John T. Malcomson, general manager, in his office at 635A Bannigan Building, in the city, purchased last week the factory of the Ehrman Mfg. Co., Milford, Mass. The selling price was \$25,800. The concern has been in the hands of a receiver. The Ehrman Co. had its head office in Boston and manufactures celluloid goods. Machinery and stock are said to be valued at \$50,000. It is understood that the business will be resumed as soon as the reorganization details are perfected.

Among the jewelry buyers who have been in the city during the past week were the following: Milton E. Oppenheimer, New York; Samuel Diamond, of Mass, Hirsch & Diamond, Sterling, Ill.; N. Lauter, Hirsch & Lauter Co., San Francisco; Edward Rothschild, of the American Comb & Novelty Co., Chicago; C. S. Lippman and Rolph Hahn, of Lippman, Spier & Hahn, New York, and George A. Boehm, manufacturers' agent, of New Orleans.

During the early morning hours, a few days ago, while the police were putting out the street lights, a rock was thrown through the big plate glass window of the Old City Hardware Novelty Shop at Newport. It made a hole large enough to allow a man to put his arm through and take jewelry to the value of \$125. The merchants are much incensed over this break, from the fact of the withdrawing of the police to put out the lights and thus leave their beat unprotected just at daylight affords opportunity for thefts of this character to be made.

The case against John Nelson, which was to have been called for a hearing Saturday morning on the defendant's motion for a writ of habeas corpus, has been continued without date by agreement of counsel in the case. James A. Lee, of Gardner, Pirce & Thornley, who represented the Jewelers' Protective Association in the trial, was unexpectedly called out of the city late Friday afternoon, to be away for several days, and as he was desirous of being present at the hearing the continuance was arranged. The hearing had been set down before Judge George T. Brown, of the Superior Court, who presided at the recent jury trial when Nelson was found guilty of receiving stolen goods.

The Advisory Council of the New England Manufacturing Jewelers' and Silversmiths' Association held its regular weekly meeting Thursday afternoon, at which it was voted to resume its former hour of meeting, 12.45 instead of 2, which was changed to accommodate members of the council who are members of the Rhode Island General Assembly. Everett L. Spencer reported for the Executive Committee of the association that the plans for the annual midsummer outing had been completed for Friday, June 18. The steamer *Warrick* has been chartered for that day, and after the customary parade about the middle of the forenoon the party will embark for Field's Point, where a special shore dinner will be served. Re-embarking, the association will sail down Narragansett Bay

to Newport, where the Naval Station will be visited. Mr. Spencer visited the station recently and was assured that every courtesy possible with the discipline of the station will be accorded the association. Opportunity will be afforded for inspecting the premises and of watching drills of various kinds. After a couple of hours here the association will sail for the city again. Supper will be served during the sail up the bay.

Attleboro.

Work on the new factory for the Leach & Gardner Co. on Hazel St. is progressing very rapidly.

Sam Mendelsohn of this town has entered the employ of Korones Bros., New York, as salesman.

McRae & Keeler's and the J. F. Healey & Sons' ball teams played Saturday afternoon in the National Jewelers' League.

F. Milton Eldridge, salesman for the F. M. & J. L. Cobb Co., Mansfield, left last week on a trip in the interests of the firm.

Resolutions on the death of Homer M. Daggett have been drawn up by the Attleboro National Bank and printed in the local papers.

The date for the dedication of the Attleboro Sanitarium, in which a number of local jewelers are interested, has been set for June 14.

Ralph Regnell has returned from the west, where he has been for some time prospecting the gold mines in that part of the country.

Walter Newman, Harold Sweet and Thomas Sadler represented the School Committee at a conference with the Overseers of the Poor Department last week.

At the roll call of the Pythagoras Lodge of Knights of Pythias two manufacturing jewelers, E. A. Sweeney and S. O. Bigney, both of whom are charter members, responded with addresses. The lodge was established 27 years ago.

William Cooke, Providence, was arrested last week by officer Bonney for peddling jewelry without a license. He was before Judge Byram later, but on account of his old age and of the fact that he supposed he had a right to do business that way his case was placed on file.

Miss Jennie McNeerney and Charles R. Remington were united in marriage last Monday evening at the home of the bride, in the presence of immediate friends and relatives. Rev. Albert Crabtree, a former pastor of All Saints Church, officiated. The bride is the daughter of James McNeerney, of Allen-McNeerney Co.

Stockholders of the Attleboro Co-operative Bank met last week and elected the following officers for the ensuing year: Fred L. Torrey, president; David E. Makepeace, vice-president; Henry E. Carpenter, secretary and treasurer. The officers reported the bank was in better condition than it has ever been and that the outlook for the coming year was exceedingly bright.

During the past week there appeared in the Boston *Globe* a sketch of the town of Attleboro. The writer, a staff correspondent of the paper, was greatly impressed with the extent of the jewelry business of

Attleboro, and in his article gave a brief history of the inception of the jewelry business in this town. He compared the small amount of jewelry made then with the \$10,000,000 worth which the town now puts out each year.

The sub-committee of the Board of Trade presented to the directors of the Frank Mossberg Co., at a meeting last Friday evening, a substantial proposition, which they believe will be sufficient to induce the firm to remain in town. Hyde Park and Woonsocket capitalists are still laboring with the officers of the company to locate in their respective cities, but it is believed Attleboro will be successful in retaining this big enterprise.

Joseph Wilson, a well known former jeweler, died Wednesday at his home at Mansfield. Death was due to apoplexy. Mr. Wilson was born in England 44 years ago. When a boy he was employed at the Reed & Barton factory at Taunton for a number of years. Later he left the jewelry business to become treasurer of the R. H. White Co., Boston. The funeral was held Sunday at the Congregational Church and was under the auspices of the Masonic Lodge. At the time of his death the deceased was head of the Mansfield Board of Trade.

Association Notes.

The Kansas Retail Jewelers' Association was called to order at Topeka at 1 P.M. May 26, which was at the close of the convention of the Kansas Association of Opticians. The Examining Board of the opticians met in session at the same time the jewelers' meeting was called, which took away the majority of the jewelers, as it was necessary for them to attend to their registration examination. Owing to the fact that the attendance was so small a short session was held and the convention adjourned until next year.

The annual meeting of the North Carolina Retail Jewelers' Association will be held in Durham, June 15, and every effort is now being made by the president, R. C. Bernau, and the secretary, F. M. Jolly, with the aid of other officers, to make this one of the most successful gatherings in the history of the body. The jewelers of Durham have prepared to entertain the members of the association, and among the features of the entertainment will be a barbecue dinner. Secretary Jolly has sent out to every jeweler of the State a circular letter asking them to join the organization and participate in the coming convention. In the course of the circular he enumerates the advantages of membership, and tells what organization has done for the retail jeweler, particularly in establishing a fixed minimum selling price upon watches.

The Royal Silver Mfg. Co., Norfolk, Va., has purchased the plant formerly operated by Nettleton Bros., 65 Fayette St., that city, and will continue the electroplating business of that concern as well as carry a full line of silver, plated ware and cutlery. The officers of the company are: President, O. L. Gilbert; vice-president, S. L. McGonigal; secretary and treasurer, Frank E. Killam.

Boston.

F. O. Fuller is in Vermont on a long trip.

E. D. Cole has been in New Hampshire on an extended trip.

Edward Alden Bigelow has been in New York for several days on business.

Mr. and Mrs. Alanson Bigelow, Jr., returned, Thursday of last week, from a European trip.

W. B. Tilton has returned from New York State and is now in the western part of Massachusetts.

Robert Oakes is out again after having been laid up with an injury to his foot caused by stepping on a nail.

James S. Blake started, Tuesday of this week, for Louisville, Ky., where he will attend the Imperial Council of the Mystic Shrine.

Jewelers in town last week included E. W. Haven, Walpole; G. A. Schmidt and James Wain, Lawrence, Mass.; Frank Plumer, Dover; J. C. Leney, Manchester, N. H., and A. Beaudet, Woonsocket, R. I.

The New England Watchmakers' Club will hold its next regular meeting, Tuesday evening, June 8, at its club rooms on Bromfield St., when a representative of the Waltham Watch Co. will read a paper on "Jewels and Jeweling."

George Hopkins, for 30 years an employe of the Waltham Watch Co., and looked upon as one of the company's most expert watchmakers, is receiving congratulations upon his appointment to the position of assistant foreman of the finishing room.

The amount of bail in which John L. Nudd was held for the June grand jury of the United States Court on a charge of using the mails with a scheme to defraud was on Tuesday of last week increased from \$500 to \$1,500. Sureties were promptly furnished.

Albert Harrison, diamond dealer, Washington building, met with a painful accident Saturday, May 22, and from the effects of which he has been confined to his home on Allen St. Mr. Harrison was in Charlestown on business on the day in question, and was passing along the sidewalk when something on the slippery flagging caused him to fall. As he struck the sidewalk a rib of the umbrella which he carried penetrated his eyeball. While the injury is a serious one, Mr. Harrison is reported as improving, though it cannot now be determined how the injury will affect his eyesight.

The second trial of ex-Alderman George H. Battis, which ended Friday, and in which men of the jewelry trade have found much to interest them, has resulted in Battis being found guilty, on the two charges of larceny. At the first trial, last month, the jury disagreed. The accusation against Battis was that he obtained money from the city while he acted as chairman of the City Council committee on the July 4 celebration for the East Boston district in 1906 and 1907. He was alleged by the prosecution to have purchased a number of cups as prizes for the athletic contests at Wood Island Park, East Boston, from the Thomas Long Co. Charles E. Durgin, formerly associated with the Long firm, was a friend of the ex-alderman, and it is

alleged that it was to him that Battis went to make arrangements for the purchase of the cups. Mr. Durgin introduced Mr. Battis to Augustus H. Childs, who had charge of the department which dealt in prize cups. Further, it was alleged that in one case cups worth \$45 were provided and that the city paid \$81 for them, the bill having been raised at the request of the defendant. In the second case, according to the prosecution's claim, the cups sold by the Thomas Long Co. cost actually \$141.75, but that this bill was raised and the city treasurer paid \$440. Durgin and Childs testified that the bills were raised at the request of the defendant, and that he received in cash the balance between the correct value and the fictitious one. On the stand Battis denied that he had asked that the bills be raised.

North Attleboro.

F. S. Gilbert has returned from the west. S. Mandalian is able to be out after his recent illness.

William Maintien has returned from a 10-days' hunting trip in Maine.

Daniel Chisholm has returned from a western trip for the Bugbee & Niles Co.

The Mason Box Co. has finished a large building, which will be used as a storehouse.

Howard R. Grant has returned from a western trip in the interests of Riley & French.

Charles H. Clark is home from a western trip in the interests of the W. G. Clark Co.

Andrew Flagg has returned from the west, where he has been traveling for the A. L. Lindroth Co.

Charles Kettelty, western representative for the A. H. Bliss Co., was at the factory last week for a few days.

The T. I. Smith Co. is quite busy and was obliged to operate the factory overtime several nights last week.

Charles Peckham has returned from a western trip, where he has been in the interests of J. H. Peckham & Co.

Michael Leary has returned from New York, where he has been in the interests of the Rhode Island Novelty Co.

The greater number of the jewelry factories have commenced to give the employes the customary Saturday half-holiday during the summer months.

John P. Bonnett is still ill at the Emerson Hospital, where he recently underwent an operation. It is expected that he will be able to come home within a week.

The Hanlon-Thornton Co. has been granted an exemption of taxes for 10 years by the city council of Woonsocket, and will probably reorganize and move to that place in the near future.

James Brennan, a native of this town, but now a member of the firm of Brennan & Critchley, Providence, an electroplating concern, had his hand badly burned Thursday from a two-gallon can of naphtha. He was holding the can in his hands when it burst into flames from a spark from the dynamo.

John L. Fraim, Edmond, Okla., has gone to Coldwater, Okla.

Lancaster, Pa.

Fred J. Masker has gone to Chicago for a couple of weeks.

A. W. Moyer, of the Non-Retailing Co., was in New York, recently.

F. A. Huber and James B. Rounform of the H. S. Meiskey Co., left recently on extended trips.

J. Himmelreich, of the Manchester Co., paid his initial visit to Lancaster a few days ago.

F. L. Muth, Hummelstown, Pa., is giving out his stock, preparatory to retiring from business.

A number of Lancaster jewelers attended the annual retail jewelers' convention at Harrisburg, this week.

John J. and Charles M. Bowman and Ezra F. Bowman's Sons, visited Harrisburg, Pa., a few days ago.

N. W. Smith, with the S. B. Champlin recently paid his first visit to Lancaster in 20 years. He was with another firm the J. H. Wildasein, Hanover, Pa., has leased a new store building on Main St., his business requiring more commodious quarters.

In the Palace Duck Pin League tournament, recently ended, the team composed of Hamilton watch factory employes won second prize.

Leban H. Funk, Waynesboro, Pa., was employed by the Fred Frick Clock Co. has entered the local technical school as a student in watchmaking.

The Boyd Optical Co. recently gave a demonstration of the electrophone, an electrical instrument which assists deaf persons to hear. It is the invention of P. Stolz.

Walter Behmer, Eden, Pa., who left the watchmaking trade at the Ezra Bowman Technical School, intending to go in the West, died at his home, May 28, from lung trouble.

The town clock at Columbia, Pa., finally went on a strike, May 29. Starting at 6 A. M., it struck 258 times, and an hour later added 100 to this count. Fred K. hold finally corrected the trouble.

Edwin Keller, Allentown, Pa., was a recent visitor to Lancaster, coming here in automobile with C. M. W. Keck, president of the Allentown National Bank. Mr. Keller's store is one of the handsomest in central Pennsylvania.

A few nights ago, the burglar alarm summoned the police to the residence of Geo. Weber, of Louis Weber & Son. The place was surrounded and searched, and a new watch was found concealed in a closet. He proved to be the housemaid's best fellow, who had stayed overtime, and, becoming scared at the police, hid. When he was recognized he was released.

G. Wm. Reisner finished 14 sets of gold, silver and bronze medals for the Bix Intercollegiate Athletic meet, which was held at the Ohio State University, Columbus, O., May 28. He also prepared medals for record makers at that meet, as well as 14 sets of gold, silver and bronze medals for the Missouri Valley Intercollegiate Athletic Association meet at Ames, Iowa. All of the medals were of original designs.

Harry Russell & Son, Sibley, Ia., has been succeeded by T. G. White.

Traveling representatives in Los Angeles, Cal., recently included: L. Kantor, Kantor & Sheff, New York; M. Mayer, Mayer & Weinschenk; Shiman, Shiman Bros. & Co.; Sam Kirsky, Lazinsky.

Following traveling men were in Denver, recently: Lee Stanford, Alvin Mfg. Co.; Pette, Waterbury Clock Co.; Louis Freund, Ley Freund & Bro.; Mr. Dominick, H. F. Hias; All. Kolker, Juergens & Anderson Co. Among the traveling representatives calling on Toronto, Ont., trade, last week, were: A. Rogers Bros., Sheffield, Eng.; E. Morris, Wallace & Sons Mfg. Co.; George A. Crillas, manufacturer's agent; Irving Lederer, S. & Lederer Co.

Following traveling salesmen have been called on in the trade in Kansas City, Mo., during the week: E. J. Walther, B. F. Briggs Co.; Ran. Rogeis, C. H. Cook Co.; Alfred Clark, a Community, Ltd.; Mr. Bennett, Waite, & Co.; Joseph S. Frank, Sussfeld, Lorseh & W. A. Moore, William Dixon, Inc.

Following traveling representatives visited the trade in Lancaster, Pa., recently: H. C. Ber. Gorham Co.; Gordon W. Levy, Standard Jewelry Case Co.; L. A. Burt, R. Wallace & Sons Mfg. Co.; W. F. Pileher, Parker Pen Co.; Will. Lehmann, Ludwig Lehmann; Mr. Ward, French; Mr. Kopf, Powers & Mayer.

Following traveling representatives were in Cleveland, O., recently: George H. Kettley, A. L. Siss Co.; St. Elmo L. Coombs, Payne & Baker Mfg. Co.; R. H. Booth, Sturtevant & Whiting; Hoagland, F. T. Pearce & Co.; John Ruge. W. E. Richards Co.; Charles Jacot, Friedrich Jacot; A. Graham, L. Strashurger's Son & Co.

Traveling representatives in Boston, Mass., last week were: V. L. Burgessor, Kremenz & Co.; Derrick Lapham, Carter, Howe & Co.; H. E. White, Whiteside & Blank; Fred J. Foster, Traub Jewelry Co.; L. F. Clark, Corey, Clark & Noon; Lawrence Lawton, Jones & Woodland; George W. Larter & Sons; E. E. Allsopp, Wordley, Mop & Bliss Co.; N. B. Elytng, Jung & Co.

Traveling salesmen in Omaha, Nehr., calling on the trade, recently, were: H. B. Koopman, Newark Jewelry Co.; Mr. Child, Warren & Williams; J. Davison, Kohn & Co.; Mills Smith, R. Stanton & Co.; George A. Nelson, Abel Bros. Co.; John O. Slemmons, J. B. Bowden & Co.; Percy Stone, Shafer & Douglas; H. A. Adams, Jr. & Deitseh; Mr. Harlogensis, Weiss Mfg. Co.; J. K. Carlisle, Follmer, Clogg Co.; Louis Reid, Henry Freund & Bro.; Thomas E. Rogers, R. Bros.; Mr. Winter, Enos Richardson & Co.; John A. A. Lossau, Martin-Copeland Co.

Among the traveling representatives of jewelry stores in St. Louis, Mo., during the past week, were: William H. Hanaford, Tuttle & Stark; William M. Alger, North American Watch Co.; Mil. Heise, Langfeld Bros. & Co.; Mr. Somes, at & Bacon; Mills Smith, R. Blackinton & Co.; E. A. Reed, Reed & Barton; M. G. Cook, Mfg. Co.; F. R. Horton, Carter, Howe & Co.; Mark Perl, Wagner Com. Co.; W. R. Shute, at Clark & Co.; O. F. Samuelson, Towle Mfg. Co.; W. G. Grimes, Omega Watch Co.; R. M. W. W. Shafer & Douglas; T. Lindenberg, Lis. & Co.

Traveling salesmen who called on the Cincinnati, O., trade, during the past week, included: Allen, C. H. Allen & Co.; James Morrow, American Watch Case Co.; Julian G. Hall, Car. & Co.; C. Glander, J. D. Lalzell & Co.; J. Gregory, Strohell & Crane; William Roman, Joseph Levy & Co.; Mr. Laurino, Saunders, Meier & Co.; H. B. Bliss, B. M. Shanley, Jr., & George W. Beardsley, Allsopp & Allsopp; E. Reed, Reed & Barton; E. G. Adler, Ziruth. Co.; Mark Perl, Wagner Comh Mfg. Co.; R. Manheimer, Manheimer Bros.; Theo. Kuehl, & Co.; Mr. Cussin, Cussin & Co.; Truell, W. H. Saart Co.

Among the travelers who, recently, called on Buffalo, N. Y., jewelers, were: A. C. Templeton, Templeton, Barrette Co.; Mr. Rich, Derby Silver Co.; Herbert Levin, Art Metal Works; A. Bradshaw, Meriden Britannia Co.; W. H. McKenna, S. B. Champlin Co.; L. H. Smith, Bippart, Griscom & Osborn; Rudolph Schweiger, H. Z. & H. Oppenheimer; C. F. Surasy, Chaumenois & Co.; Charles F. Hartshorn, Ailing & Co.; A. D. Haring, Kent & Woodland; S. A. Lynch, William B. Kerr Co.; George W. Beardsley, Allsopp & Allsopp; Fred. J. Foster, Traub Jewelry Mfg. Co.; F. L. Avery, Louis Manheimer & Bros.; L. E. Smith, M. B. Bryant & Co.; A. B. Mensing, Wilcox & Evertsen; Mr. Hall, Irons & Russel Co.; W. R. Shute, Day, Clark & Co.; Mr. Lucas, Frank W. Smith Co.

Among the traveling representatives who, recently, called on the trade at Pittsburg, Pa., were the following: C. M. Davis, Depasse Mfg. Co.; John S. Cunningham, E. L. Spencer Co.; D. Skutch, New Haven Clock Co.; G. W. Bleecker, Martin-Copeland Co.; Walter Untermyer, Untermyer-Robbins Co.; G. P. Clap, Daggett & Clapp Co.; Walter Strauss, Jacob Strauss & Sons; Chas. Jacot, Friedrich Speidel; Lew Fleming, Joseph Fahys & Co.; George E. Heywood, Horton-Angell Co.; H. C. Berdan, Gorham Co.; George H. Roherts, White & Rounsville; James O. Otis, Harvey & Otis; Mr. Laurino, Saunders, Meurer & Co.; Joseph Keller, Keller Mfg. Co.; Mr. Crane, Mandeville, Carrow & Crane; H. B. Bliss, B. M. Shanley, Jr., & W. R. Shute, Day, Clark & Co.; Mr. Somes, Bates & Bacon; F. R. Truell, W. H. Saart Co.; Mr. Ford, Ford & Carpenter; Donald LeStage, H. D. Merritt Co.; W. G. Moland, Sansbury & Nellis; Frank S. Ottley, Riker Bros.; W. H. Gregory, Stroebell & Crane.

Connecticut.

The Seth Thomas Clock Co., Thomaston, Conn., is building an addition to its office on Elm St.

The Wm. L. Gilbert Clock Co., Winsted, Conn., lost a valued employe by the death of Miss Edith Woolley, which occurred May 24.

The final meeting of the creditors of Wm. L. Smith, Seymour, Conn., will be held in the office of Referee Newton, 818 Chapel St., New Haven, June 8, at 3 P. M.

Taylor & Gregory, Derby, Conn., have a show window display that is unique. It consists of a nest of live snakes, among which may be noticed a black snake, rattler and copperhead.

The new building that is now occupied by Simons & Co., New Haven, is one that calls for favorable comment. The interior is furnished in the Colonial style, lighted by Tungsten burners, and is a pleasant place to visit. The entire store is burglar-proof and fireproof, and has two immense safety vaults, one of which is for the use of customers.

A negro has recently swindled several jewelry stores in Norwich, Conn. His method was to ask to be shown rings, and after looking at several trays would present some excuse for not buying and go out. In several cases it was discovered that valuable rings had been taken and old and valueless ones left in their places.

The fourth annual banquet of the foremen and office employes of the Sessions Foundry Co., Bristol, Conn., was held at Elm Tree Inn., Farmington, May 22. Those present numbered 37, with William E. Sessions, president of the company, as the invited guest. The menu was elaborate and there was after dinner speaking.

The oldest jewelry establishment in New Haven is reputed to be that of Wells & Gunde, which was founded in 1812 by Nathaniel Olmstead in the present location, 788

Chapel St. He was succeeded by his son, George Olmstead, who finally gave way to George L. Streeter. In 1869 the style became Smith & Bartram. The firm of Smith & Wells succeeded to the business in 1871, and in 1878 Charles R. Wells and John Gunde came in under the present style. Mr. Gunde has been identified with the establishment since 1868.

A New Haven daily paper gives the business history of the firm of Samuel H. Kirby & Sons, Inc., which, according to the writer, was founded in 1830. In the early forties the style became John B. Kirby. John B. Kirby & Son was the style in 1860 upon the admission of Samuel H. Kirby. The firm was succeeded in 1878 by Samuel H. Kirby, and in 1898 the style name was changed to Samuel H. Kirby & Sons, under the law of Connecticut, with a capital of \$10,000. Of this company Samuel H. Kirby is president; John B. Kirby, treasurer, and Samuel A. Kirby, secretary, the two latter being the sons.

The New Haven *Palladium*, in its issue of May 25, contained a descriptive article on the New Haven Clock Co., as one of the leading industries of that city. It printed a large half-tone illustration of the works of the company, showing that it occupied 33 buildings, covering two square blocks, and pointed out that the company, which was started in 1817 as Jerome & Co., is one of the pioneers of the clock making industry of this country. The demand for the "Tattoo" alarm, which is one of the special products of the New Haven Clock Co., has been so great that a new brick building is now in course of erection to enable the company to increase its output of this popular alarm clock.

Baltimore.

John Kahn, 403 N. Eutaw St., is selling out his accumulated stock at auction.

Sol. Herzberg & Co. have moved from 126 N. Eutaw St. to 606 W. Baltimore St.

Martin Roos has given up his old location at 510 W. Baltimore St., and has moved directly opposite to 509. Mr. Roos had been at his old store ever since he started in business 14 years ago.

Enthusiasm for the widening of Lexington St. in the narrow block between Charles and Liberty was started anew last week when merchants were talking of taking some concerted action to bring the matter before the City Council. There are several jewelers and opticians in this block. It is the opinion of all that many benefits are to be derived from the widening.

C. Everett Evans, head of the Evans Stamping & Plating Co., Taunton, Mass., died, Wednesday of last week, at his home on Somerset Ave., Taunton, Mass., after an illness of less than a week, aged 50 years. He had been taken ill in Atlantic City and returned to his home, Friday, May 21. Alarming symptoms developed Tuesday. He was widely known as a business man, succeeding to head of the Evans concern on the death of his father, several years ago. He was an ardent devotee of yachting and automobiling. His widow, a daughter, Mrs. Ralph Hopkins, and a brother, Sheriff Edwin H. Evans, survive him.

GORHAM SILVER

NO SECOND BEST

¶ There are no "seconds" in Gorham Silver, for every piece bearing the Gorham mark, is finished with the same careful attention. Thus there is only one quality and that is "the best."

¶ The same artists who design the most elaborate and expensive center piece or trophy, bestow the same thoughtful consideration on the most trifling article for use or ornament.

¶ In other words, on every piece of Gorham Silver, without any exception, there is brought to bear the perfection of craftsmanship and the highest degree of constructional integrity.

¶ And yet, owing to the advantage of consummate organization, Gorham Silver costs no more than goods displaying neither fine taste nor honest workmanship.

June a Month of **J**UNE might truly be called the great convention month as far as the retail jewelers are concerned, over a dozen annual meetings and State conventions being already scheduled to take place before the 30th inst. Among these will be the meetings of several of the largest and most prominent State organizations, and altogether the month's work should give the greatest impetus to the organization movement that it has ever had.

The conventions of the month began to-day in Baltimore, Md., where the Maryland Retail Jewelers' Association and Railway Watch Inspectors' Association hold their session, the latter in the morning and the former in the evening, while to-morrow and Thursday the Pennsylvania retail jewelers expect to hold the greatest convention in its history at Harrisburg.

The greatest number of meetings are to occur after the middle of the month, the North Carolina jewelers meeting at Durham, on the 15th; the Arkansas association at Little Rock, on the 15th and 16th; South Dakota society at Aberdeen, the 17th and 18th, while the Missouri association will hold a most important gathering at St. Louis on the 21st and 22d. This will be followed on the 23d, 24th and 25th by the annual meeting of the Iowa association at Des Moines, and this will in turn be followed by the Ohio convention at Cedar Point, on the 28th and 29th. The Illinois society will meet on the 29th and 30th, at Peoria, and the Colorado association will meet on the same days. The Fox River Valley Jewelers' Association will also meet at Green Bay, Wis., on the last day of the month.

Altogether this is the greatest list of important conventions that has ever taken place in the jewelry trade in any one month.

An Important Decision as to Recovering Property.

THERE are few questions of more importance to the jewelry trade than those relating to the right of the merchant to recover property obtained from him by theft or fraud, where it has gone into the hands of an innocent third party, pledgee or mortgagee, either directly or indirectly from the guilty party. The legal questions which have arisen in cases of this kind have been many, but the principles enunciated in the decisions on them have been few, because in nearly every instance the suit brought, whether it arose out of a memorandum transaction (bailment), consignment or agency, has been decided on its own particular merits and without a general enunciation by the court of the legal principles involved which would act as a general guide to the business man.

In most of these cases we have generally a conflict of two rights, namely, that of an innocent or an alleged innocent party, whose protection from loss arose from no fault of his own, as against the general right of an owner to recover his property, no matter in whose hands it may be. Consequently these cases will always be considered of great importance to the mercantile world, and THE JEWELERS' CIRCULAR-

Advertising should not be regarded as an expense but as a business investment. Rightly done, it will produce good results.

WEEKLY has always given full prominence to them, and especially to the decisions. These, unfortunately, have varied in different courts in different States, and even courts of the same State have not always seemed to be exactly in accord with one another.

One of the latest suits of this kind to arise in the jewelry trade is reported in another column of this issue. This was brought by a wholesale jewelry house in New York against a pawnbroker of the same city to recover from him certain jewelry which the firm had entrusted to a salesman to sell in a specific territory, but which the salesman, through the third party, had pledged with the New York pawnbroker. The pawnbroker refused to return the goods unless the amount which he had advanced on them was paid to him by the owners. The owners then brought a replevin suit, and the action which was tried Wednesday and Thursday, last week, resulted in a verdict being directed by the Judge in favor of the jewelry house.

The pawnbroker in this case set up in defense what is known as the "Factor Act" of New York, which provides in effect that where a person entrusts property to another for the purposes of a sale, such person shall be deemed the true owner in so far as giving validity to a contract made by such agent with any other person for any money advanced upon the faith thereof. This contention has been often upheld in the courts of New York, and in an action brought some time ago against a pawnbroker the court said that an agent having all the indicia of ownership of property in his control could give title to an innocent pledgee.

On behalf of the jewelers, however, it was contended that in order that the pawnbroker could avail himself of the benefit of the Factor Act and acquire a valid lien upon the goods pledged he must show that the money was advanced to the agent who had been given possession of the goods in question by the owner, and upon the faith of such possession. In the case at issue the attorneys for the jeweler showed the goods had not been pledged by the salesman to whom they had been entrusted, but by another to whom the salesman had sent the goods, and that the third party held such property without the consent of the owner, and therefore the pawnbroker could not acquire any lien upon the property. They contended that any authority which had been given to the salesman by the firm to sell or dispose of goods in his possession could in no way be delegated by him to another, and therefore as far as this case was concerned the pawnbroker was not dealing with an agent or factor of

the owners of the goods, but with an stranger to the owners.

The judge in directing a verdict for the plaintiffs for the recovery of the articles agreed with the contention of the jewellers that the man who pledged the goods to the pawnbrokers was not in possession of them with the consent of the owner, and that the pawnbrokers were therefore not protected under the Factor Act in dealing with him.

This case will no doubt be appealed. If so, it is to be hoped that a ruling on the points in question will be had from the highest courts without unnecessary delay, as the principle involved is most important to the business world and to the jewelry trade in particular.

Where an Advertising Law Is Needed. **T**HERE are failures in trade that have received the advantage that has been accorded to that of Brown & Co., Chicago, by other firms in all parts of the country who have been nouncing at one time or another the sale of the "bankrupt stock" of this jewelry concern. In fact, if newspaper advertisements of various houses are to be believed there must have been as many bank stocks of the Brown house as there are "Washington headquarters" situated in various parts of the United States, and this despite the fact that Jos. Brown & Co., settled with their creditors, and resumed business in Chicago.

One of the latest instances of this is the recent advertisement of a department store in Omaha, Nebr., which took a full page of the Omaha Evening Bulletin in which the store announced in black ink that it had bought the \$40,000 bankrupt stock of cut glass, etc., of the Brown concern from the American Trust & Savings Bank, Chicago, at 50 cents on the dollar and proceeded to enumerate, illustrate and describe in detail the various articles, such as watches, gem set jewelry and novelties which it had purchased.

Strange to relate, however, the head of the bankrupt department of the American Trust & Savings Bank, from which said stock was purchased, told a correspondent of THE JEWELERS' CIRCULAR WEEKLY that the receiver had not sold a dollar's worth of stock to anybody, and had turned this back to the Jos. Brown & Co. when this concern obtained its settlement with its creditors. What is the answer?

Referring to the subject of American commercial travelers in Japan, Consul H. Snodgrass, of Kobe, writes that on his arrival at this post, nearly seven months ago, a number of American traveling men have passed through Kobe, but no one has ever appeared at this consulate. The Mail has been directed to them through this office, but they chose to send messages from the hotels for their letters rather than to call themselves. These facts stated not in a critical spirit, but as a warning, to indicate that if manufacturers and exporters have requested their salesmen in Japan to call upon the consuls for advice at the various junctions have not been carried out.

New York Notes.

Lollendorff, 54 Maiden Lane, is at present in Europe.
 Charles H. Brink, a Denver, Colo., jeweler is visiting friends in this city.
 M. J. Averbeck is expected in this city this week. He sailed from Europe, Saturday.
 Edward Holtefeld is now representing Messrs. W. Wheeler & Co. in the middle West.
 Sidney Lee, of T. H. Lee & Son Co., Toronto, Ont., sailed from this port recently for Germany.
 Joseph E. Kahn has moved from 155 E. 14th St., this city, to 2808 Jamaica Ave., Wood Hill.
 Thomas H. Bright, Providence, R. I., is in charge of the Cohannet Silver Co.'s office on Park Place.
 William B. Peckham, of J. H. Peckham Co., is spending a few days with his relatives at North Attleboro.
 Joseph Lachmann, who has been in business for years on Avenue A, in this city, will leave for 1838 Madison Ave.
 Robert Howard, of Mason & Howard, North Attleboro, returned, Thursday, from a business trip through the west.
 Messrs. Bogle Bros., wholesale jewelers, White River Junction, Vt., were among the out of town visitors last week.
 George Booth, in charge of Sturtevant & Co.'s local office, 7 Maiden Lane, is starting a trip through the middle States.
 The S. C. Cracker Pen Co., formerly of 7 Nassau St., New York, has moved its offices to 805 Lexington Ave., Brooklyn.
 The directors of the International Silver Co. have declared the regular quarterly dividend of 1 1/4 per cent. on the preferred stock.
 Joseph Schrebrick, 1051 St. Aubin Ave., Detroit, Mich., was in this city, last week, to inspect goods for his store at 1534 Michigan Ave., Detroit.
 George A. Whiting, of Sturtevant & Co., was in this city for a short time, last week, but was obliged to return to his home in North Attleboro because of illness.
 Frank D. Waterman, president of the L. Waterman Co., accompanied by the Rev. J. E. Sloan of St. Andrew, Scotland, will leave this week for a trip to the Pacific coast.
 Charles Eggens, credit man of the Aikin, Smith & Co., pen manufacturers, is now on a three-weeks' trip in Canada. J. C. Eggers of the same concern, was a recent visitor in Atlantic City.
 Edward Kornfeld, dealer in optical goods, 110 E. 23d St., filed schedules in bankruptcy, last Thursday, in the United States District Court, showing liabilities of \$19,000 and nominal assets of \$6,500, consisting of 65 shares in the Toric Optical Co.
 Messrs. G. W. G. & Mayer, 258 Fifth Ave., have a remarkable collection of magnificent pieces of jewelry for their coming exhibition, which will be held in August.
 The exhibition is an annual occurrence of great concern and is looked forward to with interest by jewelers throughout the country.
 Arrangements for the athletic events

which will be held at the annual outing of the Maiden Lane Outing Club Saturday include three-legged race, throwing the base ball, running race, potato race, running broad jump and tug-of-war. Suitable prizes will be awarded for the winner of each contest.
 A. L. Erlanger, of Klaw & Erlanger, was recently presented by Frederic Thompson, of Luna Park, with an annual pass enclosed in a 14-karat case, on the cover of which is shown in raised work an elephant made of 18-karat gold. The blanket is jeweled with rubies, emeralds and diamonds. The entire case weighs 106 pennyweights and was furnished by C. L. Trout & Co., who also furnished the gold key which is used to unlock Luna Park.
 Ludwig Nissen, of Ludwig Nissen & Co., who acted as toastmaster at the recent banquet of the National Association of Manufacturers, which was held at the Waldorf-Astoria, May 19, was the recipient of a fine gavel, presented to him by members of the association. Mr. Nissen delivered a most interesting and enjoyable address, during which he presented the retiring president of the association with a check for \$10,000, a ruby stick pin and a plaque, in token of the high esteem and honor in which he is held.
 David Shiman, of Shiman Bros. & Co., was the winner in one of the most exciting bowling contests ever held in this city, when during the opening of the big tournament which began at Madison Square Garden last week he won a match game from David Woodbury, Chicago, by a single pin. It was one of the most exciting matches ever recorded. They rolled the best six out of 11 games for \$1,000 a side and the match went the limit. When Mr. Shiman ran into a split in the 10th frame of the decisive game it looked as if he would be beaten, but he wound up with a strike and won by a single pin. Mr. Shiman was pitted against a professional bowler, and his remarkable record speaks for itself. His high score was 215 and he rolled an average of 191.5 and made a total score of 2,106. He is certainly to be congratulated on his fine showing the more when it is taken into consideration that he bowls only as a pastime and was pitted against a man who makes it a business.
 Otto Goldsmith, a jeweler of 1284 Broadway, was complainant in the night court last week against Herman Erde, 222 Livonia Ave., Brooklyn. Mr. Goldsmith said that Erde had been following him about for several months wherever he went. On the night when he made the complaint Mr. Goldsmith said that he went to Terrace Garden and Erde was at his heels. Leaving the Garden he declared that he called a taxicab and was followed by the man in another. At last he could stand it no longer, and at Park Ave. and 58th St. he called Policeman Miller of the E. 51st St. Station and had Erde arrested on a charge of disorderly conduct. When asked to explain, Erde told the magistrate that he was being paid \$5 a day to follow the jeweler. He said he did not know the object of it, but he was being paid to make note of every place the jeweler went. The jeweler said that he did not care to prosecute if the young man would cease his activities,

which he agreed to do and was discharged.
 R. A. Breidenbach, 51 Maiden Lane, reports that a man called at his office last week, representing that he came from Bunnell's Commercial Rating Bureau and Collecting Agency, Peoria, Ill. The man told Mr. Breidenbach that he understood he held a judgment against Joel K. Van Slockem and said that he could collect it for him. He explained that Van Slockem had been left an inheritance of \$12,000, which the concern he represented had attached, and that for 10 per cent. commission Mr. Breidenbach's indebtedness against Van Slockem would be collected. He claimed that he was able to collect old judgments and finished his introductory remarks by demanding a recording fee of \$3.90. Mr. Breidenbach at once became suspicious and turned the man away. He then wrote to the concern which the man claimed to represent in Peoria, Ill., and received from them an immediate reply to the effect that his caller was an imposter and should be turned over to the police. The letter was signed by the manager of the Peoria Retail Credit Men's Association, who is also manager of the association which the man claimed he represented. Mr. Breidenbach described his visitor as being about 38 years of age, of thin build, with gray eyes, five feet six inches tall and weighing about 145 pounds. When last seen he wore a blue serge suit and derby hat. Other jewelers throughout the country are warned to be careful in their transactions with this man.
 A meeting of the creditors of B. Braunstein, Hoboken, N. J., was held at the offices of his attorney, Bennett Seigelstein, 99 Nassau St., last Wednesday, and was attended by about 20 creditors. At the meeting the debtor's liabilities were stated to be about \$16,000 and the assets, consisting of stock, fixtures and accounts, to be valued at about \$8,000, \$5,000 of which, it was stated, was in stock. An offer was made of 40 per cent. in settlement of all claims, payable 20 per cent. cash and 20 per cent. in two notes, endorsed by a brother of the jeweler. The debtor was examined at some length and claimed to have paid out to creditors about \$28,000 between Dec. 8, 1908, and May 4, 1909, approximately, \$18,000 of this being paid since Jan. 1. His attention was called to the fact that he had a stock of between \$25,000 and \$30,000 on Jan. 1. He stated that he sold about \$5,000 worth of it since that time and had bought about \$3,600 additional stock, making a total of \$28,600. It was argued that he should have \$23,600 worth on hand instead of \$5,000 worth, as stated. No satisfactory explanation of this discrepancy was brought out. The jeweler admitted transferring an equity in certain property in Hoboken to his mother-in-law to the value of about \$9,000, and claimed the consideration was for money loaned to him by his mother-in-law. He stated that he kept no book of accounts and that all the books that he had were a check and bank book. He explained that he kept track of what he owed by filing the various statements which he received from his creditors, and that he kept no stock book and did not know just how

stock he had on hand at any time. Meeting was adjourned without any action having been taken.

Howard, who is connected with the Richards Co., Attleboro, is in town, week.

Rankin, Roanoke, Va., is convalescing after an operation which he underwent in private hospital in this city.

Price Brower, 12 John St., accompanied by his wife, sailed, yesterday, on the *Wilhelm II*. They will be away four weeks.

Art J. Sequeira, who is employed by Heim Bros. & Veith, 65 Nassau St., returned from abroad after a five month visit to Europe.

L. & M. Friedlander, 30 Maiden Lane, are thoroughly renovating their shop, and have put an entirely new second floor in the store.

Ray E. Oppenheimer and Julius Rannert of the firm of Henry E. Oppenheimer, 11 Maiden Lane, sailed for Europe today on the *Vaderland*.

Art Ginzberg, well known through the western and Atlantic States, expects to sail on the *Amerika* from Hamburg, Germany, to-morrow, for this city.

Hirschberg, representing R. W. Levy, 580 Broadway, sailed, recently, for Europe on his second trip this year. He looks for late novelties in jewelry and his fancy goods.

Book of poems that has been very highly received by the reviewers, entitled "The Joy of Life," is by Mrs. Theodora Garrison, the daughter of Si Pickens, with H. F. & H. Oppenheimer.

Frank H. Larter, of Larter & Sons, 115 Maiden Lane, sailed, Wednesday of last week on the *Adriatic*, accompanied by his wife, Warren R. Larter. They will be away about three months.

Isidor Dreiblatt, of Stern, Dreiblatt & Co., importers and cutters of diamonds, 45 Nassau St., sailed, Saturday, for Europe on the *Walden*. He will be away about six weeks and will purchase goods in Antwerp.

Meeting of the creditors of Oscar Wolf, formerly in business on Third Ave., held a voluntary petition in bankruptcy some time ago, after his store had been closed was held before Referee Seaman, at the Court, 2 Rector St., Friday afternoon. Testimony was taken. The meeting adjourned without date.

Art Borgzinner & Co., manufacturers of jewelry and silverware cases, 66 Nassau St., have added considerable floor space to their present quarters by leasing the premises situated on the second floor, and the Standard Pipe Co. on the third floor. The additional space required for the handling of business is

Frank F. McKay, said to be a former resident of Washington, who is accused by the Washington police of embezzling \$2,500, was arrested in this city, Tuesday night of last week. He was accompanied to Washington, D. C., by Detective Patrick O'Brien, and is held there for this city, following the

receipt of a telegram notifying him of McKay's arrest. O'Brien has been searching for McKay since May 4 last, when a warrant was issued for his arrest.

A sale of the assets of the Lenox Watch Case Co., bankrupts, will be sold under the direction of Henry C. Kipp, trustee, at public auction, June 10, at 113 Leonard St. The property consists of machinery and tools used for the manufacture of watch cases, together with all equipment in connection therewith. The trustee reserves the right to withdraw any of the property from the sale if it does not bring at least 75 per cent. of the appraised value.

The 22d annual exhibit of the students of Pratt Institute will be held in the rooms of each of the six schools on Thursday afternoon and evening, Friday morning, afternoon and evening and Saturday afternoon of this week. The course given at Pratt include thorough instruction in the designing of jewelry, hammered metal work, chasing and enameling. The exhibit, which is of interest to the manufacturing jewelers, will be on display on the fourth floor of the main building and is well worthy of attention.

A letter was received last week by the Jewelers Security Alliance from S. J. Lyons, 2258 N. Front St., Philadelphia, stating that he had just been robbed of diamond jewelry valued at \$700 by a watchmaker who had been in his employ only a week. According to the jeweler goods were taken out of the safe during his absence from the store. The man is described as being about six feet tall, with broad shoulders. He claimed to have worked in San Francisco, New York and other places. While in the jeweler's employ he wore a brown suit of clothes.

The members of the New York Wholesale Jewelers' Association are planning to entertain the out of town members of the National Association of Wholesale Jewelers during the convention, which will be held in this city during the second week of this month, by giving them a trip by water to Coney Island, June 11, where a shore dinner will be served and all the privileges of Luna Park opened to them. The afternoon and evening will be spent in a round of enjoyment, and it is expected that the visiting jewelers will have the time of their lives. A meeting of the executive committee will be held June 8, and the regular convention will open the next morning in the Silversmiths' building, 15 Maiden Lane.

Upon the charge of having stolen a handbag, valued at \$5, from the jewelry department of a large Sixth Ave. store, a young woman, who gave her name as Helen E. Harris, was arraigned in the Night Court last week. The store detective said that the young woman had been frequently seen in the store for several days, and that she had in some way gotten possession of a number of blank sales slips and pieces of the wrapping paper of the store. She had operated, he said, by wrapping up small articles in the wrapping paper and then returning to the store with the sales slips, saying that the goods did not suit her. In this way, according to the detective, she obtained the price of article. The magistrate held her in \$300 bail.

Burglars, who are believed by the police

to belong to a gang that has been operating extensively along the block on 42d St., between Fifth and Sixth Aves., in the last few months, broke into the art store of L. Goodrich Smith, at 25 W. 42d St., early Monday morning, cracking a valuable plate glass window and rifling the show case of expensive fountain pens valued at \$100. Through this robbery it came out that several other firms—seven of them in this one block—had been robbed in a similar manner within a few months. Another of the heavier losers was Mathieu's jewelry store, at 1 W. 42d St. Here a large circular hole was cut in the front show window. Through it several trays of pins and watch chains that had been left hanging in the window were removed. The articles were valued at \$200.

The Board of United States General Appraisers has sustained a claim filed by Mogi, Momonoi & Co., of this city, regarding the classification of swords with metal blades and bone scabbards; baskets and boxes made of wood shavings; pocket-books made of cotton and leather, and bags and purses composed of silk and metal. In each case the customs authorities had assessed the goods at rates higher than those claimed by the importing firm. General Appraiser McClelland, in his decision for the Board, reduces all of the assessments to the level contended for by the importers. It is held that the swords are dutiable at 30 per cent. under the provisions in the tariff for manufactures in chief value of bone, while the baskets are allowed by the Board's decision to pay duty at the rate of 30 per cent., also under paragraph 449. The duty on the bags and purses is reduced to 45 per cent., the rate applicable to manufactures of metal.

The custom officials at the Appraiser's Stores on Friday uncovered from under the false bottom of a trunk a stock of costly goods, including Italian jewelry, said to be worth about \$3,000. The trunk was brought into this country by the wife of a man said to be a steamship owner in Boston. She arrived on the North German Lloyd liner *Kaiser Wilhelm der Grosse*, from Bremen. The custom officials say that they also found receipted bills, showing that European dealers had entered fictitious amounts for American purchasers, so that importations can be undervalued when appraised here. The custom men are particularly interested in a bill, showing that an \$18,000 necklace was purchased in Italy. They found in the trunk two receipted bills, one calling for an imitation pearl necklace, valued at \$300, and one for a real pearl necklace, valued at \$18,000. The woman's husband visited Deputy Surveyor George Smith at the Custom House in the afternoon and offered to settle for the amount required by the Government in such cases, but the offer was rejected. He brought with him the \$300 necklace, for which he knew the customs men were searching, but explained in regard to the \$18,000 necklace, that while it had been purchased in Nice, it was not brought into this country, but was in storage at Toronto, Canada, where he desired to keep it until the tariff on pearls is settled, as it may enable him to import it later for 10 per cent. instead of 60 per cent., the duty now required.

THE PENNSYLVANIA WATCH CASES

Trade **XXX** Mark

A NEW ONE AND A GOOD ONE!

We would suggest that you look into the merits of our cases. A case of the highest value coming to you at the lowest prices consistent with quality and quantity. A heavy, strong, stiff case of good value.

IT IS A WINNER!

It will mean increased business to the Dealer who carries a line of these cases in his stock. Our line will be sold exclusively through the Dealer and Jobber. In offering our goods for sale, you will not be up against the competition of Mail Order and Catalogue Houses.

Drop us a line for description and prices. You will find both interesting.

THE PENNSYLVANIA WATCH CASE COMPANY, Factory: York, Pa. NEW YORK 14 65 NASSAU ST.

5 YEARS' EXPERIENCE GAINED IN 1

The young or middle-aged man who desires to learn Engraving, to grasp the finer points of Watchmaking and Optics, finds it necessary to spend at least five years in a store before he has attained a thorough knowledge of the business. In less than a year's time this complete knowledge can be gained at our college. We get telegrams and letters every day, offering positions to our graduates, which shows what practical storekeepers think of our course. Send for Prospectus NOW. A position awaits you. Somerset and Broad Sts. F. W. SCHULER, Principal The Philadelphia College of Horology, PHILADELPHIA, PA.

Learn Watchmaking

Refined, profitable labor. Competent in demand. We teach it thoroughly in months as it formerly took years. In with tedious apprenticeship. Money earned studying. Positions secured. Easy terms for catalogue. Address

St. Louis Watchmaking School, St. Louis, Mo.

Newark.

Lux Meyer, western man for Scofield & DeVyngaert, is in town this week.

Ins Brassler, of the Brassler Co., is receiving congratulations on the arrival of a daughter, born May 25.

Mrs. Mary Ann Wharton, aged 82, the mother of Mrs. C. C. Champenois, wife of a manufacturing jeweler, died, last week, at her Broad St. home.

Erman C. Schwartz has associated himself with the Charles C. Wientge Co., manufacturers of gold jewelry, 32 Marshall St., and will represent this concern on the road. Fred Crane, of Mandeville, Carrow & Co., is contemplating his usual European pleasure tour, which he will start this month in the middle of June.

Ed Klme, a carpenter, was injured, last week, by falling from a wooden horse which was being used at the new jewelry store under erection on Chestnut St.

Joseph Wighard, who succeeded F. Misner as retail jeweler at 105 Bergenline St., Weehawken, was formerly for 15 years in the employ of Meiners & Schuette, 148 1/2 Eighth Ave., New York.

Gtavus Sickles, of the Eastwood-Park Co., left, May 29, on a business trip that will carry him to the Pacific Coast and back. He expects to stop in all the larger cities en route, showing the lines of the Eastwood-Park Co. and Henry Ziruth. Mr. Ziruth's sales will be on the road for about six weeks.

O. Fessler & Co. are preparing to move from the Schlosstein building into other quarters. Their space on the first floor will be occupied by the firm of Whiteside & Bok, who are on the second floor. This space has been pressed for room for some time and will continue to occupy its present quarters also.

The Trenton Retail Jewelers' Club was incorporated last week for the furtherance and protection of the business interests of jewelers in that city. The trustees are: Joseph Pfleger, John Harris, George E. Thomas, Thomas Traft and Bernard Cohen. Traft is agent. The offices of the club are at 147 E. State St.

Matthias Stratton, of Alling & Co., and well known to the trade, was bereaved Wednesday by the death of his six-year-old son, Matthias Stratton, Jr., who succumbed to scarlet fever. He was the only child of Mr. and Mrs. Stratton. The funeral, which was private, was held on Friday from the home of his parents, 63 Duane St.

Edward Kohn, of Kohn & Co., Campfield and Orchard Sts., is back from a delightful tour to Europe. He visited the Continent and spent an instructive and pleasant vacation. Another European traveler, who is home, after a successful business tour, is J. E. Braunsdorf, of the jewelry supply department of the American Jewelry Supply Co. Mr. Braunsdorf was absent several weeks.

Thomas F. Cronley, until recently a salesman for a big New York jewelry store, died, suddenly, last week, from a fatal blood vessel, indirectly caused by indigestion. Mr. Cronley had been a resident of Newark for 50 years. He was a member of the C. B. L. and is sur-

vived by a widow, a son and daughter. The funeral was held on Wednesday morning from St. Patrick's Cathedral and interment was in the Cemetery of the Holy Sepulchre.

A very pretty wedding was solemnized, Thursday afternoon, May 20, at South River, N. J., when Miss Anna Thompson became the wife of Harry Emley, a retail jeweler of that place. The ceremony was performed at the home of the bride's parents by Rev. Frederick Overhiser, pastor of the Baptist Church, in the presence of a number of friends and relatives. A reception and supper followed the nuptials, after which Mr. and Mrs. Emley left for Asbury Park, on their honeymoon.

In the article which appeared in the issue of May 19, telling of a remarkable feat in engraving performed at Newark, whereby 750 letters had been legibly engraved on a disc 15 mm. in diameter, the article was so worded as to leave the inference that the engraver, John Rose, was an employe of the Chas. C. Wientge Co., who had the order for this work. Mr. Rose is an engraver employed by Riker Bros. and was engaged by the Charles C. Wientge Co. to do the work, but he is not an employe of that house.

News Gleanings.

Henry I. Moyer, son of Wm. H. Moyer, Mahanoy, Pa., was recently married at Pittsburg.

The bankrupt stock of Joe Winter, Little Rock, Ark., was recently purchased by I. Lowenbarg.

The business of the T. K. Smith Jewelry House, Oskaloosa, Ia., is about to be incorporated on a co-operative plan.

B. Yehley, Delaware, O., recently renovated and improved his store by the installation of new fixtures and wall cases.

C. H. McRae, Granville, N. Y., has announced that he is going out of business and has begun the sale of his stock at auction, which continues daily from 2.30 to 7.30 p. m.

Roy G. Leonard, a jeweler at Cincinnati, N. Y., with his wife and some friends, was recently injured in an automobile accident, which occurred near Greene, N. Y., May 23.

Louis Gendron, a watchman employed at Haverhill, Mass., was crushed to death by a freight elevator which descended on him in that city May 25.

A fire which occurred at Lufkin, Tex., May 20, caused some loss to the jewelry repair shop of J. E. Edwards. The damage was caused principally by water. It is covered by insurance.

Dunlap & Spiece, Bucyrus, O., are now comfortably settled in their new quarters in the new Meyer building on N. Sandusky Ave., to which they recently moved their jewelry business from the Deal House block.

A. G. Schultz, president of A. G. Schultz & Co., Baltimore, Md., sailed, May 10, on the steamer *Rhein* for Bremen. He will visit Germany and spend some time in Sweden and Norway. Mr. Schultz will be away about three months.

Oscar Watson, jeweler of Kalkaska,

Mich., has sold out his stock and fixtures to Pangborn & Weyant. Mr. Watson has been in the jewelry business for the past 55 years, 27 years of which he has been located in Kalkaska.

A slight fire which started in the store of Mrs. Courtright, on Front St., Port Jervis, N. Y., recently, was extinguished by a local fire chief who had been notified by people who saw the smoke. The trouble was in the chimney and no damage was done.

Henry Haas, a pioneer of Salem, Ore., and who is well known as a jeweler and musician, recently underwent an operation, and at last accounts his condition was favorable. Mr. Haas is 67 years old, and for many years has been the chief engineer of the Salem fire department.

The partnership which existed between J. H. Dimon and D. S. Dimon in the jewelry business at Candor, N. Y., was recently dissolved. D. S. Dimon will conduct the jewelry store in Candor in future, and J. H. Dimon the store at Athens, N. Y., which he has owned for some years.

Bichsel Bros., Sedalia, Mo., recently exhibited in their show window a large solid silver loving cup donated to the Central Missouri Fox and Wolf Hunting Association, which was competed for last week. The trophy is 18 inches high and gold-lined.

Miss Maude Ronca, a violinist of Woburn, Mass., has brought suit for \$10,000 against Nathan Mendlow, Lynn, Mass., alleging he did not return certain diamonds which he had given her, and which she had later turned over to him. Mr. Mendlow denies that he ever gave the diamonds to the complainant.

According to Joseph Hyde Pratt, State Geologist of North Carolina, there was no production of zircon in that State during 1908. No shipments of zircon were made from the deposit in the Wichita Mountains, Okla., during that year either. Therefore, there is no production of this mineral recorded by the United States Geological Survey in the year 1908.

Joseph Mazer, McAlester, Okla., is arranging to enlarge and improve his already handsome store in that city in order to increase the amount of stock which he can handle and add a number of new lines. Mr. Mazer's store, which is now 43 feet deep, will be augmented by an addition of another 40 feet in the rear, and back of that he will add a factory of 21 feet. In the new addition there will be a gallery and under this he will install a beautiful cut glass room. In the gallery will be installed his private office.

Charles M. Banks, 413 Market St., Wilmington, Del., has purchased an interest in the Samuel Baynard Co., at 5th and Market Sts. When the latter company is organized it will be known as the Baynard, Banks & Byron Co., the other member being Wm. G. Byron, who has been associated with Mr. Baynard for a number of years. The change will go into effect July 1, and in the meantime Mr. Banks will dispose of his stock and his present store. Mr. Baynard will in future devote considerable of his time to his real estate interests and Mr. Banks and Mr. Byron will take active charge of the new jewelry business.

TO THE TRADE

We, the undersigned Jobbers and Manufacturers of Cincinnati, agree to close our offices and factories on **Saturdays at one o'clock**, during the months of **June, July and August**.

Please note that all orders from our out-of-town or city customers received up to **twelve o'clock noon each Saturday** will be filled and shipped that day.

Chicago Notes.

D. Peacock is on a trip to Europe.
F. Hirsch is back from a western trip.
L. Lake has returned from a western trip.
F. Barger visited Indianapolis, last week.
E. King is on a trip to the Pacific coast.
H. Miller is on a trip through the west.
G. Schram has returned from a trip to the Pacific Coast.
W. Hahn has returned from a trip to Mt. Clemens.
J. Lieberman is back from a special western diamond trip.
C. Ostby, Jr., of the Ostby & Barton Co. was in this city, last week.
M. Chadbourne is back from the factory of the James E. Blake Co.
Praeger, with F. W. H. Schmidt, was in for a few days, last week.
Miss May M. Thein, bookkeeper for I. Schwartz, is on a visit to New York.
R. Fisher recently won a \$750 Buick automobile for a one-dollar raffle ticket.
A. Allen, of the Allen, Lonergan Co., at Woboro, Mass., is sick at his home here.
W. Douglass, with the Dueber-Hampden companies, was here, last week, on his way west.
News is received here that W. D. Spender Belle Fouche, S. Dak., has sold out to J. Bradshaw.
Joseph C. Wilson has retired from the traveling force of the Chicago office of V. A. Rogers, Ltd.
B. Noyes, general manager of the Indiana Community, Ltd., was here, last week, on his way west.
J. T. Brayton, last week, visited Gladwin, Mich., where his new lens measuring machine is being manufactured.
M. Herrington, a new jobber at Forttown, S. Dak., was here, last week, during his opening stock.
C. Emerson and M. H. Cohen, with J. Hess & Madsen, came in, last week, to their respective territories.
A. F. Hayes, with the Webb C. Ball Watch Co., is on a six weeks' tour of inspection to the far west and Mexico.
News is received here that the family of J. Seeley, Stuart, Ia., was recently increased by the addition of a baby boy.
I. Roth, secretary and general manager of the Western Clock Mfg. Co., visited the

Chicago offices of that corporation, last week.

H. M. Tenney and J. C. Duff, of the traveling force of Lapp & Flershem, returned from their respective territories, last week.

News is received here that A. E. Waldron, Odebolt, Ia., has sold out to Roy G. Pierce. Mr. Waldron will locate in California.

Harry Keller, with Flower & Co., has returned from a flying trip to New York with some up-to-date ideas in window dressing.

J. A. Light, formerly of B. F. Simpson & Co., Minneapolis, and now in business under his own name in that city, was here, last week.

Morris Mendelson and H. Conviser are no longer connected with Meyer Joseph & Co. Ed. Sager is now city salesman for this concern.

The Jewelry and Art Shop has been incorporated with a capital of \$4,000. The incorporators are Leonard Udem, George H. Strange and L. G. Randle.

Wm. D. Dreyer, of Jones & Dreyer, has sold his stock in that corporation to Fred Jones. The business will be continued by the latter under the old name.

"Gus" Weinfeld, with the Stein & Ellbogen Co., is taking a pleasure trip which will include a visit to the Grand Canyon of Arizona, the Seattle exposition and Alaska.

S. Davis, 602 S. Adams St., Peoria, Ill., who has disappeared, owed a few bills here. He was in business in Peoria less than a month, and had a bank account there for one week.

A meeting of the Chicago branch of the National Wholesale Jewelers' Association was held, last Thursday, at which routine business was discussed, together with the subject of the next meeting, which will be held in New York on June 9.

S. T. A. Loftis recently returned from his St. Louis office. While in the latter city one of the Loftis salesmen lost a wallet containing \$800 worth of jewelry. This was found and returned by W. D. Powell, of the Clover Leaf Railroad. Mr. Loftis presented a \$100 diamond ring to Mr. Powell as a reward.

Emil Despres, of Despres, Bridges & Noel, will represent the jewelry branch of the Chicago Association of Commerce on a delegation of trade excursionists which left here, last Sunday night on a trip to

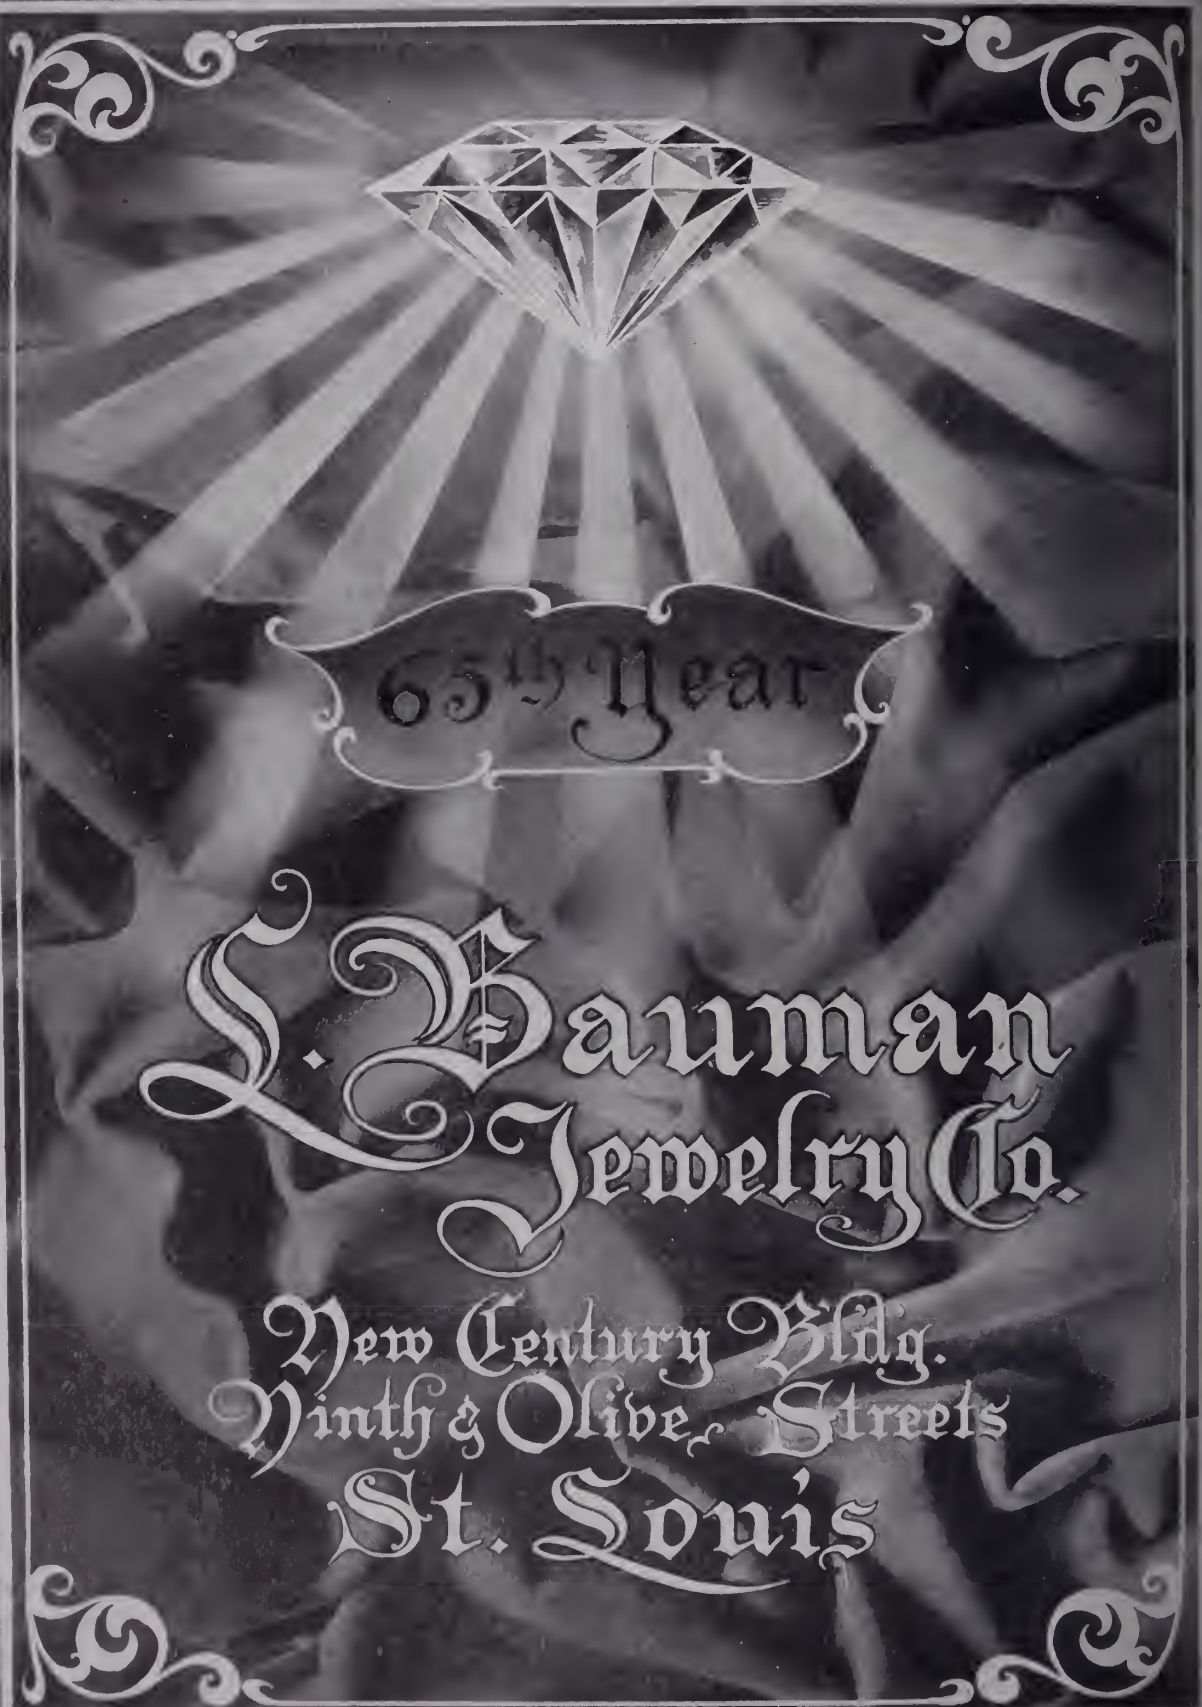

the northwest and coast. The delegation travel on a special train, and will visit 39 cities in 18 days. June 5 to 7 will be spent at the Alaska Exposition at Seattle.

The C. H. Knights-Thearle Co. is sending an announcement to the trade, saying that, as the house wishes to co-operate with the retail jewelers in their efforts to improve conditions, on and after July 1 no goods will be shown in its establishment to a consumer unless accompanied in person by a retail jeweler or upon presentation of a written order signed by a retail jeweler, to whose account the goods must be charged.

Among the buyers in town, last week, were: Mr. Wolf, of D. Marx's Sons, St. Paul, Minn.; Mr. Zerweck, East St. Louis, Ill.; Geo. Mayr, South Bend, Ind.; Mr. Rystrom, Elgin, Ill.; Perry Jackson, Rockford, Ill.; E. Schredber, Wagner, S. Dak.; Harry Hanson, Princeton, Ill.; Jay B. Johnson, Goodland, Ind.; R. M. Gable, Lost Nation, Ia.; F. A. Copeland, Elgin, Ill.; B. E. Buckner, with the Rice-Stix D. G. Co., St. Louis, Mo.

A meeting attended by the officers of the Illinois Retail Jewelers' Association and those of the National Wholesale Jewelers' Association took place, last Wednesday, at the rooms of the Chicago Jewelers' Association in the Columbus Memorial building. The retailers present were: F. A. Marean, Belvidere; Lorenz Holland, Cullom; Geo. Elbe, Paul Lackritz, W. G. Werner and Geo. H. Tucker. The wholesalers present were: A. W. Sproehnle, Claude Seymour, B. C. Allen, S. Glickauf, C. H. Knights, A. C. Becken and Maximilian Ellbogen. The topic of retailing by jobbers was discussed, and the majority of the wholesalers present convinced the retailers that they did no retailing whatsoever, and had always looked upon it with disfavor. The meeting was productive of much good and a general air of good feeling prevailed. At its close the retail jewelers promised to use their influence with members of the Illinois Retail Jewelers' Association toward getting the latter to give Chicago jobbers a larger share of their trade than formerly.

Hollander & Fleishman, Scranton, Pa., last week admitted into the firm A. Newman, and the firm hereafter will be known as Hollander, Fleishman & Co. The business was formerly conducted as the Bee Hive Jewelry Co.

65th Year

L. Bauman
Jewelry Co.

New Century Bldg.
Ninth & Olive Streets
St. Louis

St. Louis.

Haberman returned recently from a Kansas City.

Frank Grawe returned about a week ago on a business trip to Chicago.

H. Loevenhart, of the Crown Jewelry Co., 457 N. Broadway, has returned from New York.

W. Long, of Tower & Long, left a few days ago on a trip through Kentucky. He will be gone a month.

Ada Kurtz, of the Elliott Jewelry Co., is spending a week's vacation at Springfield, Ill., visiting relatives.

A large street clock is being placed in front of the store of the F. W. Droston Jewelry Co., at 7th and Locust Sts.

C. Kurtz, of the Whelan-Aehle-Hutchinson Jewelry Co., spent several days lately in Springfield, Mo., visiting friends.

Fannie Hubbard, East St. Louis, has accepted a position as cashier with the Lucios Jewelry Co., 6th St. and Washington Ave.

Henry Lowenstein Jewelry Co. has filed a affidavit of the change of its name. It has restyled the St. Louis Loan Society. Mare Ryan, credit manager of the Stadt Mfg. Co., has returned from Springfield, where he had spent a vacation of two weeks.

J. Burke, manager of the Brooks Optical and Jewelry Co., returned recently from Memphis, Tenn., and at once left on a business trip to Chicago.

Schfelder Bros., representing the D. F. Schaefer Co. and the Weaver Mfg. Co., have moved from the Mermod & Jaccard building to the Victoria building.

Frederick W. Haberkamp, of the Elliott Jewelry Co., has returned from his old home at Troy, Mo., where he spent several weeks visiting relatives and friends.

J. F. Dailey Jewelry Co. has filed a lawsuit against Charles Salvator Tumbler and wife. The amount declared is \$10,000. The case is set for trial on June 9.

All the jewelry factories, by an agreement, were closed last Monday for the observance of Memorial Day. The retail stores and jobbing houses closed in the afternoon.

Among the out-of-town jewelers in St. Louis during the past week were: Fred Waco, Waco, Tex.; M. H. Foster, Shelbyville, Ill.; M. G. Schyrook, Clarendon, Ark.; J. Fey, Chamois, Mo.

Paul M. Culbertson, a son of Stephen Culbertson, vice-president of the Hess Culbertson Jewelry Co., has joined the staff of the establishment after completing his college course.

Thomas Humphreys, who opened a jewelry store at 6th and St. Charles Sts., a few days ago, under the name of the Lucios Jewelry Co., reports a very encouraging business. He has conducted stores in Indianapolis and other cities.

H. Estinghausen, proprietor of the Attleboro Jewelry Co., who returned recently from Mexico, is planning a trip to Alaska City of Seattle. Although Mr. Estinghausen has visited nearly every country on the globe he has never been to Alaska, and is anxious to go there.

S. Hotchner, of Hotchner & Sons, Holbrook building, returned recently from New York City and will leave for New York,

June 5, where he will stay about a week, sailing for Antwerp, June 12. His trip abroad, in which the pursuit of pleasure and the purchase of diamonds will be combined, will last until the latter part of August.

Following the death of John Fister at St. Charles, Mo., the jewelry business that was conducted there by him will be closed out by his father, F. A. Fister. John Fister was 31 years old. His death, from lung trouble, followed an illness of four months. He was unmarried. He had conducted the business two years, succeeding his brother, August, who had managed the enterprise for 15 years.

The jewelry store of Joseph Galandsky, 1413 N. 8th St., was broken into about a week ago and about \$1,000 worth of jewelry stolen. The robbery was discovered by Galandsky when he went to open his store. He called the police. They apprehended Andrew Wardenski, 17 years old, who was found hiding under a bed in a room at 1029 N. Broadway. With him was Frank Frost. In the same room was found the stolen jewelry. They admitted their guilt.

Prompt action by Werner Seit, clerk in the jewelry store of Ben Ritzer, 802 Franklin Ave., ended in the arrest of two young girls who had pilfered jewelry from four stores. They were Fannie McCormick, 17 years old, 5835 Cote Brillante Ave., and Edith Fienow, Hunt Road and Hamberger Ave. The girls admitted having stolen jewelry from the Grand-Leader, from Schaper Bros. and from the Palace Jewelry Store. Many of the articles were reclaimed.

J. F. Dailey, manager for Loftis Bros. & Co., has been elected captain of a ball team composed largely of men connected with the jewelry trade. An unique feature is the infield, with a total weight of over 800 pounds. It consists of Dailey, 200 pounds; E. E. Smith and J. N. Rarick, of the Smith Jewelry Co., each over 200 pounds, and George L. Weber, Jr., 215 pounds. Among the players are Brainard Ryan, John Foster and Sam Donaw, of the Eisenstadt Mfg. Co., and E. L. Spinner, of Solomon Ruby.

Charles L. Bates, who represented the Mermod, Jaccard & King Jewelry Co. on the southwestern trip of the Interstate Merchants' Association, has returned and expresses himself as greatly pleased with the results. He is certain that St. Louis will realize substantially in the form of increased business in the territory visited, and regards the southwest as holding great possibilities for the extension of the jewelry trade. Just before starting on the trip Mr. Bates returned from Hot Springs, where he had been assisting for three months at the Jaccard branch store.

A small leather bag containing about \$1,000 worth of diamonds and watches belonging to Loftis Bros. & Co., lay on the floor in a public room of the Carleton building the greater part of Monday afternoon. Persons who came and went thought it belonged there and did not investigate it. W. B. Powell, traveling passenger agent of the Chicago & Alton Railroad, was more inquisitive. He picked it up and opened it, and was dazzled by the glitter of diamonds. In the meantime E. B. Marschuetz, city salesman of Loftis Bros. & Co., was hav-

ing the scare of his life. He had left the bag in the room and it was gone when he went to look for it. Mr. Powell finally learned who had lost it and returned it to the owners. S. J. Loftis, president of the firm, told him to take his pick of anything in the bag as his reward. He selected a diamond ring valued at \$110.

Cleveland.

Col. J. L. Shepherd, of the Keystone Watch Case Co., was in town, last week.

A. C. Ohl, New London, O., has sold out his stock and business to E. E. Nottage, who was formerly in the jewelry business in Lorain, O.

S. Y. Ball returned from Columbus, O., last week, after conducting a very successful publicity campaign for the Webb C. Ball Watch Co.

Mr. Gee, formerly of the firm of Gee & Nusbaum, which is now out of business, has decided to return to Alaska, where he is interested in mining properties.

G. L. Sigler curtailed his trip on the trade extension excursion of the Wholesale Merchants' Board of the Chamber of Commerce and returned to Cleveland, May 27. Important business matters made it necessary for him to return to town.

B. V. and H. W. Arnstine returned from the east, May 25. Their mission there was the selection of a line of silverware for the new catalogue. Arnstine Bros. predict that this year's catalogue will be the best ever turned out by the house, as the lines are nearly new and were selected with great care.

John Spindler, who has been connected with the Sigler Bros. Co. for some time, is now with the Bowler & Burdick Co., and will represent it in practically the same territory. Mr. Spindler accompanied H. W. Burdick on the recent trade extension trip through Michigan, that being part of his territory.

Fred Buehl, 2300 W. 11th St., met with an accident on Detroit St. that by the merest chance did not prove fatal. Mr. Buehl was driving in a buggy and was caught between two automobiles, both traveling at a rapid rate, and spectators were astonished to see Mr. Buehl emerge from the mix-up with only a few scratches.

Wholesalers report that dealers from smaller towns have been actively buying during the past week. A few of the visitors were: A. P. Humphreys, Bellefontaine; Miss Landfair, of the Willoughby Jewelry & Optical Co., Willoughby; J. L. Goddard, Ravenna; E. E. Nottage, New London; A. E. Oyster, Alliance; D. Leonhizer, Huron; Mr. and Mrs. F. R. Montgomery, Sandusky; Robert Miller, Lorain; Wm. Burger, Kelley's Island; C. M. Wilson, Salem, and George High, Medina.

An attempt to rob the jewelry store of C. L. Collins, Main St., Wellsburg, N. Y., was foiled recently by the approach of a pedestrian. The thieves, who were believed to be "yeggmen," had forced the rear window, but had evidently become alarmed before they had gotten their booty, as they fled precipitately, leaving a full set of burglar's tools outside of the window.

San Francisco.

H. F. Wickman, of the H. F. Wickman Co., Honolulu, is here on business.

Jos. Tucker, formerly traveling salesman for an eastern silverware house, has accepted a position with A. I. Hall & Son.

M. Schussler & Co. are now receiving some large shipments of diamonds that have been selected for them in Europe by Mr. Roth.

Albert S. Samuels is preparing to move into a new store now being fitted up for him in the Lincoln Realty building, 5th and Market Sts.

S. F. Hollander, Eureka, Cal., who has been in San Francisco for the past 10 days purchasing stock, left for Seattle on the steamer *City of Topeka*.

The suit that Attorney Friedlander instituted against Benjamin Goodman, 306 Clement St., for services rendered, has been decided in the favor of the latter.

An attempt to rob the store of Deremer & Co., Van Ness Ave., was not a success, for the reason the burglars were frightened away before an entrance was effected.

An attempt was made to break into the jewelry and camera store conducted by Lovick Bros. at 56 Kearny St., May 18. The front plate-glass window of the store had been cracked, but no goods were stolen.

Among the out of town visitors who have been noted here during the past week are: B. H. Hancock, Lemoor, Cal.; L. Levy and Albert Hansen, Seattle, Wash.; G. G. Prouty, Napa, Cal.; J. J. Wilson, Dunsmuir, Cal., and N. R. Solomon, Bakersfield, Cal.

Rothschild & Hadenfeldt are now engaged in the manufacture of Elk Lodge pins, and report that already this particular item is meeting with a ready demand. The big plant across the bay is now very busy, as the scope of operations of this concern has been greatly widened of late.

Arthur Follis, who came down from Vancouver, a short time ago, and who had accepted a position with Shreve & Co., was found dead in his room on Hayes St., near McAllister, presumably from natural causes. He was a diamond setter by occupation, aged 55 years, and leaves a widow.

For the second time in the past 13 months the store of T. Lundy, 728 Market St., was entered by burglars, and a considerable quantity of valuable goods taken. This time 30 watches and a diamond ring were stolen, the aggregate value of these being placed at about \$1,000. No effort was made to enter the safe, as on the former visit of the burglars, a year ago last April, when diamonds to the value of \$48,000 were taken. This is the third time that burglars have robbed this store. In 1878, a heavy loss was suffered, and last year the big robbery occurred that is still the talk of the town.

In spite of the increased vigilance of the local police department and the precautions that are being taken by San Francisco jewelers, the operations of thieves seem to be on the increase instead of the reverse. During the past week there have been a number of robberies and attempted robberies, and the boldness of these leads the police to believe that there is a well organized gang of crooks making this place

their headquarters. There are many retail stores still in temporary buildings, and it is these that are made the special mark of cracksmen, as they are comparatively easy of access, and many of them are in sections of the city where police patrol is inadequate.

Pacific Coast Notes.

A new store is to be opened shortly at Marysville, Cal., by a brother of Councilman Haubrich.

B. I. Temple, Sausalito, Cal., who has been in business at that place for the past 24 years, has moved to a location near the Ferry building.

A Protsch, Redondo, Cal., has engaged the services of M. Church, Waterloo, Ia., to assist him in the store. His former assistant, Frank Baldwin, resigned on account of poor health.

A. J. Hough, Redding, Cal., who recently secured permission to auction his stock of goods, is now conducting the sale in the evening only, the store being open in the daytime for the regular patronage.

A. W. Glover, Kennet, Cal., who recently purchased the Elwood jewelry business of Medford, has decided to locate at the latter place. The Kennet store will be operated by his son, Fred, who is now in charge.

W. E. White has purchased the business of W. C. Ruddock, Dos Palos, Cal., and has assumed possession of the store. Mr. Ruddock will go to the southern part of the State, where he has property interests.

Pacific Northwest.

L. A. Messing has just opened a new store at North Powder, Ore.

Fire was discovered recently in the building occupied by F. G. Maresch, Bellingham, Wash. It was extinguished before serious damage was done.

Mr. and Mrs. A. A. Mann have purchased the business of C. B. Adams, of Centralia, Wash. Mr. Adams is retiring from business on account of ill-health and will spend most of his time in traveling with his family.

The Manufacturing Jewelers' Association, with headquarters at Tacoma, Wash., is taking steps to stop frauds on the public by unscrupulous dealers. Circulars are being sent to the trade, asking them to carry only those goods which are stamped with a quality mark. There is a law already against improper stamping and marking of plate and jewelry, but it cannot touch articles bearing no mark whatever.

Omaha.

Frank Hampl, Ponca, Nebr., has sold his jewelry interests to F. R. Pelant.

John Morse, Hancock, Ia., was in this city, last week, purchasing stock.

Miss Mary Hurst, with C. B. Brown Co., has returned from a nine weeks' trip spent on the Pacific Coast.

Owing to the sale of jewelry, cut glass, etc., which Fred Brodegaard & Co. have been carrying on the past month, the alteration and remodeling of their store have been postponed until the coming week, when work will begin at once.

Los Angeles.

The J. C. Fleming Co. has put in a new line of diamond jewelry.

All of the J. P. Trafton Co.'s traveling men are now on the road.

A petition in involuntary bankruptcy was filed, May 17, against the Jaeger Supply Co.

Arthur Turner, traveling salesman for the E. W. Reynolds Co., has gone on a trip north.

John Plover, Santa Rosa, Cal., was here recently, en route for Pomona, where he attended a Knights of Columbus convention.

A letter received from H. F. Wallace announces that he is enjoying his trip through the east. When last heard from he was in Atlantic City.

Z. F. Vaughn, formerly of Los Angeles but now in business in Kingman, Ariz., visited the wholesale houses in this city a few days ago.

E. T. Willis, traveling salesman for L. Bright & Walsh, reports that business among his customers is showing considerable improvement.

R. H. Schwarzkopf has returned from a northern trip, and reports good trade in Oregon and Washington, as well as a number of the cities in this State.

A. E. Baranger, traveling representative for H. F. Wallace, returned home, a few days ago, and then started off on another trip up the coast, to be gone for a couple of weeks.

A letter received by George Hampl from E. J. Pollock, of the firm of Pollock Bros., Riverside, Cal., announced the arrival of a daughter in Mr. Pollock's family on May 21.

The S. S. Schepps Co. has just delivered 12 gold medals for the southern California amateur boxing championship contest under the auspices of the Athletic Club of Los Angeles.

H. A. Curry, formerly with Shreve & Co., San Francisco, has taken a position with R. H. Schwarzkopf, 340 S. Broadway. He will represent this concern on the coast, visiting the coast trade.

P. J. Koke, formerly of Grand Rapids, Mich., has taken a position as head salesman for H. B. Crouch in his new store, 555 S. Broadway. Mr. Koke's brother, a salesman with Field & Walton, also is in the city.

Mr. Brock, of Brock & Feagans, reports that the recent sales of wedding goods have established new records. All departments are busy, and he feels assured that the year will prove to be the banner year for his firm.

The first meeting of the creditors of F. Whittemore, who was adjudged bankrupt, May 18, will be held at the office of Lynn Helm, referee in bankruptcy, 510, Los Angeles Trust building, June 2, at 2 p. m.

George L. Penniman was injured, a few days ago, by a collision with a street car while riding in an automobile. He was severely bruised, and has gone to Mount Hot Springs, Riverside County, for rest and recuperation.

John F. Baker & Co., Dayton, Ia., has gone into bankruptcy.

THE JEWELERS' CIRCULAR PUBLISHING COMPANY
11 John Street, corner Broadway, New York

Indianapolis.

I. Grohs has returned from a visit to Cincinnati, O.

George S. Korn will attend the annual meeting of Shriners at Louisville, Ky., next month.

After a short visit to the Optimo mines in Wisconsin, of which he is president, A. P. Craft returned home May 26.

The store of George S. Kern in No. Meridian St. has been redecorated, and an elaborate electric lighting system has been installed.

A sale of "drummer's samples" at 25 cents per sample, is being conducted at the old location of the Guarantee Jewelry Co., West Washington St.

Lon R. Mauzy has finished redecorating the interior of his store at 207 Massachusetts Ave., giving the place an especially attractive appearance.

Among jewelers trading in the city, last week, were: L. J. Small, Carmel; J. F. Kiser, Muncie; Charles Hamm, Frankfort; J. O. Lutz, Zionsville, and N. M. Rubin, Terre Haute.

Jefferson H. Reed has an attractive show window, arranged by his son, William Reed. It is arranged with articles especially suitable for graduates, and the design is unusually clever.

The drug and jewelry store of H. R. Koffel, Knox, Ind., was robbed, May 25, presumably by tramps. Jewelry and silverware, valued at about \$700, and cash to the extent of \$100, were taken.

It is expected that Adam R. Ruffe, North Manchester, will be appointed State Fish and Game Commissioner when the term of the present incumbent expires Jan. 1. Mr. Ruffe has the support of many jewelers.

Quite a number of jewelers were in the city, last week, to attend the dedication of the new Masonic Temple. William G. Young, Jeffersonville, and A. W. Kesler, New Albany, were delegates to the ceremonies from the lodges of their respective cities.

W. B. Pattee, who is well known in Indianapolis, but who has been employed by jewelers throughout the south for some time, has taken a position with George S. Kern, succeeding A. O. Pickett, who left to engage in business with Elmer C. Stokes.

At the request of jewelers and other business men Mayor Bookwalter has agreed to extend the proposed lighting scheme in Washington St. from West to East St., providing 10 arc lights enclosed in ground glass globes to the square. This will make about 17 squares of the retail district that will be brilliantly illuminated.

J. A. Oswald, secretary of the Indiana Retail Jewelers' Association, who is in business at Crawfordsville, is on the committee of arrangements for an automobile day, to be held there June 9. One day of each year is devoted to an automobile parade and contests in Crawfordsville, bringing hundreds of strangers to that city.

Local police have been instructed to watch for a clever crook who, dressed in the uniform of an army officer, is supposed to have swindled two jewelers of Pittsburg recently. He is believed to have operated in this city under the name of

Lieut. Donald Metcalf, but confined his operations to hotels, cashing worthless checks. The real lieutenant is in the Philippine Islands.

Denver.

A. Ropin, Central City, was in town, last week.

Arthur West, Marble, Colo., was a recent visitor.

E. D. Tunnicliffe, Castle Rock, was in town, last week.

Dan S. Park, of Dan S. Park & Co., left, May 23, for Cheyenne.

Wm. P. Jones, Fort Lupton, was in the city, recently, buying goods.

H. M. Voreys, Rifle, Colo., has been in the city for a few days, buying stock.

Wm. Fulton, of the Lewis Jewelers' Supply Co., has gone to Grand Junction on a business trip.

Theodore Lyman, of the Lyman Bros. Jewelry Co., is supervising the remodeling of his Summer home.

Joe Shoemaker, formerly in the employ of Jos. I. Schwartz, has gone into business for himself at Awada.

Walter Rushlaub, who was seriously hurt in the manufacturing department of the Lyman Bros. Jewelry Co., some time ago, is now back at work.

The Lyman Bros. Jewelry Co. secured the contract for making the loving cups and other trophies which the Denver *Post* donated for the Rocky Mountain A. A. U. meet, Decoration Day. Lyman Bros. put the cups on display in their windows, and they attracted admiring crowds.

Gustave A. Ehret, formerly vice-president of the International Jewelry Workers' Union and prominent in labor circles in this city, has been missing from his home, 141 West Third Ave., since May 12. The police have been requested to search for him. He was employed by the Charles H. Clark Jewelry Co., 1536 Champa St., at the time of his disappearance.

Columbus, O.

L. Poppendieck, who formerly conducted a store on N. High St., is now traveling for an eastern house.

Arrangements have been concluded by H. E. Fuller for a lease of the north half of the store room at 148 N. High St. Fine fixtures have been purchased, and Mr. Fuller left this week for New York to purchase stock. A fine and complete line of jewelry will be carried and the establishment will be open about June 1.

R. N. Whitford, vice-president and general manager of the Hoffman Jewelry Co., has retired from the company on account of his health, and is now in Colorado recuperating. He will, while in the west, keep his eyes open for a location, and if he finds a good one may locate and open a jewelry store.

During the recent convention of the Brotherhood of Railroad Trainmen, held in this city, Goodman Bros., High and State Sts., published a little sheet called the *Convention Bulletin*, giving information about the convention and the organization and also telling of the lines which this firm carried that would interest railroad men.

Cincinnati.

TRADE CONDITIONS.

Business among the local retail jewelers is considerably enlivened the past two weeks owing to several conventions held here, the last being the National Foundrymen's Association.

M. Loeb, vice-president of the Du Watch Case Co., was here last week.

Otto Mehmert, with Joseph Mehmert, calling on the Indiana trade this week.

A. A. Spiegel & Co. will hereafter located at 14-16 Boylan building, E. 4th.

L. McIntyre, with George H. News, has left for a two-months' sojourn in California.

Aaron Cohn, of D. Jacobs & Co., is enjoying a few weeks' rest at French Springs, Ind.

W. C. Air, formerly associated with Duhme Jewelry Co., is now connected with the Oskamp Jewelry Co.

Charlie Creighton, formerly in business in Morrow, O., was here buying stock his new store at Franklin, O.

R. H. Galbreath, New York, who is one of the appraisers for the Duhme Jewelry Co.'s stock, contemplates leaving New York about June 15.

S. & S. Gilsey have added to their selling force Charles Zurr, St. Louis, will visit the western trade after June 1 and William Edwards, Dallas, Tex., will start out at that time through Indian Territory and Oklahoma.

Out-of-town jewelers here the past buying stock included: M. Cramer, M. Deltown, O.; T. Wulff, Elwood, Ind.; G. Graff, Peru, Ind.; G. G. Helo, Corner, O.; John A. Selbert, Frankfort, Ky.; Henry Risinger, Lawrenceburg, N. Sanning, Walton, Ky.; C. A. Smith's Grove, Ky.; E. B. Scott, Bay O., and O. O. McCracken, Mt. Olive, O.

A young man about 26 years of age claiming to be Charles Harris, a cook in Chicago, was arrested May 25 at the corner of 7th and Race Sts., on a charge of petty larceny preferred by Emil Claus. Harris had called at the Claus pawn shop on Vine St. and asked to see some stock and was waited upon by Mr. Claus, pretending to make a purchase by one and ran from the store. Mr. Claus's nephew, a clerk, was soon in possession of the thief was caught and arrested.

Henry Weidenbach, artist and amateur, who was bound over to the jury a short time ago on charges preferred by Frank Smith, pawnbroker, others, broke down and wept and confessed when tried in Common Pleas last week. In addition to the diamond he secured from Frank Smith he admitted he had stolen from the house of Harry Levy while employed there worth of art treasures. He received mercy, but was sentenced to the penitentiary. Mr. Smith has his ring, and goods belonging to others, which are being located.

The jewelry store belonging to that of the late James P. Sain was recently the administrator at Covington. G. Johnson, Atlanta, who purchased the stock, will continue the business on Sain's old stand.

Milwaukee.

Todore F. Dresen, Madison, Wis., is buying a handsome new residence.
 E. G. Fifield, formerly in the jewelry business at Janesville, has been elected president of the Tie Club, a baseball organization, at Beloit, Wis.
 Raymond Swenson, Stoughton, formerly connected with a jewelry store at Whitefish Bay, is now associated with the jewelry store of Gilbertson & Anderson at Madison.
 A. Goetz, a well-known former travel jewelry salesman, has opened a new jewelry establishment at Mukwonago, Wis. Goetz recently called upon Milwaukee jewelers and manufacturers.
 Fredson & Nicoll, Kenosha, Wis., embraced the opportunity to offer a set of Lincoln souvenir spoons on the occasion of the dedication of a new Lincoln monument at Kenosha on Memorial Day.
 The first meeting of the creditors of Frank Runkel, Oshkosh, was held, May 15. Runkel recently went into bankruptcy with liabilities of \$3,972.48 and assets of \$3,563. Charles H. Forward, Oshkosh, referee.
 Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association and president of the new Jewelers' Mutual Fire Insurance Co. of Wisconsin, has returned from a successful trip to Chicago made in the interests of the insurance company.
 Aur DeBries, an expert watchmaker, formerly located at Milwaukee, is now associated with Thomas Bruhy, West Bend. DeBries recently took a course in watchmaking in New York, and is also carrying on work in the watch line at the Bruhy establishment.
 The members of the entertainment committee of the Milwaukee Jewelers' Club are canvassing Milwaukee establishments for the purpose of raising funds for the coming convention of the Wisconsin Retail Jewelers' Association, which meets in Milwaukee, July 20, 21 and 22.
 More than 400 members of the Board of Commerce and Business Men of Detroit, recently visited Milwaukee this week, making a comparison between the two cities by boat.
 A. A. Berkey, of Chas. A. Berkey Co., and W. Warren, of the C. W. Warren Co., were among the number.
 Out-of-town Wisconsin jewelers who visited Milwaukee this week, include: W. W. Davy, Ripon; E. Dahlberg, Kenosha; W. S. Sargent, New Lisbon; T. J. Kenosha; Gustav Sliwinski, Oconomowoc; F. P. Beswick, Racine; Henry White Water, and A. H. Goetz, Kenosha.
 No. Martin, Jr., manager of the Peerless Jewelry Co., 138 Grand Ave., has disposed of his interests in the company and has moved to Evansville, Ind., where he has opened a new jewelry store under the style of Martin & Co. Clarence Holverson has been appointed manager of the Peerless Jewelry establishment.
 Jewelers entered the jewelry establishment of E. F. Rohn, 274 W. Water St., Milwaukee, and stole toilet sets, bracelets, rings and other jewelry amounting to at least \$1,000. This is the fifth time in a few years that the Rohn store has been robbed, and during the past two

years the front windows of the store have been smashed three times and jewelry carried away.
 Alfred Held, recently arrested at Oshkosh for stealing two suit cases and sentenced to one year at Waupun, has been found to be a clever diamond thief also. In the stolen suit cases, belonging to George A. Bloss, were two valuable diamonds, and these were supposed to have been returned with the suit cases. It now transpires that the real stones had been removed from their settings by Held and two paste imitations inserted.
 An historic old bell in a tower of a factory building serves as a rather unique timepiece for a portion of Oshkosh. In the evening the bell is rung as a curfew, and at every hour of the night a watchman at the plant rings the bell, tolling the hours. For more than 25 years the bell has been tolled, and all watches and clocks of a portion of the city are regularly set according to this remarkable timepiece. Oshkosh jewelers believe that it is the only case on record where an ordinary bell rings the hours.
 William H. Upmeyer, treasurer and vice-president of the Bunde & Upmeyer Co., proprietors of one of the largest jewelry establishments in Milwaukee, has been appointed public debt commissioner by Mayor David S. Rose. Mr. Upmeyer was literally forced into the position by the Mayor because of his well known business ability and his great interest in municipal affairs. Mr. Upmeyer was born in Milwaukee in 1857, and after receiving a liberal education he entered the jewelry business of his father. In 1880 Mr. Upmeyer formed a partnership with Louis W. Bunde. From a small store the establishment has grown to be one of the largest jewelry houses in the west. Upmeyer's appointment has created a great deal of favorable comment.

Kansas City.

Albert Zureher, Mareline, Mo., was a recent visitor to Kansas City, accompanied by his bride.
 W. R. Terwilliger, with the Meyer Jewelry Co., has just returned from a trip to Leavenworth, Kans.
 Miss Rose Belair, with the Porter & Wiser Jewelry Co., is spending her vacation at Plattsburg, Mo.
 M. S. Murray, Texas representative of the C. B. Norton Jewelry Co., is getting ready for his next trip.
 J. W. Phillips, Chanute, Kans., was in town, recently, and spent several days at the convention in Topeka.
 Wm. Kassel, whose jewelry store was destroyed in the Ridge building fire, has opened up a new store in the Searritt Arcade.
 C. E. Manor has just returned from El Dorado, Kans., where he has been conducting a closing-out sale of the retail stock of jewelry of G. B. Rhodes.
 E. A. Church, Claremore, Okla., has been visiting his brother, G. H. Church, Oak Grove, Mo. He is making an automobile trip from Claremore to St. Louis.
 H. W. Porter, of the Porter & Wiser Jewelry Co., and J. M. Scott, of the Wood-

stock-Hoefler Watch & Jewelry Co., were in attendance at the Topeka convention.
 Frank Bangs, J. H. Whitney and Leo Ludwig went to Topeka, last week, to look after the interests of the Edwards & Sloane Jewelry Co. during the Kansas convention.
 Katie Daugherty, formerly with the Edwards & Sloane Jewelry Co., and later with the Porter & Wiser Jewelry Co., is to be married next week. The lucky man is Peter Kelly.
 J. E. Johnson, P. N. Nelson, W. C. Schuman and J. V. Robinson were in Topeka, last week, looking after the interests of the C. B. Norton Jewelry Co. during the Kansas convention.
 H. C. Hanson, St. Marys, Kans., stopped off in Kansas City, a few days ago, while on his way to Europe for a three months' visit to his father. He was accompanied by Mrs. Hanson.
 Herbert Koppel, manager of the material department, and Harry Snow, of the manufacturing department of the Meyer Jewelry Co., were in Topeka, Kans., last week, representing their house at the convention.
 Louis Hoffman, who has been a jeweler in Leavenworth, Kans., for about 25 years, has just been made police judge of that city, under the commission form of government. His friends now give him the title of the Hon. Judge Hoffman.
 L. R. Hassig, of the Hassig Jewelry Co., was in attendance at the Kansas convention in Topeka. The Hassig Jewelry Co. is working nights, and reports a large volume of business on class pins, Masonic rings and regular repair work.
 The following retailers from the surrounding country have been visitors to this market during the week: F. R. Culumber, Eldon, Mo.; A. Zurcher, Marceline, Mo.; S. J. Huey, Excelsior Springs, Mo.; E. Parker, Gilman City, Mo.; D. E. Delanty, Parkville, Mo.; F. B. Schroeder, Paola, Kans.; H. C. Shultz, Hays City, Kans.; B. E. Kidd, Corder, Mo.; J. A. Lawson, Adrian, Mo., and J. F. Hibbard, Mound City, Mo.

Toledo.

TRADE CONDITIONS.

Toledo jewelers are encouraged over the business outlook and the way in which trade has been improving the past month. Books show a handsome increase in business over a year ago, with nothing to indicate it as a spasmodic revival but rather a steady improvement.
 W. F. Broer, of the Merrill-Broer Co., spent a day in Napoleon, recently, forming one of a party of automobilists who made a century run on that day.
 J. George Kapp is trying a new scheme in advertising, and is using the billboards extensively, not only in Toledo, but throughout northwestern Ohio. He reports very satisfactory results to date.
 J. J. Freeman & Co. are now arranging for the annual outing of the firm, which is usually held on or about July 4. Thus far no decision has been reached, but it is likely that the usual programme will be followed, which consists of an outing for the day at some resort within easy reach of the city, and which is generally ended by a banquet given by the firm to the employees.

PATENT DEPARTMENT

THIS DEPARTMENT CONTAINS A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE BEEN REPEALED AND THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

ISSUE OF MAY 25, 1909.

40,000. BRACELET. ANTHONY H. BLISS, North Attleboro, Mass., assignor to the A. H. Bliss Co., North Attleboro, Mass. Filed June 19, 1907. Serial No. 376,984. Renewed April 1, 1909. Serial No. 489,184. A device of the class described, a pair of hollow link uniting said units and having

engagement with one of said units, and contained within said link for resiliently said link within said unit.

40,001. CUFF-FASTENER. JAMES H. HENNINGSON, Ottawa, Ont. Filed Oct. 16, 1908. Serial No. 458,019.

A combination of the stud button formed with a shank, a solid base formed with a smooth outer surface and a semi-spherical recess in said base, the said base and shank cast integrally; of a second stud formed with

a shank, and a head having an outer cylindrical surface of equal diameter with the cylindrical base of the other stud, and a dome-shaped portion on the head of the second stud adapted to fit in the semi-cylindrical recess in the base of the first stud.

40,002. CLOCK WINDING MECHANISM. ERNEST E. YANLEY, Chicago. Filed April 2, 1908. Serial No. 424,760.

A mechanism including a toothed wheel, a winding mechanism including a pawl adapted for engagement with the toothed wheel to turn the same, and a device operating upon and through the winding mechanism to effect turning movement of the wheel, an

electromagnet serving, when energized to operate the pawl mechanism to cause the pawl to have fresh tooth engagement, and upon a lever device to replenish power therein, and a winding mechanism governed by the pawl mechanism and permitted to close circuit through the

electromagnet when the pawl has caused predetermined movement of the wheel, said pawl mechanism operating the switching mechanism to open circuit through the electromagnet when the pawl has fresh tooth engagement, the pawl mechanism being out of operating relation with the switching mechanism during movement of the pawl to the position where it may have fresh tooth engagement, whereby circuit through the electromagnet is maintained during such movement of the pawl.

922,633. TIME RECORDER. A. P. SCHMUCKER, Denver, Colo., assignor of one-half to William Hickey, Denver, Colo. Filed July 7, 1908. Serial No. 442,410.

In a time-recorder, the combination with a door and a timepiece having a movable dial containing time designations, of a lever fulcrumed adjacent to the timepiece, a hollow stationary member, a tube telescoping in said member, the said tube being connected in operative relation with the said lever, a spring acting on the telescoping tube to normally hold the lever away from the said dial, a second lever fulcrumed adjacent to the door

and having an arm projecting into the path of the door when opening the latter, a cylinder also mounted adjacent to the door, a piston therein, a stem connecting the said piston with the opposite arm of the second lever, a spring acting on the last named lever to hold the piston at its outward limit of movement, and a conduit connecting the said cylinder with the hollow member into which the said tube telescopes, the arrangement being such that as the door acts upon the second lever the telescoping tube is actuated to cause the first named lever to puncture the said dial of the timepiece.

922,809. WATCH. ALFRED PFISTER, St. Imier, Switzerland, assignor to Fabriques des Longines Francillon & Cie., St. Imier, Switzerland. Filed April 12, 1907. Serial No. 367,735.

In a watch, the combination with a drum and a cover, said drum and cover being relatively movable, of an arbor on which the drum is mounted,

a spring connected to the cover and arranged to drive the drum, a spur-wheel connected to the cover and provided with a central opening, means for rotating the spur-wheel to wind the spring, and a dowel surrounding the arbor and projecting into the central opening of the spur-wheel.

923,094. METRONOME. CHARLES A. WHITE, Boston, Mass., and ERNEST R. HUNTER,

Sound Beach, Conn. Filed Oct. 20, 1908. Serial No. 458,731.

In a metronome, the combination with two

scales, one having a uniform sub-division and the other having sub-divisions gradually increasing in size, of an indicator for each scale, a watch movement for moving the indicator that indicates on the equally divided scale, manually actuated mechanism for shifting the other indicator, and a connection between the manually actuated mechanism for shifting one indicator and the watch movement, which connection varies the speed of the watch movement while shifting the hand not operated by the watch movement.

DESIGNS.

40,000. BADGE. CHARLES J. DIEGES, New York.

Filed March 29, 1909. Serial No. 486,623. Term of patent 7 years.

40,001. BADGE. CHARLES J. DIEGES, New York.

Filed March 29, 1909. Serial No. 486,624. Term of patent 7 years.

40,002. BADGE. JOHN W. GREEN, Santa Fe, N.

Mex. Filed March 15, 1909. Serial No. 483,652. Term of patent 14 years.

40,003. BADGE. ELIAS J. KASSEL, Ballinger,

Tex. Filed March 31, 1909. Serial No. 487,100. Term of patent 14 years.

40,004. MEDAL. RUDOLF MARSHALL, Vienna,

Austria-Hungary. Filed April 25, 1908. Serial No. 429,288. Term of patent 7 years.

40,005. GEM-SETTING. ISAAC D. BELASCO, Chi-

cago. Filed March 24, 1909. Serial No. 485,548. Term of patent 3 1/2 years.

40,006. GEM-SETTING. LEO KRAUS, Chicago.

Filed Feb. 25, 1909. Serial No. 480,068. Term of patent 7 years.

UNITED STATES TRADE-MARKS.

Following trade-marks have been adjudged to registration under the act of Feb. 20, and are published in compliance with Section 2 of said act. Said section provides: "No person who believes he would be damaged by the registration of a mark may oppose the same by giving notice of opposition, stating the grounds therefor, to the Patent Office, within 30 days after the publication of the mark sought to be registered, and if no such notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for." The following are stated to have been "Used 10 years prior to the date of registration" and are registrable under the last proviso of Section 2 of said act, which is as follows: "Provided further, that nothing therein shall constitute an objection to the registration of any mark used by the applicant or his predecessor, or by those from whom the title to the mark is derived, in commerce in any foreign nation or among the several States, or among the Indian tribes, which was in actual use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

PUBLISHED MAY 25, 1909.

40,628. (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) WEBSTER Co., North Attleboro, Mass. Filed Feb. 18, 1909.

Description of goods.—Silver jewelry for personal wear, silver flat ware, silver hollow ware, silver toilet articles, sterling silver utensils and accessories, sterling silver and cups, sterling silver sewing utensils and articles, sterling silver cigarette cases and cigar cases, sterling silver purses and bags, sterling silver and book-marks, sterling silver and sterling silver bag-tags.

BRITISH PATENTS.

(ABRIECTIONS OF SPECIFICATIONS, 1908, FROM THE Illustrated Official Journal.)

ISSUE OF MAY 12, 1909

970. WORKMEN'S TIME-RECORDERS. J. J. STOCKALL, Westminster, Jan. 15. Period for granting patent not yet expired.

Means are provided for printing distinctive marks. The invention is described in connection with the time-printing mechanism disclosed in Specification No. 16,790, A.D. 1906. Interposed between the day types of the day-wheel *q*, which is actuated as described in Specification No. 21,702, A.D. 1902, are star or day and star or like types, this second type for each day being brought into printing position when a wheel 8 attached to the day-wheel is engaged by a pawl 7

attached to a pawl 5 and pivoted at 6. The latter pawl is allowed to drop so as to set the required type by notches 4 on a disk 3 driven from the minute spindle *c*, the pawls 5, 7 being normally held up by a projection 9 on the latter extending over and engaging the hour-justifying pawl *j*. Instead of driving the day-wheel from the card stop, a toothed sector 13, Fig. 4, may be employed in place of the pawl 7, an attached pawl 15 being adapted to engage stepped notches 16, as shown, in the timing-cam 3, thus permitting the times of late-comers to be registered in series, such as 5, 10, 15, etc., minutes late. A separate series of

Clever Silver Work by a 15-Year-Old Cripple.

AN idea of what the technical school can do in the way of developing the natural ability of embryonic silversmiths is to be seen in the two fine pieces of silver illustrated herewith, each of which is the work of a 15-year-old cripple and produced under unusual circumstances.

The lad in question is an attendant at the day technical classes of the Central School of Arts and Crafts, London, and during the past year he has had about 40 hours instruction in practical work. Even with

CLEVER WORK BY A CRIPPLE AT A LONDON JEWELRY SCHOOL.

steps may be employed for late times, operating a wheel with extending type so as to print only the distinctive mark. A controlling-device for the special type-setting pawls 7 may be operated from the card-sheath traversing-mechanism for bringing the columns on the time card opposite the type. The spindle 6, to which the setting-pawl 7 is attached, has an arm 17, Fig. 3, to engage the notched arm 18 on the card-adjusting lever *w*, so that unless a notch 19 is presented to the arm 17, no special mark is printed.

Complete specifications accepted April 28, 1909.

- 22,791.** KEYLESS WATCHES. HOLLAND.
- 26,738.** WATCH GUARDS OR CHAINS. FRANKLIN.

the best tools the two-handled ewer and cup which he produced would have been remarkable specimens of work from a boy of his age who had so little instruction, but the work is all the more noteworthy because the pieces were actually raised from the flat circle of metal by means of a cobbler's iron last and cobbler's hammer, while the chasing was done by means of tools made from nails.

The designs, which are the boy's own, and the workmanship have evoked a good deal of enthusiastic praise from his instructors.

THE HOROLOGICAL REVIEW

Interesting Old Striking Automaton and Clocks Now Preserved in England.

It is hardly surprising that in England, where the monastic establishments were so essential and important an institution, the relics of the monastic period, reminis-

nearly all the best of these devices having been installed in churches, cathedrals, etc. The great cost of these clocks, especially where they were complicated, as was fre-

quently the case, has caused them to be lost to

artisans and horologists of the times. As a rule, the automaton was of a religious character, depicting some scene from scriptural history, the apostles passing in procession before Christ, the wise men adoring the Virgin and Child, etc., although in some instances the figures were allegorical, Time with his scythe and hour-glass being frequently introduced; at other times historical, where it was desired to pay a compliment to some distinguished personage.

In England the figures striking the bells are commonly known as clock "Jacks," or "Jacks" of the clock, Jack being, as is well known, an abbreviation or nickname for John, frequently bestowed on servitors; the "Jacks," in other words, were the servants of the clock. So common were these figures in England at one time that Shakespeare,

ST. DUNSTON CLOCK IN LONDON, ENG., SHOWING AUTOMATON, "GOG AND MAGOG."

STRIKING FIGURE IN CHURCH AT SOUTHWOLD.

in his play of Richard II., makes the unfortunate king, then a prisoner at Pontefract Castle, where he ultimately met his death, say: "My time runs posting on to Bolingbroke's proud joy, while I stand fooling here, his Jack o' the clock." As most of these old-time pieces were made to record the quarter-hours on bells, the automaton came to be known as "quarter Jacks."

A few of these figures are still in existence, some of them still in operation where they were originally set up, and our illustrations represent them as they are to be seen to-day.

Until some years ago there were two such figures operating in connection with the

the mechanical skill and artistic of the monks of old, should still be in existence. Among these, notable clocks are numerous, the monks having been among the earliest constructors of clocks, and

consequently the ease, with astronomical features, striking automaton, etc., made them obtainable only by these wealthy institutions, among the inmates of which were to be found some of the most skilful

WALTHAM WATCHES

FIFTY YEARS AGO

FRIDAY, APRIL 22, 1859.—The proprietors and workmen of the watch factory at Waltham were entertained by Gov. Banks at his residence today. About 200 men and women were present.

From Boston Advertiser, April 22, 1909.

The Waltham factory had existed five years. Here was the first successful effort to realize the dream of Dennison, father of American watch-making. Here was the first and only structure in the world erected for manufacturing pocket timepieces. Three hundred people were employed, the largest number ever assembled in such an enterprise. General Banks was proud of Waltham, where he was born and where he had worked as bobbin boy in a cotton mill. He found time, while Governor of a great State, to greet and encourage the operatives of this watch factory, because he believed that they were creating an imperishable industry. He lived until the word WALTHAM had symbolized the perfect watch in every country on the globe.

In that year, 1859, the total number of Waltham watches manufactured was 12,304; in 1906, the product was 855,000; to-day there are 16,000,000 in use. The Waltham factory was the parent factory. It is now the corner-stone of an industry that gives a livelihood to more than 100,000 persons in the United States. In 1859, it was the only institution of its kind here or anywhere else; every other watch factory came later. The Waltham factory is distinguished by its achievements as well as by its age. Waltham watches have always exemplified the highest type of watch construction, and public recognition of their superiority is attested by the highest awards at all the great Expositions wherever they have been shown.

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing on this hemisphere.

of the old Church of St. Dunstan in London, one of our illustrations showing as they then appeared. These were the last that remained in London. The clock was located over the main entrance of the church, and consisted of two gilded dials placed back to back in a richly ornamented case, supported by a figure of Time, a winged, bracket-like, from the wall of the building at a considerable height above the street. The bracket concealed a tube

for the theological students who now occupy his eccentric lordship's villa.

In Southwold, and in Blythburgh, Suffolk, "Jacks of the clock" are still to be seen. The former, of which we give an illustration, is a "Jack in armor," carved life-size in wood and located in the fine old church at Southwold, that strikes the hour on a bell with a battle axe when the officiating clergyman enters the church. Carved in oak and painted, the figure, owing to its exquisite workmanship, is an excellent specimen of oldtime wood carving. In its right hand it holds the axe with which the bell is struck, the arm being set in motion by means of a cord at the back of the figure. The left hand holds a sword,

bell of the famous cathedral chimes acts as gong for the clock, the hour being struck on it by an 80-pound hammer.

A remarkable astronomical clock, which we also illustrate, is installed above the chancel in Exeter Cathedral. It is of great interest on account of its antiquity, having been constructed prior to Galileo's telescope. It is mentioned in the patent records of Edward III., in 1317, and it is also re-

OLD CLOCK IN EXETER CATHEDRAL.

which was the shaft that served to operate the hands, the dials being set so close together that the manner of their operation seemed at the time considerable curiosity. The roof, over the porch, in a specially constructed structure, were two gaily painted decorated figures, "Gog and Magog," carved after the gigantic statues in the Norman "Gu'dhall," and with their clubs

CLOCK IN ST. MARY'S CHURCH, EXETER.

which, however, does not move. Originally this figure stood on the west side of the church and was connected with the clockwork, having probably been erected at the same time. Here the figure struck the hours on a great bell. To-day it tolls for service and gives the organist his cue for the commencement of the music.

Another famous old English clock, said to be the oldest working clock in Great Britain, is in Peterborough Cathedral, Northamptonshire, England. It is said to have been made about 1300 by a monastic clockmaker, and is asserted to be the only clock in existence operated by an old wooden winding wheel, in this case about 12 feet in circumference and carrying a 300-foot cable, to which a weight of three hundredweight is attached, and which has to be wound up every day. There is no dial to the clock, but the time is indicated by the main wheel of the escapement, which revolves once in two hours. The great 3,200-pound tenor

ferred to in the church records of the year 1376. The manner of its construction indicates that it was expected to last a long time.

It shows the old Ptolemaic solar system; the earth is represented as a fixed body in the center; the sun and moon move about the earth. The latter shows its different phases during its passage around the dial,

CLOCK IN CHURCH TOWER AT RYE.

which struck the quarters on the bells provided for that purpose. When the church was burned down, the clock, which was made in 1111 by the famous London clockmaker, William of Hertford, was purchased by the Marquis of Hertford, with three ancient statues, and was repaired and, with the motto "Pereunt et imputantur" (The moments pass and are charged against us). The hours are rung on a large bell bearing the name of "Great

Peter which was presented to the Cathedral in 1480, by Bishop Courtenay. On May 5, 1611, this bell was cracked as it was being tolled in commemoration of the Gunpowder Plot.

Another illustration we show the clock in the Church of St. Mary Steps, Exeter, Devonshire, England, which was constructed in the 16th century. The central figure,

struck on a bell by two plump-cheeked golden cherubs. The cherubs stand side-wise to a tablet that bears the following inscription: "For our time is a very shadow that passeth away."

A very remarkable old clock is to be seen on the south side of the minster at Wimborne, Dorsetshire, England. The skilful constructor of this clock was Peter Lightfoot, a monk of Glastonbury Abbey, in 1320. The earth, in this clock, is represented by a sphere in the center of the dial plate; the sun by a disk that in the dial displays the hours and makes a revolution in 24 hours. The dial consequently shows the hours from I to XII twice, for day and night respectively. The moon consists, in the customary manner, of a ball, half black and half gilded, that makes one circuit of the dial in a month, and at the same time revolves on its own axis, so that at full moon the golden half, at new moon the black half, and at intervening periods the proper phase of the moon appears. This

Lightfoot, must have been a very competent man, and he introduced several ingenious devices in this clock. On the dial the sun, moon and earth move, the time of day as well as the phases of the moon being shown. When the hour strikes, several armored knights appear from a doorway and gallop past on their horses in a half-circle, disappearing in a second doorway. While galloping past one another at a lively pace, each time the hour strikes,

OF CLOCK IN CATHEDRAL AT WELLS.

striking King Henry VIII. of England, has the head at each stroke, while the figure at his side strike the quarters.

As regards great age, the peculiar old clock in the church at Rye, Sussex, England is also worthy of mention. It is perhaps one of the oldest still going in the world. It is said to be found in England. Tradition says that the clock was taken from a captured Spanish ship and presented

THIRD DIAL, IN THE NORTH FRONT, WELLS CATHEDRAL.

clock is still going. It strikes the hour on a great bell, located in a space below the clock, which requires daily winding.

On the north side of one tower stands a soldier, as shown in one of our illustrations, carved in wood and locally known as the "Jackman." This was only added in 1800. The uniform and helmet of the figure are of the period of Napoleon. In each hand this figure holds a hammer with which it strikes on the quarter bells placed on each side. The stern-looking warrior was probably placed in his lofty position to admonish the idle and thoughtless of the rapid flight of time, the instrument for the measurement of which he appears to have under his special care.

The famous old clock over the north entrance to the cathedral at Wells, Somersetshire, England, is said to be the oldest existing automatically striking clock with a locking plate. It originally belonged to Glastonbury Abbey, and was also made by Peter Lightfoot. When the monastery was abolished, it was transferred to its present location at Wells.

The above-mentioned clockmaker, Peter

QUARTER-STRIKING AUTOMATONS, CATHEDRAL OF NORWICH.

they at the same time fight with their lances. A short distance from the dial plate is a large figure in a sitting position, which, with its feet, strikes the quarter bells, and with hammers held in the hands rings the hour bell, placed at a suitable height. In local parlance this figure is known as "Jack Blandiver."

A second dial of this clock is located in the tower of the church; it is divided into twice 12 hours, and in addition also shows the phases of the moon. Above a third dial, that is also placed outside on the church, are likewise located two quarter bells that are rung by two men-at-arms in

"JACK BLANDIVER" IN WELLS CATHEDRAL.

town by Queen Elizabeth as their reward for the booty of the brave men of the town. Whether this story is true or not, the clock, with its two quarter "Jacks" and its two-seconds pendulum, the bob of which extends through the ceiling of the tower, is very interesting. The hours are

STRIKING AUTOMATON IN BLYTHBURGH CHURCH.

armor and helmet striking with battle axes, as though two wood cutters were engaged in lopping off the boughs of the constantly sprouting tree of time. These "quarter Jack" figures are set in motion by similar clock-work to that operating the figures

Rockford

AUTHORITIES are agreed that THE ROCKFORD is the best American-made watch. The watch of Quality—Efficiency. The choice of those who insist upon mechanical perfection. The manufacturers of the ROCKFORD WATCH co-operate with the legitimate retail jeweler to the fullest extent. They have eliminated the jobber and sell only direct to the retail jeweler. The ROCKFORD Watch Company neither sell nor manufacture under their own name or any other name for Mail Order, Catalog Houses or Department Stores.

Rockford Watch Co.
ROCKFORD
ILLINOIS

ly described, although the former are somewhat remote from the latter. In the cathedral at Norwich there is a masonry clock tower, which Bishop Lyhart had built in 1166. On this was located an old clock, which is supposed to have been finished in 1322 to 1325. The remaining portion of this clock are two grotesque clown figures, the subject of one of our illustrations, that were attached to the clock and did duty as striking hammers. They now stand on an pedestal in an arch of the southern porch of the church. The scarlet jackets and high collars of both figures are of a bright red, whereas the blue and white leather garments are widely distributed. Close fitting red stockings and hob-nailed shoes complete the peculiar costume. The helmet-shaped hats perched on their curly heads, impart to the two little

CLOCK TOWER AT LAUNCESTER.

are a truly comical appearance. The figures are about half a yard high. Between them is a cruciform bell stand, on the two arms of which the two quarter hammers are placed, which are struck by the figures by means of long-handled hammers, mounted on pivots, first turning toward the bells. Under the figure on the left side is the motto, "Send a good day to me"; under the figure on the right side is the motto, "The day to me is lost." The words are well known as an expression of Emperor Titus, which he was accustomed to use when he found that he had not made the day without any notable achievement.

In the village church of the Holy Trinity at Abingburgh a "Jack of the clock" stands on the south side of the chancel. The clock Jack is of great antiquity, but dates as to the time of his completion as being finished in 1470, when a certain Henry Fort gave £2 for placing a bell in the tower. To beautify this clock make no great claim, but it is of great value as an ecclesiastical relic. It is no longer in evidence; the left side of the figure, with the hammer that struck the bell, is also missing. On the right side of this figure stands a very old "pence" box.

It is true that most of these bell-towers are to be found in connection

with church clocks, but there are others also in existence that are not of ecclesiastical origin. A pair of this kind are located over a clock in Launcester. There were originally four of them, each about 12 inches high. Each of these four figures was mounted at the end of an iron rod and appeared every quarter of an hour under a eupola over the market hall. Only two of the figures now remain. The clock itself belonged to Col. R. Bennet, an officer in Cromwell's army.

In the old city of Salisbury, Wiltshire, England—the "Sarum" of the Romans—there may be seen in the St. Thomas Church also two figures, formerly connected with a clock, but long since removed. The old clock, of colossal dimensions, is said to have been built in 1750 by John Moore, London, and equipped with the two quarter Jacks. This old clock was replaced a few years ago by a new, eight-day timepiece, built by the English Clock Co, and presented to the church by a resident in the town. For the reinstatement of the quarter Jacks the funds were insufficient, and they will have to wait until some other "believer" undertakes their restoration, and, by expending the money, places the heavenly door-keeper, St. Peter, under an obligation to him and thus insures his entrance into Paradise.

A New Depthing Tool.

THIS tool differs from the ordinary depthing tool in that the parallel movement of the points take place, not about an axis, but in the same plane; this movement is effected by means of a screw, V, and is assured by four cylindrical rods working in conical sleeves. A graduated scale, R, and the divisions inscribed at the base of the screw-knot that operates the screw allows the determination of a dis-

DEPTHING TOOL WITH NOVEL FEATURES.

tance between the points of almost 100th of a millimeter.

Such is the very ingenious principle of this little apparatus, the idea and design of which is to be ascribed to M. Maurice Picard, of the firm of Henry Picard & Bro., at La Chaux de Fonds, while its construction was accomplished by M. Desailly. The inventors themselves recognized that the model submitted to the committee, constructed entirely by hand, necessarily involved slight defects, which mechanical construction would obviate.

These defects consist in the fact that the rods that guide the stocks are too short and the points too large. They should have a diameter, at the outside, of 1.5 mm., while that of the model is 2 mm.

It may be noted that one of the sides, that on the right, is much shorter than the other. This was made so intentionally in order that the depths could be examined directly from the end of the tool, as this should be, and not by inclining the magni-

fying glass toward the center, which does not allow of a correct estimate of the depthing.

This arrangement is not new; it has been applied to a depthing tool belonging to the museum of the School of Horology, at Geneva. It is a question whether the inventor of the tool we have described knew about it, but they may, in any event, rest satisfied with having introduced or reintroduced it because it has important advantages.

As with the micrometer, the measurement should be effected in closing the tool, not in opening it.

The tool is made of bell metal, an excellent material for hard and reliable work, inasmuch as it is not affected by changes in temperature or other influences.

The points or runners are locked in a triangular slide, and consequently insure to the tool the nicest precision.

A Daylight Saving Bill for Canada.

MR. LEWES, member of Parliament for West Huron in the Canadian House of Commons, has introduced a Daylight Saving Bill, which is receiving general endorsement throughout the country. A Daylight Committee has been formed in connection with the bill to procure the opinions of the Canadian peoples in reference to the same, and response has been prompt and generally favorable.

Lieut.-Col. Smith says: "We have had experience of the facility with which the public will comply with an arbitrary alteration of the clock made for convenience, as when the change was made from local sun time to standard railway time the difference was considerable in different parts of the country, yet no confusion resulted. The same may be said of the daily alteration of the clocks on board ship.

The resolution of the Hamilton jewelers was as follows:

Moved by George H. Lees, seconded by Norman Ellis:

Whereas, At the present time there is under consideration by the Canadian Parliament a measure known as "The Daylight Saving Bill," which seeks to put forward local standard time one hour during the period from the last day of April to the last day of October in each year, thus allowing more daylight for work and recreation, and a longer period of darkness for sleep; be it

Resolved, That this meeting of the watchmakers and jewelers of the City of Hamilton, assembled in annual meeting this 17th day of March, 1909, desire to place on record our approval of the said bill and recommend its adoption by the Canadian Parliament, and that a copy of this resolution be forwarded to E. N. Lewis, M.P., who has introduced the bill.

FRED. CLARINGBOWL,
Chairman of Committee.

Horological Notes.

A CLOCK is owned by Wm. N. Mansier, Abington, Conn., which was made in England, in 1725. The works are in good running order and the case is in excellent condition.

Four thousand dollars' worth of antique clocks and firearms of ancient pattern were destroyed in a fire that was caused by the sparks from a burning chimney in Amherst, N. H., recently. The clocks and firearms were the property of Henry Parkhurst and represented the collection of a lifetime.

How to Locate and Correct Errors in the Lever Escapement.

A Address Delivered by Charles T. Higginbotham, Consulting Superintendent of the South Bend Watch Co., Before the West Virginia Retail Jewelers' Association.

It affords me pleasure to address my fellow watchmen, and it affords me especial pleasure on this occasion, as I see before me so many of the older men, men who have had as much experience, if not more, than myself. I am sure you will fully appreciate the honor you confer on me by coming here to listen to what I have to say. I cannot hope to tell you anything new to you in the line of our business, the oldest, or at least one of the oldest, in the world, but if I shall succeed in presenting to you any of the facts in connection with the science or practice in a new light, or suggesting to you with the importance of any one of the number of facts already known, I will be amply repaid for my visit.

Have you ever thought when you have repaired a watch for a customer, and have guaranteed to him that it will not stop if wound up regularly, have you made a contract that must of necessity be violated 18,000 times every hour? Such a contract is a fact. To the casual observer a watch that runs with the idea of unceasing, uninterrupted motion is very far from being the case. The balance vibrates five times every second; this means it moves back and forth with a circular motion. In changing the direction of its motion it necessarily comes to a stop at some point; the time it takes is so brief that the human eye cannot see it just when it occurs, but nevertheless the fact exists that it does occur.

Escapement wheels are the mediums through which the power stored up in the mainspring is transmitted to the escapement, and by it to the balance. The impulse given by the escapement is transmitted to the balance through an arc of 80 degrees inasmuch as the average arc of the balance may be fairly estimated at 390 degrees it follows that this impulse is delivered through an arc of its arc of vibration. It also follows that such as the balance has attained its maximum velocity when this impulse is delivered a shorter time than 1/18th is taken up. Under these conditions it is fair to assume that the average during which the wheels of the watch, in the balance, deliver their impulse in one hour is 24. It will thus be seen that the motion of the wheels are intermittent. The regularity with which these impulses are delivered depends on the timekeeping of a watch. This is isochronism in its true sense, and the isochronal vibrations of the balance are so easily affected by errors in the construction that the importance of having it perform its function correctly can hardly be overestimated.

There are certain laws which are common to the motion of a balance and the oscillations of a pendulum. The time occupied by a single oscillation of a pendulum, be it through an arc of 10 degrees or a much larger arc are practically the same. It is not affected by the weight of the pendulum, but is solely dependent upon the distance between the point of suspension and a point directly under the center of oscillation. The time occupied by the vibration of a balance is dependent upon the strength of the hairspring and the weight of the balance. The force which, in addition to the impulse delivered by the escape wheel, tends to retard the pendulum in its oscillation is gravity, the force which maintains the vibration of a pendulum is the tension of a hairspring, gravity has no effect upon balance in this respect. At a point, or rather circle, in the balance where all its weight were concentrated it would take the same time. This is called the center of gyration and corresponds to a certain point in its effect as does the center of oscillation of a pendulum.

By changing the time of the oscillations of a pendulum by simply changing the center of oscillation, and we may change the time of the vibration of a balance by changing the radius of gyration. When we move a mean-time screw in or out we change the time of the vibration, but we do not change the weight of the balance, but we do change the weight of the balance, we simply change that is, lengthen or shorten the radius of gyration. To retard or check the motion of a pendulum in its oscillation while it is receiving from the point of rest we accelerate the time of the

clock. If we retard or check its motion while approaching the point of rest we accelerate the time. Precisely the same effect is produced in a balance, hence any defects in the escapement which produces either one of these conditions will materially effect isochronism.

EXAMINING AN ESCAPEMENT.

There are certain functions of the escapement which cannot be seen when it is in action, viz., the action of the roller, roller jewel and fork slot. These, however, may be readily determined by the sense of touch.

Let us assume that the individual parts have been carefully inspected and are free from defects. Bring the roller jewel in exact line between the center of the balance and the pallet arbor pivot. Holding it in this position with a pair of light tweezers, try the shake of the fork on the jewel pin. For a 16 or 18 size watch it should be little less than 1/1000 of an inch. To determine whether the roller is true, try the shake between its edge, the guard pin and the banking pin. To do this move the balance so that different parts of the roller shall be presented. If not equal all round it indicates a roller out of true, the only remedy for which is a new one.

To determine whether the roller pin is in proper position proceed as follows. Move the balance slowly until the escape wheel is released by one stone and arrested by the other. At this instant the roller pin should be embraced by the fork slot. For this purpose use a light pair of tweezers. If the shake is exactly the same as when the roller pin was on the line of center it is evidence that it is far enough to the front. Now, move the balance very slightly, allowing the pallet stone to slide a slight amount down over the locking face of the escape wheel tooth. In this position the roller jewel should pass freely out of the fork slot. If it does not do so it is an evidence that the roller pin is too far forward. The remedy for either of the above cases is obvious.

The action of the guard pin is purely for safety; its proper location may be determined as follows: While rotating the balance toward its point of rest press the fork so that the guard pin shall contact with the roller edge. This pressure may be done with the pivot broach. If the escapement unlocks or the end of the fork horn contacts with the jewel pin the guard pin is too far back. If it is necessary to open the banking beyond the point affording the necessary slide on the pallet stone the guard pin is too far forward. In the former case the guard pin may be removed, the hole broached out and a larger one substituted. In the latter case the front of the guard pin may be dressed off. It is a bad plan to try to remedy these defects by bending the guard pin out of upright. The above applies to the single roller escapement. In the double roller escapement the guardpiece, or dart, may be stretched or reduced in length, as the case requires.

LOCK AND SLIDE.

These terms are often confounded. Lock is the distance between the locking corner of the pallet stone and the locking corner of the escape wheel tooth at the instant of drop. Slide is the distance from this point to the point it reaches when the edge of the fork contacts with the banking pin. Opening or closing the bankings will alter the slide, but will have no effect upon the lock.

TO DETERMINE THE LOCKING.

The proper amount of locking for a 16 or 18 size watch is about 1/1000 of an inch, the proper amount of slides the same, so that both combined should be about 2/1000.

When the lock is not correct it may be changed by drawing out or pushing in one or both stones; drawing out a stone increases the lock on both stones, and pushing in has the opposite effect. In moving a stone, however, judgment should be exercised, for the reason that a stone cannot be moved in or out without producing at least three different results, thus drawing out the receiving stone increases the lock on both stones, increases the drop on the discharging stone and increases the draft on the discharging stone.

Drawing out the discharging stone increases the lock on both stones, decreases the drop on the receiving stone and decreases the draft on the re-

ceiving stone. The draft is the most important of the two-drop and draft. If the draft is not sufficient it will fail to hold the fork against the banking pin with sufficient force to prevent its recoil against the roller edge. If too strong it imposes unnecessary work upon the balance. The balance in unlocking the escapement is obliged to force the escape wheel backwards against the power of the mainspring. This it does under most unfavorable conditions, for the reason that being now at its highest velocity it has to accomplish this by the force of a blow, thus converting a great portion of its force into heat, a manifest loss of power.

ADJUSTING THE LET-OFF.

Adjusting the let-off or putting the escapement in angle is bringing it into that condition where the escape and pallet action takes place in the proper relation to the fork and roller action. This is to say, that when the proper lock and slide have been secured the fork will rest against the banking and its shake on the edge of the roller be correct. When this condition does not exist it may be secured by bending the fork, or when the fork and pallets are separate pieces changing their relation to each other.

(Mr. Higginbotham's address was fully demonstrated and explained in its various points by a large working model of an escapement, and also by diagrams.)

Cannon Balls Used as Clock Weights.

TO a London magazine we are indebted for the illustration herewith showing cannon balls used as clock weights, which form part of an extraordinary timepiece of the old clock of the Church of St. George Ascher.

This clock, which is one of the ancient timepieces of England, is more than 300

CANNON-BALLS AS CLOCK-WEIGHTS; PARTS OF AN EXTRAORDINARY TIMEPIECE.

years old and was recently restarted after having been silent for about 30 years. The cannon balls which form its weights are still in use.

Recent Reappraisements of Watches.

RECENT reappraisements of merchandise made by the Board of United States General Appraisers, of interest to the trade, include the following:

WATCHES.—From Achille Hirsch & Fils, Chaus de Fonds, exported April 5, 1909, entered at New York (File No. 41352, Invoice No. 21962); Findings of Board No. 3: Prices as published in reappraisal No. 15017, May 5, 1909. Entered value sustained.

Arthur A. Everts, Dallas, Tex., has taken a five-year lease of the building at the corner of Main and Murphy Sts., which will be renovated and improved for the accommodation of his business. Work will be begun about July 1, at which time the lease begins.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

A German Device Designed to Protect Storekeepers Against Burglars.

THE subject of "safety from burglary" is an inexhaustible one, nor can too much be urged in this respect, for every day the number of robberies and burglaries in jewelry stores are increasing, and with the ingenuity of international organizations of thieves, one is not sure of his own for a moment. The *Journal der Goldschmiedekunst*, recognizing this fact, has endeavored by instituting a competition, to develop practical protective precautionary devices, and the idea has been heartily approved by

nosing of the door latch, the slightest pressure on the latch causing the alarm bell to work.

The entire device, shown in Figs. 1, 2 and 3, consists of two strips of sheet metal, screwed side by side to a small piece of hardwood, one of which consists of thin, about 1/4 millimeter thick, clock spring steel plate, 5 to 6 millimeters broad, to one end of which a piece of German silver, about 13 millimeters long and broad, is secured by means of soft solder, as may be seen at a

FIG. 1.

FIG. 2.

FIG. 3.

FIG. 4.

FIG. 5.

other papers of our branch in different countries. But effective protection can be insured only by international co-operation, by the jewelers of all countries combining against attacks on the property in jewelry stores, and above all, with the assistance of the authorities.

In the current number we desire to present to our readers two practical safeguards for store doors and show window shutters, arrangements furnished by practical men to the above paper for general publication.

A very simple and practical alarm device is that constructed by Friederich Friese, jeweler, of Osnabrück (Heinrich strasse No. 13), who will supply it, at a low price (less than a dollar). This protector is installed on the outer door jamb, behind the

in Fig. 2. The strip of German silver about 5 to 6 millimeters broad and 1/2 millimeter thick, set opposite it, at a distance of 2 to 2 1/2 millimeters, is simply screwed fast to the wood (see Fig. 2). The steel spring must then be so bent that when at rest it catches, with some force, under the German silver strip.

This entire construction is let into the wood of the outer door post, behind the nosing plate, at such a depth that the steel spring (clock spring) is forced back by the bolt of the door latch, 1 1/2 or at most 3 millimeters. The least pressure on the door latch causes the spring to press back against the German silver strip and closes the circuit for the operation of the alarm bell. A switch that may be, for instance, located in the sleeping apartment, where the

owner lives in the same house (see 3b), enables the device to be thrown in operation during the day time. On account of its simplicity, cheapness and efficiency this safety apparatus is to be highly recommended. Where an electric bell circuit ready exists, the apparatus only requires switching in; in length it must be adjusted to the height of the bolt of the door.

Another novelty, protected by German patent, has been constructed by Hermann Eberswalde, Neue Kreuzstrasse 7, Germany, and is called by him, "Combination with electric light and alarm device."

The so-called locking bolt is in the

construction, as the illustration shows, at such a height that even if a roll of material is cut through, the entrance of the burglar into the store is made impossible, inasmuch as the locking bolt itself, screwed into the side of the store by a setting rod, can be pushed back from outside. The bolt is adjustable and can be set high or low by means of the setting rod; as a result the bolt always locks tight, no matter how the rolling shutter be swelled by rain or by heat. At the same time the device prevents the shutter from dropping down should the hoisting strap break, or in case of some defect. The electric alarm device is so well adjusted that the bell rings if an attempt is made to raise the shutter one or two centimeters to cut through it, or even to force

Storekeeping Department.

At the same time, the electric light is turned on, illuminating the interior of the store. On opening the shutter from outside is visible. The whole apparatus is plainly shown in Figs. 4 and 5.

With regard to both devices, the inventors are pleased to furnish any further particulars desired.

Improvements in Arc Lamps Mark a Great Advance.

WHEN the arc light first was introduced it was an open lamp, giving a light of high candle-power, but its brilliant rays were confined to a completely narrow circle beneath the lamp. The light was unsteady. An enclosed lamp is now used with the advantages of brightness and superior distribution. The light is softened when desired by the use of a glass shade and the distribution improved by a diffuser placed above the lamp.

The lower shade is of specially manufactured glass, while the diffuser is of polished metal. The lamps are designed for either low or high currents. For illuminating an interior with high ceiling the high current lamp is preferable. The low current lamp is used under low ceilings where a small unit is needed.

It must be borne in mind in planning the lighting of an interior that the light varies with the dimensions, the height and color of the ceiling, the color of the walls, the number of obstructions in the room, the area to be illuminated, and the nature of the stock, whether light or dark.—*New York Sun*.

Uniform Shopping Methods.

By XENO W. PUTNAM.

All goods handled in the jewelry store the quickest selling line is that which caters to the special demands of a particular trade or season, the transient trade to be taken advantage of, must be liquidated as it passes.

Season goods, however, whether brought in by some fad or an event, or by the procession of the months, entail a certain amount of unavoidable loss peculiar to themselves and depending for its origin and remedy largely on the special form or condition which they demand. It is a part of the retailer's duty not only to himself but to his customers to do all in his power to prevent these losses; otherwise he will be either cut out entirely a line which is in constant demand, for the time being by his customers, or else sell it at a loss to himself or at a price to himself which will speedily make his place in business unpopular.

These things are more important in the handling of season goods than the regularity of their shipment to which the regularity of their shipment from the jobber can be depended upon. The wholesaling house may not always be the most prompt in its shipping methods. It is its dependability that counts. Once its methods are understood,

it is more satisfactory to deal with a house that never fills a general order sooner than 10 days from its receipt and that never fails to fill it on the 10th day, than it is to buy of one that fills one order within 24 hours and the next in perhaps 24 days.

Of the first house the retailer can order 10 days in advance and then forget the matter entirely for the intervening nine, tranquil in the assurance that the order will certainly be filled on the 10th day. Of the second he can order with the double uncertainty that the goods may not be there for a week or two after they are wanted and that they are about equally liable to come in before they can be used, and so occupy a place in the dead stock department.

The Store of D. S. Park & Co., Cheyenne, Wyoming.

THE store of D. S. Park & Co., Cheyenne, Wyo., has many attractive features.

The store is 27 feet wide by 67 feet long. The fixtures are of mahogany and plate glass, with mirror shelves and backs in the wall cases for cut glass. The show windows are 12 feet wide, eight feet high and four feet deep, and are lighted by three 65-candle-power Tungsten lamps. The store is illuminated by means of five dozen 65-candle-power Tungsten lamps.

The store uses one of the large-size Burroughs adding machines for keeping a

A VIEW OF THE STORE OF D. S. PARK & CO., CHEYENNE, WYO.

record of the cost price as well as the selling price of the stock.

ment until the first burst of enthusiasm which every true salesman feels for a new offering loses a little of its freshness, and a few extra items of expense are checked against them.

Occasionally a jobbing house, with more consideration for its customers than some of them acknowledge, refuses to ship a general order until a certain number of days have elapsed, no matter how slack the season with them, because they wish to maintain a certain amount of margin sufficient for all seasons and to follow that rule with sufficient uniformity to establish a fixed method in the minds of their customers. When such a house is found, if the shipping route is anything like direct, it is the remedy of all others for the retailer to buy at least all of his season goods of such a jobber. Even a slightly higher price should not deter him; the uniformity of service is worth it, and a few sales lost, a few disappointed customers, will soon make the lower prices of the spasmodic jobber the more costly.

The jobbing house which adopts such a uniform shipping method certainly deserves well of the retail trade, for it does well by them and is entitled to their cordial support.

record of the cost price as well as the selling price of the stock.

The Modern Problem.

By XENO W. PUTNAM, in the *Book-keeper*.

Oh, the old-fashioned ledgers are useful no more;
But, dusty and grim, they rest.
While the bookkeeper delves into systems galore,
And wonders which is the best.

And he sometimes longs, e'er his task is done,
While he cudgels his brain to choose,
For the good old days when there was but one,
And he always knew which to use.

A show window exhibit at the store of the Mermod, Jaccard & King Jewelry Co., St. Louis, Mo., consisting of a group of clock dials, showing the time at St. Louis, Washington, San Francisco, Manila, Peking, Tokio, Mexico City, Paris, Berlin and London, is attracting a great deal of attention.

The Meyer & Schamber Jewelry Co., Meridian, Miss., recently distributed a most attractive series of post cards as souvenirs at Horn Island when the silver service was presented to the battleship *Mississippi*. A souvenir was also given to each person who called to see the service while it was displayed in the company's store.

BUSINESS ESTABLISHED 1818

Seldom is any other cut glass offered for sale without a tribute to the supremacy of Libbey.

The salesman with something else to offer almost inevitably speaks of it in comparison with Libbey.

The dealer who sells Libbey sells that which stands alone. It is literally the world's best.

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of May 19.)

BIBINO (It.). An art term used to its depictions of the infant Saviour and as an Italian babe with swaddling held by ligatures. They are found in altar pictures surrounded by a with a group of attendant angels.

BAND. In heraldry, "the fillet or bandage such a garb, arrows, etc., are bound er."—Robson.

BÉ (Fr.). "A term for *bend*, and the *bend dexter*."—Robson.

BEAU, garland or wreath. "Crests or implied to be placed upon wreaths or particularly expressed to be borne cap or chapeau, or issuant out of a All wreaths upon which crests

BANDEAUS, OR WREATHS.

ced should show only six folds in three of metal and three of color, ably beginning with the metal. The upon which the crest is usually nps composed of two bands of silk, roven or twisted together, the one ed of the principal metal and the f the principal color in the arms."—

BANDEROLE. (See *banderolle*.)

BANDEROLLE, or *bannerolle*. "A flat band containing an inscription, used in ornamental buildings of the time of the Renaissance and similar to those still used for to coats-of-arms. A banner or usually about a yard square, several which were carried at the funerals of at."—Fairholt. In heraldry a *banner* is a "streamer, or small flag, affixed to a staff or strings, immediately under the top of the top of the staff of a crozier, hanging over the staff."—Clark.

BARS. In architecture, "small strings

PERSIAN BAND.

shafts, or a horizontal line of square, or other panels used to ornament

towers, spires and other works."—Mollett. The zones or belts marked off around ornaments on vases, etc., are known as *bands*, and the objects as *banded*.

BANNER. In heraldry the banner is larger than a pennon (to which refer). The *entire surface* is charged with the owner's coat-of-arms precisely as blazoned on a shield. The "Union Jack" is thus a banner. In common usage the term *banner* is applied to every kind of flag "proper," to individuals, corporations, etc. In Roman Catholic countries *banners* bearing representations of patron saints or religious symbols are used.

BANNER CLOTH. An ecclesiastical term for a processional flag.

BANKO WARE. A Japanese ware made of tough and plastic brown clay. Named after its inventor. Made in the province of Ise. It resembles Wedgwood. Designed in all sorts of fantastic forms, and decorated by painting in opaque enamels. Some of it is light in color and some is mottled by mixing of the two colors.

This ware was first made by Banko Kichibei (1652 to 1660) at Koume-Mura, Japan. It rather resembles Satsuma, and is now called *Yeddo-Banko*.

BANKS & TURNER. The pottery at Stoke-upon-Trent belonging to this concern was acquired by Josiah Spode, 1750.

BANNERET. An order of knighthood.

BAPTISTERY. A name given to a building adjoining a *basilica* (to which refer), or situated near it, in which baptism was administered. Some of the finest gold and silver smiths' work is found in the old baptisteries of southern Europe.

BAR. In heraldry the *bar* is a horizontal band across a shield. It is "less than the *fess*" (to which refer), "and is a diminu-

BAR.

tion, containing a fifth of the *field*, and is borne in several parts of the *field*, whereas the *fess* is confined to the center."—Clark.

BARBATINA (It.). "A preparation of clay mixed with the shavings of woolen cloth, used in the manufactory of pottery to attach the handles and other molder ornaments."—Fortnum. (See *barbotine*.)

