Vol. LIX., No. 1.

An Original Design for an Automobile Trophy.
(See Text on Page 51.)

ALVIN SILVER

The Morning Glory Pattern

A new pattern of Sterling Silver table ware of medium weight and moderate price. A most attractive and artistic pattern in French Grey finish, cut in high relief, as ornate on the back of each piece as on the front. Made in full line of fancy pieces, ounce goods and cutlery. A pattern that will meet with immediate success. Write for price list.

Fahys Permanent Case

12 Size, O. F., Thin Model, with Sunken Cap
and Elliptical Pendant

This new model is the neatest and thinnest case made for a regular model American movement. These cases should be in the stock of every Retail Jeweler, so as to take care of the demand for a small thin watch.

Our Position

on the "Diamond" assures success to our side, by which we mean success to our customers and to ourselves.

We buy the diamonds in the rough, cut them in our own cutting works, and sell them in the most economical way direct to the retail jeweler.

No matter who opposes us, we are sure to win.

Better be on our side and be perfectly safe.

We repeat — Our position on the "Diamond" assures success to our side.

STORE OF J. A. WEISS & SON, MONTGOMERY, ALA.

Conclusive Evidence That Our Catalogs Bring Results

MONTGOMERY, Ala., Jan. 12, 1909.
THE ARNSTINE BROS. COMPANY,
Cleveland, Ohio:

Gentlemen—The Catalogues you furnished increased our 1908 holiday business immensely, and am pleased to say that the benefits derived are excellent. The goods shown in the book are made by reputable manufacturers, good in style, fine sellers and your prices are right.

I believe the best results can be obtained by their continued use. Your method is a good medium for increasing business and to make the merchant's name prominent in his community.

They give the store a standing of the greatest importance, are an excellent silent salesman and strong trade pullers.

Yours truly,
J. A. WEISS.

The Catalogs sent out by this firm in 1908 were made by The Arnstine Bros. Company.

Don't Fail to Investigate Our Proposition Before Placing Your Order

TACOMA, WASH., Jan. 5, '09.
THE ARNSTINE BROS. CO.,
Cleveland, Ohio.

Gentlemen—Answering your inquiry, would say I am satisfied that the catalogues were a wonderful help to me in my December sales, and am confident my business would have been much less but for them.

There has been a great deal of complaint in this section of the Fall and Christmas trade, but I had a very satisfactory business and attribute it entirely to the catalogues.

Am looking for a big business this year.

Very truly yours,
FRANK C. HART.

The Catalogs sent out by this firm since 1905 were made by The Arnstine Bros. Company.

STORE OF FRANK C. HART, TACOMA, WASHINGTON.

We are represented in every State in the Union. If you are interested in our proposition and will notify us, our representative will take pleasure in calling on you and explaining our method.

**CREATIVE
ALERT
AND
ACCURATE**

¶ There is no counting of stitches or watching of clocks in our factory. The average maker gets his orders on a large scale—he executes them likewise: hurry-scurry, and every appliance has been adopted that facilitates speed and seals the doom of individuality by supplanting the work of the hand.

¶ We employ craftsmen that make for accuracy—not haste—our standard demands of our men, creative and alert, conscientious efforts and thoroughness. Should a day or a dollar more be needed to secure for a handsome jewel an additional feature of superiority, that time is taken—or that money spent.

¶ At our coming SEVENTH ANNUAL EXHIBITION, which takes place in our offices from August 30th to September 4th, inclusive, after careful inspection, it will be immediately apparent, the superiority of this display.

STAR WATCH CASE CO.

WARREN

The WARREN Pattern Sterling Silver Tableware must have real merit, having withstood the vagaries of fashion practically unchanged for over 150 years.

It is still in demand by those who appreciate the dignity of pure silver, nice proportion, and grace of outline.

With a family crest, or a cipher monogram, an Old English or even a plain script initial nicely engraved on its clean surface, the harmony is complete and above criticism.

Write for Catalog

The Dorothy Vernon

A NEW WHITING PATTERN
IN STERLING SILVER FLATWARE

Made in the Complete Line—Dozen
Work, Fancy Flatware, Cutlery—
Ready for Delivery September 1st.
Price Lists on Application.

IN its leading motive and the treatment of its details the new pattern is eminently suggestive of the English Renaissance designers of the 16th and 17th Centuries. It seems becoming therefore that it should be known by a name that not only recalls one of the most romantic episodes of the social history of that period, but is also intimately associated with the most significant existing example of English Renaissance Art and Architecture.

An Invitation

TO JEWELERS when in New York a cordial invitation is extended to visit the New Salesrooms of this Company.

The location, in the recently completed Silversmiths' Building, constitutes a decided vantage point in the Jewelry District.

The additions to our lines this season are the most comprehensive and complete in the history of the company. Prices run from popular commercial goods to the highest class of products.

All the interesting lines of Silver-craft are here fully and attractively displayed in such a manner as to afford most convenient inspection. And their artistic beauty, fine workmanship and moderate prices will be found amply to justify the most favorable consideration.

Jewelers will appreciate the fact that all our products are confined exclusively to the legitimate trade.

THE KREMENTZ COLLAR BUTTON

GOES ROUND THE WORLD

ITS FAME—

Wherever there are collars there are Krementz Collar Buttons. They are known the world over—the only ones that have an international reputation. With such recognition and demand, all you have to do is carry them. They sell themselves.

QUALITY MAINTAINED—

The Krementz Collar Button never disappoints. Unequaled in construction and finish, its quality always has and always will be maintained.

ASSAY—

The Krementz Collar Button does not take advantage of the elastic leeway allowed by law. There is really no reason why a solderless collar button should assay a whit less than stamped. You can depend upon it that

Krementz 14-Karat Collar Buttons will assay 14-Kt. or $\frac{584}{1000}$ Fine.

Krementz 10-Karat “ “ “ “ 10-Kt. or $\frac{416}{1000}$ Fine.

You will note that articles assaying 9 to 9½ Karat or 13 to 13½, and sold as 10-Karat or 14-Karat respectively, save the makers a profit.

ROLLED PLATE LINE—

Krementz Rolled Plated Collar Buttons and Studs are made with regular Krementz 14-Kt. stock; which is sweated, not soldered on composition base. Exhaustive tests show Krementz Plate is much heavier than is used on any other rolled-plate jewelry. Their great popularity in hot countries (where perspiration destroys ordinary goods), is largely owing to the thickness and quality of Krementz Gold Plate, similar to that used on highest quality filled cases.

NEWARK N.J.

AS the season is now at hand for sporting and athletic contests of all sorts, we wish to advise the Trade and Club Committees before deciding on cups and trophies, that we carry a full line of cups, both plain and artistic in shape and design which we offer at special low prices.

We will be pleased to furnish at all times, on short notice, designs and estimates of cups and trophies, free of charge.

Nothing is too large or too small for us.

We also carry in stock a large selection of toilet ware in all its branches for the accommodation of tourists, which we can supply on short notice.

We further extend to the Trade a cordial invitation to visit our factory and showroom should they happen in Providence during the Summer season, as we have an attractive line of new samples of hollow ware, plates, fancy pierced and engraved baskets for the Fall Trade.

ROGER WILLIAMS SILVER CO., 101 Sabin St., Providence, R. I.

To Buyers Visiting New York:

- ☞ We want you to see the many new tea and coffee sets, child's goods, small dishes, etc., that we have added to our standard patterns of Sterling Hollow Ware.
- ☞ We will therefore conduct an elaborate exhibit at the Hotel Marlborough in New York City, from August 15th to September 11th.
- ☞ We will show the most extensive line of Sterling Hollow Ware ever offered to the trade.
- ☞ The lines we offer are all bright and snappy. They are in no sense obsolete or shop-worn goods. They are inexpensive. In fact, the prices are much better than we have ever before been able to quote for goods of similar quality, design and weight.
- ☞ It is seldom we advertise prices in connection with Smith Silverware. When we do, it is a certainty that we can talk straight to the "orders" point with you.
- ☞ This is an opportunity that occurs only once in many years. You know us and our methods well enough to take our word for it as fact. It behooves you, therefore, to visit us just as early as possible.
- ☞ REMEMBER — Hotel Marlborough, New York, commencing August 15th.

VAN DUSEN & STOKES CO.
1123 Chestnut Street, PHILADELPHIA, PA.

DO YOU REALIZE what it means to manufacture gold chains of excellent quality and faultless construction and sell them at prices much below what the retailer ordinarily pays for chains of similar quality? It means that we have a well organized factory and prefer selling these chains ourselves directly to the trade, thereby giving you the benefit of what it would cost to maintain a necessarily expensive organization of traveling men.

THAT NEW CHAIN we are exploiting is solderless and flexible, without stringing, 15-inch lengths only. IT SELLS AT SIGHT.

Write for a sample.

ALOIS KOHN & CO., 16-18 Maiden Lane, New York
1850 MAKERS OF GOLD CHAINS 1909

TRADE-MARK

Cloisonne Enamel

The best selling line of Jewelry on the market. We are still the leaders in the manufacture of this beautiful class of goods. Wait for our salesmen this Fall and you will see a display of the most beautiful Enamel ever shown.

A comparison of our designs and finish is the only argument needed to sell our goods. Look over your stock and keep it full as this is a Summer as well as a Holiday line.

TRADE A 14 K MARK

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

HENRY ZIRUTH, Sole Manufacturer

Factory and Office: Murray and Austin Streets, **NEWARK, N. J.**

"SEVENINONE"

BROOCH OR SCARF PIN

Finish, Workmanship, Quality of Stock and General Appearance of any article are its main selling points, but "Seveninone" not only embraces all of these vitally important attributes, but is

A Distinct Novelty

It appeals to the consumer because

- 1 It consists of *one* mounting and seven stones.
- 2 The stones are of different color.
- 3 They can be interchanged in a moment.
- 4 There are no parts to wear out.
- 5 They take the place of seven different pins.
- 6 It is reasonable in price.
- 7 It will aid in increasing your sales.

The design of the above pins is patented, and we will promptly prosecute any manufacturer who infringes on same.

THE "EDGEWOOD" BAR PIN

¶ The "Edgewood" Bar Pin, shown above is one of our latest productions.

¶ The design is patented, and the pin will be made in fourteen karat gold only and sold exclusively by us to the finest class of retail jewelers.

¶ This means that you can assure your customers of having, in this article, a pin that will not be duplicated in an inferior grade of goods.

¶ These pins are made in four stock colors of enamel: Light Blue, Navy Blue, Black and White, but can be furnished in any color desired.

¶ We suggest an effective set, comprising two No. 1090 and one No. 1091.

¶ Upon request, we will be pleased to send a selection of these goods on memorandum.

¶ We prepay all packages: Let us prepay one to you.

Silver Bedstead Made by British Silversmiths for an Eastern Prince.

A UNIQUE production in the precious metals which has been the subject of many newspaper notes in Europe and America in the past year or so is the solid silver bedstead made for an eastern prince

"Somnus" and "The Dancing Nymphs," which are, respectively, at the head and foot of the bed. These panels are from famous pictures by Albert Moore. The four female figures represent the seasons and were modeled by Bernie Rhind, R. S. A.

The manufacturers of this unusual piece are among the most noted silversmiths as

Original Design for an Automobile Trophy.

THE design for an automobile trophy, illustrated on the front cover, was among those submitted for the New York to Seattle Automobile Race, which took place in June. It represents a cup in sterling silver, 36 inches high, to weigh 600 ounces, having a capacity of five gallons, and to be gold lined. It is designed to be decorated in repousse chasing, etching, casting and enamel.

The cup's form and decoration is based on old Russian and Alaskan Indian motifs. The upper part, or bowl of cup has an etched ornamental border containing in enamel the arms of the various countries represented in the race. On the front of the cup appears the figure of Mercury, the

SILVER BEDSTEAD MADE FOR AN EASTERN PRINCE.

by Mappin & Webb, Ltd., of Sheffield and London, England, an illustration of which appears herewith. Outside of the unusual size of the piece (which is eight by six feet and 13½ feet high, and weighs 2,723 pounds) the work has many artistic features, which called forth the best efforts of the silversmiths who produced it. Not the least of these are the two panels of

well as among the oldest of the British silver houses, the house having been founded in 1797. Mappin & Webb, who are silversmiths to His Majesty, King Edward, were awarded the Grand Prix and three diplomas of honor at the recent Franco-British Exposition. It was the late John Newton Mappin who gave to Sheffield the famous Mappin Art Gallery, opened in 1887.

PANELS AT HEAD AND FOOT.

God of Speed, offering his Caduceus and laurel wreath to the victor. This figure is in high relief. On the reverse side, an exact reproduction of the winning car in chasing. The handles, two in number, are Russian in character.

The standard or base is decorated with sprays of the pine, totemic devices of the various northwestern tribes, implements of Indian sport, snowshoes, paddles, etc. Under each of the four totem poles appear the seals of the Alaska-Yukon-Pacific Exposition, the city of Seattle, city of New York and the State of Washington, with a winged automobile wheel between each of the four seals.

The Indian border on the extreme base of cup can be enameled in characteristic colors. The trophy proper rests on a base of native Alaskan wood.

This trophy was designed by A. F. Saunders and submitted by the Benedict Art Studio, East Syracuse, N. Y.

LAST JANUARY

we determined to diversify and increase our ring stock. The result of our efforts in these two particulars is apparent in the ring stocks our travelers are now showing.

New patterns have been added to the good old ones in our line of animal head rings. This cut illustrates a new Lion head ring, the finest in the market, made only in 14K gold, in three sizes.

Reigning Jewelry Fashions Noted in Paris.

Dainty Novelties in Gold, Silver and Gems Now in Demand Among the People
of Taste in France's Capital.

A RARELY artistic pendant consists of a full-length female figure in old ivory, exquisitely sculptured, with ruby tiara and outspread golden wings, turquoise incrusted.

A night moth in varied tones of brown enamel, the wings veined with tiny diamond sparks, formed a unique corsage ornament.

Small brooches of moss agate in oval shape surrounded with pearls are used for fastening lace at the neck.

There is a revival of different-colored pearls for earrings. For instance, one may be of pink and the other a white or black stone, often as large as a hazel nut.

Concentric rings of alternating diamonds and rubies set in invisible gold inclose a genre scene in translucent enamels or an ancient Roman intaglio.

A modest pendant takes upon itself the form of a golden pilgrim shell, diamond striped and set with a pure white pearl.

Clover leaves incrustated with tiny emeralds are strung together with pearls, forming a necklace.

Opals are often of immense size, one two inches long and ovoid shape, diamond and emerald banded, serving as a brooch.

Another brooch consists of a Hindoo woman's head with diamond eyes, ruby head band and wide jeweled collar and girdle.

The revival of jet as a dress trimming has stimulated the jewelers to the production of handsome jet and black enamel ornaments. Jet is less perishable than formerly, each tiny facet being carefully riveted. Immense buckles of jet with raised cabochons mixed with faceted plaques are handsome. Great oblong cut jet beads are strung with dull amethyst cabochons. Baroque pearls and big, faceted beads of Whitby jet look well together, worn as necklaces or sautoir. Locketts and bracelets of black enamel show a band of white enamel, or are set with brilliant steel facets. Gun metal or blackened silver is also liked for half mourning, and is permissible set with dark amethysts. Gun metal sautoir in great, heavy links are studded with rhinestones. Black enamel beads, gold or silver banded, are used as necklaces.

Even pocket books and parasol handles are of jet, and made most substantially. The handles are of the tiniest beads sewed on an invisible foundation, while the knob consists of the same or of a large piece of faceted jet. Pocket books are all over incrustated with beads, brilliant oblong and fancy shaped cabochons forming a design. Card cases come to match, while hand bags are thickly incrustated with jet. Black suede bags show jet decoration, or have corners and clasps of blackened silver or gun metal. Elegant are the dog collars in a lattice-work of jet, with a rhinestone at each intersection. Black enamel plaques etched with a design in silver and alternating with cut steel beads between strings of baroque pearl form a necklace and make a variety for those in half mourning. Jet combs, back and side, are very wide and ornate,

and look well even when a person is not in mourning. Barettes come to match.

Hat pins are shown in great variety, and are often in an openwork pattern in faceted jet. For deep mourning there are great button-like pins of dull jet or ebony. Strings of wooden beads come for neck chains, while smaller ones are strung together as belts. Entire hand bags made of wooden beads are seen. Dark purple and black beads are used in conjunction for bags and chains. Lorgnettes are of black enamel, with a monogram in seed pearls or chip diamonds.

A large silver bee, with wings which cover a glass receptacle for honey, is an original design, the long protruding sting serving to uncover the dainty.

An inkwell of crystal has an automatic device for closing the top, in which is set a silver timepiece.

It is not often that the lover of good wine can cool his champagne in a silver receptacle set in a veritable elephant's hoof. This unique wine cooler is silver rimmed, and at the base set with great bosses of yellow marble.

Novel are the penholders of eagle or ostrich quills, gold mounted. There are dyed quill penholders to match the shade of the paper. Desk sets consist of a slender pen and pencil in Napoleon blue enamel, with seal to match, inclosed in a satin-lined blue morocco case.

Even the suffragette has her uses, as in a miniature presentment of silver she is utilized as a paper weight. A bill holder shows the bill of a bariyard duck of dead gold, while the neck is of burnished enamels in iridescent blues and greens.

The oft-repeated reclining figure of Madame Recamier on an Empire sofa in white porcelain, the pillow serving as a setting for a gold-rimmed clock, still forms a pleasing idea.

A Roman chariot and prancing steeds in bronze show the spirited animals with feet lifted from a crystal watch dial beneath.

Attractive clocks of Greek temple design have the top and pillars of blue Sevres, entwined with pale-hued pink roses and myosotes.

Nude girl figures in ormolu, connected by garlands of roses, hold upon their palms a globe of pink enamel with a clock face rimmed with brilliants.

Silver toilet sets are less ornate than formerly, a recent model showing the brushes mounted in plain satin silver with no decoration whatever save a beading about the edges. Tortoise shell with silver inlays and monogram is handsome and expensive, and is one of the latest models shown in this line.

Electric light shades are varied. Shades of moonlight glass painted show Dutch windmills and quaint ships in shaded grays, viewed by the mellow glow of sunset. Another one extremely artistic showed a line of shadowy leafless trees against a background in sunrise golds and reds. A sym-

phony in purple was a shade of gourd-like form, with a straggle of darkish purple leaves and red flowers, with clouded background effects in purple. There was a shade with a high column of marbled amethyst glass, the color merging into shaded grays at the base, while the light sifted softly through a vase-shaped top. A crystal lantern in faceted design is held aloft by a Japanese figure in kimono and obi. Quaint is a sedan chair of thin white porcelain, with a dainty woman's figure side.

COUNTESS DE MONTAIGU.

An Easy Test to Determine a Genuine Emerald or a Fine Garnet.

It is well known, says *La France Horlogere*, that Antony Jacques, jeweler at Grenoble, has conducted painstaking researches with a view to the discovery of the best means of distinguishing between genuine and counterfeit precious stones. He has recently imparted to us the results of his studies as far as they concern the emerald and the fine garnet.

"You will not overlook," Mr. Jacques writes us, "how difficult it is to distinguish between a genuine and an imitation emerald. Even many dealers in stones are uncertain and find themselves obliged to file the stones in order to distinguish them. I will give you first information concerning a very simple method. Through two colored glasses, placed across and upon one another, one blue and the other yellow, we look at the stone to be examined, being careful first to place it directly on the electric lamp; the genuine emerald will turn violet, the imitation stone will remain green, whether it is scientifically reconstructed or simply an ordinary green doublet. The imitation emerald, with the aid of the colored glasses above described, can be distinguished no matter how perfect the imitation.

"In the case of the garnet colored glasses are again made use of to distinguish the imitation from the genuine stone. Looking at the stone through pale green glass, always placing it on the electric lamp, it will be noted if the garnet is decolorized it is genuine. On the other hand, if it is counterfeit it will remain garnet color."

These observations by Mr. Jacques are valuable and should certainly be noted by our readers.

Words of Commendation.

PARSONS, Kans., July 26, 1909.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

I want to say a word in expression of the value of your magazine to the jeweler, for I read it thoroughly every week and get much good out of it.

For the benefit of your advertisers I would say that I read every ad. and I have paid for many a bill of goods that owed its inception to an ad. in THE JEWELERS' CIRCULAR-WEEKLY. Wishing your office every success, I am,
J. S. PFEIFFER.

A gasoline explosion slightly damaged the jewelry store building of A. M. Greer, Iowa City, Ia., recently.

J. C. Willeford, Concord, N. C., has just completed extensive improvements in the interior of his store.

THE NEWS FROM ENGLAND.

Export Trade Improving Slowly Exhibit at Arts and Crafts Palace Not as Successful as Was Expected Members of Royal Family Visit the Palace—Praiseworthy Work of Youthful Artists Shown.

LONDON, Eng., July 24.—Generally there are indications that trade has made a movement in an upward direction, but the jewelry trade has hardly reaped any advantage just yet. The export trade has been pretty fair, but by no means what one would like it to be. Scotch and Irish trade is still pretty bad, but in the big cities in the south of Scotland indications are not wanting of a revival. The Board of Trade returns show us definitely that trade is improving, for there is an increase of over three-quarters of a million in the exports, while the re-exports have totaled over £1,900,000. Financiers and tradesmen also view these figures with considerable pleasure, and I think it is generally believed that trade must move pretty quickly now.

I remarked in a previous letter that I would give, in the near future, some idea of the exhibits at the Imperial International Exhibition. I will make no apology for delay; the fault is not mine. As a matter of fact, as I write, the Arts and Crafts Palace, in which jewelry and the allied trades are supposed to be housed, is as yet incomplete, while a number of "fakers" occupy positions which might have been held by bona-fide manufacturers or retailers.

The palace, which might have been a success, is a dismal failure owing to an absurd lack of organization. Anyone might have followed on the plan of the Franco-British, but those who profess wisdom have made an egregious error by splitting up the exhibits and thus ruining the possible success of the Arts and Crafts Palace and also the exhibitors' chances of business. Thus the fine Swedish firm of David Andersen, whose remarkably beautiful *pliq-a-jour* enamels are famous, is hidden away in the great Machinery Hall, among tobacconists' sundries, men and jacks of all trades, while Vaughtons, the official medallists to the Franco-British Exhibition and one of the leading British medallists, have two stands, one in the entrance and one in the Health Resort section!

Knight, the Italian silversmith who makes a specialty of wrought copies of ancient Greek and Roman silverware and Etruscan jewelry, has his exhibit naturally enough in the Italian section, but Indian exhibits as well as Swedish and those of other countries where they have not a special section should have been accommodated in the Arts and Crafts Palace. As it is there are only seven bona-fide exhibitors. Catchpole & Williams, whose excellent exhibits secured for them two gold medals last year, show the method of producing genuine London made spoons and forks from the ingot onwards and also a rare collection of fine antique silver.

H. W. King & Son, the pioneers in the modern manufacture of enameled jewelry, have a splendid collection of enameled jewelry and silverware, ranging from small

safety brooches to handsome pendants, hair combs and tiaras, besides enameled dishes and rich toilet sets, everything being remarkable for its rich coloring. Two Austrian firms, Konieg and Kraus, exhibit copies of Hungarian and Austrian Renaissance jewelry, while Isidor Braun, of Hatton Garden, shows a general collection of jewelry, silver and *objets d'art* and black opals. Frank Hyams, of Bond St., makes a handsome exhibit of New Zealand jade jewelry. His stand is unique, representing a Maori house with quaintly carved figures and heads. The Crown Metal Co. occupies the largest position in the palace, but has not sufficient goods to fill the stand. But I have always held the opinion that the metal is a kind of gilding metal and now, writing from experience, I can only say that, despite the claim made for it, the metal will tarnish just as quickly and as badly as ordinary gilding metal. I fear, therefore, that the boom will only be a short one, as it is necessary to keep the goods in continuous wear to maintain the color.

In the Women's Palace, and that, by the way, is the most successful this year, there are a few lady jewelers exhibiting. Mrs. Dick exhibits some excellent carved horn jewelry and several pieces in gold and silver which are praiseworthy. Another lady, Kendal Jenkins, who exhibits the "Opal Enamels," makes one of the bravest shows in the building, while Miss Rimmington and Mrs. Whipple, both of whom exhibited last year, show some passable enameled jewelry.

In the Holland Section is to be seen some very good copper and brass work, some good Delft ware and some remarkably fine, typical Dutch ceramics. In this section, strangely enough, is to be seen an exhibit of British pottery which rivals anything ever produced. It is the Bernard Moore pottery. I have seen nothing so really rich and yet so artistic. The shapes are based on every type of pottery, but the Chinese and Japanese predominate, while the decoration is also most successful when based upon the Eastern styles. There is an indescribable brilliancy which passes through the copper glaze and makes the reds extremely fascinating; there is subdued richness which must be seen to be appreciated. It is due to Mr. Van der Steen, the Commissioner for the Holland Section, that these beautiful examples of modern British pottery are on exhibition—just another instance of the want of organization.

In the Viennese exhibit are some fine painted vases priced at £500 per pair and a number of caskets paneled with ceramic enamels. The Venetian glass on exhibition is also good, while Italy makes a number of large and well arranged exhibits of Carrara marble statues and statuettes and some extremely fine bronzes by modern modelers, and several excellent replicas of the antique. And now I can say no more, except that the side shows are greater in number

and in some instances very unique, and that the undesirable weather which attended us during 28 days of June's 30 and well into July, combined with other causes, has helped to make the exhibition, as compared with last year's, very quiet, but there is plenty to see, and better weather would doubtless increase the attendance and cheer the meanwhile sad-hearted exhibitors. There was talk of a meeting of these to discuss ways and means of interesting influential people and attracting more attention to the exhibition, but this was not entertained very cordially by the powers that be and so fell through.

But last week the Queen and other members of the Royal family visited the exhibition and so gave it a stimulus. I might mention particularly one novel side show, the invention of a jeweler, viz., the submarine railway—a contrivance whereby several boatlike cars travel under water, while through the glass sides the voyagers can see something like the gyrations of Jules Verne in his "Twenty Thousand Leagues Under the Sea."

On the 13th and 11th an exhibition of London craft and trade students' work was held at the Central School of Arts and Crafts. The exhibits were selected from the work of 820 students who had competed with work produced during the past year in the London technical schools, scholarships being offered ranging from £60 down to £5 per annum, tenable for two and three years. The exhibition showed that the education given to lads, and in some instances girls, employed in London crafts was bearing good fruit. Some remarkable pieces of work were shown and some extraordinary studies from nature, while some of the book illustrations and specimens of copper-plate engraving demonstrated a very wide knowledge of technique. Modeling from life or as a design subject was also remarkably good and among the pieces shown in this way were a couple of portrait busts by Cecil Thomas, the young seal engraver. He is also represented by some fine medals and specimens of die-sinking and seal engraving.

There are half a dozen exhibits of die-sinkers (medallists as well as die-sinkers for stationery purposes and tool cutters for jewelry and silversmithing), representing the work of students in the Central School, which have called forth encomiums from the various art critics, while silversmithing and jewelry show an enormous advance upon past years and there are examples of work from the Central School of Arts and Crafts and the Northampton Institute in Clerkenwell which astonish the visitors.

There is an extremely fine altar cross by a young man, named Wilkins, which is not only finely proportioned and demonstrates an extreme knowledge of the possibilities of the metal, but gives evidence of a year's very hard work. Another young fellow, Bernstein, has produced a very handsome, large ecclesiastical candlestick, while some enamel brooches, silver casket with enameled panels and a monstrance with enameled panels also evidence the talent and hard work of a young fellow of 20, named Stanton, who is also of the Central School. There is a very finely shaped bowl with lid in the Nuremberg style by George, of the

Central School, and among the jewelry some very neat pendants and brooches by Huson and Jennings, two lads of 15 and 17 respectively, while Ware, a lad of 20, has sent in for competition a well thought out and very pleasing necklace, representing Night. In the pendant the central feature is an owl. Maynard, a boy of 19, at the Central School, has reproduced Durer's famous engraving, "The Knight's Defiance of Death," in a remarkable manner and this work has been much talked of in London. Richard Winter, a boy of 19, has designed a large circular box with domed lid, covered the lid with the Royal Coat-of-Arms and arranged heraldic decoration on the body in such a way as would put to shame many so-called trade engravers. One of the boys at the Central School exhibits a well made inkstand of his own design to hold two bottles and two large trays as specimens of flat hammering. Davis, a boy of 20, has sent in a copy of a very fine old standing salt. A youth of 18, named Cole, of the Goldsmiths' Institute, has sent in quite a number of very brilliant nature studies and some extremely good museum studies of silver work and jewelry.

Night students at the Northampton Institute, whose names I could not secure, sent some very excellent work. This year, in the competition, arrangements were made so that students were only known by number and, consequently, the work on exhibition does not bear the name of the competitor, so that neither the school, which has been instrumental in giving assistance, nor the boy who has demonstrated his ability, can benefit readily by the exhibition. Everyone, however, is satisfied that the few London technical schools have been doing extraordinary work in bringing out the innate abilities of the boys and developing their artistic talents. If America could only get the silverware and jewelry on exhibition at this show of students' work transported to New York, and put on view, it would be an eye-opener as to the great value of well organized technical and applied art education.

The first examination of the boys attending twice a week at the jewelers and silver-smiths' afternoon classes has helped to demonstrate the value of a little training and encouragement. The memory drawing examinations showed some good results, but the design examinations brought forth considerable latent ability. The silver-smiths' boys, who took for their subject a teapot, produced some very excellent designs, while the jewelers, who outnumbered them by four to one, gave results which are truly surprising. Although the boys sat rather close together, the variety in the designs and the attempts to be original were most noticeable; and they have had only one session's training, i.e., 40 weeks of five hours per week.

The trade event of the month was the annual convention of the National Association of Goldsmiths, which was held in London. It marked a considerable indication of progress in business activity and constructive force. The gathering was characterized by a desire to educate as well as defend the craft. The inclusion of lectures was a very happy thought; on only one other occasion, at Torquay, speeches were

made explaining and urging the need for the association to take up the question of education and to also help the members of the association as far as possible.

The lecture by Dr. Herbert Smith dealing with constructed gems was a great success, while Lionel Laurance's paper dealing with the optical side of the jeweler's business was not only well received, but encouraged discussion and provoked numerous suggestions. In fact, the tone of the gathering was much higher altogether. That was expected under the new chairman, who is a first rate horologist and a capital sight-testing optician. He is also something of an astronomer and meteorologist, besides which he knows the rules of debate and can tactfully apply them. The general opinion is, consequently, that the association has taken a new lease of life, particularly now the position of honorary secretary has been abolished and the executive power lies with the secretary, who will, when necessary, take his orders from the small executive committee.

The vexed question of bogus auctioneers was the theme upon which many delegates waxed eloquent in their denunciation of the persons who make a good living at the seaside resorts during the Summer and in the main thoroughfares of the cities and towns during the Winter. The association has been active in rounding up these persons and lately secured several convictions, but the most important was that of the men at the great eastern seaside resort, Yarmouth, where the principal was fined £50 and costs amounting to over £100 and the other £25. The importance of the case is that it emphasizes the new reading of the law on the subject, since, for a considerable time, it was thought by laymen and lawyers alike that a conviction for fraud was essential. Now, it has been incontestably laid down that attempted fraud may be the charge, so that the jeweler who knows he will be defrauded by the bogus auctioneer may purchase an article and yet secure a conviction because the seller attempted to defraud him. The delegates to the N. A. G. conference were extremely jubilant over the success attained and agreed to push home the victories by determined action.

The question of the "In Accord List" (a list of manufacturers and wholesalers who are in sympathy with the association and agree not to sell to the public or to cut prices) was also debated again and in the end it was agreed, owing to the risks attending the leaving out of names, and particularly the taking off of those who were found to be offenders, to form a defense fund and insure against any possible actions. Arrangements have consequently been made with a firm of insurance brokers to take on the business. These few points will indicate that the N. A. G. means business now.

The Flory-Royal Co., Newport News, Va., used a full page advertisement in a recent issue of a local daily to make the following announcement, which was set in small type in the center of the large white page and below the firm's trade-mark: "A visit will convince you that we could use the entire advertising section of this paper in telling you about our artistic merchandise."

Unique Trophy Clock Donated by San Francisco Firm.

THE handsome trophy offered to the Corinthian Yacht Club by John Hammersmith, of Hammersmith & Co., San Francisco, Cal., has been placed on exhibition by that concern and has been attracting much attention during the past week. On Sunday the first race for the trophy was held by the yacht club, and was won by the sloop *Yankee* after an exciting race that was well contested.

The trophy is a particularly distinctive piece. It consists of a clock set in the center of a tiller wheel, the whole being done

ATTRACTIVE BRONZE TROPHY CLOCK.

in bronze. The beauty, as well as the utility of the trophy, made it much sought for. The trophy must be won three times to become the permanent property of the holder.

H. O. Sheldon, Bottineau, N. Dak., Files Petition in Bankruptcy.

BOTTINEAU, N. Dak., July 28.—H. O. Sheldon, of this place, has filed a petition in bankruptcy with the clerk of the court at the Federal building. In the schedules the liabilities are given as \$4,557 and assets as \$5,650. Mr. Sheldon started in business in 1896, at Alexandria, Minn. He came to this place in 1902, when he succeeded J. C. Krebs. He was always considered a practical man and bore a good reputation in the trade.

Walter W. Winton, a retail jeweler of Scranton, Pa., and president of the Winton Coal Co., of that place, has offered to furnish a park to the residents of Scranton to be known as Winton Park, to perpetuate the name of the jeweler's father. The committee on public safety, last week, assembled to discuss the advisability of buying a plot of land from the Winton estate on W. Market St., near Providence Sq., and Councilman Costello stated that if the city buys the lot the rest of that parcel of real estate, which comprises something over an acre, will be given for a public park. The park will be equipped with a beautifully designed fountain and a statue. It is estimated that about \$10,000 will be expended on the enterprise.

DIAMONDS LA VALLIERES

Nothing is more popular to-day than La Vallieres; consequently nothing sells so well.

To meet the demand, we have prepared an elaborate stock of unique and exclusive designs, in all combinations, at prices ranging from \$15.00 to \$1,500.00.

Being Importers as well as Manufacturers, we are able to offer exceptionally fine pieces at moderate prices.

Write for assortment. We can meet any requirement in quality and price.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Minnesota Retail Jewelers' Association Adopts Important Resolutions During Last Day of Convention.

MINNEAPOLIS, Minn., July 30.—Wednesday's session of the Minnesota Retail Jewelers' Association convention opened with an address by Charles T. Higginbotham, consulting superintendent of the South Bend Watch Co., on "The Escapement and Its Relation to Adjustments." Mr. Higginbotham declared that watchmakers were underpaid for work which they did and should have a higher standard. The rivalry of stores should be that of doing the better work and not the cheaper. He then went on to give a most instructive and valuable lecture on the topic chosen.

Franklin Thompson, Milwaukee, secretary of the Wisconsin Retail Jewelers' Mutual Fire Insurance Co., spoke briefly of the work of his association, which insures the stock and fixtures of jewelers only, charging the regular old line rates, and at the end of the year refunding, or, as the legal term now is, paying back dividends, for the unused portion of the premium. The hardware dealers have had a similar organization, and have paid back at different times up to 50 per cent. of the premium.

The jewelers' organization started with \$165,000 worth of insurance written from 107 different merchants. They are now carrying policies in Illinois, Minnesota, South Dakota, Michigan, Indiana and Missouri. They invited the co-operation of the Minnesota jewelers until such time as the Minnesota jewelers could see their way clear to form their own organization.

The Wednesday evening session included a talk by President Barker on federated organizations, being an advance review of what he expects to present to the Omaha convention.

Robert C. Fay, advertising manager for the Elgin National Watch Co., delivered an address on "The Law of Advertising and Sales, and Its Relation to Retail Merchandising." Mr. Fay's talk proved of exceptional interest, and was closely listened to.

The association decided to join the Minnesota Commercial Federation, the object of the association being, as suggested in President Barker's address, the working together of united organizations for the general betterment of commercial conditions, rather than a continuation of the present methods of each trade or line of merchandise working individually to accomplish its own desires.

Delegates were named to attend the national convention at Omaha, as follows: A. E. Barker, Minneapolis; A. S. Morgan, Winona; C. O. Guy, St. Cloud; S. J. Vasaly, Little Falls; Charles D. White, Minneapolis. In addition to these, the association will be represented by Arthur E. Paegel, Minneapolis, and I. M. Radabaugh, Hastings, Minn., both being members of the executive board and officers of the national organization.

A report made that all the jobbing houses of the Twin Cities had decided against retailing was received with great appreciation. One house was named which has been openly retailing, alleging a lack of local

support which justified it in either getting more local business or else seeking it directly at retail, and which has now decided to limit its business to the wholesale exclusively.

The report of the resolutions committee resulted in the adoption of the following resolutions:

RESOLUTIONS ADOPTED BY MINNESOTA RETAIL JEWELERS' ASSOCIATION.

Whereas, The retail hardware dealers are conducting extremely successful mutual fire insurance companies in several States, and, whereas, the Wisconsin Retail Jewelers' Association has lately incorporated and is now conducting a mutual fire insurance company for the insurance of jewelers, wholesale and retail, there, be it

Resolved, That the Minnesota Retail Jewelers' Association, in convention assembled, does hereby endorse the company, recommend to the Minnesota jewelers that it lends its support to the Jewelers' Mutual Fire Insurance Co., of Wisconsin, and that this venture may be made a success.

Resolved, That we endorse the plan of the State Mercantile Federation and recommend that this association do all in its power to interest all mercantile associations in the plan, as laid out by the Minnesota Mercantile Federation.

Whereas, It has been demonstrated that a fixed price by manufacturers of watch movements has been most satisfactory, be it

Resolved, That it is the sense of this association that the watch case manufacturers adopt the same plan of marketing their product; be it

Resolved, That the delegates from this association do all in their power to have a committee appointed by the National Association to furnish proof to the postal authorities of fraudulent advertisements now appearing in the papers and magazines of the country.

Resolved, That the thanks of this convention be extended to S. H. Clausin, H. C. Carpenter, Robert C. Fay, Chas. T. Higginbotham and Franklin O. Thompson, and all others who by their instructive addresses have contributed to the success of this convention.

Resolved, That we extend to the management of the West Hotel our sincere thanks for the room furnished this association for this meeting and we further express our appreciation of the many courtesies extended us during the sessions.

The sessions ended with an afternoon and evening outing spent at Lake Minnetonka, a famous Summer resort 20 miles west of Minneapolis, and reached by trolley. The members were furnished with tickets which were good on any trolley to Excelsior, the first point on the lake, whence they went to Big Island, a park which contains 65 acres. The park is fitted up for picnics, and has all sorts of amusements. Coupon tickets were furnished for admission to the various attractions. The sports were many and varied. A lunch was served at 6 P. M. A tour of Lake Minnetonka occupied the evening. The party returned to Excelsior in time to take the cars for the city at 10 o'clock.

WATCH INSPECTORS ORGANIZE.

A call had been extended concurrently with the meeting of the Minnesota Retail Jewelers' Association to watch inspectors to meet with a view to organizing. The object of the proposed organization was to be better able to present the wants of the members than could be done individually. The railroads, it is said, are curtailing the privileges of the inspectors. Individually it was felt that little could be accomplished, but collectively more could be done.

Furthermore, a more uniform system was

desired, to the end that the inspection should be of a stable standard. The proposed title is the Northwestern Association of Railway Watch Inspectors, to be open to membership from the northwestern States, Wisconsin, Minnesota, Iowa, North and South Dakota and Montana. A constitution and by-laws will be drafted by the officers. Dues are to be \$1 on the assessment plan, to be paid when called for, and as often as the needs of the organization require.

Officers were elected as follows: President, I. M. Radabaugh, Hastings, Minn.; Wilber D. Nelson, Pierre, S. Dak., vice-president; E. B. Nelson, Minneapolis, secretary-treasurer. Directors: W. M. Stone, Minneapolis, Minn.; J. A. Segerstrom, Rhineland, Wis.; C. G. Conyne, Mandan, N. Dak.; M. C. Alford, Huron, S. Dak.; W. H. Evans, Red Oak, Ia.; C. B. Hunkins, Billings, Mont.

Foreign Importations Received Through Providence Customs House.

PROVIDENCE, July 31.—Collector George W. Gardiner, of the Port of Providence, has completed his annual statement of the foreign importations received through the Providence Custom House during the fiscal year ending June 30, 1909, which shows a considerable increase in the aggregate valuation.

The aggregate valuation of imitation precious stones entered at the Providence Custom House for the past year was \$381,390, as compared with \$304,186 during the year ending June 30, 1908, and \$213,419 for the year ending June 30, 1906. During the year 1908 the importations were about equally divided, each quarter being as follows: \$75,310, \$74,651, \$78,815 and \$75,410. During last year, however, there was a decided increase each quarter, the last quarter showing an advance of practically \$40,000 over the aggregate of the first quarter. The valuation of each quarter was as follows: \$72,262, \$96,972, \$101,774, \$111,282.

Figures for the year ending June 30, 1909, show that the values of the foreign importations at the Custom House in this city were as follows: For manufactures of gold, \$15,450, as compared with \$17,333 for 1908, the falling off of \$1,883 being due mainly to a difference in classification; manufactures of silver, \$20,749, as against \$5,288 in 1908, an increase of \$15,461. This jump is due principally to the increased importation of silver mesh bags, which were important factors in the importation business of this port, especially during the last quarter, when the value of manufactures of silver entered amounted to \$5,971, or nearly double that of the entire previous year. This was attributed to the agitation on the tariff question and the evident intention of subjecting the mesh bags to an increased tariff rate than what it had been subject to.

Precious stones reached an aggregate value the past year of \$9,445, as against \$4,961 the year before; jewelry was entered to the value of \$2,316 last year, which showed an increase of \$1,504 from the \$812 imported the preceding year; and pearls valued at \$1,531 reached here during the concluding quarter of last year, it being the first importation reported in many years.

PEARLS

in qualities and sizes especially suited for the requirements of the manufacturing jeweler.

