STORE OF THE ERNSTING COMPANY, SAN DIEGO, CAL.

(Copy of Original Letter.)

SAN DIEGO, CAL., Jan. 20, 1909.

THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio,

Gentlemen—This being the second year that we have issued a catalogue compiled by your firm, we have taken special pains to note the result of such an undertaking.

In justice to the catalogue, we must give it credit for some good work that it has done for us.

Yours truly,

THE ERNSTING CO.

The Catalogs sent out by this firm since 1907 were made by The Arnstine Bros. Company.

KANSAS CITY, MO.

Feb 17, 1909.

(Copy of Original Letter.)

THE ARNSTINE BROS. CO.,
Cleveland, O.

Gentlemen—Your letter of the 14th received, asking our opinion of the Catalog you issued for us last year, this being the fifth season.

We were well pleased with this Catalog, and take pleasure in saying that it was an improvement over former years. The illustrations were good, also the printing. Since taking this Catalog our mail order business has improved from year to year, the last being the best, and our city business has likewise improved.

Wishing you success, we are,
Yours truly,

CADY & OLMSTEAD JEWELRY CO.,
Per E. A. Hosier, Treas.

To the Jobbing Trade of the Country

Gentlemen:—Last February I purchased the entire interest of my partner, Mr. Herman T. Regnell, of Regnell, Bigney & Co.

I have reorganized the Company and will do business in the future under the firm name of The Allison Manufacturing Co., makers of high grade goods, and will sell the jobbing trade only.

We are making a most beautiful line, in choice designs, of Brooches, Dutch Collar Pins, Sash Pins, Link Buttons, Scarf Pins, etc., also an exquisite line of enameled goods, Cuff Pins, Combination Sets, etc., tastefully mounted on pads.

You will make no mistake if you give our representative a few moments of your time when he calls upon you.

Waterman's Ideal Fountain Pen

Jewelers Are Responsible to the Public for a Good Watch and a Good Fountain Pen

Both the watch and the fountain pen are part of the pocket or desk equipment of every well provided man, woman or child. Both are useful (really necessities) and made in many styles and sizes. Accuracy is the all important part of both. That is what has made Waterman's Ideals the standard of all writing implements, and in addition there is the excellence of finish and finity of workmanship and quality, for which the three standard styles of Waterman's Ideals are so well known—

Regular, Safety and Self-Filling

Write for our handsome 84 page illustrated catalogue and selling suggestions. An important jewelers' line, that will bring you many profitable customers.

W. L. Waterman Co., 173 Broadway, N.Y.

The Largest Fountain Pen Manufacturers in the World

Boston Chicago San Francisco Montreal London Paris

This is the season of Graduations, which means *Class Pins*. Why let the business go to the mail order house when with our help, you can secure it. We will send you, on request, our large Catalog of Class Pins illustrating several hundred designs, and will send you sample pins to submit to the class after they have made their selection from the catalog.

Ye Mount Vernon Pattern

MADE BY

ROGERS, LUNT & BOWLEN CO.

Silversmiths

GREENFIELD, MASS.

*Write
for
Catalog*

A fine setting enhances the beauty of the rarest and most costly jewels.

Likewise, a fine oak or mahogany chest makes a desirable setting for ye Mount Vernon pattern, a distinct Colonial gem.

We can furnish these chests to suit any combination desired.

The Dorothy Vernon

A NEW WHITING PATTERN
IN STERLING SILVER FLATWARE

Made in the Complete Line—Dozen Work, Fancy Flatware, Cutlery—Ready for Delivery September 1st. Price Lists on Application.

IN its leading motive and the treatment of its details the new pattern is eminently suggestive of the English Renaissance designers of the 16th and 17th Centuries. It seems becoming therefore that it should be known by a name that not only recalls one of the most romantic episodes of the social history of that period, but is also intimately associated with the most significant existing example of English Renaissance Art and Architecture.

THE WHITING MFG. CO.

SILVERSMITHS BUILDING

15-17-19 MAIDEN LANE

NEW YORK

THE PANSY—In Sterling Silver

The Pansy is the latest pattern in sterling silver and has already proved extremely popular.

The design suggests daintiness, but is so symmetrical and well balanced that the pieces lose nothing in grace by being made in substantial weights.

The die work is of the very best and brings out each line clean cut and perfect.

The finish is grey, the soft tone lending itself admirably to the character of the design.

At moderate prices. Ask us for price-list.

SAN FRANCISCO

THE LAUREL

TRADE MARK
STERLING 1000

☞ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

☞ Made on the popular **MARTHA WASHINGTON** shape.

☞ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

☞ Finished in light, medium and heavy weights at a very moderate price.

☞ In manufacturing "**THE LAUREL**," every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

☞ This is another **Smith Pattern**, designed to remain permanently in demand.

Frank W. Smith Company

Manufacturers of Sterling Silverware

GARDNER, MASS.

1835 R. WALLACE

*Silver plate that
Resists wear*

Every progressive dealer knows how immensely popular 1835 R. Wallace silver plated ware has always been.

There are many good reasons why now, more than ever before, 1835 R. Wallace is destined to win an even greater preference among discriminating buying-public.

The Blossom Pattern reproduced herewith is an entirely fresh idea in design, superb in execution, finished in French Gray with a protective shield. It is the pattern of the year.

Our new Guarantee is another most effective selling point.

To every purchaser we guarantee that "1835 R. Wallace," Silver plated ware that resists wear, will give absolute satisfaction, and we agree to stand behind and replace every piece of goods bearing the "1835 R. Wallace" trade-mark that does not give satisfactory service in any household.

There is no time-limit in this guarantee. It's as broad as the air. Your customer is protected absolutely.

The additional sectional plate will also appeal to every buyer.

On those pieces that receive constant use, in our old A1 and Triple grades (namely: tea, table, dessert, and soup spoons, medium and dessert forks) a heavy sectional coating of silver is added to the parts most exposed to wear. These pieces in all patterns are stamped 1835 R. WALLACE SECTIONAL, and 1835 R. WALLACE SECTIONAL TRIPLE. This increases the wear-resistance three fold, but there is no increase in price.

Send to-day for the literature in which the new Blossom Pattern is contained.

Blossom Pattern

R. WALLACE & SONS MFG. COMPANY

WALLACE STERLING

Carnation Pattern

In conventionalizing the form of the carnation, our most beloved flower, this new service appeals to the sentimental preference of a very large proportion of the people. This one will make the design immensely popular.

In itself the design is one of the most beautiful ever developed in the silver art, and one of the most practical. It is marked by distinction, giving an entirely new spirit and character in table silverware.

The Carnation Pattern is made in a commercial weight, so that the price is extremely low. Considering the excellence of the design, the brilliancy of the die-work and execution, the sales of this pattern promise to be unusually large.

We would suggest that you send in your orders as soon as possible.

Write for one of our new Sterling Catalogs in which this Carnation flatware is included.

ILLUSTRATIONS ONE-HALF SIZE.

When we originally conceived the idea

that 10K jewelry could be made to look and appear like the nicest 14K, we had in mind, particularly, that class of consumer, who has excellent taste, but a limited purse.

How successful we have been in carrying out this idea, is a fact well known to all high class retailers.

Hundreds of your customers like dainty, well made things, but cannot pay 14K prices.

Our line always pleases them, in price and design—and the excellent percentage of profit for you, will also please.

We manufacture a line of fine
14K Gold and Platinum Mount-
ings for the fine jewelry trade.
Newest designs, original ideas
and prompt delivery.

Rings, Brooches, Scarf Pins,
La Vallieres, etc., in 14K
Gold and Platinum.

Our special order department is
equipped to care for all kinds of special
work made to order.

Our workmanship and facilities for
construction are unsurpassed.

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better
than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beauti-
fully colored, more carefully soldered and inspected than any other chain
on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite
you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you
cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit
samples and prices.

We cater to the manufacturing and jobbing trade.

THE
 ADVANCE
 JEWELRY

A
 DARING
 DEPARTURE

FORWARD is again the watchword here. The new brown "Silverseal Finish" applied to Lisner Jewelry to match Autumn fabrics, is a daring departure. Instant enthusiasm greets its display. A veritable surprise. This finish particularly enhances Jet groupings, the latter now being strongly in the ascendant. The remarkable combinations in rich designs include: HAT PINS, BROOCHES, NECKLETS, BARRETTES, BANDEAUX, SASH PINS, LONG CHAINS, etc., Novel link-alternations. Prove by seeing.

D. Lisner & Co. *Creating Importers of Jewelry Novelties*
 One-Forty Fifth Avenue, cor. 19th St., NEW YORK

NECK ORNAMENTS have been popular in all ages. The present revival of the La Valliere is a modern adaptation of an always effective article of decoration. It appeals to practically all, and the demand is steadily increasing. We carry a large assortment from inexpensive yet pretty combinations to elaborate diamond mounted pieces. In these as in other goods "We Sell Sellers." Memo. packages on request.

THE KREMENTZ BODKIN-CLUTCH is recognized to be the most improved, simplest in construction, strongest and most durable on the market. Not one piece, but one-piece construction. No solder or tubing. Nothing to bend or break, being made of solid hard Spring Metal throughout.

Krementz Bodkin-Clutch Studs, Vest Buttons and Dress Sets are made in many salable patterns, set with Diamonds, Sapphires, Amethysts, Moonstones, Carnelian, Half Pearls and Whole Pearls at prices lower than any others made.

Note:

Should any of your customers have a set of vest buttons or studs with any old-style fasteners which have for any reason proved unsatisfactory, we will gladly change them (where practicable to do so) to Krementz Bodkin Fasteners, making only a nominal charge for same.

HAND-MADE JEWELRY

WE have every facility for turning out special hand-made pieces to meet any requirement in style, kind or finish. Our artists are the best in the business and their ideas are carried out by highly trained craftsmen who know how to give that distinctive touch that makes all the difference between goods manufactured in bulk and art work.

Write us for suggestions when you want something out of the common run.

Successors to **AIKIN-LAMBERT JEWELRY CO.**

Silversmiths Bldg. :: 15-17-19 Maiden Lane, New York

OUR new Fall line is now ready and our salesmen are calling on the trade in their several territories. Their sample cases contain many popular and salable patterns that defy competition in price and design. We are making a specialty of carrying a full assortment of everything in gold and gold plate that is different from what others are showing, and it will pay you to see these new and attractive goods.

DO YOU REALIZE what it means to manufacture gold chains of excellent quality and faultless construction and sell them at prices much below what the retailer ordinarily pays for chains of similar quality? It means that we have a well organized factory and prefer selling these chains ourselves directly to the trade, thereby giving you the benefit of what it would cost to maintain a necessarily expensive organization of traveling men.

THAT NEW CHAIN we are exploiting is solderless and flexible, without stringing, 15-inch lengths only. **IT SELLS AT SIGHT.**

Write for a sample.

"EDGEWOOD" BAR PIN

The design of this pin is patented, and we will promptly prosecute any manufacturer who imitates it on same.

ENAMEL BAR PINS will be among the best sellers this Fall. THE "EDGEWOOD" pin has been pronounced the best pin of its kind on the American Market.

RETAILERS should use this pin for the following reasons:

- The GOLD is fourteen karat.
- The WORKMANSHIP is perfect.
- The DESIGN is patented.
- The PEARLS are selected Oriental Baroques.
- The PRICE is moderate.
- The PIN will not be imitated in inferior goods.
- The ENAMEL can be furnished in eight colors.

We sell direct to the retail trade.

"SEVENINONE"

BROOCH OR SCARF PIN

Finish, Workmanship, Quality of Stock and General Appearance of any article are its main selling points, but "Seveninone" not only embraces all of these vitally important attributes, but is

A Distinct Novelty

It appeals to the consumer because

- 1 It consists of *one* mounting and seven stones.
- 2 The stones are of different color.
- 3 They can be interchanged in a moment.
- 4 There are no parts to wear out.
- 5 They take the place of seven different pins.
- 6 It is reasonable in price.
- 7 It will aid in increasing your sales.

Salesmanship

Is the art of convincing a man that he needs something badly enough to pay out his good money for it.

Our best salesmen are our "LK" Set and Signet Rings. They make a silent appeal

that few can resist. We want to sell you some. Send for an assortment and let them tell their story. This method of selling saves noise and leaves you to form your own opinion. If they appeal to you, they will appeal to your customers—and that is what makes quick-selling stock.

LOUIS KAUFMAN & CO.

Succeeded by

JOSEPH L. HERZOG & CO.

45-51 Rose Street (Cor. Duane)

NEW YORK

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chime Hall clock made up with a cheap spring movement can never be satisfactory. The hammer blow is too weak to get the tone out of good bells; only the light hells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MONASTERY," which are heavy, powerful brass works, with solid steel pinions and built as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular bells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$140.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 164.00

No. 5.

The Golden Table Service of the Vienna Hofburg.

AMONG the festivities that marked the recent visit to Vienna of the Emperor and Empress of Germany was a gala dinner and it was decided to make use of the celebrated golden table service of the Vienna Hofburg on this occasion. This service deserves special notice, for no royal dining-room in the world has anything like it. The plates, dishes, spoons, knives, forks, as well as coffee pot, tea pot and pitcher,

are still more valuable as curiosities than the gold plates. They are made of porcelain, and each is decorated with a special scene from mythology, executed in the most artistic manner. These dessert plates are of older date than the golden service.

When in official use, the whole table is covered by a single table-cloth, specially woven for this purpose; it bears no other pattern than the Imperial coat of arms. The epergnes are filled with flowers from the Schönbrunn conservatories; lilac orchids, pale red roses and lilies of the valley are special favorites at the Viennese court. Festoons of rose-colored and pale green erica (heather) stretch from one epergne to the other. The blending of all these colors amid the gleam of the gold plates is exceedingly imposing. When to these are added the magnificent uniforms and costumes of the guests, the whole forms a picture in which a truly imperial

GOLD PITCHER.

GOLD COFFEE POT, WITH ROCOCO ORNAMENT.

luxury is combined with the most tasteful delicacy.

Our three illustrations show the golden coffee pot, teapot and pitcher belonging to this collection. They are in the pure Rococo style.

A man, who recently appeared at the store of J. H. Padgham & Son, Santa Ana, Cal., fraudulently secured a gold filled watch worth \$19, \$2.50 in cash, and the firm's check for \$35, by means of a bogus check for \$57.50. The payment of the firm's check was stopped, however. The swindler was about 40 years of age, of medium height, smooth shaven, full-chested, and weighed about 175 pounds. He talked and looked like a foreigner. Before accepting the watch at the price quoted by the jeweler, he dickered considerably.

Necklet and Pendant for Queen Alexandra of England.

ON the occasion of a visit to Birmingham, England, by King Edward and Queen Alexandra to open the new University, permission was obtained to present a souvenir of one of the most important industries of the city to the Queen. This took the form of a necklace, of which an illustration appears on the front cover of this issue. Arthur J. Gaskin, head master of the Vittoria St. School for Jewelers, at Birmingham, with Mrs. Gaskin, was responsible for the design and execution.

The jewel, which takes the form of a

GOLD TEAPOT.

necklet and pendant, in 18-karat gold, is a worthy example of the goldsmith's art. Carved flowers, thickly set with various stones, form the design of the necklet, which, as will be seen from the cut, widens at the throat, and so is in better keeping with the pendant; this is mostly composed of leaves very cleverly carved. Coloring is lent to it by a large sapphire in the center, and surrounding it are emeralds, pearls and pink topaz.

The center of the necklet is treated in a somewhat similar manner to the pendant.

The cut glass manufacturers are about to petition the Interstate Commerce Commission for a formal hearing on the cut glass freight rate, claiming that double first class is unjust. The manufacturers request their customers to forward to Wm. F. Heft, secretary, Honesdale, Pa., any evidence they may have at hand which will assist in presenting their claims, and would especially like to have them report the amount of breakage in cut glass shipments on which they have made claim to the transportation company during the past year.

REPOUSSE' WORK AND CHASING

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(Continued from issue of Aug. 11.)

CANDLESTICKS (Continued.)

THE knob or boss in the center of the shaft differs from most bosses in as much as it is not absolutely symmetrical—its widest part is not in the center, but much lower down. It is about $1\frac{1}{2}$ inches deep and $1\frac{3}{4}$ inches across at its widest part. To make this boss a $2\frac{1}{2}$ -inch circle of metal should, in the first place, be hammered into a cup shape; the bottom of this cup shape eventually to form the mouth of the boss. After making the mouth of this cup correspond to the widest part of the boss, it can be drawn over on a very small stake or anvil, with a narrow "raising" hammer, taking care that the end of the metal is shaped to the exact contour required. It is, of course, obvious that it is practically impossible to draw the mouth of the cup in sufficiently small to fit the stem shaft or stem piece, and it will be necessary to shape up another very shallow cup for the bottom of the boss and fit and solder it on to the shape already made. The exact place on the boss where to make the joint depends largely, of course, on the decoration. It could be made very low down so as to be practically out of sight when the boss is fitted into its proper position, or it can be made a little higher up, namely, at the widest part of the boss, where the settings of the moonstones will eventually come. In the latter case it will, of course, be unnecessary to draw the mouth of the cup in at all.

The boss is divided into eight equal parts by a series of scroll pieces coming from the top of the boss in a vertical line to its widest part near the bottom where each piece finishes with a moonstone. These scroll pieces, which entwine and hold, so to speak, the settings of the moonstones, can be either snarled up and chased from the front—in fact, if no very high relief is required, the boss can be simply filled with pitch, and the entire ornamentation marked up from the front with chasing punches; or they can be applied—that is, pieces of flattened or half-round wire can be bent into the shapes required and soldered on. The upper parts of the boss between the scroll work can be snarled up tightly in order to give a series of lobes or bosses which will catch the light when the whole candlestick is finally polished.

The settings for the moonstones should be of a simple character, and nothing in the way of open or gallery settings should be attempted, as for this type of work they are very objectionable, holding, as they so easily do, dust and dirt, and being very difficult to clean. The most practical setting in this case is just a narrow bezel made of five-gauge metal. This should be made to fit the stone quite accurately, and then soldered onto the boss, possibly strengthening the joint by soldering a small plain or twisted wire in the angle between the setting and the boss. When the whole candlestick is finished, the edges of these bezels can

be burnished down closely onto the stones, and then, if cabochon cut stones have been used, they will simply form a number of small bright bosses, and will not catch in anything or scratch, but will provide a firm

give the solder better bearing and grip on the metal.

For the lower stem-piece a circle of metal measuring about $1\frac{7}{8}$ inches across will be required if this piece is to be "raised" or hammered up, or a strip of metal measuring $2\frac{7}{8}$ inches by $\frac{7}{8}$ inch can be turned up into a ferrule and soldered and then hammered into the shape required. Although this latter method is the quicker, it is advisable to "raise" the stem-piece without a solder line, as the solder always shows a tendency

DETAILS OF THE CANDLESTICK.

1, 2, 3, Construction and details of the boss. A, construction of the lower part of the candlestick—at the side a section of the base is shown.

grip when the candlestick is being moved, and thus fulfill their purpose from both a useful and decorative point of view.

When soldering the two pieces forming the boss together, it should be mentioned that these should be fitted as soundly as possible, so that after soldering—with the hardest possible solder—there is not the slightest gap anywhere. For preference it is advisable to key the two pieces together as much as possible—that is, instead of simply butting the two pieces against each other, the edges should be filed on a slant, filing one piece from outside inwards, and the other piece in the reverse way, so as to

to give way when the spread at the bottom of this stem-piece is hammered out.

W. S.

(To be continued.)

Loren Reynolds and Archie Chamberlain, Anoka, Minn., found 25 pearls one day, recently, while fishing in the Mississippi River.

More than a score of fishermen are operating their clamming outfits between Red Wing and Hastings, Minn., and along the Vermillion River. A good variety and large quantities of shells are being taken out.

German Statistics, Giving the Wages Paid in the Jewelry and Kindred Industries.

WASHINGTON, D. C., Aug. 26.—A tariff discussion such as we have just passed through throws much light on subjects hitherto untouched. Not the least of these is the subject of wages that are paid in industries in other countries. In 1896, 1900 and again in 1903 the directors of Section 3 of the South German Association of workers in precious and ordinary metals, with headquarters at Pforzheim, have prepared a set of statistics regarding laborers and mechanics in the Pforzheim gold and silverware industry, these statistics being compiled from the actual payrolls, so that there is no doubt as to their authenticity. On each payroll every man employed appears, although he may only have been employed for one day.

The statistics, which were prepared with the most painstaking accuracy and doubly verified, cover the entire Pforzheim precious or ordinary metal industry, including both ornamental articles and larger articles, such as articles for table use. They include not only the factories in which the articles are manufactured ready for use, but also those in which the metals thus employed are previously prepared, as, for instance, artificial jewel factories, and also those which produce half-manufactured articles, jewel settings, etc., and also those which only perform single operations necessary in the manufacture, such as the pressing works, gilding works, and also the separating shops.

The following classifications were made: heading 1, jewelers, chainmakers, pressers, silversmiths, artificial jewelmakers, wire drawers, safety-hockmakers, tula-work drawers, nurlers; heading 2, jewel-setters only; heading 3, engravers, designers, engravers, Guilloche designers, chisellers; heading 4, mechanical workmen only; heading 5, male assistants, errand-boys, smelter-stokers, carters; heading 6, polishers only; heading 7, chainmakers, bead-pressers, enamellers, burnishers, jewel-setters, etc., all female; heading 8, female assistants, errand-girls, seamstresses and dressesses; heading 9, male apprentices of all the various trades; heading 10, female apprentices of all the various trades.

As between the years 1896, 1900 and 1903 there has been an increase in the number of chainmakers, jewelers and pressers employed from 7,574 earning \$771 daily to 7,711 earning \$948, and 9,909 earning \$961 per day, an increase between the first and last of these dates of 24.7 per cent. Under the head of jewel-setters and jewelers in 1896 the number employed was 940 earning an average of \$987 per day, in 1900 the number was 1,079 at \$1,109, and in 1903 1,099 at \$1,194 per day, or an increase of 27 per cent.; 650 engravers were employed in 1896 who were paid \$973 per day; in 1900 the number was 738 at \$1,206, and in 1903 773 earning \$1,279 per day, an increase of 32.5 per cent.; 109 mechanical workers in 1896 received an average wage of \$1,001 per day; in 1900 the number had been increased to 203 who were paid an average

of \$1.12 per day, and in 1903 264 were paid \$1.158, or an increase of 15.7 per cent. There were 679 assistants employed in 1896 at \$.635; in 1900 there were 832 receiving \$.661, and in 1903 989 received \$.756 per day, an increase of 19.1 per cent.

Under the general classification of female workers the polishers stand first, and in 1896 3,541 were employed at an average daily wage of \$.464; in 1900 the number had been increased to 3,869 and the wage to \$.566 daily, while in 1903 it was 3,867 at \$.59 per day, or an increase as between the first and last returns of 27.2 per cent. There were 1,045 female chainmakers employed at an average of \$.471 per day in 1896, 2,343 at \$.547 in 1900 and 2,852 at \$.592 in 1903, an increase in pay of 25.7 per cent. Of female assistants the number employed in 1896 was 153 earning an average of \$.402, 319 in 1900 earned an average of \$.435 and 557 in 1903 earned \$.495, an increase as against 1896 of 23.1 per cent.

The number of male apprentices employed in 1896 was 2,548, to whom was paid \$.221 daily; in 1900 the number had been increased to 2,667 at \$.257, and in 1903 to 2,747 at \$.268, or 21.5 per cent. increase. Of female apprentices the number employed in 1896 was reported as 1,194, to whom was paid an average daily wage of \$.183; in 1900 the number had been increased to 1,361 and the wage to \$.226, and in 1903 to 1,410, earning an average of \$.233 per day, an increase of 27.3 per cent.

The number of factories reporting in 1896 was 505, and the highest number of persons employed in any one factory was between 240 and 300, while there were 196 factories reporting from 1 to 10 workmen; in 1900 the total number of factories reporting was only 494, and two of those factories were reported as employing from 300 to 340 workmen full time, while for 1903 the total number of factories reporting was 504, and the highest number of workmen employed in any one factory at full time was 352.

It is reported that the total number of laborers employed in the Pforzheim gold and silverware industry is 17,339, and with the auxiliary interests this number is brought up to 24,107, and this includes 300 foremen or *Kabinettmeister*, 750 manufacturers, 1500 persons employed in homes and 2,000 office employes in the jewelry industry.

It is admitted that American wages are higher than the German, but they challenge the correctness of the statement that German wages are only half as high as those paid in the United States. According to an inquiry now being made, and the result of which will be published some time during the present year, regarding the Pforzheim precious-metal industry in 1906, the following average wages are paid to male employes, according to their qualifications and their particular trade: Jewelers, \$1.066; bracelet-makers, \$1.14; mounters, \$1.325; makers of mountings, \$1.261; modelers and makers of models, \$1.307; master cabinet-

makers, \$1.86; makers of jewelry boxes, \$1.247; solderers, \$1.363; designers, \$2.098; technicians, \$2.075; steel engravers, \$1.463; setters of jewels, \$1.28; silversmiths, \$1.05; makers of artificial stones, \$1.185; enamel painters, \$1.676.

During the same year the average daily wages for female workers were reported to have been as follows: Polishers, \$.656; chainmakers, \$.655; oxidizers, \$.697; gilders, \$.735; silverers, \$.698; jewel-setters, \$1.044; brushers, \$.578; enamellers, \$.671.

Attention is also particularly called to the fact that this data indicates the average wages of all persons belonging to one trade. The various degrees of talent, skill and qualifications of different individuals are therefore not shown in these wages, which, they state, are greatly exceeded by those paid to efficient workers.

All professions, learned and unlearned and mechanical, being reckoned together, the average daily wages paid in the Pforzheim precious-metal industry in 1906 for adult male workers was \$1.13, and for female workers \$.642 per day.

They further challenge the statement that one-third of the cost of production of a piece of jewelry made of gold is represented in the value of the material and two-thirds in wages paid, and the proportion is quite different, according to the article and the value of the material used.

They further make the statement that we in America copy the German models for jewelry, and not the reverse.

The Chamber of Commerce of Heidenheim takes exception to the statement that has been made to the effect that workmen in the silverware industry in the United States are paid from four to six times more than they are in Germany. It states that this is simply not true, and in support of that contention it submits the following list of daily wage: Founders, \$1.261; dressers, \$1.905; laborers, \$1.618; chisellers, \$1.547; solderers, \$1.618; punchers, \$1.488; steel engravers, \$1.904; engravers, \$1.666; hammer-workers, \$2.046, and polishers, \$1.071.

The Chamber of Commerce of Heilbronn has taken exception to the ratio of American as to German wages, as it was offered before the Ways and Means Committee, and states that it is not at all in accordance with facts. It states that if a comparison is made between American wages and those paid in Germany for the same work, it will be found that in many cases the German wages are equal to the American, and that it is only in a few cases that the American wages are from 1½ to twice as high as the German, but not 3.4 or 6 times as high.

As an example, it is claimed that a German turner is paid from \$2.618 to \$2.856, and the American \$2.618 a day; a plate beater receives in Germany \$2.142, and the same in the United States; an engraver, \$1.904 in Germany and \$2.856 in America, and a chiseler \$1.487 and \$3.094 in the United States. They state that further consideration should be given to the fact that about half the amount on which duty is levied is the metal itself, and as silver is much cheaper in America than in Germany, there is much less reason for a protective duty on the value of the silver.

Jewelers Suffer Severe Loss in Great Fire That Destroys Large Section of Decatur, Ill.

DECATUR, Ill., Aug. 25.—In a million and a half dollar fire, which visited Decatur early Sunday morning, Aug. 22, two jewelers and one optician suffered losses, the stock of the Frank Curtis Co., jewelers, 1 Mam St., and R. V. Augustine, optician, 1 N. Water St., being entirely destroyed, that of H. Post & Son, jewelers, 158 Archant St., being damaged. Jesse E. Yohe, jeweler, 146 E. Prairie Ave., saved a partial loss to his stock by calling in about a dozen men and boys, who assisted him in removing the jewelry from his store.

The fire was discovered at one o'clock Sunday morning in the elevator shaft of the Morehouse & Wells building. Half an hour

Yohe was informed at his home and left his bed, only to arrive at the scene to see flying embers threatening the destruction of the building which he occupied on E. Prairie St. Hurriedly he called on a large crowd of men and boys who assisted him in the removal of his stock.

Almost one square block went before the flames. Forty business houses suffered loss and 20 buildings were entirely destroyed, a gigantic pile of twisted iron and steel and brick piled 12 feet to 20 feet deep, telling where the handsome structures once stood.

The Frank Curtis Co. has opened temporary quarters at 333 N. Water St., and R. V. Augustine is located for the time being at 209 S. Park St. New buildings will rise from the ruins as soon as insurance ad-

Money Stolen from Aikin-Lambert Co.'s Office Returned to Firm by Mail.

The mysterious disappearance of a package containing \$1,200 in bills and silver from the office of the Aikin-Lambert Co., 15 Maiden Lane, New York, four weeks ago, and its return early last week through the mail is causing considerable comment in the Maiden Lane district. The money, which had been removed from the original package, was wrapped up and mailed at a box at the Brooklyn Bridge entrance, and being too large to place in the box was left unguarded on the top until collected.

The money was intended for the payment of the weekly pay roll and was left at the desk of the manager by the treasurer of the company. About 20 minutes afterward the treasurer was informed that the package could not be found and an investigation was at once commenced. The office was searched, as were many of the employes who demanded this before leaving the office.

The money was in a compact package made up of small envelopes in which were the salaries of the different employes, each envelope bearing the name of the person for whom it was intended. The desk at which the money was left is inside a railing and not easily within reach of anyone who did not have business within it. The mystery is deepened by the fact that so far as can be learned nobody besides the office employes were within the railing from the time that the money was delivered until it was lost. This statement is substantiated by the evidence of several of the employes. The manager of the concern left his desk for a moment with the money unguarded and upon his return the package was missing.

Detectives were called into the case, and a search of the office to locate the missing money proved fruitless. After a consultation with W. E. Smith, vice-president of the company, a notice was posted asking the employes to remain after hours. When they had assembled he told them that the guilty person, one of the employes, had been spotted and that the best way out of the difficulty was for the money to be returned. While not exactly known then who took the money yet the officers felt that they had a general idea as to its disappearance. Whether the words of the vice-president fell on fertile ground or not is not known, but at any rate the money was returned through the mail and was brought into the office in the usual way along with other packages.

The package containing the money bore 18 cents worth of stamps and contained a note which stated that the person who stole the money was not in the employ of the concern from which it was stolen, but that he could not confess his sins unless the money was refunded. It is the opinion of the detectives and the officers of the company that this note was placed in the package to mislead investigation, and the opinion still holds that some one in the employ of the concern is responsible for the disappearance of the money. When the package was opened at the Aikin-Lambert offices it was found that \$10 in silver was missing, the rest of the money being intact.

A VIEW OF THE BURNED DISTRICT OF DECATUR, ILL.

er the blaze was discovered the six-story building was in ruins and when the walls and roof fell the flying sparks started the fire burning toward the Curtis store to the east and toward the Post and Yohe stores, which are north of the building in which the fire started.

So swiftly did the building fall prey to the flames that it was impossible to save much stock from the Curtis store, which is about 50 yards from the Morehouse & Wells building. This building is located on E. Main St. Curtis' loss is estimated at \$25,000 with insurance of \$20,000. The building in which the store was located was entirely destroyed.

The store occupied by R. V. Augustine on N. Water St., 200 yards from the starting point of the fire, is also a monster pile of brick instead of the fine three-story building which the optician occupied. His loss is estimated at \$1,700 with a net loss of \$700.

The Post store is on N. Merchant St., and is also 200 yards from the Morehouse & Wells building. The damage here is mostly by smoke and water, as it was in this building that the fire was checked after the arrival of firemen from Springfield. The loss is \$1,100, fully covered by insurance.

Soon after the discovery of the fire, Mr.

justers, who are now on the ground, can adjust the losses. Both Messrs. Curtis and Augustine have made arrangements for quarters in new buildings at their old stands as soon as the buildings are completed.

Ivory Sales in London.

WASHINGTON, D. C., Aug. 28.—Vice Consul-General Richard Westcott reports on the quarterly ivory sales in London on July 20 to 23, as follows:

They comprised 68 tons (against 66¼ tons same time last year), viz.: 20½ tons Zanzibar, Bombay, Mozambique, and Siam; 12¼ tons Abyssinian; 17¼ tons Egyptian (10¼ Alexandrian and 7½ tons Malta description); 7¼ West Coast Africa and Lisbon, and 10¼ tons land carriage.

During the progress of the sales about eight tons were brought in, viz.: One ton East Indian; two tons Egyptian; ½ ton Abyssinian, and 4½ tons land carriage. There was good competition and the bidding general from all parts. Prices were rather irregular and on the average about steady, for while large tusks in some instances showed a little advance, the prices for ball ivory and some cut descriptions were hardly up to the last sales' rates. The stock on July 22 was 104¼ tons, against 120 tons at the same time last year.

Reconstructed Rubies

There are RUBIES and RUBIES. For OURS we claim the foremost place in the Scientific Stone market.

We have succeeded in developing the Reconstructed Ruby to the highest possible standard, improving it irrespective of effort and cost. In the purity of material, its uniformity of color and shape, correctness of size and brilliancy of finish, OUR RUBY has positively no equal.

We were the first to make the Reconstructed Ruby popular, introducing it in all the variety of MODERN SHAPES and SIGNS.

Our stock is the LARGEST and BEST in the country and will be found pre-eminently suitable for the use of the LARGE MANUFACTURING JEWELER.

When buying Rubies, GET THE BEST. They cost no more.

George and Emil Ludwig Accidentally Drowned in the Hudson River.

George and Emil Ludwig, who were connected with the manufacturing firm of Ludwig & Son, with store at 927 Broadway, New York, and a manufacturing plant at 75 Nassau St., New York, were accidentally drowned, at 6 o'clock Tuesday afternoon, Aug. 24, in front of the New York Motor Boat Club House at 147th St. at the Hudson River, Manhattan.

The brothers, both of whom were young men, had been out on the river the greater part of the afternoon testing their new motor boat, *The Rose*, and having finished they started in towards the dock of the New York Motor Boat Club, of which

day gone on a vacation trip to the Catskill Mountains. Mrs. Ludwig was notified of the death of her sons by her son Charles, who went for her and brought her back to New York.

Both George and Emil Ludwig were born in New York City, and had always been in the jewelry business which was established by their father, who died last year. After the death of the elder Mr. Ludwig his widow held control of the business, and her two sons, who met such an untimely fate, were employed by her in the Broadway store.

George Ludwig was born on April 24, 1882, and was recognized as one of the most expert rifle shots in the country. He

Schedules of Maurice C. Dreshfield, New York, Filed in the Bankruptcy Court.

The schedules in bankruptcy of Maurice C. Dreshfield, a diamond broker in New York, were filed in the United States District Court, New York, last Wednesday and show liabilities of \$123,702 and assets of \$81,123.57, of which amount \$15,000 is given as real estate and \$66,123 is bills, promissory notes, etc.

Mr. Dreshfield was connected in transactions with George H. Carpenter whereby nearly \$200,000 worth of diamonds were obtained from Rudolph A. Breidenbach, under conditions which later did not meet with the sanction of Mr. Breidenbach. A petition in bankruptcy was filed against both Carpenter and Dreshfield and after protracted hearings before Referee Peter B. Onley, as special master, a report was submitted by him recommending that Dreshfield be declared a bankrupt. The filing of the schedules follows the submission of the report.

Among the unsecured creditors named in the schedules are: A. Berger, \$700; Goldmuntz Bros., \$2,024; Van Gelder Bros., \$1,578; Stern Bros., \$231; Alois Kohn & Co., \$1,362; William Stern, \$600; Rose Dreshfield, \$2,500; Charles Dreshfield, \$5,000; Cohen & Cohen, \$200; R. A. Breidenbach, \$3,500, and Mabei & Maidment, \$2,500. Most of these creditors hold promissory notes, or security which have not been resolved into judgment.

GEORGE AND EMIL LUDWIG, WHO WERE DROWNED IN THE HUDSON RIVER.

ty were members. Emil was in the stern at the time steering and George sat in the bow. When near the buoy, Emil stopped the engine, but the boat had impetus enough, however, to carry them past so George reached out his hand to grab the mooring and in some way was pulled overboard. Although he could swim a little he did not seem able to battle against the tide, and his brother Emil jumped into the water in an attempt to save him. Emil succeeded in reaching his brother, but both sank, locked in each other's arms, before assistance could arrive.

Charles Ludwig, a brother of the two young men, in speaking about the unfortunate accident, gave this version of the drowning as being the most correct one that he had been able to obtain, and said that after his brothers sank in the water they did not again come to the surface. People who were on the river in motor boats attempted to reach the scene of the accident, but were too late to render assistance. Capt. Eric, who is in charge of the club house, was unsuccessful in recovering the bodies, but they were found Wednesday afternoon at the spot where the young men lost their lives. An added touch of sadness is given to the disaster by the fact that the mother and sister of the young men had that

belonged to a number of shooting clubs and had captured many trophies. He was also a member of the Masonic fraternity. The younger brother, Emil, was born March 23, 23 years ago. Both were highly respected and popular young men.

Surviving the deceased are a mother, three brothers, Charles, Samuel and Theodore, and three sisters, Miss Anna Ludwig, Mrs. Wm. Posch and Mrs. Phillip Brady. The sympathy of the large number of friends and acquaintances goes out to the bereaved relatives.

The funeral services were held from the Ludwig residence, 3609 Broadway. Interment was in Woodlawn Cemetery.

Charles T. Evans, of Evans & Son, Utica, N. Y., jewelers, and president of the New York State Jewelers' Association, is a candidate for the Republican nomination for Member of Assembly in the Second Assembly District of Oneida County. Mr. Evans will have all the delegates from three wards of Utica, which will give him a good start toward securing the nomination. There are several other candidates in the field, which up to date seems to have no favorite. Mr. Evans is a strong Republican, but has never been tied up in factional fights in his party.

Pen Presented to President Taft Has Historic Features.

THERE has been manufactured by the L. E. Waterman Co. a notably historical pen for President Taft. The company was presented, by John B. Hardy, Industrial Expert of New York, with a small block of wood saved from the last of 13 trees planted by Alexander Hamilton on his estate in New York City; it will be remembered that each tree represented one of the original 13 States. From the block the Waterman house manufactured a beautiful turned wood pen lined with rubber.

The cap and barrel were very handsomely mounted with gold, the pattern of which was designed by Carolyn Mihr Hardy, and engraved as follows: On the three gold bands on the barrel, "Protection, Progress, Patriotism," and on the two name plates on each side of the cap, "Presented to the Hon. Wm. H. Taft," and on the reverse side, "Made from the last of 13 trees planted by Alexander Hamilton on his estate."

The box in which the pen was presented was also made from the remaining portion of the block of the Hamilton tree. The exterior of the box was in the rough finish of the wood, very handsomely finished on the inside and finely lined with velvet and satin, the hinges and catch being made from gold.

The pen was presented to President Taft by Congressmen Pujo, Estopinal and Broussard of Louisiana, and Frank Clark of Florida, all ardent southern protectionists.

M. G. Parker recently moved from Cherry Vale, Kans., to Wagoner, Okla.

National Officers Elected by the Jewelry Workers Announced by President Wulff.

PROVIDENCE, R. I., Aug. 28.—George E. Brady, of this city, has been elected fourth vice-president of the Jewelry Workers' Association, although up to the time when the ballots cast at a referendum vote began to be counted it was not known that he was a candidate for that or any other office. Brady was nominated by some outside party without his knowledge, and his election was a great surprise to everybody connected with the jewelry workers' organization in Providence. The two Providence candidates, who made a good run, and who up to the last moment were believed to have succeeded, have been defeated. They were Edward O'Connor and John Moran, respectively, for third and fourth vice-presidents. O'Connor was defeated by President Richard Peterson, Buffalo. William C. Wulff, Chicago, against whom the election fight was conducted, was re-elected president by a small plurality, while William C. Wulff, Philadelphia, is succeeded as secretary by George Bissinger, Newark, N. J. The result of the election was announced a week or two ago by President Wulff, as follows: President, William C. Wulff, Chicago; first vice-president, A. Weisnberger, Denver, Col.; second vice-president, H. Ellhammer, Newark, N. J.; third vice-president, Richard Peterson, Buffalo, N. Y.; fourth vice-president, George E. Brady, Providence; secretary, George Bissinger, Newark, N. J.; treasurer, Frank Besstak, Philadelphia, N. Y.

The counting of the ballots cast at a referendum vote was a long affair, there being almost as many candidates nominated as there are local unions of the jewelry workers of the country. The count resulted in several surprises, a number of newly elected officers being ignorant of the fact that they had been nominated by the unions and that their names were being put on. On the other hand, some of the more active of the candidates failed to receive the necessary number of votes to secure their election.

As a result of the four days' session of the executive board of the jewelry workers, which was held in this city, last month, a complete reorganization of the members of the craft in Providence and the Attleboros is being prosecuted. The old Providence organization has been allowed to pass out of existence and the members are now affiliated directly with the international headquarters. The first step was taken for the purpose of perfecting the reorganization that was planned a month ago. Under the present system no one in this city knows who the members of the organization are. The new members, as well as they are taken in by a national organizer who has been here for some time, file their application, which is forwarded directly to the headquarters of the association at Chicago, and from that time on no one but the international officers know that they are members of the association.

It is proposed to reorganize the Providence local as soon as a thorough canvass of the jewelry shops shall have been made and as many new members as possible taken in. Mr. Brady, the new first vice-president, is well known in this city, where for sev-

eral years he has been prominently identified with the labor movement. He has served two terms as international president of the jewelry workers, one term as first vice-president and another as fourth vice-president. At the present time he is one of the district organizers of the American Federation of Labor.

Providence Jeweler Convicted of Receiving Stolen Scrap Now Charged With Assault and Insanity.

PROVIDENCE, R. I., Aug. 28.—John Nelson, the N. Main St. jeweler and refiner, whose appeal for a new trial in a case in which he was found guilty of receiving stolen scrap from the Fontneau & Cook Co., of Attleboro, was denied last month by Judge Geo. T. Brown in the Superior Court, was arraigned this morning in the Sixth District Court, charged with making an assault on Charles H. Smart. He also faced a warrant issued by Deputy Chief John A. Murray, of the Police Department, charging him with being an insane person, dangerous to the safety of the people of the State, and requiring his restraint and treatment.

Nelson pleaded not guilty to the first charge and his case was continued for trial to Sept. 10, bail being taken in the sum of \$2,000. On the charge of being an insane person he will be given a hearing in a few days. He was placed in the custody of Deputy Sheriff Patrick F. Dinahen, with strict instructions to the latter to see that he should not leave the district included in the court's jurisdiction, and that he be brought in for a hearing when called.

The warrant for Nelson's apprehension as an insane person was issued by the deputy chief on the request of the former's wife and family, and was brought in after Nelson had been arraigned on the assault charge and had left the court. The complaint is sworn out by Drs. Charles F. Marston and William J. McCaw, and, after receiving the same, Deputy Chief Murray telephoned to the defendant and had him return to the court room, where the warrant was served.

Nelson objected strenuously to the charge that he was insane and claimed that it was a conspiracy on the part of his wife and son-in-law to put him in an institution and get control of his property. "Your Honor," said Nelson, "I have not lived with my wife for 14 years, and this is an attempt on her part to get my money, but I will get even with her."

Judge Rueckert ruled that in cases of an insane nature the rule is to have as speedy a trial as possible, but owing to the fact that Nelson claims the right of examination by his own physicians, and time in which to consult counsel, he continued the case for a hearing later, placing Nelson in charge of Deputy Sheriff Dinegan.

The assault case, according to the police of the Second Station, was the result of a loan secured by Nelson from Charles H. Smart, in which the former gave as security a horse which, he claims, is valued at \$2,000. The police say that Nelson failed to make good the loan. The horse was replevined by Smart and taken to the latter's stable. Last Wednesday night the officers say that Nelson, accompanied by three others, visited Smart's place at about midnight and called

upon him to give up the horse. Smart, they say, did not respond and the three men started to break down the door of the house. About that time, the police allege, Smart made his appearance with a shotgun, but before he had time to use it he was set upon, the gun taken away from him and he was badly beaten. This morning the three men were arraigned with Nelson on the charge of assault. All the cases were continued to Sept. 10 for trial.

Providence Court Refuses Preliminary Injunction to Restrain Department Store from Using Trading Stamps.

PROVIDENCE, R. I., Aug. 26.—In a decision handed down to-day Judge Christopher Lee, of the Rhode Island Superior Court, denied the petition of the Callender, McAuslan & Troup Co., J. Samuels & Bros., Inc., and the Shepard Co. for a preliminary injunction restraining L. Dimond & Sons, Inc., and the O'Gorman Co. from issuing trading stamps with purchases.

The petition was filed about a week ago and the testimony and arguments were presented Wednesday, counsel being allowed until yesterday to present authorities for their contentions. There has been a great deal of interest manifested in this case, which is the outgrowth of the attempt made some three or four years ago on the part of the department and larger retail stores of this city to make a cast-iron agreement against the giving of trading stamps or similar premiums. The decision of Judge Lee was as follows:

After a careful consideration of the evidence given at the hearing, the arguments of counsel and an examination of the authorities submitted, there is such grave doubt in the mind of the Court as to the right of the petitioners for the relief asked for that it does not believe, in the exercise of its discretion, it should grant the motion for the preliminary injunction, particularly in view of the fact that the contract submitted and on which the petitioners base their suit, affords ample protection to the petitioners for such damages as they may sustain up to the time of the final determination of the suit, in case they are entitled to the relief asked for, by making provision for the payment of the sum of \$10,000 by the parties violating the same to each of the other parties to the agreement as the amount of damages accruing to each of the parties hereto, up to and until such time as upon proof of such violation an injunction is obtained against the party violating the same, and in view of the further fact that, if a preliminary injunction be granted and it should be determined upon final hearing of the case that the parties petitioning were not entitled to the relief asked for, the respondent might suffer great loss, and in consequence for which it would have no redress.

The motion for a preliminary injunction is therefore denied.

The decision disposes of the case for the present, but when the Fall session of the court is resumed the case can again be heard on bill, answer and proof in the regular court proceeding if the petitioners wish to push the case for a final hearing on a petition for a permanent injunction restraining the respondents from using trading stamps.

John M. Ganzer, a jeweler of Evansville, Ind., is suffering from blood poisoning caused by pricking his finger with a wire, with which he had pierced a giant tarantula, which he had on display in the show window in his store.

Contracts Awarded and Bids Received by Government Departments to Supply Various Articles.

WASHINGTON, D. C., Aug. 25.—The following awards have been made for supplies to the Life-Saving Service, for delivery at Grand Haven, Mich., during the present year:

For five carving forks, Chas. H. Werner Sons Co., Detroit, Mich., 52.5c. each.
For 30 dinner forks, Clarence J. Walker, 55c. each.
For 10 carving knives, Clarence J. Walker, 75c. each.
For 48 dinner knives, Clarence J. Walker, 60c. each.
For life buoy barometers, all bids rejected.
For 40 leather cases for Imhauser's time detectors, Nanz Clock Co., \$1.25 each.
For 40 leather cases for Newman's time detectors, Watchman's Clock & Supply Co., 1.00 each.
For 40 leather cases for Hahn's time detectors, bids rejected.
For marine clocks, Chelsea Clock Co., 1.00 each.
For five liquid boat compasses, Siegfried Schimmel, \$17.40 each.
For 80 boxes card dials, bids rejected.
For 80 boxes card dials for Imhauser's time detectors, bids rejected.
For 10 boxes card dials for Newman's time detectors, bids rejected.
For 10 boxes card dials for Hahn's time detectors, bids rejected.
For five binocular glasses, bids rejected.
For keys for Imhauser's time detectors, bids rejected.
For keys for Newman's time detectors, bids rejected.
For day and night adjustment telescopes, bids rejected.
For copper case thermometers, A. E. Moeller, 66.5c. each.
For Newman's time detectors, no bidders.
For Hahn's watchman's time detectors, no bidders.
For Kopp's time detectors, no bidders.

WASHINGTON, D. C., Aug. 25.—The Purchasing Agent of the Isthmian Canal Commission has received the following proposals for furnishing four field and marine glasses:

For 50 thermometers, maximum and minimum—R. W. Geldart, \$4.89 each; H. J. Green, Brooklyn, \$4.75 each; Hohmann & Maurer Mfg. Co., \$3.70 each, (b) \$4.70 each; A. E. Moeller, Brooklyn, \$3.24 each; Philadelphia Thermometer Co., Philadelphia, Pa., (a) \$5.50, (b) \$4.50 each; Queen & Co., Philadelphia, Pa., \$1.85 each.
For 500 stop watches—Carl A. Doubet, Washington, D. C., \$14.70 each; Robert Leding, Washington, D. C., \$6.43 each; Manhattan Supply Co., \$4.25 each; Max Worms, New York, \$5.00 each; Waterbury Co., \$6.50 each.

WASHINGTON, D. C., Aug. 26.—The following awards for supplies for the Life-Saving Service, for delivery during the present fiscal year, have been announced:

For 24 carving forks, Manhattan Supply Co., 50c. each.
For 288 dinner forks, Clarence J. Walker, 15c. each.
For 24 carving knives, Clarence J. Walker, 75c. each.
For 288 dinner knives, Clarence J. Walker, 16c. each.
For 24 dozen pure white table spoons, Manhattan Supply Co., 95.5c. per dozen.
For 24 dozen pure white German silver teaspoons, F. S. Banks & Co., 51.5c. per dozen.
For life buoy barometers, all bids rejected.
For leather cases for Imhauser's time detectors, Nanz Clock Co., \$1.05 each.
For dial cards for Imhauser's time detectors, Nanz Clock Co., 40c. per box.
For keys for Imhauser's time detectors, Robert Kopp, 25c. each.
For leather cards for Newman's time detectors, Watchman's Clock & Supply Co., \$1.50 each.
For dial cards for Newman's time detectors, Watchman's Clock & Supply Co., 60c. each.
For keys for Newman's time detector, Newman Clock Co., Chicago, Ill., 75c. each.
For Newman's watchman's latest improved time detectors, Newman Clock Co., \$43 each.
For leather cases for Hahn's time detectors, Nanz Clock Co., \$1.10 each.
For dial cards for Hahn's time detectors, Watchman's Clock & Supply Co., 45c. each.
For Hahn's watchman's latest improved time detectors, Nanz Clock Co., \$25 each.
For marine clocks, Chelsea Clock Co., Boston, Mass., \$13.25 each.
For liquid boat compasses, Siegfried Schimmel, \$17.14 each.
For binocular glasses, Siegfried Schimmel, \$10.80 each.
For telescopes, day and night adjustment, Siegfried Schimmel, \$9.57 each.
For thermometers in copper cases, A. E. Moeller, 63.5c. each.
For Kopp's official fire insurance time detector, Robert Kopp, \$35 each.

For Kopp's official fire insurance time detector, Robert Kopp, \$35 each.

The Lathrop-Bass Co., Morgan City, La., is anxious to discover the whereabouts of Hildreth L. Guess, a watchmaker formerly in its employ, but with whom the concern severed relations some time ago. Members of the trade who know where Mr. Guess is, or the latter himself, are asked to communicate directly with the Lathrop-Bass Co.

Vice-Consul Tarleton B. Taylor writes from Bahia that the production of diamonds in the Brazilian State of Bahia last year amounted to 298,046 carats, against 189,949 carats in 1907 and 154,307 carats in 1906. The production since 1845 has been 12,351,576 carats.

Chicago Manufacturing Jewelers' Association to Boom That City as a Buying Center.

CHICAGO, Aug. 28.—The members of the Manufacturing Jewelers' Association of Chicago are going to "do things" this Fall. There is new life in the organization, and every member is alive to the fact that by concerted action a great deal of trade can be brought to Chicago.

Chicago, they claim, is the best city in the west to take care of stock orders, special work and repairing, as there are over 30 modern jewelry shops here more completely equipped than are the factories of any other city in the United States. Here can be found an immense stock of specially manufactured mountings for immediate delivery as well as choice selections in precious and semi-precious stones.

Chicago is the terminus of more railroads than any city in the United States, and this fact, added to its central location, assures prompt shipment to the purchaser. Chicago manufacturers guarantee the best workmanship, selection, style and service and there is no reason, according to the members of the Manufacturing Jewelers' why this fact should not be emphasized by the association in a way that it will be thoroughly impressed on the minds of all western retailers with a resulting increase in the business done here.

The members of the association are now awake to their opportunity, and individually and collectively will leave no stone unturned to advance their interests.

Philadelphia Jeweler Accused of Perjury by Man Whom He Charged With Swindling Him Out of \$5,000.

PHILADELPHIA, Pa., Aug. 28.—In answer to Benjamin Silverman's allegation that he swindled him out of \$5,000, Charles Hefler, whose arrest the former caused in a civil suit, says that the S. 2d St. jeweler's melodramatic story of the alleged robbery was a weird tale concocted to conceal impending bankruptcy. Silverman has brought suit to recover \$20,000 damages for the loss of his business and his credit. Hefler was arrested twice in June because of his connection with this case and discharged by two magistrates.

Isadore Sterns, attorney for Hefler, says that Hefler told him that Silverman owes various creditors \$5,000 and hit upon this novel scheme of posing as a victim of a bunco game to cover up his financial difficulties. He also declares that "Silverman never had \$5,000. At neither of the hearings could he satisfactorily account for the \$5,000 he had lost. He was always known as a poor man whose stock never amounted to more than \$1,000."

"Silverman has been arrested and held by Magistrate Ladner on a charge of perjury, made by Hefler. He will be arrested again on a perjury charge for making this new allegation," says Mr. Hefler's attorney.

L. S. Babcock, who for the past five years conducted the business formerly carried on by the late George Sherwood, at Waterloo, N. Y., has sold the stock to P. T. Egleston, Newark, N. Y., who has moved to Waterloo.

Employes of Many Providence Jewelry Concerns Enjoy Their Annual Outings.

PROVIDENCE, R. I., Aug. 28.—The second annual outing of the employes of the Theodore W. Foster & Bro. Co. was held, to-day, at Boyden Heights. The 200 employes of the factory, at 100 Richmond St., at 1 o'clock in three special electric cars, when they returned at 6 o'clock they had made every minute of the outing. Just after everybody had risen from the dinner table a committee of the employes, headed by John Lasselle, invited Theodore W. Foster, president of the company, and all the other members of the board to the dance hall. There Mr. Foster, in a speech, made a short address on the welfare of the workingman and the duty of the employe to his employer. He outlined the relation of the employe and employe in the past, and showed how gradually the bond was growing closer and how the two were coming to understand each other better. "I am the employer in the past few years," Mr. Foster, "is becoming more closely attached to the employe. This makes for a better and more harmonious feeling, and this increases the efficiency of both." Mr. Foster thought that he had done his duty when he finished his speech, and was returning toward his seat when Mr. Lasselle stepped forward and, in behalf of the employes, presented him with an engraved silver loving cup.

Baseball and other games were played during the day. Among the guests were Theodore W. Foster, Clyde Foster, president of the company; William Foster and Isaac E. Foster, superintendent.

GORHAM CO.

About 100 of the employes of the chasing and engraving departments of the Gorham Co. held their annual outing and field day this afternoon at the Warwick Club. An elaborate programme of field sports added considerably to the zest of the day. The company made the trip in special cars immediately after the works closed at noon. Upon reaching the club grounds luncheon was served, and at the conclusion of the field day programme the men enjoyed a special dinner. The principal event of the afternoon was the baseball game for the silver cup offered by Superintendent Peek of the engraving department, which was won two years ago by the engravers. This year the chasers failed to wrest it from its holders, the score being a tie. Today they succeeded in defeating the engravers, the score being 9 to 6. Special prizes for the various events were purchased with money secured by the minstrel show, held last Winter by the chasers' department.

J. A. FOSTER CO.

The employes of the James A. Foster Co. enjoyed their annual outing at Emery Park, Auburn, yesterday. The firm has an employes' beneficial association, but Mr. Foster stepped in ahead of this and furnished the outing himself. The party, including Mr. and Mrs. Foster and about 75 employes, boarded a special electric car at the Foster store at 1 o'clock and journeyed to the grounds. The afternoon was spent in

a programme of games and running races until 5 o'clock when a clam bake was served. The officers of the employes' association are the following: President, A. B. Viall; vice-president, J. J. Healey; treasurer, J. F. Barnes; secretary, Miss W. C. Eddy.

JOHN AUSTIN & SON.

Thirty employes of John Austin & Son, gold and silver refiners, spent a merry day on Narragansett Bay, to-day. By chartered steamer they went to Field's Point, where the first event on the programme was the annual shore dinner, which was quickly dispatched. Then the party re-embarked and sailed to Crescent Park, where athletic contests occupied the rest of the day. A baseball game between the married men and the bachelors went to the married men by a score of 9 to 7.

Death of William A. Smith.

ATTLEBORO, Mass., Aug. 28.—William A. Smith, who for many years was a well-known resident of Attleboro and a member of the firm of Smith & Crosby, died at the home of his daughter, Mrs. E. Scott Shannon, in New York City, last Tuesday morning, from diseases incident to old age.

Deceased was born in Mansfield, Mass., where he learned the jewelry trade and worked for some time. He afterward worked in the factory of H. D. Meritt & Co., North Attleboro, and also with Howard & Briggs, Attleboro. In 1876 he formed a copartnership with Alfred R. Crosby, forming the firm of Smith & Crosby. This continued until about two years ago, when he was forced to dispose of his interests to his partner on account of illness and retired from the business entirely. The business has since been continued under the firm name by Mr. Crosby and his son.

Mr. Smith was 74 years of age and was a member of the Ezekiel Bates lodge of Masons and other Masonic bodies. The news of his death was received with regret by his host of friends in the Attleboros.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Aug. 25.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Amapala: 2 cases plated ware, \$269.
Buenos Ayres: 1 case watches, \$1,841; 22 cases clocks, \$400.
Barbados: 1 case jewelry, \$140.
Bombay: 18 cases clocks, \$213.
Colon: 4 cases plated ware, \$438; 6 cases clocks, \$114; 4 cases watches, \$511.
Constantinople: 1 case silverware, \$1,000.
Curacao: 1 case silverware, \$250.
Demerara: 3 cases watches, \$214; 9 cases clocks, \$248.
Hamburg: 3 cases jewelry, \$128; 1 case silverware, \$212.
Havana: 1 case plated ware, \$115.
Liverpool: 1 case silverware, \$104; 1 case jewelry, \$500; 34 cases clocks, \$205; 4 cases silver-smiths' sundries, \$795; 1 case thermometers, \$125.
London: 1 case silverware, \$1,000; 6 cases watches, \$1,049.
Montevideo: 2 cases silverware, \$224.
Port au Prince: 15 cases watches, \$204.
Rio de Janeiro: 2 cases jewelry, \$367.
Valparaiso: 8 cases plated ware, \$1,283.
Vera Cruz: 54 cases clocks, \$847.

Increase in Price on All Lines of Rough Diamonds Announced by the London Syndicate.

Cablegrams received in New York, last week, announce an advance of from 3 to 4 per cent. on all rough diamonds controlled by the London syndicate. A large importer confirmed the statement and added that the advance in rough goods will of course mean an advance in the price of cut diamonds probably of 5 per cent.

It was explained that the product of the Wesselton mine, which was advanced a short time ago, 5 per cent. is included in the general advance in prices.

It was also learned that there has been a recent advance of 12½ per cent. in the wages paid to the diamond cutters in this city. This naturally means a still further advance in the price of the cut diamonds.

Death of J. C. Baldwin.

ST JOSEPH, Mo., Aug. 25.—J. C. Baldwin, a former well known jeweler of this city, died at Marietta, a short time ago, and the news of his death, which was received here this week, was the cause of sorrow to his many friends.

"Joe" Baldwin, as he was known here, for a long time had a store on Felix St. At the time he was identified with the business community of St. Joseph he was prominent and popular. He left here about 12 years ago to go with a stove company at Savannah, but later returned to the jewelry trade and engaged in business in Iowa. Last Spring he was called to Marietta by the death of his father and remained in that town until he passed away.

He is survived by a widow, who lives in Panora, Ia., and one daughter. Mrs. Baldwin will make her home in Seattle.

Death of Ray Ballard.

ULSTER, Pa., Aug. 25.—Word has been received here of the death at Pittsburg of Ray Ballard, at one time a well known jeweler of this town. Mr. Ballard had been ill with typhoid fever, but his condition had not been considered serious.

Deceased, who is the son of the late Mrs. Shepard Ballard, of Troy, was about 43 years old and began business at Ulster about 1891. He built up a fair trade, and in the early part of 1897 quit business here and took a position with his cousin, Frank L. Ballard, at Troy, and remained with him for many years.

Mr. Ballard is survived by a widow, his sister, Mrs. Albert Park, and a brother, Dix. The body was taken to Troy for interment.

A. H. Uhrig, Gallipolis, O., Goes Into Bankruptcy.

GALLIPOLIS, O., Aug. 25.—A. H. Uhrig, who conducts a jewelry store here and at Pt. Pleasant, W. Va., has filed a voluntary petition in bankruptcy in the United States Court.

Mr. Uhrig's business was founded by the late Chas. W. Uhrig in this city, about 1888, and A. H. Uhrig took charge after his brother was compelled to go west for his health. When Charles died, in 1907, A. H. Uhrig purchased the interests of the latter's estate, continuing it alone, and opened a branch at Pt. Pleasant, in July, last year.

LOUIS J. DEACON, Cape May, N. J.

New York State Retail Jewelers' Association Sends Important Notice to the Jobbing Trade.

UTICA, Aug. 28.—President Charles T. Evans, of the New York State Retail Jewelers' Association, has prepared a circular which will be sent to the jobbing trade in New York State and Boston the coming week. Mr. Evans states that all jobbers are asked to receive a copy of the circular and to supply the information which is desired. The circular follows:

UTICA, N. Y., Aug. 31, 1909.

The Jobber in Diamonds, Watches and Jewelry: At a meeting of the Executive Committee of the New York State Retail Jewelers' Association, held recently, among other important matters discussed, the subject of the retailing jobber was brought up, and the unanimous opinion was that the greatest abuse at present existing in the jewelry trade is the retailing jobber.

Jobbers must have the support and trade of the jeweler or they cannot exist. Consequently they endeavor to sell the retailers as much of their stock as they will buy from them, and thereby cut out the manufacturer who sells his goods to the retailer direct. Jobbers demand of manufacturers who solicit their trade that they shall not solicit business from the retailer. Considering their attitude in this direction, they are inconsistent in their treatment of the retailer, although we do not believe that they recognize this inconsistency. Retailers generally concede the right of the middleman to exist, and believe that their interests are best served by manufacturer, jobber and retailer each confining their efforts to the proper field. We submit, however, the injustice of your position when you only sell our customers such goods as you can induce them to buy from you, and that under the guise of selling "at wholesale." If the jobbers could come out in the open and conduct their retail businesses on the ground floor, with its accompanying expenses for rent, advertising, etc., they would not then be the competitors of the retail jeweler that they now are. We concede the fact that it is perhaps a hard matter to turn them away, particularly when your trade among jewelers of your own city is perhaps inconsequential. It may seem to you that inasmuch as city jewelers do not support you that you are justified in selling to their customers. But you are not. Right is right, and wrong is wrong, and in this matter your position is wrong. Through their association work the jewelers outside of your city are becoming familiar with the fact that you do retailing business. This they have not previously known. They do not approve of it, and if your practice is continued it is going to mean to those who come out openly and state that they intend to conduct a wholesale business exclusively are going to have the good will and patronage of jewelers who recognize the fact that at present one class of men is a cause for common reprobation.

We also submit that great injustice is done by the indiscriminate sale of watches and jewelry in general stores, druggists and gentlemen's furnishers. Very often the jewelry bought is of such character that the jeweler does not handle it. Nevertheless, the storekeeper who buys it has established connection with the wholesale jewelry house, and expects to and does buy his diamonds and watches from the jobbers; and it does not matter to the retail jeweler whether the sale is made at wholesale prices or retail prices, the loss is lost so far as he is concerned. In every city, also, we find a few young men who sell jewelry on the side, and in fact are nothing more or less than "runners" or "cappers" for the wholesale jewelry house, receiving a commission on their sales.

What we propose to do is this: We are going to compile a list of the jobbers who signify their intention of distributing their goods through the retail jeweler exclusively, and who will display a sign, "No goods at retail," and live up to it. We intend that the retail jewelers of this State shall know who these fair jobbers are, and we will ask them to give these firms the benefit of their patronage wherever possible.

We believe that the retail jeweler has made the jewelry business what it is, and we believe that he is entitled to any profits resulting from the

sale of jewelry and kindred articles at retail. We believe that jobbers would be better off without the retail end of their business with its accompanying annoyances. We submit the above for your kind consideration with the hope that you will declare yourself for the legitimate retail jeweler, and that we may have the privilege of enrolling your name among those who do not sell at retail.

Trusting to receive a favorable reply, we remain, The Executive Committee of the New York State Retail Jewelers' Association, by Charles T. Evans, President.

Recent Decisions by General Appraisers as to Duty on Jewelry and Kindred Lines.

The Board of United States General Appraisers has upheld the assessment by Collector Loeb of 60 per cent., under the "jewelry" provision on collars and necklaces composed of imitation pearls strung. The importers, the F. William Gertzler Co., filed a protest to this classification, holding that the articles should be admitted at 20 per cent., as being imitation precious stones. General Appraiser Shtarretts, who writes the decision for the Board, holds that the imposition of the higher duty was correct and must stand.

A protest as to the classification of enameled buckles and pins as "jewelry," made by the Royal Metal Mfg. Co., has been overruled. The importers claimed the goods should be admitted at rates varying from 20 to 45 per cent., under the provision for manufactures of metal, manufactures of glass or imitation precious stones. None of these claims is held by the Board to be appropriate.

B. Altman & Co. and others were unsuccessful in securing the lowering of assessments on importations of women's side and back combs composed of celluloid mounted with metal, plated with gold, hatpins with decorated metal heads and goldplated bracelets. The Board was unwilling to grant a reduction of the 60 per cent. duty levied by the Collector.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Mr. and Mrs. F. V. Kennon were among the guests at Sakonnet, the past week.

Frank Dunn, of Dunn & Rodenburg, is on an extended trip through the west. J. Fellman, 132 Main St., Woonsocket, has been conducting a manufacturers' sale.

Mr. and Mrs. John H. Tuttle were the guests, the past week, of friends at Quonset.

Ed V. Kennon, of the John T. Mauran Co., was in New York, a portion of the week.

Colitz, Woonsocket, has been elected president of the Congregation B'Nai Israel of that city.

Possner, a new jewelry buyer from Mexico City, Mexico, is in the city looking over local lines.

Howard B. Hough has been granted a building permit for the erection of a garage at 278 Olney St.

Mr. and Mrs. Charles A. Russell and others are among the guests at the Robwood Inn, Gilmanton, N. H.

Harry C. Lee, New York, was calling on the manufacturing jewelers of this city, the past week, placing orders.

W. Kelley has started on a three weeks' trip through the west in the interest of the Tilden-Thurber Co., this city.

B. Crandall, watchmaker with H. Fellman, Woonsocket, with his wife, is spending a vacation at West Barrington on Narragansett Bay.

George C. Rueckert, of the Rueckert Co., has returned from an automobile trip through the Berkshire Hills, in western New England.

Red B. Thurber has started on a trip through the eastern part of the country among the customers of the Tilden-Thurber Co. of this city.

Mayor Henry Fletcher was one of the guests at the luncheon given by the park commissioners at the Roger Williams Park Casino, Thursday.

Henry A. Kirby has been assessed on \$200 worth of property in Johnston according to this year's assessment, which has just been announced.

Gustav Saacke, of Wildprett & Saacke, was in New York, the past week, combining business with pleasure. He was accompanied by his son.

Thomas R. Kilkenney, of T. R. Kilkenney Co., returned, the past week, from a successful trip through the middle west as far as Pittsburg, Pa.

Edwin H. Nordinger and wife have given a mortgage of \$6,000 to the Citizens Savings Bank, on a lot with improvements on the north side of Angel St.

Harry Cutler was the donor of a suit of clothes and William Loeb of seal rings and soft pins as prizes for the games at the Tikwotton playground, last week.

Otto A. Herzog and wife have given a mortgage to Charles J. Herzog on real estate with improvements on Union Ave., subject to a previous mortgage of \$3,000.

Howard Sisson, representative for E. A. Bennett Co., this city, in New York and the middle west, has returned to his desk after a five weeks' vacation trip down in Mine.

The Brown & Sharpe Mfg. Co. started its plant, on Monday, on full time, after a two weeks' vacation, and with a nearly full complement of help. It has issued a call for 25 apprentices.

The Gorham Co. is rushed on orders in its bronze department. During the past week, the model was received for the equestrian statue of Gen. George A. Custer, by E. C. Potter, the sculptor.

At the second annual meeting of the Barrington Yacht Club, Saturday evening, Horace L. Manchester was elected a member of the board of directors and William T. Lewis on the racing committee.

Paul Newman, formerly of the manufacturing jewelry concern of Workman & Newman, this city, has returned from an extended trip through Europe, during which he collected a large variety of novelties.

The following buyers have been visiting the manufacturers of this city and the Attleboros, the past week: Herman Mitchell, of Samstag & Hilder Bros., New York, and Gilbert Friedlich, of the Baltimore Bargain House, Baltimore, Md.

The Gorham Mfg. Co. has been awarded the contract for the bronze and metal work on the Bell memorial mausoleum, which is to be erected through popular subscription by the citizens of Brantford, Ont., where the memorial is to be placed.

George H. Holmes, of the George H. Holmes Co., this city, sailed yesterday on the *Kaiser Wilhelm II.* from New York for Cherbourg. He expects to be joined in Paris by Mrs. Holmes and Miss Holmes, who have been touring the Continent.

Samuel Harrison, 39 years old, employed by the Manchester Mfg. Co., 100 Stewart St., had his left hand caught in one of the rolling machines at the works of the company, early last week. He was sent to the Rhode Island Hospital, where his injuries were dressed.

Mayor Henry Fletcher was one of the principal speakers at the annual meeting of the Sixth Ward Republican Club at Rocky Point, Wednesday. Among those present were Joseph Baker, Jr., George H. Grant, Walter B. Frost, Charles E. Hancock and Ernest Rueckert.

Guistino Tortolani, one of the best known diamond and pearl setters in this city, has been elected chairman of the general committee of the Italian societies, to arrange for the reception and entertainment, on Sept. 6, in honor of the visit of the Italian cruiser *Etruria*.

Among the foreign importations received through the Providence Customs House, the past week, were the following: From Bremen, one package of celluloid goods and eight of imitation precious stones; from Hamburg, one package of imitation precious stones; from Southampton, one package of imitation precious stones.

Herbert S. Tanner, the Westminster St. jeweler, was one of the honorary bearers at the funeral of Secretary of State Charles P. Bennett, on Saturday. Among those attending the funeral were Mayor Fletcher, Lieut.-Gov. Arthur W. Dennis, William H. Luther, Byron E. Daggett, John F. O'Connell, Aldridge G. Pearce and Representatives Harry Cutler and George H. Holmes.

Frank L. Miller, a manufacturing jew-

eler of this city, was slightly hurt at North Attleboro, Sunday afternoon, when the tire of his runabout burst and Mr. Miller was pinned beneath the framework of his car when it turned turtle. His legs were badly bruised, but fortunately no bones were broken. An odd coincidence of the case was that the register showed that the car had gone 1,313 miles when the upset happened.

Among the guests at the complimentary dinner tendered to the directors of the Atlantic National Bank and a few friends, at the Pomham Club on Friday afternoon, were Robert E. Budlong, president of the Manufacturing Jewelers' Board of Trade, Lieut.-Gov. Arthur W. Dennis, Mayor Henry Fletcher, of the Fletcher-Burrows Co.; William H. Luther, of William H. Luther & Sons; Walter W. Whipple, president of the Chicago, New York and Boston Refining Co., and William L. Mauran, of the John T. Mauran Mfg. Co.

According to Wolf Kaplan, junior member of the firm, the statement published, last week, to the effect that Colitz & Kaplan, 735 Westminster St., had been swindled by a bogus diamond broker is misleading. Mr. Kaplan says that the alleged broker came into the firm's office some time ago and wanted to buy a diamond, for which he offered in payment a check. Not knowing the customer, and not desiring to cash a check of so large an amount without ascertaining whether or not it was good, Mr. Kaplan told the man, he says, to come around again the next morning. In the meantime he made an investigation and found that the check was worthless. As the customer did not show up again, Mr. Kaplan turned the check over to the police. The man did not attempt to sell bogus gems, but tried to pass a check, which Mr. Kaplan would not accept without inquiring as to its value.

After a hearing before Judge George T. Brown in the Superior Court, Saturday, Samuel Slocumb, Pawtucket, and Frederick W. O'Connell, this city, were appointed permanent receivers to wind up the business of the United Brush Co., Pawtucket. The former was made temporary receiver, recently, on the petition of Charles H. Poland, Warwick, one of the officers and a large stockholder of the company. The action was taken pursuant to a vote of the stockholders for the purpose of settling up the business of the concern, which was alleged to be unable to meet the claims against it on account of lack of ready capital. Counsel representing the creditors argued against the appointment of Mr. Slocumb, saying that the company was unsuccessful under his management. Other creditors were represented by counsel who favored the appointment of a lawyer as co-receiver with Mr. Slocumb, and the court adopted this suggestion by naming Mr. O'Connell, an attorney.

C. Kistler, Mammoth Springs, Ark., who, a short time ago, was assaulted by some unknown person in the rear of his store, where he lived alone, is said to be in a precarious condition. His recovery is believed to be doubtful on account of his advanced age. The object of the assault was robbery, which, however, was unsuccessful owing to the intervention of passersby.

JET HAT PINS WITH LONG STEMS

The heads are 1 1/2 inches in diameter. The pins are the most popular novelty of the day. Assorted — four good patterns in each dozen.

North Attleboro.

William Swift has been enjoying a short vacation at Oaks Bluffs.

Jones Lyons has returned from a short vacation enjoyed at Block Island.

A. B. Ballou was in New York, last week, in the interests of his concern.

Walter Cutler has resigned his position as a man for the W. K. Toole Co., of Pawtucket.

V. C. Sherman left, last week, for the city in the interests of the Estate of O. M. Sherman.

Joseph O'Neil left, last week, for the city in the interests of the Pawtucket Jewelry Co.

Walter Duncan returned, last week, from a western trip in the interests of the C. Ray Jewelry Co.

Andrew B. Flagg returned Saturday from a western trip in the interests of the Lindroth Co.

Edward Hornig is on a business trip through the eastern States in the interests of the Coddington & Heilborn Co.

William Peckham has returned from the city and has again taken charge of the New York office of J. H. Peckham & Co. Charles V. Whitmarsh, for a number of years bookkeeper with F. M. Whiting & Co., returned, last week, from the Attleboro Sanitarium.

Daniel Corey attended the reunion of the 1st Regiment of the Massachusetts Volunteers of which he is a member, at Framingham, last week.

Over Labor Day all the firms in the city will discontinue the regular Saturday afternoon holidays which they have been giving during the Summer months.

Walter Withington, an old and respected member, died at his home last Wednesday at the age of 84 years. He was employed for a number of years by Bliss & Carpenter. Louis Bagnall, for the past two years shipping clerk for E. I. Franklin & Co., severed his connection with that firm and will enter Exeter Academy when it opens next month.

The employes of the H. H. Curtis Co. had a clambake and outing at Magee's on Saturday afternoon. A feature of the day was the ball game between the married and single men, which was won by the latter.

Charles E. Riley, treasurer of the Geo. L. Allen Co., has filed the following corporate report with the Treasurer of the State: Inventory, \$31,161; cash and debts received, \$121,198; manufactures and merchandise, \$31,591; total, \$183,950; capital, \$99,000; accounts payable, \$26,606; floating debt, \$41,446; profit and loss, \$16,898; total, \$250,894.

Last week one of the local jewelers found a valuable package of jewelry which had been placed just within a window in his store.

When he went to take it out in the store he found that some one had taken it. After a while he remembered of a man who had called looking for a position, and when he went to that man's house he recovered the package.

Thomas Warren Bishop, the oldest citizen in Plainville, celebrated his 91st birthday on Friday at his home on Washington St.

He was born in Connecticut Aug. 27, 1818. He learned the jewelry trade in the factory of W. D. Coddington & Co., at North Attleboro, and after working there many years retired. He takes great pride in the fact that his father, who died two days before his 100th birthday, fought in the Revolutionary War and was quite distinguished at that time.

All the firms in the Plainville shops were forced to close last Thursday evening for the remainder of the week on account of a piston rod on the engine breaking and thus preventing the transmission of the power. The broken parts were loaded into an automobile Friday morning and carried to the works at Fitchbury, where a new part was cast. The accident came at a particularly bad time, as nearly all the concerns were busy with large orders from their salesmen, who are now in the west. Fearing that it might be a week before the shops could open up the firm of Whiting & Davis had a donkey engine brought all the way from Providence to run a part of their factory. The firms, however, were able to resume work Monday.

Attleboro.

Ralph Regnell was confined to his home by illness, last week.

J. M. Fisher was a guest at the Attleboro Sanitarium, last week.

S. O. Bigney returned last week from a visit to his old home in Nova Scotia.

William A. Cook, of the Fontneau & Cook Co., is enjoying a short trip in Maine.

Charles P. Crane has returned to Chicago, after an eastern trip in the interests of Bliss Bros.

Everett S. Capron was elected president, last week, of the society composed of the Hodges descendants.

The framework of the new Mossberg factory is already up and shows the full outline of the building.

Chester Smith left, Monday, for New York, where he will be in charge of the New York branch of the James E. Blake Co.

John McDonough, formerly colorer for G. C. Hudson & Co., North Attleboro, has accepted the position as foreman with Kelly Bros.

The W. D. Wilmarth Co. was granted a permit, last week, by the Board of Health to make connections for the waste water from their factory into the Ten Mile river.

S. E. Edwards, of the house staff of Reed & Barton's Chicago office, has been promoted to the position of traveling salesman and will cover Illinois, Iowa, Indiana and Michigan.

The Attleboro manufacturers are at the present time having a large demand for purses. Advertisements for over 1,000 purse makers were noticed in the daily papers, last week.

Owing to the break of a number of hoops on the large tank located on the top of the second Robinson building, the supply of water for the firms in that building was curtailed for a day, last week.

The new \$55,000 school house, which is soon to be dedicated, has been called the Bliss School, after the late Charles E. Bliss, who was a manufacturing jeweler

and a member of the school committee for many years.

Announcement has been made, this week, that W. H. Saart had purchased the interests of George J. Kelley and Miss Lydia Peck in the W. H. Saart Co. Mr. Saart, who will continue to conduct the business with the same lines and under the same name, has had long experience in jewelry manufacturing, and before his connection with this successful business held many important positions with jewelry firms in North Attleboro and Attleboro. The present company was incorporated in 1905 and manufactures sterling silver novelties and toilet ware.

Buffalo, N. Y.

Fred Peterson, of Schutt & Peterson, has returned to Buffalo after a month's vacation.

Louis Schutt, secretary of the Buffalo Retail Jewelers' Association, accompanied by his wife, has departed on a pleasure trip of a month.

R. E. Smith, of the clock and silverware department of King & Eisle, is away on his vacation. Miss Lulu Lenhard, of the same department, recently returned from a vacation of a week.

Julius I. Block, proprietor of the Niagara Ring Mfg. Co., who was accompanied by his wife and family on a western trip, has returned home. Mr. and Mrs. Block were visitors at the Alaska-Pacific-Yukon exposition at Seattle.

Among the customers who visited the Buffalo jewelry market were: J. Mason, Jamestown, N. Y.; J. F. Murdoch, of A. C. Gies, Pittsburg, Pa.; L. J. Resnor, Port Allegheny, Pa.; P. M. Riley, Holland, N. Y.; A. Katsenmeier, Burgettstown, Pa., and Mr. Lewis, Arcade, N. Y.

Considerable enjoyment was created by the members of the Buffalo Retail Jewelers' Association at an informal dinner which they recently held at the Bedell House, Grand Island, a Summer resort near this city. A feature of the event was the presentation of a handsome silver loving cup, artistically inscribed, to William Ehmann, president of the organization, as a token of appreciation of his efforts in behalf of that body during his term of office. The presentation speech was made by Albert Zilliox. Among those present were: Mr. and Mrs. William Ehmann, Mr. and Mrs. Frank Nusc, Mr. and Mrs. Fred Petersen, Mr. and Mrs. George Kiuetz, Albert Dieboldt, Mr. and Mrs. Gus. Hanneman, Mr. and Mrs. Louis Schutt, Gus. Frisch, Mr. and Mrs. Fred J. Dorn, Mr. and Mrs. William F. Ehmann, Mr. and Mrs. Albert Zilliox, Mr. and Mrs. H. Reinhardt, Mr. and Mrs. Jerome Scherer, Mr. and Mrs. F. Ehrenfried, August Hoyler, Jacob Zilliox, M. Descomb, G. Debus, E. Detling, S. H. Brick, C. G. Hoff and ladies. The entertainment committee consisted of the following: Gus. Frisch, A. Dieboldt, Fred Petersen, E. Detling and S. Striker. Dancing followed immediately after the dinner.

Alva G. Ruff, Grand Rapids, Mich., is now at St. Johns, in the same State, where he has purchased the business of Eugene Parker.

54 Maiden Lane - - New York

D. E. D. McMURRAY, President

JOHN W. SHERWOOD, Vice-President

LOUIS J. MONTAGNON, Secretary-Treasurer

Pittsburg.

F. Lang, who has been at Cambridge Springs with his family, has returned to Pittsburg.

Joseph, Donora, and Harry Bloser, No. Kensington, were in Pittsburg, last week, on business.

Lawson B. Adams and Mrs. Adams, who have been enjoying their vacation in the country, have returned to Pittsburg.

L. Roberts, of John M. Roberts & Son is spending the week-ends at Northampton, a most attractive resort for Pittsburgers.

Harry Heeren, of Heeren Bros. & Co., returned from his trip to Somerset, and tells some pretty good fish stories about mountain trout he saw.

Aug. 28 was the last Saturday on which jewelers observed the half holiday. Stores hereafter will remain open normal until 5 and 6 o'clock.

The Crescent Jewelry Co. opened its new store at 441 Smithfield St., last Saturday. The store is only a few doors from Fifth Ave. and is in a good location.

M. Smit, of the M. J. Smit Co., and J. Smit have returned from an automobile trip to points in New York State and to Cambridge Springs, Pa.

Geel F. Roberts, who is in Canada with the Iron City Fishing Club, an organization of Pittsburg business men, writes that he is enjoying himself and is catching a lot of fish.

S. Harris, the Seventh Ave. jeweler, recently bought the cigar-stand of F. Siefers in 6th St., has sold the store to Buffalo man. Not being experienced in the cigar business he did not care to take the store.

Sam F. Sipe is building a number of new handsome sign boards to help boom his business and especially the diamond trade, which he says is picking up. Pittsburgers have more money to spend now than they have had for several years, he says.

Madison L. Stevenson, of the March, Brown & Mather Co., and Mrs. Stevenson have returned from a trip through Maryland and West Virginia. C. C. Marsh, of the same house, is still at Mt. Vernon, O., where he has been for more than a year trying to regain his health, and he is said to be recovering it slowly.

Chris Hauch, of 219 Diamond St., has recently renovated and repainted his store in most attractive condition. In addition, Mr. Hauch has constructed a watch sign, which he has placed on the front of his place of business just above the doorway as a reminder to the public that there is a jewelry store in the neighborhood.

George P. Christy, who recently retired from a business on account of his health, has been putting in his time in the open work in the garden at his lovely home in Stickley, where he has an acre of ground.

M. Christy, who was formerly of the firm of Vest, White & Christy, has not decided what business he will embark in, but intends to go into something that will keep him in the open air.

While P. C. Gillespie was in Europe buying diamonds for Gillespie Bros. he caused to be mailed to the customers of the firm fifty pictures of European scenes. Each

recipient of the pictures was informed that if he would call at the store the picture would be framed free of charge. As a result nearly everybody called. It was a gentle reminder that the firm's place of business is in the Park building. The store has recently been overhauled, the new cut glass shelving being quite an added feature of the house.

The United States District Court in this city has referred the bankruptcy petition filed in the said court by Abraham Goldman, mention of which was made in the last issue of THE JEWELERS' CIRCULAR—WEEKLY, to the referee in bankruptcy of the district, William R. Blair, for adjudication. It is expected that a receiver will be appointed in a few days in the hope that Goldman's affairs may be speedily adjusted to the satisfaction of his numerous creditors, who are anxious to get their money. Just what the bankrupt estate will bring appears to be a much mooted question.

J. C. Crawford, of W. W. Wattles & Sons, has called a meeting next Friday night at 8 o'clock at the Hotel Henry for the purpose of organizing a bowling league from among the members of the Jewelers' 24 Karat Club of Pittsburg, following out the ideas of President Roberts of the club. Last season and the year before the individual jewelry firms had clubs of their own, but this coming season it is proposed to name the various clubs "Diamond," "Ruby," etc. It is proposed to so divide up the players that no club selected among the members of the karat club will be much stronger than another. In this way it is expected that the competition for honors will be much more pronounced, with the result that everybody will take a greater interest in the matter.

Among the traveling representatives who called on the trade at Pittsburg, Pa., last week, were the following: Wm. V. Middlebrook, B. A. Ballow & Co.; Mr. Crane, Mandeville, Carrow & Crane; Geo. E. Heywood, Horton-Angell Co.; John W. Sherwood, Solidarity Watch Case Co.; Wm. J. Anton, Durand & Co.; Mr. Tanner, Allen, Mc Nerney & Co.; Frank L. Wood, Ludwig Nissen & Co.; Henry Hoffa, Hodenpyl & Walker; W. T. Francis, Waterbury Clock Co.; Mr. Elmore, Lapierre Mfg. Co.; Joseph J. Sideman, Redlich & Co.; Chas. P. Crane, Bliss Bros. Co.; Wm. Bosselman, T. Quayle & Co.; John Hoagland, F. T. Pearce Co.; W. F. Joel, E. H. H. Smith Silver Co.; W. G. Moland, Sansbury & Nellis; W. C. Sherman, Estate of O. M. Draper; M. F. Loomis, C. Sydney Smith & Co.; Shattuck, Ford & Carpenter; Frank J. Ryder, Walter E. Hayward Co.; Chas. E. Fallon, Nussbaum & Hunold; Frank W. Collom, Sulzberger Bros.; Chas. H. Clark, W. G. Clark & Co.; Maurice Kohn, Silbermann, Kohn & Wallenstein; F. R. Truell, W. H. Saart Co.; H. L. Sherman, Simpson, Hall, Miller & Co.; T. K. Benton, G. W. Parks Co.; W. E. Harwood, Fontneau & Cook Co.; Mr. Childs, Warren & Williams; Mr. Pierce, T. I. Smith Co.; Harry C. Kip, H. F. Barrows Co.; Donald Lestage, H. D. Merritt Co.; Mr. Goldberg, J. J. White Mfg. Co.

H. C. Cox, Providence, Ky., is now with A. B. Scott & Co., Fairmont, W. Va.

Lancaster, Pa.

Arnold Kretchman is in New York for a week's vacation.

Archie K. May, York, visited Lancaster, last week, with his wife and sister.

W. W. Appel is enjoying himself at Ocean Grove, whither he went Friday.

F. G. Carver is spending two weeks on a trip to Lakes Champlain and George.

John S. Reilschy, with T. Wilson Dubbs, is visiting points of interest in Lancaster county.

C. E. Faegley, head watchmaker for S. Kurtz Zook, is spending his vacation at Hanover, Pa.

Franklin Christie, a jeweler of Indianapolis, Ind., was married here, last week, to Miss Pauline Winslow.

Julius Jurgenson, formerly with Popper & Son, New York, has taken a position as a manufacturing jeweler with G. William Reisner, Lancaster.

John H. Brown, who has spent the past four months in the mountains near Denver, Colo., has returned to Lancaster, greatly improved in health.

Dr. George R. Rohrer, eye specialist, has returned from an automobile trip to the New England States with a party of friends. They covered 1,403 miles.

George R. Weber, of Louis Weber & Son, has returned home with his wife from a sojourn at Asbury Park. Harry T. Kiehl, of this firm is on a pleasure trip in eastern Pennsylvania.

John Larchmont, Milwaukee, en route to London, England, his old home, where he goes on a two months' visit, stopped over in Lancaster a few days, with his wife, to visit her parents.

Parker Williams, Cleveland, O., is visiting relatives near Marietta, his former home. From there he will go to Philadelphia, where he learned the jewelry business, for a week.

M. B. McAllister, Boston, who learned the jewelers' trade in Lancaster, spent last week in this city with relatives, leaving on Saturday for a two weeks' trip to Chicago, where he expects to engage in business for himself.

John J. and Charles E. Bowman, of Ezra F. Bowman's Sons, their engraving department foreman, and A. F. Hostetter, president of the Non-Retailing Co., had an outing, last week, at Edelweiss, on the Susquehanna river.

John M. Shookers, formerly head watchmaker for Louis Weber & Son, Lancaster, has bought out the jewelry business of E. E. Coble, Elizabethtown, Lancaster county, and has already taken possession. Mr. Shookers will improve and beautify the store.

Thomas Raymond Helms, a jeweler of Hamlet, N. C., was married, Aug. 25, at Brownstown, Lancaster county, to Miss Grace Margaret, daughter of I. J. Myers. The couple became acquainted while the groom was a student at the local technical school. The best man was Frederick A. Peters, of the H. S. Meiskey Co., Lancaster. The maid of honor was Miss Ellen T. Achey, Philadelphia.

J. C. Calkins, engaged in the jewelry business in Mobile, Ala., has left that town.

We present herewith illustrations of two bronze Bas-reliefs — Hendrick Hudson and Robert Fulton.

Made in the following sizes

Mounted on Oak,	8 3/4 in.	x	12 1/4 in.,	Hudson or Fulton	-	Retail Price,	\$5 00

Col. J. Warner Hutchins has returned from his yachting trip.

John Grundt will open a new retail jewelry store at 3118 Kensington Ave.

Theodore Lindhorst, 1208 W. Girard Ave., spent the week-end at Ocean City.

William Grand will spend the month of September with his family at Ocean City.

S. W. Hart, Kennett Sq., is planning a visit to his old home in Fulton County, Pa.

Robert Kiel, with H. Noble, Chicago, was a recent visitor to this city on business.

H. Bedichimer, of I. Bedichimer & Co., 1200 Walnut St., sailed for Boston, Monday.

Harry Sears, with Charles O'Bryon, is visiting his wife and family at National Park.

James L. Pequignot, 1331 Walnut St., has gone on a fishing trip along the New England coast.

Milton Reed, Doylestown, Pa., has returned from a short stay at Lake Hopatcong, N. J.

James Stewart, 2043 South St., is spending a few days with his family at Wildwood, N. J.

Joseph M. Parker, 116 S. 12th St., and J. B. Hogson are spending a few weeks at Longport, N. J.

J. C. Ober, buyer for the Pennsylvania Traffic Co., Johnstown, Pa., visited the trade, last week.

William Britton, formerly of Clifton Heights, Pa., has started in the jewelry business in Loraine, O.

Wm. C. R. Wright, Wilmington, Del., has resumed business after a pleasant vacation at Wildwood, N. J.

Fred Barry, with L. Stern & Co., who has been sojourning with his family at Ocean City, has returned to his home.

Miss E. Leiner has resigned her position with F. L. Shaw, Camden, and is now with the Crosby Co., 920 Chestnut St.

Russel Williams, connected with the Wanamaker jewelry department, is spending his vacation at Island Heights.

Mr. Shannon, of W. H. Hopkins & Co., Jacksonville, Fla., was a visitor to this city, last week, buying for their new store.

Mrs. M. C. Williams, wife of a Trenton jeweler, is recuperating at Ocean Grove, N. J., after undergoing a serious operation.

G. W. Leopold, representing H. O. Hurlburt & Sons, has just returned from the south, where he reports business as very good.

E. C. Jump and E. H. Flury, of H. O. Hurlburt & Sons, are back again at business after a most enjoyable sojourn at Ocean City.

William Leiner, Front and Dauphin Sts., has given up his business and has accepted a position with the Newark Jewelry Co., Newark, N. J.

John F. McIlvane has been appointed receiver in the bankrupt estate of John H. Kurtz, who dealt in jewelry, etc., on the instalment plan.

George K. Dietz, Millersburg, O., was a recent visitor to this city and announces that his Fall opening will take place the latter part of September.

George Hurlburt, with H. O. Hurlburt & Sons, 14 S. 10th St., has started on his sec-

ond trip through Pennsylvania, Ohio, Maryland and West Virginia.

The Vandusen & Stokes Co., 1123 Chestnut St., are busy in their workshops, additional hands having been taken on preparatory to getting out their gold and silver orders.

J. C. Dotter, Columbia Ave., accompanied by his wife and son, is motoring in his new Packard machine through Leititz, Landisville, Petersburg, Mt. Gretna and Reading.

Polard Bros., 4347 Main St., Manayunk, are making extensive alterations to their store. They intend to put in a new front and make many other improvements in their quarters.

Charles T. Rogers, 31 S. 17th St., formerly of Cumberland, Md., reports business increasing to such an extent that extra help and an extension of floor space will be necessary.

Harry Barry, with M. Sickles & Sons, who has been spending the latter part of the month at Chelsea with his family, has started on an auto trip with a party of friends along the Jersey shore.

T. A. Willson & Co., manufacturers of spectacles, Reading, Pa., will erect a large mill addition, 100 by 125 feet, to their plant. This will be ready for occupancy by January. Several hundred new hands will be employed.

Miss Margaret Iteyll, daughter of Joseph F. Iteyll, watchmaker, 706 Chestnut St., with Miss Edith Fenton, sailed, Aug. 23, on the steamer *Inantico*. The trip will include Boston, Portland and the White Mountains.

George Becker, for some time associated with Otto T. Moock, 809 Sansom St., has purchased the business and will continue as a manufacturing jeweler. Mr. Becker is a brother of H. L. Becker, 1505 Passyunk Ave. Mr. Moock has accepted a position with S. Rosenthal, manufacturing jeweler.

Maxwell & Berlet, 16th and Walnut Sts., have completed the golf trophies for the Merchantville Field Club. The special prize has been dubbed the "Big Chief" trophy because of its name, Wa-Ma-Ho, taken from the first two letters in the last surnames of the three gentlemen presenting it.

It has just come to light that the young girl, Dorothy Parker, who was run over and killed by a trolley car at 6th and Arch Sts., last Friday evening, was the daughter of Mr. Parker, long associated with the Keystone Watch Case Co. and recently with M. A. Mead & Co., New York and Chicago.

Mr. Jackson, night watchman for the Jewelers on Chestnut and Sansom Sts., while making his rounds, last week, slipped and fell down the cellar steps in the rear of T. B. Hagstoz's building, 809 Sansom St., where alterations are being made. Mr. Jackson is painfully injured, having sustained a broken rib and bruises on the body.

The following jewelers were visitors to this city during the week: W. L. Roberts, Wilmington, Del.; D. H. Krause, North Wales, Pa.; J. H. Shuler, Norristown, Pa.; E. K. Bean, Lansdale, Pa.; M. K. Laudenslager, Souderton, Pa.; William Kinna, with the Elgin Watch Co.; Charles Banks, Wilmington, Del.; Charles Eskridge, Shelby, N. C.; S. W. Wright, Phillipsburg, Pa.; L. L. Bickings, Norristown, Pa.; A. M.

Kendall, Millville, N. J., and John C. Pherson, Mauch Chunk, Pa.

William McMillian, son of James Millian, of M. Sickles & Sons, has appointed inspector of fuses in the Ford Arsenal. Mr. McMillian is one of the youngest men ever appointed to such a position by the United States government. Mary Slavin, with M. Sickles & Sons, has been spending her vacation at Wood, has been awarded a handsome prize by the Ocean Pier because of her charming grace as a dancer.

Arthur Garis, Abington, was struck and injured internally, Wednesday, by a car owned by Edward S. Radley, a jeweler residing in Melrose Park. According to the police, John Radley, a son of the driver, was driving the car, and in it his two sisters and a party of friends were returning from Willow Grove. Witnesses declared that the auto was going at a high rate of speed when Garis was knocked down. The accident happened in front of the Abington Police Station. The driver was requested to go there, while Garis was removed to his home and Dr. Byron P. was summoned. The police assert that the license of the car was issued to Edward Radley and that John Radley while acting as chauffeur was violating the law. The police assert also that Radley violated other law by not stopping his machine when the trolley car stopped. Garis is married and has one child.

A clever trap prepared by the police resulted, Thursday night, in the arrest of James I. Dougherty, 22 years old, of Watkins St., after an exciting chase of several blocks. Policeman McWilliams caught the fleeing man at 9th and Chestnut Sts. and locked him up in the 15th Locust Sts. Station, where he will be given a hearing on the charge of larceny. Dougherty is charged with having taken Thomas Jennings, 14 years old, of 132 13th St., a delivery boy employed by Blisard & Co., jewelers' supplies, 727 Sansom St., a package containing jewelry a week ago, it is alleged, the prisoner approached the boy and told him to let him know when next he would carry a valuable package and that he would take charge of it and sell it, and with the money Dougherty and the boy would go west. The boy informed his employers and they in turn informed the police, who advised them to make up a decoy package. This was done and Dougherty's arrest followed.

Included in the large exhibit of clocks at the salesrooms of Bawo & Dotter, Barclay St., New York, are a number of hall clocks, known as the "Mouset" clocks. These are of German construction with heavy brass plates and wheels of steel cut pinions. Among them is one which has a sun dial, three weights and tubular bells. A second combination is also a Westminster chime, but the bells are rodgongs instead of tubes. A feature of this clock is that at the hour four hammers strike simultaneously on four gongs which produce a sound which closely resembles the distant resonance of a tower bell. The display also includes a fine line of mantel clocks.

Liability of Express Companies for Loss in Transit.

THE JEWELERS' CIRCULAR-WEEKLY is constantly in receipt of inquiries from subscribers in all parts of the country, asking as to the liability of express companies on packages lost or stolen in transit where no value has been placed upon the same by the shipper...

A most important case in the jewelry trade involving this point was the suit of the Berry & Whitmore Co., Washington, D. C., against the Adams Express Co., which was decided in the Supreme Court of the District of Columbia a short time ago. In this case the jewelry house brought an action to recover the value of a pearl and diamond brooch which it had shipped to Port Huron, Mich., but which was never delivered or accounted for...

There was some question as to whether the evidence tended to show an embezzlement of the package on the part of one of the employees, but there was nothing else to indicate what had become of the lost article. In brief, Justice Stafford, in overruling the motion for a new trial, held that the \$50 limit of liability, stated in the receipt of the company, was inapplicable where the goods in the course of transportation were embezzled by an agent of the carrier...

a reasonable time a prima facie case of liability for their value had been made out; and where the defendant claimed exemption from such liability it was incumbent upon the defendant to show that the loss occurred in the way specifically mentioned in the limiting clause of the receipt and not from some other cause which would make it liable for the full value of the goods. In the absence of any evidence showing what had become of the goods the provision limiting the carrier's liability was inapplicable and that no such showing was made by the testimony of an agent of the defendant that an attempt had been made to trace the goods and they had been traced into the hands of one of its agents and no farther.

In other words, the court holds that a prima facie case of common law liability of the carrier is made out when the goods are shown to have passed into its hands and have not been delivered within a reasonable time, and that if the carrier claims exemption down to \$50 by reason of the receipt stating it shall not be liable for negligence, it is the carrier's duty to show affirmatively that the failure to deliver was due to want of care or negligence and not to some other cause for which it would be liable for the real value.

This decision will be important to shippers generally, because if it is taken as a precedent the carrier can no longer defend simply on the ground that the value of the article is fixed by agreement, but must affirmatively show that the loss occurred in the way the agreement mentions it should not be liable. If it cannot do this, the exemption cannot hold. Probably one of the first results of this decision will be the changing of the wording of the company's receipts to exempt the carrier from liability in cases of embezzlement, though we think that such a clause in the contract would be considered as against public policy.

Rewards and Those Who Claim Them.

THE controversy which has arisen over the reward offered by a New York jewelry house for the return of a package of jewelry lost by one of its customers serves to call attention to the fact that in nearly every case where a reward has been offered for the return of lost or stolen jewelry the number of claimants for the same is large and the trouble of adjusting these claims has never been small. Not only do all civilians and officials who have in any way come in contact with the lost property magnify their claims to the reward, but in many instances they are willing to go to the extent of bringing legal proceedings to enforce what they think are their rights. In the instance above mentioned the jewelry was saved from attachment by claimants for the reward only by the quickness

of the police captain who, hearing s process was to issue, returned the arti to the jeweler before he could be ser with the papers.

Among the claimants for these rew are very often the police officials who l been called upon to assist in the return the property after it has been located, often their claim is founded upon no recovery by themselves, but simply bec they have been the instruments thro which the return has been made. In c where the recovery of property res from no skill or exertion on the part a police official, but purely from doing duty when the matter has been offic called to his attention by somebody the question of giving such officials par all of the reward offered should not p erly be considered. We are sorry to i however, that the police officers are g given part of the reward offered by owner, and this part taken from the pa who are justly entitled to it, simply cause the officers have done their duty nothing more. Speaking of this atti of the police as to claiming a reward, *New York Times*, last week, said editor:

We have always been of the opinion th less policemen have to do with rewards for return of lost or stolen property the better they get accustomed to taking these addition their regular pay, the natural tendency will b them to await the offering of a reward b taking any very vigorous action. This fa everywhere recognized in the regulations f forbid the policeman to take a reward exce special permission from his superiors, an would be well to make the prohibition abs. Indeed, there is an element of moral obqui every offer of a reward for the return of l stolen property unless great care be taken to the offer from any suspicion of involving a w ness to compound a felony. This can be and often is, but only too frequently the los property thinks only of getting it back, and is the social injury he may cause in the process.

We think that our daily contemporary stated the question very fairly, and these words should be heeded by all have to consider the question of payi reward for the recovery of lost and s property.

New York Notes.

George W. Korper, 2 Maiden Lane, has returned from the fresh-water pearl fishery with a quantity of pearls.

Louis Stern, of Stern, Dreiblatt & Co., 45 John St., sailed for Europe yesterday on the *Kaiser Wilhelm der Grosse*.

M. Brennecke, Nashville, Tenn., was an out-of-town visitor at the offices of THE JEWELERS' CIRCULAR-WEEKLY, last week.

Thomas L. Power, of Power & Allan, Inc., 7 Broadway, returned from Europe last week on the *Zoeland*, after a visit to the London markets.

Henry H. Jacobson, of Jacobson Bros., 5 Nassau St., returned, yesterday, on the *Prinz Wilhelm* from the European diamond markets after a three months' stay.

Samuel E. Judels, of Henri E. & Jos. E. Judels, 37 Maiden Lane, returned, last week, from a business trip to Providence, R. I., and Boston, Mass. Jac. Judels left yesterday, on his regular western trip.

C. Napoleon sailed Wednesday of this week for Europe on the *Mauretania*, where he will remain until about the holidays.

Mr. Napoleon was formerly in business at Monroe, La., but has been staying in New York for late.

Edgar Simonson, who for nearly 10 years has ably represented the firm of Ludwig Nissen & Co. on the road, has lately been elected a director of the corporation. The full board of directors now consists of Messrs. Ludwig Nissen, Emil Knopf, W. Ruefer, Frank L. Wood and J. Edgar Simonson.

Joseph Polak, who now represents A. S. Wezel, Antwerp and Amsterdam, in this city, announces that Mr. Van Wezel's diamond-cutting factory in this city will be moved to 120 Walker St., corner Canal St., about Sept. 15, where 50 men will be employed. The location is an excellent one for a diamond-cutting shop.

A protest signed by L. Alavoire & Co., in this city, against classification of marble with bronze mounts and marble columns with bronze ornaments has been decided in favor of the Government. It is decided that the articles are dutiable as manufactures of metal at 45 per cent., and not as claimed by importers at 20 per cent. duty.

The Jewelers Board of Trade has announced that B. Braunstein, Hoboken, N. J., through his attorneys, has made a 40 per cent. composition offer to creditors, payable 10 per cent. in cash, 10 per cent. in three months, 10 per cent. in six months and 10 per cent. in nine months, the deferred payments to be represented by interesting notes, and are to be indorsed by Nathan Braunstein, brother of the bankrupt. On the arrival of the Hamburg-American liner *Graf Waldersee*, Thursday, from Hamburg one of the first-class passengers was detained by the customs officials for attempting to smuggle in \$150 worth of jewelry which he had not declared. The man was taken to the Customs House and examined by Deputy Surveyor Smythe, for whom he wept and begged to be released. The official had pity on him and ordered him to go west. The articles were seized and forfeited by the customs officers.

The Merchants and Manufacturers' Exchange have completed plans for the erection of two fine commercial buildings covering the entire blocks from 46th to 48th St. and Lexington Ave. to Dcpey Pl., which will be used for sample and selling rooms. These will be so arranged as to enable visiting buyers to inspect products of hundreds of factories in a minimum of time with much comfort and convenience. The buildings will also contain a well-appointed club, including reading and writing rooms and a roof garden restaurant.

United States Marshal Henkel sold at public auction, Friday morning, in the Federal building, a collection of cheap jewelry, the appraised value of which was \$576.70, for \$140, to B. Kupfelberg, 23 Walker St. The bids started at \$100 and advanced slowly to the selling mark. Included in the collection of jewelry was 132 finger rings, 20 chains, eight brooches, 35 pairs of earrings, two brooches in cases, six necklaces, five long chains and 16 pocket knives. The goods were taken from the person of Riamotto Moscatello, and were declared forfeited to the United States for the violation of customs laws.

Barnett Bordin, who 15 years ago was a dealer in diamonds, jewelry and silverware near Broome St., on the Bowery, was taken a prisoner in the Essex County Court, one day last week, where he was recognized by court officials. According to one of the oldest inhabitants along the Bowery Mr. Bordin suffered a loss from robbery years ago and from that time carried his property with him, in the belief that it was safe in no other way. When arrested, he had on his person several articles of a cheap character. He was arrested because by his strange appearance he was attracting a crowd. It is thought that his loss of 15 years ago affected him mentally.

Police Captain James F. Larkin, of Jersey City, has turned over to Dreicer & Co., 560 Fifth Ave., the jewels that were found by an Italian on an Erie ferry boat, and which were subsequently taken in charge by the Jersey City police. Capt. Larkin says he gave up the jewels because he heard that an attachment had been sworn out by claimants for the reward. If this had been served in time there would have been a long delay before the owner of the jewels could have obtained possession. Several claimants have arisen for the reward of \$5,000 which was offered for the return of the jewelry, but it is not known to whom the reward will be given.

The American Exhibition Co., 79 Broad St., has perfected arrangements for opening a permanent sample exhibition at Berlin in the Spring of 1910. This exhibition is designed primarily as an exhibit of distinctively American products, and the management is especially desirous that American manufacturers of novelties shall take part. The intention is to make apparent to the people of Europe, and especially Germany and the continent, the importance and excellence of American manufactures, and to this end the German Committee will advertise the exposition throughout the continent and will co-operate with American manufacturers and exporters in every way to popularize and exploit American products.

Fancy earthenware money boxes are dutiable property at the rate of 60 per cent., according to a decision made, last week, by the Board of United States General Appraisers. The case before the customs tribunal was that of Lazarus, Rosenfeld & Lehmann. When the boxes reached this port the customs authorities decided that they fell within the provision for "decorated earthenware," duty being accordingly imposed at the rate of 60 per cent. The importers set up the contention that the merchandise should be allowed to enter as "toys," with a customs tax of only 35 per cent. This contention, however, General Appraiser Hay, who writes the decision for the board, holds to be without merit.

Miss Katherine McKee, Harrisburg, Pa., a second cabin passenger on the White Star liner *Oceanic*, was stopped, Wednesday of last week, as she was leaving the steamer and jewelry was found on her person valued at between \$600 and \$1,000. The woman made out her declaration on ship-board, in which she stated that her purchases abroad amounted to less than the \$100 allowed by law. The woman inspector who searched her found several diamond rings and earrings upon her person. When arraigned before United States Commissioner Shields in the Federal Court she waived examination. Miss McKee said that the jewelry that was found upon her was her own property and that she could prove that the rings and earrings were in her possession when she sailed for Europe.

Acting Secretary Reynolds, of the Treasury Department, has issued regulations to govern the admission, free of duty, to ports of the United States, of works of art under the new tariff law. Paragraph 717, which provides for the admission of art works more than 100 years old, is held to apply to all works of art within the liberal meaning of that term, including articles intended or suitable for purposes of utility, such as ornamental clocks, tapestries, chandeliers, church altars, etc., in the nature of household furniture or fixtures, provided the same be of sufficient artistic merit to constitute works of art within the commonly accepted meaning of that term. The regulations governing the admission of works of art more than 20 years old are practically the same as relate to the identification of art more than 100 years old, except that the provision admitting articles more than 20 years old is held to apply only to works of art within the stricter meaning of that term and does not include objects intended or suitable for purposes of utility.

The local organization of the Wholesale Jewelers' Association met, Friday afternoon, at the rooms of the 24-Karat Club, 15 Maiden Lane, to discuss questions of interest to the association. The meeting was called to order with President Averbeck in the chair. The secretary read the report of the last meetings, together with several communications. The meeting then took up the discussion of matters which demanded attention, among others the question of whether goods should be shown by the manufacturer to the retailer on the jobber's order and sold at such prices that the retailer

net a good profit and at the same time the wholesaler make his profit. Letters to several manufacturers expressed a desire to co-operate with the wholesalers' association, looking to the best interest of the trade, while some manufacturers took ground that they would not deal with a retailer at all. A discussion of what policy of the jobbers' association should be on the question then followed, but no definite action was taken.

John J. Anderson returned, last week, from a six months' trip through the western states.

Walter Ballou, head of R. Blackinton & Co., North Attleboro, was a visitor in this city last week.

W. L. Barrows, of the Bay State Optical Co., Attleboro, Mass., was at the local market last week.

A. Spiro has just started in business as a watchmaker and jeweler at 62 Bond St., New York, N. Y.

Henry Castleberg, a well-known Baltimore, Md., jeweler, is a guest of Morris in this city.

The International Silver Co. has declared a dividend of 1 1/4 per cent. on its preferred stock payable Oct. 1.

Edward Sickles, of M. Sickles & Sons, Philadelphia, was a local visitor for a few days, last week.

Vone & Wrono have returned to their headquarters at 42d St., near Fifth Ave., where they have been undergoing changes.

Walter Howard, of the W. E. Richards Co., North Attleboro, is in Maiden Lane for a few days, showing the firm's line of goods.

W. B. Rosenback, of Wm. I. Rosenfeld, North Maiden Lane, left for European diamond markets, yesterday, on the *Kaiser Wilhelm II.*

Julius E. Levi, 1 Maiden Lane, representing Emanuel Neuhäuser, Idar, Germany, paid a business trip to Boston and Providence, last week.

John Bolland, president of the John Bolland Jewelry Co., St. Louis, Mo., is spending a vacation in this city and at Atlantic City, N. J.

The list of subscriptions received, last week, by the treasurer of the Hudson-Fulton Exposition Commission appears the name of Tiffany & Co., for \$1,000.

Wm. S. B. Oskamp, of the Oskamp Jewelry Co., Cincinnati, O., returned from Europe, last week, and stopped for a short time in this city on his way home.

New York jewelry salesmen will be interested to learn that Paul Stanley, buyer for Stanley Bros., Toronto, was married, last week, to a Toronto young lady.

Max Oppenheimer, who was recently a salesman in the employ of R. L. Moorhead Co., 13 Maiden Lane, but who is now an importer of jewelry novelties, is spending time in Europe, purchasing merchandise.

Wm. A. Jochum, representing C. Corbion, returned, yesterday, from a vacation spent at Waterford, Conn., on the Housatonic river. While sojourning there he had a very pleasant visit from H. F. Mather and wife, of the jewelry firm of Mather & Macomber, New London, Conn.

The party took an automobile tour through Connecticut in Mr. Macomber's automobile. Mr. Jochum reports several successful fishing trips.

Adolph Kohl, of Jersey City, who was arrested, some time ago, on a charge of having appropriated a considerable amount of jewelry and diamonds belonging to Nebeling & Silverberg, 49 Maiden Lane, to his own use, and who since that time has been awaiting extradition, was brought to this city, last week.

The Jewelers Board of Trade has sent out to creditors of D. A. Walter, New Orleans, La., 30 per cent. in cash and 10 per cent. in notes, making a total of 40 per cent. net on its old extension indebtedness. The Board has also mailed a first and final dividend of 21 per cent. to the creditors of the Sherwood-Bartlett Jewelry Co., Montgomery, Ala.

The trustees of the Continental Commission Co., H. A. Groen, L. I. Herzfelter and I. S. Meyer, announce that the complete stock, fixtures and outstanding accounts of the defunct concern will be exhibited Thursday, Sept. 2, at the office of Meyer Bros., 59 Nassau St., and sealed bids on these will be received by the trustees, who reserve the right to reject any and all bids.

Mrs. Abigail Shanley, the widow of Bernard Shanley, formerly a jeweler in this city, who, together with her daughter Alice, lived with her son, Francis G. Shanley, at 569 W. 173d St., fell between a moving Broadway subway train and the platform at the 168th St. station, last Wednesday night, and received injuries from which she died an hour later in the Washington Heights Hospital. Her daughter Alice was thrown forward to the platform and sustained a lacerated scalp and other injuries. The accident occurred as they were about to leave the train.

Special Customs Inspector Timothy Donahue, when the American Line steamship *Philadelphia* arrived at her pier at the foot of Fulton St., North River, Saturday afternoon, halted two men and took them back on board the steamer. The men were suspected of being middlemen in some petty smuggling. They had declared \$1,100 worth of diamonds, but when Donahue searched them in their cabin he says he found two gold watches valued at \$100 each, four silver mesh purses, and a gold purse. These valuables were seized, but the men, after being taken to the Customs House, were released.

Jas. B. Reynolds, acting secretary of the Treasury Department, has completed arrangements for the largest convention of appraising officers ever gathered together since the inauguration of the annual conferences in President Cleveland's first term. The object of the conferences has been to achieve uniformity in the appraisement of imported merchandise at the different ports. This year's conference will begin Nov. 8 and will last a week, and it is expected that it will be of special importance owing to the fact that a new tariff has just been enacted. Appraisers from all the smaller, as well as the larger, ports will be in attendance at the conference.

A meeting of the creditors of Max Pesky, 840 Eighth Ave., was held, last Friday, at the office of his attorney, Sigmund Fein-

blatt, 132 Nassau St. The debtor himself was not present at the meeting, being unable to leave his business. His attorney stated that on Aug. 17 a man entered Pesky's store and left a diamond ring to be reset. About two hours thereafter another man came into the store and asked to be shown some diamond settings. The ring which had been left to be reset was in the showcase and he requested to see this, and Pesky took it out of the case and handed it over to the man. Just how it happened was not made perfectly clear, but Pesky says that the fellow skipped out of the store with the ring and later Pesky had him arrested for theft. The prisoner was released because the ring was not found on his person and Pesky had no witness of the happening. Pesky is now being sued by the owner of the ring, James Culver, for \$340 for conversion of property, and if Culver wins his case Pesky fears that it will embarrass him. The jeweler's assets were estimated at about \$1,000 and his liabilities at \$1,300. The debtor's attorney was reasonably certain that if an extension was granted Pesky could pay in full.

Saturday afternoon an outing and baseball game arranged by the L. E. Waterman Co., 173 Broadway, was held at Eastern League Park, Jersey City, N. J., and proved a most enjoyable event from beginning to end. The baseball game between "The Pen Makers," Seymour, Conn., and "The Pen Sellers" of the New York headquarters was one of the best amateur contests played at the park in years. The game was one of a series for a championship cup offered by President Waterman. The game began at a little after 2 P. M., at which time about 500 employes and friends were present to cheer the two teams. The factory team secured one run in the first inning, while the city boys failed to score. In the second inning, however, the city team was more fortunate and secured two runs. In the third inning the factory team counted twice and the city team once, tying the score. In the fourth inning the city team forged ahead by making two runs, and it looked as if it would win the game, as during the next three innings neither side succeeded in scoring. In the eighth inning, however, the factory team, by timely hitting and poor work on the part of their opponents, scored four runs, while the city team was retired without scoring, after the bases had been filled. In the last inning the factory team tallied twice and the city team once, making a total score of nine to six in favor of the factory team. During the game the men were provided with cigars and the ladies with ice cream, peanuts, etc. Directly after the baseball game newsboys appeared on the stands selling baseball extras containing an account of the game. The account was printed on extra slips and pasted into the front page of the paper. It was a humorous report and the final score was missing. Mr. Seymour, the company's "publicity man," was behind the scheme. Directly after the ball game a series of running races were held which proved to be very interesting. The two baseball teams, together with others to the number of 50, then went to the Jersey City Club, where an informal dinner was served, thus bringing to a close a most enjoyable day's outing.

Baird Building
KANSAS CITY, MISSOURI

Newark.

TRADE CONDITIONS.

Business conditions in Newark show a marked improvement. Five-sixths of the concerns visited recently by a representative of THE JEWELERS' CIRCULAR—WEEKLY report a good increase over that of August last year.

Charles Whitely has moved back to the new building, Oliver St.

Samuel Newbarth, a jeweler, 88 Broome St. and Miss Rose Bernstein, of Brooklyn, will be married on Sunday, Sept. 5, in Manhattan.

Theodore C. Woodland, of the Jones & Woodland Co., is enjoying a vacation after illness. Mr. Jones, of this firm, is sojourning in Massachusetts.

Mathias Stratton and Curtis R. Burnett are among those who attended the hearing on the application of Newark for water rights in the Wanaque river before the New Jersey Water Supply Commission.

Sam S. Rubin, horologist, and Fred Menstine, jeweler, have resigned their positions with Cook & Jaques, Trenton, N. J. and will go in business together as manufacturing jewelers, watch and clock repairs.

Defective poles have caused a delay in the establishment of N. Broad St.'s "Great New Way," in which all the retail jewelers along the line are interested. The movement will probably be finished by the middle of November.

W. Granbery, the Newark jewelry manufacturer, won the power-boat race around Staten Island, last week, with his boat "II." The race was run under the auspices of the Brooklyn Yacht Club and was a distance of 33 miles. The trip was made by the boat in 3 hours 10 minutes and 15 seconds.

The Whitehead & Hoag Co., which has recently gone into medal manufacturing, has the contract to supply bronze and silver medals for the Hudson-Fulton celebration. More than 80,000 of these medals must be completed within a short time, and orders are being rushed. The William F. Renziehausen Co. is supplying the silver for these medals.

After being driven from the First Precinct Police Station twice, Friday night, Mack Roach finally succeeded in getting behind the bars for an extended period by forcing his hand through the plate glass window in the factory of Riker Bros., manufacturing jewelers, 42 Court St. He admitted that he was being pursued by a gang of men and wanted to be locked up for safe keeping.

Inter & Sons are running full time in their new factory. The Shiman-Miller Co. gave out a similar report. The William F. Renziehausen Co., refiners, has announced to believe that business has improved throughout the country as well as in Newark. The Jones & Woodland Co., and many other big manufacturers see a big Fall business ahead, and Newark refiners of gold and platinum are likewise busy.

The arrest of James Connor, alias James Mahon, alias James Tyler, will probably remove some of the retailers from trouble. Connor, a silver thief, was arrested in Philadelphia about 10 days ago and identified

by an Elizabeth official, who had seen him in the Union County Jail. In referring to the robbery which caused his arrest, Connor said: "I just naturally picked the stuff up, and I would have sold it to some jeweler if the cops hadn't grabbed me."

An appeal for extradition papers was made to the New Jersey authorities by counsel for Nebeling & Silverberg, a diamond firm, 49 Maiden Lane, New York, who want Adolph Kohl held on a charge of grand larceny in the first degree. Kohl was given about \$1,100 worth of diamonds to sell and is alleged to have pawned them. His counsel declared he did this with a view of tiding himself over a financial strain and would have disposed of the gems for the firm. Kohl, when arrested, refused to return to New York. The extradition papers were allowed.

There are several claimants for the \$5,000 reward offered by Richard Mortimer, the banker who, on June 29, left \$75,000 worth of gems on an Erie ferryboat. The package was picked up by an Italian named Paola Cantanella, of Jersey City, who for several hours was not aware of the value of the precious package. It was found by Police Captain Larkin and two of his men. G. B. Davidson, a Jersey City jeweler, who notified the police, on being asked to set a value on them; Benjamin Treacy, a lawyer; the original finder, and the police officers are all after the reward. Larkins took the jewels to New York in time to escape a writ of attachment procured by Paul Lori, another Italian, who claimed to have given the police the information that led to the recovery of the jewels. The writ was secured with a view of preventing Larkins from taking the valuables to New York.

Boston.

S. H. Ashe, of the Roy Watch Case Co., has been in this city the past week.

Walter B. Snow has returned from Bear Island, Lake Winnepesaukee, N. H.

F. H. Smith, of Kettell & Blake, is in New Hampshire for his annual outing.

H. L. Houghton, who has been at Ocean Grove on business, has returned to this city.

Henry Arnold, of D. C. Pereival & Co., is enjoying an outing on the coast of Maine.

Irving Smith, of the Crescent Watch Case Co., has been here on business within the past week.

E. W. Langford, with E. M. Wilder, has been at Island Pond, Plymouth, where he has had splendid success at bird shooting.

Among the jewelers in town last week were: S. H. Sinclair, Concord, N. H.; S. D. Grossman, H. S. Hewett, Loring Smith, of the U. C. Smith Co., Brockton; W. L. Pierce, Stoughton; W. W. Cook, Natick; Arthur E. Pero, Worcester, Alden Webb, Beverly, and L. W. Weston, South Framingham.

The E. Howard Clock Co. has completed a special clock for the Essex troop Armory at Roseville, N. J., a four-dial illuminated striking clock for the Iron County Court House of Crystal Falls, Mich.; a special tower clock for the Sauquoit Silk Mills, Philadelphia, Pa., and tower clocks for the City Hall at Flint, Mich., and the City Hall at Port Washington, Wis.

News Gleanings.

Geo. Verbocke, Kaukama, Wis., was recently married at Green Bay to Miss Katherin Jadule.

J. M. Rockwell, Troy, N. Y., has given a chattel mortgage on his fixtures and a bill of sale on his stock.

A number of valuable pearls were found, recently, in clam shells taken from the Big Sioux river, at a point near Flandreau, S. Dak.

Considerable damage was recently done to the retail jewelry store of E. V. Merritt, Walton, N. Y., by fire. The loss is fully covered by insurance.

Burglars recently stole jewelry valued at \$250 by breaking the show window in the store of E. A. Wood, Shamokin, Pa. They escaped on a passing freight train.

B. B. Law, until recently an employe of the Denver Watch Case Co., died, recently, as a result of having been accidentally shot while out hunting with a companion.

During home-coming week Alvin Frank, 115 E. 3d St., Winona, Minn., will have on exhibition in his store a model city, on which he has been working for over a year.

Jewelry valued at about \$50 was stolen, recently, from a show window in the store of J. C. Schultz, Detroit, Mich. A ring which was dropped by the thieves was found on the street.

Adolph Ulmer, Yonkers, N. Y., has purchased the business of L. Kroglund, in the Kaufman building, Main St., Hastings, N. Y. Mr. Ulmer, before his purchase, was engaged as manager for Chas. F. May, in Yonkers. Mr. Kroglund has gone to Norway.

J. R. Sprague has purchased the interest of Mr. Roempke in the firm of Sartor & Roempke, San Antonio, Tex. Mr. Sprague was for four years president of the Merchants' Association of Newport News, and besides his large business in Newport News he also conducted a branch store in Norfolk, Va.

John Daniels, a jeweler of Denver, Colo., has been accused by Frank Dana of failing to produce upon demand a ring which Dana asserts he pledged with Daniels for a loan of \$5. A warrant has sworn out for Daniels' arrest by Dana. The former claimed that Dana sold the ring for the amount mentioned.

A dividend of 10 shillings per share less the income tax is now being paid on the preferred shares of the De Beers Consolidated Mines, Ltd. The dividend, which was declared June 30, is payable to-day, Sept. 1, at the London office, 15 St. Swithin's Lane, London, E. C., where the coupons must be left four days with the London secretaries, J. Bruce and J. H. Bovenizer.

When the safe owned by Hendrickson & Hald, Lincoln, Nebr., was sold, after the filing of a petition in bankruptcy, it was bought by an attorney named Snavely for \$101. No one appeared to know what was in the safe, and there were few bidders for it. When it was opened, however, several hundred dollars' worth of jewelry was found. The attorney has been prevented by a temporary injunction granted by Judge Cornish from selling the jewelry or molesting the safe. The injunction was asked for by the concern.

COME

TO CHICAGO

STOCK ORDERS SPECIAL WORK REPAIRS

WE WANT YOUR BUSINESS

**AN IMPORTANT DEPARTMENT OF YOUR BUSINESS IS
STOCK ORDERS, SPECIAL WORK, ALTERATIONS and REPAIRS**

***Selecting Your Market for this Work is Therefore
of Great Importance***

You cannot make a mistake when you send your **stock orders, special work and repairs** to **Chicago**, as there are over 30 manufacturing jewelers with better and more completely equipped factories than are the factories of other manufacturing jewelers in any city in the world.

In this market you will find a larger stock of specially manufactured mountings for immediate delivery than in any other market, and as choice a selection of precious and semi-precious stones as is to be found anywhere.

Not only are the Chicago manufacturers prepared to give you the best selection, style and workmanship at reasonable prices, but they offer you prompt service. **The thousands of miles of railroads terminating in Chicago make all territory "Chicago territory"** and give it the greatest shipping facilities of any city in the world.

On the opposite page you will find the names of the manufacturing jewelers of **Chicago**. Each contributes his share towards making Chicago the greatest manufacturing center in the United States. The jeweler who has been sending his orders here needs no further invitation—he will continue to do so, but to the jeweler who has not, to him the **Chicago manufacturers** extend an invitation to use this market, guaranteeing the best workmanship, selection, style and service.

The interment took place on Aug. 29 at Oakwoods Cemetery.

The Chicago office of the Omega Watch Co., A. Max Holzheimer representative, has removed from room 502 to room 703 Heyworth building, where the company has much larger quarters than before to accommodate their increasing business.

C. R. Maxwell, formerly watchmaker for Fritz Hoefler, Aurora, Nebr., has bought out the stock and fixtures of the bankrupt estate of Frederick Runkel, Oshkosh, Wis., and will carry on a retail jewelry business there. Mr. Maxwell was in Chicago, last week, buying stock for his opening.

Nathan Roff, retail jeweler at 910 W. 59th St., has filed a voluntary petition in bankruptcy, with liabilities of \$2,379.44, and practically no assets. He was formerly on Ashland Ave., where he was robbed and had a fire. He recently tried to settle at 15 cents on the dollar without success.

About 15 members of the wholesale jewelry trade received letters, last week, the contents of each being identical. Each letter asked the dealer to send a perfect blue white diamond weighing one carat or over to E. D. Eiger, Cashton, Wis., and said that if the price was satisfactory a check would be sent in payment.

There seems to be an impression among a few houses in the trade here that the agreement to close on Saturday afternoons at 1 o'clock terminated on Saturday, Aug. 28. This supposition is incorrect. Saturday, Sept. 18, is the last day for the early closing, according to previous arrangements, and many houses would like to continue closing up to and including Sept. 25.

Clarinda A. Keeler, wife of Col. William B. Keeler, of Chas. F. Graves & Co., died, Sunday, Aug. 22, and was buried from her late residence, 6200 Kimbark Ave., on Tuesday, Aug. 24. The interment was at Oakland Cemetery. Mrs. Keeler, who was 81 years old at the time of her death, had been suffering from paralysis for some time. His friends in the trade extend to Col. Keeler their sincerest sympathy in his bereavement.

While Ed Jensen, retail jeweler at 6105 Halsted St., was in the rear part of his store, Tuesday afternoon, Aug. 24, a stranger walked in and opening one of the show cases stole six gold-filled watch cases valued altogether at \$150. Mr. Jensen had closed his store door and set the door alarm when he went to the rear, but the alarm failed to signal when the door opened and he did not hear the stranger when he entered.

The show window in the jewelry store of W. E. Hunter, 463 E. 17th St., was smashed at 4 A.M. last Thursday morning and a tray of diamond rings valued at \$300 stolen, in addition to a complicated watch 100 years old enclosed in a gold case, valued at \$175. Mr. Hunter was away at the time, but his sister, who was asleep in the rear of the store, arose when she heard the noise of breaking glass, and seizing a revolver fired three shots at the burglar, none of which took effect. The burglar escaped.

Among the jewelers here, last week, were: J. E. Geiwitz, La Crosse, Wis.; C. E. Tarr, Greenfield, Mo.; Geo. Olin, Janesville, Wis.; J. H. Randall, Monticello, Ind.; Oscar J. Ludwig, Waterloo, Ia.; J. Ramser,

Rock Island, Ill.; H. B. Larson, Manistee, Mich.; M. F. Goldberg, Marquette, Mich.; H. K. Fites, Winamac, Ind.; Theo. Sims, Hastings, Nebr.; Frank Thayer, Rockford, Ill.; J. A. Weaver, Havana, Ill.; A. J. Lauch, Kankakee, Ill.; H. Linnig, Peru, Ill.; A. E. Gordon, Shreveport, La.; Herman Lange, Cincinnati, O.

Cincinnati.

Wm. Owen has gone to Kentucky on a short business trip.

Joseph Mehmert has returned from a very successful business trip.

Gilbert Wallenstein, of Wallenstein, Mayer & Co., is fishing in Michigan.

Mr. Phillips and Mr. Chaffee, of Richter & Phillips, have returned from their regular trips.

Fred. G. Gruen, of D. Gruen, Sons & Co., and his wife, are spending a few weeks at Petosky, Mich.

Wm. Pflueger, of Joseph Noterman & Co., who returned the last of the week, goes south in a day or two.

Hugo A. Lindenberg, of Lindenberg & Fox, is to be married to Miss Blanche Bernheim the latter part of September.

Referee Greve, who has been taking the evidence in the Duhme and Keck cases, expects to make his final report by this week.

Pollmeyer & Roth state they are working full time with a full force of men, business being better than for several years past.

Harry Bohmer, with Frohman & Co., accompanied by his wife and child, is in the north on a business and pleasure trip; B. S. Newman, of the same firm, started this week on his regular Fall trip.

G. Schultz, with T. Hausmann & Sons, New Orleans, has been spending his vacation with relatives in Louisville, Ky., and spent the past week in Cincinnati, calling on all his old acquaintances.

"Jake" Frohman, of Frohman & Co., returned this week, from Whitmore Lake, Mich., Niagara Falls and Toronto (Can.) after spending a delightful two weeks with the excursion party from Bartlett's School.

The Merchants' building at 6th and College Sts., is nearing completion. D. Jacobs & Co. are to occupy the second floor, and the E. & J. Swigart Co. the third floor; both expect to move in early in this month.

Miss Anna Herschede, cashier of the Frank Herschede Co., is away on her vacation. C. Bennett, of the same firm, is touring the lakes, while C. W. Lucius and Ed. Herschede are camping on the banks of White Water River.

Anthony Herschede, the Main St. jeweler, who at one time ran the waterworks department under Mayor Dempsey, is again active in politics, coming out openly for Alfred Cohen, saying he will support him to the best of his ability.

Among the out-of-town jewelers in the city the past week were: Chas. Sieglitz, Vevay, Ind.; M. A. Selbert, Frankfort, Ky.; Philip Boerstler, Batesville, Ind.; Edward Mueller, Hamilton, O.; A. Boiarsky, Charleston, W. Va.; J. W. Tufts, Loveland, O.; Wm. M. Waters, Danville, Ky.; Owen Sherwood, Falmouth, Ky.; J. C. Meyer, Harrison, O.; Frank Emmerling, Hills-

boro, O.; J. W. Sparks, Sabina, O.; I. Fuller, Ashland, Ky.; Joseph H. Sor mann, Memphis, Tenn.; C. Keller, Frankfort, Ky., and I. N. Pollock, Ashland, O.

The Executive Board of the Metal Finishers, Platers and Silver Workers' International Union, met Aug. 23 at the headquarters of the organization, in the New building, and were in conference for the rest of the week. The greatest part of the business to come before the meeting in the nature of legislative action in interest and benefit of local bodies throughout the United States and Canada. A particularly restrictive policy was adopted for government of local organizations, in order to eliminate unnecessary strikes and controversy with employers, and to compel unions to give a closer compliance to the letter and spirit of laws of the international union.

Pacific Northwest.

The new Sunnyside M. E. Church at Portland, Ore., will have a large spire on the tower.

The store of Mr. Jacoby, Orville, Ore., is being remodeled in anticipation of heavy Winter trade, and an entirely new front is being erected.

Part of the property of L. J. Lyons, formerly a retailer engaged in business at Suisun, Cal., has been sold to satisfy judgment against him.

Chas. H. Williams, Condon, Ore., returned home from the jewelers' convention at Omaha, Nebr. While away he made his selections of Fall and holiday goods.

A. J. Schneider will shortly open a store at Arlington, Cal., in the Burr wells building. A store is now being fitted up, and intended to have the place stocked by Sept. 1.

"Brownie" Siegbold, son of Mr. and Mrs. C. Siegbold, of Salinas, Cal., is assisting his father in the store there preparatory to coming to San Francisco to begin an apprenticeship.

Donald Ross has located at 1610 Second Ave., Seattle, in a store which he has named La Blanche. He will carry here a line of gems, both natural and "reconstructed." Nothing but stones and individual mountings will be carried. An experienced Chinese goldsmith has been secured to tend to the latter end of the business, his work is creating considerable interest. Designs are worked out from ideas suggested by the customer, and only a few ready-made mountings are carried.

Lyman Henderson, who is heavily invested in the Stanley Turquoise Mining of Warwick, San Bernardino County, was here, recently, on his way to Seattle to visit the Alaska-Yukon-Pacific Exposition. From there he intends to go to Europe, will spend the balance of the year in lapidaries and jewelers in London, Paris, Munich, Florence, Geneva and Vienna, where he hopes to create a market for rubies and turquoises, such as are being mined in southern California and Arizona.