BARBEAUX. In ceramics, "this name is given to a decoration of scattered cornflowers over a portion or all of the piece, giving a fresh and pleasing appearance, and is often employed on French china, notably on that of La Courtille. At Sceaux, Epinal and other factories it was also used on *faïence*."—Jervis.

BARBED, or *barbée*. A cross so termed, as its extremities are like the barbed irons used for striking fish. Called also *eramponée* and *tournée*. "The green leaves or

BARBED CROSS.

petals which appear on the outside of a full-blown rose are, in heraldry, called *barbs*, and are thus *blazoned*: a rose, gu.,

BARBED ROSE.

barbed and seeded proper."—Clark. (See *rose*.)

BARBIER (Fr.). Goldsmith to Louis XI.

BARBIN, François. Founder of the Menecy-Villeroy soft porcelain factory, 1735.

BARBITON. A stringed instrument used by the ancient Greeks and Romans, but of far earlier origin; it was larger than the

BARBITON.

cithara (to which refer). Its shape had similarity to a lyre. The lyre of Apollo was a *barbiton*.

BARBITOS. (See *barbiton*.)

BARBIZET. The Paris ceramist who most faithfully reproduced Pallissy's creations.

BARBOTINE. The very liquid soft paste

BARKER. Eminent painter at the Worces- rks. His subjects were shells chiefly. **BARBÉ, Antonio-Maria.** Noted gem r. Born 1720 in Florence. Pupil of ni.

BATES, Zachariah (1743-1820). Owner a iverpool Delft factory.

BAUQUE. "Ornamental design of a florid incongruous character, produced for ke of lavish effect. See *rococo*."— irt It is often used as a term for a

BAROQUE. STYLE ABOUT 1700.

se rate style. The *baroque* period V. and XVIII. centuries) followed the sance. It threw aside all the severity th latter style, often tending toward the ty of grotesqueness. Pearls of a eed shape are also called *baroque*.

BARR & BARR. (See Worcester.)

BARR, FLIGHT & BARR. (See Worcester.)

BARRED, or barde, in heraldry, denotes horizontal stripes across a shield.

BARRY. In heraldry, "a transverse divi- sion of the shield into several equal parti- tions *barways*, of two or more *tinctures* in- terchangeably disposed; termed *barry* of

BARRY

six, eight, 10 or 12 pieces, it being necessary to specify the number, which must always be even, for if odd the shield would then be charged with *bars* and not divided *barways*."—Robson.

BARRY-BENDY, in heraldry, denotes the division of a *field* by crossing lines *bar-wise* (to which refer) and *bend-wise* (to which refer).

Barry-bendy "is a *field* divided into four, six or more equal parts by lines, from the *dexter chief* to the *sinister base* and from

BARRY-BENDY.

side to side exchangeably varying the *tinctures*" (see *dexter, chief, sinister, base, tincture*).—Clark.

BARRY-BENDY SINISTER. Sometimes termed

BARRY-BENDY SINISTER.

barry indented."—Clark.

BARRY INDENTED. "When the lines cross- ing the *field barways* are *indented* (see *indented*). The accompanying engraving

BARRY INDENTED.

shows a *barry* of six, argent and sable *in- dented*, one on the other.

BARRY-PILY. (See *pily*.)

BARRY-PILY.

"**BAR SINISTER.**" "An heraldic impossibility. The expression is frequently used by those ignorant of heraldic terms to signify illegitimacy. The correct expression is *baton*, which is the diminutive of the *bend sinister* (to which refer), *couped* at its extremities (*i.e.*, not extending to the edge of the shield)."—Milbourne.

BARTHOLDI, Giovanni. Goldsmith of Sienna. He worked on the reliquary of St. Peter and St. Paul (1369).

BARTLEM. A Staffordshire potter of this name came to South Carolina in 1766. He started a pottery, but it was a failure.

BARTMAN. Those "big-bellied" XVII. century jugs known as *bellarmins*, with small necks decorated as heads, and with

BARTRAM. SIEGBURG WARE.

long flowing beards, had their counterparts in the *bartmans* of German stone ware.

BAR-WISE. In heraldry *bar-wise* denotes the displaying of the surface in *bars* (to which refer).

BARTOLUCCI, Giuseppe, and Francesco di Fattori. "They established a factory at Pesaro, Italy, but it only had a short existence."—Jervis.

BASALT (basalte). Solid black stone ware, very dense and very hard, enabling it to take a high polish. "Egyptian black." An exceedingly hard stone used at times in statuary. There is a black and a green basalt. Ancient Egyptian and Greek sculp- tors used it, and there are examples of such work still extant.

BASANITE, commonly known as "touch- stone," and also as Lydian stone. It is used in testing the purity of metals, for which purpose its black color, hardness and peculiar grain adapts it. Gold alloys show up their different proportions with different colors when rubbed with this stone and thereby show what degree of fineness they possess. *Basanite* is a black variety of crystalline quartz (and therefore oxide of silicon), differing from jasper in being tougher and of finer grain, and from hornstone in not being splintery. Hard- ness, 7; specific gravity, about 2.65; con- choidal fracture; infusible before the blow- pipe; insoluble in common acids.

(To be continued.)

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page. Attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2273.—Polish for Nickel Show Cases.—What could I use to polish the nickel on show cases.

P. N.

ANSWER:—A good polishing powder for show cases is rock alum burned and finely powdered, 5 parts; levigated part. Mix and apply with a brush.

QUESTION No. 2274.—Etching a Sword.—The design is to be etched on a blade. What kind of acid must I use.

E. S.

ANSWER:—The part of the sword where the design is to be etched is covered with resist, usually wax or asphaltum and the design is traced through the resist carefully removed where the design is to show. When the resist is completely dried do the etching with chromic acid gas. This gas is produced by heating C.P. sulphuric acid and common salt. The resist is removed by immersing the sword in water until the wax or asphaltum is dissolved. Sometimes the sword blades are silver plated. If so, then the etching should be nitric acid, diluted with water.

QUESTION No. 2275.—Replacing Broken Mainspring.—In replacing a broken mainspring in a watch is it possible to select from among a number of springs the one less liable to break than some others.

ANSWER:—Broken mainsprings are perhaps the most serious and the most common breakages. What causes springs to break has as yet not been satisfactorily explained; but probably peculiar variations in temperature when springs are on a watch of tension are the chief cause, and it is usual to find that a large number of springs break at the same time. The breakage is often accompanied by some other part of the watch material dealers often find that a number of springs are broken in a watch package where a dozen or less are packed in brass rings in a strained condition. Such things happen also more frequently in a tropical climate. A broken mainspring may be repaired or at least used until the breakage has occurred near to the other end, and the length of the spring is shortened by the piece broken off. It is then only necessary to soften the extreme end of the spring and punch a hole to fit the hook in the barrel in another arrangement for attaching the spring on the inside of it. In selecting a new spring for a broken one always select one of a reputable manufacture and let it throughout with the utmost care. Finally, select one as nearly as possible

of the same strength as the old one, and of course of the same width. Put the new spring in the barrel and notice its length and how much space it occupies. The space of the arbor in the center of the empty space of the barrel should occupy one-third of its diameter, and the remaining space should be equally divided and one-half should be occupied by the spring when at rest. On the supposition that the old spring was correct for strength, it should always be replaced with one as much like it as possible. If the spring occupies more than one-half the space, take it out with extreme care and break off a piece till the proper length is obtained. Next heat half an inch of the end, not quite red hot, and punch a hole about three-eighths of an inch from the end; taper it off towards the extreme, leaving it full width where the hole is. You will have very little trouble in making the hole large enough for the hook in the barrel. Suppose you must replace a broken spring, which is not the proper width and strength for the barrel it occupied, and consequently not the proper thing for the watch. The first consideration is its width. It should reach from the bottom of the barrel barely to the groove, excepting when the barrel cover is hollowed out, when it may reach the center of the groove to some extent. The next point is its strength. This may best be determined by the number of coils it occupies in the barrel; this number should never be more than thirteen when these occupy the empty space of one-third of the barrel.

QUESTION No. 2276.—Soft Solder for Cheap Jewelry Repairs.—How can I make a soft solder suitable for soldering on cheap jewelry repairs? I want it soft enough so I can solder and not heat enough to destroy the polishing or finish of the jewelry.

S. S.

ANSWER:—A very good soft solder, suitable for cheap jewelry repairs, is composed of 16 ozs. of tin and 11 ozs. of lead. Melt together and hammer or roll out and cut into strips. If too hard add 2 ozs. quick-silver.

QUESTION No. 2277.—Cement for Fastening Nail Files into Handles.—Please give me a good cement which I can use for fastening nail files, button hooks and different steel articles into silver handles.

C. F. F.

ANSWER:—In fastening steel shanks into silver or any metal handles the shank should be roughened by filing several notches in order to give the cement a chance to bury itself and assist in holding it firmly. Make a cement by melting gum shellac and, while liquid, stir into it finely

powdered brick-dust. The proportion should be about 1 part brick-dust to 10 parts shellac. Put some of this cement into the handle, just enough so that the cavity will be well filled when the shank of the file is inserted. Warm the file shank and push it into its proper place. Let cool and the parts will hold together very well. The shank must be warmed enough to melt the shellac cement in the handle and this will cause the cement to adhere closely. Any surplus running over can be cleaned off when cold. The cement can be set aside for future use.

QUESTION No. 2278.—Polish and Gray Finish on Brass.—Please give me a good formula for producing a brass polish; also one for producing a gray finish on brass.

P. B.

ANSWER:—A good brass polish is made by using 2 qts. of distilled water, 3 ozs. of powdered rottenstone, 2 ozs. of powdered pumice, and 4 ozs. of oxalic acid. This should be allowed to stand for a few days and shaken well before using. A gray finish is produced on brass by first thoroughly cleaning the pieces, and then immersing in a solution of 1 oz. of arsenic chloride to 1 pt. of distilled water until the desired shade is obtained. Wash in clean warm water, dry in sawdust and place in a warm place. To retain the color, lacquer and dry in a warm place.

QUESTION No. 2279.—Platinizing Silver.—How can I platinize some small pieces of silver?

P. S.

ANSWER:—Silver can be platinized by making a solution as follows: Cut up into fine pieces some platinum, pour over a small quantity of aqua-regia and keep in a warm place a few days, during which time the platinum will dissolve. Next evaporate to the consistency of honey, by using a gentle heat, which will rid it of most of the acids. Add a little water and it will be ready for use. The operation is performed in a small glass or heater, covered with a watch glass to keep in the fumes. The receptacle is placed in a little sand in a saucer to equalize the heat. Immerse the silver until covered, then rinse in water and dry.

QUESTION No. 2280.—Re-bronzing Metal Statues.—Please give me a formula for re-bronzing repaired metal statues and vases.

R. M.

ANSWER:—To re-bronze metal vases or statuary after repairing it is best to make use of bronze powders, which may be prepared and mixed to obtain any shade or color. To make the bronze powder adhere closely it is well to paint the piece over first with a mercury dip, or size. The mercury dip is prepared by using a cyanide dip. Use about one-half pound cyanide dissolved in one gallon of water, then add from one-half to one ounce of corrosive sublimate. The article to be bronzed is brushed over with this dip, rinsed in water and dried with a cloth. The piece is now ready to be painted over with the bronze powder, which is prepared into a paint by mixing it with alcohol. There are various bronze powders—gold, green, silver, aluminium—and any of these can be used. Many statues are finished in a green gold tone, which is produced by mixing green and gold bronze powders together, and a suitable color can be secured likewise for green silver. A coat of lacquer will help the appearance.

HUDSON TERMINAL BUILDINGS

 KNOWN THE WORLD OVER

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal — plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag — *the blades are fine*. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray — contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

Write us for full information. Get our suggestions on popular assortment. Talk to your jobber about it.

Cleveland, Ohio.

GENTLEMEN:—Owing to extreme weather conditions, our holiday business was not quite up to our buying expectations, but through your Catalog we were enabled to record the best holiday business we ever had.

Count us in on the 1909 Catalog.

Yours very respectfully,
A. G. HOCH & Co.

The Catalogs sent out by this firm since 1903 were made by The Arnstine Bros. Company.

BAKERSFIELD, Cal., March 8, '09.
 ARNSTINE BROS. COMPANY,
 Cleveland, Ohio:
 Gentlemen—Regarding results of your 148-page Catalogs, of which you made 5,000 for us, we are glad to report as follows: Six years ago we used your Catalogs and though we were inexperienced in the needs of the jewelry business, we increased our business materially. In the year of our Catalogs doubled our business, and in the year following we netted us about the same increase. This year just past we used a book, as you suggested, and nearly three times the amount of our first book. We expected a big increase but were not disappointed, for, by using our books, we find an increase of sixty per cent. increase over the previous year. Our business has grown immensely and we feel that our steady hold on the market is attributable only to the general use of the catalogs. Your book has been put into use in the city and within a radius of fifty miles, also in various parts of the United States, Mexico and other countries. The returns have been very gratifying as we have received over \$500.00 of our mail orders amounting to \$500.00. We have many new ideas to incorporate in our new book, and we shall be glad to have Mr. Arnstine call early to complete our arrangements. We are hoping you continued success, and are yours for a still larger business.

Precious Stones == THEIR DEFINITION ANALYZATION AND ORIGIN

The Turquoise—Turquoise Matrix

TURQUOISE is a hard gem stone of no transparency but slightly translucent. It originally acquired its name from being transported into Europe by way of Turkey, and years ago, before the gem mines of the United States were discovered, the better qualities came from Nishapur in Persia where the gems usually are found in a clay-slate. However, the best specimens of Turquoise which are offered to the public of to-day come from the mines of the HIMALAYA MINING COMPANY at MILLERS, NEVADA. These occur in a wonderful range of shades of blue, from the light baby blue to the deep shades of the so-called "Persian," in the clear Turquoise. THE MATRIX of this gem stone from these mines occurs in beautiful gold or black veined markings of wonderful diversity and variations, from the decisive striped vein to the spider-webbed markings. There is a peculiar quality in the color of the finest Turquoise which partly is dependent upon the delicate hue of its blue and with which at times a slight infusion of green is mingled.

The Turquoise never occurs in crystallized form but is found in mass or pockets and has no cleavage. Chemically, Turquoise is a phosphate and hydrate of alumina, associated with a hydrate phosphate of copper and always contains small quantities of phosphate of iron and manganese. This beautiful stone should especially commend itself to the Manufacturing Jewelers as it is a gem of great merit, suitably adapted to the craft of the jewelers' art and should appeal to them as a valuable asset in the construction of artistic jewelry.

Turquoise has been found in Persia, Egypt, Arizona, Mexico and California; but the fine gems of recent times, as shown by statistics, come from the mines of the HIMALAYA MINING COMPANY at MILLERS, NEVADA.

TURQUOISE MATRIX is at present in great demand. The finest qualities have **M** engraved on the back of each stone, showing them to be genuine HIMALAYA TURQUOISE MATRIX.

CHEMICAL COMPOSITION:

Phosphorus pentoxide	32.8
Alumina	40.2
Water	19.2
Copper Oxide	5.3
Iron and Manganese Oxides	2.5
Hardness	6.
Specific Gravity	2.75
Form	Amorphous

This gem can always be distinguished from imitations. The true Turquoise which shows various hues and tones of blue—greenish blue and bluish green—is not to be confounded with or mistaken for the blue fossil Turquoise, which is in fact, fossil bone. The genuine Turquoise, when in powder form, becomes dark blue when moistened with ammonia. Most Turquoise becomes green from age or wear, which is due to the softer qualities of the stone, but the fine material of the HIMALAYA PRODUCT rarely, if ever, changes color and is for this reason most popular and in greatest demand.

FACTS
FICTION
AND
ROMANCING

¶ Of all writings, fiction is the easiest. In the United States alone thousands of new books of fiction are published annually—books dealing with substantial facts, however, are relatively few.

¶ We have been told that in our Exhibition Announcements, relating to our Diamond Jewelry, we are given to "harping upon the same string." So may it be, but our critic thoughtfully adds—"of course it is hard to clothe the same facts with new words every week"—it is.

¶ Were we given to romancing, the task would be simplicity itself. If we delight in repetition, it is because our first public announcement of years ago was a statement of facts—and succeeding years have not altered them.

¶ Remember our SEVENTH ANNUAL EXHIBITION, which takes place in our offices from August 30th to September 4th, inclusive. Sautoirs of all descriptions will be one of the prominent features in this display.

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezer over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped firmer and better than by any other kind of stone tweezer.
Second. It is purposely made a "Bayonet" in shape because any stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, easier, quicker, and with much less exertion than when using any other style of tweezer.
It has an extra part directly above the crossing points to permit the holder to examine the stone without fear of releasing it accidentally, which frequently occurs when using the ordinary style crossing tweezer.

3. One adjustable hollow spindle for holding the above disc wheels.
4. Eight different grade emery paper discs, 2 1/4" in diameter.
5. Four carborundum paper discs of different grades, 2 1/4" in diameter.
6. Eight different grade emery paper discs 4" in diameter.
7. Four carborundum paper discs of different grades, 4" in diameter.
8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete.....\$1.50
 Separate small emery discs.....per doz. .15
 " large " " " " " " .20
 " small carborundum discs " " " .20
 " large " " " " " " .35

This new grinding device should find favor with the trade, being thoroughly practical and complete for all purposes, such as grinding steel tools, glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the watchmaker, jeweler, optician, dentist, lock or gunsmith, platers and kindred trades. It will be found much more economical than solid emery and carborundum wheels. An assortment of solid wheels of twelve different grits would necessitate an outlay of ten times the cost of this outfit, not taking into consideration the trouble of trueing up the wheels when worn or glazed.

Full description and directions accompany each outfit.

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, each, \$1.50

For Sale by all Jobbers in the United States and Canada.

ECHARCO WATCH GLASS CABINET No. 15 (Patented)

Top View, Show Skeleton Frame Drawer. Accumulator of dust and chips impossible.

The Most Modern Watch Glass Cases the Echarco, Nos. 15 & 20.

These Cabinets have many new features found in any other. Novelty and usefulness the chief arguments in their favor.

Construction and Material.—The cases are made of oak, finely finished of attractive appearance. The sides of Cabinet No. 15 are paneled. Partitions are of basswood and together in the best manner possible.

Price, No. 15, Each \$16.

Partitions are skeleton, preventing accumulation of dust, chips, etc.
 The Bottoms of Cabinet No. 15 are hollow, while Case No. 20 has special drawer to receive chips, dust, etc.
 Arrangement for Glasses.—Case No. 15 has nine drawers with a total 1,547 spaces, and Case No. 20 with four drawers has 784 spaces, to hold glasses in upright position.
 Labeling of drawers, as shown in cut, is on the pulls of the drawers done in gold bronze on black background.
 Dimensions and Weight of Case No. 15.—Width, 24 inches; Height, 45 inches; Depth, 12 inches; Weight, net, 45 lbs.; Weight, including packed case, 75 lbs.
 Dimensions and Weight of Case No. 20.—Width, 26 inches; Height, 45 inches; Depth, 11 1/4 inches; Weight, net, 30 lbs.; Weight, including packed case, 50 lbs.
 The construction of drawers, the arrangement of partitions to economize space and weight, and the novel method of showing contents on drawer pulls are all prominent characteristics and extremely well thought of.

DENNISON'S SUPER JEWELRY CARDS

For Orderly Stocking, Easy Handling and Attractively Displaying Brooches, Scarf-Pins, Earrings, Sleeve Buttons, Hat Pins, Etc.

Dennison's Super Jewelry Cards have for years answered every demand of the Jewelry trade. In all requirements—correct color, uniform punching in slotting, excellent wearing strength and perfect surface, their superior quality is undenied. The illustration shows a few of the Dennison styles—styles and prices of which will be sent to any Jeweler on request.

QUALITY—Best stock that can be made.

ANTI-TARNISHING—Absolutely free from chemical impurities.

FINISH—Extra smooth plate—not easily soiled. Perfect writing surface.

COLOR—Peculiarly adapted to the most advantageous display of Jewelry.

STYLES AND SIZES—Adapted to all styles of Jewelry. Edges smooth and carefully cut. Regular sizes are of proper size to fit standard sizes of Dennison's Show Case Trays.

MAKE-UP—Improved package insures clean stock and prevents waste. All listed numbers, 100 Cards in box, 500 in carton, as illustrated.

SPECIALS—Special Cards of any Description made to order. Prices on request.

For samples, information and prices address the nearest Dennison Store.

THE word "Colonial" means much; especially in sterling ware for weddings, as without exception the bride is always pleased to refer to her Colonial ware.

We are the leaders in this line of ware, having made it a specialty for over twenty years.

We have more designs and styles than all of our competitors put together and our prices are the lowest for A-1 goods.

Also write or 'phone us for photos of our new line of sandwich and grape plates.

We also make one of the finest lines of French roll dishes. Prices furnished on application to

ROGER WILLIAMS SILVER COMPANY

101 SABIN STREET,

PROVIDENCE, R. I.

"Chippendale"

Flat Ware combines all the grace, beauty and refinement that characterize all Chippendale products. Strength and practicability are also strong selling points.

The charming simplicity of the design is shown in the accompanying illustration. "Chippendale" appeals particularly to that class of trade that appreciates beauty with simplicity and quietness in design.

**THE
KREMENTZ
COLLAR BUTTON**

**GOES
ROUND
THE WORLD**

ITS FAME—

Wherever there are collars there are Krementz Collar Buttons. They are known the world over - the only ones that have an international reputation. With such recognition and demand, all you have to do is carry them. They sell themselves.

QUALITY MAINTAINED—

The Krementz Collar Button never disappoints. Unequaled in construction and finish, its quality always has and always will be maintained.

ASSAY—

The Krementz Collar Button does not take advantage of the elastic leeway allowed by law. There is really no reason why a solderless collar button should assay a whit less than stamped. You can depend upon it that

Krementz 14-Karat Collar Buttons will assay 14-Kt. or $\frac{5.84}{1000}$ Fine.

Krementz 10-Karat " " " " 10-Kt. or $\frac{4.16}{1000}$ Fine.

You will note that articles assaying 9 to 9½ Karat or 13 to 13½, and sold as 10-Karat or 14-Karat respectively, save the makers a profit.

ROLLED PLATE LINE—

Krementz Rolled Plated Collar Buttons and Studs are made with regular Krementz 14-Kt. stock; which is sweated, not soldered on composition base. Exhaustive tests show Krementz Plate is much heavier than is used on any other rolled-plate jewelry. Their great popularity in hot countries (where perspiration destroys ordinary goods), is largely owing to the thickness and quality of Krementz Gold Plate, similar to that used on highest quality filled cases.

“Silver Selling a Science”

Replete with Up-to-date Ways and Means of Increasing Silver Sales

Jewelers, Attention! To increase your silver sales, see to it that each of your salesmen is provided with a copy of this new, thirty-six page, illustrated book of Silver Salesmanship. Give us a list of your salesmen, with home addresses, by return mail, and we will mail a copy to each man, gratis.

Silver Salesmen, Attention! To increase your selling ability, and increase your earning capacity, write at once for a copy of this book. It is the science of salesmanship applied to the sale of Sterling Silver. Give firm name and state what position you hold.

Contents! The mental law of sale—how to get attention, arouse interest, create desire, and bring about a resolve to buy. How to show silver—gauging your customer's buying power—who your real competitor is—selling silver in the homes—knowing when you have a sale closed—how to analyze a design.

Every Silver Salesman in America Should Read and Study This Book. Copies can be had free by sending name and home address to

No. 7525/84

Having introduced the Lapel Button Chain which has become one of the standard and popular Summer chains, we are producing for your approval this season another neat chain which can be worn on Vest for office use or on Trousers Band for outing wear; it makes a neat, stylish, economical and safe chain to substitute for the old, long, cumbersome, useless and unsafe Vest; the clutch is specially made so as to go on and off easily, and is of our own make.

Try one of our samples when our travelers call and see if you do not agree with us. We will have a number of desirable patterns with and without the sliding seal. Also a large lot of other good things, new this season.

Business Ideals

¶ A man can talk ideas nowadays and not be regarded as a theorist or a dreamer. In fact, business without ideals is like a ship without a compass — under way, but just whither it's going not even the pilot himself knows. ¶ The success of S. & B. Lederer Co.'s made Locketts has been due to their High *Ideals*, to their aims to create a class of "VERIBEST" Locketts of their very own.

THE JEWELERS' CIRCULAR

WITH WHICH ARE CONSOLIDATED

THE HOROLOGICAL REVIEW

THE JEWELERS' WEEKLY THE JEWELERS' REVIEW

Vol. LVIII.

WEDNESDAY, JUNE 9, 1909.

No. 19.

A Remarkable Old Celestial Globe Inlaid With Silver.

ILLUSTRATED on the front cover is a most interesting Celestial globe, now in the museum of the Gallery Building in Berlin. It is made of copper, according to signs furnished by William IV. of Prussia, and is the work of the famous astronomer and mechanic, Jost Byrgi, completed on order of the Landgrave by Henrich von Lennep (died 1710). The diameter of the globe is 0.72 meter; the meridian carries an hour circle 0.46 in diameter, with double signs. The front, horizontal and underframe are of heavy cast brass, engraved. On the front are the colures, the equator, the ecliptic and polar circles, the elliptic and 12

Saxony" is housed, a drawing bench. A placard attached to it bears the following inscription: "Drawing bench for the production of wire of various patterns for goldsmith's work, made for the Elector Prince August, by Leonhart Daumer, Nuremberg. Finished in 1565. Now in the Cluny Museum, Paris."

This is not such a simple drawing bench as we still see in small goldsmith shops, with wood, wool and leather strap or harder girth, and cruciform, wooden handle, but it is a double drawing bench. In a toothed iron bar is a cam-wheel placed in the middle of the bench, which is turned by two cranks. The bar is only half as long as the bench. This insures the advantage of avoiding useless backward turning. The ring and drawing pinchers

ELSIE BEE'S FASHIONS.

ATTRACTIVE NOVELTIES NOTED IN A LADY'S RAMBLES AMONG THE JEWELERS.

A BLACK necklace of note has olive-shaped links, every alternate one being twisted with a line of small pearls.

* * *

A new soutoire consists of sections on white ribbon, each a circle of pearls banded by calibre diamonds. The locket carries out the same scheme of ornamentation, the circle upon the plain gold being a delight of simplicity.

* * *

Enamel is being applied to the ever popular slide. The small decorative sections are being wrought in dainty scroll designs in that exquisite enamel that has

ARTISTIC DRAWING BENCH OF ELECTOR PRINCE AUGUST OF SAXONY.

ians of latitude, with their divisions clearly delineated. The stars, of which only the largest are shown by inlaid silver plates, the engraving of the constellations is all done that it is evidently the work of skilled copper engravers. On the horizontal, the Julian and Gregorian calendars, celestial points and the terrestrial divisions are shown.

The Artistic Drawing Bench of Elector Prince August of Saxony.

GOLDSMITHS who visited the great art exposition recently held in Dresden were surprised to see in the Saxony building in which the exhibit "Art and Artifacts Under the Elector Princes of

are simply hung on the other side of the bar.

The upper surface of the box-like bench is smooth. The side surfaces are inlaid in different kinds of wood, representing hunting scenes, etc. The drawing pinchers, rings and cranks are nicely engraved.

Henry P. Toms' store at Richland Center, Wis., was recently robbed of about \$100 worth of goods from the display window, a rock being thrown through the glass.

The store of C. D. Maus, Creston, Ia., was robbed, recently, about \$400 worth of goods being taken. Among the goods taken were six watches with railroad movements, trays of rings, chains, stick pins, earrings and silverware. Entrance was gained through the rear of the store.

made the small watch so wonderfully attractive. The enamel decorations now shown in many lines are as artistic as fancy could desire.

* * *

Never before has the small pearl had a greater vogue. It is seen on almost every conceivable ornament, and in almost every character of design, and it stands as a distinct substitute for the small diamond in the attempt to produce artistic jewelry at less cost. The same ideas are imitated as in the handsome diamond ornaments, the straight bar effect, circles and ovals, all of which are enormously expensive when the diamond is used, while with the pearl they are comparatively inexpensive and are almost, if not quite, as charming.

ELSIE BEE.

11.

Don't you think that over forty years' experience along certain well defined lines ought to have FURNISHED SOME VALUABLE LESSONS, the results of which should be improvements and progress?

FORTY-FOUR OR FIVE YEARS AGO WE MADE our first GOLD RINGS. We have been making them every year since, and to-day make more of them than ever before.

Is this not a STRONG ARGUMENT that Larter & Sons know how to make 14K. and 10K. Gold Rings for man, woman

or child, that are up-to-date as to design, finish, construction and price?

If a retail jeweler in good standing cares what KIND OF RINGS HE SELLS, we would like to be of service to him either through our salesmen or the United States mail.

LARTER & SONS

Sculpture, Silverware, Medals, Etc., Exhibited at the Royal Academy of Arts, London.

LONDON, May 29.—The 141st exhibition of the Royal Academy of Arts was opened, and this month, and so far as pictures are concerned there are very few of a striking character, but one that does interest and demonstrates remarkable technique as well as chiaroscuro is "The Visit of Venus to the Forge of Vulcan." The most striking pieces from our point of view are to be found in the sculpture department. One is first of all attracted, on entering the room, by the obverse and reverse designs of the Carnegie Hero Medal by Edward R. Goulden. This, as the photo-

raises a point which I have repeatedly kept to—the annoyance which one naturally feels at a piece of work being shown under the name of the person who simply designed it, thus leading the public to believe that it was actually made by the exhibitor. No one expects the manufacturer or shopkeeper to be the actual designer or maker of the objects he may show in an exhibition, but in an exhibition of this character the work is assumed to be that of the individual. As a matter of fact, it may well be claimed that whatever success there is in the cup, from the point of view of making, is due

CARNEGIE HERO MEDAL EXHIBITED AT ROYAL ACADEMY, LONDON.

I have fortunately obtained demonstrated is a thoughtful design, while the craftsmanship leaves nothing to be desired. Close by is to be seen a case of hand impressions by Cecil Thomas, who was fortunate in his first attempt in securing the distinguished honor of being the only seal or gem engraver to have his work accepted. The larger seal, cut on a Cornelian, was designed for the Central School of Arts and Crafts, wherein he has secured the whole of his art education. The smaller seal is classic, just a sitting female figure. His neighbor is Robert J. Anderson, a teacher in the Central School, who exhibits a case of 11 medals in silver and bronze, which include a very forceful statue of George Bernard Shaw, the famous novelist, musical critic, economist and Socialist. An old student of the Central School, Arthur G. Walker, has had several statuettes accepted, and among these he particularly notices "The Toilette," a statuette in silver. Miss Florence H. Lee is represented by a silver pendant composed of a female winged figure so arranged as to form a triangle from which hangs a cabochon-cut amethyst. Fritz Seib exhibits a case of nine silver plaques which are very interesting, while Miss C. Maryon is represented by a bronze statuette of Miss Maud Allan in the "Dance of the Vagabonds." Flora Countess Gleichen exhibits a station gold cup, the rough sketch for which was illustrated in THE JEWELERS' CIRCULAR—WEEKLY several months ago. This

to students or teachers connected with the Central school. Mortimer Brown shows an excellent little medallion of Abraham Lincoln, while Miss Ernestine Mills shows some interesting enamels on copper, with the very appropriate motto:

*"Some are born to hoarded weariness,
And some to hoarded gold."*

Alexander Fisher is represented by a simple portrait of a child. Walter Winans exhibits an exceedingly pleasant statuette in ivory and silver of "The Mermaid." This is a type of that chryselephantine work which is a pleasant revival of the Greek. The silver is partly gilt and partly oxidized, and the tinted ivory figure is thrown up on the wave of oxidized silver beneath which little strange gilt figures are suggested, and is very interesting. Reginald Arnold exhibits a silver salver—Perseus and Andromeda—but it is difficult to say whether this is cast or whether it is electrotyped; anyway, there is a suggestiveness that the work is that of a silversmith or silversmith's chaser, whereas the probability is that the individual is quite incapable of working in this particular way. Frank Bowcher exhibits the obverse and reverse of the Franco-British medals of award and three very fine medallions in bronze of the three great British scientists, Darwin, Wallace and Woodward.

Henri Nocq is one of the few Frenchmen represented, and he has a case of very distinctive medals and plaquettes in bronze. Nocq, it will be remembered is something

of a jeweler, but his work is generally very strange, quaint and enigmatic.

As my remarks have shown, the Central School of Arts and Crafts is remarkably well represented, and I might conclude this review by stating that Burns Brown, another old student, has a very fine group of "The Sowers: Wind and Water." Sir George Frampton, R.A., who was one of the first directors of the Central school, exhibits a fine bronze statuette, "La Belle Dame Sans Merci." ST. GEORGE.

How Cheap Imitations Are Palmed Off on Wealthy Merchants as Antiques at Fabulous Advances.

A CASE which possesses interest for collectors all over the world occupied three days of Justice Grantham's time in the King's Bench Division, recently, and may possibly have a sequel in legislative action, says a recent dispatch from London, England, to the New York Times. The suit was brought by the executors of the late Charles John Dickins against a Bond St. dealer in antique china, from whom damages were claimed on the ground of fraudulent misrepresentation and breach of warranty in regard to the sale of Dresden and Sevres china. Some sensational disclosures were made in the course of the trial as to the prices the dealer paid for the spurious china which he foisted off on Dickins as valuable pieces.

Dickins was an old man, and collecting china was the hobby of his declining years. He paid £13,000 for 26 pieces, which at the highest estimate were not worth £1,000. In another case he was induced to purchase for £500 an article which could be bought for \$5 a dozen. It was further shown that this dealer acted as intermediary for other dealers who similarly swindled Dickins, palming off on him "modern antiques." The jury returned a verdict of £10,342 (over \$50,000) damages for the plaintiff, and the judge intimated that the case ought to have been tried in a criminal court on a prosecution.

The case has drawn attention to the fact that the manufacture of spurious articles of vertu in recent years has been developed to a fine art, and it is admitted that very probably the British national collection contains many doubtful specimens. The disclosures at the trial showed the necessity for some organized body to protect the collector, and steps are being taken to form an art collectors' protective association, which, among other objects, will endeavor to secure special legislation to safeguard the well-intentioned but inexperienced amateur.

It was also shown during the trial that there exists a gang of unscrupulous dealers who band together to keep down the public auction prices and enable one of their number to secure art objects for less than their recognized value. Even the leading firms of auctioneers are not secure against the manipulations of this ring, and legislation against such practices is suggested.

One of the best authorities sums up the situation succinctly by saying that no amateur can be quite sure that he is safe, but his best plan is to put himself in the hands of a reputable dealer.

Work in Jewelry Designing by Students at the Cooper Union, New York.

The 50th annual commencement and exhibit at Cooper Union, New York, was held Tuesday and Wednesday evenings of last week, and included in the numerous exhibits a display of work done by the pupils of the in-

to be set with pearls, diamonds and other precious stones and are of clever execution. The class of jewelry designing of which these two young men are members is under the supervision of Edward Ehrle, and meets three nights a week at 7:30 o'clock for two hours. If the student has had no experience his work begins with easy geometrical

is the object of Director Ehrle to cultivate an ability for original artistic work in the student, and each one is urged to indicate

The JEWELERS' CIRCULAR-WEEKLY prize was given to the student who produces the most original jewelry design each year and was awarded for the second time to Fred. E. Bauer, who has again shown his proficiency as a designer of more than usual artistic merit. Honorable mention is given to L. Maldarelli. Mr. Bauer, the winner of the prize, is an employe of Theo. A. Kohn & Co. while the young man who received honorable mention is with the Osmerberg & Co. The accompanying illustrations show the designs selected as worthy of the prize and honorable mention.

DESIGN FOR JEWELED NECKLACE AND RINGS BY FRED. E. BAUER.

The design by Mr. Bauer shows a pendant set with pearls and diamonds, having as its central design a female figure carved in high relief. The other design submitted by L. Maldarelli is a necklace set with precious stones, showing artistic taste. The small figures represent watch charms and rings. The two photographs showing the work of L. Maldarelli are designs for pendants

ment of many different designs. The instructor aims to develop the aesthetic side of the pupil's nature and to bring him to a proper appreciation of jewelry designing. No attempt has been made at Cooper to execute in metal the designs made by the students. They have been taught to execute certain designs to a certain area, to follow certain principles, so that the work reached will have artistic merit. The school year of Cooper Union begins Sept. 21 and ends about May 15. The full course is three years. The work of the students during this past year has shown a marked advancement, both in technical ability and artistic merit. It affords an excellent opportunity which is afforded to students to make themselves of

for an advance in price rather than a decline. Mr. Grinberg, of Adolf J. Grinberg & Son, when questioned about the matter, said that these so-called pearls could in no way affect the price of the real pearls, and so far imitation pearls had never affected the price of the real pearl, but only served as an education to the people at large in teaching them to appreciate the genuine article. The "culture" pearls do not have the same luster, he said, and he further pointed out that they are never round, as is in the case of the genuine pearl. He said that two halves of these imitation pearls can be pasted together for use in forming pearls for a necklace, but that they were very easily detected. He explained

RING DESIGNS BY L. MALDARELLI.

value to manufacturers should appreciate the manufacturing jewelers who educate young men to a higher appreciation of the artistic side of original designing.

that while the process of their production was not well understood by the public, that it was the opinion of dealers that the so-called "culture" pearl was simply a blister within the shell which is removed and filled with mother-of-pearl.

W. R. Cattle, in his book on pearls, in speaking of the Japanese pearls, says: "The Japanese produce a marketable gem and have so far succeeded that a considerable number have been sold in the United States. The base upon which nacre is deposited appears to be composed of a substance composed of porcelain shaped like a low dome, slightly hollowed out on the under side and having a hole in the center of the cavity. As there is no nacre on the under side, it must, when the button is placed in the mussel, be thereby protected from the action of the fish except at the edges, where the nacreous deposit probably joins it to the shell, but in such a manner that it can be easily detached. The pearl-covered button is then fitted to a piece of polished mother-of-pearl of the same exterior size and shape, and the two are neatly joined, forming a double low-domed piece of pearl on one side and mother-of-pearl on the other. These Japanese pearls, as they are called, when mounted in a setting constructed to hide the under side, have the appearance of imperfect spheres of natural pearl."

In describing how to detect genuine from fine imitation the following points are made: All imitation pearls are made of some solid material, are heavier than the genuine, and lack the pearly characteristics of the real gems.

Chas. Strouse, Shenandoah, Pa., last week, purchased the property at 10 and 12 N. Main St., from J. B. Lessig, Scranton. Mr. Strouse expects to occupy the new building which he will erect on it with his jewelry business.

Career of the Late Capt. Andrew Brown.

FLORENCE, Ala., June 3.—The brief notice which appeared in the last issue of THE JEWELERS' CIRCULAR—WEEKLY announcing the death of Captain Andrew Brown, of this place, caused sincere sorrow and deep grief to his many friends in the jewelry trade, as Captain Brown's career as a jeweler had extended over half a century, 49 years of which was spent in Florence.

Deceased was a native of Glasgow, Scotland, and first saw the light March 4, 1839. He remained in his native country until he was 10 years old, when he came to the United States with his father. After landing in New York Mr. Brown started in to learn the watchmaking trade, and later moved to Niagara Falls, where he practiced at his calling for several years. In 1860 he came to Florence to take charge of the jewelry business conducted by Mr. Wilmot, whose health had failed, and to whose business he succeeded, continuing it for many years alone and later in partnership with his son. Throughout his whole career he was honored and respected as a business man and a citizen, and became a pillar in the commercial, religious and social life of his town.

Shortly after coming to Florence the Civil War broke out and Captain Brown entered the Confederate service as a member of the Florence Guards, the first company of this town to respond to the call to arms. After four years of service he went back to his business, which he continued successfully. Captain Brown had long been connected with the Presbyterian Church, in which he served as a deacon for many years, and at the time of his death was a ruling elder.

Deceased was married in 1868 to Miss Julia Lonsdale, and she, with her son, Robert L., and two daughters, survive.

Exports of Jewelry, Silverware, Clocks, Watches and Kindred Lines from the Port of New York.

WASHINGTON, D. C., June 2.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Basle: 1 case jewelry, \$150.
- Bremen: 2 cases plated ware, \$175; 1 case jewelry, \$450.
- Buenos Ayres: 49 cases plated ware, \$7,223; 5 cases watches, \$890.
- Calcutta: 6 cases clocks, \$121.
- Hamburg: 5 cases watches, \$7,211.
- Havana: 32 cases clocks, \$516; 3 cases optical goods, \$66; 6 cases jewelry, \$1,246.
- Havre: 3 cases plated ware, \$225; 1 case silverware, \$125; 7 cases jewelry, \$6,019; 3 cases watches, \$165.
- Limon: 10 cases clocks, \$200.
- Liverpool: 10 barrels jewelers' sweepings, \$7,000; 3 cases silverware, \$2,042; 5 cases watches, \$1,200; 2 cases jewelry, \$525.
- London: 74 cases clocks, \$203; 3 cases plated ware, \$350.
- Maracaibo: 5 cases plated ware, \$617; 2 cases silverware, \$119.
- Melbourne: 99 cases clocks, \$1,348; 4 cases optical goods, \$735.
- Mombassa: 2 cases clocks, \$105.
- Pernambuco: 2 cases jewelry, \$239.
- Para: 44 cases clocks, \$1,194; 2 cases watches, \$358.
- Rangoon: 12 cases clocks, \$205.
- Rio de Janeiro: 73 cases clocks, \$1,050; 1 case watches, \$148; 1 case jewelry, \$108.
- Tampico: 2 cases plated ware, \$2,010.
- Valparaiso: 5 cases plated ware, \$144.
- Wellington: 15 cases clocks, \$357.

Newspapers "Discover" Japanese Cultural Articles as to Its Effect. Indicated story has been going the of the daily press of late on the of artificial pearls, and in the course of article it states that the market for is seriously threatened by the Japanese enterprise, which has reduced the profits of the ocean to a scientific process. Stories go on to tell how these pearls are cultivated by the Japanese, and water is treated as if it was something new and would materially effect the of genuine pearls. In reality the of artificial pearls, or "culture" pearls they are commonly known in the of an old story threadbare with age. A surprising journalist who wrote the would lead the uninitiated to believe that the price of genuine pearls will be raised. The stories were shown to several pearl dealers in the Maiden Lane district, and questions asked regarding the possible effect at these culture pearls might have on the market price of genuine pearls. M. Rothschild, president of the American Pearl Co., said that the topic was not so well understood by gem dealers and too have any effect on the trade, and there was no possibility that the price of genuine pearls would in any way be hurt by the so-called "culture" pearls. He stated that imitation pearls never made any difference on the price of the genuine article, that there was no danger or even possibility of the price of pearls being lowered. Mr. Rothschild said that the case of genuine pearls was

M. sharp, the COLLECTION HABIB, composed of MAGNIFICENT DIAMONDS, cuts of which will be found on the opposite page, among which is the celebrated BLUE DIAMOND known as the

“HOPE DIAMOND”

These stones can be seen privately on June 22, 1909, from 2 to 6 P. M., and will be on public view June 23, 1909, at Hotel Drouot, Paris.

Catalogues may be obtained from

Adolf J. Grinberg & Son

29 Maiden Lane, NEW YORK

9 Rue du Quatre Septembre, PARIS

who will also take charge of all orders for the purchase of any of these important gems.

COLLECTION HABIB, PARIS

No. 1

Diamond (Rosy), 6 Carats (Minus $\frac{1}{16}$)

This brilliant is very clear and is of a rose-blue tint.

No. 2

Diamond (Bluish White), 24 Carats

This brilliant is pear-shaped, and is remarkable for its cut and also for its pronounced color of bluish-white.

No. 3

Diamond (Bluish-White), 23 Carats

This brilliant is of a very agreeable bluish-white color and has the advantage of representing more than its weight, at the same time having an excellent shape. This stone would make a splendid centre for a valuable set.

No. 4

Diamond of the Princess Mathilde, 16 Carats

This stone, which comes from the jewel-box of the Princess Mathilde onaparte, is remarkable for its brightness, purity and perfect cut.

No. 8

The Blue Diamond, Known as the "Hope Diamond," Nearly 44 $\frac{1}{2}$ Carats

This brilliant, of an inestimable value from a mineralogical point of view, presents the unique peculiarity of possessing the aspect, color and reflection of a very fine sapphire, while being of infinite purity. It belonged to the great banker, Hope, and on his death was sold by auction under the name of the "Hope Diamond" and became the property of an American merchant, who sold it in 1908 to Monsieur Habib.

No. 6

Diamond (Pink), 31 $\frac{1}{2}$ Carats

This brilliant, on account of its size and neatly marked color, constitutes an extremely rare jewel. Its cut is perfect and by its brilliancy it resembles that of "Mazarins."

No. 5

Diamond (Aqua-Marine), 70 $\frac{1}{16}$ Carats

This brilliant, which by its shape recalls the "Nossac" belonging to the English Crown, is practically of the same dimensions. It presents a peculiarity which should be mentioned. Its color, which varies according to the light from a rosy blue to an aqua-marine tint amazes and delights the eye of the connoisseur by its oddity.

No. 7

The "Mi Regent," 58 Carats

The "Mi Regent" owes its name to the striking fact that it is of a beauty and purity equal to that of the Regent of the French Crown. Although of a different shape it gives the impression of a stone of the same size as this universally admired jewel. The vividness of its brilliancy is due to its excellent cut and makes it a stone altogether without equal.

The Oriental Turquoise Matrix

This gem, unparalleled in beauty by anything in the blue variety of opaque stones, and positively occupying the first position in the matrix family, is in every respect superior to anything of its kind yet known in the stone market. Being of an exquisite color that does not fade, varying in shade from the most delicate sky blue to the deepest azure, superbly marked by veins of golden brown or pure black matrix, and lastly, by reason of its superior hardness admitting of the highest polish ever attained by any turquoise, it is one of the most beautiful of gems.

Its possibilities, as a part entering into the composition of jewelry, are absolutely unlimited.

THE NEWS FROM ENGLAND.

Business Still Quiet in All Parts of the Kingdom—Examinations for Scholarships for Jewelry Employees September 25 to October 30—Golden West Exhibition a Failure—Opening of the Imperial International Exhibition.

London, May 30.—Trade remains about as last month despite the fact that till the 24th the weather had been such that could be desired throughout the Kingdom. Our imports show an increase of £2,099,267, but on the other hand exports are down £1,746,880, while there is a decrease of £2,800,000 in the imports. In the first four months of the year and exports are down £12,282,750. Reports from the field show that trade is still completely stagnant! Birmingham is no better. London shows very few signs of recovery, while in Scotland, despite the slump in the shipbuilding business, trade remains in a moribund condition. The shops in places have been fairly full, owing to the fine weather which has prevailed, but they are not been doing anything very much in the way of business. Ireland still shows a very poor trade, while money is scarce throughout the whole Kingdom.

The new Art Council has started to work on the organization of the scholarships for jewelers, goldsmiths, silversmiths, and silver workers and has arranged a series of sub-committees to form a general committee, which include such well-known names as Stanley Barnard, of Edward Barnard & Sons; H. J. L. Symonds, of Morrell & Co., Ltd.; H. W. Ayres, C. J. R. Henry Wilson and W. Augustus. It was settled to-day that the examinations should start Sept. 25, and continue until Oct. 30, inclusive, and that employers should be requested to allow their six Saturdays mornings off to the competitors, while the men will receive six afternoons of five hours each. The suggested objects are of a thoroughly artistic nature. For instance, the small workers will be given 10 hours in which to design a bonbonniere either in silver, gold and ornamented with enamel, engraving or jeweled, while the men will be given 30 hours in the competition and be expected to design an oval Russian cigarette case with a point and striker, while the boys will have 30 hours and be expected to produce in this time a sharp-cornered vase with sunk hinges 2 1/2 inches by 1 3/4 inch and 1 inch in depth and steel striker which will let in flush leaving just 1/8 inch gap all round. In every case the work must be left from the file so as to show the character of the workmanship. The object to be set for the 30 hour's competition will be a large silver vase, and the learners will be a simple vase decorated with a pitch in it, and wire round the edge of the vase, while the journeymen will have to make a covetable-hinged silver sweetmeat dish.

Golden West Exhibition," which was supposed to demonstrate the great resources of Western America, is a dismal failure. It is held in the same spot, at

Earl's Court, in the West End of London, where numerous exhibitions representative of special countries have been held, but Earl's Court has gradually degenerated into a place for "fakers" and a novelty attraction show. The only American attractions seem to be cowboys, cowgirls, and some redskins with their squaws. Of representative exhibits of Western America there is an amusing scarcity.

The Imperial International Exhibition has opened its doors and there can now be little doubt that the thoughtful exhibition will not be such a remarkable show from the industrial point of view as was that of last year. The attractions will be more numerous and unique.

The opening was a brilliant ceremony. The buildings were all gay in bunting and with a richly colored coat of cream and the coloring of the brightly colored grounds was enhanced by the beautiful dresses of the 44 ladies who were among the 25,000 privileged visitors in the enclosure. I was privileged to hold a seat on the first terrace of the Imperial Pavilion, within a few feet of the Duke of Argyle, ex-Governor-General of Canada, and Lord Strathcona, the President of the Exhibition, and the sight was one ever to be remembered. Everything combined to make the day and the occasion brilliant and successful.

Like every exhibition, however, the buildings, particularly that devoted to Arts and Crafts, were not ready for inspection. Indeed as I write the building set apart for jewelry, silversmithing and the allied crafts is in the hands of the fitters. Work, however, is being pushed forward and I hope to be able to give in my next letter some account of the work shown by the British and other people of the world.

The German Government after all did not decide to organize exhibits, leaving the work to be done for the forthcoming Brussels Exhibition in 1910 where, by the way, the British Royal Commission has taken a very large space, 314,429 feet.

The firm style of the Crown Jewelry Co., Seattle, Wash., has been changed, and will hereafter be known as the Hedge, Miller Co.

Death of Z. J. Pequignot.

PHILADELPHIA, Pa., June 5.—Z. J. Pequignot, the well-known jeweler and diamond expert, who had been unable to attend to his business for more than a year, owing to a severe illness, died at his home at 3816 Locust St., Thursday, June 3. His wife and children were at his bedside.

Mr. Pequignot, who was founder and head of the firm of jewelers of the same name at 1331 Walnut St., was 64 years of age. Born in Berne, Switzerland, in 1845, Mr. Pequignot came to this country with his parents when four years of age. As soon as he was old enough to go to business he became a jeweler, and soon established a flourishing trade. For years he had an exclusive patronage among Philadelphia's wealthiest people.

Mr. Pequignot held the unique position of jeweler for the Catholic Church, and many of the beautiful productions in ecclesiastical gold and silverware which he turned out have been illustrated and described in THE JEWELERS' CIRCULAR-WEEKLY in the past. He was an ardent Roman Catholic, and at the time of his death he was president of the Particular Council and vice-president of the Central Council of the Conference of St. Vincent de Paul of the Philadelphia Archdiocese. He was instrumental in starting the movement of building the magnificent home for poor children at Port Kennedy. A committee to draft a suitable tribute to the deceased was approved as follows: Michael F. Doyle, Charles T. Foy, John J. Reilly, J. T. Meagher and Isaac Kilner.

Mr. Pequignot is survived by a widow and six children. Francis C. Pequignot, a son, is now the leading member of the firm.

Retail Jewelers of Washington, D. C., Form Local Organization and Elect Officers.

WASHINGTON, D. C. June 2.—An association of representatives of the leading jewelry firms in this city was formed at a meeting held at the New Willard Hotel yesterday afternoon. Officers to serve until the first week in January were elected, as follows: Charles E. Berry, president; E. A. Harris, secretary; A. D. Prince, treasurer; A. O. Hutterly, first vice-president; C. A. Goldsmith, second vice-president.

In calling the meeting to order, J. P. Archibald, president of the American National Retail Jewelers' Association, said the new protective movement has gained a foothold in nearly every State in the Union. He further stated one of the objects of the association was to protect the trade against the selling of jewelry at cut prices by the trade as well as by firms outside the jewelry business.

Among those present at the meeting were: Adolph Kahn, A. D. Prince, W. H. Groverman, E. A. Harris, who acted as chairman of the meeting; M. H. Fearnow, J. R. Fearnow, C. Katterman, Edward Voigt, Carl Peterson, C. A. Goldsmith and A. O. Hutterly.

Clark Bros.' store at St. Cloud, Minn., celebrated its 25th anniversary recently.

Plan to Stop Cutting of Prices on Watches.

Let Sent to Manufacturers of Watch Movements and Cases by Committee of Pennsylvania Jewelers Who Drew Up Minimum Retail Price List of Watches of all Makes.

PITTSBURGH, Pa., June 3.—The report of a committee of the Pennsylvania Retail Jewelers' Association, appointed to solve the question of watch price-cutting, and the report has been approved by committee from the Pittsburg and Philadelphia divisions of the association, was given today for publication to THE JEWELERS' CIRCULAR WEEKLY. Schedules showing what minimum retail price shall be on all watch movements and on cases accompanies together with interesting typewritten letters to each manufacturer interested; and to the manufacturers of movements and cases.

Local retail jewelers have approved the report as submitted to the manufacturers for adoption is signed by Under Hardy, of the Hardy & Hayes; Gust Loch, North Side; A. Pfaffen-Witzel & Pfafenbach; O. Seidle, of Seidle & Sons, and John M. Roberts, of the committee and father of the movement. The latter has spent months on the proposition, and already is in from manufacturers.

Letters state the intention is to bring the entire matter before the American National Retail Jewelry Association, meets in August in Omaha, provided the manufacturers do not agree to the proposition before that time. The contention is really being fought from Pittsburg end, with Mr. Roberts as the driving spirit. Mr. Roberts has been writing letters and sought in person those who desire to know just what has been set by the committee. In many years has created so much interest at least locally, as the present report, for it emanated here.

Mr. Roberts says that the way to make a success is to stop trying to un-dermine competitors and to uphold prices, a living profit can be made by all. "Working," he says. "If you cannot do anything pleasant and to the credit of your competitor, say nothing at all. One of the sure roads to the success of a business man."

Mr. Roberts has issued a printed statement which among other things he says: "In competition in the way of prices, but never to cut or undersell, rather, if possible, to let a fellow jeweler and agree upon a fair price. An article should be sold. Example: On one occasion we were selling an article which we found a good seller and a nice price. A short time afterwards we found Seidle & Sons had put in a similar line and were selling them at \$1. Being on friendly terms, we immediately conferred on the matter to whether we should cut to meet their price or whether they should make their price meet ours, stating that at \$1.50 the article was a good seller and therefore no need to reduce price. They immediately agreed with us and the price was maintained. We then suggested to the other jewelers that were selling a similar line, to propose this retail selling price to their customers. The result was that this price was maintained in every store in the city that we know of. The good has been accomplished or brought about in some wrong doing, namely: The continual cutting of watch prices has been the means of driving out one organization representatives of a large amount of capital and stock, and the

formation of a committee to take up with the watch movement and case makers the question of what each grade of movement and case should be sold for.

A plan or list has been made by our committee and approved by our association, and will be submitted to the manufacturers for their alterations or approval.

As far as we have been able to learn, we find that most of the movement and case makers are with us in this matter. This will be a great blessing to the business, as it will not only help the retailer, but benefit the jobber and manufacturer

JOHN M. ROBERTS.

Chairman of Watch Price Committee of Pennsylvania Jewelers.

as well, in the fact that there will be less failures in business among the retailers and jobbers, on account of the retailer selling goods at an insufficient profit, therefore not being able to pay the jobber, which eventually cause his failure, and ultimately the loss reaches the manufacturer, who, we believe, are the proper parties to take up this plan of establishing prices. Thereby, in protecting the retailer, they protect the jobber and themselves.

The following letter was sent to the manufacturers of watch movements:

Dear Sirs—At the request of the Pennsylvania Retail Jewelers' Association, we enclose for your inspection list of prices arranged by the committee appointed by the said association and approved by them, which they desire that you will go over carefully with the suggestion that you approve of the same. If there are any changes which you would suggest and would like to have us take up with the association, we will only be too glad to do so.

You will notice by the close perusal of the same that with possibly one exception we have approved the retail prices that you have already established on your movements. That exception is the 16 size and 12 size, 17 J. Adj., in which we have changed the price to \$10, it being the desire of the committee that all 17 J. Adj. movements of these sizes should sell at an advance of \$5 over and above the 17 J. not Adj., without taking into account whatsoever the difference in cost that there may be in the different makes. Now, it is our desire that yourselves, with other makers of movements, as well as the case makers, shall compel all parties selling your movements retail, whether they be jobbers, retail jobbers, department stores or mail order houses, to abide by these prices, and that they shall not sell any grade of these movements at a less price than the enclosed

minimum retail prices. If they are sold cased, then the price must be the combined price of the movements and cases, as in the list.

We have gone over this matter carefully and as merchants find that the price on movements combined with the prices we have set on filled cases make a popular selling price and seem to be what the public want to pay for watches.

That is the reason why we have made a number of the selling prices of the movements such, that combined with the case, they would make sufficient change in the price between the different grades as to satisfy the public and have the complete watch sell for prices they seem to wish to pay.

Now, we enclose you a list, which we are sending to all of the manufacturers, of the prices in all the leading makes, and we really believe that you can put into effect and establish these minimum prices by which the retail jeweler can be protected as he should and get sufficient profit so that he may be able to pay the jobber, the jobber then getting his money will be able to pay the manufacturer, and we would do away to a very great extent with the large number of failures that we have from time to time among both the retail jewelers and also among the jobbers, from the fact that the failure of the jobber is in many cases caused by the failure of the retailer, and the failure of the jobbers eventually entails large loss to the manufacturer. In addition to this, failures of this kind throw this extra stock on the market, generally on auction sale, thereby demoralizing the business and sometimes affecting other failures while the other goods are being disposed of. All of which can be avoided by properly protecting the product, which is a duty you owe to yourselves, the jeweler, and also the purchaser or the wearer of the same, who will learn to know that no matter from whom he may purchase his watch, he can feel sure that the price is right as the same price prevails everywhere, as no doubt the minimum prices would be used entirely and there would be very few goods sold at a higher price.

Now that we have mentioned the jobbers, we would like to express ourselves in regard to them retailing watches. It hardly seems fair that they should be allowed to retail in competition with the retail jeweler, a number of whom have larger investment that the very jobbers they are compelled to purchase from. The jobber in retailing not only gets the profit allowed him by the manufacturer, but also gets the profit that belongs to the retailer. The associated manufacturers, protecting the jobbers by not selling retail, should compel the jobber not to retail.

As we have stated before, the only change we have made in the prices already established by you was upon the 17 J. Adj., the other established retail prices on the higher grade we have left as they were, though many of them are less than they should be, but we leave it to your best judgment as to whether they should be advanced now, or the question of the advancement taken up at a later date.

You must protect the public if you wish to protect yourselves. Now, if you expect the retailer to continue to uphold you on the duty question, on foreign watches (which is now before Congress), to be fair you should certainly protect the retail price of your goods.

The idea of protection is not to protect the few at the expense of the many. For every firm engaged in the manufacture of watches, there are hundreds engaged in retailing, and where there is one employed in the watch factories there are hundreds employed in the different stores selling watches.

Now, if the above mentioned protection is not given the retailer, it is only a question of a very short time until he will endeavor to protect himself; this he will accomplish by insisting that there may be no duty on foreign watches, thus enabling him to sell them at a special profit, which he can do with the American watches under the present circumstances. The duty, as we have said before, protects only the manufacturers, who are as one to 100 of the retailers.

Now, while you advertise your goods to a great extent, yet the retailer makes the market for your goods by continually bringing them before the customer and taking them up, he being your greatest advertiser. If we must resort to foreign watches, of course, it will be foreign watches that will be advertised by us, and if any one large State jewelers' organization would resort to this plan it would only take about a year's work to spread all over the United States, leaving you only the department stores and mail order houses to sell your goods, which would be mostly your low

having no market for your better grades. I wish to state that the constant disturbance in the watch business is the mail houses and department stores, the latter in are using the watch business, not as a profit, but rather as an inducement to draw customers into their places of business. In they sell a watch for much less profit average cost of doing business in their establishment, depending on making a sale merchandise on which they derive from per cent. profit thereby, only using the a football to get business, undoubtedly manufacturers, as most all their sales conven jewel movements and the lowest while the jeweler, to run a store pros all the grades of cases as well as of requiring many more times investment, cannot, therefore, afford to sell at the department stores do and make sufficient their much larger investment. You adopt this (or any other prices that suggest), the association would expect be enforced, and anyone selling your either by themselves or complete with the combined price of both, would be handling of same, and jobbers selling did he cut off the list if they continue

suggest that in the price list that you on your movements, you should have the double the regular price as in list W. S. Bruno, Fifth Ave., New York as the "Keystone Key," and that the price be published opposite the this way there can be no question but be thoroughly understood. As a united effort along this line, the can be as easily controlled as the tech, is at present or the Waterman

we added interest that has been taken jewelers' association since the ques has been taken up (which was caused about by the severe cutting of watch "all" would say, that while formerly represented by the association in this \$75,000, to-day it is between \$2,000,000 000. This applies to the Pittsburg

no doubt see from the tenor of the this was originated in the Pennsylvania taking the first step in this matter, is not taken along this line by the makers it will then come before the ciation, which meets in August. Each then be asked to take decisive action is price list proposition, although we r to have each one of the different s agree and accept this proposition in at time.

has been some discussion among a number ns in regard to the complete watch but I might say right here that all the Pennsylvania association, as far been able to confer with, are opposed would mean or rather be the cause all the business from the smaller r stores, which would be able to carry rent makes in all the different style sibly not have any larger investment e at the present time. As to carrying ased up in the different variety of are made now, this would require a in 1,500 to 1,800 watches. Now, there lass possibly not over 20 firms in the a of Pennsylvania, and these 20 to a would get the larger end of the husi- nity therefore from the smaller people, n the desire of the larger people to do, is, "To live as well as to let live." tion this because in one of the pages e argue, we have a combined list show- us of movements and cases together, n qualities. This was only made as convenience to those selling the let you see what we are trying to d ow you the variation of prices, which t think is one of the strong features

SIGNED BY THE COMMITTEE.

living letter was addressed to the ters of cases:

At the request of the Pennsylvania w's Association we enclose you a list b minimum retail price of movements, used minimum retail price of cases, y the committee appointed by the ic n for this purpose, and afterwards b tem.

ceive by a close perusal of the same

that the committee has seen fit to put a larger profit on cases than on movements, for the reason that the public, as a rule, are not as well posted on cases as they are on the movements, also because the prices should correspond to the length of the guarantee. It seems simply ridiculous to the committee that a hunting case guaranteed by the factories and warranted by the retailer to wear 25 years, should sell at less than prices quoted on enclosed list, which prices vary according to make from \$12, \$13 and \$15.

The committee has also seen fit to suggest that all plain cases sell for the same price as engraved ones, for the reason that in selling plain cases, invariably we monogram them without additional charge, making the cost to the retailer approximately the same.

We have also thought it wise that the retail price, without regard to what the cost might be, should be the same on all sizes of gents' cases of the same quality, that is, a hunting, 18 size, 16 size and 12 size of one quality, to retail for the one price.

The different kinds of cases we have formed into two classes as follows: All jointed, 20-year cases, whether they are open face or hunting, and the solid back cases, make one class, and all the screw bezel and back 20-year cases make another class. All the cases in the first class are to retail at the same price, although there is a difference in the cost. The screw bezel and back cases, which make the second class, will retail at a different price.

The same idea is carried out in 2 1/2-year and permanent cases. The committee think this one of the strong features in the report, as it simplifies the matter in regard to fixing the minimum retail price, making a less number of kinds and therefore not such a variety of prices, and much easier to control.

In fixing these prices, while the leading consideration has been taken in regard to profit, we have also borne in mind the question of what the public seem to wish to pay and what is a popular selling price.

In making up our list we have used the Wadsworth case as a base to figure from, it being one of the lower priced cases. You will see that we have added several other makers' cases to the Wadsworth list, where there has only been a slight difference in cost. We have followed the same idea in classing some of the other makes of cases.

Having used the Wadsworth case for a base of price, all makes of 20-year, 25-year or permanent cases, not mentioned in this list, shall not retail for less than prices quoted on the Wadsworth, even if they cost less, and all the cases not mentioned here, that correspond in cost with some of those that are higher than the Wadsworth, shall retail for the same prices as the nearest make or makers mentioned in our list.

From here on the letter to the watch case manufacturers follows the lines of the letter to the movement manufacturers as published above.

With every letter was sent a schedule of prices, at which each brand of watch case and movement was to be sold at retail, which prices the manufacturers were asked to protect.

PITTSBURG, Pa., June 5.—In order that there be no misunderstanding regarding the price list on watch movements and watch cases which the special committee of which John M. Roberts is the chairman has prepared, Mr. Roberts says that the list as submitted to the manufacturers is only tentative and subject to change, with the approval of the Pennsylvania Retail Jewelers' Association, which appointed the committee.

"We will be glad to meet with the manufacturers," said Mr. Roberts, "and go over the situation with them and make any changes in the schedules which are regarded as advisable, subject, of course, to the approval of the Pennsylvania Retail Jewelers' Association, which created the committee. Our position is set forth and explained in my Harrisburg address. It must be understood that the prices sub-

mitted are only tentative, and after they have once been agreed upon will not be changed except by agreement of all concerned. I think that the letters which we have sent out to the manufacturers explain the situation thoroughly, and all are advised by us to read them carefully. We shall be glad to treat with the manufacturers on the subject and come to some understanding. A distinction naturally has been made in some of the cases, an apparently high price having been placed on some grades, but this was done for the purpose of inducing manufacturers to make a better quality of goods. It is not the intention to take unfair advantage of anyone, and the matter is now entirely up to the manufacturers themselves for their approval, rejection or modification.

We, however, desire that should the prices be lowered on one grade of goods that a corresponding reduction be made on all. That is to say, if a dollar reduction should be made on a specified watch similar reductions should be made on other goods in order not to give anyone an unfair advantage. I think that if the schedules are studied carefully they will be understood."

Mr. Roberts says that he explained the situation thoroughly at the meeting of the Pennsylvania Retail Jewelers' Association convention held in Harrisburg, this week, which he attended, and that the schedules as prepared have been approved to the satisfaction of the dealers in the association.

Silas A. Burgoyne Files a Voluntary Bankruptcy Petition at Mobile, Ala.

MOBILE, Ala., June 3.—Silas A. Burgoyne, who was president of the S. A. Burgoyne Jewelry Co., which was recently in financial difficulties, has filed a voluntary petition in bankruptcy in the United States Court individually, and was adjudicated a bankrupt Monday. The first meeting of his creditors will be held June 14 at the offices of R. H. Smith, special referee in the City Bank building, of this city.

According to the schedules which were filed with the petition Mr. Burgoyne lists his liabilities at about \$96,000 and has no tangible assets. Included in the liabilities are not only his own debts, but the debts of the jewelry company as well. Mr. Burgoyne was personally liable as an indorser on a large number of notes given by the concern.

The Burgoyne Jewelry Co., of which Mr. Burgoyne was the head, in April offered its creditors a settlement of 30 cents on the dollar, cash, which was accepted by over 90 per cent. of the creditors. The liabilities were then about \$70,305, while the assets were placed at \$63,302. The approximate value of the stock after all reductions had been made was placed at about \$45,000.

Death of Edward Taylor.

ROXFORD, Ill., June 3.—There was sincere regret in the silver trade this week when news sent out from this city that Edward Taylor, secretary and treasurer of the Bekford Silver Plate Co., had died, suddenly after noon, at his home, 1322 North Boulevard, after an illness of many days. The funeral will be held to-morrow and the remains will be interred in Haven, Mich.

There are few men who were better liked or more generally liked in the jewelry trade of this section of the country than Mr. Taylor, who at all times manifested those qualities which caused him to be so readily at his work during the many years when he suffered so greatly from the application of diseases which at last proved fatal. His grit and almost heroism earned universal admiration, and his death was therefore not unexpected; nevertheless it came as a severe blow to those who knew him in business and social life. He is mourned alike by the factory workers and his customers as well as his business associates and friends.

Mr. Taylor was a native of Massachusetts and was born in 1863. Early in life his parents moved to Michigan, but Mr. Taylor, after growing up, went back to his native State and became employed by the Pairpoint Mfg. Co., New Bedford (now the Pairpoint Corporation). He remained in the east until 1891, when he went to San Francisco and established a branch for his home firm, and later left to become one of the Holmes & Edwards Silversmiths of Bridgeport, with whom he remained until 1899. In May of that year Mr. Taylor became a stockholder of the Bekford Silver Co., and soon after was elevated to the position of secretary and treasurer, which he held at the time of his death. He was intensely devoted to his work and his industry and ability had a marked effect upon the business of his concern. In the trade he enjoyed the respect and confidence of a wide circle of business men, and his standing as a business man has always been of the highest.

Mr. Taylor was a 32d degree Mason and many years was superintendent of the Sunday school of the Second Congregational Church of this town. He was married in 1899 to Miss George E. Bradley, with his mother and one brother, Hugo, survive him.

Death of George V. Brady.

PHILADELPHIA, Pa., June 4.—The death of George V. Brady, for many years a prominent jeweler of Washington, occurred Wednesday at his home at 35 Hall Ave. in that city. Funeral services were held Sunday afternoon at 2 o'clock from the Brady home. The interment was in the Washington Cemetery.

Mr. Brady was born Dec. 2, 1860, and was the son of James and Julia Brady. He was educated in the public schools of the city, and after completing his education began his apprenticeship as a jeweler with U. Seaman. He worked with Mr. Seaman for some time and later began to work for himself. Since that time he

had been prominently connected with the business affairs of Washington.

Deceased was married to Tillie Miller, who survives. No children were born to them. Besides his wife Mr. Brady is survived by three brothers and one sister. In politics Mr. Brady was a Democrat and took an active part in the work of the party.

Mr. Brady had been in poor health for some time but had been seriously ill only a few weeks.

Death of Chas. A. Lee.

SARATOGA SPRINGS, N. Y., June 3.—After an illness of nearly two and a half years Chas. A. Lee, a well-known and highly-respected business man in this city, who had conducted a jewelry and art store here for several years, passed away this morning at his residence, 126 White St. The funeral will be held Saturday afternoon from his late home.

Deceased was born Feb. 5, 1858, in Watervliet, and in early life entered the employ of a local store. When the firm opened a branch at Saratoga Springs in 1885 he came here as manager of the branch and continued managing the Saratoga store in Summer and the Troy and Washington, D. C., stores in the Winter until 1897, when he started in business for himself in this town as a dealer in art goods. His store soon gained a wide reputation and he made many friends and established a successful business, progressing steadily until he was taken by his fatal illness.

Deceased was married June 21, 1893, to Miss Eva Ramsdale, of this town, and she, with two brothers and two sisters, survive him.

Jeweler in Los Angeles, Cal., Loses \$7,000 by Fire.

LOS ANGELES, Cal., June 2.—The jewelry store of S. B. Bailey, at 353 S. Broadway, was gutted by fire on the evening of May 25. Mr. Bailey estimates his stock and fixtures at \$30,000. He carried \$8,000 insurance. As there will be some salvage, Mr. Bailey believes his net loss will not exceed \$7,000.

The origin of the fire is not known, but the theory of the fire department is that it was caused by crossed electric wires. Mr. Bailey opened temporary quarters in room 616, Grant building, adjoining his old store. He will reopen his old store July 1, and the salvaged stock will be disposed of at a fire sale.

He expects to open a new store with new fixtures and an entirely new stock, in about three months.

Word was received in New York last week to the effect that the Douglas Jewelry Co. had made a general assignment under State laws. The business was started originally at Goodland, Kans., and later a branch was opened at Norton; subsequently both stores were closed out and the business was opened in Boulder, Colo., where it remained from 1895 to 1899. It was later at Pawnee, Okla., and in 1901 was sold to P. A. Fisher, who brought it to Guthrie. C. E. Douglas was later admitted, and the concern incorporated as the Douglas Jewelry Co., with a capital of \$12,000 in 1902.

An Important Sale of Rare Jewels to be Held at Paris, June 24.

One of the most important and interesting jewel sales that has been held for many years is announced to take place at the Hotel Drouot, Paris, in rooms 7 and 8, June 24, at 3 p. m. sharp. This is a part of the Habib collection and contains a number of famous diamonds. The sale will be in charge of the following auctioneers: M. E. Bailly and E. Appert, Paris, assisted by Louis Aucoc, an expert, of the same city.

The stones may be seen by any purchasers on June 22 from 2 to 6 p. m., and will be on public view at Hotel Drouot, June 23.

The articles to be sold consist essentially of diamonds of rare color with historic associations, one of the principal objects being the famous Hope blue diamond, which was bought by Mr. Habib, of Joseph Frankel's Sons Co., some months ago. This diamond, as is well known, is a gem of 44½ carats of a beautiful sapphire blue and is believed to have been cut from the great blue stone of the crown jewels of France which were stolen during the revolution. With the exception of a small stone believed to have come originally from the same gem, the Hope diamond is different from anything of its kind that has ever been known to the gem trade.

Other great diamonds in the collection are the "Mi Regent" of 58 carats, which owes its name to the fact that it is of beauty and purity equal to that of the French crown jewels; a pink diamond of 31½ carats; an aquamarine diamond weighing 70½ carats, which in shape recalls the Nassae of the English crown and practically the same dimensions; a 16-carat diamond of remarkable whiteness and purity which was formerly owned by the Princess Mathilde Bonaparte; a bluish white diamond of 23 carats; a pear-shaped blue white diamond of 24 carats, and a rose-colored diamond weighing six carats minus one-sixteenth, described as of a "rose blue" tint.

According to the catalogue on the sale Constantinople was the last resting place of all these stones with the exception of the Hope diamond and the one which belonged to the Princess Mathilde. This gives reason to suppose that some connection may be found between the sale and the troubles of the late Sultan of Turkey, particularly in view of the reports at the time of the sale of the Hope diamond to Mr. Habib that it was bought for the ruler of the Ottoman Empire.

It is expected that the sale will attract the attention of lovers of exceptional jewels in all parts of the world. Jewelers who have customers that may be interested in any way in the diamonds may obtain catalogues and information about the sale from Adolph J. Grinberg & Son, 29 Maiden Lane, New York, who are looking after the matter in this country.

F. A. Howe, West Union, Ia., has taken a position as jeweler with Jay Johnston & Co., Estherville, Ia.

C. H. Todd, New Richmond, Wis., has retired from business, selling to his son, C. Arthur Todd, who will continue the jewelry business. The elder Mr. Todd will continue in the optical, musical and piano business.

COLORED OPALS

We are cutting a number of colored Opals in oval and fancy shapes, suitable for scarf-pins, brooches, pendant sets, etc.

These stones vary from pink to red, light to deep yellow, all shades of green, soft grays and blues ranging from delicate tints to darkest cobalt.

These new varieties of Opal are inexpensive and most effective.

der the sink, Mr. Esberger saw a
ng figure, and aimed and fired at it.
n sprang toward him, and he fired a
time. Then the figure darted past
l through the window, falling to the
beneath.

eweler, not knowing the results of
ts, then notified the police, who
man dead on the cement walk be-
he houses of Mr. Esberger and
fer, leading to the street. The thief
ln shot in the back and hip.

ederate, who had been watching
front of the house, fled at the sound
first firing.

h police believe Mr. Esberger has
ot only a professional, but a noto-
d dangerous thief. He was about
n. tall, weighed about 150 lbs., and
twn hair parted in the middle. He
essed in an expensive serge suit,
pt, and also wore a clean white
shirt. The only possible clues to
ity were the laundry mark, "B212,"
ussian leather purse containing \$12
ew cents. The pocketbook at one
l a monogram upon it, but it had
efully erased, with the exception
r," which is still visible. There
o a silver cased watch with a gold
d locket; also a key to a suit case,
nife. The trousers he wore were
a tailor of this city, who identi-
n later at the morgue as part of a
pthes stolen from him. The police
s may lead to a knowledge of the
identity and have sent a photo-
of the dead man to the St. Louis,
ice, with the request that they try
man, who is now there under ar-
the tailor store robbery, to identify
thief.

days previous to the shooting
Charles Esberger, Sr., was seriously
the hand by a dog. The animal
mad, and its victim is reported as
ng.

o Voluntary Bankruptcy.**

City, June 7.—A voluntary peti-
nkruptcy has been filed by Harry
n 107 Newark Ave., Jersey City, N.
d is schedules showing liabilities of
\$1,000 and assets of \$4,000.

abchin, who also has a place of
at 223 Washington St., Hoboken,
siness in 1893. He moved to Jer-
in 1894 and opened a store at 149
r Ave. In April, 1906, he moved

to 596 Newark Ave., where he conducted
a pawnbroking and jewelry shop. He
opened the present store in June, 1906, con-
tinuing the pawnbroking business at 596
Newark Ave. until this Spring when he re-
moved it to Railroad Ave. and Henderson
St.

**Louis Barnett Files a Voluntary Bank-
ruptcy Petition at Brooklyn.**

A voluntary petition in bankruptcy was
filed Thursday of last week in the United
States District Court, Eastern District, by
Louis Barnett, a retail jeweler at 114 Liv-
ingston St., Brooklyn. His schedules show
liabilities of \$17,110, of which \$9,459 is un-
secured, and nominal assets of \$13,994,
consisting of real estate \$9,000, stock in
trade \$4,000, and debts due on open ac-
count \$869. Judge Chatfield appointed A.
W. E. Youker receiver under a bond of
\$3,000. Mr. Barnett has a residence on
5th St., Brooklyn, on which are heavy
mortgages.

Among the unsecured creditors are the
Depasse Mfg. Co., \$76; A. Kohn & Co.,
\$188; B. & L. Veit, \$166; N. H. White &
Co., \$84; Stein, Dreiblatt & Co., \$126;
Kantor & Sheff, \$96; Freudenheim Bros.
& Levy, \$252; J. R. Wood & Sons, \$5,284;
Larter & Sons, \$155; A. Rosenberg, \$476;
Bonner Mfg. Co., \$371; J. Cohen, \$100;
I. Hochberger, \$547; A. I. Namm, \$1,000.

Mr. Barnett formerly had his business
headquarters at 469 5th St., where he lived.
In October, 1906, he opened a small store
at 114 Livingston St.

**Julius Reinhardt, Centralia, Mo., Gives
a Deed of Trust.**

The Jewelers Board of Trade reports
that Julius Reinhardt, Centralia, Ill., has
executed a trust deed to an attorney rep-
resenting the Board, which conveys to him
all of his property with the exception of
the fixtures and the dwelling. The trust
deed provides that the attorney for the
Jewelers Board of Trade shall take charge
of the assets and dispose of them either at
private sale or public auction.

In the conveyance Mr. Reinhardt waives
all right to his exemptions under the Illi-
nois laws, and in return is to receive a
release in full from all creditors upon pay-
ment of their pro rata share of the profits
received from the sale of the assets. It is
expressly provided that the trustees shall
wind up the business and distribute the
proceeds to the creditors previous to Jan.
1, 1910, and it is also provided that the
trust deed shall take effect when 90 per
cent. of the creditors have assented to the
terms of it.

Mr. Reinhardt became involved recently,
and upon investigation it was found that
he had assets of \$8,800, of which amount
\$8,000 was in stock and \$800 in good ac-
counts and merchandise. His liabilities
were \$6,545, and a bank indebtedness of
\$1,200, making a total of \$7,745. In addi-
tion to the above assets he had fixtures
in the store which are mortgaged to \$1,300,
and that he also had a dwelling house
which he bought for \$1,600, and which is
mortgaged for \$1,500. Mr. Reinhardt first
endeavored to raise sufficient cash to make
a substantial compromise to provide the

funds, but he could not secure the necessary
money, whereupon he was advised to ex-
ecute a trust deed.

**Railroad Watch Inspectors' Association
of the United States and Canada
Holds Interesting Meeting.**

BALTIMORE, Md., June 4.—At a meeting
held at the Hotel Kernan, Wednesday, the
Railroad Watch Inspectors' Association of
the United States and Canada, a new or-
ganization that was launched last February
at Hagerstown, was placed on a solid basis
and got a good start on an important work
for all those engaged in this particular line.
So enthusiastic were they over the success
attending this meeting that a hustling cam-
paign has been started to include in their
body every watch inspector on this conti-
nent, as they feel something must be done
to safeguard their interests against what
they term "unscrupulous buyers in rail-
road service" and to secure certain rights
to which they are entitled.

A constitution and by-laws have been
adopted that clearly set forth their objects,
and prior to this meeting Charles C. Crooks,
Baltimore, communicated with the leading
railroads of this country, Canada and Mex-
ico and received answers from officials rep-
resenting more than 200,000 miles of road.
Snatches from these answers will be pub-
lished in next week's issue.

The consensus of these opinions is that
a periodical inspection of watches and
clocks is essential to the safeguarding of
railroad service. In order to better system-
atize the efforts to increase their member-
ship those who attended the meeting here
from the different States were constituted
a committee to work in their States in an
effort to include everyone engaged in their
line. C. A. Fricker, Americus, Ga., will
be actively engaged in looking after this
particular part.

A committee of 15 was sent, yesterday,
to Washington to confer with the Inter-
state Commerce Commission concerning
matters pertaining to their connection with
the railroads. E. A. Mosely, secretary of
the commission, arranged a hearing before
Commissioner E. E. Clark, which termi-
nated very satisfactorily. One of the most
important questions brought up was the
traveling of inspectors on business. Com-
missioner Clark decided that in such a
capacity they were considered as agents of
the railroads and entitled to travel as such.

A sub-committee was appointed and is
composed of Milton Kohler, Hagerstown;
Robert W. Little, Cumberland, and Charles
C. Crooks, Baltimore, to whom will be re-
ferred all matters arising during intervals
of meetings. Another important feature is
the establishing of a plan for the inter-
change of information.

The officers of the association are: Presi-
dent, Milton Kohler, Hagerstown; vice-
president, W. L. Jones, Martinsburg, W.
Va.; second vice-president, M. B. Kornman,
Washington; secretary and treasurer, Rob-
ert W. Little, Cumberland.

J. C. Guy, Carroll, Ia., has given a chattel
mortgage on his stock to a trustee, W. R.
Less, to secure certain creditors. Mr. Guy
is now conducting an auction sale.

Frankel's Sons and Joseph Frankel's Sons Co. Pay Creditors in Full.

Announcement was made last week that Joseph Frankel's Sons Co. and Joseph Frankel's Sons, 578 Fifth Ave., New York, had paid all creditors in full, with six per cent. interest, both houses taking back their business on their own names. This announcement following the one published in THE JEWELERS' CIRCULAR-WEEKLY recently that the firms of Gattle, Ettinger & Hammel and Gattle & Co. had paid all creditors in full of much importance to the jewelry trade reflecting a better condition of affairs. The fact that these firms asked for a suspension of credit in January, 1908, and were unable to pay all obligations in a year or a year shows conclusively that they were not only solvent, but that they were able to be properly liquidated at an advantage.

At the time that the late financial debacle caused a cessation of business in the jewelry market it was decided that the best course to pursue would be to appoint trustees to protect and conserve the interests of the four firms above mentioned in adopting this plan James G. Nelson, vice-president of the Fourth National Bank, John C. Van Cleef, vice-president of the National Park Bank, and John, of L. & M. Kahn & Co., were named as the trustees. The gross liabilities of the concerns were placed at about \$1,000,000 and the assets at over \$6,250,000. Nelson Cromwell, of Sullivan & Crandall, of counsel for the liquidating trustees at that time, gave out an official statement in which he pointed out that the unprecedented falling off in the price of precious stones and owing to the protracted stoppage of customary jewelry facilities it became necessary to re-arrange the affairs of the firms involved so as to secure the realization upon their assets under the most propitious and under the most advantageous conditions than were obtainable, both at home and abroad. He stated that the statement of each concern showed a substantial surplus if the assets were properly conserved. The trusteeship was entered into with the understanding that if the concerns were not paid within a certain time that the trustees should then convert into cash the balance of the assets and distribute the proceeds to the creditors. It was deemed advisable that the accounts and claims of the concerns should be deposited with the trustees of the Bankers' Trust Co. of New York.

These concerns have paid every claim standing against them within the time specified and the business has been turned over to the original hands. Messrs. Gattle & Stroock, attorneys for the concerns, gave out a statement last week announcing that the business had been turned over to the Frankels by the trustees. It was stated that in the absence of the Frankel family, who is now abroad, no further could be said at present. The trustees, of the concern, also said that no further information concerning the financial affairs would be made public until the return of Simon Frankel. The concern was, at the time of the

extension, the owner of the famous Hope diamond, which was later sold to a Mr. Hahib, a Paris collector.

Mr. Ettinger, of Gattle, Ettinger & Co., formerly Gattle, Ettinger & Hammel, in speaking of the newspaper stories printed about the payment by the Frankel concern called the attention of THE JEWELERS' CIRCULAR-WEEKLY reporter to one story which spoke of the Gattle, Ettinger & Hammel concern as being owned by the Frankel concern. He said that this was not a correct statement, but that the Frankels' interest in their concern was simply that of creditors and that they were not owners in any way.

Grand Jury Finds Jeweler's Son Is Not His Father's Slayer, as Previously Believed.

St. Louis, Mo., June 5.—Edward Poos did not kill his father, August Poos, who died, May 17, from a bullet wound through the heart following an altercation with his son in their jewelry store at 3564 S. Broadway over a slurring epithet applied to Mrs. Poos by Poos, Sr. Although Edward Poos gave himself up and confessed that he had slain his father, and thought that he had, expert testimony has revealed that the bullet that killed August Poos was fired by himself. The extraordinary facts were revealed Friday, when the Grand Jury returned a report exonerating the young man. The report was the first intimation the young man had that he was not his father's slayer, and he was overjoyed.

Edward had been under \$5,000 bond for the death of his father under a warrant issued after the coroner's jury had returned a verdict of homicide. He was released from the bond, but was held in a \$1,000 bond for assault.

Six shots were fired in the melee in the jewelry store. It was in investigating the course taken by the different bullets that the Grand Jury established by expert testimony that young Poos did not kill his father, as he supposed.

According to the Grand Jury report the first shot fired by Edward Poos struck his father in the small of the back, near the left side, and passed out on the right side, but it was only a flesh wound and would not have been fatal. The second shot fired by the son, which he believed to have ended his father's life, was found to have lodged in a counter.

The shots fired by Edward Poos brought Mrs. Poos running into the store. Her husband had caught up a revolver. He fired at her. The bullet struck her in the abdomen and inflicted a dangerous wound. Her death was considered certain, but she is slowly recovering in the City Hospital. Two other shots fired by him lodged in the woodwork of the store. According to the Grand Jury's finding he then turned the revolver against his own breast and fired the fourth shot into his heart.

It was the unanimous conclusion of six surgeons and a number of firearm experts that the son was not responsible for his father's death. But for the thoroughness of the Grand Jury investigation Edward Poos would have always thought that he was the slayer of his father, and would

have had to stand trial for his life as a patricide.

Regular Monthly Meeting of Maryland Retail Jewelers' Association.

BALTIMORE, Md., June 4.—The regular monthly meeting of the Maryland Retail Jewelers' Association that was held Wednesday night at the Hotel Kernan was declared the most interesting and successful yet held in view of the array of out-of-town speakers. Their meeting was augmented by the attendance of many members of the National Watch Inspectors' Association of the United States and Canada that had convened during the day, some of whom delivered short talks, adjournment being carried over to midnight.

An interesting speaker of the evening was J. P. Archibald, president of the National Retail Jewelers' Association, who gave a resumé of the good accomplished by the national association and the work the officers had planned for the betterment of conditions. He also dwelt strongly upon the benefits of association. Emile Jacot, of Quebec, Can., was another speaker, dwelling mainly upon conditions in his country and discussing Canadian laws and imports. Some of the other short talkers were Robert M. Little, Cumberland, Md., and Milton Kohler, Hagerstown, Md.

Pennsylvania Retail Jewelers in Convention.

State Association Holds Interesting Meeting at Harrisburg and Elects Officers.

HARRISBURG, Pa., June 5.—A very successful and enjoyable meeting. Such, in fact, is the verdict of the 100 or more wholesale and manufacturing jewelers who attended the fourth annual convention of the Pennsylvania Retail Jewelers' Association, held at the Board of Building, in this city, June 3 and 4. The local committee of the association, consisting of E. L. Rinckenbach and Robert Diener, were heartily praised by the visitors for the entertainment program on the last day of the convention. It did not dampen the enthusiasm and interest of the members, a full attendance being maintained at the closing session.

The sessions were held in a room actively decorated, and automobiles were provided by the local reception committee to take the convention visitors on a mile trip along Harrisburg's new boulevard front and over the municipal parkway system. The new State building was also thoroughly inspected, a number of the State officials being on hand to show the jewelers personally and show them their quarters. Before departure many of the visitors and officers were photographed in a group in front of the Board of Trade, as shown in the cut.

One of the most gratifying features of the convention, aside from the manifestation of the good feeling existing between manufacturer, jobber and retailer, was the growth of sentiment in favor of the State since the August convention. The membership of the State association having increased over 300 per cent from 84 to 280, making it the largest State association of retail jewelers in the country. Much of the credit for this increase is due to the energetic leadership of President Garman, Secretary Diener and Treasurer Diener, all of whom are Pennsylvanians and a

member, President Archibald of the American National Retail Jewelers' Association likewise took a deep interest in the growth of the State association, and will go to the Omaha convention next August with a good delegation and excellent report from Pennsylvania.

President Ira D. Garman called the convention to order about 2 o'clock Thursday

IRA D. GARMAN, PRESIDENT.

afternoon, and following the roll call and reading of the minutes the president appointed the following committees:

Audit—George S. Katz and W. L. Swartz, Philadelphia.

Resolutions—I. A. Deisher, Reading, chairman; E. L. Rinckenbach, Harrisburg; H. F. Setzer, Philadelphia; J. F. Steinmayer, Pittsburg; Charles F. Hambly,

Philadelphia; C. S. Powell, Philadelphia, and I. Press, Philadelphia.

In the absence of Mayor E. S. Meals the visitors were welcomed to Harrisburg by Secretary-Manager Frank Bell of the Board of Trade. President Garman delivered an address that was brim-full of encouragement to his fellow members. He urged the members of the association to give the organization all the time and interest they could possibly spare during the coming association year, so that when the next convention is held in 1910, wherever that might be, the secretary's report would show as healthy an increase in membership as was shown during the past year. President Garman was emphatic in his belief that the organization was beneficial not only to the jeweler who retails his wares, but also to the manufacturer and jobber who sells to him, declaring that just so soon as the retail jeweler becomes thoroughly imbued with that belief and becomes a consistent member of his State association, just that soon would his condition improve with respect to his dealings with the manufacturers and wholesalers. He congratulated the membership on the past year's success and gave his indorsement to the work planned for the coming year.

Fifty or more applications for membership were then presented, including a number from this city and Steelton. Secretary Wiley's report, like that of President Garman's, referred to the large growth of interest in the association, to the bright prospects for a repetition of the success of the past year during the year to come, and to the better feeling now existing among the fraternity in Pennsylvania toward organized effort for the accomplishment of those reforms for which many retail jewelers had heretofore been individually striving. There had been no deaths among the membership of the association during the past year, and therefore the Committee on Deceased Members, consisting of J. P. Steinmann, Thomas J. Apryl and E. L. Rinckenbach, would have no report to present, for which all were duly thankful. Secretary Wiley stated that Pittsburg can be depended upon to contribute its share toward the future upbuild-

OF OFFICERS AND MEMBERS OF THE

PENNSYLVANIA RETAIL JEWELERS' ASSOCIATION AT THE CONVENTION AT HARRISBURG.

ing and success of the State association.

Treasurer Diener's report showed a healthy condition of affairs financially in the association, with \$450 in the treasury. Members were prompt in paying their dues and other obligations.

The Auditing Committee reported the accounts of the State officers to be correct, and their report was received and filed.

There was a large attendance at the evening session, and those present were well rewarded in listening to the addresses of H. C. Carpenter, sales manager of the South Bend Watch Co., on "Aggressive Salesmanship," and John M. Roberts, of John M. Roberts & Son Co., Pittsburg, on "A Fixed Selling Price." Mr. Carpenter is a living exponent of the aggressive salesman, and held the undivided attention of his hearers throughout his address. He counseled the retail jewelers to get together on common ground, to drop all trade selfishness, and to inject a little good sense into their competition for trade. "Be broad-minded, honest and fair in your dealings with your competitors as well as with your trade," he urged.

Mr. Roberts in his address argued for a unity of feeling and action among the retail trade with respect to the maintaining of certain fixed prices on watch cases and watch movements more particularly, saying that it should not be a difficult matter for all concerned to arrive at a mutually satisfactory agreement imposing a limit of price on American watch cases and watch movements, in the observance of which schedule of prices all jewelers should co-operate, and this co-operation could best be secured through solid and harmonious organization. If jewelers would stop knocking their competitors and meet them on a mutually advantageous basis through organized effort, their business would be more satisfactory and profitable, and their social relations more pleasant. Mr. Roberts told the history and work of the "watch price cutting" committee, of which he is chairman, read the letters sent to manufacturers, and explained in detail the tentative price list compiled by this committee. He advocated the convention indorsement of the Pittsburg committee's schedule of prices for watch cases and watch movements, stating that most of the movement and case makers were in hearty accord with the wholesaler and retailer in this movement. With a mutual agreement upon the selling price of each grade of movement and case unprofitable underselling would be reduced to a minimum, and everybody concerned would make a reasonable and fair profit on his investment.

Col. J. Warner Hutchins, of Philadelphia, was on the program for an address on "Organization" at this session, but on account of a pressure of Masonic duties in Philadelphia was unable to attend the convention. However, his place was very acceptably filled by Col. John L. Shephard, of the Keystone Watch Case Co., Philadelphia, and Dr. C. L. Morris, of the Hamilton Watch Co., both of whom congratulated the Pennsylvania association upon the remarkable strides taken during the past year and the bright outlook for the future. They also complimented the association officers, giving these gentlemen their full meed

of praise for the present proud position of the association among its sister associations of the country. The speakers unqualifiedly approved the mutual benefit to be derived by manufacturer, jobber and retailer alike through organization in which all participate and conform strictly and honestly to a live-and-let-live policy.

President Archibald of the American National Retail Jewelers' Association, who has been a very busy man "on the road" for some time in preparation for a rousing convention at Omaha in August next, came in from Washington, Thursday afternoon, and gave his fellow jewelers of the State association an interesting report on the progress of the tariff deliberations as affecting watches. He said he was quite naturally

C. S. WILEY, SECRETARY.

proud of the healthy condition of the association in his home State in every particular, numerically, financially and socially, and referred to the bright outlook for an unparalleled convention at Omaha the first week in August, adding that nothing would please him better than to see the State association send a large delegation there. President Archibald's remarks were warmly applauded, and he was assured that "Pennsylvania would be there in August with both feet foremost." President Archibald returned to his home in Blairsville later.

At the closing session on Friday morning the convention gave its unanimous indorsement to the schedule of prices for the various grades of American watch cases and movements as prepared by the Pittsburg committee, and the matter is now up to the manufacturers and jobbers.

It was likewise decided by the convention to provide a special fund, to be maintained by voluntary contributions from the members of the association, as they individually felt able to contribute, which fund is to be used toward the defraying of expenses of special meetings of the Executive Committee of the association. Over \$125 was contributed for this purpose before the convention closed. It is the intention of the organizations to have the Executive Committee meet oftener than has been the case in the past.

The convention also stamped its seal of approval on the plan for a systematic canvass of the entire State between this and next May in the effort to increase the membership at least 50 per cent. above the present mark of almost 300.

The uniform State stamping law proposed by THE JEWELERS' CIRCULAR-WEEKLY and taken up by the Manufacturing Jewelers' Association of Newark, N. J. was indorsed.

The report of the Committee on Resolutions was presented and unanimously indorsed after some discussion among members. It gave general satisfaction, declaring against the practice of manufacturers and jobbers publishing trade catalogs with net prices to the retail trade and selling same unsealed to their customers and friends in the trade; placed the same on record as against the publication of an official organ, setting forth that the prices of the jeweler are most amply supported at the present time by the trade throughout the country, such as THE JEWELERS' CIRCULAR-WEEKLY, and condemned certain practices now in vogue among sellers of imitation jewelry.

The discussion of the subject "Should Movement Companies Sell Only Good Watches?" was dispensed with, and also the address that was to have been given by A. L. Sackett, of the Buckeye Co., on the subject, "Pioneers and Promoters." Mr. Sackett failing to appear to communicate with the association by way of explaining his absence.

The following officers were elected by nomination and unanimously: President, Ira D. Garman, Philadelphia; first vice-president, John M. Roberts, Pittsburg; second vice-president, Col. J. W. Hutchins, Philadelphia; third vice-president, I. A. Deisher, Reading; fourth vice-president, George S. Katz, Philadelphia; vice-president, W. F. Steinmacher, Pittsburg; secretary, C. S. Wiley, Pittsburg; treasurer, P. G. Diener, Harrisburg; Executive Committee—J. P. Archibald, Blairsville; Charles F. Hamblly, Philadelphia; H. F. Seltzer, Philadelphia.

The retiring vice-presidents are Yester and F. C. Bode, while Mr. Bode succeeds A. C. Graul on the Executive Committee. With these three exceptions changes were made in the list of officers.

"Where shall we meet next year?" this matter was speedily disposed of by the convention voting unanimously to accept invitation of the Wholesale Jewelers' Association and the Travelers' Association at the Quaker City. The members of the Pittsburg are well satisfied with this arrangement, as they are going to make an effort at Omaha next August to see the 1911 session of the American National Retail Jewelers' Association for their own if successful the sessions of the Pennsylvania Retail Jewelers' Association next year will be held in Pittsburg in connection with the meeting of the national. By that time it is the expectation of officers that the State association will embrace a membership of 500 at least. It was further decided that the 1910 convention of the State association in Philadelphia be held during the month of May of the first week in June, as the lar-

are generally busier in June than delegates to the Omaha convention were then elected: Ira D. Garf Seltzer, Charles F. Hambly, J. Hutchins, C. S. Powell, F. C. Bode, Ohio; John M. Roberts, Steele F. C. S. Wiley, J. Hardy, W. F. her, Otto Heinemann, Pittsburg; ener, E. G. Hoover, E. F. Rinken-S. Gitt and H. C. Claster, Harris-A. Deisher, Reading. The State will pay the railroad fare of the of whom at least one dozen will convention.

adjournment a number of the jew- the demonstration of the South tch Co and the Oneida Commu- the Commonwealth Hotel, where se enterprising concerns had at- s of their wares in charge of nager Carpenter and J. F. Reidel, y. C. T. Higginbotham, superin- f the South Bend Watch Co., lec- sursday night and Friday after- m working models on the "De- ver Escapement" and "The Watch and Its Jeweling" to attentive aud- le also explained the "Clepsydra, Clock," a working model of which xhibition in his rooms. By eight riday evening a majority of the ewelers had departed for their ll of enthusiasm for the State as- which augurs well for a suc- onvention at Philadelphia in May, e exact date of this convention etermined at a future meeting of xutive Committee, to be held in all y in Philadelphia.

Convention Tickings.

he Philadelphians attending the con- re Frank Pritty, L. P. White, Sol- ge Hurlburt, representing the jobbers, Davis. tion from Altoona and Johnston, en the Philadelphia convention of the mercial Travelers of America, which urday, extended greetings to the State n to Messrs. Carpenter, Shepherd and watch manufacturers were represented Lee, of the Howard Watch Co., and ed Watch Co. also had a representative and k. Commings, one of the city's veteran rs and jewelers, returned from a visit her in Reading in time to attend some onvention sittings. He was warmly greeted ther jewelers. t was well represented at the convention Laron and A. S. Felker, both of whom hted with the entire proceedings, and their hearty support to the movement ival of the local association. llent group picture of the convention s taken by John Lemer, representative Woshon, of this city. Many of the jew- one of these pictures home as a sou- fe 1909 meeting at Harrisburg. d Garman and Messrs. Bode, White and the trip from and to Philadelphia in a r, departing for home on Saturday g raveling via Reading. They expected to t rough "going" on the return trip owing s. nance, one of the prime movers in the of the short-lived Harrisburg Jewelers' at of a few years ago, was not able to t entire convention on account of the ois chief clerk, Fred Patterson, who has fferty for several weeks through an attack atory rheumatism. Philadelphia convention next year will not d as large a hall as previous conventions, t the Jewelers' Club. President Gar-

man believes that better results can be accom- plished by grouping the members as closely to- gether as is compatible with comfort. He promises a royal good time for the visiting jewelers.

Many of the local jewelers extended every op- portunity to their clerks to hear the discussions in the convention, and quite a number attended regularly the lectures given at the Commonwealth by Mr. Higginbotham, whose explanations of the intricacies of the mechanism of a watch and of watch repairing won for him their everlasting gratitude.

It was a matter of regret that the absence from the city of Governor Stuart and Mayor Meals prevented these officials from formally welcoming the jewelers, but the energetic Secretary-Manager Bell, of the Board of Trade, made an excellent substitute. He told them that Harrisburg would always be delighted to entertain such a representa- tive body of business men.

W. P. Denchy, president of the defunct Harris- burg Jewelers' Association, was visited by quite a number of the jewelers who extended sympathy on account of the recent death of his wife. Mr. Denchy has always been strong for organization among jewelers, and while he was not able to take great interest in the convention just con- cluded, he will likely be found at the front of the line-up for a revival of the local association.

Between convention sessions the local committee were assisted by the various State officers in re- vivifying interest and a better feeling among local jewelers who have heretofore held aloof from organized effort, particularly of a local descrip- tion, and were much encouraged by the result of their efforts, so much so in fact, that the early reorganization of the Harrisburg Jewelers' Asso- ciation, probably under a different title, is ex- tremely probable. Harrisburg's representation in the State body is now so nearly complete that it is thought the reorganized association would prove a permanent affair.

United Commercial Travelers of America Hold Annual Convention at Providence, R. I.

PROVIDENCE, R. I., June 5.—After an even- ing of pleasure some 1,200 members of the United Commercial Travelers of America from all over New England met, yesterday morning, in Arcanum Hall, this city, for the holding of the 14th annual convention of that association. When the delegates began to arrive they were welcomed by the offi- cers and members of Providence Council No. 67, and upwards of half an hour was spent in renewing old acquaintances, talking over old experiences and swapping an "oc- casional" new yarn.

Among the matters that were considered by the councils during the past year, and which were acted upon by the Grand Coun- cil, are the parcels post, which traveling men believe will be detrimental to their profession, and the catalogue houses, so- called, which substitute illustrated cata- logues for traveling salesmen. The sales- men insist that this is extremely bad taste, since no stretch of imagination could pic- ture a catalogue enjoying a shore dinner or participating in an annual outing.

To-day, notwithstanding the pouring rain, fully 800 participated in the parade which preceded the sail down the bay and shore dinner. Among those who attended the convention were a number of salesmen as- sociated with the manufacturing jewelry business. Harry E. Jenks, with Albert Lorsch & Co., is sentinel of Providence Council, and others prominent in the parade were: A. Leo Kilkenney, with Thomas W. Lind Co., aid to marshal of First Division; Norman T. Pratt, with George H. Taylor & Co., aid on Second Division, and Ken- neth R. Longwill, with Albert Lorsch & Co., aid on Third Division.

Portrait Published in Jewelers' Circu- lar-Weekly Leads to Arrest of Morris Cohen at Cincinnati.

CINCINNATI, O., June 5.—Frank Miller, a young man employed by Michaelson Bros., Race St., claims the reward recently offered for the arrest of Morris Cohen, formerly in business under the firm name of Cohen & Levine at 537 Fulton St., Brooklyn, New York, who, with his partner, Levine, is wanted on a charge of larceny in the first degree by the New York and Brooklyn police. Miller caused Cohen's arrest in this city after seeing his portrait and reading the story in THE JEWELERS' CIRCULAR- WEEKLY of May 26.

It appears that Cohen had been working in this city since March 1, and his face had become very familiar to Miller, who passed him on the street very often. When Miller saw the photograph of the missing Brook- lyn jeweler in THE JEWELERS' CIRCULAR- WEEKLY he was sure he knew the man and so informed the police, who called at Geb- hardt Bros.' jewelry factory, where Cohen was employed, and arrested him on sus- picion. Upon being arrested the prisoner admitted to the police that Miller had cor- rectly identified him, and that the allega- tions printed in THE JEWELERS' CIRCULAR- WEEKLY were true. He also said that his partner, Levine, has the stolen articles, but the last he knew of Levine he was in Rochester, N. Y.

Cohen while in this city has been passing under the name of "Kellin."

The prisoner was to have been tried June 5 in the local police court, but owing to the fact that the officer from New York had not arrived with the extradition papers the case was postponed until June 8. It will then be dismissed, as the New York officer is expected to arrive here to-morrow and will immediately return with Cohen to Brooklyn.

A strange man, thought to be Levine, was arrested here a few days ago, but after an investigation the police decided it was a case of mistaken identity and released the suspect.

P. W. Taylor, 466 Fulton St., Brooklyn, who was among the jewelers most active in securing the arrest of Cohen, said yester- day that he had not as yet received any detailed account of the capture of Cohen, but that he expected that Lieutenant Cough- lin would return to Brooklyn to-day (Wed- nesday), when he would know more of the particulars in the matter. Mr. Taylor gave all of the credit for the quick apprehension of Cohen to THE JEWELERS' CIRCULAR- WEEKLY. He said that this was only an- other instance which proved that the best way to catch all who molest jewelers is to publish their description in THE JEW- ELERS' CIRCULAR-WEEKLY. He compli- mented this paper upon its efficiency and usefulness to the trade.

E. S. Brown & Co., Terre Haute, Ind., have dissolved. The business will here- after be conducted by Elbert S. Brown alone.

Brokaw & Hooper, jewelers' auctioneers, 37 Maiden Lane, New York, are conduct- ing a very successful sale for H. G. Shupp, Wilkes Barre, Pa.

Thieves Steal Nearly \$2,500 Worth of Diamonds from Missouri Jeweler in Broad Daylight.

St. Louis, Mo., June 5.—Diamonds worth \$2,490 were stolen Friday in broad daylight from the show window in the jewelry store of Charles Goodrich, Caruthersville, Mo., while Mr. Goodrich was in his store and the street was crowded with people who were looking at the parade of the Southeast Missouri Drummers' Association. Pieces worth \$770 were dropped on the floor by the thieves in their haste.

Mr. Goodrich had fixed up a special display in his window on account of the drummers' meeting. The diamonds he displayed were worth \$3,265. There was a box holding three dozen rings and the lid of the box was used as a tray for diamonds on cards. There were four pieces on cards, four studs and four pairs of ear screws.

The robbers came into the store on the pretext of buying postcards. They did buy cards and pretended to be writing on them while Mr. Goodrich went to the front of the store to wait on a drunken man who wanted to buy a lodge pin. The customer haggled about the price until Mr. Goodrich lost patience and replaced the tray in the case, and to get rid of the troublesome customer walked out on the sidewalk, forgetting all about the men who were writing post cards. When he re-entered the store one of the men was still there, still writing, but in another position, and the other had gone. The remaining one also left a moment later.

It was not until after supper that Mr. Goodrich discovered his loss. Stepping out on the sidewalk for a hit of fresh air he glanced at his window and noticed the absence of the diamonds. Hurrying into the store, he made an examination and found on the floor a pair of ear screws worth \$175 and three studs worth \$250, \$200 and \$145. The pieces had evidently slipped off as the thief tilted the box to get it out of the window.

Mr. Goodrich has offered a reward of \$200 for the apprehension of the thieves, and has given a description of the two men. One was short and of heavy build and had black hair and black eyes. The other was tall and had a long face with pores so large as to give him somewhat the appearance of being pock-marked. Both appeared to be about 26 years old.

Mr. Goodrich is an aged man and the loss is a severe blow to him.

Receiver Appointed for E. T. Gotsch, St. Louis, Mo., in Bankruptcy Proceedings Begun by a Creditor.

St. Louis, Mo., June 5.—Referee in Bankruptcy Coles to-day appointed Chase Morsey receiver for E. T. Gotsch, 4102 Olive St., and issued an order for an examination into the business of Mr. Gotsch. The action was taken on the application of the Eisenstadt Mfg. Co., filed yesterday, asking for an attachment and that Mr. Gotsch be declared an involuntary bankrupt. The Eisenstadt company's action followed the discovery that Gotsch had filed a bill of sale and that his entire stock had been moved out of his store some time between Tuesday afternoon and Wednesday morning. According to statements of in-

terested creditors, they have been unable to ascertain the present whereabouts of Mr. Gotsch and do not know where to look for his stock.

Gotsch, who is a son of Edward A. Gotsch, 4208 Easton Ave., and a nephew of William Gotsch, 4196 Manchester Ave., both well known jewelers, had been in business on Olive St. for something over two years and had been quite successful. He was sanguine that everything would come out all right, but his creditors became concerned last February and held a meeting, and with the permission of Gotsch his books were examined, but the creditors agreed to give him a chance to make good, and no action was taken at that time. Several St. Louis firms are said to be among the creditors.

Programme of the Annual Meeting of the Missouri Society of Retail Jewelers.

St. Louis, Mo., June 5.—Claud Wheeler, Columbia, Mo., president of the Missouri Society of Retail Jewelers, completed to-day the programme for the annual meeting to be held at the Jefferson Hotel here, June 21 and 22.

The subjects to be discussed include the mail-order question and "the jobber who sells at retail," and there is no doubt that the meeting will be enlivened by warm discussions.

The men assigned to read the papers and open the discussions are recognized as among the most progressive and most intelligent in the State. The delegates may be depended upon to do the rest.

The programme is as follows:

MONDAY, JUNE 21.

Morning Session.

- 9:00.—Registration and informal reception.
- 9:45.—Meeting called to order. Prayer.
- 10:00.—Address of welcome. Response by Adam Hafner, of DeSoto.
- 10:30.—Report of secretary and treasurer.
- 10:45.—Roll call and receiving new applications.
- 11:00.—President's address, Claud Wheeler, Columbia.
- 11:30.—"The Mail Order Jeweler and How to Compete With Him," R. E. Meehan, Norborne.
- 12:00.—Adjourn for lunch.

Afternoon Session.

- 1:30.—"The Jobber Who Sells at Retail," R. D. Worrell, Mexico.
- 2:00.—General discussion of above subject.
- 3:00.—Presentation of resolutions and referring to proper committees.
- 3:30.—Adjourn.
- Evening to be arranged for.

TUESDAY, JUNE 22.

Morning Session.

- 9:30.—Call to order. Report of committee on credentials.
- 10:00.—"Possibilities of the Show Window," S. J. Huey, Excelsior Springs.
- 10:30.—"Shell of Our Business," Fred Pilcher, Mexico.
- 11:00.—"Kernel of Our Business," Charles Bard, Sedalia.
- 11:30.—"What Is a Fair Fixed Selling Price?" L. A. Spurlock, Rockport.
- 12:00.—Lunch.
- 1:30.—Report of committee on resolutions.
- 2:00.—"Shall We Instruct for a National Official Organ?" M. E. Schmidt, Booneville.
- 2:30.—"Civic Duties of a Merchant—A Jeweler in Particular," Otto Buder, St. Louis.
- 3:00.—"Should Watch Companies Sell Only Complete Watches?" Anderson Blanton, Paris.
- 5:30.—Fixing time and place of next meeting. Election of officers.
- 7:30.—Grand boat excursion on the Mississippi, free to all retail jewelers and opticians.

John J. Kappes will soon open a jewelry store at Batesville, Ind.

Jos. Schultz has commenced business at 314 Redzie Ave., Chicago, Ill.

Block Bros. recently started in business at 310 State St., Chicago, Ill.

J. R. Miller has engaged in the jewelry business at Warrensburg, Mo.

P. Koopman has opened a jewelry store at Omberson's office, at Iona, Minn.

A. A. Bastar has opened a store at 12th St. and 40th Ave., Chicago, Ill.

C. E. Peterson has rented a quarter block in Bodie, Cal., where he will do repairing.

William J. McDermott has started an enameling business at 299 Weybess St., Providence, R. I.

H. Wahnken & Co. is a new firm opening in precious stones at 632 Bartlett building, Atlantic City, N. J.

R. H. Geise is now located at 575 Atlantic Ave., Atlantic City, N. J., where he has an attractive store.

Z. L. Von Dack & Son have opened a new store at Tracy, Cal., and have in a repairing department.

Philip S. Hyde, eyesight specialist, has opened an optical parlor at 1822 Atlantic Ave., Atlantic City, N. J.

Charles Tourville is about to open a jewelry store in Amherst, Wis. Among other things he will carry a line of jewelry.

A. R. Rausch has opened a store in Lowell, Cal., and is making a specialty of watch and jewelry repairing.

S. Horonstein is another jeweler who has opened a shop in Atlantic City. He is located at 1822 Atlantic Ave.

John Kallmeyer, Atwater, Minn., has leased the front of the Anchor Club building, Dassel, Minn., where he will open a jewelry store.

Fred A. Harmon, until recently a jeweler at the Kansas City Horological and Watch School, has opened a store at Coeur d'Alene, Idaho.

Miller & Wilkens, Philadelphia, Pa., have opened a store at 609 Bartlett building, Atlantic City, N. J., as manufacturers of diamond and pearl setters and pairers.

The Dalton Jewelry Co. is a new concern which has begun business at Atlanta, Ga. H. S. Rosenthal, of Tampa, Fla., manager of the concern, which will carry in jewelry, cut glass and art wares.

Carlisle Indian School Asks Bids to Supply Silver Plated Teaspoons.

WASHINGTON, D. C., June 4.—Mr. J. M. Carlisle, superintendent of the Indian School at Carlisle, Pa., is inviting proposals for the supply of silver plated teaspoons for the school. The proposals are to be received by June 16 for supplies for the year. Among the items called for are 10,000 silver plated teaspoons.

Rollin Anstin, Onawa, Ia., has returned to Akron, O.

Senate Amends Tariff Bill by Inserting Jewelry Schedule Demanded by New England Manufacturers.

WASHINGTON, D. C., June 5.—In the Senate Thursday night, Senator Aldrich introduced an amendment to the jewelry schedule of the proposed paragraph prepared by the committee of the New England Jew and Silversmiths' Association, which passed in the House and rejected. Thursday night the Senate made rapid work in the sundry paragraph. When paragraph 444, known as the jewelry paragraph, was called, Senator Aldrich arose and declared that in accordance with a notice he offered a substitute for paragraph 444, fixing specific duties on jewelry of the ad valorem. The amendments are as follows:

1. Chains, pins, collar, cuff and dress charms, combs, millinery and military ornaments together with all other articles of every material, finished or partly finished, if set with precious stones composed of glass or (except imitation jet), or composed wholly of the value of silver, German silver, white metal, or gun metal, whether or not enameled, covered, or nickel, and designed to be worn on apparel or carried on or about or to the person, valued at 20 cents per piece, one cent each, and in addition three-fifths of one cent per dozen for each if the value exceeds 20 cents per dozen; rings and materials of metal (except iron or steel) or of metal set with glass or paste, finished or partly finished, suitable for use in any of the foregoing articles (except valued at less than 30 cents per yard, if of nickel or nickel-plated china), valued as per gross, three cents per dozen pieces, if set on the one-half of one cent per gross if the value exceeds 72 cents per piece, curb, cable, and other fancy patterns without bar, swivel, soap, or ring, controlled gold plate or of silver, German white metal, or brass, not exceeding one inch in diameter, breadth of thickness, 30 cents per yard, six cents per foot, in addition thereto three-fifths of one cent for each one cent the value exceeds 30 cents per gross, finished or unfinished bags, purses, articles, or parts thereof, made in chief metal mesh composed of silver, German white metal, valued at \$2 per dozen 50 cents per piece, in addition thereto one cent per dozen pieces for each if the value exceeds \$2 per dozen; all of which whether known or not denominated otherwise provided for in any other paragraph of this act, 25 per cent. ad valorem in addition to the specific rate or rates of duty herein provided for on all articles commonly or commercially known as jewelry or parts thereof, finished or unfinished, including chain, mesh, and mesh bags composed of gold or platinum, whether set with diamonds, pearls, cameos, coral or precious or semi-precious stones, or imitation thereof, 60 per cent. ad valorem.

Manufacturing Building of Attleboro, Mass., Menaces Plants of Many Jewelry Firms.

ATTLEBORO, June 7.—Attleboro was given a scare this morning when a fire broke out in the old stone Power building, as it is now called, the Robinson building. The factory is located in the jewelry district and the flames raged with a fury that indicated they would spread to the adjoining buildings. Efficient work by the Attleboro fire department, under Chief Packard, confined the fire entirely to the shop of Smith & Johnson, on the top floor. The fire had its inception in that shop in the dipping room. When discovered the flames had reached such proportions that it was beyond the reach of the em-

ployes, although they made a splendid fight. Dobra Bros., E. H. Eggleston & Co., and the Winthrop Mfg. Co., on the lower floors, were not touched by the flames, but sustained a loss through water. It is estimated that the fire will cause a damage of \$15,000. Smith & Richardson are the heaviest sufferers.

Optical Society of State of New York Holds Meeting at Albany and Decides to Affiliate With the A. A. O.

ALBANY, N. Y., June 7.—Nearly 100 members of the Optical Society of the State of New York attended the 14th annual convention, held to-day in the Ten Eyck Hotel, in this city. The principal business of the meeting was the consideration of questions connected with the enforcement of the new optometry law. The entire afternoon was given up to a series of addresses on the general subject, "How to Make the Optometry Law Most Effective." Among those who spoke on this subject were: W. W. Bissell, Rochester; James Holden, Syracuse; P. Boyle, Glens Falls; H. F. Pitts, Kingston; E. A. Newing, Binghamton.

The officers and executive committee were authorized to obtain legal advice, preferably from W. W. Armstrong, Rochester, who framed the optometry bill when he was a member of the State Senate, as to the best method for optical societies to proceed in prosecuting violators of the law.

President Edward E. Arrington, Rochester, presided at the meeting and spoke on various phases of optometry in his annual address. Reports were submitted by P. A. Dilworth, New York, as secretary; J. P. Simcox, Buffalo, treasurer; H. M. Bestor, Rochester, chairman of the executive committee, and B. B. Clark, Rochester, chairman of the legislative committee.

It was decided to affiliate with the American Association of Opticians, beginning Jan. 1 next. President Arrington was chosen a delegate to the national convention, to be held June 21-24 in Atlanta, Ga.

The old officers were unanimously re-elected, including President Arrington, Secretary Dilworth, Treasurer Simcox and Vice-President A. M. Kenney, Utica.

In the evening a banquet was enjoyed at which Governor Hughes, who signed the optometry bill, addressed the optometrists. Speeches were made by C. F. Prentice, New York, chairman of the New York State Board of Examiners in Optometry; A. Jay Cross, New York, and others.

Jewelry Schedules in the New Tariff of the Dutch East Indies.

WASHINGTON, D. C., June 6.—The Dutch East Indies has established a new import tariff superseding that of December, 1899, and among its provisions are the following:

- Gold and silver bars; free.
- Gold and silver coins; free.
- Corals of glass; 6 per cent. ad valorem.
- Crystal; 10 per cent. ad valorem.
- Ingots of gold; free.
- Jewelry, other than of gold and silver; 6 per cent. ad valorem.
- Optical instruments; free.
- Pearls, set or not; free.
- Plated ware; 6 per cent. ad valorem.
- Precious stones, set or unset; free.
- Silver; free.
- German silver; free.
- Jewelry, of gold or silver; free.
- Clocks and watches; 6 per cent. ad valorem.

Newark.

B. M. Shanley, Jr., acted as toastmaster at the 59th anniversary banquet of the Young Men's Catholic Association, held here recently.

Formal announcement was made last week of the change of the concern known heretofore as Schwartz & Gray, Inc., to the Gray-Howes Co., Inc., makers of gold jewelry, 95 Oliver St. The members of the firm are Charles B. Gray and Jean P. Howes.

J. E. Braunsdrof, just back from Europe after a successful business tour, reports that American goods are being sold there in fair quantities. Mr. Braunsdrof, in conversing with several of the jewelry makers and retailers abroad, found a generally optimistic feeling.

Leon Sutton is out on bail in Jersey City, N. J., on a charge of larceny. He is accused by Michael Breen, a diamond dealer, of having taken two diamond rings from him in a saloon. Breen was endeavoring to sell Sutton the rings and handed him several. When Sutton returned them Breen claimed two were missing. Later they were found on the floor nearby. The arrest followed.

Charles Jeones or Genosky, as the name is sometimes given, who, it is alleged, was caught in the cellar of George J. Busch's jewelry store, High St. and Springfield Ave. recently, sawing the beams of the floor above, was arraigned, last week, before Judge Ten Eyck in the Court of Common Pleas and pleaded not guilty. He was unable to furnish bail and was remanded for trial on June 9.

Judge Adams, sitting in the Supreme Court, Circuit, granted a non-suit, last week, in the action brought by Albert Meurer against the William B. Kerr Co. Mr. Meurer is a gold worker by trade and was employed by the Kerr concern. About a year ago he was chiseling a piece of hard alloy when a chip flew and lodged in his right eye, destroying the sight. He sued for the sum of \$15,000 damages. The defense contended that he assumed certain risks when he took the job and that the employer was in no way responsible. This contention was sustained by the court.

Felix Lemmer and Edward Anderson have been held by the Newark authorities for the Grand Jury on a charge of stealing from the jewelry department of the W. V. Snyder Co. The alleged robbery occurred more than a month ago. Lemmer was arrested last week and Anderson a few days later. Through the apprehension of the former rings, watches, opera glasses, shirt studs, tie clasps and gold pencils were recovered. In all nearly \$500 worth of goods were found. It was while Lemmer was working in the store, which was at that time about to become the property of Goerke & Co., that the thefts are alleged to have occurred. Watches were traced by detectives through the numbers of the cases. Both Anderson and Lemmer were held under bonds. The former is said to have a pawn ticket for one of the watches in his possession. At the time of the thefts he was employed in the store as an electrician. Lemmer's father was doing the painting at the store.

GORHAM SILVER

¶ Every jeweler will want to make additions to his stock to meet the special demands of the WEDDING SEASON. Now is the best time to make selections.

¶ The Gorham Company have provided for every want, large and small.

Index to News and Special Articles.

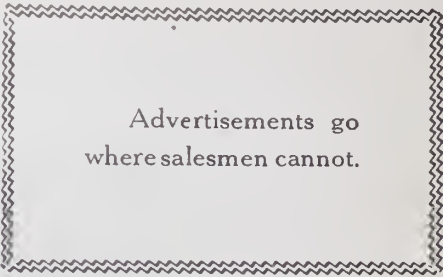

Table with 2 columns: Article Title and Page. Includes entries like 'Remarkable Old Celestial Globe Inlaid With...', 'The Effectiveness of Publicity', 'An Important Ruling in Bankruptcy Law', etc.

IN another column of this issue will be found the draft of the letters which have been sent to the manufacturers of watches and watch cases by the committee of the Pittsburgh branch of the Pennsylvania Retail Jewelers' Association appointed to draw up a plan looking to the abolition of the cutting of watch prices. The committee, which worked under John M. Roberts, of Pittsburgh, as chairman, has given the subject the most careful consideration and spent time and trouble in formulating a retail price list for watch movements and cases which has been submitted to manufacturers with the letters before referred to. The list is not published this week, but may appear in a later issue, when it is definitely decided exactly what these prices will be. The suggestions of the committee have the endorsement of the jewelers of the State of Pennsylvania, and the matter may be laid before the convention of the American National Retail Jewelers' Association when that body meets in August in Omaha. It is possible that the manufacturers of watch movements and cases (most, if not all, of whom seem to appreciate the work of the committee) will agree with the committee upon a definite list of retail selling prices which they will protect, in which event further action on the subject on the part of the retail jewelers will be unnecessary.

The Effectiveness of Publicity. THE effectiveness of a trade journal as a medium to capture thieves and crooks has too often been demonstrated to require mention in these columns, and publicity has been found to be equally effective in locating merchants or workmen who have skipped out from a locality after indulging in transactions which proved disastrous to people who trusted them. However, in no recent instance has the latter been more quickly accomplished than in the incident reported in another column of this issue which led to the arrest in Cincinnati, O., of Morris Cohen, of the firm of Cohen & Levine, Brooklyn jewelers, who skipped out from the latter city early in February, leaving a number of jewelers to mourn the loss of goods which had been entrusted to them.

Despite the fact that the Brooklyn police have been working on the case for months notifying the police in other cities to help them in the search, no trace of either of these men had been found. One of the victims, however, an old retail jeweler of Brooklyn and a subscriber of THE JEWELERS' CIRCULAR-WEEKLY, who had noted the effective service performed by this journal in many instances of this kind, insisted that the police supply us with a photograph and full description of the men wanted. A photograph of Cohen was obtained, and this, with the description of both men, appeared in the issue of May 26. THE JEWELERS' CIRCULAR-WEEKLY reached Cincinnati on May 27, and the following day Cohen was in custody in that city.

The missing jeweler had been working in Cincinnati since the first part of March under an assumed name, and had been apparently absolutely safe from arrest until the picture appeared, when a young man working in another jewelry shop who hap-

Advertisements go where salesmen cannot.

pened to have seen the missing jeweler very often, recognized the photograph the moment it appeared, and immediately sent word to the police.

When arrested Cohen acknowledged his identity and also the truth of the story which appeared in this journal. He said, however, that the missing goods were in the hands of his partner, and the last he had seen of him was in Rochester. It is likely that had the police supplied THE JEWELERS' CIRCULAR-WEEKLY with pictures of both men, Levine's arrest would also have been accomplished by this time.

An Important Ruling in Bankruptcy Law.

An important decision in bankruptcy law was rendered recently by Judge Dodge in the United States District Court at Boston, and is to the effect that debts discharged under a common law assignment must be added to the claims unpaid or liabilities of the assignor when he is petitioned into bankruptcy. By this court's decision a common law assignment is regarded as a constructive fraud upon the bankruptcy act that attempts to hinder and evade the workings of the federal courts and has a tendency to deprive the latter of their jurisdiction over bankrupt estates. This decision will have an important bearing on all proceedings of any kind under State laws, even those which have heretofore been considered as not abolished by the Federal Bankruptcy Law, but as effective as long as the bankruptcy act had not been invoked.

This decision of Judge Dodge arose out of a petition in bankruptcy filed against a Boston jeweler, who had previously made a common law assignment to his counsel, June 1, 1908. At this time his liabilities amounted to \$4,529 and his assignee later made a settlement with creditors on a basis of 25 cents on a dollar. Releases were signed and the assignment assented to by all but nine creditors who instituted the involuntary bankruptcy proceedings. The total claims of the petitioners amounted to but \$900, and as the bankruptcy law provides that an involuntary petition can only be made against a debtor when the debts are more than \$1,000, the petition was fought by the assignee and debtor on this ground. The petitioning creditor in answer to this defense alleged that the liabilities of the defendant were not only the \$900 he owed them but also the debts to other creditors, which had been paid and discharged under the assignment proceedings, and the referee who heard the matter took this view of the case. The District Court in sustaining the referee ruled that, under the Bankruptcy Law, indebtedness is based upon the amount of provable debts existing at the

time of the filing of the petition; debts in this case paid by the assignee revived for the purpose of being paid with the unpaid debts; also that debts are preferences so that they come in the category of provable claims against the entire assignment is a preference. This decision will have an important bearing on bankruptcy law as it is the first time that the points at issue have been adjudicated by a Federal tribunal.

Large Gem Imports During May.

THE satisfaction of the diamond and stone market as the importations of gems by this country is concerned, has kept up as well throughout the month of May just past as any of the preceding months of the year. The total importations for May exceed the amount recorded for April, comparing favorably with the average of previous years. While the value of precious stones and pearls recorded by appraisers stores in New York during the past month did not equal the total value of the month of May, 1907, 1906 and 1905 are greater than the total importations of May during 1904, 1903 and 1902, and over five times the value of the importations of May, 1908.

According to the official figures furnished by the Appraiser of New York, Washington, last month's gem imports amounted to \$2,689,213.49 as against \$463,454.88 for the corresponding month of 1908. The total value of the precious cut stones at New York was very large, amounting to \$1,967,513.87 as against \$287,308.77 last year, and the value of uncut stones, principally diamonds, amounted to \$721,697.62 as against \$146.08. In view of the above figures, the satisfaction at the demand of the market expressed in the diamond centers of Amsterdam, Antwerp and London can readily be understood, particularly in view of the number of buyers from this country in the European diamond centers who have taken into consideration.

How the importations of last month compare with those of previous years is seen at a glance from the following table:

May.	Uncut.	Cut.
1909....	\$721,697.62	\$1,967,513.87
1908....	176,146.08	287,308.77
1907....	624,829.00	2,556,606.00
1906....	1,347,862.10	2,673,512.00
1905....	972,918.95	2,260,906.36
1904....	1,051,594.42	1,328,241.50
1903....	567,086.18	1,855,197.78
1902....	889,229.02	1,386,617.04
1901....	1,235,877.78	1,944,385.87
1900....	515,597.85	801,761.16
1899....	432,851.45	1,200,711.80
1898....	134,909.10	202,759.85

L. W. Stock, Clearfield, Pa., is in a position with Edward B. Lee, jeweler and silversmith at North Washington, Wash., as has also Jos. Bockun, Lecky now employs five men in that business in North Yakima at a great rate. He expects to open his store in August and is now made in Portland special fixtures will cost between \$8,000 and \$10,000.

Cockburn, of Dickens, Cockburn oronto, Can., was a visitor in this week. He sailed yesterday on the n for Bermuda.

m Fisher, said to be a jewelry of this city, was fined \$10 last week and, N. Y., for peddling in that out having a proper license.

Benjamin, a traveler for Boss & Attleboro Falls, Mass., was taken Rochester, N. Y., last week, and ve up his trip and come home.

re Schisgall, importer of clocks, nbers St., started, Monday night, ee weeks' trip. He will visit Chi- ladelphia, Boston and other cities e trip.

The Newberger Jewelry Co. has opened a store at 1 Park Row. The members of the firm were formerly in the loan business at Eighth Ave. and 48th St., and have been in the trade 15 years.

Gardner F. Williams, the well known authority on diamond mining, sailed, Saturday, on the *Celtic* for England, en route for South Africa. Mr. Williams arrived in New York, last Friday, from the Pacific Coast.

C. N. Grey, attorney for the Jewelers Board of Trade, is in New Orleans on business for the Board, and will be in Mobile, Ala., to-day, to represent creditors at the sale of the S. A. Burgoyne Jewelry Co.'s stock. He will stop at Atlanta, Ga., on his way back, on business matters.

Henry Ferris, a French jeweler, who lived at 44 Ninth Ave., was found dead in his bed, last Thursday afternoon, by Mrs. Mary Santio, a housekeeper. Dr. Monroe, of the New York Hospital, advised Coroner Acritelli that an autopsy be performed. The body was removed to the Morgue.

Sidney K. Kaufer, of Kaufer & Kreugel, manufacturers of diamond mountings, 102 Fulton St., was married, last evening, at Murray's, on 42d St., to Miss Rose Goldblum, daughter of Joseph Goldblum, of this city. Only the immediate relatives of the contracting parties were present at the ceremony. A wedding supper was served and the happy couple then started on a honeymoon trip which will include Atlantic City, Niagara Falls and other places.

Disappointed because her husband, who had been a manufacturer of jewelry boxes in this city, had been forced to close down his plant and take a position with a big firm of jewelers, Mrs. Elizabeth Hensler, living at 2135 Jamaica Ave., Brooklyn Hills, tried to commit suicide last week. She was found by the neighbors lying on a couch with a tube from a gas jet in her mouth. The police were notified and she was removed to St. Mary's Hospital in Jamaica. It is reported that she will recover.

The Chas. F. Noyes Co. has leased from Seth Sprague Terry to Edward Holbrook, of the Gorham Co., for 21 years, the building at 20 John St. Mr. Holbrook is president of the Maiden Lane Realty Co., which owns the Silversmiths building at 15 and 17 Maiden Lane, running through to 18 and 22 John St. The lease to Mr. Holbrook is the outcome of an interesting real estate situation which occurred when the single lot at 20 John St. was shut in on both sides by the erection of the Silversmiths building. A new front and floors are being laid in the building which is being remodeled.

The June meeting of the Optometrical Society of the City of New York will be held this evening, at eight o'clock, at 29 W. 39th St. The executive committee, in all probability, will report on its work of revising and printing the new constitution and by-laws, and on the printing of the certificates of membership. The matter of rates, etc., to the annual meeting of the Association of Opticians will be discussed for the benefit of those who expect to go to Atlanta. A flat round trip rate of \$35.85 has been offered by trunk lines, but the

trip can be made for less, it is said. At the meeting there will be a number of applications for membership to be voted upon.

James Hyde Young, who was at one time connected with the old firm of Smith, Young & Co., who were located at 2 Maiden Lane, died at his home, 71 E. 96th St., Wednesday of last week, of pneumonia. He was born in 1825 on Fulton St. As a young man he entered the firm of Smith, Young & Co., founded by his father. Many years ago he retired from active business. He was married to Sophie Douglass, daughter of George Douglass, an old time commission merchant. Deceased was identified for a number of years with the Fifth Avenue Presbyterian Church and was prominent in Sunday School work. The funeral was held last Friday morning in the Fifth Avenue Presbyterian Church.

The Jewelers Security Alliance has been notified of the robbery of the jewelry store of John C. Dwyer, 30 E. Washington St., New Castle, Pa., where \$350 worth of jewelry, including three gold watches and two diamond rings, which were among the prizes offered to the winner of a newspaper popularity contest, were stolen. Entrance was gained to the store through a skylight 20 feet above the floor. The robber removed a pane of glass and cut through the iron gratings which protected the entrance, and then, by using a rope, swung himself to a case beneath. The clerk who visited the store on the night of the robbery to arrange the lights for the night did not see anything amiss when he was there. The burglar evidently made his exit the same way he entered. A reward of \$100 is offered by the Alliance for the apprehension and conviction of the man.

The 26th annual exhibit of the work of the students of the Pratt Institute, Brooklyn, was held Thursday, Friday and Saturday of last week and attracted much attention. Prominent in the exhibit was the display of jewelry, art metal work and enameling, on the fourth floor of the main building. The exhibits were displayed in large glass cases and consisted of a varied collection of rings, pendants, bracelets, stick pins, brooches, scarf pins and hammered copper. The course in jewelry and metal chasing during the past year has met with marked success. The regular course extends through three years. The work is designed and modeled in wax, cast in plaster and then wrought in copper, silver and gold. The course is under the supervision of Walter Scott Perry, director of the department of applied arts, but immediately in charge of Carl F. Hamann, who directs the work both of the day and evening classes. He is an expert jeweler, having been formerly connected with Durand & Co., and later with Tiffany & Co. The winner of this year's silver medal in the general exhibition was Ethel Sutherland, who showed a bracelet made in gold of delicate filigree work studded with lapis lazuli stones set in the latest approved manner. A splendid display shown in another case earned for Benjamin I. Carpenter of the art metal course the gold medal presented to him by the institute for showing the highest degree of skill in his class.

Philadelphia Jewelers' Club has extended an invitation to members of the club, of this city, to attend their celebration, to be held in Philadelphia June 29. One of the principal

features of the day will be a baseball game between two teams representing each club, which will be played at American League Park.

Notice is given to creditors of Edward J. Kornfeld, formerly in the optical business at 110 E. 23d St., that a meeting of creditors will be held at the office of Stanley M. Dexter, trustee in bankruptcy, on June 12, at 12 o'clock, at which time creditors may attend, prove their claims and appoint a trustee. Mr. Kornfeld was adjudicated a bankrupt on May 20.

The Board of United States General Appraisers has sustained a claim filed by Sigmund & Weil regarding the classification of metal boxes with painted porcelain tops. The Collector assessed them at 60 per cent. under the Dingley tariff as decorated china. General Appraiser Hay, who wrote the decision for the Board, says that the importers' contention that the metal is the component of chief value is correct and the articles should be so assessed. It is, therefore, held that the proper rate of assessment is 15 per cent.

Eugene McGuire, a retired jeweler of this city, died, Tuesday of last week, at St. Catharine's Hospital, and the funeral services were held from that place Thursday afternoon. His home was at 51 Prospect Pl., Brooklyn. He was born in County Mayo, Ireland, 81 years ago, and since his retirement from business 15 years ago made his home in Brooklyn. He was a member of the Morning Star Council, Knights of Columbus, and Hughes Council, Catholic Benevolent Legion. He leaves one son, Eugene. The interment was in Calvary Cemetery.

A man who disembarked, Saturday, from the French liner *La Provence* attracted the attention of Timothy Donohue, Special Customs Inspector, who followed him and learned from his baggage labels that he was Dr. John Rossi, of Utica. The inspector, it is alleged, found a number of small white paper boxes containing a collection of undeclared jewelry. The boxes contained a pair of diamond and pearl earrings, a gold bracelet and other smaller articles of adornment. They were seized. The man was permitted to go to Utica, where he said that he had an important operation to perform.

A suit has been started by John Lawrence, Newark, N. J., against L. W. Sweet & Co., 37 Maiden Lane, to recover damages for alleged false imprisonment growing out of his arrest in May, 1907. This was on a charge preferred against him that he had removed the setting from a diamond ring which he had purchased on the instalment plan and substituted a paste diamond in its place. The charge was not sustained in court. A member of the firm of L. W. Sweet & Co. said that the ring was sold to Lawrence by one man and another man went to collect the payment, and personally preferred the charges against him.

Wholesale jewelers from various parts of the country are in New York to attend the annual convention of the National Wholesale Jewelers' Association. Mr. Massa, of the Bauman-Massa Jewelry Co., St. Louis, president of the association, was here, yesterday, to attend meetings of the various committees, and will preside at the conven-

tion which is to be held in the Silver-smiths' building, 15 Maiden Lane. New officers are to be elected and business of importance to the association transacted. Friday the New York association will entertain the out-of-town members by a water trip to Coney Island, where a shore dinner will be served.

The Jewelers Board of Trade reports that the organization will not be able to properly prosecute proceedings in the matter of N. Berger, of this city. It was the Board's intention to have an exhaustive investigation made in order to decide whether or not the debtor's offer of compromise should be accepted, and in accordance with this plan attorneys of the Board filed objections to the confirmation of the composition. At the last moment it became necessary to have executed the affidavit of creditors in whose name the objection had been filed, and who had authorized the Board to use its name. The creditors refused to execute same, and in consequence the whole matter has fallen through. The indications now are that the debtor's offer of compromise, which has been accepted by a majority of creditors in number and amount, will be confirmed by the court.

The Jewelers 24 Karat Club of this city has sent out announcements that the eighth annual outing of the club will be held July 31 at Port-au-Peck Hotel, Long Branch, N. J. Members will leave New York by the Sandy Hook boat from the foot of Cedar St., at 9:15 A.M. They will go by train to East Long Branch Station, and then by trolley to Pleasure Bay. It is desired that many members by attending will make this Summer's outing more successful than the one held a year ago, when there were 150 present. A Rhode Island clam bake will be served at 2 o'clock, and music will be furnished by the band of the First Regiment, N. G. N. J. The Athletic Committee is working on field events, including baseball, etc., and a notice will be mailed to the members later about this part of the day's pleasure. Members of the Outing Committee are: David Kaiser, chairman; Geo. R. Whitehead, Edwin R. Crippen, J. Warren Alford and Percy H. Savory.

Despite the inclemency of the weather the annual outing of the Maiden Lane Outing Club was held Saturday at Ekstein's Park, West New Brighton, S. I., and prove a decided success in every respect. Saturday morning it looked as if there would not be a very large attendance because of the rain, which it seemed would make it impossible to hold the ball game and other field events, but 59 members of the association took the Staten Island ferry during the morning and were on hand in time to witness the ball game, which was played between teams captained respectively by George Heywood and James Lincoln. The contest was interesting throughout, and not until the last inning had been played was it certain which team would win. The final result was 9 to 7 in favor of Captain Heywood's tossers. Heywood and Roberts were the batteries for the winning team and Lincoln and Ulmer officiated for the opponents. The game was umpired by Stanley. After the ball game

he was served and in the afternoon events were held. They included the following contests: Shot putting, won by Le Simons; running broad jump, George Heywood; 50-yard dash, George Roberts; throwing base ball for distance, Watson and Frank Byrnes, and the quoit contest, won by W. J. Ward. After the contest, won by W. J. Ward. After the events the members of the club dined at Ekstein's and an elaborate supper served at 6:30 P.M. During the evening the bowling, card playing and music were enjoyed and provided enjoyment for the oval jewelers. The outing broke up at 10 o'clock and all declared that they had a fine time.

A voluntary petition in bankruptcy has been filed against Bernhard Braunstein, of N. J., and Frank W. Hastings, of Jersey City. Hastings has been appointed receiver and has taken possession of the business, with permission of the court to continue the same for a period of two weeks.

In the list of recent accessions to the Metropolitan Museum of Art are a vase, Chinese, Ming dynasty; a pot, Canton, about 1790; tile decorated, Persian, 19th century; 7,020 beads, Venetian, gift of H. Rosen; two copies bronze medal, Saint-Gaudens, by James Earle Smith of Mr. and Mrs. Frederick S. Gutzwiller; American Gynecology, 1809-1909, by F. Ziegler; a dallion, portrait of Edgar Allan Poe, 1849, by Edith Woodman Burleigh; bronze medallion, Major-Lyesses S. Grant, 1863, by D. Anselme F. Paquet; silver medal, 300th Anniversary of Gustavus Adolphus, King of Sweden, 1644, by A. Lindberg; silver coin, and Sophia of Sweden (2kr.); a medallion, Chinese, Kang-hsi and 17th century; marble ciborium of the Vatican, Fiano, Rome, about 1150; a bronze statuette by Paul W. Schmitt; bronze statuette, Queen and her attendants, by Henry Linder; bronze statuette of a Jaguar, by Arthur Putnam.

A list of loans are: Collection of Lowestoft porcelain, early 19th century, lent by Charles S. Fairchild; 62 pieces known as the Gay Collection of old silver, 15th to 18th centuries, lent by Mrs. Wells; silver tea set of four pieces, American, lent by Mrs. F. G. De Witt; silver melon-shaped teapot, New York, about 1720, lent by Mrs. Edward Verplanck; two silver, one terra-cotta, 88 bronze statuettes, 10 bronze bas reliefs by Louis Barye; bronze medallion of Louis Barye, by A. Patey, lent by Mrs. L. Lawrence; marble bust, of a boy, by Antonio Rosellino, lent by George Blumenthal.

Zebeck Jewelry Co., East St. Louis, has moved its headquarters to 283 Schuyler street, Chicago, Ill., where the concern has another retail jewelry establishment for a short time.

Atlantic City, N. J.

J. Segal, with Weiner & Garson, New York, was here last week.

George K. Ware has succeeded H. M. Fitton, at 1707 Atlantic Ave.

Charles B. Chambers, with the Dennison Mfg. Co., was visiting the trade.

M. Sickles, of M. Sickles & Sons, Philadelphia, spent Decoration Day here.

J. Klipper, with Stern, Dreiblatt & Co., New York, has been calling on the trade.

George W. Dover, of Providence, R. I., has been taking in the pleasures of the resort.

Mr. Moser, of Moser & Whyte, New York, was in the city on a selling trip recently.

S. Horonstein, manufacturing jeweler, who was with S. Schneider, has opened a shop at 1822 Atlantic Ave.

H. M. Fitton, who used to be in the jewelry business at 1707 Atlantic Ave., is living in the country at Linwood, N. J.

B. Lieberman, retail jeweler and diamond setter, colorer and repairer, has moved from 805 Arctic Ave. to 1003 Arctic Ave.

Charles H. Godfrey, of 1816 Atlantic Ave., has put in a line of watches and jewelry and will extend the line in the Fall.

Nemi Nemirowsky has opened a jewelry manufacturing and repair business at M. L. Yuba's jewelry store, 1708 Atlantic Ave.

Norman Lowry, who was with Joseph Kern, of Wilmington, Del., has taken a position as watchmaker for George K. Ware.

H. McClain, an optician at 1627 Atlantic Ave., having the finest optical parlors here, has put in a small line of jewelry. He is also a watchmaker.

Mr. Weintraub has started the Art Jewelry Mfg. Co., importers of precious and semi-precious stones and making jewelry, at 632 Bartlett building.

S. Schneider, watchmaker, jeweler and optician, at 1812 Atlantic Ave., has bought out his partner, St. Horonstein, and is running the business himself.

J. Spandau, of Spandau Bros., Pittsburg, Pa., is expected soon to visit M. Friedeberg, 1516 Atlantic Ave. Mr. Friedeberg has been in business here 18 years.

Walker Toomes, engraver, who was with Selheimer, at 8th and Sansom Sts., Philadelphia, is now in business at Holsts, Atlantic and Pennsylvania Aves.

Bates & Co., 1000 Atlantic Ave., have had the front of the store repainted. Mr. Bates has built a new house at Northfield, N. J., where he takes a great interest in golf.

Kasyen & Lipshitz is a new firm of manufacturing jewelers and diamond setters at 1638 Atlantic Ave., having bought out P. Carroll, who is paralyzed at his home, 2219 Pacific Ave.

M. L. Yubas, 1708 Atlantic Ave., watchmaker and optician, is known as Goldstein, but changed his name to Yubas and graduated May 25 as an M.D. His son, S. Yubas, is in charge of the store.

The Atlantic Optical Co. has been opened here by L. Jacobson, at 1318 Atlantic Ave. Mr. Jacobson was formerly a jeweler at 2612 Germantown Ave., Philadelphia. A stock of jewelry has been put in.