Our Pearl Stock, aside from our regular qualities, just now includes a number of series in manufacturer's sizes ranging from the small to one or one and a half grainers. These series will prove attractive as much for their uniformity of assortment as for their exceptional values.

Son of Former Jersey City Jeweler Arrested After Fraudulently Obtaining Diamonds on Memorandum.

Adolph Kohl was arrested last Wednesday afternoon by Detective Maxwell in Jersey City, charged with grand larceny. The police have attempted to locate Kohl for some time, but failed in their attempts previous to this time.

Kohl, who lives at 242 Greenfield Ave., Greenville, N. J., was engaged with his father, Daniel Kohl, in the diamond setting business previous to last October, when the business was discontinued. The complainants in the arrest are Nebeling & Silverberg, 47 Maiden Lane, New York, who allege that Kohl obtained from them about \$2,400 worth of diamonds, some unset, and some in the form of rings, brooches, etc. According to their claim, the young man obtained the goods upon the representation that he was acting for his father, who is well known and respected by the Maiden Lane dealers.

Mr. Nebeling, of the firm, in speaking about the arrest, said that he had known the young man's father to be a reputable man, always ready to meet his obligations, and that he had previously had dealings with him through the son. The young man, Mr. Nebeling said, did not tell them that his father had discontinued his business, but claimed that he was working for his father all the time, and that he got the goods for his father, who had a diamond polishing establishment in Jersey City.

When a request for payment or the return of the goods was made to Adolph Kohl, the young man put the firm off with various excuses from time to time, promising each time that he would surely make payments the next day. The young man told the firm, according to Mr. Nebeling, that his wife was ill and that his small daughter had died, and that because of this he had been delayed in reimbursing the concern for the goods. The members of the firm, after a time, became suspicious and went to Jersey City, accompanied by detectives, where they succeeded in locating the young man and caused his arrest.

Daniel Kohl, the father of the accused, was visited by members of the firm, and then for the first time learned that, as alleged, his son had been using his name in order to obtain goods. Mr. Nebeling said that the pawn tickets on which the goods had been pledged were turned over to an attorney in Jersey City, and that they had been recovered.

Mr. Nebeling expressed regret for the parents and said that he felt especially sorry for the father of the young man, whom he highly respected. The warrant on which the indictment was obtained against Adolph Kohl was sworn out in New York and steps are now being taken to obtain his extradition to this city for trial.

The store of the Winkler Jewelry Co., Holdenville, Okla., was recently destroyed by fire.

A new store building is being erected at Woonsocket, S. Dak., to be occupied by R. C. Basset with a complete stock of up-to-date jewelry.

New Officers Elected at Special Meeting of Retail Jewelers' Association of St. Louis.

ST. LOUIS, Mo., July 31.—Joseph M. Ebeling is the new president of the Retail Jewelers' Association of St. Louis, having been elected at a special meeting of the association, held Thursday night, at the Jefferson Hotel.

Mr. Ebeling succeeds Herman Mauch, who had been at the head of the association for about 12 years. He had been president continuously the past seven years and before that, except for a short interval, was president for about five years. His zeal and efficiency were such that he was kept in the office long after it was his wish to be permitted to terminate his service in the presidential position. He has done very much to advance the interests of the retail jewelers in St. Louis. He was for one term president of the National Association of Retail Jewelers.

Mr. Ebeling's election to succeed Mr. Mauch gives general satisfaction. It is felt that he is probably the best qualified to succeed Mr. Mauch. He is one of the most

PRESIDENT JOSEPH M. EBELING.

successful retail jewelers in this city. He has a jewelry store at 14th and Warren Sts., in North St. Louis. His brother, Louis Ebeling, is associated with him. He is an active member of the North St. Louis Business Men's Association and is one of the active promoters of the North St. Louis Trust Co., which is now being organized. He will outline his programme and plans at a general meeting of the association, to be held in September at the Jefferson Hotel.

At that meeting the jewelers' participation in the St. Louis centennial celebration in October will be outlined. Mr. Ebeling will take up the work begun by Mr. Mauch in relation to the centennial and push it vigorously.

The election of officers resulted, further, in the re-election of Otto Buder as vice-president and the choice of E. C. Zerweck as secretary and J. F. Zeitler as treasurer. Mr. Zerweck has been acting secretary since F. W. Kemper resigned on account of

having retired from the retail business to go into the manufacturers' supplies business in the Reeves-Kemper Jewelry Co.

The new board of directors is composed of Otto Kortkamp, Gerhard Eckhardt, George Hess, F. H. Niehaus, Sr., F. W. Drost, John Schmid, Herman Mauch, August Hoffman and F. Courvoisier.

President Ebeling and Vice-President Buder were appointed delegates to the national convention, at Omaha. Mr. Ebeling and Mr. Buder left Tuesday, for Omaha.

Death of Wm. Bixby.

ALLERTON, Mass., July 28.—Wm. Bixby, who for about 20 years had acted as traveling representative for the Frank W. Smith Co., Gardner, Mass., died, yesterday, at this place, where he had come in the hope of regaining his health. Mr. Bixby had recently suffered considerably from nervousness. The deceased was well known in the trade and had traveled for his concern extensively throughout New England, New York and Pennsylvania. For several seasons he had also covered the larger cities in the south and the smaller towns in Ohio and Indiana.

Mr. Bixby was born in Watertown, 71 years ago, and, when very young, moved with his parents to Hopkinton, making his home at the latter place until the outbreak of the Civil War. He enlisted July 27, 1861, as a private in Company H, 15th Regiment, Massachusetts Volunteers, for three years. He was discharged, July 28, 1864, at Worcester, as first lieutenant and quartermaster of the regiment, by reason of the expiration of his term of service. He was admitted to D. G. Farragut Post 116, G. A. R., Jan. 4, 1899. Mr. Bixby was for some time engaged in the cotton business in South Carolina after the war, and about this time married Miss Abbey Wheelock, by whom he is survived.

The deceased was a member of the Royal Arcanum, of Gardner, and D. G. Farragut Post 116, G. A. R. He was of a genial, happy disposition, and had the faculty of making friends wherever he went.

Jewelers and Optometrists of Michigan to Hold State Convention in Detroit.

DETROIT, Aug. 2.—The combined conventions of the Michigan Retail Jewelers' Association and the Michigan Society of Optometrists, which will open in the Hotel Cadillac, Aug. 5, will bring to Detroit about 300 jewelers and opticians from all parts of the State, according to a recent estimate.

Detroit is considered one of the best business cities of the country by the retail jewelry trade, and is the place of organization of the National Association of Retail Jewelers, whose convention is to be held in Omaha beginning Aug. 3. It is proposed to invite the eastern delegates to the national convention to the meeting in Detroit, that they may visit the birthplace of their association.

Thomas Comerford, president, and A. E. Charlesworth, secretary of the Detroit Jewelers' Board of Trade, are making all the arrangements for the entertainment. During the convention the annual reunion and banquet of the Ku Ku's will be held in Duffield Hall.

Eighth Annual Outing of Jewelers' 24-Karat Club of New York a Signal Success.

The eighth annual outing and clambake of the Jewelers' 24-Karat Club of New York City was held, last Saturday, at the Port-au-Peck Hotel, Long Branch, N. J., and was declared by all who participated to be one of the most enjoyable outings in every respect that has ever been given by the New York jewelers. The Port-au-Peck Hotel grounds, as has been shown by previous outings of the club, is an ideal place for such an affair, and everything that could add to the comfort and pleasure of those who attended was at hand. That the decision of the club officials to return to the same place again this year was well made is testified to by the royal good time each and every person present experienced. The outing from beginning to end was 24-karat fine. The experience gained at other outings was used to the best advantage, and the result was that not a single delay or poorly timed event marred the day's enjoyment.

When the committee in charge selected last Saturday as the day for the outing "Charley" Brinck was at once notified, and he began negotiations with the weather bureau to provide a suitable day. The weather sharps who deal out atmospheric conditions for New York and vicinity had planned for a rainy day, but, thanks to the persuasive arguments of General Manager Brinck, it was at last arranged that the rain and the heat wave should reach New York on Friday, and a perfect day was promised for Saturday's outing. The result of "Charley's" diplomatic efforts was a genuine 24-karat day—just warm enough to prove enjoyable, but not one bit uncomfortable. Following the plan of last year, the selection of a day earlier in the season rather than one late in August proved a good move as far as the attendance was concerned, there being about 175 members and guests on the trip, making it one of the largest in the history of 24-Karat Club outings. Because of the excellent arrangements of the committee in charge the day's programme was admirably carried out. There were just enough events, and the transportation and dinner facilities could not have been improved upon. Everything

moved with a snap and precision which added much to the enjoyment and reflected great credit on the various committees.

Representatives from a number of cities were present, but outside of the New York men Philadelphia had, as usual, the largest contingent of jovial spirits. The New York delegation assembled at the foot of Cedar St., at Pier 10, where they were warmly received by the outing committee, composed of David Kaiser, as chairman, assisted by Geo. R. Whitehead, J. Warren Alford, Edwin R. Crippin and Percy H. Savory. The steamer *Asbury Park* was in waiting for the trip, and shortly after 9.15 o'clock the anchor was weighed and business cares and skyscrapers were left behind.

The First Regiment Band, of Newark, N. J., was on hand again this year and accompanied the party all day, adding much to the enjoyment of the occasion.

The trip to the Highlands took about an hour. The water was exceptionally smooth and no cases of seasickness were reported. Upon arriving at the Highlands the party was directed to private cars attached to an express train of the Central Railroad of New Jersey. The trip by rail to East Long Branch was itself a feature of the day's outing. The train sped along the ocean front, passing through one of the most delightful sections of country on the Atlantic seaboard. The party completed the journey to Pleasure Bay by trolley. On leaving the trolley, headed by the band, the members of the club and their guests "formed in fours" and, marshaled by Acting President Kaiser and Mr. Brinck, the column swung across the Shrewsbury bridge and up the drive leading to the hotel, where the band played a lively air as the jovial jewelers broke ranks and sought the shade of nearby trees.

The odor of baking clams and the long rows of white tables tempted some in that direction, but it was announced that the first event of the day was the baseball game between the Jewelers' 24-Karat Club and the Philadelphia Club teams. The athletic events were held under the direction of the athletic committee, consisting of J. Warren Alford, chairman, assisted by Wm.

H. Kuma, Harry C. Larter and T. Allen Power.

The team representing the Jewelers' 24-Karat Club appeared for the first time in nobby new gray suits, with green stockings and caps. Each suit bore the emblem of the 24 Karat Club in green and gold. The team made a fine appearance as it took its place on the field for preliminary practice.

The game is best told by the final score of 19 to 12 in favor of the New York contingent. While the playing was not all of class A caliber, the game as a whole showed that there were a number of embryonic Murrays and Mike Donlins on both teams.

Dinner was served immediately after the ball game. Name cards marked each place at the tables, and when all were seated the feast began. The menu was as follows:

Menu.
Celery.
Hard and Soft Clams.
Bluefish.
Irish Potatoes, Cucumbers.
Lobster.
Chicken.
Sweet Potatoes, Green Corn, Tomatoes.
Watermelon.
Coffee.
Ballantine Pale Export.
Cigars.
Cigarettes.

During the dinner the story-telling contest was held. There were a number of contestants in this event who told mirth-provoking stories, but none who equaled "Joe" Cawthorne. His offering was received with such howls of delight that the judges, in order to get another story, said they were unable to decide as to who the winner should be unless Mr. Cawthorne would tell another story. He was equal to the occasion, and his second effort was even better than the first. He was declared the winner, and was presented with the prize cup.

David Kaiser, as toastmaster, proposed the health of President Power and all responded heartily. Toastmaster Kaiser then called the happy crowd to order, and, on behalf of the 24-Karat Club, presented Louis White, president of the Philadelphia Jewelers' Club, with a handsome smoker's set as a token of the esteem in which he is held by the New York jewelers. Mr. White expressed his surprise and pleasure as the recipient of the gift. He thanked the Jewelers' 24-Karat Club in splendid style, say-

ing that he appreciated their token of friendship very much.

The dinner ended, the next thing in order was a group picture, and the photographer did his part in short order.

The next attraction was a novel contest called "The Blue Pencil Publicity Contest." It was absolutely original, and evoked much amusement. The committee had arranged a number of chairs some distance from a starting line, and on each chair was placed a JEWELERS' CIRCULAR—WEEKLY rolled and wrapped, and bearing the name of some one of the contestants. In each copy was a paragraph marked with a blue pencil. The prize went to the man who should first find the copy bearing his name, tear out the marked paragraph and run to a table some distance away, where he was to find an envelope bearing his name, together with a lot of red seals.

Each contestant was required to place a seal at each corner of the clipping, put it in the correct envelope and deliver it to the judges' stand. The first man to arrive was J. Millman, and, having complied with all the requirements in a satisfactory manner, he was declared the winner and was presented with the prize cup for this event.

The last and best contest was all that the committee promised it would be, and resulted in a keen struggle which caused no end of merriment. The final number was open only to members of the Jewelers' 24-Karat Club, and was in every way a genuine 24-karat contest. The committee had on hand a generous supply of fresh carrots, tops and all, which were placed in rows containing 24 carrots, six in each bunch. At the end of each row was a stake, driven into the top of which was a nail. On each nail was an envelope containing a needle and thread. The first man to string all his carrots on the thread and tie them to the stakes was to be declared the winner. The first trial resulted in a victory for Harry Canfield.

Because of the large number of contestants a second heat was necessary, and in this M. Gattle and F. C. Osmer tied for first place. The final trial between Messrs. Canfield, Gattle and Osmer was even more exciting than the two preliminary events. Friends on the side lines urged on their favorite contestants, and offered much amusing advice. Mr. Osmer was first to finish his task, and was declared the winner. He was presented with a handsome cup given by President Power.

The day's sports ended, the tired pleasure seekers returned to the hotel and boarded cars for the train. The return trip was enlivened by the band, which played often and well. The trip up the bay was especially enjoyed. The boat reached New York at 7.30 P. M., and all declared the day's outing one of the most pleasing and satisfactory in the history of 24-Karat Club events.

MEMBERS AND GUESTS.

The following is a list of the members and guests who attended the outing:

Clark, of 'THE JEWELERS' CIRCULAR—WEEKLY.

Burglars Who Looted Store in Sylvania, O., Arrested and Identified in Toledo.

TOLEDO, O., Aug. 3.—Three men who were identified as the ones who had robbed the jewelry store of H. G. Staley, Sylvania, O., about 10 miles west of this place, have been taken into custody. The men, who gave their names as Charles Wilson, alias Ross Wolliver, Chicago; A. C. Wing, Toledo, and George Ward, were driving down one of the streets when stopped by Policeman Frank Reilly, who, upon investigation, found the buggy to be filled with loot. In addition to robbing the jewelry store, the men had visited a number of other prominent stores in Sylvania.

Assisted by two private watchmen who came to his help, Reilly ordered the men out of the buggy, whereupon they drew their revolvers. One of the accused dashed a bottle filled with nitroglycerine at the feet of the policeman. It did not explode, but had it done so it is likely that every building within two blocks would have been blown up.

Entrance to Staley's store was made by prying open the front door and then smashing in the show cases, which had been locked. The plunder consisted of about a dozen watch cases and small articles of jewelry. No attempt was made to blow open the safe, although a complete kit of tools for this work was found. The men will have a hearing early next week in the City Court.

Published among other names in a list of jewelers who reported watches as having been stolen, in the issue of July 21, the address of C. C. Breese, Franklin, Tenn., was, owing to an inadvertency, erroneously given as Franklin, Pa. Mr. Breese has an attractively furnished store in Franklin, Tenn., and has no intention of moving elsewhere.

Canada Thieves Confess and Tell Where Nearly \$4,000 Worth of Plunder Is Concealed.

OTTAWA, Ont., July 28.—The two men arrested in Renfrew, Ont., Woods and Conrad, charged with the robbery of diamond rings from the store of Alex. McMillan, of this place, confessed, Monday, to the Ottawa police and told where the rings were hidden. On Sunday, July 25, Woods was taken by a detective to Renfrew, and showed the latter where the thieves had hidden their plunder beneath a strip of wood in the bathroom of the hotel at which they stayed.

Ninety-four out of the 95 rings stolen were recovered, still bearing the tags, which showed their total value to be \$3,874. Mr. McMillan, who made an estimate of his loss at \$6,000, explains that he thought more rings had been taken. The fourth member of the gang has not yet been apprehended.

The prisoner giving his name as C. A. Woods, of Kingston, is a slightly built, dark-haired young man, about 30 years old. His companion, who calls himself F. W. Conrad, of Ottawa, is taller. Both men are clean shaven and well attired.

Death of Peter Weldon.

PITTSBURG, Pa., Aug. 2.—Peter Weldon, aged 85 years, died, Friday night, at the McKeesport Hospital, McKeesport, after an illness lasting three weeks. He was a pioneer jeweler of western Pennsylvania, but retired some time ago. A complication of diseases caused his death.

Mr. Weldon was born in Dublin, Ireland, and came to America when he was a boy, settling in New York. He did not remain there long, the excitement of the western life causing him to start for Pittsburg. He journeyed here in a wagon, before the days of the railroads. In 1844 he started in the silversmithing business, which, in those days, was devoted mostly to the manufacture of silverware by the jeweler himself. He operated a small plant in the old Sixth Ward of the city for many years. Mr. Weldon lived in Locust St. at that time, having resided there for more than 40 years. Since the death of his wife in 1905 the deceased had made his home with his granddaughter, Mrs. Frank Hunter, of Jenny Lind St., McKeesport.

Mr. Weldon was for over 50 years a member of St. Paul's Cathedral, of this city. He is survived by four sons—Christopher, of California; Matthew, of Wyoming; Frank, of Colorado, and James J. Weldon, of South America.

The funeral services were held at 8.30 o'clock, this morning, at McKeesport, at the home of his granddaughter. Mr. Weldon was well known among the older merchants of Pittsburg.

Alva L. Freeborn, New Virginia, Ia., has been succeeded by Freeborn & Stickel.

The first meeting of the creditors of W. W. Condon, Greensboro, N. C., was held last week and Mr. Kuykendall was elected trustee in bankruptcy. The assets are now given as \$3,400 and the liabilities as over \$12,000. The dividend to be paid, according to the latest report, depends largely upon the amount which will be realized from the sale of a piece of real estate owned by the bankrupt in Florida.

THE NEWEST GEM

BLACK OPAL, a recent Australian discovery, is the most beautiful variety of the Opal Group. Although called "Black," these stones have a wide range of colors, shading from light to cobalt blue with flashes of violet; from delicate shades of green to peacock tints, from light yellow to orange and from soft gray to black, often mixed with wonderful flashes of red fire.

BLACK OPAL has come "to stay," and no jewelry stock is complete without specimens of this remarkable stone.

We cut these stones from the rough and therefore can furnish them in various sizes, shapes and qualities at reasonable prices.

LOUIS J. DEACON, Cape May, N. J.

Involuntary Petition in Bankruptcy Filed Against W. E. Avery, Columbia, S. C.

An involuntary petition in bankruptcy has been filed against W. E. Avery, Columbia, S. C.

Mr. Avery began a wholesale business at Newman, S. C., in 1879, and located, in 1891, at Columbia, where he stayed until 1904. He then moved to New York City, and started a jobbing business in 1905. Subsequently he bought out the Greenville Jewelry Co. and, in 1908 bought out A. H. Ball & Co., Columbia, S. C.

A short time ago Mr. Avery submitted, through his attorney, a statement of his financial condition, showing assets of \$17,190.78, and liabilities of \$11,294.22.

He made an offer of 50 per cent. cash, but attorneys for the Jewelers Board of Trade thought they could secure 50 per cent. net, and entered into negotiations for the purpose of securing this amount.

In the meantime, Mr. Avery's attorney left the city for an extended trip, and because no definite answer on the counter proposition could be obtained, and, furthermore, because it was believed that the 50 per cent. settlement could not be put through without the assistance of the bankruptcy court, and in order to properly take care of the assets, an involuntary bankruptcy petition was filed. Through this procedure assets will be preserved, pending the return of Avery's attorney and the final adjustment of the offer. As the matter now stands, a 50 per cent. cash offer is before the creditors.

It will now be necessary for all creditors to prove their claims in accordance with bankruptcy law.

Assets and Liabilities of Retter & Rosenbaum Who Recently Filed Petition in Bankruptcy.

Schedules in bankruptcy of Retter & Rosenbaum, jewelers, at 206 Bowery, New York, were filed in the United States District Court, New York, Saturday, showing liabilities of \$3,157 in unsecured claims and assets of \$725, which include stock, \$400; machinery and tools, \$200, and debts on open account, \$25.

The individual schedules of Messrs. Retter and Rosenbaum show no liabilities and nominal assets.

Among the unsecured creditors of the firm named in the schedules are: Aisenstein & Woronock, \$150; A. Berger, \$360; J. L. Goldenberg, \$108; Ralph Metzger, \$97; William C. Penfold Co., Canton, O., \$232; Schoverling, Daly & Gales, \$100; J. J. Schmuckler, \$350; S. Sultan, \$132; A. Satz, who holds notes for \$167; Louis Halpert, who holds notes for \$225; H. Baum, \$112.

An involuntary petition in bankruptcy was filed against the firm July 19, and Judge Hand appointed Joseph W. Spencer receiver under a bond of \$250.

Fred. Gries, who, a short time ago, was taken into custody, accused of grand larceny by Sheff Bros., Wheeling, W. Va., has been held for trial in bonds of \$1,000. He will appear before the Grand Jury in September.

Death of Walter E. Hayward.

ATTLEBORO, Mass., Aug. 2.—After a lingering illness of over two years' duration, Walter E. Hayward, one of Attleboro's best-known jewelers, died Friday noon at 1 o'clock at his home, 16 Hayward St. He was 51 years of age.

Deceased was born in Attleboro, Dec. 20, 1858, the son of Charles E. and Charlotte E. (Wheelwright) Hayward. He attended the public schools as a boy, and after graduating from high school attended Exeter Academy for a year. He then entered Harvard University, from which he graduated in 1883.

After completing his college work he entered the jewelry business with his father, the firm name becoming Charles E. Hay-

MEMBERS AND GUESTS WHO ATTENDED THE FIRST OUTING OF THE MARYLAND RETAIL JEWELERS' ASSOCIATION, AT MIKADO PARK, NEAR BALTIMORE, MD.

ward & Co. Previously the concern was known as Hayward & Briggs and was one of the pioneers of the town. Mr. Hayward traveled for the concern and had charge of the New York office.

Later the firm was changed to Hayward & Sweet, and a few years ago assumed the name of W. E. Hayward & Co., and was conducted by Mr. Hayward alone until his illness, which started about two years ago.

In the '90's the deceased served as a member of the school committee for two terms. He was an associate member of the G. A. R. and was the first commander of the Hospitaller Commandery, Knights of Malta.

He is survived by his widow, a daughter, Miss Elizabeth, and a son, Charles E. Hayward. He also left a sister, Mrs. J. L. Sweet.

The funeral was held 3 o'clock on Sunday at his late residence, the Rev. J. Harry Holden, a former pastor of Murray Universalist Church, officiating. The bearers were Charles C. Wilmarth, Henry B. Linnell, Alexander Lyle and Frederick Whiting. Burial was at Woodlawn Cemetery.

S. Zausmer, Waverly, N. Y., has been appointed official watch inspector for the Lehigh Valley and Erie railroads.

Maryland Retail Jewelers' Association Holds Its First Outing.

BALTIMORE, Md., July 30.—The first outing of the Maryland Retail Jewelers' Association was held yesterday at Mikado Park, on the shore of Curtis Bay, a few miles south of Baltimore. A large representation of the members grasped the opportunity to escape the heat of the city and at the same time indulge in out-of-door sports. In the evening a characteristic Maryland shore dinner was enjoyed, and at a late hour the gathering broke up, the sentiment being that the affair had been such an enjoyable one that it should be repeated in the near future.

Among those present were: President J. J. Bartholomee and wife, Secretary F. J.

Fuller and wife, Treasurer Geo. J. Schaeffer and wife, Jerome Schirm and wife, R. F. Whittington and wife, Robert Roush and wife, Robert Smith and wife, C. H. Vogts and wife, Financial Secretary T. E. Stanford and wife, Mr. Hughes and wife, M. S. House and wife, Vice-President Arthur Wallenhorst, First Vice-President Frank Persohn, O. D. Wareheim, G. E. Wareheim, J. P. Vogt, Vice-President Ollie C. Metcalf, Jas. L. Funk, Samuel T. Dukehart, Mr. Shurrey, I. J. Brauns, Mr. Hodsgon, Misses Bartholomee, Whittington, Sanford, Masters Schaeffer, Sanford, Bartholomee, Pershon and Rousch.

Interest and membership in the Maryland Association is increasing rapidly.

A new front is being added to the store of the J. C. Hancock Jewelry Co., Grand Rapids, Mich., and other extensive improvements made. The interior is also being extensively improved and equipped with costly fixtures and furnishings.

A novel clock was recently designed and made by a jeweler in Fredericksburg, Va. The base of the clock is made of a composition of material and is inlaid with 55 one cent pieces bearing the date 1909. Across the face is the inscription, "Time is Money."

Fourth Annual Convention of American National Retail Jewelers' Association Opens in Omaha, Nebr.

OMAHA, Nebr., Aug. 3.—Amid great enthusiasm and with an unusually large attendance, the fourth annual convention of the American National Retail Jewelers' Association commences its session at the Rome Hotel at 10 A. M., this morning. For some days past the retail jewelers from all over the country have been arriving in this city, many of them with their wives and families, and it is safe to say that Omaha to-day contains more members of the jewelry trade, wholesale, jobbing, manufacturing and retail, than it has ever before. It is conceded on all sides that this will be the greatest, the most important, and the most interesting convention ever held by the jewelers, either during the life

convention, as it is known as "Manufacturers and Jobbers' Day." This evening will be devoted to a lecture by C. H. Higginbotham, of the South Bend Watch Co.

The programme for this afternoon's session is as follows:

Afternoon Session.

- 1.30.—Music.
 1.45.—Report of credentials committee.
 2.00.—President's address, J. P. Archibald, Pennsylvania.
 2.30.—Address, "Trials and Tribulations of a Country Jeweler," Senator Henry Ziliken (jeweler), Wellsburg, W. Va.
 3.00.—Address, "The Retail Jeweler as an Advertiser," R. D. Worrell, Missouri.
 3.30.—"The Social Life of the Retail Jeweler," A. F. Jahnke, Richmond, Va.
 4.00.—Address, "The Financial Advantages of Local Jewelers' Clubs," John C. Pierick, Springfield, Ill.
 4.30.—Address, "Value of Horological Education and Horological Laws," T. L. Combs, Omaha, Nebr.
 5.00.—Question box (two-minute talks).
 5.45.—Announcements and adjournment.
- President Archibald last night held a reception in the lobby of the Rome Hotel and received the congratulations of the visiting delegates, who testified to their appreciation of the president's magnificent work during the past year. After the reception the members made a trip to the "Den" Theater as the guests of the Knights of Ak-Sar-Ben, a commercial boost club which meets every Monday night to entertain its members and guests. Talent composed of members of the club entertained on the stage, and the king and his knights in full regalia initiated several members with imposing ceremony. After the show the visiting jewelers were regaled by a Dutch luncheon.

OMAHA, Nebr., Aug. 4.—The following address by Harry Hyman, of Hyman, Berg & Co., Chicago, was delivered this morning:

DOLLARS AND SENSE.

When it was first suggested to me that I address the retail jewelers in their annual convention, I was considerably surprised. It had never occurred to me that I would ever be called upon for this purpose and I had no formulated ideas that could in any way approximate a message. My first inclination was to refuse. I was told to think about it. Well, the more I thought about it the more I felt inclined to accept the honor.

There seemed sufficient justification; firstly, because I am a jeweler and am naturally in sympathetic relations with jewelers as a class; secondly, because I had arrived at an age when it is no longer vanity to wish to help younger men over the rough places I have had to travel; and if my experience could in any way be of service, it should no longer be a choice with me but a bounden duty which I could not fail to recognize. I may be mistaken in regard to the value of my experiences, but "such as I have, I give unto you."

Considerable travel in the larger cities of Europe and America enables me to compare business conditions abroad with those in my own city, and I believe it is safe to say, without fear of being charged with excess of loyalty, that State St., Chicago, is the keenest, most wideawake, busiest retail trade district in the world. Two million people have contributed to make a short street that is circumscribed by an elevated loop railroad, a Rialto the value of which passes the dreams of avarice. It is estimated that before every door

on this street, an average of 15,000 people pass every hour from 8 A. M. until 6 P. M.

On this street are located almost all the first class retail stores of our great city, and here any merchant who is lucky enough to get a foothold gets an education and an experience not to be had in many places and that the schools cannot give.

The congestion of business on this street makes all its business men practically touch elbows, and so close is the contact that an operation for the transfusion of blood, figuratively speaking, would be felt by every man on the street. They tell the story in London that if a stranger enters Petticoat Lane and walks its length, a distance of about half a mile, he will have been robbed of his handkerchief, it will have been washed and laundered, and will again be offered to him at a price before he leaves the lane. The analogy does not hold except in this respect, that nothing occurs at any point along the street but what, as if by magic, every dealer is keenly alive to it; the vibrations of intense activity are set in motion; scouts are out; plans are made and changed and the machinery of business is geared up another notch.

No street in the world can boast of an equal number of fine establishments in so small an area; nowhere in the world is the competition so keen, the rivalry so great, the exhibit so interesting, and nowhere in the world is the feeling

J. P. ARCHIBALD, PRESIDENT.

of the present National Association, or previously; and from appearances at the present time, the programme, which was published in full in THE JEWELERS' CIRCULAR-WEEKLY, July 14, will be carried out practically as written.

While nominally the convention began last night and the registration of the delegates took place early this morning, the actual proceedings commenced at 10 o'clock to-day, when the delegates and visiting jewelers were called to order, and all joined in singing "America." The invocation was delivered by the Rev. R. Scott Hyde. The address of welcome, which was short and humorous, was then made by Mayor James C. Dahlman, of this city. To the Mayor's address, A. E. Paegel, Minneapolis, Minn., responded.

The appointment of committees was then in order. Treasurer Bernau was not present, and the report of the secretary and treasurer was passed until Friday. The rest of the morning session was taken up in an address entitled "Why We Are Here," delivered by C. W. Williams.

To-morrow will be the great day for the

S. CALLISON, SECRETARY.

of fair play more intense. So far as I can discover, there are rivals but no enemies on this street. The very compactness of the situation forces men into constant sight of one another on the street and at the clubs, and a mutual respect for character and admiration of intelligence and creative power exists. The oldest and most successful houses on this street are those that are conspicuous for fairness and integrity, and the younger houses recognizing the importance of these two factors in business aim up to this level.

The houses that must live by hook or by crook are conspicuously absent, or at the most, are few and unimportant. State St. is the goal of the hopeful, the opportunity of the strong, the despair of the weak, the synonym of success. I come to you from State St., Chicago, where all my business life has been spent, to bring whatever message the street has meant to me who have been not an unmindful watcher in this vortex of human activities. A wise man in any line of business eliminates the elements of *luck* and *chance*. Business to him is a problem of mathematics, a problem of percentage, and it involves all that he has of intelligence, originality and adaptability.

When one has to pay an annual rental of \$1,000 a front foot for space, one is bound to be economical of his space; one will crowd into that space all the selling power he can in the way of quickly moving merchandise; he will be particular to have competent people help him in disposing of and turning the stock; he will be guided by and instruct his salesmen in such principles as will make selling easy and dispose customers to return to his establishment; and above all, with 15,000

people going by his place every hour he will want to attract attention; I would say he will be forced to attract it if he would succeed. This brings me to the feature of "window displays."

Many years ago it was the custom of jewelers generally, particularly the more fortunate ones, to view window displays as a cheap bid for favor, to be practiced only by cheap vendors of cheap wares, and the poor jeweler considered his dignity to be infinitely more valuable than the high credit rating of his neighbor, the window displaying dry goods merchant; but alas, his "dignity" did not pay his bills and it never does. It was difficult for him to see how he could be a real diamond merchant and at the same time cater to the needs of that large portion of the population who never buy diamonds. It seemed to him he must sacrifice one or the other; it took so many small sales to make up the value of a diamond, involved so much detail and expense, besides the cash outlay for the goods, that the diamond end of it with the long extension of credit and the few details seemed the more desirable and more "dignified" end to be preserved. But, alas, he waited for his diamond customers, whose visits, like those of angels, were few and far between. His dry goods neighbor, seeing the breach in the walls of the logic of the jeweler, assailed it to his own advantage with the result that every dry goods store has a jewelry department and the jeweler has a new competitor.

Now, if the jeweler had not been confronted with this new competitor he might still be able to force the public into his store to see his wares without making a window display. His fellow jeweler was a competitor he could meet without fear, but this new element seemed dangerous. Strong organization, plenty of money, the power of buying cheaply, and selling on a margin of profit that meant quick returns; these things occurred to him only when he was losing ground rapidly. Of course, I am talking of State St., and the experience may be reminiscent and autobiographical, but I am not afraid to take you into my confidence on this extent, especially since the matter is sufficiently old to be termed obsolete.

What was to be done? Diamonds alone would not pay, and smaller wares without diamonds as a factor would not yield sufficient returns; could the jeweler hold his alleged aristocratic trade if he catered to the more humble, and would the latter come without special attractive features that indicated a welcome? These were serious questions to be answered and they could be answered only by experiment. I remember as though it were yesterday, what a tremor of excitement seemed to thrill every member of our concern when we placed in our display window for the first time a large lot of goods at what seemed the suicidal price for which a neighboring department store was selling a similar article, and how, when we placed the price on it in plain unmistakable figures so that every passerby could see it, it seemed to spell ruin, and that our goods of like character in the store were to lie there stranded and a loss.

But the suspense did not last long. Those goods went so fast and interfered so little, or better still, helped so much in the sale of other goods, that it seemed as though some miraculous thing had occurred. Everyone became busy at once; the whole force was bent on getting goods into the show windows and getting the prices on same. Then the fun really began. The jewelers looked upon our change as an unproved experiment and a dangerous trifling with fate; but it took little time to observe that we had touched our real competitor where he was vulnerable and the scrimmage began. Competition comes under the rule of working both ways. It is the spur and the foe to excellence. In this instance it was the foe. Prices were forced down, then the quality of the goods, and we were compelled, in self defense and to preserve our reputation as merchandisers which we had quickly gained with an intelligent and discriminating public, to sell goods of which we were heartily asbamed. It was the time of sterling silver back hair brushes at \$1.25, and solid silver salt and pepper shakers that cost us eight cents each by the barrel which we sold at five cents apiece at retail. It was the cheapest advertising we ever did. Our place of business was a busy place in reality. "We had them coming," and to our great surprise and relief, we found that people really wanted to buy diamonds in a busy place. Let me tell you another little story to illustrate the force of window display advertising.

Our store is beautiful, its fittings most extravagant, for which, however, I will make no

apologies, and before the time of which I speak it seemed a forbidding place to persons of limited spending ability. It frightened them away. They could not know we were anxious to get their small change. At this time a well dressed woman entered rather timidly and in an apologetic manner said she was looking for a little diamond ring for a little girl and wondered if we had anything as cheap as \$50. We assured her we had, and that we had them as low as \$10. Can you wonder that window display became an essential and absorbing feature with us! Well, the thing was an uninterrupted success.

Our business jumped by leaps and bounds and, better still, we were all busy all the time. A little story here may illustrate several things; first the conservative attitude of the jeweler as a rule, and second, the value of experimentation. When we had been having this entirely agreeable experience about six months, one of the big men in the manufacturing lines in the east came into our place and, after greeting us with careful but cold civility, said, "I was walking along State St. last night looking at the window displays on the street, and when I came to yours I could not help feeling shocked at what I saw. Do you know your windows will mean your ruin, that you will lose all your good trade, and that this thing cannot go on?" We were surprised at the rough-shod manner of his criticism. We could not see any justification for his hitherness until it dawned upon us that he was an important creditor of ours, besides being a man of large business interests and experience. After some hesitation and I hope with proper deliberation, I replied, "Mr. —, had you been here six months ago when we were contemplating this departure, I do not doubt we would have been greatly influenced if not entirely guided by your judgment, for which we have a profound respect; but, sir, we have had six months' experience in the new ways, and we are justified in declaring, 'we shall never turn back.' This experience of ours is better than all the theories in the world." It was bold and he was a big creditor, but his reply came much more friendly.

"Well, if that is the case, I haven't a word more to say." Time passed. We soon gave our competitors to understand we were not "price cutters"—that we would not undersell them, but we would not permit them to undersell us, and being friendly it was not difficult to come to an understanding all along the street that a fair margin of profit must prevail.

In the business of railroad corporations we have heard much of the "gentlemen's agreement." I believe the term may be safely applied to the case in point; at any rate here was a fresh illustration of the force of that old truism, that "it is easier to establish relations of amity between friends than make treaties of peace with enemies." I have been requested to give in detail the principles underlying our window displays. We are all of us more or less students of human nature. We see an individual and almost instantly we have a complete impression of his character. As the boys say, "we have sized him up." The tell-tale eyes, mouth and chin, the carriage and dress have told their story with relentless truth, and judgment is passed. As a man thinks so shall he perform, and nothing that he does escapes the impress of his "character and personality."

A window display is the concrete soul of the man who makes it, and if you study it carefully you can almost see the man himself. It speaks volumes. What are the characteristics most desirable in a window display but those in the man himself—cleanliness, fearlessness, honesty and reserve power. A man should display goods that he thinks people will buy if they see them, and marked in plain figures the exact prices at which he will sell them without equivocation or reservation; he shall not fear that his neighbor, seeing the price, will undersell him, but shall take good heed that his neighbor respect the price and himself. He shall put in the cheapest goods he carries properly displayed, with prices, to show the humblest that he, the dealer, is not proud, but will welcome him as a purchaser; he shall display his most expensive wares in like manner, to indicate the wide range of his financial as well as his human interests. His wares should be properly individualized so that there be no confusion in the mind of the public, and the quality should be honestly and plainly indicated.

In the store itself the practice must be in harmony with the window display. I believe it would be a reflection on my own intelligence and an affront to you if in this year, 1909, I should attempt to speak of the value of a strictly one

price system and of the value of marking all goods in plain figures. I think this is so generally recognized that it requires no comment; but there are collateral influences that are so important that they will bear repeating. The employer who believes he should not be governed by the same rules that his employes are bound to observe is crippling the value of his helpers. Their courage and forcefulness, their eagerness and conscientiousness are bound to be tempered by his arbitrariness and lack of wisdom. I believe in certain established principles. A man should not have traveled far long the path of life before he has established in his own mind definite rules of conduct by which he can live. He will find that the most difficult problems with which he is confronted will then resolve themselves into mere questions of principle, and life will not be a gamble but a definite goal.

If I were to make a creed it would run something like this: I believe in one price to all, that shall be marked in plain figures. I believe my employes are valuable men and can sell goods as well as I can, if I do not seek an underhand or overhand advantage by the arbitrary power that resides in me. I believe in my own integrity and believe that unless I do so I will stand revealed before all men.

I believe in telling the truth to my customers, to my creditors and to my banker, and in abiding by the consequences. I believe that customers who leave me because they cannot break down my principles will eventually return because they could not break them down. I believe I can get along better without customers than without principles. I believe in a liberal policy based on principles. I believe in courtesy and kindness that are born of self respect and common humanity, and I believe no man can be so poor that he need be ashamed nor so rich that he should be proud.

The question may be asked, "How am I, with my fine principles, to compete with my neighbor who may have none and who underbids me in all my transactions?" My answer is, you must win this man over to your way of doing business and point out to him the mutual advantage of such a policy; and if you cannot do this you must have relentless war with him until he see the advantage of a compromise. Sell your goods at one price and marked in plain figures but at a percentage of profit that will force him to reckon with you.

In either event it will be a losing game, and in this way the advantage rests with you. There is some comfort in the thought, however, that the man who overreaches is soon a negligible quantity. I might enter into a discussion of merchandising percentages, the relation of stock to turn-overs and other questions of like character, but assume that these questions will be taken up by others. But before I dismiss this phase of my subject I want to signify my approval of this closer association of jewelers.

The transition from country watch tinker to jewelry merchant is frequently so quick that there has been little time for that technical training that is essential to successful merchandising and successful operation of a large establishment, with the result, I fear, that the entire trade suffers in reputation as merchants and as commercial risks. A closer association must have its educational value and must raise the *esprit du corps* of the entire trade, besides affording an opportunity for that exchange of social amenities which is a sure basis for co-operative transactions.

Now that I am about to close, I would feel that I have not done my duty by you or by myself if I were to limit my discussion to this phase of the subject. I chose for my topic, "Dollars and Sense." This gave me a free field for wandering where I might list. The dollar part has been made sufficiently emphatic. The sense is an effort to give you the best reflection of the fruition of that inner spirit which finds expression in as many ways as there are individuals.

Consciously or unconsciously, every man makes his own little shrine, erects the image of his own little god and there worships by the light he has. If his whole ambition is to acquire wealth, his god is the golden eagle, and while his stock may increase and his bank account become plethoric, there will be something hardening at the roots of his being that will cut him off from all the springs of delight, or as is more likely, he will find with the old Persian poet, Omar Kbayyam, that:

"The worldly hope men set, their hearts upon
Turns ashes—or it prospers and anon,
Like snow upon the desert's dusty face,
Lighting a little hour or two—is gone."

Topics of Live Interest Discussed at Recent Convention of North Dakota Retail Jewelers' Association.

There is something better than a merely successful business. It is a successful life; not measured by stocks and bank accounts, but by the bigness of a man's soul, the breadth of his sympathies and the circle of his influence. If a man do his duty by his business, by his family, by his friends and by his country, he reaches a success than which none is greater. A man may make a success of his business but he, personally, may rot there. I plead for a more sane relation to business. I plead for an eight-hour law for the employer as well as the employe; I plead for the leisure from toil that will enable a man to seek those larger interests in which money has no part, but from which he returns to his task, revived, refreshed and quickened with a new sense of power.