Geo. Gerner has purchased the business of the late Chas. B. Jacquemin, Cotter Bluffs, Ia.

Omaha.

Joseph Frenzer is enjoying a two weeks' fishing trip at Winters, Wis.

Sobergman has recently returned from a business trip through the State.

J. Howe, who is in business at Humboldt, Nebr., was in the city, last week.

L. Homan, with the C. B. Brown Co., spending a two weeks' vacation at Des Moines, Ia.

L. Johnson, Des Moines, Ia., has accepted a position in the watch department at Albert Edholm.

J. Kohlers, Earlring, Ia., and Bauskew, Gretna, Nebr., were in the city, last week, on business.

W. Chase, who has been located in the jewelry business in Yale, Ia., has sold and will locate in Seattle.

Watt, watchmaker with Gustafson Erickson, has left for a week's vacation at his home at Geneva, Nebr.

Erickson has returned from a fishing trip near Center City, Minn. Mr. Hendrickson also visited St. Paul and Minneapolis.

Edholm has left for Evanston, Ia., to visit his brother. Mr. Edholm expects to spend most of his time on a ranch near Evanston.

Hohman, who has been in the jewelry business at Bloomfield, Nebr., has sold out and rests and intends to go farther west to a new location.

Th. Sims and wife stopped in the city, on the day of last week, on their return from an eastern trip. Mr. Sims is a jeweler at Hastings, Nebr.

M. DeCant, with Henry Copley, has spent his vacation. Mr. DeCant intends to visit in Chicago and, on his return, will visit his parents in Shenandoah, Ia.

A. F. Kourtland, with C. A. Williams & Co., who is making a trip through the western part of the State, is expected home on Sept. 1, for the Eagles' convention. The C. B. Brown Co. furnished the five trophies which are trophies for the Nebraska Golf Association tourney, which is to be held, this week, at the Happy Hollow.

C. A. Williams is now traveling through the State in the interest of his business. Mr. Williams reports the best possible condition of trade all through the State.

E. I. Thomes, with Jos. Frenzer, and others, has been very ill for the past eight weeks. He is reported as convalescing and it is expected he will soon be back at his work.

Albert Kaas, in the employ of S. W. Lindsay, has returned from a two weeks' vacation at Denver, Colo., and vicinity. Oscar Lindsay also with S. W. Lindsay, has left for a vacation.

W. Hoefler was in the city, Tuesday of last week, on his way to Minneapolis and other lakes, where he expects to be busy with his annual visit of hay fever. Mr. Hoefler is a jeweler at Aurora, Nebr.

A. B. Regnier, who has been in the employ of Albert Edholm as head watchmaker, has accepted a position with Fritz Hoefler, Aurora, Nebr. Mr. Regnier has worked with Mr. Edholm for the past six years and, previous to his coming to

Omaha, was connected with the Jaccard Jewelry Co., Kansas City, Mo.

N. P. Frandsen, with C. A. Williams & Co., has left on his vacation trip for the A.-Y.-P. Exposition. After visiting Seattle, Mr. Frandsen expects to visit San Francisco, Reno, Nev., Lake View, Ore., and then return home by way of New Orleans.

"Diamond" Dick, who has been displaying so-called diamonds in the window of the Myers-Dillion Drug Co., has advertised as having received a letter from S. A. Fess, Kearney, secretary of the jewelers' state association, endorsing his diamonds. Upon examination, this letter is found to be of a personal character, and one in which no mention is made of the "diamonds." Mr. Fess wishes it thoroughly known that he has given no indorsement of this nature, and the officers of the State association also wish it understood that they have given Mr. Dick no such credentials.

Minneapolis and St. Paul.

E. C. Baxter, Minneapolis, is back from a vacation trip to his old home in Indiana.

Chas. Carlson, St. Paul, has started work on a handsome new brick store with plate glass front.

J. B. Hudson, of J. B. Hudson & Son, Minneapolis, has recently returned from an extended trip abroad.

C. M. Nelson, formerly watchmaker for the Fisk, Johnson Jewelry Co., Minneapolis, has taken a position with E. B. Nelson.

J. C. Marks, Sherwood, N. Dak., was in the Twin Cities, last week, on his return from an extended tour of the west, and has gone to his home in Sherwood.

D. G. Gallett, Aberdeen, S. Dak., has been in the Twin Cities inspecting fixtures and fittings to be used in connection with the store which is to be established in the new Citizens Bank and Trust building, now under construction. Mr. Gallett expects to remove to his new location in the Fall and to have one of the finest retail stores in the northwest.

Out-of-town jewelers in the Twin Cities, last week, included: Mr. Lohr, Esteline, S. Dak.; F. W. Harper, Renville, Minn.; Wm. Grinnell, Janesville, Minn.; Mr. Moody, of the Moody-Baker-Elliott Co., Ellsworth, Wis.; L. G. Johnson, Superior, Wis.; Mr. Jensen, Albert Lea, Minn.; A. G. Feinberg, Brownton, Minn.; N. P. Peterson, Russell, Minn.; J. O. Westby, Renville, Minn.

The Northwestern Association of Railway Watch Inspectors, which was organized in Minneapolis a short time ago, is sending out circulars to all inspectors in the territory covered, outlining the plans of the association and inviting membership. A fairly good number of applications are being received. It is expected that various matters in which the members are interested commonly will be taken up with the railroads before long. E. B. Nelson, Minneapolis, is secretary.

Minneapolis is undergoing a periodical change as to the condition of the streets, and it is threatened to clear the sidewalks of everything contrary to the ordinance. This would require the removal of all sorts

of street display cases, curb standards and the like. It would not affect jewelers much, for hardly any have street display cases, but some of the department stores and others have a great many cases on the street, close to their buildings, in which articles of jewelry are frequently displayed.

Indianapolis.

After a two weeks' fishing trip at Lake Maxinkuckee, L. A. Kiefer, of L. F. Kiefer & Son, has returned home.

Business connected with lead and zinc mines in which he is interested called A. P. Craft to Wisconsin, last week.

George G. Dyer, engraver for Dyer Bros., has gone to Bloomfield, where he will spend two weeks resting and recuperating.

Charles W. Lauer, of Charles W. Lauer & Co., is expected home, this week, after a three weeks' fishing trip to Lake Manitou.

E. M. Craft, of the A. P. Craft Co., left, last Saturday, for a month's visit at Atlantic City. He was accompanied by his family.

Joseph E. Reagan, manager of the Baldwin-Miller Co., left, last Friday, to spend 10 days with his family at Ludington, Mich.

Seriously ill with typhoid fever, Ralph W. Abbott, employed by J. H. Reed, is confined to his home. It is expected that he will recover.

Following a month's trip to the Seattle Exposition and other western points, J. M. Williams, watchmaker for J. H. Reed, reached home, last week.

Harry Reed, who has been employed by his father, J. H. Reed, will leave, this week, for Purdue University, to begin a four years' agricultural course.

Burglars, one night last week, broke the display window of the City Loan & Jewelry Co., in West Washington St., with a brick, but were frightened away before they succeeded in stealing anything.

A six weeks' trip to the Seattle (Wash.) Exposition and tour of California and other western States has been completed by John A. Bernloehr, of Chris. Bernloehr & Bro. He was accompanied by his family.

Important pearl finds continue to be reported from mussel fishers in the Wabash river. The latest was that made, last week, by George Rutledge, near Evansville. He found a pearl weighing 46 grains, which he sold for \$3,500.

Leopold Markowitz, secretary of the I. Grohs' Jewelry Co., has returned to the city after a six weeks' business trip through Texas and the southwest. I. Grohs, president of the company, is expected home from a month's business trip to St. Louis, this week.

Dyer Bros. have installed a novel window display. The old window has been removed and in its place has been arranged a large show case running the full width of the window, protecting goods displayed from dust and also presenting an attractive appearance.

Retail jewelers in this city, last week, were: John W. Hudson, Fortville; J. F. Kiser, Muncie; Herman Tabler, Waynetown; Mr. Robbins, of Cooper & Robbins, Mooresville; L. J. Small, Carmel; J. A. Micssen, Cicero; Clyde Porter, Tipton; A. S. Orr, Greenfield, and S. B. Merrick, Plainfield.

San Francisco.

TRADE CONDITIONS

The demand for diamonds this Fall indicates that this sector of the country, at least, is in a prosperous condition again. Several wholesale houses which have had buyers in the European markets have been compelled to send reorders for stock, the goods selected by their representatives earlier in the season having been practically disposed of already. Last season retailers throughout the country delayed their purchases of holiday goods until the latest possible moment and then bought sparingly, but this year they are commencing to buy early and in large quantities. The wholesale business is very satisfactory and with good crops and fair prices, the rule throughout the coast, a big Winter trade is anticipated.

Mr. Languetin, of the firm of Harris & Languetin, spent his Summer vacation this season at Lake Tahoe.

W. S. Fulton, with the Standard Button Co., Attleboro, Mass., and the Roy Watch Case Co., is out on the road at the present time.

The new goods selected by Mr. Sorenson for the Market and Mission St. stores of the Sorenson Co. while on his recent eastern visit are commencing to arrive and the stores are taking on a holiday air already.

George Larson, the well known engraver, has been very busy during the past six weeks manufacturing the emblems for the Golden Jubilee Festival, held in San Francisco, this month. The design was also furnished by him.

Ed. Radke's new watchmaking school in San Francisco is now located at 717 Market St., and a number of students are enrolled for the Fall term. Mr. Radke has also purchased an interest in the material house of the R. & L. Myers Co. and is devoting a portion of his time to the supply business.

A. Cramwell, an auctioneer, 211 Market St., San Francisco, was arrested, last week, on a warrant obtained by Marion Longmire, on a charge of grand larceny. It was later found that Cramwell had no license to conduct an auction room and an additional charge was booked against him. Longmire called upon Cramwell recently in answer to an advertisement in a local paper for a partner with \$300 to invest in the jewelry auction business and purchased an interest in the business. The profits were to be divided equally, but after the goods were sold it is claimed that he received nothing.

The Diamond Palace of Col. A. Andrews will be opened in a permanent location in the downtown district, this week. The new store in the Meskey building, on Kearny St. just off Market, is now practically finished and will be opened to the public in a few days. In general appearance the store is very similar to the one destroyed by fire in the Ru's building, on Montgomery St., and the one opened later on Van Ness Ave., but the decorations of the new establishment will be more elaborate than ever. Some of the decorations, lighting fixtures and mirrors have been removed from the Van Ness Ave. store and placed in position, but in the main new material has been used. The location is much better than the former one, being midway between the new Palace and the St. Francis Hotels and on one of the main retail streets of the city. A magnificent clock has been installed on the side, and the selection of this location by this store has made stores in the vicinity much more valuable, as the Diamond Palace

is one of the greatest drawing cards in the city, being familiar to every one who has been here within the past 35 or 40 years. Col. A. Andrews will be on hand to welcome visitors on the opening day, and the occasion will be a memorable one.

Los Angeles.

R. H. Gilmore, of Gilmore & Lee, is making a business trip up the coast.

John Luckenbach, 141 S. Spring St., is taking a vacation with his wife at Lake Tahoe.

Ed. Villemot, head engraver with J. Wiesenberger, has gone to Seattle for a month's vacation.

Geo. W. Miller, of Brock & Feagans' silver department, is taking a vacation, camping on the beach.

E. Sprague, watchmaker and salesman for the Carl Entenmann Jewelry Co., is taking a week's rest.

Chas. McNiff, of Brock & Feagans' store, has returned from New York. Mr. Feagans is still in the east.

W. C. Libs, of Hambright & Walsh's office force, is taking a vacation at the beach with his family.

A. E. Baranger, traveling salesman for H. F. Wallace, has just started out for an extended trip on the road.

Ed. Bastheim, of the Bastheim, Adams & Abel Co., the new wholesale firm, has gone to Arizona on a business trip.

Eugene A. Reboul, head engraver for the Donovan & Seamans Co., has gone to Santa Barbara, on an automobile trip.

E. Gerson, 545 S. Broadway, has gone to Oxnard, Hueneville and vicinity with his wife for a rest of a week or 10 days.

Geo. W. Mitchell, recently from the east, has opened a watch repairing shop in Burbank, a small town 12 miles from this city.

The E. W. Reynolds Co. has found it necessary to enlarge its optical department on account of growing prescription business.

Ed. Turner, of the E. W. Reynolds Co., has just returned from a month's vacation spent in motoring with his wife through southern California.

Jacob Kaplan, head of J. Wiesenberger's manufacturing department for a number of years, has gone to Matilija with his wife for a short vacation.

The S. S. Schepps Co., 621 S. Broadway, has been rearranging the rear of the store by means of which they will get considerable additional space.

Floyd James, formerly with the J. P. Trafton Co., which discontinued business in this city recently, has taken a position with Geo. W. Collis, Pasadena.

H. F. Wallace, 414½ S. Broadway, is engaged in taking his annual inventory. Charles Schwenck, of Mr. Wallace's force, is taking a vacation at Catalina Island.

Edward Nicoll, of the Carl Entenmann Jewelry Co., started with his wife, a few days ago, on an automobile trip to San Francisco and return. He is driving his own machine.

The California Gem Co. has just received samples of a reddish mixed opal deposit discovered in San Bernardino County. It is not yet determined whether the mine will be commercially valuable.

A force of workmen is actively engaged in remodeling and repairing S. B. Bailey's store, which was recently visited by Mr. Bailey. Mr. Bailey has not yet returned from the east, where he is buying a stock preparation for reopening in September.

Out-of-town retail jewelers who have been in this city, recently, include: W. Wilson, Ocean Park; J. O. White, Barstow, Cal.; J. F. Byrd, Searchlight, Nev.; F. Adams, of Greenwald & Adams, Tucs.; E. H. Booth, Chihuahua, Mexico.

The California Gem Co. is handling number of samples of their black matrix turquoise, of which it has recently come into possession. There was some doubt to the exact character of this stone. Mr. Sterrett, the Government expert was here recently, pronounced it turquoise.

Owing to his success in the more immediate southern part of this State, Art Turner, a comparatively new salesman with the E. W. Reynolds Co., has just started on his first northern trip, to be gone several weeks. He took with him complete representation of all departments of the house.

John M. Samuels, watchmaker for A. Taylor, is taking a two weeks' vacation in the mountains. Kyle McBratney, El Centro, Imperial County, is filling Mr. Samuels' place. Mr. McBratney comes here to escape the heat at his home during the Summer and expects to return to El Centro in Nov. 1.

Ed. Sandstrom, of J. Wiesenberger's office force, is taking a vacation with his wife at Mt. Lowe, where they have a cabin 14 miles from any settlement. Dr. Geo. A. Collins, optician with Mr. Wiesenberger, is taking vacation with his wife at Catalina Island where they are entertaining friends with some delightful trips on Mr. Collins' yacht. Ed. Viereck has been added to Mr. Wiesenberger's force to help out while others are away.

Clem Glass, manager of the Whitt Jewelry Co., has just returned from an extended trip through the east, having been absent nearly three months. During the trip he traveled 10,000 miles and visited 52 cities in the east and south. The large cities which he visited included Kansas City, Chicago, St. Louis, Milwaukee, Detroit, Cleveland, Buffalo, Toronto, Kingston, Montreal, Boston, New York, Philadelphia, Baltimore, Washington and many of the leading cities of the southern States. He comes back more gratified than ever to be in Los Angeles, and says that this city in many respects is in advance of most of the eastern cities and behind but few.

Joseph Rittigstein, who has been in business for some time past on the second floor of the O. T. Johnson building, has decided to return to the ground floor, where he has rented a store at 540 S. Broadway. This store will be fitted up with a new front, mahogany finish throughout, and cement plate cases. The store will be ready for occupancy Oct. 1, when Mr. Rittigstein expects to begin business. He has taken a five-year lease. Mr. Rittigstein will be married in San Francisco, Sept. 12, to Mrs. Rose Cohen, a member of one of the prominent families of San Francisco. He says this new store is his wedding present to himself. He has engaged E. A. Palmer, watchmaker.

Milwaukee.

William Sinka, Beloit, Wis., has opened a jewelry store in the Famree & Vandrisse building, Luxenburg, Wis.

Karl Leonhardt, formerly a jeweler at Forte, Ind., has opened a new jewelry store on Walnut St., in this city.

Kaukauna Jewelry Co., South Kaukauna, Wis., has moved its stock from the block to the Gantter building.

Among the out-of-town jewelers in Milwaukee, last week, were: F. P. Beswick, and J. B. Kimball, Waukesha.

News has been received by Milwaukee jewelers of the recent death of J. E. Kil-kingston, Wis. Few particulars are beyond the announcement that the loss is being carried on by a son, J. L. Kingston.

Arrangements have just been completed by the entertainment committee of the Milwaukee Jewelers' Club for the next annual meeting of the organization, which will be held at Blatz Park, Sept. 8. The meeting will be entirely social in nature.

J. Gaum, Madison, Wis., who has been champion for the light harness horse, reported last week that his entry in the grand all races at Waukesha, Major, had taken second position in four heats. The best time was 2:10 1/4.

Milwaukee jewelers are surprised at the results of the assessors of the city, which have shown the existence in Milwaukee of only 20 watches and not a single diamond, and in a city of nearly 375,000. Jewelers who have never before were so few watches and diamonds routed out from their hiding places as this year.

The meeting of the Fox River Valley Jewelers' Association, was held at Berlin, Wis., Sept. 25. Trade matters were discussed and a social time was enjoyed by the visiting jewelers. A most interesting program for the entertainment of the visitors was arranged by a committee of the members of the association.

H. Warnke & Co. are improving their motor equipment by installing the individual motor system. Several new motors have been placed in operation, last week, and various other improvements are being made. E. H. Warnke, president of the firm, has just returned to Milwaukee from a vacation at Silver Lake, near West Bend, Wis.

At the final meeting, held in the United States District Court, Milwaukee, of the directors of Francis D. Bancroft, the bankrupt jeweler of Waukesha, Wis., a first and final dividend of 18 per cent. was declared and paid, amounting to \$845.76. An order has been filed with the court discharging the trustee and closing the administration of the estate.

By picking up two costly pearls in one day, valued at \$4,000 and the other at \$6,000, the recent experience of Reno Miller, former resident of Racine, Wis., now living in the western part of the State. The pearl occurred along the Mississippi River. A pearl weighing 19 grains which was recently found in the Catfish River by Horace Peas has been sold to John Young, a prominent pearl buyer of Brodhead, Wis. The estimated value of this pearl is given at \$2,000.

Milwaukee jewelers and opticians have decided to make war upon peddlers who represent themselves to be agents of some well-known optician or optometrist, and on this claim sell eyeglasses or test eyes. There has been much of this fraudulent practice in the State of late, due to the fact that Wisconsin is without an optometry law, and the determination seems to have been made not to await the appearance of a new law before taking action in the matter. One firm has decided to prosecute all cases where sufficient evidence can be obtained. The peddler usually exhibits a piece of printed matter containing the name of the firm he claims to represent, and although few jewelers are taken in, injustice is done to the public at large.

Springfield, Ill.

J. C. Pierik has gone to Chicago for a couple of days on a business trip.

W. N. Watts, with T. G. Hawks & Son, Corning, N. Y., was in Springfield last week.

Carl H. Klaholt has returned from a trip to New York, where he purchased a new line of Fall jewelry.

Thursday was the last half-holiday of Springfield business houses, and commencing next month, all jewelers will remain open six full days a week.

Herman Pierik, son of J. C. Pierik, has removed to Los Angeles, Cal., where he has secured employment in a jewelry store. He is not expected to return until after the holiday rush season. He served for two years under his father as salesman.

On display at the jewelry store of J. C. Klaholt is a handsome silver loving cup, 10 inches high, which is to be presented by the president of the Illinois Gun club to the member making the best individual score at the shoots this season. The trophy is engraved appropriately and will bear the name of the winner, who will thus claim the championship. The silver loving cup to be presented to the lady making the best score in the two-ball foursome golf play at the Illinois County Club golf links, by Miss Grace Yates, has also been furnished by Mr. Klaholt.

Pacific Coast Notes.

M. Hanson, a Dane who has been in America but a few years, has opened a store in National City, near San Diego, Cal.

A. J. Schneider, a jeweler who owns a ranch at Arlington, near Riverside, Cal., and who has been doing a jewelry business at his house, has opened a store with a complete stock of up-to-date goods. His is the first jewelry store in Arlington.

The Bureau of Manufacturers, Washington, D. C., is in receipt of a letter from a Massachusetts company, asking for the addresses of manufacturers of bead chain, a sample of which, made in Germany and known as No. 9, is sent with the inquiry. This sample and the address of the company may be had by interested houses upon application to this bureau.

Kansas City.

I. W. Schmandt, Holden, Mo., was a visitor in this city, last week.

Leslie Burklund and wife, Moberly, Mo., visited Kansas City friends, last week.

Three new retail jewelry stores have been opened in this city within the last month.

Leslie White, with D. B. Ward & Co., was in the house, last week, stocking up his trunks.

Catherine Porter, of the Porter & Wiser Jewelry Co., has just returned from a vacation trip.

E. P. Nevin, of Nevin Bros., is spending his vacation in Colorado Springs, Manitou and vicinity.

J. V. Robinson, of the C. B. Norton Jewelry Co., is spending his vacation in northern Minnesota.

G. H. Church, Oak Grove, Mo., visited Kansas City, last week, to look over the automobile situation.

Louis Oppenstein, of Oppenstein Bros., is spending his vacation at Atlantic City and other eastern resorts.

W. C. Vandel, with the Edwards & Sloane Jewelry Co., has returned from a trip over his territory.

E. C. Reinholdt, with the Meyer Jewelry Co., leaves this week for a vacation trip of a week or 10 days to the east.

Geo. H. Edwards, of the Edwards & Sloane Jewelry Co., has just returned from a vacation at Sylvan Beach, Mich.

Frank Winkler, Jr., Lincoln, Nebr., has been visiting his relatives and many friends in this city during the past week.

H. M. Heckart, Springfield, Mo., was here, last week, as a delegate to the annual convention of the Retail Merchants' Association of Missouri.

With many pedestrians in sight the plate glass window in the store of J. Friedman, 812 Main St., was broken one night recently, and a large quantity of jewelry stolen.

Gilbert Cohen is moving into larger and better quarters at 1321 Grand Ave. Ben Leach, watchmaker for J. R. Mercer, has just returned from a visit to relatives in Higginsville, Mo.

Dan Sargeant, Delphos, Kans., accompanied by his wife and son, was in Kansas City, last week, on their return from a fishing expedition to the White River country in southern Missouri.

Out-of-town jewelers who called on the jobbing trade during the past week were: Frank J. Kohr, Poteau, Okla.; S. C. Arnold, Hudson, Kans.; S. H. Miller, Wichita, Kans.; L. E. DeLanty, Parkville, Mo.; V. W. Huffman, Herrington, Kans.; Frank Mitchell, Marshall, Mo.; C. H. Reideman, Vinita, Okla.; R. B. McPhilly, Effingham, Kans.; Gail B. Douglas, Pleasant Hill, Mo.; Mr. Huber, of Inglis & Huber, Higginsville, Mo.; G. H. Church, Oak Grove, Mo.; Geo. H. Spangle, Chetopa, Kans.; C. G. Morrison, Olathe, Kans.; Fred Melliush, Ottawa, Kans., and J. H. Leighty, Spring Hill, Kans.

Pearl hunting is becoming an industry in the Cedar River, at Nashau, Ia., several valuable finds having been reported from there.

E. H. H. Smith SILVER CO'S

"Multi-Fortified Silver Back"

Showing the extra thick plating on entire back. This is the "Multi-Silver Fortified Back"

Showing silver plating on front of spoon

IN addition to our extraordinary standard plating we put a "Multi-Silver" plating on the entire back of every spoon and fork—the place wear-resistance is most necessary:

As our *Multi-Silver* plating is accomplished in one operation, by a new patented process which we control exclusively, we get the extra fortification at but a trifle more than the cost of the additional silver:

Our goods have a *standard price and profit for the dealer*, because we take advantage of every invention to make them better:

Send your orders *now* for Fall delivery.

NEW YORK CITY

St. Louis.

A. L. Lerner, of A. R. Brooks & Co., has returned from a two weeks' outing in the parks.

Edwin Massa, of the Bauman-Massa Jewelry Co., is out in Missouri on a short business trip.

Edward Krietemeyer, of the F. W. Dross Jewelry Co., is spending a part of his vacation at Elgin, Ill.

The mother of L. Harris, of Harris & Goldman, diamond merchants, Commercial Building, is seriously ill.

Ferdinand Gauen, of the Martin Hacker Jewelry Mfg. Co., has returned from a two weeks' trip to Colorado.

Paul Morefield, credit man of Loftis Bros., returned on Tuesday of last week on a business trip to Chicago.

The marriage of Harry W. Mark, of the St. Louis Clock & Silverware Co., to Miss Melia Drissel took place Tuesday.

A. R. Brooks & Co. are issuing a supplementary catalogue of 160 pages. A new general catalogue of 400 pages will be issued next month.

Ed L. Fischacker, advertising manager of the Mermod, Jaccard & King Jewelry Co., returned from a few days' outing at Piasa Bluffs, Chautauqua.

Ed Otto Mueller, manager of the William Keller Jewelry Co., 18th and Olive Sts., has just returned from a vacation trip of two weeks in the south.

Vincent J. Gorley, of Grimm & Gorly, 10 Cass Ave., has returned from a five days' pleasure trip to Cincinnati. He was accompanied by Mrs. Gorly.

E. A. Schoene, of the Maschmeyer-Edwards Silver Co., came in from California and left on a trip through Texas. He will remain in Texas until Nov. 15.

E. W. Hoyt, president of the Hoyt Jewelry Co., left Tuesday on a trip through the eastern Missouri, Oklahoma and Arkansas. He will be gone about a month.

Sam Hotchner, local representative of A. Hotchner & Son, has returned from Antwerp, where he made large purchases of diamonds. He was away about three months.

During the first week in October St. Louis will celebrate the centennial of its incorporation, and the celebration will be on a scale that thousands of visitors are expected.

Among the out-of-town jewelers in St. Louis during the past week were: C. F. Gordon, Shreveport, La.; A. Vogt, Montgomery City, Mo.; Fred Simon, Collinsville, Ill.; E. Markley, Marianna, Ark.

Grimm & Gorly, jewelers and florists at 10 Cass Ave., had a floral float in the recent annual parade of the North St. Louis Business Men's Association. Advertising matter for both branches of the business was distributed from it.

J. J. Burke, president of the Brooks Jewelry & Optical Co., returned Friday, accompanied by his wife, from a trip to Chicago, Milwaukee and the Lake Michigan resorts. Mrs. Burke, convalescing from her recent serious illness, was benefited by the trip.

L. H. Bauman, president of the Bauman-Massa Jewelry Co., says that the demand for diamonds, considering general condi-

tions, is exceptionally good; as good as any year in his firm's business. The firm, he says, is selling considerably more diamonds than jewelry.

J. F. Dailey, St. Louis manager of Loftis Bros. Jewelry Co., will return Sept. 1 from Nevada, where he has been since July 15, looking after mining interests there. During his absence Charles W. E. U. Dailey, Chicago, auditor of the company, has been here. He will return next week to Chicago.

A. L. Blankenmeister, of the Blankenmeister-Oberting Jewelry Co., has returned from a business trip through Kansas and Oklahoma. He will be in town for a few days and will return to the same territory. George Oberting came in from Illinois and will leave shortly for a trip through Missouri and Arkansas.

The store of the C. F. Gauen Jewelry Co. has been sold to A. Hugunin, a son of F. U. Hugunin, railroad time inspector. Mr. Gauen has gone to Colorado for his health, and has not announced what plans he will carry out on his return. The purchaser has been in the brokerage business. He has taken into his employ as watchmaker and salesman Robert Saloch, formerly with the G. Eckhardt Jewelry Co.

Ground has been broken for the new home to be erected in fashionable Kingsbury Pl. by L. H. Bauman, president of the Bauman-Massa Jewelry Co. The house will be three stories in height, of English style, will contain 14 rooms and will cost, including the ground, \$30,000. It will be one of the handsomest homes in Kingsbury Pl. Mr. Bauman sold his former home, and since the return of Mrs. Bauman and himself from Europe they have been living at the Washington.

Charles Aronberg and Henry Schubach opened an attractive retail jewelry store Saturday at 207 N. 6th St., under the firm name of Aronberg & Schubach. They will carry a line of medium-priced goods and novelties. Mr. Aronberg is in the gents' furnishing goods business on Tower Grove Ave., but was formerly connected with the jewelry business. Mr. Schubach was with Brenner & Co. at 6th St. and Washington Ave., until the failure of that firm, a few months ago. Before that he was with W. A. Gill. The interior finish of the store is mahogany.

The cruiser *St. Louis*, now off San Francisco, is to be presented in a few days with a silver punch set for the officers by St. Louis business men. The set was made by the Mermod, Jaccard & King Jewelry Co., and has just been completed and turned over to T. R. Ballard, who has charge of the raising of the fund. The trophy will be exhibited Monday at the Merchants' Exchange, and in a few days Mr. Ballard and a committee of business men will leave for San Francisco to make the presentation. The design is said to be one of the most beautiful ever made in St. Louis. The cost is upward of \$3,000. An electric piano is to be presented to the men of the cruiser. The movement to present the trophy was promoted by a committee composed of Jas. E. Smith, president of the Business Men's League; Edward Devoy, Russell E. Gardner, Horace Rumsey, Charles F. Wenneker, L. D. Kingsland and T. R. Ballard.

Toledo.

Frank C. Field, St. Clair, has improved the appearance of his store front and has erected a new sign.

The Conklin Pen Co. is reorganizing its traveling force and, beginning Sept. 1, will establish a Chicago office.

I. Kopelman, who has been indisposed for some weeks past, is improved in health and has returned to his store.

Norman Haskell, of J. J. Freeman & Co., officiated as one of the judges in the automobile parade in connection with the King Wamba Festival.

W. H. Ricaby & Co., 307 Monroe St., have increased their stock and will hereafter give their jewelry business the greater part of their attention.

The Hull Bros. Umbrella Co. has added another man to the traveling force and anticipates an unusually heavy holiday trade. A handsome new sign has been put on the factory.

Traveling salesmen who have visited Toledo, during the past week, report the best outlook for a banner Fall and holiday trade in three years and further say that jewelers are already preparing to carry a larger and more expensive stock than during the past two years.

The Lion store is displaying the loving cups and other trophies which are offered for the nautical races on Lake Erie this season. Most of those displayed were furnished by the Merrill & Broer Co., wholesale jewelers, and form the finest collection of its kind ever offered or displayed in Toledo.

The President's cup, presented to the Toledo Yacht Club by President Taft, was won by Art Davies, Toledo, over a field of catboats representing most of the Lake Erie ports. By peculiar coincidence the boat was the "*Possum*," named for President Taft, shortly after his election last Fall.

John R. Tyler, jeweler at Fayette, O., spent some days in Toledo, last week, looking after stock and materials. Mr. Tyler is at present a member of the city council, and expects to become a candidate for reelection at the Fall election. He reports a much better business this Summer than last, and will shortly install the largest stock he has ever carried, in anticipation of a good holiday trade.

The Libbey Glass Co. will shortly double its working force or resume the large force it had before the financial panic two years ago. This is in line with other indications of a return of prosperity. Mr. Libbey, the head of the company, will also play an important rôle in the laying of the corner stone of the new Toledo Museum of Art, more than half of the funds necessary for its erection having been given by him.

Toledo jewelers are profuse in their decorations for King Wamba festival week, which began Aug. 2 and ended Aug. 28. Among those who paid special attention to decorative schemes were J. J. Freeman & Co., whose entire first story front was almost a solid mass of colors; the Judd-Gross Co., I. Kopelman Co., Walcott & Co., J. G. Kapp, L. Beekman Co., W. A. Rankin, Merrill & Broer Co., Isenberg Bros. Co., L. P. Christiancy and J. D. Rowland.

Having been appointed Trustee in the bankrupt estate of Robert W. Brady, Jeweler, Washington, Pa., I offer for sale, subject to the approval of the District Court of the United States for the Western District of Pennsylvania, his entire stock of Jewelry, Silverware, etc.

I desire to sell as a whole, the invoice running between \$5,000 and \$6,000, and a rare opportunity is offered to the man with the cash to purchase the same.

The stock is the finest and up-to-date, no cheap goods included. Consists of Watches, Jewelry, Silverware (solid and plated), Clocks, Cut Glass Novelties, in fact a complete up-to-date stock.

Don't delay as same will be sold soon. Call on or address

W. B. RITCHIE, Trustee
111 South Main St., Washington, Pa.

COL. L. BYRNES
170 E. Madison Street CHICAGO, Ill.

Texas.

H. Benninger, Cleburne, was in Dallas recently.

D. Reily, Paris, has removed to Durant, Okla.

Baby girl has been born to Mr. and Mrs. L. Daches, Laredo.

Wm. Mitchell, Dallas, is spending his vacation with relatives in Kansas City, Mo.

D. Wall, Poolville, has disposed of his interests in that town and has opened up in Abilene.

C. Hilburn, Wichita Falls, is now employed as watchmaker for H. W. Bounds, Dallas.

F. Bertsch, formerly with J. H. Ter-Baird, has opened a store of his own in Antlers.

A. Fowler, Albany, has sold out his stock to J. W. Davis and expects to locate in Oklahoma City, Okla.

H. Ludden, formerly of Altus, Okla., accepted a position as watchmaker with Astracan, Amarillo.

W. Shannon, formerly with C. D. Peaslee, Chicago, is now employed as watchmaker for P. H. Seewald, Amarillo.

T. Camp, of the firm of Martin & Campbell Co., Midland, has withdrawn and has opened an attractive store at Toyahvale.

W. E. Yantis, Sulphur Springs, was in Dallas, purchasing some new wall cases and making some heavy purchases of jewelry.

W. Rauch has been employed by C. L. Sworthy as traveling representative, and is covering his newly assigned territory. Wm. Harle, Memphis, has purchased a place several miles from that town and is following the vocation of a husbandman.

R. Jones, Memphis, has opened his store with an enlarged stock and is making a very tasty display of his new stock.

A. Wilson, watchmaker for George Poffle, Greenville, has just returned from the Yukon Exposition after a month's absence.

E. Brasfield, formerly salesman for the Crawford Jewelry Co., Temple, is now connected with the A. A. Everts Co. in the same capacity.

The John Griffith Co. is the name of the new firm that has purchased and is now operating W. D. McGraw's former business in Floresville.

W. Hunter & Brockett is the style of the newly formed firm which is now conducting jewelry business formerly owned by E. D. Brockett, Itasca.

Schorsch-Christian Co., Inc., is the name of the new firm now operating the business which E. G. Schorsch & Son formerly conducted in Abilene.

H. Bartlett, Marshall, has become the proud owner of an automobile and is finding it useful in attracting his acquaintances to his place of business.

James Huffman, watchmaker for Henry Hensen & Co., Corsicana, has resigned and is now employed by J. H. Hemple & Co., Temple, in the same capacity.

H. Greer, Fort Worth, is attending the Yukon Exposition and expects to make an extended tour of Canada and the United States before returning home in the Fall.

Julius W. Smith, Rusk, has returned

home considerably improved after an absence of several weeks, during which time he had a very serious operation performed.

A. T. Roempke, of the firm of Sartor & Roempke, San Antonio, Tex., has sold out his interest in that business to R. J. Sprague, formerly of Newport News, Va.

Charles Sorg, who has been connected with the A. A. Everts Co., Dallas, as watchmaker for several years, resigned his position and is taking a much-needed rest.

H. H. Hawley, Dallas, after a two months' vacation in Asheville, N. C., expects to return home within the coming week, but is stopping at Atlanta, Ga., for a few days.

George Stuart, formerly of R. J. Slagle & Co., Henretta, who resigned and went to Ohio, has just returned to Dallas and is seeking a location. He says it is too hot up north for him.

W. H. Ray, Hereford, is moving into his new brick building, which is much larger than his old one and is considerably increasing his stock of jewelry, and is also adding several new wall cases.

J. R. Bookwalter and wife, Teague, were in Dallas, spending a week's vacation. Mr. Bookwalter reports conditions a little dull, but with the opening of the railroad shops he expects an increased business to ensue.

J. P. Majors, Colorado, has gone on a lengthy vacation through the State of Colorado. This trip was ordered by Mr. Major's physicians, who advised this cessation from business to prevent a breakdown of his health.

W. F. Johnson, Gatesville, has become infected with the Oklahoma fever and closed out his business. He is fitting up a neat, attractive little store in Hollis, Okla., which is in the center of the prosperous Indian country.

J. R. Cromer, one of the brothers who composed the old firm of Cromer Bros., Fort Worth, has started in business for himself in that town and has opened a store at 508 Houston St. with quite a large stock of goods.

After an interval of two months H. L. Williams, who severed his connection with the H. H. Hawley Co. and started in business in Mabank, has returned and resumed his former position with the above-mentioned firm.

Z. Gluck, house salesman for Linz Bros., Dallas, is visiting relatives in Dodge City, Kans., and expects to remain for a month's vacation. Mr. McCann, bookkeeper for Linz Bros.' wholesale department, is visiting relatives in Canada.

Arthur Cox, who recently forsook the watchmaker's bench for an outside traveling position with a candy company of Dallas, found that the traveling salesman's lot was not a bed of roses and has taken a position as watchmaker with D. Goodin, McKinney.

J. M. Wilson, secretary of the H. H. Hawley Co., Dallas, is returning home from the Yukon Exposition, and is covering part of his territory. He reports conditions exceptionally fine through the Panhandle, owing to the recent heavy rains, which saved the almost parched crops.

T. J. Hines, formerly connected with the Studer-Crawford Co., Waco, recently sev-

ered his connection with that firm and became connected with J. P. Bolding, Terrell. After a two weeks' investigation of conditions he purchased Mr. Bolding's entire stock and contemplates big improvements.

L. B. Moore and Fred Marcus, members of the "Live Wire Organization" of Denison, were in Dallas, Aug. 11. This organization is composed of the principal merchants, whose object is to boost Denison.

E. G. Buerger, head watchmaker for the Hawley Co., is on the sick list. He is being attended by trained nurses, furnished through the generosity of the company for whom he has been working. As yet the doctors have been unable to diagnose the case, but it is feared that this is likely to be the first instance in Dallas of the dreaded mysterious sleeping disease, which is supposed to be communicated by cattle.

H. W. Bounds and wife, Dallas, spent five days in San Antonio. Both Mr. and Mrs. Bounds were members of the K. and L. of H., Mr. Bounds being captain. The chapter to which they belong left Dallas Sunday, Aug. 8, on a special car. The Dallas chapter's degree team won the banner and Mr. Bounds was made the recipient of a beautiful four-bar and star medal with a large diamond pendant, valued at \$500.

Geo. E. Cook, formerly partner with Jules E. Muchert, of Sherman, and Dr. J. B. Rooney, who was also connected with that firm as optician, have formed a partnership under the name of Cook & Rooney and have leased the building at 354 Main St., Dallas, where extensive alterations are being made for their accommodation. These gentlemen are going to operate an optical business and will handle jewelry novelties. Mr. Cook has been many years in the business and Dr. Rooney's wide experience also stands them well in stead. A thorough canvass of the State was made looking to a suitable location before this present site was finally chosen.

Columbus, O.

E. J. Goodman, of Goodman Bros., is spending a two weeks' vacation in the country.

Fred C. Blenkner, manufacturing jeweler, expects to hear within a month or two the verdict of the Chief of Ordnance, United States Army, in regard to a number of sights for guns and rifles which he invented. They have been in the hands of various infantry and cavalry boards, for examination, for a year or more, in all parts of the country, and in all cases they have "met all requirements."

A window smasher broke the plate glass window in the store of C. E. Loose, 180 E. Main St., Wednesday morning at about 4 o'clock, using a large boulder about eight inches in diameter, which smashed a hole almost large enough for a man to crawl through. The noise awakened people living in the neighborhood, and the thief ran with what he could hastily gather up. He got a seven-jewel Elgin watch in a 20-year case (18 size), four set rings, two bracelets and one locket. The broken window cost more than did the goods stolen. The loss on the window was covered by insurance.

The Auctioneer You Want is the one who has the reputation.

In the 20 years that I have been conducting Jewelry Auctions not one of my clients has failed or gone into bankruptcy. They have all paid their bills 100 cents on the dollar and their trade has increased after each sale.

Just a few whom I have made
three or more sales for:

MERMOD, JACCARD & KING
JEWELRY CO.,

NEW ORLEANS, LA.

MY CREDENTIALS

Are the certified testimonials of satisfied clients. Every Jeweler should read them. They tell a story of achievement unparalleled in the jewelry auction business. I hold the record for sales made the aggregate of goods sold and of profits made for my clients. No failure on my part; no disappointment on your part, no dissatisfaction on the part of purchasers. My clients' chorus of praise for me is no conspiracy—it is a spontaneous expression of gratitude for successful service. They will tell you so. If you are thinking of an auction sale, write me at once.

After I get through with an Auction you have no old or unsalable goods left. I advertise your store and bring new trade and renew confidence in your old trade. All first class jewelers should have an auction every three years, then your profits are not tied up in unsalable goods but your stock is always fresh and up-to-date. Try it.

UNITED STATES PATENTS.

PUBLISHED AUG. 17, 1909

931,577. ELECTRIC SELF-WINDING CLOCK. JACOB STEIGER and JAMES BESANCON, La Chaux-de-Fonds, Switzerland. Filed Feb. 11, 1907. Serial No. 356,849.
Clock including an electric motor for automatically winding the same, a winding wheel *e*, a wheel *q*, means actuated by the driven wheel *q* for establishing a circuit through the

and causing the forward movement of the winding wheel, and means controlled by the winding wheel for reversing the circuit and the direction of rotation of the motor at the end of a winding operation, the winding drum of the clock wheel *h*, and the winding wheel having a notch *f* adapted to engage said notch in order to transmit a winding movement to the drum.

931,554. TIME-RECORDER. WALTER BERESFORD, Liverpool, England. Filed May 19, 1908. Serial No. 433,727.
Time-recorder actuated by a rocking shaft *d* which a recording paper band is exposed to marking through an aperture in the case and mounted with the time-recorder by a hammer striking the band against type wheels, the connection of a shutter loosely pivoted on a vertical shaft and adapted to normally cover the

in the case, an arm fixed to the vertical shaft and carrying an inking pad at its end, actuated by the rocking shaft adapted to return the vertical shaft and arm and a spring adapted to return to their starting position, a shutter adapted to turn the shutter so as to open the aperture, a catch adapted to retain the shutter in its closing position and to be released by the

turning of the said arm by means of the rocking shaft, and a projection in the shutter adapted to be encountered by the arm and its return movement and turn the shutter so that the catch can engage and hold the same.

931,278. NAUTICAL-CLOCK REGISTER. THOMAS CUNNINGHAM, Wenham, Mass. Filed April 29, 1909. Serial No. 492,905.

In combination with a clock, a crystal for said clock having marked thereon the points of the compass, a movable pointer adapted to be set at

any one of the said marked points of the compass, hour and minute hands which move with the clock and two independently adjustable pointers which are adapted to be set to register respectively the time of departure from any particular point and the anticipated time of arrival at another point.

931,306. JEWEL-SETTING. HENRY HESS, Providence, R. I., assignor to the Hansen-Bennett Co., Attleboro, Mass. Filed June 27, 1908. Serial No. 440,710.

The improved process of setting jewels in thin sheet metal which consists in first striking up prongs out of the plain surface of the metal around the place where the jewel is to be set and

before the seat is formed, then forming an indentation by bending down the sheet metal between the prongs with a die to form a seat for the jewel, then placing the jewel therein and then bending the prongs against the jewel.

931,308. VEIL-CLASP. BELLE HONSOEWETZ, Lac du Flambeau, Wis. Filed Aug. 24, 1907. Serial No. 389,967.

A clasp of the character described, comprising two members struck up of sheet metal, one member having a resilient head formed therewith, the shank portion of which has a lateral concave outline intermediate of its head and base, said head being laterally or outwardly bulged, the other member having a recurved lateral outline and

adapted to be engaged by the first-referred to member, the first-referred to member having its outwardly or laterally bulged portion spaced off from the corresponding portion of the second referred to or embraced member, said member each having a lateral extension at its lower end which, when same members are assembled, extend in opposite directions, said extension being formed in continuation of said members, of sheet metal and having transverse slots therein of narrow rectangular outline and an elastic strap looped through said slots of said members and forming a clamping arch over the fastening when the parts are assembled.

931,471. METHOD OF MAKING TABLE-KNIVES. CHARLES E. PECK, Yalesville, Conn., assignor to the C. I. Yale Mfg. Co., Yalesville, Conn. Filed July 10, 1907. Serial No. 583,099.

The herein described method of making a table-knife, consisting in forming independent handle and blade blanks respectively provided with a

slot and a tang, said tang being of less length and width than the slot and provided in its edges with recesses, fitting the tang of the blade into the slot of the handle, riveting the parts together, and finally forging the connected parts together so as to produce the usual connecting neck and to dis-

place the edge portions of the walls of the slot of the handle into overlapping engagement with the side edges of the tang.

931,530. FOUNTAIN ATTACHMENT FOR PENHOLDERS. DENNIS O. VAUGHAN, McPherson, Kans. Filed Oct. 17, 1908. Serial No. 458,240.

A fountain attachment for penholders comprising a shank, curved flanges, one at each side of said shank, a curved reduced neck portion, a

pointed spoon-like reservoir having converging side flanges, said attachment being longitudinally slotted and provided with perforations.

DESIGN.

40,228. METAL ORNAMENT. JOSEPH WARREN ANTHONY, Lynn, Mass. Filed June 4, 1909.

Serial No. 502,183. Term of patent 3 1/2 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of this act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

LEARN JEWELERS ENGRAVING

"The Engraving School that Graduates Experts."
A fascinating, high-salaried and easily learned trade, taught thoroughly and practically by correspondence. Your instructor is the foremost authority and master workman in the world. You will teach the beginner better engraving by correspondence than he can gain in years of rigid apprenticeship. We will improve the skill of any engraver one hundred per cent. and make him master of the trade. The demand for competent engravers far exceeds the supply.
Send for handsome, illustrated prospectus.

BRITISH PATENTS.

SEGMENTS OF SPECIFICATIONS, 1908, FROM THE Illustrated Official Journal.)

ISSUE OF AUG. 11, 1909.

27. PENS. G. R. HUGHES, Stockport, Cheshire. April 14. Elastic sac or chamber F, F¹ is contained in barrel G of a self-filling reservoir pen, to which is fitted a spring valve P, normally closed and covered by a milled screw-cap A. To fill the

FIG. 1.

contents are first expelled by forcing air into the sac F, F¹ through the valve P, and then the air is exhausted with the point under ink, which enters the sac.

28. WORKMEN'S TELL-TALES. C. J. HEWITT and C. W. HEWITT, Rainhill, Lancashire. Aug. 2, 1907.

A transfer mechanism for time-printing wheels and in time-recorders is shown in Fig. 1, the wheel c is driven by a shaft d and is provided with a concentric rib 22 adapted to engage with pins 23 projecting from the surface of the wheel b. The pins 23 are so spaced that the spaces between them and prevents the hour-

FIG. 1.

wheel b from turning until the gap 24 enters the space and, at the completion of each revolution of the minute wheel, effects the forward movement. The axes of the hour and minute wheels are inclined to each other so that the ribs and pins engage each other at one point.

29. TESTING COINS. E. HAHN, London. A coin tester which may be worn on the watch as an article of jewelry comprises a ring A

FIG. 1. O B

notches a for the coins, and a ring B for fitting to the watch chain. The device may be of square, bar or other suitable shape.

30. WATCH CASES. P. C. JEANNERET, La

FIG. 2.

Chaux de Fonds, Switzerland. April 14. The band c of a watch case is made with a seat-

ing b in which is inserted a steel or nickel ring a, which serves to strengthen the watch case. The ring is held in position by screws i screwed into the movement. The ring a may be provided with a cap e, hinged to it at d and arranged to snap over a ridge on the ring.

31. PENS. F. COSSOR and T. W. FLORY, London. April 15.

The piston e of a self-filling fountain-pen is made slidable on the piston-rod a, and is furnished with a valve formed by ports g through the piston and a conical seating f which engages a conically faced head d on the piston-rod a. To fill the pen, the tip is immersed in ink and the piston-rod and piston are raised by a cap c; the piston valve is thus closed and ink is drawn into the pen through a passage v originating in an aperture u at or near the point. When the piston-rod is returned, the piston e is left behind till a slotted

stop h on the rod reaches it and carries it downward, the ink passing up through its valve, which is now open. A stop on the barrel limits the piston stroke and maintains the valve open. In a modification, an air outlet p connected by ports q, r with an aperture t is provided, the barrel being made up of two concentric cylinders n, o. A conical seating d² may be formed in the head d, whereby in conjunction with a screw cap c the supply of ink to the point can be regulated or stopped; or a disk provided with an eccentric port may be screwed against a face on the point section for the same purpose. A stuffing-box b, packed with alternate layers k, m of cork and vulcanite with intervening pockets, is fitted to the top of the pen. In a paralygraph, the point section is made in two parts s¹, s², and the head d is provided with ports d⁴ and an aperture d³ and normally closes the port v so that ink does not enter till the head is withdrawn some distance. An air passage w and a vent x are formed in the rod a and cap c respectively.

Applications filed July 26, 1909, to July 31, 1909.

Farmers Buying Diamonds.

(From the Kansas City Journal.)

QUITE a lot of unnecessary astonishment is expressed in the effete east because of the steady and growing demand for diamonds in the western States. This fact has also given a shock to the theorists who hold that during hard times luxuries are sacrificed first. The wisacres who preside over the statistical bureaus at Washington are struggling with the fact that although the exports of the United States fell off about \$200,000,000 in the last year, yet about \$10,000,000 more in diamonds and other precious stones were imported to this country than during the previous year. The puzzling feature of this problem in national economics to the minds of a great many persons in the East is that the great bulk of these importations of precious stones has been absorbed by the west. The stocks of diamonds in Maiden Lane and other places where precious stones are popular have become so depleted that the importers are hurrying their buyers abroad to purchase fresh supplies. Another noteworthy feature of the situation is that the western demand is chiefly for the higher grades of perfect stones. Although gems valued at \$5,000,000 were imported into this country last month, five times greater than the same period last year, the dealers have not been able to fill the orders. The importers are of the opinion that most of these jewels are going to the farmers' wives.

Nevertheless, there is nothing to be astonished at in the fact that the farmers of the west are buying diamonds for their wives. For one thing, western men have an innate chivalry which prompts them to be good to their women folk. A woman who marries a western man of the better class comes about as near being a queen, at least in her own household, as any feminine on earth, not barring titled royalty. In the next place, the western farmers have enjoyed unparalleled prosperity for the last 10 years. Their pockets are fairly bulging with money. So after buying the best modern farm machinery, as well as high class automobiles, and starting banks at almost every cross roads, they have plenty money left to decorate their wives and daughters with sparkling gems. The farmers of the west will realize upwards of \$3,000,000,000 from their crops this year, and most of it will be clear "velvet," without any incumbrances or old obligations to meet. As a consequence they can well afford to buy diamonds and automobiles and take their families to Europe.

Get the Railroad Trade

CONTROL the railroad trade in your district and you are assured of a good business. The duties of railroad men require them to have a correct and durable watch.

It is also true that other trade follows railroad trade, because the patronage of railroad men at once stamps your stock as *reliable*. The Railroad

Elgin

is designed especially to meet the requirements of the railroad man. The silver finish metal dial is most popular because the faintest ray of light illuminates it. This is the *only* metal dial made with *inlaid* figures of *hard enamel*. Some prefer the white enamel dial.

The Railroad Elgin is the thinnest 18 size watch made. It is timed and cased at the factory, and will run longer on one winding than any other railroad watch.

Another sales factor is *Elgin prestige*; for the Elgin is the most popularly known watch in the country, and this particular Elgin is everywhere recognized as a standard railroad timepiece. Advertising in railroad magazines is familiarizing it among railroad men who are anxious to see it and who are asking for the Elgin with the "49 silver dial" or the "49 enamel dial."

You can't control the railroad trade with a poor watch; but you *can* with the Railroad Elgin. Write to your jobber or to the company direct for prices.

These are the four grades and established retail prices as advertised:

THE HOROLOGICAL REVIEW

The Adjustment of Watches.

Written expressly for The Jewelers' Circular-Weekly by H. Reinecke.

(Continued from issue of Aug. 18.)

A WATCH provided with a balance spring very nearly of the form used at the present day appeared in London in the year 1761. In the year 1766 Pierre Le Roy thus brought his discovery of the isochronal spring to notice: "There is in every balance spring, provided it be long enough, a certain length which causes all the vibrations, whether long or short, to be isochronal, having fixed upon this length, if you shorten the spring the long vibrations will be quicker than the short; if, on the other hand, you lengthen it, the short arcs will require less time than the long."

Later experiments have demonstrated in addition the following theorems: Notwithstanding this condition of sufficient extension the isochronous property will remain longer than while the form of the spring is preserved as it originally was. Should the coils be more compressed, or, on the contrary, the long vibrations will now be slower than the short ones; and, on the other hand, if they are more let out or extended, the long vibrations will be faster than the short ones. In the flat spring the coil has theoretically a point where the vibrations are isochronal. That point of isochronism is determined by the relative positions of the two points connecting the balance spring with the collet and the point called the points of attachment. The two points should be so located that the balance spring is pinned at equal or opposite turns, and it is by shortening or lengthening of the outer coil that isochronism is obtained.

It is easily understood that in most instances the regulator pins have to represent the stud. It is at times expedient to shorten the coil at the collet, where an angular change does not produce the same difference in time as it would do if such change were to be made at the outer coil, while the alteration in the angle would change the isochronal condition greatly. If an adjustment is made at the outer coil, the shifting of the spring in the stud of the width of the length of a millimeter would produce a change of perhaps from three to five seconds in the isochronism.

It is easily understood from some of the foregoing remarks that if a watch is slow

in the short vibrations the proper thing to do is to increase the length of the spring and change the weight of the balance. The lengthening of the spring may also be done by shifting the index if the correction to be made is small and the index occupies a proper position in relation to the stud. In such a case the timing of the watch is to be done by changing the weight of the balance without interfering with its poise.

One of the most important things to be done in fitting a flat balance spring is to set it strictly central, which is readily recognized by the central coil appearing to be standing still. This is, of course, only an optical illusion. If a spiral be revolved in one direction the coils all appear to run outwards; run in the other direction, they all seem to run inward. The stationary coil is merely the point at which the optical effect is exactly neutralized by the mechanical opening and closing of the spring caused by the vibration of the balance. It takes place in the opposite direction to the optical effect. However, this coil should be seen in a true spring apparently motionless. If it jumps or shakes, the eye of the spring is not quite true. The eye of the spring, even of a flat spring, is a theoretical curve. The first half of this curve is a part of a true circle free and just clearing the collet a little less than 90 degrees, and the second part is the beginning of something like an increasing spiral curve—the whole representing something like the overcoil of a breguet spring reversed. A little practice will soon enable an operator to produce it. For bending the eye of the balance spring free from the collet, etc., take a small-eyed blued sewing needle, file off the extremity of the eye and smooth the corners. Setting the needle then in a small wooden handle, the coil is bent into a proper curve without damaging the spring. It has been said by some that flat springs can be isochronized to but a limited extent. But such is not the case. A flat spring when properly adjusted under favorable conditions is better than a breguet spring, because it does not need to be strained by bending a curve upward and inward. In the middle of the 19th century some of the finest English and American watches were adjusted by flat springs.

(To be continued.)

The Ancient Division of Time in China.

THE Chinese seem to have not only anticipated the Gregorian system, but in some respects the decimal system, more than 4,000 years ago. In the reign of the Emperor Yao, about 2,337 years B. C., the Chinese astronomers recognized the two equinoxes and the two solstices by the length of the days and the nights. They divided the year into four seasons and fixed its duration at 365 days and six hours, and every four years 366 complete days.

They divided the day into 12 parts, corresponding consequently with two of our hours, the hours into 100 minutes, and each minute into 100 seconds. The six diurnal hours extended from the rising to the setting of the sun, and the six nocturnal hours from the setting to the rising of the sun. The civil day commenced at midnight and ended the next day at the same hour.

The Chinese employed 12 characters as the signs of their zodiac, to indicate the 12 months of the year, the 12 days of their lunar division and the 12 hours of the day. It was only in the 17th century, under the influence of Jesuit missionaries, and particularly of Father A. Schall, that the Chinese adopted the division of the day into 24 hours, of the hour into 60 minutes and of the minute into 60 seconds. Of horary instruments, the gnomon was most used.

Horological Notes.

ON the new and commodious structure of the Pennsylvania Railroad in New York City has been set in place some magnificent sculpture. In the center of each of the four sides of the eastern section of the building is a portico and entrance, over which rises the great clock group. At the eastern facade, which faces Seventh Ave., there is a long and imposing colonnade, from which the central portico extends, as does the pavilions at the corners of the building. Here are seen two supporting figures of the clock, which rises to the height of 11 feet. On the right of the clock stands the heroic group, Day; on the left is Night. On the northern and southern walls are three sets of panels, in relief; in the center of each are displayed an eagle in a wreath with a scroll. The two end panels represent Time, Progress, Speed and Commerce.

An ingenious device has been installed at Hurlingham, one of the great polo fields of England, to time the plays in polo. It is a clock which sounds a bell at the end of each 10 minutes of play, and keeps count of the number of such periods.

Bronze Sun Dial of Artistic Design.

ALTHOUGH sun dials are no longer used extensively as an accurate means of indicating time, they are, nevertheless, very conspicuous and are gradually becoming more so, on the broad and extensive lawns of large estates where they are both an ornamental and a utilitarian purpose. Sun dials in fact, are being sought by those of aesthetic taste and are furnished with excellent effect in enhancing the beauty of the landscape. Besides the old type, which have recently been invented sun dials which give standard time, such as is illustrated in a former issue of THE HOROLOGICAL REVIEW.

One of the most artistic sun dials, however, which has been seen in a long time, is that which was recently made by Reed & Barton of New York, for the residence of Samuel Hill, in Seattle, Wash. The dial has been carefully calculated for the latitude and special position which it is to occupy. It is made of bronze, and is 40 inches long by 24 inches wide. In appearance it is massive and striking, being carefully designed in design to fit the general environment. The gnomon has been so machined that the marking of the hours that are "cast" shall be entirely accurate.

The motto has been supplied by courtesy of Rowland Hazard, a friend of Mr. Hill, who also possesses a sun-dial with this motto at his home, his beautiful residence at Pease Dale, R. I. The original author of the motto was Rowland Hazard, father of the artist.

In the construction of this sun-dial calculation has been made for the half hours as well as the hours. The dial is of the type known as the south vertical, the house being placed due north and south.

Vertical dials can be constructed for all latitudes having a sunny prospect, and are known as east or west declining dials, but special calculations are necessary for all

localities. Besides these and the horizontal dials, there are various others which offer greater complications and call for considerable astronomical and mathematical knowledge for their calculation, but they are rarely used. There have also been used instruments consisting of a combination of

Scholarships to be Awarded at Northampton Polytechnic Institute.

TWO scholarships presented by D. Buckney and J. A. Clemence, respectively, each scholarship of the value of £10 10s. per annum, and tenable for three years in the day courses of the department of horology at the Northampton Polytechnic Institute, in London, will soon be awarded. One of these scholarships, that presented by Mr. Clemence, will be awarded in September, 1909, under the following conditions:

(1.) Candidates must not be less than 16 or more than 18 years of age on the 28th of September, 1909.

(2.) Each candidate must fill up the usual application form for admission to the day courses and return it to the principal of the institute not later than the 20th of September, 1909, accompanied by a letter stating that he is a candidate for the "Clemence Scholarship," and accepts these conditions. No fee is required to be sent with this application form.

(3.) Candidates will be examined on Wednesday and Thursday, the 29th and 30th of September, 1909. On the first day a paper in simple arithmetical calculations, elementary algebra, and another paper in English, including dictation, will be set. Candidates will be required to pass in both these papers to qualify for entrance into the institute. On the second day there will be optional papers in elementary science and mathematics.

(4.) The scholarships will be awarded to the two candidates obtaining the highest aggregate marks in the whole examination, provided each obtains a sufficient number of marks to pass in each of the first day's papers separately, and that in the opinion of the examiners the answers are of sufficient merit to justify the award of a scholarship. It is desired to select scholars who have a decided bent towards mechanical and constructive work, and each selected candidate may be required to enter for a probationary period of two months before the scholarship is finally awarded. No fee will be charged during this probationary period.

(5.) The amount of each scholarship (£10 10s.) will be expended each year in providing for the scholar an admission ticket (value £5), to the day courses in horology at the institute, and the balance of £5 10s. for each year will be paid to the scholar in two equal instalments, provided a satisfactory report of the attendance and progress of the scholar is presented by the principal to the governing body.

Further particulars of the entrance examination referred to in (3) may be obtained on application to the principal, R. Mullineux Walmesley, D.Sc.

ARTISTIC BRONZE SUN-DIAL RECENTLY MADE BY REED & BARTON.

the original sun-dial and a special form of telescope, the object glass of which is formed by the narrow segmental cylindrical lens, which projects into the field of vision an image at all altitudes of the sun or a star, without any movement or adjustment. One of the oldest sun-dials, however, may still be seen in Delhi, India. This latter is rather crude.

RING OUT THE OLD—RING IN THE NEW

STANDARD.—30-hour time. Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

THE RATTLER.—30-hour time. Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case nickeled and highly polished.

LONG ALARM.—30-hour time. Six-minute Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

ALTERNATOR.—30-hour time. Repeating Alarm. rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

Why travel in the same old rut the balance of your natural life, and buy the same antiquated styles of Nickel Alarm Clocks your grandfather used to buy, just because some manufacturers have not thought it necessary to produce new designs in Nickel Alarms, as they do in other clocks?

We have some new ones, superior to anything heretofore made, and to introduce them and put a set into the hands of every jeweler, we will, on receipt of \$6.00, deliver east of the Rocky Mountains, express prepaid, one sample of each, consisting of eight clocks as described.

Don't fail to avail yourself of this opportunity to see a complete line of up-to-date alarm clocks

See coupon at bottom of page.

THE E. INGRAHAM CO. BRISTOL, CONN.

DI-ALTERNATOR.—30-hour time. Repeating Alarm. rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch; extra large bell. Height, 7 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

"THE ALARM CLOCK WITH THE CONCEALED BELL"

See cut of interior view showing bell located entirely within the case. The unsightly visible bell eliminated. Bell cannot be disarranged or thrown out of adjustment.

SIREN.—30-hour time, Long Alarm (four minutes), with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass. Case, nickeled and highly polished.

VIBRATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass silvered; Case, solid brass, old brass finish.

ROTATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

TEAR THIS OFF AND MAIL TO-DAY

THE E. INGRAHAM COMPANY, BRISTOL, CONN.:

Gentlemen Enclosed find \$6.00. Please send me by express, prepaid, your "Introductory Assortment" of eight alarm clocks, consisting of "Standard," "The Rattler," "Long Alarm," "Alternator," "Di-Alternator," "Siren," "Vibrator" and "Rotator." Yours truly,

Name

Address

Simple Conversion of a Regulator into a Current Reverser.

ATTENTION has frequently been directed to the fact that the striking work spring-operated regulator can, with a little trouble, be converted into a train that will act as a current reverser. By this means, says the *Deutsche Uhrmacher Zeitung*, such a mechanism can be employed as a master clock for a small electrical time station, or simply for the operation of electrical motion work of a street clock. The following will serve to exemplify this conversion with the aid of a few explanatory sketches.

It may be noted, firstly, all the dial parts have been removed. On the other hand, on the rear side of the cannon is mounted a ratchet wheel, R, with 60 teeth cut, which is made of such a size that it will just freely pass the minute staff. This wheel, like the cannon wheel, makes one revolution in an hour, and consequently advances one tooth every minute.

Furthermore, to the left, above the wheel, a steady-pin *d* is screwed in that serves as the axis for a crank lever, *a b*. The arm *a*, running off to a point like a pawl, engages the teeth of the wheel *R* and is held into the space between the teeth by the action of the spring *f* as often as it passes one of the teeth of the wheel.

The arm *b* of the crank lever, at its opposite end, has two steps (*b1* and *b2*) that present sharply at right angles, and through the aperture in the works plate extend to the warning wheel, so that they can catch the two starting pins inserted in the wheel, one of which pins is visible at *c*. The two starting pins are directly opposite one another, the warning wheel, as often as one of the pins is released, will make a half revolution.

The working of this arrangement may be described as follows: When at rest, one of the starting pins rests at the higher step *b1*, of the crank lever. As the wheel moves slowly forward one of the teeth catches the arm *a* of the crank lever just as usually, the starting pin *c* slips from the step *b1* to the lower step *b2*; this position is shown in the illustration. Between the steps *b1* and *b2* there is so much space that the pin *c* can pass freely between them. Then, shortly after, the arm *a*, under pressure of the spring *f*, is forced into a tooth of the wheel *R*, the arm *b* makes a sharp turn to the right, so that the step *b2* releases the pin *c*. The warning wheel then makes a half revolution, whereupon its lower pin is engaged by the upper step *b1* and the whole again returns to rest. As the spring *f* exercises only a very light pressure, the friction is very slight and does not affect the rate of the clock.

This advancement of the warning wheel, by half revolutions, is utilized in sending an alternating current through the battery, the staff of the warning wheel being provided to the rear, and to this projecting end the familiar finger is attached, which catches half revolution alternately presses, one to the right and left, against a contact spring. The contact springs employed here for this purpose are made of hard rolled steel, plate, 40 millimeters long, 2.3 millimeters broad and 0.4 millimeters thick. A

clockwork, equipped with this current converter, will readily go three weeks with one winding.

For the benefit of those, continues the aforementioned contemporary, who may not be conversant with this commonly used commutator or current reverser, we present Fig. 2, but it must be understood that for the mechanism described the current reverser must, of course, be constructed turned about (*i.e.*, the lower end to the top) because the staff of the warning wheel is situated near the upper end of the plate.

In our Fig. 2, *f* represents the finger attached to the projecting staff of the warning wheel. The springs *a* and *b* are each secured to a brass rail, and, like the contact piece *c*, carefully insulated. At their lower ends *a* and *b* rest firmly against suitable projections on *c*; *e* and *d* are the

FIG. 1.

FIG. 2.

electro-magnetic coils of a secondary clock. If the contact arm *f* makes a half revolution to the right it establishes contact with the spring *b*, whereas the connection between *b* and *c* is interrupted. The current of the circuit thus closed flows from the battery through *c a* to the right-hand magnet coil of the secondary clock, and by way of *c b f* back to the battery. At the next current impulse *a* and *f* make contact, whereas *a* and *c* are cut out. Then the current takes the reverse direction—that is, from the battery by way of *c b* to the left-hand magnet coil *e* and returns by *d a f*. The current consequently passes, in alternate direction, through *c* and *d*. The break-spark, through this alternation, is afforded an opportunity to travel in a closed circuit, the route from *d*, by way of *a*, and the noses *e c, b e* being always open to it.

By suitable modification of the ratchet wheel the contact (direct or alternating current) may be adjusted for any desired time intervals. The little cord *s* attached to the arm *b* of the crank lever *a b* (Fig. 1) serves to advance the hands from a distance. In this manner any clockmaker can, with little trouble, construct an electric master clock.

Burglars broke into the home of L. M. Lea, a jeweler of Sandusky, O., on Tuesday, of last week, and, after thoroughly ransacking the house, made off with plunder valued at \$500.

Career of the Late John Calvin Adams.

NEWS reached members of the jewelry trade, last week, of the death of John Calvin Adams, which occurred, recently, at the residence of his son, Edward F. Adams, in Galveston, Tex. The funeral was held at the residence and was conducted by the Rev. Eves, of Trinity Church. The body was temporarily interred in a vault at the Episcopal Cemetery.

Mr. Adams was 76 years of age at the time of his death and was widely known as a watchmaker of international reputation. He represented the Swiss Government during its horological exhibit at the World's Columbian Exposition and promoted several watch factories.

Mr. Adams was born at Prebel, Onondaga County, N. Y., Oct. 7, 1834. His

parents moved to Syracuse, N. Y., soon afterward, and in 1841 settled near Elgin, Ill. Mr. Adams served three years' apprenticeship in Elgin, from 1848 to 1851, with J. H. Atkins, a former watch manufacturer of Liverpool, Eng. After this he worked as a journeyman for two years in Janesville, Wis. He then returned to Elgin and engaged in business with G. B. Adams. He remained in Elgin until 1857 when he went to Chicago and took charge of the watch repair department of the firm of Hoard & Hoes. After two years he took a similar position with W. H. C. Miller & Co., with whom he remained until he began the agitation which resulted in the formation of the Elgin Watch Co. In 1862 he was appointed timekeeper for the various railroads centering in Chicago, and this resulted in the organization of the railroad time inspection service.

To Mr. Adams is also due the credit of being active in the organization of the Illinois Watch Co. in 1868. In 1869, with Paul Cornell, he organized the Cornell Watch Co., of Grand Crossing, Ill. In 1874 he organized the Adams & Terry Watch Mfg. Co. In 1883 he entered the employ of the Independent Watch Co., of Fredonia, N. Y. In 1885 he organized the Peoria Watch Co. He also represented the Jewelers' Security Alliance for a time.

In 1901 Mr. Adams retired from active business and lived with his son in Galveston,

STORE KEEPING DEPARTMENT

A Hudson-Fulton Window

Especially adapted for the display of the jeweler's stock and designed and arranged expressly for THE JEWELERS' CIRCULAR-WEEKLY, will appear in this department next week. Owing to the interest taken in the coming celebration this display will prove both timely and profitable.

The Federation of Mercantile Organizations as a Factor in Modern Business Methods.

(Extract from address of G. A. E. Barker, Minneapolis, Minn., before the recent convention of the American National Retail Jewelers' Association in Omaha, Nebr.)

"EVERYTHING in the business world that succeeds, to any great extent, to-day, is in some form of combination. This is an age of combinations, and yet we profess to make laws to prevent what we call the abuse of combinations. When we learn to distinguish the real from the apparent we will be able to get on safe ground.

"Fixed Selling Prices," of course, will solve the problem, and as you have already heard much on this subject, I will not spend any time on that phase of the question, except to say that if this plan of federation should be carried out, we could make any plan that was just fair, and equitable; lawful, and therefore permanent.

I am aware that many of those who listen to this plan as I shall lay it before you, will doubt the advisability of undertaking such a stupendous proposition, but let me say to all such that this paper is prepared for the purpose of setting the manufacturer, wholesaler and the retailer to thinking. I want you all to turn these arguments over in your own minds—I want you to keep this in your minds at least for the next year to come; and when the next meeting of the A. N. R. J. A. is held, my hope is that there will be some one who will present the plan more in detail, and more perfect than I can do at this time.

We are living in a fast age—everybody is in a hurry to make their stake and get out of business. Everything is made to sell, but with little regard to quality, and why? Because each manufacturer tries to make something that looks good and that will permit the dealer to place a cheaper price than such goods were sold for in days gone by. What does all this prove? To my mind it proves that the system under which we are working will not permit of good service to the people who buy of us.

If the system is ever changed it must be done with an iron hand at the pilot wheel. When we start to change the present regime, we must have an organization so strong that we can pass laws that will help us to force those who never will, unite with others in forming a beneficial reform.

Why do we pass laws that are calculated to protect the human family from degradation? Why do we pass laws that compel children to go to school? These questions are so simple they answer themselves. And yet, when we talk of bettering the business conditions, there are plenty of people who will not once refer you to the Constitutional Limitations, they tell us that Sacred Document protects the right of property, and forbids the abridgment of contract rights, which means nothing more than that personal liberty and absolute freedom in business affairs must not be interfered with. All this makes a thinking man feel that man was made for the Constitution, and we all know the reverse, if that statement is true.

The manufacturer says: "Give us free, raw material, and protect our manufactured products, and all will be well." Those who produce the

raw material say: "Give us protection on raw material and free trade on manufactured products, and all will be well."

Now, what are the facts—both are sparring for an advantage—in other words, it is pure selfishness that actuates both parties to the controversy, and the competitive price system is responsible for this condition. Each man would like to have the price of the article that he is producing, protected; but he wants those things that he has to buy to be unprotected, or, in other words, in competition as to price with the world.

There is no better illustration than the tariff question, to show how the people will contend with each other for the purpose of getting some advantage that others cannot have, in order that they may be in a position to take advantage of the other fellow.

If the great struggle that has been going on for months in Congress proves anything, it is that those who cling to the old system are no further advanced in the science of merchandising than those who lived a hundred or a thousand years ago.

If the price of an article can be controlled by combination, and the people thereby receive good quality and good service, would this not tend to elevate and make things better? If we lose sight of good quality and service, and think of nothing but competition in price, where will we finally land?

The Sherman Anti-Trust Law is obsolete and should either be amended or repealed, and a better and more just one enacted. When this is done, the merchant and manufacturer should be prepared to take a hand in the construction of such a law as will benefit the whole people—we should not leave the making of these laws entirely to the lawyers.

Now, you take a business man of the new school; his mind is trained for progress, and if the old Constitution will not appear plain, he will say, "Let's write a clause or two into that document and let us write it in such simple language that it will not take a dozen different courts with as many different decisions to find out the meaning." For instance, if we wanted to have an amendment to the Federal Constitution that would forever set at rest the contention over co-operation and combinations in the fields of merchandising, a simple clause like this: Congress shall have power to enact laws, permitting combined or united efforts in the maintaining of prices of commodities, and provide for governmental supervision and restriction thereof.

Now, do any of those who are here think it would take a decision of the Supreme Court of the United States to interpret the meaning of that language? We are a nation of producers, second to none on the face of the globe. In view of the conditions as they appear to-day, with reference to the distribution of our products, we are like a lot of children. We mould into forms beautiful things to please the five senses of man. We manufacture the useful and necessary implements of toil, but we distribute these

products by means of a very clumsy and ancient system of so-called merchandising. Don't misunderstand me. It is not for me to say that the beautiful palaces that are erected all over this country for the purpose of dispensing merchandise are ancient and clumsy. No, far from me to make such a statement, but it is in the manner in which we carry out the system of distribution in those beautiful palaces.

The Yankee idea, of always looking for a cheaper price has been so instilled in the people of the country, that the common man that most merchants have fallen into is to price their goods, now \$4.98, former price \$9.98. You will notice is always done after the very bottom is reached and there is no chance of going any lower. But the merchant still cater to the bugbear in the minds of the people. So he tells them that the former price was one-third or one-half more than he is now asking in order to make the customers believe they are getting the cheapest price.

Now this condition of things is what is leading the better class of manufacturers and merchant to consider the "Fixed Price System." I am one of those who believe the "Fixed Price System" should apply to the entire list of manufactured commodities that are distributed through the merchants to the consumer.

We know that this cannot be done except through the law-making bodies of this nation, and we should have a combination so strong that to request for a law would mean the getting of it same with dispatch. This is where the Federation would come in. We propose to unite the different State Associations by making officers and directors of each Association, members of the State Federation. Then we propose to make officers and directors of each State Federation members of the National Federation; and here we would have the climax or the capstone of organization. This National Federation would hold the same position to the commercial organizations of these United States, that the President and his Cabinet holds to the Nation.

I would liken the mercantile associations of the country, without a federation, to a monument built without a capstone, a house without a roof, an army of soldiers without a leader for its commander, a city without a mayor, a State without a governor, a nation without a president or king.

And now, with these facts before us as the everlasting truth, let us examine the co-operative plan of organization as it will apply to the manufacturing and merchandising interests of the nation. From the standpoint of utility and stability, I take it that the most of those who have studied the plan of co-operation, understand that each and every one of our mercantile organizations are limited—that is, our influence and ultimate accomplishments must necessarily be confined to the limitation of our own scope, or fields of operations. The same is true of the grocer, the hardware, the druggist, etc., or down the lines.

Considered, then, from all sides, I believe you will recognize the absolute necessity of a more complete and authoritative body to lead the contest that is going on in this nation, between the modern, and the old ideas of what constitutes a perfect system of distributing manufactured products.

We would have a complete co-operative commercial association with a proper capstone, and

Storekeeping Department.

This would be a monument to the world of commerce, that would live to reverse many of the ideas that we now have, pertaining to the exchange of products. This would be a monument to the world of commerce that would live to guide the commercial destinies of this nation all time to come, instead of leaving them to the lawyers and politicians to juggle with. We can say what we want, and we would get it. For instance, if we should discover that we need one or more amendments to the Federal Constitution, the machinery of Congress would be turned on, and the people would be given a chance to vote these amendments.

THE MANUFACTURERS INTERESTED.

The manufacturers should be interested, in that they are vitally interested, and they should stand with us when we are ready to demand what is necessary to carry out this plan. It is to the manufacturers of this country one of the propositions: either they will finally be forced to raise the price of their wares, or they will be obliged to establish retail stores to sell to the consumer. Now, what do you think I mean when I say the manufacturer's price will be dictated to him, if he does not join hands with the jobbers and retailers of this country to legislate a fixed price regime into operation? Present conditions indicate anything, it seems to me, they point clearly to one of two things that will finally come to pass. Either the large combine companies that control a chain of stores are going to control the retail business of this country, or the many individual stores are going to be destroyed.

Nothing for the manufacturers to do is to get a hand in the proposition when the time comes and throw the weight of their influence behind it will do the most good to themselves, and to the great mass of consumers. To make it easy to decide which is the better side of the question to take, let us suppose, for instance, that the profit that accrues from the dispensing of manufactured articles is in round numbers two million dollars, in a given space of time, of any year. I only set that amount as an approximation. Will anyone argue that it would be better to have that amount distributed to a few holders of, say four or five holding companies, in the shape of dividends? Or, would you prefer to have it go to the many thousands of merchants? Come, now, gentlemen, look this question squarely in the face, for the day is coming when you manufacturers are going to be called upon to make a decision and throw the weight of your influence on one side or the other of this question.

And now I come to the place to answer the question as to what I mean by the manufacturers' having their prices set by those who buy of them. If the large holding companies come to you with a proposition to make so and so at a price they set for you, with the alternative that if you will not make the goods at those figures they will start a factory of their own, where will you manufacturers stand when that day comes?

My judgment you will stand on a very weak foundation; so if the manufacturers take time by the forelock—build their fences—and prepare to stand on hands with the Mercantile Federation that is upon the right principle, this would make a proposition that certainly would result in placing the whole proposition of distribution of manufactured products on a proper, safe and equitable basis—and no one would be harmed in the least, and the consumer would be equally benefited.

After all has been said and done along these lines, that can be, I maintain that the consumer will be benefited more, if anything, than the manufacturers and distributors, and there are plenty of good arguments that go to back up this statement; but for the sake of brevity, I will not state all the time of this convention to produce them. So I will drop this line of thought by saying that the amount of value the consumer would receive for his money, and the good service he would get, would be reason enough. Why, the consumer should favor the combine regime in merchandising, in place of what is now known as the competitive regime. As a matter of fact, there is almost nothing that can be said in favor of a competitive price system, except that old, worn-out, and often refuted argument, that, "To buy in the cheapest and sell in the dearest market is the best way to do business, and the life

of trade; but you will all remember the story of the boys pelting the frogs with stones. It may be fun for those who buy in the cheapest market, but is death to those who compete in the cheapest market, and also to the consumer who never gets quality.

Unregulated competition is wasteful and unjust, and we must find some way out of the chaotic conditions that now exist. It is a fact that history records that both the competitive and the fixed price systems have been tried and both have been found to be wanting, or imperfect, in many respects. And, to-day, after having had the experience, we seem to be but little, if any, advanced in our system of distribution. My argument is that, in the light of the facts as recorded, the experience should show us how to improve on the present.

The history of England, which is largely the history of civilization, especially as it relates to political economy—the relation of the individual to the distribution of goods—shows that as an outgrowth of the feudal system there grew up there what might be called, and is technically called, "the manorial system" in the production of agricultural products and their distribution, and (in the towns) the "merchants' guilds" and "crafts' guilds." Under this regime, which extended over about three centuries, all competition was suppressed by organizations formed for the purpose. The selling prices of many things were fixed by law, and justices of the peace were authorized to meet, in their respective localities, annually, and fix the wages to be paid to labor. It was the invention of the steam engine, and the multitude of mechanical devices that its use stimulated, cheapening production, and revolutionizing methods of trade, that uprooted this system of government control of prices.

England was the first to avail herself of the advantages of the substitution of machinery for hand labor in manufacturing, and her energy in that direction made her the greatest manufacturing country in the world during the 19th century, until her laurels were taken from her by the United States.

The last of these price-fixing laws were not repealed until about 1815. The Chief Advocate of governmental non-interference in business transactions was Adam Smith.

Smith's theory of government was that (1) it should protect society from all external violence; (2) protect society from internal injustice; (3) it should promote those public works and utilities, the private ownership of which would be detrimental to society. He claimed: "All systems, either of preference or restraint, being taken away, the obvious simple system of natural liberty establishes itself of its own accord." In accordance with the teachings of Adam Smith and those who espoused his philosophy, both England and this country have ever since pursued the policy of non-interference in business, except so far as, by the exercise of the police power, the protection of the weak against the oppression of the strong was necessary in the interests of abstract justice, or for the preservation of the health and welfare of the race.

And now, gentlemen, I am coming to the climax of my argument. A laborer's wages is the profit on his capital, and we all know his capital is labor only. Then, if we ask for fixed prices on goods that we dispense, we should ask for fixed scale of wages for the laborer. He is entitled to that, just as much as we are entitled to our fixed price; and there is no good reason why he should not have it, except the same old story over again, the same old saying and business misunderstanding, namely: "The supply and demand of labor shall regulate the price thereof." There never was a more ridiculous, selfish, hard-hearted, unchristian-like statement ever made.

There is no justice or reason in such a proposition. If there are a hundred men who stand ready to take my job, that is no reason why I should be compelled to work for less than living wages. Would it be reasonable to say that, because I have a watch to sell, and a thousand other men had the same kind of a watch for sale, that I must sell my watch at no profit?

We must be fair about the matter, for, remember, if we ask for a law that is not just and reasonable we will never get it. If it is just and reasonable that we establish a fixed minimum selling price, then it is just and reasonable that we have a fixed minimum wage scale for every man that works.

Business Letters Used in Conjunction With Newspaper Advertising.

DEAR FRIEND: For more than 20 years we have been repairing watches, clocks and jewelry, improving on old methods each year, employing only the latest devices and most skilful workmen, our idea being to turn out the best work possible.

Our watch repair department is well equipped to handle all kinds of work, including the most complicated watches. When you bring your watch to us, you may depend upon its being properly attended to, and returned to you, in a reasonable length of time, in good order.

We clean and repair clocks in the most thorough manner. If your clock is out of order let us attend to it for you.

We carry a complete line of precious and semi-precious stones at all times, for special work, and replacing lost sets. No article of jewelry is too small, or too large, to receive our careful attention. When you have a very difficult piece of work, bring it to us. We succeed when others fail.

We test your eyes, free of charge, fit glasses, duplicate lenses and repair all kinds of eyeglasses.

The fads in jewelry which will be worn more than ever this season, such as bracelets, lavallieres, necklaces, lockets, chains, belt pins and buckles, cuff pins and buttons, hat pins, veil pins, scarf pins, combs, fobs, etc., are all to be found here in the newest patterns.

Call and inspect our line of diamonds, watches, clocks, jewelry, silverware, etc., at your convenience, and don't forget our repair department. A. J. REINHARDT,

Lincoln, Ill.

* * *

Dear Sir:—

No doubt you have a watch, clock, gun or something of the kind out of working order, and which you have been putting off until the Fall of the year to have repaired.

As the time has arrived I'll be glad for you to look around and see what you have that needs repair and bring it in to us and see how nice we will fix it up for you.

I'll thank you very much if you will do me the favor to tell your neighbors and friends to come to my store for anything they need in my line.

No doubt you and your folks will be coming to Monroe quite a lot just now, and I want to make my store your stopping place when you come.

Let us take care of your bundles, robes or anything of the kind until you get ready to go home.

I will take pleasure in doing anything I can to show you that I really appreciate your patronage and friendship.

Hoping to have you stop in and see me any time you are in town, and thanking you for any patronage you can give me, I beg to remain,

Yours truly,

B. P. McCORMICK,
Monroe, Ga.

Wm. Plackner, Benson, Minn., has moved his jewelry stock into the Brenden building, where he has better facilities for his increasing business.

A Canadian Invasion! by America's Leading Jewelry Auctioneer

James L. Hand

Now conducting a number of Sales for Representative Jewelers of Canada
14 Maiden Lane, New York

MY first sale was for Frank L. Thompson, of Moncton, New Brunswick. Read what he says: "I wish to express my entire satisfaction with the way in which you conducted the sale for me, and also to thank you for the many new friends you made for me through it. It has been a great pleasure to me to hear on all sides expressions of satisfaction from those who patronized our auction sale. My reputation and business to-day stand higher than ever in the public estimation."

Brother Jeweler, it is such sales as this that have made me the leading auctioneer of the United States. The jobbers will tell you that a "Hand" sale is always a success. I am conducting sales this summer throughout Canada, but will be ready September first with my trained assistants to take charge of your fall and winter sales.

If you desire the services of the best and most reliable auctioneers in the United States "get busy" at once and write for my "auction folder." It tells you all about it. Don't wait, for I will soon be dated up. I can reduce your stock without loss; let me tell you how. Correspondence confidential.

RETAIL JEWELERS ADVERTISING

The Law of Advertising and Sales.

Address delivered by R. Fay, of the Elgin National Watch Co., before the Convention of the Minnesota Retail Jewelers' Association in Minneapolis.

The first law of advertising and sales depends upon the study of human nature. Study men more than books, their habits, their wants, their ideas, their passions and their prejudices. For this study depends the first great law—appeal to the individual.

The second great law of advertising and sales depends upon local conditions. In my travels which have extended over nearly every State and territory, I have found that human nature is the same, but the buying power of each individual community is regulated by certain local conditions, which you, Mr. Retailer, are in closer touch with than any outsider can possibly be. The Elgin National Watch Co. employs what are known as missionaries, who travel the world over, feeling the pulse of the various communities in order that we may better our product and make our advertising an appeal that will meet the needs of your individual customers. I find many instances where the local dealer knows less about local conditions than he should to appeal to his customers in language that will bring them into his store as a direct result of advertising.

Good advertising does not bring immediate results. If it did newspapers, magazines, street cars and bill posters would receive more money than the United States Government could supply. They all can point to their success—they all have their failures. A good advertising always pays, but it takes time and patience before the goal is reached.

Big general retail stores, of course, get quicker results than others, because the necessities of life must be purchased daily, but a little patience and keeping everlastingly at it will bring success to folks like you and my people, who sell goods that really make life worth living. After all the keynote of successful advertising is simplicity, integrity and alert merchandising methods.

Establish a definite advertising policy. If you can spend \$500 or a thousand or two thousand plan your campaign accordingly. Whatever it is plan it out and take time to spend it right. The advertising managers of the small newspapers tell me that you let them write your copy. It seems to be a question of filling space—not selling goods. If you have more than one paper in your town select the one that reaches the homes. An evening paper of New York has a slogan which you and I can do well to remember: "One paper in a home is worth a thousand on the highway." I would rather have the Elgin watch

advertisements reflect the rays of the old oil lamp in the living room than the sun's rays on a street corner. I never buy space in magazines with a large news stand circulation. It's the homes we are seeking. We must play a melody of dollars and cents upon the heart strings of the masses.

The jewelers all over the country are complaining because small space does not pay, and it is no wonder, considering the way it is used. Small space once in a while will never pay, but small space in every issue of your paper will have a trade-building power that will result in more profitable customers.

I have found retail jewelers who pay little or no attention to their advertising copy, either leaving it to the local paper or only changing the copy when they had time to write it. Don't neglect the greatest feature of your promotion campaign. Set aside a certain hour in the morning and write your advertisement with the same care that you use when buying your goods.

As it stands to-day, the average consumer enters a jewelry store with the bargain idea in her head. She virtually sells herself the goods at a reduced price. This law would put every man on a firm footing. The price, the quality, the manufacture or the reasons for selling could not be misrepresented by anyone. Each would get a good profit and the consumer would learn that the jewelers were in as legitimate a business as the grocery store on the corner.

Don't describe watches, bracelets, cut glass and silverware with circus adjectives. Use small words and short sentences. A pause after a short, convincing argument has a greater selling power than a whole paragraph of description. If advertising could be written in words of one syllable your business would grow faster.

The story is told of a man who wished for years he might hear Daniel Webster speak. His wish was gratified late in life, and, in telling about it afterward, he seemed to be amazed that he understood every word the great man said. You will find the people will talk about your store if they understand every word of your advertisement.

Let your customers be your first thought when writing advertisements. Select the strong and timely points of your goods and present them first. You must talk to the point. Your sentences must say something.

Did you ever stop to think that a number of people every day read your advertisement for the first time. This illustrates the

law of impression. Each advertisement must be written with this in view. The man who is a stranger will not read between the lines; he will judge you and your store by the impression created by your advertisement.

Make your advertising creative; make two customers where only one existed before. Talk to the people in language they understand. When you're fighting competition study your competitor's methods. Nine times out of 10 he is familiar with yours and is striking your weakest point.

I believe in organization; I believe in the work the organized jewelers are trying to do, the reforms that they are bringing about, the stand they are taking to promote the business of the legitimate jeweler. It is going to be a long fight and a hard one. A hundred hindering trifles hang to the coat-tails of every great undertaking, but with the right co-operation they can be used as a spur to greater activities in place of a hindrance to present accomplishment.

The position of the retail jeweler to-day is not unlike the old-time farmer. He took a sack of grain under his arm and went into the field, and with one splurge scattered it broadcast and went back home and waited for the harvest. It came in time, but only here and there a head of grain appeared among the grass, and the crop just allowed him to eke out an existence.

To-day the farmer plows his field; he harrows it and he rolls it. Great industries supply the best fertilizer; then the ground is ready for the seed, which is drilled into the soil in regular rows. Every seed is made to count. The modern farmer does not wait for the crop. He cultivates, and removes weeds from the growing grain. If it is a dry season he waters it. In short, every effort is made to make the work count. What is the result—a great field of full-grown grain—harvests that are making the farmer America's wealthiest citizen.

Mr. Retailer, you are the merchant farmer. Your territory is your field; the study of conditions your preparation. Sow your advertising seed well; make every booklet, advertisement and window display count. When your people begin to show interest it is but the growing grain in the field of business. Keep after them; cultivate their desires; help them to grow. The result will be a harvest of dollars.

Your fellow merchants in other lines are observing these simple laws of advertising and sales. "Go thou and do likewise."

The Philadelphia Art Metal Co., Camden, N. J., has been incorporated to manufacture metal novelties and specialties with a capital of \$50,000. The incorporators are David M. Patton, Jacob J. Staley and Albert W. Staley, all of Camden.

At the invitation of the Advertisers' Club of Louisville, Ky., advertising managers from various parts of the country assembled, Wednesday, Thursday and Friday of last week, in Louisville, at the fifth annual convention of the Associated Advertising Clubs of America. The speakers included some of the most prominent and noteworthy advertisers in the United States.

Rhyton and Other Drinking Vessels of the Ancients.

By CHARLES A. BRASSLER.

THE Greeks were not over-fond of the pleasures of the table. The real meal was only long enough to satisfy hunger: the central point of the festive banquets was the symposium, or the drinking revels, attended by cheerful converse, music or merriment. The tables were cleared away, the vessels washed with fragrant soap and libations offered to the divinities of sociability and health. The guests reclined on couches and the cup went merrily round. The

of manifold forms and materials; most frequently of clay, beautifully painted, but also of silver, electrum and gold. The heroes of Homer put great value in splendid drinking vessels. Among the treasures found by Dr. Schliemann in the second city of Troy were cups of gold and electrum, one in the shape of a boat with broad projections on each side. The golden drinking cups of Mycene and Amyclae, among them the cup with the capture of the bulls, are the finest metal work which has come to us from that age. With the Romans luxury became degeneracy. Golden cups were covered with gems, so that Pliny

The drinking horn was a favorite vessel at feasts. The hollow horns of the ruminant animals are certainly along the oldest forms of drinking vessel, but the Greeks thought it a barbarous custom to drink out

RHYTONS, GRAECO-PERSIAN, FROM THE LOUVRE, PARIS.

SILVER RHYTON, B. C. 500.

of the horns of animals. Aeschylus had the Pauhaeber drink out of silver horns with gold mouthpieces; and at the banquet given by the Thracian Seuthes to Xenophon, the wine was tasted for the Greeks

WINE CRATER.

great crater, or bowl, of metal or clay held mixed wine and water, sometimes hot, sometimes iced; and youthful cup-bearers carried it out with long-handled *kyathos*, or the pitcher-shaped *anochoe*, and filled the guests. The best throw of the dice decided the choice of the ruler of the feast. The master of ceremonies. He fixed the rules of procedure, which were governed by strict usage, dictated punishments for the violation, and arranged the order of songs and dances. The drinking began with small little cups, which required careful sipping, but larger ones soon followed, which must be emptied in one draught to the health of the right hand neighbor.

complained, "We drink from a mass of jewels; we cover our cups with emeralds, and please ourselves, for intoxication's sake, with holding all India in the hand: the gold is only an accessory."

One of the oldest forms of drinking vessel, perhaps an imitation of the bottle gourd, was the two-handled *carchesion*, moderately curved inward at the sides. The *cantharus*, on a high foot, was dedicated to Dionysius, while the *skyphos*, shaped like a cup, was the drinking vessel of Heracles. The *kylix* was shaped like a champagne glass, except for the two handles, the *phiale* had no foot, but was a shallow vessel without handles and had bosses in the center.

in horn. From the horn the refined taste of the Greeks made the *rhyton*, a curved vessel in the shape of a horn, ending in a point with a nicely modeled animal's head. According to this head the rhyton had its different names of "vulture," "lynx,"

the drinking vessels of the ancients were

The Proof of the Pudding

The proof of ability in any line consists in doing the things that others have failed in doing.

This we have done repeatedly, and can furnish the proof. We sold \$20,300 in one sale where another auctioneer had thrown up his hands after selling only \$3,000.

In another sale we sold three times as much as the combined sales of two other auctioneers, and realized much better prices.

We have repeatedly taken dead sales—the result of the work of incompetent auctioneers—put new life and vim into them, and closed out the stock at a profit.

However, it is not the large amount of goods sold that counts so much as the net results in the profit and loss account—the small amount of new goods used, compared to the percentage of your goods, and your dead stock in particular, that are disposed of, and that larger and more important question of the after effects of your auction sale upon your customers, and, consequently, upon your future trade.

We believe we have solved the problem of how to conduct an auction sale so it will be to your profit, in both dollars and cents, and in the building up and permanency of your regular business.

We will furnish you evidence that sales, at this time of the year, when regular business is dull, can be made as profitable as during the seasons when regular business is booming.

You can do a holiday business during the hot months.

We would be pleased to talk with you about it.

"dokey," "horse," "boar," "elephant," etc. But the most common, having probably some connection with the worship of Dionysius.

There were different ways of drinking from the rhyton. When the symposium was well under way the order would be

OENOCHOE.

begin to "empty the rhyton," and the contents were drunk at one draught, from the top opening, after the fashion of the barbarians. But it had sometimes also a small opening at the point, through which the wine could be drunk in a delicate stream, as shown in a Pompeiian painting. Or the

CANTHARUS.

The cup could hold the full rhyton and fill it delicately balanced phiale from it.

Soldering, Welding and Brazing.

(Summary of a lecture by NOEL HEATON, B.Sc., before the Central School of Arts and Crafts, London.)

(Continued from issue of Aug. 18.)

SOLDERING.

The lecturer turned to the practical aspect of soldering, and said that a very important point was that the surface of the metals must be quite clean. Two pieces of glass, slightly powdered with dirt, were again used as an illustration, and it was pointed out that the first thing necessary was to remove any dirt from the surface. But that was not enough. In the case

of most metals the tendency to combine with oxygen now came into play. Such metals might not combine very easily at the ordinary temperature of the air, but directly heat was applied, they at once began to combine. The effect would be that a film of oxide would be formed on the surfaces of the two bodies to be joined, which would act just as if the metals were covered with a film of dirt. That had to be got over, but how? There were two ways. First, if they could get some material which combined with the oxygen more readily than did the metal, this other substance would take away the oxygen and leave the metal clean. That process was called reduction. Suppose they took a compound of carbon: that would take the oxygen away from the metals. They could not use carbon itself, because being a solid, its presence would be just as troublesome as that of the oxide itself, but they could get compounds of carbon that melted when they were heated. Tallow and resin were used for the purpose. That was all right for such metals as lead or tin, because they were low down in the scale, and were not easily oxidized. When they came to such metals as iron, however, carbon was not strong enough. If they tried to solder two pieces of iron with tallow as a flux, they would find it would not work. That was because the tallow had no more tendency to combine with the oxygen than had the iron. They then fell back on another process, which acted in quite another way. The oxide formed in a sort of skin on the surface of the metal. If that was melted as fast as it formed, it would, of course, run away, leaving the joint free for the solder to run in. One could use for this purpose such a substance as chloride of zinc, made by dissolving zinc in hydrochloric acid (or to use the workshop phrase by "killing spirits of salts"). This salt melted at a very low temperature (262 degrees Centigrade, or 500 degrees Fahrenheit), and had the useful property of dissolving metallic oxides. So now they had got over the difficulty with the metals that could be reduced, and also with those that could not. But suppose they wanted to braze anything, or to solder an article which was to be enameled and required a very hard solder. In that case chloride of zinc would not do, and the reason was that its boiling point was 710 degrees Centigrade (1,300 degrees Fahrenheit), and as brazing solder only melted at somewhere about 1,500 degrees Fahrenheit, it would, at the temperature required for the brazing, boil away like so much water. It melted the oxide all right, but when subjected to great heat, boiled away and left it behind again. But, fortunately, they had another substance in borax, which only differed from a very soft sort of glass in being a definite chemical compound. It was easily melted, and dissolved the oxides in the same way as the chloride of zinc. When using a very hard solder, they could use a little glass if they liked. It was quite possible to use water glass as a flux for soldering at high temperatures.

SOLDERING ALUMINUM.

With reference to the special case of soldering aluminum, the lecturer said that it had never been satisfactorily solved how this could be done. Aluminum was not af-

fectured by oxygen, and they would therefore think it was easy to solder. But it remained bright from quite a different reason to nickel and silver. The reason it remained bright was not really because its affinity was weak, but exceptionally strong. When the surface of aluminum was cut, it was immediately covered with a film of oxide, which, having the same expansion as the metal, did not flake off, but protected the surface from further oxidation again, and being colorless and transparent, the bright metal was seen through it just as in the case of lacquered brass. That oxide would not dissolve, and it could not be reduced, it was always in the way, and formed a film over any surface desired to be joined, and that was why it was almost impossible to solder. Passing on to consider the process of welding, Mr. Heaton reminded his audience that he had already mentioned that it only differed from soldering in that the two metals to be joined were united without the intervention of a solder or by using strips of the metal itself as solder. Of course, in the ordinary process of welding, the metals were heated until soft, and then hammered together, borax being used to remove oxidation in the manner already described. Of course, that could only be done in the case of fairly heavy work, and not for delicate or intricate operations, and it was only applicable to metals like wrought iron, which did not melt suddenly, but passed into a soft plastic state on heating.

OXY-ACETYLENE WELDING.

Through the kindness of the British Oxygen Co. he had been able to show them in actual operation a new process of welding, which he thought should prove capable of extensive application in art metal working. It consisted in heating the metal locally, where the joint was to be made, to a very high temperature, so that it fused and ran together, forming an absolutely homogeneous joint. This was accomplished by means of a flame produced by burning together oxygen and acetylene gas in a specially constructed blow-pipe. A temperature of about 6,000 degrees Fahrenheit was produced, at which wrought iron ran like water, and an additional advantage was that the flame formed a reducing atmosphere, owing partly to the large amount of oxygen required for the combustion of the acetylene, which was a compound consisting of equal proportions of carbon and hydrogen. No flux was necessary for the welding, therefore, as oxidation of the metal was entirely prevented.

Any metals could be welded by this process, the only difficulty being with such metals as copper. The reason of that was that a very high temperature was required at one place without affecting the other parts. If they were working upon a very large article, there was always a tendency for the heat to move from one part to another before it melted the desired portion. The difficulty was very great in the case of copper, because of its great conductivity for heat. As had been shown in a previous lecture, the conductivity of copper as compared with iron was as 76 to 13. Platinum, for the same reason, was easy to weld, because its conduction was low.

THE END.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
 Attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2326.—**Silvering Inside Glass Tube.**—I wish to coat the inside glass tube with silver. Kindly tell me how to proceed. S. I.

ANSWER.—The following formula will do silvering the inside of a glass tube. There are two solutions, A and B. A consists of 10 grammes of Rochelle salt in a liter of water. B consists of five grammes of nitrate of silver dissolved in a liter of water. Add, gradually, three grammes of strong ammonia, so that the precipitate just formed is dissolved. Add enough water to make one liter. Mix equal parts of A and B. The glass should be perfectly clean and at a temperature of 25° or 30° C. Immerse the tube with the mixed solution and let it remain for 30 minutes, and the deposit will be complete. This is serviceable not only for glass tubes, but the same mixture can be applied to flat pieces or bowls.

QUESTION No. 2327.—**Turning and Working Jet.**—What kind of tools must be used to turn and work jet? T. A.

ANSWER.—The tools used for turning jet are beveled from both sides like a turner's wood chisel, only they are held with the edge horizontal and scrape rather than cut. Their edges are very thin and keen. A small gauge, also beveled from both sides, is used for roughing out. For polishing use first fine emery cloth, then charcoal dust and soft soap on a flannel. Finish with the same, only adding more soft soap. Sometimes rotten-stone on the hand is used as a finish. No heat is used.

QUESTION No. 2328.—**Method of Bronzing Plaster.**—We have several plaster pieces that we want to bronze to a brown-green color to match a clock we have in our shop. B. & P.

ANSWER.—To bronze plaster proceed as follows: (1) Boil linseed oil with so much potash lye until a soap, clearly soluble in hot water, is produced, which is diluted with water. Into this fluid pour a dissolved solution of four parts of sulphate of copper to one part of sulphate of iron as long as a deposit is produced, which is filtered and washed and dried. (2) Also boil 3,000 parts of linseed oil with 750 parts of litharge. Strain it hot off the undissolved litharge and melt in the fluid 750 parts of the precipitate obtained from No. 1, together with 100 parts of wax. If the plaster casts are painted they will assume, after polishing, the color of brown-green bronze.

Following the death of Louis Frobish, of New York, Ill., the business will be discontinued.

Simplified Electroplating for Jewelers.

(Written expressly for THE JEWELERS' CIRCULAR—WEEKLY by "R. B.")

(Continued from issue of Aug. 18.)

PREPARING GOLD-PLATING SOLUTIONS.

WHILE all kinds of plating solutions are purchasable in the market, ready made, it is nevertheless our earnest desire to thoroughly treat in these columns of the making and preparation of all kinds of plating solutions, so that those who followed the previous issues may be thoroughly versed in every branch of the art of deposition of metals by the electro-plating process.

In purchasing ready-made solutions, or what are known as plating salts, one often finds oneself in the position of buying a "cat in a bag." Especially is this true in the case of gold chloride, salts or solution. One is frequently totally blind as to its intrinsic value. But the financial consideration is a mere side issue. What is of paramount importance is the indispensable knowledge as to the contents of the plating bath. For it frequently happens that a solution does not yield to the wishes of the operator. It may deposit too slowly or too quickly, too light or too dark in color, hard or brittle.

The operator is called upon to set matters right. Is it necessary to add metal, gold or silver, as the case might be, chemicals or water? To decide these questions intelligently with a reasonable degree of certainty, it is absolutely necessary to know the contents of the bath, so that the operator may add that in which the bath is deficient. This the operator cannot know unless he prepared the solution himself and is fully and intimately acquainted with its component parts. Thus it is readily seen what an advantage it is to prepare plating solutions in one's own establishment, instead of buying same in the open market.

For the above reasons the following directions are given for the making of plating solutions:

ROMAN COLORING SOLUTION.

Take three pennyweights of fine gold, 14 karat, rolled very thin. With a pair of scissors cut them into very small pieces. The smaller the pieces the sooner they will dissolve by the acid to be added. Place the cut-up gold in a porcelain capsule or china dish, add one part of nitric acid and two parts of hydrochloric or muriatic acid; mix well and allow to stand a few minutes. Having permitted the solution to rest, place the dish over a very slow flame, as it will be found that the heat will accelerate chemical dissolution of the metal.

Care should be taken to place the dish containing the gold and acids under a flue or chimney to carry off the fumes, as their inhalation is very injurious to health. When the gold is completely dissolved into a liquid, turn off the heat and permit the solution to cool and rest for a few minutes. When cold add very carefully, at first only drop by drop, strong water ammonia—26 per cent. Violent effervescence should be guarded against to prevent waste and loss of the precious metal. The addition of ammonia should be continued slowly until the acid is incapable of effervescence—in the language of the trade, until the acid is "killed."

It will be noticed that upon the dissolution of the gold by the heated acid the solution remained transparent, but that after the addition of the ammonia it will become a thick yellow paste. In this condition it should again be allowed to stand a few moments in order to complete neutralization. That done, a small quantity of hot, clean water should be added and well stirred. It should now be poured into a porcelain funnel lined with heavy gray filtering paper. Several quarts of hot water should be run through, thus giving the gold chloride a thorough washing in order to completely separate the chemicals from the gold chloride.

Since what has happened to some may happen to others, forgetfulness being common to all, should the operator forget to remove the capsule from the heat, the acid being all expelled and the operation at an end, the gold will become reduced to the metallic state, which can readily be ascertained by the mass acquiring first a yellow and next a dark brown or bronze tinge. In such a case it will be necessary to add a very small quantity of the acid originally employed, in the same proportion, and the metal will again instantly become dissolved. The operation of filtration being performed as indicated, two quarts of water should be heated to the boiling point; one ounce of cyanide of potassium should be dissolved in this hot water. The chloride of gold should be placed in the hot cyanide water and well stirred until the chloride becomes perfectly dissolved and the solution becomes clear and transparent.

If a sediment forms on the bottom, pour off the gold solution in a bottle and add a small piece of cyanide to the remainder and stir well. It will then be found that the sediment has entirely disappeared. This latter part of the solution should be kept separate from the first, for the reason that the sediment might have contained a small proportion of silver. The latter solution should therefore be used for preliminary plating. The first solution is now ready for use. This preparation is an excellent solution for what is known as Roman coloring, the color frequently adapted for diamond ring mountings, neck chains, watch movements, clock ornaments, etc. A little yellow prussiate of potash may be added to obtain a deeper hue of yellow. In using this solution a fine gold anode should be used—24 karat. This solution should be used warm.

PREPARING GOLD SOLUTIONS.

The dissolution of metallic gold for the gold-plating bath may be accomplished

SMELTING
FOR THE TRADE

Workshop Notes Department.

Following economic and convenient process.

Put three quarts of water to the boiling point in a china capsule. Dissolve therein one ounce of chemically pure cyanide of potassium. Four one quart of this cyanide solution into a tubular porous cup, such as frequently used for electric batteries. The porous cup measuring from about five inches in height and one and one-half to two inches in diameter should be employed. This cup should be placed in the china capsule.

The solution in the capsule and that of the porous cup should be at a level. An additional half ounce of cyanide of potas-

CASE FOR DISSOLVING METALLIC GOLD.

The above illustration shows a china capsule, in which is placed the porous cup containing a strong cyanide solution. A copper or carbon plate in the capsule, to which a wire is attached is connected to the zinc or negative pole and a gold strip in the porous cup is connected by wire to the carbon or positive pole. This arrangement is to be maintained until the gold strip is dissolved in the cyanide contained in the capsule, which is treated.

The porous cup should be dissolved in the cyanide solution contained in the porous cup. It will be noticed that the solution in the porous cup is stronger in cyanide than the solution in the china dish. This is done for the reason that the solution in the china dish, as will appear, is to form the gold-plating bath and free cyanide in the gilding bath has a tendency to yield an undesirable pale color.

An excess of cyanide of potassium solution contained in the porous cup will have no deleterious effect, as it is not used for the plating bath, and its electrical strength facilitates conductivity of electric current, thus accelerating the dissolution of the metallic gold.

A strip of copper or carbon attached by wire to the zinc or negative pole, known as the cathode, is to be placed in the porous cup, while a strip of fine metallic gold is to be attached to the positive or anode pole. The porous cup should be taken not to immerse the porous wire along with the gold, as the porous wire will dissolve with the gold, thus rendering the bath impure. For this reason platinum wire is preferred, as platinum is dissolvingly slow in dissolving and will give the gold attached to it without being in the least affected. During this process the solution in the capsule should be continued warm.

It will now be seen that while the arrangement remains in action, whether a zinc battery or an electric dynamo be used, the copper in the porous cup draws

from the gold anode and into the cyanide contained in the capsule, while deposition of the gold upon the copper or carbon in the porous cup is checked by the cup itself, thus resulting in the dissolution of the gold in the cyanide solution contained in the capsule. After the gold is completely dissolved the cup is raised from the capsule and its contents used up with old gold or copper solution, while that of the capsule will contain the fine gilding or coloring solution. This process is one which claims but little attention, and takes care of itself after preliminary preparation, and is therefore the most economical process. The resultant solution is to be used warm when plating.

A gilding solution which may be employed both for electro-gilding and gilding by immersion—that is, by simply dipping the article to be plated into the solution, the article having first obtained the necessary preparation, is made as follows:

Reduce six pennyweights of fine gold to chloride as described previously. Dissolve the chloride in two quarts of hot water containing one-half ounce of pure potassium cyanide.

Stir well until this solution is absolutely clear and the sediment disappears. In a separate vessel heat two quarts of water to the boiling point and first dissolve therein 12 pennyweights of phosphate of soda and add thereto three pennyweights of bisulphate of soda and stir well. Allow the solution to cool; when slightly warm, mix this solution with the gold solution first prepared, and after moderate stirring allow it to rest for an hour, when it will be ready for use. This solution, it will be noticed, renders a very pleasing deep color when used for electro-gilding. A lighter color may be obtained when used for simple immersion. This solution is especially adapted for gilding brass clock parts, watch movements and cheap jewelry. When used for plating by immersion it should be heated almost to the boiling point. When not in use the solution should be kept well covered and free from dust.

It may be well to remark that satisfactory tints can be produced only as long as the solution continues rich in gold, and therefore should not be worked to exhaustion. This is true of all metal solutions, irrespective of the metal of which it is made.

To prevent impoverishment and to avoid demetalization it is suggested that gold anodes be used, and not platinum, so as to replenish the bath during the plating process.

It was at one time regarded as an extravagant method, as the gold anodes thin out and disappear, while the platinum anodes last for a long time. But this fallacy was soon realized, for it is far costlier to replenish the bath by additions of gold chloride.

PREPARATION OF PLATING SOLUTIONS.

It frequently happens that the jeweler or watchmaker has occasion to do nickel plating. Especially is this true in reference to such articles as brass watch cases, spectacle frames, watch movements and bicycle parts. It is therefore deemed necessary to treat of the preparation of nickel solution and nickel plating.

Compliance with the following directions will give one a splendid working nickel bath:

Dissolve in one gallon of water moderately heated 2½ pounds of double nickel salts of ammonia; the water should not be allowed to boil, as it will evaporate the ammonia it contains, which is indispensable.

To facilitate dissolution it should be well stirred, or the salts may be placed in a perforated earthen basket, suspended on a wire to the side of the tank or jar containing the solution.

In another gallon of warm water dissolve one pound of single nickel salts of ammonia. When the single salts are dissolved add one ounce of boracic acid and stir well.

That done, mix the separately prepared solutions and give them a thorough stirring; allow to stand for about a day, when they will be ready for use. A current strength of about three to four volts will give a good adhesive deposit of uniform thickness.

This solution will deposit nickel on iron and steel directly, no previous copper plating being necessary. On brass and copper it will readily deposit a nice white coat of nickel of lasting quality. When a heavy deposit is required the article should first be well cleaned. The surface must be free from grease or stains of any kind.

The article before being immersed in the nickel bath should be plunged into hot caustic potash for a short while, and upon removal quickly dipped into fresh running water.

If the articles to be plated are of brass or copper they should be similarly treated, and before placing them in the bath they should be quickly run through cyanide water, which has the tendency to remove any formation of oxidization or discoloration from the surface of the articles to be plated.

Immediately upon removal from the cyanide bath the articles should be quickly plunged into fresh running water to remove cyanide. The article thus treated is now ready for the bath. When placing work to be plated into the bath you should proceed with haste. The entire body of the article should be submerged without delay and hastily connected to the cathode, for the reason that the bath contains a considerable quantity of sulphuric acid. Oxidization will set in at once, and thus prevent a cohesive deposit—a situation which should be carefully guarded against.

(To be continued.)

Nathan Mendlow, of Mendlow Bros., 36 Central Square, Lynn, Mass., narrowly escaped death by drowning, a short time ago, after having been thrown into the water, as a result of the capsizing of a boat, in which he was standing. He was rescued by M. R. Connelly.

The Paducah Jewelry & Optical Association is the name of a new organization which has been formed in Paducah, and is composed of jewelers and opticians. The officers are: President, M. Steinfeld; vice-president, W. M. Warren; secretary, H. H. Boyson, and treasurer, J. L. Wanner. A meeting of the association is scheduled to take place to-day, Aug. 25.

H. J. HOOPER,

New York's Undisputed Leading
Jewelry Auctioneer

Don't be led into the mistake of negotiating for the services of an auctioneer who will send a substitute to conduct your sale.

Substitutes are wholly incompetent makeshifts who work more mischief than good. Fifty per cent. of this auctioneer's commission goes to the substitute, the other fifty per cent. to the man he represents — *the one you really employ, but don't get.*

I conduct all sales personally, never under any circumstances sending a substitute to represent me.

My charges are conservative, your interests are fully protected, your stock quickly disposed of, and a satisfactory profit on the sale assured.

Write, wire or telephone me for dates and particulars.

The Long Awaited Has Arrived

At last a satisfactory Watch and Clock Oil can be obtained. One which will hold its lubricating efficiency which will not gum — which will not evaporate — which will not become rancid or discolor — which will not corrode the pivots — which does not contain a trace of acid. The solution of the watchmaker's difficulty has been found in

Fulcrum Watch and Clock Oil

Never has any product met with such immediate success as FULCRUM OIL.

ARE YOU USING FULCRUM OIL?

If not, you are one of the few watchmakers in this country to-day who are not. Jobbers will tell you that the sales have been enormous, and they will tell you that every man who has tried it, has re-ordered. It's the only Watch and Clock Oil ever known which is absolutely free from acid, AND WE CAN PROVE IT.

FULCRUM OIL COMPANY - - Franklin, Pa., U. S. A.

 KNOWN THE WORLD OVER

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal — plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag — *the blades are fine.* Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray — contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezer over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped *firmer* and *better* than by any other kind of stone tweezer.

Second. It is purposely made a "Bayonet" in shape because any stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, *easier*, *quicker*, and with much less *exertion* than when using any other style of tweezer.

It has an *extra* part directly above the crossing points to permit the holder to examine the stone without fear of *releasing* it accidentally, which frequently occurs when using the ordinary style crossing tweezer.

Price, Each, \$1.00

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting Roller Remover. The work always plainly in sight. The roller is held in the grooved jaws of the pliers. The adjustable head which holds the screw is quickly brought in position over the staff and the most obstinate roller will instantly yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

GRINDING OUTFIT No. 105

LEATHER DISK. SMALL DISK, METAL.

CARBORUNDUM & EMERY PAPER DISKS.

This outfit consists of:

1. Two interchangeable steel disc wheels, 3/4" and 1 1/2" in diameter.
2. One interchangeable flexible leather disc wheel, 2 1/2" in diameter.
3. One adjustable hollow spindle for holding the above disc wheels.
4. Eight different grade emery paper discs, 2 1/2" in diameter.
5. Four carborundum paper discs of different grades, 2 1/2" in diameter.
6. Eight different grade emery paper discs, 4" in diameter.
7. Four carborundum paper discs of different grades, 4" in diameter.
8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete.....	\$1.
Separate small emery discs.....	per doz.
" large.....	" "
" small carborundum discs.....	" "
" large.....	" "

This new grinding device should find favor with the trade, being thoroughly practical and complete for all purposes, such as grinding steel, glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the watchmaker, jewel optician, dentist, lock or gunsmith, platers and kindred trades. It will found much more economical than solid emery and carborundum wheels. assortment of solid wheels of twelve different grits would necessitate outlay of ten times the cost of this outfit, not taking into consideration the trouble of truing up the wheels when worn or glazed.

Full description and directions accompany each outfit.

For Sale by all Jobbers in the United States and Canada.

Advertising That Counts

IN THE TWO following pages will be found a

COMMUNITY SILVER *and* RELIANCE PLATE

advertisement in four colors. In November this advertisement will appear in full color on the back cover of the "Delineator," "Designer" and "New Idea" magazines; reaching in these three papers over five million women. It will also appear in black and white in many other important publications.

This advertisement in color marks a radical departure from the ordinary. Moreover, its prominent cover position insures its being seen by millions of readers, while its strong buying appeal will make sales.

This is your opportunity. Take advantage of it. Carry RELIANCE PLATE *in addition to* COMMUNITY SILVER and increase your sales by connecting your store with "Our Advertising That Counts."

RELIANCE PLATE

The New Low-Priced Plated Ware
Guaranteed for 10 Years
6 Teaspoons, 90 Cents

Either will make a beautiful and lasting gift. Many attractive designs
at your dealer's. A wide assortment of pieces at proportionate prices.

ONEIDA COMMUNITY, LTD.,
FOUNDED IN 1848

ONEIDA, N. Y.

D ABOVE ADVERTISEMENT will appear in full color on the back covers of the November issues of the "Delineator," "Designer," and "New Idea" magazines. Also in black and white—together with other attractive Community Silver advertisements—in many important magazines.

A Clean-Cut Selling Proposition

COMMUNITY SILVER

is the best quality made. It sells readily and our restricted price on it insures good profit to the dealer who carries it. In fact, Community Silver is the ideal Jewelers' line. B

RELIANCE PLATE

fills a long-felt need of the Jewellery trade—a thoroughly reliable, popular priced plated ware at the lowest cost, offering consumers who cannot afford Community Silver the greatest possible value.

Through years of extensive advertising Community Silver has become known to every consumer in the country. Reliance Plate, now advertised with Community Silver, has immediately profited by this wide celebrity, and by the Oneida Community's well-known reputation for honest values.

Moreover, the Dealers' profit on Reliance Plate is the same as on Community Silver, and is absolutely protected on both lines.

With saleability, satisfaction and profit assured, the dealer who carries RELIANCE PLATE *in addition to* COMMUNITY SILVER has a complete and clean-cut selling proposition.

THE LAUREL

TRADE MARK
STERLING 1800

☐ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

☐ Made on the popular **MARTHA WASHINGTON** shape.

☐ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

☐ Finished in light, medium and heavy weights at a very moderate price.

☐ In manufacturing "**THE LAUREL,**" every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

☐ This is another **Smith Pattern,** designed to remain permanently in demand.

Frank W. Smith Company

Manufacturers of Sterling Silverware

GARDNER, MASS.

The Dorothy Vernon

A NEW WHITING PATTERN
IN STERLING SILVER FLATWARE

Made in the Complete Line — Dozen Work, Fancy Flatware, Cutlery — Now Ready for Delivery. Price Lists on Application.

IN its leading motive and the treatment of its details the new pattern is eminently suggestive of the English Renaissance designers of the 16th and 17th Centuries. It seems becoming therefore that it should be known by a name that not only recalls one of the most romantic episodes of the social history of that period, but is also intimately associated with the most significant existing example of English Renaissance Art and Architecture.

Ye Mount Vernon Pattern

MADE BY

ROGERS, LUNT & BOWLEN CO.

Silversmiths

GREENFIELD, MASS.

*Write
for
Catalog*

A fine setting enhances the beauty of the rarest and most costly jewels.

Likewise, a fine oak or mahogany chest makes a desirable setting for ye Mount Vernon pattern, a distinct Colonial gem.

We can furnish these chests to suit any combination desired.

EVERYTHING indicates the greatest demand for Fall and Holiday goods in the history of the trade. We advise buyers to place orders early as it is very difficult even now to get help in the factories. What will it be later?

We have the largest and most ideal line of

**Jewel Cases, Clocks, Candles and Candelabra,
Inks, Trays, Vases, Smoking Sets, Desk Sets,
Paper Weights, Clock Ornaments, etc.**

We challenge comparison in price or quality of goods.

The Brainard & Wilson Corporation

Main Office and Factory: **DANBURY, CONN.**

NEW YORK OFFICE: 621 Broadway, Room 531, in charge of Fred J. Foster

ILLUSTRATIONS ONE-HALF SIZE.

When we originally conceived the idea

that 10K jewelry could be made to look and appear like the nicest 14K, we had in mind, particularly, that class of consumer, who has excellent taste, but a limited purse.

How successful we have been in carrying out this idea, is a fact well known to all high class retailers.

Hundreds of your customers like dainty, well made things, but cannot pay 14K prices.

Our line always pleases them, in price and design—and the excellent percentage of profit for you, will also please.

To the Jobbing Trade of the Country

Gentlemen:— Last February I purchased the entire interest of my partner, Mr. Herman T. Regnell, of Regnell, Bigney & Co.

I have reorganized the Company and will do business in the future under the firm name of The Allison Manufacturing Co., makers of high grade goods, and will sell the jobbing trade only.

We are making a most beautiful line, in choice designs, of Brooches, Dutch Collar Pins, Sash Pins, Link Buttons, Scarf Pins, etc., also an exquisite line of enameled goods, Cuff Pins, Combination Sets, etc., tastefully mounted on pads.

You will make no mistake if you give our representative a few moments of your time when he calls upon you.

Merely A Suggestion

If you are not handling the Mauran line of Baby Pins, possibly it would be to your advantage to do so. Better look into it.
If you don't, we both lose.

Incidentally have a look at the largest line of 10K. Scarf Pins and Brooches in the market.

John T. Mauran Mfg. Co.

MAKERS OF

"The Representative Line" of 10K. Solid Gold Jewelry

Since 1850

New York: No. 3 Maiden Lane

PROVIDENCE, R. I.

We beg to call your attention
to our extensive

Card Jewelry Line

consisting of medium priced

10K. Solid Gold Brooches, Scarf Pins,
Baby Pins, Handy Pins, Ear
Screws, Pendants, etc.

These goods are sold through the jobbing trade at very attractive figures. An examination and comparison will at once prove them to be ready sellers and profit makers in the stock of any jobber.

New patterns have been brought to a point of especial distinction, and all bear our mark of quality and reliability

It is our earnest desire to establish the same reputation for Finish, Originality, Quality and Reliability for this CARD JEWELRY LINE as is borne by our ring lines.

Samples will be cheerfully sent to jobbers and we heartily commend this line for a profitable business in 1909.

If It Burns Alcohol We Make It

A Commuter's Breakfast

HE is tied to a time-table, cannot wait to start the kitchen fire. His wife comes down, neatly dressed, sets the breakfast table with fruit, bread and butter, and then brings from the pantry a Sternau Alcohol-Stove outfit. This she places on the breakfast table and proceeds to get breakfast for her husband and children, in the quickest possible time, without the labor and dirt unavoidable with the use of a coal range.

The illustration shows one of the many Sternau Alcohol-Stoves she uses in preparing this simple yet nutritious breakfast.

We will furnish, without charge, handsomely printed booklets bearing your name and address, for distribution among your customers. Particulars and Catalogue No. 23 on request.

Another Distinctive Sternau Alcohol-Stove Outfit

No. 4013,672

Consists of Alcohol-Stove, Three-pint Chafing-Dish, Alcohol Flagon, and Oblong Tray, size, 14x22 inches. Made in Hammered Brass and Hammered Copper.

Manufacturer of a General Line of Platinum
18 K. and 14 K.

Diamond Mountings

JOHN STREET, NEW YORK

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

JEWELRY OF DISTINCTION

"EDGEWOOD" BAR PIN

The design of this pin is patented, and we will promptly prosecute any manufacturer who infringes on same.

ENAMEL BAR PINS will be among the best sellers this Fall. THE "EDGEWOOD" pin has been pronounced the best pin of its kind on the American Market.

RETAILERS should use this pin for the following reasons:

- The GOLD is fourteen karat.
- The WORKMANSHIP is perfect.
- The DESIGN is patented.
- The PEARLS are selected Oriental Baroques.
- The PRICE is moderate.
- The PIN will not be imitated in inferior goods.
- The ENAMEL can be furnished in eight colors.

We sell direct to the retail trade.

THE FINISH of a JEWEL CASE The Beauty of the Best

HERETOFORE we have referred to the make and fittings of a Jewel Case. Important as these things are one cannot omit the matter of their Finish. The Cases illustrated in these pages line up in point of finish with the very finest products. For example the Finishes include popular Butler and Oxydized Brass, also Butler and Oxydized Silver as well as Green and Roman Gold. It is hardly necessary to emphasize the rich effects of our hand etching and other forms of decorative treatment which have created a style that is known and appreciated.

In Olden Times

Many men who knew a great deal didn't know enough to sign their names, so they used signet rings instead of pens, and found them very useful.

Nowadays, the pen is mightier than the ring, in the matter of signatures, yet signet rings are still highly popular as a means of popular adornment.

"LK" Signet Rings represent the best that can be done in this line. *Take up your pen and write for an assortment.*

No. 6.

Aviation Cups.

By CHAS. A. BRASSLER.

THE last few years have witnessed a wonderful advance in the science of nautics, and it is to be expected that now on there will be still more rapid progress. Wide-awake French jewelry manufacturers have been inspired by the reigning craze to produce "aeroplane" ornaments of gold and similar trinkets, while

this country either, considering the deep interest that is taken here in the conquest of the air and the fact that the United States is next to France, the leading country in aviation, thanks to the wonderful success of the Wright brothers, Glenn H. Curtiss and others.

Of great interest to the jeweler, too, are the handsome trophies offered in France for various feats in aviation and for the contests at the first aerial tournament at

senting high mountain peaks, clouds, etc.

On the front cover of this issue of THE JEWELERS' CIRCULAR-WEEKLY we show an illustration of the Michelin Aviation Cup by Roussel, which figured prominently among the exhibits at the French salon this year. This is the prize offered by the Michelin firm for some particular achievement of the flying machine. Various de-

A GORDON-BENNETT AIRSHIP RACING TROPHY.

THE ROLLS TROPHY FOR BALLOONS.

signs of great merit were submitted to the Michelin company in that firm's competition for a model for their trophy, and while naturally only one could be selected, the designs will doubtless interest the trade, for which reason a few of them are reproduced on page 65.

It is not unlikely that in the course of time aeronautic trophies will become as numerous as automobile prizes are now, and great demands will be made upon the inventive skill of the craft to supply striking designs.

There is a great future in store for aeronautics and aviation in the United States, since our countryman, Wilbur Wright, as is well known, was the first to demonstrate successfully the possibility of mechanical flight through the air by a

Germany the patriotic folk are tempted to purchase tiny reproductions of the "Zeppelin" airship intended for watch charms. The writer recently saw a picture in a foreign journal showing a handsome silver hand-mirror back in the shape of a spherical balloon, the ropes and basket forming the handle. Thus the popular enthusiasm is cleverly turned to account by the enterprising jeweler, and it is safe to say that such articles will not lack for customers in

Rheims. While it cannot be said that the form of the "aeroplane" by reason of its shape is particularly well adapted for use on these prizes, it has nevertheless been cleverly utilized by various designers of such trophies, and the International Aviation Cup of Rheims, for instance, is surmounted by a faithful and exact miniature copy in silver of a complete "aeroplane" upborne by a winged figure of "Progress" on a highly ornamental base apparently repre-

TWO THINGS WE DON'T DO.

Make a 14k pattern of ring in 10k gold, or make a 10k pattern in 14k gold.

We do, however, make the same style of rings in the two qualities, but of radically different patterns.

This is an illustration of a new 10k Scarabe Ring made in two sizes, one for men and the other for women, each in the following stones:

Turquoise Matrix,
Red Sard,
Bloodstone,

New Zealand Jade,
Amethyst,
Epidote.

PRICES: From \$4.00 to \$8.50 according to size and stone.

We make an equally attractive pattern in 14k gold, different in design, in two sizes, in the same stones.

Reg. U. S. Pat. Office

heavy-than-air machine. As a matter of fact, one of the models submitted at the Michelin competition shows Mr. Wright in his biplane, aided by Progress, conquering the air. Most of the designs in the hands of sculptors' models speak for themselves. We will only mention as very notable one which is described as "The Spirit of Aviation teaching the man-birds of flight." In regular balloon races, too (dirigible and otherwise), numerous trophies and prizes will be offered right along. The Aero Trophy, a British prize, is illustrated

The arrangement of designs, several thousand in number, no two of which were alike, was admirably fitted for purpose of inspection. Everything shown at the exhibit was entirely new, every article being designed and made up especially for this year's trade. The variety and scope at this exhibition left nothing to be desired by the visiting buyers, who have come to recognize this annual display as the most interesting and instructive feature of their trips to New York. There was so much to be seen that it is hard to single out individual pieces for

shown. Among these was an attractive pin showing on one side a horse shoe and on the other a crown, which was so arranged as to revolve showing either side at the option of the wearer. The use of fancy diamonds in giving artistic expression to various designs are more pronounced this year than at any previous exhibition. In collarettes, hair ornaments and other articles there was an endless combination in diamonds and pearls in exquisite effects. A "Mary Garden" baretté in diamond studded design and most intricate and beautiful in

DESIGNS SUBMITTED IN CONTEST FOR MICHELIN AVIATION TROPHY.

page 63. This trophy takes the shape of a silver model of a balloon, perfect in every detail and mounted on an ebonized stand, which bears the following inscription: "The Rolls trophy, presented by the Hon. C. S. Rolls for competition by the members of the Aero Club of the United Kingdom."

Seventh Annual Exhibition of Jewelry Opened at New York by Powers & Mayer.

Many members of the trade from all parts of the country were in attendance at the Seventh Annual Exhibition of diamond jewelry, which was held in the salesrooms of Powers & Mayer, 258 West 4th Ave., New York. The exhibit this year was more comprehensive and attractive to buyers than any previously given and called forth on all sides words of praise from those who viewed it.

a detailed description, yet there were many objects which at once attracted special attention. The display of collarettes in different patterns and sizes, diamond studded and made up in original and attractive designs, constituted part of the exhibit which held the attention of visitors. Necklaces set with cashmere sapphires and diamonds together with diamond sautoirs, including chains, were also prominent in the exhibit. The woven pearl chains in sautoir effect were shown in a number of styles all of which were most attractive. Large amethysts and pearls are used in the pendants. One of the latest innovations is shown in the lockets and brooches which have interchangeable enamel colored slides which can be used to match the particular dress which is being worn.

Stick pins with a new arrangement allowing for a display of two designs were

conception was shown together with many novel brooch patterns.

The use of large amethysts in brooches was also noted, and in the line of chain lorgnettes the exhibition was interesting.

A prominent feature of this year's display was a large assortment of black opals set in brooches, one of which was of especial beauty and attracted the attention of all visitors. The display of rings in ruby, emerald and star sapphire settings was larger and better than ever before and included many choice offerings. Pieces set with aquamarines and cat's eye, were also prominent.

E. P. Gainer, Troy, N. Y., bought out the jewelry business, fixtures and stock of J. M. Rockwell, 2240 Fifth Ave., that city, Aug. 28, and hereafter intends to run both stores, continuing the old business at River, Grand and 4th Sts. without change.

THE NEWS FROM ENGLAND.

Business Prospects Better But Financial Conditions Bad—Export Trade Increasing—Birmingham Manufacturers and the Technical Schools Jeweled Buttons for the Hair—Ancient Gold Torque Discovered in Somersetshire Mappin & Webb's Robbery.

LONDON, Aug. 29.—There is a strange inconsistency about the month just closing. Despite the fact that it is the holiday month, that the weather has been uncertain though much better than the abnormal climatic conditions which prevailed during what should have been the best two months of the year, and that buyers have greatly been very chary, there is every indication of a more satisfactory state of affairs in the very near future. There is a business in commercial circles which bodes well for the future, while financiers express much more optimistic views.

On the financial side of our industry, however, is far from bright. I have just paid a hurried visit to the midland centers and had the same hushed fear prevails as in London. Who will be the next to go? It is the disquieting question everywhere. Only the extent of some bankruptcies and some surprising deeds of assignment point one cause to think.

And one prominent Birmingham manufacturer: "There are several very shaky firms, and one does not like to press them. That is the case generally, and if a little pressure is put on, up go the others or a proposition of five shillings in the pound is made. With the pleasant indications indicated by the Board of Trade reports, it is probable that the tide has turned and the "shaky" houses will remain, on a more certain basis.

There is an increase of over three and a half million pounds in the value of British exports when compared with the same month of 1908, while the exports have increased by £1,781,000, and it is satisfactory to note that nearly all our manufactures show an improvement. It would appear to mean that the cycle of bad trade, which has plagued trade throughout the world, is now going away and that we are on the upswing for the recurring cycle of prosperity. Business in London has been fair, and the jewelry manufacturing jewelers have been working overtime, but mainly on special orders.

* * *

Main referring to our improving exports it is noteworthy that our exports of gold and gilt wares show a substantial increase. As I write, the official figures are in reply to the end of July, but, as compared with the same period of last year, the total £67,652 as against £59,047 for the same month of 1908, while the seven months of the present year demonstrate a definite if slow revival, inasmuch as the total was £365,305, as compared with the same period of last year, when the figures were £333,606. In this particular class, the world is very much interested, and she mainly that while the U. S. A. has purchased less, Canada, which is buying very heavily now, Australia, South Africa and South America, are all improving purchasers. Meanwhile, Sheffield's satisfaction with an improving export trade is not

shared by Birmingham, where the small silver trade is reduced to a fine art, but there is hope in "Jewelopolis" (although not for jewelry sales in Canada).

* * *

In Scotland, trade is still very unsatisfactory. Ireland shows very little improvement, while the seaside resorts, where the fancy trades should be piling up money, are not doing particularly well.

