornamental heads made of imitations of precious stones, and the government, it is understood, will bring a counter suit relating to the same subject.

The policy adopted by the Board has been that when these pins and other ornaments are made entirely of base metal and the ornamental heads are of a simple, cheap character, then the articles should be classified as manufactures of glass or metal dutiable at 45 per cent. When precious metals are used in the manufacture of the articles or the imitation of the precious stones are somewhat above the standard of plain beads, especially if there is elaborate cutting, carving or other ornamentation, then the Board has classified the articles as jewelry dutiable at 60 per cent. It was said the latter class of articles might be called the jewelry of the poor just the same as gold jewelry set with precious stones is the jewelry of the more wealthy.

The object of the manufacturers in bringing the new case is to try to get a larger proportion of the articles classified as manufactures, and the government on the other hand will contend the jewelry clause should embrace a wider field than at present.

Market Price of Silver Bars.

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

Thirtieth Annual Banquet of the Chicago Jewelers' Association.

CHICAGO, Jan. 19—Never in all the 30 years' history of the Chicago Jewelers' Association has so large and representative a gathering of the stalwart business men met together in good cheer as gathered in the banquet hall on the ninth floor of the Auditorium to-night. This was the moment—prolonged for a few hours—of complete relaxation after a most strenuous and unprecedented profitable season in the jewelry business. And not one of the 273 persons assembled but took advantage of the time, place and occasion to demonstrate how much latent good will he had had bottled up all these months, to be uncorked at this good-fellowship meeting.

Every one was happy—all the way from the cocktails and sandwiches in the cloakroom to the coffee and cigars in the great banquet hall. Wild smilax, roses and carnations were the floral decorations which added to the beauty of the hall. Added to this, on all sides were American flags artistically draped together, with broad bands of colored bunting studded with stencil and gold.

Soon after 6 o'clock the guests began to arrive, and until 8.15 the time was spent in exchanging greetings, renewing acquaintances and making new ones; and quickly the time passed until the announcement that the banquet hall was ready. The banquet committee showed rare discernment in the seating of the guests—in placing congenial parties together at the long tables, which completely filled the hall. Along the east side of the hall on a slightly raised platform was the speakers' table.

When all were seated, grace was said by Dr. Emil G. Hirsch, one of the speakers of the evening. Delightful music was furnished by an orchestra stationed at the north end of the hall, and at proper intervals the quartet sang these selections: "Waiting at the Church," "Annie Laurie," "You Look Awful Good to Father," "Waltz Me Around Again Willie" and "Not Because Your Hair Is Curly."

As each guest had been provided with a leaflet with all the songs, all joined in the choruses with a vim.

It was soon after 9 o'clock when President John P. Byrne rapped for order, apologetically remarking that he would probably make himself very unpopular for interrupting the "good time" every one was having, but that there had been an unusual happening within the last few days—something not on the programme. He then read a letter addressed to the association, in which Julius Schnering tendered his resignation as vice-president of the association, inasmuch

as he proposed to retire from the jewelry business on Feb. 1. At the conclusion of the reading of the letter Mr. Byrne called upon Lem Flershem, "one of Mr. Schnering's oldest friends," to tell Mr. Schnering, "who was a man with a heart as big as this hotel and the whole loop district," how much they all thought of him, and to present him with a handsome loving cup. The cup bore the inscription, "To Julius Schnering, from the Chicago Jewelers' Association, at their 30th Annual Banquet." Loud and continuous calls from all parts of the hall for "Schnering!" brought Mr. Schnering to his feet.

"No, I am not 'all right,'" he said, in

J. P. BYRNE.

President of the Chicago Jewelers' Association.

answer to the repeated statements that "Schnering is all right!" "I am scared to death; I only wish that I could talk like Byrne here, so that I could tell you how much I appreciate the many kind things you have said about me to-night. Well, I am glad that I have your good opinion. I haven't much money, and some of these days I may want a job with some of you."

Mr. Schnering concluded his remarks by saying that 30 years ago he had started in business under Alonzo Wyngant, who was his guest to-night; that during his long connection with Otto Young & Co. he had made many friends, which he hoped to keep

always. At the conclusion of his remarks the quartet sang the following song, in which all joined:

It's awf'ly nice of all you boys to see me to the train.

So long, Schnering.

I didn't think you'd care if you should ne'er see me again.

You're wrong, Schnering.

This reminds me of my family,
On the day I left the Zuy-der-See.

To the schooner then they came with me,
I seem to hear them say:

CHORUS.

So long, Schnering;

Schnering, we will miss you so,

So long, Schnering,

How we hate to see you go;

And we'll all be longing for you, Schnering,
While you roam;

So long, Schnering,
Don't forget to come back home.

It's awf'ly kind of all you boys to see me off to-night.

So long, Schnering.

I didn't think you'd care if I should ever 'phone or write.

You're wrong, Schnering.

Yes, I'm going some other fields to see

Awf'ly good boys—good as you can be;

I'm as Young as Young as I can be

And glad to hear you say,

CHORUS.

At the conclusion of the dinner President Byrne called for order, which he succeeded in getting after awhile, and said:

PRESIDENT BYRNE'S ADDRESS.

"It is always pleasant and easy to preside over a banquet of successful, prosperous people, and the prosperity of the past year has made us all so."

Then reviewing trade conditions, touching on the fact of the tremendous crops of 1906; that this was the Chicago Jewelers' Association; that Chicago was the jewelry market of the United States, eclipsing New York by upwards of 20 per cent.; that growth of the optical business was the most phenomenal thing in the history of the jewelry trade; that this was an age of association; that the "Jewelers'" was the oldest organization in Chicago and in the west, save the Board of Trade; that only one death occurred in the association in over two years, that of Otto Young, a former president of the association, and one of the prominent business men of Chicago. Continuing he said:

"Much history is made in in this busy world in the term of 30 years, and a tremendous number of unforeseen things happen to all of us, *e. g.*:

"AL. SERCOMB—At that time was ambitious to become president of the Chicago Northwestern road, and I think the year 1877 antedates his adoption of the silk hat

as a necessary accessory to his business.

"MR. HULBIRD at that time never dreamt that he'd enter the jewelry business. Nor was he a director in 57 varieties of banks and trust companies.

"PETER LAPP in 1877 was not old enough to vote, and doubtless his mind was occupied almost exclusively with 'Love's young dream'.

"BENJAMIN ALLEN was then a hard-working member of the jeweler's trade. That was long prior to the time that he commenced erecting skyscrapers and testing the speed of French autos as an antidote for muscular contraction, brought on by the incessant cutting of coupons.

"JIM BOWERS was too young to vote; hadn't entered politics, of course, and hadn't formed any ambition for the mayoralty.

"PRESIDENT ROOSEVELT hadn't cast his first vote; hadn't captured San Juan Hill and hadn't busted his first Trust.

"WILLIAMS hadn't yet got his hands on Uncle Sam's cash, nor had his talent as a toastmaster been discovered by the Jewelers' Association. But it seems to me it wasn't long afterwards that the old reliable Banquet Committee—Mead, Sercomb and Fler-sham—discovered him, and that they know a 'Gem of the purest rays serene' when they see one, goes without saying.

"He seems to like the job, too.

And we like him;

And so it's nobody else's durned business."

Mr. Byrne then introduced the toastmaster of the evening, William P. Williams, and his remarks were so flattering that when Mr. Williams arose he requested that stenographic report be made of them, so that he could show them to Mrs. Williams. "The request," he said, "was prompted by the fact that on a former occasion he had told his wife of the nice things which were said of him at the banquet, and looking at me clamly, yet fondly, said: 'Dear, I hope you are not leading a double life.'" And so with rare humor, trite remarks and delicate diplomacy did the toastmaster keep every one in good spirits and very materially added to the joyfulness of the occasion.

Mr. Williams introduced Dr. Emil G. Hirsch, the first speaker of the evening, whose topic was "Dying Pearls." He called to mind the fact that pearls die; that in the Louvre in Paris in a case for 15 years is a string of pearls that formerly belonged to the wife of President Thiers; that these pearls because they never came into contact with a warm, living bosom were dying; that so it would be with our civilization here, if we did not extend our hand of good fellowship to those suffering, in want, in need of encouragement, we would be like the dying pearls, which had no warmth or luster. He made a plea for those of other countries who were harassed, murdered and debased; that we were a people of foreign ancestry, and should lend a helping hand to all in distress.

The second speaker of the evening was Judge George A. Carpenter, of the Juvenile Court of Chicago. He told of the work being done by that court in its endeavor to solve the thousand of difficult problems presented. He believed that it was better to put a boy on probation than to send him to

the John Worthly School—the place provided for juvenile offenders. He pleaded with all those who caught their youthful employes in some acts of dishonesty to take the time to look the boy or girl up, make an effort to ameliorate his or her condition and stay with him until a reform had been effected. He told of the noble work of the great number of probation officers who were working without salary—only with the hope that they could better humanity by their efforts.

Samuel S. Page, a leading member of the Chicago Bar, was next introduced by Toastmaster Williams. Mr. Page spoke on the topic, "The Jeweler as a Citizen." He said in part:

You gentlemen have contributed largely by the establishment of your great business to the upbuilding of the material interests of this city. This is much, and you deserve great credit for it. But after all, your main incentive has been to make yourselves prosperous.

This also is well. Yet there is much more—something fine and great—that you can do for the welfare of our city in respect to its higher needs.

In a city with such a hasty and marvelous growth as ours, and in the rush for wealth that has characterized all its activities, many most desirable things have for the time being been overlooked, or neglected, or have not received that support and encouragement which they should have had, and therefore have failed to keep pace with the advance of the city in other respects. Amongst these are various hospitals, charitable institutions and associations; the different associations, bodies and instrumentalities, for the promotion and conserving of purely public interests of every kind; the shielding of the public treasury from the assaults of the vicious; the procuring of a pure and untrammelled ballot; the advancement of civil service wherever practicable; the procuring of the best men for all places of public trust of preference.

In introducing the next speaker, John Barton Payne, Mr. Williams referred to the fact that Mr. Payne was a speaker at another banquet held this evening also at the Auditorium. Mr. Payne's topic was "Rough Diamonds," and said that the ancients knew only of diamonds in the rough—only after 1476 that they were cut and polished. That these stones had been prized because of their density and hardness, and had become to be symbolic of the character of the person who was honest, of sterling worth and manhood. That to be a diamond in the rough meant so much more than to be of the polished variety; that the diamond in the rough stood for American civilization, robust character and progressive thought; Chicago, as a city, is a diamond in the rough, and everywhere all over the world its slogan, "I will," is known.

It was about 11.30 o'clock when the banquet came to and end. All of the guests arose and sang "America."

All then departed, vowing they had had a most enjoyable evening.

Echoes of the Banquet.

Al. Sercomb did not wear his silk tile in the banquet hall.

* * *

Col. Henry L. Turner, wearing his ever present bland smile, was a conspicuous guest.

* * *

Geo. G. Gubbins was voted the most popular man in the hall. But at that George wouldn't make a speech—and he couldn't sing.

* * *

The guests at table No. 3 were on their feet most of the time; some 60 odd toasts were drunk—actual count. Adeock, toastmaster.

A. B. Towers was ever present, and present everywhere. The success of the banquet is due, in a great measure, to his untiring efforts.

* * *

The souvenirs were silver steins, containing frozen punch. The stems bore the monogram "C. J. A.," and underneath, "1907." The stein song was sung at this service.

You Can Easily Operate This Typewriter Yourself

Don't worry your correspondent.

Don't write him anything by hand that takes him time to make out—that may leave him in doubt—that he can't easily read.

And don't fill out legal papers or card memos—or make out accounts or hotel menus in your own handwriting.

It looks bad, reflects on your standing, makes people think you can't afford a stenographer, and is sometimes ambiguous.

You can write out your letters—make out an abstract—fill in an insurance policy—enter your card memos—make out your accounts, or a hotel menu—or do any kind of writing you need, on any kind, size or thickness of paper, and space any way you want on

The OLIVER Typewriter

The Standard Visible Writer

You can write any of these things yourself if you do not happen to have a stenographer.

For you can easily learn, with a little practice, to write just as rapidly, and as perfectly, as an expert operator on the OLIVER. Because the OLIVER is the simplified typewriter. And you can see every word you write. About 80% more durable than any other typewriter, because it has about 80% less wearing points than most other typewriters.

80% easier to write with than these other complicated, intricate machines that require "humoring"—technical knowledge—long practice and special skill to operate.

Than machines which cannot be adjusted to any special space—with which it is impossible to write abstracts, insurance policies, or odd-sized documents except you buy expensive special attachments requiring experts to operate.

You can adjust the OLIVER to any reasonable space—you can write on any reasonable size and thickness of paper, right out to the very edge, without the aid of any expensive attachment or special skill, and your work will be neat appearing, legible and clear.

For the OLIVER is the typewriter for the doctor, the lawyer, the insurance agent, the merchant, the hotel proprietor—or any man who does his own writing.

Write us now for our booklet on the simplified features of the OLIVER.

Important Meeting at Chicago.

Officers of the American National Retail Jewelers' Association Hold Enjoyable Session and Consider Many Subjects of Importance.

CHICAGO, Jan. 21.—A very important meeting of the general officers of the American National Retail Jewelers' Association was held here on January 15 and 16 at the rooms of the Chicago Jewelers' Association, in the Columbus Memorial building. The meeting was called for the purpose of setting the date of the coming convention, and also to decide on certain lines of policy to be followed for the best interests of the association.

President Max Jennings, of St. Clair, Mich., made the opening address. This was listened to with unabated interest by those present. He pleaded for a larger organization, asked the executive committee to formulate a plan for the affiliation of the State societies which were not in affiliation with the main body and delivered some good advice on closer relationship between the management, the jobber and the retailer. A committee on State constitutions was then deferred to the next meeting.

I. M. Radabaugh, Hastings, Minn., then read a letter of resignation from S. M. Strain, Nokomis, Ill., who said he had discontinued business at that place. Mr. Strain's resignation was accepted with regret. Paul N. Lackritz, this city, was then appointed as the vice-president for Illinois in Mr. Strain's place. Many letters of regret were read from members who could not attend this meeting, and all sent their proxies to Sec. Radabaugh. Following the general order of business, a telegram was sent, sending greetings to D. L. Davies, president of the Nebraska Retail Jewelers' Association, who was presiding at Lincoln, Nebr., over an important meeting of that body, at the same date at which the American National Retail Jewelers' Association assembled here.

The Secretary then reported that the State societies of Minneapolis, South Dakota, and Pennsylvania were officially affiliated. His financial report showing the society to be in good financial condition, was then read and adopted.

In the course of business the following resolutions adopted by the National Association of Retail Druggists were then read and endorsed:

Resolved, That the anti-trust laws of the nation and of the States should not be used to stifle and prevent organization and co-operation among the smaller trade interests which seek only to preserve their own commercial existence in the face of the efforts of powerful and selfish monopolies to gradually eliminate the small dealer.

Resolved, That if a proper legal construction of such anti-trust laws embodies a prohibition of co-operation among the smaller merchants then, in such case, said anti-trust laws are fundamentally wrong in their conception, enactment and operative effect, and require amendment.

A series of resolutions as follows were then adopted for the best interests of the jewelry trade:

Resolved, That we record our condemnation of all marks on gold and silver products which are not indicative of their true quality, and that we heartily approve of the new federal stamping law relating to gold and silver jewelry, believing that it will aid materially in the promotion of honest qualities and honest methods in the trade.

Resolved, That we favor such action as shall

secure to the retail jewelry trade exemption from the unfair, unjust and ruinous competition by retail mail-order concerns, department stores and similar alien elements, and we call upon manufacturers and wholesalers to lend their assistance in such measures as shall recognize the rights and interests of the retail jewelry trade, and afford to the trade that full measure of protection to which it is entitled.

Resolved, That we condemn the practice of retailing by wholesale jewelers as fraught with great widespread injury to retail jewelers, and as being fundamentally unjust in that it involves competition between the wholesaler and the retailer who buys from such wholesaler. We, therefore, regard the practice as being hostile to the welfare of the jewelry trade, when such retail dealing is not regularly maintained as a separate business apart from the wholesale business.

Resolved, That it is the sense of this association that retail jewelers should confine their purchases of watches, clocks, jewelry and kindred articles, as far as practicable, to those wholesale dealers and manufacturers who restrict their sales to retail jewelers or who sell under those conditions only which enforce retail prices recognized by the retail trade as reasonable and just.

Resolved, That we refuse to purchase goods without the name or mark of the manufacturers on same.

Resolved, That we condemn the common practice of selling diamonds, watches, clocks and jewelry by persons other than jewelers and commonly known as curbstone dealers, or by employes of jewelry jobbing houses.

Sec. Radabaugh's report showed nearly 1,100 members in good standing who belonged to this organization.

Paul Lackritz, of this city, and John P. Archibald, Blairsville, Pa., then spoke interestingly about their experience of dealing with jobbers who sold at retail.

After providing for certificates of membership and other routine business, the following committees were appointed for the next meeting:

LEGISLATION.—W. F. Steinmayer, Pennsylvania; Fred Russel, Michigan; A. E. Barker, Minnesota.

TRANSPORTATION.—Paul N. Lackritz, Illinois; A. J. Stoessel, Wisconsin; T. A. Westmyer, West Virginia.

CREDENTIALS.—D. L. Davies, Nebraska; R. C. Bernau, North Carolina; C. E. Tillson, North Dakota.

MEMBERSHIP.—A. B. Hull, Michigan; A. E. Paegel, Minnesota; H. G. Cook, Tennessee.

TRADE INTERESTS.—C. S. Wiley, Pennsylvania; L. M. Derby, New York; E. H. Dunbar, Massachusetts.

ASSAYING.—Fred C. Newhall, Massachusetts; W. B. Ankeny, Iowa; D. G. Gallet, South Dakota.

DECEASED MEMBERS.—S. Kronholz, Connecticut; Geo. R. Youmans, Georgia; H. M. Rynman, Texas.

PROGRAM.—Max Jennings, Michigan; I. M. Radabaugh, Minnesota; J. P. Archibald, Pennsylvania; T. A. Westmyer, West Virginia; A. B. Hull, Michigan.

This ended the first day's session.

Wednesday morning all the delegates left in a special car over the Aurora-Elgin & Chicago Electric R. R., as guests of the Elgin National Watch Co., where they visited their establishment, going through all the various departments. After partaking of a substantial lunch they returned to Chicago at 3 P. M., and opened the Wednesday session. The question of the organization of States not yet organized was voted to rest in the hands of the secretary, while the requests of L. Alva Lewis, Klamoth Falls, Ore., and W. S. Sumner, Nettleton, Miss., both of whom asked permission to

organize their respective states, was granted.

Votes of thanks were then tendered the Elgin National Watch Co., the Chicago Jewelers Association, the American Horological Society and the trade press for the courtesies extended.

As a final order of business it was decided to hold an exhibit at the coming meeting, the date of which was left open to suit the ideas of the committee appointed for the purpose. The next meeting depends on the exhibit committees, of which there are three, composed of three members of the American National Retail Jewelers Association, three members of the American Horological Society, and three members of the Retail Jewelers' Association of Cook County. If satisfactory arrangements can be made, it is contemplated to hold at the next meeting a very large jewelry exhibit at the Coliseum, an important exhibition hall here. If satisfactory arrangements cannot be made for this plan, then a trade exhibit will be held on a smaller scale.

Post Office Department Issues Fraud Order Against Silverware Concern of Philadelphia, Pa.

PHILADELPHIA, Pa., Jan. 21.—A fraud order was issued, Saturday, by Postmaster-General Cortelyou against a firm known as the Rogers Silverware Co., 27 and 29 So. 7th St. About 8,000 letters addressed to the firm are now held up at the central postoffice. Of these about 1,000 are registered, and are believed to contain stamps or money.

Each of the letters held is believed to contain 97 cents. This is the sum necessary to negotiate what the company declares to be "a beautiful four-piece set of silverware (full size for family use), which we will send in a leatherette case, silk finish lined, securely packed in a strong outside case." The postal inspectors first began to inquire into the company's scheme some weeks ago. They secured their information from one of the patrons of the firm, who objected to the interference of the postal authorities. Their patrons are said to have been secured from lists of names furnished them by advertising firms.

These letters are reported to have been sent by people who had solved picture problems in cheap advertising mediums and who were promised sets of silverware if they guessed successfully. The 97 cents charge is said to be for the cost of packing and shipping. The postal authorities say that the scheme is not a swindle, because the people got something in return for their money, but that it is a deception. Consequently the fraud order was issued against the firm.

The firm known as the Rogers Silverware Co. is believed to be composed of Harry and George M. Rogers, brothers, who conduct a phonograph and scale business. Harry Rogers was indignant at the action of the postal authorities. He claims the concern lives up to its contract in every particular and in no way misrepresents or cheats its patrons.

A. S. Pallissard, Bradley, Ill., has moved his store from Schuyler Ave. to 239 E. Court St.

THE JEWELERS' CIRCULAR PUB. CO.

Stockholders of Simeon L. and George H. Rogers Co. Elect New Officers and Directors at the Annual Meeting.

HARTFORD, Conn., Jan. 18.—The annual meeting of the stockholders of the Simeon L. & George H. Rogers Co. was held last Wednesday in Portland, Me. The proxies of stockholders who were dissatisfied with the old management were presented by George M. Hallenbeck and Edgar F. Waterman, of this city, directors of the company. The management was represented by President Mac Fadyen, William Morgan and James J. Redmond. Directors and officers favorable to a change of management were elected as follows: Directors, George M. Hallenbeck, Charles P. Cooley, John M. Ney, Edgar F. Waterman, Charles P. Whiting, P. Henry Woodward and Thomas W. Russell; treasurer, George M. Hallenbeck; assistant treasurer, Edgar F. Waterman; secretary, R. E. Sage.

According to the by-laws, the president and vice-president have to be elected at a meeting of the directors to be held as soon after the annual meeting as possible. This directors' meeting was held to-day and George M. Hallenbeck was elected president and general manager; Charles P. Cooley, vice-president, and R. E. Sage, treasurer in place of Edgar F. Waterman, resigned.

The result of the election is a victory for the stockholders who were opposed to the former management as John Mac Fadyen, president and treasurer, and George H. Rogers, secretary, were dropped as directors and officers, and Messrs. Whiting, Woodward and Russell added to the directorate, thus increasing the number of directors from six to seven. A change in the management of the company had been foreseen several months ago when a circular was sent to the stockholders explaining alleged defects in the bookkeeping and asserting that they were responsible for a chaotic condition of affairs. The former bookkeeper of the corporation was dropped from the pay roll, as told in the circular, which alleged that he was to blame for the confused state of things. A few days before the annual meeting the stockholders received a circular signed by Directors George M. Hallenbeck, Charles P. Cooley and Edgar F. Waterman, asking for proxies to be used at the meeting of stockholders, in which it was asserted that the failure of the company to pay dividends was because of "incompetence and mismanagement in the plant at Hartford." Later William H. Watrous, manager of the Hartford branch, issued a card saying that he had only the success of the company at heart and would gladly turn over the management to somebody else fully competent to conduct its affairs.

George M. Hallenbeck, the new president, treasurer and general manager, is one of the oldest spoonmakers in the country, and is thoroughly versed in every branch of the manufacture of flat ware, having been identified with this industry since March 3, 1864, when he entered the employ of the old firm of Hall, Elton & Co., Wallingford, which was established in 1837. Mr. Hallenbeck remained with this firm for 18

years when he went with the Meriden Britannia Co., with whom he was connected from 1882 to 1900. Since the latter year he has been the manager of the Wallingford factory of Simeon L. & George H. Rogers Co. Mr. Hallenbeck will hereafter have charge both of the Wallingford and Hartford factories, with R. E. Sage, the secretary, assisting in the management of the Hartford plant.

Preparations Complete for the Sixth Annual Banquet of the 24 Karat Club.

Everything is in readiness for the sixth annual dinner to be given by the 24 Karat Club next Friday evening at 6:30 o'clock in Delmonico's, New York. All available seats in the banquet hall have been sold and the committee in charge has been obliged reluctantly to decline a number of requests for tickets. There will be, as usual, a fine musical programme, and some novelties are promised.

It has been the policy of the club to give at each of its mid winter dinners as well as its Summer outings a souvenir that will be of real beauty and value to the members, good taste always being shown in the selection, and there will be no exception to the rule on this occasion.

The speakers will include: Robert Rogers, D.D., Ph.D.; the Hon. J. Adam Bede, member of the House of Representatives from Minnesota, who will speak on "The American Movement"; the Hon. E. B. Vreeland, member of Congress from New York, who speaks on "Federal Supervision of Manufactures"; the Hon. Chas. A. Towne, "The Philosopher's Stone"; Rear Admiral Jas. B. Coghlan, "Great Guns"; the Hon. Wm. Sulzer, "The American Business Man"; Hon. John Fox, Hon. Thos. F. Grady. Among the guests of the banquet will be: Maj. Gen. Fred D. Grant, U. S. A.; Col. H. O. S. Heistand, U. S. A.; Col. Chas. H. Luscomb, Hon. Wm. R. Willcox, postmaster of New York; the Hon. Edw. M. Morgan, assistant postmaster at New York; Henry Clews, Hon. Wm. S. Bennet, Hon. Wm. P. Mitchell, Chas. C. Hughes, Hon. John W. Keller, Hugh Gordon Miller, Archie Rutherford and Senator Carter.

Interesting Points Involved in Customs Suit Over Duty on Rough Reconstructed Rubies.

Preparations are being made by the government's counsel in the customs department for the trial of the case involving the duties on reconstructed rubies imported in the rough by Albert Lorsch & Co., New York. The importers claim that such reconstructed rubies should be admitted free as precious stones in their natural condition. The government will contend that they are manufactures dutiable at 45 per cent.

It was learned this week that the Treasury Department is considering in this connection the advisability of reopening the question as to reconstructed rubies that are cut. It will be remembered that the Board of United States General Appraisers a few months ago held these rubies to be dutiable at 10 per cent., classifying them by similitude as precious stones advanced

in condition under Par. 435. This decision really opened the door for the present claim that these stones when uncut are free, it being contended that since they are now recognized as precious stones (by similitude) when cut they are none the less similar to precious stones before they are cut. The Treasury Department officials have this difficulty in mind and therefore contemplate the new proceeding to test the old question.

The issue as to the rough reconstructed rubies presents, in another phase also, more difficulty than did the old question. The similitude clause which was invoked as to the cut stones will have no effect in the case of the rough stones as it has no application to the free list.

Precious Stones Cut for Industrial Purposes Subject to Same Duty as Gems.

That precious stones when cut for industrial purposes are subject to the same duty as if intended for ornamental purposes, was held in a decision announced last week by Judge Hazel, of the United States Circuit Court, Southern District of New York, who sustained a protest of Albert Lorsch & Co., in relation to an importation of agate bearings for scales. This decision, which upheld the Board of United States General Appraisers, read:

Small pieces of agate, concededly a precious stone, sawed, cut and polished, useful for jewelers' and assayers' scales, are here involved. An assessment of duty by the collector of 50 per cent. ad valorem, under Par. 115 of the present tariff act, for manufactures of agate, not specially provided for, was not sustained by the Board of General Appraisers, the latter being of the opinion that under the ruling in the case of Hahn vs. United States (100 Fed. Rep., 635), Par. 435, which provides for precious stones cut but not set, was more specific, and accordingly directed an assessment of duty at the rate of 10 per cent. ad valorem.

The proofs show that the article in question when imported has been suitably cut, polished and prepared for mounting in the frame of the scales. The scales are of superior quality, and the mounting of the agate bearing in the metal groove is accomplished, according to some of the witnesses, without difficulty, and requires no skill in its adjustment. The lapidary, one Fox, called by the importers, however, swore that the agate bearings are set in the frame similarly to the setting of certain stones in a ring, this being necessary to insure absolute accuracy of the scales.

Notwithstanding this apparent conflict of testimony regarding the setting of the bearings, I am satisfied by the record that the agate bearings were cut, polished and prepared for use and were completed salable articles. That they had regard to industrial utility rather than beauty as manifested in the display of precious stones is not thought important.

The case of United States vs. Benedict & Warner (145 Fed. Rep., 914; T. D. 27032; C. C. A., second circuit) is thought in point. In that case the article consisted of rock crystal, a precious stone, which was advanced in value by painting. I quote:

The fact that these unset precious stones have been advanced in value by being cut and ornamented with various designs in an expensive manner, brings them specifically within the provisions of Par. 435, regardless of the subsequent advance in value by painting. They are therefore not dutiable as manufactures of rock crystal not specially provided for under the act.

The decision of the Board of General Appraisers, holding that Par. 435 for precious stones is more specific than the provision of Par. 115 is approved.

I. G. Perry, who has conducted a retail jewelry store in Great Barrington, Mass., for the past four years, is about to retire.

National Convention Held at Washington, D. C., to Consider the Extension of Our Foreign Commerce.

WASHINGTON, D. C., Jan. 17.—More than 1,000 delegates met last week in response to the call for a national convention to consider the extension of foreign commerce of the United States. E. S. A. De Lima, the temporary chairman, said that the purpose of the meeting was to devise measures for increasing abroad the demand for the products of American farmers, workshops and mines. He said that it is necessary to make preparation for the period of stagnation which almost inevitably comes after over-production. Progress, he said, can only be made by this country becoming a dominant influence in the commerce of the world. This is not altogether a matter of tariff. The speaker then touched on the question of a reciprocal tariff, legislation to promote shipping facilities, the establishment of American banks in foreign countries and similar subjects.

Wm. McCarroll, New York, was chosen chairman. He said that this country is fast becoming recognized as the world power, standing not for aggrandizement or aggression but for an open door and an equal chance for all the nations. Our President, he said, is a man who knows how to act forcefully when necessary, yet is known the world over as a promoter of peace rather than of force.

"So much has been done for us by legislation," said Mr. McCarroll, "that we are not as self-reliant as we might be. Our industries have grown from infants to giants, and it is time that we seek markets for our output. Now that we are not worried with business oppression is the time to grasp the foreign situation. There is an expansion of industry throughout the world in which we must be diligent to take our place."

Louis T. Nixon, New York, spoke of the deplorable condition of the American merchant marine, of improving international waterways, and of getting a parcels post law.

Alvin H. Saunders, of the American Reciprocal Tariff League, said that through all the years that we have passed we have been in the enjoyment of one market, Great Britain alone making us rich. "Her consumption of our food stuffs has caused the rise and prosperity of the west and middle west," he said; "but our farmers want to know why they cannot meet the food shortage in France. The failure of the reciprocity clause of the McKinley bill was inevitable because the maximum and minimum tariff has been devised by many European nations to check the aggression of the United States.

"Germany's present position means chaos for many of our industries unless we adopt wise measures. Canada, with her three-decker tariff, is engaged in negotiations with Germany which, if consummated, will have appalling effects on our trade with the country to the north of us. Australia and South America are sending trade where they are allowed to live and let live. The United States stands alone among great nations in opposition to reciprocity. We hope to see the day when we can prune our tariff tree from time to time as it may become necessary, and not disturb it root and branch."

A number of other speeches, treating of these and kindred subjects, were made by well-known men, including the Hon. Oscar Straus, Secretary of the Department of Commerce and Labor. Elihu Root delivered the speech in favor of the double tariff which has since caused so much discussion throughout the country.

Rewards Paid by Jewelers Security Alliance for Arrests of Thieves Who Robbed Members.

In the last year the Jewelers Security Alliance, New York, paid out rewards of \$100 each for the arrest and conviction of burglars who broke into the stores of members:

No. 1.—To R. H. Robinson and Ernest Cousins, for the arrest and conviction of Howard Hall, who broke into the store of Graf & Niemann, Pittsburg, Pa., and was sentenced to seven years in the western penitentiary at Allegheny, Pa.

No. 2.—To the Police Pension Fund, Commissioner Cantine having arrested and convicted C. Ostrander for breaking the show window in the store of Henry J. Pfantz, Albany, N. Y., and was sentenced to five years in Clinton Prison.

No. 3.—To Chas. Falkner, for the arrest and conviction of John Kane, who smashed the show window of A. N. Peoples, Chester, Pa., and was sentenced to pay a fine of \$10 and confinement for six months in the county jail.

No. 4.—To Sheriff W. P. Adams, for the arrest and conviction of James Kain, who smashed the window of J. Forester, Billings, Mont., and was sentenced to one year in the western penitentiary at Deer Lodge, Mont.

No. 5.—To the Indianapolis Police Pension Fund, for the arrest and conviction of Clarence Keeley and William Howren, who smashed the window of H. Cohen & Son, Indianapolis, Ind., and were sentenced to reform schools.

No. 6.—To John Scully, for the arrest and conviction of Richard C. Padden and Clarence Dunning, who broke into the store of A. White, Vallejo, Cal., and were sentenced to three years in the State prison at San Quentin.

No. 7.—To Chas. Furman, M. J. Shea and Jos. Shindler, for the arrest and conviction of John Wilson, who smashed the window of Simon Robinson, Boston, Mass., and was sentenced to seven years in the State prison at Boston, Mass.

No. 8.—To Officer Hugh Dixon, for the arrest and conviction of McKinley Williams and Clarence Harvey, two negro boys, who smashed the window of the Streicher Watch and Jewelry Co., and were sentenced to reformatories.

No. 9.—To James Nolan and Michael Gallagher, for the arrest and conviction of Walter McCambridge, who smashed the window of Dill R. Young, Youngstown, O., who was sentenced to pay \$25 and costs.

No. 10.—To J. W. Coatesworth, for the arrest and conviction of James Tresillian, who broke into the store of J. W. Coatesworth & Co., Galena, Ill., and was sentenced to a reform school at Pontiac.

No. 11.—To R. H. Matthies, for the arrest and conviction of John Hanna and Peter Gallagher, who smashed the window of G. A. Hauserman, Paterson, N. J., and were sentenced to pay a fine of \$25 each.

No. 12.—To Sheriff W. S. Russell, for the arrest and conviction of Sam Smith, who broke into the store of L. F. Ely & Son, Sherman, Tex., and was sentenced to two years in the State penitentiary, besides losing his leg by being shot when resisting arrest.

No. 13.—To J. A. Deskin and Michael J. Dugan, for the arrest and conviction of Mike Hagan, professional crook, who smashed the window of Wm. J. Eroe, New Castle, Pa., and was sentenced to pay a fine of \$5 and cost of prosecution, together with the value of the goods stolen and three years' imprisonment in the western penitentiary of Pennsylvania.

No. 14.—To John J. Rafferty, detective, for the arrest and conviction of Henry White, who broke into the store of Frank Winkler, Kansas City, Mo., and was sentenced to 10 years in the penitentiary at Lansing, Kans.

No. 15.—To three policemen of Charlotte, N. C., who arrested Sam Cotton for breaking into the store of W. E. Lineback, of that city, and

Charles Roberts, who identified him, so that he was convicted and sentenced to work for three years on the roads.

No. 16.—To John H. Boyle, for the arrest and conviction of Chas. G. Bruffee, who broke into the store of E. A. Whipple & Sons, Springfield, Mass., and was sentenced to imprisonment in the Massachusetts Reformatory.

No. 17.—To Ed. C. Dollard and Officer Michael Wallace for the arrest and conviction of Frank Maneri and Frank Lovello, who smashed the window of M. Weintraub, Hoboken, N. J., and was sentenced to three years each in State prison.

No. 18.—To Officer Thos. Cuddihoe, for the arrest and conviction of David Henderson, alias Harry Smith, negro, who broke into the store of the W. F. Mueller Jewelry Co., St. Louis, Mo., May 26, being captured after a long chase and shot twice during the pursuit. He entered a plea of guilty and was sentenced to five years in the penitentiary.

No. 19.—To Officer W. Woodhill, for the arrest and conviction of Thos. Roulet, who broke into the store of Warren Scarborough, Long Island City, N. Y., stealing jewelry amounting in value to about \$500, part of which was recovered. This burglar had a record and would have received a five-year sentence, but while in jail awaiting his sentence he prevented the escape of a large number of prisoners at considerable risk and therefore was let off with 30 days in the Queens County Jail.

No. 20.—To D. C. Clark, for the arrest and conviction of two burglars who broke into the store of R. J. F. Roehm & Co., Detroit, Mich., and stole about \$700 worth of stock, a part of which was recovered. The detectives had no clue and would never have discovered the thieves but for information given by Clark, who was boarding in a house with the culprits, and having seen an advertisement of the reward, notified the police of suspicious actions which he had observed. One was sentenced to one year and the other to two years in the State prison at Jackson.

No. 21.—To Officer A. H. Gilbert, for the arrest and conviction of Sylvester Duncanson, who smashed the window of Geo. E. Childs' store, Flint, Mich., failing to get any goods on account of the vigilance of the officer, he was sentenced to 90 days in the workhouse, it being impossible to secure a longer sentence because nothing was taken.

No. 22.—To George Parker, for the arrest and conviction of Chas. T. Brooks, negro, who broke the show window of C. D. Quisenberry, Orange, Va., and was sentenced to the penitentiary.

No. 23.—To the Police Pension Fund at Albany, N. Y., for the arrest and conviction of Cyrus Murphy and Frank Alexander, who smashed the window of F. W. Hoffman, Albany, N. Y., and stole rings valued at \$160, all of which were recovered. Murphy was sentenced to not more than four years or less than three in Dannemora Prison, and sentence was suspended in Alexander's case.

No. 24.—To Officer Jas. H. Lyon, for the arrest and conviction of Frank Edwards, who broke into the store of the R. G. Winter Jewelry Co., Minneapolis, Minn. He was sentenced to four years and six months in State prison at Stillwater.

No. 25.—To Detective Jas. Gaffney, for the arrest and conviction of two boys who smashed the show window of A. E. Motch, Covington, Ky., stealing two watches, which were afterwards recovered. The boys being under age, one was sentenced to the State reform school and the other was placed on probation under suspended sentence.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Jan. 19, 1907.

The U. S. Assay Office reports:
Gold bars exchanged for gold coin....\$563,527.10
Gold bars paid depositors..... 76,348.00

Total\$639,875.10

Of this the gold bars exchanged for gold coin are reported as follows:

Jan. 14.....\$55,650.56
" 15..... 136,116.51
" 16..... 151,201.59
" 17..... 88,289.77
" 18..... 90,993.94

New Trial Likely in Test Case Brought by the United States vs. Tiffany & Co.

In the case of the United States against Tiffany & Co., involving the duties on a number of pearls imported from the Paris house and delivered in New York as a necklace to Morris Guggenheim, Judge Lacombe, of the United States Circuit Court of Appeals, last Friday settled the terms of the judgment recently given against the importers. This decision was in substance that as the importers had not paid the additional duties demanded by the Government, they were not entitled to a trial on the merits of the issue as to whether the pearls were dutiable at 10 per cent. as loose pearls or at 60 per cent. as jewelry.

Assistant United States Attorney Nichols, who handled the case for the Government, asked for a judgment for \$8,112, the amount of additional duties demanded by the Collector. Judge Lacombe said that the decision of the Circuit Court of Appeals did not contemplate a money judgment, but was a reversal of the court below. This sends the case back to the Circuit Court for a new trial.

After Judge Lacombe ruled that a new trial was required, Tiffany & Co. offered the amount of the additional duties to the Collector of the Port, who refused to receive them on the ground that the time for such payment had expired.

The Government attorney will claim, when the case is called in the Circuit Court, that as the duties were not paid in due time there can be no argument on the necklace side of the controversy, and will ask for a money judgment.

Assets and Liabilities of Frank B. Thayer as Shown by His Schedules.

MEMPHIS, Tenn., Jan. 16.—According to the schedules filed with the bankruptcy petition of Frank B. Thayer in the United States Circuit Court here, his liabilities exceed \$25,000 and his assets include stock worth \$15,000, real estate worth \$5,000, and debts due him amounting to \$5,477. The largest local creditor is the Bank of Commerce and Trust Co., which holds two notes aggregating \$2,500, while among the largest merchandise creditors are: The Eisenstadt Mfg. Co., \$1,472; R., L. & M. Friedlander, \$1,112; Sidney L. & Morris Bauman Co., \$954; John A. Scranton, \$500; and the St. Louis Clock & Silver Co., \$160.

Prior to the filing of the voluntary petition by Mr. Thayer, as mentioned in the last issue of THE CIRCULAR-WEEKLY, an involuntary petition had been filed against him by the Eisenstadt Mfg. Co., Sidney L. & Morris Bauman Co. and the St. Louis Clock & Silver Co., who claimed that Mr. Thayer had committed an act of bankruptcy by paying \$139 to the American Tobacco Co.

A. C. Mehl, Woodsfield, O., Makes an Assignment.

PITTSBURG, Pa., Jan. 22.—It was learned here to-day that A. C. Mehl, Woodsfield, O., had made an assignment to Fritz Buckio, with liabilities of \$10,888 and assets of about \$5,000. Pittsburg creditors are taking action and bankruptcy proceedings may result.

George Poole, Taunton Silverware Manufacturer, Shot and Killed by His Son.

TAUNTON, Mass., Jan. 18.—George Poole, a prominent silverware manufacturer of this town, was shot and fatally injured at his home, 230 Bay St., last night, by his son, Howard M. Poole, who claimed that the act was committed in order to protect his mother's life. The injured man was taken to the Morton Hospital, where an examination disclosed that the bullet had gone through his ear and penetrated the base of his brain. He did not regain consciousness, and died this morning. The son, who telephoned the police the moment the act was committed, was charged with assault with intent to kill, and was released in \$10,000 bail.

The elder Mr. Poole was the head of the Poole Silver Co., and he had been in poor health over a year; about 15 months ago, while attempting to board a car, he was knocked down by a horse, and received such a severe fracture at the base of the skull that his life was despaired of for a long time. He finally recovered his health, but, according to his family, his mind became somewhat affected, and at times he showed that he was suffering from mental derangement. According to the story told by Howard Poole, who is a youth of 17, the father's actions had become very strange lately, and some weeks ago Mrs. Poole conferred with a lawyer on the question of having her husband placed in an asylum.

Mr. Poole's partner, Edward Roche, died lately, and the business troubles seemed to make his mental state worse. When Mr. Poole came home the night of the tragedy he spoke to Mrs. Poole about her visit to the attorney in reference to having him committed, and after using very abusive language, worked himself up into a state of frenzy and threatened to kill her. This, said the son, was not the first time he had threatened his mother. When the threat was made the second time Howard Poole went to the dresser and took a 32-calibre revolver, which his father owned, fearing that the latter intended to use it.

Later on, said the son, Mr. Poole continued his angry words and, suddenly rushing at his wife, grabbed her by the throat. Thinking that his father was about to kill his mother, the son grabbed the weapon, and, pushing it against Mr. Poole, fired one shot. He immediately telephoned the police, and the injured man was taken to the hospital, where he died.

The deceased was 52 years of age and had long been prominent in the affairs of Taunton, and was the controlling force of the silverware plant which bears his name. He was a man of large physique, genial and popular and had a host of friends. Last year he was elected license commissioner. He was also prominent in many fraternal organizations.

The Reineman, Blose Co., McKeesport, Pa., has arranged to make extensive improvements in its store, and is about to conduct a "remodeling sale" preparatory thereto.

Death of Henry Tilden.

PROVIDENCE, R. I., Jan. 21.—In the death of Henry Tilden, of the Tilden-Thurber Co., this city loses another of its well-known jewelers and one of its most respected citizens. While a fatal termination of his illness was not unexpected, still, the news of his death was received with a distinct shock among those circles where he was most intimately known.

Mr. Tilden was taken ill last November, and had been confined to his home for some time. A form of kidney trouble had developed, and this, it was seen, would prove grave. The end came shortly before midnight Friday night.

Mr. Tilden was a native of Gloucester, Mass., being born in that city Nov. 10, 1842. He received his primary education in the public schools of Newburyport, to which the family had removed when he was but a boy. He came to this city when he was 12 years old, and secured a position in a book store. In 1854 he secured a place in George H. Whitney's book store, then one of the most famous of its kind in the city.

For the next 14 years he served here as clerk, but in 1868 he made a move which turned out to be a most crucial one in his career. He left the book business and took a place with the silverware concern of Gorham Co. & Brown, then located on Westminster St., just above Turk's Head. The store was a noted "institution" of the city, and was celebrated for the excellence of its stock and its exclusiveness. The store was under the management of Henry Brown, and after he had bought out the interest of the Gorham Co., he had taken into business with him M. Rogers. The firm kept on prospering, and then Mr. Tilden was admitted and took charge of the diamonds. Some time later Mr. Rogers withdrew from the firm, and the latter was reorganized as the Tilden, Thurber Co., Henry T. Brown, Gorham Thurber and Mr. Tilden being the members of the firm.

In 1872 Mr. Tilden began making trips abroad in the interest of the firm, and had continued these trips up to about five years ago, but at that time the condition of his health made it necessary to abandon them. About five years ago Mr. Brown withdrew from the firm, but no change was made in the firm style.

Ten years ago the handsome building at the corner of Westminster and Mathewson Sts. was erected, and this in its entirety, as well as a portion of an adjoining structure, the concern now occupies.

Mr. Tilden is survived by a widow, one son, Henry C., of Chicago, and one daughter, Mrs. H. Anthony Dyer. Members of the family were present at the bedside when death came.

The funeral was held Monday at noon, and was largely attended by representative business and professional men.

A stranger last Wednesday entered the store of W. E. Fellows, Flint, Mich., and asked to see some watches. While the jeweler turned his back to get something the ostensible customer took a watch from the tray and made a hasty exit before he could be apprehended.

Liabilities of John H. Patten Exceed \$88,000—Value of the Assets Not Known.

The schedules of John H. Patten, doing business as Gleason & Patton, at 111 W. 125th St., New York, against whom a petition in involuntary bankruptcy was filed Jan. 5 in the United States District Court, as noted in THE CIRCULAR—WEEKLY at that time, filed his schedules last week with the clerk of that court. The schedules show liabilities of \$88,056, while the value of the assets is unknown to the bankrupt.

Among the creditors for more than \$100 are: Hamilton Bank, promissory notes indorsed by Carlotta Patten, \$525; C. G. Alford & Co., \$4,071; Allsopp Bros., \$919; J. B. Bowden & Co., \$1,911; J. W. Block, \$158; R. A. Breidenbach, \$764; Bioren Bros., \$195; Cross & Beguelin, \$1,180; B. H. Davis & Co., \$2,291; Day, Clark & Co., \$169; Dennison Mfg. Co., \$105; R. L. & M. Friedlander, \$463; Jos. Frankel's Sons, \$630; Ingomar Goldsmith & Co., \$1,348; Gorham Mfg. Co., \$435; C. P. Goldsmith & Co., \$7,925; Sig. Hirschberg, \$808; Harris & Schuster, \$476; E. Howard Clock Co., \$235; Jones & Woodland, \$725; Jennings, Lanter & Co., \$229; H. A. Kirby, \$283; Wm. Kinscherf Co., \$222; Alois Kohn & Co., \$232; Larter & Sons, \$285; Mount & Woodhull, \$166; R. Noel & Co., \$2,514; Ludwig Nissen & Co., \$3,412; D. Ollendorff Co., \$151; C. L. Power & Co., \$3,034; Perley Bros., \$300; Rosenzweig Bros., \$2,470; E. E. Robert, \$206; Snow & Westcott, \$203; Hodenpyl & Walker, \$3,000; B. L. Strasburger & Co., \$2,579; Louis Strasburger's Son & Co., \$14,571; Lco M. Sachs, \$389; B. Sugarman, \$2,216; Tarrant & Gismond, \$2,458; Unger Bros., \$222; A. Wittnauer Co., \$593; Chas. F. Wood & Co., \$289; N. H. White & Co., \$3,816; Julius Wodiska, \$4,492; Wordley, Allsopp & Bloemcke Co., \$249; Hayden W. Wheeler & Co., \$450; Zirnth-Kaiser Co., \$160; Carlotta Patten, \$14,000.

Weil & Pnrvin, representing the petitioning creditors, and the receiver, Charles P. Howland, have been examining Mr. Patten to ascertain what has become of his assets, as they are estimated at only \$15,000. They said yesterday that he testified he had been pawning his stock of diamonds and jewelry for the last year; he could not tell how much he has pawned or the names of the pawnbrokers, but he promised to turn over the pawn tickets which he has to the receiver.

All petitioner's stock and fixtures were assigned to Marcus J. Waldheimer, Jan. 3, 1907, and later turned over to the receiver appointed by the court.

Simon W. Jacobs, Former Worcester, Mass., Jeweler, Arrested on Charges Growing Out of His Failure.

Simon W. Jacobs, formerly a retail jeweler at Worcester, Mass., who failed in August, 1904, owing about \$20,000, was arrested Thursday of last week by a United States deputy marshal at his home, 508 E. 5th St., Kensington, Borough of Brooklyn, New York, on a charge of concealing assets from creditors.

The warrant was based on indictments found by the Federal Grand Jury in Boston,

Mass., more than a year ago. Officers have been trying to find Jacobs since that time. After his arrest he was taken before United States Commissioner Benedict in Brooklyn and was held in \$2,500 bail to appear for trial in Boston.

The Jewelers Board of Trade, New York, from the beginning took charge of the examination of Jacobs in bankruptcy proceedings and of the case against him, spending considerable money from the assessment fund to this end. Jacobs began business at Worcester in April of the year that he went into bankruptcy before most of his bills were due. The board conducted with much vigor the examination before the referee in bankruptcy. The assets disclosed in the schedules were small. In the examination the bankrupt tried to account for the deficiency occurring in his accounts by saying that he had sustained severe losses. One loss was on a bet concerning a wrestling match happening in Detroit, Mich. He also lost \$5,000 which he had loaned to his brother, a theatrical man.

At the close of the examination the board claimed that the evidence showed the probable secretion of jewelry valued at thousands of dollars; also that there had been false testimony before the referee. It was also charged that the bankrupt had destroyed or concealed books of accounts. Indictments charging him with concealing property belonging to the estate were then returned by the Grand Jury.

Of late Mr. Jacobs has been associated with a brother in the real estate business in Flatbush.

Superintendent of Repair Department of a Brooklyn Store Accused of Stealing Jewelry.

Charges were made last Saturday that articles left with a repairer at a Fulton St. store in Brooklyn had been stolen by Frank Huetwohl, Jr., 416 Ave. D., Kensington, Borough of Brooklyn, New York, who for seven years had been superintendent in the jewelry repair department in the store. He was arrested and arraigned before Magistrate Tighe, where he waived examination to appear before the Grand Jury.

Huetwohl, who is 36 years old, made a confession, it is said, saying that the money which he obtained by selling the stolen jewelry he had used in obtaining medical treatment for his wife and in caring for their two children. It was said that the total value of the property taken would exceed \$2,000, but this was a guess. Mr. Huetwohl said that if he were given time he would make restitution.

The exposure came after a lady who had left an article of jewelry to be repaired called for it during Mr. Huetwohl's temporary absence. The clerk was unable to find the article or to find an entry in the book. After Huetwohl returned he was questioned, and said that he had left the article at a repair shop in Manhattan. He went out and returned in a half hour with the missing property.

Subsequently other suspicious circumstances were noted, and the superintendent was finally accused of stealing articles from the shop, whereupon, it is said, he broke down and confessed. He said that he had

been taking the jewelry and pledging it in pawnshops. When the time came to return an article he redeemed it by substituting another piece of jewelry. This has been going on for a month or more.

After admitting this, it is said, he took out 11 pawn tickets from his pocket and turned them over to his employers. The tickets called for diamond rings pledged at the pawnshop of Arthur J. Heaney, Solomon Lehmann, Max Selig and the R. Simpson Co. In all about \$635 had been raised on these articles.

Court Restrains Banks from Voting Stock of International Silver Co. Held as Collateral.

In the suit brought by E. R. Thomas and others to restrain several banks from voting on certain common stock of the International Silver Co., held by the banks as collateral, Vice-Chancellor Bergen, of New Jersey, last week handed down a decision in favor of the plaintiffs. It was then announced in the daily papers on the authority of Mr. Thomas that at the March meeting of the silver company he will seek a representation in the board. It was further reported that he and his associates expect to obtain control of the company at that time.

Friends of the administration say that the control of the company is not at stake and that it is preposterous to suppose so. They say that the decision of the New Jersey court in nowise changes the voting strength of the administration, which has controlled the company without the votes of the stock held by the banks.

According to the last annual report the total amount of preferred stock that had been issued was \$6,607,500 and of common stock \$9,944,700. Included in the latter, it is understood, were the shares transferred to the banks, now held to be in the same status as treasury stock. Two shares of common stock are entitled to one vote.

It is said by friends of the management that almost all of the preferred stock, which carries control, is held by stockholders who are opposed to Mr. Thomas. The exact amount of stock which he and his friends control is not known, it is said.

In his opinion, granting the injunction against the banks, the vice-chancellor says:

I cannot find any cause for alarm which Mr. Rockwell, the president of the First National Bank, of Meriden, Conn., said induced him to start a concerted movement by the banks to obtain from the company a pledge of its own stock as collateral for its debts, existent and anticipated. It convinces me that the movement started by Mr. Rockwell, which resulted in pledging the stock in question, has but one real purpose and that was to have the stock transferred with a voting power to friendly parties who would exercise it in the interests of the directors of the International Silver Co. and thereby continue them in its management, and is but a thinly disguised scheme to have the stock owned by the corporation voted upon indirectly.

The stock was taken, not because it was a collateral of any value, or as security, but in order to restore a suspended voting power to be exercised on behalf of the officers of the company making the pledge. To permit them to vote it would effect the very evil which the law intended to prohibit when it forbade the voting by the corporation of its own stock, either directly or indirectly.

The injunction is granted against the National City Bank and the American Exchange National Bank of New York, the Hackensack Trust Co. of New Jersey and the Home National Bank of Meriden, Conn.

Jewelers and Opticians Convene.

Nebraska Retail Jewelers' Association and State Optical Association Meet at Lincoln.

LINCOLN, Nebr., Jan. 18.—The first annual meeting of the Nebraska Retail Jewelers' Association was held in this city Jan. 15. Late trains and busy times in the up-State stores somewhat cut down the attendance of the morning session of the association, but as it was more than 50 enterprising jewelers assembled at Walsh Hall, when President E. J. Niewohner called the meeting to order. Ex-Senator "Dick" O'Neill, who has for several years been a retail dealer in this city, told the jewelers how glad Lincoln was to see them and quoted some well chosen gems of literature to facilitate him in expressing the happiness of the occasion. Mr. O'Neill's address was responded to by Max Egge, Grand Island, who said he felt gratified that "Lincoln has such a small police force and so many 'boys of the trade' whose sole aim in life this week is to make the visitors happy."

President Niewohner's annual address covered briefly the object of the association, recounting some of the problems that the jeweler is called upon to solve. He spoke at some length of the unfair advantage which the mail order houses have over the regular retailer, and urged the members to cease trying to "cut each other's throats and to unite against their common foe." "I am a firm believer in advertising," said Mr. Niewohner, "but let your advertisements in your local papers tell rather of the quality of your goods, the variety of styles and the elegance of selection than the unheard-of cheapness of the articles sold. Educate the public to appreciate true merit in jewelry, instead of trying to meet the prices of the catalogue house; for the very effort to meet the low prices will give your patrons the idea that the catalogue house is cheaper."

Catalogue houses are proving to the jeweler of the smaller towns of Nebraska most insidious competitors. At the morning session of the State association, this fact was brought out by almost every speaker and remedies were suggested for solving the problem. The so-called catalogue houses purchase as jobbers, it is alleged, and sell as retailers, thus getting their goods at enormous trade discounts, enabling them to sell at "lower figures than the retail dealer," who, however, is obliged to meet these prices in order to hold his trade. This, it is declared, is especially true of watches. Mr. Niewohner resides at Columbus, Nebr., and favors some other time of the year for the holding of the convention, as he says the jewelers of the State are too busy to leave their stores, and it is most inconvenient to get away from business.

Secretary D. L. Davies, Nelson, gave the financial statement for the first year of the organization, showing that 72 members had paid the regular dues of \$1. One of the interesting addresses of the morning was that of J. A. Ruehling, Wymore, who discussed the benefits of an organization among jewelers. He recited cases of the large concerns outside of the trade who had accomplished their results by organiza-

tion. "God forbid that I should say the jewelers should use the methods of the coal men and the lumber dealers," said the speaker, "for we all writhe under their oppression. But, in our agony, we cannot help admiring the skill which has brought them together for their mutual advantage." Mr. Ruehling compared the organization with the efforts of the 13 Colonies to overthrow the yoke of English oppression. "But instead of one common foe, we have several," he said. Then he mentioned some of them: the catalogue house, the ideas of the public, the unscrupulous miscellaneous traveling representatives of irresponsible jobbers. He even mentioned unfair local competition as a formidable foe. "By organization alone these things can be avoided," he continued, "by understanding them, for the general trade conditions can be learned only by comparing notes."

A practical talk on watchmaking was given by Dr. Tarbox, a veteran jeweler of Omaha, who is supposed to know more about mainsprings and miscellaneous repairing than many other men in Nebraska. He told how to select the right kind of a spring for the watch, measuring the barrel and adjusting the strength of spring to the movement. Many questions were asked on the subject, which he answered in detail.