Humanity has struggled through the centuries to lay at our feet its wealth of art, science and literature; poets have sung their prophetic songs; the astronomer has unrolled the scroll of heaven and placed it as an open book before our wondering eyes, the philosophers have forced new concepts of God and of man's relation to him. Let us not neglect this great heritage. Let us not plead ignorance through lack of time, but by the right use of that margin of leisure which is given us grow to the proper stature of men. Then the tuffness of years and gray hairs may lay their burdens upon our bodies, but the spirit, ever buoyant and ever achieving, will go on gaining its victories to the end.

Store of the J. H. Booth Jewelry Co. Burned; Loss Partly Covered by Insurance.

St. Louis, Mo., July 31.—The loss of the J. H. Booth Jewelry Co., Alton, Ill., in a fire which partially destroyed the building occupied by the firm on 3d St., between Piase and State St., Wednesday night of last week, was about \$10,000, partially covered by insurance. The firm's loss would have been much greater but for the fact that the diamonds and the more valuable jewelry stock were in a fireproof safe and were not damaged.

The fire was discovered in a novel manner by Miss Bridget Slavin, night operator at the Kinloch telephone exchange. The flames, before they were discovered, spread to the telephone, and by partially consuming it caused a light to flash on the switchboard. Miss Slavin answered, thinking it was a call, but there was no voice at the other end. Mystified and thinking of burglars, she called police headquarters and the cause was discovered.

The fire burned four hours before it was under control. The Booth store was completely gutted. Mr. Booth was preparing to move soon into his new building. J. A. Kirby, proprietor of a 5 and 10 cent store, who was to occupy the vacated store, had placed a great deal of his stock in the basement of the Booth store, and it was destroyed. The origin of the fire is a mystery.

What is claimed to have been the first burglary in the town of Binghamton, N. Y., in six months occurred one day a short time ago, when a thief entered the store of E. D. Vosbury, at 20 Court St., and made off with a considerable amount of stock. The thief, however, was taken into custody 10 hours later, and has been held for the September Grand Jury. In the possession of the accused were found two watches and two plain gold rings, which were identified as stock belonging to the jeweler. At the time of the burglary E. T. Carter, manager of the establishment, was in Elmira on a business trip. All of the plunder was finally recovered.

GRAND FORKS, N. Dak., July 31—Many subjects of importance were considered at the convention held July 27, 28 and 29 by the North Dakota Retail Jewelers' Association in this city. The meeting was called to order with President Kent in the chair. K. C. Hunter was introduced as a representative of the Governor and welcomed the jewelers to the city in an appropriate speech to which a response was made by J. A. Minder, Crystal.

At the afternoon session the report of the secretary and treasurer were referred to the committee on finance. Committees were appointed as follows:

Resolutions, Lewis Hansen, Devil's Lake; H. O. Sheldon, Bottineau; Stanley Grow, Souris.

Finances, Paul Gerard, Grand Forks; R. E. Marion, Bisbee; Max Rabinovitch, Grand Forks.

A paper on "Side Lines in Small Towns" was read by J. A. Minder. In the discussion Lewis Hanson, Devils Lake, took part. In regard to the phonograph business he said:

"You cannot keep a full stock of records, as there is not money enough in it. If you do not have time to play the pieces for people who come in they put on records and scratch and ruin them.

"When it comes to selling records, you can stand sometimes two hours playing pieces and then, perhaps, not sell one record. If you could sell phonographs on the instalment plan there might be money in it, but what jeweler wants to go out collecting a dollar? It is a nice thing to have if you have a girl or boy who can attend to it.

"In regard to cut glass and china. About seven years ago I bought a side line and in a short time grocery stores were selling the same line. Certain people do not desire to stand by the jewelers."

Mr. Grow, Souris, said: "I have just been thinking that we should not expect much different treatment. It seems to me that we are breaking rules of the game ourselves when we are devoting our time to other lines instead of improving the lines which belong exclusively to the jeweler."

Remarks were also made by Geo. R. Calkins, Chicago.

A number of communications which were received by the secretary were referred to a special committee consisting of Lewis Hanson, Devils Lake; George Munro, Grand Forks; H. O. Sheldon, Bottineau.

The morning of July 28 the session opened with an address on advertising delivered by L. F. Mason, of the Grand Forks *Times*. C. H. Nesbit read a paper on "Watch Repairing; First Cost of Same; Prices and Profits." In the discussion of the paper Mr. Tillson said that it would be of much value in considering the question of uniform price lists in watch repairing. He said that for some time he had been convinced that jewelers were not making as much profit as they should in their repair department. Mr. Tillson added:

"I employ two watchmakers and the receipts of our repair departments are kept separate from the sales. Against this we charge up the watchmaker's salary, bills for material, etc., and at the end of the month find, after deducting the expenses, there is very little real profit left.

"In the past few months I have talked with several watchmakers in regard to the time consumed in taking in, regulating, recording and letting out work. In most cases I found that they had not considered this item at all, but when brought to look at it face to face they were obliged to admit that if the average does not exceed one-half hour per watch the jeweler is in good luck.

"Now, this one-half hour for each watch, handled by the repair department, means a large sum of money in the course of a year, and someone must pay for this; otherwise the jeweler is out that much. Many watchmakers do not take into consideration the amount of material that they use throughout the year. This, with me, is a large item.

"About 15 years ago I was hiring good watchmakers at \$12 to \$14 per week. Now, a good watchmaker receives from \$20 to \$25 per week, but I am still receiving the same price for the same work. It takes considerable more figuring to make a profit at the present time than it did a few years ago, and often we find no profit.

"We started the uniform watch repairing price list at our convention at Jamestown a year ago. It was brought about by talking with various watchmakers and finding out that there were about as many different prices as there were watchmakers. Our prices are bound to vary enough from the different views we take of the same job, even though we start with a uniform list.

"As an illustration, a customer comes with a watch with a broken balance jewel, staff slightly cut, and watch somewhat gummy. The first jeweler decides that it must have a balance staff and jewel, and be cleaned. The next jeweler may decide that it must have a balance jewel and be cleaned, but he decides that he can refinish the staff without detriment to the watch. A third jeweler, on looking over the same job, decides that it must have a balance staff and jewel, but not necessarily be cleaned. This, you see, makes a variety of prices.

"Shortly after our Jamestown meeting I had lists printed, copied from the Chicago horological price list. This list contains the names of various parts of jobs, but is left blank as to price, for each jeweler to fill in the price which he considers right. About 14 jewelers responded by marking the copies and returning them to me. I am not quite satisfied with this, so I have had, at my own expense, a new lot of these lists printed. I would like to have each jeweler at this convention take one of these lists and mark the prices that he considers right, and return it to me or the committee.

"If this list is adopted at this time I believe it will be a great benefit to the

jewelers of North Dakota, and will be the means of bringing the jewelers to a better understanding of the conditions. As your secretary I will, on hearing of a jeweler locating in our State, write him a letter enclosing one of these price lists. I believe that nine out of every 10 jewelers will follow it."

Mr. Peterson said that when he was in Europe he found that the jewelers had at their work benches printed cards showing the price list of all work.

The following committee was appointed to consider the subject of a price list: C. E. Tillson, C. H. Nesbit and Paul Gerard. Subsequently the committee submitted the following report:

"We, your committee on uniform price lists, beg leave to report that we have examined the lists sent in by the various jewelers and have compiled a list which we submit for your consideration. These prices are based upon first-class workmanship and genuine material."

Accompanying the report was the proposed price list. At a subsequent session it was moved by Mr. Tillson that the report on the price list be adopted. The motion was carried.

Mr. Rabinovitch spoke of the benefits of membership in the newly organized 24-Karat Club, Grand Forks.

The question box was opened and a number of practical questions were asked and answered.

At the Thursday morning session Mr. Wald moved that the proposed constitution and by-laws be submitted to the executive committee. The motion was amended giving the committee on constitution and by-laws and the executive committee power to act jointly on this subject.

Messrs. Tillson, Kemp and Rabinovitch were selected as delegates to the convention of the American National Retail Jewelers' Association at Omaha, Nebr.

W. A. Persey, Washburn, N. Dak., was not present to read his paper on "Watchmakers' Examination Board," and Mr. Tillson spoke briefly on the subject. He said in part:

"It seems to be the idea of some that we can make laws compelling the watchmakers to take examinations. I think this is wrong. A man employing a watchmaker at the present time gets a man who is usually well recommended but he does not know until he tries him whether he is a watchmaker, blacksmith or one of these native geniuses who travel throughout the country.

"I have talked with several good watchmakers throughout the State and they would like to take the examination. It gives them an added recommendation. The idea that I have is that an examining board should consist of three members—the very best watchmakers we have in the State. These members should draw a salary of about \$5 per day and their expenses, and to meet at any time that is convenient, probably just before or after the State association meets.

"Watchmakers who take the examination should pay a fee sufficient to pay the expenses thereof so that there would be no expense entailed on the association. The board should be empowered by the association to issue certificates of proficiency,

marking the same on a percentage of 100; if a watchmaker who had taken the examination was marked 95 per cent. or 97 per cent. it would show that he was a pretty good watchmaker.

"This question is being agitated in almost every association. Watchmakers are anxious to take an examination because it means to them more than a mere recommendation of some distant jeweler, who is probably a friend of the watchmaker. I expect that in the near future, when many of us older ones will be out of the business and our watchmakers will be the jewelers, that these certificates will have a still greater value."

Messrs. Tillson, Gerard and Nesbit were appointed a committee to formulate a plan for a Board of Examiners for the association.

Mr. Munro moved that a petition be sent to ask the Governor to appoint a committee which will solicit funds for the purpose of buying a silver service for the battleship *North Dakota*. The motion was carried.

Fargo was chosen as the next meeting place. Mr. Newton spoke and promised that the jewelers of that city would extend a hearty welcome at the meeting next February.

The following report was submitted by the committee on resolutions and adopted, after which the meeting adjourned:

Resolved, That we, the North Dakota Retail Jewelers' Association, in convention assembled, take this occasion heartily to extend to the city of Grand Forks, the Commercial Club, and the jewelers of Grand Forks, our hearty appreciation for the very kind and courteous treatment extended to us in giving entertainment and accommodation, and we realize that it is only by their efforts that our convention could have been a success.

Realizing that the jewelers of the State as well as others are not paid for skill and labor as well as the other tradesmen, and that there has been no uniformity in prices for repairs; therefore, be it

Resolved, That we recommend to the members of the North Dakota Retail Jewelers' Association and all jewelers of the State of North Dakota that we adopt a uniform minimum price list for all watch repairs, and that all watchmakers strictly maintain such prices as are adopted by this association.

Also, realizing that in order to get just prices for our work it is necessary to give the people protection and guarantee the best skilled work, our standard must be raised to the highest point possible; therefore, be it

Resolved, That we unite our efforts to have legislation and laws passed, establishing a State board of examiners for watchmakers, making it necessary that watchmakers pass a satisfactory examination before being recognized as competent repair men.

Resolved, That we, the jewelers of North Dakota, use our united efforts in compelling all manufacturers of jewelry to have their names or trademarks plainly marked upon their product, thereby guaranteeing to us their responsibility for such articles.

LEWIS HANSON,
H. O. SHELDON,
STANLEY GROW, Committee.

The W. H. Homuth Jewelry Co., Bloomington, Ill., has been incorporated with a capital of \$50,000. The incorporators are Wm. H. and Henry G. Homuth and Margaret A. Collins.

George Gerner, manager of the C. B. Jacquemin Jewelry Co., Council Bluffs, Ia., has announced that he will donate a silver trophy to be awarded to the successful contestant in an automobile race, to be run under the auspices of the Council Bluffs Automobile Club.

Detroit Jewelers Robbed of Valuable Stock by Former Employee.

DETROIT, Mich., July 31.—A warrant was taken out, Saturday, by Charles S. Hannan, of the Grainger-Hannan Co., charging Frank J. Rosbach with the theft of \$700 worth of jewelry. Rosbach had been arrested in Cleveland and the warrant was preliminary to his being turned over to the Detroit authorities.

The young man was in the employ of W. A. Sturgeon & Co. for three years. He took the goods at the time of the auction sale that was held before this firm was succeeded by the Grainger-Hannan Co. Rosbach retained his place with the new firm until last May when he resigned. Nothing had been missed, but his arrest came through his appearing at the store of Shaubberger & Murry, in Cleveland, and attempting to sell some bracelets which bore the mark of the Detroit house. He was held and the Detroit police communicated with.

Mr. Hannan went to Cleveland and, it is said, secured a confession. The goods taken, it is said, included seven gold rings, 10 scarf pins, six bracelets, a brooch set with pearls and diamonds, three pairs of cuff buttons, a pocketbook and various small articles, such as chains, ring mountings, a cigar cutter, etc.

Rosbach is married and has two children. In his home, 55 Greenwood Ave., Detectives Sullivan and Steinhebel discovered goods valued at about \$3,500. These consisted of silver and jewelry of all kinds, including very heavy pieces. His hearing will take place Aug. 10.

Burglar Escapes After Securing Much Plunder from Jeweler of Lynn, Mass.

BOSTON, Mass., July 28.—After securing jewelry, valued at several hundred dollars, from the store of Basil A. Seele, 160 Union St., Lynn, early on Monday, a burglar was uninjured by several shots fired at him by a patrolman and escaped in the darkness, after a race of several blocks.

Forcing one of the rear windows of the store, the burglar went through the show cases, securing 23 gold watches, 110 gold rings and a dozen bracelets and scores of other articles of lesser value. No attempt was made to blow open the safe, which contained diamonds and other valuable articles, from which fact the police believe that the burglar was an amateur.

The thief had just left the store when he was discovered by Patrolman Garney, who was coming along Smith St. in the rear of the building. Instead of stopping at the officer's command the stranger ran at full speed and the patrolman opened fire, emptying the magazine of his revolver after the fleeing man, apparently inflicting no wound. The burglar proved much the fleetest of foot and made his escape after the chase had covered several hundred rods.

During the flight the thief dropped two watches, four bracelets, five rings and some other articles stolen from the store, but managed to get away with the greater part of the loot.

A light skull cap found underneath the window of the store is the only tangible clue left for the police to work upon.

TO THE TRADE

¶ The Gorham Company cordially invites those members of the Jewelry Trade who contemplate an early visit to New York, to make their headquarters at the Gorham Building, Fifth Avenue and 36th Street.

¶ Here they will be assured of a hearty welcome and of all conveniences necessary for the transaction of their business, the receipt and dispatch of their correspondence, and the making of such appointments as they may desire.

¶ The Company's preparation for the business of the coming season has been unusually thorough, and visiting members of the Trade will be much interested in the inspection of the full and varied line of goods exhibited, which cannot fail to attract every legitimate jeweler.

The Jeweler as a Specialist. **T**HERE is one point about the jeweler's business that cannot be emphasized too often or too strongly, and that is that the retail jeweler is more than a merchant; he is a specialist as well. This point should not only be realized by the proprietors of retail jewelry stores and by all their employes, but should be impressed upon their customers at every opportunity, because it is only in general recognition that the jeweler is a specialist, that he has special knowledge on subjects of which the public at large know nothing, and uses this knowledge in the interest of his customers and clients, that he can take his proper place in the business community and obtain from his customers a recognition of the service which he performs for them and a proper compensation for such services. That the jeweler must understand well the business of the merchant as far as buying properly and selling properly (the two essential requisites for success) goes without saying, but he must be able to do much more than this; to build up a reputation purely on his ability as a merchant is apt to be detrimental to him in the long run.

The buying public knows practically nothing about the intricacies of watch and clock making, about the manipulation of precious metals and very little about gems and gem minerals. The public's knowledge of art and art products is also meager, and its ignorance in regard to the intrinsic value of the side lines which most jewelers handle is as great as to the jewelry lines themselves. For this reason the average customer of the jeweler is to an extent at the mercy of the man from whom he buys, and must rely upon the latter and his judgment in getting a proper return for the amount of money expended. The jeweler's craft being the oldest art craft of the world, the public to a certain extent believes that the jeweler has not only a knowledge of the technical sides of the lines that he handles, but also artistic taste as well; and the man or woman who buys an article which is comparatively expensive from their standpoint feels that in addition to the object which they purchase they should get from the jeweler facts about its worth and merit, its appropriateness and its suitability for the purpose intended, that they would not expect to get from any other source.

For this reason it is not only necessary that the jeweler should know his trade and all that enters into it for the purpose of buying and selling his stock, but he must also be able to impart his knowledge to some extent to his customers and be able in an intelligent way to explain the points relating to his stock in such a manner as to impress upon the customer that he has this knowledge and training, and this is being used in the customer's interest as well as his own. When he does this he is able to create an impression that puts the transaction between him and the buyer upon an entirely different basis from that which one expects in an ordinary store; and, what is more, he is thereby in a position to charge both for his services as a merchant and as a specialist.

The successful merchant will find that it is money in his pocket to see that both he

and his employes are able to discourse intelligently upon every article which he handles, that they are able to distinguish between qualities and kinds of merchandise and also bring out interesting facts in regard to every purchase a customer may make that will add to the purchaser's interest in the article bought, and also show him that the seller or the clerk or proprietor understands exactly what he is selling.

Intelligent salesmanship in the jewelry trade has both its psychological and technical elements, and there is no man who has so good a salesman that he can afford to ignore any information obtainable which may relate to the history, manufacture, artistic properties or proper use of the article which he handles. This is one of the essential reasons why THE JEWELERS' CIRCULAR-WEEKLY has devoted its columns for years to information relating to the articles which come into the various lines of the jewelry trade, taking them up from every standpoint, particularly the historical and artistic. We feel that though the information which we have been able to supply has been to a great extent incomplete, and in some instances very meager, nevertheless every line published has had a particular value to someone, somewhere, either directly or indirectly. Let the jeweler see to it that he and his clerks not only read their trade papers, but study everything upon their trade which they can possibly get hold of and apply this knowledge when talking to customers, impressing upon the latter on every opportunity the fact that they are educated in their craft.

It is on his reputation as a specialist, as a man who knows more than his customer, that the jeweler must rely in the future to succeed in this age of ruthless and keen competition. Only as a specialist who advises as well as sells can he ask his customers for a proper profit commensurate with the dignity and importance of his calling. Therefore, to do justice to himself and his customers, and to obtain this reputation is deserving, that he has the knowledge and can give the services which he essays to perform. To do this he must continually educate himself and keep abreast of his competitors and ahead of other business men in his information as to all lines that can be properly considered as appropriate for his trade.

LETTERS TO THE EDITOR.

FORT DODGE, Ia., July 28, 1909.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

We, as jewelers, appreciate very much the attention, space, etc., which you have been giving us. In fact, the attitude has "queered" the official organ proposition entirely, I think.

Most thinking men are satisfied with the service which our regular trade journals are giving us. In fact, I do not see how we could expect to improve it in any way. I have always contended that if we furnished suitable matter we would have no trouble in getting it published by the best papers.

Yours respectfully,

MACK A. HURLBUT.

M. Sternberg has moved from Savannah, Ga., to Jacksonville, Fla.

Trans-Atlantic Voyagers.

Simon Frankel, New York, returned, Thursday, on the *Mauretania*.

N. B. Barstow, of the N. B. Barstow Co., Providence, R. I., sailed recently on the *Cymric*.

Mrs. Samuel M. Nicholson, Miss Patty Nicholson and Paul Nicholson, Providence, R. I., sailed Tuesday on the *Kaiser Wilhelm II*.

John Kirschneck, Media, Pa., has been awarded the contract for the repairing of the clock in the local court house.

Fred C. Newhall, of the firm of W. F. Newhall & Son, Lynn, Mass., is spending a month canoeing and fishing in Washington County. Mr. Newhall is a licensed non-resident guide, and is taking a party of friends on his outing with him this year.

New York Notes.

Benjamin Wyman, Providence, R. I., was a recent visitor in this city.

Asa Joseph, Donora, Pa., was seen in the Maiden Lane district, last week.

Leo Wormser, of the Julius King Optical Co., is enjoying a two months' vacation.

Duncan M. Doe, a retail jeweler at Hamilton, Bermuda, is visiting friends in town.

Mr. Simon, buyer for Lipmann, Wolf & Co., Portland, Ore., was in New York, last week.

Herbert Morse, assistant salesman for R. Blackinton & Co., is on a trip for the concern.

L. Peters, of the H. S. Meiskey Co., Lancaster, Pa., is an out-of-town caller in this city.

Veit Hirsh, of Veit Hirsh & Co., returned early in the week from a trip abroad.

George W. White, of West, White & Co., Pittsburg, Pa., is visiting his sister in Brooklyn.

C. E. Linton, formerly with A. H. Richards, an El Paso, Tex., jeweler, is at present in this city.

Louis Manheimer, of Louis Manheimer & Bros., 35 Maiden Lane, is at present in Carlsbad, Bohemia.

George Heywood, with the Horton-Angeil Co., 15th Maiden Lane, is spending a vacation in Maine.

Fred. Leach, in charge of the Waltham Watch Co.'s material department, sails, Aug. 15, for Europe.

L. H. Carpenter, representing the Chas. E. Hancock Co., returned Friday from a trip through the south.

Howard Whyte, of Mosher & Whyte, 15 Maiden Lane, is on a trip through New York and Pennsylvania.

F. Silverstein, manufacturing jeweler and diamond dealer, has moved from 93 Forsyth St. to 56 Forsyth St.

Alpin Chisholm, secretary and treasurer of the Bugbee & Niles Co., North Attleboro, is in town, this week.

From Kaaterskill, N. Y., comes the news that David Kaiser, 14 John St., was a recent contestant in an exciting golf match.

Simon Frankel, of Jos. Frankel's Sons, 578 Fifth Ave., returned from a trip to Europe, last Thursday, on the *Mauretania*.

Charles A. Keene, 180 Broadway, accompanied by his wife, returned from a trip abroad, last Thursday, on the *Mauretania*.

J. L. Bennett made a trip to Pleasure Bay, N. J., for the annual outing of the Jewelers 24-Karat Club in his automobile.

Frank Kennedy returned from a vacation in Maine last week and has resumed charge of Paye & Baker Mfg. Co.'s office in this city.

Harry Peckham, North Attleboro, Mass., is in charge of J. H. Peckham & Co.'s local office during the absence of Wm. B. Peckham.

Leary & Penfold, successors to the Rhode Island Novelty Co., Providence, R. I., have opened a New York office at 9 Maiden Lane.

About \$200 worth of damage was done to the retail jewelry store of Murray Rockwell, 2238 Fifth Ave., Wednesday afternoon.

Robert Drew, representing Parks Bros. &

Rogers in this city, returned, this week, from a two weeks' vacation spent at Asbury Park.

Steiger & Sons, 170 Broadway, announce that Henry Klein, Jr., is no longer in their employ and has not been for the last few weeks.

Harry Carpenter, the veteran watchmaker of Flushing, L. I., who retired from business last Winter, is enjoying a vacation in Buffalo.

Robert Fletcher, head pattern maker for the Estate of O. M. Draper, North Attleboro, was in New York last week, looking for new ideas.

George S. Semple, New York representative for W. & S. Blackinton Co., spent a couple of days last week at the North Attleboro factory.

Daniel S. S. Ramelli, assistant foreman in the manufacturing and repair department of A. B. Griswold & Co., New Orleans, La., is a visitor in town this week.

The firm of M. & J. Michel, 18 E. 14th st., has no connection in any way with the firm of Michel, Korkemas & Co., against whom a petition in bankruptcy was filed recently.

A. L. Wilard, who will open a first-class retail jewelry store opposite the city hall in Schenectady, Aug. 15, was formerly in charge of the diamond and watch department at John Wanamaker's.

The Art China Import Co., of New York, has been incorporated to deal in china, glass ware, etc., with a capital of \$5,000. The incorporators are: Hugo H. Freudentels, Otto Keusch and Edgar N. Dollin, all of New York.

Three small seizures were made by customs officials, last week, from passengers on the *Kronprinz Wilhelm*, among which were two sapphire rings and a gold watch valued at \$200 from a passenger who had them stowed away in his pockets.

An article of special interest to the diamond trade appeared in a recent issue of the *Saturday Evening Post*, under the caption "Fixing the Foreign Toll." It was written by Edward S. Fowler, former collector of the Port of New York.

The Oppenheimer-Brussel Importing Co., of New York, has been incorporated to manufacture and deal in jewelry, novelties, etc., with a capital of \$7,500. The incorporators are: Max Oppenheimer, Ernest H. Oppenheimer and Harry Wolfe, all of New York.

Hulse Bros, Middletown, N. Y., have made improvements in their jewelry store which adds much to its attractiveness. A partition has been torn down, making place for several new show cases. The windows have been backed with mirrors. Other improvements are contemplated.

The report of the appraisal of the estate of Hilda G. Tiffany, daughter of Louis C. Tiffany, second vice-president of Tiffany & Co., who died at Saranac Lake, Sept. 14, 1908, filed with the Surrogate, last Thursday, shows the net personal estate to amount to \$61,675. She had no real property.

Among the local firms which will have exhibits or will assist financially at the American Retail Jewelers' convention, at Omaha, are: Robert H. Ingersoll & Bro., J. R. Wood & Sons, Louis Strasburger's Son & Co., Adolph Goldsmith & Co., Drey-

fus Mfg. Co., Bernheim & Beer, Ernst Gideon Bek.

Several packages said to have contained valuable jewelry were stolen from a mail car on a Louisville & Nashville train, last week. The theft became known when the empty cases were found in a corner of a passenger car. Some of the packages bore the postmark of New York, and were addressed to New Orleans dealers, it is said.

Henry Nockin, a jeweler at 667 Columbus Ave., was one of the complainants against a young woman calling herself Grace Maidhof, who was arraigned, last week, in the West Side Court, charged with passing worthless checks. She later turned against her attorney, who was present to represent her, claiming that he was implicated in the matter.

Alfred Krower, chairman of the committee of importers and dealers in diamonds, precious and imitation stones and pearls which was appointed some time ago to fight any proposed advance on the tariff affecting their trade, is sending out letters informing the trade that paragraph 449 has been reported by the Conference Committee as passed by the House.

The Schenectady Electric Clock Co. has been incorporated with a capital stock of \$10,000 under the laws of the State of New York. The electric timepiece is the invention of the late George H. Rupley, an inventor and chemist with the General Electric Co. The directors of the company are: James R. Dyke, Jr., Charles P. Knight, Frank J. Cabot and Edward C. Hall, all of Schenectady.

Robert W. De Forest, chairman of the sub-committee on art exhibits, of which J. Pierpont Morgan is general chairman, reports that the great Hudson-Fulton art exhibit in the Metropolitan Museum of Art will be opened at an official reception, Sept. 20, and it is expected that a large number of guests will be present. The exhibit will remain open to the public until some time late in November.

W. E. Aughinbaugh and W. M. Kelly have engaged quarters in the Silversmiths' building, 15 Maiden Lane, and will be in this city until some time in September, when they will go to South America as representatives of the Gorham Co. and some other lines. Mr. Aughinbaugh has been in South America for a number of years, and is thoroughly conversant with trade conditions there. Mr. Kelly has traveled widely in the Orient, representing American firms.

Justice Brady, last week, signed an order in the Supreme Court, appointing Frank Hanson, United States Consul in Paris, as special commissioner to take the testimony of Louis J. Cartier and Pierre C. Cartier, two French jewelers who are suing Howard Gould for 20,000 francs. The plaintiffs allege this amount is due for jewelry bought and repaired by Howard Gould and Katherine Gould during a recent trip to Paris. The testimony taken by the Consul will be used here in the trial of the action.

The silver service for the battleship *Delaware* referred to in last week's issue of THE JEWELERS' CIRCULAR—WEEKLY as having been awarded to Millard F. Davis, is to be made for him by the Gorham Co.

New York Notes.

(Continued from page 79.)

The order for this service and the cruiser order recently received by the Gorham Co. makes 26 services for presentations that have been awarded to that firm for battleship and cruiser services. The successful designs are now on exhibition at Mr. Davis' store, in Wilmington. He will also exhibit the service when completed.

Inspector Timothy Donahue of the customs service, who was watching the passengers of the *Kaiserin Auguste Victoria* disembark, Saturday, noticed that a cabin passenger was carrying an overcoat on his arm. The customs man demanded to be allowed to examine the pockets of the coat, but found nothing of value. He did discover, however, several empty jewel boxes. Finally the passenger brought out half a dozen pieces of jewelry which he had not declared. In the lot were brooches, rings, pins and chains. The customs officials say the goods seized are valued at about \$500. The man and his wife were allowed to leave the pier.

Wm. J. Tigat, formerly with Eisler & Laubheim, will represent the new firm of Eisler & Sussman, 51 Maiden Lane, in New England and the middle western States, a territory which he formerly covered for the other firm. The new firm of Eisler & Sussman, which was recently formed, has as its members Maurice Eisler, who was formerly of Eisler & Laubheim, and Nathan Sussman, who conducts a retail store at 2573 Atlantic Ave., Brooklyn. Mr. Sussman was originally for five years in the employ of L. Adler & Son and finally with Stern Bros. & Co. He started on his own account in August, 1904, and will continue his store in Brooklyn in connection with the new partnership which he has formed.

United States district attorneys are instituting a procedure for the forfeiture of \$12,000 worth of jewelry brought into this port some time ago by a Mexican named Calso del Villar, a real estate dealer from Mexico City, who arrived at this port, April 24, on the *Morro Castle* without declaring the jewelry. The jewelry, which was examined by the appraiser, consisted of a ruby and diamond necklace of floral design, so constructed that it could be divided and used as two bracelets, and a bracelet set with heavy gold and three big stones, a ruby, an emerald and diamonds. In addition to these few choice articles of jewelry there were several small diamonds. The necklace was appraised at \$500 and the bracelet at \$7,000.

That Burnett Y. Tiffany, son of the late Charles L. Tiffany, who died on Feb. 18, 1902, cannot compel his brother, Louis C. Tiffany, and his brother-in-law, Alfred Mitchell, as trustees of two trust funds created by his father for his benefit, to allow him more than \$18,000 a year, was decided by Judge Bischoff, in the Supreme Court, last week. The decision was on an application by Burnett Y. Tiffany to enjoin them from going below that sum in any future allowance, and from paying over or dividing between Louis C. Tiffany and Annie O. Mitchell, who is a sister of the

plaintiff, any sum or sums accumulated in their hands as trustees out of the income of the trust funds. Judge Bischoff, in denying the application, said the provisions of the will whereby the trustees for the benefit of the plaintiff were created gave absolute discretion to them as to the amount of the income to be allowed to the plaintiff.

The smuggling into the Port of New York from Italy of coral and medallions which the customs authorities have endeavored so hard to prevent in the past, is, it would appear, occurring again. Two Italians were arrested last Thursday and locked up at the Brooklyn police headquarters, to be turned over to the Federal authorities. The two men arrested are said to be Ciro Sorrentino, who arrived last Thursday from Naples on the *Taormina*, and Vincenzo Onorato, whom the first man implicated. The police discovered a quantity of goods which they alleged had been smuggled into this port within the past few days. The detectives found a belt in the possession of Sorrentino, so they say, containing a valuable assortment of coral rings and brooches. The arrests were made at the request of the Federal authorities. The police say that these two men, working in conjunction with others, have smuggled into this country a large quantity of jewelry within the last year.

Henry Silberfeld, a jeweler at 1395 Broadway, was unsuccessful, last week, in an attempt to secure the reversal of a diamond appraisal made by George W. Wanamaker, appraiser of the port. Mr. Silberfeld imported the diamonds from Antwerp, June 28, 1908. They were entered at New York under Invoice 6119. The appraiser was dissatisfied with the prices at which the gems were invoiced, and advances were imposed bringing the goods up to the figure regarded by the appraiser as representing the foreign market value. Duty was then assessed at the increased valuation, and to this action the importer took exception. General Appraiser Chamberlain, who reviewed the local appraiser's action, found it impossible to support Silberfeld's contention. He supports the advances made by Mr. Wanamaker with some exceptions. Some of the precious stones entered as costing 175 francs per carat in Antwerp were held by Mr. Chamberlain to be worth 200 francs per carat; 90 invoiced as having a foreign value of 300 francs per carat were allowed to come in at the entered price. Among those on which the entry values are changed was a package containing 16 3/32 carats, entered at 150 francs per carat, and advanced to 165 francs; a package containing 14 15/16 carats, entered at 50 francs per carat, was advanced to 76 francs per carat; 37 7/16 carats, entered at 175 francs per carat, was advanced to 200 francs per carat; 16 1/2 carats, entered at 118 francs, were advanced to 125 francs per carat. Other advances were also made.

The Iowa State Board of Examiners in Optometry is sending out literature calling attention to the rules and regulations recently adopted by the board. Examinations in future shall begin at 8 o'clock A. M. on the dates set by the board. The first examination will be held Sept. 21 and the second examination Nov. 16.

Newark.

Durand & Co. have closed down for two weeks for the annual inventory.

Charles E. Purdum, of the Texas Jewelers' Supply Co., Fort Worth, Tex., was here during the week.

George Bowerman, of the Chas. C. Wientge Co., is back from a trip to Maine, where he spent several weeks.

A. T. Teague, formerly with A. Stowell & Co., Boston, Mass., has started on a western trip for Link & Angell.

Herman C. Schwartz, of the Chas. C. Wientge Co., has started on a tour of the middle west. He will make Pittsburg and surrounding towns first.

All the jewelry plants in the city are in full swing again, most of them with a full complement of hands. Reports indicate that the Fall season will be brisk.

George F. Granbery's yacht *Intrepid* took part in the deep sea race around Long Island, in which 13 of the best of the smaller yachts in eastern waters were entered for a distance of 210 nautical miles.

The United Optical Co., Camden, N. J., filed papers of incorporation with the Secretary of State at Trenton, last week. The capital stock is \$50,000 and the incorporators are William F. McLean, Henry McAllister and Joseph A. Schmid.

Robert F. Armstrong, formerly western representative for Bippart, Griscom & Osborn, Newark, has become a member of the firm of Brosn & Armstrong Co., Washington, D. C., which will be incorporated shortly to do a jewelry business.

John Harris, a retail dealer in this city, left last Thursday for Omaha, Nebr., where he is to attend the annual convention of the National Retail Jewelers' Association, which is to be in progress for three days, beginning Aug. 3. Mr. Harris goes as a delegate from the New Jersey Retail Jewelers' Association, of which he is second vice-president. He plans to stop at Chicago, Niagara Falls and other places of interest on his way home.

Before the eyes of a score of children playing on the sidewalk, a thief stole eight valuable watches from the window of McManus Bros' store, Elizabeth, N. J. The timepieces were to have been awarded in the big Diocesan meet, which will be held in Newark, next week. The thief rifled the window while a crowd of children watched him. He overlooked several valuable medals and one watch. The alarm was finally given by a boy whose suspicions were aroused, but when the police arrived the thief had made his escape.

Accused of having robbed several jewelry shops and any number of cottages in Asbury Park, Palmer Johnson, a negro, is in the county jail at Freehold awaiting action by the Grand Jury. Johnson, who has also been known as Farmer John Field, John Coleman, Long John and Farmer Johnson, is one of the most daring thieves that has ever operated at a Summer resort. He virtually admitted his guilt and boastfully told of robberies which had puzzled the police of other cities. When arrested he had several stolen watches and articles of jewelry with him. At his hiding place watches and diamonds worth several thousand dollars were found.

Tariff Provisions Affecting the Jewelry and Kindred Interests as Amended by Conference Committee.

WASHINGTON, D. C., Aug. 3.—The following are the provisions of the tariff affecting jewelry and kindred interests as it has been amended by the Conference Committee:

(95) China, porcelain, parian, bisque, earthen, stone and crockery ware, including clock cases with or without movements; pill tiles, plaques, ornaments, toys, charms, vases, statues, statuettes, mugs, cups, steins and lamps, all the foregoing wholly or in chief value of such ware; painted, colored, tinted, stained, enameled, gilded, printed or ornamented or decorated in any manner, and manufactures in chief value of such ware not specially provided for in this section, 60 per cent. ad valorem.

(94) China, porcelain, parian, bisque, earthen, stone and crockery ware, plain white, plain brown, including clock cases with or without movements, pill tiles, plaques, ornaments, toys, charms, vases, statues, statuettes, mugs, cups, steins and lamps, all the foregoing wholly or in chief value of such ware, not painted, colored, tinted, stained, enameled, gilded, printed, or ornamented or decorated in any manner, and manufactures in chief value of such ware not provided for in this section, 55 per cent. ad valorem.

(98) Glass bottles, decanters and all articles of every description composed wholly or in chief value of glass, ornamented or decorated in any manner, or cut, engraved, painted, decorated, ornamented, colored, stained, silvered, gilded, etched, sand blasted, frosted, or printed in any manner, or ground (except such grinding as is necessary for stoppers or for purposes other than ornamentation), and all articles of every description, including bottles and hottle glass ware, * * * * all of the foregoing, not specially provided for in this section, filled or unfilled, and whether their contents be dutiable or free, 60 per cent. ad valorem; *Provided*, That for the purposes of this act, bottles with cut glass stoppers shall, with the stoppers, be deemed entireties.

The above was as proposed by the Senate and was accepted by the Conference Committee.

(105) Spectacles, eyeglasses and goggles, and frames for the same or parts thereof, finished or unfinished, valued at not over 40c. per dozen, 20c. per dozen and 15 per cent. ad valorem; valued at over 40c. per dozen and not over \$1.50 per dozen, 45c. per dozen and 20 per cent. ad valorem; valued at over \$1.50 per dozen, 50 per cent. ad valorem.

The foregoing is as the bill was originally introduced, no changes having been made.

(106) Lenses of glass or pebble, molded or pressed, or ground and polished to a spherical, cylindrical or prismatic form, and ground and polished plano or coquill glasses, wholly or partly manufactured, with the edges unground, 45 per cent. ad valorem; if with their edges ground or beveled, 10c. per dozen pairs and 45 per cent. ad valorem.

(108) Opera and field glasses, telescopes, microscopes, photographic and projection lenses and optical instruments, and frames or mountings for the same; all the foregoing not specially provided for in this section, 45 per cent. ad valorem.

(109) Stained or painted glass windows, or parts thereof, and all mirrors, * * * * and all glass or manufactures of glass or paste or of which glass or paste is the component material of chief value, not specially provided for in this section, 45 per cent. ad valorem.

The committee agreed to the Senate amendments to the foregoing paragraph:

(110) Fusible enamel, 25 per cent. ad valorem; opal or cylinder glass tiles or tiling, 60 per cent. ad valorem.

The provision for glass tiling was a Senate amendment and was concurred in.

The following paragraph is a substitute offered by the Conference Committee:

(111) Marble and onyx * * * * sawed or dressed, over two inches in thickness, \$1 per cubic foot; slabs or paving tiles of marble or onyx, containing not less than four superficial inches, if not more than one inch in thickness, 8c. per superficial foot; if more than one inch and not more than one and one-half inches in thickness, 10c. per superficial foot; if more than one and one-half inches and not more than two inches

in thickness, 12½c. per superficial foot; if rubbed in whole or in part, 2c. per superficial foot in addition; mosaic cubes of marble or onyx, not exceeding two cubic inches in size, if loose, ¼ of 1c. per pound, and 25 per cent. ad valorem; if attached to paper or other material, 5c. per superficial foot and 35 per cent. ad valorem.

The following is the Senate amendment:

(112) Marble, breccia, onyx, alabaster and jet, wholly or partly manufactured into * * * * vases, and other articles, or of which these substances or either of them is the component material of chief value, and all articles composed wholly or in chief value of agate, rock crystal, or other semi-precious stones, except such as are cut into shapes and forms fitting them expressly for use in the construction of jewelry, not specially provided for in this section, 50 per cent. ad valorem.

(154) Table, butchers', carving, cooks', hunting, kitchen, bread, butter, vegetable, fruit, cheese, * * * * forks and steels, finished or unfinished; if imported with handles of mother-of-pearl, shell, ivory, silver, nicked silver, or other metal than iron or steel, 14c. each; with handles of deer horn, 10c. each; with handles of hard rubber, solid bone, celluloid or other pyroxyline material, 4c. each; with handles of any other material than those above mentioned, 1c. each, and in addition, on all the above articles, 15 per cent. ad valorem; any of the knives, forks or steels enumerated in this paragraph, if imported without handles, 40 per cent. ad valorem; *Provided*, That none of the above named articles shall pay a less rate of duty than 40 per centum ad valorem; *Provided*, That all the articles specified in this paragraph when imported on and after Oct. 1, 1909, shall have the name of the maker or purchaser and beneath the same the name of the country of origin indelibly stamped or branded thereon in a place that shall not be covered thereafter.

The above paragraph, which has been adopted as amended by the Senate, reduces the duty on the better grades from 16c. to 14c. each; on the second grade, from 12c. to 10c. each, and on the third grade, from 1½c. to 1c. each.

(187) Penholder tips, penholders and parts thereof, 5c. per gross and 25 per cent. ad valorem; gold pens, 25 per cent. ad valorem; fountain-pens, stylographic pens, 30 per cent. ad valorem; combination penholders, comprising penholder, pencil, rubber eraser, automatic stamp, or other attachment, 40 per cent. ad valorem; *Provided*, That pens and penholders shall be assessed for duty separately.