Ingraham & Walton, jewelers and opticians, 1408 Atlantic Ave., will dissolve partnership, owing to lack of ——— in the

present location. Joseph Ingraham is a druggist and will retire from the business. Charles Walton will begin business somewhere else and is looking for a location.

Lylburn H. Bewley, jeweler and optician, has been in business here for 38 years, has seen this city grow from a hamlet to a prosperous city and one of the greatest resorts in the world. He remembers the time when the ocean came up to the lighthouse, while now it is a couple of blocks away. Mr. Bewley will sell out his business and retire.

H. L. Holst, manufacturing jeweler and diamond setter, has moved from 1026 Atlantic Ave. to larger quarters, with better facilities, at Atlantic and Pennsylvania Aves. He has put two extra men on and is making a specialty of order work in drop earrings, large chased rings, Masonic and badge work, etc. Mr. Holst has taken up a new line in jobbing materials and tools to the trade.

From a village of a few hundred Atlantic city has grown to have a permanent population of 30,000 and a transient population in Summer of 100,000 to 200,000. A great deal of money is spent here for jewelry. The Oriental styles prevail to a great extent and are very popular. There are to-day some 60 firms in the business, all carrying large and varied stocks. One noticeable change this year is the increase in the manufacturing jewelry trade,—that is, small manufacturers who make only order work for the trade in rings, pins, brooches, etc., and do repair work of all kinds. The business is certainly growing in every way.

Trans-Atlantic Voyagers.

C. H. Tibbits, Wallingford, Conn., will sail for Europe, June 19.

Mr. and Mrs. Geo. H. Cahoon, Providence, R. I., will sail, June 20, from Boston, Mass.

Mrs. Eliza Guertin has been appointed Probate Court of Pawtucket as administratrix in the estate of her husband, V. Guertin, with bond of \$30,000. Her petition for widow's allowance has been granted.

The Advertisers' Novelty Co., J. Peacock, manager, furnished 1,200 emblem badges for the 14th annual convention of the United Commercial Association of America in this city last week.

Frederick A. Ballou, of B. A. I. Co., Inc., has just purchased a 30-horse-power tourabout automobile which he will use in his daily trips this Summer between his factory here and his home at Barrington.

Mr. and Mrs. George H. Cahoon and daughter, Miss Edna H. Cahoon, left on June 26, from Boston for Liverpool on the *Cymric*. They will take their automobile with them and expect to return through England and France.

Mr. Shattuck has accepted a position as eastern representative for Ford & Carter, of this city, and is now on his way to New York for that firm. He was formerly San Francisco representative for Riley & French, of North Attleboro.

John M. Buffinton has been elected treasurer of the Universalist Club of Attleboro Island, and at the annual meeting last night he was chosen one of the delegates to the national Universalist convention to be held at Detroit, Mich., in August.

Frank T. Pearce was chairman of the entertainment committee of the banquet of the Association of Templar Commanders at the V. Club, this city, last week. Among the dinner speakers was Mayor H. D. F. Phillips.

Eustace Crees, of Crees & Co., has discharged a mortgage held by Walker on real estate on the north side of Norwich Ave. of \$2,800, receiving in return one of \$2,000, given to the

Wams Savings Fund & Loan Associa-

Dr. F. Foster, superintendent of the
 Thore W. Foster & Bro. Co., had a nar-
 escape from serious injury Thursday
 when an electric car collided with his auto-
 one at the corner of Dorrance and Wey-
 sts. The machine was quite badly
 aged.

Aldridge G. Pearce, of the F. T. Pearce
 left here, Saturday noon, as one of the
 delegates from Palestine Temple of
 city to the annual convention of the
 tial Council, Mystic Shrine, at Louisi-
 Ky. He expects to arrive home about
 sh.

avor Henry Fletcher was one of the
 aters at the banquet in connection with
 th anniversary of Pilgrim Congrega-
 Church, Wednesday evening. John
 er, superintendent for Waite-Thresh-
 was chairman of the committee of
 ements.

A hearing of the petition of John Nel-
 r a new trial on the charge of re-
 st len property—gold and plated
 jewelry—from an employe of the
 au & Cook Co., of Attleboro, will
 d in the Superior Court on Saturday,
 before Judge George T. Brown.

A wedding of Rogers Townley Staf-
 one of the best known traveling sales-
 this city, and Miss Nan Jeffers, of
 wket, will take place on June 15.
 to a recent death in the family of
 afford, the wedding will be private.
 e members of the immediate families
 vited.

A no-alarm fire broke out on the night
 e 1 in the Mason building, Paw-
 k. It was fought for two hours by
 ire department and caused about
 damage. The jewelry store of A.
 vghn & Co. was damaged to the ex-
 \$2,500 by water, smoke and flames,
 t loss is covered by insurance.

Wam Whitaker paid a costly visit to
 n, a few days ago, unless the police
 in locating a package containing
 as, stick pins and brooches, to the
 value of \$350. He laid the package
 while he was talking with some
 n, and when he turned to pick it up
 he was ready to leave the place it
 appeared.

and Mrs. George H. Holmes will
 the *Cedric* from New York for
 enrol on Saturday next. Mr. Holmes
 urn after a short stay, but expects
 n his family in France and return
 em in October. Mr. Holmes and
 s Holmes intend to visit Scotland,
 e Germany, Switzerland, Italy and
 la during their stay abroad.

W. J. Feeley Co. has specially de-
 e wo handsome trophies to be award-
 sizes at the coming athletic field day
 he Columbus Club here. The Governor
 prize will be a bronze medallion
 eeting the landing of Columbus and
 estcheon of the State of Rhode Island,
 t Mayor Fletcher trophy, represent-
 t landing of Roger Williams, will be

ing the foreign importations received
 u the Providence Custom House the
 eek were the following: From
 n nine packages of imitation pre-

cious stones and one package of jewelry;
 from Hamburg, one package imitation pre-
 cious stones and two packages manufac-
 tures of gold and silver; from Havre, one
 package manufactures of metal; from Liv-
 erpool, 11 packages of manufactures of
 metal; from London, one package of pearls.

The T. W. Lind Co., of this city, is made
 defendant in a suit filed in the Superior
 Court, last week, by Umberto Rossi, who
 says that he was employed by the defend-
 ant corporation to feed a power press, and
 that a plunger fell and caught his right
 hand, March 22, crushing the middle finger
 and making amputation necessary. The
 damages are placed at \$1,000.

Everything is in readiness for the annual
 outing of the New England Manufacturing
 Jewelers' and Silversmiths' Association on
 Friday, June 18. After a parade in this city
 the members and guests will take a special
 steamer to Field's Point, where a shore
 dinner will be served and then sail down
 the bay to Newport, where the Naval Sta-
 tion will be visited. On the sail up the bay
 a lunch will be served. It is expected that
 there will be upwards of 450 or 500 in the
 party.

The following were among the jewelry
 buyers who were in this city during the
 past week: H. Meister, of the Pittsburg
 Dry Goods Co., Pittsburg, Pa.; B. Wilf, of
 D. Marx & Sons, St. Paul, Minn.; Carl
 Austin, of Austin & Co., Toronto, Ont.;
 Mr. Buckner, of Rice, Stix Dry Goods Co.,
 St. Louis, Mo.; S. T. Goodrich, Omaha,
 Nebr.; Edward Rothschild, of the Ameri-
 can Comb & Novelty Co., Chicago; Sol.
 Prentke, of Prentke Bros., Cleveland, O.;
 James Eastwood, New Glasgow, N. S.;
 H. Pichel, of Samstag & Hilder Bros., New
 York, and E. W. Spier, of Lipman, Spier
 & Hahn, New York.

Frank P. Pearce and his son, Aldridge
 G. Pearce, were ushers at the 40th wedding
 anniversary of Mr. and Mrs. George E.
 Boyden, last week. Among those present
 were: Mayor Henry Fletcher and wife,
 Lieut.-Gov. Arthur W. Dennis and wife,
 Mr. and Mrs. Henry A. Kirby, Mrs. Frank
 T. Pearce, Mr. and Mrs. John M. Buffin-
 ton, Mr. and Mrs. Albert A. Bushbee, of
 Attleboro; Mr. and Mrs. Robert E. Bud-
 long, Mr. and Mrs. William H. Draper, Mr.
 and Mrs. Orcen C. Devereux, Mr. and Mrs.
 George H. Grant, Mr. and Mrs. Henry W.
 Harvey, Mr. and Mrs. George W. Kittridge
 and Mr. and Mrs. Horace W. Steere.

The New England Manufacturing Jew-
 elers' and Silversmiths' Association an-
 nounce that the following local firms have
 joined those proposing to close their plants
 during the first week in July: The Bassett
 Jewelry Co., C. H. Cooke Co., B. A. Ballou
 & Co., Fessenden & Co., Inc., Manchester
 Mfg. Co., Manchester-Smith Co., J. C.
 Doran & Sons, Modern Ring Co., T. F.
 McDermott Co., Gilbreth-Brown Co., Cory
 & Reynolds Co., A. & Z. Chain Co., Waite,
 Thresher Co., D. Wilcox & Co., Chapin &
 Hollister Co., H. N. Pervear Co., P. & A.
 Linton Co., N. Barstow Co., M. F. Williams
 & Co., and the White Stone Jewelry Co.
 The W. H. Saart Co., Attleboro, has also
 agreed to do the same.

James Brennan, a member of the electro-
 plating firm of Brennan & Critchley, of
 227 Eddy St., was badly burned on the left

hand and arm, one day last week, when a
 two-gallon can of naphtha he held in his
 hand began blazing, apparently from a
 spark struck by a dynamo near where he
 stood. Mr. Brennan dropped the can and
 another man threw it out into Eddy St.,
 where it was finally extinguished. The
 naphtha lighted the interior of the shop for
 a few moments, and a few stray drops
 which fell on the dynamo caused a lurid
 display of sparks and sputters which re-
 sulted in the burning out of the dynamo.

A large company of relatives and friends
 assembled at the Union Congregational
 Church in this city Tuesday evening, June
 1, for the wedding of Robert Ordway
 Smith, secretary of the Cook, Dunbar,
 Smith Co., and Miss Laura Ida Smith,
 daughter of the later William Smith, who
 was for many years a manufacturing jew-
 eler on Peck St. The ceremony was con-
 ducted by Rev. J. E. McConnell, at 7:30
 o'clock, and was followed by a reception
 at the home of the bride's mother on Lloyd
 Ave. Aldridge G. Pearce, of Frank T.
 Pearce & Co., and Clarence M. Dunbar
 and Charles D. Cook, partners of the bride-
 groom, were ushers. Mr. and Mrs. Smith
 started on a three-weeks' wedding trip, and
 on their return will occupy their new home
 at 83 President Ave.

The general executive board of the
 International Jewelry Workers' Union of
 America will hold its annual convention in
 this city next month. A referendum vote
 taken in all the unions during May has re-
 sulted in the defeat of Chicago and the
 victory of Providence as the convention
 city. Unless the Central Federated Union
 of the State branch of the American Fed-
 eration of Labor takes the matter in hand,
 however, it is not likely that the delegates
 will receive much of a reception from the
 local union, as it is no longer an active
 body. Although the delegates of the Jew-
 elry Workers' Union still attend the meet-
 ings of the Central Federated Union, the
 jewelry union itself is no longer in the
 ranks of active labor organizations, indi-
 vidual shop associations and mutual and
 sick benefit societies having taken its
 place.

About 60 of the employes in the stamp-
 ing and preparatory departments of the
 Gorham Co. had an outing at Emery Park
 last Saturday. They boarded a special
 electric car immediately after the closing of
 the works at noon, and upon arrival at the
 grounds a lunch was served, consisting of
 chowder and fritters. Owing to the in-
 clemency of the weather it was necessary
 to eliminate many of the athletic sports that
 had been arranged for and for which prizes
 had been donated by the Gorham Co.
 These, 11 in number, however, were com-
 peted for indoors and were awarded as
 follows: 100-yard dash for men over 40,
 George Moore, William Prospect and J.
 Murdock; best looking man, William Cook;
 200-yard dash, George Stringer, Stephen
 Flanagan and George Lewis; broad jump,
 E. H. Whitaker, Michael Veaset and H.
 Mitchell; hop, step and jump, Harry
 Mitchell, Stephen Flanagan and E. H.
 Whitaker. After the games a clambake
 was partaken of and vocal and instru-
 mental music and whist furnished enjoy-
 ment until dark.

1909-10 Edition Now in Preparation

THE

Buyers' Directory

will aid the selling department of a concern desirous of keeping continuous before the buyers from July, 1909, to July, 1910.

It will work every day of the year by keeping your business announcements in the authoritative directory of the trade.

It reaches the buyer at the time he is looking for the kind of goods you sell.

THE BUYERS' DIRECTORY is a complete, up-to-date, classified and geographically arranged index of Manufacturers, Importers and Jobbers of the Jewelry and Kindred Trades.

It covers every line of Jewelry, Silverware, Precious and Semi-Precious Stones, Watches and Watch Cases, Clocks, Gold and Fountain Pens, Optical Goods, Supplies, Materials, Tools, Leather Goods, Art Goods, Bric-a-brac, Assayers, Refiners, etc., etc.

Rates for Advertising are \$25.00 per Page
\$15.00 per Half Page

W. H. Kellogg, A. O. U. W., observed his 25th anniversary last week. Among the charter members the following manufacturers are included: J. L. Sweet, Chas. B. John, John W. Luther, C. L. Watson, E. Makepeace and James McNeerney.

C. M. Robbins Co. has filed its corporation report through its treasurer, as follows: Machinery, \$26,349; cash and debts available, \$39,149; merchandise, \$24,802; total, \$90,300. Capital, \$40,000; accounts receivable, \$15,480; surplus, \$34,820; total, \$90,300.

During the parade on Memorial Day taking part in the Civil War showed respect to their old post commander in the parade, Emmons D. Guild, who, by reason of illness, was unable to take part in the exercises for the first time in years. He passed his house they paused for a moment and presented arms.

Meeting of the committee who will be in charge for the annual field day of the W. E. Bliss Co. employes was held last week and plans outlined for the event. The field day will be held down the Providence River. It has been the custom in past years, and an interesting programme will be arranged for the several hundred who will make the trip.

C. J. McClatchen, treasurer for the Horton, Angell Co., has filed the following corporation report: Real estate, \$31,699; machinery, \$19,297; cash and debts receivable, \$110,884; manufacturers and merchandise, \$40,737; merchandise, \$47,366; total, \$252,983. Capital, \$160,000; surplus, \$90,552; profit and loss, \$2,431; total, \$252,983.

The H. M. Cummings Co. has filed the following corporation report: Machinery, \$22,897; cash and debts receivable, \$17,922; manufacturers and merchandise, \$17,325; treasury stock, \$29,500; patent rights, good will and trade-marks, \$55,001; total, \$142,715. Capital, \$100,000; accounts payable, \$17,789; surplus, \$24,926; total, \$142,715.

The Atlas Jewelry Co. is said to have leased a piece of land on Essex St., in Fall River, for the purpose of erecting a jewelry factory there. The lease is signed by Adolphe Menard, Joseph W. Lecomte and G. A. Menard. The Menards were formerly members of the firm of Menard, Charete & Menard, and were located in the basement of the Steam Power building here.

Woodbury Melcher has returned from an extended trip to Europe.

B. S. Rothschild, Chicago, was in town last week, calling on the local jewelers.

Ira Richards, Jr., New York, spent a few days in town, last week, with his parents.

Harry Fisher, of Furbish, Swift & Fisher, returned, last week, from the west.

Bert Noble, western salesman for Sturtevant & Whiting, was at the factory, last week.

William Miller returned, last week, from a trip in the interests of Doran, Bagnall & Co.

G. C. Hudson returned, last week, from a successful western trip in the interests of his concern.

James Baker, western salesman for F. M. Whiting & Co., was at the factory, last week, for a few days.

William Baldwin was married, last week, to Miss Clara E. Pilling, of Providence, at the home of the bride's parents.

Harry Bennett and F. I. Gorton left, last week, for Louisville, Ky., where they will attend the Mystic Shrine convention.

Frank L. Baker, of the Paye & Baker Mfg. Co., will be married, Thursday evening, to Miss Ingraham, of Providence.

Albert Totten attended the reunion of the Walsh' Denver Ganders which was held last week at the Clarks Hotel, Boston.

S. G. Mandalian left, last Wednesday, for a western trip in the interests of Mandalian & Hawkins. His trip was delayed on account of illness.

Anthony H. Bliss has renewed the patent which was issued to him for a bracelet, June 3, 1907, and which he has assigned to the A. H. Bliss Co.

The Parker Clock Co., Meriden, closed from May 29 to June 1, during which time new machinery was installed and improvements made in the plant.

James McGregor, for many years in the employ of the Wm. L. Gilbert Clock Co., Winsted, died at the county hospital, about a week ago, aged 67 years.

Senator Irving H. Chase, Waterbury, secretary of the Waterbury Clock Co., has been elected director of the Gaylord Sanitarium, to succeed Prof. Wheeler, of New Haven, who resigned recently.

The eighth annual banquet of the Bristol Business Men's Association was held at the pavilion at Lake Compounce, on June 2. It was presided over by President George Roberts, a well-known retail jeweler of Bristol.

The salesmen and office force of factories "L" and "M," International Silver Co., left Wallingford, June 3, for an outing given by the concern. Among those in the party were C. H. Tibbits, A. Anderson, W. A. Goodrich and B. L. London.

A new tower clock will shortly be installed in the First Church, New Britain, by the Seth Thomas Clock Co., Thomaston. The clock is the gift of J. Spencer Douglas, who donated \$25,000 with the provision that any balance left was to be used for church work. The clock will be equipped with a Dennison gravity escapement, and it is claimed that it will not vary more than 15 seconds per month. The pendulum rod will be eight feet long and the dial six feet in diameter. It will strike the hours.

Henry E. Neece, Miller, Mo., recently disposed of his business interests at that place to C. D. Berry.

Wm. Lindau, engaged in the wholesale jewelry business in Sioux City, Ia., was united in marriage a short time ago in Des Moines to Miss Helen Marchand, of the latter city.

Connecticut.

C. H. Tibbits, Wallingford, will sail for Europe, June 18. He will be gone about three weeks.

W. F. Lally, superintendent of the E. A. Bliss Co., Meriden, has purchased a parcel of real estate on Colony St.

G. Strohaker, Wallingford, has assigned to the International Silver Co. a new design for the handles of spoons, forks, etc.

George M. Anderson and President Chas. F. Smith, of the Landers, Frary & Clark Co., left, last week, on an automobile trip to New York.

The contract for the erection of a large addition to the movement department of the E. Ingraham Co.'s factory in Bristol has just been awarded.

The Parker Clock Co., Meriden, closed from May 29 to June 1, during which time new machinery was installed and improvements made in the plant.

James McGregor, for many years in the employ of the Wm. L. Gilbert Clock Co., Winsted, died at the county hospital, about a week ago, aged 67 years.

Senator Irving H. Chase, Waterbury, secretary of the Waterbury Clock Co., has been elected director of the Gaylord Sanitarium, to succeed Prof. Wheeler, of New Haven, who resigned recently.

Oakley, Thornton Bros.; F. C. Winship, H. C. Fry Glass Co.; George H. Roberts, White & Rounsville.

News Gleanings.

George Hanes, Jackson, Ga., has sold out to J. E. Edwards.

J. H. Mosher, Akely, Minn., is about to open a second jewelry store at Sauk Center, Minn.

Lee Schaefer will soon sell out his busi-ness at Lakota, N. Dak., and locate in Porto Rico.

Charles McRae, Granville, N. Y., is about to close out his business and move to Seattle, Wash.

The stock of David Leonheiser, Huron, O., was considerably damaged by fire one day last week.

The jewelry store of Jake Rutz, Aurora, Minn., was looted of about \$200 worth of jewelry, recently.

Fey Bros., Peoria, Ill., are about to dis-continue business and are now disposing of their stock at auction.

The North American Cutlery Co., Wi-chita, Kans., has announced that it will open a branch at Memphis, Tenn.

Wm. Lindau, a wholesale jeweler of Sioux City, Ia., was recently united in matrimony at Des Moines to Miss Helen Marchand.

M. A. Scherffius, Dickinson, N. Dak., has succeeded H. M. Roberts as official local watch inspector of the Northern Pacific.

Georgetown, Wash., will shortly have a new clock, which will be installed in the new city hall. The clock will have four

dials, each being four feet six inches in diameter and will cost about \$500.

M. E. Myers, St. Charles, Mo., has suc-ceeded George Adams as engraver and jew-eler for Charles F. Halbkat, Watertown, S. Dak.

Frank M. Halstead has resigned as jew-eler at the August Duffner drug store, Watertown, S. Dak., and is succeeded by C. A. Saunders, Artesian.

The City Council of Duluth, Minn., has granted a license to A. Oreckovsky to sell a stock of jewelry by auction at Superior St. and Lake Ave. The Mayor at first proposed to veto it, but finally signed it.

A. B. Zierleyn, Grand Rapids, Mich., against whom a bankruptcy petition was filed early last month, has been adjudicated a bankrupt in the United States Court. The business was established by Antoine Zier-lycn in 1879.

Bankruptcy Referee Connell, at Lisbon, O., has declared a dividend of six per cent. to the creditors of M. L. T. Howald, for-merly a jeweler of Salem. The meeting for the purpose of distributing this dividend was held Monday last.

A fire which broke out recently in Sche-nectady, N. Y., at 366½ Euclid St., ig-nited the building next door to where Samuel Meter, a watchmaker, has his shop. The flames were extinguished before any serious damage was done.

E. L. Guthman, head of the Guthman Bros. Co., Youngstown, O., announces that the concern, which has been in business there since 1880, has dissolved and that he has taken over the assets of the company and assumed all the liabilities.

Sheriff Gibson, of Waukesha County, took possession of the jewelry stock of F. D. Bancroft, Clinton St., Waukesha, Wis., June 3, on an attachment obtained by R. L. Christoph. An inventory is being taken. Mr. Christoph holds a chattel mortgage for \$1,000 on the stock.

Thomas A. Hickey, a jeweler of Utica, N. Y., died at a local hospital recently in that city after an illness of two months. The deceased was born in Troy in 1888, but had lived in Utica for the last four years. For some time past he has been employed by Edward Fitzpatrick, 144 Genesee St.

The jury, which was impaneled in the case of Albert Shafer, the South Bend jew-eler, whose body was found in Chapin Lake, near Berrien Springs, Mich., recently, ren-dered their verdict about a week ago, and declare that Shafer met his death by a fracture of the skull from some means un-known to them.

Samuel Drury Hardy, manager of D Buchanan & Son, Inc., Norfolk, Va., and Miss Ida Robertson were married Satur-day, June 5, at the home of the bride, 229 Butc St., Norfolk. Mr. and Mrs. Hardy are now on their honeymoon, but will be back in Norfolk to receive their friends by June 14.

A. Newsalt, Dayton, O., was the success-ful competitor among hundreds of others who which have been given to the Brothers Wright, the acronauts, by the State of Ohio. A picture of Mr. Newsalt, together with the photographs of the medals which were se-lected by the adjutant general, have ap-peared in the Ohio papers in the last week.

The "Bridal Pair" Something New

Realizing that umbrellas are the always acceptable gift, we have just originated this clever idea of strapping together a gentleman's and a lady's umbrella to match, as a most suitable WEDDING present.

The umbrellas shown here are fine taffeta silk with interchangeable handles of Green Ebony (Turtle Ebony), Sterling Silver trimmed and hand engraved.

They are held together by a pair of neat pig-skin straps.

This makes a gift that will please BRIDE and GROOM equally well—will be often used and last long.

We have proper handles for wooden, silver and golden anniversaries, as well as for June weddings.

KREIS & HUBBARD

Manufacturers of the Jewelers' Line

Unique Wedding Gift Sure to Catch Public Fancy

This new idea is sure to "take" with your trade. We can furnish "Bridal Pairs" in any style of handle, and at prices from \$7.00 to \$100.00. Write us for samples and particulars.

Our Sterling handles are made in 28 gauge Silver, and our Gold filled handles are Virgin Color, and are warranted not to show black seams.

Our Fall and Holiday Line is now out

We make the closest rolling umbrella on the market and use SILKS THAT GIVE SERVICE.

The largest range of 14K. solid gold good in the country.

Don't let our man get by you.

We have a plan for increasing your umbrella trade. Ask us about it.

rior to the lake front Sunday

of last week would have seen one

of the most remarkable games of baseball

played in the shadow of Montgomery

building when nine wholesale jewel-

ers of nine of Stillson's restaurant

at Mrs. Diana, on top of Ward's

early broke her neck watching the

game and forgot to tell which way the

wind was blowing. The score was 26 to 1

in favor of the jewelers. It is reported

that the waiters lost purposely for fear

they wouldn't get any more tips from the

customers who dine regularly at Stillson's.

After when he tried to catch a ball

with his right hand mechanically as if

waiting for a dime, and when he

found out it was only a ball dropped it in

the water. After the game the jewelers ad-

ded to Stillson's and had a lunch, at

which the water baseball team waited at

and received extra tips for losing

promely.

plant changes, in the near future,

will be inaugurated in the plan and scope

of the Chicago Jewelers Association. As

yet no definite plan exists, the association is purely

social. Many of the members are in favor

of extending its usefulness so that its re-

sources can be used as an active means of

extension on the same plan as the

International Association of Commerce. Un-

der the latter body, the Chicago Jewelers'

association will be for the jewelry trade

and partly for business, will extend as far as San Francisco. From there they will return to St. Louis about the middle of July.

Herman Mauch, Edward Bornmiller and Louis Kurtzeborn will leave for Louisville, Sunday, with Moolah Temple, Nobles of the Mystic Shrine, to attend the annual meeting of the Imperial Council. Mr. Mauch is Illustrious Potentate of Moolah. Mr. Bornmiller, who is connected with the J. Bolland Jewelry Co., is a member of the choir, and Mr. Kurtzeborn, a member of the firm of A. Kurtzeborn & Sons, is a member of the patrol.

A. Maschmeyer, of the Maschmeyer-Richards Silver Co., Carleton building, has returned from the east, where he has been making purchases to increase the stock to be carried by the firm in its new and enlarged quarters. E. A. Schoenle and J. K. Venable, of this firm, will start out next week on long trips. Mr. Schoenle will go as far as Los Angeles and Mr. Venable will traverse Kansas and Oklahoma. Both will remain out until Nov. 1.

Among the out-of-town jewelers in town during the past week were: J. Bone, of Bone Bros., Sikeston, Mo.; Fred Simon, Collinsville, Ill.; John A. Miller, Cairo, Ill.; Edward J. Baumann, St. Genevieve, Mo.; August Winkler, Poplar Bluff, Mo.; W. K. Urbani, Vandalia, Ill.; C. Couver, of the Grug-White Jewelry Co., Staunton, Ill.; Otto Friedrich, Cape Girardeau, Mo.; W. H. Jahn, Pacific, Mo.; E. H. Goulding, Alton, Ill.; Charles Geumalley, Pinckneyville, Ill.

The butt of a lighted cigar, tossed from a window on the 18th floor of the Wright building at 8th and Pine Sts., set fire to an awning on that floor, recently. Burning fragments that dropped from the 18th floor awning set fire to awnings on the 14th, 12th, 11th and first floors, the latter in front of the jewelry store of F. W. Baier. The heat cracked the plate glass of Mr. Baier's show windows. The fire department prevented further damage and Mr. Baier sustained no loss on his stock.

St. Louis jewelers have contributed with their wonted liberality to the fund for the celebration of the centennial anniversary of the city, which is to take place the week of Oct. 6. A committee of which Morris Eisenstadt and Goodman King were joint chairmen made the rounds of the principal firms, and in a short time raised \$1,000. The contributors and their contributions were as follows: Mermod, Jaccard & King Jewelry Co., \$100; Eisenstadt Mfg. Co., \$150; James J. Burke, \$50; A. R. Brooks & Co., \$50; Aller-Newman-Wilmes Jewelry Co., \$25; Weiss & Fassett, \$50; Hess & Culbertson Jewelry Co., \$50; S. Ruby, \$25; Hoyt Jewelry Co., \$25; Bauman-Massa Jewelry Co., \$100; C. R. Hettel Jewelry Co., \$50; William Weidlich & Bro., \$25; St. Louis Clock & Silverware Co., \$50; L. Bauman Jewelry Co., \$50; S. A. Rider Jewelry Co., \$25; Maschmeyer-Richards Silver Co., \$25; F. W. Drosten Jewelry Co., \$50; J. Bolland Jewelry Co., \$25; Whelan-Aehle-Hutchison Jewelry Co., \$25; Zerweck-Frech Jewelry Co., \$10; F. C. Blelock Jewelry Co., \$10; H. Mauch, \$10; E. H. Kortkamp Jewelry Co., \$10; Langsdorf Bros. Jewelry Co., \$10.

St. Louis.

The store of Herman Mauch, 507 Franklin Ave., is being redecorated.

The store of the Whelan-Aehle-Hutchison Jewelry Co., at 621 Locust St., is being renovated.

Miss Hilda Haverkamp, stock clerk of the Elliott Jewelry Co., is spending a week at Okawville Springs, Ill.

The Retail Jewelers Association of St. Louis will have a meeting next week to complete the local arrangements for the State convention.

Samuel Kober, of the Maritz-Kober Jewelry Mfg. Co., left Tuesday for Texas. He will travel the rest of the month in that State and Oklahoma.

J. P. Radunsky, associated in business with his brother, H. Radunsky, under the firm name of Radunsky Bros., on South Broadway, is buying a stock of jewelry to open a store at Joplin, Mo.

A. Kurtzeborn & Sons, 310 N. 6th St., who have been contemplating an early retirement from business, now announce that they will continue in business until the expiration of their lease, Jan. 1.

S. E. Bamber, secretary of the Hess & Culbertson Jewelry Co., left Monday for Asheville, N. C., to attend the annual convention of the Travelers' Protective Association. He will return in a few days.

S. Ruby, 511 N. 6th St., and Mr. Kennedy, of the Kennedy Jewelry Mfg. Co., 312 N. 6th St., are leaving for French Lick Springs, where they will spend two weeks. Mr. Ruby is accompanied by Mrs. Ruby.

Samuel Hotchner, junior member of the firm of A. Hotchner & Son, importers of diamonds, 722 Holland building, will leave for Europe, June 12, on a business trip, and will visit the diamond centers abroad in search of diamonds.

Solid silver tea sets, presented by their associates to the retiring postmaster, Frank Wyman, and his assistant, J. L. Stice, were made by the Hess & Culbertson Jewelry Co. The sets were the first articles sold in the new store of the company.

L. W. Braun, of the S. Ruby jewelry store, will leave the latter part of next week for a trip to New York and the eastern resorts. He will spend about 10 days in New York making purchases and will pursue pleasure the rest of the time.

F. W. Hoyt, president of the Hoyt Jewelry Co., who left Tuesday for the southwest, is accompanied on his trip by Mrs. Hoyt. The trip, which is partly for pleasure

FOR

Jewelers and Watchmakers

100 Pages New Matter
Containing 300 Pages (size 7 1/2 x 10 1/2 inches)
Bound in Cloth, Stiff Covers

A collection of the latest practical rec-
on the manufacture and repairing of
watches and clocks, and on the vari-
processes entering into the manufac-
and repairing of jewelry, as coloring,
ishing, enameling, annealing, oxydi-
etc., in short, a thorough compendium
the numerous mechanical department
the jewelers' and watchmakers' shop.

This book is the most useful, com-
prehensive and perfect publica-
for the workman at the bench, and
should be in the hands of every
jeweler and watchmaker in the
country. It is the only book of the
kind published.

Price, by mail postpaid, \$2.50

11 John Street NEW YORK

Cincinnati.

Rauth has returned from a buying trip east.

Roy, formerly with A. G. Schwab will travel for Frohman & Co.

F. Jacobs, formerly of Rudolf Co., has accepted a position with K. Co., Chicago.

D. Jacobs, of D. Jacobs & Co., who came from New York, has announced engagement to Miss Jean Rothschild, city.

Fouts, formerly of the St. Louis store, will travel for Richter & Philhave for his territory the south and west.

Miller, of the Miller Jewelry Co., Henry and E. H. Croninger are in the city this week attending the "Shrines" conclave.

Pelzer, with Albert Sauer, New York, and Miss Blanche Betz, of that city, were married, June 3, and are now on a tour east.

Kappes, formerly with Ralph Kappes at Batesville, Ind., was here, buying his opening stock for his new store in that place.

John Holland Gold Pen Co. has increased its road force G. E. Spencer, Lexington, and E. Schmidt, New York, have started on their respective trips.

Harris, who was arrested, last week, for stealing a stick pin from Emil Vine St. pawnbroker, was tried and sentenced to 30 days in the workhouse.

Shire, of Shire & Fithian, Paris, Ind., was here last week, looking for new members for the Paris Baseball League, he is not only a very enthusiastic player but also secretary and treasurer.

Miller, of the Miller Jewelry Co., Miss Margaret Berry, a singer in the city, but formerly of Vincennes, Ind., was married, June 26, at the home of her sister in Marshall, Ill. After her honeymoon in the east they will reside in the city.

Members of the local wholesale jewelry trade who were in New York this week attending the National Wholesalers' and Manufacturers' Association convention included: S. Lindenberg, of G. Strauss & Co.; A. J. Thoma, of A. Bros., and Eli Gutmann, of L. & Sons.

H. Newstedt, 4th and Race Sts., manager of the Cincinnati Industrial Association, has been named as one of a committee to arrange the details of an industrial excursion for next fall. Mr. Newstedt is interested in the "Bureau" in lending aid to the Universal Pneumatic Co., which desires to secure permission from the Government to install its system in Cincinnati free of cost for demonstration purposes.

Local town jewelers who were here, buying stock included: A. R. Winchester, Ky.; J. C. Meyer, O.; J. A. Knocke, Lexington, O.; Roth and A. Wahrab, Dayton, O.; Jashanosky, Hamilton, O.; Fred Cambridge, O.; Mr. Marlett, of the Baker, Middletown, O.; W. T. Jr., Paris, Tenn.; Mrs. C. G.

Schlenker, Hickman, Ky.; Frank Fullilove, Oiventon, Ky.; W. J. Callison, Middleboro, Ky.; P. Lewis, Andalusia, Ala.; J. Lees, Butler, Ky.; L. C. Diefenbaugh, Lewisburg, O.; Charles Keller, Frankfort, Ky.; A. M. Stamm, Williamsburg, O.; J. Rowan, New Castle, Pa.; M. A. Selbert, Frankfort, Ky., and J. W. Sparks, Sabina, O.

Indianapolis.

J. H. Reed spent last week in Brown County.

E. L. Spencer, Richmond, was married recently.

Retail jewelers in this city, last week, were: G. C. De Camp, Shirley; E. O. Collins, Franklin, and S. B. Merrick, Plainfield.

Emil Mantel will attend the United States Grand Lodge Fraternity of the order of Brith Abraham, in New York, June 13-18. He is a third grand deputy of the order, but it is expected he will be elected to a higher office at the convention.

A. L. Zoller, manager of the silverware and jewelry departments of Charles Mayer & Co., and Charles Mayer, Jr., have returned from a three months' trip through England, Holland, France, Austria, Belgium and Germany. While away they combined business and pleasure.

A beautiful trophy for the national balloon race was supplied by Charles Mayer & Co. It was a sterling silver, three-handled cup, lined with gold. The cup was about 40 inches high and on one side was etched a picture of a balloon. It was valued at several hundred dollars.

Pearl hunting is at its height in the Wabash River. Charles Williams last week found a perfect specimen of the lustrous black pearl, weighing 36½ grains, which he sold for \$1,250, near Decker. Oscar Meyers found a 22-grain egg-shaped pearl, which he sold to Frank Koesckeritz, Vincennes, for \$580.

Charles Dyer has abandoned plans for making an extensive tour of Europe this Summer, although he is interested in a party that will leave June 25. Mr. Dyer is associated with a high school teacher in promoting foreign trips each season, but cannot get away from his jewelry business for the trip this year.

F. M. Murphy, secretary of the State Board of Registration and Examination in Optometry, has announced the successful candidates for certificates in the examination conducted last month. Those given certificates of registration were: Sadie E. Anderson, Bedford; William Artes, Evansville; Paul D. Strong, Evansville; Louis S. Sterling, Lebanon; Robert Koeber, Fort Wayne; Harriett H. Chenoweth, Huntington, and Howard H. Muthier, Kewanna.

Ikko Matsumoto made a rare trophy, to be given in the national balloon race which started from this city on Saturday. It consisted of a sterling silver plaque 14 by 20 inches, on which appeared in bas relief work four balloons of different sizes, a bit of scenery and representations of spectators witnessing the race. It requires 50 ounces of silver and was framed in a solid oak frame. A small silver plate bearing the picture of the winner in similar work will be attached to the frame.

John P. Mullally, president of the Indianapolis Retail Jewelers' Association; H. H. Bishop, president of the Indiana Retail Jewelers' Association; Charles Mayer, and Carl L. Rose had a meeting in the Merchants' Association room a few days ago, when the watch and jewelry tariff were discussed. They forwarded a letter to Senator Beveridge, asking him to oppose any effort to require the imprint of the maker's name and address on watch dials, although they were not opposed to having the inscription on some other part of the movement.

Kansas City.

W. T. Oakley has bought out the jewelry business of Avery B. Dodson, Belle Plain, Kans.

H. W. Porter, of the Porter & Wiser Jewelry Co., attended the Topeka convention and says he had a good time.

During the past two months six new benches have been added to the working department of the Kansas City Horological and Optical School.

Charles Ragsdale, of Ragsdale & Hill, Smith Center, Kans., has sold his interest in the business to Mr. Hill. Mr. Ragsdale will take a trip through the west, with a view to again embarking in business.

W. C. Wolfe has sold out his jewelry business in Chandler, Okla. He proposes going to Seattle to take in the exposition and in the meantime will be on the lookout for a good business location in the west.

The following jewelers were in this city during the week: W. S. Noble, Drexel, Mo.; J. L. Potts, Marceline, Mo.; W. J. Henson, Stark, Kans.; R. E. Nichols, Holton, Kans.; W. A. Smith, Fredonia, Kans.

The following new students have been enrolled at the Missman School of Engineering: L. R. Bailey, Chickasha, Okla.; M. Kohler, Parsons, Kans.; Earl Ruppius, Kansas City, Mo.; F. S. Shepard, Marysville, Kans.

Warner & Reid, who, some months ago, succeeded Kionka & Kionka, gem dealers, have dissolved partnership and the business will be conducted hereafter by O. A. Reed, who will continue the old name of the New York Gem House.

A fire, which originated Monday night, May 31, in the store of the Hubbard Shoe Co., 1005 Main St., resulted in a loss to the Margolis & Metzger Jewelry Co., next door, at 1007, of between \$500 and \$1,000, mainly from smoke and heat, although the fire did not burn through either partitions or floors.

The Gem Loan & Jewelry Co., this city, is anxious to discover the whereabouts of Nathan Feinberg, formerly a manufacturing jeweler in business here, but who is in this city no longer. The concern claims to have let Feinberg have two pairs of diamond earrings on May 15, but has not yet received a settlement or accounting for the same.

The following new students have been enrolled at the Kansas City Polytechnic Institute: C. H. Youngblood, John Youngblood, G. A. Frend, B. Hakan, J. A. Heidker, all of Kansas City, Mo.; Grant Potter and Archie Powahan, Douglas, Kans.; H. Stevens, Junction City, Kans.; W. A. Stiles, Kansas City, Kans., and D. C. Spray, Medford, Okla.

Cleveland.

TRADE CONDITIONS.

The wholesale business while not up to the usual June standard is improving. Outside inquiries are increasing and country dealers are reporting fair trade. Retail business for the week has been very good in all lines except diamonds. The unusually large number of auctions has not hampered the retail trade.

Creditors of John Hudgeon have received an offer of settlement at 40 per cent.

Mr. and Mrs. L. F. Boyer spent last Sunday in their old home town, Wadsworth, O.

E. G. Site, Cambridge, O., has purchased the jewelry and optical business of J. G. Davis at Bellefontaine, O., and will continue to operate both stores.

The F. W. King Optical Co., this city, has been incorporated with a capital of \$50,000, by F. W. King, T. S. Beckwith, C. J. King, C. R. Smith and Wm. Battle.

The post-mortem conducted recently upon the body of Carl Enger, who was found dead in his room at the Cadillac hotel, showed that death had resulted from heart failure. Enger, who was 45 years old, was an optician.

E. J. Dister, the West Side jeweler, who represents the Third ward in the City Council, is coming in for a great deal of notoriety with the rest of the democratic councilmen just at present. Mr. Dister has made a good and reliable councilman.

J. M. Jenks, vice-president of the Scribner & Loehr Co., will have charge of that company's exhibit of Masonic emblems at the Cleveland Exposition. The exhibit will consist of rings, marks, lapel buttons, charms and brooches and will be located in the Central Armory building.

Briggs & Dodd, auctioneers, have been engaged to sell out the remaining stock of the Wardwell Co. The sale will last about a month, after which the affairs of the company will be wound up and the store room vacated. The Wardwell Co. is one of the oldest novelty houses in Cleveland. The firm has been in the hands of a receiver about a year.

The following were among the out-of-town visitors this week: George A. Clark, Lorain; Benj. Mosley, Willoughby; E. G. Site, Cambridge; J. G. Davis, Bellefontaine; John Boyle, Canton; John Rich, Painesville; J. A. Moore, Akron; Harry Downs, Bellvue; H. H. Brainard, Medina; R. R. Moore, Cuyahoga Falls; W. P. Caruthers, Oberlin; W. C. Fisher and C. E. Lonsway, Lorain, O.

The Art Novelty Shop has been incorporated with P. H. Mequillet, president; E. I. Baily, treasurer, and T. B. Bradley, secretary. The concern will occupy a store on the Euclid side of the Hippodrome building about July 1, and will carry a line of jewelry, silverware, china, glassware, leather goods and art novelties. Mr. Mequillet, who will manage the store, was connected with the Wardwell Co. for a number of years.

C. F. Keim, who represented the Scribner & Loehr Co. on the trade extension trip of the Chamber of Commerce, says that the jewelers in the towns visited were royal entertainers. At nearly every stop local jewelers met the train and took the Clevelanders around town in autos, and this

paragraph would be incomplete without adding that many of the autos were purchased in Cleveland during the Automobile show. Mr. Keim says that business in the smaller towns in Michigan, where the trade is with the farmers, is dull, as they are too busy to come to town to buy. On the contrary, in the larger towns that support manufacturing industries, business is very good and it is expected that local wholesalers will benefit materially from their trip.

Omaha.

L. C. Peterson, with J. L. Jacobson, is home on account of illness.

W. C. Flatau has returned from a trip to Excelsior Springs, Mo.

Grover Peterson, with Sol Bergman Jewelry Co., is making a business trip through the State.

John T. Cooper, engraver, is making a specialty of brass monograms for automobile radiators.

C. L. Shook was recently elected to the office of Wise Master, Rose Croix Scottish Rite Masons.

Chas. Copley, Chicago, who has been visiting his brother, Henry Copley, of this city, left for his home last week.

W. B. Graves, O'Neill, Neb., and Phil W. Folsom, Ashland, Neb., were in this city, last week, replenishing stock.

Mrs. W. D. Godfrey has incorporated her store in South Omaha and the business will be continued as the Godfrey Co.

Mrs. T. L. Combs and children left last week for Detroit, Mich., and the Great Lakes, where they will spend the Summer.

S. W. Lindsay, wife and son, have returned from Chicago, where they attended the commencement exercises of the Armour Technical School.

T. L. Combs & Co. supplied the badges and souvenirs for the Shriners at the recent conclave at Louisville. The souvenir consisted of an attractive fob.

Roy Scott, formerly in the jewelry business with Albert Edholm, but for the past few years in the hotel business at Lexington, Neb., recently sold out and is again with Mr. Edholm.

Fred Brodegaard & Co. are selling out their entire stock at auction. The wholesale department and store at 109 N. 16th St. will be discontinued. The two stores will be combined and the business continued at 115 S. 16th St.

At the last meeting of the local jewelers club another letter was framed to be sent to all jobbers and manufacturers interested in making an exhibit at the convention. So far the club feels very much encouraged over the replies received.

L. Kaas, a pioneer jeweler of Omaha, who had been quite ill, is able to be at work again. On May 29 a number of friends called at his home and presented him with flowers, the occasion being his 80th birthday. A pleasant evening was spent. Mr. Kaas has been in business in this city for 30 years.

The Midland Mfg. Co. is investigating the whereabouts of a new traveling representative, W. J. McNabe, who disappeared several weeks ago with his sample case. Last week the police arrested Chas. How-

ard, Hutchinson, Kans., who was wearing some of the jewelry, including a watch chain which had been in McNabe's sample case. Howard asserts he bought the watch in Grand Island, recently, and being in need of money pawned the articles. Most of the salesman's stock was located in a watch shop in this city. Howard was held at the police station pending the finding of McNabe, but was released a few days ago as nothing could be found against him. Phillips, manager of the firm, has no idea where McNabe can be or how the sample case got out of the traveling man's possession.

Milwaukee.

J. Levitus, optician, has opened new offices at 403 Grand Ave.

J. B. Warren, with the Elgin Watch Co., called upon the Milwaukee jeweler last week.

The Bunde & Upmeyer Co. has received an order for making 2000 jewels for the Wisconsin Consistory.

E. A. Arenberg, well-known jeweler of Stevens Point, who was taken seriously ill recently, is able to be out and his recovery is now assured.

The new branch store of Carl Cambria, was recently opened with an extensive stock on display. Schultz is manager of the store.

Sam Martin, the jewelers' auctioneer in this city, is closing out the stock of C. Dean in Ardmore, Okla. Mr. Dean continues his store in Oklahoma City.

Fred Schultz, formerly of Portage, employ of Carl R. Michel as jeweler, watchmaker, and now manager of the Michel jewelry store at Cambria, recently married to Miss Ently of Portage.

W. H. Upmeyer, of the Bunde & Upmeyer Co., is absent from Milwaukee three weeks' business and pleasure in Alamos, Mexico. M. Upmeyer left for Mexico about two months ago, but he says that he is finding the weather much better at the present time.

Improvements resulting in an expenditure of more than \$500 have been made in the jewelry establishment of A. F. Pals in the Public Service building. Watchmakers' baleony, new timepieces and new fixtures, including show cases, have been installed.

In a series of articles that are published by the Milwaukee Journal for the benefit of the boy graduate, the publisher an interesting interview with Mr. Tegtmeyer, the popular South Side jeweler. Mr. Tegtmeyer says that the country needs for all of its boy graduates the right sort.

Dr. George P. Barth, school physician of Milwaukee, has asked the City School Board for an appropriation of \$500 for the purchase of eyeglasses for children in schools when parents are too poor to buy them. "In an examination made in the schools a year ago we found about 10 per cent of the children suffering with defective eyesight," said Dr. Barth. In view of the fact that the resolution providing for the purpose of buying glasses for poorer children will be passed at once, the date.

Los Angeles.

town jewelers in the city recently E. Denton, Lompoc, Cal., and H. Man, Corona.

Five jewelers in Los Angeles closed some for a half-day and others for a whole day, Monday, May 31.

Reynolds, of the E. W. Reynolds store, returned from a two months' tour of New York and other eastern cities and pleasure.

The vacation season is now at hand, and jewelers and their employes are going to take brief respites, as their usual haunts are at the beaches or in the moun-

tain. Some silver cups were donated by Maier and the Whiteley Jewelry Co. and second prizes, respectively, in a four automobile race given at Pittsburg for the benefit of the Los Angeles' Home. The Maier cup, which was a large urn-shaped cup with silver handles and having a Butler Whiteley cup, worth \$75, was the prize. The pattern, polished and entirely new, was by B. Lothrop, with the Whiteley Co. as the timers, and as none of the other timers reported for duty he was on duty for six hours.

Pacific Coast Notes.

W. H. Dinsmore, Pasadena, has located a new store in San Bernardino County, and is moving his property.

W. H. Dack & Son, formerly of Los Angeles, Cal., have opened a new store at San Bernardino, and have installed a repair de-

partment. Dinsmore has taken charge of the store. R. H. Edwards, Ferndale, Cal., has conducted the business for over 15 years, and has decided to take a rest. However, he will continue to Ferndale for a time and assist in the repair work.

W. H. Lucas, a member of the trade association, is in California making a tour of the State. At the present time he is in Kern California. Mr. Lucas is an expert sportsman and maintains a large reserve in North Carolina, and the Pacific Coast will probably indulge in his favorite pastime.

W. H. M. A. Markarian, 439 J St., Los Angeles, Cal., was entered a short time ago in a lottery and a gold watch was taken, which was the only article of value left outside the store. The store was opened by Markarian from the front door with a jimmy. The store is located on the outskirts of the city, and the vicinity is poorly

W. H. Smith, Pasadena, Cal., has installed the services of F. J. Riggs, and has a display of instruments owned by this watchmaker. The kit of instruments possessed by Mr. Riggs is very complete and embraces instruments used in watchmaking. Among these is an invention of Riggs, a spacer for jewels, and a device made by him.

A window in the store of Clark & Ely, Ely, Nev., was looted, recently, for jewelry valued at \$1,500. The burglary was committed by digging a tunnel 12 feet in the basement of a café. While

Jeweler Lindskog was in the store and not more than 12 feet away he heard the burglars at work, but supposed that the noise came from the street and thought nothing about it. The hand of one of the men was seen in the show window by a passerby across the street, who, however, thought it was but a shadow.

An aged and expert German jeweler who has refused to divulge his name or his former home has been arrested in Kennett for robbery. He arrived at this place, recently, and was given employment by J. J. McEvoy. After working a short time he slipped away from the store and made his escape up the railroad track. The station agent at Pittsburg was notified, and when the man approached he was stopped and held until an officer arrived. When searched a new watch, identified as one taken from the store, was found on his person.

Minneapolis and St. Paul.

Wallace Loring, with L. C. Gaus & Co., Minneapolis, is spending his vacation in Chicago.

Axel Madsen, of Rettig, Hess & Madsen, Chicago, has completed his trip for the season, and will rusticate at Lake Sylvia, near Annandale, Minn., for his vacation.

Abbott Kuderling, traveling salesman for the H. E. Murdock Jewelry Co., Minneapolis, and Miss Mabel Bradley were united in marriage June 1. They will take a trip up the Mississippi River to St. Louis, and will be at home to friends after July 1.

C. C. Bergh's store at 197 E. 7th St., St. Paul, was recently robbed of three watches and a number of souvenir spoons, which were taken from the display window. The thieves used a glass cutter to make a hole in the glass. An officer heard the sound of falling glass, but could not reach the scene in time to catch the thief. A peculiar coincidence is that 20 years before, to the exact day, Mr. Bergh's store window was robbed of its contents, the glass having been broken with a brick. The thief was caught and sent to the penitentiary for a term of six years.

Toledo.

L. H. McKinstry, 614½ Cherry St., has just installed a new regulator in his window.

A sample jewelry sale is now being conducted on Samuel St., by an out-of-town firm.

Franklin E. Touse, Pioneer, O., called on local jewelers, last week, incidentally arranging also for Fall lines.

A. J. Heesen has installed a new electric window apparatus for drawing the attention of passers-by to articles on display.

The Board of Education is now contemplating the installation of a master automatic clock system in one or both of its two new high school buildings, which are to be built later in the summer.

W. A. Rankin, manufacturing jeweler, at 573 Jefferson St., is taking an active interest in the King Wamba festival, his picture appearing in a local paper this week as one of the most successful collectors of funds to date. Practically every down-town jeweler has already contributed to this fund.

Application has been made by the attor-

neys of Wm. Blair, Detroit pawnbroker, who is held at the local jail on a charge of receiving stolen property, for reduction of his bond from \$2,000 to \$500. The reason given is that Blair is rapidly going blind and that he needs the attention of an oculist. His attorneys claim that he is now totally blind in one eye. The judge before whom he is to be tried, however, has declined to reduce the bond to the amount desired.

San Francisco.

The Baldwin Jewelry Co. is another firm that will be compelled to remain on Van Ness Ave. until well into the Fall. Work on its new building on Kearny St. at Union Square Ave., has been commenced and is being rushed.

It is thought, in view of action begun, that there will be a marked reduction in rentals made throughout the entire down-town retail district, even in cases where leased have been signed. San Francisco rentals, it is said, are now as high as rentals in New York and Chicago without any economic reason.

The workmen are making very fair progress on the Diamond Palace on Kearny St., and Col. Andrews hopes to be able to occupy the permanent quarters in about a month's time. Some time in July, at least, the move will be made. The Van Ness Ave. establishment will be closed for a short time just prior to the removal.

Work is being commenced on the new building to be occupied by Radke & Co., on Post St., opposite Shreve & Co.'s store. It is expected that it will be August, however, before the new store can be occupied. A fair volume of trade is still being experienced on Van Ness Ave., and this district will not be entirely deserted before that time.

Chief of Police Cook has been notified by the Chicago authorities that Herman Paley, wanted here for embezzlement is in custody. A warrant has been issued for Paley and sworn to by A. Isaacs, 756 Market St., who claims that Paley made away with jewelry valued at \$1,500. Paley was recently arrested in Seattle, but before the local authorities could send a detective for him he was taken to Chicago. The authorities there have found that they have not sufficient evidence to convict him.

Retail jewelers in San Francisco are very much interested in a promised readjustment of the rental proposition here. While there have been no business failures of note among the trade, a number of small dealers in other lines have found it impossible to continue in business and have suspended. In every case, the high rentals that are now being paid are declared to be responsible for the failure. An investigation that has been made by a prominent wholesale jeweler reveals the fact that the average rental now being paid by retailers in the down-town district is almost double that paid before the fire. When the element of space is taken into consideration, it is claimed there is not one in the down-town district who is not paying more than formerly, and some as much as two and a half times as much. That business does not warrant such an increase in expenditure is the unanimous opinion of all.

Buffalo, N. Y.

TRADE CONDITIONS.

All the Buffalo jewelers are busy with the annual wedding and commencement gift trade. Business has showed a noticeable increase in all lines.

T. L. Terry, jeweler at 135 Jefferson St., has left town on a vacation.

Herman A. Reinhardt, 1214 Lovejoy St., recently bought a new automobile.

C. A. Mitchell, optician for C. F. Chouf-fet, jeweler at 379 Main St., was quietly married, last Wednesday.

G. A. Howle, formerly one of the office force of King & Eisele, left that firm on June 1 to enter business for himself in another line.

Forest F. Shaw, a Buffalo optometrist is among those who are attending the convention of the Mystic Shriners of the United States and Canada in Louisville, this week.

The Standard Jewelry Case Co.'s stock was damaged, last Saturday night, as the result of a fire at 327 Main Washington St. Volk & Weiland, manufacturing jewelers, were among the other firms which suffered a loss on account of the blaze.

The last meeting of the Buffalo Retail Jewelers' Association was held May 28. No important business was transacted, but the bowling party which followed was enjoyed by all present. The next meeting of the association will be held on the third Friday in June at the Genesee Hotel.

William Ehmann, president of the Buffalo Retail Jewelers' Association, who left for a tour of Europe, some time ago, is now in Naples, Italy, according to postals received by many of his friends. Mr. Ehmann writes that he is having a very good time, and expects to arrive in Buffalo early in the Fall.

Manager R. E. Smith, of King & Eisele's clock department, left, June 5, for a trip to New York, Boston and intermediate points to buy Fall lines. Mr. Smith will also complete arrangements for the King & Eisele Fall catalogue, which, he says, will be the largest and most comprehensive catalogue ever issued by the firm.

Among out-of-town jewelers who visited the Buffalo market during the last week were: Mr. Lewis, Arcade; C. S. Hussey, South Dayton; A. H. Denny, Warren, O.; C. H. Betts, Tonawanda; P. H. Rivenburgh, Olean; Charles Kausch, Bath; C. D. Barnes, Gowanda; I. Traub, Niagara Falls; L. J. Reznor, Port Allegheny, Pa.; H. L. Fox, Dunkirk.

Enoch L. Cordery, charged with killing Harry Carr, in this city, on last Christmas night, will probably be tried here, June 14. Albert Hansen, a setter employed by Heintz Bros., Buffalo ring manufacturers, and who formerly worked for the Ostby & Barton Co., Providence, was also shot in the right hip. Charles Rohmer, another setter, escaped injury.

Abraham Fisher, a New York jewelry peddler, was recently arrested in North Tonawanda shortly after he began to sell a quantity of cheap jewelry among the factories and lumber yards there, and was charged with peddling without a license. He was fined \$10 by Judge Smith. At police headquarters six watches, four cases,

28 watch chains and numerous other small articles of jewelry were taken from Fisher.

Fred C. Smith, traveler for Charles F. Damm, the manufacturing jeweler at 520 Main St., has returned from a successful trip through Michigan. The engagement of Miss Mabel Sternweiser, a stenographer for Mr. Damm, to E. M. Nadeau, book-keeper in the establishment, has been announced. The wife of Alfred Nathan, a traveler for a large New York jewelry house, who appeared at a local theatre, last week, as prima donna in the Romeo Opera Co., was a guest while in Buffalo at the home of Mr. Damm.

On exhibition, this week, in the window of T. C. Tanke, jeweler, at Main and Eagle Sts., is the Masonic jewel which recently started from Toronto on its way around the world. The jewel will remain on exhibition until Friday, when a delegation of about 100 Buffalo Masons will take it over the next step of its journey, to Cleveland. This piece is a large solid gold triangle, decorated all around with a wreath design of enameled shamrocks and maple leaves. It is surmounted with a beaver and in the lower corners are Masonic emblems. In the middle of the lower side of the triangle is the emblem of St. Patrick's Chapter 145, R. A. M., of Toronto. Suspended in the middle of the jewel is a gold figure of St. Patrick. John W. Jarvis, optometrist, is a member of the committee having charge of the jewel and the arrangements for the trip to Cleveland.

Canada Notes.

W. H. Rowlands, Port Elgin, Ont., has given a chattel mortgage to A. S. Levy for \$595.

F. G. Grundy, Lucknow, Ont., died recently. His stock-in-trade is advertised for sale.

Charles Smith, Kingston, Ont., and bride were in Toronto, Ont., last week, on their wedding tour.

H. P. Thornloe, representing the Goldsmiths' Stock Co., went to New York on a purchasing trip last week.

The jewelers of Hamilton, Ont., have arranged to close their stores at 12.30 p. m. every Wednesday until the end of August.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: J. Burnie, Victoria Harbor; James E. Nelson, Ridgeway; E. W. Ross, North Bay; Mr. Klein and Norman Ellis, Hamilton, all Ontario.

Francis E. Boddy, with the Goldsmiths' Stock Co., Toronto, Ont., was married, Tuesday, June 1, at Garden Hill, Ont., to Miss Margaret Wright, of that place. Mr. and Mrs. Boddy went to Muskoka on their honeymoon trip.

Frank C. Hart, an enterprising jeweler of Tacoma, Wash., is just installing a new street clock on Pacific Ave., at that place. The clock is 21 feet high and has four dials, each three feet in diameter. The dials are made of ground glass and are illuminated by electricity. The face of the clock is ornamented with the trade-mark of the jeweler, "The Hart of Hearts," which is stamped on everything that goes out of the establishment.

Association Notes.

The programme of the second convention of the Arkansas Retail Jewelers' Association has been announced. The convention will be held in Little Rock, June 15-16, at the new Capital Hotel. M. Duley will deliver the address of welcome and E. P. Stewart of Hope will deliver the response. Among the features of the convention will be the president's address by John L. Green of El Dorado; the discussion of the question "Shall we have a convention?" by C. H. Robinette of Little Rock; and the discussion of the question "Should watchmakers be compelled to pass an examination?" by A. C. Elliott of Little Rock. Others to take part in the program are E. A. Short, Prescott; W. H. Hope; C. H. Carmichael, Bossier; Livingstone, Conway; J. C. Kankersellville, and J. W. Dilbeck, Memphis.

Strong effort is being made to bring the coming convention of the South Retail Jewelers' Association, which will be held at Aberdeen, June 17, a most important and interesting gathering. A circular has been sent out by the secretary, W. Voedisch, to all jewelers in the South to interest them in the coming convention. Arrangements have been made for sessions to take place in the Commercial Hotel of Aberdeen, and jewelers will be given the opportunity to participate in the activities of the "Homecoming Week." The convention will take place June 16, 17 and 18. Owing to the homecoming of the railroads have agreed to give special fares to Aberdeen, and this, combined with the attractive entertainment which will be offered by that city, will probably result in the appearance of a big delegation of jewelers.

At the last meeting of the Kansas Retail Jewelers' Association, held in Topeka, May 26, the following officers were chosen: L. E. Armel, Holton, president; C. C. Stevenson, Pittsburg, elected secretary-treasurer; J. Peabody, J. Q. A. Sheldon, Manhattan, Carl Ricker, Emporia, executive committee. It is a question whether they will hold their next convention in Topeka with the opticians or hold it in Emporia. Likely, however, both conventions will be brought to Topeka. The officers by the opticians are: Henry Hutchinson, president; Carl Ricker, Emporia, vice-president; Walter J. Junction City, secretary-treasurer; Van Voorhis, Osawatomie, I. Downs, and C. A. Wilson, Wichita, executive committee. About 20 opticians and jewelers attended the convention.

Pacific Northwest

The Fifty Thousand Club, of Tacoma, is offering a cash prize for the best clock designed by school children.

A. A. Woelfel has asked permission of the City Council at Centralia, to install an electric clock in front of the new Zimmer building.

John Douglas, Onawa, Ia., has returned home, after a month's visit to the Pacific Northwest.

Boston.

stein & Sons have filed a petition for bankruptcy.

S. Tanner, Providence, has been elected on a business trip.

Byram, of the Wm. L. Gilbert Co. has returned from an extended

trip to Winchester, enjoyed, last week, an automobile trip through the western part of the State.

Winkins, watch inspector for the Albany Railroad, has returned from a highly successful fishing trip in

the State. On June 19 many of the retail jewelers closed for the Saturday half-holiday during the months of June, July and

August. The head watchmaker of the F. W. Co. has taken a cottage at Winchester, Summer, removing there last week his family.

The Bros., Lynn, whose place of business was recently destroyed by fire, have opened a new store on Central Sq., Market St., Lynn.

Edmunds, a director of the Waltham Watch Co. and well known in the city, died May 27, at his estate in Lynn, aged 71 years.

E. Franks, of Myers & Franks, has made a trip with Mrs. Franks to New York in their automobile, where they celebrated the marriage ceremony of their daughter's sister.

Due to the temporary absence of one of the Rogers' employes at her gold-leafing establishment at 79 Chestnut St., last week, a thief entered the store and stole old gold in the form of a watch and a number of watches, the value of which is placed at \$75.

Ambrose, a well known Natick jeweler, the past week, received the congratulations of his many friends, customers and trade associates on the fact that he is celebrating his 20 years in business. Ambrose is very popular and his success is a source of much gratification to his friends.

On the sale of the stock and office of Samuel Mendelsohn on the second floor of the Jewelers building took place Wednesday afternoon of last week. The auctioneer was the late Mr. Franks. There was present that overflowed into the street. It is reported that the goods were sold for an amount that was \$500 in excess of the appraiser's figures.

Man George H. Battis, of East Boston, was last Thursday sentenced to 18 months in the house of correction for passing bills for Fourth of July stamps purchased for the city in 1907 from the Thomas Long Co. The jury, composed of representative citizens, from whom testimony was on hand to the contrary, but without success.

The jewelers in town last week were: Frank French, for John B. Varick & Co.; Lester, N. H.; H. M. Hutchins, of Lynn; Me.; H. S. Hewett, Brockton; W. H. Westboro; L. R. Hapgood, of Lynn; W. Baker, Rockland; A. C. Whitman; B. D. Loring, Plymouth; J. Hodgdon, Haverhill; J. B.

Hill, Beverly; R. A. Lohnes, Worcester; F. S. Hall, Fitchburg; J. E. Whiting, Andover; M. F. Charles, Reading, and W. W. Cook, Natick.

The final meeting of the season of the New England Watchmakers' Club, held Tuesday evening in the organization's rooms on Bromfield St., was attended by an unusually large number of members. President Garfield was in the chair. The principal feature was a paper on "Jewelry and Jeweling," given by J. W. Rushton, for many years an expert at the Waltham Watch factory. The club's meetings will be resumed in September.

The E. Howard Clock Co. has equipped the Schrafft candy factory with an extensive master and secondary clock system, combining the Howard magneto watchman system. It has also provided a special interior clock for the Second National Bank of Nashua, N. H.; a program clock for the Washburn School, San Jose, Cal.; 13 special interior clocks for the State Insane Hospital at Danville, Pa., and an hour-striking tower clock for the County Courthouse, Winfield, Kans.

The Waltham watch factory baseball team was defeated 6 to 3 by the Norwood Press Club, June 1. Rogers, May and Mullin were Waltham's stars, and for that matter the entire nine did well, all things considered. Employees of adjusting department B enjoyed an outing, May 29, at Hardy's Pond. The success of the affair was due to the efforts of this committee: C. Hinkle, W. Mack, M. Keegan, Harry Knodle, C. Gustafson and J. Sunter. Much regret was felt at the death, May 29, of Ellis Bruce Olmstead of the balance department, who was aged 43 years. He is survived by his widow and two children. He had lived many years in Waltham and been previously engaged in other occupations. The Waltham Watch Co. band will give a complimentary concert at Robbins Park, Waltham, Tuesday evening, June 22, following out the custom of providing an open-air concert before the annual vacation at the factory. A number of employes who have shown much progress in athletics are to compete in the track events at the Knights of Pythias field day, which will be held June 17.

Louisville, Ky.

B. F. Schuckman, a local jeweler, and Mrs. Maria Schneider were recently married at Jeffersonville.

Louis S. Greenberg, son of Jacob Greenberg, a local pawnbroker, died recently of tuberculosis after an illness of six months. He was buried in the B'rith Sholom Cemetery.

An attachment was recently filed by E. Klauber against Wehner & Kreuels, a Berlin jewelry firm, in which the plaintiff asks for the order of sale of 2,000 silver cups, so that he may recover \$312, which he says he paid out for duty, freight and insurance upon them. The cups were to be displayed during the Shriners' convention, this week, and were ordered some time. They were not according to specification and Mr. Klauber refused to accept them and he is now seeking to recover the money which he paid out to bring them here.

Pittsburg.

George S. Dunbar, of the Geo. B. Barrett Co., has gone on a trip to the Grand Canyon, Yosemite Valley, Yellowstone Park and Salt Lake City.

Albert H. Gerwig, receiver for John W. Kimple, whose failure was announced months ago, is ready to distribute a 30 per cent. dividend among the creditors.

Wm. G. Ingham leaves, Saturday, for Philadelphia to attend the convention of the National Association of Credit Men, and will visit Atlantic City before returning home.

Jay Collier, Uniontown, according to Pittsburg creditors, is offering 50 cents on the dollar. Collier is said to have a well-stocked store, and his financial troubles caused some surprise.

Miss Mary Fries, who managed the business of the house of J. C. Crawford, was married, recently, to Frank Honus. Mrs. Honus was well known to the trade, and had many friends among the jewelers, being a woman of keen business ability.

W. W. Wattles was in New York, recently, and visited a number of friends in the trade and those formerly engaged in the jewelry business. Mr. Wattles had been to Atlantic City, and took a run over to New York before returning to his home.

John M. Roberts, who attended the meeting of the Pennsylvania Retail Jewelers' Association convention at Harrisburg, last week, was tendered the nomination for president of the association, but declined the honor on account of pressing business.

Among the out-of-town jewelers in Pittsburg, last week, buying stock, were the following: F. H. Hayes, Washington; Harry Bloser, New Kensington; R. L. Kirkpatrick, Butler; Harry Furtwangler, Greensburg; Frank Worrell, Canonsburg; J. H. Hoffman, Latrobe; R. V. Marshall, Freeport; N. L. Marsh, Sistersville.

Announcement is made of the dissolution of the firm of Gordon & Reamer. H. L. Gordon will collect outstanding accounts for the Franklin, Pa., store, and will pay all debts owing by that establishment, and D. T. Reamer will do likewise at the Meadville store, the firm having operated both stores. The dissolution took place, June 2, by mutual consent.

Mr. and Mrs. Sol Cerf will leave, tomorrow, for Freehold, N. J., to be present at the graduation exercises of the Freehold Military Academy, from which institution their son graduates. The family will spend a week or 10 days at Atlantic City before returning home. The son will enter either the Carnegie Technical School or the Pennsylvania University.

The creditors of Bernard Bien have been notified by the trustee, Joseph C. Marcus, that he has filed his first account showing that there is \$2 in his hands for distribution, and that a meeting of the creditors of Bien will be held this week in the office of William R. Blair, referee in bankruptcy, for the purpose of declaring and directing the time of the payment of a dividend. Bien was engaged in business on the South Side, and what is worrying Mr. Marcus most is how he is going to distribute the dividend. Bien owed \$2,200, so that his creditors will receive about 1/10 of one per cent.

Philadelphia.

TRADE CONDITIONS.

The car strike by the employes of the Philadelphia Rapid Transit Co., that started May 29, has finally been settled by the company. Business in general has been very much affected by the strike and great force was brought to the heads of the city and company to relieve conditions.

H. J. Andrews, 108 S. 8th St., spent the week end in Atlantic City.

Charles Muth, 1632 Columbia Ave., is having alterations made to his store.

H. H. Greiner, Bethlehem, Pa., has been spending the past week at Ocean City.

E. A. Wood and wife, Shamokin, Pa., were visitors to this city last week.

R. F. Beyer, 219 E. Main St., has opened a new store at 215 DeKalb St., Norristown.

James Blizzard, 727 Sansom St., has just returned to the city after a week's absence.

Swartz & Son, jewelers, Weissport, Pa., have opened a jewelry store at Leighton, Pa.

William G. Lingy, 1608 Passyunk Ave., has opened a new store at 58th and Haverford Ave.

I. Weiss, watchmaker, 711 Sansom St., was operated on, last Monday, at the Jefferson Hospital.

Gus Sickles, of M. Sickles & Sons Newark, N. J., office, was a visitor to this city during the week.

Dieges & Clust, 1123 Chestnut St., made and designed the medals to be presented at the Artisans' games, June 5.

Mrs. R. Pinkstone, 1947 South St., wife of the jeweler, has been recuperating at her cottage, Island Heights, N. J.

H. B. Sommer & Co., manufacturers of jewelers' cards and boxes, have removed from 628 Arch St. to 612 Arch St.

The alterations and improvements in the stores of D. V. Brown, optician, 734 and 740, Sansom St., have been completed.

Joseph Kerns, with D. V. Brown, optician, who has been seriously ill, has completely recovered and is again in harness.

William J. McKee, with Lyons & Wilkinson, jewelers, 4076 Lancaster Ave., was married last week to Miss Ethel E. Alvey.

In the June term, Court No. 1, suit will be brought by the Gundlach Manhattan Optical Co. against Bradley Photo Materials Co.

Thomas Judge, traveling salesman, with J. B. Bechtel & Co., 725 Sansom St., was operated on, Saturday morning, for appendicitis.

Theodore Beck, manufacturing jeweler, 702 Chestnut St., will attend the convention of the Mystic Shriners, to be held at Louisville, Ky.

W. D. Hart, with F. B. Wallen, Camden, N. J., with a party of friends from Monroeville, N. J., spent the week end at Wildwood, N. J.

The Sommer Clock Co., 1626 N. 11th St., will open a new store at 111 S. 8th St. This store was formerly occupied by L. C. Reisner & Co., jewelers.

George Kochler, watchmaker for the trade, has given up his business at 735 Sansom St. and has opened a retail jewelry store at 6225 Woodland Ave.

Quite a few of this city's wholesale and jobbing jewelers are interested in the guide book of the Merchants and Travelers' Association, 13th and Market Sts.

Nat Kinckner, with M. Sickles & Sons, after an absence of three months, during which time he has been seriously ill, is again able to report for duty.

Harry Lanz, formerly with the Philadelphia jobbers and now with E. A. Cowan, Boston, was a visitor to this city, last week, after an absence of six months.

Col. J. Warner Hutchins entertained the visiting Grand Masters of Masons during their stay in this city. The guests hailed from 40 different States in this country.

The Radnor and Merion High Schools competed on Saturday for the trophy presented by C. S. Powell, jeweler, 5 S. 8th St. The Radnor High School succeeded in capturing the prize.

Dr. L. B. Couch, a Nyack (N. Y.) eye specialist, spent the greater part of last week in this city, consulting with D. V. Brown relative to a new invention that will soon be on the market.

William Eishenhower, in charge of the diamond department of J. E. Caldwell & Co., sailed for Europe last week. Mr. Eishenhower will spend two months abroad in the interest of the firm.

J. E. Caldwell & Co. are the manufacturers and designers for the silver cups to be awarded as prizes by the West Jersey Horse Show at their annual meet at Collingswood, N. J., June 18 and 19.

J. Harry Knerr, jeweler, 443 Kaighn Ave., Camden, N. J., has been chosen to act on the special panel of jury drawn to try the officers of the State Mutual Building and Loan Association at Camden, N. J.

Notice was given to the creditors of George M. Kite, who was adjudicated bankrupt May 12, that the first meeting of his creditors was to be held at the office of Edward Hoffman, 309 Penna. building, this city yesterday at 11 A. M.

The Bailey, Banks & Biddle Co. made and designed the prizes that were presented at the tennis tournament of the Merion Cricket Club, at Haverford, Pa., June 7. They are also designers and makers for the cups that will be presented to the Riverton Yacht Club regatta.

The \$200,000 fire that wiped out 12 of the 12th and Chestnut St. firms on Wednesday, June 2, numbered among its sufferers two jewelers, S. R. Weaver, 1204 Chestnut St., who occupied the third floor of the building where the fire first originated. The jewelry store of F. G. Sutor, 106 S. 12th St., was badly damaged by fire and water. All losses will be covered by insurance.

The following jewelers were visitors to this city during the week: A. M. Kendall, Millville, N. J.; Roland Oliver, Burlington, N. J.; L. Thomas, of L. Thomas & Co., Wilmington, Del.; H. V. Stratton, Bordentown, N. J.; A. E. Baylis, Bristol, Pa.; B. C. Forster, Bristol, Pa.; L. L. Bickings, Norristown, Pa.; W. K. Schlotterer, Schwenksville, Pa.; E. K. Bean, Lansdale, Pa.; W. H. Krause, North Wales, Pa.; H. B. McFarlan, East Downingtown, Pa.; M. E. Hunter, Beverly, N. J.; H. Jackson, Williamsport, Pa.; Otto Heineman, Pittsburg, and E. S. Gehman, Bally, Pa.

A thief who operated at Sidney, Ia., recently, got away with about \$50 worth of jewelry from the store of S. P. Beale by breaking a hole in the glass of the window and pulling the articles out with a hook.

Lancaster, Pa.

Elmer Boyle has gone to Chicago two weeks' trip.

J. L. Straub has purchased from Brasey the latter's residence on Walnut St.

Marcus Edelstein, last week, purchased pretty new home on Chester Ave. John W. Hiemenz.

Geo. P. Roumfort and F. A. Peters, of the H. S. Meiskey Co., are off on their respective territories.

Julius F. Peterman, Memphis, visited relatives in Lancaster, last week. He is a native of Lancaster County.

Percy Appel, with W. W. Appel, one of an automobile party that spent several days in Philadelphia, last week.

Norman G. McLaughlin, last week, with John B. Roth, Jr., was married to Miss Ellen I. McAllister, Lancaster.

Archie L. Frantz, Pittsburg, Pa., en route to New York, stopped several days in Lancaster, last week to visit his friends.

Last week the people of the Paradise presented to Rev. R. L. Den a beautiful loving cup, which was finished by Aug. Rhoads.

F. A. Peters, of the H. S. Meiskey Co. and W. W. Appel, last week, attended the convention of the Pennsylvania Association at Harrisburg.

John B. Roth, Jr., has just finished his medals for the Shippen School. He has also completed 11 prize medals for the Montrose, Pa., high school.

George Schlim, St. Mary's, Pottsville, Lancaster, last week, having been a student in Bowman Technical School who has entered as a student in watchmaking and jewelry work.

Charles D. Rood, president of the Ilton Watch Co., last week Thursday, entertained at supper Gen. Booth, of the American Volunteer Firemen's Association, at the Firterian Church.

Town clocks in this section have been late to be on the strike. That a recently ran amuck, and last week a clock at Honeybrook broke and struck almost 1,000 times before being muzzled. As it occurred at the whole town was aroused and the streets.

Paul Wentz, a jeweler at S. P. formerly a student at the local school, has just finished a remnant of work, having engraved on a circle 5/16 of an inch. Prayer, with title, and the words engraved by 'Doc' Wentz, May 1917. There are 78 words, or 318 letters full magnifying glass being necessary to see them plainly.

Thos. W. Martin, Saginaw, Mich., leased a handsome new store on Chesapeake Ave., which is considered the best locations in that city. He has this fixed up with entirely new fixtures and expects to have one of the most complete and up-to-date establishments in Saginaw.

UNITED STATES PATENTS.

ISSUE OF JUNE 1, 1909.

923,419. COLLAPSIBLE STAND FOR CHINA-DISHES, ETC. LOUIS K. SONE, New York, Filed Oct. 3, 1905. Serial No. 456,086. A machine for cleaning and polishing spoons, forks and the like, having a plurality of brushes arranged one above the other on different shafts, the brushes on the one shaft being firmly attached to the same, while those of the other shaft are adapted to slide on same.

hooks formed on the free ends of said turn-buckles adjustably connecting the ends of said rings, a support and base of material formed with locking flanges permanently connected one to each other and formed with hook slots in said flanges and adjacent material, each of which accommodates a plurality of said hooks.

923,420. MICROMETER-GAGE. CHARLES O. MULLENBACH, Cincinnati, O. Filed Sept. 8, 1908. Serial No. 451,929. A device comprising a bar having a generally cylindrical surface and provided with a longitudinal conical dowel-holes, a spindle-stock having a conical end adapted to fit and hug the cylindrical surface of the bar opposite the surface provided

with a series of dowel-holes and carrying a socket adapted to register with any selected one of said dowel-holes, a dowel-pin fitting said socket and having a conical end adapted to fit and hug the cylindrical surface of the bar opposite the surface provided with the series of dowel-holes, combined substantially as set forth.

923,421. FORK. GEORGE J. RUSSELL, Pittsburg, Pa. Filed July 24, 1908. Serial No. 445,228. A fork comprising a flat body portion having one end terminating in a shank and its other end de-

terminating in a shank and its other end de-

enlarged bifurcated portion constituting a pair of tines, each of said tines being bow-shaped, said depending curvilinear portion of said body provided with a slot in close proximity to the inner ends of the tines, a longitudinally extending tine of compound curvature having one end provided with a hook arranged in a plane at the rear of the outer ends of said pair of tines, said tine of compound curvature having its rear end provided with a handle and further provided with a vertically extending lug projecting in said slot and pivoted to the depending curvilinear portion.

923,449. METAL-WORKING MACHINE. ERNEST B. SELLEW, Pawtucket, R. I. Filed Oct. 9, 1907. Serial No. 396,637

The combination, with the work spindle and the turret-slide, of a driving member, a connection from said driving member to both said work-spin-

dle and said turret-slide for imparting feeding movements to said turret-slide, and an independent connection from said driving member to said turret-slide for imparting return movements thereto.

923,495. STAKING-TOOL. FRANK R. CUNNINGHAM, Medford, Mass., assignor to Kendrick & Davis, Lebanon, N. H. Filed Aug. 21, 1908. Serial No. 449,723.

A staking-tool having a head provided with a passage through it for admitting an operating tool,

and arranged to bear normally with a yielding frictional pressure upon such tool, and means for disengaging said friction member from the operating tool.

923,566. COMBINED VIBRATOR AND TIMER. WILLIAM S. NEWCOMET, Philadelphia, Pa. Filed Aug. 24, 1908. Serial No. 449,904.

In a device of the character described, a casing, a rotatable member therein, a plurality of movable contacts adjacent thereto, means moving with said

rotatable member to maintain one contact stationary and means moving with said rotatable member to shift the other contact.

923,710. CLEANING-MACHINE FOR SPOONS, FORKS, ETC. JOHANNES L. SANDERS, En-

schede, Netherlands. Filed June 5, 1908. Serial No. 436,812.

A machine for cleaning and polishing spoons, forks and the like, having a plurality of brushes

arranged one above the other on different shafts, the brushes on the one shaft being firmly attached to the same, while those of the other shaft are adapted to slide on same.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

ISSUE OF MAY 19, 1909

25. WATCH HOLDERS. A. E. PEARSON, Merkenwell, London. Jan. 18.
 Watch holder or case of the kind shown, the watch is removably held against an aperture *i* in a panel *c*, by a flexible and preferably backing *k*, which extends over about one-two-thirds of the aperture, and may be made of silk, etc., gathered on an elastic band. The aperture *i* may be provided with an in-turned flange. The panel *c*, which is preferably made of

covered with leather, etc., and is hinged to the end of the frame *b* of the case *a* by a hinge, comprising two pairs of aligned flanges *d*, *f*, soldered or otherwise secured to the frame *b* respectively, and connected together by hinge pins *e*. A space *g* allows for the passage of a snap-fastening *h* when the case is closed.

26. CLOCKS. P. POETTO, Paris. Jan. 20.
 Patent applied for under Section 91 of Patents, etc., Act, 1907, Jan. 22, 1907.) Void. Published under Patents, etc., Act, 1904.)
 Automatic Clocks.—A master clock 2 determines the alternate action of two clock-work trains 3,

work a cock 125, letting water flow into a bell 5, whereby the air therein is compressed and expanded to work indicators. A cam on the arbor of the escape-wheel of the watch disengages a bell-crank detent 68 from a lever 59 having a nose 65, and this lever 59 disengages a detent 55 with a pin 57

from a wheel 49 of the clock-work 3 bearing two pins 51. One of the pins 46 on the preceding wheel 45 of the train then makes a lever 76, acting through a weighted cord 73 and a bell-crank 128, operate the three-way cock 125 to admit water to the bell 5. The air at the top of the bell and in the connecting-pipe is accordingly compressed and inflates a bellows 8, Fig. 5, which drives an indicator. In a similar manner another cam on the arbor of the escape-wheel sets in action the other water-cock is reversed, water flows out of the bell, the air-pressure sinks, and the bellows collapse.

1,345. PENS. A. F. ZAHM, Washington, D. C., U. S. A. Jan. 20.

The barrel of a reservoir pen consists of a tube of transparent or translucent non-vitreous material, for example pyralin or amber, which is closed at one end and screw threaded at the other to receive a nib-piece of ordinary form. The barrels may be formed by boring them out of solid rods, or they may be moulded from material such as celluloid when in a plastic condition, or they may be formed from opened tubes, in which case

the ends are closed either by moulding the walls together or welding, etc., a plug therein. A plug of suitable material, such as hard rubber, into which the nib-piece screws, may be screwed into the end of the barrel to overcome the difficulty of removing the nib-piece if too green a stock is used for the barrel. Suitable designs may be formed on the barrel, for example wires or filigree metal may be embedded therein. To facilitate filling the pen by a pressure feed-device, as shown, a poppet or other valve may be provided at the end of the pen, to produce an air vent. A transparent or translucent rubber sack may be secured to the nib-piece.

Applications filed April 26-May 1.

THE HOROLOGICAL REVIEW

Unique Clock Made by John Ebsworth, London, in the 17th Century.

The clock illustrated herewith is one of the most costly timekeepers, such as were made in England subsequent to the invention of the rack-striking works (by Edward Barlow, London, 1676,) in manifold

ways. It was made by the celebrated master, John Ebsworth, who learned his trade with Thomas Ames, in London, in 1657. He became a member of the London Clock-Making Association in 1665 and its president in 1697. The name of this master was first encountered on large lantern clocks decorated with dolphin ornaments. He carried on his business under the name of "The Cross Keys, in Lothbury." It appears, however, that at one time his workshop was located in the "New Cheap Side," a street that still exists in London, for we find an address on a clock. In an advertisement in the *Post Boy* in 1699 (May 2), the name also occurs. In that case the story of a lost small silver watch is related to return it to John Ebsworth, of the Cross Keys, for a reward of two guineas (\$10, U. S. currency).

The mechanism of the clock (Fig. 1) is described by Court Clockmaker Gustav Gartner in the *Deutsche Uhrmacher Zeitung* of an eight-day movement with a rack escapement. The verge arbor of the rear pivot, has a knife edge supported swinging in a steel pan. The rack-striking work, with rack arrangement, is unique. The rack is placed between the plates, near to the rear plate. The rack has double tothing; that is, its toothed arc is prolonged and has a double complement of teeth. In the fixed gathering pallet, located on the side of the wheel on its arbor, ends in the other half the rack catch. The rackable is also the hour drop arm which at the moment of release drops onto the cam (this is located on the hour arbor) to bring it back into its proper position when in case the striking work has stopped and the going movement is still in motion it has reached the lowest position of the cam.

For its purpose all rack striking clocks of this construction are equipped on the hour drop arm with the familiar spring, brass nose piece which, when the

striking work is run down and the going work continues, slides up an incline on the side of the cam in order thereby to keep the hour drop arm in its proper place. In the clock shown herewith we see this device arranged in another original manner. The rack arbor, like the wheels, is located

FIG. 1.

between the plates; it is adjustable by about $3/16$ of an inch (4 mm.) between them and passes through the front plate. At the end of this extension the hour drop arm is placed. The rack arbor is forced towards the rear plate by a small spring screwed flat to the front plate. If the striking works should be in the position described, the adjustable rack effects what our present drop arm spring is expected to do. The hour drop arm can therefore also be brought to slip on the side of the hour cam. In order, however, that the rack catch when the rack arbor is moved (and, of course, the rack also) does not fall out of the rack teeth, it is twice as broad at the drop nose as the rack teeth are thick. The striking work, like the going works and the bell mechanism, have fusees, each with chains $78\frac{3}{4}$ inches in length.

The playing works consist of a pinned

chiming barrel that operates 24 hammers striking on 13 bells. By moving, not the barrel, but the entire bell and hammer frame, the two marches hereinafter mentioned may be alternated. In the unlocking of the playing works we should particularly observe the manner in which the unlocking of the warning is effected before the complete delivery of the lifting piece. The unlocking arm *a* (Fig. 2) is equipped in front with a brass nose-piece *b*, rotating on *i*, which before it begins to raise the arm *a* by means of the unlocking rod *f*, the arm *a* takes the position occupied by the dotted line. The arm *c*, raised in the direction of the arrow, causes the arbor *w* to turn a little, and the warning piece *e* is thereby placed in the way of the warning wheel pin "s." At this point the arm *a* itself is raised and the release of the playing works' rack is completed, whereupon the unlocking

FIG. 2.

follows and on the fall of the unlocking lever the playing begins.

The bell music or chime was for the purpose, about a quarter of an hour before the striking of the hours, of calling attention to them which, especially at night, in those times may have proved practical.

The three mainsprings, forged from steel and then, as bands, reduced to the requisite thickness by filing, were in an excellent state of preservation. Each spring weighed $23\frac{1}{2}$ ounces and was $2\frac{1}{4}$ inches wide, while the barrel had a diameter of nearly $3\frac{1}{4}$ inches.

The date was changed in the usual well-known manner. The embellishment of the movement consists in beautiful engraving on the back plate, which also bears the inscription, "John Ebsworth, Londoni, fecit." The case is of ebony, the covering or roof of copper, repoussé and fire gilded. The weight of the clock work is 30 and that of the case 14 pounds. The height of the complete clock is nearly 23 inches, its breadth $14\frac{1}{4}$ inches and depth 10 inches.

The clock formerly stood in the castle at Ansbach, and at the time of the beginning of the reign of the Margrave at that time, William Friederich (1703) may have come from England to Ansbach. The sister of this Hohenzollern was, as is well known,

WALTHAM WATCHES

FIFTY YEARS AGO

FRIDAY, APRIL 22, 1859.—The proprietors and workmen of the watch factory at Waltham were entertained by Gov. Banks at his residence today. About 200 men and women were present.

From Boston Advertiser, April 22, 1909.

The Waltham factory had existed five years. Here was the first successful effort to realize the dream of Dennison, father of American watch-making. Here was the first and only structure in the world erected for manufacturing pocket timepieces. Three hundred people were employed, the largest number ever assembled in such an enterprise. General Banks was proud of Waltham, where he was born and where he had worked as bobbin boy in a cotton mill. He found time, while Governor of a great State, to greet and encourage the operatives of this watch factory, because he believed that they were creating an imperishable industry. He lived until the word WALTHAM had symbolized the perfect watch in every country on the globe.

In that year, 1859, the total number of Waltham watches manufactured was 12,304; in 1906, the product was 855,000; to-day there are 16,000,000 in use. The Waltham factory was the parent factory. It is now the corner-stone of an industry that gives a livelihood to more than 100,000 persons in the United States. In 1859, it was the only institution of its kind here or anywhere else; every other watch factory came later. The Waltham factory is distinguished by its achievements as well as by its age. Waltham watches have always exemplified the highest type of watch construction, and public recognition of their superiority is attested by the highest awards at all the great Expositions wherever they have been shown.

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing on this hemisphere.

princess (Wilhelmina Caroline) of and subsequently Queen of England. Not alone the date 1703 indicates the watch clock may possibly have been presented to the royal princess to her Mar- brother, but also the ducal marches "Scandinavian" and "pinned" on the barrel—the "Scromberg March" and the "Duke's March"—appear to suggest this. How much might such a royal present have these times?

A Simple Instrument for Determining the Time.

The determination of time is very often, for the navigator and exploring traveler, one of the most important problems, the prompt and expeditious solution of which is therefore of great significance. Recently Professor von Glasenapp has described in the bulletin of the Astronomical Observatory of France an instrument designed for this purpose, that facilitates the determination of the time with remarkable accuracy by a method much more simple than that obtainable with the aid of the sextant or other apparatus hitherto employed for this purpose.

The new invention is described as the "Soleil" and consists of a metal cylinder about 3 3/4 inches (10 cm.) diameter; it is suspended in such a manner that the cylinder is always exactly vertical and its axis is designated in the azimuth. A hole is bored through a side of the cylinder at a point about 45 degrees from the vertical, the smaller end of the hole being nearest the center.

The process consists really in the observation of equal heights before and after the sun crosses the meridian. The sunlight casts, passing through the hole, a disc-like shadow on a scale attached to the inside of the cylinder. To determine the incorrectness of a clock, the passing of the sun picture before and after noon, must be noted on the scale and by a suitable reduction of the observation, with the aid of the clock, the error of noon can be determined. By introducing the corrections for the mean time difference in longitude the true mean time can be ascertained. The instrument was subjected to a careful test in the observatory of Petersburg, which demonstrated that by this means the true time can be ascertained in 40 seconds.

Miss Cantacuzene, of St. Petersburg, and Miss Julia Dent Grant, of New York, have come into possession of the smallest watch in the world. It was made for the Empress of Brazil on her direct order by Gogelin, one of the most famous of Geneva watchmakers. Gogelin spent several years at the task, and permanently lost his eyes straining to fit the watch. He received \$25,000, which he sold for a small price. The watch is exactly one-fifth of an inch in diameter and is set with a circle of small diamonds in a gold case. It keeps excellent time. The Princess Cantacuzene has bought the watch for less than its original value, although several other watches in museums were in the market

Novel Invention of a Watchmaker.

THE genius of the watchmaker seems to extend far beyond the making of watches and clocks, as evidenced by the unique object illustrated in Figs. 1 and 2.

FIG. 1.

This is an opera chair which was made by R. B. Smith, a well-known watchmaker of New York, one of whose inventions in the form of a boudoir shadow clock was published in this department in the issue of

FIG. 2.

April 28 last. The economy of space was the object sought in making the chair, and the inventor seems to have accomplished his purpose very well.

In case of fire or panic, as each person

rises from his or her seat, the chair will fold automatically, leaving the space between the rows of seats clear for exit. (See Fig. 2.)

Moreover to let a person pass in or out of the aisle the person sitting need simply press back in the chair and the seat will slide back eight or 10 inches, and in so doing tilts at the back high enough to pass up over the knees of the person seated behind.

It will be seen from the photograph that there is also attached to the seat a hat receptacle which will hold either a lady's or gentleman's hat. This receptacle folds when not in use and occupies only about two inches' space at the bottom of the chair. The arm rests are much longer than those in the present theatre chair, and as the seat folds the two small rollers seen underneath each arm rest come in contact with each side of the seat. By this means they are carried into an upright position between the back and seat of the chair. There are two rollers attached to the tail end of the seat which bring the back of the chair upright when not in use, and when in use they allow the back to fall to an angle which makes it comfortable for the person to rest. When the person is seated these two rollers engage in two lugs, which holds the back of chair rigid through the weight of the person seated.

Astronomical Clock of Remarkable Accuracy.

IN the observatory of Columbia University, New York City, is one of the most accurate clocks in the world. It has run for several months with a mean error of only 15/1000 of a second and a maximum error of 30/1000 of a second per day. That means that it does not vary more than half a second a month, or six seconds a year. The clock is an astronomical clock. It is surrounded by a glass case in which a partial vacuum is maintained, and in order that the case may not be opened or disturbed the winding is done automatically by electricity. The clock is set up in a room especially constructed to keep it free from jar or vibration. The temperature and barometric conditions are maintained practically constant, and every possible precaution is taken to minimize the errors of the running rate. It is not generally appreciated that clocks of the present type, although used as far back as the 12th century, and possibly earlier, were but fair timekeepers until several centuries later. In fact, it has only been within the last few decades that very accurate clocks have been manufactured. Those which the astronomers used in their observations at the end of the 15th century were so unreliable that modified forms of the water clocks of the ancients were often employed as checks upon them. Galileo's discovery of the isochronism of the pendulum from its swinging chandelier in the church of Pisa was of great value in its application to the measurement of time. The inventions of the mercurial and compensating pendulums have aided materially in cutting down the errors of the running rate and controlling the motions of the clock mechanism.

THE SILENT SALESMAN

This is the reproduction of our electric flash-light window sign which has helped hundreds of jewelers to sell SOUTH BEND WATCHES. It helps to sell other lines of jewelry as well when it is placed in the window.

Click, With Disconnecting Pawl.

In former article, says W. Schultz in *Deutsche Uhrmacher Zeitung*, I discussed the factors that must be considered as indispensable in a winding click. It is insisted that the pawl or shall be as thick as possible, from which it follows that the teeth of the wheel must not be too thin; further, the click spring must be as long and as possible and be subjected only to pressure, not to pressure or pull, as is to be avoided in the click-works in which the pawl and click spring are made of one piece. An exception occurs—the arced— in the case of those click

head *a*, with which the circular spring, *f*, is made in one piece. This is effected by recessing. The bottom of this recess is partly stamped out, setting the spring, *f*, free, and in part remains. The remaining portion, with the part *b*, connected with the head, forms the eye of the click,* on which it turns about the stop screw, *s* (Figs. 1 and 3).

The end, *c*, of the click spring, *f*, is bent nearly at right angles outwards and has in this case an important part to perform. As shown in Fig. 1, it reposes, when at rest, between two of the teeth of the ratchet wheel *R*. When, however the click-work is in action, at which moment the ratchet wheel, *R*, turns in the direction of the ar-

this case also the click consists of a head *m*, the spring *i* and the eye *a*, and is provided with a nose-piece *g*, which, when the click is at rest (see Fig. 4), enters but slightly between the ratchet teeth. The head *m*, rests against the flat place, *K*, in the circumference of the pawl, which consequently takes up the pressure.

When the watch is wound the ratchet wheel, *f*, turns in the direction of the arrow, *c* (Fig. 5), and not only throws the click-head, *m*, out of gear, but also carries the nose, *g*, with it, past which the ratchet teeth can now slip.

The winding being concluded, the ratchet, *f*, moves back three or four teeth in the direction of the arrow, *j* (Fig. 4), before the click-head, *m*, again engages the ratchet teeth and brings the click-work to rest. When we note the direction in which, in Fig. 4, the pressure of the ratchet teeth on the click head, *m*, is exercised, and take into consideration also the extended form of this head, for at first we have the impression that in a state of rest the spring, *i*, possibly at the point *n*, may be subjected to an outward strain, which, while practically devoid of importance, is nevertheless not exactly desirable. I have satisfied myself that in the case of a watch equipped with such a click-work this fear is groundless. In reality, the direction of the chamfered surface, *k*, more nearly approaches a tangent, which we can imagine drawn to the teeth of the ratchet wheel; in consequence of this, the click-head, *m*, is drawn wedge-like to the left and the surface, *k*, takes up the whole counter pressure without the pawl spring, *i*, having to withstand any part of it. The unusual direction of the click-head should therefore cause no misunderstanding in the manner indicated.

Less unfamiliar appears the view of the click-work shown at rest in Fig. 6. In this case, too, we have the eye *a*, the head *m*, the spring *f*, and at the end of it the nose *p*, which, in winding (when the ratchet wheel, *R*, turns in the direction of the arrow, *g*), is carried along by the ratchet wheel until the semi-circular projection, *e*, of the pawl comes up against *n*. The spring action, while the ratchet teeth slip past the nose, *p*, is exceedingly gentle. When, however, the click returns to rest (Fig. 6) the head, *m*, alone sustains the pressure of the ratchet teeth, without the pawl spring being subject to the least strain.

The backward movement of the ratchet wheel when the winding is finished in this excellent click-work amounts to about four teeth, and the catching in of the click-head is absolutely assured, while during the backward movement of the ratchet wheel, *R*, the nose, *p*, drops into one of the tooth spaces and the entire click is irresistibly turned around with it.

Mayor Haven, of Duluth, Minn., recently vetoed a grant of a license to conduct an auction of a jewelry stock, as neighboring merchants raised vigorous objection to it.

The stock of the Burn Jewelry Co., Birmingham, Ala., which was recently purchased from the trustee in bankruptcy, is now being sold at auction by the Crellin-Feller Co., Kansas City, Mo., at Mr. Burn's old stand in Birmingham. C. W. Bowman is the auctioneer.

FIG. 1.

FIG. 2.

FIG. 3.

which the greater portion of the to which the pawl is exposed is the side of the cock. An excellent complement to previous designs is afforded by the three patented which we will now devote our attention. They belong, all three, to the class in which the pawl and click spring consist of one piece; in all three, however, the pawl is referred to, the subjecting of the pawl to pressure or pull, has been avoided. Furthermore, all three have the advantage that the ratchet wheel when the winding is completed,

row, *i* (Fig. 3), the pawl head not only passes out just beyond the teeth of the ratchet wheel, but owing to the fact that the ratchet teeth take the nose, *c*, with them it is completely turned over outwards, until it rests against the edge of the recess, *d* (see Fig. 3), and is consequently far removed from the influence of the ratchet wheel teeth. The latter pass only the nose, *c*, which, under the gentle pressure of the click spring, is forced but slightly into the spaces between the teeth. As soon, however as the winding is completed and the hand releases the winding crown the

FIG. 4.

FIG. 5.

FIG. 6.

backward several teeth before the pawl holds: for this reason the spring must be wound to the final point, so that it is of this description to a certain extent the place even of the stop-work. The click-work illustrated in Figs. 1, 2 and 3 is apparently the invention of a resident in America, for the Swiss Patent No. 38,378, granted on it reads, to the inventor, West Newton, Mass. The inventor, by the way, assigned the patent to an American concern, who will observe it in their productions. Fig. 1 shows the click at rest, Fig. 3 shows it in action it assumes during winding, Fig. 2 shows the click or pawl alone. We must first examine some of them closely. We find a very thick

ratchet wheel, turning backward in the direction of the arrow, *c* (Fig. 1), takes the nose, *c*, three or four teeth back with it, whereupon the click-head, *a*, again snaps back securely into the ratchet teeth and the click-work comes to rest in the position shown in Fig. 1. The spring is consequently relieved from its extreme tension by the extent of this backward motion of three to four teeth.

On precisely similar principles are based the following two click-works, which are protected by patents issued to a well-known firm in Switzerland. One form of click-work is shown in Figs. 4 and 5. In

*By click, in this case, is meant the entire part depicted in Fig. 2, and consisting therefore of the head *a*, the eye *b*, and the spring *f*.

THE PENNSYLVANIA WATCH CASES

Trade **XXX** Mark

A NEW ONE AND A GOOD ONE!

We would suggest that you look into the merits of our cases. A case of the highest value coming to you at the lowest prices consistent with quality and quantity. A heavy, strong, stiff case of good value.

IT IS A WINNER!

It will mean increased business to the Dealer who carries a line of these cases in his stock. Our line will be sold exclusively through the Dealer and Jobber. In offering our goods for sale you will not be up against the competition of Mail Order and Catalogue Houses.

Drop us a line for description and prices. You will find both interesting.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

The Various Methods of Meeting Competition.

Extract from "Human Nature in Selling Goods," by Jas. H. Collins (H. Altemus Co., Philadelphia, Pa.)

A GREEN young man goes out to sell goods. It is profoundly disquieting to discover how many others are selling goods, too. Many have the same line. Men from rival houses are just ahead of him, just behind, on the same train. He waits with them in the same anterooms, and by diabolical devices they interrupt his argument to get a chance at the same customer.

He writes to the sales manager about this. Yesterday he nearly sold a bill of stuff. But the Consolidated salesman visited that customer the day before. To-day he was just on the point of selling a bill when the customer remembered that the Consolidated man would be along to-morrow. Customers everywhere speak glowingly of the Consolidated man. He has the lowest prices, the best terms, the most reliable merchandise, the longest acquaintance in the trade—blast him! The novice suggests modification in our line so it will be more like the Consolidated man's. He specifies articles he might have sold if he'd had them—the Consolidated man has. He telegraphs for a special quotation to help him land an order the Consolidated man is bidding on this afternoon.

But the sales manager is deaf to suggestion and blind to improvement. He lightly puts the novice off with a funny story:

"My son, if you find one town that hasn't been visited by competitors in 10 days don't lose a minute in wiring us; we'll buy it for a rest cure. In 20 years on the road I have found only one town like that, and hurried into it Sunday to be on hand before anybody else could get in Monday morning. I went to church. The clergyman talked to the sleepiest congregation I ever saw. He wasn't going to preach hell fire that evening, he said. He would tell them about something a good deal worse. He wasn't going to take his text from the Scriptures. He would take it from something of the utmost importance that had happened in their own town and their daily lives. Did they realize, dearly beloved, that the last Hebrew had given up the struggle and moved away from their town the week before? Now, son, when I heard the text I didn't need any sermon, but got out of this town, too, by the midnight train."

This is not especially comforting to the

green salesman, however. Shut off in his complaints, he still broods over competition until experience teaches him a few things. One is that buyers shrewdly use the Consolidated man as a dummy to scare him and beat down his prices. Another that they use himself in the same way to frighten the Consolidated man. Still another, that there are at least three fundamental ways to deal with any competitor:

First—Ignore him utterly.

Second—Fight him hand to hand.

Third—Use and exploit him.

* * * * *

In building up a trade for a comparatively new house, or a small one, against old and powerful competitors, it seems to be absolutely imperative in certain lines of business that the attitude toward opposition be one of tactful ignorance. No matter how big the other fellow may be, the salesman for the little house has never heard of him.

* * * * *

It is sometimes excellent policy, too, for the salesman of a strong dominating house to ignore a small competitor.

* * * * *

In staple lines of trade the salesman goes over the same territory season after season, selling goods that are not only familiar and simple, but which are sold largely on price. There isn't much opportunity to mystify a grocer in granulated sugar. Therefore, in staple trade much of the burden of competition is thrown on the salesman. He has little advantage in goods. There is little to say about them. So he depends largely upon tact, acquaintance and plain dealing. Sometimes Providence is kind and gives him fools or greenhorns for competitors. In that case he may profit by their errors. But suave, smiling ignorance of the opposition is the common policy.

Suppose, however, that the salesman has something new and novel, like a labor-saving office device; or something abounding in technical complexities, like a piece of machinery; or an article that people buy only once or twice in a lifetime, like a fire-proof safe.

Then the whole attitude toward competitors changes. Price can be made secondary. The demonstration and the "talking point" make acquaintance superfluous. Logic

replaces tact, and sophistry sometimes enforces logic. Instead of ignoring opposition, it is possible to fight it or to exploit it, to thrive upon it. If of a weapon in the hands of a buyer the Consolidated man, one's competitor often a missionary who goes about on interest. Instead of a thorn in the side is often fun.

* * * * *

But in meeting competition with goods the salesman's chief object is to center the customer's attention on technical differences, or "talking points," as they are called in sales work. The battle is fought on these. Competition has distinct advantages for each salesman. Each makes a list of the demonstrations of his competitors. An able salesman in a line like far from disliking competitive argument will welcome it, and ask only the advantage of talking last. The more his competitors have talked, the more material there is in the customer's mind to work upon.

If competitors will only be specific and emphatic in their claims, the last man to find it easy to tear them down. And ever gets the order, it will usually be a better sale than would be the case if one man alone in the field. For the customer starts out with but one detail in his mind, as a rule—that he doesn't want to pay very much. By the time he is ready to purchase, these different arguments will have directed his attention to many other points. Price will be given consideration, and the salesman who lands the order can often systematize and raise the expenditure of a man who is buying because the latter's thought is wholly centered on quality and service.

The talking point is so essential in this character that many manufacturers build attractive selling devices into their goods.

In the safe industry, for example, there is a marked difference between a fireproof strong-box and one that will resist being merely packed with composite fireproof safes are sold at moderate prices, gives off steam under heat, and built sufficiently strong to stand falls through a burning building. But burglar proof must be made of finely tempered metal with nice adjustment of parts, and the cost often puts them out of reach of the man who wants a common office safe.

In this industry there is a strong competition. Each manufacturer's men have fireproof arguments reduced to formula, so that the man who comes

Storekeeping Department.

and persuades the prospect to visit his room has the best chance of landing the order. One concern, however, gains an advantage by building into its fireproof safe a "talking point" that enables the burglar to use burglar-proof arguments. This talking point is an alarm device. The burglar who puts a drill into that safe, or touches the dial, closes an electric horn, sets a large automobile horn ringing in the room over his head, and a gong ringing outside the building. The effect upon the burglar may be imagined.

But probably only one safe in a hundred will ever be tackled by a burglar. The real value in this device is in leading the prospect up, under the impression of an ordinary safe, and letting him see the combination dial and close the door.

This is often just the last bit of persuasion needed to close the deal.

As soon as it was clear, in the Autumn of 1908, that America faced a commercial depression, far-sighted manufacturers in the West were this prepared for it by developing a new method with striking talking points. In safes, for instance, a little compartment to hold the ledger would be added, under an unusual combination lock; or several receptacles would be built into an interior shelf, like safe-deposit boxes, for the safekeeping of papers of partners in a business. They enable salesmen to hold business during slack times.

(To be continued.)

Market Days.

Development is more significant in the merchandising world to-day than that of a town promotion, says the *General Merchants' Review*. It is significant not only because it marks the passing of the idea of "each man for himself and the best for the hindmost," but because it shows the country merchants' way out of their old order mire.

On market days, held once a month, the towns are growing in importance especially in this middle west. They become more important and will radiate to other parts of the country. It is a movement which brings retailer and producer together for the good of both. It is the beginning of an era when the merchant who trades in town will be regarded as important in the affairs of the community of people who dwell in the town. And could he not be so regarded? His influence in this agricultural country of ours is great for the entire community. The towns live upon it. They must depend upon the farmer for their living.

Many dealers look upon the farmer as a good thing to sell to, but of no account in any other way. It is this spirit in communities that has developed mail order buying from catalogues.

It is shown that town merchants don't care for me," says the farmer. "All they want from me is money. When I want anything from them they can't see me at all. Why don't they buy from a catalogue?"

It is in many cases that the merchant is as bad as the farmer pictures him. There is no other way to get that no-

tion out of the farmer's head than to do something to further his interests. This the market day tends to do. Good roads, better farming conditions, a better market for produce, seed contests, stock shows, these are some of the things which should be taken up in the market-day programmes. They all help the farmers. A series of market days, each taking up one phase of this interdependence of farmer and merchant, can be arranged to extend through the Summer season.

When town people and country people meet, as they do during these special days, they become better acquainted. This is the beginning of an era of better feeling. As other sales days take place this friendship grows. One of the best indications of co-

A Retail Jeweler's Display That Attracted Many Passersby.

A WINDOW attraction that has probably caused more comment and excited more curiosity than anything of the kind ever shown by a jewelry store in Washington, D. C., has been a mysterious clock in Selinger's jewelry store, F and 9th Sts., which was mentioned in a recent issue of THE JEWELERS' CIRCULAR-WEEKLY.

As told at the time, the clock consists of a glass clock dial, suspended by a brass chain and contains nothing but the two hands. As there is no indication of mechanism or motive power, the curiosity of the passerby has been excited and all sorts of theories have been devised to account

PASSERS-BY WATCHING THE ODD WINDOW DISPLAY IN THE STORE OF J. SELINGER, WASHINGTON, D. C.

operation will be the decrease in the amount of mail-order freight and express. Mail order business cannot exist to any great extent when the spirit of co-operation—of real, not selfish, co-operation—exists between the town and the country.

The Way of the Enterprising.

DAVID GOLDMAN, 330 Grove St., Milwaukee, Wis., is sending out post cards showing on one side a very striking window display which was made a short time ago by his concern.

A. J. Reinhardt, Lincoln, Ill., during the Easter season ran in a local newspaper an attractively designed advertisement 10 inches high by 13 3/4 inches wide. The introduction read as follows: "We extend to our friends and patrons hearty Easter greetings. In all the 18 years we have been in business our stock has never been more complete than now. The prices quoted here are only a few of the many bargains we have to offer you. Come and see for yourself." The announcement was profusely illustrated with cuts showing new designs in jewelry, fraternal emblems, etc., etc. Prices were also quoted.

for the hands turning and the clock keeping correct time.

An idea of the interest the clock attracts is to be gained from the illustration herewith made from a photograph showing the large crowd in front of Mr. Selinger's window.

The clock is composed of quarter-inch plate glass, with a six size key-winding watch movement in the center. There is absolutely no projection on either side of the glass. The brass plate that fits flush on the back of same has four screws. One serves as a pivot so as to allow winding and the other three are dummies, to make the plate appear stationary. The plate is two feet square and carries a hand nearly two feet long.

Mr. Selinger will be glad to give full information about the clock to any jeweler who may be interested, free of cost.

There is a movement among the jewelers of Zanesville, O., to close their stores at noon each Thursday during the Summer months. The proposition has been favorably considered by a majority of the members of the trade, and it is probable that it will go into effect.

EARLY ENGLISH STONE WARE.

By J. A. R., in the *Canadian Pottery and Glass Gazette*.

(Continued from issue of March 17.)

term "salt glaze" has been applied to the English product, a true stone ware in body, thin and graceful in appearance, so highly fired as to be translucent in the thinnest parts, covered with an extremely hard saline glaze, which first appeared in Staffordshire near the close of the 17th century. Thomas Miles is credited with the production of a white stone ware in 1685. Professor A. H. Church has divided the manufacture of white salt-glazed ware into four periods, approximately 25 years each, as follows:

1. From 1685 to 1720, Archaic period, when hand-applied ornaments were used on brown or turned vessels.

2. From 1720 to 1740, when flint was added to the body, the work being fine and sharp.

3. From 1740 to 1760, when colored enamels were employed for decorating the surface.

4. From 1760 to 1780, when basket and scrollwork were prevalent.

The productions of the first of these periods were embellished with ornaments hand-drawn or stamped in the clay, or separately molded and afterwards applied to the surface. The ground of the ware was colored or white. The ware of the second period was formed by stamping designs in metal dies, or by the casting process, which consisted in pouring the clay, or slip, into baked clay or metal moulds, in which the decorative design had been previously engraved. This method insured thinness of substance and sharpness of relief.

In various potteries throughout the Staffordshire district began the manufacture of this beautiful and purely English ware, which soon began to be exported in considerable quantities to Holland and other European countries and to the West Indies. Teapots, tea caddies, and many other vessels were produced in an endless variety of forms, in imitation of various animals such as camels, squirrels, bears, and other representations of houses. Conical forms were ornamented with fan-shaped reliefs, scrolls, floral patterns and delicate traceries. Bottle, vases and other vessels were beautified by floral sprays, armorial bearings, masks and other ornaments; while plates, tea saucers and trays of various graceful shapes were bordered, and often entirely covered with panels and alternating medal-

ions of hatched, diapered, trellised and starred ornamentation. During this period, and the preceding, no color was used to relieve the pure whiteness of the ware.

In the third period, color was first added to the decoration. Patterns were scratched in the unbaked clay, into which the blue color was rubbed before firing. This style of ornamentation was known as "scratched blue." Pieces of this description frequently bore inscriptions and dates ranging from 1750 to 1780. Between 1740 and 1750 William Littler, of Burslem, produced some of the most beautiful and effective pieces of salt-glaze with a solid deep blue ground, by dipping them, while still in a partially dried clay state, into a slip of the same ingredients, to which blue color had been added, which were afterwards fired in the salt-glaze oven. Some of these pieces were painted with designs in raised white enamel, in the Persian style of the stanniferous faience of Nevers, France. These decorations were fixed by a second firing at a lower temperature. Another style of decoration, largely employed between 1740 and 1760, was the painting on the glaze in enamel colors. Human figures, Chinese scenes, birds and flowers were added in polychrome. A superb example of this style is a dish, 15 inches in diameter, painted with a figure scene in brilliant enamel colors. Towards 1750 pressing in plaster moulds came into vogue, whereby it became possible to produce large pieces, such as platters and tureens. Entire table services were made by this method. Some of the later pieces were covered with tinted grounds—red, purple and turquoise blue—in which small panels of various patterns were reserved in white, to receive the polychrome paintings. About 1755, soon after the invention of transfer printing, that process was applied to salt-glaze decoration to a considerable extent. During the third period the art of making salt-glaze ware had reached its highest development.

The fourth period marked the decadence of the art. Pierced and basket designs, in combination with embossed work, were the principal features of this epoch. Aaron Wood and other potters modeled patterns with basket work centers and perforated borders. About 1780, after the introduction of cream ware and porcelain, the manufacture of salt-glaze began to decline rapidly, although it continued to be made

at a few establishments until after the beginning of the 19th century. While the greater portion of white salt-glaze ware was produced in Staffordshire, it was also made to a limited extent at Liverpool, Jackfield, Leeds and a few other places.

What Is Faience?

"WHAT is faience?" and "How did it get its name?" are questions that are frequently asked, but seldom answered with any certainty. Persons who have been long in the trade sometimes use the word without any distinct idea of the origin or real meaning of it.

Majolica and other painted pottery was made in many Italian towns in the latter half of the 15th century. If not the most ancient, one of the most celebrated manufacturing centers of majolica was at Faenza. But Faenza was also a place of considerable commercial importance, and had a regular trade with many foreign places. Its special majolica productions in time became known to the French by the name of *faïence*, a corruption of the name of the town. This name was ultimately applied in the European markets to every kind of pottery, without distinction of origin, which presented any similarity to the glazed porcelain embellished with painted designs which came from "Faenza," whether majolica or not.

Faience is, therefore, a word manufactured from the name of the town "Faenza," just as majolica was derived from "Majorca," in Italy. In the same manner the glazed pottery of Delft, so celebrated all over Europe in the 17th and 18th centuries, gave the name of delft to similar ware made in England. The Faenza potteries produced one of the most beautiful of the many varieties of majolica, chiefly in plates with wide flat rims and deep centers, the borders decorated with delicate and minute arabesques, painted in several tints of deep ultramarine blue of remarkable richness and decorative effect.

A very fine specimen of majolica painting from the Faenza workshops is now in the British Museum. This specimen of majolica painting is treated with all the delicate minuteness of an illuminated MS. It is a scene of the death of the Virgin, surrounded by Apostles, copied from an engraving by a great German master—Martin Schongauer. The execution is very delicate and miniature-like, and is almost entirely done in different tints of blue, with a little yellow to suggest flesh color, and high lights introduced in pure white enamel, the main enamel ground, being white, slightly tinged

**REFINERS
ASSAYERS
SMELTERS**

REFINERS OF GOLD AND SILVER, ASSAYERS AND SWEET SMELTERS — DEALERS IN FINE GOLD, SILVER AND PLATINUM, ALL KINDS OF GOLD AND SILVER ANODES

This is a fine early specimen of majolica which was exported with es. Foreigners made no distinction between the Faenza productions, but in all Faenza, and in course of time. The name faïence remains, and changes have taken place in the course of it to pottery.

"faïence" is by common consent to be something between fine and majolica—any kind of artistic ware, painted, incised, or applied ornaments. In addition to vases, nicked and fancy pieces, we have now plates and slabs for architectural decoration described as "in faïence." Perhaps the answer to the question (and a deal of it he has been often asked it), "faïence?" would be—"A pottery between majolica and porcelain, artistically decorated and colored."

The process of evolution has given to all this character the name of majolica. We admit this is a very wide—definition, but the indiscriminate and injudicious use of the term—monstrance—seems to justify it. *Pottery Gazette.*

The Manipulation of Ivory.

There are comparatively few American factories where ivory is worked. They probably count them on the one hand. A staple, no doubt, but it is not one that runs to bulk. They require little room. The trade is small, the strings being pulled by a few factories suffice. It is not wise now to consider ivory as an expensive product; but rather to give it the same outlines of impressions while witnessing its manipulation and preparation for the market.

There are numerous tusks, some of them of some of them smaller, lying in the by-way corner. All look as clean as a proverbial hound's tooth. They are of a short distance, the remainder of it would be money in the trader's pocket if some dentist could fill that cavity satisfactorily. If the chance to be a humane man he would witness some slight twinge of conscience as noble as the elephant's victim of commerce. Similar to these are sometimes expressed in the tiger, the leopard and the bear, in their hides for my lady's polishes. But business is not senti-

mentary in any general way, everyone knows that ivory is hard. Tusks are tough. The fact is vividly appreciated when one sees a sharp saw cut its way through slowly. The advance is imperceptible. The tusk approaches the saw lengthwise and is sliced into slabs. It is necessary to spray water constantly at the cut to prevent undue heat from friction. Occasionally a circular spot, not unlike a knot in a board, will appear on one of the ivory strips. The attendant next to the spot marks a disease in the tusk. This bad spot has to be avoided, or it will constitute a blemish in the finished work. One cannot help wondering how these diseased spots trouble the

elephant. With toothache what it is, what must "tusk-ache" be!

Manifestly, it is only from the interior of the tusk that perfectly straight strips of ivory can be obtained. The outer, curved portions, however, serve admirably for the rounded backs of brushes and other objects admitting of such conformation. The flat pieces are sketched off in pencil into appropriate shapes for hand mirrors and other flat objects. Where the surface is to be carved into initials or design, a further sketch is made to guide the craftsman. One can draw on ivory as perfectly as on paper.

Between the various cuttings more or less ivory is naturally left. At first glance one might assume that this residue of smaller pieces falling between the patterns would be waste. Such is not the case. According to their size and shape, they are available for various purposes. Thin strips are very well adapted for the backs of tooth-brushes; smaller pieces may serve to make ideal chessmen, while larger ones may be carved into cabinet ornaments, and so on.

Still, even an ivory workshop has its scrap heap. There are pieces too small or of too irregular shape to be suited to the manufacturer's purpose. These are dumped together and sold for what they will bring. Buttons, studs and other little knickknacks are made from them. The manufacturer sighs as he looks at the scrap heap and recalls what he paid for that ivory and figures up the moiety it will bring; but perhaps he should congratulate himself on being able to sell it at all. There is practically no absolute waste, except what is worn away by the edge of the saw. Economy, order and cleanliness prevail. The work seems pleasant. One might imagine himself in a studio rather than a modern factory.

Reference has already been made to the hardness of ivory. For example, you might chance to drop an ivory hand-mirror on a hardwood floor. You would probably smash the glass without cracking the ivory. It is only the gentlest of enemies that ivory has to fear. A radical change of temperature may do the mischief. The sudden opening of a window on a winter's day, or hanging your mirror over a register is often sufficient to cause breakage. Everyone is familiar with those ivory-handled knives and forks which were more in use formerly than they are to-day. Did you ever see a set in use any length of time that did not have some of the handles cracked? This told of their being plunged into hot water. Change of temperature, you see. Tepid water or water about the degree of the atmosphere would have avoided the result. Yet the handles might have cracked without going into water at all. Putting them into a cold pantry or bringing them therefrom into a warm room might be equally disastrous. These facts have doubtless served to lessen the demand for ivory-handled knives and forks. And the servant girls are living more peaceful lives, because theoretically they were always to blame.
THE COMMENTATOR.

Edward Kouch has purchased the business of Mathias M. Simmer, Henderson, Minn.

RICH NOVELTIES IN
LIMOGES CHINA

JEWELERS desiring to add an attractive line of up-to-date china to their

stock will be interested in the display now on exhibition at the salesrooms of Porcelaines G D A, 29 Barclay St., New York, where the concern is making an exhibition of articles in gold decorations in a number of pleasing and delicate designs, which include very rich plates, etc., in Venetian shapes. The same concern also exhibits a line of special plates with encrusted gold borders, etc., of equally dainty and attractive character, which are absolutely different from any that have been displayed before. Many of these designs are not unlike patterns to be found in the museums of Europe. Scattered spray decorations and chromo borders are used extensively, and, being soft in tone and delicate in design, are truly effective and a great addition to the display. The Venetian plain shapes which were on exhibition last year are also repeated in the line in a number of desirable patterns. Plates with encrusted gold borders and shoulder decorative effects are shown, together with others more elaborately decorated. The line as a whole affords ample opportunity for careful selection.

*

FINE CUT GLASS
FOR SUMMER

WITH the approach of warm weather the enterprising jeweler

is looking about for seasonable additions to his stock which will add to his sales. Nothing offers itself to this end more admirably than an attractive line of cut glass flower vases and similar articles, fine examples of which may be seen at the salesrooms of C. Dorflinger & Sons, 36 Murray St., New York. Here are to be found a great number of dainty vases, flower baskets, punch bowls, etc., in many styles, shapes and cuttings. Among the vases displayed is a large one suitable for long-stemmed roses or other flowers. This vase has a rounded bottom cut in highly artistic pattern. The top of the vase is notched and scalloped. Another vase is shorter and has a larger base, with a new, attractive cutting. Among the seasonable offerings are salad dishes in many attractive patterns.
THE RAMBLER.

A meeting of the Jewelers' Club of Wilmington, Del., was held Wednesday evening, May 26, at 715 Market St. There was a full attendance. Among the business transacted was a resolution to close Memorial Day. All the members agreed to this and asked the co-operation of other merchants as well to make the holiday generally observed.

WORKSHOP NOTES AND QUERIES

are also solicited from our readers to the questions published on this page.] Attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2281. **Soldering Aluminum**—How can I soft-solder aluminum to steel or other metals? J. H.

ANSWER:—Two solders are suggested. Green's: Zinc, 50.03 per cent.; tin, 49.97; phosphorus, 0.23. Another is: Aluminum, eight parts; zinc, two parts.

QUESTION No. 2282.—**Dissolving Copper Gold**—Please inform me by what means copper may be dissolved from 18-karat gold tubing for any hollow work where it is necessary to use copper wire. M. K.

ANSWER:—Copper can be dissolved out with nitric or sulphuric acid, over a water bath. By using any of the acids separately, the copper would only be removed as gold will only dissolve in aqua regia. Some fine particles of gold will be left behind, where the gold was completely covered by copper, which can be removed by filtering. There being very little 18-karat, it is doubtful if the etched surface would be of sufficient strength to stand up of any use.

QUESTION No. 2283.—**Replating Gilded Work**—Please advise how we can replating work, the base metal of which is brass. B. & F.

ANSWER:—It is very difficult to gild clock frames directly on the metal, a copper deposit is required for a base metal deposit. A copper solution is very easy, is a good addition to a solution and useful for many purposes. Select a copper solution and proceed as follows: Select a glazed stone jar, large enough for immersing the largest pieces to be plated, and to each gallon of soft water add one ounce of potassium, one-half pound; one ounce of copper, six ounces; carbonate of soda, three ounces. Dissolve the above in a granite dish, in part of the solution warming until dissolved, and then pour into the stone jar. It is best to filter the solution has cooled. Connect the current to the jar in the regular manner, using for an anode a soft sheet of copper, bent so it will be the shape of the work inside of the stone jar. If the current be of sufficient strength a solution can be used cold, but works better warm. The article to be plated is cleaned by immersing in boiling potash, then in water and scoured clean with fine pumice. As the expense of a copper solution is very small, it is advisable to use a good plate, which will require little afterward. After plating the work should be rinsed off in cold water, and dipped for a minute or two in a solu-

tion composed of one part sulphuric acid to 50 parts water, to kill the cyanide, which may be in the pores of the metal. The coppered pieces should now be polished or burnished or prepared as they should appear when gilded, then clean and proceed with gilding in the regular gold-plating solution by merely depositing on a flash of gold sufficient to give them the gold color. The copper solution must be replenished with the same ingredients it is composed of.

QUESTION No. 2284.—**Etching Names on Knives**—I want to etch names on nickel and steel knife blades. How can I do this? E. N.

ANSWER:—For etching on steel and nickel the preparations are the same, excepting different acids are used. The name or design is depressed in a rubber stamp, just the reverse from a regular rubber stamp, so that the letters or design will be free from ink, while the surrounding portion is well inked, which will permit the acid to act on the letters. The ink is a composition of resin, one-fourth pound; lard, one tablespoonful, and lampblack, one tablespoonful. Stir all together; when melted, add enough turpentine to make it the consistency of printers' ink. When cold, stamp on the name and brush on a little more beyond the ink, so the acid will not reach the blades. For steel use equal parts of nitric and hydrochloric acid, diluted with 10 parts water. For the German silver use nitric acid diluted with a little water. Lay the blades flat and put the acid on with a dauber. Rinse off when eaten deep enough.

QUESTION No. 2285.—**Freshening Up Colored Jewels**—We often have colored jewels which look faded from soldering or shop wear. How could we freshen up the stones? F. C.

ANSWER:—Colored jewels may be freshened up with sulphuric acid placed in an earthen ware vessel and gently heated. Suspend the articles in the hot acid on a gold wire for a few minutes, but do not prolong the immersion; then rinse, first in hot then cold water, and dry in warm, clean sawdust. Many stones can be cleaned with hot water to which is added some ammonia. Wash in this, then dry in warm sawdust.

QUESTION No. 2286.—**Filling for Sunken Letters**—What kind of substance can be used for filling in engraved letters? I want something which will not crack off. F. S.

ANSWER:—Black asphaltum mixed with a little beeswax or pitch is one of the best fillings for black letters.

QUESTION No. 2287.—**Flaws in Casting**—We are using several moulds for casting soft metal ornaments for plated ware, and are hampered by getting many flaws and shrinkage spots. How could we prevent this? G. M.

ANSWER:—There are several reasons why castings may be full of blowholes and shrinkage cavities. One is the metal may not be alloyed properly so it will set solid without shrinkage enough to cause cavities; another is the metal may have been melted over too often, or exposed to too much heat, which causes it to run sluggish. Still another is if the gates are not large enough in the mould to take up the shrinkage. The gates should run partly around the mould, with short gates cut through to allow the metal to run in at several points, which will give cleaner castings, as the dross will remain in the gate. This large head of gate will take up the shrinkage, permitting the casting to set full and solid, and the work will then be satisfactory.

QUESTION No. 2288.—**Blueing Steel**—How can I blue small steel articles? Want some inexpensive method. B. S.

ANSWER:—Small steel articles may be blueed by using a piece of steam pipe threaded on both ends and fitted with tight caps. Place the polished and cleaned articles in this pipe with some slaked lime, perfectly dry, then screw on the caps, place in a fire and heat to a dull red and let cool gradually. This will give a lasting blue to steel, but no tempered or spring steel can be treated, as the heat would draw the temper.

QUESTION No. 2289.—**Crucible for Melting Precious Metals**—What kind of crucible is best to use for melting silver and gold? C. F.

ANSWER:—For melting precious metals a sand crucible is the cheapest to use if only one melting is desired. They usually crack after using once, and are not safe to use a second time. Graphite crucibles may be used over many times, or until they crack, when they must be discarded. If graphite crucibles are used they should be used for one kind of metal, or be thoroughly cleaned before using for other metals. To prevent the crucibles from cracking they should be kept near a furnace to keep out the dampness, which is really the cause of cracking. A method employed by some is to use sand crucibles, placing them inside a graphite crucible and putting them both in the fire. This prevents loss of metal if the sand crucible breaks, and saves the life of the graphite.

Fifty prominent manufacturing and commercial centers in the United States will be visited by 50 representative Japanese bankers, importers, educators, legislators and trade experts and their wives and secretaries during September, October and November, making the ocean-to-ocean tour in special trains as guests of the chambers of commerce of Seattle, Portland, Tacoma and Spokane. The party will be accompanied by 15 representatives of the four commercial organizations and 15 Government experts, leaving Spokane the middle of September, after visiting Seattle, Portland and Tacoma.

T. B. HAGSTOZ & SON, Main Office, 707 Sansom St., Philadelphia, Pa. Smelters, Assayers, Refiners

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal — plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag — *the blades are fine*. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray — contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

Write us for full information. Get our suggestions on popular assortment. Talk to your jobber about it.

JACKSON, Miss., May 8, 1909.
THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio:

Gentlemen—In the five years that I have sent out the Catalogs you made for me, I have enjoyed a phenomenal increase in my business. They have brought business to me that I could not have reached in any other way, although I have used almost every method of advertising during the past fifty-nine years and have one of the most modern and complete jewelry establishments in the south.

I do not believe there is a Catalog made by any other firm, which has the strength of drawing competitive business, that compares with your Catalog. To convince you of my faith in your book, I am now giving you an order for a large Catalog for the holiday season. Each year that I have sent out the Catalogs I have enjoyed direct, as well as indirect, results from them.

Wishing you continued success, I remain, Yours very truly,
CARL J. v. SEUTTER.

Precious Stones THEIR DEFINITION ANALYZATION AND ORIGIN

THE CHRYSOPRASE

Another product of the mines of the HIMALAYA MINING COMPANY, a gem of great beauty, that comes in all shades of green. It is a stone which is much sought after by admirers of the beautiful in gems. The true Chrysoprase is much in demand, and those from the Himalaya mines can be had in the exquisite apple-green color.

The principal localities where Chrysoprase is found are at the Himalaya Mining Company mines at Tulare, Cal. These mines produce the best that is offered to the public. Chrysoprase has also been found in Silesia near Frankenstein.

Discriminating jewelers recognize in this stone a gem which, for its beauty, can hardly be surpassed by its expensive rival, the Emerald, and for this reason artistic pieces of jewelry can be made with Chrysoprase at a very moderate cost. Aside from its great beauty, it is considered a very lucky stone, and those wearing it, so the legend goes, are protected from all harm. If you have not read this legend on Chrysoprase, it will be worth your while to do so. The Himalaya Mining Company will be pleased to mail you a copy, with their compliments, upon request.

Chrysoprase occurs in veins of serpentine with other siliceous minerals, such as quartz, chalcedony and opal. It is to-day one of the most popular of semi-precious stones, and is fully so selected, as nothing of its color in genuine stone can equal it at the same price.

COMPOSITION:

Silica	97.5
Oxide of Nickel, etc.	2.5
Specific Gravity	2.6
Hardness	6.75 to 7
Form	Amorphous

Chrysoprase has recently come into such demand that there has been placed upon the market an immense quantity of stained agate, which is being sold as genuine Chrysoprase. A suggestion as to this I consider most opportune — when in doubt as to the genuine article, consult an expert mineralogist.

Chrysoprase can also be had in many combinations of white and green, resembling the Chinese jade, but is far more lustrous and beautiful. It takes a very high polish, and its hardness is sufficient to protect it from most any usage.

The
Wadsworth
25-Year
"PILOT"
Watch Case

A Winner

BACK A WINNER and keep ahead of the game. Put your money on a case that has been a leader from the start. Don't let the stakes slip through your fingers from poor judgment. Inferior cases from doubtful sources are "dark horses" and unlucky. Here's a "straight tip." Put your money on

WADSWORTH 25-YEAR "PILOT"

and pocket your gains. This case has staying power for the whole course, and comes up fresh at the winning-post. It excels also in looks; it has the lines that appeal to judges—the slender models so popular in horses and cases. It wins applause. It's backed by a guarantee. Easy money for the dealer.

We beg to call your attention
to our extensive

Card Jewelry Line

consisting of medium priced

10K. Solid Gold Brooches, Scarf Pins,
Baby Pins, Handy Pins, Ear
Screws, Pendants, etc.

These goods are sold through the jobbing trade at very attractive figures. An examination and comparison will at once prove them to be ready sellers and profit makers in the stock of any jobber.

New patterns have been brought to a point of especial distinction, and all bear our mark of quality and reliability

It is our earnest desire to establish the same reputation for Finish, Originality, Quality and Reliability for this CARD JEWELRY LINE as is borne by our ring lines.

Samples will be cheerfully sent to jobbers and we heartily commend this line for a profitable business in 1909.

**DESIGNERS
ARE MORE
THAN
ARTISTS**

¶ The influence of Parisian modes is felt throughout the length and breadth of civilization. The Parisian designer is something more than an artist—he recognizes the subtle effect of distinction—novelty, elegance, and makes the most of those indescribable details, the sum total of which counts for so much.

¶ Our creations bear witness to the efforts we make to emulate such high examples. If we cannot define in so many words those differences which distinguish Jewels of our production from others, the differences at least are easily distinguished, and the beauty of our models for our display most emphatically demonstrates the point.

¶ For instance, take our Black Opal Jewelry—you will find these mounted in the choicest of designs at our coming **SIXTH ANNUAL EXHIBITION**, to be held in our offices from August 30th to September 4th, inclusive.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezer over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped *firmer* and *better* than by any other kind of stone tweezer.

Second. It is purposely made a "Bayonet" in shape because a *very* stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, *easier, quicker*, and with much less *exertion* than when using any other style of tweezer.

It has an *extra* part directly above the crossing points to permit the holder to examine the stone without fear of *releasing* it accidentally, which frequently occurs when using the ordinary style crossing tweezer.

Price, Each, \$1.25

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting Roller Remover. Always plainly in sight. The roller is held in the grooved jaws of the pliers. The adjustable head which holds the screw is quickly positioned over the staff and the most obstinate roller will yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

GRINDING OUTFIT No. 105

LEATHER DISK. SMALL DISK METAL.

CARBORUNDUM & EMERY PAPER DISKS.

This outfit consists of:

1. Two interchangeable steel disc wheels, 3 3/8" and 1 1/2" in diameter.
2. One interchangeable flexible leather disc wheel, 2 1/2" in diameter.
3. One adjustable hollow spindle for holding the above disc wheels.
4. Eight different grade emery paper discs, 2 1/2" in diameter.
5. Four carborundum paper discs of different grades, 2 1/2" in diameter.
6. Eight different grade emery paper discs, 4" in diameter.
7. Four carborundum paper discs of different grades, 4" in diameter.
8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete.....
 Separate small emery discs.....
 " large ".....
 " small carborundum discs.....
 " large ".....

This new grinding device should find favor with the trade. It is thoroughly practical and complete for all purposes, such as grinding glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the water wheel of the optician, dentist, lock or gunsmith, platers and kindred trades. It is found much more economical than solid emery and carborundum. An assortment of solid wheels of twelve different grits would be an outlay of ten times the cost of this outfit, not taking into consideration the trouble of turning up the wheels when worn or glazed. Full description and directions accompany each outfit.

For Sale by all Jobbers in the United States and Canada.

THE KREMENTZ COLLAR BUTTON

GOES ROUND THE WORLD

ITS FAME—

Wherever there are collars there are Krementz Collar Buttons. They are known the world over—the only ones that have an international reputation. With such recognition and demand, all you have to do is carry them. They sell themselves.

QUALITY MAINTAINED—

The Krementz Collar Button never disappoints. Unequaled in construction and finish, its quality always has and always will be maintained.

ASSAY—

The Krementz Collar Button does not take advantage of the elastic leeway allowed by law. There is really no reason why a solderless collar button should assay a whit less than stamped. You can depend upon it that

Krementz 14-Karat Collar Buttons will assay 14-Kt. or $\frac{584}{1000}$ Fine.

Krementz 10-Karat “ “ “ “ 10-Kt. or $\frac{416}{1000}$ Fine.

You will note that articles assaying 9 to 9½ Karat or 13 to 13½, and sold as 10-Karat or 14-Karat respectively, save the makers a profit.

ROLLED PLATE LINE—

Krementz Rolled Plated Collar Buttons and Studs are made with regular Krementz 14-Kt. stock; which is sweated, not soldered on composition base. Exhaustive tests show Krementz Plate is much heavier than is used on any other rolled-plate jewelry. Their great popularity in hot countries (where perspiration destroys ordinary goods), is largely owing to the thickness and quality of Krementz Gold Plate, similar to that used on highest quality filled cases.

Interesting Treasures of the Royal House of Saxony.

By Charles A. Brassler.

... famous Green Vault at Dresden has been mentioned before in these pages, and some of its marvelous treasures described and illustrated, but the most interesting objects is so plentiful that many pieces remained which are worthy of attention, that the subjects well worth another consideration. The collections preserved in this

The earliest origin of the collection may probably be traced back to George the Bearded (who died in 1539). Under the Prince Elector Moritz, also, some valuable silver table utensils were added to it, but it was Prince Elector Augustus, who had already established an art chamber in the royal palace (1560) for the numerous remarkable articles of silver and gold col-

lected by him, who developed, from the original conception an actual treasure house, which at first consisted probably of but a single apartment (the great salon or buffet chamber). His successors, the Princes Electors Christian I. and Christian II., contributed something to its increase, but nothing like to the extent of the contributions of Johann George I., who had a

CRYSTAL CUP.

captured Prague, and who also is said to have acquired a large number of the pieces of ivory work. His successor, Johann George II., who was a great lover of the

A, DEN WATER BOWL (RUSSIAN). B, GOLDEN DRINKING HORN (DANISH). C, SMALL GOLD WINE CAN (ITALIAN).

repository of the art of bygone times consists for the most part of articles specially interesting to the jeweler and precious metal worker, and present the advantages that they are not comparable like the Cluny, Louvre and many other collections, mainly of ecclesiastical objects, but contain a large, if not predominant share of secular specimens, which impart a welcome variety to the subject. Special pains have been taken, however, not to include among the pieces selected for discussion to-day anything that has not been illustrated or described in this journal before.

... treasure chamber of the royal house of Saxony, at Dresden, is so world famous that it would be superfluous to say much in commendation of this collection. In the year 1610 it has borne the official name of the "Green Vault," undoubtedly on account of the green color of the rooms in which it was formerly located. The present room, the buffet chamber, has retained this color until the present day. The others, on the other hand, are painted and decorated just as the actual contents of the Green Vault, King Augustus of Poland, had them done.

IVORY HORSE AND SLEIGH, RICHLY JEWELLED.

... captured Prague, and who also is said to have acquired a large number of the pieces of ivory work. His successor, Johann George II., who was a great lover of the

III.

One of the reasons why the other nations of the world look on with admiring eyes AT THE PROGRESS THIS COUNTRY MAKES, is, our ability to continually invent and contrive labor saving devices.

The manufacturer of to-day must discard methods of yesterday, and INSTALL NEW, MODERN MACHINERY in order to produce goods to meet his wideawake competitors.

Our methods of ring making now are quite different from what they were years ago, for we are continually on the alert to INTRODUCE AND ADOPT NEW IDEAS so as to reduce the cost in the making of rings.

We thus give to retail jewelers in good standing, an opportunity to buy rings for man, woman or child, which, for construction, THERE ARE NONE BETTER TO BE HAD at the PRICES.

Do you want well made moderate priced 14K. and 10K. Gold Rings?

Trade-Mark

Reg. U. S. Pat. Office

... had many costly works of art, ...
 ... by the Inspector of the ...
 ... chamber at that period, Lieut.-Col. ...
 ... Engel (1661-1681), while the warlike ...
 ... King George III. added many costly ...
 ... spoils, the spoils of his battlefields.
 ... left to King August II., however,
 ... the Green Vault its present form,
 ... from the art chambers of the ...
 ... articles as seemed adapted for it

Unfortunately, some of the objects have suffered through frequent packing up and transportation on different occasions (for instance, to grace court festivities at Warsaw), and in war times (*i. e.*, during the seven years' war). In the Napoleonic wars, in the turbulent times of 1830, and during the strife between Austria and Prussia in 1850, the most important objects were transferred to the Königstein (in 1849, on the other hand, during the Dresden uprising, everything was left there), and for many years the efforts of the custodians have been directed, as much as possible, to the repair of the damage thus caused.

When we consider separately the articles contained in the Green Vault, we find that they belong to the domain of art generally, and it is therefore a great mistake to suppose, as is often done, that there are to be found here nothing but valuables and precious stones. Just as little, however, is it a collection of curiosities or works of art of all times and peoples, for the valuable articles and artistic objects gathered together represent, chronologically considered, only the limited period of about 200 years, beginning with the second half of the renaissance period and closing with the change to the so-called "Zopf style" ("pig-tail" or baroque style). At the same time, however, it presents to the art lover a great variety of materials, ideas and forms, represents admirably the minor art of the 17th century, and includes about everything in the shape of substantial objects of luxury that our forefathers most admired. It is of general interest to every cultured person, but pre-eminently to the jeweler and precious metal worker, and combines, with antique splendor and intrinsic value, features that can nowhere else be encountered, and especially an arrangement suited to the objects and an equipment in accordance therewith, that is probably unique, of its kind.

To arrange the treasures stored in the Green Vault according to strictly scientific and historical principles was found impracticable, partly on account of locality, partly out of respect for the creator, King August II., in whose tasteful and elegant arrangement his successors desired that no change should be made; for this reason only the materials of which the objects are composed, according to their relation to the collection, were considered, and within the separate subdivisions such requirements were the sole guide, but always in such a manner that the agreeable effect of the whole was the prevailing impression. Generally considered, the names of the eight rooms—bronze, ivory, mantel, silver, valuables, wood and jewelry rooms—afford a fair indication as to their contents, only the little name "corner cabinet" does not convey the idea that it contains the little masterpieces of the goldsmith's art.

We have selected for illustration a few notable specimens from among the many interesting articles composing this unique collection.

The beautiful silver baptismal font, in part gilded, illustrated on the front cover, was made for the royal house of Saxony by the famous goldsmith, Daniel Kellerthaler, in Nuremberg, between 1611 and 1615, and was probably first used on the

occasion of the baptism, Oct. 27, 1615, of the seventh child of the Prince Elector Johann George I. and his wife, Magdalena Sybylla. He was named Christian, and in later years became ruler of Merseburg and founder of the Merseburg line.

In form, the bowl represents the ecclesiastical portal rose, the gilded reliefs portraying different passages in the Old Testament, including the flood, Pharaoh's overthrow, etc. The large and small medallions, 10 in number, represent scenes from the

FORMERLY OWNED BY MARTIN LUTHER.

... transferring them to it, particularly the ...
 ... gold and enamel work of his ...
 ... Johann Melchior Dinglinger (born ...
 ... buch, near Ulm, 1665; died at Dres- ...
 ... 1711). Dinglinger's portrait in oil, ...
 ... from nature by his contemporary, ...
 ... Dresden portrait painter, Adam Man- ...
 ... y, still hangs over the entrance door to ...
 ... room. This collection in the jewel ...
 ... en to this day, excites the admira- ...
 ... all visitors. Taken altogether, the ...
 ... was completed by August II., al- ...
 ... some additions to the priceless mu- ...
 ... ve been made even in modern times.

HUNTING CUP BY IRMINGER.

... life of Christ, for instance, the baptism, the ...
 ... presentation in the temple, etc., as well as ...
 ... Old Testament events, such as the expul- ...
 ... sion of Adam and Eve from the Garden of ...
 ... Eden, etc. As ornaments, there are figures ...
 ... standing out clear of the bowl and riveted ...
 ... on to it, representing angels with wreaths, ...
 ... suspended in air.

A very odd creation is the sleighing party (page 43), with Moors as driver and footman, ornamented with colored enamel work and precious stones. This group, dating from the beginning of the 18th century, is probably a representation of a masque procession at the Saxon court. Some figures of armed and musician Moors, in the cor-

...calet of the royal Green Vault, also
...long) this piece.
...Very interesting is the solid gold vessel
...A in the illustration on page 43),
...the Russian eagle and artistic Niello
...mes, having a water sapphire set in
...hale. This was a gift from Peter
...Grt to August II. The inscription,
...ced Church-Slavonic, says that this
...water vessel, known as a "Kopf-
...lates from the period of the Czar
...and was made in Polozk in 1696.
...specimen marked B is a solid gold

marked C is a small gold pitcher for the
...wine at Holy Communion, with the mono-
...gram V (vinum) ornamented with precious
...stones, a piece of work in the best style
...of the Italian renaissance period. The
...handle is of other workmanship. Really
...there belongs with this a pendant with A
...(aqua), intended for blessed Jordan bap-
...tismal water, but we have no illustration of
...this.

There are also to be noticed, as included in
...the treasure, some exquisite goblets, cups and
...beakers. On pages 43 and 45 are illustrations

graph of the so-called hunting cup, a solid
...gold and enameled vessel, with the Saxon
...and electoral arms and ornaments, with
...hunting scenes, hunting animals and imple-
...ments of the chase. The female busts depic-
...ted, and the riders on the lid, are prob-
...ably portraits. The maker of this mag-
...nificent piece was the Berlin goldsmith,
...Irminger (1697).