At the afternoon session, beginning at 2 o'clock, a representative of the Hamilton Watch Co. delivered an address, entitled "Protection for the Dealer." H. P. Sutton, McCook, narrated an entertaining history of diamonds and diamond setting.

Other features of the afternoon programme were: "Successful Storekeeping from the Standpoint of a City Retailer," F. L. Combs, Omaha; "Advertising That Brings Results," E. J. Niewohner, Columbus; "Successful Storekeeping from the Standpoint of a Retailer in Smaller Cities and Villages," H. S. Knapp, Bertrand; "Mail Order Competition and How to Meet It," Fritz Hoefler, Aurora, followed by general discussion.

At the evening session the officers for the ensuing year were elected as follows: J. A. Ruehling, Wymore, Nebr., president; Fritz Hoefler, Aurora, Nebr., vice-president; Max Egge, Grand Island, Nebr., secretary and treasurer. D. L. Davies, Nelson, Nebr., was chosen as a delegate to attend the national convention to be held this summer.

H. E. Duncan, of the Waltham Watch Co., closed the convention with an illustrated lecture.

Meeting of the Nebraska State Optical Association.

With an attendance of nearly 200 members the Nebraska State Optical Association held its first annual convention at Walsh Hall, Jan. 16. Considerable time was consumed during the morning by registration of members and the programme was not carried out as arranged, it being put over until the afternoon. "A wrong impression as to the purpose of our meeting here this week seems to prevail," said one member of the association. "We are not here for the purpose of forming a trust—in fact, nothing regarding prices will be taken up. Physicians are not fighting our organization, but they are in favor of the bill which we are drawing up to be presented to the Leg-

islature now in session. We have more than 10,000 signatures by persons in the State and a great many more will sign it if requested."

Mayor Brown, Lincoln, delivered the welcome address and Rev. H. H. Harmon the invocation. The president offered a prize to the two lady opticians present who would accurately fit a patient's eyes in the shortest length of time, Mrs. Woods being the lucky winner. The Myer Jewelry Co., Kansas City, also offered a gold medal to the men for the same accomplishment. This was won by Mr. Huett, Lincoln. The judges were composed of Omaha opticians. Dr. Lane, Kansas City, Mo., gave a practical demonstration of dissecting beef eyes.

Fifty of the leading opticians subscribed \$25 each as an emergency fund for the purpose of defraying the expenses of the legislative committee. Papers were read by the following: C. McLeese, president of the association; Rev. H. H. Harmon, Dr. S. W. Lane, Kansas City, Mo.; A. O. Leiber, Utica, Nebr., "Advantage of Spectacles Over Nose Glasses"; F. A. Hannis, York, Nebr., "Optical Truths"; F. C. Calhoun, Pawnee City, Nebr., "Confidence to and of Your Patients"; Thomas Gowenlock, Clay Center, Kans., "Optical Legislation"; W. G. McLaughlin, Beatrice, Nebr., "Muscular Defects, Theories and Treatment"; H. P. Holmes, Des Moines, Ia., "Little Things in Every Day Optical Life"; C. E. Masters, Crawford, Nebr., "Duties to Patients"; George Hoffman, Leigh, Nebr., "The Nervous Patient and How to Handle Him"; William E. Huston, Kansas City, Mo., "Titles—Organizations—Education"; J. C. Mackey, Carleton, Nebr., "Relation of Optometry to the Medical Profession"; A. B. Tarbox, Omaha, "Corrections and Errors of Refraction and Accommodation by Means of Lenses"; Dr. A. M. Phelps, reading of the Optical Bill; George E. Perkins, Ford, Nebr., "What Course to Take Against an Unscrupulous Advertiser"; John C. Eberhardt, Dayton, O. (author of "Dynamics of the Ocular Muscles," which was published in previous issues of THE CIRCULAR—WEEKLY), "Congenital Amblyopia and Its Treatment"; M. L. Jones, Fairchild, Nebr., "Fitting and Adjusting of Frames"; C. A. Hewitt, Neligh, Nebr., "Fitting and Adjusting of Frames"; G. H. Burton, Norfolk, Nebr., "Duties to Patients"; Miss J. H. Pratt, Fremont, Nebr., "Glasses as Medicine"; R. C. Simmons, Norfolk, Nebr., "Relation of Optometry to the Medical Profession."

The officers for the ensuing year were elected by acclamation. They are: President, C. C. McLeese, Davenport; first vice-president, Max J. Egge, Grand Island; second vice-president, Fritz Hoefler, Aurora; treasurer, B. B. Combs, Omaha; secretary, J. H. Hukill, Lincoln; executive committee, F. A. Hallett, chairman, Lincoln; H. P. Sutton, McCook; Geo. A. Parkins, Ord; N. A. Heath, Hebron; examining board, Jane Hill Pratt, chairman, Fremont; R. P. Rasmussen, Edgar; E. R. Hayes, Norfolk.

The store of the Lawrence Jewelry Co., Cleburne, Tex., was destroyed by a fire, Jan. 15. The loss, according to a dispatch, is \$25,000.

GORHAM SILVER

FOREWARNED IS FOREARMED!

¶ Taking pattern from the sagacious general the alert jeweler will plan out his campaign as far in advance as possible.

¶ He will recognize therefore that though the Christmas and New Year's business rush is over there are still immediately ahead of him other occasions and anniversaries which make demands upon his forethought and precaution.

¶ At this particular time, for instance, the approach of the Early Wedding Season suggests his providing himself with a significant display of Gorham Silver, suitable above all other for Wedding Gifts of every variety.

38TH ANNIVERSARY NUMBER

In accordance with its regular custom THE JEWELERS' CIRCULAR-WEEKLY will celebrate its anniversary with the issue of February 6.

These yearly specials have become a well-recognized feature, and are anticipated and read with thorough appreciation. The many special articles, the numerous half-tone illustrations and the other unusual features attract the closest attention of the trade, thus offering extraordinary advantages to advertisers. There is no other possible means by which you can circulate your announcement so effectively and at so small cost.

Advertising space in this number should be reserved as soon as possible. All copy for new, and changes for old advertisements must be received by January 28 to insure publication.

Proposed Stamping Law for All States.

ON another page of this issue will be found the full text of the act which THE CIRCULAR-WEEKLY has had drawn for introduction into the various State legislatures to supplement the National Gold and Silver Stamping Law, introduced by Representative Vreeland, last year, passed by Congress and signed by the President June 13. The act which THE CIRCULAR-WEEKLY proposes is drawn in absolute harmony with the national law, but covers the manufacture and sale within a State of articles of the precious metals stamped as to their fineness in the same manner and as thoroughly as does the national law cover their shipment in interstate commerce.

Copies of this bill will be sent to the secretaries of the various State associations of retail jewelers as well as to the American National Retail Jewelers' Association, and an endeavor will be made at once to have this bill introduced into the legislatures of every State which meets this year. Action to obtain State legislation in Colorado and in Massachusetts has already been made—by Representative L. W. Keil, who is to introduce the bill in Colorado, and by Representative Robert Luce, who is to introduce the bill in Massachusetts. Advance copies of THE CIRCULAR-WEEKLY's bill having been sent to both, it is hoped that the matter will be taken up at an early date.

As noted last week, the proposed act so carefully covers the marking of gold, silver and plated ware that it may with safety be introduced into the legislatures of those States which at present have laws covering the marking or stamping in one or more of these lines. As it is drawn strictly along the lines of the national law to which no opposition was manifest, but general approval was given by the manufacturing, wholesale and retail trade in all sections of the country, as well as by the public at large, there is little chance that any legitimate arguments may be made against the measure when it comes up for enactment. However, the jewelers in all sections of the

country who are interested in the protection of the public as well as themselves in matters of this kind, should not hesitate to support the fight for these measures in every possible way by interesting their fellow business men and customers in the subject generally, and by writing themselves and getting others to write to their representatives in the Legislature, urging the passage of the act. Copies of the bill will be sent to subscribers on request.

As about 40 of the State legislatures meet this year, and most of the sessions will be over before Spring has passed, it is advisable that the fight for the enactment of these laws begin at once. It took but a few months to obtain the legislation desired from the Federal Government, although the subject was entirely new, nothing of the kind having ever before been considered by Congress; it is, therefore, reasonable to suppose that a sharp, strong and strenuous fight will be equally successful with the State legislatures. THE CIRCULAR-WEEKLY started the movement by having the bill prepared and sent around for introduction, and it is up to you, Mr. Jeweler, whether you be manufacturer, wholesaler, retailer, or even employe, to put your shoulder to the wheel and do your part.

The Season of Banquets and Conventions.

ONCE again the jewelry trade ushered in the year by a season of banquets and conventions which bring together the members of the various societies and organizations in the manufacturing and retail trade in a way that calls their attention to the fact that they are brethren and fellow members of a craft as well as competitors in business. Following the strenuous work before and during the Christmas holidays, these banquets and conventions serve as a recreation and rest, and give to the tired manufacturer, dealer or traveler an idea that his life does not always consist of buying and selling. Some of the gatherings are purely of a social and fraternal character, others go to the other extreme, being strict-

ON MEMORANDUM

After the Holiday Clean-out

Your cases need filling up. We will send you on approval anything you want in Diamonds and Diamond Jewelry to fill up. There's no question that prices will go still higher, so you'll be the gainer if you let us know at once just what you need.

Do Your Mounted Diamonds Look as Bright as They Should?

Try setting them in Arch Crowns, which are being used by most of the larger jewelers throughout the country.

Platinum-tipped Arch Crown Mountings are especially desirable, as the tips blend with the surface of the stone and make the diamond seem larger.

Perfect stone setting is assured, as stones are set in the COMPLETED BEARINGS without cutting or filing.

A Postal Will Bring Samples for Your Inspection

ARCH CROWN MFG. CO., 26 Camp St., Newark, N. J.

ly business conventions, while still others have both business and social features. All, however, tend to give an impetus to the spirit of fraternity among the jewelers that cannot fail to do good for the trade in the long run.

Among the first of the conventions this year was that of the Brotherhood of Traveling Jewelers, a band of "knights of the grip," leagued together to watch over and take care of the wants of their needy brethren, and this was closely followed by the annual meeting of the Jewelers' Safety Fund and the Jewelry Travelers' Association, the latter another organization of altruistic tendencies, formed to supplement the work of the Brotherhood. The Jewelers Security Alliance, the "watch dog of the jewelry trade," held its annual meeting, Jan. 11, while the Manufacturing Jewelers Board of Trade, of Providence, held a most enjoyable banquet and annual meeting at that city on the 12th, both of which were reported in the last issue. During the past week the Chicago Jewelers' Association added another link to the chain of successful annual banquets which it has spread over the past 30 years, and the members of the Jewelers' League attended the 30th annual convention of that old and tried fraternal insurance organization, last night. Reports of the Chicago banquet and the League convention will be found in another column of this issue.

Still to come is the great social event of the year in the jewelry trade of New York—the banquet of the 24-Karat Club, which will take place at Delmonico's Friday night, and among the last events in the month will be the annual meeting of the Jewelers Board of Trade of New York, Jan. 31. The social season, so to speak, will be brought to a close next month with the banquets of the Boston Jewelers' Club and the Philadelphia Jewelers' Club, the latter of which will take place on Washington's Birthday.

Last Week's New York Arrivals.

THE CIRCULAR-WEEKLY each day posts in its office a bulletin of the latest buyers visiting New York, which every member of the trade is cordially invited to copy.

New York Notes.

The Roger Williams Silver Co., Providence, R. I., has discontinued its New York office at 860 Broadway.

Ralph Lewis, formerly with Darlach Bros., is now a traveling representative for J. Bernstein, 46 Maiden Lane.

W. A. Cook, of the Fontneau & Cook Co., Attleboro, Mass., was in this city calling on the trade last Thursday.

T. H. Batcheller, formerly with Frank Kursh, Son & Co., Newark, N. J., now represents the S. Cottle Co., New York.

Lackner & Ohl, Newark, N. J., have opened a New York salesroom at 396 Broadway, where they will show samples.

Samuel Spitzel, of I. Spitzel & Co., 14 Maiden Lane, sailed yesterday on the *Kronprinz Wilhelm* for his semi-annual trip to London, Paris and Antwerp.

W. G. Koppe, a jewelry salesman, and Miss Lillian Earl, who had been a member of an operatic company singing at Daly's theatre, were married recently.

D. W. Wisner, who for a number of years has been a western representative of Heintz Bros., Buffalo, N. Y., has purchased an interest in the business of M. Wolfe, 13 Maiden Lane.

Mark Myzel, clerk at 27 W. 64th St., who was formerly a jeweler at 441 8th Ave., and who made an assignment Dec. 31, 1900, filed last week a voluntary petition in bankruptcy showing liabilities of \$2,589 and no assets.

"Minerals of the Vicinity of New York" was the subject of a conference held last Tuesday evening at the Art Building of the Brooklyn Institute. Exhibits of chrysoberyl, agate, garnet and other stones were made.

A number of business men on Fifth Ave. and Broadway, including several jewelers and opticians, have engaged in a movement to prevent the building of the proposed subway in Lexington Ave., unless the contracts provide for tunnel boring instead of ditching.

Fire broke out about 8:30 P. M. last Friday night in the factory of J. R. Wood & Sons, 1323 Atlantic Ave., Brooklyn, and before it was extinguished damage to the amount of \$500 had been caused. The work of the factory was not interrupted, necessary repairs being made at once.

D. Dubin & Co., New York, were incorporated last week to manufacture and deal in watches, diamonds and jewelry, with an authorized capital of \$1,000. The incorporators are: Jacob Pastal, 3 Forsyth St.; Kalman Olshonsky and David Horman, 84 Orchard St., all of New York.

A hansom cab horse ran away on 34th St. Sunday evening, and, dashing to the sidewalk at Fifth Ave., swung his head and shaft through the plate glass front of the store of Chester Billings & Son. The horse's head was cut by the glass. Watchmen guarded the store for the remainder of the night.

The United States Gem Co., Kerhonkson, N. Y., was recently incorporated to deal in diamonds, precious stones, etc., with a capital of \$1,000. The incorporators are: Arthur J. Baldwin, 27 Pine St.; Frank M. Van Wagonen, 467 W. 152d St.; Philip S. Hill, 605 W. 115th St., and Alfred

Schwarz, 410 Lafayette St., all of New York.

Thomas H. Whelan, of Bath Beach, formerly a Custom House inspector, claims to have discovered a process for silver-plating directly on steel without the medium of copper or other metal, or of electricity. He says that he takes a secret preparation, of chalklike consistency, moistens it and applies it to the steel surface.

Edwin Baldwin Johnson, formerly associated for many years with Hall, Dodd & Co., now the David C. Dodd Co., Newark, N. J., died last Saturday of pneumonia at his home, 165 W. 71st St., New York. He was 67 years old. A widow, a son and a daughter survive. He also leaves relatives in Newark and Elizabeth, N. J.

Thieves broke a plate glass window of A. Forstadt's store, 923 Manhattan Ave., Brooklyn, early last Tuesday morning and stole jewelry to the value of \$100 or so. The police in the station about 200 feet away did not hear the noise of the breaking glass nor did the people who live in the building. The store is lighted at night, but nobody saw the thieves.

Several jewelry firms have recently leased offices in the new Lorsch building, 35 Maiden Lane. Among the concerns which have taken leases, most of whom have taken possession of the new offices, are: George O. Street & Sons, Lyons Gem Co., Trier Bros., Kionka & Wagner, J. Solinger & Co., Mitchell & Tillotson, Marden & Kettlety, John T. Morrow, R. S. Gatter and David Ullman & Co.

The store at 453 Sixth Ave. is being refitted by Benjamin Raff, who will add it to his present store at 455, and the enlarged quarters will be occupied by him as soon as the alterations are completed, in two or three weeks. The interior is to be finished in quartered oak and will be fitted with mirror wall cases. The ceiling is being finished in lattice work. The show windows will be arranged with center shelves, which will permit an elaborate display.

In the last issue of *The Diamond Worker*, the monthly publication of the Diamond Workers' Protective Union of America, is an article on "The Diamond Workers in America," written by A. Meyer, the president of the union, who traces the origin of the industry in the United States back to 1866, and from that year gives a detailed and comprehensive description of its growth, especially with reference to the labor and labor union developments.

Next Sunday the officers chosen recently by the Watchmakers and Jewelers' Benevolent Association, No. 1, to serve during 1907, will be publicly installed. The exercises will take place in the Cafe Logeling, 235 E. 57th St., and will include a banquet and a musical-entertainment. Following is a list of the new officers: President, M. Kleinman; first vice-president, H. Berkowitz; second vice-president, L. Klein; treasurer, J. Shapiro; recording secretary, P. Salias; financial secretary, M. Slavik; sergeant at arms, A. Spandorfer; first trustee, S. Nisselson; second trustee, A. Schwarzbarg; third trustee, S. Feinberg.

Bernhard Eypel, 28 Jackson Ave., Long Island City, whose store was entered by burglars about two weeks ago, called last Wednesday to police headquarters and

identified a lady's gold watch with the initials "E. S." as a timepiece which had been left with him for repairs, and had been stolen with other loot. James Coffee, who had been arrested at 316 E. 118th St., on the charge of robbing a banker at his home in E. 63d St., threw the watch into the street while he was being taken to the police station. The police will try to prove that he took part in the burglary of the jewelry store as well as in the robbery of the banker.

The firm of Bergstein & Son, manufacturers of gold and pearl jewelry, 20 John St., have engaged as outside salesman and manager George A. Jochum, who for some years has represented local firms. Mr. Jochum will visit the trade outside of New York, while the city trade will be looked after by F. W. Bergstein. A representative of this house, when asked about the report that they contemplated making some changes looking toward liquidation, stated that there was not a word of truth in it, but, on the contrary, the business will be developed to even a greater extent than formerly, and probably larger quarters obtained, to meet the demands made by this expansion.

Two important changes will be made Feb. 1, when the stock of Hamann & Koch, 9 Maiden Lane, will be moved to 1 Maiden Lane, where it will be consolidated by William Barthman with his business at the corner of Broadway, and the store at 9 Maiden Lane will thereafter be occupied by the International Silver Co. in addition to the store used by the concern next door at No. 11. Mr. Barthman bought the business of Hamann & Koch last year, and has since conducted the two stores, within a few feet of each other. Now they will be combined. The entrance at 174 Broadway will bear Mr. Barthman's name, while on the Maiden Lane side the name of Hamann & Koch will appear. The jewelry stock now at 9 Maiden Lane will be moved to the new location before the end of the present month. The International Silver Co., as a result of this change, will practically double its store space on Maiden Lane, getting possession of all the ground floor of the Jewelers' building, while also occupying an entire upper floor.

Coral jewelry made by V. Sarno, London, England, and M. De Dilectis & Co., Naples, Italy, was advanced in value last week by the Board of United States General Appraisers, New York, to an extent approaching 50 per cent. as an average on the various articles. The jewelry comprised coral brooches, coral pins in gold mounting, coral set in necklaces and other articles. Appraiser Fowler decided that there had been extensive undervaluation, and he increased the invoice figures. The local representatives of the foreign exporters appealed to a single General Appraiser and then to a sub-board, the decision of the appraiser being confirmed in each case. On Mr. Sarno's imports the additional duties and the penalties as the result of the increased value amount to \$6,000. Certain classes of precious coral, both Japanese and Italian, are said by the customs officers to have been advanced materially in value within the last year because of the increased

JAMES L. HAND

America's Leading Jewelry Auctioneer

14 Maiden Lane, New York

Telephone, 1624 Cortlandt

Sales conducted for the established jeweler in any part of the English speaking world

Recommended by the press and trade.

My long experience enables me to appreciate conditions and to conduct the kind of sale that the jeweler wants.

I can conduct a profitable auction sale in such a manner that it will be a big advertisement for the store. I do my work without exaggeration and without creating dissatisfaction. I can show letters written a year after my sale telling of GREAT AFTER EFFECTS.

It is not my plan to sell only your cheap stock or to bring a lot of cheap goods. I can convert into cash all of your expensive stock as well as your out-of-date jewelry, etc., selling it all at a handsome profit, and permanently increasing your trade.

Give me an opportunity and I will convince you by the testimony of jewelers whom I have served that a "HAND SALE" is profitable.

Write me and your letter will be treated confidentially.

Tell me the size of your store and stock and whether there have been any auction sales in your town recently.

MY CHARGES ARE NO MORE THAN THOSE OF THE UNRELIABLE AUCTIONEER WITH NO ABILITY

vogue of coral in jewelry, but this is not given as any explanation of the undervaluation in the cases just decided.

L. I. Cohn, representing the Cohn Mfg. Co. and the Diamond Cut Glass Co., 59 Nassau St., has left for an extended southern trip.

Leopold H. Hirzfelder, with David Mayer, 14 Maiden Lane, and Mrs. Hirzfelder, returned last week from Europe on the *Kaiserin Auguste Victoria*.

Samuel Hochhaus, a diamond dealer living at 26 W. 27th St., was granted a discharge in bankruptcy by Judge Holt in the United States District Court Monday.

It was announced recently in the *Herald* that Harry Janowitz, jeweler, of Johnstown, Pa., and Miss Laura Halff, daughter of Mr. and Mrs. Emanuel Halff, of New York, are to be married Feb. 24.

The firm of Schuler & Schicke, 51 Maiden Lane, was recently dissolved. Geo. Schuler, who succeeds to the business, is now established at 45 Maiden Lane. The business will be continued under the firm name of Geo. Schuler & Co.

In the show window of the Gorham Co., 23 Maiden Lane, are two exhibits of ore from the Green Mehan mine, Cobalt, Ontario, containing native silver. The ore in No. 1 vein of this mine runs as high as 15,000 ounces of silver to the ton.

Julius Wodiska, 40 John St., is a member of the committee which has charge of the dinner to be given to "Tody" Hamilton in the Waldorf-Astoria Saturday evening, March 2. Mr. Hamilton was for 25 years press agent for Barnum & Bailey's show.

George Henry Leeds, a watchmaker, who had been employed in the trade for many years, died recently at his home, 183 Dresden St., Brooklyn. He was born in that city Oct. 10, 1853. He was a member of a number of fraternities and was held in high regard.

J. A. Moller, silversmith, has moved from Canal and Centre Sts., New York, to New Rochelle, N. Y., and is located in the scale factory of Christian Becker, 3 Davenport Ave., where he will continue to serve the trade in the silver hollow ware line, such as trimming, pressing, plating, buffing and polishing work.

L. Durr, a silversmith at 53 Ann St., incurred a loss estimated at \$300, which is covered by insurance, in a fire that started early Wednesday morning of last week in the loft above. Belts, machinery, crucibles and other accessories were damaged by the water, but it is expected that the business will be in running order again in two weeks.

N. Weiss, 865 Sixth Ave., caused the arrest Monday of Louis Ratner, who had been employed as a clerk in the store. Mr. Weiss says that he was ill for several weeks and left Ratner in charge of the business. Stock to the value of \$3,500 was taken in this time, the jeweler estimates. He believes that much of the missing stock was pawned by his clerk. The police say that they found some of the jewelry in Ratner's room when he was arrested.

W. C. Ashwell, senior member of the

firm of Ashwell & Co., bankers and brokers, who was struck by a Columbus Ave. trolley car Monday morning while on his way downtown to business, and so seriously injured that he died a few hours later in the hospital, is said to have been associated at one time with the late Cecil Rhodes in the diamond industry, and to have invested liberally in the Kimberly mines. He is said to have been one of the best judges of diamonds in the country.

An elevator boy, William Burke, employed by Tiffany & Co., saw a well-dressed white-haired man acting in a peculiar manner on the second floor last Wednesday. After the man left the boy asked a salesman if anything were missing, and learned that two desk clocks, valued at \$33, were gone. The boy ran after the man and caught him at Madison Ave. and 37th St. The man went back to the store with the boy and gave his name as Andrew Watson, saying that he was a driver and lived at 320 W. 18th St. It is said that the clocks were found in Watson's pocket. He was placed under arrest. The elevator boy was promoted.

Miss Ada Wodiska, eldest daughter of Julius Wodiska, 40 John St., was married last Sunday evening to Isidor Dilloff in the Ellsmore, 80 W. 126th St. Rabbi Hirsch officiated. After the ceremony a banquet was given, followed by a reception to the newly-married couple. Many costly presents were received from a large circle of friends. Among those in the trade who were present were Herman Oppenheimer, Mr. and Mrs. Julius Bernstein, Samuel Raives and Benjamin Beckman, of L. W. Sweet & Co.; Lippman Tannenbaum, Mr. and Mrs. Lewis Tannenbaum, G. Brenauer, Mr. and Mrs. Joseph Brenauer, C. Bigerow, Mr. and Mrs. I. Schoone, E. N. Mandeville and David Mayer.

Creditors of M. I. Darevski, 134 N. 8th St., Philadelphia, Pa., met Monday in the Astor House, about 25 being present. Samuel W. Salus was present as attorney for the jeweler. The attorney said that his client owed about \$12,000, and assets were about \$4,000. An offer of 20 per cent. in cash was refused. The creditors said that they would accept 20 per cent. in cash and 20 per cent. in notes. Mr. Salus said that he would consult his client and would communicate his decision in a few days. The following committee was appointed by the creditors with power to act: Leo Kohn, of Alois Kohn & Co.; Attorney Sol J. Freudenheim, Louis Lehr and a representative of the Jewelers Board of Trade.

A certificate of the incorporation of Mabie, Todd & Co. was filed recently, the company being authorized to manufacture gold pens, with a capital stock of \$300,000. The directors are G. W. Mabie, C. H. Mabie and William Wohlmacher. The new corporation will take over and continue the business of the present firm of Mabie, Todd & Bard. Mr. Todd and Mr. Bard have not been identified with the firm for several years, and it is thought that it will be of more convenience to do business under the new corporate name. The new company will not become active for some time. No stock has as yet been issued. The officers of the company are: President, George W.

Mabie; treasurer, David A. Sayer; secretary, William Wohlmacher; first vice-president, Charles H. Mabie; second vice-president, Albert K. Watts.

A carboy of ammonia, which was being hauled with a rope and pulley to the jewelry polishing plant of Jacob Jacobs, on the fourth floor of the building at 155 Suffolk St., fell to the basement last Wednesday, exploding and scattering the fumes. The employes in tailor shops in the building rushed in a panic to the street. Ten or 12 were overcome by the fumes, and three were taken to Gouverneur Hospital in an ambulance. Firemen were called and the police reserves were summoned to keep back the crowds that gathered. Mr. Jacobs and Joseph Kabb, the boy who had charge of the tackle, were summoned to the Essex Market Court, and an investigation is being made by the police as to the circumstances of the accident. It is said that the carboy slipped from the rope, which had not been fastened securely.

An increase in salary to \$2,500 was given last week to Frederick Rosenberg, one of the two examiners of jewelry and precious stones at the appraiser's stores. It was said at the office of the deputy appraiser in charge of the division, which includes jewelry and precious stones that the new system adopted several months ago, of requiring two examiners to pass on each importation, is proving highly satisfactory. The examiners are Wm. B. Treadwell and Mr. Rosenberg. Instead of the old plan, according to which all the imports in this line go to a single examiner, who afterward assigns part of the work to an assistant, all the shipments are now divided between the examiners as evenly as practicable and each man's work is checked by the other. The deputy appraiser said that he has heard nothing but words of commendation for the system, importers declaring it to be eminently fair both to the government and to the importers. With the annual importation of precious stones and pearls exceeding \$43,000,000 in valuation, he said, it is recognized that too much responsibility would be placed on a single examiner, no matter how capable he might be, if he were called upon to pass all the shipments.

According to a report published several days ago in one of the daily papers, Tiffany & Co. have caused the arrest of a young man, 20 years of age, employed in the diamond setting department, on the charge of stealing diamonds. It was said that the thefts have been going on for months. The young man was said to be a son of one of the old employes of the company. It accordance with the usual practise, the members of the firm decline either to deny or to affirm the report. If the arrest has been made the police are trying to withhold information, and it is said they expect to arrest within a short time a man who is accused of being an accomplice with the youth now in custody. The man under suspicion, it is said, is an outsider, who has not been in the employ of the firm.

The Strange Jewelry Co., Sherman, Tex., recently filed an amendment to its charter in the State Department, increasing its capital stock from \$10,000 to \$20,000.

Attleboro.

Edward M. Coe has taken a position in the New York office of the Bliss Bros. Co.

Charles E. Bliss, a retired manufacturer, formerly of Bliss Bros., is seriously ill at his home.

Edwin Bullock has resumed a position of responsibility which he held some time ago in the factory of D. S. Spaulding & Co., at Mansfield.

Elections were held at three of the churches last week, and among those who received office were: Harold E. Sweet, of the R. F. Simmons Co.; Edward L. Gowen, Fred L. Torrey, Winthrop F. Barden, of Chapman & Barden; Charles O. Sweet, of C. O. Sweet, Son & Co.; David E. Makepeace, of the D. E. Makepeace Co.; Martin L. Chapman, of Chapman & Barden; C. A. Marsh, of C. A. Marsh & Co.; Everett S. Horton, of the Horton, Angell Co., and others.

The movement of the adjoining town of North Attleboro, which has petitioned the Legislature for the establishment of a jewelry trade school within its borders, strikes a responsive chord in Attleboro. The legislators from this town have already promised to lend their aid to the project while it is going through its formal stages, and there is informal talk that something of the same sort may be done for Attleboro. No one has yet been found to exploit the matter.

The contract was awarded by S. O. Bigney & Co. last week to E. K. Watson, of Warren, R. I., for the erection of the new extension to the firm's present big factory. The new edifice will be 250 feet long, facing County St., and running eastward at right angles to the street, and parallel to the present factory. It will be joined to the present shop at both front and rear. The completed Bigney plant will then consist of three parallel sections, each 250 feet long, united by a long section on the street end, and the same way at the rear, and having between the sections two large courts, for light, ventilation and shipping convenience. Several concerns are already negotiating for space in the new section, part of which, however, will be required for an extension of the Bigney plant. Work will begin early in the Spring. The material will be of brick and the fittings as thoroughly modern as can be procured.

North Attleboro.

J. J. Sommer is confined to his home with grippe.

Oscar Hornig left Monday on a New England trip for Coddling & Heilborn Co.

Charles E. Stanley returned on Friday from a middle western trip in the interests of the estate of O. M. Draper.

A. H. Bliss and G. Herbert French were in New York last week attending the automobile show. Both jewelers left orders for a new machine.

C. Ray Randall has purchased the residence of Woodbury Melcher on High St. Mr. Melcher intends making his home in Newton in the future, although he will continue his jewelry interests in Plainville.

Arthur E. Smith & Co., retail jewelers, have received notice that the Ray building

in Franklin, wherein they are located, is to be torn down and replaced by a more modern structure. They must vacate their quarters by March 1.

George K. Webster, William H. Bell and William H. Riley are being urged to allow their names to be used as candidates for the Board of Selectmen.

Boston.

George E. Knapp and George E. Knapp, Jr., went to Norwich, Conn., last week on an outing trip.

Fred Fuller, salesman for D. C. Percival & Co., went to Warren, Me., last week on a vacation trip.

E. W. Byram, Boston manager for the W. L. Gilbert Clock Co., has been in New York for several days at the company's headquarters on business.

The Ringset Co. has discontinued the manufacture of charcoal moulds, but these will hereafter be carried by the Bruno Crucible Co., 8 Waltham St.

W. A. Lamb, representative of the Cohanet Silver Co., who has had an office heretofore in the Jewelers' building, will vacate his quarters next month, and devote his time to selling goods on the road for the concern.

George A. Carpenter, Boston manager for the Crescent Watch Case Co., is having his offices in the Jewelers' building enlarged by the addition of another room and remodelled to adapt them more fully to the needs of the business.

August Sweetland, son of Charles Sweetland, of the Jewelers' building, and associated with his father as salesman, was married last Wednesday evening in Newton to Miss Gates, of that city. They have gone West on an extended wedding tour.

Frank Cheney, of Lawrence, Mass., was arrested in this city Saturday evening, charged with having fraudulently obtained a diamond ring, valued at \$35, by misrepresentations made to Todd, Smith & Co., jewelers, at Beverly, Mass., on Saturday morning.

C. E. Durgin, of the Thomas Long Co., who has been at Presque Isle, Me., on a recreation trip, was a participant last week in some volunteer rescue work during a fire at a stock farm there, when about 400 horses were in danger, personally saving three of the most valuable horses in the stable.

Walter W. Cook, Natick, Mass., well known in the Boston trade, recently went to Kingston, Jamaica, on a trip for the benefit of his health. Some apprehension has been felt regarding him, as up to last Saturday no word had reached his friends to let them know of his safety since the disaster.

Bowling is a favorite recreation among the jewelry salesmen, and competing teams are organized in a number of the leading houses. The Smith, Patterson Co. team, for instance, has played recently against the Shreve, Crump & Low Co. team, the latter being defeated, and twice against the Bigelow, Kennard & Co. team, resulting in a tie.

Charles Goodman, who attempted to make a hurried departure last Friday from the jewelry store of Ludwig Blumberg with

an unpaid watch in his possession, was stopped by the jeweler's door-closing device and held for the police. He was found to have a record, and in court he received a sentence of a year in the House of Correction.

M. H. Smith, of the Smith, Patterson Co., has been in New York on a buying trip during the past week. Two of the firm's buyers, Edward Barlow and Miss McPherson, were also in New York last week, and Mr. Smith is joined this week by Messrs. F. S. Chick, Henry Reynolds, Joseph C. Batchelder and James Kingman, buyers for leading departments.

Among the visitors in town last week were J. H. Sawyer, Bar Harbor, Me., who stopped over in Boston en route to a southern Winter resort; and C. A. Gaudette, of Fall River, Mass., who has jewelry stores in Arctic Centre and New Bedford. Mr. Gaudette was accompanied by his wife, and they were about to start west on an extended trip, during which they will visit California and Mexico.

Henry W. Patterson, of the Smith, Patterson Co., went to Montreal again last Friday to look after matters in connection with their establishment in that city, which was recently visited by fire. Since the fire the factory in this city, which was fully equipped when the Boston building of the concern was remodeled, but had not been put in operation, has been started up to take the place, temporarily at least, of the Montreal manufacturing plant.

At the annual meeting, held Friday evening, of the Arts and Crafts Society, the following officers were elected: President, H. Langford Warren; vice-presidents, A. W. Longfellow, J. Samuel Hodge, C. Howard Walker; treasurer and clerk, Frederic Allen Whiting; members of the council, Miss Mary Crease Sears, C. Howard Walker, I. Kirchmayer, John E. Peabody, Frederic Allen Whiting, J. Templeman Coolidge, Jr., Henry Lewis Johnson, A. W. Longfellow, H. B. Warren, J. Samuel Hodge, Ralph Adams Cram, H. Langford Warren, Carl H. Heintzemann, Arthur J. Stone, William H. Grueby. The anniversary exhibition will continue from Feb. 5 to Feb. 26.

Canada Notes.

I. B. Moss, Lunenburg, N. S., has purchased the business of L. B. Forsyth, Queen St., W., Toronto, Ont.

Henry Bank, eastern traveling representative of the Toronto Jewelry Mfg. Co., has gone on his Spring trip to the maritime provinces.

W. Busby, Oakville, Ont., and J. J. Hollingshead, Woodbridge, Ont., were among out-of-town buyers who called on the Toronto, Ont., trade this week.

The number of failures in the jewelry trade of Canada during 1906 was 15, with liabilities of \$112,034, as against 20 failures, with \$76,697 liabilities, in 1905.

W. A. Cole, assignee of the estate of David Goyer, Ottawa, Ont., who assigned in April, 1905, and paid a dividend of 25 per cent., dying shortly afterward, is taking proceedings on behalf of the creditors to recover the amount of a life insurance policy for \$2,000, held by deceased.

Mr. Young is about to open a store at Roseville, Cal.

Frank Barndt has commenced business at Doylestown, Pa.

R. E. Hutton recently started in business in Pierce, Nebr.

Herden Bros. are new jewelers located in Philadelphia, Pa.

S. Schloss has also opened a new store in Philadelphia, Pa.

J. Pearlsten has engaged in business at 1024 Girard Ave., Philadelphia, Pa.

The Krug-White Jewelry Co., of Staunton, Ill., has been incorporated, with a capital stock of \$15,000. The incorporators are W. J. Krug, H. J. White and Lena Krug.

Norman A. Forbes, Richard W. Forbes and George S. Shepherd have incorporated the Forbes Engraving Co. at Portland, Ore., with a capital stock of \$10,000, to do a general business at that place.

The De Witt-Black Co., of Rochester, N. Y., has been incorporated to manufacture jewelry and cutlery, etc., with a capital of \$10,000. The incorporators were A. W. De Witt, J. Black and C. C. Milne, of Rochester.

The W. C. Correll Jewelry Co., Concord, N. C., was recently incorporated with a capital stock of \$20,000, of which \$7,300 has been subscribed, to carry on a jewelry business. The incorporators were W. C. and N. A. Correll, and Edward A. Moss, all of Concord.

Providence.

F. T. Blackford is now on the road for the S. B. Champlin Co., of this city.

The Gorham Mfg. Co.'s factory closes Saturday, Jan. 26, until Monday, Feb. 4, for the annual overhauling of the plant.

Among the imports at the port of Providence last week were 12 packages of imitation precious stones from Bremen.

W. C. Lind and Harry M. Mays are on committees having in charge the arrangements for the annual ball of the Edgewood Yacht Club, Feb. 14.

Harvey J. Flint, who recently withdrew from the employ of D. Wilcox & Co., has decided to at first engage in a general repair business, but may later take up some manufacturing line.

With a capital stock of \$60,000, the Jencks Paper Box Co. has been incorporated, the officers being: President, John J. Jencks; secretary, Frank A. Barnes, and treasurer, Howard W. Jencks.

Among buyers in town last week were: T. Lyons, New York; Max Weil, Salt Lake City, Utah; J. Lewis, San Francisco; J. L. Sabbath, Montreal; J. Eastwood, New Glasgow, Nova Scotia; J. Jacobs, San Francisco, and H. Abrams, New York.

On Thursday evening the Ostby & Barton

Co. Employes Mutual Relief Association had a dance in Music Hall, about 1,400 being present. Music was furnished by Maguire's Savoy Orchestra, and the following were the committee in charge: Dennis A. McCullum, chairman; Everett J. McGowan, secretary; Fred Yorkery, treasurer; William J. Fitzpatrick and John Scully.

News Gleanings.

Harry Janowitz, Johnstown, Pa., returned recently from a purchasing trip to New York.

The stock in the store of H. W. Schwartz, Copley, Pa., was sold at the sheriff's sale recently.

E. Deull, Pottsville, Pa., last week purchased the building in which his store is located, for \$25,000.

A. U. Schlaudecke, Erie, Pa., who had been confined to his home for two weeks by illness, has resumed the management of his business at 1027 State St.

George Hicock, a jewelry salesman, was recently found dead in his bed in a hotel in Trinidad, Colo. The deceased was 65 years old and a member of the B. P. O. E.

A daring burglary was committed a short time ago in the store of the Black Mercantile Co., Cameron, Ind. T., where thieves blew open the safe and escaped with about \$400 in cash and jewelry valued at \$90. Bloodhounds were placed on the trail of the burglars. Thus far no arrests have been made.

Two young girls named Sorenson, residing on W. 6th St., Leadville, Colo., recently stole three gold rings valued at about \$50 from the store of W. A. S. Parker, 512 Harrison Ave., that city, while the clerk's attention was engaged elsewhere. The girls took the rings from a tray which had been placed before them. The jewelry was subsequently recovered and the young shoplifters allowed to go unpunished.

Brainard Lemon, son of the late James K. Lemon, Louisville, Ky., whose obituary was published in the last issue of THE CIRCULAR-WEEKLY, will continue the business of J. K. Lemon & Son at 511 Fourth Ave., Louisville, without change of any kind. The business was established in 1828 by Jas. I. Lemon, whose son, the late James K. Lemon, succeeded to it, and it was the wish of the latter that it should be continued by his son without change. The family of the late Mr. Lemon wish to acknowledge their appreciation of the many expressions of sympathy received from members of the jewelry trade.

The well-known wholesale and diamond importing firm of Jos. Linz & Bros., Dallas, Tex., recently dissolved by mutual consent, Joseph Linz, the head of the firm retiring after a career of 30 years in business. His interests were purchased by the remaining partners, Messrs. Simon, Albert and Ben Linz, who continue the business without change under the firm name of Linz Bros. Joseph Linz retired in order to give his entire time to personal affairs and will hereafter give much attention to the new Linz Realty Co., of which he is president. His withdrawal from the jewelry trade is deeply regretted by his many friends, who all wish him success in his new venture.

Connecticut.

Henry L. Beach, Bristol, left recently for California.

Gen. Geo. H. Ford, New Haven, who has been confined to his home several days by influenza, is convalescent.

James D. Bergen, president of the J. D. Bergen Co., Meriden, is gradually recovering from an attack of la grippe.

President J. G. Woodworth, of the Wm. L. Gilbert Clock Co., Winsted, has been re-elected a director of the First National Bank of Winsted.

F. A. Wallace, Clifford W. Leavenworth and Charles D. Morris attended the inaugural reception given to Gov. Woodworth, at the Foot Guard armory, in Hartford.

Walter Camp recently conferred with the representatives of the West Point Football Association, New Haven, in regard to the Yale game next year. The date fixed for the contest was Nov. 2.

William F. Duyser, an employe of the Wm. L. Gilbert Clock Co., Winsted, died at his home at that place, Tuesday evening, of last week, of scarlet fever, following an attack of tonsilitis.

Geo. H. Shine, a well known optometrist, died about a week ago, at his home, in Rowayton, of kidney trouble. The deceased had been ill for several months and is survived by a widow and an infant daughter.

Friends of Walter Ingraham, of the E. Ingraham Co., Bristol, were made anxious by a recent report that he had been a visitor in Kingston, during the earthquake. The report was untrue, as Mr. Ingraham had been in Bermuda with his family.

At the annual meeting of directors of the First National Bank, Wallingford, last week, the following officers were elected: President, F. A. Wallace; vice-president, C. H. Tibbetts; auditors, C. H. Tibbetts and G. M. Hallenbeck; cashiers, W. H. Newton and F. M. Cowles.

The traveling representatives in the employ of the J. B. Williams Co. held their annual reunion recently. An enjoyable banquet was held and handsome souvenirs consisting of pocket knives from Tiffany's, each bearing the initials of the recipient, the date and the letters "J. B. W. Co.," were distributed.

The grand list of the town of Bristol for 1906 shows the following assessments on property belonging to members of the trade: American Silver Co., \$83,500; J. R. Holley, \$14,780; E. Ingraham Co., \$19,000; W. A. Ingraham, \$28,000; W. S. Ingraham, \$35,050; Sessions Clock Co., \$164,200; W. E. Sessions, \$82,290; Thompson Clock Co., \$5,700; Dunbar Bros., \$13,500, and E. B. Dunbar, \$14,000.

Hugo Wasserman, who for many years past has been a valued employe of the Plaut-Cadden Co., Norwich, Conn., will conclude his duties there the first of March, and after a month's rest will go to New Brunswick, N. J., where he is to engage in the manufacture of chemicals, being a member of a new company to organize and locate there. Mr. Wasserman will be in charge of the factory as manager and be secretary and treasurer of the company as well as having an interest in the concern. His cousin, Hugo Koblenzer, will be one of the company, and will represent it on the road.

Ball's Official Standard R. R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan :

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

The watch will win you his business and friendship for always.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

Chicago Notes.

H. W. Allen and wife have left for a two weeks' trip to Cuba.

C. E. Child, of the C. M. Robbins Co., is making a Pacific Coast trip.

Emil Anderson, Kindred, N. Dak., is attending a course in optics in this city.

Ed. Walther, with the D. F. Briggs Co., has just returned from a western trip.

C. H. Tew, representing the E. Howard Watch Co., was a visitor here last week.

F. M. Sproehle is making a trip to the Pacific Coast, accompanied by his family.

R. C. Demarest is on a trip east to secure a few good jewelry lines to represent in Chicago.

James Sutherland, with the Schrader-Wittstein Co., is on a two months' western trip.

Frank H. Chullen, representing the Ohio Cut Glass Co., is on a trip through the northwest.

W. A. Fay, representing the John T. Mauran Mfg. Co., is making a trip to the Pacific Coast.

C. A. Garlick is in New York and will attend the banquet of the 24-Karat Club before returning.

Sol Hess has just returned from a visit to the factory of the Dueber Watch Case Co., Canton, O.

Julius Ziegler has gone with his son, Harold to San Antonio, Tex., instead of to West Palm Beach, Fla.

H. M. Lane, manager of the Chicago office of Reed & Barton, has been making a visit to the factory at Taunton, Mass.

C. H. Knights, of C. H. Knights & Co., accompanied by his family, leaves this week for San Diego, Cal., to spend the winter.

A. P. Wilkes, representing the Mauser Mfg. Co. and S. Sternau & Co., is covering the territory in Michigan formerly covered by Julius Mayer.

J. W. Frazier, Illinois representative of the South Bend Watch Co., is here now and will make Chicago his headquarters for the next three months.

Charles V. Pope, Holdrege, Nebr., was here recently looking after the funeral arrangements of his brother, who met accidental death by an explosion of gas.

Henry Urner, manager of the factory of the Queen City Silver Co., Cincinnati, O., was here last week visiting Hugh E. King, the western representative of the concern.

E. A. Dorrance, manager here for Simons, Bro. & Co., has been confined to his

home on account of a severe cold. He expects to make a trip east, visiting the factory at Philadelphia, this week.

Francis T. Lotz is the new salesman for the Juergens & Andersen Co., and in common with the other salesmen of this company will leave for his territory the latter part of the month.

C. F. Huntington, formerly for many years with the Ansonia Clock Co., has accepted the position of city salesman with the Seth Thomas Clock Co., left vacant by the resignation of D. P. Butler.

Lawrence Everet, boarding at 685 Superior St., and employed by F. A. Hardy & Co., became despondent over a love affair, last week, and committed suicide by drinking poison. He was 22 years old.

E. G. Lewey, of Lewey Bros. Co., left the early part of the month for a 30 days' trip to Cuba by way of New Orleans. He will visit several of the larger cities in the southern States on his way home.

"Jake" Swartchild, of Swartchild & Co., accompanied by his wife, will leave on Feb. 1 for a two months' trip to California. Mr. and Mrs. Swartchild will visit all the important points of interest en route.

Cy. Pickering, of H. Z. & H. Oppenheimer; Sam Wallach, of Stern Bros. & Co., and Norman Strauss, of Jacob Strauss & Sons, visited the trade here last week in the interest of these New York diamond firms.

The Krug-White Jewelry Co., Staunton, Ill., was recently incorporated with a capital of \$15,000, and succeeds to the business of W. J. Krug, of that place. The incorporators were: W. J. Krug, H. J. White and Lena Krug.

Ed. Fry, Gus. Weinfeld, M. W. Silverberg, H. G. Schramm, Leo Stein and Otto Leiberman, of the traveling force of the Stein & Ellbogen Co., are preparing to leave for their respective territories the latter part of this month.

The following are among those who recently entered the Kandler School of Engraving: H. A. Gayhart, Hot Springs, Ark.; H. S. McCray, Chicago; R. Roberts, Billings, Mont.; T. R. Gartland, Rock Valley, Ia.; Emil Anderson, Spring Valley, Minn.

James McNeanim, Frank Newcomb, Charles Nesbit and H. T. McSweeney, of the traveling force of M. S. Fleishman, will leave for their respective territories this week. They attended, as did all of the employes, a banquet at DeJonghe's a few evenings ago, given by Mr. Fleishman.

I. M. Radabaugh, Hastings, Minn., who is

the secretary of the American National Retail Jewelers' Association, received a telegram last week while here attending a meeting of the executive officers of that association, to the effect that he had been appointed a member of the Minnesota State Board of Examiners in Optometry.

George H. Thomas, in the Heyworth building, who has been representing Scharling & Co., Newark, N. J., and was a local representative of the Shephard Mfg. Co., has added to these two lines that of the Woodside Sterling Co., New York, which he will represent from Pittsburg west.

Morton Bernheimer, of this company, will visit the new office here this week.

A. E. Madsen, of Rettig, Hess & Madsen, with headquarters in Minneapolis, has been in this city for the past two weeks. Rettig, Hess & Madsen have recently taken on some more salesmen, so that their full force now is as follows: A. E. Madsen, northwest; M. H. Cowan, far west; W. H. Cohen, south and middle west; F. C. Emerson, Ohio, Indiana and Michigan; Sol. Hess, Chicago and east.

Following their usual annual custom, Benj. Allen & Co. gave a banquet to their road salesmen and their heads of departments in the German room at the Grand Pacific Hotel, Thursday evening. The affair was informal, and was voted a huge success by every one present. In these annual gatherings many experiences are exchanged between the employes of this large jobbing house, and this annual meeting is looked forward to with interest and pleasure by all concerned.

G. W. Brethauer, in the Champlain building, who has had a suit against the Union Traction Co., in which he was given a verdict in the trial court for \$10,000, which judgment was confirmed by the Supreme Court, has now received a check from the company for \$11,282.11, which includes interest for three years—the time elapsing from the time the original judgment was entered in his favor. Mr. Berthauer had a dispute in January, 1902, with the conductor of a N. Halsted St. car over a transfer slip. Inasmuch as the conductor was strong and husky and Mr. Berthauer an old man—an old soldier, by the way—the result was that Berthauer was hurled to the ground from the moving car and sustained a scalp wound and permanent injury to the hearing of his right ear. He was unconscious for 10 days after the accident and away from his business for over three months.

Will you be in Pittsburg

TAVANNES WATCH CO.

131 Wabash Ave., CHICAGO

2 Maiden Lane, NEW YORK

Cincinnati.

Fred Gruen, of D. Gruen, Sons & Co., is looking after business interests in Mexico City.

J. F. Krohne, Clarksburg, W. Va., spent a few days here the past week with friends.

"Gus" Wahl, watchmaker for George H. Newstedt, is kept away from business by a severe illness.

A. A. Spiegel & Co. have secured the services of R. Garfield Maas, who will travel through the west.

Fred J. Kilb, engraver, is receiving felicitations upon his recent marriage to Miss Wall, of Newport, Ky.

Arthur Wadsworth and Frank Stagman, of the Wadsworth Watch Case Co., are in New York on business.

J. B. Osthoff, of Joseph Noterman & Co., and his family have returned from a sojourn at Zellwood, Fla.

Joe Rifkin, of L. Heller & Son, New York, and his bride spent a part of their honeymoon here last week.

Philip Horr, Aurora, Ind., who was a visitor here last week, was recently elected president of the Aurora National Bank.

Lee Loeb, Mayo Loeb and I. Herman, of Herman & Loeb, have started on trips to the West, Ohio, Kentucky and Indiana.

C. M. Wallace, Huntington, W. Va., stopped off here last week on his way to French Lick Springs, Ind., where he will recuperate.

The engagement of Oscar S. Fox, of Fox Bros. & Co., and Miss Ruth B. Levy, of Vicksburg, Miss., was announced recently at that place.

Frohman & Co. have leased larger quarters in the Carlisle building near their present location, and have given a contract for new office fixtures.

Jobbers are having considerable difficulty in getting goods from the East, as the trains cannot enter downtown depots, thereby causing a delay in deliveries.

Frank Clark, of George A. Clark & Son, Lorain, O., stopped off at Cincinnati last week, en route to New Orleans and Panama, where he will remain some weeks.

Ben Schneider, whose store on upper Vine St. was robbed last week of \$1,500 worth of goods, offered a reward of \$300 for any information leading to the recovery of the stolen articles.

Abner C. Thomas stopped off here last week, en route to Sistersville, Va., where he will again take up his old business, having closed out his store at Anniston, Ala., where he located over a year ago.

A. G. Schwab, of A. G. Schwab & Bro., and Sol Fox, of Fox Bros. & Co., recently attended the convention of the Hebrew Union Congregations at Atlanta, Ga., where the latter was elected one of the executive board.

M. J. Greenwald, in the Arcade, has turned over his interest in the "Imperial" to his brother, Albert Greenwald, who is now the sole proprietor. M. J. Greenwald will devote his time exclusively to his original store.

Out-of-town jewelers here during the past week purchasing stock included: F. McComb, Hamilton, O.; E. F. Randolph, Williamson, W. Va.; William E. Miller,

Massillon, O.; C. A. Gossard, Washington C. H., O.; W. L. Lehme, Decatur, Ind.

F. E. Jack, manager of the factory of the Queen City Silver Co., has resigned his position with that corporation to assume the vice-presidency of the Hofman Jewelry Co., Columbus, O. Henry Urner will take the position formerly occupied by Mr. Jack.

The annual stockholders' meeting of the Herschede Hall Clock Co. was held Jan. 19 and the following officers and directors were re-elected for the ensuing year: President, Frank Herschede; vice-president, William H. Stewart; secretary and treasurer, John A. Herschede; directors, J. Fred Kramer and Thomas H. Kelley, who with the above officers, constitute the full board. The stockholders congratulated the present management upon the excellent showing of the past year.

A young man about 23 years old and of good appearance called at several of the jobbing houses in the past week and tried to get various articles on memorandum, saying that local dealers had sent him. He hadn't any orders, so his request was refused. A young man of this description called on Peck, Selmeier & Peck, saying A. M. Plaut, manager of the National Jewelry Co., sent him for some diamond emblem goods. "Gus" Peck, who waited on the young man, said that as he hadn't any order from Mr. Plaut he would see Mr. Plaut about it himself. The young man then departed, and an investigation disclosed that the man was a swindler. Plaut notified others, and it is believed no one has suffered.

Kansas City.

The Merry Optical Co. is remodeling its office and salesroom.

F. J. Nevin, of Nevin Bros., made a trip to St. Joseph last Sunday.

Ed. Larkin, formerly with Gurney & Ware, is now with the Green Jewelry Co.

J. Levin, with Kionka & Kionka, represented that firm at the optical meeting in Lincoln, Nebr., last week.

C. P. Martin, Kirwin, Kans., was a visitor in this city last week. He reports that hunting is good around his town.

Otto Knaul, a traveler for Woodstock-Hoefler Watch & Jewelry Co., reports the arrival at his home of a nine-pound girl.

P. H. Seewald, of Amarillo, Tex., was in Kansas City the early part of last week, and accompanied E. S. Villmoare to Lincoln.

D. C. Prudden, optician, will soon move from his present quarters in the Hewson building to the Corn Belt Bank building.

C. M. Weed, with the Woodstock-Hoefler Watch & Jewelry Co., has recovered from his recent illness, and is attending to his regular duties.

W. H. Meyer, Lawson, Mo., passed through Kansas City last week on his way to Oklahoma, where he is going to spend a couple of weeks hunting.

F. A. Ryer, of the retail jewelry firm of F. A. Ryer & Co., was carried on Jan. 11 to Miss Norma F. Rizer. The couple went east on their wedding trip.

Chas. W. Palm, Hale, Mo.; A. A. Matthews, Kansas City, Kans., and J. T. Doyle, Shelbyville, Mo., have just enrolled at the Southwestern Optical College.

Ed. S. Villmoare and Fred Cateron, travelers for the C. B. Norton Jewelry Co., went up to Lincoln last week to represent the house at the optical convention.

D. B. Ward, of the Ward & Crellin Jewelry Co., left the early part of last week for Lincoln, Nebr., where he attended the meeting of the Nebraska State Optical Association.

Kionka & Kionka report that C. P. Kionka, who started out on the road right after the first of the year, has been quite ill, but is again able to attend to his business duties.

The following out-of-town jewelers visited this city last week: H. C. Schultz, Hays, Kans.; W. S. Noble, Drexel, Mo.; Mr. Logan, of Logan Jewelry Co., Mangum, Okla.; W. K. Thompson, Chula, Mo.; T. L. Baskett, Chillicothe, Mo.

The following new pupils have just been enrolled at the Kansas City Polytechnic Institute: H. C. Schultz, Hayes, Kans.; E. M. Maupin, Bolivar, Mo.; J. G. Morris, Humboldt, Nebr.; C. L. Baskett, Chillicothe, Mo., and J. T. Doyle, Shelbyville, Mo.

Dr. S. W. Lane, who went to Lincoln, Nebr., to deliver several lectures before the Nebraska State Optical Association, was authorized to invite the association to hold its next meeting in Kansas City at the time of the convention of the National Association, and at the same time to attend the National Association meeting.

The jewelry jobbers of this city are anxious to learn the whereabouts of F. C. Roder, who was engaged in the retail jewelry business in Higginsville, Mo., until after Christmas, and who disappeared just after that time. He is a man of medium height, weighs about 150 pounds, sandy complexion and moustache and talks with a German accent. He is club-footed. He is said to have been engaged in business in Wisconsin at one time and also in Toronto, Can.

Omaha.

R. E. Hutton, Pierce, Nebr., is opening a new store at that place.

L. A. Borsheim, of Brown & Borsheim, is confined to his home with a severe attack of rheumatism.

A. Mandelberg left last week for an extensive eastern trip, including New York, Boston, Philadelphia and Washington.

T. Zurbrugg, president, and Mr. Fogg, treasurer, of the Keystone Watch Case Co., Philadelphia, Pa., were in this city during the past week.