This is a Conference Committee amendment, as is the following paragraph for watch movements:

(192) Watch movements, indicating time detectors, whether imported in cases or not, if having more than seven jewels, 70c. each; if having more than seven jewels and not more than 11 jewels, \$1.35 each; if having more than 11 jewels and not more than 15 jewels, \$1.85 each; if having more than 15 and not more than 17 jewels, \$1.25 each and 25 per cent. ad valorem; if having more than 17 jewels, \$3 each and 25 per cent. ad valorem; watch cases and parts of watches, chronometers, box or ship, and parts thereof, 40 per cent. ad valorem; lever clock movements, having jewels in the escapement, and clocks containing such movements, \$1 each and 10 per cent. ad valorem; all other clocks and parts thereof, not otherwise provided for in this section, whether separately packed or otherwise, not composed wholly or in chief value of china, porcelain, parian, bisque or earthen ware, 40 per cent. ad valorem; all jewels for use in the manufacture of clocks or watches, 10 per cent. ad valorem; enameled dials for watches or other instruments, 3c. per dial and 40 per cent. ad valorem; *Provided*, That all watch and clock dials, whether attached to movements or not, shall have indelibly painted or printed thereon the country of origin, and that all watch movements, lever clock movements with jewels in the escapement, and cases of foreign manufacture shall have the name of the manufacturer and country of manufacture cut, engraved or die-sunk conspicuously and indelibly on the plate of the movement and the inside of the case, respectively, and the movements shall also have marked thereon by one of the methods indicated the number of jewels and adjustments, said number to be expressed both

in words and in Arabic numerals, and none of the aforesaid articles shall be delivered to the importer unless marked in exact conformity to this direction.

The Conference Committee claims that while the foregoing is entirely a new arrangement as to classification, the rates of duty will remain the same as at present.

The following paragraph has been rearranged by the committee, but the duties remain the same:

(421) Beads and spangles of all kinds, including imitation pearl beads, not threaded or strung, or strung loosely on thread for facility in transportation only, 35 per centum ad valorem; fabrics, * * * * and other articles not specially provided for in this section, composed wholly or in chief value of beads or spangles made of glass or paste, gelatin, metal, or other material, * * * * 60 per cent. ad valorem.

(427) Buttons * * * * not specially provided for in this section, and all collar and cuff buttons and studs composed wholly of bone, mother-of-pearl, or ivory, 50 per cent. ad valorem.

The Senate classifications for jewelry have been allowed to stand, as follows:

(444-448) Chains, pins, collar, cuff and dress buttons, charms, combs, millinery and military ornaments, together with all other articles of every description, finished or partly finished, if set with imitation precious stones composed of glass or paste (except imitation jet), or composed wholly or in chief value of silver, German silver, white metal, brass or gunmetal, whether or not enameled, washed, covered, plated or alloyed with gold, silver or nickel, and designed to be worn on apparel or carried on or about or attached to the person, valued at 20c. per dozen pieces, 1c. each and in addition thereto ⅓ of 1c. per dozen for each 1c. the value exceeds 20c. per dozen; all stampings and materials of metal (except iron or steel), or of metal set with glass or paste, finished or partly finished, suitable for use in the manufacture of any of the foregoing articles (except chain valued at less than 30c. per yard other than nickel or nickel-plated chain), valued at 72c. per gross, 3c. per dozen pieces and in addition thereto ½ of 1c. per gross for each 1c. the value exceeds 72c. per gross; rope, curb, cable and other fancy patterns of chain, without bar, swivel, snap or ring, composed of rolled gold plate or of silver, German silver, white metal or brass, not exceeding one-half of one inch in diameter, breadth or thickness, valued at 30c. per yard, 6c. per foot and in addition thereto ⅓ of 1c. per yard for each 1c. the value exceeds 30c. per yard; finished or unfinished bags, purses and other articles, or parts thereof, made in chief value of metal mesh composed of silver, German silver, or white metal, valued at \$2 per dozen pieces, 10c. per piece and in addition thereto ⅓ of 1c. per dozen pieces for each 1c. the value exceeds \$2 per dozen; all the foregoing, whether known as jewelry or otherwise and whether or not denominatively or otherwise provided for in any other paragraph of this act, 25 per centum ad valorem in addition to the specific rate or rates of duty herein provided; all articles commonly or commercially known as jewelry or parts thereof, finished or unfinished, including chain, mesh and mesh bags and purses composed of gold or platinum, whether set or not set with diamonds, pearls, cameos, coral or other precious or semi-precious stones, or imitations thereof, 60 per centum ad valorem.

The Conference Committee amendment for pearls, etc., is as follows:

(419) Pearls and parts thereof, drilled or undrilled, but not set or strung, 10 per cent. ad valorem; diamonds, coral, rubies, cameos and other precious stones and semi-precious stones, cut but not set, and suitable for use in the manufacture of jewelry, 10 per cent. ad valorem; imitation precious stones, including pearls and parts thereof, for use in the manufacture of jewelry, doublets, artificial or so-called synthetic or reconstructed pearls and parts thereof, rubies, or other precious stones, 20 per cent. ad valorem.

This is adopting the House rate on diamonds and precious stones advanced in condition or value from their natural state instead of the 15 per cent. as proposed by the Senate, and those in their natural state were restored again to the free list, as contemplated in the House bill.

(462) Manufactures of amber * * * * or of which it is the component material of chief value, not specially provided for in this section, 25 per cent. ad valorem.

(464) Manufactures of gutta-percha, ivory, vegetable ivory, mother-of-pearl and shell, or of which these substances or any of them is the component material of chief value, not specially provided for in this section, and shells engraved, cut, ornamented or otherwise manufactured, 35 per cent. ad valorem.

Paragraph 480, which is the catch-all clause for unenumerated unmanufactured articles, places a duty of 10 per cent. on same, and on manufactured or partly unmanufactured articles not specially provided for a duty of 20 per cent. ad valorem.

On the free list are the following paragraphs:

(485) Agates, unmanufactured.
(488) Amber and amberoid, unmanufactured.
(522) Brazilian pebble, unwrought or manufactured.

(524) Bullion, gold or silver.
(542) Coins, of gold, silver, copper or other metal.

(546) Coral, marine, uncut and unmanufactured.
(555) Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, including glaziers' and engravers' diamonds not set.

(556) Miners' diamonds, whether in their natural form or broken, and bort, any of the foregoing not set, and diamond dust.

(576) Glass enamel, white, for watch and clock dials.

(577) Glass plates or disks, rough-cut or unwrought, for use in the manufacture of optical instruments, spectacles and eyeglasses, and suitable only for such use; *Provided*, however, that such disks exceeding eight inches in diameter may be polished sufficiently to enable the character of the glass to be determined.

(579) Goldbeaters' molds and goldbeaters' skins.
(596) Ivory tusks in their natural state or cut vertically across the grain only, with the bark left intact, and vegetable ivory in its natural state.

(598) Jet, unmanufactured.
(624) Medals of gold, silver or copper, and other metallic articles actually bestowed as trophies or prizes, and received and accepted as honorary distinctions.

(643) Ores of gold, silver or nickel, and nickel matte, sweepings of gold and silver.

(647) Pearl, mother-of-, and shells, not sawed, cut, polished or otherwise manufactured, or advanced in value from the natural state.

(649) Britannia metal and pewter, old, and fit only to be remanufactured.

Connecticut.

A patent has been granted to P. Lux, Waterbury, on a ship's bells clock.

W. E. Porter, New Haven, has been granted a patent on a stem winding and stem setting watch.

D. J. Hurley has assigned to the New Haven Clock Co., New Haven, two patents for designs on clock cases.

Extensive improvements are being made and a large addition erected at the factory of the E. Ingraham Co., Bristol.

Landers, Frary & Clark, New Britain, have filed a certificate to increase their capital stock to \$15,000.

Col. C. H. Case, Hartford, was one of the pallbearers at the funeral of Dr. Mathew T. Newton, in Suffield, last week.

Henry L. Gaplin, son of the late Samuel A. Gaplin, who was at one time president and general manager of the New Haven Clock Co., New Haven, was recently appointed secretary of the Union Trust Co., New Haven.

J. W. Hahn, engaged in the optical business in New York, has purchased a parcel of real estate consisting of 13 acres in Richmond, this State, and also six acres which adjoin that property. The purchase is located in the Berkshires.

Plans for the \$70,000 plant of the Whiting Mfg. Co., Bridgeport, were approved by the building commissioners at their meeting one night last week. The plans call for two brick buildings, each two stories high, and a brick power plant.

Eli Phelps Ellsworth, at one time manager of the Brooklyn Watch Case Co., died July 28 at his home in Bridgeport, aged 71 years. The deceased was born in Windsor, and at the outbreak of the Civil War formed Company A of the 22d Regiment, with which he served as an officer until its discharge. He is survived by a widow and one daughter.

The factory of the New England Watch Co., Waterbury, was closed for the annual vacation July 30 until Aug. 9. The shipping room and office will be open during that time. The midsummer meeting and banquet of the sales department were held in the Hotel Elton, Waterbury, July 14. The southern travelers are already in the field, and the rest of the traveling force will be in their respective territories Aug. 2.

John Finnegan, one of the oldest employees of the Meriden Britannia Co., and a well-known resident of Marion, committed suicide, last week, at that place after having been ill for a year. The deceased is believed to have been rendered temporarily insane, owing to his sufferings. Mr. Finnegan was 75 years of age and was a veteran of the Civil War. He was a member of Marion Post, G. A. R. He enlisted April 25, 1861, in Company B, Third Connecticut Volunteers, and was discharged Aug. 12, 1861. He re-enlisted in Company F, 15th Connecticut Volunteers, in 1862, and served three years, until he was finally mustered out in 1865 at the close of the war.

The stock in the store of Hayes Bros., Glens Falls, N. Y., was slightly damaged by water during a recent fire at that place where property valued at \$10,000 was destroyed.

A. T. Mizell is opening a new store in Norton, Kans.

J. W. Haynes is preparing to start in business in Milton, Ore.

George R. Blose will shortly begin business in McKeesport, Pa.

C. E. Hunter will soon commence business in Bowling Green, O.

Ora Stetson expects to open a store in Harrisonville, Mo., in the near future.

Joseph Goldman has opened a jewelry store on National Ave., Milwaukee, Wis.

Louis Katz has opened a new retail jewelry store at 182 E. Genesee St., Buffalo, N. Y.

A new store has been opened at 441 Smithfield St., Pittsburg, Pa., by S. Maltnsky.

F. W. Brock, Honeapath, S. C., has completed arrangements to open a jewelry store in Elberton, Ga.

W. D. Tucker recently opened a repair shop in Columbus, O. The store will be located in E. Long St.

A first class retail jewelry establishment will be opened by A. L. Willard, Schenectady, N. Y., about Aug. 15.

The Brown & Armstrong Co. will soon be incorporated in Washington, D. C., to engage in the jewelry business.

The Schenectady Electric Clock Co. has been incorporated under the laws of the State of New York with a capital stock of \$10,000. The directors are: J. R. Dyke, Jr., C. P. Knight, F. J. Cabot and E. C. Hall, all of Schenectady.

The Jamestown Clock Co. was recently incorporated to do business in Jamestown, N. Y. The incorporators are: Chas. E. Metzger, Warren, Pa.; Frederick J. Van Cise and Wm. Van Cise, Mayville, and Wm. P. Stevens, Jamestown.

Herman Meyrowitz, New York, Files Voluntary Petition in Bankruptcy.

A voluntary petition in bankruptcy was filed yesterday in the United States District Court, New York, by Herman Meyrowitz, a dealer in jewelry at 225 W. 123d St., New York, showing liabilities of \$6,246 in unsecured claims and assets of \$4,141, of which amount the sum of \$2,250 is in promissory notes, bills and securities.

The creditors for amounts of \$50 or upwards are: Hammel, Riglander & Co., \$700; Edwin Lowe & Co., \$900; Lyons Mfg. Co., \$300; Hipp. Didisheim & Bro., \$250; S. O. Bigney & Co., \$200; Alois Kohn & Co., \$287; C. H. Cooke Co., \$200; George L. Brown & Co., \$100; D. F. Briggs Co., \$550; S. & B. Lederer Co., \$425; Charles A. Becker & Co., \$250; Waite, Thresher Co., \$200; Frisch Bros., \$200; Andrew O. Kiefer, \$250; Meyrowitz Bros., \$91; Albert Lorsch & Co., \$200; Colonial Mercantile Agency, \$50; L. & B. Lehr, \$1,000.

THE sales of Illinois watches for the month of July, 1909, were larger than any previous month in the history of the company—this is the best evidence that the retail jeweler is pushing the sale of Illinois movements because they give his customers the best satisfaction.

The established selling prices on these movements insure him a satisfactory margin of profit.

Sufficient orders are now entered for future delivery to justify the prediction that there will be a great shortage of Illinois movements this Fall.

We suggest the advisability of dealers placing their orders with our jobbers at once.

Chicago Notes.

E. A. Dayton is on a trip to the far west. A. B. Towers, manager of Lapp & Fler-shen, is on his vacation.

Chas. S. Purdy left, last week, for Attleboro and eastern points.

John Watson is opening a new store at 55th St. and Lexington Ave.

T. P. Owen and wife, York, Nebr., were in Chicago a few days last week.

R. Wilson, representing the C. E. Hancock Co., has returned from a trip.

Chas. P. Crane, representative of the Bliss Bros. Co., is back from a trip.

J. W. Buchanan and wife, Benton, Ill., have been in Chicago in the past week.

George H. Thomas left last week on a three weeks' trip to Denver and middle west points.

S. Peosner has moved from room 204 Silver-smith building to room 912 in the same building.

B. Weinstein, 531-533 S. Halsted St., is taking a two weeks' outing in northern Michigan.

J. W. Stoneburner, representing the C. H. Allen Co., leaves, this week, for a middle west trip.

F. D. White, representing C. O. Sweet & Son Co., leaves this week on a trip to Denver and western points.

E. J. Walther, representing the D. F. Briggs Co., left, last week, for a trip to Denver and intervening points.

A. M. Chadbourne, manager of the Chicago office of the James E. Blake Co., has returned from a vacation in the east.

A. L. Fischer, of the silverware department of Norris, Allister & Co., is on a vacation trip to Boston and eastern points.

Theo. Jacobs, who has just returned from a far west trip, leaves, this week, to join his family at their cottage at Brown's Lake, Wis.

George N. Strawn, with E. A. Dayton & Co., returned, last week, from a five weeks' trip through the west and a visit to Seattle.

W. V. Ghislin, manager of the Chicago office of the Gorham Co., is making a visit to the factory at Providence, R. I., and to eastern points.

R. A. Talbot, of the New York office of the Alvin Mfg. Co., stopped over here on his way to attend the convention at Omaha. Mrs. Talbot accompanied him.

A. W. Sproehnle, of Sproehnle & Co., was recalled from his vacation because of

the death of his brother-in-law, James M. Kuhl, who died suddenly, Tuesday evening of last week.

Frank E. Booth, who was formerly with the L. Manasse Co., has returned from a four months' trip to the Coast, and he now proposes to locate here and start up in business for himself.

Misses Helen and Anna Dayton, daughters of E. A. Dayton, are making a visit to the Pacific Coast, and will visit their brother, who is with the E. W. Reynolds Co., Los Angeles, Cal.

F. E. Hyatt, of the Chicago office of the Philadelphia Watch Case Co., will attend the Omaha convention, as will also E. M. Lunt, of the Towle Mfg. Co. Mr. Lunt will address the convention.

E. T. Mudge and David Martin are the names of two new salesmen with Norris, Allister & Co. Mr. Mudge, who was formerly in business at Homer, Ill., will cover territory in the far west, while Mr. Martin, whose father is in business at Kahoka, Mo., will cover Missouri.

L. A. Mackown, for seven or eight years manager of the Chicago office of the Oneida Community, Ltd., has severed his connections with the company. M. E. Kinsley, from the Oneida office and formerly assistant sales manager of the hardware department, succeeds Mr. Mackown at this point.

Cleveland.

Mrs. Katie Carroll Gear, wife of Frank N. Gear, secretary-treasurer of the Gear Galley Co., died July 25. Besides her husband she is survived by three sons.

Frank J. Rossback, salesman for W. A. Sturgeon, Detroit, Mich., was arraigned in police court Saturday and held for the Detroit authorities. Rossback was arrested by Detective Fitchens while trying to dispose of two gold bracelets in a downtown jewelry store. Diamonds and other jewelry valued at over \$3,000 were found in his possession.

Two brothers have disagreed over four inches of land. Maurice S. Melzer, a jeweler, and his brother, a clothier, own lots adjoining each other at 5464 and 5468 Broadway. The clothier started to erect a brick building, which is said to encroach on the jeweler's lot. The question has been taken to the courts and it is unlikely that it will be settled for some time.

The retail jewelry store of the Webb C. Ball Watch Co. will be moved early this Fall

from the corner of Superior Ave. N. W. and W. 3d St., where it has been for 30 years, to the Kingmore building, 1108 Euclid Ave. The wholesale railroad watch business, conducted by the company, will be carried on at the Superior Ave. store. The company will place a \$20,000 addition in the rear of the Kingmore building, which it owns. The store will extend through the present building to the rear of the addition, and will have a total depth of 130 feet.

Toledo.

C. E. Hunter, who, for several years, conducted a jewelry store in Bowling Green, and some time ago sold out to go west, has returned to his native city, and will again start in his former business. He spent a part of last week in Toledo selecting his stock.

In order that full regal display may be made, A. L. Spitzer, director-general of the King Wamba festival, is in New York to buy the crown jewels for the king and queen. Instructions have been sent to Paris to secure an exact counterpart of a real king's crown for the occasion.

A contract has just been closed by the Rev. Augustine M. Hackert, pastor of St. Mary's Church, of this city, with the E. Howard Clock Co., New York, for the installation of a tower clock in the church tower. The clock is the bequest of John Streicher, a veteran contractor of this city, who died recently, and it is to be installed Oct. 13. There will be four dials, each six and a half feet in diameter, and the hours will be struck on a large bell, while the quarter-hours will be announced on a smaller one. This will be the only striking tower clock in the city.

F. A. Vogt, Mishawaka, Ind., has been appointed delegate to represent the Indiana Retail Jewelers' Association at the national convention in Omaha, Nebr. Indiana furnishes five delegates to the convention.

A colored man named Moore has been taken into custody at Hayden, Colo., charged with the robbery of the store of Poliak Bros., Trinidad, Colo., from whom 18 watches and several rings were stolen.

While fishing on the Fox river, three miles below Montello, Wis., J. Parkinson, a bridge tender at the Grand river locks, Endeavor, Wis., recently found three pearls, the largest of which is valued at about \$100.

Miss M. A. Trautman, of the Hess & Culbertson Jewelry Co., is spending a two weeks' vacation in Cleveland.

E. Idler, manager of the repair department of the Hess & Culbertson Jewelry Co., will spend August at Burt Lake, Mich.

Miss Ella Buchfelder, of the St. Louis Clock & Silverware Co., has returned from a two weeks' river trip to Keokuk, Ia.

J. J. Menges, of the Mermod, Jaccard & King Jewelry Co., returned Thursday from a trip to New York and seashore resorts.

Alex. Littleton, head of the engraving department of the Hess & Culbertson Jewelry Co., is spending a month at Asheville, N. C.

Martin Hacker will return Saturday from a trip to Montana and Dakota. During his absence his business was in charge of M. Acker.

George J. Hess, president of the Hess & Culbertson Jewelry Co., will leave Tuesday for Waupaca, Wis., where he will remain until Sept. 1.

J. Bolland, president of the Bolland Jewelry Co., will leave next week for Atlantic City to join his family. They will return about Sept. 15.

Leo Bauman, of the Bauman-Massa Jewelry Co., has returned from a buying trip to New York. He was accompanied by his wife on the trip.

I. N. Hahn, president of the S. A. Rider Jewelry Co., will return Sunday from a trip through the southwest and the northwest and Arizona.

H. L. Fischaker, advertising manager of the Mermod, Jaccard & King Jewelry Co., spent last Sunday with a party of friends at Piasa Chautauqua.

T. H. Edwards, Clarksville, Mo., who was in St. Louis in the past week, bought new stock for his store, which he has remodeled and enlarged.

F. W. Drosten, president of the F. W. Drosten Jewelry Co., will leave Monday, accompanied by Mrs. Drosten, for New York and the seashore.

S. J. Arnold, manager of the jewelry business of Charles S. Erber, at Texarkana, Ark., who has been here for two weeks, left Monday for Texarkana.

Sol Summerfield, of the Furstenwirth-Uhl Jewelry Co., will come in next week from his territory for the market trade. He will remain a month.

Samuel Koher, of the Maritz-Koher Jewelry Mfg. Co., left, Tuesday, for a business trip through the south and southwest. He will be gone six weeks.

Nadich & Stiffelmann will move in a few days from their present quarters on the sixth floor of the Holland building to three larger apartments on the same floor.

Emil Niehaus, of the Hess & Culbertson Jewelry Co., left Monday, accompanied by his wife and daughter, for a two weeks' trip up the Mississippi River to St. Paul.

Otto Buder, 2118 S. Broadway, has leased a cottage for the Summer at Nugent's Bluff, Elsie, Ill. His family are living there and he spends the week-ends there.

Max Bauman, city salesman, and William H. Felcher, bookkeeper of the Bauman-Massa Jewelry Co., will leave Aug. 8 for Elkhart Lake, Wis., where they will spend a three weeks' vacation.

Aubrey Lindsley and William Deuber, who have been planning a launch trip among the pearl fishers on the Arkansas, Black and White rivers, have been delayed, in their departure, by floods, but expect to leave in a short time.

Business in Alaska is quiet, according to letters received in St. Louis from H. Estinghausen, who is traveling there. He is now at Ketchikan. From there he will go to Fairbanks and Nome and will then return by way of Seattle.

Messrs. Skaggs and Burnett, composing the Skaggs-Burnett Co., formerly in business at Goldthwaite, Tex., but recently incorporated to carry on business at Winters, Tex., with a capital stock of \$20,000, were both in St. Louis during the week making purchases.

Adolph Lapping, who came to St. Louis several months ago from Atlanta, Ga., and, after being employed for a time by the Eisenstadt Mfg. Co., opened a jewelry store at 721 Morgan St., has announced that he will dispose of his business and will return to Atlanta.

A series of mysterious burglaries in a jewelry store at Bloomington, Ill., have been explained by the discovery that a rat was the burglar. When a brooch was found jammed in a rat hole at the window casing it afforded a clew. The casing was removed and all the stolen articles were found in a rat's nest.

Miss A. B. Falkenhainer, cashier of the F. W. Drosten Jewelry Co., will leave Saturday, accompanied by her mother and sister, for an extended western trip. They will visit the exposition at Seattle and will also make stops at Portland, San Francisco and Los Angeles. They will be gone a month. During Miss Falkenhainer's absence her duties will be attended to by Miss M. Eddie.

Out-of-town buyers in St. Louis in the past week were: J. Oppenheimer, McAlester, Okla.; Miss E. Martin, of C. E. Willis Co., Edwardsville, Ill.; H. W. Foerste, Okawville, Ill.; Louis P. DeRousse, Waterloo, Ill.; T. H. Edwards, Clarksville, Mo.; Herman Vollmer, Princeton, Ind.; W. C. Dauernmiller, Lebanon, Ill.; George R. Summers, Sturgeon, Mo.; Skaggs and Burnett, Winters, Tex.

The Jewelers Security Alliance paid a reward of \$100 last Thursday to Policemen R. D. Ward and Frank Munsill for the capture and conviction of three burglars who, on May 4, broke into the store of the Wm. F. Mueller Jewelry Co., at 1804 Olive St., and carried off jewelry worth several hundred dollars. The men were captured in another store half an hour after they had entered the Mueller store, and the jewelry was recovered. The St. Louis police say that the rewards offered and paid by the Jewelers' Security Alliance has done much to discourage jewelry robberies in St. Louis.

Kansas City.

C. G. Chapman, with J. R. Mercer, is spending a vacation in South Haven, Minn.

Arthur T. Mizell was in the city, last week, buying jewelry for a store which he is just opening at Norton, Kans.

Ora Stetson, formerly of Garden City, Mo., was in this city, last week, and announced that he was going to locate in Harrisonville, Mo.

Ed. N. Dunning, who has been in business in Kansas City, Kans., for many years, is advertising a closing out sale of his stock. He will go to Texas.

J. R. Mercer leaves next Saturday for his Summer trip to Canada, accompanied by Mrs. Mercer. They will be away for six weeks to two months.

Henry W. Porter, of Porter & Wiser Jewelry Co., has gone down to Texas, on the border of Mexico, to spend a vacation of a couple of weeks visiting on a ranch.

George H. Edwards, of the Edwards & Sloane Jewelry Co., will leave for Omaha, next week, to give a talk before the convention of the National Retail Jewelers' Association.

It is expected that a large delegation will pass through this city next Sunday from Oklahoma on its way to the Omaha convention. The salesroom of the Edwards & Sloane Jewelry Co. is to be used for headquarters here, and from this point they will go in a body.

C. B. Norton, president of the C. B. Norton Jewelry Co., his wife and daughter, Edith, have just returned from their Summer vacation, which was spent in Wisconsin. A. H. Clark, manager of the material department of the C. B. Norton Jewelry Co., leaves this week for Noel, Mo., where he will spend his vacation.

The following jewelers called on the local trade during the past week: Ross C. Libby, Weir City, Kans.; W. G. Coplin, Paola, Kans.; J. L. Potts, Marceline, Mo.; H. M. Bennett, Wellsville, Kans.; Carl Ricker, Emporia, Kans.; D. C. Burchett, Kirksville, Mo.; Roy E. Bertholf, Cherokee, Kans.; James Hayden, Topeka, Kans.

Indianapolis.

John P. Mullally will leave this week for a business and pleasure trip to New York, Boston and Providence.

Lon R. Mauzy left Aug. 3 for California, where he will join Mrs. Mauzy, who has been there three months.

J. E. Reagan, manager of the Baldwin-Miller Co., has gone to Ludington, Mich., to join his family, who are spending the Summer there.

A sample room at the Jefferson Hotel, St. Louis, is being conducted for several weeks by I. Groh, president of the I. Groh Jewelry Co.

Henry Bongartz, 20 years old, has been arrested at Alexandria, charged with the theft of a number of watches from the Alexandria Loan Co.

E. H. Froeckling, a manufacturing jeweler, employed by Dyer Bros., has returned from a two weeks' visit to Hamilton, Cincinnati and Covington, Ky.

Local detectives have arrested John F. Wellenkamp, a clerk employed by Henry Bloom on a charge of grand larceny. He was arrested shortly after opening the store one day last week.

Clarence James, watchmaker for J. P. Mullally, has returned from a motor cycle trip to Chicago, Terre Haute and Vincennes. He spent one week in a house boat on the Wabash River.

An automobile trip through southern Indiana, to include a visit of some days at Madison, is being made by Asher W. Gray and family. Mr. Gray is a member of Gray, Gribben & Gray.

A. H. Varney, Amo, has an old-fashioned clock that has been in the Varney family more than a century. A lead cannon ball weighing eight pounds is used as a weight. The cannon ball was picked up on a battlefield by Ellen Boyd, Nov. 1, 1785.

Dyer Bros. are completing alterations to their store and shop. A balcony in the salesroom has been built for the engraving department, while a one story brick addition will be used by the manufacturing department. The salesroom is being decorated.

Julius C. Walk was at the watchmaker's bench in his store for the first time in 20 years, last week. During the absence of Edward Petri, the store's watchmaker, Mr. Walk undertook to look after that end of the business. Mr. Petri went to Lake Maxinkuckee.

Jewelers of South Bend are protesting against an order that all overhead electrical signs and the illuminating arches in the business district must be removed, under penalty of prosecution. Cyrus E. Patte, prosecuting attorney, alleges the signs are dangerous.

Out-of-town jewelers in this city, last week, were: Aaron Pursel, Noblesville; Ralph B. Clark, Anderson; S. B. Merrick, Plainfield; John W. Hudson, Fortville; E. O. Collins, Franklin; J. F. Kiser, Muncie; A. H. Pauley, Bloomington; Daniel Beauchamp, Fairmount; Edward Schmidt, Lafayette, and J. W. Thompson, Danville.

Through an advertisement offering to loan money at rates lower than pawnbrokers, Eugene F. Sutherland has been arrested for violating the pawnbrokers' or-

dinance. He did not have a license and did not make reports to the police. About \$2,500 worth of diamonds and jewelry upon which money had been loaned were taken charge of by the police.

Milwaukee.

David Goldman has returned from a business trip to Chicago.

Harry T. Brake, of A. F. Puls, is back from his annual vacation.

Moses Ehrlich, Detroit, Mich., visited his cousin, David Goldman, last week.

Dr. I. Greenberg, optician at the downtown store of David Goldman, was a recent visitor to Chicago.

The display windows in the downtown store of David Goldman are being elevated in order that the stock may be shown to a better advantage.

The traveling representatives of the Kuesel Bros. Co., including Charles Kuesel, A. L. Heuer and A. Pietzner, have left for their territories.

Joseph Goldman, former manager of the south side jewelry establishment of David Goldman, his brother, has opened a new jewelry store on National Ave., between First and Second Aves. The new store is strictly modern in both equipment and stock.

Several valuable pearls were found in Wisconsin rivers, last week, including one picked up near Fulton, estimated to be worth between \$400 and \$500. Discarded clam shells are being sold to pearl button factories at prices ranging from \$20 to \$30 per ton.

News has reached Milwaukee jewelers that Sol Martin, Jr., former manager of the Peerless Jewelry Co., Milwaukee, has sold his new jewelry business at Evansville, Ind., under the style of Martin & Co. Mr. Martin, who is expected to arrive in Milwaukee soon for a short visit, has not completed his plans for the future.

Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association and secretary of the Jewelers' Mutual Fire Insurance Co. of Wisconsin, attended the annual convention of the Minnesota Retail Jewelers' Association, last week. The Milwaukee offices of Mr. Thomson will soon be moved from the Sentinel building to larger and more commodious quarters in the Stephenson building.

Among the out-of-town Wisconsin jewelers who were Milwaukee visitors this week were: J. B. Kimball, Waukesha; Mr. Rathke, of Rathke & Meiners, Mayville; O. C. Boelte, Columbus; William F. Notbohm, Oconomowoc; A. F. Mirlach, of A. F. Mirlach & Bro., Beaver Dam; F. H. Coburn, East Troy; Mrs. K. Endlich, Kewaskum; E. G. Longcroft, Berlin; J. H. Brager, Mount Horeb; J. M. Chase, of J. M. Chase & Son, Omro, and John Armbruster, Cedarburg.

The Chelsea Clock Co., Chelsea, Mass., has just built an addition to the main building of its plant, and has also built a wing which gives the concern nearly double the amount of space which it formerly had. New machinery and every modern facility for the convenient transaction of business is being installed.

Minneapolis and St. Paul.

A. J. Wilkinson has been engaged as watchmaker for the R. G. Winter Jewelry Co., Minneapolis.

C. E. Carlson, 917 Payne Ave., St. Paul, is just completing a handsome residence which cost about \$5,000.

C. A. Sherdahl, Montevideo, Minn., and wife left, July 30, for a trip to the Seattle Exposition, after attending the convention in Minneapolis.

The building in Minneapolis occupied by the Plymouth Clothing House, J. B. Hudson & Son, retail jewelers, and others, occupying half a square at the corner of Nicollet Ave. and 6th St., has been leased for a five and 10-cent store. The lease of Hudson & Son extends for two years yet, and it is supposed that by that time they will have erected a new store for their business. Mr. Hudson owns considerable real estate in the down-town district and will not be at a loss for a location.

The jewelers' convention brought in a great many retailers to Minneapolis during the past week, among them being I. M. Radbaugh, Hastings, Minn.; I. Reiner, Hutchinson, Minn.; J. L. Williams, Zumbota, Minn.; C. G. Coyne, Mandan, N. Dak.; Wilber D. Nelson, Pierre, S. Dak.; C. O. Guy, St. Cloud, Minn.; John Holt, Eau Claire, Wis.; R. L. Overholzer, Andover, S. Dak.; Ove Hoegh, Spring Grove, Minn.; Fred Green, Buffalo, Minn.; E. B. Woodward and wife, Bismarck, N. Dak.; L. J. Mosher, Owatonna, Minn.; E. M. Schwenke, New Richmond, Minn.; F. B. Logan, Royalton, Minn.; J. C. Herdliska, Princeton, Minn.; C. A. Sherdahl, Montevideo, Minn.; E. McAyeal, Morris, Minn.; Nels Nelson and wife, Hutchinson, Minn.; J. D. Peterson, Echo, Minn.; G. F. Meier, Winona, Minn.; William Plackner, Benson, Minn.; N. S. Nelson, Hutchinson, Minn.; J. H. Nelson, Toronto, S. Dak.; J. J. Birkebak, Lester Prairie, Minn.

Omaha.

Harry Greenblatt is home from a business trip through the State.

S. V. Gustafson spent a few days in Wahoo, Nebr., last week.

E. P. Shaw, with S. W. Lindsay, is spending his vacation at Wall Lake, Ia.

C. B. Brown, wife and daughter have returned from a four weeks' trip to Colorado.

Albert Edholm, wife and small daughter, have returned after a 10 days' vacation on the lakes.

Miss Bessie Neve, saleswoman for Fred Brodegaard & Co., was seriously injured last week. One of her hands was caught in an electric fan, and three fingers were badly lacerated.

The work of the local jewelers' club as to arrangements and minor details of the national convention is complete. Invitations have been mailed to the public for Thursday evening, when the exhibit hall will be thrown open for inspection.

A. Mandelberg is exhibiting a window display clock this week. The clock is made of brass and shows only the hands to the public. A sign, "How Does It Run?" is placed below, and a diamond ring is offered to the one solving the mystery.

Cincinnati.

Victor Gebhardt, of Gebhardt Bros., is spending his vacation fishing in Michigan.

Joseph F. Peiper, of the estate of F. Pieper, Covington, Ky., has returned from a pleasure trip in the east.

William Owen has partly recovered from the serious street car accident he met with several weeks ago. He left for Venice, O., July 30, to attend the funeral of an aunt.

Mr. and Mrs. Jno. Holland, of the Jno. Holland Gold Pen Co., have returned from a two weeks' visit to a sister of Mrs. Holland, at Columbus, O. The traveling men with this company left for the far west and northwest in the past week.

Out-of-town jewelers in the city buying stock during the past week were: M. Fisher, Springfield, O.; M. Aman, Dayton, O.; J. C. Fischer, Flemingsburg, Ky.; W. B. Harrington, Belzoni, Miss.; J. L. Wisby, Edenton, O., and Duncanson Bros. & Co., Lynchburg, O.

Frank Herschede and family, of the Frank Herschede Co., left July 30 in his large touring automobile for Detroit, Mich., where they will take the steamboat for Duluth, Minn. On returning to Detroit, they will make the remainder of the trip back to Cincinnati in the motor car.

The substitution ring game has been played again on several of the retail jewelers in the past week. Barney McLauren and John Scanlon, both Cincinnati men, were arrested. A number of "phony" rings were found in their possession, also a ring taken from Joseph H. Kenkel's jewelry store. Another ring was claimed by Wm. Fink, having a jewelry store only a few blocks away. The trial of the men for larceny will take place Aug. 6. The actual loss to the jewelers will be slight, as they expect to get back the stolen rings.

Pittsburg.

John A. Rupp, Kittanning, was in Pittsburg last week.

C. E. Hines, Vandergrift, has sold out to A. O. Dupstadt.

J. H. Jones has returned from Canada, where he spent his vacation.

F. F. Lang has gone to Rye Beach, Huron, O., where he has a cottage and where his family is passing the Summer.

Edward Sehaffnit, of Goddard, Hill & Co., left last week for Chautauqua Lake, accompanied by his family, on a two weeks' vacation.

The E. P. Roberts & Son Co. is re-decorating the interior of its store. The walls have been painted a pale blue and the ceiling a delicate pearl.

The M. J. Smit Co. has its advertisement printed on the back of thousands of tickets to be sold by the allied trades organizations at the coming celebration of Labor Day.

President McAdoo of the National Association of Credit Men was in Pittsburg last week and was the principal speaker at a noonday luncheon given by the Pittsburg Association.

Among the out-of-town jewelers in Pittsburg last week were R. L. Keplinger, Franklin; Roy Kuhn, Scottsdale; Frank Blosser, New Kensington; Thomas Tomlin-

son, Charleroi, and J. S. Leedham, Elwood City.

George W. White, of West, White & Co., who left last Sunday for New York, intends also to visit a number of the manufacturing jewelry concerns in Attleboro and its vicinity.

Annie Binder, a 14-year-old girl, was taken into custody in Millvale, a suburb of Pittsburg, a few days ago, charged with having taken three diamonds, one of which she sold to a jeweler.

The wholesale and retail teams of the Jewelers' 24-Karat Club of Pittsburg again crossed bats last Saturday and the latter were again defeated. It is likely that another game will be played.

S. Maltinsky has leased the store room and basement of the building at 441 Smithfield St. for four and a half years at an annual rental of \$7,500. The building is owned by Mary H. Hays.

George R. Blose, who for the last 15 years has resided in McKeesport, is opening a first-class store in that city. McKeesport is a buy mill town, and as business is improving there Mr. Blose believes that he will have a good trade.

Jewelers of Greater Pittsburg are taking a lively interest in the proposed action of the city to rename about 900 streets. It has been proposed to rename some of the most important thoroughfares of the old city, such as Fifth Ave. This action, if taken, would put jewelers to much expense in getting new stationery and advertising matter.

The John M. Roberts & Son Co. has erected in Fifth Ave., near Craft, one of the most ingenious signs ever constructed by a Pittsburg firm. The sign shows an ocean scene with a large revolving diamond, made of material that sparkles most brilliantly under the cluster of a large number of lights. The device is especially attractive at night.

Gillespie Bros. announce that they have renewed the lease of their present excellent location, second floor of the big Park building, for another period of five years. The firm is now making extensive alterations. New fixtures are being built for the cut glass department, new cases will be installed and new electric lighting fixtures will be placed in the ceiling and other changes made.

The fire sale conducted by the Hardy & Hayes Co., following an adjustment of their fire loss, has been a success. The goods damaged by the fire in the upper floors were nearly all sold on the first day of the sale, and the clerks have been kept exceedingly busy waiting on customers. As soon as the stock is sufficiently reduced repairs to the building will be commenced. Many improvements are contemplated.

President Archibald of the National Jewelers' Association passed through Pittsburg Saturday on his way to Omaha to attend the National Jewelers' convention. Pittsburgers who left for the Omaha convention were Steele F. Roberts, president of the Jewelers' 24-Karat Club of Pittsburg, who will make an address, and John M. Roberts, chairman of the watch price-cutting committee of the Pennsylvania Jewelers' Association, who will have something to say on watch price cutting.

Philadelphia.

A. Vollmer, 144 W. Girard Ave., has returned from a visit to Ohio.

Harry Gerlitz, watchmaker for Gimbel Bros., has resigned his position.

Andrew Kaas, 125 S. 13th St., is touring the western States with Mrs. Kaas.

Nat Knicker, of M. Sickles & Sons, has been visiting his family at Spring Mount, Pa.

Charles Reiss, with J. J. O'Loughlin, 141 N. 9th St., has been spending the past week in New York.

Charles Oakford, who has charge of the silver department of J. E. Caldwell & Co., is away on a vacation trip.

L. Lipkin, an importer of diamonds and precious stones, will move in a few days into his new store, 8th and Stanton Sts.

William Leiner, formerly a Front St. jeweler, has accepted a position with Elias Weinmann, 925 Chestnut St., as traveling salesman.

W. M. Engle, 4233 Lancaster Ave., has made extensive alterations in his store, including fixtures, artistic furniture and a new metal ceiling.

William Gsand, 2337 Germantown Ave., is receiving condolences from his many friends in the trade, owing to the death of his father, July 25.

John Ernst, formerly watchmaker for the trade, recently made his first trip to nearby towns as clock salesman for the Sommer Clock Co.

H. W. Asquith, Hatboro, Pa., continues to improve the appearance of his attractive store. A complete line of new fixtures has recently been added.

Homer Vernon, formerly of Ambler, Pa., has resigned his position as watchmaker for W. W. Appel, Lancaster, Pa., to take up the study of optometry.

J. T. Wicker has resigned his position with Edward Brown & Sons, instrument makers, to accept a position with E. S. Radley, a jeweler at 2404 Frankford Ave.

J. Q. Gorfine, 109 N. 13th St., has given up his business in this city and has moved to Baltimore, Md., to engage in a new business. Mr. Gorfine is a brother of G. A. Gorfine, 52 N. 11th St.

Henry Cook, an old retired jeweler, has the sympathy of the trade on account of the recent death of his wife, which occurred July 23. Mr. Cook is well known to the old jewelers of this city.

The following jewelers were visitors to this city during the week: S. L. Dichl, Pen Argyl, Pa.; R. W. Quicksall, Mount Holly, N. J.; Josiah B. Heckler, Mainland, Pa.; Solomon Lent, Shenandoah, Pa., and M. E. Hunter, Beverly, N. J.

William Van Kirk, 64 years old, a pawnbroker at 1826 S. 2d St., died suddenly in the rear room of his shop, Thursday of last week, after an altercation over a diamond ring, the return of which was demanded by Joseph Sykes, of 2d and Fernon Sts.

The store of Solomon Geiger, 1025 Broadway, Camden, N. J., was entered Wednesday night, and watches, rings and trinkets to the value of \$300 were stolen. Mr. Geiger discovered the robbery when he opened his store the following morning, the safe being open and the keys to the

strong box lying on the counter. On information furnished the police by Mr. Geiger an arrest is expected in a day or two.

The carnivals given in the various districts in this city have met with such success that the Camden business men are planning a large carnival to take place in the early part of the Fall. F. B. Waller, jeweler, 405 Broadway, is a member of the committee.

Augustus Du Bosq, one of the oldest pearl stringers in the country, who died, recently, at his home at 722 Chestnut St., had always been identified with pearl and onyx jewelry, repairing and stringing for the best houses in this country, and though more than three score and 10 had been actively engaged in business for the past 40 years.

Lancaster, Pa.

H. F. Andrews, optician, Strasburg, Pa., was in Lancaster, last week.

T. Wilson Dubbs has gone to Atlantic City for a 10 days' vacation with his family.

C. H. Hartman, watchmaker for E. G. Hoover, Harrisburg, visited Lancaster, last week.

Byron W. Thrash, Nescopeck, has taken a position as jeweler with N. Traub, Yonkers, N. Y.

Fred A. Wheeler, of the Non-Retailing Co., is home from an extended trip over his territory.

Charles E. Foose, of the Non-Retailing Co., has gone to Canada and the Thousand Islands for two weeks.