* * *

While in Birmingham I made it my business to call on certain employers and get a chat as to the value of the technical schools, now that the working understanding, which had been arrived at between the Manufacturing Jewelers' Association and the Education Committee of the City Council, has been in operation for some time. On all hands I found complete satisfaction and a belief that the system of technical education now in operation was doing a very great deal of good for the workers in precious metals. The better class of employers send their boys for one or two afternoons each week to the classes, paying the lads as if they were at work, and, said one cultured but businesslike manufacturer, it pays us; moreover, the boys are not only more valuable servants but happier and brighter. There was one drawback inseparable from the breakdown of the apprenticeship system, *i. e.*, that boys put to the bench cleared off, just like full-blown workmen, when offered, in busy times, a shilling or two more per week. Since the advent of day technical classes the best employers have reinstated the system of apprenticeship and now, finding the value of it and the interest shown in their welfare, the lads are actually asking to be apprenticed! Thus a wise system of technical education may to some extent and in a manner unthought of help to revive apprenticeship.

* * *

A new fashion, probably due to the button-headed hatpins, has come into vogue of wearing enameled or jeweled buttons in the hair. These buttons are set at either side of the forehead or used to take up into position tresses which have a tendency to stray and make the hair untidy. Mentioning buttons for the hair reminds one of some massive silver enameled hatpins I saw at the Imperial International Exhibition. These were at least three inches across and weighed at least two ounces, so that a wearer of a pair would carry a quarter of a pound avoirdupois extra to the weight of her hat.

* * *

For the first jewelry and silversmithing competitions held under the auspices of the newly formed Jewelers' and Silversmiths' Art Council there are over 100 entries, 39 of which are for the journeymen jewelers' class.

* * *

An ancient British torque has been

found at Yeovil, in Somersetshire. It is of pure gold, and was acquired by the Somerset County Museum authorities at Taunton, but the Government has claimed it as treasure trove. Henry Coles found the torque surrounded by clay and sold it for £40 and half its additional value, if any. Mr. Harold St. George Gray, curator of Taunton Museum and assistant secretary of the Somerset Archaeological Society, however, holds the torque on behalf of the society and resists any claim of ownership by any other person, not excepting the Crown. The torque is believed to be of pure gold, and the date would probably be 500 to 800 B. C. It weighs 5 oz. 7½ dwt., and is of purely British manufacture.

* * *

The facts as to the daring but unsuccessful attempt to rob the jewelry establishment of Messrs. Mappin & Webb, just close by the Mansion House in the city of London, are as follows: The premises, which occupy one of the leading positions in the city, stand on an island. An observant detective noticed a couple of men acting in a strange manner, one standing a long time looking at his bicycle, and another apparently reading a newspaper but looking over it. This aroused his suspicions, and he sent for more police. A cordon of police were unobtrusively placed around the establishment, with the result that five men were captured with their pockets absolutely full of the best jewelry they could find, worth over £40,000. When the police entered the establishment, they found that the watchman had been struck, bound and thrown into a corner.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Sept. 1.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Algoa Bay: 3 cases optical goods, \$610; 4 cases plated ware, \$225; 5 cases jewelry, \$115; 77 cases clocks, \$1,602; 2 cases watches, \$223.

Berlin: 2 cases watches, \$1,868.

Bradford: 1 case watches, \$200.

Bremen: 2 cases plated ware, \$180.

Christiania: 11 cases clocks, \$494.

Christiansand: 5 cases clocks, \$150.

Colon: 2 cases silverware, \$160; 6 cases plated ware, \$1,169.

Copenhagen: 1 case plated ware, \$100.

Demerara: 1 case watches, \$173.

Hamburg: 13 cases jewelers' sweeps, \$8,000; 2 cases optical goods, \$165.

Havana: 17 cases clocks, \$153; 1 case optical goods, \$263.

Havre: 2 cases jewelry, \$350; 2 cases silverware, \$500; 1 case precious stones, \$161.

Hong Kong: 16 cases clocks, \$347.

Kobe: 45 cases clocks, \$696; 11 cases clocks, \$1,134.

Liverpool: 2 cases jewelry, \$325; 4 cases plated ware, \$268.

London: 1 case watches, \$148; 13 cases clocks, \$500; 8 cases optical goods, \$3,894; 1 case optical goods, \$125.

Madeira: 25 cases clocks, \$331.

Melbourne: 38 cases plated ware, \$3,173; 73 cases clocks, \$872; 2 cases watches, \$647; 7 cases optical goods, \$882.

Rio de Janeiro: 8 cases clocks, \$152.

Shanghai: 1 case jewelry, \$168; 2 cases clocks, \$120.

Southampton: 27 cases watches, \$4,776.

Vera Cruz: 7 cases plated ware, \$579.

Wellington: 8 cases plated ware, \$164; 113 cases clocks, \$1,464; 1 case optical goods, \$473.

Death of Louis Strasburger.

Louis Strasburger, who for many years was one of the most prominent watch and diamond importers in New York, and who for a long time was the head of Louis Strasburger & Co., died, Tuesday, Aug. 3, at his Summer home, West End, N. J., after a short illness. Death was caused by a general decline, resulting from old age.

Mr. Strasburger was for many years one of the most prominent figures in the New York jewelry district, and news of his death was received with regret not only in this city, but in other parts of the country as well.

Louis Strasburger was born in Wurtem-

THE LATE LOUIS STRASBURGER.

Germany, April 21, 1833, and here spent his early life. When a boy of 16 he came to New York City, where he was employed for a short time, and from there he went to Rochester, where, after working for others for a time, he started a jewelry store of his own. In the early 50s he returned to New York and started watch business and 10 years later was one of the most important Swiss watch importers of that time. In 1873 he bought Chas. Rubens & Co. who were his competitors in the Swiss watch business, and in 1866 established an European office for the purchase of diamonds, his son Mortimer being sent abroad to take charge of the business. In 1885 he turned over the watch business to his son Byron Strasburger, and continued in the diamond business until 1893 when he entirely withdrew from active service, and the diamond business was then conducted in the firm style of Louis Strasburger & Son & Co., with Alvin L. Strasburger, another son of his, as its head.

Mr. Strasburger was regarded in the country as an energetic, competent business man and made many life-long friends among his business and social associates. He was interested in a number of charitable institutions and gave freely of his means to this end. He was a member of the Valley Lodge, F. & A. M., Rochester, N. Y., being its oldest honorary member. He was at one time a director of the

Hamilton Bank and was one of the originators of the Moutefiore Home in this city.

Deceased is survived by three sons, Alvin L. Mortimer L. and Byron L. Strasburger, and by a daughter, Mrs. S. M. Bloch. Funeral services were held from his late residence at West End, N. J., and the interment took place at Salem Fields. His city residence was at 128 W. 77th St., New York.

Career of the Late William Handley.

NEWARK, N. J., Sept. 1.—William Handley, who died at St. James Hospital, Aug. 25, after an illness from which he had suffered since last April, was well known in the jewelry trade of this city, having been connected with the industry both as an engraver and retail jeweler for a number of years.

Mr. Handley was born in England 44 years ago and came to this city in 1885. He obtained work with a prominent local concern and about eight years ago opened a jewelry store of his own at 365 Orange St. In addition to his jewelry stock he also carried confectionery, stationery and other lines. For a while he also worked as an engraver, his wife taking care of the store, but owing to his ill health he was forced to give up all work some time ago and take a six months' trip abroad in the hope that this would benefit him. However, his condition became worse and he finally went to the hospital, where he passed away.

The funeral services, which were held from his late home Sunday afternoon, were largely attended. The interment took place in Fairmount Cemetery.

Mr. Handley was highly regarded in the trade as an honest, reliable and industrious business man and was especially prominent in social and fraternal circles, being a member of the Eureka Lodge of Masons, Court Clinton of the Foresters, and the Sheffield Lodge, Sons of St. George, as well as other organizations. A large delegation of these societies followed the remains to its last resting place.

Mr. Handley is survived by a widow, three sons, Joseph, William and George.

Death of G. Herbert Thompson.

MARSHALL, Mich., Aug. 31.—G. Herbert Thompson, who passed away last week in this city, was an old and well-known jeweler of Marshall. He is survived by a widow and two sons.

Mr. Thompson, who was 61 years old at the time of his death, was the son of C. N. Thompson who established a retail business here many years ago. The deceased learned the business with his father, with whom he was associated for many years, and was admitted as a partner, the firm name becoming C. N. Thompson & Son. In 1881 he succeeded to the business and continued it in his own name.

In addition to jewelry Mr. Thompson also carried a line of drugs and was well known in that trade.

A. T. Masters, Lebanon, Ind., has admitted a partner into the business, making the firm style Masters & Mitchell.

Heavy Taxpayers Among the Jewelers and Jewelry Concerns of Providence.

PROVIDENCE, R. I., Sept. 2.—The tax assessors of this city yesterday announced their returns of the assessments that have been made for the current year. The total valuation is given as \$240,618,600, which is an increase over last year of \$3,344,260 in real estate and \$4,677,440 in personal property.

Among those who are taxed on \$50,000 or over are the following individuals, firms and corporations that are associated with the manufacturing jewelry industry and kindred branches: William Armour, trustee, \$127,420; Baird-North Co., \$118,080; George M. Baker, \$63,940; Barton A. Ballou et al., trustee, \$50,000; B. A. Ballou & Co., Inc., \$75,000; Joseph Banigan estate, \$1,064,280; Belcher & Loomis, \$86,840; William O. Blanding, \$136,560; Boston Store Land Co., \$614,680; Charles W. Bowen, \$108,820; Charles Briggs, \$73,700; George Briggs, \$72,860; Brown & Sharpe Mfg. Co., \$2,357,000; John M. Buffinton, \$55,140; John M. Buffinton, trustee, \$125,260; Callender, McAusland & Troup Co., \$645,620; Walter Callender, \$378,000; George B. Champlin, \$97,600; Waity A. Champlin, \$84,660; George L. Claffin Co., \$50,000; Arthur W. Claffin, \$51,100; Howard P. Cornell, \$85,160; H. P. Cornell Co., \$122,780; Joseph P. Cory, \$235,040; Josiah W. Crocker et ux., \$137,080; Charles C. Darling, et ux., \$59,720; William H. Draper, \$125,200; Dyer St. Land Co., \$112,180; Michael Fitzgerald, \$105,760; Theodore W. Foster & Bro. Co., \$223,340; James A. Foster, \$117,860; J. A. Foster Co., \$81,400; B. H. Gladding Co., \$50,000; Gorham Mfg. Co., \$663,120; William C. Greene, \$51,140; Henry A. Hidden estate, \$390,680; Hough Realty Co., \$75,540; Charles F. Irons, \$50,860; Irons & Russell Co., \$175,080; Lederer Realty Corporation, \$703,620; Otto C. Lenz, \$61,540; Manufacturers' Building Co., \$344,740; Caesar Misch estate, \$193,720; the Metal Products Corporation, \$60,500; John Nelson, \$79,080; Samuel M. Nicholson, \$100,000; Nicholson File Co., \$567,340; Englehardt C. Ostby, \$103,440; Ostby & Barton Co., \$324,300; John S. Palmer estate, \$136,540; Remington Realty Co., \$99,280; Samuels Land Co., \$499,440; J. Samuels & Bro., Inc., \$90,200; Joseph and Leon Samuels, \$132,000; Henry D. Sharpe, \$160,400; Lucian Sharpe, \$150,000; Lucian and Henry D. Sharpe, trustees, \$250,000; John Shepard, Jr., \$151,300; Shepard Land Co., \$337,000; John Shepard, Jr., Real Estate Co., \$712,000; Stevens & Co., Inc., \$75,000; James Tiffany estate, \$58,120; Tilden, Thurber Co., \$51,900; United Wire & Supply Co., \$83,920; Waite-Thresher Co., \$60,000; William H. Waite, \$258,980; A. T. Wall Co., \$58,780; Ashbel T. Wall, \$99,960; Arthur H. Watson, \$78,780; Dutee Wilcox, \$335,620.

The Gorham Mfg. Co., assessed last year with \$1,406,620, is assessed now at \$663,120. The Browne & Sharpe Mfg. Co. is increased from \$2,332,500 to \$2,357,000; the Samuels Land Co. is increased from \$291,140 to \$499,440; the Shepard Land Co. is raised from \$223,080 to \$337,000; the Lederer Realty Corporation shows a gain from \$630,180 to \$703,620.

Reconstructed Rubies

There are RUBIES and RUBIES. For OURS we claim the foremost place in the Scientific Stone market.

We have succeeded in developing the Reconstructed Ruby to the highest possible standard, improving it irrespective of effort and cost. In the purity of material, its uniformity of color and shape, correctness of size and brilliancy of finish, OUR RUBY has positively no equal.

We were the first to make the Reconstructed Ruby popular, introducing it in all the variety of MODERN SHAPES and DESIGNS.

Our stock is the LARGEST and BEST in the country and will be found pre-eminently suitable for the use of the LARGE MANUFACTURING JEWELER.

When buying Rubies, GET THE BEST. They cost no more.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

John Nelson, Convicted of Receiving Stolen Gold, Adjudged Insane by Providence Court.

PROVIDENCE, Sept. 1.—John Nelson, the Main St. jeweler and refiner, was committed to the State Hospital for the Insane, yesterday, upon the order of Judge Rueckert, after a hearing in the Sixth District Court, at the conclusion of which the court adjudged Nelson to be of unsound mind and dangerous to the public. In accordance with the usual custom, Nelson was taken to the State Hospital immediately after his ordered commitment. He has no trouble whatever, either on the way to Howard or after he arrived there. He was later placed in a ward with other inmates.

The protracted hearing, lasting the greater part of the day, occupied the attention of Judge Rueckert, yesterday, during which several physicians testified and Nelson himself took the witness stand. Dr. Henry C. Hall, first assistant physician at Butler Hospital for the Insane, was one of the principal witnesses. Dr. Hall was appointed by the Superior Court last Winter to make an examination as to Nelson's condition relative to his trial on the criminal charge of receiving stolen scrap from an employee of an Attleboro jewelry manufacturing concern. At that time he considered him to be responsible for his acts.

Yesterday afternoon Dr. Hall made another examination of Nelson and testified in his opinion he was insane. When Judge Rueckert gave his decision there was some talk about having Nelson sent to Butler Hospital, but it was finally decided to commit him to the State Hospital at Howard. The complaint against Nelson was instituted through the legal firm of Waterman, Curran & Hubt, at the instance of his family.

Following several unsuccessful attempts by the police to convict him, John Nelson's legal troubles culminated on July 17, when Judge George T. Brown in the Superior Court practically denied him a new trial after he had been convicted on May 11 of receiving stolen goods, knowing them to have been stolen.

It is pointed out, however, that if Nelson fails to recover his mental faculties and is not confined in the hospital there will be a necessity for pressing the criminal charge to a final determination. On the other hand, if he is released from the hospital as cured, there will probably be an unusual legal battle to prevent him from being sentenced or tried again on the old charge if a new trial is granted.

Since his commitment to the State Hospital numerous civil actions have been begun against Nelson, all in the nature of attachments, and in order to protect his interests Judge Spink has appointed Raphael Overstein, Nelson's son-in-law, as temporary guardian, who will serve under bonds of \$5,000 until a permanent guardian is appointed. According to the tax assessor's report, made public during the past week, Nelson is taxed on \$79,080 worth of property.

According to the records at the office of the Recorder of deeds at the City Hall, attachments have been levied against various parcels of real estate belonging to Nel-

son, as follows: By Charles Smart, for \$5,000; L. Dimond & Sons, Inc., \$500; David Eisenberg, \$500; Samuel Hilwitz, \$500; Henry Rosenblatt, \$500; George P. Peterson, \$300; Richard S. Manders, \$100. This afternoon a suit was entered in the Superior Court against Nelson, the plaintiff, Henry Shaw, alleging that the defendant owes him the sum of \$1,500 on book account. Mr. Shaw places the amount of damages at \$1,700.

Death of George E. Darling.

PROVIDENCE, Sept. 1.—George E. Darling, for several years a jobbing jeweler at 21 Eddy St., this city, was buried in the family burial plot at his old home in Searsport, Me., yesterday, where he died on the night of Aug. 29, after an extended illness. Deceased was born at Searsport, Me., Sept. 6, 1868, where he received his education in the schools of that section. He came to this city about 14 years ago, and soon became identified with the jobbing jewelry business and was very successful. He is survived by his wife and one son.

Mr. Darling had a great fondness for the water and devoted all of his leisure time to yachting. He was particularly well known in yachting circles along Narragansett Bay, and was formerly secretary and treasurer of the Rhode Island Yacht Club. At a special meeting of the latter association, held last evening, appropriate resolutions on his death were passed.

About the middle of July, Mr. Darling, who had been suffering for several months from kidney trouble, went to a sanitarium at Brookline, Mass., in the hope of bettering his condition. He did not improve, however, and he finally determined to go to his old home at Searsport hoping that the climate there would prove beneficial, but the change did him but little good, and for a number of weeks his condition had been precarious.

Mr. Darling's business will be continued.

Employee Pleads Guilty to Charge of Stealing Gold Scrap from Attleboro Manufacturers.

ATTLEBORO, Mass., Sept. 1.—As the result of an investigation by Detective Goldowsky, Harry T. Prince was placed under arrest at the office of the Earle & Prews Co., in Pawtucket, last Monday evening, on a charge of stealing jewelry from the Watson-Newell Co.

For some time Prince has been employed at the Watson-Newell factory, and from time to time the firm has been missing quantities of gold and silver scraps. Accordingly the firm reported the matter to the Jewelers' Protective Agency, of which it is a member. The arrest followed.

When arrested, Prince was taken to the Pawtucket police station and confessed his guilt, and then he was turned over to Deputy Sheriff Nerney, of Attleboro. In the Fourth District Court he pleaded guilty to larceny, and the case was continued until to-day for sentence. It is thought that the amount of goods stolen was about \$300. To-day the case was adjourned until Saturday.

W. A. Pipher has moved from Worthington, Ind., to Harrisburg, Ark.

Robbers Break Into Dubuque, Ia., Jewelry Store and Loot Only the Window.

DUBUQUE, Ia., Sept. 1.—A cleverly performed robbery that is puzzling the authorities here occurred Monday night, when the jewelry store of J. P. Buechele, 1042 Main St., was entered by burglars, who stripped the window of practically all the articles it contained, but left the jewelry in the store proper untouched.

An investigation showed that the robber or robbers had procured a ladder from a neighboring yard, climbed to the top of a window in the rear of the store and forced it open. In this way they got into the workroom and climbed through a transom into the store, taking out the glass to get through. The men brought the ladder with them and left it behind the counter.

The time the robbery occurred was shown by a mission clock, which had been knocked out of place and stopped. The clock indicated eight minutes after 10.

A list of the goods stolen from Mr. Buechele's store is as follows: Lady's diamond locket, plain, Roman finish; lady's diamond locket, engraved, rose finish; two gent's diamond lockets, engraved, rose finish; one gent's diamond locket, automobile on same; lady's locket, plain, Roman finish; two lady's, engraved, quarter-shell; gent's, engraved, quarter-shell; lady's, engraved, filled, English finish; two lady's, plain, Roman, quarter-shell; solitaire diamond Tiffany ring, $\frac{3}{8}$ -carat; gent's solid gold vest rope pattern; six gent's filled vest rope; two gold-filled chain rosaries, red beads; pair pearl opera glasses, white, with handle; silver pocket mirror; meerschmump pipe, briar pipe; eight solid gold scarf pins; two festoons, one brilliant, one turquoise; two gold Eagle charms; two Knights of Columbus charms; mounted elk tooth and other emblem charms. The total loss is estimated at about \$300.

Biennial Meeting of Fox River Valley Retail Jewelers' Association.

MILWAUKEE, Wis., Sept. 3.—The biennial meeting of the Fox River Valley Retail Jewelers' Association, held last week at Berlin, Wis., was a pronounced success. About 20 jewelers attended, 12 coming from the lower Fox river district and the others coming from Berlin and surrounding towns. The visiting delegates, accompanied by Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association, made the trip down the Fox river from Oshkosh to Berlin by steam yacht and were met at the Berlin docks by the Berlin jewelers, who drove them about the city in their automobiles and took them to the Hotel Bellis, where a banquet and smoker was held.

This was followed by a social and business session, when various matters of interest to the trade were discussed. Franklin Thomson, Milwaukee, spoke upon the Jewelers' Mutual Fire Insurance Co., of Wisconsin, of which he is secretary. The party left Berlin at 9:30, after passing several votes of thanks to those who furnished the excellent entertainment. The next meeting will be held, early in 1910, at Fond du Lac.

Diamond Horseshoe Brooches

These Brooches are as popular as ever—standard pieces, always in demand—and ours are preferred by careful buyers because of the high quality of the stones and the superior workmanship and finish.

3 Models, all sizes. Settings, platinum and gold.

Send to us for these or anything else you want in high class Diamond Jewelry.

170 BROADWAY, Corner Maiden Lane

NEW YORK

Samuel J. Greenfield is a new jeweler in Lancaster, Pa.

L. Jackson has just opened a new jewelry store in Chattanooga, Tenn.

A jewelry store has been opened by G. G. Saunders, Fort Bragg, Cal.

Down recently started in business at Flatbush Ave., Brooklyn, N. Y.

A retail jewelry store has been opened in Millersburg, O., by G. K. Deitz.

Marrion Hill, recently from Missouri, opened a store at Westgate, Cal.

Lempson expects to start in business in Fairbanks, Alaska, in the near future.

Man Simon has opened a retail jewelry store at 135 S. 13th St., Philadelphia.

Bert Walk recently began business as a retail jeweler in the Gem building, Lexington, Mo.

B. Bailey has engaged in the watch and jewelry business in the Missouri building, Kansas City, Mo.

A. Spector has completed arrangements to open a retail jewelry establishment at 26 N. Oak St., Mt. Carmel, Pa.

James H. Kelley has leased quarters at 8 Thurber Ave., Providence, R. I., to manufacture a general line of plated jewelry.

Piltch, dealer in diamonds, watches, jewelry and optical goods, has just begun business at 42 Springfield Ave., New-N. J.

E. Russell, formerly of Corona, has opened a new store in Chino, Cal. He carries a first-class watchmaker and carries a full stock.

P. Farwell has opened a new jewelry store at 1148 Central Ave., Los Angeles, Cal. He will carry a full stock of watches and jewelry and will do a watch making business.

L. Willard, who for several years has been in charge of the diamond and watch department in John Wanamaker's New York store, has opened a store of his own at 16 Jay St., Schenectady, N. Y.

The Fred. G. Burgess Co., Brooklyn, N. Y., has been incorporated to manufacture jewelry, with a capital of \$15,000. The incorporators are: F. G. Burgess and Max G. L., Brooklyn, and Fred W. Decker, New York.

Smith & Martin, 217 Chamber of Commerce building, Rochester, N. Y., is the manufacturer of a new concern which will manufacture and repair gold ring mountings, jewelry, etc. They will make a specialty of platinum mountings.

The Broadway Diamond Importing Co. has been incorporated in New York to deal in watches, diamonds, jewelry, etc., with a capital of \$20,000. The incorporators are: Ralph Jacobs, Harry C. Ams and H. R. Berlinicke.

A new jewelry store has been opened at

Clintonville, Wis., by Wm. Madel, Clintonville, and Caleb Marlow, Elgin, Ill. Quarters have been secured in the State Bank building. Mr. Madel has just completed a course in watchmaking.

A new jewelry store will shortly be opened in Trenton, N. J., by John S. Rubin and Frederick Grefenstein. The former was for two years in the employ of Cook & Jaques, and the latter was with the same concern for about 14 years.

G. R. & I. Railroad Fights Railroad Commission's Baggage Rule as to Jewelry Salesmen's Cases.

GRAND RAPIDS, Mich., Sept. 1.—Claiming that the action of the Michigan railroad commission in forcing the railroads to carry as baggage the watches, clocks and jewelry contained in the traveling cases of traveling salesmen and in fixing the minimum charges for excess baggage is unconstitutional and void, the Grand Rapids & Indiana Railroad Co. has brought suit against the commission, asking that the action be declared void and rescinded and that pending the settlement of the case the order be without force.

The order was served upon the railroad commission Aug. 4, 1909, and it is claimed a similar matter was at that time pending in the Wayne County Circuit Court in chancery. For this reason the complainant charges the railroad commissioner had no right to make the new order during the pendency of the suit.

It is set up, too, that the commission has no power to make such orders under the act prescribing its powers and duties, and that if such tariffs were to be fixed they should be fixed by a body having legislative powers, which, it is denied, the commission has.

Two State Conventions Opened at Detroit by the Jewelers and Optometrists of Michigan.

DETROIT, Mich., Sept. 7.—Two conventions were opened in the Hotel Cadillac in this city to-day by the Michigan Retail Jewelers' Association and the Michigan Society of Optometrists. The programme has been so arranged that to-day will be given up largely to the proceedings of the jewelers, while to-morrow will be a big day for the optometrists. This arrangement will enable the jeweler-opticians to attend the sessions of both associations.

The members of the two associations began to arrive last evening, at which time the presidents and other officers held an informal reception and there was a pleasant social time.

At the morning session A. B. Hull, Belding, addressed the meeting both as president of the Michigan Retail Jewelers' Association and also as a member of the National Executive Committee. He praised the watch manufacturers for adopting minimum prices and also the jewelry manufacturers who have agreed to sell exclusively to the retail jewelry trade.

This afternoon an executive session will be held by the jewelers and reports of the officers and committees will be submitted. Sandy MacKay is to speak on "The Future of the Retail Jewelers' Association." Wm. Stolz will speak on "How Can We Best Increase Our Membership?" A question box will be conducted and there will be a general discussion prior to the nomination of officers. In the evening the Ku-Kus will give a banquet at which both jewelers and optometrists will be present; the ladies will also be guests.

The meeting of the Michigan Society of Optometrists is of special importance, because this is the first convention held since the new optometry law was enacted in this State. The meeting has been very extensively advertised and this has resulted in bringing to the meeting a larger attendance than at any prior convention of this society. It is expected that the new law will be the chief subject of discussion at the session to-morrow, and that action will be taken in building up the society so that it may do its part in obtaining a proper enforcement of the new law.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Sept. 4, 1909.

LOUIS J. DEACON, Cape May, N. J.

Death of Hyman Schenkein.

Hyman Schenkein, for many years head of the firm of H. Schenkein & Sons, cutter and importers of diamonds in New York, died at his home, 196 Riverside Drive, Friday. Death resulted from a general decline, due to old age. Mr. Schenkein was well and favorably known in the diamond trade in New York and abroad, and his death brings regret to his friends in the trade.

Hyman Schenkein was born in Austria in 1829. He came to this country in 1865 and identified himself with the jewelry trade as a dealer in watches and jewelry. In 1870 he became an importer of diamonds and continued this business until December, 1908, when he retired from the firm of H. Schenkein & Sons, 2 Maiden Lane, New York, of which he had been the head. The business was succeeded by his sons, who continue it under the name of H. Schenkein's Sons. The firm has foreign headquarters in Amsterdam and Antwerp.

Mr. Schenkein was a member of a number of charitable institutions in New York, among which were the Mount Sinai Hospital, Hebrew Orphan Asylum, Hebrew Home, and others, besides several fraternal societies.

He is survived by a widow, four sons, Messrs. Abram, Samuel and Edward, and one daughter, Mrs. Sadie V. Mintzer. The funeral services were held Sunday at the late home of the deceased. Interment was in Macpelah Cemetery, Cypress Hills.

Death of Max Gross.

CHICAGO, Sept. 6.—Max Gross, one of the well-known jewelry dealers here, died suddenly, last Friday night, and was buried at his late residence, 4315 Vincennes Ave., on Sunday. He is survived by a widow, three sons and two daughters.

Max Gross was a resident of Chicago for over 30 years. He kept a general dry goods store on the North Side for about 10 years and then embarked in the diamond and jewelry business.

He was a man of upright character, his word never being questioned. Always honorable and straightforward in his dealings, he had the respect and confidence of everyone who knew him. He had been sick for many years and his death, though sudden, was not unexpected.

Bold Thieves Rob Jewelry Stores in the Vicinity of Lancaster, Pa.

LANCASTER, Pa., Sept. 4.—Thieves, several days ago, smashed the show window of Etienne G. Keller's jewelry store, 8 E. Orange St., and cleaned it of all the watches and fobs within reach. The men were discovered and pursued by officers, but escaped. The same window was looted something over a year ago.

On the night of Sept. 1, thieves also smashed the window of Frederick Kaufman's jewelry store, on Locust St., Columbus, and were helping themselves when discovered and fired upon several times by a neighbor. They were evidently bold rascals as they walked away leisurely after the looting began. George Smith, Philadelphia,

and John Brian, Middletown, Pa., were arrested next day in York county, on suspicion of robbing several houses in Wrightsville, Pa., and they are supposed to be the men who were at Kaufhold's and at Keller's.

Theft of \$4,500 Worth of Jewels Reported from Victoria, B. C.

SAN FRANCISCO, Cal., Sept. 1.—From Victoria, B. C., comes the news of a jewel theft that is mystifying the police there and Charles E. Redfern is seeking to recover goods valued at \$4,500. The mysterious part of the disappearance is that the members of the firm are not certain just where the jewels were when taken. They were supposed to have been placed in the safe when the place was closed up the night before, but of this Harry Redfern, who closed the store, is not certain. It is presumed that their absence from the stock failed to attract his attention when he put the goods away and that they were purloined in some manner during the rush hours of the afternoon.

The list of missing gems includes 11 fine solitaires, three twin diamond rings, a three-stone ring, four five-stone rings, two cluster rings, a circle ring, a three-stone ring with platinum tips, a tiger-head scarf pin with a diamond set in the mouth, and a set of earrings. Some of the rings were stamped inside "C. E. R., 14k."

This store was robbed three years ago and the loot was found hidden under a building.

News Gleanings.

P. Stoeferle, West Allis, Mo., is no longer in business at that place.

L. N. Lee has sold his retail business at Ada, Minn., to A. J. Johnson.

Klein Bros. Co., Muncie, Ind., has been incorporated with a capital stock of \$250,000.

R. E. Baker, Morrilstown, Ill., has taken a position as watchmaker with A. E. Foster, Creston, Ia.

The Parsons Optical Co., Charleston, S. C., was incorporated recently, with a capital of \$35,000.

R. A. Bullard moved recently from Omaha to Des Moines, Ia., where he will continue business.

W. Madel, Clintonville, Wis., and Caleb Marlow, Elgin, Ill., have opened a retail jewelry store at Clintonville.

The Snider-Umstead Co., Durham, N. C., has been incorporated with a capital stock of \$100,000 to engage in the jewelry business. Business will be begun with \$25,000, paid in. The stockholders are J. N. Umstead and S. N. Snider.

There is quite a revival of interest in pearl hunting in the streams of the Northwest and reports come from different points of finds of greater or less importance. H. J. Roth, La Crosse, Wis., recently found a pearl at Lake Worth, which he sold for \$480, and several others. Frank Penny, Anoka, Minn., has been working the Rum river there and has found a number of small pearls as well as many slugs.

Bert B. Stanley, who recently pleaded guilty to a charge of the larceny of tools

from the American Optical Co., Southbridge, Mass., was sentenced to three months in the House of Correction, but the sentence was finally commuted and Stanley was released after paying a fine of \$25.

According to a report from Wellsville, N. Y., while F. W. Ward, a local jeweler, was examining an "unloaded gun" which had been used to start the horse races at the fair, it accidentally exploded and the bullet just missed the jeweler's son and crashed through the hat of a farmer who was passing. Neither the boy nor the farmer were injured.

In the story of the fire at Decatur, Ill., published in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, mention was made of the loss to the Frank Curtis Co. as \$25,000, with insurance of \$20,000. This was a mistake, as the Curtis Co. announces that the damage it suffered was but \$7,200 on stock, and this was fully covered by insurance. The fire was in the uptown store, 156 E. Main St. The Frank Curtis Co. is still doing business at the old stand and will continue to do so for the next 60 days, when it will move to a new location and will probably build a new building on the old site. Another jeweler of this town who suffered severely in the fire, but whose loss was not mentioned last week, was E. A. Barber, who occupied one-half of the store room at 121 N. Water St. His premises were entirely burned up. In addition to his stock of bric-à-brac, silverware, china, estimated at \$2,000, he lost about \$1,000 worth of new mahogany fixtures. The gems and jewelry which he kept in his large safe were found in perfect condition, but the stock in the small safe was badly damaged. Mr. Barber came to Decatur from Sullivan, Ill., July 7, 1908. He has reopened temporarily at 250 N. Water St.

The Home and Export issue of our British contemporary, *The Watchmaker, Jeweler, Silversmith and Optician*, which has just made its appearance in this country, is a most creditable product of trade journalism in every way, and contains so many interesting features that it will undoubtedly find a place in the library of all jewelers who collect literature of interest to their craft. This number opens with an article by the editor, W. Augustus Steward, on the Paris Salons, which article appeared in THE CIRCULAR-WEEKLY in the issues of Aug. 18 and 25, but in Mr. Steward's own paper it is profusely illustrated with examples of the work of the French artists to whom he refers. "Fifty Years of the Gold and Silver Trades," a brief historical review by a manufacturer, will be found of especial interest to the British trade, while the articles on "Gem Engraving," by Cecil Thomas; "The Influence of the Renaissance on the Silverwork of Today," by Walter Stoye; "The Dantzie Goldsmiths' Guild," by Ludwig Schröder, and the "Notes on the Collection and Value of Silver Plate," by "Gykou," will prove of interest to jewelers and silversmiths in all parts of the world. The volume contains 192 pages of text and advertising, is well printed, finely illustrated and every way reflects credit both on its editors and its publishers, Heywood & Co.

Superior

Workmanship

A jewelry design is doubly attractive if it is well made. We employ none but the best of workmen at the bench—men of experience and skill, consequently our productions are well made and durable.

Every jeweler knows what a source of pleasure it is to sell jewelry which is beyond criticism, for a sale is easily made and is always satisfactory.

Our designs will add tone to your stock, and their superiority is always evident.

HEYWORTH BLDG.

Baltimore.

Baltimore has an inventive spirit in John Rare, a watchmaker at 707 N Howard St. whose height of ambition is to complete a dirigible balloon which will be devoid of most of the dangers encountered in the airships of the present time. He lays some of his most inventive ideas aside to employ most of his time on his airship, that, he anticipates, will not have screw propellers, to stiffen and tear things, nor the kind of material that becomes unshipped. He is advertising for financial aid to enable him to set on a working basis and protect his rights by patents in this and foreign lands. George Swartz, alias Block, alias Cooney, who made a bold attempt to rob the store of G. T. Sadtler & Sons, at 16 E. Baltimore St., during business hours, Aug. 16, pleaded guilty in the Criminal Court, Sept. 13, to the robbery and was sentenced to three years in prison. He had been indicted for the theft of 29 rings, valued on an average at \$10 each. Swartz is well known to the New York police, having just completed a one year term in Sing Sing. His attempt to break into the Sadtler store during business hours was daring in the extreme. He walked into the store and behind the counter and began passing himself to a tray of valuable rings. When accosted by Mr. Sadtler as to what he was doing there he replied that he was a retail clerk and was getting some rings to show a customer. Mr. Sadtler's reply then convinced the thief that his game had failed, and, dropping the rings he had in his hand and at the time, he made a dash for the door and ran into the arms of Louis Johnson, a court house watchman, who was passing at the time. Mr. Johnson held the thief and finally placed him under arrest. A search of 29 rings were found on him.

Columbus, O.

The schedule of Adam H. Uhrig, a Galena jeweler, who has filed a petition in bankruptcy in the United States Court, at Columbus, shows his assets to be \$14,526.14 and his liabilities \$18,386.65. S. A. Reid, arrested with Gertrude Brown and charged with petit larceny for the theft of a watch from the store of Alata & Pickering, got off with a light sentence in Police Court as a result of a promise to Columbus by his father, who is D. Reid, of Lake Charles, La. When the police finished collecting evidence against her there were three charges of petit larceny against him, one of grand larceny and one of living unlawfully with the Brown woman. His father said he had at one time been confined in a hospital for the insanity and was a morphine user, and pleaded leniency. The major charges were dropped, and on the three counts of petit larceny he was given for each \$25 fine and 30 days in the workhouse. The fines were pardoned on agreement of the father to reimburse the losses occasioned by his son's theft. In two of the cases the workhouse sentence was suspended. The Brown woman was found guilty of petit larceny and fined \$25 and sentenced to the workhouse, and the

sentence suspended on condition that she leave the State.

George E. Hamilton, of Columbus, who claims to have been for many years a traveling salesman for the A. Rogers silverware company and who says he is now a heavy stockholder in that concern, was arrested by Columbus detectives, Friday, on suspicion of being a man wanted in Indiana on a charge of fleecing banks, under the name of Thomas E. Hamilton. A detective arrived from Indiana, Saturday, and took Hamilton back to Knightstown, Ind., for trial. The case is a rather peculiar one. Hamilton strenuously denies that he is the Hamilton wanted and agreed to go back to Indiana without requisition papers and face an Indiana woman, said to be his wife. George E. Hamilton, the Columbus man, is married to an Ohio woman, having been wedded to Miss Marshall, of Greenville, last July. The Hamilton under arrest has claimed that he is worth in the neighborhood of \$700,000, acquired by purchases of land in South Dakota and Chicago when a young man; that he owns a large grain elevator in South Dakota, and is a heavy stockholder in the silverware company.

Lancaster, Pa.

W. F. Meiskey, of H. S. Meiskey Co., visited Chicago, last week.

Frank P. Baker spent last week in Boston and N. Providence, R. I.

John Wood, with H. C. Oberlin, Columbia, Pa., visited Lancaster, last week.

Henry Weber, the City Hall optician and jeweler, has returned from Ocean Grove.

J. W. Klein, optician, of 133 Pearl St., has returned from a long stay at Mt. Gretna, Pa.

T. Wilson Dubbs is giving away to every purchaser of a certain amount of goods a neat silver spoon.

C. E. Hinkle, Ephrata, is receiving the congratulations of his friends upon the advent of a young son.

Edward Buck, a silversmith, was married, last week, to Miss Ruth E. Shiffer, by Rev. Dr. C. E. Haupt.

E. R. Kant, of the Non-Retailing Co., has returned from a nine weeks' trip through western Pennsylvania, Virginia and Ohio.

Constantine Fokiades, late with his brother, John Fokiades, a Reading, Pa., jeweler, has taken a position with Marcus Edelstein, optician.

Harry T. Kiehl, a salesman for Louis Weber & Son, has returned from a visit to Atlantic City, and Frank B. Fon Dersmith, with the same firm, has been visiting at Benton-on-the-Susquehanna.

J. B. Martin & Co. last week presented a handsome loving cup to each of four employes, W. H. Gundiker, A. P. Newall, E. A. Walton and Miss Sarah Edwards, in recognition of long years of service.

Eight beautiful silver loving cups, prizes awarded, this week, in the Lancaster Country Club's tennis and golf tournament, were on exhibition, this week, in a show window of the jewelry store of S. Kurtz Zook, who furnished them.

Among those who contributed prizes for the Central Labor Union demonstration

contests at Rocky Springs Park, on Labor Day, were Jewelers Henry Weber, T. Wilson Dubbs, S. Kurtz Zook, Louis Weber & Son, W. W. Appel and Aug. Rhoads.

Last week, the show window of Aug. Rhoads' store on E. King St. was filled for several days with the numerous prizes which were awarded on Labor Day in contests held at Rocky Springs Park, under the auspices of the Central Labor Union.

Three new students have entered the local technical school: Herbert N. Herrick, Lexington, Va.; Harry Schrieber, Carnegie, Pa., both in engraving and watchmaking, and A. W. Arter, Sunbury, Pa., in engraving. Ralph Sprenger, Uniontown, Pa., a former student of the school, spent several days in Lancaster, last week.

Indianapolis.

Retail jewelry stores closed at noon on Labor Day, following their usual custom.

Charles B. Dyer, of Dyer Bros., is spending a week fishing with friends near Worthington.

A. R. Gray, of Gray, Gribben & Gray, and his family, is spending a few weeks at Mackinac Island.

Charles W. Lauer, of Charles W. Lauer & Co., has returned home from a vacation trip with his family at Lake Manitou.

After a business trip to mines in which he is interested in Wisconsin, A. P. Craft, of the A. P. Craft Co., has returned home.

Miss Daisy Dyer, assistant in the arts and crafts department of Dyer Bros., is home after a three weeks' vacation trip to Detroit, Mich., and Chicago.

F. T. Harmon, formerly in business at Scottsburg, has gone to Oklahoma, where he will open a retail jewelry store as soon as he finds a suitable location.

Mr. and Mrs. John P. Mullally have completed a three weeks' eastern trip, during which they visited Reading, Pa., New York City, Providence, R. I., and other cities.

Among out-of-town jewelers in this city, last week, were: J. C. Nutter, Martinsville; A. F. Froeb, Terre Haute; S. B. Merrick, Plainfield; A. G. Craig, Bicknell; S. W. Stunkle, with T. M. Jackson, Seymour.

Mr. and Mrs. Lon R. Mauzy have returned home after an extended western trip. They visited the Seattle exposition, then spent two weeks with Mr. Mauzy's parents at San Francisco, after which they visited relatives in Texas.

Dyer Bros. have issued cards announcing they will resume their classes in hand wrought jewelry, Sept. 27. They have received about 50 applications for entrance and are expecting the largest classes since they began arts and crafts instruction, some years ago.

Charles B. Dyer and George G. Dyer were called on one day last week to assist in a difficult operation at the Methodist Hospital, the first time in local history that a jeweler has assisted in a surgical operation. The case required the making and placing of a silver nose bridge for a young man from southern Indiana.

Frank E. Kaiser, Kansas City, Kans., is now a member of the Kaiser Jewelry Co.

Boston.

S. Scales, Winchester, has returned from an extended auto trip through Maine. The retail stores will be open Saturday afternoons beginning Sept. 18. The wholesale and jobbing houses will close on Saturday afternoons throughout the present month, resuming the Winter arrangement Oct. 2.

The decided advance in industrial training in the public schools of this city is fully shown by the announcement of the school board that beginning this month there is to be established a class in jewelry at the East Boston High School.

The handsome Summer residence of D. Percival at Marblehead Neck was being the most brilliantly decorated at "imitation night" Wednesday of last week in honor of the Sonder races at Marne. A clever arrangement of electric lights made the Percival house especially attractive.

Among the visitors to the Waltham Watch factory last week and who enjoyed thorough inspection of the plant was A. J. Perrine, Chicago. The train-makers had a most successful outing last Saturday afternoon at Childs Farm, Waltham. The Watch Factory band closed, Tuesday evening of last week, its season of free concert concerts at Robbins Park. The band's work was praised and endorsed on all sides.

David, aged 30 years, employed in the store the name of which the police are withholding, was arrested Thursday of last week on a charge of larceny and held for the Inspector Knox, who took David into custody, says that the young man's arrest is likely to clear up the mystery surrounding several attempts to steal jewelry from David's employers. The police claim to have found in David's locker an old bent pair of scissors, which fit, it is believed, marks made on the jewelry show cases.

Among the jewelers in town last week were George E. Twambly, Saco, Me.; J. R. Roe, of J. R. Roche & Co., Eastport; J. Charles Gaudette, Pawtucket, R. I.; I. Sinclair, Concord, N. H.; J. H. Tall, Exeter, N. H.; H. R. Kimball, Wakefield; S. W. Baker, Rockland; J. F. Leis, Beverly; L. R. Hapgood, Orange; E. F. Welch, Foxboro; L. W. Weston, South Framingham; H. H. Samuels, Grant Jewelry Co., Lowell; H. P. N. Dahl, Maynard; Clarence Foster, Foster Bros., Greenfield; A. E. Pero, Worcester, Mass.

A voluntary petition in bankruptcy has been filed by the New England Jewelry Co., in this city. The concern, which does an installment business in watches and jewelry, is conducted by William Bennett and his wife, Mary J. Bennett, who run a store at 155 Dorchester Ave., Dorchester. Mr. Bennett began business in 1905 at 127 Park St. from which he moved to his present address in October last. His principal business was selling watches and jewelry to the employees of the street car company and his debts consist principally of debts due on advances to his customers.

More than 150 men employes of the E. Howard Watch factory held an outing at his farm, Waltham, Saturday, Aug. 28.

Special cars conveyed the party from the factory and a procession from the trolleys to the farm was led by the E. Howard Watch factory fife and drum corps. Supt. W. B. Mohl, Foreman Charles Horner, Foreman Anton Sederquist and Foreman Walter Latham were among the most active participants. The special guests were A. E. Travis, W. Rowe, Frank Handrahan and J. Arthur Burke. The committee of arrangements, to whom much credit is given for the affair's success, was headed by Charles Schneider. The young women employes of the E. Howard Watch Factory are said to be planning a field day, to be held some time this month.

The Boston police received news from New York, Sept. 4, of the arrest in that city of William E. Murphy, who up to last June was employed as a collector and salesman by Robertson, Hartley & Co., 790 Washington St., this city. A large number of pawn tickets found in his room by the New York detectives led to Murphy's arrest. The Boston firm was surprised to learn that Murphy was in custody, as they had thought him on an extended vacation. It is alleged that he had between \$500 and \$1,000 worth of the firm's stock when he left. The Boston police say that they have located in this city watches, diamonds, rings and bracelets to the value of \$532.50, which they charge Murphy took from Robertson, Hartley & Co. The police also charge that Murphy stole between \$75 and \$100 in cash from Davis Bros., La Grange and Washington Sts., while employed by them as collector. The Boston police will, next week, ask for requisition papers and endeavor to bring Murphy to this city.

Newark.

TRADE CONDITIONS.

Reports as to business conditions are favorable all along the line and manufacturers are most optimistic. There is no unwarranted rush, but the constant demand for goods continues. Retailers continue to buy fairly liberally although cautiously as a result of two years of dulness.

Practically all the factories were closed on Labor Day.

Refiners in Newark report a heavier demand for gold than there is for silver.

The factory on Elm St., formerly occupied by manufacturing jewelers, is now vacant.

The Goldsmith-Koch Co. now occupies the easterly end of the first floor in the Crane building, Oliver St.

S. Piltch, dealer in diamonds, watches, jewelry and optical goods, has just started in business at 42 Springfield Ave. He was formerly in business at Port Richmond, S. I.

The Schickerling Mfg. Co., Mulberry St., has given the sole agency on the Pacific Coast to Alois Kohn & Co., who are represented there by A. Kohn, with headquarters in San Francisco.

John Miller, who was formerly employed by Fritchie & Co., died in this city, recently. Mr. Miller was born in Germany and came to New York at the age of 15 years. He later moved to this city. He leaves two daughters and a son.

The American Diamond Cutting Co., Edgewater, N. J., has been incorporated with a capital of \$2,000. The incorporators

are H. P. Jones, J. J. Harper and E. J. Forhan. The company is to cut and polish diamonds from the crude material.

Mr. and Mrs. Charles Champenois are touring Nova Scotia and other Canadian provinces, having recently started on the trip. They intend to visit various points of interest and will be away some time. Mr. Champenois is the senior member of the firm of Champenois & Co.

Through the daring of a colored man who visited his store at 163 Main St., recently, S. Raffal, a jeweler of Asbury Park, N. J., lost three diamond rings valued in all about \$145. They were taken from the window, he asserts, when he was in the rear of the room with his back turned. One was set with three stones and the other two each had one jewel.

Israel Berkowitz, 745 Broadway, Bayonne, N. J., appeared, last week, in the Recorder's Court as a defendant on charges of obtaining money under false pretenses by Philip Furshman, of Avenue C and 28th St. It appeared that Furshman was to back Berkowitz in the manufacturing jewelry business. Furshman, according to Berkowitz, gave him \$475 with which to buy gold and other materials from which to make the jewelry. The venture for some reason was not a success, and he contended that the money was never used to buy gold. The case on request of counsel was adjourned one week. It is believed that a compromise will be made and the matter settled out of court.

The Newark Technical School, 367 High St., the local seat of industrial education, will reopen the first Monday in October. It is expected that the class in jewelry and silverware designing will be unusually large this year, now that the work of the school is becoming better known. Because of Newark's great importance as an industrial center the necessity for such an institution is very apparent and manufacturers and business men are in hearty accord with its aims and objects. The school has been open only Wednesdays and Saturdays during the vacation season for the purpose of allowing all who desired to take vacations to do so. The last Monday in September will be the final date for the examinations.

The firm of Mueller & New, New Brunswick, N. J., has filed articles of incorporation and will continue the jewelry business now conducted by A. F. W. Mueller, at George and Bayard Sts. The forming of the company means that the business is to be developed and expanded. The new company will move into its handsome new building on George St. about the middle of next month and will have one of the finest stores in this city. The store will be equipped with new furnishings. A 10-ton safe has arrived to be installed in the new store. Mr. Mueller has been in business here since 1888, having first had a store on Hiram St. and then having moved to his present location. Ambrose New has been connected with him for the last 12 years.

H. T. Anderson, Sand Creek, Wis., has opened a jewelry and grocery establishment at Boyceville, Wis.

Louis Shafland, Roland, Ia., was a recent visitor in Cambridge, Ia., on a combined business and pleasure trip.

Have you ever seen Pink Amethysts?

Handsome stones of remarkable brilliancy and of the most delicate shades of pink.

These stones are cut in every size and shape for pendants, brooches, earrings, studs, etc.

They are especially commended to manufacturers on account of their beauty, adaptability, and moderate price.

D. E. D. McMURRAY, President

JOHN W. SHERWOOD, Vice-President

LOUIS J. MONTAGNON, Secretary-Treasurer

Pittsburg.

P. Hale, Akron, is spending two weeks at the Thousand Islands.

Frank Raine is out in Illinois, putting 70 weeks spending "the simple life."

J. L. Peddinghaus, Marietta, O., recently returned from an automobile trip to the Blue Hills.

The Rosenbaum Co. is making rapid progress on its new building at Fifth Ave. and Market St.

Warren Wattles, of the Hardy & Sons Co., is spending a few weeks on a tour of the arm at Harmony, Pa.

George S. Dunbar, of the Geo. B. Barrett Co., left, last Saturday, on a business and pleasure trip to New York.

A. Ott, Mansfield, is attending the convention of the Elks at Cedar Rapids, Iowa, of which organization he is a prominent member.

P. Humphreys, Bellefonte, Pa., was recently appointed watch inspector for the operation of the "Big Four" railroad which runs through his territory.

Following last Wednesday, most of the stores which had closed at 5 P. M. remained open until 5.30 P. M., which will be the closing hour for the remainder of the year.

Ele F. Roberts, of E. P. Roberts & Co., and president of the Jewelry Trade Club of Pittsburg, has returned from a vacation, spent in Canada. Mr. Roberts has the distinction of catching the largest fish of the season, weighing about five pounds.

The Brown Street Clock Co., is the name of a new concern formed recently at Monaca, Pa., by B. E. Brown, Walter Brown and Ross Brown, who are interested in the watch business. The clocks which the firm have commenced to build weigh 10 pounds each.

Mr. and Mrs. J. Harvey Wattles and their children returned last week from an automobile tour to Bemis Point, N. Y. The members of the firm of W. W. Wattles & Sons recently bought a touring car and are certainly getting much pleasure out of it.

The window of the store of William McKee's Rocks, was broken several days ago and a quantity of jewelry stolen. There is no clue, but it is presumed that the robbery was done by some of the men ignorant to take the place of strikers at a neighboring car plant.

Monongahela valley merchants are watching with much interest the protest being made by coal miners who object to recent legislation which interferes with their operations in the mines. It is feared that the miners will strike, which would have a direct effect on business.

Among the out-of-town jewelers who visited Pittsburg last week were H. R. O'Connell, Donora; Wm. M. Barbour, Midway; V. Rosendahl, Irwin; J. R. Thorn, Toronto; F. B. McKinley, Washington; and S. Schmid, New Castle; A. G. New Alexandria.

The Pittsburg Association of Credit Men last week held another of their midday meetings and ordered the sending of a message to Dr. Frederick A. Cook, discoverer of the North Pole, which read

as follows: "We are proud of you. Congratulations. Pittsburg Association of Credit Men."

The South Side jewelers are taking an active interest in the campaign to improve S. 18th St., making good use of buttons which have been gotten out by the thousand bearing the slogan "Open the door to the hilltops." The improvement of the thoroughfare would divert to them some business from a section inhabited by 100,000 persons.

City Councils recently passed an ordinance directing the director of the department of public safety to create the position of pawn clerk. Last week A. W. McCullough was named for the place. Under the law the pawn dealers must submit a description of all articles pawned, these being furnished daily. In this way the police are kept in close touch with the dealers and are frequently aided in running down robberies, because of this system. The pawn dealers also keep in close touch with the officers and when anyone of a suspicious character attempts to pawn articles the police department is promptly notified.

The W. J. Johnston Co. has rented 15 of the 17 offices on the fifth floor of the Union National Bank building, greatly enlarging its present quarters. W. J. Johnston told THE JEWELERS' CIRCULAR-WEEKLY correspondent that it would be some little time yet before he secured possession of all of them, but that some have already been given over to his concern. The Johnston company has been occupying half of the fifth floor, but the new acquisition gives to the concern all of the floor space of this, floor with the exception of two offices. Mr. Johnston reports business as increasing daily and much better than it was a year ago this time. In fact, the house is enjoying a most lucrative and profitable trade.

"How do you like that?" asked a prominent jeweler, the other day, when THE JEWELERS' CIRCULAR-WEEKLY correspondent entered his establishment, at the same time exhibiting two handsome pearl necklaces, with a diamond set in platinum in the center. "One of them is sold," he went on, "and my wife is the customer. Both are worth nearly \$4,000. You know, my wife saves her money and she has quite a snug sum in bank now. I encourage her in this sort of thing. She has been wanting a pearl necklace. I told her that I would sell her one. Of course, I will lose several hundred dollars on it, but I can afford to do that. When she goes out she will wear it and other women will admire it. That creates a demand for such things and even if it does not help me it will help others."

A fire broke out, Saturday morning, in the jewelry store of A. E. Siviter, in the Avalon Bank building, Avalon, a suburb of Pittsburg, and two men were injured while engaged in fighting the blaze. One of the men, J. A. Alberts, who lives in the rear of the building, was awakened by the smoke and was cut while breaking a glass window to gain access to the store. It is believed that the fumes from a dish filled with gasoline that had been left in the jewelry shop were ignited by a lighted gas jet and this set fire to the place. Mr. Siviter is away from home at the present time on his va-

cation. He lives in Bellevue, a neighboring town. Considerable ill luck has followed Mr. Siviter's efforts in business. It is not known what the loss is, but it is believed to be covered by insurance. Some say that his stock was damaged to the extent of \$200, while \$300 will cover the damage sustained by the building.

When Jacob Green's store was opened for business last Friday morning in Schoenville, where the big strike of the Pressed Steel Car Co. is in progress, the jeweler found tacked above his door signs which read as follows: "Congratulations from the strikers." Inquiry developed the fact that Mr. Green and Miss Mollie Lewis, of 1308 Locust St., Pittsburg, had been married Aug. 31. The strikers, who are very fond of the jeweler, wanted to show their appreciation, so it was decided to put the signs on his door. Six of them were placed in conspicuous places, all written in as many different languages. The strikers were quick to manifest their pleasure at the wedding when they heard what had occurred. The wedding took place at the home of the bride and in the future the couple will make their home in the apartments of the Victor Bank building, in which building Mr. Greene's store also is situated.

Canada Notes.

E. A. Kerr, Edmonton, Alb., is out of business.

W. F. Mercer, Lindsay, Ont., has gone out of business.

A. H. McIntyre, Portage la Prairie, Man., has sold out his business.

John W. Gabriel, Halifax, N. S., has given a chattel mortgage to Henry Kitz.

The jewelry stock belonging to the estate of S. H. Lawrence, Salmon Arm, B. C., has been sold to F. G. Burns.

Henry Birks & Sons, Ltd., have given a silver cup as a prize for a five-mile foot race, which is to be run as one of the amusement attractions at Sherbrooke Fair, this month.

W. M. Birks, of the firm of Henry Birks & Sons, Ltd., Montreal, has publicly expressed himself in favor of the principle of civic government by a board of control. This is a very "live" question in Montreal at the present time, and the opinions of leading business men are being sought as guidance for the electors, Sept. 20, when a referendum will decide whether a change shall be made in the system of civic government.

On the occasion of the visit of Lord Strathcona, Canadian High Commissioner in England to Winnipeg, a civic address of welcome was presented to him, Aug. 25. It was inclosed in a silver casket manufactured by Andrew & Co., Main St., Winnipeg, of sterling silver, 10 inches long by seven inches wide and nine inches high, weighing 100 ounces. It is surmounted by the figure of a buffalo. On the front is embossed the arms of the city of Winnipeg, and the reverse side bears an appropriate inscription. The right end shows the coat-of-arms of Lord Strathcona embossed in relief, and on the opposite end is a reproduction of old Fort Garry.

DESPITE the fact that over \$5,000,000 worth of diamonds and precious stones were imported during the month of July, the importations for the month of August were among the greatest in history for this period of the year. That the total for the month just passed is a surprise to the most optimistic members of the trade goes without saying, as it was generally known that the unusual importations in July were due not to the demand for that month, but to forestall the demand for future months on the chance that the new tariff law would increase the duty and thereby saving at least five per cent. on importations entered before the tariff law went into effect. As it happened, there was no change in the tariff law and normally the buying on the other side should have diminished for a while. That it did not is manifest in the fact that during the month of August there passed through the Appraisers stores at New York gems to the total value of \$3,262,099, a total which exceeded the importations of the corresponding month of the previous year by over \$2,000,000, and in fact exceeded the total of any August recorded in New York, with the exception of the August in 1906, when \$3,382,000 worth were brought into this country.

Of the total gem importations last month the value of the cut precious stones and pearls was placed at \$2,566,349, which is over \$1,500,000 more than the total last August, and the largest amount ever recorded for the month. The value of the uncut precious stones, principally diamonds, was \$695,749.82, as against \$280,211.57 last year. This amount is only exceeded by one previous August, that of 1906, when the rough totaled \$884,837.96.

How the importations for the past month compare with those of August of previous years will be seen at a glance from the following table:

Table with 4 columns: Aug., Cut, Uncut, Total. Rows show data for years 1909, 1908, 1907, 1906, 1905, 1904, 1903, 1902, 1901, 1900, 1899, 1898, 1897.

FOR the first time in many years a Novel Point in Customs Law. The mercantile interests of the country have no cause to complain against the customs authorities for any laxness in enforcing the customs law as far as tourists and returning residents of the United States are concerned, because the Administration, in New York at least, seems to be making an honest effort to prevent smuggling and collect on dutiable articles in every way, even though they have had to go to an extent that has brought down criticism on the heads of officials from sources which sympathize with the respectable (?) and amateur smuggler.

New and profitable business will come to you through an intelligent use of our advertising columns.

The Government enforcement of the customs law in collecting duty on articles of personal adornment and personal effects has not been accomplished without raising a number of interesting and some "knotty" questions, some of which will have to go to the courts for final settlement. Some of these questions are most important to the mercantile interests generally, because if the Government should be beaten certain of the provisions of the law covering the entry of personal effects will in a way be nullified, and residents or tourists may accomplish by indirection what the law says cannot be done directly.

A typical case of this kind has arisen relative to the seizure of a necklace which was originally brought into this country without payment of duty on the claim of the woman who brought it here that she was not a resident and therefore entitled to claim free entry for it as a personal effect needed for the comfort and convenience of her journey. After coming to this country she presented it to a relative who was a resident of this country, and the woman who received it took it to Europe with her and brought it back, claiming free entry because it was part of the personal effects which she had taken abroad with her.

The Collector at New York seized the necklace and is attempting to make a test case of it because if the contention of the two women are allowed to stand our rich tourist smugglers whose practices are being thwarted by the rigid inspection system now in force will be able to get around the law, so far as jewelry is concerned, by simply having the jewelry which they buy abroad brought in by a non-resident as a personal effect, and then transferred or sold to the intended owner in this country. The point raised by the customs officials in this case is interesting from a legal standpoint, and at the same time is most important to the business world.

Care Needed in THE tendency among women Use of Gem Names. to match fabrics or dress material with precious stones or gem minerals of suitable color and substance has not only caused a large demand for American gems and gem matrix and minerals which years ago were little used in jewelry, but has also been the cause of a number of varieties of gem matrix and material being put on the market under special names. Some of these names are mineralogically sound in description, while others are to some extent ridiculous, and still others misleading. It is but natural that a layman who finds a pretty material which he thinks can be cut up

into a gem should magnify the importance of his discovery and give the material a high sounding or fancy name and to sell it to the public as a novelty. How jewelers can in no way afford to be party to these transactions, because they are imposed by the public to have the professional knowledge of gems and gem material; to understand the meaning of names to realize that every crystalline substance which gets a pretty color by a transparent metallic oxide is not necessarily a new gem material which will make a name in the jewelry trade.

Before engaging in the sale of a gem about, any gem material or substance which he believes to be new, the jeweler should see that he is informed exactly of its properties, chemical and physical, and it is clearly shown that the name which it passes is in no way misleading and correct from a descriptive standpoint as a jewelry or mineralogical standard.

Connecticut.

C. H. Hibbet, Wallingford, well known in the jewelry trade, has resigned as president of the Wallingford Auto Club.

G. B. Owen, general manager of the L. Gilbert Clock Co., Winsted, Conn., and Mrs. Harriet M. Bleuher were recently united in marriage.

The employees of Dunbar Bros. Spring Co., Bristol, enjoyed a picnic at the Bristol Gun Club's grounds, Saturday afternoon, Aug. 28. About 40 employees attended.

At a meeting of the directors of the International Silver Co., Meriden, Conn., a week ago, a dividend of 1 1/4 per cent was declared on the preferred capital stock payable Oct. 1.

The business of L. Boardman & Co., East Haddam, is about to be discontinued. The concern was founded by Luther Boardman, who passed away about a quarter of a century ago.

Albert Sido, 52 years old, formerly an employe of the Waterbury Clock Co., Waterbury, was found dead in a room in Waterbury, about 7 o'clock on the morning of Aug. 27. Sido is believed to have committed suicide.

James Melville Clarke, at one time engaged in the jewelry business, died at 29, at the New Britain Hospital. He ceased was born March 27, 1847, and learned the jewelry trade with the firm of Churchill & Lewis, on Main Street, Britain, but later went into business for himself.

John Jessup was recently taken into custody in Waterbury by Detective Sergeant Owen J. Davey, on a charge of stealing rings valued at about \$400 from J. J. Smith, a watchmaker of New Haven. Smith is also wanted in Philadelphia on a charge of embezzlement by him. Smith is about 36 years of age, and was formerly employed as a watchmaker by John Jessup up to the time the alleged embezzlement occurred.

Isiah Randall, who was engaged in the jewelry business in Seneca Falls, died suddenly, Aug. 28, of a heart attack. Mr. Randall, who was 58 years of age, had been in poor health for some

New York Notes.

J. Hayes, buyer for Alfred Hayes, Montreal, Can., was at the Astor House, last week.

Julius Jurgenson, of this city, has taken a position with G. William Reischer, Lancaster, Pa.

William Lowe, with Austin & Stone, 15 Maiden Lane, is making a short middle western trip.

Charles E. Stanley, with the Estate of O. Draper, is visiting the factory at Northboro, Mass.

Oster Smith, Attleboro, Mass., has been engaged on the sales force of the J. E. Co., 37 Maiden Lane.

William Williams, of Williams & Payne, Providence, R. I., was at the local office, 180 Broadway, last week.

Al A. Reichman, of Reichman Bros., 65 Duane St., is on a western trip for the week. He reports good business.

Joseph Fahys, of Joseph Fahys & Co., 37 Maiden Lane, has been on an automobile tour in his car with friends. He arrived in the metropolis yesterday.

The Jewelers Board of Trade announce that has sent out a 33 1-3 per cent. payment in full composition in the matter of Douglas Jewelry Co., Guthrie, Okla.

Robert Windau, Milwaukee, Wis., I. E. Comanche, Ia., and S. M. Henderson, Vincennes, Ind., were among the out-of-town visitors in this city, this week.

The stock of jewelry belonging to the estate of Sol Karger, who was formerly in business in this city, was scheduled to be sold at public auction, yesterday, at 113 Ward St.

Louis Manheimer, of Louis Manheimer Co., 35 Maiden Lane, accompanied by his daughter, has returned from a trip in Europe. They came home on the *Kronprinzessin Cecilie*.

John L. Shepherd, of the Keystone Cash Case Co., left, Saturday, for a trip to the Pacific coast. He expects to visit the Keystone Park and other places of interest in the west.

The firm heretofore known as the Senese-Laboureur Co., manufacturing jewelry, 102 Fulton St., will in the future be conducted by Henry Senese, Mr. Laboureur having withdrawn.

Geo. F. Kunz, head of the precious stone department of Tiffany & Co., had an interesting article on "The Strange Formation of Precious Stones" in the last issue of the *Saturday Evening Post*.

The Fred G. Burgess Co., Brooklyn, has been incorporated as manufacturers of jewelry, with a capital of \$15,000. The incorporators are: F. G. Burgess and Max A. Brooklyn, and Fred W. Decker, of Manhattan.

Among the out-of-town jewelers visiting the metropolis, during the past week, were George Phillips, Scranton, Pa.; Arnold Reichman, Lancaster, Pa.; C. H. Klaholt, Springfield, Ill.; Daniel O'Brien, of Russell O'Brien, Binghamton, N. Y.

Rolph Kohl, who was brought from New Jersey on extradition papers after being charged with appropriating a large quantity of jewelry belonging to Nebeling Silverberg, 49 Maiden Lane, has been

held in \$5,000 bail. His case is down for trial to-day.

The Broadway Diamond Importing Co. has been incorporated to deal in watches, diamonds, jewelry, etc., with a capital of \$20,000. The incorporators are: Ralph Jacobs, Harry C. Adams and H. R. Berlinicke, all of this city.

The Socialist Labor party, composed of the De Leon Socialists, has announced that it has nominated its municipal ticket for New York. The nominations include the name of James T. Hunter for Mayor. Mr. Hunter is described as a silversmith.

The Dolgin Jewelry Co. has been incorporated under the laws of New York State to deal in jewelry novelties, etc., with a capital of \$1,000. The incorporators are: Samuel Dolgin, 36 Eldridge St.; Jacob Beckman, 182 Clinton St.; Rose Beller, 22 E. 106th St., all of New York.

J. F. Marks, of Borrelli & Vitelli, 401 Broadway, has started on his Pacific coast trip and will be in Chicago, this week. G. B. Vitelli, of the same firm, sailed, Saturday, on *La Savoie* for home after spending three months inspecting the branches at Paris, London and Naples.

The silver plating factory of B. W. G. Creamer & Co., near the Erie Basin in Brooklyn, caught fire at 6:30 last Wednesday morning, and the damage done before the blaze was extinguished was estimated at about \$1,000. The loss is covered by insurance. The cause of the fire is unknown.

Nathaniel Langford (Inc.) is the name of a concern which has been incorporated under the laws of the State of New York to manufacture and deal in jewelry, clocks, watches, etc., with a capital of \$5,000. The incorporators are: Nathaniel and Nellie E. Langford and Ephraim Langford, of this city.

Eleanor L. Beattie, who was arrested in London last June on a charge of grand larceny, preferred by the Gorham Co., appeared in the Bow St. police court, London, last Thursday, and waived defense and asked that she be sent back to this city immediately for trial. The magistrate, however, after committing her for extradition, decided that she must remain in London for 15 days, as provided under the extradition law.

An exciting game of baseball is scheduled for next Saturday between the New York and eastern salesmen in the Maiden Lane district. The game will be played at the McAvoy Oval, 145th St. and Lenox Ave., and is one of a series of games, the first of which was won by the eastern representatives. Ample seating room is provided at the grounds, and it is hoped that a large crowd will be in attendance. The game will be played for a money consideration and each team is determined to win.

The Jewelers Security Alliance was notified last week that a young man, who is being held at Mansfield, O., went into the jewelry store of Lewis A. Ott, of that city, and asked a clerk to look at a diamond ring. The young man picked out the most expensive ring in the lot, valued at \$300, and after placing it on his finger took off the tag and started toward the door, saying he would pay for it later. An attempt to stop him was

made, but he reached the street, where he was followed for some distance and finally arrested. The ring disappeared and cannot be located. The young man is highly regarded in his local community and it is thought that he is subject to attacks of mental aberration.

A noonday habit of thousands was rudely interrupted, Friday, by the failure of the time ball to drop. The usual crowd gathered in the vicinity of Broadway, John, Dey and Fulton Sts., but when watches by the hundred registered 12 m. and the ball did not drop the throng increased fivefold. It took seven minutes for the people to realize that the time ball was delinquent, then some investigative person went into the Western Union offices to discover why it had not dropped. As a matter of fact, the Western Union people had no idea that the ball was out of order. They said it was released by a Washington impulse, and they came to the conclusion that something had gone wrong with the electrical connection. Finally the ball was released by hand, and as it slid slowly down the pole the crowd dispersed.

As the result of the stringent provisions of Section 7 of the new tariff law regarding the labeling of merchandise of foreign origin, many importations, aggregating hundreds of thousands of dollars, are detained in the Seizure Room at the Appraiser's Warehouse awaiting compliance with the revenue act. It is said that the failure of the exporters on the other side to comply literally with the labeling provision of the law is due to the fact that copies of the tariff act have scarcely had time to be translated into various foreign languages and generally distributed abroad. Importations under the new tariff are increasing rapidly, according to a statement issued by George W. Wanamaker, Appraiser of the Port. The appraiser's report, which is for August, shows that the total appraised value of foreign merchandise entered at this port, last month, aggregated \$74,477,521, compared with \$53,061,629 the same month one year ago.

The Board of United States General Appraisers held, last week, that when cuff buttons consisting of link mountings and settings of sapphire are imported separately they are to be considered as entireties for the purpose of levying duty. In accordance with this principle, the Board of Appraisers affirms the action of the customs authorities in exacting a duty of 50 per cent. under the specific provision in the new tariff for collar buttons. The case stood in the name of Spaulding & Co., Chicago, but the ruling made applies to all importations of a similar character, where it is intended to assemble the articles and constitute a unit. It is intended by the importers that the stones should be assessed as precious stones advanced in value or condition at 10 per cent. and the mounting at 45 per cent. under the provision for metal. The decision says that testimony shows that various parts of cuff buttons were separately placed on the same invoice and imported on the same vessel, coming to the same consignee or their order, and under these circumstances the appraiser is of the opinion

New York Notes.

(Continued from page 87.)

those articles constitute entireties and therefore are dutiable as assessed. The protest was accordingly overruled.

Kingold & Son, jewelers, have leased the store at 641 Sixth Ave., from S. May.

I. Dworin has recently started in business at 803 Flatbush Ave., Brooklyn, N. Y.

M. Laird, Prairie du Chien, Wis., is bringing the out-of-town visitors in New York, last week.

Edward M. Coe, who is in charge of the Bros. Co.'s New York office, spent Labor Day at Attleboro, Mass., leaving that night for the middle west.

Wm. M. Miller, of Doran, Bagnall & Co., of Attleboro, Mass., was a visitor to New York, last week, and was among the guests at the office of THE JEWELERS' CIRCULAR-WEEKLY.

H. De Jong, 35 Maiden Lane, accompanied by Mrs. De Jong, returned, Saturday, on the *Philadelphia* from a two months' trip abroad. They visited during that time principal diamond markets.

F. Varney, Wichita, Kans., who is president of the Varney Jewelry Co., of that city, was among the out-of-town visitors here, last week, who called at the office of THE JEWELERS' CIRCULAR-WEEKLY.

The Omega Watch Co. has started its traveling representatives on the road from its city office at 21 Maiden Lane, which is under the management of Jules H. Lacroix.

The New England States are being covered by Harvey P. Day and the middle States by H. Sackett.

As E. Rice and Geo. Widenmeyer, formerly in business as Rice, Widenmeyer & Co., have dissolved partnership, Chas. Rice having withdrawn from the firm. The business will be conducted in the future by Geo. Widenmeyer, associated with Frank Schaller and Adolph Hentschel, in the style of Wodenmeyer, Schaller & Co., at 45 John St.

The Jewelers Security Alliance has been notified by Jos. Gumpert, 2218 Ridge Ave., Philadelphia, Pa., that his store window was recently broken into and between \$400 and \$500 worth of goods taken. O. A. Dupstadt, Vandergrift, Pa., has also notified the Alliance that a new plate-glass window in his store was smashed and about \$100 worth of goods taken.

Bernard Eisenberg, who conducts a retail jewelry store at 179 Smith St., Brooklyn, and Miss Bessie Busloff, 132 E. 2d St., will be married Sunday evening, Sept. 12, at the Great Central Palace, 90-96 Clinton St.

Mr. Eisenberg and his bride will then depart on a short honeymoon, during which the store will be in charge of his sister.

Customs Inspector Timothy Donohue, in making his way about the pier in plain clothes, Sunday, saw odd bulges in the pockets of a returning passenger who said he was a dealer in art novelties, in business in his city. Donohue made an examination and found several pieces of jewelry which had not been declared. These were seized and await appraisement.

In a recent issue the announcement was made of the retirement from active business of Jules H. Lacroix, formerly a jobber in watches at 35 Maiden Lane. Subsequent information has proven this to be erroneous, as Mr. Lacroix is engaged in business more actively than ever before and is in charge of the New York office of the Omega Watch Co., 21-23 Maiden Lane, where he will be pleased to again meet his friends in the trade. Mr. Lacroix is looking after the city trade for this concern.

A second-cabin passenger on a North German Lloyd steamer which arrived last week from Bremen, in his declaration to customs officials, said that he had only \$48 worth of dutiable goods, and was permitted, after his baggage had been examined, to start for the gate at the end of the pier. There he was detained by an inspector, who felt things in the pockets of his overcoat, which he carried on his arm. It was discovered that he had a coral necklace, a pair of earrings and cutlery, valued at \$180, in his possession. He was taken before United States Commissioner Russ, in Hoboken, and held for examination.

The first of the Fall meetings of the Optometrical Society of the City of New York will be held in its room, 29 W. 39th St., this evening at eight o'clock. The executive committee will submit the revised constitution and by-laws, which is an important matter, as it involves several new and interesting points. There are several other important matters to be disposed of and a very interesting meeting is promised. In accordance with a resolution adopted at the June meeting, each member in good standing will be supplied with a card of admission, to be used hereafter in gaining admission to the meetings. There are two coupons attached to each card for the use of prospective members.

The Davis & Hawley Co., Bridgeport, Conn., reports to the Jewelers Security Alliance that they are the victims of a clever crook who passed a worthless check for \$15 on this concern. It was drawn on the Colonial Bank of New York City. The man who passed the check claimed to be a member of the firm of Braman & Braman, 120 and 1274 Broadway, New York, and presented a business card with that address. The jewelers learned later that he was not a member of this firm, but is related to someone connected with the business. The young man is described as about five feet seven inches tall, weighing about 180 pounds, has a dark complexion, is quite stout and has a round, full face. He was well dressed.

Officers are looking for Raymond Jacobs, 16 years old, who is charged with robbing Barr & Willis, jewelers, of Huntington, L. I., of cash and diamonds valued at \$300. Young Jacobs was sent to the bank to deposit \$147. He did not return and investigation showed that he had not called at the bank. It was then discovered that two diamond rings valued at \$150 were missing from stock. Although the boy had only an hour's start and was seen by an officer after he left the store, he could not be located. A Brooklyn boy, who with his parents has been spending the Summer at Huntington, is also missing. He and Jacobs have been very intimate. It is believed the boys have gone away together.

Young Jacobs' parents, who are said to be well-to-do residents of Bayside, will make good the loss to Barr & Willis.

The bowling season is approaching and already the schedule committee of the Jewelers' Bowling League is hard at work trying to arrange the games for the coming tournament. Much interest in past years has been shown in the contests and it is expected that this year will be no exception. The following teams will roll for honors: Robt. H. Ingersoll & Bro., Joseph Fahys & Co., Ilgen & Wakefield Co., Hayden W. Wheeler & Co., Tiffany & Co., William Barthman, Mumford & Galaway, Solidarity Watch Case Co. and J. J. Donnelly. It will be noted that several new teams appear in the list, while some of the old names are missing. The season will start Sept. 20 and the games will be rolled on the Universal Alleys, Brooklyn, as was the case last year. The schedule committee consists of W. C. Weber, H. Laboureur and F. Schaller.

Artistic medals designed by Emil Fuchs, sculptor-artist, for the Hudson-Fulton Celebration Commission, have been placed on exhibition in the windows of Abraham & Straus, Brooklyn. These medals are to be made for the commission in various metals. Medals of the same design are to be issued, three inches in diameter, to be made of Alaskan gold, and given to the heads of nations sending representatives to the celebration. Solid sterling silver medals of the design are to be given to principal guests or sold to the members of the commission at \$10 each. The same model in sterling silver, of smaller size, will be sold to the Citizens' Committeemen and official aids at \$4. Bronze medals, two and one-half inches in diameter, will be given as souvenirs of the banquet at the Astor Hotel. These will not be for sale. Others will be issued as prizes, etc., in different sizes and metals.

Mr. Neuss, a watchmaker in the employ of A. Weiss, 666 Nostrand Ave., Brooklyn, reported, yesterday, that a young man came to the store recently, accompanied by a customer, and displayed a diamond on which he asked an appraisal. The watchmaker, after examining the stone, placed its value at \$125. The man who was known at the store said he was thinking of buying it. After replacing the diamond in a tissue paper, the men went away. The next Monday morning the customer returned and said that he had purchased the diamond and wished to have it mounted. A glance at the stone to be mounted showed it to be paste. The young man was much surprised at learning that he had been swindled. He said that he had paid \$50 for the imitation diamond. It is also reported that the stranger who disposed of the stone is working elsewhere in the trade, and jewelers are warned to beware of him. He is described as about five feet five inches tall, stout of build, dark complexion and clean shaven. He was well dressed and looked prosperous.

C. Leith, for many years with T. & E. Dickinson & Co., Buffalo, N. Y., has formed a partnership with C. E. Martin, formerly of Humburch Bros., Rochester, N. Y., to manufacture jewelry and platinum mountings at 217 Chamber of Commerce building, Rochester, N. Y.

Edgar C. Lahey and Norris G. Abbott were members of the committee of arrangements for the Knights Templar pilgrimage to Narragansett Pier on Labor Day.

The regular monthly meeting of the directors of the Manufacturing Jewelers' Board of Trade will be held at the rooms of the association next week on Friday.

Emanuel Hamberger, representing the H. B. Claffin Co., New York, was a visitor among the local manufacturers, the past week, and placed a number of orders for holiday delivery.

At the annual meeting of the Buttonwoods Hall Association, on Monday evening, William A. Schofield and Edward B. Hough were elected as members of the board of directors.

Henry Fletcher, of the Fletcher-Burrows Co., manufacturing jewelers, announced Friday that he would be a candidate on the Republican ticket for re-election this Fall as Mayor of this city.

The Fall term of the Rhode Island School of Design will begin on Sept. 20, and already the entries filed in the jewelry and designing department is very satisfactory and encouraging.

Mr. and Mrs. William H. Manchester have returned to their Summer home at Buttonwoods Beach after a two weeks' automobile trip through Maine, New Hampshire and Massachusetts.

William P. Chapin, of the Chapin & Hollister Co., accompanied by his wife, son and daughter, Robert and Miss Grace, who have been spending the Summer abroad, arrived home the past week.

Mr. and Mrs. Edward B. Hough, Walter S. Hough, Mrs. Charles Wilkinson, Mrs. H. B. Hough and Mr. and Mrs. Howard Wilkinson took a motor trip to Bell Texe Club, Long Island, over last Sunday.

Timothy Pratt, an old-time manufacturing jeweler, was adjudged of unsound mind in the Sixth District Court, last week, and was ordered by Judge Rueckert committed to the State Hospital for the Insane.

John M. Buffinton, George M. Baker, William H. Bell and Sidney O. Bigney were among the jewelers who attended the 50th annual clambake of the Rehoboth Antiquarian Society at Rehoboth, last Tuesday.

Among those who participated in the 40th anniversary outing of the First Light Infantry Veteran Association at the Grover Club, on Thursday last, were Col. Byron E. Daggett, Major Leander C. Belcher and Robert E. Lowe.

Jennie Casey, 29 years old, was before the

Sixth District Court on Friday charged with the larceny of \$14.27 worth of jewelry and other goods from the Outlet. She pleaded guilty and was sentenced to pay a fine of \$20 and costs.

Washington R. Prescott has been given a decision for \$25 and costs on book account against Barnet Bander et al., the defendant not appearing in the Sixth District Court, Civil Session, when the case was called before Judge Wright on Friday.

William Clark, Jr., of Clark & Coombs Co., manufacturing jewelers of this city, is receiving the expressions of sympathy from a large circle of acquaintances in the trade here at the recent death of his wife. Mr. and Mrs. Clark had been married for more than 59 years.

Among the jewelry buyers in the city, the last week, were noted the following: C. H. Brady, of the C. D. Peacock Co., Chicago; Miss Henrietta Graf, of Berg Bros., New York; L. S. Joslow, Montreal; James Eastwood, New Glasgow, N. S.; M. Auerbach & Co., Montreal.

Horace M. Peck, manager of the Manufacturing Jewelers' Board of Trade, who has been spending a few days' vacation with his family at Franconia, N. H., returned, the latter part of the week, and accompanied the Knights Templar on their pilgrimage to Narragansett Pier.

Paul Newman, formerly of Workman & Newman, who recently returned from a four months' tour of Europe, has opened salesrooms at 433 Westminster St. as an importer of jewelry novelties from European manufacturers. The firm style will be the Newman Importing & Mfg. Co.

Maj. Howard D. Wilcox, of D. Wilcox & Co., who is inspector of rifle practice in the Rhode Island National Guard, returned, Monday, from Camp Perry, O., where the National Guard rifle shoot has been in progress. He was captain of the rifle team that represented Rhode Island at the range.

The E. A. Eddy Machinery Co., of this city, has recently purchased the tools and machinery of the L. G. Young Co., Plainville, Mass., which recently went out of business. It has also purchased the plant of the Eastern Carolina Silver Co., Hartsville, S. C., manufacturers of britannia goods.

Articles of incorporation have been filed at the office of the Secretary of State by Joseph W. Heller, Ralph Krauss and Thomas Curran. The firm is to be known as the J. W. Heller Co., and will engage in the manufacture of jewelry. It is to be located in this city and will be capitalized at \$100,000.

Among the foreign importations received the past week through the Providence Customs House were the following: From Bremen, 10 packages of imitation precious stones and three of jewelry; from Hamburg, nine packages of glassware; from Liverpool, one package of clocks; from Toronto, one package of jewelry.

Darius Whitford, for over 20 years an employe of George H. Cahoon & Co., manufacturing jewelers, died at his home, 94 Glenham St., Wednesday afternoon. Mr. Whitford was 77 years, four months and 19 days old. He was born in Pocasset, R. I., and was the son of Thomas and Rachel Whitford. He was one of the best

NEW CATALOGUE upon application to any JOBBER

::

37 Maiden Lane, New York

Attleboro.

Ralph Regnell has recovered from his recent slight illness.

S. O. Bigney attended the Antiquarium bake, last week, at Rehoboth.

All the local factories were closed, Monday, in observance of Labor Day.

F. R. Truell is making a western trip in the interest of the W. H. Saart Co.

Charles H. Tappan returned, last week, from Falmouth, where he passed the Summer.

The J. T. Healey & Son ball nine has been admitted to the Interstate Baseball League.

L. E. Fay, of the R. F. Simmons Co., has gone on a trip to the coast in their interests.

The new Bliss school house, which was named after the late Charles E. Bliss, was dedicated, last week.

One of Charles Tappan's horses, "Simon Kenton," won the \$15,000 derby, last Thursday, at Readville.

Charles H. Barrows, of the Bay State Optical Co., returned, last week, from a short stay at New York.

J. M. Fisher was elected, delegate to the State convention by the Prohibitionists, last week, at their Fall caucus.

C. M. Robbins, of the C. M. Robbins Co., is mentioned as a possible candidate for the position of Congressman, to succeed Congressman W. C. Lovering, who positively refuses another term.

Geo. F. Kelly, formerly treasurer of W. H. Saart & Co., is no longer connected with the concern, and his stock, together with that of Miss Lydia Peck, consisting of 100 shares, has been secured by W. H. Saart.

E. D. Guild recently received a visit from H. H. Taylor of Wakefield, Daniel Smith of Richmond, Va., J. H. Rhoades of Pawtucket and E. C. Martin. The host and the party are all that remains of the 1st Rhode Island Cavalry, and a pleasant time was enjoyed talking over the stirring war times.

Work has been commenced on an addition to the factory of the Pinberg Mfg. Co., on Park St. It will be 36 by 36 feet and will be added to the rear of the present factory. It will be two stories high, and the contractors have been urged to rush the work, as the concern badly needs the extra space.

Frank, the eldest son of Frank Fontneau, of the Fontneau & Cook Co., jewelry manufacturers, was married, last Wednesday morning, to Miss Cora La Fleur, also of Attleboro. The wedding took place at St. John's Church. Rev. Fathers John O'Connell, J. F. McKeon and J. F. Lyons were the celebrants of the mass. The church was well filled with relatives and friends.

Lester Tallman, formerly a member of the advertising staff of THE JEWELERS' CIRCULAR-WEEKLY, who is well known in the trade of this section, is now connected with the C. H. Eden Co., for which he will cover New York, Philadelphia, Baltimore and Washington, with headquarters at 37 Maiden Lane, New York. Mr. Tallman's many friends wish him success in his new venture.

The new building which Edward A.

Sweeney, of the W. H. Wilmarth Co., has donated to the Methodist Church for a home for girls is almost ready for occupancy and will offer accommodation for a number of girls. Only a small amount, sufficient to maintain the institution, will be charged. The announcement of the gift was made several months ago in THE JEWELERS' CIRCULAR WEEKLY.

North Attleboro.

W. H. Bell attended the Antiquarium bake at Rehoboth, last week.

Alpin Chisholm left, last Thursday, for a short pleasure trip to Canada.

A large well is being dug in the yard of the T. I. Smith & Co. factory.

Harry C. Kip, salesman for the H. F. Barrows Co., is making a western trip.

H. C. Saunders has returned from a short stay at Oak Bluffs with his family.

Donald Le Stage left, last week, for the west in the interests of the H. D. Merritt Co.

William Peckham, of the J. H. Peckham Co., arrived home from the far west, last week.

William Riley, of Riley & French, attended the horse-races at Readville, last week.

Roy Blackinton, of R. Blackinton & Co., is the proud father of a daughter, born Aug. 28.

The new boilers at the factory of the G. K. Webster Co. were used, last week, for the first time.

S. Mandalien returned, last week, from the west, where he has been traveling in the interests of his concern.

Charles Stanley, New York representative of the Estate of O. M. Draper, was in town, last week, for a few days.

The four large cups which were given as prizes at the St. Mary's Marathon race were made by the Derby Silver Co.

While T. I. Smith was in his factory, last Thursday, one of his horses ran away and considerable damage to his wagon resulted.

William Barlett, who was formerly with the Stafford Ring Co., Providence, has taken a position as salesman for the Farmers and Drivers' Stock Yard Co.

All the factories at Plainville which were obliged to shut down on account of the breaking of the engine resumed operations, last Wednesday, and are now working 13 hours a day to make up for lost time.

Ed. Williams will hereafter conduct the business of Ed. Williams & Co., North Vernon, Ind.

known of the old-time, all-around journey-men jewelers of this city.

The employees of the Universal Die Sink- ing Co. held their annual outing on Saturday. The party left the city by boat at 11:15 and went at once to Field's Point, where dinner was served. After the dinner the merry-makers again boarded the steamer and proceeded to Crescent Park, where the various amusements were enjoyed during the afternoon and evening. The outing was arranged by Harry Burt, of the firm.

J. W. Cunningham, manager of Newcomb's optical business, on Mathewson Street has just returned from a 10 days' trip to Nova Scotia, going out through Canada to Chicago and back via Cleveland and Buffalo. His sister, Mrs. Urquhart, with her young daughter, from Riverside, Cal., have been visiting in the East and he accompanied them on their return as far as Chicago. Mr. Cunningham has recently purchased the two family house and property at 20 Park Ave., Egewood, R. I., where he expects to live with his family after they move up from down the river, where they spend the Summer months each year.

A temporary injunction, issued last week by Judge A. L. Brown in the United States Court for the District of Rhode Island, prevented the auction sale of the plant of the United Brush Co., at Pawtucket, and may have the effect of straightening out the involved financial situation of the concern. Archibald C. Matteson was appointed by the court as receiver. The concern has been in financial difficulties. The Lerner Realty Co. with a claim of \$1,200, F. Rosenhirsch with a claim of \$409, and M. Firschbaum with a claim of \$332.20 filed an involuntary petition in bankruptcy against the company. An injunction was secured in behalf of the creditors to prevent depreciation of the property through sale, as they are confident that the business can be made a financial success with results that will be far more satisfactory to the creditors.

A committee of 22 representative business men was appointed, Sept. 3, by President Frank O. Filed, of the Providence Board of Trade, to arrange for the entertainment of the Honorary Japanese Commercial Commissioners, who are to visit the city next month. The appointment of the committee was authorized at a special meeting of the executive council of the Board of Trade, held earlier in the day. Among the appointees are Mayor Henry Fischer, of Fletcher-Burrows Co., to represent the City Government, Nathan B. Eaton, of Ostby & Barton Co., and Harry Cler, of the Cutler Jewelry Co., to represent the manufacturing jewelry industry; John F. P. Lawton, of the Gorham Mfg. Co., to represent the gold and silverware industry and Henry D. Sharpe, of Bowne & Sharpe Mfg. Co., to represent the same. The commissioners are expected to arrive in this city on the afternoon of Oct. 11 and to leave for Boston the following morning, although an effort is being made to secure the commissioners' stay in this city longer than has been allotted to them. Visits to the leading manufacturing establishments will be the plan of the entertainment that will be arranged.

Bliss Bros. Co., Attleboro, Mass.

TRADE CONDITIONS.

The business situation here, not only in the jewelry trade but in other lines, is good and the outlook bright. A somewhat protracted dry spell cut down the estimates of a month ago as to a bumper corn crop in Nebraska, Kansas and Oklahoma, but the yield will be very good nevertheless, raised during the past week having greatly improved crop conditions. It is a little early to make prediction as to the holiday trade, but the indications are it will be very satisfactory. In the United States named above it is estimated that the crop value of the wheat, oats and corn crops will exceed \$400,000,000. To this must be added good vegetable and a fair fruit crop. Farmers are freer from pressing debts than they have ever known in the history of these States and are in a position to indulge in liberal expenditures.

Carl Ruppelhus, who recently completed a course of engraving at the Missman School of Engraving, has taken a position with H. A. Tribals, Emporia, Kans.

William Kohler, Parsons, Kans., and H. Marshall, with Robt. Worrell, Mexico, have finished a course of engraving at the Missman School of Engraving.

Harde Firstenburg, traveling representative for the Woodstock-Hoefer Watch and Jewelry Co., started out, this week, for a tour through his territory in Nebraska.

The Kansas City Horological and Optical School is about to move into its new quarters, 110 E. 12th St. It will occupy the entire building, consisting of three blocks.

The following new students have been enrolled at the Missman School of Engraving: Hughes Stoddard, Kansas City, Mo.; R. H. Ober, Kansas City, Mo.; H. R. Totson, Hebron, Nebr.; F. S. Shepherd, Tonia, Kans.

The following retail jewelers were in this city last week: H. M. Hickart, Springfield, Mo.; H. E. Tucker, Higginsville, Mo.; J. M. Leighty, Spring Hill, Kans.; J. W. Bishop, of the M. L. Bishop Jewelry Co., Commerce, Okla.; Mrs. F. W. Sellers, Wellington, Kans.; Gail B. Douglas, Pleasant Hill, Mo.; A. A. Ditter, Moundridge, Kans.; S. A. Noble, LaCygne, Kans.; S. H. Avey, Auburn, Nebr.; R. R. Smithers, Meron, Mo.; L. E. DeLanty, Parkville, Mo.; J. H. Whiteside, Liberty, Mo.

Pacific Coast Notes.

Howard Payne, San Jose, is enjoying a sojourn at Salinas.

Roy Akers and E. W. Smatz, of Thomas City's jewelry establishment, Watsonville, Cal., are attempting to learn the location of a ledge of turquoise that is supposed to be on the San Juan Mountains not far distant. A beautiful stone as long as a man's thumb was recently brought into the store by a boy, who stated that it had been picked up in the hills.

A disastrous fire occurred at Tracy, last week, destroying several stores, among which was the jewelry establishment of Z. L. Von Dack. Some of the stock from the store was saved, but the loss will be quite heavy and will be felt especially by the jeweler, as he has been here but a short time and just had the store in good shape for the Fall and Winter business. Just what will be done toward establishing a new store has not yet been decided.

A business change of considerable im-

portance has just been effected at Santa Paula, Cal., and the Santa Paula Jewelry Co., has been sold by James Lebreche, to Fred Bacon, Los Angeles. Mr. Bacon will place the store in charge of his nephew, Walter Bartling, recently from Nebraska. Albert Kaufman, who has been with Mr. Labreche in the business for a number of years, will remain with the new owners. The former proprietor and his wife will remain in Santa Paula for the present.

Cleveland.

The Guyon Jewelry Co. has been incorporated with a capital of \$5,000. The incorporators are W. K. Stanley, F. B. Guyon, E. R. Guyon, B. D. Nicola and Eli E. Dasler.

Will H. Maier, of this city, who is well known to the jewelry trade through his having been connected with the watch business for the last 18 years, has achieved considerable fame recently by reason of his long fast of nearly two months. Mr. Maier, who has been a traveling salesman for the Rockford Watch Co., had been in poor health for some time, and several months ago went to a sanatorium at Battle Creek, Mich., where he was recommended to go without food for some time. Mr. Maier then began a fast which lasted for 50½ days, during which time nothing passed his lips but water. As a result of this he writes that his health is much better, and he is now on the high road to recovery. Mr. Maier's fast has been the subject of a number of articles in newspapers in Battle Creek and other cities.

Toledo.

C. C. Winans has increased his store room space at 407 Adams St.

L. McKinstry is displaying a new regulator which he has just installed.

Isenberg Bros. are decorating the front of their store with several new gold signs.

The Sample Jewelry Store, at 307½ Adams St., has added an optical department to its business.

Jacob Postley, one of the oldest pawnbrokers in the city, has renovated his store and made other improvements, which add greatly to the appearance of his place of business.

The case of Samuel Ricard, a Toledo pawnbroker, charged with violating the city loan-brokers' ordinance, has been postponed twice, and when called for hearing during the past week was again postponed until Sept. 22. Another case against him, in which he is charged with assault and battery, was postponed till the same date.

Pacific Northwest.

The new building of A. E. Crawford, Othello, Wash., has been completed and the store has just been opened for business.

Isador Greenbaum, 24 years of age, wanted in Chicago for the theft of \$3,000 worth of jewelry from a firm by which he was employed as a salesman, was arrested, last week, in Seattle and will be taken east to stand trial.

San Francisco.

R. Lempp has left for Fairbanks, Alaska, where he will start a store.

William Lamb, representing Geo. H. Fuller & Son Co., Chicago, was a recent visitor here.

Bert Lissner, formerly in business in Berkeley, has taken a position with the Keystone Watch Case Co.

George Goldberg, with Untermeyer-Robbins Co., New York, called upon the trade here during the past week.

G. E. Saunders, formerly in the employ of R. & L. Myers, has opened a store of his own at Fort Bragg, Cal.

Sam Zimmerman, representing Zimmerman & Co., New York, has been calling on the local trade here recently.

Among the jewelers who were here last week have been F. Golden, Reno, Nev., and C. J. Noack, Sacramento, Cal.

Peter Borud, formerly with R. & L. Myers, has left to accept a position with W. C. Anderson, a well-known retailer of Auburn, Cal.

Henry Landsberger, of M. S. Schussler & Co., is away on his honeymoon. Mr. Hovey, representing J. B. Whitney & Co., has just returned from his southern trip.

Lesslee, jeweler, who took over the stock of Alexandra, the Jeweler, 934 Market St., is now selling out the stock at auction at the order of the stockholders.

George Maccany, 15 years of age, and until recently employed as messenger by the Ott Jewelry Co., 1063 O'Farrell St., was taken into custody about a week ago on a charge of check forging.

Customs Inspector G. B. Richardson made an important seizure of valuable blue jade and jade jewelry to the extent of 63 pieces, recently, when he searched San Yook, a Chinese who was a steerage passenger in the liner Siberia, which arrived in port late last week.

On Saturday, Aug. 28, an event of more than passing interest to the trade in San Francisco took place, this date marking the opening of Col. A. Andrews new Diamond Palace. The event is all the more significant when it is considered that in the new store all former efforts at magnificence have been surpassed and the store located in the very center of the retail trade. When the Diamond Palace was opened originally years ago it was located in the Russ Building, on Montgomery St., in what was then the center of the hotel and retail district. Gradually since that time the retail district had been drifting westward until at the time of the fire the store was really in the office district. However, there were still three old and prominent hotels on this street and the Diamond Palace with its past reputation was visited by thousands. With the reconstruction of the city these old hotel buildings have been replaced with office buildings so that when it was decided to re-establish the Diamond Palace, it also became necessary to seek a new location. The new site 50 Kearny St., will probably remain for all time in a retail section, for it is but a few doors from Market St. and midway between the two great hotels of the city.

Albert E. Porter, Ashland, N. H., has been succeeded by Albert E. Porter & Son.

VISIT ST. LOUIS DURING CENTENNIAL WEEK

One Entire Week of Gala Occasions
THE ENTIRE WEEK OF OCTOBER 3d to 9th

ST. LOUIS WILL CELEBRATE THE One Hundredth Anniversary of its incorporation October 3d to 9th. The week will be a fitting climax to a century of progress and the most gorgeous event in the city's history. A fund of over \$100,000 has been raised to defray the expenses of the celebration. In addition to this the municipal authorities have pledged themselves to assemble as special guests the mayors of American cities and no fewer than one thousand mayors will participate in the festivities. An elaborate programme of balloon and other aeronautic features has also been prepared including a long distance race of spherical balloons and exhibition flights of aeroplanes. There will also be the great pageant of the Veiled Prophet and the grand ball with more than the usual features. In addition to these entertainment features, St. Louis business men have made elaborate preparations for a convention of retail merchants for an exchange of ideas on advertising, window and show case display, store arrangements and other matters of vital interest to retail merchants, together with a gathering of the best and most successful traveling merchants representing St. Louis houses. These conventions will prove of inestimable value to retail merchants. Special excursion rates will be in force for Centennial week for the entire Middle West and Southwest territory and special arrangements have been made by all the hotels to provide for the entertainment and comfort of the many thousands of visitors who will attend the celebration.

Transformation of the downtown section into a fairyland of vari-colored lights for an all-week Centennial Festival, including music and fireworks

Q ARRANGE YOUR BUSINESS APPOINTMENTS so you can spend Centennial Week in St. Louis. You will regret it if you don't.

St. Louis.

W. Hoyt came in from Fulton, Mo., the week-end and left again for southern territory.

S. Sisk, Wellsville, Mo., has been in health for some time and his condition is improved.

J. Haberman will go to Kansas City, Mo., next week on a business trip and will be gone several days.

George Oberting, of the Blankenmeister-Dorring Jewelry Co., has gone out on a business trip through Missouri.

J. King, traveler for E. W. Hughes, has just returned from a successful business trip through Wisconsin, Iowa and Nebraska.

Frank McCool, of Sudheimer & McCool, Holland building, has gone to Old Mexico on important business and will be gone at country for some time.

Among the out-of-town jewelers in this city during the past week, were: J. C. Fisher, Wellsville, Mo.; W. A. Rowe, Waller, Ill.; J. J. Gaffner, St. Jacobs, Ill. Otto Buder, South Broadway, returned, the day of last week, from a stay of several days at Elmhurst, Ill. His family will remain there until the latter part of the month.

Miss Rose Emerich, secretary of the J. Dailey Jewelry Co., Century building, has gone on a combined business and pleasure trip to Buffalo, Niagara Falls, New York and Atlantic City. She will be away about two weeks.

Mermod, Jaccard & King Jewelry Co., has just completed setting a \$5,000 diamond ring for Frank N. Dowling, musical director at Delmar Garden, who will travel with the Anna Held Company at the end of the Delmar season.

P. Wolff, of the Elliot Jewelry Co., returned Tuesday of last week, from a business trip to Texas. While he was away he had a severe attack of illness, but is now completely recovered. In a few days he will return for the south again.

Extensive alterations are in progress at the store of the F. W. Drosten Jewelry Co., the purpose of which is to afford an enlarged cut glass department and better facilities in other departments. A new and larger entrance is to be constructed on the west side of the store.

H. Niehaus, Sr., dean of St. Louis jewelers, who has been in business continuously for 43 years, has been confined to his home, 1302 Franklin Ave., for some time by an attack of bronchitis and a weak heart, but is much improved now and is able to be about.

L. D. Rodgers, of the McCoy-Rodgers Jewelry Co., Star building, is back from the national rifle competitions at Camp Perry, Ohio, with medals and honors. He won the 100 cent. competition medal by making the highest score at 200, 600 and 1,000 yards. The Missouri team made 737 points more than the preceding year.

I. S. Bauman, of the L. Bauman Jewelry Co., has just returned from a four-weeks' pleasure trip to the Pacific coast. J. H. Tipton, buyer for the firm, is spending his vacation at his home in the western states. Clarence Heyman came in, this week, from a business trip through Mis-

souri and will remain in the city for a while.

Alterations in progress at the establishment of the Maritz-Kober Jewelry Mfg. Co., 6th and Olive Sts., will result in the partial removal of partitions, so as to bring the factory under the visual supervision of President Maritz as he sits at his desk in the office. Heretofore the office and factory have been completely separated. Samuel Kober, of this firm, has returned from a business trip through Oklahoma and Texas.

Creditors of J. Rosenberg, who did business in the Columbia Theater building under the name of the Providence Jewelry Co., will not receive more than 15 to 20 cents on the dollar, according to Alfred C. Wilson, trustee under a chattel deed of trust. A meeting of the creditors was held, last week, at the office of Mr. Wilson, in the Times building, at which claims were filed and allowed. The stock has all been sold and nothing remains to be done except to receive the claims and divide the proceeds. Mr. Wilson says the affairs of the firm will be wound up the latter part of October.

J. F. Dailey, manager of Loftis Bros. & Co., Carlton building, returned, this week, from a stay of several weeks in Montana, where he has been looking after his mining interests there. He only came back to resign his position and arrange his affairs for a permanent removal to the west, where he expects to devote himself to mining interests. He will leave in a few days for San Francisco, and will probably make his home in that city. Before Mr. Dailey became manager of the Loftis Co. he was at the head of the J. F. Dailey Jewelry Co., in the Century building.

F. W. Drosten and Mrs. Drosten returned, Sunday, from a three-weeks' stay at Rye Beach, Magnolia Beach and Boston. When Mr. Drosten arrived, Monday morning, at his store, at 7th and Locust Sts., he was surprised to find scaffolding up and other evidences that a busy job of redecorating had been in progress. It had not been made known to him, for fear he would shorten his pleasure trip, that during his absence the bursting of a water-pipe on the floor above the store had flooded it and had done considerable damage to the walls, the stock and fixtures.

A police shake-up is to result from the attack on Gustav Scholl and the robbery of his jewelry store at 1321 South Broadway, on the afternoon of Aug. 14. Because of the manner in which men suspected of having been involved in the robbery were handled by the police of the Souldard St. District, the Police Board has ordered an investigation. A charge of neglect of duty has been preferred against Policeman Drumright. He is charged with failure to properly guard William Wuertz while a prisoner. Wuertz has confessed that while in his house, to which, it is alleged, he was permitted to go by the policeman, he concealed a portion of the jewelry that had been stolen from Schroll's store. As none of the stolen jewelry was found on him, he was released, but was later re-arrested and then confessed that he acted as lookout while two other men went into the store and attacked Scholl and robbed him. The confession of Wuertz led to the arrest of

David Regan, who also confessed. Wuertz and Regan gave the police the name of the third man, but he has not been arrested.

Milwaukee.

G. W. Fink, of the Fink-Bosshardt Co., dealing in jewelers' supplies, is calling upon the trade about Wisconsin.

Among the out-of-town jewelers who were in Milwaukee, last week, were: L. A. Thompson, Mauston; Sig. Hoffman, Jefferson; D. M. Smith, Montfort, and F. P. Beswick, Racine.

Thomas Bruhy, West Bend, Wis., has returned from a trip to the western coast, where he visited the Seattle Exposition and other points of interest. Mr. Bruhy was in Milwaukee, last week.

Franklin Thomson, Milwaukee, secretary of the Wisconsin Retail Jewelers' Association and secretary of the Jewelers' Mutual Fire Insurance Co., Wisconsin, is in Chicago for two weeks.

Archie Tegtmeyer, well known south side jeweler, Milwaukee, has brought an injunction suit in behalf of the South Division Civic Association to restrain the officials of Milwaukee from furnishing water to the city of West Allis, a suburb. Mr. Tegtmeyer alleges that the interests of the south side are endangered by the lack of water pressure at the expense of the water furnished to West Allis and other outlying districts.

A. Watterich, one of the old-time jewelers of Wisconsin, who has been engaged in business at Oconto for the past 33 years, has sold his stock to his son, Oscar C. Watterich, now connected with an Oshkosh, Wis., jewelry establishment. The young man, who has had considerable experience in the jewelry business at Green Bay, Antigo and Oshkosh, will take charge within a few days. The Watterich building, erected by A. Watterich in 1883, will be remodeled and a plate glass front will be installed. New furniture will be put in and the stock will be increased. The retiring jeweler established himself in business at Oconto in 1876.

The ringing of a burglar alarm over the entrance of the jewelry store of Julius Lando, 419 E. Water St., Milwaukee, one night recently, brought a big force of police, and the bluecoats had visions of capturing the wily yeggmen who have been breaking into jewelry stores of the city, this year. The policemen tried the doors and windows, only to find everything secure. In the meantime the bell continued to ring, and it rang for nearly two hours before Mr. Lando arrived from his home, when it was stopped by cutting the wires. Investigation showed that rats had gnawed the insulation until the wires had come in contact, forming a circuit.

James L. Hand, auctioneer, 14 Maiden Lane, New York, who has been conducting sales all Summer for large jewelry firms throughout Canada, commences a sale for Emil H. Leffert, Council Bluffs, Ia., who is forced to vacate his present quarters. On conclusion of his auction Mr. Leffert will open one of the finest appointed jewelry stores in his State, having purchased and remodeled a building on Broadway, Council Bluffs.

WATCH OIL
Per Bottle, 25c.

Another Black Shield Product—

Black Shield Oils

The Product of the Highest Attainment in Oil Manufacturing. Too much care cannot be taken in selecting the right oil.

It's the LIFE-BLOOD of a watch. It will not gum. It is free from acids. Climate has no effect. Every drop of oil in the bottle, even to the very last, is as good as the first

A. S. WORMOOD

Jobber of

Illinois Movements—Fahys Cases

116 South 6th Street

SPRINGFIELD, ILLINOIS

I have sold Illinois Movements to the retail trade continuously for almost thirty years. They are better to-day than ever. There is a reason (with apologies to Post). No better watch cases are made than Fahys and a great many not as good. I always carry a complete line of these goods. Orders shipped same day as received; express charges prepaid.

N. Y. Salesrooms - 13 Maiden Lane

Cincinnati.

Evin Gebhardt, of Gebhardt Bros., and his wife are making a tour of the Lakes.

Charles Nurre, 1214 Main St., has returned from a trip through the eastern States.

Edward Albert, of Albert Bros., is attending business again after a two months' absence.

Clave Lindner, of Lindner & Co., is in after a three weeks' pleasure trip in the north.

W. L. Jackson purchased goods here for his new store he has just opened in Chattanooga, Tenn.

W. K. Oeitz, well known to the trade, has opened a new retail jewelry store at Hillsburg, O.

W. H. Dorst, of the Dorst Co., and his wife are enjoying a three weeks' trip through the Great Lakes.

Charles Theye, of Theo. Neuhaus & Co., has returned from a two weeks' pleasure trip in Michigan.

W. H. Frommeyer and Charles Payne, of Gutmann & Sons, will visit the trade show in Ohio and vicinity.

W. L. Johnson & Co. are arranging to enlarge their store with additional wall and show cases and also increase their stock.

Charles Seiglitz, Vevay, Ind., stopped in this city, last week, on his way to Michigan, where he will remain until Sept. 15.

W. S. Strauss, of Lindenburg, Strauss & Sons, will resume business on the road, this week, after a month's illness in the hospital.

W. La Creutz, of the Creutz Silver Plating Co., is enjoying a rest in the north, and W. Creutz, of this house, is home from the north.

W. I. Didot, who has been in business many years in Versailles, O., is about here, and has sold his store to A. E. Hann, Norwood, O.

W. H. Mehmert has been called home on the road, owing to the illness of his wife, who has been detained from business for about two weeks.

W. H. Greenwald, Arcade, has bought and altered Wickard jewelry store at 22 East Main St. Mr. Wickard will engage in the retail cleaning business on Race St.

Cincinnati creditors of Adam H. Uhrig, Hills, O., who filed papers in bankruptcy Aug. 27, have been notified that a meeting of the creditors will be held, Sept. 15, to prove claims and appoint a trustee.

W. H. F. Rohs, son of H. B. Rohs, at 1111 Main St., and missing since Aug. 24, is found working in a tobacco field near Paducah, Ky., a few days ago. His uncle, W. H. A. Rohs, of that place, brought him to Cincinnati to his father.

W. H. Gutmann and his wife have gone to New York to meet Mr. Gutmann's brother, Mrs. Bertha Gutmann, also Mrs. W. H. Marks and A. G. Schwab, of A. G. Schwab & Sons, and wife, who return, Sept. 15, from a five months' stay in Europe.

W. H. Head news of the death of J. S. Throp, of Vevay, Ind., was received here with regret. Deceased was about 70 years of age and for about 20 years was engaged in the jewelry business. He was well known here for many years and was highly respected.

Theo. Neuhaus & Co. filed suit in the Common Pleas Court, Aug. 28, against John Brennan, owner and publisher of the *Eleven O'clock Toast Magazine*, asking for a receiver to take charge of Brennan's property. The plaintiff asks for a judgment for \$300 against Brennan, which it claims is for goods not paid for.

In the suit of Mrs. Marion D. Oskamp vs. Alfred Oskamp and others to partition the Oskamp property on Vine St., between 4th and 5th Sts., the appraisers have placed the value of the property at \$120,008. Mrs. Oskamp, having been granted an order of partition, has filed an offer to take the property at the appraised value. The property consists of a five-story front store building on a lot 30 by 140 feet.

The Cincinnati Wholesale Jewelers and Manufacturers are to be congratulated upon their souvenir booklets which they have sent out in great numbers. Each booklet was accompanied by a letter of invitation to visit Cincinnati and the jewelry trade. Ferd Phillips, of Richter & Phillips, chairman of the committee, was assisted by Jacob Frohman, of Frohman & Co.; C. Oskamp Daller, of the Clemens-Oskamp Co.; George Gruen, of D. Gruen, Sons & Co., and A. Thoma, of Thoma Bros.

Out-of-town jewelers who were in this city, last week, buying stock, included: John A. Selbert and Charles Kellar, Frankfort, Ky.; R. W. Clark, Burlington, Ky.; H. Reisinger, Laurenceburg, Ind.; J. Laupus, Seymour, Ind.; Mr. Marlett, of Marlett & Baker, Middletown, O.; W. C. Carroll and H. A. Kilgore, Lebanon, Ky.; J. W. Sparks, Sabina, O.; I. N. Pollock, Ashland, Ky.; Frank Emmerling, Hillsboro, O.; W. L. Lehne, Decatur, Ind.; M. Earley and wife, Berea, Ky.; Edward Israel and son, Harrison, O.; J. D. Ward, Rising Sun, Ind.; I. Gluck, Charleston, W. Va.; E. F. Froeb, Terre Haute, Ind.; Dan T. Fisher, Flemingsburg, Ky.; W. H. Muller, Stamford, Ky.; O. E. McWaters, Danville, Ky., and Edward Mueller, Hamilton, O.

Minneapolis and St. Paul.

TRADE CONDITIONS.

The generally good business prospects make the outlook for Fall business with the retail trade, both in the cities and in the country, materially better than usual. The grain crop is excellent and is commanding high prices.

A. P. Meyer, Minneapolis, is reported out of business.

John Fisher, Garrison, N. Dak., was in the Twin Cities on his way to Redwood Falls, Minn., last week.

A meeting of creditors of Mrs. Edna M. Schulz, Minneapolis, has been called for Sept. 13, at which time an auction sale of the stock and fixtures will be considered.

The Emporium, St. Paul, has moved into the new building on Robert St., between 7th and 8th Sts., with entrances from all three streets. The store has a large jewelry department, which is materially extended in the new building.

The matter of a law of fraudulent advertising, which was urged by A. E. Paegel, Minneapolis, in his address before the Minnesota Retail Jewelers' Association, last July, is being taken up in various associations and societies for consideration.

The chief of police of Minneapolis has not moved in the matter of clearing the streets of all overhanging signs, curb line display show cases and all infringements of the street line, as threatened. It seems unlikely that anything radical will be done in the matter, although some of the more brazen infringements may be stopped.

Out-of-town jewelers in the Twin Cities, last week, were: Miss Bertha Diacon, Chaska, Minn.; G. R. Simons, Langford, S. Dak.; W. C. Kayser, Milbank, S. Dak.; C. A. Sherdahl, Montevideo, Minn.; C. P. Elliott, Lisbon, N. Dak.; Miss Marie A. Pisinger, New Prague, Minn.; Wm. Follett, Sandstone, Minn.; Mr. Grinnell, Janesville, Minn.

Detroit.

George E. Flint, Carson City, Mich., was in town, recently.

Frank Preswell, Holly, Mich., visited the local trade, last week.

H. W. Kulp, Freeport, Mich., replenished his stock here, last week.

H. T. Elank, Elsie, Mich., came in, last week, to look over Fall patterns.

J. P. Stein, Alliance, O., spent some time in Detroit, not long ago, resting up for the Fall season.

C. P. Bessmer, who started a new store in Flint, recently, was in Detroit a few days ago on a buying trip.

E. A. Cress, Minden City, Mich., was in this city, accompanied by his wife, last week, for a two-days' stay.

The Bonfield Jewelry Co. has announced that it is leaving the retail field and has a sale of its retail stock in progress.

Jesse Poe, Rushville, Ind., has been spending his vacation here. He found time between side trips from Detroit to call on the trade.

Charles B. Martin, Brooklyn, Mich., was recently married. He and his bride came to Detroit and spent a portion of their honeymoon in this city.

The Arsenal Installment Co., of which S. L. Harrison is the head, has moved from the third floor at 220 Woodward Ave. to a ground floor location several doors to the north. This concern is a branch of the one of the same name in Pittsburg.

E. J. Peters, of the firm of E. J. Peters & Co., which recently succeeded J. F. Hicks & Son, Tecumseh, was here, last week, purchasing goods. Mr. Peters was formerly employed in the store and has been doing well since taking over the business on his own account.

Wright, Kay & Co. have had on exhibition in their show window, since last Friday, the silver service for the battleship *Michigan*. This service, which was made by Tiffany & Co., consists of 63 pieces. The set is unique, in that not only the officers and the rank and file of the sailors are recognized in the pieces comprising the service, some of the articles being for the ward-room table, while a tobacco set is for the enlisted men. The decorations consist of pine cones and sheaves of wheat, as symbolic of the products of the State. The old cruiser *Michigan*, now re-named the *Wolverine*, is pictured in the principal engraving upon the punch bowl of the set.

Los Angeles.

Geo. L. Bannister and wife have just returned from an outing at Balboa, Cal.

B. Rowell, watchmaker for E. Gerson, has just returned from a vacation spent at Laguna Beach.

W. C. Libs, with Hambright & Walsh, has returned from a vacation spent with his family at Hermosa Beach.

Joseph Lawton, of the Whitley Jewelry Co., has gone to Laguna Beach, Cal., with his family to enjoy a short outing.

H. B. Lewis and Chas. Snell, of the E. W. Reynolds Co., have gone to Catalina Island to spend some time fishing.

Walter Lord, Goldfield, Nev., is spending some time in Los Angeles and vicinity. He is accompanied by his wife.

H. L. Dow, watchmaker with S. Nordlinger & Sons, has returned from a vacation of two months spent in Chicago.

George Dickson is again at his old place in the stationery department of Brock & Feagans, having just returned from an extended vacation spent in the east.

C. H. Walton, of Field & Walton, has returned from a three weeks' visit with his wife in Seattle, Portland, San Francisco and other northern Pacific coast points of interest.

After a week's strenuous work, a considerable portion of it done in the night, H. F. Wallace and his employes have completed the annual inventory of his stock.

H. Koch and M. Nordlinger, of S. Nordlinger & Sons, started east on a buying trip, Sept. 7. Their headquarters will be with L. & M. Kahn & Co., 170 Broadway, New York.

S. Simmons, 315 S. Spring St., has returned from a somewhat extended trip, taking in Lake Tahoe, San Francisco and other northern points. He was accompanied by Mrs. Simmons.

E. d. Bastheim, of Bastheim, Adams & Abel Co., has returned from his first business trip for the firm. He called on the trade in Arizona and comes back well satisfied with the outlook.

Geo. W. Miller, of Brock & Feagans' silver department, has just returned from a week's outing, camping at Manhattan Beach. Eugene Ashton, of the same department, is now taking his vacation.

Robert E. Lomax, 4106 Central Ave., expects to move, Sept. 15, into his new location at the corner of Central Ave. and 44th St. The building is one which was bought by him and entirely remodeled especially for his business.

Out-of-town jewelers who have been in Los Angeles recently, include: S. J. Newton, Long Beach; Chas. Kelley, Pasadena; J. H. Sohn, Ocean Park; S. B. Cleun, Redondo; Claud T. Walker, of the Coaluga Jewelry Co., Coaluga, Cal.

F. A. Marcher, manager of the Pacific Gem Co., expects to be home some time in October. When last heard from he was in Paris, after having spent three weeks in London. He intended to go from Paris to Idar, Germany, thence to Cologne, Berlin, Dresden, Vienna, and then through Switzerland and Italy.

F. Stansfield, formerly manager of the Jupiter Consolidated Jewel Co., is now

managing the F. Stansfield Mfg. Co., 237 W. 63d St. The principal work of this company is the manufacture of the 20th Century facet cutting machine, invented by Mr. Stansfield, and other lapidary machinery.

Miss Adele Henrickson, of J. C. Fleming & Co.'s sales force, has returned after an extended vacation, a considerable portion of which was spent on a trip with friends to San Clemente, an island in the Pacific Ocean, about 50 miles from San Pedro. She reports having had a very enjoyable trip and having secured a number of interesting prehistoric relics.

J. J. Kinchan, head watchmaker for Brock & Feagans, since the establishment of that firm in this city, has severed his connection with the firm and gone into the automobile business. The members of the firm and its employes united in presenting Mr. Kinchan with a very handsome set of silver as an expression of their friendship when he left the jewelry business. Mr. Jarvis, of the watchmaking department, takes Mr. Kinchan's place in the store.

Early Sunday morning a burglar broke the glass in the front window in the store of H. B. Crouch, 555 S. Broadway, and stole a diamond ring valued at \$127, which Mr. Crouch had placed on special sale and left in the window over night. The burglar was evidently an expert. The window was protected by a burglar alarm, but the glass had been cut by a diamond and a portion quickly removed, the gem snatched and an escape made before the burglar alarm officer could reach the place. The window was insured, so Mr. Crouch loses nothing except the diamond. On the same morning the window in front of Chas. H. Clark's new store, 325 W. 4th St., was broken in a similar manner and a bronze medal belonging to W. O. Truax, watchmaker with Mr. Clark, was stolen. The intrinsic value of the medal was but little, but it was highly appreciated by Mr. Truax, to whom it was given in Paris by the French government for his invention of the method of setting three hands on a watch with one lever. As the glass was insured, Mr. Clark suffered no loss.

Omaha.

Mrs. A. L. Shook is at present in St. Paul, Minn., visiting relatives.

W. H. Wiker, Spalding, Nebr., was in Omaha, last week, purchasing Fall stock.

S. W. Lindsay was confined to his home a couple of days, last week, by a slight illness.

Oscar Pihl, watchmaker with S. W. Lindsay, returned, Monday, from a pleasure trip.

W. M. DeCant, who is with Henry Copley, returned from a pleasure trip which included Chicago and the east.

Norman P. Dean has gone to Fairbury, Nebr., for a few days' visit with relatives, returning at the end of the week with Mrs. Dean, who has been in Fairbury for some time. Mr. Dean is an engraver who does work for several local jewelers.

Miss Evelyn Bergman, daughter of Sol Bergman, returned, Saturday, from a 1,300-

mile automobile trip to Denver, Colo., an vicinity and return. Leaving Omaha, Miss Bergman followed the U. P. railroad and returned by way of the B. & M. road.

Springfield, Ill.

TRADE CONDITIONS.

August, 1909, was a banner month with Springfield jewelers. Large crops of everything in a farm, steady work in the mines and many investments in all lines had the result of bringing much money to the city and the jewelers prosper as a result. As one jeweler put it: "Bumper crop and steady work in the city resulted in the business. It is our heaviest August and our Springfield jewelers tell the same. People purchased a better line of goods and more of the large mining interests and the great number large farms in the vicinity is where the people work and when they have good crops we prosper."

Miss Louise Irvine, with Lockwood & Co., spent a few days in Chicago recently.

W. J. Reed, Indianapolis, Ind., visited the plant of the Illinois Watch Co. Tuesday.

Rev. Eli Lane, a negro minister, Chicago, Ill., who engages in clam fishing occasionally as a side line, found a pearl in the Wabash river. He has been offered \$750 for the jewel, but is holding out for \$1,000, claiming the pearl to be worth \$1,200.

Ostermeier & Trunk, jewelers, Chicago, have leased the ground in front of the Booth building, one of the largest and some of the best buildings in the city, possession to be given Sept. 25. They intend to remodel and remodel the store and will open a jewelry store.

John C. Pierik has returned from an extensive automobile trip through the New England states. While away he visited New York, Massachusetts, Maine, Rhode Island, Connecticut and Vermont. He spent two days in New York city and purchased a line of Fall goods.

Traveling salesmen of the Illinois Watch Co. are located this week as follows: Mr. Gigon, in the east, as far south as North Carolina; August Weisz, in the west, traveling between Missouri and Colorado; Mr. Theiry in the New England States; Charles Slenmons and W. J. Armbrust are in the office.

Three silver loving cups to be awarded in the golf play at the Illini Country Club on Labor Day were furnished by J. C. K. Holt. They stand on ebony bases, the tallest one 14 inches high. They are the winners of first, second and third prizes. The first prize is called "The Governor's Cup" and is presented by Governor Charles S. Deneen. The other cups are presented by members of the Country Club.

After dissolving partnership, Klar & Cress, Kilbourne, Ill., jewelers, have decided to remain in the business. Klar & Cress continues to occupy the old stand and Mr. Klar will remain in the building formerly occupied by J. L. Miller. Mr. Cress retains the agency for all the work handled by the firm and will add several new lines. The stock was evenly divided by the two members of the firm at the dissolution.

America's Leading Jewelry Auctioneer

James L. Hand

14 Maiden Lane, New York

The largest and most successful sales ever conducted in the United States and Canada were conducted by Hand. Many auctioneers advertise that they are "wonders." Printers' ink is purchasable and the man with little ability might call himself the greatest ever. Write them all if you wish to but write "Hand" for his booklet on auctions. It will save you money and reputation. Why jeopardize your business by employing a "has been." Employ "Hand," the recognized leader.

Read what three of the leading papers of the U. S. say.

The *Detroit Free Press* says: "It requires no special talent to sell average merchandise at auction, but in selling a stock as fine as that carried by Sturgeon & Co. a man of more than ordinary ability is needed. The magnificent collection of precious stones, the products of the famous silversmiths, the objects of art, etc., that comprise the largest stock of its kind in this section of the country, were described and sold by Mr. Hand in a manner both interesting and instructive. Never before has such a representative audience been collected at an auction sale in Detroit."

I commence a sale this week for E. H. Leffert, Council Bluffs, Iowa. This is the largest and finest jewelry stock in Southwestern Iowa. Write me in his care or to my New York office.

If you value your reputation "Hand" is the man.

The *Association Jeweler* says: "Mr. Hand has avoided at all instances identifying himself with fake sales or poor business alliances, as in the present case he has allowed his name to be coupled with only high class retail concerns."

The *Omaha World Herald* says: "The auction sale of the fine stock of the Mawhinney & Ryan Co. was ably conducted. Its success was due to the personality of Mr. Hand, the auctioneer, who is a man of education and refinement."

JAMES L. HAND.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."

TRADE-MARKS REGISTERED AUG. 24, 1909.

Ser. No. 38,183. (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) LARTER & Sons, Newark, N. J. Filed Oct. 22, 1908.

Particular description of goods.—Sleeve-buttons, studs, scarf-pins, handy-pins, vest buttons, fobs, lockets and similar articles of personal adornment made in whole or in part of precious metal.

TRADE-MARKS REGISTERED, AUG 24 1909

74,941. JEWELRY FOR PERSONAL ADORNMENT. GEORGE W. DOVER, Providence, R. I. Filed April 28, 1909. Serial No. 42,118. Published June 22, 1909.

Percy N. Waters, Bentonville, Ark., is now of Waters & Muck. The latter firm has bought out the business of Daniel R. Porter at that place.

L. Wachs, formerly of Mill Valley, Cal., has returned to that place and established optical parlors there. It is his intention to open an establishment at San Francisco and make the Mill Valley store a branch.

gray. The silver design is mounted on a massive shield of ebony.

The trophy was donated by Otto F. Stifel, a brewer, and cost \$250.

The Mermod, Jaccard & King Jewelry Co., also designed and made the solid silver trophy for senior six-oared barge crews which is to be contested for annually on the Mississippi river.

This solid silver vase portrays the Goddess of Liberty on the crest of a wave, beneath which are four dolphins. At the sides are the figures of two oarsmen.

The trophy was first contested for July 5 in a two-mile race on the Mississippi, which was won by the Central Boat Club crew. It must be won three times for possession. Mr. Stifel donated this trophy also.

J. H. Muckleroy, Grand View, Tex., has assigned to T. S. Wade for the benefit of his creditors.

The business of C. Lumsden & Son, Richmond, Va., was recently incorporated with an authorized capital stock of \$75,000, paid in, and the firm style has been changed to C. Lumsden Sons.

“Have
You
 the
 Elgin
 with
 the
 49
 Dial?”

“H AVE you the Elgin with the 49 Dial? Such a question will soon mean money to you, because it’s one that’s going to be asked everywhere and often.

Back of it is the demand that is being created for the new Railroad Elgin through the medium of advertising in Railroad magazine telling of this innovation among watches.

This watch is making a strong appeal to railroad men and others because of its readable dial. The hands are large, the figures big and plain, the dial either of white enamel or silver finished metal. This latter is the only metal dial with hard *inlaid enamel figures*. It catches the faintest glimmer and is easily legible in dim light, besides being proof against the chemical action of cleaning fluid.

This new Railroad Elgin is the thinnest and most compact 18 size movement made. and is cased at the factory.

Don’t wait until you see two or three prospective customers go elsewhere before you lay in a stock, but write now, RIGHT NOW, for prices and terms. Your jobber can give you full particulars. Or write direct to the Company.

Be ready when the demand is made for the Railroad Elgin with the “49 silver” or “49 enamel” dial.

These are the four grades and established retail prices as advertised :

THE HOROLOGICAL REVIEW

Two Curious Old Clocks in Saxony.

Left, the head of which bears a resemblance to that of Christ, makes a similar movement of the arm, which originally held a staff. In these figures one can detect a visual representation of guilt and expiation. Placed as they are in the Hall of Justice, they constituted an emblem of the public conscience, never wearied of warning. The "wild man," in his day the best-known criminal figure of the Erzgebirge (Ore Mountains) and of Northern Bohemia, accused among other things of the horrible crime of devouring little children, stands before his judge, who is about to break the staff over his head.

Even to-day it is the custom in many districts of the Erzgebirge to threaten children with the "wild man," though his place is now generally filled by the "black man," and in the towns by the policeman. Even now the "Hunting of the Wild Man" is celebrated as a popular festival in Schluckenau, in Bohemia, the capture of the wild man, who wears no covering except a hide, being represented with the utmost realism. Under the large dial is a smaller one, which served at one time to show the quarters, the large dial having only an hour hand. Below it is a sun-dial, completing the entire work.

Still more remarkable were the clocks in Grossenhain and Zittau, which no longer exist. Over the town hall clock in Grossenhain two goats butted each other at the striking of the hour, while a male figure labored them with a whip and a negro's head close by snapped at a golden apple. The relationship between this snapping head and the "Schnapphaus" in Jena, still existing to-day, is evident. The Grossenhain town hall was built in 1492, and the Jena clock was constructed at about the same time. The town hall, together with its clock, was reduced to ashes by a fire in 1744.

An automatic apparatus was erected in the town hall at Zittau as a memorial of the great fire of 1608. On every 7th of January, the anniversary of this misfortune, a figure of Death with a torch was made to emerge and to yield to an angel bearing an olive branch. This work was also destroyed, July 23, 1757, at the bombardment and burning of Zittau during the Seven Years War.

The clock in the town hall of Pirna is the most recent of those here described. It was constructed in 1718 at the same time as the turret in the town hall, and at a period when the making of such clocks was beginning to go out of fashion. The group of automatic figures represents the arms of the

The clock in the gable of the town hall at Plauen, constructed by an unknown master in Hof, Bavaria, probably dates, according to an article by M. Engelmann in the *Allgemeines Journal der Uhrmacherkunst*, from the first half of the 16th century.

INTERESTING OLD CLOCK IN PLAUEN.

Placed between fluted pillars, the death's head at the top reminds the beholder of the transitoriness of human life. Beneath it two lions facing each other strike the hours and quarters on a visible bell with one of their forepaws. Between the lions a sphere, painted half gold and half blue, shows the phases of the moon. The center of the entire construction is occupied by the large dial.

On each side of the dial is a male figure. The figure on the right, a man with a very ferocious countenance, opens his mouth when the clock strikes, and at the same time raises his right arm, which at one time certainly wielded a club. The figure on the

So old as the art of making time indicators operated by mechanical agency the art of imparting a semblance of life to automatic figures by means of clockwork. At the time of Christ the Chinese were already able to produce movement in figures by means of their water clocks. This art flourished among the Arabs, who had a public clock of this description on the mosque at Damascus as early as the year 10 A. D.

The construction of clocks provided with mechanically moved figures had already taken firm root in Europe in the 14th century, and was extensively cultivated as a popular branch of art during the two following centuries. The makers were fully conscious of the attraction which such works possessed for the multitude. They were used especially for decorating public buildings, particularly the churches and the town halls, with their courts of justice. Sometimes religious subjects, e.g., the Adoration of the Magi, were represented, as in Venice; at other times, subjects connected with political or local history ("Männleinlaufen" in Nuremberg). Of higher value are those public clocks which, in addition to these automatic figures, are provided with astronomical and calendar work.

Some of the latter may still be seen in good working condition in Strassburg, Prague, Olmütz, Bern, Lübeck, Heilbronn, Münster, etc. The old masters of the clock-making art seem to have possessed a genuine sense of humor; this is shown by the burlesque works of the former "Lällenkönig" of Basle, of the "Gabbek" in Cologne and the "Schnapphaus" in Jena, mentioned by Luther.

The veil of tradition was spread over many of these old clocks, thereby increasing their reputation. The wandering apprentice, or "journeyman," when describing his visit to this or that town, would always begin with these wonderful clocks, which gave such a delightful imitation of actual events.

Saxony could point with pride to automatic clocks of this kind on the town halls of Plauen, Grossenhain, Zittau and Pirna—the most prominent features of these towns. These clocks still exist in Plauen and Pirna.

EDMOND E. ROBERT

3 Maiden Lane, New York

The Paris Horological School.

THE Paris Horological School has passed into the possession of the city of Paris by purchase. It was established in 1880 by the Paris Chamber of Horology (Chambre Syndicale de l'Horlogerie), thanks mainly to the devoted energy of its former president, Mr. Rodanet. The school has a museum and a technical library containing documents of extraordinary value. The school obtained good results, but during the last few years a reaction set in, which was noticeable also in other countries. The

tional burdens on behalf of the school; it therefore made an offer to transfer it to the city of Paris. This has now been done. This circumstance shows that the representatives of the community of Paris appreciate the extraordinary advantages to the city and the nation to be derived from having a centralized institution of this kind.

The future progress of the school will be watched with interest, and it will be acknowledged that some other countries have not yet advanced to the point of being prepared to give the assistance for technical objects which Paris will undoubtedly furnish to her newly acquired institution.

The Application of Horology in Tachometry.

IT must be admitted, says L. Reverchon, in *The Monitor*, that the makers of recorders, of registers and tachometers are, to a certain extent, responsible for the high speed of autos, etc. It is, in reality, owing to them that the automobilist can make up, with approaching eve, his journey's schedule. It is due to them that at each instant

FIG. 1.

the speed needle incites them to activity, prompts them, by its threatened recession, not to give way, to maintain the giddy pace, to gain one or two units on the kilometer dial.

It may be urged, however, in defense of the makers, that any day the exciting little machines, of which the drivers are so much enamored, may become their accusers, as regards police regulations, by registering automatically and unimpeachably the excessive speed. Like almost all human inventions, registers and tachometers are capable, impartially, of good or bad service. We may admit that nowadays these little devices are particularly well adapted to the intense service that is required of them.

This is the case especially with the tachometer illustrated herewith. Fig. 1 is the indicating portion.

The exterior scale indicates the instantaneous speeds up to 150 kilometers (93 miles) per hour. The pointer C gives the present speed; the auxiliary pointer D indicates the maximum speed attained, and is returned to zero by simple pressure on the button E. The lower counter L with three figures is intended to show the number of miles (kilometers) traveled in a day. It is returned to zero on pressing the button G. The daily indications of the counter

tion of Pirna, viz., a pear tree with two lions standing erect at its foot. The arms were loaned to the town as such in 1549 by the then King and later Emperor Ferdinand, but originally showed only the pear tree. It is certain that the arms have nothing to do with the name of the town; probably the similarity in sound between the name of the town and the fruit of the tree suggested the choice of the emblem.