W. P. McCall, Geneva, Nebr.; Mr. Doyle, Neola, Ia., and Oscar Mills and wife, Cherokee, Ia., visited this city last week.

Mr. and Mrs. C. L. Shook, A. F. Smith and T. J. Brunner, of the A. F. Smith Co.; T. L. Combs and B. B. Combs, J. C. Hutton and B. F. Wurn, of this city, were in Lincoln last week, attending the State Optical and Jewelers' Convention, which convened there.

The winner in the word contest of Frank C. Hyde & Co., Appleton, Wis., made 3,016 words from the letters contained in "Hyde & Co., Jewelers."

San Francisco.

The Macey Jewelry Co. has put in a new show window.

Sam Cohen, of the Diamond Parlor Jewelry Co., was seriously ill last week.

Mr. Johnson, formerly with H. C. Van Ness & Co., is now with Julius A. Young.

Murray Mayer, of Mayer & Weinschenk, goes east next week, to purchase Spring stock.

Mr. and Mrs. Henry M. Abrams, wholesalers of this city, are now stopping in New York.

Mr. Hammersmith, of Hammersmith & Field, has gone with the Shriners on their pilgrimage to Fresno.

J. Sonnenfeld, formerly of 331 Kearney St., has opened a lapidary shop on Sacramento St., near Fillmore.

While walking along East St. in this city, Charles Merring, a jeweler, stumbled through a broken sidewalk and fell into a basement, breaking his leg.

A. F. Loudberg, who has for some years past been with the W. K. Vanderslice Co., has taken a position in the art department of Vickery, Atkins & Torrey's new store on California St.

T. Lundy, who, since the fire, has been located in temporary quarters at 744 Market St., intends to resume his former location in the Claus Spreckels building, as soon as repairs have been completed.

Ed. Bastheim, with the Alphonse Judis Co., will be married to Miss Irene Eakle to-day in Los Angeles. Alphonse Judis is still in Los Angeles, recovering from his recent illness, but expects to be back at his business by Feb. 1.

The Supreme Court of California has decided the long drawn out case of Louis O. Levison, receiver for the bankrupt firm of Schumacker & Co. against J. Boas in favor of the receiver. The court held that Mr. Boas had conducted a pawnbrokerage business without complying with the laws of the state or of the city and that the jewelry deposited with him as security for money loaned Schumacker & Co. must be turned over to the receiver.

R. F. Allen and Horace W. Morgan, acting for the wholesale jewelers of this city, have secured the lease of the new Jewelers' building, to be erected by the D. Samuels Realty Co., on the south side of Bush St., near Grant Ave. The lease is for 10 years at a total rental of \$84,000. The contract for the construction of the building was let last week. The contract calls for a four-story and basement class "C" building to cover a lot 34½ feet by 120 feet, and to be built throughout of fireproof materials.

H. C. Ahlers, a dealer in diamonds and other precious stones at 1460 Sutter St., after being requested to display his stock to a prospective customer at 6 o'clock Jan. 14, turned and faced a revolver within a few inches of his face. Instead of obeying the armed man's demand to surrender his jewels, he grappled with the thief, wrested the revolver from him and a few moments later had the satisfaction of handing his man over to the police. Mr. Ahlers had suffered a number of lacerations and was taken to the Central Emergency Hospital for treatment, but was able to go to the police station and identify his assailant

after having his wounds dressed. The robber gave his name as Emanuel Alonzo, of 2326 Pacific Ave., Alameda, Cal. Before the fire of last April he was a resident of this city. He has a wife and two children and claims to be a member of the Painters' Union, but admits that he has not worked at his trade for a number of months.

Pacific Northwest.

W. D. Roof, Springfield, Ore., was a visitor last week at Portland, Ore.

B. N. Butler, Medford, Ore., has moved his stock into the H. C. Garnet building, in the same town.

H. E. Whitman, Blaine, Wash., has sold his store to Barber & Barr. He will remove to Palouse, in the same State, where he will open a store.

C. R. Cousino, formerly in business at Grant's Pass, Ore., but for a number of years at Crescent City, Cal., is now visiting at the former place.

G. Heitkemper, Klamath Falls, Ore., was in Portland, Ore., last week, buying stock for his Spring trade. He is adding a musical department to his store.

The Marx Jewelry Co., New York, has begun suit against Ben. C. Nichols at Spokane, Wash., to recover \$1,256 alleged to be due since December, 1897, when the defendant was in business in Spokane. It is alleged in the complaint that the whereabouts of Mr. Nichols has been known to the plaintiff until recently.

John Hardwick, who has been in the jewelry business at Walla Walla, Wash., for the past nine years, made an assignment last week for the benefit of his creditors. A. K. Dice was appointed receiver and L. L. Tallman and Charles Martin were selected to invoice the stock. The appraised value of the stock at cost figures is placed by the appraisers at \$12,400, while the total liabilities are not quite \$8,000. It is said that the assignment was made because Mr. Hardwick feared that attachment proceedings would be begun.

Denver.

E. L. Deacon has left for a trip through Colorado.

The daughter of A. J. Raine, a well-known jeweler of this city, died on the night of Jan. 16.

The wife of W. F. Vic Roy has left for a trip through California, where she will spend the Winter.

Now that the holiday rush is over the Denver Manufacturing Jewelers' Association will resume its semi-monthly meetings.

Out-of-town jewelers who called on the local trade last week included: George L. Payne, Boulder, Colo.; E. L. Peisar, Glenwood Springs, Colo.; W. H. Braunan, Braunan Bros., Loveland, Colo.; J. P. Wilcox, Idaho Springs, Colo.; Col. Lewis, Sedalia, Colo.; C. A. Witherspoon, Boulder, Colo.

J. L. Mullins, proprietor of the J. L. Mullins Jewelry Co.'s stores in Hillsboro and Morrisonville, Ill., has purchased the interest of J. P. Mitchell, his partner at Morrisonville, and will take personal charge of the establishment at that place.

St. Louis.

James J. Burke, president of the Brooks Jewelry & Optical Co., has returned from a business trip to Chicago.

W. E. Susong has started out on his initial trip for the Bauman-Massa Jewelry Co., through Missouri and Iowa.

C. L. Stange, with the L. Bauman Jewelry Co., departed last week for a trip over his territory, which is southwestern Missouri.

Al Klein, formerly with the Bauman-Massa Jewelry Co., is now with the material department of Edwards & Sloane, Kansas City, Mo.

Ralph Wilson, formerly with J. F. Dailey & Co., this city, and later with the Dailey firm in Chicago, is now with the Eisenstadt Mfg. Co.

Robert King, Atlanta, Ga., stopped off in this city several days last week on his way east. He states that the prospects for 1907 in his section are far brighter than last year.

T. Zurbrugg, president of the Philadelphia Watch Case Co., Riverside, N. J., spent several days here on a general tour last week. He was accompanied by Charles E. Fogg, treasurer of the concern.

Reports from St. Vincent's Asylum state that Walter L. Ely, manager of the repairing department of Mermod, Jaccard & King Jewelry Co., who is suffering from a nervous breakdown, is reported to be rapidly improving.

John F. Zeitler, 2013 Salisbury St., has purchased the store of Bierbaum & Bohle, at 2106 N. 14th St. Mr. Zeitler will conduct both stores, his son, William T. Zeitler, being in charge of the latter named establishment.

S. Fuller, who installed the jewelry department of the Wright Chemical Co., Jefferson Ave. and Olive St., has severed his connection with that firm, and it is understood that he will enter the jewelry business on his own account.

The St. Louis jobbers have been advised that O. N. Barnhill, who was watchmaker for the Morris Drug & Jewelry Co., which failed some time ago, has purchased the jewelry branch of the business, and will conduct it at the old location.

Among the visiting jewelers in St. Louis last week were the follows: N. S. Weiler, Cape Girardeau, Mo.; I. B. Morris, Perry, Mo.; A. Gerber, Edwardsville, Ill.; G. E. Meisenheimer, Ava, Ill.; August Kalbitz, Red Bud, Ill.; J. F. Mitchell, Morrisonville, Ill.

As an evidence of appreciation of the rapid strides the corporation has made since he became connected with it, Sam Kober has been presented with a block of stock of the E. Maritz Mfg. Co. by E. Maritz, president of the concern. Mr. Kober has been made secretary. Four additional men have been added to the factory.

A clock, every part of which was made by him by hand, and which took him three years to complete, is displayed in the window of Ellis L. Barnard's store, Alton, Ill. The parts are made of brass pieces, which Mr. Barnard polished after reducing them to the exact size wanted. The clock, which is operated by weights, will run eight days.

Philadelphia.

J. Pearlstine, watchmaker and jeweler, has opened a new retail store at 1024 Girard Ave.

Herbert Harbroe, watchmaker, has resigned his position with Blair & Crawford, 13th and Chestnut Sts.

William E. Ross, started out this week on his trip through Pennsylvania in the interests of J. B. Bechtel & Co.

John Eichman, watchmaker, with I. Herzberg & Bros., 8th and Arch Sts., contemplates starting in business for himself.

Morris Pfalzler, a retired wholesale jeweler, was elected last week a member of the Board of Directors of the Mercantile Club.

Gabe A. Gorline, retailer, 52 N. 11th St., has returned from a business trip to New York City and the eastern manufacturing district.

Frank Barndt, formerly of Slatington, Pa., and who some months ago disposed of his store there, has opened a retail store in Doylestown, Pa.

William Gibbons, one of the most prominent retailers of West Philadelphia, with a store at 40th and Market Sts., has departed with his wife for Bermuda.

O. O. Stillman and Mrs. Stillman, New Brunswick, N. J., were the guests last week of Ed. Sickles, of M. Sickles & Sons, while on a few days' visit to this city.

J. B. Bechtel, of J. B. Bechtel & Co., gave his sixth annual dinner to employes of the firm Saturday afternoon. The dinner was held at Mr. Bechtel's home, 2205 N. 8th St.

S. Schloss proposes to open his new retail store at 909 Market St. next week. The old store on 8th St., immediately above Market St., has been acquired by Strawbridge & Clothier.

Harry Everline, with E. Diesinger, case-maker, 7th and Sanson Sts., lost a pocket-book on Sanson St. last Saturday. It contained money and valuable papers and has not yet been recovered.

M. I. Darevski, 134 N. 8th St., called a meeting of his creditors Monday, Jan. 21, at the Astor House, New York. No details of his financial difficulties are as yet obtainable. Mr. Darevski traded largely with New York houses.

M. Sickles & Sons added to their staff of traveling men last week Jesse Logan Browne, who formerly traveled for a New York jobbing house. Mr. Browne will cover his old territory in the interests of his new employers.

Among the out-of-town visitors to the city to purchase goods during the week were: E. K. Bean, Lansdale, Pa.; M. E. Hunter, Beverly, N. J.; E. C. Albertson, Bridgeton, N. J.; J. H. Sides, Chestertown, Md., and L. C. Reisner, Lancaster, Pa.

Herman Diesinger, formerly of the well-known retail firm of Hamilton & Diesinger, but who retired from business some years ago, was last week elected a vice-president of the Columbia Club, Broad and Oxford Sts. C. P. Ruckdeschel was elected one of the directors.

The annual meeting of the Keystone Watch Case Co. is to be held Friday at the office of the company, 19th St., above Brown St. A new director is to be chosen and the assent of the stockholders is to be obtained to a proposed sale of property

owned by the company and adjoining its plant.

The bulk window of the jewelry store of D. Schwartz, 27 S. 9th St., was smashed with a brick by a thief in broad daylight last week and a diamond ring worth \$215 was stolen. Charles Schwartz, who conducts the store, pursued the thief, and with assistance from passers-by, was captured. He has been held for trial. The man has refused to reveal his identity.

The magnificent silver service presented to former Governor Pennypacker, who retired from office Jan. 15, was made by J. E. Caldwell & Co., of this city. It was exhibited last week in the store show windows of the firm. Every piece is engraved with the coat of arms of the Pennypacker family. The set is one of the most complete made recently in this city, but follows the conventional lines.

The mercantile tax law of the State, which has been from time to time fought by leading jewelers as well as other business men, is to be repealed if success meets the action initiated last week by the various trades bodies of this city, who met and appointed a committee to draft a law for the repeal of the existing law, and which is to be presented to the State Legislature at Harrisburg in a few weeks.

All of the ballots for the nomination of the officers of the Philadelphia Jewelers' Club, to be elected at the annual meeting the second Tuesday of February, have not yet been received. On this account an announcement of the nominees is delayed. The election, however, promises to be more than ordinarily interesting. At the annual meeting preparations will be made for the annual banquet to be given on Washington's birthday.

L. Ludwig, manufacturing jeweler, 127 S. 8th St., has sold out his establishment to H. and D. Herdan, who will continue the business at the old stand under the firm name of Herdan Bros., and will make a specialty of fine diamond mountings. Order work and repairing for the trade will also be done. The new firm proposes to make such extensions and improvements of the establishment as may be necessary to meet the demands of the trade and facilitate work. Mr. Ludwig will for a time retire from business. He has not yet determined what he shall do in the future.

Lancaster, Pa.

G. Edward Fleischer, head watchmaker for Ezra F. Bowman's Sons, is on the sick list.

Levi J. Miller, Ephrata, has sold his property there to Bolster Bros., preparatory to leaving Ephrata.

Marcus Parker, a jeweler, of Chattanooga, Tenn., stopped over in Lancaster last week, en route to New York.

John B. Roth, Jr., N. Prince St., has leased the storeroom adjoining his factory and will occupy it as an office.

C. E. Foose, F. W. Wheeler and E. R. Kant, of the Non-Retailing Co., have started over to cover their respective territories.

Michael Donovan, a former Lancaster watchmaker, had one of his legs cut off last week in a railroad accident at Pittsburgh.

Among the jewelers visiting Lancaster recently were Frank Fleischer, Marysville, Pa.; E. L. Rinkenback, Harrisburg; C. E. Hinkle, Ephrata.

T. C. Mullenberg, Charles F. Reisner and Michael Lang, traveling representatives of the H. S. Meiskey Co., have started on trips over their respective territories.

G. William Reisner has been appointed official maker of medals for Princeton University, and has just received orders for a large number of medals. He has also received orders for gold fobs for the editorial staff of *Bric-à-Brac*, one of the students' publications.

Paul L. Cushman, who died here last week while on a visit to a nephew, was one of Philadelphia's old jewelers, and many years ago had a store on Arch St. His illness came from a cold contracted during a recent trip to Washington, D. C. Mr. Cushman was 76 years old.

John Smith, Mundorf, O., and Ray Vashbinder, Du Bois, Pa., have entered the Ezra Bowman Technical School as students in engraving. R. W. Hartman, son of G. A. Hartman, of the Hartman Jewelry Co., of Wapakoneta, O., has entered the school as a student in watchmaking.

Pacific Coast Notes.

George Hobb, Raton, N. Mex., is moving his store into the new Roth block.

J. C. Wahlen, the pioneer jeweler of Petaluma, Cal., has sold out to C. Ayers.

W. J. Whitney, Oakland, Cal., is now enjoying a short vacation at Fresno, Cal.

Frank Smith, Woodland, Cal., was in San Francisco, Cal., buying stock last week.

Walter A. Lord, Goldfield, Nev., spent a few days in San Francisco, Cal., and is now with the Shriners in Fresno.

Fred. Wilson, formerly with George P. Martin, Watsonville, Cal., has given up his position and will retire from the trade.

F. E. Pourjade, who has been located temporarily at Alturas, Cal., has decided to make his stay permanent and has moved his family to that place.

Michel Dagroie, a well-known maker of gold and silver filigree work, of Albuquerque, N. Mex., died in that city of heart failure recently. He had a store on N. 3d St. for a number of years, and was about 55 years old at the time of his death.

Miss Menta Cosgrove has bought the interest of E. Mather in the store of Cosgrove & Mather, Colton, Cal. Miss Cosgrove is a sister of the other partner in the firm, a graduate optician, and has had practical experience in a jewelry store at Downey, Cal.

The pearl-fishing concession granted by the Mexican Government to Antonio Rufo in 1899 and in 1901 extended for 16 years has again been extended. The concession gives Mr. Rufo the right to fish for pearls and pearl shells at Cerralvo Island in the Gulf of California.

H. P. Shuey, Red Bluff, who was robbed a short time ago, has recovered the remainder of his property with the exception of one pair of diamond cuff buttons. The last instalment of the stolen property was found by a little girl hidden under her father's house. There seems to be no doubt that the man named Smith, now under arrest, is the guilty one.

Improved Ides Pattern Mainspring Winder

of superior quality, aluminum heads to reduce weight. 3 Arbors (interchangeable) to take all sizes of mainspring.

Price, each, \$1.50

No. 114.

No. 114 Set of 10 Punches in metal box—chiefly for reducing canons of hour hands.

Price, 60c.

No. 115 Set of 12 Punches in metal case suitable for staking escape wheels (6 flat face, 6 round face.)

Price, 60c.

No. 116 Set of 12, same as above, but all flat face. Chiefly for driving cylinders.

Price, 60c.

Nos. 115 and 116.

“National” Watchmaker’s Eye Glass

Slanting design of frame is most desirable, as it is very comfortable and easy to hold; further it shuts out the light from the side. Perforations near the lens will prevent lens from sweating.

Prices: Focus 1", 50c.

1½", 45c.

2", 40c.

2½ to 5", 35c.

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF JAN. 15, 1907.

841,192. SHOE BUTTNER AND HORN. JOHN L. SOMMER, Newark, N. J. Filed May 23, 1906. Serial No. 318,287.

A shoe-horn having a tongue at the small end thereof bent backward upon itself and perforated at the point of bending, and a button-hook having

a shank passed through said perforation, and a rivet through said tongue, shank and shoe-horn.

841,226. ELECTRIC TIME-SWITCH. JAMES M. CHAPMAN, Dallas, Tex. Filed April 25, 1905. Serial No. 257,341.

An electric time-switch, comprising an electric switch, a spring-arm fixed at one end and having its opposite end pivotally connected with the movable part of the switch and provided with a detent immediately of its ends, an intermediately-

pivoted lever adapted at one end to be engaged by said detent to hold the spring-arm under tension, a clock mechanism, and means engaging one end of said intermediately-pivoted lever and holding its opposite end in engagement with the detent actuated by the clock mechanism at a predetermined time for releasing said lever.

841,262. PRISM-TELESCOPE. KARL MARTIN, Rathenow, Germany, assignor to the firm of Rathenower Optische Industrie-Anstalt vorm. Emil Busch Actiengesellschaft, Rathenow, Germany. Filed Jan. 2, 1906. Serial No. 294,268.

A prismatic telescope, comprising in combination, a telescope-tube, object-lenses having different focal range, tubes for mounting therein the ob-

ject-lenses, a plate carrying the tubes for adjust-

ing the object-lenses, and a prism.

841,409. OPTICAL INSTRUMENT. SIMON LAKE, Bridgeport, Conn. Filed Oct. 5, 1905. Serial No. 281,373.

In an optical instrument, the combination with a tubular casing carrying at one end an inclined reflector for receiving laterally an image of an

external object and reflecting it longitudinally through said casing, of an objective comprising a member movable into and out of the visual range of said reflector, and means controlled exteriorly at the end of said casing opposite that carrying said reflector for shifting the movable member of said objective into and out of the visual range of said reflector.

841,440. REGULATOR FOR PENDULUM CLOCKS. WILSON E. PORTER, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed April 24, 1906. Serial No. 313,386.

In a clock-movement, the combination with a movement-plate having a clearance-opening, of a regulator-shaft passing through the said opening, a friction-washer mounted upon the shaft and ap-

plied to the plate over the opening, a spring mounted upon the shaft for coaction with the washer which it presses against the plate, a suspension device mounted upon the movement for the suspension of the pendulum, and means for transmitting the rotary movement of the regulator-shaft to the said device, whereby the pendulum is raised and lowered.

841,475. SELF-FILLING FOUNTAIN-PEN. PAUL E. WIRT, Bloomsburg, Pa. Filed April 13, 1906. Serial No. 311,421.

In a fountain-pen, the combination with the holder, of a filling device comprising a plunger-

head consisting of opposite head-disks and an interposed packing-disk united together, one of the head-disks having an eccentrically-disposed keeper-hook, and a plunger-stem slidable through the head

and provided with a terminal catch projection adapted to be turned into and out of engagement with said hook, the said packing being arranged to pack the head in the holder and also to pack the plunger-stem.

841,511. APPARATUS FOR MANUFACTURING HOLLOW GLASS WARE. FRIEDRICH A. GROSSE, Bischofswerda, Germany. Filed June 16, 1904. Serial No. 212,855.

A molding apparatus comprising a mold, a core, and a carriage supporting said core and for pro-

jecting the core into the mold, and means for rotating the core during its projection.

841,568. EYEGLASSES. FRED J. PECK, Ansonia, Conn. Filed May 26, 1905. Serial No. 262,358.

In a pair of eyeglasses the combination with a rigid bridge terminating at each end in two apertured lugs the one superposed above the other, of rigid guard and lens pieces each having two apertured lugs, the one superposed above the other, each pair of the first-mentioned lugs being

located between the last-mentioned lugs on the bridge-piece at its adjacent ends respectively, a journal-pin fixed between the superposed lugs at each end of the bridge respectively, spiral springs surrounding each pin between the lugs of the respective guard and lens pieces, the said springs being located in such a manner as to resist the swinging of the respective guard and lens pieces on their respective pins.

841,614. EYEGLASSES. ROBERT S. BLAIR, New Rochelle, N. Y. Filed Oct. 26, 1906. Serial No. 340,645.

In eyeglasses, in combination, a pair of lenses, a pair of nose-engaging members, a bridge, means connecting one lens with the corresponding nose-engaging member, a lever pivoted to said bridge

leading from the same to the other of said nose-engaging members, a member holding the other of said lenses and journaled on said pivot, and a spiral spring having a horizontal axis and interposed between said last member and said lever and adapted upon said lens swinging outwardly to force said lever toward the nose.

841,633. EXTENSIBLE BRACELET. ALFRED D. CROSBY, Attleboro, Mass., assignor to the P. J. Cummings Co., Attleboro, Mass. Filed May 21, 1906. Serial No. 318,065.

An expansible bracelet, comprising separate

links; each provided with a central stud, spring-controlled cranks pivoted to the studs, and arms held by the links and pivoted to the cranks in the adjacent links to flexibly connect the links.

(Patents continued on page 80.)

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1905, FROM *The Illustrated Official Journal.*)

ISSUE OF DEC. 31, 1906

18,561. SCARF-PINS. M. BLANCKENSEE, Birmingham. Sept. 14.

The ornament of a scarf-pin A is formed in two parts, the outer C screwing up against the inner

B. The pin is bent at right angles immediately behind the ornament.

18,611. TIME-RECORDERS. W. BERESFORD, Liverpool. Sept. 15.

In an autograph time-recorder, a record strip is exposed for signature by raising a hinged flap 1, Fig. 3. This causes the strip to be perforated with a dial indication of the time, while lowering the flap advances the strip, if desired, by a uniform amount. Additional "in" or "out" perforators may also be provided. When the hinged flap is raised, the last signature with its time-record is visible through a glass plate. The perforating device is shown in plan in Fig. 4 and comprises hour and minute perforating-needles 16, 16A, which may be distinctive, and are carried by plates geared to a toothed barrel 12 of the clock train. Twelve needles 22 on a fixed ring and a

needle on the central spindle perforate a dial, or instead, dials may be printed beforehand on the record strip 4. The whole perforating-device is carried by a frame supported on a slidable spindle 24, as shown in sectional view in Fig. 3, and can be advanced against a spring 27 to perforate, by an arm 31 on a rocking shaft. A second arm 30 on this shaft is engaged by a piece 29 projecting from the hinged flap 1, thus causing a perforation to be made when the flap is raised. Spring-controlled "in" and "out" perforators 43 are carried by the hinged flap, and an inking-pad may be provided for the perforating-needles. The

piece 29 on the hinged flap 1 also engages an arm 34 of a bell-crank which advances a second delivery roll 6 by rocking a pawl-carrying lever 38 pivoted on the roller spindle against a spring 40. If a regular feed of paper is required, a rod is hinged to the end of the pawl-lever 38 and rests on the paper roll. The free end of this rod passes below a fixed bar, so that the pawl-lever can only rock until the rod is held by contact with the paper and the fixed bar, the amount of rocking decreasing as the paper roll becomes thicker. The supply roller is provided with a breaking spring 48 to keep the paper stretched, and the register mechanism except the clockwork and time-recording portions is mounted on a removable plate 49. A bell may be rung at each actuation if desired.

18,820. LAMPS. A. P. McARTHUR, New York. Sept. 18. (Date applied for under Patents Act, 1901, Sept. 19, 1904.)

Lamp Shades, Reflectors.—The outer surface of a combined lamp shade and reflector is provided

with series of prisms, P, P¹, P¹¹, the different series being superimposed one above the other in a step like manner. One of the series of prisms may consist of two sets, P¹, P¹¹, of different lengths. The neck of the reflector is formed with internal ribs or detachable projections for resting on a chimney or an electric lamp bulb or globe.

Complete specifications accepted Dec. 28, 1906.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing herein shall prevent the registration of any mark used by the applicant or his predecessors, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessors from whom he derived title for 10 years next preceding the passage of this act."

TRADE CONDITIONS.

Local jewelers are very well pleased with the condition of the after-holiday business. Most of them have been kept quite busy on repair work, and much engraving of holiday presents has been coming in.

E. L. Rinbenback was one of the mounted aides in the inauguration day parade.

The leaders of the gang convicted of robbing various stores in this city and vicinity, including the store of J. A. Hensel, in Lytens, where several hundred dollars' worth of jewelry was stolen, received stiff sentences in court last week. Isaac Bowman was given eight years in the Eastern Penitentiary, the others going to the Reformatory.

Jewelers of the State favor the bill introduced in the Legislature last week by Representative Thomas to abolish the mercantile tax. Following the introduction of this bill, Representative Creasy has introduced a resolution calling upon the Auditor-General to furnish a detailed account of the amount of mercantile tax collected in the last two years, together with a detailed statement of the cost of collection. There is general objection to this taxation.

Ex-Governor Pennypacker was the first retiring Governor of the State who received a handsome testimonial from his subordi-

nates in office. The gift, which consisted of two massive light-colored mahogany chests filled with \$1,500 worth of specially designed silver, was entirely unexpected by the retiring Governor, who made an eloquent speech of thanks. Each of the more than 200 pieces, from elaborate tray to tiny coffee spoon, was marked with the Pennypacker coat-of-arms, the silver being made by J. E. Caldwell & Co., Philadelphia. Attorney-General Carson made the presentation speech.

The following firms, which will deal in jewelry, cut glass, etc., have been chartered at the State Department since Jan. 1: Penn Smelting & Refining Works, Philadelphia, capital, \$25,000; directors, H. S. Glazier, B. K. Paullin, L. L. Wise, Chas. H. Barrett and Jas. R. Gregg; People's Supply Co., Parker Armstrong Co.; capital \$7,500; directors, Jno. Flynn, Frank L. Flynn and Frank H. Bower; Mahoning Supply Co., of Punxsutawney; capital, \$100,000; directors, D. H. McIntyre, W. S. Davenport and Jno. Nichol; Unity Mercantile Co., Pittsburg; capital, \$33,000; directors, Herman Griffin, Hiram Harris and Wm. Harris; Arbogast-Brock Glass Co., Pittsburg; capital, \$300,000; directors, H. L. Collins, Jno. J. Arbogast, Lewis S. Brock, F. C. Park and W. H. Bailey; Jefferson Supply Co., Punxsutawney; capital, \$90,000; directors, D. H. McIntyre, W. S. Davenport and John Nichol.

Pittsburg.

F. F. Lang, of Gillespie Bros., has returned from Cambridge Springs, whither he had gone on account of his illness.

Among the out-of-town merchants visiting Pittsburg last week were: E. H. Schafer, Beaver Falls; E. F. Price, Homestead, and H. S. Johnston, Apollo.

C. W. Morgan, 4409 Butler St., is building a repairing department in his store. He has constructed a neat balcony in the rear of the room on which it will be located.

Edward F. Stewart, 4303 Butler St., recently placed a large electric sign over the front door of his store, showing his name in large letters. It is attracting considerable attention.

William Walker, better known as "Diamond Bill," who was convicted in criminal court several weeks ago, called last week for sentence and sent to jail for one year. Walker was known to nearly all Pittsburg jewelers.

The local rivers are on a rampage, and some of the jewelers in the downtown district were frightened last week when a flood stage of water was reached. There was a hurried removal of stock from cellars, but no serious damage was done, because the rivers did not reach as high as was expected.

The Merchants and Manufacturers' Association will hold its annual banquet at the Hotel Schenley Feb. 12, Lincoln's Birthday. Among the speakers will be Gov. Edwin S. Stuart, of Pennsylvania; Gov. Warfield, of Maryland; Congressman Champ Clark, of Missouri, and State Senator Elliott Rogers, who will be the toastmaster. A large number of jewelers generally attend these banquets, and this year will prove no exception to the rule.

Mr. Meader, who bought out the bankrupt stock of Joseph M. Gootfursch, will open a store in Scottdale. He was formerly employed there as a watchmaker by F. E. Leitzell and is now going into business for himself. It has been learned that Gootfursch owed Pittsburg creditors \$3,462, this amount, it is said, being divided among less than a dozen Pittsburg houses. There were a number of eastern creditors, but what he owed them is not known.

Nothing has been learned as to the whereabouts of Joseph M. Gootfursch, who disappeared several weeks ago, taking most of his valuable jewelry stock with him. It was learned that before he went away some of his creditors were arranging to file papers in involuntary bankruptcy, and a meeting was held in the office of Attorneys Alpern & Seder to discuss the matter. It was then arranged that the Pittsburg Jewelry Mfg. Co. issue an execution which would force the closing of his store and bring matters to a head. In the meantime, however, Gootfursch went away, deserting his family and taking most of his stock with him, and creditors realized but little when the execution was finally issued and the stock remaining in the store was sold.

The establishment of a jewelers' credit association in Pittsburg is being strongly favored by a number of Pittsburg wholesalers, who believe that there is great necessity for an organization of this character. During the last month or two there have been several questionable business failures, and many dealers have come to the conclusion that a credit association is necessary for their protection. The subject was discussed by a dozen merchants several days ago in the office of Attorneys Alpern & Seder. J. T. Montgomery, manager of M. A. Mead & Co.'s branch in this city, took the matter up several days ago with W. H. Williams, of the Merchants & Manufacturers' Association. His idea is to have a credit association run under the supervision of James W. Wardrop, the manager of this association. The Merchants & Manufacturers' Association will enlarge its present quarters this year, and it is stated that arrangements could be made whereby the jewelers' organization could have one or more rooms adjoining these headquarters, where a clerk or two would be sufficient to look after the organization's interest with one of the organization's officers as the guiding head. A number of local wholesalers who have been approached on the subject are favorable to the plan.

Savannah, Ga.

Frank Werm was recently appointed a member of the Benefit Committee of the German Friendly Society.

Leon L. Desbouillons, son of A. L. Desbouillons, was married last week to Miss Ruby Lombard at Augusta, Ga.

Tom Hill, negro porter in the store of J. G. Mackey at Valdosta, Ga., was arrested Jan. 17, charged with the theft of a diamond ring valued at \$200. The ring, a suit of clothing, a quantity of gold collar buttons and other articles of value, have been recovered. It is believed the negro stole a number of other valuable articles which disappeared during the holidays.

WALTHAM WATCHES

To correct a misunderstanding which apparently exists in the trade, it should be noted that 16 Size Vanguard 23 Jeweled Movements are made in Open Face Lever Setting only, and are not made in Hunting.

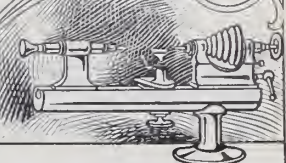

16 Size Vanguard 19 Jeweled Movements are made in Hunting Pendant Setting; in Open Face Pendant Setting and in Open Face, Lever Setting.

WALTHAM WATCH COMPANY

WALTHAM, MASS.

THE HOROLOGICAL REVIEW

Peculiar Features of Some Unique Mainsprings

Translated for THE JEWELERS' CIRCULAR-WEEKLY from *Almanach de l'Horlogerie et de la Bijouterie*

It is not very recently that the attempt to contrive a mainspring for portable timepieces other than that furnished by a spring enclosed in a barrel has been undertaken. Every one knows that the action of a spring not only diminishes in intensity, but that it varies constantly, in consequence of the friction of the coils with each other and against the bottom and cover of the barrel.

It is true that present escapements and regulators are not much influenced by these

that in its construction the friction of the spring against the parts enclosing it is probably greater than with the ordinary spring.

The subjoined illustrations, representing

FIG. 1.

FIG. 2.

both sides of the movement, are sufficient for explaining the mechanism. In Fig. 2 it is seen that the mainspring, which is a long spiral, is lodged within the rim of the case around the movement. It is represented as almost entirely run down. One of the extremities, *r*, is fixed to the inside stem of the pendant, and the other, *r'*, to a lever *B*, pivoting at the center, *b*, of the movement.

For winding the watch—that is, for tightening the spring—it is sufficient to press the lever *B* in the direction of the arrow, *s*, until it reaches the stop, *u*; that is, until nearly a half turn has been given to it. The winding is probably accomplished by means of a piece adjusted against the periphery of the rim.

While the lever *B* is turning, a click that it carries at *D*, slides over the teeth of a ratchet pivoting at the center of the movement, and fixed on the same arbor as another wheel, *A*. When the winding is ended, the spiral spring tends to push back the lever *B*, and the click then works the ratchet, and consequently the wheel *A*. This

communicates its rotation, while multiplying it, to the wheel *M*, by the intermediation of the pinion *a* (Fig. 2).

On the other side of the movement may be seen the succession of wheels and pinions transmitting the motive force to the escapement from the wheel *M*, which probably gives one revolution in eight hours, like the barrel of an ordinary watch. The escapement is lever, with visible balance. The action of the spiral spring may also be utilized in another direction; that is, it may be stretched for energizing it. The inventor is reserved on this other application.

In Fig. 3 we observe a different timepiece, in which the spiral spring is utilized in the same manner. This watch is older, but appears to be more advanced than the one we have described, for it is a stem-winder.

FIG. 3.

The spiral spring is also lodged within the rim of the case. The large center wheel, *d*, bearing a set of crown teeth, is actuated by a pinion fitted to the extremity of the winding stem.

An arm furnished with stud, *c*, fixed to the circumference of this wheel, acts on the extremity of the spiral spring for stretching it, when the wheel is turned, on actuating the knob.

As in the preceding timepiece, a click-work prevents the spring from being relaxed except gradually, while actuating a wheel, of which the rotation is transmitted through other wheels to the escapement.

Another system of mainspring is certainly original, whatever may be said of it in other respects. Its originality may be a

irregularities; the purpose aimed at in the adoption of the different systems of springs is rather the simplification of the mechanism.

We previously mentioned an attempt of this kind. The Grasset watch, so called from the name of the inventor, works by means of a free spring rolled around the winding stem. This system is simple, and we think that it presents greater regularity of tension than the spring currently employed. As this watch continues to be manufactured, it has probably been found valuable.

Now as regards the watch patented by M. Silbermann, of La Chaux-de-Fonds, not having yet had the opportunity of seeing it, we can only give the description, remarking

Wise Dealers Set Store by the ELGIN

The wide-awake dealer knows the value of a good stock of Elgin Watches. He knows that they are a good criterion by which to have the public judge his store.

He knows that Elgin customers are satisfied customers, and that satisfied customers are the very foundation of successful business. The

San Francisco Office, 704 Market St.

little venturesome. It is always interesting to note inventions of this kind, and this one may at times be useful.

The mainspring, as may be seen in Fig. 4, consists of a round steel wire curved in the form of an open ring. The two extremities are fixed at 6 and at 7 to a rack R, of which the pivoting point is at 5, and which is held by the bridge P. To wind the watch—that is, to arm the spring—the rack is drawn by the button H in the direction indicated

FIG. 4.

by the arrow R. The figure shows us the spring completely energized.

The teeth of the rack engage with a pinion that pivots at *t*; on the same arbor are a ratchet, Q, and a large gearing wheel, N. Fig. 5 presents more clearly the arrangement of these pieces. The ratchet Q is fixed separately to the arbor. The two other mobiles are independent and turn with the arbor only in a single direction. The communication between the wheel N and the

FIG. 5.

ratchet Q is accomplished by means of a spring placed between the two and not visible in the illustration. The spring acts as an auxiliary, in order that the progress of the watch should not be interrupted while the rack is energized.

When the rack is drawn in the direction of the arrow R, the pinion *r* turns in the direction indicated by the arrow 9. It turns alone, the ratchet being retained by the small click *g*. While the watch is going, this pinion is actuated in the opposite direction by the rack. It is then necessary that the ratchet Q and the wheel N should be involved in this movement, which result is obtained in the following way:

To the pinion *r* is fixed a small disk, *e*, on the border of which is two small blades,

a, a'. When the pinions turns in the direction 9, these pieces, which are lodged in a cavity of the ratchet, slide against the edge of this cavity. When the movement is accomplished in the opposite direction, these pieces of which the extremity is cut in the form of a chisel, strike against the border of the cavity and actuate the ratchet. This, by the intermediation of the auxiliary spring, communicates its movement to the tooth at wheel N; the rotation is transmitted to the escapement and to the balance by a series of appropriate gearing.

We shall have occasion to describe hereafter other watches, actuated by a mainspring, of different character from that usually employed. But the spiral enclosed in a barrel will probably never be dethroned by these new systems. It is of interest, however, to study the attempts that are made to replace it.

Watch Lost for a Century Recovered.

A GOLD watch lost by the Polk family many years ago was recovered recently in Springfield, Mo. The watch was owned by Dr. William J. Polk, an uncle of James K. Polk, former President of the United States. He lost it during the war. A jeweler in Springfield, Mo., bought a gold watch recently from a stranger. The gold in it was worth \$35, and that was the price the jeweler paid for it. Upon the inside of the case was engraved:

A legacy to
Dr. William J. Polk
from
Mrs. Sarah J. Polk, 1843.

From Dr. Polk
to Allen J. Polk, 1860.

A card in the back of the watch showed that it had been repaired by Thomas Gowdy, of Nashville, Tenn., in December, 1852. Under this card was a circular piece of white silk which to one of a romantic turn voiced some tender sentiment of the past. A remarkable thing about this old and well-worn timepiece is that it still runs.

The attention of Major Dorsey Berry (who is one of the Polk family on his mother's side) was called to the watch, and he immediately placed himself in communication with Marshal Mayes, of Nashville, Tenn. In reply he received a letter from a direct descendant of Dr. William J. Polk, expressing his appreciation of his kindness and marveling over the strange recovery of the watch. Its disappearance had always been a mystery, though the supposition was that it had been stolen during the war. In the letter was a check covering the jeweler's price and a request that he express it to a granddaughter of Dr. William J. Polk, which was complied with.

W. K. Vanderslice's old street clock in San Francisco, Cal., which had become something of a landmark in front of the store on Sutter St., before the fire, was recently repaired. New works were installed, and the clock set up in front of the Van Ness Ave. store. With the exception of the great clock in the Ferry building, two faces of which are now going, it is the first electric-lighted clock in that city since the fire.

Two Old English Clocks.

CURIOUS CLOCK BY WILLIAM CLEMENT.

TWO views are shown herewith of a curious clock by William Clement. The case is in oak, veneered and paneled in ebony, about six feet three inches high.

The dial is square brass, eight inches.

The pendulum is the full length of the case. The hours and quarters are curiously contrived to be struck by one train.

Illustrated herewith is an interesting clock made by Edward East and described by Percy Webster, London, in the *British Horological Journal*. The dial is 10½ inches square, matted all over by hand, with the exception of the space just between the two winding holes, in which is engraved the maker's name, Edwardus East, Londini, and a small piece of the center, in which is engraved in conventional style (English Rose), the matting being finished about one-eighth inch from the edge all round. The circle is 9¾ inches in diameter and 1½ inches wide, with quarter marks engraved upon inside edge, and ordinary minutes engraved outside; these are numbered every five minutes, so—60, 5, 10, 15.

The frames are 8¾ inches long by 7¼ inches high, and held together by five pillars nicely turned, each 2¾ inches long, two being placed at the top, one at each corner and three at bottom, and rivetted in front plate instead of back as usual. The escapement is a verge, and the trains are in the case of the going side the same as usual, but the usual center arbor is left coming through the front frame with a squared end, upon which is keyed a wheel which drives the motion work of three wheels in the ordinary way.

TALL CLOCK BY W. CLEMENT.

The wheels are large and well cut, having been done by hand, the diameter of the main wheel in going side being 3¾ inches, and in striking side 5½ inches. The barrels are very small, being only 1½ inches in diameter and of solid brass, and 24 turns upon each. No shoulders are turned upon the barrels, and they both rub upon the frames the whole of their diameters, 1½ inches each.

In the striking train, which consists of only main, locking, warning and fly wheels, the ordinary pin wheel is not used, but pins

to the number of 54 are placed round main wheel instead, the arbor being carried through frames with a squared end, and a wheel of 28 teeth driven on to drive locking plate outside back frame

The hammer strikes inwards in a manner similar to a 30-hour lantern, both the hammer and the bell being as large as those generally used. The bell is placed in a vertical position, and nuted against a wrought iron stand, which is screwed on back plate.

The number of trains are: Striking side, main wheel, 162 teeth, 54 pins; locking wheel, two locking faces, 84 teeth, six leaved pinion; warning wheel, 72 teeth, six leaved pinion; fly wheel, six leaved pinion.

Going side—Main wheel, 86 teeth; center wheel, 80 teeth, 10 leaved pinion; centrate

SIDE VIEW OF CLOCK MADE BY CLEMENTS.

wheel, 58 teeth, six leaved pinion; verge scape wheel, 25 teeth, six leaved pinion.

Horological Notes.

THE clock dial to be erected in the proposed tower on the Metropolitan Life building, New York, will look down upon the diminutive pedestrian from a height of 346 feet above the sidewalk. In order to tell the time, Diana, on top of the Madison Square Garden tower, will have to look aloft, for she is only 332 feet above the sidewalk.

*

What are supposed to be the largest clock dials in the world are the four located in the famous clock in the tower of the Church of St. Rombaut, at Mechlin. There is a dial located on each side of the square tower and their extreme diameter is nearly 37½ feet. The figures indicating the hours are nearly 6½ feet high, while the hands have a length of nearly 12 feet.

While handling a ladle containing molten gold last week Edward L. Allen, a jeweler of Trinidad, Colo., sustained several severe burns. It is feared that the amputation of one of his fingers will be necessary.

Watch-case Restrictions in Great Britain.

ADVICES from Consul Albert Halstead, of Birmingham, state that hereafter watches of foreign manufacture whose cases are gold or silver must be assayed, stamped, and marked before being offered for sale in the United Kingdom. The consul writes:

"This requirement, which has heretofore applied only to British watches, follows

CLOCK MADE BY EDWARD EAST.

from a recent decision of the court of appeal of the British Supreme Court of Judicature. The case may be carried to the House of Lords, but until their decision it stands as the law of the United Kingdom. The decision removes a long-continuing ground of complaint of British watch and watch case manufacturers, that while their gold or silver watch cases, even when completed by the works or movements, had to be hall-marked that was not required of completed watches of foreign manufacture, and was only applied to foreign gold or silver cases that did not contain the movements.

"The decision is of great importance to American watch manufacturers and may lessen the exportation of their products to the United Kingdom, because watch cases, in order to be hall-marked must be sent over in the rough to be assayed, stamped,

and marked by the Goldsmiths' Company in London, the mint in Birmingham, or any other officially recognized hall-marking place in the United Kingdom. After being hall-marked the watch cases must be returned to the United States to be polished. The case concerned watches imported from Switzerland, but the decision affects all foreign watches.

"To the jewelers of this district the decision is a boon. Some watch cases are made in Birmingham, but not a great number, while in Coventry, about 18 miles away, many are manufactured, and in years past, before the heavy competition of Swiss and American watches, probably more watches and watch cases were made there. British manufacturers declare it was unjust that, as a result of what they considered discrimination against the domestic product, American, Swiss, and other makers could sell a gold watch which was partly gold and partly base metal. They claim that many a man thinks to-day he has a solid gold watch, bought at auction, which though it has a gold outer case has an inner case of base metal.

"One Birmingham manufacturer speaking to a newspaper representative said of the decision: 'If it is upheld, as it is hoped it will be, foreign rubbish brought here will be stopped. The Swiss will have to stamp their cases indicating their quality, whether 9, 15, or 18 karat, and if there are any metal domes they will have to be described as such. In addition to the making of gold outer cases and metal inner cases without inscription, they have been allowed to stamp cases 9, 15, or 18 karat, but either of these qualities would not assay to anything near its mark. If I were to make silver watches now, and if the cases did not assay to the value of the hall-mark, they would give me six months' hard labor, whereas such things have been permissible to foreigners for years.'

"The law enacted at the first session of our present Congress, as I understand it, imposes a heavy penalty upon anyone who sells as sterling, or as a certain fineness of gold, any article that will not upon assay reach that fineness. As a result, any piece of American jewelry marked as being of a certain fineness of silver or gold is now of that actual fineness. In these circumstances it might be possible for the United States to require that any piece of foreign plate must be assayed and proved in the United States to be of the exact fineness claimed or refused admission to the country. In other words, if an American article marked as being of a certain fineness of gold or silver is not to be accepted as such, it would seem fair for the United States to cast the same doubt upon similar articles made of gold and silver that are imported."

The interior of the jewelry store of J. W. Cohen, on Penn St., between 5th and 6th Sts., Reading, Pa., is being renovated. The office, which was formerly in the center of the establishment, will be moved to the rear of the building, while the office of the cashier and bookkeeping force will be on the second floor of the building. The private office will be located on the ground floor.

The TEST of a Good Watch

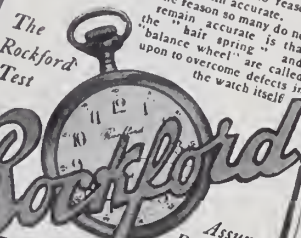

McCLURE'S MAGAZINE

How Can we Know a Good Watch?

begins new because perhaps it more at band ending

BY the time it keeps. Not while it is new, but for the years it must serve you. The common fault in watches is that they become inaccurate. There is no reason why a watch should not remain accurate. The reason so many do not remain accurate is that the "hair spring" and "balance wheel" are called upon to overcome defects in the watch itself.

The Rockford Test

Assures Permanent Accuracy

Time for a Lifetime

The Rockford Test bars any watch from being a hair spring—the price that will be perfect and then

EVERYBODY'S MAGAZINE

The Rockford Watch Test

EVERY Rockford Watch is run without a hairspring before it gets one. Because that proves perfect parts accurately put together. And when a watch that has passed this Rockford Test is properly "adjusted," it will remain an accurate keeper.

proper purpose of "adjusting" is to correct the "outside natural conditions" such as the "narrowness" of the hairspring, the "position" of the hairspring, the "balance" of the watch, and the "friction" caused by heat and cold.

COLLIER'S

Proving Watch Perfection

TWO things cause inaccurate time-keeping in a watch, broadly speaking: Defects in the watch itself and outside natural causes, such as the effect on a watch of the constantly changing position in which it is carried and the expansion and contraction caused by heat and cold.

OPTICAL DEPARTMENT

Should Copy of Prescription Be Given?

ONE of the most delicate problems that presents itself to the optometrist lies in those cases wherein he is asked for a copy of the record of the lenses prescribed. Heretofore it has been customary to make no specific charge for examination, and under those conditions it was not so difficult to refuse, but now that most of the higher grade optometrists make a charge for examination the problem assumes a more complex form.

If one makes a free examination all that could be reasonably demanded of him is the statement as to whether or not any given case needed glasses. If a charge be made for an examination it seems reasonable to believe that the patient is entitled to a record of the lenses required, whether or not the glasses are purchased at the time.

The above touch upon the legal aspects of the case, which, however, are of far less importance than are the "good business" aspects. When, a few years ago, the problem first attracted my attention, I did not think much about whether I *had* to or did not *have* to give a copy of my record, but thought principally of whether it were or were not better *policy* to give the copy when asked to do so.

The gist of the arguments against giving a copy is that the patient is thus enabled to go shopping and may find some one who will quote a slightly lower figure than yours, and who may, therefore, get the profit while you did the work; furthermore, someone else may make up the lenses from your record, and, while taking all the profit, assume none of the responsibility. On the other hand, if you flatly refuse to give a copy it provokes the patient's anger, and you surely lose the profit in this case, whereas in the other he might come back to you for the glasses even after shopping about if you have made a good impression and quoted reasonable prices. In fact, does it not tend to arouse suspicion the moment you refuse to give a copy of the prescription?

I determined to study this problem upon a practical basis, and my experience showed the following results: A vast majority of my patients never asked for a copy, and in the few instances where a copy was asked for I gave it, not reluctantly, but as though it were the greatest pleasure in the world. I warned the patient of the danger of using inferior lenses, and asked them to obtain quotations from men who stood as high as or higher in the profession than myself, because it would not be fair to com-

pare prices alone without taking into consideration the quality of the professional services, the mechanical workmanship, and the material used. I went further and told how natural it would be for a competitor to cut the price upon presentation of one of my prescriptions.

Finally I urged that unless a material saving could be made it would afford better results to let me make the lenses, because I, having made the examination, understood their case better than could the man who just looked at a few figures written on a piece of paper. Argument along this line rang true, and I cannot say that I lost anything worth speaking of by giving a copy of the record when asked to.

It may be safely recommended as good business policy to give the copy of prescription when requested, and once you have decided to give it don't give it in a reluctant, disagreeable manner, but in a willing, gentlemanly way. T. C. B.

Eyesight of Engineers.

A RECENT order of the Chicago, Burlington & Quincy Railroad requires locomotive engineers on fast passenger trains to have such acuteness of vision as would enable them to see distinctly distant signals without the use of glasses. Regarding this, Second Vice-President Willard says, as quoted in *The Railway World*:

"A train running 60 miles an hour passes over more than 80 feet of distance in one second; at 70 miles per hour over more than 100 feet per second, and should it happen, as it doubtless might, that an engineer in charge of such a train running at such a speed was required to remove his spectacles to wipe the steam or mist from them, or should they become broken or fall off, and he be required to take time to get another pair to put on, for each second of time he was so occupied his train would be running at a high speed and it might pass signals or obstructions which the failure on his part to notice might be fatal; and because of this particular fact the company felt impelled, in the interest of safety only, to take the position it did take.

"The Burlington Co. has in its employ over 1,600 engineers. Of this number approximately 340 are in charge of passenger trains. Probably not more than 40 of the passenger engineers would be affected by this order, and, as a matter of fact, only two men were actually changed, and in each case the test demonstrated clearly that it would be better and safer for them and for the public to put them on runs of less severe requirements."

A Case of Hypermetropia of 21 Diopters Simulating Myopia.

(By EDWARD STIEREN, M.D., Pittsburg, Pa., in the *Ophthalmic Record*.)

JOHN W., age 15, an inmate of the Institute for Feeble-minded at Polk, Pa. was examined by me at the request of Dr. C. H. Henninger, assistant superintendent of the institution.

The patient, a middle-grade imbecile, attracts one's attention—even among a number of inmates with more or less pronounced physical stigmata—by his odd appearance, due to an almost entirely bald head, an enormously developed frontal eminence, huge ears and a constant narrowing of the palpebral fissure of one eye only.

His supraorbital ridges are only partially developed, extending but half-way across the orbits. The outer rim of each orbit recedes sharply and, the orbits being shallow, the eyeballs have the appearance of being unduly prominent. The right palpebral fissure measures 11 millimeters from canthus to canthus, the left 24 millimeters.

The right eye is microphthalmic and possesses apparently no light perception. The cornea measures but six millimeters in diameter; the anterior chamber is deep and the pupil irresponsive to atropin. An indistinct view of the fundus can be obtained showing extensive choroidal and retinal degeneration.

The left cornea measures 10 millimeters at its base. The anterior chamber is shallow and the pupil dilates irregularly under atropin, due to posterior synechiae at the temporal side. The ophthalmoscope shows 21 diopters of hypermetropia and reveals numerous small areas of choroidal degeneration, none, fortunately, in the macular region. V. = 2/200, with + 21 D. Sph. V. = 4/50.

The patient can read all ordinary type at from three to five inches from his eye with this correction, but is also able to read the same type at the same distance without glasses.

A photograph showed the characteristic narrowing of the palpebral fissure of the myope in this highly hyperopic patient. The blind right eye remains open in a natural state.

The *Globe News* for January, issued by the *Globe Optical Co.*, Boston, Mass., appears in gray cover pages containing a greeting in the reproduced handwriting of H. G. Barber, printed in brown. The journal contains 16 pages, illustrated by half a dozen clean-cut half-tones showing various views of the concern's establishment.

Optical Department.

The Non-Operative Treatment of Strabismus.

(By JOS. S. LICHTENBERG, M.D., in the *Medical Brief*.)

STIMULATED by a series of successful cases in the treatment of strabismus by non-operative methods, and by several recent publications by Jackson, Wurdeman, Worth and others, I deem it best that this short sketch should bring the attention of the profession to the fact that this ocular deformity is, in many instances, amenable to cure without surgical interference.

In the present day furor for operations, it is the tendency to rush into surgery to the neglect of other methods. True conservatism may sometimes demand immediate and timely surgery, but in the condition under consideration in the majority of instances, in fact nearly all instances, the need of haste is conspicuous by its absence.

As a rule, I have had no difficulty with my patients, after laying the facts before them, to gain consent to use the non-operative methods.

To successfully correct the deviation of the eyes by non-surgical measures, I wish to emphasize the great importance of early treatment. Worth in his recent book cites two cases of infants which he had under his care at the early age of one year and five months. In both of these cases glasses were worn, and other methods used with success. Worth also reports one case at the extremely early age of five months. So that the advice commonly given by the family physician to wait until the child is older, he may outgrow it, etc., is wrong. Many cases which could have been cured by non-operative measures require surgical intervention later, and then only a cosmetic result achieved.

The present aim in the treatment of strabismus, by any method, is not only the cosmetic result, but to restore binocular vision. This is always the case where non-operative measures are successful, which cannot be said of the operative methods, because conditions have been established by waiting, which render this impossible.

As a rule, when strabismus has become established for any length of time, there is a great reduction of vision in the non-fixing eye, and this is known as amblyopia exanopsia. The exact pathology of this condition is not clearly understood, but the clinical fact remains that these eyes do not recover their visual acuity under any treatment. To this general rule, however, I have found many exceptions, especially in young subjects. It is the amblyopia combined with the loss of binocular vision that early treatment prevents, so it is positive that any case should receive proper attention as soon as the earliest symptoms are noticed.

The non-operative methods of treatment may be classified as follows: First, optical or the exact correction of errors of refraction. Second, the occlusive bandage. Third, the suspension of the accommodation of the fixing eye by a reliable cycloplegic. Fourth, fusion training or orthoptic exercises. Fifth, bar reading.

The exact correction of refraction errors is of first importance. The rule is that convergent cases are associated with hypermetropia, and divergent cases with myopia, so that it appeals to any logical mind that the correction of these errors is rational. The ciliary muscle must be under the control of a reliable cycloplegic, and there is none better than atropia. As a rule I order a one per cent. solution dropped into the eyes three times daily for three days, and then examine or test the refraction. In young children the strength of the solution must be modified. In young children, also, retinoscopy is the method *par excellence* in estimating the refraction. I know that I can measure the error within .25 D, so that we have in this an accurate method in which the observer sees

THE WORTH AMBLYSCOPE.

for himself, and is independent of the patient. In older subjects the results by retinoscopy are proved by subjective methods as a matter of accuracy in the routine of adjusting glasses. The glasses prescribed must be a full correction or very nearly so.

The occlusion bandage is applied over the fixing eye for variable periods, from a few hours daily to several days. It consists simply of a pad of gauze and cotton, held in place by a bandage or strips of plaster. The object of the bandage is to force the use of the non-fixing eye, thus exercising it, so to speak, and, in many instances, the vision comes up and the amblyopia exanopsia prevented. With the same object in view the suspension of accommodation in the fixing eye is next used.

The cycloplegic, almost always atropin, must be applied to the fixing or better eye only. It is a fact that, in many cases the eyes remain straight during the time the accommodation is suspended in both eyes, but the old habit of using one eye only is kept up. If the atropin is applied to the fixing eye only, this forces the use of the non-fixing or worse eye, especially in near vision, thus again forcing its use. After several months of this treatment the vision of the non-fixing eye usually comes up, and then we test by the usual methods, such as a red glass held over one eye, prisms, etc., and try to elicit a diplopia. If the diplopia is elicited, we know that both eyes are being used simultaneously, and then we are ready to use the fusion exercises.

For this purpose we have the orthoptic picture in one form or another. These consist of two halves, which, when combined, make the complete picture. For the purpose of having the picture in the

act of binocular vision, stereoscopes are used, and there have been invented by Oliver and others adjustable ones, but I have found the ordinary cheap hand stereoscope to answer all purposes. However, the best instrument as yet devised, is the amblyscope of Worth (see illustration).