Perey Appel, of W. W. Appel, is one of a house party given at Atlantic City by J. R. Livezey, Lancaster.

Lemon Wolf, an engraver for Tiffany & Co., is spending his vacation with his parents at Brownstown, this county.

J. E. Hartman, salesman for Louis Kaufman & Co., paid his first visit in five years to Lancaster, last week, greeting old friends.

Marcus Edelstein visited Philadelphia last week. He is now entertaining his brother, Sidney Edelstein, a jeweler of Paterson, N. J.

A. H. Washburn, New York, and M. Field, Boston, were the guests, last week, of Charles D. Rood, president of the Hamilton Watch Co.

George Allabach, with Louis Weber & Son, is spending his vacation in Reading, Pa. Miss Lillian Bohan, one of the selling force, is visiting Wild Cat Falls and Marietta, Pa.

John Shookers, late head watchmaker with Louis Weber & Son, is taking a vacation in the country pleasure resorts of Lancaster County, preparatory to going into business for himself.

G. William Reisner is home from a trip to the New England States and Harrisburg, Sunbury and Williamsport, Pa. Joseph Voll, who was in Philadelphia a considerable time, is again with Mr. Reisner.

Robert N. McCloskey, Loek Haven, has returned to the Bowman Technical School from a vacation trip to his home. Eby H. Flary, instructor in elementary watchworks at the school, is home from a two week's vacation spent at Ronk, Pa.

Among the jewelers who lately visited

Lancaster were: D. H. Walters, Baltimore; Charles C. Hartman, Memphis, Tenn.; August Spiece, Louisville, Ky.; J. H. Sensenig, New Holland, Pa.; E. P. Zane, Christiana, Pa.; Fred. Kaufhold and Henry Fochl, Columbia, Pa.; J. H. Krcider, New Holland, Pa.; William Manley, Williamsport; Geo. P. Rinn, Columbus, O.

San Francisco.

TRADE CONDITIONS.

There has been quite an improvement in the retail end of the jewelry business in San Francisco the past week. One of the most noticeable signs of improvement is in the greatly increased number of visitors that are now coming to this city. A year ago the local merchants depended almost entirely upon San Francisco trade, but now tourists are again visiting the city in large numbers. In October the Portola festival will be held, and preparations are now being made for this gala event. American and foreign war vessels will be gathered in the harbor and President Taft has consented to be here. A large entertainment fund has been collected and the world will be apprised in fitting form of the recovery of the city from the great fire of 1906.

Mr. Rosenthal, secretary of M. Schussler & Co., is on a two weeks' vacation.

David Schwab, of Davidson & Schwab, has been calling upon the local trade.

Ben Cohn, Leadville, Colo., and Samuel Mayer, Denver, Colo., were visiting acquaintances in the local trade, last week.

J. S. Dinkelspiel is back again after a month's vacation, spent in the southern part of the State.

Max Cohn, a manufacturing jeweler, has taken quarters on the third floor of the Jewelers' building on Post St.

J. S. Lehrberger, who had his family at Larkspur, across the bay, for two months, has moved back to San Francisco.

L. H. Smith, a traveling man in the employ of A. I. Hall & Son, was married, recently, and is now on his honeymoon.

Chief of Police Cook has just received from the Jewelers' Security Alliance a check for \$100 as a reward for the detectives who arrested Otto A. Ross, recently, on the charge of breaking into the store of M. Farber, 954 Market St.

The co-partnership that has existed between Frank McGaw and Alfred Lazarus, doing business at 245 Montgomery St. under the name of McGaw & Lazarus, has been dissolved by mutual consent and the business will be continued at the same place by Alfred Lazarus.

The event of the present week in retail circles has been the removal of Deremer & Co. from the temporary quarters occupied since the fire, on 1341 Van Ness Ave., to a handsome new store at the corner of Geary St. and Grant Ave. This firm has been in business in San Francisco for nine years and at the time of the fire was located in the vicinity of the present store. The new store is a much larger one than the old one, and includes two floors and a balcony of large proportions. The woodwork is in mahogany, with tinted walls to match; the first floor, devoted to diamonds, is tinted a delicate blue. The firm makes a specialty of cut glass and silverware and has always been noted for its progressive policy in advertising these lines.

Herman H. Dahl, Ulen, Minn., has sold out and gone to Marion, N. Dak.

Pacific Coast Notes.

R. P. Gillette, who recently opened at Portersville, Cal., has just moved into a new store in the Price building which he has fitted up handsomely.

W. A. Manson, Charles M. Hanf, N. B. Hale & Son and J. R. Kennedy, San Bernardino, Cal., have announced that their stores will not be opened until noon on Mondays, from now until Sept. 1.

The store of D. S. Binford, at 122 E. Philadelphia St., Whittier, Cal., has passed into the hands of Lee C. Sawin, Riverside. Mr. Binford goes to Riverside to engage in the optical business with his father.

Paul A. Curtis, San Luis Obispo, Cal., has disposed of his interests in the firm of Curtis & Lederer at that place, and H. C. Lederer is planning to make some changes in the store. A manufacturing department is to be added and will be in operation before the holiday demand sets in.

Ed. N. Radke, who conducted a watch-making school at Merced, Cal., has closed that establishment and has left on a trip to Portland, Ore. He will also visit the Alaska-Yukon-Pacific Exposition at Seattle and, while away, will look for a new location for his school.

The store of Bernard Meves & Son at 317 San Pablo Ave., Oakland, Cal., was entered July 19 and stock valued at \$200 was taken. Entrance was effected through a rear window. An attempt was made to open the safe and the thieves succeeded in opening the outer door, but evidently were frightened away before they could open the inner doors.

Pacific Northwest.

In Pendleton, Ore., burglars have been busy and several jewelers have lost small quantities of jewelry.

Thomas J. Juzek, formerly in the wholesale jewelry business at Elgin, Ill., is now at Eugene, Ore., and may start in business there.

Philip Rosumny, who conducts a small store at 246 Burnside St., Portland, Ore., has been arrested and held for trial on the charge of receiving stolen goods. He failed to note the receipt of goods in his books, it is charged.

The store of Leffert Bros., 272 Washington St., Portland, Ore., was entered by burglars recently through a plate glass window which they broke. Stock to the value of about \$500 was taken.

Thieves have been busy at Tacoma, Wash., lately, and in one night two jewelry stores were entered and robbed. Entrance to the store of A. Rose, 1407 Pacific Ave., was effected by boring a hole in the floor and cutting out a section large enough for a man to crawl through. Nine gold watches, valued at \$150, a quantity of rare coins and a small amount of cash were taken. The other store robbed was that of Richard Vaeth, 924 Pacific Ave. Here the show window was smashed with a bolt and the goods were taken from the window. The loss in stock amounted to a little over \$100.

Millard F. Davis, Wilmington, Del., recently celebrated the 30th anniversary of his business career.

Los Angeles.

Wm. Kergan Day, of Day & Peterson, San Francisco, has been in this city for a few days.

R. H. Schwarzkopf and Geo. L. Penniman are both on the road up the coast with manufacturers' lines.

H. T. Pierik, son of J. C. Pierik, jeweler at Springfield, Ill., has taken a position in the jewelry department at A. Hamburger & Sons' store.

The Geneva Watch & Optical Co., Geo. M. Williams, proprietor, is selling the large stock of the J. P. Trafton Co., which recently discontinued business.

Since the retirement of Mr. Stansfield from the Jupiter Consolidated Jewelry Co., a reorganization has been effected by which W. H. Freeman becomes the manager. L. L. Rogers will have charge of the shop.

The E. W. Reynolds Co., on account of the growth of business in its jewelry department, has found it necessary to increase the space devoted to that department, and has been making changes which will make much more room available.

Mrs. J. Wiesenberger has gone with her uncle, A. B. Cohn, and family on an automobile trip to the Yosemite and will go thence to San Francisco. Her father, L. B. Cohn, formerly proprietor of the Diamond Palace, this city, is also in the party.

H. F. Wallace, wholesaler at 414½ S. Broadway, is making a number of big shipments of paper boxes, plush goods, etc., some of which go as far north as Santa Cruz. Mr. Wallace has just installed a new printing press for printing labels, box covers, etc.

S. B. Bailey, 353 S. Broadway, after having sold most of the goods damaged by fire and water in his store a few weeks ago, has engaged Percy H. Greer, the well-known auctioneer, and is now disposing of the balance of his stock at auction. Sales are held both forenoon and afternoon.

Philip T. Hoefler has sold his jewelry business, located at 501 W. 7th St., to A. T. Werner and has gone to Hermosillo, Mex. Mr. Werner formerly was in the manufacturing business with the Los Angeles Ring Mfg. Co. P. W. Andrews, formerly with Geo. H. Curry, has taken a place with Mr. Werner.

Arthur Andrews, foreman of the factory of the Donovan & Seamans Co., has returned with his bride from Catalina Island. Mr. Andrews, who is popular in the jewelry circles of Los Angeles, also has a host of friends in Canada, as indicated by numerous beautiful presents received from the Dominion.

The Whitley Jewelry Co. has been exhibiting in its window a handsome cup which was donated by that company and contested for at the fourth annual ocean yacht race around Catalina Island, under the auspices of the South Coast Yacht Club. Mr. Jepson, president of the Whitley Co., is much interested in the sport.

Thorpe & Hoberg, Sioux City, Ia., are closing their establishment every day at five o'clock, except Saturday, until Sept. 1. The concern announced the fact in an advertisement of four inches, four columns wide, published in a local daily.

New Orleans, La.

Hepfensitz Bros. are renovating their store in anticipation of a large Fall business.

Four jewelry travelers representing Leonard Krower have started on their regular Fall trip.

The following jewelers were in town last week: S. J. Rolfe, W. C. Perkins, James Jackson and R. T. Richardson.

J. J. Weinfurter and family were part of a merry picnic party on a gasoline launch, which paid a visit to nearby river resorts, last week.

The new building of Coleman E. Adler is nearing completion. Special attention is being paid to the art room, which will be located on the third floor.

Leonard Krower has been appointed by Governor Sanders a delegate to the Good Roads Conference, which will be held in Baton Rouge in a few days.

Daniel Ramilli, assistant foreman of A. B. Griswold & Co.'s manufacturing department, sailed, Wednesday, for New York and other eastern cities.

Vincent Esposito will not come here to face a jury on the charge of arson. Judge Ancorn, of the Second City Criminal Court, heard the full story and promptly let him go.

Elliot J. Goldman has returned from New York and Baltimore. He has temporarily resumed his optical work, but has a number of offers from jewelers and others under consideration.

Louis Hausmann left, Sunday, for New York, sailing for a couple of months' vacation through southern Europe with his family, who will meet him in Lucerne, Switzerland. Gabe Hausmann and Sam Adler returned, Aug. 1, from an extensive trip through the west with the Elks.

Jewelers and jobbers are taking an active interest in the Buyers' Convention week, beginning next Monday. Thousands of invitations have been issued to country merchants, and those who accept will be provided with free fares and considerable entertainment, besides reduced hotel rates.

Leonard Krower, the prominent wholesaler, has been appointed chairman of the finance committee for the Waterways Commission and for President Taft's visit here in November. His work will include the raising of \$25,000 for entertainment purposes. The Progressive Union knows Mr. Krower, and feels safe now that he has undertaken the task.

Several empty packages and boxes that had contained jewelry were picked up on the floor of a Louisville & Nashville mail car. Postmaster Behan turned the matter over to the inspectors, who are working on the case. One box was addressed to Leonard Krower, Canal St., and another to Zaeringer Bros., Royal St. The stolen contents were not very valuable.

A queer case is before the courts. Hart Abraham, a jeweler, was summoned for obtaining money under false pretenses. Harry O'Donnell bought a pair of earrings as a birthday present for his wife, and claims Abraham sold them to him as white sapphires. O'Donnell was later told by others that the stones are worthless. Upon Abraham's refusal to exchange or refund, it is said, affidavit was made. The com-

mitting magistrate sent the case higher, and expert testimony will be taken.

The Public School Athletic League is still obtaining trophies from prominent citizens and giving the jewelers opportunity for original designs. Charles A. Hartwell has offered a magnificent silver trophy for the girls basketball team and has turned the work over to T. Hausemann & Sons, who will do the work right here. The centerpiece will represent a basketball court, with two of the girls' teams at play and will be etched on the silver itself.

Buffalo, N. Y.

A new jewelry store was opened recently at 182 E. Genesee St. by Louis Katz.

The front of the store of H. Prussmann, 213 E. Genesee St., has been entirely remodeled.

A successful picnic was given by the Jewelry Workers' Union of Buffalo, at Cascade Park, N. Y., Sunday, Aug. 1.

William Ehman, president of the Buffalo Retail Jewelers' Association, accompanied by his wife, is on a trip abroad and is expected home shortly.

Capt. G. A. Frisch, the Genesee St. jeweler, is in command of Company K, 65th Regiment, N. Y. N. G., which is now doing field duty in Camp Josiah Porter, at Farnham, N. Y.

Julius I. Block, proprietor of the Niagara Ring Mfg. Co., is on a four week's vacation. Mr. Block is traveling westward and will be a visitor at the Alasko-Yukon-Pacific Exposition.

J. C. Yung, of Yung & Debus, Genesee St. jewelers, is spending a week's vacation at Crystal Beach, Ont. Mr. Yung is accompanied by his wife, who is gradually recovering from a serious illness.

Among the jewelers who recently visited Buffalo were: F. D. Kelsey, East Aurora, N. Y.; B. M. Frary, Medina; C. H. Betts, Tonawanda; Ed. Hall, Arcade; Mrs. E. A. Harris, Brockport; R. C. Holmes, Gowanda; C. D. Barnes, Gowanda; D. A. Hixson, Lockport; E. Dahlgren, Jamestown; J. A. Worrell, Washington, O.

Sal. Sickie, jeweler of Salt Lake City, Utah, has purchased the Kenwood apartments on 3rd St. S., between 5th and 6th Sts. S., as an investment.

Lewis S. Kann, Washington, D. C., announces that he has retired from the retail jewelry business and sold out to Edwards & Zanner Co., the members of which firm have been with R. Harris & Co., this city, for the past 20 years. The new firm has the hearty support of Mr. Kann, who disposed of his business because of the death of his son.

A new buffing lathe, which, it is claimed, saves cost for the manufacturer and insures better work, has recently been put upon the market. It is a distinct departure from the ordinary lathe, inasmuch as it is a duplex machine with each end working independently. Either end can be instantly started or stopped independent of the other and the ends of the spindles are detachable, for all classes of work. This duplex lathe making it possible to use the same machine is manufactured by A. B. Nutting & Co., Amesbury, Mass.

Providence.

TRADE CONDITIONS.

A large number of the manufacturing jewelry establishments of this city are closed this week in accordance with the plan adopted some months ago by the vacation committee of the New England Manufacturing Jewelers' & Silversmiths' Association. The idea of uniformity in closing the factories for the Summer clean-up and vacation, preparatory to the commencement of the busy season, has been discussed for several years, but it was not until this year that any concerted action has been taken. When the tariff bill is settled and the Christmas holiday order season approaches, it is expected that the jewelry business will be given an impetus and a full quota of help will be required in the factories. An evidence of increasing activity in this vicinity is the number of advertisements in the daily newspapers for help wanted.

Edward B. Hough was in New York last week on business.

George H. Holmes, of G. H. Holmes & Co., was in Boston last week.

I. Berlin, Boston, was a visitor to the local retail diamond trade last week.

Mr. and Mrs. M. Otis have gone to Ogunquit for a stay of several weeks.

Raymond E. Ostby was one of the weekend visitors at Narragansett Pier last week.

Charles B. Broome was registered at the Bennett House, Quonochontaug, last week.

J. A. Foster & Co. are closing their store, 69 Dorrance St., at 1 o'clock during the Summer.

George H. Goodheart, 320 Fifth Ave., New York, has opened a summer branch at Watch Hill.

Col. Samuel M. Nicholson entertained a party last Saturday on board his steam yacht *Onondaga*.

Henry A. Kirby is in Europe in the interest of machinery for his new mill property at Allendale.

A. O. Burgess, of J. S. & S. W. Granbery, Newark, N. J., was in town last week purchasing goods.

The annual outing of the employes of the J. A. Foster Co. will be held at East Providence Centre Aug. 13.

The factory of the Ostby & Barton Co. closed down Wednesday last for 10 days for the annual repairs.

Charles E. Platt is calling on the trade through the Middle West for the Theodore W. Foster & Bro. Co.

Mr. and Mrs. William P. Dutemple arrived home last week from a 10 days' trip to the Bermuda Islands.

A permit has been issued to John Nelson to build an addition to the dwelling and store at 406 N. Main St.

Among the Providence people who are at Gray's Inn, Jackson, N. H., are Mr. and Mrs. Everett I. Rogers.

Jacob Beringer, Westerly, has opened a branch store for the Summer at The Bijou, on Bay St., Watch Hill.

Capt. Horace L. Manchester has been relieved at his request from serving on the Harrington court-martial.

D. Wilcox & Co. are receiving good orders from George S. Melville, who is traveling through the Middle West.

Harry Cutler arrived home last week from an extended western trip in the interests of the Cutler Jewelry Co.

Charles C. Darling, of C. C. Darling & Co., with a party of friends, spent several days last week on a yachting cruise.

The annual outing of the S. & B. Led-

erer Co. Mutual Relief Association will be held at Vanity Fair Saturday next.

Nowman M. Saati, 543 Westminster St., has joined the 1 o'clock closing movement on Fridays for the remainder of the Summer.

Mr. and Mrs. Ralph S. Hamilton and Mr. Robert Hamilton have been spending a portion of the past week at Conanicut Island.

Mr. and Mrs. Charles C. Darling left Friday for Mount Kinco House, Kinco, Me., and will be absent until the middle of September.

The Baird-North Co. has been granted a permit by the Inspector of Buildings to erect a one-story brick storehouse on Lexington Ave.

The members of the American Enamel Workers' Benefit Association held their annual outing and field day at Emery Park on Saturday.

The factory of H. A. Kirby started up Monday after a 10 days' shutdown. It will be operated on a full schedule for the first time in 18 months.

Joseph Nicholas of this city was in attendance at the second annual convention of Texas Retail Jewelers' Association held at Dallas recently.

J. A. Durell has severed his association with the Providence Mfg. Co., 25 Calender St., and is now on the road for the Ross Jewelry Co., 113 Point St.

Mr. and Mrs. A. Tingley Wall, Miss Wall, Miss Constance Wall and A. T. Wall, Jr., were registered at the Ocean House at Watch Hill, in the last week.

Thomas Catlow was the Chief Rounder at the annual marshmallow roast and barn dance of the Rounders' Club at Ye Old Buttonwoods Hotel, last week.

Henry C. Luther and Benjamin L. Hall left Saturday for Salt Lake City, Utah, to attend the annual national encampment of the Grand Army of the Republic.

The Gorham Mfg. Co. started up its entire plant on Monday. The plant is now operated on a full-time schedule with numerous orders ahead in all departments.

John Francis Miller, of Doran, Bagnall & Co., North Attleboro, was married Monday to Miss Lucy Teresa Sullivan, of this city, at St. Michael's Church in this city.

Mr. and Mrs. Harold W. Ostby, Mr. and Mrs. George W. Briggs and Mr. and Mrs. George W. Briggs, Jr., spent a portion of last week at the Cold Spring House, Wickford.

The Metal Products Corporation has given a mortgage for \$30,000 to Benjamin B. Knight, covering eight lots with improvements thereon on Eddy and Blundell Sts. and Thurber's Ave.

Timothy D. Pratt, formerly a manufacturing jeweler for many years, who discontinued business some three years ago on account of ill health, has accepted a shop position with the E. L. Spencer Co.

A quarterly dividend of 1¼ per cent. on the preferred stock and a quarterly dividend of 1 per cent. on the common stock of the United Wire & Supply Co. of this city has been declared payable Aug. 2.

Frank W. Marden and Charles L. Kettlety have sold to J. Harry Bongartz a lot with improvements thereon on the northerly side of Marlborough Ave., which the pur-

chaser has mortgaged back for \$1,250.

C. B. Sanford, manager of the Sessions Clock Co., Forestville, Conn., accompanied by his wife and daughter, are at Quonochontaug Beach, enjoying the breezes from the Atlantic Ocean for a couple of weeks.

Mayor Henry Fletcher will be a member of a party, including Gov. Aram J. Pothier, to attend the big races of the New York Yacht Club, off Newport, this month, on the yacht of Col. Joseph E. Fletcher, the woolen millionaire.

Mrs. Samuel M. Nicholson, Miss Patty Nicholson and Paul Nicholson sailed from New York for Cherbourg Tuesday on the *Kaiser Wilhelm II.* for a stay of six weeks in France, where Col. Nicholson will join them in about a week.

Col. Emery J. San Souci, of E. J. San Souci Co., who is a member of Governor Pothier's personal staff, is steadily recovering from the accident he suffered at Bristol a fortnight ago, when he sustained a fracture of the left ankle.

Charles Shields, Wilkes-Barre, Pa., who had charge of the Kirby store in Pawtucket for five years and is now in charge of the largest store under this name, has been spending his vacation at Pawtucket. He left Thursday afternoon for home in his touring car.

The D. M. Watkins Co., whose incorporation was recently reported, has organized with David M. Watkins as treasurer; Frederick H. Watkins, president, and Earl Williams, secretary. The latter, with Harry Shirley and Raymond West, are incorporators.

George T. Johnson and F. H. Young have started at 54 Chestnut St. as the Victor Jewelry Co., in the jobbing business. They intend to establish a chain of retail stores throughout New England for the sale of job lots of jewelry, with headquarters in this city.

The employes of John E. Leonhardt enjoyed an outing and dinner at Crescent Park, Friday afternoon, with athletic contests in the afternoon. The baseball game between two teams, composed respectively of married men and single men, proved to be the funniest event of the day.

The second annual outing of the employes of the plate department of the Ostby & Barton Co. was held last Saturday at Emery Park. About 50 took part in the outing. A baseball game was played between teams of employes, captained by Harry Lefleur and Joseph Moran, the latter winning by a score of 5 to 3.

Walter S. Thayer, proprietor of the Woonsocket Brush Co., Woonsocket, who was well known to the manufacturing jewelers through the brushes and brush wheels made by him, died last week at St. Joseph's Hospital in this city after an illness of less than a week. He was 63 years of age and is survived by a widow and one son.

Mr. Nickerson, manager of the Roger Williams Silver Co., has been ill with stomach trouble for some time past, and has not been able to be at the office.

N. B. Barstow, of the N. B. Barstow Co., 7 Beverly St., left on the *Cymric* for Europe, Wednesday. Mr. Barstow will be gone until about Sept. 15, and will combine pleasure with business.

F. W. Hall, of the Irons & Russell Co., 95.

Chestnut St., while recently repairing an automobile, sustained a severe injury to his right eye, into which hot cylinder oil dropped while he was working under the car.

Mr. and Mrs. Theodore W. Foster returned Wednesday from an automobile trip through the Berkshires and White Mountains. They were accompanied by Mr. and Mrs. Joseph A. Limbach, of Chicago. Mr. Limbach is the Chicago representative of the corporation.

George C. Richter and Victor F. Richter have formed the Richter Mfg. Co., with a place of business at 33 Canal St., where it will do electro depositing of gold and silver upon glassware by a new process whereby the deposit remains attached to the glass. Both members of the firm have had long experience with the Gorham Mfg. Co. in the designing and enameling departments.

Among the 15 members who compose the State rifle team from Rhode Island at the New England Interstate rifle matches last week at Wakefield, Mass., were Lieut. Henry A. Crosby and Sergt. Charles Fletcher, representing the manufacturing jewelry industry. Major Howard D. Wilcox, of D. Wilcox & Co., was executive officer, and Capt. Martin S. Fanning, quartermaster.

The silver service that was presented to the United States cruiser *Salem* last week by the citizens of that city was made by the Gorham Mfg. Co., which has in process of manufacture the silver services for the two battleships, *South Carolina* and *Delaware*. These will make a total of 25 that this company has made for Uncle Sam's new navy. The order for the *Delaware* service was received through Millard F. Davis, Wilmington, Del.

Included in the fleet of the Rhode Island Yacht Club on its annual cruise up Long Island Sound last week were the following jewelers: Commodore Clarence M. Dunbar, on the *Artmar*, with Aldridge G. Pearce as fleet captain and Arnold C. Messler as guest; Fred B. Thurber, *May Queen*, with William H. Thurber as guest; George W. Dover, *Nettie*; W. Louis Frost, *Medric II.*; Frederick Rogers, *Annarveta*; George L. Slade, *Setsu*; Harvey J. Flint, *Bat*; William B. Streeter, *Netor*.

Attleboro jewelers who have occasion to drive their automobiles into Rhode Island have commenced to circulate a petition asking for a change in the laws which now prevent an automobile from Massachusetts from being driven into this State more than 10 times without being licensed. The petition will be forwarded to the Rhode Island State Highway Commission. People who live in Attleboro and go back and forth to Summer homes on Narragansett Bay in automobiles assert that the law is very inconvenient for them.

Among the foreign importations entered through the Providence Customs House in the past week were the following: From Bremen, eight packages of imitation precious stones; from Hamburg, one package of silverware; from Havre, two packages of imitation pearls; from Liverpool, seven packages of manufactures of metal; from London, one package of spectacles; from Southampton, Eng., one package of

silverware: from Yarmouth, N. S., one package of manufactures of metal.

James Taylor, alias Paul Schneider, who claims to be a graduate of the University of Wisconsin, was held in \$9,000 bail for the Grand Jury Thursday morning of last week by Judge Gorham in the Sixth District Court, after he had pleaded guilty to three charges of breaking and entering and larceny. He was captured on the previous afternoon in the dwelling house of Ernest C. Baker, of Baker & Winsor, refiners, with a loaded revolver in hand, but he did not make any resistance. He was released from a 16-year sentence at Sing Sing about two years ago.

The annual convention of the salesmen, heads of departments and others, together with the officers and directors of the Gorham Mfg. Co., was held in this city this week and was productive of beneficial results to all concerned. The various working departments of the extensive plant at Elmwood were inspected, plans for future work were discussed and the general conditions of the various sections of the country as regards trade and similar questions were considered. Edward Holbrook, New York, president of the corporation, as well as John S. Holbrook, vice-president; John F. P. Lawton, secretary-treasurer, and Fred C. Lawton, superintendent, were present at the business meeting of the convention, which was held at the company's works, Wednesday morning. At that time the following statement was made, which indicates a very prosperous year. "Our fiscal year commences Feb. 1, and the present year, up to date, shows a larger volume of sales than the corresponding months of 1906, which was our largest year. We are operating at full capacity, and the number of our employes is now nearly as large as it ever was, and is about 20 per cent. larger than last year, but about the same as two years ago. A feature of this year's business is the considerable volume of booked orders for delivery this fall. This feature is in sharp contrast to the conditions exhibited both in 1907 and 1908, and it indicates a willingness on the part of dealers to maintain their stocks at an average condition. This condition applies to almost every section of the country, as the volume of our sales both at Chicago and San Francisco have maintained about the relative increase to those of our home offices. This is evidence to us of an increased demand on our customers, and we do not believe it indicates any tendency to speculate on the part of dealers. We look for a constantly increasing volume during the remainder of the year." In the afternoon the entire party took special electric cars to Narragansett Pier, where they were the guests of the corporation.

J. N. O. Thomson, La Grange Ind., will take an extended trip to Washington and Yellow Stone Park.

H. Nurock, Camden, N. J., is erecting a new building at 1124 Broadway, which he will occupy as a first-class jewelry establishment.

J. Kapsta, Merrill, Wis., has left for an extended trip to Europe. He will visit his parents and look after property interests in Russia.

Attleboro.

James Blake is enjoying a vacation of a few weeks at Springfield, Mass.

George Heywood, with the Horton-Angell Co., is spending a vacation in Maine.

C. P. Keeler, of McRae & Keeler, is Summering with his family at Harwichport.

The new factory of Leach & Garner Co., Pearl and Hazel Sts., will be completed by Sept. 1.

D. S. Spaulding, Mansfield, has been assessed for \$617.83 and C. D. Lyons & Co., for \$242.88.

Work on the new Mossberg factory will be started next Monday morning, and will cost \$50,000.

The Watson & Newell Co.'s employes held their annual outing last Saturday down the Providence River.

The tax rate of the town has been increased 50 cents per \$1,000 over that of last year. It is now \$18 per \$1,000.

George G. Kelley, of the W. H. Saart Co., who is rear commodore of the Edge-wood Yacht Club, is enjoying a cruise with the club.

The annual swimming contest of the Watson & Newell Co. took place, last Wednesday evening, at the Pawtucket Boys' Club.

During a severe thunder storm, last week, a bolt of lightning entered the boiler room of the Watson & Newell Co., but did no damage.

Advertisements for help are increasing in the daily papers day by day. Twenty different advertisements appeared in one issue of a local paper last week.

S. O. Bigney will address the National Retail Jewelers' Association, at Omaha, Aug. 5, on "The Future Possibilities of Our Country from an Industrial Standpoint."

The factory of William Dumont, which is situated in Chartley, was destroyed by fire, Tuesday of last week. The fire started during the noon hour when there was nobody in the shop. It is supposed that the building caught fire from a gasoline engine which supplied the power. Work on rebuilding the factory will be started in a few days.

The following firms closed last Saturday evening for one week in order to allow their help to take their annual vacations: Attleboro Mfg. Co., Austin & Stone, J. W. Luther & Co., H. L. Thurber Sons Co., D. F. Briggs Co., S. O. Bigney & Co., Mason-Howard Co., Electric Chain Co., Bristol Mfg. Co., Carter, Qvarnstrom & Remington, F. H. Sadler & Co., Smith & Crosby, John Anthony, W. E. Richards Co., R. F. Simmons Co., Bliss Bros., J. M. Fisher Co., F. W. Weaver & Co., Simms & Co., Smith & Richardson, J. T. Inman, F. L. Torrey, Bell Finding Co., Winthrop Mfg. Co., Dobra Bros., C. O. Sweet & Sons, W. B. Marble Co., E. T. Brogitt, A. Grover, Barden & Hull, D. & D. Chain Co., Oulton Engraving Co., A. S. Ingraham, E. D. Gilmore Co., Leach & Miller, Sykes & Strandberg, Allen-Lomergan.

Local jewelers are very much aroused over the new law of Rhode Island which compels them to license their automobiles in that State if they go over the line more than 10 times a year. A number of the manufacturers who do their banking in

Pawtucket and Providence have shown their displeasure over the new law by removing their accounts to banks in this State.

The employes of the Frank Mossberg Co. have decided to form a benefit association and the firm has agreed to lend substantial aid to the project. A meeting will soon be held and an organization perfected.

While driving from Wrentham towards Attleboro the other evening Ralph Thompson, of the C. M. Robbins Co., ran over a young red fox with his automobile. The fox was killed instantly, and Mr. Thompson brought it home as a trophy of his first fox hunt.

While endeavoring to dispose of a large quantity of jewelry scraps in a Washington St. pawnshop in Providence, last Friday, Charles H. Hostmeyer, an employe of W. E. Richards Co., was placed under arrest by Inspectors Haran and O'Malley and Detective Goldowsky, who represents the manufacturing jewelers. Hostmeyer was taken to the police headquarters and then turned over to the Attleboro police. In 1906 it is said Hostmeyer was foreman for the S. & B. Lederer Co., in Providence, and was sentenced to three months in jail for the larceny of 2,400 collar buttons, valued at \$85.85, and scrap worth \$50. In the district court, Saturday morning, Hostmeyer pleaded guilty and was sentenced to the house of correction at New Bedford for three months. In court he spoke very highly of the Richards Co. and said he deserved punishment.

North Attleboro.

James O. Copeland has purchased a Ford runabout.

G. C. Hudson returned, last week, from a short trip.

Frank H. Bliss is at his Summer home at Matamuck Beach.

Fred B. Bingham has gone west for Cheever, Tweedy & Co.

A new floor was laid in the factory of F. M. Whiting & Co., last week.

Alpin Chisholm, of the Bugbee & Niles Co., spent last week in New York.

William Peckham has been visiting the Montana Mines the past two weeks.

Orin Clifford, of the Webster Co., attended the funeral of his brother at the Cape, last week.

George Semple, New York representative of the W. & S. Blackinton Co., was in town last week with his wife.

Edward Gilbert, formerly office manager of F. S. Gilbert, has entered the employ of the Shepard Co., Providence.

Harry Kip, New York representative of the H. F. Barrows Co., is enjoying a vacation at Greenwood Lake, N. J.

Charles Bird, an employe of T. I. Smith & Co., lost the tip of his finger, last week, while working on an emery wheel.

William Bartlett, of this town, has severed his connection with the traveling force of the Stafford Ring Co., Providence.

Robert Squires, New York salesman for E. I. Franklin & Co., is enjoying an automobile trip through the New England States.

The manufacturing jewelers were pleased to learn, last week, that the tax rate had

been reduced from \$23 to \$20 per \$1,000 of valuation.

The funeral of the late Albert W. Burton took place last Tuesday afternoon from his late residence in Plainville. During the funeral all the jewelry shops of Plainville were closed.

Albert Silber, engraver at the factory of R. Blackinton & Co., was given a farewell dinner at one of the Providence hotels last Saturday before he left for his home at West Orange, N. J.

Henry A. Balcom, foreman for J. F. Sturdys Sons Co., left last week, for Portland, Me., where he attended the wedding of his nephew, Raymond Shepard, who is one of the members of the traveling staff of the Gorham Mfg. Co.

The second meeting upon the bankruptcy petition of the Miller, Fuller & Whiting Co. was held at Taunton last Thursday, at the request of Trustee A. W. White. The date of the next meeting has not been set, but it will probably be in September.

Postmaster Hunt has made known a change in the postal service which will be of special interest to the manufacturing jewelers. The United States and Japanese governments have entered into an agreement, under the postal union, so that the limit of mail matter has been made 11 pounds and the value \$80. The limit was formerly four pounds and the value \$50.

The following firms closed last Saturday night for a week's vacation: Estate of O. M. Draper, J. P. Bonnett & Son, A. L. Lindroth & Co., H. H. Curtis Co., Bishop Chain Co., E. Ira Richards, & Co., North Attleboro Enameling Co., Maintein Bros. & Elliot, E. I. Franklin & Co., Mandalian & Hawkins, Bugbee & Niles Co., H. D. Meritt & Co., Cheever, Tweedy & Co., Whiting & Davis, F. M. Whiting & Co., J. O. Copeland & Co., R. Blackinton & Co., Sturtevant & Whiting, Mason-Lezen Co., Johnson Bros., Riley & French, G. C. Hudson & Co., C. Ray Randall & Co., W. & S. Blackinton Co., G. K. Webster Co., Doran-Bagnall Co., A. H. Bliss & Co., J. H. Peckham & Co., Hanlon-Thornton Co., Sweetland & Rohrbach Co., Geo. L. Paine & Co., J. J. Sommers & Co., F. L. Shepardson & Co., J. F. Sturdys Sons Co., B. S. Freeman & Co., F. S. Gilbert, W. N. Fisher & Co., T. G. Frothingham & Co., Codding & Heilborn Co., Plainville Stock Co., Scofield, Melcher & Scofield, Robinson Bros., W. G. Clark Co., H. F. Barrows Co.

Boston.

D. H. Wells is in Chicago.

Joseph Batchelder is in New York on business.

M. N. Smith left Monday for a visit to New York.

C. D. Smith is at his country home near Keene, N. H.

A. W. Armington has returned from a European trip.

William Tuttle is enjoying his annual vacation at Berlin, N. H.

W. A. Smith has started on a trip to Chicago and points farther west.

Elmer C. Read and family are at Mattapoisett for an August vacation.

W. F. Newhall, Lynn, left, Monday, for a camping trip in the Maine woods.

H. A. Martin is in New York this week. William S. Whittnauer is spending his vacation in Maine.

E. W. Byram, of the W. L. Gilbert Clock Co., is enjoying an outing at Christmas Cove, Me.

C. S. Patten is spending the month of August at Out-of-the-Way Inn, Smith's Cove, near Digby, N. S.

C. C. Bogle, of White River Junction, Vt., was in town several days last week and called on friends in the trade.

F. S. Scales and Mrs. Scales, Winchester, are enjoying an extended automobile trip through Maine and New Hampshire.

Ralph Leroy Harlow has left the employ of the Shreve, Crump & Low Co. and has gone to New York to engage in other business.

A. R. Harmon, London representative of the Waltham Watch Co., came up from his Summer home at Prouts Neck, Me., last week, on business.

Among the jewelers here, last week, were: W. L. Pierce, Stoughton; J. A. Filion and S. P. Bailey, Lowell; G. Willis Whipple, Salem, and R. A. Lohnes, Worcester.

The presentation to the United States cruiser *Salem* of the silver service given by the citizens and made by Daniel Low was one of the biggest features of last week's celebration of Old Home Week in Salem.

The Smith, Patterson Co., because of increasing business, now occupies the entire building at the corner of Summer and Arch Sts. Formerly a portion of the building was sublet, but the company has now taken over the whole structure.

Henry Mitchell, known throughout the country as an expert engraver, who since 1868 had been the official engraver of dies for the stamped envelopes of the United States Government, and who had a wide reputation as one of the best designers of coats-of-arms in the world, died Sunday at his home 76 Harvard St., Chelsea, aged 73 years. He had been in poor health for more than a year, having never recovered from a fall received while examining the ruins of the Chelsea fire in April, 1908. Mr. Mitchell was born in New York City in October, 1835. For the past 40 years he had been a resident of Chelsea. He is survived by two sons—Francis N., of New York, and Norman M. Mitchell, Chelsea—and three daughters.

Charles A. Whitney, mechanical superintendent of the Waltham watch factory, died Wednesday morning of last week at his home on Lexington St., Waltham, aged 54 years. He had been stricken with acute indigestion about two weeks ago, which resulted in a series of shocks. Mr. Whitney was born in Waltham and had always made this city his home. In 1881 he was married to Miss Lelia Porter, a school teacher, who, with two daughters, survive him. He also leaves one sister, Prof. Mary Whitney, of Vassar College. Mr. Whitney was head draftsman at the factory until the death of Duane Church, whom he succeeded as mechanical superintendent. Having been Mr. Church's right-hand man, it was thought quite fitting that he should be advanced. Mr. Whitney was not a member of any fraternal order, but was one of the best-known men in Waltham.

W. H. Sparks, representing the Seth Thomas Clock Co., Thomaston, Conn., was in Toronto, Ont., last week.

Traveling representatives in Cincinnati, O., during the past week, were: F. S. Friend, Laurel Cut Glass Co.; J. T. Griffith, Jr., Carter, Howe & Co.; N. Hoffman, Eichberg & Co.; R. Kaufman, Ingomar Goldsmith & Co.

The following traveling representatives were in Savannah, Ga., recently: Julius G. Bick, Adolph Goldsmith & Son; A. E. Bennett, Robert T. Gatter; H. Budwig, Arthur W. Ware & Co.; J. E. Volk, N. H. White & Co.; D. H. Havens, Meriden Britannia Co.; Jerome M. Lissauer, Arnstein Bros. & Co.

The following representatives were in Lancaster, Pa., recently: Theodore Wagner, Wagner & Co.; H. C. Kionka, Kionka & Co.; Mr. Herman, Herman & Co.; Walter J. Mays, McIntyre, Magee & Brown; Mr. Wally, Wolfshiem & Sachs; Henry G. Allsopp, Allsopp Bros.; H. C. Berdan, Gorham Co.; S. E. Hllag, Kinney Co.; Mr. Hassenplug, Alkin-Lambert Co.; Dod Israel, August Dilsheimer & Co.

Among the traveling representatives who called on the trade in Kansas City, Mo., during the past week, were: H. S. Noyes, Bates & Bacon; John S. Cunningham, E. L. Spencer Co.; Richard Robinson, Shiman-Miller Mfg. Co.; W. S. Metcalf, Plainville Stock Co.; Wm. H. Lamb, Geo. H. Fuller & Sons Co.; W. R. Cobb, W. R. Cobb & Co.; Abel King, Emrich, King & Schorsch; R. T. Kleckner, Theodore W. Foster & Bro. Co.; B. Hyman, B. Hyman & Co.; Herman Hamburger, S. Pitzele; J. Goldsmith, Jr., Goldsmith & Harzberg; Henry W. Sherrill, Sinnock & Sherrill.

Among the traveling representatives who, recently, called on the Buffalo, N. Y., trade, were: H. B. Matthews, the Matthews Co.; Harry Goodison, E. G. Webster & Son; Henry E. Hart, Albert Lorsch & Co.; Charles F. Hartshorn, Alling & Co.; A. N. Dorchester, Chapin & Hollister Co.; J. Rothschild, Kaffeman, Rothschild & Co.; L. M. New, David Baskin; H. J. Dennis, Libbey Cut Glass Co.; E. J. Fisher, F. J. Bosse & Co.; Clayton Sheppard, Krenmentz & Co.; Howard Whyte, Moser & Whyte; J. W. McClannin, Wilcox Silver Plate Co.; A. Bradshaw, Meriden-Britannia Co.; Charles Miller, Ansonia Clock Co.; Mr. Fenton, Wm. L. Gilbert Clock Co.

Among the traveling representatives in St. Louis, Mo., last week, were: George Frank, Worthington & Raymond; C. H. Davison, Kohn & Co.; Alex. M. Thianhauser, Wolfshiem & Sachs; Eugene C. Holbrook, Ferdinand Bing & Co.'s successors; a representative of D. Gruen, Sons & Co.; A. Fraser, Rochester Cut Glass Co.; Mr. Gorman, Woodside Sterling Co.; F. R. Horton, Carter, Howe & Co.; Max Huss, S. Borgzinner Co.; W. H. Algin, North American Watch Co.; John S. Cunningham, E. L. Spencer Co.; W. F. Chambers, P. & A. Linton Co.; John F. Garland, Keller Jewelry Mfg. Co.; George S. Nelville, D. Wilcox & Co.; Oscar A. Lessing, S. & B. Lederer Co.; B. F. Hirsch.