It is stated that a clockmaker of the name of Goldammer was the maker of the great clock with the automatically worked hands. The latter are made of copper and

CLOCK IN THE TOWN HALL AT PIRNA.

is painted in various colors corresponding to those of the town. The duty of one of the lions is to indicate the quarters when the clock strikes by raising and lowering one of his forepaws, the other lion announcing the hour strokes in the same manner. They move their tongues alternately at the same time. The phases of the moon are also shown, as is usual in most of such clocks, the lunar sphere being placed above the dial.

It should also be mentioned that Saxony possesses in the castle of Stolpen a turret clock dating from the year 1562, and entirely in its original form. This single-headed clock, though nearly 350 years old, still announces the time at the top of the tower, called after it the Seiger tower. It could tell many a thrilling story connected with this interesting ruin if it could talk.

opening up of fresh technical territory owing to the progress of electricity, with its extensive applications, the development of the telephone and the phonograph, and lately also of the science of aeronautics, attracted the students of the institution, as the *Moniteur de la Bijouterie et de l'Horlogerie* remarks, on the completion of their course to branches where their skill and the knowledge which they had acquired might be put to better use, where they would be better paid, and where the outlook for the future was more promising.

To contend against this reaction only one thing was to be done; the number of the students must be increased in order to insure a supply of apprentices for every branch of technics, for horology as well as for the others mentioned. The Chamber, however, was not in a position to bear addi-

CHICAGO: HEYWORTH BUILDING

totalled on the five-figure counter L, which does not return to zero with L. S are the oilers, F the end of the flexible operating shaft. The arrangement of this shaft is shown in Fig. 2. Q is a ring of aluminum mounted on one of the wheels. A rubber pulley, P, acts as a roller, pressed against the ring by a spring, R, which carries with it, in its rotation, the flexible shaft F. The reduction is one-half, which protects the counter against excessive speeds.

The details of the mechanism located beneath the dial of Fig. 1 are shown in Fig. 3.

FIG. 2.

The flexible shaft imparts motion to the wheel F, on which the wheel J is mounted. This wheel, by means of the endless screw f, operates the wheel K, which operates the two kinematic counters.

These meshes, at the same time, with the wheel I, which operates the centrifugal governor regulator of H h h'. The toothed sector of the regulator C communicates its displacements to the needle of the tach-

FIG. 3.

ometer, the axis of which is at C. It is needless to state that the arrangement of the transmission on the wheel of the vehicle allows the exact determination of the rubber pulley in such a manner as to transform the revolutions of the wheel into exact equivalents in kilometers.

It is, however, not in the precision of these arrangements that the essential originality of the instrument exists, but in the employment of three dynamometric springs, in place of the one commonly used in apparatus of this character. It is easy to see the advantage of three springs. Suppose a

tachometer has but a single spring. If this spring is very strong, a low speed will not bend it. It will not budge. Beyond the natural highest limit allowed by its play it will have a lower limit, still much above zero, where it will be more powerful.

If, on the other hand, the spring is weak, it will begin to work at lower speeds, than in the preceding instance, but its highest limit will be much lower than in this case. The apparatus cannot be used for high speeds.

The arrangement of the three springs, detailed in Fig. 4, ingeniously avoids these difficulties due to the use of the gyroscopic system.

The masses are set in motion. From the beginning of their action they compress the spring 1, the weakest of the series. This compression ceases when the sleeve d is brought into contact with the mounting D D'. If the speed still increases, the spring 1 remains fixed in its position of maximum compression. Spring No. 2 comes into action and abuts against the shoulder of the sleeve d. It is compressed up to the moment when the sleeve d' comes in contact with this shoulder. It has itself attained, at this moment, its position of maximum compression, and it gives place to the largest of the three springs, 3, which

FIG. 4.

carries the needle to the limit of the graduation of the dial.

The principle is capable of very interesting applications. The number of springs may be made to vary from three. To emphasize the importance, I need only here recall how the tachometers ordinarily work—for instance, the tachometers used in the French navy, which have but one spring.

These springs only allow exact records on the dials when the number of revolutions of the shaft ranges from 250 to 1,000, for instance. If it is desired to record the instant speed of revolutions, greater than the highest of these numbers or less than the lowest of them, it is necessary to increase or decrease the speed of the machine by means of suitable pulleys or gears.

This is a complication, the more so when we consider that the readings of the scale are not always simple, and that each dial must be separately graduated. It is to be presumed that the principle of the three springs—or, rather, of multiple springs—will soon find application in other industries than that of the automobile.

Ed. Nix has succeeded to the business of A. B. Phinney, Bentonville, Ark.

Ed. Werder, Charles City, Ia., will considerably improve his store, about Oct. 1. New mahogany fixtures with marble bases will be included in the new furnishings.

A Good Mayor Not Always a Good Clockmaker.

MAYOR Henry Fletcher, of Providence, R. I., who is treasurer of Fletcher, Burrows Co., is a great advocate of a man finding his particular vocation or sphere and then sticking to it and making a success of it. In this connection, the Mayor says that once, just once, he essayed to doctor a clock. "First, I put a clamp on the spring to make sure of holding it in place. Then I lifted out the 'innards,' and confidently placed them on the table. Swish! Bang, went the clamp and the room was full of clock springs.

"With a great deal of effort and no little finesse I coaxed the spring back to its normal condition, screwed down the clamp, dusted the several wheels, assembled the parts, put the works back in the case, set the clock on end and started the pendulum.

"There was no responsive tick. Good reason why there was not. On the table beside me were two of the wheels which I had forgotten to restore to their normal position in the 'innards.' Then a full-fledged clockmaker got the job."

A Long-Winded Hall-Clock.

A HALL clock that will run five years with one winding has been invented by Max Schucht, Milwaukee, Wis. The clock ticks only once in 60 seconds, at the end of which time the pendulum receives an impulse which sends the minute hand forward one minute. It is provided with a hundred-pound weight, which drops one inch each month. The counting wheels are very fine and need no oiling, while the heavy gear-wheels have more power than those of the ordinary clock, as they move but once a minute. The clock requires comparatively little weight to keep it in motion.

Mr. Schucht's timepiece has a framework of quarter-sawn oak. The dial, which is 14 inches square, consists of brass and silver. The outer rim is of brass and has ornamental corners. The ring which shows the hour numbers is of silver, and the figures, which are raised, are of brass. The hands are of aluminum, black enameled. In the center of the door is a handsome art glass panel. The clock is eight feet high and 29 inches wide.

School Janitor Constructs Unique Clock.

WITH the aid of works from an old Waterbury watch, David L. Marrs, janitor of a San Diego school, has perfected what he calls a 24-hour clock, and has presented it to the pupils of the school. Instead of going around the dial twice in 24 hours the hands of Marrs' clock go around but once. He declares it to be the first clock of the kind to be successfully used on the Pacific Coast. The dial is 26 inches in diameter, with numerals from one to 24. A clapper strikes every half hour on a cup bell.

A fire recently broke out in the building occupied by Max Auschwitz, Fort Meade, Fla. The jeweler saved most of his stock, his loss being only about \$100, which is covered by insurance.

RING OUT THE OLD—RING IN THE NEW

Why travel in the same old rut the balance of your natural life, and buy the same antiquated styles of Nickel Alarm Clocks your grandfather used to buy, just because some manufacturers have not thought it necessary to produce new designs in Nickel Alarms, as they do in other clocks?

We have some new ones, superior to anything heretofore made, and to introduce them and put a set into the hands of every jeweler, we will, on receipt of \$6.00, deliver east of the Rocky Mountains, express prepaid, one sample of each, consisting of eight clocks as described.

Don't fail to avail yourself of this opportunity to see a complete line of up-to-date alarm clocks

See coupon at bottom of page.

STANDARD.—30-hour time. Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

THE RATTLER.—30-hour time. Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case nickeled and highly polished.

LONG ALARM.—30-hour time. Six-minute Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

ALTERNATOR. 30-hour time. Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

DI-ALTERNATOR.—30-hour time. Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch; extra large bell. Height, 7 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

THE E. INGRAHAM CO.

BRISTOL, CONN.

"THE ALARM CLOCK WITH THE CONCEALED BELL"

See cut of interior view showing bell located entirely within the case. The unsightly visible bell eliminated. Bell cannot be disarranged or thrown out of adjustment.

SIREN.—30 hour time. Long Alarm (four minutes), with "shut-off" switch. Large bell inside of case. See interior view. Height, 6 in.; Dial, 4 1-2 in., solid brass; Case, nickeled and highly polished.

VIBRATOR.—30-hour time. Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass silvered; Case, solid brass, old brass finish.

ROTATOR.—30-hour time. Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

TEAR THIS OFF AND MAIL TO-DAY

THE E. INGRAHAM COMPANY, BRISTOL, CONN.:

Mr. Watchmaker :

Aren't you tired of cleaning watches two or three times and receiving pay for the job but once? Aren't you tired of turning a watch or clock out in perfect order and then have to come back in two or three months all gummed up and with blackened pivots?

Aren't you just about ready to quit your profession, when you oil a watch thoroughly and it comes back in a short time completely dried out, looking as if it had never seen a drop of oil?

If you have had these experiences (and if you haven't, you are the first one we have yet to hear from), you will surely welcome some relief.

Fulcrum Watch and Clock Oil

will solve all these difficulties. It positively will not gum, will not evaporate, will not corrode the pivots, because it is the only Watch and Clock Oil ever known which is absolutely free from acid, AND WE CAN PROVE IT.

The price is 35 cents a bottle, or \$3.75 per dozen, and can be obtained from any material jobber.

If you want to try it, send us a postal and you will receive a small sample bottle free of charge.

FULCRUM OIL COMPANY - - Franklin, Pa., U. S. A.

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The hammer blow is too weak to get the tone out of good hells; only thin, light bells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MONASTERY," which are heavy, powerful brass works, with solid steel pinions and huilt as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture, fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular hells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

Prices F. O. B. New York.

37 Maiden Lane, NEW YORK

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Original Display Commemorative of the Hudson-Fulton Celebration.

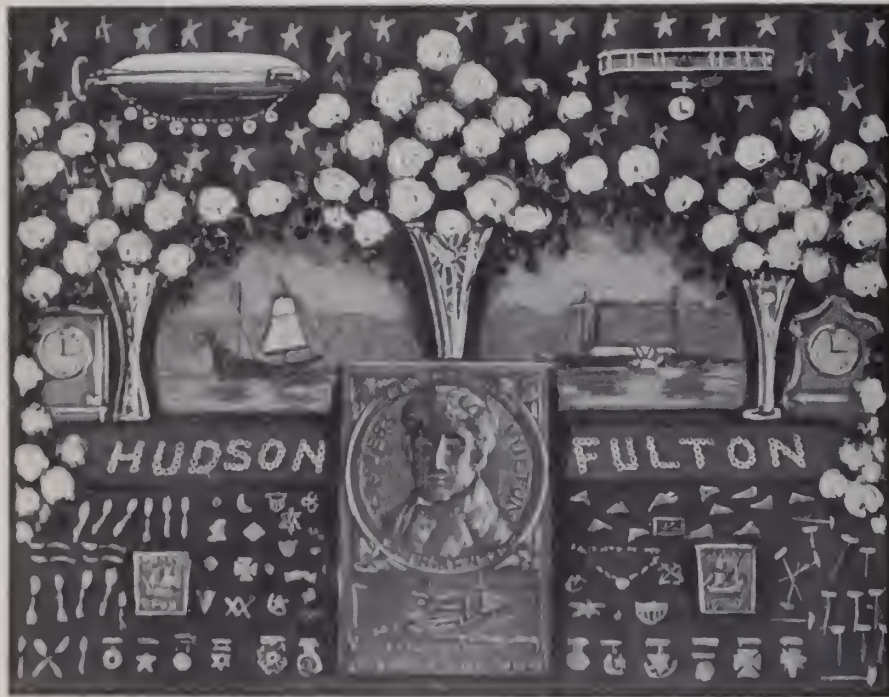

Prepared expressly for The Jewelers' Circular-Weekly.

MUCH interest is at present being focused on the coming Hudson-Fulton celebration, and a window decoration commemorative of this anniversary would be particularly timely.

Procure two large pictures of the *Clermont* and the *Half Moon*. Attach these

spell out the names "Hudson-Fulton" with wedding rings, or other small articles, if necessary.

In the foreground part of the window "center up" with a large Fulton or Hudson memorial plaque, and at proper intervals on either side place two smaller ones.

TIMELY WINDOW DISPLAY CONTAINING SOUVENIRS OF THE HUDSON-FULTON CELEBRATION

picture to a curtain made of flags, showing the stars only, in the back of the window. Place a narrow raised platform in front, and on this put three cut glass vases in such a manner as to hide the side edges of the picture. The top edges will be hid by streamers of flowers and leaves fastened together by wire. These may be connected to the banquet of some large flowers, as chrysanthemums, which should be placed in the vases. In this way the two vessels will be "framed in," making attractive views of them like a stage setting.

On the sloping front of the platform

The rest of the stock can be made up of souvenir spoons, rings, charms, pins, buckles, medals, etc., on a dark ground.

One of the great features of the celebration in New York will be the aerial exhibitions and races. As airships are also things of universal interest everywhere, the attractiveness of the window might be considerably enhanced by two of the leading types, as a "Zeppelin" and an aeroplane. These could be easily drawn on white cardboard, cut out and suspended by strings above the flowers in the rear of the window. They may be made to serve a useful

purpose by attaching watches.

The jeweler will be credited with considerable enterprise and will secure the attracting power of the display by a neatly printed programme of the proceedings.

A "Homestead-Store" in Vermont

NESTLING among the Green Mountains of Vermont in the quiet little town of Manchester Center, is the quaint diminutive jewelry store of J. S. Batchelder. Mr. Batchelder's establishment is located in his private house, and were it not for the little watch sign erected on the sidewalk near the sidewalk an inquisitive passerby would scarcely recognize it as a business establishment as we very cozy little home. The man's keen eye, however, upon passing the store can see the owner at his window busily engaged in repairing watches or engraving articles of jewelry. The store adjoins the well known hotels of the town, which is really a good business asset to the number of visitors who flock to Manchester to breathe the health-giving ozone and try their piscatorial luck in trout-filled Battenkill that flows through the village.

Mr. Batchelder moved to Manchester Center about four years ago from North Hill, Mass., and has built up a business which has far exceeded his expectations. Being an expert engraver and chemist as well as a competent watchmaker, he has been able to do work which many jewelers are obliged to send out. Although the isolated traveler might wonder how a small population could support a jewelry store whose wares are generally considered necessities, this little jewelry store is keeping exceedingly busy.

The dimensions of the store are about 10x14 feet and in this small amount of space is arranged a generous assortment of well-chosen stock, including silverware, a general line of jewelry and a valuable collection of clocks. Mr. Batchelder finds space here for his lathe and necessary watch repairing tools, the work of watch repairing done being in a large measure done in a room of large size. A large amount of plate work is done for undertakers, both in Manchester and in half a dozen adjoining

Hart Swalstead has bought the business of J. J. Skaug, Minot, N. Dak.
J. G. Swain has purchased the business of D. S. Binford, Whittier, Cal.

THE SMALL MERCHANT'S TRIALS.

Address delivered by J. R. CHAPMAN, Oshkosh, Wis., before the convention of the Wisconsin Retail Jewelers' Association, held in Milwaukee.

A MOST everywhere to-day the small merchant in any line of business finds himself confronted by a comparatively new element of competition. If he is the small merchant in the large city, away from city centers, he feels the competition of the department stores, whose wagons are moving in and out through his logical territory. If he is the small merchant in the country town or on the cross-roads corner where the rural free delivery operates, he will be under still greater stress from the order house of the city.

Whether from whatsoever source the small merchant feels the influences of this new competition, he recognizes in it a certain element of the mysterious and the ill-defined. As for himself and his business, he feels that he is in the open. If he has been long in business in a certain neighborhood he is disposed to feel that as a citizen and a business man he is entitled to some organization simply because he has been so long a fixture. If he be new in the environment and has been making equal efforts for recognition by reason of his up-to-date stock and its display, he is likely to brand this new field as prejudicial and unprogressive to the extent that he is unresponsive.

The chief trouble with this small merchant is that he has not considered the nature of his competition. He is competing for business with it, looking to his public to be the final judges as to his merits as a merchant, yet all too frequently he has not the slightest idea of the nature of the competition which he must combat.

WHERE THE TROUBLE RESTS.

Let us meet an acquaintance in the streets the other day, who had come in from his home on the outskirts of an Illinois town of a population 100 miles out of Chicago.

"I have been laying in my winter's supplies," he said, explaining his presence in the city. "I don't know anything about the storekeepers in my town, only that I do not know they are taking long chances on credit everywhere. The competition is keen, and every year storekeepers there are several thousand dollars 'in the hole' because of these bad accounts. As many of them have continued in business for years the consequence is if I buy of them I must accept the condition of becoming a cash customer, making good these losses in addition to paying reasonable profits on goods sold."

"When buying in quantities in Chicago department stores, I find that I can save 15 to 20 per cent on many kinds of household supplies. These goods are fresher, perhaps; they are of standard quality; I have wider choice of selection than is possible in the country store, and freight rates are only a few cents a hundred pounds to the village store. Do you wonder that I buy supplies in Chicago?"

It is a first problem in his competition, the small dealer runs into that of the bad

debts which he contracts one year with another. Ordinarily this small dealer in city or country neighborhood has his full share of local competition from other local dealers. He and his competitors are in personal touch with his customers, who, as a class, are prone to bank upon personal acquaintance with the storekeeper as a leverage, making risky credits possible.

In the case of a doubtful creditor whom Smith would turn down in a minute were he the only storekeeper in that region, the fact that the competing Jones and Clark and Brown might give this man credit for the asking makes it a stronger possibility that Smith will take the risk.

In fact, that competition which impels Smith to go after the best type of customer against Jones also may make it even more imperative that Smith try to get the trade of the doubtful man. Few men who class as bad pay in the small community are without their personal influence. Nowhere does the pressure to command personal influence for trade rest more heavily than upon the country merchant. If he cannot command a man's friendship, especially he doesn't want to invite his enmity.

No one is more conversant with this fact than is the man who is bad pay. It is a large part of his working capital. In consequence the proportion of bad debts contracted in the small store may be immeasurably above that of the large establishment on a cash basis.

Naturally, the small merchant, knowing virtually everybody in his business field, comes to resent certain fixed conditions which local competition forces upon him. In many cases this small merchant knows the "inside" history of every possible customer within his range. To the extent that gossip and prejudices tend to the forming of social cliques around him he is more than human if he doesn't take sides himself. And he is more than human if his own opinion, likes and dislikes are not reflected in his business relations with his customers.

Try as he may, he cannot show the same front to Jones, who is running up a doubtful bill of \$25, as he unconsciously shows to Brown, who pays cash for every purchase he makes. Jones must see and feel this sooner or later, in which case, no matter how Jones may swallow the fact to his selfish ends, the storekeeper, in baiting Jones, not only has a doubtful customer as to payment, but he has a "knocker" of his business as well. Competition may have forced the storekeeper into accepting one man as a customer, but the storekeeper pays his inevitable two prices for the customer.

But how does the big, impersonal house in the city treat Jones? Jones appears, expressing a desire to open a charge account. Jones is referred to the credit man, an impersonal agent of the business. Here Mr. Jones is asked virtually to give a history of his life, with references of known

character who will vouch for the truth of what Jones tells, after which Jones is asked what limit he wishes to put upon his monthly purchases. When Jones has approximated this amount he is invited to schedule property of a value commensurate with such purchases, and if Mr. Jones can't do this he is told that the house must look upon him as a cash customer always or else dispense with the hope of his trade.

Is it any wonder that Jones goes back to his neighborhood store, taking advantage of local competition to sell his doubtful custom to some small dealer who may be induced to pay two prices for it?

Another of the vital elements in the competition of the great house against the smaller house is that comparatively new gospel of a "satisfied customer is one of the best assets of any business."

Hundreds of small dealers all over the country may scoff at this as an empty phrase of that big business established on metropolitan lines. But there are thousands of customers of the big establishments who know that the philosophy is in every-day practice the year around.

I was told a story, a few months ago, touching on this fact. In some way the head of a large business in Chicago had been quoted in this matter. He had explained that no effort was spared in selling a customer just the thing that the customer wanted to buy and with which he would be satisfied.

Incidentally, this quoted statement came to the eye of a man living in North Dakota. This man, a dozen years before, had bought an article of this Chicago house, for which he had paid \$18 cash. The thing had been shipped to him and had proved unsatisfactory from the first. In the end it was cast aside as useless to the customer, who, on a first complaint, had received little complaint from the house.

But after these 12 years, challenged by the utterance of the head of this establishment, the former customer in North Dakota clipped the quoted sentences from the newspaper and attached them to a letter addressed to the speaker, explaining that unsatisfactory deal of 12 years ago.

The sequel was that by return mail this former customer received a check for \$18 principal, with compound interest for 12 years at 6 per cent. Convincing, wasn't it?

One of the largest mail order houses in the United States contracts with every purchaser who is dissatisfied with his purchase not only to return his money but to repay return charges upon the unsatisfactory goods which the house has sent out for cash in advance. Yet how many thousands of small dealers all over the country show even a pleasant expression of countenance when a "best" customer comes in for cause to make complaint of any kind as to some purchase made the day before on a charge account?

Chas. Donnell, 32 years of age, and owner of a small store in Denver, Colo., was recently taken into custody on a charge of having misappropriated a number of watches which had been given to him to be repaired. The accused promised to return the missing timepieces.

KALANA GLASS

AN entirely new and beautiful effect in etched glassware in which floral designs, such as pansy, lily, poppy, geranium, etc., are shown in an attractive manner true to nature. No illustration could convey the exquisite beauty of this ware.

During the dull times we have been preparing to meet the prosperity which we were certain would follow. You can now find among our samples many good things in Cut Glass, Engraved Glass and Rock Crystal for prompt shipment.

THE CONNOISSEUR

Devoted to Art Pottery, China, Marbles, Bronzes, Cut and Decorated Glass Ware, Bric-à-Brac, Lamps, Art Metal Wares, Fancy Goods and Kindred Lines.

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of Aug. 25.)

BASTIS. An Egyptian goddess to whom the cat was sacred. Egyptian ladies wore rings sometimes in which the cat figured the place of the usual scarab.

BOCCARO or **boccaro** ware is "a most delicate stone ware decorated with colored designs raised a great deal above the surface."—Janvier.

BUCCHERO WARE. (Vasi di Bucchero) A peculiar ware made of black clay unrelieved by colored decorations, found abundantly in Etruscan cemeteries. Commonly called by its Italian name *bucchero nero*, or simply *bucchero*. It may be regarded as the national pottery of Etruria.

It is the only branch of the ceramic art in which the Etruscans attained any degree of individuality, and is now admitted to have been their own invention. Its chief characteristic is the material, usually of a coarse, heavy, grayish clay, covered with a coating of finer, blacker clay, which is capable of taking a smooth, glossy surface. Forms sometimes borrowed from Greek, generally copied from Egyptian, Phœnician or Carthaginian metal vases. The Etruscan's slavish copy is shown by his imitating the rivets and every detail when making a brass vase. The date of this ware is about the VII. century, probably. It has a polished, not glazed, surface.

BUCCHINA (Gr.) "A kind of trumpet entirely made of a conch shell, represented in the hands of Tritons."—Mollett.

BUCENTAUR. "A monster half man and half ox. The name of the Venetian galley."—Mollett.

BUCRANIUM (Lat.). "An ox's head from

represents a *bucranium* in the temple of Vespasian at Rome."—Mollett.

BUCKLES. "Knee and shoe buckles of silver are named after their styles, 'aigrette,' 'Seigné,' 'bouquet,' etc.—Vors.

BUDDED CROSS. (See *Botonnée*.)

BUEN RETIRO, EL (Spain). This factory, near Madrid, was started 1759 by Charles III. As he brought his workmen and models from Naples the porcelain bears a great resemblance to that of Capo di Monte. It is often highly embossed work. This ware is very rare. It was exclusively a royal factory. In the "Peninsula War" the place was destroyed in 1812. Marks: Fleur-de-lis and monogram of Charles III.

BUHL, H. & Son. A pottery was established in 1780 at Grossbreitenbach by this concern. Their chief product consisted of vases and tea services.

BULGA (Lat.). "A purse or leather bag for money which was carried on the arm."—Mollett.

BULKELEY & BENT. Staffordshire potters of the latter part of the XVIII. century.

BULLA. The Greco-Roman neck pendant. Worn by Roman children till passing the rites of a youth. They consisted of two bossed plates soldered around the edge and

BULLA.

generally enclosing a charm. "The heads of certain nails were called *bullae*. The cut shows one of the *bullae* decorating an ancient bronze door in the Pantheon at Rome."—Mollett.

BUNTZLAU (Germany). The stone ware of this location has been produced since the XVII. century. Very plain in appearance, it usually does not claim even any decoration. Occasionally flowers, armorial bearings in gilded relief or a yellowish design is met with. The Buntzlauer coffee pots have had a vogue with the masses in northern Germany for centuries.

BUONI, LUDOVICO, of Faenza; paliotto of Pistoja (1347).

BUONTALENTI, BERNARDO. A Florentine chemist who in the 16th century produced in Cosmo the Great's San Marco Castle laboratory a translucent porcelain. It was a hybrid consisting of Vicenza kaolin, quartz and vitreous frit.

BURETTE. Called variously *ampulla*, *amula*, *fiola*, *crewet*, *cruct*, etc. An ecclesiastical vessel, usually made of the precious metals, used to contain wine or water. A

BURETTE, VI. OR VII. CENTURY. ABOUT EIGHT INCHES HIGH. IN CHRISTIAN MUSEUM, ROME.

cruct. The engraving depicts a *burette* in the Christian Museum at Rome. It is of silver, the design is in intaglio.

BURGAU. "A univalve shell. *Turbo marmoratus*, producing a mother of pearl; and hence all works in mother of pearl, of whatever material, are called 'burgau.'"—Jacquemart.

BURGEN, Jan van der. A potter at Delft (1695). Started as foreman to Lambertus Eenhoorn, then to Jacobus Pynacker at the Porseleine Fles (Porcelain Bottle), later under Kocks, at De Griekse A (Alpha) factory, and lastly under Damis Hofdick, at De Ster (the Star). Pieces from all these factories bear his signature.

BURGH, Paulus van der. A Delft master potter (1759) at De Vergulde Blompot (Golden Flowerpot).

BURGONET, burgonette, or *buranet*. "A steel cap, or helmet, worn by infantry during the XV. and XVI. centuries; it derives its name from the Burgundians, who introduced it."

BURGOS, or Burgau luster. A mother-of-pearl effect produced in ceramics by sulphur gold and potash.—Janvier. (See *burgau*.)

"**BURNT IN.**" A term used to distinguish the painted from the enameled porcelain, the colors of the former being burnt in

BUCRANEUM.

with the glaze, whereas in the latter the colors are laid on after glazing."—Marryat.
ERSLEM, Staffordshire. Center of the English pottery industry. On account of the close proximity of the coal and potter's clays at this location it has always enjoyed prominence as a potter's center. Burslem has been the home of potters whose families have carried on the occupation for generation after generation. The Wedgwoods had been potters for very many years; of Enoch Ward's name this is the case.

SCH. A German of this name gave us the secret of making hard porcelain.
STON TEARLS. Those pearls which are cut on one side.

ZEN (Japan). A pottery was established here in the opening years of the 17th century by Hosokawa Tadaoki, a samurai having lands here. He brought a potter, Soukai, and opened a kiln at Kyo. Soukai changed his name to Kyo. He made *chaire* (to which he gave the name of Agano). He went to the Province of Higo where his patron went to that place, and a kiln was started at Yatsushiro.

ANTINE KNOT (See *intreccio*).
ANTINE PERIOD, A. D. 328-1453.
 "Byzantine period 328-550. Constantine I. period, 272-337; made emperor of the east period, 550-1000; "late," or Italian period, 1000-1451. By 1153 it is lost.

Byzantine art is a conglomerate developed in the Eastern Roman Empire and includes motifs and modifications of the Asiatic, Greek and early Roman. It is beautiful and intricate, but lacks vitality and depth of character.

Byzantine capital. In the Byzantine period the capital, "for some time really of the antique style, now received a peculiarly Byzantine form; for, although it was made round below, but four-cornered above, the trapeze-shaped flat parts were

BYZANTINE CAPITAL.

surrounded by an ornamental border, while the closed surfaces received another kind of ornament. Besides this, on the capital was placed a trapeze-shaped block intended to unite the capitals and arches. On the sides of the block are sculptured ornaments or symbolical emblems. *Capitals*, however, are often found which come near to the ancient character of form, though in the manner of treatment."—Lübke.

(To be continued.)

Richbourg has succeeded to the business of Chandler L. Glines, Leslie, Ark. The business formerly conducted by A. Bittrolff, Evansville, Ind., is now run by J. F. Bittrolff.

"What We Have Done and What We Should Do."

(Address of JOSEPH MAZER, before the Iowa Retail Jewellers' Association, at Des Moines, Ia., June 23-24, 1909.)

It is not often that a president of a State association is honored by being asked to address the convention of a sister State, and that, of itself, implies a courtesy which I would be cold-hearted indeed not to appreciate. I come before you as the president of the jewelers' association of the State of Oklahoma, and you have asked me to speak upon the subject, "What We Have Done and What We Should Do." As applying to the State of Iowa, the first part of the question, "What We Have Done," could have been handled more easily by the speaker if it had been made to read, "What Haven't We Done?" It can be properly said that in Iowa was sown seed which culminated in the great national organization, which now has something like 37 States beneath its protecting wing. It was Iowa that published the *Bulletin*, and during the short time of its existence it proved to the manufacturing and jobbing trade that the retail jeweler, even though his complaints were legion, was capable at all times of remembering that no man is truly great if he is not able to express himself in language which will not violate the laws of decency and charity. Within the *Bulletin's* pages there appeared neither heated nor bitter words. For when those responsible for its existence had maturely reflected and were satisfied that the grounds they took were wholly right, they maintained with firmness and expressed with frankness their opinions, but not too positively nor scornfully towards their antagonists, nor with the use of words that could justly wound any man's feelings or startle his self-respect.

I might tell you about what you have done in the way of protecting the retail jeweler against mail order, cut-throat competition. I might tell you what great good you have accomplished in being instrumental in the establishment of fixed selling prices on many standard makes of goods. I might tell you of the inestimable benefit you conferred upon us by inducing many manufacturers to market their entire product through the legitimate jewelry channels only. I might tell you of our latest great victory, the request by the Waltham Watch Co. that mail order houses hereafter refrain from cataloging its product. I might tell you of the stupendous service you performed when you abolished in part the retailing jobber. But all of these things, and others I might mention, would fade away into invisible significance beside the incalculable, miraculous accomplishment of having learned that your competitor was also a human being, and like yourself was endowed with the five senses and possessed that integrity of purpose which always characterizes the members of your grand Iowa association.

By meeting together you discovered that your competitor was a fairly good fellow. You can't deny it, you were surprised when you heard him talk about matters other than business. You were astonished when you discovered that he was not so cruelly constituted but what he could laugh and smile at things which previously you had thought was impossible for so depraved a nature. Yes, and you were thunderstruck when he missed an opportunity to run down a competitor in your presence. A second time he missed and a third time he missed, and when the fourth time had rolled around and still he did not take advantage of the openings you gave him, you pinched yourself to see whether or not you were dreaming. And when, on top of all that he asked you to have a cigar, it was too much for your overwrought nerves, and you fell upon his neck and wept the bitter tears of repentance which always flow from the well-springs of a contrite soul.

The association has enabled you to discover that there is good in all men, even jewelers! It opened your eyes to the fact that peace has its victories no less renowned than war, and now you know that before the advent of the association we were living mistaken, selfish and profitless lives.

It is not necessary, however, to dwell longer on "What We Have Done," and so let us consider "What We Should Do." And that reminds me of a story: At one time a very fond father visited a military camp to see the maneuvers. He watched every evolution with breathless interest, and in all of them, Frank, his Frank, occupied the center of the picture. No sooner were the drills at an

end than the father raced madly towards his boy and, between the embraces and hand shakes, managed to say, "Frank, you just can't know how proud I feel! And to think that among all those men you were the only one who was in step!" and that brings me to Oklahoma.

I don't know whether or not it would be right for me to say that Oklahoma has always been in step, but I look upon Oklahoma as my "Frank." With a father's enthusiasm I have watched it grow from nothing to its present dimensions. I love the members of the Oklahoma association for their unshaking fidelity, their unsurpassed enthusiasm and their unswerving loyalty, and I consider that the greatest compliment ever paid Oklahoma was by that grand old man, Colonel Shephard, when he enthusiastically told me during his presence at our recent convention that "The Oklahoma boys were the finest bunch of crazy snakes he had ever seen in his life."

I approve every resolution ever passed by the Oklahoma association. I believe they were all based on good thought and sound judgment, and wish to call your especial attention to the "Fixed Selling Price" resolution which we passed last year and which we later introduced at the national convention at Cincinnati. (Mr. Mazer here read the resolution to which he referred.)

"What We Should Do." Let every jeweler present to-day make up his mind that this fixed selling price resolution shall hereafter be known also as the Iowa resolution. "What We Should Do." Let every retail jeweler of Iowa sign that resolution, pledging his sacred word of honor that he will refrain from purchasing goods which do not give him fixed selling price protection.

"What We Should Do!" Pass a resolution condemning the practice of silverware companies running retail stores, thereby coming into direct competition with the retailer. Condemn the practice of silverware manufacturers supplying hotels direct, thereby depriving you of profits which are justly yours. Resolve that you will not buy silverware which is sold through the hardware trade, either wholesale or retail. Resolve that you will not purchase from a jobber who sends catalogues to people not entitled to receive them. Resolve that you will not tolerate the practice of watch companies making special named movements for mail order houses, thereby decreasing the demand for regularly named goods, which, under fixed selling price protection, would necessarily be supplied by you. Resolve all of these things and more, and do more than merely resolve.

In the jewelry business I liken the retailer to the team and the wholesaler to the driver. The team can run away any time it wants to and smash the vehicle to everlasting smithereens, but, like old work horses, you have labored when you should have been at rest, you have gone without food when you were hungry, and without water when you were thirsty, and you have been driven for so long a time that you have neither the nerve nor inclination to assert your real strength. So you just plod along, turning to the right or to the left at the touch of the rein or lash, and you are content to eat the salt from the driver's hand.

If you would say to the silverware man that he cannot supply you if he supplies the hotel; if you would say to the movement makers that you will not handle the same movements as "Sore Sawbuck;" if you would say to the case manufacturers that you will handle complete watches only until such time as you can receive protection on the case as well as movement; if you would say to the wholesaler that the catalogue from which the retail company orders can find no place in your store, and if by your actions as well as by your talk you would convince these people that you mean it, then I would see upon your faces looks of contentment, happiness and prosperity, the like of which has never been equaled since the establishment of the first fig-leaf tailor shop in the time of Adam.

"What We Should Do!" Increase your membership. And if you will pardon my presumption, I believe I can suggest the method by which that may be immediately done. If a number of you who are honestly interested would take out of your own pockets the money necessary to pay the fees of as many unaffiliated members, I warrant that when you arrive home and explain to your competitor what you have done and why you did it, that he will thank you for it. In that manner we got some 30 or more members for the Oklahoma association, and out of all of them we had but one who did not come across with his own signed application, and you may depend upon it that we are not claiming any representation for that fellow.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer

QUESTION No. 2329.—Gilding Fluid for Polishing.—Kindly give me a formula for gilding by simply immersing. G. F.

ANSWER:—A very good gilding fluid for jewelry, which may be used without the electric current, is known as Elsners. It is composed of the following: One part crystallized gold chloride, five parts of potassium ferrocyanide and five parts of water. The jewelry to be gilded must be thoroughly cleaned, then immersed in the fluid at a boiling point and touched with a zinc rod or sheet. The jewelry will be perfectly gilded in a few minutes. It is placed in water and made bright by brushing with moistened powdered tartar. After several times the gilding fluid must be replenished by adding more of the gold chloride and chemicals. This is known as the contact process, and can be worked more easily than any other method.

QUESTION No. 2330.—To Clean Marble and Remove Grease.—How can I remove the spots and clean a marble counter? C. M.

ANSWER:—Grease spots can be removed from marble by piling a little whitening on cloths, saturated with benzine, and allowing it to stand. Another way is to make a mixture of two parts washing soda, one part pumice and one part chalk, all finely powdered and made into a paste with water. Rub the marble with this and finally wash with soap and water. To clean marble, mix with water, five parts of soda, 2½ parts powdered chalk, 2½ parts powdered pumice. Rub the marble with this mixture first and then wash with soap and water.

QUESTION No. 2331.—Etching Ivory.—I want to do some etching on an ivory brush and comb set. Can you give me a formula for doing this? E. & I.

ANSWER:—The following formula for etching ivory was given recently in the *Craftsman*: Cover the surface with a thin resin varnish and transfer the design on this. Trace it out thoroughly with a sharp needle. Proceed by building up a wall around the surface to be etched, and pour on one part sulphuric acid and five parts water, which works very quickly. The lines are thereby turned a dark brown. If brown lines are preferred, mix one part of lunar caustic (nitrate of silver) in five parts of water; etch for a short time and then expose the ivory for several hours to the light, until the lines are turned brown.

QUESTION No. 2332.—Sources of Tripoli.—What is the source of tripoli? I refer to the kind so much used for polishing rubs, copper and silver articles. S. T.

ANSWER:—According to Government reports, the principal source of tripoli, which is also known as infusorial earth, or diatomaceous earth, is now Santa Barbara County, Cal., where it exists in great abundance. Diatomaceous earth is perhaps the most appropriate name, as the material is composed almost entirely of the skeletons of minute organisms, called diatoms—one-celled plants that adapt themselves to a wide range of conditions of depth and temperature in fresh or salt water and secrete siliceous casings around their organic matter. The tripoli which is offered for polishing purposes is, of course, prepared by being ground and pressed into cakes, with enough fat or grease to allow it to become consistent.

QUESTION No. 2333.—To Clean and Fill Barometer Tubes.—I sometimes receive barometers which have developed air bubbles during transport, and which consequently do not work properly and have to be refilled. How can I repair them?

ANSWER:—This should be done in the following manner, according to the *Deutsche Uhrmacher Zeitung*: Pour the mercury into a porcelain vessel and keep well covered. Rinse the tubes several times with diluted sulphuric acid (prepare the solution by pouring the acid in a thin stream into 20 times its volume of water, not the reverse), and afterward with plenty of water. Then leave them to dry in a warm place, the open ends upward, in order that the vapors may pass off more easily. Next, clean the mercury by holding a piece of soft, clean leather in one hand in the shape of a bag, pouring in some of the metal and pressing the mercury with the other hand through the leather into a clean porcelain vessel. The process may be repeated, and it will be found that all impurities have been left in the leather. In filling, pour about a thimbleful of the mercury into the widened part of the tube, place the thumb over the opening, turn the tube downwards, holding it in a slanting position, and by means of short raps or jerks force the mercury toward the closed end of the tube; when the end has been reached, pour in a second portion of mercury. Air bubbles which may have formed in the metal may be removed by careful knocking; the upper end of the barometer, which is held downwards, should be knocked against a harder substance, such as soft wood. If more mercury has already been added, the forcing of the mercury toward the closed end of the tube by knocking as described must be performed gently, otherwise the bulb might be broken by the heavy metal. When the process is com-

pleted, close the wide end with a cork or piece of wadding. The sealing need not be loose; the only essential is that the tube should not be air-tight. If any mercury has been lost, pour more in, regulating the quantity by comparing the barometer with another. Any metal which may have fallen on the ground must be carefully removed, as it evaporates and may produce symptoms of poisoning in human beings, the mildest of which is profuse salivation.

QUESTION No. 2334.—Silver Polish.—I would appreciate it very much if you would send me a recipe for making a solution pomade or a cream which would put a fine polish on sterling silver, plated silver, gold, brass, copper and nickel. F. D. W.

ANSWER:—(1) To restore brilliancy to silverware that has become somewhat tarnished it is best to make a preparation of cyanide of potassium, three or four drachms, dissolved, and eight to 10 drachms of nitrate of silver in four ounces of water. Apply with a soft brush, wash the object thoroughly with water, dry with a soft linen cloth, and polish with a chamois skin. For solid silver a little precipitated chalk may be added to the solution. (2) A brilliant luster may be given to plated silver articles by using a liquid polish made of about 120 grams of distilled water, seven grams of potassium cyanide, and 600 milligrams of silver nitrate. *German Putz Pomade.*—The formula for what is claimed to be the genuine putz pomade contains the following: Oxalic acid, one part; oxide of iron, 25 parts; rottenstone, 30 parts; palm oil, 60 parts; vaseline, four parts. The oxide of iron and rottenstone must be free from grit. A pomade much simpler contains 100 pounds of common vaseline, melted. Stir in 20 pounds of fine colcothar. *Meyer's German Putz Cream.*—Meyer's putz cream is much used in Germany for silver and other metals, and consists of eleine (white), 10 kilos; stearine, five kilos; kieselgrube, ex. white triturated, 20 kilos; turpentine oil, 20 kilos; benzine, 25 kilos; spirit, 96 per cent., five kilos; salammoniac, .9060 sp. gr., six kilos; water, five kilos. Perfume with oil of mirbane.

The second annual convention of the Vermont State Optical Society opened, recently, at the Bardwell, in Rutland, with an attendance of about 25. The programme provided for a two days' session, which included business meetings, addresses, a banquet, boat ride and a trip to the marble quarries. The president, F. H. Palmer, Bristol, presided, and H. F. Jordan, Brattleboro, secretary of the society, was clerk. At the opening session Leo McIver, Newport, gave an address, discussing various optical instruments, and Secretary Jordan told his brother opticians of a system he had devised for keeping his stock in a convenient way. The Globe Optical Co., Boston, had a large exhibit at the convention. The State Board of Optometry announces that they have granted 120 requests for exemptions from examination. Thirteen applications have been received, 30 applications sent out have not been returned and five await action. The convention party went by trolley at 6.15 o'clock in the evening to Lake Bomoseen for a banquet at the Prospect House and a boat ride.

 KNOWN THE WORLD OVER

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal—plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag—the blades are fine. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray—contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

ALVIN SILVER

WM. PENN

There are many people with many minds, and while the "Orange Blossom" and "Bridal Rose" patterns of flat ware seem the most appropriate for wedding presents and anniversaries, many people prefer a plain pattern. To these the "William Penn" will appeal.

Like the man whose name it bears it is of sterling worth and character—a heavy weight—full of character and commands respect.

It is made in bright silver finish, in the full line of ounce goods, fancy pieces and cutlery

WONDERS NEVER CEASE

Neither do our New Ideas in Up-to-date Jewelry. Our newest and most popular seller is our beautiful cameo pendant locket which must be seen to be appreciated; can be handed down to your grandchildren as an heirloom; a beautiful old style come into popularity again; a fit present for sweetheart, wife or daughter. Don't fail to order early, as your trade will surely call for this up-to-date article in jewelry.

We use only the choicest stone cameos. Our workmanship and finish are absolutely beyond criticism. In addition to the above our general locket line is most complete. We make 10 different sizes in plain lockets, besides a various assortment of fancy lockets. Also a fine assortment of hand engraved lockets in English finish. The goods and the prices are always right. It will pay you to consider our line when replenishing your Fall and Winter Stock.

OSHKOSH, Wis., Feb. 7, 1909.

THE ARNSTINE BROS. CO.,
Cleveland, O.

Gentlemen:—Our business last year showed an increase over 1907, which was due principally to the Catalogs, as conditions in our city were about as unfavorable to good business as 1907 was in many other cities.

Respectfully,
R. B. ANGER & Co.

The Catalogs sent out by this firm since 1905 were made by The Arnstine Bros. Company.

SOUTH BEND, Ind.,
Jan. 16, 1909

ARNSTINE BROS. CO.,
Cleveland, O.

Dear Sirs.—Regarding a testimonial for your Catalog, which we have used for two years, we will say that, as a medium for advertising, we believe your system very beneficial and assisting in gaining a high reputation of the trade as first-class jewelers, and by having your name brought up and spoken of in the store and at home. Having the merchandise delivered, when asked for, was very satisfactory. We will be glad to place our order again for this Fall, when your representative calls.

Yours truly,
CALVIN K. CLAVER.

The Catalogs sent out by this firm since 1907 were made by The Arnstine Bros. Company.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting Roller Remover. The work is always plainly in sight. The roller is held in the grooved jaws of the pliers. The adjustable head which holds the screw is quickly brought into position over the staff and the most obstinate roller will instantly give to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

GRINDING OUTFIT No. 105

LEATHER DISK. SMALL DISK METAL.

CARBORUNDUM & EMERY PAPER DISKS.

This outfit consists of:

1. Two interchangeable steel disc wheels, 3 5/8" and 1 5/8" in diameter
2. One interchangeable flexible leather disc wheel, 2 1/4" in diameter
3. One adjustable hollow spindle for holding the above disc wheels
4. Eight different grade emery paper discs, 2 1/4" in diameter
5. Four carborundum paper discs of different grades, 2 1/4" in diameter
6. Eight different grade emery paper discs, 4" in diameter
7. Four carborundum paper discs of different grades, 4" in diameter
8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete..... 1.50
 Separate small emery discs..... per dozen 2.00
 " large "..... " " 3.00
 " small carborundum discs..... " " 3.00
 " large "..... " " 3.00

This new grinding device should find favor with the trade, being thoroughly practical and complete for all purposes, such as grinding steel, glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the watchmaker, jeweler, optician, dentist, lock or gunsmith, platers and kindred trades. It is found much more economical than solid emery and carborundum wheels. An assortment of solid wheels of twelve different grits would necessitate an outlay of ten times the cost of this outfit, not taking into consideration the trouble of truing up the wheels when worn or glazed.

Full description and directions accompany each outfit.

For Sale by all Jobbers in the United States and Canada.

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezer over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped firmer and better than by any other kind of stone tweezer.

Second. It is purposely made a "Bayonet" in shape because any stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, easier, quicker, and with much less exertion than when using any other style of tweezer.

It has an extra part directly above the crossing points to permit the holder to examine the stone without fear of releasing it accidentally, which frequently occurs when using the ordinary style crossing tweezer.

Price, Each, \$1.00

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

To the Jobbing Trade of the Country

Gentlemen:— Last February I purchased the entire interest of my partner, Mr. Herman T. Regnell, of Regnell, Bigney & Co.

I have reorganized the Company and will do business in the future under the firm name of The Allison Manufacturing Co., makers of high grade goods, and will sell the jobbing trade only.

We are making a most beautiful line, in choice designs, of Brooches, Dutch Collar Pins, Sash Pins, Link Buttons, Scarf Pins, etc., also an exquisite line of enameled goods, Cuff Pins, Combination Sets, etc., tastefully mounted on pads.

You will make no mistake if you give our representative a few moments of your time when he calls upon you.

QUALITY!

Everything points toward a large volume of business the coming Fall and we are ready to meet the demand—we are always ready.

Our line is composed of nobby up-to-date designs and when placed before you you will ask no questions—you will purchase without hesitation. Why?

Because you will see collected together in one line the largest group of sellers you have ever before witnessed.

Our line is filled with life; we have no dead wood.

Factory: Attleboro, Mass.

Simmons Rope Chain

Rope chain is expensive to make because of the unusual amount of labor involved in its manufacture.

In consequence, most rope chains are *stretched*—so as to make the extra length, obtained by stretching, offset the labor cost.

Now the only rope chain that actually gives perfect satisfaction and absolutely first-class service, is the kind that is close and compact.

And Simmons rope is exactly that—it is more compact than any other rope chain manufactured, either here or abroad.

Remember that when buying ropes.

**SIMMONS 12-CHAIN
\$21.75 COMBINATION \$21.75**

*Including a \$1.50 imported velvet roll,
free of charge.*

This combination consists of a dozen of our selected, most popular vest chains and has proven such an excellent seller that it now forms a staple part of our line.

Carried by all leading jobbers.

**SIMMONS CATALOGUE
SENT ON REQUEST**

Contains 48 pages illustrating representative patterns of Vest, Pony, Golf, Dickens, Lorgnette, Neck and Eyeglass Chains, Silk and Metal Fobs, Chatelaine Pins, Lockets, Seals, Charms and Bracelets.

THE LAUREL

TRADE MARK
STERLING 1896

☞ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

☞ Made on the popular **MARTHA WASHINGTON** shape.

☞ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

☞ Finished in light, medium and heavy weights at a very moderate price.

☞ In manufacturing "**THE LAUREL**," every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

☞ This is another **Smith Pattern**, designed to remain permanently in demand.

THE REASON WHY

We are able to handle orders for Mesh Bags in any size quantities is because after long years of experimenting—on what seemed to others an impossibility—we have at last succeeded in making a machine to produce mesh.

The advantages to you are many, of which a few are: a perfectly smooth strong mesh, finer than can be produced by hand for double our price—prompt deliveries—and a guarantee that your Holiday orders will be taken care of. Your experience will supply many others.

W. & D. Bags are offered by Leading Jobbers.

1835 R. WALLACE

*Silver plate that
Resists wear*

Every progressive dealer knows how immensely popular 1835 R. Wallace plated ware has always been.

There are many good reasons why now, more than ever before, R. Wallace is destined to win an even greater preference among the discriminating buying-public.

The Blossom Pattern reproduced herewith is an entirely fresh idea in design, superb in execution, finished in French Gray with polished shield. It is the pattern of the year.

Our new Guarantee is another most effective selling point.

To every purchaser we guarantee that "1835 R. Wallace," *Silver that resists wear*, will give absolute satisfaction, and we agree to stand behind and replace every piece of goods bearing the "1835 R. Wallace" trade-mark that does not give satisfactory service in any household.

There is no time-limit in this guarantee. It's as broad as the air. Your customer is protected absolutely.

The additional sectional plate will also appeal to every buyer.

On those pieces that receive constant use, in our old A1 and Triple grades (namely: tea, table, dessert, and soup spoons, medium and dessert forks) a heavy sectional coating of silver is added to the parts most exposed to wear. These pieces in all patterns are stamped 1835 R. WALLACE SECTIONAL, and 1835 R. WALLACE SECTIONAL TRIPLE. This increases the wear-resistance three fold, *but there is no increase in price.*

Send to-day for the literature in which the new Blossom Pattern is contained.

Blossom Pattern

R. WALLACE & SONS MFG. COMPANY

WALLACE STERLING

Carnation Pattern

By conventionalizing the form of the carnation, our most beloved flower, this new service appeals to the sentimental preference of a very large proportion of the people. This alone will make the design immensely popular.

Not only is the design one of the most beautiful ever developed in the silver art, and one of the most practical. It is marked by distinction, giving an entirely new spirit and character in the silverware.

The Carnation Pattern is made in a commercial weight, so that the price is extremely low. Considering the excellence of the design, the brilliancy of the die-work and execution, the sales of this pattern promise to be unusually large.

We would suggest that you send in your orders as soon as possible.

Write for one of our new Sterling Catalogs in which this Carnation flatware is included.

Manufacturer of a General Line of Platinum
18 K. and 14 K.

Diamond Mountings

4 JOHN STREET, NEW YORK

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

Birth Month Locket

July brings Poppies "steeped in sleep"
To you who July birthdays keep,
A Poppy locket checkmates strife
And brings to you a happy life.

Pond-lilies in the water blue
Are August born as well as you.
Would you be free from every care,
A locket of Pond-lilies wear.

Enameled in beautiful floral designs.

$\frac{1}{10}$ gold—solid gold joints.

THE KREMENTZ BODKIN-CLUTCH is recognized to be the most improved, simplest in construction, strongest and most durable on the market. Not one piece, but one-piece construction. No solder or tubing. Nothing to bend or break, being made of solid hard Spring Metal throughout.

Krementz Bodkin-Clutch Studs, Vest Buttons and Dress Sets are made in many salable patterns, set with Diamonds, Sapphires, Amethysts, Moonstones, Carnelian, Half Pearls and Whole Pearls at prices lower than any others made.

Note:

Should any of your customers have a set of vest buttons or studs with any old-style fasteners which have for any reason proved unsatisfactory, we will gladly change them (where practicable to do so) to Krementz Bodkin Fasteners, making only a nominal charge for same.

SCARF-PINS
FOBS AND SEALS

LONG AND SHORT
HANDY PINS

RICH EFFECTS IN PEARLS
MOTHER OF PEARL
AND ENAMELS

THESE PINS are also called Beauty Pins. They are both "handy" and "beautiful," as the two names signify.

The handy virtues of the Pins are increased by making them long and short for different uses.

Their beauty finds expression in new styles combining Pearls, Mother of Pearl and Enamels, etc.

Altogether the line is distinctly notable.

¶ Seldom any new piece of jewelry for men. These Vest Chains are made for full and semi dress. They come in white, green, red, blue, black, lavender and a variety of enamels. The very latest chain fad for well-dressed men.

Trade-Mark

A. J. HEDGES & CO.

MAKERS OF 14 K. JEWELRY

14 John Street, :: NEW YORK

DO YOU REALIZE what it means to manufacture gold chains of excellent quality and faultless construction and sell them at prices much below what the retailer ordinarily pays for chains of similar quality? It means that we have a well organized factory and prefer selling these chains ourselves directly to the trade, thereby giving you the benefit of what it would cost to maintain a necessarily expensive organization of traveling men.

THAT NEW CHAIN we are exploiting is solderless and flexible, without stringing, 15-inch lengths only. **IT SELLS AT SIGHT.**

Write for a sample.

JEWELRY OF DISTINCTION

ENAMEL BAR PINS will be among the best sellers this Fall. THE "EDGEWOOD" pin has been pronounced the best pin of its kind on the American Market.

RETAILERS should use this pin for the following reasons:

- The GOLD is fourteen karat.
- The WORKMANSHIP is perfect.
- The DESIGN is patented.
- The PEARLS are selected Oriental Baroques.
- The PRICE is moderate.
- The PIN will not be imitated in inferior goods.
- The ENAMEL can be furnished in eight colors.

We sell direct to the retail trade.

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement as an inferior spring works. Our success has been proved. The weight "Monastery" construction is of such excellent quality in every respect offered at such a reasonable price that it is of question to-day to offer a any other clock \$50.00, with long pendulum series works.

A genuine Grandfather clock has always a weight movement. And we will state that a Hall clock made up with a cheap spring movement can never be satisfactory. The "Monastery" is weak to get the time at first, but the light bells can be used with the little hammer; every day the spring gets weaker and chiming slower; it ever runs a day. Besides, in such cheap affairs the "Monastery" is not suitable for quarter chime. It makes a very poor clock. "N. 1" is with the "ASTERY," which are heavy, powerful, and with solid steel pinions and hall as a good chiming movement should be.

The illustrated model is a fine piece of work, fit for any residence, and can be had in three combinations of striking:

1. With five 1 1/4" tubular bells, tuned by Mr. R. H. Mayland (Westminster chimes); list. \$15
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which being tuned in a chord, produce a sound which is the nearest imitation of the instant resonance of a big tower bell; list. 10
3. Hour and half strike on 4 rodgongs tuned in a chord; list. 10

Fine Arts and Crafts Work in Germany.

German contemporary, the *Zeitschrift für Goldschmiedekunst*, which has confined its attention mainly to the work of jewelers and regular practical workers or artisans, has recently made a new departure by extending its scope to include productions in these arts and craftsmen of note. Working on its new mission as a com-

as they encourage this movement, by textual and illustrative representations, they prove themselves friends and promoters of the creative handicraft.

"We are pleased to be able, by the publication of our Professor Riegel number, to furnish evidence of our zeal in the service of our goldsmithing art. Professor Ernst Riegel, whose artistic originality is fully set forth in the valuable and comprehensive illustrations which we accompany with a detailed explanation, is entitled to particular esteem, because he has worked up from the ranks as a goldsmith, and as such has created for our entire precious metal industry representative creations of the highest order. In later issues we shall publish the works of other masters of our artistic handicraft, in order thereby to raise our

years of age entered upon a three years' apprenticeship with a master goldsmith in Kempten. He received a further training in the technical art-trade school at Munich, under the tuition of Professors Fritz von Miller and L. Gmelin. He was later employed for five years as assistant in Professor von Miller's private workshop. In 1900 he began business for himself in Munich, and at the same time gave instructions in trade drawing and modeling to the class for jewelers, gold and silver smiths in the municipal trade schools. In 1906,

art and trade paper, the *Journal* brought out a special issue, devoted principally to the work of Professor Ernst Riegel, of Darmstadt. The special circular accompanying the issue says, in part:

"An active movement that will promote artistic effort and the comprehension of art in the trades permeates the entire field of industrial art and has everywhere attained well-merited success. To turn our attention to goldsmithing' to useful account is the end of the trade press, and in so far

Journal to the position of a trade-art paper, which shall furnish all goldsmiths with the incentive to fruitful activity."

Professor Ernst Riegel is an artist-artisan of the old school. He was born in 1871 at Münnerstadt, near Kissingen, and when 16

in response to an invitation from the Grand Duke of Hesse, he removed to Darmstadt, where he was welcomed as a member of the artists' colony.

In addition to various other honors, he received, in 1900, the gold collaborators' medal of the Paris International Exhibition, and at the Dresden art exhibition in 1904 he was awarded the minor gold medal.

Professor Riegel is one of the few modern craftsmen who design their own work and execute their own designs, both to a

Trade-Mark

Reg. U. S. Pat. Office

degree of perfection that distinguishes his works as extraordinary productions. He has been able to keep from all the vicissitudes of the stormy and perilous periods of modern art currents; most of his creations reveal a thoroughly refined composition. He is at the same time an artist in form and a constructive naturalist.

In the latter capacity, says the aforementioned journal, he excites admiration by his versatility in incorporating the most widely different conventionalized natural objects in his works of art, at the same time, with a degree of perfection that is made possible only by an intimate knowledge of the possibilities of the material employed. He practices to a certain extent a cult with nature's wealth of form. Some of his works, on the other hand, display a geometrical form fantasia; as a conventional artist he produces a really aesthetic

ual inspirations of striking effectiveness; they are calculated to chain the attention of every observer.

For our illustrations we have selected from his numerous works those which will appeal most to our personal knowledge of present progress. A goblet and a cup were made in 1902 and 1903, and both display the development of style then prevalent. The goblet is attractive by reason of its slender construction; the beaker or cup has the ponderous form that would proceed from the idea of stability. This specimen (of which we present an illustration) is a masterpiece of damaskeening in gorgeous colors, the effect of which unfortunately cannot be done justice to in the illustration. The beaker itself is carried out in polished silver and is inclosed in an envelope of tombac that is enlivened with motives from the animal and vegetable

decorated harmonize exquisitely with the light yellow gilded metal. The artist has approached the design in a similar fruit dish, mounted on a wooden base, in which the knob of the silver gilt bowl is also richly ornamented with precious stones.

The table centerpiece shown on the front cover is supported on a smooth base of brown stained oak. The large dish is apparently borne by four St. Hubert stags, standing in shrubs with pearl buds. The real gem of the ornament is the knot-shaped upper cup or bowl, representing an

CHAIN OF THE MAYOR OF THE CITY OF ASCHERSLEBEN—SILVER-GILT.

grouping of curve ornamentation and linear groupings.

His development of the beauties of the material by individual, substantial manipulation is masterly; we find, continues the above journal, in him embodied the most delicate motives and constructive vigor. In spite of their variety of form, however, all his productions bear the same unmistakable originality; they possess a certain impress and individuality.

In secular and ecclesiastical art Riegel worked with the same confident skill. His modern altar vessels are harmonized spirit-

kingdoms. The birds, boughs and ribs of the greenish-brown colored leaves are damaskeened in silver and carved in flat relief; the fruits are of gold; the feet, eyes and beaks of the birds are made of an alloy of gold and copper.

A production possessing much character is the goblet shown in another cut. The leaf work in this case is of engraved silver; the roots encircle tourmalines of various shapes, dark green in color. The fruit dish which is the subject of the illustration on page 69 is of repoussé and chased silver; the pale blue turquoises with which its knob is

RED STONE VESSEL MOUNTED IN SILVER-GILT AND SET WITH AMETHYSTS.

oak tree, in the branches of which the arms of all the German states, with the exception of the four kingdoms, are worked. The latter are applied in enamel, on the gnarled trunk of the tree. The edge of the large lower bowl is ornamented by a border, the details of which relate to the chase.

This centerpiece was a gift of honor by the city of Munich to the city of the 15th German marksmen's meeting in 1906. It is executed in silver on a base of brown stained oak, with gilded mountings. The metal foot is set with lapis lazuli, and among the roots of the goblet stem are green tourmalines.

Of unique character is a fruit dish in which, by a combination of nephrite, old silver, enamel and fiery opals beautiful effects are produced.

A comb, neck ornament, belt buckle and major's chain demonstrate Riegel's remarkable capacity for producing small jewelry. Filigree-like structures, sometimes resembling antique forms, are gracefully combined. Pearls, gold, silver and delicately tinted enamel find here ideal employment. Especially the mayor's chain, of which we present a picture with the chased figured intermediate pieces, the open-work pendant and the enameled coat-of-arms, is a product of the most artistic workmanship.

His altar vessels particularly prove that modern tendency in style is well adapted for the production in ecclesiastical vessels of the necessary sacerdotal character. Professor Riegel has found a happy solution of the problem thus presented to him. This is effected in the case of a baptismal service, altar candlesticks and a crucifix, by slender shape and exceedingly attractive

surface disposition, or, as in the case of the communion chalice, which has received much notice, by rich figure work and the use of motives of biblical origin.

Among Professor Riegel's productions are some fine cane and umbrella handles, which, in spite of their simple form, nevertheless bear the stamp of thoroughly artistic treatment.

Severe in ornamentation, but of massive character, are a bowl and a cup by this artist. Both display a new epoch in Riegel's development. Here we may note broad treatment of smooth surfaces. The ornamental is subordinated to the useful, in which respect this work shows a marked departure from the other. The vessel in

REPOUSSÉ FRUIT DISH—SILVER-GILT.

the shape of an eagle mounted in silver gilt and set with amethysts, shown in the article on page 67, is of great beauty. This work of art, with many others of Riegel's productions, is in the possession of the Grand Duke of Hessen. The exceedingly productive diligence of Professor Riegel will doubtless still result in many other works of art of this character to emanate from his studio.

THE JEWELERS' CIRCULAR—WEEKLY is indebted to Professor Riegel for having kindly placed at our disposal, direct, the necessary photographs for the production of our half-tone illustrations, some of which are additional to those that appeared in the issue of the *Journal der Goldschmiedekunst*, before mentioned.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Sept. 8.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Bermuda: 1 case plated ware, \$100.
- Bremen: 4 cases scopes and views, \$200; 59 cases clocks, \$1,810.
- Buenos Ayres: 3 cases optical goods, \$420; 1 case plated ware, \$245; 72 cases clocks, \$1,371; 2 cases jewelry, \$1,819; 15 cases plated ware, \$525; 2 cases watches, \$260; 8 cases optical goods, \$4,725; 2 cases plated ware, \$310; 168 cases clocks, \$4,095.
- Calcutta: 82 cases clocks, \$2,288.
- Colon: 2 cases optical goods, \$209.

A Western Agricultural Trophy.

A TROPHY which has been the subject of distinct interest in Colorado is the special cup made for the Weld County Fair Association, which was ordered through H. H. Thurlby, Greeley, Colo., and made by the Rockford Silver Plate Co., Rockford, Ill.

The cup, including the ebony plinth on which it rests, is 22 inches high and its most

TROPHY OF THE WELD COUNTY FAIR ASSOCIATION.

characteristic features are the three potatoes, emblematic of the most important product of Weld County. On one panel is engraved a harvest binder, surrounded by sprays of wheat. Around the top a grapevine border is applied.

The cup is now being placed on exhibition for short periods in different towns in Weld County in order to give competitors a chance to see it at close range.

A. G. Smither, a well-known jeweler of Washington, N. C., and Miss Sue Wilkins, Stewart, were recently united in marriage.

The Gulf Jewelry & Stationery Co., Corpus Christi, Tex., has applied for a charter of incorporation, with a capital of \$5,000, all of which has been subscribed and over 70 per cent. paid up. The concern has been in business for about two months, and has quarters at 610 Chaparral St., Corpus Christi, and has met with success from the start. The secretary and manager is J. S. Gallie, Jr.

- Demerara: 1 box granulated silver, \$254; 50 cases clocks, \$171.
- Hamburg: 5 cases watches, \$5,380; 1 case jewelry, \$1,692.
- Liverpool: 92 cases clocks, \$900; 2 cases jewelers' ashes, \$415; 6 cases jewelry, \$9,000; 2 cases watches, \$1,500; 1 case silverware, \$300; 1 case jewelry, \$300.
- London: 35 cases clocks, \$500; 8 cases watches, \$251; 12 cases clocks, \$104.
- Lorraine: 3 cases optical goods, \$200; 1 case plated ware, \$800; 2 cases jewelry, \$450.
- Lunon: 3 cases plated ware, \$480.

Members of the Michigan Retail Jewelers' Association Hold Convention at Detroit.

DETROIT Mich., Sept. 9.—In the genuine interest manifested by members and in the business-like way of conducting the proceedings the annual convention of the Michigan Retail Jewelers' Association, held Tuesday and Wednesday of this week, was a most satisfactory event. The attendance was not quite as large as the officers had hoped for, but there was a highly representative assemblage of jewelers and jewelers-opticians.

This is "State Fair" week here, and while it was advantageous in some ways in making it possible for the members to attend the convention and see the fair on the same trip, yet there was an unfavorable effect from the combination of events. The Detroit jewelers and opticians have been kept so busy by the throngs of visitors to the fair that they have not been able to attend the sessions of the convention in as large numbers as would otherwise have been the case.

Some of the out-of-town jewelers and opticians have also skipped an hour or two of the convention's work in order to enjoy more fully the special attractions which the fair now offers.

As stated in the report last week, the convention was called to order before noon on Tuesday by A. B. Hull, Belding, the president, whose vigor and earnestness had their effect upon the entire proceedings. The president called for the first speech of the convention upon Charles A. Berkey, of the Detroit Jewelers' Board of Trade.

Mr. Berkey cordially welcomed all present. He expressed the hope that the visit would be pleasant and profitable for all the visitors, and said that the Board of Trade had arranged to entertain them at least until Thursday evening. Tuesday evening, he announced, the Ku-Kus will initiate new members and afterward will give a dinner to all the visiting jewelers and opticians. On Thursday night all were invited to a dinner given by the wholesale dealers of Detroit.

Mr. Berkey said that the wholesale dealers are working for the interest of the retailers as well as for themselves. The wholesalers have not been scattering broadcast reports of their work and have pursued the policy of laboring quietly and steadily for the ends in view. The jobbers feel that what is for the benefit of the retailers is also for their benefit.

Continuing, Mr. Berkey said that the executive committee of the wholesalers's association had talked over matters with officers of the National Retail Jewelers' Association, and as a consequence there had been real co-operation and progress.

The wholesale dealers, the speaker said, are seeking to prevent unfair competition and ill-advised and ruinous credits, which often result in unfair competition.

In the speaker's experience he had noted that the successful jewelers are those who are wide-awake, who look for business and who are not afraid to ask for fair prices for their merchandise. One of the most

important things for the association to do is to educate the part of the trade that believes in cutting prices.

The general advances in recent years in the cost of all kinds of materials and merchandise, as well as of labor, were mentioned as reasons why the jeweler should adjust his prices to the conditions in his locality.

The Ku Kus, said the speaker, are doing a great deal in bringing jewelers together and in educating them in commercial ethics.

Mr. Berkey was heartily applauded. Mr.

A. B. HULL, PRESIDENT-ELECT.

Russell, of Mt. Pleasant, responded by speaking of Detroit as a city of which the people of the entire State are proud. He spoke of the benefits of jewelers acting together and said:

"We will be brought to see that we are being crowded to the wall. Our trade has been receding. We see jewelry sold in the dry goods, the drug and the hardware store. We hardly know whether a jeweler is a watch 'tinker' or a merchant. But by getting together in these meetings we can check the backward movement and we can build up the business where it has been torn down. There are enough brains in our associations to find the remedy for our ills."

President Hull next delivered his annual address, which was frequently applauded. He said:

PRESIDENT HULL'S ADDRESS.

One year ago, when I accepted the honor of presidency of this association, it was with fear and trembling. Diversified opinion of our good intentions was discussed by various branches of our trade, and we as an association were severely criticized by some. "It was my avowed intention at that time to do all in my power to harmonize the diversified interests of this State into a more harmonious whole, so that we might all work to the end of an elevation and betterment of the jewelry craft.

Personally, I have not done all that I wished or aspired to do, and we as an association have fallen short of what we wished to accomplish. Yet one thing we have accomplished, and that is

in producing a pleasant, amiable and harmonious feeling among ourselves and the various diversified interests.

To-day, the manufacturers, jobbers and retailers of the State of Michigan are working shoulder to shoulder for the betterment of trade conditions, and each is willing and anxious to assist the other. This much, brother jewelers, has been accomplished, and now as we have the foundation laid, let us pull together and strengthen the jewelry organization of our grand old State of Michigan so that it will take its place in the head ranks of organization where she rightfully belongs, and not be a tailender where it has been for the last few years.

It might be well to go back a few years in the history of retail jewelry organizations (about seven years), and follow it down to the present time, when you will have a more just conception of where Michigan stands. In 1903-4 we had a strong association under the name of the Michigan Retail Jewelers' Association, and through the small trade paper (*The Jewelers' Advocate*) many in other States commended our action and applied for membership, but under our constitution we could not accept them, as no one but retail jewelers of Michigan were eligible to membership. However, the number increased, and could we stand quietly by and refuse the repeated knocks upon our portals? No, no. There were others who were anxious to assist in this organization movement, and we changed our name and constitution to that of the American Retail Jewelers' Association, and the Michigan membership was accordingly changed. Under this new name we made rapid strides. Our convention dates were then changed from January to July and our attendance at the conventions was materially increased. It was in the Fall of 1905 that the executives of the American association thought it advisable to have State organizations affiliate with the American association, and accordingly, in January, 1906, the Michigan members of the American association were again transferred to a new Michigan Retail Jewelers' Association, and they then affiliated with the American association. These various changes were very confusing to our State members, especially if they were any way lukewarm on the subject, and then in August of the same year, the American Retail Jewelers' Association gave a call for all retail jewelers' associations to meet in Rochester, N. Y.

At this memorable and historic meeting the American Retail Jewelers' Association died, and from its ashes sprang the greatest and grandest organization for the betterment of the retail jewelers' craft this world has ever known—The American National Retail Jewelers' Association. Four years of unparalleled success of this organization has proven the strength of its foundation to be like that of a Gibraltar. I just mention this bit of history as one of the things which has materially hindered our State association.

It is a common custom in these annual head executive addresses to throw a bunch of bouquets to the members, and especially to the directors, but as I am not a florist I will have to pass that along to future generations. Neither am I a preacher to tell you by which road we, as retail jewelers, can gain salvation or absolution from our numerous besetting sins. I am simply your presiding officer and will give a short review of the year's work.

At our last annual meeting the delegates then elected to the American National Jewelers' Association in Cincinnati, were there in a body with one exception. The results of that convention are familiar to us all. It was the intention of the board of directors to hold some district meetings that Fall, but business opened up early, and before we could complete our plans retail jewelers were so busy that they could not leave business to attend association meetings.

In March a meeting of the directors was held in this city (Detroit) at the Hotel Normandie, at which time the dates for our next annual meeting were discussed and it was decided to hold the convention during the "Buyers' Excursion" week, at that time anticipating that it would be the last week of August. Your directors were invited to a dinner given by the Detroit Jewelers' Board of Trade. The invitation was accepted. William Stoltz and your president (the only two in attendance) were to represent the board of directors. At this meeting it was considered advisable to hold a district meeting in Saginaw for the election of delegates to the American National Retail Jewelers' Association to be held in Omaha, and to adopt a new constitution to conform with our

present needs. This was carried out as planned and our district meeting in Saginaw was a decided success, and we are much indebted to the local Saginaw association for its hospitality and entertainment afforded on that occasion. It was then the desire of the directors to hold a district meeting in Grand Rapids, and I accordingly wrote one of the leading jewelers in that city, and after waiting several weeks without a reply I abandoned the project.

We have in the past year increased our membership by new applications to the number of 40. How well our old members have kept up their dues will be seen by the secretary's report. I will say that the new members gained this year are of the quality that count, and their personality and established reputation are of material benefit to the association.

It was my pleasure to attend the American National Retail Jewelers' Association in Omaha as one of your delegates, and the final unanimous vote of that convention was that its next annual convention be held in Detroit. This, brother jewelers, gives us an opportunity. The best definition of opportunity that I can refer you to was that eloquent and forceful address of Ernest Lunt at the Omaha convention, which every member of this convention should read and reread, as it applies to our own State association. It is ours, let us grasp it. Let us have our State association meeting with the national association meeting if it be advantageous, or ahead of the national convention, to better prepare ourselves for the same, but we want to prepare ourselves for this event and make the best of it.

We should double or treble our membership in the next year. Let us arise to the emergency of the occasion and bring up in membership the organization of the State of Michigan where she rightfully belongs, and with open arms and a royal welcome show the American National Retail Jewelers' Association in 1910 that we have entirely awakened from our quiet nap and that henceforth Michigan will take her old place in the front rank of association work.

Brothers, it is up to you, it is up to me, and if each individual does his share it is an easy victory. Now, will you work or will you shirk? We all have the opportunity, and a little from each makes a grand total, but a good deal from each will make a triumphant success. Talk association, work association, and believe in association, and our betterments in the end will be many.

Stand by your officers, whoever they may be. Write them on various occasions. Do not hesitate to ask your business associates to join the association. You are doing them a favor and indirectly yourself as well. A reasonable perusal of the trade press cannot help but convince any sane jeweler of the benefits our national association has accomplished. It has not been done boisterously or threateningly, but, believing in a square deal for all, in gaining the respect and admiration of the largest manufacturers and by working harmoniously with their organizations to the betterment of our individual business.

As R. A. Kenle, of the American Waltham Watch Co., said in his few remarks at Omaha, it was with a full realization of all of the obstacles that would come up that his company had changed its methods of marketing its product, and that it expected that it would take some time to get adjusted to the new conditions; yet the decision was final and that concern's goods were manufactured for, and would be sold in the future by the retail jewelers exclusively. The many other manufacturers who have changed their selling plan will be mentioned later in another paper.

At the district meeting in Saginaw we adopted a new constitution and we contemplate having it printed in sufficient quantities so that we can use them with our circulars for a distribution in soliciting members. Owing to the fact that our secretary did not thoroughly understand them they were sent to me for correction and addition which we had made at the meeting. My local printing house gave us a much lower figure on the printing than we had, so it was left in my hands, and like many other concerns the print shop has been busy and as a result it was only last week that I received them from the print shop. We have a few distinctive features relative to election of officers, amendments to the constitution, etc., that are not as of old.

Brother jewelers, we want this coming year the best, the strongest organization we have ever had; much depends on this year with us, we have the whole American National Retail Jewelers' Association back of us or with us this coming year,

we have the right material in our ranks that will give us the prestige that we should have. It is lamentable yet true that many of the large concerns of our State are not our members, and the reason is beyond me. I do wish this State could be aroused to the true betterments that a strong association could give.

In conclusion, brother jewelers, I ask of you a loyal support of your officers, a greater interest in your association, a careful perusal of the trade press, your continual watchfulness for new members, and a true and loyal recognition of those manufacturers who are complying with our wishes.

Brother jewelers, I have made this address just as short as I possibly could and touch on the various subjects that were essential to us. Let us work together in harmony for the innumerable benefits that will come to us and future generations. I will close with this old but good saying, "Keep on hustling ever forward, work with will and not with frown, make the live fish swim up stream, the dead ones will float down."

Max Jennings, St. Clair, was called upon for an address on "How to Increase Our

J. G. DAVENPORT, SECRETARY.

Membership." His address was most favorably received. He said:

ADDRESS OF MAX JENNINGS.

I will not take up very much of the valuable time of this meeting in telling what I have to say about "How we can best increase our membership." This subject is one that, handle it as you may, devote as much time and study as you please in evolving ideas, is hard to definitely dispose of. When you get all through you will very likely discover that your ideas of how we can best increase our membership do not pan out as rich as you expected. Any plan that can be devised to increase membership, unless you have the guidance of some successful precedent to go by, must be largely theoretical with a speculative element attached. If your theory is right and is properly conducted, your speculation wins; if it is wrong or badly handled, then you lose.

In my opinion the chief essential in a campaign for new members is to arouse interest among those we desire to have join us. We must explain to them the exact status of the evils they are up against, and then show them how the association can improve conditions as they now exist.

You who are here naturally, perhaps, will be inclined to think that all jewelers know or ought to know the evils and abuses that prevail in the trade. That they ought to know is probably correct, but that they all do know is a matter of a good deal of doubt in my mind. Many things happen in this world that everyone is supposed to know all about, but occasionally we run across a person that never even heard of them. (The speaker here told a humorous story of a French woman to illustrate his point.)

I presume that a large per cent. of the jewelers in Michigan don't even know their condition Well, it's our business as an association to let them know it. It's also our business as an association to show them that we have discovered a medicine that's a sure cure for what ails them.

My idea of the campaign that should be carried on to increase our membership is something like this: Appoint a committee of five, of which the president and secretary shall be members; give this committee full power to carry on a campaign for new members and to use the funds of the association to do so. The committee should begin operations by sending a series of letters to every jeweler in the State who is not a member of the association. The first letter should state plainly and truthfully the evils and abuses that exist in our trade, with a suggestion that more information is to follow. The second letter should call attention to the former one and suggest that a remedy for existing conditions is the building up of a stronger jewelers' organization. Also a statement of what the organizations have already accomplished.

These letters should also be published in all the trade journals and editorial comments asked for. As some interest may be aroused by this time I would enclose an application blank in the second letter.

Should these letters fail to do the work, that is, obtain the desired applications for membership I would follow them with other letters such as in the judgment of the committee might be deemed best for different situations.

In addition to this, and it may perhaps prove more efficient than the series letter plan, I would get in touch with some prominent jeweler (several of them if possible), in every county in the State with a view of organizing county associations, or where there are large cities would organize city jewelers' clubs. These two plans harmonize completely and will work together nicely. The series of letters cannot fail to arouse some interest, and if followed closely by solicitation from someone of standing in their own county or city it seems to me it ought to appeal to most of the jewelers in the State.

Some may ask, what is the object of our doing all this work if they organize city or county associations and do not join the State and national associations? This, in my opinion, is a point that need not bother us a bit. I believe that every county or city organization would see that it would be to their interest to be members of the State association and would not delay very long to do so.

I told you, gentlemen, in the beginning, that any plan that could be devised was largely a matter of theory. The plan I have laid before you is my theory and I submit it to you for discussion.

President Hull then spoke at some length on the work of the National Retail Jewelers' Association, as he is a member of its executive committee. He cited various instances of the practical benefits of the work of the association, and said in part:

ADDRESS OF MR. HULL, AS MEMBER OF EXECUTIVE COMMITTEE OF THE A. N. R. J. A.

Committee of the A. N. R. J. A.
Last March, when the board of directors met in this city, they thought it advisable and desirable to have a member of the American National Retail Jewelers' Association's executive committee present and give you some talk on the national association. We had no idea at that time that our State would be honored with a member on that executive board, however, at Omaha, I was elected national treasurer, and as such I am a member of the executive committee. Realizing the expense getting one of the better and more able speakers to come to us, I have prepared a few remarks.

The American National Association has in the few years accomplished much, the establishment of retail minimum selling prices on all grades of Hamilton, Howard, South Bend, Illinois, Rockford, and all high grade Elgin, Waltham and Hampden watches, with the assurance of better things from many and the assurance from the American Waltham Watch Co. that it will not allow the products sold by the catalogue houses and through undesirable competition, this, of itself, is a revelation. The Ingersoll-Trenton Co., also the Excelsior brand of the New York Standard, are sold through the retail jeweler only and at a fixed selling price.

ware and hollow ware manufacturers have come out boldly for us and sell at a reasonable price and confine their goods to the retail jewelry only. Many manufacturers of rings, lockets, pins, have ceased to think only of the large output of their factories regardless of where it is, but are now thinking of the legitimate distribution of their products, which must go only through the legitimate channels.

The address of Harry Hyman, of Hyman-Berg Co., Chicago, at the Omaha convention, was one of good thought, wisdom and practical advice; it has been stated by some that it was a masterpiece on the subject of "Dollars and Sense." It is filled with common sense and the dollars are to come where we have enough common sense. If there is a retail jeweler within the sound of my voice that has not read that able address I urge upon you to do so, and then read again. It was published in full in the August issue of THE JEWELERS' CIRCULAR—WEEKLY, and is subtitled will be published in all of the trade papers. The paper given by Steel F. Roberts, of St. Louis, overflowed with good points on the subject of "Personality, Profit and Publicity." You must read these papers to appreciate them, or you will not yet attend the meetings where they are given. I just mention these two special numbers of the national convention; if you will look up the personnel of these two speakers you will see the quality of men who are not too busy to assist in the association work.

Gentlemen, brother jewelers, the national association is your association, and it is the means of bringing forward this movement of improving the condition and ethics of the retail jewelry trade. If you know of existing evils make your complaint to your State officers, and they will take the matter up with the national officers and you will know quick it is rectified.

None of us is perfect, we all make some mistakes, but I assure you, brother jewelers, this national association and the executive committee will be on the square; all the time watchful of the interests of the retail jeweler, and the larger State associations the greater the power of the national association.

It was stated at the convention by a jobber present: "That whatever the American National Retail Jewelers' Association wanted would be done." This was said with the perfect confidence that any request we asked would be reasonable, and that as due deliberation and consideration would govern our actions, the same spirit of fairness must prevail in meeting us. Simply put yourself in the other man's place and you will realize the wisdom of making haste slowly, and in that way only is it permanent and lasting.

TUESDAY AFTERNOON'S SESSION.

In the afternoon a closed session was held to discuss the affairs of the association, minimum prices, restriction of sales to retailers and kindred subjects. The reports of officers and committees were read and approved.

The election of new officers took place at the close of this session and resulted as follows:

President, A. B. Hull, Belding (re-elected); first vice-president, G. Wm. Stolz, Saginaw; second vice-president, W. B. Murray, East Tawas; secretary, J. G. Davenport, Battle Creek; treasurer, W. F. King, Adrian.

A vote of thanks was extended the retiring secretary, V. C. Morse, Ithaca, and Mrs. Morse, who had performed a large part of the secretary's duties in order to assist her husband and who had kept the minutes of the present and of the preceding convention.

This closed the regular work of the jewelers' convention, but the executive committee held a session later.

TUESDAY EVENING'S SESSION.

Tuesday evening the Ku-Kus held their initiation and gave their dinner in Duffield Hall. The jeweler-opticians remained over for the optical convention, which opened Wednesday, as related in the accompanying account.

THE ROSTER—A number of the jewelers present at the convention overlooked the formality of registering in the secretary's book. The following names were registered:

A. B. Hull, Belding; Joel F. Hendrick, Cass City; Will Maclear, Chicago, Ill.; H. C. Goodwin, Rochester, N. Y.; J. L. Chapman, Ann Arbor; G. A. Foland, Mt. Pleasant; E. E. Thomas, Detroit; W. B. Murray, East Tawas; L. H. Norman, Reed City; V. C. Morse, Ithaca; Max Jennings, St. Clair; Otto Plyde, Chicago; A. G. Bedford, Iowa; John J. Campbell, Pigeon; M. D. Walton, Armada; M. O. Lewis, Ovid; Tall Bros., South Haven; I. H. Grabowsky, Bay City; Eugene E. Wagner, Monroe; J. L. P. Gentil, Monroe; C. J. Hathaway, Grayling; Herman Hiss, Bay City; James P. Walton, Durand; W. C. Shirreff, Chesaning; H. S. Blank, Elsie; S. W. Williams, Lapeer; J. G. Davenport, Battle Creek; H. H. Howey, Ortonville; C. A. Bishop, Quincy; O. A. Wood, Blissfield; Wm. W. Bridges, Marine City; Fred D. Farmer, Saginaw; O. F. Hancks, Whittaker; W. F. King, Jr., Adrian; Milton B. Fitch, Flint; H. B. Thompson, Ithaca; Sid. D. Thompson, Shepherd; G. Wm. Stolz, Saginaw; W. T. Green, St. Louis (Mich.); L. C. Gardner (with C. D. Gardner), Manchester; John J. Campbell, Pigeon; Fred A. McCall, New York.

THE KU-KUS' SESSION.

A. L. Thoma, the King of Nest No. 1 and the national organizer of the Ku-Kus, conducted the initiation with the assistance of the uniformed corps, and the ceremonies were the most dignified and impressive in the history of the order.

At the banquet in Duffield Hall the Hon. Philip Brittmeyer, the Mayor of Detroit, acted as toastmaster. Responses to toasts were made by A. B. Hull, Belding, the president of the Michigan Retail Jewelers' Association; B. W. Hardy, Port Huron, the president of the Michigan Society of Optometrists; A. L. Thoma, Piqua, O., the national organizer; Nelson K. Standart, Detroit; H. C. Goodwin, Rochester, N. Y.; Prof. Griffith, of Detroit's Art Museum.

About 200 members and friends, including the ladies, were present at the dinner, which was thoroughly enjoyed. The speeches were informal and tended to add to the merry spirit of the occasion. Several of the speakers called attention to the work of the Ku-Kus in promoting a spirit of good fellowship among jewelers.

After the banquet dancing was enjoyed in the lodge room.

The Exhibits.

E. T. Flood represented the Pickard china.

* * *

Fred C. Smith was in charge of the exhibit of the Heintz Art Metal Shop, Buffalo, N. Y.

* * *

A large display of watches was arranged in the parlor of the Rockford Watch Co., Rockford, Ill., by Earl G. J. Lovatt.

* * *

J. T. Cunningham was busy showing the sterling and plated silver products of the Holmes & Edwards Silver Co., Bridgeport, Conn.

* * *

The Stein & Ellbogen Co., Chicago, was represented by Wm. H. Horton, who had on exhibition full lines of diamond jewelry and watches.

* * *

The exhibits arranged for the jewelers' convention were in the parlors of the main gallery of the second floor of the Hotel Cadillac. At one

end of the gallery was a huge streamer calling attention to the display of the R. Wallace & Sons Mfg. Co., comprising the latest patterns from the company's silver factory. Louis Nystrom was in charge.

* * *

Fred C. Smith, Buffalo, N. Y., had a display of copper, brass and silver applied wares of the Heintz Art Metal Shop, Buffalo, N. Y.

Complete lines of "Ponce de Train" and "1847" designs of the International Silver Co., were exhibited in charge of H. Vandenburgh, Frank Wilcox and Mr. Tibbits.

* * *

Souvenir spoons, French enamel spoons and cloisonne ware were exhibited by the Shepard Mfg. Co., Melrose Highland, Mass. The company's representative was H. G. Smith.

* * *

"World Brand, American Silver Co.," was the sign over the next parlor, and here G. W. Cheney explained to all callers the merits of the sterling and plated silverware made at the works in Bristol, Conn.

* * *

Joseph Knoblauch had a parlor filled with novelties in sterling, cut glass and metal goods of the C. F. Monroe Co., Meriden, Conn. The lines of brushed and spun brass and the decorated Nakare ware were especially noticeable.

Michigan Optometrists Turn Out in Large Numbers at Convention Held in Detroit.

DETROIT, Mich., Sept. 9.—As a result, in part, of the fact that the new optometry law is about to go into effect in Michigan, the 12th annual convention of the Michigan Society of Optometrists, which opened Wednesday morning, was the most largely attended and most interesting of any meeting yet held by the society. The attendance was larger than at the convention held the day before by the Michigan State Jewelers' Association.

In accordance with the provisions of the new law a list of nominations to the positions in the new State Board of Examiners in Optometry was prepared at an executive session, and this list will be submitted to the Governor. It was deemed advisable not to give out the names for publication until the Governor makes known his action.

It was decided to add to the officers of the society a board of regents, modeled somewhat after the plan of the regents of the American Association of Opticians. The regents of the State society are to inaugurate educational work and will have charge of the scientific and technical parts of the programme at conventions.

Benson W. Hardy, Port Huron, the president of the association, reviewed in his annual address the labors of the organization which led to the enactment of the new optometry law. He pointed out that as this law becomes effective optometrists will necessarily assume a more professional plane than they have occupied prior to this time.

Ernest Eimer, the secretary, took occasion during the meeting to speak earnestly against optometrists advertising themselves as "eye specialists" or ophthalmologists or using any title that would mislead people into supposing that the advertiser is a medical or surgical practitioner. He suggested that "eyesight specialist" could be used, but said that "Optometrist" is a title good enough for anybody.

Nelson K. Standart spoke against optometrists calling themselves doctors.

The society's minimum price list was dis-

ed at length. Various speakers related their experience to show that the public is ready to pay fair prices for eyeglasses and spectacles and to pay an examination fee. The "free examinations" were deemed to be an unnecessary evil.

The report of the membership Committee showed that the society had 111 members a year ago and now has 194.

Technical addresses were delivered by O. Altenberg, Saginaw; B. D. Thompson, Detroit; Phillip A. Wolfe, Cadillac; E. L. Libe, Detroit; John A. Rath, Jackson; F. Hancock, Mich., was read by the president, H. C. Goodwin, with the E. Kirstein S. Co., Rochester, N. Y., spoke on optical advertising.

The election resulted in the unanimous re-election of President Benson W. Hardy, Port Huron, for another term, and also the unanimous re-election of Secretary Ernest Ber. Muskegon. Other officers were elected as follows: Vice-President, A. N. Sierlin, Grand Rapids; directors, George V. Dolph, Northville; Edward L. Trube, Detroit; regent for three years, Chas. J. Phaway, Grayling; regent for two years, A. H. Towle, Lansing; regent for one year, E. H. Arnold, Ann Arbor.

Thursday the visitors who remained in the city were entertained by an outing, but many had gone home after the close of Wednesday's programme.

Officials of the Retail and Wholesale Jewelers' National Association Confer in New York.

A meeting of unusual interest to the jewelry trade in general was held, last Wednesday, at the rooms of the Jewelers' 24 Kat Club, of New York, 15 Maiden Lane, to discuss various matters of interest to manufacturers, wholesalers and retailers. Those present were J. P. Archibald, president of the American National Retail Jewelers' Association, and the following officers of the National Wholesale Jewelers' Association: A. G. Schwab, Cincinnati, O., president; Louis Cohn, New York, vice-president, and M. J. Averbeck, New York, member of Executive Committee. In addition, there were also the following members of the executive committee of the New York association: Messrs. Alford, Montgomery, Kramer, Kallman, Woodrow, Mabeau and Trout.

As a result of this and similar meetings a feeling of friendly intercourse which has been established between jobbers and retailers will no doubt be strengthened, and the good work which is being accomplished by both organizations be helped along materially.

Among other matters which were discussed were the questions of improving the watch situation, on which some action will be taken in the near future. The question of the trade-marking of jewelry by the American National Retail Jewelers' Association, by the use of their own stamp, was taken up, but after a full discussion it was concluded that the time for such action was not ripe and that it would be better, for numerous reasons, to defer action until some later period. Other matters were discussed informally.

New British Hall-Marking—Regulation Intended to Raise Gold-Ware Standard.

WASHINGTON, D. C., Sept. 9.—Consul Albert Halstead reports that the following new regulation has been issued by the assay masters of the Birmingham assay office, after a conference with the other assay offices of the United Kingdom:

Gold wares of the two lower standards, viz., nine karats and 12 karats, needing solder in the making, shall as a whole, as well as in every part thereof, assay at not less than the standard declared by the sender.

The consul comments:—"Under the assay act, regulations made by the assay masters are effective without reference to any government department. This new regulation applies to all British assay offices and all

Thief Who Robbed Baltimore Jeweler Now Serving Three Years in Prison.

BALTIMORE, Md., Sept. 8.—George Swartz, alias Block, who is now serving a sentence of three years' imprisonment after pleading guilty to robbing the jewelry store of G. L. Sadtler & Sons, 16 E. Baltimore St., as told in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, is believed by the police to have a long criminal record. As noted in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, the local police learned that he had recently completed a nine-year term in Sing-Sing prison, New York, but they have little doubt that other institutions of a like kind in various parts of the country may claim him as a graduate.

Mr. Sadtler's robbery, Aug. 16, showed

GEO. SWARTZ SENTENCED TO PRISON AT BALTIMORE, MD.

gold ware manufactured or sold in the United Kingdom. It is intended to stop the practice of using silver solder in the manufacture of gold ware of the two lower standards; that is, of 9 and 12 karats, respectively. This practice is of comparatively recent date, and, it is said, was due to the fact that in Australia there was no requirement for any particular standard for gold or silver ware. In order to compete with the ware of Australia, or foreign makes sold there, manufacturers found it necessary to load their gold ware of 9 and 12 karats excessively with silver solder.

"As the Australian customs law requires that gold ware marked as nine karats must at least assay eight and three-quarters karats and that marked at 12 karats must at least assay 11¾ karats, it has become necessary to raise the standard of these lower grades of gold ware. It is also thought that the name of British gold ware must be protected from the charge of being below the standard which it is marked.

"As to gold ware of 15, 18 and 22 karats, respectively, there has been no question of using other than gold solder, and, as I understand, existing regulations have required that assays of the higher grades must come up to these standards in order to secure the hall-mark or be salable in the United Kingdom. Hall-marked silverware has always been up to the standard of .9255 fine. It is expected that the new regulation will cause British gold ware, of these two standards, to be preferred to the same standards of foreign or colonial make, thus increasing the demand for it."

Swartz to be a thief of extreme daring and cleverness, so THE JEWELERS' CIRCULAR-WEEKLY publishes herewith a portrait of the man, that the jewelers throughout the country may beware of him should be operative again when he gets out of prison.

The Bertillon system describes Swartz as being a salesman, 29 years old, five feet five inches tall, 128 pounds, sallow complexion, unmarried, slender build, black hair, chestnut eyes, vex nose, scar on right thumb and another on the right cheek.

Death of Chas. E. Burnham.

WHITE PLAINS, N. Y., Sept. 8.—Charles E. Burnham, one of the oldest residents of this village, as well as one of the best known jewelers of this section of the State, passed away at his home, 32 Mamaroneck Ave., Sunday morning, and the funeral services were held at this address yesterday afternoon. Interment was in White Plains Rural Cemetery, the Rev. George Hite, of the Memorial M. E. Church, officiating.

Mr. Burnham, who was 84 years old, had been a resident of White Plains for over 35 years, and had been in the jewelry business here almost as long. After coming to this town, he started in business for himself, but in 1891 admitted a partner, and the business was continued under the style of Burnham & Crafe. This firm dissolved in 1894, and from that time Mr. Burnham remained in business alone.

Mr. Burnham was well regarded in the community and was a prominent member of the Memorial M. E. Church. His wife preceded him to the grave by many years.

Reconstructed Rubies

There are RUBIES and RUBIES. For OURS we claim the foremost place in the Scientific Stone market.

We have succeeded in developing the Reconstructed Ruby to the highest possible standard, improving it irrespective of effort and cost. In the purity of material, its uniformity of color and shape, correctness of size and brilliancy of finish, OUR RUBY has positively no equal.

We were the first to make the Reconstructed Ruby popular, introducing it in all the variety of MODERN SHAPES and DESIGNS.

Our stock is the LARGEST and BEST in the country and will be found pre-eminently suitable for the use of the LARGE MANUFACTURING JEWELER.

When buying Rubies, GET THE BEST. They cost no more.

**Pittsburg Jeweler Robbed of Diamonds,
Swindled Out of \$1,600 Cash and
Loses \$500 on a Bail Bond**

PITTSBURG, Pa., Sept. 11.—Max Zeisel, a jeweler and optician at 1406 Wylie Ave., reports that he has been swindled out of diamonds and \$2,100 in cash during the last two weeks, the circumstances surrounding the loss of the cash being distinctly sensational. First, Mr. Zeisel suffered the loss of diamonds valued at \$500, his store being robbed. Then he was tricked out of \$1,600 in cash by being fed "doped" candy, his last loss being suffered by going on the bonds of two colored women, one of whom fled to Chicago, where she was captured and brought back to Pittsburg by the police, at a cost of \$75 to the jeweler. He was on the bonds of the two women for \$1,500. The man brought back saved his bank account to the extent of \$1,000, but he must pay over \$500 to the county unless the second woman is apprehended this week. Zeisel has offered a reward of \$500 for the return of the \$1,600, which swindlers stole from his pocket.

Mr. Zeisel, who was seen by THE JEWELERS' CIRCULAR—WEEKLY correspondent, tells his own story as follows: "Some time ago my home burned and I received the insurance money, amounting to several thousand dollars. Several weeks ago, two men came to my store and informed me that I could get a bargain at Cleveland by buying a jewelry store at bankrupt sale, the stock of which was worth \$8,000, and that I bought the goods it would result in large profits. I was informed that as I am known at Cleveland, it would be necessary to take along the cash. I consulted my attorney, A. C. Stein, who advised me to take certified checks, and the lawyer gave me certified checks and with what money I had made a total of \$1,600. Thinking that I would be compelled to get the checks cashed at Pittsburg, I did so and put the money in the envelope.

"I was invited to go to the theater and while there I ate some candy. I had only ten or a few pieces when my head began to ache and, feeling sick, I left the Pittsburg theater, my supposed friends accompanying me to the street. While there the men took out of my pocket the envelope containing the money and slipped in its place another containing nothing but tissue paper. I did not know that the exchange had been made until I went home, after discovering I had been forsaken by my supposed friends. They were to return to me in the morning, but they did not do so. My headache gone, the next morning I examined the envelope and discovered that I had been duped.

"I notified the police and will pay a reward of \$500 for the capture of the men. The police are making an effort to locate them. The men, no doubt, discovered that they had received insurance money and then planned to get it.

"Only a short time before I was robbed of diamonds valued at \$500, some of the diamonds being my personal property. A neighboring alderman a short time ago asked me to go on the bail bond of two colored women, and I did so. He said it was all right; that there would be no difficulty or risk, and I took his word. But the two women ran away and one of them was

located in Chicago and brought back here. The other one has not as yet been apprehended, and if she is not caught this week I will be compelled to pay \$500, the amount of the bond, as the case will be called in court. They tell me that trouble never comes singly, and I certainly believe it, for I have had more than ought to fall to my lot."

Zeisel's store is in the colored settlement of the city. He is also a watchmaker by trade, and while he does not carry a large stock, yet it is stated that he has enjoyed a very good trade and had managed to save considerable money. A description of the men who are alleged to have robbed him will be sent broadcast over the country within a few days, although it is said that the men are not known as professionals in the swindling business. Zeisel does not know the nature of the drug used in the candy, but it made his mind a blank. If the men are captured they will be compelled to face a number of charges.

**Dinner to F. C. Beckwith, New Selling
Agent of the Hamilton Watch Co.,
in Which Joseph Fahys & Co.
Are Now Interested.**

It was announced last week that Joseph Fahys & Co., 54 Maiden Lane, New York, had obtained a large interest in the Hamilton Watch Co., Lancaster, Pa., and that Frank C. Beckwith, who has been with the former concern since 1887, had gone with the latter company as general sales agent. Members of the firm of Joseph Fahys & Co. will be on the board of directors of the Hamilton Watch Co., but it was stated that there will be no change in the policy of the movement concern, the management remaining the same as heretofore.

On the advent of Mr. Beckwith's connection with the Hamilton Watch Co. members and officials of Joseph Fahys & Co. paid a most flattering tribute to the high esteem in which he is held by making him the guest of honor at a dinner given on the evening of Sept. 7, at the University Club in New York. The dinner, which was attended by Geo. E. Fahys, Henry F. Cook, C. W. Harman, W. A. Blythe, H. B. O'Brien, Louis Flemming, John Hall, R. A. Talbot, F. Johnson, F. S. Sherry and N. H. Emery, was a most pleasant occasion, during which everyone present took part in making it one to be remembered. The dinner began at 7 o'clock and comprised an elaborate menu served in metropolitan style. Each seat at the table was marked by a clever place card designed by Geo. E. Fahys, which contained some happy allusion to the particular individual.

When coffee and cigars had been reached Mr. Harman, on behalf of Joseph Fahys & Co., took the chair as toastmaster, and in a timely and well worded speech presented to Mr. Beckwith an elaborate chest of silver. Mr. Harman's speech teemed with the kindest of allusions to Mr. Beckwith and explained to him that Joseph Fahys & Co. were as delighted in honoring him as they knew he would be in receiving their words of commendation.

Mr. Beckwith, in a few well chosen words, voiced his thanks and appreciation

for the token of regard and the spirit in which it was presented. The whole affair, he said, was a great surprise to him, and he could find no adequate words in which to express himself. He assured those present that the occasion would long remain in his memory as one of the most pleasant happenings of his business career.

Following the remarks of Mr. Beckwith, Geo. E. Fahys made an address, saying that the occasion was one in which all met on a common plane as business associates. He paid Mr. Beckwith a high tribute and concluded his remarks by pointing out that co-operation on the part of those present had meant much in the success of the firm.

Henry F. Cook, the next speaker, reviewed Mr. Beckwith's career from the time he came with the firm as a boy, 22 years ago, making telling points as he proceeded to illustrate how any man, by hard work and strict attention to duty, will make a success in any undertaking.

Speeches were also made by Mr. Blythe, Mr. Sherry, Mr. O'Brien and others, all of whom spoke in the highest terms of the guest of the evening, his work with the concern and how all will miss him.

**Richmond, Va., Jeweler Knocked Down
in the Street by Wagon and
Killed.**

RICHMOND, Va., Sept. 8.—Calvin King, a jeweler at 517 W. Broad St., was killed early Thursday morning, last, at Marshall St., this city. Mr. King, while standing in the street, was struck by a passing wagon and knocked to the ground. He received a fracture of the skull and died before he could be taken to his home. His body was removed to Billie's undertaking rooms.

According to bystanders, Mr. King was about to cross the street and stepped from in front of an ice wagon going west in front of a carriage going east. The driver pulled up his horse and Mr. King was thrown to the sidewalk. An ambulance was summoned, but the jeweler passed away before anything could be done for him. The driver of the carriage was arrested and he declared that as he reined his horse the jeweler fell down and that neither the horse nor carriage struck him. He was held to wait result of the coroner's inquest.

Deceased is 44 years old and is survived by his widow, a mother, three brothers and a sister.

An old confidence game is being worked on Indiana farmers. A well dressed man appears at a farmhouse, stating he has lost a diamond pin valued at \$500 in the road and asks the farmer to help him look for it. Their search is futile and the stranger leaves, offering a reward of \$100 if the farmer finds the pin and sends it to a certain Indianapolis address. The following day a tramp appears at the farmhouse with a pin which the farmer is sure is the one lost. He bargains with the tramp, finally paying from \$25 to \$50 for it. The Indianapolis address proves a fake and the pin is not worth over 50 cents. A. M. Kringer, living near Richmond, is one of the farmers thus victimized.

Philadelphia Jeweler Tells In Court the Story of a Bogus "Raid" by Which He Lost \$5,000.

PHILADELPHIA, Pa., Sept. 11.—Benjamin Silverman, a jeweler of 705 S. 2d St., had a day in court Thursday, when he accused a lifelong diamond partner of conspiracy and bogus fraud. Before Magistrate Borie, 302 Cuthbert St., he had arraigned Charles Heffler, of 2416 S. 5th St., on a charge of conspiracy. Heffler, according to Silverman, was represented to him as being a millionaire diamond dealer, but there was evidence to corroborate it.

Silverman in broken English rehearsed the story of the "raid" by half a score of reported secret service men in a house at Pierce St., where a room had been rented from a sister-in-law of Heffler's and where he was to take possession of a bargain in diamonds for \$5,000. He and Heffler were to become partners and eventually get in business at Atlantic City. Silverman had been told that he could count on \$1,000 a year, and he believed it.

It was on June 17 that Silverman met Heffler at the Pierce St. house by appointment, he says. On a table was a package which looked as though it might contain diamonds. Drawing \$5,000 from his pocket Silverman handed it to Heffler, so he asserts. Heffler, he told the court, pulled a sum from his pocket. Slapping the rolls together, Silverman declares Heffler said: "Well, here's my part of the money!"

Just then, according to the witness, a crowd of men, headed by a rough individual with a gun, burst into the room, shouting: "Now we've caught you; you're counterfeiters. Give us the money!" Silverman did not have any money to give to the "secret service men," but he excitedly submitted to arrest and allowed his captors to lead him away. Heffler was also arrested, but taken in an opposite direction. He had the money.

After being led away from the scene Silverman says he was liberated and advised to go home. Just then it dawned on him that perhaps the raid was not a regular one. Heffler was soon arrested, but was later released.

At the hearing Thursday Silverman's attorney made direct charges of conspiracy, naming Heffler as chief conspirator. Two other diamond merchants, who were arrested in New York on a similar charge, and who a few weeks ago jumped their bail, were mentioned as being friends and co-conspirators. United States Secret Service Agent Griffin, in charge of the Philadelphia office, appeared as a witness, as did Detective Walsh of the Central Station. Both declared there had been no official raid made at the house on Pierce St.

Heffler was released on \$1,000 bail to await a continued hearing next week.

Frank Borisk, Norwood, N. Y., Goes Into Voluntary Bankruptcy.

TRICA, N. Y., Sept. 13.—Frank Borisk, a retail jeweler at Norwood, N. Y., is in voluntary bankruptcy, and the first meeting of his creditors will be held before Referee Mulloch at 70 Ford St., Ogdensburg Sept. 15, at 11 o'clock. A trustee will be selected

then. Mr. Borisk, who runs a jewelry and confectionery business, went into voluntary bankruptcy five or six years ago. His assets now include a house and lot in Park St., valued at \$1,050 and subject to two mortgages for \$680, held by F. C. Smith and W. D. Fuller, of Norwood. The latter also has a chattel mortgage on Borisk's store fixtures.

Among the bankrupt's unsecured creditors are: W. P. Hitchcock, \$2,495; W. D. Andrews, \$131; W. A. Davis, \$63; Queen City Mfg. Co., \$145; Buffalo Chain & Ring Co., \$287; Fred C. Smith, \$78; Treyz, Yager & Co., \$158; Knickerbocker Watch Co., \$42; Rockford Watch Co., \$61; South Bend, Ill., Watch Co., \$35; R. C. Smith, \$33; Charles Lawrence Co., \$24.

Trusted Clerk of Newark, N. J., Jewelry House Held on Larceny Charge—Stock Valued at 10,000 Said to be Missing.

NEWARK, N. J., Sept. 13.—Samuel Colter, a clerk employed by Schanbacher & Bro., manufacturing jewelers, 30 Beecher St., was held in \$5,000 bonds in the First Precinct Police Court, Saturday, on a charge of swindling the concern out of a large quantity of gold, silver and jewels. The sum of \$500 is named in the charge, but it is understood that Colter will be charged with taking goods valued at \$10,000. The alleged thefts are said to have occurred during the last six years, while Colter was employed as a clerk at \$20 a week. He has been employed by the concern as order clerk 13 years.

The police claim that Colter has confessed that he has been robbing the firm systematically for 19 months. Detectives assigned to the case claim that Colter would get more jewelry for orders which he had to make up than was necessary, and would keep the surplus. A safe, to which Colter's wife is alleged to have furnished the combination after some persuasion, is said to have yielded up much treasure. Small boxes filled with gold fillings, rectangular pieces of gold and platinum, partly finished articles of jewelry, packages of pearls, rubies and garnets, in addition to \$5,000 worth of other jewels, it is said, were found.

Colter lived in apparently comfortable circumstances at his home, on Lincoln St. He was popular with the employees, as well as with his employers. The latter had been aware of losses in the stock for some time, but were loath to suspect Colter, in whom they had implicit faith. They finally set a trap and notified the police, with the result above described.

Otto Schanbacher, a member of the Schanbacher firm, when asked for a statement by a representative of THE JEWELERS' CIRCULAR WEEKLY in connection with the alleged thefts, said:

"For a long time we had been missing quantities of jewelry. We suspected several of our employees, but never dreamed of Colter, because he had been with us such a long time. We regarded him as one of our most faithful clerks. A short time ago, however, we learned that Colter had bought property, and that his wife was wearing diamonds. Even then we were loath to

believe that he was guilty. Although we paid him only \$20 a week, we figured that he might have been of a saving disposition, although it did seem remarkable that he had been able to buy the property he did. We decided to set a trap, and, as a result, we caught Colter. I hate to think of him as guilty, but the evidence against him admits of no doubt.

"I do not know where Colter got the diamonds or to whom they belong. The police recovered a lot of our goods in his home."

Slayer of Philadelphia Jeweler Will Not Get a New Trial—Plot to Escape Foiled.

ALLENTOWN, Pa., Sept. 9.—George L. Schaeffer will hang for the murder of Leopold Ermann, the jewelry dealer in Philadelphia, whom Schaeffer was convicted of having killed about Nov. 18, 1908. The murder occurred on Schaeffer's chicken farm in North Whitehall, where Ermann's dismembered body was found in January of this year buried under the cement floor of one of the chicken houses.

After Schaeffer's conviction a motion was made for a new trial on the ground of newly discovered evidence, but last Tuesday Judge Trexler denied the motion. To-day it was reported that Schaeffer had concocted a plan with a cell-mate and servant at the jail, by which the warden of the jail was to be sandbagged and robbed of his keys, and Schaeffer was to be carried away in an automobile. Warden Wieand got hold of the plot and made arrangements to trap the conspirators on the night that the escape was to be made. Whether his preparations were known or the plans miscarried, is not known, but the suspected parties failed to show up.

Warden Wieand to-day made all the facts public.

Receiver for A. Goldman, Pittsburg, Pa., Winding Up the Bankrupt's Estate.

PITTSBURG, Pa., Sept. 9.—Simon Sher, receiver for A. Goldman, who several weeks ago filed a petition in voluntary bankruptcy in the United States District Court in Pittsburg, as stated at the time in THE JEWELERS' CIRCULAR—WEEKLY, has disposed of Goldman's stock to B. Sedler and L. Stein for \$6,425. Goldman also owns some real estate, against which there are two mortgages, and this property also will be disposed of.

The claims against his estate total \$26,000, with secured claims of \$5,000, leaving \$21,000 of claims unsecured. Mr. Sher at the present writing believes that Goldman's creditors will receive about 30 per cent. of their claims, which is better than was anticipated. It was at first thought that little would be realized. Goldman in his schedules set forth that the stock in his establishment was worth \$15,000; the prices secured for the goods is said to be pretty close to the appraised value. Mr. Sher also said that he was collecting the book accounts rapidly, a large amount of money being outstanding, and the indications are that a further snug sum will be realized from this source. He is anxious to wind up the business at the earliest possible moment.

LOUIS J. DEACON, Cape May, N. J.

An Interpretation of the Jewelry and Gem Schedules of the Present Law by General Appraiser Sharretts.

S. Sharretts, of the Board of United States General Appraisers, who has been in Washington, D. C., during the time occupied in revising the tariff, has returned to New York and is again at his desk. Mr. Sharretts went to Washington at the request of Senator Aldrich to confer in regard to proposed tariff schedules as applying to jewelry and gem trade, and his wide experience in the handling of customs cases gave him weight in deciding the present tariff lines which come into this country. As far as the jewelry and kindred articles are concerned General Appraiser Sharretts is without exception the best informed man who has ever filled the position. He is closely in touch with the jewelry men and understands fully the conditions which the trade has to meet in making, selling and marketing its product. His clear grasp of the conditions as affecting the trade has been of great value both to the trade and to the government.

Today, Mr. Sharretts gave to a representative of THE JEWELERS' CIRCULAR a concise explanation of the principal paragraphs in the new tariff as affecting the trade. Of paragraph 418, which deals with jewelry, he said: "Paragraph 418 of the new tariff act of Aug. 5, 1909, was designed to cover all articles in the nature of ornaments and includes everything, whether fully finished or not, designed to be worn on apparel or carried on or about or attached to the person, valued at 20 cents or more per dozen pieces, made of any material set with imitation precious stones, except black jet, composed wholly or in chief of silver, German silver, white metal, brass or gun metal, whether or not washed or plated, and composition metals, provides for the aggregate for 85 per cent. duty. The same rate of duty is imposed on bags and purses and other articles made in chief of metal mesh, composed of silver, German silver or white metal. All articles commonly or commercially known as jewelry, or parts thereof, including chain, mesh and mesh bags and purses, composed of gold or platinum, whether set with precious, semi-precious or imitation stones, 60 per cent. duty."

"Fancy chains suitable to be worn on the person or material or parts of chains to be made into the foregoing, are dutiable at 60 per cent. ad valorem.

"The paragraph avoids the necessity of determining whether articles are jewelry or not, the uncertainty of which led to much confusion under former acts, there being before the Board of General Appraisers at present upwards of 20,000 cases involving this question.

"Congress in imposing duty on articles designed to ornament the person reached the conclusion that they were purely articles of luxury, and as such, whether designed for rich or poor, were properly subject for the imposition of a higher rate of duty in order to secure revenue. Jewelry made of gold or platinum is of such high value that a 10 per cent. duty was regarded as more

than the equivalent of 85 per cent. on ornaments composed of base metal. The certainty of classification and the avoidance of litigation and delay in receiving goods more than compensates the trade for the additional duty imposed on cheap jewelry, or the class of goods in question. Importations will not be lessened, as the cheap class of trashy ornaments can be made in Austria at one-third of the cost of manufacture in the United States. Many leading importers throughout the country have expressed satisfaction at this paragraph for the reason stated."

In regard to paragraph 419, which deals with pearls, General Appraiser Sharretts said: "While this paragraph does not state anything about matched or selected pearls, the indication is that all pearls, whether matched or selected as to color and size are dutiable at 10 per cent., unless strung or mounted in the form of a necklace or article of jewelry. Synthetic stones, doublets, consisting of imitation precious stones or semi-precious stones, or composed of different parts of other precious stones, are now all placed under a duty of 20 per cent. This includes all stones not a product of

Annual Meeting of the Maryland Retail Jewelers' Association, Held at Baltimore.

BALTIMORE, Md., Sept. 9.—The Maryland Retail Jewelers' Association held its annual meeting and election of officers at the meeting rooms in the Royal Arcanum building, this city, yesterday. The following officers were elected: Jerome W. Schirm, president; J. J. Bartholomew, first vice-president; Walter Powell, second vice-president; Arthur Hollenhorst, third vice-president; F. J. Euler, recording secretary; I. E. Sanford, financial secretary; George Schaeffer, treasurer. These, with R. B. Smith, Jr., and John Vogt, constitute the Executive Committee.

The subject of "Repairs Left for Long Time" was debated, as was the "Bad Pay List."

The secretary's and treasurer's reports showed gratifying results. The membership has been doubled since last year.

BALTIMORE, Md., Sept. 8.—At the second outing of the Maryland Retail Jewelers' Association, held recently at Makado Park, which was largely attended and proved, if possible, more successful and enjoyable than the previous outing, Samuel T. Dukehart, one of the oldest of the Baltimore jewelers, gave some amusing impersonations, with the aid of an im-

CHARACTER SKETCH AT THE OUTING OF THE MARYLAND JEWELERS.

nature. Scientific stones are included in this category, and I fail to see how any conflict can arise in regard to the proper classification."

Mr. Sharretts when asked about the question of marking foreign watch cases, dials, etc., declined to give an opinion as, he said, the question was still open.

Speaking of the attempt that was made to raise the duty on gems, he said: "The effect of a duty of 5 per cent. on rough diamonds would have been that every diamond cutter in the country would have eventually been forced out of business. A 15 per cent. on cut would have demoralized trade.

provided costume. A photographer being present, it was suggested that he be reproduced "in costume."

The result is the subject of the illustration, Mr. Dukehart being on the left, and at the right is A. Wallenhorst, holding erect the "Jewelers' Club," the mascot being in the center.

Among other amusements, the ball game between the single and married men was a feature, the score being 41 to 7, in favor of the married men.

The Clinton Optical Co. has opened a new store in the Pilgrim Block, Clinton, Mass.

Just now the call is for Bug Jewelry

We are showing a bewildering variety of attractive designs—all absolutely new in bug hat pins—bug buckles—bug collar pins—bug sash pins, etc., etc.

NENUPHARS

the new Parisian Hair Ornaments are selling everywhere. Additional patterns just out.

WHITESTONE GOODS

of all kinds—heretofore this has been our weak point. Now we've made it one of our strongest. Our present line of whitestone goods is ahead of anything else on the market—and the prices are right.

A CHALLENGE

Certain competitors—unable to meet our prices—or match the quality of our goods—are industriously spreading the story that we are jobbers. It is true that years ago we were jobbers—but it's equally true that years ago we started making our own goods—gradually eliminating our jobbing lines—until now we are and have been for a long time past *manufacturers in the broadest sense.*

Our factory is open to anyone interested. Come and go through it from top to bottom—see "CHOCO" goods everywhere—in all stages of manufacture and then—well, the next time our salesman calls look through our line and remember

"Checo" Goods Are "Checo" Made and you can save money by buying direct from us.

"Multi-Silver Fortified Back"

Showing silver plating on front of spoon

IN addition to our extraordinary standard plating we put a "Multi-Silver" plating on the entire back of every spoon and fork—the place *wear-resistance* is most necessary:

As our *Multi-Silver* plating is accomplished in one operation, by a new patented process *which we control exclusively*, we get the extra fortification at but a trifle more than the cost of the additional silver:

Our goods have a *standard price and profit for the dealer*, because we take advantage of every invention to make them better:

Send your orders *now* for Fall delivery.

Stone-Setting

Careful and discriminating jewelry buyers appreciate the value of good stone-setting, for many an otherwise beautiful production has been miserably spoiled by careless and incompetent workmen.

All of our stones are neatly and perfectly set. Bright-cutting around half pearls is a special feature with us, and greatly enhances the effect of our pearl set designs. We employ in this department only the most skillful stone setters, and every piece must pass a most rigid inspection before shipment. We invite a most careful comparison.

The Gulf Jewelry & Stationery Co., Corpus Christi, Tex., has been incorporated with a capital of \$5,000, all of which stock has been subscribed, and over 70 per cent. paid in. The secretary and manager is J. S. Gallie, Jr.

The Burnes Mfg. Co. is a new concern which has been incorporated in Kittery, Me., to manufacture jewelry, with a capital of \$150,000. The officers are: President, H. Mitchell, Kittery; treasurer, S. J. Morrison, Portsmouth, N. H.

Members of Philadelphia Jewelers' Club Royally Entertain Guests at Clambake.

PHILADELPHIA, Pa., Sept. 9.—The 200 jewelers and friends who were guests at the clambake given by the Philadelphia Jewelers' Club, Wednesday, had a most enjoyable spread. The dinner was in the form of a clambake, which had been arranged by the members. L. P. White, president; Henry Bodenheimer, vice-president; A. J. Le Jambre, secretary; W. H. Long, treasurer; Joseph E. Cadwallader, John A. Lehman, William Linker and A. G. Lee did the honors and helped much toward making everybody feel at home.

The music was furnished by Kendall's First Regiment Band. Talent from the Philadelphia theaters entertained the guests after dinner. Great interest was centered in the 100-yard dash between two of the fittest men in the club, Howard E. Stevenson and Jacob Binder, Jr. Binder won in a walk.

Valuable Diamond Pipe Reported to Have Been Located in Oroville, Cal.

LOS ANGELES, Cal., Sept. 8.—In reply to a letter addressed to the Chamber of Commerce of Oroville, Cal., inquiring in reference to the reported finding of diamonds in that vicinity, N. B. Crane, secretary, writes as follows:

"Your kind favor at hand. In reply will say that it is a fact that we have a true diamond pipe here at Oroville, and from present prospects it will prove to be one of great value. We were picking up diamonds here from the old hydraulic washings before diamonds were found in South Africa. From whence they came no one was able to determine until a diamond expert from South Africa learned of the conditions here and came here, and through him the diamond pipe was discovered.

"We are now sinking on the best Kimberlite (which is known as a matrix, neither is it rock or clay, but a hard substance when first brought to the surface), that has ever been discovered in any part of the world, so said to be by several diamond experts. We are now down 200 feet in the Kimberlite, and while we have found a goodly number of diamonds of the finest water, we do not expect to obtain any large ones until we reach a depth of from 500 to 1,000 feet. All the satellites of the diamond are obtained in great quantities, as well as many black diamonds, which proves conclusively that we have a genuine diamond pipe."

Importations at the Port of New York.

Recent Decisions by General Appraisers as to Duty on Jewelry and Kindred Lines.

The Board of United States General Appraisers, Friday, handed down decisions affecting the classification under the Dingy tariff of various articles imported by jewelry firms. A protest filed by the H. H. Curio Co. regarding the assessment on agate, carnelian, onyx and other precious stones was decided in favor of the protestants.

The stones in question were cut, but not set, and were intended exclusively for jewelry purposes. They were assessed at a rate of 50 per cent. under the tariff provision for "manufacturers." The contention of the importers, on the other hand, was for duty at 10 per cent. as precious stones cut. This claim the board holds, and reverses the classification made by the Collector.

Leeder & Bernkopf made a protest against the assessment of 50 per cent. on importations of onyx cut into the forms of rings and intended for jewelry manufacturers. The board, in sustaining the claim, sets the duty from 50 per cent. to 10 per cent.

A claim by L. Heller & Son, asking for 10 per cent. duty on rock crystals cemented together, made to imitate emeralds, was granted.

The Collector's assessment at the rate of 45 per cent. is set aside. The Board reduced its assessment of duty on imitation pearl top pins from 45 per cent. to 25 per cent. The goods were entered by the A. Bader Co. of this city.

The protest of Marshall, Field & Co. against the assessment of duty by the Collector of Customs at Chicago on coral, cut but not set, was decided last week by General Appraiser Sharretts, who upheld the protest of the Chicago concern. In his opinion, he said that the articles covered by the protest were shown by the official samples to be coral cut, but not set, commercially known as precious stones and intended exclusively for jewelry purposes, and that some of these stones had been manufactured into articles of utility, having a different name from the coral from which they are made. In a previous decision, Mr. Sharretts held the board held that identical articles were held dutiable at 10 per cent. ad valorem. This decision was sustained by the United States Circuit Court in the case of Albert Lorsche & Co., and was acquiesced in by the Treasury Department, and on the authority of this decision the United States General Appraiser sustains the claim in the protest that the merchandise is dutiable at 10 per cent. ad valorem under paragraph 435. The Collector's decision is reversed.

A recent decision by the board holds that articles composed of californite, which were classified as manufactures of agate under paragraph 115, are precious stones within the meaning of paragraph 435, as claimed by L. Tannenbaum & Co., the New York importers. General Appraiser Sharretts, who writes the decision, says: "This protest relates to articles composed of californite, a mineral described in Mineral Resources of the United States, 1907, page 812, as a compact variety of vesuvianite with

color and texture so like jade that it was first mistaken for that mineral. It is found in Siskiyou County, Cal., on the south fork of Indian Creek, 12 miles from Happy Camp, and has been described by Dr. George F. Kunz."

"It appears from the testimony that the crude mineral californite was sent to Germany, where it was cut into the form of handles, diminutive cups, cabochon settings for rings, etc., in which condition they were returned to the United States to be mounted." * * *

New Members Elected by the Jewelers' Security Alliance.

The regular monthly meeting of the executive committee of the Jewelers' Security Alliance was held on Friday, Sept. 10, the following members being present: Chairman Butts, Vice-Presidents Wood and Champenois, Treasurer Karsch, Secretary Noyes and Messrs. Daring Hold-up and Robbery of Jeweler of Baltimore, Md.

BALTIMORE, Sept. 13.—Another sensational robbery has occurred in the downtown jewelry center, this time in daylight also, the victim being Simon Ruman, 156 N. Gay St. Early this morning two men walked into his store and asked to see some watches, and as he proceeded to get a tray from the show case one of the robbers leveled a pistol at his head and demanded that he throw up his hands.

The jeweler was so startled that he failed to comply immediately, whereupon the gun was shoved into his face and the demand repeated. Although traffic on Gay St. was at this time of the day very heavy and there were many people passing to and fro, the jeweler could see no other alternative than to comply, as the hold-up occurred in the rear of the store, where he could not be seen, and he realized the men were desperate. Following the command to throw up his hands he was led back into an anteroom, where he was bound and gagged, and while one member kept close watch on him with the pistol handy the other proceeded to lock the front door and ransack the show cases. Not content with this, they took \$25 from his pockets and whatever loose change they could find around the store. In addition rings valued at \$200 were taken, and five watches of the cheaper variety, valued in all at \$50. Mr. Ruman expects the loss will be found to be considerable when he goes through all his stock.

The first intimation that anything was wrong in the store was when August Grecht, who was standing on the opposite side of Gay St., heard a crash, and, running across the street, peered through the broken door glass and saw Mr. Ruman struggling on the floor, bound tightly to a rocking chair, which he had succeeded in shoving through the glass. He had tried to unlock with his teeth the door which the robbers had locked before they made their escape through the back door, but had only knocked the key to the floor. He directed Mr. Grecht to reach his hand in and find the key, unlock the door and release him. While this was going on others notified the police, and four detectives from headquarters were rushed to the scene and followed up the robbers, who, however, had made good their escape through the back way. They had bound him tightly with towels and strong cord and threatened to return and kill him if he attempted to give an alarm. Mr. Ruman described one of the robbers as being about 28 years old, with smooth face, black hair and weighing about 175 pounds. This man wore a soft black hat and dark suit. The other was about 25 years old, five feet six inches tall and weighed about 125 pounds. He wore a black derby hat.

Haring, Kent & Woodland; J. Latfee, Gorham Co.; W. C. Barry, Barr & Co.; James Baker, Frank M. Whiting & Co.; Fred Somes, Bates & Bacon; Mr. Howard, Towle Mfg. Co.; C. T. Barbour, Watrous Mfg. Co.; O. Krause, Arthur W. Ware & Co.; Mr. Stanford, Alvin Mfg. Co.; James O. Otis, Harvey & Otis, S. K. Jonas; William Moulton, F. W. Weaver & Co.; H. B. Koopman, Newark Tortoise Shell Co.; W. S. Dudley, Rogers Bros.; Edgar Huhn, Scofield, Melcher & Scofield; William Rosenberger, A. Waldch & Co.; William W. Middlebrook, B. A. Balou & Co., Inc.; C. Morgan, Rogers & Bro.; M. Levy, Fox Mfg. Co.; W. R. Phot, Meriden Cut Glass Co.; A. Hetz I, Charles A. Hetzel & Son Co.; George E. Taylor, Wilcox & Wagoner Co.

Among the jewelry travelers who, recently, visited the Buffalo, N. Y., trade, were the following: J. W. McClannin, Wiley & Silver Plate Co.; D. Skutch, New Haven Clock Co.; Mr. Francis, Waterbury Clock Co.; A. Bradshaw, Meriden Britannia Co.; I. Rockwell, Poole Silver Co.; Mr. Osborne, R. Wallace & Sons Mfg. Co.; Mr. Landin, Han n Mfg. Co.; J. Stanley, Landers, Peary & Clark; H. G. Glasstone, Fox Mfg. Co.; W. J. Francis, Waterbury Clock Co.; Charles Miller, Ansonia Clock Co.; H. Levin, Art Metal Works; George Pilzer, Goodfriend Bros.; Percy D. Lucas, Frank W. Smith Co.; Frank L. Wood, Ludwig, Nissen & Co.; C. L. Kruger, Jr., Larter & Sons; Alfred Nathan, Henry Baschkopf; W. S. Noon, Cory, Clark & Noon; Frederick Keim; E. A. Reed, Reed & Barton; Mr. Henderson, Crane & Theurer; E. A. Osten, Mandeville, Carrow & Crane; Charles E. Platt, Theodore W. Foster & Bro. Co.; Wm. H. Wefferling, Riker Bros.; C. F. Suesay, Champenois & Co.; George E. Taylor, Wilcox & Wagoner Co.; Charles Isidor Jaskow, Isidor Jaskow & Co.; Hubert Somborn, Bawo & Lotter; a representative of Wm. S. Hedges & Co.; John W. Kraus, Steeber-Kraus Co.; M. S. Olin, A. & Z. Cham Co.; Charles F. Sexton, W. L. Sexton & Co.; Mark Pearl, Wagner Comb Mfg. Co.; H. C. Barnum, Shafer & Douglas; I. P. Lane, L. H. Keller & Co.; A. E. Hayward, Seth Thomas Clock Co.; C. H. Holbrook, Sloan & Co.; James Panton, Mabie, Todd & Co.

The following traveling representatives visited the trade in Omaha, Nebr., during the past week: R. H. Stevens, Mabie, Todd & Co.; Mr. Parsons, Hull Umbrella Co.; S. C. Powell, S. C. Powell & Co.; Arthur Abraham, Cohn, Abraham & Co.; C. E. Emerson, W. H. Bell & Co.; Frank W. Collom, Sulzberger Bros.; G. Rodenberg, J. A. Dunn & Co.; Milton S. Rodenberg, Dunn & Rodenberg; W. N. Brooks, Brown & Mills; Henry Bloch, L. E. Bloch & Co.; J. B. Rockefeller, Forquigon Sales Co.; Otto Hinrichs, Omega Watch Co.; M. B. Bernstein, Tuthill Cut Glass Co.; J. A. McIntire, Kreis & Hubbard; J. S. Brande, Keller Jewelry Mfg. Co.; Mr. Tinker, William B. Durgin Co.; F. H. Helkindsen, Longines Watch Co.; Mr. Thornton, Hayden W. Wheeler & Co.; Mr. Clinger, T. J. Hawkes Co.; E. G. Adler, Leroy Mfg. Co.; R. Watson, Whiteside & Blank; J. H. Crawford, J. W. Forsinger; Jul. F. Schuman, Jr., William Kinscherf Co.; John A. Lossau, Martin Copeland Co.; C. H. Davison, Kohn & Co.; P. G. Storm, Reed & Barton; T. H. Batcheller, Moore & Son; Mr. Dorrance, Simons Bro. & Co.; G. A. Armstrong, Payne & Baker Mfg. Co.; H. A. Bliss, Wardley, Allsopp & Bliss Co.; Harry E. Farquharson, E. D. Gilmore and E. A. Potter; Mr. Gate, Manning, Bowman & Co.; George B. Neill, Keystone Watch Case Co.; Rudolph Schweiger, H. Z. & H. Oppenheimer; Mr. Cureton, Henry G. Lefort; Leonard M. Heine, Henry Lederer & Bro., Inc.; G. W. Hopkins, Sheppard Mfg. Co.

News Gleanings.

Hall & Co., Manistique, Mich., announce that A. R. Grove, formerly of Bluffton, Ind., has retired from this concern and is no longer connected with it in any way. H. L. Hall, who is now sole owner of the business, will continue to conduct it under the old name, and Mr. Grove expects to return to Bluffton in the near future where he will operate an optical parlor.

Chas. B. Rubert, a well known jeweler, of Owego, N. Y., who had been employed

for many years by W. L. Hoskins, died, Sept. 3, at his home in that city of pneumonia after an illness of about three weeks. Deceased was about 73 years old and is survived by a widow and one son.

W. E. Johnson, Abbeville, S. C., has moved into his new quarters and now has a very finely fitted establishment, with many novel features. The fixtures are distinctly unique and the decorations and arrangements of the store are not only rich but out of the ordinary in many particulars. Mr. Johnson started in business many years ago in a very modest way and has built up a fine trade by his progressive methods.

Announcement has been made that the referendum vote taken by the Metal Polishers, Buffers, Brass Molders and Brass and Silver Workers' International Union of North America on the election of their national officers is completed, and the results show that T. M. Daly, South Field, N. Y., has defeated the present incumbent, A. B. Grout, for international president. The first news given out was to the effect that President Grout had been re-elected, but the report of the international canvassing board shows that he has been defeated by T. M. Daly for that position. Besides this, the following officers have been elected for the ensuing term: Secretary, treasurer and editor, Charles R. Atherton; vice-presidents, first district, Thomas J. Flynn; second district, George Leary; third district, Joseph L. Merchant; fourth district, James Clarke; fifth district, Joseph Stoker; sixth district, John E. Burke; seventh district, Alfred Burton; eighth district, George Foster; ninth district, Martin Ludwig; 10th district, W. W. Britton; 11th district, William Kauffman; 12th district, Edwin Lederman; 13th district, T. J. Fadigan; 14th district, Joseph G. Hyde; 15th district, Frederick O. Smith.

Two sharpers, one claiming to be a jeweler, are working an old game through the central part of New York State. The "jeweler" stops in town for the day and makes friends with the intended victim. Later his partner comes along, trades at the store of the victim and asks where he can sell a pair of diamond earrings. The victim shows the earrings to the "jeweler," who says they are worth from \$300 to \$400, and suggests that the victim buy them. As an evidence of good faith the "jeweler" puts up from \$50 to \$100 in the victim's hands, telling him if he can get the earrings at a bargain that they will "go halves." The victim generally acts on the suggestion only to find that the "jeweler" has disappeared, and that the earrings that he has purchased for twice the amount entrusted to him are worth but a few cents. One of the most recent victims was Sam Meyers, a shoe dealer, of Kingston, N. Y., who lost about \$200.

The Mexican grade of table ware made by Holmes & Edwards Silver Co., Bridgeport, which is unplated and, therefore, extremely serviceable where severe and constant use is required, has received an excellent test and endorsement by reason of the fact that it has been used in the equipment of the yacht *Carnegie*, which, as is well known, is sailing on the scientific expedition, taking magnetic observations all over the world.

THE commercial failures during last month, as reported to R. G. Dun & Co., number 917, with total liabilities of \$9,620,000, as compared with 1,199 in August, 1908, with liabilities of \$23,782,000. In other words, conditions are about down to the normal again. Strange to say, the figures of the jewelry trade which were compiled for *Dun's Review* were still above the normal, though last month showed a big improvement over August of 1908. According to this table there were 20 failures in the jewelry and clock trades in August just passed, with liabilities of \$176,253, as against 24 in August, 1908, with liabilities of \$324,530; 11 in August of 1907, with liabilities of \$40,559; seven in August, 1906, with liabilities of \$108,261, and seven in August, 1905, with liabilities of \$51,386.