This instrument, to follow Worth's description, consists of two halves joined by a hinge. Each half is made up of a short tube joined to a longer tube at an angle of 120 degrees. These tubes are 1½ inches in diameter. At the elbow of each tube is a flat oval piece, on the inside of which is fitted a mirror. At the end of each of the long tubes is fitted carriers to hold the object slides, which are again two halves or portions of a complete picture.

At the ocular end of the instrument are two lenses of five inches focal length, the distance of the reflected image, and serves to render the rays of light emanating from the pictures at the other end of the tubes parallel. An adjustable arc connects the two tubes so that their angle of separation may be varied or adjusted to each case. The advantage of this instrument is that the illumination of the two halves of the picture can be varied. By giving the half corresponding to the eye that has the lowest visual acuteness a stronger illumination, and *vice versa*, it is stimulated more than the fellow eye and encouraged in its use.

By exercising the eyes at stated intervals with the amblyscope at the office, and by using the stereoscope with the proper pictures at home, in favorable cases the case goes on to a more or less rapid termination.

Bar reading consists of a strip of metal or board, about one-half to one inch wide, bent so as to hold the strip a few inches above the level of the reading matter. This is placed over the middle of the page, vertically, the result being that to see a line of print as a continuous and unbroken one, both eyes must be used in the act of binocular vision. This can be used only in older children, and in my hands has been disappointing.

In conclusion, I wish to call attention to these facts:

1. The advice usually given parents in cases of strabismus occurring in young children, is to wait, that the child may outgrow it, etc. This is wrong and pernicious.
2. Treatment should be instituted at the earliest notice of the condition.
3. In every case non-operative means should be tried, if possible, for a sufficient length of time before resorting to surgery.

The California Optical Co.'s branch store at Oakland, Cal., which was opened last October, is now better equipped and fitted up than was the company's old Kearney St. store in San Francisco. C. L. Hogue is resident manager of the Oakland branch. All the old employes are still with the concern.

Wm. Gruber, optometrist and watchmaker, San Francisco, Cal., who had been out of business since the fire, has opened a shop at 262 Van Ness Ave.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Original Window Display for St. Valentine's Day

Drawn Expressly for The Jewelers' Circular-Weekly.

VALENTINE'S DAY offers any number of opportunities for effective window displays to the retail jeweler, who has a chance to manifest his enterprise and stimu-

day are no longer confined to valentines, although the latter are still used very extensively. In this country, where it is estimated the daily increase of wealth amounts

of the stock which he carries, cannot make his exhibit as spacious or intricate as a large department store, but he can render it nonetheless attractive, and moreover can represent more actual wealth in a 5 x 10 foot window than can the department store in a space 10 times as large. Daintiness and distinctiveness should mark the jeweler's window and the stock selected should be seasonable and "different" from the department store's, both in design and in quality. Heart-shaped articles naturally should be conspicu-

A CHARACTERISTIC ST. VALENTINE'S DAY WINDOW DISPLAY.

late his trade as effectively as many other merchants. As noted in an article entitled "Early Suggestions for St. Valentine's Day Advertising," published in the retail advertising department, last week, the gifts which are passed from one to the other on that

to \$10,000,000 we can well afford to give something more substantial than a piece of fancifully designed paper, and consequently the stock of the up-to-date jeweler is in demand.

The average jeweler, owing to the nature

ous on this occasion. At this time lovers in the early clutches of Cupid exchange gifts, the groom remembers his bride, and the prospective bride's happiness is sealed by an engagement gift. All this sentiment operates to enliven the jeweler's business.

Storekeeping Department.

The original design illustrated herewith allows the jeweler to display seasonal articles in an attractive manner. Locketts are suspended from an immense Cupid's bow in the background, which, with the aid of a framework, can be covered with white crepe paper or silk. In the central heart in the foreground is placed an especially showy pendant. Around this heart form a larger one, by means of cards with jewelry attached. At the sides arrange the smaller hearts, which are also silk-covered frames. The window trimmer can fill in the background as he sees fit.

St. Valentine's Day, which falls on Feb. 14, is intended to commemorate the martyrdom of St. Valentinus, who was decapitated in 270 A. D., in the time of the Claudian persecution.

The custom of sending valentines, sentimental and comic in character, is a most ancient one, some saying that on this day the birds select their mates, while others assert that the custom began with the Roman Lupercalia. The northern pagans of ancient Europe are also said to have observed the custom of transmitting amorous notes and love messages.

How the Jeweler Can Meet the Competition of the Mail-Order House.

(Continued from issue of Jan. 9.)

EACH dealer can then feel perfectly safe in quoting prices and giving full descriptions; and, as he will have many new things to describe, his advertisements should be changed every issue, and could be made very interesting.

Suppose it be also agreed by all these retailers that each one shall run the following line in each advertisement: "You can buy anything in ———." This little line of type will not take up much of your advertising space, and the fact that it appears in all the advertisements of all the dealers will attract general attention, and, as a matter of suggestion, you will find that it will be only a short time when everyone in your section of the country will be talking the same way to their neighbors.

This is the kind of advertising which brings you business. When your brother merchants wake up to the idea that there is much they can do by pulling together that is impossible for any one of them to do alone, and that harmony among the merchants means prosperity in the town, they will surely prosper. Besides holding the money at home, instead of letting it go to the mail-order houses, you will also find that this kind of an advertising campaign will enlarge your trading territory.

If you are catering to the trade of country people as well as town folks, you will find them anxious to buy where there is plenty of room for selection. They drive for miles to reach the larger cities, so they can look over things before spending their money, and you can readily see what effect such an advertising campaign would have on them. When they once become convinced that your town can make its claim good by showing a big variety and full

assortment, they will feel that it is a trading point which it is safe to spend some time to reach, being sure to get what they want. It will keep a town hustling to hold this reputation, but that hustling all means money-making.

In your town are there not a few men who were formerly engaged in your line of business, but who are now retired? The writer has never met a retired tradesman who was not a good customer for the home retailer. He always seems perfectly willing to pay the regular retail prices, in spite of the fact that he has a good idea of what the goods cost at wholesale.

In casting around for a reason why old merchants make especially good customers, it strikes me that the best and most plausible cause is the very fact that they know what the goods cost at wholesale, and also what it costs to sell them. They know, from personal experience, that you cannot afford to do business on a smaller margin of profit than you are now charging.

If this holds good with the old merchant, does it also work with those who have never sold goods in your line? Probably not, as they do not realize what it costs you to sell the goods; that is a question for you to decide for yourself. But you can rest assured that everyone not selling your particular line of goods is firmly convinced that you are making a profit of from 50 to 100 per cent. They have no particular reason to think so, their own business experience does not teach them that such profits are possible, but they delude themselves into the belief that their own particular line of business is conducted upon a much closer margin of profit than any other. You probably have this very idea about the business of retailers in other lines, and, if so, it is time for you to get your mind straightened out. This remark is made every day: "Oh, I could not afford to pay that rent; my line of business will not stand it. Some ——— store will get that location." The store referred to is always engaged in some line with which the retailer doing the talking is not well acquainted.

If merchants talk about the profits in other lines in this way, what can we expect from the consumer? He hears one merchant make such a remark about another, and probably the next day hears the same thing from the opposite source. What could you expect him to think, except that both merchants are making exorbitant profits and are trying to mislead him as to the profits they really do make?

Let us use our own judgment about showing an occasional invoice to a customer, so he will know we are not making ourselves rich by single sales, but let us also be sure to never again make a remark about a brother retailer which would indicate that he is probably making a very large profit, when we do not know it to be positively the fact. Facts cannot injure either you or the other retailers of your town very much, but statements made on the impulse of the moment, and without fact as a foundation, are what have built up the belief throughout the country that retail profits are enormous, and your neighbors think it only takes a small percentage of their trade to make you a handsome income. And you have no right to feel hurt if they throw half their trade

to mail-order houses. They figure it this way: "Why, he takes in \$50 per day, and, no doubt, \$25 of that is clear profit." You would have to do more than show them the figures to convince them that your real net profit was not over \$5.

I would not advocate a poverty plea to get business; that is not profitable. But it is as well for all to understand the fact that the larger volume of sales is necessary to make it possible to do business on close margins. Then all must see where they will profit by throwing that volume of business into the home market. F. A. P.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1756.—Soldering Stone-Set Rings.—*Kindly tell me one or more ways of soldering stone-set rings.* S. S.

ANSWER:—There are several ways of soldering stone-set rings. It depends on the job which is the best protector of the set rings. Some light rings may only require a wrapping of wet tissue paper, while a heavy ring would need an asbestos protection. We will therefore give several methods, and one must select which suits best for the ring to be soldered: (1) For light rings, wrap the stone settings tightly with strips of tissue paper and secure with fine soft iron wire; then wet the paper, and during the soldering hold the ring so the flame will not strike it, or, better still, pack the wrapped setting down well. (2) Wind the stone setting with asbestos cord and wet it; then pack it down and wind some tissue paper around it; tie with binding wire and wet it, and the job is ready for soldering. (3) Inclose the setting in moist clay, or split a potato into halves and press the setting into the meat between the two halves. (4) A very rapid way of soldering is to cut a suitable bit of charcoal and run it through the ring at the point in question. (5) The setting of the ring can be inserted in a small hole through an asbestos plate so far that the stone extends in water, which is set under the plate. (6) The latest preventive, which is highly recommended, is a mixture of plaster of Paris and alum. Mix the gypsum and alum into a thick paste and pack the menaced setting carefully in it. It has been determined by experiment that all the water in the above mixture is driven off when a temperature of 163° C. has been reached. As soon as the operator observes that no more steam arises from the packing, he may know that the limit of heat is fast approaching, and consequently that danger is near. The use of gypsum instead of clay has another advantage, namely, that the liquid running under the pearl does not discolor it, but rather tends to increase its brilliancy. The soldering once accomplished, all speed should be made to cool off the whole by pouring water over it. It should be remembered that all preparation, such as fitting, filing and joining, must be done before applying the protecting material.

QUESTION No. 1757.—Repairing Porcelain Vase.—*I have a fine French porcelain vase, of which a small piece (whole) is broken off. Can you tell me how this piece can be cemented on without showing the crack.* R. H.

ANSWER:—An almost invisible joint for porcelain may be made with careful handling of the following: Chloroform, 60 parts; India rubber, 25 parts; mastic, 15 parts. Cut the rubber into shreds, put into

a strong vial and pour on the chloroform. Stop tightly and set aside until the rubber is dissolved. Apply this cement to each surface to be united and let the pieces stand until the greater part of chloroform is evaporated. Unite, press firmly in its place, and, if possible, tie in position. When the cement is apparently thoroughly dry on the surface, scrape off the superfluity and dust over the line of junction a little zinc oxide, and with a clean pencil brush over the joint. After the cement has become perfectly dry remove the cord and the superfluous powder, when the joint will be hardly visible to a sharp eye.

QUESTION No. 1758.—To Color Watch Hands Red.—*I have had a watch left with me which has red hands, one of which has been broken. How can I replace it, and how can I color a watch hand red?* C. M.

ANSWER:—Mix into a paste over a lamp two parts of carmine, two parts of chloride of silver and one part of Japan varnish. Having spread some of this mixture over the hand, lay it face upward on a sheet of copper, applying heat until the desired tint is produced.

QUESTION No. 1759.—To Clean Tarnished Gilt Clock.—*I have a French clock in a case of cast zinc, gilded. How can I clean the gilding, which is tarnished?*

L. M. A.

ANSWER:—A good recipe, which may be used for cleaning any tarnished gilt articles, is as follows: Cyanide of potassium, five parts; bicarbonate of soda, one part; sulphuric ether, 2½ parts; alcohol, 2½ parts; distilled water, 25 parts. Let the articles remain in bath a few seconds. Rinse in water and then with alcohol. Dry in hot sawdust.

QUESTION No. 1760.—Etching Bowls of Spoons.—*How can I etch names in silver, silver-plated and gilt spoons?* E. B.

ANSWER:—The preliminary work for etching silver or gilt spoons is the same, the only difference in the process being the acids used to produce the etching. Draw the designs or lettering wanted with whiting or ink, then paint around them (with a camel's hair brush) asphaltum varnish, carefully covering all parts where the acid is not to take effect. For the silver spoons use for an etching acid four parts water to one part nitric acid. For the gilt bowls use first a mixture of three parts muriatic acid and one part nitric acid, diluted with five parts water, and after the gold is cut through place in the acid used for the silver until the etching is deep enough. To remove the asphaltum, immerse the spoons in turpentine until the asphaltum is dissolved.

QUESTION No. 1761.—Pickle for Soldered

Silver.—*Please give me a formula for making a pickle for soldered silver.* P. S.

ANSWER:—For a silver pickle use what is known as a vitriol solution, composed of sulphuric acid diluted with water, in proportions of one to three. Allow it to remain therein for an hour or more, then take out and wash in water. It should come out a pure dead white.

QUESTION No. 1762.—Black or Enamelled Copper.—*Kindly give me a formula that will enamel or blacken copper, or other metals.* B. E.

ANSWER:—Black or enamel on copper can be produced by first cleaning thoroughly with sand and sulphuric acid, and then applying the following mixture: Three parts white arsenic, six parts hydrochloric acid, 1½ parts sulphuric acid, and water, 36 parts. To produce a dull black on copper, brush over the copper with a solution of platinum chloride diluted with five times its bulk of water. When thoroughly dry, rub off with an oiled flannel rag. To blacken metals, use vegetable or drop black, mixed with six parts turpentine, one part Japanese gold size, and one part turpentine. If the articles are of brass and a blue black is desired, it may be produced with seven ounces carbonate of copper dissolved in 1½ quarts strong ammonia. A precipitate is formed, and the solution is diluted with one quart water. After producing the black, rinse well and lacquer.

QUESTION No. 1763.—To Repair Britannia Teapot.—*I have an old-style Britannia teapot that has one foot missing, which I want to replace. How must I proceed to make a new one to replace the missing one?*

T. R. B.

ANSWER:—The missing foot can be replaced by making a plaster mould from one of the remaining feet, then casting a new foot and soldering the same where it belongs. Proceed by painting one of the feet over with a little thick soap-suds. Then place the teapot in such a position that the foot can be a little over half covered with plaster of paris, which has been mixed into a thick paste with water. When this plaster is dry, cut off enough so that just about half remains; cut a few notches on the flat side, paint over again with soap-suds, and build the plaster of paris on the other half. When this is dry, take apart and place the plaster on back of a stove and let dry for a few days. When sure that the moisture is all out of the plaster mould, smoke the insides by holding over a gas light. Now melt some Britannia metal and pour into the plaster mould, when the foot is fitted to the broken part and soldered to same. The new foot may need a little touching up with the graver and burnisher, but if the same has been carefully cast in a thoroughly dry mould the new foot will be equally as good and sharp as the old ones.

The Macey Jewelry Co., San Francisco, Cal., which closed out its optical line before the holidays, will now reopen it under the management of Dr. Southwick.

The International Time Recording Co., of New York, on Jan. 10 certified to the Secretary of State at Albany an increase in its capital stock from \$10,000 to \$2,000,000. The concern paid a tax of \$995 on the increase.

DELFT, *Its* CHARACTERISTICS *and* HISTORY*

By EDWIN ATLEE BARBER
Copyright, 1906, by the Pennsylvania Museum and School of Industrial Art.

(Continued from issue of Jan. 16, 1907.)

ENGLAND.
THE manufacture of Delft ware was introduced into England from Holland previous to the middle of the 17th century. The English ware, made of native materials, was of a somewhat denser and more vitreous body than the Dutch, and lacking

plates were inscribed with single lines or verses which, taken together in their proper sequence, formed a complete quotation. The English Delft was generally inferior, both in body and decoration, to that of Holland. Writers on old English pottery state that the body of English Delft is of

FIG. 5.—LAMBETH DELFT PLATE, 1716.

FIG. 6.—DELFT CAUDLE URN, 1678.

the excessive porosity of the latter, did not retain as thick or even a coating of the enamel, hence the buff body showing through often imparted a rosy tint to the surface. The lack of affinity between the body and enamel frequently caused crazing and for that reason the earlier English Delft was often coated on the back with a clear lead glaze, showing crude mottlings of brown, purple and yellow. A thin wash of lead glaze was used over the enamel, in the Italian manner. In the decorations blue was the principal color employed. The ware was subjected to two firings.

The shapes of English Delft were almost as varied as those of Holland. Large plaque-shaped dishes with representations of royalty and nobility, puzzle jugs, candlesticks, drinking cups and mugs, shaving dishes, caudle pots, sack or wine bottles, posset pots, drug pots and apothecaries' pill slabs, plates and other utensils were made in abundance. These were frequently embellished with dates and inscriptions, and sets of circular or octagonal

sufficient hardness to resist a steel point, and that it will not effervesce under acid. Our own observations, however, have not convinced us of the infallibility of these tests, since in many cases it has been clearly demonstrated that the body of the English ware effervesces under acid as freely as that of the Holland Delft, and while the paste of some pieces is slightly harder than the latter, it can be easily cut with a knife, and in some instances is so soft that it can be scraped away with the thumb nail. We are therefore compelled to abandon the body test as a reliable guide to the origin of English specimens, and to fall back upon the forms of the pieces and their peculiarities of decoration. The posset pot, caudle urn and puzzle jug do not appear to have been produced outside of England, while the transfer-printed wares of Liverpool and the shapes and decorative features of Bristol and Lambeth Delft are usually so distinctive as to be readily recognized.

LAMBETH.

At Lambeth, a suburb of London, Delft ware was made in England previous to

1650, a piece in the Museum of Practical Geology, London, being dated 1631. Hodgkin describes many pieces, the latest of which bears date 1797. The paste of this product is of a light buff tint, with an opaque white enamel. The blue color of the decoration is usually of a paler tint than that of the Dutch or of other English Delft. A puce or violet color was also used. The best of the large circular dishes or plaques, painted with scriptural subjects or figures of kings and queens, are attributed to Lambeth, as are most of the wine and sack jugs, puzzle mugs, inscribed plates, drug pots and pill slabs. The decorations more closely resemble those of Holland Delft than do those of other English tin-enamelled wares. Some of the Lambeth dishes possess lobed, fluted or embossed borders. A Lambeth Delft plate, in the collection of the Historical Society of Pennsylvania, bears the legend and date, "God Save King George, 1716," in blue. A caudle urn, owned by George Cuthbert Gillespie, on deposit in this Museum, bears the date of 1678 and the initials C. F. T. The decoration, in dark and light blue, consists of flowers, birds and butterflies. The handles, with modeled serpents, are bluish green, and the three feet represent birds. The lid is surmounted by a crown.

(To be continued.)

The Industries at the Jamestown Exposition.

WHEN the hour of noon, April 26, 1907, arrives and the gates of the Jamestown Exposition open to the world there will be witnessed on the shores of Hampton Roads, Va., the greatest collection of selective exhibits ever brought together. In commemoration of the founding of the first English settlement in America in 1607 this great exposition will show the industrial progress of the nation for the past 300 years.

All the arts, sciences and industries will be represented by the best exhibits possible to obtain. All States and countries, all cities and manufacturing centers, all professions and creeds, all arts and sciences, all callings and occupations, in fact, the whole world has been swept, to gather here the most worthy works of mankind to be studied and compared in order that all inquiring minds may note the progress of the arts.

The great buildings at the Exposition include Manufacturers and Liberal Arts, with a display of the products of the workshop, together with a comprehensive exhibit of the equipment and manufacture of the same; Transportation and Machinery, Electricity, Food Products, Mines and Metals. Agriculture, Horticulture, Power and Alcohol, Marine Appliances and Specials.

Mrs. Bellamy Storer's Activity in the Development of Rookwood Pottery.

AN interesting sketch of the activity in art of Mrs. Bellamy Storer and her part in the development of Rookwood pottery was published recently in the *New York Herald*, the occasion being furnished by the famous Roosevelt-Storer letters. The writer, addressing his correspondence from Cincinnati, O., says:

"In that correspondence Mrs. Storer prominently figured. She is the granddaughter of Nicholas Longworth, who came to Cincinnati in 1803 and founded the family name and fortune. * * * All of the Longworths have been noted as the devotees of some art or science. His son Joseph was a great lover of art, and spent much of the fortune left by his father in acquiring rich collections of paintings and art objects, such as tapestries. He was one of the founders of the Cincinnati Art School and endowed it with \$300,000. His daughter, Mrs. Storer, was an admirer of the finer arts, but gave her attention more to china painting and clay glazes and color. She began this when about 25 years old, and was a leader in the woman's clubs she organized to study art and kindred objects.

"Her interest in pottery was so all absorbing and intense, and her work presented such strong tokens of genius, that her father bought for her an old school building on Mount Adams. There she erected kilns and workrooms and gathered about her artists of rare skill in clay. The result of their labor was the famous underglaze of the Rookwood pottery, which has become known to lovers of the beautiful in vases and urns all over the world. It was called Rookwood in honor of the Longworths' homestead.

"Miss Longworth, as she was then, struggled against great odds and many discouragements in winning recognition for the product of the Rookwood potteries. It was not until 1889 that she attained the pinnacle of success longed for by the artist. At the Paris Exhibition of that year she was awarded the gold medal. The Rookwood pottery was then accorded the recognition at home that had been denied it previous to that time.

"In the following year a company was organized to manufacture Rookwood, and Ballamy Storer, who had married the originator of the ware in 1886, became its vice-president. Mrs. Storer continued her active interest in the pottery, spending much time and thought in developing its beauties. Her efforts were rewarded by another gold medal from the Paris Exposition in 1900 and the grand prize for Rookwood. While abroad with her husband during his connection with the diplomatic service she kept up her experiments. In Brussels and at Madrid she had her studies, but gave her attention largely to working in bronzes. She had a Japanese artist to assist her in designing vases in bronze and the metal mountings of various figures. It was for work of this character that she was awarded the gold medal at Paris in 1900."

Charles Gagel, Brookings, S. Dak., has retired from the business he conducted for 25 years.

New Enamels and Pottery.

A VERY choice ware of enameled porcelain, entirely modeled into ornamental cups, bowls and slender cabinet vases, as well as flower holders, can never be forgotten, once seen, because of its beauty of color. It suggests the jeweled effects of brilliant colors grown familiar in glass. This enameling process consists of a coating given to the porcelain, and for that reason needs to be handled with great care. Consequently it is not well suited for ordinary practical use.

Its moderate price leads it in the future to become an admirable choice for lovers of true art work, rather than the showy and conventional styles of ornamental ware forced upon purchasers whose purses will not permit them to indulge in Limoges and other costly enamels. This exquisite ware first made its appearance at the St. Louis Exposition. Those interested in enameling processes are aware that it consists of coating the surface of earthenware, porcelain, glass, metals, gold, silver, copper, etc., with a layer of melted glass. The term enamel is also used familiarly, in regard to household ware, which is also a melted glass applied upon the surface, but in no sense of the word is it true art enamel.

There is also a novelty in choice pottery that is quite new. It is notable for its peculiarly soft and beautiful shades of mellow green, suggesting very clearly the quality of a thick-leaved plant, as a fond to its surface. Upon this surface, whatever may be the design, it is laid in high-relief, and in the same tone of color. Plants, vines, shrubs and tree leafage form in general the artists' inspiration, in which by its naturalness and simplicity of treatment the charm and originality lies. Large bowls for potted plants and ferns, as well as flower bowls of every size, give a variety and form and attractive feature. Vases and various jar forms, cylindrical, angular, and ovoid, will appeal to various tastes for purely decorative purposes. The cool tone of this green and lusterless finish make it a most desirable ornament, as well as a harmonious introduction among both the furniture and hangings of any fine room.

Such potteries are never to be seen or flaunted in department stores, nor would their merit be appreciated by the multitude, who seek showily colored specimens. In this great city new departures in trade are being developed, one of which consists in the growth of quiet, retired salesrooms, fitted up by those possessing educated taste and for the benefit of an exclusive patronage. These studio-like quarters offer the most favorable advantage for the proper display of the best art work in all branches, as well as furnishing to the purchaser while seeking and selecting a peaceful and harmonious surrounding.

Horace W. Steere, Detroit, Mich., has recently sold out his entire stock to J. Loots.

W. Cook, while hunting about a week ago in Council Bluffs, Ia., found a package of cheap jewelry which had been shipped by H. N. Hill, Belmond, Ia., to a firm in Fremont. It was turned over to the police department for the owner.

ART. STIC BRONZE
CLOCK SETS.

BUYERS visiting the salesrooms of Harris & Harrington, 12 Barclay St.,

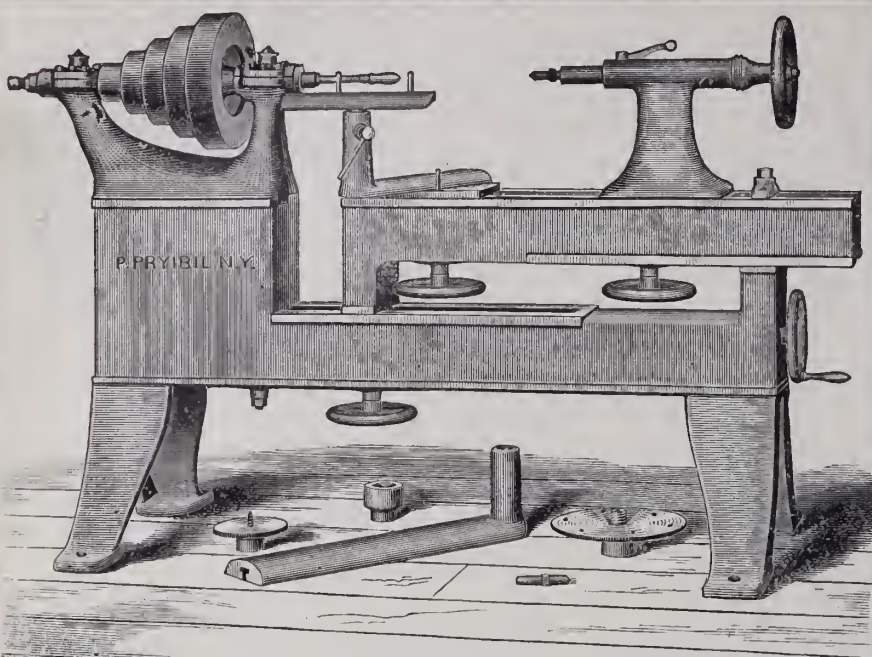

New York, are pleased with the many novelties in mantel clocks lately received from European factories. Mantel sets, including a clock and two candelabra, are shown in a variety of styles. Among the sets is one in imitation French bronze with onyx base. The clock is placed at the front of a rounded pedestal on which stands the figure of a man with a sledge held high above his head. At the man's feet is the stump of a tree in which is a partly buried wedge. Two candelabra, having onyx bases and each provided with five candle-holders, supported from pillars, are included in the set. Another mantel set follows the Corinthian style. A base of green marble supports heavy, round pillars of the same material on which rests the centerpiece, having an arch within which hangs a clock. The mountings are bronze. Two candelabra of the same workmanship, each holding six candles, complete the set.

CERAMIC NOVELTIES IN
MANY FORMS.

INCLUDED in the display of pottery seen at the salesrooms of Geo. F. Bassett & Co., 49 Barclay St., New York, is an attractive punch bowl of Flemish stone ware. The bowl is of an unusual shape, and is fitted with a cover. The decoration is unique, representing queer-looking little men carrying grape-laden vines on their shoulders. The vines and grapes are in the natural shades, and the figures of the men are highly colored. The bowl rests on a tray, the inner part of which is raised, forming a pedestal. Between the raised center and the outer edge of the tray is a portion colored a bottle green and inclosed by a raised circle of a lighter hue. A line of French china with rose decorations is shown. The display includes plates in five sizes, bonbon dishes, after-dinner sets, sugar and creams and soup sets. Plates with light green backgrounds and floral patterns, and having scalloped gold edges and gilded centers, are exhibited. There is also a carefully selected line of Austrian ware in antique shapes, beautifully glazed and painted. E. E. Waeldin, buyer for the firm, recently returned from the European markets.

THE RAMBLER.

S. Callison, of Callison, Spurgeon & Co., Dexter, Ia., thought he had been robbed in a hotel recently, but the missing money was found in a laundry where his linen had been put. Mr. Callison apologized to all concerned, and gave the landlord \$50 and the boy and girl accused \$5 each.

The REPAIRING

END OF YOUR BUSINESS IS THE
MOST IMPORTANT PART OF IT

More people come into your store to leave work than to purchase goods.

Almost every one of your good customers became so through your repair department.

Progressive jewelers know this and concentrate their efforts on the repair department of their business. They give it the most prominent place in their stores; they emphasize it in all their advertisements; they keep themselves and their employes thoroughly informed on the costs of all kinds of work, new ideas and methods; they are courteous and accommodating to repair customers; have all work ready when promised; and do only such work at home as they can do well.

They send all the rest to us.

We devote our entire time, energy, capital, and twenty-five years' experience to this important branch of the jewelry business; employ and educate the best help that can be obtained; systematize and inspect the work, and use every modern method to produce the best work promptly at reasonable prices.

It is to your interest to do business with us, it is to our interest to have you.

Let us work together.

Worth and Wear

IS

WADSWORTH

The Wadsworth Watch Case Co.

49 Maiden Lane, NEW YORK

CHICAGO
Columbus Building

SAN FRANCISCO
717 Market St.

FACTORY, DAYTON, KY.

**ATTAINS
ITS
MAJORITY**

THERE ARE MANY ARGUMENTS in favor of
The WADSWORTH 20-YEAR CASE

It falls within those grades which may be termed strictly "high class." This case is made to be sold by a discriminating trade to well-to-do consumers who still are disposed to buy economically. Costing less than the 25-year and highest grade cases, it nevertheless possesses superior style, workmanship and wear. As to the last item, the time limit is conservative. It "attains its majority." At once creditable and profitable.

***The* WADSWORTH
WATCH CASE CO.**

49 Maiden Lane, New York

CHICAGO
Columbus Building

SAN FRANCISCO
717 Market Street

Factory, DAYTON, KY.

IT is the unanimous opinion of those jewelers who have examined the new O and 12 size movements of the ILLINOIS WATCH CO. that they are the best watches in these sizes ever manufactured in America.

The success that comes from constant advertising is com= pounded weekly :: :: ::

ONCE a week is none too often to advertise your goods; once a month is not often enough. A weekly journal keeps the announcement constantly before the buyer; it gives him no time to forget. The weekly makes four times the impression of a monthly because it comes out four times to the monthly's one. It occupies the same position to the manufacturer's advertising that the daily newspaper does to the retail merchant's advertising. The great basic principle of advertising is its continuity and frequency and it is the frequent appearance of an advertisement which the weekly paper permits that generates that confidence between the buyer and seller which is the necessary basis for the beginning and maintaining of business relations.

THE JEWELERS' CIRCULAR-WEEKLY stands alone among jewelry trade publications. It is the only newspaper in the trade. The busy man always finds time to read his daily newspaper, the magazine he reads at leisure and so THE CIRCULAR-WEEKLY, being the newspaper of the trade, is always read. There is no waste circulation to THE CIRCULAR-WEEKLY, every subscriber is a buyer, and an advertisement in it goes to just the person that the advertiser wants to reach and just at the right time, when he is most receptive, for when a man reads his trade newspaper he is thinking of business, not of going fishing, and that is just the time when a trade argument will make the strongest appeal.

THE JEWELERS' CIRCULAR-WEEKLY is read. Its reading matter is of just the kind that the buyer wants to read. Every one who receives a copy of THE CIRCULAR-WEEKLY pays for it and people don't pay for papers they don't read, and papers that are not read can be of no use to the advertiser. THE CIRCULAR-WEEKLY is the more valuable because it acts quickly, it enables the advertiser to tell his story four times a month, 52 times a year; it can aid in quickly making his products familiar to the jewelry trade everywhere. One of the surest evidences of the results obtained by advertisers is the growth in advertising. THE CIRCULAR-WEEKLY last year published over 20 per cent. more advertising than during the previous year.

You cannot keep up steam without a continuous supply of fuel. Advertising is the recognized force which drives the engines of industry, but the advertising of to-day will not keep the wheels turning a year from now. The weekly appearance of your advertisement in THE CIRCULAR-WEEKLY will build up a strong and constantly growing demand for your goods among the most desirable trade.

Drop us a card and we will tell you how The Jewelers' Circular-Weekly can help to increase YOUR business, and we will send advertising rates or have a representative call.

POPULAR
CHINESE
JADE

THE
SEASON'S
FAVORITE

IF JAPANESE Coral is the pink of perfection, Chinese Jade is the *green* of perfection. This is the Jade *par excellence*. Green, a charming color in itself, here finds its most pleasing embodiment. Strong as has been the recent demand for Jade, the opening season will witness a positive and insistent vogue for which it is well to be prepared. While the stones here provided are frankly artificial, they are identical in appearance with Nature's creations. Mounted in characteristic Chinese and rich Oriental effects. The line will more than repay inspection.

"None but the Newest.—Only the Best"

NEW YORK, 13 Maiden Lane

CHICAGO, 103 State Street

B A G S

THE NEW YEAR finds Bags more of a necessity than ever—and we have been working night and day to replenish stocks which the holiday rush depleted. In addition to our previous immense line of them, we have added a number of new styles, maintaining, beyond all competition, our supremacy in assortment, quality and style.

Look for the W. @ D. stamp on Sterling, or German Silver, Roman or Silver Finish, Plain or Shirred Bags, and be assured that you have the best.

WHITING & DAVIS

New York Office 7 Maiden Lane
PLAINVILLE, MASS.

Our Representatives

are starting on their Spring trips and anticipate a cordial greeting, as from all accounts our goods have proved excellent "Sellers" during the holiday rush.

The Henry Freund & Bro. line this season will be larger and better than ever. Our stocks of Jewelry, Watches and Diamonds contain many articles of interest to the trade. Numerous exclusive patterns in jewelry, particularly in Elk and Fraternal Order of Eagle goods. Our trade-mark, "The Rose," on every piece, stands for quality and excellence.

It will more than pay you to defer your purchasing until one of our salesmen calls upon you.

ELK and Eagle Goods a Specialty

HENRY FREUND & BRO.
71 Nassau Street, New York

"SELLERS OF SELLERS"

W. & S. B. ★ Co-operative Plan for 1907 FOR THE RETAIL JEWELER

WE HAVE A CO-OPERATIVE PLAN FOR RETAIL JEWELERS FOR 1907 that they cannot afford to overlook. By concentrating their purchases on the W. & S. B. ★ line for the coming year they will make an **EXTRA PROFIT** that otherwise they would not receive.

WE SELL CHAINS THROUGH THE WHOLESALE DEALERS because they can sell them cheaper than we could afford to sell them. The expense of selling one line of goods direct would be greater than the wholesaler's profit.

WE DO NOT SELL DEPARTMENT STORES @ RETAIL MAIL ORDER HOUSES because retail jewelers cannot compete with them unless they buy at syndicate prices. We believe the legitimate retail jeweler furnishes the proper channel for the distribution of our goods.

OUR W. & S. B. ★ 1/8 and 1/10 CHAINS ARE THE BEST IN THE WORLD of these qualities. They are finished by our **WEARBEST SECRET HARDENING PROCESS**, thereby giving one-third more wear than chains finished by the regular and ordinary method.

W. & S. BLACKINTON CO.
Manufacturers

NEW YORK, 14 Maiden Lane

Factory, North Attleboro, Mass.

The "Bryant" Rings.

WE have made the **Bryant Rings** for 50 years, and know how to make first class goods. The stone setting—which every retailer knows is a very important part of the work—we give special attention to. The **Bryant Rings** will help your reputation as a first class Jeweler.

M. B. BRYANT & Co., No. 7 MAIDEN LANE, NEW YORK.

DAY by day we are adding new sellers to our line. Here are a few of them. Write us when in need of Rings and Diamond Mountings.

Seeing is believing; therefore, if you will be convinced do not fail to see our line when our salesmen are in your territory and afford you the opportunity.

Qualities of Effective Decoration

DECORATION in jewelry should not only show discrimination in the selection of style, but the execution also should be worthy. It is not too much to claim that this house has achieved very gratifying results in its decorative work—results which the trade has not been slow to recognize and avail itself of.

The qualities which make effective decoration are not easy to define in words. Skill in this direction is a gift—a distinct endowment. We invite your judgment as to whether the tastefulness of our designs is not worthy of a true craftsman.

THE IRIDESCENT BEAUTY OF THE EGYPTIAN PEARL

As shown in our newest creations, is beyond comparison. These goods excel the usual in gold jewelry. The present and latest fad is the button shape pearl, mounted in the French clutch earscrew for unpierced ears, as shown in the illustration. All of our mountings are of 10K. gold.

WE CAN SUPPLY YOUR WANTS WITH AN IMMEDIATE DELIVERY

Prices range from \$20.00 to \$36.00 per doz. pairs—plain screw; and from \$27.00 to \$45.00 per doz. pairs in the French clutch.

We have just received a large consignment of Coral and have mounted the choicest pieces in the same style gold mountings as shown in the illustration, offering a line of

Genuine Coral Earrings

in a variety of colors, showing the popular round button shape, that is one of the leading features of the present season. Prices on these Coral goods range from \$3.00 to \$9.00 per pair.

Send your orders direct. They will receive prompt attention

Notable Racing and Regatta Trophies by a Hamburg Artist.

(Continued from issue of Jan. 23.)

IN the eyes of some, the second prize might rival the first, in spite of the superior artistic and intrinsic value accorded the former. It is a fine example of the freedom with which any natural material, in this case horn, lends itself to artistic conceptions, when these are not forced. The natural curves of the horn are followed, and themselves delight the eye. And here the completion of the artistic idea appears in its full beauty. The horn rests between the antlers of a stag's head, in silver. It is united with its support by a broad band of

form an upright wreath. On the lower side is suspended by chains the coat of arms of the city of Hamburg, decorated with coral, and resting upon a flat shell. The eyes of the fish, made of the so called "cagle stone," or actite, are exceedingly brilliant, but not more than allowable in a work of this kind, since they give the impression of an attempt at great realism—certainly a successful attempt. The inscription reads: "Ehrenpreis der freien und Hansestadt Hamburg für die Regatta auf der Unterelbe, 1906."

When we consider that the execution of the prizes instituted for horse and yacht racing by the city of Hamburg has been for quite a number of years entrusted to the same artist, and remember the necessity of avoiding repetitions, the inexhaustible versatility which has ever been able to invent new as well as appropriate designs, deserves the fullest recognition.

The cause for pleasure in these latest prizes is not alone that they show the interest of the city of Hamburg in worthy sports, and its munificence in contributing to their cultivation, but that the capacities of Hamburg's goldsmiths are thereby brought into expression. That these artists are appreciated beyond the limits of their native city is shown in one instance by an order from a wealthy amateur of Berlin to Mr. Schönauer for the reproduction of the silver piece, the Vierlander boat, with fruit baskets, etc. (illustrated in THE CIRCULAR-WEEKLY of Oct. 4, 1905). This was designed for the wedding present donated by the Hamburg Senate to the Crown Prince. The duplication order was declined, for reasons which perhaps need no explanation, but the matter is worthy of being brought to general notice, as illustrating the artist's reputation.

Other illustrations on this page show reproductions of the corresponding trophies for 1905, which are likewise worthy of praise.

C. A. B.

Celluloid Substitute a Swindle.

CONSUL S. C. McFarland writes from Reichenberg concerning the discovery of an alleged substitute for celluloid by an inventor at Gablonz, which has been widely noticed in the Austrian and German press, starting from an article in the Reichenberg *Volkszeitung*. As hundreds of inquiries have since been received at the Reichenberg consulate, and are still arriving, Mr. McFarland advises that the matter proved a swindle, the article produced not being as represented, and the inventor, after flight to Switzerland, now being in Austrian custody on complaint of parties who were induced to invest in the project of manufacture.

This disposes of the reports, which caused considerable interest in this country.

American Pearl Shells in Italy.

"MISSISSIPPI shells" are imported into Italy in considerable numbers, according to a report made by Consul James E. Dunning, of Milan.

Milan, Naples and Turin are the principal Italian centers of the pearl-button trade of the peninsula, and, though there is a considerable list of makers in small places in the country, it is in the larger enterprises of the great cities that the American exporters of shells will find an opportunity to capture new trade. The Italian button trade is good, and there is a considerable export business, which, however, does not extend

FIRST PRIZE, AUGUSTA VICTORIA STEEPLE-CHASE, 1905.

gilded filigree work, set with six oval, pale green, chrysoprase stones. The cover of the horn is silver-gilded, ornamented with the figure of Diana, in silver, holding an outstretched bow. Vine leaves, with figures of birds interspersed, complete the decoration. On the edge of the horn a little fox is balanced, in a watching attitude. The inscription is the same as that of the first prize. This and the regatta prize are shown in the illustrations on the front cover.

The regatta prize exhibits an entirely different and original conception on the part of the artist, who has here chosen for his design a conventionalized fish, about 60 centimeters long, something between a pike and a porpoise. It is represented in the moment of rising above the surface of the water. Silver beneath, the back and head are brilliantly gilded. The fish holds in its mouth two branches of laurel, meeting to

REGATTA TROPHY, 1905.

in any important volume to the United States. The Milan consular district shipped only \$1,700 worth of such goods to American ports during the year ending with June 30, 1906, but the proportions of the domestic market are sufficient to encourage the belief that American exporters of "shells," which in the raw state carry no import duty, can thus find a larger field for their output. Several of the larger Italian button factories are already under contract to handle, and are so handling, the shells shipped them from New York and other American ports, but the demand is brisk, and information which reaches the consulate from a number of authentic sources indicates that there is plenty of opportunity for the enterprising exporter of this class of goods.

Additional information in detailed form will be furnished to meet the explicitly stated wants of inquiring exporters, who will receive prompt attention if they write to the Milan consulate. Address with inclosed return postage, in American stamps, with letters requiring an answer.

Josh Billings once said:
 "Tell the truth in all your ads,
 and you will get bizness."

We thoroughly believe in
 this idea, and in all of our
 many years of advertising
 in the Jewelers' Circular
 we have been careful to
 state nothing but the truth
 regarding our various lines
 of jewelry.

To back up any statement
 we have made, or may
 make, we stamp our Regis-
 tered Trade-mark on every
 piece of goods we produce.
 Hence, we do not hesitate to

**Assets and Liabilities of A. C. Mehl,
 Woodsfield, O.**

PITTSBURG, Pa., Jan. 24.—A. C. Mehl, Woodsfield, O., who made an assignment to Fritz Buckio, as told in the last issue of THE CIRCULAR-WEEKLY, is indebted to 50 creditors, the largest being Pittsburg firms. There has been some talk of filing an involuntary petition in bankruptcy, but from present indications creditors will realize very little, if anything, even if they do so. Mehl's liabilities amount to \$10,888.89, and his assets are said to amount to \$5,000. The preferred accounts are about \$6,500, of which amount Dr. J. R. Parry holds a note for \$5,900, secured by a mortgage, which it is alleged is not recorded. Attorneys Matz & Kremer, Woodsfield, represent some of the Pittsburg creditors, and the law firm of Mallory, Jeffers & Sears represent Mehl and Dr. Parry.

It is believed, according to reports received from Woodsfield, that there is a silent partner in the business, and there are other matters which may require some investigation. Mehl is said to have been well rated and his credit in Pittsburg was good. A number of Cincinnati houses have also been caught by the failure.

The principal creditors follow: I. Ollendorff Co., \$150; J. C. Crawford, \$346; Heeren Bros. & Co., \$418; A. H. Gerwig, \$695; West Virginia Optical Co., \$125; Olmstead Bros., \$53; John Holland Gold Pen Co., \$52; Lindenber & Fox, \$196; E. & J. Swegert, \$154; Randolph Worlitzer Co., \$75; Albert Bros., \$380; Eastman Kodak Co., \$127; Western Clock Co., \$64; Gorham Mfg. Co., \$71; Vander Voort Bros., \$406; L. E. Waterman Co., \$151; Butler Bros., \$105; Kunstadter Bros., \$49; South Bend Watch Co., \$44; Jewelers' Mfg. Co., \$138; First National Bank of Woodsfield, \$600, which is the amount owing on a note; Luge & Eaggar, \$26.

Some of the Pittsburg creditors have placed their accounts in the hands of Woodsfield attorneys. It is stated here that the reason papers in involuntary bankruptcy have not been filed is because there was a belief that creditors would receive more by keeping the store open under the assignee.

Death of John A. Guile.

SYRACUSE, N. Y., Jan. 23.—John A. Guile, for many years a prominent jeweler of this city, died recently at his residence, 508 Almond St., and the funeral services, which were held Jan. 13, were largely attended. Death came after an illness which had to some extent confined him to his home for over 15 years.

The deceased, whose father and grandfather were born in the vicinity, had been a resident of Syracuse all his life, and had been in the jewelry business at 508 Almond St. since about 1880. He carried a small stock, his chief business being repairing, in which line he was considered quite an expert.

Mr. Guile is survived by a widow, three brothers and a sister.

J. H. Perkins, Poplar Bluff, Mo., has moved into a new store and put in a new set of fixtures, making the establishment unusually attractive.

Representative Coombs Explains Reasons for Introducing Bill for Jewelry School in Massachusetts Legislature.

NORTH ATTLEBORO, Mass., Jan. 23.—Representative Frank O. Coombs, who has introduced and is working for a bill providing for a State school of design and manual training, has given out for publication a lengthy statement concerning the question. The statement is comprehensive and will be used as somewhat of a campaign slogan in furthering the bill. It sets forth the opinions of the manufacturers in detail. It is as follows:

"In view of the magnitude and great importance of our jewelry and silverware industry, also the technical necessities and demands which exist for its proper and permanent development and growth in the future, I am convinced that the time has arrived when the Attleboros should employ ways and means whereby they will not only maintain their well-deserved reputation as a leading manufacturing center, but will establish for ourselves prestige as the industrial center of the jewelry and silverware business in point of artistic excellence as well as in volume and quality of mechanical skill and workmanship.

"It is well known to us the splendid results achieved and benefits received from the establishment of the textile schools in New Bedford, Fall River, Lowell and other places. These schools, with their system of design and manual training, have so increased and developed artistic talent and conception, as well as mechanical and industrial skill, that the mills of this country are now producing textiles which previously had to be imported from Europe. Not only in most instances are these goods superior to those imported, but the cost of production is less.

"In considering from the standpoint of one who for many years past has been in practical connection with the jewelry and silverware industries, my own experience and knowledge of the especial value of specific training in design, as well as the education of the mechanical powers, I feel it my duty as one of your representatives, with the co-operation of my constituents, to obtain, if possible, legislation in favor of the establishment of a State school of design and manual training in the making of jewelry and silverware.

"This school will be calculated to meet the needs of two classes of students: one class including those who desire preparatory training in the art of manufacturing before entering the factory, the other those who recognize and feel the need of training in the technique of the art and a better knowledge and understanding of all departments of their trade.

"There has been a complaint on the part of some manufacturers of the scarcity of skilled workmen. This difficulty will be experienced by them until it is obviated by the establishment of a means of intelligent industrial training and education along artistic as well as practical lines.

"A school of this description would not only be a direct benefit to the community industrially, but would at the same time benefit the manufacturers in an especial

manner, economically and commercially. On this phase of the question we will say that 'system, cost and pricing, salesmanship, commercial law,' etc., could be introduced for the benefit of the office end of the business.

"Those firms who manufacture silverware will especially appreciate the great advantages and the good that would accrue to them in the training of designers, engravers, chasers and die cutters, as this class of people require as much, if not more, than others, a thorough knowledge of art and a good command and understanding of the grammar of ornament.

"The manufacturers of jewelry, of course, have a more diversified field for the application of the different courses of training to their business on account of numerous and varied lines of goods in both quality and style made by them. For this reason we believe that the school would be especially valuable to them. The proposition is receiving the unanimous approval and endorsement of the manufacturers who have been interviewed.

"I presented a bill to the Legislature last week providing for the establishment of a school of this kind. A petition signed by every firm in the Attleboros accompanied the bill, praying for its passage."

* * * * *

MR. COOMBS' BILL.

AN ACT TO PROVIDE FOR A SCHOOL OF DESIGN AND INDUSTRIAL TRAINING IN JEWELRY AND SILVERWARE:

Section 1. The selectmen of the towns of North Attleboro and Attleboro, together with such persons, not exceeding 10 in number, as the said selectmen may join to themselves, are hereby authorized to associate themselves by an agreement in writing for the purpose of establishing and maintaining within the limits of North Attleboro or Attleboro, a school of industrial training and instruction in the design and making of jewelry and silverware, with authority to take by gift or purchase, and to hold real and personal property to an amount not exceeding \$500,000. A copy of the agreement and the signatures thereto shall be filed with the secretary of the commonwealth, and if he approves the same the subscribers shall organize and adopt by-laws and elect officers, and their clerk or secretary shall furnish to the Governor a copy of their agreement of association and of their by-laws, and if he approves the same and furnishes a certificate to that effect, the Secretary of State shall issue to them a certificate of incorporation, and thereafter they shall be a corporation for the purpose aforesaid, with all the powers and privileges, and subject to all the duties, liabilities and restrictions of corporations organized for educational purposes. The said corporation shall be known as the Trustees of the Jewelers' and Silversmiths' Industrial School, and the corporation may fill all vacancies in its membership, except as provided in Sections 2 and 3 hereof.

Sec. 2. The towns of North Attleboro and Attleboro are hereby authorized annually or otherwise to appropriate, raise by taxation and pay to the trustees aforesaid, a sum not exceeding _____ thousand dollars, and upon such payment the selectmen and superintendent of schools of the said towns shall be ex-officio members of the said corporation.

Sec. 3. If, in any year, the said corporation receives from the said towns, or either of them, or from other sources, for corporate purposes, any sum of money, the commonwealth shall, in that year, appropriate and pay to the corporation an equal sum, provided that it does not exceed _____ thousand dollars, and upon such payment by the commonwealth the Governor shall appoint two trustees of the corporation to serve for two and four years respectively, and at the expiration of their terms he shall appoint trustees for the term of four years, and the trustees so appointed shall be members of the said corporation.

The Governor shall fill all vacancies in the

membership created by this section, which shall continue so long as the State appropriation above provided for continues.

Sec. 4. The total number of trustees of the said corporation and the rules for the election of the same shall be stated in the by-laws to be filed as aforesaid.

Sec. 5. This act shall take effect upon its passage.

Mr. Coombs is quite confident that the bill will meet with the approval of the committee to which it will be assigned, the Legislature and the Governor.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Jan. 23.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Antofogasta: 1 case jewelry, \$150.
Bahia Blanca: 6 cases silverware, \$716.
Barcelona: 2 packages optical goods, \$170.
Bremen: 1 case plated ware, \$250.
Buenos Ayres: 1 package optical goods, \$203;
7 cases plated ware, \$476; 1 case jewelry, \$325.
Calcutta: 17 cases clocks, \$139.
Callao: 3 cases plated ware, \$177.
Cape Town: 2 cases plated ware, \$169; 38 cases clocks, \$572; 5 cases watches, \$420.
Ceara: 2 cases jewelry, \$195.
Corinto: 2 cases silverware, \$255.
Demerara: 23 cases clocks, \$236.
Hamburg: 7 packages optical goods, \$2,291; 8 packages jewelers' sweepings, \$10,000; 4 cases jewelry, \$658; 1 case watches, \$3,996.
Havana: 1 case plated ware, \$1,009; 4 packages optical goods, \$582; 5 cases jewelry, \$2,342; 1 package thermometers, \$209; 18 cases jewelry, \$327.
Havre: 2 cases jewelry, \$550.
Leith: 2 cases silverware, \$225.
Limon: 1 case watches, \$122.
Lisbon: 11 cases clocks, \$123.
Liverpool: 34 cases clocks, \$740; 1 case jewelry, \$300; 5 cases plated ware, \$2,736; 1 case jewelry, \$300.
London: 1 case silversmiths' material, \$393; 9 packages optical goods, \$1,598; 43 cases clocks, \$1,220; 28 cases watches, \$5,130; 3 cases jewelry, \$230; 3 packages scopes and views, \$300; 16 cases clocks, \$790; 2 cases watches, \$500.
Matanzas: 4 cases silverware, \$100.
Manila: 13 cases clocks, \$151; 2 cases plated ware, \$115.
Montevideo: 2 cases jewelry, \$348.
Oporto: 1 case watches, \$100; 38 cases clocks, \$433.
Punta Arenas: 10 cases watches, \$134.
Rio de Janeiro: 8 cases plated ware, \$347; 93 cases clocks, \$2,046; 11 cases watches, \$3,367.
Santiago: 57 cases plated ware, \$283.
Santo Domingo: 18 cases clocks, \$172.
Southampton: 1 case jewelry, \$600.
St. Croix: 1 case plated ware, \$117.
Turin: 21 cases clocks, \$1,078.
Valparaiso: 1 case watches, \$840; 2 cases plated ware, \$398; 51 cases clocks, \$593; 1 case jewelry, \$299.
Vera Cruz: 6 cases clocks, \$145.
Yokohama: 55 cases clocks, \$2,168.

W. C. Maynard & Son, consisting of W. C. Maynard and Oscar W. Maynard, jewelers and opticians, Miami, Fla., have dissolved partnership. The business will be continued by Oscar W. Maynard, who will collect outstanding accounts and be responsible for all indebtedness to the concern. W. C. Maynard, after a much needed rest, will devote all of his time to the manufacture and sale of his recently invented scarf pin retainer. The dissolved firm was one of the oldest and most reliable jewelry houses in that city. The younger Mr. Maynard will continue to conduct the business according to its established policy at the present location, Ave. D, adjoining the post office.

“IN A CLASS BY ITSELF”

That's What The Jewelers' Circular-Weekly Says About The SILVER STANDARD

IN the issue of January 16, 1907, THE JEWELERS' CIRCULAR-WEEKLY published a review, nearly two columns in length, of *The Silver Standard*, the little magazine that advertises “1847 Rogers Bros.” silver plated flatware.

The opening paragraph was as follows (the underlinings being ours):

“Volume II of *The Silver Standard*, that most unique and entertaining periodical published by the Meriden Britannia Co., has been issued in book form, and constitutes one of the most interesting volumes we have seen in a long time. *The Silver Standard* is so different from any other magazine that it is in a class by itself, and certainly no other house organ can approach it in entertaining and instructive literature. *The New York Sun* devoted over a column of its editorial page in a recent Sunday edition to a review of *The Silver Standard*. This is a testimonial that no other house publication or no form of advertising literature has ever received before, and that any magazine or publication of any character might well be proud of.”

The advertising literature that has this unique distinction is advertising your goods, your establishment, if you handle “1847 Rogers Bros.” ware.

We have had many letters asking for copies of *The Standard*; also letters of warm commendation. One gentleman wrote: “I think you ought to push it (*The Standard*) more than you do. Nobody can help seeing your excellent cuts and reading the description of your excellent ware, and a great many customers could be gained.” This gentleman, of course, did not realize that *The Standard* was designed to reach only the trade, not the general public. The fact that it has won recognition from so many outside the trade attests all the more emphatically its value.

The Standard is, of course, only one of our advertising methods. It, however, is about the only one that has not as yet been imitated.

Not only our advertising methods, but the patterns and goods themselves are copied—both in sterling and in plated ware. Whatever else it does, this imitation indicates that the original is worth copying and therefore of value.

Our general advertising is co-operative. It helps us by helping the dealer. If it should fail to help him, it would no longer help us. We sell our goods through the dealer, therefore we do our best to make his business prosperous. The advertisements of our goods are read by the buying public which he is trying to reach. We try to create a desire for the goods; it is for him to call attention to the fact that he has them. Nor is our help spasmodic. We advertise right through the year—hot weather and cold alike. No other silverware is so persistently and extensively advertised.

The mere fact that a dealer handles goods so thoroughly advertised is in itself an advertisement for him.

The February *Standard* will be devoted largely to New York in 1847 and 1907. Four pages will be given up to the article and illustrations. It will prove of great interest, especially to anyone knowing the city—either past or present.

Successors, Meriden, Conn.

The News From London

Annual Imports and Exports Show Large Increase—Watch Case Assay Trouble in "Plate" Decision and American Exporters Warned—German Competition Conditions Affect Jewelry Trade Centers.

LONDON, Jan. 11, 1907—Now that one can quietly settle down, after the hurly-burly Christmas trade and its attendant festivities, on looking round the question comes to mind as to how things have balanced in the wholesale and retail the past year. While it failed in its great promise, it was nevertheless one which the optimistic at any rate could view with equanimity. The average jeweler and silversmith possesses a hopeful spirit, and has the belief that matters will improve as the year grows. One particular reason for this feeling is that the import and export trade in the United Kingdom shows the enormous total of £1,000,000,000. Comparing the figures of 1905 with those of 1906, we find an increase in imports of £42,900,000, while the exports had increased by £53,200,000, a grand total of £96,100,000. This is an undeniable financial finger pointing on the dial of prosperity clearly showing that our staple industries must be on the upward grade and that the jewelry and allied trades must consequently benefit.