Very peculiar in construction are two
...silver "Jungfrauen" cups, of which we pre-
...sent an illustration. They represent each
...lady in the court costume of the 16th cen-
...tury holding up a small nautilus shell
...mounted in silver, etc.

(To be continued.)

Death of Edward D. Vosbury.

BINGHAMTON, N. Y., June 9.—Edward D.
...Vosbury, for nearly half a century identi-
...fied with business interests here, died yes-
...terday afternoon after an illness of about
...three weeks' duration. He had been in the
...jewelry trade here since 1875.

Mr. Vosbury's ancestors were among the
...pioneers of Broome County, and the de-
...ceased was born in Ithaca, May 1, 1844.
...His parents moved to Iowa when Mr.
...Vosbury was a youngster, but returned here
...in 1852. Mr. Vosbury was a Government
...inspector during the Civil War, and late in
...the 60s he began a long business career
...here. He was first associated with Preston
...& Sears and afterwards he was a buyer for
...Hirschmann Bros.

Mr. Vosbury then went on the "road"
...selling jewelry, returning here in 1875, when
...he opened a jewelry store. A majority of
...Binghamton's jewelers served their appren-
...ticeships in Mr. Vosbury's store.

Deceased was married in 1878 to Cath-
...arine Poindexter, of Osage, Ia., and she sur-
...vives with four sons, W. DeWitt Vosbury,
...of Philadelphia, Edward D. and Bronson
...P. Vosbury, of this city, and Clinton
...T. Vosbury, of the United States battleship
...Connecticut.

President Archibald, of the A. N. R. J. Offers Suggestions to Members on Practical Trade Topics.

PHILADELPHIA, Pa., June 9.—J. P. Archibald, President of the American National Retail Jewelers' Association, has just sent the following under the title of "Hints and Suggestions":

There are a few things which have come to my mind which I wish to emphasize. Every store there are a large number of articles for repairs, including watches, which are paid for for five years and sometimes never. The question is what to do with these articles in order to evade the law. Some retail jewelers sell and run the risk, others keep the goods for years. The retail jeweler is at a great loss. There are \$3 to \$5 repairs on articles which are lifted. I have seen in stores \$200 worth of watches that had been repaired for several years and never been called for by the owner. This is an injustice to any retail jeweler. We all want money. A plan has been suggested by the trade journals. We think there should be a system by which each article left in a store for a year can be legally sold. I make the suggestion only that each retail jeweler will use his own experience on this matter, and let me hear his opinion how to solve the problem. Can retail jewelers write me fully along on this?

After observing in his travels a custom of retail jewelers that seems unnecessary. Every man who comes into a jewelry store to have a watch repaired wants the loan of a watch while his watch is being repaired. I find that many men do not call for their watches for three months. When the jeweler's watch is returned very often it is broken. This is growing very fast. Every retail jeweler should give this matter some thought. The writer wishes to hear from retail jewelers on this. We wish to establish a new "code" of

Every man who wishes to impress upon each member of the State association the importance of paying dues at the beginning of the year. The national dues are, in nearly all States, 1 cent. This means less than one cent a day for the services of seven officers of the American National Retail Jewelers' Association. This means the services of more than 200 State officers. There are 200 officers are working every day in each State. It all costs you the small sum of \$3 a year. Do you realize, brother jeweler, that this means time, energy, enthusiasm and wisdom. Do you know that more than 200 officers are constantly looking out for your interests? Do you know that the writer himself has written this more than 1,000 letters?

Members have to be asked several times a year for dues. This money should be paid in advance. You should pay your dues the very first day of the month. How can you expect the jeweler to work, travel, pay stenographic hire, and give out, and wait for months for these dues?

Every jeweler who has not paid his dues for a previous year, will send his money to the State secretary. Every retail jeweler who desires protection should forward his dues and ask to be made a member of his State and the national association. This is a business proposition. The first 12 months for organization are to come. If not organized should call a meeting at a central point and organize the retail jewelers of Colorado, New Jersey and Delaware and other States recently and affiliated with the national association.

"Round Table" or "Jewelers' Club" idea suggested by the writer some months ago has made progress. Many clubs have been formed. It has been brought about. In some cities the retail jewelers meet once a month; some once a month. The results have been marvelous. Competition begins at home. Get together with your "competitors" and half the work is over. Meet often and agree on all prices. Establish a "code" of ethics, and treat each other as gentlemen and all will have business, more profits, and a better nature.

Every organization has taken such hold on retail jewelers over the country, we would advocate

that each retail jeweler would eliminate the word "competitor" and use the word "business associate." There was the time when we had among ourselves "competitors," but we prefer to call them now "business associates." Adopt this as your "master word."

We are advocating a "fixed selling price" on all watch movements separately. We are advocating a "fixed selling price" on all gold filled watch cases separately.

We do not favor all watches sold cased. It seems that many jewelers are foolish in advocating such a measure. If all watches were sold cased it would require each jeweler to have 350 watches to have one watch of each kind. At the average cost of \$15.50 for 350 watches would mean \$5,500 invested to have only one watch of each kind. This would not be sufficient. Each jeweler would require three or four watches of each kind to have different styles of cases. This would mean about \$15,000 invested in watches. More than 50 per cent. of the retail jewelers could not carry this amount of stock in watches. We believe it might be advisable to have the special high grades sold cased.

We wish to warn the retail jewelers about advocating such a measure.

In our travels among the retail jewelers we hear the same complaint that we have "too much stock." I believe that each retail jeweler should be more careful in his buying. I believe that many of the stocks that I have seen should be reduced one-half. Some jewelers who have \$20,000 in stock are doing about \$20,000 business each year. On the other hand, some jewelers who have only a \$5,000 stock are doing about a \$10,000 business each year. Which man is making the most money?

This illustrates the difference in stocks and the number of times they are turned in a year. Upon this depends how much money we make.

Brother jeweler, my advice is to reduce your stock, turn it often and pay your bills spot cash.

At this time it behooves me to urge every retail jeweler to read all the trade press with care. If you will read each issue of all the trade press you will be convinced that they are working for the retail jeweler. I do not think the trade press could do more than they are doing for the betterment of the retail trade. It behooves each jeweler to give the press the news, all conventions and meetings of the executive committees should be reported to the trade press. Any item of news that is suitable and contains news should be sent to the press. Items that are boosting somebody or bitterly assailing some firm should not be written, neither should they be printed. The writer has received many letters asking that they be sent into the trade press with my communications. Some of these articles were anything but fit for publication.

Every retail jeweler should read with care every line on the tariff with relation to foreign watches and jewelry. Be thoughtful and use common sense views on this matter. Ask yourself what you really want. Do you favor high tariff on Swiss watches? Do you wish to protect the American watch and the workman? Inform yourself and see what your answer is next month.

I find very few jewelers who are informed on the question of a parcels post. It behooves each one to look into this question with care. The organized merchants of every branch of trade are protesting against a parcels post measure. There must be a good reason for all this agitation against a parcels post. It should be a matter of great moment to each one of us. Our association should speak with no uncertain tone on this matter. The important matter is to speak intelligently.

It will not be long until the national convention will be held at Omaha. It is expected that this will be the largest gathering ever held in our line on trade. This meeting will be representative. It behooves every jeweler to get ready for this coming convention. It will pay any retail jeweler to attend this convention. On your Summer vacation go to Omaha. Take your good wife with you. She has worked with you and for you. She will be interested in a good convention as well as you. Take her with you and have her meet all your jeweler friends. It is a pleasure to meet from year to year, the excellent men who go to these conventions. Do not forget your good wife.

Entertainment of a high class will be given to all and more especially to the ladies.

J. P. ARCHIBALD,
President American Nat. Retail Jewelers' Ass'n.

Syndicate Announces Increase of Five Per Cent. in Finer Grade of Rough Diamonds.

LONDON, June 10.—The Syndicate controlling the product of the De Beers Consolidated Diamond Mines, Ltd., has announced an increase of about 5 per cent. in the price of Wesselton rough diamonds. The rough market in all other lines remains very firm.

Inquiry in the diamond trade of New York, last week, confirmed the above cable message sent to this country, most of the big importers and cutters having received cables from their brokers, agents or representatives in Europe telling of the news. In speaking on the subject, August Oppenheimer, of Oppenheimer & Veith, said, "Yes, it is true that the larger cutters have received word from their agents in London that the Syndicate has declared an advance on the higher grade of rough diamonds. The market for finer grades of rough diamonds remains very strong." Similar statements were made by representatives of L. & M. Kahn & Co., Stern Bros. & Co. and other large firms.

Speaking of the market generally, one importer said: "The American retail jewelers can fully appreciate the effect on the diamond situation of the resumption of business in this country. While he, individually, may not have seen his diamond business increase in the aggregate to any large extent, nevertheless, the little increases shown in all parts of the country have, in the aggregate, changed the condition of the market in Europe from one of depression to one of activity. Even many of the large dealers did not realize this and thought when the large importations were recorded in the first months of the year that the condition was but temporary and but a reaction from the depression, but the increase in imports in the last three months has told an entirely different story.

"The action of the Syndicate in fixing the price on certain grades of the rough should be taken as a final indication that business is coming back to its normal state. The diamond trade will be much better in this country in the Fall than it is to-day, but even now it is large enough to have the strongest kind of an effect in the European markets.

"The day of the pessimist is over as far as our trade is concerned, and the retail jeweler should take it upon himself to see that his local papers and the people at large are informed that not only has the market remained unchanged throughout the troublesome times we have gone through, but that diamond prices are again on the ascent and that the rule that the 'present prices for diamonds are always cheapest' again holds good as it did before the financial depression of last year."

E. F. Day, White Sulphur Springs, Mont., recently returned from a business trip to Three Forks and other Montana towns.

Senate Increases Tariff on Diamonds.

Mr. Bacon's Amendment Putting Twenty-five Per Cent. on Cut Diamonds and Fifteen Cent. on Rough, Precipitates a Long Debate Which Ends in a Compromise Placing the Duty at Fifteen Per Cent. on Cut and Five Per Cent. on Rough Stones.

WASHINGTON, D. C., June 12.—A strong resolution was made, last night, by Senator Bacon to have the duty on diamonds raised from 10 per cent. ad valorem, which resulted from his amendment raising the duty to 15 per cent. on cut diamonds and putting uncut diamonds on the free list at five per cent.

Mr. Bacon opposed the idea that the duty would lead to less revenue for the Government, and stated that the two exceptions which we have had in a decreased revenue from this source, that under the bill, and in 1908, were due to business conditions in general, which were similar in two periods. He stated that he did not conceive that the suggestion of Senators that there would be no loss could be correct. He stated that in other countries, very careful watch is made by which spies are set upon those who are presumed to be engaged or about to be engaged in the crime of smuggling, and the penalty is very great. He stated now that the inducement would be to the amount of 15 per cent. over the amount which is imposed in the present law, in other words, in raising the duty on cut diamonds from 10 per cent. to 15 per cent. there is an inducement to save 15 per cent. of the amount as an inducement to smuggling.

On the other hand, the penalty is the utter destruction of the article smuggled, and there are many accounts in the newspapers of attempts at smuggling precious stones which have been foiled; and it is a well-known fact that there are agents in the foreign countries where diamonds are mined and sold who are constantly on the watch for those who are engaged in such a trade; officials are notified on this side of the water and are watching for the smugglers when they arrive.

He stated that he thought some plan should be worked out which would be so effective as to utterly prevent smuggling. He stated that there are in this country many diamond importers who are recognized as being honest, and he did not consider that legitimate importers would start smuggling simply to save 15 per cent., and he thought it entirely beside the question to say that the raising of the duty on cut diamonds to 25 per cent. would not only increase the revenue of the Government, but would also result in the loss of the revenue to the Government. He touched upon the recognized fact that articles of luxury should be taxed, and stated that this was one of the things which were nothing but the most peremptory and controlling consideration should put upon articles as diamonds on the free list.

On the subject of uncut diamonds, he stated in his position that there is absolutely no inducement why they should be imported into this country free of duty. He stated that at some conferences with diamond exporters upon this subject, and had gained from them some little information as to the diamond trade and its practices. One fact which he stated is that the increase in the price of diamonds is in no sense a deterrent from

their importation; that within the last six years, while the value of diamonds has increased nearly 50 per cent., the importations have not decreased; in fact, on the other hand, they have materially increased. He took the ground that this increase as proposed, of 15 per cent., would not deter the importations nor, with the exception of a few dishonest men, would it increase the effort at smuggling.

He stated that, in his opinion, it did not look right that a tariff bill in which most of the necessities of life are taxed between 100 and 150 per cent, and this upon articles necessary for comfort and health, that diamonds should be placed at the low rate of 10 per cent.

Again speaking on the subject of uncut diamonds, he stated that it did not seem to be a good proposition that they should be admitted free of duty, and that there was no good reason which could be offered in support of such a measure. A certain amount of diamonds are demanded for the trade of the United States, a certain number which are bought by those who desire to use them, and if no uncut diamonds were imported at all he thinks the number of cut diamonds purchased by the American public would still be the same plus the number which are now imported in the uncut state, because, to that extent, the uncut diamonds now take the place of cut diamonds, which would still be demanded for the purposes of the trade.

He made the further statement that there are no regular establishments in this country for the cutting of diamonds, such as there are in Amsterdam, where it is a regular business; that the cutting of diamonds in this country is only pursued in connection with the jewelry business, and that there are only a very few houses in the United States, most of them in New York, with possibly a few in Boston and one or two other large cities, where the business is carried as a side line. He repeated the statement that there is no establishment in the United States for the cutting of diamonds; that there are no people engaged in that as their principal business, and that it is only carried on in the larger jewelry establishments, and then only as a side line.

He asked upon what theory the practice could be defended. He said that he had been told that one-half the diamonds imported into the United States are uncut; and in that way the Government loses the revenue upon one-half of its importations in this line by allowing the uncut stones to come in free.

Mr. Aldrich asked what became of the uncut diamonds that are imported. Mr. Bacon replied that they are cut by the diamond cutter in this country, but not until the stone has been imported free of duty.

Assuming that \$20,000,000 worth of diamonds are imported in a year, of which \$10,000,000 are imported in a cut and \$10,000,000 in an uncut condition, the Govern-

ment only gets its revenue out of the \$10,000,000 worth of cut stones imported. The trade, he thinks, would still demand the \$20,000,000 worth of stones, and if there were no stones admitted free of duty, then the Government would realize duty upon the further \$10,000,000 so imported in a cut condition. Under the present conditions, the jeweler not only gets his 20 per cent. additional value from the cutting of the stones, but he has the further allowance of the 10 per cent. from the Government; not that he gets it directly from the Government, but that while the Government is allowed to lose that amount he is in a position where he can and does charge 10 per cent. more than he would charge if the 10 per cent. were not placed upon the cut diamonds.

He stated that there was no doubt but what the diamond dealers of this country want the duty left where it is. Not only does the Government want it left where it is for the reason that the fear is expressed that a higher duty would mean a loss of revenue, but he stated that the diamond dealers have been coming around the Capital to interview the members of the Senate, and some of them have been talking with him to try to induce him to see that they ought to be allowed to continue to import at this low rate of duty.

He took the position that two things should be done: A higher rate of duty should be imposed, and, in the event that this is not done, then there should be the same rate of duty on uncut as on cut diamonds, the warrant for this being found, as he claimed, in the fact that the cutter of the diamond gets his full reward in the cutting of the diamond.

Senator Lodge replied and stated that the Senator's amendment was either too much or not enough. He stated that, personally, he would have no objection to see the duty placed at 100 per cent. if such a rate could be collected, and at the time of the passage of the Wilson bill he stated that he was strongly in favor of a duty of 25 per cent.; but he stated that it was merely a question of being able to collect the revenue, and that while it is possible to collect a revenue with the duty at 10 per cent., if it should be raised higher, say, for instance, to 20 or 25 per cent., then it would mean that there would be almost a total loss of revenue to the Government.

Reviewing briefly the history of the importations of diamonds into this country, he stated that in 1891 the imports were valued at \$12,280,000 and the duty collected at \$1,238,000; in 1892 it was \$12,261,000, and the duty collected was \$1,226,000; in 1896, under the 25-cent rate, the importations were valued at only \$3,351,000 of cut diamonds, and a duty collected of only \$750,000, and in 1897 there was a further decrease to \$1,378,000 and the revenue collected only amounted to \$285,000.

He stated that it could not be borne out that this was due to the hard times prevailing, because the retail trade for those years were larger than in 1891 and 1892, and more diamonds were sold in New York than when the \$12,000,000 worth were imported and a revenue of \$1,200,000 was collected. On the same line of argument he stated that in 1906 we imported \$29,000,000 worth

The Oriental Turquoise Matrix

This gem, unparalleled in beauty by anything in the blue variety of opaque stones, and positively occupying the first position in the matrix family, is in every respect superior to anything of its kind yet known in the stone market. Being of an exquisite color that does not fade, varying in shade from the most delicate sky blue to the deepest azure, superbly marked by veins of golden brown or pure black matrix, and lastly, by reason of its superior hardness admitting of the highest polish ever attained by any turquoise, it is one of the most beautiful of gems.

Its possibilities, as a part entering into the composition of jewelry, are absolutely unlimited.

stones and collected \$2,900,000 revenue for the Government; in 1907 the imports were increased to \$30,000,000 and revenue to \$3,000,000. He stated that merely a question of how high the rate be placed and still be collectable. He stated in the light of the past it had been proven that if the rate is lifted sufficiently high so as to make it look as though it could be reason to expect an appreciation for the Government, then the business begins and the lawful importations of the stones decrease.

Stones are easily smuggled, says Senator Lodge, and the chances of detection in such cases are very slight, the profit is large, that the temptation is practically irresistible, and the honest importer will import; he will, in preference, import diamonds in the home market after they have been smuggled in. That is undoubtedly what happened when the duty was reduced; and while it must be admitted there was a time of depression in the diamond trade coincident, yet the retail stores showed increased sales, as compared with previous years.

Senator Root, in response to an inquiry from Senator Bacon, that it is very easy to smuggle diamonds. And, speaking further on the subject he called the attention of the Senate to the case of the "Regent" or "Pitt" diamond which was smuggled out of the country in an uncut condition by a slave who was cut in his leg, and was brought to England in the heel of the shoe of the Duke of Pitts; and it must be remembered that one of the largest diamonds known in the world is a diamond, he stated, can be easily concealed, and has considerable value than any other article of equal weight. This is also true of other precious stones and pearls.

Senator Root repeating that he was in favor of a uniform rate of duty if it could be proven that diamonds would be collectable, he went on to discuss the importance of the uncut diamonds and stated that, with reference to the assessment of duty on the importations of diamonds, it was simply a question of whether or not it is desired to put all the diamond cutters of the United States out of business.

Senator Root's position to the statements which were made above as having been made by Senator Bacon, to the effect that there are diamonds in the United States wholly entitled to the diamond-cutting industry, he stated that there are six or seven firms in New York City alone where nothing else is done. It requires skill and highly paid labor of an equal rate of duty should be placed upon the cut and upon the uncut diamonds. The effect would be that the cut diamonds could be brought in and the uncut diamonds could not, therefore the diamond industry which exists in other cities of the United States New York would entirely cease.

Senator Bacon interposed at this point his statement that it is a business which is worth less than 20 per cent. on the diamond labor involved, to which Senator Root replied that he did not think the result would be so very great when within the past year \$30,000,000 worth of cut diamonds were imported into this country else the industry of cutting would be more highly developed in this country. He

stated in connection with this subject that while in Amsterdam, last year, he visited the establishment where the celebrated Cullinan diamond was being cut into three separate stones for King Edward, each of which was larger than any other stone in existence. The cutters told him that it cost \$75,000 to cut the three stones, and that at that sum they lost money, and that they only did it for the advertisement which they got out of it.

While he was willing to admit that the importation of uncut stones free of duty deprives the Government of some revenue, and even to the extent of \$12,000,000 or more, so it is claimed by Senator Bacon, yet, Senator Lodge called attention to the fact that the diamond industry and diamond cutting gives employment to a great many skilled workmen, but he took the position that if there is a duty placed on the uncut stones equal to that on the cut stones there would be no uncut stones imported, and the business here would be ended, for the reason that it would be obviously cheaper to have them cut abroad.

At this point Senator Root took a hand in the discussion, and stated that he thought Senator Bacon was at variance with practically the universal judgment of those who have had experience in attempting to collect the duty on the importations into this country of precious stones. He stated that from his own experience in the prosecution of people who had been caught smuggling that it is only the placing of a low rate of duty which makes it possible for the honest importer to compete with the smuggler.

He called the attention of the Senate to the ease with which diamonds can be smuggled, even to the extent of four or five thousand dollars' worth in a cake of soap, in a lady's hair and in numberless other ways, and he further stated that the agents abroad cannot catch up with nearly all the smuggling, as it is only some foolish persons who will talk about the matter.

Mr. Root further emphasized the ease with which stones can be imported, and went on to state that with reference to the semi-precious stones he thought a much higher rate of duty should be imposed without incurring the same danger of smuggling, and yet it would be a protection to the American lapidary who has now no protection in the cutting of these semi-precious stones, amethysts, garnets, aquamarines and other very beautiful stones whose value is materially less than that of the diamond, ruby and sapphire, and on which the 10 per cent. amounts to very little in proportion to the cost for cutting. He stated that there are very many lapidaries in this country, some of them connected with large jewelry houses, but many of them in business for themselves.

At the conclusion of a triangular discussion between Senators Bacon, Clapp and Root, Senator Aldrich stated that he did not quite understand Senator Bacon's amendments and his statements, as there seemed to be some discrepancy between the two. First he proposed a duty of 25 per cent. on the cut diamonds, and of 10 per cent. on diamonds uncut, making a differential of 15 per cent., when he has stated that a 10 per cent. difference is too high.

Senator Aldrich went on to state that his

attention was first called to the duty on diamonds in 1883, by reason of the tariff act of that year. Going briefly into the history of diamond legislation in this country, he stated that from 1861 to 1872 there was a duty on diamonds of 25 per cent. In 1874 it was reduced to 10 per cent., and when the question was raised in 1883 it was the universal judgment of the Government experts that it would be unwise to again increase it to 25 per cent., principal among whom was Col. Tichenor. All of those Government experts took the stand that it was impossible to collect anything more than the lowest possible revenue duty. And this was borne out by the fact that during the years of 1861 to 1872 nearly all the honest importers were driven out of the business. It was impossible for men of this class to import, as they could buy them at prices not more than 5 per cent. in excess of what they could be purchased in Paris or London. The leading jewelers of New York also took the same view of the matter, and they appealed to Congress for protection, and for the imposition of a duty which would allow them to go into the markets of the world and buy their own diamonds. This practice continued, and in 1890 the rate of 10 per cent. was still maintained.

In 1894, under circumstances somewhat similar to those at present existing, the duty was increased to 25 per cent., and the result was the same as that experienced in 1861 and on. The revenue was decreased and men like Tiffany dropped out of the importing business, and it went into the hands of those who were cheating the revenue and smuggling diamonds into the United States.

He said that it is the universal experience of every customs official who has had anything to do with the business, that 10 per cent. is about as high as it is possible to fix the rate and prevent smuggling to any very great extent.

Senator Clapp attacked the statements which had been made, to the effect that the sales of diamonds were greater during the years when the importations were lower, and stated that this was merely supposition based upon somebody's say so, and that it would be impossible to find out this information accurately, to which Senator Aldrich replied that the statements which he had made were based upon the opinion of people who ought to know, and that, so far as he knew, there is no other means of information in considering and deciding upon the terms of a tariff bill. The men who have had experience and judgment are those upon whom one should rely in the absence of any conflicting testimony.

Senator Bacon replied that he had no personal interest whatever in the matter, but that he certainly was of the opinion that uncut diamonds should not be permitted to come in free of duty.

At this point Senator Beveridge interjected a suggestion to split the difference between the amendment proposed by Senator Bacon and the present law; and he then went on to suggest that pearls and precious stones should pay a duty of 15 per cent. instead of 10 per cent., and that on imitation stones, doublets, semi-precious

etc., the duty should be raised from 10 per cent., and that diamonds in the gold should pay a duty of 10 per cent. In support of this recommendation he took the position that the rate of 25 per cent. shown by the Senator from Massachusetts, defeats its purpose, which is exactly that of revenue; that it is wholly contrary to the experience of the Government that when the tariff is increased to a certain point the revenue decreases, but he stated that he did not think a proposed increase of five per cent. would be any discouragement to legitimate importers, and, on the other hand, would certainly add materially to the much needed revenue for the Govern-

ment. Mr. Aldrich then stated that for the purpose of expediting matters he would propose that a rate of five per cent. be levied on uncut diamonds, and that they be taken from the present clause 548 on the tariff and be transferred to paragraph 1 that the rate on cut diamonds be reduced to 15 per cent. This meeting required the approval of Senator Bacon and other members who had taken part in the discussion. The matter was adjusted in this way and amendments agreed to.

On the news from Washington a meeting of diamond importers and cutters was held Friday afternoon at the offices of Messrs. Bros & Co., 68 Nassau St., New York, to take action on the amendment to the diamond tariff passed by the Senate. The meeting was continued yesterday morning, though no definite programme was laid upon it was the unanimous opinion that the proposed change should not be permitted to go through without a fight, as it means the demoralization of the diamond exporting trade and the ruin of the diamond cutting industry in this country.

Root Proposes New Gem Schedule Increasing Duty on Cheap Precious Stones.

WASHINGTON, D. C., June 10.—Senator Root has served notice that he will offer an amendment to the Senate amended paragraph 45. This amendment which he proposes which will be printed and taken effect at a later date is as follows:

45. Pearls and parts thereof, drilled or cut, but not set or strung, except in bunches for transportation only, 10 per cent. ad valorem; rubies and bort, coral, rubies, cameos, and other precious stones and semi-precious stones, of more than 50 cents per carat, cut but not set, and suitable for use in the manufacture of jewelry, 10 per cent. ad valorem; precious and semi-precious stones valued at 50 cents or less per carat, and all imitation precious stones and semi-precious stones and imitation pearls, not set or used in the manufacture of jewelry, whether artificial, or so-called "synthetic or re-stated," rubies or other precious stones, 20 per cent. ad valorem.

Speaking briefly to the amendment Senator Root explained that its object is to differentiate between the cut precious stones and the semi-precious stones. The 10 per cent. duty on cut diamonds, rubies and other precious stones is sufficient protection he claimed, for the laboratories in New York, because of the high value of the cut precious stones, but the semi-precious stones are of very low value, and the 10 per cent. given upon cut semi-precious stones is no protection at all.

Oregon Retail Jewelers Hold Annual Convention at Portland and Elect Officers.

PORTLAND, Ore., June 9.—The convention of the Oregon Retail Jewelers' Association, which was held in this city last week, at the rooms of the Commercial Club, was very successful in every way both in matter of attendance as well as amount of business transacted. Before adjourning, Thursday, the members of the association gave serious discussions as to the question of legislation and the introduction of a bill to stop fraudulent marking of jewelry and silverware, as well as for a provision for a trade-mark to be placed upon all solid gold jewelry, and also a bill requiring the watchmaker to secure a license to be issued to him after he had fulfilled the requirements of the law and passed an examination. Another bill discussed was one covering fraudulent advertising.

At the afternoon session on the previous day the officers were elected as follows: President, M. F. French, Albany; secretary, C. H. Williams, Condon; treasurer, E. J. Jaeger, Portland; vice-president, W. M. Howard, Marshfield; second vice-president, I. E. Staples, Portland; third vice-president, H. M. Leffert, Portland; executive committee, L. Brunz, Portland; L. W. Watts, Eugene and John Kramer, Independence.

Among the resolutions passed by the members of the organization was one which they discountenanced, the selling of horn toad hat pins, the members pledging themselves to direct their efforts to prevent the traffic in such ornaments elsewhere. The subject was brought before the association by E. J. Jaeger, of the Oregon Humane Society.

C. H. Williams, of Condon, was elected delegate to the National Jewelers' Association, and it was decided to hold the next convention in Portland.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., June 9.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Berlin: 4 cases clocks, \$195; 4 cases scopes and views, \$250.
- Bombay: 90 cases clocks, \$934.
- Bremen: 2 cases watches, \$2,785; 3 cases plated ware, \$440; 2 cases clocks, \$100.
- Brisbane: 20 cases plated ware, \$1,894; 150 cases clocks, \$2,502; 2 cases watches, \$1,293.
- Cape Town: 3 cases scopes and views, \$408; 4 cases plated ware, \$219; 3 cases watches, \$237.
- Christiania: 4 cases clocks, \$166.
- Colon: 1 case scopes and views, \$100; 1 package optical goods, \$100.
- Copenhagen: 9 cases clocks, \$298.
- Guayaquil: 1 case jewelry, \$446.
- Hamburg: 1 case watches, \$2,515; 7 cases scopes and views, \$238.
- Havana: 1 case scopes and views, \$127; 8 cases jewelry, \$969; 8 packages optical goods, \$346; 1 case jewelry, \$157.
- Havre: 1 case jewelry, \$250; 2 packages optical goods, \$350.
- Kingston: 3 cases clocks, \$100.
- Liverpool: 11 cases clocks, \$535; 1 case jewelry, \$500; 56 cases clocks, \$1,446; 1 case jewelry, \$400; 2 cases watches, \$1,200; 2 cases thermometers, \$300; 13 cases clocks, \$904; 3 cases silverware, \$150.
- London: 20 cases clocks, \$683; 1 case scopes and views, \$300; 7 cases watches, \$1,334; 2 cases silversmith's sundries, \$481; 2 cases thermometers,

- \$125; 20 packages optical goods, \$4,819; 27 cases clocks, \$964; 2 cases watches, \$287; 14 cases watches, \$1,705; 1 case optical goods, \$620.
- Matanzas: 1 case plated ware, \$126.
- Oporto: 8 cases clocks, \$153.
- Puerto Barrios: 1 case jewelry, \$308.
- Rangoon: 6 cases clocks, \$130.
- St. Johns: 87 cases clocks, \$325.
- St. Petersburg: 4 cases clocks, \$195.
- Sheffield: 1 barrel jewelers' sweepings, \$3,000.
- Vera Cruz: 6 cases plated ware, \$295; 1 case thermometers, \$115.
- Vienna: 1 case jewelry, \$200.
- Zanzibar: 22 cases clocks, \$182.

Old Employee of San Francisco Firm Arrested After Having Robbed Employer for Several Years.

SAN FRANCISCO, Cal., June 9.—While searching for some clue that might lead to the apprehension of the thieves who took silver plate from the Grant residence at Burlingame a short time ago while that structure was burning, detectives last week took Paul Girard, an old employe of Shreve & Co., into custody, and found that, while he knew nothing of the Grant robbery, he was guilty of robbing his employers and had been engaged in this practice for some time.

Girard was arrested by the detectives on the confession of James Connors, who was taken into custody at the works of the Selby Smelting Co., on Howard St. The detectives had called at the works to ascertain if any attempt had been made to dispose of any battered silverware such as might have come from the Grant home. The clerk in charge at the works denied having received anything of that description lately, but stated that an old man had been bringing in old silver regularly for some time past. Connors entered the establishment while the detectives were there, and after disposing of his old silver was arrested and given a thorough "sweating." He disclaimed any knowledge of the Grant robbery, but made a confession implicating Girard. The latter, he said, had been furnishing him with the old silver, and he had been selling it to the smelting works.

When Girard was placed under arrest he confessed his crime and stated that he had been robbing Shreve & Co. for years, although it was only recently that the amounts have been heavy. Of late he had been able to make away with material valued at about \$100 each month, principally small pieces. He was employed as a goldsmith by Shreve & Co., and had no opportunity to steal gold, as a close watch was kept on the amount given him to fashion, but close by him worked a silversmith. It was here that he secured his supplies.

Both Girard and Connors are old men over 60 years of age, and Girard has a family living in the Mission district. Francis Connors is an old-time lapidary, and lived on Chestnut St. When the place was visited by the detectives they found several crucibles used in reducing silverware to solid buttons. Girard had been in the employ of Shreve & Co. for the past 26 years, and was one of their most trusted workmen.

Samuel Marks, formerly in the wholesale jewelry business at Sioux City, Ia., has purchased a two-story brick building at Marshalltown, Ia., now occupied as the Family Theater, and will open a store there.

Kansas City Police Seek Jeweler Who Disappeared from That City Some Time Ago.

KANSAS CITY, Mo., June 7.—The police in Kansas City and other cities are on the lookout for Nathan Finberg, who, as told in the issue of THE JEWELERS' CIRCULAR, was formerly in the manufacturing business here, but disappeared some time ago. A warrant was sworn out last week from the office of the prosecuting attorney in Jackson County, charging Finberg with having signed a memorandum bill on which he obtained two pairs of diamond earrings from the Gem Loan & Jewelry Co., 121 State St., on which he failed to make an accounting. The police recently received a clue that

FINBERG MISSING FROM KANSAS CITY.

men to believe that Finberg was in Kansas and notified the police of that city in search for him. Finberg, who is a jeweler by trade, for a number of years worked for a local house, but started his own business for himself with a partner May 1st. He is described as five feet nine inches tall, weighs about 155 pounds, has blue eyes and scanty brown hair. He wears glasses, is fairly well educated and a fluent talker. R. Binkowitz, proprietor of the Gem Loan & Jewelry Co., announces that he will lead a party in search of Finberg's arrest and conviction.

Members Elected by the Jewelers Security Alliance.

At the regular monthly meeting of the executive committee was held on Friday, the following members being present: Chairmen—W. L. Hoch & Co., Storm Lake, Ia.; Jonas S. Wood, St. Louis, Mo.; Vice-Presidents—Wood and Karsch, St. Louis, Mo.; Secretary—Messrs. Abbott, Bowden and Co., St. Louis, Mo. The following new members were elected: Bastien, Williamstown, Mass.; B. Burdette, Imperial, Cal.; J. H. Greenberg, Sioux City, Ia.; F. Hoch & Co., Storm Lake, Ia.; Jonas S. Wood, St. Louis, Mo.; N. Solomon, Portland, Ore.; A. Stevens, Nickerson, Kans.; W. T. Sterling, Kans.; G. S. Davies, Newton, Mo.; H. L. Fisher & Fleishman, Philadelphia, Pa.; J. E. Lyle, Lyons, Kans.; J. E. Lyle, Lyons, Kans.; O. L. Sharick, Shelby, O.; W. F. Lyle, St. Louis, Mo.; George Weisgerber and Walter Jewell Co., Salina, Kans.; Mrs. M. A. Ward, Abilene, Kans.; R. McPherson, Kans.; Rairdon & Son, St. Louis, Mo.; E. F. Strain, Gregory, S. D.; J. H. Miller, Meriden, Conn.; Sedalia, Mo.; J. H. Miller, Meriden, Conn.; C. E. Tieman, California, Mo.; J. A. Zimmerman, Hanover, Pa.; J. A. Zimmerman, Hanover, Pa.; A. Buchroeder, Columbia, Mo.; W. L. Elbe, Bloomington, Ill.; S. W. Sweeney, Houston, Tex.; J. M. Coff-

man, Salisbury, Mo.; C. O. Goldman, Los Angeles, Cal.; F. B. Ross, Columbus, O.; S. M. Schoonmaker, Paterson, N. J.; G. B. Ellestad, Lanesboro, Minn.; John Hlands, Iowa City, Ia.; A. H. Osborn, Springfield, Mo.; W. T. Price, Harrisonville, Mo.; Herman Sick, Rich Hill, Mo.; S. B. Bentley, Rolla, Mo.; G. H. Burton, Norfolk, Neb.; Clark & Lindskog, Ely, Nev.; McMillen & Milsap, Lebanon, Mo.; J. M. Birtle, Rolla, Mo.; Sartor Jewelry Co., Lincoln, Neb.; Clark Warren, White Plains, N. Y.; W. E. Daniels, Rome, N. Y.; Bert Forse, Sac City, Ia.; Joe Schulte, Chicago.

Temporary Restraining Order Issued in Toledo Jeweler's Fight Over Use of a Firm Name.

TOLEDO, O., June 11.—Judge Herbert J. Chittenden, in the Common Pleas Court, has just granted to Isenberg Bros. a temporary order against Sylvan L. Basch, restraining the latter from using the firm name of Basch & Co. except on such signs as are now in the windows of the new store of Sylvan Basch on Summit St., which was recently opened under the firm name of Basch & Co. The case will be heard within the next two or three weeks, at which time either a permanent injunction will be granted or the order removed. The petition of the plaintiff was filed early this week, in which a permanent injunction was prayed for, and in which a large number of additional allegations were made.

The facts of the case, as gathered from both sides, are as follows: About three years ago L. Basch, Chicago, opened a jewelry store on Adams St., in this city.

Sylvan Basch was employed as manager and an instalment business began. Some months ago Isenberg Bros. purchased the business and Sylvan Basch was employed. The location of the store was removed to Superior St., and a tailoring business on a week plan was added to the business.

According to Sylvan Basch, he was given a very favorable contract when he entered the employ of Isenberg Bros., but a short time afterward he was asked to sign a shorter term contract or sever connection with the firm. He chose the latter course, and thereupon started another store on Summit St. This store was opened, June 5, and Isenberg Bros. now desire that he be restrained from doing business under the firm name of Basch & Co., under which name the former business, which the plaintiffs contend they purchased, was built up.

In his restraining order Judge Chittenden ruled that Sylvan Basch should not use the trade-mark of the old firm, which consisted largely of a glittering diamond around which was clustered the firm name, either in his stationery, advertising or blank contracts, which are used in the instalment business. The judge further stated that it was not the intention of the court to put the new firm out of business, but that it should not seek to represent itself as being in any way connected with the old firm on Adams St. The court also stated that in advertising, etc., during the temporary restraining order, the new company either use the name Sylvan L. Basch & Co. or S. L. Basch & Co., or some such name as would not allow its being mistaken for Basch & Co., or L. Basch & Co.

W. L. Elbe, formerly of Bloomington, Ill., has become assistant manager of the J. J. Sweeney Jewelry Co., Houston, Tex.

Death of Louis Kranz.

PROVIDENCE, R. I., June 10.—Louis Kranz, one of the oldest German residents and most expert jewelry designers and die cutters in this city, was buried to-day. He died at his home in Norwood, a suburb of this city, Monday, in the 74th year of his age.

Deceased was born in Hersfield, Germany, March 6, 1836, attended the public schools in Germany and came to this country before attaining his majority. He first settled in New York City, and attended the art school of the Cooper Institute, where he studied under Blassman, the sculptor. He engaged in hub cutting, die sinking and engraving, and developed marked ability in these arts. In New York he was foreman for several years of the gold jewelry house of Kuhn & Doerfinger, and then engaged in business for himself in jewelry designing and engraving.

Mr. Kranz removed to this city in 1875 and ever after resided in Rhode Island. Upon coming to Providence he secured a position with the Gorham Mfg. Co., but soon went into business for himself as a designer and engraver. His ability soon won him an extended patronage, and he was obliged to seek larger quarters from time to time. His last place of business was at Orange and Dorrance Sts. Ill-health compelled his retirement from active business a few years ago. He had been suffering from diabetes for several years, but it did not prevent him from being able to get about until a short time ago, when it had developed into a gangrenous ulceration of a part of his foot.

Deceased leaves, besides a widow, three sons—Howard L., Walter P., who have been associated with him in business, and Alfred G., who does not live in this city.

The general store of J. W. Juniel, Jr., Midway, La., half a mile south of Dodson, was the scene of a burglary about a week ago, when \$300 worth of jewelry and cutlery was stolen. Entrance was gained by breaking a window. A liberal reward has been offered for the apprehension of the thieves.

Wholesale Jewelers in Annual Convention.

Jobbers from All Over the Country Meet at New York and Act on Many Subjects of Importance to the Trade.

The members of the National Association of Wholesale Jewelers met in annual session at New York last week and spent three days in discussing matters of interest to the association in formulating plans for bettering trade conditions. Jobbers from all parts of the country who were in attendance unite in saying that the convention was a success in every way. It afforded an opportunity for a free interchange of ideas, and gave the members of the association a chance to become better acquainted with each other, thereby welding into stronger bands the ties of good fellowship so necessary to make such an organization lasting and successful.

A spirit of good will and a desire to act for the best interests of all concerned prevailed throughout the convention. When the meetings ended the members went away with a feeling that they had been benefited and strengthened in meeting men who were interested and anxious to act in unison for a common good. New officers were elected and considerable business of importance transacted.

The officers of the association were on hand on Tuesday, June 8, when meetings of various committees were held to map out a program for the sessions to follow. The first meeting of the association as a body was held Wednesday morning in the Silversmiths' building, 15 Maiden Lane, when the members registered and an outline of the sessions was presented by President Massa. Over 100 men, representing many of the largest wholesale houses in the country, were there, and others were added to the list as the convention proceeded.

A large part of the time was occupied in open discussion of existing evils in the trade, and ways and means for bettering these conditions were talked over at some length. The question of the distribution of American watches was discussed and a committee appointed to confer with the manufacturers. The constitution and by-

laws were amended to provide more adequately for the establishment of local organizations and their conduct in reference to the National body. The amendments provided, among other things, for the appointment of delegates to attend the American National Retail Jewelers' Association

A. G. SCHWAB, PRESIDENT-ELECT.

convention. A discussion as to credits touching upon time payments, etc., was held, but as many different views were presented no definite action was taken on this point. The movement for protected retail prices on watches, inaugurated by the Pennsylvania Retail Jewelers' Association, was endorsed, it being the sentiment of the meeting that there should be an established minimum selling price on these articles.

A system of interchange of information

was worked out whereby the trade was fully informed as to the conditions in various local centers. A communication from J. P. Archibald, president of the American National Retail Jewelers' Association was read and was received with a spirit which indicates co-operation in the future. The same feeling existed between the wholesalers and the representatives of the Providence Jewelers' Board of Trade who were present to confer with the committee of the association. This evening consisted of President Budlong, Vice President Fred Carr, R. H. Ingersoll, and others. Edwin Massa, of the Boston Jewelry Co., and George H. Edwards, of the Edwards & Sloane Jewelry Co., were appointed to convey good will and co-operation to the annual meeting of the American Retail Jewelers, which was held at Omaha, Neb., in August. Committees were also appointed.

The association recommended that thanks be sent to the Waltham Watch Co. for their efforts to keep the product out of cheap stores and mail order houses. It was also recommended that members join the credit clearing house.

A vote of thanks was tendered to the New York wholesalers for their courteous attention, and it was also voted that the 24-Karat Club of New York be invited to the use of its club room.

It was the sense of the entire convention that retailing of goods by jobbers be favored.

Fifty-one new members were added to the association.

Thursday afternoon occurred the election of officers and an executive committee. The following officers were elected for the coming year: President, A. G. Schwab, Cincinnati; first vice-president, B. C. Adams, Chicago; second vice-president, Louis S. New York; secretary, George H. I. Kansas City; treasurer, Louis Sickel, Philadelphia.

The executive committee elected consists of: Mr. Bosworth, St. Paul, Minn.; H. W. Burdick, New York; H. W. Burdick, New York; A. V. Huyler, New York

and an honor to have you here to-night. We have enjoyed your company during the week, and it has been a delight to meet you and know you better. You come from the north, south, east and west. There is no north, east, south or west with us. We are one body here together. Stand shoulder to shoulder and we will accomplish something. We have men with us to-night more able to speak to you than am I."

He then called on a number of the members, all of whom responded.

Among the first speakers was Mr. Massa,

B. C. ALLEN, FIRST VICE-PRESIDENT.

ex-president of the association, who, in speaking of the association, said: "We have a good start in the right direction. Stick to the test for one year and I will guarantee we will win out."

L. Burdick, another speaker, said that he regretted that President Schwob will have to wait a whole year before he sees such a fine body of men as were gathered there. He thanked the New York association for what it had done and proposed a toast to the National Association.

Leonard Krower paid a tribute to the ladies. He spoke in a pleasing vein and was heartily applauded. Messrs. Levinson, Bosworth, Sproehnle, Ragen, Karger, King, Fiesham and others spoke briefly.

Toastmaster Averbeck, in introducing the last speaker, spoke of Col. John L. Shepherd as the dean of the watch trade. Col. Shepherd told one of his inexhaustible stock of stories and continued in part as follows: "I am not a native New Yorker, but came from Virginia. I went to Chicago and then came to New York so long ago that it is now almost a tradition among the younger generation. New York is a Mecca for banquets. The sons of other States hold reunions here ostensibly to tell how great their particular States are, but in reality to congratulate themselves that they came to New York. In all great cities there are no men so egotistical as the native New Yorker who has never been beyond the shadow of the tall buildings.

"In seriousness, gentlemen, get together and know each other and you will find your competitors are human beings. Meet and know each other. Have confidence in one another and you will be a success. You are doing what ought to have been done years ago."

He then spoke of dissatisfaction, saying

that the dissatisfied men were the ones that made the marks in life. "The Chinese have been a satisfied people for 4,000 years. Dissatisfaction moves the world," he said. In conclusion, he read a short verse on "Dissatisfaction" and his remarks were received with hearty applause.

The souvenirs of the evening were miniature American flags in cigar-shaped holders. After the banquet the jewelers visited a number of places of amusement.

The next annual convention will be held in Cincinnati in June, 1910.

The following firms were represented at the convention:

New York—Eliassof Bros. & Co., Chas. Arnshcimier & Son, Cross & Beguelin, R., L. & M. Friedlander, Adolph Goldsmith & Son, Hyman & Kramer, Louis C. Moss, L. S. Meyer & Bro., A. Roseman, Rosenzweig Bros., W. C. Solomon & Co., Chas. L. Trout & Co., B. & L. Veit, Theo. Yankauer & Co., Edw. R. Cohn, Colyer & Co., Max Gunzberger, Harris & Shuster, Laubheim Bros., I. Michaels & Co., Wm. Nicholson, I. Ollendorf & Co., Morris Weil, W. J. Ward, Ehlers & Co., Harrison Bros., I. W.

LOUIS COHN, SECOND VICE-PRESIDENT.

**H Dilley, Cambridge, O., Re-
 to Have Filed a Voluntary
 Bankruptcy Petition.**

RG. Pa., June 10.—Word was re-
 Pittsburg yesterday announcing
 of Richard H. Dilley, Cambridge,
 has filed a petition in bankruptcy
 ninth district United States Court
 uthern district of Ohio. It is not
 re what Dilley's liabilities and

ugan is the referee in bankruptcy,
 s at Cambridge, and he has set
 is the time for creditors of the
 o prove their claims. Cambridge
 own and the largest mill there is
 ve been idle for a period of two
 d business is assigned as the rea-
 e failure.

ey, who is an old-established jew-
 several Pittsburg creditors, none
 is caught for very large amounts,
 could be learned. Mr. Dilley is
 ve dealt principally with Cleve-
 esalers and those of the east.
 ey originally commenced business
 k City, where he met with reverses,
 started in a small way at Duncans
 came to Cambridge in 1890, and
 en business there since that time.
 has not been large, but he has
 a good trade and has been well
 n the community.

rs, O., June 9.—Richard Dilley's
 n bankruptcy was not filed at
 e but at the United States Court
 y. The schedules with the peti-
 o that his liabilities amount to over
 d his assets are estimated at

l broke into the store of Mr.
 t. nox, Ind., a short time ago and
 o with a large amount of promis-
 jewelry. Blood hounds were placed
 trail but without success. It is
 hat the thieves, shortly after the
 id in the Kankakee Swamp until
 ned an opportune time at which

**John M. Roberts Reports Progress on
 Proposition of His Committee to
 Maintain Fixed Retail Prices
 on Watches.**

PITTSBURG, Pa., June 12.—John M. Rob-
 erts, chairman of the watch price cutting
 committee of the Pennsylvania Retail Jew-
 elers' Association, is beginning to receive
 letters from the watch case companies and
 the manufacturers of watch movements,
 bearing on the price list which the commit-
 tee of which he is chairman has formulated
 for adoption by those concerned. The
 North American Watch Case Co. wrote
 Mr. Roberts this week that it is satisfied
 with the schedule as submitted. Jos. Fahys
 & Co. write that they will be satisfied when
 there is a slight modification, which Mr.
 Roberts says he believes can be made satis-
 factorily. He expects to hear from other
 houses within a few days saying that they
 have not had time as yet to thoroughly di-
 gest the committee's work. Mr. Roberts
 says that his committee is anxious to treat
 with the manufacturers, but so far as
 known no meeting of any kind with any of
 the manufacturers has been asked for or
 arranged. Mr. Roberts expects to hear
 from a number of companies during the
 coming week.

Some of the local wholesalers and job-
 bers are not altogether satisfied with the
 schedule as formulated by the committee.
 Naturally, as might be expected, there is a
 good deal of friendly criticism regarding the
 stand taken and many in this city are won-
 dering how the plan is going to work out.
 But the committee is generally approved
 for its labors, and most agree that if the
 manufacturers will agree to the proposi-
 tion the price question can be fixed and
 maintained beyond all question.

**Court Refuses to Grant a Discharge in
 Bankruptcy to Philadelphia Jew-
 eler Accused by Creditors.**

The Jewelers Board of Trade, of New
 York, reports that Joseph Goodman, for-
 merly a member of the firm of Sperling &
 Goodman, Philadelphia, Pa., has been re-
 fused a discharge in bankruptcy. In Janu-
 ary, 1908, Goodman was adjudicated a
 bankrupt on an involuntary petition. His
 liabilities were given at about \$3,500, with
 assets less than \$1,000. These were so out
 of proportion to his assets as given to the
 Jewelers Board of Trade in a written state-
 ment in October, 1907, that it was deemed
 necessary to oppose his application for dis-
 charge until he had accounted for the
 difference. Accordingly, when Goodman
 filed his petition and specifications, objec-
 tions were filed against the same.

At the time that Goodman's statement
 was given to the Board of Trade, he
 claimed to have \$4,000 worth of stock, fix-
 tures to the value of \$1,000, tools \$300,
 cash \$100. In addition to this, it was de-
 veloped on examination that he had made,
 on or about the time of making the state-
 ment, other purchases amounting to over
 \$1,200, totalling the assets for which he
 should account at over \$5,300. He was
 credited with disbursements, stock and fix-
 tures turned over to the receiver, making
 a total of about \$4,200, thus leaving a bal-
 ance of over \$1,000 unaccounted for.

The referee, in refusing his discharge,

said that from the testimony he concluded
 "that the bankrupt, at some time prior to his
 bankruptcy, had concealed merchandise to
 the value of at least \$1,000, or its equiva-
 lent in cash, with intent to hinder, delay
 and defraud his creditors; that subsequent
 to his bankruptcy, and after the appoint-
 ment of his trustee, he concealed the same
 from his said trustee, and that in filing his
 schedules in bankruptcy, and failing to state
 therein that he had such merchandise or
 cash he was guilty of making a false oath
 in these bankruptcy proceedings, and that
 in testifying under oath before me at the
 first meeting of creditors that he had no
 goods secreted or money in his pocket he
 was again guilty of making a false oath in
 these bankruptcy proceedings, and for these
 reasons his discharge should be refused."

Death of Hiram H. Chase.

UNION CITY, Mich., June 9.—Hiram H.
 Chase, a pioneer business man of this city,
 who died, Thursday morning, in his 63d
 year, was long in the retail jewelry business
 here, and was at one time well known in
 the trade in the middle west. Deceased
 was a native of Ohio and came to Michigan
 in 1865, in which year he started in the
 jewelry business in Union City. He was a
 skilled workman in his trade, and soon
 gained an excellent reputation for his abil-
 ity as a watchmaker and jeweler. He con-
 tinued alone throughout his business career.

Mr. Chase served many years as member
 of the city council, and his expert mechan-
 ical knowledge proved of great value to
 this city, in the establishment of water-
 works and an electrical lighting plant, which
 were put up about 15 years ago. He was
 honored and respected among his hosts of
 friends in business and social life, who
 deeply mourn his death.

Deceased is survived by a widow and two
 sons.

**Navy Department Solicits Bids to Sup-
 ply Thermometers of Various
 Kinds.**

WASHINGTON, D. C., June 12.—The Bu-
 reau of Supplies and Accounts, Navy De-
 partment, is inviting proposals until June
 22 for the following supplies for the use
 of the Brooklyn Navy Yard:

For 120 salinometer thermometers, 160° to
 240°, to be carefully graduated by divisions
 of 5°, to be mounted on substantial sil-
 vered brass plates.

For 36 air thermometers.

For 24 maximum and minimum ther-
 mometers.

For 120 mercurial thermometers, 0° to
 130°.

For 72 mercurial thermometers, 0° to
 150°.

For 100 mercurial thermometers, 0° to
 240°.

For 12 mercurial thermometers, 0° to
 400°.

All the foregoing to be of the best quality
 and manufacture.

E. J. Spall has moved from the Willow-
 son block, Pittsfield, Mass., into newly fur-
 nished quarters in the Miller building,
 where he has twice as much floor space
 as he had in the old location. New fix-
 tures and display cases have been installed.

COLORED OPALS

We are cutting a number of colored Opals in oval and fancy shapes, suitable for scarf-pins, brooches, pendant sets, etc.

These stones vary from pink to red, light to deep yellow, all shades of green, soft grays and blues ranging from delicate tints to darkest cobalt.

These new varieties of Opal are inexpensive and most effective.

 Burton Jewelry Co., recently opened a store in Kokomo, Ind. The firm has a store in Indianapolis.
 Curry has leased quarters in Detroit, La., where he will shortly open a retail jewelry and watch repairing shop.
 Wilson, formerly a watchmaker and employ of J. B. Dickey, Newton, Mass., is opening a store in Hutchinson, Kan.
 Bailey, formerly with George H. Lowell, Mass., has begun business on his own account at 22 Appleton St., at Boston.
 and Co., importers of Japanese jewelry, etc., have opened at 1031 Boardwalk, Atlantic City, N. J., under the name of "Tokio."
 djaka Jewelry Co. is a new firm which has started in Atlantic, N. J., at Boardwalk. J. M. and A. J. Kahn are the proprietors.
 store at Atlantic City, N. J., at Boardwalk, is the Oriental Bazaar, owned by H. Y. Titsuka, of Japan. He carries jewelry, brass ware, pottery, etc.
 Tanner, formerly with the Harrisburg Co., Kansas City, Mo., will engage in the jewelry business on his own account in the Argyle Building, Kansas City.
 Gerson, who now conducts a store at Ocean Ave., Jersey City, N. J., has opened a branch store at 467 Jackson Ave. The store was formerly occupied by Leo Gerson, watchmaker, who gave up the business and moved to New York.
 Goldin-Levy Jewelry Co. has been incorporated in Atlanta, Ga., under the laws of that State, with a paid up capital of \$50,000. Officers of the company are: President, David Goldin; Vice President, Levy; Savannah, and Treasurer, Gerson.

The Goldsmith-Koch Co. has been recently incorporated in Newark, N. J., to do a silversmithing business, with a capital of \$25,000. The factory is located at 103 Oliver St. The incorporators are M. T. Goldsmith, J. Koch, C. K. Goldsmith and E. R. Koch, all of Newark.

Chas Brummer & Co. is the name of a new concern, which was recently incorporated under the laws of the State of New York, with a capital of \$10,000. The concern will deal in jewelry, precious stones, silver and cut glass. The incorporators are C. Brummer, J. Fischel and I. I. Cohn, all of New York.

Association Notes.

The New York Retail Jewelers' Association has appointed E. J. Scheer, Rochester; Charles Bickleman, Schenectady, and Thomas J. Rountledge, members of the membership committee.

At a special meeting of the Delaware Optical Society, held June 4 at Wilmington, Walter L. Roberts, jeweler, at 8 E. 7th St., was chosen as delegate to the convention of opticians which will be held at Atlanta, Ga. A dinner followed the business meeting at which various matters pertaining to the affairs of the organization were discussed, including the question of establishing a standard of examinations for admission to practice the profession. This question will be brought up in the convention at Atlanta.

Speculation is beginning to be rife as to who will be the next president of the American Retail Jewelers' Association. Though J. P. Archibald, the present incumbent, has frequently said that he would not run again for the position, the Pennsylvania Retail Jewelers' Association, at their meeting held in Harrisburg recently, unanimously recommended him for re-election. Whether Mr. Archibald will heed the call of his State association, which is echoed by his many friends, is a question yet to be answered, but if he does not, the general chances are that the fight for the presidency will lie between the present first vice-president, A. E. Paegel, and Jos. Mazer, president of the Oklahoma Jewelers' Association. It is stated that at least one of the aspirants for the position will retire if Mr. Archibald decides to run again.

Secretary C. S. Wiley, of the Pennsylvania Retail Jewelers' Association, announces that the organization now has a membership of 255, this being an increase of 35 members during the last month, three new memberships having been received Thursday. The next meeting of the association will be held in Philadelphia, but a movement is now on foot to bring both the State organization and the National Retail Jewelers' Association convention to Pittsburgh in 1911. Secretary Wiley says that strong efforts are now being made to capture the meeting at that time, and it is believed that the movement will be successful. A strong bid is to be made for it both by the Pennsylvania organization and by local business associations, who probably will be asked to use their influence to have Pittsburgh chosen. Pittsburgh will send several jewelers to the national association meeting, among them Steele F. Roberts, president of the Jewelers' 24 Karat Club

of Pittsburgh, and John M. Roberts, chairman of the committee on watch price cutting, both of whom will make addresses before the national body. If the national association comes to Pittsburgh, the Pennsylvania association will hold its session at Pittsburgh at the same time. The State organization will meet in Philadelphia next year.

Ill Health and Poor Business Cause Bankruptcy of Nelson A. Soggs, Niagara Falls, N. Y.

BUFFALO, N. Y., June 14.—Nelson A. Soggs, a well-known jeweler of Niagara Falls, N. Y., who for some time was ill in a hospital of this city as a result of a break-down he suffered, following the death of his brother Leslie at Binghamton, filed a voluntary petition in bankruptcy in the United States District Court here, last week. Mr. Soggs owes \$15,630, and his assets amount to \$8,097.13. The failure is a result of Mr. Soggs' ill health, combined with business reverses. Among the largest creditors are King & Eisele, whose claim amounts to \$3,299.85.

The secured creditors of the bankrupt are: The Canadian Bank of Commerce, Dawson, Y. T., \$1,599.24; Puffer Mfg. Co., Boston, \$1,270.55; National Cash Register Co., Dayton, O., \$100; John Hofman Co., Rochester, \$120; Moneyweight Scale Co., Chicago, Ill., \$15; Anna Soggs, Niagara Falls, N. Y., \$260; Silas Patterson, Niagara Falls, N. Y., \$90; Anna Shoemaker, Buffalo, \$500; Niagara Falls Trust Co., \$500; Provident Life & Trust Co., \$400.

Among the unsecured creditors for more than \$50 are: Theodore W. Foster & Bro. Co., \$391; Shepard Mfg. Co., \$126; W. P. Hitchcock, Syracuse, N. Y., \$275; William C. Penfield Co., Canton, O., \$79; H. C. Kinoka & Co., \$140; George H. Wheelock & Co., \$124; Bastian Bros. Co., \$60; R. L. Griffiths & Sons Co., \$125; Elderfield Harts-horn Hardware Co., \$57; Finberg Mfg. Co., \$56; John F. McDonald, \$1,100; New England Watch Co., \$52; Samuel Lawson, \$112; L. D. Anderson, \$84; E. E. Nicklis, \$64; Lazarus, Rosenfield & Lehmann, \$224; Cataract Journal, \$56; C. B. Thomas, \$51; Charles F. Wells & Co., \$106; Pittman & Allen, \$100; James E. Rock, \$58; Buffalo Glass Co., \$82; E. A. Saenger Co., \$64; Reeves & Howe Co., \$151; Newark Jewelry Co., \$57; Import Novelty & Mfg. Co., \$59; Harriet E. Worden, \$250; N. B. Barton, \$250; Ella H. Bestman, \$1,475.

Mr. Soggs' bankruptcy comes as a culmination of a series of misfortunes which he has suffered in the past year, and which included a loss of business due to a removal, the death of his brother, and a general breakdown in health, due in great part to the latter event. The immediate cause of his bankruptcy was due to pressure brought by his landlord, who demanded the full amount of rent due, or that he vacate the premises, this coming just at the beginning of the season when he had expected to make up his loss of the Spring.

Mr. Soggs commenced business in 1879, at Lima, N. Y., and moved to Binghamton in 1888. After meeting with financial reverses he went to Alaska gold fields in 1897 and returned about six years later and started in business for himself here.

Woman Charged With Larceny.

Information was received in New York from London that Eleanor Lott, of this city, had been arrested upon the request of a detective acting in the District Attorney's office. The complainant was a representative of the Ham Co., silversmiths, Fifth Ave. St. It is alleged that the woman took a bill of goods there, saying that Margaret B. Stearns, and asked that she be delivered at her home, which was in Europe suddenly.

When a representative of the store was called the next day, it was found that the woman had left for Europe suddenly. The store was accompanied by the aid of a caricature which one of the employees of the store drew of her at the time she purchased the goods. The clerk made a sketch in his pocket and forgot for the time being. When the police notified and were looking for identification of the woman the caricature was shown to her and she gave it to them. The police made such a good likeness that the police made a reprint made of it and took it to the office of the Cunard line, where it was identified by a ticket agent, who said it was an exact likeness of a woman who sailed for Liverpool on May 15, 1909, on the *Carmania*. The police cabled to the British authorities to stop the woman at Liverpool, explaining that she had given the name of "Bruce Blake." The woman's jewelry that she is alleged to have included a solid gold vanity box, a gold watch and chain, and other trinkets valued at something like \$100. A part of the goods have been recovered from pawn shops.

On May 18 Miss Beattie called at the store, it is said, and told one of the clerks that she was Mrs. Margaret B. Stearns and had changed her address. She said that she was a regular customer and that she now lived at 111 E. 104th St., between 640 Madison Ave. The store was charged to Mrs. Stearns' account. The store later discovered that Mrs. Stearns was in Europe and that she had ordered the goods. They then notified the police of the loss.

Death of S. Joseph.

DES MOINES, Ia., June 10.—S. Joseph, a well known and prominent jeweler of this city, died at his home, 400 Walnut St., at 10:30 p. m. yesterday. Death resulted after an illness of 10 weeks of a complication of his home, 1502 10th St., at 10:30 p. m. yesterday morning. Joseph was one of the most prominent business men of the city, having been in the jewelry business here for about 40 years. He was born in Germany 64 years ago and emigrated to Elgin, Ill., when a boy. He learned the watch and jewelry trade and removed to Des Moines, Iowa, establishing a shop at the corner of 10th and Walnut Sts., which location he has occupied continuously since that time. His business grew with the city from a small

watch repairer's bench to one of the largest jewelry firms in the State. He has never had a partner outside of his own family, his three sons having been taken into the business upon reaching their majority.

Mr. Joseph leaves, besides his wife, six children, Mrs. Charles Levitt, of Minneapolis; Mrs. M. Marks, of New York; Mrs. Sol. Sheuerman, Morris Joseph, Jacob Joseph and Burton Joseph, all of this city.

Francis D. Bancroft, Waukesha, Wis., Goes Into Voluntary Bankruptcy.

MILWAUKEE, Wis., June 12.—Francis D. Bancroft, a retail jeweler at Waukesha, has filed a petition in voluntary bankruptcy, and the schedules which accompanied show his liabilities to be \$5,291, while the value of his assets was placed at \$6,950. A heavy chattel mortgage which has been on his business for some time and which Mr. Bancroft was unable to lift is said to be the main cause of the failure.

The principal unsecured creditors are: The Reliance Mfg. Co., \$237; Kuesel Bros. Co., \$218; Furstnow Ring Co., \$100; Chas. B. Wittsteil & Co., \$200; Freedman Bros., \$141; E. C. Kropp, \$171.56; C. E. Nelson, \$60; Raphael Tuck & Sons Co., \$37.59.

Mr. Bancroft began business in Waukesha in 1899 and continued alone until January, 1906, when he formed a partnership with A. J. Smith, under the name of Bancroft & Smith. His partner died shortly afterward and he then became associated with R. L. Christoph, under the style of Bancroft & Christoph, which firm he succeeded in April, 1907, and continued alone ever since.

Death of Charles W. Gengenbach.

Charles William Gengenbach, a well known and long established jeweler in the old section of New York known as Greenwich Village, died at his home in Elmsford, N. Y., Sunday, of paralysis. He was located at 66 Greenwich Ave. for many years.

Deceased was a native of Germany, but came to this country in his youth and settled in the old Greenwich Village quarter. He soon became associated with its various activities, and for the last 15 years he was treasurer of the Greenwich Building & Loan Association.

He began business in 1884 for himself, having previously been in the employ of H. F. Spitka. He was a member of various organizations and was a regular attendant of St. Xavier's Catholic Church in W. 16th St. He was 46 years old.

Mr. Gengenbach is survived by a widow, one son and one daughter.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Geo. W. Barrett, an Old Employee of Tiffany & Co., Expires Suddenly While on a Trip to Philadelphia.

George W. Barrett, an employe of Tiffany & Co., while on his way to Philadelphia with a diamond necklace said to be valued at \$20,000 was stricken Sunday with heart disease and died in a taxicab. He was seized as he was sitting in a ferryboat of the Pennsylvania Railroad's 23d St. line and expired soon after being lifted into a taxicab, which was summoned to take him to a hospital.

Mr. Barrett was accompanied by his wife, and attempted the trip against her advice. He had been with Tiffany & Co. for 18 years past. The necklace was enclosed in a leather case, which fell to the floor as he was seized.

The taxicab had gone only half a block when Barrett, who had been leaning back against the seat, breathed his last. Instead of going to the hospital, the chauffeur was told to proceed to the W. 17th St. Police Station. There a hurried summons was sent to the New York Hospital, and Dr. McClure responded. Finding his services of no avail, the physician telephoned to the Coroner's office, and soon permission was given to remove the body to Mr. Barrett's late home.

In the meantime a message had been communicated to an assistant of Mr. Barrett, and he appeared and took possession of the diamond necklace. Later in the day McGrath made the trip to Philadelphia that had been so abruptly halted.

Mr. Barrett was 46 years old and was brought from Ossining to this city by his parents when he was two years old. He started his career with Tiffany's as a package wrapper, and by degrees worked himself up to one of the most responsible positions in the concern.

At the Tiffany establishment all information of any nature was refused. A representative of the firm refused to say in what capacity Mr. Barrett served the firm.

San Diego, Cal.

James Thomas has had on exhibition in his jewelry and watch store at 914 D St. a small pitcher, which attracted much attention. It was made in 1656 in Glamorgan-shire, South Wales, at a pottery which went out of existence in 1666. The pitcher has been in possession of the present owner's family for two and a half centuries, it going to the oldest child in each generation.

C. W. Ernsting and Frank A. Salmons have sold to Mrs. Ellen M. Hitchcock the 25-foot lot on which is located the present jewelry store and factory of the Ernsting Co. for \$53,000, which is at the rate of \$2,120 a front foot. The lot was purchased by Messrs. Ernsting and Salmons less than four years ago for \$26,000. This purchase gives Mrs. Hitchcock a frontage of 50 feet on 5th St., with a depth of 100 feet, and on this entire property the Ernsting Co. has taken a lease for 50 years and will erect a handsome business block within the next few months to accommodate the growing trade of the concern.

W. W. Larson, of Beach, N. Dak., has opened for business in new quarters.

Boston.

Brett has been in New York on a business trip. Wells was here on business, last week. Robbins has opened his Summer store at Nahant. Toughton has been in New York on business. Smith has taken the Royal Master Masonic degrees. Ashnick, foreman for A. S. Hirshman, has been in New York for several weeks. Atherton is enjoying many excursions in his recently purchased automobile. Kettle, manager of the Chicago Watch Co., was in Boston several days last week. Riley, formerly with G. H. Wood, has opened a place of business of 22 Appleton St., Lowell. Smith, a Melrose optician and jeweler, has a new motor boat which he will take on commission on Crystal Lake. Learned, of the F. F. Place Co., was in the big Knights of Malta Convention, Tuesday of last week. Kennard & Co. began Saturday morning of its plan to close at 1 p. m. of the week, and on other week 2 p. m. The enthusiastic yachtsmen of E. M. Wilder, who has recently purchased a smart new 18-footer of the top class. Waltham Watch Co. factory will be closed has been decided, on June 17. All Day, on which occasion Waltham will celebrate its 25th anniversary as usual. E. Homer and James S. Blake returned from Louisville, Ky., where they attended the meeting of the Imperial Order of Nobles of the Mystic Shrine. Homer furnished the official badge for the occasion. Bishop William H. O'Connell has been appointed by Pope Pius with a beautiful processional cross of sapphires and diamonds on the occasion of the 25th anniversary of his ordination. The archbishop is expected to return from Rome this week. E. Nichols, watchmaker, 192 South Medford, has filed a petition in court. He owes \$13,755, the principal of the Minnesota Thresher Mfg. Co., Water, Minn., now in the hands of a receiver for \$13,400 assessment on stock and personal assets. Congratulations have been extended to the jewelers in this city, last week by Harry Wheeler, for the Baird-Cook, Providence; George McL. Prescott, Warrington, Me.; H. A. Wippich, Weymouth; John E. Lunt, for Moulton & Co., Newburyport; M. F. Wood, and G. A. Schmidt, Lawrence. Congratulations have been extended to Richardson, a well-known jeweler and watchmaker, who has constructed an engine of the steamer pattern without a lathe and in his own workshop. Mr. Richardson has a forge and also a lathe at his workshop worked throughout the Winter, and his marked ability as a machinist.

He had to buy the wood and the rubber tires, but supplied the rest of the vehicle by his own ingenuity and industry.

The Smith, Patterson Co. has made several important changes in the building it occupies, corner of Summer and Arch Sts., in order that more working space may be provided. The second floor is now exclusively devoted to the wholesale department, while on the third floor are located the bookkeeping and wholesale shipping departments.

At the dinner given Monday evening of last week at Hotel Somerset to the retail trade interests by the Merchants' Association, at which six New England States were represented by 700 men, the following jewelers were present: John A. Potter, A. T. Maynard, A. E. Fisk, C. D. Mason, D. F. Ingersoll, W. O. Lima, George Moses, C. E. Freeman and C. W. Davidson.

In the Dorchester Police Court, last week, Ralph Nest, 15 years old, New York, was sentenced to a term in the Suffolk Home for Boys by Judge Churchill, in the Juvenile Court, having been found guilty of stealing \$1,100 worth of jewelry from George E. Gale. All the jewels were recovered with the exception of a \$200 diamond ring, for which the police are still diligently hunting.

Charles B. Barnes, for 26 years an employe of the store of C. A. W. Crosby & Son, Washington St., died Tuesday of last week, aged 39 years. He had been in failing health for a number of weeks, though the immediate cause of his death was pneumonia. He was a native of Plymouth, Mass., and came to work at the Crosby store as a boy of 13. He was always a faithful and efficient employe, and advanced to the position of buyer and salesman, which he held at his death. Funeral services were held Thursday afternoon at 2 at the residence of his sister, Mrs. J. L. Whiting, 147 Center St., Dorchester, who, with another sister, survives him. The burial was in the family lot at the Plymouth Cemetery.

A report that a substance resembling that which is found in the diamond mines of South Africa had been discovered by workmen in the old Frederick & Fields granite quarry, Quincy, has aroused general interest. At the present time it is impossible to say just what the material is. It is very improbable, however, that there are any diamonds in the deposit. There are a number of crystals, some stones with a little gold, some purple stones that are said to be dead feldspar and a number of other formations. The outer crust of the deposit was a sort of asbestos-like stuff, with a deep blue color. When first discovered after the granite rocks had been blasted and the deposit was brought to view, this blue covering was soft and pliable, but on being exposed to the air for some time it became hard. The geological department of Harvard sent men to get samples, but the report of these investigators is not yet available. Altogether there were about 15 tons of the stuff found in a layer 10 by 5 feet. Many think it the remains of some meteorite that plunged into the earth in some prehistoric time, but it must have been a long, long time ago, because for over 60 years blasting has been going on in that quarry, and it was 85 feet down in solid rock from the top of the ground.

Connecticut.

W. D. Upson, Waterbury, has fully recovered from his recent illness.

Thomas Singleton, superintendent of the J. D. Bergen Co., Meriden, has the sympathy of his many friends, owing to the death of his wife after a brief illness.

Mayor George M. Landers, of New Britain, where he is associated with the Landers, Frary & Clark Co., left, June 8, for New York and Pittsburg on a business trip.

W. S. Fenwick, manager of the Fenwick Optical Co., East Norwalk, moved his family to that place from Bridgeport, on Tuesday of last week. He has taken up his residence at 5 Yost St.

Proposals have been received for the new construction by the Landers, Frary & Clark Co., New Britain, of a one-story brick addition, 45 by 90 feet, which will be made to the glazing department, and a one-story brick factory 26 by 126 feet.

The police of Danbury received from the New York police department, last Wednesday, a description of Abraham Siegel, who had been missing from New York since June 1, and for whom a general alarm was sent out. Siegel is supposed to be a buyer of old jewelry. A member of the Danbury police department noticed that the description from New York tallied with that of a man who had escaped from the prison in Washington, Conn., where he was arrested for stealing jewelry worth \$1,100 from Blythe Hall. Siegel finally admitted his identity.

E. L. Glouskin, a jeweler, of New Haven, was visited, one day last week, by a well-dressed woman who nervously called him aside from a customer to whom he was talking and whispered to him that she had suddenly suffered reverses and would offer a beautiful diamond ring for a loan of \$100. The jeweler wrote out a check for \$50 and gave the woman \$50 in cash besides, after a cursory examination of the ring. A closer examination of the ring showed that it was worth not more than \$10. The stone was an exceptionally good imitation of a genuine diamond. The woman, who has thus far evaded arrest, is about 30 years of age and was dressed in black.

Harrisburg, Pa.

A clock hospital has been established on N. 3d St., near Reily St.

The local Board of Trade is still negotiating for the establishment here of a Washington, D. C., watch concern.

The store property owned by the Logan Estate at Cross Roads, near York, was burned, last week. Monroe Kling, who occupied the building, lost heavily.

Secretary Cook, of the Retail Merchants' Association, announces that merchants generally will close their stores, July 5, in observance of Independence Day, which anniversary falls on Sunday this year.

Cards are out for the wedding, June 17, in Chestnut Street Hall, of Miss Rose Leah Cohen, daughter of Abel Cohen, this city, and Dr. Bertram B. Machat, of Bath Beach, New York. Dr. Machat is a prominent dentist and is commodore of the Fort Lowery Yacht Club.

GORHAM SILVER

"Not Strength, but Art, obtained the prize."—POPE

¶ The average Committee entrusted with the task of choosing the Trophies or Prizes bestowed in Summer sporting and athletic contests is composed of men of taste and discrimination, who insist that their choice shall possess not only intrinsic but also a marked artistic value.

¶ Thus, for the reason that art appeals to them and obtains the prize of their elective preference, each succeeding Summer season witnesses the offering of an increasing number of Gorham Cups and Vases as prizes in connection with Yachting, Rowing, Golf, Lawn Tennis and Athletic events in general.

¶ The Gorham Company, therefore, take pleasure in directing the attention of the Jewelry Trade to their special and other pieces designed with especial reference to the above purpose.

CABLEGRAMS which were received from London last Thursday by the large diamond cutters and importers, to the effect that the Syndicate had announced an increase of 5 per cent. in the price of rough diamonds of fine qualities confirm the predictions that have been made in the London and other gem markets for some time that an increase was pending. This is the first variation in the price of rough in the past two years, and, as predicted in THE JEWELERS' CIRCULAR-WEEKLY and all others conversant with the diamond situation, the only change which the trade had to expect was one in an upward direction. Not only have these finer grades increased in price, but the market for the other qualities is reported to be very firm.

COMMERCIAL failures in the United States during May numbered 1,028, with total liabilities of \$14,383,760, according to the statistics compiled by R. G. Dun & Co., the number of failures being smaller and the liabilities being slightly larger than those of May last year. As far as the jewelry trade alone is concerned, however, the condition is reversed, the number of failures being slightly larger and the liabilities being considerably smaller than a year ago. According to the table of failures by branches of business compiled for Dun's Review there were 23 failures among jewelers and clock dealers last month, with liabilities of \$211,213, against 21 failures in May, 1908, with liabilities of \$247,843; 19 in May, 1907, with liabilities of \$178,206; 19 in May, 1906, with liabilities of \$311,400, and 16 in May, 1905, with liabilities of \$442,621.

One Result of the THE gathering of the jobbers at the convention of the National Wholesale Jewelers' Association, which took place in New York Wednesday, Thursday and Friday of last week, was considered by many one of the most important events that has taken place in the jewelry trade for many years.

This followed not only because of the formal work of the body, which acted on many matters of importance to themselves as jobbers and to the entire trade in general, but particularly because of the cordial feeling among the members which resulted from the meeting and the fact that it brought the jobbers of the east and west more closely together on business and social lines than they have ever before been. What is more, it tended to bring the wholesale jewelers of New York together on a friendly as well as a business basis, and emphasized to all the fact that their interests are identical, their ills and troubles common and that all are struggling to the same end under the same conditions.

The gathering showed that the wholesalers have a representative organization whose members are working together harmoniously, not only in their own interests, but along lines by which, with the proper cooperation of retailer and manufacturer, many serious abuses from which the entire trade has suffered can be quickly and effectually eliminated. As a result of the gathering the relations between the jobber and the manufacturer and the retailer are sure

The best publication of its class is the one to advertise in, if you wish profitable returns.

to be more cordial than ever before and the chances of their working together for the mutual good of the trade have been greatly increased.

As far as the important work on purely business lines accomplished by the organization is concerned, this is noted in full in the report of the meeting in another column of this issue.

Senate Blunders on THE United States Senate ran "amuck" Friday night on the diamond tariff.

with the result that before the members of that august body got through with their debate on the subject, of which but few had the slightest knowledge whatsoever, they had agreed upon a diamond tariff of 15 per cent. on cut stones and five per cent. on rough, as a compromise. We are authentically informed by the leading members of the diamond and importing and cutting trades that if this tariff is permitted to go into effect it will mean a demoralization of the diamond importing business of this country and an enormous increase in the amount of smuggling, and will soon see the doom of the diamond cutting industry in the United States. With these conditions there is little doubt that the Government will receive less revenue from diamonds than it has at any time since the Wilson tariff was succeeded by the present law.

The action of the Senate was brought about by Senator Bacon, of Georgia, who gave notice, a short time ago, that he would introduce an amendment to the diamond schedule, providing that all cut gems be taxed at 25 per cent. and the rough at 15 per cent., and in introducing the amendment, Friday night, he delivered a speech, an abstract of which is to be found in another column, which showed that he had absolutely no knowledge of the conditions which obtain in the diamond industry and the collection of revenue therefrom. He also showed he had no patience with anyone who wished to explain what the facts in the case were when he was answered by Senators Lodge and Root.

His contention that the decrease of the revenue from diamond importations during the Wilson bill was due to the depression in business, and not to smuggling, is known to be false and without foundation by everybody connected with the diamond and gem trade, but it is apparent from the debate that Senator Bacon and those associated with him in the quixotic idea of putting a high tax on diamonds, have given no credence to the testimony of the only people in the United States who know what the conditions were between the years 1894

and 1897—namely, the jewelers and officers of the Treasury Department.

It is the duty of the jewelry trades to show to Senator Bacon associates, by an overwhelming letters, evidence and statistics, contention has not a leg to stand his endeavor to tax a luxury beyond limit on which revenue can be simply plays into the hands of the fraternity, the extra five per cent just sufficient inducement to change is now an incidental practice of scrupulous into a business industry foreign merchants will indulge.

Undoubtedly Senators Aldrich, Lodge and the other Administration felt the vital necessity of comm agreement without loss of time, would not have compromised with vocates of a high gem tariff; that so was probably due to the fact that did not themselves appreciate the harm that the extra five per cent and cut diamonds would do to the Their action is to be deeply deplore the same time the trade has no lamenting, but should at the earliest moment use every endeavor to the error before it is confirmed Conference Committee of the two which will finally determine what tariff act shall be.

In this every jeweler of the United can do his part by writing at once Senator and Representatives or direct Senators Aldrich and Representatives pointing out that the increase in diamond tariff will means a decrease revenue and a demoralization of trade, and will take away what is done from the hands of the American dealers and put it into the of the smuggler. The jewelers have through such conditions during the the Wilson bill and know that it is tion and not a theory they have. They have experienced it once. hoped never to do so again.

Rochester.

E. H. Schcer, of this city, has pointed a member of the members mittee of the New York State Jewelers' Association.

A man named Rosederry recently one of the front windows of Klee jewelry store, 214 Main St., a piece of iron, but before he had opportunity of taking anything he was by a policeman and locked up, charged malicious mischief. Rosederry is drinking, and it is thought that condition was responsible for the act it was not prompted by a desire to

In the Police Court, last week, of grand larceny in the second degree referred by C. W. Root against C. V. was dismissed by Judge Chadsey, a tiff claiming that he bought from defendant a diamond ring at \$25. belief that it was a 1½-carat diamond an instalment agent had said to \$300. He later discovered that white sapphire. There was no evidence show that Moise, who was later at Buffalo, had ever said that the stone a diamond and the case was dismissed.

New York Notes.

anner, a retail jeweler, has moved to 104 Eighth Ave. to 1342 St. Nicholas.

Mr. Herzfelder, of Herzfelder & Kohn, recently on the *Lusitania* from a long trip abroad.

Mr. P. Harper, 37 Maiden Lane, sailed for Europe on the *Prinz Frederick Wilhelm* on Thursday of last week.

Shiman has returned from a trip to the west and reports an improved position in the trade in that section of the country.

A. A. Lyons, formerly secretary and manager of the Lyons Gem Co., 35 Maiden Lane, now associated with the American Gem Co., 27 W. 23d St.

Jack Goldsmith, of Ingomar Gold Co., returned from a trip to Europe on Tuesday of last week on the *Rhein* and was away four months.

Broedel, formerly with the Oskamp Co., Cincinnati, O., has taken a trip with Jonas Koch, 37 Maiden Lane, and hereafter travel over the old territory that firm.

Manheimer, of Louis Manheimer & Co., 35 Maiden Lane, accompanied by wife and daughter, sailed yesterday on the *Prinzessin Cecilie* for a three-week trip in Europe.

Mr. Conovitz, who has been conducting jewelry business in Flushing for the past years and whose present store is on Main St., has opened a branch store at 13th St., College Point.

Mr. I. H. Mann, wife of M. H. Mann, of Mann & Co., accompanied by her mother, starts for a pleasure trip to Europe on the *Lapland* Saturday. She will be accompanied by relatives in Antwerp and other

Mr. Yonker, receiver in bankruptcy of the assets of Louis Barnett, retail jeweler at 14 Livingston St., Brooklyn, will sell stock at public auction at the store at 21 at 10:30 A. M. The stock consists of jewelry, silverware, etc.

Mr. Tugenreich, who is 71 years old, called the police of this city to find his son Emil, who is in the jewelry business. He told Sergeant Quackenbush that he had just left a hospital near Readington to come to New York.

The regular monthly meeting of the Board of the Jewelers of Trade, on Thursday, the following firms were unanimously elected to membership in the Chicago Art Metal Works, Childers & Co., New York; Kelly & Co., Des Moines, Ia.

Mr. H. King, who lives at 1408 Bronx, filed a voluntary petition in bankruptcy in the United States District Court last week. The liabilities are \$5,677. The debts were contracted as partner in the firm of Silverberg & Co., who were in the jewelry business on E. 14th St.

The American Museum of Natural History purchased through Prof. Eugene A. Mearns a collection of curious ornaments from the South Sea Islands, including about 75 pieces, among which are articles of personal adornment, including carved combs formed with shells,

bracelets and girdles made with shell discs.

A pearl necklace, valued at \$1,000, was found in the possession of a woman who stepped off the steamship *Amerika* Saturday at this port. The jewels had not been declared and were seized. It was said that the woman who had the necklace in her possession had been badly informed about the customs laws and that the duty would be paid.

The business of Chas. Brummer & Co. has been incorporated under the laws of the State of New York, to manufacture and deal in jewelry, precious stones, silver and cut glass, with a capital of \$10,000. The incorporators are: Chas. Brummer, 1878 Seventh Ave.; Jacob Fischel, 62 W. 113th St., and I. Irving Cohn, 1819 Madison Ave., all of New York.

Michael Dreicer, of Dreicer & Co., 560 Fifth Ave., has purchased the residence of Mrs. Benjamin Thaw, facing the east drive of Central Park, 1046 Fifth Ave. The house is a six-story English basement structure, occupying a lot 22 by 100 feet, and was purchased by Mrs. Thaw about a year ago for \$185,000 from the firm who built the house. It is in the block between 85th and 86th Sts.

The customs authorities of the port of New York have learned that Celso del Villar, of Mexico, who came to this country some weeks ago and failed to declare several hundred dollars worth of jewelry, has left the United States for home. At the time the jewelry was taken from Villar the customs officials started an investigation. It is stated that the goods will be turned over to the District Attorney and will be sold later by Marshall Henkel.

The regular meeting of the Jewelers' 24 Karat Club, of New York City, will be held at the club rooms, 15 Maiden Lane, this afternoon at 3 o'clock. The members of the club have been invited to participate in a "gala day," which is being given by the Philadelphia Jewelers' Club on June 29, at Philadelphia. One of the features of the day's outing will be a baseball game between the two clubs. It is expected that a good representation of New York jewelers will be in attendance and that a most enjoyable day will be spent.

The prices of pearl buttons in 1908 were in general about 10 per cent. less than those in 1907, and probably reached the lowest point. An examination of the conditions prevailing in the articles in question at the opening of 1909 points to this conclusion. The fall in prices began with the failure of orders early in 1908, due to the stringency of the money market. Although the price for shells has remained nearly the same, the wages of the workmen have gone down somewhat. The trade in this city has begun to pick up, and it is anticipated that old prices will soon be reached again.

Many friends in the trade learned last week with regret of the death of Augustus W. Atwater, at one time well known as a salesman on the road, which occurred June 4 after an illness of two years. Deceased was the only son of Wm. H. Atwater, who for many years was prominent in the clock business in Maiden Lane as agent of the Boston Clock Co. and the E. N. Welch Mfg. Co. The son learned the business with his father, and later entered the

watch case business as a salesman. Deceased was unmarried. The funeral services were held Sunday, June 6, at St. Stephen's Episcopal Church in this city. The interment was in the family plot in Westfield, Mass.

It was decided last week by the Board of United States General Appraisers that two communion sets presented by Mrs. C. B. Needham to Grace Methodist Episcopal Church of Decatur, Ill., are entitled to enter this country free of duty. The customs authorities at Port Huron held up the sets and exacted duty under the metal schedule at the rate of 45 per cent. According to Mrs. Needham, the communion sets were imported for presentation to a religious society, and not intended for sale. She, therefore, claimed that the articles fell within the meaning of Par. 649 of the free list. Judge Hay, who writes the decision for the Board, sides with the protestant, sets aside the imposition of duty made by the collector, and directs that the sets be admitted free.

The Jewelers Board of Trade reports that he has succeeded in controlling the election of the trustee in the matter of J. M. Gibbs & Sons, Hannibal, Mo. It developed during the proceedings that a local druggist claimed the entire stock under a bill of sale and that Mrs. Gibbs, wife of one of the partners, claimed the furniture and fixtures on an additional bill of sale. The concern claimed that their exemptions covered the watchmaker's tools, etc. The Board examined into the various claims made, and after some litigation succeeded in defeating all three. An order of sale was entered and the stock disposed of for \$725 and the fixtures for \$300, making a total of \$1,025. In addition to this amount the trustee expects to realize something on the outstanding accounts, and the estate will accordingly pay a dividend to creditors. The schedules in bankruptcy in this matter show liabilities of \$9,123 and the appraisal of the stock amounts to \$4,423, made up as follows: Merchandise, \$2,451; fixtures and furniture, \$842; typewriter, \$40; tools, \$90; outstanding accounts, \$1,000.

Members of the New York Numismatic Club, who met at Keen's Chop House last week at the monthly meeting, were treated to a real sensation when H. Woodin, the coin collector, exhibited two gold coins and announced that he had paid \$20,000 for them. These coins, which take front rank at once as the highest priced coins ever issued in the world, were two \$50 gold pieces made at the United States Mint in Philadelphia in 1877, and are the only ones ever made in gold, being of a dimension never adopted by this country for regular circulation. They were considerably larger in diameter than the double eagle and much thicker. The design on the obverse side is a head of Liberty, surrounded by 13 stars with the date "1877" below. On the reverse is an eagle much larger than on the old \$20 gold pieces, the inscription around the eagle reading, "United States of America \$50." The previous selling record held for an American coin was \$6,200, which was given a few

A. H. Heller, the Paris representative, and "Jack" Heller, of L. Heller & Son, 68 Nassau St., New York, returned from Eu- rope, June 8, by the *Kronprinzessin Cecile*

Leonard Krower, New Orleans, was among the prominent members of the National Wholesale Jewelers' Association who visited the offices of THE JEWELERS' CIR- CULAR—WEEKLY, last week.

Victor D. Brenner, a well known medal- ist of this city, designed the gold medals presented to Orville and Wilbur Wright, last Thursday, by the Aero Club of Amer- ica. The medals cost \$2,300.

Fred Goldsmith, of Ingomar Goldsmith & Co., 180 Broadway, sailed for Europe, last Tuesday, on the *Rhindam*. He will be away four months and will visit the diamond markets of Europe.

Barbagelli Nelli, a retail jeweler at 334 E. 12th St., was robbed, last week, of jew- elry by a stranger who represented him- self as a Russian Baron. The alleged Baron was picked up by the police and held in \$1,000 bail.

J. P. Benjamin, New York representa- tive of the Elm Mfg. Co., Newark, N. J., has wholly recovered from his recent in- disposition, and is again at work. He was taken ill at Rochester, N. Y., a few days ago and forced to return to this city.

The Metropolitan Jewelry Co. has been incorporated under the laws of the State of New York to manufacture jewelry and or- naments, with a capital of \$10,000. The incorporators are: E. J. Forhan, H. M. Browne and J. J. Harper, all of New York.

The Waltham Watch Co. will send out this week circulars to the retail watch trade of the country notifying the dealers of the efforts which the company is making to hold the sale of its product within the legitimate jewelry trade and telling how the dealers in dry goods, mail-order houses, hardware stores and general mer- chants have been requested to drop Wal- tham watches from their lists in future. The company intends to take every means that it can to enforce this policy and keep its products within legitimate channels.

Maurice Gunetal, a jeweler, living at 118 E. 115th St., while crossing Park Ave. at 108th St., recently, was struck and knocked down by a skidding auto driven by Dr.

Isaac I. Plotz of 1722 Madison Ave. Dr. Plotz drove the injured man to his home and examined him. He found that the man, who is 65, was suffering from a sprained right foot and contusions of the body. After he had driven the man to his own home Dr. Plotz reported the accident to the police of the E. 104th St. Station. He was not apprehended.

The Merchants' Association of New York has issued circulars giving information concerning the merchants' reduced railroad rates to this city for the Fall meetings. A full fare to New York and one-half fare returning will be the rate secured. Tickets will be sold July 8 to 11, inclusive; July 17 to 20, inclusive; July 31 to Aug. 3, in- clusive; Aug. 12 to 15, inclusive. The re- turn limit under the certificate plan is 30 days. Full particulars may be obtained on application to the Merchants' Association, 66 Lafayette St., New York.

Suffering from a fractured skull and a bullet wound in the abdomen, alleged to have been inflicted by Vincenzo Perillo, his father-in-law, Luciano Camerino, a jeweler, at 596 E. 183d St., was taken to Fordham Hospital, Monday. He was reported dying later. Perillo was locked up after a fierce struggle with Policeman Traynor, of the Tremont station, in the jewelry store, dur- ing which the valuable stock in the place was scattered over the floor when the show cases were smashed. Perillo charged that Camerino, who married his daughter a year ago, borrowed \$500 from him and has since refused to pay it. The elder man entered the store and demanded his money, Mon- day. When it was refused, it is charged, he struck his son-in-law on the head with an iron bar and then fired three shots at him.

S. R. Finney, 2 Rector St., whose name was mentioned in a dispatch from San Francisco as receiving opals through the Custom House at a low valuation, said Monday that the opals in question were rough, and as such were, so far as he knew, not subject to any duty. He said that he could not understand how the question of undervaluation had been brought up at the present time, because he had been receiv- ing consignments of rough opals from Australia for the last five years. He re- ceived a letter from the appraiser at San Francisco in regard to the value of the opals, he said, and answered that the bill was probably inclosed in the package. He is now awaiting further advices from San Francisco. The dispatch said that a con- signment of opals from Sydney, Australia, to S. R. Finney, 2 Rector St., New York, was held up by customs officials at the postoffice there because of undervaluation. Mr. Finney said that there must be some mistake, as he had a part of the same con- signment in his possession now. He acts as a distributing agent for the rough goods.

The firm of Sippell & Gilbert, St. Joseph, Mich., recently liquidated, Joseph R. Gil- bert continuing the business, at this place.

Extensive improvements have just been completed in the store of O. B. Marvin & Co., Findlay, O. The store has been en- larged and is now twice its former size. New show cases and fixtures have also been installed.

Mrs. David Nenser, wife of David Nenser, left town last week for Somerville, Mass., where she will spend the Summer. Mr. Nenser will make occasional visits.

F. B. Mallen, 405 Broadway, Camden, N. J., has taken a house in Collingswood, N. J., for the Summer. Mr. Mallen expects shortly to take a trip through the New England States.

C. S. Powell, recently of 5 S. 8th St., presented half a hundred medals to the winners who competed in a big meet between the various grammar schools throughout the city.

J. E. Caldwell & Co. have been awarded the contract for the gold medals and plaques to be offered as prizes for the People's Regatta, which is the Fourth of July celebration on the river.

E. J. Berlet, of Maxwell & Berlet, Walnut and 13th Sts., was a guest at the banquet of the Market Street Merchants' Association. Mr. Berlet is president of the Walnut Street Business Men's Association.

J. H. Rowe and his father, members of Leon H. Rowe & Co., Daytona, Fla., are in town. They have taken a bungalow in a pleasant section of New York State, where they will spend the Summer with their families.

The Philadelphia jewelers who attended the recent convention of the State Jewelers' Association at Harrisburg were: C. S. Powell, F. C. Bode, J. Warner Hutchins, Ira D. Gorman, Louis P. White and Chas. H. Hambly.

The Bailey, Banks & Biddle Co. designed and made the silver loving cup presented by the officers and men of the 22d Infantry stationed at Fort William N. Seward, Haines, Alaska, to their retiring chaplain, Major Fitz Gerald.

An attempt was made last week to rob the jewelry store of William Fussman, Gloucester, N. J., but the burglar was scared off. This is the third time in the last month that Fussman's store has been visited by burglars.

Miss Rita Sickles, daughter of M. Sickles, was a graduate from the Convent of Mercy at Merion last week. A dinner was given in honor of the event by her mother at The Brantwood, where her friends and school chums were entertained.

Allen A. Kerr, 10th and Chestnut Sts., secretary of the A. A. U., will act as starter for the races given by the business men of 52d St. next week. F. L. Davis, who is president of this association, is exhibiting the prizes in his store window, 5143 Market St.

J. E. Caldwell & Co. are exhibiting in their window the prizes manufactured and designed by this house to be presented by the Lake Mohonk Mountain House, Lake Mohonk, N. Y., to the winners in the tennis, croquet, golf and bowling tournaments this season.

The Bailey, Banks & Biddle Co. has been awarded the contract for the silver loving cup to be presented to the owners of "Bayou Sara" by the enlisted men of the

U.S.S. *Mississippi*, in commemoration of the hospitality extended to them May 19, 1909, while on a visit to this place.

Daniel A. Comerer, who, some years ago, conducted a jewelry store in Chambersburg, died June 5 at his home, 2619 N. 33d St., this city, aged 74 years. The remains were taken to Chambersburg for interment in the Cedar Grove Cemetery in that city. Deceased is survived by a son and three daughters.

The meeting of the creditors of George M. Kite was held June 8 and a trustee appointed. Appraisers, appointed by the trustee, submitted a report showing that the stock was valued at \$4,200. An offer of settlement was made on the basis of \$3,000 to the creditors, and it is now under consideration.

The death of J. McGlensey on Tuesday, June 8, at Phoenixville, Pa., was a shock to the trade. Mr. McGlensey was a prominent jeweler of Phoenixville, Pa., and was the father of Leo McGlensey, one time watchmaker for H. Muhr & Son. He later formed the firm of Hughes & McGlensey, jewelers, 111 S. 8th St.

After throwing private detectives off his trail in the last month, Eugene Miller, formerly employed as a watchmaker by S. J. Lyons, 2258 N. Front St., was arrested at Chautauqua, N. Y., last week, charged with having stolen \$2,000 worth of jewelry from Mr. Lyons' store. Miller will be brought back to Philadelphia for trial.

The following jewelers were visitors to this city during the week: John Merz, Hopewell, N. J.; D. H. Krause, North Wales, Pa.; N. B. McFarlan, Downingtown, Pa.; J. W. Parrish, Newark, Del.; John MacPherson, Mauch Chunk, Pa.; Calvin Solladay, Fornebestville, N. J.; Charles Kohler, Norristown, Pa., and H. Levy, Levy Bros., Johnstown, Pa.

The cornerstone of the Wanamaker Store, the largest structure of its kind in the world—a building devoted entirely to retail merchandising, was laid with impressive ceremonies Saturday, June 12. Governor Edwin S. Stuart represented the State at the ceremony, Mayor John E. Reburn the municipality and Judge G. B. Orlady, of the Pennsylvania Superior Court, represented the judiciary of the State.

Under the auspices of the Merchants and Manufacturers' Association of Philadelphia, the Associated Wholesale Jewelers of Philadelphia have inaugurated special railroad fare refunding sales for the coming season. The terms of the sales are that merchants whose aggregate purchases amount to the sum of \$500 or over are entitled to a refund of railroad fare not to exceed one per cent. of the amount purchased. In order to obtain the full benefit of the refund visiting merchants must register at the rooms of the Merchants and Manufacturers' Association, 13th and Market Sts. Application has been made to the courts for permission to change the name of the Merchants and Travelers' Association to the Merchants and Manufacturers' Association of Philadelphia.

James G. Burkhead, Omaha, Tex., has removed to Mineola, Tex.

14 Maiden Lane, NEW YORK

Pittsburg.

C. Shiras and family have returned from a vacation spent at Niagara

Mary Hill, a daughter, of E. W. has been re-elected a teacher in the public schools.

Smit, of the M. J. Smit Co., says business is improving, with his household much better now than it has been for some time.

Lougham, of the Geo. B. Barrett, last Saturday night for Philadelphia business and a short stay at Atlantic City.

Gillespie sails, July 15, from New York for Europe on the *Prinz Friedrich*.

Mr. Gillespie will visit Berlin, Vienna, Carlsbad and Paris before returning to America.

Sipe, accompanied by his son, William, Jr., sail, July 15, for Europe. The trip will include a visit to London, Amsterdam and Paris, Mr. Sipe going on his diamond-buying trip.

Jewelers are figuring on taking the new Henry W. Oliver building, which will be 25 stories high and the tallest in Pittsburg. It is now under construction and will be finished April 1 next, and work is under way.

Following out-of-town jewelers were in the city last week, buying goods: J. H. Toronto; A. Katzenmyer, Burlington; R. A. Cunningham, Leetsburg; J. Williams, Irwin; B. E. Brown, York; H. R. Brown, Donora.

Mr. Buhl, last week, celebrated the twenty-fifth anniversary of their career in business. Employees of the establishment present were members of the firm, both of whom are still living, with a handsome silver cup, as a token of their regard for him.

Sam Lewis, of the North Side, who was declared bankrupt Dec. 18 last, has been granted a discharge from all debts. A hearing on this petition will be held in the County Court, June 24, at 10 A. M., at which Lewis' creditors have been cited to appear.

Consent is made of the dissolution of the partnership existing between Hutchings and Myers, Massillon, O., Mr. Myers withdrawing from the firm. The store is situated at E. Main St., where Mr. Hutchings will continue the business. He will pay all outstanding accounts and will pay no obligations.

Mr. Kennerdell, Tarentum, last week, was nominated for jury commissioner on a Democratic ticket. While his majority is large, there is no doubt about his re-election next November, as he will not have any opposition. Mr. Kennerdell was appointed jury commissioner months ago by the judges of the county and his term is now expiring for the full term.

Mr. Roberts, of John M. Roberts & Co., was given several complimentary notices last week in the local papers, in recognition of his effort to have the "sell-off cases" regulated and because honor conferred upon him in electing him vice-president of the Pennsylvania Jewelers' Association and his appointment

as chairman of the legislative committee.

The estate of Joseph and Margaret Loughrey is about to be turned over to the heirs, who have reached an agreement. The property in the hands of the executors was estimated some time ago to be worth \$900,000, and Mrs. Roberts, the wife of John M. Roberts, of the John M. Roberts & Son Co., will receive about \$200,000 as her share of the estate. Mr. Loughrey died about nine years ago, and because of the life interest of Mrs. Loughrey no division could be made, but Mrs. Loughrey died some time ago, and now the heirs are to come into their share.

An array of jewels and gems that would rival a jewelry store's display window was received as donations in the Epiphany Catholic Church, recently, for a jeweled cross that is to adorn the tabernacle door of the new marble altar. The collection included a sword hilt that had been used in wars in foreign lands, as well as in the Civil War; a necklace that had adorned beauty when Pittsburg was young, a gold medal received for heroic service at sea years ago, a class medal bearing the numerals "42" from the last survivor of the class, gold watches still ticking, earrings, brooches and set rings, some of them more than a century old.

Newark.

The Elm Mfg. Co. is now running full time.

J. F. Wilkinson, of the J. E. Wilkinson Co., refiners, Toronto, Can., was in town last week.

Matthias Stratton, of Alling & Co., was a member of the recent Essex Grand Jury, which has just disbanded.

It has been decided by the Market St. Business Men's Improvement Association that the "great white way" will be opened about June 30 with a big celebration.

H. H. Garrabrants, who was until recently the western representative of Champenois & Co., has been succeeded by Eugene De Nike, who will cover the same territory.

The Hartdegen Co.'s big clock, which has been a great convenience to thousands of Broad St. shoppers, recently received a coat of gold leaf which enhances its appearance considerably.

The Goldsmith-Koch Co., 103 Oliver St., Newark, has been incorporated to do a silversmithing business with a capital of \$25,000. The incorporators are: Marcus T. Goldsmith, Julius Koeh, C. K. Goldsmith and E. De Roy Koeh, all of Newark.

The Geoffrey-Heiser Co., of this city, has been incorporated with a capital of \$30,000 as jewelers. The incorporators are: John J. Heiser, 344 W. 71st St., New York; Arthur R. Geoffrey, 63 Elizabeth Ave., Newark; Selden C. Greves, Roselle, N. J.

John Adams and John Schreiber, who were recently convicted of conspiracy to rob Mrs. Laura V. Ross, of the Ross Novelty Co., Irvington, were arraigned in court on Monday, June 14, and received severe sentences. They were arrested in November last by the Newark police.

When Emil C. Mertz, of this city, returned to his home, on Jerusalem St. and Mertz Ave., Belleville, about midnight, one

night last week, he found a burglar in the house. Mertz grappled with the intruder, but the fellow got free, and after jumping from a window escaped on a bicycle.

Henry Weber, employed as an apprentice by the B. M. Shanley, Jr., Co., is out on bail charged with stealing gold filings. It is alleged that he took more than \$60 worth of the filings and sold them to the William F. Renziehausen Co., claiming that he purchased them from another young man.

Among those who will attend the convention of the National Association of Credit Men, which will be held at the Bellevue-Stratford, Philadelphia, this week, are Louis A. Kempf, of the W. C. Edge Jewelry Co., and Curtis R. Burnett, of the American Oil & Supply Co. They will act as Newark delegates.

Joseph B. Wolf, employed by Carter, Howe & Co., died, last week, after a lingering illness. Mr. Wolf was 55 years of age and lived in Newark all his life. He had been employed at intervals for 35 years by Carter, Howe & Co. He also served in the city tax department. Of late he had resided with his son on S. 9th St.

The Fronde Jewelry Co., of Passaic, filed articles of incorporation in the County Clerk's office, recently, having a capitalization of \$10,000 divided into common and preferred. The incorporators are: Everitt L. Bliss, N. Y.; Charles E. Frost, Paterson, each one preferred share; Bradford Froude, two preferred, and Sarah E. Froude, 50 common.

The annual presentation of the Herpers' gold medal, by Herpers Bros., of this city, to the pupils of several art and technical schools showing the greatest merit and proficiency in jewelry designing or making is now under way. The winners of the medal, as far as learned, are: Miss Ethel J. Waldrau, of the Rhode Island School of Design, and Benjamin Carpenter, of the Pratt Institute, Brooklyn, N. Y. A third medal goes to the Bradley Polytechnic Institute, of Peoria, Ill., but the name of the winner in that school has not yet been received. Herpers Bros. are doing good work for the art side of jewelry making in thus stimulating the endeavor and industry of the growing generation of jewelry designers and makers.

Syracuse.

At Jamestown, last week, the police arrested Eugene Miller on a warrant charging him with being connected with the robbery of a jewelry store in Philadelphia. The prisoner has been held to await extradition papers.

Extensive additions and improvements are to be made to the plant of the P. A. Coon Silver Co., 135 Warren St., owing to the fact that the concern is about to start the manufacture of a new line of novelties, which will include jewel cases and toilet articles. The space now used for shipping and storage purposes will be used for manufacturing purposes, and new shipping and storage quarters will be added. According to Mr. Coon the force will probably be greatly increased.

A. W. Holmes, formerly of Lawrence, Kans., is now at Bonner Springs, Kans.

Way to rob a store came to light ck, recently, when the police were at the store of J. A. Stapf & Son entered by burglars. Indications he thief took a stand directly in e the store and with the aid of a ie of wire drew some gold chains to display space through a narrow

the jewelers who recently visited lo market were: L. N. Austin, ollins, N. Y.; E. A. Saks, Mans- F; L. L. Lesser, St. Mary's Pa.; rd, Medina, N. Y.; C. L. Kerr, rings, N. Y.; P. M. Riley, Hol- N. Y.; B. M. Frary, Medina, N. Y.; entiss, Lockport, N. Y.; C. H. awanda, N. Y., and Mr. Lewis, N. Y.

asonic traveling triangle which xhibition in T. C. Tanke's win- le week, was given another boost ay around the world on Friday ven a committee of about 100 Buf- ns took it to Cleveland and turned Keystone Chapter of that place. rvis, who was recently elected a

director of the New York State Optical Society, was one of the committee. Mr. Jarvis is a Past High Priest of Keystone Chapter. The party left on Friday and returned to town on Sunday.

C. C. Penfold has completed a medal which is to be presented to William H. Daniels, June 17, when he retires as Department Commander of the New York State G. A. R. The piece consists of the regular G. A. R. insignia of an eagle perched on two crossed cannon. This is heavily set with diamonds. Suspended from the emblem is a bar carrying a star set in diamonds at either end, and the rank of the recipient. Pendent from these is the regulation G. A. R. star with a center design encircled with diamonds, while the points of the star also carry large diamonds. The triangle formed by the crossed cannon is to be filled with a cluster of rubies. Mr. Penfold's specialty is Masonic work. He recently finished about 350 bronze medals, or Masonic Chapter pennies, which were distributed at the Cleveland banquet to the Buffalo Masons who forwarded the traveling triangle from Keystone Chapter here to McKinley Chapter at that place. The pennies are fittingly engraved.

San Francisco.

William Park, with Park Bros. & Rogers, was here, last week.

George Lorsen, engraver, has taken quarters in the Jewelers building.

William Adelsdorfer, with the Wm. L. Gilbert Clock Co., is back from a long trip on the road.

R. Myers, of R. & L. Myers, is taking a short vacation at the present time. He is expected back within 10 days.

W. Presbrey, with the Bassett Jewelry Co., has concluded a very successful trip in the southern section of the State.

The store of A. Samuels, in the Lincoln Realty building, at Market and 5th Sts., is almost completed and will be occupied within a very short time.

Mr. Shattuck, formerly representing Riley & French, but now with Ford & Carpenter, was in San Francisco, a short time ago, renewing old acquaintances.

H. P. Garin, formerly located on Fillmore St., has purchased the business of W. Davidson on Market St., opposite 6th, and will take possession of the store at once.

G. Gensler, who has been located on Van Ness Ave. since the fire, is fitting up a store on Market St., just above McAlister, and will be loca'ed downtown in a very short time.

W. J. Brown, representing J. B. Whitney & Co., has left for the east and will visit all the factories represented on the Coast by his concern. He will be absent for five or six weeks.

Burglars are still busy in San Francisco and a number of attempted robberies of jewelry stores are reported. The store of H. Behrend, 1323 Steiner St., was recently broken into and several valuable watch-chains were taken. The thieves broke the show windows and took the goods on display, but did not enter the store. Behrend is the man who was attacked by Siemsen and

Dabner, who were hanged at San Quentin last Summer. He secured the reward offered for their apprehension by capturing Dabner.

Savannah, Ga.

R. Van Kenren, who, last month, brck his ankle, is now able to go about with the aid of crutches.

S. E. Theus, of Theus & Co., has returned from Louisville, Ky., where he attended the grand conclave of the Imperial Council of Mystic Shriners.

The sale of the stock of M. Sternberg, advertised to take place on June 10 by order of Justice M. Naughtin to satisfy claims of the Eastern Leather Goods Co. and the owner of the store occupied by Sternberg, was enjoined by a writ of Judge Charlton, of the Chatham County Superior Court, until the case comes up on its merits next week. Mr. Sternberg based his request for the injunction on the fact that he has applied to the Court of Ordinary for a homestead exemption of \$1,600, and if his stock and store fixtures are sold out to satisfy above-mentioned claims his homestead rights will be impaired. On Saturday Attorney G. A. Mercer and W. L. Clay, representing the moving creditors, filed a motion to dissolve the restraining order issued by Judge Charlton. They set out in the petition to dissolve that there are no facts in the case sufficient to authorize the court to sustain the injunction, and that despite what he claimed Sternberg has adequate remedy at law without resorting to the writ of injunction. It is further shown that Sternberg's plea that he has an application for a homestead exemption on file in the Court of Ordinary is not valid, for the reason that he went into bankruptcy in the United States Court in 1906 and was then given a \$1,600 homestead.

Trans-Atlantic Voyagers.

TO EUROPE.

H. Schwartz, Chicago, sailed, recently, on the *President Grant*.

Gabe Haussman, New Orleans, La., will sail for Europe Aug. 1.

S. F. Sipe, Pittsburg, Pa., accompanied by his son, will sail, July 15.

to the Soldiers' Home at Bristol. Benjamin Hall, an old-time manufacturer jeweler, is the commandant.

Charles J. Tonry, who recently accepted a position with the Eastern Jewel Co., has just returned from his initial trip that concern through the middle west. The results were very satisfactory.

The foundations for the new building of the Improved Seamless Wire Co., being at Eddy and Public Sts. have been completed, and the work on the superstructure will be commenced at once.

The case of Adolph Lederer against Streicker was called in the Civil Session of the Sixth District Court, June 8, by Judge Rueckert. Decision was given in favor of the plaintiff for \$90.19 and costs.

Mrs. Eustace Crees, wife of J. E. Crees, of Crees & Court, accompanied her daughter, Miss Maud, sailed for Europe, last Saturday, for a Summer trip through Italy, France and Switzerland.

Among the subscribers to the new municipal electrical floats in connection with the municipal election, July 5, are: J. A. Ward Co., \$50; Callender, McAuslan & Co., \$50; L. Dimond & Sons, Inc., \$50.

Work on the new factory building of the Metal Products Corporation, 101 and Thurber's Ave., is being pushed rapidly as possible. It is expected to be completed by the middle of July.

The transfer of real estate from the estate of Caesar Misch, Inc., to the plot of land and buildings on West Street, subject to a mortgage of \$100,000, has been placed on record at the City Hall.

The marriage of Albert Edward Kennedy with the Gorham Co., and Mrs. E. Kennedy, Woonsocket, is a new record for Providence, June 22. After a wedding trip to the coast, the couple will reside at their new home at Oakland Beach.

At the regular monthly meeting of the Rhode Island Society of Optometrists, Friday evening, one member was elected and three names added to the list. The society adjourned until the following Friday night in September.

William G. Lawton, foreman of the chasing departments of the Rhode Island Ring Co., was elected a member of the board of directors of the National Association of Gospel Missions at the annual convention, recently held at New York.

Among the foreign importations through the Providence Customhouse last week, were the following: From Germany, one package of manufactured metal; from Bremen, nine packages of imitation precious stones; from Holland, one package of imitation precious stones.

A complimentary review was received by Brig.-Gen. George A. Foster, retired, by Col. Tillinghast and staff, of the companies of the First District Cavalry Corps, Rhode Island National Guard, at the State armory. General Foster is associated with Thornton Bros. & Co.

The Chapin & Hollister Co. has leased a shop formerly occupied by E. S. the Manufacturers' building, 101 Eddy St., and added it to the plant, giving an extra square feet of floor space. The space is being fitted up for a new work which the firm is about to commence manufacturing.

The members of the commission on the Ben Memorial to Rhode Island soldiers who died during the North Carolina made an official inspection of the bronze figure for that monument at Cham Mfg. Co.'s plant, last week. The figure was accepted by the commission and will be immediately shipped to its destination.

Roll of the new Republican City of Providence includes the following, who are associated in manufacturing jewelry industry: Carr, First Ward; Walter Lloyd, Second Ward; Frank P. Eddy, Ernest F. Edw. L. Baker and Fred H. Sixth Ward, and Arthur W. Bar-Senth Ward.

B. Rogers Silver Co., Taunton, made the handsome silver cup to be used in the military contests in this State. St. Jean Baptiste cadets on St. Jay, June 24. The cup is to be presented to the Governor Pothier Cup in honor of Aram J. Pothier, of Rhode Island, a French Canadian to be elected a citizen in the United States.

Final drafts of a new constitution were read and discussed at a meeting of the Shepard Co. Emancipational Association, June 8. One of the principal features of the new constitution is the death benefit, a new proposition. Reports showed that more than 100 members have been added to the association in the last 10 days. Refreshments were served by the social committee during the evening.

Sty & Barton Employees' Mutual Association will hold its annual field outing, Friday, June 25, and nearly 100 employees of the concern, as well as many of the officials, will participate. Arrangements comprise a sail to Tiverton on a special steamer, where a shore lunch will be served, followed by games of various kinds, including a baseball game. There will also be dancing, and an orchestra will furnish music on the boat. The outing will be made by moonlight.

Annual outing of the employes of the Otis was held, June 12, at Emery Park, where 50 participating in the occasion. A special car was boarded immediately after the shop closed for the afternoon and upon the arrival of the party refreshments were served. During the afternoon a game with other sports and a picnic furnished ample amusement until the party returned to the city. The committee in charge consisted of W. H. Gay, Ernest Brown and Horace

Muller, Woonsocket, gave his application June 10, to the measure providing for the Hanlon & Thornton Co., manufacturers of jewelry, North Attleboro, shall be exempt from taxation for a period of 10 years. He imposed the provisions that the company shall pay a tax on any new property it may acquire, and that the company shall locate in Woonsocket within a year. His action was requested of the State by an inducement to help the Hanlon & Thornton Co. to remove its plant to Woonsocket.

As to the jewelry buyers who visited North Attleboro last week, the following were

noted: N. H. Billikin and Nathaniel Klopfer, of the Billstein Klopfer Co., Cleveland, O.; Gilbert Fruendlich, of the Baltimore Bargain House, Baltimore, Md.; M. L. Schwab, of Guthman, Solomon & Co., New York; Miss Henrietta Graf, of Berg Bros., New York; C. C. and E. F. Bogle, of Bogle Bros., White River Junction, Vt.; Thomas Lyons, of Calhoun, Robbins & Co., New York; S. S. Wylie, of S. S. Wylie & Co., Albany, N. Y.; M. and L. Robinson, of the Empire Jewelry Co., Pittsburg, Pa.

A short time before the steamer *Plymouth* got under way for New York, last Wednesday evening, a merry party of young men from Attleboro boarded it and sought the stateroom of Mr. and Mrs. Fred Evans Burden. The couple had been married only a few hours, and were ignorant of the fact that the folks in Attleboro were aware of the marriage. A porter knocked at the stateroom door, and when it was opened the Attleboro party hailed the newly married pair. Mr. Burden is associated with William A. Greene & Co., North Attleboro. He came to this city, on Wednesday, to meet Miss Rosamond Frances Barry, and they were married. They will reside at North Attleboro.

John Shepard, Jr., president of the Rhode Island Golf Association, has offered a sterling silver trophy for the winner of a championship match by members of the association. The trophy is a handsome example of the silversmith's art, and is valued at between \$400 and \$500. It is a centerpiece made by the International Silver Co., 20½ inches in length and 13 inches wide, in the form of a shell. A merman and mermaid reclining upon the seashore adorn one side, with breakers sweeping in graceful curves on to the body of the plate. On the other side, seashells and streamers of seaweed run across the plate. The edge of the piece is chased to represent the ragged edge of a comb dashed into spray by a high wind.

At the weekly meeting of the advisory board of the New England Manufacturing Jewelers' and Silversmiths' Association, held at the rooms of the association in the Wilcox building, Thursday afternoon, it was announced that the time of holding meetings would be at 12.15 instead of 2, as has been the custom for some time. Secretary Everett L. Spence, to whom was returned all responses to the circulars sent out to the manufacturers regarding the early closing and vacation period, reported the following as having signified their intention of closing their factories during the first week of July: B. A. Ballou & Co., Inc.; the Bassett Jewelry Co., C. H. Cooke Co., Fessenden & Co., Inc.; N. Barstow Co., Manchester Mfg. Co., Manchester-Smith Co., J. C. Doran & Sons, Modern Ring Co., T. F. McDermott Co., the White Stone Jewelry Co., Gilbreth Brown Co., Cory & Reynolds Co., A. & Z. Chain Co., Waite-Thresher Co., D. Wilcox & Co., Chapin & Hollister Co., P. & A. Linton Co., H. N. Pervear Co., and M. F. Williams & Co.

About \$400 worth of miscellaneous jewelry was stolen recently from the store of C. D. Maus, Creston, Ia., by burglars who gained entrance through a rear door.

Lancaster, Pa.

Henry Sobel is home from a trip to New York, where he spent a few days.

Reuben Fegley has opened a jewelry store on Main St., Mount Joy, Pa.

Dr. Holmes Boyd, of the Boyd Optical Co., has returned from a trip to Atlantic City.

Oscar M. Lowrie, a former Lancaster jeweler, recently visited Lancaster relatives.

Henry T. Kiehl, with Louis Weber & Son, spent a few days in Philadelphia, last week.

C. A. Fricker, Americus, Ga., was the guest, last week, of Charles D. Rood, of the Hamilton Watch Co.

Frank Dietz, lately at New Holland, Pa., has taken a position as watchmaker with Ezra F. Bowman's Sons.

Calvin M. Kendig, with the Hamilton Watch Co., was married, June 10, to Miss Blanche Fridy, Mountville, Pa.

Charles Wilson has gone to Virginia to spend a two weeks' vacation, and will be most of the time on an outing in the Blue Ridge Mountains.

F. A. Wheeler, of the Non-Retailing Co., has returned to the Southern territory, with headquarters in Atlanta, Ga., which he has lately taken over in addition to his regular territory.

Among the jewelers who called on the local trade, last week, were: C. E. Hinkle, Ephrata, Pa.; Jules Beetem, Alleghany; Cyrus Foxhall, Memphis; Girard Paulsen, Atlanta, Ga.; and Philip Duckman, Chicago.

Howard Keagy, son of John Keagy, Hollidaysburg, Pa., formerly a student of the local technical school, but now with the Bailey, Banks & Biddle Co., Philadelphia, recently spent a few days among Lancaster friends.

A novelty in the clock line has been installed in the Centre Square waiting room of the Conestoga Traction Co. It gives 15 minutes' notice of the time of departure of every car, and indicates the time when the car is about to leave.

E. W. Buckingham, of the firm of Buckingham & Phippin, Lynchburg, Va., stopped over here a few days, last week, to see friends, en route home from a trip to New York. He stated that his firm is putting in a new front to their establishment and remodeling the interior.

A few days ago, a veritable mine of information was found in the back of an old mantel clock in possession of Mulford Tausig, in the shape of papers and records of the date 1830. The clock, which is in a perfect state of preservation, being still an excellent timepiece, was made by Jared Pritchard, Waterbury, Conn. The works, of apple wood, soaked with oil, are hard as bone.

John Lindsay, Johnstown, Pa., a student of the Ezra F. Bowman Technical School, has gone to Philadelphia with a view to locating there. Laban Funk, Waynesboro, Pa., has entered the school as a student. Birdsey Sniffin, Sandy Hook, Conn., a student, has returned from a visit to that town. Ralph E. Kirkpatrick, Butler, Pa., has returned from a trip to his home town, where he went to be initiated into the Masonic fraternity.

Attleboro.

Walter Hopkins has returned from a short trip in the interests of C. H. Eden & Co.

G. Percy Clap is calling on the New York State trade for the Daggett & Clap Co.

George L. Shepardson and Louis Jones, of C. A. Marsh & Co., were in New York last week.

Fred Dobra was in New York, last week, calling on the trade in the interests of Dobra Bros.

Charles Crane, of Bliss Bros., is making a 10 days' trip through the west in the interests of his concern.

J. A. Cunningham, western salesman for Regnell, Bigney & Co., is in Chicago, after making a west and northwest trip.

The W. H. Saart Co., this city, is the only concern thus far in the Attleboros which has consented to the closing of its factory the first week in July.

Harold Sweet has formally presented the silver loving cup which is to be given to the high school team in the Bristol High School League to the Attleboro high school.

The outing of the Watson & Newell Co. employes, this year, will be held at Boyden Heights. The exact date has not been determined, but it will be some time after the annual vacation of the shop, which comes June 26, for two weeks.

The Hansen-Bennett Co., which has been located in the Bigney building on County St., will move from these quarters in the near future. It was stated at the office, last week, that plans for their new quarters could not be given out yet.

Herman T. Regnell, formerly of Regnell, Bigney & Co., was pleasantly surprised at his home, last Wednesday evening, by the Young Men's Sunday Evening Club of the Congregational Church, and presented with a remembrance. Mr. Regnell left, Thursday, for Oregon.

Harvey Clap, president of the Daggett & Clap Co., and who is a fond lover of fast horses, has placed his string of horses under the charge of Trainer Frank Hayden, who will race them, the first part of the season, in the Provinces. Among the fastest ones are El Galo, with a mark of 2:16, and Aley Bell, 2:20 $\frac{1}{4}$.

The sum of \$50,000 has been subscribed to keep the Frank M. Mossberg Co. in Attleboro. A company to be known as the Attleboro Land Co. has been organized with the following officers: John M. Fisher, president; David L. Low, clerk; Joseph L. Sweet, Clarence L. Watson, Edward A. Sweeney, S. O. Bigney and David L. Low, trustees. The trustees will have charge of selecting a site and erecting the building. Mr. Mossberg has expressed himself as well satisfied with the plans of the company.

Henry Richardson and N. J. Smith, members of the firm of Smith & Richardson, whose plant was badly gutted by fire, early last week, lost no time in the completion of plans for the resumption of their business. It was but a few hours after the blaze when the firm arranged for quarters in one of the other Robinson shops, and in several days had resumed shipping. Their quickness in resuming business was a fine

example of hustle and energy. The loss to the Smith & Richardson firm alone is estimated at \$6,000. The other concerns who were damaged by water have all resumed work, being compelled to be closed but a few days. The owners intend to rush the repairs on the upper story.

The Attleboro Y. M. C. A. is to have a new building, which will be provided for by Mrs. William C. Tappan as a memorial to her husband, the late William C. Tappan, who was one of the most prominent manufacturing jewelers and business men in town. The news of the offer was received by General Secretary Charles F. Coykendale, last week. Detail plans for the building are not ready yet, but it is said that the structure will cost between \$50,000 and \$60,000. The building will be equipped with all modern conveniences, and will have parlors, reading room, reception hall, offices, banquet room, swimming pool and bowling alleys, and will be open to the boys of Attleboro and vicinity. It is the first time in the history of Attleboro that a building of this size has been presented as a memorial. Mrs. Tappan is receiving the hearty praise of the entire town for her generous act.

North Attleboro.

F. H. Cutler was in New York, last week.

Curtis Reed returned, last week, from a trip in the interests of the H. F. Barrows Co.

G. Herbert French has returned from a western trip in the interests of his concern.

Harry Bennett has returned from Louisville, Ky., where he attended the Shriners' convention.

Daniel M. Chisholm left, last week, for a short trip in the interests of the Bugbee & Niles Co.

Henry H. Curtis spent a few days in New York, last week, in the interests of his concern.

Louis D. Barrows and Herbert J. Straker spent a few days, last week, at the Cape on a fishing trip.

James Baker, western salesman for F. M. Whiting & Co., left, Tuesday night, for a trip to the Pacific Coast.

Mr. Shattuek, formerly representative for Riley & French, has taken a position with Ford & Carpenter, Providence.

Oscar Hornig has returned from a trip through New York, where he went in the interests of Coddling & Heilborn Co.

Charles T. Paye, of the Paye & Baker Mfg. Co., is receiving congratulations over the arrival of a son at his household.

Thomas Bride, a former resident of this town, has taken a position as traveling salesman for a Taunton silver house.

Harry Peckham has returned home from New York, where he passed a few days at the office of J. H. Peckham & Co.

J. J. Sommer enjoyed a short vacation at the Cape the latter part of last week. He has rented a Summer cottage at Falmouth.

N. Park Shedd has been engaged by the Paye & Baker Mfg. Co. to cover the eastern circuit. For the past few years he has been with E. A. Fargo & Co.

Word was received, last week, that J. P. Benjamin, salesman for Boss & Baldwin, was taken sick at Rochester and was obliged

to return to his home in New York. The E. I. Franklin Co. found it necessary to go on a 13-hour schedule, last week, in order to fill the orders which were in.

The local manufacturing jewelers rejoiced to receive word, last week, that Senator Aldrich had succeeded in substituting the paragraph framed by the tariff committee of the New England Manufacturing Jewelers' and Silversmiths' Association for the schedule in the Payne bill.

Frederick E. Burden and Miss Barry, both of this town, were married in Providence, last Wednesday evening, by Rev. Alexander Mitchell. The groom was until recently, manager of the A. V. Greene Co., Providence. After a short vacation, Mr. and Mrs. Burden will reside in this town.

In the presence of only relatives and immediate friends, Frank Lee Baker, manager of the Paye & Baker Mfg. Co., this city, was married in Providence, last Sunday, to Miss Edna Harris Ingraham Popham, Me. The ceremony took place at the home of Colonel and Mrs. Zerk Bliss in Edgewood. Mr. and Mrs. Baker, upon returning from a two weeks' western trip, will reside in North Attleboro.

To be 40 years in the employment of the same concern is a record of which J. Brennan, of this town, is justly proud. Brennan commenced his duties with Blackinton & Co., when it was doing business in the old wooden building in Falls, on Mount Hope St., where some of the older firms of this town had their first origin. At that time Roswell Blackinton and Walter Ballou conducted the business under a partnership. During 41 years the firm has grown until it is one of the largest in town.

Canada Notes.

The death of R. J. Agnew, Montreal, Ont., is announced.

H. B. Haddard, Nicola, B. C., has moved to Mission, B. C.

A. Graham, with the Goldsmiths' Co., Toronto, Ont., returned, last week, from a purchasing trip to New York.

Out-of-town jewelers calling on the Toronto trade, last week, included A. May, Cannington; W. F. McCarty, Missay, Ont., and L. H. Doll, Calgary, Alberta.

L. Herbert Luke, of Ambrose & K. Sons, Toronto, Ont., has returned from attending the Michigan State Conclave Order of Knights Templar, held at Detroit, on Tuesday and Wednesday last week.

A few days since a stranger, a blackman at Belleville, Ont., a ring with a diamond valued at \$125 cents. The ring has since been identified as one recently stolen from the office of J. S. Gill, Sudbury, Ont.

McCartney & Burke, Fort William, have removed from their former store, 119 May St., to a new store in the building, Victoria Ave., which is among the largest in Canada, of Toronto and Montreal. It has 1000 feet of floor space and the front features are of quarter-cut oak. They have installed a very stock.

Western Office:

The Time Marking Machine Co. has been incorporated in Illinois with a capital of \$20,000. The incorporators are Jacob Levin, Walter J. Spangler and Hugo M. Friend.
Mr. and Mrs. S. T. A. Loftis are on a month's visit to Glenwood Springs, Colo. After their stay there is completed, Mrs. Loftis will visit her relatives in California.
Checks have been mailed to the creditors of Nachman, Barr & Heinen on a basis of a 25 per cent. settlement. The concern did a small jobbing business in the Medimeh Temple.
Detectives were sent to Pittsburg, Pa., last week, to bring back Frank P. Cheney, accused of recently swindling E. Kirchberg, the State St. jeweler, of a diamond ring valued at \$200.
John Hicks, John O'Brien and Chester Barker were arrested, last week, suspected of being implicated in many robberies. Barker, the police say, is wanted in Clevel-

land, O., for the theft of a tray of diamonds.
Specht, McNeff Co. is the title of a new wholesale jewelry and silverware firm in room 506, Chicago Savings Bank building. The firm is composed of Leonard Specht and Hugh McNeff.
Axel J. Nelson & Bro., 1725 Lincoln Ave., will remove, July 1, to the corner of Lincoln Ave. and Irving Park Boulevard, where they will have a much finer store than the present one.
"Sam" Amberg has given up the line of the Rochester Cut Glass Co. and now represents the Rhode Island Ring Co. in Chicago and the west, with headquarters in room 806 Heyworth building.
John H. Mather, Chicago manager for the Geo. H. Fuller & Son Co., is on a trip to Europe, accompanied by his wife. "Billy" Lamb, with the same corporation is on a visit to the factory at Pawtucket, R. I.
Berman & Stein have bought the jewelry business at 178 N. Clark St., formerly conducted by Applebaum & Clark. The latter will devote their time to their five-cent theatre enterprises, of which they own two.
Rudolph Newman, retail jeweler at 4825 S. Ashland Ave., is on a four months' trip to Bohemia, where he will visit Carlsbad, and where he will also invest some money in Bohemian garnets, which he will bring back with him.
In an article in these columns, last week, regarding the trade extension plans of the Chicago Jewelers' Association, it was stated that the number of retail jewelers tributary to Chicago was 1,500. This was an error. The number should have been 15,000.
Paul W. Serwich, with Wm. A. Rogers, Ltd., accompanied by his wife, is on a trip to Niagara Falls and eastern Summer resorts. On their way home Mr. and Mrs. Serwich will stop at Pittsburg to attend the wedding of a cousin of Mrs. Serwich's.
Wholesale optical men visiting here, last week, were: Albert Wells, of the American Optical Co., Southbridge, Mass.; William K. Helmbold, with the National Optical Co., Philadelphia, Pa., and Frank Waugh, with the E. Kirstein's Sons Co., Rochester, N. Y.
Detectives have been searching here for a watch which was stolen from Dr. John T. Binkley, Sr., who was supposed to have been murdered in the Wellington hotel here, recently. A description from Jeweler A. G. Kleinlein, Evansville, Ind., is as follows: Waltham movement No. 10,171,219, open

face, 12 size, 15 jewels. Case, gold filled, open face, No. 1,424,375.

Leon Carrau, of Carrau & Greene, San Francisco, Cal., who is in Europe with his wife and son, will sail for America, June 18. His two daughters will cross the continent to meet their parents and brother, and will stop here on their way east as the guests of Mr. and Mrs. J. A. Limbach.

D. W. Wiser, for 18 years with Heintz Bros., who retired three years ago to take care of his real estate interests in the north-west will be married this month to Miss Winifred Daemicke at the residence of the bride's parents, 3300 Rhodes Ave. After a wedding trip west Mr. and Mrs. Wiser will live in Woodlawn.

Among the buyers in town, last week, were: Fred Steek, Washington, Ia.; M. E. Schmidt, of Gmelich & Schmidt, Boonville, Mo.; Carl Oesterle, Joliet, Ill.; Geo. Winterhalter, of the Towle-Winterhalter-Hannafin Co., Butte, Mont.; Samuel O. Adams, Polo, Ill.; B. F. Spencer, Remington, Ind.; Miss Gala Melass, Stoughton, Wis.; Lee F. Dresser, Michigan City, Ind.; A. Siegel, Grand Rapids, Mich.; W. L. Ballou, Me nominee, Mich.; William M. Axe, Capron, Ill.; Glenn R. Farley, Lake City, Ia.; Adam H. Bolender, Rockford, Ill.; John Sievers, Hebron, Ind.; R. E. Lincoln, Plano, Ill.; R. C. Kiep, Joliet, Ill.; Carl B. Durbin, Peru, Ind.; J. E. Snobble, South Haven, Mich.; E. J. Steuerwald, Two Harbors, Minn.; A. O. Wold, Langdon, N. D.; F. H. Krebs, Waukegan, Ill.

Detroit.

U. B. Williams and wife, Lowell, visited this city last week.

W. E. Skinner, Milford, was a purchaser in this market recently.

S. W. Williams, Lapeer, was in the city, last week, to purchase stock.

Chas. F. Bay, Milan, came into this city, a few days ago, on a buying trip.

G. W. French will shortly conduct an auction at his Detroit store, 39 Michigan Ave.

Wright, Kay & Co. have had on exhibition, recently, the City of Detroit trophy for the Glidden Automobile Tour, soon to take place.

A. J. Jean, Sault Ste. Marie, has been spending some time in Detroit, and incidentally purchased a bill of goods for his Fall stock.

F. N. Pauli has moved to a new store in Pontiac. His new location is an excellent one, and he is confident of better results from the change.

Ward Switzer, of the firm of Switzer Bros., which has stores at Mt. Clemens and Ypsilanti, purchased a considerable amount of stock at the wholesale stores, last week.

Two expert adjusters of the Waltham Watch Co. have been visiting the local trade, recently, their mission being to remedy some difficulties due to oil in the new watches.

Thomas Comerford, president of the Detroit Jewelers' Board of Trade, was initiated into the Noble Order of Ku Kus at the June meeting, Tuesday night of last week. A supper followed the meeting.

The monthly meeting of the Jewelers' Board of Trade was postponed this month

to the 18th, instead of being held on the first Friday of the month, as has been the custom. Mayor Wigle of Windsor has been invited to speak.

D. B. Bancroft, watchmaker, 118 Broadway, was overcome with heart trouble, recently, but recovered. His friend, R. B. Watson, was also overcome with the same trouble while assisting Mr. Bancroft, and both had to be removed to their homes in an ambulance.

W. F. King, Sr., Adrian, was here, last week, to take part in the conclave of the Knights Templar, of which order he is an honored member. A. B. Wooten, Bellaire, and Mr. Edwards, Carleton, are other jewelers who were here in attendance on the Grand Commandery meeting.

Mayor Breitmeyer transmitted to the Council, last week, the communication from the Detroit Jewelers' Board of Trade, petitioning that the auctioneers' ordinance be amended as to its bonding feature, so that it may be enforced. The Mayor added his recommendation that this be done, and the matter went to the Council Committee on Ordinances.

By July 1 the Grainger-Hannan Co. expects to be in its new store at Woodward Ave. and John R. St., directly across the street from its present location, where it will occupy the first floor, basement and one upper floor. Extensive alterations have been made in the building, and the plans call for a beautiful shop modeled after the Gorham shop at New York.

Traub Bros., 118 Woodward Ave., have been exhibiting the Detroit trophy, which is to be contested for at the Milwaukee Skat Tourney of the North American Skat Verband, June 19, 20 and 21. Detroit skat players are working hard to secure the national tourney for next year, and their trophy is one calculated to attract attention. It is a heavy silver punch bowl, engraved with a grape leaf design, and resting upon a heavy chased silver plate.

Cleveland.

TRADE CONDITIONS.

The market during the past week has shown a healthier appearance than at any time this Spring. Wholesale business is very good and retail trade has shown a steady improvement for the past 10 days. Diamonds are in demand and the usual run of wedding and commencement gifts is swelling the volume of business to a respectable figure. This improvement is entirely outside any effect the exposition may have on local trade conditions.

L. F. Boyer was in Detroit last week.

Conrad Bremner and family, Youngstown, were in town this week.

Walter Miller, of the Bowler & Burdick Co., starts on a two-weeks' vacation Monday.

Capt. R. E. Burdick was called to New York Friday by the serious illness of his grandchild.

E. F. Mallet, Windham, O., who was formerly with the Sigler Bros. Co., was in town Friday.

C. J. Probeck & Co., distributors of phonographs and supplies, have put in a line of cut glass and will job the same in northern Ohio.

Samuel Tronstein, diamond merchant in the Republic building, has on exhibition in his reception room, in a prominent place,

a plaster statue of a colored gentleman in gaudy raiment, solemnly perusing the umms of THE JEWELERS' CIRCULAR WEEKLY.

The Lewis Jewelry Co. has shown an enterprising spirit by posting signs in conspicuous places on Bond St., the entrance to the exposition.

Mrs. A. E. Knight, wife of the jeweler and optician on Hough Ave., near South Ludington, Mich.

Frank Smith, who has been in the manufacturing department of the Sigler Co. for about five years, is now with Cowell & Hubbard Co.

The following out-of-town dealers among the visitors this week: A. H. man, Massillon, O.; Geo. High, Akron; A. J. Miller, Massillon; Gardner, Newton Falls; A. H. Sigler, land; A. P. Humphreys, Bellefontaine; A. Moore, Akron; Harry Downs, Bellefontaine; W. H. Dueble, Canton; J. C. McCaughrin Falls; F. N. Prevey, Akron; D. Pierce, Garrettsville, and J. D. Akron.

The Scribner & Lochr Co. is offering a competitive cup which the wife of a team of Johnny and Emma Ray won sent to the Cleveland Base Ball League. Mr. Ray, since being elected president of the league, has shown a great interest, and this beautiful cup is a memorial of his regard for the league. The cup is sterling silver and stands 10 inches high from the pedestal and 8 inches in diameter at the rim. The "Competitive trophy," presented to the Cleveland Base Ball League by the team of Johnny and Emma" appears on the sides of the cup.

The Cleveland Exposition is attracting immense crowds to this city, and jewelers and wholesalers are drawing merchants from the surrounding territory. They are the greater part of the visitors to the rigid rules adopted by the exhibition Committee, which requires that articles displayed be manufactured in the city and merely assembling in Cleveland were barred, and this rule worked to the manufacturing jewelers more to the disadvantage of the other line. However, the wholesaler is getting the benefit of the influx of visitors by putting in attractive displays in their own stores. The exposition opened Monday night on time, with every one of the 283 exhibits in place. Without doubt it is the largest exposition of home products ever held in this country. Independent Chas. F. Brush of the Chan Commerece formally opened the exposition and simultaneously three miles of town streets were lighted by special illumination. Every arc light down town was encased in an immense Japanese lantern. Over 15,000 people were present opening, crowding the buildings to their capacity. The jewelry and knife departments are on the west balcony of the building, and include the exhibits of Scribner & Lochr Co., Webb & Watch Co., American Fine Detrol, Nickalson Ship Log Co and American Glass Co.

Indianapolis.

F. L. Bryant recently moved into a new home in the northern part of the city. George S. Kern attended the Imperial Council of the Mystic Shrine, at Louisville, last week. W. B. Patty has arrived from Homer, to take a position with George S. Kern's watchmaker. I. Schergens was called to Tell City, Friday, by the death of his mother, Catherine Schergens. Burton Jewelry Co. has opened a store at Kokomo. F. J. Garrett has been in charge as manager. George F. Beach, Valparaiso, recently moved into a new building, which has been nicely furnished and equipped. An eastern trip is being made by I. Kern, who was in New York City, last week. He will be in Providence, R. I., next week. W. Streng, who recently went through bankruptcy proceedings, has opened a store at 500 Massachusetts Ave. He is merely in business at 5 W. Market

Partlow, who recently opened the Jewelry Co. store in Massachusetts, has gone to Seattle, Wash., to open a jewelry and souvenir store on the waterfront grounds. Several jewelers were in the city last week. Those seen on the market were: W. H. Cluff, Richmond; J. W. Hindson, Richmond; H. S. Murphy, Newcastle, and W. J. Adick, Newman, Ill. W. Myers, for some time in business in Boston, has sold out to H. H. Bowman. Mr. Bowman has moved from Remington and combined with the Brookston store. R. Bernloeff will go to Europe soon for the Summer and will also buy diamonds away. J. C. Sipe, diamond merchant, will go to Amsterdam, July 10, to purchase a stock of diamonds from the

Inspection of the Indianapolis Water Commission was made, last week, by C. A. Adams, a jeweler and mayor of Warsaw. Adams also discussed the water conditions in Warsaw with the State Board of Health. Members of the Indianapolis Merchants Association attended the annual picnic of the association, at Highland Glens, last week. The day was spent in playing baseball and other sports. An elaborate dinner was served. E. Reagan, manager of the Baldwin Co., attended the annual convention of the National Wholesale Jewelers' Association, at Philadelphia, last week. He will visit New York, Providence, R. I., and Lehigh, before returning home, next week. The Marion County Board of Review is now fixing valuations for taxation. So far the valuation of Chris. Adams & Bro. has been fixed at \$3,000, and Baldwin-Miller Co. at \$28,790, in both instances an increase of \$490 having been made. Other jewelers will be called on by the Board later. The Indianapolis Retail Jewelers' Association will hold a meeting in the Palm Room

of the Clayton Hotel, last Monday night, to discuss the tariff bill pending before Congress. The meeting was called because of a letter from Senator Beveridge, stating that J. P. Archibald, president of the National Retail Jewelers' Association, had told him 95 per cent. of the jewelers of the country were in favor of the tariff bill pertaining to watches. Senator Beveridge said he wished to learn more fully the sentiment of Indiana jewelers on the subject. There is a sentiment among local jewelers that the provision requiring the imprint of the name of the manufacturer, country and number of jewels on the dial is wrong and would shut out Swiss watches, for which they say there is considerable demand. After considerable discussion it was decided that the association should not take action as a body, but that each jeweler should write to Senator Beveridge, stating his individual opinion.

Milwaukee.

David Goldman made a recent business trip to Chicago. Charles Kuesel, of the Kuesel Bros. Co., has returned from an extensive trip on the road, and is now located in the home offices for a time. J. H. Gorham has purchased the business of Louis Bauer, at Medford, and will take charge at once. Mr. Bauer has not as yet announced his future plans. Among the out-of-town jewelers who called upon the Milwaukee trade recently were: William Calkins, Waukesha; F. H. Coburn, East Troy; F. P. Beswick, Racine, and John Armbruster, Cedarburg. The regular monthly meeting and dinner of the Milwaukee Jewelers' Club was held, June 9, at the Blatz Hotel, when arrangements were made for the annual meeting of the Wisconsin Retail Jewelers' Association, July 20, 21 and 22. Harry Martin, of Green County, a well-known pearl gatherer, is busy on the Clam river near Chippewa Falls. Mr. Martin has hunted pearls in Wisconsin for the past 20 years, and has been very successful. In 1905 he found one weighing 68 grains.

Nelson & Anderson, Neenah, are displaying a handsome diamond ring which will be presented to the carnival queen on June 24, when the firemen's street fair and carnival will be held. Citizens are now voting to select the young lady for the honor. Samuel W. Klass, Oconto, is enlarging his store by the erection of an addition 20 by 28 feet. The interior of the establishment will be thoroughly remodeled, and Mr. Klass expects to install a complete line of new fixtures in the near future. The jewelry stock will be enlarged, and the store will be one of the finest north of Milwaukee. The committee of the Wisconsin Retail Jewelers' Association for the examination of watchmakers has completed the series of questions which will be submitted to candidates, and it is expected that the list will be forwarded to jewelers at once. Considerable interest has been taken in the movement by jewelers all over the State, and indications are that the plan will be entirely successful.

David Goldman, proprietor of two retail stores in this city, has moved his wholesale business from Chicago to Milwaukee, where it has been located in the Caswell block, the location of Mr. Goldman's new downtown retail store. The change was made in order that Mr. Goldman might give his personal supervision to the business. Herman Shapiro, who had charge of the business at Chicago, is still managing it.

Gustave Keller, Appleton, president of the Wisconsin Retail Jewelers' Association, has been elected a delegate to the international convention of the Catholic Order of Foresters, to be held at Montreal, Can., in August. The Wisconsin delegation will seek to have Mr. Keller elected secretary of the national organization, and a movement to launch his candidacy for the important place has been given plenty of support.

W. H. Warnke, of W. H. Warnke & Co., and Louis Kuesel, of Kuesel Bros. Co., are on the annual trip of the Merchants' and Manufacturers' Association of Milwaukee, an organization of which both are prominent members. This year's junket is being made to Michigan, and includes a trip by boat from Milwaukee to Ludington, Mich., thence by rail down the western coast of Michigan. Both Mr. Warnke and Mr. Kuesel are calling on the jewelry trade en route.

Three hundred jewelers are expected to attend the annual convention of the Wisconsin Retail Jewelers' Association, which will be held in Milwaukee, July 20, 21 and 22. The entertainment committee appointed at the recent meeting of the Milwaukee Jewelers' Club to receive the convention visitors included Charles Kuesel, E. Maas, W. J. Bozzhardt, O. Bingenheimer, J. Krieger, A. Hoffman, B. Thien, A. Hentschie, J. Meacham, H. Zwengel, F. Buege, George De House and Mmes. W. H. Noyes, H. Stouthamer, E. F. Rohn, H. F. Stecher, A. J. Stecher, A. J. Stoessel, F. Wilde and F. Thompson. The St. Charles Hotel will be the headquarters of the convention.