The Use of Coin in the Arts.

FROM a number of letters which have been received from subscribers it would appear that the idea has again become prevalent that jewelers have no right to melt silver and gold coins in their business, as this will be a violation of the federal law against "mutilation" of coins. To the many inquirers for information on the subject and for the sake of those who are still in doubt we wish to again state that there is no law, as far as we know, that forbids the melting of gold and silver coins for use in the arts and industry, but there is a law (Section 5459) of the Revised Statutes which makes it a crime for any person to fraudulently deface, mutilate, impair, diminish, falsify, scale or lighten the gold and silver coins which are by law made current or are in actual use and circulation as money within the United States.

As we read the statutes, the law against defacement and mutilation of coins is directed against persons who tamper with the coin for the purpose of defrauding and is not intended to prevent such use of the coin as results in its absolute destruction as coin. It is evident from the circular letters which have often been sent out by the directors of the Mint, seeking information as to the amount of gold and silver consumed in the arts, that the Government takes it for granted that a certain proportion of the gold coined at least will always be destroyed for use in jewelry and other lines, because this is the most convenient way in which gold in small amounts can be obtained in certain sections of the country, with the additional advantage that the weight and fineness is guaranteed by the Government stamp and no further assay is necessary on the part of the user.

In other words, the jeweler need have no fear of using coin as long as he takes the coin out of circulation and converts it into bullion; that is, that he does nothing to it which will permit its value to be impaired and still give himself or another a chance to defraud any one else by putting it again in circulation. The price of silver and the artificially high ratio at which silver pieces of the United States are now coined makes it foolish for any one to use silver coins in the arts, as he would pay approximately twice the price for the coin that he would pay for the bullion, but with

An advertiser in The Jewelers' Circular-Weekly advertises to the entire jewelry field.

gold it is often found easier to use the coin than to buy the bullion, and there is no reason why this should not be done.

Care in Selecting Trade-Marks.

THE important part played by trade-marks in the jewelry trade is realized more and more every year by manufacturers, jobbers and retailers alike, because these marks not only serve to identify the maker of the product of the manufacturer in a way known only to the jobber and retailer, but also, in numerous instances, serve as a guarantee of quality and workmanship as well. In fact, when the retailer buys through the jobber the trade-mark used on a standard line of goods made by many concerns is often the only means he has of knowing that the article he buys is the product of the particular manufacturer whose goods he wishes. The fundamental use of the trade-mark is as a means of identification of the product, and the fact that it has come also to sometimes serve as a quality stamp as well takes away nothing, but adds to its essential usefulness. The essential feature of a trade-mark, therefore, should be its individuality, so that it will not be easily confused with others used on like brands of goods.

Manufacturers or dealers who desire to adopt a trade-mark should keep the above carefully in mind, and when selecting a device which they wish to put upon the products coming from their houses should devote considerable time and use extreme care and caution before they finally adopt their mark, because they are probably building not for the present, but for a long time in the future, and a little care at the beginning may save them much annoyance and perhaps litigation at a later date.

In speaking of this subject, a writer in a recent edition of *Printers' Ink* truly says: "Men in business separate or die, firms change or dissolve and stock incorporations pass into new hands. But a trade-mark, commonly called a "brand," will, if well chosen, legal and registered, run through generations and centuries with a swelling potential of value. It is of the most extreme and enormous importance, therefore, that the limit of care be taken to find a mark that is legal and registrable. An ounce of prevention of mistake will save a ton of correction later—but if necessary it is wise to exercise the ton of care at the outset rather than to risk an ounce of terror after the lapse of time. Time is an essential element of success of a mark—but it is an element that once lost is lost forever. The acorn contains the potential of a centenarian among oaks—but it takes 100 years to make it one. To lose a mark

is almost like beginning business o-
again."

The essential right of a manufacturer a trade-mark or trade name is not conferred upon him by statute, but is one he has inherited under the common law. Consequently the protection which he gets under the common law is often less than he can get through any legislation passed by the Federal or State governments. For this reason no registration is required to give him an absolute right to injure relief and to damages as against wrongdoers who cut into his trade, but the fact that no registration is necessary makes it all the harder for the man about to adopt a trade-mark to determine whether or not the mark which he intends to use has previously been used in the same line.

It is for this reason that the national registering trade-marks is of value to the beginner and the old user of a trade-mark, as it permits the man about to adopt one to file an application, which is published by the Government, with an illustration, description of the mark he claims. Before registration is granted any person who believes he will be damaged by the registration may oppose the registration within 30 days of the publication. This, incidentally, puts all competitors on notice (though if not actually) and permits the applicant to some extent to find out if there are any predecessors in the field.

Of course, a similar result may be obtained by the manufacturer publishing his trade paper a notice of the fact that he was about to adopt a certain device as a trade-mark and giving objectors a certain time in which to let him know of their objections, but in this way he would not have the advantage that the federal registration gives him of being able to use the Federal as well as State courts in case of controversy unless the litigation involved a defendant in another State in a controversy of an amount of over \$2,000.

Even should the manufacturer register his trade-mark at Washington we still advise him to conduct a careful investigation of the marks used in his line before finally adopting the device that he will use. Fortunately for the jewelry trade, investigations as to marks in the lines that come into this industry has been made fairly complete by the publication of "Trade-Marks of Jewelry and Kindred Trades" by THE JEWELERS' CIRCULAR Publishing Co., and a revision of this line, together with the supplement, which is now on the press, will give the searcher very clear knowledge of the registered and unregistered marks which have been and are being used in this industry. The volume and the new supplement to it are about as perfect a compilation of the trade-marks of the jewelry trade that it is possible to make. Even though it may not be absolutely complete, we have little doubt that the manufacturer or dealer who adopts a mark or device not recorded in these works may feel pretty sure of being a pioneer in the use of such mark in the field.

H. Shadel, Webb City, Mo., moved recently, to Fayetteville, Ark.

Frank A. Hanson & Co. have succeeded to the business of Frank Hanson.

New York Notes.

W. Schmitz, Clinton, Ia., is in town this week.

Villiam Lamb, 31 Avenue B, has sold out Wasserstrom & Beilich.

J. B. Umsted, New Port, Ark., is in town this week, calling on friends in the city.

Thomas H. Moss, 14 Maiden Lane, has returned on a business trip through New York.

L. Ruth, Montgomery, Ala., was among the out-of-town visitors during the week.

Charles F. Brinck, of the Crescent Watch Co., returned last week from a vacation in Pennsylvania.

Named in the list of contributors to the Hudson-Fulton Celebration appears the name of the Gorham Co. for \$100.

Miss Pettus, jewelry buyer for Maison, Inc., New Orleans, La., has been busy on the trade in this city during the week.

Mr. B. Cohen, who is in the jewelry business in this city, is spending a month at the Union Broadway Hotel, in Atlantic City, N. J.

Harry B. Schreiber, who represents the Rochester-Smith Co. on the Pacific coast in the south, has returned from a successful trip.

Frederic L. Goddard, assistant secretary of the Jewelers' Safety Fund Society, is spending a vacation at Lake Waramaug, New Britain, Conn.

Arthur Lesser, formerly with D. Harris Co., 621 Broadway, is now the New York representative of the Royal Comb Co., Danvers, Mass.

Mr. and Mrs. Charles Braxmar have been visiting friends in Kingston, N. Y. Mr. Braxmar is a large manufacturer of badges and jewelry in this city.

Mr. Aufhauser, of the Peckham Seamless Ring Mfg. Co., and Bernard Karsch, an eighth Ave. jeweler, are on the September Grand Jury of New York County.

Among the out-of-town visitors last week to this city was J. Alexander Hardy, of Hardy & Hays Co., Pittsburg, Pa. He has his headquarters at the Holland House.

Mr. Wheeler, of the W. & S. Blackinton Co., North Attleboro, Mass., is in charge of the New York office during the absence of Geo. Semple, who is on a western trip for business.

Sigmund Wyler, 4 W. 28th St., dealer in jewelry antiques, etc., accompanied by his family, returned Tuesday, of last week, on the *Kronprinzessin Cecilie*. They have been abroad about 10 weeks.

Leopold Stern, of Stern Bros. & Co., 68 Nassau St., returned from Europe Sunday last week on the *Rotterdam*. Mr. Stern reports that there has never been a more active demand for diamonds than at the present time. While abroad he met a number of buyers in the foreign markets.

The Dennison Mfg. Co. has an attractive Hudson-Fulton display window at 13 John St., which is creating many favorable comments from passersby. The "Clermont" and "Half Moon" are reproduced in paper in a most realistic manner. The background

of Dutch windmills, etc., completes the display.

Clarence F. Bayer, of the Bayer & Pretzfelder Co., sailed for Europe on the *Kronprinzessin Cecilie*, yesterday, to visit all the principal cities. He expects to be gone four months, buying new goods prior to the opening of the new showrooms at 5 E. 17th St. and 6 E. 18th St. Albert Pretzfelder, of the same firm, will sail for Europe in October.

Allen Wilkinson, who is associated with Carr & Co., manufacturers of optical goods, Providence, R. I., and who will represent that firm in this city, was married, recently, to Miss Edyth Kathryn Shellabarger. The marriage was solemnized in the parlors of the Grace Episcopal Church, Chicago. Mr. and Mrs. Wilkinson are now on a trip through the west.

A number of traveling salesmen returning to New York, this week, report that out-of-town jewelers are planning to visit this city during the Hudson-Fulton celebration, from Sept. 25 to Oct. 1. The opportunity thus afforded for a trip to New York is an excellent one, and will give out-of-town jewelers a chance to buy for the holiday trade and at the same time see one of the greatest celebrations ever held in this city.

The Boost Club, of New York, have chartered the steamer *Putnam* for the day and evening of the Naval Parade of the Hudson-Fulton Celebration, on Oct. 1. An official position in the parade has been assigned the club's steamer. This will afford a rare opportunity for its members and their friends to witness the various displays. If you decide to attend, mail before Sept. 15 checks for \$3.50 to William H. Ingersoll, 45 John St.

At the regular monthly meeting of the board of directors of the Jewelers' Board of Trade, held last Thursday, the following firms were unanimously elected to membership in the Board: The Harvey J. Flint Co., Charles E. Hancock Co., Himalaya Mining Co., the Kinney Co., Henry Lederer & Bro. and Henry Williams & Son, all of Providence, R. I. W. S. Hicks & Sons, Henri E. & Jos. E. Judels, Jacob J. Schmukler and U. S. Agency Omega Watch Co. (branch), all of New York, and New England Jewelers, Boston, Mass.

The case of Miss Eleanor Beattie, under bail on charges for defrauding the Gorham Co., came up at London, England, in the Bow St. court, last week, and was adjourned. This time it was the defence who asked the postponement, though heretofore it has professed great anxiety to have the application for the extradition ruled upon without delay. The reason alleged by Miss Beattie's attorney was that a cablegram was expected from America which would increase his client's chances of being freed from Chancery. No explanation was given of the exact nature of this expected message, but the plea evidently impressed the magistrate and he granted the postponement.

The Jewelers' Security Alliance was notified last week that the store of Eugene F. Seaman, Monongahela, Pa., was broken into on the night of Sept. 6, but that the thieves had evidently been frightened away, as nothing had been missed. Admis-

sion was gained through a rear window. A letter was received, also, stating that a window in the store of C. F. Plitt, Washington, D. C., was smashed early on the morning of Sept. 7 and about \$30 worth of jewelry stolen. Mr. Plitt sleeps on the premises and was awakened by the breaking of the glass. He investigated and did not find the broken window, but shortly afterward he was again aroused by the police, who notified him that the front window of his store had been broken. He had overlooked that window, because it was covered by a black silk curtain.

An involuntary petition in bankruptcy was filed against David Kessler, dealer in jewelry and precious stones, 215 Forsyth St., New York, Saturday, in the United States District Court, New York, by Levinson & Friedlander. The petition recites that there is a provable claim against Mr. Kessler for \$1,170 in excess of securities. It is alleged that he is insolvent, and transferred cash and merchandise to preferred creditors. A petition in bankruptcy has been filed against Israel Goldfarb, a dealer in diamonds and precious stones at 51 Maiden Lane, New York, by the same firm. This petition states that there are provable claims against Mr. Goldfarb amounting to \$1,379 in excess of securities. It is alleged that he is insolvent, and on May 25 transferred real estate to Mr. Kaplan. Both petitions allege the debts to be due for goods sold and delivered. Levinson & Friedlander, who filed both claims, sold notes for part of their claim, made by I. Goldfarb and indorsed by Mr. Kessler. David Kessler, who is the father-in-law of Israel Goldfarb, has been in business for about 20 years. He failed and went through bankruptcy, receiving his discharge in July, 1908. Mr. Goldfarb is a rabbi, with a charge in Brooklyn. He has owned the jewelry business since September, 1908.

The baseball game, Saturday, between the New York and eastern salesmen in the Maiden Lane district, which was played at the McAvoy Oval, 145th St. and Lenox Ave., resulted in a victory for the New York representatives, the final score being 10 to 4. The game created considerable interest in Maiden Lane, and as a result quite a large crowd was on hand to see the fun. The eastern boys started off well by securing two runs in the first inning. Neither side counted in the second, but in the third session the New York team secured five counts and kept their opponents from scoring. They added two more in the fourth. In the fifth inning each side tallied once. In the sixth and seventh the city boys gathered in two more runs, but failed to score in the eighth, while the easterners managed to get one man around. The final session saw nothing for either side. Individual cups for the winning team were the trophies of the occasion, and were on exhibition at 9 Maiden Lane before the game. This is the second game between the two teams, and Captain Hilsinger is sure his team can win the next one. Capt. Heywood, however, does not see it that way, and it is probable a third game will be played later. The batteries were: New York salesmen, Baker and Parker; eastern salesmen, Heywood and O'Connell.

New York Notes.

(Continued from page 95.)

umpires, Mr Booth and Mr. Sturdy, "the men of the hour."

Goldstein, Mobile, Ala., was seen in Maiden Lane district during the week. Joseph Bros., Indianapolis, Ind., wholesale jewelers, have opened an office at 404 Broadway.

L. Brent, Altoona, Pa., was a visitor at offices of THE JEWELERS' CIRCULAR—WEEKLY last week.

A. A. Zwiher, of the Little-Long Co., Charlotte, N. C., is in town buying goods for the Fall and holiday trade.

A German jewelry manufacturer advises American Consul that he desires to get in touch with American manufacturers of jewelry used in making handbags and belts. Henri Sinquese, formerly of the Sinquese House Co., manufacturing jewelers, 102 Nassau st., will continue the business under his own name. Mr. Labonsecur has withdrawn from the firm, as noted last week.

Cablegrams received in this city last week announce a further advance in Wessleton rough diamonds. One cable placed the advance at 5 per cent., while another cablegram stated a 4 per cent. to be the amount of increase in price.

A Schwab, president of the National Wholesale Jewelers' Association, returned from Europe last week and was in attendance at a meeting of the executive committee of the local Wholesale Jewelers' Association, a report of which appears in another column.

J. P. Archibald, president of the American National Retail Jewelers' Association, is in town last week to confer with the executive committee of the local branch of the National Wholesale Jewelers' Association. He also paid a visit to the offices of THE JEWELERS' CIRCULAR—WEEKLY.

Martin Mayer, Mainz, Germany, a well-known German manufacturing jeweler, has opened a New York office at 315 Fifth Ave., where he will carry a complete sample line of his own manufactures of high grade jewelry, silverware and corals. Albert Eidenheimer, who has been with the house for several years, the last four of which as in the Paris office, will have charge of the New York office.

The Jewelers' Bowling League season opened Monday night in Brooklyn with a game between the William Barthman and Lumford & Galloway teams. The Barthman team lost the first game by 30 pins and on the last two, winning the last game of the series by over 100 pins. The scores were in the eight hundreds, and the games were hotly contested. The Ilgen & Wakefield Co. team plays Hayden W. Wheeler & Co. to-night. Friday night the Solidarity Watch Case Co. and Cross & Beguelin teams meet.

The Jewelers' Security Alliance have received a list of the jewelry stolen from Mrs. Hirsch, wife of A. Hirsch, of A. Hirsch & Co., Chicago. It includes one marquise ring; one three stone Tiffany ring; one diamond and ruby ring, containing two diamonds; one three stone ring containing two diamonds and a sapphire; one five stone Tiffany ring and an old style French brooch

with about 10 diamonds and three or four large pearls, with a pendant in the center. The jewels are thought to have been taken by a waiter. A reward of \$500 is offered.

Tim Donohue, customs sleuth, found in the seal cap of a cabin passenger by the French liner *La Surcouf*, in Saturday from Havre, several pearls and diamonds valued at about \$100. The jewels were seized and the passenger was permitted to go. Three women passengers by the American liner *New York*, from Southampton, according to C. C. Wall, special Treasury agent, handed their satchels to women friends who met them at the pier within the customs lines, the result being the seizure of three pieces of jewelry by watchmen at the gates.

The protest last week of Albert Lorsch & Co., 37 Maiden Lane, against the assessment of duty on half pearls returned at 20 per cent. ad valorem under Section 6 of the tariff act of 1897 was sustained. The half pearls were claimed as dutiable at 10 per cent. ad valorem under paragraph 436 of the same act. The assessment of the collector in holding that scale bearings be returned as manufactures of agate at 50 per cent. under paragraph 115 was sustained, while the protest that onyx cut but not set and dutiable only for jewelry purposes, which is claimed by the importers to be dutiable at 10 per cent. ad valorem, was sustained.

United States General Appraiser Sharretts last week handed down a ruling on the protest of the Rocky Mountain Gem Co., Denver, Colo. The case came up before the United States General Appraisers and related to merchandise classified by the surveyor as manufactures of agate, with a duty of 50 per cent. ad valorem under paragraph 115. The importers claim the agate to be dutiable at 10 per cent. under paragraph 436 of the same act. In his decision Appraiser Sharretts says that these agate stones are intended exclusively for settings for jewelry, and are not articles of utility manufactured from agate. He sustains the protest and reverses the decision of the surveyor.

Morris Starr, a salesman employed by Aisenstein & Woronock, 22 Eldridge St., it is charged, was caught Friday with 45 cents and a sales slip that he had failed to turn over to the cashier. To avoid arrest he swallowed some nitric acid. He was taken to Bellevue Hospital, a prisoner, in the ambulance. Mr. Woronock, of the firm, in speaking of the occurrence to a reporter of THE JEWELERS' CIRCULAR—WEEKLY, said that the salesman had been under suspicion for some time, and that he was detected in the transaction. When he saw he was caught, Mr. Woronock said, he ran to the back of the store and grabbed up a bottle of nitric acid from the watchmakers' bench and swallowed some of it. A nearby druggist was at once called into the store and administered an emetic. The police and ambulance were then called. Mr. Woronock said that the firm will prefer charges of larceny against the salesman, who will recover, it is said.

The will filed last week of Louis Strasburger, of 5 W. 73d St., for many years a merchant in the Maiden Lane district, leaves to his son, Byron L. Strasburger, \$50,000 and the income from a trust fund of \$100,-

000. On his death the principal of this trust is to revert to his brothers, Alvin L. and Mortimer L. Strasburger. The residue of the estate, after deducting bequests, is to be divided, the will states, between the three sons. Mrs. Rose Black, an only daughter, inherits the furniture, plate and furnishings in the house at 5 W. 73d St., and \$10,000 outright. Two trust funds of \$30,000 each are created, one payable to Mr. Strasburger's granddaughter, Bertha M. Black, when she becomes 21. The interest of the other \$30,000 is payable to Mrs. Black, and at her death the principal is to go to her son, Monroe Percy Black. The sum of \$500 is bequeathed to the Hebrew Congregation of Hohebach, Germany; \$200 to Rose Bruynsaids, a former maid, and \$100 to Max Winkler, the testator's nurse. To the Mount Sinai Hospital, the Montefiore Home, the Home for Aged and Infirm Hebrews, the Hebrew Orphan Asylum, the Hebrew Sheltering Guardian Society, Lebanon Hospital, Beth-Israel Hospital, and the United Hebrew Charities, \$1,000 each is given.

Elgin National Watch Co.'s Revised Price List in Effect To-day— Waltham Watch Co. Changes Prices Sept. 20.

CHICAGO, Sept. 11.—The Elgin National Watch Co. has just announced to the trade that the following gilded grades of movements will be advanced in price Sept. 15, but deliveries will be limited: 18 size, No. 326; 16 size, Nos. 365, 366 and 310; 12 size, No. 364; 9 size, No. 325; 6 size, No. 377.

Accompanying the circular is a revised price list which takes effect Sept. 15 and covers the following grades:

16 Size—23 jewel Lord Elgin, O. F.; Nos. 156 and 162; 23 jewel Veritas, O. F.; 21 jewel Veritas, O. F.; 19 jewel B. W. Raymond, O. F., Htg.; 17 jewel B. W. Raymond, O. F., Htg.; No. 242; G. M. Wheeler, O. F., Htg.; Nos. 241, 244, 339, 340, 312, 313, 290 and 291.

12 Size—23 jewel Lord Elgin, O. F., Htg.; Nos. 190, 194, 189, 193 and 321; G. M. Wheeler, O. F., Htg.; Nos. 344, 345, 314, 315, 301 and 303.

6 Size—Nos. 295, 286 and 289.
9 Size—Nos. 201, 205, 263, 264, 354, 355, 320 and 324.

Lady Elgin Series—17 jewel Lady Elgin, O. F.; 15 jewel Lady Elgin, O. F.

The use of mahogany boxes will be discontinued by the company.

BOSTON, Mass., Sept. 13.—The Waltham Watch Co. will announce revised prices of a number of grades of its watches, to take effect Sept. 20. The change will extend the scope of the protected retail price to additional lines not now covered.

Patrick Murphy, aged 40 years, a pearl fisherman, Winchester, Ill., was drowned in the Illinois river, at Naples, recently, while engaged in his occupation.

Stock Orders Special Work Repairs

WE WANT YOUR BUSINESS

AN IMPORTANT DEPARTMENT OF YOUR BUSINESS IS
STOCK ORDERS, SPECIAL WORK, ALTERATIONS and REPAIRS

Selecting Your Market for this Work is Therefore of Great Importance

You cannot make a mistake when you send your stock orders, special work and repairs to Chicago, as there are over 30 manufacturing jewelers with better and more completely equipped factories than are the factories of other manufacturing jewelers in any city in the world.

In this market you will find a larger stock of specially manufactured mountings for immediate delivery than in any other market, and as choice a selection of precious and semi-precious stones as is to be found anywhere.

Not only are the Chicago manufacturers prepared to give you the best selection, style and workmanship at reasonable prices, but they offer you prompt service. The thousands of miles of railroads terminating in Chicago make all territory "Chicago territory" and give it the greatest shipping facilities of any city in the world.

OUR SHOPS ARE YOUR SHOPS

WHY NOT USE THEM?

CHICAGO, WEDNESDAY, SEPTEMBER 15, 1909.

No. 7.

Chicago Notes.

John Braude is on a western trip.
Harry Adler, of Chas. Adler's Sons, was here last week.
Louis Manheimer and family have arrived in Chicago.
Thomas H. Bern, 5116 Wentworth Ave., is starting his store.
L. Kerr, jeweler at Colon, Panama, was here last week.
Seth Thomas Miller made a flying trip to New York, last week.
D. H. Child, representing Warren & Adams, was here, last week.
A. B. Smith, with Wm. A. Rogers, Ltd., returned from a western trip.
Wm. D. Dreyer, formerly of Jones & Meyer, has located in Kansas City.
Peter Lapp, of Lapp & Flershem, is back on a vacation at Buzzards' Bay, Mass.
W. A. Fay, representing the Porter-Buffton Co., visited the northwest, last week.
F. Lane, a retail jeweler at Roseland, seriously injured his right knee, last week.
Adolph Schwob, New York, visited J. F. Tice, his Chicago manager, last week.
I. L. Lake, with the Waltham Watch Co., is spending a month's vacation east.
A. M. Chadbourne, representing the Ames E. Black Co., is on a western trip.
G. A. Jewett, representing Hamilton & Hamilton, Jr., is back from the northwest.
John A. Davis is the new assistant to C. Edgar Pettit, representing Ballou & Co. in Chicago.

Glenn H. Seitz, representing Bedford & Sons, is on a trip through Michigan and Wisconsin.

Geo. M. Strawn, of E. A. Dayton & Co., is a member of the Cook County September Grand Jury.

Jules Franklin, New York, stopped over here, last week, on his way home from the Pacific coast.

Otto Lieberman, of the diamond department of the Stein & Ellbogen Co., is in the northwest.

Fred Hyatt, with the Philadelphia Watch Case Co., went to Duluth, last week, on a lumber barge.

Miss M. Johnson, with the American Silver Co., has returned from a three weeks' vacation at Paw Paw Lake.

Thos. Singleton, superintendent of the J. D. Bergen Co., visited the Chicago offices of that corporation, last week.

F. C. Emerson, with Rettig, Hess & Mad-

sen, visited the Michigan retail jewelers' convention at Detroit, last week.

Anton Englemann, 357 Ogden Ave., has recovered from his recent illness and is again able to attend to his business.

I. F. Varney, of the Varney Jewelry Co., Wichita, Kans., stopped over here, last week, on his way home from New York.

The jewelry store of Emil Schaffer, 306 State St., was closed for two days, last week, on account of the death of his father.

C. D. Warner, formerly with Henry Paulson & Co., has been engaged by the Watson & Newell Co. to travel in the northwest.

Milton Newitter, the new member of the New York diamond house of Veit, Hirsch & Co., was here, last week, calling on the trade.

Fred H. Young, Maquoketa, Ia., came to Chicago in his automobile, last week, accompanied by his wife and a party of friends.

Ernest M. Lunt, Chicago manager for the Towle Mfg. Co., and H. S. Hyman, of Hyman, Berg & Co., are on a vacation trip to Maine.

A. Rosenfield, Leavenworth, Kans., accompanied by his wife, stopped over in this city, last week, on his way home from Europe.

The new telephone number of the Chicago office of THE JEWELERS' CIRCULAR-WEEKLY and of the *Optical Review* is Randolph 1079.

A. C. Becken and J. T. A. Finn, diamond buyers for the A. C. Becken Co., visited New York on a diamond-buying trip, last week.

Ed M. Klein, of the new jobbing house of Klein Bros., Muncie, Ind., was a visitor here, last week. Klein Bros. will remove to Cincinnati the latter part of the month.

Gottlieb & O'Neil, jewelry auctioneers, are closing out the stock of the Parritt Jewelry Co., Des Moines, Ia. The sale is well attended and is running successfully.

Col. T. P. Moody is in New York trying to interest a few cigar manufacturers in a patented article. The article is a cigar-fighter, match safe and collar box, all combined.

While going to Alaska on the steamer *Ohio*, which was wrecked on Aug. 27 last, A. N. Anderson, jewelry dealer, of Minneapolis, lost about \$5,000 worth of watches and jewelry.

Mr. Beaton, Toronto agent of the Elgin

National Watch Co., paid a visit to the Chicago office of that corporation, last week. R. C. Fay, advertising manager for the Elgin company, is in New York.

Emil T. Giese was here, last week, buying his stock for a new jewelry store he will shortly open at Walcott, Ia. Mr. Giese formerly was employed as watchmaker for Plank & Co., of Davenport, Ia.

Abraham Davis, for many years in the jewelry business and at one time a member of the Chicago jewelry jobbing house of A. Davis & Co., died, Sept. 7, at his residence, 5627 Prairie Ave., and was buried on Sept. 9.

George H. Bohner, Jr., who died, last week, in the Philippines, where he held a position under the United States Government, was the son of the president of the Geo. H. Bohner Co., lamp manufacturers, 42 State St.

Franklin Thompson, secretary of the Wisconsin Retail Jewelers' Association, was here, last week, on special business connected with the Jewelers' Mutual Fire Insurance Co. of Wisconsin. This mutual insurance company, owned by jewelers and managed by jewelers, is meeting with marked success, Mr. Thompson reports.

J. F. Dailey, St. Louis manager for Loftis Bros. & Co., has resigned his position to engage in the mining business in Nevada. While with Loftis Bros. & Co. he sold a bill of jewelry to a customer and made friends with him. The latter, who was a miner, took Mr. Dailey to Nevada and showed him some rich silver claims. Dailey took advantage of the opportunity and staked off a few claims for himself.

Among the out-of-town retail jewelers here, last week, were: J. H. Crane, Charleston, Ia.; Geo. S. Bauder, Elburn, Ill.; J. C. Seaton, Somonauk, Ill.; J. C. Ranbow, Geneva, Ill.; T. A. Bader, Kalamazoo, Mich.; Geo. L. Goodale, Lenox, Ia.; A. D. Miller, Braidwood, Ill.; E. A. Buder, Cairo, Ill.; Henry W. Seltz, Clay Center, Kans.; J. T. Bradford, Colfax, Ill.; O. C. Zimm, Hastings, Nebr.; C. C. Patton, Canyon City, Colo.; E. A. Sigler, Crown Point, Ind.; E. O. Collins, Franklin, Ind.; F. E. Chandler, Boone, Ia.; C. F. Graff, Elkhorn, Wis.; T. H. Craig, of Ferguson & Craig, Champaign, Ill.; A. Lundquist, North Crystal Lake, Ill.; P. Jacoby, Kalispell, Mont.; F. A. Shetter, DeKalb, Ill.; L. A. Beatty, Roodhouse, Ill.; Frank Krel's, Frankfort, Ind.

J. Reed Elliott, president of the Elliott Jewelry Co., has gone to Colorado Springs, Colo., on a pleasure trip, to be gone about two weeks.

Andrey C. Lindsley, of the J. Bolland Jewelry Co., has removed from the Lucerne to the new Nevins apartments, at Belt and Bates Aves.

E. W. Bornmueller, of the J. Bolland Jewelry Co., has returned from Eagle River, Wis., where he spent two weeks with a party of friends.

Adolph Umbrecht, of the Brooks Jewelry Optical Co., has left on a business trip through Oklahoma and Texas. He will be gone about a month.

Mr. Ross, of the Ross & Heyer Co., Ft. Worth, Tex., accompanied by his wife, spent part of this week in St. Louis. They are on their way east.

Ralph Lowenstein, of the R. Lowenstein Jewelry Co., has returned from a southern trip. Milton B. Lowenstein has returned from the northern resorts.

Mr. Sutton, of the J. L. Wolff Jewelry Store, Paducah, Ky., after a visit to his old home at Macon, Mo., stopped off here on his way to the northern resorts.

Harry W. Mark, of the St. Louis Clock & Silverware Co., has returned from his vacation, during which he was married to Miss Amelia Drissel, of this city.

Henry Schubach and Charles Anonberg, composing the new 6th St. firm of Schubach & Anonberg, returned Monday from a trip of business and pleasure to Chicago.

In the Edward H. Kniepkamp bankruptcy proceeding, the trustee, on his petition, has been ordered to sell all uncollected accounts at the east front door of the court house.

Z. B. Robbins and wife, Robbins Jewelry Co., 315 Holland building, went to Chicago last Saturday on a trip of business and pleasure combined. They will return Monday.

George Petter, of the Petter Jewelry Co., Hannibal, Mo., accompanied by Mrs. Petter, spent several days in St. Louis, last week, visiting relatives. Mr. Petter also made purchases.

C. W. Klar and G. C. Cress, heretofore doing business at Hillsboro, Ill., under the firm name of Klar & Cress, have dissolved partnership and each is now conducting his own business.

J. C. Faulkner, Russellville, Ark., who was in the city during the week, making purchases, was accompanied by his wife, and the trip was made one of pleasure as well as of business.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., has been appointed a member of the committee on decorations for Industrial Day at the St. Louis Centennial, Oct. 3 to 9.

The William H. Homuth Jewelry Co., Bloomington, Ill., has been incorporated with a capital stock of \$50,000. The incorporators are William H. Homuth, Margaret A. Collins and Henry G. Homuth.

C. F. Cardell, Missouri traveler for the Furstenwerth-Uhl Jewelry Co., is in town, but will leave again Monday, for his territory. D. N. Furstenwerth and Sol Summerfield left this week for Texas.

U. E. Penney, manager of the watch department of the C. L. Norsworthy store at Dallas, Tex., left for Dallas after visiting friends here on his return from a trip to Chicago, New York and his old home in Boston.

J. Bolland, president of the J. Bolland Jewelry Co., is in the east for a stay of two weeks. Mrs. Bolland and the family, who have been spending the Summer at the eastern watering places, will probably return with him.

The R. Lowenstein Jewelry Co. moved this week from the Equitable building to the fourth floor of the Globe-Democrat building. Removal was necessitated by the fact that the Equitable building is to be remodeled.

An inventory of the estate of the late August Poos, Carondelet, who killed himself in his store last Spring after an altercation with his son, has been filed in the probate court. It shows that he left a personal estate of \$4,989.42, consisting mostly of jewelry.

Herman Mauch, F. W. Drosten, E. H. Kortkamp, Joseph M. Ebeling and E. C. Zerweck constitute a committee of the Retail Jewelers' Association of St. Louis to act with committees of other organizations in making the preparations for a "get-to-

gether" banquet, to be held during St. Louis Centennial Week, Oct. 3 to 9.

The sentence of Charles Vinton, a convicted diamond thief, who was given three years in the penitentiary by a jury in the Criminal Division of the Circuit, has been affirmed by the Supreme Court, but he has disappeared and his bondsman, Arthur Lancaster, is seeking him.

L. Oberting, of the Blankenmeister-Oberting Jewelry Co., has returned from a trip through Missouri, Iowa and Kansas, and will go out through Illinois next week. A. L. Blankenmeister came in from Kansas and Oklahoma, and is getting ready to leave for a trip through Missouri and the western States. George Oberting has come in from Arkansas.

E. J. Netzhammer, formerly with the Meyer Jewelry Co., Kansas City, has taken a position as foreman of the factory of the Maritz-Kober Jewelry Co. O. E. Mitchell, formerly of New York; Ray Gregory, formerly of the Eisenstadt Jewelry Co., St. Louis, and J. Fisher, formerly of San Francisco, have been added to the Maritz-Kober forces.

R. O. Bolt, manager of the Mermod, Jaccard & King Jewelry Co., will be the musical director of a chorus of 10,000 Sunday-school children at the religious demonstration to be held at the Coliseum on the afternoon of Sunday, Oct. 3, to inaugurate the festivities of Centennial Week. Rehearsals are now in progress under the direction of Mr. Bolt.

Miss Augusta B. Falkenhainer, of the F. W. Drosten Jewelry Co., will return Monday from a six weeks' western trip, on which she was accompanied by her mother. They visited the Seattle Exposition and San Francisco, Los Angeles, Salt Lake, Denver and other cities, and spent some time as the guests of Miss Falkenhainer's sister, Mrs. Walter Niedner, at Legrand, Ore.

George L. Weber, Jr., of the Weber Advertising Agency, has been appointed manager of Loftis Bros. & Co., Carleton building, to succeed J. F. Dailey, who resigned to remove to San Francisco, where he will take charge of a branch to be opened there by the Gately Co., of St. Louis, at which clothing and jewelry will be sold, and look after his mining interests in Nevada.

The cases of Sergeant Patrick Ward and Policeman Walter H. Strother, of the Soulard district, charged with neglect of duty and making a false statement, in connection with the recent robbery of the jewelry store of Gustav Scholl, at 1321 South Broadway, were called at Friday's meeting of the Board of Police Commissioners, but were continued at the request of Strother's attorney.

Out-of-town jewelers in St. Louis during the past week were: I. B. Morris, Perry, Mo.; H. Adolph, Ironton, Mo.; Edward Tetley, Farmington, Mo.; J. J. Gaffney, St. Jacobs, Ill.; George Petter, Hannibal, Mo.; J. C. Faulkner, Russellville, Ark.; E. E. Allen, Eldon, Mo.; Otto Rink, Carlyle, Ill.; A. S. Higbee, Roodhouse, Ill.; Charles Scanlin, Indianapolis, Ind.; R. M. Mothner, Beaumont, Tex.; Mr. Ross, of the Ross & Heyer Co., Ft. Worth, Tex.

E. E. Smith, president of Smith's Credit Jewelry Co., returned Wednesday from a trip in the Ozark Mountains of southwest-

NEW YORK

Missouri and northern Arkansas. He was accompanied on the trip by Mrs. Smith. He says the crops in the northern part of Kansas have been literally burned up by prolonged drought, which has been so severe that even large trees have died. On his return he immediately left on a business trip to Kansas City, and returned from there on Saturday.

The centennial of the incorporation of St. Louis will be celebrated the week beginning Oct. 3. The celebration will be on an extensive scale, with illuminations, pageants and a ball, and it is expected that great numbers will be attracted to the city from trade territory. Retail jewelers will have brilliant window displays in the expectation of attracting the attention of the buyers, and jobbers and manufacturers are bringing large numbers of out-of-town buyers, who will come to the celebration in order to replenish their stock.

The Niemyer Jewelry Co., Market Street, is one of the recent victims of "Jack-glass-Cutter," who has been doing considerable damage and baffling the police for the past eight months. The glass cutter is a man who has a mania for cutting expensive plate glass windows with a diamond. Yesterday night he damaged 15 windows in business places on Market St., between 4th and 18th Sts. The glass was slashed in all directions. In some places the glass was clear through, but in no instance was an attempt made to steal anything.

Newspaper dispatches from Montgomery, Mo., tell of the brilliant wedding there of Lee Vogt, of the Hess & Culbertson Jewelry Co., St. Louis, and Miss Grace Gupat, at the home of the bride's father, W. L. Patton, a leading Democratic politician of that State. The ceremony was performed by Rev. H. D. Thompson. The couple were recipients of many costly presents. The groom is the son of Albert Vogt, a prominent jeweler of Montgomery City. The bride has returned from their wedding trip and have gone to housekeeping in this city.

When F. J. Handy, of Chicago, won the Danile river Marathon of the Missouri Athletic Club, on Labor Day, for the third consecutive time, by beating all competitors in the swim from the Chain of Rocks to the Ellis Bridge, he became the owner of a magnificent \$1,000 solid silver trophy that was made by the Mermod, Jaccard & King Jewelry Co., and paid for by Adolphus F. Ech, of the St. Louis brewer. The cup is 2 feet high. The modeled figure of a diver surmounts it. At the base of the cup proper is a figure in relief in a swimming attitude. On the base are finely-wrought views of the river, bridge, and city. The cup was made four years ago, and was competed for in four annual events. The first year the winner was Goessling, of St. Louis. It had to be won three times in succession to become the property of a contestant.

The semi-annual "get together" dinner given by the Hess & Culbertson Jewelry Co. on Wednesday night, at the Mercantile Club, was notable from the fact that it was the first given since the firm expanded into the second largest jewelry store in town, at 7th and St. Charles sts. By reason of the numerous departments added at the new location, there were 14 heads of depart-

ments present who had not attended a previous dinner. President George J. Hess and Vice-President S. D. Culbertson made addresses of congratulation and encouragement. Rolla Hess, who returned recently from an extended European trip of business and pleasure, told of jewelry conditions in European centers. Secretary S. E. Bamber gave an address replete with practical suggestions for forwarding the business. Short, pointed talks were made by Leonard Woods, advertising manager, and others. Ideas were exchanged and plans laid for an aggressive business campaign during the coming winter.

Los Angeles.

A. Lubeck has moved to 310 S. Main St. G. F. Hambright, of Hambright & Walsh, has gone north for a business trip.

J. A. Van Buren has taken a position as salesman in the office of H. F. Wallace.

Mr. Fulton, of the Lewis Jewellers' Supply Co., Denver, Colo., is here taking a rest for a few weeks.

I. W. Birnbaum, of Birnbaum Bros., 457 S. Spring St., has returned from a visit to Lake Tahoe and vicinity.

George F. Feagans, of Brock & Feagans, has just returned from a business trip of several weeks in the east.

F. B. Howe, manager of the jewelry department in the "Fifth Street Store," is in New York on a buying trip.

George M. Williams, proprietor of the Geneva Watch & Optical Co., is home again from his trip through the east.

W. H. Homer, formerly assistant to Mr. Jehlinger, in Hamburger's store, has left this city and gone to San Francisco.

Out-of-town jewelers who have recently been here include: E. J. Pollock, of Pollock Bros., Riverside; E. W. Cosgrove, Colton.

J. Rosenkranz, formerly a jeweler in New York, has opened an office as manufacturer's agent in Room 817, 424 S. Broadway.

Sidney Vogel, representative of Lippman, Spier & Hahn, New York, has been here after spending two weeks on Catalina Island.

W. A. Wheeler, chief salesman with H. F. Wallace, is spending a week or two with his family at Camp Baldy, in the San Bernardino Mountains.

H. L. Dow, watchmaker, formerly with S. Nordlinger & Sons, who has been east for a few months past, has taken a position with Brock & Feagans.

Werner A. Schless, buyer for the jewelry department of the Broadway Department Store, has just returned from a two weeks' vacation at Catalina Island.

Walter Rohwetter, of the material department of the E. W. Reynolds Co., has gone to Tia Juana Hot Springs, Lower California, for a short vacation.

M. Marshall, San Luis Obispo, was here a few days ago to engage a watchmaker. He secured the services of Frank Frey, formerly in the employ of the Whitley Jewelry Co.

Ed. Peterson, now one of the only two jewelers west of the 3d St. tunnel, reports a very satisfactory increase in his business. Although he was absent personally for a week's vacation at Catalina during August,

it was the best he has yet experienced.

Monroe D. Montgomery, of Montgomery Bros., has returned from a sojourn spent at Pismo Beach, 200 miles north of here. John Bloom, of the same firm, is now in San Francisco.

Abel King, of Emrich, King & Schorsch, New York, is spending a short time here. He is taking a leisurely tour down the coast after having visited the Yellowstone Park and the Yosemite. He intends to visit the Grand Canyon of the Colorado after leaving here.

Beginning with this month the jewelers are again remaining open during Saturday afternoon. On Labor Day most of the retailers closed, while the wholesalers did not close. On Sept. 9, California Admission Day, most of the jewelry houses closed during the afternoon.

The E. Bloch Mercantile Co., San Francisco, has opened an office at 817 Broadway Central building, this city. A. S. Shaddow has been made manager. Miss Eileen Rozas, formerly with the company in San Francisco, will take charge of the office during Mr. Shaddow's absence.

S. B. Bailey has returned from a business trip to New York. Before his arrival home, his brother and others of his force reopened his store, at 353 S. Broadway, which was burned some weeks ago. The fixtures were not yet complete, but Mr. Bailey was tired of waiting and determined to reopen.

Albert Fink, of Albert Fink & Co., Broadway Central building, expects a man soon from Salt Lake City to take charge of his office, and thus enable Mr. Fink to go out on the road to visit customers. Mr. Fink reports himself to be more than satisfied with the business done by his firm since it was organized a few months ago. He has a suite of the most finely furnished jeweler's offices in the city.

Misfortune still seems to pursue I. E. Kring, who for some time had a jewelry store on W. 3d St., beyond the tunnel. His little store was visited by fire, then some of his stock was stolen. Later a team of horses ran away, and smashed in the front of his store, destroying some of the stock in the window. After that, he changed his location, and being called to serve on a grand jury he discontinued business for a short time. He then reopened at his home, near Echo Park. Recently his house was burned, and with it his tools and other property. He has now abandoned the jewelry business and has taken a position as salesman in 2 Main St. furniture store.

A distinct improvement has been made to the "Advance" collar button by the manufacturers, which, it is expected, will be appreciated by the trade and public alike. The post has been rendered nearly solid by swaging, and the lens-shaped head has been modified so that it can be inserted in the linen without injury to the fabric. The Advance Button Co. is now finishing its product entirely by burnishing; that is, leaving on the button all the gold that was originally in the stock. New machinery has recently been installed in the company's factory, at 36 Garnet St., Providence, R. I., which enables the concern to make these improvements and facilitates the handling of its constantly increasing business.

ON HAND AND TO ORDER
CHARLES M. PRIOR, Designer, 24-26 East 21st Street, New York

Indianapolis.

Charles B. Dyer, of Dyer Bros., has returned home after a two weeks' fishing trip to Werthington.

H. Reed, who is spending several days in Brown County, was in the city a few days last week.

Bert R. Gray and family have returned from Detroit, Mich., where they attended the Detroit State Fair.

Mrs. Bernloehr, of Chris. Bernloehr & Co., spent part of last week at Terre Haute on business for the company.

Joseph E. Reagan and family have returned after a visit of several weeks at Jackson, Mich., where they have a summer home.

Ferry M. Slaughter, who has been employed as watchmaker by Chris. Bernloehr & Co., has resigned and has gone to Union City to engage in the jewelry business himself.

Mr. and Mrs. Carl L. Rost have returned from a very interesting pleasure trip to northern Canada, in the vicinity of the best silver mines. They were about 400 miles north of Toronto.

Business men of South Bend have indicated Frank Toepp to become a candidate for the Mayoralty nomination, and political observers predict he will get the nomination without much opposition.

The recent marriage at Crawfordsville was of George J. Schuck and Miss Katherine Slattery. Mr. Schuck is in the jewelry business in Crawfordsville, having recently returned there from Delphos, O.

Thomas Ward, formerly with J. C. Ertel, was arrested recently for misappropriation of funds and released on bond, insisted on being locked up last week, in order to re-assure relatives of the responsibility of his actions.

The wholesale and retail jewelry business will be conducted by the Klein Bros. Co., which has been organized and incorporated in Muncie, with \$25,000 capital. George A. Edward, M. Klein and Charles A. Crop are members of the company.

Bertrique C. Miller, of the Baldwin-Miller Co., and daughter Marian, sailed from New York last week, for Europe, where they will join Mrs. Miller and son. Mr. Miller's son will return home immediately, while Mrs. Miller and Miss Miller will remain in Europe for some time.

The only watch company exhibiting at the Indiana State Fair, last week, was the South Bend Watch Co., which had an attractive display in the Fine Arts Building. No goods were sold, but spectators were much interested in the watch shown frozen in a cake of ice, as well as the numerous ornaments and cases on display.

A list published annually a local newspaper states that the following jewelers pay taxes on more than \$10,000 worth of property: Julius C. Walk & Son, \$25,310; Baldwin-Miller Co., \$25,000; Charles Mayer & Co., \$327,680; Chris. Bernloehr, \$15,460; Carl L. Rost, \$12,510; J. H. Reed, \$12,090; Charles Mayer, \$43,560; John A. Bernloehr, \$5,510, and Ferd. L. Mayer, \$11,500.

Local jewelers say the trade during the Indiana State Fair, last week, exceeded previous records. Among retail jewelers who came to the city were Mrs. B. Maier,

Edmund; W. J. Wallace, Morgantown; A. T. Nutter, Eminence; H. P. Tomner, Bloomington; H. Tabler, Waynetown; H. Vollmer, Princeton; A. B. Johnson, Sheridan; H. T. Coffin, Newcastle; G. C. DeCamp, Shirley; E. W. Kelly, Sullivan; E. O. Collins, Franklin; J. A. Pickett, Newcastle; A. S. Orr, Greenfield; John Kennard, Rushville; Aaron Pursel, Noblesville; E. C. Manahan, Gas City; C. W. Neal, Franklin; H. A. Roberts, Veedersburg; C. E. Hodgson, Kokomo; George W. Carrier, Eaton; August Anderson, North Salem; J. A. Miessen, Cicero; C. K. McCain, Kokomo; M. L. Kirkman, Pendleton; J. F. Kiser, Muncie; C. O. Reuschler, Center Point; A. W. Owen, Greenwood; Lew R. Roberts, Richmond; George Stone, Bedford; A. P. Woods, Russiaville; F. C. Sheldon, Shelbyville; J. A. Jeffries, Rushville; August Ellis, Bedford; J. W. Dell, Franklin, and George L. Spahr, Lebanon.

Milwaukee.

Jerome M. Lassner, representative of Arnstein Bros. & Co., New York, called upon Milwaukee friends, last week.

E. H. Warnke, president of E. H. Warnke & Co., recently made another enjoyable fishing excursion to Silver Lake, Wis.

Fred Osterwald, New York representative of the Bunde & Upmeyer Co., has returned to New York, after a few weeks spent at the Milwaukee establishment of the company.

Among the out-of-town jewelers who were Milwaukee visitors, last week, were William F. Notbohm, Oconomowoc; F. P. Beswick, Racine; J. B. Kimball, Waukesha, and J. M. Bostwick, Port Washington.

Oscar Watterich, who recently purchased the jewelry business of his father, A. Watterich, Oconto, Wis., will take charge within a short time. Several improvements, including the installation of a new plate glass front, are now being made at the jewelry establishment.

The regular monthly meeting of the Milwaukee Jewelers' Club, which was held in the nature of an outdoor banquet, at Blatz Park, on Sept. 8, was a great success. About 40 jewelers were in attendance and enjoyed the chicken dinner and participated in the informal discussion at the close of the banquet. The trip to Blatz Park was made by chartered steamer, which left the city early in the evening.

From a miller to a jeweler is the step recently taken by L. F. Smith, who in company with his nephew has purchased a store at Waterford, Wis., and is now conducting a successful business. For three years, Mr. Smith has been miller for the Charter Oak Mill, at Black River Falls, Wis., and when the opportunity came for him to engage in the jewelry business he did not hesitate, because of the fact that he has had considerable experience as a jeweler some years ago.

As a result of the finding of some especially fine pearls in Wisconsin streams this year, the pearl and clam-shell fishing industry has been taken up all over the southern portion of the State. Good clam shells are being disposed of at prices ranging from \$9 to \$12 per ton to the button manufacturers,

while now and then a valuable pearl is picked up, so that the industry is proving to be especially profitable. A pearl valued at \$7,000 is the largest find thus far this year, although several have been found valued at \$4,000 and \$2,000 each.

One of the most enjoyable local outings participated in this season was the recent picnic given by E. H. Warnke, president of E. H. Warnke & Co., manufacturing jewelers, to the employes of the concern. The gathering was held at Waukesha Beach and was attended by most of the 20 employes. A picture was taken of most of the force in their picnic-day attire and the satisfied expression of the group naturally followed after the big picnic "feed," which was furnished by Mr. Warnke. T. H. Miller, foreman of the E. H. Warnke & Co. establishment, was chairman of ceremonies at the picnic.

The Bunde & Upmeyer Co. recently secured a handsome pink pearl weighing 35 grains. It is valued at \$7,000, although Louis W. Bunde, president of the Bunde & Upmeyer Co., says that he would be loath to part with it at that price. The gem is a Wisconsin pearl and was found in the Mississippi River, near Prairie du Chien, by a professional pear fisher. "The pearl is the most wonderful pink pearl ever found anywhere," said Louis W. Bunde. "It is the choicest, most perfectly round and finest specimen that I have ever seen. In fact, I have never seen a duplicate and I have had 22 years of experience with fresh water pearls."

Toledo.

W. F. Broer, of the Merrill & Broer Co., has just returned from a three weeks' vacation, which was spent at Wapmer's Lake, in Michigan.

By the association of Charles Kapp and William Wolcott into a company to be known as the Wolcott-Kapp Co., two of the oldest jewelers in Toledo will hereafter head a new jewelry firm in Toledo. The company will be incorporated and the business will be conducted at 318 Summit St., where Mr. Wolcott has been doing business for many years. Mr. Wolcott has been actively engaged in the jewelry business in this city for the past 30 years, and Charles Kapp has been employed in the store of J. George Kapp for the past quarter of a century. Mr. Kapp, this week, began his new business relations, and changes are being made in the Wolcott business as rapidly as possible. All stock carried and marked by Mr. Wolcott will be replaced by a new stock carrying the trade name of the new concern. Although Mr. Wolcott will continue to be the head of the firm for the present, it is his intention to gradually allow the junior members of the company to assume the burden of the business.

When Walter Kuhlman, a member of the firm of Kuhlman Bros., manufacturing jewelers, Des Moines, Ia., returned, recently, from his marriage at Indianola to Miss Edna Cissel, he was taken from the street car on which he and his wife were riding to the home of his father by members of the Capital Park football team, while his bride was left to continue her journey alone.

Kansas City.

L. B. Bailey is a new watchmaker with R. L. Warner.

S. J. Huey, Excelsior Springs, Mo., was here last week.

J. R. Mercer and wife returned last week from a trip to Canada.

Noble R. Fuller, of the Edwards & Sloane Jewelry Co., has returned from a trip to Canada.

C. L. Dockhorn, Oskaloosa, Kas., was in this city last week on his way to South Dakota.

C. M. Kraemer, with J. R. Mercer, leaves next week for his vacation, which will be spent in Iowa.

Leslie White, with D. B. Ward & Co., was in this city last week, and left for his territory again.

J. W. Brown, with D. B. Ward & Co., left for his territory Wednesday, with an outfit of trunks.

Irving Park, a former resident of this city, but now of Big Springs, Tex., was here several days of this week.

Ivan W. Hershey, Lancaster, Pa., has taken a position in the engraving department of the Porter & Wiser Jewelry Co.

H. M. McFadden, Rogers, Ark., has discontinued business at that point and gone to York, Neb., where he takes a position with C. A. Davis.

L. Meyer, president of the Meyer Jewelry Co., has been enjoying a visit from his brother, E. B. Meyer, formerly engaged in the jewelry business in Memphis, Tenn.

G. Hallauer, a watchmaker to the trade, who has been located in the Keith & Perry Building, is about to move to Portland, Ore., having sold out his Kansas City property.

W. G. Fry, of the firm of Fry & Alston, De Queen, Ark., and also Mayor of that city, has been in the market this week, and reports his town on a veritable boom, property having generally doubled in value within the last six months.

Ben W. Warner, of Widber & Warner, and R. L. Warner, a jeweler of the Missouri Building, are interested in the real estate business, in a way, now developing Warner's new addition to Noel, Mo. This town is in the fishing country of Missouri, in the southwest corner.

J. H. Whitney, representative of the Edwards & Sloane Jewelry Co., was in the office last week, and when starting out on the road again lost his grip at the Union Depot. It contained his personal effects and some jewelry. The grip is reported by the police as having been located.

D. Goodin, McKinney, Tex., is celebrating his 51st anniversary in the jewelry business, which makes him one of the oldest, if not the oldest, jeweler in the State of Texas. To celebrate the occasion, he is giving a birthstone to every customer whose birthday happens to come in this month. His business slogan is, "If you buy it from Goodin it's good indeed."

The following jewelers called on the trade during the past week: A. J. Dutton, Plainview, Tex.; Mr. Potts, of the Potts Jewelry Co., Marcelline, Mo.; Carl Ricker, Emporia, Kas.; G. W. Hardway, of Hardway & Williams, Fort Smith, Ark.; L. F. Garnett, Chanute, Kas.; Walter Starcke and wife,

Junction City, Kas.; J. O. Van Voorhies, Osawatomie, Kas.; J. R. Cullumber, Eldon, Mo.; W. T. Brown, Sterling, Kas.; J. T. Morrison, Olathe, Kas.; J. H. Whiteside, Liberty, Mo.; Mr. Miesch, Muskogee, Okla.; R. R. Smithers, Cameron, Mo.; L. E. De Lanty, Parkville, Mo.

Omaha.

Joseph Frenzer has returned from a fishing trip in Wisconsin.

G. F. Peterson has started out through the State for the Sol Bergman Jewelry Co.

J. C. Mudd, Merriman, Nebr., was recently in this city looking up a course in optics.

W. H. Wiker, who is a jeweler at Spalding, Nebr., has been in the city lately looking over Fall goods.

L. P. Watt, watchmaker for Gustafsen & Hendrickson, has returned from a trip to his home, at Stephen, Nebr.

Harry Ryan, son of Mr. Ryan, Mawhinney & Ryan Co., has returned from a month's outing in Wyoming.

J. C. Grassborg, watchmaker with A. Mandlberg, has been away for three or four days on account of illness.

Marion D. Franks expected to be able to move into his new store at 1619 Farnam St. Sept. 15, but is now delayed until Oct. 1.

Mr. and Mrs. George Hastings have been here during the past week. Mr. Hastings is in the jewelry business at Arcadia, Nebr.

Albert Edholm has returned from Evanston, Wyo., where he has been for the past two weeks with his brother, who is a jeweler.

Jacob L. Jacobson is advertising his removal to the top floor of the Douglas Block, which is at the southeast corner of 16th and Dodge Sts. Mr. Jacobson will move about Sept. 16.

The wife of H. C. Damm, watchmaker for Fred Brodegaard & Co., has undergone a serious operation at the M. E. Hospital. The latest reports are that Mrs. Damm is well on the way to recovery.

Mr. Clay, who has been with the C. B. Brown Co., as watchmaker and engraver, has resigned to take up his father's business at Long Pine, Nebr. Mr. Clay's father has recently secured a claim on the Rosebud Indian reservation and is going there to settle. Mr. Clay is succeeded by M. C. Wheeler, who comes from the west and was formerly in Omaha with the Mawhinney & Ryan Co.

Albert Edholm recently completed extensive improvements in his store. In his diamond room Mr. Edholm has installed an elaborate diamond case, which is fastened to the wall, the bottom being about three feet from the floor. The case is of mahogany and matches the other store fixtures, with a plate glass front fashioned in a raising door. The back of the case is black plush and the interior is lighted by concealed electric lights. The case is to be used to display large diamond and pearl pieces, together with other large jewelry pieces. On the opposite side of the store Mr. Edholm has enclosed the display window. The sliding windows are of plate glass tops, with mirrors at the bottom. The window is lighted with tungsten lamps, which makes the whole very attractive.

Minneapolis and St. Paul.

W. C. Weld, of Weld & Sons, Minneapolis, is in New York on a business trip.

W. A. Lawhead, with J. B. Hudson & Son Minneapolis, is visiting Chicago, this week.

L. Metzger, of S. Jacobs & Co., Minneapolis, is on a business trip to New York.

E. C. Bennett is now working as watchmaker for the Barker Jewelry Co., 1317 Washington Ave. N., Minneapolis.

J. J. Skaug, Minot, N. Dak., has secured quarters at 2404 Central Ave., Minneapolis and will open a jewelry store there at once.

William A. Sorenson, 239 Twentieth Ave. Minneapolis, has been on a visit to the Alaska-Yukon-Pacific Exposition, at Seattle.

Thomas Catherwood, a former retailer in Park River, N. Dak., is arranging to re-engage in business there, and was in the Twin Cities buying his opening stock, recently.

J. B. Hudson, of J. B. Hudson & Son Minneapolis, who recently returned from a trip abroad, made extensive purchases of black pearls, and his collection is said to be among the largest in the country.

A party of hunters, four jewelers, left Sept. 10, for a week's outing at Lake Traverse, near Wheaton, Minn., in quest of prairie chickens and ducks. The party was composed of C. M. Thomsen, of the Birkenhauer-Thomsen Co.; Will Olin with Charles Olson & Co.; Walter Ball, with the Jacobs Jewelry Co., and P. Nordland, jeweler for the Powers Mercantile Co., all of Minneapolis.

A. M. Anderson, who makes his home in Minneapolis, and travels in the far west with a line of jewelry, which he sells in the lumber and mining camps, was a passenger on the ill-fated steamer *Ohio*, which foundered on the way to Alaska from Seattle. Mr. Anderson's trunks, containing goods worth \$15,000, went down, and he remained at the point of landing from the vessel for three days, while waiting the coming of a diver with outfit to recover the goods.

The Minnesota State Fair, which was held last week, brought in fewer country dealers than usual. Some of the railroads made reduced rates to the fair, but others refused, on the ground that the two-cent a mile rate established by law was as low as they could afford. The difference in the cost of a railroad ticket is not sufficient in many cases to induce a retailer to come to the cities now, when conditions make it preferable for him to defer his trip until a little later in the Fall. Generally speaking, conditions are reported very promising for a good Fall and Winter trade. Among the jewelers who were in the cities were H. L. Jewett, Rhinelander, Wis.; O. Holmes, Cambridge, Minn.; A. L. Mealey, De'ano, Minn.; J. L. Williams, Zumbrota, Minn.; J. A. La Croft, Plainview, Minn.; H. J. Heram, Elbow Lake, Minn.; F. H. Boehrer, Durand, Wis.; Mr. Jarrett, of Jarrett & Co., Colman, S. Dak.; William Weber, of the Weber Jewelry & Music Co., St. Cloud, Minn.; John S. Nelson, Toronto, S. Dak.; Mr. Arveson, Bird Island, Minn.; M. Hendrickson, of the Hendrickson Jewelry Co., Duluth, Minn.; W. W. Winchester, Amery, Wis., and L. B. Woodward, Bismarck, N. Dak.

San Francisco.

Wetherby, of Shreve & Co., leaves for the east, this week, on a business trip. Schuman has located in the Robinson building, on Grant Ave., near Market St.

Watchmaking establishment has just opened at 717 Market St. by Paul Mon.

Sanders, employed by Chas. Haas & Stockton, was in San Francisco, recently, on a pleasure trip.

W. Storer, jeweler and watchmaker, secured a lease on a store at 727 Market St., and will vacate the present store at 9 Grant Ave., Sept. 15.

W. Lowry, formerly in business in Angeles, has disposed of his interests and is now in this city with the intention of opening a store as soon as a suitable location can be found.

R. Claxton, importer and dealer in fine jewelry, has moved from Van Ness and is now settled in his new quarters on an upper floor of the Hirsch & Co. building, 220 Post St.

A. R. Vieira, Honolulu, H. I., was a visitor here, recently, and placed large orders for holiday goods. He will visit the Alaska-Yukon-Pacific Exposition at Seattle before returning to the Island capital.

F. Armstrong, who preceded John Mon as representative of Bippart, Griswold & Osborn in the west, has been heard of in Washington, D. C., where he has purchased an interest in a jewelry concern. Among the out-of-town jewelers here during the past week were: Y. H. Bouillon, Hinford, Cal.; John Hood, Santa Ana; V. E. La Porte, Redding; Ernest C. Keller, Eureka; C. J. Noack, Sacramento; J. Wilson, Dunsmuir, and L. Feibush, Portland.

Joseph Nordman, of Nordman Bros. Co., about a week ago, on a short vacation, planned when he left to be back in about two weeks. Leo Aurich is also away on a short stay, and has been spending his time in the Lake Tahoe district, accompanied by Mrs. Aurich.

Olef Bradlie, who was arrested recently in this city at the instance of Steffens Bros., on a charge of stealing a watch from his store, at 2158 Mission St., while in their employ, is still in the city jail and is expected to be released on bail, although the bail is but \$50. He states that his former employes are in the wrong, and desires that he will institute proceedings against them.

Pacific Coast Notes.

George W. Weber & Son, Longbeach, Cal., have removed from 128 W. 2d St. to 100 W. 1st St.

Mrs. Herman Hall, of the Chicago Art Academy, recently held an exhibit of ancient jewelry at Long Beach, Cal.

R. Van Buren, Ontario, Cal., has taken a five years' lease on a store at 130 N. Elid Ave., and will move there at once.

G. W. Phelon, who resides at 42d Street, Fruitville, Cal., was knocked down by an automobile in Oakland, recently, and suffered painful but not serious injuries.

D. C. Hobart, formerly located at 709

Oregon Ave., Sawtelle, Cal., has moved to new quarters, at 451 Oregon Ave., and is prepared to do all kinds of lapidary work.

A. Brunner, formerly with Mrs. H. A. Chambers, Santa Barbara, Cal., has opened a store of his own at 628½ State St., in that city, in the place formerly occupied by Fred W. Yates.

James E. Russell recently opened a new store in the Kruckman building, at Chino, Cal. Mr. Russell had been in the jewelry business for about 30 years, but recently has been trying ranch life.

Pacific Northwest.

R. A. Moore, Santa Barbara, Cal., has gone to Klamath Falls, Ore., and, with J. C. Tipton, will open a jewelry establishment there.

Ackenhausen & Co., 214 Kakima Ave., East North Yakima, Wash., have opened their new store under the name of "Original Idea Jewelers."

J. P. Arnolds, Santa Cruz, Cal., has moved to Merrill, Ore., where he has opened a store. A temporary location is used at the present time.

Lloyd Black, who has been in the employ of George Carpenter's store, Dayton, Wash., for some time, has bought out the business of E. L. Gard, at that place.

Columbus, O.

Adam Uhrig, Gallipolis, bankrupt jeweler, mentions about 300 creditors in his schedule of liabilities, filed in the United States court here. About 200 of them are preferred. Among the principal creditors are the Point Pleasant Trust Co., Point Pleasant, W. Va., and the Ohio Valley Bank Co., Gallipolis, both of whom he owes on notes.

George Thomas Hamilton—just plain Edward Hamilton now—who was arrested in Columbus week before last on suspicion of having fleeced a Knightstown (Ind.) bank, but who said his arrest was a case of mistaken identity, claiming he was a wealthy landowner and a stockholder in an eastern silverware manufacturing company, has issued a statement in which he practically admits his guilt. The statement is a very voluminous one, in which Hamilton attributes his downfall to the too free indulgence in fine wines. As he is still in jail in default of \$1,000 bond, it is not very likely there is much in his claim made to his wife that he was worth about \$700,000.

New Orleans, La.

A. J. Palfrey, of A. B. Griswold & Co., is on a month's tour of the eastern jewelry centers and had been visiting the principal manufacturers.

Coleman E. Adler is now becoming settled in his beautiful new building at 722-724 Canal St., which is between St. Charles and Carondelet Sts., where Mr. Adler has not only increased facilities, but in addition expects to add a number of new departments.

D. A. Boardman, a local clam fisher of Red Wing, Minn., recently secured two pearls in the Vermillion river, weighing respectively 72 grains and 42 grains.

Buffalo, N. Y.

Freedman Bros., wholesale jewelers, are now settled in their new quarters, 128 Franklin St.

Charles F. Heintz, of Heintz Bros., ring manufacturers, was recently chosen as a director of the Buffalo Orpheus Singing Society.

John Galloway, Jamestown, N. Y., recently bought the large brick factory building of the Linford Cut Glass Co., the purchase price being \$10,000. The glass plant has been closed for several years. Mr. Galloway refused to state his plans in reference to the use of the building.

Hugh Dolan, who has a jewelry store at 83 Seneca St., complained to the police recently that when he awoke in his home, 305 Niagara St., he was minus jewelry valued at \$1,000. Dolan thinks that the robbery was committed late at night or early in the morning. Among the articles missing is a diamond stud worth about \$400. A window was found unfastened in the rear of the house.

Among the jewelers who recently visited the local jewelry market were: C. D. Barnes, Gowanda, N. Y.; J. J. Borne, Titusville, Pa.; D. G. Erdle, Cherry Creek, N. Y.; I. Traub, Niagara Falls, N. Y.; F. W. Woodward, Cattaraugus, N. Y.; E. C. Saks, Mansfield, Pa.; A. Katzenmeyer, Burgettstown, Pa.; F. D. Kelsey, East Aurora, N. Y.; C. F. Hurd, Medina, N. Y., and W. H. Fuller, Silver Creek, N. Y.

At the Erie County Fair, recently held at Hamburg, N. Y., the local jewelry firm of Yung & Debus was represented among the concessionaires. In a tastefully decorated booth, eight feet square, they featured a beautiful line of imported enameled jewelry. This concern will have a similar exhibit at the New York State Fair, Syracuse, N. Y., and the Genesee County Fair, Batavia, N. Y., both to be held during the present month. Among other jewelers who were concessionaires at the Erie County Fair were Dana G. Morse and Mr. Pomery, Brooklyn, N. Y., and Mark Baker, Celeron, N. Y.

According to a report from Batavia, N. Y., Lottie Fisher, of Buffalo, under arrest in Batavia, recently made a statement at the Genesee County jail to Thomas P. Brophy, Fire Marshal of Brooklyn, in which she declared that two men named Bevac and Schultz were implicated with her in the alleged diamond robbery, for which she was arrested on the 14th of last August. The alleged robbery occurred in the jewelry store of Charles Bradley & Co. Bevac and Schultz claimed to be detectives. They were arrested in Batavia at the time of the robbery, but afterward discharged, as Miss Fisher would then say nothing that would implicate them. Brophy went to Batavia to investigate the record of the men.

Burglars, a short time ago, broke into the store of B. S. Polskee, Memphis, Tenn., and stole a tray of gold stick pins and other stock.

M. D. Jamerson has purchased the stock of G. S. Garbutt, Sandersville, Ga. E. S. Scarborough will have charge of the jewelry department. Mr. Scarborough was formerly in the employ of Mr. Garbutt.

WE beg to advise the
trade that we have
not advanced the prices
of movements on our lists
of February 1st

Illinois Watch Company

SPRINGFIELD

Canada Notes.

...store of P. F. Woolhouse, Saskatoon, ... was destroyed by fire, Wednesday.

... Joseph Stanley, Toronto, Ont., has given a chattel mortgage for \$672 to J. Stanley.

... A. St. John, Portage la Prairie, Man., sold his business to McLelland & Wood.

... H. House, Sault Ste. Marie, Ont., given a chattel mortgage to G. W. Ke, for \$3,000.

... A. Gledhill, Fort Frances, has given chattel mortgage to J. C. Scott, for \$2,700, J. C. Scott has given a bill of sale to A. Gledhill, for \$3,790.

... Henry Birks & Sons, Montreal, have leased outright for the sum of \$29,000 Winnipeg Young Men's Christian Assn building on Portage Ave. This has already a fine store on Main St., W. M. Birks, who has just returned Montreal from a business trip through northwest, foresees that trade is tending along Portage Ave., hence the purchase of the Y. M. C. A. building. It forms a corner lot, having a frontage on Portage of 88 feet and a depth of 130 feet. The building will be immediately remodelled to suit the requirements of its present use, but as the purchase was only completed on Friday afternoon no definite plans have yet been drawn up.

... magnificent specimen of Canadian work presented to Lord Charles Beresford on occasion of his visit to the Canadian National Exhibition at Toronto. The naming Mfg. Co., Montreal, designed and manufactured a large decanter with silver deposit. On one side the name of the recipient is engraved, while his coat of arms was beautifully worked on the other. W. Hemming and W. H. Miller, of silver deposit department, went up from Montreal especially to make the presentation. The firm had a large exhibit at the exhibition, and it was during his inspection that opportunity was taken to present Lord Charles a sample of what the Canadian workman can accomplish in artistic work.

... Action has been entered in the Montreal Superior Court by Wilfrid Noel against Madame la Comtesse de Boishebert Castellan-Tilly, Marquise de Blaru, who is a resident of Windsor Mills. The case is a sequel to a famous jewelry affair. The Marchioness of Blaru was the owner of a magnificent collection of antique jewels, which she offered to any institution sending her the sum of \$100,000. Mr. Noel acted for her as a kind of advertising and business manager. But in May last the marchioness had her former employe arrested on a charge that he refused to return certain valuable documents which she said he had received in his capacity as manager for her. The accusation was never investigated in court, and the action is dismissed by default. It is on account of this arrest that Mr. Noel has entered a suit against the marchioness, claiming \$5,000 compensation.

... The Canadian National Exhibition, which opened here, Aug. 30, lasting for two weeks, broke all records, both in point of attendance and as regards the general ex-

cellence of the display. The principal jewelry exhibit was that of Ryrie Bros., Ltd., Toronto, which included jewelry and precious stones to the value of \$150,000. The display embraced a single strand of pearls valued at \$10,500; a single emerald tie pin of rare quality, worth \$2,400; a single strand diamond necklace, valued at \$5,400; diamond festooned necklet, \$2,350; and a black diamond ring, very rare, \$675, with a great variety of other designs in costly gems. Diamond sautoirs in the form of necklets and pendants, a much admired Parisian novelty, were shown. There was also a fine display of sterling silverware, including a five-piece tea set and tray, priced at \$1,385, and some rare sets in silver plated with gold. Ambrose Kent & Sons, Ltd., Toronto, Ont., who usually have a fine display, did not exhibit this year, being too busily engaged with arranging for their large new building.

... Among the jewelers visiting Toronto, Ont., during Exhibition time were: F. R. Clark, Peterborough; J. A. Vandewater, Yarker; H. E. Prince, Dutton; Charles Wendt, Mildmay; Henry Wendt, Clifford; C. R. Grill, Hespeler; S. Azerck, Lakefield; G. S. Edmonds and F. Evans, Alliston; F. A. Rayner, Palmerston; W. F. Tate, North Bay; E. Pequegnat and W. H. Roberts, Stratford; E. Ashley, Kingston; T. B. Philips, Smith's Falls; S. Hadley, Frankford; G. D. Pringle, Guelph; J. Boehmer, Berlin; G. F. Counter, Simcoe; W. J. Chambers, Coldwater; A. E. Thornhill, Hamilton; A. H. Smith, Tilbury; I. Wurster, Preston; W. Cox, Paris; A. W. Smith, Merlin; W. Williams, Barrie; J. House, Welland; W. H. Hopper, Cobourg; C. R. Sumner, London; R. F. Dale, Hariston, and J. B. Strathearn, Sault Ste. Marie—all Ontario; S. Sherman and M. Vineburg, Montreal; E. V. Cantin, Quebec City, and F. Blackman, Fredericton, N. B.

... A magnificent trophy donated by Alderman Thomas Foster, Toronto, competed for at the International Marathon race, held in connection with the Canadian National Exhibition, Sept. 11, is displayed at the store of Edmund Scheuer, Yonge St., Toronto, Ont., by whom it was furnished, and attracts much attention. It is nearly five feet high and 18 inches in width, in Queen Anne style, with the characteristic Queen Anne flute shown prominently on the base and in the cap on the cover. The handles are mounted with a beaver on each, and maple leaves hanging down. The center of the body is highly embossed with the coat of arms of the Canadian National Exhibition surmounted with a wreath bearing the legend, "Foster's International Marathon," in high relief. A line of maple leaves is embossed on the neck of the cover, and a duplicate band of the same is embossed around the bolster or midway between the bowl and the foot. The beading around the base of the cup and at the top of the bowl is the English reed and ribbon border. The cup stands on an ebonyed base, with festoons of maple leaves, and in the center of the base a silver car touch is applied. The whole is surmounted with a winged figure of victory bearing a laurel wreath, and the base displays two Marathon runners in the attitude of starting.

Connecticut.

... Wm. H. Dunbar, Bristol, has just returned home from a pleasure trip to Woodmont.

... J. H. Scott has opened a watch and jewelry repairing shop at 963 State St., New Haven. He also carries a line of jewelry.

... Levi Ives Lake, assistant manager of the Waltham Watch Co.'s Chicago office, accompanied by his wife, recently visited his old home in New Haven. Mr. Lake has been with the Waltham Co. for the past 27 years.

... A laudatory tribute was paid recently to the memory of the late William L. Gilbert and Mrs. Gilbert, by the Rev. Dr. W. R. Webster, of Boston. Mr. Gilbert was founder of the Wm. L. Gilbert Clock Co., at Winsted.

... Lee Roberts, a jeweler and president of the Bristol Business Men's Association, has received an inquiry from a New York attorney, who asks information regarding a factory site for a concern that wants to employ 600 girls and 400 men and is ready to build at once.

... A quantity of jewelry valued at about \$100, belonging to Isaac Stillman, 176 Green St., Albany, N. Y., was recently identified and recovered from Sol. and Abe. Gordon, in New Haven. Both men, who are brothers, have been bound over to the Supreme Court to answer two charges of burglary.

... Work has just been completed at the factory, in Bridgeport, of the E. H. H. Smith Silver Co., on the largest order for flat ware which the concern has ever received from an individual patron. It consists of 40,000 pieces of table silverware for Murray's Roman Gardens, the new restaurant in New York. The first shipment of 5,295 pieces left the factory recently, and the balance of the order will be shipped some time.

... Through the help of the police department of Waterbury the New Haven detective bureau members, Sergeants Dailey and Ward, located and arrested, recently, John Jessup, a young man who has been wanted in New Haven for embezzlement by agent. Jessup has been wanted for two years past and the charge against him is that at that time while working for John I. Smith, a jeweler in Grand Ave., Fair Haven, he took a pair of diamond earrings to sell and disappeared with the earrings. The local police were informed of the case, but they were unable to get trace of Jessup. A couple of weeks ago he appeared in New Haven, but when the police got after him he had disappeared. He was traced to Waterbury, but when Sergeants Dailey and Ward went there he had left that city. Through Lieutenant Dodge, of the Waterbury police, he was located in Thomaston and finally he was placed under arrest by Constable Frank C. Barnes and brought to Waterbury. Dailey went to Waterbury and brought the young man back. Besides being wanted for embezzlement by agent, Jessup is wanted in Philadelphia, where there is a count of larceny by bailee of \$185. Jessup was a watchmaker by trade. He went to Waterbury from New Haven and secured a position in a Thomaston factory, where he was arrested. This week.

Providence.

TRADE CONDITIONS.

There has been a marked improvement in the general trade conditions in this city and vicinity as regards the manufacturing jewelry industry during the past week. One of the best evidences of this is the largely increased number of advertisements in the daily papers for help wanted. In one issue there were calls from no less than 19 firms, while a general call was made by the employment bureau connected with the New England Manufacturing Jewelers and Silversmiths' Association. The general opinion at present seems to indicate an unusually good Fall and holiday season.

George W. Dover was a guest at Narragansett Pier, the past week.

Charles Gaudette, Pawtucket, was in Boston, last week, on a business trip.

The Standard Die Sinking Co. has started in business at 25 Calender St.

Mr. and Mrs. J. R. Doolittle are at Washington, D. C., for a visit of several days.

Philip Wunderle has been drawn for petit jury duty by the Cranston Town Council.

Frank P. Baker, Lancaster, Pa., was a recent visitor among the manufactories in this city.

Mr. and Mrs. Nelson S. Davis have returned from a Summer at Barbour's Heights.

Horace F. Carpenter left early, the past week on a vacation trip through the south and southwest.

Sam H. Brower, representing E. L. Spencer & Co., of this city, was in San Francisco, last week.

Joseph Brindamour has opened a jewelry and repairing shop in the Bouchard block, Arctic Centre.

Arthur E. Smith & Co., New Ray block, Woonsocket, have been making a successful special sale on clocks.

Charles W. Grube and wife have given a mortgage of \$125 to Theresa A. Fanning on three lots at Riverside.

Dexter B. Potter, trustee of the Edgar L. Logee estate, has returned from a several months' tour of Europe.

Mr. and Mrs. Theodore W. Foster returned, early in the week, from an automobile trip to Bennington, Vt.

Jacob Bartman has leased the premises occupied by him at 675 Westminster St., corner of Stewart, for three years.

G. Rodenberg, of Dunn & Rodenberg, of this city, was a caller upon the firm's customers in Chicago, the past week.

Thomas E. Bennett is improving after an attack of rheumatism, from which he has been suffering for a long time.

James E. P. Pender, of this city, assignor to the Gorham Mfg. Co., has been granted a patent on a cigarette case.

Among the recent callers upon the trade in Chicago was E. L. White, representing the George L. Vose Mfg. Co., of this city.

Mr. and Mrs. Harry Cutler have returned from a month's stay at the Heath cottage, Conimicut, on Narragansett Bay.

William L. Mauran was one of the end of the season guests at Narragansett Pier, having registered, Wednesday, at Greene's Inn.

William C. Codman, of this city, and assignor to the Gorham Mfg. Co., has been awarded a patent on a tray, or similar article.

Edwin A. Bush, general manager of the Charles S. Bush Co., was in New York, the past week, on business for that concern.

The E. A. Bliss Co., Meriden, Conn., has been advertising in the local newspapers for engravers on German silver and brass work.

Permission has been granted the American Emery Wheel Works to erect an addition to its brick factory building on Pitman St.

William A. Schofield has closed his Summer cottage at Buttonwoods for the season and returned to his home in this city the past week.

Mrs. W. H. Gudgeon and Miss Florence Marriot were in this city, last Thursday, in the interests of the E. N. Denison Co., Westerly.

William Bosselman has been sending home some good orders to T. Quayle & Co. as a result of his recent visit to the trade in Chicago.

Frank W. Collom called upon the trade in Chicago, last week, in the interests of Sulzberger Bros., of this city, with satisfactory results.

W. Louis Frost's crack yacht *Medric II.* won the Possner cup in Class P at the regatta of the Edgewood Yacht Club, Monday afternoon.

Little & Co., toolmakers and die-sinkers, have removed from 59 Page St. to larger and more commodious quarters at 150 Chestnut St.

John P. Mullally, Indianapolis, Ind., accompanied by his wife, was a visitor in this city for several days during a recent trip through the east.

The postponed mortgagee's sale of the plant of the United Brush Co., Main and Carver Sts., Pawtucket, will be held, Sept. 16, at 12 o'clock.

Mr. Goldberg, of the J. J. White Mfg. Co., of this city, has been looking after the interests of his firm in Chicago since the first of the month.

William A. Schofield has purchased from Everett I. Rogers the undivided half of the land and improvements at Buttonwoods Beach, in Warwick.

Mr. and Mrs. C. P. Darling are starting, this week, for an extended stay in the south. They will motor in their new touring car through to Texas.

Mr. and Mrs. William Armour and a party of friends are taking an extended trip in the former's touring car through the White Mountains and Maine.

William Williams, of Williams & Payton, of this city, was at the firm's New York office, last week, and called upon several of the customers of the concern.

Paul Shocker, for several years in the stone and pearl setting business, has started in the manufacturing business at 19 Calender St. as the Paul Shocker Comb Co.

William P. Chapin, Jr., has taken up automobiling, and during the past week has had registered at the State Board of Public Roads a new 37-h.p. Pierce runabout.

Frank T. Pearce, who was accompanied by his wife and sister, has returned from a several weeks' vacation spent at Green Lake, Me., where he had considerable enjoyment fishing.

The request of Margaret S. Darling to be

appointed administratrix of the estate of George E. Darling has been filed with the Municipal Court and referred to Sept. 23 for consideration.

The business of the late George E. Darling will be continued at 21 Eddy St. under the management of Joel J. Pincus, who has been associated with Mr. Darling for the past 10 years.

The contract has been awarded to raise the roof and place an additional story, 153 by 85 feet, on one of the buildings and to build a retaining wall at the plant of the Brown & Sharpe Mfg. Co.

E. A. Eddy has returned from Hartsfield, S. C., where he has been in the interests of the E. A. Eddy Machine Co., purchasing the entire plant of the Eastern Carolina Silver Co., of that place.

Charles H. Smart has brought suit in the Superior Court against John Nelson on three promissory notes of \$695, \$100 and \$175, respectively. The *ad damnum* is placed in the amount of \$5,000.

Robert Budlong, New York representative of the S. K. Merrill Co., of this city, while the guest of his parents, in East Providence, the past week, was a frequent visitor to the firm's factory here.

Isaac Lawton, formerly a jewelry jobber, of this city, supplied the committee in charge of the poor children's excursion from Pawtucket, last week, with 600 lollipops for distribution among the excursionists.

William G. Lawton, son of Secretary John F. P. Lawton, of the Gorham Mfg. Co., and himself an employe of that corporation, has been nominated by the Prohibition party of Rhode Island for general Treasurer.

Arthur W. Dennis, who is financially interested in one of the largest manufacturing jewelry establishments in Attleboro, has announced his willingness to accept the nomination as Lieutenant-Governor of Rhode Island.

Florence E. Manchester, wife of William H. Manchester, has purchased the land and improvements at Buttonwoods Beach, where they have been spending the Summer this year, and will make it a permanent country resort.

John H. Mather, Chicago representative of the George H. Fuller & Son Co., Pawtucket, has returned from a three months' European trip and taken up his duties on the western circuit after a few days' visit to the factory.

Sigmund Fischer & Co., manufacturers of jewelers' specialties and findings, have removed from 102 Friendship St. to 100 Stewart St., where the firm will have considerably larger quarters, more adapted to its rapidly increasing business.

The manufacturing jewelry firm of Tucker & Norton has been dissolved by mutual consent, George W. Tucker retiring. The business will be continued at 86 Page St. by the remaining partner, C. Rufus Norton, under the firm style of C. R. Norton & Co.

Notice has been given by J. Fred Parker, Secretary of State, that the Chelsea Clock Co., of Boston, has registered a trademark in this State which is intended to be applied to all time-keeping and time recording instruments. The essential feature of

trade-mark and form of advertisement consists in the arbitrary use of the word 'helsea'."

Mr and Mrs. Everett I. Rogers and Morgan W. Rogers, of this city, and a party of friends left Jackson, N. H., on Wednesday last, in their automobile en route to their home here. They journeyed through the White Mountains and the Berkshires and arrived here on Sunday.

A. S. Vernerbeck, of the Vernerbeck & Case Co., who held the State golf championship, was defeated, Thursday afternoon, in the championship contests at the links of the Agawam Hunt Club, East Providence. John Shepard, Jr., was defeated or lasting till the semi-finals.

Mayor Henry Fletcher was one of the guests of honor at the banquet tendered by the officers of the Italian cruiser *Etruria* at the Narragansett Hotel, last Monday evening, in the presence of the Italian societies of Rhode Island. Among the other guests were William H. Fisher, William A. Schofield, John Kelson, George H. Grant, John F. O'Connell and Mrs. P. Sullivan.

Among the wardens and clerks to act as publican caucus officers, this Fall, the following have been named: Barnett S. Under, clerk, 1st District 3rd Ward; Charles H. Holt, Jr., clerk, 6th District 4th Ward; Frank R. Eddy, clerk, 2nd District 5th Ward; James H. Cushman, clerk, 4th District 5th Ward; Emery J. Sanborn, warden, 8th Ward.

Seven new members were admitted by the Jewelers' Board of Trade at its meeting of directors on Sept. 9. These applications for membership were received from the Providence office. F. N. Wood, the manager of the Providence office, reports that the Board of Trade is fast gaining ground and making many new friends through its active and efficient service.

The employes of Workman & Newman, accompanied by several friends, in all numbering about 60, were the guests of the firm on an outing at Crescent Park, on Narragansett Bay, on Labor Day. A special car took the party from the Union Station to the resort, where a shore dinner was dispatched, after which the afternoon was enjoyed in visiting the various attractions in the grounds.

Milton S. Rodenberg, of Dunn & Rodenberg, returned, Thursday, on the *Deutschland* from Europe. He was accompanied by his family, and in the three months he has away he toured Germany, Switzerland, France, Belgium and England. He also visited the jewelry centers, where manufacturers told him that business is much better than last year. Mr. Rodenberg will soon start to see his western trade.

Waterman W. Dexter, who died, recently, in Pawtucket, for many years conducted a retail jewelry store on Main St., that city, being the leader in that business there. He was born in Pawtucket in 1824 and was active in the varied interests of that place, where he lived practically all of his life. He was the oldest member of the Independent Order of Odd Fellows in the State, having joined the organization 61 years ago.

A meeting of the creditors of the D. R. Child Co., Levi P. Sturtevant, owner, at Swansea, will probably be called in a few days. The concern made a general as-

signment some time ago, but as yet no statement of the assets and liabilities has been made. It is understood, however, that the latter will approximate \$50,000, while the assets will be very small, outside of the plant itself and the real estate held by the firm.

The Gorham Co. furnished the handsome cup of solid silver that was presented, last week, to Mr. and Mrs. John H. Hanan at Narragansett Pier by Gov. Pothier and his staff in acknowledgement of the hospitality recently afforded them. The cup is of beautiful design and workmanship and has an excellent etching of "Shore Acres," the Hanan residence, thereon. The State coat of arms appears on the ebony base.

Ernest L. Hanowell, night watchman in the store of the B. H. Gladding Co., 291 Westminster St., was caught between the floor of the elevator and the top of the entrance to the elevator shaft on the fourth floor of the building, Friday night, and almost instantly killed. The elevator continued to the fifth floor, and the body of the watchman, released, fell four stories to the basement. It is thought, however, that the man was dead before he fell down the shaft. The victim was 38 years of age and had a wife and two children. He had been employed by the firm about eight months.

The charge against John Nelson, the N. Main St. jeweler and refiner, for an assault upon Charles H. Smart, Aug. 27, was discontinued, Friday, by Judge Gorham, of the Sixth District Court, on motion of the complainant. When the case was called Attorney Brand told the court that Nelson had been adjudged insane and committed to the State Hospital. He suggested that bail be released in the assault case. Assistant City Solicitor Cram said that in view of the conditions now existing in Mr. Nelson's case he would discontinue the complaint.

The settlement in full of every claim against the Central Trust Co., of this city, is forecasted by Richard E. Lyman, who is acting as receiver for the defunct banking institution. This bank suspended soon after the collapse of the old Union Trust Co., during the financial depression of the fall of 1907, and seriously affected several manufacturing jewelers whose money was deposited therein. Mr. Lyman, the past week, announced that a large portion of the claims against the company will be settled at once, and expressed the hope that in a few months every creditor will be paid 100 cents on the dollar.

The motion of the respondent in the case of William B. Streeter against Grace H. Streeter for an allowance was heard, Wednesday, by Judge George T. Brown in the Superior Court and was denied. It was claimed by the respondent that her husband, who is a manufacturing jeweler, did a business of \$600 weekly. This was denied by the petitioner, who said that he did a business last year of \$20,000, which was a loss of \$2,000, and that this year things had just begun to look better. Mrs. Streeter acknowledged to the court, in answer to a question from the counsel of Mr. Streeter, that she had \$1,900 at her immediate disposal.

Boston.

M. J. Atherton has returned from his Summer home at Mt. Desert, Me.

Albert L. Stearns, president of the Roy Watch Case Co., was here, last week.

Louis Nordlinger was here last week in the interests of L. & M. Kalm & Co., New York.

Joseph H. Fallon, with Stanton & Glover, has returned from a month's outing on the shores of the Concord River at Concord.

George Hutchison, of Hutchison & Huestis, Providence, paid a visit to this city last week, as did L. Strassburger, of S. Sternau & Co., New York; Fred Barry, with Louis Stern & Co., Providence, and John Abel, of Abel Bros. & Co., New York.

Among the jewelers in town last week were: J. W. Springall, Dexter; George E. Twambley, Saco, Me.; O. S. Fairbanks, Worcester; Harry Wheeler, Baird-North Co., Providence; John J. Barry, Ayer; Fred Newhall and J. H. Conner, Lynn.

George L. Almy, a veteran employe of the Waltham watch factory, died Friday of last week at his home, 20 Russell St., Waltham, aged 87 years. He had been in feeble health since his retirement from active duties five years ago. Death was hastened by the fact that on Friday he tripped on his piazza and fell, receiving a shock from which he was unable to recover. The funeral services, which took place Sunday, were largely attended, there being many representatives of the watch factory among the mourners.

The E. Howard Clock Co. has completed 25 extra fine clocks for the United States Navy Department, and which are to be used in the engine rooms of the largest battle-ships. Other orders filled by the company include a four-dial striking tower clock for the court house at Monticello, Fla., master and secondary clock systems for the new Cedar St. school, Roxbury, and the L. L. Dame school, Medford, Mass., and a large timepiece tower clock for the N. Y., N. H. & H. railroad station at Waterbury, Conn.

Inspector of Police Morris Wolf was in New York, Friday of last week, where he identified William E. Murphy, of this city, wanted here on two counts of larceny. Murphy had been employed as a salesman and collector for Davis Bros., jewelers, at 683 Washington St., and for Robertson & Hartley, 790 Washington St., and, as was told last week, is alleged to have stolen from both firms. The Boston police are endeavoring to secure requisition papers with which they hope to be able to have Murphy arraigned in this city.

A social event of much interest to employes of the Waltham watch factory was the celebration by Mr. and Mrs. John W. Johnson of their 25th wedding anniversary, Saturday, Sept. 4, at their home on Elson Road, Waltham. Mr. Johnson has been employed for 31 years in the dial department, of which fact there was suitable recognition by his fellow employes. The employes of the train making department held their annual outing at Childs' farm, Saturday, Sept. 4, and the occasion proved a decided success. The members of the Codfish Club of the machine department, are planning to hold their annual fishing trip next Saturday. A meeting is soon to be called to make plans for the bowling league's season.

Attleboro.

S. O. Bigney spoke upon the tariff at a meeting of the Essex Club, last week.

Plans are being made for the formation of a bowling league among the local shops.

John M. Fisher attended a noon rally of the Prohibitionists at Faneuil Hall, Boston, last Saturday.

The Leach & Garner Co. has removed from the old building on Union St. to its new factory on Pearl St.

Harry T. Prince, charged with the larceny of gold and silver scraps from the factory of the Watson-Newell Co., was in court Saturday morning. It was reported that he had made restitution and that there was no inclination on the part of the firm to prosecute. Under these conditions Judge Byram placed the case on file.

Taunton is very anxious to obtain one or more Attleboro jewelry concerns and is contemplating the immediate erection of factory buildings that will be suitable for jewelry shops. The buildings will be constructed by the Bristol County Realty Co. Simon Swig will be president of the company and Mayor Coughlin, of Fall River, is said to be slated for treasurer. The Attleboro Board of Trade, which has recently been formed, will do all within its powers to keep any of the local firms from leaving the town.

Charles F. Getteny, director of the Massachusetts Bureau of Statistics, has issued the annual report for the year of 1908. In respect to the towns of Plainville, Attleboro and North Attleboro he has the following to say: "Attleboro and North Attleboro have a product value of \$12,327,007 and \$5,617,514, respectively, these towns being the largest centers for the manufacture of jewelry in Massachusetts. The above two towns together have a total of 8,115 wage-earners, mostly all jewelers. The highest average yearly earnings in the State appears for the town of Plainville, which is \$731.67 for each person employed. The only industry in Plainville is the manufacture of jewelry."

The tax assessors of Attleboro have announced the assessments for the coming year. Among those who pay more than \$100 for taxes and who are connected with the jewelry trade are: Allen, McNerney & Co., \$180; H. E. Angell, \$119; Attleboro Mfg. Co., \$1,793; Attleboro Refining Co., \$393; W. F. Barden, \$117; Bates & Bacon, \$1,313; James A. Bigney, \$131; S. O. Bigney & Co., \$861; Sidney O. Bigney, \$2,653; James E. Blake, \$2,233; James E. Blake & Co., \$791; Bliss Bros. Co., \$168; heirs of E. B. Bliss, \$1,152; H. F. Bliss, \$101; Chas. W. Bliss, \$198; D. F. Briggs Co., \$2,700; E. T. Bright, \$207; Bristol Mfg. Co., \$630; Geo. L. Brown Co., \$198; A. A. Bushee & Co., \$106; Albert A. Bushee, \$111; Carter, Qvarnstrom & Carpenter, \$150; Harvey E. Clapp, \$272; Andrew Cornell Smelting Co., \$120; Daggett & Clapp Co., \$666; H. M. Daggett heirs, \$416; John Eden, \$596; Finberg Mfg. Co., \$396; J. M. Fisher, \$561; J. M. Fisher & Co., \$816; Fontneau Cook Co., \$900; E. D. Gilmore & Co., \$279; E. D. Gilmore, \$339; Hanson Benett Co., \$108; Hebron Mfg. Co., \$5,508; Horton-Angell Co., \$1,801; A. S. Ingraham, \$952; Leach & Garner Co., \$723; J. W. Luther Co., \$378;

D. E. Makepeace Co., \$1,620; W. B. Marble Co., \$135; C. A. Marsh & Co., \$558; Mason-Howard Co., \$270; William Nerney & Co., \$117; Regnell, Bigney & Co., \$857; W. E. Richards & Co., \$324; W. H. Saart, \$306; F. H. Sadler & Co., \$576; R. F. Simmons Co., \$4,460; Sykes & Strandberg, \$180; C. O. Sweet & Sons Co., \$324; Watson-Newell Co., \$3,060; W. H. Wilmarth Co., \$162; C. M. Wendelstein, \$131; F. W. Weaver & Co., \$216; C. L. Watson, \$7,042; Charles H. Tappan, \$658; Henry D. Merritt, \$429.

North Attleboro.

J. J. Sommer left, last Friday, for a short trip in the interests of his firm.

F. M. Whiting & Co. started to run their factory on a 13-hour schedule last week.

George G. Wheeler was in New York last week on business for the W. & S. Blackinton Co.

Harry Fisher returned, last week, from a short trip in the interests of Furbish, Swift & Fisher.

Charles Kettley has returned from the west, where he has been in the interests of the A. H. Bliss Co.

William H. Miller has returned from a visit to New York in the interests of Doran, Bagnall & Co.

George L. Paine returned, last Saturday, from the west, where he has been in the interests of his concern.

More advertisements for help were noticed in last week's local paper than at any time during the past year.

Thomas Totten has returned to his home in California after spending the Summer with his brother, Albert Totten.

Alpin Chisholm, of the Bugbee & Niles Co., has returned from Nova Scotia, where he enjoyed a short pleasure trip.

Mrs. Joanna Cheever, mother of George W. Cheever, of Cheever & Tweedy, died last week at her home on Cottage St.

Charles Stanley returned to the New York office of the Estate of O. M. Draper last Tuesday, after spending a few days at the factory.

At the last session of the Norfolk County Probate Court Albert Edward Burton was named as the administrator of the estate of Albert William Burton. Bonds were fixed at \$60,000.

The cases of Edwin L. Mumford vs. the Miller, Fuller & Whiting Co. and the Manchester Savings Bank vs. the Miller, Fuller & Whiting Co. are listed for trial in the coming session of the Superior Court at Taunton.

The Whiting & Davis Co. was the only firm in Plainville that was able to resume operations Monday, Aug. 30, after the accident to the factory engine. The other concerns—Scofield, Melcher & Scofield and Plainville Stock Co.—did not resume work until Sept. 2. The Whiting & Davis Co. enterprisingly went to Providence and brought out a large engine, which it connected up, and was thus able to resume work with very little loss of time. The firm generously shared its engine facilities with the other concerns, and it was not until Tuesday, Sept. 7, that the other two firms were able to get along without using the Whiting & Davis engine.

Marmaduke Mackreth, an old and re-

spected citizen, died last Saturday morning at the age of 75 years. He was born in Yorkshire, England, May 3, 1834. He received a common school education in that country and came to this country with a friend in 1850. He decided to learn a trade and selected the jewelry business. He became a member of the firm of W. H. Fisher & Co. and was identified with the concern until his retirement from active business in 1890. Mr. Mackreth built a beautiful house on Commonwealth Ave., patterned after a house in England, and it was here he lived until his death. Funeral services were held last Tuesday from his late residence on Commonwealth Ave. Rev. Zenas C. Wells, of the Central Congregational Church officiated and burial was held at the Mt. Hope Cemetery.

Newark.

Mr. and Mrs. C. C. Champenois have returned from an extensive pleasure tour.

Frank M. Schiener, of A. Rosenberg, has started on a trip for the middle west; he will also cover New York State.

Ewald Dietz, an enameleer, at 46 Olive St., has returned from a 10 weeks' trip to Europe, during which time he combined business with pleasure.

Miss E. Kate Livingston, daughter of Edward Livingston, a New York jeweler, was married Sept. 11 at her home, Westminster Ave., Elizabeth, N. J., to George Lorra Wyeth. The wedding was attended by many prominent society people and business associates of Mr. Livingston.

The German Jewelers' Association will hold a banquet on Oct. 23 at Wever's Colosseum. The affair will be in commemoration of the 28th anniversary of the founding of the society, which is flourishing financially as well as numerically, and held in high regard by the manufacturers.

Charged with the larceny of a pair of gold earrings, a 14-year-old girl was arraigned in the Third Precinct Police Court recently, and paroled for the Juvenile Court. Bernard Pfundstein, a jeweler, Hamburg Place, stated that the girl called at his store to get a pair of earrings fixed and before leaving picked up another pair valued at \$2, from a counter.

Another large real estate deal, in which \$30,000 was involved, has just been closed by which William P. Powell has sold the property at 45 and 47 Austin St. to David and Harry Shiman, of the Shiman-Mil Co., manufacturing jewelers. The plot is 50x100 feet. The new owners will erect on it a five-story factory building, which will be used for the manufacture of jewelry.

An autopsy performed on the body of Henry Felger, an employe of the firm of F. & F. Felger, Marshall St., on Saturday indicated that death was due to heart failure and not to the wound sustained when Mr. Felger fell from a trolley car, Friday night, while bound to his home in Irvington. He sustained a severe wound in his head as a result of the fall. Deceased had been in poor health for some time and had recently returned from a trip which he took for the benefit of his health. He was a son of F. Felger, who, with an older brother, comprises the firm of F. & F. Felger. Mr. Felger is survived by a widow and five children.

Philadelphia.

TRADE CONDITIONS.

The great influx of buyers from the south and west brought to this city through the plan of the Merchants and Manufacturers' Association, which effected an inducement in the form of free transportation was increased last week when about 25 buyers from the largest firms arrived. The number of buyers here now is greater than ever before. The reports of the Merchants and Manufacturers' Association indicate a season of greater prosperity than has ever visited this city. Two firms who represent a Jacksonville jewelry firm, worth \$20,000 worth of jewelry, and are enthusiastic over the purchases and expressed their desire to return to this city each year to buy.

The Flaig Optical Co. has opened an office at 209 S. 11th St.

L. Kuebler, 2317 Germantown Ave., will start New York shortly on business.

Willis Porter, Burlington, N. J., was a recent visitor to New York on business.

M. McIlvaine has accepted a position as watchmaker for T. Brennan, Chester, Pa. H. E. Ogden, with R. L. Saunders, 13 1/2 8th St., is visiting friends in Salem, N. C.

M. H. Fearnow, of Washington, D. C., stopped over here on his way home from a trip.

Lewis Glick, representing Hammel, Rigden & Co., was seen in the trade during the week.

Thomas Bunston, watchmaker, 726 Sansom St., has been visiting New York on business.

Julius Goldstein, Mobile, Ala., stopped here, last week, on his way home with Mrs. Goldstein.

Col. J. Warner Hutchins was elected a trustee of the Cape May Yacht Club at its last meeting.

The Hoover & Smith Co. expects to open a branch store at N. 13th and Walnut Sts., Oct. 1.

Kenneth Hoffman, bookkeeper for Joseph Bechtel & Co., is spending a vacation at Wildwood, N. J.

Frank Kline, Spring City, Pa., jeweler and cigar manufacturer, was robbed, last week, of 3,500 cigars.

F. A. Braun, 1426 Susquehanna Ave., has moved to 1343 York St., where he has much larger quarters.

Ruben & Griffinstein have opened a repair and manufacturing jewelry shop at 10 1/2 State St., Trenton, N. J.

William Gibbons and Lewis W. Gibbons are now associated in business with W. W. Hulmer, 122 and 124 S. 8th St.

David Ludlam, casemaker for John Hardler, has recovered from his broken arm and is able to resume work.

C. S. Kepner, Chester, Pa., has returned from Asbury Park and is again actively engaged in the management of the Chester store.

James Girvan Maree, a retired jeweler, of this city, has the sympathy of the trade owing to the death of his wife, which occurred Sept. 5.

Walter Chatten, late of the firm of Garner & Chatten, manufacturing jewelers, 734 Sansom St., has opened an antique shop at 166 S. 11th St.

John Eichman, watchmaker for Strawbridge & Clothier, has resigned his position and will devote his time to his jewelry store in Camden.

Edwin Koshland, traveling for Charles H. Koshland, manufacturing jeweler, has returned from a trip through Maryland and reports business good.

The business recently conducted by A. Du Bosq, deceased, 722 Chestnut St., is being carried on by A. Du Bosq Gesimer, a nephew of Mr. Du Bosq.

George W. Long, who is connected with the Registry Department of J. E. Caldwell & Co., is steadily improving and expects to return to business in a short time.

William C. Williams, with C. H. O'Brien, 735 Sansom St., councilman from the 18th Ward, has been appointed a member of the committee to investigate the harbor of Boston.

D. V. Brown, optician, 734-740 Sansom St., returned from Europe on the *Lusitania* when this vessel made the record trip across the Atlantic in 4 days 11 hours and 22 minutes.

P. A. McMasters, Avondale, Pa., with Mrs. McMasters, were recent visitors to this city prior to a trip to Atlantic City, where they will quietly celebrate the 25th anniversary of their marriage.

The value of the imports of every kind brought into the port of Philadelphia during the month of August shows substantial increase over that of last year. In many instances the increase is four times greater; in some only two or three times as much, but in every instance the figures show, according to the Collector of the Port, that trade is booming. The increase on jewelry brought in this year over that of last year, for 1908 was \$13,823, while, for 1909 the figures follow \$19,172.

J. E. Caldwell & Co. are the manufacturers and designers of the silver loving cup to be presented by George H. McNeely as a prize to the winner of the inter-city baseball match between the Hoffman-Corr Mfg. Co., New York, and the Aberdeen Athletic Club, West Philadelphia. This house has also completed the juvenile cup for the Bryn-Mawr horse show, for the special pony class. Etched on the cup is a pony and wagon. The pony is a reproduction of a photograph of a famous show pony.

The following jewelers were visitors to this city during the week: Henry Bolte, Atlantic City, N. J.; Mrs. A. T. Johnson, Smyrna, Del.; E. L. Thomas, Phoenixville, Pa.; J. W. Clark, Bristol, Pa.; Ivan Jensen, Riverside, N. J.; Maurice Hunter, Beverly, N. J.; M. K. Laudenslager, Souderton, Pa.; H. Kratz, Souderton, Pa.; C. A. Carmany, Coatesville, Pa.; J. A. James, Swedesboro, N. J.; George Ware, Atlantic City, N. J.; D. H. Krause, North Wales, Pa.; L. R. Douglas, Atlantic City, N. J.; O. T. Fenton, Hightstown, N. J.; Roland Oliver, Burlington, N. J.; Oliver Cox, New Egypt, N. J.; A. M. Kendall, Millville, N. J.; J. Sallade, Norristown, Pa.; B. C. Foster, Bristol, Pa., and John H. Mery, Hopewell, N. J.

Maxwell & Berlet have on exhibition in their show-room a block and gavel, in a neat design, of the first tree cut at 1105 Walnut St. This memento will be used at the banquets of the Walnut St. Business Men's Association, of which Mr. Berlet is president. Among the members are Z. J. Pequignot, Combes & Van Roden, S. A. MacQueen & Co. and Maxwell & Berlet.

Maxwell & Berlet have also on display in their window an old-fashioned drinking cup, of the Georgian style, with three handles. This trophy was made and designed by the house for the special match race between yachts owned by Commodore Dickerson, of the Corinthian Yacht and Gym Club, and Commodore Crozer, of the Beach Haven Yacht Club.

Lancaster, Pa.

Joseph Harris, a Shamokin, Pa., jeweler, paid a visit, last week, to Lancaster.

J. W. Hirlinger, manager of the Lancaster Clock Repairing Co., has returned to this city from a pleasure trip.

S. H. Hostetter, watchmaker for Harper & Taylor, Salisbury, Md., with his family spent a few days in Lancaster, last week. This county was his old home.

Robert Albright, a manufacturing jeweler of Philadelphia, formerly of Lancaster, was here, recently, spending a few days with his father, Jacob Albright.

Guy K. Herr, watchmaker for Charles J. Kinzer, Bluefields, W. Va., who came to Lancaster to recuperate after an attack of typhoid fever, has returned to Bluefields.

F. A. Wheeler, of the Non-Retailing Co., is now in southern territory, with headquarters at Atlanta, Ga. His wife has just returned from a two months' trip to California.

Martin M. Weaver, a graduate from the local technical school, recently left the service of J. H. Young, Fort Wayne, Ind., to take a similar position with E. G. Hoover, Harrisburg, Pa.

Joel S. Chandler, Nashville, Tenn., spent a few days in Lancaster, last week, on his way home from New York. It was his first visit here in 10 years, Lancaster being his wife's old home. She died in Nashville, several years ago.

Harold Brecht, a son of Prof. M. J. Brecht, superintendent of the public schools of Lancaster County, has entered the Ezra F. Bowman Technical School as a student in watchmaking and engraving. Frederick D. Mumma, Mechanicsburg, Pa., has entered as a student in engraving and watchmaking. W. H. Jones, Port Jefferson, N. Y., has entered as a student in watchmaking.

G. William Reisner became the proud father of his first child, a son, last week, who, he says, is a prospective partner. J. Wealand Meek, formerly with the Aluminum Utensil Co., Pittsburg, has taken a position with Mr. Reisner as traveling salesman, and so has H. L. Ingram. The former will cover the middle States and the south, and the other the west, while John H. Reisner will devote himself to the New England States.

T. Wilson Dubbs was one of the guests at the dinner given by citizens on the evening of Sept. 7 at the Rossmer Hotel to the manager and players of the Lancaster Tri-State League team to celebrate the winning of the 1909 pennant. Mr. Dubbs sold to the team the silver loving cup and silver tea set presented by the team to Manager Martin Hogan, and sold to the Board of Directors of the club the 13 gold watches, which they presented to the members of the team.

Pittsburg.

H. Terheyden expects to leave in a few days on a business and pleasure trip to New York.

J. Alexander Hardy, of the Hardy & Hayes Co., is in New York buying stock for the Fall and Winter trade.

G. Warren Wattles and his family, who have been spending a short vacation on the latter's farm at Harmony, have returned to Pittsburg.

Some of the local jewelers report a very good demand for automobile watches, this being one of the results of improving business in this territory.

Several jewelers are said to be figuring on opening places in the new Oliver building, which is being erected in Smithfield St. and which will be Pittsburg's largest skyscraper.

Out of town jewelers visiting Pittsburg last week included B. E. Brown, Monessen; H. R. Brown, Donora; John Lanzendorf and wife, Punxsutawney; F. H. Hayes, Washington; Thomas Tomlinson, Charleroi; A. C. Graul, Sharpsburg; L. L. Swan, New Castle.

The John M. Roberts & Son Co. secured a half page advertising in some of the daily papers last week because of the sending of a letter to a billboard advertising concern, setting forth that it was the opinion of the jewelry house that this system of advertising assisted in keeping its name prominently before the public.

The Crescent Jewelry Store, of which S. Maltinsky is the proprietor, has very fine quarters at 441 Smithfield St., which were opened a few days ago. Mr. Maltinsky also has a store in Braddock. He had one in Wilmerding, but recently closed this establishment because he said it did not pay. The fixtures which he has installed in his Pittsburg store are new and are of mahogany.

The creditors of Parnes & Fassberg will not receive one penny, according to Simon Sher, receiver for the bankrupts. An involuntary petition was filed against the firm last January, at which time Parnes disappeared and has not been heard from since. A rumor was current that he had been apprehended, but Mr. Sher knows nothing about it. He spent a large amount of money for the creditors to obtain Parnes' arrest on charges of fraud, but the missing man cannot be located. The affairs of the concern were wound up a few days ago. A. E. Siviter had a claim in for \$293 wages which was allowed by the court, Siviter having been employed as manager at a salary of \$25 a week. This took nearly all the money left in the hands of the trustee for distribution. Mr. Fassberg has been endeavoring to locate Parnes, whom he declares was not his partner at the time of the failure, but has not been able to do so.

A robbery involving jewelry said to be valued at \$35,000 is attracting the attention of the public here, a reward of \$10,000 having been offered for the recovery of the goods by the Perkins Union Detective Agency. The owner's name has not been made public, but description of the stolen jewelry is being sent out over the country, and especially to jewelers. This includes a diamond chain 36 inches long set in plati-

num with 122 brilliants, bought in Paris, and valued at \$2,800; pear-shaped diamond drop on chain, weighing 10¼ carats, valued at \$10,000; diamond combination collar and tiara fancy scroll design set in platinum, containing two diamonds, 1—1-32 carats, three diamonds, 1, 1—½ and 1-16 carats, and 446 diamonds, 20% carats, value \$3,500; diamond back comb, light shell, containing 274 small diamonds, set in platinum, value \$1,000; diamond bracelet containing 43 diamonds, set in platinum, stones weighing about ½ carat each; diamond pin, star-shaped; wild rose pin, one-carat stone in center and smaller diamonds surrounding; gentleman's 18-karat open-faced gold watch, stem winding, Swiss movement, with name of J. C. Grogan, Pittsburg, No. 22172, private mark of J. C. Grogan & Co., No. 18, case heavy gold, value \$175; pearl earrings, eyeglass hook, platinum mounting, 19 rose diamonds, value \$55. The Perkins agency refuses to discuss the matter, beyond an offer of the reward for the recovery of the stolen property. Jewelers are therefore warned to be on the lookout for any of the plunder described.

Cincinnati.

J. Ira Seebaehner, of A. & J. Plaut, has started on an extended business trip to the west.

Mr. Porter, Berea, Ky., was here, last week, buying stock for a new store he will soon open.

William Hertig, of the Prefex Mfg. Co., Providence, R. I., spent last week here with relatives and friends.

Dahme Bros., Covington, Ky., have closed out their music line and will devote their entire time to their jewelry business.

Loring Andrews, of the Loring Andrews Co., has been selected to serve as juror on the Grand Jury of the October session of court.

Lee Loeb, of Herman & Loeb, has returned from a long western business trip, and Clarence Loeb, of this house, will continue it this week.

Col. Ed. H. Lovell, with George H. Newstedt, has returned from a pleasure tour including New York, Providence, R. I., and the Great Lakes.

Henry Deitrich, formerly in the jewelry manufacturing business on Longworth St., has gone into the retail jewelry and optical business at 2528 Vine St.

William Ueberschlag, of the Cincinnati Watch Case Co., and one of the popular politicians of Bellevue, Ky., is a candidate for council of that place.

H. G. Greenhut, well known in the jewelry business, Peoria, Ill., spent several days here stocking up the new store he is about to open in that place.

George Fox, of Fox Bros. & Co., has returned from a long stay in Portland, Ore., and Henry Fox, of this firm, and family are home from Charlevoix, Mich.

H. F. Smith, 610 Vine St., has just returned from a six weeks' stay in Central City, Colo., where he has large interests in the Gilpin Eureka gold mines, and is contemplating going back about Sept. 14.

D. Jacobs & Co. have moved from their old quarters at 434 Race St. to their new place on 6th St., where now they are

fully equipped with facilities to carry on business more satisfactorily than heretofore.

The pawnbrokers of Cincinnati are considering the matter of making 6:30 p. m. permanent closing hour, as it proved a success during the Summer months. Therefore there has not been any special time for closing among the pawnbrokers.

George and Edward Klein, who have some years been conducting the O'House Jewelry Store, Muncie, Ind., leased quarters for a term of years at the Traction building, this city, where they will engage in the wholesale jewelry business. Both gentlemen are well and favorably known here as the sons of the late Henry C. Klein, who for many years carried on a retail jewelry business in Cincinnati.

The marriage of Michael Plaut, of J. Plaut, and Miss Florence Louise Schindler, daughter of M. Selwab, of the M. Selwab Jewelry Co., took place, Sept. 12, 6:30 p. m. at the Cincinnati Club, W. Hills. Mr. and Mrs. Plaut are among Cincinnati's most highly esteemed young people and were the recipients of many costly gifts. A honeymoon of several weeks will be spent in eastern cities, to which they will reside in Avondale.

It was reported, last week, from Lexington, Ky., that O. R. King, of the firm King & Metzger, local jewelers, was walking in company with some friends gathered wild flowers and was bitten on the thumb by a copperhead snake. The reptile was immediately killed, and the members of the party became alarmed at King's predicament. Mr. King, however, says that he sucked the poison from his thumb and that the wound is now healed.

Wednesday evening, Sept. 8, the third in the series of entertainments was given by the visiting merchants and buyers by the Merchants' and Manufacturers' and Travelers' Men's Associations of this city. The party was on the Ohio river, and the steamer *Island Queen* took the party, consisting of about 500 visitors, on a trip down to Manhattan Beach a fireworks display was given. A chicken dinner was served on the boat. It is reported that in the three out of 1,500 visiting merchants have been entertained and that business generally is greatly improved during these times.

Out-of-town jewelers here, the past week, purchasing goods, included: I. Risinger, Lawrenceburg, Ind.; Frank B. Carey, Lebanon, O.; Herman Voller, Princeton, Ind.; Herman A. Rohr, Guthiana, Ky.; A. I. Polan, Charleston, Va.; Charles Schlenker and wife, Hickman, Ky.; John Glenn, Newport, Tenn.; Joseph Jashanosky, Hamilton, O.; J. Hesselbrock, Liberty, Ind.; H. F. Beckley, W. Va.; A. Bellman, Dayton, O.; E. Anderson, Rising Sun, Ind.; J. Schneider, Louisville, Ky.; G. H. Ash, Middletown, O.; E. Israel, Harrison, P. W. Powers, Ashland, Ky., and O. McCracken, Mt. Olivet, Ky.

J. E. Yohe, Decatur, Ill., was slightly injured in a street car smash-up, recently, suffering a concussion of the right elbow and several minor injuries.

PATENT DEPARTMENT

IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

PUBLISHED AUG. 3, 1909

932,447. FOUNTAIN-PEN. PATRICK D. CORRIGAN, Wellsville, N. Y. Filed Nov. 5, 1908. Serial No. 461,216.

A fountain-pen comprising a barrel having a filling opening at a point intermediate its ends, a pen arranged in the barrel, and a rubber casing disposed over the pen and portion of the barrel to be held by contraction on the latter and covering

the filling opening to hold ink in the barrel, the outer end of the casing having an opening through which the tip of the pen extends, and the inner end of the casing being adapted to roll back on itself to expose the filling opening.

932,480. ORNAMENTAL PIN OR BADGE. CALVIN W. LITTLE, Montclair, N. J. Filed March 28, 1908. Serial No. 423,940.

In a badge, a central plate constituting in itself a badge and provided with means for securing it to the person of the wearer, in combination with an inclosing holder for the central plate adapted to fit against the back of such plate and extending beyond the edges of the plate, such border

being provided at one edge with an overhanging lug adapted to fit over the corresponding front of the central plate, means for detachably securing together the edges of the plate and border opposite to said lug and means for preventing the plate from slipping from beneath the lug.

932,526. POWDER-PUFF PIN. JEFFERSON WETZLER, New York. Filed July 24, 1908. Serial No. 445,110.

A lady's hat-pin comprising in combination, a pin, a two-part head therefor comprising a minor portion to which the pin is fixed and having a

reduced threaded part, a hollow major portion having interior threads co-operating with the threaded part of said minor portion and having a rounded outline merging into the outline of said minor portion whereby a rounded outside contour is produced by the assembled parts, and a powder

puff fixed to said minor portion and adapted to fit within the cavity of said major portion when the latter is screwed and firmly fixed on the minor portion in the use of the hat-pin

932,560. CIGARETTE CASE. JAMES E. PENDER, Providence, R. I., assignor to the Gorham Mfg. Co., Providence, R. I. Filed June 1, 1906. Serial No. 320,024.

In a case formed of two sections hinged to gether, a spring catch for holding said sections

closed comprising a flat spring extending along one side of one of said sections and around the corners thereof and with its ends bent to abut against fixed projections at the ends of said section, substantially as described.

932,576. LATHE TOOL. JOSEPH D. RAMSEY, Dorchester, Mass. Filed Sept. 24, 1908. Serial No. 454,588.

The combination in a device of the class described of a holder having two relatively movable parts, one of which is adapted to support a tool

and the other of which is adapted to be rigidly secured to a tool post, a stop adapted to limit the movement of one of said parts with relation to the other in one direction, and a spring adapted to hold one of said parts against said stop.

932,787. KEY RING. GEORGE J. KIRBY, Williamantic, Conn. Filed Jan. 6, 1908. Serial No. 409,560.

A key-ring comprised of a whirl of resilient wire cylindrical in cross section throughout the major portion of its extent, the wire being bent so that its end portions overlap in either one of two relative positions, the said end portions being pointed

and curved laterally in opposite directions, one side of each end portion being flattened, the said end portions being normally positioned with the pointed extremity of each end bearing against the flattened side of the other producing a space between the members between the incurved points, and being adapted to be rotated one about the other to bring their convex sides in contact at points inwardly of their extremities, and with the point now curved outwardly and spaced from the rounded sides of the adjacent member.

932,938. LOCKET. HARVEY E. ADAMS, Hockingport, O. Filed Sept. 24, 1907. Serial No. 394,277.

In combination, two members hingedly connected and movable to a position in substantially parallel planes, one of said members having a symbol-receiving face and also having an opening there-through adjacent the point of hinge connection, the rear face of said latter member having an an-

nular flange formed with an annular recess adjacent the plane of said face, and a spring having its ends lying within said recess and having an intermediate portion bent to form a loop, said loop extending through said opening in a direction at substantially right angles to the plane of the remaining portion of the spring and projecting beyond the plane of the spring-carrying member, said projecting portion normally extending in a plane angular with respect to the plane of the axis

of the opening and positioned to retain the opposing member in one extreme of its length of movement, said loop being of a length to provide a portion in contact with the inner face of the opposing member during each of the movements of the latter, said movements causing the contracting portion of the loop to pass from one side to the other of the plane of the axis of the opening.

DESIGNS.

10,237. BADGE. JOHN W. GREEN, Los Angeles, Cal. Filed June 29, 1909. Serial No. 505,088.

10,238. EMBLEM. JOSEPH M. WEINGARTNER, Newark, N. J., assignor to the Toledo Chamber of Commerce, Toledo, O. Filed June 28, 1909. Serial No. 504,948. Term of patent 7 years.

10,240. TRAY OR SIMILAR ARTICLE. WILLIAM C. CODMAN, Providence, R. I., assignor to the Gorham Mfg. Co., Providence, R. I. Filed May 14, 1909. Serial No. 496,087. Term of patent 14 years.

10,246. WATCH OR CLOCK DIAL. LEON N. LONGE, Springfield, Vt. Filed March 13, 1909. Serial No. 481,332. Term of patent 7 years.

1909. Serial No. 481,332. Term of patent 7 years.

BRITISH PATENTS.

BRIDGMAN'S SPECIFICATIONS, 1908, FROM *The Illustrated Official Journal.*

ISSUE OF AUG. 25, 1909.

128. STUDS, ETC. F. BOSWELL. Sandycroft, near Chester. April 25.

A detachable button or stud comprises a shank Fig. 1, bearing branches 2 adapted to be passed into a slit 3 in the base 4 and turned through

so that a plate spring 5, Fig. 4, presses the branches 2 into recesses 6 in the base 4. FIG. 5, is for a trower button

111. TIME ALARMS. G. E. MARSTON, and A. C. CARLTON, Nottinghamshire. April 8.

In a clock for controlling the circuits of an alarm system, a cam A, Fig. 3, on the rear of the minute-hand arbor controls contacts C, D, so as to close the alarm circuits for a definite duration every half or quarter of an hour. The hours at which alarms are given determined by plugging the terminals of the circuits into different rooms, etc., into sockets Fig. 1, arranged in a circle round the clock and connected to radial contact-springs G, the

ends of which are wiped by an arm F on the 12-hour spindle. The outer end of each plug is formed as a socket to take another plug in case an alarm is required at two places at the same time. Alternatively, the device shown in Fig. 3 may be used in conjunction with a rotating barrel carrying a spiral of contact-pins co-operating with a fixed row of springs connected to plugging-in sockets. The barrel may be geared to clockwork driven by a spring under control of a "let-off" device or escapement, shown in Fig. 4, comprising a slide W which is reciprocated by a cam on the minute arbor of a clock movement, and has an opening W¹ shaped to co-operate with a contact pin O¹ on the last arbor of the train that drives the barrel J. The alarm bells are arranged to be readily removable and interchangeable by extracting them with terminals which engage terminals on bell-boards. According to the provisional specification, the bell-circuits may be connected severally to a series of contact-bars arranged transversely to a series of bus-bars which are in circuit in turn by the clock, and each

contact bar is provided with a sliding-block having a spring, bolt, or other means to make contact with any of the bus-bars. Each block is arranged to be locked in place by a key, or the whole arrangement may be enclosed in a locked part of the clock case. Specifications No. 11,317, A.D. 1906, and No. 18,166, A.D. 1898, are referred to.

9,218. MATCH BOXES. C. J. NELSON, Laurium, Mich., U.S.A. April 28.

A metal box for delivering single matches consists of a part a formed with a longitudinal groove b and having a hinged end or lid a¹ and a fixed

bottom. A shaft a¹ is provided having a groove or channel e for guiding the matches into the delivery groove b, from which they are permitted to fall by a sliding motion of the plunger h. The box may have striking-surfaces formed thereon.

9,229. ELECTRIC CLOCKS AND SIGNALS. W. T. GILES, Clifton, Bristol. April 28.

A secondary clock is provided with circuit-closing devices adjustable for action at any desired time of day and on any day of the week. The hour-wheel p which, as the electromagnet q¹ receives currents from a master clock, is driven by a lever armature q bearing a pair of pawls p¹, p², is provided with holes r to receive a pin, which at the required minute closes the circuit at a fixed contact s by applying thereto a finger-contact s¹

furnished with a tappet s². The 12-hour wheel a² is provided with holes w close together to receive a pin, which, by action on a second finger-contact t¹ with a tappet t², closes the circuit at a second fixed contact within the desired hour of the half-day and for the required minute. A third pair of contacts are closed together at the required time, either A. M. or P. M., each day of the week, by means of a wheel x² having 14 ratchet teeth alternately shallow and deep. This wheel is combined with a star-wheel x³, which is advanced each half-day by a pin x⁴ put into one of the holes in the 12-hour wheel. Sallow teeth may replace some of the deep teeth to cut out the current on Sunday or other days of the week. By means of another minute-wheel and a modified week-wheel, together with other contacts, completion of the circuit may be determined for different times or different days.

9,327. TABLE ARTICLES. H. ALLDAY (trading as Horton & Allday), Birmingham. April 30.

The handles of spoons and table, carving and like forks, are set with photographs or other miniatures b, Figs. 1 and 2, which are carried

by a tray c and mounted in a recess a², where they are retained by a bezel a³. Fig. 5 shows a modification in which the photograph is inserted from the front and the edge of the recess is

spread over to form a retaining-burr. In another modification, the retaining-flange is carried by a split ring which is provided in the recess.

9,395. DRESS PINS. L. WILLERINGHAUS, Aldersgate St., London. April 30.

A plate a, shown in elevation in Fig. 4, for securing safety-pins to garments is recessed at d,

c, f, and carries jaws h, i for holding the pin, which is bent as shown in plan in Fig. 3, in order that the two may be rigidly fixed. Fig. 2 shows the mode of attachment.

Application for Patents, Aug. 3-7.

17,891. WATCH HOLDER AND PROTECTOR. WILLIAM JOHN THOMPSON, London.

17,898. IMPROVEMENTS IN LADIES' HAT FASTENERS. ELIZABETH SCOTT née LANG, Paisley.

18,005. ELECTRIC CONTROL OF CLOCKS. SIEMENS BROS. & CO., LTD., London.

UNITED STATES TRADE-MARKS.

The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905 and are published in compliance with Section 6 of said act. Said section provides: Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after publication of the mark sought to be registered. Such said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no

notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for." Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of this act, which is as follows: "And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

TRADE-MARKS PUBLISHED AUG. 31, 1909.
Ser. No. 38,873. (CLASS 37. PAPER AND STATIONERY.) AIKIN-LAMBERT Co., New York. Filed Nov. 24, 1908.

Particular description of goods.—Pencils, pencil-cases, penholders and pen-cases of precious-metal or plated ware.

Ser. No. 42,254. (CLASS 28. JEWELRY AND PRECIOUS METAL WARE.) ALBERT W. ENGEL, Chicago. Filed May 5, 1909.

Particular description of goods.—Imitation diamonds.

Artistic Work in Bronze Tablets.

THE handsome oval bronze tablet here-with illustrated was designed and executed by Reed & Barton at their works at Taunton, Mass. The tablet is to be placed on a memorial school building, and serves to commemorate two little girls who died nearly a generation ago, but whose memory is still sadly cherished by their devoted parents.

The design, of a Louis XVI. character, embodies emblems appropriate to its func-

A BRONZE MEMORIAL TABLET.

tion—the trailing ivy branches for clinging affection, sprays of roses for fond love, and the two reversed torches, symbols of the quenching of the two young lives.

The extreme dimensions of the bronzes are 38 inches in length by 27 inches wide. The finish in dark brown with lighter surface tones shows the skilful modeling and excellent workmanship to advantage.

Mexico Joins Trade-Mark Agreement.

THE Department of State is in receipt of a note from the Swiss Minister at Washington, under date of July 6, 1909, giving notice of the accession of Mexico to the trade-mark arrangement signed at Madrid, April 14, 1891, the said accession to become effective on July 26, 1909; that is to say, one month after the date of the Mexican Government's ratification.

By the terms of the arrangement of 1891 a trade mark registered in any of the contracting countries is entitled to protection in all the other contracting countries, provided it is registered with the international bureau at Berne. The following countries were already parties to the arrangement: Austria-Hungary, Brazil, Cuba, France, Italy, The Netherlands, Portugal, Switzerland and Tunis, as well as the respective colonies of the contracting States.

The business of Mrs. Nellie C. Cordz, Springfield, Mo., has been purchased by Geo. E. Ward.

Imports of Clocks, Watches, Jewelry and Gems Into Canada.

Drive-Wheels in Your Business

A line of Elgin Railroad Movements will prove a strong drive-wheel in your business. Not only will the Railroad Elgin command the patronage of railroad men in your district, but it will also attract *other* trade, for it is only natural that the man who wants a reliable timepiece will go where the railroad man, whose duties require him to have a correct and durable watch, buys his.

Briefly stated, these are the advantages of the Railroad

Elgin

Large plain hands and figures; large spring which will run longer on one winding than that of any other railroad watch; silver finish, metal dial easily seen in faint light—the only metal dial with inlaid figures of hard enamel (or, if preferred, watch can be had with plain enamel dial). The thinnest railroad watch made. Cased at the factory and timed in the case.

Another business drive-wheel is that Elgin is the most popular watch word everywhere—a popularity maintained by Elgin advertising and, in itself, a distinct asset to the dealer—to *you*.

Advertising in railroad magazines is creating a demand for the Elgin with the “49 silver dial” or the “49 enamel dial,” and your stock should be in readiness to anticipate the demand. Your jobber or the Company will furnish prices on request.

These are the four grades and established retail prices as advertised:

ELGIN NATIONAL WATCH COMPANY

Factories: Elgin, Ill., U. S. A.

The Adjustment of Watches.

Written expressly for *The Jewelers' Circular-Weekly* by H. Reinecke.

(Continued from issue of Sept. 1.)

It is well understood that the adjustment of watches is embodied in two subdivisions, one of which is the temperature adjustment and the other the adjustment of isochronism and positions. While we are under control, to a certain extent, the position of a watch, we do not control any change in temperature, which comes mostly unannounced and in uncertain degree. In the same manner the fickle molecular condition and quality of the metals composing a compensation balance make the durable success of such a balance a problem. Steel is chemically a better known metal than brass, while neither is an elementary metal. The superior brass, by the use of which the early English horologists became famous, was the celebrated Dutch Kettle brass, which was also used by Miss Lockwood or cutting the unexcelled Duplex wheels. English records show that the ordinary compensation balances made 60 years ago were superior to those made at present, or including those yet in an experimental stage. The Dutch Kettle brass is that kind which has long been used for culinary purposes in melting fat, etc. It seems as though the impurities contained originally in the brass had a greater affinity for the fat than it had for the metal. This theory is somewhat confirmed by the repeated cooling of red hot brass in fat before submitting it to reduction by the rollers or punching of brass escape wheel blanks, which were never equaled as finished escape wheels in a certain watch factory.

At the present time it has been said that some noted chronometer makers use the brass of old spy-glass tubing for their balances with excellent results. The importance of a good balance to a pocket watch, when it is made in the best possible manner and adjusted accordingly, possesses these imperfections in the compensation, which fact should be made plain to a watch adjuster; fine watches are generally adjusted to two temperatures, which are 85° and 55° F. A watch thus adjusted will lose one second at 45° in 24 hours. It will gain one second at 70° and lose one second at 95°. But these deviations will be somewhat changed if we reverse the trials from 85° to 70° and to 55°, probably owing

to the ever changing molecular condition of the metals (liquation) which cannot be explained.

Perhaps it is not generally known that if a watch is adjusted to two different temperatures, as 30° and 90°, it will gain about two and five-tenths seconds at 60°. This error is technically called the "middle error," and is explained as follows: It has been found by trials and experiments that the adjustment of a compensation balance can only be made perfect at two points of different temperatures and that timepieces so adjusted will gain in all temperatures between these two and lose in all temperatures beyond these two.

The exact measurement of time by timepieces still remains an unsolved problem, more especially on account of the temperature adjustment, and it is still to be wondered at that so much perfection has been attained, which cannot be denied, and rests a good deal on counteracting errors. Giant intellects have made a life-long study of the subject, and it would be captious indeed to belittle their success. It has been brought so far that a competent adjuster of watches can guarantee one of the best made watches to run with an average variation of about a minute per month, and many will run much closer, but occasionally one may fail.

The British government offered premiums for the yearly uniform rate of any chronometer. The test continued about 13 years and about 500 chronometers were offered in competition. The popular verdict was that no chronometer is fit for competition until it has been tested for about three years. The government competition was closed about the year 1845.

The Russian government, about the same time, had sent a naval expedition on a cruise for the same purpose, and in consequence honored E. Dent, of London, with a gold medal for having furnished beyond all dispute the most serviceable chronometer.

The errors left in the temperature adjustment of a compensation balance when adjusted at 55° and 85° between and above these extremes, as given above, are correct in connection with hardened and tempered steel balance springs, but such errors are less in connection with "palladium" or

the well-known "Lutz" balance springs.

Palladium balance springs, as introduced by M. Paillard, show the middle temperature error much reduced, and on this account have been and are still, to some extent, used in marine chronometers, but in watches they are only used to make them non-magnetic. I have used them occasionally for such a purpose, but only in large watches with balances weighing about 16 grains. Whether the palladium springs retain their elasticity as well as hardened steel springs, I have been unable to verify.

Mr. Lutz discovered a method of hardening springs other than by the old process of fire and water, and imparting a beautiful appearance to them. These springs were much used in fine Swiss watches, some years ago, and they were said to need less compensation for changes of temperature than fire hardened steel springs. A complete assortment of these springs was kept in stock by some watch-material fakers, and were used by watchmakers to quite an extent, but they were not the most suitable for Breguet springs, as much bending deprived them of their elasticity. The method of hardening these springs has also been used for the steel rims of compensation balances, but with what result has not become known. It is commonly conjectured that the extraordinary success of some of the early chronometers has been the result of individual efforts, the details of which are not extant.

(To be continued.)

The Chronometer Factory at Hamburg.

PURSUING persistently the policy of ignoring foreign establishments in providing for the construction, armament and furnishing of their vessels, the large German navigation companies have united in organizing a joint stock company for the manufacture of chronometers. The profits of the enterprise were a minor consideration. The great object was to provide for the German marine and scientific institutions chronometers of prime quality at moderate price.