The British watch trade, however, is not in that condition which can be considered altogether satisfactory. The Lancashire Watch Co. is in such an unfortunate position that its debenture holders have stepped in and taken possession, and while the other factories go along the comparatively even tenor of their way they could certainly do with more orders. Then one hears grumbling from the representatives of the Swiss houses and, of course, the position is extremely complicated by the undecided position of affairs owing to the legal war over the hall-marking of foreign made watch cases.

* * * * *

The following figures will give some idea as to the number of clocks, watches and scientific instruments imported into Great Britain; also the total value of each class, and the exports of cutlery and silver plate. It will be noticed that during the past year the number of clocks imported from the United States decreased in number and in value, while the number and value from France had increased. Of scientific instruments both the United States and France show increases of about the same value. Sheffield has been boasting of its increasing exports to America, and the figures in connection with the exports of cutlery demonstrate that the total value exported to the United States has materially increased; in fact, the United States itself is almost as great a purchaser of British made cutlery as Australia. With regard to silver plate, although the figures have gone up, it is somewhat doubtful as to how much of this is due to foreign plate coming in and being sent out of the country again. One cannot take the figures as showing definitely what the British exports in this direction might be valued at.

IMPORTS.

Clocks—1905, from Belgium, 1,057,307, valued at £234,331; 1906, 1,030,163, valued at £230,320. 1905, from France, 59,480, valued at £64,312; 1906, 74,879, valued at

£72,253. 1905, from U. S. A., 241,057, valued at £66,647; 1906, 209,919, valued at £56,785. 1905, other countries, 245,949, valued at £72,861; 1906, 206,893, valued at £77,009. Total, 1905, 1,603,793, valued at £438,151; 1906, 1,521,851, valued at £436,367.

Watches—1905, 1,651,037, valued at £838,369; 1906, 1,668,674, valued at £787,493.

Scientific Instruments—1905, from France, £209,656; 1906, £234,608. 1905, U. S. A., £378,396; 1906, £399,214. 1905, other countries, £280,924; 1906, £379,119.

EXPORTS.

Cutlery—1905, Chili, £15,464; 1906, £15,718. 1905, Argentine Republic, £29,460; 1906, £32,598. 1905, Brazil, £33,728; 1906, £41,373. 1905, U. S. A., £79,695; 1906, £91,066. 1905, Australia, £97,922; 1906, £107,420.

Silver Plate—1905, £654,577; 1906, £709,233.

* * * * *

I have quite a number of inquiries from American representatives, showing the exact position of the hall-mark law is not appreciated. As matters stand, pending the decision of the House of Lords, trade continues so far as sales are concerned, and I have not yet heard that the customs authorities are interfering with goods coming into the country; on the contrary, I understand the Board of Trade will do nothing to make the present position more difficult. But it must be remembered that if the House of Lords, which is the supreme tribunal of Great Britain, upholds the decision of the Court of Appeal there can be little doubt that immediately it is made public goods which may arrive at any of the British ports will be seized. And if the watches are found to be assayable they will be forwarded straight away to the nearest assay office and the consignee informed that they are at the assay office, where he must make application. They will be dealt with according to the rules of the Hall, and, moreover, the importer will have to pay the fees for assaying and marking, which amount to 9d. in the case of an open face watch and 1s. 6d. in the case of a hunter or demi-hunter, and will also have to run the risk of having the case, *i. e.*, both front and cover, damaged in the scraping for assay and in the stamping, since the Halls are by no means as careful as they should be in dealing with the articles sent to them.

I have heard complaints from foreigners as to the careless manner in which the goods are scraped for assay and the hall-marks applied to them, and they seem to think they are badly treated because they are foreigners. Nothing of the kind, it is exactly the same trouble which continually confronts the English manufacturer, but he has to grin and bear it. Strictly speaking, any of the British Halls damaging, through carelessness, an article sent for assay and marking are liable to make good the damage, but, in fact, it is seldom indeed that anybody takes the trouble, because it would involve loss of time and considerable worry. As a matter of fact, the Hall, both in London and Birmingham (more particularly

London), are not manned to fill an emergency, and from one or two chats I have had with employes in the Goldsmiths' Hall here it would appear that they have to work at such speed while marking as to preclude almost all thought as to the best place for marking and how much damage may be done by careless stamping.

In my opinion, if the House of Lords upholds the decision of the lower court, then a short act of Parliament will have to be got through in order to enable wholesalers and shopkeepers to get rid of their large stocks on hand. And in face of such uncertainty it would be inadvisable to export gold or silver watches to Great Britain.

* * * * *

I referred above to the unfortunate position of the Lancashire Watch Co. I may further remark that its condition has given rise to a number of suggestions as to what might be done to give greater strength to the industry. It has been pointed out that English watches turned out by big watch manufactories here at the rate of 500 a day do not find a market. There are other factors than the competition of the foreigner. Retail jewelers object very strongly to British watch manufacturers (incidentally they have complained of an American company also) supplying big tally houses and soap merchants. This undoubtedly prejudices many retailers against home productions. The companies, up till a comparatively short time ago, cut prices so close that there was practically no profit, but, it was asserted, an actual loss on every watch produced. Then came an understanding as to minimum prices, which it was hoped would assist in putting a brighter side to the balance sheet. And now the suggestion is made that there should be some form of amalgamation so as to economize in production and eliminate the competitive factor. Whether this will take practical form remains to be seen. There can be only one end if this is done, and that is one or other of the companies will swallow the rest.

The British Watch & Clockmakers' Guild held its first general meeting at the Northampton Institute, Clerkenwell, London, on the 3d inst. The honorable secretary *pro tem* stated that over 200 members had joined during the four months which had elapsed since the inaugural meeting, while two provincial societies had affiliated and a new branch had been started in Glasgow. The chairman, Thomas D. Wright, pointed out that minimum prices were essential and that arrangements ought to be made to formulate a list which should not be too low for London or too high for the provinces. At the same time he suggested the holding of monthly informal meetings to read and discuss technical and commercial papers. He also advocated a question box, in which to put questions anonymously and so afford an opportunity for discussion. One proposition offered was that an information bureau where the employer and the workman would be able to obtain reliable information as to the standing of an employe or *vice versa*, with whom he anticipated entering into a contract. The general council were elected and three vice-presidents, while an unanimous vote was passed upon a resolution to the effect that the Marquis of

* * * * *

The optical situation is a very uncertain one. The Worshipful Company of Spectacle Makers has withdrawn its case against the Council of the British Optical Association, but the suit of the B. O. A. against the Spectacle Makers' company is still to be pursued. What the outcome will be is somewhat uncertain, but at any rate it will be well for the trade when this matter is settled one way or another. Signs are not wanting that a big optical trade meeting may possibly be held to bring much more energetic efforts to get a bill through Parliament. An action will be heard shortly in the courts in which the editor of one of the jewelry papers brings an action against the *Dioptric Review*, because the title of his paper was inadvertently used in a critical article instead of that of the paper edited by one who has taken a somewhat prominent part in optical politics. ST. GEORGE.

Further Details as to Reports Submitted at Annual Meeting of the Beers Consolidated Mines.

In a recent issue a brief summary of the annual report of the De Beers Consolidated Mines, Ltd., for the 12 months ended June 30 last was published, showing a large increase in the quantity of blue ground and in the total receipts and profits as compared with the prior year.

The complete reports of the meeting have since arrived by mail, and include much information that will be of interest to all in the trade.

In relation to the new contract made by the company with the syndicate in London for five years from June 30 last, the exact terms are not given, but the directors state that the new contract is based on terms even more advantageous to the mining company.

Although the terms are not given officially, it was said last Summer that the new contract provided for an increase averaging about 20 per cent. in the prices paid for different series by the syndicate to the mining company. It was figured then that the syndicate would pay for the rough stones an average price equivalent to \$16.80 in American money. The syndicate had been for several years advancing the prices to the trade, and the new contract gives to the mining company a greater share in the margin than it had before.

The average value per carat of the yield of the several mines in last year was as follows: De Beers and Kimberly, 61s. 11-100d.; Wesselton, 43s. 9 26-100d.; Bultfontein, 42s. 11 49-100d.; Dutoitspan, 80s. 11 52-100d.

Colonel D. Harris, the chairman, in his report spoke of America as the best customer and of the American ladies as having the best taste. He said, as reported in the *Diamond Fields Advertiser*:

Turning to the accounts (and in quoting figures I shall, of course, for the purposes of convenience, dispense with the shillings and pence), it will be seen that the diamonds produced realized £5,607,717, as against £4,802,844 for the previous year, an increase of £804,873 (applause), this enhanced output being readily disposed of by the syndicate to whom we sell our production.

I may state for your information, and the fact

will no doubt be of interest to the world in general, that the demand for diamonds is increasing to such an extent that we have been compelled to largely extend our washing operations, in order to cope with the requirements of the industry, and I should not be surprised if the sales for the year ending June 30 next, largely exceed the quantity sold during our last financial year, (Applause.)

I may also point out, by the way, that this is not the result of any spurt in the diamond market, but that the demand has been strong for the last seven years, and appears to be still visibly increasing. The demand is in fact so great that despite the growth of the output, our diamonds realized a much higher price per carat, last year, than during the financial year ended June 30, 1905. America again being our best customer. One cannot help admiring the good taste of the American ladies in preferring diamonds to all other gems. (Hear, hear, and laughter.) I am sure the cultivation of this refined taste will add yet one more to their many personal attractions, while at the same time benefiting the De Beers Co., and, as a necessary consequence, assisting the finances of the Cape Colony. (Hear, hear.)

Colonel Harris spoke of the fact that there had been a decrease in the dividend on the preferred shares to £1 per annum since July 1, 1904, as compared with 27s. 6d. for the two preceding years. He said that this was the result of a policy adopted after careful consideration. This policy provided for large expenditures for the development and equipment of the Bultfontein and Dutoitspan mine.

It was decided, two years ago, to accumulate sufficient blue on the floors to give the benefit of two wet seasons before being treated. The company's policy had not been influenced by the temporary effect it might have on the market price of the shares. Instead of keeping one eye on the mines and the other on Throgmorton St., the company had kept both eyes on the mine, and

as a result there would be a substantial increase in the next dividend, justifying the soundness of the policy laid down two years ago. * * *

At that time we had, as I said just now, less than 4,000,000 loads of blue on our floors. To-day our stock of blue amounts to over 8,300,000 loads, an increase of 4,300,000 loads in two years, placing us in the unique position of being able to supply without difficulty the world's demand for diamonds, while working well within the capacity of our hauling and washing powers.

Of course the output of diamonds must always be regulated by the state of the market, but I leave you, gentlemen, to calculate how much additional profit the company might have made if only half the increased quantity of blue ground accumulated had been washed during the period to which I have referred. (Hear, hear.)

I have been a director of this company for over 15 years, and I can say without hesitation that its finances have never been sounder and easier than they are at the present moment. Our mines were never capable of making anything like the output of diamondiferous ground that is being hauled to-day. With a continuance of the same steady demand for diamonds, our profits must increase, in fact they have done so to a considerable extent since June 30 last. You may perhaps think that I have taken a somewhat rosy view of the company's position and prospects, but at all events I assure you that I have not spoken as optimistically as I feel. (Loud applause.)

A later report received in New York indicates that since the company's annual meeting the prediction of Colonel Harris of increased dividends has been justified. A semi-annual dividend of 20 per cent. (10s. per share), less the income tax, was declared on preferred shares and a dividend of 35 per cent. (17s. 6d. per share), free of income tax, was declared on the deferred shares.

Clocks, Watches, Jewelry and Gems, Imported into Canada.

TORONTO, Can., Jan. 23.—The monthly report of the Department of Trade and Commerce of Canada for September last just issued gives the imports for home consumption in the jewelry and kindred trades as follows:

| | Month of September, | | Six months ended | |

Third Annual Banquet.

Members of Boost Club Dine at Knickerbocker Hotel, New York.

That it began with the gathering of the members shortly after 6 p. m. and lasted until after midnight with a great majority of guests still giving the closest attention until the last word of the last speaker had been delivered, is sufficient evidence that the third annual banquet of the Boost Club of New York was not only thoroughly enjoyed by each and every one of the members and guests, but was an event that will long be remembered by all who participated as a banquet of which any organization might be justly proud.

The Boost Club, which was organized in 1905 and originally drew its members from the stationery, gold pen, fountain pen and allied trades, in the last year or so, has blossomed out and now includes a number of men in the jewelry and kindred industries, among those who have subscribed to its principle as expressed in the name; and truly the 250 or more gentlemen who gathered at the Knickerbocker Hotel, Thursday night, in every way showed the true "boost" spirit, if good fellowship and camaraderie are any criterion of the principles.

After a most pleasing social gathering in the handsome parlors of the hotel, the members and guests entered the dining room shortly after 8 o'clock and quietly found their seats at the 21 round tables which filled the room. At the end of the room, on a platform, was the long table at which the speakers were seated on either side of Arch Booster Frederick P. Seymour, of the Dennison Mfg. Co.; at his right sat Festive Booster Wm. E. Smith, toastmaster of the evening, and at his left Arthur Brisbane, editor of the New York Evening Journal. Others at the table were: Hon. John J. Fitzgerald, Hon. John S. Wise, Charles Battell Loomis, Hugh Gordon Miller, Rev. Dr. Guiles, Col. John L. Shepherd, Lorlys Elton Rogers, Hon. Key Fu Shah, Dr. O. S. Marden, McCready Sykes, Theo. L. C. Gerry and E. J. Rice.

As the members stood at the table Dr. Guiles pronounced a blessing, and the orchestra in the gallery played "America," in which all joined. An excellent menu kept the guests busy for some time, and during the courses popular songs were sung by T. Arthur Baker, accompanied by the Imperial Trio. From the starting of the Stein song until the speaking began, the guests enjoyed themselves heartily singing the popular airs, many of which had been parodied with words to fit the club or its members.

Arch Booster Seymour was given an innovation as soon as he called order and introduced Festive Booster "Bill" E. Smith, who after a few bright remarks introduced Mr. Brisbane. The noted editor then proceeded to drop nuggets of thought in concentrated editorial style in a way that was highly appreciated. In speaking of the principle of acting together to boost each other, Mr. Brisbane called attention to a work of Prince Kropotkin, in which he well brought out the effect of the "boosting" principle, showing that "boosting" was an intelligent selfishness that was the underlying spirit that made the race progress.

In speaking of the Indians and wild ani-

mals that had originally lived for and fought among themselves in this continent, he showed how they had given place to the white men and tamer animals that had worked together for one another, and spoke of the Pilgrims on the *Mayflower* as being the original "Boost" Club. Primitive man, he said, was the feeblest of all animals, but through the "boosting" principle was able to get rid of even the mammoth, as we, by adhering to the principle, may get rid of the "mammoths" which prey upon our economical and political worlds to-day. The principle was a winning idea.

The speakers that followed, Congressman Fitzgerald, Rev. A. W. Guiles, ex-Governor Wise, of Virginia; Hugh Gordon Miller, and others, praised the Boost Club and the principle on which it was started, although Governor Wise, in a semi-serious vein, gave a discourse on friendship that was highly appreciated. E. J. Rice gave humorous selections, and Charles B. Loomis gave extracts from his own work that the boys enjoyed again and again. After other speeches by Bill Christopher, Dr. Barden and the Chinese Consul-General and others, Col. John L. Shepherd was called on to put a fitting capstone to the first oratorical climax, and when the applause had died away the toastmaster in a few words bade the guests good-night.

Death of W. J. Strang.

TERRE HAUTE, Ind., Jan. 23.—W. J. Strang, for many years in the jewelry business at 814 Wabash Ave., died Wednesday last at his home, 2201 S. 7th St., of heart failure.

Mr. Strang was 62 years old, and started first as a railroad conductor, later going into the jewelry trade. He was the secretary and treasurer of the Order of Railway Conductors, and was master of Social Lodge 86, F. & A. M. The funeral services, which were held Saturday, were under the auspices of the Masonic lodge. Robert B. Foote also conducted a service.

The deceased is survived by three sons and three daughters. The business which was conducted under the name of Miss Emma Strang will be continued.

Death of Alvin Lawrence.

LOWELL, Mass., Jan. 23.—At the funeral of Alvin Lawrence, which took place in the Edison Seminary Chapel, a large number of relatives and friends attended to pay their last tribute to this city's veteran watchmaker and jeweler, and an unusual amount of floral tributes testified the great esteem in which Mr. Lawrence had been held.

The deceased, who had been in business here for more than a third of a century, conducted a store at 36 Gorham St., and was widely known both as a repairer and optician. For some years he had associated with him a son, Abbott Lawrence, who conducted the business for a short time alone about seven years ago, and is now continuing it. For his ability and integrity Mr. Lawrence was highly regarded in the jewelry trade by all with whom he had dealings.

The firm of J. J. Borne & Son, Titusville, Pa., has been dissolved by mutual consent. J. J. Borne will continue the business on W. Spring St.

American National Retail Jewelers' Association Calls on Retailers to Join the Movement.

HASTINGS, Minn., Jan. 23.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

SIR—If I may be permitted to impose upon your time and space, I should like to urge upon my fellow jewelers the necessity for more active work along the lines of organization. The time is ripe for it. The spirit of organization is all about us, and it is now up to us to improve our opportunity.

The national association needs the support of a live and energetic association in every State in the Union, and we earnestly ask that jewelers everywhere take immediate steps to get together and affiliate with us in this good work. You need us as well as we need you, and we can be of great mutual benefit. The first thing we want is numbers. If we can get a great majority of the retail jewelers to become identified with us, then will we be able to ask for and obtain the things we all so much wish for at the hands of the manufacturers and jobbers.

A copy of the constitution and by-laws of the national association will be sent to any retail jeweler on request, and every possible assistance will be gladly given to any who are interested in starting a new State organization. If there is a State association in your State, see to it that you are a member of the national association. Any regular retail jeweler is eligible to membership. However, we do not receive members from a State where there is a State association except through the State association.

We will have the greatest convention of retail jewelers ever brought together next Summer at Chicago, and we want you to be one of them. Don't delay, the time to act is now. Get in the harness and help those that are already pulling the load.

Fraternally yours,
I. M. RADABAUGH,
Secy. A. N. R. J. A.

Two Jewelers in Vicinity of Pittsburg Suffer Losses by Fire.

PITTSBURG, Pa., Jan. 24.—One jeweler was burned out last night and another suffered considerable damage as a result of fires which destroyed many thousands of dollars' worth of property in the Pittsburg district during the last few days. The store of the Bellevue Jewelry Co., in Lincoln Ave., Bellevue, a suburb of Pittsburg, of which Ernest Siviter is proprietor, was destroyed and his loss is about \$300, which is covered by insurance. All of his valuable stock was locked in safes which withstood the heat of the fire. The block in which his store was situated was destroyed.

The store of W. J. Sarver, 206 Federal St., Allegheny, was damaged to the extent of \$1,000 by a fire which also occurred yesterday morning. The blaze started in an adjoining building, in the store of a fire extinguishing supply concern. The fire spread to the second floor of the building occupied by Mr. Sarver, in which he had a quantity of jewelry stored. His store is on the ground floor. The loss is said to be covered by insurance. Just what caused the fire is not known.

Death of W. Sumner Blackinton.

The funeral of William Sumner Blackinton, one of the best known jewelry salesmen in the country, was held Saturday morning at the funeral chapel at 241 W. 23d St., New York, at 11 o'clock. Mr Blackinton's death occurred Jan. 21. He was taken ill while at the Hotel Platus, St. Louis, Mo., but he went on to Cleveland, O., where he stopped at the Colonial Hotel. Here he became worse rapidly, and was removed to the Huron St. hospital in that city, where, despite all that medical aid could do to save him, he died Monday morning, Jan. 21. Louis Blackinton, brother of the deceased, accompanied the body to New York, where it was laid at rest in Woodlawn Cemetery. W Sumner Blackinton was born in Attle-

boro, Mass., in July, 1816, and came of a family whose name has long been known in the jewelry trade. He was a son of William and Rebecca Blackinton. His early life was spent in Attleboro, where he attended the public school, and after completing his education he took up the trade followed by his father and became a jeweler. With the beginning of the Civil War he enlisted as a volunteer. After the war was over he returned to Attleboro, and in 1866 joined his father as a member of the firm of W. & S. Blackinton, which grew out of the firm of Blackinton & Sweet, of which William Blackinton and J. Abbot Sweet were members. The old firm had done a small business and retailed practically all of its product to one concern in New York. After Mr. Sweet withdrew and Sumner Blackinton was admitted radical changes took place in the policy of the house, and its goods were sold in all parts of the country, Sumner Blackinton being the salesman, while his father conducted the factory. The marked ability of the salesman soon brought prosperity, and in 1880 Louis A., another son, was admitted. In 1890 the father died, and the sons continued.

THE LATE W. SUMNER BLACKINTON.

From a small concern located in a little wooden shed and employing 15 hands, the Blackinton firm flourished until it found work for 350 hands during the rush season and occupied one whole floor in the Bates building at Attleboro. It gained a wide reputation as the makers of standard chains.

In 1898 occurred the disastrous fire which practically gutted the business district of Attleboro. The Blackinton factory having been burned, the concern moved to Providence, R. I. The present company was incorporated June 10, 1901, and in 1902 moved to North Attleboro. Sumner Blackinton continued to be Pacific coast and northwest representative until May, 1904, when he severed his connection with the business with which he had long been identified.

Mr. Blackinton became a representative for J. G. Fuller & Co., with whom he remained one year, and finally accepted a position as western salesman for S. O. Bigny & Co., with whom he was identified at the time of his death. Throughout his life Mr. Blackinton was an active member of secret orders. He was a 32d degree Mason, being a member of Bristol lodge, Bristol Commandery and King Hiram Arch Chapter and the Mystic Shrine. He belonged to the Odd Fellows, and was a member of a New York lodge of Elks. He was also a member of Lafayette Post, G. A. R., and was at one time connected with the Lotus Club and the New York Athletic Club.

Deceased is survived by a mother, 82 years of age; a daughter, Mrs. Alton H. Riley; a sister, Mrs. Augusta Stephens, and a brother, Louis, who represents the W. & S. Blackinton Co.

E. J. Price & Co., Dubuque, Ia., Make a General Assignment.

DUBUQUE, Ia., Jan. 24.—E J. Price & Co., retail jewelers of this city, have made an assignment under the laws of the State. The firm is composed of E. J. Price and E. L. Cunningham.

Mr. Price's liabilities are said to be about \$10,797, of which \$9,335 are due on notes to the following: Emma O. Price, \$1,665; \$180; \$124; \$242; \$610; Reinbeck State Bank, \$2,550; Geo. E. Seibert, \$1,200; City National Bank, \$362; C. H. Knights & Co., \$102; D. P. Price, \$650, \$600; L. D. Cunningham, \$1,050. The merchandise indebtedness is given as about \$1,281, the principal creditors being C. H. Knights & Co., \$434; Hayden W. Wheeler & Co., \$106; C. G. Breitenbach, \$157; Heintz Bros., \$124; International Silver Co., \$76; F. X. Parscher, \$57; Julius King Optical Co., \$79. Among the creditors for less than \$50 are: Scott Bros., Kunstadter Bros., Waterbury Clock Co., L. C. Kruger, Rockford Watch Co., Warren Mfg. Co., George E. Darling, Gilbert Clock Co. Benj. Allen & Co. are down as creditors for 77 cents. The assets, which are put at about \$8,000, are principally in stock and book accounts.

The partners have been in business for about 13 years, having started at Iowa City, where they succeeded to the International Mfg. Co.'s business. They were joined by O. L. Keith in 1899 under the style of Price, Keith & Co., but in July, 1901, Mr. Keith purchased their interest and they opened a new store in Clinton under the present style. In November, 1905, they succeeded George E. Siebert and Reinbeck, and last year moved their stock to Dubuque.

Both partners are highly regarded in the community for their enterprise and honesty, and therefore an endeavor will be made to adjust the present difficulties.

Arthur H. Buck, Who Stole from His Employers, Sentenced to Prison by Boston Court.

BOSTON, Mass., Jan. 26.—Arthur H. Buck, salesman for Abel Bros. & Co., New York, who was on trial Friday charged with larceny of jewelry samples from his employers, has been found guilty and sentenced to two and one-half years in state prison. Buck admitted that he had pawned diamonds and jewelry from his stock of samples, and it was also in evidence that he had bestowed some of the jewelry upon lady friends. While in this city on one of his trips he is said to have pawned a diamond brooch worth \$475 and a scarf pin worth \$75.

Mr. Abel testified that the defendant, who was formerly a hotel clerk, was given an opportunity to work for him on the road as a salesman because of his health, which was suffering from the confinement of indoor work.

Counsel for Buck made a strong plea for clemency, on the ground that a long sentence would probably prove to be a life sentence.

Archibald Vineburg, Norfolk, Va., Goes to the Wall.

NORFOLK, Va., Jan. 24.—Archibald Vineburg, an optician and jeweler, 56 Granby St., is reported to be in bankruptcy. He had been in business in this city at the above address since August last.

Mr. Vineburg has had a varied and long career in the optical and jewelry business. He started at New Orleans, La., and conducted an optical establishment there until 1887. He then moved to Albany, N. Y., where he remained for two years, later coming to this city, where he opened a small optical office with his brother, under the style of Vineburg Bros. Later he returned to Albany and formed a partnership with M. Abrahams, as A. Vineburg Co., and after meeting with financial difficulties the firm dissolved and Mr. Vineburg for a while conducted business for his wife. Mr. Vineburg left Albany about a year and a half ago, and for a time conducted a small store in New York. Last Spring he came to Norfolk again, opening a store on Main St., moving later to his present location in Granby St.

Mr. Vineburg is well known in the optical trade, having conducted optical stores in a number of cities of the country at various times.

Jewelers' Gold Bars Withdrawn and Exchange at New York.

Week Ended Jan. 26, 1907.

Features of the Canadian Stamping Law Explained by One of Its Sponsors.

In speaking with a representative of THE CIRCULAR-WEEKLY last week, President W. K. McNaught, of the American Watch Case Co., Toronto, said that despite the general interest taken in the jewelry trade to-day on the question of stamping legislation, there was considerable misunderstanding, particularly among the manufacturers in the east, in regard to the Stamping Law passed by the Canadian legislature last year.

Mr. McNaught, who was the prime mover in the effort to obtain this legislation, and who conducted the fight for it before the Canadian Parliament, seemed somewhat surprised that the results of the efforts made by the Canadian trade in this line should be the subject to such misunderstanding. He explained that while our National Law applied only to interstate commerce, and that the strongest laws would necessarily be those of the States, in Canada, on the other hand, the Federal Government was unable to legislate thoroughly the subject, and, therefore, cover the subject more drastically than did our own Congress.

One of the essential elements of difference between the United States and the Canadian laws lies in the fact that the former forbids the manufacture, importation and sale of any article marked or represented as gold that is less than 10 karat fine, and any articles of silver less than 925-1,000 fine. This, Mr. McNaught explained, kept out the nine-karat jewelry of Birmingham, England, as well as the cheaper lines manufactured in the United States. The legislation in regard to plated ware, while following the American law almost exactly, goes further, in that the statutes provide that no plated article can be marked with a quality of gold without also having a mark indicating the quantity used, and where any mark is used on plated ware the trade-mark of the manufacturer (which must have been previously registered with the Dominion Government) must also appear. A margin of allowance from the standard is provided for to cover any loss of gold through polishing or buffing.

"The passage of your National Stamping Law," said Mr. McNaught, "was a great benefit to us in Canada in our fight for this legislation, because the fact that the United States had legislated on the subject created a strong impression on the minds of our legislators and emphasized the necessity of the law. In fact, we redrafted our bill after receiving yours and adopted a large number of its provisions, particularly that on plated ware. One most important part of our law, however, relates to a subject not touched upon in your law in any way, and that is the section which absolutely forbids guarantees.

"You cannot emphasize too strongly the fact that the Canadian law in no way discriminates against the American or other foreign manufacturers, or in favor of local manufacturers, all the provisions, such as the registering of trade-marks, applying with equal force to Canadian manufacturers and their competitors in this and other countries. The New England manufacturer

who does a large business with Canada will find no difficulty in complying with the provisions of the law, provided he will stamp his product accurately and honestly. He will simply have to register his trade-mark and stamp this, as well as the quantity, upon those articles of plated ware on which he wishes to put a quality stamp. Of course, if he wished to send his products to Canada without stamping or marking them in any way the law will not interfere with him, but as in your country, if he does desire to mark his goods, these marks must be accurate."

When asked about the clause prohibiting the sale of silver less than 925-1,000 fine, Mr. McNaught said that it practically interfered with no one, except, perhaps, the watch case people, who formerly made cases of coin silver, as neatly all other products of silver were to-day made 925-1,000 fine, and even in watch cases the change in quality from 900 to 925-1,000 was not a particularly important factor from the manufacturer's standpoint.

Pennyweight Thief Who Robbed Knoxville Jeweler Goes to Prison for One Year.

KNOXVILLE, Tenn., Jan. 21.—In the criminal branch of the Circuit Court this morning the man who stole a diamond ring from the store of the H. J. Cook Co. in October last, was convicted of larceny and sent to prison for one year on his plea of guilty. He will probably be put to work in the coal mine. The prisoner, who gave his name as R. W. Roberts, is said to be wanted also on charges of robbing three Knoxville jewelry stores.

The man's method of procedure was to call upon a jeweler and examine Knight Templars' charms and gold chains, pick out one and ask to have this laid aside for him. Then he would ask to see diamond rings and lockets, and while looking at them would pick out a valuable article and substitute a cheap one in its place. On the person of the prisoner the police found two lockets, one a scroll locket with a diamond center, and another an Elk locket set with diamonds. The owners of these have not been located, and Roberts would not tell where he got them.

LETTERS TO THE EDITOR.

Brenneman & Alderfer Not Liable for Damages.

ALTOONA, Pa., Jan. 21, 1907.

Editor THE JEWELERS' CIRCULAR-WEEKLY: My clients, Brenneman & Alderfer, of this city, have shown me your publication of Jan. 9, concerning a suit against them by Elizabeth Freeman and James O'Mally, for alleged slander. As your paper has a large circulation among people with whom my clients have business, I ask you to publish that there is no ground whatever for damages against Brenneman & Alderfer. The persons who brought the suit were neither arrested, accused nor searched, and, therefore, have under the laws of this State no right of action for damages against my clients. Very truly yours,

R. A. HENDERSON,
Attorney for Brenneman & Alderfer.

Louis A. Liebermann, Joliet, Ill., Goes Into Voluntary Bankruptcy.

JOLIET, Ill., Jan. 24.—Louis A. Liebermann, who conducts a store at 329 Jefferson St., this city, filed a voluntary petition in bankruptcy in the United States Circuit Court yesterday. The liabilities, according to the schedules filed, are about \$8,771, while the value of the assets are given at about \$7,530. E. Willard has been appointed receiver for the bankruptcy's assets and estate.

Mr. Liebermann does a manufacturing and repairing business principally, and has been engaged in the jewelry trade here since 1901. As a side line he carried photo supplies. His creditors are principally in New York and Chicago.

On the petition of George E. Feagans, a wholesale and retail jeweler of Joliet, Ill., who is a creditor of Lieberman in the sum of \$209.46, E. W. Willard, of Joliet, was appointed receiver. The following are some of his principal creditors: George E. Feagans, \$200; Jonas Koch, \$977; Kionka & Wagner, \$141; W. J. Johnston Co., \$945; Sproehnle & Co., \$98; Dreyfus Mfg. Co., \$182; Kreis & Hubbard, \$101; Swartzchild & Co., \$127; Bates Bros. Co., \$67; R. Wallace & Son Mfg. Co., \$136; Eliassof Bros. & Co., \$560; Regnell, Bigney & Co., \$79; International Silver Co., \$256; Stott Bros., \$115; Zach A. Oppenheimer, \$80; Arnstein Bros. & Co., notes, \$1,337; Zach A. Oppenheimer, notes, \$458; John P. Liebermann, notes, \$2,200.

Death of George O. Conrad.

HARRISONBURG, Va., Jan. 23.—This town lost one of its leading citizens and an old member of the jewelry trade when George O. Conrad passed away this morning at his home after a brief illness. The deceased was 84 years old and had been a resident of Harrisonburg since 1836.

Prior to the Civil War Mr. Conrad was mayor of the town, and during the war he was a member of the Churchville Cavalry, the 14th Regiment, and the Virginia Cavalry. For over half a century he had conducted a jewelry business, and had a large number of friends in the trade. The deceased is survived by three sons and three daughters. His wife died 10 years ago.

Death of H. E. Norris.

FREDERICKSBURG, Va., Jan. 23.—H. E. Norris, who died Saturday in his home in this city of heart failure, was well known as a jeweler, and his loss is felt both in business and social circles.

The deceased had long been in the jewelry trade as an employe of H. C. Burrows, at Culpepper, for whom he worked for 21 years, and then later went into business for himself. He came here from Culpepper about three years ago, and was quite successful. He is survived by a widow and six children.

The bill of the Indiana Optical Society to create a State Board of Optometry to examine and license opticians has been introduced in the General Assembly, having been presented in the Senate by Senator Roscoe E. Kirkman, of Richmond, and in the House of Representatives by Conrad Keller, of Indianapolis.

Waltham Watch Co. Taking Part in Fight Against Proposed Parcels Post.

In the Washington correspondence of a Newark newspaper last week was published an article with reference to the opposition of watch manufacturers to the parcels post movement. The correspondent said that an organization of manufacturers and store-keepers is opposing the project, and he went on to say that the watch manufacturers are taking a prominent part in such opposition.

President E. C. Fitch, of the Waltham Watch Co., whose attention was called to the correspondent's article by a representative of THE CIRCULAR—WEEKLY, said: "The company is opposed to the parcels post for the single reason that it is not practicable to sell good watches by sending them through the mails. The jogging and shaking up which a watch received in going through the mails would result in its delivery in unsatisfactory shape. The buyer getting the watch in this manner would not be satisfied with the timepiece. However excellent it might have been as it left the factory, it would not be so when it reached the buyer."

"The only way in which a watch should be sold is through a watchmaker who adjusts it and sees that it is in all respects fit for the service that it is to perform. The dealer who sells a watch maintains a continuous interest in it, and it is in his province to keep it in order. Our business is built on the satisfaction of the public with the product. We will not deliver the watches in such a condition that they will not keep time, and that is the reason we are opposed to the watch business being conducted by mail."

The company recently sent out a communication to the retailers, inviting them to co-operate, if they believed as the company does, in opposing the parcels post project. The letter sent out was as follows:

No doubt you are aware that an effort is being made toward establishing a government domestic parcels post. Without commenting upon the general convenience claimed for that system, we desire to call your attention to the probable effect of its adoption upon your own business as retailers of watches and jewelry.

In our opinion the most prominent benefits of the proposed parcels post would be reaped by mail order houses and department stores. We believe, therefore, that such a system would greatly tend to the purchase of watches through such houses—a condition which neither you nor we desire to see obtain.

A watch movement being a very delicate piece of mechanism, is liable to serious injury through shocks and jars incident to transportation. For the satisfaction of all of our customers, we earnestly desire that Waltham watches should be received by the ultimate wearers in the good condition in which they leave our factory. We are sure that this end can best be attained by the distribution of our product through regular expert watchmakers who are established retail dealers. Such dealers naturally have a personal and continued interest in the proper performance of Waltham watches in the pockets of their customers, and they possess the ability and the desire to treat watches with the care and mechanical skill which their delicate nature demands.

If you believe, as we do, that the adoption of domestic parcels post would prove injurious to your interest, we suggest you take such measures (by petition or communication with the congressmen of your district) as seem to you best adapted to prevent the engrafting of that system upon the postal service.

Louis Derr has sold his business at Battle Creek, Ia., to A. Warn.

Younger Jewelers Organize 14-Karat Club and Hold First Annual Dinner.

An organization known as the 14 Karat Club, composed of young men from the principal wholesale jewelry firms, emulating the example of their elders, had their first annual dinner at the Hotel Marlborough, New York, last Saturday evening.

This initial banquet was attended by 41 members from nearly as many representative houses. Coming, as it did, the night following the famous 21-Karat Club dinner, happy references were made by some of the junior speakers to the remarks that had been made the previous night.

Larter & Sons' quartette furnished excellent music for the occasion, with Fred. Fort at the piano. Mr. Jacoby, responding to a toast, spoke on Herbert Spencer's "Gospel of Relaxation."

The following parody of "Everybody Works But Father" was the principal song of the evening:

Everybody works but the factory,
They sit around all day,
Always writing letters,
Hope to ship next day;
Customers keep on calling,
New stories we must tell,
Everybody works but the factory,
They do, like

The following officers were unanimously elected: Roy Hovey, with Carter, Howe & Co., president; Arthur Jacoby, with L. & M. Kahn & Co., vice-president; Marcus Brewster, with D. D. Brokaw, secretary; Walter N. Kahn, with L. & M. Kahn & Co., treasurer.

The banquet was greatly enjoyed by the young men. As each member has four or five of his friends to propose, a large and powerful membership is anticipated in the immediate future.

North Dakota State Optical Association Elects Officers.

FARGO, N. Dak., Jan. 23.—The North Dakota State Optical Association recently held an interesting meeting at the Waldorf Hotel, Fargo. The attendance was slightly hampered on account of the excessive snow and consequent poor train service.

The officers elected were: President, A. O. Wold, Langdon; first vice-president, O. M. Varnson, Valley City; second vice-president, J. M. Ness, Wahpeton; secretary, Louis Hansen, Devil's Lake; treasurer, A. G. Tellner, Jamestown. D. D. Sullivan, Fargo, was elected a member of the board of directors. Matters of general interest to opticians were discussed after the election of officers.

Among the speakers were: H. Howda, who gave an interesting talk; J. M. Ness, who told how certain abuses in the profession of optometry could be corrected, offering suggestions for improving certain conditions; D. D. Sullivan, "Retinoscopy." Louis Hansen spoke of the necessity of harmony existing among opticians throughout the State.

The next meeting of the association will be held at Devil's Lake.

The Northwestern Supply & Jewelry Co.'s store in Butte, Mont., was the scene of a fire recently that started in the rear of the establishment. The firemen quickly extinguished the flames, and the loss was but nominal.

H. J. Webb, Springfield, Mass., Makes a General Assignment.

SPRINGFIELD, MASS., Jan. 24.—H. J. Webb, doing business as H. J. Webb & Co., at 360 Main St., made a common law assignment to day to Clinton E. Bell and Walter W. Eaton. This assignment becomes valid after the creditors have signed consents to it and agreements to that effect have now been circulated. No inventory of the assets or total of the liabilities have as yet been completed, but the approximate figures as given out show the assets to be worth between \$34,000 and \$36,000, and the liabilities about \$46,000. The store has been closed temporarily for the purpose of taking inventory, and the assignees are awaiting word from the creditors before determining what further proceedings should be taken.

According to a statement sent out by the creditors about \$23,000 of the liabilities is due for borrowed capital, about \$3,000 to the bank on notes, and about \$900 on notes of creditors. The general merchandise indebtedness is about \$19,600, the stock on hand is said to amount to about \$31,000, accounts receivable, \$2,300; fixtures about \$3,000 and cash about \$300.

Mr. Webb was originally employed by Woods & Hosley, who was succeeded by Woods & Co., in which Mr. Webb was a partner. The latter firm purchased the business of L. S. Stow & Co., which they continued at 360 Main St.

Fire in Factory Building Does Damage to Two Pen Plants.

A fire started Thursday morning of last week in the building at the corner of Rose and Duane Sts., New York, in which the gold pen plant of the L. E. Waterman Co. and the fountain pen plant of the Aikin, Lambert Co. are located. The fire was confined to the 10th story, where it started, and in which the plants of the two companies are located.

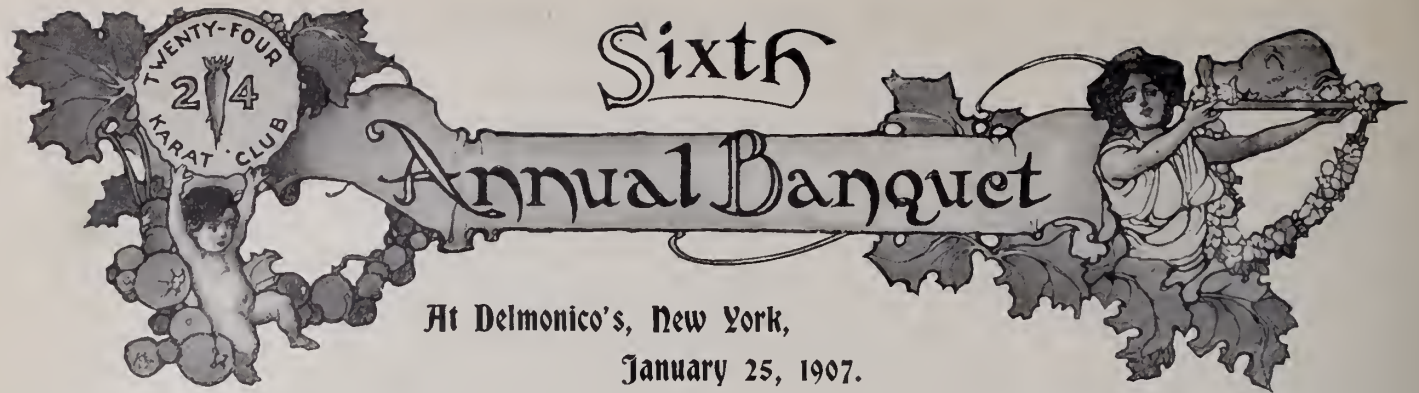

The estimated damage to the Waterman plant was placed at \$10,000 to \$15,000, and is covered by insurance. Much of the belting and shafting was destroyed and the larger machines practically destroyed. It is supposed that the smaller machines may be used again.

The loss in the Aikin, Lambert Co.'s plant is estimated at \$4,000 to \$5,000, and is covered by insurance.

The building will be repaired at once, and it is expected that the plants will be in running order again in a fortnight or so.

There will be no delay in filling orders by the companies, which have stocks on hand for emergencies.

Jan. 24, 1907, being the 57th birthday anniversary of Jacob Floersheim, president and founder of the J. Floersheim Co., Chicago, he presented each one of his employes who had been in his service one year or more, \$7.57. The seven dollars represent the seventh year after his 50th birthday, and 57 cents represent his age. This unique plan originated with Mr. Floersheim on his 50th birthday, when he presented each employe with a 50c. piece. On his 51st birthday, \$1.51; on his 52d, \$2.52; 53d, \$3.53, etc.

Sixth Annual Banquet

At Delmonico's, New York,
January 25, 1907.

WHILE successful banquets in the jewelry trade have been many, while enjoyable gatherings of the representative members of the gold, silver, watch, clock and allied industries have been held continuously for several decades, it is safe to say that there has never been a banquet in the history of the jewelry trade which met every one of the elements requisite for success, as well as the enjoyment and entertainment of its guests, as did the sixth annual banquet of the 24 Karat Club, held Friday evening. Never in the history of the trade has such a representative body of jewelers assembled at a festive board as were found under the roof of Delmonico's beautiful marble building at Fifth Ave. and 44th St., New York, on this occasion, and from the hour that the first guest arrived to the time that the last straggler left the banquet hall and cloak room there was not a hitch in arrangements, not one minute of dullness, not one slip, and not one disagreeable incident to mar the success of the occasion. While it is true that the banquet committee had made an especial effort to perfect the arrangements in every way, it is also true that it was due to the tact, ability, clever management and hard work of the officers and directors, and especially the members of the dinner, speakers' and reception committees, that the entire affair was conducted with such celerity and eclat.

The hour for assembling was 6.30, but long before this time the club members and the guests began to gather in the reception rooms to greet one another, to renew and cement old friendship, as well as to form new acquaintances. The moments passed quickly and enjoyably until the signal was given to enter the hall, and here an example of the perfect management was shown in the fact that it was but a little after seven when the guests found their seats at the nine long tables which stretched across the hall at right angles to the speakers' table.

Here, as in the reception halls, there was hardly one of the assemblage of over 400 jewelers that did not feel within him the truth of the sentiment so aptly brought out by one of the speakers a little later in the evening, when he said: "The great message of the age is that man shall understand his fellow man, and there is no greater way to come to such an understanding, particularly in the business world, as for men to gather together with their feet under the table, with elbows touching, and with no business worries or cares to

interfere with their realizing the fact that they are friends, neighbors and fellow-workers, as well as competitors."

A happy feature of all the banquets of the 24 Karat Club has been the fact that the members and guests have always shown that on these occasions all care, trouble and worries incident to business have been put aside for the nonce, and for one evening at least, good fellowship was to be the one and dominant principle that should guide their actions, and while this was especially true of the last banquet, it was also noticeable Friday night that though

JOHN B. WOOD,
President of the Twenty-four Karat Club.

there was hardly a jeweler who did not give himself up thoroughly to the enjoyment of the evening, there was no one who overstepped the bounds of strict decorum, and the order maintained within the room, and the quiet and careful attention given to the speakers lasted from the beginning of the first course to the fall of the president's gavel announcing that the banquet was at an end.

The surprises were many and delightful; the speeches were excellent, the menu was perfect; but above all, as one of the speakers remarked as he was leaving the hall, the gathering itself was one of the greatest aggregations of the finest type of intelligent American business men that he had ever addressed.

It was with little difficulty that the guests found their places at the tables,

every man having previously been presented in the reception hall with a printed list showing the names and locations of the seats. On coming to the tables one of the first things that greeted the eye was the beautiful menu containing, in addition to the list of dishes, the toasts, the names of the guests, and a list of the officers and committees of the club. The menu had on its cover a hand-painted illustration in colors showing a pretty girl holding in one arm a bottle and in the other a large carrot, and from her waist suspended a basket containing 23 carrots.

When all were ready to be seated a procession was formed, headed by the president and guests, who were escorted to the speakers' table by members of the reception committee.

The decorations of the banquet hall, the first thing that caught the eye, were marked by simplicity as well as beauty, and consisted almost entirely of American flags, which covered the walls in various tasteful drapings. From the central dome, containing candelabra, hung gauze festoons dotted with gilt stars. Back of the speakers' table, in blue letters on a large white background, was the new name recommended for the club. "The Jewelers 24 Karat Club of New York City." In the center of the design were the figures 24, with a carrot in the vegetable's color. As the procession entered the hall the orchestra in the gallery struck up lively strains, and a few minutes later the vocalists, also in the gallery, sang the first of a number of selections of a pleasing character.

As President John B. Wood took his seat at the guests' table he had on his right the Rev. Robert Rogers, Ph.D., and on his left J. Adam Bede, of Minnesota, member of the House of Representatives. Next to Mr. Bede was the Hon. E. B. Vreeland, New York, also member of the House of Representatives, who introduced the National Stamping Law. He took his place a little later in the evening, having been delayed, and he received an especially warm welcome as he was escorted to his seat. There were two other members of the House of Representatives present at this table, the Hon. Wm. S. Bennett, New York, and the Hon. Charles A. Towne, New York. The Navy was represented by Rear-Admiral J. B. Coghlan and the Army by General Fred D. Grant, commandant at Governor's Island, and Col. H. O. S. Heistand. A prominent representative of Tammany Hall was present in Senator Thomas F. Grady. Others at that table were John

Fox, Wm. P. Mitchell, Charles C. Hughes, Hugh Gordon Miller, Edward M. Morgan, and Archibald Rutherford, president of the Philadelphia Jewelers' Club.

Grace was offered by the Rev. Dr. Robert Rogers, after which the members and their guests gave earnest attention to the following menu:

Oysters.
 Consomme Deslignac
 Ox Tail.
 Santernes, Cerons (Barton & Guestier)
 Radishes. Celery. Olives.
 Fillets of Sole Joinville.
 Cucumbers.
 Baron of Beef.
 Veuve Clicquot, Brut.
 Potato Croquettes. Brussels Sprouts.
 Apollinaris.
 Terrapin, Maryland.
 Grapefruit with Cherries.
 Breast of Chicken, Genin Fashion.
 French Peas.
 Fancy Ice Cream.
 Assorted Cakes.
 Cheese.
 Coffee.
 Liqueurs. Cigars. Cigarettes.

During the progress of the dinner the orchestra played popular operatic selections, and there were solos and duets by vocalists, which added much to the general enjoyment, a number of the selections being enthusiastically encored. The diners joined in hearty spirit in singing a number of the choruses, the airs meeting with the greatest volume of response being, "Alice, Where Art Thou Going?" "You're a Grand Old Flag," "Keep on the Sunny Side," "The Good Old U. S. A.," "Bill Simmons," "Waltz Me Around Again, Willie," "Colleen Bawn," "Cheyenne."

When the time came for speeches, President Wood called the assemblage to order, saying: "It offers me great pleasure to welcome you here. Everything happening to-night up to this time has been of 24 karats in fineness. The committee has provided a feast of wit and wisdom that will be of the 24 karat standard. I am not here to make a speech to you, but to introduce great speakers who will address you. I would like, however, to read to you a cable message which we have received from an old friend, William Bardell, United States consul at Germany." The president read the message, "Greetings to the 24 Karat Club."

"Our first speaker to-night," said the president, "is the silver-tongued orator of Tammany Hall, and it seems to me appropriate that a man gifted in this way should address the jewelry trade. I take pleasure in introducing the Hon. Thomas F. Grady, who will respond to the toast, 'The Jeweler in Politics.'"

SENATOR GRADY'S REMARKS.

Mr. Grady spoke in a conversational tone and his numerous jokes and witticisms, directed at the jewelry trade in his inimitable manner, kept the assemblage in roars of laughter.

That is an embarrassing sort of an introduction to the 24-Karat Club. Although your chairman said I was silver-tongued, before I get through you may say I am long-tongued. If there is any class of business men with whom I would wish to get closer to than I now am, it is the jewelers. I feel that I have not been sufficiently with them in the past and would like to get a line on them after this, especially as to bills payable. (Laughter.)

You are called the 24-Karat Club. I have heard of jewelry that is 18 karats in fineness, and of other jewelry that assays at 14 karats, and have

always been told that the latter wears the better. Because I have not before addressed your club I take the greater pleasure in doing so now, and trust that after looking at me you may have a little better idea than you may have obtained from some of the papers which say things at times about me. It is an undoubted fact that while my reputation, as to conduct and integrity, is unimpeachable while I am at home, just as soon as I go to Albany and strike that God-forsaken Republican legislature, then my morals become affected.

We hear little of jewelers in politics, but some of the men who are in politics are certainly jewelers. I suppose that I may be classed as an emerald. In truth I am a native pearl. There are other men who may be called rhinestones. They are getting more plentiful than formerly and crowding out native pearls. There are men in politics who may be called doublets, with the exterior excellent but much doubt as to what is below the surface.

My advice to you gentlemen of the jewelry trade is to pursue the even tenor of your ways and not to get into politics except to help a friend. About the only time that you go into politics, if I am correctly informed, is when some question arises as to undervalued invoices, and then you do not care to dabble with the subject any longer than is necessary.

You could be a mighty power. It is not my intention to turn this into a mass meeting of Tammany Hall, but suppose that the jewelers should declare themselves in favor of revenue for tariff only—I mean tariff for revenue only, but I keep thinking of revenue as you see.

Your business is built altogether on confidence, and I use the word as distinguished from trust. I hope, however, that the day will come when your business will be built on trust, and for the first time in my life I will be really busy. At present you are willing that the confidence shall be all on your customers' part.

Distinguished men are to speak and I must not use too much of your time, I was almost extinguished not long ago. Now that you see what a mild mannered man I am I trust that you will not be disturbed by accounts in morning papers which otherwise might lead you to suppose that I am a most hideous, ferocious being.

Having occasion not long ago to pass through Maiden Lane I saw many of the jewelers closing their safes and supposed at the time that this was a delicate compliment to me, but later I learned that it was their usual closing time.

In conclusion, Mr. Grady declared that the jewelers are an important element among the enterprising business men of America, whose influence is giving to New York its title of the Empire State. He declared that the jewelers should and do take part in many movements that tend to the betterment of the community.

In introducing E. B. Vreeland, member of the House of Representatives from New York, as the next speaker, Mr. Wood said that the 24 Karat Club, standing for purity and honesty, rejoices in the opportunity of meeting a man who has done more than any other man in the country in obtaining an honest national stamping law which places the business upon a higher plane. Mr. Vreeland was then introduced, and the cheers and hand-clapping which had greeted him on his entrance to the hall were redoubled. In his remarks he took occasion to place on record his recognition of the part which THE CIRCULAR-WEEKLY had filled in bringing about the enactment of the stamping law.

Responding to the toast, "Federal Supervision of Manufactures," Mr. Vreeland said:

SPEECH OF HON. E. B. VREELAND.

Mr. Chairman and gentleman of the 24-Karat Club, I want to say to you that it is many years since I have seen as intelligent and good looking a body of men as is now before me. (Laughter.) This compliment has been paid for in advance.

It has been my pleasure to be associated with the jewelers in obtaining the legislation which they required in order to place the business upon a high standard. Whether my part was great or small, it has been magnificently remembered by

the jewelers of the United States. On Christmas day I received a large package from New York. Opening it I found a splendid chest of quartered oak which was filled with the most beautiful articles of sterling silver—there seemed to be bushels of them. They were made by the Gorham Co., a fact which would be a certificate of value even without a stamping law.

I was told that this was a present in recognition of my part in bringing about the legislation which was so desirable from the point of view of the jeweler as well as that of the public. I need hardly say that I greatly appreciate this gift. As apparently all the jewelers of the country are now here I wish to express, publicly, my thanks to you. The silver will be an heirloom in my family and heirlooms in my family are none too numerous. (Laughter.) Especially am I proud of the plate on top of the chest, expressive of the feeling of the donors, to whom I again express my most hearty and sincere appreciation.

Sometimes we men in public life wonder what there is in it for us. Even my friend, Mr. Grady, expressed doubts as to the appreciation of his services at Albany. We usually leave the service poorer than when we entered (cries of "Oh," and laughter). I see that some of you doubt this. That is perhaps because we recently raised our pay, yet I say to you that the majority of the men who give the best years of their life to the public service get no adequate financial return. They give to the public service the years during which their fellow citizens are laying by dollars, as you gentlemen of the jewelry trade have done, enabling you to give such a banquet as this. If there is anything in public life that is a sufficient recompense it is the knowledge that we have assisted in enacting legislation that is for the benefit of our fellow citizens generally.

It must be a source of much pride for you jewelers to know that the men in your line have been the first to have placed on the statute books a law which makes for a higher standard of commercial honesty. This is the first bill formed to regulate commerce that has been enacted into a law since the country was formed. The lottery bill was passed to regulate morals, the pure food bill to promote health, the railroad rate bill to regulate the tools and implements of commerce, but the gold and silver stamping law is designed to regulate a branch of commerce itself.

The law could not have been passed, I say to you, without the assistance of the committees and officers of various jewelers' associations who cooperated in urging its adoption. These associations and the press, with THE JEWELERS' CIRCULAR-WEEKLY at the head, created the public sentiment which drove this bill through Congress—not only through a single Congress but through a single session of that Congress. Without the aid of the committees and of this journal it would not have been possible to get through Congress the measure which means so much to you and to the public, a law which not only regulates trade in gold and silver articles between the States, but also supervises the imports and exports of these articles.

Of the need of this law I will not speak to you. When we were considering the bill in Congress, the exhibits of various articles of jewelry were piled on my desk. They were marked in various ways and they were of varying degrees of fineness, not in accord with the marks. The members of the committee of Congress saw the mark, "United States Assay, 18 Karats," and found that the article was merely washed with a little gold on the end of a brush. When we cut up articles marked "Sterling" and assayed pieces we found that only one-third to one-fourth was of silver. We had articles marked "solid silver" and found that the only truth in the mark was to their being no vacancy in the metal, for inside there was solid brass. The jewelry trade expressed itself firmly as to what ought to be done and the present law resulted.

We have a dual system of government. We are not only a nation, but also a federation of States. In some respects these States are sovereign and in other respects they have relinquished to the Federal Government. We have passed a law which governs and regulates traffic between the States and with foreign countries in gold and silver, but this does not apply to jewelry sold in the same State where it is made. There is still work ahead for you in extending the principle of the law to the States and Territories.

In 16 States there are silver laws of different kinds. You gentlemen do not want different laws in the several States. What you require is uniformity. You do not desire to make one kind of

a silver or gold for one State and another for some other State.

Now, I volunteer to do all I can to assist in extending the principle of the federal stamping law to all the States. In doing this I have not an eye to any additional pieces of silver for I feel already repaid in that way.

I notice in the current issue of THE JEWELERS' CIRCULAR—WEEKLY a bill which has been drawn along the lines of the national law and is recommended for adoption in the various States.

This bill was drawn by Mr. Crawford, a well known lawyer of New York, who is thoroughly experienced in the work. I saw much of Mr. Crawford while we were considering the federal law, and we had only one difference of opinion as we went over the bill, line by line and word by word. The penal clause was the only part on which we did not agree. I preferred a \$500 fine and six months' imprisonment. Mr. Crawford said that his clients could scarcely remain away from their business longer than three months. (Laughter.)