New Orleans, La.

David Goldstein will remove to a new store on St. Charles St. Leonard Krower was a recent visitor in New York, attending the convention of the National Wholesale Jewelers' Association. Chas. Greenberg & Co., formerly in the Morris building, has rented quarters in the A. M. Hill store, and has equipped it with new fixtures, etc. Louis Haussman was in attendance at the annual session of the Mystic Shriners at Louisville, Ky. Gabe Haussman will sail for Europe, Aug. 1. E. J. Garsia and M. Dorenfield, representing Leonard Krower, sailed June 6 for Porto Rico and other West Indian points, looking after the trade in that section. Coleman E. Adler is preparing to open his magnificent store on Canal St. The first floor will be entirely devoted to jewelry, while the top floor, reached by elevator, will be given over to art and silverware. He is also putting up a building in rear of the store which will be used for manufacturing purposes.

Cincinnati.

John Gerwe, of Frohman & Co., is the proud father of a new baby boy.

E. Richter, of Richter & Phillips, enjoyed the past week with the Shriners at Louisville, Ky.

Arthur Motch, Covington, Ky., is arranging to leave soon on a two or three-months' tour in Europe.

"Nate" Hahn, of Lindenberg, Strauss & Co., has left on a pleasure trip, including the Great Lakes and Canada.

A. Herman, Lec Loeb and Mayo Loeb, of Herman & Loeb, have started on their respective trips south and west.

H. I. Jacobson, of A. & J. Plant, has departed on a two months' business trip among his southern customers.

Harry Schmidt, of Thoma Bros., and Charles Reinstaller, Central Ave., are making a short sojourn at Bond's Ferry.

Col. Sol. Gilsey, of S. & H. Gilsey, has returned from Chicago, where he was negotiating for a large piece of property.

Mr. Sickles, secretary for the Eastwood-Park Co., stopped here on his trip west, which will run as far as the Pacific slope.

Harry Roth, of Lindner & Co., and Miss Mary Baur, of Price Hill, will be married, June 16, in the St. Lawrence Church, Price Hill.

Frank Westhoff, of the Oskamp-Nolting Co., was in New York attending the National Bowling Tournament, held there recently.

Joseph Noterman, of Joseph Noterman & Co., and his wife spent last week in Louisville, Ky., attending the Shriners' conclave.

C. F. J. Bene, formerly of Bene, Lindenberg & Co., will leave, July 15, on the *Prinz Frederick Wilhelm* for Europe, where he will stay about two months.

R. A. Vaupel, of the M. Schwab Jewelry Co., was called to Nashville, Tenn., on account of the serious illness of his mother, Mrs. Christina Vaupel, who died later.

The local jobbing trade feels gratified that A. G. Schwab of this city was elected president of the National Wholesale Jewelers' Association, at its annual convention in New York, Thursday.

The Clemens Oskamp Co. has put up one of the \$1,000 McClintock & Loomis street chime clocks. Only one of these clocks is allowed to be placed in each large city and two in the largest cities, such as New York.

C. F. Schmidt, of Thoma Bros., and Miss Catherine Varmohr, of this city, will be married, June 23, and will spend their honeymoon in Yellowstone Park. Harry Dieters, of the above house, and family leave this week for a two-weeks' stay in Boston, Mass.

Out-of-town jewelers here, the past week, buying stock included: Andrew Anian and A. Wahlrab, Dayton, O.; Herman Smith and wife, Parkersburg, W. Va.; E. K. Maas, Atlanta, Ga.; George Hornburger, Lawrenceburg, Ind.; Chris Hewig, Evansville, Ind.; C. G. Schlenker, Eaton, O.; W. L. Beleher, Lumber City, Ga.

Fox Bros & Co., on the strength of the improvement in the diamond business, have enlarged their diamond-cutting plant, put in new machinery and a new force of 25

diamond cutters. They have just received a large shipment of rough diamonds direct from the London syndicate, purchased by Burton Fox, of the above firm, who has been in Europe the past two months buying goods.

Lillie Carroll, who sued Edward Simper, Dec. 1, 1904, for \$2,500 damages, has been given a verdict by the Circuit Court for \$300. The trial jury some time ago granted a verdict for \$500, but the case went on appeal to the Circuit Court, which handed down a decision, June 9, finding no error, but holding that in the absence of malice the verdict was excessive and reduced it to \$300. It will be remembered that a young woman is said to have called at Mr. Simper's store on Vine St. to look at rings. While she was looking, Mr. Simper missed one from the tray and made the remark that one was missing. The woman took the remark to herself and became very indignant. Mr. Simper says he tried to explain that he had not accused her at all, but did not know what had become of the ring. The woman, after sending for a girl friend, insisted so on being searched that she was taken to the House of Detention, where a search was made. No ring could be found, and the suit then followed.

Kansas City.

W. T. Peters, Eureka, Kans., has purchased a new automobile.

H. J. Norton, of the C. B. Norton Jewelry Co., is on the jury this week.

C. B. Norton, of the C. B. Norton Jewelry Co., is on a trip to New York.

George Taylor, with the Woodstock-Hoefler Watch & Jewelry Co., is in from the road for a few weeks.

Robert Smart, a jeweler and stone setter, has been added to the regular force of the Hassig Jewelry Co.

Leslie White, with D. B. Ward & Co., is spending his vacation visiting relatives in northeast Missouri.

L. Meyer, president of the Meyer Jewelry Co., has just returned from a short visit to Chanute, Kans.

Wm. J. Ward, 703 31st St., is to leave the city, early in July, to take a long vacation for the benefit of his health.

T. S. Terry, who sold his retail jewelry store in Downs, Kans., some months ago, is opening a new store in Nevada, Mo.

E. B. Wiser, of the Porter & Wiser Jewelry Co., leaves, July 3, for a combined business and pleasure trip to New York.

Chas. A. Ball, for a number of years in the retail jewelry business in Hennessey, Okla., is now located at Pomeroy, Wash.

C. I. Lee, Kansas City, Kans., is very anxious over the condition of his wife, who was stricken with paralysis a few days ago.

Otto Knaul, with the Woodstock-Hoefler Watch & Jewelry Co., is just moving into a new home which he has erected in this city.

Frauk Bangs and J. H. Whitney, with the Edwards & Sloane Jewelry Co., left, last week, for a vacation trip to Estes Park, Colo.

W. B. Hamilton has been doing some buying in this market for a new jewelry store which he is just opening in Hobart, Okla.

E. L. McDowell, Arkansas City, Kans., and wife, passed through this city, last

week, on their way home from a vacation.

John B. Dickey, Newton, Kans., returned from a trip to western Kansas, where he closed several important real estate deals.

A. J. Carruth, Herington, Kans., has been in the city several days. He recently returned home after a trip of several months in California for the benefit of his health.

Bustard & Cook have been succeeded in the jewelry business in Frederick by Gilpin & Cook. Mr. Bustard will continue with the new firm as watchmaker.

Word came to this city that Jos. Willeke, daughter of Jos. Willeke, a time retail jeweler of Springfield, is to be married, June 24, to F. W. Wasey.

George Tanner, who was formerly of the Harris-Goar Mfg Co., and has been in the Indiana building, is to open a store in one of the stories of the Argyle building.

George H. Edwards, of the F. W. Sloane Jewelry Co., and wife, who have been in New York attending to some of the jewelry jobbers, will stop at Kansas City and other points of interest on the home.

J. M. Scott, of the Woodstock Watch & Jewelry Co., is taking his vacation, and is spending the time on a trip in the neighborhood of New York. Next week Chas. Thistle, of the same firm, will visit the same section.

S. H. Horner and wife are in the city this week. Mr. Horner was formerly in the retail jewelry business in Chicago, Kans., and was in the wholesale business in New York for several years. He is now located at El Reno, Okla.

Lon. Williams, Wichita, Kans., accompanied by his wife and daughter, through the city, last week, on their way to Annapolis, Md., where they will attend the graduation exercises, as the son of the family is finishing his course in the Annapolis Academy.

The following jewelers from the surrounding country called on the trade in this city during the past week: Leonard of J. A. Mosher & Son, Burlington, Mo.; T. S. Terry, Downs, Kans.; M. L. of the M. L. Bishop Jewelry Co., More, Okla.; Reuben Goodh. In. borg, Kans.; A. F. Woolson, Hute, Kans.; I. E. Pettitt, Downs, Kans.; Huey, Excelsior Springs, Mo.; R. L. ney, Esbon, Kans.; F. E. Pirt, Grove, Kans.; E. L. McDowell, A. City, Kans.; J. O. Van Voorhies, O. mie, Kans.; W. A. Kirkham, Leave, Kans.; Sam Friedberg, Topeka, Ka.; B. Van Ness, Monnd City, Kans.; Stott, Paola, Kans., and F. W. Swe, Topeka, Kans.

S. M. Snider, Durham, N. C., has succeeded by Snider, Umstead Co., company has taken over the business of Mahler's Sons, of that place.

W. G. Shane, Chisholm, Minn., is to leave with his family for Grand Rapids, Mich., where he will continue his business. Mr. Shane has disposed of his interest in Chisholm to Tripp & Klass, of Minneapolis.

Los Angeles.

I. Kinney, 607 S. Spring St., is the father of a new baby.

Wisbaum, Hanford, Cal., has been in a short time in this city.

Schwarzkopf has gone on a business trip to Honolulu, taking with him all the lines.

Wholesale now close at one o'clock today, and will continue to do so June, July and August.

B. Cohn, of the Government Office, Main St., and Miss Delphine Curtis, will be married June 23.

Stirling, of the material department of the E. W. Reynolds Co., has not among the firm's customers on

G. Stone, 330 S. Broadway, who is an expert in art, has just completed a painting, which he has given the name "The Tired Model."

Two town jewelers in this city, re-elected: J. L. Foote, Fullerton; J. H. Alden, Anaheim; E. H. Smith and J. H. Orange; Geo. F. Schaal, Wins-

inger, manager of the jewelry department in Hamburger's store, has gone on a buying trip, to be gone about six weeks. Mr. Homer, his assistant, is in charge during his absence.

J. Penniman has returned from Hot Springs, where he went to recuperate, after suffering an injury in an automobile accident. He still walks with a cane and expects to start soon on a business

trip. The jewelry department of Hamburger's store has been moved to a central position on the first floor. It now covers a space of 700 square feet and contains nearly 100 display showcases. All departments are now in contact from one another.

I. Kinney, who recently won a suit against the Maryland Casualty Co. for the first time by him through burglary, nearly a year ago, has learned that the company is trying to secure a new trial. Failure to do so, it will appeal to a higher court.

B. Bailey, whose stock was recently destroyed by fire, is still doing business in limited conditions in rooms on the second floor of the Grant building, above the Perry Bros.' store. A settlement with the insurance company has not yet been effected.

J. Kinney, who has acted as traveling salesman some time past for the J. P. Traflet Co., has resigned his position on account of ill health. On two different occasions he has been taken seriously sick on the road, and has decided now to rest and recuperate.

L. Gruber, until recently with the E. W. Reynolds Co., as local salesman, has withdrawn from the National Convention of the Shriners at Louisville, Ky. He has resigned his position with the Reynolds Co. Mr. Moore and he will continue their journey to New York and are expected to be gone five or six weeks.

J. Walter is now fully settled in his store at 729 S. Broadway. While the store is not as large as his former place of business on Spring St., it is a very at-

tractive one and is located in a section that is rapidly developing. E. Steinman, the optician who was with Mr. Walter on Spring St., is again with him in the new location.

The Los Angeles Gem Co. has just secured mining property on which a stone entirely new to the lapidaries has been found. The stone is similar in general color to jade, with black matrix. It runs eighth in hardness, and promises to be a very valuable addition to the known gems of Southern California. E. F. Peck, president of the company, is about to start to New York with specimens of the stone.

Omaha.

Fred Stitt, Carson, and A. H. Hastings, Arcadia, Neb., were in this city, last week, purchasing stock.

W. R. Alden, Hiyanis, Neb., was in the city during the past week attending the Masonic Grand Lodge.

Albert Edholm has relinquished the Union Pacific R. R. watch inspectorship and has been succeeded by Fred Brodegaard & Co.

George Ryan and his son, Harry, spent a few days in camp at Ashland, Neb., visiting Mr. Ryan's son, Herbert. Others visiting the camp were Mrs. C. S. Shook and J. L. Jacobson.

H. A. Greenblatt, of Harry Greenblatt & Co., will leave the latter part of the month for an extended trip to the coast, where he will join his wife in Seattle, Wash. From there they will continue their trip down the western coast, returning by way of Salt Lake City.

Curtis Lindsay, son of S. W. Lindsay, jeweler, who was an honor student in the Omaha High School, 1905, president of the class and captain of Company C, was graduated from Armour Institute, Chicago, May 28, with the degree of bachelor of science, and elected a member in the honorary fraternity of Tau Beta Pi.

The largest and most interesting meeting of the local jewelers' club was held Thursday evening when plans for the convention, to be held Aug. 2-6, were outlined. As the time draws near the jewelers are becoming more and more enthusiastic and are doing everything to make the meeting a success. The jewelers are anxious that the manufacturers and jobbers respond as quickly as possible and reserve their exhibit space, as the time is short and much outside work has to be accomplished.

It is the general impression in Omaha that a great many jewelers will visit the Seattle Exposition, and will stop over in Omaha, attend the convention, and see the city. The jewelers' club is enthusiastic over the fact that all attending the meetings in Convention Hall will be obliged to pass through the exhibit room, which is the large, light dining room of the Rome Hotel, the convention headquarters. The exhibit room will be thrown open to exhibitors, delegates to the convention, visiting jewelers and friends. One night will be devoted to the public.

Van Allen & Wilkinson, Eastman, Ga., recently added an optical department to their business.

Pacific Northwest.

When the new City Hall at Georgetown, Wash., is completed, a clock will be installed in the tower that has been planned.

Fred Carlquist, Turlock, Cal., has left for a visit to the Alaska-Yukon-Pacific Exposition at Seattle, and while away will visit the most promising towns in the northwest with the idea of settling there.

The petition of A. A. Woelfel to install an electric clock in front of his place of business in the Zimmer block, at Centralia, Wash., has been acted upon favorably, and the new clock will be ordered at once.

E. J. Jaeger, Portland, who found a lusty infant which had been left on his doorstep, a short time ago, and who decided to keep the baby, was given a stag stork party recently and a number of baby presents were showered upon him.

B. E. Smith, who committed a daylight robbery of the store of Chas. Hinges, Salem, Ore., April 27, has been adjudged sane by two members of the Lunacy Board, but the other member refuses to sign the majority report. A strenuous effort is being made by Smith's relatives to keep him from the penitentiary.

Alex. Lange, a pupil in the public school of Portland, Ore., has built a beautiful clock case of solid mahogany, and this will be shown in the exhibit of school work at the exposition now open at Seattle. Young Lange is but 14 years of age, and is taking manual training work in connection with his other studies at school. In addition to making and carving the case the youthful artisan put in the works and regulated the timepiece.

Minneapolis and St. Paul.

H. T. Hindt, St. Louis, was in Minneapolis, last week, en route to Grand Forks, N. Dak.

H. Bockstruck, St. Paul, was one of the incorporators of the Humor Realty Co. of that city.

A. N. Anderson, Minneapolis, recently took his wife to the hospital to undergo an operation for appendicitis.

R. W. Kelner, Clark, S. Dak., has gone for a visit to the Alaska-Yukon-Pacific Exposition, at Seattle, Wash.

H. H. Hansen, who lately started in the retail business at Moorhead, Minn., was a visitor to the Twin Cities, last week.

T. H. Weld and A. E. Paegel, Minneapolis, attended the annual session of the Imperial Council Nobles of the Mystic Shrine, at Louisville, Ky., last week.

The auction sale of the John D. Bodfords stock, 304 Nicollet Ave., Minneapolis, has been discontinued and the stock is being offered in bulk by the trustees.

The Summer convention of the Minnesota Retail Jewelers' Association will be held in Minneapolis, July 20, 21 and 22. The last day will include a trip to Lake Minnetonka and a tour of the lake.

Recent out-of-town jewelers in the Twin Cities were: E. O. Tostenson, Sisseton, S. Dak.; A. Sherdahl, Montevideo, Minn.; R. W. Kelner, Clark, S. Dak.; Chas. Swedberg, Hopkins, Minn.; Mr. Feinberg, Brownton, Minn.

St. Louis.

S. Ruby and wife have returned from French Lick Springs.

F. H. Ryer, of F. A. Ryer & Co., Kansas City, is in this city on a pleasure trip.

Jacob Lowe, of J. Lowe & Co., Monroe, La., is here on business and pleasure.

Walter Embling, 2218 Cherokee St., is recovering from an attack of appendicitis.

Retail jewelry stores will be closed on Saturday afternoons during July and August.

H. W. Kellersman, of the Eisenstadt Mfg. Co., is taking a two weeks' pleasure trip up the Mississippi River.

R. F. Reeves, president of the Reeves-Kemper Jewelry Co., has returned from New York, where he spent two weeks.

Adolph Umbrecht, formerly with the Bauman-Massa Jewelry Co., is now city man for the Brooks Jewelry & Optical Co.

The Depasse Mfg. Co., New York, has notified St. Louis jewelers that C. M. Davis will hereafter represent the firm in St. Louis.

William Weidlich has returned from a trip to Chicago. His brother, E. C. Weidlich, stopped here on his return from a trip to the coast.

Ferd. Chlanda has moved his store from 1835 S. 12th St. to Park Ave. and 11th St. He has a larger and more attractive store in his new location.

Joel Friede, vice-president of the Eisenstadt Mfg. Co., has gone to Memphis, Tenn., on a pleasure trip, accompanied by his wife and daughters.

T. G. Burkhardt, Jefferson City, Mo., was here during the week replenishing his stock of jewelry and making arrangements to purchase an automobile.

O. K. Steuwer, southwestern representative of the Eisenstadt Mfg. Co., who returned a few days ago from a pleasure trip to Memphis, is confined to his home by illness.

The case of the Des Moines *Daily News* against the Smith's Credit Jewelry Co., that was pending before Justice Sanders, has been settled. The suit was on an account for \$125.21.

S. E. Bamber, secretary of the Hess & Culbertson Jewelry Co., has returned from Asheville, N. C., where he attended the annual meeting of the Travelers' Protective Association.

I. N. Hahn and J. S. Ballard, buyers for the S. A. Rider Jewelry Co., are back from an eastern buying trip. They spent a week in Providence and Attleboro and two weeks in New York.

Theodore Norpoth and F. J. Platte, Missouri and Illinois representatives of the C. R. Hettel Jewelry Co., have returned from their territory and will spend three or four weeks in this city.

Frank B. Weidlich is closing out the stock of his jewelry store at 1012 Hodiadmont Ave., with the intention of associating himself with the Weidlich Bros. Mfg. Co., of Bridgeport, Conn.

Sol. Summerfield, E. M. Russell, C. F. Kardell, H. F. Overmiller and C. F. Scharlott, with the Furstenwerth-Uhl Jewelry Co., are getting ready to go out in their different fields next week.

H. Estinghausen, proprietor of the Attle-

boro Jewelry Co., will leave the latter part of the week for Seattle. After seeing the exposition he will take a trip to Alaska. He will be gone three months.

J. F. Hines will represent William Weidlich & Bro. at the Illinois State convention to be held at Peoria, June 30. He has been living at Grand Forks, N. Dak., but within a week will move his family to St. Louis.

Al. T. Wolff, who represents the Elliott Jewelry Co., in Texas, and Joseph B. Moore, who travels for the same company in Colorado and Kansas, have come in. They were out two months and had successful trips.

St. Louis creditors of H. W. Thompson, Muskogee, Okla., have received notification that William T. Cohenour proposes to take over the business and assume the obligations. Mr. Cohenour is a director of the Oklahoma State Bank.

Julius Newman, of the Aller-Newman-Wilmes Jewelry Co., has so far recovered from an injury received in a fall at Chilicothe, Mo., two and a half months ago, that he is able to resume his traveling. He left Saturday for northern Missouri.

In the case of Sam Gold against the S. Pian Time Payment Jewelry Co., pending in Judge Grimm's division of the Circuit Court, the demurrer of the defendant to the plaintiff's amended petition has been overruled. The case is a libel proceeding.

The big excursion steamer *City of Alton* has been engaged by the Retail Jewelers' Association of St. Louis for the river trip to be given Tuesday evening, June 22, in honor of the visiting delegates to the State convention. The start will be made at 7 P. M.

Edward H. Meier and Jesse H. Cummings, traveling representatives of the St. Louis Clock & Silverware Co., are taking their vacations. Mr. Meier will spend two weeks in Chicago and Mr. Cummings will take a trip to New York. On their return they will get ready for their Fall trips.

Ike Falkenburg, of the S. A. Rider Jewelry Co., and E. M. Weigler, of Felstenthal Bros. & Co., Chicago, whose home is in this city, attended the Southeastern Missouri Drummers' Association meeting at Caruthersville, Mo., last week. Mr. Falkenburg was presented with a burro on account of a threat made by him to organize burro trains if the railroads did not give better service. To show that he was game he rode into the meeting on the back of the burro.

H. L. Hollister, formerly with Mermod, Jaccard & King Jewelry Co., and the F. W. Drost Jewelry Co., has joined the sales force of William Weidlich & Bro., and will start on his first trip next week. He will travel in Missouri and Illinois. H. D. Washholder, Texas representative of the firm, came in last week and will go out next week. J. E. Durick, who formerly had the Texas territory, will hereafter travel in Wisconsin and Minnesota.

A partial examination into the affairs of E. T. Gotsch took place before Referee-in-Bankruptcy Coles, during the week. Chase Morsey, the receiver, appointed at the instance of the Eisenstadt Mfg. Co., has so far only located a small part of the stock that was carried by Gotsch at 4102 Olive St. Gotsch was present at the hearing. He

claims to have sold part of the stock and have pawned part of it. Creditors of are not hopeful of realizing much from the receivership.

E. E. Seaman, formerly with the Ring Co., Buffalo, N. Y., is now with S. A. Rider Jewelry Co. He will be shortly for his first trip to Tennessee, Mississippi. E. E. McGuire, who was with the Rider company from Detroit, will be up the Oklahoma territory with W. L. Engle. The other Rider salesmen—L. Kenberg, E. L. Falkenburg, H. H. Engle and E. C. Elliott—are getting ready to go out into their territory.

Among the out-of-town jewelers in this city, during the past week, were: Longnecker, Winchester, Ill.; H. J. Fort Smith, Ark.; C. E. Hendrix, City, Ill.; L. Watkins, of C. L. C. Co., Harrison, Ark.; Fred Simons, ville, Ill.; William Westphal, St. Mo.; Roy Goulding, Alton, Ill.; M. ericks, Monroe, La.; H. W. Foerste ville, Ill.; F. C. Hartleb, Belleville H. Bauer, Alton, Ill.; J. F. Schmeitzler, Alton, Ill.; Lon Williams, Wichita, Ill.

The will of the late Detlof N. Furstenwerth, which has been filed for probate, assures the continuance of the Furstenwerth-Uhl Jewelry Co. by providing that the stock held by Mr. Furstenwerth shall be kept intact as long as he lives. All the household goods, carriages, etc., are given to the wife. The will directs that the stock from the jewelry stock shall be paid to the wife quarterly. If she should remarry, her income is to be divided among the children. At the death of the wife one-third of the stock is to be given to the oldest child, John D. Furstenwerth, and he is to have the privilege of purchasing the other two-thirds or any part thereof within 90 days after the death of the wife. The value of the stock and he may take five years for it, on depositing the stock as collateral. The other four children are each to receive one-fifth of the stock or the equivalent. Uhl, one of his partners, is made executor without bond. Until the regular election of officers in February, John Furstenwerth will be acting as president of the company.

Pacific Coast Notes.

A. Protsch, Redondo, Cal., has just completed the installation of a town clock at that place.

A. R. Ransch has moved his jewelry store from Willows, Cal., to a more suitable location and is now to be found in the office, on Tehama St.

Pollak Bros., Redlands, Cal., have disposed of their optical department to Washburn, and will hereafter devote their entire attention to their jewelry business.

The Montezuma turquoise mine, near Sodaville, Cal., has been sold by Pety to Adolph Woltzen and K. M. Mer. The gems will be shipped to Los Angeles and polished there.

H. C. Harris, Highmore, S. D., has disposed of his stock to L. B. Hlust

Published by The Jewelers' Circular Publishing Co.

11 JOHN STREET NEW YORK

News Gleanings.

The Covington Jewelry Store, owned by Jos. P. Sain, Covington, La., has been purchased by Wm. Riddleberger & Son, St. Louis, Mo. They have added a new plate glass iron jewelry store.

A. L. Norberg, Duluth, Minn., has sold out his jewelry business and will devote his attention to optics.

C. E. Hiatt, Lemmon, S. Dak., has sold out his jewelry stock of Fred Terhune, at Groton.

M. R. Shingler, Wellsville, O., has completed extensive improvements in the interior of his store.

The Townsan Jewelry Co., Minneapolis, Minn., is now located in a new building just north of the hotel.

The Goldin-Levy Jewelry Co., Chicago, Ill., has been incorporated under the laws of Georgia, with a paid-up capital of \$50,000. The company has the following officers: President, David Goldin, a watchmaker, but now a proprietor of the Goldin-Levy harness factory; Vice-President, Jos. Levy, of Jos. Levy & Co., St. Louis, Mo.; and vice-president, Aaron Maltz.

J. W. Barnes, a retail jeweler and member of the firm of C. P. Barnes & Co., Louisville, Ky., has the sympathy of many friends in the jewelry trade at the death of his wife, Nellie L. Barnes, who died recently at their home, 2511 Lawn Ave., that city. Mrs. Barnes was 65 years old and passed away of heart disease. The funeral services were held, June 8, and the interment was in the Eastern Cemetery.

D. W. Williams, president of the Williams Co., Glastonbury, Conn., died at his home on Williams St., m. G. June 8. The deceased had suffered several years with Bright's disease but was confined to his bed for only a few weeks. The deceased was born in 1853, and about 1875 began to take an active part in the affairs of J. B. Williams & Co. When the company was organized he was elected vice-president. Williams was a man of a general disposition and gained the confidence and friendship of all who came in contact with him.

Merchants of middle western cities have been annoyed considerably recently by the actions of a swindler who pretends to be a jeweler and who delivers to the victim an article of jewelry which has been left with him to be repaired by the merchant's employe. This is always done in the employe's absence, and the swindler collects from 25 cents to \$1.25 for the repair. The plea that he is about to go home and cannot wait for the employe is always made. Of course, when the employe returns and the merchant finds that the whole thing is a swindle and that the pin or other article left is not worth more than 25 cents, the swindler was worked in Springfield, Mo., last year, and when a man named [name] was called on one of the victims of the swindle with a similar story, last year, police were at once notified and taken into custody for peddling without a license. An investigation record is now being made.

THIS DEPARTMENT CONTAINS A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN. THE UNITED STATES PATENTS THAT HAVE BEEN REGISTERED ARE MARKED WITH THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

ISSUE OF JUNE 8, 1909.

923,930. POLISHING IMPLEMENT. HENRY J. BRADY, Noblesville, Ind., assignor of one-half to Albert J. Grundman, Milwaukee, Wis. Filed Sept. 3, 1908. Serial No. 451,494. A polishing implement comprising a plate having curvilinear bearing surfaces at both ends, an upper recurved loop at one end, a

in connection with the plate, an adjusting screw passing through the handle, a loop loose on the screw, a cushion folded at its ends in said loops and bearing surfaces.

923,931. MICROMETER. ANDREAS NIELSEN, Hartford, Conn. Filed Nov. 2, 1908. Serial No. 450,750.

A micrometer comprising a bowed micrometer frame with a bushing at one end, a bushing fitted in said frame at the other end of said bushing being sub-

stantially flush with the inner end of said hub and the outer end of said hub, a spindle passing through said hub and having a shoulder at one end, a nut engaged with said threaded portion of said spindle, a spring set bearing against said hub and

923,932. COMBINED MATCH-BOX AND CUTTER. WILLIAM H. WEBSTER, Hartford, Conn. Filed Feb. 26, 1909. Serial No. 450,245.

A combined match-box having one of its

sides slotted for part of its length, a cutter mounted on one wall of the box adjacent to the slot and adapted to move through said slot, a spring-stop on said cutter having fric-

tional engagement with a wall of said box to hold said cutter in any desired position and positive engagement with a wall of said box to limit the opening movement of said cutter.

923,934. SOLDERING-STICK. LLOYD R. BENSON, Ellsworth, Kans. Filed Feb. 18, 1909. Serial No. 478,692.

A soldering flux in solid form containing stearin, rosin, chlorid of zinc and mirriate of amonia.

923,994. CLOCK CASE. WALTER E. MCGRAW, Everett, Mass. Filed April 20, 1908. Serial No. 428,003.

A clock comprising a transparent outer casing having front rear and side walls, a closed top and an open bottom, said front and rear walls provided with aligning openings, a metallic containing shell

mounted in said openings, a design formed on the exterior of the outer casing, the outer faces of said shell lying substantially parallel with the casing exterior and having a highly polished surface reflecting the design on said outer casing.

924,127. ALARM-CLOCK. HIRAM P. ARMS, West Hartford, Conn. Filed June 1, 1907. Serial No. 376,797. Renewed Nov. 4, 1908. Serial No. 461,089.

An alarm-clock having a hammer adapted to strike percussive blows, means for moving the hammer at intervals, and a percussive board ex-

tending beyond the clock case and forming a pillow rest, adapted to be struck by the hammer and throw off waves that affect the sense of feeling.

924,441. ELECTRIC WATCHMAN'S CLOCK. GEORGE B. FESSENDEN, Boston, Mass., as-

signor to the Eco Magneto Clock Co., Boston, Mass. Filed Nov. 9, 1908. Serial No. 461,727.

In an electric watchman's clock, a plurality of

electrically-operated armature-bars, and a return-bar passing over all of said armature-bars and adapted to return the armature-bars automatically to their original position after their actuation.

924,465. PHOTOGRAPHIC APPARATUS. HEINRICH HUBSCHER, New York, assignor of one-half to H. C. Nielson, New York. Filed March 13, 1908. Serial No. 420,915.

In a portable camera attachment, an automatic time-mechanism and an automatic alarm-mechanism, in combination with a time-exposure mechanism, means for graduating the time exposure mechanism, a casing within which all of said

mechanisms are housed, an exterior bulb-holder, and means for compressing a bulb within the holder.

924,470. CLOCK-REPAIRING DEVICE. GUY F. KELLEY, Somerset, O. Filed Nov. 12, 1908. Serial No. 462,298.

A clock-repairing device comprising a clamp, a

reel, and a spring holder, the holder comprising a plate provided with a plurality of studs, and a retaining arm detachably secured to the studs.

924,468. MEDICINE-CABINET. JAMES W. HUNT, Lunsford, Ark. Filed Sept. 9, 1908. Serial No. 452,277.

A medicine-cabinet provided with a top or desk

portion, a shaft extending into said desk portion, a clock mechanism for rotating said shaft, a series of trays connected to said shaft, one of said trays being provided with numbers indicating hours of

Jewelers! If you order Cuckoo Clocks or Quail and Cuckoo Clocks of your Clock Company or Jobber, insist on getting the same with our Trade-Mark.

Our Clocks are the best—there are none better. Our clocks have received the highest award "Gold Medal" at Chicago, Omaha, Paris and St. Louis Expositions.

It is not the question how cheap a Cuckoo Clock is, but how good. A customer will never remember that he paid a little less for his Clock but he always will remember if the Clock does not give entire satisfaction.

The carvings of all our Cuckoo Clocks are made of genuine American walnut. Each Clock has a patent attachment so that the hands can be turned backwards without damaging the Clock or bringing the Clock out of strike.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM THE Illustrated Official Journal.)

ISSUED BY PATENT OFFICE, 25, ABINGDON ROAD, LONDON, E.C.

1,670. PINS, DRESS. A. PATTESON, Twickenham, Jan. 24.

Safety-pins and hat-pins are provided with sharply projecting longitudinal edges *a*. They may

FIG. 2.

FIG. 1.

be triangular, square, or diamond-shaped in cross-section.

1,951. PENS. E. DE LA RUE, London, Jan. 28.

A stylographic pen of the kind in which the air-tube is formed as a rod for operating a filling-piston, is provided with a valve in the air-tube to prevent the ink from flooding the air-tube during filling. The figure shows a pen filled on the prin-

ciple described in Specification No. 13,768, A.D. 1905. The air-tube *a* is fitted with a valve *b* which closes the port *c*. When the tube *a* is screwed home, a rod *d* carried by the valve abuts against shoulders *g*, thus lifting the valve and opening the air-tube. When the air-tube is unscrewed for filling, the valve is closed by a spring *h*.

2,053. PINS, DRESS. F. H. DARLEY, Folkestone, Kent, Jan. 29.

A retaining-device for brooch pins is provided with means for locking with the catch or hook of the brooch. A tubular cap gripping the pin by spring tongues has a wire loop *f*, so that by ro-

FIG. 1.

FIG. 4.

tating the cap when in place on the pin, the loop is caused to engage with the catch *c*. In a modification, the spring tongues may be contained within the tubular piece; or one of the projections may be partly cut away as shown at Fig. 4. The end of the pin may be flattened.

Applications filed May 10 to May 15.

10,991. PIN-POINT PROTECTOR FOR USE IN CONJUNCTION WITH LADIES' HAT-PINS, SCARF-PINS AND THE LIKE. WILLIAM STRETTON GOADBY, Moseley, Birmingham.

11,140. RING FOR PERSONAL WEAR. FREDERICK W. CADBY, Birmingham.

11,174. HAT-PIN AND OTHER FASTENERS. MARTHA SHAW, Liverpool.

11,310. LADIES' HAT-PIN. MARSHALL ALLWOOD, HARRY BLACKBAND and REGINALD EGGINGTON, Birmingham.

11,478. EXPANDING BRACELET. WILLIAM HACKETT and WILLIAM E. HACKETT, London.

11,416. PENDANTS, LOCKETS, CHARMS, CHAIN SWIVELS, AND THE LIKE. WALTER H. COLLINS, Birmingham.

Complete specifications accepted May 19, 1909.

12,040. JEWELRY GUARD. KEATING, 1908.

3,687. EXPANDING BRACELET. PRICE, 1909.

The Art of Jeweling Holes for Watch Pivots.

By H. Reinecke.

JEWELING holes for watch pivots has been practiced for two centuries. It was invented by Nicholas Facio, a native of Geneva, who came to London in 1700, and a few years later commenced the business of watchmaking and watch jewelery in partnership with the brothers De Beaufré. The watchmakers of Paris, to whom he applied, not appreciating his invention, gave him no encouragement, and the London watchmakers do not appear to have taken notice of him with much greater liberality, as the watchmakers' Company opposed his application for a patent, although presumably of the strength of his invention, he had been admitted as a member of the Royal Society.

The watchmakers of a century and a half ago were considered of more importance than they are at present, and many of them were members of that learned body. Notwithstanding any jealousy the watchmakers had of Facio, his invention was adopted both in England and on the Continent.

When jewelery was at first, for the most part confined to the holes of the escapement, probably in consequence of its cost; there must have been a prejudice against jewelery watches at an early date, on account of the tendency of certain sorts of stones to blacken the pivots when the watch was used for some time and the oil turned black. However, there are no watches now, nor have been for quite a long time, that have not at least the balance holes jeweled, and there is scarcely a watchmaker that will not at present jewel the holes of the escapement. In all cases he is better for being jeweled, although it has been claimed for a long time that the holes for the larger wheel holes of a watch would be better if made of good, hard brass than if jeweled. But it cannot be gainsaid that many English watches would have longer and cost less to repair if they were jeweled in a few more holes. The reason on the other hand, used to jewel the escapement watches in as many holes as possible, and so badly that brass holes were used in many cases, have been preferable. It must be said to the credit of the

Swiss watch manufacturers that of late years they have produced hole jewels and employed them in their better class of watches which can hardly be excelled in their form and selection of the material of which they have been made.

The stones used for jewelery watches are the ruby, sapphire, chrysolite and garnet. There are many varieties of all these stones, so that it cannot be said that a ruby is best for a hole jewel unless it is the right sort of a ruby. The color of this stone is not always a guide to the quality. The Oriental ruby is the best, being the hardest. This should always be used for the best of watches. Sapphire is usually used for the jewel holes of marine chronometers, and sapphire is also the best stone for pallet stones for the steel escape wheels of lever watches, having apparently little influence on the change of the oil used on the escapement.

Rubies that have a deep red color are prized by the Swiss, while the milky stones are preferred in marine chronometer jewelery by the English chronometer makers as being the hardest of all hole jewels made for such purpose.

The quality of oil has much to do with the blackening of the pivots, and those which have the greatest friction will become discolored first. Garnet is largely used for jewelery common watches, especially in the pallets of lever escapements. It is of the same hardness as that of the chrysolite, and it is not so brittle. These garnet pallets are soon cut. A few years' wear will pit the rubbing face of the stone on which the escape wheel tooth drops, in which case the only remedy is new pallets.

Chrysolite would answer better for pallet stones, as these would not be pitted so easily.

Garnet is also used for the impulse pin of lever escapements, but the least violent external motion to the watch will break off the pin if the balance be a heavy one, and a ruby or a sapphire pin would be far preferable. In Switzerland there is a great division of labor in preparing and the fitting of holes to watches. This latter practice is very properly the occupation of the adjuster of watches as regards balance staff jewels,

which, even of late, has become the work of a first-class watch repairer, who is occasionally required to adjust watches to different positions.

Drinking Clocks.

AMONG the most peculiar form of horological devices may be mentioned the so-called "drinking clocks" that were in vogue during the 17th century, and of which curious specimens are still extant.

Unique and artistic was the work of this nature constructed by the locksmith Caspar

AN OLD DRINKING CLOCK USED DURING THE 17TH CENTURY.

Werner. Especially interesting was a ship, about three-quarters of a yard long, in which was seated a female figure that struck a dulcimer, provided with strings, with its hands; a child, that nodded its head, held the oar, while a cupid, with drawn bow, discharged arrows at anyone sitting around. Clocks of this description were known as drinking clocks; they were used, on festive occasions, on the tables of the nobility, and the party struck with the arrow was com-

WALTHAM WATCHES

FIFTY YEARS AGO

FRIDAY, APRIL 22, 1859.—The proprietors and workmen of the watch factory at Waltham were entertained by Gov. Banks at his residence today. About 200 men and women were present.

From Boston Advertiser, April 22, 1909.

The Waltham factory had existed five years. Here was the first successful effort to realize the dream of Dennison, father of American watch-making. Here was the first and only structure in the world erected for manufacturing pocket timepieces. Three hundred people were employed, the largest number ever assembled in such an enterprise. General Banks was proud of Waltham, where he was born and where he had worked as bobbin boy in a cotton mill. He found time, while Governor of a great State, to greet and encourage the operatives of this watch factory, because he believed that they were creating an imperishable industry. He lived until the word WALTHAM had symbolized the perfect watch in every country on the globe.

In that year, 1859, the total number of Waltham watches manufactured was 12,304; in 1906, the product was 855,000; to-day there are 16,000,000 in use. The Waltham factory was the parent factory. It is now the corner-stone of an industry that gives a livelihood to more than 100,000 persons in the United States. In 1859, it was the only institution of its kind here or anywhere else; every other watch factory came later. The Waltham factory is distinguished by its achievements as well as by its age. Waltham watches have always exemplified the highest type of watch construction, and public recognition of their superiority is attested by the highest awards at all the great Expositions wherever they have been shown.

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing on this hemisphere.

to submit to some drinking test. The "green vault" at Dresden there is similar clock to that of Werner above described. It is made of gilt and oxidized silver and, as our illustration shows, represents a centaur carrying a woman. When the clock is running the eyes of both figures open and after starting two other works on the pedestal the two hunting dogs in the foreground jump up. The clock is intended to be placed around the table on wheels fitted underneath, while the centaur shoots arrows, which have to be taken from his quiver and laid on the bow, by the guests. The dial is shown in

the royal mathematical-physical hall, in the same place, also contains a number of other clocks that were at one time used as ornaments—for instance, Amphion, a triumphal chariot, drawn by gilded lions with organ works and figures; a griffin, with expanded wings, standing on an ebony pedestal; a Turkish cavalier; a combination of dancing figures, known as "Totentot dance"; a life-size drumming figure with moving eyes and tongue, and still other minor works of this character, the number of which, like most of the pieces described, have long remained

known. An automaton play of such a clock was described, as a rule, with the striking of the hour. The bow-shooting Diana in a chariot drawn by galloping leopards, in the art museum at Karlsruhe, and also the clock in the grand ducal museum at Stuttgart, must be included with works of this above character. Especially popular, however, during the chief and late Renaissance, were automata in the form of ships. One of the most famous productions of this character, which even excels the work of the late Werner in artistic beauty and execution, is to be seen in the Cluny Museum; in the form of a ship, on the deck of which ten imperial dignitaries pass and the seated figure of Charles V., while the weather moves its head and raises and lowers the hand in which it holds the

steering wheel. The form of the ship used in productions of this character had its origin in the Isis ship, a heathen custom. The old Greeks and Romans were accustomed, in the morning, as soon as the sea became navigable, to organize a solemn procession and make a votive offering of a ship to the goddess.

The drinking clock proper, however, typifies the remembrance of the archer, Hercules (Heron or Hero, was an ancient constructor of automata), in varying form. A reproduction of this character could be made more easily movable at the Renaissance period, and smaller in size, because the motive power was clockwork and springs, in place of water, which was employed in olden times.

A gold piece watch has made its appearance in London, Eng. The tiny timepiece is set in the gold piece so ingeniously that the naked eye is deceived, and the watch is constructed so perfectly that the time is spent over the counter. By the turning of a spring the front of the coin opens, revealing the dial.

To Successfully Stretch a Wheel.

IN repairing, the watchmaker is often compelled to alter a depth by stretching a wheel. As we have already had occasion to observe, says *La France Horlogère*, this operation calls for a certain amount of care to insure success. For this end it is essential that the wheel should remain as true and round as possible, and that the teeth are not much deformed, as the rounding-up tool is not adapted to correct any radical errors in a wheel improperly stretched.

More particularly is it necessary to take every precaution to avoid the deformation of the segments of the rim, included between the arms. To insure this, we know that it is absolutely necessary, whether we use the ordinary tool or just the plain

TOOL FOR STRETCHING A WHEEL.

hammer, to begin by stretching slightly the arms of the wheel. But however he does it, the careful watchmaker will so conduct the operation as to leave no trace of its having been performed.

Some writers recommend that the tothing only be stretched in an oblique direction, holding the wheel on an anvil or stake and striking with a hammer held at an incline.

In our opinion, continues the above paper, this method can only be resorted to in exceptional cases, and is not to be recommended anywhere else (for instance, not in a case where the tothing is too thin).

We will rest content, on the present occasion, with the suggestion of an improvised tool, the use of which insures an excellent result where it is simply desired to increase the size of the wheel, as is usually the case. Based on the same principle as a special tool we have described in a preceding number, it presents the advantage of being within reach of any watchmaker. It suffices to have at one's disposal a finishing lathe that is not in use, on the runners of which we adjust, in the manner shown in the illustration, two small anvils of hardened steel. The wheel is placed between these anvils, which are perforated in the center with a hole large enough to easily accommodate the pinion. With the aid of this improvised tool the wheel may be enlarged to a considerable extent without undergoing any reformation and without it being necessary to first stretch the arms.

A few strokes of the hammer on the extremity of the upper runner (the lathe being held vertically in the vise) will effect a perfectly satisfactory result.

Wm. Chichester has closed his jewelry store at Hallstead, Pa., and is about to move to Lincoln, Nebr., with his family.

Well-Known Watch Man Goes on Record Against Time Change.

WEBB C. BALL, the well known Cleveland watch manufacturer and watch inspector, has expressed himself emphatically as against turning the time back 90 minutes to provide a longer period of light, according to the English idea, because he believes it is impractical in America.

"Such drastic change would occasion but little trouble in England, which is governed by but one time meridian, but in the United States, where five different times are used, endless confusion would result. It took the Government years to regulate time in the United States so that one section of the country having a certain time would know exactly what time it was in places where another meridian line had been drawn."

Briefly, the plan which the English authorities are working on is to have the government turn all the clocks in the British Isles back 90 minutes for the six months in the Summer when the days are long. If this were done people would be able to get an hour and a half of extra daylight outside of working hours. The idea has met with some approval in England and is favored in this country, too, but Government officials have arrived at about the same conclusions as Mr. Ball, and it is unlikely that any such change will be attempted.

Historic Old Watch Recently Repaired by Connecticut Jeweler.

ONE of the most interesting relics in New England, a clergyman's gold watch over 125 years old, which has been handed down from minister to minister in Norfolk, Conn., for a century, made its appearance at the shop of Edward F. Coxeter in Hartford recently to be cleaned. After its cleaning it kept as good time as the electric clock on the City Hall, 100 years its junior. The watch was originally the property of the Rev. Ammi R. Robbins, of Norfolk, in 1782. It is now owned by Rev. W. F. Stearns.

The watch was made by P. Dupont, of London, Eng., and is of the old pattern known as the English verge. It has a rounded face, from which the crystal protrudes nearly half an inch. The glass forms a sort of cap. The outer case has no glass. The works are enclosed by still another case and on the back are covered by another cap. The wheels work directly into the balance. The works are diamond cap jeweled. Both sides are covered with inscriptions. The history is given on the reverse side, and reads as follows: "This watch was presented by James Watson, Esq., of New York, to the Rev. Ammi R. Robbins in 1792, and by him bequeathed to his son, the Rev. Thomas Robbins, D. D., and bequeathed by Dr. Robbins, with chain and key, to the successive settled ministers of Norfolk, 'to continue without limit.' Thomas R. B., Aug. 11, 1777, D., Sept. 13, 1856." The chain is composed of links which are alternate rings and miniature barrels, and it was attached to the watch by a piece of leather.

Cal Maus, Creston, Ia., will move his store, June 1, into the Eagle block.

ROCKFORD, ILLINOIS

Railroad Officials Think of Watch Inspection Service.

before the recent meeting of the Railroad Watch Inspectors' Association United States and Canada, which reported in last week's issue of THE CIRCULAR-WEEKLY. Charles C. L., a jeweler of Baltimore, sent out asking the officials of the various what they thought of railroad inspection. The replies of several are given below in brief:

Newell, General Superintendent, A. C. Mount, N. C.—Think system we have do not see how road can be successfully except by system similar to ours.
 Montgomery, General Watch Inspector, S. F. Ry., Topeka, Kans.—Have a most stem of watch inspection.
 Potter, Third Vice-President, B. & O. R. ore, Md.—Consider it very necessary.
 Lee, General Superintendent, B. & M., ass.—Unquestionably this plan gives the etter service than the method of leaving entirely with the men. It seems to me necessity for uniform and correct time essent al on a railroad that no argument ry in defence of a periodical inspection per supervision.
 Noonan, General Manager, B. R. P., N. Y.—I believe the system to be es- sential.
 Miller, General Manager, Central New Ky., Hartford, Conn.—On single track sider it unsafe to operate trains without system.
 Ebyram, General Superintendent, C., B. icolin, Nebr.—Do not believe any well railroad can afford to attempt to get about some thorough system of watch inspection.
 Woodwin, General Superintendent, C. & gton, Ky.—The inspection system is an improvement over the old haphazard system.
 Robins, General Superintendent, C., R. I. t Worth, Tex.—System entirely satis- factory.
 Nelson, General Superintendent, C., G. t. Paul, Minn.—I consider regular in- stated periods very necessary.
 Gerald, General Manager, Chicago Jct. go.—We believe it very beneficial.
 Morse, General Superintendent, C. & N. hicago.—System very valuable.
 Morris, General Manager, M. & P. R. R., o. Md.—Consider a time service system necessary for safe railroad operation.
 Tyler, General Manager, C., I. & L. Ry., very well satisfied with the results ob- tained by the protection afforded.
 Metz, General Manager, C. & P. R. R., d, Md.—Think inspection necessary.
 Sims, Second Vice-President and General D. & H., Albany, N. Y.—System sat- isfactory.
 Clark, General Superintendent, D., L. & R., Scranton, Pa.—Generally and un- favorable.
 Martin, D. & R. G. R. R., Denver, Colo. inspection. We have a specified standard ates which are necessary for different employees to secure.
 Tyler, Vice-President and General Manager, ny. of New Mexico, Amarillo, Tex.—We have rigid system of inspection.
 Simmons, General Manager, El Paso & ern R. R., El Paso, Tex.—Have monthly t and believe the system affords very ter service.
 Gould, Superintendent, Erie R. R., Jer- t. N. J.—We regard it as an element of railroad service.
 Brooks, General Superintendent, Florida R. R., Thomasville, Ga.—Inspection is advantageous, as it almost absolutely correct time, which is very essential to operation. I am in favor of the inspec- tion for several reasons, one of which is employees would not purchase a reliable or watch, which costs considerably more than watches, if not required to do so.
 Cunningham, Superintendent, Grand t. St. Thomas, Ont., Can.—The system

is an excellent one. Do not see how it could be done without on roads where traffic is heavy.
 O. O. Winter, General Superintendent, Grand Trunk Pacific, Winnipeg, Man.—We do not, at the present time, have a regular organized system of watch inspection on this line, owing to the fact that we are still under construction. Have used a standard watch inspection system on other trunk lines, however, and consider that it is not only an improvement over the old method of leaving the matter of watches with employes, but an absolute necessity, and will, in the very near future, establish a system of inspection on the Grand Trunk Pacific, as we would not think of operating a railway handling commercial traffic and passen- gers without such system.
 H. A. Kennedy, Assistant General Manager, Great Northern Ry., St. Paul, Minn.—This plan is infinitely better than the old system of leaving the regulation of watches with the men. Present system effective and absolutely necessary.
 C. L. Ewing, General Superintendent, I., C. Ry., Chicago.—The system is good. We require every man entering the service as an engineer, fireman, conductor, brakeman, switchman, yard- master, etc., to have a standard watch, and to file a certificate with the superintendent. This certificate is renewed every three months. We have a weekly comparison every week. We have a general inspector and local inspectors. An em- ployee may purchase his own watch. We have a certain line of watches for standards, including the best make of nearly all watch manufacturers. An employe may purchase his watch wherever he desires, and may have it repaired wherever he desires. He can purchase a watch from an in- spector, paying for it in monthly instalments and deductions will be made on the payroll.
 H. W. Clarke, General Superintendent, Interna- tional & Great Northern R. R., Palestine, Tex.— System has proven very satisfactory.
 R. G. Kenley, General Superintendent, Bethle- hem, Pa.—Class of employes required to hold standard watches should depend on the method of train control and operating facilities.
 M. B. Cutter, General Manager, L. V. R. R., South Bethlehem, Pa.—I would merely say that same has been quite satisfactory so far as our company is concerned.
 D. M. Starks, General Manager, L. & N. R. R., Louisville, Ky.—Some such system is necessary.
 Morris McDonald, General Superintendent, Maine Central R. R., Portland, Me.—System affords decidedly better service.
 J. N. Galbraith, General Manager, Mexican Central Ry., Mexico, Mex.—Have system in effect 10 years.
 S. W. Brown, General Superintendent, Michigan Central R. R., Detroit, Mich.—I am strongly in favor of it.
 E. M. Alvord, General Superintendent, M., K. & T. Ry., St. Louis, Mo.—A regular system for the inspection of watches at stated periods has been in vogue on this line for a number of years, and it is believed that better service is secured than under the old method of leaving the matter of watches entirely with the men.
 E. A. Gould, General Superintendent, Missouri, Pacific R. R., Kansas City, Mo.—System very satisfactory.
 C. B. Huntington, General Superintendent, M., St. P. & S. St. M. R. R., Minneapolis, Minn.— Consider a rigid inspection imperative.
 F. K. Bretz, General Manager, M. & K. R. R., Morgantown, W. Va.—Would not consider rail- road operation safe without proper system of watch inspection, especially on a single track road.
 A. Clark, General Manager, National Lines of Mexico, Mexico—I consider these inspections ab- solutely necessary for good of the service.
 W. J. Hills, Superintendent, N. C. & S. L. Ry., Paducah, Ky.—Have been working under the time service rules for three years, during which time the timepieces of our employes have been brought up to the standard, and we are very much pleased indeed with the service, and wonder how we got along without it.
 W. P. Throop, General Superintendent, N. Y. C. & H. R. R. R., New York—Our experience proves that while some men have sufficient interest in their work and for proper protection of their own interests and the company's interests to have their watches examined regularly and kept in perfect working order, there are others who will not conform to a systematic inspection of their watches. With our proper checking, it en- ables the company to know that the men are properly provided with watches that will keep accurate time.
 L. H. Van Allen, General Superintendent, N. Y.

C. & H. R. R. R., Syracuse, N. Y.—The fact that the New York Central, like a great many other roads, has required not only its own employes but the employes of other roads operating over its rails to furnish themselves with approved time- pieces, and has a systematic and regular inspec- tion and comparison, the same should in itself be evidence that we are satisfied that efficient time service is essential to safe operation.
 W. G. Bierd, General Superintendent, N. Y., N. H. & H. R. R., New Haven, Conn.—Have a system of watch inspection on this road and have had for quite a number of years, which has served to insure our men keeping their watches in first class condition.
 A. C. Needles, General Superintendent, N. & W. Ry., Roanoke, Va.—The system insures reliable timepieces with full record of each man's watch.
 C. A. Gould, General Superintendent, Northern Pacific R. R., Livingston, Mont.—Would con- sider its absence dangerous.
 W. D. Trump, General Superintendent, Pere Marquette R. R., Detroit, Mich.—The questions which you ask are somewhat of a surprise to me. as the general time inspection proposition is a part of the standard code of American railways, and the standard code is used on 300,000 miles of railroad in the United States alone. Railroad watch inspection is imperative. Many years ago there was a five minute clause in the railroad train rules providing for deviation in watches; to- day there is none, and I do not see how a rail- road could feel that they were having safe oper- ation without proper inspection of their watches. We inspect our watches every two weeks.
 A. T. Dice, General Superintendent, P. & R. Ry., Reading, Pa.—We are getting good results from our system.
 J. B. Yohe, General Superintendent, P. & L. E. R. R., Pittsburg, Pa.—System has proved satis- factory.
 J. W. Maxwell, General Superintendent, St. L., S. & L. S. Ry., Tyler, Tex.—We have a very efficient and satisfactory system of watch in- spection.
 W. M. Hobbs, Vice-President and General Man- ager, San Antonio & Aransas Pass Ry., San An- tonio, Tex.—I consider watch inspection most im- portant in regard to the correct handling of trains.
 W. T. Taylor, General Superintendent, St. L. & S. F. R. R., Springfield, Mo.—Regard it as ab- solutely necessary to safe train operation and of utmost importance.
 T. F. Whittelsey, General Manager, S. A. L. Ry., Norfolk, Va.—We have a system of inspec- ting watches at stated periods, and find the results much better than leaving the matter of watches entirely with the employes.
 R. H. Ingram, General Superintendent, South- ern Pacific R. R., Los Angeles, Cal.—There is no question that this plan is giving better service and is much safer than the old method abolished many years ago, of leaving the watches entirely with the men. Think the system speaks for itself.
 H. H. Speaks, Superintendent, T. & O. C. Ry., Columbus, O.—We have a regular system of watch inspection which covers all men in train, yard, engine and telegraph service, and we feel that we secure a great deal more satisfactory results than by leaving the matter of watches entirely with the men. Employes are required to present their watches monthly to the examiner for comparison, and in addition present them for a thorough examination semi-annually.
 W. L. Parks, General Superintendent, Union Pacific R. R., Omaha, Nebr.—We believe it is as important to keep the watches of employes in best possible condition as any other tool or appliance.
 S. E. Cottor, General Superintendent, Wabash R. R., St. Louis, Mo.—Present system of watch inspection is entirely satisfactory.
 J. A. Shepard, Superintendent, Western Mary- land R. R., Hagerstown, Md.—Consider it ab- solutely necessary.
 W. S. King, General Superintendent, Y. & M. V. R. R., Memphis, Tenn.—The system of time service in effect on this line is very satisfactory, and I consider its rules and regulations very de- sirable in connection with the operation of trains. It encourages the men to use good watches and take proper care of them, also insures a big de- gree of reliability and safety in the operation of the trains.

A fire at Shelburn, Ind., recently, de- stroyed the jewelry store of A. Davison and the adjoining building. The total loss is said to be about \$5,000.

Seasonable and Salable

This is the season for Racing and Outdoor Sports in general, and nearly every dealer should find some sale for a line of high-grade

Chronographs
Split Seconds
Split Repeaters
Minute Repeaters

Be ready for this demand, whether large or small, with watches that will successfully meet all competition.

The watches referred to are made by several prominent manufacturers, and the variety, while large enough for all possible purposes, is still limited to those goods which in our experience have proved to be most worthy, desirable and reliable.

them yourself?

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Summer Time Schemes for Enlivening Business.

Written expressly for The Jewelers' Circular-Weekly.

ONE of the many reasons why the Summer months are dull for various retail enterprises is that the average dealer has been trained and has accustomed himself to believe that it must be so, and therefore relaxes during the hot season his usual strenuous efforts to maintain his trade and secure new customers. This tendency to drift with the majority becomes more and more pronounced each succeeding year, and the storekeeper finally becomes "set in his ways" and imagines it cannot be otherwise. The result is that employes taking their cue from the boss have come to regard the Summer time as a fixed period of dullness, fit only for vacations and relaxations of every kind.

The exceptional merchant, awake to his opportunity, while he may devote part of his Summer to vacations for himself and his salespeople, does not permit his business to enjoy that same privilege. On the contrary, he works while others doze.

The so-called dull season offers exceptional opportunities for a campaign of good window work—and one can devote leisure hours to making displays therein more elaborate and effective. Call especial attention to merit in arranging your displays—workmanship, style, finish, durability, beauty and other good points of goods offered.

In the "good old Summer time" people spend more time in the streets and have plenty of leisure to admire your wares and read your window bulletins. Be sure they can inspect the windows in comfort. See to it that during the hours in which the sun reaches your front that the windows are kept shaded. A new awning (with a neat advertisement on it) is a good Summer time investment. Avoid dust in the window. You have certainly time to make changes frequently enough to keep the goods looking clean and new, and do not permit the pavement underneath your window to become dirty looking. Frequent sweepings are necessary.

Don't rush your customers, especially at this period of the year. You have plenty of time to explain more or less interesting details about goods which you are exhibiting for sale, and it would be well to announce in your window that "while at all

times you attempt to be courteous, at present you can devote more time than usual to each patron and will be pleased to do so," or words to that effect.

Successful and painstaking endeavor to build up trade on the part of the principal will stimulate a healthy spirit if similar effort of one's assistants, and this spirit is a valuable point in business building. A good leader spreads enthusiasm—and enthusiasm creates and stimulates trade.

Windows attractively arranged work always, even when the store is closed. A prominent retailer recently had a striking illustration of this when he was called up on the 'phone and received an order from a party in a neighboring city, who explained that the order was the result of an inspection of the window display during a Sunday visit to the merchant's city.

Offer special inducements; talk frankly to the public through your window signs; explain that you want to make it worth while for people to loosen their purse-strings; that you can't afford to have dull periods; that your rent and other fixed expenses are the same the year 'round. Try to attract attention through novel displays in your window and interest them in your offerings. Mark prices in plain figures—readable ones. Never mind if your competitors can read them; it is a compliment to you if people find them "rubbering" at your show.

Word your advertising in unique ways; people will marvel at your ingenuity and talk about your place. Result—free advertising of the best sort. Arouse interest in your line by calling attention to it prominently, and you will find a business development. Jog along in don't-care style and your business will imitate you exactly.

There is at this season an excellent chance to work up a trade on small novelties and knickknacks. These little sales are some trouble, but they give your establishment a busy appearance, and the percentage of profit is as good as that realized on finer ware.

Advertise goods suitable for outing and vacation use, such as travelers' toilet sets, manicure articles, collapsible drinking cups, shoe horns, shoe buttoners, glove buttoners, combination knife, fork and spoon sets, hair

ornaments, safety razors, (pocket size), patent cigar lighters, passes as watch charms, patent cigarette cases, pocket mirrors, guards, tie clips, hat pins, brushes, belt buckles, canes, parasols, umbrellas, etc., etc. Many people want these and buy them out of town because home merchant (whom they would patronize) neglects to remind them he has the articles.

Souvenirs of various sorts are a good feature for interesting visitors to a store. Summer is the time when this trade is in evidence. Cheap watches to sell. Suggest, when offering them, that people should not risk taking a piece on a vacation trip as a cheap answer when roughing it.

If you didn't paint your store in the Spring have it done now. Also, repaint your ceiling and the interior of your window with a painting. It won't show cases and other store fixtures get a coat of varnish. All this done at a time when it is unusual, they will attract attention and customers.

Have your plate well ventilated; it cooler and brighter than ever. Make a comfortable store and people will appreciate your efforts. Keep your stock in order and replenish shortage as promptly as possible. Don't have to make excuses about the business of your line by saying, "We have these goods at other seasons." Every merchant should always be ready to meet legitimate demands of his trade for hard articles. Rid your mind of the idea that Summer belongs to the ice cream soft drink vender. He has no exclusive claim on it than has the ice cream in Winter.

Make a special bid for repair work, suggesting that patrons avail themselves of reduced rates offered only during the summer months; and hint that many might do well to leave valuable articles you during their vacation period. They would be benefited by low prices. Also have free storage privilege for goods during their temporary absence from home.

Supplement your window advertisement with booklets, leaflets, blotters, etc., judiciously distributed. There is this matter passed around during the summer, and therefore yours will attract notice.

(To be continued.)

Storekeeping Department.

Various Methods of Meeting Competition.

By S. H. COLLINS, in "Human Nature In Selling Goods."

(Continued from issue of June 9.)

TENSANDS upon thousands of sales are clinched every day in sharp competition by salesmen's skilful use of talking points that center the customer's attention on individuality. There is admittedly a bit of mystery in most of these selling helps. Selling goods in competition is strictly a matter of policy and method, not ethics. Matters, however, are taken care of in systematic way, for if the goods were of no value for the money no talking would sell them long. It might be known as a general rule, too, that the store with the most highly developed goods has developed the sales work furthest in the direction of these talking points. Simple lines it is often possible to give an advantage over competitors by various forms of packing. The method has as much success as well as advantages.

There were two department stores in a town, holding agencies for rival makes of mechanical piano-players. A staid music house had the agency for a certain make. Competition was hot. The two department stores fought mighty battles on the question of durability. At one store the salesman would show the entire metal mechanism of the player, demonstrating that there was "nothing to wear out." The other store had a player with a good deal of metal in its inwards. But they put it in a window, attached an electric motor, and ran it steadily night and day for several weeks in a "sensational non-stop entrance test."

At the music store they had altogether a different theory of selling.

A man in that town who wanted a piano player usually shopped around and examined all three rivals. In one department store the salesman showed him the top instrument, going 40 miles an hour and asked him candidly, now, wasn't it dear to a man of his intelligence that it could be more honestly constructed? In the other department store they gave him a talk on pneumatics, illustrated with a diagram laid bare to display every working part. By the time he reached the music house (and it must be admitted that it didn't always get that far) his knowledge was burdensome.

The sales manager at the staid music store was an old-fashioned soul named Tackabury. On Sunday Mr. Tackabury was organist at Grace Church. He knew the piano. He knew human nature. He knew the music business. When a woman came in to buy a piano for her daughter's wedding present, and had to be told that the old piano instrument left by her grandmother, in her parlour prized for its matured tones, was worth just \$18 in exchange or \$5 cash, she would break the news to her son sympathetically as Mr. Tackabury.

"I suppose your piano-player has primary and secondary pneumatics, metal plates and boards," the shopper would begin.

"Oh dear madam! You've evidently studied those things very conscientiously."

Mr. Tackabury would respond. "But what you want a piano-player for is to make music, isn't it?"

"Surely."

"Now is there anything else you want it to do?"

"Why, no."

"Well, we have a very reliable player, but that's all it does—just makes music. Suppose we go and hear it." Then he found out tactfully what sort of music the customer liked, and played it for him, and showed the different kinds of instruction and fun that can be got out of a player, and usually clinched the sale.

"But see here," asked the purchaser. "Will this instrument last? What shall I do if it gets out of order?"

The practice of buying out competition, or getting rid of it by trade agreements, does not seem to be as well thought of to-day as it was a few years ago. * * * If a competitor is big and aggressive enough to be worth buying up, it is highly dangerous to furnish him sinews of war in the shape of purchase money.

[THE END.]

The Newly Furnished Store of H. Rattermann, Jr., Cincinnati, O.

ILLUSTRATED below is the retail jewelry store of H. Rattermann, Jr., 146 E. 4th St., Cincinnati, O. The store is 15 feet wide and 72 feet long, of which 50 feet is used for the store proper and the remain-

INTERIOR VIEW OF THE STORE OF H. RATTERMANN, JR., CINCINNATI, O.

"You just telephone down, and we'll send a man up. We've been here 40 years."

In selling, a man meets his competitor largely as he can. Even when the house supplies an arsenal of talking points, there is a knack of making them go off with a pop. It comes by experience. In the novice's hands they may be "fizzers." If there are no talking points, then a good salesman campaigns without them, like the drummer who led a rival on the train to denounce a merchant in the town they had just left as the meanest man on earth, putting in an appreciative word for the merchant occasionally to spur the disgruntled one on. This salesman saw the merchant's brother-in-law sitting two seats back. Another takes advantage of his rival by loading customers up with goods so that there is little chance to put anything more on the top of the load. A third takes some subtle way of making his goods first, so that competitors have to talk up to them. A fourth finds that when he has met a customer's preconceived notion of goods and allayed his prejudice he need say nothing about the opposition.

ing space for the office and shipping room.

The fixtures, wall cases, counter cases, tables and office furniture are all of solid mahogany. The front part of the store is almost entirely of glass, the light being obstructed only by the door and window frames.

The show windows are six and one-half feet high, and are surmounted by a large dome of prism glass, which transmits the light far back into the store. The wall cases are each lighted by four 16-candle-power incandescent lamps, the store proper being illuminated by three chandeliers, each containing four lights. Tungsten lamps are used and produce light equal to 600 candle-power. A large skylight in the rear furnishes sufficient light during the day.

The wall cases are located on one side of the store and the counter cases on the opposite side, parallel to them, the wall on this side being attractively decorated with oil paintings.

The present photograph was taken on the morning after the opening, which accounts for the presence of floral pieces, which were presented to the jeweler.

Advertising in the Good Old Summer Time.

A Contrast in Display—Some Stimulating Suggestions.

THE two advertisements illustrated on this page will give retail jewelers a fair idea of the effects and optical impressions produced by different forms of typographical display. The original ad., which is that at the left, has been reduced from 9¾ inches single column. It will readily be seen that

A few original suggestions for Summer advertisements or Summer window cards are shown below. It is a great mistake to suppose that all effort may be relaxed during the Summer season. There are many articles in the jeweler's line which will move rapidly in the Summer, if they are only advertised properly and well displayed. Shirt waist sets, watch fobs, fountain pens, scarf pins and similar requisites

Can the Ordinary Business Man write Good Copy?

(From Fame.)

WHO can better extol the virtue given baby than the loving enthusiastic parent of said baby? Who lived with it day and night, knows its whim and capacity, its full power of possibility—and this entirely aside from the fact of being its creator, which is a subtle essence of completest knowledge. Who, then, should advertise a baby better than the babe's author?

I grant that one father in every ten will dwell unduly on the trivial details of the likeness to his own self, its propensity to gurgle louder or with more haughty accent than any other baby ever gave birth to; but yet, out of a given number of babies, don't you think there is one sprinkling, a good average per cent., who handle the proposition of boasting and can be trusted to do it quite as well as say, as an old bachelor who has never said the proposition," doesn't even know

the second advertisement is an improvement.

The improved announcement which has been prepared by THE JEWELERS' CIRCULAR-WEEKLY for the benefit of its readers is marked by easy legibility and artistic display. The advertisement as used originally is not particularly attractive, nor does the text in the body of the ad. flash its import before the reader's eyes as does the second ad.

The casual observer would really think these two announcements told a different story. But the text in both is exactly the same, the only difference being the mode of display and apportionment of space. The second ad. occupies a space of 3½ inches double column.

end of an infant ought to be higher? I so think, and from experience and I'm past the point where my contact makes me liable to be prejudiced.

An advertiser's product is his life, often is its father, though even if he but adopted it, nevertheless the affectionate regard for the intense determination regard for the intense determination to push it up to the line where it will participate in the things due to good things.

"I once was young, and now I am old, and many a time have I seen the crude, strong youngster advertise bring it to a place of power and honor and glory in the advertising business world. I still believe that versatility, belonging to the business as a part of his natural (mental) equipment, permits him to write good copy for the sale of his product, whatever it may be.

Further, I believe that it will pay

Rail Advertising Department.

give this direction of effort all the attention necessary to bring it to a fruit-bearing state, it shall start lame. He can the more hire superintendents, managers in the factory, foremen of gangs, skilled operators and handlers of the goods, than he can hire a general advertisement writer better than

whole country recently honored as it does annually, was a raw-boned, crude specimen of manhood, six feet four inches high, with features that would never be O. K.'d in any academy should they be presented for approval by an unknown. He was awkward in his angles of construction—as sentences often are which yet hold power to persuade and convince. Such writing is strong and effective because within it, as a spirit of it, exists the self-carrying force to convince readers. Truth is there, and it travels surely; and with all the more certainty does it "arrive" in the mind and heart of a reader, because it has no outer vestments of the artificial kind of beauty, the conventional gloss of attractiveness.

But the day of the advertising adventurer in this field is about past. Occasionally we still find him pattering his offer to dash off a dozen of the finest display advertisements you ever (or never) had, at a price that would barely tempt your office boy to give up an hour of his evening time. Mostly, however, they have come and gone. They came, we saw, and as nothing conquered, the big, busy bunch quietly dropped out of sight. Some of them are driving the only horse cars in New York State, through the cross-town streets of Manhattan. Others have entered the mail order field, hoping to gather much juicy fruit from its fresh soil, due to this same genius for stringing words together, albeit the string always shows.

Advertising.

By ARTHUR BRISBANE.

ADVERTISING is the most modern and powerful agent in the greatest modern task, which is *distribution*. Every intelligent American must be interested in advertising; for, be sure of this, if you ever succeed you will need to know about adver-

Real Bronzes Make Unique Wedding Gifts

A beautiful piece of real bronze imparts a dignity of character to the home that can come from no other source—and is, therefore, admirably fitting as wedding gift.

We show many rare and artistic pieces in imported and domestic real bronze, as well as the newest effects in bronze electroliths which are so useful and have such a decorative influence in the home.

If you are in search of a wedding gift that will be unique and away from the ordinary—we think you will surely find it in the "Brock & Feagans" Bronze Room.

And you may feel assured that whatever you give from this house will be valued and appreciated, because of the confidence in the quality of the quality room "Brock & Feagans" inspires.

ATTRACTIVE AND CONVINCING.

in self. He should be able to beat the professional "all 'round" writer of copy in imitation of that which will best advertise for your own. The reason the woods beneath the full of human Smarts a few years ago who threw out unvarnished hints that they knew it all and would write advertising to beat the band—of competitors—and our product, whatever it was, is, or is not, the cause of this influx, I believe,

Business Literature of the Wedding Season.

ONE of the daintiest little folders seen in a long time has been issued by the Peters Jewelry and Optical Store, Moline, Ill. The folder comprises four pages, 3½ by 7 inches, of an excellent quality of lavender-colored paper. The front cover contains a beautiful hand-colored bust of a typical Summer girl. This is drawn on hard white paper and pasted on the lavender paper. The jeweler's name is printed in gold in the lower right hand corner. The printing on the inside third page is done in photographic brown. The text calls attention to wedding and graduation gifts.

Henry Birks & Sons, Ltd., Montreal, Can., are distributing neatly printed cards calling attention to wedding gifts. The cards are printed in different colors, including blue, red and buff. The largest ones measure three and one-half inches by five and three-quarter and the small ones, three and one-eighth by four and one-half inches. Half-tone illustrations of the articles advertised are printed in black on white paper, which is pasted down on the cards, making a very pretty effect.

"Wedding Jewels" is the title of a very pretty folder, four and three-eighths by 10¼ inches, issued by Henry Birks & Sons, Ltd., Montreal, Can. The folder is printed in three colors, olive green, pink and white. One side of the folder is decorated with pink and white stripes, resembling a Spring dress fabric, the printing being done in green in panels on this unique background. Among the articles illustrated are wedding gifts for the bride, for the groom, for the bridesmaids and for the groomsman and ushers.

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of June 2.)

ANOS (Gr.). The touchstone.

ASINET. "A light helmet, round or with a pointed apex, and fitting

BASINET.

to the head."—Mollett. Used in XIII. century armor.

viously spelled *bassinnet*, *basnet* or *set*.

BASE. The bottom or solid support of a column which is either simple or formed of various ornamental shapes, or consists of a capital—Marryat. The lower part of a pillar, etc.; the division of a column

POINTS OF THE HERALDIC SHIELD.

which the shaft is placed. The Grecian order (to which refer) has no *base*. In heraldry the term "base" denotes the lower part of the shield marked with the letters "G, H, I," in the engraving.

BASELARD (Fr.). "A short dagger hung from the girdle in the XV. century. It had an ornamental sheath and was considered a mark of gentility."—Fairholt.

BASILIDIAN GEMS. Certain mystic or magic words (such as *abraxas*) were

BASILIDIAN GEM.

recently cut by Greek lapidaries on rings used by the Greek Gnostics of the sect of

Basilidians. They were considered as amulets against evil. The serpent with the radiated head (Chnouphis) is often seen on them rearing itself amid seven stars. The reverse of such gems is inscribed "To Chnouphis."

In the accompanying engraving we have an ancient Egyptian seal. It contains the lion-headed serpent, Chnouphis, on a sign prescribed by King Nechepsos for protection of the chest; it is cut in a piece of veritable jade."—King.

BASILICA. Originally the pagan halls of justice and meeting places of the ancient Greeks and Romans were known as *basilicas*. With the sudden popular adoption of the Christian creed under Constantine these rectangular halls, from lack of their own edifices, were used for Christian rites, and the early Christian architects adopted this style of architecture as well as the term *basilica* for their houses of worship.

BASILISK. A fictitious creature supposed by the ancients to have inhabited the African desert. Both its breath and its glance were said to be fatal. It was sometimes called *amphy* or *amphysian cockatrice*, having two heads—in front the head of a cock,

BASILISK, OR AMPHYSIAN COCKATRICE.

and the end of its tail a serpent's head. Being invulnerable, the only way to kill it was by using a mirror. As its gaze was certain death, upon seeing its own form in a mirror it burst and died of fright. The "King of Serpents." (Compare with griffin, dragon, cockatrice, wyvern, etc.)

BASILIUM (Gr.). "A royal diadem, of a very tall form, of Egyptian origin. Isis-Fortuna is often represented wearing the *basilium* on her head."—Mollett.

BASINET. (See *bascinnet* and *basnet*.)

BASKET OF FRUIT AND FLOWERS. Attribute of St. Dorothea.

BASNET. "A head-piece worn in the XIV. and XV. centuries; sometimes without and sometimes under the heaume or helmet."—Clark. (See *bascinnet*.)

BASONS. In the ecclesiastical service a basin-like receptacle was so called. It was used for the collection of alms or to hold sacramental vessels. The goldsmiths have used their best talent in the decoration of this utensil. "Some beautifully enameled *basons* of the XIII. century represent subjects of hawking and hunting, etc."—Mollett.

BAS-RELIEF (*basso-relievo*) (It.). Figures which have a very slight projection from the ground are said to be in *bas-relief* (low relief), in contradistinction to those which are in *mezzo-relievo*, or in *alto-relievo* (to which refer).

BASSANO (It.). "Towards 1540 a certain Simone Marioni founded the (*majolica*) "works at Bassano, in the suburb called Marchesane; but it does not appear that its products were of great value. A piece of 1555, representing St. Francis, St. Anthony and St. Bonaventura is ill-painted and a failure in color and glaze. At the end of the XVII. century the establishment produced, with perfect success, cups, saucers and other objects of smaller dimensions, with landscapes and works in the Venetian style. This production continued during the following century under the impulse of Antonio Terchi."—Jacquemart. There are pieces still existing with his mark—an open five-point crown.

BASSE TAILLE. The engraving or deep cutting done in metal wherein the enamel is run. "Low-cut carving in metal beneath the level of the surface used in enameling. The drawing or remodeling of the subject is given by the different depths of cutting. The enamel naturally appears darker over the deeper cuttings and *vice-versa*."—Wilson.

BASSIN. Goldsmith to Louis XIV. He resided in the Louvre.

N. "A staff or truncheon, derived

BATON.

the French word *bâton*. In heraldry

it is a diminutive of the *bend sinister*" (to
which refer), "being one-fourth its width,
and is *couped* at both extremities (*i.e.*, not
extending to the extremities of the shield).
The *baton* and the "riband" (which is one-
eighth of the *bend*) "were generally used
to denote illegitimacy."—Melbourn. "It is
also frequently adopted as a crest, without
reference to illegitimacy."—Clark.

Spelled variously *batton*, *battoon*, *baston*
or *batune*.

BATON CROSS, or *cross potent*.—Robson.

CROSS BATON, OR POTENT.

"BAT'S WING" fluting. A design much

BAT'S WING FLUTING.

used on gold and silver bowls, etc.

BATTERSEA (London). A small enamel
factory was started here, middle of the
XVIII. century, but lasted only 30 years.
South Kensington Museum possesses some
good examples.

BATTISTO, Franco. "An eminent Vene-
tian ceramic artist employed by Duke Guido
Valdo II. in the bottega at Pezaro. (A. D.,
1540-60.)

BATUZ. "Norman French for *battus*,
beaten with hammered-up gold; said of
silken stuffs so adorned."—Mollett.

BAUDEKIN, or *baudekyn* (hence *baldachin*,
to which refer). Old English term for an
Eastern fabric of gold and silk. "Cloth of
gold," brocade.

BAUDREC. "A belt or ribbon suspending
a hunting horn."—Clark. (See *baldric*.)

BAUCALIA, or *baucalis* (Gr. and Lat.). "A
drinking vessel which varied in shape and
size."—Mollett.

BAUMGART. Administrator of Sèvres fac-
tory from 1891.

BAXTER, Thomas. A great painter of
ceramics. Worked at Flight's Worcester
factory (1814). Went to Swansea in 1816,
but returned in 1819 and was employed by
the Chamberlains there. Died 1821, 39
years old.

BAYARD & BOYER. Owners, in 1771, of
the Bellevue factory, near Toul.

BAYREUTH (on the Main). The output
from this factory is blue camaieu ware,
generally pale, the paste light and well
fashioned, the designs traced with great
delicacy. The favorite pieces are bottles,
cuvettes, *jardinieres*, etc.

BAYRUTH (Bavaria). "This name, ac-
companied with the date of 1744, is in gold
underneath a porcelain cup decorated with
the view of a city, with persons in the cos-
tume of the end of last century."—Jacque-
mart. "Its" (*faience*) "wares are thin,
sonorous, well worked, and covered with a
bluish enamel, relieved with delicate designs
in a grayish-blue, not very bright. The
ordinary signatures are monogrammic—

B K, or B K with a C beneath and a line
between. We find them on pieces with
flowers, arabesques and birds, among which
should be noticed as particularly elegant
some *drageoirs*, in the shape of those of
Nuremberg." "The letters B P are found
upon *faiences* decorated with polychrome
bouquets and brownish-red lines. Certain
flowers are remarkable for the warmth of
their red ochre; the rest resemble the
Saxon style, which the artist evidently
sought to imitate."—Jacquemart.

(To be continued.)

A New Lincoln Medal for the G. A. R.

ONE of the many interesting medals in
the present year is that struck for the
Grand Army of the Republic in commemo-
ration of the 100th anniversary of the birth-
day of Abraham Lincoln. This is a bronze
medal three inches in diameter and contains
a bust of the martyred President on the
obverse surrounded by the inscription,
"With malice toward none, with charity
toward all," and the dates 1809-1909. On
the reverse appears a laurel wreath in relief,

LINCOLN MEDAL STRUCK FOR THE G. A. R.

containing this inscription: "This medal
was struck for the Grand Army of the
Republic in commemoration of the 100th
anniversary of the birth of Abraham Lin-
coln."

As already noted in THE JEWELERS' CIR-
CULAR—WEEKLY, 10,000 of these medals were
made for the G. A. R. by Jos. K. Davison's
Sons, Philadelphia, Pa., the order having
been placed with the firm by a special com-
mittee selected by the organization and
headed by Commander-in-Chief Henry M.
Nevins.

A Joke on the Police.

THE following editorial was taken from
an Attleboro (Mass.) paper: "Only in
the Attleboros, where hundreds of thou-
sands of bracelets are turned out each year
can one appreciate the joke on the Los
Angeles police who arrested a man on the
ground that he had a bracelet like one
found on a woman that was killed in
Rhode Island."

The G. W. Meyer Jewelry Co., Chatta-
nooga, Tenn., is about to make extensive
improvements and alterations in its estab-
lishment. Work will be begun about the
middle of June, and, when completed, the
store will be exceptionally attractive.

QUESTIONS No. 2290—Soldering Filigree
Q.—What kind of solder must I use
to solder fine silver filigree ornaments?
Information regarding the various
methods of manipulating filigree work would
be appreciated. S. F.
ANSWER:—A recent article in the
Die Goldschmiede Zeitung gives many

heated. Remove and quench in alcohol.
This will produce a very soft silver wire,
the alcohol cleaning it at the same time.
Filigree workers usually have at hand
rings of different thicknesses and various
sizes, which are made by rolling up the

FIG. 1.

of interest to the filigree worker.
The most necessary appliances for the pro-
duction of filigree work are draw-plates of
the best quality. For the round wires the
Vienna draw-plate with the finest
holes is the most useful, but they are not
strong enough, and from three to six finer
draw-plates are needed to enable
one to produce the finest wire for this
purpose. The steel draw-plate is shown in
Fig. 1, and the diamond in Fig. 2. The
best appliance is a good cording machine
(Fig. 3), which will run steadily and allow
one to twist or cord the necessary wires.
When a cut wire is to be used, the cording

FIG. 2.

one is arranged to do the cutting by
means of a fine cutting shears. Especial
attention is given to the annealing of the
wires between the drawing of the wires, also
the last annealing before twisting or
cording of the wires. For annealing, the
wires should be wrapped into a close bundle
and held between the fingers of the hand, care being
taken that the turns are of equal distance
and so as to form one continuous strand.
This strand is now held together with a
piece of wire. The annealing can proceed
over a good charcoal fire, except, of
course, where there are better facilities at hand.
The wire is placed on the glowing charcoal
and then covered with glowing pieces of
charcoal and left until all is evenly

FIG. 3.

wire on round mandrils, or the work may
be done with the cording machines. The
rings are cut apart with a pair of shears
which have a very pointed and sharp cut-
ting edge (Fig. 4). The usual method is
to use two solders, one hard for the frame
and thick parts, and a softer one for thin
and light ornaments. The rings and heav-
ier parts intended for the frame are laid
together, as shown in Fig. 5, to be soldered
at points shown at a and b. Before this
is done the parts are painted over with
borax paste, which must not be too thick.
Small pieces of solder are placed directly
on top, where the soldering is to be done.

FIG. 4.

When the borax has dried so the solder
will not fly off when it is heated, place the
whole in a good charcoal fire and let the
solder melt through. After removing from
the fire, boil out, then examine and re-
solder where the solder did not take well.
After this place all the lighter and thin
ornamentation in place, after the pieces
have been painted over with borax paste.
Apply thin pieces of solder where solder-
ing is to be done and let dry for a while.
Then proceed to fire and solder as before.
The last solder, of course is the softest and
must be rolled very thin, so it will melt
readily. The soldering must be carefully
done at every joint. Where two wires come
together or cross each other the solder

must be run in. The borax is painted on
with a small, fine camel's-hair brush. The
experienced filigree worker will lay out the
design on an iron plate before him and
arrange by bending the wires with his
fingers into proper position. He finishes the
articles in a short time. Ball ornaments, as
seen in Fig. 5, are soldered into fine wire
rings, which are secured to the body by
filig flat so they obtain a good hold by
soldering. Gold balls, which are much
used in connection with filigree work, are
made by cutting thin rolled gold into nar-
row strips. They are rolled up loosely. A
layer of finely powdered charcoal is placed
in a crucible, a few pieces of the cut gold
are laid on this apart, so they will not
touch, and covered with a layer of char-
coal. A few more pieces of gold are put
on, then another layer of charcoal. Alter-
nate layers are thus put on until the cruci-

FIG. 5.

ble is full. Place the filled crucible in a
good coke or charcoal fire, let remain for
15 or 20 minutes, remove from the fire
without shaking, let cool and pour out the
formed gold balls and wash the coal dust
away with water. Clean the balls by boil-
ing out, and run through a sieve for the
different sizes.

Silverite, a New Metal.

A NEW development in the alloying of
aluminum with other metals has just
been accomplished by the production of
"Silverite," says the *Metal Industry*. This
metal is something entirely new and is com-
posed of a mixture of aluminum and cop-
per, zinc and steel in varying proportions
according to the requirements. The intro-
duction or alloying of steel with aluminum
is somewhat startling and at first thought
seems to be impossible, yet the makers of
"silverite" have succeeded in doing just this
thing, and the resulting metal has a spec-
ific gravity of 3.1, a tensile strength of
from 40,000 to 45,000 pounds per square
inch and a compression resistance of 100,000
pounds.

The color of the metal is silver-white,
hence its name; it does not tarnish in the
air and it is not affected by weak acids, and
only slightly by salt water. The alkalis,
however, attack it, as is true with all
aluminum alloys. Made up into articles for
general everyday and ornamental use such
as aluminum is employed for, it has the ad-
ditional advantage of lower gravity, greater
strength, better color, easier to machine and
electroplate, and is really a better metal in
every way.

SPECIAL AND IMPORTANT NOTICE

in ordering Plate or Wire, to avoid delay and errors, be sure to state:

FIRST, THE QUALITY—If Silver, Sterling or Pure. (Coin Silver made up only on order.) If Gold—the Karat.
SECOND, THE QUANTITY—If Wire, the Thickness and Length. If Plate, the Thickness, Length and Width.

Regarding the thickness it is **most important** to not only state the number, but also the name of the gauge you are using, as there are 13 gauges and no two alike. The most used by us is the Brown & Sharpe American Standard, but we will fill your order from any one by stating which you use.

Try us and you will Appreciate our Squareness, Promptness and Accuracy

T. B. HAGSTOZ & SON, Main Office, 707 Sansom St., Philadelphia, Pa. Smelters, Assayers, Refiners

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal—plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag—the blades are fine. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray—contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

Write us for full information. Get our suggestions on popular assortment. Talk to your jobber about it.

**SOLID
CITIZENS**

¶ To that type of citizens usually designated as "solid," our stock of Jewelry for men gives more attention than our advertising may indicate—on the surface.

¶ Members of such professions as the law or medicine, as well as men of business, while prone to conservatism in matters of jewelry or dress, are never averse to that "spruce" look of prosperity which can only come with adornments of "the very newest."

¶ But, please mark the distinction—"the very newest" must be of a character in keeping with its wearer. Our designers infuse the spirit of novelty into their creations, but temper them always with good taste and elegance.

¶ Rings, Scarf Pins and Jeweled Vest Chains of this kind will be found at our coming **SIXTH ANNUAL EXHIBITION**, to be held in our offices from August 30th to September 4th, inclusive.

THE KREMENTZ COLLAR BUTTON

GOES ROUND THE WORLD

ITS FAME—

Wherever there are collars there are Krementz Collar Buttons. They are known the world over—the only ones that have an international reputation. With such recognition and demand, all you have to do is carry them. They sell themselves.

QUALITY MAINTAINED—

The Krementz Collar Button never disappoints. Unequaled in construction and finish, its quality always has and always will be maintained.

ASSAY—

The Krementz Collar Button does not take advantage of the elastic leeway allowed by law. There is really no reason why a solderless collar button should assay a whit less than stamped. You can depend upon it that

Krementz 14-Karat Collar Buttons will assay 14-Kt. or $\frac{584}{1000}$ Fine.

Krementz 10-Karat “ “ “ “ 10-Kt. or $\frac{416}{1000}$ Fine.

You will note that articles assaying 9 to 9½ Karat or 13 to 13½, and sold as 10-Karat or 14-Karat respectively, save the makers a profit.

ROLLED PLATE LINE—

Krementz Rolled Plated Collar Buttons and Studs are made with regular Krementz 14-Kt. stock; which is sweated, not soldered on composition base. Exhaustive tests show Krementz Plate is much heavier than is used on any other rolled-plate jewelry. Their great popularity in hot countries (where perspiration destroys ordinary goods), is largely owing to the thickness and quality of Krementz Gold Plate, similar to that used on highest quality filled cases.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezer over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped *firmer* and *better* than by any other kind of stone tweezer.

Second. It is purposely made a "Bayonet" in shape because any stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, *easier*, *quicker*, and with much less *exertion* than when using any other style of tweezer.

It has an *extra* part directly above the crossing points to permit the holder to examine the stone without fear of *releasing* it accidentally, which frequently occurs when using the ordinary style crossing tweezer.

Price, Each, \$1.25

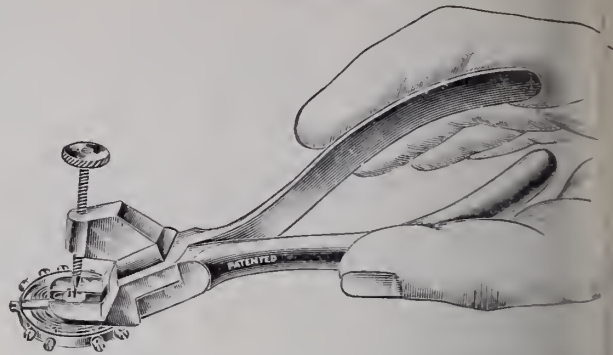

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting Roller Remover. The roller is always plainly in sight. The roller is held in the grooved jaws of the pliers. The adjustable head which holds the screw is quickly moved into position over the staff and the most obstinate roller will in a very short time yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

GRINDING OUTFIT No. 105

This outfit consists of:

1. Two interchangeable steel disc wheels, 3 3/4" and 1 3/4" in diameter
2. One interchangeable flexible leather disc wheel, 2 1/4" in diameter
3. One adjustable hollow spindle for holding the above disc wheels
4. Eight different grade emery paper discs, 2 1/2" in diameter
5. Four carborundum paper discs of different grades, 2 1/4" in diameter
6. Eight different grade emery paper discs, 4" in diameter
7. Four carborundum paper discs of different grades, 4" in diameter
8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete.....
Separate small emery discs..... per doz
" large..... " "
" small carborundum discs..... " "
" large..... " "

This new grinding device should find favor with the trade, being especially practical and complete for all purposes, such as grinding steel, glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the watchmaker, jeweler, optician, dentist, lock or gunsmith, platers and kindred trades. It is found much more economical than solid emery and carborundum wheels. An assortment of solid wheels of twelve different grits would necessitate an outlay of ten times the cost of this outfit, not taking into consideration the trouble of truing up the wheels when worn or glazed.

Full description and directions accompany each outfit

For Sale by all Jobbers in the United States and Canada.

**Alcohol
Gas Stoves**

Hot Meals Without Hot Kitchens

Sufficiently powerful to prepare as complete a dinner on the dining table as on the kitchen gas range. An invaluable adjunct to the sick room, a home convenience at all times.

The possibilities of chafing-dish cookery have been doubled by the Manning-Bowman Alcohol Gas Stove. It has three times the heating power of the regular chafing-dish lamp, yet regulates to a simmering flame at a touch.

This Alcohol Gas Stove is designed for use with any cooking utensil.

“Chippendale”

Flat Ware combines all the grace, beauty and refinement that characterize all Chippendale products. Strength and practicability are also strong selling points.

The charm and simplicity of the design is shown in the accompanying illustration. “Chippendale” appeals particularly to that class of trade that appreciates beauty in simplicity and quietness in design.

Wolcott Mfg. Co.

71 Peck Street, PROVIDENCE, R. I.
 New York Office, 14 Maiden Lane

IT HAS been a long hard pull but the "Ship of Prosperity" with its valuable cargo is almost safe in the harbor. In our line its arrival will be hastened very materially by the friendly feeling which has become so strongly entrenched through intercourse of competitors (or more properly, business associates) at the various association meetings, both of jobbers and retailers. That friendly spirit, and a willingness to co-operate for the common good, is one of the most encouraging signs. It undoubtedly indicates for the future a better condition of affairs for all concerned, not only more business, but more satisfactory business.

So confident are we of this outcome that we are making unusual preparation for our Fall stock, which will be superior to any we have ever shown. We will have even more "Sellers" than usual and Jewelers will find them a valuable aid in obtaining an early and increased share of the prosperous conditions which are coming, and which they ought to make every effort to enjoy to the fullest measure.

Our representatives will start on their trips again within a short time.

Having introduced the Button Chain which has become one of the standard popular Summer chains, we are introducing for your approval this season another neat chain which can be worn on Vest for necktie or on Trousers Band for pocket watch wear; it makes a neat, stylish, economical and safe chain to substitute for the old, long, cumbersome and unsafe Vest; this chain is specially made so as to slip on and off easily, and is of our own make.

Try one of our samples. Our travelers call and say they do not agree with us. We have a number of desirable chains with and without the slide. Also a large lot of other things, new this season.

WEDNESDAY, JUNE 23, 1909

No. 21.

Silver Centerpiece of Austrian Workmanship.

At all times we have shown, for the benefit of the American jeweler and silversmiths, examples of the art of the silversmiths of various countries. We have chosen for the subject of our cover illustration to-day a fine silver centerpiece, just completed in Austria. This centerpiece is a donation for the 300th anniversary of the formation of the Austrian Imperial and Royal Regiment, bearing the name of

Emperor Franz Joseph, and is a masterpiece of the art of the silversmith, mounted on a pedestal or base of ebony, cannot but add to the splendid reputation of the makers, V. Meyer Soehne, the court jewelers at Vienna.

Handsome Silver Service Presented to the Mayor of St. Louis.

THE seven piece solid silver tea service presented by the citizens of St. Louis to Rolla Wells, on his retirement from the office of Mayor, which he had filled for eight years, was made by the Mermod, Jaccard &

A Rare Old Indian Pearl Necklace Exhibited by an Indiana Jeweler.

A VERY rare and beautiful piece of Oriental jewelry is the Indian pearl necklace of large size, which recently came into the possession of Charles F. Artes,

SILVER SERVICE RECENTLY PRESENTED TO THE EX-MAYOR OF ST. LOUIS.

A RARE OLD PEARL NECKLACE.

jeweler and optician, Evansville, Ind., and has been exhibited in his store, 327 Main St., in that city.

The necklace, which is illustrated herewith in very much reduced size, consists of 450 Oriental pearls in six strands, while the clasp, a very fine piece of workmanship, is set with 37 Indian diamonds of antique cut mounted in platinum and gold. The clasp is three inches long, being of platinum and gold.

Tradition assigns the ownership of the necklace to an Indian princess, and though the date of the piece is not definitely known its antiquity is established through the cutting of the diamonds as well as by the general design and workmanship. Altogether the necklace is considered one of the rarest pieces of antique jewelry that has been seen in the middle west, and has been the subject of much favorable comment, alike from the press, public and members of the jewelry trade.

Christian Jansen moved, recently, from 504 W. 2d St., Davenport, Ia., into larger quarters at 410 W. 2d St. Mr. Jansen was located in the former location for 14 years.

von Laudon." Baron Gideon von Laudon was a famous Austrian general of Scottish descent, who distinguished himself in the seven years' war with Frederick the Great. Later he became a field marshal of the Empire and was distinguished in the war with the Turks, at the battles of Novi and Grandisca. The monumental show piece is crowned with the equestrian figure of the brave field marshal, while below at the left is placed a shield consisting of an officer, ensign and drummer of the regiment in the original uniform of the year 1709. On the right is placed the same group in the uniform of the present time. The pedestal bears the coat of arms of the hero embellished with the heraldic emblems of war. The centerpiece, which is in silver re-

King Jewelry Co., of that city, from an exclusive design.

Each piece was finely engraved with an old English "W," and in the center of the waiter was elegantly engraved the following inscription: "Presented to Rolla Wells by citizens of St. Louis, April 14, 1909, in grateful recognition of his distinguished services as Mayor of the city from 1901 to 1909."

The pieces were wrought in a raised and wild rose design that was very chaste and beautiful.

The presentation was made at a banquet at the Southern Hotel, which was attended by a large number of leading business and professional men of the city, and by Frederick H. Kriesmann, the new Mayor of St. Louis.

IV.

The keen witted American people of to-day know a good thing when they see it, and when it comes to gold rings for the finger, you will find it a difficult problem to sell them anything but the most **ARTISTIC PATTERNS OF THE BEST WORKMANSHIP.**

Our designers are constantly creating new ideas and original patterns, and as a result of their efforts we take pride in offering to the trade **ONE OF THE LARGEST LINES** of Signet Rings, Fancy Head Rings, Scarab Rings and Stone Rings of all descriptions, in both **10K. and 14K. Gold.**

New and original methods of ring making have enabled us to produce rings that for

SHARPNESS OF DETAILS and attractiveness of patterns are unequalled.

If you will permit **Larter & Sons' travelers** to show you their ring stocks, or by calling at or writing to our office, **21 and 23 Maiden Lane, New York City,** we will prove that just as fine and artistic patterns as the most exacting taste could demand, can be made and **SOLD AT POPULAR PRICES.**

Reigning Jewelry Fashions Noted in Paris.

Dainty Novelties in Gold, Silver and Gems Now in Demand Among the People of Taste in France's Capital.

PARIS. June 10.—Our ancestors, it is well known, were wont to adorn themselves with jewelry which, if meretricious from an æsthetic standard, represented a certain amount of money, and a few diamonds or pearl ornaments, often in the first taste, did duty on every occasion. *Les avens change tout cela*, and nowadays a woman's jewels must have some relation to her costume, fashion refusing to tolerate ornaments worn haphazard.

The art nouveau, or new art, dates from the time of the Paris Exposition of 1900, revolutionizing all preconceived ideas in its line. The new school subordinates the intrinsic value of a gem to its setting, it advocates employing the semi-precious stones to materialize their ideas, realizing that they possess as infinite a range of color as the so-called precious varieties.

Such men as Lalique, Fouquet and other craftsmen confine themselves to the former category, employing perchance a few small precious stones in order to enhance the effect. Nowadays a woman can, without excessive outlay, acquire jewelry to match each costume—adornments whose exquisite conceits in setting render them objects of art. Worth, Paquin and other great costumers have impressed on their customers the desirability of harmonizing their jewelry to their costumes, suggesting that not only color harmonies but the epoch from which the gown drew its inspiration, with the time and place in which it was to be worn, should all govern the choice of the jewels.

It was once deemed very bad form to wear jewels in the daytime, fashion prescribing that they should never be put on until after six o'clock. To-day the costliest ornaments are *en règle* with the plainest of colored costumes, women appearing in the morning in a pearl *collier* costing enormous sums. Pearls are always *de rigueur*, and the woman who is not able to procure ornaments which harmonize with everything had better confine herself to colorless stones which look well with any shade of fabric.

The pendant as a day and also an evening ornament has perhaps the greatest vogue, the art-jeweler finding in it his widest latitude, it being often a poem expressed in imperishable stones. The setting, once relegated to a subordinate place, is now of capital importance, and the worker in precious metals is an artist rather than an artisan. Many of these neck ornaments are remarkable for their purity of design, their splendid execution and the elegance of their *ensemble*. Those seen in the salons of Lalique and others of the new school are often of enormous proportions, affording an opportunity for the expansion of delicate sentiment. Most of the metal workers draw their inspiration from plant and insect life, the brilliant colors of the semi-precious stones being enhanced by a setting in vari-colored gold, platinum, tarnished gun metal, silver,

and even iron. The exquisite art glass, with opaque and translucent enamels, also play an important rôle in this branch of the goldsmith's industry, producing luminous effects which marry themselves to the chameleon hues of satin and taffeta. Gray is one of the tints of the season, and nothing looks better with it than amethysts set in blackened silver or dull platinum. Immense stones picked out with marcasite or tiny rose diamonds in some quaint design, often copied from antique Roman, Byzantine or Egyptian models, are among the favorite *motifs* for pendants. Both topaz *brulé* and the paler tints are charming, with pale and dark brown and cream lighting up their somber tones. There are olivines, aquamarines, tourmalines, amazonite and malachite, harmonizing with the light and dark greens.

The blues are of less wider range, although opal and turquoise matrix, lapis lazuli, reconstructed sapphires and scarabæ of greenish blue ally themselves to the category of blues. There are pendants of antique rococo pattern in which only blue and green prevail, carrying out the lophophore and peacock tints. Coral, carnelian and garnets only look well with black or white toilettes, and, if preferred with red or pink, must be of the identical shade of the costume, or a discordant note will be the result. Baroque pearls are a safe choice, as they tone in with neutral or high colors.

Pendants of more value intrinsically are composed of precious stones, and the jeweler inclines to this class of ornament with extremely light and invisible settings. One of the favorite styles shows a mere thread of diamonds, rubies or emeralds, from which dangle two diamonds of the purest water, square, circular or pear-shaped, surrounded by colored stones matching those of the chain and hanging by a couple of irregular strings of the same. The setting is so subordinate that the pendant gems seem dewdrops new-fallen on the naked flesh. Opals express the peacock tones, and instead of being diamond-rimmed, are more often surrounded with rubies, emeralds or sapphires, which admirably reproduce the changeful hues.

The dog-collar is liked by women with slender throats, and is often most ornate, while as a rule preserving the semblance of lightness, being usually expressed in a lattice-work or lacey design, or a conventionalized floral pattern. Some women prefer a high, black velvet band clasped with a center ornament, while a later idea is a length of white or pale gray tulle tied in a big bow at the back of the neck; the folds held by barettes of diamonds or other stones.

The sautoir, usually utilized to hold the lognon, the tiny gold-mesh jeweled purse, the vanity case, the watch and the array of breloques so fashionable is often of great cost. Sautoirs of the art nouveau style are frequently of intricate design, long and

narrow plaques of translucent enamel or repoussé gold representing a female figure or a floral emblem being among the most noticeable. Others are glittering rivulets of diamonds or colored stones linked together with gold beads or chains. The very long Directoire sautoir, reaching almost to the knees, is affected by the ultra-fashionable.

The watch is both a utilitarian and a decorative object. Among the latter may be classed the tiny balls of gold or enamel thickly encrusted with precious stones, and which often do duty as a pendant on necklace or bracelet. Enameled flowers are liked by young girls, while the dainty diamond-rimmed enameled timepiece is never out of date. Ring and bracelet watches are not new, although affected by some women. The watch chain is now matched to the watch, if it be of enamel, or pearl or diamond studded. A novelty substituted for a chain, to be worn with a white toilette, is a half-inch length of pure white moire ribbon intersected with gold or jeweled slides.

Jewelers will be delighted to learn that the model makers of the Rue de la Paix have revived the elbow or semi-long sleeve, which permits of the wearing of the bracelet. Even when the skin-tight net or lace sleeve is worn, it is by no means out of place to clasp the bracelet over it. However, there is quite a fad for the bracelet worn under the filmy material; placed above the elbow, it is also liked.

The brooch is somewhat out of the running, being replaced by the pendant. When it is seen it is rather inconspicuous, being a bar of gems used to keep in place the jabot or lingerie neck bow.

Rings are never out of date, but the woman who observes the rules of estheticism no longer loads her fingers with rings of harlequin color, preferring rather a few of real artistic and intrinsic worth. Here invisibility of setting is also the rule, the ponderous gold hoops embedded with stones being no longer liked, only a thread of metal sufficient to insure the gems against loss being admissible. However, the showy marquise, now rather square than oblong, is never abandoned, and the art nouveau school runs to quaintness of design rather than to big stones of excessive cost. A great diamond of oblong shape, pointed at each end, is one of the newest expressions of the jeweler, also square stones set in the merest rim of platinum.

The long earring is more popular in England than in France, the ladies here preferring a fine stone pendant from a short diamond-encrusted bar or swinging in a tiny loop. However, some incline to the rather barbaric gypsy earring, great hoops of gold, gem-encrusted, or those of Roman style, in which a great pearl dangles from a jeweled string.

COUNTESS DE MONTAIGU.

B. J. Ballard, claiming to be a watch and clock repairer, was arrested just as he was about to leave the city of Portland, Ore., one day last week. It is alleged that Ballard would secure jewelry and clocks to mend and proceed to dispose of them in the pawn shops.

Members of North Carolina Retail Jewelers' Association Hold Important Convention at Durham.

DURHAM, N. C., June 16.—The fourth annual convention of the North Carolina Retail Jewelers' Association, which was held in Pythian Hall, in this city, yesterday, proved a success in every way and the proceedings were thoroughly enjoyed by all who participated. The sessions were attended by 30 delegates, representing all sections of the State, and in addition 15 new members were elected to the society.

When the meeting convened yesterday morning President R. C. Bernau, Greensboro, called the delegates to order and introduced the Hon. James H. Southgate, who delivered a cordial address of welcome, which President Bernau ably responded. This was followed by the president's annual address to the association, which reviewed the work that had been accomplished in the year.

The routine work of the convention then commenced, the delegates entering into the proceedings with considerable enthusiasm and interest. There was a round-table talk in which a number participated, after which V. C. Frasier spoke briefly on the subject of adopting a uniform price list for all re-work.

The election of officers, which was then announced, resulted in the re-election of R. C. Bernau as president, the election of V. C. Frasier, of Durham, as vice-president, and the re-election of F. M. Joly, of Raleigh, as secretary. J. T. Burke, of Wilmington, was chosen treasurer, after which the executive committee was selected composed of the officers and R. N. Walker, of H. Point, and S. N. Snider, Durham. Delegates to the National convention, which was in Omaha, were next chosen, the names falling to F. N. Day, Wiston, Salem; B. R. Jolly, Raleigh; M. H. Jones, Durham; and W. H. Leonard, Salisbury.

When the elections were over dinner was announced. This took the shape of a barbecue at Lakewood Park, at which the members of the association were the guests of the jewelers of Durham. While the delegates were enjoying the Brunswick stew, fried meats and appetizers of various kinds they were entertained by a short address from Hon. W. J. Griswold, the Mayor of Durham, whose speech was listened to with great interest.

At 4 P. M. the members met in convention again and the business was resumed. It included discussions on a number of interesting trade topics as well as addresses. One of the features of the meeting was an exhibition of a gold testing machine invented by a brother jeweler, B. R. Jolly, of Raleigh, who spent 10 years in perfecting the apparatus, on which he has just been granted a patent. Demonstrations of the machine were made by testing some gold found in mines near Durham, which proved very interesting to the visitors and satisfactory to the inventor.

At the conclusion of the meeting all expressed themselves as being thoroughly satisfied with the work done and amply repaid the time they had taken to attend the convention. It was decided that the time and place of the next meeting be left with the executive committee.

President Bernau, of the State association, who is also treasurer of the American National Retail Jewelers' Association, is making a trip to Germany, where he will attend a convention of the watchmakers of that country. He carries with him greetings from members of the North Carolina and national associations to their brothers across the water.

Joseph Haskell Receives Discharge in Bankruptcy After Referee Exonerates Him of Charges of Fraud.

The long struggle between Joseph Haskell, formerly a jeweler at 37 Maiden Lane, New York, and some of his creditors, which has been in progress for the past five years, was terminated last week when the bankrupt jeweler was granted a discharge in bankruptcy by Judge Hand in the United States District Court of New York. This is a vindication for Haskell as strong effort was made on the part of the attorneys representing certain creditors of Mr. Haskell to prove that he had committed illegal and fraudulent acts prior to the filing of the petition in bankruptcy against him.

The specifications submitted by attorneys for the creditors, objecting to the discharge of the bankrupt, alleged that Haskell, with intent to conceal his financial condition, destroyed or failed to keep books of accounts on record from which such information might be ascertained, and that within the four months immediately preceding the filing of the petition he removed, destroyed or concealed property then belonging to him, with intent to delay, hinder or defraud his creditors. During that period it was alleged he sold a large quantity of merchandise for cash for which he received more than \$7,500 and that he retained this money in his own possession wrongfully and wilfully, failing to deposit it in his regular business banks or to account for it in his business books of accounts, and that he concealed the same or transferred it to persons unknown to his creditors, with the intent of delaying or defrauding them.

It was also alleged that during this period the bankrupt had in his possession merchandise belonging to him valued at more than \$15,000 and that on the date of the filing of the petition he had in his possession not more than \$2,000 in merchandise and that he failed wholly to account for the difference between these amounts. It was further charged that, in contemplation of the bankruptcy and while a bankrupt, he concealed from the trustee assets of large value, the exact amount of which was unknown, but which the creditors believed to be in excess of \$10,000.

On these points raised by attorneys for the objecting creditors, Referee Townsend, acting as special master, finds that on the first specification the evidence does not justify the finding of anything more than mere negligence and carelessness on the part of Haskell and his bookkeeper and does not think the evidence establishes any actual intent on the part of either to conceal the financial condition of the bankrupt and, as Judge Holt previously held that such actual intent must be established, the referee finds that the charges contained in the first

specifications were not established by the evidence.

The referee further reports that, from the conflicting theories of the two accountants, based on the evidence as to the literal tenor, of which there seems to be little difference, the weight of evidence did not establish the charges of concealment made in the second and third specifications, taking into account the facts that the bankruptcy was an involuntary proceeding which was preceded by negotiations with the bankrupt's creditors and that the bankrupt was absent from New York a great deal and relied exclusively, in respect to his books, on his bookkeeper.

Joseph Haskell, who was in business at 37 Maiden Lane, under the firm style of Joseph Haskell & Co., called a meeting of his creditors in the Fall of 1904, at which time he showed his liabilities to be about \$34,000 with assets of about \$6,000. Bankruptcy proceedings were immediately filed by Ingomar Goldsmith & Co. and other creditors and a receiver appointed for the creditors. The liabilities as found by the receiver were about \$30,000 and the assets which were appraised at \$1,800 were later sold for \$1,400. An offer of 35 per cent. in settlement of all claims was made during the course of the proceedings and subsequently withdrawn. Haskell was examined in bankruptcy by attorneys for the Jewelers Board of Trade, for the trustee in bankruptcy and for the creditors, and although the examination continued for a long time nothing of a material character was brought out to establish fraud or concealment and the case was dropped by the Board of Trade, but was continued by other attorneys.

When the bankrupt came up for a discharge Ingomar Goldsmith & Co., through their attorneys, filed objections and followed this up by a very thorough examination of the bankrupt and in the course of a very strongly contested proceeding they alleged that they showed that he improperly disposed of and concealed a large quantity of his assets within a few months of the time the bankruptcy proceedings were filed against him.

On the strength of the petition and on the evidence of various persons that the bankrupt's debts had been contracted by fraud and that the bankrupt had disposed of property fraudulently, Ingomar Goldsmith & Co. began an action in the New York Supreme Court to collect the amount due them on the ground that a debt contracted by fraud cannot be discharged in bankruptcy and the right of action will lie irrespective of bankruptcy proceedings. It was in this action that an order of arrest against Haskell was issued, which was later set aside and the action dismissed.

Attorney Arthur Falk, who represented Mr. Haskell throughout the proceedings, in speaking of the case, said that the outcome of all the proceedings against Mr. Haskell conclusively proved that the allegations of fraud and concealment and other charges were not properly founded and that the outcome placed him before his creditors and the public with a clear record. Levy & Haff appeared for the objecting creditors.

Seventy-fifth Anniversary of the Founding of the Business of the Snow & Westcott Co.

Seventy-five years ago to-day occurred the founding of the business now conducted by the Snow & Westcott Co., Providence, R. I., and the long and successful career which marks the history of this concern and its predecessors is well worthy of recognition.

The business was founded by George Westcott and Smith-Owen, on June 23, 1834, in partnership with Alexander Hunter under the firm name of Hunter, Owen & Westcott, occupying the attic of an old wooden building on the south side of Steeple St., Providence, R. I. This partnership was of short duration, Mr. Hunter withdrawing after a period of six months. The two owners continued, assuming the firm name of Snow & Owen.

As the business increased the firm moved to more commodious quarters, and early in 1840 occupied the entire second floor of the Snow & Allen building, on the corner of Broad and Dorrance Sts. In 1859 Charles L. Richards, a native of Attleboro, Mass., was admitted as a partner and the firm became G. & S. Owen & Co. At the close of two years, however, he withdrew, his interest being purchased by Julius A. Westcott. About the year 1866 another partner, Eben L. Allen, was added.

Continued years of prosperity made it necessary for the firm to find a building more suitable for their business and they erected a two-story brick structure at Snow and Westcott Sts. Years rolled by and the once quiet and active men were growing old. In 1872 a New York office was established. In 1872, James P. Snow, the New York salesman, was admitted to the partnership, and three years later Charles E. Westcott, the bookkeeper in the factory, was also admitted, succeeding Mr. Taylor after the latter's death.

With the impetus given by the younger men the firm increased its capacity. In 1880 Mr. Allen withdrew from the firm and the Messrs. Owen, who for about six years prior to this time had relinquished the management of the affairs to the junior partners of the firm, now made only occasional visits to their factory. The semi-annual of the firm's establishment occurred on June 23, 1884, and was fittingly commemorated.

The operation of the concern continued without any change until the death of Smith-Owen in April, 1889. The firm continued in business retaining the same name until June 1, 1891, when the withdrawal of the senior partner occurred, Mr. Westcott having purchased the interest of Smith-Owen on Jan. 1, 1890, and Mr. Snow making a similar purchase of George Owen's interest on March 2, 1891. The old firm name of Snow & Westcott was changed to Snow & Westcott on April 17, 1889. Smith-Owen died after a brief illness and the younger brother, George, died the following October.

The business was continued under the management of the Messrs. Snow and Westcott until March 1, 1908, when it was incorporated as the Snow & Westcott Co., with James P. Snow as president and manager, and Charles E. Westcott as treasurer. Mr.

Snow died Jan. 22, 1909, and L. Henry Jurgens was elected vice-president and made manager of the New York office.

It is of interest to know that some of the men who are still employed by the Snow & Westcott Co. have served an unusually long time as employees of that concern and those preceding it. Among the older employees are James Mathewson, who has served the interest of this concern and its predecessors continuously for 56 years; J. George Baacke has been with the firm 50 years, and James R. Butts for 53 years, while Cornelius S. Cincliff has served the firm for 47 years. There are about 25 men now employed by the Snow & Westcott Co. who have been in the employ of the firm for over 20 years.

Exports of Jewelry, Silverware, Clocks, Watches and Kindred Lines from the Port of New York.

WASHINGTON, D. C., June 16.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Auckland: 36 cases clocks, \$781.
- Antofagasta: 7 cases plated ware, \$105.
- Antwerp: 1 package optical goods, \$414; 1 package optical goods, \$125.
- Bangkok: 11 cases clocks, \$214.
- Berlin: 2 cases clocks, \$135.
- Budapest: 1 case scopes and views, \$180.
- Barcelona: 1 case plated ware, \$360; 5 cases jewelry, \$100.
- Buenos Ayres: 1 case plated ware, \$943; 20 cases clocks, \$518; 1 case watches, \$507; 130 cases clocks, \$3,419; 16 cases plated ware, \$2,253; 1 package optical goods, \$241.
- Calcutta: 64 cases clocks, \$1,039; 46 cases clocks, \$642.
- Callao: 2 packages optical goods, \$331; 57 cases clocks, \$401.
- Colombo: 27 cases clocks, \$346; 5 cases clocks, \$155; 16 cases clocks, \$281.
- Colon: 1 case silverware, \$262; 2 cases jewelry, \$273; 1 case watches, \$168; 30 cases clocks, \$120.
- Dundee: 11 cases clocks, \$640.
- Ft. Madryn: 5 cases clocks, \$105.
- Fayal: 10 cases clocks, \$126.
- Guayaquil: 4 cases clocks, \$123.
- Genoa: 1 case jewelry, \$500.
- Hamburg: 7 packages optical goods, \$1,605; 1 case jewelry, \$500; 1 package optical goods, \$500; 4 cases watches, \$4,233.
- Havre: 10 cases clocks, \$512; 1 case jewelry, \$275; 2 packages optical goods, \$225.
- Havana: 3 cases plated ware, \$226; 7 cases jewelry, \$1,057; 25 cases clocks, \$226.
- Liverpool: 2 cases plated ware, \$218; 27 cases clocks, \$657; 1 case jewelry, \$200; 13 cases clocks, \$543; 3 cases thermometers, \$200; 1 case silverware, \$686; 4 cases clocks, \$153; 2 cases plated ware, \$312; 3 cases watches, \$1,500; 3 cases watches, \$1,500.
- London: 7 cases watches, \$1,008; 2 cases thermometers, \$240; 8 packages optical goods, \$4,274; 10 cases clocks, \$244; 11 cases watches, \$1,542; 11 packages optical goods, \$4,644; 40 cases clocks, \$918; 39 cases clocks, \$408; 93 cases clocks, \$3,189; 5 cases plated ware, \$110; 1 case watches, \$1,050; 2 packages optical goods, \$207.
- Manila: 6 cases plated ware, \$1,081; 2 cases watches, \$495.
- Melbourne: 3 cases watches, \$970; 110 cases clocks, \$2,438; 107 cases clocks, \$931; 36 cases plated ware, \$728; 5 packages optical goods, \$521; 1 case watches, \$115; 122 cases clocks, \$3,708.
- Milan: 2 cases jewelry, \$500.
- Montevideo: 5 cases plated ware, \$361; 44 cases clocks, \$549.
- Naples: 1 case jewelry, \$300.
- Rio de Janeiro: 1 case optical goods, \$103; 81 cases clocks, \$241; 1 case watches, \$866; 18 cases clocks, \$266.
- Santiago: 3 cases plated ware, \$459.
- Shanghai: 38 cases clocks, \$668.
- Sienna: 1 case watches, \$480; 6 cases clocks, \$220.
- Sib le: 27 cases clocks, \$768.

- Southampton: 35 cases clocks, \$232; 1 package optical goods, \$500.
- Trinidad: 5 cases plated ware, \$200.
- Valparaiso: 4 cases plated ware, \$143.
- Vera Cruz: 8 cases clocks, \$111.
- Wellington: 32 cases clocks, \$662.

Paris Pearl Market.

PARIS, June 9.—Business during the month of May was satisfactory and prices have reached the highest point of the year. All dealers are open for speculative goods whether they have an immediate call for them or not. Large round pearls are continually in demand as are also small fine pearls of 1 to 2 grains. Rows of small pearls have been sold in enormous quantities.

Transactions between London and Paris are now going on in a regular way and it is distinctly evident that there is great activity in business. South American buyers are also buying heavily and certain European countries are absorbing pearls in unlimited quantities. Everybody is looking forward hopefully and prospects are good if no political changes bring us unexpected trouble.

Fine sapphires and fine emeralds are selling in fair numbers, while there is also a demand for fine rubies. G. K.

Suggests the Adoption of National Gem.

IN a letter to the New York Times last week Julius Wodiska, a well-known New York jeweler, suggests the adoption of a national gem, the same as we have adopted national and state flowers. His letter reads:

Nations and States are represented by floral symbols, as, for example, "France has the lily, England the rose," while New York State, as the result of a vote taken among public school pupils, also has the rose, as Pennsylvania, by a similar election, has the golden-rod, and Ohio the scarlet carnation. Kansas, by action of the State Legislature, is represented by the sunflower.

Why not have the United States and each of our States represented by a gem?

Let the election be by the school children, and, if such action can be secured, let the States' legislators ratify the choice of the coming men and women of America. The agitation and discussion of the subject would tend to concentrate the attention of school children upon precious stones, and through the study of these beauties of nature, upon mineralogy and geology, to the educational betterment of the children.

To encourage the offering of further suggestions I will present one. How would the sapphire, most beautiful and valuable of blue gems, serve to represent our country. There are white sapphires as well as blue, and these, if combined with the ruby, which is the same mineral as the sapphire—corundum—would give us the red, white and blue. Or, why not the new gem mineral kunzite? This is an original American gem, discovered within a decade at Pala, Cal. This beautiful lilac or pink amethystine colored spodumene is named after an American, Dr. George Frederic Kunz, the highest authority on gems in America, if not in the world.

New York City might be represented by the rich red garnet, which has been found in the rocks of Manhattan Island, in large and beautiful crystals, too.

Whether Ireland has the emerald copyrighted or not I do not know, but this gem of the first rank is likely to prove a strong candidate for representative honors.

Shall we have a national gem? If so what is it to be?

JULIUS WODISKA.

Gus Huber, of Huber & Bunker, Superior, Wis., is visiting his old home in Germany after an absence of 16 years, and word has just been received of his marriage there.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Jeweler Not Seen Since He Disappeared Mysteriously May 16 After Going Out for a Walk.

ARK. N. J., June 18.—The wife and child of Felix Francis De Veux, a watchmaker and jeweler who disappeared mysteriously from this city, May 16, are making every effort to discover his whereabouts, and have invoked the aid of the police and searchers throughout the country, who, as reported in THE JEWELERS' CIRCULAR—WEEKLY, have been watching out, and in case he should appear in their town to communicate with this journal.

De Veux, who carried on a small business as watchmaker and jeweler at his residence, 3 S. 11th St., in the Roseville sec-

tion, has the belief that he had either wandered away in a fit of mental depression or had met with foul play. The last hypothesis, however, was not considered seriously, because he had but little money with him, and there would be no reason for him to be attacked, as he was not known to have an enemy in the world.

The missing jeweler is 36 years old, and is about five feet eight inches high, and weighs about 170 pounds. He has a dark and sallow complexion and very good teeth. He has no marks or scars, his only unusual feature being his left hand, the first two fingers of which had been crushed in an accident.

Resolutions Passed by the Pennsylvania Retail Jewelers' Association.

The following were the official resolutions of the Pennsylvania Retail Jewelers' Association passed at the annual convention held at Harrisburg recently.

Whereas, The citizens of Harrisburg, through His Honor the Mayor, have welcomed the Pennsylvania Retail Jewelers' Association and have extended to them the courtesy of the city, and,

Whereas, The jewelers of Harrisburg, through their untiring efforts, have made our stay both pleasant and profitable, we, the members of the Pennsylvania Retail Jewelers' Association, put ourselves on record in the following resolutions:

Resolved, That we extend our sincere thanks to the citizens and particularly the jewelers of Harrisburg, for their magnanimous hospitality.

Resolved, That we most heartily commend the administration of President Ira D. Garman and trust that he will continue to be of even greater benefit to the craft in the future. And that we appreciate the untiring and unceasing efforts of our Secretary, C. S. Wiley, and the officers of the association, for their work in the interest of our association.

Resolved, That we do not favor the establishment of an official organ for the reason that we consider the present trade journals entirely capable in representing and protecting us.

Resolved, That the thanks of the association be and are hereby tendered to the Jewelers' Club of the City of Philadelphia, for the courtesy extended to this association in the use of their club house during the past year.

Resolved, That we do not favor manufacturers selling complete watches except in special high grade movements.

Resolved, That we heartily favor the co-operation of our members in upholding the stamping laws, and commend the Manufacturing Jewelers' Association, of Newark, N. J., for their interest in the matter.

Resolved, That the thanks of this association be extended to the jobbers and manufacturers for the interest they have taken in our association's welfare.

Resolved, That we emphatically condemn the practice of certain railroads in selling watches direct to their employees.

Resolved, That we condemn the practice of manufacturers and jobbers sending net prices in open mail, and we request that the trade journals discontinue practice of advertising net prices in their journals.

Resolved, That it is the sense of this association that we concur and hereby ratify the action of our committee upon the fixed selling prices of movements and cases as presented to the manufacturers.

Resolved, That the thanks of this association be and are hereby tendered to the several members of the craft for their able addresses and discussion of matters of interest to our association. That we commend the actions of the national association during the present year.

Resolved, That we recommend the various watch companies who have changed their plans of marketing their product, with a view of strengthening the regular retail jewelers; and, be it further

Resolved, That we heartily commend those watch manufacturers who are marketing their products entirely through the legitimate jobber and retail jeweler.

Resolved, That we recommend to watch, jewelry and kindred material dealers the adoption of a new discount key, to be known as the association key, to be used in all of their catalogues and advertisements, the key to be disclosed only to the legitimate retail jeweler, and in every case to be sent under separate cover from the catalogue house and as sealed mail only.

Resolved, That we congratulate Mr. Archibald on his successful administration the past year of the National Association and heartily recommend his re-election for the coming year at Omaha, in August.

Resolved, That we ask the makers of gold filled watch cases not to exchange any guaranteed cases unless returned by the original sellers.

Texas Opticians Elect Officers at the Sixth Annual Meeting Held in Dallas, Tex.

DALLAS, Tex., June 16.—Discussion of technical papers, the election of officers and the selection of Dallas as the next place of meeting was the programme Thursday that ended the sixth annual session of the Texas Opticians' Association. It was a splendid meeting, the members said, more than 50 being present.

Officers were elected as follows: L. E. Whitmore, Dallas, president; W. B. Mann, Decatur, first vice-president; C. F. Hunter, Rockport, second vice-president; R. A. Terrell, Dallas, secretary; Henry Iversen, Corsicana, treasurer.

President Whitmore announced the following committee appointments: Executive—Henry Iversen, Corsicana, chairman; A. F. Thompson, Dallas; C. F. Hunter, Rockport; J. C. Graves, Kaufman; E. A. Bohns, Austin. Membership—Mrs. Mollie Armstrong, Brownwood, chairman; N. N. Binns, Fort Worth; C. P. Pittman, Ennis.

Among the topics discussed were "Optometry," by J. H. Atkinson, Naples; "Ski-ascopy," by A. F. Thompson, Dallas; "Optical Instruments," by I. Block, Waco. All of these were discussed generally and several other matters of interest to the organization were handled.

The executive committee was instructed to redraft the optometry bill, presented at the last legislature, and present the new draft at the meeting to be held in Dallas next year.

The Colorado Retail Jewelers' Association and the Colorado State Optical Society will hold a joint convention at the convention hall at the Albany Hotel on Tuesday and Wednesday, June 29 and 30. Very elaborate preparations have been made for the entertainment of all those who will attend; there will be a number of talks of interest in both lines, and several matters of importance will be discussed. After the business of the convention has been disposed of an elaborate banquet will be tendered the members, after which a program of entertainment will be rendered, which has been arranged by the committee of the Denver jewelers.

DE VEUX, MISSING JEWELER.

tion, and had also been employed some time by the Crescent Watch Co. at the factory here, dropped out suddenly on Sunday, May 16, although he had been swallowed up by the hospitals and other institutions have been searched, no trace of De Veux has been discovered, and nothing can be learned for his disappearance.

On the morning of the day that he disappeared, Mr. De Veux and his wife had been to church, and had returned home for the afternoon. After dinner, De Veux started for a short walk, saying he would take a smoke in the open air, and as the last that his wife or friends saw of him.

De Veux had not been feeling well, and he was not in bad health, nor was he known to have any business troubles. He was highly respected by his employees and fellow employes in the Crescent Watch Co. His credit in the trade was good, and he had no debts to speak of. He was a home-loving man, of a distinctly quiet character, and did not drink or dis-

It was thought that he must have been in an accident, but all inquiries at his home and elsewhere showed this to be untrue, and his family were forced to

The Oriental Turquoise Matrix

This gem, unparalleled in beauty by anything in the blue variety of opaque stones, and positively occupying the first position in the matrix family, is in every respect superior to anything of its kind yet known in the stone market. Being of an exquisite color that does not fade, varying in shade from the most delicate sky blue to the deepest azure, superbly marked by veins of golden brown or pure black matrix, and lastly, by reason of its superior hardness admitting of the highest polish ever attained by any turquoise, it is one of the most beautiful of gems.

Its possibilities, as a part entering into the composition of jewelry, are absolutely unlimited.

Eastern Manufacturing Jewelers Enjoy Outing.

Members of New England Manufacturing Jewelers and Silversmiths' Association and Their Guests, Numbering Over 400, Participate in Parade, Sail, Shore Dinner and Visit to Training Station at Newport, R. I.

PROVIDENCE, June 19.—The 30th annual outing of the New England Manufacturing Jewelers and Silversmiths' Association has gone into history. The executive committee worked hard to provide the members and their guests with something different from heretofore and in this they were successful, although not in the full measure they had hoped for. Yesterday was not soon to be forgotten. The rain the night before tempered the atmosphere so that the day was not too hot and the dust in the streets so that the short of the morning was not tiresome or unbearable. From the time the steamer *Warwick* left her dock at Crawford St. at 11 o'clock in the forenoon, until she pulled up again, shortly before 8 in the evening, the committee of arrangements had been working to offer, and everyone enjoyed to the utmost.

About 450 and 500 manufacturing jewelers and guests from all sections of New England, and a generous sprinkling from New York, Boston and other parts of the country—yea, even unto the Philippine Islands—gathered principally from this city and the harbor gathered for the fun. After a full onslaught on the clams at Field's, the party invaded the United States Naval Training Station at Newport and for two hours peered into nooks and crannies of the barracks, inspected the ships and looked over the carefully maintained mess rooms where the Government trains men for her navy.

The annual summer outing of the New England Manufacturing Jewelers and Silversmiths' Association is always a day to which the members look forward with many anticipations of real joy and begin weeks ago to arrange their affairs that they may partake in the good time the executive committee always strives to provide. Yesterday was no exception, and at least two of the members of the gathering—Samuel H. W. and James B. Macdonald—who have been absent on extended trips to the West Coast, timed their return so as to be in Providence on Thursday, and thus be in time to swim for the annual event.

In answer to the invitations sent out by the executive committee, members and guests to the number of nearly 500 laid aside their business cares and worries and, heedful to the admonition of more than a century ago, that "if any man will be rich, let him be satisfied with his business 'swat' him," job lots, dating and express rebates and similar trade practices were forgotten, and everyone sought to have all the fun possible.

The vanguard of the excursionists began their gathering at Free Masons' Hall, corner of Water and Pine Sts., shortly after 10 o'clock. Everett L. Spencer, Harry Cutler, Harry Mays and Frank B. Reynolds being present to greet the earliest arrivals. Soon after the Attleboro contingent put in their appearance, and it became evident that the number in attendance would be a record-breaker, and this was fully verified by the last man had reported.

At 10.30 the party having increased to nearly 400, Chief Marshal Frank B. Reynolds arranged his line with Mayor Henry Fletcher and President Harry Cutler in the van, followed by the other officers, past officers and members of standing committees and the members and guests in columns of four, with the First District Coast Artillery Band, Rhode Island National Guard, Lieut. Walter L. Anthony, commander, at its head. At the word of command the "boys" stepped off to the always quickening strains of Reeve's famous "Second Regiment March." Each of the marchers carried a Japanese umbrella, and as the long line proceeded through the streets it presented a kaleidoscopic color scheme that was favorably commented upon by the large crowd that lined the entire route of march.

The procession moved through Dorrance, Westminster, Mathewson, Weybosset, Custom House and South Water Sts. to Crawford St. bridge, where the steamer *Warwick* was boarded for the customary sail down the bay. A few minutes after 11 o'clock the cables were thrown off and the trip seaward was commenced. As the steamer moved down the harbor the band played patriotic airs and salutes were exchanged with craft in the river and manufacturing establishments on the west side.

Arriving at Field's Point a "special shore dinner—plus"—was served under the direction of Col. S. S. Atwell. Eight long tables, each seating 70 persons, had been set up and at these the excursionists were soon seated. Satiating their appetites with succulent clams and other nice things that go to make up Rhode Island's most famous product—the clambake—the members of the association denied in toto by the immense quantities of viands that they caused to disappear that jewelers subsist entirely on goldfish and diamond-backs. All that they wanted were clams and clams and more clams, and then some of the other fixings.

The menu included clam chowder, brown bread, rolls, Bermuda onions, radishes, olives, pickles, baked and broiled bluefish, fried eels, clam fritters, French fried potatoes, lobsters, soft shell crabs, baked clams, Indian pudding, lager, ginger ale, cigars. By 1.15 the appetite of the most ravenous had been appeased, the party re-embarked and the steamer's prow was turned toward Newport. A sharp wind was blowing and this caused a heavy sea, but no one noticed this. A little thing like a high wind did not bother the jewelers. They were too philosophical and took things as they came.

The arrangements of the executive committee had provided, after the party's arrival at the City-by-the-Sea, an electric car ride of about two miles to the United States Naval Training Station. Through the courtesy of Commandant Lieut. W. F. Fullam, commander of the station, messengers were detailed to conduct the party about the station, Boatswain Healey being in charge. While every courtesy possible was accorded the visitors, much disappointment was expressed because of the absence of the va-

rious drills which had been anticipated. The steamer had been scheduled to arrive at 3 o'clock, but a slight delay in leaving Field's Point and the strong head wind which blew, kicking up the heavy sea, caused the steamer to dock at Newport nearly an hour later. By that time, the station authorities being obliged to follow the regularly prescribed routine of work and drills, had completed the latter, and the visitors were only in time to witness the last of the apprentices marching to their barracks as the special cars reached the bridge leading to the training station and which divides it from the island on which Newport is situated.

However, the visitors were ceremoniously received, the last battalion of apprentices to leave the parade ground being drawn up in review as the jewelers marched by. The visitors were then taken through all the building and in one of the barracks they were fortunate enough to witness a squad of the nation's future seamen swinging their hammocks and making preparations for turning in when they were piped to quarters. In one of the messrooms another squad was seen at the dining tables and the "rations" furnished in generous allowance made several of the party wish for an invitation to "fall-to" with the young blue-jackets.

Just before 5 o'clock the electric cars were again boarded and the merry party returned to the boat, which immediately got under way, nearly carrying with it ex-Mayor Robert Franklin, of Newport, who had been kidnapped and taken aboard by President Cutler, with whom Mr. Franklin is serving as members of the General Assembly of the State. The former succeeded in making his escape just as the gangplank was hauled in, and as the *Warwick* left the dock the band, which had given a concert while at the training station, struck up the strains of "The Girl I Left Behind Me."

The trip up the bay was enlivened by a concert by the band, with solo and singing, while on the lower decks the committee served an excellent and substantial lunch of salads and sandwiches, which was thoroughly appreciated. The steamer arrived in this city about 7.30 o'clock, in time for the out-of-town members and others to catch their trains.

The arrangements for the outing were in charge of the executive committee, consisting of Everett L. Spencer, chairman; Harry M. Mays and Frank B. Reynolds. The other officers are as follows: President, Harry Cutler; vice-presidents, Theodore W. Foster, Albert A. Bushee and George K. Webster; treasurer, Harry M. Mays; secretary, Everett L. Spencer; directors, Roswell C. Smith, George H. Holmes, Frank B. Reynolds, T. S. Carpenter, Arthur O. Ostby, Charles T. Paye, William P. Chapin, William A. Schofield and Harold E. Sweet; advisory council, Theodore W. Foster, Wm. P. Chapin, Roswell C. Smith, Arthur O. Ostby, Eustace Crees, Everett L. Spencer, Everett I. Rogers, Charles E. Hancock, Wade W. Williams, Alfred K. Potter, Harry M. Mays, George H. Calhoun, Frank B. Reynolds, Edward B. Hough, John M. Buffinton, Sigmund Lederer, Frank T. Pearce, Frederick A. Ballou, William A. Copeland, Henry G. Thresher, Clarence M. Dunbar, George K. Webster, Charles T. Paye, Walter S. Ballou, T. S. Carpenter,

A Few Job Lots.

It was startling to see Horace Steere do a job.

He couldn't wait to shake the pepper out of the shaker, but put the shaker and all into the pot.

Robert E. Budlong, president of the Manufacturers' Board of Trade, represented that organization.

Morse had as guests Harry Heacock, of P. L., and Fleetwood Lanneau, of New York. Mr. Morse is the New York representative of Blackinton, of North Attleboro.

Donald and Brower were fresh from the East with a lot of new stories. Not a job straight goods, every one of them.

One wondered why the "plus" was on the They found out.

It is surprising how those New Yorkers could do it.

Rueckert Mfg. Co. gave each excursionist a souvenir in the shape of a pocket match of soft leather, filled with matches. On the right place for matchless cases, trays, novelties, Rueckert Mfg. Co., Providence.

He came late and went early. He simply ate with the boys. His usual unrivalled merry-making was missed.

"Lind and "Pem" Eddy made the run to Point in the former's auto, and were at the point to receive the crowd when they got there.

The surviving ex-presidents of the association were H. Fanning, Henry G. Thresher, John Buffinton and Frank T. Pearce—were present.

As a venerable quartette that gathered in the dining hall just after the dinner. Their ages was 312 years. They were William H. 83; Pembroke S. Eddy, 79; Joseph H. 78, and Oren C. Devereux, 72.

Leeder and Bernkopf cleaned up the last pinocle.

Devereux had as his guests James Campbell, Walter A. Burdick. At Newport they went to the Training Station in a landau.

Four men were well represented. Among them were W. H. Welch, with Plume & At-I. M. Steele, of the Waterbury Brass Co., and G. Welton, of the Waterbury Rolling Mill.

Kirkley, who was present from Toledo, came down to attend his class reunion at the University commencement.

There were 442 at the tables, without the bands-ome one's that for a crowd?

Leeder was the biggest man in the crowd. six feet five inches tall and weighs 267 pounds.

Gilmore, of New York, resented being called a job when he began eating lobster.

Pearce was the envy of all his companions in a natty cap covered with Shriners' emblems and thread.

Fletcher exchanged courtesies with Mayor of Newport, during the brief stay in that city.

Indianapolis came I. Grohs, Joseph E. and Charles Lauer. A lively trio.

George G. Pearce had as his guests Fred I. and Benjamin P. Moulton. The three were the delegation that represented Palestine Temple at

the recent session of the Imperial Temple of the Mystic Shrine at Louisville, Ky.

A naval apprentice, with his dunnage bag on his shoulder, was the envy of many in the crowd. Some thought he would make a good salesman, judging from the ease with which he carried the kit.

When Frank Reynolds was asked by a newspaper man if they were to have any novelties, he promptly replied, "No, simply manufacturers."

The captain's statement seemed to have very attractive qualities.

THOSE WHO WERE PRESENT:

Attleboro—J. Thomas Inman, Charles E. Moore, John J. Hodge, A. S. Ingraham, F. C. Wilmarth, E. E. Cobb, R. B. Macdonald, Albert A. Bushee, Ernest M. Bliss, Herbert C. Bliss, James F. Waltham Watch Co. Formally Announces Its Policy to Market Its Products Through Jewelry Trade Exclusively.

WALTHAM, Mass., July 16.—As noted briefly in the last issue of THE JEWELERS' CIRCULAR, the Waltham Watch Co. has sent the trade circulars announcing its policy to market its product only through legitimate jewelry channels, and telling how to reach these channels by listing Waltham watches in the future.

The circular which went out from Waltham under date of yesterday reads:

THE RETAIL DEALERS IN WALTHAM WATCHES:

Our company desires to market its watches exclusively through the regular retail jewelry trade. We believe it is for the interests of retail watch dealers that watches should not be handled by mail-order houses nor by jobbers in dry goods, or general merchandise. With this object in view, we have requested that retail dealers to omit Waltham watches from their catalogues. We expect that our policy will be complied with in the spirit in which it is made, but in the event of refusal in any instance we shall nevertheless do our utmost to carry out the policy to protect the retail trade. This important step has been taken for the benefit of the legitimate retail dealer and the protection of his interests, also because we know that he offers the means by which our watches can reach the public with the greatest satisfaction and convenience.

We believe that we can confidently count on the support and assistance in this matter of the mutual concern.

We shall be glad to have an acknowledgment from you of this notice.

"WALTHAM WATCH CO."

The circular which Robbins & Appleton, sole agents of the Waltham Watch Company, sent out to jobbers, under date of July 16, reads as follows:

The Waltham Watch Co., under date of June 16, has mailed a circular to the retail watch dealers of the country declaring its attitude as to the handling of Waltham watches by mail-order houses. Copy of this circular we now enclose for your information.

In order to make our position thoroughly effective, we must ask you as a jobber and one of our agents to assist us in controlling the distribution of our goods, and in keeping them in the hands of legitimate watch dealers. We must request that you do not sell directly or indirectly Waltham watch movements or watches to mail-order houses or other houses doing business in this manner. As we must hold our own jobbers responsible for the distribution of Waltham watch movements sold to them, and as we cannot well follow the goods when sold by you to jobbers not on our list, we must take the responsibility of not recognizing so-called "sub-jobbers." Only jobbers recognized by us as such are to whom we sell direct.

We are therefore requested to dispose of Waltham watch movements from this date only to the legitimate retail watch dealers and to no others, and to observe the terms and discounts established, and we rely on you to inform such of your customers as may be interested hereby.

We believe that this position will have the general approval of the entire watch trade—wholesale and retail—for whose benefit chiefly it has been made, and we therefore will be glad to hear from you if you plan as outlined for your guidance will be in your own hearty sanction and support.

In writing by this mail a letter similar to the one which we are enclosing to each one of our customers.

An acknowledgment at your convenience will greatly oblige us. Yours truly,
(Signed) ROBBINS & APPLETON.

American Association of Opticians Opens Its Annual Convention in Atlanta.

ATLANTA, Ga., June 21.—The 12th annual convention of the American Association of Opticians opened in the Convention Hall here to-day with a large attendance from all parts of the country. The president, H. J. Cook, Knoxville, Tenn., delivered the annual address, reviewing the growth of the society and congratulating the members on the spread of optometry laws, which are now effective in 24 States.

The programme for the remaining days of the convention follows:

TUESDAY, JUNE 22—A. A. O. DAY.

Morning Session, 10 o'clock.
Invocation, Dr. John E. White, Atlanta.
Address of welcome in behalf of the State of Georgia, Hon. Hoke Smith, Governor of Georgia.
Address of welcome in behalf of the City of Atlanta, Hon. Robert F. Maddox, Mayor of Atlanta.
Address of welcome in behalf of Georgia State Optician Society, Chas. H. Kittrell, president of Georgia society.
Address of welcome in behalf of Atlanta Optical Society, Jno. L. Moore, president of Atlanta Optical Society.
Address, Asa G. Candler, president of Chamber of Commerce.
Address, Sam D. Jones, member of Chamber of Commerce.

Response, Dr. T. G. Atkinson, Chicago.
Manufacturers and inventors' hour.—Exhibitors will be allowed 10 minutes in which to address the convention on the merits of their inventions or goods.

Afternoon Session, 2 o'clock.

Address, "Dynamic Skiametry," A. Jay Cross, New York.
Address, "An Optical Record System," Hardwick Ruth, Alabama.
Address, "Optometrical Therapeutics," John C. Eberhardt, Dayton, O.
Question Box.
Address, "Administration of the New York Optometry Laws With Suggestions for Other States Seeking Optometry Legislation," Chas. F. Prentice, New York.

Other prominent speakers are to be added. Prof. Charles Sheard, of the Ohio State University, is to read a paper. His subject will probably be "The Spirit of Research in Optics and Some of Its Immediate Problems."

Experiences of winners and losers in legislation. Joint conference meeting of advisory committee. State board members and all interested in optometry laws, to discuss and take action upon uniformity in laws, educational requirements, exemptions, examinations, rules and working forms for the guidance of State boards, and such other matters as may be compiled in convenient printed form for the use of State boards and State societies desiring information.

Adjournment and local entertainment.

WEDNESDAY, JUNE 23—SCIENTIFIC SECTION DAY.

Morning Session, 9:30 o'clock.
Address, by W. J. Eisensmith, chancellor, Charleston, W. Va.
"The Evolution and Decadence of the Sense of Vision," by John Lewis Beard, Charleston, W. Va.
First prize thesis, "Muscular Insufficiencies, Their Optical Correction," by H. Harcourt Carter, Barbados, British West Indies.
Second prize thesis, "Muscular Insufficiencies, Their Optical Correction," by O. L. Altenberg, Saginaw, Mich.
Third prize thesis, "The Anatomy of the Face, Orbit and Eye-Ball," lecture and chart, by J. W. Langley, Sylacauga, Ala.

Afternoon Session, 2 o'clock.
"The Spirit of Research in Optics and Some of the Immediate Problems," by Prof. Chas. Sheard, University of Ohio.

"Prisms and Their Effect Upon Binocular Fixation," by John C. Eberhardt, Dayton, O.
"Up-to-date Optometry," by F. Nelson Wingate, F.B.O.A., London, Eng.

Chancellor Eisensmith will, at the conclusion, open a quiz upon the first prize thesis; each

speaker will be limited to five minutes. If time permits, the second and third thesis will also be considered.

THURSDAY, JUNE 24—BUSINESS DAY.

Morning session, 9:30 o'clock.
Address, "Anatomy," J. W. Langley, Alabama.
Address, "Business Side of the Optometrist," S. S. Grant, Canada.
Usual order of business, reports of committees, election of officers, adjournment.

Government Backs Down in Suit to Collect Fifty Per Cent. Duty on Agates, Etc., and Will Take no Further Appeal.