Traveling representatives in Omaha, Nebr., recently, were: Mr. Hartig, Alvin Mfg. Co.; Robert J. Kelly, Warner Mfg. Co.; Jos. C. Wilson, Landers, Frary & Clark; W. H. Hamill, Fred Kaufman & Co.; Robert L. Clark, Wm. Rogers Mfg. Co.; a representative of the Watrous Mfg. Co.; a representative of Wilcox & Evertsen; H. G. Lehmann, Stein & Ellbogen Co.; Henry W. Sherrill, Sinnock & Sherrill; George E. Connor; Robert H. Ingersoll & Bro.; H. S. Noyes, Bates & Bacon; W. S. Metcalf, Plainville Stock Co.; E. W. Nicholas, William Bens Co.; W. B. Marble, W. B. Marble Co.; Herman Hamburger, S. Pitzele; John J. Moffitt, Battin & Co.; H. F. Himes, Wm. Weidlich & Bro.

The traveling representatives in New Orleans, La., last week, were: H. H. Day, Day, Clark & Co.; William Wood, Simons, Bro. & Co.; W. Hodson, Jones & Woodland; Charles Marx; Chas. Steiner, L. Adler & Son; A. E. J. Winter, Enos Richardson & Co.; F. F. Gibson, Gibson, Krugler

& Co.; Mr. Weinschenk, R. L. & M. Friedlander; E. A. Childs, Harris & Harrington; a representative of Kohn & Co.; G. H. Slyter, Bippart, Griscom & Osborn; Frank P. Steitz, William Link; B. F. Krause, Taylor Bros. & Co.; W. J. McKenne, Wayne Cut Glass Co.; William Roman, Manasseh Levy & Co.; W. C. Lippus, Simpson, Hall, Miller & Co.; Morris Lissauer, Louis Strasburger's Son & Co.; C. J. Somers, A. N. Haring, Carter, Howe & Co.; Larry Cohn, Cohn Mfg. Co.; Arthur Hirsch, Jonas Koch; Julius G. Brick, Adolph Goldsmith & Son; L. Krugler, Jr., Larter & Sons; C. N. Davis, Depasse Mfg. Co.; H. R. Blackman, Mandeville, Carrow & Crane; Louis Freund, Henry Freund & Bro.

The following traveling representatives called on the trade at Pittsburg, Pa., recently: J. M. Morrow, American Watch Case Co.; E. P. Tiffany, F. H. Sadler Co.; Mr. Laurino, Saunders, Meurer & Co.; J. T. Griffith, Carter, Howe & Co.; John S. Cunningham, E. L. Spencer Co.; W. T. Francis, Waterbury Clock Co.; Harry B. Kennion, Parks Bros. & Rogers; Theodore Parker, Smith & Crosby; Alfred Nathan, Henry Baschkopf; Walter S. Strauss, Jacob Strauss & Sons; C. W. Hickok, Graff, Washbourne & Dunn; A. P. Shattuck, Ford & Carpenter; Richard Robinson, Shiman-Miller Mfg. Co.; Arthur Bradshaw, Meriden Britannia Co.; Jules Franklin; Fred H. Felger, F. & F. Felger; John A. Abel, Abel Bros & Co.; N. H. Hoffman, Eichberg & Co.; J. Thompson, J. B. Bowden & Co.; A. H. Schmitt, Layman & Straus Co.; Mr. Simes, Bates & Bacon; Abel King, Emrich, King & Schorsch; Irwin H. Jelluck, Buffalo Jewelry Case Co.; M. E. Van Bergh, Van Bergh Silver Plate Co.; J. M. Curtis, Meriden Silver Plate Co.; E. E. Stockton, E. Ingraham Co.; B. Hyman, B. Hyman & Co.; D. Skutch, New Haven Clock Co.

Canada Notes.

C. L. Saxton, Aylmer, Ont., is closing out his business.

W. Hooper, Ladysville, B. C., is discontinuing business.

The assets of J. M. Porier, Valleyfield, Que., have been sold.

J. C. Scott, Fort Frances, Ont., has been succeeded by G. H. Gledhill.

Solomon Fogler, Toronto, Ont., has sold out his business to Fanny Pollock.

Caron Bros., Montreal, have obtained judgment against A. B. Ryan, Stellerton, N. S., for \$183.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: A. H. Black, Cobalt; A. B. Galbraith, Shelburne; von Gaulten Bros., Caledonia; J. H. Sterling, Simcoe; R. W. Bassett, Whitby; R. F. Dale, Harriston; P. S. Byrne, Beaverton; George Hynds, Acton; H. E. Thornhill, Hamilton, all Ontario; and W. A. Platt, Rivers, Manitoba.

As a sequel to a fire which occurred on the premises of the Damascus Jewelry Co., Notre Dame St. E., Montreal, three actions for slander have been entered in the Superior Court against three of its neighbors—Nicholas and Michel Zigayer, partners of the United States Jewelry Co., and Solomon Shaheen, an employe of the two others. The actions are for \$5,000 each. Slanderous statements are alleged in connection with the fire.

In accordance with recent legislation of the Province of Manitoba, the act respecting the regulation of optometry came into force in that province July 14. The following have been appointed members of the Board of Optometry: W. G. Mabee, Winnipeg; H. A. Nott, Winnipeg; R. F. Butcher, Minnedosa; J. H. Bartlett, Souris, and F. E. A. Leach, Neepawa. Those who practice optometry will henceforth be required to satisfy the board of their efficiency and take out a certificate.

Annual Value of Precious Stones Found in India.

Consul-General William H. Michael, of Calcutta, furnishes the following report concerning the precious stones of India:

The precious and semi-precious stones mined in India are the diamond, ruby, sapphire, spinel, tourmaline, garnet, rock crystal and various chalcidonic forms of silica, jadeite and amber. The ruby and jadeite are the only stones produced in India of considerable value. Large quantities of turquoise come from Sikkim and Tibet, that from the latter country being harder and of darker blue, which gives it greater value.

The importation of precious stones into India amounts to about \$4,940,000 annually.

The diamond industry is very limited, and is carried on in Southern India, the northern part of the Indian Peninsula, and in the Central Provinces.

Ruby mining is carried on in Upper Burma, and next to petroleum is the most profitable in the mineral resources of the State, the value of the product being about \$500,000 annually. One ruby of 77 carats, taken out a few years ago, was valued at \$133,330.

Sapphires used to be mined in Kashmir, but the mines are now said to be exhausted. The yellow, white, blue and green varieties of sapphire are found in the ruby-bearing gravels in Burma. The spinel is found in considerable quantities in Burma. Beryls, found to some extent, are generally so fissured as to be of little value. Tourmaline (rubellite) stones of blue, green and black coloring are found in Upper Burma.

Garnets are mined in Kishangarh, Jaipur State. Rock crystal, cut for cheap jewelry, known as vallon diamonds, is found in Tanjore, Madras Presidency; but another quartz crystal found in Kalabagh is cheaper, and is used for making necklaces.

Chalcidonic silica, known in India as hakik, and embracing many forms of agate, is mined in the Deccan. Agates and carnelians are cut and prepared for market at Cambay, Bombay Presidency. The agates come mostly from the State of Rajpipla. Large quantities are shipped to Europe and to China.

Jadeite of beautiful green veins is found in Upper Burma, and an inferior jadeite is also found in other parts of India. This stone sells for \$50 to \$100 per hundred-weight. In cutting there is considerable waste, yet the profit is satisfactory.

Burglars broke into the general store of Wm. Roge, Walcott, Ia., recently, and stole jewelry and silverware worth about \$100. There is no clue.

The Tate Jewelry Co., Belton, S. C., has sold out to R. N. and Guy Hanks. The business will be continued under the name of Hanks Bros. at the same location.

S. D. Hardy, manager of D. Buchanan & Son, jewelers of Norfolk, Va., has been confined to his bed for several days by illness. His speedy recovery is anticipated.

Burglars broke into H. F. C. Schneider's store at 840 Main St., Dubuque, Ia., one night recently, and stole two trays of bracelets valued at \$200.

MY CREDENTIALS

Are the certified testimonials of satisfied clients. Every Jeweler should read them. They tell a story of achievement unparalleled in the jewelry auction business. I hold the record for sales made, the aggregate of goods sold and of profits made for my clients. No failure on my part; no disappointment on your part; no dissatisfaction on the part of purchasers. My clients' chorus of praise for me is no conspiracy—it is a spontaneous expression of gratitude for successful service. They will tell you so. If you are thinking of an auction sale, write me at once.

Workshop Notes

FOR
Jewelers and Watchmakers

100 Pages New Matter
Containing 300 Pages (size 7 1/2 x 10 1/2 inches)
Bound in Cloth, Stiff Covers

A collection of the latest practical receipts on the manufacture and repairing of watches and clocks, and on the various processes entering into the manufacture and repairing of jewelry, as coloring, polishing, enameling, annealing, oxydizing, etc., in short, a thorough compendium of the numerous mechanical departments of the jewelers' and watchmakers' shop.

This book is the most useful, comprehensive and perfect publication for the workman at the bench, and should be in the hands of every jeweler and watchmaker in the country. It is the only book of its kind published.

THIS WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN IN THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

PUBLISHED JULY 20, 1909

928,250. COLLAR-SUPPORTER. JAMES C. DORV. Providence, R. I. Filed Jan. 20, 1909. Serial No. 473,294.
A collar-supporter, comprising a bar having

rounded ends, and screw-studs closed down over and embracing the edges of said ends.

928,312. FOUNTAIN-PEN. LOUIS H. LLOYD. Decatur, Ill. Filed Dec. 22, 1908. Serial No. 468,742.

A fountain-pen provided with a pair of spring clamping fingers extending forwardly from its

forward end, and means on the pen-body for clamping said fingers, respectively, against the back of the pen-point and the under side of the feeder.

928,388. CHIME-CLOCK. PHILIP H. KLEIN, JR. New York, assignor to James T. Phillips, Grand Rapids, Mich. Filed Feb. 16, 1909. Serial No. 478,270.

A chime-clock, comprising a frame, a seat-board in the frame, a clock mounted on the seat-board,

brackets also mounted on said seat-board, and chime-bells suspended from the brackets.

928,515. METAL HANDLE FOR TABLE-CUTLERY. WILLIAM B. HATFIELD, Sheffield,

England. Filed Oct. 16, 1908. Serial No. 458,125.
In simultaneously forming and fixing the metal handles of cutlery and like handles, applying a

tube of aluminium or like metal in a cold state to the tang-like part of the article to which the handle is to be applied, the tube being slightly longer than the tang; then applying the metal of which the handle is to be made in the form of a thin sleeve to the said tube, the sleeve being slightly longer than the tube; and then subjecting the tube and sleeve to pressure between dies which thereby give the final form to the handle and simultaneously cause the tube of aluminium to become spread out within the sleeve and thus fix the sleeve to the tang, the tube, sleeve and the dies being of such proportions as to insure of a solid handle and a uniformity of cross section at all points of the handle and being also such as to insure of the open end of the sleeve being closed, substantially as herein set forth.

928,447. COMBINED POCKET MATCH BOX AND CIGAR-CUTTER. JOE HAVASSY, Copperhill, Tenn. Filed March 15, 1909. Serial No. 483,457.

A combined match-box and cigar-cutter comprising a box body, a lid hinged to the upper end thereof and provided in its top with a central opening and in opposite sides with transverse apertures adapted to receive the tips of the cigars, a pair of horizontal inwardly projecting bolt supporting plates arranged at opposite ends of the

cover, vertically disposed pins secured to said supports, a cutter provided with a convex operating head to project through the opening in the top of the lid, downwardly curved cutting edges at opposite sides and longitudinal extensions to receive said guide pins, and springs around the guide pins between the supporting plates and the extensions of the cutter to normally hold the latter in raised position.

928,622. STUD OR BUTTON. EDWARD L. ANDERSON, Attleboro, Mass. Filed Jan. 11, 1909. Serial No. 471,680.

In a stud or button, the combination with a hollow post at right angles to form a hollow arm having offcenter holes in its ends, a head secured

to the post, of a round wire having a pointed cone-shaped end and upset end, and having a sliding fit through the offcenter holes in the arm, and a whip spring held in the post in a position for the free end of the spring to extend into the arm and bear on the round wire.

928,694. TOILET-CASE. EDWIN B. PIKE, Pike, N. H. Filed June 15, 1907. Serial No. 379,167. Renewed June 14, 1909. Serial No. 502,161.

In a toilet-case, a body portion; a supporting member secured to the upper end of said body portion; a downwardly opening cover hinged at

the lower end of said body portion, and an outwardly swinging arm hinged to said body portion adjacent the upper end thereof, the arrangement of said parts being such that said arm when swung inward will be covered by said cover when the case is closed.

928,889. SPINDLE-LOCK FOR MICROM-

ETER-GAGES. LAROV S. STARRETT, Athol, Mass., assignor to the L. S. Starrett Co., Athol, Mass. Filed Jan. 18, 1909. Serial No. 472,963.

In a spindle locking device, the bearing or tool-head formed with a deep transverse slot and the

rotatable spindle located axially in such head, in combination with an annular clamp having a peripheral recess of decreasing depth, a flattened spring and locking piece in such recess and an actuating ring rotatable about said clamp.

"Multi-Fortified Silver Back"

Showing the extra thick plating on entire back. This is the "Multi-Silver Fortified Back"

Showing silver plating on front of spoon

IN addition to our extraordinary standard plating we put a "Multi-Silver" plating on the entire back of every spoon and fork—the place wear-resistance is most necessary:

As our *Multi-Silver* plating is accomplished in one operation, by a new patented process which we control exclusively, we get the extra fortification at but a trifle more than the cost of the additional silver:

Our goods have a *standard price and profit for the dealer*, because we take advantage of every invention to make them better:

Send your orders *now* for Fall delivery.

BRITISH PATENTS.

ABRIDGMENTS OF SPECIFICATIONS, 1909, FROM *The Illustrated Official Journal.*

ISSUE OF JULY 10, 1909.

5,913. BROOCHES, ETC. J. BAKER, Birmingham. March 17.

Relates to means for securing ornaments, etc., on the wires of safety and similar pins, without the use of solder, to form brooches, flower-holders, etc. The ornament consists of a plate 12 which is subjected to press-tools to form the required

pattern and to make a trough 13, which projects from the plate at 14 and has holes 16 to take the wire 10 of a safety-pin. The wire is coiled at 17 to form the safety-pin, and the ornament is secured by indenting the trough and wire at 18.

6,286. WORKMEN'S TIME-RECORDERS. F. G. LAKE, Cheshire. March 21. Period of granting patent not yet expired.

In a time-recorder especially applicable for workmen, type quadrants 6a, 6b, Figs. 3 and 4, for printing the workmen's numbers are set by keys 3. Other type-bearing bell-crank levers 16a, 16b, for

printing "in" or "out," are set by keys 17. The type quadrants and levers are arranged in the same printing line as the minute and hour-printing-wheels 7, 10, so that when the printing-bar 21 is operated by the keys operating the levers 16a, 16b, a printed record such as that shown in Fig. 17 is obtained. The keys 3, which are arranged in two parallel vertical rows, move in tubes 4 of different length so as to move the quadrants varying distances from the keyboard. The keys are provided with notches which engage latches 37, Fig. 6, thus holding the keys in their extreme forward position. The latches are simultaneously released by a bar 38 carrying lateral projections 40 operated by depressing one of the keys 17. The minute and hour wheels 7, 10 are driven by a spring motor 9 electrically controlled by a distant clock. The transfer mechanism consists of a segmental pinion 11, Fig. 5, on the axis of the minute-wheel, which engages a segmental rack on a lever 12 provided with a hinged pawl 13 adapted to engage one of the recesses 14 in the hour-wheel. The lever 12 is thus raised once each hour to engage the next recess 14. The lever 12 then, by its own weight or by means of a spring, moves the hour-wheel. The printing-bar 21 may be connected through levers (not shown) to the keys 17, or the bar may be free and may be pressed by a spring 26 carried by a

bracket 25 attached to a rod 22. The rod 22 is moved downwards by one of the keys 17 and is returned upwards by a spring. As the rod 22 moves upwards, a wire extension 30, Fig. 11, raises the printing-bar till it is held by a notched lever 27 which depends from the bracket 19. As the rod 22 descends, a finger 31 on the bracket 25 engages the lever 27 to free the bar 21, which then moves rapidly under the influence of the spring 26 to effect the printing. The roller 18 over which the paper passes is fitted with a ratchet wheel 33, Fig. 11, with which engages a pawl on the bracket 25, so that the paper is moved forward each time the bracket rises. The keys 17 act through springs on the arms of the type levers 16a, 16b, and directly on a plate carrying the rod 22. The rod 22 may bear, at its upper end, against a pivoted lever 42 which abuts against the releasing-bar 38; or the bar 38 may be operated by the wheel 33. The inking-ribbon passes between a wheel 44 on a milled spindle carrying a ratchet-wheel operated by a pawl mounted on the rod 22. The paper feed wheel 20 may be carried between cones mounted at the end of arms on the bracket 19. The "in" and "out" types levers, or the wheels 7, 10 may be omitted. The quadrants may be replaced by sliding frame-like carriers. A bell may be sounded at each printing operation.

6,463. CLOCK WORK. C. F. FUHRMANN, (trading as Fuhrmann & Co.), Leipzig, Germany. March 23.

Relates to the starting and stopping of clock-work used in connection with vulcanizing-apparatus. When the pressure in the apparatus reaches a certain amount, the hand *g* of the manometer *a* presses back the end of the lever *f* which is pivoted at *d*, thereby releasing the lower end of a spring-press *d* lever *k* which car-

ries a spring arm *l* pressing against the balance-wheel. A pin *v* on the lever *f* then engages the end *u* of a lever *q*, and raises an arm *v* out of engagement with a notch *s* in the upper end of the lever *k*; the lever *k* is thus set free, so that under the influence of its spring *m* it quickly swings round, giving a slight rotary motion to the balance-wheel *n* through the arm *l*, thus ensuring starting. On the return of the hand *g*, a spring *h* pressing the end *o* of the lever *f* returns this lever to its original position, and again brings the arm *l* into contact with the balance-wheel, thus stopping the clock. The lever *r* falls again in the notch *s* by its own weight.

6,472. FINGER GAUGES, ETC. C. J. DAUNER and C. A. WERRMANN, Cincinnati, O., U. S. A., March 23. (Date applied for under Section 91 of Patents, etc., Act, 1907, May 22, 1907.)

A finger gauge for jewelers is used in conjunction with a caliper gauge in order to determine

the size of the parts that are required in the manufacture of rings, and the caliper gauge is

further provided with a wire gauge and means for determining the size of the setting to be employed. A graduated flexible hand 1, Fig. 1, bent into the shape of a ring, carries at one end a fixed yoke 2, which embraces the overlapping thickened portion 8 of the other end, while a loose sliding loop 1 embraces both ends of the band and, when moved towards the thickened portion, is adapted to retain the ring in position after a measurement has been taken. The sliding piece 14 of the caliper gauge 9, the base-plate 10 of which also serves as a wire gauge 24, is then set so that the inner face of the bent end 11 of the base-plate cuts the slide 14 at a graduation corresponding to the size as given by the ring gauge; the slide is then fixed in position by means of a set-screw. From a series of parts *A* of set rings, the part which fits between the projections 11, 15 is selected, thus giving the size of the parts to be employed. The sliding member 21 of a gauge for settings, provided with pointers 22, is attached to the bent end 12 of the base-plate 10.

Applications filed July 1, 1909.

15,369. IMPROVED DEVICE OR HOLDER FOR RETAINING OR HOLDING NECKTIES OR SCARFS IN POSITION ON THE PERSON OF THE WEARER. JOHN CORNWALL ROUND, London.

35,982. HANDLE FOR SPOONS, FORKS OR SIMILAR ARTICLES. THEODORE BLUDER, Providence, R. I.

Burglars recently attempted to break into the store of E. D. Schoolfield at Millville, Pa., but were frightened away before completing their plans.

Alexander Chaillet, who died recently in Marlboro, Mass., was at one time, it is claimed, court jeweler to Louis Napoleon, emperor of France. He married the Countess Wenzelanowitz, of Russia, by whom he had one son, who is now in Marlboro settling the estate. Several letters from Louis Napoleon were found among the papers of the deceased.

Drive-Wheels in Your Business

A line of Elgin Railroad movements will prove a strong drive-wheel in your business. Not only will the Railroad Elgin command the patronage of railroad men in your district, but it will also attract *other* trade, for it is only natural that the man who wants a reliable timepiece will go where the railroad man, who is *compelled* to have a correct, durable watch, buys his.

Briefly stated, these are the advantages of the Railroad

Elgin

Large plain hands and figures; large spring which will run longer on one winding than that of any other railroad watch; silver finish, metal dial easily seen in faint light—the only metal dial with inlaid figures of hard enamel (or, if preferred, watch can be had with plain enamel dial). The thinnest railroad watch made. Cased at the factory and timed in the case.

Another business drive-wheel is that Elgin is the most popular watch word everywhere—a popularity maintained by Elgin advertising and, in itself, a distinct asset to the dealer—to *you*.

Advertising in railroad magazines is creating a demand for the Elgin with the “49 silver dial” or the “49 enamel dial,” and your stock should be in readiness to anticipate the demand. Your jobber or the Company will furnish prices on request.

These are the four grades and established retail prices as advertised:

	GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILLED
VERITAS		23 JEWELS	\$46.00	\$48.00
VERITAS		21 JEWELS	\$43.00	\$45.00
FATHER TIME (VERITAS MODEL)		21 JEWELS	\$38.00	\$40.00
B. W. RAYMOND	“ ”	19 JEWELS	\$34.00	\$36.00

THE HOROLOGICAL REVIEW

The Adjustment of Watches.

Written expressly for The Jewelers' Circular-Weekly by H. Reinecke.

(Continued from issue of July 21.)

BEFORE proceeding to the actual adjustment of a lever watch to isochronism and temperature, preliminary examinations are necessary, the first of which appertain to the whole movement and next to the escapement, the jewelers and the condition of the balance. In the train the mainspring and its freedom during winding, the condition and the position of the mainspring barrel and the stopwork should be scrupulously observed. The same attention is claimed for the freedom of the wheels and pinions, their depths, end-shakes, pivots and pivot bearings.

In due progress the escapement will be reached; this subject is an extensive one. A competent adjuster should be posted in all the constructions thereof—their advantages and disadvantages. A thorough study of all recognized text-books is to be recommended, with special attention to the more particular points, among which may be mentioned the difference between small and large watches. The lever escapement is one which cannot go without oil, which is an evil, and which can be borne much better by large watches with heavy balances and mainsprings than by small watches with balances of light momentum and slender mainsprings.

This necessity of oil with its changing complexion is felt more particularly in the unlocking of the escapement. As the increasing or the lessening of the resistance of the unlocking of the escapement has a decided influence on the isochronous adjustment of the vibration of the balance, it follows that the adjustments of small watches are less durable than those of large watches. This circumstance is a drawback in the reliability of observatory trials of pocket watches, and emphasizes the fact that only large watches, with the lever escapement, can run on a rate even for a limited time, though I have known large Swiss watches of an eminent maker which have held their rate for an entire year, and I have known an English lever watch which held its rate for nine months while the wearer was traveling with a total variation of 40 seconds only.

Incidentally, it may be stated that a technical advantage in favor of large escape-

ments of lever watches is that the amount of locking is, to some extent, dependent on the size of the escapement. With a large escapement less than $1\frac{1}{2}^{\circ}$ would suffice, while a small one would require more than 2° .

Such a condition in small watches is prejudicial to theoretic isochronism, as it contributes to an increase of friction in the escapement. In fact, the discussion in regard to long and short levers is based, in a measure, on the same principle. If long levers can be used in large watches with a no greater proportional amount of friction than a short lever in a small watch it is no more objectionable as a factor in theoretic isochronism and has the advantage of contributing to a durable rate of a watch with the lever escapement.

Again, if there is one thing more than any other which reduces friction in all parts of any lever escapement, including the impulse roller pin, it is the employment of Oriental sapphires for all jewels in the escapement. This much has been demonstrated in English and Swiss watches from early times.

English lever escapements have been known to have been made with steel ratchet teeth escape wheels and sapphire pallets, which performed perfectly well, while such wheels with garnet pallets had the points of such wheels destroyed without much delay; the same result has been known with steel duplex wheels acting on colored ruby rollers.

One of the greatest drawbacks in adjusting watches besides the adaptation of an isochronal balance spring is the meeting with a perfect compensation balance, so styled in very moderate sense, *i.e.*, a balance which will retain its poise from its subjection to a mean local temperature to varying temperature after having been adjusted and re-poised at about 25° F.

(To be continued.)

L. L. Mason, said to be the oldest jeweler in Jamestown, N. Y., where he has been engaged in business for about 60 years, 50 of which he spent at the same location, is about to retire from business. Mr. Mason is 83 years of age.

Interesting Old Clock.

ANOTHER interesting old clock in which the butting goats appear is that of Aschersleben, which is installed in the tower of the town hall. It is not very well known, and the following description and accompanying photograph will therefore serve the purpose of directing attention to the existence of this clock.

Above the dial is a sphere, representing the moon's phases, and above this are two goats which, at each striking of the hour, butt their heads together.

The bearded human face above the goats,

CURIOUS CLOCK OF ASCHERSLEBEN.

at each stroke of the hour, opens and closes its mouth, while at the same time a small ball, apparently representing an apple, moves up and down in front of the mouth. This is similar to the Tantalus head and apple of the Jena clock.

According to the statement of Dr. Adolf Brinkmann, in his work, "Descriptive Account of the Ancient Edifices and Art Monuments of the City of Aschersleben," page 79, the clock was restored in 1669 by the deaf and dumb clockmaker, Caspar Melzer, of Allstedt, at great expense, which shows that the original construction dates back to a much earlier time.

It was regarded as one of the seven wonders of the town. In 1680, however, the

WALTHAM WATCHES

FIFTY YEARS AGO

FRIDAY, APRIL 22, 1859.—The proprietors and workmen of the watch factory at Waltham were entertained by Gov. Banks at his residence today. About 200 men and women were present.

From Boston Advertiser, April 22, 1909.

The Waltham factory had existed five years. Here was the first successful effort to realize the dream of Dennison, father of American watch-making. Here was the first and only structure in the world erected for manufacturing pocket timepieces. Three hundred people were employed, the largest number ever assembled in such an enterprise. General Banks was proud of Waltham, where he was born and where he had worked as bobbin boy in a cotton mill. He found time, while Governor of a great State, to greet and encourage the operatives of this watch factory, because he believed that they were creating an imperishable industry. He lived until the word WALTHAM had symbolized the perfect watch in every country on the globe.

In that year, 1859, the total number of Waltham watches manufactured was 12,304; in 1906, the product was 855,000; to-day there are 16,000,000 in use. The Waltham factory was the parent factory. It is now the corner-stone of an industry that gives a livelihood to more than 100,000 persons in the United States. In 1859, it was the only institution of its kind here or anywhere else; every other watch factory came later. The Waltham factory is distinguished by its achievements as well as by its age. Waltham watches have always exemplified the highest type of watch construction, and public recognition of their superiority is attested by the highest awards at all the great Expositions wherever they have been shown.

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing on this hemisphere.

clock must have ceased to operate, or deemed insufficient with striking, for at that time the town hall tower was equipped with a striking clock.

More recently, in 1880, the works of the clock were completely restored, and in 1907 thoroughly renovated so that the entire mechanical works, as above described, are now again in working order.

More About Daylight Saving Bill.

(From the *Scientific American*.)

THERE are a great many things to be said in favor of, and a few against, the proposal to advance the clock by one hour during the Summer months. Although the suggested change is startling, there is in it nothing of the ludicrous or farcical, as some of its critics have suggested. The principal object of the movement is to apportion a larger part of the period of daylight to evening rest and recreation than is now possible in latitudes embraced by the United States. Under present conditions the close of the working day is so near sunset that, by the time the evening meal is over twilight has commenced, and the stretch of remaining daylight is too short for any lengthy outdoor sports or pastimes of the kind which require daylight for their exercise.

Those of us who have spent part of the Summer months in northern latitudes, where the later sunset and longer duration of twilight combine to make the Summer evenings the most lengthy and delightful period of recreation, understand perfectly well the motive and force of the arguments which have led to the present widespread movement in favor of what has popularly come to be known as a longer daylight day. The evening is the ideal time for outdoor recreation. The mind and body are relieved of the stress of the day's occupation, and the cooler temperature, which is a consideration, even in the northern latitudes, becomes of double importance in the more southerly regions, where temperatures during the day run up to 90 or even 100 in the shade.

The proposed arrangement as advocated by the National Daylight Association in this country is that from and after 2 o'clock in the morning of the first day of May in each year, until 2 o'clock on the morning of the first day of October, the standard time shall be one hour in advance of the standard time now in use. This result is to be secured by advancing the hands of the clock one hour on May 1 and moving them back one hour on Oct. 1. The change would involve a shortening of the hours of sleep only on the last day of April.

Subsequently through the Summer months people would get up and retire by the clock as usual, and the regular schedule of railroads, factories and all social institutions would be maintained as before. The only perceptible difference would be that instead of the twilight ending at from 9 to 9:30 it would last from 10 to 10:30, according to the latitude, and the public would have the benefit of two or three hours of daylight after the evening meal, instead of one or two hours as under the present arrangement.

We cannot agree with the circular of

the Daylight Association that no adjustment of railroad schedules would be necessary. Some adjustment would obviously be needed on the two days which marked the opening and close of the longer daylight season; but with those two exceptions regular schedules could be maintained without interruption during the 150 days or more of the late Summer and early Fall months.

At the present time there is a bill before the British Parliament which provides for a change similar to that related above. That the matter is being seriously regarded in that country is shown by the fact that it has the indorsement of the Executive Committee of the London County Council, of over 100 municipal corporations and town councils of the National Convention of Royal Burghs of Scotland, representing about 200 towns, and of 130 chambers of commerce, associations and clubs.

A similar bill is now before the Canadian Parliament, and the report of the special committee, to whom it was referred, says that in view of the almost unanimous support in favor of the bill, and that its object can be so easily attained, they consider that it should be put in force as soon as possible. It is probable that a similar bill, which has already received wide journalistic indorsement, will be introduced in France.

Some Phases of the Ethics of the Trade.

(Address by C. R. HART, delivered at the recent convention of the Illinois Retail Jewelers' Association at Peoria.)

I HAVE to consider before you to-day the advisability of enacting a law for the licensing of watchmakers; also the methods of taking in watch work. The mere suggestion of this topic indicates that there must be something wrong, that someone is not satisfied with the present methods and that there is a desire for a change. There must be a reason for it somewhere, however much or little, and with this thought before us, let us try and find out what it is and see if we can determine and act to correct it.

I do not see how any person who has studied this subject a little can come to any other conclusion than that this proposed law is aimed at the horological school; and why? There is only one other method we can refer to, and that is the apprentice system.

Let us look at it for a few moments. I presume there are some before me who have gone through the old regime and who would give no flattering account of such hardships, no matter how apt they might have been. I have a few reminiscences, did I think them apropos, or that they would add anything of value to what you already know. There were inconsistencies connected with it that were galling in the extreme—ways that bowed little to the apprentice. The process was slow and tedious, and he was not assured that when his time was served he would be much better prepared to meet the responsibilities of life than students from our public schools are to-day. Some of these old methods can be readily traced to our present institutions of learning. Suffice it to say that it has gone

into the past with all its imperfections. Those who know of them are not sorry.

Let's pass on and try to forget and look at the future. As there is little to commend in this old regime, let's take up something better and have a regard for those who are to take our places in the future and see if we can formulate a better plan that will help them to acquire more knowledge in a shorter time and better skill in a briefer period—the art that is so much needed. Let us lay aside our prejudices and look with favor on the new methods, such as are right, and condemn those that are wrong; not feel jealous at their progress, but highly elated.

All will admit, I think, that we need something to change conditions in this line. That you may not think we are overreaching and presumptuous I wish to refer to articles which have appeared from time to time in the jewelers' periodicals with headings like these: "What shall we do for future watchmakers?" or "How can we make our watchmakers more proficient?" I am not so sure that had the apprentice system obtained up to the present time we would have been in any better condition than at the present. Those who believe in the apprenticeship system should start at once to correct this apparent evil.

Any disinterested person who will take this matter up as suggested would in all fairness try to find out what kind of workmen were in vogue; how their ability was acquired; what their methods were to produce this result, to determine where the trouble was. He should take into consideration the natural aptness of the workmen and their application to acquire the methods employed. As we have gone over briefly the apprenticeship system, let us now take up the horological school, for this is the only alternative and under different heads trace out from cause to effect and see where the schools are to blame. First, what is the cause of the young men taking up this vocation? Second, how are they induced to try it? Third, what methods are employed? Fourth, what are they led to expect?

First, as to cause. Any young man who desires to make a living is led to take up something that appeals to him and the more alluring the advertisements the more rapidly he is induced to try his luck. What means are employed to persuade him? A perusal of the advertisements and correspondence of many of the horological schools of the United States will answer this question. Here are a few samples: "A student of ours selected and staked on a balance arbor and had the watch running in five minutes." Another: "A student without previous experience, at the end of three months, properly repaired, making some new parts that were missing, to a quarter second in the pendant train watch, and repaired other complicated watches equally as well." Another: "We teach all the intricate knowledge of watch work in from three to six months. Our students are in demand and are earning large salaries."

Any student with half sense would of necessity conclude that six months was all that was necessary to become a thorough workman; or that he was no good at the

Keep your eyes open for the NEW "ALDENS" They're coming

business; or that the advertisement or correspondence was a willful misrepresentation. If the second was decided on it might relieve the minds of many watchmakers as to the overstocking this craft of incompetent workmen.

What methods are employed and how do these schools start? In brief I may say in any old way. I hope I am not misunderstood in following out this line of argument, or that, because I hold one of the highest positions in one of the largest schools of horology in America, that I want to belittle in any way other schools, but only look at the question fairly, as anyone has a right to do.

This is a serious business, as I look at it, and I only regret that it seems necessary to point out a few of the glaring inconsistencies, that you may see where we are at, and see if it is not possible to right some of these wrongs that the coming watchmaker may at least have a fair chance and be led to see the necessity of taking a thorough course at some school that does not misrepresent and go with the expectancy of spending enough time to become a thorough artisan. This alone would lessen the increase in so-called watchmakers.

But, as to the way schools start. Any person who has the audacity and diabolical gall, with a little knowledge of watchwork, can start a school and prey on the unsuspecting youth of to-day. Advertisements can be so worded as to cause them to think some new aerial method outstripping any of those in vogue has been devised, and they readily believe the misrepresentation, that all they have to do is to buy a ticket, get aboard and sit and watch the wheels go round; they will be wafted from this mundane sphere to some aerial globe where work is unnecessary. I said diabolical gall and it looks like that to me. A recently started school copied the Bradley Horological prospectus verbatim, typographic errors as well. What do you call that?

Schools that spring up like mushrooms are suspicious, and as are their advertisements so are their instruction and methods. I believe that a law should be obtained that would regulate all schools first. They should be made to demonstrate their ability by giving students proper instruction, that certificates or diplomas they issue shall be proof positive of the student's ability.

It may be thought that this is an argument for schools, not for a law to license watchmakers. This may be so, and such a law may be the most rational to start with, instead of reversing the order and letting the cause follow the effect, as the optometrists' law has done; which reminds me of a bystander's remark who saw the attending physician of the deceased following in the funeral procession.

The optometrists' law was started this way and it has proven advantageous to some, but to others not so good.

The best that can be said of it is that it has stirred up the antiquated opticians and induced them to become more proficient, and made those intending entering that profession hesitate and count the cost. And could this be done in all lines everywhere the result would be most beneficial.

Yes, when the optometrists found the

fakirs traveling around selling glasses at from \$10 to \$30 they thought it time for a law; and reasoning conversely one would see that when watchmakers were found, not a few of them were doing from five to eight dollars' worth of work for \$1.75 to \$2.50, there should be another law, for the prevention of cruelty to animals, I should say, or, as I have suggested, a law to properly educate. But it may be best to let the cause follow the effect instead of bringing the schools up to a proper standard. This may be the easiest way, but unless there is something tangible the outlook will not be very bright.

Let us take for example the proposed Nebraska law—methods to be employed in examining watchmakers, for instance. In brief, they are thus: The jewelers' association should constitute a board for the appointing of examiners. These shall be selected from the watchmakers of the State. Any man shall be deemed eligible who has worked at the bench for five years, this being all the time thought necessary for a workman to perfect himself in this business for this position. They may have only cheap watches out there. This reminds me of the early examining board for school teachers. As the early education of these members had been sadly neglected, one with more social influence than the rest was selected.

He knew little or nothing as to examining teachers. Not wishing to expose his ignorance by appointing some one who did, he found himself on a certain morning in the office of the school board ready for business. To give an educational appearance at this time a large map of the United States was hung on the wall and a few books were thrown around promiscuously on the desk. When all was in readiness he told his assistant, Jim, to start a coming. First was a timid young lady and made more so by the anticipation of the coming ordeal.

The good-natured examiner saw this and felt sorry for her; but he knew he must maintain the dignity of the board, so forbade any comment as he looked over his glasses and said: "Good morning! Your name, please?" She answered: "Miss Amanda Thinksome." "And where do you live?" "In the town of Knowmore." "Well, that can't be on the map." "Oh, yes, it is!" "Will you please point it out to me? I would like to see a town that's no more on the map. Here it is, but it's not the kind of town you refer to; it's 'Knowmore.' Now tell me something about the population of your town." "Yes, sir. It has a population of about 600, made up of white and colored people. A peculiar thing about it is, most of the white people's names are Black, and the black people's names are White. The remaining few white people whose names are Brown, and the rest of the colored ones is Gray." "That must be a sort of amalgamation of the race." "Yes, sir, I think so." "Well, I guess you'll do. You may call for your certificate tomorrow and be ready to start school next Monday. Good morning!"

Jim showed in another. "Well, my lady, what is your name?" "Miss Amantha Thinkmuch." "Why, that's similar to the one just left here. And where do you

live?" "In the town of Thoughtmore." "Can you tell me where the town of Knowmore is?" "Why, I never heard of such a place. How should I know of a town that is no more. I suppose that is the place Poe's raven was croaking about. Poe did not know where it was, how should I?" "Well, Miss Thoughtmuch, from the town of Thoughtmore, I would suggest you keep on thinking, and you will be like the young lady who has just passed, Miss Thinksome, and if you'll find out where the town of Knowmore is you'll know more. You don't pass."

While this is said figuratively, of course, it suggests something of what is likely to happen if such a law went into effect with this proviso.

Let's see how it would work as an examination for watchmakers. Leaving out the introduction, let us proceed to business.

Question 1. How do you put in a mainspring? Answer: With my fingers, of course. Well, let's see you do it, handing him a 00 English mainspring.

Question 2. How would you set a broken balance jewel that had been burnished in the plate? Answer: Punch out the old one with the tweezers and open the bezel with a hand burnisher, and fit a new jewel; burnish over the bezel with the same tool. How else would you do it?

Question 3. If a watch would come in, and after examining carefully you find out the error and the price for repairs would be \$4.00 and the customer said he would only give \$2.00, what would you do? Answer: Take it in, of course. You pass.

I am not reflecting on the ability of artisans, but on mediocrity. This may seem unfair, but it is easy to find hundreds who have worked on the bench more than five years that would ask no more practical questions, nor give any better answers. And yet I believe a law should be enacted, but for what? To enable the trickery of uneducated men to make capital out of it and to make it appear there was something doing when there was not. No, sir! For the outcome would be most disastrous and discouraging to young men who are desirous of taking up this art and who should have the right of any American citizen to become one of its best artisans.

This kind of business would draw them into other fields where they would receive no better treatment, and possibly worse. Now, I do not believe in this kind of a law, but believe in a law that would stand square, that would encourage every young man that wanted to enter this or any other line and that would assure him that when he had complied with the requirements of such institutions and spent his time that he should receive the necessary knowledge and acquire the coveted skill which would be proof positive his time was not spent in vain; that he could take his place with a journeyman workman, do his part and earn his share.

The Conn Jewelry Co., State St., Bowling Green, Ky., discontinued business recently, and Mr. Conn has left for Cleveland, O., where he will begin a new enterprise. The stock at Bowling Green has been disposed of at cost.

Always Buy Watches of a Retail Jeweler

A Mail-Order House, Although It May Sell a Good Watch,
Cannot Adjust It To Your Person.

NO watch you buy by mail will keep perfect time, no matter who made it, how perfectly it is made or what its reputation. A good time-keeper must be regulated to your person as carefully as a good tailor fits a coat. In no other way can you secure perfect time-keeping service. No one but your jeweler can do this. Watches you buy of mail-order concerns are not and cannot be so regulated. That's the reason they never keep perfect time and always run too fast or too slow. The variation of even one one-thousandth part in the vibration of the delicate watch balance which governs the movement, means a loss or gain of a minute and a half each day. South Bend Watches are sold only by reliable jewelers. They are never sold by mail, because South Bend Watches are so good that we do not want their great reputation for reliability and accuracy injured by improper regulating. We make South

Bend Watches as nearly perfect as it is possible to make a watch and pay the jeweler to regulate it to keep perfect time in your pocket. A watch which is a perfect time-keeper in one man's pocket, very likely will not keep time at all in another man's pocket. If you carry a South Bend Watch you will know that the watch you carry will stand tests that are twice as severe as any that you are ever likely to give it. It might be frozen solid in a block of ice—it would still keep satisfactory time. Every adjusted South Bend Watch, before it is sent to your jeweler, is baked in an oven heated to 100 degrees Fahrenheit and kept for hours in a refrigerator at freezing point. It must keep perfect time in every position and not be affected by the jara and jolla of the hardest wear and usage you can give it. A South Bend Watch, although it is the best watch in the world, costs you no more than other good watches. Your jeweler will gladly show them to you and tell you why they are the best watches for you to buy. Send coupon today for our handsome book "How Good Watches are Made," and an interesting little device showing how South Bend watches adjust themselves to every temperature. Don't fail to talk with your jeweler about watches before you buy any watch.