It has taken all the years since 1776 to make us the nation we are. The States were originally drawn together for common protection and defence. In all the years since then, years of trial and tribulation as well as of glory and triumph, we have been making progress gradually to the national plane on which we now stand. It took over 100 years to develop national pride and sentiment. In 1812, as those who read history carefully know, we were disgracefully defeated. It took the Civil War, it took 300,000 lives and the expenditure of millions in that gigantic struggle to bring these federated States together into a real nation.

Federal regulation has kept growth with the progress of the United States. In the early years of the country we know that party lines followed closely on differences between States. That is not the case now. I believe that there is becoming more and more of a consensus of opinion in favor of federal regulation. Each case as it arises must be considered by itself. When federal control can best accomplish the purpose, I believe, there is an increasing number of men in all parties who believe in such control.

Some years ago an Englishman said that the United States was a fat oyster lying here ready to be devoured by the first foreign power that came along. Our little trouble with Spain proved the error of what that man said.

When that war broke out we were somewhat alarmed. As we look back now we see that it hardly tested our power. In 100 days, the most brilliant in warfare since those of Napoleon, the yellow colors of Spain were swept from the western seas forever. When Dewey sailed into Manila he spoke to the nations with American cannon in a language all could understand, because it is a universal language.

I congratulate you jewelers on having been the first to place on the statute books a law which should elevate the standard of your trade, not only at home, but in all nations with which we have business.

Mr. Vreeland's speech was frequently punctuated with applause, and at its close he was cheered and applauded for a long time.

REV. ROBERT ROGERS' ADDRESS.

The Rev. Robert Rogers, who had pronounced grace earlier in the evening, was now called upon to respond to the toast, "Jewels," and he did so in a manner showing him to be a clergyman who can entertain as well as preach. Dr. Rogers' grasp of delicate humor was just sufficient in contrast with the underlying earnestness of his discourse, which was one of the best ever heard at the club's dinners.

After saying that this was his first time to address the organization, Mr. Rogers added that no man could look at such an assemblage without being inspired with happy thoughts. Usually there were more bonnets in his audience than bald heads, he observed, so that the present occasion was exceptional with him in that respect.

Referring to the house of mourning and to the house of feasting, the speaker said that he is not among those who have no

belief in the benefits to humanity of joyous occasions.

The house of feasting leads to a better understanding among men, and I believe that the cardinal message of the age is for man to come to a better understanding with his fellows so that in this way we may come to a solution of human problems.

It is not the theorist who will solve the problems of capital and labor and of the distribution of wealth, the negro problem, or the other problems, but the solutions will be reached by the men of affairs getting into touch with one another, as we do with our knees under the mahogany. We, as American citizens, will not be daunted by these problems, but in God's good time we shall reach the solution for which we are searching.

It is not meet perhaps that the clergy should wear many jewels, for if they did they might get proud. So the laymen see that we do not get overburdened with jewels by keeping our salaries below the danger line. When a clergyman has any considerable quantity of jewelry he usually gets it by marrying and not by earning it.

Mr. Rogers referred humorously to a story of Daniel in the lions' den which had been told by Mr. Vreeland. The clergyman suggested that the member of Congress either received in his youth a somewhat incorrect version or, more likely, his instruction in Sunday school had been so many years ago that he had forgotten. It was a comfort, said Mr. Rogers, to have the member of Congress speak to the assemblage as if it were a Sunday school class.

References in the Bible to the heavenly Jerusalem paved with gold and with walls of jasper and other precious stones were quoted by Mr. Rogers. He said that the sparkling glass of the Bible was probably diamonds. While gold and precious stones have always been of great value, yet the history of mankind shows that always there have been ideals worth more than all other riches. Patrick Henry voiced this when he said, "Give me liberty and you may keep all the jewels." In the book of Ezekiah, the Hebrew woman, pointing to her two sons, said, "there are my jewels."

The speaker told a story of the Lord of Montrose making a wager of having more valuable candelabra in the castles of Scotland than any in England, and winning by pointing to the tall and bare-legged Highlanders who held the lights. As the speaker declared that manhood is, after all, the greatest jewel and the most precious thing in life, the outburst of applause was so strong that he paused, and when it subsided, he said: "I am delighted that you applaud. It shows to me that your hearts are better than your practice, and this should be true of all men. We should have ideals better than we are. While high ideals prevail we will have great men and a great country." He added:

We have been passing through a period marked by a craze for money. I believe that there will be a change. We may now be too much interested in bank accounts and similar subjects, but the time will come when, instead of the things that we now chiefly honor, we will substitute brotherly love, high character and strength of intellect.

Do not think that I mean any general level such as the socialist would make us believe is to come. The diamond and the pearl will never look well in the snout of the swine, although they may get there sometimes. May God hasten the day when jewels of honor will be worn by those who deserve them.

Already we see signs of the change. You are feeding the minds of your children with the thoughts and the lives of Washington, Lincoln, Grant, Lee, McKinley and Roosevelt, for these are the kind of men who offer more than do the

few multimillionaires in all that makes toward the advancement of the republic.

President Wood said that a silver-tongued orator had spoken to the first toast, and now he called upon a golden-tongued orator, J. Adam Bede, Congressman from Minnesota, to respond to the toast, "The American Movement."

ADDRESS OF HON. J. ADAM BEDE.

When Mr. Bede arose to speak, those who had not seen him before and who expected to see a big and breezy-looking man from the west, were surprised. Mr. Bede is of not more than ordinary size, has a smooth face, mobile and expressive features, and a nervous energy supposed to be more characteristic of the east than of the west. In another respect, too, there may have been surprise for having been heralded as the "humorist of the House." anything serious was scarcely to be expected. His remarks were an illustration of the always close relation between humor and pathos. While witticisms were at the tip of his tongue, they led up to consideration of economic questions of the hour, which he treated with an optimism sturdily opposed to socialistic ideas. His patriotic definition of the American idea was an inspiration that stirred the blood.

"Last night I spoke at Rochester," said Mr. Bede, "and sat in a draught, catching a cold. Three years ago I spoke in the same city, sat in the same draught and caught a cold. I would not have gone back if I had not supposed that the draft had gone to protest.

"There is little that I know of jewelry, having been concerned chiefly with the necessities of life." Mr. Bede then told a story of going on a fishing trip with Congressman Towne, who sat a long time holding a line, although the bait had been taken off the hook by a fish. This was the first instance, said the speaker, for Towne to show his opposition to "re-bating."

I feel like the Irishman who said that a man should love his native land whether he was born in it or not. Sometimes I think that a man born under another flag who picks out this country for his home, makes a better citizen than the native, for the first man feels that he must back his judgment. We natives are like the children born into wealthy homes, we do not appreciate them.

Looking at our Government we may criticize the case, but we know that the works are all right. If it were not for America do you think that there would have been 5,000 political meetings yesterday in Germany, or that Japan would have representative government, or that Canada would have its present freedom, or that the Czar would confer with the Douma, or that China would consider western civilization?

America is not a place, but it is an idea. It was not born at Philadelphia, but was born in all the history of the world whenever the idea of political equality was advanced. It was born at Bethlehem, when arose a new philosophy of human brotherhood. It was born again in the Crusades which leveled the baron and serf, again at Runnymede when Magna Charta was wrested from King John, and again on the New England coast when the Pilgrim fathers landed and dedicated it to the liberty of man.

When we solve a problem we solve it not for ourselves alone but for the entire world. With all our progress it must be confessed that great advances are made slowly. It took 6,000 years to move an inch in the case of a needle—to learn how to make the hole at the point instead of the other end—and as a result of the discovery we have the sewing machine that has revolutionized household work. Before this machine came only the rich could have such delicate fabrics as the poorest may now have.

To make the machines we had to have big factories, concentrated capital and assembled labor,

and out of all this has come a millionaire and a problem.

Every new machine disturbs the relation of capital and labor and makes more work for the legislators at Washington. This is the age of co-operation and home life was never so happy as to-day. A nation of 80,000,000 people cannot be ruled like a small town. Within the span of a lifetime our civilization was that of the cross roads where all the requirements of those days were met.

Think of the fact that electricity has come in the last 30 years, and we are now trying to regulate the corporations that utilize this God-given force descending to us from heaven.

We have the air brakes that have saved the lives of many brakemen and the limbs and hands of many more. A few years ago you could not find a brakeman who had not lost some of his fingers. With the manufacture of the air brake comes another millionaire at Pittsburg and another problem.

Will we put an end to all our progress and go back merely to get rid of a few millionaires, or shall we face the difficulties and solve them rationally. It is better not to solve problems too rapidly. It is better to let the principles sink into the hearts of the people.

Mr. Bede spoke of the old militarism of Europe being discarded here through the influence of Washington, Franklin, Madison and Adams. Then came the era of constitutional discussion led by Webster. Now the commercial questions are in the foreground, and whenever the people are ready to change conditions they will be heard unmistakably. Mr. Bede told the story of President Roosevelt changing the national bird from the eagle, which merely screams, to the stork which delivers the goods.

REMARKS OF HON. CHAS. A. TOWNE.

"The Philosopher's Stone" was the subject upon which the Hon. Charles A. Towne, formerly member of Congress from New York, was called upon to speak. As his appearance suggests the man of imagination as well as accomplishments, the subject was well assigned, and his graceful address was one of the treats of the evening. He began by recalling that while he had started in politics as a Republican in Minnesota and had afterward become a Democrat in New York, Mr. Bede had about the same time changed from a Democrat to a Republican.

Mr. Towne referred humorously to the gift of silver to Mr. Vreeland and suggested that while nobody had done as much as the latter for the measure, yet the other members of Congress had voted for it or it could not have been passed. He disclaimed any suggestion that this was a bid for a silver gift to himself. The speaker added that he had made a mistake in voluntarily retiring, since now the congressmen have raised their own pay and have begun to get gifts of silver.

Referring to the modern chemical revelations, Mr. Towne said that much as he hated to mention it in such company, yet it seemed not improbable to him that the immediate future may see the reality of the dream of the ancients in the transmutation of the baser metals into gold. "Stranger things have already happened," he said, "than the realization of the quality which of old was ascribed to the philosopher's stone.

"More important than this is the mission of the United States in transmuting baser ideas into noble aspirations which are bringing humanity to a nobler, higher level."

called upon to speak to the toast "Great Guns." As the hour was getting late he refrained from saying more than a few words, expressive of his pleasure in again meeting the members of the club, he having been one of the speakers at the last annual meeting. Then he told a humorous story or two and sat down amid applause.

GENERAL GRANT'S REMARKS.

Gen. Fred D. Grant, although not on the toast list, was called upon and received a roaring reception, for which he returned thanks, pleading, as did the preceding speaker, the lateness of the hour for not making an extended address. At one time in his life, he said, he had doubts as to whether or not there would continue any call for the profession of arms, and he had thought of learning another. But he reconsidered. Listening to all the fine speakers, it occurred to him that because of such speakers who bring about differences of opinion and cannot reach an agreement, there will always be need for the soldiers and the sailors to step in and do the fighting in order ultimately to settle the questions.

ADDRESS OF CONGRESSMAN BENNET.

Hon. Wm. S. Bennet, the member of Congress from New York, made a brief speech. He chaffed his fellow-members of the house and they enjoyed his jokes as much as did everybody else. One of his stories was of a day when Mr. Bede took his children to see President Roosevelt. The President in his genial way said, "Well, well, what have we here?" Mr. Bede modestly replied, "This is my string of beads."

Colonel Charles H. Luseomb spoke a few words recalling that at the last banquet of the club he had assumed to ask grace in the absence of a dominie and the progress of the organization was shown by the fact that this time it had present a genuine dominie, as well as in other ways.

Following is a list of the officers and committees of the club, all of whom assisted in bringing about the notable success of the affair:

John B. Wood, president; Harry C. Larter, vice-president; Frank C. Beekwith, secretary; Willard H. Wheeler, treasurer.

Board of Directors—Charles F. Brinck, chairman; John L. Shepherd, Leo Wormser, David Kaiser, David C. Townsend.

Dinner Committee—Charles F. Brinck, chairman; William T. Gough, David Kaiser, William H. Kinna, Harry C. Larter.

Speakers Committee—John L. Shepherd, chairman; Edwin R. Crippen, Chas. F. Brinck.

Reception Committee—Louis P. White, chairman; Percy H. Savory, S. O. Bigney, Adolph Schwab, Samuel H. Levy, Augustus K. Sloan, David C. Townsend, Charles R. Jung, Stephen Avery, James R. Gleason, John W. Sherwood, Benjamin F. Griseom, Alfred Krower, Frank C. Beekwith, Willard H. Wheeler, William I. Rosenfeld, Albert L. Stearns, Charles B. Churchill.

Echoes from the Banquet Hall.

W. J. Johnston, of Pittsburg, was kept away at the last moment.

Mr. Bede made some consumers of milk swear

off for an indefinite period after hearing how the cream rises on the pans in Minnesota.

Col. Shepherd was, as usual, a busy man.

Win. P. Sackett was again at home with his old friends from Philadelphia.

John W. Sherwood's glad hand was kept busy, and a smile always went with the shake.

The Philadelphia party was even larger than ever, and was spread over several tables.

David Kaiser, as a distributor, was hailed as Santa Claus, but he didn't seem to mind.

D. C. Percival & Co. were ably represented in Mr. Hardy, spick and span, natty and genial.

Messrs. White, Hutchins and Earle, the "three guardsmen" of the Philadelphia trade, were all there.

Owing to the sudden illness of W. H. Wheeler, he was unable to attend, but O. G. Fessenden took his place.

"He's a Jolly Good Fellow" was sung when Dr. Rogers sat down, and everybody in the audience echoed the sentiment.

"Del" Rogers didn't care whether any trains went back to Scranton, Pa., or not; he enjoyed himself as he usually does.

Senator Grady's speech caused continuous ripples of laughter when he described his few visits to jewelers and Maiden Lane.

Clement Weaver was greeted by many of his old friends, who were delighted to see him, as was James O. Bates, of Baltimore.

"Sit Down" Kohn, in the role of a musician, was not especially successful, although his wonderful accordion caused a number of smiles.

Table C had many a jolly party, but none more so than those two presided over respectively by M. L. Bowden at one end and Leo Wormser at the other.

"Charlie" Brinck is undoubtedly popular, but probably never more so than when he was distributing souvenirs. And he saw that everybody got one, too.

The promptness with which the dinner started amazed many of the guests, particularly those former members of committees who understood the difficulty of beginning on time.

"Charlie" Champenois kept the bread off his shoulders, but he didn't leave his voice at home, as many can testify who heard him touch high C with the ease of a prima donna.

Charles O. Lawton, Boston, is always an interested spectator, but formerly concealed the fact that he is a vocalist of no mean ability. The choruses of the popular songs betrayed him.

Hiram Bliss was another one who enjoyed the speeches to the utmost, and he showed particular appreciation of the bucolic jokes and quips on the Yankees to a degree that suggested a fellow feeling.

S. O. Bigney didn't lose any of the speeches, but got right up in front and heard all there was to be said. Was the future Lieutenant Governor of Massachusetts sizing up the caliber of our Congressman?

Congressman Vreeland, who was late and came in while the dinner was in progress, was given an ovation. The applause lasted from the time he entered the room until he sat down at the speakers' table.

Prominent in the contingent from Buffalo were A. F. King and F. A. Raichle, who were guests of the club for the first time. This could hardly be said of J. K. Thompson, another Buffalonian, who has never missed a dinner.

Of course, "Annie Rooney" had to come, and it did no good to leave it out of the songster, be-

cause everybody knew the words and fortunately the band knew the music. She came with the ice cream, she was sung, and she conquered.

The brooches and other articles of jewelry fastened to the boxes in which ice cream was served, included numerous graceful designs, illustrating what can be done in the manufacture of these ornaments set with imitations of precious stones.

A distinct expression of delight was manifest when the soprano's voice was heard from the gallery above the hall. It is needless to say that Miss Hinkle was the cynosure of all eyes (or ears) in the duet she sang with Mr. Petrie, and was encored again and again.

W. K. McNaught, of Toronto, who was the sponsor of the Canadian Stamping Law, was among the guests. It is needless to say that he followed the remarks of Congressman Vreeland very closely and took in all that was said about the fight for our law in this country.

Wm. I. Rosenfeld had as his guest, Fred. Buxhorn, of Antwerp, Belgium, who had not been in New York for many years. This was the first time he had attended a banquet of the club, and he thoroughly enjoyed and appreciated every feature.

Congressman Bennett's shafts on his brother speakers caused many a smile, and his relations of incidents in Congress during the fight for the stamping law were especially funny. After telling how Mr. Vreeland had spread a large number of exhibits of watches on his desk, he described how some wag had convulsed the House by putting three oranges on a stick, making a pawnbroker's sign and placing it above the New York Congressman's desk.

It was the general opinion that the souvenirs, neat little carriage watches in morocco cases, were the most pleasing of the many appropriate articles ever given out on similar occasions by the club. Some of the members say that because of the taste and tact of the committee in making its selections their wives welcome the souvenirs and overlook the late hours. The watches are noiseless, comprising a nickel, seven-jeweled movement, with breguet hairspring, porcelain dial and heavy numerals and hands. The timepieces were from the factory of the Seth Thomas Clock Co.

S. Fuller is a new jeweler in Steelville, Mo.

L. R. Mogle has resumed business in Winfield, Kans.

M. H. Macomber, Charles City, Ia., recently began business in Anita, Ia.

Gramse & King are about to engage in the retail jewelry business in Superior, Nebr.

C. P. Johnson & Co., dealers in general merchandise, John Day, Ore., have added a line of watches.

Albert Kuhlmann recently opened a watch repairing and jewelry store at 214 Second Ave., San Mateo, Cal.

The Binder Jewelry Co. was recently incorporated in Greenville, Minn., with a capital stock of \$15,000. The incorporators were Frank Binder, T. A. Huntzberger and others.

Moncreiff & Co. is the name of a new concern which is located in Fitchburg, Mass. W. H. Stevenson, formerly in business on his own account, will be associated with the firm.

J. W. Davis and R. W. Hackbarth have formed a partnership to conduct a jewelry and watchmaking business in Sealy, Tex. The business will be carried on in Mr. Hackbarth's drug store.

The Walter E. Bush Co., Inc., was incorporated last week, with a capital of \$5,000, to deal in jewelry. The incorporators are: W. E. Bush, H. F. Bush, Jersey City, and F. V. La Bountie, of New York.

A new retail jewelry store is about to be opened in Greenville, S. C., to be known as the Greenville Jewelry Co. The business will be conducted under the management of L. Deoderlein.

The Atlantic Comb Works, Brooklyn, was incorporated last week to manufacture hair combs, and other hair ornaments, with a capital stock of \$2,000. The incorporators are: E. H. Nimmeth, Brooklyn; T. Frankenstein and J. Sganga, New York.

Death of Thomas F. Pryor.

NEWARK, N. J., Jan. 29.—Thomas Francis Pryor, a member of the Pryor Novelty Co., whose sons are the officers of the company, died last Friday at his home, 167 Avon Ave., after an illness of more than a year. Kidney trouble were the cause of death.

Mr. Pryor was 52 years of age. He is survived by a widow and four sons. The latter are Thomas F., Jr., Joseph E. and John A. Pryor, of the Pryor Novelty Co., of this city, and Robert L. Pryor, of the Tiffany studios, New York.

Mr. Pryor was a life-long resident of Newark, and had a wide circle of friends. In his younger days he was active in the athletic world in Newark. He was for many years connected with the tool-making department of the Domestic Sewing Machine Co., and was also an Assistant License Inspector.

New York Jewelers Call Meeting to Act on Uniform Stamping Law for All States.

The campaign to obtain the enactment in all the states and territories of gold and silver stamping laws that will be uniform with the Federal act, is now underway in New York. The draft of a proposed measure was compiled for and published by THE CIRCULAR-WEEKLY in the last issue. A call for a meeting to take definite action was circulated in New York, Monday, and in a short time was signed by a number of representative men and firms. The call with the signatures follows:

The call reads:

To the Manufacturers and Wholesale Dealers in the Jewelry and Allied Trades in New York, New Jersey, Providence and Attleboro:

In view of the urgent recommendation of Hon. E. B. Vreeland, made in his speech at the dinner of the 24-Karat Club, at New York, Jan. 25, 1907, that immediate steps be taken to secure the passage by the legislators of the States of the Union of legislation uniform in character with the Federal Law passed by Congress in 1906, and relating to the stamping of gold ware and silverware, you are invited to attend a meeting to be held in Room 43, 11 John St., New York, on the 1st day of February, 1907, at 2:30 p. m., for the purpose of taking such action as may be deemed wise and proper in the premises.

Dated Jan. 28, 1907.

The call was signed by:

T. W. Adams & Co., E. M. Gattle & Co., The Gorham Co., Reed & Barton Co., Theodore A. Kohn & Son, Elgin National Watch Co., J. R. Wood & Son, Julius King Optical Co., E. G. Webster & Son, The C. G. Braxmar Co., Alois Kohn & Co., The Jewelers' Circular Publishing Co., The Crescent Watch Case Co., Day, Clark & Co., Sloan & Co., Cross & Bequelin, Tarrant & Gismond, A. Wittnauer o., William J. Ward, Carter, Howe & Co., Sinnoek & Sherrill, Keystone Watch Case Co., Roy Watch Case Co., Robbins & Appleton, N. H. White & Co., Mathey Bros., Mathez & Co., Dubois Watch Case Co., Aiken, Lambert Co., Aiken, Lambert Jewelry Co., Meyer Bros., May & Co., American Watch Case Co., Charles L. Depollier.

Death of Chris. Jenssen.

Word was received last week of the death from appendicitis of Chris. Jenssen, a jeweler of Lake Nebagamon, Wis. The remains were taken to Baldwin, Wis., at which place the funeral was held, Jan. 17.

Mr. Jenssen had been in the jewelry trade at Lake Nebagamon for a number of years. He was a Norwegian by birth and was prominent among his fellow countrymen in the business world of that section. He was a member of many fraternal orders, among others the I. O. O. F., Eagles and I. S. W. A., all of which organizations had representatives at his funeral.

Death of J. J. Lohr.

JOHNSTOWN, Pa., Jan. 23.—After 20 years of suffering from a disease of the bones, J. J. Lohr, a jeweler of Hooversville, this county, died Jan. 19. Though a cripple for years, Mr. Lohr was able to manage his jewelry business. He but recently returned from a Pittsburg hospital, where he was operated upon for the third time. However, his condition did not improve.

Mr. Lohr was 31 years of age, and is survived by several brothers and sisters. He was unmarried.

M. J. Casey is advertising a closing out sale of his stock in Denver, Colo.

Precious Stones Odd Gems

SEVERAL NEW SPECIALTIES IN GEMS HAVE RECENTLY BEEN ADDED TO OUR STOCK

SEND FOR SELECTION

"**GEMFINDER**" takes a melancholy pleasure in referring the trade to his advertisement of April 25th last, in the "Jewelers' Circular." Unfortunately, his prophecy has been fulfilled. Not only have Precious Stones advanced, but the end has not yet been reached. Sapphires have gone up at least 25 per cent. in the last six months, and they will go still higher.

"Gemfinder" again warns prospective buyers not to delay. All kinds of Precious Stones are scarce and prices on some may become prohibitive.

38TH ANNIVERSARY NUMBER

In accordance with its regular custom, THE JEWELERS' CIRCULAR-WEEKLY will celebrate its anniversary with the issue of February 6.

Praise from a High Source.

THE compliment paid by one of the principal speakers at the 24-Karat Club banquet Friday evening to THE CIRCULAR-WEEKLY for the part that it took in obtaining the National Stamping law from the last session of Congress, was as gratifying as it was unexpected.

Mr. Vreeland again showed the deep interest he has taken in the subject by going further and pledging what support he is able to give in favor of State laws on the line of the proposed bill.

Important Decision on Smuggling.

THE decision of the United States District Court, declaring forfeit to the United States a quantity of emeralds brought into this country without the formality of being entered at the Customs House or duty being paid thereon, which was mentioned in the last issue of THE CIRCULAR-WEEKLY, may prove important to the trade, as the law laid down by the judge to some extent clears the subject of some of the uncertainty which has arisen in the various litigations over smuggling, and may serve to stiffen the backbone of some of our customs officers and officials when they come to deal with smugglers and smuggled goods.

While the professional smuggler has not been treated very leniently by the Government or its officers, the ease with which tourists have escaped penalties after they had made unsuccessful attempts to bring in

dutiable articles clandestinely, has often been the subject of remark, both by the public and the press. Whether it has been due to the carelessness or laxness of the customs officers or simply to a doubt in their minds as to the success of any proceedings that they might institute, cannot be said with certainty, but if it is the latter the decision of Judge Holt should give them new courage to go ahead and at least obtain the confiscation of every article smuggled past the customs line, whether this is done by an ordinary dealer in the course of business or a millionaire's wife, who is bringing home a present from Europe.

The court's decision seems to clearly indicate that if the article is not declared to the customs officers it can be forfeited under proper proceedings, and if this is true there is no excuse for any more compromises which allow tourists to obtain the property which they have attempted to smuggle by simply paying duty after they have been caught in the act.

Many Good Things in the Anniversary Number.

WITH the next issue, Feb. 6, this journal will publish its 38th Anniversary Number, and we feel safe in predicting that our subscribers will be both surprised and pleased with the large number of interesting features which this paper will contain. It will be one of the largest and most ambitious productions in the way of a trade paper that has ever been sent to jewelers, and we feel that between its covers there is not one man in the trade, from the youngest employe to the oldest merchant, who will not find many articles that will both interest and instruct him in his business.

In addition to special technical articles and other valuable information to be found in the Horological and Optical Departments and the business information to be found in the many new articles in the Storekeeping Department there will be a large number of special articles covering the history of Italian jewelry, caskets, the trend and fashion in jewelry, the gold room of the Metropolitan Museum, bracelets in all ages, and a host of others. Jewelers will not only want to read these carefully, but they will want to keep them for reference in the future. This is a number that the retailer or manufacturer cannot afford to miss, and one which will make a valuable acquisition to his business library, no matter how complete the same may be.

ON MEMORANDUM

After the Holiday Clean-out

Your cases need filling up. We will send you on approval anything you want in Diamonds and Diamond Jewelry to fill up. There's no question that prices will go still higher, so you'll be the gainer if you let us know at once just what you need.

New York Notes.

S. Handler, jobber, moved this week from 271 E. 78th St., to 37 Maiden Lane.

David Hartstem, 4 Avenue C, has bought the stock of Marcus Weil, 321 E. Houston St.

C. F. Brinck started Monday on his annual western trip for the Crescent Watch Case Co., to be gone about two weeks.

Wm. C. Horowitz, of J. Horowitz, 11 Maiden Lane, sailed Saturday for Europe, intending to visit Antwerp and Amsterdam.

C. W. Harman, general manager of Joseph Fahys & Co., and his family, are passing two or three weeks at Pinelhurst, N. C.

Harry G. Webb, of the Passmore Gem Co., Boston, Mass., has been passing a few days in New York, stopping at the Murray Hill Hotel.

Joseph Fahys and George E. Fahys, of Jos. Fahys & Co., with members of their families, are to take a pleasure trip to the West Indies during February.

Alfred M. Haring will hereafter represent Carter, Howe & Co., 9-13 Maiden Lane, in the south, and Frederick Lapham will represent this firm in the east.

At the recent annual election of the Metropolitan Bank, George E. Fahys, of Jos. Fahys & Co., was re-elected to the advisory board of the Maiden Lane branch.

M. Newhouse, representing Schultz, Leiss & Co., and also Weizenegger Bros., Newark, N. J., started, last Thursday, on a trip to the Pacific Coast and northwest.

Harry C. Adler, of Chas. Adler's Sons, 527 Fifth Ave., New York, returned last Wednesday on the *Kaiser Wilhelm der Grosse* from a trip to France and England.

T. I. Smith, of the T. I. Smith Co., North Attleboro, Mass., spent a couple of days last week at the New York office, 13 Maiden Lane. He was en route to Florida and left here Saturday.

F. R. Horton, F. W. Stanbrough and H. L. Farrow have been admitted to membership in the firm of Carter, Howe & Co., 13 Maiden Lane. A. Girardot has also been given an interest in this firm.

C. M. Levy, 90 William St., and Edward W. Kohn, of Theo. A. Kohn & Son, 321 Fifth Ave., were among the talesmen examined last week for jurors in the Thaw murder trial. They were both excused.

James J. Doll, who was formerly in the employ of A. S. Zugsmith, Philadelphia, Pa., has taken a position with the Keller Jewelry Mfg. Co., 64 Nassau St., as traveling salesman. His territory will be in the eastern States.

Jos. Frankel's Sons will vacate, May 1, their present quarters, 68 Nassau St., to move to the new building at 576 Fifth Ave. The offices at present occupied by Jos. Frankel's Sons have been leased to L. Heller & Son, 51 Maiden Lane.

Henry W. Wipf, who was sent to prison in November, 1905, for stealing from his employers, Geo. Borgfeldt & Co., was released last week, his sentence having been commuted by Governor Hughes. The young man was the sole support of aged parents.

Geo. O. Street & Sons, 24 John St., who have been located on the block between Broadway and Nassau St. for 45 years,

have leased larger office quarters in the new Lorsch building, 35 Maiden Lane. They will also move their factory to 105 Nassau St., corner of Ann St.

A meeting of creditors of the Rest Fenner Smith Co., manufacturer of umbrella handles and canes, at No. 33 Bleecker St., was held last Thursday in the office of Seaman Miller, referee in bankruptcy, and C. F. Leimig was elected trustee, with a bond of \$6,000. The liabilities are \$23,883.

Pawnbrokers received last week from Inspector McLaughlin a list of 91 watches, each stolen from a different person, many of them valuable timepieces, and it is said that there has been more stealing of watches by New York pickpockets of late than there has been for some time before.

J. Henry Theberath, who was designer for Bippart, Griscom & Osborn, for 15 years, together with Philip Rittesbacher, foreman for the same firm, and W. W. Carpenter, have organized a new company under the style of Theberath & Co. Quarters have been leased at 13 and 15 Franklin St.

At the annual meeting held last week by the American Watch Case Co., Toronto, Can., the following officers and directors were elected: President, W. K. McNaught; vice-president, E. C. Fitch; treasurer, Chas. H. Hulburd; secretary, John McKnight; directors, T. Zurbrugg, Irving Smith, F. R. Appleton, G. V. Dickinson, and C. N. Fogg.

John H. Patton, who until recently conducted a store at 111 W. 125th St., and against whom a petition in bankruptcy was filed Jan. 5, has returned to Arthur Weil, the receiver's attorney, pawn tickets representing goods which have been pawned by Patton from time to time. In all, \$3,500 was obtained by the jeweler on these pledges.

At the annual meeting held last week by the Cooper Diamond Cutting & Polishing Industry of America, the following directors were elected: Herbert Cooper, E. H. Dean, C. J. Ryan, Peter Lythgoe, and I. H. Bower. The directors then selected Mr. Cooper as president and treasurer, Mr. Ryan as vice-president, and Mr. Dean as secretary.

N. Gamse, 54 Maiden Lane, reported this week the loss of a tray of ladies' watches, costing \$600. He supposed that the watches were in his sample case, which he left over night in his office, and the next morning one of the trays with the watches was gone. He thinks the thief was not a professional, because the remainder of the stock was not touched.

Henry John Gurnell, who had been for many years a jeweler and watchmaker in Brooklyn, N. Y., died Tuesday of last week at his home, 84 Cooper St., in that borough. He retired a number of years ago from the trade. Mr. Gurnell was born in England in 1840, and for 55 years had lived in that section of Brooklyn in which he died. His widow and one son, Joseph H. Gurnell, survive him.

A. L. Stearns, president of the Roy Watch Case Co., is going about with an arm in a bandage, and is receiving congratulations from friends on the fact that his injuries in an auto accident were not more serious. Mr. Stearns was recently cranking the front wheel, preparatory to

making a start, when it backed fire, and the rapidly revolving handle struck him in the wrist, breaking one of the small bones.

N. Moskowitz, a diamond setter at 71 Nassau St., last week admitted to partnership his brother, J. H. Moskowitz, and the new firm took the name of N. Moskowitz & Bro. At the same time the business was moved from the second floor, where part of an office has been occupied, to the ninth floor, where the firm has quarters of its own.

Josiah Wedgwood & Sons, Ltd., Etruria, England, made a change this month, and instead of being represented in New York by houses which also handle other lines, have now their own salesrooms at 25 Broadway. Kennard Wedgwood, the great-great-grandson of the founder of this house, recently arrived in New York to take charge of the business in the United States and Canada, making his headquarters at this office, where the import samples of the present season are now shown.

On complaint of Solomon Teitelbaum, of 1266 Broadway, Brooklyn, a youth named Arthur Atwood, of 819 Quincey St., was taken before Magistrate Furlong in the Gates Avenue Court last Saturday to answer a charge of grand larceny. Atwood was employed by Mr. Teitelbaum as a clerk, and is accused of stealing a diamond ring. His employer says other articles have also been missed, and the young man has been spending money freely in attention paid to a young lady employed in a nearby store. Atwood was held in \$1,000 bail for examination to-morrow.

Two bracelets that have been in the show window of the L. E. Waterman Co., 173 Broadway, for several days, are connected with an interesting bit of history. The larger bracelet is made of gun iron, the smaller one is of rock steel, and is made from bayonets and swords. After the battle of Waterloo, German ladies volunteered to help the country by giving up their jewelry, stipulating that the government should exchange for the articles others made from the weapons and implements of war. The bracelets were made of metal from the guns and weapons captured at Waterloo. They were given to E. A. Suverkrop by his mother, who had them in her possession for 50 years.

Chas. T. Dougherty, who was vice-president of Wm. L. Sexton & Co. for five years, and was connected with that house for 22 years, is now associated with Frank C. Osmer, and they have formed a corporation to manufacture jewelry under the style of the Osmer-Dougherty Co. The new company will be located after Feb. 15 at 291 Seventh Ave., between 26th and 27th Sts., and will take over the business of the Frank C. Osmer Co., now at 15 W. 27th St. Commodious quarters have been secured in the new location and the facilities will be increased. Mr. Osmer was formerly with Williamson & Co., and later with the Thos. F. Brogan Co. He established the Frank C. Osmer Co. about five years ago.

Creditors of Morris Rubin, retailer at 38 Main St., Paterson, recently filed a petition in bankruptcy against him and obtained the appointment of Louis H. Grunauer, a law-

New York Notes.

(Continued from page 65.)

yer, as temporary receiver. The bankruptcy proceedings checked an effort of Berie Miller, a New York man, who expected to sell the stock to satisfy a claim for \$1,000, based on a chattel mortgage filed last November. He began an action to foreclose the mortgage, and the store was turned over to Constable Wilson Cook, who advertised a sale. Before the sale could be held the merchandise creditors acted, and the receiver is now in charge of the store. As the chattel mortgage was filed within four months, the merchandise creditors will claim precedence. Rubin began business in Paterson in 1902, having failed some years before. Last November he compromised with creditors at 20 per cent. Outside of the mortgage, the liabilities are said to be small.

Syracuse.

The annual meeting of the Day Time Register Co., which was to have been held last Wednesday, has been adjourned until to-day.

The funeral services of W. L. Bunde, of the W. H. Bunde Time Recording Co., who died Jan. 19, were held Tuesday, Jan. 22, at his residence, 207 McLennan Ave. The deceased, who was 61 years old, is survived by a widow and two sons, Willard H. and Royal D. Bunde.

Word was received here from England last week, to the effect that the Scottish police had in custody James Walton, alias James Gordon, who is wanted in this country to answer a number of robbery charges, among which is said to have been the theft of \$2,500 worth of diamonds and jewelry from the store of Leiter Bros., in December, 1902. Owing to the fact that Harry Leiter, of the firm, refused to answer questions before the Grand Jury, early last week, the District Attorney announced that no effort would be made to extradite the accused man. The questions which Mr. Leiter refused to answer related to whether or not restitution had been made by Gordon's friends.

Members of Buffalo Optical Society Attend Interesting Meeting.

The regular meeting of the Buffalo Optical Society will be held Feb. 1, 1907, at 8 o'clock, in the Lafayette Hotel, Lafayette Park, Buffalo, N. Y. Dr. Arthur Bowen, Rochester, will continue his course of lectures. His subject will be "Anomalies of the Ocular Muscles." William H. Hills, Andover, N. Y., has applied for membership in the usual way. The Rochester Optical Society's invitation was unanimously accepted, viz., to attend the next meeting, Feb. 12. A lecture by a prominent physician and a good time is promised by the secretary, C. J. Summerski. Those who are to attend have been requested to notify Secretary E. V. Sycher before Feb. 1. Full directions will be given as to details. The following members expect to attend: Messrs. Simcox, Williams, Aiken, Cushing, Shaw, Hill, Hansen, Martin, Taylor, Aldridge and Sycher.

News Gleanings.

H. Bacher has moved from Portland, N. Dak., to Mayville, N. Dak., where he has better quarters for the display of his stock.

J. M. Frear, 51 Court St., Binghamton, N. Y., is closing out his stock at auction. He will retire from the jewelry business and engage in other lines.

A meeting of the creditors of Chamberlain & Son, Salem, Mass., was held in the office of John M. Raymond, assignee, 81 Washington St., Monday last, at 2:30 p. m.

Clemens Lepsch has withdrawn from the firm of J. H. & C. Lepsch, Ridgway, Pa. J. H. Lepsch will continue the business, and expects to make many improvements in the store and increase his patronage.

H. W. Goldberg, head watchmaker for Robt. P. Kiep, Joliet, Ill., has resigned to go to Corning, N. Y., where he will take charge of his father's jewelry business.

R. M. Vernon, trustee in bankruptcy for W. H. Saxton, formerly of Middletown, N. Y., has settled his account and a dividend of 13 65-100 per cent. was recently declared to the creditors of Mr. Saxton.

Walter Harvey, who was recently taken into custody in Chester, Pa., on a charge of selling bogus jewelry, when arraigned before Magistrate Smith in the City Hall last week was discharged, no one having appeared to testify against him.

The Reama Silver Plate Co., of Springfield, O., was incorporated last week, with a capital stock of \$5,000, having taken over the business of Fred W. Reama, on W. Main St. New facilities will be added to the plant and the business will be extended.

Members of the North Dakota Retail Jewelers' Association met in annual convention in Fargo, Tuesday and Wednesday of last week. A good proportion of the 13 members of the organization were present. E. P. Sundberg, of Fargo, presided. C. E. Tillson is the secretary and treasurer.

Notices were sent out last week by the Jewelers Board of Trade, New York, stating that the stock and assets of G. H. Catlin, St. Joseph, Mo., had been sold for \$13,014, which was 75 per cent. of the appraised value. It is expected that a first dividend of 50 per cent. will be paid within 30 days.

The prompt action of Wm. Falls, a watchman, on Jan. 24, averted what might have been a disastrous fire in the factory of Simeon L. & Geo. H. Rogers Co., on Market St., Hartford, Conn. The fire originated in the engine room in the rear of the building, but was extinguished before any serious damage was done.

George Bettie was placed on probation, last week, at Brockton, Mass., after a hearing in court, on a charge of conveying a leased diamond ring, valued at \$120. It appeared Bettie took the ring from Chas. H. Davis, on lease, paying for it in instalments. When he got out of work and out of funds and his wife was ill, he pawned it with the S. D. Grossman Co., and turned over to Davis the money and the pawn ticket. By the time Davis got around to redeem the ring the period of redemption had expired and the ring had been sold. Davis brought action against Grossman, and Bettie was arrested in connection with the case. It was shown that he acted, not

from criminal intent, but under pressure of circumstances, and a fine of \$50 was imposed, but the mittimus suspended.

H. S. Anderson, of Robinson & Anderson, 375 Main St., Worcester, Mass., has reported to the local police what he believes was an unsuccessful effort to entice him into the loss of one or more valuable diamonds. Last Thursday, he was called by 'phone to the home of Dr. Louis A. Auger, 79 Park St., and asked to bring some diamonds, from which Mrs. Auger wished to select a costly one. He took an assortment worth about \$2,000, but he found the utmost ignorance of the whole matter at the Auger home. On his return he found his clerk, Miss Katherine Hartigan, had been called to wait on two men who wanted to see diamonds, entering the store just as the proprietor left. She suspected them and refused to allow them to take a single stone in their own hands, but insisted upon showing them on her own fingers. The men left without making a purchase.

A delightful occasion was the annual banquet given one evening recently in the Oliver Hotel by the officers and executive committee of the South Bend Watch Co., to its foremen and salesmen. Nearly all the States were represented by salesmen. Clement Studebaker, Jr., the president of the company, made an admirable toastmaster. A number of officers and employees responded to toasts. In the speeches were many references to the growth of the business and the prospects. It was stated that the output had increased 60 per cent. in the last year as compared with the year before, and a similar increase was predicted for 1907. The capacity of the plant has been nearly doubled in 12 months. Four additional salesmen are to go out with the traveling force. An immense floral watch made of pink and white carnations, roses and lilies of the valley was the feature of the table decorations.

Trade Gossip.

Chester H. Wells, Mishoppen, Pa., has had a new line of dies made for the manufacture of his original patent ring adjusters, to be made in 10 and 14 karat, gold filled and metal.

Mitchell & Tillotson, the jewelers' auctioneers, of 37 Maiden Lane, New York, are now conducting a successful sale for the Ford Co., New Haven, Conn. They recently closed their second sale for F. C. Bennett, Gloversville, N. Y.

Lees & Sanders, smelters and refiners, of 4, 5 and 6 Warstone Lane, Birmingham, England, have greatly increased their trade in sweeps from the United States, and are now, by means of a new plant, in a position to handle all sweeps sent from this country more promptly and better than ever before.

Supplement 5, a neat catalogue of Westminster china mantel clocks and quarter-hour strike mantel clocks has just been issued by Geo. Kuehl & Co., 80-82 Wabash Ave., Chicago. There are 18 illustrations in all, 13 showing the Westminster china clocks and five depicting the quarter-hour strike clocks. The size of this supplement is 5½ by 8 inches, the paper used is of extra heavy quality, and the illustrations are of a high grade.

The Diamond Markets.

ANTWERP, Jan. 17.—The general condition of the market here is about as usual. All the factories are working full force, so that the merchants of this city will have a good stock with which to begin the new year. Roses and six faces, small stones of second grade, are rarely called for.

The Diamond Club, of Rue du Pelican, gave a dinner to three of its officers, namely, Messrs. Adler, Grewel and Pauwels, who recently received the Order of Leopold. The following members were present: Financial Committee—Messrs. F. De Ridder, C. Marien, J. Schermant, F. de Bom, E. Van Bever, F. Voordeckers; Committee of Interior Order—Messrs. P. Stroobants, F. Mertens, C. Von Boxel, F. Geudens, L. Lorson, D. Leclercq, M. Carança and M. Finkelstein.

F. De Ridder congratulated the guests and spoke of the activity and the devotion of the president, Jos. Pauwels, during more than 12 years. He thanked Mr. Grewel for all the service which he had rendered, and spoke of Mr. Adler as the "workman of the first hour," inasmuch as he had erected the home of the Club and had given the Antwerp diamond industry an institution whose benefits were numerous. Addresses were also delivered by Mr. Marion and the three guests.

The following foreign buyers were in Antwerp during the past fortnight: Messrs. Schwartz, Woelffling, B. Rapoport, M. Slatotzky, Fulman, Gorodinsky, Rollinger, J. Roditti, Goldenberg, Raoul Heim,

Ayam, Garabodian, Slyper, Binnenfeld, A. Levy, Geurck, Goudekot, Strasburger, Wins, S. Horowitz, Citroen, L. Straus, all of Paris; Mr. Azavey, Milan; Messrs. Goldberg, Mednikoff, Strauss, Fleischmann, Kauffmann, Lichtenstein, Tufeld, Mendelsohn, and Geo. Gallop, London; J. Goldberg, Cracovia; Mr. Elkau, Bialystock; Mr. Marcus, San Francisco; Jos. Linger, Canoff; Messrs. Korenberg, Bloch, Gross, Vienna; Messrs. Herzfelder, Spitzel, New York; Mr. Saehaezenor, Berlin.

PARIS, Jan. 17.—The condition of the market here during the first two weeks of the new year was much better than that which marked the end of 1906. Many of the local merchants have already set out to visit their customers in France, Switzerland, Spain and Italy, and their reports are very satisfactory. A Parisian house recently made a sale of brilliants and pearls to an American buyer amounting to 500,000 francs. The stock of a local dealer, who stopped payments in October has been sold at auction. The pearls and brilliants have been sold at excellent prices, and it is hoped that the creditors will receive about 70 per cent.

The offices of Robert Glattauer, 4 Rue de Provence, have been moved to 83, bis Rue Lafayette. Herman Cohn, of 14, Rue des Petites, Ecuries, died here suddenly. Mr. Ohanian, a pearl merchant, 45, Rue Laffitte, has made a settlement with his creditors on the following basis: 40 per cent. in eight years, one-eighth per year, the first payment to be fixed after the agreement and

without interest. The engagement of Miss Alice Habib and Mr. Salomon is announced.

The Mutual Assistance Society, consisting of precious stone merchants, brokers and cutters, gave its annual ball in the new hall of the Grand Hotel, Jan. 19.

Mr. Probststein, of the firm of Kleinberg & Probststein, diamond importers of New York, was a recent visitor in this city.

AMSTERDAM, Jan. 16.—The new year has opened up most auspiciously in the diamond trade, the sales of precious stones having already been extensive. Buyers of *mêlées* and quarter stones have been particularly conspicuous. Yellow and brown goods have also been sold extensively. The shipments of Kimberley and Welleston in the rough during the past week by the London Syndicate have been readily disposed of.

The following foreign buyers visited this market during the past month: Representatives of G. H. Finck & Co. and Zimmerman, Rees & Co.; L. & M. Kahn & Co.; Arnstein Bros. & Co., Bruhl Bros. & Henius Co., and David Mayer, New York; California Jewelry Co., San Francisco; Saunders, Lorie & Co., Toronto, Ont.; H. Klein, Antwerp; Golasse & Hirsche, Bozenhardt, Hamburg; M. Hahn & Co., Mannikendam; A. & E. Worms, and Lambert, Frères & Co., Paris.

The shipments of "Kimberley" and "Wesselton" rough diamonds shown during the past two weeks by the London Syndicate have found quick buyers.

FINE GENEVA WATCHES

Death of Charles T. Cook.

Charles T. Cook, the president of Tiffany & Co., New York, who had been for 40 years associated in the management of this house, died Saturday last at his home, 2 W. 48th St., New York, after an illness of a number of weeks, starting with a cold. He had given to the business his usual close attention up to the time of his illness.

Mr. Cook was a splendid example of the self-made man of business, rising solely by his own exertions to a position of eminence in the field which he chose. He was born in New York, May 17, 1835, so he was in his 72nd year. When a lad of 12, he entered as an office boy the employ of the house with which he was destined to pass the entire 60 years of his commercial life. Those who knew him back in his early years, speak of Mr. Cook as possessing in an unusual degree adaptability and a ca-

THE LATE CHARLES T. COOK.

capacity for hard work, qualities which hastened his advancement.

Twenty years passed in the various offices gave him a mastery of the details of the business, so that he was thoroughly equipped to take a responsible share in the management in 1868 when he became the assistant treasurer. From 1875 to 1902 Mr. Cook was vice-president, and in the latter year, upon the death of Charles L. Tiffany, he became the president of the corporation. It was said by Mr. Tiffany more than once that he ascribed much of the success of the house to the part taken by Mr. Cook in the management.

Since he became the president, Mr. Cook has continued the progressive policy characteristic both of himself and of his predecessor. The building of the company's palatial structure at Fifth Ave. and 37th St., and the removal of this notable business from the older location at Union Square, were effected under Mr. Cook's administration.

In 1900, Mr. Cook was made an officer of the National Legion of France, and in 1903, the King of Italy conferred an unusual distinction by decorating the New Yorker as Knight Officer of the Royal Order of La Corona d'Italia.

Mr. Cook was one of the oldest members of the Union League Club; also for many years a member of the Chamber of Commerce, Grolier Club, New York Historical Society, National Arts Club, National Sculpture Society, Century Association, Republican Club, American Museum of Natural History, American Scenic Society and other organizations. He was a director of the Knickerbocker Trust Co., of the Bowery Bank, and of the Bank of the Metropolis.

Personally, Mr. Cook was a most lovable man. He was always accessible to the many employes of the house, and his kindly nature endeared him not only to those associated with him in the company, but to a large circle of friends outside of the confines of business.

Mr. Cook is survived by a widow and three children—Mrs. Clarence Porter, E. Dimon Bird and S. Hinman Bird.

The funeral which took place Tuesday morning at Christ Church, Broadway and 71st St., was largely attended, the church being crowded. The various societies of which the deceased was a member were represented and there were present many members of the jewelry trade.

C. M. Robertson & Co., Chicago, Offer to Settle With Creditors at 33 1-3 Per Cent.

Creditors of C. M. Robertson & Co., Chicago, met last week (Thursday), at 329 Broadway, New York, and received an offer of 33½ per cent. in cash as a settlement. The offer was made by Julius Heldman, a Chicago attorney, representing Robertson, who said that his client's troubles were precipitated by Chicago creditors pressing for collection past due notes to the amount of \$1,400.

An examination of his affairs was made by Robertson and his assistants. They found that the stock on hand had cost \$20,000. Outstanding accounts amounted to \$7,000 exclusive of doubtful accounts, which amounted to \$1,000. The liabilities were placed at \$36,000, all for merchandise.

The attorney said that Robertson's friends were ready to loan him money with which to pay in cash on a basis of 33½ per cent.

The creditors who were present, representing a majority of indebtedness, decided that an investigation should be made. Frank Behrandt, in the employ of Moore & Son, Chicago, was selected to appraise the stock, and in this work he will be associated with another appraiser, to be named later.

After an examination of the stock and accounts, the Jewelers Board of Trade will decide whether or not to recommend to creditors the acceptance of the offer now made. Owing to the debtor being in poor health, an extension has not been deemed advisable.

CHICAGO, Jan. 29.—When the trade here learned that C. M. Robertson, trading as the C. M. Robertson Co., had gone east to try to effect a settlement with his creditors, astonishment was expressed that so careful and economical a man should be in financial difficulties after the phenomenally successful year of 1906.

Death of Frank M. Welch.

Frank M. Welch, who had been connected with Alling & Co., New York and Newark, for more than 30 years, retiring a year ago, died Wednesday of last week at his home, 118 Lincoln Pl., Brooklyn, N. Y., after a brief illness. He was widely known in the trade, especially in New York and neighboring cities. He was of a genial disposition and made friends readily, and many will hear with grief of his death.

Mr. Welch was born in Brooklyn 51 years ago. His father, the late William Welch, was a member of the old firm of Spooner & Welch, which for many years

THE LATE FRANK M. WELCH.

had a retail jewelry store on Myrtle Ave., in Brooklyn.

In 1872 the son began work as an errand boy with the firm with which he was for so many years thereafter associated as employe and member. He rose from one position to another, and was a bookkeeper in 1886, when he received an interest in the firm. He continued to fill a responsible position with the firm and with the corporation which was formed in January, 1905. In July of that year, upon the death of Wm. R. Alling, Mr. Welch became the president. Eight months later he retired. Since then he had given attention to a real estate business and had acted as treasurer of the Metropolitan Burglar Alarm Co., New York.

In the Brooklyn Lodge of Elks Mr. Welch was a life member. He was a member of a dramatic club, painted with pencil and crayon, and was an intense lover of music.

The surviving relatives include his widow, a sister and a brother.

Deceased was a nephew of John Welch, with George O. Street & Sons, and a first cousin of Robert Welch, with Benedict Bros.

The funeral took place Friday evening, services being conducted by the Elks.

WOULD YOU INVEST \$600

If you knew positively that you
could double your income?

Of course you would. And this is just what you can do by ordering to-day the most reliable, practical, scientific, accurate and artistic test chart ever published, IT ELIMINATES THE DANGER OF MISTAKES and thoroughly convinces your patient as to your professional skill and ability to diagnose and correct most complicated cases of defective eyesight.

MAYERLE'S LITHOGRAPHED INTERNATIONAL TEST CHART

(COPYRIGHTED.)
The result of many years of theoretical study and practical experience. The only chart published that can be used among people of any nationality, as it contains the different sizes of letters in the following languages: American (or English), German, Russian, Hebrew, Chinese and Japanese, also the illiterate, astigmatic, color and muscular tests thus containing every subjective test known to the optical or medical professions **IN ONE SINGLE CHART.**

Advantages.
The chart with the cabinet is so arranged that the operator can easily manipulate it without leaving the chair. If patient has low vision you can expose, if you wish, only as much of the chart or test type which the patient can read without any effort, thus avoiding many unnecessary questions and provoking complaints that they cannot read all the letters on the chart.

Prices.
Mayerle's Lithographed Distant Chart, with cabinet, complete, \$6.00
Mayerle's Lithographed Distant Chart, without cabinet, 3.00
Size of chart 22 x 28 inches.
F. O. B. San Francisco.

Mayerle's new reading test card in seven different languages, including music notes and illiterate test (this card can be used among people of any nationality), \$1.50. These prices are net cash.

⚠ In case chart does not meet with your approval after ten days' trial return it to us and we will REFUND YOUR MONEY, including charges both ways.

ESTABLISHED IN 1870.

Philadelphia.

Charles H. O'Bryon, 735 Sansom St., was confined to his home ill, last week.

A. F. J. Dorn, 831 Market St., Camden, has recovered from a two weeks' illness.

William Stewart resigned his position last week as watchmaker for G. H. Horner, Wildwood, N. J.

Thomas Bunston, formerly of Haddington, N. J., has started in business as watchmaker for the trade at 720 Sansom St.

H. C. Rumpp, of C. F. Rumpp & Sons, sold, last week, the Hotel Edouard for \$600,000 to Felix Isman, a real estate dealer.

William Strawley, formerly with J. W. Ernst, 710 Chestnut St., has accepted a position with John F. Blisard & Co., 727b Sansom St.

John Eichmann, watchmaker, late with Herzberg Bros., 8th and Arch Sts., will open a repair shop for the trade in the Burd building, 9th and Chestnut Sts., Feb. 1.

George S. Katz, retailer, 1943 Germantown Ave., is a candidate for election to Common Councils from the 19th Ward. S. I. Levin, 453 South St., is a candidate for school director.

The Koshland & Italie Co., 7th and Chestnut Sts., is making extensive alterations to the establishment and remodeling the interior to facilitate the transaction of an increasing volume of business.

The Philadelphia Jewelers' Club holds its annual meeting for the election of officers and for the making of arrangements for the annual dinner to be given on Washington's Birthday the second Tuesday of February.

Sol. Sickles, of M. Sickles & Sons, has been made a member of the finance committee of the Order of Elks to prepare for the big convention to be held here in the Summer. James McMillan, of the same house, is critically ill.

Out-of-town retailers here buying stock during the week included: John McPherson, Mauch Chunk; F. J. Loeb, Tamauqua; M. Rudolph, Wilmington, Del.; H. B. Stratton, Mt. Holly, N. J.; George Ware, Atlantic City; John Merz, Hopewell, N. J.; S. Bell, Atlantic City.

A fire in the jewelry store of Capt. James Stewart, 2043 South St., was extinguished, last week, by a policeman, who risked his own life to do so. The fire was caused by the proprietor's daughter Mary, who carried a lighted paper "taper" to the store. It came in contact with a lace curtain. Her screams attracted the policeman's attention. Acting at once, he extinguished the flames before they had gained dangerous headway.

J. B. Beehtel & Co., wholesale jewelers and material dealers, 725 Sansom St., have leased the building in the rear of their present establishment which goes all the way back to an entrance on Ionie St. This building will be made part of the present establishment, which has become too small to accommodate the increasing volume of business. By the enlargement, the floor space will be doubled. Extensive alterations to the old establishment are also to be made.

About 20 members of the Jewelers' Club of this city and members of the trade here

journeyed to New York City, Friday, to attend the annual banquet of the 21 Karat Club. In the party were: J. Warner Hutelins, William G. Blair, J. Clifford Wilson, William Linker, A. G. Lee, Edmund and Louis Sickles, L. P. White, George E. Donaldson, Bernard Italie and Charles Koshland, of the Koshland & Italie Co. Some of the Philadelphia contingent were members of the club while others are the guests of members.

Providence.

R. Berberian, enameler, is now located at 14 Blount St. Another change in location is that of E. A. Willemin, die sinker, who is now occupying a shop on Eddy St., near Pine St.

The numerous friends of W. Sumner Blackinton in this city heard with regret of his death in the west. Mr. Blackinton had a host of friends here and was at one time, as is well known, in business here.

Herbert S. Tanner, Westminster St., was re-elected Brigadier-General of the Brigade Rhode Island Militia by the General Assembly in Grand Committee last week. The term is five years, and this is the second time Gen. Tanner has been elected to the place.

The well-known firm of Lenz & Rueckert has been dissolved, and hereafter will be known as the Rueckert Mfg. Co., Mr. Rueckert having purchased the business. The concern manufactures trays, sample cases and similar articles used in the jewelry trade.

The Stevens Optical Co. has been incorporated under the laws of the State of Rhode Island, the amount of capital stock being \$300,000. Of this \$200,000 is common and \$100,000 preferred. Mr. Stevens, it is understood, holds all the common stock and \$25,000 of the preferred at 7 per cent. The remainder is held by a well-known local banking institution.