A decision was handed down recently in the United States Circuit Court, New York, in the case of the United States vs. Albert Lorsch & Co., which arose over a contention as to the duty payable on manufactures of agate, cornelian, jasper, onyx, rock crystal, etc. The decision sustained the contention of the importers that the duty should be at 10 per cent. under par. 435, which holds that precious stones advanced in condition or value from their natural state by cleaving, splitting or cutting and not set, 10 per cent. ad valorem. The contention of the Government was that duty should be assessed at 50 per cent. under par. 115, which provides for manufactures of agate, etc., not especially provided for at 50 per cent. In view of this decision of the court, the Treasury Department last week announced that no further appeal will be taken.

The case came up first before the Board of United States General Appraisers, which ruled against the finding of the collector, who assessed the duty at 50 per cent. The decision before the Board of United States General Appraisers was practically a test case which followed the notice sent out by the Appraiser, some time previous, to the effect that such articles would be assessed for duty under par. 115 at 50 per cent. after a certain date. At that time the gem trade submitted arguments to the Assistant Secretary of the Treasury, showing that the decision on which he ruled did not bear upon articles intended for use in jewelry, that the decisions of the courts had been uniform in declaring such articles to be dutiable as precious stones and that even the decision on which he relied was in no way opposed to the reasoning of the former decisions.

When the matter was thrashed out by the Board of United States General Appraisers it was held that the merchandise belonged to the group of precious stones known and dealt in under their specific names, such as agates, garnets, rock crystal, etc., and that they were dutiable under the paragraph providing for precious stones advanced in condition or value at 10 per cent. The Government appealed and the case was taken to the United States Circuit Court, which affirmed the finding of the board in favor of the importers. The Acting Secretary of the Treasury last week notified the collector at New York that no further appeal should be taken and that the duties in excess of 10 per cent. should be refunded to the importers.

J. L. Pendley, Toccoa, Ga., has moved into larger and more commodious quarters which until recently were occupied by the local post office.

ON June 10th we received the following cable from our European office: "Syndicate advanced rough." We bought our rough at the right moment and had it cut in Amsterdam by our own men. Buy your diamonds now as the new importations are going to be higher in price. We are in a rising market and the longer you wait the more you will have to pay for diamonds of good quality. All our goods are of the same quality; our 200 to the carat as well as our 8 to 12 grainers. We are receiving weekly shipments and our Mr. H. E. Judels is always in the European markets.

George N. Schaeffer Convicted at Allentown, Pa., of Murdering Leopold Ermann, a Philadelphia Jewelry Salesman.

ALLENTOWN, Pa., June 21.—After a trial running through the better part of the week, George N. Schaeffer, a chicken raiser, residing near Schnecksville, this county, was convicted, Friday, June 18, of murdering Leopold Ermann, a traveling jeweler of Philadelphia, at his farm, Nov. 8, 1908, when the jeweler called at his home to deliver a ring which Schaeffer had ordered for his fiancée. The jury did not create long over the verdict, and when announced through their foreman that he had adjudged the defendant guilty of murder in the first degree Schaeffer gave up and collapsed in his chair.

Judge Trexler temporarily suspended the motion of the district attorney for a new trial and the petition of counsel for a writ of habeas corpus for an arrest of judgment pending the filing of reasons for a new trial to the sheriff's deputies to give their opinion to Schaeffer, who was carried to his cell and given medical attention. The situation is serious.

At the next session the court granted permission to defer sentence, giving defendant's counsel until July 6 to file reasons for a new trial. The verdict was a complete surprise to the defendant and his counsel, who had expected a verdict of manslaughter.

Schaeffer admitted while on the stand that Ermann visited him on Nov. 18, but that an hour later the jeweler went to Schnecksville, a mile away. The defendant was preceded on the stand by his former fiancée, Miss Florence Shirler, of Schnecksville, who stated that several days before Christmas Schaeffer had presented her with a gold band engagement ring, but denied that he had ever given her a diamond such as is alleged the prisoner had ordered of Ermann, and which the man was to have delivered on his ill-fated trip.

The most direct evidence against Schaeffer was furnished by Deputy Clerk of Quarter Sessions Oliver A. Lobst, who had possession of Ermann's valise after its recovery, and who declared that he had found in the valise a memorandum book belonging to Schaeffer.

Tennessee Jeweler Sends in Numbers of Watches Stolen in His Vicinity.

MUEL G. PARKER, Dyersburg, Tenn., writes to THE JEWELERS' CIRCULAR-WEEKLY of the numbers of watches that have been stolen recently in his section of the county, and suggests that if other jewelers would do the same and the trade will care to watch these lists as they are published from time to time many stolen watches will be recovered, the jewelers will save themselves annoyance in accepting stolen watches and on exchange and thieves will soon learn that it is a dangerous thing to steal watches.

Parker says he feels convinced that the majority of these watches have been stolen from the trade either for the purpose of being repaired or for sale. Those who are offered the articles described are requested to notify him directly

at Dyersburg, Tenn. The stolen watches include the following makes:

Elgin.—Nos. 1191031, 2899604, 4014596, 1171588, 6372834, 360395, 3563551, 1365623, 7562172, 11531035, 1219836, 10103122.

Waltham.—Nos. 867390, 3380300, 8120381, 1837303.

Illinois.—Nos. 731088, 971997, 217217.

Programme of the Annual Meeting of the Minnesota Retail Jewelers' Association.

The following is the programme for the coming meeting of the Minnesota Retail Jewelers' Association, which will be held in the West Hotel, Minneapolis, Minn., July 20, 21 and 22, 1909.

TUESDAY, JUNE 20, AT 2 P. M.

Call to order by the president.

Address of welcome by Mayor Haynes.

"Advertising, and What Would Be the Effect of a Federal and State Advertising Law?" By A. E. Paegel.

"Does the Retailer Need the Jobber?" By S. H. Clausin.

"The Fixed Selling Price, What It Means to Those Who Sell Manufactured Goods, How Can It Be Maintained and Who Holds the Key to the Situation?" By H. C. Carpenter, of the South Bend Watch Co.

WEDNESDAY, JULY 21, 9:30 A. M.

"How Can We Dispose of the Horological Question to the End That the People May Get Better Service, Either With or Without Special Laws?" (Speaker to be selected.)

"The Association Jeweler vs. the Independent Jeweler." (Speaker to be selected.)

New and unfinished business.

WEDNESDAY EVENING, 7:30.

"Organization as a Factor in Modern Business." By ex-Attorney General W. E. Young.

"The Law of Advertising and Sales and Its Relation to Retail Merchandising." By Robert A. Fay, advertising manager of the Elgin National Watch Co.

Unfinished business and the election of delegates to the National Convention.

THURSDAY, ALL DAY.

Picnic, chartered cars to Menetekonka, ride on lake, picnic dinner, and general good time.

Death of Frank M. Sturdy.

ATTLEBORO FALLS, Mass., June 21.—Frank M. Sturdy, a member of the firm of J. F. Sturdy's Sons Co., died Saturday evening at his home on Commonwealth Ave. after a lingering illness. The funeral will be held Wednesday afternoon at two o'clock from his late residence on Commonwealth Ave.

Mr. Sturdy was born in April, 1857, and was the youngest son of John F. Sturdy, who founded the jewelry business in 1865 which has since come to be known as the J. F. Sturdy's Sons Co. In 1875, F. E. Sturdy was admitted to the firm, and in 1884 H. K. and the deceased Frank M. were admitted, and so it remained until 1892, when J. F. Sturdy retired and gave the business into the hands of his three sons.

Mr. Sturdy is survived by a wife and two children, Carleton and Isabelle, and two brothers, Herbert K. and Fred E., to mourn his loss.

The store of the Cameron Jewelry Co., located in the Murrin building, Scranton, Pa., was recently damaged by fire. The loss is about \$500.

Chicago Jewelers' Association Elects Officers—Scope of Organization to be Enlarged.

CHICAGO, June 21.—Lem W. Flershem, M. A. Mead and Maximilian Ellbogen, nominating committee of the Chicago Jewelers' Association, submitted the following names for nomination at the meeting last week, and the ticket was elected unanimously: President, Harry W. Hahn; vice-president, B. C. Allen; secretary-treasurer, A. W. Sprochnle; finance committee, F. G. Thearle, J. R. Perry and Claude Seymour; membership committee, J. K. Caldwell, E. M. Lunt and E. E. Swadner.

The meeting closed with a vote of thanks to the retiring officers for their efforts on behalf of the association the past year.

Important changes will soon take place in the scope of the Chicago Jewelers' Association. The constitution will soon be re-

HARRY W. HAHN, PRESIDENT-ELECT.

vised so that it can branch out and be of greater service to the trade than ever before. From now on many new members are going to be added, and the association will consist of trade "boosters" who will all work together in harmony and boom Chicago as the great central market. There are 15,000 jewelers in this territory, and Chicago is the logical market for their supplies.

The manufacturing jewelers, who have a separate organization, are going to join in a body, and are expected to bring a great deal of strength to the association.

George R. Blose, for several years an active member of the firm of the Reineman, Blose Co., McKeesport, Pa., sold his interest in the company to Henry E. Reineman, about a week ago. Mr. Blose will, in the near future, engage in business for himself.

A. E. Warren, formerly a member of the firm of Armstrong & Warren, St. Albans, Vt., has purchased the stock of B. B. Perkins & Co. and will conduct the store on King St. Mr. Perkins will move to Chicago, where he has taken a position as a traveling representative.

COLORED OPALS

We are cutting a number of colored Opals in oval and fancy shapes, suitable for scarf-pins, brooches, pendant sets, etc.

These stones vary from pink to red, light to deep yellow, all shades of green, soft grays and blues ranging from delicate tints to darkest cobalt.

These new varieties of Opal are inexpensive and most effective.

NEW YORK CITY

Members of Missouri Society of Retail Jewelers Begin Their Ninth Annual Convention at St. Louis.

St. Louis, Mo., June 21.—The Ninth annual convention of the Missouri Society of Jewelers opened, this morning, at the Jefferson Hotel with the largest attendance in the history of the organization. During the first hour there was an informal reception. The visiting delegates were met by a reception committee of the St. Louis Society of Retail Jewelers, composed of W. Drosten, chairman; E. H. Kortz, Charles Der'eth, George Eckhardt, J. L. Ker, Ed. Zerweck, C. Culhertson, F.

thus organization I appreciated the honor and realized I was hardly able to accomplish what need be done. The task has been greater even than I expected, and I regret that I come to you to-day with no more done than has been done. It is not because I have not tried. I have given you what there was in me and I believe my heart is as much in this work as that of any man in the State. I am very proud of the progress we have made and hope the next year or two will enable us to be the strongest organization of retail jewelers in any State. This can be done by united effort.

This is not a complaint, but I want to suggest to you that when you have chosen your officers to-morrow your work is not done. Write a letter once in a while and keep them in touch with conditions in your section. Go to some jeweler you know and endeavor to have him join the society. Keep after him. When I cease to be your president to-morrow afternoon, my efforts on behalf of the society will not cease. I will go on doing all I can, giving my time and money if necessary for the good of this organization.

Three years ago eight of us met in Kansas City and formed a little organization which has grown into what we now have. We ought to have three times the members we have. Out of more than 600 jewelers in the State we ought to have at least 400 members. I promise right now to do whatever the officers of the society ask me to do next year, to assist them in every way possible to build up our organization, and I want to ask every jeweler here to do the same thing, and great results will be accomplished. As you are aware, we are meeting this year under an entirely different arrangement. This is the first State meeting of retail jewelers to be held without soliciting aid in any form from the jobbers and manufacturers. Iowa follows this week at Des Moines under the same conditions. Your officers have been commended by jobbers, manufacturers, retail jewelers and trade journals for adopting this plan, and I feel sure that in a few years many other associations will follow the lead of Iowa and Missouri, and hold their meetings absolutely at their own expense.

Under these conditions we were not able to offer you anything elaborate in the entertainment line, such as a banquet, but such entertainment as has been provided has been prepared at the expense of retail jewelers, and we are in nowise obligated to anyone outside. This action was not taken by the committee in order that we might abuse the jobber and manufacturer as a class. Two reasons principally prompted the action. First, that we might be absolutely free. Second, that we might no longer be a burden to the wholesalers in our line in the city where the meetings are held.

Experience has caused many of us to conclude that our meeting will be more successful if alternated between Kansas City and St. Louis. This meant the raising of several hundred dollars in each city every two years and was an injustice to the wholesalers. Many members did not feel like attending under these conditions because they felt that their business in either city was not enough to repay the city for its expenditure. No man feels right in accepting the hospitality of a wholesaler year after year without repaying him in the way of business. Now, the wholesaler is free to entertain such members as he sees fit in any manner. Both the wholesaler and retailer is free to offer and accept as his interests may appear. I am hopeful that the success of the plan will result in the unanimous approval of all wholesalers and retailers.

I shall not attempt to point out at this time the many benefits brought to the retail jewelers through organization. The trade journals have these items every issue and the jeweler who doesn't read the trade papers doesn't care much about what is going on.

The speaker then took up in detail questions in the watch trade, mentioning particularly what certain manufacturers are doing to market their product through the jewelers, and why they should receive encouragement from the association's members. He also spoke of the co-operation of

certain jobbers, and then took up the question of the present method of listing watches, saying:

Through the National Association some code should be recommended, some simple code that would be as intelligible to the dealers as figures. The present discount is a joke. Every man, woman and child knows it, and for that reason alone no man's catalogue finds a place on my counter. They could be made very valuable to the dealer and result in many sales for the wholesaler if he would issue them in a form that could be used by the retailer.

Retailers have been requested by the Manufacturers' Association to assist in making the national stamping law of some value by handling only such goods as bear a stamp indicating quality. A number of manufacturers are now now using the stamp and the retailer should be ashamed of the quality of goods he sells his customer. When the public has learned that goods stamped with a quality mark are guaranteed by a national law,

CLAUD WHEELER, PRESIDENT.

H. L. RAINES, SECRETARY.

ier, Joseph M. Eberling, F. H. Nie-
sor, J. B. Boos, Otto Buder and Fred-
Courvoisier.

The meeting was called to order at 9.45
President Claud Wheeler, Columbia,
and the opening invocation was pro-
vided by Rev. C. Kramer, pastor of St.
Luis's Evangelical Church.

President Wheeler then introduced Fred-
H. Kreisman, Mayor of St. Louis, who
warmly and cordially welcomed the jew-
elers of the State to the hospitalities of St.

In response on the part of the associa-
tion made by Adam Hafner, De Soto.
Reports of Secretary H. L. Raines,
Treasurer Charles Bard,
showed the organization to be in a
very good condition both in respect to mem-
bership and finances.

After the roll had been called and a
number of applications for membership
had been received, President Wheeler de-
livered his annual address.

President Wheeler discussed some of the most
important problems that confront the retail
jeweler in very candid and convincing
terms, and was listened to closely and
highly commended by the members of the
association.

PRESIDENT WHEELER'S ADDRESS.

ago when you chose me as president of

they will no longer want goods which are stamped
or said to be solid gold which may mean 10 karat,
eight karat or even six karat. It is never better
than 10 karat.

Fraudulent advertising is now receiving atten-
tion by all classes of trade, and not by jewelers
alone. It is an evil so apparent that no discus-
sion other than how to stop it is necessary. In our
trade we have been having a splendid example of
it recently. Last Fall while at Kansas City I no-
ticed the windows of ———'s dry goods store
filled with diamonds, watches and jewelry adver-
tised as from the bankrupt stock of Joseph Brown
& Co., Chicago. I was informed while in Chicago
during the Winter that none of the Brown stock
had been disposed of, and later read a statement
to the effect that the company settled with credi-
tors at 25 cents on the dollar, and the American
Trust & Savings Bank, trustees, turned the whole
stock over to Mr. Brown.

Several stores in different cities have taken ad-
vantage of this same failure and advertised big
jewelry sales of stock bought from the trustees.
This is but one example, and I am sure that the
jeweler has more to gain from a law preventing
fraudulent advertising than any other class of
trade. I hope our delegates will be instructed to
use their best efforts at the national meeting in
Omaha to have the national association take some
definite action toward securing such a law by
Congress, and we, as a State organization, should
see that such a law is placed on the statutes of
our own State.

Now, just a few words about what we are doing
ourselves toward placing our trade on a high
basis and making a success of our business. You
know, we have complained so much about so many
things that we are somewhat like the shepherd boy
who cried "Wolf! Wolf!" when there was no
wolf. Before we bring a matter before the State

"SEVENINONE"

BROOCH OR SCARF PIN

Finish, Workmanship, Quality of Stock and General Appearance of any article are its main selling points, but "Seveninone" not only embraces all of these vitally important attributes, but is

A Distinct Novelty

It appeals to the consumer because

- 1 It consists of *one* mounting and seven stones.
- 2 The stones are of different color.
- 3 They can be interchanged in a moment.
- 4 There are no parts to wear out.
- 5 They take the place of seven different pins.
- 6 They are reasonable in price.
- 7 They will increase your sales.

an organization for correction by law, we do not see whether or not we can correct it by individuals. A great many of the so-called "retailers" are in business conditions. We are to study these conditions and devise a way to meet them. The time we devote to a study of how to stifle legitimate competition is wasted. We cannot by law put the department store out of business. We must recognize competition and use our efforts to meet it. We are doubtless familiar with the effort a few years ago by our State legislature to put the department store out of business. When the legislative retailer realized it could not be done about to meet the competition, and the success of exclusive stores in all our cities is a success.

Competition that stimulates us to do better is a better way. We should learn to know ourselves, analyze our business and see what is getting all there is for us in our territory. If you were a customer of your store, what methods would you criticize first? It is a habit of mentally looking at yourself from the people's view point is extremely profitable. To-morrow some strong, brainy fellow will take your place, your store, and your work. Could he better it in any way? What way? Study the methods of those who have succeeded and apply them to your business. Don't be satisfied with things as they are. There is no limit to what you may have the energy and apply it properly. It is not in making sales. It is in making sales.

A customer wrongly treated lasts no longer than an inferior article you sell him. There is no "back" on every sale. Whether it is a "kick" in the form of additional sales or returns, depends entirely upon the quality of the goods you sell. Every cent saved in value is lost in shortened trade. I often make a mistake in putting too many guarantees on our goods and work. Our duty should teach us what to expect from our customers. I saw a man in the back of a clock the other day who seems to fit the case pretty well. It was many years ago and in large print was printed: "Warranted, if well used."

There are many points in conducting our business. I would like to speak of but I do not tire you. I am going to mention a few and let you think about them. Do you buy your goods as cheaply as the hardware man in your town? Do you pay more for your forks and clocks than he does? I was doing so, a few years ago. If you handle a certain clock and can buy it at _____ you ought to know it. If you buy your plated ware cheaper from a hardware man you ought to do it. You are mistaken in thinking the hardware man is making a profit. It may be you are paying

more when you turn your stock? The oftener you turn your stock the lower you can mark your goods for profit. Make the same dollar go to as many uses as possible. You are urged by buyers and salesmen to buy, buy, buy. The price is sell, sell, sell, and buy when you can. You can always get the goods; don't worry about that. You won't have to buy enough to run until January. If this drummer comes back another will. If this is not your plan it will be some day, or you will be of the race.

At the closing there is one more point I want to mention. In the last few weeks I have had correspondence with officers of the Equality organization of men representing wholesale selling to the retailer. As a result of this we have arranged to adjourn our sessions each afternoon, to give the members and jewelers an opportunity to visit it, the meeting made by jobbers and manufacturers.

Along this line, I desire to make a recommendation for next year. I believe it would be a benefit in the arrangement of the programme to have a half day of the meeting to the jobbers and manufacturers. They could select two good speakers to address the meeting on subjects of interest to us and the balance of the time could be devoted to inspecting the various exhibits. There is more inducement to the retailer to come to these annual gatherings if he will have a chance to see several lines of goods but to give part of each day or give no time memorializing to our regular sessions. This

and all other recommendations I offer for what they are worth, and the committee can take such action as they see fit when they consider this address.

You will notice from the programme that provision is made for fixing a time and place for holding the next meeting. I have found it the opinion of a majority of those consulted that we should decide upon some certain week in a certain month for our annual meetings. I believe the third Monday of June will always suit a majority of the jewelers in this State. All schools have closed by this time, most of the wedding business is over, and the majority of us feel like taking a few days from business. In the matter of place I think we can do no better than meet alternately in Kansas City and St. Louis, as suggested earlier in my paper. If we adopt a resolution to that effect at this time there will be nothing to prevent us from changing it later if such an arrangement can be made. If action is taken on this matter I will appoint a committee to confer with the opticians and have them consider a like action.

You will notice that 30 minutes is given to each paper. This was not done expecting each man to talk that length of time. None of the members on the programme can exhaust the subject given him, and I would like a free discussion of every paper. In this way alone will we get the most out of our meetings.

In closing I want to thank the officers and members who have assisted me in the work of the past year and especially our secretary, Mr. Raines. He has worked hard, and to him the society should give credit for nearly all that has been done.

One more word, and I am through. I want every member here to make up his mind before leaving that he will do his best to comply with the request of those who are preparing the programme for next year and not try to see how many excuses he can find for not doing the duty assigned him.

After his paper had been heard and discussed, the convention adjourned for lunch.

At the afternoon session R. D. Worrell, Mexico, read a paper on "The Jobber Who Sells at Retail." It was a warm subject handled in warm fashion, and the general discussion that followed heightened the temperature. The discussion lasted an hour and was characterized by considerable spirit. After the presentation of resolutions the session adjourned.

This evening the delegates will go in a body to De'mar Garden, where they will be the guests of the St. Louis association, under the direction of the president, Herman Mauch. A number of important papers will be read at Tuesday's sessions.

Arkansas Retail Jewelers Association Meets in Annual Convention at Little Rock.

LITTLE ROCK, Ark., June 16.—The members of the Arkansas Retail Jewelers' Association met in convention yesterday and to-day in the banquet hall of the New Capital Hotel. Members of the trade from many towns in the State participated, and the attendance was very satisfactory. Several very important questions came up for discussion.

The greater part of yesterday was taken up with adoption of minutes of the former meeting, the reports of officers, consideration of applicants for membership and the address of President John L. Green, of El Dorado. Eight applicants for membership were considered and accepted.

G. W. Fennan, of Springfield, who is deaf and dumb, was voted a life membership by a unanimous vote because of his affliction.

The report of Secretary-Treasurer E. A. Short was read and accepted without correction or question.

President Green, of El Dorado, called attention in his speech to the necessity and importance of organization by which uniformity in price lists could be attained, desirable legislation secured and some action taken concerning the catalogue houses and wholesalers who sell at retail.

Last night a meeting of the Executive Committee was held and resolutions were drawn up which will be presented to the association to-day concerning the relations of the jewelers with various jobbers, manufacturers and wholesalers.

Among the companies having displays on exhibition for the benefit of the jewelers are the Rockford Silver Plate Co., represented by Mr. Davis; the C. B. Norton Jewelry Co., represented by C. B. Norton, Jr.; Leonard Krower, represented by J. H. Kirtland; the Elgin National Watch Co., represented by Mr. McKinley; the Colonial Silver Co., represented by C. C. Achorn; the Watson & Newall Co., represented by L. B. Hale.

On account of the inability of some members of both the Jewelers' Association and the Arkansas Optical Association to remain for the entire four days of the two conventions, as originally planned, it has been decided to hold the meeting of the optical association this morning and the jewelers' association this afternoon. This will enable the completion of the business of the two societies to-day.

The Retail Jewelers' Association, of Utica, N. Y., will hold a regular meeting this evening (June 23) at the Masonic Club, Masonic Temple. Promptly at 7 o'clock the members will sit down to a course dinner to be served by the club steward; following which the business session will be held and a social hour enjoyed. It is the intention of the Utica association to discuss various trade matters, and find what the consensus of opinion is, so that the State officers can be advised of the position the local society takes on the different projects at present engrossing the attention of the retail jewelers. If retailers will make known their wishes through their local associations, the State association will know on what lines to proceed to accomplish the most good for the greatest number.

JOBGING TRADE ONLY

116 Chestnut St. (Champlin Bldg.)
PROVIDENCE, R.I.

Dinsky has opened a retail jewelry at Palmerton, Pa.

L. Emmons, formerly of California, started in business at Dunfur, Ore.

erry, Fulcher & Stone is the name of a jewelry concern which has leased quarters in Pittsfield, Mass., where it will begin business April 1, 1910.

The Hannon Jewelry Co. has been incorporated in Waupaca, Wis., with a capital of \$5,000. The incorporators are: E. Hannon, C. E. Kellogg and Kathryn Egg.

C. Kennard and George Strong, formerly with the F. W. King Optical Co., Grand, O., will shortly engage in business in the same place, occupying offices in the Schofield building.

The George Ward Jewelry Co. has succeeded to the business conducted under the name of The Universal, in Springfield, and the new concern having been incorporated with a capital of \$20,000, to engage in wholesale and retail jewelry business at South St.

The Ross Brass & Copper Antique Mfg. has been incorporated under the laws of the State of New York with a capital of \$10,000. The concern will deal in brass and copper ware, etc. The incorporators are: A. Rosenschein, New York; Annie Maurice Ross, Brooklyn, N. Y.

Pittsburg Police Capture Man Believed to be Robber Who Looted Mechanicsville, Pa., Jewelry Store.

PITTSBURG, Pa., June 19.—Thomas Aron, alias Thomas Walker, was arrested at Pittsburg, this week, and taken to Mechanicsville, Pa., to answer to a charge of robbing the jewelry store of A. J. Kirkwood, of that place, on the night of June 4. Stock valued at \$2,000 was stolen, most of which has been recovered.

The local police say that Arlington searched in the front door of Kirkwood's store and made a clean-up of everything on the night. With the loot in his possession, Arlington came to Pittsburg to get rid of it. He represented himself to be a circus man and the pawnbroker to whom he attempted to sell his plunder notified the police of the man's presence and he was taken to Central Police Station. Then officers were detailed to search the man's quarters at a local hotel and enough goods to start one to start store were found. The inventory showed that Arlington had 100 diamond rings, 40 watch chains, 150 pairs of buttons, four gold watches, a silver watch, 100 pocket knives, a number of pens and other articles.

The police notified Mr. Kirkwood of the whereabouts of the man and the jeweler came to Pittsburg and identified the stolen goods

found in Arlington's possession as having belonged to him. Mr. Kirkwood was very much pleased that the arrest had been made, and complimented the police as well as the pawnbroker who had aided in the arrest. The police are working in entire harmony with the pawnbrokers of Pittsburg, and they promptly notify the "front office force" whenever a suspect comes along. In this way a number of thieves have been captured.

Brooklyn Jeweler Captured in Cincinnati Brought Back for Trial—Some Stolen Property Recovered.

Morris Cohen, formerly of the firm of Cohen & Levine, 537 Fulton St., Brooklyn, who was located in Cincinnati, O., recently through a picture and description printed in THE JEWELERS' CIRCULAR—WEEKLY of May 26, was arraigned in the Kings County Criminal Court Monday and pleaded guilty to grand larceny in the second degree. He was held for sentence next Monday.

Cohen was brought to Brooklyn last Wednesday and was at once committed to the Raymond St. jail without bail. An indictment has been found against him and his partner. He has practically admitted the charge made against him, and though he first said that all the jewelry taken from Mr. Taylor was in the possession of his partner, Levine, who is still at large, when questioned by Mr. Taylor and Detective Coughlan, the jewelry was located in Newport, Ky., and was returned to Mr. Taylor, Thursday. The value of the goods returned is estimated at about \$750; there is still one piece missing.

The stolen goods were Mr. Taylor's personal property and not, as stated in the Brooklyn papers, the property of customers of the jeweler. The Brooklyn police are now working actively on the case under the charge of Licut-Detective Coughlan, who has been recently made acting captain. It is expected that the one missing piece of Mr. Taylor's property will be returned very shortly and that Levine will also be apprehended.

Cohen & Levine conducted a jewelry manufacturing and repairing business in Brooklyn, and about Feb. 10 last disappeared with considerable property belonging to Brooklyn jewelers.

Death of E. A. Brauns.

UPPER SANDUSKY, O., June 16.—Edward A. Brauns, a well-known jeweler of this town, died suddenly Sunday morning about 9 A. M. Death was due to heart disease, with which he was stricken while sitting at the breakfast table. The funeral was held yesterday afternoon from his late home.

Mr. Brauns, who was 52 years of age, had long been associated with his brother, P. F. Brauns, in the firm of Brauns Bros., and was well known to the jewelry trade of this section. The business was established by their father, and the deceased and his brother bought out the stock about 25 years ago and conducted the store without change ever since.

Mr. Brauns is survived by a widow and one daughter, as well as by his mother, brother, and five sisters.

Wm. M. Crafts, South Deerfield, Mass., has moved to Whately, Mass.

Programme of the Forthcoming Convention of the Ohio Retail Jewelers Association.

SANDUSKY, O., June 21.—From present indications the third annual meeting of the Ohio Retail Jewelers' Association, which will be held at Cedar Point, just off this city, will not only be the greatest in the history of this organization, but one of the most largely attended State conventions that have been held in the jewelry trade.

The officers have been sending out a series of circulars announcing the meeting, and to-day every jeweler in Ohio has been informed of the coming session, solicited as a member of the organization and invited to participate at the meetings. The number of exhibits will be very large, the addresses and speeches both instructive and interesting, while the programme of entertainment for visitors will surprise all who attend.

The schedule of the various sessions follows:

MONDAY MORNING, JUNE 28.

9 A. M.—Registration and distribution of badges.
10 A. M.—Opening of exhibit by leading manufacturers in watch, silverware, jewelry and optical lines, in the large hall adjoining the convention hall.

AFTERNOON.

1:30 P. M.—1909 convention called to order. Reading of minutes. Secretary's report. Treasurer's report. President's address. Appointment of committees.

3 P. M.—Address, "Modern Advertising," A. L. Sackett.

EVENING.

7:30 to 8:30 P. M.—Reunion and experience meeting on the large porch in front of Hotel Breakers.

Members will also take in the sights on the Pay Streak, visit the "Rathskellar and Crystal Rock Palace," after which we will have a heated contest at the bowling alley for the championship of Ohio.

TUESDAY MORNING, JUNE 29.

9 A. M.—Discussion, "Shall We Push Ingersoll Watches, or Let Hardware and Department Stores do the Selling of Cheap Watches." (William Ingersoll will be present to speak for his selling plan.)

9:30 A. M.—Discussion, "Can a Strictly Retailer's Journal, Published by this Association, Be Established and Maintained?"

10:30 A. M.—Address, "Suggestion as a Power in Salesmanship," by Mr. Fogleman, of the Sheldon School of Scientific Salesmanship, of Chicago.

11 A. M.—Viewing of exhibits and reception by exhibitors.

12 M.—Official photographing of all in attendance. Please be prompt.

AFTERNOON.

1:30 P. M.—Reports of committee. Communications and bills. Unfinished business. Election of officers. New business. Adjournment.

Immediately after adjournment convention will be guests of Cedar Point Resort Co. for a boat ride on Sandusky Bay.

EVENING.

7:30 P. M.—Parade by Ku-Kus with candidates, from hotel to convention hall.

9:30 P. M.—Banquet and social session.

After the jewelers end their convention the opticians will begin theirs. The optical convention will last from July 1-3, inclusive.

Market Prices for Silver Bars.

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

	London.	New York selling price, .999 Basis.
June 15.....	24d.	\$0.54 1/4
" 16.....	24 1-8d.	.54 3/8
" 17.....	24 1-8d.	.54 3/8
" 18.....	24d.	.54 1/8
" 19.....	24 1-8d.	.54 3/8
" 21.....	24 1-16d.	.54 1/4

Buffalo, N. Y.

TRADE CONDITIONS.

Buffalo jewelers report business very good, especially in the commencement gift line, which nearly overshadows the wedding present trade. Silver has proved to be the most popular gift for weddings and anniversaries, with cutlery and cut-glass following.

Arthur Downs has been added to the staff of Charles F. Chouffet, 379 Main St., as watchmaker.

John Shafer, 462 William St., was quietly married a month ago. Reports of the ceremony have just begun to leak out.

Harry Heilman, of the Potter & Buffinton Co., was in Buffalo last week. While here he called on some of his old friends.

A. F. King and F. G. Raichle, of King, Raichle & King, attended the convention of the wholesale jewelers in New York, recently.

Among the customers who visited the Buffalo market, last week, were: S. A. Ross, Medina; L. N. McCauley, North Collins; E. S. Hall, Arcade; F. D. Kelsey, East Aurora.

C. C. Penfold, manufacturing jeweler in the Law Exchange, recently turned out a number of badges to be worn by the Buffalo delegates to the National Convention of Master Plumbers in Detroit this week.

Charles W. White, of White, Wile & Warner, manufacturing jewelers, has gone to New York with the Buffalo Orpheus on its annual trip. A. B. Warner, of the same firm, returned recently from a four-months' trip to the Pacific Coast.

On display in the window of Simon Cohen, 331 Main street, is a beautifully designed gold medal which is to be presented by Mr. and Mrs. Gaetano Mercurio, of 224 The Terrace, to the pupil of Public School No. 2 having the highest standing in spelling and oratorical contests which were recently held.

A report from Geneva says that a stranger stole a \$45 watch from Frank Correlli there and immediately tried to sell it to Moses Small, a jeweler at that place. Small was suspicious of the stranger and sent for the police, but before they came the stranger had disappeared with the watch and was seen later to board a freight train leaving town.

Chief Michael Regan, Buffalo's big police superintendent, was presented a handsome loving cup at the close of the police chief convention here last week. The cup was supplied to the donors, the visiting delegates, by King & Eisele. Mrs. Regan was given a cut-glass punch bowl, and Chief John G. Lyons, of Niagara Falls, received a loving cup similar to the one presented to Superintendent Regan.

The Buffalo Retail Jewelers' Association held its regular meeting at the Genesee Hotel last Friday night. Vice-President A. Zilliox called the meeting to order in the absence of President Ehmman, who is in Europe. The meeting was very well attended. It was agreed by the jewelers that the association is to have its annual outing on some Thursday in July, but the exact date was left to Mr. Frisch, of Frisch Bros., 443 Genesee St., who is chairman of the entertainment committee. The jewelers will take their families to the Bedell House, on Grand Island, "for a royal good time," as

Secretary Schutt puts it. There will be games and athletic events, and then a big dinner. Several out-of-town jewelers have been invited. The association passed a resolution thanking the Waltham Watch Co. for its stand on the selling of its watches by others than retail jewelers. Jerome Scherer, 1382 Fillmore Ave., was present at the meeting for the first time in three months. Mr. Scherer has been ill. The association had decided to discontinue its monthly meeting during the Summer, but everyone seemed very enthusiastic and voted to hold sessions during the Winter. It was announced that one of the Buffalo friends of William Ehmman, president of the association, had received a card saying that Mr. Ehmman was in Stuttgart, Germany.

Indianapolis.

I. Grohs, of the I. Grohs Jewelry Co., is home after a visit to New York and Providence.

A business trip to New York is being made by Charles W. Lauer, of Charles W. Lauer & Co.

George S. Kern has returned from Louisville, Ky., where he attended the Shriners' Imperial Council.

The Marion County Board of Review has fixed the valuation of the I. Grohs Jewelry Co. at \$3,500 and of Hoffman & Lauer at the same amount.

Clark's Time Shop, which took over the watch business of Dyer Bros., last November, has opened a trade watch repairing shop at the same location, 234 Massachusetts Ave.

After attending to the watch repairing work of Ikko Matsumoto for a number of years, C. A. Slinger has taken a position as manager of the Ertel Loan Co., in Massachusetts Ave.

Joseph E. Reagan returned, June 21, from an eastern trip. He was in New York, Providence and Attleboro after attending the wholesale jewelers' convention at Philadelphia.

Mrs. Miller, wife of Enrique C. Miller, of the Baldwin-Miller Co., accompanied by her son, will sail for Europe to-day (June 23). Later they will be joined by Miss Marian Miller.

At the national convention of the order of B'rith Abraham, held in New York, last week, Emil Mantel was elected third deputy grand master and exerted his efforts to have the next convention held in this city.

Miss Hallie Riggs and Roy McPheters were married at the home of the bride in Jeffersonville, last Wednesday, and left immediately for their new home in New York, where Mr. McPheters is employed as an engraver.

Mussel hunters in the Wabash River, near Decker, are finding an unusual number of valuable pearls. Within the last few days Charles Bishop found one pearl valued at \$750, and Joseph Boyer one for which he received \$300.

Out-of-town jewelers in this city, last week, were: H. A. Pauley, Bloomington; D. S. Whittaker, Lebanon; J. W. Hudson, Fortville; S. Barrows, Kempton; E. M. Wilhite, Danville; C. M. Hunnicutt, Rockville; H. Wheeler, Dana, and Daniel Beauchamp, Fairmount.

Harrisburg, Pa.

W. J. Kuhn has removed his jewelry store from N. 4th St. to 4th and Essex Sts.

The families of E. L. Rinckenbach and George P. Hutman are now occupying cottages at Mount Gretna.

The Merchants' Association of Williamsport and Lykens Valley will hold its annual picnic at Midway Park, June 23.

A wagon load of jewelry, notions and notions was stolen by burglars from the store of D. M. Brown at Mont Alto, last week. There is no clue.

Miss Rose Cohen, daughter of A. C. Cohen & Son, pawnbrokers, was married in Chestnut St. Hall Thursday evening, June 17, to Dr. Bertram B. Machat, of Beach, N. J. About 25 guests were present. Most relatives of the bridal party ceremony was performed by Rabbi S. S. Mann. After a bridal trip to Niagara Falls, Dr. and Mrs. Machat will be here with their friends at Bath Beach. The bride is the recipient of many handsome presents.

Among the donors of prizes for "Booster Day" of the Harrisburg Association, July 10, are the following: Silver-backed brush, comb and mirror, C. Boas; silver-backed brush and comb, Hoover; cuff links and stickpin, S. Sides; solid gold stickpin, Harry A. Smith; bronze clock, Henry Claster; smoking set, E. L. Rinckenbach; silver stand, P. G. Diener; mission clock, & Rubin; hammered brass bowl, J. T. Sons; silver urn, Wilhelm Plack; clock, W. P. Denchey.

Pacific Coast Notes.

The Mankey Jewelry Co. and A. T. Lock, Nampa, Idaho, are each to have quarters within a short time.

J. Elmer Smith, who located temporarily last Fall in Turlock, Cal., has decided to remain there. He has leased quarters there.

A. T. Cornwall, who moved to Lodi, Cal., a few weeks ago, has decided to prefer a large place and has moved his stock into storage. He is now looking for a suitable location somewhere in the Central Valley.

C. W. Ernsting, of the Ernsting Co., San Diego, Cal., has just leased a lot of land, adjoining his present store, and shortly erect a building on the property. The ground floor will be used as a retail store.

W. C. Shimmel, with P. H. Stone, of Bluff, Cal., has been arrested at the Bluff on the charge of embezzlement. He has been in the employ of Mr. Shney for two months, and during that time he has collected considerable money, which, it is alleged, has not been turned in.

Otto Jarck, Easton, Pa., has admitted to the partnership of Frank O. Jarck, into partnership the business will be continued under the name of Otto Jarck & Son.

W. J. Leonard, who for eight years has been in the employ of the Carter-Alley Co., Shreveport, La., has resigned and started in business with a Mr. Keller, the name of Keller & Leonard, 605 M

Pittsburg.

W. Voorhees is in New York, spending his vacation, and Graham Voorhees has returned to Martin's Ferry to rest for several weeks.

S. Friedman, Greensburg, who recently filed a petition in bankruptcy in the United States District Court, filed his final petition on June 12, asking that he be discharged from bankruptcy.

A. Gillespie will go to New York next week to visit a sister who lives in that city. Gillespie, who was in Chicago at last week, is on his way home from the south, and will return to Pittsburg next week.

Wm Hoffman, of Heeren Bros. & Co., returned to Philadelphia, last week, to begin a voyage to his sons, Herman, Arthur and William, Jr., also of the firm, who are in Europe on a three months' tour. They took a slow boat to get the benefit of the breeze.

Following out-of-town jewelers were in Pittsburg, last week, buying goods: J. W. Chesler; H. R. Brown, Donora; J. Williams, Slippery Rock; B. E. Monessen; Henry Zelliken, Wellsburg; August Merz, Sewickley; Wm. Hunt, Brown; R. H. Wolf, Smithton, and Furtwangler, Greensburg.

Secretary C. S. Wiley, of the Pennsylvania Retail Jewelers' Association, reports that he received four applications for membership in the association from North Side, Pittsburg, merchants during the last week. M. Roberts and Otto Heinemann are to canvass the South Side of the district for memberships within the next week.

B. Harris, proprietor of the Seventh Street Jewelry Co., has been elected president of the H. T. Siefers Cigar Co., in connection with he has bought a large interest in it and which will be run under Mr. Harris' management. The cigar company is expected to be doing a business of \$40,000 a year. The store is on 6th Street, opposite the Pittsburg Life & Trust Building.

In the bankruptcy assets of B. Bien, the trustee's first and final account was recently filed, showing a balance of \$2 on account of distribution, which leaves absolutely nothing for the unsecured creditors. The total amount realized by the trustee in the sale of the assets was but \$50, practically all of which had been eaten up by legal fees and expenses. There are no further assets to come into the hands of the trustee so that all the creditors can do is to file the account up to profit and loss. The United States Court has directed the receiver for Parnes & Fassberg to deliver the safe of the concern to the Safe & Lock Co., which brought it to recover it, since only a small amount had been made on it. Isaac Parnes, who absconded owing about \$10,000, has not been heard from, although he has been gone for six months. The safe of Parnes are being wound up but no final report of his assets and liabilities have as yet been filed.

W. McGeagh, who was a well-known jeweler and silversmith, and proprietor of a store at 1810 Beaver Ave.,

died recently. Mr. McGeagh was a brother of the late R. T. McGeagh, who was also a well-known jeweler. The deceased was 70 years old and leaves several children. He had been in business for 20 or 30 years in the Beaver Ave. district, and it is reported that he had accumulated considerable property and wealth. His nephew, John D. McGeagh, is at present engaged in business on Fifth Ave., just beyond the court house.

P. C. Gillespie, of Gillespie Bros., wrote a letter, last week, to Senator George T. Oliver, Pittsburg, junior member from Pennsylvania, protesting against the proposed increase of the import duty on diamonds. Mr. Gillespie also addressed letters at the same time to the Congressmen who represent the Pittsburg district. Mr. Gillespie is of the opinion that if the duty is increased it will only tend to stimulate smuggling. The legitimate trade has suffered by these operations, according to Mr. Gillespie, and large fortunes have been made by some. He thinks the duty is high enough, and there are other jewelers who are of the same opinion. No general movement has been started in Pittsburg protesting against an increase in the import duty, but merchants are watching the matter just now, since Pittsburg merchants are large importers of the precious stones.

John M. Roberts, chairman of the watch price-cutting committee of the Pennsylvania Retail Jewelers' Association, upon the receipt of the notice sent out by the Waltham Watch Co. as to the restriction of the sale of their watches to jewelers, which is published in full in another column, wrote the company a letter to-day expressing great pleasure in the fairness shown in the matter, congratulating the company on the stand which it has taken, assuring it that in his judgment it will be of the utmost benefit to the retailer. Mr. Roberts has not received any further letters this week from manufacturers accepting the minimum scale of prices, as agreed upon by the committee, but he is looking for some letters the coming week. He is still of the opinion that the question can be settled to the satisfaction of all, and is especially pleased with the stand the Waltham Co. has taken in withdrawing its watches from those houses which the company specifies in its letter.

Canada Notes.

R. B. Keeler, Welland, Ont.; has sold out to H. C. Lane.

L. E. Shaw, Kentville, N. S., has removed to Prince Rupert, B. C.

C. H. Mallory, Tilbury, Ont., has disposed of his business to Mr. Mitton.

O. L. Hess has purchased the jewelry business of John Bulger, Seaforth, Ont.

The stock of Miss M. L. MacDonald, Ottawa, was to be sold at auction, June 18.

James Ryrie, of Ryrie Bros., Ltd., Toronto, Ont., and Mrs. Ryrie, returned, last week, from a trip by automobile to Boston.

P. Discher, a diamond expert recently with Ryrie Bros., Ltd., Toronto, Ont., has accepted a position with the Kaster Bros. Loan & Jewelry Co., Fort William.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included:

Benjamin Harris and H. E. Thornhill, Hamilton; W. Evans, Alliston; D. C. Taylor, Owen Sound; E. D. Wilcox, Uxbridge, and W. A. Fenwick, Shelburne—all Ontario.

Myer Moss, jeweler, of 70 Queen St. W., Toronto, Ont., was robbed of two valuable rings on Tuesday, June 14. Three colored women, members of a dramatic troupe which was playing "Uncle Tom's Cabin" here, entered the store and looked at some valuable jewelry under the pretense of wishing to purchase. When they had left a diamond ring and another set with rubies were missing. The police were notified, and on Tuesday a descent was made on the boarding house where the actors were stopping. Thomas Delaney, James Jackson and Georgina Payne were arrested. The latter, upon being questioned, admitted stealing the rings, stating that she had passed them to the two men. Delaney and Jackson showed the officers where the rings were hidden. The other women who were with Georgina Payne in the store were allowed to go.

Connecticut.

C. H. Tibbits, Wallingford, sailed for England, June 19.

H. B. Arms, West Hartford, has been awarded a patent on an alarm clock.

Clyde Wallace, Wallingford, will sail, July 9, on the *Menominee* from Philadelphia, for a three months' trip abroad.

J. R. Dean, New Britain, has assigned to the International Silver Co. a recently patented design for the back of mirrors.

The F. L. Wilson Co., Danbury, recently added a new lens-grinding machine and made other improvements in its optical department.

George Gould, for many years in the employ of the Silver Plate Cutlery Co., Shelton, died at the Bridgeport Hospital, June 14, after a brief illness.

The C. F. Monroe Co., Meriden, reports business for the first five months of this year 50 per cent. ahead of the corresponding months of 1908.

The old town clock in Naugatuck has again been repaired, and is once more keeping accurate time. It received a general overhauling one day last week.

M. J. Buechler, Bridgeport, has purchased as an investment what is known as the Calef property on Main St., just above Congress St., at that place. The building will be remodeled and improved in the near future.

The funeral of Edward Miller, Meriden, who died recently, was held at three o'clock Monday afternoon, June 14, from his late residence on Broad St. Special meetings were held by the Home National Bank, of which the deceased was a director, and by Edward Miller & Co. Resolutions were passed at these meetings expressing regret and sympathy upon Mr. Miller's death.

Elias L. Glouskin, located at 966 Chapel St., New Haven, who recently gave \$100 to a woman as a loan for a cheap ring in the belief that the latter contained a valuable diamond, can obtain no redress because of the fact that the woman made no statement regarding the value of the ring, although she cleverly led the jeweler to believe that it was of great value.

Newark.

Mr. Levine, representing the Art Metal Works, Newark, N. J., has just completed a successful trip through the east.

E. M. Childs, of Kohn & Co., manufacturing jewelers, arrived on the *George Washington*, Monday, from an extensive pleasure trip to Europe.

Eckfeldt & Ackley, manufacturing jewelers, 51 Lawrence St., announce that they will move their factory and office to larger quarters, on July 1. The new quarters will be at Murray and Austin Sts.

C. S. Swezey, of Champenois & Co., has returned from a lengthy trip through the west. He reports trade brisk, and is optimistic as to the Fall and Winter outlook. He will remain in Newark until July 25 and then make a tour of the south.

Many wholesalers report a remarkably heavy demand for 10 karat goods, sales in this class being far larger, comparatively, than in any other line. Some say that with the demand has come the adoption of designs for 10 karat goods that have hitherto been used only on the higher grades.

C. R. Burnett, assistant treasurer of the American Oil and Supply Co., took a prominent part in the national convention of the Credit Men's Association, at Philadelphia, Pa., last week. Mr. Burnett is head of the Newark Credit Men's Association. He reported that, with the gradual recession from the effects of the recent industrial depression, conditions in the trade are rapidly improving.

Henry Weber, 19 years old, whose arrest for the theft of gold from his employers, B. M. Shanley Jr. Co., was brought about through the efforts of the William F. Renziehausen Co., last week, was committed to jail in default of \$500 bail. Weber had been disposing of the stolen metal at the Renziehausen plant in Oliver St., and when the purchasers of the gold became suspicious of him they found out where he worked and notified his employers.

Teams from Newark jewelry firms rank well among the leaders in the Mercantile League, which has just closed a most successful bowling tourney. The Granbery five took fourth place, with 34 games won, 22 lost, an average of 514.10 and high score of 640. Heller Bros. came next, with 33 games won, 23 lost, average 514 and high score 612. The Krementz team was 10th, with 28 won, 28 lost, average 500 and high score 613. In the individuals E. Weiss, of the Granbery team, took second place, with an average of 195.14. Other jewelry men who ranked high were Coffey, of the same team, 179.21; Stecher (Krementz), 175.2; Langheld (Granbery), 173.2; Polkinghorn (Hellers), 173; Brummer (Hellers), 171.3; Seitzer (Hellers), 166.1; Crum (Krementz), 165.35; Ohl (Krementz), 165.23; Burgess (Granbery), 163.4; Travena (Krementz), 158.25.

Edward Harris, giving his address as New York, was arrested, Friday afternoon, by Patrolman Horace Campbell, upon complaint of John Macker, of Park Ave., East Rutherford, N. J. Justice of the Peace Joseph W. Beebe held him as a suspicious person. Mr. Macker was busy about his store when a stranger entered and wanted

to look at some valuable gold pins. The tray was placed upon the show-case, and while showing the goods Mr. Macker had occasion to turn around. He thought he missed two of the pins. The would-be buyer decided there were none that suited him and as he went out Harris entered and questioned the jeweler about some repairs to a cigar cutter. Engaging the jeweler's attention, the other man had an opportunity to get away. As Harris left the store Macker decided to follow him, with the hope that he might join the first man, who, he was certain, had some of his jewelry. Macker followed Harris several blocks and finally caused his arrest.

Philadelphia.

Edwin Edkin, 4062 Lancaster Ave., has recovered from a serious illness.

A. Bornstein, 725 Sansom St., will shortly open his cottage at Moorestown, N. J.

Briggs & Son, 1641 Passquak Ave., will soon open a new store at 52d and Locust Sts.

C. S. Powell, formerly at 5 S. 8th St., will eventually go into the real estate business.

Raymond Hess, manager of the Lancaster Ave. store of S. J. Lyons, was married, last week.

Miss Meyer, sister of Charles B. Meyer, 929 Passyunk Ave., will sail for Europe, July 2.

Charles Koshland, 702 Chestnut St., spent a few days in New York, last week, on business.

C. R. Dankworth, 725 Sansom St., has opened his cottage in Pitman Grove, N. J., for the Summer.

R. Dinsky, formerly with N. Estis, 719 Sansom St., has opened a store of his own at Palmerton, Pa.

J. Fisher, of Atlas & Fisher, and his family will spend the Summer at their cottage in Atlantic City.

David Lardlau, employed as watch case maker with John Yardley, 727 Sansom St., fell and broke his arm, last week.

Philip Friedel, 727 Sansom St., is receiving the sympathy of the trade owing to the death of his father, George Friedel.

L. P. White, who was injured in an auto accident, recently, was able to return to his office Wednesday for the first time.

Charles Muth has completed the alterations and improvements in his new store, 5 S. 8th St., and is now ready for business.

W. A. Stocker, of W. A. Stocker & Son, Bangor, Pa., spent last week in this city, and served on the United States Grand Jury.

Samuel Jaquette, representing the silver department of the Bailey, Banks & Biddle Co., will sail for Europe on the *Lusitania*, June 30.

Harry I. Houck, for many years at 244½ N. 9th St., Reading, has retired from business. Mr. Houck has been in ill health for a long time.

George H. Becker has resigned his position with Otto Mook, 809 Sansom St., and has accepted a position with F. I. Zirkilton, 112 S. 13th St.

J. E. Caldwell & Co. are the makers and designers of the prizes which were awarded at the 56th annual regatta of the Schuylkill Navy, June 19.

Victor Kurtz, with A. Rosenberg, Newark, N. J., will spend the week at Rosenberg's factory this city, preparatory line for the Fall trade.

Thomas Judge, with J. B. Bechtel, 725 Sansom St., is improving rapidly an operation performed for appendicitis at the German Hospital.

A. F. Dorn and wife, 834 Marl Camden, N. J., are at Monroe, N. Y., guests of Mr. Dorn's aunt, who is celebrating her 75th birthday.

Mrs. A. G. Wolcott, wife of A. G. Wolcott, Dover, Del., is seriously ill with thera. Their home is quarantined. Wolcott is unable to attend to business.

Davis S. B. Bellany, watchmaker C. Kremer, Phoenixville, Pa., was last week, to Miss Lina May Burges, home of the bride's mother, Ham N. J.

The Philadelphia Jewelers' Club will their annual outing at the "Orchard sington, June 29. A ball game afternoon and a "vaudeville" in the will be the chief entertainments.

According to a public notice F. Goldman, 1125 Columbia Ave., has declared a bankrupt. He made application to the District Court of the United States for his discharge, and a hearing was held June 22.

The marriage of Miss Dorothy Cooper and George J. Pequignot was solemnized, last week. Owing to the recent death of the bridegroom's Z. J. Pequignot, only immediate relatives were present.

J. E. Caldwell & Co. are exhibiting their window the team trophy of the Ber Trade Golf Association, presented by the Sawdust Club of the Union League Philadelphia. The trophy is to be awarded annually by the representative teams.

Although the report could not be confirmed, it is understood that the diamond necklace which was sent to Philadelphia by Tiffany & Co. in the care of George W. Barret, who disappeared, was a gift to Miss Mary As who will be married this week.

The Bailey, Banks & Biddle Company is exhibiting in its show windows the prizes for the cricket championship of the United States, which will be awarded at the grounds of the Philadelphia Club, June 26. This house also has contracts for the prizes to be awarded at the Quaker City Motor Club at the annual track meet at Point Breeze track, June 25 and 26.

The following jewelers were in this city, last week: H. S. Kratz, 1000 Locust St., Philadelphia, Pa.; E. Allez, Millville, N. J.; H. Caldwell, Wildwood, N. J.; H. H. Atlantic City, N. J.; J. Harry H. Holly, N. J.; Edmund Oliver, Philadelphia, N. J.; M. E. Hunter, Beverly, N. J.; Clark, Bristol, Pa.; Josiah Heckland, Pa.; H. Fitzsimmons, West Chester, Pa.; O. O. Stillman, New Brunswick, N. J.; D. H. Krause, North Wales, Pa.; McFarlan, E. Downingtown, Pa.; Bean, Lansdale, Pa.

Another move to make Philadelphia a great purchasing city has been taken by the wholesale jewelers of Philadelphia.

will induce purchasers to come to this city on railroad refund basis. The innovation is known as "Special Railroad Fare Refunding Sales" and will be inaugurated at The conditions are that any merchant aggregate purchases amount to \$500 or shall be entitled to a refund of railroad amount purchased. Another condition is that visiting merchants must register at the rooms of the Merchants' and Manufacturers' Association, 13th and Market Sts. The will of Zepherin J. Pequignot, who died last week. An estate of \$40,000 is divided in trust to his widow, Annie M. Upon the death of Mrs. Pequignot the estate, exclusive of \$600, which is divided into four equal parts, of Annie M., Ida M., daughters, and a Joseph, receive three portions. The estate is divided among three sons, James Francis L. and George J. Pequignot. Well & Berlet, Walnut and 13th Sts., recently purchased the property at the west corner of 16th and Walnut Sts., make alterations and additions to the building and use part of the first floor for business. The sale of this property for business purposes is another indication of steady advance of trade on Walnut Street of Broad St. Mr. Berlet, who is president of the Walnut Street Business Association, has been instrumental in opening this street a successful business and through his active interest much has been done to improve conditions. The building will move into the new building

Boston.

F. A. Bigelow has been enjoying an outing at Bennington, N. H.

Walter B. Snow has been in several New Hampshire cities on business.

Elmer E. Knight started, Monday, for a business trip through Maine.

John Martin is enjoying a vacation at West Tisbury, Martha's Vineyard.

D. C. Percival, Sr., recently enjoyed an extended automobile tour of Cape Cod, as far as Provincetown.

Charles Damon, head salesman for Daniel Pratt's Son, has opened his new Summer camp at East Jefferson, Me.

Mr. and Mrs. C. P. Fenno started, Friday of last week, for a three-weeks' outing in the lake region of Maine.

C. E. Huggins has received from Friendship, Me., his new yawl *Primrose*, which he had built for him there. The boat will soon be put in commission at South Boston.

Nearly \$300 worth of jewelry was damaged in a fire which partly destroyed the building, corner of Chestnut St. and Hillside Ave., Everett, Thursday afternoon. Other pieces of jewelry were saved.

Frank W. B. Pratt gave his new auxiliary yacht *Idyl* a successful try-out, Bunker Hill Day. The boat will remain at the Winthrop Yacht Club station, where Mr. Pratt is a member, until he sails for his Summer home at Cape Porpoise, Me.

Among the jewelers in town, last week, were B. G. Couri, Portland, Me.; C. H. Sinclair, of N. C. Nelson & Co., Concord, and Joseph Geoffrion, Manchester, N. H.; B. D. Loring, Plymouth, and John Lunt, of Moulton & Lunt, Newburyport, Mass.

C. J. W. Addison, Chelsea, is, with his family, looked upon as one of the pioneer Summer residents at Windmill Point, Hull. They moved down there, last week, to a cottage on Channel St., where the daughter, Mrs. W. L. Haynes, and her son are guests.

The Waltham Watch Factory Band took a prominent part in the celebration of Waltham's 25th anniversary, Thursday of last week. A march, "Salute to Waltham," composed by Conductor John M. Flockton, was played for the first time with much success.

The schooner *Chanticleer*, owned by E. C. Fitch, president of the Waltham Watch Co., is reported to have sailed on an average of 14½ knots an hour, recently, in the Gulf of St. Lawrence. The boat is soon to be brought to Mr. Fitch's Summer home at Manchester.

In the United States District Court, Wednesday of last week, an information was filed by the United States against one package of coral, alleged to have been brought here from Italy on the steamship *Romanic*, May 18, by Marazzo Vincenzo. The approximate value of the coral is \$5,000.

The annual vacation at the E. Howard Watch factory, Waltham, will begin July 1 and extend to July 19. It is expected, however, that some of the job departments will be in operation during that period. The employes had a three-days' holiday, last week, the plant closing down, Wednesday night, for the remainder of the week.

The last chapter of the events surround-

ing the larceny of \$1,500 worth of diamonds from Mrs. Emily F. Shattuck, of Orleans, Mass., some weeks ago, was the sentencing of Harry Merchant, charged with the theft, to four years in the House of Correction, Tuesday of last week. It will be remembered that a man, alleged to be Merchant, tried to dispose of the goods to an East Boston jeweler.

News has been received here of the death, in Kingston, Jamaica, of George T. Bell. Mr. Bell had been in the jewelry trade 25 years and was for a long period associated with the Wilson Jewelry Co. Latterly he was employed by A. Stowell & Co. He had gone south for the benefit of his health. Mr. Bell was a native of Danvers, where he was born about 45 years ago. He was unmarried and is survived by his mother and sister.

Among those from this city who attended the 30th annual outing of the New England Manufacturing Jewelers and Silversmiths' Association, at Providence, Friday, were A. S. Hirshberg, E. P. Tirrell, C. H. Ramsdell, W. H. Ryder, C. A. Woodsome, Henry Arnold, M. N. Smith, Aaron Task, W. E. Taylor and H. C. Brownell. Other Massachusetts jewelers were J. J. Barry, Fitchburg; Frank Buffinton, Rehoboth, and J. W. Nichol, Leominster.

The Bunker Hill Day celebration, in Charlestown, on Thursday of last week, had a singular interest for men of the trade, as the big electrical parade in the evening was called "Gems of the World," and included 15 floats, typifying the diamond, sapphire, topaz, garnet, pearl, opal, turquoise, emerald, coral, ruby, amethyst, chrysolite and crystal. Young women figurants made up the various allegorical features, and the whole effect was unusually gorgeous, brilliant and successful.

A gold nugget was found, Friday morning, at the Field & Wilde quarry, in Quincy, which came into prominence, recently, because of the discovery there of a substance said to have resembled the material found in diamond mines. A son of Edward Sandberg was passing the quarry when he saw a stone, weighing about three pounds and containing yellowish specks, near a pile of rock. He took the stone to his uncle, who is a jeweler, and the latter stated that it contained gold.

A stone known as the "Jim Fiske" diamond, valued at \$900, said to have been once proudly worn by Jim Fiske, and another called the Wellman diamond, and formerly the property of the King of Bavaria, it is said, were stolen from the store of the Raymond syndicate, at 356 Washington St., Saturday night or Sunday morning. George J. Raymond, head of the syndicate, whose business slogan, "Sold out to Raymond," has made him well known throughout the country, owns the jewels in question and had only recently taken them from a safe deposit vault at the International Trust Co. to have them appraised. The burglars had to blow one of two big safes in the store office to get at the diamonds and their work considerably damaged the interior of the store. Mr. Raymond says there is no doubt as to the history of the stones, with which, he declares, diamond experts are very familiar.

Trans-Atlantic Voyagers.

FROM EUROPE.

Art Ginsberg, with Eliassof Bros. & New York, returned recently.
 Gus Dreyfus, of the Dreyfus Mfg. Co., New York, returned on the *Cleveland* recently.
 S. Kallman, of Lessauer & Co., New York, returned recently on the *Kronprinzesscelie*.

TO EUROPE.

A. E. Aldred, Providence, R. I., will sail July 15.
 Albert Salter, New York, will sail June 29 on the *Lusitania*.
 S. Vyler, New York, will sail on the *Wilhelm II.* June 29.
 Frederick Goldsmith, of New York, sailed recently on the *Rhyndam*.
 A. Richmond, Providence, R. I., sailed for Europe on the *Baltic*, Saturday.
 E. Ostby, of the Ostby & Barton Co., New York, sailed for Europe last Wednesday.
 E. Old Winterhalter, of Towle-Winterhalter Hannafin Co., Butte, Mont., sailed for Europe on the *Amerika*.
 D. Mayer, New York, sailed yesterday on the *Kaiser Wilhelm der Grosse*.
 H. Lewis, of Honigbaum & Lewis, New York, sailed on the same boat.
 W. Mulford, of THE JEWELERS' CIRCULAR WEEKLY, sails on the *Adriatic* to-day.
 H. Michalson, president of the I. L. Thomson & Cons, Ltd., Montreal, Can., sailed Saturday.

GORHAM SILVER

"Not Strength, but Art, obtained the prize."—POPE

¶ The average Committee entrusted with the task of choosing the Trophies or Prizes bestowed in Summer sporting and athletic contests is composed of men of taste and discrimination, who insist that their choice shall possess not only intrinsic but also a marked artistic value.

¶ Thus, for the reason that art appeals to them and obtains the prize of their elective preference, each succeeding Summer season witnesses the offering of an increasing number of Gorham Cups and Vases as prizes in connection with Yachting, Rowing, Golf, Lawn Tennis and Athletic events in general.

¶ The Gorham Company, therefore, take pleasure in directing the attention of the Jewelry Trade to their special and other pieces designed with especial reference to the above purpose.

Index to News and Special Articles.

Table listing various news items and their corresponding page numbers, such as 'Centerpiece of Austrian Workman', 'Publish the Numbers of Stolen Watches', 'Little Mention of Copyright Law', etc.

THE foolish attempt of the Treasury Department to collect a 50 per cent. ad valorem duty on manufactures of cut agate, onyx, jasper, rock crystal, etc., used in jewelry, on the ground that the manufactures of these articles are provided for in Par. 115, of the tariff act, has proved unsuccessful and has been abandoned.

Publish the Numbers of Stolen Watches.

A Tennessee jeweler sends to THE JEWELERS' CIRCULAR-WEEKLY a list giving the numbers on watches stolen in his vicinity recently, makes the suggestion that retail jewelers in all sections of the country notify THE JEWELERS' CIRCULAR-WEEKLY whenever they get word of a watch being stolen in their vicinity and send the number to this journal; that these numbers be published and that watchmakers and jewelers constantly consult the published lists and compare them with the numbers of the watches which they receive for the purpose of being repaired or offered for sale or exchange by parties outside of the trade.

With this suggestion THE JEWELERS' CIRCULAR-WEEKLY is in hearty accord and is willing at all times to publish a list giving the numbers of such stolen watches. This does not apply exclusively to watches that may be stolen from the jewelers themselves, but also the numbers of such watches as are reported having been stolen by the police or by the jewelers' customers.

The New Copyright Law.

LITTLE mention has been made in the daily and trade press of the fact that a new copyright law goes into effect July 1, 1909, which contains many features that will interest the mercantile world. The law is attempting to remedy many of the abuses that existed under the old act, and gives greater protection to the publishers than they now have.

New and profitable business will come to you through an intelligent use of our advertising columns.

taking such matter without direct permission, because under the new law one copyright will protect an entire publication, whereas under the old law each article on which special protection was wanted had to be copyrighted separately. What is more, but one notice of copyright need appear upon the publication to cover all the articles contained therein. This is provided for under Sec. 3 and Sec. 19 of the act, which read as follows:

Sec. 3. That the copyright by this act shall protect all the copyrightable component parts of the work copyrighted, and all matter therein in which copyright is already subsisting, but without extending the duration or scope of such copyright. The copyright upon composite works or periodicals shall give to the proprietor thereof all the rights in respect thereto which he would have if each part were individually copyrighted under this act.

Sec. 19. That the notice of copyright shall be applied, in the case of a book or other printed publication, upon its title-page or the page immediately following, or if a periodical either upon the title-page or upon the first page of the text of each separate number or under the title heading, or if a musical work either upon its title-page or the first page of music; Provided, That one notice of copyright in each volume or in each number of a newspaper or periodical published shall suffice.

While there is little doubt that legitimate publications will extend the courtesy of reproduction of articles which appear in the columns of their books or papers, merchants or publishers who desire to republish articles should now be very careful to obtain expressed permission, as it costs nothing to ask it and may save a good deal of trouble in the future.

Representative Bennet Introduces Bill for Rural Parcels Post.

WASHINGTON, June 18.—To reduce the postal rates, improve the postal service and increase postal revenues, Representative Bennet, of New York, yesterday introduced a bill providing for a parcels post within the various rural free delivery routes. The measure proposes to reduce the rate on general merchandise from one cent for each ounce to one cent for each two ounces.

On parcels 1/24th of a cubic foot in size not exceeding one pound in weight, for delivery within a rural free delivery route, the bill provides a postage rate of one cent. A graduated scale of rates is provided for parcels up to one cubic foot in size and 25 pounds in weight, which shall pay 10 cents postage.

The measure also provides that \$10 shall be paid by the postal service for the loss of each registered package upon which no value has been declared and that the full amount shall be paid in all cases where the value has been declared.

W. G. Shane has sold his jewelry business in Chisholm, Minn., and moved to Grand Lodge, Mich.

TRADE

MARK

PERHAPS WE ARE TIRESEMELY PERSISTENT IN DWELLING ON THE INTEGRITY OF KIRBY JEWELRY. HOWEVER, WE FEEL THAT IN AN ERA OF COMMERCIAL SUBSTITUTION AND MISREPRESENTATION THE ABSOLUTE HONESTY OF KIRBY PRODUCTS CANNOT BE TOO INSISTENTLY OR TOO FREQUENTLY BROUGHT TO THE ATTENTION OF THE TRADE. OUR UNIMPEACHABLE RECORD AS MANUFACTURERS OF THOROUGHLY GOOD, ARTISTIC AND INEXPENSIVE GOLD JEWELRY SHOULD CREATE IN THE SKEPTICAL AN ASSURANCE OF FAIR TREATMENT AND A CURIOSITY TO SEE THE KIRBY LINE.

H. A. KIRBY

MANUFACTURERS OF
FINE GOLD JEWELRY

PROVIDENCE, R. I.
85 SPRAGUE STREET

NEW YORK OFFICE
9-11-13 MAIDEN LANE

Lancaster, Pa.

John J. and Charles E. Bowman, of Ezra F. Bowman's Sons, visited Philadelphia last week.

Witmer S. Holdeman and Miss McKilian, also of Lancaster, were married June 19.

Benjamin Meyerowitz, of Meyer Bros., paid his initial visit to the Lancaster trade, last week.

Leech, Stiles & Boyle, dealers in opticals, eyeglasses, etc., have removed to the Keystone building, 49 N. Queen St.

Louis Weber & Son have just finished improving the front of their hardware store, decorations in bronze colors proving very effective.

J. L. Straub has purchased the Straub & Swan Mfg. Co.'s factory and furniture of ground, and will establish a new iron works from Germany there.

The handsome gold medals, a diamond number, awarded as prizes at the Heart Academy commencement on June 19 were made by Eugene H. Keller.

Frank J. Carson has gone to Chicago to spend a two weeks' vacation, and then go to St. Louis to take a position as salesman with a large firm of jewelers.

A. R. Fiestel, York, formerly in the jewelry business at Phillipsburg, Pa., who has been on an automobile trip through Pennsylvania, stopped over in Lancaster last week.

Lately a couple of town clocks have been on a strike; indeed, striking times were set but last week the Court House clock went wrong the other way, and for several days struck not at all.

Among the jewelers visiting here recently, were: George E. Jones, of Philadelphia, Pa.; Monroe Alexander, of Cleveland, Ohio; Philip S. Dunbar, Baltimore, and W. H. Smith, Mechanicsburg.

The jewelers of Lancaster, along with the other business people, will close their stores on July, August and September on Tuesdays, Wednesdays and Thursdays at 5 p. m., on Fridays at noon, and will also close on Saturdays all day.

Philip Sievers, son of J. Sievers, of Lancaster, and Devers, York, a former student at the local technical school, visited Lancaster last week. John D. Wood, of Union Deposit, a graduate of the school, has taken a position with H. L. Oberlin & Bro., of Lancaster, as watchmaker, jeweler and engraver.

A cheap jewelry sale at a N. Queen St. establishment that is not a jewelry store has drawn the attention of our jewelers. The articles which are sold at the sale are advertised as being worth many times that sum. The jewelers are considering what action they can take in case the representations are fraudulent, as they are.

The jewelers of Lancaster are so appreciative of the recent action of the Watch Co. for announcing its intention of marketing its product exclusively to the retail trade that they sent a letter of appreciation by the members of the trade expressing their gratification, and declaring it would have the effect of drawing retailer and manufacturer closer together in business relations.

B. L. Seybold has purchased the jewelry store of C. O. Sullivan, McLouth, Kans.

New York Notes.

thnr Caro, of L. Davisburg & Co., is at
 factory in Providence, R. I., this week.
 Woodruff, a buyer for P. W. Ellis
 & Co., Toronto, Can., was in town, last
 week.

 Co.'s Chicago office, was a visitor in
 last week.
 John and Joseph Coddling, of the Cod-
 & Heilborn Co., North Attleboro, were
 in city, last week.
 Louis Dreyfus, of the Dreyfus Mfg. Co.,
 returned from Europe early this week on
 steamer *Cleveland*.
 John Sipe and P. C. Gillespie, Pittsburg,
 jewelers, will sail from this port, July
 for a trip to Europe.
 M. Davis has been engaged as a rep-
 resentative of the Depasse Mfg. Co. He
 leaves for the middle west.
 Frank P. Kennedy, of the Paye & Baker
 Co., made a trip to the seashore hotels
 on the Jersey coast, last week.
 George Cummings, a traveling representa-
 tive of the St. Louis Clock & Silverware
 Co., is spending a vacation in town.
 Lieutenant Louis Zahn, who is with Cross
 guelin, 23 Maiden Lane, spent last week
 at Schuyler with the 14th Regiment.
 Frederick Goldsmith, of Ingomar Gold-
 & Co., sailed for Europe recently on
 the *Syndam*. He will be away about four
 weeks.
 Albert Ginsberg, with Eliassof Bros. &
 Co., has just returned from a trip to
 Europe and will call on the trade in a
 few days.
 Nelson Bryant, 400 Fifth Ave., has closed
 his store for the Summer season and will
 open his store on Broadway at Saratoga
 Springs, N. Y.
 C. Teptfert, the Cincinnati representa-
 tive of Trier Bros., 35 Maiden Lane, is
 on his way from a trip through Wisconsin and
 the middle west.
 Sergeant Hawley Stone, employed by
 the Kaiser & Co., 14 John St., was in
 town, last week, at Fort Hamilton with
 the 8th Regiment.
 David Mayer, 14 Maiden Lane, sailed,
 yesterday, on the *Kaiser Wilhelm der
 Grosse* for Europe. He will visit the Euro-
 pean diamond markets.
 A number of Maiden Lane salesmen were
 in attendance at the annual outing of the
 New England Jewelers' and Silversmiths'
 Association, last Friday.
 Morris Michalson, president of I. L.
 Michalson & Sons, Ltd., gem merchants,
 Montreal, Can., sailed for Europe, Satur-
 day, on a semi-annual purchasing trip.
 Sauls, Chattanooga, Tenn., has been
 spending some time in this city at the Hotel
 Bristol. He will go from here to Atlantic
 City where he will spend a short time.
 Joseph Lake, who was for many years
 representative of the Theodore W.
 Miller & Bro. Co., is now representing the
 United Mfg. Co., of Brooklyn, makers of
 diamond jewelry.
 S. Mulford, of THE JEWELERS' CIRCULAR
 WEEKLY, will sail to-day on the
Atlantic for a month's recreation. He ex-

pects to be in London during the first week
 in July at the Savoy Hotel.
 S. Wuler, 4 W. 28th St., will sail for
 Europe, June 29, on the *Kaiser Wilhelm II.*
 with his family for a two months' trip,
 combining pleasure and business. His store
 will be closed during that time and will be
 re-opened Sept. 7.
 Charles J. Dieges, of Dieges & Clust, 23
 John St., was one of those who contributed
 a prize, last week, to the Press Athletic
 Association. The prizes will be given at
 the games of the association, to be held at
 American League Park, Saturday, July 26.
 Asher Green, of M. J. Averbeck, 10
 Maiden Lane, met with an injury to his
 left hand recently, by falling from a chair
 upon which he was standing, while at his
 Summer home at Rockaway. A small bone
 in his hand was dislocated as a result of
 the mishap.
 The Carlbert Mfg. Co. has been incor-
 porated to manufacture and deal in china,
 glassware, crockery, gold and silver plated
 ware, etc., with a capital of \$5,000. The
 incorporators are Carl Bruno and Abraham
 Pruslin, New York, and Robert Appel-
 baum, Brooklyn.
 The New England Quartz Co., of New
 York, has been incorporated to do a min-
 ing, smelting and refining business and deal
 in ores, metals, minerals, etc., with a capital
 of \$1,200. The incorporators are Joseph S.
 Klotz, Adolph Feldbaum and Phillip Levin-
 son, all of Brooklyn.
 Miss Hazel Tusler, who will give the
 work in jewelry at the Summer session of
 the St. Paul Institute School of Art, St.
 Paul, Minn., this Summer, is a graduate
 of Pratt Institute, Brooklyn, and is a spe-
 cial pupil of Miss Jessie Preston and Miss
 Peacock, of New York.
 The Ross Brass & Copper Antique Mfg.
 Co. has been incorporated under the laws
 of the State of New York to deal in brass
 and copper ware, Sheffield and silver plate,
 with a capital of \$3,000. The incorporators
 are: Abraham Rosenschein, 136 Rivington
 St., Manhattan; Annie Ross and Maurice
 Ross, 278 S. 6th St., Brooklyn.
 The property belonging to the estate of
 the former, W. F. Doll Mfg. Co., will be
 sold under the direction of Wm. Henkel,
 Jr., trustee, at public auction, on June 29,
 at 113 Leonard St. The trustee reserves
 the right to withdraw any of the property
 from sale unless it shall bring at least 75
 per cent. of the appraised value.
 Justice Garretson, of the Supreme Court,
 heard argument, Saturday morning, in Long
 Island City on an injunction obtained by
 William Scheer, a manufacturer of jewelry
 at 542 Fifth Ave., to restrain the Sewer
 Commissioners from opening a connection
 between the Arverne trunk sewer and the
 mud flats that lie between what is known
 as the beach channel and the mainland.
 Detective Sergeant Flood, of District-At-
 torney Jerome's office, sailed last Wednes-
 day on the *Mauretania* to bring back from
 London Eleanor Lorraine Beattie, the
 young woman who got over \$1,000 worth
 of goods from the Gorham Co. on the
 name of a customer of the firm. Miss
 Beattie was traced to London and arrested
 there by means of a sketch made by a
 clerk in the Gorham Co.'s store.
 Henry B. Norman, who was connected

with a jewelry store on Broadway, Brook-
 lyn, died Tuesday night of last week, at his
 residence, 864 Driggs Ave. He was born
 in England and lived in the Eastern Dis-
 trict of Brooklyn for 30 years. He is sur-
 vived by a widow and a son. Deceased was
 a member of the Royal Arcanum. Funeral
 services were held last Thursday evening.
 The interment was in Evergreen Cemetery.
 A final meeting of the creditors of
 Abraham Lindo and Isaac Lindo, individu-
 ally and as members of the firm of Lindo
 Bros., will be held at the office of William
 Allen, referee in bankruptcy, 67 Wall St.,
 to-morrow, at P. M., at which time the
 trustee's account will be examined and if
 found correct will be allowed, the trustee
 discharged and a final dividend declared
 if there are funds. Lindo Bros. were for-
 merly in business at 1157 Broadway, as re-
 tail jewelers. They filed a voluntary peti-
 tion in bankruptcy some time ago.
 According to the regular monthly state-
 ment of the Bureau of Statistics at the
 Customs House the value of goods of inter-
 est to the trade remaining in bonded
 warehouses for the month of May are as
 follows: Clocks, \$18,873; watches, \$106,-
 264; diamonds, unset, \$60,970; precious
 stones, \$31,567; jewelry, \$1,054; manufac-
 tures of gold and silver, \$16,148. As com-
 pared with these figures, the following for
 the same period in 1908 are given: Clocks,
 \$17,804; watches, \$134,785; diamonds, un-
 set, \$60,107; precious stones, \$34,151; jew-
 elry, \$3,320; manufactures of gold and sil-
 ver, \$255.
 The suit of David Mayer, diamond im-
 porter, 14 Maiden Lane, against Milton
 Mayer, attorney, which was brought re-
 cently in the Supreme Court before Jus-
 tice Andrews, has been decided in favor of
 Attorney Mayer. The action was brought
 by David Mayer to recover \$6,000 from
 Lawyer Mayer, who represented him in a
 former action brought by Rudolph A. Brei-
 denbach as trustee in bankruptcy of George
 Rainess. Mr. Breidenbach claimed that
 David Mayer had obtained an illegal pref-
 erence to the amount of \$4,000. At the
 trial in the lower court a judgment in favor
 of the trustee and against Mr. Mayer was
 given. Mr. Mayer ascribed his defeat in
 that action on appeal to neglect of his in-
 terest on the part of his former attorney
 and sued for damages. The outcome of the
 suit resulted in favor of Attorney Mayer.
 Morris A. Forgotston, a pawn broker at
 1490 Broadway, has advertised a reward
 of \$1,000 for the return of a pawn ticket
 for a pearl, bought of him recently. The
 pawn broker says that he sold the pawn
 ticket mentioned in the advertisement to
 an unknown man some two weeks ago for
 \$500, and that he had purchased it some time
 previous to that for \$150 from another man
 whom he did not know. The pawn broker
 was visited by a detective from a private
 agency, who told him that the pearl was
 stolen from an ancestor of an Indian prince
 30 years ago, and that the prince is anxious
 to get it back in the family and will pay
 richly for it.
 Henry Lewis, of Honigbaum & Lewis,
 sailed for Europe yesterday on the *Kaiser
 Wilhelm der Grosse* on a purchasing trip.

New York Notes.

(Continued from page 75.)

... from Europe, recently, on the *Kronprinzessin Cecilie*, after visiting the diamond markets.

Herbert Salter, formerly at 37 Maiden Lane, is now located at 71 Nassau St. Mr. Salter, who is a diamond importer, will sail for Europe, June 30, on the *Lusitania*.

E. Knowles, of the collection department of the Jewelers Board of Trade, is in Monroe, La., and attended a creditors' meeting in the matter of J. Lowe & Co., which was held yesterday.

Bastheim, of the new wholesale firm Bastheim, Adams & Able Co., Los Angeles, Cal., is in town buying stock. He is taking his headquarters with L. & M. & Co., 170 Broadway.

Assets of the American Specialty Co., 170 Broadway, are being sold at public auction by order of the court. The concern went into bankruptcy recently. Alfred Winley is the receiver in bankruptcy.

Gold Winterhalter, of Towle-Winterhalter-Hannafin Co., Butte, Mont., who has been assisting New York and making his headquarters at Henry Freund & Bro., 71 Nassau St., sailed for Europe last Saturday on the *Amerika*.

Charles H. Hulburd, president of the Elgin National Watch Co., was in town Saturday of last week. One of the large evening papers published a long interview with Mr. Hulburd on the tariff situation as it applies to watches.

Veneto Borrelli, of Borrelli & Vitelli, manufacturers of coral, 401 Broadway, has returned from an extended trip in Europe. He visited the principal cities in Europe for the purpose of novelties. He returned on the *Repe di Piemonte*.

The United Jewelry & Household Supply Co. has been incorporated to deal in jewelry and household supplies, with a capital of \$100,000. The incorporators are: Philip H. Herschman and Aaron Zalkin, both of New York.

Glo Armeny, 90 Nassau St., has purchased the ground on which the eight-story Armeny building at the southeast corner Nassau and Fulton Sts. stands. The property was sold for the estate of Dorothy Armeny. He owned the building previous to the purchase of the ground.

The trade in this city learned with regret yesterday of the sudden death of John Godwin, a well known traveling salesman. He died from an attack of appendicitis and the funeral was held last night at his home, 92 Morningside Ave. Mr. Godwin represented Durand & Co. in Philadelphia, Baltimore and other large cities. He was a member of the Brotherhood of Traveling Jewelers.

L. Goldschmidt and L. M. Heyman, traveling representatives for Henry Freund & Co., 71 Nassau St., are enjoying a vacation trip on Long Island Sound. The content and striking "Brownie" advertisement of the firm has so increased the demand upon their time that the vacation is very welcome and they are making the most of it, and are recuperating their strength for a busy Fall season.

T. Gorham Co., Fifth Ave and 36th

St., will make the silver service for the battleship *South Carolina*, the contract having been awarded to that concern through the Gilreath Durham Co., Greenville, S. C., whose bid was accepted. The *South Carolina* service will make the 24th silver service that the Gorham Co. has furnished the United States battleships and cruisers since the custom of presenting these vessels with such services was inaugurated, nearly 20 years ago.

Clifford E. Sulzburger, a well known and highly respected jewelry salesman who was employed by M. J. Averbeck, 10 Maiden Lane, died Friday night after an operation performed on Thursday. He was at the office Tuesday as usual, and his sudden death came as a shock to his business associates and friends in the trade. He was 37 years old and was unmarried. Mr. Sulzburger had been in the employ of M. J. Averbeck about a year and a half. He is survived by two brothers in the jewelry business at 37 Maiden Lane, a brother who is a New York lawyer and his father, who is a retired banker. The funeral was held Monday from the home of Myron Sulzburger, at 240 E. 72d St. Deceased traveled in Pennsylvania and the south.

A representative of the E. Howard Clock Co. recently finished the work of putting in the new illuminated town clock dials in the M. E. Church belfry at Malone, N. Y., for which the town made an appropriation at the last town meeting. Each dial is in seven or eight sections, the frame-work of each being of iron and the letters denoting the hours being also of iron, while the letters are separated by heavy frosted plate glass. Hereafter the dials will be visible at night as well as by day by the installation of an electric light behind them. The clock itself is also to be regulated and repaired and put in first-class condition. Mr. Knowlton, of Knowlton & Rider, who had the contract for installing the dials, gave personal attention to the carrying out of the contract.

The Jewelers Board of Trade reports that assets of the S. A. Burgoyne Jewelry Co., Mobile, Ala., have been sold at public auction to Isadore Dahlheimer, a Mobile jeweler, for \$16,250 cash. The accounts, having a face value of \$4,975, were considered practically worthless. The lease was not sold and runs until Oct. 31, 1911. It is to be determined whether the trustee has any right, title and interest in this lease or whether the bankruptcy proceedings terminate the lease and the same cannot be disposed of until this point is determined. The bidding was rather spirited between the purchaser and an out-of-town man and it is believed that the price obtained was the best possible one under the circumstances and the referee immediately confirmed the sale. The price realized was about 50 per cent. of the cost inventory. Further hearings and examinations of Burgoyne will be held.

Henry Keil, who occupies a jewelry store at 226 Chrystie St., obtained an injunction *pendente lite* from Supreme Court Justice Giegerich, Saturday, restraining the owners of the building from maintaining in its present position a grating near his display window. He complains that because of the vapors and odors coming from a bakery

beneath the store his business is being ruined. The jeweler says that he took a lease of the store at a rental of \$180 a year, with the understanding that the grating was to be closed up. The owners of the building said that they fulfilled the lease, but that the Tenement House Department objected to the bakery in the basement unless it was properly ventilated. The odors kept customers from looking at the display of jewelry in the window according to the complaint of the jeweler. In issuing the injunction Justice Giegerich says: "It would be impossible to prove how many customers had been kept away from his shop and how many sales he had lost by reason of the maintenance of the open grating. Some other use must be made of the basement, or the defendants, as landlords, or the tenants of the bakery, must provide other means of ventilation for it."

Death of Herbert G. Mackinney.

PROVIDENCE, R. I., June 22.—The funeral of Herbert C. Mackinney, formerly prominent in the manufacturing jewelry industry of this city and State as the head of the old-time firm of Mackinney & Smith, which was located at 54 Page St., was held this afternoon, in this city. Mr. Mackinney died in New York, Sunday. He was stricken with paralysis a few days ago and succumbed early Sunday morning at the age of 69 years.

Mr. Mackinney was of Scotch descent and was born in England, but came to this country when a young man and started in the jewelry business in this city in the latter part of the '70s, and for nearly 20 years was prominently identified with the industry. He associated with Charles Smith in the manufacturing business, and during the first 10 or 12 years the house was one of the best known and most prosperous in this city. It was one of the first houses to engage in what has since developed into the white stone lines, making a line of solid gold goods strictly in accordance with the best diamond patterns, excepting that imitation white stones were used in place of the real gems. These had a big success and were reproduced by the leading firms of this city, New York and Newark, and gradually were extended to the cheaper gold-front, plated and even shaded grades.

Mr. Smith died, and after that Mr. Mackinney conducted the business for himself, removing to Newark, N. J., in order to assume charge of the New York office of the concern, and later removed to New York. He left Providence in the early '90s and retired from active business life several years ago. He was widely known among the jewelry trade of New England and New York and had many friends in this city.

Mr. Mackinney's wife died several years ago, but he is survived by four sons and a daughter.

The business conducted by Albert Van der Steen, Green Bay, Wis., will be continued under the style of Van der Steen & Gross.

T. N. Gagne, Lewiston, Me., is planning the erection of a 21-tenement block on Lincoln St., near Chestnut. The ground floor will be given over to stores. Work will be begun next Spring, and the cost is estimated at \$15,000.

From "THE IRON AGE"
April 15, 1909

The New Haven Clock Company, New Haven, Conn., is to erect a five-story addition to its factory, to enlarge the department devoted to the Tattoo clock, the business of which has so increased as to compel crowding of the present quarters.

Always Buy Watches of a Retail Jeweler

A Mail-Order House, Although It May Sell a Good Watch, Cannot Adjust It To Your Person.

NO watch you buy by mail will keep perfect time, no matter who makes it, how perfectly it is made or what its reputation. A good time-keeper must be regulated to your person as carefully as a good tailor fits a coat. In no other way can you secure perfect time-keeping service. No one but your jeweler can do this. Watches you buy of mail-order concerns are not and cannot be so regulated. That's the reason they never keep perfect time and always run too fast or too slow. The variation of even one one-thousandth part in the delicate watch balance which governs the movement, means a loss or gain of a minute and a half each day. *South Bend Watches* are sold only by reliable jewelers. They are never sold by mail, because *South Bend Watches* are so good that we do not want their great reputation for reliability and accuracy injured by improper regulating. We make *South*

A SOUTH BEND WATCH.

Bend Watches are nearly perfect, as it is possible to make a watch and pay the jeweler to regulate it to keep perfect time in your pocket. A watch which is a perfect time-keeper in one man's pocket, very likely will not keep time at all in another man's pocket. If you carry a *South Bend Watch* you will know that the watch you carry will stand tests that are twice as severe as any that you are ever likely to give it. It might be frozen solid in a block of ice,—it would still keep satisfactory time. Every adjusted *South Bend Watch*, before it is sent to your jeweler, is baked in an oven heated to 140 degrees Fahrenheit and kept for hours in a refrigerator at freezing point. It must keep perfect time in every position and not be affected by the jars and jolts of railway trains, horseback riding, etc. It is built to stand the hardest wear and usage you can give it. A *South Bend Watch*, although it is the best watch in the world, costs you no more than other good watches. Your jeweler will gladly show them to you and tell you why they are the best watches for you to buy. Send coupon today for our handsome book, "How Good Watches Are Made," and an interesting little device showing how *South Bend Watches* adjust themselves to every temperature. Don't fail to talk with your jeweler about watches before you buy any watch.

South Bend Watch Company
South Bend, Ind.

The Ads That Ring True

to the cause of the Retail Jeweler are the **SOUTH BEND** Men may talk and men may promise you protection against unfair competition, but we have gone further—we have ourselves in black and white before the 80,000,000 of U. S. Sam's people, stating clearly that **SOUTH BEND WATCHES** are not sold to mail order houses.

What other manufacturer of watches has ever unequalled come out for the Retail Jeweler? We are giving you goods. Now get in the bandwagon and help drum the order man out of the retail jewelers' camp.

Send for prices and literature to-day.

Atlantic City, N. J.

Asseen, 611 Boardwalk, is carrying a fine European jewelry.

Charles Abramson, with Morris, Vogel & Sons, New York, was seen on the Boardwalk recently.

H. Kazaka has a notable line of Egyptian and Turkish jewelry and brass work at 600 Boardwalk.

S. Minura Bros., New York, are showing a large line of Oriental jewelry, fancy china, etc.

Robert C. Lang, Hotel Dennis, has an fine line of antique jewelry novelties, and fancy goods.

Asos, the New York firm which has a store here for several years, at 1033 Boardwalk, have a new manager in Jack

E. M. el Khourie, proprietor of the shop of T. Azecz, 731 Boardwalk, returned to Europe on pleasure and business for six weeks. Miss Primrose is managing the store in her absence.

W. Belfour, of E. W. Belfour Co., Boardwalk, has closed his store and will return on a three months' European tour. He will return and open again Sept. 10. He has a very high grade line of jewelry.

B. & Beck, novelties, have put in a fine line of jewelry and moved from 1411 Boardwalk. They have given up their store at 11th and F Sts., Washington. Robert G. Beck goes to New York to seek to buy goods.

A recent note in THE CIRCULAR-WEEKLY, referring to the Adjaka Jewelry Co., 1269 Boardwalk, was intended to refer to the Adjaka Jewelry Co., 1629 Boardwalk. The Adjaka Jewelry Co. also has a store at Atlantic City. Its main office is in Baltimore, Md. Mer & Wilkins, Bartlett building, have a business. John Lang, 1407 Boardwalk, has a chattel mortgage on the plant. It is known where Miller is. Mr. Wilkins is doing the best he can, and expects to start a manufacturing plant to be started by John Lang.

Harper-Smith Co., 1637 Boardwalk, has the exclusive sale for a new line of hand-craft jewelry, made by the Frost & Craft workshop, Dayton, O. No pieces are alike; each one is original, and the designs are shown in Roman, antique green, bronze and hammered copper. Vor Freisinger, Boardwalk and St. Charles Pl., has been in business 17 years and has taken THE JEWELERS' CIRCULAR-WEEKLY that long. He says he would not do without it for a great deal of money. He recently rent his present quarters and move his store to a new location.

Atlantic City is getting to be one of the best eastern jewelry centers for retail trade. There are more stores here than anywhere else, and all seem to be doing a good business, for there are few cities that have a more cosmopolitan crowd of people than this "city beautiful by the sea." Large amounts are spent for jewelry.

The recent convention of the American Jewelry Association at Young's Ocean Pier was very successful. The exhibition was a success, and the following exhibits were shown: Bausch & Lomb Optical Co., Rochester; the De Zeng Standard Co., Phila-

delphia, ophthalmological apparatus; Joseph C. Ferguson, Philadelphia, optical apparatus; McIntyre, Magee & Brown, Philadelphia, ophthalmic apparatus; F. A. Hardy & Co., Chicago, eye-testing apparatus; E. B. Meyerowitz, New York, optical instruments and apparatus.

North Attleboro.

S. G. Mandalin has returned from a short business trip.

Fred I. Gorton has returned from a two-weeks' business trip.

Mr. and Mrs. Fred E. Burden returned, last week, from their wedding trip.

Woodbury Melcher was in New York, last week, in the interests of his firm.

Fred B. Brigham has returned from a western trip for Cheever, Tweedy & Co.

Herbert Angell has returned from the west, where he has been for the Geo. L. Paine Co.

William A. Barlett left, last week, for Buffalo in the interests of the Stafford Ring Co., Providence.

Frank Waite left for New York, last week, on a business trip in the interests of the Webster Co.

James Baker, western salesman for Frank M. Whiting & Co., left, last week, for the Pacific Coast.

Berbert K. Sturdy was one of the members of the graduating class of Brown University, this year.

William S. Metcalf has returned from an extended business trip in the interests of the Plainville Stock Co.

St. Elmo Coombs returned, Friday night, from a 14-weeks' trip in the interests of the Payne & Baker Mfg. Co.

The shop of V. H. Blackinton & Co., Attleboro Falls, was forced to run over-time, last week, in order to fill orders.

John P. Bonnett is rapidly improving at the Emerson Hospital and expects to be able to return home, in a few days.

Clarence H. King, of the Geo. H. Paine Co., and his family are spending the Summer at their cottage at Lake Archer.

The members of W. G. Clark & Co. are organizing a relief association. The firm is encouraging the movement and has given a substantial check to the fund.

J. P. Benjamin, salesman for Boss & Baldwin, Attleboro Falls, who was taken ill at Rochester and had to go to his home in New York, has recovered and is again on the road.

A 90-foot chimney will be erected at the factory of the Webster Co. The work will start in a few days. In the base of the chimney will be used 14,000 common bricks and above will be used 9,000 specially prepared bricks.

John Devlin was badly injured, last Friday, at the factory of J. J. Sommers & Co. While moving a large piece of machinery he lost control of it and two fingers were caught between the floor and the machine and severely crushed.

Frank H. Bliss, a member of the A. H. Bliss Co., of this town, while running his automobile in Providence, Wednesday evening, hit Celia Goldstein and caused injuries which necessitated her removal to the Rhode Island Hospital. The police were notified after the accident, but took no ac-

tion against Mr. Bliss, as he was in no way to blame, the child having run in front of his machine.

Pacific Northwest.

Edward C. Barker, Coquille, Ore., was married recently to Miss Lucia M. Gould, Allegheny. The couple will reside in Coquille, where Mr. Barker is in business.

A. R. McLain, Prosser, Wash., has disposed of his business at that place, and will now devote his entire attention to his extensive farming interests in that vicinity. L. L. Brown, formerly of Montana, has taken possession of the jewelry store.

B. J. Ballard, who claimed to be a watch and jewelry repairer, was arrested, June 3, while preparing to leave Portland, Ore. His plan was to secure watches or jewelry to repair, melt the silver and gold articles and dispose of the watches and clocks to the pawnbrokers. He was leaving the city before the time the articles were to be returned, but one of his victims had become suspicious and made a report to the police, with the result that he was watched.

The Oregon Retail Jewelers' Association recently concluded its annual convention, and from the standpoint of both attendance and importance of business transacted the recent meeting has been exceptionally successful. The convention was held at Portland, Ore., and was the third meeting. Since its formation the membership has grown rapidly, and now almost 50 per cent. of the jewelers of that State are members. At the election of officers the following selection was made: F. M. French, president; C. H. Williams, secretary and delegate to the national convention at Omaha; E. J. Jaeger, treasurer; W. M. Howard, Marshfield, first vice-president; I. E. Staples, Portland, second vice-president; H. M. Leffert, Portland, third vice-president; L. Brunz, L. W. Watt and John Kramer, executive committee. At the next meeting of the State Legislature the jewelers hope to be able to have some important measures of interest to them passed. Among these is a provision requiring watchmakers to secure a license before being allowed to solicit work; a measure providing that a "mark of quality" be placed upon jewelry so that a customer may know something definite in regard to its purity, and a measure designed against fraudulent advertising. The association also protested against the use of the horned toad for hat pins, and will do what it can to curtail the sale of these in the northwest.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended June 19, 1909.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin.....\$387,483.87

Gold bars paid depositors..... \$89,182.25

Total\$476,666.12

Of this the gold bars exchanged for gold coin are reported as follows:

June 14.....	\$98,196.15
" 15.....	82,052.86
" 16.....	79,590.36
" 17.....	71,878.89
" 18.....	25,588.17
" 19.....	30,377.44

Total\$387,483.87

Providence.

I. Alberts, Boston, was in this city the first of last week.

Mr. Morrell, representing the Hamilton Watch Co., Lancaster, Pa., was in the city, last Friday.

Edward White was in New York, last week, in the interests of the George L. Vose Mfg. Co.

Harry Wolcott, of the Wolcott Mfg. Co., was in New York, last week, on business connected with that concern.

Mayor Henry Fletcher was one of the principal speakers at the golden jubilee of St. Michael's Church, Wednesday evening.

The Gorham Mfg. Co. has been granted permission to erect a brick addition to the firm's boiler house at its plant in Elmwood.

Samuel J. Weeden, who has been confined to his home at Riverside for several weeks, is reported as being more comfortable.

The regular quarterly dividend of 1½ per cent. on the preferred stock of the Gorham Mfg. Co. has been declared payable July 1.

John Kelso has removed from 86 Dorrance St. to larger and better appointed quarters in the Case-Mead building, 76 Dorrance St.

James P. Sullivan, with the Ostby & Barton Co., officiated as chaplain at the flag day celebration of Providence lodge, Order of Elks, last week.

Walter R. Callender, of this city, was best man at the wedding of Miss May Naudain and Charles Henry George, New York, in Omaha, June 15.

Frank M. Whiting & Co., North Attleboro, have been advertising in the papers of this city for ornamental engravers on sterling silver hollow ware.

G. A. Jewett, western representative of Hamilton & Hamilton, Jr., has returned to Chicago from a successful trip through the northwest in the interests of the firm.

George H. Cahoon has given up his trip to Europe for the present. A few days ago he sprained his wrist and narrowly escaped a fracture while cranking his automobile.

William J. Feeley & Co. made 5,000 souvenir medals in gold bronze for St. Michael's Church golden jubilee, last week. The die was designed and cut by Charles Such.

The stock and fixtures in the store of the late Charles H. Barber, 22 Canal St., Westerly, were sold at auction, last Friday, by the administrator of the estate, George C. Cross.

The case of James H. Orpin against the Westmacott Gas Furnace Co. was called before Judge C. M. Lee in the Superior Court, last week, and a verdict entered for the plaintiff for \$129.54.

Rogers T. Stafford, salesman for B. A. Ballou & Co., Inc., was married, last week, to Miss Nan Jeffers, of Pawtucket. The affair was a very quiet one, owing to a recent death in the family.

Gustav Saacke, of Wildpret & Saacke, directed the singing of the United German Singing Societies of the State at the annual festivities at Boyden's Heights, last week, incidental to German Day.

John J. Butler and Brig.-Gen. George A. Forsyth were members of the committee

on ladies' night of the Slocum Light Guard Veteran Association at the new State armory, last Thursday evening.

E. Merle Bixby, manager of the silverware department of the Shepard Co., left, last Saturday, for a week's encampment with Battery B, Rhode Island National Guard, of which he is the commanding officer.

A. S. Vennerbeck, of Vennerbeck & Clase, Inc., who is this year's golf champion of Rhode Island, was one of the contestants in the tournament for the John Shepard Cup, last week. He was defeated in the second round after a close match.

The case of John Nelson, under indictment for receiving scrap metal belonging to the Fontneau & Cook Co., Attleboro, was on the calendar of the Superior Court for a hearing on a petition for a new trial, last Saturday, but as the defendant was not ready the case was continued for re-assignment.

Albert W. Woodcock, Catherine P. Woodcock and Alice L. McGinn have formed a corporation to be known as the William R. Brown Co. The capital stock is \$25,000, and the concern will be located in this city for the manufacture of ribbon and metal buttons, badges, regalia and society paraphernalia.

President William T. Wilson, of the Rhode Island Society of Optometry, left, last Wednesday, for Atlanta, Ga., to attend the annual convention of the American Association of Optometry, as delegate representing the local society. He was accompanied by Harry Fellman, Woonsocket, and Thomas H. Tarbox, Pawtucket.

In the parlors of the Crown Hotel, last Wednesday evening, a party of about 35 attended the wedding of Miss Rose M. Jacoby, daughter of Max L. Jacoby, of this city, and Julian S. Herman, of New York. After the ceremony the party partook of a wedding repast in one of the private banquet halls, and then Mr. and Mrs. Herman left for an extended wedding tour up the Hudson river and into Canada.

Jacob Quait, a silverware peddler, was arrested in Cranston by Chief Trainor, last Wednesday afternoon. The man, who was selling silver-plated knives, forks and spoons from house to house, did not know that he was visiting the house of the chief, but the latter happened to be at home. Quait was arraigned in the Eighth District Court before Judge Bodwell on a charge of peddling without a license, and, pleading not guilty, was held in \$200 for trial.

Among the foreign importations received, last week, through the Providence Customs House were the following: From Bremen, one package of precious stones, one package of silverware and six packages of imitation precious stones; from Genoa, one package of statuary; from Liverpool, seven packages of manufactures of metal; from London, one package of imitation precious stones; from Naples, one package of statuary; from Rotterdam, one package of emery wheels; from Southampton, one package of manufactures of metal.

The regular monthly meeting of the directors of the Manufacturing Jewelers' Board of Trade was held in the rooms in the Wilcox building, last Friday morning, but owing to the annual outing of the New

England Manufacturing Jewelers' and Silversmiths' Association the meeting was adjourned until this week, when several important matters will be discussed. The committee, of which President Robert E. Budlong was the chairman, to attend the meeting of the National Jewelers' Association at New York will make a report.

Harrison Hyer, one of the best-known journeyman jewelers in this city, died at his home in Norwood, last Saturday noon, in the 73d year of his age, being the cause of his death. He was identified with several manufacturing jewelry concerns, his longest service being with the old firm of Hunt & Owen for a period of 21 years. He was a veteran of the Civil War, and was a member of the Marine Corps and the Odd Fellows. He had been gradually failing for the past six months, resigning his position with the firm of Irons & Russell Co., last January 1, 1916, born, Dec. 3, 1836, in Mendon, Mass.

One hundred employees of the broom department of the Gorham Mfg. Co. had an outing at Emery Park, last Saturday noon. The party was taken direct to the factory to the park in a special car. A clam chowder was awaiting them on the grounds, but it didn't wait long after the arrival of the hungry employees got there. A baseball game was in order. The chowder was a sizzler from start to finish, and the conclusion games of various kinds. The attention of the merry gathering all were summoned at four o'clock for a clambake, which concluded the festivities of the afternoon.

The following jewelry buyers were in town, last week: W. M. Bonn, of M. & Co., Pittsburg, Pa.; R. Myers, Myers, Ltd., formerly with the C. Jewelry Co., Vancouver, B. C.; M. I. Stein and Nathan Klopfer, of Bill Klopfer, Cleveland, O.; Charles L. C. W. Lauer & Co., Indianapolis, Ind.; Cerf, of Sol. Cerf & Co., Pittsburg, Pa.; Max Wilhelm, of M. Neuburger, New York; J. E. Reagan, of B. Miller & Co., Indianapolis, Ind.; Pudans, Springfield, Mass.; Mr. B. C. D. Peacock, Inc., Chicago; L. G. I. Grohs' Jewelry Co., Indianapolis; and E. Hamburger, of H. B. Cladin, New York.

Sixty members of the Brown & Mfg. Co. Quarter-Century Club gathered at Boyden Heights, Saturday afternoon, to participate in the annual dinner and meeting of the organization. Henry D. of the firm, and General Superintendent W. A. Viall were the special guests on the occasion. The club arrived at Boyden Heights on a special electric car at 6 o'clock and went immediately to the hall, where the tables were arranged in the form of a letter "T" and the decorations were carnations. For more than an hour the menu was discussed, then the tables were cleared and the association order by President Alpheus L. Green. The first business was the election of officers, which resulted as follows: President, Alpheus L. Greene; vice-president, D. Cogswell.

The employes of A. T. Wall & Co. had an enjoyable outing, last Saturday.

er Club grounds, Warwick. The party, including employes, both men and women, members of the firm, numbering about 100, left the city at nine o'clock on a special electric car. At Grant Station they left the car, and a short walk brought them to the club grounds. A lunch was served immediately on their arrival. At 12 o'clock a baseball game between single and married men was played, in which the former were the victors. An interesting list of prizes, including races and games of all kinds, was run off during the afternoon, prizes being of considerable value. Members of the firm who took part in the games were A. Tingley Wall, J. J. Frazer, F. M. Child, Henry G. Oxx and A. Tingley Wall, Jr.

John J. Butler has opened his cottage at Sunset Beach for the Summer.

John C. Calef has discharged a mortgage of \$10,000 on real estate belonging to John Luffington.

Ernest Fischer has gone to Europe to his old home and in the interests of manufacturing jewelry business.

James B. Macdonald is back from a successful trip to the Pacific Coast for the 10th Mtg. Co. and the John T. Mauran Co.

Notice has been received in this city announcing that Mr. and Mrs. William P. Smith and Miss Grace Chapin have arrived in Naples, Italy.

Ernest C. Ostby, of the Ostby & Son Co., sailed for Europe, on Wednesday, accompanied by Arthur O. Ostby, superintendent of the concern's plant.

William E. Aldred will sail for Europe, July 15. Mr. and Mrs. Arthur L. Aldred will spend July at the Martha Washington Hotel in Bretton Woods, N. H.

Ernest Binswanger, buyer for the Seigel & Dry Goods Co., of Chicago, was in the city, the latter part of last week, making orders with the local manufacturers.

At the meeting of the Board of Governors of the New England Manufacturing Jewelers and Silversmiths' Association, on Friday, several new members were elected.

Notice has been posted at the works of the Gorham Mfg. Co. announcing that the usual shut-down this year will be the last for several weeks in July instead of the first two. This has been the case for a number of years. Samuel H. Brower returned, last week, from a trip to the Pacific Coast for E. L. Seiger & Co., going as far as Portland in Seattle, and reports a fair trade. He has opened his cottage at Field's Point for the season.

A Richmond sailed on the *Baltic*, this week, for a seven-week's trip in Europe in the interests of Zare White, of this city, whom he will endeavor to introduce his line of fancy combs among the trade in Great Britain.

A new corporation to be known as the Alma Mater Novelty Co. has been incorporated under the laws of Rhode Island with a capital stock of \$10,000. G. Harold Wagon and G. Irving Boyden, of Attleboro, and James M. McCarthy, of Woonsocket,

are the incorporators. The company will manufacture college novelties, including seals, emblems, fraternity pins, etc. The offices of the concern will be located in Woonsocket, although the manufacturing will be done in Attleboro.

Arthur W. Barrus, with the Gorham Co., who is State Council Secretary of Rhode Island, was one of the delegates from this State to the annual session of the National Council, Jr. Order American Mechanics, at Detroit, Mich., last week.

Attleboro.

William L. Bushee was in New York, last week, in the interests of his firm.

Mr. and Mrs. C. H. Eden, who have been touring Europe, are expected to return, in a few days.

J. Clifford Torrey, a well known engraver of this place, was operated on, last week, for throat trouble.

W. E. Sanford, Oaks Bluffs, was in town, last week, purchasing jewelry for his store at that place.

Frank Tappen, who went on a yachting trip to Bermuda, is not expected home until the last of the month.

Frank J. Ruggles has returned from a western trip, where he has been in the interests of W. E. Richards Co.

Mrs. W. C. Tappen, who gave a generous gift to the Y. M. C. A., two weeks ago, was taken ill at her home, last week.

Ernest Quarnstrom returned, last week, from a short visit to New York, where he called on the trade in the interests of his firm.

The work of removing the machinery of the firm of Smith & Richardson into the Robinson building, No. 2, is progressing very rapidly.

Thomas E. McCaffrey, who is interested in a number of local jewelry firms, attended the commencement exercises at Holy Cross College, last week.

E. M. Bliss, Charles A. Marsh and E. A. Remington have been appointed members of the committee in charge of the building of the new Y. M. C. A. home.

Homer W. Daggett, Jr., has been appointed administrator of the estate of Homer W. Daggett. The real estate is valued at \$6,800 and the personal estate \$600.

The Hansen-Bennett Co., which has been occupying the ground floor of the Bigney building, has removed to the factory of the Electric Chain Co., in the rear end of the building.

D. S. Spaulding, manufacturing jeweler, Mansfield, was appointed a committee of one by the Mansfield Board of Trade, last week, to draft resolutions on the death of Joseph Wilson.

Charles Morse, for many years salesman and bookkeeper for George A. Dean & Co., Bates & Bacon, and recently with R. Gnell-Bigney & Co., has resigned his position with the latter concern.

Vernon O. White and Marion S. Manchester were united in marriage, Tuesday evening, June 15, by Rev. John Applebee, of the Pilgrim Church. The groom is a well known patternmaker.

Charles R. Bates, son of the late Joseph

M. Bates, and a former manufacturing jeweler, is to be treasurer of a new amusement company which will operate several moving picture shows and theaters.

Although definite announcement has not yet been made, it has been practically determined to build the new factory for the Frank Mossberg Co. on the land owned by Arthur Carpenter, on the east side of the N. Y., N. H. & H. R. R. tracks.

S. O. Bigney was one of the speakers at the annual meeting and dinner of the Middlesex Club, held at Pemberton, Saturday afternoon. He declared the removal of the duty on timber lumber would play havoc with the pulp industry of New England, and would transfer to Canada a vast amount of capital and labor.

G. Irving Boyden, Attleboro, James W. McCarthy, Woonsocket, and Harold Wing have organized the Alma Mater Novelty Co. The firm is organized under the Rhode Island laws, with a capital of \$10,000, and will manufacture its wares in Attleboro, although its main office will be in Woonsocket. The company will make a specialty of college and school fraternity pins.

An automobile operated by Orlando W. Hawkins, a jewelry manufacturer of this town, collided with James Martin on N. Main St., Providence, last Tuesday, and injured him to such an extent that he died an hour later. Mr. Hawkins was held under bonds of \$4,000, on a charge of manslaughter, but released on bail given by Harry Cutler. Mr. Hawkins is considered a careful driver, and it is said that the accident was not his fault. It is not believed the case will be prosecuted.

Burglars, some time between 10 P. M., June 16, and 7 A. M., June 17, broke into the store of Wm. D. Mackay, 691 Third Ave., Detroit, Mich., and stole much jewelry which had been left to be repaired. The loot included the following: One garnet and pearl bracelet, very old, and tapered at the top; one lady's chain, flat, square links; one gent's gold chain, 14 inches long, square links; one gold-filled cross, two inches, with raised scroll, work very old; one string gold beads; one three-stone opal ring; one diamond ring, small stone, about 1/16 carat, belcher mounting; one diamond scarf pin, seven brilliants, each weighing about 1/8 carat (this ring was made for pearl center and was all finished, excepting pearl was not attached); two small, loose diamonds; five loose sapphires, from 1/2 to 3/8 carat; one old cameo pin, filled, not very valuable; one filled fob, metal; one gold wreath pin; one gold bracelet, square, plain engraving, "Ebert to Nellie"; one gold bracelet, chased, badly broken; one pair cuff links, bead edge, engraved "D," old English; one only, cuff link, 14-karat, oval head set with ruby eyes; one \$2.50 gold coin, latest issue, with joint catch and pin; one lady's ring, turquoise, surrounded by pearls; one swastika belt pin, light blue enamel; one barrette, shell inlaid with gold scroll; one filled Roman bracelet; one jet bar pin; one scarf pin, gold Teddy bear; one gold neck chain, rope pattern; one intaglio teaspoon, engraved "Detroit" in bowl; one sterling fork and other articles of the same nature. Entrance was gained through a transom.

W. and Mrs. Pribau, manufacturing jewelers, have removed from room 1033 to room 1034 in the Silversmiths' building.

Frank S. Fisher, Danville, Ill., was here, last week, with his son. The latter will take a course of engraving here.

C. A. LeRoy, of the Western Clock Mfg. Co., La Salle, Ill., visited the Chicago offices of the corporation last week.

C. E. Kissick and C. F. Edwards are on a vacation on the latter's house boat,

which is the swiftest craft on the Fox River.

E. A. Thearle, brother of F. G. Thearle, of the C. H. Knights-Thearle Co., is here on a visit from San Diego, Cal.

F. T. Lotz, with the Juergens & Andersen Co., is on a visit with his wife at Utica, N. Y., and will return about July 15.

A. L. Fuller, Albert Lusk and C. F. Haber, with the Towle Mfg. Co., are on a visit to the factory at Newburyport, Mass.

C. B. Norton, Kansas City, Mo., and Edward Lehman, Denver, Colo., stopped over here, last week, on their way home from New York.

Harry Jehlinger, jewelry buyer for A. Hamburger & Sons Co., Los Angeles, Cal., stopped over here, last week, on his way to New York.

Morris Goldstein, a retail jeweler of Carthage, Mo., recently moved into his new store, which he has fitted up with new cases, counters, etc.

Bert Sinauer, of Oppenheimer Bros. & Veith, was here, last week, calling on the trade usually visited by his brother, Otto, who is now in Europe.

Local creditors of Sam R. Goldstein, bankrupt jeweler at Minneapolis, Minn., have received an offer of settlement equivalent to about 40 cents.

E. Bastheim, of the new Los Angeles wholesale jewelry house of Bastheim, Adams & Abel Co., stopped over here, last week, on his way to New York.

Louis Manheimer, accompanied by his wife and daughter, are in Europe and after a month's stay at Carlsbad will return to the United States in September.

Will F. Juergens, of the Juergens & Andersen Co., visited Sioux City, Ia., last week, to attend the wedding of Miss Louise Beck, daughter of Will H. Beck.

P. G. Storm, with Reed & Barton, recently returned from a vacation to his native town of Manawa, Wis., and is now on a visit to the factory at Taunton, Mass.

Izri W. Lederer has joined the ranks of the Boulevard burners and has purchased a 60 horse-power auto. Mr. and Mrs. Lederer are now living at the Vincennes Hotel.

The Wetteroth Jewelry Co., St. Joseph, Mo., has removed to its new store, which is in the center of the business district and has fitted it up with new fixtures, cases, etc.

Wm. J. T. Thorson, of the traveling force of M. A. Mead & Co., was married, last Friday night, to Miss Crystal Darrow. After the wedding, which was private. Mr. and

Mrs. Thorson left for a month's trip east.

Julius Armbruster, with the Illinois Watch Co., who was here, last week, reports the factory working full time. A new addition is being built to the factory at Springfield, Ill.

The Duncan-Osterberg Co. has succeeded J. G. Ferry at Eau Claire, Wis. Mr. Duncan was formerly in the jewelry business at Eau Claire. Mr. Osterberg was watchmaker for Mr. Ferry.

Bail bonds of Noah W. Pyle were forfeited, last week, and a capias was issued for his arrest. Pyle is a retail jeweler at 2618 Cottage Grove Ave., and is charged with receiving stolen goods.

Harry E. Jones, Chicago manager for the Wadsworth Watch Case Co., visited the factory at Dayton, Ky., last week and was accompanied here by Percy Savery, New York manager of the corporation.

I. W. Harper, manager of the Chicago office of the American Silver Co., left, last week, for the factory at Bristol, Conn., for the annual reunion and was accompanied by J. W. Brooks, Geo. Y. Cheney, John M. Lane and John B. Renken, of the traveling force.

T. S. Simpson, Chicago manager for the E. Howard Clock Co., was married, last Wednesday, at Flint, Mich., to Miss Florence May Stewart. Mr. Simpson's desk in room 805, Columbus Memorial building, was appropriately decorated by his office associates and he found great difficulty in separating himself from a few tons of rice.

Emil Despres, of Despres, Bridges & Noel, returned, last week, from a trade-booming visit made to the northwest under the auspices of the Chicago Association of Commerce. The boomer was gone 18 days and visited 39 cities in 12 States. Mr. Despres was delighted with his trip and is enthusiastic over the trade opportunities presented in the territory visited.

Benjamin Lindey and Sam Hindel were found guilty of swindling last week. Sentence was deferred for two weeks, pending a motion for a new trial. Their method of getting money was severely simple. Hindel posed as a jeweler and would visit merchants to ask their advice about opening a jewelry store in the neighborhood. While he was talking Lindey, dressed as a tramp, would enter the store and try and sell the merchant some imitation diamonds. The merchant, thinking "Hindel & Co." jewelers, would ask Hindel the value of the stones and Hindel set their value very high. Then the

merchant would buy the stones from Lindey at a low figure and think he was getting a bargain.

Los Angeles.

TRADE CONDITIONS.

The near approach of graduation time in the schools has contributed materially to the jewelry business this year. There is a tendency toward an increase in the price of goods bought, as well as in the number. Considerable silverware was sold as wedding gifts.

R. H. Gilmore, of Gilmore & Lee, is out on a trip among customers in southern California.

Brigden & Pedersen, 507 S. Spring St., are making a window display of southern California stones.

C. S. Douglas, formerly of Pittsburg, Pa., has taken a position as salesman with the Whitley Jewelry Co.

Mr. Goldman, 217 S. Spring St., is exhibiting in his window an attractive display of walrus ivory from Alaska and Siberia.

Paul Walsh, of Hambricht & Walsh, is still out on the road among the firm's customers, but expects to be home by July 10.

Fred Walter, Jr., of the Carl Entenmann Jewelry Co., has gone with his wife on a pleasure trip to Seattle, where he will visit the Alaska-Yukon Exposition.

Rubin & Clark, who have been in business together at 331 S. Spring St., for about a year past, have dissolved partnership, Mr. Rubin having bought Mr. Clark's interest.

S. Meyer, wholesaler in the Germain building, after having spent some time at Murrieta hot springs, has gone on a business and pleasure trip through cities north of Los Angeles.

S. B. Bailey, whose stock was recently destroyed by fire, has effected a settlement with the insurance men, and work has been begun in restoring the interior of the store. He hopes to be able to reopen in his old location early in July.

The Whitley Jewelry Co. has constructed in the rear portion of the store an office for T. C. Girton, head of the repair department, which is pronounced by traveling men to be the finest and most commodious quarters of the kind in the United States.

Out-of-town jewelers who were in this city, recently, include: A. Protsch, Redondo; M. J. Kaliher, Whittier; E. B. Smith, Santa Ana; A. Delmas, Oxnard; A. H. Whitman, Pomona; Kyle McBratney, El Centro; John Parker, Whittier.

Chas. Adams, who has been for some years past in the sales department of the J. P. Trafton Co., has entered into partnership with two other wholesale jewelry men of San Francisco, and will engage in the wholesale business in that city.

The factory of the Carl Entenmann Jewelry Co. is being worked to its full capacity. The work on which it is engaged includes a large number of medals and trophies of various sorts to be used in the festival during the national meeting of the Elks in this city next month.

George L. Penniman has so far recovered from the injuries he received in an automobile accident that he was able to start out among his customers again, June 21. He is fortunate in having an accident policy which paid him \$50 a week during the time he was incapacitated.

San Francisco.

J. S. Lehrberger is spending the Summer at Larkspur, across the bay.

W. F. Wooster, Suisun, was a visitor here last week and purchased quite a stock for his Solano County store.

Fred Roth, vice-president of M. Schussler & Co., and who is buying diamonds in Amsterdam, sent cards to friends, last week.

The new store of Deremer & Co., at Geary St. and Grant Ave., is practically finished and that firm is preparing to leave the avenue within a short time.

The store to be occupied by Radke & Co., on Post St., opposite Shreve & Co.'s, is promised to be ready some time in August, and preparations are being made to move about that time.

The elaborate fittings of the new store of Hirschman & Co. on Grant Ave., near Sutter St., have been installed and as soon as the building is thoroughly dry the firm will close the store on Van Ness Ave.

Work on an extensive scale has been commenced on the building at Kearny St. and Union Sq. Ave. that is to house the Baldwin Jewelry Co., and this will be ready before the commencement of the busy holiday season.

The work of fitting up the new Diamond Palace is progressing rapidly and the installation of the elaborate electric fixtures is now well under way. It will be a month, however, before the store is ready to be thrown open to the public.

John Herman, formerly a trusted employe of Steffen Bros. & Co., 2158 Mission St., is a fugitive from justice and, although warrants have been issued for his arrest and detectives have been placed on his trail, he has not been located. He is accused of having systematically robbed his employers during the past three months and his peculations are said to have been quite heavy. Detectives have been visiting various pawnshops in this city and in Oakland and considerable of the stolen property has been located.

The removal of several more large stores from the Van Ness Ave. district, during the past month, has served to make that thoroughfare less important as a business district and those among the jewelers who are still located there desire to get downtown as soon as possible. The only thing that prevents a wholesale removal at the present time is a lack of suitable structures. However, all of the firms in the jewelry line have now made their selections of future sites, and it is but a matter of erecting the buildings and preparing the stores before the removals are made.

John A. Hammersmith, of Hammersmith & Co., has left for Seattle, in company with a large party of prominent business men who are making a visit to the Alaska-Yukon-Pacific Exposition. While away he will enthrill the northern neighbors in the Portola festival that is to be held in San Francisco Oct. 19 to Oct. 23. This festival will be the formal notice to the world that San Francisco has recovered from the effects of the great fire of 1906 and that she is now able not only to care for trade as formerly, but that she is in a position to entertain visitors as of yore.

The vigilance of Deputy Collector of

Customs R. H. Wilcox, who has charge of the Customs Bureau at the San Francisco Post Office, was responsible for the interception of a large consignment of valuable opals on its way from Sydney, Australia. S. R. Finney, 2 Rector Pl., New York, the package containing the opals was marked having a value of \$50 and might have passed through without duty as articles valued less than \$60 are admitted free of duty. The deputy collector, however, by his knowledge of the value of the opals, turned the stones over to an assistant appraiser, who valued them at more than \$4,000. In fact, a memorandum in the agent indicated that the shipper valued them at approximately that figure. They were not confiscated, according to an agreement with Australia, but were turned to the postmaster at Sydney.

Milwaukee.

John P. Hess, Fond du Lac, has been named the county agency for the Postal Service new card postal weighing device.

Fred C. Stamm, who has been in business in Eagle Pass, Tex., for the past few weeks, spent a few days of the past week in Milwaukee, Wis., his former home.

The Zilmer jewelry establishment, 121 Monroe, has been renovated, and the removal of a partition in the rear of the establishment has added more display space.

Among the out-of-town jewelers who were in Milwaukee, last week, were: J. B. K. Waukesha; F. P. Beswick, Racine; Armbruster, Cedarburg, and the elder member of Schneider & Son, Burlington.

Extensive improvements are being made in the establishment of W. T. Irvine, Crosse. The front is being renovated, the display cases are being re-built, new lighting system is being installed, and a handsome new sign has also been placed in the windows.

Louis A. Kuesel, of Kuesel Brothers, and E. H. Warnke, of E. H. Warnke Brothers, have returned from the recent Milwaukee trip of the Merchants and Manufacturers Association. Both called upon the members and report that the junket was very profitable from every standpoint.

Jacob Vander Zanden, Green Bay, has opened a store at 128 N. Washington St. The new establishment has been recently fitted up, new fixtures have been installed and a line of new stock has been put in. The fixtures and cases for the new store were secured from the Green Bay Saw Works. Mr. Vander Zanden has been engaged in the jewelry business in Green Bay since 1893, and his increasing trade has demanded larger quarters. Both establishments will now be conducted.

The Overby jewelry store, at Rice Lake, has been purchased by W. W. Overby, formerly of Duluth, who has been in the employ of C. Overby for the past few years. He is a watchmaker and optician. Overby, who retires from the jewelry business, is one of the oldest business men at Rice Lake, where he has been in the jewelry business for the past 40 years. Accompanied by his daughter, Overby will spend the Summer at Hordaland, Norway, his birthplace, where he hopes to greatly improve his health.

Cleveland.

TRADE CONDITIONS.

Business in both the wholesale and retail trades in above the mark set by last week, although that of a year ago. The influx of exhibitors has swollen the normal, but this is the last few days of the show only. The trade for wedding and commencement gifts is strong, and diamonds are about holding their own.

W. C. Warner, of the New England Watch Co., was in town, this week.

N. Hoffman has been in general management of the Webb C. Ball Watch Co.'s booth at the exposition.

Bert Burdick has started on his anniversary tour, and consequently is giving himself to his friends.

W. Arnstine will leave for the east, this week, and H. W. Arnstine expects to return for California, in a short time.

M. H. Durham, Homer, Ont., and C. O. Schuch, Altoona, Pa., jewelers, will take a special course at the Newmeyer School of Jeweling.

W. Kluger Optical Co., located at 213 Broadway Ave., has about closed out its jewelry stock. It is the intention of the firm to continue in the optical business.

A. G. Lee, of the Howard Watch Co., was in town, this week, says that the movement in business in the last two weeks is noticeable all over the country.

T. Arnstine Bros. Co. has found tele-order business increasing to such an extent that it has been necessary to install a switch exchange to take care of long-distance calls.

Leonheiser, Huron, O., suffered a serious loss from fire this week. The building was totally destroyed. Most of the stock, however, was in fireproof safes and was only slightly damaged.

F. W. King Optical Co. has been ordered to take over the Cleveland end of the business of the Julius King Optical Co. There is no connection between the New York and Cleveland offices.

F. Kennard and Geo. Strong, formerly of F. W. King Optical Co., will organize a company to engage in the manufacturing and prescription business, in the near future. The offices of the company will be located at 335 to 338 the Schofield building.

A. J. Winterhalter, of the firm of Towle Winterhalter-Hannafin Co., Butte, Mont., was in town, last week, and bought a fine jewelry show cases. He had intended to purchase in Chicago, but a display at the exposition took his eye and he purchased

through his attorney, J. G. Davis, Bellevue, is offering his creditors a settlement at 60 cents on the dollar. No assignment has as yet been made and none will the creditors will accept these terms. J. G. Davis recently sold out his business to S. S. Sitz, Wadsworth, O.

The Cleveland Industrial Exposition has shown an immense success from both the standpoint of visitors and business brought to the town. The average daily attendance will run over 20,000, and hardly a line of goods exhibited that did not gain some customers. Especially were the jewelry houses successful in this respect, even those that did not exhibit. Every morning the warehouses of the wholesalers have been

crowded, and not a few visitors from the smaller towns dropped into the retail stores and purchased. A few of the out-of-town buyers in, this week, were: W. P. Caruthers, Oberlin; Ed. Rossel, Orrville; J. M. Roland, Greenville, Pa.; D. A. Gager, Oberlin; Nelt Barr, Ashland; A. Zang, of J. A. Zang & Son, Alliance; W. J. Higgins, Shelby; D. O. Kintner, Painesville; Benj. Mosley, Willoughby; H. H. Brainard and Geo. F. High, Medina; D. Leonheiser, Huron; D. A. Beswick, Berea, and Geo. Hibbard, Akron.

Cincinnati.

Jerome Thoma, of the Thoma Bros., has returned from a successful business trip.

C. E. Richter, of Richter & Phillips, has returned from the Shriners' conclave at Louisville.

J. W. Johns, who does the repairing for Richter & Phillips, is confined to his home, seriously ill.

The Wholesale and Manufacturing Jewelers' Association held its regular monthly meeting at the Sinton Hotel, Thursday.

August Goessler announces the marriage of his daughter, Norma, to Walter A. Compton, Wednesday, June 16, at Pomeroy, O.

The local members of the Noble Order of Ku Kus held a conclave and a bowling-fest, Friday evening, June 18, at the Cincinnati Turner Hall.

Mr. and Mrs. Frank Herschede, of the Frank Herschede Co., entertained the employees with a dinner at their home, Saturday evening, June 12.

Miss Flora Schimel, daughter of A. Schimel, the Central Ave. jeweler, will be married, June 24, to Mr. Goosman. They expect to reside in Texas.

Burton Fox, of Fox Bros. & Co., will return from Europe in time to spend July 4 at home, while Sol. Fox, of the same firm, leaves for Europe, in a few days.

The employees of Herman & Loeb played ball with the "boys" from L. Gutmann & Sons, Saturday afternoon, at Crow's baseball grounds, out at the end of the Elberon car line on Price Hill.

Simon Lindenberg, of Lindenberg, Strauss & Co., returned, June 17, from New York, well pleased with the success of the Cincinnati contingent of jobbers in helping to elect A. G. Schwab president of the National Wholesale Jewelers' Association.

The taking of testimony before Bankruptcy Referee Greve was resumed, last week, in the bankruptcy proceedings against the Herman Keck Mfg. Co. and the Duhme Jewelry Co. B. Ferra, son of a member of the creditors' committee, and who is employed by the receiver at \$56 per week, was on the stand all day, June 15.

It was reported from Lexington, Ky., last week, that two strange men who entered A. K. Lyon's jewelry store, June 9, robbed him of a diamond. One of them handed the proprietor a bracelet, at the same time giving him a name to be engraved upon it. Mr. Lyon turned to hand the bracelet to his engraver and the men walked out. A few minutes after they had gone Mr. Lyon missed a diamond valued at \$200.

The following out-of-town jewelers were

in the city buying stock, the past week: G. H. Ashton, Middletown, O.; E. Israel, Harrison, O.; Frank L. Horning, Brookville, Ind.; A. H. Beer, Versailles, Ind.; Albert Bland, Greenfield, O.; L. Hausmann, New Orleans, La.; A. J. Heesen, Toledo, O.; J. F. Hartwell, Oklahoma City, Okla.; O. E. McWaters, Somerset, Ky.; A. C. Davis, Coolville, O., and Adolph Lehne, Mechanicsburg, O.

Harry Emrie, one of Cincinnati's most prominent opticians and business men, died, June 4, after a 10-week's illness, at the age of 46 years. Mr. Emrie was born in Aurora, Ind., and after completing his education began his business career in Cincinnati, where he had continued until the time of his death. The deceased was a member of the Masonic lodge, and is survived by a widow and two children. The widow will continue the business as heretofore.

Kansas City.

Ernest Jaccard, of the Jaccard Jewelry Co., is enjoying a recuperative trip in Arkansas.

The New York Gem House has added J. H. Elliot to its office force in the capacity of bookkeeper.

Otto Knaul and E. H. Snow, traveling representatives of the Woodstock-Hoefer Watch & Jewelry Co., are back from a fishing trip and are now preparing to start out on a trade-producing trip.

Martin Hansen, an office boy employed by the Meyer Jewelry Co., was seriously injured by being crushed by the elevator in the Boley building, Thursday afternoon. His condition is regarded as critical.

Ed. N. Dunning, of Kansas City, Kans., has recently returned from a trip to Texas. It is understood that Mr. Dunning contemplates disposing of his business and making his home in the Lone Star State, where he has important land interests.

Just now some anxiety is felt as to the outcome of the high water in the Missouri and Kansas rivers. Both streams are practically up to the danger line, and are rising rapidly. The area affected by the Kansas, or the Kaw, as it is more familiarly known, embraces a large portion of the most prosperous section of that State. If the flood losses are serious all lines of business will be affected by them.

Toledo.

Tiedtke Bros. have arranged to give more space to jewelry in their general store, and hereafter will also handle a better grade of goods than hitherto.

Ralph E. Rickenbaugh, dealer in European art wares, has moved his store from 2 Ohio building to 820 Madison Ave., where he has more commodious quarters.

A large number of Toledo jewelers will attend the annual meeting of the Ohio Retail Jewelers' Association, which will be held at Cedar Point, June 29-30.

Toledo jewelers pride themselves on having been among the most liberal of the business men who contributed to the King Wamba Festival fund. Several have given it their personal time and attention, and practically every jeweler in Toledo is on the contributing list.

St. Louis.

Ralph Loewenstein, of the H. Loewenstein Jewelry Co., is traveling in Europe.

W. Haberman has taken the agency in St. Louis for the Empire Jewelry Co., Buffalo, N. Y.

Mr. and Mrs. J. B. Robbins will spend the 4th and 5th of July visiting friends at Springfield, Ill.

William Mauch, 1436 S. Broadway, is confined to his home on Longfellow Boulevard, by sickness.

Edgar Bloom, the deaf and dumb salesman, is in town with a line of his diamond papers and supplies.

H. S. Aller, of the Aller-Newman-Wilmes Jewelry Co., has returned from a two weeks' trip to New York.

Morris Bauman, of the Bauman-Massa Jewelry Co., will hereafter maintain headquarters in Wichita, Kans.

A. Gayou, of A. R. Brooks & Co., will leave in a few days for Kentucky, where he will spend a vacation of two weeks.

Miss Emma Pahl, cashier of the Elliott Jewelry Co., has returned from Vandalia, Ill., where she visited friends for two weeks.

L. A. Fassett, of Weiss & Fassett, diamond merchants, has gone to Alexandria, Mo., on a fishing trip, which will last three weeks.

Raymond Sonnenberg, of A. R. Brooks & Co., is spending a two weeks' vacation in the Ozark Mountains. He will return July 1.

J. K. Venable, of the Maschmeyer-Richards Silver Co., will leave Saturday night for a trip to Kansas, Oklahoma and Nebraska.

In the bankruptcy proceedings against Edward H. Kniepkamp, W. O. Anderson filed a claim for \$25 for legal services rendered the trustee.

H. Estinghausen will leave Sunday evening for Seattle, Wash. After seeing the exposition he will go to Alaska, where he will spend two months.

William Westphal, St. Charles, Mo., and O. Miller, Flat River, Mo., were here, last week, making purchases. Mr. Miller was accompanied by his two sons.

Samuel Kober, of the Maritz-Kober Jewelry Co., came in from a trip through the southwest Saturday and left Tuesday for Iowa and northwest Missouri.

J. J. Gaffner, St. Jacobs, Ill., recently accompanied Mrs. Gaffner as far as St. Louis on a trip to Ohio. Mr. Gaffner improved the opportunity by making purchases in St. Louis.

William F. Baier, 1181 S. Broadway, left Thursday for Yellowstone Park and Seattle, after which he will go to Los Angeles, where he has a store, and will remain there until the fall.

S. D. Culbertson, vice-president and treasurer of the Hess & Culbertson Jewelry Co., will leave, July 1, accompanied by Mrs. Culbertson, for Waupaca, Wis., where they will spend a month.

Cups, jewelry and silverware to be awarded as trophies at the annual picnic of the Scottish Clans at Normandy, July 5, are on exhibition at the store of the Hess & Culbertson Jewelry Co.

I. N. Hahn, president of the S. A. Rider

Jewelry Co., will leave in a few days for Salt Lake City and other western points, and will probably visit the Seattle Exposition before he returns home.

Harry Leighton, of the Mermod, Jaccard & King Jewelry Co., accompanied by Mrs. Leighton, will leave in a few days for Great Kills, Staten Island, New York, for an indefinite stay.

Lon R. Richards, who represents the Standard Button Co., Attleboro, Mass., spent several days this week in this city and visited his brother, D. P. Richards, of the Maschmeyer-Richards Silver Co.

Eugene V. Buchroeder, 3420 Grace Ave., connected with the firm of J. W. Cary & Co., was married, Tuesday, to Miss Anna F. Waechter, of 4024 N. 22d St. The couple are now on their wedding journey.

A. W. Long, of Tower & Long, returned Wednesday from a trip through Kentucky, on which he did an exceptionally good business. W. E. Tower, of this firm, will leave next week for Texas and Oklahoma, to be gone six weeks.

St. Louis jobbers and manufacturers were notified this week that W. T. Cohenour had taken possession of the jewelry store of H. W. Thompson at Muskogee, Okla. Mr. Cohenour assumes Mr. Thompson's obligations on the basis of 85 cents on the dollar.

The jewelry business heretofore conducted in the name of H. C. Grawe, 613 N. Broadway, was incorporated Wednesday under the firm name of the H. C. Grawe Jewelry Co. Herman C. Grawe holds 198 shares, Frank H. and Mrs. Alvina E. Grawe one share each. The capital stock is \$20,000, fully paid. Frank Grawe and Mrs. Alvina C. Grawe are son and wife, respectively, of Herman C. Grawe. Mr. Grawe has been in ill health for the past three or four years, and his condition has recently become worse. He is seldom able to be at his place of business, and the active direction of the business devolves upon his son.

A meeting of the St. Louis Society of Retail Jewelers, held Thursday night at the Jefferson Hotel, was intended to have been the annual meeting, and it was intended that officers should be elected, but an impression prevailed that it was a special meeting called to complete the details for the entertainment of the delegates to the State convention and the attendance was not large. It was decided, therefore, to defer the business of the annual meeting and the election of officers until after the State convention. A number of applications for membership are pending, but as it is believed that the State convention will be the means of prompting many others not now members of the associations to apply, it was decided to postpone actions on the pending applications also until after the State convention, when there will be a big initiation. It is probable that regular meetings of the entire association will hereafter be held quarterly instead of annually. Under the policy now in vogue the entire membership get together only once a year, and the business of the association during the interim is looked after by a large executive committee. It is thought that annual meetings would have a tendency to keep the interest of the members more keyed up and increase the efficiency of the organization.

Omaha.

L. F. Boyce, Seattle, Wash., has taken a position with T. L. Combs & Co. in this city.

C. B. Brown, of the C. B. Brown Co., on Thursday, celebrated the 25th anniversary of his business career in this city.

A. Mandelberg supplied the four gold medals which were awarded as prizes to the Sacred Heart Parish School, last week.

John Morris, Hancock, Ia.; John Dewitt, Nebr.; G. E. Kierstead, Nebr., and H. L. Braun, Tekamah, were in Omaha, last week replenishing stock.

C. Hansen, watchmaker for Fredgaard & Co. for many years, has returned and leaves shortly for Lincoln, Nebr., where he will be associated with the Tucker & Co.

The firm of T. L. Combs & Co. is planning to make extensive alterations to its store building. Plans are being prepared for an entirely new front, together with extensive interior improvements.

The C. B. Brown Co. furnished the Sar-Ben organization with about 15,000 tons recently. The large silver watch which was supplied by the concern for the Omaha Daily News automobile contest was awarded, Friday, June 18.

Herbert Ryan, son of Geo. Ryan, of the Mawhinny & Ryan Co., was in the graduation class of the Omaha High School. Mr. Ryan, who is captain of the Omaha High School Cadets, received the first silver cup at the annual competition held at the Auditorium, last week.

Letters are being received daily from Mandelberg, secretary of the local jewelry club, from the large manufacturing jobbers of the country, requesting that space be reserved for the coming convention. So far the following have responded: Elgin National Watch Co., Omega Watch Co., Rockford Watch Co., South Watch Co., Adelphi Silver Co., Pickard China Co., Brauer Art Studio, White Art Co., J. B. Ash & Co., B. Tyrell, Benj. Allen & Co., Omaha Community, Ltd., and many others are expected to order display space. At the meeting Thursday evening the advisability of closing jewelry stores during the months of July and August at five o'clock was discussed. The club decided to do so, regardless of the closing of other stores in the city. The club also decided to present \$100 collectively to the Eagles for their national convention, held in St. Louis in September, instead of asking each member individually to subscribe a certain amount.

Columbus, O.

A daring thief who broke into 11 show cases which stood on the street, included L. W. Lewis, 99 N. 11th St., among his victims. He did not get much booty as the more valuable goods had been removed for the night.

The Crellin-Feller Co., Kansas City, Mo., which purchased the stock of the Fred Morden store, offered it at public auction in a High St. location, but was very well satisfied with the business and closed Saturday night.

News Gleanings.

The store of P. Weinberg, Key Fla., was damaged by fire recently.

Chas. E. Cochran, formerly of the Cochran Jewelry Co., Goldfield, Nev., later of Montgomery Bros., Los Angeles, Cal., is now associated with J. C. Bloch, Denver, Colo.

A. Cohen, 393 Hamilton St., Allen Pa., and Miss Theresa Silverstein, of same city, were united in marriage on day evening of last week. The couple on their wedding trip at Atlantic City.

Friends of Chas. G. Sederberg, Mt. O., have been congratulating him on arrival of a 13-pound daughter at his home June 13. She is the great-great-granddaughter of Governor R. N. Bischoffberger, Ohio.

Joseph Siegel, Grand Rapids, Mich., just completed extensive improvement of his optical department. New apparatus, the latest pattern have been installed and an expert optician will have charge of the department.

Fire was discovered in a closet of the Seth Thomas Clock Co.'s building on Chapel St., Thomaston, Conn., about a week ago. The firemen immediately distinguished the blaze, which had done very slight damage.

Emily Arnold, who was arrested in Northampton, Mass., recently, on a charge of stealing a vase from the store of E. Davis, 164 Main St., was convicted of the crime and sentenced Monday to six months in the House of Correction.

The store of Walker Bros. Taylor, La., was broken into one night recently. A small jewelry case was found broken a quarter of a mile from the store, the contents having been strewn over the ground. Thus far no clue has been obtained of the thief.

The Gorham Co., New York, has awarded the contract to supply the silver for the Gunter Hotel, San Antonio, the order having been placed through J. Kray, a jeweler of that place. The value of the silver to be supplied is \$28,000.

Louis Prang, an art publisher, of Philadelphia, died in Los Angeles, Cal., June 1. He was at one time known in the jewelry trade as in early life he was a manufacturer of morocco and fancy jewelry boxes. He had his own business and later went into the publishing line.

Wm. L. Smith, Seymour, Conn., has filed an application for a discharge in bankruptcy and creditors and others interested have been notified to appear before Hon. Newton, referee in bankruptcy, at his room 9, 818 Chapel St., New Haven, Conn., at 2 P.M., when the bankrupt will be examined.

Diamonds and other precious stones valued at \$1,500, which were stolen recently from the show window in the store of Clark & Lindskog, Ely, Nev., by two men who tunneled under the building and dug a hole through the bottom of a window found recently in a canvas bag which was buried near a tree near Murray Canyon, five miles from Ely. Two men have been taken into custody accused of being implicated in the crime.

THIS DEPARTMENT CONTAINS A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN AND THE UNITED STATES PATENTS THAT HAVE BEEN REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

ISSUE OF JUNE 15, 1909

2431. COMBINED MATCH-CASE AND CIGAR-TIP CUTTER. GEORGE L. BUCKMAN, Washington, D.C. Filed Sept. 1, 1908. Serial No. 451,141.

Combination with a case having a cover, of automatic cigar-tip cutting mechanism adapted to be actuated by the pressure of a cigar, the operation of said mechanism causing a simultaneous opening of the cover.

2433. BALANCE. WILFRID HEUSSER, Salt Lake City, Utah. Filed March 19, 1908. Serial No. 422,009.

Combination with a balance beam, of a support member, a slidable member supported thereon and an arm and handle movably engaged with said slidable member and adapted to move the same forward and back on said support member and also adapted to be moved forward and back without moving said slidable member to place a rider upon said balance beam and move it therefrom.

2456. GEM CUTTING AND POLISHING MACHINE. GERTRUDE S. R. McMULLEN, Los Angeles, Cal. Filed Nov. 15, 1907. Serial No. 402,352.

A gem cutting and polishing machine comprising a standard having a scale marked thereon; a non-revolvible bracket slidably mounted on said standard; a polishing arm having a vertically swiveling head mounted by cone bearings in said bracket, said arm being adapted to swing horizontally and means to vertically adjust said arm within said bracket, said adjusting means being in addition to the adjustment provided by the bearing means.

2453. BELT-PIN. JAMES C. DORAN and JAMES A. DORAN, Providence, R. I. Filed Nov. 23, 1908. Serial No. 463,982.

A jewelry pin comprising a single integral plate, said plate having a pin-joint and a pin-clutch drawn up integrally therefrom and projecting from the back thereof, a pin-tongue having a head pivoted in the pin-joint, and separate and independent pieces secured on the face of the plate over the openings therein formed by said pin-joint and pin-clutch and closing said openings and concealing them and the pin-tongue head, whereby a separate back-plate is dispensed with and any desired configuration of plate may be used.

925,406. SWIVEL. JOHN WENNSTROM, Suffern, N. Y. Filed Sept. 6, 1907. Serial No. 391,648.

A swivel comprising a split ring having terminal lugs adapted to form a bearing for a swivel pin and formed to receive and hold a clamping ring, in combination with the clamping ring co-operating with said lugs, a snap hook provided with the swivel pin adapted to be carried by said bearing, the shank of said hook being shaped to receive the clamping ring during the adjustment of said swivel pin in its bearing.

DESIGNS.

40,049. EMBLEM. ANNIE L. WILD, Providence, R. I. Filed March 8, 1909. Serial No. 492,205. Term of patent 14 years.

40,050. FINGER-RING. STACY SHOWN and WILLIAM B. SMITH, Seattle, Wash. Filed Jan. 21, 1909. Serial No. 473,583. Term of patent 7 years.

40,051. CUT-GLASS DISH. ROBERT H. PITTMAN, Honesdale, Pa., assignor to T. B. Clark & Co., Honesdale, Pa. Filed April 20, 1909. Serial No. 491,200. Term of patent 7 years.