South Bend Watch Company
South Bend, Ind.

The Ads That Ring True

to the cause of the Retail Jeweler are the SOUTH BENDS.

Men may talk and men may promise you protection against unfair competition, but we have gone further—we have put ourselves in black and white before the 80,000,000 of Uncle Sam's people, stating clearly that SOUTH BEND WATCHES are not sold to mail order houses.

What other manufacturer of watches has ever unqualifiedly come out for the Retail Jeweler? We are giving you quality goods. Now get in the bandwagon and help drum the mail order man out of the retail jewelers' camp.

Send for prices and literature to-day.

THE PENNSYLVANIA WATCH CASE COMPANY

YORK, PA.

The Development of the Lever Escapement and Methods of Adjustment.

(Lecture delivered by CHARLES T. HIGGINBOTHAM, Consulting Superintendent of South Bend Watch Co., at annual meeting of National Association of Retail Jewelers, Omaha, Nebr.)

FOUR HUNDRED years ago a Nuremberg locksmith made what was probably the first pocket timepiece. However elated he may have been over his achievement, and however sanguine of its future, he little dreamed of the important part the little instrument of which that was a crude sample was destined to play in the world's progress.

That "Nuremberg egg" was a mere mechanical toy. With its roughly hammered mainspring, its crude escapement and its hog's bristle hairspring, it was so erratic in its performance that as a timepiece it was useless; but it was the embryo of the most wonderful piece of mechanism man has ever produced.

In reply to the question, "What has been done in the way of horological invention since?" some one answers, "Next to nothing." This is a great injustice to modern horology. True, the improvements made during the last one hundred years have been more in the nature of evolutions than inventions, but it cannot be denied that stupendous strides have been taken toward perfection in timekeeping. To appreciate this fully it should be borne in mind that the requirements of to-day are many times more exacting than the previous time referred to. When Peter Hale made his first watch an entire hour had less commercial value than a single minute has to-day. When John Harrison took the English prize of twenty thousand pounds with his famous ship's chronometer the requirement was that it should enable the captain to determine longitude within half a degree.

This means that the chronometer should not have varied more than two minutes. Compare this with the requirements of railroad time service as applied to watches carried under the extremely trying conditions inseparable from railway service. The extreme limit allowed is thirty seconds a week. Now, have you ever thought of what that means? Let me tell you. It means that the vibrations of the balance must not vary to the extent of one out of every twenty thousand. In fact, it is to be feared that we have at last reached the limit of mechanical devices to be carried in the pocket for timekeeping.

The lever escapement as invented by Mudge was not the detached lever of to-day; in the original one the lever was not a fork; the end was simply a point. The locking faces of the pallets were so inclined that the point of the lever was kept in constant contact with the roller edge and delivered impulse to the balance by means of a notch in the roller, thus entailing a continuous friction between the acting parts. This probably accounts for the fact that he discontinued the use of his own invention, substituting therefor the cylinder and verge escapements in his watches. We are told that he devoted much time in vain efforts to bring them to a state of perfection.

It remained for George Savage and others to develop the idea of Mudge into the detached lever escapement, which in a long and stubbornly fought contest has proved its superiority over all others for pocket timepieces. It is of this form of escapement that I shall speak tonight.

The office of any escapement is to transform the rotary motion of the watch wheels into the vibratory one of the balance. The desideratum sought for is to accomplish this with the least possible disturbance of the isochronal vibrations of the balance.

To accomplish this the impulses should be delivered through a short arc and the major part of the vibrations performed without contact. In the modern detached lever the arc of impulse of the roller is about one-fiftieth of the vibration. This is found to meet the requirement better than any other form of escapement, with the exception of the chronometer. The chronometer, however, has been found unsuited for a pocket timepiece, mainly for the reason that it delivers an impulse only when the balance is making an excursion in one direction. This is to say, at every second vibration. This feature, while it is an advantage inasmuch as the time of contact is decreased, yet, as it is inseparable from what is known as a dead point it causes a liability to stoppage from any sudden motion of the watch.

It is only of late years that the full importance of the conditions prevailing in an escapement and their effect upon the isochronal vibrations of the balance are being fully appreciated.

The effect of acceleration and retardation on a balance and its influence in position adjustment play an important part in the escapement.

Time will not permit going much into detail on this point. I will simply lay down the following rule: Acceleration of the motion of a balance while it is approaching the point of rest causes a gain in the time of vibration; while acceleration when receding from the point of rest causes a loss. Retardation produces the opposite effect. Approaching the point of rest causes a loss; receding from it a gain. There being many defects liable to exist to cause unequal acceleration and retardation, the importance of securing the best possible conditions in all parts of the escapement becomes apparent, and the fact that the unlocking is accomplished by the momentum of the balance, which is obliged at this point to force the entire train backward a certain amount, thus winding up the mainspring, and as this takes place three hundred times every minute emphasizes that importance—indeed, makes it a necessity where close time is required.

I should recommend before making any alterations to correct an escapement a thorough examination of all its parts separately; then a thorough test of all its actions.

First inspect each individual part, seeing that each pivot, jewel, bearing surface, etc., is in perfect order. A few of the most important points are: The jewel pin upright and faced square to the front; the guard pin central with the fork slot, and, if a single roller escapement, perfectly up-

right; the sides of the fork slot equal in length;—in fact, all parts in good order. Now put in the escape wheel and pallets and try the draft as follows: With the train let down to the point of a twenty-four hour run and holding the watch edgewise with the fork in a horizontal position press it with a long pointed piece of pegwood, but not sufficient to unlock the wheel, away from the banking. If it does not return to its position the draft is too light. This should be tried with the escape wheel locked in turn on each stone. Now put in the balance and try the roller pin depth in the fork slot. To do this close up the banking so as to arrest the fork at the instant of locking. If the roller pin passes out of the fork slot in this condition it is not too far forward.

To ascertain if it is too far back bring the balance slowly round, carrying the pallet almost to the point of unlocking, and, holding it here, try the shake of the fork on the roller pin. If it is in excess of the shake when in direct line with the balance and pallet arbor pivots, it indicates that it is not embraced by the fork slot and is, therefore, too far back.

Try the lock; it should be about two one-hundredths of a millimeter and alike on both stones; the slide should be the same amount in addition, making four one-hundredths in all. Try the drop, or as it is sometimes called, inside and outside shake; it should be alike on both stones. Finally try the action between the impulse faces of wheel teeth and pallet stones. There should be a divergence of the faces toward the locking corners of the stones at the commencement of the impulses and a coincidence before their completion.

Having made notes of any defects found, proceed with your alterations, beginning at the escape wheel and pallets. In making these alterations the following rules should be observed. Drawing out the receiving stone increases the lock on both stones, increases the drop on the discharging, increases the draft on the discharging and increases the divergence between the impulse faces of wheel tooth and receiver. Pushing in the receiving stone decreases the lock on both, decreases the drop on the discharging, decreases the draft on the discharging and decreases the divergence between the impulse faces of wheel tooth and receiver.

Drawing out the discharging stone increases the lock on both, decreases the drop on the receiver, decreases the draft on the receiver and decreases the divergence between the impulse faces and wheel tooth and discharging stone. Pushing in the discharging stone decreases the lock on both, increases the drop on receiver, increases the draft on the receiver and increases the divergence between the impulse faces of wheel tooth and discharging stone.

It will sometimes be necessary to bend the fork in order to secure correct action of the wheel teeth on the pallet stone and at the same time to correct fork and roller action. I shall not attempt to dictate how this is to be done beyond stating that when the shake between the guard pin is greatest on the right the fork should be bent to the left and *vice versa*.

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The hammer blow is too weak to get the tone out of good bells; only thin, light bells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MONASTERY," which are heavy, powerful brass works, with solid steel pinions and built as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture, fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular bells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

Prices F. O. B. New York.

No. 82.

RING OUT THE OLD—RING IN THE NEW

Why travel in the same old rut the balance of your natural life, and buy the same antiquated styles of Nickel Alarm Clocks your grandfather used to buy, just because some manufacturers have not thought it necessary to produce new designs in Nickel Alarms, as they do in other clocks?

We have some new ones, superior to anything heretofore made, and to introduce them and put a set into the hands of every jeweler, we will, on receipt of \$6.00, deliver east of the Rocky Mountains, express prepaid, one sample of each, consisting of eight clocks as described.

Don't fail to avail yourself of this opportunity to see a complete line of up-to-date alarm clocks.

See coupon at bottom of page.

**THE
E. INGRAHAM
CO.**

BRISTOL, CONN.

STANDARD.—30-hour time, Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

THE RATTLER.—30-hour time, Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case nickeled and highly polished.

LONG ALARM.—30-hour time, Six-minute Alarm with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

ALTERNATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Height, 6 1-2 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

DI-ALTERNATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch; extra large bell. Height, 7 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

"THE ALARM CLOCK WITH THE CONCEALED BELL"

See cut of interior view showing bell located entirely within the case. The unsightly visible bell eliminated. Bell cannot be disarranged or thrown out of adjustment.

SIREN.—30-hour time, Long Alarm (four minutes), with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass; Case, nickeled and highly polished.

VIBRATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside of case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in., solid brass silvered; Case, solid brass, old brass finish.

ROTATOR.—30-hour time, Repeating Alarm, rings alternately every fifteen seconds for twelve minutes, with "shut-off" switch. Large bell inside case. (See interior view.) Height, 6 in.; Dial, 4 1-2 in.; Case, seamless brass nickeled.

Name Address

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

A Quaint and Laugh-Provoking Window Display.

Prepared expressly for The Jewelers' Circular-Weekly.

JJEWELERS who have had any experience in using moving window displays have found them to be profitable advertising, and when the cost of producing these

on these balloons to represent different types, as shown in A. Then nail a small bit of board x to an upright piece y, and fix a staple z in the top, as shown in B.

DIAGRAM SHOWING HOW TO ARRANGE THE DISPLAY.

shows is reduced to a minimum they are within the reach of every man in the trade.

Procure a few small balloons (the ones that are sold in any toy shop), preferably those of a light yellow color; paint faces

This stand can now be nailed to the base of this window and the cord of the balloon tied to the staple, as shown in C.

Then cut out of large sheets of cardboard crude outline patterns like D, or to repre-

sent any other figures which you desire.

Paint a few lines on them to represent buttons, pockets, etc. Don't try to be too artistic; just be neat and the effect produced will be satisfactory.

Now nail your cardboard form to the upright stick and place your electric fan (which is concealed behind a screen) in such a position that the breeze created by it will strike the head of the figure (balloon). The motion imparted thereby will be sidewise, as shown by dotted lines in illustration E.

One fan will be sufficient to keep in motion as many different heads as one desires to use, and if the heads are placed at irregular heights, varying only a few inches, and if the strings controlling them are also of slightly different lengths, the most amusing motions will result. Some will sway quickly and others will move with a conic kind of dignity. F shows a variety of figures and G is an illustration giving an idea for arranging a group in a window.

Of course, where only one figure is used, it is an attraction, but the interest created by a number of them is much greater.

Effective window cards are:

Our line is "a head" of any other.
They all like our novelties.
Everyone likes the way we do business.
"Shake" that unreliable watch
and get a — watch—guaranteed to be correct.
The public is not all from Missouri.
But we are glad to "show them" our line.

A Good Business Man.

"CAN you tell me what's the matter with this watch?" inquired the Average Looking Man anxiously.

The jeweler stuck a glass box in his eye and glanced at the movement. Then he looked up.

"You find it necessary to shake it real hard now and then to start it going, don't you?" he inquired.

"That's right."

"And you find that it gets dusty, don't you? Perhaps you don't blow hard enough on the works?"

"Oh, yes I do—every day."

"Well, well! But are you careful to start the balance wheel going with a toothpick every hour or two?"

"Yes, I do that, too."

"And in spite of all your precautions, it needs about \$5 worth of repairs. It's very strange."

For the jeweler possessed a dry and sarcastic wit.—Plain Dealer.

Storekeeping Department.

A Dash of Welcome Courtesy.

By NENO W. PUTNAM.

DID you ever have on your working force a bright young man from the country districts who had made good and won a high place in your operating system, where his absence from duty would seriously disarrange things? Then, in the very midst of some special business pressure, did you ever have some country friend or relative of that employe, running over with the hospitality of the rural districts and not alive to the different conditions which prevail in the city store and the village grocery, drop in for an old-fashioned chat with "John?" The situation may be trying for all concerned and possibly amusing for some; but it is one which may be seriously bungled in the handling. The writer once saw it managed by one business man in a way that ought to be a revelation to many other people.

"John" was of that sterling stuff who did not feel above his old friends even after he had shaken all marks of the soil from his clothing. He would not have hurt the feelings of the simple-hearted old farmer who one day presented himself for a talk, for worlds, and was genuinely glad to see him besides. But he was troubled in spirit, too. He knew the man to be an inveterate talker who would expect a chair to be set out for him in some convenient corner of the store, and the best part of the forenoon given up to village gossip. Besides, he had seen the quick exchange of amused glances flashed between some of the other clerks, and he began to anticipate in his imagination the ridicule that might presently descend upon the old man's helpless head as well as his own.

Somebody else took in the situation, also. The proprietor of that store was brought up in the country and he sized up both the man and his clerk's embarrassing situation at a glance. The interests of the store were dear to him, but not more dear than his own manhood. Without a moment's

hesitation he passed down before the long counters and sought an introduction to the visitor. With a few timely questioning remarks he quickly learned something of the old man's connection with John in the old days, then with the hearty assurance that "any of John's old friends were friends of the house," he fairly dragged the man along with him over the place, shewed him the office, explained briefly the card indexes and the cash registers, opened the safe for him, took him over to the clock department and showed him the latest novelty in timepieces, called his attention to some of their most interesting stock, and finally ended up with the show windows at the front of the store. There he gave the old man a courteous dismissal with the remark that:

"I am very sorry John is so busy to-day, so he cannot take time to show you around, but be sure and come back a few minutes before six, when he will be at leisure and, I am sure, will be delighted to see you. Now, don't forget."

The visitor didn't forget. He left the place with the impression that he had been right royally entertained and that his failure to have the desired visit with John was due wholly to the fact that this was one of the biggest, best and busiest stores in the world and that John happened to have made himself one of the main spokes in the wheel. His pride was not hurt in the least. He had been made welcome; only, it happened to be "threshin' day" when he called and things were in a rush.

As their employer marched back to his desk the other clerks looked at each other and concluded to forget the ridiculing remarks they had been thinking up. They had had a warning and a lesson in practical courtesy as well. While John, full of gratitude toward his employer for this timely rescue of his old friend from a position that a less considerate person would only have made worse, put in the next few hours before the return of his visitor in his best extra licks in the interests of this man who was not too busy to be a friend of his own employes.

Attractive Retail Jewelry Establishment of Syman Bros. Jewelry Co., Denver, Colo.

TWO views of the new retail jewelry establishment of the Syman Bros. Jewelry Co., Denver, Colo., are shown below. The picture on the left is a night view and shows how effective is the illumination of the show windows, of which there are seven, each 10 by seven by three feet, lighted by Tungsten lamps. Two of these lamps are arranged in each window, each lamp having six candle-power. The whole store is furnished in mahogany. The sales-room is 100 by 35 feet, and is illuminated by a large number of Tungsten lamps. The floor is tiled.

There is an ample basement, which is used by the concern as a factory. The latter is equipped with every modern device for the expeditious repairing and manufacturing of jewelry. All the machinery is operated by electricity and is located in a separate room from the workmen. The power is carried from the engine rooms to the shops by means of shafts and belts.

The accounting department and the firm's large safes are located in the rear of the store, where there is also a first class engraving department in charge of three engravers. The diamond room is located well in front.

The Syman Bros. Co. recently moved to its present store, which is located at 16th and Champa Sts., having been formerly located at 828 16th St. The business was started about 20 years ago, and has gradually and steadily developed. Charles S. Syman died in 1904, and the business was then incorporated under the present title, with Frederick F. Syman as the president and Zerlina W. Syman as the secretary of the concern.

Hard work, enterprise, judicious advertising and originality have been given as the attributes which built up the success of this firm, which has done some excellent work, including the turning out of the celebrated silver service for the cruiser *Colorado*, some time ago.

PHOTO TAKEN AT NIGHT, SHOWING THE WELL-ILLUMINATED SHOW WINDOWS IN THE STORE OF SYMAN BROS., DENVER, COLO.; ALSO A VIEW OF THE INTERIOR OF THE ESTABLISHMENT.

RETAIL JEWELERS ADVERTISING

The Display and Advertising of Children's Jewelry.

(Written expressly for THE JEWELERS' CIRCULAR—WEEKLY.)

IS there anything, in all your plans for attracting trade, that will appeal specially to the children? Juvenile approval amounts to a great deal more than many people think. Not only is the child friend of to-day likely to become the profitable customer of to-morrow, but the parent of to-day is, pretty apt to follow closely on any favorite trail of the child. Indeed, there is no surer way of pleasing the average parent

appropriate height that was given over wholly to the children? Then it would not be long before the little folks would have their own department located, would be attracted by some of its contents and would call the attention of the parent with persistent appeal. At the same time the display would be more effectual with the parent who, perhaps in search of some juvenile gift, might fail to notice anything suitable if presented in a less conspicuous manner and might finally go to a general store where toys were given special prominence.

Arrange the children's case as daintily as any other in the store and give it a conspicuous location. The grown-ups will hunt up their own department; but you must help the children find theirs by placing it where it is readily seen. Such a policy is not depriving you of valuable space without a full measure of returns.

What more attractive advertising picture did you ever see than one that has to do with children and their interests? What more popular window display can you suggest than one which appeals through popular interest in the child? A child's show case, even if given the very best space in the entire store, will be found a valuable advertising attraction, superior, perhaps, to any other that could be devised.

Keep the contents of this case scrupulously free from dust, for small eyes are observing. Teach the children early in life the lesson of store neatness and trust them to appreciate the lesson always as they advance in years. Let the clerks understand that this department must be given, the same careful attention that any other gets; if possible, let it be presided over by some sweet-faced young woman who has the knack of making up with children and who likes to pet them.

Do not forget to advertise the children's department both in the newspapers and in the window space; but, instead of setting apart certain days for advertising it exclusively, it is best to give a corner of the big advertisement to them every day; a corner of the window. It is more effective and will sustain a continued interest. Make the one corner (always the same one) the children's corner every day, so they will learn to look for it regularly. Keep it bright, fresh and new and make it a regular feature. Before you know it they will form the habit of looking for your advertisement every day and, as they advance in age, will gradually extend their reading over into the grown-up part of the advertisement. Children have a habit of expanding so gradually into grown-up cus-

tomers that it is best to make the advertisements appealing to each contiguous.

Do not forget them in the window display, either. Make up their corner of it as carefully as any other and once in a while give them the whole window. Many windows prepared for adults are dry affairs for the children, but who ever saw a child's window that was not attractive to grown people.

If your own little son or daughter should show a liking for the store and wish to take a hand at the counter a little while after school, put them over the children's counter and make the place still more attractive; at the same time your child is learning valuable business lessons. Then study the situation with a father's heart.

Nothing in the store is too good for your own child. You want to have it the very pleasantest spot of all. Does it have that, when presiding over the children's counter? If not, by all means move the counter and make it attractive enough to be worthy of your own child. Other fathers and mothers will appreciate the change and you will

than by pleasing the child, and children, so commonly neglected in modern store arrangements, are very susceptible to special attention.

There is doubtless in your stock of goods a quantity of trinkets intended for child wear, or use. Baby rings, children's watches, baby kodaks, cups, cutlery, and various articles in juvenile size. These are scattered about in the grown-up cases, out of reach of childish eyes, or so hopelessly buried among their more conspicuous neighbors as to escape the attention of all but the parent in direct search for the holiday or birthday gift.

How much more attractive these would be to the eyes of their possible future owners if gathered into one case of ap-

presently have the satisfaction of seeing your children's department the most popular attraction of your retail jewelry establishment.

In advertising children's jewelry in the local newspaper a very strong appeal can be made to the parents. The normal parent loves the child and is ever alert to bestow upon it material manifestations of everlasting affection. "A Tiny Ring for Baby" or "A Locket for Baby's Locks" have a sentimental value which is bound to bring those interested into the jewelry store.

It is also most advisable, when getting out booklets, to insert a page of suggestions, with here and there an illustration, "For Baby."

Truth Telling in Advertising.

(By JOEL BENTON, in *Fame*.)

THERE is nothing so strong as unbroken, everlasting verity. It is really a moral Gibraltar. Like Walter Scott's hero, he who is perched upon it, or has it upon his side, is a conqueror, and safe from all assault.

When a thing is so, how useless it is, as Carlyle would say, to affirm that it is

WHITLEY'S
THE HOUSE OF WEDDING GIFTS

WHITLEY'S is the one practical place to go for a wedding gift. Practical because you know that anything you buy here will be distinctive in design and reliable in quality. And it is so easy to choose a gift here because the entire house abounds in practical, appropriate wedding gift suggestions: useful and artistic pieces in solid silverware, new designs in sterling silver, exquisite creations in rich cut glass and beautiful wares for home beautifying.

Remember that the name "Whitley's" on the box gives the gift a distinction that is fully appreciated by the recipient. It carries with it an assurance of the highest quality and correct design. It reflects creditably on the judgment of the giver.

Whatever you are prepared to spend, you'll find some fitting wedding gift that will satisfy its purpose. Come in and see the exposition of many wedding gifts a few in Los Angeles.

CHARACTERISTIC AND ATTRACTIVE.

"other than so." If you attempt this stupidity, the load to carry to keep up the sham allegations will be forever burdensome. If, however, you cling to the truth, and let come whatsoever may come from it—ill-luck, temporary obstacles, disappointment, calumny, and so forth—you are, after all, on the triumphant road. You can say, with the Scotch hero:

"Come one, come all, this rock shall fly From its firm base as soon as I."

Once in a while it happens that, in view of these primitive and pregnant facts, some legislative body puts forth an enactment

Wir alle tragen Goldisan! Garantiertes Goldisan G.m.b.H., Pforzheim 2

A FOREIGN CONCEPTION OF JEWELRY ADVERTISING.

against the makers of falsehood, aimed directly at those of a commercial character—the makers of advertisements. We have already had something like an attempt of this sort, futile perhaps, at Albany, and also in some other States.

Very lately this matter was considered in Missouri—a member of the Legislature in that State proffering a very broad, detailed bill, to keep every advertisement in the newspapers, on posters or billboards, or however presented keyed up to the clear, uncolored truth. No form of lie or pretense, indeed, seems to have been overlooked by the member who drafted and in-

duced the bill. If it passes, all the gratuitous rubbish so often put forth as a "Bankrupt Sale," "Fire Sale," "Removal Sale" and the dozens of kinds like them (in case these statements and implications cannot be substantiated), will render the offender subject to wholesome punishment.

"Cotton" must not masquerade as "linen"; no seductive fleeciness of fabric shall claim to be "silk" if it is not silk; and "imported" or "foreign made" shall not be falsely alleged of gloves, rugs or any other product.

A multitude of specifications of tricks of the selling and publicity order are brought out in it as indictable or arraignable for the benefit of buyers primarily, and for morals and "the square deal," which I cannot name in the absence of the printed enactment. At this writing, too, I am not able to say in what stage of progress it stands, or whether it has passed, or has a fair chance of getting on the statute book.

The question will arise, perhaps, as to the practicability of making the people of a Commonwealth moral through the direct command of law—although law does compel, and for many years has compelled, the observance of correct weights and measures, and it is now supervising the proper labeling of drugs and food-stuffs. These last are certainly desirable ends to attain, and have for many years now called for support. * * *

In our modern progress we have now for many years reaped the ill-results that are so frequently linked with superior benefits. Man, truly, has "found out many inventions." In the "by-products" of coal and oil, for instance, in "dyes" that are good in certain ways and fatally bad in others, the people have been for a generation or more subjected to new and insidious dangers. The fact that they are so secret and "insidious" calls for the strictest supervision—considering what human nature and the fierce passion for money-making is.

As we do not live in the old-fashioned, simple country days, when foods and clothes were almost wholly "home-made," and nothing beyond the inevitable "peck of dirt" doom could be measured out to us, some larger supervision of things than was once necessary is imposed upon the State. It cannot prevent us, who are buyers, from making foolish bargains; but it can probably, to some extent, make it harder and more perilous for certain classes to wrong the consumers of their products.

So, if the Missouri Legislature can brace up the moral fiber of its business men by a law to enforce "truth-telling," it will do something to help the world a'long. It is true that we all ought to tell the truth for its own sake, and for ours, too. But how natural it is not to be impressed with this homily, and how crucially strong adverse temptation is.

But there is one thing always to be remembered. Falsehood is long and tortuous. It uses many words, while truth stands on brevity and straightforwardness. You can, therefore, put truth on the car panels, where a falsehood cannot so well survive. And, besides all that, it is the easiest method available for making the truth prevail.

Ira Holman, Mill Shoals, Ill., recently removed to Wayne City, in the same State.

Cloisonne enamel jewelry—the latest novelty. See samples in our show windows. The cloisonne, by means of its unique method of construction, supersedes all other kinds of enamel jewelry. No just idea of the beauty of these goods, the exquisite combination of colors, the delicate shading, the crystal transparency or the rich and fascinating effect can be conveyed by mere illustrations or descriptions. We are now enabled to offer these goods at a price which places them within the reach of all. Formerly the skilled craftsmen of France and Japan had a monopoly in the manufacture of this celebrated ware, but now the American product, owing to the improved process of manufacture, has outdone the Parisians and Japanese. This jewelry is not only exceptional for its beauty, but also for its durability and usefulness. Please call and see the goods and get our prices. We do fine enameling in our own shop. J. Good Taste in China and Pottery.

(From the *Canadian Pottery and Glass Gazette*.)

THE fact is not without a curious interest that, although the sale of thousands of pounds worth of goods every year is dependent on what is called "taste" but what is really fancy, the principles that should govern the selection of these articles are so little understood and so seldom studied. For the most part the very existence of any such principles is unknown. Each human being is supposed to be born with a perfect faculty for judging, and a nice and proper discrimination in the delicacies of color and form. To suggest otherwise is absolutely certain to give offense.

One may not, it is granted, be able actually to produce a work of art, but to judge of it when exhibited is a very different thing, and falls to the province of anyone who has an eye with which to see. The most extraordinary feature of this is that one will say in justification or extenuation of this position, "Of course, I don't pretend to understand art, and all that kind of thing"—and there is often just a sting of sarcasm in the remark—"but I know what I like!" But do you know what you really like? That is, what you like now and will like to-morrow and next year? The question of "taste" would be settled now and forever if this statement was true, but it is not. The forces of art culture might work in vain if this was the case. It is the knowing of what one really likes that is the kernel of the whole matter. For bad taste is like crime—no one really commits it deliberately, as crime, but mentally finds some justification for the deed.

The gratification obtained by the brain from the eye is dependent on the education of that eye by the brain, and the less the training of the eye, the grosser the taste. Of course, there is a natural endowment of the faculty of taste possessed by some, but it can and should be cultivated to obtain the fullest gratification from its use.

The whole question of good taste resolves itself into the selection of those things from the contemplation of which we can obtain the most permanent and complete satisfaction. We cannot obtain this satisfaction permanently from a meretricious article, but unfortunately we may momentarily, given an uncultivated eye, and it is this momentary satisfaction that is responsible for all the inartistic goods which are produced.

The eye is not only a fickle, but an im-

perfect instrument, and does not tell the brain all that it sees. All the rays that strike the retina are not conveyed individually and separately to the consciousness. We may be conscious of looking at only one thing, but the eye is receiving impressions from all the things that are in the range of vision at the time, and the appearance of the particular thing "looked at" is always modified by the impressions gained unknowingly in this way. This is not the place to enter into the intricacies of the harmony and contrast of colors, which is a science in itself, but this one point among many is mentioned to show that the matter of correctly judging the most ordinary article is not so simple as is often supposed.

To come more immediately to the point in question, it can hardly be denied that if the taste of the public at large is truly exemplified by the average crockery or pottery shop, then the taste of the public at large is undeniably bad. For the purchase of goods intended for a momentary or ephemeral delectation there are excuses to be made for a meretricious and gaudy appearance, but in the case of pottery which is a more or less permanent installation in the household, before the eye daily, there are none. The delusive sparkle and gloss that attracted the eye soon wear off, and we have to live with a tawdry and faded-looking article that is a standing monument of deceit and hypocrisy. But in the meantime the thing has been sold, and the selling is the great thing—that is what it was made for—in its most limited sense. And, of course, while the standard set up is whether an article will sell well, and not whether it ought to sell well, we cannot expect rapid advancement from the manufacturers and dealers holding these views. They point to their sales as evidence that the public want rubbish, and as they are in business to make money and not as art philanthropists, naturally rubbish is produced.

It is, however, not quite certain that this rubbish does really represent the average taste of the purchasing world; they buy, it is true, but if they do not see anything which is really good, artistically considered, at a price that appeals to their limited pockets, what are they to do? They have to buy what is produced or go without. If nothing was produced but what was cor-

rect they would have to buy *that* or go without. And we can scarcely believe that under these latter circumstances the bulk of goods sold would show any diminution. Again, in mitigation of the purchase of inferior stuff, it often happens that the cheapest of decorated articles are a shameless imitation of some superior production, but in the worst of these there may be some faint suggestion of the better article, and who shall say that it is not this faint reflection of beauty and good taste showing through the gross envelopment of tawdriness that appeals?

But along with this there is a kind of fetish, or if you like, humbug about crockery, arising no doubt from the "cult" of old pottery. When our wives and daughters go forth to select materials for a new dress they do not inquire whether the material was made by the living representative of the Arkwright family, but they select it on its merits and as fashion dictates. But with crockery it is quite another thing, and it is no exaggeration to assert that two articles, identical in every particular, one with ——'s name on the bottom, and the other without, twice the price will be asked and obtained for the former.

Now, what is this but a confession of abject ignorance? The gratification of the possessor does not arise from the contemplation of the article—but from the name on the bottom. He does not like it because it is good, but because he can confidently say it is, backed by this precious evidence.

The purchasing vagaries of the public are wonderful and inexplicable. A certain article is produced, falls flat on the market, or drags along its weary way of isolated and small sales perhaps for years when, hey presto! all at once it leaps into popularity, for no earthly reason that can be determined, and the public cannot have enough of it for a time. Now, what principles for future guidance can a manufacturer glean from this? Of course, the united efforts of manufacturer, buyer and shopkeeper count for something, and can force the sale of any given production to some extent, but if it does not exactly hit what is called by courtesy the public taste not all the shopkeepers and their allies in the kingdom can make it go for any length of time. And as nobody knows, or can know, what the public taste is, or what it is based on or whereof 'tis born, manufacturers still have to go plodding wonderingly along like the blindfold child in the game in the hope of catching it unawares.

So much for the public. We next have to consider the dealer. Surely in the whole

range of trades not one could be found where the average proprietor knows less about the productions he sells. Cases there are, of course, where an enterprising warehouseman, or such like, has blossomed out into the trade, and consequently should have a fairly correct notion of it. But the far greater proportion of them throughout the country probably have never set foot in a manufactory, or have any but the haziest idea of how china or pottery is made. Now, in the selling of many articles a knowledge of the manufacture of the articles is not required; a vendor of newspapers need not have spent his early youth in a paper mill, or a printer's office, but in the case of crockery there are hundreds of things about it that the well-equipped dealer should know. In the absence of that knowledge how can he guide the public taste towards the best when he does not know it himself? If every dealer who could spare the time and expense would make a pilgrimage yearly to the potteries and see for himself the various processes entailed in the production of the commodities he sells he would benefit immensely, not only in being able to talk to his customers with the assurance of knowledge at first hand, but incidentally promote more friendly relationship between the customer and manufacturer.

By coming more directly to the question of taste the average dealer's shelves and window are usually set out with the apparent object of emulating the kaleidoscope in color, and in form the principle of the "row" pervades the entire establishment; a row of vases, a row of jugs, another of toilet sets, teapots, tea-sets, etc. How seldom, or never we may say, do we see a nice small table covered with a white cloth and say a portion of a dinner set arranged as a dinner set should be upon the table, with perhaps a small vase or two with flowers, serving as table decoration; or a teaset, with a teapot, hot-water jug, etc., nicely set out. As the goods are usually displayed, the blatant loudly decorated article overpowers the more tasteful but modest one entirely, and unless the greatest care is taken there are sure to be discordant contrasts of color striking the eye.

This question of color concerns the china and pottery dealer more than perhaps any other, owing to the variety of shades and tones that the decoration of pottery displays. Of course, the idea of crowding the windows and shelves to their utmost capacity is to give the impression of the enormous stock and variety carried, which it certainly does, and that is the end of its effect, except to increase materially the difficulty of the customer to make a selection. It is as though one tried to select a tune with a hundred pianos playing different melodies at the same time.

A great deal of the responsibility for the advancement of decay of good taste rests with the dealer. Of course, he knows or should know his business; he can sell an article up to a certain price—he knows the prevailing conditions of his trade, that may be granted, but within these limits on what principle does he base his selection?

Here is where the responsibility for the display of good or bad taste comes in, and surely it is for the ultimate benefit of dealer

and public alike that the tendency should be towards good taste, and the dissemination of articles that will do good and not evil. And that good taste, as pointed out before, is entirely the result of cultivation and education. There is no other way.

Necessity of Complete Independence in Association Work.

(Address by CLAUD WHEELER, Columbia, Mo., before the Iowa Retail Jewelers at Des Moines, June 23-24.)

IT is always a pleasure for me to meet retail jewelers, talk to them and learn their ideas and methods. The greatest result of organization, in my opinion, is the cultivation of good fellowship among those engaged in the trade. The only week which affords me more pleasure than the week in which I attend a meeting of retail jewelers is the week in which I attend two. This is the week. I come to you to-day from the meeting of the Missouri Society of Retail Jewelers and St. Louis Retail Jewelers' Association, affiliated. We had a very fine meeting, notwithstanding we held the meeting without the financial aid of other than members of the society.

When I received a letter from your secretary asking me to come here on this occasion I felt it impossible on account of the work necessary in the closing days of our campaign for the success of the Missouri meeting. However, I resolved to heat the light carbons late at night to prepare this excuse for coming to Iowa and see if I couldn't take on some of the organization steam which you have here. And I wanted to meet some more of the men like Messrs. Nielson, Callison and Hurlbut. I wanted to come up to Des Moines, where 30 men have demonstrated in the past two years what can be done by organization and earnest effort. What they have done for this city we can do for the jewelry trade. A few years ago our business was in the condition which a recent writer describes: "Lethargy and distrust hung in a pall and the knocker stalked abroad, and the only sound to be heard was the wail of his complaint." To him the future of our business looked dark as he viewed the mail order houses and department stores. To-day things look brighter to even the most pessimistic, and the State organizations and the National Jewelers' Association are doing for our business what the committee of 30 is doing for Des Moines. We are now awake, and the whole country is being made aware of the fact that the retail jeweler is a business man as well as a mechanic.

I have been asked to speak to-day of the "Necessity of Independence in Association Work." As you know, this is an entirely new question, one which has not before been discussed, to my knowledge. Missouri and Iowa have taken the lead this year by adopting the policy of conducting their meetings upon a self-supporting basis. The attempt is commendable.

The first question to be decided by any organization is the purpose for which it is organized. When that has been settled the next step is to decide how best to carry out that purpose. The retail jewelers' associations are organized to better our condition as retail jewelers. To do this we must be unhampered by any outside influence. The organization should feel free to take any action it saw fit to advance the interests of its members. Your observation in the past must have convinced you that you could not accept gifts or favors from jobbers and manufacturers and then deal with matters concerning them in a free way. Did you ever stop to consider what opinion is expressed in the wholesale house when a request comes from an organization of retailers to take space in a programme? When I take a man's money in my store I expect to give him value for it, but when I take a jobber's money for an ad. in one of our souvenir programmes I see no way of giving him his money's worth unless we boost him. The method used in the past and still used by most of the organizations has done much to nullify the usefulness of the associations. The wholesaler who had the least regard for trade ethics was always found with a liberal advertisement in the programme. He did not give this with any idea of legitimate returns from the ad. The same money spent in a trade journal would bring far greater results. I do not mean to say that all wholesalers gave with this same object in view. Many of them gave because others gave and they

did not want to appear "short" in a matter concerning the people from whom they expected to solicit business. Others gave because they felt that we, as a class, expect something in addition to the goods they deliver for our money. Some gave through pure motives.

The retail jeweler is largely responsible for the conditions that exist. Too many of us as individuals are dependent upon some jobber. For the past few years I have devoted considerable study to the conditions of the retail jewelry trade in general. I believe I am safe in saying that the retail jeweler is the most dependent retailer in the world; I mean as a class, for I realize that there are many exceptions. I think this dependence has come about through the manner in which many of the jewelry stores have had their origin. To start a jewelry store one learned to repair watches, secured a location, and then some wholesaler put in the stock. A concern in Chicago to-day is advertising how easy it is to start a jewelry business. It offers to make a watchmaker of you in 30 days and to furnish you a catalogue and enough goods to start in business. Without considering the merits of this plan, it is clear to see that the jeweler was for years entirely dependent upon his wholesaler, and even after he owned his business it was difficult to free himself of this dependent feeling. The same conditions do not exist in any other line of trade, and until the jewelers realize this and get themselves free in every way, both as individuals and associations, they will never be able to assert and claim their rights as is done in other lines. The hardware and lumber men do not ask the wholesaler to pay the expenses of their meetings. And when an evil exists they correct it. Let us just suppose that every one of us was in a position to serve notice on any manufacturer or jobber, who made or sold inferior goods or who marketed through illegitimate channels, that his goods would no longer find room in our stores. How long would they continue to conduct their business that way?

Now the question comes up as to how we can place ourselves in that position. I think Iowa and Missouri have taken the first step, and we can, by conducting the affairs of our organizations free and independent of outside influence, demonstrate to our own satisfaction the benefits to be derived from absolute independence in our business relations. Some jobbers have taken our stand for independence as one of antagonism. I have not been able to see why they so regard it, but feel sure that after the Missouri and Iowa meetings this week all of them will regard it as a move in the right direction, and assist us in carrying it out.

I believe that now a part of the work of the national association should be to assist the weaker States in their efforts to effect an organization so that it will not be necessary to seek help in the way of donations and ads. from wholesalers. When a wholesaler has contributed \$50 or \$100 to help hold your meeting, are you going to investigate his methods, condemn him in the meeting and make suggestions to the jewelers of the State regarding his policies? You may, but if you do you are displaying rank ingratitude. It is not right to solicit people to spend a lot of money to help make your meeting a success and then proceed to abuse them and their method of doing business. This has been done, and you know it. Recently I heard the representative of a large concern which had been solicited to make a donation and exhibit at a meeting, complain that almost one entire session had been devoted to a discussion of its way of doing business. He was justified in his complaint, for we cannot afford to ask a house to contribute and then condemn its methods of doing business.

There is one other good reason for independence in our association work. Many retail jewelers remain away from the meetings because they do not care to go year after year and partake of the hospitality of jobbers from whom they buy few or no goods. By accepting donations from wholesalers we force every individual to feel obligated, in a way, to these wholesalers, and rather than have that feeling many persons refuse to join the association or attend its meetings. The Missouri society gained members this year as a direct result of the adoption of a resolution to the effect that it would in the future pay all its own bills.

Absolute independence in conducting our association meetings will not only enable us to get better results as an association, but the effect will be felt by the individual jeweler, and will be an incentive to those of us who have not done so to free ourselves from hindering conditions.

SCIENTIFIC RECONSTRUCTED WHITE SAPPHIRE

A stone of value—"The Diamond's Neighbor." The nearest likeness to a diamond ever marketed. Has a wonderful brilliancy, very highly polished, and will retain its brilliancy. Stone is hard and wearing qualities are lasting. Beware of imitation Reconstructed White Sapphires, which are of little or no value.

These are the genuine

These Reconstructed Rubies are absolutely as hard and have the same beautiful appearance as the Genuine Oriental Rubies. They are the scientific production of small particles of Genuine Rubies fused under intense heat through an electrical process and purified through a chemical process. When ordering, kindly state sizes desired, the same as when ordering precious stones, as 1/4 carat, 1/2 carat, etc., as per gauge shown above.

These Genuine Reconstructed Rubies, per Carat, **\$1.10** Genuine Reconstructed Rubies, second grade, per Carat, **\$0.65**

SWARTCHILD & COMPANY

THE LARGEST WATCHMAKERS' AND JEWELERS' SUPPLY HOUSE IN THE WORLD

HEYWORTH BUILDING, MADISON ST. & WABASH AVE. CHICAGO, ILL.

WE BUY

Old Gold and Silver, Filings, Polishings, Sweeps, Hand Washings, etc. We will make accurate valuations and hold consignment subject to your acceptance. If valuation is not satisfactory, we reship to you at our expense.

WE PAY FOR OLD GOLD:

22 K. 88c. per dwt.	12 K. 48c. per dwt.
20 K. 80c. " "	10 K. 40c. " "
18 K. 72c. " "	8 K. 32c. " "
16 K. 64c. " "	6 K. 24c. " "
14 K. 56c. " "	4 K. 16c. " "

MARKET RATES FOR SILVER AND PLATINUM

WE SELL

Gold, Silver and Platinum, various qualities, rolled flat or drawn to wire of any gauge.

PRICES OF ALLOYED GOLD:

8 K. 42c. per dwt.	14 K. 66c. per dwt.
10 K. 50c. " "	16 K. 74c. " "
12 K. 58c. " "	18 K. 82c. " "

Gold and Silver Solder, either from formulas furnished, or our own. "T. B. H." Alloy, 25c. per oz. Guinea Gold, 75c. per lb. Shot Copper, 40c. lb. We will send tables for alloying without charge. They save figuring.