The Board of Directors of the Mfg. Jewelers' Board of Trade, at a recent meeting, elected the following officers for the ensuing year: President, Robert E. Budlong; vice-presidents, William A. Schofield, Harry P. Kent, the latter of Attleboro; secretary and treasurer, Marcus W. Morton. To fill the vacancy on the Board of Directors, F. D. Carr, of this city, was appointed.

At the annual meeting of the Brown & Sharpe Mutual Relief Association last week the reports showed that the organization now has a membership of 2,878. During the year the sum of \$9,448.07 was paid out in sick benefits. The following officers were elected: President, Mitchell Dawes; vice-president, B. V. Morse; secretary, John Harrop; treasurer, S. B. Moulton. Directors: B. V. Morse, J. Kenyon, T. P. Lamphear, L. W. Monahan, M. E. Johnson, J. Howard, E. J. Damon, J. Cooper, F. W. Ripley, J. Slater, J. W. Grant, W. J. Payne, A. E. Harris, W. A. Henry, J. D. Wilkinson and M. J. Donnelly.

Feb. 9 will be the date of the mid-winter dinner of the New England Manufacturing Jewelers & Silversmiths' Association. The affair will be held in the Masonic building on Dorrance St., and is expected to be fully up to, if not ahead of, the previous efforts of the organization along these lines. Hon. John Barrett, formerly Consul from the

United States to South America, is expected to be the principal speaker. He is now at the head of the Bureau of American Republics, and the subject of his address will be "The Great Commercial Opportunities of the United States in Latin-America." There will be the usual attendance of prominent State and municipal officials, as well as other well-known invited guests.

The second annual ball of the S. & B. Lederer Mutual Benefit Association was held Friday evening, Jan. 18, and proved even more successful than the one given last year. The large gathering enjoyed the affair thoroughly, and socially and financially the ball was voted a success. The dancing began at 8 o'clock. The programme issued by the committee was a pleasing souvenir of the occasion. Refreshments were served to those present during the intermission, after which dancing was resumed until 1 o'clock. Credit is due the committee in charge of the ball for the manner in which the arrangements were carried out, especially to Arthur Kelley, chairman; S. Glaser, secretary; Walter Lederer, treasurer, and Floor Director J. J. Sullivan and his aids.

Lancaster, Pa.

Martin S. Frobisher is spending a week in New York.

Henry Weeber has returned to his store after an illness of nearly four weeks.

H. Z. Rhoads has sold to John W. Young the store property at 257 W. King St.

E. J. Guilford, a department foreman of the Hamilton watch factory, was renominated for city council Saturday by the Fusionists of the Fifth Ward.

E. L. Rinckenbach, Harrisburg, well known in Lancaster, is about to make an addition to his store, to contain an optical department, which will be presided over by his son.

John B. Roth, Jr., made the handsome past officer's jewel which was presented last Tuesday by Conestoga Council, No. 463, Royal Arcanum, to its retiring Regent, J. De Barry Heinitsh.

Oliver Mentzer, foreman for Ezra F. Bowman's Sons, who was ill with grippe, has returned to his duties. Frederick Schaeffer, of the same establishment, is back from a visit to Philadelphia.

A letter received last week from Francis L. Watres announces his recovery from a serious illness at Jackson, Miss. He left over a month ago for Los Angeles, Cal., for his health, and broke down at Jackson and stopped with friends.

T. Wilson Dubbs and S. Kurtz Zook, local jewelers, and Alfred W. Moyer, manager of the Non-Retailing Co., were guests last Friday evening in New York at the annual dinner of the 24-Karat Club. Messrs. Dubbs and Moyer, with W. W. Appel, were attendants last week at the annual turkey supper given by the men of St. Paul's Reformed Church.

The following jewelers recently visited Lancaster: Will K. Rebert, York; E. P. Zane, Christiana; L. J. Miller, Ephrata; S. H. Miller, Mt. Joy; H. F. Oberlin, of Howard L. Oberlin & Bro., Columbia; S. J. Kirk, Wakefield; J. Allen Kirk, Quarryville; George L. Hepp, Lilitz; H. F. Andrews, Strasburg; C. August Carmany, Coatesville; Charles E. P. Keim, Newport.

Ball's Official Standard R. R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan:

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

The watch will win you his business and friendship for always.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

Chicago Notes.

E. R. Snow, of the E. Howard Watch Co., Waltham, Mass., was here last week.

Robert W. Barlow, with C. H. Knights & Co., is spending a week at West Baden, Ind. F. S. Levy, of M. Schussler & Co., stopped here a few days on his way to New York.

Cloyd C. Dickinson, formerly with J. A. Schoenthaler, is now with Herbert W. Allen & Co.

F. E. Behrendt, representing Moore & Son, Newark, N. J., is making a visit to the factory.

C. M. Lane returned from Attleboro, the latter part of last week, too late for the banquet.

E. Dorrance, representing Simons, Bro. & Co., is making his annual visit to the factory at Philadelphia.

H. E. Jones, local representative of the Wadsworth Watch Case Co., is making a short western trip.

George H. Thomas is making a 10 day trip, which will take in St. Louis, Cincinnati and Indianapolis.

A. H. Wittstein, of the Schrader-Wittstein Co., has been making a visit to the factory at Newark, N. J., this week.

A. Max Holzheimer, manager of the Chicago office of the Omega Watch Co., returned last week from his visit to the factory in Switzerland.

A. Hirsch, of A. Hirsch & Co., who has been absent from his place of business for the past three weeks, is improving and is now back at this desk.

Herbert E. Cobb, representing the Daggett & Clap Co., is making a trip to the Pacific Coast, as is also L. E. Fay, representing the R. F. Simmons Co.

Tom Rudd, of Charles E. Graves & Co., is spending a week at Mt. Clemens, Mich.; Col. Keeler, of the same firm, is spending the winter at Tarpon Springs, Fla.

Louis Manheimer, with his wife and daughter, will sail this week on the *Moltke* for a three months' cruise in the Orient and a tour of points of interest in Europe.

Harry Jehlenger is now representing A. Bushee & Co., Attleboro, Mass., and Lackner & Ohl, Newark, N. J. His office is located at room 214 Silversmiths building.

H. A. Forbes, San Francisco agent for the Dueber-Hampden Watch Works, passed through here last week on his way to the Pacific Coast after a visit to the factory at Canton, O.

The mother of H. M. Carle, local manager of the Keystone Watch Case Co., died Jan. 11 of old age. The body was sent to Baltimore for burial, where Mr. Carle went to attend the funeral services.

Among the diamond men here last week were: Dan Price, with Wm. S. Hedges & Co.; Frank Hough, with Mount & Woodhull; S. C. Powell, and Mr. Mayer and Mr. Henius, of Bruhl Bros. & Henius.

A cablegram dated Naples, Italy, from Max Mayer, of the Western Watch Case Mfg. Co., states that he, in company with Abe Frank, will make a tour of England and the continent before his return on April 15.

George D. Lunt, of the New York office of the Towle Mfg. Co., and a brother of E. M. Lunt, of the Chicago office of the same company, stopped here to attend the banquet Jan. 19, on his way home from San Francisco.

The trial of Julius Kahn, who promoted the Cash Buyers' Union, in connection with which he is charged with using the mails to promote a fraud, is set to come before Judge Landis in the United States District Court this week.

S. F. Scott, president of the S. F. Scott Co., 1103 Heyworth building, was married recently to Miss Margaret Regan, of this city, at Crown Point, Ind. Mr. and Mrs. Scott left for Havana, Cuba, for a three months' wedding trip.

M. H. Cowan, who travels for Rettig, Hess & Madsen, came in from Kansas City, last week, on being notified that his little girl was ill with appendicitis. The child was taken to the Mercy Hospital and a successful operation was performed on the 24th.

Theo. Kuehl, of Geo. Kuehl & Co., will spend a few days in New York prior to sailing for Europe on the *Kaiser Wilhelm II.*, Feb. 12. Mr. Kuehl will visit his firm's cuckoo clock factories in the Schwarzwald, Germany, and will return to America in April.

H. E. Duncan, the mechanical expert for the Waltham Watch Co., stopped over here a few days last week on his way home, after delivering an illustrated lecture before the meeting of the Retail Jewelers' Association of Nebraska, recently held at Lincoln, Nebr.

Ethel M. Wathier, daughter of Joseph P. Wathier, who is senior member of the firm of the Joseph P. Wathier Co., 178 W. Madison St., has applied to the Circuit Court to

have a receiver appointed for her father's estate of \$200,000, pending the appointment of a conservator by the Probate Court.

A meeting of the American Horological Society was held here in the rooms of the Chicago Jewelers' Association on last Wednesday. A committee of three, consisting of President E. J. Koch, A. C. Becken and Maximilian Elbogen was appointed to see about arranging for a jewelry exhibit at the Coliseum in connection with the next meeting of the American National Retail Jewelers' Association.

J. C. Moreland, who for 27 years has traveled for Lapp & Flershem in Iowa, Nebraska and the Dakotas, has resigned his position and has retired from active business. A record of 27 years with one firm is a remarkable one, and it was with great regret that Lapp & Flershem agreed to Mr. Moreland's resignation. His territory will be covered by Wm. Duff, brother of J. C. Duff, who travels for Lapp & Flershem in Wisconsin and Michigan.

The following buyers were in this city recently: J. B. Ingalls, Rock Island, Ill.; Bert Brown, Peoria, Ill.; R. P. Kiep, Joliet, Ill.; Gus. Brumer, Clinton, Ia.; Henry W. Klopff, Neillsville, Wis.; Henry Peers, Joe Beals and Elisha L. Thayer, Rockford, Ill.; Frank Le Bron, Keokuk, Ia.; M. Wiegand, Racine, Wis.; Louis Ratzesberger, Milford, Ill.; Will H. Beck, Sioux City, Ia.; J. W. Neasham, Ottumwa, Ia.; George Feagans, Joliet, Ill.; Cornish Beck, Sioux City, Ia.; J. A. Sansome, St. Paul, Minn.; C. A. Clement, Springfield, Mo.; Frank Meyr, South Bend, Ind.

The store of Lebolt & Co., 167 State St., was robbed of jewelry to the value of \$1,800 on Sunday morning, Jan. 20, at about 5.30 o'clock. The thief had smashed a hole about eight inches square in the plate glass window and took out 36 diamond rings, ranging in value from \$15 to \$75 apiece. The theft occurred at a time when State St. is practically deserted, although the night watchman makes frequent rounds. Lebolt & Co. keep jewelry to the value of about \$5,000 in their show windows at night, as their "night show." This is covered by burglary insurance. The police have not succeeded so far in apprehending the thief.

Wilbert Peterson, recently engaged in the retail jewelry business in Plainville, Tex. He was formerly located at Canyon City, Tex.

FEATURES

"BLACK SHIELD" MAINSPRINGS are packed in the following manner: Each spring is wrapped separately in oiled paper, and placed in an individual envelope printed with the name and size of movement for which it is intended. Twelve envelopes, or one dozen mainsprings, are contained in a well-made strong box properly labeled. Useless handling of the springs is avoided, thereby preventing rust or mixing of stock. The name, "BLACK SHIELD" is scratched on every spring.

THE NEW MAINSPRING

"BLACK SHIELD"

MAIN-SPRINGS

FOR ALL AMERICAN WATCHES.

The Product of the Highest Attainment in Mainspring Making

TESTS

In selecting the "BLACK SHIELD" MAINSPRINGS, we were guided not alone by our own severe tests and judgment, but we distributed samples to dozens of expert watchmakers throughout the country. The opinion of all was that the "BLACK SHIELD" MAINSPRINGS are the finest ever introduced in this country. That they are even, properly tempered, carefully finished, correctly gaged, and tips and length positively accurate. They are of wine color, well polished, and will fit the respective movements without any filing or change whatsoever.

"Black Shield" Mainsprings are manufactured for us only by the oldest and most reputable maker in Switzerland
Per Dozen, \$1.25 Per Gross, \$13.50

Fac-Simile of Box Containing One Dozen "Black Shield" Mainsprings

"Black Shield" Mainsprings are guaranteed in every respect. No better can be had at any price. Per Gross, with 4-drawer Cabinet (capacity, 48 dozen), \$15.00

San Francisco.

Will Lean, San Jose, Cal., spent last week in this city.

F. H. Levy, with M. Schussler & Co., left for New York, last week.

Ed. Bastheim, with the Alphonse, Judis Co., was married, Jan. 16.

H. Lorenson expects to open a store at his old location, about Feb. 1.

Herman Brunn has just returned from a trip to the manufacturing centers.

Clarence P. Jacobs, of the Globe Jewelry Co., Globe, Ariz., is at present visiting the trade in this city.

The annual meeting of Shreve & Co. will be held in this city at the corner of Van Ness Ave. and Sacramento St., Feb. 11.

Werner Bros. have secured quarters in a new building at 4th and Market Sts. They expect to open for business about Feb. 1.

De Ferrari & Peters have returned to the north beach district. They are now located on Powell St., near New Montgomery St.

Jack Goihenix has taken charge of Hammersmith & Field's jobbing department. He succeeds Bart Mulvaney, who left at the end of the year.

Emanuel Levy, with M. Schussler & Co., is going into the jobbing business for himself. He will locate somewhere on Fillmore St. for the present.

Mr. Marcus, head of the California Jewelry Co., who has charge of the European office, is expected to return to this city the latter part of February.

Fred Sheridan, with Arnold & Steere, Chicago, has decided to open a permanent office in this city, about May 1. He has not yet settled definitely upon a location.

The Muhs & Lochbaum Co. has begun suit against the Eagle Fire Insurance Co. for \$1,000 on a policy written on a stock of jewelry boxes and show cases burned at 738 Mission St. in the great fire.

Max F. Noack, Santa Rosa, Cal., made another trip to this city, last week, to secure new stock. Since starting in business last April, he says that his only difficulty has been in keeping enough stock on hand.

Shreve & Co. have announced their intention of moving into their downtown building if they can get in by next September. If they cannot do this they will remain in their present location until after the holidays.

S. Sonnenfeld, who has conducted a lapidary shop at 331 Kearny St., for the last 20 years, has reopened on Sacramento St., near Fillmore St. He intends to go back to Kearny St. when that part of town is built up.

M. Schussler & Co., now in the Radke building, on Bush Ave., near Van Ness Ave., are to occupy the whole third floor of the Mutual Bank building, at Geary and Market Sts. They will move in as soon as the fixtures arrive and the rooms are put in order.

The People's Jewelry Co. has started a money lending department. The store has been made more attractive by the addition of a new sign and exterior renovations. The new safe that was expected has not yet arrived.

The employes of Radke & Co. had a cross country run through Golden Gate Park, Sunday of last week. The course was from

the McKinley monument, at the Panhandle entrance, to the beach, a distance of four miles. There were 10 entries, and the winner, Clarke Gebhardt, was presented with a handsome trophy cup. Joseph A. Catarick and Fred Hagener, who took the second and third places, received fine hats and a quart of champagne.

Harry Bullard, formerly of Kansas City, and recently head watchmaker for the Bohn-Bristol Diamond Co., has taken advantage of the scarcity of workmen to start a watchmaking and engraving shop on his own account in the Midway building, on Market St. Mr. Bullard is a man of experience in his line, and expects to get a large share of the city's work. Garrett Owen, of Kansas City, has taken Mr. Bullard's place with the Bohn-Bristol Diamond Co.

There is a great scarcity of skilled workmen on all lines of jewelry in San Francisco at present, and the watchmaking, engraving and manufacturing departments are working overtime. O. L. Mott, who does considerable manufacturing, is short of help, and has been working every evening for the last two months. He says that die engravers are in particular demand, as most of the dies in the city were destroyed last Spring. Wm. Glindemann, who has been looking for a good watchmaker, has not yet succeeded in finding one.

Pacific Northwest.

G. K. Birge, Davenport, Wash., made a business trip to Spokane, last week.

J. P. Durfee, Draine, Ore., has just installed a 2,700-pound safe in his store.

F. Johnson, Coulee City, Wash., has arranged to open a branch store in Hartline, a nearby town.

M. F. Troxel, who has been in business at Condon, Ore., for about two years, has sold his store to R. H. Robinson and will remove to Portland in the same State.

R. G. Eichelberger has bought the business and stock of S. D. Stouffer, Waitsburg, Wash. Mr. Stouffer will leave the trade and will devote his time to the interests of the German-American Coffee Co., with which he is connected.

W. Zimmerman, Penticton, B. C., was found dead in the rear of his store, Jan. 17, with a terrible gash in his head. He had been struck down with an ax, which was found, covered with blood, nearby. The store had been robbed, and it is supposed that Mr. Zimmerman had heard the thief in his store and started an investigation, when he was murdered.

Jack Havelin and Tom Blair, the two men charged with the robbery of the store of Troyer & Engels, Tekoa, Wash., have confessed. All of the stolen property except four diamond rings and some minor articles have been recovered. The robbers insist that these were with the others and that the officers must have taken them. This is not, however, believed by the jewelers.

Thieves who, a short time ago, broke into the home of Julius Gruenhut, a jeweler, 2847 St. Vincent Ave., St. Louis, Mo., made off with \$2,000 worth of jewelry. The family slept soundly while the intruders ransacked the premises.

Kansas City.

J. H. Whitney, with the Edwards & Sloane Jewelry Co., left for his territory the first of last week.

C. A. Clement, Springfield, Mo., passed through this city last week, on his way home from the east.

P. G. King is back from a trip to Texas, and is again with the Kansas City Watch Case & Jewelry Mfg. Co. He will remain in the city until March.

B. F. Haynie, Stillwater, Okla.; B. C. Thomas, Hebron, Nebr., and W. B. Bellamy, Kansas City, Mo., are now pupils at the Kansas City Polytechnic Institute.

Gramse & King, who are about to open a new retail jewelry store in Superior, Nebr., purchased their entire opening stock and also their fixtures in this city, recently.

The Oklahoma jewelers and opticians were to meet in convention Jan. 29 and 30, but the date has been postponed to some day in March.

The following new pupils have just been enrolled at the Southwestern Optical College: H. H. Hill, R. C. Payer, Chas. W. Wood and E. J. Silvers, this city, and W. H. Reed, Argentine, Kans.

E. S. Villmore, with the C. B. Norton Jewelry Co., starts out on his territory next week, this being his first trip of the year, except a run up to Lincoln to attend the recent convention there.

J. H. L. Tracey, who has been in the retail business at 13½ E. 5th St., has sold out and expects to leave for Oklahoma next month. He will take a look at the country and settle where he thinks prospects are best.

L. G. Rosenfield, Albuquerque, N. Mex., was in this city last week, and will probably be in this section of the country for a couple of weeks, visiting relatives. He has a brother in the jewelry business in Leavenworth, Kans., and another in the same line in St. Joseph, Mo.

C. A. Kiger has begun to move his stock of jewelry into a new location. He decided not to move to the third floor of the Hewson building, and finally closed a lease on the second floor of the new building at 917-19 Grand Ave., where he has twice the amount of floor space he had in the Hewson building. The new location is directly across the street from the new location of the Hassig & Krieke Jewelry Co.

The following out-of-town jewelers were in this city last week, calling on the jobbers: I. D. Fagin, Lathrop, Mo.; J. A. Clement, Springfield, Mo.; G. B. Douglas, Pleasant Hill, Mo.; I. Eller, Richmond, Mo.; C. Ricker, Emporia, Kans.; T. H. Ives, Osborn, Kans.; C. E. Farr, Greenfield, Mo.; W. G. Coplin, Paola, Kans.; Harry Kimber, with S. J. Huey, Excelsior Springs, Mo.; D. Davidson, Wichita, Kans.; J. W. Phillips, Chanute, Kans., and Mr. Haney, with the Grady Jewelry & Optical Co., Stillwell, Okla.

C. A. White, who had charge of the repairing department of Carl Shibley & Co., Van Buren, Ark., has now taken charge of the repairing department of the store of J. H. Brooks, Fort Smith, Ark. William Haylor, formerly of Columbia, Mo., is now with Carl Shibley & Co.

Cincinnati.

B. Ganz, of the Gustave Fox Co., has started on a business trip to the Northwest.

Milo Chaffee, with Albert Bros., has returned from a vacation spent in Meriden, Conn.

Henry Burch, formerly with Lewis M. Lea, Sandusky, O., is now with Joseph Mehmert as manager of the material department.

Charles Diefenbach, Hamilton, O., was here last week purchasing hardware for the new \$30,000 residence he is erecting at that place.

Aaron Plaut, of A. & J. Plaut, has gone to Kansas City for a 10-day visit. G. M. Braham, of this house, has started on his regular Southern business trip.

Mrs. Kupfersehmid has returned to Lawrenceburg, Ind., and reopened her business. She left that town to seek refuge in Cincinnati during the floods recently.

George Fox, of Fox Bros. & Co., just received word that the degree of Ph.D. has been conferred upon his son, Milton G. Fox, a student at Basel, Switzerland.

The John Holland Gold Pen Co. is doubling its factory capacity. Additional floor space of 3,000 square feet has been added, and new machinery is being installed.

Mrs. Pauline Schroeder, mother of Mrs. A. Herman and Mrs. A. G. Schwab, died the past week at the age of 86 years. She was prominent in this community for many years, and her death is much regretted.

When Albert Greenwaldt came to his store, the Imperial, last Monday morning he was surprised to learn his large plate glass window had been smashed by thieves and 12 gold and silver watches had been stolen. There is no clew to the robbers.

Two young men, giving their names as William Morris and Daniel O'Dell, claiming to be waiters from St. Louis, were arrested here last week for selling jewelry on the streets. They claimed the goods were their own, but they were locked up on suspicion.

H. E. Promnitz, while crossing the bottoms between Bellevue and Dayton on a launch, in which he was coming to the city, during the recent flood, was precipitated into about 25 feet of water. The launch was upset by running into a fence under water. As Mr. Promnitz is an expert swimmer, he escaped without injury from his bath.

A young man about 28 years of age and giving his name as Lester Delger, an interpreter, was arrested here last week by Cincinnati detectives on charges that he is wanted in Atlanta, Ga., for stealing \$1,550 worth of diamonds and jewelry there. The young man when arrested had \$500 and a diamond ring. The police say he has confessed, but refused to tell where the stolen jewels are.

Out-of-town jewelers who purchased stock here in the past week included: C. M. Wallace, Huntington, W. Va.; Will Shire, Paris, Ky.; A. R. Kobil, Princeton, Ky.; Charles Sederberg, Milford, O.; L. C. Diefenbaugh, Lewisburg, O.; F. C. Thienemann, Franklin, O.; Mr. Duncanson, Lynchburg, O.; J. D. Sowers, Paducah, Ky.; F. G. Wittlinger, Middletown, O.;

Mr. Morrow, of Morrow & McRoberts, Lancaster, Ky.; Charles Ray, Wellston, O.; O. E. McWarters, Somerset, Ky.; Joseph Embrey, Richwood, O.

The Poland building, a four-story brick structure, at 118 2d St., in which Albert Willard, tool manufacturer, and the Miami Silver Co. were located, collapsed entirely during the flood. The walls of the ground floor gave way in the water, causing a total wreck of the building. Mr. Willard estimates his loss at \$25,000. Officers of the Miami Silver Co. have not yet been able to make an estimate of their loss. They are busy opening new quarters on 3d St., and will resume business immediately, as an entire new outfit of machinery has been installed.

Pacific Coast Notes.

Dr. Herman Schmieding, a pioneer jeweler of Bisbee and Douglas, Ariz., died at the latter place of pneumonia, a short time ago.

H. O. Ball, Sonora, Cal., has added a new all-glass show case and a new wall case for the display of silver to his interior fittings.

J. C. Wahlen, who recently sold out his stock at Petaluma, Cal., will shortly remove to Raymond, Wash., where he has property interests.

Homer Graham, formerly with Park & Morrison, at Roswell, N. Mex., has left that place for Denver, Colo., where he will remain permanently.

Albert Kuhlmann, formerly with Shreve & Co., San Francisco, has opened a watch repairing shop and store at 214 Second Ave., San Mateo, Cal.

The store of E. Mayhem, Chico, Cal., was badly damaged a few days ago by the leaking of the roof during a storm. A portion of the plaster fell in as a result of the leak.

Sam Selka, who recently purchased the store of William Seeger, at 217 D St., Marysville, Cal., is now having the entire interior remodeled and put in up-to-date shape.

The home of Frank M. Washburn, Pasadena, Cal., was entered and robbed of goods valued at about \$150, a few days ago. So far the police have no clue nor has any of the stolen property been recovered.

G. G. Daunt, Petaluma, Cal., has secured a five years' lease on a fine storeroom in the Phoenix block, at that place, and is now putting them in shape for occupancy. He expects to open in the new quarters about Feb. 1.

The town trustees of Hollister, Cal., have appropriated \$500 for the purchase of a tower clock, to be placed in the Masonic Temple in that place, and will shortly appropriate a similar amount for another tower clock in another part of town.

The Niles Jewelry Store, Niles, Cal., was robbed, a few days ago, of a box of watches and jewelry while the proprietor was absent for a few months, but the thief evidently became frightened and dropped his booty, as the box and its contents were found intact a short distance away.

The Southern Pacific Railroad Co. has issued renewed orders as to the watches that the men in its employ must carry. It is prescribed that each man must have a good American movement with at least 17 jewels. Similar orders have been in effect for some

time, but heretofore they have not been enforced strictly.

Montgomery Bros., of Los Angeles, Cal., have been displaying in their windows recently what is claimed to be the largest gold brick ever cast. It is cone shaped, 12 inches high, 10 inches in diameter at the base, weighs 250 pounds and is worth \$50,000. It represents the output of an Arizona mine, and is now on the way to a smelter at San Francisco.

Omaha.

The mother of Herman Leffert, Council Bluffs, Ia., is seriously ill.

Harry Dixon and wife, North Platte, Nebr., were guests in this city last week.

A. H. Mills and wife, Cherokee, Ia., have gone to Indian Territory on a pleasure trip.

Mrs. A. F. Smith, accompanied by her son, left last week for Kansas City to visit friends.

Mr. Farnham, Blair, Nebr.; Mr. Norton, Wolbach; Mr. McCrosky, Shelton; George La Rue, Hamburg, Ia.; C. W. Sawyer, Silver City, Ia., and A. Urbahns, Minden, Ia., were here last week, purchasing stock.

The wife of Hjalmar J. Anderson died at the home of her mother, Mrs. Fred Nye, in Fremont, Nebr., Jan. 21. She was the niece of Ray Nye, of the Nye-Schneider-Fowler Grain Co. Her father was a prominent newspaper man of New York.

P. J. Lynch, who said he came from Kansas City, attempted the difficult game of palming off worthless stones in place of diamonds on Omaha pawnbrokers last Thursday evening. Lynch first visited the store of Samuel Robinson, where he secured \$100 on a diamond, but just as the money was being passed he slipped a piece of glass to the proprietor in place of the good stone, and the substitution was not discovered until the man had gone. The pawnbroker telephoned to the police station, and during the excited appeals to the police Henry Gross, another pawnbroker, was phoning over another line to the station. Detectives were sent out at once and captured Lynch, who had also tried to swindle Gross. He secured \$30, but was discovered by a clerk and forced to give up the money.

Denver.

E. O. Jones has opened a store in Fort Collins, Colo., where he was formerly engaged in business.

Edward Lehman, of the Edward Lehman Jewelry Co., is spending a few days in the city of Washington.

J. Frumess, brother of H. H. Frumess, is planning to open a store on 15th St., under the name of the Elgin Jewelry Co.

Out-of-town jewelers who visited the local trade during the past week, included: Loren J. Henry, Rocky Ford, Colo.; V. E. Blake, Fort Collins, Colo.; John S. Johnson, of the J. S. Johnson Jewelry Co., Greeley, Colo.; George W. Romans, Silver Plume, Colo.; E. A. Eaves, Idaho Springs, Colo.

Thos. Morris, Crookston, Minn., is erecting a new building for his business.

St. Louis.

Walter Emling recently moved from 1805 Sidney St. to 2221 Cherokee St.

P. T. Whelan, of the Whelan-Aehle-Hutchinson Jewelry Co., was confined to his home, last week, on account of illness.

J. S. Loftis, of Loftis Bros. Co., Chicago, was in this city last week, paying a visit to Manager Williamson, of the local branch.

S. Fuller, formerly manager of the jewelry department of the Wright Chemical Co., has opened a store of his own at Steelville, Mo.

Among the out-of-town jewelers in this city, last week, were the following: A. W. Weigend, Shipman, Ill.; W. G. Wolff, Chester, Ill.; Otto Burkland, Osawatimie, Kans.; A. W. Pearce, Gillespie, Ill.

M. Eisenman, who travels in the southeast for the L. Bauman Jewelry Co., was in St. Louis several days last week. After a visit to his headquarters at Birmingham, Ala., he will make a trip to Jacksonville, Fla.

F. L. Jaccard, Texas and Louisiana representative of the Bauman-Massa Jewelry Co., was in this city last week, accompanied by his wife. He has returned to his territory, of which he reports excellent prospects.

Another addition will shortly be made to the list of Locust St. jewelers, Gerhard Eckhardt, now at 213 N. 6th St., announcing that he will shortly remove to the Victoria building, at 8th and Locust Sts., opposite the post-office.

J. C. Rogers, accompanied by L. F. Schum, start out this week in the interest of the Mermod, Jaccard & King Jewelry Co. They will make a trip through Missouri, Arkansas, Oklahoma, Mississippi, Alabama and Tennessee.

On the charge of obtaining money under false pretenses, Sam Paner, a salesman at a pawnshop at 1903 Market St. has been arrested. The charge was based upon his refusal to lend more than 50 cents on a watch which, it is alleged, he had previously sold for \$18, the watch, the detectives charge, being of brass and only worth \$1.25.

Leo Bauman, who has been traveling in southern Illinois for the Bauman-Massa Jewelry Co., will retire from the road, and will hereafter be connected with the diamond department of the firm, which is constantly growing. His territory will be covered by Sam Lowenstein, in addition to his own, Missouri and Arkansas.

Frank H. Niehaus, 1302 Franklin Ave., who was fined \$100 on the charge of carrying concealed weapons by Circuit Judge Taylor, has been paroled by that official until Aug. 31. When arrested, Niehaus carried two new pistols, which he had purchased for protection at his store. He was apprehended before reaching the store with them.

The inventory filed in the Probate Court of the estate of Edward W. Bohle, who died recently, recited a personal estate of \$9,480.23, consisting of a stock valued at \$8,635.40 and \$844.83 cash. The appraisers of the estate, as appointed by the court, were: Moses Strauss, of the L. Bauman Jewelry Co., and A. F. Eisenbeiss, of the Eisenstadt Mfg. Co.

John M. Caldwell, Bryan, Tex., has added a line of pianos to his stock of jewelry.

Minneapolis and St. Paul.

It is reported that A. J. Rost, St. Peter, Minn., may engage in the wholesale business in Minneapolis.

Peter Johnson, Camden Pl., North Minneapolis, has returned from a business trip through Southern Minnesota.

Halvor Christianson has opened a jewelry store at the corner of Twentieth Ave., N., and Lyndale, in North Minneapolis.

The Gittelson Jewelry Co., Minneapolis, is fitting up the store at 3 S. 5th St. for its use Feb. 1. The concern is now located at 231 Nicollet Ave.

Louis Vehon and Albert Goodman have arranged to engage in the wholesale jewelry business in St. Paul. They will open a store in the near future.

There are a number of wholesale and retail jewelers in Minneapolis, along Nicollet Ave., who are looking for new locations, owing to leases being required by the owners in order to make expansions.

E. A. Barker, Bemidji, Minn., was recently in the Twin Cities, and proceeded to Chicago for a visit. During his absence his store is in charge of his brother, Bert Barker, of the Barker Jewelry Co., Minneapolis.

William Kominsky, a clerk in the employ of William Marks, St. Paul, was sentenced to the workhouse for 60 days, but later was released upon a bond. He was convicted on a charge of asking and obtaining an exorbitant price for a watch. He will appeal, having been refused a new trial.

The R. G. Winter Jewelry Co., Minneapolis, in its new location at 608 Nicollet Ave., has had its window smashed three times in five months. The last time the window was not really shattered, but the entire frame was deliberately cut through and the contents, 16 watches, extracted, apparently by means of a wire. The loss is about \$300.

Indianapolis.

Carl L. Rost is one of the members of the independent ticket nominated by the Commercial Club for the election of directors to be held next month. Mr. Rost has been an active member of the club for several years.

Articles of incorporation have been filed at the office of Secretary of State for the Besse Jewelry Co., of Ft. Wayne. The capital stock is \$10,000, and the directors are Arnold Zerweck, Anna M. Zerweck and Frank Besse.

The son of the late John Wimmer, who is the sole heir of an estate valued at \$200,000, has been assigned to the care of relatives living in Cincinnati. The lad is nine years old, and lost both parents within a period of a few months.

J. J. Stanley, who began business here in September, 1906, has filed a petition in bankruptcy. Mr. Stanley continued the business of Lanham & Tomlinson, who first opened a store in 1905, succeeding James Conway & Co. Mr. Stanley conducted principally an instalment jewelry business, the location of his establishment having been peculiarly adapted to that kind of business.

Toledo, O.

Arthur Fox, with the I. Kopleman Co., entertained informally last week in honor of his wedding anniversary.

L. P. Christiancy, 507 Madison Ave., is slightly ill at present. He has managed to attend to business most of the time, although his health has not been good for several months past.

The name of J. J. Freeman, head of J. J. Freeman & Co., 307 Summit St., appears in the list of important committees appointed by President Bours, of the Toledo Chamber of Commerce.

James Robison, agent for the new Ohio building now erecting at Madison and Superior Sts., is negotiating with a Summit St. jewelry concern to take one of the Madison Ave. shops as soon as the building is ready for occupancy, shortly after April 1.

Rumor has it that a new jewelry store is to open on Adams St. in the near future. It is stated that the proprietor is from out of town, but the owner of the room in which the store is to be located states that the deal has not yet been definitely closed, and therefore declines to say who his prospective tenant is.

North Attleboro.

Donald LeStage is home from the west. Albert Totten leaves, Feb. 8, for Cuba on an extended stay.

Theron I. Smith left, Thursday, for Florida, where he will spend the balance of the winter.

William Rowan, a native of England, and one of the skilled silversmiths employed by the Frank M. Whiting Co., died on Friday.

Walter B. Ballou was in New York, last week, on business. Charles H. Clark, H. H. Pierce and W. H. Bell returned, last Thursday, from western trips.

Announcement is made of a change in the name of the firm heretofore known as the Robson Co. Hereafter the concern will be known as the Percy J. Callowhill Co.

The Coombs bill providing for a school of design and manual training for jewelers and silversmiths was reported in the Legislature last Tuesday. It was referred to the Committee on Education.

Charles E. Godden has been selected by the Paye & Baker Mfg. Co. to cover the Chicago and middle western territory. He takes the place of Richard L. Saunders, who resigned some weeks ago.

The campaigns of the salesmen just closing, while brief, have been productive of good results. Manufacturers say that more business was done in January this year than the same month of 1906.

Albert Totten, Charles E. Bliss, Mark E. Rowe, George W. Cheever, Fred E. Sturdy, Alfred R. Crosby, John E. Tweedy, Clarence W. Fisher, George K. Webster, Edgar L. Hixon and Arthur E. Godding were elected trustees, last week, of the Attleboro Savings Bank, of North Attleboro. Mr. Totten was re-elected president and Mr. Bliss was chosen vice-president.

W. S. MacDonald, Galena, Kans., has gone into bankruptcy.

Pittsburg.

Sam F. Sipe and Mrs. Sipe spent a few days of last week in New York.

Charles O'Brien, of O'Brien & Co., spent a few days of last week in New York on business.

A. E. Seidle has been appointed a member of the house committee of the Pittsburg Board of Trade.

William Hoffman, of Eichberg & Co., New York, was in Pittsburg last week combining business and pleasure.

W. E. Jones and D. A. Smith, of the W. J. Johnston Co., left last week for New York to attend the dinner of the 24 Karat Club.

George Kloepfer, who has been associated with A. H. Gerwig for a number of years, has resigned his position as traveling salesman.

George B. Barrett, of the Geo. B. Barrett Co., has again been elected first vice-president of the Second National Bank of Pittsburg.

W. O. Harrison, a member of the firm of Marsh, Brown, Mather & Co., is confined to his home with grippe. Miss Ella Rodgers, of the same house, has typhoid fever.

"Diamond Bill" Walker, who was sentenced to one year in jail, has appealed his case to the Supreme Court and has been released on bail, pending a decision by the higher court.

Nothing has been learned of the whereabouts of Joseph M. Gottfursch, or Gottfurcht, and it was stated last week by one of the attorneys representing his creditors that if he can be located an attempt will be made to have him brought back to this city.

O. H. Allerton, Jr., has been installed as president of the Pittsburg Board of Trade; Chauncey Lobingier, as secretary, and J. C. Aughammer as treasurer. The Board will give its annual banquet within a few months. T. D. Harman, the retiring president, was presented Monday night of last week with a large grandfather's clock.

The first anniversary banquet of the Western Glass & Pottery Association was held Monday night of last week at the Monongahela House, the association now having 222 members. Joseph A. Harris was elected president; J. G. Kaufmann, secretary, and Walter G. Minnemeyer, treasurer. A. J. Bennett was toastmaster at the banquet.

Harry Grieve, Butler, Pa., has bought one of the safes from the Larney-Barr Co. used by the latter when located in the Bessemer building. Mr. Grieve is also negotiating for the fixtures of the same store. He is making some extensive improvements to his store in Butler, which include the installation of a new metal ceiling and better and larger fixtures.

Among the out-of-town jewelers who visited Pittsburg last week were the following: C. L. Kuhn, Scottsdale; P. J. Manson, Jeanette; F. E. Leitzell, Scottsdale; R. V. Marshall, Freeport; F. H. Hayes, Washington; J. Linnenbrink, Rochester; Frank Murdock, Ligonier; H. B. Potthoff, Latrobe; Harry Furtwangler, Greensburg; J. F. Murphy, Dawson.

Christian Yeager, aged 94 years, well known to all old-time jewelers, having handled a jewelry line many years ago, died last Wednesday at the home of his son,

Frederick A. Yeager, Thornburg, Pa., of bronchitis. He was prominent among the merchants of this city 25 years ago, when he was in business on Market St., near Liberty Ave. He is survived by a number of children.

W. F. Steinnacher, 131 S. Highland Ave., has been honored by the American National Retail Jewelers' Association in being appointed chairman of the legislative committee of that body. Mr. Steinnacher has been taking a most active interest in the affairs of the Pennsylvania Retail Jewelers' Association, and the honor which comes to Pennsylvania, and especially to Pittsburg, is highly gratifying to the members of the organization and his friends in the trade.

A bill was introduced in the Pennsylvania State Legislature last week that provides for taxing all corporations in the State issuing stocks or bonds a one mill tax, the proceeds of which will be used to build public roads. Limited partnerships are also to be taxed. If this act becomes a law it will affect a large number of jewelry concerns doing business in this State, and no doubt jewelers will look after their interests in the matter, as a heavy tax is already levied against corporations and limited partnerships.

Pittsburg business men are very much in favor of the movement to establish a sub-treasury of the United States Government in Pittsburg. The agitation for this has brought out the fact that the proportion of capital and surplus to deposits of the Pittsburg banks places this city first in this respect. The capital and surplus in proportion to deposits is \$18,000,000 greater than the combined capital and surplus of the banks of Chicago and Baltimore and greater than the combined capital of nine southern States. Manufacturing jewelers would especially like to see a sub-treasury here.

Macgregor & James have bought the lease and fixtures of the Pittsburg Jewelry Co., 443 Smithfield St., and have taken possession of the store, opening last week with a full line of jewelry. Louis Selezneck, who had been the proprietor, has gone to New York. Before leaving an auction was conducted for some time. Macgregor & James also operate stores at 970 Liberty Ave. and 21 Frankstown Ave., under the name of the Pittsburg Watch Co. It is not known what they paid for the Selezneck lease, but the fixtures in the store were very valuable. The place has been renovated and made more attractive than ever.

Attleboro.

Ernest D. Gilmore, of E. D. Gilmore & Co., was last week elected to office in the Congregational Sunday school.

Harold E. Sweet, of the R. F. Simmons Co., has been waited upon by fellow citizens and urged to allow his name to be used for the office of town tax collector. He has not yet given the permission asked.

Raymond L. Torrey, associated with his father, Fred L. Torrey, in the jewelry manufacturing business, took a bride last week, Miss Jessie A. Dingman, of this town. The wedding, which was private, was celebrated at the home of the groom. Mr. and Mrs. Torrey left at once for a honeymoon trip to New York.

The Attleboro Savings & Loan Association last week elected to places in the list of officers and directors the following manufacturing jewelers: Everett S. Horton, of the Horton, Angell Co.; Edward A. Sweeney, of the W. H. Wilmarth Co.; Frank W. Weaver, of F. W. Weaver & Co.; Albert S. Ingraham, of A. S. Ingraham & Co.; Charles P. Keeler, of McRae & Keeler; Harry P. Kent, of F. W. Weaver & Co.

W. Summer Blackinton, a traveling salesman for S. O. Bigney & Co., who died last week in Cleveland, O., as noted in another column, was a member of one of the most noted families of the Attleboros, the Blackintons being pioneer jewelry manufacturers. The name will always be associated with the ownership of the old "shuttle shop," which was the cradle of some of the most thriving firms in the business. Mr. Blackinton's wide acquaintance, agreeable personality and keen business ability caused him to be regarded as one of the best men on the road, in his capacity as a salesman. He had a wide circle of friends both in and out of the trade.

Boston.

Nathan Goldsmith, formerly with A. Mendelsohn & Co., is now in the employ of E. A. Cowan.

George R. Sellers, South Weymouth, has closed out his business in that town, and is engaged with a clock house in this city.

W. F. Newhall, Lynn, Mass., was in Boston last week to undergo a surgical operation to remove obstructions of the nasal passages.

F. H. Coffin, of the F. H. Coffin Co., Peterboro, N. H., has closed out his business in that place, and intends, it is said, to locate in Boston.

Buyers in town during the past week included: J. H. Johnson, Sanford, Me.; E. F. Welch, Westboro; C. L. Barnard, Milford; C. E. Powers, Greenfield, Mass.

A. S. Adams is carrying on the business in Stoughton formerly conducted by the late H. W. Darling. Mr. Adams was at one time in business on Winter St., in Boston.

E. A. Cowan celebrated the 25th anniversary of his wedding Jan. 25, and was the recipient of a very handsome silver candelabrum from his employes, in recognition of the occasion.

Walter W. Cook, Natick, Mass., for whose safety there was some anxiety among his friends after the Jamaica disaster, was heard from last week, and sailed for Boston, being scheduled to arrive last Saturday.

The death of Willard S. Brown, watchmaker for W. B. Foster, Hanover St., removed one of the most highly esteemed members of the trade in Boston. He had a host of friends, who sincerely regret his untimely demise.

J. F. Brown, formerly of Cambridge, now of Highland Ave., West Somerville, has recovered the Howard watch stolen from his store by a clever snatch thief several months ago. The man, who was concerned in a number of other thefts, it is alleged, and is held for trial, is well connected in Cambridge, and the tracing of the crime to him caused considerable surprise.

AM GOING to Alaska and will sell jewelry stock and fixtures at less than invoice; population, 2,000; good repair trade. Address Box 321, Buckley, Wash.

WANTED, to buy a small jewelry store with stock and fixtures; prefer southern town; state lowest terms. Address "O., 9181," care Jewelers' Circular-Weekly.

A GOOD jewelry store for sale, cheap; reason for selling, the estate of the late H. A. Prill is to be settled. Address H. N. Prill Estate, 7 Main St., Bradford, Pa.

FOR SALE, a jewelry factory with all machinery that is needed for diamond jewelry; the same is in good condition; good location downtown, New York. Address "T., 9062," care Jewelers' Circular-Weekly.

DIAMONDS at a discount, mounted in scarf-pins, rings and brooches, \$2 to \$100; I bought this lot at bankruptcy sale; sent on memo. bill to well rated jewelers. Dan I. Murray, 3 Maiden Lane, New York.

FOR SALE; do you want to step into a good, steady, established business in one of the best towns in Iowa; jewelry, silver, fancy china; invoice about \$2,000; address at once. "X. X. X., 9118," care Jewelers' Circular-Weekly.

FOR SALE, fixtures of a first class jewelry store; situated in one of the finest manufacturing railroad centers in New Hampshire; can have store and continue business if desired; will sell cheap if taken at once. F. I. Richards, Rochester, N. H.

JEWELRY STORE, with established trade, in substantial county seat; population, 3,500; clean, up-to-date, well bought stock, invoicing \$6,000; retiring on account of failing eyesight; splendid opportunity for right man. Will F. Dietrich, Kaufman, Tex.

FOR SALE, an old established jewelry and optical business in a growing city of 35,000 in Colorado; elegant plate glass fixtures, together with stock, will invoice \$6,000, or will sell fixtures, a bargain. Address "Colorado, 9051," care Jewelers' Circular-Weekly.

PARTNER WANTED, must be watchmaker, or watchmaker and refractionist, in an old, well established, good paying jewelry store in New York City; your chance for a lifetime; requires \$3,000 to \$5,000; write for particulars. "M., 8925," care Jewelers' Circular-Weekly.

FOR SALE, a well located and established jewelry store in upper Sixth Ave., New York; in the center of the finest residential section; splendid opportunity; only small cash outlay necessary; sale on account of poor health. Address "M. W., 8939," care Jewelers' Circular-Weekly.

FOR SALE, jewelry store in western Washington town of 15,000 population; a clean, first class and up-to-date stock of goods and fixtures; the reason for selling, failing health; stock about \$15,000; answer only if you mean business. Address "E. P., 8923," care Jewelers' Circular-Weekly.

FOR SALE, an old established jewelry business in a prosperous city in Wisconsin; amount of business done per annum, about \$25,000; stock reduced to suit purchaser; can be reduced to less than \$5,000 for stock and fixtures; best location; lease furnished; easy terms to right party. Address Box 9081, care Jewelers' Circular-Weekly.

\$375, SMALL manufacturing jewelry business, established more than seven years in one of the healthiest southern States; income last year about \$2,000; can easily bring double the amount; the sale to include machinery, safe and all other fixtures; reason for selling wife's sickness. Address "G. N., 9136," care Jewelers' Circular-Weekly.

AMERICAN WATCHES at a discount; 0 and 12 size, 20-year filled cases, fitted with American 7, 11 and 15 jewel movements, \$4.75 to \$7.50 for complete watches; these are new goods, not shop worn or old trash; I bought a large lot of jobbers' stock for cash; samples sent to well rated dealers on memo. bill. Dan I. Murray, 3 Maiden Lane, New York.

FOR SALE, jewelry stock, fixtures, tools and materials, in a good Ohio river manufacturing town of about 10,000 population; good fixtures and a nice clean stock, which will invoice about \$3,000; bench work good; fine opening for a good optician; one other jewelry store in town; this is a snap for some one; poor health only reason for selling. Address "R., 8937," care Jewelers' Circular-Weekly.

FOR SALE, a complete manufacturing plant in a fine western city; will sell at a reasonable figure; good reason for selling; good chance for an energetic business man. Address, "F. A. G., 9116," care Jewelers' Circular-Weekly.

QUICK ACTION by corresponding with us; we buy your entire stock; or send us your surplus stock of watches and diamonds; we originated this method and have twenty years of quick action and good service to our credit. Joseph Brown & Co., Fifth Ave. and Madison St., Chicago, Ill.

SPLENDID opportunity for small established and good paying jewelry business, with most excellent repair business and railroad work; good man will be sure to be watch inspector in a short time; will sell complete with small stock and fixtures for cash; invoice, \$900 to \$1,100; in hustling West Virginia coal field town; no competition whatsoever; will repay itself in six months on repairs only; good reason for selling; parties meaning business, only, write at once. "P., 9076," care Jewelers' Circular-Weekly.

ADVERTISER, would invest about \$20,000 in high class, established retail business; prefers to purchase outright, but might consider interest and assume management for which advertiser is well fitted; business must be paying and located in city of 100,000 or over. Address, "A., 9107," care Jewelers' Circular-Weekly.

DIRECT FROM FACTORY to you at 30 to 50 per cent. less than you ever bought same grade of goods before; bracelets, back combs, hat-pins, necklaces, etc., in gilt and gold filled; I am broker for a factory in Providence, R. I., who sells to jobbers only, but I sell direct to you, Mr. Retailer, and am satisfied with a small commission, that is why these goods look so cheap to you; it is 30 to 50 per cent. less than you ever bought them; sent on memo. if desired; in ordering state if gilt or gold filled goods are wanted. Address Dan I. Murray, 3 Maiden Lane, New York.

THE ONLY repair and jewelry store for five miles; flourishing town of 1,500, in the heart of the richest farming country of Lancaster County; silk mill employs 105 hands; machine shop and foundry employs 70 hands; besides two coach works, two coal yards, two national banks, two hardware stores, four general stores, two implement stores, one lumber yard, four churches, etc.; store is one-half block from business center; property, stock, fixtures and good will, or only stock, fixtures and good will; established 13 years; poor health reason for selling. Jno. H. Samsenig, 25 E. Main St., New Holland, Pa.

DO YOU WISH TO RETIRE? We buy jewelry stores to any amount; also entire stocks of jewelry, diamonds, watches, silverware, fixtures, etc.; we are known all over the United States to pay highest spot cash; notify us, we will call on you at once; all business transacted we handle strictly confidential. Address, Brooklyn Purchasing Syndicate, 608 Broadway, Brooklyn, N. Y., or Tel. 2328, Williamsburg.

UNITED STATES PATENTS.

ISSUE OF JAN. 22, 1907.

841,656. ENGRAVING-MACHINE. WALTER ARMSTRONG, Chicopee, Mass. Filed Sept. 3, 1904. Serial No. 223,219.

In an engraving-machine, a suitable frame, a pattern, a stylus arranged in operative relation to the pattern and supported to have its tip in a

horizontal plane, a cutting-tool, a work-holder carrier having a pivotal support, a work-holder having a pivotal connection with said carrier at right angles to the axis of said pivotal support, an operative connection between the work-holder and the stylus, and means for lengthening or shortening the radius on which the work-holder carrier swings in one direction.

841,755. SPECTACLE-TEMPLE. THOMAS A.

WILLSON, Reading, Pa. Filed Jan. 11, 1906. Serial No. 295,526.

A spectacle-temple comprising a separately-

formed sheet-metal pivot-piece having shaft-clamping ears, and a shaft having a resiliently-formed end portion inclosed by said clamping-ears, the resilience of the clamped shaft portion serving to secure a rigid connection between the parts.

841,771. PIN-JOINT. FRANK E. FARNHAM, Providence, R. I. Filed July 8, 1905. Serial No. 268,861.

As a new article of manufacture, the jeweler's finding herein described, consisting of a hinge-

joint member having ears each of which is provided with a pivot-hole and a pivot secured only at one end in the pivot-hole of only one ear.

841,772. CUFF PIN. FRANK E. FARNHAM, Providence, R. I. Filed April 6, 1906. Serial No. 310,361.

The improved cuff-pin herein described, consisting of the combination of a lining-plate having ear-pieces at one end each provided with a pivot-hole and a pin-catch at the opposite end, a pin-

tongue engageable with said pin-catch, a pivot on which said pin-tongue is mounted and which extends through said pivot-holes in the ear-pieces, a cupped-up ornamental front plate in the concave portion of which said lining-plate fits, two integral flanges on opposite sides of said front plate which are rolled over throughout their entire extent into close contact with the outer surface of said lining-plate each of which flanges abuts at one end the pin-catch and at its opposite end one of said ear-pieces, and two integral points or projections on the opposite ends of said front plate which are bent over into close contact with the tip ends of the lining-plate respectively.

841,865. BRACELET. FRANCIS G. HODGES, Attleboro, Mass., assignor to Sidney O. Bigney, Attleboro, Mass. Filed July 24, 1906. Serial No. 327,492.

In a bracelet the combination with a ring of springy material having overlapping ends, of balls

upon the extremities of the overlapping ends, and a bar provided with an opening in each end to receive the overlapping ends adjacent the balls.

841,909. CATCH FOR BRACELETS. WALFRID WALLENTIN, Attleboro, Mass., assignor to S. O. Bigney & Co., Attleboro, Mass. Filed July 30, 1906. Serial No. 328,319.

A bracelet comprising two resilient tubular sections, means for pivotally uniting adjacent ends

of said sections to permit the sections to swing laterally in either direction, and a catch for detachably uniting the free ends of said sections.

841,919. EYEGLASS-MOUNTING. NELSON M. BAKER, Worcester, Mass., assignor to the American Optical Co., Southbridge, Mass. Filed July 12, 1905. Serial No. 269,308.

In an eyeglass-mounting, the combination with the outer end or head of the post, having a smooth inner surface to receive the bow-spring and nose-guard, of a bow-spring, having an opening through its end for the attaching-screw, and also having

an opening therethrough above and below said opening, and connected with said opening, and a nose-guard having an opening therethrough for the attaching-screw, and having a grooved portion

or recess therein above and below said opening, forming a protection on the inner side of the attaching end of the nose-guard, to extend into the slotted end in the bow-spring, and a screw for attaching said parts together.

842,038. COMBINED WATCH-FOB AND MATCH-RECEPTACLE. CHARLES F. WALTERSTEDT, St. Louis, Mo. Filed July 17, 1906. Serial No. 326,551.

A combined fob and match-receptacle comprising a single piece of fabric adapted to be bent upon itself, substantially one-half of said flap serving

as a closure, a pocket fastened to the surface of said fabric, a supporting-strap, socket members fastening said strap to the flap of said piece of fabric, and a stud fastened to the pocket-carrying portion of the fabric and adapted to engage one or another of said socket members, the outer surface of the pocket being roughened and adapted to bear against the inner surface of the flap.

842,064. TOBACCO-BOX. MARCUS B. BEHRMAN, Baltimore, Md. Filed April 4, 1906. Serial No. 309,821.

The combination, with a tobacco-box proper, of a cutting attachment comprising a blade adapted to sever a projecting portion of a plug, an arm D¹ to whose upper end the said blade is attached, the arm being pivoted to the box and having a

lever member D² curved outwardly from the pivot of the lever, so that it may be pressed inward for moving the other portion of the arm outward and thus withdrawing the blade from the box.

842,065. TOBACCO-BOX. MARCUS B. BEHRMAN, Baltimore, Md. Filed July 31, 1906. Serial No. 328,525.

The improved tobacco-box having a central longi-

Bowman & Co., Meriden, Conn. Filed Oct. 26, 1906. Serial No. 340,779. Term of patent 7 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing herein shall prevent the registration of any mark used by the applicant or his predecessors, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessors from whom he derived title for 10 years next preceding the passage of this act."]

Canada Notes.

G. F. Goodwyn, of Goodwyn & Whyte, Winprior, Ont., died suddenly last week.

Edwin H. Allport, London, Ont., formerly in business in Toronto for many years, is dead.

W. Zimmerman, Penticton, B. C., was brutally murdered on the night of Thursday, Jan. 17, by being struck on the head with a hatchet. A number of watches and rings were stolen from his store. The crime is supposed to have been committed by Indians. Mr. Zimmerman went to British Columbia from Winnipeg two years ago.

Out-of-town buyers calling on the Toronto, Ont., trade, last week, included: T. C. W. Watson, Newmarket, Ont.; Joseph Park, Brantford, Ont.; W. Estaire, Kingston, Ont.; P. S. Byrne, Beaverton, Ont.; W. E. Blakeley, Trenton, Ont.; J. A. McFee, Belleville, Ont.; J. F. Van Dusen, Dundalk, Ont., and C. D. Slevater, St. Johns, Newfoundland.

The jewelry store of Raphael Bessette, 79 Sandwich St., Windsor, Ont., was broken into recently by burglars, who gained access from the rear, breaking down a small shed door and then extracting a pane of glass and slipping back the bolt. When inside they turned everything upside down in their search for valuables, and took away a promiscuous lot of stock, including about 40 watches, over 100 eyeglasses and spectacles and a number of gold-filled chains. The value of the stolen property is about \$500.

WALTHAM WATCHES

To correct a misunderstanding which apparently exists in the trade, it should be noted that 16 Size Vanguard 23 Jeweled Movements are made in Open Face Lever Setting only, and are not made in Hunting.

16 Size Vanguard 19 Jeweled Movements are made in Hunting Pendant Setting; in Open Face Pendant Setting and in Open Face Lever Setting.

WALTHAM WATCH COMPANY

WALTHAM, MASS.

THE HOROLOGICAL REVIEW

Peculiar Features of Some Unique Mainsprings

Translated for THE JEWELERS' CIRCULAR-WEEKLY from *Almanach de l'Horlogerie et de la Bijouterie*
(Continued from issue of Jan. 23.)