Herr Deucker, recognized as one of the best chronometer makers, was selected, though 73 years of age, as the executive head of the manufacture, the council of administration consisting of Herren Grunme, director of the Hamburg-American Line; Leist, director of the North German Lloyds; Kruss, president of the German Society of Mechanics and Optics, and Krauss, bank director. Herr Deucker has recently taken a trip to Switzerland to secure artisans.

Apparatus for Measuring the Power of Mainsprings.

[Editor's Note—Figures at the right in diagrams represent the power in grams, figures from 1 to 8 represent the number of turns of barrel arbor.]

The following described apparatus for measuring the power of mainsprings has been devised by the director of the horological school in Cluses, France, Jules Poncet, and the description pub-

FIG. 2.

Complete apparatus with barrel B, put in.

lished in the *Revue Internationale de Horlogerie*. With the aid of this device mainsprings of the smallest watches, as well as those of marine chronometers, or even larger specimens, can be tested as to their motive power.

The essential parts of the apparatus shown herewith are: A registering drum

Fig. 2.

Diagram of spring with sticky oil.

around which a sheet of paper showing a scale can be wound, and the arbor of which is supported by pivots at *c* and *c'*; an engagement between an endless screw and the worm wheel R that is attached to the arbor of the drum; a dynamometric spiral spring H, of definitely determined power, a carrier with I of the registering drum.

The shaft of the endless screw is equipped at its right-hand end with a small hand crank, M, by means of which the screw driving the registering drum C may be caused to revolve. At the left-hand end it is

equipped with a charging head, N, capable of accommodating different insets, each provided with a hollow square to accommodate the winding square of the barrel of the mainspring to be tested.

In the test the winding square is inserted in the proper inset, while the end pivot of the barrel arbor is secured by a counter runner D, so that the barrel B is firmly held in its position. In the circumference of the barrel box B a small hook is inserted, to which, in the case of heavy springs, a gut string is attached; for weak springs a silken cord, the other end of which, by means of a rectangular steel plate, h, is connected with the dynamometric spiral spring H. As may be seen

FIG. 3.

Diagram of spring shown in Fig. 2, after cleaning.

in Fig. 1, this steel plate also carries the writing apparatus I.

In using the apparatus we proceed as follows: After the barrel B, the spring of which is to be measured, is secured as described in its place and connected with the measuring spring H, the crank M is turned easily until the silken cord is stretched, i.e., until the spring tension itself commences. Then the screw, with the aid of which the registering drum is attached to its shaft, is loosened, and the drum is turned exactly to the zero point of the coordinate axes, Ox and Oy, designated on the recording chart H. (See Figs. 2 and following figures.) From this moment the apparatus is ready to record the strength of the spring.

If we now, by means of the crank M, turn the endless screw still further in the proper direction, on the one hand the recording drum will be rotated, while, at the same time, the mainspring, enclosed in the barrel B, will be wound up, because the shaft of the endless screw assumes the function of a winding key. As, however, the barrel is only held back by the silk cord which connects its circumference with the measuring spring H, it follows that the mainspring will carry the barrel with it to the extent that its power is greater than that of the measuring spring H, and that this will also gradually be tightened.

While this action is in progress the pen would, of course, make a vertical mark on the record chart if the latter remained stationary; but inasmuch as the recording drum revolves the line produced is more or less bent, or inclined towards the horizontal.

When we attain the limit of the spring tension (of the spring to be tested) in which condition the barrel arbor, the mainspring and the barrel will form a solid whole, the measuring spring H will only follow the power applied to the crank M and the line described by the pen, will approach closely to the vertical. After we have, in this manner, completely wound up the mainspring we allow the crank to turn back slowly; the pen, as may readily be understood, will trace a new line on the

FIG. 4.

Diagram of faulty watch spring.

chart, the direction of revolution being now reversed, but it will be very different to the first. Only in the neighborhood of the zero point do the two lines run together, as we may see in Figs. 2 to 6.

If we examine these tracings more closely it is easy, according to the ordinates Ox, which show the development of the mainspring in half turns of the barrel arbor and oy, which shows the progressive tension of the dynamometric spring H, to read every fraction of the revolution of the barrel arbor. We can thus read, at a glance, that the spring in testing which record Fig. 3 has been obtained, developed, in running down, a power of 300 grammes with a winding of $5\frac{1}{2}$ coils, or of 260 grammes, with a winding of two coils, and so on.

We may note that the spring, in running down, by no means develops the same power that was required to wind it up. As a fact, we perceive that a winding power of 510 grammes was necessary, in place of 300, to impart $5\frac{1}{2}$ coils to the

FIG. 5.

Diagram of mainspring of clock.

spring. It is, however, easy to understand that the difference between the curves in winding and running down of the spring will be but small in springs of good quality, because this difference must be ascribed to the loss of power caused by friction, which is greatly reduced where the spring is well made. In this respect we may state that the performance of the spring shown in diagram, Fig. 6, is better than the two preceding it, but the power is not so even as in diagram, Fig. 3.

Considering all that has been said, the

apparatus under consideration will enable us to distinguish with certainty a good from a bad spring. The first will manifest itself by a better performance and by a curve approaching the ideal line, i.e., a horizontally straight line. For a certain spring we can, moreover, determine the co-efficient of elasticity, the effects of different methods of fastening at the inner and outer ends of the spiral or cylindrical barrel core or of the different kinds of oil, etc. This is best shown in the diagrams, Figs 2

and 3. Thus Fig. 2 shows a diagram obtained from the mainspring of a lever watch (size of plate, 1 3/4 inches, 41 millimeters) after the watch had been going six years before cleaning. The difference in the power caused by the gummed oil is shown by the tremulous curve. Fig. 3 shows a diagram of the same spring, after cleaning. The wavering lines have now completely disappeared, and the absolute uniformity of spring power, in running down, between 5 1/2 coils, is especially apparent.

FIG. 6.

Diagram of spring with inwardly tapering band from a marine chronometer.

Fig. 4 shows the diagram of the spring of a lever watch with a plate of 1 1/2 inches (38 millimeters) diameter, which, as one of a series of watches that were regulated remarkably well, shows a less regular rate. The uneven curves, particularly in running down between 2 1/2 and three coils, show that this defective rate is due to irregular development of power by the mainspring.

In Fig. 5 the diagram of a clock spring is reproduced. The measurements of this spring were: Length, 144 cm. (56 3/4 inches); width, 24 mm. (13/16 inch); thickness, 0.39 mm.

Finally, Fig. 6 shows the diagram of the spring of a marine chronometer, the measurements of this spring being: length, 112 cm. (43 inches); breadth, 8 mm. (5/8 inch); thickness of the outer coils, 0.32 mm., diminishing in the inner coils to 0.25 mm. The slight difference between the two curves on winding (the lower line) and running down (the upper line), shows that the loss due to friction between the separate coils is notably less than in the four preceding instances.

George Steidle, who recently purchased the store of George Kent, Williston, N. Dak., is about to make a number of improvements in the store. He has engaged watchmaker from Chicago.

Willet Robertson, Indianola, Ia., has taken the management of Paul V. McCoy & Co.'s jewelry business, at Minot, N. Dak. The store of J. P. Buechele & Co., Duquoin, Ia., was recently looted of \$200 worth of stock.

No Time at the Pole.

DR FREDERICK COOK, the daring Arctic explorer, in his account of how he discovered the North Pole, said:

"It was noon at the Pole, according to the sun. But it was an object lesson of the true hectic nature of all time. There was no time at the Pole, where all meridians meet. Nor was there much direction. All direction was southward from the Pole."

A peculiarity consequent on the unique position of the Pole, indeed, is that there is no time there. It is easily explained why it is theoretically correct to make such a startling assertion. Everyone who is conversant with the use of globes knows that all the meridians of longitude starting from the equator converge toward and meet at the Pole. It is well known, too, that longitude signifies time and that difference of longitude signifies difference in time. For instance, when it is noon in London it is about 7 o'clock in the morning in Boston, and when it is noon in San Francisco it is about 3.15 in the afternoon in New York.

Now, as the meridian of London extends to the North Pole, it necessarily ensues that when it is noon in the British capital it must also be noon at the North Pole. In a similar manner when it is noon at Boston, or in San Francisco, or at Pekin, or at any other place situated in the northern hemisphere, it follows that it must also be noon at the Pole, because all the meridians of those places unite at the North Pole. Therefore, it is noon all day long at the Pole! Thus there is an entire absence of time at the Pole; but it would be just as correct to say that it is a place where there is a preponderance of time, for it is practically any time of the day during the whole 24 hours, or, indeed, through the entire year. If time were money, we would have either lots of it at the Pole, or none at all, as we may choose. That there can be no east or west or north, but only south at the Pole requires no explanation.

New Rules at the Neuchatel Observatory.

THE Neuchatel Observatory has made a new departure, introducing some noticeable changes in its rules. There are five classes of chronometers—two for marine chronometers, one for deck chronometers (deck watches), and two for pocket chronometers. The marine chronometers are subjected to 63 days of observation, divided into nine periods of seven days each. The temperature commenced at 32° C., is lowered to 4°, and raised again to 32°, each period varying 7° from the preceding and the following. Marine chronometers of the second class are under observation for five periods of seven days each.

The cycle of temperature is the same except that the variations are by steps of 14° instead of 7°. Deck watches undergo 65 days of trial, divided into 14 periods. The first five periods are of four days, the tests for positions being at the ordinary temperature. The following nine periods are of five days, devoted to thermic tests, the position remaining horizontal.

Pocket chronometers are submitted to 46

days of tests, distributed in 11 periods, one of four days, the pieces being horizontal and at the ordinary temperature; four periods of thermic tests of five days in the same position, one period of one day in the oven in the vertical position, one period of five days in the same position, but at the ordinary temperature (18° C.), and four periods of four days for other tests of position at the ordinary temperature. The difference of the tests of the second class is that the thermic trials are of two days instead of five, and that there are two periods less of tests in positions at the ordinary temperature. The total number of tests in this class embraces nine periods and 27 days.

The clocks under observation are divided into two classes—astronomical clocks of high precision (A), and clocks of precision (B). The observations continue for three months, including three weeks of thermic tests. The temperatures vary from the ordinary to 30°, then from 30° to 6°, returning afterwards to the ordinary temperature.

Special interest attaches to the institution of supplementary tests to which pocket chronometers may be submitted on the application of the constructors. The most important of these are:

- (1) Thermic tests, during which the chronometers are exposed to temperatures varying from 17° below zero to 46° above.
- (2) Tests for chronometers furnished with electric registering apparatus.
- (3) Tests in a magnetic field.
- (4) Tests under different atmospheric pressures, which have been suggested by the well-known experiments of M. Dittschheim.

These supplementary tests respond to modern requirements. Explorers require timepieces adjusted for extreme temperatures and varying pressures, and the march of electrical science has presented new and important conditions.

Why the Emperor Napoleon Rose on Time.

IT has been claimed that the Emperor Napoleon was always able to wake at the precise moment desired. The truth is that Napoleon had a good alarm clock—the best ever made by the celebrated horologist, Bréguet. This timepiece Bréguet considered as his *chef d'œuvre*. It was constructed in 1810 for the Emperor and accompanied him in his Russian and French campaigns, afterwards passing into the collection of the Princess Mathilde. It is of gilded bronze and embraces eight dials, the year. It is furnished with a small thermometer and strikes the hours and the quarters.

The 100,000 British residents of Argentina have decided to erect a memorial clock tower on some prominent site in Buenos Aires to mark the first centenary of Argentine independence in 1910. A monument will be erected by the Spanish community in Argentina—a large and wealthy body—while the French, Italian and other foreign elements have similar plans on foot.

DON'T WASTE YOUR BREATH

attempting to sell at a profit the identical goods that the Mail Order Man sells. He will beat you nearly every time.

"Turn the tables" on him and sell the goods you know he cannot buy.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Mechanical Window Display Showing Features of the Hudson-Fulton Celebration.

Prepared expressly for The Jewelers' Circular-Weekly.

IN last week's issue of THE JEWELERS' CIRCULAR-WEEKLY was published an original display for the Hudson-Fulton celebration. The accompanying diagram shows

small one at a nominal price. If a very small show is being made pans of suitable size can be bought at any house furnishing establishment. Your electric fan is placed

which some dark paper or cloth has been laid. Every jeweler has a few surplus glass shelves.

Conceal the front edge of the tank by a row of small boats. These can be made of newspaper or magazine illustrations cut out and pasted on stiff cardboard. A large "ship" or two, also procured from some illustrated papers, is used to screen the fan from view, unless it can otherwise be conveniently hidden.

Fasten in the center of tank two toy boats, rigged up to represent the *Half Moon* and the *Clermont*. Have square-rigged sails for the *Half Moon* and a smoke stack for the *Clermont*. Gray and black babb ribbons are fastened inside the smoke stack and both vessels should be decorated with flags. Cheap toy boats can easily be made up to represent both vessels. (See Fig 3.)

When the current is turned on the fan will blow and cause the sails to swell out. The smoke (*i. e.*, the ribbons) will blow and ripples will be seen on the water.

A line of battleships of all nations are placed across the rear of the windows. These also are cut-outs pasted on cardboard. If carefully constructed a very realistic representation of the Hudson-Fulton spectacle can be gotten up. The expense need not exceed \$2, unless one cares to make the exhibit very elaborate.

Other suggestions for which the tank and fan can be used are:

(1) A scene showing Hudson discovering the river which bears his name, with Indians in small canoes paddling around.

(2) A scene showing three types of vessels—Hudson's *Half Moon*, Fulton's *Clermont* and a modern battleship, each bearing the dates, respectively, 1609, 1809 and 1909.

The Triumph of Enthusiasm.

By XENO W. PUTNAM

IT is hardly more difficult to start a business without capital than it is to keep one going without enthusiasm. The best of credit will not tide us over this difficulty. Any man who does not believe in his own goods should be in some other business, else he will be out of any business before long while he who cannot get a proper degree of enthusiasm worked up for a line of goods in which he actually believes will never intended for a business man.

It is true that natural enthusiasm comes from an endowment fund placed to our credit in a greater or a less amount before we have a great deal to do with the running of our own affairs. It carried us

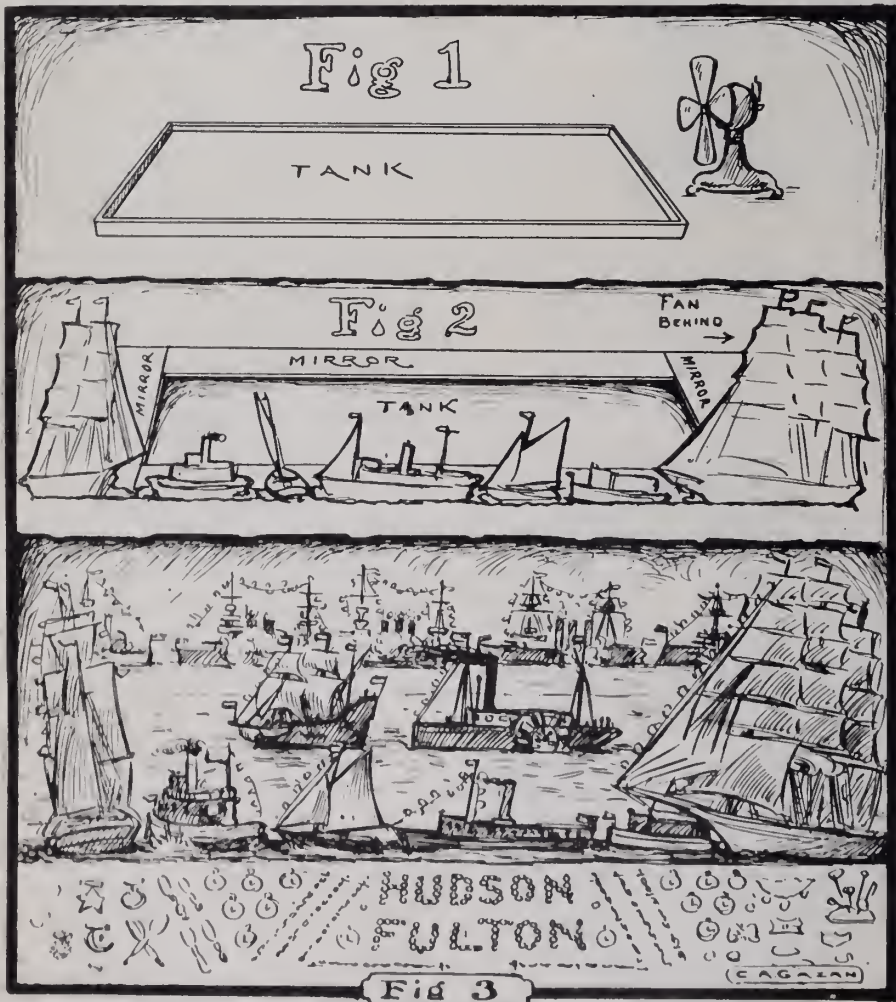

DIAGRAM SHOWING HOW TO ARRANGE A TIMELY MECHANICAL DISPLAY AT NOMINAL COST.

a mechanical window display, which may be arranged at very little expense, the motion features being obtained by an electric fan.

Fig. 1 represents a shallow tank made of a size to suit the window in which it is placed. A tinsmith will construct a

so that the blades are level with the surface of the tank.

If possible, conceal edges of the tank with small mirrors laid around the sides (Fig. 2). If it is inconvenient to use mirrors, level off with glass shelves, under

Storekeeping Department.

ough many a blackberry patch and hard-fight football game earlier in life and our courage up to the point where we truly believed we were having a good time. It ought to take us through the strenuous business encounters, convinced that we are enjoying ourselves, if there is enough of it, but the amount of our original credit may not be enough to take through all of our difficulties or we may overdraw our account during the blackberry and football season. The original fund may be increased, like original if we are faithful in developing the same as the other, but we must not depend on spontaneous combustion to fire it up for us.

hen the volatile young commercial man, hatched from the road and rich only in his unshaken faith in his own goods, comes upon us it is worth while to listen to him just for the contagion of his enthusiasm, even though his story does not conform to all the ethics of good salesmanship. We need his enthusiasm to kindle up our own smoldering stock, whether we have his goods or not. His sublime faith, his irrepressible conviction that his own way is the best ever made, the entire absence of a suspicion that there may be anything else that can be compared with it, is worth more in shaking out the wrinkles from our commercial liver than the most orthodox business discourse in the world. How this fresh young enthusiasm thaws

the corners of our commercial heart that have been frozen up by our conservatism for years. We smile inwardly at these boyish dreams, but we feel the rich blood of endeavor bounding to our fingers again with an electrical thrill that we had three parts forgotten. Something reaches into the far-off corners of our ambition and sets the spider-web of indifference to vibrating with renewed motion and we begin to feel somewhere under this old business shell that we have dragged about with us until we are tired of it, there is still enough of that old football life to give us a good time again if we saw fit to turn loose. Of a sudden we are converted from the mere talking machines we have unconsciously become into thinking, living beings again.

Someone has said that the way to build up a solid business is to mix one part capital, two of conservative, three of careful study and four of hard work. Such a recipe would indeed make a solid business and a very uninteresting one. Even if with a dash of genuine enthusiasm and it fills our commercial world with something we are proud of; that we like to labor over and can truthfully refer to with the same boyish spirit that carried us through the blackberry patch in boyhood. If we wish to create the inspiring, rising business that today demands, we must not omit the measure of enthusiasm which gives snap to the endeavor and flavor to success itself.

No retailer is quite as close to the fountain-head of his supplies as the commercial man is. He still reeks with the odors of the lapidary's shop and he glories in the smell, for it inspires him. He knows the goods he handles; has seen them in the

making; believes in their merit, and is enthusiastic in their praise. If his experience on the road convinces him that there are no other lines as complete as his own the extra enthusiasm he pours from the vials of his innocence makes up in inspiration what it lacks in judgment.

Get as close as possible to such a man. If you are selling his line of goods he will give your own faith in them such a thorough replating that your own enthusiasm for them will stand any reasonable test put upon it by some acid customer. If you

The Attractive Retail Jewelry Establishment of J. E. Copeland, Palestine, Tex.

THE attractive retail jewelry store of L. E. Copeland, Palestine, Tex., is illustrated herewith. There are four wall cases on either side of the establishment, each being 10 feet in length. These are connected with five mirrors, three feet high. Across the rear of the store there is a wall case 15 feet wide. All of these display cases have mirrors at the back.

The counter cases, of which there are nine,

INTERIOR VIEW OF THE ESTABLISHMENT OF J. E. COPELAND, PALESTINE, TEX.

are selling some other line you will sell it all the better for associating with this whole-souled fellow who throws every ounce of himself into his work. He is an object lesson and an inspiration, both at once.

The enthusiastic may err in judgment frequently, but he some way makes up for it in his sales, for he fills the doubter with his own convictions, which, after all, are pretty certain to have some merit back of them. Is it not for the retailer to follow the example of this confident enthusiast?

Unique Store in Los Angeles, Cal.

THE new store of C. H. Clark, 325 W. 4th St., Los Angeles, Cal., is unique in its arrangement. One side of the store is devoted entirely to manufacturing, with benches, machinery, etc., and the other to the sales department. Across the rear has been constructed a partition representing a half section of a bungalow, roof included.

This is entered by two doors, one on each side. That on one side opens into the dark room of the optical department, and that on the other into the melting room, where the furnace connected with the manufacturing department is located.

including the horseshoe-shaped case in the center, measure, each, 10 feet in length, with the exception of the latter, which measures eight feet. On the right side, as one enters, is the watch repairing department, and directly opposite this is the diamond room. The front of the store contains a vestibule and is very attractive.

The show windows are large and well adapted for the display of stock, being 12 feet wide and three feet deep. The entire building was renovated only a short time ago, at a cost of \$250. The flooring is of tiles, while the ceiling is made of steel. The illuminating facilities are especially effective, the electric lights used numbering in all 270. Besides these there are 12 gas lights. The building measures 25 by 100 feet, 80 feet of which is occupied by the concern.

The furniture and fixtures are all of mahogany and present a rich appearance to the visitor. Mr. Copeland is watch inspector for the International and Great Northern Railroad, and by his energy and enterprise has succeeded in building up a very successful business.

T. S. Ellis, Fairland, Okla., has gone out of business.

Effective Advertising Repartee.

Jewelers' Timely Response to an Alleged Misleading Advertisement.

CONSIDERABLE enterprise was shown by Miller Bros. and Marston & Seaman, jewelers, of Albany, N. Y., recently, when a concern outside of the jewelry trade advertised watches for \$4.95 in an advertisement 12 inches deep and 17 inches wide, stating therein that such watches could not be duplicated at a regular jewelry establishment for less than \$10 to \$15. The jewelers, to use a slang expression, "went this concern one better" by offering watches for \$3.95 in a large well-set advertisement.

The chief reason for advertising watches at this price was in order to prove the falsity of the assertion in the competing announcement that the jeweler's price for similar watches ranged from \$10 to \$15.

Edward Wentworth, president of the Albany Jewelers' Association, who was also concerned in this bit of enterprise in behalf of the jewelers, is authority for the statement that Marston & Seaman, from Friday morning until Saturday noon, disposed of 342 watches, while Miller Bros. sold about 400. Coincident with the running of the ad. attractive window displays were made by the jewelers, who exhibited the watches, and several timely cards bearing the price and convincing inscriptions.

Among the latter were the following:

- Remember we are jewelers, not gunsmiths, and our guarantee is worth something to you.
- Don't be misled by false statements, you will only have to suffer in the future for it.
- You can fool some of the people some of the time, but you cannot fool all of the people all of the time. Remember our price is \$3.95—not \$4.95.

The above cards were used by Marston & Seaman. Miller Bros. also used timely cards bearing inscriptions in large attractive lettering and a clipping of their advertisement was also shown.

This vigorous and timely advertising on the part of the jewelers did a great deal to destroy any wrong impression regarding the alleged exorbitant prices charged by the jewelry trade, which impression might have been created by the advertisement of the concern outside of the jewelry trade.

The text of the advertisement used by Miller Bros. is as follows:

Friday and Saturday only—Aug. 27 and Aug. 28—Don't buy an unknown, unreliable watch; it will prove a source of annoyance to you, and no conscientious dealer who appreciates your trade will offer one for sale. Most watches advertised as being

of \$15 and \$20 value, and sold for about one-third of that price, contain fake movements and fake cases. The cases are marked 20 years, 15 years and 10 years, but you are lucky if they retain their wearing qualities for over a year. You ought to know that any watch will run for 10 days from the time you buy it, but you are foolish to spend your money for a timepiece guaranteed only for that length of time. For 40 years we have been watch-making and watch-selling, and all the knowledge and experience that we have gained in that time is at your service. To-morrow we inaugurate the best watch sale Albany has ever known. The kind we have secured for this sale are fully guaranteed. They have an elegantly engraved dust-proof case and are stem wind and stem set, and our personal guarantee is behind this statement. They are beautiful and serviceable watches; all have high-grade works and cases. They have been examined and regulated by our own watchmakers, the most expert in Albany. Wide choice of patterns, sizes, dials, cases, etc. Sale starts 8 A. M., Friday, Aug. 27, and positively closes Saturday, Aug. 28, 10 P. M.

Advertising and Salesmanship.

By GEORGE FRENCH in *Advertising and Selling Magazine*.

THE successful selling of goods is accomplished through a thorough knowledge of the goods being added to a thorough knowledge of the people who are expected to buy the goods, and a thorough knowledge of the conditions of trade, and this knowledge being skilfully applied by capable salesmen.

Successful advertising may be defined in almost identical terms. It requires a thorough knowledge of the goods, the people and the conditions of trade—and much more.

Salesmanship and advertising have the same object—the sale of goods. In their application they follow the same general course much of the way toward the sale, but indulge in divergences and tangents. In fundamental motives, these two grand divisions of selling are essentially alike, but in practical operation they are very dissimilar. They vary most radically in the personal qualities necessary for the successful practice of either.

The successful salesman may not be able to either conceive of or practice the art of advertising, and usually is not. The good advertiser may not be able personally to sell, and often cannot.

Salesmanship, as usually thought of, the selling of goods through personal contact with the buyer.

The advertiser never knows the buyer never sees him, and would not know how to approach him if he did come in personal contact with him.

Here lies the radical difference between salesmanship, as it is usually considered and advertising. While both have the object to sell, each differs from the other in the means employed to accomplish the selling; and the difference is so radical as to constitute for each a field of its own, and a science and pedagogy of its own.

The problem of advertising always involves the problem of selling, and the problem of selling generally involves the problem of advertising; but not invariably, if you use the term advertising as it is usually employed. It is possible to imagine a selling campaign without advertising, but you cannot imagine an advertising campaign without selling.

Salesmanship embraces the whole of advertising. Advertising is only one element in salesmanship; as it is usually understood it is a subordinate element, though usually so important as to form the keystone of the selling structure.

In its real and broadest meaning selling comprehends about all there is to business. The producer is always guided by the needs, capacities, limitations and opportunities of the seller. Every co-ordinate and subordinate branch or department of business is shaped and directed by the selling element.

From the modest tender of the laborer to the man who has nothing but his muscle to offer to the largest financial transaction, business is selling. Each man profits by his capacity and his attainments according to his ability to sell his capacity and attainments, and is to that extent a salesman, just as the largest factory disposes of its enormous product.

Religious, social, political and educational movements and institutions depend for their spread and life upon salesmanship, just as truly, and just as particularly, as do the factories, the mines, the stores, and all the industries.

In its broadest and truest sense, therefore, salesmanship is one of the chief elements of life in its broadest and truest sense.

But it is not exactly this aspect of selling that we have in mind. For practical purposes the limits of salesmanship must be brought down to the selling of merchandise.

The object of salesmanship is to sell. The object of advertising is to turn people's minds favorably toward buying. Whatever tends to do this is advertising. It may be printed matter, spoken words, or anything whatever which tends, directly or indirectly to produce a favorable impression toward definite selling proposition.

The radical and fundamental difference between salesmanship and advertising lies in the medium of approach to the buyer and the method of approach.

Broadly, salesmanship implies personal contact, and advertising implies contact by proxy.

This is an unsatisfactory definition—an arbitrary definition—since there are so many methods of contact that partake of the direct personal and the proxy, and which cannot

absolutely classed with either. Yet for purposes of noting the peculiar field of which it may be that the definition used is good as any, if there must be delimitations recognized, as practice and popular reception demand.

The salesman may, by reason of personal contact, adapt his method of attack as the developments of the personal interview suggest. The advertiser cannot. With the salesman it is man against man. With the advertiser it is an idea in print against man. In the one case there is opportunity for the acquisition of new knowledge during the act of selling, and the application of that new knowledge for the benefit of the seller. In the other case there is no such opportunity.

Therefore, considering the nature of the tasks set for the salesman and for the advertiser, and considering the likenesses, differences and opportunities of each, it is not that to qualify for his work the salesman must know the people to whom he is

of experience, there is yet prevailing very strong beliefs that selling campaigns can be successfully presented without the assistance of advertising, and that advertising campaigns may be made successful if they do not co-ordinate with those salesmanship principles which must envelop and accompany the goods from the birth of the idea in the originator's mind to their delivery to the consumer; yes, and during the whole of the life of the goods in the hands of, and to the use of, the consumer.

ing campaigns are based squarely upon the principle that conceives of selling and advertising as expressions of methods leading to the favorable attention of the particular class or classes of people that need the particular goods to be sold.

Many successful campaigns have not recognized this principle. Some have deliberately and consciously ignored it. Some have denied, and even flouted it. But these successes have always been limited—might have been much greater if the selling plans had considered that, whatever the commodity and whatever the circumstances surrounding its making and marketing, it must always be sold by one man to another man; that in the selling the buyer's attention and interest must be secured, through advertising, whether or not the sale is effected through personal appeal, over the counter, or through the mails; that the plan of the selling campaign and the actual closing of the sales must be made in accord with the ascertained principles and tested methods of salesmanship; that salesmanship and advertising are interwoven together, like the red and white corpuscles of the blood, act and react for and upon each other, and to forward the sale; that there can be little selling without advertising, and no advertising without salesmanship.

The study of selling, from this point of view, is the most vital element in the development of the business of the twentieth century. The skilled application of the teachings of such study leads to, and is responsible for, many of the more recent of the great business successes.

Every man must blow his own horn nowadays and judicious advertising is the great horn that enables many to make themselves heard in the din of competition.

SILVER—We are selling our sterling silver bowls at cost. We have only a few left. This is done in order to make room for new goods which are arriving daily. Get our prices before going elsewhere. We are here to save you money on anything in our line. Engraving free. Greenwoods, Inc., Norfolk, Va.

GOOD CLOCK AND WATCH ADVERTISING.

have given our experts unusual experience, and it is at your service for a very modest cost. Suburban people will find it to their advantage to deal exclusively "at the sign of the street clock," both as to results and expense. H. A. Howland, New Bedford, Mass.

Engagement rings for Cupid's victims we are showing in solitaire diamonds that look like drops of fire, with all the scintillating glints of the rainbow in both large and small stones of the purest water, full of life and fire. We have all kinds of beauty in precious stones and in combinations that make the most exquisite effects in new and rich designs in settings. A. B. Kennedy, Ithaca, N. Y.

The engagement ring is the golden prophecy of coming wedlock, and the anticipated event should never lack its finger forerunner. Our ring display shows as pretty a line of first choices as one could wish to find. Fashion frolics in a bright array of novelties that flash and gleam in a luminous procession. Jewelry has its triumphs and here they are. Virgin & Young, Macon, Ga.

sell in order that he may differentiate individuals, estimate their divergences, take advantage of their personalities, and by doing so win; while the advertiser must combine his knowledge of the people whom he expects to persuade to buy to general habits, tendencies and predilections, which apply to man in the mass, or, at best, to classes of men. The individual does not concern the advertiser, and he cannot avail himself of the wonderful power of personal appeal.

The distinction between salesmanship and advertising is a very real distinction, and upon its recognition depends the success of about every selling campaign to a greater or lesser degree. But the distinction is one having chiefly to do with methods rather than with principles. To an appreciation of this patent fact and a frank acceptance of it is traceable all of the supposed conflict between salesmanship and advertising, and much of the weakness and inefficiency of both.

Despite all the obvious teachings of the theoreticians, and the unanswerable arguments

KALANA GLASS

AN entirely new and beautiful effect in etched glassware in which floral designs, such as pansy, lily, poppy, geranium, etc., are shown in an attractive manner true to nature. No illustration could convey the exquisite beauty of this ware.

The China and Glass Department.

Practical Pointers on How to Arrange the China and Glass Room in Order to Display the Goods to the Best Advantage and a Word Regarding the Value of Good Salesmanship.

(From the *House Furnishing Review*.)

CHINA, glass and art wares, excepting possibly table ware, will stand almost any level of profit, no matter how high, provided the goods "look the price"—and they usually do.

If, therefore, the china and glass ware department does not pay there is something wrong somewhere, but the probabilities are that "something" is not the stock. To find out what is wrong, examine the loss by breakage, the cost of selling and stocking the goods, the loss by carrying over-stocks or too large a proportion of slow-moving wares, the method used in figuring prices and the efficiency of your sales clerks. If you do not discover the weak link by the time you complete such an investigation, there still remains another explanation—that the volume of sales does not warrant the amount of capital that is invested in stock, or, in other words, your china and glass is not suited to your trade, and, therefore, does not move fast enough.

LOCATION OF THE CHINA DEPARTMENT.

One of the most important considerations to the china and glass dealer is the location of his department. In the case of the china dealer, who also carries house wares and other goods, we believe his china and glass should have the best light, decorations and fixtures the store allows. We would add that great care must be taken of china and glass to keep it free from dust and grime; to take the samples out of the raw or other packing; to have the tables clean and highly polished, and to make the china and glass look choice and costly. We have seen some stores that did not do this, to the detriment of the really highest line of goods they exhibited. The controlling idea should be to make every piece of china or glass exhibited look to be worth about twice what is asked for it, and these goods lend themselves readily to such treatment. This policy pays, because it makes the goods desirable. In other words, it makes them sell easily at high prices.

THE MATTER OF STORE ARRANGEMENT.

When it comes to the question of how to arrange china and glass ware, volumes might be written. Primarily, most small stores lack space, working capital and facilities, and the consequence is the stock becomes cramped, dusty and cluttered up and eventually unsalable. If you must cut

down on expenses somewhere, reduce your stock and buy suitable fixtures—your fixtures are of more importance to you than your stock. Maybe that sounds like a wrong statement to you. If it does, just take yourself to one side and think it over good and hard. It may help you to sit down and figure out which pays better profits—a large stock of goods you find it difficult to sell, or a small stock of goods that sells rapidly and profitably. The fixtures do the trick. * * *

Being crowded for space, the dealer is almost certain to build shelving sometimes four feet high over his tables, shutting off a bird's-eye view of the whole stock from the front entrance, cutting off the light from the wall shelves and also making it impossible for his clerks to keep his tables and shelves clean and free from dust. The table shelving is a bad mistake, and should not be tolerated for a minute longer than is needed to take it down.

The small dealer should use wall shelving (preferably cabinets with glass doors) wherein to show tall pieces, art ware, etc., and he should use small tables with mirror tops for glass ware, tables with a high polish for the more costly grades of china, or mission may be used throughout for fixtures and tables. The tables should run about four by six, six by nine, or, at most, nine by 12 feet, or any other convenient size. They should be placed crossways with aisles between. Prices should be plainly marked on all goods, and the goods should also be arranged in sections indicated by signs, such as Table Wares, Art Wares, Cut Glass, Table Glass, etc.

THE MATTER OF FIXTURES.

As to what fixtures to use, this matter depends largely upon the goods to be displayed. Costly cut glass, high-priced china, etc., should be given treatment in keeping with their value. Show cases and wall cabinets should shelter the art wares and the fancy china; cut glass should be displayed by tables with mirror tops, and on shelving with mirror backs, electric lights being used to bring out the prismatic colors of cut glass. Mahogany tables, real or imitation, should be used with certain grades of art wares and bric-à-brac, and in general every attention paid to details in store fixtures and furnishings, that the china and glass ware may all of it be invested with an atmosphere of luxury, good

taste and intrinsic value. Attention to these matters, we repeat, means that the dealer can ask and obtain high prices for his goods.

HOW TO FIGURE PRICES.

Too many merchants add their profits to the cost price instead of to the retail price of the goods. Assuming that the factory cost of an article is \$1, the price should be figured in this way:

Factory cost	\$1.00
Freight, breakage, etc.....	.10
Selling expenses—maintainance of store, wages, light, heat, interest, etc.....	.25
Actual cost.....	\$1.35
Twenty per cent. profit would be.....	.27
Selling price.....	\$1.62

The above example shows in simple form just how the price of an article costing \$1 at the factory should be figured, so that the dealer may realize a profit of 20 per cent. We hear every now and then of merchants who, wishing to realize a profit of 20 per cent. on an article bought at \$1, set the price at \$1.20, forgetting to add freight and selling expense to the factory cost before they add their profits. Such a mistake means eventual bankruptcy.

THE SELLING END OF THE CHINA DEPARTMENT.

When it comes to a consideration of the selling end of the china and glass business, assuming that proper attention has been given to fixtures, furnishings and store arrangement, we are struck with the importance of competent salesmanship.

We do not believe the average sales girl can sell china and glass with any degree of success, except in the case of the cheapest class of goods. If all that is needed to say is: "Them tumblers are six for a quarter," the sales girl will do. If the customer asks her "What kind of glass are they made of?" the sale is off right there, for few sales girls have any conception of the difference between lead-blown glass, moulded glass, etc. True, the customer might not pursue the subject further, but if the sales girl were competent to tell her why lead-blown glass is superior to tank glass, and then go into the subject of etched decorations, etc., illustrating the differences by samples from stock, the customer would soon find herself buying choice glasses before she knew it.

Suppose, for example, Mrs. Newlywed, with a more or less limited purse, found she had received odd pieces of cut glass as wedding presents, and needed certain articles to round out her collection. She would argue that genuine cut glass was beyond her means, and when she came into the china store to look around she would have that thought in mind. A clever sales-

The Auctioneer You Want

is the one who has the reputation.

In the 20 years that I have been conducting Jewelry Auctions not one of my clients has failed or gone into bankruptcy. They have all paid their bills 100 cents on the dollar and their trade has increased after each sale.

Just a few whom I have made
three or more sales for:

MERMOD, JACCARD & KING
JEWELRY CO.,
ST. LOUIS, MO.
L. LECHENGER, HOUSTON, TEX.
A. H. RICHARDS, EL PASO, TEX.
ROSENCRANTZ-THATCHER CO.,
MILWAUKEE, WIS.
GUSTAVE FOX CO.,
CINCINNATI, OHIO
P. H. KLINGMAN,
GRAND RAPIDS, MICH.
A. E. PAEGEL,
MINNEAPOLIS, MINN.
M. SCHOOLER CO.,
NEW ORLEANS, LA.

MY CREDENTIALS

Are the certified testimonials of satisfied clients. Every Jeweler should read them. They tell a story of achievement unparalleled in the jewelry auction business. I hold the record for sales made, the aggregate of goods sold and of profits made for my clients. No failure on my part; no disappointment on your part; no dissatisfaction on the part of purchasers. My clients' chorus of praise for me is no conspiracy—it is a spontaneous expression of gratitude for successful service. They will tell you so. If you are thinking of an auction sale, write me at once.

After I get through with an Auction you have no old or unsalable goods left. I advertise your store and bring new trade and renew confidence in your old trade. All first class jewelers should have an auction every three years, then your profits are not tied up in unsalable goods but your stock is always fresh and up-to-date. Try it.

could, by a few leading questions, draw what she desired, and then without telling how much she had to spend, show first the pieces she wished in genuine glass, at the same time stating the cost. Then he could compare them with the same pieces acid finished, and again with the same pieces made from the moulded blanks. He would point out how slight are the differences in appearance between the grades, and there is such a great variance in price. And her order for the articles she desired. She might buy the genuine cut glass, she could afford it, even pinching a little where; but if not she would certainly buy one of the cheaper grades before she left the store and would return to the salesman to find out for she would be impressed with the idea that he knew her needs and how to satisfy them to the best advantage.

When it comes to china ware the same thing holds true. The difference between American and imported table wares in quality, decoration, shape and finish furnish the most interesting fund of selling talk and argument for the purchase of high-priced goods. We do not intend to disparage American wares, for there are a number of high-grade lines of American table ware on the market, but there are also many extremely cheap grades known in the trade as "mud," and the profits on these goods are as low as the price. The china dealer, drawing comparisons, can readily sell his higher-priced and more profitable goods. As to art wares, here enters the element of craft-manship. The educated salesman who knows how the pieces are moulded, something of their composition, a great deal about how they are decorated and fired, has a fund of information at his command which will please the connoisseur, entertain his customers and lead them to value highly the goods they buy, and also treasure and appreciate them at their real value. Such selling talk eliminates forever the question of price. Those who love art wares will make any kind of sacrifice to buy a piece of china or a vase, or any other object they covet. The higher the price they have to pay the more they value it, and the better they know its history and how it was made the more they long to possess it.

Salesmanship in the china and glass store is a valuable asset. The proprietor should possess it, and so should his sales assistant, the main point being well-paid and well-informed salesmen are well worth while if not absolutely indispensable to the china dealer. Knowledge of the craft pays big dividends in the form of higher prices and longer profits.

Fighting Mail Order Competition.

(Address of J. M. Goldstone, Bennett, Ia., before the Convention of the I. R. J. A. at Des Moines.)

WE are told that necessity is the mother of invention. I might add that threatening dangers and calamities are prognostications of defense. This will apply very well to that serious evil confronting the retail merchant, especially the jeweler, the mail-order house. This octopus is stretching out its long, greedy arms and trying to entwine the jeweler until he is securely bound by its meshes.

In Kansas the people have severe storms

and are constantly fortifying themselves against these storms by the use of structural steel in their buildings. These massive pillars will not do away with storms, but they will lessen their damming effect. Now, if the people of Kansas can guard against their disastrous storms, which are almost uncontrollable, then why cannot the jewelers of Iowa destroy this stifling monster, the mail-order evil, which is governed by the law of man?

It is true we cannot kill mail-order competition at once, for it is too firmly entrenched in the minds of the gullible American people; but we can, by the helpful aid of advertising, cut the monster's tentacles so that he can scarcely crawl, and in the end he must succumb to the inevitable, and the jeweler will be free from this evil.

Fellow jewelers, come out of your long nap—get your back from your bench and look after the selling part of your business. Don't drone your life away lying over your bench poking away at mainsprings, etc., and continually complaining that someone else is getting the gravy. Use some good, live, honest advertisements in your local paper, and you will do more to kill the mail-order evil than anything else under the sun.

That advertising is a power for success is admitted by every successful business man or corporation in this country. Nothing appeals more and sells more goods to the people than a persuasive advertisement in a magazine or newspaper. There are, of course, other methods of reaching the buying public, such as circulars, personal letters, etc., but the best medium is the newspaper or magazine. Come out of your trance; join the ranks of the progressives. Then and only then will you have success.

Here is an illustration showing wherein advertising helps. We carry a line of wall-paper and druggists' sundries in addition to our jewelry stock. This Spring I sent out to nearly all my patrons a small assortment of wall-paper samples. Montgomery, Ward & Co. did likewise, and had a pattern identically the same as ours, the same weight and quality, the only difference being in the price. They asked 18 cents per double roll, and we asked 12 cents. We took the two samples, pasted them side by side, showed the people we saved them 6 cents per double roll, the freight, waste, etc., and the result was that Montgomery, Ward & Co. sold one bundle of wall-paper in this community, and that was to a party who has owed us an account for the past five years.

Incidentally, I might add that if the parcels post as suggested by Postmaster-General Meyer is adopted it would also be a great aid in abolishing the mail-order houses.

We should turn our support and patronage to the firms who are joining us in this struggle, and I think we all owe a vote of thanks to a certain large watch house which has led a terrific onslaught upon the mail-order houses, and we should give it our support by carrying a line of its goods.

In conclusion, gentlemen, the sooner we join hands and minds against our common foe, the sooner we will be rid of him. Therefore, let us begin at once. Let us make a grand assault against our most dangerous enemy, and the mail-order house will be a thing of the past.

NEW EFFECTS IN
ROYAL DOULTON

"CLOUD and Landscape" pottery is a recent addition to the line of

Royal Doulton ware now on exhibition at the salesrooms of W. S. Pitcairn, 44 Murray St., New York. This decoration is something decidedly new. The clouds are in white, and the landscape effect in natural colorings. This ornamentation appears on jugs, trays and numerous other objects. Rail plates showing a variety of scenes are also exhibited by the same firm. The "Eglington Tournament" is one of the most popular of these rail plate designs. It shows two knights, mounted on chargers and dressed in coats of mail, about to engage in battle. Not less attractive is the line decorated with representations of cavaliers of the 17th century, who are shown in the gorgeous costumes of their day in a variety of beautiful colorings.

ATTRACTIVE CUT GLASS
FOR FALL

AT the New York salesrooms of the International Silver Co., 9 Maiden Lane, New York, is displayed an attractive line of cut glass suitable for Fall use. Included in the exhibit is a tall cut glass flower receiver, suitable for golden rod. It has a round base which is notched and scalloped and embellished with artistic cutting. From this base rises a standard which gradually grows smaller until near the top, where it forms a knob-like section. Above this knob rests the bowl or holder. The piece is cut with much skill and shows artistic conception. Among other seasonable offerings at the same salesrooms is a line of dainty fruit or flower baskets. These are shown in a number of sizes with dainty handles and cut in artistic patterns. The assortment also includes salad bowls, candy trays, wine and cordial sets and other pieces.

NEW SUBJECTS
IN BRONZES

"L'INDUSTRIE" is the title given a French bronze statuette seen in a New York salesroom recently. It shows a stalwart man standing beside an anvil. One hand rests on the anvil, while in the other is grasped a heavy sledge. Beside the anvil is a partly completed wheel. The figure is mounted on a round base and rests on a slight pedestal. Another exhibit seen at the same salesrooms is called "Le Mineur." It represents a miner dressed in crude garb, with his pick across his shoulder.

THE RAMBLER.

Frederick D. Wermuth, New Matamoras, O., is now located at Bremen, in the same State.

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2335.—**Roman Coloring—Gold Solution.**—Please send me a recipe for making gold solutions for Roman and what finish to be used with electric batteries to color jewelry after being repaired.
G. I. P.

ANSWER:—**Roman Coloring.**—We will give you the formula for gold solution per se and you can reduce the amount in proportion if you want less. Take distilled rain water, one gallon; cyanide of potassium, 3½ ounces, and gold chloride, 3 1/10 ounces. The articles to be plated must be mechanically clean. Care should be taken that they have no finger-marks. Heat the solution and hold the article in one hand, suspended on a wire, and the anode in the other, and move about in the solution. If you do not obtain the color desired, remove with a scratch-brush and try again until the desired shade is obtained. If the solution is rich in gold there will be no trouble in getting Roman gold finish. **Gold Solution.**—An excellent gold solution, and one which is capable of giving a rich gold color, is made by the use of chloride of gold and cyanide. Its simplicity is such that no one should have any difficulty in preparing it. It is made as follows: Water, one gallon; potassium cyanide, three ounces; sodium sulphite, one ounce, and gold, one-half ounce. The gold is first converted into chloride by dissolving it in aqua regia (a mixture of three parts of muriatic acid and one part nitric acid) and then evaporated in a porcelain dish until syrupy. The cyanide is dissolved in water and then the chloride is added and the whole stirred. The sulphite of soda is next introduced and the whole is ready for use. The bi-sulphite of soda may be omitted from the formula desired, but the deposit is brighter and more uniform when it is present. The quantity of gold that is given in the preceding formula is greater than that usually employed for gold baths, but if it is to be used for heavy deposits it will not be found so much. If desired, the solution may be diluted with three or four times its volume of water and still obtain a good deposit. Under such conditions, however, the deposit is slower than in the concentrated solution. One advantage of this gold solution is the fact that it may be used either hot or cold. While the best deposits are always obtained in the hot gold solutions, there are instances where it cannot be done and the operator will be surprised to find how good a deposit may be obtained in the cold solution. It is not advisable, however, unless necessary, as the gold deposit adheres better when deposited from a hot solution for

the reason that the cyanide is capable of dissolving any film or grease or oxide that may be on the surface of the brass that is to be plated.

Simplified Electroplating for Jewelers.

(Written expressly for THE JEWELERS' CIRCULAR—WEEKLY by "R. B.")

(Continued from issue of Sept. 1.)

ARTICLES to be nickel plated which are to be subjected to only occasional wear may be highly polished first, especially if such articles are made of brass, copper or German silver.

After polishing they should be plunged into hot potash for the purpose of removing the grease, finger marks or stains. Thereafter quickly run through fresh running water, then into the cyanide water, and remove instantly. Wash in fresh water again and immediately place in the nickel bath for a few minutes, when the articles will be ready for removal and may be dried. That done, the articles should be lightly buffed for a high polish, and they are presently finished. This method is cheap and convenient, and well adapted for cheap work in large quantities.

When, however, a good durable deposit is desired the surface of the article to be plated need not be highly polished, but simply smooth and clean, and should be allowed to remain in the nickel bath from 20 to 30 minutes. It should be plated very slowly. The more slowly it is permitted to plate, the whiter and harder will be the deposit.

Great care is enjoined upon the operator not to allow any bubbling to take place during the plating operation. The bubbling is caused by the strong electric current giving off hydrogen gas and rendering the deposit loose, spongy and unadhesive.

To avoid this difficulty, in the absence of a rheostat or a switch board for the regulation of the electric current, the operator may regulate the current and prevent bubbling simply by raising or lowering the anode in the bath—that is, subjecting more or less anode surface to the action of the bath. It hardly need be said that the smaller the amount of work placed into the bath the less anode is required for plating.

It will be readily seen that, by thus raising and lowering the anodes, the current can be controlled with ease. Of course, it is understood that rheostat or switch board is preferable.

But for plating in a small way, as is frequently done and found necessary by the average jeweler, the switch board can be

dispensed with, and the operator in a comparatively short time may become so proficient as to be master of the situation without any loss of time, and obtain the desired current strength with a single adjustment.

Above all, this must not be overlooked: The connections at the anode and cathode rod must be maintained in a very clean condition. The importance of cleanliness in this respect cannot be over-rated, as it is indispensable to good and satisfactory results.

Dirty connections will not only retard the flow of the current, but break it, and thus stop the plating. While one may entertain the fairest hope of success in the outcome of the operation, to his dismay he will find that the work in the bath is ruined. Cleanliness, therefore, cannot be too highly appreciated.

The solution in the bath should not be disturbed during the plating operation, as the carbonate of nickel will sooner or later accumulate and deposit on the bottom of the bath, and the slightest stirring will bring the same to the top of the bath and cause a dark, yellowish deposit. When not in use the bath should be kept well covered and free from dust.

In the proportions given above the solution may be enlarged to any desired quantity.

(To be continued.)

A New Method for Plating Aluminum.

IN a recent issue of the London *Electrical Review* a method for electroplating is described. The author, E. C. Szarvasy, states that up to this time the problem of electroplating aluminum with copper, silver, tin or other metals has not been satisfactorily solved.

The method used is to dissolve a dry salt of the metal to be deposited in methyl alcohol (wood alcohol). Unless the salt is dry, water is introduced, which interferes with the success of the operation. The aluminum to be plated is cleaned by polishing or cutting down materials containing grease. When polished or scoured by such material a film of grease is left on the surface. This is not removed, however, as it serves to protect the surface from oxidation. The aluminum is immersed in the solution with the grease on it and the alcohol dissolves it, having a clean surface for the deposition of the metal. The deposition is carried on as usual.

In copper or nickel plating aluminum, the chloride or other soluble salt is used, but the moisture must previously be removed from it before dissolving in the alcohol.

It was reported last week that the watch presented to Jefferson Davis by his admirers when he returned from the Mexican War had been stolen from the Davis Memorial Hall some time ago.

Waterman W. Dexter, who many years ago was prominent as a jeweler in Pawtucket, R. I., passed away in that city recently. At the time of his death he was considered to be the oldest native born citizen of Pawtucket and the oldest Odd Fellow in the State.

 KNOWN THE WORLD OVER

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal—plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag—the blades are fine. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray—contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box; both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

AUGUST GRIFFOUL 280-286 CHESTNUT ST. NEWARK, N. J.

Mr. Watchmaker :

Aren't you tired of cleaning watches two or three times and receiving pay for the job but once? Aren't you tired of turning a watch or clock out in perfect order and then have it come back in two or three months all gummed up and with blackened pivots?

Aren't you just about ready to quit your profession, when you oil a watch thoroughly and it comes back in a short time completely dried out, looking as if it had never seen a drop of oil?

If you have had these experiences (and if you haven't, you are the first one we have yet to hear from), you will surely welcome some relief.

Fulcrum Watch and Clock Oil

will solve all these difficulties. It positively will not gum, will not evaporate, will not corrode the pivots, because it is the only Watch and Clock Oil ever known which is absolutely free from acid, AND WE CAN PROVE IT.

The price is 35 cents a bottle, or \$3.75 per dozen, and can be obtained from any material jobber.

If you want to try it, send us a postal and you will receive a small sample bottle free of charge.

FULCRUM OIL COMPANY - - Franklin, Pa., U. S. A.

The Proof of the Pudding

The proof of ability in any line consists in doing the things that others have failed in doing.

This we have done repeatedly, and can furnish the proof.

We sold \$20,300 in one sale where another auctioneer had thrown up his hands after selling only \$3,000.

In another sale we sold three times as much as the combined sales of two other auctioneers, and realized much better prices.

We have repeatedly taken dead sales—the result of the work of incompetent auctioneers—put new life and vim into them, and closed out the stock at a profit.

However, it is not the large amount of goods sold that counts so much as the net results in the profit and loss account—the small amount of new goods used, compared to the percentage of your goods, and your dead stock in particular, that are disposed of, and that larger and more important question of the after effects of your auction sale upon your customers, and, consequently, upon your future trade.

We believe we have solved the problem of how to conduct an auction sale so it will be to your profit, in both dollars and cents, and in the building up and permanency of your regular business.

We will furnish you evidence that sales, at this time of the year, when regular business is dull, can be made as profitable as during the seasons when regular business is booming.

We would be pleased to talk with you about it.

ALVIN SILVER

One of our latest novelties is a Silver Deposit Picture Frame, which we make in a variety of sizes, from 3 x 3 7/8 inches to 9 x 11 1/2 inches, and either oval or oblong in shape.

These frames are low in price and yet are Alvin quality; nothing better in deposit ware can be made.

They are one of the most successful articles in Alvin deposit ware and wherever shown have created an instant demand.

CONVINCING EVIDENCE

That we can furnish you a Catalog arranged to meet your local conditions.

WHICH WILL INCREASE YOUR BUSINESS FROM 25 TO 100%

Catalogs sent out by this firm since 1906 were made by The Arnstine Bros. Company.

The Catalogs sent out by this firm in 1908 were made by The Arnstine Bros. Company.

STORE OF F. A. COPELAND, ELGIN, ILL.

THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio.

ELGIN, Ill., Jan. 8, 1909.

The best opinion I can give you of your system and the results I have had from it is that I actually did \$1,500 more business in December, 1908, than I did December, 1907. Conditions and everything were against Elgin for the latter year, but I figure I got more than my share from the results of the Catalogue advertising of yours, so you see I took in more than enough to pay for the goods and advertising. This being my third year for your Catalogue, I can give you goods, Catalogue, terms and all, the best I ever had.

Yours truly,
F. A. COPELAND.

The Catalogs sent out by this firm since 1907 were made by The Arnstine Bros. Company.

STORE OF DUNHAM & SCHICK, HOLDREGE, NEBR.

HOLDREGE, Nebr., Feb. 9, 1909.

THE ARNSTINE BROS. CO.,
Cleveland, O.

Gentlemen:—We received your letter. We have had good success with your Catalogs, as they increased our business considerably. You may use our store cut in your Souvenir.

Yours,
DUNHAM & SCHICK.

STORE OF R. M. MOTHNER, BEAUMONT, TEXAS.

R. M. MOTHNER.

Feb. 18, 1909.

THE ARNSTINE BROS. CO.,
Cleveland, O.

Gentlemen:—In reply to yours of Jan. 8, 1909, will say that I think Catalogs will reach a class of people that would be impossible to reach by any other means of advertising, so it proves a good business investment.

Yours truly,
R. M. MOTHNER.

We are represented in every State in the Union. If you contemplate using Catalogs, and will notify us, we will have our representative call on you and explain our proposition.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezer over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped firmer and better than by any other kind of stone tweezer.

Second. It is purposely made a "Bayonet" in shape because any stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, easier, quicker, and with much less exertion than when using any other style of tweezer.

It has an extra part directly above the crossing points to permit the holder to examine the stone without fear of releasing it accidentally, which frequently occurs when using the ordinary style crossing tweezer.

Price, Each, \$1.00

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting Roller Remover. The work always plainly in sight. The roller is held in the grooved jaws of pliers. The adjustable head which holds the screw is quickly brought in position over the staff and the most obstinate roller will instantly yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

GRINDING OUTFIT No. 105

LEATHER DISK. SMALL DISK METAL.

CARBORUNDUM & EMERY PAPER DISKS.

This outfit consists of:

1. Two interchangeable steel disc wheels, 3 3/4" and 1 3/4" in diameter.
2. One interchangeable flexible leather disc wheel, 2 1/4" in diameter.
3. One adjustable hollow spindle for holding the above disc wheels.
4. Eight different grade emery paper discs, 2 1/4" in diameter.
5. Four carborundum paper discs of different grades, 2 1/4" in diameter.
6. Eight different grade emery paper discs, 4" in diameter.
7. Four carborundum paper discs of different grades, 4" in diameter.
8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete.....	\$1.50
Separate small emery discs..... per doz.	.10
" large15
" small carborundum discs.....	.10
" large15

This new grinding device should find favor with the trade, being thoroughly practical and complete for all purposes, such as grinding steel tools, glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the watchmaker, jeweler, optician, dentist, lock or gunsmith, platers and kindred trades. It will be found much more economical than solid emery and carborundum wheels. An assortment of solid wheels of twelve different grits would necessitate an outlay of ten times the cost of this outfit, not taking into consideration the trouble of truing up the wheels when worn or glazed.

Full description and directions accompany each outfit.

For Sale by all Jobbers in the United States and Canada.

Here's
To The
Good Old
Hudson River
Itself

SOURCE OF THE HUDSON RIVER

And The
Wadsworth
Twenty-Five
Year
"Pilot"
Watch Case

CELEBRATE Hudson and Fulton as much as you like, but as for us we take our hats off to the Good Old River itself. A river like this could not lie round loose without somebody discovering it. And the steamboat would have come in time anyway. We salute the HUDSON RIVER. We salute its waves and tides. We salute its teeming ships. We salute the Pilots who guide them. Speaking of Pilots

THE WADSWORTH 25-YEAR "PILOT"

Watch Case is no stranger on the Hudson River. Large shipments are constantly crossing to the great terminals. On the decks and in the cabins, passengers have this case in their watch-pockets. Stately ships carry them to the ends of the earth. Four of these cases would have lasted the hundred years we are now celebrating. Order the Wadsworth "PILOT".

Nothing better than Simmons Goods

except Simmons Guarantee

is the verdict of all jewelers who carry Simmons Chains and the other products of the Simmons factory — of which you wish just now to emphasize particularly,

SIMMONS
Locketts, Chatelaines,
Fancy Necks and Beads
Seals and Charms.

These Simmons products are the finest examples of gold-filled goods it is possible to produce and all have proved themselves to be first-class sellers.

Combining the highest quality of stock and workmanship obtainable with exceptionally attractive designs and the style and finish of the best grade all-gold goods, they offer a line of gold-filled jewelry that appeals to the better class of trade everywhere.

And the positive quality and good wear of all—from the least expensive up—are absolutely guaranteed by us through the jobber to the retailer and through the latter to his customers.

The Simmons guarantee renders Simmons goods as safe and as satisfactory to handle as any 18k solid gold jewelry.

Look through the jobber's entire showing of Simmons goods—Chains, Fobs, Armillas, Necks, Beads, Locketts, Chatelaines, etc., before selecting your Holiday stock and a good selling assortment of them will pretty surely be included in your Christmas season displays.

PROVIDENCE, R. I.

CHICAGO: 103 State Street.

THE REASON WHY

We are able to handle orders for Mesh Bags in any size quantities is because after long years of experimenting—on what seemed to others an impossibility—we have at last succeeded in making a machine to produce mesh.

The advantages to you are many, of which a few are: a perfectly smooth strong mesh, finer than can be produced by hand for double our price—prompt deliveries—and a guarantee that your Holiday orders will be taken care of. Your experience will supply many others.

W. & D. Bags are offered by Leading Jobbers.

The Madam Jumel
STERLING SILVER TOILET WARE

ALL those salient features of design which have made so pronounced a success of the Madam Jumel pattern of flat ware are embodied in the new Whiting pattern of Sterling Silver Toilet Ware. It appeals just as strongly to the increasing number of those who are attracted by a graceful simplicity of outline, a delicate refinement of ornamentation and a general harmony of proportion.

The immediate and definite success of this new pattern in Toilet Ware is undoubtedly due to its happy adaptation of those principles of design which have made the Madam Jumel flat ware so deservedly popular.

THE LAUREL

TRADE MARK
STERLING 1000

☞ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

☞ Made on the popular **MARTHA WASHINGTON** shape.

☞ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

☞ Finished in light, medium and heavy weights at a very moderate price.

☞ In manufacturing "**THE LAUREL**," every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

☞ This is another **Smith Pattern**, designed to remain permanently in demand.

LILY

ALVIN PATENT

LEXINGTON

BRIDES BOUQUET

ALVIN

Three Representative Patterns.

ALVIN SILVER PLATE

LILY—A floral pattern which reproduces the natural grace of the flower.

LEXINGTON—A Colonial pattern of unusual merit; at once elegant and practical.

BRIDES BOUQUET—A wedding pattern, also adapted to bridal anniversaries.

Ask your jeweler to show you these designs.

The above advertisement appears in the leading magazines. Ask your jobber to show you these goods, or send direct to

Manufacturer of a General Line of Platinum
18 K. and 14 K.

Diamond Mountings

10 JOHN STREET, NEW YORK

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

HENRY ZIRUTH, Sole Manufacturer

Factory and Office: Murray and Austin Streets, **NEWARK, N. J.**

SALESROOMS:

9-11-13 Maiden Lane, New York 103 State St., Chicago, Ill. 704 Market St., San Francisco, Cal.

NOTHING BUT STERLING!

ROGER WILLIAMS SILVER CO. are manufacturers of high grade sterling ware only. We are the house that is always busy. Our goods are of original design; we do not wait for our competitors to originate for us. We manufacture no light weight or trashy goods, as we cater exclusively to the legitimate jeweler.

A complete line of samples is carried both at our New York Salesroom and at the Factory, Providence, R. I.

The Legitimate Trade is cordially invited to call and see for themselves. We furnish exclusive pieces, no matter how large or how small.

Our "IMPERIAL" flatware pattern should not be overlooked by any jeweler. It is an assured success. Its pleasing, attractive and graceful lines appeal to all tastes. Place a small order of this pattern in your stock and watch the results. It stands out from all other patterns, being an entirely new departure from all other flatware designs.

A full line will be carried in stock after October 1. Our toiletware line in the Bead, Plain and Engraved patterns, is unsurpassed in weight, workmanship and design.

We advise the trade to place their orders early to insure prompt delivery as present indications show that we shall be unable to fill orders received after November 1 as promptly as now.

Write or 'phone us for catalogue and attractive prices. Better; visit our salesroom or factory and see for yourselves.

THE NEW FUEL

Experiments made almost every day for two years in the kitchen of a country house show that denatured alcohol is perfectly safe, and if burned in the stoves shown herewith, is clean, easily controlled, smokeless; an admirable fuel for cooking any breakfast, luncheon, or dinner in anybody's kitchen. It has been used for every meal, every day for two years, without a single accident, failure or mishap of any kind. It has been used to cook every kind of meat, fish or vegetable used at any time in the year and cooked every dish to perfection.

We will furnish, without charge, handsomely printed booklets bearing your name and address, for distribution among your customers. Particulars and Catalogue No. 23 on request.

JET
JEWELRY
TRIUMPHS

AT
THE HOME
OF JET

FOR MANY YEARS this house has been recognized throughout the trade as the "Home of Jet." Not merely when Jet is a fad, but always—in season and out of season, it has always been a strong line. This includes Jet of every kind: Whitby Jet, familiar French Jet and the now famous Indestructible Jet, studded on Net. The latter adds to its greater strength, the finest possibilities of artistic expression. It is also lighter. A wealth of the richest and most original designs.

SCARF-PINS
FOBS AND SEALS

SIGNIFICANCE

OF THE WORD

“NEW”

AS APPLIED TO

HAT PINS

THE WORD “NEW” as applied to these Hat Pins, yields its fullest meaning. Frequently goods are called “new” simply because recently produced. They may involve no special departure. Not so here.

For example, the sizes are large. This gives room for a wider play of decorative effect. The very shapes become more imposing. Larger stones shine out luxuriantly. And there is a splendid field for the new effects in Enamel.

No. 8.

Hudson-Fulton Exhibition of Colonial Silver at the Metropolitan Museum of Art.

THE Hudson-Fulton exhibition at the Metropolitan Museum of Art, New York, was opened to the public yesterday (Sept. 21), and has already begun to attract attention. Monday evening a private view was given to the trustees and members of the museum, the Hudson-Fulton Celebration

and his predecessors in this country. In both the intention has been to confine the exhibition to works of art rather than those of a historical or biographical character.

For the Hudson section the aim has been to illustrate the great art of painting in Holland in the century to which Henry

dam to about the time of Fulton's death, namely, 1815, and paintings by American artists born before 1800.

In collecting these objects the aim has been to show, by means of the most noteworthy examples, the development of artistic expression in the more important handicrafts. This being the first time such an

CAUDLE CUP BY HULL & SANDERSON.

exhibition has been made, it is hoped that a new emphasis may be given to the importance of our early workmen.

More than 300 pieces of American silver-smithing are shown in the exhibit, all made before 1825. In the earlier pieces the traditional designs and methods of work of the English silversmiths are apparent. Because of the close relation between England and her colonies on the Western Hemisphere many English workmen came

PORRINGER BY JOHN CONY.

here in the 17th century, and their work dominated the industry. They were, however, soon influenced by the simplicity of the younger country, and the following generation of silversmiths made pieces that have a distinct and unmistakable American characteristic.

One of the earliest of these English silver-

SILVER TEA SET BY JOHN M'MULLIN.

Hudson belonged, and thanks to the liberality and co-operation of public and private collectors in various cities of the United States and Canada, it is not too much to say that a collection has been brought together which far outranks any exhibition of old masters ever held in this country. About 145 paintings are shown, including 34 by Rembrandt, 20 by Frans Hals and a representative selection of all the other great Dutch painters of the time.

The American section of the exhibition embraces examples of the American industrial arts dating from the earliest Colonial times in New England and New Amster-

dammission and the Committee of Arts exhibits and their friends.

The exhibition will doubtless be attended by thousands of out-of-town visitors and jewelers visiting the city at this time will be well repaid for the time spent at the museum. Of special interest to the jewelry trade is the exhibit of silverware, which is well worthy of attention.

The exhibition as a whole consists of a great loan collection divided into two parts—one commemorative of the age of Henry Hudson and the country under whose auspices he entered the river which bears his name, and the other of Robert Fulton and

THE FINISHING TOUCH

to one of our Signet rings is an original and artistic monogram in harmony with the design of the ring.

We not only make the ring, but, we are prepared to cut any of these monograms in bas relief, in an artistic manner, at a moderate cost.

he came to Boston, and later took as a
ner Robert Sanderson. The colony
ey was coined by these two men, and
mint house stood on Hull's land.

he illustration of the caudle cup shown
age 63 is the work of Hull & Sanderson.
t the cup is a band of conventionalized
as in granulated work. It has two S-
d handle and bears the engraving W.
on the bottom. It is two inches high
three inches in diameter and bears the
t worth arms on one side. It was lent
the exhibition by William H. Went-
h, and is of special interest as being the
s example of American silversmithing
the exhibition. Hull's mark, together
his partner's, is found on silver in the
ession of the First Church, Boston, and
Old South Church.

the middle of the 18th century there
s three important families of silver-
s in Boston, namely, the Burts, the
rds and the Reveres, all of whom are
esented in this exhibition.

f all the Boston silversmiths the patriot,
Revere (1735-1818) is the best known.
father, Appollos Rivoire (1702-1754)
born in France but was taken to Bos-
when quite young, and at 13 years of
became apprenticed to John Cony. In
3 he established himself in Boston as a
d and silversmith, anglicizing his name
Paul Revere. His son, Paul Revere, was
n in Boston in 1735, and was the most
ons of all Boston silversmiths. He was
third of a family of 12 children, and
ered his father's shop at an early age.
hen 19 years old his father died, but he
s able to carry on the business.

The engraving on his silver bears witness

most famous piece being the famous punch
bowl, illustrated and described in THE
JEWELERS' CIRCULAR WEEKLY March 21,
1904. Some of the teaspoons shown have
pointed bowls and engraved crests on the
front of the handles. One has a shell on
the back of the bowl engraved T. H. H. and
the monogram M. A. on the front of the

cluded in the list of exhibits of his work is
an urn-shaped teapot decorated with fluted
and reeded bands and engraved borders. It
has trumpet feet, a curved spout and is
engraved with a monogram. Its height is
14³/₄ inches. Other products of his handi-
work include a coffee pot 11³/₄ inches high
lent by George S. Palmer, a sugar bowl

SILVER SPOONS BY PAUL REVERE.

handle, with the Revere mark in rectangle.
Another spoon has M. P. R. on the bowl
and is 4³/₄ inches long. These spoons were
lent by George S. Palmer.

Another interesting bit of silverware is a
porringer, the work of John Cony, illus-

10¹/₂ inches high and a cream pitcher 7³/₈
inches high. The pitcher is engraved with
a monogram. Various forms of cups,
mugs, beakers, tankards, teapots, coffee pots,
bowls, strainers and spoons used by our
ancestors are included in the exhibit, some
of which are shown on the front cover of
this issue and others on page 67.

A special effort has been made by those in
charge of the exhibit to show pieces of sil-
ver made in New York State. An inter-
esting group of church vessels are also in-
cluded in the display.

Among the New York silversmiths rep-
resented are: Adrian Banker, Thauvet
Besley, Jacob Boelen, Ephriam Brasher,
John and Tunis Denise, Cary Dunn, Garrett
Eoff, William G. Forbes, William Grigg,
Jabez Halsey, Thomas Hamersly, John Hut-
ton, John Burt Lyng, Myer Myers, J. New-
kirke, E. Pelletrau, George Ridout, Peter
Quintard, W. Roe, John Sayre, Bartholo-
mew Schaats, John and Peter Targee,
Koenraet Ten Eyck, Thomas Underhill,
Richard Van Dyke, Hugh Wishart, Free-
man Woods and Benjamin Wyncoope.

Among those who have generously lent
pieces of silver are: Messrs. George S.
Palmer, R. T. Haines Halsey, Judge A. T.
Clearwater, Hollis French and Trinity
Church Corporation. Many of the pieces
were collected by the Colonial Dames of
the State of New York.

The exhibition will close about Nov. 15.

(To be continued.)

Searles & Wilson, Richford, Vt., have
dissolved partnership, the interest of Mr.
Searles having been purchased by F. R.
Wilson, who continues the business. Mr.
Searles will visit the store every Friday and
Saturday to attend to optical work.

EARLY AMERICAN TYPES OF CUPS AND MUGS.

1. Unknown. 2. E. Davis. 3. Otis. 4. Minnott. 5. Whittemore. 6. J. Ball.

o his ability. He also engraved on copper
and made many political cartoons. After
the war, in 1783, he resumed his business
as a gold and silversmith. He died in the
year 1818.

The photograph of the spoons shown
above illustrate some of the work of
Paul Revere included in the exhibition, the

trated on the preceding page. John Cony
was one of the earlier silversmiths who
lived in Boston, and it was from him that
the older Revere learned his trade. Mr.
Cony died in 1722.

On the preceding page is illustrated a sil-
ver tea set, which was the work of John Mc-
Mullin, a Philadelphia silversmith. In-

Japanese Pearls

Notable Example of Metal Work and Engraving Made by a Jewelry House in New Orleans, La.

NUMBER of handsome plaques and trophies have been manufactured in New Orleans, La., lately, for different occasions, but none which required the en-

Unique Blue Diamonds.

OUR Antwerp contemporary, *Le Joaillier*, in its issue of Aug. 1, 1908, describes a unique diamond which is now owned by a prominent New York importer. The stone is a perfect sapphire blue diamond, and is probably the finest stone of

its kind ever brought into this country. In speaking of the stone *La Joaillier* says:

"In calling at one of the fine offices installed by one of our principal Antwerp diamond dealers, we had the good fortune, last week, to admire a brilliant which has no equal.

"This brilliant, set in the crown of some powerful monarch or in the tiara of some autocrat, would most assuredly find its place among the series of celebrated precious stones. We would read with incredulity the fabulous price at which the reporters valued it.

"The brilliant, which has had our careful attention, is an old stone acquired in the Orient by its present owner. It has just been recut in Antwerp at the shop of its owner, and is nothing less than a sapphire-brilliant of the most beautiful tint, and weighs 3 13-16 carats.

"It would be impossible to find a more complete, a prettier and, at the same time, more scintillating sapphire.

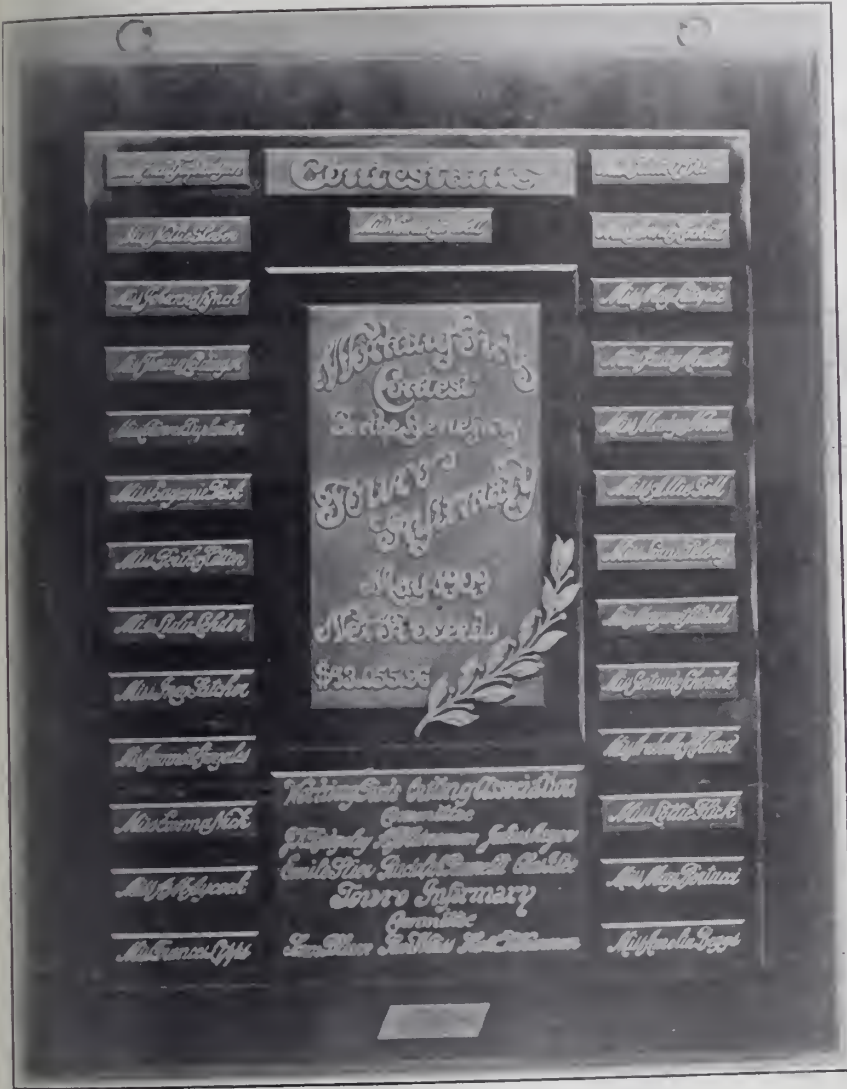

"The most expert connoisseurs, the greatest celebrities in the business, even those who control the destiny of the market and to whom the stone has been shown as a curiosity, affirm that the stone surpasses all of its kind that have been known up to this day.

"All the sapphire-diamonds seen up to this time, and even those exhibited at the Franco-British exposition in London, pale before the one which we have had the opportunity to admire.

"We are fortunate in being able to inform the readers of our review of same. As to mentioning the name of the fortunate owner, we dare not do so for fear of wounding his modesty unless, in the end, we are so authorized in the narration of the history which this sapphire-brilliant will know."

The New York importer who now holds this stone has also another sapphire blue diamond more than five times the size and almost as wonderful in color as the one above mentioned.

I. A. Deisher, Reading, Pa., accompanied by his watchmaker, Mr. Keyport, J. W. Kalbach and E. J. Faust, the latter a resident of Allentown, left, recently, in a touring car for a trip to Boston.

UNIQUE PRODUCT OF A NEW ORLEANS SILVERSMITH.

re skill of the engraver and manufacturer more than the apparently plain plaque, made by T. Haussmann & Sons and illustrated herewith.

As the cut shows, it is a square plaque of mahogany. In the center is a bronze plate dating that in May, 1909, the sum of \$13,355.96 net proceeds was turned over to the Touro Infirmary by the working girls' contest. The lucky ones, the first 13, were given a vacation trip by the committee.

The names of all the contestants are on separate bronze plaques and across the bottom are the names of the committee.

All the lettering is in raised gold script, and the work is considered a very creditable piece of engraving. The plaque is to adorn the center hall of the great hospital.

A dispatch from Bonham, Tex., announces that the store of Mark Fairley, at that place, was recently looted by burglars.

Who Robbed Boston, Mass., Jewelry Store Captured After an Exciting Chase.

BOSTON, Mass., Sept. 20.—Unable up to this time to discover the identity of the man who, on Wednesday afternoon, made a sensational raid upon the diamond-filled show case of Hodgson, Kennard & Co., Inc., at the corner of State and Devonshire Sts., in this city, the police are still persistently endeavoring to obtain some information concerning this man and his past.

The three-stone diamond ring in a Tiffany setting, valued at \$1,750, which the thief threw away during the chase, has not yet been recovered. An opal ring valued at \$350, which the thief also snatched, was recovered from him at the time of his arrest.

The incident proved to be one of the most sensational jewel robberies which has been attempted in this city in a long time, and was very fortunate that the police happened to capture the thief, who certainly would have had a fair and much more certain chance of escape if he had executed his getaway later in the afternoon. An hour after the street would have been deserted by the detectives of the bank squad and by a large number of men who flit about the bank-brokerage district during banking hours.

The thief, six feet one inch tall, of excellent physique and dressed in a tailor-made suit of fine texture, Ryan at once commanded respect and confidence when he entered the diamond shop at 3.15 p. m., on Wednesday afternoon, and informed Mr. Harrington, a clerk, that he wished to purchase for his wife a pair of diamond earrings of a certain size and style. The clerk showed the show ease and took out a very valuable set of earrings, and at the same time exposed to view a very valuable ring. The prospective customer suddenly remarked that the clerk need not mind the earrings, because he thought he would like to look at some fine finger rings instead. Mr. Harrington walked back to the rear of the store to secure a tray of valuable diamond rings from the vault, and when he was 25 feet away from the customer, with his back turned, E. W. Hodgson, of the firm, looked up and saw the customer with his long arm reach over the show ease and with his fingers tamper with the catch-spring upon the show ease back, which Harrington had cautiously closed before leaving.

"What is that man doing in that show ease?" exclaimed Mr. Hodgson, and at the instant both he and Harrington dashed to the front of the store in the effort to reach the customer. Just before they reached the thief he managed to open the show ease and to snatch two ring boxes, one containing the three-stone diamond ring valued at \$1,750, and the other containing the one valued at \$350 and set with a very fine opal. The thief dashed out through the door into the street with Hodgson and Harrington after him. They were coatless and hatless, and, following in close pursuit, they shouted "Stop thief!"

The thief ran through Congress St., around the Congress building and doubled

back into Congress Sq., and was returning when Police Inspector George M. Robinson suddenly grabbed him and thrust a revolver into his face. The thief made no resistance and was quickly handcuffed and led back to the store again. He was searched and the opal ring valued at \$350 was recovered from him. The three-stone diamond ring valued at \$1,750 could not be found. The theory is that the thief dropped it in his flight or else handed it to a confederate as he dashed out into the street. All of the streets, gutters, doorways and coal bins in the vicinity of the thief's flight were searched, but the ring was not found.

The thief was taken to police headquarters and Deputy Superintendent William B. Watts, who is in charge of the detective bureau, gave him the "third degree," but obtained no admissions from him. The prisoner said his name is George E. Ryan, alias Rogers, 38 years old, of 416 N. 13th St., Philadelphia. He admitted that he was once arrested in New York, but he would not tell for what. It is believed by Deputy Watts that Ryan is a clever professional thief, and the deputy declares that he will ultimately discover his identity and other facts which will satisfy him that his belief that Ryan is a much-sought-for thief is true.

Thursday Deputy Watts gave Ryan a severe examination, but he was unable to cause him to make any admissions concerning himself or his past. He was later taken into the police court and arraigned and held in \$2,500 bonds for a hearing on Monday. He was committed to the Charles St. jail, and he is being closely watched. If an attempt is made to secure his release on bail it is anticipated that he will be re-arrested before he reaches the street upon another charge. The police seem determined that he shall not escape them.

The pursuit and capture of the thief was attended by great excitement, for it happened at a time when the streets of the banking district were thronged with bankers, bankers' clerks, women, policemen and detectives. But the thief was so quick and so fleet that he managed to get around a corner and out of sight almost before anyone realized what had happened. But the cries of "Stop thief!" soon aroused the entire neighborhood, and the chase was short, quick and very exciting. Detective John Harris, of the bank squad, joined the pursuit, and ran after Ryan with Messrs. Hodgson and Harrington, while his partner detective, Robinson, ran around the other side of the building and intercepted the thief. Great crowds of enraged men followed the prisoner as he was led away to police headquarters, and it might have fared ill with him if the angry men had him to deal with instead of the detectives.

This is the third attempt to rob a concern with which E. W. Hodgson has been connected, but at no time has the thief succeeded in getting away with any part of his loot. Eight years ago, when Mr. Hodgson was in business at 56 Devonshire St., a thief threw powder into Mr. Hodgson's eyes, grabbed a tray of diamonds valued at \$1,000 and dashed into the street. A patrolman saw the fleeing thief, gave chase and caught him. He is now serving a seven to 10 years' term in the Charlestown State prison for this offense. The firm of Hodg-

son, Kennard & Co., Inc., is insured against loss by burglary and is amply protected in the matter of the loss of the three-stone ring valued at \$1,750.

While Ryan is awaiting trial the police are making a strenuous effort to ascertain something about him. Circulars having an excellent picture and a full and detailed description of the man upon them have been sent out to the police of all the large cities of the world. All of the rogues' galleries of the country also are being ransacked in the effort to locate his picture and record. His finger prints, Bertillon measurements and all of his striking characteristics are being made careful note of in the effort to secure his identification. No information about him has yet been received.

In court to-day Ryan was held in \$3,500 for the Grand Jury. His bail up to that time had been \$2,500, but the court saw fit to increase the amount.

Death of Edward Evans.

PHILADELPHIA, Pa., Sept. 18.—Edward Evans, a former well known jeweler, of Port Richmond, died, Sunday, and was buried Thursday.

Mr. Evans was a native of England and was born in London 77 years ago, receiving his education in his native land. As a young man he decided to go to Australia, and at the last moment changed his mind and came to the United States. Settling in Philadelphia, he started in the jewelry business here, in 1874, and for a long number of years conducted a business on Richmond St., below Lehigh Ave., where he built up a large trade and obtained a wide reputation as a watch and clock repairer. With his advancing years Mr. Evans' trade fell off somewhat, and little over a year ago he closed out his business at 2664 Richmond St. and moved to 3082 Frankford Ave., where he devoted himself more particularly to his optical business and repair work.

He had always been highly regarded both by the trade and his customers, and in the community had been respected and honored as a merchant of the highest character, of unimpeachable integrity, and his ability as a jeweler and his honesty as a tradesman gave him the confidence and esteem of all with whom he came in contact.

Outside of business he took distinct interest in religious, charitable and fraternal work. He long had been an active member of the Protestant Episcopal church, was one of the early members of St. George's Chapel, in Upper Richmond, and ably supported his church and liberally contributed to its charities. Among the fraternal organizations to which he belonged were Richmond Lodge, No. 210, Order of Odd Fellows; Harrison Encampment, No. 22, of the same society, and Centennial Lodge, No. 100, Sons of St. George.

The remains of the deceased were viewed by his friends, Wednesday evening, and the funeral services took place from his late residence, 3082 Frankford Ave., Thursday morning, the Rev. A. J. Arkin officiating. The interment took place in Mt. Peace Cemetery.

Mr. Evans survived his wife by a number of years.

Special Announcement to Large Diamond Buyers

THIS is to inform the trade that I have opened a factory and office for the cutting of diamonds at 120-126 Walker St. (junction of Canal St.), New York, under the management of Jos. Polak, formerly connected with S. L. Van Wezel. This cutting establishment has capacity for the employment of fifty diamond cutters and polishers, working on my own rough importations exclusively, is equipped with the most modern machinery and is now in full operation.

United States Geological Survey Reports
on the Production of Precious
Stones in United States
in 1908.

WASHINGTON, D. C., Sept. 21.—The United States Geological Survey to-morrow will publish the value of the precious stones produced in the United States in 1908 as \$115,063, a decrease of \$56,237 from the value for 1907. These figures, which are in part furnished by the producers and in part based on estimates from the quantities produced, are given by D. B. Sterrett, Chief Geologist, in an advance chapter from the *Mineral Resources of the United States, for the year 1908*. They are as complete as it is possible to obtain, but there are some gems for which no accurate figures are at present available. The general depression appears not to have affected the precious stones industry as much as might have been expected, and the production of certain gems, notably turquoise and variscite, was greatly increased over that for 1907.

Turquoise and turquoise matrix formed the largest item in the list, the production being 29,590 pounds, with an estimated value of \$147,950, from Arizona, New Mexico, Nevada and California. The 1907 production was \$23,840. An odd stone recently cut in Los Angeles from a deposit on Ithaca Peak in Mohave County, Ariz., showed a blue letter Y of turquoise in a gray matrix, this cutting being made possible through the presence of a split turquoise veinlet. The stone was sent to a student in Yale University.

Tourmaline was the next largest item in point of value, the production being 3,300 pounds, with an estimated value of \$90,600, from California, Connecticut and Maine. In 1907 the production was 2,140 pounds, valued at \$84,120. The bulk of the 1908 production came from California; at Mesa Grande a perfect tourmaline weighing 55 carats after cutting was obtained.

The third item in the list, sapphire, showed a great decrease from 1907, the production in 1908 having an estimated value of \$58,397, as against \$229,800 in the earlier year. The greater part of the 1908 output came from a single mine in Fergus County, Mont., but a small quantity was obtained in Morgan County, Mo.

The production of diamonds from Arkansas, though not a large item, is of interest, because this was the first locality in North America where diamonds were found in place. The first diamond was discovered, Aug. 1, 1906, about 2½ miles southeast of Murfreesboro, Pike County, in peridotite, an igneous rock. The production from this locality in 1907 had an estimated value of \$2,800. In 1908 the production was 362 stones, with an estimated value of \$2,100. It is reported that over 700 diamonds have been found up to July 1, 1909. Three cut stones were found to be brilliant and were valued at \$60 to \$175 per carat. A parcel of rough, unsorted stones from the mine will be easily worth \$10 per carat. The possibilities of cheap mining in Arkansas are great, as water and timber are abundant near by and coal should be obtained at reasonable rates. Some diamonds are reported to have been found also in a newly discovered peridotite area about 2½ miles

to the northeast of the original locality.

The imports of precious stones in 1908 were 57 per cent. less than in 1907 and 69 per cent. less than in 1906. The total value of the 1908 imports was \$13,700,404, of which \$9,270,225 was in unset cut diamonds, \$1,636,798 in uncut diamonds, and \$910,699 in pearls.

Mr. Sterrett's report contains not only details of production of the various gems in the United States, but also notes on the important occurrences in foreign countries. It will be published in full, in instalments, in *THE JEWELERS' CIRCULAR-WEEKLY*.

Death of Albert Pollard.

PROVIDENCE, R. I., Sept. 16.—Albert Pollard, who died at his mother's home, 6 Washington St., South Attleboro, Mass., yesterday afternoon, was formerly a manufacturing jeweler at 59 Page St., this city.

Deceased was the son of Wright and Celia Pollard and was born at Catsauqua, Pa., Oct. 29, 1871. When very young Mr. Pollard's parents removed from Pennsylvania to South Attleboro, where he attended the public schools. At the conclusion of his grammar school course he came to this city and entered the employ of L. Dimond & Sons, at Randall Sq., and at the age of 20 years was head buyer in the haberdashery department.

After a couple of years in this position he engaged in the manufacturing jewelry business under the firm style of Albert Pollard & Co., making a line of miniature brooches, with which he was very successful. About two years ago his business was purchased by his brother, Thomas Pollard, and Louis S. Darling, the concern becoming Pollard & Darling, now at 21 Eddy St.

For more than 10 years Mr. Pollard had been a sufferer from a complication of diseases of heart and kidney, which finally necessitated his retirement from business about two years ago. He was a member of Enterprise Lodge, A. F. and A. M., of Pawtucket. He leaves a widow, who was Miss Laura Kennison, of East Boston, Mass., and a daughter, Helen, seven years of age. Besides his mother there are two brothers and one sister.

Death of Conrad Klank.

BALTIMORE, Md., Sept. 18.—Conrad Klank, head of C. Klank & Sons, 6 and 8 W. Lombard St., died, Thursday afternoon, at his home, 2820 N. Calvert St., of a complication of diseases. He was born in Germany, 69 years ago, coming to this country when he was 13 years old.

At the opening of the Civil War Mr. Klank enlisted on the Union side and served until the close. He was wounded in the left leg in an engagement in Tennessee, and was confined to the hospital for many months. In 1871 he started in the silversmithing business in Baltimore with his brother, under the firm name of C. Klank & Bro., which was not changed until recently to C. Klank & Sons.

The funeral services at Loudon Park Cemetery, where he was buried, were conducted by the Masonic order. A delegation from the Wilson Post, G. A. R., acted as a guard of honor. Mr. Klank had married twice. His second wife and three sons, William, George and Herbert, survive him.

Waltham Watch Co. Announces Change in Prices of Many Movements.

WALTHAM, Mass., Sept. 20.—As predicted in the last issue of *THE JEWELERS' CIRCULAR-WEEKLY*, the Waltham Watch Co. today sent the following announcement to the retail watch dealers of the country:

"Four years ago this company introduced the Waltham contract system, which established a satisfactory retail profit on all position-adjusted Waltham movements of the several sizes. That system is now extended to include all colonial series watches. Enclosed are the list prices of colonial series watches to the trade, also a list of the fixed retail selling prices. The profit thus provided will be found to be consistent with the care and responsibility which the handling of high-grade watches requires.

"Every colonial series movement is fitted and timed at the factory in the case in which it is delivered to the jobber. To transfer a movement of this series from one case to another is to violate the conditions under which these watches are sold.

"Each colonial series watch is now delivered in a display box with contract notice bearing the retail selling price. These boxes are to be delivered to the purchasers and will not be redeemed by this company.

"Particular attention is also called to revised retail selling prices of Waltham movements already subject to contract conditions. Full particulars regarding these prices will be supplied by jobbers.

"Dealers are requested to return to our selling agents as below the contract notices which they have with movements of this class in stock. New notices will be promptly sent in exchange.

"We ask your prompt and constant co-operation in maintaining the contract conditions of sale in order that watch dealers everywhere shall derive the immediate and substantial benefits intended.

"WALTHAM WATCH CO."

The revised selling price list which the company states will be sent out to the jobbing trade announces that the company has discontinued the manufacture of its four gilt movements and has changed the prices on the following:

18 Size—No. 1, 7 jewels, gilt (discontinued); No. 18, 7 jewels, nickel; No. 81, 15 jewels, gilt (discontinued); No. 820, 15 jewels, nickel; No. 825, 17 jewels, nickel; No. 85, 17 jewels, gilt, adj. (discontinued); No. 87, 17 jewels, nickel, adj.; P. S. Bartlett, 17 jewels, nickel, adj.; P. S. Bartlett, 17 jewels, gilt and nickel, adj.; A. T. & Co., 17 jewels, nickel, adj.; No. 845, 21 jewels, nickel, adj.; Crest St., 19 and 21 jewels, nickel, adj.; Vanguard, 19, 21 and 23 jewels, nickel, adj.

16 Size—No. 610, 7 jewels, nickel; No. 620, 15 jewels, nickel; No. 625, 17 jewels, nickel; No. 630, 17 jewels, nickel, adj.; P. S. Bartlett, 17 jewels, nickel, adj.; Royal, 17 jewels, nickel, adj.; Riverside, 19 jewels, nickel, adj.; Crest St., 21 jewels, nickel, adj.; Vanguard, 19 and 23 jewels, nickel, adj.; Maximus, 23 jewels, nickel, adj.

12 Size—No. 210, 7 jewels, nickel; No. 220, 15 jewels, nickel; No. 225, 17 jewels, nickel; Royal, 17 jewels, nickel, adj.; Riverside, 19 jewels, nickel, adj.; Maximus, 21 jewels, nickel, adj.

6 Size—J, 7 jewels, gilt (discontinued); Y, 7 jewels, nickel; V, 15 jewels, nickel; Lady Waltham, 16 jewels, nickel, adj.

0 Size—No. 161, 7 jewels, nickel; No. 165, 15 jewels, nickel; Lady Waltham, 16 jewels, nickel, adj.; Riverside, 17 jewels, nickel, adj.; Maximus, 19 jewels, nickel, adj.

Jewel Series—Sapphire, 13 jewels, nickel; Ruby, 15 jewels, nickel; Riverside, 17 jewels, nickel, adj.; Diamond, 17 jewels, nickel, adj.

Diamond Horseshoe Brooches

These Brooches are as popular as ever—standard pieces always in demand—and ours are preferred by careful buyer because of the high quality of the stones and the superior workmanship and finish.

3 Models, all sizes. Settings, platinum and gold.

Send to us for these or anything else you want in high class Diamond Jewelry.

Pin Lost in Fire of Express Car Near Harrisburg Found in Baltimore and Returned to Makers.

By FRANK R. L., Sept. 18.—The loss of a diamond bar pin valued at \$250 in the squawanna river, above Harrisburg, Pa., payment in this city of the insurance for the article, the finding of the missing pin at Baltimore, its recovery by the makers and the return of the insurance money to G. L. and H. J. Gross, the insurers, are the bare facts in the most remarkable case that has come to the attention of insurance men in this city in many years.

Through the agency of the I. Gross firm, this city, Whiteside & Blank, manufacturing jewelers, Newark, N. J., carry a policy against loss of their property by theft or accident. Late in January a salesman for the Newark concern had occasion to send to the home office the valuation ticket. He sent it by express from Harrisburg, and on the way east fire broke out in the express car, in which was a trunk containing the parcel. This occurred on the Pennsylvania Railroad, near Harrisburg, and to save the contents of the car from total loss, trunks of valuable property were thrown into the river. Many of the packages in the trunk with the diamond were found after the fire was extinguished. Although the most careful search was made, no trace of the jewel could be discovered.

In February, Whiteside & Blank notified the insurance agents of the loss and all the circumstances surrounding it. The insurance firm immediately sent to Newark for proof of the loss, fixing their liability, and the proof being furnished two days later a check for \$250, the value of the jewel, was sent to Whiteside & Blank to cover the claim. So far as the principals were concerned, the case was closed with the adjustment.

Months later, or in midsummer, a Baltimore lad who was bathing in the river in that city found a small parcel floating on the water. Examining it, he discovered the contents to be a pin. He gave it to his mother, and she in turn visited a jeweler for the purpose of learning its value and selling it if possible. She realized that the pin was no ordinary article of jewelry and thought it a good time to exchange it for needed cash.

The jeweler to whom she offered the pin for sale saw that it was set with diamonds. He also recognized it as one of the products of Whiteside & Blank, being a customer of the manufacturers, and communicated the facts of the incident to the Newark firm.

Members of the concern were not long in connecting the loss of the pin above Harrisburg with its finding in the same river miles below Baltimore. A visit to Baltimore resulted in the identification of the jewel as the one that was in one of the trunks thrown from the burning express car. The lad who made the recovery was rewarded liberally.

Having recovered the property on which the \$250 claim had been settled, Whiteside & Blank lost no time in reporting the facts

National Monthly Import and Export Statistics.

WASHINGTON, D. C., Sept. 15.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for July, 1907, and for the seven months ending July 31, 1907:

to their insurers in this city, returning the \$250 paid on the loss.

Coral and Ivory Worth \$2,000 Stolen from Store in Los Angeles, Cal.

LOS ANGELES, Cal., Sept. 15.—Coral, both in the natural state and polished, also carved ivory, all valued at more than \$2,000, were stolen during the night from the Yamato Japanese store, 635-637 S. Broadway, this city. The theft was not discovered until the store was opened in the morning.

The burglars placed a ladder against a fire-escape landing on the second story and gained entrance by prying up a window with a jimmy.

Loose coral valued at \$500 was gathered up, and earrings and necklaces of rare and valuable coloring were carefully selected from among those of little worth. The loot included 14 necklaces, 11 pairs of earrings, 42 rings, 10 pairs of cuff buttons, 26 scarf pins, 35 brooches, all of coral, besides a quantity of carved ivory and a small amount of cash. The total loss is placed by the proprietors at \$2,177.25. A reward of \$100 is offered for the arrest of the burglars.

Detectives who have investigated the case think that the robbery was committed by men who had visited the store as customers. That they were experts is evidenced by their apparent knowledge of the relative value of the goods. The burglars departed by unlocking a rear door leading to an alley. No trace of them has as yet been found.

P. P. Pierce, Humboldt, Tenn., Makes a General Assignment.

HUMBOLDT, Tenn., Sept. 15.—P. P. Pierce, a young jeweler of this town, last week, made an assignment under State laws, naming W. E. Dunlay as assignee. No schedules of assets and liabilities have as yet been made public, but the former are not large.

Mr. Pierce, who is 23 years old, has been in business less than two years. He carried but little stock and made a specialty of repairing.

Navy Department Solicits Bids to Supply Many Articles.

WASHINGTON, D. C., Sept. 20.—The Navy Department is calling for proposals, until Sept. 28, for 30 illuminated dial peloronses, complete, with hardwood transporting cases, the contractor to protect the Government against any or all claims for patents or copyrights.

Also on same date for 212½ troy ounces silver anodes, to be 999 fine, 1-16th in. thick, by 4 in. x 6 in., 480 grains to the ounce, to be used for electroplating at the Brooklyn Navy Yard.

On the same date for the Mare Island Navy Yard: 20 dozen thermometers, salmometers, 150° brass trimmings; 20 dozen salmometers, 1-32° to 5-32° for sea water; 10 dozen high grade thermometers, graduated from 100° to 160°, copper cased; 20 dozen ordinary thermometers, graduated from 0° to 22°, in copper cases; 30 dozen hydrometers (salmometers), metal, in case, standardized 190°, 200° and 210°.

For the Annapolis Navy Yard: Three short telescopes; one beam compass, German silver, mahogany case; two surveyor's transits, with terrestrial telescopes, the latter to be of bell metal.

Ishpeming, Mich., Jeweler Goes Away and Landlord Attaches His Stock.

ISHPEMING, Mich., Sept. 15.—What remained of the stock of jewelry and fixtures in the store of John Nieminen on W. Division St. has been attached by William Andrews for rent and will be sold at auction.

Nieminen left this city Aug. 26, intending to make a visit to the copper country in the hope of selling jewelry. He left the store in charge of a clerk, with general instructions as to carrying on the business. However, as Nieminen's family left this town later and no word was heard from him, the landlord took action on the rent claim, as several other creditors have put their claims in the hands of local attorneys for collection.

A. E. Foster has sold his store at Creston, Ia., to Shea Bros.

Reconstructed Rubies

There are RUBIES and RUBIES. For OURS we claim the foremost place in the Scientific Stone market.

We have succeeded in developing the Reconstructed Ruby to the highest possible standard, improving it irrespective of effort and cost. In the purity of material, its uniformity of color and shape, correctness of size and brilliancy of finish, OUR RUBY has positively no equal.

We were the first to make the Reconstructed Ruby popular, introducing it in all the variety of MODERN SHAPES and DESIGNS.

Our stock is the LARGEST and BEST in the country and will be found pre-eminently suitable for the use of the LARGE MANUFACTURING JEWELER.

When buying Rubies, GET THE BEST. They cost no more.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Police Claim to Have Arrested Thugs Who Robbed Simon Ruman, Baltimore, Md.

BALTIMORE, Md., Sept. 18.—The local police claim they have arrested the two men who are guilty of the daring daylight hold-up and robbery in the jewelry store of Simon Ruman, last Monday, as described in last week's issue of THE JEWELERS' CIRCULAR—WEEKLY. The first man arrested was Samuel Geiselman, while the second was Arthur Reicke. Reicke, who is 25 years old, was arrested in the saloon of Alfred Johnson and Frederick Holmes, 737 South Broadway, a place he is charged with robbing.

When Mr. Ruman was called to police headquarters to identify the prisoner he was asked, and exclaimed as soon as he saw Reicke, "That is the man; he held the pistol to my head while the other man robbed the store. This man also took the \$25 out of my pocket." Five other men, who claim they saw the man come into their place, identified the prisoner. One of these was Morris Rubin, a watchmaker at 237 N. Gay Street, not far from Mr. Ruman's store, who testified that the two prisoners came into his store and said they wanted to buy a watch, but the fact that several other customers came in about the same time possibly saved him from becoming the victim of their plans, for they left, stating they would call later.

At the hearing, Reicke tried to make the witness state the exact time the hold-up occurred, but Chief of Detectives Pumphries told him not to answer. After the hearing at the police station Reicke was taken to police headquarters, where he was given the "third degree" to break down his sullen demeanor. He was placed on a stand beneath the spotlight with the eyes of the 20-odd detectives peering at him from behind masks, and apparently did not mind the ordeal very much. He held a cigarette between his fingers, but dropped it at the command of the chief. He stood up under the ordeal until Capt. Pumphries said: "Many of you know this man and the case he is charged with. One of his brothers is now behind the bars for a house robbery," whereupon he winced perceptibly. He was later taken to the Bertillon room and measured, but under the late court ruling no pictures are allowed to be taken until after conviction. At the hearing there were numerous wrangles between Reicke's attorney, the magistrate and the detectives as to a further hearing, but the magistrate held him for a later hearing, on Sept. 21, when Samuel Geiselman and John Raeder, who are accused of being implicated, will also be given a further hearing.

Burglars got into Charles F. Hurd's jewelry store, Medina, N. Y., Sept. 16, and secured jewelry valued at \$300. The thieves secured an entrance by a rear door. A large quantity of plated goods was taken, while several show cases filled with solid silverware were not touched. A former resident has been arrested on suspicion. The burglary is one of a series of many which have taken place in that vicinity of New York State.

Man Wanted for Defrauding St. Louis Jewelers Arrested in Norfolk, Va.

NORFOLK, Va., Sept. 16.—"Lieutenant" Donald C. Thompson, alias Earl McFarlan, who is alleged to have swindled the Mermod, Jaccard & King Jewelry Co. in St. Louis and jewelry firms in other cities by representing himself as a first lieutenant of the Coast Defense Service, is under arrest here and will be brought back to St. Louis for trial.

Federal warrants, sworn out here by Col. William R. Hamilton, of the United States Recruiting Office at St. Louis, have been forwarded to Attorney General Wickesham, at Washington, and will be sent from there to Norfolk. The accused called at the Mermod, Jaccard & King store, Aug. 16, and bought a \$35 gold Masonic pin and had it engraved with his initials and those of Senator Curtis, of Kansas, and the words "West Point, 1906," and ordered it sent to Senator Curtis, at Washington.

Thompson explained that he was under obligation to the Senator for procuring his appointment at West Point. In payment he tendered a \$100 check, drawn to his order by J. A. Steinmeyer, of St. Mary's, Kans. He said he was engaged to Miss Bessie Steinmeyer, daughter of J. A. Steinmeyer. Dr. Steinmeyer repudiated the check. He sent the information that his check book had been stolen from his office.

The Jaccard company recovered the pin, but not the money that was given in change for payment by bogus check. It is reported that the man is wanted in New York, San Francisco and Tampa, Fla., for similar swindles.

Death of Edward P. Goulding.

ALTON, Ill., Sept. 18.—Edward P. Goulding, formerly senior member of the E. H. Goulding & Sons Co., one of the oldest and best known jewelry houses of Illinois, died at St. Joseph, Mich., on his fruit farm, yesterday, of heart failure. He had been ill for some time and five years ago he ceased active connection with the jewelry house here and took up fruit farming with the hope of aiding his health.

The deceased was the son of E. H. Goulding, one of the pioneer jewelers of Alton, who started in business in 1852, built up a large business and was well known in the trade. With a younger brother, C. L. Goulding, he assumed charge of the jewelry business after the death of his father, in 1895, retaining charge for about 10 years. The concern is now a corporation, of which C. L. Goulding is president, E. Brandenberger vice-president and Ella H. Bode secretary.

The funeral services of the deceased will be held, to-morrow, and the burial will be at Atlanta, Ill., the home and birthplace of Mr. Goulding's widow.

Death of James F. Crist.

NEWBURGH, N. Y., Sept. 17.—James F. Crist, for many years a prominent jeweler here, died, last night, after a lingering illness.

Mr. Crist recently retired from the jewelry business, selling his store at 46 2d St. Deceased was in his 63d year, and is survived by a widow and two sisters.

Philadelphian Charged With Using the Mails to Defraud After Ordering Jewelry from New York House.

PHILADELPHIA, Pa., Sept. 18.—Morris Cohen, 23 years old, was arraigned, last Thursday, before United States Commissioner Craig in the Federal building, accused of misusing the mails and has been held in \$1,000 for the next term of court. Cohen, who has been traveling under many names and with various addresses, has been, according to the postal authorities, operating only a few weeks, and by novel methods has obtained on credit diamonds and jewelry of all kinds. The prisoner admitted that he used aliases to obtain the merchandise, but insisted that his method was legitimate and that he intended to pay when he had disposed of them.

As a result of a complaint made to Chief Inspector Cortelyou by J. M. Lyon & Co., wholesale jewelers, 71-73 Nassau St., New York, Cohen was arrested at 1039 Callowhill St., one of his "offices," where he was known as Arthur C. Bell, an eye specialist. The New York jewelers allege that Cohen ordered valuable diamonds from them for which they never received payment. When the firm received another order for \$350 they became suspicious and communicated with Mr. Cortelyou.

Cohen, it is alleged, would write to a firm, using one of his many names, asking them to send him a shipment of goods on credit, and giving as a reference his other names and addresses. Postal inspectors found that he had cards printed bearing the names and addresses by which he is known. A list of the names are: Thomas A. Simson, mechanical draughtsman, 1131 Callowhill St.; John R. Wiggins, civil engineer, 1329 Vine St.; John C. Black, engineer, 240 N. 11th St.; George A. Fuller, attorney-at-law, 1039 Callowhill St. At each of the above addresses the prisoner had engaged a room and received mail. A careful search of the room revealed a heavy correspondence from manufacturing firms of this city and New York.

One of the letters found was a reference to a book publishing firm, in which Cohen said he was an eye specialist and had resided at the Callowhill St. address for 18 years, whereas he had only engaged the room the day before.

V. H. Cohn, of J. M. Lyon & Co., New York, in speaking about the matter to a reporter of THE JEWELERS' CIRCULAR—WEEKLY, said that no goods were obtained from the concern. It was said that Cohen placed orders under different names, and on investigation the matter was referred to Chief Inspector Cortelyou. One of the orders sent in through the mails amounted to \$541 and called for a watch, a chain, a diamond ring and a solitaire diamond scarf pin and diamond cuff buttons. It is claimed that the man's method was to use the name of some prominent person in ordering his goods.

W. B. Spray has opened a store in Indianola, Ia.

Walter Tibbitts, of 711 Bismark St., Muscatine, Ia., found a pearl weighing 24 grains recently, for which he received \$385.

Who Placed Big Order for Silverware Skips to Europe and Charges Are Lodged Against Him.

Messages have been sent to the ports of Cherbourg, Bremen and Plymouth for the detention upon the arrival of the *Kronprinzessin Cecilie*, of the North German Lloyd Line, at any of those ports, known as George Baker, who was at the Hotel St. Regis, New York, was regarded as a Cuban representative interests in that country. He held a position of trust in Havana and acquaintance with men in New York whose names gave him entire access to agents dealing in goods with which he was familiar. While a clerk in the Hotel St. Regis, conducted by Gonzalez & Lopez, in the early last spring, he met Joseph Baker at the Hotel St. Regis.

He registered at the Hotel St. Regis a few weeks ago and announced that he had a commission from the Havana hotel proprietors to buy certain supplies for the *Kronprinzessin Cecilie*. He was furnished with the information concerning the best business houses for his purposes in the city.

He placed an order with the Gorham Co., for silverware, for goods valued at about \$65,000 for this hotel. The goods, however, were not sent. He did, nevertheless, secure a list of articles of no great value, for which he paid with his own personal check. While leaving the St. Regis he paid up his bill by check, saying he had to go to Atlantic City for the week. Meanwhile, inquiries had been made of the Havana hotel proprietors upon whom the checks had been cashed. They replied that they held no funds for Baker's credit. The hotel proprietors decided that he was no longer in their employ and had no authority to represent

David J. Larkin, a detective in the employ of the Gorham Co. was assigned to the case. He learned that Baker's baggage had been sent to the Pennsylvania Railroad station in Jersey City on Tuesday morning of last week. At the Pennsylvania station he learned that the man had changed cabs and returned to a hotel on 25th St., and that he had given his checks to a cabman to have his trunks transferred to the pier of the North German Lloyd Line in Hoboken. The detective obtained a description of the man, and when he had learned that the trunks had been transferred to the North German Lloyd Line docks he went there, but the *Kronprinzessin Cecilie* had sailed for Europe at 10 o'clock that morning. Baker's name did not appear on the regular passenger list, but on a supplementary list of first cabin passengers appeared a name somewhat similar.

An examination of the baggage disclosed that the passenger bearing this name carried the same number of trunks and of the same description as Baker's baggage. On the strength of this information the cable message was sent to the police authorities in foreign countries where the vessel was expected to touch.

At the office of the Gorham Co. it was learned that as soon as the order for about \$50,000 worth of hotel silverware had been received the hotel people in Cuba were notified, and it was learned that the man had no authority to place such an order. It was

said that Baker when giving the order for the goods had stated that he was acting under orders and would produce his credentials before the contract was signed. He gave his orders for what he wished in a way which showed him to be thoroughly familiar with what he was ordering. His story was that he was acting for a chain of hotels under the same management as the Savilla, and that the goods were for these hotels.

Connecticut.

Mayor George M. Landers, New Britain, is being anxiously awaited by his friends from a trip to England. He is expected to return the end of this week.

Alfonse M. Emberlin, a German clock-maker, was recently arrested in Waterbury on a charge of larceny preferred against him by a concern in Winsted.

General George H. Ford, New Haven, presided at the shore dinner, held Sept. 16 at Morris Cove, under the auspices of the Connecticut Sons of the Revolution.

Harry Ellis Lux, of the firm of Lux, Bond & Lux, Hartford, and Miss Frances Emily Weeks, Rosemont, Pa., were married at the latter place, on Wednesday afternoon.

Walter Camp, president of the New Haven Clock Co., New Haven, accompanied by his wife, has returned to his home in New Haven from the Shelton House, Pine Orehard, where he spent the Summer.

In the town court at Seymour, Thursday, Justice R. H. Smith entered a judgment by default in two cases of Abraham Geller and Francis Scott against H. Obstfeld, a jeweler of Main St., at that place, who left town some time ago.

Joseph Stuhlbach, for the past seven years engaged in business in Stafford Springs, is about to move to Port Jervis, N. Y., where he will continue in the same line. He will be succeeded in Stafford Springs by George G. Chittendon, until recently of Steventown, N. Y.

Charged with the embezzlement of \$4,500 worth of diamonds, John Jessop, a former salesman for John I. Smith, Fair Haven, was bound over to the Superior Court, Wednesday, under bonds of \$1,500. Following the disappearance of the diamonds, two years ago, Jessop vanished also, and was recently taken into custody and brought back to New Haven.

John J. McDonald, who for the past 26 years had been foreman in the case department of the New England Watch Co., Waterbury, has offered his resignation, which will take effect Oct. 1, after which he will engage in business with his son-in-law, F. W. Wenzel. He will be succeeded in his former position by E. F. Grilley, for some time foreman of the train department.

Irving Ingraham, vice-president of the E. Ingraham Co., who makes his home in Los Angeles, Cal., is now in Bristol, after an extended trip abroad. Mr. Ingraham left Bristol about a year and a half ago, and has been touring most of the time in Europe. While away he visited every city of importance on the Continent and also journeyed extensively in Africa. After visiting his brothers in Bristol, he will proceed to Los Angeles.

C. G. Strock has begun business in Santa Ana, Cal.

A. H. Denny will soon open a jewelry store at Saranac Lake, N. Y.

J. B. Paxton, Sac City, Ia., has decided to open a store at Hettinger, N. Dak.

O. D. Stroud intends shortly to engage in the jewelry business in California.

John Welch has commenced business as a retail jeweler at 803 N. Gay St., Baltimore, Md.

C. B. Kuehnle & Co. opened a jewelry store, recently, on the Boardwalk, Atlantic City, N. J.

E. Crane is a new jeweler in Atlantic City, N. J. The store is located at 1619 Boardwalk.

H. Beckman has opened a retail jewelry store and repairing establishment at Mariposa, Cal.

F. Schneider will soon engage in the retail jewelry business in the Burrows building, Riverside, Cal.

Isidore Steinberg, Farmington, Mo., has opened an attractive store at 1002 N. Grand Ave., St. Louis, Mo.

A jewelry, watchmaking and optical store has been opened by M. Eschner, at 126 S. Kentucky Ave., Philadelphia.

Rufus Rankin has engaged in business at 107 S. Kentucky Ave. Mr. Rankin will carry a line of jewelry novelties.

A. S. Higbee, conducting an optical business at Roodhouse, Ill., has added a stock of jewelry to his establishment.

The Riverside Jewelry Co. has started in business at 317 Bullock's Point Ave., Riverside, R. I., as a mail-order house.

S. I. Echelbarger, formerly with L. I. Peddinghaus, Marietta, O., has begun business on his own account in Union City, Ind.

Harry M. Slaughter, formerly with Chris. Bernloehr & Bro., Indianapolis, Ind., has opened a store on his own account at Union City, in the same State.

The Shepard Finding Co. is the name of a new concern at 150 Chestnut St., Providence, R. I. The firm will manufacture metal ornaments and findings.

G. F. Cosnette, Bridgeton, N. J., has opened a jewelry establishment at 2701 Boardwalk, Atlantic City, N. J. Mr. Cosnette expects to open a factory in the near future.

Charles Teneyek, Gloversville, N. Y., is about to open a store at 35 W. Main St., at that place, in the quarters formerly occupied by M. C. Conn. Mr. Teneyek, until recently, was employed by a large jewelry concern in Kingston.

Walter H. Deuble, Canton, O., recently purchased a bank building there for a consideration of \$30,000. The original owners have reserved the right to occupy the place until Sept. 10.

Newark.

Retailers report an improvement in business.

Matthias Stratton, of Alling & Co., has been out of town for several days.

The engagement of Miss Helen Allsopp, daughter of Henry Allsopp, of Allsopp Bros., to Walter Grange Thacker, of New York, is announced.

F. M. Van Houten, of the Schwarzkopf Mfg. Co., is in New York State; George Weiss is touring the Central States, and William Schwarzkopf is in Mississippi.

Mr. Bancroft, a member of the Bancroft Bros. Co., Columbus, O., was in this city, last week, on a business trip. He paid his respects to his friends in the wholesale district.

The United Silver Co., having its registered office at 776 Broad St., has filed articles of incorporation authorizing it to have a capital of \$15,000, of which \$1,000 is paid up. The incorporators are Paul Armitage, James Betts and A. H. Montegriffo, all of this city.

A new concern, dealing in precious stones, has entered the Newark field. The members are Edward V. Anderson and Isidore Lassner, New York, and Anna L. Coughlin, Elizabeth, N. J. Papers of in-

corporation have been filed with the County Clerk of Essex. The capital of the concern is \$10,000.

William Coney, a former employe of the Celluloid Novelty Co., of this city, died, last week. He was a veteran of the Mexican War and an orderly to General Grant during the Civil War.

Mr. Van Ness, of the American Oil & Supply Co., is expected home shortly from a business tour of New York State and Canada in the interests of the jewelry supply department of the company.

John F. Zucker, vice-president of the George Zucker Co., dealers in polishing and buffing compounds and well known to the jewelry trade, committed suicide, Saturday morning, at his home in East Orange.

Many of the retailers expect to attend the annual banquet of the Newark Credit Men, which will be held this year at the Kreuger Auditorium, Nov. 15. Curtis R. Burnett is chairman of the arrangement committee.

William H. Tichenor, a jeweler of 12 Liberty St., was sued in Chancery Court by his wife, last week, for the enforcement of an agreement which they made several years ago and under which Tichenor was to pay \$10 a week when they separated, the separation being mutually agreeable. She claims Tichenor did not live up to his agreement. He avers that she circulated stories concerning him and tried to injure his business, and for this reason he declined to pay her the money stipulated.

Robert Jourdan, formerly employed by Burstow, Kollnar & Co., 18 Columbia St., has brought suit in the Chancery Court to have two lots, which he conveyed to his employers when they accused him of embezzlement, reconveyed back to him. He claims that he did not understand the purport of the transaction at the time and that he was not guilty of the theft of ingots of gold, of which he was accused. His suit was heard before Vice-Chancellor Stevens. The papers which, he said, he was forced to sign accused him of the theft of goods valued at \$2,000. The lots which he transferred, together with a sum of cash, was given in the way of restitution toward his alleged embezzlement, which the defendants say he fully admitted.

Trade Gossip.

The Potter & Buffinton Co., Providence, R. I., is distributing to the trade a neat little folder, illustrating a new creation in locket jewelry in the form of a locket and signet combined.

Catalogue No. 56 has just been issued by Manning, Bowman & Co., Meriden, Conn. It consists of 215 pages and contains illustrations and price lists of their various lines, such as alcohol gas stoves and outfits, chafing dishes, coffee percolators, traveling companions, prize trophies, etc.

The magnificent Larter Gold Book for 1910 has recently been issued. As stated in the preface, this is not a catalogue, but, however, it conveys a very good idea of the various lines of gold jewelry made by Larter & Sons, 21-23 Maiden Lane, New York, and every jeweler ought to have a copy for reference.

the manufacturers' representatives in last week, were: Frederick Keim; Sid. H. Marden & Kettlety Co.; Jack Dunn, Ausc. C. D. Petty, Winthrop Mfg. Co. The following representatives in Toronto, Ont., were: Charles Jacot, Friedrich Speidel (Germany); Mr. Ripley, Standard But. M. Yorke, Henry Rogers & Son (Sheff.  William Loeb has started on a six weeks' trip to the western trade in the interests of the Rhode Island Ring Co., of this city.
 Leo Kilkenny, with T. W. Lind Co., is enjoying a two weeks' vacation among the mountains in New Hampshire and Vermont.
 The northwestern trade of Hamilton & Hamilton, Jr., of this city, is receiving calls from the firm's western representative, G. Jewett.
 The factory of the Theodore W. Foster Bro. Co., is running nights to keep pace with the orders that are daily adding to their books.
 John Sheard, Jr., and A. S. Vennerbeck are members of the Rhode Island team in the interstate golf match with Connecticut at Hartford, on Saturday.
 James R. Palmer was in Chicago the past week representing Henry A. Kirby, of this city. H. A. Kidder, of the same firm, is on the Pacific Coast.
 Edwin A. Bush, general manager of the Charles S. Bush Co., was in Vermont the past week on business connected with the

concern and Vice-President Braids was in New York.
 William E. Chase, of the United States Gas Furnace Co., is taking a much needed respite from business cares among the mountains in New Hampshire.
 The Tilden-Thurber Co. has been given the exclusive agency in this city for the "Edgewood Bar Pin" by the manufacturers, the Harvey J. Flint Co., of this city.
 Mr. and Mrs. A. T. Wall were members of an automobile party at Narragansett Pier last Monday. Mr. Wall left the following day for a month's stay at Chicago.
 W. R. Ford was in town the past week placing some good orders with local manufacturers, for delivery to the Thompson-Hudson Co., a new department house at Toledo, O.
 Anson D. Manning, with D. Wilcox & Co., is erecting a fine residence in East Providence, near the grounds of the Pomham Club, overlooking the waters of Narragansett Bay.
 The mortgagee's sale of the plant of the United Brush Co., on Main and Carver Sts., Pawtucket, which on Sept. 2, was postponed to Sept. 10, has been again continued to Sept. 30.
 George W. Allen, Jr., left the first of the week on an extended western trip for the Macomber Mfg. Co. He will show the firm's new line of brooches, scarf and cuff pins for the first time.
 Among those who attended the invitation lunch given at the Crown Hotel by Gen. Charles R. Brayton, to the Republican leaders of the State were Frank E. Duteuple and Roswell C. Smith.
 The Riverside Jewelry Co. has started at 317 Bullock's Point Ave., Riverside, doing a mail order business. Goddard J. Schoenhardt is president and treasurer, and William G. Schoenhardt is secretary.
 Among those who attended the annual dinner given by the Republican leaders of Cranston, at Slocum's, Pawtucket, last Wednesday evening, were George W. Dover, William W. Bloomer, Phineas Conley and William R. Duteuple.
 Mayor Henry Fletcher, of the Fletcher-Burrows Co., and Henry D. Sharpe, of the Brown & Sharpe Mfg. Co., are members of the special committee on new industries of the Providence Board of Trade, to induce firms to locate in this city.
 Frederick W. Aldred, who has been traveling in the west since the first of July, is now at Los Angeles on his way home, after visiting the Yellowstone Park, the Alaska-Yukon-Pacific Exposition at Seattle and other places of interest en route.
 Manufacturers in this vicinity have received notice from the manager of the Eastern Dry Goods Alliance that the buyers of that association will not visit this city this season to place their orders, but will look at the various lines at the New York office.
 Mr. and Mrs. William E. Aldred have returned from East Douglas, Mass., where Mr. Aldred went immediately upon his return from Europe, his plans abroad having been interrupted by an illness of two weeks in Cologne, which prevented his visiting Switzerland.
 George N. Steere has returned from the western circuit with so many orders that

the firm of George N. Steere Co. finds it impossible to keep pace with the daily bookings. Frank Somers, who is making the western circuit for this house, is also sending in good orders.
 Albert Ross, 17 years old, was arraigned before Judge Gorham in the Sixth District Court, Wednesday morning, on the charge of the larceny of one ring, one watch and one pair of sleeve links, all valued at \$27 from the Outlet Co. He pleaded guilty and was fined \$10 and costs.
 Robert E. Buddlong, of S. K. Merrill & Co., and president of the Manufacturing Jewelers' Board of Trade, attended the annual convention of the National Banking Association at Chicago the past week, as a representative from the Atlantic National Bank of this city, of which he is one of the directors.
 The regular monthly meeting of the directors of the Manufacturing Jewelers' Board of Trade was held in the rooms of that association on Friday afternoon. In the absence of President Buddlong, who is out of the city, first Vice-President Fred D. Carr presided. One new member was elected to membership.
 The Shepard Finding Co. is the name of a new concern that is located at 150 Chestnut St. for the manufacture of metal ornaments and findings. The company will be composed of Joseph H. Kerchijian, who has been a traveling salesman for A. Vester & Sons; Reuben Berberian, who has been in the enameling business at 14 Blount St., and B. G. Shepard.
 Lieut.-Gov. Arthur W. Dennis tendered a dinner to the members of the State senate and invited guests at the Pomham club on Friday afternoon, and about 80 persons enjoyed his hospitality. Among those present were Gov. Pothier, Attorney-General Greenough, Secretary of State J. Fred Parker, Albert A. Remington, George H. Grant and Emery J. San Souci.
 As the season for the opening of the evening schools approaches, the sentiment in favor of establishing an Evening Technical High School becomes more pronounced, and it is quite possible that when the schools are opened in October one in which manual training is given will be included in the number. Among the branches which it is proposed to teach in case such a school should be opened will be jewelry making and designing. The school would be open four nights a week.
 Among the foreign importations received through the Providence Custom House during the past week were the following: From Bremen, seven packages of imitation precious stones; from Hamburg, six packages of glass ware, one of manufactures of metal and one of imitation precious stones; from Havre, one package of bronzes, one of enamel ware and one of imitation precious stones; from Liverpool, four packages of manufactures of metal; from Rotterdam, 10 packages of crockery; from Southampton, one package of silver-ware.
 The seventh annual field day and clam-bake of the employes in Room M 5 at the Gorham Mfg. Co., took place last Saturday afternoon in Smithfield, with 75 present. On the arrival of the company at the grove, lunch was served, after which a

Factory Inspection

Having a high standard of excellence to maintain, our factory inspection is extremely rigid. Every piece of jewelry that we manufacture is critically examined by competent inspectors after each operation and the smallest imperfection is detected. Thus we maintain our reputation and protect our customers, who may feel absolutely sure that every article which they purchase will be perfect and possess every essential feature of quality.

Prices Low Quality Considered

Manufacturers of 14k. and 10k. Brooches, Diamond Mountings, Festoons, Pendants, Scarf Pins, Links, Tie Clasps, Studs, Locketts, Bracelets, Ear Screws and Drops, Collar Buttons, Hat Pins, Cuff Pins, and Combination Sets.

game of sports was in order. The all game between the married and single men resulted in a score of 9 to 5 in favor of the husbands. The bake was ready at 4 o'clock, and speeches and songs listened to after the repast. T. E. Haw and G. Jepson formed the committee of arrangements.

Directors in this vicinity of the Southern Sales Jewelry Co., of New Orleans, are giving acceptably indorsed notes for 50 per cent. of their claims, due in February, 1910, in full settlement, through the organizing Jewelers' Board of Trade.

James B. Ingraham and Walter E. Williams are two of the incorporators of the Williams Land Co., which took out a charter of association at the Secretary of State's office, last week, to deal in real estate, with a capital stock of \$50,000.

Shepard, Jr., of the Shepard Co., of this city, has been elected treasurer of the Norwell Co., of Boston, and will assume a prominent part in the management of the latter concern, of which he is the president and in which his younger brother Mr. Shepard recently purchased a considerable interest.

Indictments were filed in the Superior Court Saturday against Arnold C. Messler, of C. Messler & Co., manufacturing jeweler, as the result of an automobile accident in Pawtucket, Sept. 24, 1907.

L. McCormick, a minor, sues for damages of \$10,000 for injuries received by his father, William A. McCormick, who sues for \$5,000 as compensation for loss of the services. The plaintiffs declare that the boy was riding a bicycle along the street when the defendant's automobile came from behind a team and struck the boy. The boy was thrown to the ground and received a fractured skull and other injuries, it is claimed.

The igniting of the gas in a blower pipe, causing the bursting of the latter, in the factory of E. C. Bliss & Co., 91 Sabin St., caused much excitement on the downtown streets at 10:30 A.M. Sept. 14. The accident caused a loud explosion that was heard over a long distance. It occurred in the rear of the building. Someone had left the door open, with the result that the long blower pipe connecting the drum to the furnace filled entirely with gas. There was a fire in the furnace, which within a few minutes was at a white heat. The heat caused the ignition of the gas and the pipe burst with a thunderous noise. Three men who were working close to the drum had a narrow escape. Their clothing was covered with steam and their hands were badly scalded, but otherwise they were uninjured.

F. C. Bliss, the manager of the establishment, stood at the head of the stairs when the explosion occurred, and hurried down to the cellar, not knowing what he might find. He heartily congratulated the men for their fortunate escape. The damage caused by the explosion was estimated at about \$100.

Carl Jelenko, for several years with the Chagru Jewel Co., will open an exclusive jewelry store at 224 E. Baltimore St., Baltimore, Md., about Sept. 25. He will carry a full line of watches, diamonds and other goods.

Attleboro.

Charles Crane, salesman for Bliss Bros. Co., has returned to Chicago.

A letter is being held at the postoffice for the Attleboro Jewelry Co.

Louis D. Jones, representing C. A. Marsh & Co. is confined to his home by illness.

Rothschild & Levy have moved their comb factory from this town to Chicago.

G. Percy Clap is making a New York State trip in the interest of Daggett & Clap Co.

The Bristol Mfg. Co. has become the Bristol Jewelry Co., a non-incorporated body.

W. L. Tidd, salesman for the Winthrop Mfg. Co., is enjoying a vacation at Bethlehem, N. H.

S. M. Einstein, a well-known manufacturing jeweler, is planning to erect a new residence on County St.

C. D. Lyons, of the C. D. Lyons Co., Mansfield, was in New York last week in the interests of his concern.

Charles W. Perry, salesman for C. M. Robbins Co., was in a railroad wreck in Connecticut last Friday night, but happily escaped without injuries.

C. O. Sweet and William E. Sykes were members of the delegations presented in the Republican caucus Tuesday, and favorable to George A. Sweeney.

S. O. Bigney, Maxy Potter, Harvey E. Clap, C. L. Watson and Peter Nerney have been made members of a committee in charge of the coming Elks' fair.

While digging the cellar for the new factory of the Mossberg Co., last week, a ledge of rock was found which is thought to contain gold. Some of the rocks were sent away to be analyzed.

A number of salesmen have returned from trips to the west, but will start out in two weeks again, so as to catch the buyers who were away on vacations when the travelers made their last trip.

Col. Sidney O. Bigney emphatically denies the truth of the reports published in Boston papers that he is to be a candidate for Congress in the 14th Massachusetts district, when Congressman Lovering steps aside next year. Col. Bigney says that under no circumstances would he accept the nomination.

Fifty years ago last Saturday, the old steam power building which stood on Railroad St. was destroyed by fire. The building that replaced the burned structure did service as a home for jewelry concerns until this Spring, when it was torn down. On the site a new modern factory will be erected in the very near future.

Maxy W. Potter, with J. M. Fisher & Co.; Mr. Tanner, with Allen, McNeerney & Co.; W. H. Payson, with Finberg Mfg. Co.; W. L. Bushee, with A. Bushee & Co.; J. W. Clark, with R. B. McDonald & Co., and William Moulton, with F. W. Weaver & Co., all of this place, were in New York last week, having arrived back from western trips.

Herbert M. Williams, a former manufacturing jeweler of this town, was arrested in New York last week on a civil process to satisfy a judgment secured against him by Mrs. Emma F. Sullivan, who was the wife of the late Fred. Heffron. Mrs.

Sullivan claims that she placed an automobile in the hands of Mr. Williams for disposal and that he failed to make any returns to her. A judgment for \$276.81 was awarded to her, and the defendant was allowed five days to pay, which he failed to do. Williams was formerly salesman for the A. T. Wall Co., Providence, manufacturing jewelers. Williams later came to Attleboro, and formed the H. M. Williams Co., but a few years ago met with reverses and returned to New York.

North Attleboro.

J. J. Sommer is at present in the west.

Artner Chace, salesman for Boss & Baldwin, was at the factory last week.

George S. Semple is making an eastern trip for the W. & S. Blackington Co.

Walter Duncan is making a western trip in the interests of C. Ray Randall & Co.

Harry Fisher left last week for a short trip in the interests of Furbish, Swift & Fisher.

Charles Clark has returned from a successful western trip in the interests of his concern.

F. S. Gilbert returned last week from the west, where he has been in the interests of his concern.

Daniel Chisholm has returned from a western trip in the interests of the Bugbee & Niles Co.

Howard Grant has returned from a successful trip last week in the interests of Riley & French.

A large number of the local factories have started to run on a 13-hour schedule to fill their orders.

Raymond Draper, of the estate of O. M. Draper, returned last week from a vacation enjoyed at Oaks Bluffs.

J. J. Sommer & Co. are planning to open a Chicago office, of which Edward Sommer will be given the management.

The engagement of Phillip R. Cook, who has charge of the packing room of the J. F. Sturdy's Sons Co., and Miss Vera Billings, of Milford, has been announced.

The Whiting & Davis Co. is at present doing a big business in mesh bags. In addition to eight mesh machines the concern has over 2,000 makers in six States and will take on 5,000 more as fast as possible. The concern keeps a standing advertisement for every ring purse maker in the Attleboros.

At a meeting of the Republican Town Committee, last Friday evening, the following manufacturing jewelers were selected for positions on a slate that will be presented to the Republican voters of the town: Town Committee for 1910, Fred Gilbert, W. B. Ballou. Delegates to the representative convention, Raymond Wise, H. J. Straker. Delegate to the Senatorial convention, Charles T. Paye. Delegates to the county convention, F. O. Coombs, Roswell Blackinton. Delegates to the State convention, W. H. Bell, John Rose, W. B. Ballou and H. Alton Hall.

S. E. Theus, of Theus & Co., Savannah, Ga., has been appointed a member of the committee to arrange a banquet in honor of President William H. Taft and party on the occasion of their visit to Savannah, Nov. 4 and 5, 1909.

LOUIS J. MONTAGNON, Secretary-Treasurer

Philadelphia.

alter Powell, Cumberland, Md., was a visitor to this city, on business.

Levy, Chester, Pa., has returned after an enjoyable cruise in his new boat.

C. Kremer, Phoenixville, Pa., is making arrangements to enlarge and improve his store.

W. Harper, Hurlock, Md., spent a few days in town, last week, before going to New York.

E. Harper, mayor of Salisbury, Md., was a visitor to this city, last week, buying fall stock.

William Locke, watchmaker for Frank Posten, Stroudsburg, Pa., stopped off on his way to Atlantic City.