40,053. RECEPTACLE FOR TOILET COMPOUNDS. RUDOLPH RUZICKA, New York, assignor to the J. B. Williams Co., Glastonbury, Conn. Filed Feb. 18 1909. Serial No. 478,745. Term of patent 14 years.

PRINT.

2,523. Title: "OUR NEW MODEL PIVOT POLISHER." (For Pivot-Polishers.) AMERICAN WATCH TOOL CO., Waltham, Mass. Filed May 11, 1909.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM THE Illustrated Official Journal.)

ISSUE OF JUNE 2, 1909

2,237. CLOCKS; COIN-FREED APPARATUS. A. G. P. WIINGAARD, Copenhagen. Feb. 1. (Patent of addition to No. 2236, A.D. 1908.)

A clock which can only be wound-up when coins are inserted at regular intervals may be used for the collection of insurance premiums. As the time of winding is not necessarily identical with the time of payment, a clock wound daily can be used to collect weekly payments, or vice versa. When a coin is passed down the shoot g, it is supported by the heel f of a pivoted spring-pressed stop d, which frees the winding-arbor a and a wheel 5 of the clock-train simultaneously. One or more projecting arms 3 carried by a wheel geared to the going-train, are arranged to bear against a cam 4 on the stop d at predetermined times, whereupon the coin or coins in the shoot drop, and the arm

m x stops the clock unless another coin is introduced. Pawls v, 6 are arranged to prevent the action of the device from being frustrated by tilting the clock.

2,341. WORKMEN'S TIME-RECORDERS. W. M. LLEWELIN, Bristol. Feb. 3. Period for granting patent not yet expired.

The time-wheels of time-recorders are intermittently actuated and held locked in the intervals by mechanism of the kind described in Specification No. 19,638, A.D. 1907. Links from the levers O¹¹,

FIG. 1 and FIG. 2 diagrams showing mechanical details of the time-recorders.

Mary C. Shaw, 360 Broadway, Troy, N. Y., has had on exhibition recently models of the famous Cullinan diamond, both in its cut and uncut form, which have proven exceedingly attractive and interesting to the visitors of her establishment. Miss Shaw recently installed for the Troy Record in the new building which it has just completed, a beautiful master clock of the Standard Electric Time Co. and several secondary clocks throughout the building. The master clock matches the mahogany office furniture which has just been installed. She has also installed a double dial clock in the front and one facing the inside of the office and another on the street. Miss Shaw also installed the fine Howard clock in the Manufacturers' Bank, and this and the door clock of the Record are the finest illuminated timepieces in Troy.

Now It's The Lord Elgin

The demand to-day is for thin watches.
The public have been waiting for a
thin Elgin Watch—now it's here—the

LORD ELGIN

The
Thinnest
Watch
Made
in
America
with
Enamel Dial

the thinnest watch made in America
with enamel dial.

Like all Elgin Watches—it was not
put on the market until worthy to carry
with it the Elgin reputation for reliability.

Every Lord Elgin is cased at the fac-
tory and timed in the case—the most
accurate thin watch in America.

Four grades—7, 15, 17, and 19
Jewels adjusted. 18K and 14K solid
gold cases, also 25 year filled cases.

Furnished with metal dials, plain or
engraved, gilt or silver.

Prices furnished on application by
your jobber, or write the Company for
only authorized price list.

ELGIN NATIONAL WATCH COMPANY

THE HOROLOGICAL REVIEW

Antique Collection of Watches Exhibited in Pittsburg

Written expressly for The Jewelers' Circular-Weekly.

RE was placed on exhibition at the Carnegie Museum, Carnegie Institute, Pittsburg, Pa., a few weeks ago, what is believed to be the best collection of antique watches ever owned in America. The entire collection of 100 is the property of H. J. Heinz, who spent years in making the collection, and represents a value of more than \$25,000. It has not given the extremely inter-

ests of any man in America. It is, therefore, not strange that under the circumstances both should be extremely interested in the study and improvement in watches from the early centuries to the present time. Mr. Heinz gathered the collection primarily to illustrate to some extent the history and progress of watchmaking.

Dr. Holland has set forth in his own inimitable way for THE JEWELERS' CIRCULAR-

watchmaking may be rather fully traced from the specimens upon exhibition.

While the invention of the clock is supposed to have been about the end of the 10th century, the watch did not appear until shortly after the year 1500. Before the time of the watch proper the pocket sundials seem to have been the only portable timekeepers (Fig. 1). Four excellent samples of these are in the collection, though the earliest one was made in the year 1610, almost 100 years after the invention of the watch.

Peter Henlein, or Hele, of Nuremberg, is generally credited with the honor of inventing the watch. He was born in the year

FIG. 1.

FIG. 2.

WEEKLY some facts concerning the history of the watches in the accompanying illustrations that no doubt will prove of great interest to watchmakers. His statement dictated by him follows:

The collection of watches which has been gathered by Mr. H. J. Heinz and deposited in the Carnegie Museum consists at the present time of an even 100 specimens. This collection is unique among American collections from the fact that it not only illustrates the beauty of ornament which has been applied to watches, but also serves as a historical collection, since the history of

FIG. 3.

1542. He was the first man to substitute a spring to take the place of the weights in the clock and thus make the portable clock a possibility. Henlein employed a long steel ribbon tightly coiled around a central spindle to maintain the motion of the wheels. These portable timekeepers did not come into general use for a long time, but were reserved for wealthy people who showed a fondness for the novelty, which at first took the form of table clocks, for

specimens to the Carnegie Institute, it is said to be his ultimate intention. I. W. J. Holland, director of the Carnegie Museum, and Mr. Heinz are warm friends. Dr. Holland is especially interested in every detail of the splendid collection. He is now engaged in writing a book giving the history of each watch in the collection as is Mr. Heinz, who has one of the finest private mu-

WALTHAM WATCHES

FIFTY YEARS AGO

FRIDAY, APRIL 22, 1859.—The proprietors and workmen of the watch factory at Waltham were entertained by Gov. Banks at his residence today. About 200 men and women were present.

From Boston Advertiser, April 22, 1909.

The Waltham factory had existed five years. Here was the first successful effort to realize the dream of Dennison, father of American watch-making. Here was the first and only structure in the world erected for manufacturing pocket timepieces. Three hundred people were employed, the largest number ever assembled in such an enterprise. General Banks was proud of Waltham, where he was born and where he had worked as bobbin boy in a cotton mill. He found time, while Governor of a great State, to greet and encourage the operatives of this watch factory, because he believed that they were creating an imperishable industry. He lived until the word WALTHAM had symbolized the perfect watch in every country on the globe.

In that year, 1859, the total number of Waltham watches manufactured was 12,304; in 1906, the product was 855,000; to-day there are 16,000,000 in use. The Waltham factory was the parent factory. It is now the corner-stone of an industry that gives a livelihood to more than 100,000 persons in the United States. In 1859, it was the only institution of its kind here or anywhere else; every other watch factory came later. The Waltham factory is distinguished by its achievements as well as by its age. Waltham watches have always exemplified the highest type of watch construction, and public recognition of their superiority is attested by the highest awards at all the great Expositions wherever they have been shown.

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing on this hemisphere.

the earliest watches were not carried about on the person, but were usually placed upon a table.

The iron watch (Fig. 2) in Mr. Heinz's collection is a good type of these earlier portable clocks, though probably somewhat larger than the usual size at that time. This watch was made by Johann Sigmund Scher at Regen, Bavaria, in the 16th century. It is ornamented with brass and cut

It does not seem necessary to give the history of the mechanical improvements which followed, but it suffices to say that the mechanical portion of the watch did not keep pace with the perfection which was reached in the construction of the cases. Few of these watches were signed by the makers, but most of the German towns adopted a distinctive trade or work mark which appeared on all their productions. Thus, Nuremberg watches show the letter "N" enclosed in a circle; Augsburg used a pineapple, Mayence a wheel and Berne in Switzerland a bear.

About the year 1600 the watches known as "the Nuremberg egg" appeared. This was a favorite pattern in Germany, and the one contained in the Heinz collection (Fig. 3) is an excellent example. It may be noticed that this watch has an ornamented swivel made in the shape of a pineapple, thus indi-

from the story of William Tell, with a pierced and engraved silver dial, made by Philip Votter in Vienna in the year 1763.

In the time of Cromwell there was a marked change in watch cases. Puritanism had its effect upon the elaborate ornaments of the Elizabethan period and the

FIG. 4.—OBVERSE.

and has only one hand, the time being indicated by the approximate position of this hand which corresponds to the hour hand of the present day. The very earliest pocket watches and table clocks are similar in form though many show cylindrical metal cases chased with gold and at times with a gold lid, usually pierced, that the figures

FIG. 5.

cating that the watch was made in Augsburg.

Though originating in Germany, the making of timekeepers soon extended to France, and by 1590 watchmaking became a flourishing art in France, but though these French watches were imported into England it was not until the very end of the 16th century that there is any record of English manufacture. In the Elizabethan period the elaborate display in dress extended to the watches, and watches of many fanciful shapes were worn by the beaux and belles of that period.

The majority of these were made at Blois in France, and though no examples in this collection were made in that city, the very elaborate watch (Fig. 4) made by Froment Menris in the early part of the 19th century, in which the case is cut from a single carbuncle in the form of a cockle-shell and the crystal-covered face is elaborately decorated in gold and enamel set with small diamonds, is a very good copy of the work of the Elizabethan period.

The forerunner of the carriage and the automobile clock was naturally the large portable watch to be carried in a sedan chair. The one in this collection (Fig. 5) has a repoussé silver case depicting scenes

FIG. 6.

cases became very plain, much as the majority of watches are to-day.

In the Napoleonic period the watches were much more elaborate. A beautiful example in the collection (Fig. 6) has an

FIG. 4.—REVERSE.

dial may be seen. They were often decorated with a bell, the bell being a relic of the clock. The early clocks were used as alarms, as indicated by the word *Glocke*.

As I have said, originally the spring was a tight hand wound about a pillar, but as soon superseded by the coil spring.

FIG. 7.

elaborately ornamented case carved in silver by Cochin, the scene representing Esther before the throne of Ahasuerus. At this time many of the watches were ornamented by famous artists, though the mechanical part of the watch was constructed by a watchmaker.

Switzerland also contributed some beauti-

Very few jewelers who have looked *thoroughly* into the "I-T" watch proposition—its quality and trade policies—have felt that they could let it pass.

They have been glad to discover something new that means money to them—a watch that is *advertised* and is selling *right now* wherever it is displayed.

If your watch trade is slow, it will pay you to try the new Ingersoll-Trenton.

The coupon below will bring information.

- (1) Sold only direct to the retail trade.
- (2) Only responsible jeweler can handle them.
- (3) Retail price absolutely restricted.

ROBT. H. INGERSOLL & BRO .

HOME OFFICE: 45 JOHN STREET, NEW YORK

specimens, and the enameled watch (Fig. 7) with jargoons, made by Phillip Torot (Geneva about the year 1790, is a notable one in this collection. This watch has a double case, the outer case being of tortoise-shell *piqué* (that is, with an orna-

merly the property of Admiral Lord Nelson of the British navy. This watch, of English manufacture, is a repeater, with a fine gold case, on the back of which appear the letters "N" and "B" surmounted by a ducal coronet, which stands for Nelson's Neapolitan title, the Duke of Bronte. This watch also has an elaborately enameled upper case and a chatelaine with attachments for orders, seal, etc. (Fig. 9).

A small lady's watch made in Paris, enameled and set with pearls on both sides of the case, was formerly the property of the late Empress Dowager of China and was looted from the imperial palace at Peking during the Boxer Rebellion (Fig 10).

Another piece looted from Peking is a very large pair-case, silver gilt watch made by

Count Perponcher's Watch.

THE last photograph of the recently deceased first chamberlain and former royal Prussian court master of ceremonies, Count von Perponcher, shows the venerable nobleman, who had passed his 80th year,

FIG. 8.

tion of silver pins driven through the case. Another Swiss watch in the collection made between the years 1820 and 1825 by Fite and Moynier (Fig. 8) has a case

FIG. 10.

Timothy Williamson, of Fleet St., London, in the year 1707. The outer case of this watch is beautifully enameled and elaborately pierced. This watch indicates the time, the day of the week, the day of the month, and has second and split second hand. It also contains a musical box playing two tunes (Fig. 11).

When New York's City Hall Clock Stopped.

CONJECTURES as to the cause of the stopping of the City Hall clock, in New York, at 3.50 p. m., June 14, were numerous. Among the reasons given why the much-looked-at timepiece had gone on strike were the 83 degrees of heat that suddenly beset the town, and the regretted absence of the clock's old keeper, etc. But the real cause was the rewiring of the tower by electricians, who designedly put the old clock to sleep so that it would not impede or hamper their work.

Extensive improvements have just been completed in the store of W. J. Gamm, 3 W. Main St., Madison, Wis. An addition of 30 feet has been added to the establishment and will be used for the display of cut glass. A well equipped optical department is located on the left of the cut-glass room.

FIG. 11.—OBVERSE.

holding in his hand a watch, the cover of which displays a peculiar design in relief. This watch contains, set in the gold of the case, the seven shot pellets that struck the Emperor William I. in the head when, on June 8, 1878, Nobiling attempted to assassinate him. They had to be removed by

FIG. 11.—REVERSE.

surgical means, and on the count's request the old Kaiser presented these souvenirs to his faithful attendant, who had the historical shot pellets set in his watch case.

E. R. Van Ostran, Uhrichsville, O., has purchased the fixtures and stock of A. J. Harris, New Philadelphia, who made an assignment some time ago. The purchase was made at the assignee's sale.

FIG. 9.

ely studded with pearls; the face is of vari-colored gold and the figures of the dial are formed by seed pearls. The most interesting watch in the collection historically, is that which was for-

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Original Jewelry Display During the Melon Season.

Prepared expressly for The Jewelers' Circular-Weekly.

MELONS are now popularly accepted as a symbol of something worth while, and therefore a melon window for a jewelry or novelty display is up to date and

shown in Fig. A, with a "bite" taken out at the top. Cover the "cut-out" partly with red plush and the lower section with green silk. If the cloth is considered too costly

Fig. C shows the melon with small pieces of jewelry hung in the "seed." The base of the window is draped with paper or cloth of a light color, and surrounding the melon (which is made of a size to correspond to your window) could be placed a number of melons of various sizes to give the appearance of a field of melons.

Should real melons be difficult to obtain, cut out oval-shaped pieces of green cardboard and daub them with iridescent lines. Small boxes placed behind the "cut-outs" will maintain them in a slanting position.

If a full field of melons is desired in a large window, use real melons on the ground and cut-outs in the rear. Bits of artificial vines could also be effectively laid in between the melons.

Small articles of various sizes could be advantageously shown in the foreground of the window. Arrange different little groups with price tickets. Signs to match display could read:

DIAGRAM SHOWING HOW TO CONSTRUCT THE WATERMELON DISPLAY.

attractive, and is particularly appropriate for use in the hot weather period.

Another good point is that it can be inexpensively put together. A large sheet of stiff cardboard is rounded on one side, as

use red cardboard and make the "rind" effect by using green crepe paper. Of course, the first suggestion produces a much richer display card. Fig. B illustrates this step.

We've cut a melon! These pins at 25c.

Pluck a pin—at a quarter

Melons—that's what they are yours for "two-bits."

25c. a slice—for these novel

Everything is systematized in that will facilitate the serving and prices are uniform.

Every means is used to make the customer feel satisfied. At the same time of displeasure is shown when not purchase.

Storekeeping Department.

Summer Time Schemes for Enlivening Business.

(Expressly for THE JEWELERS' CIRCULAR—WEEKLY.)

(continued from issue of June 16.)

NEWSPAPER advertisement of moderate size would not be a bad idea, owing to the prevalence of that "dull myth," cheaper rates, more promise and other advantages are obtainable in this line also during that period.

Depart a little from the beaten path and offer a nicely jeweled trophy, number of miniature ball and bat sets, or a tennis racquet and ball or some similar conceit, to the most skillful baseball team composed of local players or the tennis champion of the town, etc. The awards should be made in early Fall and the trophies should be exhibited in the meantime.

Another scheme would be to present a silver cup, spoon, or some other similar trophy to every baby born in your ward or town during May, June, July, or August. This is a bit out of the ordinary but it would be a very effective way of letting people know you had articles for infants, and unless your prices are different from the average American it would be a comparatively cheap method.

Exhibitions are more frequent in the Summer months suitable for such occasions should be prominently featured. Commencement exercises at schools and colleges are also a feature of this period; class pins and other novelties could be brought to the attention of the scholars.

College clubs want pins and members of clubs want buttons in time for their reunions and conventions. The majority of these events are scheduled for the Summer months. The weather is out-doors and almost every one has time to observe and is glad of an opportunity to stay out in the air. Consequently these shows are more valuable than those which they are examined at leisure and compared with others in the same way. Be alert to the extra possibilities for development that present themselves in the summer and work harder than in the winter to create business.

Give to Summer trade some of the goods usually reserved for the holiday season. Why not advertise "Holiday Goods Select Now," and say that on a limited initial payment goods will be received and delivered when desired. The customer could make a weekly payment plan so that by the holiday season the purchase could be fully paid for. Announcement of this kind would probably attract a great many salaried workers who are paying out lump sums around Christmas as a bit of a strain.

Stores would not adopt all of the suggestions herewith offered, but many of these could be developed into schemes suitable for any firm. Minor details are, of course, changed to meet local conditions.

Novel showing might be termed "Dollar Days," and arranged to illustrate the dollar will buy. Get a number of one-dollar bills, a few silver dollars

and, if possible, a few gold dollars. Lay these dollars as price marks on various articles. These price marks would have to be removed at night and replaced each morning, but money shown in a window has a strange fascination for people and always attracts attention, especially if one offers good values in this dollar sale.

Pictures of foreign cities are comparatively easy to obtain nowadays, and another interesting showing could be arranged by exhibiting such photos at the same time with goods brought from these foreign lands. The combination is a trade winner, as it holds attention.

(To be continued.)

The Store of J. M. Coffman, Salisbury, Mo.

THE business advantages to be derived from having a "city store" located in a country town seems to be enjoyed to a greater degree in the West than in the

Be Prepared.

EXPERIENCE teaches us that one of the most essential elements of every successful venture is being prepared to handle properly whatever business one can anticipate as prospective.

Being prepared includes careful selection of stock, convenient placing of it with a view to proper display and also having it so arranged that salesmen can show it without delay. Thorough knowledge on the part of clerks, not only as to prices but regarding quality of wares, is an important requirement.

Seasonable goods should always be exhibited and advertised a few weeks prior to the period for which they are suitable, and special local events should always be recognized in some manner. Dealers should cultivate the acquaintance of traveling salesmen representing reliable firms and always manage to find time to inspect

INTERIOR VIEW OF THE STORE OF J. M. COFFMAN, SALISBURY, MO.

more thickly populated East. J. M. Coffman, Salisbury, Mo., a town of less than 2,500 inhabitants, has a long established business which occupies the store shown in the accompanying illustration.

The store, which is 25 x 50 feet, with a workshop in the rear, is well lighted and has paneled side walls. The cases are of mahogany, supported by white enameled standards. The repair bench is surrounded by a cashier's cage, while the safe occupies a point in the rear with the proprietor's desk nearby.

Epigrams of Energy.

- UTILIZE every minute.
- Systematize your hours.
- Don't dodge daily duties.
- Change window shows weekly.
- Special monthly sale of slow stock.
- Endeavor to increase yearly profits.
- Be active and accurate always.

sample lines, as it means a great deal to be posted thoroughly all the time and to be in touch with up-to-date people.

Whether you are a successful dealer depends largely on your own efforts, and no one factor will contribute more to a merchant's ultimate success than being so equipped that when customers favor him with their patronage he can serve them satisfactorily.

Many a retailer discouraged by lack of business would do well to study his own methods and compare them candidly with those of his successful competitors. Time thus spent will be of great practical value in preparing him for that increase in the volume of his sales, which is sure to follow any intelligent effort.

Use your brains in running your business; don't be a machine, but guide your business as carefully and watch it as closely as you would an expensive bit of machinery and you will find an improvement.

THE CONNOISSEUR

Devoted to Art Pottery, China, Marbles, Bronzes, Cut and Decorated Glass Ware, Bric-à-Brac, Lamps, Art Metal Wares, Fancy Goods and Kindred Lines.

PORCELAIN DECORATION, PAST AND PRESENT.

The manufacture of porcelain, as in all ceramics generally, the nature of the glaze plays an important part, whether it is used, as in the case of stone ware, to render an originally porous clay mass dense and impervious to water, or as in the case of faience, to give to the clay, already made plastic by the sintering process, its beautiful glossy surface. It is only natural that there should always have been an effort to increase the luster of the glazing aid in the glaze and to harmonize the colors by means of this transparent coating. Certainly such aesthetic attempts have had a beneficial influence upon the development of the art of glaze painting than the practical consideration that the glazing protects the decoration from mechanical or chemical injury, a technical reason that objects thus glazed need not be burned again.

The Chinese brought under-glaze painting to a high stage of development as early as the 15th century. Their favorite color was cobalt, which, mixed with iron oxide, gives a beautiful blue, varying in intensity with the proportion used. Red came into use later, and the Chinese porcelain of that day contented himself with two sharp-fire colors. He covered the surface of his porcelain vessels with arabesques, interspersed with dots of the most precious stones in a setting. Besides the liking of the Chinese for a rich color style of decoration, another circumstance contributed to make this manner of painting the favorite one, namely, the nature of the clay. This was made from an impure mass and was consequently more white, but had a decided grayish yellowish tinge. It is easily conceivable that the Chinese decorator tried to cover as much of the surface as possible, especially in blue and yellow, being complementary colors to make white, and a yellowish porcelaine decorated with rich blue looks whiter and really is.

Since Chinese porcelain was brought to Western Europe, first by land, then by sea, there have been attempts to imitate it. The Italians were very prominent in these efforts, but not especially successful. They made great progress in the manufacture of stoneware, but they departed farther and farther from their Oriental models. Their ceramic masterpieces, which will ever excite the admiration of collectors, were created by methods original to themselves. The Dutch had more success. They

practically controlled the sea trade with China in the following century, and while they did not get as far as making genuine porcelain, their delft ware was hardly to be distinguished in outward appearance from the Chinese porcelain which it imitated. The under-glazing colors were almost more intense and lustrous. The delft faience is made from a yellowish mass, a mixture of different clays, over which is an opaque white tin enamel glaze. Upon this glazing, lying in pulverized form upon the clay, already once burned, the artist paints his design, and then a kind of over-glazing is applied, consisting of powdered glass which melts into a delicate film of glass, whence the ware derives its mirror-like luster. The decoration of the delft ware was, of course, much influenced by the school of Dutch painting then flourishing, but besides this the influence of the East Asia porcelain painting is also perceptible. The shallow dishes so often seen in illustrations clearly exhibit the Chinese plant-motives found upon old Chinese ware. Later the delft faience decorators were not satisfied with the blue alone, but added other colors, especially red and gold. But among the colors used under the glazing, or in it, as we must say of the delft ware, blue is always the most prominent.

In Germany the 18th century marks the height of faience manufacture. The brilliant success of the delft manufactories had its part in causing the establishment of similar ones in Germany, both by princes and private individuals. In Meissen a porcelain clay was discovered almost equal in value to the Chinese. The manufacture of china must necessarily be profitable, and it was tried everywhere. Where real china could not be made stone ware took its place. Among the many stone ware manufactories the one at Bayreuth, founded at St. Georgen am See in 1720, stands in the first rank on account of its extent and artistic importance. The east Asian style of decoration was prominent here, but the Bayreuth workers were fond of adding, besides plants, animals. And it is very probable that, aside from the prevailing taste of the period, an influencing circumstance was also the desire to conceal the yellowish surface or to make it look whiter by the use of the complementary blue.

In Meissen the blue, as under-glaze color, also played an important rôle, so much so that by the name of Meissen table ware we understand that kind which has the so-

called "onion pattern" in its decoration. Karl Berling, in his "History of Meissen China," says of this pattern: "It has, to be sure, really nothing to do with the onion, for the fruits which adorn the edges must be characterized as Japanese peaches or pomegranates. Some of the latter fall open, showing the seeds. In the oldest style they seem to be turned inward, then inward and outward. Besides these, peonies and curious-pointed leaves appear. In plates the connection between the rim and the center was often made by a circle of flowers and rings, strictly conventionalized. The center of the plate has a large aster and a twig with leaves and blossoms, called by the Japanese 'Schakiako,' with a bamboo rod curling around it." In the case of the Meissen china, at least in its beginning, it was not undesirable to conceal the defects of the clay itself by lavish decorations.

The onion pattern was later, especially in the second half of the last century, much imitated in private factories, and is still made. The pattern has, to be sure, been much modified by leaving out details here and there for the convenience of its manufacture or to give it a lighter appearance. In the technical processes, methods have been introduced which make the sketching of the complicated design easier, so that this pattern has become less and less expensive.

This circumstance, the cruder execution inseparable from lower prices, and also a certain aesthetic prejudice against the covering of the surface with decoration, have of late years combined to make the purchasing public turn away from the old onion pattern. The German china manufactories responded to this changed feeling by producing rim decorations in both muffle and sharp-fire colors. The technical significance of this can be given in a few words. The center of the plate, its mirror, as it were, remains here undecorated, and consequently the smallest imperfection is at once perceptible. The tiniest black speck caused by the presence of iron in the mass, every bit of fire-brick which may have fallen upon it while in the fire, the least defect in the glazing—all these have a detrimental effect. Besides this the under-glazing colors shade differently according to the degree of heat to which they are exposed. The china must be burned very carefully, and similarly decorated pieces placed in the same part of the oven, so that all pieces belonging to the same set may be alike.

These difficulties as well as others equally important have been overcome by the German manufactories. It seems certain that this ware, with its sharp-fire decorations, uniting beauty with durability, will long enjoy the favor of the public.

Waterman's Ideal Fountain Pen

Pump-Filling

A Self-Filling style of perfect action, without any complicated parts. Of the highest quality and finest manufacture, which the trade-mark guarantees.

In all the plain sizes and Silver Filigree.

There are no soft rubber parts to be affected by acids in the ink.

The pump-filling pen is filled without the use of a dropper, by simply unscrewing the butt end of the holder, and, after inserting the pen point in ink, slightly oscillating the small

Operation of Filling

plunger. The ink is drawn up into the barrel. When filled, the end may be readily screwed on again. The same operation, using water, cleans the inner parts of the pen. The small slot at the butt end permits a coin to be inserted for use in unscrewing the part easily.

Made with all styles and sizes of gold pens, and fitted with the superior Spoon Feed.

The wide range of styles in which Waterman's Ideals are made permits any and every demand to be fulfilled with a make well-known and time-tested, and which the trade can recommend fully. Send for Catalogues.

39 UNION SQUARE, NEW YORK

Bureau of Labor's Statistics as to Lung Diseases Among Jewelry Employes in the State of Rhode Island.

VTIMS of diseases of the lungs and respiratory organs were 30.3 per cent. among the male employes in Rhode Island during the 10 years from 1897 to 1906. This is the declaration in a report of the Bureau of Labor of the Department of Commerce and Labor at Washington just issued. These figures are given in a pamphlet dealing with "industrial dust" as cause of tuberculosis and other lung diseases.

It is shown that 80.9 per cent. of the employes who died in Rhode Island during the period died from such lung diseases. Rhode Island figures are used in the pamphlet because it is stated no other State furnished figures suitable for comparison and mention in such writings. Over 250 pages are devoted to the analysis of the dust in connection with deaths of employes in the various industries.

The pamphlet deals specifically with lung diseases based on cases where dust is inhaled by persons regularly employed in working upon or in the room or articles of general use, which give off so-called "industrial dust." "Industrial dust" is defined in the report as "mineral, metallic and vegetable fibre dust, including all the fine solid particles which are run off from various substances in the process of manufacture or treatment of articles in common use in daily life." Among these are enumerated pearl and ivory. The report says:

"The jewelry industry has attained to large proportions, constituting one of the most important industries in Rhode Island. During the 10 years ending with 1906 the number of deaths of jewelers recorded was 557 from all causes, and of this number 173, or 31.1 per cent., were from tuberculosis and 51, or 9.2 per cent., from respiratory diseases; of the total mortality, therefore, 224 deaths, or 40.3 per cent., were from diseases of the lungs and air passages.

Corresponding information is available for other States, but in Massachusetts investigation was made in 1907 into the hygiene of this trade under the direction of the State Board of Health, the results of which, however, were rather inconclusive. The opinion arrived at regarding the relation of this employment to tuberculosis was a rather favorable one, it being concluded that in general the appearance of the employes is healthy, and many who have followed the industry for 20 years or more speak of the work as being entirely consistent with good health."

This favorable opinion, however, may be called into question in view of the very disproportionate mortality from tuberculosis among jewelers and others employed in the jewelers' trade. In amplification of the previous reference to the Rhode Island statistics it may be stated that during the half century ending with 1906 there were 1,252 deaths of jewelers recorded, of which 480, or 38.3 per cent., were from consumption. There were also 10 deaths from pneumonia, 18 from asthma and bronchitis, or a total of 46.2 per

cent. from all diseases of the lungs and air passages in the mortality from all causes."

Interest in Industrial Education Beginning to Be Shown in the West.

THE very successful convention of the National Society for the Promotion of Industrial Education, held in Atlanta last November, has aroused great interest throughout the Union, particularly in the west, where it is expected that the third annual meeting will take place. Competition is keen between Columbus, O., and Milwaukee, Wis. Both cities desire to entertain the delegates.

At a joint meeting of the trade school and course of instruction committees of the Milwaukee School Board it was recommended to report favorably to the board for the establishment of a trade school for girls.

A new branch of the National Society for the Promotion of Industrial Education has just been formed in Indiana, at which the following officers were elected: President, A. C. Atkins, Indianapolis; first vice-president, Robert J. Aley, State Superintendent of Education, Indianapolis; secretary-treasurer, John A. Lapp, Indianapolis. Others present at the meeting were: W. D. Stone, Robert Hall, Dr. S. C. Dickey, F. W. Cooley, Major Rosencrantz, W. W. Black, J. L. Ketcham, Charles Moores and Dr. E. A. Rumely.

Dr. E. A. Rumely, La Porte, Ind., recently wrote: "During six years of study and travel in Germany I was astonished at the wonderful industrial development that is in process there. My own experience in business in the United States made me keen to know the grounds for the superiority of the Germans in manufacture. I tried to ascertain the cause of their steady progress in the world's markets. I saw that excellent trade schools made their workmen so efficient."

At the coming convention of the National Education Association Prof. J. C. Monaghan, principal of the Stuyvesant Evening Trade School, New York, and secretary of the National Society for the Promotion of Industrial Education, will discuss "Industrial and Vocational Training in Its Relation to Manufacturing Interests."

Navy Department Invites Bids to Supply Clocks, Flat Ware, Etc.

WASHINGTON, D. C., June 16.—The Navy Department is inviting proposals for 144 small clocks, with second hands, to have inscribed across the dial "U. S. N. M. D." for the use of the Naval Medical Supply Depot, Brooklyn, N. Y.

Also at the same time and for the same department the following proposals:

For 12 table forks, stamped "U. S. N. M. D."

For 12 table knives, stamped "U. S. N. M. D."

For 12 tablespoons, stamped "U. S. N. M. D."

For 12 teaspoons, stamped "U. S. N. M. D."

For 10 gross smoked glass spectacles, three shades.

CALENDAR PLATES IN MANY STYLES

CALENDAR plates are proving to be popular with jewelers who are looking for attractive novelties in china ware. The calendar is arranged about the edge of the plate and the different months are encircled or entwined with floral decorative schemes. These plates are shown in a variety of styles, in one of which the calendar months are arranged in the form of a horseshoe, within which is a landscape or marine view. In this plate the horseshoe is surrounded by a circlet in color, and about the rim of the plate is a flower design in repeated effect. Another attractive design shows a plate bearing the calendar in a square near the center of the plate, while at one side is a mass of flowers, which overhang the calendar. Still another idea shown in the decoration of these plates has the calendar months grouped into four collections of three months each at opposite sides of the plate and surrounded by attractive floral patterns, leaving the center of the plate entirely plain and free of decorative effect.

NOVELTIES IN CLOCKS

AT a recent exhibit of clocks made by Theodore Kuehl, Chicago, at the Astor House in New York a number of new and attractive novelties were shown which should appeal to the enterprising jeweler. The line of Black Forest cuckoo clocks is larger and better than ever before, and contains many artistic examples. A unique novelty in an alarm clock shown by this firm has a balloon-shaped dome which contains an alarm attachment. Another catchy novelty is a small desk clock suspended in a copper arch. A clock practical for the school room is surmounted by a globe of the world which revolves with the mechanism of the clock. Around this globe is a circle of metal so arranged that, the time being known at a given place, the time at any other point on the earth's surface can be easily ascertained.

THE RAMBLER.

A patent safety crucible, for which numerous advantages have been claimed, has been marketed by the American Oil & Supply Co., of Newark, N. J. It is a combination of black lead and sand crucible and is claimed to have the strength of both combined and the advantages of either one. The outside is covered with black lead and the crucible resists chemicals and fluxes used in melting. It is similar to a sand pot and resists the heat, it is claimed, as effectively as a black lead pot. The crucibles are made in different sizes, ranging from three to 11 inches high.

WE BUY

Old Gold and Silver, Filings, Polishings, Sweeps, Hand Washings, etc. We will make accurate valuations and hold consignment subject to your acceptance. If valuation is not satisfactory, we reship to you at our expense.

WE PAY FOR OLD GOLD:

22 K. 88c. per dwt.	12 K. 48c. per dwt.

14 K. 56c. " "	4 K. 16c. " "

MARKET RATES FOR SILVER AND PLATINUM

WE SELL

Gold, Silver and Platinum, various qualities, rolled or drawn to wire of any gauge.

PRICES OF ALLOYED GOLD:

8 K. 42c. per dwt.	14 K. 66c. per dwt.
10 K. 50c. " "	16 K. 74c. " "
12 K. 58c. " "	18 K. 82c. " "

Gold and Silver Solder, either from formulas furnished or our own. "T. B. H." Alloy, 25c. per oz. Guinea 75c. per lb. Shot Copper, 40c. lb. We will send tal for alloying without charge. They save figuring.

SPECIAL AND IMPORTANT NOTICE

in ordering Plate or Wire, to avoid delay and errors, be sure to state:

FIRST, THE QUALITY—If Silver, Sterling or Pure. (Coin Silver made up only on order.) If Gold—the Karat.
SECOND, THE QUANTITY—If Wire, the Thickness and Length. If Plate, the Thickness, Length and Width.

Regarding the thickness it is **most important** to not only state the number, but also the name of the gauge you are using, as there are 13 gauges and no two alike. The most used by us is the Brown & Sharpe American Standard but we will fill your order from any one by stating which you use.

Try us and you will appreciate our Squareness, Promptness and Accuracy

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
 Attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2291.—Clock Watches —
 are clock watches?

ANSWER.—Clock watches are different repeaters. They have two trains of wheels and mainsprings. Both are wound the same keyless work—forward winding one spring, backward winding the other. As the watch strikes all the hours of the day continuously, they both run together. To make these watches strike, a slide is moved a little only. It carries a small lever inside and releases the striking train, which then runs and strikes the last hour, etc. The slide does not wind up a spring as in a repeater, but liberates a small catch. Clock watches are very complicated pieces of mechanism, and look to the uninitiated like a mass of wheels, levers and racks. But to a man who has thoroughly mastered minute repeating work they will present no difficulty. The great thing in cleaning them is to keep the spring with its lever or rack and all the wheels with their pieces. To pinion each part as it is put on and see that it will free, and to oil all contacts of parts of their springs; to look out for dots on the wheels and racks, etc., and be careful of the oil to leave all flirring pieces dry, so that they cannot be fixed by oil. This is especially true of the mass of pinions, etc., on the squared axis of the striking wheel. There are several flirring actions there, and they will be a fruitful cause of trouble. Some old watches have belts instead of springs. These, of course, take up much space, and in modern watches would not be tolerated.

QUESTION No. 2292.—Resist.—Kindly let me know what substance can be painted on jewelry which has to go through two or more different solutions which contain cyanide.
 S. & W.

ANSWER.—If the above question is correctly understood, a formula for a resist which affords protection is wanted. This is used to protect one metal while another metal is being deposited on the unprotected parts. The resist is made by dissolving two parts of asphaltum and one part of beeswax in enough benzine to make a thin paint. A brush is needed to paint this on; let it dry and proceed to deposit in a cold solution. Cold solutions can be worked, if rich, on metal. If a warm solution is required the painted pieces must remain only long enough to be colored, and should be removed before the resist dissolves. The resist can be removed by immersing the pieces in turpentine long enough to dissolve the paint. The turpentine can be renewed by hot potash or by washing in cold, warm, soap water.

The Production of the "Barbedienne" or Dark Brown Finish on Metals.

(From the Brass World.)

BROWN finishes on metallic surfaces are now very popular and goods with this color find ready sale. The finish is a pleasing contrast to the somber black or the gaudy lighter colors. The French have always led in the production of artistic finishes and the attractive browns which have characterized many of their metal wares have always been the envy of art metal manufacturers. While there are many shades of brown that can be produced on metal goods, the one known as the *Barbedienne* brown is by far the most pleasing. It is the one which has a dark brown color with a slightly reddish caste. It is applicable for all classes of goods, either of solid bronze, brass, steel or iron, or soft metals.

Contrary to the usual belief, the finish is quite simple to produce. It is done cold, and applied with a brush so that no dip is required. This fact renders the process useful in applying the finish to large work which is difficult to treat in a dip. It is not expensive, although slightly more so than the simple liver of sulphur treatment, but the latter can scarcely be taken as a comparison as it is the cheapest known finish.

Upon solid brass, sheet-brass, bronze and copper the finish is applied direct. Steel or iron, spelter and the soft metals must first be given a good heavy deposit of brass, bronze or copper. The brass deposit is preferable as it gives the best color tone. It must be borne in mind that, in giving these metals a deposit for the production of any finish of this character, where there is always a slight corrosion of the metal, a fairly heavy deposit must be put on or the base metal will be revealed after the operation of coloring has been completed.

To produce the *Barbedienne* brown finish, three materials only are necessary: Red sulphide of antimony, aqua-ammonia and a soft brush.

The red sulphide of antimony is that produced by precipitating a solution of antimony, such as the chloride of antimony or tartar emetic, by hydrogen sulphide gas. It is preferable, however, to purchase it and when this is done, care should be taken not to obtain the black sulphide as this will not work. The black sulphide is made from stibnite, a sulphide of antimony found as a mineral in nature. It is unsuitable for this purpose. The red sulphide is the material that must be used, and it should be fine and dry. The ammonia used is ordinary aqua-

ammonia of commerce and should not be too weak. As the commercial grade is usually so strong that it is disagreeable to use, a small quantity of water may be added to it if desired to lessen the smell. Any kind of soft brush will answer as the mass is painted on the surface of the metal to be colored.

The metal to be colored should be clean and bright. The preparation must be as thorough as though it were to be electroplated. If greasy or stained, the color will be uneven. Solid brass or bronze work can be dipped or otherwise treated, and plated work can be colored immediately after it has come from the plating solution. The only requisite, therefore, is that it shall be clean and free from discoloration.

The red sulphide of antimony and the aqua-ammonia are mixed together to make a rather thin paste so that it can be evenly and thinly spread over the surface of the metal. If too thick more sulphide of antimony is used than is necessary and the coating is apt to be uneven. To be right, the mixture should spread about like thin paint.

The mixture of the red sulphide or antimony and ammonia is spread over the surface evenly and allowed to dry off. If the article upon which it has been applied is placed in a warm oven, like a lacquer-oven, the drying is hastened and the color seems to form rapidly; but it may, if desired, be allowed to take place in the air.

When the surface is completely dry it is covered with a red coating of sulphide of antimony. This is now removed by brushing the surface with a bristle or tampico brush. When the red powder is removed, the dark, brown color of the *Barbedienne* finish is revealed. When all of the powder has been brushed off, the surface may be lacquered or waxed as desired. A flat lacquer gives the best appearance to goods of this character.

Yellow brass seems to give excellent results when treated in this manner. Copper takes a slightly darker shade. Bronze has a shade intermediate between the two.

Some of the treatises on metal coloring recommend the use of powdered bloodstone with the sulphide of antimony, but experiments have shown that it is useless material and that there is no difference in the results when it is not used. Bloodstone is an oxide of iron which is not dissolved or even attacked by ammonia so that it is an inert substance. The use of sulphide of ammonia instead of aqua-ammonia is also given in treatises on coloring, but this, too, has been found to give inferior results to the ammonia and is more difficult to use and obtain. The use of the red sulphide of antimony and aqua-ammonia is all that is necessary.

For ordinary electroplating, a bronze solution should contain copper and zinc for producing a bronze deposit. It works better than one of copper and tin and is cheaper. Unless for some special work, tin is rarely used in a plating solution. The usual bronze employed for hardware and similar classes of goods where a bronze deposit is put upon steel or cast-iron consists of nine parts of copper and one part of zinc.

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal—plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag—the blades are fine. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray—contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

The Proof of the Pudding

The proof of ability in any line consists in doing the things that others have failed in doing.

That's what we have done repeatedly, and can furnish the proof. We sold \$20,300 in one sale where another auctioneer had thrown up his hands after selling only \$3,000.

In another sale we sold three times as much as the combined sales of two other auctioneers, and realized much better prices.

We have repeatedly taken dead sales—the result of the work of incompetent auctioneers—put new life and vim into them, and closed out the stock at a profit.

However, it is not the large amount of goods sold that counts so much as the net results in the profit and loss account—the small amount of new goods used, compared to the percentage of your goods, and your dead stock in particular, that are disposed of, and that larger and more important question of the after effects of your auction sale upon your customers, and, consequently, upon your future trade.

We believe we have solved the problem of how to conduct an auction sale so it will be to your profit, in both dollars and cents, and in the building up and permanency of your regular business.

We will furnish you evidence that sales, at this time of the year, when regular business is dull, can be made as profitable as during the seasons when regular business is booming.

You can do a holiday business during the hot months.

We would be pleased to talk with you about it.

THE RIGHT MAN

It is difficult when so many are claiming to be pre-eminent in the art of selling jewelry at Auction to select the right one to make your sale.

Without egotism, bombast or brag, I solicit your careful consideration of my qualifications as the "right man."

If a wide experience and a thorough knowledge of the business count for anything, if success is a reward of its own merit, then I can safely claim to "deliver the goods."

Write for references and dates. Correspondence strictly confidential.

Alvin Deposit Ware

In the heat of the Summer nothing is so refreshing as a glass of cool water or well made lemonade, and if served in clear crystal glass, ornamented with Alvin Silver Deposit, its value is enhanced—appeals to the taste.

We are showing an assortment of patterns in water and lemonade sets, pitcher and glasses to match, both in floral and scroll designs, at extremely low prices. Write for particulars and prices.

DELFT JEWELRY

FOR THE SUMMER TRADE

DELFT WARE has long been in popular favor; in fact, during the centuries that the Dutch have made Delft goods they never lost their popularity. The reason lies in the fact that Delft possesses a peculiar charm, an individuality, which is lasting; the rich shades of deep blue on the snowy white enamel are typical of that cool, cleanly refinement so characteristic of the Dutch people. Delft is therefore especially appropriate for Summer wear.

This unique line of novelties is done on sterling silver; the patterns are all taken from original Dutch tiles. Let us send you samples of these Delft goods. We furnish them as belt pins, Dutch collar pins, hat pins, veil pins, waist sets, cuff and collar sets, etc.

STORE OF A. & C. FELDENHEIMER, PORTLAND, OREGON.

PORTLAND, Ore., Feb. 9, 1909.
THE ARNSTINE BROS. CO.,
Cleveland, O.

Gentlemen—Relative to the Catalog you made for us, which was our sixteenth annual, would say the book, in every particular, was elegant and up-to-date, and as fine as any sent out by the jewelry trade. We could not use any other kind, for you know our store is the finest in the city and one of the best and longest established on the coast.

Last year's Catalog was a great improvement on the one the year before. We are well pleased with your courteous treatment.

Respectfully yours,
A. & C. FELDENHEIMER.

The Catalogs sent out by this firm since 1906 were made by The Arnstine Bros. Company

POCATELLO, Idaho, March 5, 1909.

THE ARNSTINE BROS. CO.,
Cleveland, O.

Gentlemen—We are in receipt of yours of the 2d, regarding publishing a recommendation in your Souvenir Book.

We have no objection, and desire to say that we feel that the Catalogs were a great benefit to us, and we can add that the year before we put out a Catalog which was made for us by another firm, but the people paid no attention to it at all compared to the attention attracted by the one you made for us.

We are well satisfied with the goods purchased from you, which were illustrated in the Catalog, and the results have been very pleasing.

Keeping these lines will be of service to you, we remain,

Very truly yours,
MOLINELLI & Co.

IMPRESSIONS AND DETAILS

¶ The first impression upon a visitor to our coming SEVENTH ANNUAL EXHIBITION, to be held in our offices from August 30th to September 4th, inclusive, will be one of astonishment at its size, but it is not only the largest in this country, it is also the most comprehensive and complete in the variety of its assortments, and all the articles displayed present the latest and most approved designs produced by the foremost designers of Europe and America.

¶ You have seen women wear artistic Diamond Jewelry that was "merely right"—wrong only in a minor detail. You thought at the time it would cost no more to have it exactly right—we know of no minor details in Powers & Mayer's productions. Every detail is important. The finished result we leave without fear to your judgment.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

**ROLLER REMOVER No. 60
(Patented)**

A thoroughly efficient and quick acting Roller Remover. The roller is held in the grooved jaws of the pliers. The adjustable head which holds the screw is quickly brought to position over the staff and the most obstinate roller will instantly give to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezers over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped *firmer* and *better* than by any other kind of stone tweezers.

Second. It is purposely made a "Bayonet" in shape because any stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, *easier*, *quicker*, and with much less *exertion* than when using any other style of tweezers.

It has an *extra* part directly above the crossing points to permit the holder to examine the stone without fear of *releasing* it accidentally, which frequently occurs when using the ordinary style crossing tweezers.

Price, Each, \$1.25

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

GRINDING OUTFIT No. 105

CARBORUNDUM & EMBRY PAPER DISKS.

LEATHER DISK. SMALL DISK. METAL.

- This outfit consists of:
1. Two interchangeable steel disc wheels, 3 5/8" and 1 1/4" in diam.
 2. One interchangeable flexible leather disc wheel, 2 1/8" in diam.
 3. One adjustable hollow spindle for holding the above disc wheels.
 4. Eight different grade emery paper discs, 2 1/4" in diameter.
 5. Four carborundum paper discs of different grades, 2 1/4" in diam.
 6. Eight different grade emery paper discs, 4" in diameter.
 7. Four carborundum paper discs of different grades, 4" in diam.
 8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete.....
 Separate small emery discs..... per
 " large ".....
 " small carborundum discs.....
 " large ".....

This new grinding device should find favor with the trade, being thoroughly practical and complete for all purposes, such as grinding of glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the watchmaker, optician, dentist, lock or gunsmith, platers and kindred trades. It is found much more economical than solid emery and carborundum wheels. An assortment of solid wheels of twelve different grits would necessitate an outlay of ten times the cost of this outfit, not taking into consideration the trouble of truing up the wheels when worn or glazed.

Full description and directions accompany each outfit.

For Sale by all Jobbers in the United States and Canada.

We beg to call your attention
to our extensive

Card Jewelry Line

consisting of medium priced

10K. Solid Gold Brooches, Scarf Pins,

KARNAK BRASS

ISIS
GODDESS OF THE NILE
Worshipped by the Egyptians as the Great Benefactress.

KARNAK BRASS

KARNAK BRASS

SPHINX

AN EGYPTIAN MYTHOLOGICAL MONSTER

Worshipped as the Protectress of Egypt.

The ancient Egyptians were great builders—such Temples as Karnak, built by the Seti over fifteen centuries ago, the ruins of which are still standing in an excellent state of preservation, prove them GOOD BUILDERS.

We are metal workers, and the fact that our business has grown to its present proportions proves us GOOD WORKERS also.

Our latest line is "KARNAK BRASS" founded on the principles of utility and Art, of which we illustrate herein a few pieces—both forms and decorations express the ideal features of Egyptian ornamental art. Each piece is hand decorated and finished in a most attractive combination of dull brass and antique green. Each piece has a distinct individuality.

We wish particularly to call the trade's attention to the fact that this is a unique line—one in which every number is certain to prove a quick and profitable seller.

Write for complete price list and catalogue of Karnak Brass. Full line on display at our New York Office, 409 Broadway; including Hand Hammered Copper and Brass Art Goods, Silver Plated Hollowware and Flatware, Gold Plated Novelties, Clocks and Jewels, Metallized Real Rose Hat Pins.

Looking Backward

THE ONEIDA COMMUNITY has always been peculiar. Our business has been founded on low costs, small profits and the volume which comes with low prices.

When new principles promise to give more value than old traditions, we adopt the new; when new conditions make old prices unjust, we promptly and voluntarily reduce.

Ten years ago the price of plated ware had got out of line with costs of material. Metals were much lower than formerly and improved methods of manufacture had greatly reduced costs. We made careful estimates and found we could afford to sell at a price lower than was being asked by the leading makers for an A-1 single plate (5 oz.).

This was the beginning of

COMMUNITY SILVER

To enable customers to surely identify this heavy plate we marked our goods "triple plus," with the obvious meaning that they were plated with silver in excess of triple.

Since that time the metals from which plated ware is made have risen slightly and the cost of labor has risen considerably. But we have stuck to our guns. We have given full value and have published the facts about plated ware until the public—consumers and dealers—are demanding the same value from every other manufacturer.

ONEIDA COMMUNITY

Looking Forward

If you have a really good thing to offer it pays to advertise largely.

If you have two good things it pays to double that advertising, which is exactly our situation to-day.

- 1st. COMMUNITY SILVER, the best plated ware—better than triple plate—the best value for the money ever produced (six teaspoons retail for \$2.00).
- 2d. Our new RELIANCE PLATE—full A-1 plate (5 oz.) on 18 per cent. nickel silver base—the best value for a popular price ever offered (six teaspoons for 90 cents).

With two big guns we are doubling the ammunition for each; we are *doubling* our advertising. You know what Community Silver advertising has done in the past. It requires no gift of prophecy to tell what profit is in store for dealers who handle our goods this year.

Think it over! Covering only half the field we have revolutionized the plated ware business in ten years. Now we cover the entire plated ware field and are putting out advertising which will tell the facts convincingly to every man and woman in the country.

With an *assured* sale, assured profit and assured satisfaction, what dealer can afford to be without Oneida Community silverware?

You have helped us. This year we are going to help you more than ever before.

ASK YOUR JOBBER

**THE
KREMENTZ
COLLAR BUTTON**

**GOES
ROUND
THE WORLD**

ITS FAME—

Wherever there are collars there are Krementz Collar Buttons. They are known the world over—the only ones that have an international reputation. With such recognition and demand, all you have to do is carry them. They sell themselves.

QUALITY MAINTAINED—

The Krementz Collar Button never disappoints. Unequaled in construction and finish, its quality always has and always will be maintained.

ASSAY—

The Krementz Collar Button does not take advantage of the elastic leeway allowed by law. There is really no reason why a solderless collar button should assay a whit less than stamped. You can depend upon it that

Krementz 14-Karat Collar Buttons will assay 14-Kt. or $\frac{584}{1000}$ Fine.

Krementz 10-Karat “ “ “ “ 10-Kt. or $\frac{416}{1000}$ Fine.

You will note that articles assaying 9 to 9½ Karat or 13 to 13½, and sold as 10-Karat or 14-Karat respectively, save the makers a profit.

ROLLED PLATE LINE—

Krementz Rolled Plated Collar Buttons and Studs are made with regular Krementz 14-Kt. stock; which is sweated, not soldered on composition base. Exhaustive tests show Krementz Plate is much heavier than is used on any other rolled-plate jewelry. Their great popularity in hot countries (where perspiration destroys ordinary goods), is largely owing to the thickness and quality of Krementz Gold Plate, similar to that used on highest quality filled cases.

BROOKLYN, N. Y.

THE word "Colonial" means much; especially in sterling ware for weddings, as without exception the bride is always pleased to refer to her Colonial ware.

We are the leaders in this line of ware, having made it a specialty for over twenty years.

We have more designs and styles than all of our competitors put together and our prices are the lowest for A-1 goods.

Also write or 'phone us for photos of our new line of sandwich and grape plates.

We also make one of the finest lines of French roll dishes. Prices furnished on application to

ROGER WILLIAMS SILVER COMPANY

101 SABIN STREET,

PROVIDENCE, R. I.

“FARE, PLEASE”

With Our Artistic Coin Holder

You always have the exact change for the “Pay-as-you-enter” cars, or convenient anywhere. Carries quarters, dimes and nickels. Made in Sterling or German Silver. Can be worn on a chain or carried in hand-bag. A charming gift for a woman.

Birth Month Locket

JULY - POPPY

AUGUST - POND LILIES

Enameled in beautiful floral designs.

$\frac{1}{10}$ gold—solid gold joints.

July brings Poppies "steeped in sleep"
 To you who July birthdays keep.
 A Poppy locket checkmates strife
 And brings to you a happy life.

Pond-lilies in the water blue
 Are August born as well as you.
 Would you be free from every care,
 A locket of Pond-lilies wear.

"THE CASE THAT COURTS COMPARISON"

Mr. Retailer:

There is room for discrimination in selecting gold watch cases.

There is a comfort in *knowing* you have secured THE BEST.

There can be but *ONE* BEST.

We *know* our product, and in all sincerity we proclaim it THE BEST.

SOLIDARITY GOLD CASES ARE SOLD THROUGH THE JOBBERS ONLY

SOLIDARITY WATCH CASE COMPANY

Established A Quarter of a Century

D. E. D. McMURRAY, Pres.
JOHN W. SHERWOOD, Vice-Pres.
LOUIS J. MONTAGNON, Sec'y-Treas.

54 Maiden Lane

NEW YORK

IT HAS been a long hard pull but the "Ship of Prosperity" with its valuable cargo is almost safe in the harbor. In our line its arrival will be hastened very materially by the friendly feeling which has become so strongly entrenched through intercourse of competitors (or more properly, business associates) at the various association meetings, both of jobbers and retailers. That friendly spirit, and a willingness to co-operate for the common good, is one of the most encouraging signs. It undoubtedly indicates for the future a better condition of affairs for all concerned, not only more business, but more satisfactory business.

So confident are we of this outcome that we are making unusual preparation for our Fall stock, which will be superior to any we have ever shown. We will have even more "Sellers" than usual and Jewelers will find them a valuable aid in obtaining an early and increased share of the prosperous conditions which are coming, and which they ought to make every effort to enjoy to the fullest measure.

Our representatives will start on their trips again within a short time.

"Sellers of Sellers"

Enamel Decorations

Applied to

Cuff Links Tie Clasps
Scarf Pins

IN ACCORD with a growing vogue, this house is applying notably refined and artistic Enamel Decorations to an interesting line of Cuff Links Tie Clasps and Scarf Pins.

Colors of Enamel are White Navy Blue, Olive Green and Maroon. Unities of color and design extend to all three items forming attractive sets and increasing sales.

Particular attention is called to the new Tie Clasps which are a decided advance in articles of this nature. The form is not only the most graceful but also the most practical.

530 BROADWAY

LEWY & COHEN

IMPORTERS

NEW YORK

DO YOU REALIZE what it means to manufacture gold chains of excellent quality and faultless construction and sell them at prices much below what the retailer ordinarily pays for chains of similar quality? It means that we have a well organized factory and prefer selling these chains ourselves directly to the trade, thereby giving you the benefit of what it would cost to maintain a necessarily expensive organization of traveling men.

THAT NEW CHAIN we are exploiting is solderless and flexible, without stringing, 15-inch lengths only. **IT SELLS AT SIGHT.**

Write for a sample.

BROOCH OR SCARF PIN

Finish, Workmanship, Quality of Stock and General Appearance of any article are its main selling points, but "Seveninone" not only embraces all of these vitally important attributes, but is

A Distinct Novelty

It appeals to the consumer because

- 1 It consists of *one* mounting and seven stones.
- 2 The stones are of different color.
- 3 They can be interchanged in a moment.
- 4 There are no parts to wear out.
- 5 They take the place of seven different pins.
- 6 They are reasonable in price.
- 7 They will increase your sales.

SUPPLY HOUSE IN THE WORLD

HEYWORTH BUILDING, MADISON ST. & WABASH AVE. CHICAGO, ILL.

IF it were possible to show all members of the trade a full and complete assortment of all the different goods and patterns we make, it would be the most impressive argument that could be presented in favor of the Simmons line—in no other way could anyone get an adequate idea of its magnitude.

The Simmons line comprises *More than Sixteen Thousand Distinct Patterns* of Chains (vest, Dickens, pony, lorgnette, plain and festoon neck, plain and fancy bead and eyeglass), ribbon and metal Fobs, Simmons Armillas, Locketts, Chatelaine Pins, Seals, etc.

The immense number and wide variety of patterns insures a selection of any or all of the goods mentioned that will be certain to meet all requirements and to suit the varying tastes of customers in all localities.

The positive worth and good wearing qualities of all Simmons products are absolutely beyond question and their salableness has been amply proved by a large majority of the jewelers throughout the country.

Consequently, the Simmons line must be reckoned with by every jeweler who handles high-class gold-filled goods.

In justice to himself, every retailer should make it a point to look through the jobbers' showing of Simmons goods before selecting his stock for another season.

THE JEWELERS' CIRCULAR

WITH WHICH ARE CONSOLIDATED

THE HOROLOGICAL REVIEW

THE JEWELERS' WEEKLY THE JEWELERS REVIEW

VL. LVIII.

WEDNESDAY, JUNE 30, 1909.

No. 22.

Interesting Treasures of the Royal House of Saxony.

By Charles A. Brassler.

Continued from issue of June 16.)

richly embellished arms, the Green Vault possesses a goodly assortment. Especially interesting are the Turkish "hand-and dagger, with sheath, shown in the illustration on page 53. One is of gold, set with turquoise to form zigzags; another Turkish dagger is of gold, ornamented with emeralds, both being of 17th century workmanship.

The illustration on the front page of this issue represents a large roscwater basin

GOLDEN HOLY WATER PITCHER.

made of silver, gilded by D. Kellerthaler in 1629, and for which 2,700 florins were paid. The judgment of Midas is reproduced on it. He is seated under a tree; before him stands Apollo, with the lyre and a large assemblage grouped about him. At the Muses play violins need not look strange to those with a knowledge of the subject. The edge is ornamented with medallions, showing striking relief scenes, such as the banal infant revels, genii, shells, swans, etc. To this basin belongs a pitcher, also in the Green Vault, in which the same Midas is shown slaking his thirst with a golden stream of Pactolus.

Of exquisite workmanship is the small golden holy water pitcher, of 16th cen-

tury origin, showing a figure, worked in the finest enamel, of the Virgin Mary, with the infant Jesus and another child in front of her.

Last, but by no means least, we have

maker is not mentioned. [Another work, a drinking clock by Casper Werner, was illustrated and described on page 93 of the issue of June 16.]

This, of course, by no means exhausts the marvelous array of gold and silver articles in this famous repository of art objects. We have been able to select but a few out of a bewildering profusion, and to fully realize the beauty, even of these, they must be seen in the substance and with

ASTRONOMICAL CLOCK OF SILVER GILT, RICHLY ORNAMENTED.

selected one of the clocks for illustration. It is the so-called Venetian astronomical clock, but is really of German workmanship and dates from the 16th century. It is of silver gilt, with richly enameled ornamentation representing figures of men and animals. It shows the months and days, the complete perpetual calendar, the circuits of the moon and the planets, etc., on eight different large and small dials. The

their marvelously appropriate and beautiful settings and surroundings.

On account of the fact that most of the works of the two famous German gold and silversmiths, Johann Melchior Dinglinger (the special favorite of King Augustus II, "The Strong") and Wenzel Jamnitzer, sometimes called "the German Cellini," of which the Green Vault has a goodly number, have been fully described and illus-

V.

The **TRADE MARK** on a piece of jewelry is necessarily a small thing in appearance, but a **MIGHTY IMPORTANT ONE** to retail jewelers who care what kind of jewelry they sell.

Years ago we realized the desirability of putting a trade mark on every piece of goods we make, so that retail jewelers **CAN QUICKLY TELL** from what manufacturer they purchased the article in question. . Even the smallest child's **10K. Gold Rings** at \$4.50 per dozen which we make, bears this registered trade mark:

It proves that we are **GLAD TO FATHER OUR PRODUCT.**

Retail jewelers ought not to buy any rings except those having a trade mark, and if you want well-known trade-marked rings, that is the only kind we produce.

ed in THE JEWELERS' CIRCULAR—WEEKLY on former occasions, they are omitted from this article, although they are, of course, among the chief attractions there.

In this "treasure museum" at Dresden are also preserved, in the various apartments, the choicest precious stones and jewelry ornaments. These valuables are distributed in the gold, silver and jewel rooms. We find there, for instance, in the jewelry room, an elongated greenish diamond, weighing 40 carats, which was purchased about the middle of the 17th century by August the Strong for 185,000 marks. This prince has displayed a constant liking for precious stones and goldsmith work, and not a few of the costliest rare stones and pearls that are to be found to-day in the Dresden treasure were acquired under the régime of August the Strong. There are also here

British Technical and Craft Teachers Meet at Liverpool and Discuss Trade School Work.

LONDON, June 12.—Last year when the Association of Teachers in Technical Institutions met for their annual session in London, little recognition was given by the authorities, and the discussions, momentous and fraught with much for the good or evil of the nation, were allowed to pass unnoticed. This was deplored by the delegates, but I, speaking in a prophetic vein, said that the very near future would not only see the institution recognized by the educational bodies, but that the press would make public the value of the work done by technical instructors and record for the benefit of the people the experiences and suggestions based thereon and recorded at the annual meetings. At Liverpool, where

fingering the engines of production which have been evolved from the brain of the national genius. While we may be somewhat pessimistic as to the near future, there can, however, be little doubt that the increasing force of circumstances and the demands of education will impel us to recognize the value of artistic objects of everyday use the same as the cultured recognize the beauty in a picture or piece of sculpture.

On technical schools, the president said:

One cause of the bewildering multiplicity of work often attempted by technical institutions is the lack of clear conceptions respecting the objective and methods of technical education. If we tentatively regard technical education as that branch of educational work which is training students directly and primarily for "vocation" or "livelihood," we have two main problems to consider: (a) The training of the boy or girl from 13 to 16 or 17, and (b) the training from 16 or 17 years onwards. A certain complexity will necessarily be introduced by the different conditions in small and large aggregations of population. It may be suggested that in the small towns the day work of the technical school should be that indicated by the titles "Trade School" or "Technical-Secondary school," which of the two forms to be selected being determined by local conditions. It is understood, of course, that at these schools the fees should be low, and that there should be a generous provision of scholarships with maintenance grants. These schools must link on directly with the elementary schools. At the age of 12 or 13 the boys intending to enter industrial work should be transferred to these trade or technical-secondary schools, and arrangements should be made whereby the more promising boys should be able to pass on at the age of 16 by means of scholarships to a suitable day technical institution, probably that in a neighboring large town. The technical institutions in the large towns should be of two distinct types, termed broadly trade schools and technical schools, or technical colleges or polytechnics. The day work of the former will be similar to that indicated above for the technical school of the small town.

In these trade schools in the large towns the evening work should be of a technical evening continuation school character, the curricula to be of direct educational and industrial value, co-ordinated with and leading up to the evening work of the technical school or polytechnic, the management of which should also have control of the trade school. The technical schools or polytechnics, of which there should be one for each group of towns or large center of population, should restrict themselves in the day time to students from 16 years onwards. The instruction given should be of that high standard which would be designated briefly as "university standing."

The day technical school or polytechnic work must be regarded as being on a equal level with the ordinary university college. Further, there must be some measure of co-ordination of the work of these technical schools or polytechnics to ensure a high measure of specialization without unnecessary overlapping. Pending the establishment of some scheme similar to that outlined above, there is one urgent reform possible.

By common consent the organization and curricula of the present evening continuation schools, save in a few towns, are very unsatisfactory, judging by such pupils as afterwards pass on to the evening technical schools. The evening continuation schools for boys engaged in trades, industries or crafts should lead on directly to the technical school. The curricula for such boys should be mainly English, arithmetic, drawing, and some elementary science. Above all, the work should be serious and strenuous.

The school must not be merely a feeble competitor with the cheap music-hall. It should have a definite educational aim, and the staff should be encouraged to teach, and not be incessantly harassed by the necessity of keeping up the average attendance for fear the school should be closed. The principal feature of the organization of the school must be the co-ordination with the technical school, the authorities of which should have a direct, if not even a controlling voice in the management, curricula and appointment of the continuation school teachers. Further, the latter should be, as far as the scientific and technical subjects are concerned, technically trained men, and not elementary school teachers.

ST. GEORGE.

TURKISH "HAND-JAR" AND DAGGER SET WITH TURQUOISES.

his, diadems, bracelets, girdles, buttons, brooches, orders and medals, representing an immense value. Diamonds of rare size and glittering in the most beautiful rose, blue, green and yellow shades are here in abundance. The most valuable article in this royal collection is, however, a bow-knot, set with 660 separate diamonds.

From an Appreciative Subscriber.

June 15, 1909.

Let THE JEWELERS' CIRCULAR—WEEKLY every week and find it the best publication for the trade ever taken. Long live THE JEWELERS' CIRCULAR—WEEKLY.
CHAS. G. SEDERBERG.
Cincinnati, O.

Among those who have subscribed to the Jewelers' Circular-Weekly for an electrical parade in Providence, R. I., on the evening of July 5, as part of the municipal celebration of the national centennial are the following: Mayor Henry C. Fisher, \$100; Manufacturers' Outlet Co., \$50; Diamond & Son, the Shepard Co. and the G. B. McAuslan & Troup, \$50 each; J. B. Gladding Co. and Nathan B. Barton, \$25 each; Hamilton & Hamilton, Jr., and J. C. Loomis Co., \$10 each; Maurice H. Singer and John M. Buffinton, \$5 each. Making a total of \$525, out of a total of \$1,500.

the association met this year, a hearty welcome was extended by the Lord Mayor, the Director of Education, and the leading members of the Education Committee, while the press of the country has, with few exceptions, given some idea of the work done by the teachers as well as the discussions.

I give herewith that portion of the president's address which deals with technical or trade schools. When the delegates came to discuss the various items upon the agenda they dealt with this view of the president by passing the following resolution unanimously: "This association heartily approves of the general principles embodied in the following recommendations of the minority report of the Poor Law Commissioners: 'It would be illegal to employ boys below the age of 15 or any youth below 18, for more than 30 hours per week, and boys should be compelled to attend some suitable public institute giving physical and technical training for not less than 30 hours per week at periods to suit the convenience of employers in different industries.'"

Thus do things move in Great Britain, and move they must—and will, or else the race of craftsmen will give place to battalions of human machines automatically

South Dakota Retail Jewelers Meet at Aberdeen and Elect Officers.

ABERDEEN, S. Dak., June 23.—The meeting of the South Dakota Retail Jewelers' Association, which took place in this city Friday last, proved successful in every way and highly satisfactory to all the members. The organization started at Watertown last year, and since its organization has increased its membership by 34. The meeting on Friday was well attended, the members displaying a most enthusiastic spirit and active interest. As a result of the debates and discussion, as well as their personal contact with one another, the jewelers of South Dakota are more intimately acquainted and on better terms with one another than they ever were before. Briefly summed up, the convention took place in favor of the establishment of an official

A. W. VOEDISCH, PRESIDENT-ELECT.

organ, expressed a sentiment against parcels post and against the sale of cheap watches. The members showed their appreciation of the action taken by the Waltham Co. in deciding to hold Waltham watches within legitimate jewelry lines, by giving a vote of thanks and instructing the secretary to write the Waltham Co., explaining how much this action was appreciated.

The officers elected by the association were: President, A. W. Voedisch, Aberdeen; vice-president, Charles Halbkat, Watertown; treasurer, Carl Damuth, Redfield; and secretary, B. Sharps, Brookings. Three delegates were chosen to the national convention in Omaha: D. G. Gallett, A. W. Voedisch and R. Hoskins. Alternates, D. K. Cole, L. B. Huston, N. R. Giles.

The committees were appointed as follows: Membership, R. Hoskins, Carl Damuth, E. P. Mesmer; Trade's Interests, D. K. Cole, A. F. Rounds, D. G. Gallett; Legislation, H. C. Middlebrook, H. G. Nickerson, Mr. Bechthold; Quality, L. B. Huston, C. G. Blakeslee, N. R. Giles. It was determined to hold the annual

meetings in June and the semi-annual meetings in January of each year, the time and place to be decided by the executive board.

Invitations were then extended for the semi-annual meeting next January by Vermillion, Highmore, Redfield and Woonsocket, and for the annual meeting in June, 1910, by Brookings.

A general discussion was made of the National Stamping law. It was voted that the association favors a National Stamping law in so far as it does not interfere with or imperil the best interests of the retail jeweler or destroy his individuality as a tradesman.

The following resolutions were adopted: "Resolved, That we as an association stand unanimously opposed to the parcels post system, the official organ of the trade, and the complete watch.

"Resolved, That we heartily appreciate the right royal manner in which we have been entertained by Mr. Voedisch and Mr. Gallett, and wish to say that our attendance at this meeting has been made enjoyable and profitable largely through their efforts and interest; and further, that we extend to the Commercial Club of Aberdeen a vote of thanks for the use of their rooms in which to hold our meetings, and that the secretary be instructed to so write them."

N. J. Elliott, representing the South Bend Watch Co.; A. F. Williams, of Sisich & Beard; W. P. Knauer, of the Geneva Optical Co., and J. B. Crawford, with Longines watches, were present and gave very interesting and pleasing talks.

At present the association has now most of the leading jewelers and most progressive jewelers of the State, and it is hoped that the organization will show an even greater growth and development in the coming year than it has done in the past.

Tennessee Retail Jewelers' Association Hold Short but Important Session at Nashville.

NASHVILLE, Tenn., June 23.—The annual meeting of the Tennessee Retail Jewelers' Association was held at the Maxwell House, Saturday morning, with a liberal attendance of members from all portions of the State. Business was transacted without unnecessary delay, and final adjournment was taken shortly before noon. All of the old officers, with one exception, were re-elected.

It was decided that the next meeting shall be held simultaneously with and at the same place as the annual convention of the Tennessee State Society of Opticians.

The meeting was called to order by President D. A. Pless, Morristown, at 9.35 o'clock, and after the reading of the minutes at the last meeting by Secretary Richard B. Herzer, Nashville, the regular routine of business was proceeded with.

President Pless, in his annual address, dealt in a manner highly beneficial to the members, with the general situation of the Tennessee Retail Jewelers' Association and the retail trade in the State. Following his address, the president announced the appointment of committees as follows:

Location of Next Convention—E. Smallhouse, McMinnville; I. L. Grady, Jackson; E. P. Ragsdale, Franklin.

Nominations—James R. Norton, Winchester; C. C. Breese, Franklin; W. B. Sanborn, Nashville.

Auditing—Weakley Ruth, Shelbyville; H. J. Cook, Knoxville.

Resolutions—W. B. Sanborn, Nashville; Weakley Ruth, Shelbyville; C. C. Breese, Franklin; Richard B. Herzer, Nashville.

The Committee on Time and Place of next meeting reported in favor of meeting at the same time and place as the State Society of Opticians. The report was adopted.

The Committee on Nominations recommended that all of the officers be re-elected, with the exception of the second vice-president. The recommendation was concurred in. D. A. Pless, Morristown, was re-elected president; C. C. Breese, Franklin, first vice-president, and Richard B. Herzer, Nashville, secretary and treasurer. Ernest Smallman, McMinnville, was elected second vice-president.

The Auditing Committee reported the books of Treasurer Herzer in good condition.

Remarks on topics of current interest were made by President Pless, Secretary Herzer and I. L. Grady. Weakley Ruth delivered an address on the benefits to be derived from affiliation with the association.

Resolutions were reported by the committee and adopted requesting all members to collect and forward to the secretary of the association data regarding all sales made for a price less than the established minimum selling price.

Following the passage of the resolution, Secretary R. B. Herzer stated that the manufacturing concerns were disposed to co-operate with the association of retailers.

Memphis will be the place of the next meeting of the Tennessee Optical Society and the Tennessee Retail Jewelers' Association in 1910, according to the decision reached at the close of the opticians' conventions. The Tennessee Optical Society decided that it would not change the name of the organization to that of the Tennessee Society of Optometrists and Opticians, as proposed at Friday's sessions. About 15 members of the Optical Society left Saturday for Atlanta to attend the American Association of Opticians.

Death of Isaac Rosenfeld.

WASHINGTON, D. C., June 23.—Isaac Rosenfeld, who died suddenly at his home Friday evening last, was well known in the jewelry trade, having conducted a store at 1134 7th St., N. W., for a number of years. His death was apparently due to heart failure.

Mr. Rosenfeld, who was 50 years old, was originally located in Philadelphia. He came to Washington in 1899, starting a small business, which he developed by his enterprise and ability.

The present crown of Great Britain was constructed in 1808, with jewels taken from old crowns and others furnished by command of the queen, says a daily exchange. It contains four large pear-shaped pearls, 273 small pearls, 147 table diamonds, 1,273 rose diamonds, 1,303 brilliant diamonds, 5 rubies, 11 emeralds and 17 sapphires.

Death of John Robinson Goodwin.

His many friends in the large eastern and middle western cities learned with regret last week of the sudden death of John Robinson Goodwin, a traveling salesman for Durand & Co., Newark, N. J., announced in the last issue of THE JEWELERS' CIRCULAR-WEEKLY. Mr. Goodwin died Monday afternoon, June 21, as the result of an operation for appendicitis. The funeral services were held Wednesday morning from his late home, 92 East Morningside Ave., New York.

Mr. Goodwin is spoken of by all who knew him in the trade and outside as a man of sterling qualities and of kindly and sympathetic disposition. He was taken sick while in Chicago and started at once for home in New York, reaching New York

THE LATE JOHN R. GOODWIN.

June 19. He went directly to his home where he was taken from there to the German Hospital, at Lexington Ave. and 77th St., where was performed the operation from which he never recovered.

Mr. Goodwin was born in Talbot County, Va., Nov. 28, 1868, and was a son of Samuel and Mary A. Goodwin. While a small child his parents moved to Columbus, Miss., where he received his early schooling. The family later moved to Danville, Va., and then he went to school until he was about to graduate from the grammar school, when he went to work in the retail jewelry store of Jas. Fricker. Later the family moved to Richmond, Va., where Mr. Goodwin obtained employment with Jas. Tyler, a retail jeweler of that city, with whom he remained about five years, and there he learned the jewelry business as a salesman. He then went to Atlanta, Ga., where he was employed by Jas. Freeman for about two years. From Atlanta he came to New York and became a traveling salesman for the firm of Carter, Hastings & Co., with whom and their successors, Carter, Howe & Co., he remained until he

accepted the position with Durand & Co., seven years ago. For the first three years with Durand he traveled in the east, and about three years ago was given the territory covering the largest cities. He is spoken of by his employer with highest esteem.

About 18 months ago while in Philadelphia Mr. Goodwin was seized with an attack of appendicitis, but recovered and returned to work, apparently in good health, and not until his sudden seizure in Chicago had he been compelled to give up work. An added note of sadness to his death is given by the fact that he was engaged to be married and the wedding was to have occurred in October.

He was a member of the Tabernacle Lodge, F. & A. M., and of the Brotherhood of Traveling Jewelers. The funeral services were conducted under the auspices of Masonic lodge, of which he was a member, and a delegation of members of the Brotherhood of Traveling Jewelers were also in attendance at the funeral. The Rev. Mr. Pratt, of All Souls Church, officiated.

Deceased is survived by his mother and two sisters.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., June 23.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Auckland: 35 cases clocks, \$432.
 Barraquilla: 1 case watches, \$105.
 Berlin: 3 cases clocks, \$120.
 Bombay: 25 cases clocks, \$445.
 Buenos Ayres: 22 cases clocks, \$681; 14 cases watches, \$440; 2 cases watches, \$975; 5 cases plated ware, \$632.
 Calcutta: 10 cases clocks, \$330; 2 cases jewelry, \$625; 4 cases watches, \$1,500.
 Cape Town: 3 cases scopes and views, \$107; 32 cases clocks, \$658.
 Christiania: 12 cases clocks, \$335; 1 case plated ware, \$100.
 Colon: 4 cases clocks, \$700; 2 cases thermometers, \$195.
 Glasgow: 20 cases clocks, \$500; 2 cases plated ware, \$150.
 Hamburg: 4 cases watches and material, \$6,859; 5 cases watches, \$4,373; 10 barrels jewelers' sweepings, \$3,500; 3 cases plated ware, \$200; 8 cases clocks, \$128; 6 packages optical goods, \$1,335.
 Havana: 3 cases jewelry, \$797; 3 packages optical goods, \$432; 56 cases clocks, \$429; 2 cases plated ware, \$113; 10 cases clocks, \$210; 2 cases jewelry, \$308; 2 packages optical goods, \$184.
 Havre: 2 cases silverware, \$290; 1 case plated ware, \$150; 1 case jewelry, \$110.
 Hobart: 1 case watches, \$113.
 Lima: 1 case plated ware, \$138.
 Lisbon: 19 cases clocks, \$227.
 Liverpool: 1 case jewelry, \$225; 108 cases clocks, \$1,873; 7 barrels jewelers' sweepings, \$6,075.

 Melbourne: 2 packages optical goods, \$248; 25 cases clocks, \$439.
 Montevideo: 7 cases plated ware, \$702.
 Para: 45 cases clocks, \$1,151; 5 cases watches, \$413.
 Porto Barrios: 2 cases plated ware, \$148.
 Rangoon: 13 cases clocks, \$293; 18 cases clocks, \$428.
 Rio de Janeiro: 1 case jewelry, \$289.
 Sydney: 206 cases clocks, \$4,326; 49 cases plated ware, \$2,331; 2 cases jewelry, \$209.
 Trinidad: 9 cases clocks, \$100; 3 cases jewelry, \$228; 1 package optical goods, \$125.

Wellington: 7 cases plated ware, \$203; 2 cases watches, \$233; 39 cases clocks, \$936.

Abel Bros. & Co. Recover Value of Jewelry Obtained on Memorandum and Sold to a Third Party.

A suit of much interest to the trade was decided last Thursday in Trial Term, Part IV, of the City Court of New York, when Abel Bros. & Co. won an action involving the right which a man who holds goods on memorandum agreement has to sell these goods to a second party. Abel Bros. & Co. were the plaintiffs in the case which was brought against Max Jacobs. The case was tried before Justice Donnelly.

The complaint filed by Attorney Jos. Rosenweig, representing Abel Bros. & Co., alleged that the plaintiffs were the owners of and entitled to immediate possession of jewelry valued at \$1,147.50, and that prior to the 10th day of March, 1909, the defendant in this action became possessed of the goods wrongfully, unlawfully and unjustly, and without any right to them. It was also set forth that on or about the 12th day of March the plaintiffs demanded from the defendant the goods, but that the defendant refused to return them or deliver them, and that the defendant continued to unlawfully and unjustly retain the goods. It was also set forth that by reason of this action the plaintiffs had been damaged in the sum of \$500, and in addition thereto the said chattels were stated to be valued at \$1,147.50. The complaint demanded a judgment against the defendant for the recovery or possession of goods, together with the sum of \$500 damages. The answer to the complaint was a general denial with a request that the complaint be dismissed.

When the case came up Wednesday afternoon of last week before a jury it was brought out that the jewelry in question consisted of a brooch containing three pearls and 32 diamonds, valued at \$198; a brooch with two olivines and 63 diamonds, valued at \$232; a brooch set with 34 diamonds, valued at \$492; a brooch set with 35 diamonds, valued at \$186.50, and a brooch containing 69 diamonds, valued at \$239. These goods were delivered on memorandum to Sol Karger, who was formerly in the wholesale jewelry business at 51 Maiden Lane. Jacobs claimed that he bought the goods from Karger, and a receipted bill from Karger was produced to substantiate the validity of the transaction. The plaintiffs contested the validity of this sale and claimed that Karger had no authority to sell.

After considerable testimony had been taken the Judge charged the jury to the effect that if they, the jury, believed Karger received the goods from Abel Bros. & Co. with a limited power under which he had no right to sell them, that they must find for the plaintiff. A verdict rendered Thursday afternoon substantiated the claim of Abel Bros. & Co., and found in their behalf.

J. O. Q. Johnson has purchased the business of Wm. C. Jungmann, Carbondale, Kans.

Jacob Vander Zanden, Green Bay, Wis., has moved his jewelry stock into the Fox block, 123 N. Washington St.

On June 10th we received the following cable from our Amsterdam office: "Syndicate advanced rough." We bought our rough at the moment and had it cut in Amsterdam by our own men. Buy your diamonds now as the new importations are going to be higher in price. We are in a rising market and the longer you wait the more you will have to pay for diamonds of good quality.

All our goods are of the same quality; our 200 to the carat as well as our 8 to 12 grainers.

We are receiving weekly shipments and our Mr. H. E. Judels is always in the European markets.

Arkansas Optical Association Merged
to the State Retail Jewelers'
Association.

LITTLE ROCK, Ark., June 23.—A feature
of the convention of the Arkansas Optical
Association, which took place at Little
Rock June 16, at the time of the conven-
tion of the Arkansas Retail Jewelers' As-
sociation, was the consolidation of the opti-
cians with that of the jewelers. In the
past the society which has now joined the

The association decided to hold its next
meeting at Little Rock on the second Tues-
day and Wednesday in May.

Among the resolutions adopted was one
condemning the practices of silverware com-
panies having retail stores, several con-
demning certain watch companies for mak-
ing complete watches, making special named
movements for mail-order houses, etc., and
others indorsing companies for the way
they had acted in the interest of the jew-
elers. A resolution condemning jobbers
who sell at wholesale, except when instruct-
ed by the customers, was passed, as were
others pledging the members to refrain
from buying from manufacturers or job-
bers using catalogues and sending them to
merchants in general lines, and to refrain
from buying lines of merchandise sold
through the hardware trade. Resolutions
of thanks were extended to the jobbers
and manufacturers for their support at the
convention, and to the manager of the New
Capital Hotel for the courtesy shown the
members while at Little Rock.

A resolution was also adopted directing
the president to appoint a committee of two
members to investigate any rumors which
may be brought to the attention of the presi-
dent or the committee regarding the sale of
any article with a fixed selling price sold
below the price set by the manufacturers
for the sale of such goods.

The association also indorsed the efforts
of the C. H. Knight-Thearle Co., the Rock-
ford Watch Co. and the Whiting Mfg.
Co. in trying to protect the retail jeweler
from unjust competition.

It was decided by the members to close
all stores on July 5, and there will be a
picnic and outing at Trenton Falls late next
month, the date to be decided by the com-
mittee on arrangements, which is as fol-
lows: General Committee—W. B. Wilcox,
chairman; H. Wineburgh, William A.
O'Donnell, James R. Burtiss, S. Charles
Greene; dinner, H. Wineburgh, G. Will
Payne, P. F. Darrigrand; sports and prizes,
William A. O'Donnell, C. H. Broadbent,
Richard Perlen; printing, James R. Burtiss,
Thomas F. Murphy, Frank H. Cadogan;
transportation, S. Charles Greene, Arthur
D. Evans, George Yaeckle.

Utica Retail Jewelers' Association Hold
Business Session and Dinner.

UTICA, N. Y., June 24.—The Utica Retail
Jewelers' Association met at the Masonic
Club last evening, and an important busi-
ness session followed an informal dinner.
There were about 20 present.

This resolution was adopted:

Resolved, That this association does not agree
with the statement made by the president of the
American National Retail Jewelers' Association that
95 per cent. of the retail jewelers of the United
States are in favor of an increase in the present
tariff on Swiss watches. We of our association
are unanimous in the opinion that the present
tariff is sufficient to protect the watch industry of
the country.

The association also took action against
the practice of some silverware manufac-
turers underselling local retailers. It is said
certain manufacturing concerns have sold
their products for less than the wholesale
price to certain parties. The resolution
adopted was as follows:

Resolved, That manufacturers of silver and sil-
ver plated ware discontinue the practice of com-
peting with the retail jeweler in the sale of their
products to hotels, restaurants and clubs.

Elmira, N. Y., Jewelers' Club Gives
Auto Ride and Beefsteak Dinner.

ELMIRA, N. Y., June 25.—Another retail
jewelers' organization has been formed as
the result of the efforts of the recently
formed New York State Retail Jewelers'
Association. It is the Elmira Retail Jew-
elers' Club, and the officers are: President,
Thomas J. Routledge; vice-president, Clar-
ence Sayles; secretary and treasurer, Walter
Hamilton. Other members are Charles H.
Benson, William C. Comfort, Henry E.
Drake, W. D. Jacobus, Walter Longmate,
E. B. Patterson, Fred H. Rees, James E.
Swartout and L. Shriebman.

The club members enjoyed an automobile
ride and beefsteak dinner on Monday even-
ing. Local jewelers hereafter propose to
substitute "fellow craftsmen" and "business
associates" for "competitors." Other lines
of retail merchants will organize like or-
ganizations.

JOHN L. GREEN, PRESIDENT-ELECT.

...s' association are about 50 members,
...ne-half of whom were in attendance.
...st day's session of the jewelers' or-
...tion was recorded in the last issue of
...EWELERS' CIRCULAR-WEEKLY.
...the two associations had come to-
...the following officers for the en-
...year were elected: President, John
...en, El Dorado; first vice-president,
...Dipratt, Monticello; second vice-presi-
...t, S. M. Alexander, Batesville; secre-
...nd treasurer, E. A. Short, Prescott.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Iowa Retail Jewelers Hold Enthusiastic Convention at Des Moines, Elect Officers and Hear Many Interesting Papers on Trade Topics.

Des MOINES, Iowa, June 25.—The fourth annual convention of the Iowa Retail Jewelers' Association, held in this city Wednesday, Thursday and to-day was the greatest and most important in the history of the organization. The sessions began in the Auditorium of the Y.M.C.A. building, at 10 A. M., the meeting being called to order by President, Mack A. Hurlbut, of Ft. Dodge. The morning hours were taken up largely with registration of the members

and appreciate the fact as well as I do that the jobbers are not independent of the retailers, for without the retailers they would have no reason to exist; the manufacturers, too, have mutual relations with the jobbers.

You remember after our organization we asked some of the catalogue houses to cut off various channels through which some goods were marketed and sell only through the legitimate jeweler. They said it was absolutely impossible and they could not consider it for a moment. They talked to us this way: "Your demands are absolutely unreasonable. And if we stick up for you fellows, you will not stick by us." But last week a big watch company stated that it had dropped that class of trade and would endeavor to confine its product to the legitimate jewelry trade. This concern felt our force and came over to our side of the fence.

There are four factors in the jewelry business—the manufacturer, jobber, retailer and the trade press. All are interdependent; we can not get along one without the other, and the truth of it is that we are all trying to make a living out of the jewelry huying public. If this be true, it does not behoove any of us to fight the other. We must all work together, and it is up to the retailer to get busy and work with the others.

Now in regard to our programme, we have been trying to make it as helpful as possible, and some

temized material and supply houses in the world. His idea is that we do not get enough for our repair work, and he is ready to illustrate the point, having compiled a list of prices from different cities, striking an average. We need help along this line, and Mr. Swartzchild will give it to us.

This year we are going to conduct an examining board for watchmakers. Efficiency at the bench is one of the most important things to-day in the trade. We have all had trouble in getting and keeping efficient help at the bench, and such topics as this are what we are going to discuss for the benefit of all. This examining board is to be in charge of a committee of three, of which John Hands is chairman. Mr. Hands is present and will give us an idea of what the examination will be. I now have the pleasure of introducing John Hands, of Iowa City.

The report of Secretary-Treasurer Nielson showed the association in good financial condition and a membership in good standing of 231, with a likelihood that

N. NEILSON, PRESIDENT-ELECT.

JOHN HANDS, VICE-PRESIDENT.

A. G. HOCH, SECRETARY.

the association and the distribution of cases, etc.

Upon convening at 2 P. M., President Hurlbut addressed the convention, after which he appointed the resolution committee consisting of Geo. Fiege, chairman, and A. Shepard, Mr. King, W. E. Edgar and John Nicloson, members. President Hurlbut said:

PRESIDENT HURLBUT'S ADDRESS.

Well, gentlemen, that in spite of the poor attendance that we have to-day our work is growing; our membership is increasing. I feel that the association's convention of last month has affected the attendance at this convention. They met last year instead of meeting with us, in order to give the members a chance to talk over the new law which goes into effect July 1. It was my hope that they did not want to co-operate with us, simply for the reason that most of the boys had to get posted on the new law. The fact that they were interested is shown by their attendance, which was 350.

Another factor is the Omaha convention, next year. A good many of the boys are staying in Omaha and saving up their money to take in the convention there. I therefore feel encouraged in my work. You who met with us on that cold rainy day to organize this association will remember there were only 13 present. Compare that with this. You will find that the men who laughed the hardest at that time are helping us to-day.

Jobbers have been compelled to organize, and with a spirit of antagonism to the retailers, but we are to co-operate with us and bring the jewelry business up to a higher standing. You, gentlemen,

good men will participate. * * * We want this convention to be an educational one, for we have not much more fighting to do, gentlemen. The best manufacturers and the best jobbers are with us, and those who are opposing us are the men whom we can really ignore. For that reason this is not a fighting association, but really an educational institution, and the officers are aiming at that end.

Joseph Mazer, Oklahoma, is in attendance, but as he is not present now I will say what I please about him. Joe Mazer is one of the best men we have on the programme. He is a jeweler, and if you miss his talk you will miss a good lecture of the programme. Mr. Arkwright, former president of the Nebraska Jewelers' Association, is here. He is a man who has a great scheme in regard to this association work. He showed me a paper in which he predicted 15 years ago conditions that we are facing now. We have also with us Claud Wheeler, of Missouri, who is the originator of the idea of interdependence in association work. Missouri has just finished its convention and Mr. Wheeler is one of the men you want to hear. Mr. Pilkington will talk, and also Mr. Swartzchild, who maintains one of the most thoroughly sys-

many will be added before the convention adjourns.

John Hands, Iowa City, then addressed the convention on the plan of the examining board for watchmakers, which the association will conduct this year to test the efficiency of the men at the bench. Mr. Hands is chairman of the board of examiners, and Mr. Beck, of Sioux City, and Mr. Carpenter, Burlington, the other members. The discussion of Mr. Hands' talk was followed by a paper, "Our Weakness and Our Strength," by S. Callison, former editor of the *Bulletin*. This created a very lively debate on the question of the fixed minimum selling price for standard goods, participated in for the most part by Jos. Mazer, Mr. Hurlbut, N. Nielsen, Mr. Arkwright, and others. The question of a fixed selling price occupied a great deal of the discussions of the afternoon.

After adjournment the members of the association attended a moving picture show in a body in the evening.

THURSDAY'S SESSION.

The convention was called to order at 9 A. M. by the secretary, N. Nielsen, the proceedings being opened by A. Hoch, Storm Lake, with a paper on "Advertising a Jewelry Store." He covered the subject

The Oriental Turquoise Matrix

This gem, unparalleled in beauty by anything in the blue variety of opaque stones, and positively occupying the first position in the matrix family, is in every respect superior to anything of its kind yet known in the stone market. Being of an exquisite color that does not fade, varying in shade from the most delicate sky blue to the deepest azure, superbly marked by veins of golden brown or pure black matrix, and lastly, by reason of its superior hardness admitting of the highest polish ever attained by any turquoise, it is one of the most beautiful of gems.

Its possibilities, as a part entering into the composition of jewelry, are absolutely unlimited.

Occidental Gem Corporation ST. PAUL BUILDING
220 Broadway, New York

thoroughly and his paper was well received.

Geo. Arkwright, of Beatrice, Nebr., then read a paper that he had read before a convention 14 years ago, in which were presented many of the present-day situations and conditions. He followed this with an illustrated talk on a central bureau for the general information of the jewelry trade in general—a sort of clearing house. His plan is to pay a secretary, hire for him help to handle the trade to enter complaints, get information on anything relating to the trade, have an employment agency, and a sale and exchange department, etc. Mr. Arkwright is ex-president of the Nebraska R. A.

Claud Wheeler, president of Missouri R. A., then addressed the convention on "Necessity of Independence in Association Work." Mr. Wheeler is an advocate of the idea that the association should pay its own expenses, etc., of conventions, thereby have more freedom to act independently of any jobbing house, etc., from which they have solicited funds in the past, and get better results from convention meetings. Missouri has adopted this plan and the Iowa association is doing this for the first time this year.

Mr. Beck, of Sioux City, one of the old-timers in the business in Iowa, gave an impromptu talk on conditions of association work 25 years ago. He was one of the men who helped organize the first Iowa association for the correction of the catalogue evil 25 years ago. Adjournment for Thursday.

THURSDAY AFTERNOON.

At 2 P. M. the convention was called to order by President Hurlbut, and Joe Maizer, president of the Oklahoma Retail Jewelers' Association, addressed the convention on "What We Have Done and What We Should Do." He gave a short survey of what the Oklahoma association had done, its plans for furthering the work, etc. The principal part of his address, however, was given on the latter part of his subject. He said increase your membership, disengage retail jobbers and those who sell goods, etc., direct; keep up a brotherly feeling and help each other. He read a resolution adopted by the Oklahoma association for the fixing of a minimum selling price on standard goods and asked that the convention adopt it before adjourning.

Mr. Mazer was followed by Wm. Swartzchild, of Swartzchild & Co., Chicago, who read a paper on "Price and System in the Repair Department," giving a detailed outline for system in stock, work, etc., in the repair department. His paper was followed by discussions of repair work in general and a price of repairing watches in particular.

C. Carpenter, of the South Bend Watch Co., addressed the convention on "The Benefit of a Fixed Price" from a manufacturer's view-point, and J. H. Lepper, of Mason City, gave a short talk on "Four Years Ago and To-day." Mr. Lepper was the first publisher of the *Bulletin*. Adjournment.

FRIDAY MORNING'S SESSION.

The convention met promptly at nine o'clock, most of the morning being spent in short speeches and the election of

officers. Among the speeches was a short address made by Mr. Goldstone, Bennet, Ia., on the Parcels Post.

The following officers were elected for the coming year: President, N. Neilson, Harlan, Ia.; vice-president, John Hands, Iowa City, Ia.; secretary and treasurer, A. G. Hoch, Storm Lake, Ia.

The executive committee is composed of N. Neilson, John Hands, A. G. Hoch and A. E. Shepard. The meeting adjourned until 2 P. M.

FRIDAY AFTERNOON'S SESSION.

This afternoon was spent in electing delegates for the National convention and passing the following resolutions:

Whereas, It has pleased the Divine Architect of the universe to call S. Joseph, of the firm of S. Joseph & Co., Des Moines, Ia., to his final rest; therefore be it

Resolved, That we express our sincere regrets and sorrow to the bereaved family. That copies of these resolutions be sent to the family and spread upon the minutes.

Whereas, It has pleased the Divine Ruler of the universe to call Mrs. H. J. Edgar to her eternal reward; therefore be it

Resolved, That we express our sincere regrets and sorrow to the bereaved husband and children, and that these resolutions be spread upon the minutes and a copy sent to F. J. Edgar.

Resolved, That we heartily indorse the policies of all watch companies who have adopted plans for marketing their product in accordance with our views on this subject.

Whereas, The Whiting Mfg. Co. having discontinued the retail stores and having confined the sale of its products to the legitimate jewelers, be it

Resolved, That we recognize the action in this respect and express our appreciation of the company's efforts to improve the trade conditions relating to the sale of their products to the retail jeweler.

Resolved, That we condemn the practice of certain manufacturers of sterling silver who sell their product to certain eastern catalogue (mail-order) jewelers without requiring of them to sell at a fixed minimum selling price.

Whereas, The trade press has assisted the retail jeweler in accomplishing the publicity of desired regulations, be it

Resolved, That we extend to them a vote of thanks and recognition of their able assistance.

Whereas, It has been demonstrated that a fixed price by manufacturers of watch movements has been most satisfactory to all concerned; therefore be it

Resolved, That we encourage and urge all movement manufacturers to adopt the same method.

Whereas, The Iowa State Association of Optometrists has accomplished the success of placing their optometry law on the statute books of Iowa, and as securing such legislation which is favorable to the developments of the profession; therefore be it

Resolved, That we congratulate the members and instruct the secretary to give formal notice.

Whereas, Watch cases are often sold by retailers at wholesale prices in connection with the price-protected movement; therefore be it

Resolved, That a restricted selling price be established by all watch cases companies on the cases they manufacture, as they may deem it advisable to establish upon them.

Resolved, We indorse the Oklahoma resolution in regard to establishing a fixed retail selling price on movements and cases.

Whereas, George Arkwright W. Swartzchild, Joe Maizer, Claud Wheeler and H. C. Carpenter have so kindly and ably assisted with our programme; therefore be it

Resolved, That each and all of these be extended a vote of thanks by this association for their corporation.

The total number of applicants who successfully passed examination by the watch-makers' examining board was 15. This being the first examination ever held by any association makes it very gratifying to know that all classes of the trade are interested. Among the applicants were proprietors of stores, as well as their workmen. Among the list of these will be found Joe Mazer, of Oklahoma.

Following is a list of delegates elected to attend the National Retail Jewelers' Association convention, held in Omaha, in August:

N. Neilson, Harlan; W. H. Beck, Sioux City; Ralph Plumb, Des Moines; Horace Joseph, Des Moines; J. H. Lepper, Mason City; E. O. Lewis, Oskaloosa; George Hieserman, West Union; Daniel S. Jones, Independence; J. P. Duchelle, Dubuque; Mr. Thorpe, Sioux City; J. M. Nabsteb, Davenport; E. T. Renaud, Keokuk; Mr. Keith, Iowa City; John Hans, Iowa City; George Ludy, Cedar Rapids; Frank Schlampp, Des Moines; F. N. Swan, Muscatine.

The meeting place of the fifth annual convention is to be fixed by the executive committee within a few weeks. Sioux City is making an effort to secure the convention, but on account of the central location of Des Moines and its railroad facilities, it is believed that the convention will return here next summer.

Thus closed one of the most successful meetings that has ever been held by the retail jewelers of Iowa, and while they lose M. A. Hurlbut as their president, they feel they are to be congratulated on having elected N. Neilson, of Harlan, Ia., as his successor. He has been their secretary for two years and is well qualified for the honor.

A list of the different representatives of the manufacturers and wholesale houses in attendance at the convention include Alfred T. Hunt, J. R. Woods & Son, New York; H. P. Strater and C. H. Hass, Hull Bros. Umbrella Co., Toledo, O.; A. R. Weis, and Chas. K. Slemmons, Illinois Watch Co., Springfield, Ill.; H. W. Hedge, New York Standard Watch Co., Jersey City, N. J.; Dave Ellbogen, Stein & Ellbogen Co., Chicago; Hamilton R. McKinley, Elgin National Watch Co.; a representative of D. B. Ward & Co., Kansas City, Mo.; J. A. McIntire, Kreis & Hubbard, Chicago; H. F. Gruschow, Peninsular Engraving Co., Detroit, Mich.; C. C. Hofer, Woodstock-Hofer Watch & Jewelry Co., Kansas City, Mo.; Earl J. G. Lovett, Sales Manager, Rockford Watch Co.; H. C. Carpenter, Sales Manager, South Bend Watch Co.; C. T. Higginbotham, Consulting Superintendent, South Bend Watch Co.; C. L. Palda, South Bend Watch Co.

William R. Nichols, Marshall, Minn., together with two others who gave their names as Floyd Bertrand and Harry Bertrand, were arrested about a week ago on a charge of committing a burglary in Lewellyn, Minn. Nichols, who is also known as Robert A. Lewis, some time ago robbed a jewelry store at Mapleton, Kans. He was also accused of breaking into a jewelry store conducted by Klein Bros., at Baxter, Ia.

H. Richardson Stricken With Blood Clot in the Eye, but His Condition Is Improving.

RICHMOND, R. I., June 26.—William H. Richardson, treasurer of Flint, Blood & Co., confined to his home, 216 Pleasant St., is in a critical condition, although his physician gives hope that in a few days there may be a considerable improvement. It will be necessary, however, for him to remain in a darkened room for a number of weeks. His affliction is a somewhat rare one. He was stricken while enjoying an annual outing of the New England Manufacturing Jewelers' and Silversmiths' Association, June 18. Just after the party was over at the tables at Field's Point, Mr. Richardson noticed that everything in front of him began to blur. At first he thought it was because he was perspiring so profusely. His blindness increased, and he retreated to the home of Edgar Mowry, of the George L. Mowry Co., who sat next to him, that he was unable to see anything. He was assisted to the dining hall and hurried to this city. A doctor was called, and after an examination determined that a blood vessel had burst, and that Mr. Richardson would probably be blind in a short time. The improvement manifested itself, Dr. W. Van Benschoten, an eye specialist, was consulted, and it was finally decided that a clot of blood had formed back of the retina and that unless it could be removed surgically within a short time there was a probability of its affecting the brain, causing a hemiplegic stroke. Endeavors have been made since the occurrence to absorb the clot and thus remove the source of danger. It is stated by his family to-day that there is apparently a slight improvement.

George E. Ellis, Winnipeg, Man., Discusses Offers of Compromise.

RICHMOND, R. I., June 24.—A meeting of the New England creditors of George E. Ellis Co., Winnipeg, Manitoba, was held in the rooms of the Manufacturing Jewelers' Association, Tuesday afternoon. The meeting was called to order by President E. Budlong, and Marcus W. Morrill, secretary of the board, was chosen secretary. Mr. Ellis was present at the meeting and explained every explanation and assistance he could give, presented a complete statement of his assets and liabilities, in which he estimated his assets at \$53,841 and his liabilities at \$15,000. In his estimates of assets Mr. Ellis included manufacturing plant and machinery, furniture and safes and stock of the book accounts having been turned over to a bank as collateral. Mr. Ellis explained that he was owing the bank \$15,000 for which they hold as security the bank's notes, book accounts, diamonds and real estate to a total of \$148,000. He stated that his liabilities consist of \$15,000 and the balance in open accounts. In making his statement of his affairs Mr. Ellis has made three offers of settlement, the first 30 per cent. cash in full settlement, the second, 70 per cent. in preferred stock and 6 per cent. of the George E. Ellis Co., Ltd., in full settlement, and the third

of 100 per cent in preferred stock, creditors to advance cash up to one-third of their claims, this cash to be a preferred claim against the business.

After listening to the offers made by Mr. Ellis the matter was taken under consideration. The counsel of the Board of Trade, however, advise the acceptance of the first offer of 30 per cent. in cash.

Career of E. E. Brown.

DALTON, Ga., June 23.—Edward E. Brown, a well-known jeweler, who passed away in this town recently of heart disease, was a veteran of the trade in this section, having been in business in Dalton for a quarter of a century. Mr. Brown's death occurred under sad circumstances while he was nursing his daughter, who was taken ill a few days before. At that time his wife was attending another sick daughter at Chattanooga. The deceased jeweler had been in poor health for some time, but his condition was not considered serious. While attending his daughter he was suddenly stricken and passed away before a doctor could do anything for him.

At the time of his death Mr. Brown was engaged in the jewelry business on King St. under the style of the Brown Jewelry Co. He was at one time a member of the firm of Brown & Rushton, and later had charge of the business of the James A. Haff Jewelry Co., before going into business for himself. Deceased was prominent in fraternal circles and especially in the Masons and Knights of Pythias.

Virginia Retail Jewelers End Convention at Richmond With a Banquet.

RICHMOND, Va., June 24.—Attended by jewelers from many parts of the State, the convention of the Retail Jewelers' Association of Virginia, which opened at the Jefferson Hotel yesterday morning proved that the trade in this State is alive to the advantages of organization. There were two meetings—one in the morning, when reports were read and approved, and another at 5 o'clock yesterday afternoon, when the following officers were elected for the ensuing year: President, A. F. Jahnke, Jr., of this city; first vice-president, W. D. Martin, Rocky Mount; second vice-president, W. H. Schwarzschild, of this city; third vice-president, C. F. Lauterbach, Petersburg; fourth vice-president, Fred Greenwood, Norfolk; fifth vice-president, H. L. Lang, Staunton; secretary, Otis S. Harding, Petersburg; treasurer, J. S. James, of this city.

Joseph E. Allen and C. Fred Kohler, of Richmond, together with the officers, constitute the executive committee. Next year's convention will be held in Norfolk on the third Wednesday in June.

The association was organized one year ago this month and since that time it has more than doubled its membership.

At the afternoon session the following delegates were elected to represent Virginia at the next convention of the American National Retail Jewelers' Association, Omaha, Nebr.: A. F. Jahnke, Jr., and Joseph E. Allen, of this city; A. D. Beckner, Martinsville; C. F. Lauterbach, Petersburg, and W. D. Martin, Rocky Mount. It is expected that many other members of the association will also attend this convention.

The Virginia delegates, especially those from this city, will go to the national convention with the avowed intention of securing the next convention for Richmond. It is probable that the Chamber of Commerce and other organizations will bend their efforts to bring it here.

The meeting of yesterday came to a close with a banquet at the Jefferson. Among those present was A. F. Jahnke, Sr., who is perhaps the oldest jeweler and watchmaker in the State, having come to this country from Germany before the war. A standing toast was drunk to him as the oldest practical watchmaker in Virginia. Mr. Jahnke spoke reminiscently, and recounted many incidents of the trade in the early years.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended June 26, 1909.

The U. S. Assay Office reports:	
Gold bars exchanged for gold coin	\$1,308,849.62

LOUIS J. DEACON, Cape May,

Twelfth Annual Convention of American Association of Opticians Held at Atlanta, Ga., Proves a Great Success.

ATLANTA, Ga., June 25.—Most successful of the conventions and exhibits yet held by the American Association of Opticians. The 12th annual meeting held here from Monday to Thursday of this week. The decided tone of the discussions, the high character of the addresses that were delivered and of the technical papers read, the interest shown in the proceedings and the manifested in behalf of the organization and its work, all spoke loudly of the success that has been made and that will be made in the future.

The exhibitors were greatly pleased with the results both in direct sales and in the opportunities that will lead to future business. The members present from the south-east showed the most eager interest in the various articles and devices exhibited, and new avenues were opened to manufacturers and jobbers who are seeking a southern market.

The attendance was not as large as at previous conventions, but this was accounted for by the distance of Atlanta from the northern States and the fact that many members feared that the Georgia heat would be too hot for them. All who went to Atlanta were reassured as to the climate, for the weather was most desirable. During the convention the visitors were entertained with the proverbial hospitality of the south, and all left Atlanta with a close of the convention with most pleasant recollections.

The opinion was expressed by many members that the work of this convention will prove to be of the most important character, and will be the foundation for the strengthening and upbuilding of the organization. The Atlanta convention, it is predicted, will be followed by more systematic and continuous labors along optometric education and legislation.

The exhibit was in the Auditorium of the city. The big hall was decorated with numerous flags, one at either end, while other smaller flags and streamers were suspended on the walls and from the high, vaulted ceiling. The sessions of the convention were held in Taft Hall, in the same building, and in the smaller halls.

The scientific and technical programme was carried out as published in advance. It was recognized that the wise policies of President H. J. Cook, Knoxville, Tenn., must be continued by re-electing him for another term, which he has prevailed upon to accept, although against his personal inclinations.

Charles E. Folsom, Atlanta, who has been cooperating closely with President Cook in his work, was induced to accept the position of president of the Scientific Section and it was predicted on all sides that under his leadership the scientific mission of the organization will be organized on a permanent foundation.

Secretary William E. Huston was unanimously re-elected, a thorough vindication of his position which has been "on the

firing line," where he received the brunt of criticisms of various kinds, due, it was shown, to misunderstanding.

A feature of the convention was its action in paying special honors to A. Jay Cross, New York, and Charles F. Prentice, M.E., New York, to whom were given the first and second honorary life certificates of membership.

General satisfaction was given by the choice of Cedar Point, O., for the convention of next year.

Much regret was expressed because an attack of rheumatism prevented the attendance of Ernest Eimer, Muskegon, Mich., who had most efficiently served as registrar of the Scientific Section for several terms.

Following is a complete list of the new officers:

President, H. J. Cook, Knoxville, Tenn.; first vice-president, W. K. Lewis, Kansas; second vice-president, D. M. Boney, Ocala, Fla.; secretary, W. E. Huston, Kansas City, Mo.; treasurer, A. S. Haskins, St. Johnsbury, Vt.; member of the Board of Regents, W. T. Eisensmith, Charleston, W. Va.

Scientific Section—Chancellor, C. E. Folsom, Atlanta, Ga.; vice-chancellor, H. M. Hitchcock, Minneapolis, Minn.; registrar, F. P. Barr, Lancaster, O.; treasurer, C. M. Jenkins, Richmond, Ind.

Place chosen for the convention in 1910, Cedar Point, O.

Death of Charles Svensen

ARLINGTON, Nebr., June 23.—The body of Charles Svensen, of this place, was found in the doorway of his jewelry repair shop, shortly after 4 o'clock Saturday morning, by Frank Hadley and Oscar Claycomb, who were returning home from a dance and saw the body lying in the doorway as they were passing by. Svensen had evidently been dead for some time, as the body was cold when found. It was devoid of all clothing save an undershirt.

Svensen came here about three years ago from Fremont and opened up his little jewelry repair shop, living alone in the back part of the building, until the last year, since which time a blacksmith has been sharing his quarters. Dr. Davies and Mayor Echtenkamp were summoned as soon as the body was found. Dr. Davies had advised Svensen several weeks ago that he was suffering from heart disease and recommended that he go to the county poor farm, where he could be taken care of under sanitary conditions, but the doctor's advice was ignored.

When the body was found the feet and legs were projecting through the doorway, and it is evident that he sought fresh air and then fell backward into the doorway, the attitude of the body indicating that death had been instantaneous.

Svensen was about 50 years of age, unmarried and without immediate relatives so far as is known here.

Morris Turk, Keystone, W. Va., has been succeeded by Turk Bros.

Illinois Jewelers Hold Their Annual Convention at Peoria With a Large Attendance.

PEORIA, Ill., June 29.—Retail jewelers and optometrists from all over the State are in the city to attend the joint convention of the two big organizations, the Illinois Retail Jewelers' Association and the State Society of Optometrists, which met here, this morning, at the National Hotel.

The delegates and the local committee have planned to make this the greatest meeting in the history of the organization, and the roster of delegates and visitors shows they will not be disappointed. The early hours of the meeting show the greatest interest manifested in the work and pleasure which is to be combined to make this convention a memorable and important one.

The convention opened with a full attendance at 9 o'clock, when Mayor E. N. Woodruff gave the address of welcome to the assembled retail dealers and craftsmen. His remarks were congratulatory, complimentary and encouraging, and were heartily received. Frank Smith, Pontiac, Ill., vice-president of the jewelers' organization, responded, and extended the thanks of the organizations and the best wishes of the assembled delegates to Peoria and her people.

After the interchange of courtesies the convention settled down to the real business of the meeting and was addressed by President F. A. Marean. This was followed by the report of State Secretary G. B. Elbe, Chicago, and State Treasurer Paul N. Lockritz, Chicago. These consumed the remainder of the morning's session.

In the afternoon the delegates will hear a number of important addresses, especially that of O. V. Berry, State president of the optometrists.

Mack A. Hurlburt, Fort Dodge, Ia., and ex-president of the National American Retail Jewelers' Association, will speak, as will Prof. C. R. Hart, of the Bradley Institute of Horology, of this city, who will take for his subject "Ethics." "Dawn of Prosperity" is the subject of an address to be given by Jacob Franks, president of the Rockford Watch Co., Chicago.

An interesting feature of the afternoon's session will be the address of H. C. Carpenter, sales manager of the South Bend (Ind.) Watch Co., on the subject, "Advertising, and What It Means."

To-morrow will see the end of the meeting, and the officers for the ensuing year, as well as the next convention city, will be chosen. Dr. George B. McFatrigh, Chicago, will deliver the principal talk of the convention.

The entertainment committee has arranged several social affairs for the delegates and guests, including a carriage ride over the city and luncheon at the country club for the ladies this afternoon and a moonlight steamer excursion up the Illinois river this evening.

The suit to recover for damages due to injuries caused by a falling drop hammer, brought by Arthur J. Randall against the P. A. Coon Silver Co., Syracuse, N. Y., has been settled. Randall asked for \$2,000 damages.

Death of Simon Rubin.

BALTIMORE, Md., June 25.—After an illness of but a few days Simon Rubin, a well-known watchmaker and horologist, of this city, passed away on Tuesday, June 22, at the Hebrew Hospital. Though his health had been poor for some time and he had suffered from Bright's disease his condition did not become acute until a day or two before he passed away. The funeral services were held at his late residence, 431 South St., to-day, and were largely attended.

Simon Rubin was not only a great watchmaker himself, but taught many other watchmakers in this country and Europe, among them being four sons, who are in business in various parts of the country. He was born in Dunnaberg, Russia, 83 years

THE LATE SIMON RUBIN.

but spent the greater part of his life in Russia, and the last 22 years in this country, during which time he made Baltimore his home.

He began his career as a watchmaker in his native land, and from the first showed unusual skill in this line, becoming recognized for his ability. In 1875 he undertook the making of a clock that was placed on the estate of Baron von Ettinger, a Russian nobleman and governor of the province. Finding it necessary he made many tools and instruments needed to complete the work, which to a great extent was a labor of love. None of these tools were ever used, but a number of years after he was discovered, at an exhibition, one of his own devices which had been awarded a first prize, this device having been patented by a watchmaker in his employ. During the making of this great clock he was assisted by his four sons, all of whom had been educated by him as watchmakers and who had at that time become proficient in the art. The completion of the work netted him not less than 2,300 roubles in addition to what he was paid for material, wages, etc., but his excellent work brought him considerable honor, and he was awarded a silver medal, the highest prize at an exhibition held in his native land.

About a year later he was awarded a gold medal as a first prize, and also a diploma of honor. So well pleased was Baron von Ettinger with the work that Mr. Rubin won his highest regard and admira-

tion, as well as his life long friendship, a friendship which, by the way, on several occasions proved very valuable to him while he lived in Russia.

Coming to this country about 1885, Mr. Rubin settled in Baltimore and started at work at his profession, and in a strange land practically built up anew his reputation as a watchmaker. So devoted was he to his craft that until very lately, in spite of his poor health and the protests of his children, he still insisted on doing the most delicate work that came to his establishment, all of which he finished in a most painstaking manner.

Deceased was a devout orthodox Jew, and his knowledge of Talmud and Hebrew literature was most profound. He was a man of liberal education and was of a sweet and genial disposition and charming personality, qualities which endeared him to all his friends. His quiet dignity and high sense of honor and integrity as well as his broadmindedness on all subjects gave him the respect of all his business associates as well.

Mr. Rubin's wife preceded him to the grave by some years. Of his four sons, Jacob Rubin is a jeweler at Hartsville, S. C.; Max and Morris Rubin are in this city, and Wm. Rubin is engaged in business in Paterson, N. J. Besides these he is survived by one daughter, Mrs. J. Block, of this city, 20 grandchildren and four great-grandchildren.

George W. Dover Rescues Woman from Drowning at Narragansett Pier.

PROVIDENCE, R. I., June 28.—George W. Dover, a well-known manufacturer of jewelers' findings of this city, became a hero yesterday by the rescue of a young woman at Narragansett Pier, who refused to give her name. The woman was caught by the undertow after she had been attacked with cramps and was in danger of being drowned. She was unconscious when Mr. Dover reached her side. He brought her in close to the shore, where several others went out into the surf and assisted them to land.

Mr. Dover, accompanied by Mrs. Dover and Samuel Steiner, superintendent of the Outlet Co., and Mrs. Steiner, went to Narragansett Pier, yesterday morning, in Mr. Dover's automobile. After luncheon the party prepared to go in bathing. Mr. Dover had dressed for the water and was walking along the beach talking with Harry Cutler, of the Cutler Jewelry Co., this city, when he heard a woman scream.

Some 200 feet from shore he saw a man struggling, evidently in vain, to save a woman companion. Mr. Dover, who is an expert swimmer, plunged into the water and swam toward the struggling couple. The woman's companion, who was nearly exhausted, gave up the battle before Mr. Dover got to the woman and made his way to the shore with much difficulty.

When Mr. Dover reached the woman he found that she was nearly unconscious, and that the undertow would have drawn her under in a few seconds. Placing one arm around her waist, he started to swim ashore. The swim was made with considerable difficulty from the fact that the strong under-

tow made inroads upon Mr. Dover's strength. As he neared the shore, however, Messrs. Steiner, Cutler and others formed a sort of living chain, by means of which the woman, now limp as a drowned person, was brought safely to the shore.

The members of the rescuing party, together with a physician, worked over the woman for nearly half an hour before she regained consciousness. Mr. Dover recovered from the effects of his efforts in the water after a brief period and went in bathing for pleasure with the others of his party.

Receiver Appointed in Bankruptcy Proceedings Against Wm. A. Penn, Morrison, Ill.

MORRISON, Ill., June 23.—A. R. Baird, of this town, has been appointed receiver of William A. Penn, a local jeweler, in the bankruptcy proceedings instituted some time ago by Henry Paulson & Co., the C. H. Knights-Thearle Co., and other creditors. The bankruptcy petition was filed at the Freeport branch of the United States District Court, June 16, and a receiver was asked for at that time.

Mr. Penn, who started in business in 1894 at Fulton, has been in business in Morrison for the last four years. He has been hard pressed financially for some time, and a number of suits by creditors have been threatened. A short time ago he practically admitted his insolvency in a statement which showed his liabilities to be about \$5,206 and stock and fixtures to be worth about \$3,800 to \$4,000. Arrangements were made for a compromise with the creditors, but these proceedings have been stopped, temporarily at least, by the bankruptcy petition. The compromise, if it is made now, will have to be through the bankruptcy court.

Death of Leopold Laubheim.

Leopold Laubheim, of Laubheim Bros., 65 Nassau St., New York, died, Monday, at 6.53 p. m., after a lingering illness. Death was caused by a complication of diseases, nervous prostration bringing on an attack of apoplexy.

Mr. Laubheim was 40 years old and was born in Germany. He came to this country in 1882, and entered the employ of Adolph Goldsmith, with whom he remained until 1892. In that year Laubheim Bros. was started, and with this firm he was connected until his demise.

Deceased was a Mason. He is survived by his widow. The business of Laubheim Bros. will continue as before.

Has Anyone Been Offered This Stolen Watch?

E. L. Price, Roodhouse, Ill., reports the theft, some time ago, of an Illinois watch movement, Bunn 17-jewel, No. 1826572, in North American case No. 929399. He believes the thief took it to Chicago.

Anyone to whom the watch may be offered is requested to notify Mr. Price at once.

The style of the business heretofore conducted by Orion N. Jones, Argyle, Minn., is now the O. N. Jones Jewelry Co.

TRADE MARK

W. W. HARRISON CO.
Established 1876
1149 Broadway - - New York

Death of William F. Fischer.

CHATTANOOGA, Tenn., June 23.—It was a deep regret that his friends in the jewelry trade learned of the death of Wm. Fischer, senior member of the W. F. Fischer & Bro. Co., of this city, whose life's body was found in his apartments over the store at 801 Market St., about 2 o'clock yesterday afternoon. Heart disease was evidently the cause of his death. Mr. Fischer had left the store about 9 o'clock in the morning, complaining of a pain in his chest, but his condition was not considered serious. He went to his apartments and lay down to go to sleep, but was stricken during a slumber and never awakened. He had been dead probably an hour when discovered.

Mr. Fischer, who was one of the best known members of the trade in this section, came from Mecklenburg, Germany, in which country he was born, Aug. 19, 1846. However, he came to America with his parents when a child, and was an American in every thought and feeling. His early life was spent in Dalton, Ga., but in 1867 he moved to Chattanooga, and two years later formed a partnership with his brother, L. L. Fischer, under the style of W. F. Fischer & Bro. This business, which continued for 26 years, was a partnership until April 4, 1896, when it was incorporated, W. F. Fischer becoming the president, L. L. Fischer the treasurer and manager and L. McClure, secretary, of the company.

From the beginning of his career in this city Mr. Fischer occupied the stand at 8th and Market Sts. save for a short time, a few years ago, when his business suffered from fire. He built up an excellent trade, and his characteristic honesty, integrity and ability as a business man were prime factors in the success of the house. In social life he was for years very popular and was a charter member of the Mountain City Lodge and prominently identified with the Masonic fraternity; in the latter body he was a member of the Chattanooga Lodge, No. 1, & A. M.; Hamilton Chapter, R. A. M. and Lookout Commandery, Knights Templar.

The funeral services, which were held yesterday afternoon from the First Presbyterian church, were conducted by Rev. J. W. Wachman, assisted by Rev. Dr. Loaring Clark, pastor of the St. Paul's Episcopal church. After this the Knights Templar took charge of the body, which they escorted to Forest Hill Cemetery, where the interment took place.

Death of Joseph Nelson.

DUNKIRK, N. Y., June 29.—Joseph Nelson, a prominent wholesale jeweler of this city, died yesterday, at the age of 77 years. Mr. Nelson was of Scotch descent and was born in Dromore, in northern Ireland, where his family, who were Covenanters, went after the Restoration. He is survived by a widow, three daughters and eight grandchildren.

Deceased was widely known and popular in the jewelry trade of this section, having conducted business in Dunkirk since the early '50's. At one time he admitted his son-in-law, H. F. Vander Voort, as a partner under the style of Joseph Nelson & Co., and after Vander Voort withdrew in 1889

Mr. Nelson continued alone without changing the firm name. He did a large business and was highly respected in the trade and in his community.

Sale of the Habib Collection of Rare Diamonds Takes Place at Paris.

(Special Cable Despatch to the N. Y. Sun.)

PARIS, June 21.—The sale of the Habib diamond collection at the Hotel Drouot today attracted many curious spectators, but few buyers. The prices were disappointing and far from sensational, except that the anticipations of experts were set at naught.

The famous Hope diamond, for which Habib paid \$400,000, was knocked down for \$80,000, bid by Louis Aucoc, the official expert of the sale and the recognized leading authority on diamonds in France. It is supposed that he bought it for a client. The entire collection of eight stones brought \$124,000 less than Habib paid for the Hope alone.

The first diamond in the catalogue, a rose blue of six carats, brought \$5,000. The second, a white blue pear-shaped stone of 24 carats, brought \$16,000. No. 3, a similar stone of 23 carats, brought \$22,000. A 16-carat diamond from Princess Mathilde Bonaparte's casket, No. 4 in the catalogue, was sold for \$32,000. No. 5, an aquamarine resembling the Nassac diamond in the English crown collection, brought \$38,000. This was a 70-carat stone.

A rose diamond of 31 carats, resembling the far-famed Mazarin, was No. 6 and sold for \$23,000. The seventh was the "Miregent," so called because of its resemblance to the Regent diamond in the French crown collection. It is rated at 58 carats, and it brought \$60,000.

No. 8 was the Hope. This brought \$150,000 when it was first sold from the Hope collection. It sold at higher and higher figures in subsequent sales, until Selim Habib bought it from the Frankels for \$400,000, which he recently declared was about half its proper value.

President Evans, of the New York State Retail Jewelers' Association, stated to THE JEWELERS' CIRCULAR—WEEKLY's Utica correspondent Friday that he would call a meeting of the executive committee of the association early next month to talk over various matters of interest to the jewelers' trade. The meeting will probably be held in Syracuse. The committee consists of President Charles T. Evans, Wm. A. O'Donnell, Utica; Edward D. Mix, Albany; Charles J. Dale, Plattsburg; E. M. Barringer, Gloversville; Emil J. Scheer and Charles E. Sunderlin, Rochester; E. B. McClelland and Charles A. Crouse, Syracuse, and Albert Zilliox, Buffalo. There will be reports from the standing committees, on trade interests, legislation, qualities, and membership. The vice-presidents are chairmen of the standing committees. Retail jewelers throughout the State have been invited to send in suggestions about the trade and matters which need improvement, and these will be discussed. The committee will consider the advisability of procuring membership certificates, and association members may be asked to have the fact that they are members printed on their stationery.

J. H. Mosher has just begun business at Glendive, Mont.

F. F. Ross, Bethany, Mo., has opened a jewelry store at Lineville, Ia.

J. F. Skory has opened a store on E. 65th St., near Broadway, Cleveland, O.

James B. Cohn & Co. recently opened a store on Eddy St., San Francisco, Cal.

W. J. Womble has engaged in the jewelry business on Mangum St., Denham, S. C.

C. C. Mitchell will engage in the jewelry business in Tahlequah, Okla., in the near future.

Edward Eckert has completed arrangements to open a new store in the Link building, Orange, Tex.

The Henry Oxford Optical Co. has been incorporated in Philadelphia, Pa., with a capital of \$5,000, to engage in the optical business.

Carl E. Neuman, formerly watchmaker for J. B. Hudson & Son, Minneapolis, Minn., will shortly open a store on his own account at Sand Point, Idaho.

Chas. A. Seifert, for several years designer and jeweler with G. A. Schlechter, Reading, Pa., has opened a repairing establishment at 1309 Buttonwood St., at that place.

The American Cuff Button Co. has been incorporated in Cincinnati, O., with a capital of \$10,000, by Albert L. Jones, E. S. Coleman, Louis K. Morgan, Kate R. Vonderhare and John C. Hopkins.

The Art Novelty Shop was opened, June 28, in the Hippodrome building, Cleveland, O. The fixtures are new and costly and the store is one of the best appointed in Ohio. The president of the concern is P. A. Mequillet.

The H. D. Feast Optical Co. has been incorporated in Alexandria, Va., with a capital of \$10,000, all paid in. The officers are: President, H. D. Feast; vice-president, F. W. McAllister; secretary and treasurer, Wm. McNeir, all of Washington, D. C.

The E. A. Kennedy Co. has been incorporated to deal in jewelry and loans in New York, with a capital of \$50,000. The incorporators are: E. A. Kennedy, 405 Pleasant Ave., New York, and W. J. K. Kennedy and Vician Carmichael, Merrick, L. I.

The Curtis, Pinover & Schneider Co. has been incorporated under the laws of the State of New York to deal in jewelry, with a capital of \$20,000. The incorporators are: Julius B. Curtis, 412 W. 115th St., and Samuel Pinover, 1944 Madison Ave., New York, and Peter Schneider, Springfield, L. I.

B. F. Foye, Needham, Mass., recently sustained a loss by fire.

The W. C. Correll Jewelry Co., Concord, N. C., is making extensive improvements in the exterior of its store.

Members of the Missouri Society of Retail Jewelers Conclude Third Annual Convention at St. Louis.

ST. LOUIS, Mo., June 24.—The third annual convention of the Missouri Society of Retail Jewelers, held Monday and Tuesday, June 21 and 22, at the Hotel Jefferson, here, was by all odds the most enthusiastic, successful and resultful meeting that the association has held. Officers of the association expressed themselves emphatically that effect at the close of the convention. The vexatious question of jobbers selling at retail was grappled with, and a side conference between the retailers and the jobbers resulted in a clearer understanding and better feeling. The retailers do not anticipate that they will have as much trouble with this question in the future, but if they are confident that co-operation of members of the association will enable them to deal with it effectively.

The experiment of holding an entirely independent convention, without calling on manufacturers and jobbers for assistance, was a complete success, and the members of the association feel confident that they have established a noteworthy precedent which other State associations will do well to follow.

In his address of welcome Mayor Frederick W. Kreismann said that no class of business men can stand alone, and that conventions make business better and society better. He urged the jewelers to come back to St. Louis in October to the celebration of the city's centennial and to bring their townspeople with them.

After the response on behalf of the association by Adam Haffner, Sr., of De Soto, F. W. Drosten, St. Louis, proposed three speakers for Mayor Kreismann, and they were given heartily. After a recess for registration the association went into executive session for the consideration of the question of jobbers selling at retail.

President Claud Wheeler, Columbia, delivered his annual address during the executive session. R. E. Meehan, Norborne, Mo., was to have read a paper on "The Mail Order Jeweler and How to Compete with Him" at the morning session, but he was absent.

The discussion of the jobber who sells at retail was begun by R. D. Worrell, Mexico, who read a paper on "The Jobber Who Sells at Retail." He treated the subject temperately, pointing out that such practice not only injured the retailer, but also the competing jobber. There was a general discussion following the reading of the paper. Several of the speakers became rather emphatic in their denunciation of the practice. Charles Harrington, Kirksville, and F. W. Drosten, St. Louis, and others spoke. The St. Louis members brought forth their advocacy against one St. Louis jobbing house in particular, and a general understanding was reached that if such practices were continued the country retailers would protect the city retailers by withdrawing their patronage from jobbing houses, thus offending them. As the retailers desired, however, to take drastic measures, a committee was appointed to confer with representatives of

the jobbers in reference to the complaints. The committee was composed of R. D. Worrell, Mexico; Herman Mauch, St. Louis; Claud Wheeler, Columbia; Joseph Eberting, St. Louis, and C. W. Hoen, Clinton.

Every jobbing firm in St. Louis was represented at the conference held in one of the hotel parlors. The grievances of the retailers were thoroughly discussed. It was agreed that past offenses would not be held against any jobber, being treated as of the nature of first offenses, for which leniency was due. No formal report was filed by the committee, but Herman Mauch reported verbally that the committee had had a very satisfactory audience with the jobbers and stated to the meeting that he thought they had come to an understanding. He told the members that if they wanted any additional information on the subject they should write to the officers.

C. F. Bass, Louisiana; William Westphal, St. Charles, and F. W. Drosten, St. Louis, were appointed the committee on resolutions, and all resolutions were referred to the committee without being read to the convention.

The afternoon session adjourned early and the members spent the evening at Delmar Garden, free tickets being furnished by the local retailers to the several delegates to all the places of entertainment at the resort. At the Tuesday forenoon session Adam Haffner, Sr., presided in the absence of President Wheeler, who was attending the conference with the jobbers.

S. J. Huey, Excelsior Springs, read a paper on "Possibilities of the Show Window," in which he characterized the show window as "The Silent Salesman." He emphasized strongly the importance of making intelligent, discriminating use of the show window, declaring that in his own experience many sales had been the direct result of a show window suggestion to a passer-by.

Fred Pilcher, Mexico, in a paper on "The Shell of Our Business," presented substantially the same idea as Mr. Huey, but presented them in figurative and picturesque phrasing. With him the shell corresponded to outside appearances. "Show your goods and show them in the most inviting manner," he said. "It is not the man from Missouri alone who has to be shown. The world at large is attracted by whatever is pleasing to the eye. And in no line of business is this more especially true than with the jeweler. Our wares are a luxury rather than a necessity, hence we must appeal to the beauty-loving, pleasure-seeking world."

Charles Bard, Sedalia, was to have discussed "The Kernel of Our Business," but he was unable to be present, and his subject was assigned at short notice to Frank W. Baier, St. Louis, who handled it effectively, presenting his views of the stock and equipment which one should supply himself with who goes into the jewelry business with a capital of \$10,000.

L. A. Spurlock, Rockport, was not able to be present, but he sent his paper on "What Is a Fair Fixed Selling Price?" and it was read by Secretary H. L. Raines. Mr. Spurlock, in his paper, answered his question by saying that 60 per cent. was a fair fixed selling price. He favored that per cent. because it had the merit of being medium, and he considered it fair both to the retailer and to the buyer. He alluded with disfavor to the small fixed profit with an increase for repairs and the 100 per cent. plan. He expressed the belief that the adoption of a fair fixed selling price would place the small retailer on an equality of opportunity with the big mail-order houses. In closing he emphasized the interdependence of the manufacturer, the retailer and the buyer.

H. M. Cole, district manager of the Sheldon Correspondence School of Chicago, was introduced and delivered a short, spirited address on salesmanship. He elucidated the four mental steps of a sale, attention, interest, desire and resolution to buy, contending that salesmanship was not haphazard but followed mental laws, and made a plea for the science of salesmanship. He was tendered a rising vote of thanks. F. W. Drosten, Adam Haffner, Sr., and others participated in the discussion that followed. H. C. Carpenter, sales manager of the South Bend Watch Co., also addressed the convention.

At the afternoon session Otto Buder, St. Louis, who is a member of the House of Delegates, presented his ideas of "The Civic Duties of a Merchant—a Jeweler in Particular." He said in part: "The merchant's time is almost entirely absorbed in his business. He knows nothing about what is doing until some law or ordinance is being enforced against him. Then he swears at those in office, and sometimes he has just cause to swear, because of the condition of things, but for which, however, he is largely to blame for not remaining in touch with the government of his municipality."

"Let me urge you to mix up in the affairs of the government of your town. I feel that it will be better for the community in which you move, and know that it will broaden your views, and in the course of time the town jeweler will become as popular as the village smithy was years ago."

H. E. Schmidt, Boonville, answered in an emphatic negative the question contained in the topic of his paper, "Shall We Instruct for a National Official Organ?" In introducing him, President Wheeler asked the members to pay close attention to the reading of the paper, as the question would be settled at the national convention at Omaha, and he wanted to know the sentiment of the Missouri jewelers.

The paper was discussed approvingly by Otto Buder and Herman Mauch, St. Louis, and C. A. Read, Lebanon. On motion of Mr. Mauch the meeting expressed itself unanimously as opposed to a national organ, and voted to instruct the delegates to the Omaha convention to vote against it. President Wheeler read a letter from S. Collison, the national secretary, urging attendance at the national convention.

Anderson Blanton, Paris, assigned to

answer the question, "Should Watch Companies Sell Only Complete Watches?" replied in the affirmative, expressing the conviction that such practice would be to the advantage of the retailer. He said that self-protection demanded that retailers awaken to the importance of the question. In the discussion W. I. Sidwell, Charleston, took the contrary view, contending that retailers would be at a disadvantage if deprived of the chance of making works salable, by putting them in new-style cases.

A vote of thanks was tendered to the Eisenstadt Mfg. Co. for the big bunch of American Beauties that adorned the table, and it was ordered that they be distributed to the ladies at the close of the session. This was later gracefully done by Otto Buder.

Resolutions of thanks adopted by the Equality Club, composed of exhibitors, for courtesies shown them by the convention were received and read. They were signed by Nelson Hagenour and J. S. Coy as a committee.

Resolutions of condolence on the death of Clay Clement, Springfield, Mo., a member of the association, were adopted after President Wheeler had paid a tribute to Mr. Clement as a man and a jeweler.

The committee on resolutions reported through its secretary, R. D. Worrell, as follows:

We earnestly urge all retail jewelers to discontinue the practice of sending their customers into the wholesale houses with letters of introduction or orders for goods, as we believe that to be the beginning and the cause of the pernicious habit of goods being sold at retail by jobbers.

We advise you to investigate the policy of the jobbers from whom you buy and cut from your list the jobber who sells at retail and who is practically in competition with you, but instead help and assist with your patronage the legitimate jobber, as he helps and protects you.

We advise you to investigate the proposed action of Robert Ingersoll & Bro. regarding the exclusive sale of their watches to the retail jewelers, and if you find it as favorable as we believe it to be, that you carry and sell their line as far as your trade conditions will permit.

We condemn the fraudulent advertising of merchandise in general and advocate the enactment of a federal law that will adequately punish the one guilty of wilful misrepresentation in any form of advertising.

The resolutions provided for the annual meetings to be held on the third Monday in June and ensuing days, alternately in Kansas City and St. Louis.

The committee recommended that the offices of secretary and treasurer be consolidated, and by the adoption of the report this was done. The officers and members of the executive committee are to constitute a grievance committee, to which all complaints are to be referred.

The resolutions concluded with an expression of thanks to the press, to the management of the Jefferson Hotel and to the St. Louis retail jewelers for the entertainment provided for the visitors.

On motion of Mr. Worrell a vote of indorsement was given to the executive committee for the adoption of the plan of having the convention without the aid of manufacturers and jobbers, which had worked out so successfully. Remarks commendatory of the Waltham Watch Co. and the South Bend Watch Co., which have favored the retailers, were made and approval was voted of all watch companies

that adopt a policy of favoring the best interests of retail jewelers.

Mr. Turnbaugh, Boonville, commended the work of Newton Dexter, New Haven, Conn.

The committee on nominations, composed of F. W. Baier, Anderson Blanton and M. E. Schmidt, recommended the re-election of Claud Wheeler as president. He was unanimously re-elected. He promised to redouble his efforts during the next 12 months. The other officers were also re-elected, viz., S. J. Huey, Excelsior Springs, first vice-president; Adam A. Haffner, Sr., De Soto, second vice-president; H. L. Raines, Maryville, secretary and treasurer.

Delegates and alternates to the Omaha convention were named as follows: Delegates, J. J. Brown, Herman Mauch, Claud Wheeler, Charles A. Mauch, H. L. Raines, Anderson Blanton, G. Eckhardt, Fred Pilcher and R. M. Walker. Alternates, I. B. Morris, H. J. Hendricks, T. L. Barket, Charles Bard, Fred Drost, Charles Tieman, Charles Harrington and Otto Buder.

President Wheeler was given time to appoint the members of the executive committee.

The meeting was remarkable for the large number of new members received into the association, 54 names having been added to the roll. This was the largest number ever received at an annual meeting. President Wheeler, in speaking about it, said he hoped that the number would be three times as great at next year's meeting at Kansas City. The new members received were: F. C. Clement, Pleasant Hill; H. F. Crane, Maryville; J. J. Bowen, Winona; L. A. Spurlock, Rockport; D. C. Burchett, Kirksville; A. A. Healy, Browning; Martha Stahlberg Faulkner, St. Charles; Ed. M. Crellin, Chillicothe; W. H. H. Shreckengast, Pattenburg; R. E. Meehan, Norborne; George A. Tetley, Farmington; N. B. Jeter, Butler; F. Denizet, Perryville; Jeff B. James, Mansfield; J. H. Keadle, Bellflower; Charles N. Harrington, Kirksville; G. W. Ellis, Butler; Fred Weiss, Butler; Will H. Wright, Webb City; T. G. Burghardt, Jefferson City; Otto Burkland, Moberly; George H. Church, Oak Grove; J. W. Whiteside, Liberty; G. B. Douglas, Pleasant Hill; F. W. Wastham, Kansas City; M. B. Gordon, Braymer; R. F. Whitman, Hamilton; M. E. Schmidt, Boonville; C. S. Poole, Joplin; G. W. Cameron, Poplar Bluff; E. Parker, Gilman City; Perry Short, Monett; F. A. Henniger, Columbia; Robert Gillies, Fredericktown; T. Ben Turnbaugh, Bloomfield; I. B. Morris, Perry; John Koetting, Ste. Genevieve; J. G. and G. A. Brown, Hannibal; W. Elliott Pennell, Trenton; Henry Storms, Laredo; Buhrman & Emery, Springfield; W. T. Roach, Carthage; John E. Walz, Boonville; Heinrich & Chambers, Jefferson City; W. W. Whiteside, Liberty; J. H. Kuhn, Fayette; J. Eikuart, Frankfort; E. L. Thurber, Warrensburg; K. E. Holderle, Salisbury; Robert J. Green, Salem; C. W. Hoerr, Clinton; C. F. Lehnhoff, Belle.

Among those who registered were: Claud Wheeler, Columbia; R. Gillies, Fredericktown; Adam A. Haffner, Sr., De Soto; F. Denizet, Perryville; W. I. Sidwell, Charleston; C. W. Fuchs, Independence; V. L. Prevallet, Perryville; Charles A. Mauch, Marshall; T. H. Edwards, Clarksville; Jeff B. James, Marshallfield; I. B. Harris, Perry; E. L.

Thurber, Warrensburg; C. E. Tieman, Calico; Anderson Blanton, Paris; R. L. Reed, for G. Cameron, Poplar Bluff; A. M. Bennett, Warrensburg; C. Burkhardt, Red Bud, Ill.; Louis De R. Waterloo, Ill.; J. H. Williams, Clarksville; J. H. Keadle, Bellflower; J. J. Brown, Jr., Hannibal; Karl E. Holderle, Salisbury; J. A. Welch, St. Louis; E. T. Ashbrook, Jamesport; Grimm Gorley, St. Louis; A. F. Hoffman, St. Louis; F. Carpenter, Moberly; F. H. Niehaus, Sr., St. Louis; R. D. Worrell, Mexico; F. H. Gross, St. Louis; J. H. Whiteside, Liberty; John Koetting, Ste. Genevieve; Martha Faulkner, St. Charles; W. Drost, St. Louis; J. N. Ebeling, St. Louis; Otto Buder, St. Louis; R. W. Smithers, Cam W. H. Jahn, Pacific; M. Levy, St. Louis; C. M. Harrington, Kirksville; T. Ben Turnbaugh, Bloomfield; Charles J. Linn, Laporte; H. Mauch, St. Louis; E. C. Zerweck, St. Louis; Robert R. Green, Salem; Emil Beck, St. Louis; Charles N. Harrington, Kirksville; Carl Buermann, St. Louis; John F. Zetter, St. Louis; Charles Helwig, St. Louis; A. M. Zerweck, St. Louis; C. W. Hoerr, Clinton; J. G. Young, Moberly; C. F. Lehnhoff, Bellefontaine; Pertles, Jefferson City; M. Goldstein, St. Louis; W. H. Whiteside, Liberty; C. W. Whiteside, Jr., St. Louis; Ed. C. M. Tower, Liberty; Charles Emery, Springfield; N. B. Jeter, Bartles; G. E. Lebanon; T. H. Vineyard, Desoto and Piedmont; G. A. Tetley, Farmington; Fred W. Mexico; O. C. Simmons, Gorin; E. H. Nieman, St. Louis; Lou Kurtzeborn, St. Louis; Emery, Springfield; P. V. Kaesser, St. Louis; Manning Walker, Monroe City; F. W. Baier, St. Louis; J. Eikuart, Frankfort; W. W. Cameron, St. Charles; C. F. Bass, Louisiana; J. G. Slattery, Slater; F. F. Gerlack, St. Louis; He & Chambers, Jefferson City; Charles Weber, St. Louis; S. J. Huey, Excelsior Springs; Schmidt, Boonville; H. Haverkamp, Trenton; Schlenker, St. Louis; Charles W. Whiteside, St. Louis; J. W. Armbruster, Springfield; J. G. Lovett, Rockford Watch Co.; H. Kinley, Elgin National Watch Co.; A. E. Bonne Terre; Charles M. Harrington, Kansas City; Alfred Clark, St. Louis; P. G. Ross, St. Louis.

Convention Notes.

Carnations were distributed to every one on the steamboat excursion with the compliments of the Eisenstadt Mfg. Co.

Much praise was bestowed upon the entertainment committee, composed of Herman Otto Buder, Edward Zerweck and Joseph Koetting, who planned the evening at Delmar for the steamboat excursion, and by their attention to the delegates saw that they had a good time.

President Claud Wheeler, of the Missouri Association, left the day after the convention at Moines, Ia., to deliver an address at the convention of the retail jewelers on "Independent Association Work," with reference to the plan of holding conventions without the manufacturers and jobbers.

Mrs. Martha Stahlburg Faulkner, St. Louis, was the only woman delegate at the convention. She is the active proprietor of the Stahlberg Jewelry Co., St. Charles. The business is owned by Mrs. Faulkner and her sister, Mrs. Sarah New York. The business was established in 1850 and conducted for many years by August S. He died two years ago, and his widow succeeded to the ownership and control. Mrs. Faulkner died in January and Mrs. Faulkner and her sister became the owners. Mrs. Faulkner is an expert watchmaker, who was her father's apprentice for years. She took keen interest in the convention and was at every session.

Charles T. Higginbotham, South Bend, Ind., who attended the convention, talked to the delegates about a reform in the method of measuring time, which he advocates. He favors the adoption of a universal meridian, by mutual agreement among the nations, to be used by every one in the computation of time, which would be the same time everywhere. He also advocated the numbering of watch and clock dials from 1 to 12.

The exhibitors included: J. Hoare & Co., New York; L. H. King in charge; Colonial Co., Baltimore; M. G. Rowland, Baltimore; Quaker City Glass Co., Philadelphia; E. Friede in charge; Oneida Community, Wood & Sons, New York; A. T. Hunt, Jr., Merrimack Optical Co., Kansas; C. M. St. Charles; South Bend Watch Co., South Bend, Ind.; H. C. Carpenter in charge; E. Howard Waltham, Mass.; A. G. Lee in charge.

THREE SECTIONS OF A 40-INCH PHOTOGRAPH OF THE OFFICERS AND MEMBERS OF THE MISSOURI SOCIETY OF RETAIL JEWELERS WHO ATTENDED THE CONVENTION HELD AT ST. LOUIS, JUNE 21-22.

Omaha.

Albert Gustafson is taking a rest on a ranch in western Nebraska.

L. A. Borsheim left, last week, to enjoy three weeks at Sulphur Springs, Ark.

Curtis M. Lindsay, son of S. W. Lindsay, is now engaged in the jewelry business with his father.

Fred Bryan and wife, Fremont, Nebr., were here for a few days, last week, on their wedding trip.

Harry Caru, with Max Egge, Grand Island, Nebr., has just concluded his vacation, which he spent in this city.

Alex. Holmberg, watchmaker for S. W. Lindsay, was called to Chicago, last week, on account of illness in his family.

The firms of S. O. Bigny & Co. and the Eisenstadt Mfg. Co., last week, wrote in for exhibition space at the coming convention.