TWO applications of the helical spring as a motor for pocket watches were previously described. The same article referred to a third watch, which had for its motive force a simple bent steel wire

Another application of this system is represented in Fig. 1. It is a small clock of the American system. The motive wheel was originally the wheel A, the winding was effected by the square of the arbor *a* of this wheel and the motor spring encircled this

FIG. 1.

arbor. This spring has been omitted, but the click work has been preserved, so that the winding may continue to be accomplished by the square *a*.

An auxiliary wheel B engages with a pinion adjusted on the arbor *a* of the wheel A. This auxiliary wheel has itself a pinion *b*, with which engages a tooth sector DD' pivoting at *d*. To this sector is attached at E one extremity of a strong helical spring. Another extremity of this spring is held at F by a fixed support Y Z, attached to the plate of the movement.

The dotted design shows the position which the sector and the spring take when the latter is completely relaxed. The winding is affected, as we have said, by the square of the arbor *a*. The pinion fixed on this arbor impels the wheel B, which in its turn works by means of its pinion *b*, the sector D. The spring is stretched and takes

the position indicated by the figure; then, left to itself, it acts in the opposite direction on the sector, which actuates the whole train. The hour wheel C makes six revolutions while the wheel A makes one. The latter should therefore furnish four revolutions for 24 hours of going. The wheel B

FIG. 2.

is also in the ratio of 1 to 6 with the pinion *a*. This wheel makes one-sixth of a turn for one turn of A, or four-sixths, that is two-thirds, of a turn for four turns of A.

The ratio of the pinion *b* and of the sector *d* is also 1 to 6, so that the pinion making two-thirds of a turn, that is 240 degrees, the sector will describe 40 degrees for 24 hours of going. By increasing the course passed over by the sector, making it 60 degrees, or one-sixth of a turn, one complete turn of the wheel B will be obtained, which will correspond to six turns of the wheel A, and 36 turns of the wheel C. We will thus have 36 hours of going. The tension of the spring decreases, but on examining the two extreme positions, it will be seen that the variations in the length of the lever on which the action takes place, establishes a kind of compensation.

On the contrary, we have before us a quite serious complication of the mechanism, which is difficult to avoid, and which is an obstacle to the extension of such a system in low-priced timekeepers.

* * * * *

The irregularities of tension produced in

a spiral spring enclosed in a barrel are due to several causes. We have, first, the friction of the coils against each other. This friction is lessened by a fine polish of the steel ribbon, but it may be augmented and rendered quite variable by the thickening of the oil. The friction of the ribbon against the bottom of the barrel, or against the cover, is also to be considered.

FIG. 3.

Another irregularity proceeds from the fact that when the spring is completely wound it acts on a lever, of which the length is equal to the inside radius of the barrel. As the spring slackens, the length of the lever is diminished by each turn of the ribbon pressing against the barrel. The opposite is desirable; that is, that the greatest force should correspond with the shortest lever and *vice versa*, and it is this which was sought for in the invention of the fusee.

If in a helical spring the natural tension diminishes like that of the ordinary spiral spring, the cases of variation that have been

*Time
O my friend
is money!*

—BULWER-LYTTON.

And in this money making age there is an enormous and increasing demand for accurate timekeepers. This means that time is money for the dealer who carries a stock of

ELGIN Watches

ELGIN NATIONAL WATCH COMPANY

Factories, ELGIN, Illinois, U. S. A.
General Offices, 131 Wabash Ave., Chicago.

NEW YORK OFFICE, 11 John Street.
SAN FRANCISCO OFFICE, 704 Market St.

mentioned will not be met with. The coils of the helical spring do not touch each other and there is no friction in any part. The force of such a spring is therefore regular, and the progressive diminution of its tension may readily be compensated.

These considerations led a German horologist, Herr Bley, to study thoroughly the application of the helical spring, and he took the bull by the horns, since he made an attack directly on the marine chronometer.

Thus, according to the *Deutsche Uhrmacher Zeitung*, is the arrangement he contrived. Fig. 2 gives a view of the front of the mechanism, and Fig. 3, in which all the accessory pieces capable of interfering with the view have been omitted, exhibits the same mechanism, as seen on the side. The first idea suggested by the inspection of these figures is that there are two springs instead of one.

This combination has been adopted for several reasons. First, it permits of reducing the force of each spring to half of what it would be if a single one were employed. In case of the breaking of either no damage

FIG. 4.

to the movement would occur, since the subsisting spring would deaden the shock. And, again, which is the capital point, the employment of two springs working in opposite directions has the effect of annulling or at least of reducing to a minimum the friction on the arbor of the lever on which these springs act.

The complete movement is comprised between three superposed plates (Fig. 5), X, Y, Z, connected by twos; that is, X and Y on one hand and Y and Z on the other. Fig. 2 shows us the movement seen from below, the plate Z being removed. In this figure the pillars connecting the plates Y and Z are marked by circles 1, 2, 3 and 4. These figures are not represented in Fig. 3. A strong arbor, LL, pivots freely between the two plates Y and Z in the center of the movement. As the plate Y must receive, on the prolongation of the arbor L, the arbor of the center wheel, which turns between the plates X and Y, it has been necessary to fix on the plate Y a small bridge by means of the screws, *i i'*. On the arbor L are adjusted, by means of two strong bosses, the toothed wheel K and the ratchet M.

The two double levers, Q Q', are also mounted on the arbor L, but so as to be able to turn. These two levers are connected by the pillars, B B', which hold the

screws 5 and 6 (Fig. 1). They form a sort of frame, in which turns the arbor L. L, bearing the wheels K and M. The whole is placed between the plates Y and Z. Four arbors, pivot between the two levers Q Q'. First there are but two arbors, *p p'*, which each carry a click, of which the extremity, under the action of a spring not shown in the figure, works with the ratchet M. The two other arbors, R R', are placed as far as possible from the center of the levers, and they have in the middle a groove *r*, designed to receive the hooked extremity of the helical spring. The other extremity of each spring is hooked in the same way to another arbor F F', and works parallelly, but its pivots are lodged in the plates Y, Z.

Fig. 2 permits taking account of the position occupied by these levers, and by the

FIG. 5.

springs when these are energized. The design in dotted line indicates the position of the system when the springs are relaxed. The lever passes over an arc of 45 degrees or one-eighth of a turn, and its movement is transmitted by suitable gearing to the central wheel. On examining these two positions it is found that the length of the lever on which the springs act increases in proportion as the tension diminishes. The attaching pivots, F F', have been placed in the plate in such a way that there is perfect compensation. The regular force is therefore secured, which is not modified by the variable friction, like those which have the ordinary spiral spring.

For winding up the system, the square *h* (Fig. 2) is turned. This carries the pinion K, engaging with the toothed arc G, solidly connected with the lever 2. Another toothed arc, acting in the opposite direction of the first, actuates a pinion, W, on the arbor of which is a hand serving as an indicator of the winding. This, as may be seen, is an elaborate and well-studied plan.

* * * * *

Another experiment, though not so im-

portant, but still interesting, is represented by Fig. 4, also extracted from the *Deutsche Uhrmacher Zeitung*. It is an arrangement resembling one we gave previously, which was adapted to a watch.

Here the movement is for a striking clock. A spring in horseshoe form is fixed on the plate by means of a screw, *s*, and two feet. This spring, of which the blade measures about 10 mm. in width and 2.5 mm. in thickness, performs the functions of a motor. The two free extremities are wound by a special system. One works the train of the hands, the other that of the striking work. In place of each of the two barrels is a wheel, T, fitted to an arbor V. This adjustment is made like that of the motive wheel of clocks having weights; that is, by the employment of clickwork the wheel is rendered independent of the arbor in one direction.

The two arbors, V, which are furnished with a square for winding, carry each a pinion, *t*, which passes through the plate and engages with a wheel, *r*. The two wheels, *r*, pivot under a solid bridge, *p*, screwed on the principal plate, P, which serves to hold also the two arbors, V.

On each of the wheels, *r*, a steel arm, *h*, is attached at a certain distance from the center, to which a small chain, *k*, is hooked. The other extremity of the chain is provided with a stud, *e*, against which presses one of the extremities of the motor spring.

The working of the mechanism is readily understood. By turning the square to the right, it is wound. The pinion impels the wheel *r* in the direction indicated by the arrow, and the clickwork of the wheel T becomes effective. The chain, *k*, is rolled around the arbor, *s*, and its extremity, *e*, draws and tightens the spring. The action of the clock is therefore occasioned by the tension of the spring, which acts on the arbor of the wheel *s*. This wheel communicates its rotation to the arbor V and to the wheel T, and consequently to the whole train.

In our illustration may be seen on the left the spring of the striking work completely tightened, while on the right that of the movement is relaxed.

It may be comprehended that the force furnished by such a spring, comparatively short and thick, varies in great proportion. The inventor has sought to remedy this inequality of tension by hooking the chain at a certain distance from the arbor *s*, and causing it to press against a form of snail, which brings it nearer the arbor as the spring is stretched; but it must be quite difficult to secure perfect compensation. And it might be a question whether with this system a clock could be constructed going for more than a day. The experiment, although interesting, has little chance of success, and it is to the helical spring that recourse must be had by those seeking to transform the system of the motive spring now in use.

* * * * *

Experiments with the helical spring do not date from yesterday. The clock shown in Fig. 3 is a proof. It is the clock bearing the name *Cartologe* (card clock) referred to in our article "Escapements of Watches and Clocks," a curious escapement of special arrangement, constructed of card-

THE GUARANTEE

BEHIND ALL

Jas. Boss Gold Filled Cases

is the reputation of the greatest watch case company in the whole world. It guarantees JAS. BOSS Cases for 25 years and 20 years. For over 53 years these cases have been used—millions of them—and the dealers selling them continually testify to their merits—not only are they superior in wearing qualities, but in finish, great strength and the unlimited assortment of designs and ornamentation, they are all that is to be desired by the up-to-the-times dealer.

The Keystone Watch Case Co.

Philadelphia

New York
Chicago

Cincinnati
San Francisco

New patterns of exceptional merit

Designs of rare quality, rich in coloring

board. This clock measures 40 centimeters in height. It is mounted on a wooden pedestal and covered with a bell glass. The movement is supported by four columns; the dial is open and allows the motion work to be seen. The escapement is visible at the upper part of the movement, the arrangement having been previously illustrated.

The plates, wheels, escapement, even the dial, are constructed of compressed cardboard; that is, a very hard kind of cardboard, which is covered with bleached lac. The pediment and columns are varnished in the same way, so that the clock appears entirely white, except as decorated by a few gilded fillets. At the top of the dial is the following inscription: *Cartorologe Invariable*; and at the bottom, "à Paris, chez Ch. Rours, breveté du Roi, Galerie Vivienne, à l'Uranorama."

The entire construction of the clock is curious, but the movement is particularly interesting on account of the helical spring, F F', which is employed as a motor. This spring is fixed to the pediment by its lower extremity, and to the upper extremity a cord, S', is attached, which is wound on a drum fixed on the arbor of the wheel W. A second cord, S, is found in the opposite direction on the same roller and descends into the pedestal of the clock, where it is attached to an arbor. The extremity of this arbor carries a winding square.

When this arbor is turned with a key the cord S is rolled on it, leaving the drum W; the cord S' is then rolled on the drum and stretches the spring S. The tension of this spring constitutes the motive force actuating the clock.

The 'scape wheel, which is above the dial, is also of cardboard, and the lever is constructed of horn. There is no fork. The lever and the pendulum form a single piece, which balances on two vertical points.

The pendulum bob is fixed; that is, it cannot be raised or lowered for the purpose of adjustment. The advance or retardation in the rate is obtained by means of a weight, G, which can be made to slide along the rod of the pendulum, graduated for the purpose. This original clock, constructed 100 years ago, shows that the idea of employing the helical spring as a motor in timekeeping apparatus is not new.

I saw an account of M. H. Arnold's two old clocks that are running, one of which is trying to outdo the other in striking the hours first, says a correspondent in a daily exchange. Now, I have two old clocks that have the same ambition. Some hours one will strike first and then the other, and sometimes both will strike at one time. They are both tall "grandfather clocks" that reach from the floor nearly to the ceiling. One is an old German clock with solid brass works and a brass dial. The weight was hammered out by a blacksmith. I can trace this clock back to 1734, when it was brought over from Germany, which makes it now 173 years old. It has been running ever since, and is still keeping correct time. The other one came from Ireland, but I cannot trace it back. It has solid brass works and a brass dial, with the name of John Smith, Dublin, stamped on the face. One peculiarity of these clocks is that they always strike the hour simultaneously.

Watch Repairing.

By H. REINECKE.

(Continued from issue of Dec. 26, 1906.)

THE last communication on the above subject has enumerated to a great extent the description and uses of the principal ancient and modern tools necessary for watch repairing. Many more less important tools and implements of this kind remain to be considered. But such consideration is best given when one arrives at their contemplated actual use in the various branches of this art. These various branches have not only increased in number of late, but have also become more prominent on account of the very large number of personal and business uses timepieces fulfil in the necessity for economy of time.

The inexhaustible energy of civilization gives us hardly time to grow old. The better understanding of the old and the grasping of the new keeps the watch repairer continually on the alert to solve the problems presented both with expedition and certainty. For the latter purpose they should ever continue a zealous study of the various constructions of the modern styles of watches, American and foreign. The watch repairer will intuitively learn that every new style of watch has its weak and strong points, theoretical and practical, and he will know where to look for the prevalent defects in each kind of watch when no organic breakdown is in sight. In the examination of a watch brought for repairs, the external should precede the internal. The case should pass a strict review, always in a patient and gentle manner, to see if it shows the mark of a blow, more particularly in the rim of the case, or a dent from pressure in the dome or crown of the same. He should examine if the fly spring of a hunting case and the joints work well, if the hands are all right, and do not rub or press against the glass; and if the second hand does not come in contact with the small dial.

Among the different kinds of watches the French and Swiss watches of moderate size will claim the closest inspection as commonly showing severe treatment of the slender case or contact anywhere of important points, on account of the limited space allotted to the movement. And whatever bruises, dents or other extraordinary marks are noticed on the exterior of a watch case ought to be brought to the notice of the owner of a valuable watch, partly for the repairer's self-protection and partly for the purpose of learning if such marring defects are of recent date, or may have any connection with the injury the movement may have received. It must be borne in mind that the cordial and personal understanding on these points with a new customer often secures valuable results beyond the aims of the business in hand.

In examining the interior of a watch there are two points which can generally be determined without removing the movement from the case. These two points are the soundness of the mainspring and the balance staff. The first can be determined by an attempt at winding or a pressure on the center wheel pinion or some other part of the train. The second examination by a slight circular motion of the movement or by trying the end-

shake of the staff with a pair of tweezers. With these two points determined the movement may be withdrawn from the case, the hands and dial removed, and the mainspring let down by any convenient method, if such is not injured. With this accomplished, the balance and escapement may be removed. In case of any further difficulty, to check the action of the mainspring, the train may have to be let run down, which may be done by applying a peg wood point as a pressure brake to the center wheel to check its speed and protect the slender pivots of the small pinions.

It is proposed to continue these watch repairing articles at regular intervals as far as possible, and suggestions and questions that will have a tendency to increase their utility and interest are cordially invited.

(To be continued.)

Tool for Punching Out Balance-Weight Disks.

TO increase the weight of a compensation balance, small disks are inserted under the timing screws. Many watchmakers turn these disks on the turning arbor; it is difficult, however, by this process to make them of such uniform size and thickness that the balance, below two opposite screws, of which the disks are fitted, will remain in poise. For this reason the disks are frequently punched out from Dutch metal. This is a much better and more rapid

process; the punches generally used are, however, as before mentioned, often made in a very unpractical manner. It may be advisable, therefore, to show an illustration of the convenient punch enlarged four times. It is made in the following manner:

A short pin, having the thickness of the thread number most frequently used for balance-screws, is turned from a piece of steel, not too thin. Then a second pin having the same diameter as the screw heads is turned, both pins being much thicker in front than at the shoulder and somewhat turned down below. The whole is hardened and tempered to a red heat.

Disks automatically acquiring exactly the same size and thickness can be punched not only from Dutch metal but from brass plate rolled or hammered to a corresponding thinness, with a tool made in this manner. The proper weight for a given difference in rate will easily be found after a little practice and with a sufficiently large assortment of plates of various thicknesses. This process is amply sufficient for cheap and medium-priced lever watches.

The officers and executive committee of the South Bend Watch Co., South Bend, Ind., gave their annual banquet to the salesmen and employes of the company, at the Oliver Hotel a short time ago. Addresses were made by several of the officers and traveling representatives, Clement Studebaker acting as toastmaster.

COMPARATIVE PROFITS FROM THE

Profits on the cheap clock watches are comparatively small, for while they may sell fairly well, you make very little on each individual watch.

The profits on your expensive jeweled watches are somewhat larger, of course, but you have only a limited demand for these high-priced timepieces, which keeps the total profits down.

The greatest Demand of all—hence, the greatest profits of all—comes from your medium-priced watches.

THREE GRADES OF WATCHES

New England

“The Watch for the Great American People”

The **NEW ENGLAND** is the very highest-grade medium-priced watch produced to-day.

The **NEW ENGLAND** line provides you with the largest and most attractive assortment of medium-cost watches. It enables you to sell from hundreds of men's and women's styles on a very liberal profit basis. We give you the most accurate, reliable and durable movement and case to sell at moderate cost, and we advertise **NEW ENGLANDS** broadcast so that your stock moves rapidly. Our 1907 advertising will continue our remarkably successful policy of advertising to the consumer and giving the dealer the full benefit of it.

If **NEW ENGLANDS** are missing from your line of medium-priced watches you are missing immense profit-possibilities. To make the most money out of your watch department you must have a complete assortment of medium-priced watches. No assortment of watches is complete without **NEW ENGLANDS**. Therefore let **NEW ENGLANDS** be your leaders—they please the people best and will pay you best.

Sit down at your desk now and write us for our catalogue and full information. Let us tell you about our Retailer's Aid Department—the most effective selling plan for watch dealers ever devised. Write us to-day. Address:

OPTICAL DEPARTMENT

A Unique Case of Eyestrain.

(By PERCY R. WOOD, M.D., Marshalltown, Ia., in the Journal of the A. M. A.)

THE eye may be designated as an end organ of the brain through which the latter discharges its visual function, thus explaining the disturbance of cerebral reflex centers by slight errors of refraction and consequent interference with various functional activities.

Twenty-five per cent. of all civilized people suffer from conditions dependent on ocular malfunction and clinically described as eyestrain. A large proportion of these cases is not reached, because few physicians correctly diagnose the condition, the profession, as a whole, being poorly informed on this subject. If insomnia, nervousness, headache, indigestion and constipation may result from ocular defects, the physician should know this and so be able to prescribe the proper remedy.

Whenever our text-books emphasize more clearly, and our medical schools teach more explicitly, the pathogenesis of eyestrain, we may have recognized colleges for postgraduate work along these lines and laws confining the practice of ophthalmology and refraction therapy to those especially qualified and licensed. This would protect the public from embryo specialists and opticians who do harm. If headaches and systematic disturbances of a digestive or psychic character, which are unrelieved by drugs, were referred to the ophthalmic surgeon, more satisfactory results would obtain.

Conditions predisposing to eyestrain often date from birth and attract attention only after serious consequences have accrued. A law requiring the examination of children's eyes and the correction of refractive errors before they are permitted to enter school would mean much in health and happiness.

As demonstrating that eyestrain leads to ignorance, invalidism, pauperism and crime, we find in statistics taken of the school children of Berlin that over 40 per cent. have refractive errors. The number of children thus affected shows a decreased ratio from the lower to the higher grades, indicating that ocular defects are factors in reducing school attendance. Eighty per cent. of the patients at the National Hospital for Epileptics in London have serious ocular lesions.

The same deficiency appears to play a role in nervous diseases. The bulletin of Iowa institutions for 1903, by Dr. Applegate, indicates that nearly 50 per cent. of inebriates have ocular defects. Statistics

also show that nearly 50 per cent. of the young criminals at the Elmira reformatory have defective vision, which has been held responsible, in part at least, for their downfall.

The case given below is unusual. It demonstrates the depth and range of ocular reflexes, as well as the necessity of never overlooking the eye in making a diagnosis.

Case 1.—Miss M., of Marshalltown, aged 10, first seen last June, was suffering from a group of symptoms easily recognized as being of ocular origin, viz., nervousness bordering on hysteria, melancholia, indigestion, headache, etc., but standing out from this striking clinical picture was one symptom, unknown in my experience, enuresis occurring mostly at night. She had suffered from this distressing symptom for two years and had consulted many physicians and obtained no permanent relief. She had taken treatment for neurasthenia, indigestion, liver and kidney troubles.

Under a cycloplegic I found the following errors:

R. Sph. plus 1.50, Cyl. plus 0.87, axis 180.
L. Sph. plus 2.50, Cyl. plus 1.00, axis 175.

Notice the astigmatism against the rule. I prescribed:

R. Sph. plus 1.00, Cyl. plus 0.50, axis 180.
L. Sph. plus 2.00, Cyl. plus 0.87, axis 175.

The more aggravated symptoms gradually lessened, and now, six months later, she has entirely recovered.

The result in this instance goes to show that no obscure case of functional, organic or psychic nature has received proper consideration until the eyes have been skillfully examined under a mydriatic and every phase of the case gone thoroughly into from an ophthalmologic standpoint.

Regular Monthly Meeting of Granite State Optical Association.

THE regular meeting of the Granite State Optical Association was held Wednesday, Jan. 16, at Manchester, N. H. A large number of the leading Opticians of the State were in attendance, the main attraction being a lecture by Dr. J. E. Littlefield, optical instructor of Boston. The lecture, which was announced beforehand, was entitled "Some Causes for Mistakes in Fitting Glasses, and Some Avenues of Income Not Generally Understood by Opticians." The doctor handled the subject in his usual forceful manner, and while unfolding some new and original ideas, he carried his audience with him by his clear and logical deductions. Robert T. Little, of Manchester, was admitted to membership.

Curative Properties of Eye-Glasses.

(By CARY G. LEO-WOLF, M.D., in the Medical Record.)

YOU all know that under the term "functional disorders" we comprise a large number of disturbances in the different organs of the body which we are able to recognize only by the altered function of the particular organ and the concomitant malaise, but into the causation of which pathological anatomy has, so far at least, failed to give us any insight.

During the last decade or two a new factor has come to be recognized by some of us in the causation of many of these disorders, and this is "eyestrain." We have been charged with exaggeration and with juggling our records to fit our "pet theory," as it pleases some to call it, though in my opinion it is long past the theoretical stage, and is now a dogma as well established as that certain bacteria will, under proper conditions, produce certain infectious diseases.

I shall not go into any more or less learned dissertation about the connection between the eyes and the rest of the body, but I shall leave this part to the physiologist and pathologist. As a general practitioner, I shall now proceed to enumerate to you those functional disorders which I believe to be caused at times by eyestrain, and have myself seen to be in some instances directly traceable to it.

Starting with the nervous apparatus, we have first of all those headaches of obscure origin which are still frequently referred to as auto-intoxication, for want of another term more occult or indefinite; it was in these headaches that the etiological factor of eyestrain was first recognized and so universally accepted that many of these patients now consult the oculist or optician without the advice of their physician; but unfortunately this has left the impression on the minds of laymen, as well as of many physicians, that these headaches are the only symptom of eyestrain, and frequently I have had a patient say, when I advised him to consult an oculist for some other condition:

"Why should I see an eye doctor and wear glasses when I have never had a headache in my life?"

That exasperating condition, both to patient and physician, migraine, blind or sick headache, is in my experience usually caused by eyestrain.

Hysteria I have seen repeatedly caused by eyestrain, and cured it completely in a short time by combining our usual methods with those of the refracting oculist.

Optical Department.

The same I can say about neurasthenia, which is a disorder of men with sedentary habits, and of nervous prostration, which we find usually in women with too much money and leisure hours spent in reading novels in a reclining position; I have not yet seen a case of nervous prostration in a washerwoman nor of neurasthenia in a track hand.

We have lately accepted the theory that chorea is caused by the same micro-organism as acute inflammatory rheumatism, and undoubtedly this is true in quite a number of cases; but where we cannot find any valvular affection of the heart nor a history of acute arthritis, we will do well to have the eyes refracted, as was shown to me only lately in the case of a girl of ten, who had been treated by others for chorea for the last two years and who has been cured of her choreatic movements through glasses and simple tonics.

Neuralgia, especially that of the trigeminus, I have seen due to eyestrain. Do you not think it advisable to have such a patient's eyes examined before we tell him to submit to an operation like the excision of the ganglion Gasserii, even if we should find only one case in a thousand whom the wearing of glasses will relieve?

To come to the respiratory organs, we find in the nasopharynx frequently recurring "colds" to be due often to eyestrain; one of my friends gets a "cold" whenever the frames of his glasses for compound astigmatism are bent. All physicians know that looking into strong light may cause sneezing, but few will acknowledge that there could be any connection between ametropia and nasopharyngeal catarrh. I have also cured a number of cases of dry, hacking cough, accompanied by no local or other symptoms, with the help of the oculist.

Nowadays I do not attempt to undertake the treatment of an asthmatic patient without insisting on his submitting to refraction, as I believe to have proven to my own satisfaction the existence of an occasional ocular origin of asthma.

The most frequent form of anemia, usually occurring in young girls, which is always combined with obstinate constipation, "chlorosis," is quite amenable to treatment after the proper glasses have been prescribed, and all its symptoms, including the constipation, disappear in a comparatively short time.

Examination of Eyes of School Children.

AMONG 420 children, 167 were classed by Loring as normal, having perfect vision, no ocular symptoms, and no perceptible refractive errors; 155 had little refractive error, good vision, and slight symptoms not sufficient to need treatment; 98 had either less than half vision, troublesome symptoms or marked refractive errors, and were mostly referred for further examination.

He found an increasing number of defective eyes in the higher grades, and a majority of normal eyes among the good students, and a majority of defective eyes among the poor students.

An Optical Query Answered.

COSHUOCTON, O., Jan. 23, 1907.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

We have two cases which have given us great annoyance and would ask if you can give us some suggestions that may help us. Case No. 1—Mrs. Smith, aged 55, married. A person of robust build, lives on farm and is able to do any kind of housework; says she is very nervous, but knows of no disease. Would not consent to having her eyes examined with ophthalmoscope, as she had it done some months ago by someone, and the light caused intense pain for days afterward. She has by test lenses for distant vision best results with + 1.75 and for reading + 4.5, both eyes the same. Close point of vision, 6 inches; distant, 20 inches. Muscle test shows 3° insufficiency, base out. Complains of dull pain back of eyes if out during day, and is unable to sleep nights, owing to constant pain after retiring. Have given Amber lenses for distant vision with the + 1.75 spheres, and after wearing two weeks reports no improvement.

Case No. 2—Mrs. W., aged 38. Eyes under mydriatic give both eyes the same, as follows: + 75 s — .50 axis 180°. Muscle test shows 2° base in. Have given for reading + 3. sph., also same with astigmatic correction. Also have tried a pair of 1° prisms with no improvement. Pain at nights is the same as in the first case, after retiring. Both complain of sickness at stomach after any unusual eye strain or work. Close point for No. 2, 20 inches; distant point, 24. Both patients say they are very nervous and are never free from eye ache. Also have a girl of 12 years afflicted in the same way, but she has periods of several months without any pain. Her close point is 6 inches; distant, 14. Her pain is over the eyes, while in the other cases the pain is in back of the eyes. Have obtained best results with + 1. sph. May have a complete relief for two or three months, when pain will return without any unusual cause. Have not been able to find any other conditions in any of the three cases either with ophthalmometer or by fogging. B.

ANSWER.—From the data given we can only offer a few suggestions. In case No. 1, if patient has worn the distance and reading corrections faithfully, we see no reason why a refractive error should be considered the cause of the headache. We assume that you are sure no astigmatism exists. The only clue that we find to the trouble is her "robust build," inasmuch as in those cases there is apt to be congested blood vessels that might cause the pain. Having fully corrected all existing refractive error, all that can be done, it seems, would be to suggest the possibility of congestion, and advise, therefore, medical consultation.

Case No. 2.—If your estimation of the distance correction be correct, how can you justify yourself for giving a 2.25 sph. extra for reading, when patient is only 38 years of age? Before we would dare advise you on this case you would have to reconcile those points. Either your distance or reading correction must be incorrect—which? Find strongest plus correction that will be tolerated for distance and this, or this with

not more than 50 sph. more, would do for reading. Decentering "in" might aid somewhat. This might possibly be a case of premature loss of accommodation, and the P. P. being at 20 inches, tends to corroborate that theory, but, as we said, more definite information would be required to answer you fully.

Case No. 3.—If pain comes only once every two or three months we would not attribute it entirely to refraction conditions. Patients should be advised to consult physicians, ascertaining whether or not trouble is due to menstrual irregularities.

Plattering Words for Uncle Sam's Eye Specialists.

THE scrupulous care exercised by the United States in examining the eyes of emigrants is appreciated by a London contemporary, the *Optician and Photographic Trades Review*, which says:

"The regulations with respect to eye complaints governing the entrance of immigrants into the United States are admittedly severe, sometimes almost tragic, as we have recently read. A correspondent sends us an account of two cases of trachoma in Russian Poles, who were refused a landing in New York from a Clyde emigrant ship. The men have just passed through Glasgow on their way back to the respective ports from which they set out. On their return journey they were isolated from the other passengers and kept under strict medical supervision.

"However inconvenient such regulations may be to the emigrants, we think, on the whole, they perform a useful purpose. The least thing one country can do for another that takes its surplus population is to see that the emigrants are not diseased. We do not know what exactly are the conditions regulating emigrants into this country who may have affections of the eyes, but it seems to us a serious matter if emigrants who are rejected by the United States are allowed freedom to settle here."

Ocular Headaches.

IN a recent article in the *Journal of the A. M. A.*, Dr. Edmund W. Stevens, Denver, said the relation of eyestrain to headaches and other neuroses was first pointed out by Mitchell and Thomson 30 years ago. The medical profession has been slow to appreciate the importance of the subject. Eyestrain is the most common cause of headache in the otherwise healthy. Ocular headaches come on at any age, but are very frequent from 6 to 12 years of age, and again with beginning presbyopia. They are indistinguishable in character and position from headaches due to any other agency. He discussed the relation of eyestrain to migraine. The adjustment of proper glasses does more for the relief of migraine than any other treatment. He emphasized the importance of carefully measuring errors of refraction under a mydriatic.

A Practical Storekeeper's Advice Regarding Various Ways of Curtailing Business Expenses

By FRANK FARRINGTON

(Continued from issue of Jan. 16.)

THERE is a waste in connection with special offers and sales that sometimes amounts to a great deal, though it does not occur in the store that is wisely managed. When you go to work and get up a special sale of a line of goods that are selling fast without any special, goods that are staple and are bringing you in a nice lot of money at the regular price before you cut into them for the special sale, you are wasting good profits that belong in your pocket. Further than that, you are loading people up at a cut price and making it hard to get them to pay the regular price when they get out again.

The waste of money tied up in dead stock is a serious one, and one that can be overcome. You can get rid of any kind of dead stock if you will put a price on it. Keep cutting into the price until the goods go. They are worth nothing on the shelves and inventory at nothing if you take a careful inventory.

Dead stock on the shelves does more than tie up money. It takes up valuable room. If you put the goods away where the room is not valuable they will not sell in a thousand years. Get them down on the bargain table and push them. If they should be left up on good prominent shelves they would take up room that might better be occupied by live stock that would sell. You can't afford to tie up good room any more than you can afford to tie up money. Every square foot of space is worth money to you.

Another thing that uses up good room is the filling in with stuff that is not for sale. You have a certain amount of stock in the store which is not for sale. It consists of material used in handling goods, the twine, the paper, the empty boxes, and, more than all, the surplus stock.

Extra stock of all kinds of goods takes up a lot of room. You can easily fill up your store with that sort of stock. If you have more room in your store than your goods displayed occupy, it is, of course, well to use it for the surplus stock, displaying that, unless it is goods that will be apt to deteriorate from the exposure.

The proper use of the cellar, the loft,

the back rooms and other odd parts of the store come under the head of economy. The more goods you can sell the more lines you can carry without increasing your expenses in proportion as you increase the receipts, and the more money you will make. To increase the lines means to increase your surplus stock, and for that you require more store room.

In many stores there are back rooms, cellars, etc., where extra stock is stored promiscuously without regard to order or convenience. Everything scattered so that no one can find the thing wanted in anything like a short time. This calls for a waste of time in looking for stock to fill up the shelves, and it means that more or less of the stock is misused by rough and frequent handling. It means, too, that it is impossible to tell just what is in stock. Goods will be reordered when the back room still conceals a sufficient quantity, or stock will run out on the supposition that there is plenty left in the back room.

These store rooms should all be arranged for the convenient and orderly keeping of surplus stock in such shape that any kind of goods can be found at once and a glance will tell you how much there is of them.

Plenty of shelving is needed, some of it very broad, for the big packages and some of it narrow for the small parcels. It is unwise to pile up small packages on wide shelving, as the back rows get lost sight of sometimes and the goods accumulate faster than is expected.

Where goods are kept in original packages there should be regular spaces for each kind of package, and everything should be kept in the right place. A place for everything and everything in its right place is more important in shopkeeping than in almost any other business. They say that system is carried to an extreme and things oversystematized until there is too much red tape about the simplest business; but you might far better take your chances on system gone to seed than to try and get on with no system at all.

Clerks too often stand ready to criticise employers for economical methods. They are apt to think them close or stingy be-

cause they want paper or twine once used to be saved for another time. They think it's foolish to object to throwing paper fasteners, rubber bands and other little things into the waste basket instead of making them count next time. There is no quick wealth in small economies, but a steady saving of dimes or pennies means a steady saving of dollars. An employer has the right to insist that the clerks regard his instructions about waste and carelessness.

In regard to the fixtures in the store we are too apt to consider them as permanent. We think they cannot wear out, and when a new set of show cases come in they get the same hard usage from the first that the old ones got. This is a mistake, because the life of a show case or other piece of furniture is not endless. A case will not last a lifetime unless treated with particular consideration. See that every bit of furniture is used properly and not misused or abused. Every break and every scratch shortens its life just so much and brings just that much nearer the day when it will be necessary to replace it again. Care is due to all sorts of tools that we work with and carelessness and neglect are inexcusable.

One of the steady wastes in a store comes from giving customers over-weight or measure. The first preceptor in business that the writer ever had was wont to say: "It's a scoundrel that gives under-weight and a fool that gives over-weight," and there's much truth in the statement. In giving over-weight you rob yourself without getting a particle of credit from the customer benefited. The customer never knows it and you are a sure loser by the transaction. In giving under-weight your customer may never find it out, but you are undermining your own character, and you can't afford to be dishonest even if no one does catch you at it. See that correct weight goes into every package, and if it can't be regulated in any way except by an expensive pair of scales, get them.

By being accurate in weight—I don't mean to be stingy and figure so close that you'd break a coffee bean in two to make the scales balance—but be as accurate as you can in reason. Any good quality can be overdone, and accuracy is no exception to the rule.

Are your clerks careless about the things they take from stock for their uses? There are stores whose cigar or candy case hardly shows a profit on account of the pilfering habits of the employes, and those employes may not realize either that they are stealing. The helping oneself once in

Storekeeping Department.

a while does not seem theft. So small an item as a cigar or a candy or two is not enough to matter, and yet taken day in and day out by all the clerks there is a good-sized loss figured up at the end of each week.

We believe that if the proprietor himself is careful to make account of all the goods he takes from the store as if it really signified to keep everything straight, the employes would be more likely to realize that everything did matter. One of the first things that ought to be impressed upon the clerk's mind is the distinct difference between what is his and what is his employer's.

Are you getting the benefit of the cash discounts on all the goods you buy? That failure to take the discount is one of the leaks that keeps a lot of merchants back. There are leaks in buying as well as in selling; in fact, there are more of them, and the good buyer is a greater help to the store's money-making than the good seller.

The poor accounts of many a store represent a large share of the annual profits. It is an easy matter for a credit establishment to get all its profits on the books and anything that goes on the books, be the buyer the best pay in the world, is not as good as the cash.

If you must run a credit store, make the credit as short as you can and get after the poor pay people before they have time to get in very far. You can stop a man from asking for more credit by dunning him up sharply and promptly. Don't delay with the fellow that you suspect and whom you trusted because you couldn't very well help it. Send him a statement the first of the next month. He will think that if you are after him already for what he owes there won't be much chance for him to get trusted again till that's paid.

The money that you lose on poor accounts is the cost of those goods gone forever. There is reason in charging up a little to bad debts every year, but there's more reason in keeping that amount down as low as possible.

Nowadays every factory has a system for the handling and the marketing of its by-products. These things used to be allowed to go to waste and brought in no revenue. Now there is a use for everything and a money value to it. Just so in the store. There is a money value to everything that goes through the store. That value may be one only to you, but it pays to save everything.

Empty packing cases are salable if opened without being torn all to pieces. Nails are worth saving. They save buying when you want to do a little carpenter work in the window or elsewhere. Barrels are worth 10 cents apiece in some places; in some even more. Crates that have no repacking value make good kindling for your own use, and a good deal of that sort of wood can be used to make heat if you have a heater with a big fire-pot.

Show cards that advertise manufacturer's goods are often good white cards on the reverse side and make good cards for the window trimmer to put bulletins on.

Have a place where these can be kept till wanted, and even after a card has been made into a bulletin once it is often a sentiment that can be used some time again. Lots of merchants keep these bulletin cards on file, saving the good ones, and use them over. A card a year old will not be remembered by the public and may be perfectly fresh in appearance. Price tags should be saved as taken from goods sold. A little box at each counter for the purpose, or a little drawer to throw them into will do the trick, and it is as easy to take tags out of the drawer as to take them from a new bunch.

Many small economies in addition to the ones mentioned above will occur to you from time to time, and they are worth following up. Any sort of waste is a leak. It's a wise business man who knows enough to see that every cent counts.

System is what will help you out in the

An Attractively Furnished Retail Jewelry Establishment of Philadelphia, Pa.

THE accompanying illustration gives a fair conception of the interior of J. Press & Sons' jewelry store, located at 35 S. 8th St., Philadelphia, Pa. While the photograph scarcely conveys an impression of the beauty of the decorative scheme and fixtures, the extensive length of the all-glass show case becomes apparent. The interior of this up-to-date home of adornments for Quaker City purchasers measures 60 feet in length by 21 feet in width. The artistic metal ceiling is 15 feet above the floor; the walls are covered with a beautiful shade of dark red burlap producing the effect of warmth to the customer. The furnishings and fixtures are of solid mahogany.

The chandeliers are bronzed and combine gas and electric-lighting equipment. The capacious show window of the store, with

INTERIOR VIEW OF THE STORE OF J. PRESS & SONS, PHILADELPHIA, PA.

matter of economies, and system is what you must have. Subscribe for the business men's magazines and the trade journals and study in them the short cuts to long results and the ways of doing more with less expense. There is much literature nowadays along such lines and much of the best brain timber of the country is talking of such matters. See that you get your share of the benefits of such talk.

Remember that it's what you save and not what you make that counts.

[THE END.]

James E. Kelly, Dunbar, Pa., has purchased the building on Woodvale St. at that place, which he will improve and shortly use for his jewelry business.

Thomas J. Routledge, Water and Main Sts., Elmira, N. Y., has decided to enlarge his store. More room has been required by Mr. Routledge for some time. He has leased an adjoining store in Water St., thus doubling his store capacity and providing entrances from two streets.

its ample proportions giving 15 feet of display room on the street and a depth of six feet, affords magnificent opportunities for attractive decoration that are ably utilized by the firm.

The room at the rear of the store, the entrance to which is visible in the photograph, is devoted to the optical department and private office. As is well demonstrated in the picture, the wall space to the rear of the long show case is utilized to its fullest extent by magnificent wall cases, whose shelves are well stocked with clocks and silverware.

Joseph W. Cohen, a pawnbroker located at 627 Penn St., Reading, Pa., has been made the defendant in a suit brought against him for alleged violation of an act of the Assembly designed to restrict the sale of merchandise at auction sales. The prosecution was instituted by several jewelry concerns in that city under the name of Delective Martz.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1764.—Gravity Escapement.—*What is a gravity escapement? Will a clock with a gravity escapement keep better time than a regulator with a Graham escapement?* L. B.

ANSWER:—A gravity escapement is one in which impulse is given to the pendulum by a weight falling through a constant distance. After the success of the Denison gravity escapement for the great clock of the Houses of Parliament an impression got abroad among builders of fine clocks and regulators that the double three-legged gravity escapement might be better and supersede the Graham escapement in all such timepieces. After many disappointments it was learned, however, that the unlocking of the escapement in clocks of moderate size was a great drawback, and the Graham escapement resumed its former reputation, which it had lost to some extent before this time, when applied to turret clocks, which have to move a number of heavy hands. When these hands were exposed to heavy winds and snow it would often cause these clocks to stop, as the weights attached to clocks with the Graham escapement could not exceed certain limits. In the case of the gravity escapement as made by Mr. Denison, however, the weights attached to the clocks could be made without such limit, and the train could drive the hands successfully, no matter what resistance the weather might have to offer.

QUESTION No. 1765.—Polishing Ivory, Pearl, Etc.—*I often get small jobs that require polishing, such as ivory, pearl, horn and bone. Please inform me how I can do this.* P. I.

ANSWER:—For the polishing of ivory use pumice stone and putty powder. For pearl use olive oil and finely pulverized rottenstone made into a thick paste. Then add sulphuric acid in sufficient quantity to make a thick paste. Apply this paste and rub quickly with a cork covered with velvet, and as soon as the pearl takes the polish wash off. For polishing horn and bone use finely powdered pumice stone and water. Apply with felt polishing wheel; finish with rottenstone applied in the same way.

QUESTION No. 1766.—Engraving on Aluminum.—*How can aluminum be engraved so it will make smooth cuts? Have tried it, but found it pulls and cut rough.*

E. A.

ANSWER:—Aluminum is difficult to engrave unless the polished graver is dipped in a fluid to enable the tool to cut smooth. The liquid usually used is made as follows: Oil of turpentine, four parts; stearine, one part, and one part rum. This liquid is put in a bottle with a large neck to enable dipping the graver in it, and should be corked

tight when not in use. If there are large monograms, then the surface of the metal may be smeared with the liquid. Another method is to saturate a little cotton with the liquid and place it in a little tin box so that the graver may be moistened in this, as it is easier to do this than to use the bottle. This same formula may be used for engraving on very hard metals, such as brass, copper or steel.

QUESTION No. 1767.—Rose Gold on Jewelry and Bric-a-brac.—*I wish to finish some jewelry and bric-à-brac with a rose gold finish. Kindly tell me how I must proceed.* R. G. J.

ANSWER:—In producing a rose gold finish for jewelry the light and lustrous shades are preferable, but care must be exercised to obtain shades that will harmonize with the piece of jewelry to be treated, and it requires considerable skill to produce these shades. A solution suitable for a rose gold finish contains, in a half-gallon solution: Chloride of gold, four pennyweights; carbonate of copper, five pennyweights; C. P. cyanide, three ounces; water, $\frac{1}{2}$ gallon. Prepare the solution in the regular way for gilding, then add the carbonate of copper slowly, having previously dissolved it in a little cyanide and water. When adding the copper keep the solution at about 130° F. and stir frequently, trying it often upon the regular work, until it begins to run into the proper shade. Add no more copper, as the solution will have a tendency to run darker as it becomes older. A 10-karat anode, composed of gold and copper, works well with this solution, although where there is plenty of gold in the solution, or enough to prevent tarnishing, a copper anode is sometimes used; and sometimes platinum or fine gold anodes are used. The whole secret in getting the different shades is in the proper manipulation of the current, the temperature of the solution, and the handling of the work while in the solution. With these details properly understood, and with the assistance of a good gilding solution, one may produce almost any shade in rose gold. If, after using, the color of the rose solution becomes too dark, or dead, a little chloride of gold should be added, which will immediately lighten the shade of the deposit. Scratch brushing is indispensable for gilding and gold plating. The brushes used should be circular and of brass wire and attached to a lathe. The brushing should be done wet, and for this purpose the best and cleanest method is to use soapwood bark and water, which is prepared by pouring hot water on the soapwood and allowing it to settle over night. Let this soapwood water drop on the work.

QUESTION No. 1768.—Polishing Rags.—

There are some polishing rags called Ser-vette Magique for metals. Kindly inform me how I could make them.

ANSWER:—Those polishing cloths are made from calico prepared with Castile soap and rotten-stone and dyed with a solution of coralline in alcohol.

Flux for Welding Copper.

ACCORDING to a patent recently issued (U. S. Patent 832,755, Oct. 9, 1906), John Spittall, of Winnipeg, Manitoba, Can., claims to weld copper successfully by the use of the following flux:

Boracic acid..... 2 ounces.

Phosphate of soda..... 1 ounce.

The flux is made by mixing the two ingredients, and it is placed upon the red hot copper to be welded in the same manner as a flux is placed upon steel or iron thus treated. The union of the metal is brought about by hammering the parts together.

The use of phosphate of soda in welding copper is of long duration, but heretofore it has been used seldom.

A Mode of Plating Soft Metal Castings Without Cleaning.

IT is now becoming customary in the trades that manufacture soft metal castings in metal molds to transfer the castings direct from the mold to the plating bath without any intermediate cleaning. Such practice is now being introduced into the casket hardware industry and, surprising as it may seem, the deposit upon the castings is good and adherent.

Melted metal upon which no grease has been used as a flux is perfectly clean and it is not difficult to preserve the mold in a clean condition. The castings which are produced, therefore, are as clean and free from oxide as it is possible to make them. When they are introduced into the plating bath, therefore, the deposit proceeds as well as though they had passed through the potash kettle.

In order to use such a method of electroplating direct from the mold, it is necessary to exercise much care in chasing the surface of the mold so as to have it as smooth as possible. It goes without saying that the smoother the mold the better the casting and by using great care in chasing the mold, castings may be produced in it that have a very high finish. In this manner buffing, with all of the cleaning that must be done after it to remove the adherent rouge, is entirely avoided. The castings that are now being turned out in many establishments in this manner are very creditable and the deposit upon them has every indication of being equally as good as that which is produced when the casting is passed through the potash kettle.—*The Brass World.*

Charles W. Crankshaw, Atlanta, Ga., has donated to the Track Team Association a silver loving cup which will be competed for in the Spring. There will be three meets, and the team which wins each of these will be awarded the trophy, which is now being exhibited in the show window in his store.

DELFT, *Its* CHARACTERISTICS *and* HISTORY*

By EDWIN ATLEE BARBER

Copyright, 1906, by the Pennsylvania Museum and School of Industrial Art.

(Continued from issue of Jan. 23, 1907.)

BRISTOL.

THE Delft of Bristol possesses a slightly harder enamel, often thicker and muddier than that of other English faience, and tinted instead of being dead white. Many of the Bristol plates are entirely covered on both sides with a heavy, evenly applied enamel. The blue in the decoration is of a darker and more pronounced tone than

FIG. 7.—DELFT PLATE IN DARK BLUE. MADE IN BRISTOL ABOUT 1760.

that used at Lambeth. Michael Edkins was one of the principal decorators, who later (in 1761) was an enamel painter on Bristol glass. One style of decoration, known as *bianco-sopra-bianco*, was practised there, in which border patterns in white enamel were painted on a ground of slightly different tint, greenish-white, or a shade of greyish-blue, known by the French as *bleu agate*. Some of these pieces were probably the work of Edkins. Several plates, with broad, flat margins, on which are painted enameled strawberry and flower border devices on a light greyish-blue ground, with central designs in dark blue, may be seen in the collection of the Museum. A similar plate is in the Essex Institute, Salem, Mass., and two others are in the Wadsworth Athenæum at Hartford,

*From the Pennsylvania Museum's Art Primers. Published by Doubleday, Page & Co.

Conn.* In addition to blue, other colors, such as yellow, red, purple and brown were used. The decorations were frequently in the Oriental or Dutch style. The oldest known pieces of Bristol Delft date back to about 1700, and the manufacture was continued until near the end of the century.

In the Museum collection is a bowl with landscape painted on the outside in Chinese style in deep blue and purple, with a *bianco-sopra-bianco* border around the inner rim and in the bottom the inscription "Success to the British Arms." We have seen plates with lobed or scalloped edges and central landscapes in blue and purple. The posset pots in the Museum collection may also be attributed to Bristol. They are decorated in polychrome.

LIVERPOOL.

The Liverpool Delft is characterized by thinness of the pinkish body and a bluish tone of the enamel, which often contains small pin-holes. Another peculiarity often observed is the absence of glaze on the decorated portions, the colors, dark blue, pale green, yellow and red, having been absorbed into the enamel. Frequently the blue color has spread, presenting the appearance of having been applied to a wet surface. Punch bowls, often inscribed and dated, and painted with representations of sailing vessels, are abundant in this ware. Caudle pots, puzzle jugs and mugs are also found, and large quantities of fireplace tiles were produced. The decorative designs were frequently *printed* by the transfer process. Two tiles with black prints, in the Museum collection, are so soft in body that they can be cut away like chalk. In the Wadsworth Athenæum, Hartford, Conn., are several similar tiles, printed in dark red. Delft ware was first made at Liverpool near the end of the 17th century, continuing to be produced until about 1760.

STAFFORDSHIRE.

The Delft ware produced in Stafford-

*Plates of this style were at one time attributed by American collectors to Saint-Amand-les-Eaux, France, and certain English collectors, we understand, believe them to be the products of the obscure factory at Wincanton, England. Many of the best authorities at the present time, however, agree in assigning them to Bristol.

shire is coarser in body, glaze and decoration than that of other English varieties. The enamel possesses a yellowish hue. The backs or bottoms of pieces are usually coated with lead glaze instead of enamel, while the decorations, in blue, with dashes of green and yellow, are extremely crude. Most characteristic are the large circular dishes or plaques, with rudely drawn figures of royal personages, Adam and Eve and other biblical subjects, with trees roughly daubed on with a sponge. Delft was made at several places in Staffordshire from about 1680 until late in the following century.

BRISLINGTON.

At Brislington, near Bristol, tin enameled pottery, of a hard, coarse, reddish body, was produced to a limited extent in

FIG. 8.—DELFT TILE WITH BLACK DECORATIONS. MADE IN LIVERPOOL ABOUT 1760.

the 18th century. It was embellished with blue designs and sometimes with crudely painted copper lustre ornamentation. The ware was of a cheap character and thinly coated with a coarse yellowish enamel.

WINCANTON.

Delft ware was also made at Wincanton, in Somerset, to a limited extent, for a few years previous to 1750, but little is known of the products of this unimportant factory. A few examples are in the British Museum.

[THE END.]

A thief, supposed to have been well acquainted with the premises, recently broke into the store of the Harrison Jewelry Co., Roanoke, Va., but he was evidently scared off before securing much plunder. The loot consisted simply of a watch and a bracelet. The stock in the window had been disarranged, showing that the intruder had been examining the articles.

The Art of Metallizing Flowers and Objects Perfected in a Belgian City.

IN a recent letter Consul-General George W. Roosevelt, of Brussels, reports the successful development there of a new method of making bronze-plated objects, as follows:

The first attempt at metallizing objects was known to the industrial world as long ago as 1861-1866, when unsuccessful efforts were made to metallize flowers, fruits, etc. After six years of laborious research and experiments, H. Monge and C. Arzano succeeded in perfecting the art, and recently established a factory at 17 Rue d'Irland Saint-Gilles, Brussels, for the manufacture of bronze-plated art objects, ancient and modern. By their process, the secret of which they jealously guard, they are enabled to metallize even so delicate a thing as lace or a rose in full bloom.

The object of this establishment is to place handsomely finished metallized objects on the market, in every particular equal to, but at one-eighth the cost of cast bronze, and to immutably fix the incomparable forms nature gives to her products, such as flowers, leaves, fruits, insects, etc. These the most skilful have heretofore only furnished fair imitations by covering the object by electrolytic means with an exceedingly thin but as dense as possible coating of brass, which transforms the natural objects into bronze.

Without disclosing secret methods of metallizing, no hesitancy was observed concerning a description of the length of time that objects were retained in what is known as the bath. The length of time varies according to the character of the object, and the complication of its detail, from 24 to 72 hours. The subjects selected for metallizing are generally well-known works of famous artists, objects for decorative purposes, and artistic objects, such as eard and ash receivers, frames, etc. The finished articles, which resemble in weight, texture, color, etc., real bronze, are entirely different from any manufacture now on the market, as they are declared chemically pure copper and not a mixture or composition. Julius and Arthur Hart, of Indianapolis, Ind., and Los Angeles, Cal., are representing members of the firm in America.

Diamond Lenses.

IN the years 1824 to 1826 Pritchard and Dr. Goring made laborious experiments in reducing diamonds to object lenses for microscopic work. They succeeded, but the cost of production made the work useless from a commercial standpoint. On account of the carbon crystal's superior refractive power a reduction of curvature below that necessary with glass lenses was possible; and the greater curvature of a lens carries considerable disadvantages with it. But the increased cost outweighed the superior refractive power.

Thieves broke the show window in the store of F. E. Hilton, Augusta, Me., Jan. 14, and escaped with a tray containing two dozen rings, valued at \$72. The theft is supposed to have been committed by amateurs.

How Statuary and Art Works May be Covered in the Proposed Copyright Bill.

WASHINGTON, D. C., Jan. 23.—During the past month there have been many hearings in this city before the joint committees of House and Senate on the subject of the pending copyright bill, and much has been said for and against the passage of the bill. One of the provisions relative to statuary is that in the case of a painting, statuary or sculpture not less than \$10 shall be the fine for every infringing copy found in the possession of the infringer or his agents or employes. It has been suggested that this provision is too high, and that the amount should be made smaller, possibly about \$1 for each and every copy.

In an endeavor to meet modern requirements it has been thought best to put into the bill classifications, under which copyrights may be applied for, and among the classes named are: (G) Works of art, models or designs for works of art; (H) reproductions of a work of art; (I) drawings or plastic works of a scientific or technical character. Various amendments have been proposed, and among them clearer definitions of what is provided for in the bill. For instance, it has been suggested that the following will be the better provisions for the classifications of art subjects:

"Works of art subsisting in representation of form or in arrangement of color, not including such works in which the form and color has chiefly a function of utility, or ornamentation of an article of merchandise, but comprising:

"(a) Sculpture, including statuary, plastic works in relief or intaglio, cameo and intaglio cuttings, carvings (other than such as are ornamentations of articles of merchandise or utility, and plastic models of scientific or technical character.

"(b) Paintings, drawings, engravings, etchings, lithographs, prints and pictorial illustrations, photographs and photographic negatives, including photographs or negatives in series for representing action in successive stages, etc."

Dates to Remember.

LEST we forget. When our innocent customers ask us a simple question concerning the jeweler's landmarks and a ready answer is not forthcoming, absence of reply can be imputed to two almost equal human frailties—ignorance or lack of courtesy.

The art of diamond cutting is said to have been discovered and practiced by Ludwig Van Berguen, a lapidary of Bruges, who invented the process of using diamond powder on the work in 1476.

The cutting of "roses" or "rosettes" started about the year 1520.

"Brilliant" cutting commenced in the middle of the 17th century. Cardinal Mazarin is said to have originated it.

F. B. McKinley, S. Main St., Washington, Pa., will move his store, April 1, into larger quarters in the Donnan building, where he will have twice the amount of store space which he has at the present time.

REPRODUCTION OF
NATIVE AMERICAN
POTTERY.

BUYERS visiting the salesrooms of W. H. Dunn & Co., 54 Murray St., New

York, who represents the Clifton Art Pottery, made at Newark, N. J., are attracted by the fine display, including a variety of vases, water bottles and bowls, etc., in Indian style. The reproductions of the best examples of American Indian pottery are meeting with much favor. The decorations graphically illustrate the ideals, sentiments, religious beliefs and symbols of the ancient potters of North and South America. The ornamental designs in black stand out in strong relief against the dull, brick red of the background. Speaking of pottery as a record of history, the writer of a booklet published by the manufacturers says: "So far as works of art are capable, they serve to mark their makers' habitat and to indicate his movements. Still more fully pottery records the history of the decorative arts, the beginnings and progress of esthetic evolutions. Every touch of the potter's hand, of the moulding tool, the stylus and the brush become, through changes wrought in the plastic clay by the application of heat, an ineffaceable record of man's thought and woman's toil."

TO HANDLE CUT
GLASS.

J. H. LING and J. M. Stewart, who recently formed a partnership under the style of Ling & Stewart, are the New York representatives of the Wayne Cut Glass Co., whose product they are to handle exclusively. Mr. Ling has been for a number of years a buyer for the Siegel, Cooper Co., and Mr. Stewart was for some time connected with A. D. Matthews' Sons, in Brooklyn. The new firm occupies the salesrooms at 68 West Broadway, formerly occupied by the J. B. Owens Pottery Co. Some of the latter company's samples will remain in the store until April 1.

ADVANCE STYLES IN
CUT GLASS.

THE cut glass for the early season now being received at the New York salesrooms of various manufacturers shows many new designs and patterns which will meet with approval. The combinations of cutting and engraving on the same article provide an ever-increasing variety of patterns. Floral and fern designs continue popular, and the star design is seen with attractive variations.

THE RAMBLER.