The jewelry store of W. F. Seidel, Bowling Green, was entered and robbed, last week, of many valuable pieces of jewelry.

Ermond Diesinger, case maker, 115 S. 7th St., is recovering from a severe cold, which he contracted some months ago.

Joseph Wachs, with J. Neill, optician, 727 Arch St., while working in the factory, last week, suffered the loss of a finger.

Lawrence E. Hunter, jeweler, Beverly, N. J., is giving his store a general overhauling. New fixtures and cases have been installed.

D. Stoudt, a former representative for J. O. Hurlburt & Sons, has gone to California, where he intends starting in the jewelry business.

W. Carey, Hampton, Va., spent last week in this city visiting old friends. Mr. Carey formerly conducted a jewelry store in Frankford, Pa.

John L. Borsch, Jr., has conveyed to John L. Borsch, optician, the three-story building at 1308 Walnut St. The assessed valuation is \$60,000.

F. Dilzheimer, of Ferdinand Dilzheimer & Co., 710 Chestnut St., who has been traveling in Europe for the past three months, returned home, last week.

Old gold and coins were stolen from the store of M. Shapiro & Co., 5 S. 7th St., by a thief who threw a brick through the window and made his escape.

Louis Meyers, silver plater, S. 8th St., is using the spade which was used in digging the first spadeful of earth in the erection of the new Gimbel store in New York.

B. Robertson has been given entire charge of the material department of McKles & Sons. Mr. Robertson has succeeded Mr. Horn, who has been transferred to the jewelry section.

A. Schlechter, Reading, Pa., made a special trip to this city, Friday, to witness a game between the Athletics and Detroit.

Schlechter was too late for the game, but he consoled himself visiting the trade.

Diamonds valued at more than \$300 were stolen from the jewelry store of Weaver Nelson, manufacturing jewelers, 127 S. 7th St., last Friday evening.

The thief escaped, leaving no trace as to his identity. Many retail jewelers, anticipating the increase in price on movements made by the firm and Waltham companies, swarmed to this city during the week.

Watch dealers and jobbers had as much as they could do to handle the unexpected increase in business.

Rubenstone, jeweler, with stores at

125 7th St., and 1623 Susquehanna Ave., has been elected vice-president of the Business Men's Carnival, which will be held annually on Susquehanna Ave. Mayor Reburn will open the first carnival, which will take place Oct. 7 and 8.

The Bailey, Banks & Biddle Co. has on display in its window more than 70 special silver cups in various sizes and designs, each bearing the seal of the Bryn Mawr Horse Show Association in enamel. In addition to these cups are the trophies for the Light House and Kensington Boys' Club, to be presented at their annual track meet.

The local Fall meeting of the Pennsylvania Retail Jewelers' Association was held Monday, at the Jewelers' Club. The committee calling the meeting consisted of J. Warner Hutchins, F. C. Bode, Frank Kind, W. H. Thompson, Jr., Wm. Gibbons, Maxwell & Berlett, Chas. H. Hamby, H. F. Seltzer, Geo. S. Katz and President Ira D. Garman. There was a large attendance.

W. J. Finton, of the diamond section of Strawbridge & Clothier's, is responsible for their attractive window display, this week. In a gold frame, with the stars and stripes fluttering on either side, there is a globe with two distinct tracks of precious stones, indicative of Peary's and Cook's climb to the Pole. At the top there is a small figure encased in a coat of diamonds, presumably Dr. Cook.

The man and woman who were arrested, last week, charged with conspiring by letter to plan an escape for George Schaeffer, the condemned murderer of Leopold Erman, were released from jail, last Friday, because of insufficient evidence. According to the letters, Schaeffer was to be supplied with acids, guns, saws and other instruments, which were intended to make his escape easy and, if necessary, Wardeh Wienand was to be killed. For this help Schaeffer was to pay the conspirators \$50.

The following jewelers were visitors to this city, during the week: J. D. Salladay, Norristown, Pa.; C. M. Banks and M. Bryan, of Baynard, Banks & Bryan, Wilmington, Del.; M. F. Davis, Wilmington, Del.; F. C. Moag, Bridgeport, Pa.; M. C. Broek, Trenton, N. J.; J. H. Lepsch, Ridgeway, Pa.; Thomas Leslie, Ocean City, N. J.; R. T. Chapman and M. Friedeberg, Atlantic City, N. J.; J. W. Parrish, Newark, Del.; G. Lang, Norristown, Pa.; E. K. Bean, Lansdale, Pa.; Roland Oliver, Burlington, N. J.; R. W. Quicksall, Mt. Holly, N. J., and D. H. Krouse, North Wales, Pa.

J. A. Caldwell & Co. have designed and made the Henry D. Moore cup, which is to be presented to the Holly Beach Yacht Club as a perpetual trophy to be contested for annually by motor boats. The cup stands 14 inches, independent of the base, and is built of sterling silver. Around the top of the cup is an etched scene of a motor boat race in which four modern high-power boats are shown dashing through the water at high speed. Below the etching is applied a rope which forms a nautical loop. In the loop are the initials of the club. On the reverse side a rope medallion is applied. The remaining space is for the winners' name each year. This house has the contract for the prizes to be awarded at the Chesterbrook races, Sept. 28.

Boston.

Alanson Bigelow, Jr., is at his camp, which is situated near Moosehead Lake, Me.

The Bentley Jewelry Co. is removing from the third to the ninth floor of the Jewelers' building.

William B. Garfield, with Kettell & Blake, is enjoying an outing at his camp at Wilson Mills, Me.

It is announced that jewelry working will be part of the course in industrial training of the East Boston High School.

The Waltham free library has added to its shelves a large number of books on the subject of clocks and watches. An announcement of the increased collection has met with much interest in that city.

William E. Murphy, who was brought from New York to answer to charges of larceny on two counts, it being alleged that he stole \$532.50 worth of jewelry from Robertson, Hartley & Co., and \$504 from Davis Bros., has been held in \$1,800 bonds for trial.

E. Charles Fitch is now in charge of the Waltham Watch Co.'s Boston office in the Jewelers' building. There have been several changes made in the personnel of the office force. It is understood that the material department will be moved out to the factory building at Waltham.

The Waltham watch factory bowling league has arranged for a series of games which will be begun the latter part of this month and continue until April. The league consists of 10 teams, including the "flat steel," "finishing," "punch," "gilding," "jewel making," "hairspring," "dial" and others yet to be organized. The annual outing of the employes of the jewelery department was held, Saturday, at Child's farm and largely attended.

The first meeting of the Fall season of the New England Watchmakers' Club was held, Tuesday evening of last week, at Engineer building B, Massachusetts Institute of Technology. In the absence of the president and vice-president Treasurer Nichols presided. About 50 members were present. After several important business matters had been acted upon the speaker of the evening, H. E. Dunean, was introduced, and he gave a very interesting talk on the Alaska-Yukon-Pacific Exposition. At the next meeting it is hoped to have as the principal speaker Consulting Superintendent Higginbotham, of the South Bend (Ind.) Watch Co.

Among the jewelers in town, last week, were: W. E. Whitney, Hopedale; Henry A. Wippich, Provincetown; J. F. Whippich, Ipswich; L. R. Hapgood, Orange; P. F. McEneaney and G. A. Schmidt, Lawrence; Loring Smith, I. A. Willey and H. S. Hewett, Brockton; F. H. Jessup, Wareham; H. W. Eager, Marlboro; W. A. Kemp, East Pepperell; E. L. Walsh, Foxboro; J. F. Hill, Beverly; David Robertson, South Framingham; Arthur Stern and W. F. Newhall, Lynn; David Perreault and Frank Ricard, Lowell; John Perreault, Worcester; H. P. M. Dahl, Maynard; G. W. Cheney, of E. E. Cheney; Fred Hendricks, Nashua; C. H. Sinclair, Concord; B. G. Couri, Portland, Me., and W. E. Morse, Burlington, Vt.

GORHAM SILVER

GORHAM FALL SILVERWARE

¶ For the approaching Fall and Holiday seasons the Gorham Company have made thoroughly adequate preparation, and for many months past their designers and craftsmen have sedulously engaged in the production of new and original examples of Gorham activities.

¶ As a consequence, the Company's display of Fall and Holiday goods has never been more complete or so comprehensively varied. New and attractive patterns in all the standard lines, as well as exclusive novelties not to be found elsewhere, are offered at prices comparing more than favorably with those asked for goods of a similar character but lacking the Gorham trade-mark and prestige.

The Time to be **W**ITH the commencement of the busy season, retail and even wholesale establishments should give warning to clerks and other employes to be on the outlook for swindlers and thieves of all varieties, of all ages and of both sexes, because, as has often been said in these columns, it is when business is brisk and the merchant or clerk feels he has no time to take extra precautions that the swindlers and crooks feel that they can operate with most success. In other words, the less time one has to be cautious, the more time should be given to taking precautions.

Another point that should be impressed upon the salesmen and saleswomen in the trade is that the most dangerous thief or swindler is the one that excites the least suspicion, and that the barriers of caution should never be dropped because of the dress, appearance or charm of manner of a customer who is not personally known to the establishment. It should be impressed on everyone from the office boy to the sales manager that the thief or swindler who plays for the biggest stake is the man who will have all the indicia of wealth, respectability and refinement, and will be one whose acts, manner and suggestions will be open to the least possible suspicion. It is the well-built and clean-cut and elegantly attired gentleman who may lean over and open the show case when the clerk is not looking, as it is the well-gowned woman of refined appearance whose check may come back marked "N. G."

We Need Development on Artistic Lines. **T**HE dearth of artist and artisans in the jewelry trade of the United States has often been a subject of comment in these columns, and this condition seems to be growing worse instead of better as the years go on. What is more, it will continue to do so until an acute state is reached, unless the manufacturers and others interested in the artistic development of the craft take more active interest in the subject in the future than they have up to this time. For years the jewelry trade of this country could and did draw upon the trained artisans of Europe for help in the workshop and factory, but the number of artistic craftsmen who reach these shores has been decreasing while the demand for artistic jewelry has increased, until to-day the proportion of practical jewelry artists we get from Europe is hardly a factor in the business; and, what is more, the proportion of American boys of artistic talent who are going into the jewelry line is even less.

Already the effect of this condition is seen upon our industry—if not directly, it is at least apparent when the artistic development of the jewelry trade is compared with that in other lines. Everyone knows that the last 15 years has seen the greatest artistic strides in all sorts of commercial products, from wall-paper and furniture to pottery and metal work, and to-day many of the cheapest commercial wares that are used universally have artistic excellence that would never have been dreamed of a decade or two ago as likely to appear in

Intelligent advertising and business stagnation cannot exist together.

anything but the most expensive products. Can anyone say that in artistic lines the jewelry industry (the oldest art industry extant) has made any such progress? True, we have advanced and are advancing after a fashion, but it is at a snail's pace compared with the express-train speed of the artistic development all around us.

The American manufacturers in other lines may be among the most progressive in the world, and the American jewelry manufacturers may keep up to the standard of his brothers in other industries when it comes to the actual making and marketing of his product; but in developing the artistic side—the element that should be and is essential in the success of his business—he has been negligent in the past and is indifferent at present. Let us hope that in the future his attitude will be more progressive for the sake of himself and his customers. His French, and particularly his German, competitor, is meeting him on almost equal grounds in the development of the mechanical end of the business, and is his superior on the artistic side. For this reason German manufacturers have been getting a foothold in this country which they will retain and increase if the present conditions keep up. The present tariff on cheap jewelry of 85 per cent. is not sufficient to counteract the difference between an artistic and an inartistic product, nor will a protective duty of double that amount prevent foreign competition in the future if the American manufacturer cannot satisfy and keep pace with the development of the artistic taste of the American consumer.

LETTERS TO THE EDITOR.

Importers of "Hope" Sapphire Reply to an Implied Criticism.

NEW YORK, Sept. 20, 1910

Editor THE JEWELERS' CIRCULAR—WEEKLY

In the version of Dr. C. F. Heiler's lecture on "Constructed Stones Similar Products," as it appears in issue of Aug. 25, we notice that when reference is made to the "Hope" sapphire the term "Hope" is omitted, being substituted by (—).

Being interested in the "Hope" sapphire as an article of our exclusive product and as one in which the interest of trade in general is of no mean importance seems to us that when an opinion of weight as that of Dr. Smith's is expressed concerning it, there should, in justice concerned, be no doubt left in the mind of the reader as to what specific article reference is made.

We fully agree with the lecturer as to the chemical and physical properties of the "Hope" sapphire, for which we do not claim any more than what is credited to it by him, although great improvement has been achieved recently in the direction of color, inasmuch as the purple hue which this stone has been said to assume in artificial light has been eliminated almost entirely.

As to the term "Hope," we never intended to convey by it any particular scientific meaning. It was adopted by us for our product merely as a commercial term in distinction from an inferior article offered in the market under the name of "scientific" sapphire to which, by the way, Dr. Smith makes reference in one of the paragraphs following that on the "Hope" sapphire, as being "amorphous, i. e., glass, having no crystalline structure."

While the "Hope" sapphire is not the exact counterpart of the real Oriental sapphire, it very closely approaches, according to the opinion of the lecturer, what is known scientifically as the spinel sapphire which is no less than what we claim for

Very respectfully yours,

L. HELLER & SONS

New Orleans, La.

Johan Rask, a jeweler, of 558 Verret St. Algiers, recently complained to the police that his shop had been broken into early one morning while he was in the rear of his premises and five gold-filled watches valued at \$10 each, taken, together with a plated chain, worth \$5.25, and a gold coin worth \$50. Later the police arrested a young negro boy named Smith, in the belief that he was connected with the robbery.

Joshua Lippman, who died in this city recently, had been connected in the jewelry business here since the Civil War, and was well known in business and in fraternal circles, particularly among the Masons. He ceased was 76 years old and was a veteran of the Confederate army; he was a native of Cincinnati and came to New Orleans in 1845. Among the jewelry establishments with which he had been connected were those of Jos. Turk, Samuel Jacobs, Mr. Lowenthal, A. M. Hill and C. E. Adler.

New York Notes.

Alphe Schwob, 170 Broadway, visited Chicago office last week.

Mr. Franklin, 65 Nassau St., has returned from a trip to the west.

Hudson has returned from a short business trip for Hutchison & Huestis.

Mr. Hull, of Barden & Hull, Attleboro, was in the Maiden Lane district last week.

W. Tyler, 4 W. 28th St., announces that the estate of Isidore Bernstein is no longer in liquidation.

W. W. Sanford, of Sanford & Bennett, is on a business trip to the middle and western Canada.

Mr. Bambein, secretary of the Hess & Sons Jewelry Co., St. Louis, Mo., is on a vacation in this city.

W. H. Bell & Tillotson, auctioneers, 35 Maiden Lane, are conducting a sale for the estate of the late E. D. Vosbury, Bingham-Y.

Mr. C. Nicot, representing the Levy Heron Co., Manila, P. I., is in this city on a business trip. He is stopping at the Hotel Square Hotel.

Mr. J. H. Carpenter, for years a traveling salesman for chain manufacturing concerns, but now retired, was on Maiden Lane last week visiting old friendships.

Mr. J. H. Rosenkranz, of this city, has opened an office at 424 S. Broadway, Los Angeles, where he will represent eastern manufacturers in that territory.

The additional stories are being added to the building occupied partly by Marcus & Sons, 44 Fifth Ave. It is expected the work will be completed about Nov. 1.

Mr. August V. Lambert, of Lambert Bros., 100 Third Ave., who has been abroad for the past four months on a visit to his brother, Robert Lambert, is expected home about the 1st of October.

Mr. Gustav Detackl, a jeweler of 13 Henderon Place, 21 years old, was taken a prisoner to the Presbyterian Hospital last week on a charge of attempted suicide. He was found with a bullet wound in his right temple.

Mr. Maurice Brower, 14 John St., has purchased a pearl valued at over \$5,000, which was recently found by George Rutledge, of Honville, Ill., in the Wabash River. The pearl is almost a perfect oval, and weighs 46 grains.

Mr. Allen, a stone dealer of Mexico City, Mexico, has been in town during the past week, calling on the trade. Mr. Allen had purchased for him two small monkeys, each weighing five and one-half ounces, which attracted much attention.

Mr. J. H. Woodman King, president of the Merriam & Jaccard & King Jewelry Co., St. Louis, Mo., was a caller at the office of the JEWELERS' CIRCULAR-WEEKLY last week. He had just returned from Europe on the *Kaiser Wilhelm der Grosse*.

Mr. Black, Starr & Frost, 436 Fifth Ave., are exhibiting a crystal fac-simile of the Cullinan diamond presented to King Edward VII. of England, Nov. 9, 1907. Models showing original forms of the rough stone and the several diamonds into which the stone was cut are all on display.

Mr. David Kaplan, a jeweler at Port Chester, N. Y., was approached recently by men

who wanted to sell him some half-dozen watches and other jewelry. Mr. Kaplan had his suspicion aroused, believing the property offered for sale was stolen, so thought he would notify the police of the actions of the men.

Schedules in bankruptcy of the New York Export and Import Co., 133 Front St., show liabilities \$149,809 and nominal assets \$98,521, consisting of stock \$53,206, of which \$38,135 is in the Far East, office fixtures \$3,598, accounts \$10,050, notes \$75, cash on hand \$4,166, cash in banks \$27,426, taken by the banks.

William Kleinschmidt, surviving partner of Kleinschmidt Howland & Co., importers of diamonds, 170 Broadway, was granted a discharge in bankruptcy by Judge Holt, in the United States District Court, last week. Schedules in bankruptcy were filed by the firm in Sept., 1908, showing liabilities of \$252,910 and assets of \$239,716.

Included in the list of recent loans at the Metropolitan Museum of Art is a silver candlestick, London, hallmark, 1714, made by John Read. The object was loaned by Hon. A. T. Clearwater. Another loan is the silver figure of a Meistersaenger, the Kaiser's prize, by E. Popler, Inv. and O. Rohloff Fec. It was lent by the Kreuzer Quartette Club, of this city.

The report in circulation last week to the effect that Jacob and Michael Dreicer, of Dreicer & Co., 560 Fifth Ave., had sold to Frank V. and John H. Burton the seven-story building at 436-438 Fifth Ave. was denied by Michael Dreicer, when asked about the matter by a representative of the JEWELERS' CIRCULAR-WEEKLY. The building is occupied partly by Black, Starr & Frost.

The R. Simpson Co., pawnbrokers, has opened a new store at 500 Fulton St., Brooklyn. The furniture and fittings are all of rich mahogany, even the main entrance being through a vestibule lined with this costly wood, beautifully carved. Features of the new store are the salesroom, loan department and the private booths for women, access to the last being through a private hall.

John F. Roche, who was at one time an employe of the Seth Thomas Clock Co., 15 Maiden Lane, died recently at Troy, N. Y. He went to Troy about three years ago. He was about 50 years old, and when a young man was prominent in musical circles. He was considered an expert book-keeper and accountant. Besides his wife, formerly Miss Elizabeth Hutton, he is survived by a brother, William J. Roche.

Ross Larrabee, Macon, Mo., writes the Jewelers' Security Alliance that on the night of Sept. 13, his store window was smashed and a number of watches and fobs stolen. The watches taken include five 18-size open-face, gold filled cases, with seven-jeweled Elgin movements, and four 12-size, 20-year hunting-case gold filled case watches with the same movements. Six gold-filled woven wire fobs are also included in the missing jewelry.

A new diamond-cutting factory was opened Monday by A. S. Van Wezel, Antwerp and Amsterdam, at 120 Walker St., under the management of Joseph Polak, who now represents Mr. Van Wezel in this city. The location is an excellent one for a diamond-cutting shop. The new shop is

adequately equipped with most modern machinery. About 50 men will be employed. At the opening Monday noticeable among the floral gifts to the manager, Mr. Polak, was a large horseshoe of roses from the diamond polishers, which was presented with an appropriate speech by one of the men.

Dr. George F. Kunz, of Tiffany & Co., is chairman of the sub-committee in charge of scientific and historical exhibits for the Hudson-Fulton celebration. Special exhibits will be on view at the American Museum of Natural History, 77th St. and Central Park West; American Society of Mechanical Engineers, 29 W. 39th St.; Brooklyn Institute, Eastern Parkway; City History Club of New York, 21 W. 44th St.; College of the City of New York, St. Nicholas Ave. and 139th St.; Frances Tavern, 54 Pearl St.; Long Island Historical Society, Pierrepont and Clinton Sts., Brooklyn; Metropolitan Museum of Art, Fifth Ave. and 82d St.; National Arts Club, 20th St., near Irving Place, and several others.

As an evidence that the new regulations were tending to check smuggling, a customs official said last week that the department has evidence that the mails and wireless telegraph were being used to notify incoming passengers to declare all they were bringing in. In 15 different cases, recently, the customs men here had trustworthy information that attempts were about to be made to smuggle diamonds into this country. In all these cases it was reported that the value of the diamonds involved would be from \$15,000 to \$35,000. It turned out that in every case the diamonds were declared. In one case, two men arrived in the second cabin of the Red Star liner *Lapland* from Antwerp. They were notified by wireless not to attempt smuggling and on their arrival declared diamonds to the amount of \$32,000.

An important conference was held last week between Assistant Secretary of the Treasury James B. Reynolds and Appraiser of the Port George W. Wannmaker on the subject of classification of merchandise under the new tariff act. Changes in the wording of the schedules and alterations in the administrative provisions made in the Payne-Aldrich law have presented new questions upon which the Appraiser is obliged to make rulings. In order that the action of customs officials throughout the country be uniform in all cases, Mr. Reynolds spent a few days last week in this city and made clear the views of the Treasury Department to the Collector and the Appraiser. He has already issued a number of regulations for the guidance of local officers. One of the most important questions which confronts Appraiser Wannmaker is the proper interpretation of the new marking clause. Section 7 of the tariff act states that all articles of foreign manufacture or production, which are "capable" of being marked "without injury" shall be marked, stamped, branded or labeled in a conspicuous place. It is the duty of the Appraiser to decide whether imported goods are capable of being marked, and also whether the inscrip-

demanded by law may be dispensed with on the plea that the marking constitutes "an injury." The Treasury Department it is understood, will soon issue more detailed regulations bearing on the marking provision.

The Jewelers' Bowling League tournament last week, the Cross & Beguelin team won three straight games from the Solidarity Case Co., and the Hayden W. Miller & Co. team won three from the Wakefield Co. team.

Among the out-of-town visitors who were at the offices of THE JEWELERS' CIRCULAR—WEEKLY during the last week were Mittendorf, of Randolph & Mittendorf, of Randolph and Bluefield, W. Va.; Arrington, Rochester, N. Y.; Simonson, of Theus & Co., Savannah, Ga.

Among the out-of-town visitors in the city district, last week, were A. C. Finn and J. T. A. Finn, of the A. C. Finn Co., Chicago; F. B. Howe, owner of the "Fifth Street Store," Los Angeles; P. T. Whelan, of the Whelan-Aehle-Harrison Jewelry Co., St. Louis, Mo.; J. T. Miller, Chicago; Mr. Samuels, of Samuels Bros., Youngstown, O.; C. D. Lyons, of the C. D. Lyons Co., Mansfield, Mass.

Francis Morris, a retired jeweler, for many years in business in Brooklyn, died, last week, of old age at his residence, 54 Dher St., at 92 years of age. He was born in New York City, Aug. 23, 1818, and had made his home in Brooklyn for many years. He was a lifelong member of the Methodist Episcopal Church, and had been in business for many years. He is survived by two daughters, Mrs. Samuel Moore and Mrs. Charles B. Angevine.

A voluntary petition in bankruptcy was filed, last Wednesday, in the United States District Court, New York, by Herman A. Z., a jewelry-setter, residing at 127 E. 14th St., showing liabilities of \$2,102.77 and no assets. Among the unsecured creditors named in the petition are Laubheim Es., \$100; Cooper Diamond Co., \$500; Joseph Robinson, \$250; Marcus Stifter, \$10; Jacob Berger, \$200; Isidore Wasserman, \$150.

Henry M. Brill, who has a novelty and jewelry stand at Coney Island, petitioned, last week, the Federal Court at Brooklyn to declare him a bankrupt and release him from his debts. The schedules showed that he owed \$7,130 to 41 creditors, and showed no assets except a policy of \$1,000 on his life, and his wardrobe, worth \$100, which his creditors cannot take. Mr. Brill is a dealer in auction jewelry, etc., and is said to have been employed as an auctioneer. He also had the store at Coney Island.

The \$3,000 reward offered by Dreicer & Co., 360 Fifth Ave., for the return of a large quantity of jewels lost on the Erie ferryboat *Passaic*, June 29, has been divided equally between Capt. James Larkin, head of the detective force in Jersey City, and Carlo Campanella, the Italian laborer who found the jewels in the cabin of the boat. The jewels were the property of Richard

Mortimer, of Tuxedo Park. Campanella had considered them valueless, and at the time of their recovery the police of Jersey City claimed the entire reward, but the Italian, who had only been in this country two months, employed counsel and brought suit in the Supreme Court, asserting that he had been the actual finder of the jewels, and therefore was entitled to the reward. Before the case came to trial, however, the matter was settled out of court by the attorneys for both claimants, and each has received half of the reward, or \$2,500. Captain Larkin was reticent yesterday as to how he would use his share of the reward, but Campanella has already bought passage on the first outgoing steamer for Italy, to rejoin his wife and three children in that country.

A voluntary petition in bankruptcy was filed, Monday, in the United States District Court, New York, by Abraham S. Silverman, 56 W. 119th St., individually and as a member of the late firm of Silverman, King & Co., formerly jewelers at 18 E. 14th St. Mr. Silverman places his liabilities at \$6,211, with no assets. Among the unsecured creditors are: Art Metal Co., \$250; Attleboro Mfg. Co., \$100; S. O. Bigney & Co., \$100; D. F. Briggs Co., \$100; J. Busch, \$200; Geo. H. Cahoon & Co., \$100; German Exchange Bank, \$1,534; Leon Hirsch, \$300; Horowitz Bros., \$150; Fred Kaufman & Co., \$100; P. & A. Linton, \$150; William Loeb & Co., \$100; William B. Logan & Co., \$413; Rogers Silver Plate Co., \$200; Adolph Schwob, \$400; Singer Bros., \$150; George J. Smith & Co., \$100; Stafford Ring Co., \$200; United Electric Light and Power Co., \$238; Williams & Patton, \$150; H. C. Bolton, \$1,000 (for rent of store, as partners in business of Silverman, King & Co.). Mr. Silverman went through bankruptcy once before, in Dec., 1899. Harry H. King, his partner in the jewelry business, filed a petition in bankruptcy, June 10.

When Mrs. Charlotte Baldwin Frost, who was arrested, Tuesday morning of last week, on the charge of passing a worthless check as she came out of the Hotel St. Regis, appeared, Friday, for examination in the Yorkville Court two new complaints were made against her. The original complainant was Richard J. Hickson, 436 Fifth Ave., who alleged that she got a \$75 dress from him and paid for it with a bad check. She waived examination on that charge yesterday, and was held in \$2,000 bail. Dieges & Clust, 23 John St., charged that last October Mrs. Frost got a \$520 diamond ring from them by paying \$150 down and promising the rest later on. She later pawned the ring for \$300, it was charged, the pawn ticket being sent to the firm. She had got credit, one of the firm explained, through her relationship to Stephen C. Baldwin, a prominent lawyer of Brooklyn. She is his sister. George W. Sheibler, 7 Maiden Lane, the other new complainant, said that last September she got two Chinese rings, valued at \$54, from him, on which she made a payment in about a month's time. She later gave him a draft for \$60 to cover the balance, and received \$30 in cash as change. The draft was returned marked "worthless," Mr. Sheibler said.

News Gleanings.

M. C. Alford, Huron, S. Dak., has moved his stock of jewelry into his new store room.

A. C. Zimmer is closing out his stock at Norway, Mich., and will move to another location.

Charles Ten Eyck opened a jewelry store at 35 W. Main St., Johnstown, N. Y., Sept. 18. He has been employed by a Kingston jeweler for about two years.

Through the efforts of the Board of Trade at Union, N. Y., a cutlery factory, now located at Eldred, Pa., will be moved there and incorporated as the Union Knife Co., with a capital stock of \$25,000. Charles W. Platt, C. E. Whittemore, F. E. Day, I. D. Brougham and Elmer B. Lacey are to be the directors. It is proposed to employ 35 workmen at first.

Jeremiah J. Wilcox, who died recently in Denver, Colo., was for many years well known as a jeweler in New York State. He was born in Vernon, Aug. 31, 1853, and at the age of 16 started in the jewelry business while residing in Oriskany Falls, N. Y. He followed his trade until two years ago when he was compelled to retire on account of failing health. He is survived by his widow, three sons, a sister and brother.

The firm of Pickering & Jelliff, Mansfield, O., has been dissolved by mutual consent, an announcement to this effect having been made last week through the newspaper. Mr. Pickering retires and the business will now be run under the style of G. W. Jelliff & Son, Chester J. Jelliff being the junior partner. The partnership was formed 31 years ago at Mt. Vernon, O., both partners having learned the trade with Joshua Hyde, whom they afterwards bought out. After conducting the business at Mt. Vernon for eight years, they moved to Mansfield and prospered from that time. Of recent years Mr. Pickering's eyesight began to fail and he decided therefore to retire from business.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Sept. 18, 1909.

The U. S. Assay Office reports:
Gold bars exchanged for gold coin.....\$610,793.07

Special Reduced Price, \$1.50, Postpaid.

The Jewelers' Circular Pub. Co., 11 John St., N. Y.

Pittsburg.

The Chessman Optical Co. has a fine exhibit at the Pittsburg Exposition.

Miss Anna Owens, assistant cashier of the First National Bank, was married here, last week, to Mr. Poole.

Mr. K. Meyer, Chester, W. Va., was in town last week, attending the exposition and buying stock.

E. Cook, East Liverpool, Ohio, was in town last week and reports the prospects of this section to be in a most flourishing condition.

W. V. Rice, one of West, White & Co.'s traveling representatives, has been in town to his home here for the last six weeks, suffering with rheumatism.

Charles S. Moore has gone on a road trip with Sam F. Sipe, which embraces a tour through western Pennsylvania, New York, Ohio, Indiana, West Virginia and Kentucky.

James Brown, of the Marsh, Brown & Co., returned last Friday from a two weeks' tour through Ohio, West Virginia and other States, and reports business improving rapidly in all sections.

Stanhope Goddard, a son of George Goddard, of Goddard, Hill & Co., leaves, this week, for Yale, where he enters upon his second year with the honor of being one of the youngest students in this famous college.

The police on Saturday arrested in a downtown department store a woman, believed to be guilty of numerous robberies, including some jewelry thefts. Her movements are being inquired into by the Pittsburg detective bureau.

The Gillespie Bros. are adding a jobbing department to their establishment in the Park building, and will make their own repairs. Extensive alterations have been made to the interior of the store, and workmen are about completing their labors.

Mr. J. Harvey Wattles, of W. W. Wattles & Sons, and Mrs. Wattles have returned from their summer home at Bay View in the Lake Chautauqua district, where Mr. Wattles, a few weeks ago, bought five acres of land overlooking the lake. He has begun the erection of a cottage, which is now well under way, and expects to spend much of his time there during the future summers.

S. H. De Roy & Co. opened their new store several days ago at 408 Smithfield St. The new establishment compares favorably with any now in Pittsburg. A feature of the store is the handsomely appointed private rooms for the loan business, for this is a loan shop as well as a jewelry house. The building is also equipped with the Holmes electric system. A general line of watches and clocks are carried in stock. A handsome front has been built in the building, the fixtures being of mahogany. The art glass windows give the place a very attractive appearance.

The jewelers of Pittsburg have again organized the Jewelers' Bowling League, and J. C. Crawford continues as president. It was thought best to have the various firms represented, instead of organizing around among the members of the Jewelers' 4-Karat Club. The clubs which will be represented in the league are those from the firms of E. P. Roberts & Son, L. J. Vil-

sack & Co., Henry Terheyden, August Loch, W. W. Wattles & Sons and a club to be composed of members representing the wholesale trade. The first game of the season will be rolled Monday evening, Sept. 27.

The Pittsburg Association of Credit Men is about to establish an information bureau for the exchange of credit information among the members. This has long been desired by the jewelry contingent of the association, for it is in this manner that they hope to get a line on those who are worthy of credit and those who are not. At a meeting of the association held Friday, it was stated that the organization of such a bureau is under way. The subject of monthly meetings was discussed, these to be wholly confined to business matters, especially credits. The Pittsburg merchants are determined to weed out bad debtors. The association has a membership of 650 firms.

C. S. Wiley, secretary of the Pennsylvania Retail Jewelers' Association, who has been in California ever since the meeting of the American National Retail Jewelers' Association, arrived home a few days ago. He visited Los Angeles, San Francisco, Portland and Seattle, at which latter place he took in the Seattle Exposition. Returning, he stopped at a number of cities on the way. Arriving in Pittsburg, he found a large number of letters waiting for him, many of them containing applications for membership in the Pennsylvania association. He says that the association's campaign to increase its membership will be renewed, and he hopes to induce all of the jewelers of the State to join its ranks.

Buffalo, N. Y.

A. H. Denny, of Warren, O., will open a new jewelry store at Saranac Lake, N. Y.

Mr. Raichle, of King, Raichle & King, returned, recently, from a three weeks' vacation.

Max Dreyfus, a traveling representative of Heintz Bros., left recently for an extended southern trip.

Louis Gottlieb, optometrist for T. C. Tanke, recently had an interesting exhibit at the Erie County and Batavia, N. Y., Fall fairs.

Adolph Block, of the Queen City Ring Co., recently celebrated his birthday with a dinner which was attended by a number of intimate friends.

Buffalo jewelers are enrolled in the membership of the Business House Bowling League, which was recently organized for the season of 1909-1910.

I. B. Dreyfus returned recently from a western business trip. Mr. Dreyfus will remain in this city for a brief period and then depart for the same territory to visit the jewelry trade.

At the Republican primaries at Kenmore, a suburb of Buffalo, J. P. Simcox, a member of the Optometrical Society of this city, was chosen as an alternate delegate to a convention at which will be nominated a candidate for the New York State Assembly.

Albert Zilliox, a local jeweler, and other East Side business men recently met at the Cosmopolitan Club to consider a proposition

to extend William St., in this city. Mr. Zilliox was appointed a member of a subcommittee to confer with the common council as to the feasibility of the proposed extension.

In Bath, N. Y., recently, the jury in the trial of the case of the Union Cut Glass Co. against the Corning Cut Glass Co. reported to Justice S. Nelson Sawyer, in Supreme Court, a verdict of \$1,500 for the plaintiff. The litigants are both Corning firms, and the case was for the adjustment of accounts long standing between them.

Silverware, chains and bracelets were recently stolen from the jewelry store of Charles F. Hurd, Medina, N. Y. The loss will amount to nearly \$1,000. The burglars effected an entrance by boring and then chiseled the panel out of a door. In the store the burglars obtained a suit case in which they carried away their booty.

Among the out-of-town jewelers who recently visited the Buffalo market were the following: P. M. Riley, Holland, N. Y.; Mr. and Mrs. Grimm, Oil City, Pa.; A. H. Denny, Warren, O.; George Engel, Springville; C. L. Harris, Brocton; S. S. Prentiss, Lockport; B. M. Frary, Medina; C. F. Hurd, Medina; Mr. Lewis, Arcade, and Mrs. J. C. Denniston, Dansville, N. Y.

The police of this city received word that Joseph Oginsky, who sells jewelry in his second-hand store in Saratoga Springs, N. Y., was assaulted by two burglars recently in his place of business. Oginsky heard a noise in his store and, going down to investigate, was confronted by two men. They attacked the storekeeper and beat him until he fell unconscious. Then they ransacked the store, took a sum of money, a silver watch, two plated watches, a bracelet and a ring. The police are now working on the case.

John C. Betz, a manufacturing jeweler of Buffalo, has been honored by being nominated as a Democratic candidate for the four-year term as city assessor to fill the vacancy caused by the death of Edward G. Volz. At present Mr. Betz holds the office of councilman. He has been in that position for the past four years. His candidacy has been indorsed by the Owls, a fraternal society of this city. He is also a prominent member of the Elks and has been chairman of the house committee of that organization for the past two years. The Elks have also approved his candidacy. He is a member of the Washington Lodge of Masons and is a 32d degree, Scottish Rite Mason. Mr. Betz was born in the old Fifth Ward 49 years ago, and as a boy learned the jewelry trade. About 20 years ago he went into business with Henry G. Schneider, and the firm built up a big business as manufacturing jewelers, under the firm name of Schneider & Betz.

Aaron Bergeda, Nashville, Tenn., recently returned to that city after a European trip, and long interviews of Mr. Bergeda's impressions of Europe and European conditions were published in the Nashville *American* and in two issues of the Nashville *Tennessean*. On his return to Nashville Mr. Bergeda was met by a score of friends with a brass band, who escorted him home.

THERE are established prices at which all jewelers sell Illinois movements. There are established prices at which they buy them. These are the movements of standard value—the prices don't fluctuate and the quality does not vary.

We suggest the advisability of dealers anticipating their requirements, not because we expect to raise prices, but because there is going to be a greater shortage of Illinois movements this Fall than ever before in the history of our company.

ILLINOIS WATCH COMPANY
SPRINGFIELD

Western Office:
503 HEYWORTH BLDG., 42 E. Madison St.,
CHICAGO.

Telephone:
RANDOLPH 1079,
CHICAGO.

Chicago Notes.

Barnett, diamond dealer, is in New York.
Rae & Keeler have discontinued their Chicago office.
Henry Freund, New York, was in this city last week.
G Cook, with the Alvin Mfg. Co., is out on territory.
Ed. Mayer, of Bruhl Bros. & Henius was here, last week.
Mr. and Mrs. I. W. Lederer are in New York for a four weeks' stay.
Frank Whiting, of Whiting & Davis, is on a trip to the Pacific coast.
Dolph Rosenthal, watch specialist of New York, was here last week.
Eugene Armbruster, of the Illinois Watch Co. visited the trade here last week.
A. Starke, of the Star Watch Case Co. paid a visit to Chicago last week.
D White, with the C. O. Sweet & Son Co. has returned from a western trip.
George T. Brodnax, Memphis, Tenn., was here last week here, accompanied by his wife.
W. Berry, manager for the H. M. Stenson Co., Escanaba, Mich., was here, last week.
E. Mitchell, of Fort Worth, Tex., accompanied by Mrs. Mitchell, was here, last week.
Herbert T. Rich, son of Elmer A. Rich, recently married to Miss Marion Grey.
Morris Mendelson has been engaged by Jacob & Rosenson to represent them in Chicago.
Henry Fischer, a diamond dealer of Antwerp, Belgium, visited the trade in Chicago, last week.
Tom Stanek, of Graffe & Stanek, is on a trip to Texas, where he is interested in a plantation.
F. M. Kaden, retail jeweler at Grand Haven, Mich., is here taking a course in engraving.
A. E. Eberhardt has opened a new retail jewelry store on W. Madison St., near Erie Ave.
Harry Jones, with the Wadsworth Watch Case Co., has returned from St. Louis and Kansas City.
Albert M. Dueber, of the Dueber-Hampden Companies, spent three days in this city last week.
Paul Wittstein, jewelry jobber in the

Heyworth building, has returned from a trip to Europe.

L. J. Bolte was here, last week, buying the opening stock for his new jewelry store at Alliance, Nebr.

Mr. Parman, of Brunt & Parman, Decoria, Ia., was here, last week, attending the druggists' convention.

Mort. Oppenheimer, of L. Basch & Co., is on a two weeks' buying trip to New York and the eastern factories.

M. H. Cowen, with Rettig, Hess & Madsen, returned from the Pacific coast last week and left for the southwest on Tuesday.

The Caro Jewelry Co. has leased the south half of the store at 206 State St. for six years, at a total rental of \$48,000 for the term.

F. C. Beckwith, the new sales manager for the Hamilton Watch Co., accompanied by J. C. Perry, visited the trade here, last week.

L. Gustave Brandt, vice-president of the Omega Watch Co., was here, last week, visiting A. Max Holzheimer, western manager of the concern.

Ed Vail, Wichita, Kans., who has been here for the past month, having his eyes treated, left for home last week much improved in health.

P. B. Kehr, C. T. A. Smith and Paul Storm, of the traveling force of Reed & Barton, returned from their respective territories, last week.

"Rich" Mead, son of M. A. Mead, visited the Bitter Root Valley in Montana last week, with the view of purchasing a large tract of fruit farm land.

R. P. Ream, representing the Bristol Jewelry Co., has returned from the middle west and is exhibiting his stock at the Palmer House, this week.

E. H. Kocher, son of R. Kocher, San Jose, Cal., who is taking a course in horology at the Bradley Polytechnic Institute at Peoria, was a visitor here last week.

Neal Vanderwolf, house salesman for the Watson & Newell Co., was operated on, last week, for appendicitis at St. Anne's Hospital and is reported doing well.

Fred H. Smith and Wm. W. Coup, of the Geneva Optical Co., are the principal owners of a rich copper mine recently discovered in Canada, north of the "Soo."

Chas. Feldenheimer, of A. & C. Feldenheimer, Portland, Ore., accompanied by his son Elmer, stopped over in this city, last week, on his way home from New York.

M. E. Kinsley, sales manager for the

Oneida Community, Ltd., visited the Kenwood factory, last week. G. H. Miller, with the same corporation, is in the northwest.

James Peacock, of Peacock, Stone & Markham, and his son, John Peacock, were here, last week, visiting J. W. Stoneburner, western representative of the concern, who has just returned from the west.

Frank H. Challen, formerly with the Quaker City Cut Glass Co., is now with the Charles Parker Co., Meriden, Conn., and will cover the territory from Chicago to Denver. F. I. Camp will cover the territory from Chicago east.

Mrs. Dorothea Hohenadel, sister of Henry Pfordrescher, died last Tuesday, and was buried, Friday, from her late residence, 1813 Millard Ave. Interment was at St. Boniface Cemetery. She is survived by her husband and three daughters.

In addition to being a good watch case salesman, Thomas F. Kennedy, with the Star Watch Case Co., is an expert safe opener. His services are in demand all over the Heyworth building. In changing lock combinations Mr. Kennedy has no equal.

Mrs. Leah Tripp, wife of Julius Tripp, who is in the employ of Morris, Mann & Reilly, and sister of Harry Morris, the head of that firm, was murdered last Wednesday by her sister-in-law, Mrs. Anna Silvers, at her home, 5609 Prairie Ave. The latter died later from self-inflicted wounds. The tragedy is shrouded in mystery.

One by one traveling men coming in from the Pacific coast are telling of the remarkable photograph taken of Cheever Hudson by Fred. Roth, of M. Schussler & Co., San Francisco, Cal. Mr. Roth conceived the idea of taking the photograph of every traveling man who came to the coast, and as Cheever Hudson is the dean of the coast traveling men he was honored by having his photograph taken first of all. His picture now occupies the highest niche in Mr. Roth's hall of fame.

Among the buyers in town, last week, were: C. C. Bacon, St. Charles, Ill.; J. C. Ranbow, Geneva, Ill.; H. Werder, Charles City, Ia.; George Yeomans, Waukegan, Ill.; R. H. Bach, Owatonna, Minn.; S. N. Jenkins, Richmond, Ind.; A. C. H. Baker, Appleton, Wis.; E. D. Beardsley, Harvard, Ill.; E. L. Thayer, Rockford, Ill.; I. L. Grady, Jackson, Tenn.; Ben Gittelson, Gittelsohn Jewelry Co., Minneapolis, Minn.; Miss Nellie Stockbridge, Barnard Studio, Wallace, Idaho; R. G. Rutherford, Mount

Ill.; D. F. Morrow, Eureka, Ill.; Mel'n, Galva, Ill.; M. D. Wise, Rock-
Ill.; A. D. Miller, Braidwood, Ill.;
Don, Northwood, Ia.; W. J. Han-
Rock Rapids, Ia.; Hal. B. Smith, Lor-
rt, Ind.; Mr. Hall, of Hall & Sayles,
e, Wis.; M. E. Buerk, Paris, Mo.;
Hanson, Hanson Jewelry Co.,
on, Ill.; L. J. Crawford, Burlington,
John H. Gorman, Medford, Wis.;
A. Trunk, Wenona, Ill.; C. E. Prouty,
rd, Ill.; Karl C. Koons, Beatrice,
O. C. Cobb, Iowa Falls, Ia.; F. C.
Berton, Ark.; F. E. Holsten, Alli-
Nebr.; W. K. Grady, Stillwater, Okla.,
C. Simons, Gauss & Simons, Shen-
a, Ia.

Minneapolis and St. Paul.

Crandall, formerly watchmaker for
m M. Stone, Minneapolis, has taken
tion with the R. G. Winter Jewelry

E. Barker, president of the Minnesota
Jewelers' Association, has been electe-
ce president of the Minnesota Com-
a Federation.

M. Thomsen, of the Birkenhauer-
sen Co., Minneapolis, has returned
Wheaton, Minn., with a large bag of
s, of which he secured 95 in all.

e Gittelson Jewelry Co., which is now
d at 5 S. 5th St., Minneapolis, has
d quarters in the new Dyckman Hotel
ing, and will be found at 25 S. 6th St.,
ck further west, after Nov. 1.

s. Louise G. Porteous, Minneapolis,
brought suit against the Adams Ex-
s Co., to recover \$1,435, the value of a
age of jewelry which is alleged to have
lost while in the custody of the com-
p. The company's defense is that as no
ve was given upon the package, the limit
amage is \$50.

ls Jensen, an expert watchmaker for
trade, has brought suit against the M.
Flipsborn Co., Cathcart & Maxfield and
t St. Paul Wrecking & Lumber Co. for
finite damages, to be determined by the
rt, owing to alleged injuries sustained
his business in alterations which have
tn started by the defendants to the build-
i in which he is located. He alleges that
t work done has raised dust and dirt
made it impossible for him to proceed
h the repairing of watches. He asks
injunction to restrain further work.

ut-of-town jewelers in the Twin Cities
week were: I. M. Radabaugh, Hast-
s, Minn.; J. J. Birkebak, Lester Prairie,
n.; C. A. Sherdahl, Montevideo, Minn.;
el Peterson, Crookston, Minn.; H. O.
obson, Colfax, Wis.; E. P. Johnson,
stboro, Wis.; H. O. Thomas and wife,
mpton, Ia.; C. W. Slocum, Cando,
Dak.; K. A. Vick, Decorah, Ia.; C. O.
rstad & Co., Elkton, S. Dak.; J. A. La
aft, Plainview, Minn.; J. W. Hurd, Man-
Ia.; Mrs. C. W. Bobb, Niagara, N. Dak.;
C. Basset, Woonsocket, S. Dak.; C. M.
arle, Salem, S. Dak.; O. Larsen, Bowdle,
Dak.

J. T. Morgan, Iola, Kans., recently sold
t to John Slykhouse, who will move his
welry stock to the new location.

Cleveland.

William J. Davis is back from a pleasant
trip to Atlantic City.

W. B. Wingate is going to Michigan this
week on a fishing trip.

L. C. Blossom is spending his vacation
at Mentor-on-the-Lake.

Elmer Thurston has just returned from
a vacation spent in Detroit.

Mr. Warner, with F. H. De Witt, Port
Clinton, is on a visit to Cleveland.

J. F. Spengler is now with the Westing-
house Electric Co., at East Pittsburg.

W. N. Larkworthy, Chardon, O., has
gone to Columbus, Miss., to engage in
business.

Bert C. Baker spent several days in
Toronto, the fore part of the month, with
relatives.

The wife of Oscar Smoots recently un-
derwent a very successful operation for ap-
pendicitis.

L. G. Bates, Akron, is in Cleveland tak-
ing a course at the Newmeyer School of
Engraving.

Capt. R. E. Burdick returned from
Europe recently, after a very successful
business trip.

P. A. Mequillet, formerly manager of the
Art Novelty Shop, is now with the Bur-
rows Bros. Co.

Announcements are out of the wedding
of H. D. Williams to Miss Clara Morrison,
of this city, Sept. 20.

Clyde L. Bishop, formerly with John
Rich, Painesville, is considering a propo-
sition to locate in Parsons, Kans.

A. B. Sprosty, located at E. 55th St. and
Broadway, was nominated for the council
by the Republican voters in his ward at
the recent primaries.

The Sigler Bros. Co. has increased its
floor space by cutting out a room formerly
used by the salesmen. The new space will
give considerable room for showcases.

J. H. Welf has just returned from a
four weeks' pleasure trip spent in the coun-
try. Mr. Welf's health was poor, but the
long vacation has done much to bring back
his customary vigor.

Charlie Ramp, manager of the wholesale
department of the Scribner & Lochr Co.,
believes in Cleveland as a Summer resort,
and just to make his belief good he spent
his vacation at home.

L. F. Boyer accompanied McKinley
Chapter of Cleveland to Detroit last week
on the occasion of that Chapter bearing
the Traveling Triangle on its trip around
the world to the King Cyrus Chapter of
Detroit.

Robert Probeck, superintendent of the
Sigler Bros. Co. factory, is resting in De-
troit. Sanford Stiles has returned to
Sigler Bros. Co., after an absence of several
months, and has resumed his position as
manager of the cut-glass department.

George Ramson, president of the Wiscon-
sin State Optical Association, was in town
last week visiting old friends. Mr. Ram-
son, who was connected with the Webb C.
Ball Watch Co. a number of years ago, and
is well remembered by the older jewelers,
is now in business in Milwaukee.

Conrad Brenner, Youngstown, was in
Cleveland Thursday, and he reported con-

ditions in that city as very favorable for a
good Fall business. Mr. Brenner and his
son Norman, who has been studying at
the Newmeyer School of Engraving, went
from here to Michigan resorts for a short
vacation.

The Bowler & Burdick Co. furnished the
magnificent sterling silver cup presented
by the Adjutant General of Ohio, as the
trophy to the winner of the Adjutant Gen-
erals' match at the National Rifle Associa-
tion matches at Camp Perry, last week. The
cup was conceded to be the handsomest
trophy put up for competition during the
big shoot.

F. B. Guyon will continue as manager
of the newly organized Guyon Jewelry Co.
Mr. Guyon has been located in the Colonial
Arcade for the past five years, and incor-
poration was to acquire capital to enlarge
the business. Some alterations will be made
in the store and new fixtures installed. The
house will also branch out into the instal-
ment business.

The Wardwell Co., which owns the Art
Novelty Shop, is again in trouble, and a
receiver has been appointed to close up the
affairs of the company. The court appoint-
ed Ralph Edwards receiver. The schedule
filed in Probate Court showed liabilities of
about \$16,000 and assets of \$12,000. The
Art Novelty Shop opened the first part of
August in the Hippodrome Building, on
Euclid Ave., and carried a general line of
jewelry and art goods.

The Webb C. Ball Watch Co. has one
of the most unique window displays seen
here for some time. The window is lined
with a fleecy white substance, and in the
center is a pole covered with the same
material, bearing the legend, "The North
Pole," exhibited in this part of the globe
for the first time. An old straw hat is
labeled, "Dr. Cook, United States of
America." A pair of Teddy Bears are
marked, "Two of Faithful." The display is
attracting considerable attention, and is a
credit to the window dresser.

The following out-of-town jewelers have
been in town recently to buy: C. D. Young,
Delaware, O.; F. D. Cramton, Burton;
E. D. Kindig, Elyria; Ben Peifer, Akron;
George F. High, Medina; Benjamin Mos-
ley, Willoughby; H. H. Brainard, Medina;
J. A. Slonecker, Scio; John Burri, Wells-
ville; John Wight, Wellington; A. E.
Oyster, Alliance; W. C. Fisher, Lorain;
Nelt Barr, Ashland; G. W. Bowers,
Marion; C. E. Lonsway, South Lorain; A.
R. Kimpton, Oberlin; C. E. Whittaker,
Clyde; D. Loenheiser, Huron; W. B. Mc-
Collow, Greenwich; T. H. Park, Mantua;
W. P. Carruthers, Oberlin; O. G. Carter,
New London; Walter H. Deuble, Canton;
F. H. De Witt, Port Clinton.

Harry J. Eisroth, accused of larceny by
bailee, was taken into custody at Erie, Pa.,
a short time ago, to await the arrival of au-
thorities, who have brought him back to
Uniontown, where he will be tried. The
prisoner, it is alleged, some time ago con-
ducted a jewelry business at Point Marion.
When he sold out and left that place re-
cently, it is claimed, he took several watches
which had been left with him to be re-
paired.

St. Louis.

Samuel Kober, of the Maritz-Kober Jewelry Mfg. Co., has returned from a business trip through Iowa.

G. Eckhard returned from the Oasis, on King's Lake, where he and his family had an outing of 10 days.

G. W. Cameron, who has a jewelry store at Poplar Bluff, Mo., has purchased the business of J. H. Perkins.

The Eisenstadt Mfg. Co. has brought suit in Justice Kleiber's court against E. A. Niehaus on notes and an account for \$315.03.

Benjamin Rice, Tulsa, Okla., stopped off in St. Louis, during the week, on his way east. He will stop here again on his return trip.

E. F. Maritz, president of the Maritz-Kober Jewelry Mfg. Co., has gone on a river trip to Cape Girardeau, Mo., accompanied by his wife.

H. C. Grawe will return, early in October, from Troy, Ill., where he and Mrs. Grawe have been spending the Summer. There is no material change in the condition of Mr. Grawe, who is an invalid.

Out-of-town buyers in St. Louis, during the past week, were: Mr. Nelson, Dunbar & Nelson, North Yakima, Wash.; Jacob Hersch, Waterloo, Ill.; J. F. Fields, Chaffee, Mo., and Otto Rink, Carlyle, Ill.

The jewelry store of Ross Larrabee, Macon, Mo., was robbed, on Tuesday night. A brick wrapped in a piece of red flannel was hurled through the plate glass show window and a tray of watches was snatched and carried away.

A. L. Bauman, president of the L. Bauman Jewelry Co., left, Saturday night, for a week's trip to the east, on business. J. H. Crompton has returned from a two weeks' vacation, the greater part of which he spent at Webster Groves.

Fred Brass, Illinois and Arkansas salesman of the L. Bauman Jewelry Co., is laid up temporarily with a strained ankle. Clarence Heyman is looking after his territory until such time as he is able to start out again. C. L. Stange, of this company, has returned from a trip through Missouri, Kansas and Oklahoma.

Moses Strauss, of the L. Bauman Jewelry Co., was chairman of the reception committee for the annual meeting of the National Masonic Relief Association for the United States and Canada, held Thursday, Friday and Saturday, of last week, at the Southern Hotel. In recognition of his efficient services a loving cup was presented to him by the Syracuse, N. Y., commandery.

When a young man called at the F. W. L. Drosten Jewelry Co., at 7th and Locust Sts., one day last week, and left a piece of a gold bracelet, set with three 1½ carat diamonds to be unset and appraised, suspicions were aroused. The young man was told to come back the next day. When he returned, accompanied by another young man, detectives were waiting for them. One of the men said that the jewels belonged to his sister, and that he had come to St. Louis to dispose of them for her. The detectives thought best to investigate their story, and they were taken to Police Headquarters and locked up. After Boston had been called up on the long distance telephone and the men's story verified, they

were released. No blame attaches to the Drosten Co. for the arrest of the young men, as the firm only observed an ordinary precaution in calling in the detectives, and the detention of the men was on the detectives' own motion.

Application was made, Saturday, to the secretary of state for letters of incorporation for the Gutfreund-Kemper Jewelry Supply Co., which is to be the successor of the Reeves-Kemper Jewelry Supply Co. The change results from Joseph E. Gutfreund and Mr. Kemper having bought out the interest of R. F. Reeves, who will retire from the business. The firm was established three years ago by Mr. Reeves. Mr. Kemper went with him two years ago. Mr. Gutfreund has been with the company also. The incorporators of the new company are Joseph E. Gutfreund, M. Gutfreund and Mr. Kemper. The capital stock is \$20,000, fully paid. The new organization will make an aggressive forward movement. At first it was intended only to change the name, and affidavit to that effect was filed in the office of the recorder of deeds, but later it was thought best to incorporate the new concern, and the affidavit was withdrawn and the application for incorporation made instead.

Omaha.

TRADE CONDITIONS.

The consensus of opinion of the Omaha jewelers is that, although trade has been somewhat slack during the past two months, it has exceeded the business done in the same period for several years past. The outlook for the Fall trade seems to be very good. The Eagles' national convention this month, the Aksarben Fall festivities early next month, and the National Corn Exposition in December will all bring immense crowds into the city. Everyone is busy in Omaha. The factories are running full force, the shops are carrying a full payroll now, and wholesale and jobbing houses are working overtime.

Fred Nelson is no longer in the employ of Albert Edholm.

Phil Folsom, Ashland, Nebr., was in this city last week replenishing his stock.

Carl Hanson, watchmaker, Cottage Grove, Ia., has accepted a position with Albert Edholm.

A. Holmberg, watchmaker with S. W. Lindsay, has been ill, the past week, having been confined to his bed with fever.

J. T. Shea, a jeweler who is opening a store at Creston, Ia., was in this city, recently, purchasing his opening stock.

T. L. Combs & Co. furnished several prizes which are to be given to officers of the Fraternal Order of Eagles, the annual national convention of which is being held in this city, this week.

A. Mandelberg furnished a chest of silver, which was presented to the past grand worthy president of the Eagles, and also a handsome diamond stickpin, which was presented to the secretary.

L. A. Holliday, watchmaker with McWhinney & Ryan Co., has started on a month's vacation with the hope of regaining his health. Mr. Holliday will spend most of the time at his home, which is in Indiana.

Max J. Egge, Grand Island, Nebr., and C. C. McLeese, Davenport, Nebr., were both in the city, last week, attending the Eagles' convention. Mr. Egge and Mr. McLeese, together with J. C. Hutson, Omaha, com-

prise the Nebraska State Board of Optometry.

Kansas City.

F. Linneman, of the Hassig Jewelry Co., is away on a week's vacation.

The Greene Jewelry Co. has a dealer, Pooler, watchmaker, to its working.

The Hassig Jewelry Co. has been in its force nights. A rush of work has caused the cause.

The Franklin Jewelry Co. will move to 17 W. 9th St. as soon as the new location can be fitted up and furnished in its style.

F. J. Nevin, of Nevin Bros., left, Saturday evening, for a vacation trip to McAlester Springs. He was accompanied by his mother.

C. Brown, formerly with the Jaeger Jewelry Co., has entered the employ of the Porter & Wiser Jewelry Co. as a manufacturing jeweler.

Edward Vail, Wichita, Kans., stopped here for a day or two, last week, on his return from Chicago, where he went to have his eyes treated.

Ed N. Dunning, who has been in business on Minnesota Ave. for a number of years, is auctioning off his jewelry preparatory to moving to Texas.

The Porter & Wiser Jewelry Co. is enlarging and remodeling its polishing room so as to increase the light and make more convenient for a growing business.

Geo. L. Wood, a student at the Kansas City, Horological and Optical School, returned to that institution, recently, for his wedding trip. Mr. Wood has selected a location in Oklahoma and will embark in business for himself, Nov. 1.

The following out-of-town jewelers were in this city during the week: J. O. Voorhies, Osawatomie, Kans.; A. Holmes, Bonner Springs, Kans.; J. D. Morrison, Olathe, Kans.; H. O. Woodbury, Olathe, Kans.; C. E. Banta, Pitsburg, Kans.; I. E. Pettitt, Downs, Kans.; J. King, Superior, Nebr.; O. Armel, of Mel Bros., Holton, Kans.; G. W. Hayward, of Hardway & Williams, Fort Smith, Ark.; Ralph Campbell, Pryor Creek, Okla.; O. A. Karnes, Overbrook, Kans.; J. Carroll, Randall, Kans.; C. E. Rose, Trinidad, Colo.; R. R. Smithers, Cameron, Mo.; Mr. Grady, of the Grady Jewelry & Optical Co., Stillwater, Okla.; I. Birks, Atchison, Kans.

About Oct. 1, John Eklund, Norwegian, will move into his new location South Nelson St.

James Samuel Throp, who died in Greensburg, Ind., last month, after an illness of more than a year, was a jeweler of the town for many years, and was well known in the trade and highly regarded in the community. He was born in Kingstonsville, Aug. 14, 1836, and in his younger days was in the grain business. Later he engaged in the music and jewelry line with J. I. Gallup as partner, and then for a long number of years owned and operated a jewelry store which he later sold to John W. Owens. He is survived by his widow, Mary E. Isgrigg (Throp), whom he married Oct. 21, 1883.

Cincinnati.

S. Newman, of Frohman & Co., leaves next week to make his last Fall trip to the

A. Gebhardt, of Gebhardt Bros., has on a business trip through the northern

er Voige, with Adolph Muchlmatt, is bringing the arrival of a new daughter in

ur Metch, Covington, Ky., has re- business after an extended and able tour in Europe.

Abbott, Birmingham, Ala., stopped recently on his way to New York, he will buy his Fall stock.

Schwab, of A. G. Schwab & Sons, is business again, having returned from a months' interesting trip abroad.

Wace L. Miller, of the Miller Jewelry with his bride, is making a business in Ohio, Pennsylvania and New York. stav Lindner, of Lindner & Co., is from a two weeks' stay at the Great Friends of C. C. Stoner, of this will be glad to hear that he has fully ered from a two years' illness.

members of the E. & J. Swigart Co., planned their removal to 6th St. to place the fore part of this week have disappointed in their plans owing to act that their quarters have not been for occupancy. However, they expect to move very soon.

Max J. Greenwald Co., of which J. Greenwald is president and treasurer will remain a corporation. Mr. Greenwald bought out the interest of his brother, who retired a short time ago to go to business for himself. D. Rosenbaum, member of the company, succeeds the retiring member as a director of the company. The marriage of Hugo Lindenberg, of Lindenberg & Fox, and Miss Blanche Bin-

of this city, was celebrated the past week. Both Mr. Lindenberg and his bride well and favorably known here. After honeymoon at Washington, D. C., Old Point Comfort, Niagara Falls and Toronto, he will be at home in Hyde Park to their many friends.

beautiful wedding of the present season was that of Miss Ina Walton, daughter of Harry C. Walton, local manager for the Keystone Watch Case Co., and Frank Pine, of this city, which took place at the home of the bride's parents on Chapel St., Walnut Hills. Mr. and Mrs. Payne are now enjoying an eastern trip and upon their return will reside in Walnut Hills.

is now expected that a decision will be rendered some time the coming week in regard to the Herman Keck Mfg. Co. case. United States District Judge Thompson, who has been in Europe all Summer, is expected to arrive home to-day and upon his return will receive reports from Bankruptcy Eree Greve as to the testimony taken and arguments submitted concerning the case.

The John Holland Gold Pen Co. has recently added the following to the road crew: Oscar S. Schmidt, formerly of Aikin, Lambert & Co., and known on the road for the past 10 years, will travel in the district south of the Ohio and Potomac rivers; George E. Spencer will drum Michigan, In-

diana, Illinois and Iowa territory; E. Baumgarten will have charge of Ohio, Pennsylvania and West Virginia; Charles O. Emgelke, Kansas, Nebraska and Missouri, and William T. Gallt will look after the trade in New York and the New England States. James C. Haslam, with this house for 27 years, has just returned from his 17th annual trip, which covered cities both in the east and the west.

Out-of-town jewelers who were here, the past week, buying goods included: A. B. Coover, Chillicothe, O.; H. A. Kilgore, Lebanon, O.; R. S. Weaver, Miamisburg, O.; George Steitler, Owensboro, Ky.; E. F. Randolph, Williamson, W. Va.; H. E. Tuller, and Rudolph Heid, Columbus, O.; A. M. Stamm, Williamsburg, O.; Owen Sherwood, Falmouth, Ky.; E. Kahn, with O. E. M. Waters, Danville, Ky.; W. F. Roth, Gallatin, Tenn.; Frank Emmerling, Hillsboro, O.; W. L. Fredeking, Hinton, W. Va.; H. C. Reed, Blanchester, O.; Mr. Marlett and G. H. Ashton, Middletown, O.; A. Bland, Greenfield, O.; Ed. J. Foyes, Bloomington, Ind.; W. H. Tewel, Madison, Ind.; G. G. Helms, College Corner, O.; A. P. Humphreys, Bellefontaine, O.; H. C. Reed, Blanchester, O., and C. E. Ewing, Hartsville, Tenn.

Milwaukee.

TRADE CONDITIONS.

The Wisconsin State fair which was held in Milwaukee, last week, brought a big increase in business for local jewelers. As in former years, the fair brought thousands of strangers from about the State and the natural result was that a fine transient trade was received by merchants in general. Jewelers report that their average business is showing steady and healthy improvement and that there is every indication that the Fall and Winter trade will be far in excess of last year. Wisconsin crops were never better in the history of the State than they are this year, a factor which has done much to restore confidence, put money in circulation and increase trade.

John Lange's store, at Racine, Wis., is now under the management of Victor Therkelson, for the past year engaged in the jewelry business at Racine. Mr. Therkelson was formerly connected with the Lange establishment.

Among the out-of-town jewelers in Milwaukee, last week, were: O. K. Glimme, Madison; E. B. Hobkirk, Brandon; F. P. Beswick, Racine; J. B. Kimball, Waukesha, and the senior member of the firm of Brill & Steir, Beloit.

Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association and of the Jewelers' Mutual Fire Insurance Co., of Wisconsin, has returned to Chicago from an extensive business trip made in the interests of the fire insurance company.

R. J. C. Bott, 409 Broadway, Milwaukee, who recently made an assignment in favor of his creditors, is said to have left the city for some point in the west. Louis Kuesel, of the Kuesel Bros. Co., one of the trustees, is closing out the stock of Mr. Bott and creditors are hoping to realize 50 cents on the dollar.

News has reached Milwaukee of the death of William Brand, at Davenport, Ia. Mr. Brand was born in Milwaukee, 33 years ago. He was the son of Capt. Sebastian Brand, superintendent of construction of the Milwaukee Fire Department. Mr. Brand was

apprenticed in the jewelry business in Milwaukee and 10 years ago settled in Davenport, where he was married to Miss Anna Wiese. He was foreman in a large jewelry establishment until a few months ago, when he went south in the hope of recovering his health.

A. J. Stoessel has announced his resignation as chairman of the Legislative Committee of the Wisconsin Association of Optometrists. Mr. Stoessel believes that he cannot sacrifice the vast amount of time that will be required of the chairman of the committee from now on in the campaign of publicity and later before the Legislature, and he feels that a man should be chosen who can give unlimited time and energy to the position. It is probable that the successor to Mr. Stoessel will not be elected until the next regular meeting of the directors of the association.

Although he has been a resident of Beloit, Wis., for 57 years, and has voted ever since he was of age, William Hamlin, a jeweler of that city, has just discovered that he is not a citizen of the United States and that he will have to take out first and second papers before he can vote at another election. The trouble all originated over the failure of Mr. Hamlin's father, George Hamlin, to take out his second papers. Under the new Federal law aliens, even in cases where they take up their residence in the United States before reaching the age of 21 years, are denied the rights of citizenship in cases where their fathers failed to take out first and second papers. William Hamlin, the jeweler, came to this country at the age of five years.

Toledo.

J. J. Vernier entertained out-of-town visitors last week.

Joseph Teipel celebrated his 50th anniversary last week.

The People's Outfitting Co. has added a jewelry department.

Roy Wagner, 147 Main St., East Toledo, contemplates changing the present location of his business.

Henry Fiscus has given his store at 3265 Monroe St. a thorough overhauling, renovating the exterior and interior.

William Veler, who for many years had a jewelry store at the corner of Starr Ave. and E. Broadway, but who sold out his business about a year ago, contemplates starting another store in the city.

Charles P. Eells, for years watchmaker for J. Prochaska, but who was forced to take to outdoor work on account of his health and who this season had charge of the concessions at the Toledo baseball park, has under consideration several new business ventures.

Frank C. Field, who occupies a room in the building of the Toledo Humane Society, will shortly have fine new quarters. By the terms of a will recently probated, that society is bequeathed \$100,000 for the erection of a building for its use. By reason of his long lease, Mr. Frame will probably occupy a room in the new building.

J. H. Smythe, Fort Smith, Ark., has returned from an extended trip to California and the Pacific coast.

Los Angeles.

TRADE CONDITIONS.

Jewelers generally, wholesalers, traveling men and retailers alike, report an improvement in business conditions and a very satisfactory and hopeful outlook. Traveling men who have recently returned from trips up and down the coast report good sales and a hopeful feeling generally among customers. The local retailers are encouraged at the prospect for the coming Fall trade. The re-opening of the schools has had the effect of bringing a large number of residents home from the beaches and other resorts, and business conditions generally are resuming their normal routine. Crops have been exceptionally good this year, and the ranchmen and fruit growers are enjoying the results. Their prosperity means the prosperity of this country generally.

The business office of the E. W. Reynolds Co. is being remodeled and enlarged.

Walter Rohwedder, of the E. W. Reynolds Co., has returned from a trip to Mexico.

John Bloom, with Montgomery Bros., has returned from a vacation spent at San Francisco.

Adolph Clabes, head watchmaker with the Whitley Jewelry Co., has gone to San Diego for a vacation.

J. F. Peters, formerly in the jewelry business at Long Beach, is in Los Angeles, looking for a new location.

A. E. Baranger, traveling representative for H. F. Wallace, is making a trip through the towns of southern California.

H. B. Lewis, of the E. W. Reynolds Co.'s sales force, after having been ill for nearly a week, is again at work in the store.

Ford Hathaway, head of the mail department of the Carl Entenmann Jewelry Co., has returned from a trip to the Seattle exposition. He was gone a month.

C. H. Blake, of Brock & Feagans' diamond department, has just returned from a month's trip through the northern part of the coast, including a visit to the Seattle exposition.

Ed. Villamonte, with J. Wiesenberger, returned from a visit to the Seattle exposition, a few days ago. Charles Extrom, also with Mr. Wiesenberger, is now taking a short vacation.

J. W. Wiesenberger, 453 S. Broadway, has been exhibiting in his window a gold medal sold by him for presentation to John Mason, the actor now playing at the Auditorium Theater.

R. H. Schwarzkopf, manufacturers' agent, 312 S. Broadway, is home again, after an absence of 65 days on the road, having visited nearly all the towns of importance as far as the Canadian line.

Sydney Weisbaum, of Weisbaum & Sons, Hanford, Cal., who was married in San Francisco, recently, to Miss Blanche Elkels, was in this city a few days ago with his bride. He has now returned to Hanford.

H. A. Russell, traveling representative for the Pacific Gem Co., arrived in New York, a few days ago, from Europe, where he has been spending six weeks visiting his old home in Germany. He has again begun work for the company.

T. S. Geirrine, representative of R. Wallace & Sons Mfg. Co., with headquarters in this city, has gone to San Diego and other southern California towns on a business trip. On his return he will start for a trip to San Francisco.

Edward B. Nicoll, vice-president and treasurer of the Carl Entenmann Jewelry Co., has returned from his automobile trip with his wife to San Francisco, Oakland and other points.

Out-of-town retail jewelers who have been in this city recently include: E. B. Smith, Santa Ana; J. E. Russell, Chino; B. S. Stephenson, Redlands; F. B. King, Redlands; C. C. Lord, Long Beach; L. N. Parks, Downey; F. Bartley, Santa Paula.

Dr. D. M. Small, head of Montgomery Bros. optical department, has been laid up for about a week as a result of being poisoned by poison oak, with which he came into contact while clearing off a lot, which he recently bought in Laurel Canyon.

Joseph Rittigstein, who for some time past has been doing business in an office in the O. T. M. Johnson Building, was married in San Francisco, Sept. 12. Extensive alterations are now being made in the store at 540 S. Broadway, where Mr. Rittigstein expects to open business again, Oct. 1.

Joseph Lawton, of the Whitley Jewelry Co., has returned to his place in the store, after a vacation of two weeks, spent with his wife at Laguna Beach, a resort down the Pacific coast, about 60 miles from Los Angeles. C. T. Dunsmoor, of the same company, has returned from a vacation spent at Catalina Island.

Georgé Jordan, who for the last six years has been at the head of the watch department of Luckenbach & Co., died last week. Funeral services were conducted by the Elks, of which he was a charter member in the Redlands Lodge. He was 68 years of age, and leaves a widow, two daughters and a son. He was highly respected by every one who knew him. For 25 years he was the leading jeweler in San Bernardino and Redlands. He met with reverses, and finally gave up his business there and came to this city.

C. C. Abel, of the firm of Bastheim, Adams & Abel Co., returned a few days ago from a business trip through Arizona and southern California. Three days later, he started for another tour, going this time up the coast by way of the San Joaquin Valley. He was met at Fresno by Mr. Bastheim, and from there they started northward together, intending to go as far as Portland, Ore., and return by the coast route from San Francisco. Mr. Abel reported a successful trip in Arizona and thought the outlook for business very good.

Pacific Coast Notes.

Carl G. Strock, until recently of Boulder, Colo., has opened a store at Santa Ana, Cal.

H. Beckman, formerly of Merced, Cal., has opened a retail store at Mariposa, Cal. He will make a specialty of repairing.

J. A. G. Smith, Portersville, Cal., is preparing for the holiday season by thoroughly renovating his store. He has placed in position three new show cases and made other improvements.

Andrew D. Hansell, Stockton, Cal., had a narrow escape from death, recently, by taking poison by mistake. He rushed to a nearby drug store and was relieved just in time, as he had taken cyanide of potassium.

Frank Hilderbran, Phoenix, Ariz., returned home from a vacation spent northwest. He was the manager of McLean, the Indian runner, who won a five-mile championship during the amateur meet held at Seattle, Wash.

Indianapolis.

Will Reed was in Brown County with his parents, last week.

Carl Walk and family have returned from a vacation of several weeks spent in Ada.

The family of Ikko Matsumoto has returned from Lake Manitou, where they had a cottage for the Summer season.

After a two-weeks' visit at Chicago, Elgin J. W. Culbertson, watchmaker, H. Cohen & Sons, has returned home.

Charles Mayer, of Charles Mayer & Co., returned from Walloon Lake, last Sunday, his wife and son, Kiefer, having preceded him several days.

Dyer Bros., makers of arts and crafts jewelry, have entered the trade engraving field and have issued an attractive card, showing designs in seven colors.

Mr. and Mrs. Ferdinand L. Mayer, spent the Summer at the Country Club. They have taken apartments in the Claypool Hotel for a few weeks until their home is remodeled.

Mr. Nehf, of the Swope-Nehf Jewelry Co., Terre Haute; J. W. Hudson, Indianapolis, and F. Pennington, Knightstown, were among the retail jewelers in the city last week.

Charles W. Bernloehr, formerly of Chicago, Chris. Bernloehr & Bro., has again taken a position with the company, succeeding Harry H. Slaughter, who has opened a store at Union City.

A store claiming to sell manufactured jewelry samples, including watches, has been opened at 123 S. Illinois St., having been moved from 39 W. Washington St., at one time the location of the Guarantee Jewelry Co.

Local retail jewelers have entered their schedule for closing. During the Summer months they closed at 5 P.M. daily, while some of them closed at noon, on Saturdays. They are now closing at 6 P.M. with no Saturday half holiday.

It is reported that first-class watchmakers are scarce in Indianapolis, and as a result the trade shops are doing the best business in several years. Two or three jewelers have been unable to obtain satisfactory watchmakers and are sending to other cities for them.

In a communication to the Milwaukee association, last week, R. G. McClure, secretary of the Indianapolis Commercial Club, stated that the interurban lines running out of this city had caused an increase of 40 per cent. in the business of retail merchants and of 15 per cent. in the business of wholesale dealers.

Ikko Matsumoto has completed a belt buckle in what he calls a November landscape design. It is of copper. The lower part of the buckle represents a bit of land and water, the former being covered with snow. Flying over the water are two wild geese. At the right is a coral moon. The sky is of blue enamel.

San Francisco.

TRADE CONDITIONS.

Jewelers in San Francisco are busy preparing for the Portola week, which commences Oct. 19. This is so close to the commencement of the busy season many of them will have on display for the holiday good and will thus commence the season earlier than usual. Last season the jewelry week was not put in until late owing to certain conditions that prevailed, but there has been no hesitancy in ordering goods this year and local dealers have already placed large orders.

H. Bower, with the E. L. Spencer Co., visited this city, last week.

V. Saunders, A. I. Hall & Son, is in Los Angeles, Cal., at the present time.

John Hillinger, of R. J. Hillinger & Co., Chicago, was a recent visitor in this city.

Miss Hannie visited this city with the Mrs. Sussfeld, Lorsch & Co., last week. Meland Myers, of R. & L. Myers, has just completed a trip to the southern part of the state.

Mr. Moore, with Dixon & Co., New York, called upon the wholesale trade here recently.

James McElroy, of M. Schussler & Co., has been enjoying his vacation in the Santa Cruz mountains.

The bankrupt stock of Paul P. Garin will be offered for sale at public auction, tomorrow, Sept. 23.

J. Hartzberg, with Henry Abrams, has returned from a southern trip and is now covering his northern territory.

R. W. Cummings, Ventura, Cal., was here, last week, visiting his brother and looking over the holiday lines of the local trade.

Richard Fulford, formerly with Radke & Co., but who has been in Los Angeles since a fire, was married in that city, recently, to Miss Smallwood.

Among the out-of-town jewelers here lately were: H. H. Wiendieck, Red Bluff; J. d. Praet, Woodland; B. Hartfield, Anaheim; Otto A. Paulsen, Richmond; George W. Du Commun, Watsonville, and C. J. Klein, Santa Cruz.

Morris M. Frederick, a retired jeweler of this city and Virginia City, Cal., and now a resident of Seattle, Wash., last week celebrated with his wife the golden anniversary of their wedding. An elaborate banquet was served and about 100 guests were present.

It is noticed that the local demand for jewelry at the present time runs largely to stones, and that domestic stones are in special demand. Some of the local jewelers are making a specialty of these stones and have exhibits of them, both in the rough and in a finished state.

Radke & Co. are having work rushed on their new store on Post St., near Grant Ave., and are holding a special sale on Van Ness Ave. prior to the removal. The removal will be effected some time during the course of the present month. Practically the only firm that will be left on Van Ness Ave. will be the Baldwin Jewelry Co., whose large store at Kearny St. and Union Sq. Ave. is still unfinished.

During the festival week, Oct. 19, many of the local jewelry stores will be gaily decorated, and the attention of the entire trade is being centered upon aiding in mak-

ing this formal welcome to the new San Francisco an unqualified success. Both retailers and wholesalers are contributing heavily to the funds needed, and expect to more than realize on their investment. During the past two weeks there have been several events that have brought out-of-town people to San Francisco for a few days' stay. The crowds that will be here during Portola week will surpass any in size that have visited the city since the fire, and, coming so close to the Winter season, it is expected that a great deal of trading will be done before the festival is over.

Pacific Northwest.

A. S. Venen, Forest Grove, Ore., has disposed of his business there to E. S. Booth, Portland, who takes possession at once.

Ben Cohn & Bro., Leadville, Colo., have secured a location at 416 Riverside Ave., Spokane, Wash., and expect to move their jewelry business to that city. They will open their store Oct. 5. The Leadville business will be entirely closed out, Jan. 1, 1910.

Marx & Bloch, Portland, Ore., have just opened a new store at that place at 83 Morrison St., between 4th and 5th Sts. This firm has been in business in Portland for more than 20 years, and has been operating a store for a long time at 74 3d St., but business has increased to such an extent that it was felt advisable to open a store in the up-town section. Both stores will be maintained.

Canada Notes.

Percy F. Woolhouse, Saskatoon, Sask., has been burned out.

W. G. Minaker, Wellington, Ont., has assigned to L. K. Shourds.

Cornelius & Co. Halifax, N. S., have given a chattel mortgage to J. Cornelius, for \$8,200.

Frank H. Pearson, Dundas, Ont., has given a chattel mortgage to W. E. S. Knowles for \$264.

I. L. Michaelson & Sons, Stellarton, have obtained judgment against A. B. Ryan, of the same place, for \$55.

L. Herbert Luke, of Ambrose Kent & Sons, Toronto, Ont., leaves on a trip to New York, Sept. 23, to witness the Hudson-Fulton celebration. He will stop at the Victoria Hotel.

On Wednesday, George W. Wallace, secretary of P. W. Ellis & Co., Ltd., Toronto, Ont., was married to Miss Lucy C. Wright, daughter of W. J. Wright, at the residence of the bride's parents, 219 Simcoe St. Mr. and Mrs. Wallace will spend their honeymoon at New York, Boston and Montreal.

J. R. Miller is making extensive improvements in his retail jewelry store in Jackson, Ga.

W. J. Pilkington, Des Moines, Ia., well known in the jewelry trade, has assumed the arduous task of taking full charge of the business of the whole town of Dexter, Ia., every enterprise there, according to a recent dispatch, being under his direction and operated according to his suggestions and ideas.

Baltimore.

Joseph Castellburg is enjoying himself at Atlantic City.

H. C. Garthe, manufacturing jeweler, has gone on a trip to Europe.

Hughes & Woodall will remodel their store on N. Charles St. and enlarge it.

George Walter, of Lexington Ave., is expected home from Europe in about a week.

William A. Stewart, optician, of 725 W. Lexington St., has returned from a short pleasure trip.

J. J. Brown has been out of the city buying stock. He will give up the fountain pen branch of his business.

Robert Rausch has moved into his new store at 325 W. Lexington St. His old location was at 310 N. Howard St.

Gercheider Bros., N. Gay St., have bought out Frank Persohn and are making many improvements in the business.

Scott & Hooper, retail jewelers, have moved from 832 Greenmount Ave. to Greenmount Ave. and Madison St.

Isaac M. Foreman, of Schumacher & Foreman, opticians, W. Lexington St., has been on a ten days' trip to Atlantic City.

William A. Rutter, retail jeweler of 93 N. Gilmore St., has given up the business and gone to Philadelphia to take charge of a wholesale drug house.

Mr. Schroeder, of Morris Schroeder & Co., 5 S. Liberty St., has returned from a trip on the road. This firm has changed its name to R. Schroeder & Co.

Harry E. Jacobs, who has charge of Isaac Benesch & Sons' jewelry department, has opened a retail jewelry store in the Merchants' and Manufacturers' building.

Elias Jacobsen, jobber, at 918 E. Baltimore St., is just starting on the road, through the south. He says there is a scarcity of good jewelry workers in the factories here.

There was a great number of traveling representatives in town, last week. Arthur C. Macy, 205 N. Charles St., an ex-traveling man, says he counted as many as 40 in one day, in his place.

The C. C. Crooks Co. has on exhibition in the show windows an interesting collection of gold and silver ores, amounting in value to several hundred dollars. The ore ranges in value from \$100 to \$2,000 a ton, one specimen producing 3,000 ounces of silver to the ton of quartz. The collection was made by R. Holmes Wilbur, who has recently returned from a trip through the mining regions of the south and southwest.

Jenkins & Jenkins, 216 N. Charles St., have entered into the effort to secure for Baltimore and Washington the international aviation contest in 1910, by offering a silver trophy worth \$500 as a prize. Talbot W. Jenkins, secretary and treasurer of the firm, says the trophy will be offered as an evidence of the interest of the firm in the contest. The trophy will be a hand-chased and carved work of art pertaining to some feature of aerial navigation, and will be distinctively characteristic of their workmanship, as it will be designed and made exclusively by their experts. The Baltimore *Sun* has offered a \$500 prize, as also have Hutzler Bros. Others are expected to follow.

Atlantic City, N. J.

John T. Haddal, 2209 Boardwalk, has put in a new line of novelties.

J. E. Caldwell, of J. E. Caldwell & Co., Philadelphia, Pa., was summering here.

Rufus Rankin has opened a store for jewelry novelties at 107 S. Kentucky Ave.

Raphael, the pearl carver and sculptor, is doing some fine work at 534 Boardwalk.

John C. Levy is the successor of Shourds & Co., 1537 Boardwalk, handling jewelry, etc.

James J. O'Keefe has opened a large display of novelties and fine china at 2435 Boardwalk.

E. Crane, a salesman for the S. & B. Lederer Co., has opened a jewelry store at 1619 Boardwalk.

Jennie E. Lyall, having a jewelry store at 1003 Boardwalk, has bought a house at Northfield, N. J.

F. H. Brennan, druggist at Boardwalk and New York Ave., has put in a line of gold fountain pens.

M. Eshner, Philadelphia, Pa., has opened a jewelry, watchmaking and optical store at 126 S. Kentucky Ave.

Joseph Ball, Price and Wakefield Sts., Germantown, Philadelphia, Pa., have a new store at 2217 Boardwalk.

Eph. Knapp, with J. A. & S. W. Granbery, Newark, N. J., has been spending his vacation at Oradell, N. J.

C. B. Kuehule & Co., late of the Traymore, has started a new jewelry store on the Boardwalk at Brighton Ave.

Henry Schnabacher, of the American Cutlery Co., Chicago, has been spending considerable time at the Hotel Rudolf.

The Wigwam (Arthur W. Smith, proprietor) has moved from the Marlborough-Blenheim Arcade to the Boardwalk.

M. Alkazin has been 16 years at 925 Boardwalk, and was one of the first to handle antique and Oriental jewelry.

Henry Burman, 51 Wood St., Norfolk, Va., has opened the Cut Rate Optical Co. on S. South Carolina Ave., in charge of Peter Morgan.

The Seaside Aluminum & Novelty Co., W. Echelberger, manager, 557 Boardwalk, started a new store on the Boardwalk at Delaware Ave.

L. R. Douglass, manufacturer of gold wire jewelry at 547 Boardwalk, will probably have to move owing to relocation of the Boardwalk.

The White Art Co., making gold and silver monograms, raised gold and flat gold a specialty, rich chinaware, etc., has a new store at 2433 Boardwalk.

C. E. Stacy, who has been the manager for a year of the Indian Trading Co., 905 Boardwalk, reports a good business this year in all lines of jewelry.

The Rosalind Co., 130 S. 11th St., Philadelphia, Pa., has opened a booth at the Summer Exposition, selling gold waist, belt and collar pins, in charge of Mrs. M. Prescott.

The Chagru Jewel Co. opened a new jewelry store at 913 Boardwalk, put in \$3,000 worth of fixtures, has two stores in Baltimore and is getting ready to open another there.

David Green, a jewelry peddler, was recently fined \$25 for selling without a license. Abraham Bloom, New York, was

also arrested for peddling jewelry without a license.

J. H. Taylor, a manufacturing jeweler of Philadelphia, Pa., opened a new store on the Boardwalk at Arkansas Ave. and another place in the Summer Exposition at Kentucky Ave.

The Cuthbert Trading Co., 1223 Boardwalk, does not handle much jewelry, but carries many clocks, silver goods, novelties, etc. It expects to start three or four new stores next year.

John Lang has a new jewelry store at 632 Boardwalk and another new one, the Jewel Box, in charge of William Mason. He says he will open six more stores here on the Boardwalk.

G. Baroni, who has a jewelry store on Virginia Ave., has opened an exhibit for coral, shell and precious stones at the Summer Exposition. Joseph A. Ball has an exhibit of jewelry at the same exposition.

Foster & Reynolds, of Havana, Washington and Palm Beach, have opened a new jewelry store at 1223 Boardwalk in charge of Miss G. Greutz. O. A. Suerdfefer was here from Palm Beach opening this store.

Potter & Stainforth, 39 Kingston St., Boston, Mass., noted antique collectors, have opened a store at the Marlborough-Blenheim Arcade, handling hand-beaten silver, Sheffield plate, etc., in charge of Charles H. Stevens.

Gilbert F. Cosnette, late of Bridgeton, N. J., has opened a store for the sale of art and crafts jewelry, china, hammered copper, brass and silver at 2701 Boardwalk. A factory will be opened and a dozen hands put at work.

Dave Trompeter, late employe of J. E. Coatsworth, optician, on the Boardwalk, has been admitted as a partner in the business. J. E. Coatsworth is selling out his jewelry part of the business, and will do a strictly optical trade.

The Ajajka Jewel Co., 1629 Boardwalk, has one of the finest show windows here, showing baroque pearl, lapis lazuli set in silver in festoons, coral, jet, etc. The company will open a new store on F St., Washington, D. C.

Henri Zuber, who has been 28 years at 539 Boardwalk, says the best class of goods sell in the Winter, and in the Summer he works off his surplus stock. He designs and makes jewelry, cuts out some fine designs in pearl and handles no imitation jewelry or stones.

Yoshimi & Co., of the Boardwalk, have closed their store at 617 Market St., Chattanooga, Tenn., and one at Birmingham, Ala., and have opened two store at A-bury Park at Second and Ocean Aves. and Third and Ocean Aves. Mrs. Sybil Yoshimi is the manager there.

Fenton & Co., 105 S. Kentucky Ave., have had an exhibit at the Food Show at Virginia Ave. Malle Little, Philadelphia, Pa., who makes gold and silver novelties and pins, also had an exhibit at the Food Show, and has another new exhibit at the Summer Exposition at Kentucky Ave. and the Boardwalk.

Errico Bros., 1022 Boardwalk, handling fancy goods, works of art, etc., have taken up a new line of semi-precious stones, a new line of Salvini ware for ornaments, which is imported faience, and a new line of

rings and stones. Their New York store was given up, but probably another will be established. Louis and Frank are the managers. A new store has opened at 2851 Boardwalk.

Lancaster, Pa.

TRADE CONDITIONS.

Business has assumed a distinctly better while no boom is apparent trade has been if steadily improving, and the jewelers are looking forward to a fair Winter business. The failure of Lancaster County's tobacco crop somewhat dampened the hopes of local merchants but actual conditions are better.

Benjamin Lichtenstein paid a visit to Lancaster, last week.

George R. Weber, of Louis Weber & Son, paid a business visit to New York last week.

H. N. Smith, of the Roseville Jewel Co., was in Lancaster, last week, on his initial trip.

S. Kurtz Zook celebrated the 10th anniversary of his start in business by the sale of goods at special prices.

E. Sturgis Coulter, watchmaker for William Fluhrer, York, Pa., visited Lancaster last week, as did Hugh Baer, with Polack.

T. R. Helms, Hamlet, N. C., a bride, who were recently married in Lancaster, stopped over here, last week, on their return home from their wedding trip.

Amos T. Barton, who has been in Arizona and Colorado for the past three months, has returned home much benefited by the trip. He will return to Denver, Col., next month, however, to stay until Spring.

Guy K. Herr, with C. J. Kinzer, fields, W. Va., who returned to Lancaster after being sick at his old home with typhoid fever, writes to friends here that Mr. Kinzer, who had lately nearly recovered from an attack of the same disease had suffered a relapse.

Laverne Hanes, who recently disposed of his jewelry business at Clayville, N. C., in order to take a course in watchmaking at the local technical school, arrived here last week, with his wife, and has entered the school. He will resume business when he is through with the course.

William Yates, Cold Spring, N. Y., returned to Lancaster, last week, and placed himself in the Ezra F. Bowman Technical School as a student in engraving and watchmaking. Claude H. Ridenour, Norfolk, Va., having finished a course of engraving at the school, has taken a position at Altoona, Pa., with Clayton G. Breneman.

Much attention has been attracted to the show window of Louis Weber & Son by the exhibition of a beautiful replica of the Robert Fulton statue erected by Pennsylvania in the Statuary Hall of the Capitol at Washington. The reproduction was made by the sculptor for Congressman W. G. Grist, of this district.

J. L. Brooks, Mason City, Ill., has moved from his old location to the Oneida building.

The stock and fixtures of the Star Jewelry Co., Milledgeville, Ga., have been sold to J. C. Grant, Eatonton, in the same store.

PORTRAIT MINIATURES copied from a photo on watches, dials, brooches and lockets. Goldstein Engraving Co., 45 Maiden Lane, New York.

America's Leading Jewelry Auctioneer

James L. Hand

14 Maiden Lane, New York

The largest and most successful sales ever conducted in the United States and Canada were conducted by Hand. Many auctioneers advertise that they are "wonders." Printers' ink is purchasable and the man with little ability might call himself the greatest ever. Write them all if you wish to but write "Hand" for his booklet on auctions. It will save you money and reputation. Why jeopardize your business by employing a "has been." Employ "Hand," the recognized Leader.

Read what three of the leading papers of the U. S. say.

The *Detroit Free Press* says: "It requires no special talent to sell average merchandise at auction, but in selling a stock as fine as that carted by Sturgeon & Co. a man of more than ordinary ability is needed. The magnificent collection of precious stones, the products of the famous silversmiths, the objects of art, etc., that comprise the largest stock of its kind in this section of the country, were described and sold by Mr. Hand in a manner both interesting and instructive. Never before has such a representative audience been collected at an auction sale in Detroit."

The *Association Jeweler* says: "Mr. Hand has avoided at all instances identifying himself with fake sales or poor business alliances, as in the present case he has allowed his name to be coupled with only high class retail concerns."

The *Omaha World-Herald* says. "The auction sale of the fine stock of the Mawhinney & Ryan Co. was ably conducted. Its success was due to the personality of Mr. Hand, the auctioneer, who is a man of education and refinement."

I commence a sale this week for E. H. Leffert, Council Bluffs, Iowa. This is the largest and finest jewelry stock in Southwestern Iowa. Write me in his care or to my New York office.

If you value your reputation "Hand" is the man.

JAMES L. HAND.

AN UNPARALLELED SALE

Des Moines, Ia., Sept. 15, 1909.

THE GOTTLIEB AUCTIONEERING CO.

conducted an auction sale for us, stock inventoried about \$60,000. We find that these gentlemen have made an extraordinarily large profit for us on the sale. It was really remarkable and surprising.

They certainly deserve great credit as they used every effort in their power to make the sale a grand success.

They have fulfilled their agreement with us to the letter.

LEWIS & VAN SICKLE.

Men of Great Ability

JEWELERS: If you desire a successful Auction Sale, employ the best talent. Be very careful whom you select. Investigate. Look up our record for conducting the largest and most profitable sales throughout the United States and Canada. Let us prove how you can make considerable money by employing us. We guarantee good profits. Very valuable information given in correspondence, also many references and daily paper notices.

The Gottlieb Auctioneering Company

10th Floor, Boyce Building, Chicago, Ill.

UNITED STATES PATENTS.

PUBLISHED SEPT. 17, 1909.

933,043. TOOL FOR CUTTING FINGER-RINGS. WILLIAM ADELMAN, Hoboken, N. J. Filed April 8, 1909. Serial No. 488,677.

In a device of the character described, a frame and a circular saw journaled therein, combined

with a clamp movably secured to the frame and comprising a lower jaw having a forwardly extending guard and an upper jaw having a forwardly extending fork.

933,136. CHAFING-DISH. SIGMUND STERNAU and LIONEL STRASSBURGER, New York, assignors to S. Sternau & Co., New York. Filed Feb. 25, 1905. Serial No. 247,383.

In a chafing-dish, the combination with a hot water dish, of an enameled food pan having an

attached handle thereon and extending outside of the hot water dish, and a separable annular cover, the said cover engaging with the edge of the food pan and forming a close joint therewith with the handle projecting below the cover.

933,248. FOUNTAIN-PEN. THOMAS C. GRANT, New Glasgow, Nova Scotia, Can. Filed Feb. 27, 1909. Serial No. 480,342.

In combination, a fountain penholder, a casing slidably mounted thereon having a closing cap at

one end for protecting the pen-point, a spring normally acting to move said casing to its initial protecting position, and means for locking said casing when slid on the handle to expose the pen-point.

933,251. SNAPHOOK. GEORGE M. HUBBARD, New Haven, Conn., assignor to the W. & E.

T. Fitch Co., New Haven, Conn. Filed Jan. 11, 1909. Serial No. 471,733.

A snap hook of loop type comprising a body com-

structed at one end with a nose, and frame-like at the opposite end, the sides of the frame connected by a top and a central bar, a spring tongue engaging with the nose of the hook and extending beneath the top bar and outside the central bar and onto the body.

933,324. PROCESS OF METAL-COATING SMALL METAL ARTICLES. EDWARD S. MOWRY, Middletown, Conn., assignor to Wilcox, Crittenden & Co., Middletown, Conn. Filed Feb. 2, 1907. Serial No. 355,413.

A process for coating with metal small metal articles, consisting of placing a mass of said arti-

cles, combined with the requisite quantity of coating material and flux, in a receptacle, and applying heat thereto upon the inside of said receptacle.

933,381. SELF-ADJUSTING PENDULUM-ESCAPEMENT. WILLIAM B. MILLER, Louisville, O. Filed April 27, 1909. Serial No. 492,574.

A self-adjusting pendulum escapement comprising a clock provided with an escapement wheel and a plate, a boss mounted on said plate and having a peripheral surface adapted to form a bearing, an adjusting plate provided with an aperture adapted to permit the pivotal arrangement of said adjusting plate on the bearing surface of said boss, said boss provided with an annular groove in its peripheral surface at a point beyond the front surface of said adjusting plate, a friction spring having spaced portions including said boss between them and entered into said groove, rear and front arms pivot-

ally connected to the adjusting plate, the rear arm lying closely adjacent said plate and provided with an extending pin, a lever provided with downwardly extending bearing flanges having apertures adapted to be pivotally mounted on said pin, the front arm at its free end off-set and provided with a finger, said arm adapted for pivotal adjustment, and said finger adapted to engage the said pin, and the off-set portion adapted to engage one of said bearing flanges, a pendulum rod connected to the lower end of said adjusting plate and depending therefrom, a verge rod connecting the said lever with said pendulum rod, a pendulum connected to said pendulum rod and said lever engaging said escapement wheel.

933,402. EAR-CORN HOLDER. CHARLES P.

TOWNSEND, Light Street, Pa. Filed Dec. 16, 1908. Serial No. 467,841.

A device of the class described comprising a holder formed of a single wire bent to form a

handle terminating in a straight shank and a prong of less length with respect to the shank, said wire further bent to form a coiled portion producing a stop between the handle and the ends of the shank and prong.

933,411. LINK MESH. WILLIAM J. BAILEY, E. Orange, N. J. Filed Jan. 16, 1909. Serial No. 472,602.

A link mesh or stock comprising interlocking link-members, each link member having oppo-

sites loops and a straight bearing portion connected with said loops and adapted to receive and hold the ends of adjoining link members.

933,414. PEG-WOOD SHARPENER. GEORGE BOWERS, Somerville, Mass., assignor to the same assignments, to Hammel, Riglander Co., New York. Filed Jan. 22, 1909. Serial No. 473,729.

A peg-wood sharpener comprising a holder in which a peg-wood stick is rotatable and longitudinally movable, a rotary cutter having one or more shaving knives which move in a circular path, related to the holder as to form a longitudinal concave pointed portion on a stick which is axis-

rotated and moved endwise relatively to the cutter and a rest having a curved face opposed to the perimeter of the cutter, said rest and cutter cooperatively forming convex sides of a tapering throat the apex of which coincides with the axis of the stick, the rest holding the said tapered portion against the cutter and preventing the deflection of said portion from the axis of the stick.

933,556. SOLAR TIMEPIECE. HANS HANSEN, Oakland, Cal. Filed March 27, 1900. Serial No. 486,168.

A solar timepiece comprising concentric rings, the outer ring having a circumferential slot a

the inner ring being slidably mounted within the outer ring and having an opening coincident with the slot thereof, to admit a beam of light, the inner ring having on its inner surface a notation indicating the hours of the day, the space on which the notation is, intercepting said beam of light, said inner ring consisting of a circular band having its ends bent radially inward to form a finger hole and said opening in the inside ring being proximate to said projection.

933,606. REPEATING WATCH. THOMAS CONNOLLY and JOSEPH B. CONNOLLY, Wa-

ington, D. C. Filed June 11, 1909. Serial No. 501,673.
In a repeating watch the combination with the striking mechanism of a retarding device compris-

g means for subjecting a confined body of fluid pressure.

DESIGN.

0,250. MEDAL. EMIL FUCHS, New York, assignor to Francis Lynde Stetson, New York.

Filed June 29, 1909. Serial No. 505,110. Term of patent 14 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for." Marks which are stated to have been "Used 10 years" are registrable under the last proviso of section 5 of said act, which is as follows: "And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act."]

TRADE-MARK PUBLISHED SEPT. 1, 1909. Ser. No. 43,087. (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) BLISS BROS. Co., Attleboro, Mass. Filed June 18, 1909.

Particular description of goods.—Lockets.

TRADE-MARKS REGISTERED, SEPT. 1, 1909

5,111. CLOCKS. AMERICAN CUCKOO CLOCK CO.,

75,144. WATCHES, WATCH CASES AND WATCH MOVEMENTS. PHILADELPHIA WATCH CASE CO., Riverside, N. J. Filed Feb. 13, 1909. Serial No. 40,511. Published July 6, 1909.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM *The Illustrated Official Journal.*)

ISSUE OF SEPT. 1, 1909.

9,818. PENS. D. CAMERON, Edinburgh. May 6. In a fountain-pen nib, means are provided for securing flexibility of the nib and continuity of flow of the ink. A short bottom feed-bar *d* and a flexible top feed-bar *e*, preferably similar to that described in Specification No. 8313, A.D. 1907, are fitted, and at the rear of the ordinary slit *a*¹ and pierce-hole *b* in the nib *a* are formed one or more independent apertures *c*, through which the ink is fed to the top bar *e* and thence to the nib point.

To secure the top bar *e* to the nib *a*, tongues *e*¹ at the rear may engage the edges of or slots or side recesses in the nib, and in addition a tongue *e*² on the top bar *e* may pass through the pierce-hole *b* or a cross-slit at the head of the slit *a*¹ when the hole *b* is absent, or through a special separate piercing, and may then be clenched underneath. The region *a*³ between the holes *b*, *c* may be recessed to assist the flow of ink. According to the provisional specification, only one tongue *e*¹ and corresponding slit are employed.

Applications filed Aug. 9 to 14, 1909.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Sept. 15.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Auckland: 110 cases clocks, \$167.
- Bahia: 1 case optical goods, \$325.
- Bangkok: 1 case watches, \$129.
- Bombay: 103 cases clocks, \$1,407.
- Bremen: 1 case watches, \$927.
- Colon: 1 case plated ware, \$140; 11 cases clocks, \$535; 1 case silverware, \$166.
- Genoa: 1 case silverware, \$175; 2 cases jewelry, \$325; 14 cases clocks, \$655.
- Glasgow: 2 cases plated ware, \$400; 53 cases clocks, \$953.
- Hamburg: 40 cases jewelers' sweepings, \$1,200; 1 case plated ware, \$160; 4 cases watches, \$4,590; 3 cases optical goods, \$710.
- Havana: 1 case jewelry, \$172; 41 cases clocks, \$5,782.
- Havre: 4 cases jewelry, \$380; 2 cases optical goods, \$368.
- Liverpool: 1 case jewelry, \$500; 167 cases silverware, \$3,039; 18 cases clocks, \$1,170; 11 cases watches, \$639; 1 case thermometers, \$125; 5 cases watches, \$1,800.
- London: 1 case plated ware, \$250; 139 cases clocks, \$4,246; 18 cases watches, \$550; 14 cases watches, \$1,937; 1 case gold plate, \$275; 11 cases optical goods, \$4,503; 53 cases clocks, \$1,700; 7 cases plated ware, \$383; 3 cases watches, \$619.
- Manila: 25 cases silverware, \$4,400; 18 cases plated ware, \$2,002; 11 cases jewelers' findings, \$384.
- Melbourne: 44 cases plated ware, \$2,830; 24 cases clocks, \$501; 121 cases watches, \$2,603; 35 cases plated ware, \$975; 1 case watches, \$112.
- Naples: 3 cases jewelry, \$400.
- Piraeus: 38 cases clocks, \$338.
- Rangoon: 9 cases clocks, \$190.
- Sheffield: 5 cases jewelers' sweepings, \$5,000.
- Vera Cruz: 2 cases scopes and views, \$151; 1 case jewelry, \$100.

The store of Albert Pfeifer & Bro., 406 Main St., Little Rock, Ark., was broken into recently, supposedly by boys, who succeeded in stealing only about \$10 worth of stock.

The Greenleaf & Crosby Co., Jacksonville, Fla., sent the first contribution, amounting to \$100, for the new silver service to be presented to the battleship *Florida* to the local Board of Trade, recently. It is proposed to raise \$10,000 for the service. The Governor has already appointed a committee to purchase and present the service to the ship.

Get the Railroad Trade

CONTROL the railroad trade in your district and you are assured of a good business. The duties of railroad men require them to have a correct and durable watch.

It is also true that other trade follows railroad trade, because the patronage of railroad men at once stamps your stock as *reliable*. The Railroad

Elgin

is designed especially to meet the requirements of the railroad man. The silver finish metal dial is most popular because the faintest ray of light illuminates it. This is the *only* metal dial made with *inlaid* figures of *hard enamel*. Some prefer the white enamel dial.

The Railroad Elgin is the thinnest 18 size watch made. It is timed and cased at the factory, and will run longer on one winding than any other railroad watch.

Another sales factor is *Elgin prestige*; for the Elgin is the most popularly known watch in the country, and this particular Elgin is everywhere recognized as a standard railroad timepiece. Advertising in railroad magazines is familiarizing it among railroad men who are anxious to see it and who are asking for the Elgin with the "49 silver dial" or the "49 enamel dial."

You can't control the railroad trade with a poor watch; but you *can* with the Railroad Elgin. Write to your jobber or to the company direct for prices.

These are the four grades and established retail prices as advertised:

	GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILLED

THE HOROLOGICAL REVIEW

Observatory for Chronometer Testing in Besançon, Where Watches Are "Baked" and "Frozen."

OUR readers are probably more or less familiar with the Swiss observatories Geneva and Neuchâtel and the English one at Kew, where the interesting operation of testing timepieces is carried on in the testing department. Another observatory where watches are placed under observation is located at Besançon, the French watch manufacturing center, and a few words regarding the same may be in order.

This observatory, situated four kilometers from Besançon, 310 meters above the sea level, on a small grass-covered hill, from which a beautiful view can be obtained, is

SETTING THE WATCH IN THE REFRIGERATOR.

designed not only for astronomical and meteorological, but also for chronometrical observations. It was, however, founded a quarter of a century ago to assist the watch manufacturers in the neighborhood, who were hard pressed on account of foreign competition. The 10 buildings forming the observatory were commenced in 1883 and completed two years later. It contains, among other large instruments, a meridian telescope (transit instrument), a bent equatorial instrument, and a universal instrument.

The investigations of the late J. L. Gruey, the founder of the observatory, and of his distinguished successor, M. Auguste Leueuf, were devoted, according to *La Nature*, principally to the measurement of time.

The first thing to be done was to furnish the manufacturers of Besançon with exact time, in order that they might be enabled to regulate their timepieces with precision. With this object, the observatory gradually obtained numerous excellent pendulum

clocks of the best French makers, such as Feron, Leroy, etc., which, with the great meridian telescope or transit instrument and the chronograph, now render valuable service. At first time was signalled automatically by the observer once in the day by means of electricity, but only to the

DETERMINING THE CORRECT TIME BY MEANS OF THE CHRONOGRAPH.

town hall of Besançon; to-day a pendulum clock automatically transmits the correct time every hour from 11 in the morning till five in the evening to the residences of 19 manufacturers or adjusters and to four public buildings.

The chronometrical department was at first located in an office near the meridional room, but its growth soon made it necessary

to move into larger quarters, and it now occupies an extensive space where the best pendulum clocks of the observatory are collected, especially the chief pendulum clock for sidereal time, the pendulum clock for the measurement of mean time for the comparing of chronometers and the pendu-

lum clock for the automatic transmission of time. All these instruments are very immovably placed and protected against sudden changes of temperature. In the same room are the heat boxes, or ovens, for temperatures of from 15° to 30° C., in which the chronometers are tested. Various objects preserved in glass cases constitute a little historical museum of the mod-

Waltham Watches

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing in America. More than half a century ago this Company introduced a new principle in the construction of watch movements, and has ever since applied the most advanced methods, producing always the best watches in the world. THE WALTHAM WATCH COMPANY has built within its own walls the marvelous machinery employed in making the 16,000,000 WALTHAM watch movements now in use.

Waltham Watch Company

Waltham, Massachusetts

timepiece. In the asphalted basement of the pavilion for time measurement is a room arranged with double isolated lateral walls that hold an ice box or refrigerator and an electric heater, which is set in motion by the re-signalling pendulum clock, thus ensuring the comparing of chronometers to be done in the room itself. The air-heating apparatus, which keeps the ovens at the

-0° , 15° and 30° C.—during a period of 44 days. This is done in eight periods.

In the second class of tests the chronom-

examination extends only over 19 days; it is made in two positions and at the same three temperatures.

COMPARING THE CHRONOMETERS.

desired temperature, is likewise placed in the cellars.

The refrigerator, made from the plans of M. P. Chofardet, is inclosed in a double cover of wood, filled inside with ashes and ice dust.

The regulations of the observatory pro-

ROCKFORD WATCH CO.
ROCKFORD, ILLINOIS

Rockford

requirements. The most important of these is that the daily difference of rate shall not exceed 0.75 seconds; for second and third class certificates the difference must not amount to more than 1.25 and 1.50 seconds, respectively.

Every certificate, the result of 44 days of observation, obviously involves a considerable pecuniary outlay, *i.e.*, for maintaining the various temperatures. There are the factories which have their watches tested pay a fee of 10, five or three francs, according to the class of the certificate. If a chronometer does not satisfy the required conditions, it is returned without a certificate to its owner, who then pays a portion of the above-mentioned fees.

The annual competition is confined to

tion for the reputation of the watchmaking industry of Besançon. The makers, for their part, have proved themselves fully competent for their work. In a comparatively short time they have trained adjusters, undertaken difficult, and for them entirely new, investigations, and after a few years of preparation have boldly submitted themselves to the chronometer tests.

In 1885, 16 chronometers were sent to the observatory at Besançon, only eight of which obtained rate certificates; from June, 1907, to May, 1908, they submitted 1,050 to that institution, 785 of which were classified.

During the fiscal year closing April 30, 1909, 1,104 pieces were submitted, an average of about four a day. They embraced three suspension chronometers, 293 pocket

clock amounts to 4,000 thalers, or 12,000 marks.

The Berlin town hall clock is a curiosity as regards its construction. The large dimensions in which it was constructed were rendered necessary by the four great dials, each about five meters in diameter, the hands of which have to defy the action of wind and weather, and must suffer no disturbance in their even revolution; further, by the heavy hammers which were required for striking the hours and quarters on the bells.

The dials we have mentioned consist of a cast-iron skeleton, between the spokes of which a number of glass disks of various sizes and whitewashed on the rear side have been inserted. Each figure is fastened by screws to a circular disk measuring 60 cen-

REFRIGERATOR—HORIZONTAL SECTION.

BERLIN'S GREAT TOWER CLOCK.

pocket chronometers which have passed through the tests for first-class certificates with complete success. The full number of credits or marks (300) represents an ideal and impossible chronometer. The one which just satisfies the four necessary conditions receives a zero credit, and in proportion as its performance approaches that of the ideal chronometer the number of credits rises. The winner of 150-175 marks receives a bronze; of 175-200, a silver, and of over 200 credits, a gold medal. In addition to these prizes, the "Chronometer Cup," founded in 1906, is given to the best chronometer, provided that not less than 225 marks are obtained.

The observatory had to fight hard for its existence at first, but by his scientific activity and his untiring perseverance the director, M. Lebeuf, has succeeded in overcoming the administrative and technical difficulties which confronted him and has contributed enormously to lay a solid founda-

tion for the reputation of the watchmaking industry of Besançon. The makers, for their part, have proved themselves fully competent for their work. In a comparatively short time they have trained adjusters, undertaken difficult, and for them entirely new, investigations, and after a few years of preparation have boldly submitted themselves to the chronometer tests.

The Clock in the Town Hall of Berlin.

THE clock in the town hall of Berlin is a masterpiece by the turret clock-maker, Johann Mannhardt, who died in 1878. In 1865 Mannhardt received the commission to construct the clock. According to the contract, the clock was to be delivered for the price of 2,700 thalers, but in consequence of unforeseen difficulties of construction and erection Mannhardt put in an additional claim of 1,300 thalers, which was allowed, so that the entire cost of the

timeters in diameter. Since October, 1891, six electric incandescent lamps, which can be connected with or cut out of a circuit from the ground floor, have been placed behind each dial. A few of the dimensions of the striking work are added.

In the quarter-striking work the hammer weighs about 30 kilograms, the cast-iron bell is 110 centimeters in diameter; the height of the bell is 100 centimeters. The weight weighs 275 kilograms. The cast-iron bell for the full hours is 115 centimeters in height.

The weight of the hammer in the hour-striking work is 46 kilograms, that of the weights 300 kilograms. Each of the four motion works is mounted on a cast-iron pillar fixed near the dial. The arbors have to bear a considerable weight at their outer extremities, *viz.*, that of the minute hands, which, being 2½ meters long, are pretty heavy, though made only of hollow pressed iron plate.

IN justice to yourself and to the welfare of your business, *don't buy your Fall stock of watches* without keeping in mind that in the 7-jewel field the new remodeled Ingersoll-Trenton is the only *one* sold exactly as Jewelers want *all* watches marketed.

- (1) The "I-T" is, without exception, the best 7-jewel watch ever built. An examination will prove this.
- (2) It is sold only through responsible jewelers and only direct to the retail trade.
- (3) The prices are absolutely restricted, guaranteeing a fair profit.
- (4) It is the most extensively advertised of any watch ever put on the market. Every "ad." reads: "Sold by responsible jewelers only."

No jeweler should overlook the article in his line which is most prominently before the public.

The coupon in the corner will bring full information of great interest to every jeweler who can get these goods.

35 cents a bottle — \$3.75 per dozen. For
sale by all jobbers. You are having trouble with
oil you are using — why not order a bottle of Ful-
crum Oil to-day and try it?

FULCRUM OIL COMPANY, Franklin, Pa., U.S.A.

The “Monastery”

We constructed the “Monastery” works with a
view of competing with a weight movement against
inferior spring works. Our success has been great.
The weight “Monastery” construction, chain wind,
is of such excellent quality in every respect and
offered at such a reasonable figure that it is out
of question to-day to offer any hall clock above
\$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight
movement. And we will state that any chiming
Hall clock made up with a cheap spring movement
can never be satisfactory. The hammer blow is too
weak to get the tone out of good bells; only thin,
light bells can be used with the little blow of the
hammer; every day the spring gets weaker and the
chiming slower; it even ceases after 5 or 6 days.
Besides, in such cheap affairs the dial works are
not suitable for quarter chiming. The combination
makes a very poor clock. Not so with the “MON-
ASTERY,” which are heavy, powerful brass works,
with solid steel pinions and built as a good weight
chiming movement should be constructed.

The illustrated model is a fine piece of furniture,
fit for any residence, and can be obtained with
three combinations of striking:

1. With five 1¼" tubular bells, made and
tuned by Mr. R. H. Mayland (Westmin-
ster chimes); list.....\$180.00
2. With five rodgongs, also Westminster
chimes; a feature in this combination is
that the hour is struck on 4 gongs which,
being tuned in a chord, produce a sound
which is the nearest imitation of the dis-
tant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs,
tuned in a chord; list..... 104.00

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Annual Economies of the Jewelry Shop.

Written expressly for The Jewelers' Circular-Weekly.

IN the jeweler's manufacturing establishment, as in all other industrial plants, there is the annual demand for economy in things mechanical. The mechanical department is supposed to be a department in which money can be saved, time gained and improved products turned out each season.

balance wheel was thrown over a little and tilted as illustrated at A. This threw the wheel out of balance. It made the wheel wobble at each turn. The wobbling order was communicated to the lines of shafting and belting, resulting in an unsteady motion throughout the entire plant. We fixed this condition by opening the flanges at the juncture of the halves. Then with pieces of thin tin we leveled the halves. A little chipping with the cold chisel was necessary to remove high places. The file was also employed. In a very little time we had the balance wheel as straight in adjustment of the halves as shown in Fig. 2. The closed seam at the juncture of the halves is marked B. Thereafter the power transmitted was steady and there was a gain in the work accomplished.

In the next jewelry establishment visited by the writer a combination like that shown in Fig. 3 was seen. Of course, the mechanic would not install a half drive like this, for the reason that the belt would not remain on the wheels a minute. The lower wheel is directly beneath the center of the upper wheel, as can be seen. Therefore, in the running of the belt, the belt was caused to drive far over on one side of the lower wheel to such an extent that the belt ran off repeatedly. While this is a simple defect, it is often made. In this shop an attempt had been made to retain the belt in running line by nailing up wooden guides—a bad idea, because the edges of the guides will seriously chaff and tear the edges of the belt.

We fixed this defect in 10 minutes by merely freeing the set-screws of the lower wheel and moving it so that the center of the wheel operated directly beneath the edge of the upper wheel instead of the center of the upper wheel. This made the belt come in the right place to retain the belt in running line, and the belt remained in place thereafter.

Fig. 4 shows some flanged wheels. I saw a mechanic trying to get his belting to run without wearing off the edges of the leather. You cannot run belts in flanged wheels without getting the leather torn and worn unless the flanges are recessed. You can have high centers, leaders, etc., still the edges of the belting will grind on the in-

terior of the flanges. To recess the flang inside, get the flanged wheel outfit into turning lathe. Then cut out the metal ha an inch below the edges of the flanges a the inner sides, as far as the metal w stand it. This recessing will relieve t frictional contact of the flanges with t belt next the surface of the wheels a prevent scoring the leather.

A man fixed up a coupling as in Fig. in a shop. This is dangerous. The pr truding ends of the bolts are prohibited law in some States. There is no need the projecting bolt ends to endanger liv by catching into clothing of employes. Tl

One jeweler told me that his profits the past season were based primarily on savings in the technical department. By scripping here and there in the manufacturing division, by getting the full benefit from modern machinery, but running the power and mechanical division to perfection, so to speak, the jeweler figured that he had derived more of a profit than heretofore. Other men have done the same.

In one establishment where a 150-horse-power engine was in use the entire power and transmission system was found to be hindered in doing effective work as a result of the condition of the balance wheel of the engine. An examination revealed the condition shown in Fig. 1. One half of the

device was taken off and a coupling with enclosed bolt heads substituted.

I found an expensive jewelry working machine accomplishing poor work, due to the slipping of the frictional contact of the wheel surface as in Fig. 6. One of the green workmen had sent a stream of lubricating oil into the frictional surface. We had to remove the shaft, open the cone and cup and scrape the oil off the leather cone surface. The cone surface should be kept dry. Resin can be put in to help out.

In a shop where mechanical work was under way I heard the second boss condemning a turning lathe of new pattern because of the irregular motion of the machine. I examined the power equipme

Storekeeping Department.

nd noticed that the main driving belt was slack. The slack was taken up with an idler, E, Fig. 7. Here is where the trouble existed. The idler was set down too tight. It made the lower belt rub the upper. The surface nearly caught at times. We fixed it by doing away with the idler. We took out several inches from the belt, reced and put on the belt, and there was no further bother.

In passing through the mechanical department of a shop dirty oil was dripping on costly jewelry stock. I noticed that many of the drip cups hung unevenly, as in g 8. Drops of black oil oozed over the edges of some of the tins, as at f. It is best to have a monthly or quarterly inspection and cleaning of oil cups. Otherwise you will always have soiled oils falling below, injuring stock.

Selling Arguments Used by Retail Jewelers.

THE silver service upon your dining table contributes an atmosphere of dignity and quiet elegance to the whole house. Nothing quite so complimentary to your guests—nothing so indicative of refinement. The expense need be but small, even though the quality is guaranteed. E. Keller & Sons, Allentown, Pa.

"One Figure" more or less in the price of an article may mean quality or lack of quality. The path of safety lies between extravagantly high and ridiculously low

in pins, brooches, pendants, etc., are to be found at our establishment. Our leadership as jewelers is well known and generally admitted. What we sell is not more remarkable than the figures at which we offer these high class articles. We want your repair work. Virgin & Young, Macon, Ga.

In buying jewels you have to trust your

Enterprising Window Displays.

DURING "Made in St. Louis Week," celebrated in St. Louis, Mo., recently, no show windows in which were displayed articles of St. Louis manufacture attracted more attention than those of the Mermod, Jaccard & King Jewelry Co., at its estab-

A DISPLAY OF SILVER MADE BY MERMOD, JACCARD & KING JEWELRY CO., ST. LOUIS, MO.

tradesman's word for a good deal. You can put implicit faith in what we tell you about anything in our stock. We have low grade

ishment at Broadway and Locust St.

In one window was shown society stationery, the latest designs in calling cards, banquet invitations, wedding anniversaries, menus, birth announcements, monogram writing papers, reception invitations, wedding invitations and programmes.

In another show window were shown products of the firm's silver factory comprising articles made in its own shop on the premises, including loving cups, prize cups, tea sets, coffee sets, water sets, goblets, waiters, chop dishes, etc. There was also shown a large collection of medals and badges, class pins, fraternity pins and fraternity jewelry manufactured by the firm.

Old Home Week in Montreal.

MONTREAL jewelers recently took an important share in the efforts that were made to insure the success of "Old Home Week," when many former residents come "back to Montreal" for a week's holiday and enjoyment amid old and familiar associations. In this connection, a handsome silver trophy was presented by Johnston Bros. to the old Montreal "boy" or "girl" who comes home to the city from the greatest distance, and M. Cochenhaler, another well-known local jeweler, gave a silver trophy to the old Montreal "boy" or "girl" who returned and was the longest continuous time away. Some of the designs for badges as made by the jewelers were very effective in their workmanship.

A DISPLAY OF STATIONERY BY THE SAME FIRM.

prices and leads right to our store. We sell jewelry at absolutely fair figures. Comparison with prices prevailing elsewhere will give an insight to our values. Henry Birkenbusch, Pekin, Ill.

Diamonds of the purest water mounted

and imitation stones, but we sell them for just what they are. We wish satisfied customers only—it's the duty we owe our business. That's why you can be so sure about anything you buy in this store. C. W. Bixler & Co., Easton, Pa.

A. D. Hansell, a jeweler of Stockton, Cal., narrowly escaped death by taking by mistake cyanide of potassium, which he believed to be bicarbonate of soda. He was saved by prompt assistance rendered by local physicians.

KALANA GLASS

AN entirely new and beautiful effect in etched glassware in which floral designs, such as pansy, lily, poppy, geranium, etc., are shown in an attractive manner true to nature. No illustration could convey the exquisite beauty of this ware.

During the dull times we have been preparing to meet the prosperity which we were certain would follow. You can now find among our samples many good things in Cut Glass, Engraved Glass and Rock Crystal for prompt shipment.

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of Sept. 8.)

CABAN, Charles. Ceramic artist at Rouen XVIII. century).

CABAN, Louis. Potter at Rouen (XVIII. century).

CABARET, Pierre Antoine. A ceramist at ceaux. (end of the XVIII. century).

CABIRUS. One of the metal-working divinities under Vulcan.

CABOSSED, caboched or caboshed (Her.). A term used to express the head of a tick, or any other animal, that is placed

STAG'S HEAD CABOCHED.

all-faced, or *afrontée*, without any part of the neck being visible, and is sometimes termed *trunked*."—Robson.

CABLE, cross, or cablée (Her.). "Formed

CROSS CABLE.

of the rope or cable, and differs from the *ross corded*."—Robson. (See *cross corded*.)

CABLE ORNAMENT. This design, taken from the rope, dates from ancient times. The Phœnician artists used it. The *guilloche* is also often called *cable ornament*. See *guilloche*.)

CABLING, or cable moulding. "A mould-

CABLE AND TOOTH MOULDING.

ing in Roman architecture, made in imitation of a thick rope or cable."—Mollett.

CABRÉ (Fr.). In heraldry *cabré* signifies erect. "This term is applied to a horse in the act of rearing."—Milbourne. (See *effrayé*.)

CACAULT, François. A ceramist of Nantes (second half of the XVIII. century).

CACABUS. (See *caccabus*.)

CACCABUS, sometimes spelled *cacabus* (Gr. and Rom.). "A sort of pot or vessel for cooking any kind of food. It was made of bronze, silver or earthen ware, and assumed a variety of forms; but the one in ordinary use resembled an egg with an opening at the top which closed by a lid. The *caccabus* rested upon a trivet (*tripus*)."—Mollett.

CACCABUS FROM POMPEII.

CACHOLLONG is a porcelain-like variety of opal.

CADENCY (Her.). "Also called *distinction of houses, marks of cadency, differences, brisures*, etc. The ancient mode of varying coats-of-arms between father and sons, and between the several branches of a family, was by introducing an *ordinary*, inserting a charge or inverting the paternal tincture. But this being done according to the fancy of the bearer, without system, order or rule, heralds have now adopted a strictly uniform method, which offers to the beholder a criterion as certain and indubitable as it is manifest and satisfactory; that is, the heir, or first son, during his father's lifetime bears a *label*, the second son a *crescent*, the third a *mullet*, the fourth a *martlet*, the fifth an *annulet*, the sixth a *fleur-de-lis*, the seventh a *rose*, the eighth a *cross moline*, and the ninth a *double quatrefoil*."—Robson. (See *label*, *crescent*, *mullet*, *martlet*, *annulet*, *fleur-de-lis*, *rosé*, *cross moline*, *quatrefoil*.)

CADET. In heraldry *cadet* means junior.

CADISCUS. An ancient Greek voting urn. (See *psephus*, the voting pebble or die that was cast into the urn.)

CADOS. "The Greek *cados* (cask), a name given, according to Callimachus, to all pot-

tery, was used at banquets. It appears to have been employed as a *situla*, or bucket, and it is possible that the deep semi-oval vase of pale varnish, and generally with figures of a late style, either embossed or painted, was the *cados*. It is very similar to certain bronzes which seem also to have been *cadoi* or *cadiskoi*. In the Pax of Aristophanes he persuades a helmet-seller to clap two handles on a helmet and convert it into a *cadus*."—Birch.

CADUCEUS, or caduceum (Lat.). "A wand of laurel or olive given by Apollo to Mercury in exchange for the lyre invented by the latter. Mercury, it is said, seeing two snakes struggling together, separated them with his wand, whereupon the snakes immediately twined themselves round it. This was the origin of the *caduceus* as we know

CADUCEUS STYLES ON ANTIQUE STATUES.

it; it was always an attribute of Mercury, who thence obtained his name of *Caducifer*, or *caduceus-bearer*. The *caduceus* was an emblem of peace."—Mollett. The personification of the Roman god Mercury was to the Greeks *Hermes*, and his wand was called *kerykeion*. The ancient Greek ambassadors and heralds carried a staff called a *caduceus* (*kadukeos*). Hence the wand that is the attribute of *Hermes* became so termed. It must be remembered that the snake was the symbol of the ancients of death, as it was later with the Christians and of the Hebrews from distant times, and it was a function of *Hermes* to conduct the departed spirit to *Hades*.

CADUS. The Latin for the Greek word *cados* (to which refer).

CAELATURA (Lat.). "A general term for working in metal by raised work or intaglio, such as engraving, carving, chasing, riveting, soldering, smelting, etc. Greek, the *torcutic art*. Similar work on wood, ivory,

marble, glass or precious stones was called *cupura*."—Mollett.

CAEN (France). "According to the 'Tabl. general du commerce de la Normandie' there was here a manufacture of earthen ware, which later produced hard porcelain under the care of Desmare & Co."—Jaquemart (1800-10.) "Hard paste, resembling évres paste, well decorated."—Prime.

CAESARE DA FAENZA (Cesare Cari). A majolica artist at Urbino about 1536. A piece ascribed by Mr. Chaffers to this fabrique and to the brush of Caesari Cari, who painted in the *bottega* of Guido Merello, 1536-51, (?) is marked 1549 above a heart, a pierced heart below the line and the interlaced initials C G at bottom.

CAETRA. (See *cetra*.)

CAFFAGGILO (Italy), spelled variously Caffagiolo, Caffagiulo, Cafagiolo, Chaffagiolo, Caffagilolo, Gafagizotto. "The existence of Caffaggiolo (majolica) has been made known to us only by inscription of the name on some few pieces preserved in the cabinets of the curious. From their style and the mark accompanying the inscription we are able to detect many examples."—Fortnum. This ware was probably created through the patronage of the Medici family. Cosimo I. established in a castle at this place, situated between Florence and Bologna, a manufactory of earthen ware.

"Characteristics: A glaze of rich and even quality, and purely white; the use of a very dark cobalt blue of great intensity, but brilliant as that of lapis lazuli, frequently in masses as a grounding to the subject, and it would seem laid on purposely with a coarse brush, the strokes of which are apparent. A bright yellow and a range of brilliant but opaque quality, a peculiar liquid and semi-transparent copper green, is also found, and another characteristic pigment is an opaque bright Indian red; a brown and a purple are also used.

* * * As might be expected, the arms, emblems and mottos of the Medici family frequently occur, and occasionally the letters P. Q. F. are introduced for 'Senatus populusque Florentinus.' The British Museum and the South Kensington Museum are rich in fine specimens of this ware of various date and variety, some of which are among the most beautiful examples of the potter's art."—Fortnum. "Grotesques and a *candeliere* decoration are frequent; the drawing is bold and firm, and the figures frequently outlined with a narrow blue line. * * * Among the dates inscribed are 1507, 1509, 1514, 1544, 1546, 1547, 1570, 1590. The name of the artist Benedetto Bocchi, of the period 1640, appears on one piece, while the following artists are known to have worked there: Giacomo Ridolfi, Gio: Ridolfi, Flaminio Fontana and Pietro della Cortona. The name Andrea di Bono, probably that of the owner, appears on a piece dated 1491. A monogram formed of P and S, or of those letters with an L, distinguishes many Caffaggiolo pieces."—Beckwith. Caffaggiolo ware shows great resemblance to Siena products, and a general similarity to Faenza and Forli pieces in style. The few pieces in metallic luster lead to the supposition that they are only experimental work but little attempted.

CAFFO, Giovanni Antonio. A majolica

potter at Bassano (Italy) in the XVIII. century. Worked for the Manardi family from 1707 as manager. In 1737 he started his own pottery there. It gradually declined.

CAILLOUTAGE. A French term for fine earthen ware, pipe-clay. "Its white paste is composed of plastic clay, of silica or quartz ground fine, and a little lime; its crystalline glaze is plumbiferous. * * * Fine earthen ware is most frequently decorated by the muffle. The oldest specimens, those made in France in the XVI. century, are ornamented by incrustations."—Jaquemart.

CAIRNGORM. Smoky quartz found in North Scotland at Cairngorm, near Banff, usually treated to produce the desired yellow color, has long been used by the Scotch in jewelry. It is known locally as *cairngorm*.

CAISSA. "In French *caisse*, English *case*. The small Roman quiver for the quarrels and bolts was so called."—Meyrick.

CAIXIA. "A casque, in Spanish *caexo*. A corruption of the Roman *cassis*."—Meyrick.

CALAMARIUS. "A case to hold the *calami* (reed pens)." Sometimes called *theca calamaria*. (See *calamus*.)

CALAMIS (Gr. *Kalamis*). A Greek artist of Athens about 470 B. C. Worked in marble, gold, ivory, etc.

CALAMUS (Lat.). "A haulm, reed or cane. The term was applied to a variety of objects made out of reeds, such as Pan's pipe, a shepherd's flute (*tibia*), a fishing rod (*piscatio*), a rod tipped with lime for fowling, etc. It was especially used, however, to denote a reed cut into proper shape, and used as a pen for writing."—Mollett.

CALAMUS (PAN'S PIPE). TERRA-COTTA RELIEF WITH JUDGMENT OF PARIS, BRITISH MUSEUM.

CALATA GIRONA (Sicily). "The brilliant metallic lusters which later spread over Italy first illumined the vases of Calata Girona, according to the testimony of the learned of that city, and when chance brought about the discovery of the ancient furnaces they found there helter-skelter both fragments of golden works and remains of majolica similar to those which the peninsular produced in the XVI. century."—Jaquemart.

CALATAYUD (Spain), a suburb of Aragon. "Señor Riaño refers to a deed executed at *Calatayud* in 1507 by one Muhamed ben Suleyman Attaalab, an artificer in gold luster ware (Hispano-Moresque), engaging himself with Abdullah Alfoguesy to teach him that industry in four years and a half."—Fortnum.

CALATHUS. A Greek and Roman vessel

CALATHUS BASKET.

used for holding milk and a wine cup of

the same shape was called *kalathos* and *calathus*. They are named and shaped after the wicker work-basket of that name.

CALCAR (Lat.). "A spur. It was also called *calcis aculeus* (literally heel-goat), a term specially applied to the spur of a cock. The latter, however, was just as often called *calcar*."—Mollett.

CALCARIA ARGENTEA (Lat.). "Silvered spurs. These were the distinguishing marks of esquires, being worn by them only."—Meyrick.

CALCARIA AUREA (Lat.). "Golden, or rather gilt, spurs, which, as being appropriated to, were a mark of knighthood."—Meyrick.

CALCEAMENTUM (Lat.). "A general term denoting any description of boot or shoe."—Mollett.

CALCEOLUS (Lat.). "A small shoe or ankle boot worn by women. There were three kinds: The first had a slit over the instep, which was laced up when the boot was on. A second shape had a very wide opening, and could be fastened above the ankle by a string passed through a hem round the top. In the third description there was neither cord, lace nor slit. The shoe was always low in the heel, and was worn like a slipper."—Mollett.

(To be continued.)

Wedgwood Collection to Be Exhibited in New York.

A LARGE collection of original Wedgwood pottery will be placed on exhibition at the Duveen Galleries, 302 Fifth Ave., about Oct. 1.

The collection consists of the combined collections of the present Lord Tweedmouth, ex-Premier of the Radical Cabinet, and Sir Arthur Sanderson. The two collections were purchased from the two well-known English collectors by Ben Duveen this Summer at the same time that other members of his firm were negotiating for the Maurice Kann collection of paintings in France.

The combined collection consists of more than 463 original plaques, vases, ewers, candlesticks, medallion portraits and busts all in immitably colored jasper, and all designed, "thrown" and "turned" by Josiah Wedgwood himself and by Flaxman, Bentley, Lady, Templeton and the other members of the small but remarkable group of pottery artists which the historic earthenware inventor attracted about his little Staffordshire factory between 1770 and 1795.