B. E. Wycoff, Greenfield, Nebr.; J. R. Lucas, Ogallala, Nebr.; John Morris, Hancock, Ia.; Geo. Hollenberger, Western, Nebr., and W. H. Wiker, Spalding, Nebr., visited Omaha, last week, and purchased stock before returning home.

The following jewelers of this city will close their stores during the months of July and August at five o'clock: A. Mandelburg, Henry Copley, Fred Brodgaard & Co., the C. B. Brown Co. Albert Cahohn, M. D. Franks, S. W. Lindsay, Mawhinney & Ryan Co., T. L. Combs & Co., Jos. P. Frenzer, L. A. Borsheim and Gustafson & Hendrickson.

Iowa jewelers in convention at Des Moines, June 24, rejected the proposition of Joseph Mazer, McAlester, Okla., to have a fixed margin of profit on standard jewelry of 25 per cent. Geo. Arkwright, Beatrice, Nebr., former president of the Nebraska State Jewelers' Association, read a paper on the influence of the jobber. He advocated a central bureau which could devote its energies to meeting the competition of the mail house.

The jewelers' national convention, which convenes in Omaha, Aug. 2-6, inclusive, and which is being carefully looked after by the local Jewelers' Club, is meeting with considerable success. Manufacturers and jobbers are asking for the reservation of exhibit space almost daily. The meeting held Thursday, June 24, was well attended, and many important matters were discussed. Replies have been received from manufacturers and jobbers who are unable to make an exhibit, but who are eager to subscribe for advertising and entertaining purposes. This matter was brought before the club and it was decided that the club should send a letter to such manufacturers and jobbers with an agreement that they purchase advertising space, their names to be placed on a list known as the Roll of Honor. The letter is as follows:

We have gleaned a "hunch" or a new idea from the mass of correspondence already had relative to the coming National Retail Jewelers' convention, to be held in Omaha, Aug. 2 to 6. The responses to our circular and personal letters show that a large number of manufacturers and jobbers are unable to make exhibits at the convention, but they manifest a decided interest and a desire to assist the spirit and success of the convention in a financial way.

We met and decided upon a plan that we believe feasible and mutually beneficial. Our plan is to offer the privilege of subscribing whatever amount you like to the banquet and entertainment

fund, and in return we propose to allot to you for each \$1 subscribed a square foot of space in our exhibition hall, to be properly placarded and devoted to advertising matter for you, should you wish, or to enroll your name upon a list that will be conspicuously displayed in the large convention hall under the caption, "Contributors to the Success of This Convention," as you may designate. It is our further purpose to have all of and in the convention. The names, moreover, will mentioned and publicly thanked at our banquet fit that will come to us all from a highly contribute to the trade papers. We believe this plan a very legitimate means of your declaring that you are in accord with the jewelry spirit of the times and for us to accept your assistance.

Trusting that you realize the untold mutual benefit that will come to us all from a highly conducted convention, and that you will facilitate our local committee's rapidly accumulating work, we ask your careful consideration and prompt response. For the purpose of a proper record for both you and us we enclose duplicate subscription blanks for your signature, one of which will be returned to you properly acknowledged.

Yours most cordially,
OMAHA JEWELERS' CLUB,
Per T. L. Combs, President.
A. Mandelberg, Secretary.

Connecticut.

Fredrick Sage, president of the Middletown Silver Co., Middletown, left, June 21, on a business trip to New York.

The wife of J. H. G. Durant, New Haven, sailed on the White Star steamship *Baltic*, June 20, for a three months' trip abroad.

The J. J. Niland Co., Meriden, has filed a certificate increasing the capital stock by \$5,000, 50 additional shares having been issued.

R. C. Wallace, Wallingford, has transferred to F. A. Wallace, in Wallingford, a piece of real estate with buildings in S. Main St., at that place.

Mayor W. H. Lyon, head of the Chas. Parker Co., Meriden, and George M. Curtis, of the same place, were guests of the dinner committee at a banquet given, June 19, in honor of Connecticut's new Governor, Frank B. Weeks.

The annual outing, reunion and dinner of the traveling representatives of the American Silver Co., Bristol, was held, Tuesday afternoon of last week, at Lake Compounce. The directors and officers of the company were present.

Pierce N. Welsh, president of the American Silver Co., Bristol, and director of the New Haven Clock Co., New Haven, sailed with his daughter, June 26, for Naples on the North German Lloyd steamship *Berlin*. They will remain abroad until the early Autumn.

According to the will of the late Edward Miller, who died recently in Meriden, the value of the estate is estimated at about \$1,000,000, and is given to two sons, Edward and C. E. Miller, with the exception of a \$30,000 trust fund for a daughter, Mrs. L. Kendrick.

The New York Progressive Mfg. Co., of which Morris Franklin, a New York jeweler, is president, has purchased the entire town of Turnerville. The purchase includes a number of mills, about 1,100 acres of land, 40 dwelling houses, a store and a large pond. The town is 10 miles west of Williamantic, and was founded 80 years ago by P. A. Turner, who died in 1899.

Joseph Matofsky, who for many years peddled jewelry in this State, died at the Bridgeport hospital, June 24, at the age of

45 years. He had been in failing health for several months, and will be missed by many Ansonians. For many years he visited the towns along the Naugatuck valley. Matofsky traveled as far north as Torrington, and usually spent two or three days in Ansonia every month.

Canada Notes.

H. A. Burns, Morris, Man., has removed to Vernon, B. C.

R. E. Hunter, Hamiota, Man., has moved to Outlook.

H. D. Weaver, Vancouver, B. C., closed out his business.

H. Willey, Nelson, B. C., has sold business to E. E. Robinson.

The Hall Mfg. Co., Ltd., Toronto, Ont., was assigned to the Trust & Guarantee

E. Pommier, Sudbury, Ont., has given chattel mortgage for \$800 to G. W. Field.

J. L. Theriault, Pembroke, Ont., given a bill of sale for \$325 to J. Wright.

W. W. Smith, London, Ont., has signed to the London & Western Trust Co., and a meeting of creditors was called for June 29.

Fred A. Kent and J. Louis Papin, representing Ambrose Kent & Sons, Ltd., Toronto, Ont., have gone to New York on a buying trip.

Harris Michalson, president of I. Michalson & Sons, Ltd., gem merchant, Montreal, left for Europe, June 19, on a semi-annual purchasing trip.

Georgina Payne, a colored actress, pleaded guilty to stealing rings from a store of Meyer Moss, 70 Queen St., Toronto, Ont., was sentenced to 20 days' imprisonment. Thomas Delaney, charged with receiving stolen goods, was sentenced for 30 days.

The campaign of the Montreal Y. M. C. A. to raise \$300,000 in order to build in addition to the main building and construct branches, was brought to a successful conclusion on Tuesday, June 22, subscribers to the amount of \$320,000 being pledged. The largest subscription was that of H. Birks & Sons, Ltd., for \$25,000.

Baltimore.

Arthur C. Macy has established himself in his fine new quarters at 206 N. Charles St.

The large silver punch bowl that was presented to Theodore F. Krug, the retiring president of the Builders' Exchange, is made by Jenkins & Jenkins.

The early closing movement is general throughout the stores located in the shipping districts. The stores close at 1 P. M. on Saturdays and at 5 P. M. on other days.

The mother of Charles C. Stieff, president of Charles C. Stieff & Co., died, Friday. She had been ill for several months and had been confined to her bed for several weeks.

J. Harry Norwig, of the firm of Stearns & Norwig, 325 N. Eutaw St., has just returned from an extended honeymoon, being visited New York State, Niagara Falls, Canada and Atlantic City. He was married the first of the month to Miss Margaret Struven.

Pittsburg.

George W. Biggs, who had been ill, has completely recovered.

W.M. Bonn, of W. M. Bonn & Co., who was in the east on a business trip, has returned to Pittsburg.

L.B. Mather, of Mather Bros., New York, was in Pittsburg last week visiting with his business acquaintances.

The stock of R. H. Dilley, Cambridge, Mass., bankrupt, is to be sold at public sale, to take place on Friday, July 3. The stock is valued at \$10,000.

Among the out-of-town jewelers in Pittsburg last week, were: H. H. Weylman, of St. Louis; Thomas Tomlinson, Charleroi; J. Leitzel, Scottsdale.

Charles F. Niemann, of Graf & Niemann, the happiest man in Pittsburg and is going around the cigars because of the loss of a fine baby girl in his home.

Pop Brenner, Monessen, Pa., and Miss Yedinsky, formerly with R. C. Adams Sons, Pittsville, were married June 25 at the home of the bride in Pottsville.

Mr. Mohr has opened a retail store at 115 1/2 Ave., his store being in the entrance to the Hippodrome. Mr. Mohr was formerly engaged in business in Liberty Street.

Rosenbaum & Co. have secured possession of the Hughes & Hacke corner at 115 Ave. and Market St., and will add more rooms to their already large establishment.

Mr. Cerf, of Sol Cerf & Co., who went to attend the graduation exercises of the University of Pittsburg, after making some purchases in the east. He was accompanied by Mrs. Cerf.

William G. Ingham, buyer for the Geo. B. Hart Co., who was a delegate to the National Association of Credit Men at Philadelphia, and who went from there to Atlantic City for a few days, is home again.

W. Grogan & Co. last week displayed handsome silver cups which were contributed by local golf enthusiasts in the Pennsylvania championship series games played at the Oakmont Country Club.

A large number of the local stores are closing at 1 o'clock on Saturdays. Most of the wholesale houses are doing the same. They will close at that hour until September.

Most all of the retail shops also are closing at 5 p. m. during the hot months. Jewelers deplore the trouble between the Great Northern Railway Co. and its employees, and the present controversy number of them.

They realize that the strike is detrimental to business. The situation looks gloomy for business interests, and it is expected that the trouble will soon be adjusted.

Rev. Wm. Ross Lloyd, in a sermon preached in his pulpit, Sunday of last week, made the statement that no progressive merchant, no matter what line of mercantile trade is followed, could be a success without reading some good newspaper, published in the interest of the community with which he is identified. He exhorted his audience that only by reading the newspaper can the business man keep abreast with the times.

John F. Roberts, president of the Jew-

elers' 24-Karat Club, Pittsburg, is anxious that the retailers and wholesalers of the organization get together and arrange a match game of ball between the members of the club. He makes this as a suggestion and would like to hear from volunteers, although Mr. Roberts himself does not wish to play in the game. He believes that the game could be arranged for a Saturday afternoon, for many retail stores will close at 1 p. m., beginning next Saturday, and all of the wholesale houses now close at that hour.

New Orleans, La.

Among the large contingent of Shriners from this city to the recent convention in Louisville, Ky., were Sam Hart, Louis Hausmann and Charles Greenberg.

Charles Greenberg & Co. will soon move to the other side of Canal St., and will take possession of the store formerly occupied by the A. M. Hill jewelry house.

B. Barnett is quietly laying plans to surprise his district. In the 27 years that he has been in business, he has never been outside of a radius of 300 feet. He has now leased the store adjoining his present quarters, 815 Poydras St.

The Hart Loan & Pledge Co., Baronne and Common Sts., is to extensively improve its business and store. The building adjoining has been leased, and the concern will throw the entire place into one store, and will make extensive alterations. The new fixtures will be handsome and modern. A striking new front will be put on the building.

Having recently purchased the property opposite the United States Mint on Decatur and Esplanade Sts., George Nami will establish a modern and handsome jewelry house. Mr. Nami expects to open about the first part of July, and in his business will be assisted by his wife and son. A complete renovation and remodeling of the store is in progress, and handsome fixtures and furnishings have been ordered.

Moise Waldhorn and his wife have been in Paris, and are now quietly enjoying a visit to his old home, in Goersdorf, Alsace, Germany, with Mr. Waldhorn's family. After their visit they will return to Paris, and to the other art centers in Switzerland and Italy, to gather treasures in antiques and novelties. On the return of Mr. and Mrs. Waldhorn, in the Fall, Maurice Levy, a member of the firm, will take a short vacation, and Sidney Morais will spend a short time on the Gulf coast.

There is always a great deal of activity and progressiveness in evidence at Leonard Krower's house. The eight traveling men are hustling to get out in their respective territory. The jewelry department is represented by Messrs. J. Garsia, J. T. Kirkland, M. Dorenfield and M. Goodman; the fancy goods and cut glass department by E. Magnus and W. Wolsch, and the optical department by W. T. Murphy and Oscar Gomez. Leonard Krower is contemplating a trip to the tropics, to prospect, and is mastering Spanish as a help to himself and his trade.

Among those who are not discouraged by the past few seasons of strenuousness are the jewelers of New Orleans. Every-

where there are signs of activity, enlargements in present quarters, or new places and locations secured. By Sept. 1 there will be several changes. Coleman Adler, now occupying a very fine store, has his time almost all absorbed in supervising the preparation of new quarters, a block from his present location, on Canal St. Mr. Adler, always ambitious, and far seeing as to the best location, will give to our people one of the handsomest and most thoroughly modern jewelry houses in the country.

J. R. Wood & Sons, New York, recently obtained a writ ordering the sequestration of 17 diamonds of the value of \$1,617, and one diamond of the value of \$375.05, which are in the possession of the French Novelty Co. The petitioners aver that the diamonds were left on memorandum in the possession of the defendant, together with three diamonds, valued at \$443.53, which latter have been returned. They aver that the defendants are holding their diamonds without warrant in law, and they fear that they will send them out of the jurisdiction of the court, and they therefore ask that the civil sheriff take and keep the jewels until the court can pass judgment on the matter.

Taking advantage of the many low rates there is beginning to be a perfect exodus of New Orleans people on western tours. Among the jewelry men Gabe Hausmann, of T. Hausmann & Sons, Ltd., accompanied by Sam Adler, with Coleman E. Adler, expect to start on an extensive tour through the West, embracing Los Angeles, San Francisco, Yellowstone Park and Kansas City. Mr. Hausmann must travel on strictly schedule time, as his return is of consequence, as the other member of the firm, Louis Hausmann, has already secured steamer; reservations for Aug. 5 from New York, from where he sails to join his family, consisting of Mrs. Hausmann and three children, who are touring Europe. The family are planning to meet in Luzerne, Switzerland.

Pacific Northwest.

T. J. Parker has located in the Rainey building, at La Crosse, Wash.

Robert Mansfield, Grant's Pass, Ore., is retiring from business and is holding a special sale.

Miss Edna Talcott, daughter of Mr. and Mrs. George Noyes Talcott, Olympia, Wash., was married, June 17, to Arthur Lamar Ostrander and Miss Veretta Talcott was also married, June 17, to James Edward Marble.

Visitors at the Seattle Exposition are witnessing a novel sight in one of the booths in the Machinery Hall and Liberal Arts building. A well known watch manufacturing concern, with a model manufacturing plant, has on display 1,200 watches that are keeping time. A machine to wind these watches had been brought out from the east, but it became damaged in transit and this work is being done by five Seattle girls. The five girls do nothing but wind watches and attract a great deal of attention.

Minda & Greenberg, Kansas City, Mo., have dissolved partnership, Hyman Minda continuing the business alone.

Quick Sellers

K & H Umbrellas
in
K & H Patent Boxes

Sell an

Advertised Line

Our patent boxes display the umbrella to utmost advantage as one piece is made shallow and rests like a trunk tray on the other piece, throwing the umbrella to the front. Other umbrella boxes are made deep, burying the umbrella.

A window display of these handsome boxes, filled with K & H Umbrellas will sell more umbrellas in less time than any other method.

FOR HOLIDAY TRADE the boxes add greatly to the appearance and value of a gift umbrella. They come in three designs—forget-me-not (blue flower on white background with blue taffeta silk ribbons); rose (pink flowers on gold ground, pink ribbons), and holly design (on white ground, red ribbons).

The boxes are strong and finely finished, lined with heavy enamel paper, and make a desirable receptacle in which to keep a fine umbrella permanently.

Sold at close price to Jewelers handling the K & H line. Write for sample dozen.

K&H

**QUALITY
UMBRELLAS**

The Jeweler's Line

It takes a jeweler to appreciate the fine hand tooling and other beauties of K & H goods, such as 28 gauge Sterling and 22-K. color gold handles warranted not to show black seams—exclusive K & H features. Also closest roll, strongest detachable handle, most serviceable silks. K & H Umbrellas are guaranteed in every particular.

We do not solicit department or dry-goods store trade.

K & H goods will be nationally advertised this fall in the foremost magazines, with a total of over two and a half million readers.

This will stimulate demand for K & H Umbrellas.

“Cash in” on it by selling the K & H Quality line. We turn over to you names of parties in your locality who reply to our advertising, and furnish free a number of effective sales help booklets, newspaper electros, window cards, etc.

Write for samples or further particulars

Kreis & Hubbard MAKERS
Cor. Jackson and Franklin Sts. **Chicago**

Philadelphia.

E. Deull, Pottsville, Pa., made a special trip to this city last week to enter his daughter at the Horological School. Miss Deull will take a course in engraving.

Harry Lanz, with A. C. Cowan, Boston, Mass., has returned from a two weeks' stay at Atlantic City, where he went to recuperate from the effects of an operation.

John Oliver, of J. & R. Oliver, Burlington, N. J., expects to occupy his new home, which he has been building on the outskirts of Burlington, some time this month.

F. L. Davis, 5143 Market St., offered his store as the headquarters for the Business Men's carnival, which lasted from June 22 to 24. Mr. Davis is president of this association.

Mr. and Mrs. Francis Gluckert will visit Mr. Gluckert's old home at Mianz, Germany, and will be absent about three months. Mr. Gluckert has charge of the art department for J. E. Caldwell & Co.

J. E. Caldwell & Co. have had on display in their windows the prizes for the sociability run of the Century Motor Club, June, 27. They also displayed the silver cups presented by the Wilmington, Del., Country Club at the annual tennis tournament, June 24 to 26.

L. P. White, a well-known jobber of this city, has the sympathy of his many friends in the jewelry trade, owing to his recent accident. Mr. White has been suffering a severe sprain of the ligaments of the knee due to a slip and fall, and not to an automobile accident as previously reported.

James Steed, of S. 70th St., W. Philadelphia, was arrested last week and held in \$1,000 bail for a further hearing by Magistrate Harris. Steed, in the guise of an upholsterer, visited a number of houses in this section and committed many robberies. The arrest of the man followed his efforts to dispose of a diamond valued at \$500 for \$150 to D. W. Lauback, 7038 Woodland Ave.

During the past two weeks the jewelry parlor of Joseph Kern, located on the second floor at 719 Market St., Wilmington, has undergone extensive alterations. The store has been enlarged and the repair department moved back to the Shipley St. end, separating the two. This was done owing to the increase of business in the repair department and to facilitate the new system inaugurated in the quick handling of work.

Eugene Miller, who is charged with the theft of \$1,500 worth of jewelry from the store of S. J. Lyons, 2258 N. Front St., was brought from Jamestown, N. Y., to this city last week by Detectives Walsh and Garr. Miller admitted taking the jewelry but declared the amount not as great as that which had been charged against him. When found he told the detectives where to find the greater part of the jew-

elry and declared he would pay the balance due.

Joseph T. Bailey, of the Bailey, Banks & Biddle Co., has been in Pocomoke, Md., supervising the building of a \$6,000 yacht at E. James Tull's marine railway. The yacht is 65 feet long, 17 feet beam, and draws three feet of water, with a 30-horsepower engine. The boat has been named *Manetto*, and is commanded by Captain Kohler. The yacht will be used in the east in the Summer, and in southern waters in Winter. Mr. and Mrs. Bailey expect to sail from New York in October for Europe.

The following jewelers were visitors to this city during the week: Frank Kline, Spring City, Pa.; Maurice Hunter, Beverly, N. J.; H. P. Kratz, Souderton, Pa.; E. Allez, Millville, Del.; D. H. Krause, North Wales, Pa.; E. K. Bean, Lansdale, Pa.; H. B. MacFarlan, E. Downingtown, Pa.; Calvin Soliday, Lambertville, N. J.; F. C. Entriiken, Kennet Square, Pa.; A. E. Baylies, Bristol, Pa.; R. W. Lincksall, Mount Holly, N. J.; John MacPherson, Mauch Chunk, Pa.; Rolland Oliver, Burlington, N. J., and George Bitner, Altoona, Pa.

Members of the Merchants and Travelers' Association are elated over the success of their committee, which is arranging a plan of refunding railroad fares to buyers from out of town. The plan was first tried last Spring. Only 23 firms took part yet the claims for the refunded fares which were presented with vouchers attached showed that \$100,000 worth of business was done with buyers who took advantage of the offer. There are 25 wholesale and manufacturing jewelers interested. The season will probably begin some time in July.

Savannah, Ga.

Arthur N. Tichenor, with C. F. Rump & Sons, Philadelphia, Pa., visited this city, recently.

R. Van Keuren, of A. Van Keuren & Co., left, last week, for a visit to the Alaska-Yukon Exposition.

On last Thursday the Mayor and Aldermen of the city of Savannah presented to the U. S. revenue cutter *Yamacraw* a handsome silver and glass service, which was designed by S. E. Theus, of Theus & Co. The service consists of a large punch bowl with engraving of rococo design, two silver trays and a dozen cut glass tumblers. The punch bowl is engraved on the front with the following inscription: "Presented to the U. S. Revenue Cutter *Yamacraw* by the City of Savannah, 1909." It is said that no other municipality in the history of the revenue service has presented to one of its vessels a silver service.

A graphic description of the development of the business of the S. T. Little Jewelry Co., Cumberland, Md., accompanied by an interior and an exterior view of the establishment, appeared in a recent issue of a local daily. The business was started in 1849. The officers of the company are: President, R. W. Little; vice-president, P. J. Seaver; secretary, John G. Lind, Jr.; treasurer, C. G. Smith. The directors are: Harry E. Webber, James W. Thomas and Robert MacDonald.

Providence.

Charles H. Ballou, of C. H. Ballou & Co., celebrated the 21st anniversary of his wedding, June 21, in a quiet manner.

Mr. and Mrs. A. Tingley Wall have announced the engagement of their daughter, Helen, to E. Donaldson Clapp, Chicago.

J. C. Doran & Sons have just been granted a patent on a belt pin and are engaged in getting out a full line of samples.

William A. Bartlett is on a business trip among the trade of the middle west in the interests of the Stafford Ring Co., this city.

Mayor Henry Fletcher distributed the diplomas to the graduates at several of the public schools of the city during the past week.

Mr. and Mrs. Howard D. Wilcox and family left, last week, for Barber's Heights, where they have taken a house for the summer.

The die cutting department of the Gorham Co. is driven to its full capacity, and considerable work has to be sent to cutters down town.

Mr. and Mrs. George H. Cahoone and daughter, Miss Edna H., sailed, June 19, from Boston on the *Cymric*. They will spend the Summer abroad.

W. R. Cromweed, designer, engraver and

die cutter, has removed from 151 Pine St. to 129 Eddy St. into larger and more commodious quarters.

The directors of the Manufacturing Jewelers' Board of Trade held an adjourned meeting, June 22, at which five new members were admitted.

Charles E. Haskins, who was a prominent manufacturing jeweler in this city about 40 years ago, died, last week, at his home in Rehoboth, Mass., in his 83d year.

J. M. McCarthy & Co., Main St., Woonsocket, has been conducting a big special sale of watches purchased of the receivers of the Joseph Brown Co., Chicago.

Col. and Mrs. Samuel M. Nicholson and their family sailed, July 27, on the *Kaiser Wilhelm II.*, from New York for Europe, where they will spend the summer.

Mayor Henry Fletcher will be one of the guests of Gen. Nelson A. Miles, U. S. A. (retired), and President Frederick Hamilton, at the Narraganset Hotel, June 30.

Milton and Frederick Sulzberger, of Sulzberger Bros., recently attended the funeral of their brother, Clifford E. Sulzberger, who was a jeweler, in New York, last week.

Joseph Lake has severed his connection with the Theodore W. Foster & Bro. Co., this city, as its New York representative, to accept a position with the Gimmel Mfg. Co., Brooklyn, N. Y.

The Shepard Mfg. Co., Melrose Highlands, Mass., has been advertising in the papers of this city for a die sinker who has had experience in cutting dies for souvenir spoons and enamel work.

Clarence M. Dunbar, George H. Grant and Edgar C. Lakey were members of the committee of arrangements for the annual June outing of Palestine Temple of the Mystic Shrine, Monday last.

John H. Stone, of Peacock, Stone & Markham, presented to his son, Ralph Kenneth Stone, who was in the senior class at Classical High School, a cruising power boat as a graduation present.

The Gorham Co. has received through G. J. Kray, San Antonio, Tex., the award for the silverware for the new Hotel Gunter, to be opened in that place. The contract will amount to \$28,000.

Mr. and Mrs. Samuel K. Grover will celebrate the 25th anniversary of their marriage, with a reception at Roger Williams Park Casino, Friday evening, July 2, from eight to nine o'clock, followed by dancing.

Owing to the absence of so many members from the city, there was no quorum at the meeting of the Advisory Council of the New England Manufacturing Jewelers and Silversmiths' Association, Thursday afternoon.

Mr. and Mrs. Frank B. Reynolds and their daughter, Miss Carolyn A., attended the graduation exercises at Cambridge, Mass., the past week, where R. Foster Reynolds, a senior at Harvard College, and a son of Mr. Reynolds, was one of the graduates.

The case of Stevens & Co., Inc., against Ned C. Stiles, was called before Presiding Justice Tanner in the Superior Court, last week, and was held for further consideration. This is a bill in equity to enjoin the respondent from interfering with the complainant's business as opticians.

Edwin C. Bliss, of the E. C. Bliss Mfg.

Co., was re-elected president of the Jewelers' Association of Mechanical Engineers at its annual meeting, the past week. Horace H. Lowell, of the United Wire & Supply Co., and K. A. Juthe, of Wheelock, Love & Co., were elected members of the board of councillors.

Representative Adin B. Capron forwarded to the Navy Department a few days ago the nomination of Horace H. Lowell, Woonsocket, for entrance into the Naval Academy at Annapolis. Jalbert, the son of Joseph Jalbert, of the retail jewelry firm of Jalbert & Farrington, Woonsocket. He was born in that city June 1891.

William B. Streeter, a well known member of the Edgewood Yacht Club, has preferred silver medals for the most proficient boy and girl swimmer in the Providence public schools, below the high school grades. Mr. Streeter, who is a manufacturing jeweler, makes the offer in the hope that every boy and girl should learn to swim.

The employes of the Tilden-Thurber to the number of about 80, held their annual outing, Saturday afternoon, at Buttonwoods on the east side of Narragansett Bay. The party went to the resort by special electric cars, at two o'clock, and the afternoon in sports and a baseball game followed by a bake. The return was early in the evening.

It is said that the quarterly dividend declared on Nicholson File Co. stock, payable June 30, is three and one-half per cent. or one per cent. more than the quarterly dividend paid March 31. The corporation contrary to its usual policy, has not advertised the size of the current dividend, simply announced "a dividend on the total stock of this company."

Albert W. Coodcock, general manager of the William R. Brown Co., this city, obtained the heads of the departments of the firm at his Summer cottage at River Point on Sunday afternoon, June 20. The guests upon their arrival, were escorted to the lawn, where a chowder was served. In the day a clam dinner was in order, followed by music and other diversions.

Michael P. Connor, 27 years of age, known among the manufacturing jewelers of this city, died recently. He received education in this city, and then entered the employ of Heimerger & Lind and continued with their successors, Heimerger & Pearson, for a long time. He was previously employed by the Thomas W. Co., George F. Greene & Co., and others.

The members of Silverman Bros' Mutual Relief Association enjoyed a field day at the Old Country Club grounds, Pawtucket, last week. Two large barges were taken into requisition and were fantastically decorated for the occasion. The party, which numbered about 85, including the members of the firm, proceeded to the grounds, in the afternoon, and games of various kinds were prominent features of the afternoon's sports.

Horace H. Jalbert, Woonsocket, who has been nominated for entrance into the Naval Academy at Annapolis by Representative Adin B. Capron, and on the recommendation of Gov. Aram J. Pothier, is a son of Joseph Jalbert, of Jalbert & Farrington, Woonsocket.

He will be 18 years old July 19, and is now in his third year in the Woonsocket high schools. In three practice examinations, which he took last year, he made an average of more than 95 per cent.

S. Cumerford and family have taken a cottage at Longmeadow for the Summer.

Employees of the case and box department of the Gorham Co. held an outing at Weyden's Heights, Saturday, at which they thoroughly enjoyed themselves.

White has been granted a permit to erect a three-story manufacturing plant for factory purposes on Public St. The building will be 37 feet by 40 feet on the ground.

Charles W. Battey has opened his cottage at Oval Ave., Conimicut, for the season. Last week he entertained Dennis Gleason, of the Robinson-Norton Co., of Louisville,

where W. Barrus, with the Gorham Co. selected National Council Inside Guard for the recent annual convention of the National Council, Junior Order American Mechanics, at Detroit, Mich.

Friends of Samuel A. Baldwin honored him at a party held on his 71st birthday, Friday evening, in the Franklin. There were 14 in the party. The table was decorated with 71 carnations, one for each year of his life, and the huge birthday cake which featured the centerpiece was inscribed with the legend "1838-1909."

Among the jewelry buyers who have been catered at the hotels in this city, the past week, are the following: D. J. Gleason, of the Robinson-Norton Co., Louisville, Ky.; J. H. Inswanger, of Siegel, Cooper & Co., Chicago; Max Weiner and A. Kaskel, of the Weyer Bros., New York; A. Kingsbacher, of the Kingsbacher Bros., Pittsburg, Pa.; W. H. Bloomfield, of Bloomfield Bros., New York; Carl Rosenberger and Paul Rosenberger, of Cohn & Rosenberger, New York; and the Kiger Jewelry Co., Kansas City, Mo.

Among the foreign importations received last week, through the Providence Custom House were the following: From Bremen, two packages of silverware, one of jewelry and eight of imitation precious stones; from Hamburg, four packages of manufactures of metal; from Havre, one package of jewelry, one of manufactures of metal and one of imitation precious stones; from Liverpool, one of manufactures of metal; from Southampton, two packages of manufactures of metal.

Robert Edward Tickell, who is associated in the bronze department of the Gorham Co. and also a member of the firm of Hill Bros., was married June 22 to Miss Arlene E. Kennedy, the ceremony taking place at the St. Charles Church, Woonsocket. Following the service at the church, the families of Mr. and Mrs. Tickell enjoyed a wedding breakfast at the home of the bride's parents, 51 Collin St.,

Woonsocket. The wedding trip was made in an automobile, and at its conclusion the couple will live in their bungalow at Oakland Beach.

The strains of stirring music filled the sultry air, last Friday morning, and the crowds in the down-town section saw a small company of marchers, carrying banners and parasols, hotfooting it over the scorching pavements. The parade made almost a beeline for the water front, where the steamer *Pontiac* was boarded and the heat of the day was forgotten in a long, cool sail down the bay to Tiverton. The paraders were the employes of the Ostby & Barton Co., who gathered in front of the shop, in the morning, and went on the annual outing of the Mutual Benefit Relief Association. At Tiverton a baseball game was played and other sports were held. A fine dinner was served, and it was late in the evening before the party again landed in this city.

Attleboro.

Charles Downs, New York salesman for the Bristol Mfg. Co., has resigned his position.

Mrs. W. C. Tappan is reported as very much improved, and was able to sit up last week.

The Leach & Garner Co. hopes to occupy its new building on Pearl St. by the first part of August.

Last Friday Mr. and Mrs. John Cunningham quietly celebrated the 25th anniversary of their marriage.

The Freeman-Daughaday Co., at Chartley, was forced to work evenings last week in order to fill its orders.

R. B. MacDonald, of the firm of R. B. MacDonald & Co., spent last week in New York on a pleasure trip.

Frank A. Chace, who is western representative for the C. M. Robbins Co., was in town, last week, with his wife.

John M. Fisher has been appointed a member of the committee in charge of arranging for a celebration, July 4.

Lawrence Robbins and Lawrence Keeler, sons of prominent jewelers, acted as aides at the reception of the high school last week.

The factory of the R. F. Simmons Co. will be closed from Saturday, July 31, to Monday, Aug. 9. It is thought that a number of the other jewelers of this town will close at the same time.

Harold E. Sweet presented, last Thursday, the beautiful silver loving cup which he offered to the winning ball team in the Bristol League to the North Attleboro high school team, that lost only one game.

The Board of Trade met, last week, and received a report of the committee in charge of the new factory for the Mossberg Co. It was reported that the building would be completed in November and could be occupied by December.

The Horton-Angell Athletic Association enjoyed its annual outing, last Saturday, at the Warwick Club, on the Narragansett Bay. There was a ball game and sports of various nature. Special cars carried the members to the club house.

H. P. Wilmarth, treasurer of the W. D.

Wilmarth & Co., has filed the following corporation report: Machinery, \$3,300; cash and debts receivable, \$8,219; manufactures and merchandise, \$10,215; merchandise, \$1,237. Capital, \$14,000; accounts payable, \$1,178; profit and loss, \$7,793.

John M. Fisher is leading a vigorous fight against the placing of liquor advertisements on bill boards in Attleboro. Last Saturday he caused one big sign to be removed, much to the annoyance of the bill poster, who says it will go back. Mr. Fisher is confident that it will not, and declares all similar signs will be removed from Attleboro.

An alarm from box 9 called the fire department out Monday, June 21, for a slight blaze in an acid flue leading from the factory of William Nerney & Co. in the wooden building on Union St., next to the D. F. Briggs Co. factory. Quick work on the part of Raymond Riley and Cyrus Dickinson, who has charge of the boiler room in the Briggs building, caused the fire to be rapidly extinguished before any serious damage was done.

Nathan Marcus, a jeweler of Providence, was arrested, last Wednesday, at Hebronville, for peddling without a license. He had a valise of watches which it is claimed he was retailing from house to house. Marcus denied in court, Thursday, that he was peddling, and said that he was only taking orders. The case was continued until Saturday, and he was placed under \$100 bonds, which was furnished by Harry R. Holbrook, a jeweler of this place. In court, Saturday, the case was placed on file.

Charles H. Eden, of the C. H. Eden Co., has returned from an extended stay in Germany and France, where he has been studying the conditions in the jewelry factories of those countries. Mr. Eden returns home more optimistic than ever that the jewelry manufacturers of America will always stand supreme. He bases his convictions on the fact that the German jewelers to-day make the greater part of their jewelry by hard labor instead of using the labor-saving machines that are utilized in this country. While in Germany Mr. Eden devoted much time to the examination of the conditions at Pforshheim.

Atlanta, Ga.

A new jewelry business has been established at 4 West Mitchell St. by the Goldin-Levy Jewelry Co., the proprietors of which are David Goldin and J. Levy. Mr. Goldin is now in the harness business, and Mr. Levy, who will be general manager of the store, is a practical jeweler, watchmaker and silversmith, who also conducts a jewelry store in Savannah.

William Lewis, well known in the jewelry trade through his connection with Schaul & May, 21 Peachtree St., was run down by an electric car in Washington, D. C., June 18, and was taken to the Emergency Hospital, suffering from a fracture of the skull and internal injuries. Mrs. Lewis, being notified, hurried to Washington, accompanied by her six-year-old daughter. Word received by Henry Schaul later from Washington stated that Mr. Lewis' condition was improving, and that he was on the road to recovery.

North Attleboro.

Alpin Chisholm enjoyed a few days' vacation at the Cape, last week.

J. J. Sommer has placed a large flag over the factory, bearing his name.

Oscar H. Hornig is traveling through Connecticut in the interests of the Codding & Heilborn Co.

Frank Whiting, western salesman for Whiting & Davis, has returned to Chicago after a trip to the coast.

Walter C. Sherman, western salesman for the Estate of O. M. Draper, spent Sunday at Brant's Rock on the Cape.

The factories in the Robinsonville buildings were closed, Wednesday, on account of the funeral of Frank Surdy.

Daniel Chisholm returned, last week, from a western trip, where he has been in the interests of the Bugbee & Niles Co.

The marriage of Leroy Metcalf, son of W. S. Metcalf, of the Plainville Stock Co., and Miss Ethel Barber will take place today.

Notices have been received by the creditors of Percy Callowhill to the effect that his petition in bankruptcy will be considered in the United States Circuit District Court, July 6.

Herman J. Grover, a native of this town and the son of a retired Providence jewelry manufacturer, was married, last Wednesday evening, by Town Clerk James Cheever, of this town, to Miss Selma Loeb, of Albany, N. Y.

The employees of the Webster factory will hold a field day, July 17, at Boyden Heights. A committee has been appointed to have charge of the affair. A program of athletic events is being arranged, and a ball game between two rival teams in the shop will be played.

W. W. Sherman, treasurer of the H. D. Merritt Co., has filed the following corporation report: Machinery, \$29,598; cash and debts receivable, \$77,768; merchandise, \$25,000; good will, \$20,000; total, \$152,366. Capital, \$100,000; accounts payable, \$7,135; surplus, \$16,547; profit and loss, \$28,684; total, \$152,366.

A. H. Riley, treasurer of the G. C. Hudson Co., has filed the following corporation report: Machinery, \$17,279; cash and debts receivable, \$50,325; manufactures and merchandise, \$13,526; merchandise, \$11,878; good will, \$15,000; total, \$108,000. Capital, \$100,000; accounts payable, \$2,415; profit and loss, \$2,959; total, \$108,008.

The Bishop Chain Co.'s annual corporation report has been filed by A. S. Bishop, the company's treasurer, as follows: Real estate, \$400; machinery, \$3,263; cash and debts receivable, \$11,637; merchandise, \$10,615; patent rights, good will and trademarks, \$5,000; total, \$30,915. Capital, \$20,000; accounts payable, \$3,659; profit and loss, \$7,256; total, \$30,915.

E. C. Bliss, of the E. C. Bliss Mfg. Co., Providence, who was elected president of the Providence Association of Mechanical Engineers, has acquired considerable distinction in mechanical matters by his improvements and inventions in tools and machinery, chiefly along the line of jewelry tools. He is a native of North Attleboro, and is the son of Anthony H. Bliss, of this town.

Mr. and Mrs. Albert W. Burton observed the 53d anniversary of their marriage, Tuesday, June 22, in an informal way at their residence in Plainville. During the day several of Mr. Burton's comrades of the 14th Battery of the Light Artillery were present to assist in the celebration. During the past year Mr. Burton retired from the Plainville Stock Co., with which he was connected for so many years.

The funeral services of the late Frank M. Sturdy took place, last Wednesday afternoon, from his late residence on Commonwealth Ave. The men employes of the J. F. Sturdy's Sons Co., numbering about 50, attended the services in a body. The floral tributes were numerous and very beautiful. The bearers were William Fisher, William Bell, Charles O. Mason and E. Perry. Interment was in Mount Hope Cemetery.

Buffalo, N. Y.

Ezborn Wheeler recently took charge of the clock-repairing department of T. C. Tanke's jewelry store, 378 Main St.

Mr. Frisch, of Frisch Bros., 443 Genesee St., will leave Buffalo, July 31, with the 65th regiment to camp at Farnham for field service.

Louis J. Heintz, of Heintz Bros., manufacturing jewelers, has returned from New York, where he went with the Buffalo Saengerbund.

E. A. Eisele, of King & Eisele, is away on a three weeks' automobile trip through the New England states, New York and Pennsylvania.

The Buffalo Retail Jewelers' Association members have decided to close their places of business at 6:30 p. m. three days a week during the hot weather.

Among the original promoters of the recently organized Retail Jewelers' Social Club, Elmira, N. Y., is Louis F. Bally, a well-known jeweler of that city.

Simon Cohen, 331 Main St., was prominent at a recent meeting of the Knights of Joseph at a memorial service. The service was held in the rooms of Electric City lodge No. 8.

Much interest was centered in the prizes which were given to the students of Canisius College at their recent commencement. The medals were provided by Schutt & Petersen, 137 Genesee St.

It is reported that the buildings of the Laurel Cut Glass Co., Jermyn, near Scranton, Pa., were destroyed by fire, recently, together with much finished stock. The loss will amount, it is estimated, to \$80,000.

Enoch L. Cordery, the Fort Meade, Fla., man who shot Albert Hansen, a setter employed by Heintz Bros., Buffalo ring manufacturers, was fined \$250, last week, for killing his friend, Harry Carr, of Syracuse, here last Christmas night. Cordery had been celebrating on Christmas.

Among the jewelers who visited the Buffalo market, last week, were: P. M. Riley, Holland; A. W. Kelsey, Franklinville; Mrs. Fuller, Silver Creek; S. S. Prentiss, Lockport; B. M. Frary, Medina; H. S. Britting, Williamsville; C. D. Barnes, Gowanda; J. J. Carr, Niagara Falls.

Jerome Scherer, 1382 Fillmore, Ave., has issued some novel advertising cards. On the cards is a picture of Mr. Scherer and

two of his children climbing a hill in the country near Buffalo. On the bottom of the card in German is the quotation: "Ho is the wanderer's staff from the cradle to the grave."

Joseph Spengler bought a pawn ticket from Mrs. Elizabeth Davis on the pawnshop of Meyer Brown, 136 Seneca St. A few hours later he had Mrs. Davis arrested on a charge of larceny. Spengler obtained the ring from the pawnbroker, and then informed by diamond experts that it was not worth over \$30, while he had paid for the ticket, and enough charges to bring the price up to \$98.50. The case was called in police court soon.

Deck & Wolf, manufacturing jewelers, 116 Franklin St., recently refinished crosiers for Bishop Colton. They also hauled and refinished a chalice for P. Kennedy, of St. Patrick's church. The chalice, which Mr. Deck says is one of the most beautiful he has seen, stands 19 in. high and is of solid silver. It is decorated with a grape-vine design in relief. The firm recently supplied a handsome silver cup for the University Club of this city to be given to the champion in their tournament.

On July 1 the new law requiring jewelers who practice optometry to pass an examination, unless they have filed a certificate of exemption, goes into effect. The law was supposed to become active January 1, but many of the jewelers neglected to file their certificates, and the Buffalo Retail Jewelers' Association started an agitation which ended in a six months' extension of time in which jewelers could file their certificates. Secretary Schutt of the local association, says that several Buffalo jewelers had not filed their certificates until recently, and urges any who neglect to get their applications in before the time limit is up.

Louis Freed, 26 years old, is under arrest here on a charge of grand larceny of the second degree. It is alleged that he substituted some diamonds at Dunkirk for a worthless stone for a diamond. In connection with the case it is also said that Freed was very clever in switching watches. Freed's scheme, it is alleged, was to offer a watch for sale to a stranger and then take the victim to a jeweler and have him certify that the watch was of the value represented. When the man had paid over the money for the watch and Freed had gone, the alleged victim would discover that the watch he had bought was not the one examined by the jeweler.

Joseph Garibaldi and W. L. Brunson & Garibaldi, Bruns & Dixon, Charlotte, N. C., recently purchased the property at 15 S. Tryon St., that city, for \$35,250. The property has a frontage of 22 ft. 4 in. and a depth of 55 ft. 2 in., and on it the owners will erect a magnificent five-story building to cost about \$50,000. When the building is complete the lower floor will be occupied by the business of Garibaldi, Bruns & Dixon, which is now conducted at 14 on the same street. According to the present plans, the new building will be of forced brick with a steel frame and granite front.

Newark.

Frank Otley, of Riker Bros., is in from a long trip.

Thomas H. Leake, representing Adolph Rosenberg, has left for an extended trip through the South.

Wald Dietz, enameler, 46 Oliver St., left for Europe, recently, on a two months' business trip.

H. Keller & Co., Chestnut St., are putting on extra help. The season has been unusually brisk with them.

Henry George Alsopp, of Alsopp Bros., returned from an extensive trip. His business is improving.

Victor L. Kurtz, of the firm of Adolph Rosenberg, Newark, has returned to Philadelphia and is ready for Fall trade.

Leithoff, of Stevens & Leithoff, has left for Europe for a three months' pleasure. He is accompanied by his family.

Benjamin J. Mayo, 645 Broad St., with wife, is spending a vacation at Atlantic City. They are staying at the Phillips.

John S. A. S. Jacoby, who for several years operated a retail store at 526 Broadway, Newark, N. J., is now located at 272 Market Street in this city.

Rech, of C. Rech & Son, 481 Washington St., has sailed for Germany, where he will visit his aged father, who just celebrated his 96th birthday.

Van Ness, of the American Oil & Gas Co., has returned from a business trip of Canada and the West. He reports an encouraging outlook.

Warren Granbery, manufacturing jeweler of this city, has entered his motor boat, "The II," in a race from New York to Philadelphia, Mass., that is to be run in the next few days.

John Harris has been admitted to the partnership of Huber & Weisgerber, 112 Arlington St. They will continue at the same location under the firm style of Huber, Weisgerber & Harris.

R. Burnett, of the American Oil & Gas Co., is back at his desk after attending the big credit men's convention in Philadelphia, Pa. Among the few jewelers who met there was Mr. Smith, of King & Sele, Buffalo.

Henry Rudolph, for more than 40 years a man in the enameling department of Dund & Co.'s factory, has severed his connection with that firm and will soon start an establishment of his own. He is considered one of the finest enamellers in the country.

Samuel H. Schoonmaker, who has been identified with the jewelry trade in Paterson, N. J., for many years, has opened a jewelry store at 168 Market St., in the Knickerbocker building. Mr. Schoonmaker has been engaged in the fitting up of his store for a month or more.

Whiteside & Blank are increasing their facilities by taking two floors in the big building at Lafayette and Liberty Sts., which will be fitted out with the best equipment. The firm has taken over the Elm Street Co.'s quarters, and now have three floors devoted to their business.

George A. Alsopp, Jr., has just returned from a trip to Chicago, and will stay in

town several weeks. He brought with him optimistic reports of trade conditions in the west. Reports of the same character are made by Leon D. Reynolds, Mr. Schaefer and Mr. Douglass, who have just returned from extensive trips for Wientge & Co., Marshall St.

Henry Thierauf, 23 years old, a jeweler, of 364½ Central Ave., died, June 19, near Mt. Lebanon. He was the only son of the late George Thierauf, of Newark. He had been ill the past two years. Last March his mother rented the Samuel Waters lot, near Mt. Lebanon, and moved there in the hopes that the mountain air would afford relief to the young man. For a time he greatly improved, but last week a relapse proved fatal. Funeral services were held Monday night of last week, and the body was removed to New Brunswick for burial.

B. Braunstein, the Hoboken, N. J., jeweler, failed to put in an appearance when his case was called before Referee in Bankruptcy E. R. S. Mann, Jersey City, last week. It was said at the hearing that personal service could not be made on Braunstein, who was reported to be in a sanitarium at Poughkeepsie. His wife testified that she did not know much about her husband's business. Some years ago, she said, she ran the business when her husband went to Europe, but was not aware of the daily receipts, which were handled by a clerk. Neither did she know anything about the disbursements. She was questioned concerning a transaction in which her husband had deeded some property to her mother. She said that her mother had loaned Braunstein money, and that when he deeded the property her mother surrendered the notes she held. The creditors are protesting that this transaction made Braunstein's mother-in-law a preferred creditor. Mrs. Braunstein also testified that Braunstein had taken from her all the jewelry he had given her except one diamond ring. Another hearing will be held later.

Boston.

Parker Ridler has been ill at his Somerville home.

E. W. Byram has returned from a business trip in Maine.

James Curley, who has been in Seattle on business, has returned to this city.

P. H. Ackerman has returned to business, after having been confined to his home because of a slight surgical operation.

Edward E. Hardy, a member of Boston Commandery, Knight Templars, was with that body on its three days' outing at Lake Sebago, Me.

John Pierce, South Paris, Me., accompanied by Mrs. Pierce, was in Boston, last week, on a trip in which he combined business and pleasure.

A. Shirley Kelly and Henry W. Clark enjoyed, as Knight Templars, the outing at Portsmouth, N. H., last week, of the Melrose and Malden commanderies.

Mrs. Mollie E. Howe, Littleton, N. H., was in town last week, buying stock for her store in Bethlehem, N. H., the famous White Mountain Summer resort.

A. R. Harmon, of the London office of the Waltham Watch Co., arrived in this

country, last week, and went directly to his Summer home at Prouts Neck, Me.

Among the jewelers in town last week were: George W. DeMars, Lawrence; H. A. Wippich, Provincetown; H. K. Cummings, Orleans, Mass., and J. E. Stephens, Rumford Falls, Me.

Walter B. Snow's young daughter, Dorothy, was graduated Friday evening from the Oliver Wendell Holmes grammar school, Dorchester, and took a prominent part in the exercises on that occasion.

Mr. and Mrs. Winthrop E. Pratt celebrated their fifth wedding anniversary, Thursday evening of last week, at their home in Reading. The affair was as attractive as it was informal. Among the gifts received was a handsomely framed etching presented by Mr. Pratt's associates at the store of Daniel Pratt's Son.

The store of E. S. Clark, Sandwich, was threatened with destruction by fire in the big blaze which visited that Cape Cod town Wednesday morning of last week. The adjoining building was wiped out, and Mr. Clark moved his goods, fearing the same fate for his place of business. The firemen and citizens worked valiantly and saved the store.

David Bliss, formerly a dial maker in the Waltham watch factory, died Sunday, June 20, at his home in Townsend Harbor, Mass. He had been a resident of Waltham for many years and was well known and much respected. He was a member of the First Methodist church of that city and of Waltham lodge, A. O. U. W. His widow and two sons survive him. The burial was in Mt. Feake cemetery, Waltham.

The Waltham Watch Co.'s factory closed, Wednesday night of last week, for the annual vacation of three weeks, though a number of the jobs in different departments will work one week longer. Several marriages of employes took place, last week, among them the following: Wednesday evening Miss Florence E. Fraser, of the plate department, was married to Edward N. Cross, of the same department; Miss Mary E. McKin, formerly employed in the factory, was married, the same evening, to Pearley Dinsmore, at Medford, while on Thursday afternoon, Joseph E. Venno and Miss Ina Upham, both of the plate department, were united in marriage at St. Mary's church.

Thirty members of the jewelers' association of Boston enjoyed the organization's Summer outing, which was held Thursday of last week. In automobiles the party made a tour of the North Shore, taking in President William H. Taft's new Summer place at Beverly. At the famous Ferncroft Inn, Danvers, the club members put up their machines and engaged in baseball and other sports prior to dinner. E. E. Bentley presided at the after-dinner exercises, and among the speakers was ex-Mayor John F. Fitzgerald, who happened to be a guest at the inn and who dropped in to make an address. The efficient committee in charge of the outing was made up of Frank N. Nathan, C. E. Davis and S. W. Sharmatz.

Walter F. Robbins, Skowhegan, Me., has been succeeded by the Walter F. Robbins Co.

GORHAM LEATHER GOODS

A SEASONABLE SUGGESTION

¶ June, July and August are undeniably the "Travel Months" of the year, a fact which further suggests the increasing attention that is paid by people of refinement to the appearance and quality of their traveling equipments.

¶ For this reason the Gorham Company desire to call attention to the high character of workmanship, originality of design and the admirable quality of material displayed by the products of their Leather Goods Department.

¶ Especially notable is the assortment of Travelers' necessaries, including Kit and Club Bags, and Dress Suit Cases for both Ladies' and Gentlemen's use, either plain or fitted with toilet and traveling conveniences in Gorham Silver, Ivory and Turtle Ebony, also Dressing Rolls in a variety of Leathers and Fittings.

An Important Event in the Watch Trade.

ONE of the most important events that has occurred in the American watch trade for many years was the recent announcement of the Waltham Watch Co. (published in the last issue of THE JEWELERS' CIRCULAR-WEEKLY) to the effect that the company desired to market its product with the regular jewelry trade exclusively.

Though definite announcement of this policy of the Waltham Watch Co. was not made until June 15, it was generally known that the subject has been under consideration for some time past, and news that such announcement was to be made had leaked out some weeks before and was the subject of universal discussion.

In the general rejoicing throughout the retail trade over the fact that one of the biggest watch companies has taken such a step in their interest, there does not seem to be a full realization on the part of the jeweler of the seriousness of the action or of its exact effect on the trade.

In the meantime there are millions of mail-order catalogues now in the hands of the public that will remain until superseded by later editions. By reason of the listing of the Waltham watch in the present cat-

Advertising should not be regarded as an expense but as a business investment. Rightly done, it will produce good results.

alogues, these mail-order houses have obligated themselves to supply these articles at a stipulated price. What is more, these houses have large stocks of watches on hand, and if this is not sufficient to supply the demand many of the mail-order houses will keep to their contracts, even if they have to buy the watches at retail and lose on every one sent out.

Those who realize the enormous amount of business done by the 800 or more catalogue houses handling watches (two of the largest concerns in Chicago alone being credited with selling together over \$400,000 worth of watches a year) will appreciate the serious consideration that had to be given by the company to this subject before it determined to cut off all demand for its products from this field.

Whether or not the company's action will prove a success as a business policy can only be determined by time, and the result will also depend upon the co-operation which the concern gets from the trade in whose hands it is putting the selling of its product. It is a daring step, though one which we feel is made in the line of equity and justice.

Robbins, Appleton & Co., Boston, Mass., and Robbins & Appleton, New York, to-day announce that Royal Robbins and Reginald C. Robbins have this day retired from these firms. On and after to-morrow (July 1) the business of selling agents of the Waltham Watch Co. will be conducted by Ezra C. Fitch, Francis R. Appleton, James W. Appleton and Conover Fitch under the firm name of Robbins & Appleton in New York and Chicago and under the firm name of Robbins, Appleton & Co. in Boston and Montreal, as heretofore.

TRADE CONDITIONS.

The local jewelers have had a good deal of trade so far this month through the numerous weddings in city and county, and on account of the commencements of the score of high schools. But the general trade has not been so far. As the dull midsummer season is at hand, business revival is due before Fall.

Benjamin Ford is spending a week in Baltimore.

Frank T. Cook has gone to Cleveland, O., to spend a two weeks' vacation.

Harry Kaplan, Worcester, Mass., has been visiting Benjamin Lichtenstein.

Marcus Edelstein paid a visit to New York and Paterson, N. J., last week.

F. G. Fletcher, who is doing missive work for the Waltham Watch Co., paid an initial visit to Lancaster, last week.

Walter S. Haldeman, a well-known watchmaker, was married, last week, to Miss Kathryn S. Killian, also of Lancaster.

Robert B. Ringley, Reading, Pa., attended the recent State convention of the Soc. of Watchmakers, held in Lancaster. He has been a regular of the party for some years.

Among the jewelers who recently visited Lancaster were: C. F. Reitling, Cambridge, Pa.; Jonas Moore, Pittsburg; Emil J. Shall, Columbus, O., and David P. Chicago.

Charles D. Rood, president of the H. S. ton Watch Co., Sunday, gave the employees, more than 500 in number, a picnic at "Upland Lawns," near Lancaster, paying all expenses.

Considerable attention was attracted last week, to the display in the show case at Shaub & Co.'s store of the beautiful medals and cups won by the athletes of the Lancaster High School.

James F. Fairchilds, Lewisburg, Pa., attended his son, James F., Jr., at the Technical School, last week. Frank left the school, last week, to take a position as watchmaker and engraver at Poughkeepsie, N. Y.

A telegram received last Thursday from Seattle, Wash., announces the death of June 22, of Albert Foster, who went to the city about 10 years ago from Lancaster County and engaged in the jewelry business, from which he retired some time ago on account of ill health.

The newly elected board of directors of the Non-Retailing Co. organized by the following officers: President, H. Hostetter; vice-president, John W. man; secretary, Milo B. Herr; treasurer, Samuel D. Bausman. A. W. Moyer continues as general manager, a position he has filled many years.

The beautiful silver loving cup presented June 22, to H. S. Williamson, prior to his trip to Europe, by the Out-a-Day Club, was secured through Aug. Rhoads. Among the many business men who attended the presentation were: T. Wilson Dubbs and Aug. Rhoads, Dr. George R. Rohrer, J. Moyer, of the Non-Retailing Co., and Frank B. Fon Dersmith.

Willard B. Hammond, who has been with Eustis Bros., Minneapolis, for the past few years, has secured an interest in the business of A. B. Duncan, Portsmouth, N. H.

New York Notes.

Ehrlich, of Wolff, Ehrlich Co., Philadelphia, Pa., visited in town last week.

Luft, 392 Amsterdam Ave., has been moved to larger quarters at 380 Amsterdam Ave.

Julius H. Moss, 14 Maiden Lane, is visiting Philadelphia and Atlantic City this week.

Goldeneimer & Jaskow, 87 Nassau St., announce that they have given Louis A. Jaskow an interest in the business.

Tom Naigles, of Wm. Naigles & Co., 71 Nassau St., accompanied by his wife, returned Friday on the *Lusitania* from a trip to Europe.

The William B. Durgin Co., Concord, N. H., will remove its New York offices to the Silversmiths' building, 15 Maiden Lane, July 1.

A new wholesale jewelry firm has been organized at Minneapolis, Minn., under the name of Gruenberg Bros. Locker Co., and members of the firm are in town purchasing stock.

Henry Freund, of Henry Freund & Bro., 71 Nassau St., returned from Europe on Saturday of last week on the *Kaiser Wilhelm II.*, after a visit to the diamond markets of the continent.

Lewis Harris, of the Harris & Goldman Diamond Importing Co., St. Louis, Mo., returned from this port on the *St. Louis*, Saturday, in the interest of his firm. He will visit the European centers.

The E. A. Kennedy Co. has been incorporated to deal in jewelry and loans, with a capital of \$50,000. The incorporators are: E. A. Kennedy, 405 Pleasant Ave., New York; W. J. K. Kennedy, and Vivian Carmichael Merrick, L. I.

The firm of Wiener & Zilver, 45 John St., diamond cutters and polishers, are cutting a perfectly black diamond which weighs in the rough 6½ carats. They expect to have the diamond finished June 28, and say it will probably weigh when finished about 2½ carats.

B. Vitelli, of Borrelli & Vitelli, 401 Broadway, sailed Saturday on the *Venezia* for Naples. After a short visit to the factory in Torre del Greco, Italy, he will go to inspect the branches in Paris and London, and then will spend a few weeks in Casbad. Mr. Vitelli will return about the first week in September.

Friends of George W. White, who was connected with Wm. S. Hicks & Sons, 235 Greenwich St., New York, as a salesman, died last week that he died suddenly June 16, of heart failure, at the age of 37 years. He is survived by his widow. Funeral services were held on Friday the 18th. The interment took place at Woodlawn Cemetery.

Vincent Rice, who is in charge of the wholesale department of the International Ser Co. at 9 Maiden Lane, was married Monday in Albany to Miss Josephine Henza. The employes of the store presented her with a suitable gift. Mr. and Mrs. Rice will spend a honeymoon trip in the Adirondacks, and upon their return will make their home in New York.

Schedules in bankruptcy of the American Metal Novelty Co., 110 E. 23d St., were filed last week in the United States

District Court, showing liabilities of \$13,876 and assets of \$10,876. The assets consist of stock, \$5,000; machinery, \$5,000; accounts, \$816, and cash, \$30. Among the creditors are the Metropolitan Bank, \$2,000; Citizens' Trust Co., Brooklyn, \$750, and Moses H. Harris, \$2,850.

Alphonse and Anthony Muscam, brothers and shoemakers, who have half of the store at 2128 Fulton St., had a fight with Jacob Josephson, a jeweler, who rents the other half of the building, last Thursday morning. Josephson said that the Muscam brothers hit him on the head with shoemakers' hammers, and the Muscam brothers said that Josephson started the row. The brothers were held in \$500 bail for examination.

Two gold medals, authorized by Congress for Orville and Wilber Wright, were delivered in Washington, D. C., last week, to General Allen, chief signal officer of the army by the Director of the Mint. The medals were turned out at Philadelphia from a design furnished by two engravers there. Those who have inspected the medals say they excel in beauty the ones recently presented by President Taft on behalf of the Aero Club of America.

Maiden Lane jewelers are dissatisfied with the transfer of Patrolmen William Roberts and Richard Daly from John St. and Broadway and Maiden Lane and Broadway, to posts on West Broadway and at the Battery. It is reported that an appeal will be made to have them replaced at their old positions, owing to the efficiency they have shown at their work. Both policemen have many friends in the trade who highly appreciate the service they have rendered in the past and do not want them transferred.

The Jewelers' 24 Karat Club sent out post cards calling the attention of the members to the outing of the Philadelphia Jewelers' Club, which was held yesterday. The feature of the day's entertainment was a baseball game between the Jewelers' 24 Karat Club and the Philadelphia Jewelers' Club. Members were notified that the train would leave the foot of Liberty St. by way of the New Jersey Central Railroad, at 10 A. M., connecting at Philadelphia with a special train for Essington, at the B. & O. station at 24th and Chestnut Sts. A large delegation of the New York jewelers was on hand to cheer their team to victory.

Collector Loeb received a telegram last Thursday from the Secretary of the Treasury authorizing him to release for exportation a pair of diamond earrings and various articles of jewelry, the property of Sarah Weiderman, a passenger on the steamship *Voltaire* June 9, 1909, and from whom the articles were seized while being transferred from the steamship *Voltaire* to Ellis Island. The woman was to have been deported Wednesday at 12 o'clock, but at the instance of Collector Loeb the order for deportation was temporarily suspended until the woman was given an opportunity to present her claim for the seized jewelry. After a hearing the Collector and the United States Attorney recommended to the Treasury Department that the seized jewelry be released for exportation, the claimant contending that the property belonged to her and was for her personal use

and not for sale, and there being nothing disclosed to the customs authorities to the contrary.

A recent decision by the United States Circuit Court in the case of B. Altman & Co. vs. the United States, affirmed the assessment of duty by the collector of customs at New York on an importation consisting of a bronze bust valued at about 800 francs, an import from France. The Board found that the bust had been cast in a foundry by artisans from a model made by the artist and that the artist had done little or no retouching on the metal casting. The collector classified the bust under par. 193 of the tariff act of 1897, as merchandise dutiable as manufactures of metal. The importer contended that it should be classified as statuary under the reciprocal commercial agreement negotiated with France. The Board overruled these contentions on the authority of the decisions by the Circuit Court of Appeals in the second circuit in the case of Tiffany vs. the United States.

Richard Henry Ryan, foreman in the factory of Wm. S. Hicks Sons, 235 Greenwich St., New York, manufacturers of gold pens, died at his residence, 592 Jefferson Ave., Brooklyn, Monday of last week. He was apparently in good health on Saturday and was at business as usual at that time. He was very highly regarded by his employers, for whom he had worked since a boy, having spent in all 51 years in their employ. Mr. Ryan was born at Fordham, N. Y., 68 years ago, and came to this city when a boy and entered the employ of the pen concern, with whom he remained up to the time of his death. He was one of the oldest members of the Church of Our Lady of Victory, and was held in high esteem by his friends in Brooklyn and elsewhere. Deceased is survived by a widow, three sons, John S., Alfred F. and Richard H., and five daughters, Irene, Mrs. Frederick J. Doyle, Mrs. Spencer W. Winnie, Mrs. Mary Stoddard, and Mrs. Wm. J. Glacken, and three grandchildren.

When Morris A. Forgetston, who deals in pawn tickets at 1940 Broadway, advertised on June 15 a reward of \$1,000 for the pawn ticket of a 12½-grain oval blue pearl, or \$4,000 cash for the pearl itself, a story was told of a pearl stolen 30 years ago from an Indian maharajah, and subsequently carried about the world until pawned in New York. The pawn ticket, Forgetston said, he had bought for \$150, and a little later he sold the ticket to "a man from Massachusetts" at a slight advance. So ran the pawnbroker's story. Last Thursday he was summoned to the West Side court by a man who said he was S. R. White, representing the heirs of the maharajah, who wanted to get the jewel back and thought Forgetston must know where it is. Mr. White had a typewritten document purporting to give the history of the pearl, bringing in the Duc d'Aumale, King Leopold of Belgium and Cleo de Merode as temporary possessors of it and describing it as worth \$140,000. Forgetston told Magistrate Corrigan that he didn't know himself who "the man from Massachusetts" was. The magistrate having read the typewritten history of the pearl and

New York Notes.

(Continued from page 87.)

igned to Forgotston and White, asked Forgotston to come to court again Thursday and said that he would be glad to have the District Attorney look into the matter.

A. Gillespie, Pittsburg, Pa., was in the city last week looking over various lines. Herz, of A. Herz, Terre Haute, Ind., was seen in the Maiden Lane district last week.

L. Sabbath, a jeweler of Montreal, was in town last week looking for business lines.

E. Kingsbacher, of Kingsbacher Bros., Pittsburg, Pa., was a caller on the trade in the city this week.

Harry Jehlinger, connected with C. A. Berger & Son, Los Angeles, Cal., was in town last week.

Charles D. Lyons, of the C. D. Lyons & Mansfield, Mass., was among the out-of-town visitors in the city last week.

G. Pollock, of W. G. Pollock & Co., returned Saturday on the *Augusta Victoria* on a buying trip in the European market. Charles Murphy, for nine years superintendent of the building at 7 Maiden Lane, resigned his position, to take effect July 1.

Louis Friedlander, of R. L. & M. Friedlander, 30 Maiden Lane, has presented several valuable art works to the Metropolitan Museum of Art.

Charles G. Rathgen, one of the firm who are the successors of Ferdinand Bing & Co., sailed for Europe yesterday on the *Wilhelm II.*

Julius Wodeska, 40 John St., reports that he has found a pearl and 14 diamonds, and says that the owner can apply to him to identify the goods.

Ugo Desio, of Victor E. Desio & Co., Wilmington, D. C., sails from this port for Europe on the steamship *Königin Luise*, on July 10, for an extended pleasure trip.

Winn Keller, of E. Keller & Sons, jeweler of Allentown, Pa., will sail on the *Amia* to-day for an extensive tour of Europe. He will be accompanied by his wife.

The report of the Liberty National Bank, New York, issued June 23, shows resources of \$5,383,930.12; deposits, \$20,775,198.13; capital, surplus and undivided profits, \$1,381.99.

Wages & Clust, 23 John St., have come in with medals and prize cups that are to be given to the successful contestants at the Beach-Bensonhurst Celebration, which will occur July 4 and 5.

S. Weinstein, a member of the Diamond-Cutting Co., 14 Maiden Lane, sailed yesterday on the *Rotterdam* for the European continent and expects to be away some time purchasing goods.

A bowling team, to be officially known as the New York Jewelers' Bowling Association, is being organized by Maiden Lane bowlers. David Shiman, of Shiman Bros., 87 Maiden Lane, and Robert H. Brown, of Cross & Beguelin, 23 Maiden Lane, are receiving entries and making up the preliminary schedule. Any bowler in the jewelry district is eligible to assign his name to the team.

Dr. M. W. Miller, president and treasurer of the Manhattan School of Optics of New York City, will sail for Europe on the *Lucania*, July 7. He will make an extended tour, visiting all the colleges and hospitals of rank in order to familiarize himself with the methods and workings in the leading institutes abroad. His wife and aunt will accompany him. During his absence the vice-president, Fred. E. Burnham, will conduct the Manhattan School.

Among those who are scheduled to speak before the National Retail Jewelers' Association, in convention at Omaha, Neb., Aug. 3 to 6, are noticed the names of W. H. Ingersoll, of R. H. Ingersoll & Bro., 45 John St., who will speak on "Building Up a Retail Watch Business;" George E. Fahys, of the Fahys Watch Case Co., 54 Maiden Lane, who will speak on business conditions in general, and Ernest Lunt, of the Towle Silver Co., 15 Maiden Lane, whose subject will be "A Golden Opportunity."

It is announced that M. L. Hammel's interest in the business of Gattle, Ettinger & Hammel, has been purchased and the business will be continued on the same high standard as in the past. The name will be changed to Gattle, Ettinger & Co. in a few weeks. The concern has on hand a fine line of mounted jewelry. The new offices which the concern occupies at 2 Maiden Lane include four fully appointed rooms, which afford ample space for conducting the business. The suite of rooms consist of private offices, salesroom and accounting department, all of which are newly furnished in mahogany and present a most excellent appearance.

Michael Greenberg, a watchmaker, 21 E. 99th St., New York, filed a voluntary petition in bankruptcy in the United States District Court last Friday, with schedules showing liabilities of \$2,643 and no assets. He was in the jewelry business for several years at various places and of his liabilities \$150 is for rent of the store at 314 Bowery, in April last. Among the unsecured creditors named are: J. Freudenheim & Son, \$42; Berland & Nadler, \$100; L. Kroll & Son, \$150; Max Strober, \$450; John F. Hockman & Son, \$209; Jos. Robinson, \$142; J. L. Goldenberg, \$131; Rosenberg Bros., \$339; Robert H. Ingersoll & Bro., \$115; Abraham King, \$150; Rachel Gursdanský, \$100; Isidor Angel, \$100.

Wiener & Silver, diamond cutters at 45 John St., have just completed cutting a genuine black diamond which is attracting attention in the trade. The stone in the rough weighed 6½ carats and in completed form weighs 2½ + 1/16th carats, and is perfectly cut, having 64 facets. A member of the firm, in speaking of the stone, said that it had taken nearly two weeks to cut it and that in all his experience he had never seen but one other black diamond. Usually, he said, these stones are partly white. The diamond is a Brazilian stone and when surrounded by small white diamonds makes a most striking contrast. Anyone desiring to see the stone can do so by visiting the factory of the cutters.

The Merchants' Association of New York have issued a report by its committee on customs service and revenue laws, which embodies the following resolutions: Re-

solved by the board of directors of the Merchants' Association of New York, that the report of the committee on customs service and revenue laws, dated June 8, 1909, recommending the changes in the customs administrative features of the tariff bill now pending in Congress be accepted and that the recommendations be and the same are hereby approved, and that the association put forth its best efforts in the endeavor to obtain the best results desired. The report then goes on to enumerate the changes in the different sections of the tariff which meet with the approval of the association.

Isidor Landau, a retired jeweler, who lives with his wife and several children at 65 Second Ave., attempted suicide Sunday afternoon by inhaling gas. Landau had run a prosperous business for a number of years on the East Side and had retired. About 20 years ago he was attacked with a disease that obstructed the circulation in his right leg and amputation became necessary. Sixteen weeks ago he lost his other leg through the same disease. Since that time he has been despondent. Sunday while his wife was in her bedroom Landau in some way attached a gas tube to a jet in the sitting room and turned it on. He was sitting in a chair in the room when his wife smelled the gas. She ran in and found him unconscious. He was hurried to Bellevue Hospital, where the doctors revived him, and he was then placed under arrest. He had written a letter to his wife stating that he was helpless and a burden and would be better off dead.

A decision was handed down in the United States Circuit Court, New York, recently, sustaining the claim of Tiffany & Co., New York jewelers, against the assessment of duty by the collector of customs at New York on a quantity of loose drilled pearls which had been assembled and matched abroad, and were ordered to be made into a necklace in New York, and which had been strung abroad only temporarily for purposes of display. The collector held that the pearls were dutiable as jewelry under par. 434, but according to the decision handed down by the Circuit Court the pearls are dutiable at the rate of 10 per cent. for pearls in their natural state under Par. 436 of the Tariff Act of 1897. The matter first came up on a protest before the Board of United States General Appraisers, who sustained the protest of Tiffany & Co. The matter was then appealed by the Government to the Circuit Court. The importation in controversy consisted of four packages containing in all 59 pearls valued at some \$16,000. The pearls were all loose and all drilled. The Board of United States General Appraisers stated in its opinion that while the pearls had been temporarily strung abroad in order to show how they would appear as a necklace they had not been worn or made into a complete necklace for importation and, following the decision of *Citroen vs. the United States*, the Board held that the collector had erred in assessing the duty and that the pearls should have been classified either directly or by similitude as pearls in their natural state. District Judge Platt, in his decision, affirmed the opinion

(New York Notes continued on page 90.)

New York Notes.

(Continued from page 89.)

of the Board. The Government was represented by D. Frank Lloyd, assistant district attorney, while Arthur M. King appeared for the importers.

A. R. Katz, of A. R. Katz & Leudan Co., diamond importers, 87 Nassau St., returned from Europe on the *Kaiser Wilhelm der Grosse*.

Louis Freund, of Henry Freund & Bro., is spending a few weeks at Mt. Clemens, Mich. Louis Cohn, of the same firm, is enjoying a vacation at Arverne, L. I.

L. Van Moppes, of Van Moppes & Son, and S. A. Van Moppes, with his wife and family, will sail for Europe July 6 on the *Ryndam*, on a trip lasting two months.

The business of Leslie E. Carl, Deposit, N. Y., has been incorporated, and the company will manufacture and deal in watches, jewelry, etc., with a capital of \$3,000. The incorporators are: Leslie E. Carl, Luzerne Carl and R. A. Carl, all of Deposit, N. Y.

A canary diamond three-quarters of an inch across and half an inch deep, will be sold at public auction at 708 Third Ave. at noon to-day. The ownership of the stone is kept secret. The diamond weighs over 23 carats, and is set in a cluster pin. Fourteen blue-white stones, weighing from one-half to one carat each, surround the canary gem. The diamond is in the vaults of the Hanover Safe Deposit Co.

In alighting from a Lackawanna train at the Grove St. Station in East Orange early Monday morning, J. Frank Hawkins, for the last five months advertising man for the Art Metal Works, Newark, fell under the wheels and was instantly killed. Hawkins was descending the rear platform steps of the smoking car, and, it is believed, stepped off in the darkness, thinking he had another step to go. He had one hand on the rail, and thus pivoted, swung under the wheels of the car following.

William Matschke, well-known in the wholesale jewelry district of New York, and for many years a resident of Brooklyn, died at his home, 37 McDonough St., Brooklyn, Saturday, in his 55th year. He leaves a widow, Laura; a son, Griffith B.; a sister and five brothers—Bernard A., chief of the 37th Battalion, New York Fire Department; Emil, August, George and Fred. The funeral services took place yesterday afternoon at his late home, the Rev. H. A. Handel, chaplain of the N. Y. F. D., officiating. A sketch of Mr. Matschke's career will appear next week.

Joseph Satlow, a jeweler at 100 E. 7th St., is bemoaning the loss of \$5,100, which he paid for 41 pounds of brass fillings, which he thought to have been shaved from a solid block of gold. The fillings are now at Police Headquarters, where there is one prisoner charged with the swindle. The police are looking for two others. The prisoner is Label Lapiges, a Russian peddler, of 136 Monroe St. He was held in Essex Market Court, Monday, in \$3,000 bail for examination. Satlow says that Lapiges and two other men came to him last Saturday with the brass fillings, and persuaded him that they were pure gold. They told a likely story, says Satlow, and

he believed it. After having transferred his \$5,100 and the diamond ring to the gold peddlers, he made an investigation and applied to the police.

The Curtis, Pinover & Schneider Co. has been incorporated under the laws of the State of New York to manufacture and deal in jewelry with a capital of \$20,000. The incorporators are: J. B. Curtis, 412 W. 115th St.; Samuel Pinover, 1944 Madison Ave., both of New York, and Peter Schneider, Springfield, L. I. Mr. Curtis was for six years at 80 Nassau St., where he manufactured a line of platinum and gold mountings. Mr. Pinover, formerly of A. Pinover & Co., 16 Maiden Lane, is a pioneer in the diamond mounting business and learned his trade with Baldwin, Sexton & Peterson. Peter Schneider, the third member of the concern, was for years with Lewis, Kaiser & Luthy, and recently with Tiffany & Co. The new firm will be located at 10 W. 23rd St. The offices have already been secured and furnished. They intend to manufacture a line of gold and platinum mountings. Mr. Curtis will be the outside representative of the firm. Mr. Schneider will look after the factory end, while Mr. Pinover will be the office manager and accountant.

The movement has been started to close the Maiden Lane business houses from Friday night, July 2, until Monday morning, July 5, and a petition has been started which is meeting with general approval throughout the district. It is pointed out that if the concerns close on Friday it will afford an excellent opportunity for the employes to enjoy a three days' vacation and will not retard the handling of business to any extent. This plan will be of especial benefit to those working in the various factories who do not get a vacation of two weeks in Summer. The heads of several of the business houses are decidedly in favor of the movement and in all probability the vacation will be general throughout the trade. Those who have already decided to grant employes this vacation period hope that others in the trade will join with them in the movement. As one man, who is interested, said, "What will three hours on Saturday morning amount to as compared with the opportunity for a three days' rest to the employes?" There is also a movement on foot in the trade to close the business places in the Maiden Lane district during the hot weather at 12 o'clock on Saturday, and from what has been learned thus far this movement is also meeting with general approval wherever the matter is mentioned. It is understood that as yet no petition has been started but if such action is begun in all probability the majority, and perhaps the entire trade, will fall in line.

The American Cuff Button Co., Cincinnati, was incorporated, last week, at Columbus, with a capital of \$10,000. The incorporators are: Albert L. Jones, Eathan S. Coleman, Louis K. Morgan, Kate R. Vonderhare and John C. Hopkins.

A. S. Weller, formerly engaged in the jewelry business in St. Paul, came to the latter city from San Francisco, June 21, to witness the interment of the remains of his wife in Oakland Cemetery. Mrs. Weller died at her home of apoplexy.

Trade Gossip.

The latest in cigarette cases is supplied by a novel arrangement for holding the cigarette. It consists of a series of compartments of gold wire, each the size of a cigarette, joined to the case at one end and occupying a central space between covers when the case is open. Thus cigarette may be drawn out easily when case is offered to a friend, which obviates the necessity of removing it from snug quarters close to the case.

An ingenious plan to assist the retailer in building up his umbrella trade department of great possibilities but too neglected, has been inaugurated by Kreis & Hubbard, 255 Franklin St., Chicago. This firm has begun a campaign of vigorous advertising, which will include the prominent magazines, such as *Munsey's*, *Saturday Evening Post* and *Collier's*, by using a full page in one of the latter issues of the last-named public. The slogan of this advertising is "K. Quality." This, with a reproduction of the trade-mark, is to appear in each advertisement, which is so worded as to invite inquiries for a handsome booklet on which now being prepared. Every person ordering the advertisement will receive one of these books and will also be directed to a local jeweler, and a letter written to the dealer giving the name and address of the inquirer. Among other means to be used are booklets bearing the dealer's own name, window cards, newspaper cuttings and miniature umbrellas for children to play with that the jeweler can display in his window and give away with every \$5 purchase. Kreis & Hubbard claim that they do not solicit the department of dry-goods store trade and that their list includes many exclusive features, such as sterling handles in 28-gauge, 22 K gold-filled handles, warranted not to have black seams, extra close roll, improved tachable handles all noted for their durability, excellence of finish and material. While they have hitherto been confined only the west they have just put two men in the eastern territory and cover opening a New York office. Every one who is interested in developing his umbrella business should write to Kreis & Hubbard for particulars, samples, etc.

Death of Auguste Houriet.

A cablegram received yesterday from Neuchatel, Switzerland, announced the sudden death of Auguste Houriet, who has been well known in the watch trade in the Maiden Lane district of New York for about 40 years.

Mr. Houriet was in business for 100 years at one time, but later became manager of the office of the late Charles Leobacher when the Vacheron & Constantin firm was transferred to Edmond F. Robert. He became manager of Mr. Robert's watch position he held for many years.

Mr. Houriet was very prominent in the Swiss colony in New York. He was active in securing the cooperation of countrymen to construct the handsome building of the Swiss Benevolent Society of which he was president for many terms.

Chicago Notes.

G. Gubbins returned from a trip, week.

A. Armstrong, traveler for Otto Young Co., is in from his Spring trip.

Amberg, traveler for the Rhode Island Ring Co., is making a western trip.

A. A. Cooper, with S. H. Clausin & Co., Minneapolis, was a recent visitor in Chicago.

Frank T. Barton, representative of the Freeman & Cook Co., is making a trip to the northwest.

Albert M. Dueber, of the Dueber-Hampden companies, Canton, O., was a recent visitor in Chicago.

Thos. F. Kennedy, of the Star Watch Co., made a short business trip to nearby towns, last week.

E. Whiting, of the Chicago office of J. J. Davis & Davis, Plainville, Mass., is making a visit to the factory.

D. White, representing the C. O. Reed & Son Co., has just returned from a successful northwest trip.

Mr. Winterhalter, of Towle, Winterhalter, Hannafin Co., Butte, Mont., was recently in Chicago, buying new store fixtures.

J. H. Carmody, Jr., of the Chicago office of C. H. Eden Co., Attleboro, leaves, this week, for a visit to the factory.

F. L. Bosworth, of the F. L. Bosworth Co., Minneapolis, stopped over here on his way home from a trip east, last week.

W. E. Hayward has returned from his trip to the factory of the Alvin Mfg. Co., Sag Harbor, N. Y., and New York.

B. F. Coffin, formerly with Spaulding & Co., is now engaged in business for himself as an expert jewelry systematizer.

J. R. Payne, of the Chicago office of the Heriden Cutlery Co., returns, this week, from a month's trip on the Pacific Coast.

R. T. Kleckner, traveler from the Chicago office of Theodore W. Foster & Bro., returns from a Pacific Coast trip, this week.

R. F. Prochrow, of the Ft. Dearborn Watch & Clock Co., is on a week's fishing trip at Lake Jefferson, in northern Minnesota.

John Leiner, of the silver department of Wm. Allen & Co., is having an outing in western Canada, where he will join E. A. Cox, of the same firm.

Mr. Welteroth, of the Welteroth Jewelry Co., St. Joseph, Mo., was in Chicago,

recently, buying new fixtures, as he is moving into new quarters.

The travelers of the M. F. Fleishman Co., consisting of Frank S. Newcomb, Chas. W. Nesbet, M. D. Jacobs and B. F. Guinand, are in from their territories.

Joe Kirsch, with Raphael Bros., 166 State St., is going to Kansas City, Mo., to take charge of the firm's other store in that place known as the Guarantee Jewelry Co., 1021 Main St.

H. W. Hedge, representative of the New York Standard Watch Co., Jersey City, N. J., was a recent visitor in Chicago, stopping here on his way to the convention at Des Moines.

Geo. H. Thomas is visiting the factories for his lines at Newark and Philadelphia and eastern points. Mrs. Thomas and baby accompany him and will spend a few weeks at Atlantic City.

Wm. G. Grimes, Fred H. Nelson, E. C. Bell and Wm. Cothrae, travelers of the Chicago agency of the Omega Watch Co., are in from their trip, preparatory to starting out again Aug. 1.

Jacob Heilbron, of the Chicago office of C. H. Eden Co., Attleboro, is visiting at the factory. Before returning here in the Fall, Mr. Heilbron will make a two or three months' trip in Europe.

Raymond Dreyer, of the Dreyer, Lochau & Ohm Co., attended the National Festival of the North American Gymnastic Union at Cincinnati, June 19-28. Mr. Dreyer took an active part in the management of the meet.

L. A. Mackown has just returned from a visit to the factory of the Oneida Community, Ltd., at Oneida, N. Y. G. H. Miller, of the same office, is attending the Iowa State Retail Jewelers' Association at Des Moines.

August Johnson, of August Johnson & Co., with his wife will, this week, leave for a two weeks' trip to Toronto and Montreal. They will visit the Thousand Islands and other places. Mrs. Johnson, who has just recovered from a long illness, will spend several months in Montreal, her home.

Among the buyers in Chicago recently were: Frank Smith, Pontiac, Ill.; Geo. Crane, of Crane Bros., Lake City, Minn.; C. A. Hewitt, Neligh, Neb.; Frank Anshutz, Shenandoah, Ia.; W. A. Wolcott, Batavia, Ill.; Mr. Olin, of Olin & Olsen, Janesville, Wis.; H. Lummig, Peru, Ill.; Jay B. Johnson, Goodland, Ind., and A. S. Bourgeois, Jackson, Miss.

The wife of Rudolph Noel, of R. Noel & Co., 37 Maiden Lane, New York, died, Saturday, June 19. The body was brought here for burial, which took place at Waldheim Cemetery, June 22. Mrs. Noel was formerly Miss Rose Greenebaum, and was married to Mr. Noel about a year ago. Mr. Noel is a brother of Max Noel, of the firm of Despres, Bridges & Noel, this city.

Toledo.

The trials of Werbe and Blair, the Detroit pawnbrokers indicted for receiving goods stolen from a Toledo man, are scheduled for next week.

The Merrill, Broer Co., wholesale jewelers, will shortly open a wholesale optical department. It is now being organized, and the name of the manager will shortly be announced.

W. A. Rankin, manufacturing jeweler, 513 Jefferson Ave., has leased larger quarters on Superior St., and will shortly remove to that location. In his new place of business considerable attention will be given to manufacturing specially designed pieces of jewelry, etc. C. R. Parker, who has been located with L. P. Christiancy, will also occupy a part of the room with optical goods. Mr. Rankin has just finished a button and a brooch which are to be sent to the king and queen of Spain by the Toledo Chamber of Commerce, together with an invitation to be present at the King Wamba festival, which will be held in Toledo in August. The festival will be taken from an incident in the life of King Wamba, one of the early kings who resided in Toledo, Spain. Both the button and brooch are patterned after the official buttons which have been authorized by the Chamber of Commerce, but are of much better material, each being of solid gold and studded with diamonds.

J. H. Mosher, who sold out his business at Akely, Minn., in April last to J. P. Johnson, has now engaged in the jewelry business again and is located at Glendive, Mont., where he is opening a new store, which is being fitted up with up-to-date fixtures now being made at Quincy, Ill. Before leaving Akely Mr. Mosher's brother members of the A. F. & A. M. presented him with a very beautiful "lamb skin" hand-embroidered past master's apron, as a token of their affection and esteem.

Milwaukee.

Charles M. Hall, Waupaca, Wis., has sold his business to E. A. Hannon, Grand Rapids, Wis.

The annual meeting of the Fox River Valley Jewelers' Club will be held at Green Bay to-day, June 30. Officers will be elected, general business will be transacted, and a picnic and supper will be held at Bay Beach.

C. W. Emrick, Monroe, is exhibiting a handsome gold watch and chain in his windows which is to be offered by the officers of the Wisconsin Guard in competitive rifle practice at Camp Douglas, Wis., this summer. Both watch and chain were purchased of Mr. Emrick.

William R. Cundall, formerly manager of the stationery department at the Bunde & Upmeyer Co.'s establishment, has resigned after 17 years of service with the well-known jewelry company, and will open an up-to-date society stationery store at 79 Wisconsin St. Mr. Cundall is now in the east selecting his stocks for the new store.

The E. H. Clifford store at Platteville won the first prize for an excellent window decoration during a reunion celebration in the city. The window carried out the idea of a soldiers' reunion and was a clever piece of work. Beautiful crayon sketches were shown and various national emblems were arranged, while the best jewelry stocks of the store were also made use of.

As is usual during the closing days of the State legislature, several bills were passed which greatly conflict with statutes already in existence. Thus far six doublets have been found, and it has been discovered that bill 882A in express terms repeals the sections of the statutes upon which depend several bills enacted earlier in the session for the formation of jewelers', etc., mutual fire insurance companies. It is expected that the governor and his advisers will straighten out the situation in a satisfactory manner.

Thieves recently entered the store of Louis Vahl, 667 3d St., and made away with goods worth \$1,200. Only the high-priced articles were taken from the various trays, although some of the lower-priced pieces were examined, as the disarrangement showed. From a tray of gold watches the cheapest ones were left, and of two in the repair shop at the rear of the store the robbers took the better one. Mr. Vahl is sure that no one without years of experience in the jewelry field could have made the choice selections. Entrance was effected through a side street door which led to offices over the jewelry establishment. The police have no clue.

The various committees of the Milwaukee Jewelers' Club in charge of arrangements for the coming convention of the Wisconsin Retail Jewelers' Association, which opens in Milwaukee July 20, are busy completing the programme, and copies will be sent out by July 10. The address of welcome will be given by Frank Cannon, secretary of the Citizens' Business League of Milwaukee, and the response will be made by Gustav Keller, president of the association. Several interesting papers will be presented by members of the associa-

tion, no outside speakers having been arranged for this year. The matter of exhibits will be one of the big features of the gathering, and at least one-third of the time of the convention will be devoted to the big display which will be on hand. It has been specifically understood that the exhibitors are to close their booths during the sessions proper, so that members may not be attracted away from the meetings. The annual meeting of the Jewelers' Mutual Fire Insurance Co. of Wisconsin will be held on the evening of the opening day, June 20, and will be one of the most interesting events of the entire convention. This will be followed by a smoker. The annual banquet for the jewelers and their wives will be followed by a trip to the circus. The annual election and reports of various committees will close the convention June 22. It is expected that at least 300 jewelers will attend.

Los Angeles.

Mr. Cohen, New York, is here on a pleasure trip.

Mr. Shafer, of Shafer & Douglas, Newark, N. J., has been visiting in Los Angeles.

Out-of-town jewelers recently in the city were: G. Duncan, Bakersfield; Mr. Greenwald, of Greenwald & Adams, Tucson; E. S. Pollock, Riverside.

George B. Dixon, Jr., in charge of the stationery department of Brock & Feagans, will leave, June 30, for New York. He will remain in the east for two months.

S. Meyer, of the S. Meyer Co., has returned from a brief vacation spent in Ventura County, Cal. Mr. Meyer is an enthusiastic angler, and one of his achievements was the landing of a 14-inch trout.

George E. Feagans, of Brock & Feagans, will leave, July 2, for New York. He will be accompanied by Charles B. McNiff, in charge of the jewelry department of the Brock & Feagans store. Mr. Feagans expects to remain in the east during July and August.

Montgomery Bros. displayed in their windows the silver cups and other prizes for the Venice County Club Tennis Association tournament, held June 23 and 24. There were four silver cups, one given by Montgomery Bros., one by the Los Angeles Pacific Railway Co., one by the Country Club and the fourth by A. W. McPherson. The Montgomery cup is a large one with three handles, having a plain and dull finish.

The Whitley Jewelry Co. has secured the contract for making the Ferris trophy for the Santa Monica automobile road race. The cup will be one of the largest and finest ever made in the west, and will be very elaborate. It was secured by the Whitley Co. in competition with leading firms on the Pacific Coast. The value is \$1,500. It will be in competition for 15 years, and will contain 15 shields for as many records.

Wm. Van Steenberg, Sioux Center, Ia., has been succeeded by Van Steenberg Bros.

The business of the late James High, Sycamore, O., will be continued by his widow, Mrs. Mary High.

Indianapolis.

The Baldwin-Miller Co. will close at noon, Saturday, during the Summer months.

I. Grohs, of the I. Grohs Jewelry Co. has returned home after a trip to New York and Providence.

Charles B. Dyer, of Dyer Bros., attended the commencement of the Indiana University School of Medicine, at Bloomington, last week.

H. D. Burghheim has completed a trip to Toledo, Detroit, Erie and Buffalo, and he went in the interests of his jewelry business and reports a successful trip.

Owing to his business affairs, C. Bernloehr, of Chris. Bernloehr & Co., has abandoned plans for a European trip this Summer. He made such a trip last Summer, being away several months.

Following the return of J. E. Reardon, manager of the Baldwin-Miller Co., from an eastern trip, M. J. Bishop, manager of the tool and material supply department, left to spend his vacation at St. Paul, Minn.

J. P. Mullally will attend the convention of the American Order of Owls, to be held at Reading, Pa., next month. Mullally, who is supreme vice-president of the order, will be a candidate for superintendent and is receiving much encouragement.

John Bernloehr, of Chris. Bernloehr & Co., left last week for Seattle, Wash., to attend the exposition. After remaining there for a short time he will go to California where he will remain about two months. He is accompanied by his wife and two children.

After a quarter of a century of activity J. H. Reed is taking his first "real" vacation during that time. He has purchased a carpenter's outfit of tools and gone to a farm in Brown County where he is building a bungalow. His jewelry business is being looked after by his son, Wm. Reed.

The Indiana State Board of Agriculture, of which Charles Downing is secretary with headquarters in this city, has appropriated \$65,000 for prizes for the Indiana State Fair, which opens Sept. 6. Much of the prize money will be spent for silver cups and other trophies, and the board will soon be ready to make selections.

Quite a number of jewelers have written letters to Senator Beveridge protesting against the provisions of the tariff applying to watches. This action is in accordance with an agreement reached at the meeting of the Indianapolis Retail Jewelers' Association, it being decided to send individual letters instead of acting as an association.

A young boy attempted to have a draft cashed at the store of J. P. Mullally last week, stating that he wished to purchase a watch. Mr. Mullally was suspicious and refused to make the transaction. Later the youngster, as well as his mother and other members of the family, were arrested for wholesale thievery of drafts and checks from office buildings.

The store of J. S. Harris, Norfolk, Va., was robbed one night recently of jewelry and other stock valued at about \$100,000.

Minneapolis and St. Paul.

Wade Weld, of Weld & Sons, Minneapolis, will soon be married.

E. Spalding has been at Clearwater, Minn., on a fishing expedition.

I. Spiegel will remove from 3123 Nicollet Ave., Minneapolis, to 167 E. Lake St. about July 1.

A. Kirchner, of Kirchner & Renich, Minneapolis, is spending a vacation trip in the East.

A. Mueller of the R. G. Winter Jewelry Co., Minneapolis, is away in Dakota on a vacation.

Albert Veilleux, of Veilleux Bros., Wahn. N. Dak., is spending a week or so in the Twin Cities.

L. Bosworth, of the F. L. Bosworth Jewelry Co., Minneapolis, returned June 28 from a trip to the East.

Mrs. Chas. Ellis, daughter of C. G. Ellis, Mandan, N. Dak., was in the Twin Cities en route for the East, last week.

Robert F. Reed, with the Reed-Bennett Jewelry Co., Minneapolis, recently went to Seattle, Wash., to attend the Alaska-Yukon-Pacific Exposition.

Wm. A. Smith, watchmaker for I. D. Anderson, Cooperstown, N. Dak., was in the Twin Cities en route for Faribault, Minn., last week.

E. Palmer, Grand Forks, N. Dak., was in the Twin Cities, last week, returning from Mankato, Minn., where he had been visiting his old home.

Carl T. Thayer, Minneapolis, who was recently injured in an automobile accident, has recovered sufficiently to leave the hospital and is gaining steadily.

Carl E. Neuman, watchmaker for J. B. Hanson & Son, Minneapolis, has resigned and will engage in the retail trade for himself at Sandpoint, Idaho, about July 15.

The Minnesota Retail Jewelers' Association has deferred its convention for this week, the original dates conflicting with the Wisconsin association. The association will meet July 27, 28, 29.

E. Waldin, with L. C. Gaus & Co., Minneapolis, has resigned and will associate himself with Theon Bros., of that place. L. Slade, formerly with E. C. Leckum, Yakima, Wash., succeeds Mr. Waldin.

The recent convention of retail druggists in the state brought in to the Twin Cities several who are druggists and jewelers, including Henry T. Holverson, Alexandria, Minn.; K. G. Skartum, Lake Benton, Minn., and others.

R. Cooper, of S. H. Clausin & Co., Minneapolis, has returned from Louisville, where he attended the national convention of the Nobles of the Mystic Shrine. He stopped in Chicago on his way back. A. A. Scappi, material man for S. H. Clausin & Co., is spending his vacation in Cincinnati.

Recent visitors in the Twin Cities were: Mrs. L. O. Hulberg, Northfield, Minn.; Mr. Burns, Pierpont, S. Dak.; P. L. Lieb, Spring Valley, Wis.; Oscar Holmes, Cambridge, Minn.; A. G. Scherf, Redwing, Minn.; W. M. Hulberg, Two Harbors, Minn.; W. C. Vandervoort, Marmarth, N. Dak.; J. C. Gerde, Paynesville, Minn.; J. E. Larson, Superior, Wis.

B. F. Simpson, of B. F. Simpson & Co., Minneapolis, has returned from a trip through North Dakota, and reports that the crop conditions at this time are excellent and promise well. Dealers report generally a good business in connection with the graduation period. F. G. Simpson of the same house is back from a trip in Wisconsin, and is away for a vacation.

Cleveland.

TRADE CONDITIONS.

Retail business continues brisk, with a very slight decline from the good marks set by the two previous weeks. Sales are good in all classes of jewelry and diamonds are in fair demand. Wholesale conditions are similar to those noted above, with the exception that possibly the volume of business this week was larger than last.

J. F. Skory has opened a jewelry store on E. 65th St., near Broadway.

Emil Bock, of the firm of Ramp & Bock, has gone to Indianapolis for a few weeks.

Wm. V. Moore, of the Bausch & Lomb Optical Co., Rochester, was in town last week.

D. Leonleiser, Huron, who was burned out recently, is erecting a new building on the site of the old.

Wardwell & Co. will finish their auction sale on July 2. The sale has been gratifying in its results.

F. L. Hadley, of the Cowell & Hubbard Co., returned, last week, from a several months' trip in Europe with his son.

Mrs. Tillie Goldinan, a sister of Messrs. B. V. and H. D. Arnstine, d'ed in Chicago, June 21, and was buried in Cleveland, Wednesday.

The United Savings & Banking Co. sold the last of the Gee & Nusbaum stock, last week, and the affairs of that company will be wound up at once.

U. R. Sigler has just returned from a short sojourn at his Summer home at Sand Lake, Mich. W. H. Wagner, western representative of the Sigler Bros. Co., has just returned from a successful mid-summer trip.

E. J. G. Galley, the well-known railway watch inspector, who was formerly with the Webb C. Ball Watch Co. and the Galley Co., recently connected himself with the Schauweker Bros. Co., and is in charge of the watch department.

The Art Novelty Shop has secured an excellent storeroom on the Euclid side of the Hippodrome building. The fixtures are new and costly and the store promises to be one of the best appointed in Ohio. P. A. Mequillet, president of the new company, and the other officers welcomed their friends at the formal opening, held Monday.

The Chamber of Commerce came out with just \$30,000 profit on the exposition, and now there is talk of a permanent building, constructed to hold the show annually. Jewelers generally would welcome the innovation, not only on account of the chance to show their stocks, but also for the business it brings to this city that would otherwise go elsewhere.

The following were some of the out-of-town buyers in Cleveland last week: Mr. Younglove, of Austin & Younglove, Greensprings, O.; C. M. Hibbard, Akron; Mr.

Burns, of Burns & Gosser, Coshocton; H. S. Sumner, Akron; H. H. Brainard, Medina; Rob't Miller, Lorain; C. F. Hill, Akron; Mr. Avery, of Avery & Bemis, Amherst; W. B. McCullow, Greenwiche, and O. G. Carter, Jr., of New London.

Kansas City.

C. C. Mitchell is preparing to start in the jewelry business in Tahlequah, Okla.

Thos. F. Romaine, heretofore in business at Nevada, Mo., has removed to Woodward, Okla.

Andrew Manifold, Beloit, Kans., was in this city, last week, on his way home from the Seattle Exposition.

E. B. Wiser, of the Porter & Wiser Jewelry Co., will leave for New York July 1, for a vacation of three weeks.

Frank Bangs and J. H. Whitney, with the Edwards & Sloane Jewelry Co., have returned from a vacation trip to Estes Park, Colo.

L. L. Hoffman, Leavenworth, Kans., has been appointed police judge, under the commission form of government recently adopted by that city.

C. E. Thistle, of the office force of the Woodstock-Hoefler Watch & Jewelry Co., with his wife and mother-in-law, has been enjoying an outing near Noel, Mo.

Martin Hansen, the office boy of the Meyer Jewelry Co., who was injured by being caught in the elevator of the Boley Building, about 10 days ago, is improving.

Louis Hayman, of the material department of the Meyer Jewelry Co., will leave Monday for St. Louis, for a few days' visit. After that he intends taking a western trip, which may include the Seattle Exposition.

Louis Meyer and Felix Fricke, of the Meyer Jewelry Co., have returned from Excelsior Springs, where they went to visit Robert Hickman, a jeweler of this city, who has been ill there with typhoid fever for several weeks. They report Mr. Hickman on the road to recovery.

J. Scott, of the office force of the Woodstock-Hoefler Watch & Jewelry Co., has returned from his vacation. Chas. Remington and E. M. Dunham, Garden City, Mo., and E. M. Nave, Burlington, Ia., have been enrolled as students at the Kansas City Polytechnic Institute.

The C. B. Norton Jewelry Co. has had to contend with painters and decorators for several days and are not through yet. The programme involves the repainting and decorating of their offices and salesrooms, and the work is being done in an artistic and up-to-date manner. This work embodies the finishing touches on the remodeling of the building occupied by them and it is now a modern business and office building in every respect.

The following out-of-town jewelers were in town during the past week: J. H. Fuoss, Brookfield, Mo.; Carl Hunnius, Leavenworth, Kans.; A. W. Holmes, Bonner Springs, Kans.; R. Goodholm, Lindsborg, Kans.; Walter Sperling, Seneca, Kans.; Mr. and Mrs. H. W. Walter Starcke, Junction City, Kans.; L. Rosenfield, Leavenworth, Kans.; S. J. Huey, Excelsior Springs, Mo.; J. K. Green and wife, Victoria, Tex.; S. F. Ricker, Emporia, Kans.

San Francisco.

Dan Childs was here, last week, in the interest of Warren & Williams.

Joe Nordman, of the Nordman Bros. Co., is out of town on his vacation.

W. S. Sparrow, with Stern Bros. & Co., was a recent visitor in this city.

A. B. Brown, with Julius A. Young, recently returned from a northern trip.

George Greensweig has returned from his eastern trip with a large list of new stock.

Mr. Pleckner has been here, recently, with the lines of Theodore W. Foster & Bro. Co.

Burr W. Freer is back from his eastern trip, and has selected a fine line of goods for his holiday trade.

Charles Weinshenk, of Mayer & Weinshenk, is now in Capitola, and will remain away for several weeks.

W. H. Covey, with J. B. Whitney & Co., is preparing to make a trip through the southern part of the State.

The Princess Jewelry Co., formerly located on Fillmore St., is now occupying new quarters at 747 Market St.

The Oakland representative of R. & L. Myers is enjoying a well-earned vacation at one of the nearby beach resorts.

Mr. Longwill, formerly with H. C. Van Ness & Co., has taken a position with the Henry M. Abrams Co., and is out upon the road.

Granat Bros. have just moved to a permanent location at 12 Geary St., and have equipped their plant with considerable new machinery.

Al. Eisenberg, of A. Eisenberg & Co., is now in the northwest, and while away will visit the Alaska-Yukon-Pacific Exposition at Seattle.

J. I. Cohn, Berkeley, Cal., who bought out the Bernard Lissner stock in Oakland, has been visiting the San Francisco trade and selecting Fall stock.

Among the jewelers here recently were: W. H. Mitchell, Kings City; P. H. Shuey, Red Bluff; W. E. King, Stockton; C. J. Noack, Sacramento; F. J. Stumm, Benicia, and Mr. Krenkel, Winnemucca, Nev.

F. P. Shepard, an engraver in the employ of Shreve & Co., who recently took a vacation in Yosemite Valley, is reported to be lost there, and searching parties are scouring the mountain fastnesses in an effort to find him. Shepard went to the valley a short time ago with a party of friends, and with a crowd attempted to climb Sentinel Dome. Threatening weather came up and all but Shepard returned to the valley. He has not been seen since then. In San Francisco he resided at 2302 Clay St., and has been here but a few months, having originally come from England.

A fire on the San Francisco water front on the morning of June 17 destroyed several buildings, including one occupied by the jewelry store of R. Lewis, 223 East St. The fire is said to have been started in this store through the careless use of gasoline in cleaning. Lewis is the only one who carried any insurance on his stock, but stated that his loss was greatly in excess of his insurance policy of \$2,500. The buildings were of cheap wooden construction and were erected immediately after

the earthquake. Under a new ordinance they will have to be supplanted by more substantial ones. During the fire Edward Deveger, a clerk in the store, was burned about the hands and face while attempting to save some of the stock, but his injuries were not serious.

Detroit.

L. H. Cooper, Oxford, visited the trade here, a few days ago.

J. T. Eddington came in from Pontiac, last week, to buy stock.

F. L. Showerman, Ypsilanti, was in town on a buying trip, a few days ago.

George H. Chapel, Howell, was a purchaser in this market, last week.

Edward J. LeHeup has formally opened his new shop at 343 Woodward Ave.

E. C. Avery, who formerly traveled for a Detroit firm, is now on the road for Schweigert & Co., Toledo, O.

E. A. Cress, Minden City, was in the city, last week, to attend the State convention of the retail druggists. He combines the two lines of business.

Frank A. Mathauer, of Mathauer & Koesler, is back in the city after covering the Michigan territory. He will not go out on the road again until August.

Charles J. Thiry is manager of the Elks' Circus at the Detroit Athletic Club grounds, the purpose of which is to raise funds to bring the Grand Lodge of Elks to Detroit in 1910.

William C. Noack represented the wholesalers' association at the general committee meeting last week to complete plans for entertaining the automobile people who will be here for the start of the Glidden tour to Denver.

Pacific Coast Notes.

N. Ganse, Goldfield, Nev., has been arrested for selling jewelry without a license.

J. M. Hadley, Sisson, Cal., has removed his store at that place to the Klein building, on Walnut St.

F. J. Frowiss, proprietor of a San Diego jewelry establishment, was in Riverside recently, looking over the ground with the idea of opening a branch store there.

Articles of incorporation have been filed by the Warner Co. at Fresno, Cal. This company is one of the oldest in the jewelry line in that city, but previous to this time the name has not been official. H. C. Warner, the former owner of the establishment, died recently and in settling the distribution of the estate it was thought best to have it done in a thoroughly business-like manner. The capital stock is placed at \$50,000 and the directors are Laura A. Warner, widow of H. C. Warner; A. O. Warner, Frank E. Warner, Edna W. Cockrill, a daughter of H. C. Warner, and Mrs. W. E. Ritter.

The large plate glass show window in the store of Joseph Hoffman, Latrobe, Pa., was broken recently by a person believed to be insane, and who, it is thought, did not contemplate burglary. At the time of the breakage the window contained no valuables except a small hand-painted vase worth \$10.

Cincinnati.

I. Schroeder, with A. G. Schwab & S. S., has gone south on a business trip.

Julian Schwab, of A. G. Schwab & S. S., is on his regular trip through Ohio.

A. C. Teppert, local representative of Trier Bros., New York, is home from his western trip.

Mr. Herman, of Herman & Loeb, in Louisville, Ky., for a few days, looking after the trade.

A. M. Plaut, of the National Jewelry, has gone to Georgia and Tennessee in two weeks' pleasure and business trip.

Herman & Loeb's ball team received the Gutmann ball team and lost a score of 16 to 9 in favor of the Gutmanns.

C. E. Payne and E. Frommeyer, with Gutmann & Sons, with their wives, have gone to Atlantic City to enjoy a much needed rest.

Joseph Embrey, from Richwood, O., and his wife spent the past week in the city, enjoying the sights, visiting the San resorts and buying stock.

O. E. McWaters has moved his store from Somerset to Danville, Ky., where he expects to open up a larger store fitted up in most modern and approved style.

Max R. Schapiro, now with the National Jewelry Co., sued the Greenwald Co. in an arcade for a week's wages. Squares rendered judgment in favor of Schapiro.

A. Sitt, a jeweler from Chicago, was in the city for a few days attending the Traders' convention and looking up old friends as J. W. Armbruster, of the H. H. Watch Co.

Mrs. C. W. Wallace and son Frank, of Huntington, W. Va., were in the city during the past week, attending the "Turn" convention, and called on all the local jewelers of the city.

Jerome Thoma, of the Thoma Bros., was married, Thursday, June 24, to Marcella Snyder, of Chicago, at the home of the bride's grandmother, Mrs. De Lexington Ave., Dayton-view, Dayton, O. The happy couple will spend a month at a seashore, and on their return will get housekeeping on one of the hilltops of the city.

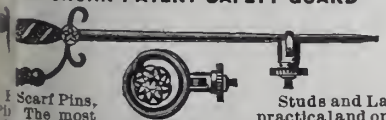

Out-of-town jewelers in the city at stock were: Fred Goosmann, Somerset, Tenn.; Herman A. Rohs, Cynthia, W. C. Klein, Connersville, Ind.; J. E. Martin's Ferry, O.; Al. Irrion, Louisville, Ky.; M. Sidwell, Elwood, Ind.; A. J. Warab, Dayton, O.; William Gasser, Fremont, O.; D. A. Sewell, Wilmington, O.; C. L. Constiel, Nashville, Tenn.; Herman F. Louisville, Ky.; Phil. Horr, Aurora, Ill.; A. J. Schlegel, Chillicothe, O.; Frank merling, Hillsboro, O.; M. Hapsburg, Siletown, O.; Will Bichman, Pomeroy, O.; Louis Tweel, Huntington, W. Va.; M. Wolford, Piqua, O., and Fred Clinch, canum O.

Byron Brewster, Kingston, N. Y., bought the business of the late P. A. 569 Broadway. Mr. Brewster has been engaged in the jewelry trade for about 25 years, conducting stores at Roxbury, Catskill. He has recently been employed by C. V. L. Pitts & Son.

A watch manufacturer established since 1878 wishes to represent firm for the buying and forwarding of goods. Could also make watch in good and ordinary quality. Good references. Apply to W-6553-C Haasenstein & Vogler, CHAU-DE-FONDS.

PROPOSALS FOR EYEGLASSES FOR INDIAN SERVICE.—Department of the Interior, Office of Indian Affairs, Washington, D. C. 28, 1909. SEALED PROPOSALS placed on the outside of the envelope "Proposals for Eyeglasses for the Indian Service," and addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office and delivered at Phoenix, Arizona, at two o'clock p. m., of July 28, 1909, for such eyeglasses as may be prescribed for during that period. Bidders should give a price per pair for spherical and cylindrical and the two in combination, fitted ready to and should quote prices per pair for steel, minimum, German silver and gold filled frames and frames will be subject to rigid inspection and test by a competent person. It is reserved to reject any or all bids or any of any bid, if deemed for the best interest of Service. Each bid must be accompanied by certified check or draft on some United States depository or solvent national bank made to the order of the Commissioner of Indian Affairs, for at least 5 per cent. of the price. Each check or draft shall be forfeited if the bidder fails to execute promptly a satisfactory contract in accordance with his bid; otherwise returned to the bidder. For further information apply to F. E. LEUPP, Commissioner.

Seasonable and Salable

This is the season for Racing and Outdoor Sports in general, and nearly every dealer should find some sale for a line of high-grade

Chronographs
Split Seconds
Split Repeaters
Minute Repeaters

Be ready for this demand, whether large or small, with watches that will successfully meet all competition.

The watches referred to are made by several prominent manufacturers, and the variety, while large enough for all possible purposes, is still limited to those goods which in our experience have proved to be most worthy, desirable and reliable.

Write for further information, prices, etc.

Art and Education as Factors in the Business of the Retail Jeweler.

Extract of address delivered at Washington, D. C., by J. P. ARCHIBALD, President American National Retail Jewelers' Association.)

ORGANIZATION work has been a great factor in the betterment of the condition of the retail jeweler. Do you appreciate organization? In my visit to your city I find many of your jewelers did not know the other man. I have introduced you to your brother jeweler to-day. Is it possible that you have lived on the same street and did not know each other? It does not seem true, and 'tis a pity 'tis true. Our slogan for this year has been a fixed selling price on all watch movements separately, and a fixed selling price on all gold filled cases separately. We do not favor complete watches kept with very high grade movements. The reason for our stand in this matter is our stock watches will have to be doubled or even more in order to carry an assortment of complete watches. If you will notice the trade prices for watches you will see a complete exposition of this matter. The writer has written a few paragraphs in the journals along this line. We favor a horological law that will require all watchmakers to pass a State examination under a competent committee appointed by the protective governors. This will raise the standard of our watchmakers. It will give them something to which to work. A man's standing as a watchmaker will be determined by means of an examination. Our watchmakers have made very little advancement in the past years. To-day any man works as an apprentice for a few months and thinks he is a watchmaker. Our watchmakers are

no longer special skilled mechanics. A new impulse should be stirred along these lines. The time has come when the retail salesman and mechanic should be divorced. We find from observations that very few good watchmakers are good salesmen. Let us cultivate both branches of our industry. Let us emphasize horological study. Let us urge better preparations of our mechanics. Let us require more fundamental education for our apprentices. Let us require years of service at the bench. Then let each apprentice pass a competent examination. We would have no scarcity of skilled watchmakers to-day if there was a standard of requirements. High standards always brings seekers for the standard. The retail jeweler has long ago lost sight of the fundamental in the jewelry business, that is, "Art." Artistic education seems to have been lost sight of in the scramble for trade. It is essential that the artistic element should be cultivated to a high degree. There soon will be no distinctive jewelry craft but a scramble to supply the trade with trinkets or goods that any merchant can furnish. The dignity of the craft should be raised. The public cannot do that. It is our place to exercise preference for tasteful and artistic products. The task of education rests upon the jeweler and silversmith. The retail jeweler should be educated in art. He should read along this line. He should make a careful study of art. He should cultivate a taste for things aesthetic and beautiful. A retail jeweler should be a competent judge of artistic articles. If we are mechanics and also salesmen, we cannot elevate the jewelry business to the standard it deserves. By the proper dissemination of knowledge and the most careful study of things artistic, we may be able to put our business on a plane where other lines of trade cannot injure us. Let us all begin the study

of art. Make your knowledge of art so valuable that the lover of beautiful goods will purchase his goods from you, because you know what constitutes art. I do not know of any city where the knowledge of art is so valuable as the nation's capital. To-day we have more than 30 States working in unison for the betterment of the retail jeweler. Within a few short years we predict all States will be in our National Association working in unison for the elevation of our craft. If the retail jeweler is to live and do business, he must awaken from his inactivity and become a live, active, thrifty merchant. The mail order house, the hardware store, the street peddler, the bargain store, the retailing jobber all these have been working against our interests. They will continue to take our business and flourish unless we bestir ourselves to activity. Our organization is gaining much strength every day. Our organization is for mutual uplifting of our trade. We are not in favor of harsh measures. We are opposed to any form of "boycott." We believe in uplifting our business to a higher plane. We ask the hearty co-operation of jobbers and manufacturers in our protection for the elimination of trade abuses. Are you aware, brother jeweler, it is estimated that each man in the United States, from the poorest to the richest, wears in an average lifetime about 35 suits of clothes? These clothes are sold on an average profit to us all at about 50 to 150 per cent. profit. Do you know that the estimated average number of watches to each man in the United States in a lifetime is one and one-half watches, or in other words, every 100 men use in a lifetime 150 watches. The average profit on these is less than 50 per cent. on all grades. The retail jeweler should make more profit on watches. A watch is worn for almost a lifetime. Furthermore the retail jeweler has to regulate a watch, guarantee the same, and sometimes the guarantee costs the jeweler considerable annoyance and labor. Our association is working to raise the standard of quality in all lines of jewelry and silverware. Our association asks the co-operation of all manufacturers for the betterment of the quality of our goods. We are urging the passage of laws making it compulsory to mark all goods just what they are. Brother jewelers of the District of Columbia, we ask you to take hold of the organization movement as the States have done. Are you ready to organize? Are you willing to spend \$3 a year for the protection of your own interests? Will you go out into city and district and secure every jeweler? Organize to-day, not next week. Elect the best men in your district to office. Elect men who are broad minded. Elect men who have the respect of the trade. Meet every month or two. Meet much oftener if you can. Keep up interest. Keep in touch with each member. Be no longer harsh competitors but fellow "business associates." Read your trade papers, for they are the mouthpieces of the organization movement. Read the trade press for your own instruction. Read the trade press to know what what other States are doing. The hope of every good cause lies in education. The recognition of this fact is the keynote of our organization movement. To acquire information, to better our condition, and to help our fellow men, are three duties that to us mortals should be pleasures. Therefore, if you are a young man, come with us for the information you will gain. If you are poor in the world's goods, come with us for the financial benefit that will accrue to you. If you have arrived at the evening of life, come and give us the benefit of your knowledge that your years of experience has given you.

Imports of Clocks, Watches, Jewelry and Gems Into Canada.

TORONTO, Ont., June 19—The monthly report of the Canadian Department of Trade and Commerce for March, just issued, gives the value of imports for home consumption in the jewelry and allied trades as follows:

“Have
You
 the
 Elgin
 with
 the
 49
 Dial?”

“H AVE you the Elgin with the 49 Dial?”
 Such a question will soon mean money to you, because it’s one that’s going to be asked everywhere and often.

Back of it is the demand that is being created for the new Railroad Elgin through the medium of advertising in Railroad magazines and the telling of this innovation among watches.

This watch is making a strong appeal to railroad men and others because of its readable dial. The hands are large, the figures big and plain, the dial either of white enamel or silver finished metal. This latter is the only metal dial with hard *inlaid enamel figures*. It catches the faintest glimmer and is easily legible in dim light, besides being proof against the chemical action of cleaning fluids.

This new Railroad Elgin is the thinnest and most compact 18 size movement made. It is cased at the factory.

Don’t wait until you see two or three prospective customers go elsewhere before you lay in a stock, but write now, **RIGIT NOW**, for prices and terms. Your jobber can give you full particulars. Or write direct to the Company.

Be ready when the demand is made for the Railroad Elgin with the “49 silver” or “49 enamel” dial.

These are the four grades and established retail prices as advertised :

	GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILL
VERITAS	23 JEWELS		\$46.00	\$48.00
VERITAS	21 JEWELS		\$43.00	\$45.00
FATHER TIME (VERITAS MODEL)	21 JEWELS		\$38.00	\$40.00
B. W. RAYMOND	19 JEWELS		\$34.00	\$36.00

The Adjustment of Watches.

Written expressly for The Jewelers' Circular-Weekly by H. Reinecke.

THE principal occupation of well instructed watch repairers at the present time, when most all reliable watches are made with the lever escapement, with equal balance springs and compensation balances, is the adjustment of such watches in positions and to changes of temperature. Though the adjustments to changes of temperature antedate the position adjustments, the latter have had of late years the most zealous attention. While in the adjustments of pendulum regulators the gravitation length of the pendulum and its limited vibration have been of leading importance, in watches the more difficult question has been how best to replace the management of these regulating factors by the elasticity of the balance spring and the inertia of the balance.

In the case of the pendulum clocks the amount of vibration is very small and in astronomical clocks the weight of the bob of the pendulum is so heavy that the difference between the long and short vibrations can hardly be estimated. Very great is the difference from this extent of the pendulum the vibration of a watch balance, which will amount in some cases to an angle of 480 degrees and beyond. That the vibrations of varying extent consumed more or less time was readily observed in the 18th century by the makers of marine chronometers, from among whom we may mention Berthoud, LeRoy, Breguet and others, who by patient experiments finally succeeded in equalizing the time consumed by either the long or short vibrations of the balance by altering the end curves of the balance springs, which in ship chronometers were of a cylindrical form. But watches could only be made with flat balance springs on account of their limited size, Breguet finally succeeded in making these flat springs equally adjustable with a single overcoil and applied them to pocket watches or chronometers.

But in order to impart to such Breguet springs other properties which were possessed by the cylindrical springs involved great labor and experiments in every individual application of such a spring, and Breguet did not succeed in laying down the necessary rules for applying such a spring. This problem remained to be solved by the

French mining engineer, Philipps, who laid down mathematical rules by means of which curves could be formed, with the assistance of which not only could equally timed or isochronous long and short vibrations be produced, but which also could produce the following noteworthy properties in the balance spring:

1. The center of gravity of the balance spring would always be on the axis of the balance.

2. The balance spring when in action, contracting or expanding, would not produce any lateral pressure on the pivots of the balance.

It is commonly assumed that by the simple employment of one of these Philipps' curves isochronism in the motion of the balance can be produced in every instance, but such assumption is a great error. A theoretical balance is one having all its weight in the rim, no friction at its pivots and connection with an escapement. For such a balance mathematicians can plan an overcoil for the hairspring which will make by equally progressive flexion the long and short vibrations equal. But as a theoretical balance is impossible in practice, so a theoretical curve is impossible.

Just as friction of the pivots at the escapement and balances having long and short staffs differ, the same may be said of the weight or momentum of such balances or the diameter of the collets of the balance springs or of their length, etc. So the curve to obtain isochronism will differ in each watch and must be made to suit each individual case by trial. If it is perfectly true then the isochronous motion of the balance in each duplicate size of a fine quality of gent's Swiss watch is easily attained, because the balances of such are of an equal momentum, *i. e.*, about 0.62 of an inch in diameter and weigh about eight grains Troy, with a balance spring of 14 coils.

But in my 30 years' experience in adjusting watches I have met some with balances weighing from $7\frac{1}{2}$ to 16 grains Troy and of diameters from 0.62 to 0.75 of an inch in diameter, and balance springs of from 10 to 20 coils.

(To be continued.)

Sun-Dials that Beautify the Landscape.

ILLUSTRATED herewith is a sun-dial which was recently constructed by Claude L. Wooley, of Baltimore, Md., who has made a scientific study of this form of timepiece which is lately becoming quite popular as an object both of utility and decoration on the expansive lawns of country homes. The dial shown herewith is a 10 inch horizontal dial made of aluminum and will shortly be placed on top of a marble shaft at Loudon Park Cemetery, near Baltimore. It bears the inscription "Shadows we are and like shadows depart." The dial was exhibited for some time in the show window of the store of George T. Sadtler & Sons, retail jewelers of Baltimore.

It has been Mr. Wooley's experience that aluminum is especially well adapted to the construction of dials for which brass was formerly used a great deal. Aluminum, it has been found, does not tarnish and the shadow can always be seen, whereas a brass dial when exposed to the weather soon turns so black that the engraving and shadow finally become invisible. Moreover, the aluminum is very easily manipulated and engraved, and costs only a trifle more than brass for a given size. Mr. Wooley, in an illustrated article published in the *American Architect*, issue of Jan. 27 last, explained clearly how to calculate for horizontal and vertical forms of dials the location or latitude by means of a simple and accurate geometrical method. This explanation which is printed below, will be found particularly useful to jewelers.

THE HORIZONTAL DIAL.

Let us consider first the horizontal type of circular form, a finished dial of which is shown in the illustration, Fig. 1. The latitude of the place where the dial is to be located must first be ascertained, either with the aid of an Atlas or by consulting the officials of the National Survey, Washington, D. C.

The angle of the gnomon, or piece that casts the shadow, is then laid out, as shown in Fig. 2, of an angle equal to the latitude of the place, the exact size depending upon the size of dial it is proposed to make. As an illustration, the angle of 42 degrees has been selected, it being suitable for Boston, Mass., and a distance of 100 miles south of it. The position of the hour lines in the diagram may not be perfectly accurate, the drawing being very small, and being intended only as an illustration of the method.

The line A B, Fig. 2, shows the base that rests on the face of the dial; B C

WALTHAM WATCHES

FIFTY YEARS AGO

FRIDAY, APRIL 22, 1859.—The proprietors and workmen of the watch factory at Waltham were entertained by Gov. Banks at his residence today. About 200 men and women were present.

From Boston Advertiser, April 22, 1909.

The Waltham factory had existed five years. Here was the first successful effort to realize the dream of Dennison, father of American watch-making. Here was the first and only structure in the world erected for manufacturing pocket timepieces. Three hundred people were employed, the largest number ever assembled in such an enterprise. General Banks was proud of Waltham, where he was born and where he had worked as bobbin boy in a cotton mill. He found time, while Governor of a great State, to greet and encourage the operatives of this watch factory, because he believed that they were creating an imperishable industry. He lived until the word WALTHAM had symbolized the perfect watch in every country on the globe.

In that year, 1859, the total number of Waltham watches manufactured was 12,304; in 1906, the product was 855,000; to-day there are 16,000,000 in use. The Waltham factory was the parent factory. It is now the corner-stone of an industry that gives a livelihood to more than 100,000 persons in the United States. In 1859, it was the only institution of its kind here or anywhere else; every other watch factory came later. The Waltham factory is distinguished by its achievements as well as by its age. Waltham watches have always exemplified the highest type of watch construction, and public recognition of their superiority is attested by the highest awards at all the great Expositions wherever they have been shown.

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing on this hemisphere.

levation, and the dotted line that part that is usually cut away to produce a pleasing effect; the line A C, which is the shadow, must not, however, be described.

Having decided upon the thickness of the gnomon to be used, which is usually $\frac{1}{4}$ or $\frac{1}{2}$ inch for the purposes of calculation, draw the lines E D, and G F, Fig. 3, each eight inches long, and a distance apart equal to the thickness of the gnomon. Then draw I D, G K, H E and each 5 inches long; and H L and K

FIG. 1.

each $2\frac{1}{2}$ inches; and the line L to M drawn.

The exact size of the border lines, P, Q, R, N, are not material. Draw the angle to that of the gnomon. Fig. 2, shown by the dotted lines, Fig. 3, the side A C being on the line G F. A being at G, and being C B, and XG being B A, exactly shown in the diagram. Now extend the line G F upward from F, a distance exactly equal to the line F X. Extend out the line to an indefinite distance to the right; draw diagonal lines as shown, at an angle of 15 degrees apart, until they meet the line F J, at S, T, U, V and W. From the points where they meet this line draw lines perpendicular to the angle at G.

These lines extending into G are the hour lines from one to six; the two middle lines, F G, being the 12 o'clock lines

Fig. 2

Repeat this whole operation on the other side for the hours 6 A. M. to 12 M. If the lines 5 A. M. and 7 P. M. (which are rarely needed) are desired, run them parallel with the 5 P. M. and 7 A. M. lines, as shown. Proceed for the thickness of the gnomon. Accuracy in all the measurements is required, particularly in the lines 15 degrees apart, as a slight error here will multiply the error. Having thus obtained the hour lines on a larger dial is required extend the hour lines out to the desired size square or rectangle. If a smaller dial is desired draw it in and erase the portion of lines extending.

Place the hour figures outside, in line with the hour lines, commencing with 5 A. M. (if it is used) otherwise, 6 A. M., at the lower left hand side, and continuing around to 6 or 7 P. M., as the case may be, at the right hand lower side. The point A

of the gnomon, when in position, rests on the 6 A. M., 6 P. M. line, and extends towards 12 on the lines E D, G F, it being from A to B. See Fig. 2 about two-thirds of the length from E G to D F, whatever the size of the dial may be.

These calculations will also be correct for places on a line, or near to a line drawn east and west from the place originally calculated for, but for locations north or south, new calculations must be made, as the gnomon angle and hour lines change

The dial itself may be made of marble, with the hour lines and figures cut into the surface; the gnomon of bronze or brass being imbedded in a groove with cement or melted sulphur. In this case allowance must be made for that portion of the gnomon buried, but the angle must not be changed. Or brass, bronze or aluminium may be used for the whole dial, the gnomon being brazed in position or held in place by small angle braces and rivets.

The supporting base is usually three feet or more above ground, and extends down, or stands on a foundation below frost. The dial should be placed horizontally, and its gnomon point to the true north (usually a little east of the magnetic

Fig. 3

north; more particular directions regarding setting will be given further on.

THE VERTICAL DIAL.

The range of the vertical dial is from 6 A. M. to 6 P. M., and it is placed vertically on a wall or support running exactly, or very nearly, true east and west; the dial facing south, and the slope of the gnomon, as in the case of the horizontal, pointing to the true north or North Star. In the vertical dial the same angle is used for a given location as in the case of the horizontal, but it is attached to the vertical face of the dial by the side B C, Fig. 2, instead of being supported on A B, as in the case of the horizontal. In its calculation the same general rule is followed, as in the case of the horizontal, save that the angle is placed in the square shown by the dotted lines, Fig. 4, in a reversed position, as it were, with the side A C resting on the right hand 12 line. A C, C B and A B of Fig. 4, corresponding to the same letters of Fig. 2. Then proceed, as in the case of the horizontal, repeating on the left hand side. The hour lines having been established, turn the drawing over, and place the hour figures as shown in Figs. 4 and 5.

The square of the finished dial may be made of any desired size, the hour lines previously established being extended out to it, and the gnomon made on the same relative proportion as in the case of the horizontal, the angle C, Fig. 2, resting on the 6 A. M., 6 P. M. line, and extending

about two-thirds down toward 12, the side C B resting against the face of the dial. The gnomon is usually made in skeleton form, of brass, or iron well painted with red lead, and paint. Marble or other stone is usually used for the dial face, though wood, well painted and battened, is sometimes made use of. If a wall runs other than true east and west, unless the dial is supported away from it at one end or the other, the hour lines becoming irregular, their calculation become so complicated as to be beyond the scope of the present article.

Fig. 4

Sun-dials give solar time, and if correctly set correspond with clock time on Dec. 25, April 15, June 15 and Sept. 1. At other times they run more or less fast or slow, as shown by the table of equation of time below.

To set either a vertical or horizontal dial accurately, first place vertical or horizontal, as the dial is of the former or latter type, and then turn so that the shadow falls exactly on the 12 o'clock lines, when the watch is as many minutes before, or after 12, as the dial is shown to be fast or slow on any particular date, by the table, and secure in place.

Practically correct time may be obtained from a dial correctly set any bright day by adding to or subtracting from the reading of the dial the required number of

Fig. 5

minutes that it is slow or fast on that date as per table.

It has been the custom to inscribe suitable mottoes upon dials, and many have been used. Lack of space prevents the repetition of any considerable number, but a few of the more pleasing follow:

"Let others tell of storms and showers,
I number only sunny hours."

"You ask the hour; meanwhile you see it fly,

SOUTH BEND, INDIANA, June 21st, 1909.

To the Retail Jewelers of the United States of America:

This Company not only ALWAYS HAS DESIRED to market its product through the legitimate trade exclusively, but always has DONE so.

We always believed, as others seem to be discovering recently, that it is for the best interests of the retail watch dealer that our goods should not be handled by MAIL ORDER HOUSES nor by JOBBERS IN DRY GOODS, HARDWARE or GENERAL MERCHANDISE.

With this object in view, we have not only *requested* that class of dealers to omit SOUTH BEND WATCHES from their catalogues, but we have ABSOLUTELY REFUSED TO SELL THEM. Furthermore, we have considered it necessary, in order to carry out this policy with thoroughness and to be able to protect the retail jeweler as we intended to, that we would have to sell our product direct to the retailer, and not market same through the jobber, no matter how reputable that jobber might be.

Under this plan of marketing our product, it has not been necessary for us to in any way apologize to the retail trade for what we have done in the past, but we have always been anxious to tell them what we *were doing* and what we *would do* in the future.

This important step which was taken for the benefit of the legitimate retail watch dealer and the protection of his profits, and also because we know that he offers a means by which our watches can reach the public with the greatest satisfaction for all concerned, has not been deviated from in one single instance since it was taken at the time of the formation of this Company.

We are pleased to note that several other Watch Companies *NOW* feel that the retail jeweler is entitled to some consideration, and after casting about for some time have finally decided to adopt the SOUTH BEND policy.

We appreciate very much the numerous expressions of appreciation that are being sent to us by our customers, and assure the retail jewelers that their continued co-operation with our policy will bring about even greater benefits to them, than have accrued in the past, and we cannot but feel that credit for this condition is being given, where credit is due.

Yours for protection and co-operation,

SOUTH BEND WATCH COMPANY

Nor can the hour return that passes by."

"I come and go, and go and come, each day,
But thou, without return, must pass away."

"Remember thou, that here we two combine,
Thou reckonest my hour, as I do thine."

"Sic transit gloria mundi."
(So passes the glory of the world.)

"My time is in Thy hand."

The following motto from Omar Khayyam has been inscribed upon a very handsome marble horizontal dial recently erected by Mr. Wm. McCoy, of Baltimore:

Live while you live, and let each day be sweet,
or time slipping from beneath your feet."

His Kick.

"YOU don't remember, I reckon," said the sour-faced man, putting his arms on the show case, "that I bought a clock of you 25 years ago?"

"I certainly do not," answered the elderly jeweler, "but I'll take your word for it if you say you did."

"Well, I did. It was 25 years ago last Monday."

"Remember what you paid for it?"

"Yes; I paid you \$10."

"Ever had to get it repaired?"

"No."

"It's a pretty good clock, then, isn't it?"

"Oh, yes, the clock's all right. But I've found out something about it that you don't tell me."

"So?"

"Yes. When I bought it I asked you how often I'd have to wind it. You said once a week."

"Well?"

"Well, I've just found out that it'll go eight days without winding."

"Certainly: most clocks are eight-day clocks. That's to allow for your forgetting to wind it sometimes."

"I never forget to wind it, sir. Regularly every Monday morning for 25 years I've wound that clock. That makes 52 times a year. If I had known it would go eight days I would have wound it on the eighth day, and I would have had to wind it only 5 times a year. It takes me about two minutes to wind it up. I've wasted 12 minutes every year on the thing. See? In 25 years I've put in 300 minutes, or five hours, the half of a man's working day, standing in a chair and winding up that blamed old clock when it didn't need winding!"

"Well," said the stupefied jeweler, "what do you want me to do about it?"

"Nothing, sir. I only wanted you to

know it, sir; that's all. When you sell an eight-day clock to a man you ought to tell him it's an eight-day clock. Good day, sir!"

Straightening himself up and pulling his hat brim down in front, he turned on his heel and stalked out of the store with the air of a man with a grouch who had freed his mind.—C. W. T., in the *Chicago Tribune*.

Clock with Automaton Depicting Royalty.

A CLOCK owned by Bernard Fritsch, Cincinnati, O., has excited considerable interest. The dial and works, which bear the traces of the Bonaparte era, are encased in

Mother Earth Yields Up Watch Which Had Been Inhumed for 16 Years.

FREMONT, Nebr., June 23, 1909.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

The watch which I am sending to you was lost in a corn-field 16 years ago. The field was planted with corn a number of years afterward, then used as meadow and pasture, and later plowed up for corn. The owner always had an eye out for the watch, should it turn up.

A few weeks ago, when plowing, Alfred Rasmussen, a farmer's son, found the

WATCH CASE COVERED WITH RUST WHICH NOW RESEMBLES GUN METAL.

an attractive walnut cabinet of recent make, the original case having been damaged while the clock was being brought from Saxony to this country. There is a musical attachment which plays several melodies by Mozart! While the music is being played automaton soldiers in full dress uniform ostensibly perform on flutes and oboes.

watch. It was brought in to me to see if it was worth repairing. I examined it and found the movement rusted in the case, so could not remove it. I had to remove the barrel bridge and take down the movement inside the inner case. I found the watch could be put in good order at small cost.

MOVEMENT STILL IN GOOD CONDITION AFTER 16 YEARS' INHUMATION.

which they hold in their hands. Another automaton scene shows an apartment where three distinguished personages—Francis I. of Austria; Frederick William III., of Prussia, and Alexander I., of Russia—are engaged in a game of cards at a table. While the music is playing each man turns his head toward the other as if suspicious of his opponents.

The winding square was rusted, the pinion hands were rusted off, but no great damage was done. In a short time I had the movement running and took a rate of 20 for the first 24 hours.

The case on the outside has been left as it was found. It resembles a gun-metal case. The nickel inside was polished, as you see.

Letters from Retail Jewelers and Importers Upon the Marking Provisions of the Proposed Watch and Clock Tariff.

CEDAR RAPIDS, Ia., June 15, 1909.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

We would like to ask a few questions through your esteemed journal.

1. Do the American watch companies really and sincerely want to protect the jewelers and consumers by having the pedigree engraved on Swiss movements? Or is it their idea and intention, solely, to help the jewelers who handle them with their name on from continuing that custom by asking Congress to pass the Payne tariff bill with such a pernicious clause, calling for the marking of such a pedigree on each movement? Does it not prove on the face of it that they are not sincere and want to protect themselves only from this fair and honest competition?

2. Have the American watch companies ever claimed or pleaded the necessity of protection and higher duties, and would this plea be recognized if they did? They do not need it, do they? They prove they do not need it by harping on other things, such as undervaluation, which in the case of the Swiss importing business is the worst excuse imaginable. Doesn't everything go to prove that they are striking at these dealers who use the Swiss watch to build their individuality and reputation, and to have helped materially to build the reputation of the American watch?

3. Would the watch manufacturers agree to protect the jeweler or give to them the same that they are asking Congress to do for the watch industry? Never in a thousand years. Are they not asking Congress to legislate against the jeweler for the benefit of themselves?

We ask your consideration of these questions and would be glad to have your answer or the answer of any watch factory in America.

We ask you to kindly publish this, and in advance would thank you for your kindness.

Yours very truly,

LUDY & TAYLOR Co.

UTICA, N. Y., June 19, 1909.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

My attention has been called to a statement that 95 per cent. of the retail jewelers of this country favor the watch schedule of the new tariff bill, in which the rate of duty is raised on certain grades of foreign watches, and certain prohibitive markings compelled on other finer grades, where the rate of duty would not prevent their importation and sale.

I wish to take issue with this statement. Because there is no one authorized to speak for the retail jewelers of this country on this subject. Whatever has been said by presidents of different associations has been their own individual opinions, as no resolutions have been passed by any association, so far as I know.

I understand that there are 4,000 jewelers in the State of New York, and as our state is unaffiliated with the National Association the National Association cannot speak for us. The writer is not authorized to speak for the New York State Association.

but I can truthfully state that at least 50 per cent. of the retail jewelers of the State of New York (and this includes the better class of jewelers) handle Swiss watches, and find they give better satisfaction than the American watches of the same grade. If the American watch companies would save some of the money which they spend on advertising and put the same amount into the adjusting and regulating departments of their factories they could much sooner eliminate foreign competition than by high tariffs or restrictive inscriptions.

The average jeweler prefers selling an American watch, but he has to consider his own reputation in the matter, as well as the business welfare of the American manufacturer. But when a retail jeweler has to do the regulating of watches which should have been done at the factories it is natural that he should try to get hold of a watch movement which has had more done to it than "putting together."

It seems to me that American manufacturers in all lines are afforded sufficient protection by the Dingley tariff bill, and to further increase these duties will be to lessen the amount received by our Government, as many of the new schedules are practically prohibitive.

While I am writing this letter, I realize that the protests of the retail jeweler will not avail much in the present case, as the voice of the people, about which we often hear, is not heard very distinctly by those who are supposed to represent the people's interests in the national government.

Very truly yours,

C. T. EVANS,

President New York State Retail Jewelers' Association.

BOSTON, Mass., June 23, 1909.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

Will you permit an old subscriber to say a word in your columns in answer to the discussion now going on in the trade as to the proposed watch tariff. I would like to call attention to one or two points which I think have been overlooked by the jewelers who do not favor the change.

Though I have read considerable in the trade journals and discussed the matter with a number of my associates in business, I have seen little opposition to the new tariff, as far as the duty itself is concerned. The principal opposition from importers and retailers seems to come to that provision of the schedule which applies to the marking of the movements. Though many members of the trade have asserted that it will be impossible to make the movements in accordance with the law, I understand that for exhibition purposes and to prove that it is possible, a number of very small movements have been marked in this way and that a number of these were submitted to Congress. If this is true I think that part of the question is disposed of.

But, between ourselves, I think the real

opposition comes not from the fact that such marking is impossible, but that it is *undesirable*, at least as far as a great many jewelers are concerned, especially those who sell Swiss watches under their own name, treating the watches as their own product and practically standing behind the watch, as far as the customer is concerned, as if they were the actual makers. This, of course, gives the jeweler a chance to charge a proper profit in proportion to what a personal guarantee of this kind is worth. If the watches are stamped as Congress proposes to stamp them the customer will quickly see that the watch is not the jeweler's product and that he can get it from other jewelers in the town, and he can probably shop around to get the best price.

Such a condition undoubtedly would be annoying, but the jewelry trade must remember that, although the customers in many instances may look upon them as makers of rings and certain other articles which they carry, the day is past when the customer looks upon the jewelers as the makers of the watches which they sell. The general advertising of watch companies and catalogue houses may have brought this about, or it may be due to the better education or higher intelligence of the buyers to-day. No matter what be the cause, we must remember that the customer *knows* that the jeweler simply buys watches from a manufacturer or jobber. If he wishes to shop he will do so, whether the name of the manufacturers be engraved or stamped in full upon the plates or not.

It may be that a large house like Tiffany & Co. can be hurt by the proposed regulation, but as far as the small jewelers are concerned I think that if the law is passed they will find that they are making a "mountain out of a mole hill."

Yours very truly,

AN OLD SUBSCRIBER.

Novelties in Diamonds.

THAT there is always something new in the diamond cutting industry is illustrated by two diamonds which have just been cut by I. Bloom, of New York, an expert diamond cutter. One of the stones is cut in the shape of an airship, tapering at both ends to a point. It weighs 11/16 of a carat and is a beautiful blue white. Because of its smallness the work of cutting was a very difficult task. It is perfect in shape and has 106 facets. The other diamond is light brown and is lentel shaped. It weighs 7/16 carats, and has 96 facets.

It took Mr. Bloom about six weeks to cut these two diamonds. The true beauty of the work is brought out when the stones are viewed under a glass. Mr. Bloom says that these are the first stones cut in this way in this country so far as he knows. He does not predict that these shapes will prove popular, but says that they are novelties in the cutting of stones.

The Various Functions of Good Advertising.

WID it ever occur to the casual observer of advertising that it did a great deal more than merely to promote the publicity of the thing advertised? Of course, in a large city, where everything is at tension for each man is for himself, the advertisement is narrowed to that limited purpose, and all the advertising is not done in the large cities. All over this great land large small towns are scattered, and each has the advertising spirit and its force of advertisers. They may be advertising secretly for their own publicity and profit, unconsciously, let us say, they are improving their communities, says *Fame*.

It is not particularly creditable to our whole merchant class—that is, those merchants in the country towns—that they are careless in the handling of their goods as they are; but their customers do not understand city methods, and the merchants are along in a slipshod way because there is no demand that they do otherwise. But let one merchant come to a town of this kind who has more enterprise in his system than the old foggy merchants. They have been advertisers in their way, and have believed in it because it had them good; but they conducted their advertising pretty much as they conducted their stores, with no especial method beyond giving it before the public somehow or another. The merchant of method comes in and begins to do things better. He advertises with method, and he makes his store look like his advertisements.

Customers find his stock properly displayed and always up to date. They find his windows attractive and they stop to look in them. They talk about them to other people, and other people go to the store place because they find a sort of an inspiration in its newness, freshness and activity. They have been pokey before because there was no opportunity for the development of any other feeling. But this is different and they like it, and the enterprising merchant finds that he is getting the long-established customers of the old merchants.

The old merchants don't like it, of course, and they kick and growl, but the new man does not let that disturb him. He knows his business and he attends to it. Presently one of the old chaps begins to open his eyes and look around his stock of goods. He has been looking at it all his life, but never saw it before. He sees it now in comparison with that of the better man and concludes that he will make a few improvements. He does, and while he is at it other merchants begin to see what they had never

seen before, and they follow suit. The result is that the entire business appearance of the town changes. Windows are gay, shops are bright, the streets in front are improved, the newspapers look lively and the people themselves move up a peg or two in better clothes and better surroundings at home, better furniture, better carpets, better houses. The whole atmosphere changes for good. A visitor returning after five years of absence would hardly know the town. Has it grown so much? No. The population has only increased at a normal ratio, but the people have been stirred up to make better use of what they had about them, or could get if they exerted themselves.

And why? Simply because somebody began to advertise his business. He did that to introduce himself, and, being a stranger, he had to meet his promises. He invited the people to see him, and he didn't know them well enough to give them any old thing that happened along. He had to have an attractive store filled with attractive goods, attractively displayed. Naturally the people liked that, because there's none so careless but likes what is attractive, and they responded in a manner that encouraged the stranger to greater efforts.

When his competitors saw what he was doing self-preservation drove them to similar efforts. The result was advance all along the lines until the town itself had to get itself in more presentable shape. The people began to realize that they could not praise their town and talk about its business enterprise unless they had something to show for it as a town, and they got at it and cleaned up the streets, put them in proper condition, repaired old buildings and erected new ones, and in every way let the world know that they didn't advertise one thing and offer another to people who came after it.

It is a fact easily capable of proof that any town whose merchants are good advertisers is a better looking, better conducted town, with better things and better people than the town whose merchants are not advertisers. There is something in the spirit of advertising which makes for better things, and wherever it thrives the community reflects its thrift in a condition no less visible to the sight than to the mental, moral and material sense. *Per contra*, the town whose people are not advertisers shows it visibly as a town, and its people are known to the outside world by those unmistakable marks which are the unceasing delight of the man with the time-honored gold brick.

What Good Advertising Means.

(Extract from an address by REED MOYER, with Weinstein, Lubin & Co., Sacramento, Cal., before the Retail Merchants' Association of Portland, Ore.)

THE important things in advertising are not the technical details of writing and printing. You can employ authors by the dozen at very small salaries. But a competent advertiser must know your business thoroughly, must know your trade, your field of business, be in sympathy with and have a full knowledge of your business ideas, and know how to merchandise goods. That is why I say that every merchant ought to know most about advertising his business. And if it is necessary for him to employ an advertising man, I think that he ought to keep in constant touch with his policy and ideas.

I speak of these facts because they do not seem to be widely recognized, except by the small number of business men who have made a great advertising success. Many merchants who are sound business men otherwise will often refer to a certain announcement as a "clever ad," when it is really a bunch of hot air.

Advertising is salesmanship, and just as you expect a salesman to be level-headed, intelligent and truthful, and able to talk about the specific selling points of your merchandise, so must an advertising man be able to talk everyday facts in a commonsense, intelligent manner. An advertising man who can talk to your customers in a convincing way, in a way to create desire for specific articles, in a way that can be backed up by the merchandise, is the kind of a man you can entrust with your advertising appropriation, providing that he also knows what to advertise and when to advertise it.

There is nothing in the world so interesting as simple facts that you want to know, truthfully told. The great orator is not the man who weaves beautiful strings of words, but the man who can state the facts in a simple, logical, authoritative manner. The junk store that has just bought out the leading milliner of Paris or that has captured the greatest shoe bargains ever known cannot begin to equal the sales or profits of a store that keeps good merchandise at the right price at the right time, and tells in a simple manner the exact facts about it.