The collections of Sanderson and Tweedmouth were gathered piece by piece by the two Englishmen's agents all over Europe. One vase was made for George IV. when he was Prince of Wales, and remained for a long time in his possession. Another vase was found by Lord Tweedmouth's agent in the possession of Prince Galitzen of Russia. Others were obtained by the Englishmen's agents from the Vize, T. S. Walker, and De Falbe collections, and still other individual pieces were found in dismantled English country homes. One of the feature pieces in the collection is one of Wedgwood's original 50 copies of the Portland vase, only 16 of which are now extant.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page. No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2336.—Replacing Broken Teeth in Watch Barrel.—Will you kindly give me the easiest method of replacing broken teeth in barrel and wheel of a watch? After drawing the temper down of piñion to replace broken pivot, what is the best way to polish between the leaves? Do you recommend a good gauge for all-round bench work? In pivoting a staff, can I draw the temper down on staff in balance wheel on without injury to force from heat? I have always preferred unstaking stuff from balance to do as work.

A. M. B.

ANSWER:—The easiest way to replace broken teeth in a mainspring barrel is to fill two or three holes in the place of each broken tooth and insert pins of hard brass wire and soft-solder them in the holes filled, after which each set of pins may be pushed in a tooth with suitable files. To place broken teeth, or rather one broken tooth, in a common train wheel, slit the end of such tooth by a slitting file, widen the slot a little, dovetail the sides slightly and push in a piece of hard brass wire of suitable shape. Soft-solder it and finish to match the other teeth. To re-polish the leaves of a piñion which has been blued by heating, use a piece of pegwood or any other soft wood charged with a little Vienna blue and alcohol. For drawing the temper down the end of a balance staff for drilling without heating the balance, place the end of the staff in a brass wire about one or two inches long and heat the end of this wire sufficiently to draw the temper of the staff.

QUESTION No. 2337.—Gray Finish on Stem Wind Wheels.—Can you inform me through your valuable paper how to put a beautiful dead white gray finish on stem wind wheels? I can get the usual result on ground glass, which leaves scratches. I remove these scratches by rubbing with dry oilstone dust, but this oils the dead white effect.

J. G. K.

ANSWER:—To frost stem winding wheels with a white matted surface after the work has been made free from scratches, rub back and forward, or in a circular motion, with glass charged with a fine paste of oilstone and sweet oil. Before mixing this paste, carefully look over the oilstone powder with a magnifying glass and remove all black atoms, which, if left, would mar the surface. It may afterward be rubbed in the same manner with pith charged with some pure charcoal powder and fine oilstone dust. With thin oil applied sparingly, cleaning with benzine and careful handling a brilliant white matted surface will result.

QUESTION No. 2338.—Cleaning Marble Counter.—Please give me some simple way of cleaning marble counters. C. M.

ANSWER:—Marble slabs are cleaned by rubbing with a mixture of five parts common salt, and 2½ parts each powdered lime and pumice stone. After this, wash off with soap and water. Another is two parts bicarbonate of sodium, one part chloride of lime, mixed with sufficient water to make a thick paste, with which the slab is polished. Then wash with water and dry quickly.

Simplified Electroplating for Jewelers.

(Written expressly for THE JEWELERS' CIRCULAR—WEEKLY by "R. B.")

(Continued from issue of Sept. 15.)

PLATING OF STERLING SILVER ARTICLES.

WHEN a Roman finish is desired on sterling silver articles after treating them preliminarily, as already set forth, the articles, if not intended to be polished or

FIG. 7.

burnished, or such parts as are not to be finished in that way, should be satin finished before plating.

Satin finishing is accomplished by means of a steel wire circular brush running at a fairly high speed.

A rather inexpensive satin finish brush in common use in plating establishments, and one that is adapted for satin finishing copper and brass, as well as silver and gold, is shown in Fig. 7.

It may be useful for the benefit of jewelers and watchmakers who have their business in cities and towns far removed from a material supply establishment to know how to make a satin finish brush which will put a matt or dead finish on all metals, such as sterling silver, German silver, copper, brass and gold.

HOW TO MAKE A SATIN FINISH BRUSH.

Take a circular block of hard wood—say of about 1½ to two inches in diameter and about one inch wide—and bore a hole in

the center about one-fourth of an inch. Draw two lines on the side of the block so that they will cross each other at the center of the block at right angles. It will be noticed that the lines thus drawn will indicate four equi-distant divisions. At the termination of each line, and on the circular side of the block, screw in one eyehole—

FIG. 8.

four in all. In each eyehole insert an equal quantity of steel wire and twist it twice. This done, trim the ends of the wire evenly, and the brush is completed. A careful examination of Fig. 8 will render clear and simple the making of a satin finish brush of any size. The coarseness of the finish is regulated by the thickness of the wire used. The finer the steel wire, the smoother will be the finish. A dead finish can also be obtained by means of sand blasting, but as few jewelers are equipped with motive power to render this mode of matting available, we shall treat of sand blasting in a later issue.

After satin finishing the article, one may proceed at once to prepare for gilding, or silver plating, as explained in a previous issue. When the objects have been removed from the plating bath it will be noticed that a cloudy, yellow, soft coat was drawn on the objects during plating.

If a Roman finish is desired, all of this coat should be brushed off by means of a fine brass circular brush, as shown in Fig. 9.

In brushing, the article should frequently

FIG. 9.

be dipped into soap-bark water in order to make the brushing easy and thus prevent stickiness.

The object, during all the various stages of the plating operation, must be kept wet. When the article is brushed perfectly clean it should be lightly run through a perfectly fresh Roman gilding solution (just for an instantaneous plate), then quickly removed and washed in cold water.

If any part thereof is to be made bright—such as, for instance, the raised or high lights—it may at once be burnished.

The cloudy, enveloping yellow coat is a

finish known as rose gilding. If a rose effect is desired, this cloudy yellow should be removed from the raised or high lights only, and retained in the depressed parts, thus giving a pleasant and harmonious contrast to the article.

This cloudy appearance may be removed by brushing, as explained above, or simply by rubbing the part with one's fingers, aided by the use of bicarbonate of soda.

Of course, if a considerable surface is to be relieved, or a Roman effect is desired on a perfectly smooth surface—as is frequently seen on large belt buckles, where the inner part is Roman and the surrounding part, such as a wreath or garland, or any other raised fancy work, is to be rose finished—the relieving should be done by brushing on the large part and rubbing on the raised parts or high lights. After the object is thus prepared it should be given, as in the case of Roman finishing, a final instantaneous flash-finish in a fine Roman gold solution.

The final instantaneous plate in a fresh and rich solution is recommended for the purpose of securing a very deep yellow, and that can be accomplished only in a fresh, rich, fine gold solution.

After this "finishing solution," as it is appropriately called, becomes poorer in gold and no longer yields a fine yellow, it should be thrown into the ordinary preliminary gilding solution. In this solution only fine gold anodes must be used, and care should be taken not to immerse the copper wire in which the gold anode is attached, as the dissolution of the copper wire in the bath will soon change the color of deposit—a situation that should always be averted.

GILDING STERLING SILVER NOVELTIES.

As innumerable articles are manufactured of sterling silver, especially such articles as buff buttons, brooches, belt buckles, baby pins, umbrella handles, etc., finished in the latest attractive gold finishes, and since it is a well known fact that newly manufactured articles are seldom heavily coated with gold and after a short time are badly in need of replating, it may be of interest, and surely cannot fail to prove profitable, to every jeweler and watchmaker to be well prepared to replate such articles, so as to give satisfaction in wear as well as to restore the original artistic appearance.

First of all, when such articles as above mentioned are to be replated, they should be placed in a hot solution of potash, prepared as indicated in a former article, for the purpose of removing the lacquer, which becomes softened and loosened when subjected to immersion in a hot solution of potash. Until such lacquer is removed an attempt to deposit metal upon the article would prove futile.

After the lacquer is removed, the article should be dried. If the article has any smooth, plain surfaces and such surfaces are scratched, or if not scratched are rough, such parts should be given what is known in the language of the plater, a "cut down"—that is, a polish by means of a linen buff aided by an occasional application of hard tripoli.

The same treatment should be applied to

such parts as may be desired, after plating, to be highly burnished, so as to form an attractive contrast between the dead, Roman or rose gold and such glittering burnished parts.

It will be noticed that after the article is thus subjected to the buff, it will become greasy and sticky and, as has been said in a previous issue, that cleanliness is indispensable to successful electro-deposition of any metal, the article should be again immersed for a little while, in the hot potash solution, which will soften and dispel the

FIG. 10.

sticky substance accumulated in the depressed parts.

When the article is removed from the potash it should be washed in cold water and subjected to a brushing either by means of a circular two or three-row bristle brush, revolved pretty lively by power, or simply brushed with a hand brush dipped in soft, wet, finely powdered pumice stone. Hand-brushes are illustrated in Fig. 10. The method of brushing by hand is shown in Fig. 11.

This operation, while a tardy one, has demonstrated beyond all possible doubt its invaluable effect in rendering a heavy deposit—in fact, any deposit intended to wear some time, adherent and tenacious.

In the course of several operations the operator will learn that an adhesive deposit by electro-chemical processes can be secured only when the surface of the inferior metal is not merely clean, but free from a glossy smoothness.

Of course, if the article to be plated does not demand a good lasting plate, less atten-

FIG. 11.

tion will suffice. When a good deposit is desired the article should be lightly plated with copper prior to gold plating, because copper, beyond question, is the most readily adhesive metal known. But too much copper as a preliminary deposit on good work is not recommended, for the reason that when the gold wears off the copper becomes exposed and discolours contiguous material.

For the above reason, a gold solution of lower purity should be used. For instance,

when a rich Roman or rose finish is desired and one is paid to deposit a lasting deposit, a 10-karat or 14-karat deposit should be put on after the light copper deposit, and a fine 22-karat or 24-karat deposit should be put on as a final coat; thus, when the fine gold finish is worn off the article still wears like a gold article, retaining the yellow finish in the depressed parts and the high lights are not tarnished; neither is there a tendency to discolor the material with which the article comes in contact.

These suggestions are made for reason of economy, and are not to be practised when one is well paid to deposit a pure coat of fine gold from the start.

In the case of a cheaper grade of plating, or when coloring on silver is desired and yet wear is of important consideration, a heavy coat of copper should first be given; thereafter a low gold coat and a final fine gold deposit for a finish.

One who operates with the precious metal must be acquainted with what are commonly considered the secrets of the trade, for gold is not to be trifled with. Again, one should judiciously distribute the deposit—that is, deposit most metal where most wear or friction is likely to take place.

When the article is a brooch or a belt buckle, the front or upper side should be so

FIG. 12.

arranged while in the plating bath as to face the anode surface; by this operation it will be noticed that while the part thus exposed to the anode will become brown and dark sooner than the back or lower side, clearly indicating that the part facing the anode is benefited at the expense of the averted side. No argument is necessary to prove the practical value of such practice, for no matter how much gold one might deposit on the back of a buckle, a brooch, or any ornament, it will be far from securing satisfaction to the customer, since the front, the most conspicuous part, is least prepared to resist wear.

The articles, therefore, should be arranged, when plating, as indicated in Fig. 12.

(To be continued.)

Among the foreign importations received through the Providence Customs House during the past week were the following: From Antwerp, one package of manufactures of metal; from Bremen, seven packages of imitation precious stones and three of jewelry; from Hamburg, one package of silverware; from Havre, four packages of bronzes; from Liverpool, 10 packages of manufactures of metals; from Rotterdam, five packages of manufactures of metal; from Southampton, one package of pottery; Yokohama, one package of lenses.

How same ring looks with new claws and stone securely reset. Entire ring is finished like new.

THE PRICES QUOTED ABOVE FOR NEW CLAWS AND SETTINGS ARE SUBJECT TO OUR CATALOGUE DISCOUNT. WE CAN PUT NEW CLAWS AND SETTINGS ON MOUNTINGS TAKEN IN TRADE AND REFINISH THEM SO THEY WILL BE AS GOOD AS NEW. WE RETIP CLAWS AND MAKE NEW SETTINGS FOR CLUSTER MOUNTINGS SO THEY ARE AS GOOD AS WHEN ORIGINALLY MADE, AT PRICES THAT MAKE IT ADVANTAGEOUS FOR THE OWNERS TO HAVE THIS WORK DONE.

Carrying no diamonds in stock, entering and tagging each piece of diamond jewelry as received, then giving to each workman but one ring at a time, which is returned before he receives another, prevent any possibility of diamonds being exchanged while in our possession.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick roller remover. The work is always plainly in sight. The roller is held in the grooved jaws of the head. The adjustable head which holds the screw is quickly brought into position over the staff and the most obstinate roller will instantly yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

SCREW DRIVER No. 112 With Special Clamp and Two Blades

Use the screw driver like an ordinary one until the screw is partly extracted. Then press the sliding clamp down; this is so made that it engages the head of the screw and holds it until it is desired to put it back again, when it automatically disengages itself, and the driver sends the screw clear home. Particularly useful with stud screws.

Our illustration shows the clamp drawn back, which permits the driver to be used like any ordinary spectacle screw driver. The other illustration shows screw held in the mounting.

Price, \$1.00

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plunger in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

SPECTACLE AND EYEGLASS SETTING-UP PAD No. 1

This pad consists of a circular piece of rubber not too solid to give when a convex surface is laid upon it, thus preventing any possible breakage. It has a metal rim with two bent arms which hold the clasp of the eyeglass or spectacle, and keeps them in place while the screw is driven home.

Instructions for Using the Setting-Up Pad No. 1

Put the lens in the straps of mounting. Then put the lens in the holder by letting the two prongs come on each side of the tud. Lay the lens in place between the thumb and forefinger of the left hand. Draw the lens up in the strap by pressing the thumb of the right hand against the end of the lens, and with the forefinger and middle finger of the right hand press against the rim of the holder on each side of the two prongs. Place spectacle in holder in the same way. Then insert lens by turning the screw home. Will hold any strap of rimless eyeglasses or eyeglasses.

Our illustration shows "So-Easy" Eyeglass Mounting in Pad No. 1. Show this one in particular as it is one of the most difficult to assemble.

Price, Each, 50 cents

It is said there is A Limit to Everything

But there is none to our efforts to please our customers. We realize fully that our interests are mutual and work every day to that end. Your show-cases will look brighter, your sales books will look better with a good assortment of our up-to-date goods.

We are daily adding something new, and our line of 10-Karat Gold Jewelry is excelled by none and equalled by few in finish and workmanship to compare with the most exclusive 14-Karat lines.

Let us prove it to you.

We manufacture Buttons, Scarf Pins, Locketts, Fobs, Handy Pins, Brooches, Neck and Lorgnette Chains and our line of Stone Goods is positively the very best on the market to-day; prices lowest, goods the best.

Canton, Ohio

IF YOU WANT A CATALOG THIS YEAR

That will substantially increase your business and give your store a prestige not obtainable otherwise, write us at once for samples and particulars.

A Perusal of Our Customers' Letters Should Convince You That Our System Brings Results

STORE OF THE ERNSTING COMPANY, SAN DIEGO, CAL.

SAN DIEGO, Cal., Aug. 3, 1909.
THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio.

Gentlemen—Regarding your Catalog proposition, we desire to say that the order recently given you for this year's Catalogs and also for the goods illustrated on your regular stock pages will make the third year that we will use them.

In the two years that we have been sending out the Catalogs, we have learned to realize their value as a business getter. They bring in the customers to buy their holiday gifts earlier and at the same time settle the problem of the holiday purchaser, "What shall I buy and how much shall I spend?"

They act as a silent salesman by placing one's stock in the homes of the people so they can study over them at their leisure. They give the store a greater prestige and higher standing and are an excellent means for drawing new trade. By means of the Catalogs and illustrated Circulars we can reach our entire population both in the city and the country. This we have heretofore found it difficult to do.

The goods you furnished, which are illustrated on your regular pages, are of satisfactory quality, containing the best makes and ready sellers and we hope to continue using your Catalog proposition.

Yours very truly,

THE ERNSTING CO.

The Catalogs sent out by this firm since 1907 were made by The Arnstine Bros. Company.

EASTON, Pa., Jan. 20, 1909.
THE ARNSTINE BROS. CO.,
Cleveland, Ohio.

Gentlemen—In answer to your recent favor, inquiring if the 1908-9 Catalogs furnished us by your house were in every way satisfactory, I write to state that they have more than met our expectations—not only in the way of appearance, but also as a business getter.

This method of advertising is unusually good, and I could not think of any method that would bring the same results for the same amount of money invested.

This was the fourth year that you furnished us with catalogs and we have used them all with splendid results.

The merchandise illustrated in your catalogs is of standard salable goods from well known manufacturers, and most of the prices are lower than those asked by jobbers.

The jeweler who uses your Catalogs certainly does not stick in the rut, but will be classed as an up-to-date merchant.

As a whole, we are well pleased with the results.

Yours very truly,

OTTO JARCK.

STORE OF OTTO JARCK & SON, EASTON, PA.

We are represented in every State in the Union. If you contemplate using Catalogs and will notify us, we will have our representative call on you and explain our proposition.

FONTNEAU & COOK CO.'S

There's a reason and it's no secret

QUALITY!

Everything points toward a large volume of business the coming Fall and we are ready to meet the demand—we are always ready.

Our line is composed of nobby up-to-date designs and when placed before you you will ask no questions—you will purchase without hesitation. Why?

Because you will see collected together in one line the largest group of sellers you have ever before witnessed.

Our line is filled with life; we have no dead wood.

Factory: Attleboro, Mass.

NEW YORK: 15 Maiden Lane

CHICAGO: 1203 Heyworth Bldg.

THE REASON WHY

We are able to handle orders for Mesh Bags in any size quantities is because after long years of experimenting—on what seemed to others an impossibility—we have at last succeeded in making a machine to produce mesh.

The advantages to you are many, of which a few are: a perfectly smooth strong mesh, finer than can be produced by hand for double our price—prompt deliveries—and a guarantee that your Holiday orders will be taken care of. Your experience will supply many others.

W. & D. Bags are offered by Leading Jobbers.

Our New Christmas Booklet

(OR SHOPPING LIST)

Containing 24 pages and cover—including 8 pages of illustrations in beautiful colors—like samples shown below—printed on high grade paper with an artistic extension cover in colors and embossed, bound with silk floss

WILL BE READY ABOUT OCTOBER 1st

We can give only ONE JEWELER in each city the exclusive right of this beautiful Booklet
It will therefore be to your interest to write to us immediately for sample and prices

Plate No. 1

Plate No. 1

We have received yours of 25th inst. in which you enclosed a few sheets of a color plate which you made of our goods to be used in your Christmas Booklet, and must say we quite agree with you that it is a very beautiful sheet and a fine piece of workmanship, doing in our opinion, full justice to the goods, which so few illustrations do.

We would be very glad to refer any of our customers to you regarding this booklet and as a matter of fact we have already done so. When this booklet is complete, we should be very much pleased to receive one

Yours truly

KREMENTZ & CO.
49 Chestnut Street, Newark, N. J.

Plate No. 2

We beg to acknowledge the receipt of your esteemed favor of recent date enclosing some sheets of a page you have made of our goods for your Christmas Booklet and desire to say it is certainly a handsome piece of work and does justice to our goods. We shall be very happy to refer any of our customers to you regarding this booklet and when it is complete we would thank you to send us several for which we shall be exceedingly obliged, and remain
Very truly yours,

ALLSOPP BROS.
Allsopp Bld. Newark, N. J.

Plate No. 2

We show two of the color plates that will be contained in this attractive CHRISTMAS BOOKLET.
Read what manufacturers say of our color work.

We venture to say that this Booklet will be the most beautiful affair of its kind ever produced—and the price will be very reasonable.

Do not confuse this Christmas Booklet with our regular Catalog proposition.

We have nothing to do with the merchandise in either case.

ILLUSTRATIONS ABOUT THREE FOURTHS SIZE

THE LAUREL

TRADE MARK
STERLING 1866

☞ The **LAUREL** pattern is now ready for delivery in the dozen, with the fancy pieces in process.

☞ Made on the popular **MARTHA WASHINGTON** shape.

☞ Decorated with a dainty **LAUREL** wreath, cut with the delicacy of hand engraving.

☞ Finished in light, medium and heavy weights at a very moderate price.

☞ In manufacturing "**THE LAUREL**," every care has been exercised as to design, die work and finish—it is in every sense a Pattern of Class—but on account of slenderness of outline, proper distribution of weight, the most perfect factory and manufacturing facilities, it will be offered at the price of the cheap "ordinary" patterns now on the market.

☞ This is another **Smith Pattern**, designed to remain permanently in demand.

Frank W. Smith Company

Manufacturers of Sterling Silverware

GARDNER, MASS.

The Madam Jumel STERLING SILVER TOILET WARE

ALL those salient features of design which have made so pronounced a success of the Madam Jumel pattern of flat ware are embodied in the new Whiting pattern of Sterling Silver Toilet Ware. It appeals just as strongly to the increasing number of those who are attracted by a graceful simplicity of outline, a delicate refinement of ornamentation and a general harmony of proportion.

The immediate and definite success of this new pattern in Toilet Ware is undoubtedly due to its happy adaptation of those principles of design which have made the Madam Jumel flat ware so deservedly popular.

Another One of Our New Toiletware Patterns

To quote an admirer of the above design, "It is neither too plain nor too ornate; just a happy medium." We have, of course, seen to it that the workmanship and finish are up to our usual high standard.

Already the sales on this pattern assure us it will be one of the most popular we have ever made.

Sterling Silver Inlaid Spoons and Forks

Simmons Fobs are ready sellers

—because they are not only especially attractive and thoroughly good goods, but are widely *known* as such.

There is no question whatever about their quality and reliability, and the great variety of desirable patterns (in both silk and metal fobs) affords a selection sure to meet all tastes and all requirements as to price.

If your showing of fobs comprises a properly representative assortment of Simmons patterns, you can count on a profitable and wholly satisfactory fob business this Fall. If your line of them is not as strong and varied as it should be, there is yet time to make it so; — they are carried by leading jobbers everywhere.

JULIUS WODISKA

Manufacturer of a General Line of Platinum
18 K. and 14 K.

Diamond Mountings

40 JOHN STREET, NEW YORK

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

NOTHING BUT STERLING!

ROGER WILLIAMS SILVER CO. are manufacturers of high grade sterling ware only. We are the house that is always busy. Our goods are of original design; we do not wait for our competitors to originate for us. We manufacture no light weight or trashy goods, as we cater exclusively to the legitimate jeweler.

A complete line of samples is carried both at our New York Salesroom and at the Factory, Providence, R. I.

The Legitimate Trade is cordially invited to call and see for themselves.

We furnish exclusive pieces, no matter how large or how small.

Our "IMPERIAL" flatware pattern should not be overlooked by any jeweler. It is an assured success. Its pleasing, attractive and graceful lines appeal to all tastes. Place a small order of this pattern in your stock and watch the results. It stands out from all other patterns, being an entirely new departure from all other flatware designs.

A full line will be carried in stock after October 1.

Our toiletware line in the Bead, Plain and Engraved patterns, is unsurpassed in weight, workmanship and design.

We advise the trade to place their orders early to insure prompt delivery as present indications show that we shall be unable to fill orders received after November 1 as promptly as now.

Write or phone us for catalogue and attractive prices. Better; visit our salesroom or factory and see for yourselves.

THE KREMENTZ BODKIN-CLUTCH is recognized to be the most improved, simplest in construction, strongest and most durable on the market. Not one piece, but one-piece construction. No solder or tubing. Nothing to bend or break, being made of solid hard Spring Metal throughout.

Krementz Bodkin-Clutch Studs, Vest Buttons and Dress Sets are made in many salable patterns, set with Diamonds, Sapphires, Amethysts, Moonstones, Carnelian, Half Pearls and Whole Pearls at prices lower than any others made.

Note:

Should any of your customers have a set of vest buttons or studs with any old-style fasteners which have for any reason proved unsatisfactory, we will gladly change them (where practicable to do so) to Krementz Bodkin Fasteners, making only a nominal charge for same.

FOR

FALL WEAR

SIGNIFICANCE

OF THE WORD

"NEW"

AS APPLIED TO

HAT PINS

THE WORD "NEW" as applied to these Hat Pins, yields its fullest meaning. Frequently goods are called "new" simply because recently produced. They may involve no special departure. Not so here.

For example, the sizes are large. This gives room for a wider play of decorative effect. The very shapes become more imposing. Larger stones shine out luxuriantly. And there is a splendid field for the new effects in Enamel.

Nut Picks and Cracks

These articles are all constructed of steel, handsomely chased with beautiful design, and heavily plated in Nickel or Silver, making them always look bright and fresh. They are well made in every respect and intended for practical use.

Being pioneers in the Nut Pick and Crack business, our long experience enables us to offer a class of goods which in workmanship, design and finish is far superior to anything on the market.

These goods are put up in neat Pasteboard Boxes, White Wood, Cherry, Bird's-eye, Leatherette, Cloth and Satin Lined Cases.

THE JEWELERS' CIRCULAR

WITH WHICH ARE CONSOLIDATED
 THE HOROLOGICAL REVIEW
 THE JEWELERS' WEEKLY THE JEWELERS REVIEW

VOL. LIX.

WEDNESDAY, SEPTEMBER 29, 1909.

No. 9.

Hudson-Fulton Exhibition of Colonial Silver at the Metropolitan Museum of Art.

(Continued from issue of Sept. 22.)

THE silverware shown in the Hudson-Fulton Celebration Exhibition at the Metropolitan Museum of Art, part of which was described in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, is receiving its full share of attention from the thousands of visitors who daily throng the museum.

bottom line, third and fourth from the left to right. The cup has a molded rim and base and curved handles. It is 3¼ inches high and has the Revere mark in rectangle and was loaned by R. T. Haines Halsey. The porringer has a pierced-in keyhole pattern and is engraved M. P., being 5½ inches in diameter. It also has the Revere

TYPES OF PITCHERS BY EARLY AMERICAN SILVERSMITHS.

The work of American silversmiths from the earliest period up to the time of Fulton's death is most comprehensive, including pieces by practically all the workers of any prominence during that time.

As noted in the article published last week, the earlier exhibits show the influence of European design and workmanship, but this is lost in the simpler style of later pieces which present a distinctive American conception in design and execution.

Although there are a number of pieces by earlier workmen, it is safe to say that the display of the handiwork of the two Reveres, father and son, is perhaps the most interesting, because of the close connection which Paul Revere, the younger, had with Revolutionary events.

Four pieces of the work of the elder Revere are shown in the exhibition—namely, a cup, two teaspoons and a porringer. The cup and porringer are shown in the illustration on the front cover of the current issue, being the two pieces on the

mark in rectangle. It was loaned by George S. Palmer.

The other pieces in the illustration are the work of Paul Revere, the younger.

The breakers are engraved at top and bottom, and are 3⅞ inches tall. The engraving T appears in a shield (Isaiah Thomas, of Worcester). They are loaned by R. T. Haines Halsey. Each mug has a splayed foot and double-curved handle. One is engraved with the monogram S. D. S. in script within branches, and is 6¼ inches high. Another mug bears the engraving "Stephano Scales, Harvardianates A. D. MDCCLXVIII," *Conscripti Biennio Sub*

MUG BY REVERE. BOWL BY VAN DYKE.

ejus Tutela peracto, Hoc Poculum, Grati Animi Monumentum Donant." It is five inches high. The mugs were loaned by Mr. Halsey.

In the second row two of the teapots were loaned by Mr. Halsey and the other by Mrs. W. H. Adams. The last mentioned is oval and is engraved top and bottom. The lid is slightly domed with a pine cone finial. It has a straight spout and handle sockets. The engraved monogram A. McK. in script appears on both sides. It is 7½ inches high.

One of those loaned by Mr. Halsey is oval and is engraved with garlands. It has beaded edges and a flat lid slightly domed with a wooden knob and spiral finial. The engraved monogram, B. R. I., appears in script in medallion on one side and W. L. A. on the other. It is 5½ inches high and 5⅞ inches in diameter. The other teapot is round, with beaded edges. It has a domed lid, with pine cone finial and a fluted spout. It is engraved with the monogram I. S. C. in script in crossed

COFFEE POTS AND MUGS BY WOODS, WYNCOOPE, VAN DYKE AND UNDERHILL.

BUFFED TOP

Faceted back Amethyst, Topaz and Garnet stone rings, for both men and women, make one of the attractive new lines of rings we are showing this Fall, in both 14K. and 10K. gold—several patterns in each quality.

This half-tone illustrates one of the new 14K. patterns which is made in three sizes, rose gold or English finish.

The 10K. patterns are just as attractive, but different. Prices on all are right.

branches and is about 6 $\frac{3}{4}$ inches high. The cream pitcher has a molded rim and reeded strap handle. It is engraved with the monogram I. L. H. in script and is 5 $\frac{1}{2}$ inches high. It was loaned by George S. Palmer.

The bowl shown in the second row is 4 $\frac{3}{8}$ inches high and 5 $\frac{3}{8}$ inches in diameter. It has a splayed foot and was loaned by Mrs. Richard S. Ely.

The bottom row shows two porringers, one loaned by Mr. Halsey and the other

molded strap handle. It is engraved "S" in a wreath on one side and has a rose in a wreath on the other. It is 4 $\frac{1}{2}$ inches high and was the work of Joel Sayre, who was born in Southampton, L. I., in 1778. He died in 1818.

The next pitcher is the work of Jacob Hurd, one of the most famous of the early silversmiths. He was born in 1702 and died in 1758. He was known in Boston as "Captain" for his long service in the military company. The pitcher is described as

is the pitcher at the left in the second row. It was made by Lewis & Smith, who worked in Philadelphia in 1811. The pitcher is oval and has a diaper band around the rim and base, with molded mid-bands and square strap handle. It is five inches high and was loaned by Hon. A. T. Clearwater.

The other types of pitchers shown in the illustration are the work of later silversmiths, and all bear some distinctive quality of design or workmanship which mark them as clearly American.

An illustration showing types of teapots and tankards appears also on page 63. Two of the teapots are the work of Freeman Woods, who was a goldsmith at 11 Smith St., New York, from 1790 to 1793. The other one is by Benjamin Wyncoope, 1698 to 1740. One of the Woods teapots is oval, with a beaded band about the top and bottom, and engraved with garlands and flowers. It has a slightly domed lid, with urn-shaped finial, a straight spout and handle sockets. It bears the engraved monogram L. T. in bright cut medallion on the side, and is 6 $\frac{3}{4}$ inches high and 6 $\frac{1}{4}$ inches in diameter. The other teapot, by Woods, is described in the same way, except that it has engraved in script, S. W. It is 6 $\frac{1}{2}$ inches high and 6 $\frac{1}{4}$ inches in diameter. Both teapots were loaned by Mr. Halsey.

The teapot by Benjamin Wyncoope is round and has a molded lid and finial. It is engraved W. S. B. on the bottom and has a coat-of-arms on one side and a crest on the other. It was loaned by Mrs. W. E. Verplanck.

The tankards shown in the same illustration are all the handcraft of Peter Van

SALT CELLARS, SHAKERS, CANDLESTICKS, ETC., BY VARIOUS MAKERS.

by Mrs. Richard S. Ely. One is engraved I S P on the handle ("Rand" in script on the side and "From Est. of John Pettigell" on the bottom). It is 5 $\frac{1}{8}$ inches in diameter. The other porringer is engraved J R. A., and has a diameter of 5 $\frac{1}{2}$ inches. Both have the handles pierced in keyhole pattern. They were loaned by Mr. Halsey and Mrs. Ely.

One strainer is pierced in Tudor Rose design, and was loaned by Hollis French. The other strainer is pierced in aster pattern and has a gadrooned edge. It was loaned by Mr. Halsey.

The salt cellar is 1 $\frac{1}{2}$ inches high. It is round and has a notched rim and three cabrioled feet. It is engraved W. E. H.

having a tumbler-shaped body, with repoussé and flat engraving showing a house and ships. It has three cabriole legs and a double-curved handle. It is engraved B. I. on the bottom and the arms of Benjamin Johnson, of Marblehead, flat chased on the front. It is four inches high and has the Hurd mark in rectangle. It was loaned by R. T. Baines Halsey.

Another example of the early silver-

MUG BY EDWARD WINSLOW.

(Hickling) on the bottom. It was also loaned by Mr. Halsey.

The illustration on page 63 shows a group of types of pitchers by early American silversmiths. The one at the extreme left in the first row is an octagonal boat-shaped cream pitcher, with a turned-over lip and

smith's art in America is shown in the smallest cream pitcher in the second row by J. Coburn. Mr. Coburn was born in Boston in 1725 and died in 1803. He was the third sergeant of an artillery company in the Revolutionary War. The pitcher is described as mug-shaped, with a spout. It has a spade foot and S-shaped handle. It is 3 $\frac{1}{4}$ inches high and bears the maker's mark in rectangle. It was loaned by Hollis French.

An example of a somewhat later period

Dyke, who worked in New York from 1705 to 1750. One has a molded base, embossed with strawberry leaf and wire band. It has an S-shaped handle, with embossed drop, and a cherub head on the whistle end. It is engraved W. C. B. on the handle and has the Beekman coat-of-arms on the front. It is 7 $\frac{1}{2}$ inches high and was loaned by Mrs. William Beekman.

Another tankard is engraved S. D. to A. D. on the handle. It is seven inches high and has a molded top and base and an

S-shaped handle. The mark P. V. D. appears in oval.

The third tankard is five inches in diameter and is engraved P. E. S. on the bottom. It has the same base as the preceding one and bears the same mark of the maker in oval. It was loaned by R. T. Haines Halsey.

The bowl in the small cut is by Richard Van Dyke, son of Peter Van Dyke, who had a store in Hanover Sq., New York, in 1750. The bowl is described as having its sides flat chased with flowers, leaves and medallions. It is engraved G. P. in cartouche and was loaned by Mr. Halsey.

The illustration shown on page 65 depicts types of smaller articles of silver made by a number of different workmen. One of the oldest pieces is the salt pail shown at the extreme left in the second row. It was made by T. Dane, who worked in Boston in 1773. It has five reeded bands about the body and a twisted and hinged bail. It is engraved, "I. Tudor," on the bottom and is 1 3/4 inches high by 1 1/2 inches in diameter.

Another interesting bit of workmanship in the same group are the two castors at the left of the top row. They were made by Z. Bridgen, who was born in Charlestown, Mass., in 1734 and died in 1787. These two loans were obtained from Mrs. J. de Peyster.

The small salt cellar next to the right-hand end of the second row is by Paul Revere and has already been described. The other pieces are the work of Andrew Tyler, George Ridout, Phillip Goelet, Bartholomew-Schaats, Newkirk and others, some of whom are unknown.

The illustration of the porringers and strainers shown on page 65 are the work of a number of men, and are types of their kind. The one at the upper left-hand corner was made by John Dixwell, who was born in New Haven in 1680 and died in 1725. He worked in Boston at the trade of a goldsmith. The handle of the porringer is pierced in keyhole pattern and engraved W. A. T. It was loaned by Mrs. John W. McBurney.

Jeremiah Drummer, who was born in Boston in 1645 and died in 1718, made the second porringer. The handle is pierced in geometrical pattern, and it is 5 1/2 inches in diameter.

The third porringer was made by J. Clarke, who worked in Newport in 1734. It was loaned by George S. Palmer.

The strainer at the left in the second row is the work of E. Pelletrau, who was admitted as a freeman at New York in 1750. The strainer is pierced in daisy pattern, with a flat pear-shaped handle and hook. It was loaned by Mr. Halsey.

The next strainer was made by Benjamin Burt, a son of John Burt. It is pierced in circles, and is 9 1/2 inches long.

The third strainer was perhaps made by John Moulton, who was working in Newburyport, Mass., about 1765, but this is not fully decided. It is pierced in daisy pattern, and is 5 3/4 inches in diameter.

The tankard illustrated on the previous page is the work of Edward Winslow, who was born in Boston in 1669 and died in 1753. He was a grandson of John Winslow and held a

number of public offices. The tankard is engraved R. S. G. on the bottom and has a cherub head on the whistle end. A mask and dolphins appear on the purchase.

Annual Report on the Production of Precious Stones.

Text of the United States Geological Survey's Advance Pamphlet on Gems and Gem Minerals for 1908, Compiled by Douglas B. Sterrett.

WASHINGTON, D. C., Sept. 27.—Through the courtesy of the United States Geological Survey THE JEWELERS' CIRCULAR WEEKLY is enabled to present the following text of the department's annual report on the production of precious stones in advance of its publication in "Mineral Resources of the United States." The report, which is again prepared by Douglas B. Sterrett, reads:

INTRODUCTION.

Considering the general depression in business during 1908 the production of precious stones did not suffer so great a falling off as might have been expected. While the output of certain gems was considerably smaller in 1908 than in 1907, the production of others was greatly increased. Notable among the decreases was the output of sapphire, the principal part of the production of which came from a single mine in Montana as against four mines in operation in 1907. Greatly increased activity in turquoise mining in the southwestern States was combined with an unusually large output. This activity has extended well into 1909, and an even greater number of mines are being developed than in 1908. The demand for turquoise matrix has been large and is much greater than for the higher-priced pure blue gems. The output of variscite gems was greatly increased, and the value for 1908 was nearly double that for 1907. This has resulted largely through the successful efforts of the Occidental Gem Corporation, of Salt Lake City, to place its product on the market under the name "matrix." The production of tourmaline was again large. An interesting feature in the tourmaline industry consisted of considerable purchases by Chinese dealers for use in the Orient.

The tendency to use all varieties of matrix stones is increasing. This is especially true of those minerals having the bright blue and green colors that are found with copper ores. In fact nearly any minerals or rocks stained with these colors and showing odd patterns are pressed into service as souvenir gems for tourists, etc. Several minerals that show pleasing colors or unique patterns when cut and that were formerly not thought of as gems have been placed on the list of semi-precious stones during the last few years. Among these are the chrysoprase-colored smithsonite from New Mexico called "bonamite," the serpentine cat's-eye, "satellite," copper-stained chaledony or blue chrysoprase from the copper mines near Globe, Ariz., and pebbles of compact epidote found along Arkansas River in Colorado. Interest in the native gems of Colorado as amazon stone, amethyst, beryl, agates, etc., is being revived, partly through the prospecting work of J. D. Endicott, of Canon City, Colo. A new supply of rhodonite of attractive color has been obtained in California and is being cut as a matrix gem.

AGATE, MOSS AGATE, ETC. WYOMING.

The production of moss agate in the United States comes principally from the Wilde and Deercorn mine, two miles northwest of Guernsey, in Laramie County, Wyo. This mine contains three claims and is located near the top of a hill or small mountain about 400 feet above the adjoining valley. The base and lower slopes of this hill are composed of red quartzites, phyllites, hornblende and greenstone schists. These rocks are mapped under the name Whalen group by W. S. T. Smith and are referred to the Algonkian age. The top of the hill is composed of limestone and quartzites resting unconformably on the Whalen group and dipping to the west at a low angle. These rocks belong principally to the Guernsey formation of carboniferous age as mapped by Mr. Smith.

The moss agate occurs in an irregularly shaped vein, varying from less than one inch to nearly two feet in thickness and cutting nearly vertically across the bedded limestones. This vein strikes northeast and has been opened at two places about

200 yards apart. At the southwest opening an open cut and drift about 75 feet long have been made on the vein. The openings do not reach a greater depth than 15 feet. The upper few feet of the limestone exposed in the opening has a light flesh color, and the lower layer is red and is banded. The vein appears to pinch out in places in the light-colored layer of limestone and does not reach the surface a few feet above the tunnel. In the floor of the tunnel the moss agate had a thickness of nearly two feet in one place and pinched down to a few inches in a short distance. Small stringers of moss agate occur in some of the vertical seam crossing or branching out from the main vein. The moss agate does not appear to be firmly attached to the wall rock, but is separated from it by a deposit of white chalky chaledony or silica, and in places by layers of colum or calcite crystals. The vein filling is chaledony or agate with a few small botryoidal chaledony and drusy quartz lined cavities through it. The greater part of the chaledony has abundant black moss-like arborescent and dendritic markings throughout. The agate varies in quality from opaque cloudy white to subtranslucent to translucent or subtransparent. The latter material furnishes the finest stone for gem purposes. The white and subtranslucent agate is plentiful, and contains smaller portions of clearer fine gem material distributed through it. The translucent agate is also found in smaller rounded masses with a chalky coating over their surfaces. The black stains (of manganese oxide) occur through both the cloudy and the translucent agate, with all the variations of form characteristic of the mocha stone or moss agate. The better grades furnish very fine gem material, and the cloudy varieties are suitable for mosaic and small ornaments, for which a portion is used. Blocks of several hundred pounds weight of cloudy white agate with translucent portions were seen around the mine, and it is reported that a 1,000-pound block was once obtained which was almost entirely composed of moss agate of good quality, about three and one-half tons of rough moss agate were mined during 1908, though none was sold.

Much of the chaledony and jasper lying on the surface near the moss agate mine has black dendritic markings. This material occurs in varying shades of red, yellow and green, and some would furnish attractive stones for watch charms and similar uses if cut.

CALIFORNIA.

J. A. Edman, of Meadow Valley, Cal., reports the occurrence of abundant agates of different varieties on the shore of the southern end of Goose Lake, in Modoc County.

COLORADO.

Willis T. Lee¹ mentions the occurrence of a seam of nodular silica, resembling imperfectly formed agates, as a remarkably persistent feature of the Morrison formation of the nonmarine Jura rocks of Colorado. The silica is evidently a deposit from solution and often occurs in concentric bands of different colors. The seams bearing this agate-like material are usually only a few inches thick and have a clay filling in the internodular spaces.

J. D. Endicott has obtained some agate from Garden Park, eight miles north of Canon City, Colo., similar to the above, but he states that it came from the inside of fossil dinosaur bones. Some of it has a peculiar structure that may be the original bone structure. This agate has bright red, yellow and gray colors, and makes a beautiful curio gem for watch charms when polished. Mr. Endicott also obtains agates with peculiar structure from the Curio Hill locality, eight miles southeast of Canon City. These agates are translucent, with blood-red spots through them either in layers or bands or more or less regularly distributed through the mass. The latter pattern has been called St. Stephen stone. Mr. Endicott has cut a small quantity of translucent bluish chaledony found at Thirty-one Mile Mountain, seven miles west of Guffy, Colo. This chaledony has an agate-like

ture showing faint banding. The blue color is of a light shade, though pronounced. It is not the bright blue found in the blue chrysoprase or copper-stained chaledony of Globe, Ariz. The effect of the cut gem is very pleasing. Another variety of chaledony found in Colorado by Mr. Endicott has an amethystine color. This cuts to a pretty cabochon gem. These fancy agates and chaledony gems are delicately marked and have beautiful colors. They should be in large demand for the tourist trade and also for wider sale when people become acquainted with them.

AMBER.

INDIA.

Burma.—The production of amber from the Myitkyina district of Burma in 1907 was 44 hundredweight, with a local value of £385¹, a decrease of 173 hundredweight from 1906. The output in 1908 was 49 hundredweight, valued at £364².

RUSSIA.

Amber was discovered in Transuralia on the Isset River, about a century ago³. This deposit was in a brown coal formation, and since this coal formation is now to be worked it is hoped new deposits of amber will be found.

AMETHYST.

COLORADO.

A deposit of cloudy amethyst has been worked in a small way in Fremont County, 12 miles northwest of Canon City and one mile south of Twelvemile Park. This deposit was opened some years ago by prospectors in search of gold, the amethyst being mistaken for fluorite, which was considered a good indication of that metal. In March, 1907, the claim was relocated by J. D. Endicott, Canon City, as a gem deposit. Three openings have been made—a shaft 25 feet deep, a pit 15 feet deep and another pit 10 feet deep.

The country rock is biotite granite gneiss whose schistosity strikes N. 40° E. with a dip of 30° SE. Small dikes or veins of coarse granite or pegmatite with dark red feldspars cut the granite gneiss. Some of these dikelets are badly epidotized, with the result that the red feldspars with yellowish-green epidote form a rock with a pleasing combination of colors for small ornamental purposes. The amethyst is found in a vein or system of veinlets, ranging from several inches to three feet in thickness associated with a pegmatite streak. The amethyst occurs in streaks and veinlets varying from less than one inch to three or four inches in thickness and opening out into irregularly shaped pockets eight or 10 inches across. The greater part of these streaks are vertical and parallel to the walls of the veins, though in some cases they are inclined and transverse to the vein. The veinlets are made up of layers of amethyst and smoky quartz crystals with comb structure. Nearly all the cavities have been completely filled with amethyst, so that few are obtained with perfect crystal form. Pink calcite forms a part of the vein filling in places. The wall rocks have been partly decomposed and hardened by silicification. The order of formation of parts of the vein appear to be: Fissuring, silicification of wall rock, deposition of calcite, more fracturing, deposition of smoky quartz, deposition of amethyst, deposition of shells of white quartz or amethyst crystals.

The cloudy amethyst is translucent, with patches of deep amethyst color scattered through paler portions. When cut "en cabochon" or in beads this gem is very attractive for scarf pins, cuff buttons or necklace stones. It is probable pieces of sufficient size could be obtained for umbrella handles or similar small ornaments, as some of the crystals are two inches thick.

PENNSYLVANIA.

Dr. Edgar T. Wherry, of Lehigh University, reports the occurrence of amethyst at several localities in southeastern Pennsylvania. Crystals of fairly good color, though generally somewhat cloudy, are found on the farm of a Mr. Cople, about one mile east of Media, Delaware County. These crystals of amethyst occur in packets in decomposed mica schist and are sometimes as much as two inches long.

LAKE SUPERIOR REGION

A large specimen of amethyst weighing 200

unds is reported to have been sold by Alexander Leads, Marquette, Mich. The amethyst was found some 45 years ago in a cave on the north shore of Lake Superior. It is stated to be a fine specimen.

ZURMALACHITE, MALACHITE, ETC. ARIZONA.

Besides the true azurmalachite gems, composed of azurite and malachite, there are impure forms consisting of smaller amounts of these minerals mixed through a rock or other mineral matrix. Such is the azurmalachite from the John Jay mine at Mineral Park, Ariz. This variety appears to be a badly altered fine-grained white porphyry which has been brecciated, decomposed, partly silicified, and the seams filled in with azurite and malachite. Portions of this rock are soft and have a hardness of four or five, while parts which have been silicified are harder through the presence of much free quartz. The azurite and malachite occur in veinlets or seams and irregular masses through the rock. The veinlets range from paper thickness to an eighth of an inch thick and are very numerous in some specimens. These seams cut each other at various angles and ramify throughout the rock in an irregular manner. In places blue azurite is the principal colored mineral, in others green malachite, while the two often occur in the same specimen. The azurite veinlets appear to have been introduced later than the malachite. Brecciation of the rock and cementation by copper carbonates has been far reaching, so that some of the material has a marked peckled appearance.

NEVADA.

William Kley, Denver, Colo., kindly sent to the office of the Survey a gem cut from a copper ore obtained from a mine in Nevada by I. F. Peck, Denver. The stone consists of granular quartz with much blue azurite in the interstices. It resembles chrysocolla in appearance. As a souvenir gem it should find a market in the tourist trade.

BERYL, AQUAMARINE, ETC.

COLORADO.

The Mount Antero locality in Chaffee County, Colo., has furnished many fine specimens and considerable gem beryl, topaz, phenacite and quartz crystals. These gems would doubtless be mined regularly if the locality were more accessible. The great elevation of the deposits, with the accompanying dangers from landslides on the steep alpine slopes, exposure to severe thunder storms, difficulty of transporting tools and supplies and the short season (two to three months) when it is possible to work has necessarily limited extensive development of these deposits. Practically all of the workings are simply pits from four to eight feet in width and depth, and many consist of but one or two blasts in favorable places. Gem deposits have been found on the top of White Mountain at an elevation of about 15,900 feet above sea, and one-half of a mile south of the top of Mount Antero, on the west slope of Mount Antero, and on smaller peaks to the east of it. Former glaciers have left their marks in the region by cirques, moraines and lakelets in the surrounding valleys. The gem locality is reached from the little town of Alpine, or from Fisher station, on the narrow-gauge branch of the Colorado & Southern Railroad between Buena Vista and Gunnison. From Alpine the distance is about eight miles and the climb about 5,000 feet. Over half of the trip can be made on burro or mule back.

The mass of Mount Antero and White Mountain is composed of quartz monzonite with local variations. Along the divide half a mile southwest of White Mountain an abrupt change of character to more basic rock is indicated by an area of dark-brown soil on Calico Mountain. The talus slopes and angular gravel-covered surfaces of Mount Antero and White Mountain appear light gray and frost white in contrast to Calico Mountain. On parts of White Mountain, especially near the beryl deposits, the rock is muscovite granite composed of orthoclase with micropertite intergrowths, oligoclase, quartz, muscovite and a little biotite. Magnetite, apatite and zircon are present as accessories.

The beryl, quartz, phenacite and topaz crystals occur in miarolitic cavities and pockets in the granite and granitic phases of the quartz monzonite. The pockets occur in streaks or are isolated and occupy no definite arrangement with respect to each other. The crystallization along the streaks and around the miarolitic cavities is coarse,

and the rock may be called pegmatite. One streak or vein of pegmatite with its gem-bearing pockets is 15 inches thick where exposed in a pit. This streak can be traced for some distance in a north-east direction across the ridge near the top of White Mountain by loose beryl and quartz crystals in the angular gravel soil formed by the disintegration of the rock and in blocks of the granite lying on the surface. As exposed in the pit the vein consists of pegmatite, much crystallized clear and smoky quartz penetrated by beryl crystals, crystals of phenacite, muscovite mica, feldspar, violet and green-colored fluorite, etc. Crystals of beryl and quartz occur scattered along the top of the ridge from the summit of White Mountain for about 200 yards to the southwest. In places many crystals may be found loose in the gravel, indicating the position of a gem pocket.

With the exception of smoky and clear quartz, beryl is the most abundant specimen and gem mineral found at the Mount Antero locality. The beryl occurs in transparent clear crystals from small size to those measuring two centimeters in diameter and six centimeters in length. Many of the crystals are badly etched or corroded, especially on the ends projecting into cavities. The color of the beryls varies from clear light blue to pale and deep aquamarine green. Blue beryl is very plentiful "frozen" in the rock, either in the granite, pegmatite or quartz. Much of the frozen beryl is badly checked and flawed. That from the cavities is generally clear and of gem quality. The other minerals—phenacite, topaz and fluorite—are closely associated with the quartz and beryl, and often attached to them. Phenacite crystals attain the size of the beryl and are generally colorless. S. L. Penfield¹ has described the beryl, bertrandite and phenacite from Mount Antero. He discussed the etching of the beryl and its probable relation to the formation of the two associated beryllium minerals—bertrandite and phenacite.

Beryl crystals have been found rather plentifully at the Amazon claim of J. D. Endicott, six and a half miles north of Texas Creek on East Gulch, Fremont County, Colo. The country rock at this mine is contorted mica and hornblende gneiss. The gneiss is cut by a large irregular mass of pegmatite which outcrops as a small cliff on the west side of the valley. The pegmatite contains irregularly shaped quartz masses of pale rose color, ranging from a few inches to several feet across. Beryl crystals are exposed at six or eight places in the cliff and range from less than an inch to a foot in diameter. They are mostly opaque and yellowish to greenish in color. Indications of gem quality were seen in fragments of one crystal, and a few gems have been cut. Mica occurs in crystals four and five inches across, and a few crystals of columbite are found.

PENNSYLVANIA.

Dr. Edgar T. Wherry, of Lehigh University, states that beryl is found at many places in Chester and Delaware counties in southeastern Pennsylvania. The best locality is probably at the quarry of C. J. Leiper, at Avondale, Delaware County. The beryls are found here in pegmatite cutting the coarse granitic Baltimore gneiss. The beryl crystals range in size up to two inches in diameter and four inches in length. They have a bright green to golden yellow color, though the majority are badly flawed and opaque. Occasionally clear crystals of gem quality are obtained. In the Fall of 1908 some rusty beryl crystals were found about half a mile to the north of this place during the grading of a road. Good specimens are expected when the locality is opened as a quarry for building stone, as is the present intention. Almandite garnet is found with the beryl at some of the localities and in some cases is suitable for cutting into gems.

UTAH.

Maynard Bixby, of Salt Lake City, reports the discovery of a new beryl locality on Iapah Mountain in Tooele or Juab counties, western Utah. The beryl has a blue color with patches of gem quality. Details of the find are lacking, though it seems the beryls were found in gulch gravels and not in place.

NEW HAMPSHIRE.

Edwin Passmore, Boston, Mass., reports the discovery of a ledge carrying light green, light yellow and golden-colored beryl near Danbury, N. H. A portion of a broken crystal of dark yellow color found at this locality was valued at about \$150.

The crystals are associated with massive feldspar and will have to be removed with care to prevent breaking.

NORTH CAROLINA.

The Virginia-Carolina Gem Co., Shenandoah, Va., reports prospecting work on its aquamarine deposit near Mica, Mitchell County, N. C. The mine adjoins the property of the American Gem & Pearl Co., and is probably the old Hungerford mine.

BRAZIL.

According to A. S. Atkinson¹ aquamarines have been mined at a number of localities in Brazil. Some remarkable gems are obtained, and a few years ago one weighing nearly six pounds was found near Arassualy. Records report a 15-pound green aquamarine found in 1814. The best gems come from the island of Alegre and are prized for their rich colors and brilliant luster.

CALAMINE.

MEXICO.

A very beautiful variety of calamine, suitable for gem purposes, has been brought to light by Charles H. Beers, of the Ysahelita Mining Co., San Pedro, Chihuahua, Mexico. Mr. Beers first noticed this material in the possession of a Yaqui Indian, who placed it before his shrine beside the cross and candle. The Indian informed him it was a guard against sickness, accidents, etc., and a sign of success. Mr. Beers obtained all the material possible from the Indian, amounting to about 400 pounds in the rough, and learned that it probably came from the Sahinal district near the Adventure mine, or perhaps in the Santo Domingo region in the Sierra Madre Mountains. The Indian was later killed in a mine, so that at present the locality from which the material was obtained is not definitely known.

The calamine occurs in masses of gray, green and blue colors, the blue prevailing. The Indian's name for the blue calamine was "buena fortuna." Specimens of the blue calamine, one a cabochon-cut gem kindly furnished by Mr. Beers, consist of translucent material, with a curved banded structure and fibrous or radial crystallization across the banding. The banding is evidently due to calamine deposited from solutions in mammillary layers of translucent blue and white colors. The crystallization has been from a center outward in radial lines, and gives a fibrous or silky appearance. Mr. Beers calls attention to the resemblance of a section of this material to the rising sun and believes this to be the cause of attraction for the Yaqui Indians. The gem cut from this calamine is very pretty.

CALIFORNITE.

CALIFORNIA.

Collier & Smith, San Diego, Cal., report that about two tons of rough californite was obtained at their mine on the South Fork of Indian Creek, 10½ miles from Happy Camp, Siskiyou County, Cal. None of this material was disposed of during 1908. The good grades of californite or jade—as it is sometimes called—are sold for about \$50 a pound.

CHRYSOPTASE.

ARIZONA.

John L. Riggs, Chloride, Ariz., reports the occurrence of chrysoprase near the summit on the west slope of the River Range or Black Mountains, Mohave County. The deposits are about 20 miles west of Mineral Park. Two claims have been taken up and are owned by Mr. Riggs and the Walker brothers. Mr. Riggs kindly sent a set of labeled specimens, among which were the following minerals and rocks: Country rock, decomposed, fine-grained, light-colored porphyry with small quartz phenocrysts. Perlitic volcanic glass with associated dark-red jasper. Red jasper or chert gangue mineral in chrysoprase veins. Brecciated vein matter composed of black flint, red and brown jasper, gray and white chaledony, and small chrysoprase particles of rich green color. Brecciated brown and gray chert cut by two seams of pale-colored chrysoprase and white chaledony. Breccia composed of white and gray translucent chaledony, red jasper and dark-colored chrysoprase, adhering to decomposed light-colored porphyry; this material is part of the vein. Dark-green chrysoprase, rather cloudy, in milky-white chaledony or chert, some with a reddish-purple

color. A mass measuring six by three by three inches and smaller pieces of finely granular apple green chrysoprase, float material. Only a limited amount of prospecting has been done, and part of this is only assessment work, so that the deposits have not been proven. Judging from color and quality exhibited by some of the small seams and patches of chrysoprase, it is reasonable to hope for high-grade gem material. So far the latter has been found only in pieces too small to be of much value for cutting. The large lumps of low-grade chrysoprase, occurring as float on the surface, may find a use in cheap jewelry. Some of the rejected specimens, with the several colored varieties of chalcedony and jasper, would yield handsome small ornamental stones. Portions of the white, purplish and translucent gray chalcedony with streaks of chrysoprase would yield an odd though attractive semi-precious stone.

CALIFORNIA.

Some of the chrysoprase mines of Tulare County, Cal., were operated during 1908. Among these are the Venice Hill mine and the Porterville mine; the latter was described in this report for 1906. The Himalaya Mining Co., New York, owns the Porterville mine and cuts the high-grade gem material obtained. The remainder is shipped to Germany for cutting. A. A. Prim, Visalia, also operated a chrysoprase deposit at Venice Hill, owned by Franklin Playter, Boston, Mass.

DATOLITE.

A quantity of massive datolite is obtained from certain of the Lake Superior copper mines each year and a portion is used for gem purposes. Datolite is a basic orthosilicate of boron and calcium and commonly occurs in white or colorless crystals. Otto Borreson, Hancock, Mich., submitted samples from the Franklin mine for examination. This material comes from the upper levels of the mine and some of it contains so much copper that it is crushed and smelted along with the regular ore. The gem material varies in color from pure opaque enamel white in a compact granular variety to cream, yellowish, pink and purplish in more translucent material. There are also dark to black streaks and mottlings through the massive datolite of different colors. The colors in the datolite are due to the presence of native copper more or less finely divided. Apparently the purplish tints are due to extremely finely divided copper, and the pink and yellow tints are caused by larger scales and particles of copper visible to the naked eye or through a hand glass. Some of the specimens are attached to trap rock, much epidotized in places with native copper. These specimens furnish attractive material for small ornaments and some are suitable for gems. The datolite is cut into stones for scarf pins, cuff buttons, watch charms, etc. They are sold by jewelers in the copper-producing section of Michigan and also more widely in the gem markets.

(To be continued.)

President Archibald's Suggestions to Members of the American National Retail Jewelers' Association.

BLAIRSVILLE, Pa., Sept. 28.—President Archibald, of the American National Retail Jewelers' Association, this week, issues the following general letter to the members of the organization:

The fourth annual convention of the American National Retail Jewelers' Association has now passed into history. It was a memorable convention. The keynote was brotherly love and co-operation. I do not think there was an unpleasant remark made at this convention. All was pleasant and profitable to those who attended.

We recommend that every retail jeweler read again each address given at this convention. I think each retail jeweler can get some new thought by reading these addresses several times.

The writer heard every word of each address, yet he has reread each address several times. We consider these addresses classical. These should go down in history as masterpieces to each retail jeweler. We urge you to make a study of these practical suggestions. Apply them in your business. These came from "men of affairs."

The national convention authorized the president and secretary of the A. N. R. J. A. to compile a general code of ethics for the trade and that the

same be given to the trade press as soon as completed.

We request each jeweler to send us suggestions for a list of rules or "Code of Ethics" from which we may compile our list. For example a rule like this: "Do not put price on goods bought in other states."

Each retail jeweler has his idea what rules he would like to see adopted. Send us a list that suits you. We will compile a list from the many hundred rules we are sent.

Since the unit of organization is the local clubs or "round tables," we urge every town and city and county to form local organizations and meet frequently. We believe the life of all national organizations lies in the small clubs or local organizations. The busy season should not keep us from meeting. Meet and set prices and keep up a friendly spirit. Our Christmas profits will be larger if we all sell goods at a higher price. We can get the higher prices if we agree among ourselves not to cut the prices. Get together in every locality.

If there is a retail jeweler who has not paid up his annual dues during the year he is kindly asked to forward same to his State secretary. On January next we would like to have all delinquent members paid up in full. Now is the time to pay.

Every retail jeweler who believes in higher business principles, who believes in making more profit on our goods, who believes in the preservation of our own business, is asked to send his \$3 for dues to his State and national organization. The verdict of thousands of retail jewelers who are members is that \$3 is well spent money. Some retail jewelers say it is worth to them \$25 a year. Let us have your application at once.

At the national convention at Omaha the president was authorized to appoint one man from each State who shall be a member of the Auxiliary Finance Committee.

I have appointed Steele F. Roberts, of Pittsburg, Pa., chairman of that committee. I have been asking for names of retail jewelers from each affiliated State. We desire one retail jeweler from each State who will secure funds from retail jewelers to carry on specific work of national importance. Send me names of suitable men for this finance committee. This money will not be used for salaries nor general expenses. If any retail jeweler believes that association work helps him more than he pays for it, and is desirous of aiding the work, send what you feel like giving to the national chairman, Steele F. Roberts, Pittsburg, Pa.

We trust that each retail jeweler will not forget to write the president about association work. Keep up interest in your State and city and town. Do not let the busy season crowd out interest in association work. Always have time to ask a brother jeweler to join our association. Always have time to read the trade press carefully. Always find time to write a few postal cards to your State and national officers.

Send suggestions about the new proposed door plate for members of the A. N. R. J. A.

Pay your delinquent dues at once.

Secure new members.

Do not buy too many goods. Pay your bills promptly and then we will have the respect of the manufacturer and the jobber.

Advocate a fixed selling price on every watch.

Keep your eyes and ears open for those jobbers and manufacturers who sell you and also the department store and mail order house.

J. P. ARCHIBALD,
President American National Retail Jewelers' Association.

H. F. Hinson, who was recently convicted of stealing jewelry valued at \$5,000 from the Southern Express Co., last week, was sentenced to pay a fine of \$900 and costs or serve 18 months in the Convict Camps in Jacksonville, Fla. His attorney will appeal the case to the Supreme Court.

Death of Joseph Friedman, LL. D.

The funeral of Joseph Friedman, head of the jewelry and pearl house bearing his name at 92 Spring St., New York, took place from his late home, 62 W. 124th St., New York, Wednesday of last week. Mr. Friedman died at Sea Cliffe, L. I., after a prolonged illness, on Sept. 20. The funeral services were conducted by John Elliott and Rev. Dr. Phillip Klein, the interment being in Union Fields Cemetery.

Joseph Friedman was born in Hungary, 1852, where he spent his early life. He went to Vienna, Austria, in 1861, and here

THE LATE JOSEPH FRIEDMAN.

made his home and studied law. He later served in the Austrian army and took part in the campaign of 1878, which resulted in the occupation of the two former Turkish provinces, Herzegovina and Bosnia. During this campaign he rendered valuable service to his country and was wounded. At the close of the campaign he resumed his practice of law, which he continued until 1886, when, after a nervous breakdown, he was compelled to abandon the law practice and travel for two years. He had the title LL.D.

Mr. Friedman finally settled in New York and started at 92 Spring St. in the wholesale jewelry business, and subsequently went to manufacturing and importing of pearl articles, pearl studs, sleeve and collar buttons and mother of pearl jewelry, which he furnished to the men's furnishing goods trade. The factory is at 626 Fourth Ave., Brooklyn. Mr. Friedman was well and favorably known in the trade by a large number of friends and acquaintances who expressed their sympathy to his family in their bereavement.

Deceased was a member of several German and Austrian clubs, and the Manufacturing Jewelers' Board of Trade, Providence, R. I. He is survived by a widow and one son, 14 years of age. His widow is a sister of Louis M. Graubarth, who has been connected in business with Mr. Friedman since 1891, and had managed the business during Mr. Friedman's long illness.

Reconstructed Rubies

There are RUBIES and RUBIES. For OURS we claim the foremost place in the Scientific Stone market.

We have succeeded in developing the Reconstructed Ruby to the highest possible standard, improving it irrespective of effort and cost. In the purity of material, its uniformity of color and shape, correctness of size and brilliancy of finish, OUR RUBY has positively no equal.

We were the first to make the Reconstructed Ruby popular, introducing it in all the variety of MODERN SHAPES and DESIGNS.

Our stock is the LARGEST and BEST in the country and will be found pre-eminently suitable for the use of the LARGE MANUFACTURING JEWELER.

When buying Rubies, GET THE BEST. They cost no more.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Death of Addison W. Woodhull.

Members of the jewelry trade in New York and also throughout the country learned with deep regret, last week, of the death of Addison W. Woodhull, president of the diamond firm of Mount & Woodhull, Inc., 26 Maiden Lane, N. Y. Mr. Woodhull died at his home, 26 E. Kinney St., Newark, at one o'clock last Friday morning after an illness of about three months. His death was caused by arterial sclerosis. Mr. Woodhull was known and highly regarded by a large circle of business associates and friends. He was a man of sterling character, firm business integrity and kindly disposition.

Addison W. Woodhull was born Aug. 21, 1861, at Newark, N. J., his father being

THE LATE ADDISON WOODHULL.

Dr. Addison Woodhull, surgeon in the United States Army during the Civil War and a prominent medical practitioner in the city of Newark. Deceased spent his early life in Newark, N. J., and entered the jewelry trade about 1878 as an employe of Aikin, Lambert & Co. In 1880 he went with the old firm of Randel, Barrimore & Billings, with which he remained until 1897, when in company with John C. Mount, also with this house, formed the firm of Mount & Woodhull. Mr. Mount died in January, 1900, and the business was continued under the same style until Feb. 1, 1905, when it was incorporated, Mr. Woodhull becoming president. Together with his brother, Gilbert T. Woodhull, he had continued the business since that time.

Mr. Woodhull was a member of the Jewelers' League, Jewelers' 24 Karat Club of New York City, Loyal Legion, Essex Club of Newark, Essex County Club of West Orange, and a member of the Jewelers' Board of Trade.

The funeral services were held Monday at 10 A.M. from the late home of the deceased. Dr. Vance officiated. The interment took place in the old Tennent churchyard at Tennent, N. J. Deceased is survived by his mother, one sister and two

brothers, Daniel E., who is vice-president of the American Bank Note Co., and Gilbert T., who is treasurer of Mount & Woodhull. The business will be conducted under the same firm style.

Interesting Statistics of Jewelry Industry of Massachusetts Compiled by State Bureau.

ATTLEBORO, Sept. 28.—The annual reports of Statistics of Manufactures brought out by the Massachusetts Bureau of Statistics contain information and data for the year 1908 that is not only of great interest but extremely valuable to the trade.

In the entire State there were 129 jewelry establishments, having a capital of \$6,175,658; using materials amounting to \$5,411,301; paying wages aggregating \$3,958,731 to 6,691 persons, 1,268 of whom were males and 2,423 females; the yearly average wage was \$591.65, and the amount of production \$13,674,638.

There were 16 silverware concerns, with a capital of \$2,446,322, using materials worth \$2,165,551, and paying wages of \$1,181,599 to 1,939 persons—1,652 males and 287 females. The average wage was \$609.39, and the value of the goods produced \$5,201,526.

The plated-ware business had four establishments, employing 157 persons, paying wages to the amount of \$107,311, and producing goods worth \$220,117.

The following is an interesting table concerning the jewelry industry in the various towns:

	No. of concerns.	Capital.	Value of stock used.	Wages paid.	Men employed.	Women employed.	Average earnings.	Value of products.
Attleboro:								
Jewelry	63	\$3,292,252	\$3,231,294	\$1,930,835	2,015	1,133	\$613.74	\$7,414,266
Other industries	27	4,064,223	2,232,367	1,222,370	1,982	331	528.48	4,912,741
North Attleboro:								
Jewelry	10	1,711,993	1,313,573	1,289,594	1,430	630	626.02	3,987,456
Other industries	15	973,646	664,642	352,647	408	188	891.09	1,630,088
Plainville:								
Jewelry	6	199,858	171,321	195,356	201	16	731.07	567,533
Taunton:								
Plate ware	3	142,683	41,047	63,161	88	19	590.29	156,647
Leominster:								
Combs, hair-pin	28	821,445	1,513,982	746,056	1,285	581	447.81	3,040,877

Another table, showing the pay received by all working in the jewelry business, shows the following: Under \$3—males 11, females 29; \$3 but under \$5—males 49, females 70; \$5 but under \$6—males 69, females 146; \$6 but under \$7—males 110, females 276; \$7 but under \$8—males 193, females 293; \$8 but under \$9—males 271, females 367; \$9 but under \$10—males 253, females 277; \$10 but under \$12—males 626, females 327; \$12 but under \$15—males 1,093, females 208; \$15 but under \$20—males 1,276, females 135; \$20 but under \$25—males 625, females 17; \$25 and over—males 333, females 11.

A third table gives the number of jewelry establishments in the State as 129, the average number of working days, 276.32, and the average proportion of business done, 63.26.

The town of Plainville has the rare honor of paying the highest average wage of any city and town in the State.

John A. Schrott, Herkimer, N. Y., has purchased a camp site at Otter Lake, where he is erecting a cottage for his own use

Retail Jewelers of Philadelphia, Pa., Discuss Resolutions Against Jobbers and Manufacturers Selling at Retail.

PHILADELPHIA, Pa., Sept. 23.—As noted in yesterday's issue of THE JEWELERS' CIRCULAR—WEEKLY, the first local Fall meeting of the Philadelphia Retail Jewelers' Association was held last Monday evening at the rooms of the Philadelphia Jewelers' Club, under the direction of the Pennsylvania Retail Jewelers' Association. Ira D. Garman, president of the association, presided.

The principal topic discussed at this meeting was the illegitimate retail selling on the part of some of the wholesale jewelers and silversmiths to consumers which must necessarily reduce the sales of the retailer. For some time it has been the desire of the retailers to get together and thresh out the various complaints in the local districts that certain wholesalers were abusing their privileges, and it was not until the meeting of Monday evening that a resolution was adopted proposing that the association take action in the matter of illegitimate retail selling on the part of wholesale jewelers and manufacturing silversmiths.

The resolution discussed was referred to the executive committee, which consists of J. P. Archibald, chairman; Charles Hambly and R. S. Seltzer. It was the sense of the meeting that the matter be settled satisfactorily and amicably to all those con-

cerned, and that the main object of the retailer was to work in harmony with the wholesaler.

The meeting was largely attended and was voted one of the most successful of its kind. Regular monthly meetings will be held at the Jewelers' Club hereafter. During the evening a publicity committee was appointed. E. J. Berlet and Charles H. Hambly will act on this committee.

President Garman of the Pennsylvania Retail Jewelers' Association announces his committees for 1909-1910 as follows: Trade Interests—Steel F. Roberts, Pittsburg, chairman; Edward Keller, Allentown; J. E. Berlet, Philadelphia. Qualities—Wm Gibbons, Philadelphia, chairman; Will K. Rebert, York; F. C. Bode, Jr., Philadelphia. Legislation—A. C. Graul, Sharpsburg, chairman; E. L. Rinckenbach, Harrisburg; W. W. Fisher, Sunbury. Membership—F. I. Davis, Philadelphia, chairman; O. F. Heineman, Pittsburg; Robert T. Garman, Tyrone. Deceased Members—J. P. Steinmann, Pittsburg, chairman; Thos. J. Apryl, Johnstown; E. J. Faust, Allentown.

Brooks Assault St. Louis Jeweler in Unsuccessful Attempt to Rob Him.

St. Louis, Mo., Sept. 25.—Two robbers entered the store of Washington Volker, 225 Easton Ave., at 1:30 o'clock Thursday afternoon, and attacked Mr. Volker, striking him on the head with the butt of a revolver, but were frightened away before they could steal anything.

Mr. Volker was alone in the store when the men entered. They said they wanted to see some rings. Mr. Volker instead of setting a tray before them took out a single ring set with a ruby, and showed it to them. One of them then said he wanted a diamond ring.

As Mr. Volker was leaning over to take another from the case, one of the men struck him on the side of the head. Volker thought the show case to keep from falling and staggered back against a wall cabinet. He was stunned but not unconscious and was able to call loudly for his son, Washington Volker, Jr., who was upstairs.

The robbers heard the son running down the stairs and ran out of the store. The young man pursued them west on Easton Ave. One of them made a motion to draw a revolver, but young Volker did not stop. They turned into Cardinal Ave., dodged through a yard and escaped.

Mr. Volker, Sr., had a cut three inches on the side of his head, but the skull was not fractured. The police have been given a good description of the robbers.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C. Sept. 22.—The following were the exports of jewelry, silverware, optical goods, clock, watches and kindred lines from the port of New York or the week just ended:

- Buenos Aires: 8 cases plated ware, \$1,020; 10 cases clocks, \$285.
- Cape Town: 4 cases plated ware, \$121; 49 cases clocks, \$1,079; 3 cases scopes and views, \$174; cases watches, \$163.
- Copenhagen: 2 cases watches, \$125.
- Hamburg: 2 cases optical goods, \$113; 3 cases watches, \$2,539.
- Havana: 4 cases optical goods, \$1,197; 6 cases plated ware, \$235; 2 cases optical goods, \$144.
- Liverpool: 22 cases clocks, \$810.

- Valparaiso: 2 cases watches, \$170; 12 cases clocks, \$498.
- Vera Cruz: 4 cases plated ware, \$400; 13 cases clocks, \$215.

Paducah, Ky., Jeweler Files a Voluntary Petition in Bankruptcy.

PADUCAH, Ky., Sept. 22.—Louis Pollock, trading as A. Pollock in the retail jewelry business in this city, has filed a voluntary petition in bankruptcy in the United States Court here. The schedules show liabilities

of about \$2,000, while the nominal value of the assets enumerated aggregate \$2,300.

The business for some time has been run under the name of Ada Pollock, wife of Louis Pollock and has been making little headway for a year or more. The failure did not come as a surprise to his creditors as payments have been slow for some time. Many claims have been in attorney's hands for collection. The trouble is believed to be due to the fact that the assets of the business, while valuable, were not easily turned into cash.

Assignee of D. R. Child & Co., North Swansea, Mass., to Sell Plant at Public or Private Sale.

PROVIDENCE, R. I., Sept. 25.—A meeting of the creditors of L. P. Sturtevant, doing business as D. R. Child & Co., manufacturing jewelers, at North Swansea, Mass., was held a few days ago at the office of James F. Phetteplace, the assignee, in this city, and was well attended. The entire situation was discussed at great length and the assignee announced that it was his intention to sell the plant at either private sale or public auction as soon as arrangements could be made. The proposition was in accordance with the views of the creditors, although Mr. Sturtevant is understood to have pleaded for a little time in order that he might see what means he could raise, so that he might make an offer in settlement.

The statement of the firm's affairs, issued by Assignee Phetteplace, was studied with considerable interest. It is as follows: The assets, not mortgaged or hypothecated, include real estate, manufacturing plant, estimated, \$5,000; personal property at plant, as appraised, \$9,023.90; accounts receivable, not exceeding, \$1,000; total assets, \$15,023.90. The liabilities—unsecured, or where security is not equal in value to the indebtedness sought to secure—are: Bills payable, \$41,090.49; accounts payable, \$3,873.99; taxes, \$281.09; labor, \$402.77; total, \$45,648.34.

Hull, Pierpont Corporation.

ventor of a clockwork motor used in a graphophone. He also invented the dupli-cating machine used for transferring wax cylinder records from a master record to a blank at very small cost.

Patrick F. Ryan, for many years in the employ of factory "N," International Sil-ver Co., Meriden, and a well known citizen of that place, died on the morning of Sept. 20 at his home, 122 Hobart St., after sev-eral weeks' illness. Death was caused by a complication of diseases. The deceased was a member of St. Joseph's Church and of the Silver City Council, Knights of Columbus.

Pacific Coast Notes.

C. W. Wickersham, Bakersfield, Cal., has returned from a business trip to New York.

A. W. Schleyer, Arbutle, Cal., has de-cided to close out his business at Calistoga, Cal.

George Jordan, formerly in business in Redlands, died recently in southern Cali-fornia.

C. H. Renner, Arcata, Cal., has removed his store from that place to Blue Lake, Cal., and will begin business there shortly.

The many friends of C. Sieghold, Salinas, Cal., will be interested in learning that he has entered the political ring, hav-ing been appointed Councilman of that place.

Harry Pierce, Salinas, Cal., who is in the jewelry business with J. Gordino, is now in the east and will spend a three weeks' va-cation in Chicago. He will be absent from Salinas about five weeks.

M. J. Kaliher, Whittier, Cal., and Miss Charlotte S. McCormick, Lanker-shim, Cal., were married recently at the home of the bride. Mrs. Kaliher was for-merly a teacher in one of the grammar schools of Whittier.

Kyle McBratney, El Centro, Cal., has be-come interested in the possibilities of Cal-lexico, and has decided to establish a branch store there. A safe and show cases have been shipped, and the new store will be ready for business some time during the course of the present month.

The American Jewelry Co., Bakersfield, Cal., is making extensive improvements in its store at that place, the changes includ-ing an entirely new store front, a concrete floor, steel paneled ceiling, a large vault, new furnishings and a manufacturing room. This latter department is to be made a spe-cial feature of the business, and it is ex-pected that when it is finished 15 men will be given employment.

Market Prices for Silver Bars.

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

	London	New York selling price, 1909 Basis.
Sept. 21.....	23 3-4d.	\$0.531 1/2
" 22.....	23 11 16d.	53 1/2
" 23.....	23 11 16d.	53 1/4
" 24.....	23 11 16d.	53 1/4
" 25.....	23 11 16d.	53 1/4
" 27.....	23 5-8d.	53 1/4

The Vincent Jewelry Co., Tampa, Fla., moved recently from its old location to at-tractively furnished quarters at 1322 Frank-lin St.

Connecticut.

M. W. Hill, New Milford, reached home, last week, after touring the southern Berk-shires.

Work is being rapidly completed on the foundation for the two-story brick building to be used by the Rogers Silver Plate Co., in Danbury. The building is being erected on Rowan St.

The large brick addition to the move-ment department of the E. Ingraham Co.'s factory, Bristol, is now practically com-pleted on the outside, and the work of in-stalling the machinery has been begun.

George D. Munson, manager of factory "H," International Silver Co., Wallingford, was recently elected secretary and treas-urer of the League of Connecticut Golf Clubs, to succeed R. P. Curtis, of Bridge-port.

The recent election of Thomas H. Mc-Donald as a director of the American Graphophone Co., Bridgeport, recalls the fact that Mr. McDonald was the first in-

Special Order Work

Special order work is profitable if proper material is at hand to carry out the ideas and wishes of critical customers.

In addition to our large stock of American and European cut precious and so-called semi-precious stones, we carry an assortment of rough gems from which we can readily cut odd sizes and shapes and so fill practically almost any order.

The ownership of American gem mines and a large modern lapidary shop place us in a unique position to serve the trade.

Upon request we will send a list of the stones we cut and carry in stock.

News Gleanings.

Geo. M. Harker is no longer at Waverly, Ia.

A. D. Wycoff, Villisca, Ia., has retired from business.

J. C. McMannis has retired from the field at Ackley, Ia.

H. A. Vogel has retired from the business at Newell, Ia.

J. F. McSwen makes his headquarters with W. N. Boynton, Manchester, Ia.

Leander H. Tomner, Red Oak, Ia., is succeeded by C. C. Tomner, Portland, Ore.

H. F. Gamenthaler's store, Cass Lake, Minn., was recently looted of fountain pens, watches and jewelry.

The jewelry establishment of A. S. Venen, Forest Grove, Ore., was sold, recently, to E. S. Booth, Portland.

J. J. Skaug, who came from Minot, N. Dak., will soon open a jewelry store at 204 Central Ave., Minneapolis, Minn.

J. N. Bartholomew, of Livingston Bros., Yankton, S. Dak., spent a short time at his home in St. Cloud, Minn., recently.

Bissell & Co. have secured a nine years' lease of the building at 1207 G St., Washington, D. C., and will move there about Jan. 1.

Dahl & Fredin, 2409 Central Ave., Minneapolis, Minn., are installing machinery for repairing and manufacturing all kinds of jewelry.

Jewelry stock amounting to \$50 was stolen from the store of C. W. Webb, DeWitt, Mich., recently, by burglars, who picked the door lock.

S. S. Stacey, jeweler and optician, has moved from Minot, S. Dak., to Whitefish, Mont., where he recently bought out the stock of J. A. Robinson.

S. Doman, Spring Valley, N. Y., has opened a branch store in Suffern, N. Y., where he has secured quarters in the Beers building, on Lafayette Ave.

David Rust, Whiting, Ia., has closed out. F. M. Whisman, of that place, no longer carries jewelry, and A. J. Pooley, druggist, has added a stock of jewelry.

A large rock was hurled through the show window in the store of J. Levin, Pueblo, Colo., recently, and about \$100 worth of stock was stolen. There is no clue.

Paul Seligman, of the firm of Hyman & Seligman, retail jewelers, Syracuse, N. Y., died on the morning of Sept. 28 of tuberculosis. He was a young man only about 30 years old and is survived by his father and mother.

According to Consul-General R. E. Mansfield, Switzerland exported to the United States in 1908 watches and clocks valued at \$839,565, while this year the same country exported material of that kind amounting to \$979,714.

Members of the trade heard with deep regret the news that Jesse L. Browne, a well-known salesman and southern representative of M. Sickles & Sons, Philadelphia, Pa., had died at Richmond, Va., Sunday evening, Sept. 26.

Frank Schlamp, Des Moines, Ia., is enlarging the floor space in his store at Sixth Ave. and Locust St., by taking out some of the partitions. The interior of the

store will be redecorated and tile flooring and new fixtures installed.

A. A. Exley, formerly manager for G. W. Pipes' store at 314 Main St., Morgantown, W. Va., has bought out Mr. Pipes' business here, which is the largest jewelry establishment in this section. Mr. Exley continues the business in his own name as successor to Mr. Pipes.

The Parritt Jewelry Store, Des Moines, Ia., has been succeeded by the Louis Van Sickle Co., formerly of Oskaloosa, Ia. The formal opening of the new establishment will take place in the near future. The interior of the store will be thoroughly remodeled and equipped with new fixtures.

H. J. Homrich, Huntington, W. Va., has erected a street clock in front of his establishment. The clock, together with the stand in which it is placed, weighs two tons and measures 18 feet in height. The clock has four dials and will be lighted from the interior by electricity. The clock was made by the Seth Thomas Clock Co., Thomaston, Conn.

The Rochester (N. Y.) police were notified early last week of an attempt at burglary at the jewelry store of L. H. Kullerud, 447 Plymouth Ave. Kullerud said that he heard the noise the thieves made, and when he went to investigate he found two men trying to force an entrance through the front window of his place. They had broken the glass, and were about to succeed in their attempt, but were frightened away when he appeared. No clue was discovered.

Dec. 1, 2 and 3 have been selected by the National Society for the Promotion of Industrial Education as the days upon which to hold the annual convention. The place selected is Milwaukee. Every effort is being made to secure some of the most distinguished leaders in the industrial, legislative and educational world for addresses and papers to be delivered and read at the convention. An exhibition of trade school work from all over the United States will be one of the features of the convention. State branches of the Society have increased in number during the past year. Massachusetts and New York alone have more than 200 members each, enrolled on their lists. The Society has just issued its Bulletin No. 9, which contains all the addresses delivered at the last annual convention, held in Atlanta.

Trans-Atlantic Voyagers.

FROM EUROPE.

Irving Baum, New York, returned on the *Kronprinz Wilhelm* yesterday.

Michael De Simone, of F. De Simone, Son & Co., New York, returned Saturday on the *Perugia*.

Simon Frankel, of Joseph Frankel's Sons, New York, returned on the *Kaiser Wilhelm II.* last week.

B. Konijn, of Konijn, Frank & Shire, New York, returned on the *Nieuw Amsterdam* Monday, of last week.

TO EUROPE.

L. P. Kadison, of Fra & Kadison, sails for Europe to-day on the *Lusitania*.

Lee Reichman, of Reichman Bros., New York, and Wm. Naigles, New York, sailed on the *Kaiser Wilhelm II.* yesterday.

Trade Gossip.

Comrie & Brockaw, the jewelry auctioneers, 14 Maiden Lane, New York, report business "looking up." They say this is the most successful year they have ever had, and they have booked some important sales for the Fall.

Shaw, the jeweler, 32 W. 34th St., New York, is sending out attractively printed cards, three and one-half inches by six and one-quarter inches, bearing on one side the programme of the Hudson-Fulton Celebration and on the other side an original collection of witticisms printed under the caption, "The Passing Show."

The New England Watch Co., Oct. 1, will place on the market its new, improved B. B. seven-jewel movement, 16-size, in 20-year gold-filled cases, jointed. In addition to the regular double-roller lever escapement, Breguet hairspring, exposed winding wheels and pallets, recoil click, this movement now has tempered steel safety barrel, cut expansion balance, cut top plate, red gilded, exposed train wheels.

An interesting exhibit at the Alaska-Yukon Exposition is made by Jos. Mayer & Bros., Seattle, Wash., who manufacture about 12 dozen sterling silver spoons every day, in the presence of spectators. The bar silver is melted into ingots, which are four inches wide, 10 inches long and three-quarters of an inch thick. The ingots are rolled into sheets, and the blanks cut from these sheets are graded, stamped, trimmed and polished before the onlookers. The process of manufacture is greatly enjoyed by all.

An effective means of stimulating the sale of watches by retail jewelers has been devised by J. T. Montgomery, manager of M. A. Mead & Co., New York and Chicago. The jeweler simply offers two prizes for the oldest two Elgin, Waltham or Howard watches in actual service in the town in which the jeweler is located. One prize is given for a man's watch and another for a lady's. The scheme is advertised extensively in the local newspapers and appropriate cards are placed in the show window, together with some of the watches submitted, the owner's name and available historical data relating to the timepiece. The prizes should also be exhibited. Any prominent citizen and one of the local editors should be designated as the judges of the age of the watches, although the concern has offered to co-operate with them in rendering any needed assistance. When the winners are selected they are to be displayed in the window with their history and cost. At the same time may be shown what the same amount of money will buy at the present time. M. A. Mead & Co. have published a set of snappy window cards and have had prepared by experts several catchy advertisements especially for the "Veteran's Contest." Only one jeweler in each city is being supplied with the matter.

A. E. Storey, Lochart, Tex., has completed arrangements to move to San Antonio, Tex., where he will reside permanently in the future.

M. A. Gray, Plymouth, Mass., has purchased a store in East Bridgewater, in the same State, to which place he will move in the near future.

Philadelphia.

Frank Tyack, Reading, is busily engaged renovating his store.

Percy Savory, with the Wadsworth Watch Case Co., was in town last week.

William Norton has resigned his position with J. Hand, a Cape May jeweler.

Charles M. Schlack, 2508 Frankford Road, has removed to 502 Main St., Darby, Pa.

Eugene Seydel has removed from 485 S. Broad St. to 440 S. Broad St., Trenton, N. J.

E. Weinmann, a local wholesale jeweler, will establish himself soon in the Burd Road building.

A. G. Lee, representing the E. Howard Watch Co., was a visitor to the trade during the week.

Fred Hurlburt, of H. O. Hurlburt & Sons, is planning an auto trip to Boston and the Adirondacks.

David Hillerson, 127 S. 8th St., will attend the Hudson-Fulton celebration in New York, next week.

Paul Gesswein, representing W. H. Dixon, Inc., New York, was a visitor to this city during the week.

Max Einhorn, watchmaker for M. Sickles & Sons, is the guest of friends on a motor-trip along the Delaware.

R. T. Chapman, of Atlantic City, will accompany the Morris Guards to the Hudson-Fulton celebration, New York.

M. K. Loudenslager, Souderton, Pa., is remodeling his store; a number of new show cases have been installed.

F. Friedeberg, 1516 Atlantic Ave., Atlantic City, has started on a business trip to New York and Providence.

Robert Richie, watchmaker for A. H. Hadley, is entertaining his brother, who has recently arrived from Denver, Colo.

Sol. Goldsmith, of I. Goldsmith & Son, Reading, Pa., was a recent visitor to this city, combining business and pleasure.

Allen Barry, son of Fred Barry, of L. Stern & Co., Providence, R. I., had his nose broken while playing football last week.

C. Schirn has resigned his position as watchmaker for C. K. Smith & Son, and is now connected with J. E. Caldwell & Co.

Otto Donath, son of H. Donath, jeweler, 446 Kensington Ave., has accepted a position with A. Nelson, 834 Broadway, Camden.

B. F. Frischer, of M. Sickles & Sons, will go to Chicago Oct. 1. During his stay in Chicago he will take a course in physical culture.

Nathan Simon, representing A. Simon & Sons, jewelers, 135 S. 13th St., announces his engagement to Miss Alice Adler, of Baltimore.

Ralph Appel, formerly connected with the jewelry section of J. E. Caldwell & Co., has taken a position with Z. J. Pequignot, 1331 Walnut St.

The regular monthly meeting of the Association of Wholesale Jewelers of Philadelphia took place Monday evening at the jewelers' Club.

F. C. Maag, retail jeweler of Bridgeport, has opened a new jewelry store in Conshohocken, where he expects to reside with his family permanently.

Prof. John Wieder, formerly with E. J.

Wieder, Jr., jeweler, Pemsburg, Pa., has accepted the position as principal of the West Point Public School.

F. B. Wallen, of Camden, N. J., has been nominated for secretary of the Business Improvement Association, election for which will take place Oct. 2.

Chief Bender, who played so skilfully against the Tigers last week, was presented, after one of the games, with a diamond pin by John A. Ross, a prominent local jeweler.

Mrs. A. A. F. Williams, who has assumed the management of her late husband's business in Trenton, was a recent local visitor, with her assistant, Mrs. D. V. Biles.

C. S. Kepner, Chester, Pa., and Asbury Park, has disposed of his Asbury Park store to George E. Moyer, of Trenton, N. J. The old employes will be transferred to the Chester store.

The stock and fixtures of William Waltz, jeweler of Perkasio, Pa., were sold last week to George Weidenhofer, watchmaker for the trade, who will eventually start in the jewelry business.

George Hurlburt, of H. O. Hurlburt & Sons, has just returned from a western trip and reports business good. George Morrill, representing the same house, is back after an extended business trip through eastern Pennsylvania and Maryland.

While cleaning the windows of H. O. Hurlburt & Sons' store Daniel Casey recently met with a most painful and serious mishap. The ladder upon which he was standing slipped and threw the boy against the broken window, almost severing his hand by the force of the fall.

A. M. Yeakel, jeweler, and William Yeakel, Jr., optician, Perkasio, have moved into their newly remodeled store, which gives them three times the space of the old store. The new store is modern and up to date and thoroughly equipped for all requirements of an ideal jewelry and optical shop.

An attractive window display was shown by Bailey, Banks & Biddle Co. last week. Various campaign medals, made expressly for the Government by this house, representing China, Cuba and the Philippines, were seen to advantage because of the background, which was in the form of a very handsome banner made for the medal of honor legion.

An interesting sale of furniture, statuary, art objects, paintings, diamonds, jewelry and silverware, formerly the property of Henry Doring, of this city, took place last week in the Philadelphia Art Galleries, at 15th and Chestnut Sts. The bidding was lively throughout the sale. Among the bargains offered were two pairs of Japanese silver inlaid porcelain vases, which were practically given away for 81 cents. A bronze bust of an Arab sold for \$4.

The following jewelers were visitors to this city during the week: C. C. Vogt, Allentown, Pa.; George Prett, Oxford, Pa.; L. Goldsmith, Stern Bros. & Co.; M. Sweet, R. F. Simmons Co.; J. Gleason, Waltham Watch Co.; George A. Bowen, of T. H. Bowen & Co., Bridgeport, N. J.; O. O. Stillman, New Brunswick, N. J.; Frank White, Weatherly, Pa.; John MacPherson, Mauch Chunk, Pa.; S. M. Naamee, Atlantic City, N. J.; D. H. Krouder, North Wales, Pa.; H. S. Kratz, Souderton, Pa.; H. B.

McFarlan, East Downingtown, Pa.; Roland Oliver, Burlington, N. J.; Fred Pfleger, Trenton, N. J.; J. A. James, Swedesboro, N. J.; E. K. Kerper, Pottstown, Pa.; E. S. Gehman, Bally, Pa., and E. Smith, Mauch Chunk, Pa.

Ira D. Garman, retail jeweler of 101 S. 11th St., with C. H. Docker, has purchased the manufacturing plant, machinery, tools, dies, etc., of the late Jacob Bennett & Son, 1026 Chestnut St. Mr. Docker, who served many years with the late Mr. Bennett, will have entire charge of the factory. The firm will be styled the Philadelphia Jewelry Mfg. Co. and will sell exclusively to the trade. Diamond mountings, platinum work and repairing will be a specialty with this house.

Newark.

The Woolfe jewelry store has just been opened at High St., Elizabeth, N. J.

George D. Davidson, Jersey City, N. J., is on a trip to the northwest and will visit the exposition at Seattle.

George R. Howe, of Carter, Howe & Co., was the presiding officer at the Governor Fort rally in Newark last Wednesday night when the Governor made an address.

Alling & Co. are sending out notices to all the firms with which it does business that on May 1 next it will discontinue its New York office entirely and will do all its business in Newark.

Many of the Newark factories closed earlier than usual Saturday morning to give their employes an opportunity to see the first parade of the Hudson-Fulton celebration. The stores also closed earlier.

John Beichk, who conducts a jewelry store at 503 Market St., reports that his stock escaped serious damage during the fire which burned part of his store recently. The firemen prevented the blaze from spreading, but damage to the extent of several hundred dollars was done to the building.

A daylight robbery took place at noon, Tuesday of last week, at South River, N. J., when the jewelry shop of Emanuel Gershuny was entered while the owner was at dinner and robbed of \$1,400 worth of jewelry, including three trays of rings, one of watches and another of solid gold cuff buttons. Gershuny had left the back door unlocked when he went away.

Henry J. Witte, a clerk employed in the jewelry store of George J. Busch, Springfield Ave., has identified George A. Ryan, now in prison in Buffalo for jewelry thefts, as the man who entered the store in August and disappeared with a diamond ring. The identification was made through a photograph.

Vice-Chancellor Stevens has reserved decision in the case of Robert Jourdan against Burstow, Kolmar & Co., manufacturing jewelers. Jourdan claimed the firm secured some of his property through his signing it over to them when in an excited condition. He was told, he said, that he was guilty of theft, and in the excitement which followed the charge signed a paper, which was in effect a transfer of property for the goods which it was alleged he took. He denies his guilt and now asks that the transfer be annulled.

(Established a Quarter of a Century)

54 Maiden Lane - - New York

D. E. D. McMURRAY, President

JOHN W. SHERWOOD, Vice-President

LOUIS J. MONTAGNON, Secretary-Treasurer

Pittsburg.

Mr. and Mrs. R. H. Wolf, Smithton, were in Pittsburg, last week, on a buying tour.

George S. Dunbar, who went east several weeks ago on a business and pleasure trip, has returned to Pittsburg.

C. C. Marsh, of the Marsh, Brown & Maher Co., who has been ill for several weeks, is gaining in weight and in strength.

O. A. Duppstadt has opened a jewelry and optical establishment at Vandergrift, Pa. He will pay special attention to the optical business.

W. J. Sample, of the J. C. Grogan Co., will erect a handsome home on a lot in Men Avon, at Brighton Road and Forest ave., which he has just bought for \$10,000.

The clubs comprising the Jewelers' Duck-Club League opened their season Monday night at the Harry Davis alleys and a large number of jewelers were present at the event.

Guy Hutchison, Kittanning, has returned to his home, after making an extensive automobile trip. He first went east, touring New York and other eastern States, and then went as far west as Omaha. He greatly enjoyed the tour and the out-door life which it afforded.

Gillespie Bros. recently added three new salesmen to their already large force, because of an increase in business and because of the confidence that they have in the business of the future. This house has added a second private diamond room for the private display of gems to customers.

The John M. Roberts & Son Co. furnished the medals awarded by a Pittsburg paper at the water sports contest given a few weeks ago on the Allegheny river at Pittsburg. The same house has been making a large window display of diamonds during the last few days and advertising them extensively in the newspapers.

C. S. Wiley, secretary of the Pennsylvania Retail Jewelers' Association, received a number of names of Philadelphia jewelers, new members in the association who met Monday night of last week with the Philadelphia division of the organization. Secretary Wiley says that he hopes to have a majority of the jewelers of the State enrolled in the association before another year has passed.

A number of out-of-town jewelers visited Pittsburg, last week, to buy goods. Among them were: A. Hepner, Masontown; B. E. Brown, Monessen; Frank Murdock, Ligonier; J. D. Thomas, Evans City; Asa Joseph, Donora; William Barbour, Midway; F. H. Hayes, Washington; Fred W. Lahan, Steubenville; Henry Blosser, New Kensington; Mrs. A. Katzenmyer, Burgettstown; E. F. Preise, Homestead; Edward Hutchison, Kittanning.

The police have not as yet been able to catch up with the men who recently swindled M. Zeisel, of 1406 Wylie Ave., out of \$1,600 in cash by feeding him "doped" candy. The money was taken from Zeisel while he was under the influence of the drug. He supposed he was going to buy a store at bankruptcy sale at Cleveland at a bargain, the particulars of which were published in THE JEWELERS' CIRCULAR—WEEKLY two weeks ago.

The R. M. Weaver gold cup, valued at

\$2,500, a description of which was published in THE JEWELERS' CIRCULAR—WEEKLY several years ago, goes to Cleveland for good. It was captured by the Cleveland Driving Club, all the racing conditions having been complied with. "Tolling Chimes," a horse owned by E. W. Devereaux, won the trophy. Local jewelers last week sold a large number of cups which were won at the matinee events held on Brunot's Island.

S. E. and C. G. Hall, of Hall Bros. & Co., who have been covering western Pennsylvania, eastern Ohio and West Virginia for their house, report an increase in trade. Miss Hazel Hall, a sister of the Hall Bros., a few weeks ago captured second prize, \$75, in the voting contest conducted by the Pittsburg Press for the most popular tradeswoman in Pittsburg. This young woman, who looks after the business of the Pittsburg house during the absence of her brothers, has been highly complimented on her success in carrying off second honors.

Canada Notes.

S. Margolin has opened a new store at 145½ Queen St. W., Toronto, Ont.

A meeting of the creditors of William G. Minaker, Wellington, Ont., was called for Sept. 28.

Harry Ryrie, of Ryrie Bros., Toronto, Ont., left last week for a three weeks' trip to the eastern States.

The Alberta Jewelry Mfg. Co., Calgary, Alta., has compromised with creditors at 50 cents on the dollar.

A. V. Elms, manager of the sterling silver department of Ryrie Bros., Toronto, Ont., has returned from a business trip to Montreal.

Out-of-town jewelers calling on the Toronto, Ont., trade last week included: E. W. Ross, North Bay; A. E. Heller, Waterloo, and Jonas Bargman, Belleville—all Ontario.

A handsome trophy for the annual Marathon road race, held at Toronto, contributed by Controller J. J. Ward, and supplied by Edmund Scheuer, 90 Yonge St., is on exhibition there, this week. This trophy is to take the place of that finally won by Longboat, the Indian runner, last Fall.

A very searching investigation is being conducted at Ottawa into the circumstances of the recent robbery of about \$3,000 worth of diamonds from McMillan's, Montreal. Several witnesses were called before the Police Commissioners recently, the most important being Chief de la Ronde himself. His examination revealed the fact that only one man was sent after the gang by the detective department.

Henry Birks & Sons, Ltd., Montreal, will not enter into actual possession of the new block of property which the firm has recently purchased at Winnipeg, at a cost of \$29,000, for some months to come. At the present time plans are being prepared to reconstruct the building, which is now occupied by the Young Men's Christian Association, and make it one of the finest jewelry houses in the Dominion.

James B. McInnes, as trustee, has disposed of the stock of A. Zierleyn, 85 Monroe St., Grand Rapids, Mich., to Benjamin Roth, Chicago.

Buffalo, N. Y.

Max Levine, a local jeweler, was recently married in this city to Miss Isabelle Aaron.

M. Clovall, a traveling representative of the Queen City Ring Co., is home from an extended business trip.

Benjamin Friedlander, representing Julius Boasberg, a diamond merchant at 384 Main St., is in New York, on a business trip.

Richard Petersen, setter for Heintz Bros., ring manufacturers, who has been ill for the past five months, is on the road to recovery.

Mrs. R. S. Panimo, who died recently in this city, was the mother-in-law of Isadore Latz, a traveling representative of the Empire State Ring Co.

Dr. H. D. Minchin, of Rochester University, will address the Buffalo Optometrical Society, at a banquet at the Lafayette Hotel, Friday evening, Oct. 1.

Valuable prizes, known as the Jesse Ketchum medals, furnished by T. & E. Dickinson & Co., were presented recently to successful pupils of the public schools.

Two timber signs fully 10 feet high and 15 feet long have been erected by the Kyrie Bros., Toronto, on the Bowen Road, a Canadian point not far from Buffalo.

Among the buyers who recently visited the Buffalo jewelry market were: Mrs. E. A. Harris, Coudersport, Pa.; C. D. Barnes, Gowanda, N. Y., and R. C. Holmes, Gowanda, N. Y.

Some improvements, including a new ceiling, new chandelier, new mirrors and other features, have been made at the jewelry store of Schutt & Petersen, 137 Genesee St., and have enhanced the beauty of that establishment.

E. V. Syrcer was a passenger in a car which recently collided with another car in Main St., in this city. Mr. Syrcer is an optometrist for Best & Co., Buffalo jewelers. Three passengers were hurt as a result of the collision, but Mr. Syrcer escaped injury.

O. Zittel and Miss L. Kaefer, both of the manufacturing department of King & Eisele, were recently married at Miss Kaefer's home. Philip DeWein, of the material and optical department of the same firm, was recently married to Miss Josephine Frey, of this city. The ceremony took place in the Church of the Atonement.

The services of skilled workmen in the jewelry business in Buffalo is in great demand at present. White, Wile & Warner, local jewelry manufacturers, are among those who have difficulty in securing experienced employes in their manufacturing department. As they have been unable, lately, to get men skilled in this line, they have been compelled to break in some boys in their plant.

The Buffalo Retail Jewelers' Association has a successful meeting at the Genesee Hotel last Friday night. There was a good attendance, and preliminary plans for a smoker to be held on the third Friday night in October were made. It was indicated from discussions at the meeting that the members of the association will play an active part in some bowling contests during the coming Winter. President William Elmann presided at the session.

We Do Not Use Pressed Blanks

Hawkes Cut Glass

IS CUT FROM THE *SOLID* BLANK

No. 1.

No. 2.

No. 1 illustrates a pressed blank, *viz.*:—the pattern pressed into the Glass.

No. 2 illustrates a solid blank, the kind entirely used by us.

The DIFFERENCE in the finished article is unmistakable, the pressed blank being devoid of lustre and brilliancy and giving one the idea of a cheap moulded article. It can easily be detected by passing the fingers lightly over the inside of the article. Wherever the cutting on the outside is deeper a slight swelling on the inside will be noticeable to the touch. Whereas the genuine article cut from the solid blank is free from all these defects, being perfectly smooth on the inside, having a lustre and brilliancy only equaled by that of the diamond, and when held to the light is as clear as crystal.

Pressed or Figured Blanks Cut Over Appeal to the Department Store Trade

WE DO NOT SELL DEPARTMENT STORES

but cater exclusively to the legitimate Jewelry trade. In return we ask for the business of the Jewelers whom we are seeking to protect by furnishing genuine cut glass (not purchasable by department stores) at prices competitive with the inferior product.

No piece of HAWKES CUT
blank is genuine without this

HAWKES

GLASS cut from the solid
trade-mark engraved on it

T. G. HAWKES & CO., Corning, N. Y.

Grand Prize Paris Exposition

Cincinnati.

E. Bengston and wife, Freeport, Ill., popped here on their return from New York, recently.

William Deters, watchmaker for William Greuer, 5 W. 7th St., has returned to business after a three months' illness.

L. H. Ford, son of D. C. Ford, Lima, is here taking engraving lessons of A. Geiger, of the Clemens Oskamp Co.

Leonard J. Fox, of the Gustave Fox Co., making the western trip instead of Mildred Fox, of this company, as was previously given.

"Al" Granducci and Charles Esberger, of Gutmann & Sons, are home from Sistersville, Va., where they spent an enjoyable time fishing.

Charles Sullivan, Converse, Ind., was purchasing goods here last week for his store, which he has completely remodeled and refitted with new fixtures.

Albert, alias "Dutch" Goldstrohm, a second of the alleged band of diamond robbers recently arrested in Parkersburg, W. Va., was convicted by a jury at that place of stealing \$3,000 worth of diamonds.

George H. Newstedt is adding greatly to the attractiveness of his store by having a balcony placed in the north end. This will give him more office room, as well as display space. Col. Ed. H. Lovell, with Mr. Newstedt, has just returned from an eastern pleasure trip.

D. Jacobs & Co. are now completely settled in their new quarters in the new Merchant's building, on 6th St. With a complete new set of fixtures and cases, and with new lines of cut glass, clocks and silverware, the concern's handsome new quarters make a very fine appearance.

Charles Hummel, of the Thoma Bros. Co., while attending the Ku-Ku bowling tournament at North Turner Hall, last week, slipped on the floor and broke his ankle. A physician was immediately called, who gave Mr. Hummel the necessary attention and reports his patient as doing well.

John J. Holland, of the John Holland Gold Pen Co., is one of the incorporators of the new life insurance company recently organized here under the name of National Life Insurance Co., and he is also a director of the Ohio Mutual Life Insurance Co., which is expected soon to combine forces with the new company.

Henry Ollinger, connected with Nicholas Ollinger, Vine and Green Sts., is in a serious condition, suffering from a fractured skull. Mr. Ollinger was driving on Vine St. last week, when his horse suddenly became frightened. The jeweler was thrown out with great force onto the pavement, thus receiving serious injury. He was taken to the city hospital, where he still remains.

It was announced in one of the local papers last week that the store room and basement of the Boylan building, 14 E. 4th St., now occupied by A. & J. Plaut, had been leased for a term of years to another party. The name has not yet been made public. Mr. Plaut says their lease does not expire until Jan. 1, 1911, and also states that they had a verbal agreement with the Boylan estate, owners of the property, rel-

ative to a renewal of the lease. He says they intend to protect their rights.

Out-of-town jewelers who were here the past week purchasing goods included: J. E. Steinkamp, Jasper, Ind.; F. L. Miller, Wilmington, O.; J. C. Meyer, Harrison, O.; A. H. Beer, Versailles, O.; M. Milsch and wife, Muskogee, Okla.; Frank Horning, Brookville, Ind.; R. S. Weaver, Miamisburg, O.; A. J. Williams, Coldwater, O.; H. S. Freelan, Seaman, O.; U. L. Jennings, Watertown, Tenn.; William Hesselbrock, Liberty, Ind.; C. A. Gossard, Washington C. H., O.; R. J. Timmerman, Batesville, Ind.; Charles Sieglitz, Vevay, Ind.; N. Sanning, Walton, Ky.; L. C. Diefenbaugh, Lewisburg, O.; William Leive, Aurora, Ind.

Cleveland.

TRADE CONDITIONS.

A better feeling prevails in the local jewelry trade than has been manifest for some time. The wholesalers are all busy with the large number of outside buyers who are dropping in every day, and reports from traveling salesmen indicate good business in the smaller towns. The local retail trade is steadily increasing in volume. Merchants are stocking heavily in expectation of a good Fall and holiday trade. The good roads convention of the American Automobile Association brought in quite a number of buyers to this city.

G. V. Dickenson, of the Elgin National Watch Co., was in Cleveland, last week.

A. A. Joliet, Franklin, Pa., is spending his vacation in Cleveland visiting friends.

E. J. G. Galley, of the Schauweker Bros. Co., is in Pittsburg, this week, on business.

J. F. Nelson, who opened a small shop on Prospect St., near E. 14th St., has gone out of business.

Walter Dueble, Canton, is traveling in the west, and expects to make an extensive tour before returning, in November.

The store of the Hutchins Jewelry Co., 9001 Superior Ave., N. E., was robbed, Sept. 20. Goods valued at about \$30 were stolen.

Frank Freeman, who was formerly in the jewelry business in Newcomerstown, O., has opened a store on E. 55th St., near Superior Ave.

Ignatius Longtin has entirely changed the aspect of his store by putting up new signs and has improved the interior by considerable redecorating.

Bamberger & Gaines are redecorating their store in a tasteful manner. A rearrangement of the fixtures will make room for several new showcases.

Mathias Masten, who has been in Cleveland for several months, has returned to Winston-Salem, N. C. He will be with Henry Voght & Son after Oct. 1.

"Joe" Blumrich, who was formerly on the editorial staff of the *Cleveland Press*, thinks so well of the jewelry business that he has connected himself with the Guyon Jewelry Co.

Messrs. C. A. Rock, of the Scribner & Loehr Co., and A. G. Johnson, of the Burrows Bros. Co., and a third party, to be chosen to-morrow, will appraise the stock of the Art Novelty Shop, in the next day or so.

A. T. Hubbard, president of the Cowell & Hubbard Co., and Mrs. Hubbard are in New York. Their daughter, Marguerite, re-

turns from Europe, this week, and they will meet her.

The Conn Jewelry Co. has just opened a store at 670 E. 105th St., near St. Clair Ave. J. A. Conn, who was formerly in the jewelry business in Bowling Green, Ky., is the head of the new house.

The wife of L. C. Blossom, of the Sigler Bros. Co., who recently underwent a dangerous operation, was taken to her home, last week. While the operation was successful, Mrs. Blossom will be confined to her home for several months.

The Cleveland Credit Men's Association will take up the matter of an elastic currency at the October meeting. It is the intention to conduct a campaign of education, using both the local and national bodies as a nucleus for spreading knowledge on this subject.

Geo. Wickmiller, Albion, Pa., was in town, last week, with his brother, Henry, who hails from Oklahoma. Henry spent a week or so in Albion taking in the sights and then they came to Cleveland together. The local boys here did their best to make things interesting for Messrs. Wickmiller.

J. C. Knittle, formerly of Knittle & Longtin, recently opened a shop on W. 25th St., opposite the Majestic Theater. Mr. Knittle is well known on the West Side, having been in business there for 18 years, and his friends believe his present location to be an ideal one. He has ordered several new cases to take care of stock bought for delivery this Fall.

The following out-of-town jewelers were in, this week, to buy: C. F. Hill, Akron; C. A. Austin, of Austin & Younglove, Greenspring, O.; Alvin Kintner, Painesville; G. L. Gunther, Bellevue; Nelt Barr, Ashland; E. H. Holter, Canton; E. D. Davis, Kent; Dr. M. J. Cohen, of the Mt. Clemens Jewelry & Optical Co., Mt. Clemens, Mich.; F. M. Prevey, Akron; C. F. Elgin, Kent; Henry Wickmiller, Albion, Pa.

Pacific Northwest.

Frank Andrews is preparing to open a store at Farmington, Wash.

K. S. Mueller, Bellingham, Wash., has taken a partner in the jewelry business in the person of E. F. Harpst.

The new store of W. C. Schuneman, on 8th St., adjoining the First National Bank, Hoquiam, Wash., was opened to the public, last week.

The Booth Jewelry Co. has been incorporated at Salem, Ore., by C. S. Orwig, E. S. Booth and Mae Booth. The capital stock is placed at \$25,000.

The Mountain Gem Mining & Development Co. has been incorporated to do business at Joseph, Ore. The capital stock is placed at \$2,000,000. The incorporators are Thomas P. Adams, Floyd Green and Margaret A. Sheets.

E. D. Gilmore, of the E. D. Gilmore Co., was a member of the committee in charge of the grange fair, held recently.

Maxwell & Berlet, Philadelphia, Pa., are increasing business by distributing to their customers handsome score cards for the games of the University of Pennsylvania season of 1909.

GORHAM SILVER

¶ Claiming merchandise to be a little better than any other is not sufficient to a discriminating public. Claims, to be convincing, must be backed by the merchandise.

¶ There is no silverware for which so many claims can be made, *and backed up*, as Gorham silverware.

¶ The Gorham trade-mark is so well known as the mark of highest excellence in silverware, that it carries with it greater significance and trade value than any other.

¶ All the prestige that can be afforded by three-quarters of a century of recognized pre-eminence, belongs to the Gorham Company.

¶ Each production is the result of months of study by an expert designing department with every facility and under a competent head.

¶ In both artistic effect and technical detail, each article is correct.

¶ Gorham silver is placed in the hands of the retailer at the lowest price consistent with individuality of design and with strict integrity of material and workmanship.

¶ Popular demand for Gorham productions so far surpasses that for any other make that jewelers the country over who carry Gorham wares do not lose sales.

Production of Gems FOR many years by United States the gem and in 1908. jewelry trades have annually looked forward to the report of the production of precious stones issued by the United States Geological Survey, which they have not only read with interest when issued, but kept for future reference, as this is about the only work published, which gives an adequate idea of what the United States produce each year in the line of precious stones and gem material.

Through the courtesy of the Survey THE JEWELERS' CIRCULAR-WEEKLY, for many years, has been enabled to publish in advance of the annual report of the department on "Mineral Resources of the United States," the full text of that chapter relating to the precious stone production, and though this always continues over many issues, we feel safe in saying that there is not one installment of the report published that has not been of interest to some members of the trade, or contained features that they wished to file for future reference.

With this issue begins the publication of the report of the Survey's precious stone report for 1908, which is compiled by Douglas B. Sterrett, and which will be found to be as complete and interesting as any of its predecessors. The report covers the production of precious stones for the calendar year of 1908, and indicates that the gem mining industry did not suffer proportionately with the other business industries from the recent financial depression; for while there was a slight falling off in the total product mined (from \$471,000 in 1907 to \$415,000 in 1908) the total was above the average of the previous years. While some gems showed a drop in production, others showed a distinct increase. Among those showing a decrease in the output are sapphires, which dropped from \$229,800 in 1907 to \$58,397 in 1908. On the other hand a corresponding increase was shown in the production of tourmaline is also again large, amounting to about \$90,000, a slight increase over that of the previous year. In his introduction, Mr. Sterrett calls attention to the increase in the demand for all varieties of matrix stones, particularly minerals having bright blue and green colors.

As will be seen from the first installment of the report, which begins this week, Mr. Sterrett takes up the gem materials alphabetically, and not according to their mineralogical groups. The installment this week deals with agate, amber, amethyst, azurmalachite, malachite, etc., beryl, aqua marine, etc., calimne, californite, chryso-prase and datolite, while the next installment will be devoted principally to the diamond production of the world. The report will be continued weekly until it is completed.

Avoid Unnecessary IN the development of our civilization, Litigation. appeals to the court have gradually taken the place of appeals to brute force whenever it is necessary to settle differences between men or bodies of men, but it is regrettable that the same hotheaded

During the nine months from Jan. 1, 1909, to date, 351,000 copies of The Jewelers' Circular-Weekly have been circulated. There is no free list. During the remaining three months will be issued over 115,000 copies. Hundreds of the leading houses are reaping the advantages of having their advertisements in nearly half a million copies a year.

tendency to rush into a quarrel shown by the fighter of old is in a way continued in the present-day tendency of men or firms to rush into litigation the moment they feel they have suffered an injury or their rights have been invaded in any way. For this reason many an unnecessary suit is started and many legal proceedings begun that have become a source of regret to the parties who instituted them.

The law's delays and the fallibility of the jury system are among the elements which keep the courts from doing justice in all cases, and, therefore, in the long run the litigant who can get substantially all or a large part of what he demands, without trial, loses by appealing to the courts. This, of course, applies only in legitimate disputes, where no principle is involved, because he who is fighting for a principle recognizes and should recognize neither the cost nor the gain, as he seeks the establishment of right for right's sake and not for his own. There are, of course, many occasions in which a man cannot obtain justice or recognition of his rights unless an appeal be made to the courts, but unfortunately, the tendency is too often to make these appeals not so much to right an actual wrong as a fancied wrong, or to obtain revenge or satisfaction for the wounding of one's pride.

Many instances of foolish and unnecessary litigation in the jewelry trade come to us from time to time, where had the litigants given cool deliberation to their differences or even sought the suggestion or advice of a disinterested third party their differences would have been quickly adjusted and probably the same result obtained as will eventually come from the court, without the loss of time and the expense of the attorneys. But of all the unnecessary and dangerous appeals to the court, the one which the jeweler should guard against most is that of invoking the criminal machinery of the law on matters growing out of a contract or debt unless he has had competent advice to the effect that the law has been violated and that a prosecution can be sustained.

It is unfortunately true, as charged by one of the judges of the Court of General Sessions, New York, in his address to the grand jury, that merchants are prone to invoke the prosecuting machinery of the State for the ultimate purpose of collecting a civil debt or of revenge because such debt has proved uncollectable, and charges of larceny are constantly made where the crime is at the most constructive or criminal intent is practically absent. Such charges are not only useless but dangerous,

because as a rule the prosecuting authorities will have little to do with them, and they are pushed, it is done in a half-hearted way. Also where convictions are not obtained, the plaintiff may find himself sued for damages, false arrest or imprisonment and the fact that the proceedings were brought in an attempt to collect a civil debt will always militate against the merchant when he is sued on the false imprisonment charge.

What is more, the tendency to use criminal courts to obtain satisfaction of civil debt has caused the courts and district attorneys to "bend over backward" as it were, and often fight shy of taking charges of larceny that are clearly proper subjects of prosecution, simply because they fear that an element of civil debt may lie in the case somewhere. In this way the mercantile interests are often put to a disadvantage.

On the other hand, where an actual crime is committed or attempted the merchant is not only safe in prosecuting, but is bound by duty to do so, and he will be sure to get co-operation from the prosecuting authorities and the judges of the courts, but he must remember that a criminal prosecution is started for the punishment of the thief and to protect society, and may in no way be used for the purpose of forcing restitution; it is a case by the State against the defendant, and the complainant may easily be saved from a suit for damages if he has proper cause to suspect that a crime has been committed and has started the prosecution to protect himself or society and not for profit to himself.

North Attleboro.

Several local firms are busy turning out North Pole souvenirs.

K. Lucius Taylor is home from a western trip in the interests of Riley & French.

Fred Bishop, of the Bishop Chain Co., has moved into his new residence on Grant St.

S. G. Mandalian left, last week, for a short business trip in the interests of his firm.

William L. Weise, New York, was in town, last week, calling on the local manufacturers.

George Horton, an employe of the G. K. Webster Co., had his finger cut severely by a machine last Friday.

Robert P. Murphy, who has for the past 10 years been connected with the firm of Sadler Bros., South Attleboro, has resigned his position to accept a similar one with a Chicago manufacturer.

John E. Tweedy and E. H. Cummings representing the North Attleboro Country Club, were beaten, last Saturday, at tennis by Messrs. Chipman and McPherson, of the Highland Golf Club, of Attleboro.

The Whiting & Davis Co., Plainville, has found it necessary to establish a ranch factory in Franklin in order to keep up with the deluge of purse orders that are pouring into the office. The new branch is located in the Morse block, and the machinery includes the new mesh purse machines. The branch shop runs 24 hours a day, the force being divided into shifts which work all day and all night.

New York Notes.

Fred Greene has accepted a position as a representative of the Allison Mfg. Co., Attleboro, Mass.

Mr. Tomes, diamond expert for William Ward, 9 Maiden Lane, is confined to his home by nervous trouble.

Simon Frankel, of Joseph Frankel's Sons Co., returned from Europe Tuesday last week on the *Kaiser Wilhelm II.*

James Peacock, of Peacock, Stone & Arkham, visited the West, recently, calling at the Chicago office on his way home. A number of houses in the Maiden Lane district were closed Saturday because of Yom Kippur, the Jewish day of atonement.

Andrew C. Troy, Brooklyn, appears as a director of the corporation styled Brand & Sons, manufacturing jewelers, incorporated in this city, with a capital of \$20,000.

The Jewelers Board of Trade has sent a final dividend of 35 per cent. in full disposition in the matter of the Sherman Moody Jewelry Co., Grand Junction, Colo.

Among the eastern visitors in town during the week were Col. S. O. Bigney, S. O. Bigney & Co., Attleboro, Mass.; W. Lederer, of S. & B. Lederer, Providence, R. I.

An auctioneer will sell, Oct. 8, for United States Marshal Hinkel, a number of silver spoons and other merchandise which were seized, recently, from passengers on the *Amerika*.

Lee Reichman, of Reichman Bros., 65 Nassau St., sailed yesterday on the *Kaiser Wilhelm II.* for a visit to the European diamond markets. This is the fifth trip which Mr. Reichman has made since December.

Wallace G. Franklin, of E. I. Franklin Co., North Attleboro, Mass., and Frank Lummer, the firm's western representative, were in this city, last week, and visited the firm's local offices, at 7 Maiden Lane.

R. L. & M. Friedlander, 30 Maiden Lane, were visited, recently, by B. F. Harliss, Houston, Tex., who made his headquarters with the firm. Among other callers was H. C. Abbot, of H. C. Abbot & Bro., Birmingham, Ala.

C. V. & E. W. Miller, pearl dealers, Lomanche, Ia., were among the out-of-town visitors in this city last week. It is reported that the fresh-water pearls are not at all plentiful this year and that the prices of good goods are ranging high.

The L. E. Waterman Co. is displaying in its Cortlandt St. window an airship model, which is attracting much attention from passers-by. The same concern is exhibiting a number of pictures of Robert Peary and Dr. Cook, the Arctic explorers.

S. Solodar, a jeweler and optician formerly at 2135 Broadway, New York, announces that owing to the increase in business on Oct. 1 he will be located at 2110½ Broadway, opposite the Ansonia, where, with additional space and an eye-testing room, he will be able to carry a full line of jewelry and optical goods.

Wm. Seeman, wholesale grocer, died last week at his home, 55 Central Park West, in his 87th year. He was born in Elberfeld, Germany, and came to this country

in 1844, settling at Honesdale, Pa., where he became a manufacturing jeweler. About 25 years ago he came to New York and started the firm of Seeman Bros.

Among the out-of-town jewelers who have called at the offices of Hayden W. Wheeler & Co., 170 Broadway, during the past week were: D. B. Ryland, Lynchburg, Va.; C. A. Shinneman, Chambersburg, Pa.; A. R. Rovelstad, Elgin, Ill.; W. H. Keese, Anderson, S. C.; James W. Kight, Elizabeth City, N. C.; R. L. Keplinger, Franklin, Pa., and Mr. Davidson, of the Thomas Long Co., Boston.

Among the out-of-town jewelers in this city during the past week were: Walter H. Keese, Anderson, S. C.; C. Lenkowitz, representing the Globe Optical Co., Atlanta, Ga.; Mr. Benswanger, a department store buyer for the Siegel Cooper Co., Chicago; Mr. Bunch, of Wm. Hengerer Co., Buffalo; W. J. Adler, Atlantic City, N. J.; L. Herbert Luke, of Ambrose Kent & Sons, Ltd., Toronto, Can.; Samuel Barnett, Chicago.

An American consular officer reports that a business man in Berlin who has had business experience as an agent and knows the business methods of the country has decided to open a commission agency on Oct. 1. He is desirous of obtaining American agencies for a number of lines on a strictly commission basis from firms wishing to enter the English market, and states that he does not wish to buy any merchandise on his own account. In the list of articles he is desirous of handling are mentioned cheap watches and alarm clocks.

The Jewelers Security Alliance has received a notification from C. A. Wolf, 725 Kansas Ave., Topeka, Kans., to the effect that his store was broken into on the morning of Sept. 20 and watches and jewelry to the amount of about \$500 were stolen. The thief was captured about 5:30 A.M. the same morning by Patrolman Smith in the Union Pacific yards while making an effort to catch a freight train out of town. The goods were all recovered except a Howard watch. The Jewelers Security Alliance will pay \$100 reward to the patrolman if the thief is convicted.

According to the regular monthly statement of the Bureau of Statistics of the Custom House, the total value of free and dutiable goods remaining in bonded warehouses at this port for the month ending Aug. 31 amounts to \$41,795,032, as against \$50,147,953 on July 31, a decrease of \$8,352,921. The following figures showing the value of goods in the trade are given for the month of August, 1909: Clocks, \$27,683; watches, \$99,575; diamonds unset, \$60,107; precious stones, \$31,358; decorated china, \$63,742; jewelry, etc., \$1,809; manufactures of gold and silver, \$18,089. Compared with these figures goods remaining in bonded warehouses in the same lines for August, 1908, appear as follows: Clocks, \$19,143; watches, \$143,258; diamonds unset, \$60,107; precious stones, \$37,943; decorated china, \$259,098; jewelry, etc., \$4,037; manufactures of gold and silver, \$15,911.

According to the dispatches received in this city, last week, George A. Baker, alias Bohlsen, who is wanted for defrauding Joseph Haan, the St. Regis Hotel and the Gorham Co., has eluded the police officials

in Europe. It was supposed that Baker had gone from the *Kronprinzessin Cecilie*, but the steamer had left Cherbourg for Bremen before the officers were able to make an investigation. The steamer was held and searched, but without result. The police of Cherbourg telegraphed Bremen. It will be remembered that Baker went to the Fifth Ave. store of the Gorham Co. and represented himself as authorized to purchase about \$65,000 worth of silverware for a chain of hotels in Cuba. He placed the order, but the Gorham officials were suspicious and cabled the hotel manager in Cuba and learned that Baker had no authority to purchase for them. The silverware was not delivered, but Baker succeeded in obtaining a small quantity of jewelry for which he gave his personal check, which, it is claimed, is worthless.

The American Optical Co., Southbridge, Mass., has brought action in equity in the Circuit Court of the United States, Southern District of New York, against the Bay State Optical Co., asking for a preliminary as well as perpetual injunction against the defendant's making or selling eyeglasses or spectacles containing the new and useful improvement for which the plaintiffs claim they have the sole right under a patent. The bill recites that David Hunt Ludlow obtained the patent No. 674,974 on May 28, 1901, and that on March 29, 1909, he assigned his rights to J. E. Limeburner Co., and that on April 21, 1909, the J. E. Limeburner Co. transferred its rights to the American Optical Co. The petition alleges that the Bay State Optical Co. and Frank A. Eastman individually as agents for that company have sold eyeglasses and spectacles embodying the patent and that they continue to make and sell the same although notice has been given them. It is asked that the defendant pay on the profits obtained by reason of the said alleged infringement since March 29, 1909, and the damages sustained by the plaintiff because of this since that date, together with the costs.

United States Commissioner Gilchrist, last week, held for examination on \$1,000 bail an Italian on a charge of using the mails to defraud. The complaint was made to the postoffice officials by several persons who said they had been swindled by a concern named the European-American Transfer Co., with headquarters at 53 Leroy St. The last few weeks hundreds of Italians living in different parts of the country have received notices from the mails, each of which said that a package containing jewelry, addressed to the person receiving the notice, had been received from abroad and as duty amounting to \$1.95 had been paid on the contents it would be forwarded on receipt of \$2.95. The notice nearly always had the desired effect, and in return for the money the company sent back by express a bundle containing plated jewelry worth less than 30 cents. Postoffice inspectors investigated the matter and found the Italian with his headquarters in one room of the alleged transfer company. The postoffice officials say that the man admitted that he was sending "fake" bundles to people and

New York Notes.

(Continued from page 91.)

old that he had the names of more than 100 prospective dupes on his books and was making money rapidly.

Herman Baum, 125 Canal St., has been succeeded by Baum Bros.

C. W. Harman, of Joseph Fahys & Co., 4 Maiden Lane, has returned from a vacation at Lake Mohonk, N. Y.

A judgment of \$191 has been filed in the county clerk's office against Arthur J. Conner in favor of the Adelphi Silver Co.

Mr. and Mrs. Maurice Power, after touring Europe for six months, returned home on the *Lusitania*.

Herbert Tobias, for many years connected with the Acme Plating Works, 17 John St., has again taken up his work of calling upon the trade.

B. Konijn, of Konijn, Frank & Shire, 65 Nassau St., has returned on the *Nieuw Amsterdam* from a trip in Europe, accompanied by his family.

M. O. Nobbe, of M. O. Nobbe & Co., Galveston, Tex., has returned home after a sojourn in this city. He had been at his country residence in Canada.

J. H. Young, Fort Wayne, Ind., and M. Oppenheimer, of Louis Basch & Co., Chicago, were among the out-of-town visitors in town during the past week.

Stern Bros. & Co. closed their diamond-cutting factory for a half-day yesterday in order to enable their employes to witness the historical parade of the Hudson-Fulton celebration.

Michael De Simone, of F. De Simone, Son & Co., importers and manufacturers of coral and turquoise, 71 Nassau St., returned from Europe, Saturday, on the *Perugia*, of the Anchor Line.

E. A. Lehmann in a letter to the *New York Times* expresses his views on nickel five-cent coins as being of a convenient denomination, but advocates that they be made of aluminum, and gives many reasons why this metal should be used in coinage.

One of the points at which a beacon fire will be lighted on Saturday night, Oct. 9, for the Hudson-Fulton Celebration is at Mt. Taurus, or Bull Hill, at Cold Spring-on-the-Hudson, which property is owned by Sigmond Stern, of Stern Bros. & Co., 68 Nassau St.

A sidewalk showcase in front of the antique jewelry shop of Mrs. Amy S. Morean, opposite the Waldorf-Astoria Hotel, was opened recently and some jewelry taken. A man was arrested who gave the name of Albert Brady. He would not give his companion's name.

The creditors of Abraham S. Silverman, individually, and as a member of the firm of Silverman, King & Co., are notified that the first meeting will be held at the offices of Macgrave Cox, referee in bankruptcy, 50 Church St., Oct. 7, at 12 o'clock noon, for the appointment of a trustee and transaction of other business.

The Gorham Co. and Tiffany & Co. are among the Fifth Ave. firms whose buildings are handsomely decorated for the Hudson-Fulton celebration. The figures

holding up the large clock in the center of Tiffany & Co.'s building are draped with evergreens and bunting, in which are concealed hundreds of electric lights.

In the tournament of the Jewelers' Bowling League, last week, the R. H. Ingersoll & Bro.'s team rolled three games at the Brooklyn alleys with Joseph Fahys & Co., winning one and losing two out of three. The games were rolled Sept. 20. Wednesday night Tiffany & Co. won three straight games from the J. J. Donnelly team, and Friday night the Cross & Beguelin rollers won two out of three games from the Mumford & Galloway team.

J. Holsman, of J. Holsman & Co., Portland, Ore., was among the visitors in New York, last week, and while here called at the office of *THE JEWELERS' CIRCULAR—WEEKLY*. Mr. Holsman is the inventor of a unique souvenir spoon, the patent for which will be issued in a few weeks. The spoon contains a novel feature in the form of a bowl, with locket formation, which permits 12 local views to be inserted, which are absolutely concealed when the bowl is closed.

Letters have been sent out to all the leading manufacturers and boards of trade calling attention to an American exposition to be held in Berlin, Germany, from May to July, 1910. At the head of this exposition is a committee consisting of representative business men of the United States. The exposition is to be confined strictly to American products, and will serve to strengthen the prestige of American industries abroad. The committee, with headquarters at 50 Church St., will be glad to furnish further information.

More than \$15,000 worth of unclaimed and abandoned merchandise remaining in the care of Collector Loeb will be sold at public auction on Oct. 5 and succeeding days. A catalogue of the goods to be sold has been issued and contains 1,068 lots, covering about every article enumerated in the tariff as well as some that are not. The sale will begin each day at 10 A. M., and end at 2 P. M. The catalogue contains offerings in jewelry and kindred lines, but these are fewer than in former years. Charles A. Berrian will conduct the sale. The goods will be on view Sept. 30 and Oct. 1, between 9 A. M. and 3.30 P. M.

The store of N. Herman, 294½ Grand St., was broken into Saturday night or early Sunday morning and between \$300 and \$400 worth of goods taken. Entrance was gained to the store through the rear. The burglar took a quantity of 14-karat gold diamond mountings and some other jewelry such as was left in the show and window cases. The best of the jewelry was in a safe and was unmolested. A showcase was broken and other things in disorder when the robbery was discovered. Mr. Herman reported the matter to the police and notified the Jeweler Security Alliance. No clue has as yet developed which will assist in locating the thieves.

S. M. Moore, a manufacturing jeweler at 1368 Broadway, is the first member of the trade, so far as has been learned, to purchase an aeroplane. The one Mr. Moore has just secured is a Herring-Curtis machine, carrying a four-cylinder, 135-pound gasoline engine of 30 horse-power. The

aeroplane is 24 feet long and has two main planes beside smaller ones. The seat is beneath a rear plane and is so situated that the rear planes are controlled by a movement of the shoulders. The machine is made of aluminum wherever practicable, and is fitted with small wheels somewhat similar to bicycle wheels. Mr. Moore says that he is going to try the machine out at his home in New Jersey. The whole machine with the operator weighs about 500 pounds.

The Jewelers' Board of Trade, New York, reports to creditors that the stock of all the stores conducted by W. W. Condon, Greensboro, N. C., with the exception of that at Weldon, has been sold, realizing \$3,200, which is a little more than the appraised value. In addition to this there was sold some odds and ends of jewelry not in the stock at the time of the first sale, which brought \$160. The bankrupt had some equity in a piece of real estate in Florida which is to be sold the latter part of November. He also had several show cases which have not as yet been sold. The stock in the store at Weldon was turned over to the party who held a mortgage against it in satisfaction for the sum. As the mortgagee was willing to do this it was thought advisable by all creditors to do so, as in all probability the stock would not have been sufficient to pay the indebtedness, and the claims could have been proven up for the balance of the debt.

The new Metropolitan Life building is attracting much attention this week, not only because of the 25,000 incandescent lights which make the building visible at night for miles, but also because of the lighting of the tower clock as no big clock in the world has ever been illuminated. Electric lights and red globes flash each quarter-hour. There is one red flash on the dial for each quarter-hour, two flashes for the half-hour, three for the three-quarter and four for the hour. As the hour is struck the flash of four red lights is followed by a blinding white flash which tells the hour. Each of the dials is 26 feet six inches in diameter, and the figures on the dial are four feet high and the minute marks 10 inches. The hands are built of iron frames and sheathed with copper, weighing 1,000 pounds for the large hand and 700 pounds for the small. The large hand measures 17 feet long and the smaller hand 13 feet and four inches. The big clock and the 99 other clocks in the building are regulated from a masterclock which is tested to run within five seconds a month and which sends minute impulses to the tower clock. Electric hammers on the 42d floor on each quarter-hour rings out the chimes of the Westminster chimes. The hours are struck on 7,000-pound bells, which can be heard for miles.

Pleading guilty to stealing \$175, which he said he did in the hope of getting back to Russia to attend his dying mother and perhaps furnish the means of saving her life, Morris Starr, who was formerly a salesman in the employ of Aisenstein & Wornonock, 22 Eldridge St., sought release on the charges of larceny before Magistrate Harman in the Essex Market Court