SPECIAL AND IMPORTANT NOTICE

in ordering Plate or Wire, to avoid delay and errors, be sure to state:

FIRST, THE QUALITY—If Silver, Sterling or Pure. (Coin Silver made up only on order.) If Gold—the Karat.
SECOND, THE QUANTITY—If Wire, the Thickness and Length. If Plate, the Thickness, Length and Width.

Regarding the thickness it is **most important** to not only state the number, but also the name of the gauge you are using, as there are 13 gauges and no two alike. The most used by us is the Brown & Sharpe **American Standard**, but we will fill your order from any one by stating which you use.

Try us and you will Appreciate our Squareness, Promptness and Accuracy

WORKSHOP NOTES AND QUERIES

[Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2312.—Mercury Spots on Gilding.—*Mercury spots often show on gold-plated jewelry which I am unable to remove without doing the piece over again. Is there any method of washing the mercury off so I can save the gilding?* M. S.

ANSWER:—Mercury spots cannot be washed off unless treated with acid and driven off by means of heat, which, of course, will spoil the gilding already done or will cause it to look faded. The following method, however, is a good one, and is used by many gilders: Hang the gilded piece in the gold solution and touch the mercury spots, one after another, with the corner of the gold anode several times, using a current strong enough to throw sparks. The mercury will be displaced so the spots can be scratch-brushed and gilded over.

QUESTION No. 2313.—Cleaning Dips for Gold, Silver, Etc.—*I would find cleaning dips on my jewelry repair bench very useful. Can you kindly give me a formula for making dips for cleaning gold jewelry, clock movements, etc.?* C. D.

ANSWER:—Cleaning dips suitable for cleansing various metals should be put in glazed earthen jars, with earthen or wooden covers, and should be placed where the fumes will not injure new articles of gold or silver, or cause rust on cutlery. It is best if the jars in which the dips are placed can be put in a box secured on the outside of a window sill. When a dip is to be used one need only pull up the window, remove the cover and proceed to dip. There will then be no trouble from fumes in the room. The jar should be labeled so one may know what kind of dip is contained therein. All articles to be dipped should first be made free from all grease or oil. This can be done by immersing in boiling potash or soda solution. This is necessary because the acids in the dips will not attack grease and would cause the articles to look spotted and uneven. **Dip for Gold Jewelry.**—For all karats of gold jewelry perhaps the simplest and quickest cleaning dip is a solution composed of water, one quart, and cyanide, two ounces. Heat this solution to nearly a boiling point; immerse the jewelry in it for a few moments, having previously secured it on a copper wire; rinse off in cold water, then in clean hot water, and dry. If the pieces are very obstinate so a stronger dip is required, add a little more cyanide. One of the old well-known dips is composed of 80 grs. chloride of lime, 80 grs. bicarbonate of soda, 20 grs. common salt, in about one pint of distilled or rain water. This is a mild preparation, and the jewelry must re-

main immersed in it for some time before it will be cleaned. Then rinse and wash in alcohol and dry. If a strong acid dip is desired, which will roughen the surface of the jewelry slightly, and which must be worked quickly, use nitric acid, one part, and muriatic acid, three parts. If the piece to be dipped is warmed and immersed in the dip for just a moment it will be perfectly clean. It must be remembered that all articles which are dipped in acid must be thoroughly rinsed off in cold water to remove all the acid. **Silver Dip.**—For silver cleaning the cyanide dip is very effective. This is composed of about eight ounces of cyanide to one gallon of water, and may be used cold, but will have a quicker effect if used warm. After dipping, rinse off in cold water, then in hot, boiling water, and dry with a soft towel. Nitric acid is the dissolvent of silver, and if a piece is dipped in this acid just a moment the silver will be chemically clean. **Dip for Brass.**—Make a mixture of commercial nitric acid, one part, and sulphuric acid, one-half part. Dip the brass in this and rinse in water. **Dip for Copper.**—A good copper dip is composed of sulphuric acid, 100 parts; nitric acid, 75 parts, and common salt, one part. This is also suitable for brass, bronze or German silver.

QUESTION No. 2314.—Black Lacquer on Jewelry.—*I find on some jewelry that is given me to repair a black filling in the recesses, especially on cheap articles. Please let me know how I can remove this damaged black, and how I can replace it in a simple way.* B. L.

ANSWER:—The dark recesses are either black lacquer or else are oxidized. The lacquer can be removed by placing the piece in a cup containing alcohol, which will dissolve it readily. If the black be oxidized, then it must be removed by placing it in a cyanide solution for a few moments, when the black will fade away. In order to re-blacken the recesses it is best to use a black lacquer, which is painted in with a small brush and left to dry in a warm place. It may require another coating if it does not appear dark enough. If the lacquer can be baked on in an oven, the color will be firmer and harder than if only dried in the air.

The jewelry store of Frederick S. Dyke, Northfield, Vt., was the scene of a burglary, one night recently, when \$100 worth of stock was stolen. Two men were subsequently arrested after having been put off a freight train near Roxbury, on suspicion of being implicated in the crime.

Simplified Electroplating for Jewelers.

(Written expressly for THE JEWELERS' CIRCULAR WEEKLY by "R. B.")

(Continued from issue of July 21.)

INSTRUCTIONS FOR WATCH-CASE POLISHING.

IN the process of watch-case polishing special attention is called to the means employed for each particular part of the case and the manner in handling the same, while the method of polishing is similar to that of any other jewelry to be polished.

In the first place the bezel and cap should be removed.

That done, dents, old engraving, if not desirable, and scratches should be removed. While we are justified in presuming that the American jeweler knows full well how

FIG. 4.

FIG. 5.

to remove dents from old watch cases, the process may be of interest to many, especially to those jewelers who are accustomed to the use of a burnishing tool for the purpose of removing dents by the gilding, pressing and burnishing movements over the dented parts of the watch case. The method, though of some usefulness, in isolated instances, is frequently unnecessarily prolonged, annoying and irreparably injurious to the watch case. Especially is this true of the gold case, which is usually of very limited thickness. The

FIG. 6.

act of gilding and burnishing over the dented part has a tendency to stretch and cause the metal to harden and click. Upon careful inspection it will be found that the removal of the indentation created a hollow by the pressure applied with the burnishing tool.

The proper method to be adopted in removing dents from watch cases before polishing is to place the dented case-back on a steel chuck, on the head of which properly fits the watch-case back. If the back is convex, the chuck must conform to its convexity; if the back happens to be perfectly flat, the chuck must also be flat.

Having placed the back on the chuck, one should gently hammer over the uneven surface of the watch-case back with a hardwood mallet until all the dents are removed and the surface becomes perfectly even. That done, the case should be well tripolied inside by the use of an end felt

watch-case buff, shown in Fig. 4. The tripoli paste referred to should be used.

The operator should accustom his hand to move up and down in a rotary movement, making sure that the whole surface is evenly tripolied. During the continuance of this operation gentle pressure should be applied in pressing the watch-case back to the end felt buff.

Too much pressure may cause the metal to become hot, thus causing silver cases to turn dark and sometimes bluish, a result which must be carefully guarded against.

The next thing in order is to remove scratches and imperfections from the outside of the watch case. If the case is of a perfectly plain surface—that is, free from any fancy or ornamental work—a plain linen buff and hard tripoli should be used. If the outside is badly worn and scratched, a rag buff may be preferred.

Should the outside of the case be of a fancy or ornamental finish or with a shield, as is of frequent occurrence, care must be taken that no buff is used, but rather a felt wheel to remove the scratches of the shield. And that for the reason that if a buff is employed the sharpness of the edges will be removed and the costly hand engraving will assume the appearance of stamped or pressed work. It can readily be seen that a small felt wheel will simply run over the shield without touching the surrounding ornamental and engraved parts.

Now the case will be ready for a thorough brushing all over the engraved and fancy parts, as well as all over the center and joints. For this purpose a two-row circular bristle brush should be used, with an occasional application of tripoli paste.

At the end of the above-described operations the case should be placed in hot water containing washing soda. The case should be well washed therein by means of a sponge, well saturated with strong water, ammonia and soap.

The outside and center should be washed with a hand bristle brush, which will greatly aid in removing the case free from all grease and oil used in putting on the tripoli.

The case should now be dried well over a heated plate of tin, and, when perfectly dry, will be ready for the rouging or finishing process, to be discussed later.

In order to obtain a very high polish on the inside of the watch-case back, an end buckskin watch-case buff should be used, the particular shape of which has been shown. This buff, above all others, and every buff used in connection with the finishing or rouging process, must be kept free from all dust and foreign substances.

Too much stress cannot be laid on the fact that absolute cleanliness is indispensable to good results in both polishing and plating. And this fact we intend to repeat almost to a fault, for the reason that we are confident that good results must crown the efforts of the one who follows the instructions imparted in these columns.

It is an undeniable fact that a little carelessness or disregard for cleanliness is very frequently the cause of failure and disappointment, and in no case is this so true

as in the case of polishing or plating. The least dust accumulated on the buckskin buff, or permitted to enter the soft rouge, while not covered, will greatly retard the progress of polishing and cause untold annoyance.

For the reason above set forth, let it be remembered that the pot or vessel containing the soft rouge, prepared as already directed, must be kept well covered and dust-proof.

The very same mechanical action and rotary movements described in reference to the tripoling process is equally applicable to rouging for a finish, with this exception, that the buckskin buff, before every application of additional soft rouge, should be well brushed off with a hard hand bristle brush. This should be frequently repeated, because polished off metal accumulates on the buckskin buff and sticks to it, thus causing scratches and dulness.

The case should be gently pressed against the end buff and rotated in the opposite direction to that of the revolving buff. The case should be held by the fingers and not the center of the case, for if the case is not held tightly by the fingers and the requisite pressure be applied, it will be found that the joints are strained, and, what is more, the backs will not shut properly.

The rotary movements should be continued until a satisfactory polish is attained. After that the center and outside should be well brushed with a two-row bristle brush, going over all the engraved parts of the case thoroughly, using soft rouge frequently, with an occasional touch of the best hard gold rouge obtainable. After that the case should be polished over with a linen buff.

Now, the case should be washed in hot water containing a small quantity of washing soda; a soft sponge well saturated with strong water ammonia and some washing soap should be used in the removal of the rouge which adhered to the case from polishing. When the case is well washed it should be carefully dried and whipped with a soft linen cloth and then placed on a tin plate, heated by a small flame underneath, for the purpose of evaporating the water contained in the center and crown of the case.

The case, now being perfectly dry, may be run over with a cotton flannel buff for a finish. Little or no rouge should be used, and the work of polishing is done.

It is frequently desirable to conceal fine dents or old engraving which is too deep to remove, or an impression which is noticeable inside the case back, caused by the lines of engraving on the outside of the case. In order to do so successfully the process of spotting is resorted to.

By spotting is meant the fine little spots often found on the inside of the cap of a case. Spotting is done by means of a thin end felt buff, with the aid of soft tripoli. The end buff is shown in Fig. 5. Good spotting depends upon the steadiness of the hand of the operator. For this reason it is important that the operator fix a little hand-rest bench immediately underneath the end of the spindle of the polishing head. This little bench is easily constructed and removable when not desired. See Fig. 6.

In starting to do spotting, the first spot should be made near the inner edge of the watch back; the second should be placed so as to cover about one-third of the first spot; the third should cover about one-third of the preceding, and so on until a complete circle is formed. Thereafter a new inner circle should be started, covering about one-third of one of the spots of the first circle, and so on until the last spot is placed in the center of the back. This work should be done slowly and carefully, forming a perfect circle. When done the soft tripoli should be washed out with a soft sponge, hot water and soap and thereafter dried and the work is finished.

By the very same process various designs may be executed, depending upon the imperfect area sought to be covered. Such designs are often seen in new cases; for example, two circles of spots and about five or seven lines of spots, resembling very much the rays of the sun.

While spotting is ornamental, its chief purpose is to conceal defects, as has already been explained. After the felt at the end buff is worn out a new piece can easily be attached by means of shellac, and it is again ready for use. The size of the spots depends upon the size of the felt end buff. The felt on the end buff may be trimmed down to any size that the operator deems preferable for each case.

(To be continued.)

Silver Solder and Its Advantages.

(From the Brass World.)

ONE naturally associates high cost with the name of silver solder. In reality, it is not as expensive as might be expected, and when results are to be taken into consideration it is actually the cheapest for many kinds of work.

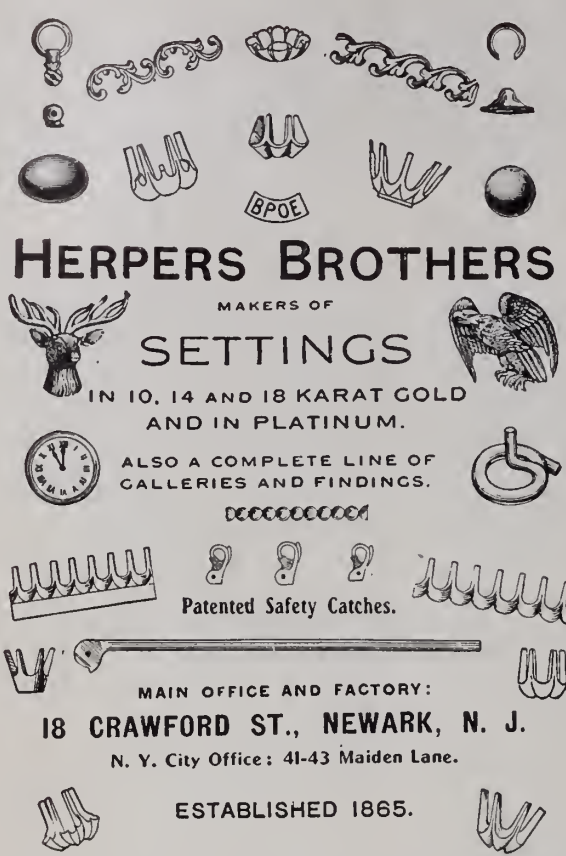

The advantage of silver solder lies in the freedom with which it will melt and flow. While it is not as fusible as the soft solders composed of tin and lead, it is intermediate between them and the so-called "spelter solders" or those composed of copper and zinc.

In addition to the low melting point of silver solder, it flows very readily and without the formation of the quantity of oxide that follows when spelter solder is used. Silver itself melts without any oxidation at all, and this fact explains the freedom with which silver solder flows.

Another valuable feature of silver solder is the fact that it may be rolled into sheet or drawn into wire, and may, therefore, be employed for many classes of work in which spelter solder could not be used.

Silver solder makes the strongest joint of any known solder, and as it melts so readily there is less danger of "burning" the joint. It can be made in a number of different grades of fusibility, cost and color, and its use is advocated wherever possible. The results obtained by it cannot be equaled or even approached by any other hard solder. It is equally applicable to steel, iron, copper, brass, German silver, sterling silver and other similar alloys. It is widely used, of course, but should be employed even more extensively than it now is.

 KNOWN THE WORLD OVER

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal—plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag—the blades are fine. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray—contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

 NO STROPPING NO REFINING

The Proof of the Pudding

The proof of ability in any line consists in doing the things that others have failed in doing.

This we have done repeatedly, and can furnish the proof. We sold \$20,300 in one sale where another auctioneer had thrown up his hands after selling only \$3,000

In another sale we sold three times as much as the combined sales of two other auctioneers, and realized much better prices.

We have repeatedly taken dead sales—the result of the work of incompetent auctioneers—put new life and vim into them, and closed out the stock at a profit.

However, it is not the large amount of goods sold that counts so much as the net results in the profit and loss account—the small amount of new goods used, compared to the percentage of your goods, and your dead stock in particular, that are disposed of, and that larger and more important question of the after effects of your auction sale upon your customers, and, consequently, upon your future trade.

We believe we have solved the problem of how to conduct an auction sale so it will be to your profit, in both dollars and cents, and in the building up and permanency of your regular business.

We will furnish you evidence that sales, at this time of the year, when regular business is dull, can be made as profitable as during the seasons when regular business is booming.

You can do a holiday business during the hot months.

We would be pleased to talk with you about it.

Read what the Principal Chemist of
the Standard Oil Co. says of

FULCRUM

Watch and Clock Oil

FULCRUM OIL CO.: — In physical tests of Fulcrum Watch and Clock Oils, I find that these oils are non-drying and do not gum when exposed to the atmosphere — nor do they evaporate.

The Fulcrum Watch and Clock Oils are neutral, and on account of the absence of free, fatty or *any other acid*, they do not corrode metals, such as Gold, Silver, Platinum, Copper, Nickel, Aluminum, Brass, Tin, White Metal, German Silver, etc.

I can cheerfully and conscientiously recommend the Fulcrum Watch and Clock Oils as ideal lubricants for Watches, Clocks, Scientific Instruments, etc.

June 7, 1909.

(Signed) FREDERICK W. MANN, Ph.D.

Read What Some of the Principal Watch Companies of This Country Think of

FULCRUM OIL

New England Watch Co.: "It is first-class in every way."

E. Howard Watch Co.: "We consider yours an improvement over any domestic oil we have ever seen."

South Bend Watch Co.: "We have completed a test with your oil in extremes of temperature and other conditions, and are pleased to report the result of the trial is most satisfactory."

The Most Serious Problem Ever Known in the Watch and Clock Business Has Been Solved

FULCRUM OIL

Positively will not gum.

Will not evaporate.

Will not become rancid or discolor in any length of exposure.

Will not corrode the pivots, because it is free from acids.

It is the only Watch or Clock Oil ever known which is absolutely free from acid and

We Can Prove It

No oil has ever before been spoken of and recommended so highly by people who know — and opinions from such people cannot be bought.

**FULCRUM OIL can be obtained from your material jobber,
35c. per Bottle; \$3.75 per dozen**

It costs nothing to try it — a postal to the factory will bring you a small Sample Bottle Free of Charge.

ALVIN SILVER

The Morning Glory Pattern

A new pattern of Sterling Silver table ware of medium weight and moderate price. A most attractive and artistic pattern in French Grey finish, cut in high relief, as ornate on the back of each piece as on the front. Made in full line of fancy pieces, ounce goods and cutlery. A pattern that will meet with immediate success. Write for price list.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting Roller Remover. The work is always plainly in sight. The roller is held in the grooved jaws of the pliers. The adjustable head which holds the screw is quickly brought into position over the staff and the most obstinate roller will instantly yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezer over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped *firmer* and *better* than by any other kind of stone tweezer.

Second. It is purposely made a "Bayonet" in shape because any stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, *easier*, *quicker*, and with much less *exertion* than when using any other style of tweezer.

It has an *extra* part directly above the crossing points to permit the holder to examine the stone without fear of *releasing* it accidentally, which frequently occurs when using the ordinary style crossing tweezer.

Price, Each, \$1.00

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

GRINDING OUTFIT No. 105

LEATHER DISK. SMALL DISK METAL.

CARBORUNDUM & EMERY PAPER DISKS.

This outfit consists of:

1. Two interchangeable steel disc wheels, 3 1/2" and 1 1/2" in diameter.
2. One interchangeable flexible leather disc wheel, 2 1/8" in diameter.
3. One adjustable hollow spindle for holding the above disc wheels.
4. Eight different grade emery paper discs, 2 1/8" in diameter.
5. Four carborundum paper discs of different grades, 2 1/8" in diameter.
6. Eight different grade emery paper discs, 4" in diameter.
7. Four carborundum paper discs of different grades, 4" in diameter.
8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete.....	\$1.50
Separate small emery discs.....	per doz. .15
" large ".....	" " .30
" small carborundum discs.....	" " .30
" large ".....	" " .35

This new grinding device should find favor with the trade, being thoroughly practical and complete for all purposes, such as grinding steel tools, glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the watchmaker, jeweler, optician, dentist, lock or gunsmith, platers and kindred trades. It will be found much more economical than solid emery and carborundum wheels. An assortment of solid wheels of twelve different grits would necessitate an outlay of ten times the cost of this outfit, not taking into consideration the trouble of truing up the wheels when worn or glazed.

Full description and directions accompany each outfit.

For Sale by all Jobbers in the United States and Canada.

We beg to call your attention
to our extensive

Card Jewelry Line

consisting of medium priced

10K. Solid Gold Brooches, Scarf Pins,
Baby Pins, Handy Pins, Ear
Screws, Pendants, etc.

These goods are sold through the jobbing trade at very attractive figures. An examination and comparison will at once prove them to be ready sellers and profit makers in the stock of any jobber.

New patterns have been brought to a point of especial distinction, and all bear our mark of quality and reliability

It is our earnest desire to establish the same reputation for Finish, Originality, Quality and Reliability for this CARD JEWELRY LINE as is borne by our ring lines.

Samples will be cheerfully sent to jobbers and we heartily commend this line for a profitable business in 1909.

**THE
KREMENTZ
COLLAR BUTTON**

**GOES
ROUND
THE WORLD**

ITS FAME—

Wherever there are collars there are Krementz Collar Buttons. They are known the world over—the only ones that have an international reputation. With such recognition and demand, all you have to do is carry them. They sell themselves.

QUALITY MAINTAINED—

The Krementz Collar Button never disappoints. Unequaled in construction and finish, its quality always has and always will be maintained.

ASSAY—

The Krementz Collar Button does not take advantage of the elastic leeway allowed by law. There is really no reason why a solderless collar button should assay a whit less than stamped. You can depend upon it that

Krementz 14-Karat Collar Buttons will assay 14-Kt. or $\frac{584}{1000}$ Fine.

Krementz 10-Karat “ “ “ “ 10-Kt. or $\frac{416}{1000}$ Fine.

You will note that articles assaying 9 to 9½ Karat or 13 to 13½, and sold as 10-Karat or 14-Karat respectively, save the makers a profit.

ROLLED PLATE LINE—

Krementz Rolled Plated Collar Buttons and Studs are made with regular Krementz 14-Kt. stock; which is sweated, not soldered on composition base. Exhaustive tests show Krementz Plate is much heavier than is used on any other rolled-plate jewelry. Their great popularity in hot countries (where perspiration destroys ordinary goods), is largely owing to the thickness and quality of Krementz Gold Plate, similar to that used on highest quality filled cases.

KREMENTZ & CO.

A NEW WHITING PATTERN
IN STERLING SILVER FLATWARE

Made in the Complete Line—Dozen
Work, Fancy Flatware, Cutlery—
Ready for Delivery September 1st.
Price Lists on Application.

IN its leading motive and the treatment of its details the new pattern is eminently suggestive of the English Renaissance designers of the 16th and 17th Centuries. It seems becoming therefore that it should be known by a name that not only recalls one of the most romantic episodes of the social history of that period, but is also intimately associated with the most significant existing example of English Renaissance Art and Architecture.

An Invitation

TO JEWELERS when in New York a cordial invitation is extended to visit the New Salesrooms of this Company.

The location, in the recently completed Silversmiths' Building, constitutes a decided vantage point in the Jewelry District.

The additions to our lines this season are the most comprehensive and complete in the history of the company. Prices run from popular commercial goods to the highest class of products.

All the interesting lines of Silver-craft are here fully and attractively displayed in such a manner as to afford most convenient inspection. And their artistic beauty, fine workmanship and moderate prices will be found amply to justify the most favorable consideration.

Jewelers will appreciate the fact that all our products are confined exclusively to the legitimate trade.

Silver Plate of Beauty and Enduring Quality

The original Rogers Bros. silverware—identified by the trade mark "**1847 ROGERS BROS.**"—has expressed the highest type of silver plate perfection for sixty-two years.

Combining the maximum of durability with rare beauty of design, this famous ware is the choice of purchasers who desire only the best.

On the reverse side of forks, spoons, fancy serving pieces, etc., look for the mark

1847 ROGERS BROS.  **X S
TRIPLE**

Whether the style be simple, as exemplified by the Priscilla Fork, or more ornate, as suggested by the Charter Oak Knife and Vintage Berry Spoon, shown herewith, it may be readily procured in "**1847 ROGERS BROS.**" ware. Wide varieties are offered, assuring utmost satisfaction.

It is well to bear in mind when choosing silverware that the trade mark "**1847 ROGERS BROS.**" not only assures highest quality, but that it guarantees it.

Leading dealers everywhere sell this renowned "*Silver Plate that Wears.*" Send for Catalogue "81-C," showing the many attractive designs.

Our regular goods are plated by the sectional process, which enables us to guarantee that plated ware of our manufacture will withstand the hardest usage, and last for many years.

We carry a complete assortment of fancy pieces in each of the patterns illustrated. The symmetry and splendid proportion of our designs satisfy the most discriminating tastes, while the superior wearing qualities of our product make permanent customers.

Our handsome illustrated catalogue sent on request

SIMEON L. & GEORGE H. ROGERS COMPANY

OUR LINE OF EYEGGLASS CASES

to quote the remarks of one of our valued customers, is the most varied and

comprehensive of any on the market.

We can vouch for that same high quality of workmanship and finish that distinguishes the rest of our line.

Trade  Mark

R. BLACKINTON & CO., Established 1861
Silversmiths

New York Sales Office: 15 Maiden Lane

NORTH ATTLEBORO, MASS.

To Buyers Visiting New York:

- ☞ We want you to see the many new tea and coffee sets, child's goods, small dishes, etc., that we have added to our standard patterns of Sterling Hollow Ware.
- ☞ We will therefore conduct an elaborate exhibit at the Hotel Marlborough in New York City, from August 15th to September 11th.
- ☞ We will show the most extensive line of Sterling Hollow Ware ever offered to the trade.
- ☞ The lines we offer are all bright and snappy. They are in no sense obsolete or shop-worn goods. They are inexpensive. In fact, the prices are much better than we have ever before been able to quote for goods of similar quality, design and weight.
- ☞ It is seldom we advertise prices in connection with Smith Silverware. When we do, it is a certainty that we can talk straight to the "orders" point with you.
- ☞ This is an opportunity that occurs only once in many years. You know us and our methods well enough to take our word for it as fact. It behooves you, therefore, to visit us just as early as possible.
- ☞ REMEMBER — Hotel Marlborough, New York, commencing August 15th.

AS the season is now at hand for sporting and athletic contests of all sorts, we wish to advise the Trade and Club Committees before deciding on cups and trophies, that we carry a full line of cups, both plain and artistic in shape and design which we offer at special low prices.

We will be pleased to furnish at all times, on short notice, designs and estimates of cups and trophies, free of charge.

Nothing is too large or too small for us.

We also carry in stock a large selection of toilet ware in all its branches for the accommodation of tourists, which we can supply on short notice.

We further extend to the Trade a cordial invitation to visit our factory and showroom should they happen in Providence during the Summer season, as we have an attractive line of new samples of hollow ware, plates, fancy pierced and engraved baskets for the Fall Trade.

31 and 33 E. Kinney St., Newark, N. J.

342 So. Broadway, Los Angeles, Cal.

PARIS has spoken. Again this house is the first to hear. The secret of color-fashion this Autumn may be given in two words: SEAL BROWN. It is the under-hue of the fur separated by a breath. It has the subdued warmth of winter sunsets. Modish gowns and garnitures will revel in this charming tone. The Jewelry of this house instantly caught the inspiration. Its unique "Silverseal Finish" is a truly remarkable innovation. Richest combinations with Jet, now in the ascendant. Most comprehensive lines.

D. Lisner & Co. *Creating Importers of Jewelry Novelties*
One-Forty Fifth Avenue, cor. 19th St., NEW YORK

DIAMONDS are popular again; they are more than ever a subject of interest to thousands throughout the land. There is a keener desire to possess them than for a long time past and the demand is increasing quite rapidly. Their value is rising. We prepared for this condition and our stock, purchased by Mr. Henry Freund on a recent European trip, is extensive. Although we cannot mark same with our Trade-Mark, "The Imprint of the Rose,"  you will find them "Sellers and Winners" equally with our lines  of jewelry and watches.

TRADE **A 14 K** MARK

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? **We invite you to assay our chains.**

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

The BUILD of a JEWEL CASE

Absence of Castings
Strong Hinges, Etc.

THE CONSTRUCTION of Jewel Cases is no less important than their artistic appearance. It is not unusual to find Cases that look handsome but are made of fragile castings, which a fall or a blow easily shatters. It is not so with these. They are strongly made of heavy Hard Rolled Brass and German Silver. Their virtues are lasting. Elements of strength extend to hinges, lock, and every part. Though well made and beautiful, the prices are low. Write for Illustrated Catalogue.

A Distinct Novelty

It appeals to the consumer because

- 1 It consists of one mounting and seven stones.
- 2 The stones are of different color.
- 3 They can be interchanged in a moment.
- 4 There are no parts to wear out.
- 5 They take the place of seven different pins.
- 6 It is reasonable in price.
- 7 It will aid in increasing your sales.

No. 2.

Unique Silver Table Center and Other Work by a Vienna Silversmith.

A FAITHFUL reproduction of the Austrian flagship *Ferdinand Max* is the principal feature of the fine epergne shown in the illustration on the front page of this issue. With this vessel, it will be recalled,

traits of all the naval commanders since Tegetthoff. The side appearing in the picture shows Tegetthoff on the left and Von Sterneek on the right. The other side of the base bears the silver medal portraits of Admiral von Pöck and Admiral von Spaun, as well as the present naval commander, Comd. Admiral Montecuccoli.

The same artist has done some particularly fine work in medals and plaques, among others the jubilee medal of the largest Austrian shipyard, "Stabilimento Technico Triestino," a placquette with the portrait of King Carol I. of Roumania on

PLAQUE REPRESENTING "CARMEN SYLVA" LEADING BLIND TO THE "VESTRA LUMINOSA," FOUNDED BY HER.

Admiral Tegetthoff, in the naval battle of Lissa, in 1866, sank the largest Italian battleship, the *Ré d'Italia*. The ship is accompanied on one side by a triton, announcing, as it were, the arrival of the victorious vessel by means of a trumpet in the shape of a shell. On the other side we

Both ends are embellished with an Austrian double eagle, also in silver.

The whole effect of this fine show piece is eminently imposing and magnificent. It was dedicated by the Austrian delegation to the Naval Casino at Pola.

The epergne was designed and executed

SCHUBERT MEDAL—OBVERSE.

the occasion of the four Danube monitors built in Austria, a fine placquette commemorating the building of the institute or city for the blind, "Vatra Luminoasa," by Queen Elizabeth of Roumania (Carmen Sylva) through international collections.

Very beautiful, too, is the medal of the famous song composer, "Schubert," which

SCHUBERT MEDAL—REVERSE.

he made for the Schubert Association, as well as his family plaques and statue of Viennese types.

MONITOR PLAQUE—OBVERSE.

MONITOR PLAQUE—REVERSE.

see the bust figure of "Austria" emerging from the waves, holding the Austrian banner of war, and with the left hand proffering a laurel to the man-of-war.

The model of the boat and the figures are of silver. On the ebony base four silver medallions are affixed, showing the por-

traits of all the naval commanders since Tegetthoff, in the application of the two large figures, in defiance of any possible adverse criticisms. The famous old wooden warship is reproduced in solid silver repoussé, down to the minutest details.

The retail jewelry establishment of A. Dumont, Norton, Mass., was recently destroyed by fire.

I. A. Samuels, Sayre, Pa., has purchased the property adjoining his retail jewelry store on Desmond St., and some time in the near future will erect a large building in which to continue business.

BRAINS, MONEY AND COURAGE

are required by gold ring manufacturers, in order to be continually successful in business.

After 44 years of ring making, our enthusiasm has not dimmed one iota. In fact, we are more energetic than ever before in producing well-made, honest quality, right priced rings.

No. 1693—Rose Finish

This week we show a 10K Carbuncle or Cabochon cut stone ring for misses and women, so moderately priced that every retail jeweler who cares for desirable rings ought to have some of them in his stock.

Made in the following stones:

New Zealand Jade,	
Green Agate,	Turquoise Matrix,
Amazonite,	Red Sard,
Coral,	Bloodstone.

REPOUSSE WORK AND CHASING

ILLUSTRATED AND DEMONSTRATED BY AN EXPERIENCED ARTISAN

(Continued from issue of July 7.)

CANDLESTICKS.

CANDLESTICKS are numbered among the earliest objects in metal made by man. The need for artificial light has always existed, and it is obvious that the candlestick was the natural outcome of the torch, which, in its crudest form, was merely a brand of wood lighted at the fire. Candlesticks, from the very nature of their use, have altered very little throughout the ages in the main lines of their design. Where designed to hold one candle only, they have always consisted of three main parts, viz., the base, the shaft and the socket or pricket to hold the candle. The pricket or spike variety is the earlier form, the socket not coming into general use until the Middle Ages—that is, the 13th or 14th centuries. It may be explained that with the earlier spike variety the end of the candle was simply forced on to this, or, with larger candles, a hole was first made in the candle for the spike to fit into, while the more modern socket was designed to hold candles of a certain size only.

Probably one of the finest and best known candlesticks of the early pricket variety in England is the Gloucester candlestick, now in the South Kensington Museum. It is of the early 12th century, and was originally made by one Abbot Peter, about 1110 A. D., and presented by him to the Church of St. Peter in Gloucester. It is cast in a whitish alloy probably containing a good proportion of silver. Both from an artistic and technical point of view it is one of the finest examples of the work of that period. It is cast with extraordinary skill in three pieces, and when examined closely is seen to consist of figures of men and animals entwined among foliage, a type of design very typical of the period. The knob in the center of the shaft contains the emblems of the four evangelists separated by silver bosses. The knob in the center of the shaft, it should be mentioned, became quite a common feature in candlesticks of the portable type, as it enabled them to be carried with greater ease and security.

The Romans very appropriately termed their candlestick a "candelabrum," meaning "candle bearer," but with the development of the lamp it is evident that this became the favorite light of the classics, and eventually the candelabrum was simply used as a stand on which to place the lamps.

One of the best known candlesticks designed for a number of candles is the Milan candlestick. It is made of bronze and has seven branches. It is probable that these seven-branched candlesticks, which became very frequent from the 11th century onwards, owe their inspiration to the seven-branched candlesticks which the Israelites made for the Temple in the days of Solomon, and which are very accurately described in the Bible.

The bracket, or sconce, candlestick probably first came into use during the Middle

Ages, when it was customary to burn votive candles before the shrines of patron saints. They were also fixed to the desk from which the Gospel was read. Although candelabras in silver were common enough among the classics, candlesticks made in the precious metals of an early date are exceedingly rare in England, and it is doubtful whether any silver candlesticks were made

CANDLESTICK OF SIMPLE AND CHASTE DESIGN.

prior to the reign of Charles II., who set the fashion in luxury, his court being one of the most luxurious of the time.

The candlestick here shown follows of necessity the same general lines as that of previous candlesticks—that is, it consists of three main parts, viz., the base, the shaft and the nozzle. Just underneath the nozzle the grease pan is fixed, while, as in the Gloucester candlestick, a boss is placed in the center of the shaft. For purposes of discussion it will be taken as being about seven inches high, to be used for domestic purposes, and made in silver and moon-

stones, but with slight modification in the design it would be quite possible to make it on much larger lines.

The plan from the nozzle to halfway down the foot is circular, but it becomes square at the bottom. It can be made either in three distinct pieces and screwed together, or it can be soldered together into one piece. Whatever method is eventually adopted, it will make little difference in the making of the various pieces. For the foot (not including the base), which is about two inches high and measures $\frac{3}{4}$ inches diagonally across from point to point, a five-inch circle of metal will be required. To insure the whole being perfectly strong, it should be made of about 11 gauge. This also applies to the stem, base, nozzle, etc. The base and foot will, of course, be made separately.

In shaping, the foot should be begun in the same way as an ordinary chalice cup foot (described some time ago), but care should be taken in raising only to hammer to within about five-eighths of an inch of the edge, leaving the bottom—that is, the part eventually to rest on the base—as flat as possible. When the narrow part of the foot is finished the bottom can be cut square, leaving it just a little larger than it is eventually to be, each of the sides measuring just a little over three inches. If the narrow part has been carefully shaped, the foot, when looking down from the top, should represent a circle within a square, leaving just four flat triangular pieces in the corners, which, of course, come beyond the circle, the raised part coming nearest the edge in the center of each side, where it should be about one-eighth inch away.

These small triangular pieces can be either left just as they are, or, as suggested in the sketch, a line can be raised from each of the corners and allowed to die away halfway up the foot, and the sides then flattened on a tool similar to the one used for the shaping of the hexagonal chalice foot, merging them gradually into the main part of the foot halfway up about one inch from where the stem or shaft begins. The base of the foot, not including the four small feet at the corners, is about one-half inch wide, and can be turned up of either one or two pieces. If made in one piece the strip would measure just one foot. This should be divided into four, and the metal deeply scored through at each of the divisions, not forgetting to miter the ends accurately before bending the strip up into a square.

Before soldering the mouldings on it should be seen that the "box" just made is perfectly square, as, of course, it would be far more difficult to put right after the mouldings have been soldered on, as these make it almost rigid. Two strips of metal, each about size eight and $\frac{3}{16}$ inch wide, should next be soldered on to this "box," one at the top and one at the bottom, allowing each one to project about $\frac{1}{16}$ inch beyond the edge. Inside the step thus formed at the top the shaped foot can be eventually fitted, while the step at the bottom of the base will serve as a fitting for the four small subsidiary feet.

When the two narrow strips have been soldered on to the main part of the base

the mouldings can be completed by first soldering a half-round wire rather more than 1/16 inch wide on each strip about 1/32 inch from the top and bottom, respectively, and then soldering a fine twist up against it. If done properly, this should leave—as will be seen by the sketch—about 1/32 inch of the strip showing on either side, forming an additional step to the moulding. The distance between the two strips on which the half-round and twisted wires are soldered will be about one-fourth inch, and this can be used for a little decorative pierced band, applied beads or rosettes, or something similar.

The four small feet can be either cast or made up. If made, the simplest way is to make another "box" as for the base—that is, a strip is scored through and bent into a square—and accurately fitted into the step formed by the narrow strip soldered on to the lower part of the base already referred to. It should, however, be made of very stout metal, about size 16 or 18. Before soldering this on it should be pierced to the outline shown in the sketch. It will be noted that at the corners the depth of the feet is about 5/16 inch, and that they are connected with each other.

At the bottom of each foot a band of metal about one-eighth inch wide is soldered round, both to give a better finish and also a better standing surface for the candlestick. A fine twist may be soldered in the angle between this band and the main part of the foot, and carried right around from one foot to another.

When soldering the four small feet on to the base, the latter should be thoroughly coated with rouge, as otherwise there will be a tendency for the lower strip soldered on the base to fall away.

Bankruptcy Proceedings Begun Against R. E. Henderson and Holger Hald, Lincoln, Nebr.

LINCOLN, Nebr., Aug. 9.—Involuntary bankruptcy proceedings have been brought against Rose E. Henderson, Bethany and Holger Hald, Lincoln, partners in a retail jewelry business at Lincoln, Nebr.

The petitioning creditors are the New England Watch Co., Waterbury, Conn.; Charles E. Trout and Clarence H. Schleihi, New York; Weidlich Bros. Mfg. Co., Bridgeport, Conn.; Ritter, Kahn & Co., Philadelphia, and Theo. Yankauer & Co., New York, who claim that Henderson & Hald owe them \$1,272, with assets of less than \$500.

The defendants are also charged with an attempt to secrete what property they have, so as to give a preference to one of their creditors.

First Meeting of Creditors of J. F. Davis, Pensacola, Fla., Aug. 16.

PENSACOLA, Fla., Aug. 5.—J. F. Davis, who has been doing a jewelry business in this city, has filed a petition in voluntary bankruptcy, showing liabilities of \$3,650, with assets of \$1,400, of which the stock is estimated at \$1,000. The bankrupt claims \$1,000 as his exemption.

Mr. Davis started a repair business here in 1905. He was adjudicated a bankrupt, Aug. 2, and the first meeting of creditors will be held Aug. 16.

Artistic Plaques Commemorative of the Hudson-Fulton Celebration.

PLAQUES commemorative of the Hudson-Fulton celebration, to be held along the Hudson River in September, have been finished and are now on exhibition at the Fifth Ave. store of the Gorham Co.

The Hudson memorial bears a cleverly executed likeness of Hendrik Hudson. Above the head is the inscription "Tercentennial," and below it MCMIX. On either side of the portrait the name of the discoverer is artistically arranged. Beneath the reproduction of Hudson's portrait is

Exports of Jewelry, Silverware, Etc., from the Port of New York.

WASHINGTON, D. C., Aug. 1.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the port of New York for the week just ended:

Berlin: 3 cases clocks, \$240.
Bremen: 1 case jewelry, \$500.
Buenos Ayres: 18 cases plated w. re, \$3,710; 11 cases watches, \$3,581; 100 cases clocks, \$2,612; 1 case watches, \$300; 51 cases clocks, \$1,310; 3 cases plated ware, \$330; 6 cases optical goods, \$261.
Callao: 7 cases plated ware, \$846.
Colon: 6 cases clocks, \$226.
Glasgow: 25 cases clocks, \$897.
Hamburg: 5 cases scopes and views, \$650; 5

PLAQUES COMMEMORATIVE OF THE HUDSON-FULTON CELEBRATION.

a sketch of the *Half Moon* as it is supposed to have appeared in 1609. At the bottom of the tablet is the inscription, "Discovery of the Hudson River, MDCIX."

The Fulton plaque shows a portrait of Robert Fulton. About this are the words "Centennial Celebration." Beneath appears a reproduction of the first steamboat, the *Claremont*, and the inscription, "First Successful Steamboat, MDCCCVII-MCMIX." Both tablets are mounted on highly polished hard wood.

The plaques are the work of Roine Weil, the sculptor, and were cast by the Gorham Co. They are done in bas relief and measure 11 x 16 inches. The oak backs are 17 1/2 x 23 inches.

At a recent meeting of the stockholders of Landers, Frary & Clark, New Britain, Conn., it was voted to adopt the recommendation of the board of directors to increase the capital stock from \$1,250,000 to \$1,500,000. Owing to a typographical error in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, the latter figures were printed as \$15,000. The concern has completed plans for the erection of a five-story addition to one of its buildings, which will be used for manufacturing purposes, as the present plant is inadequate.

Oriental Pearl, Mysteriously Lost and Replaced by an Imitation, is Finally Offered for Sale to Original Owner.

One of the most complicated jewel mysteries that have confronted the police in a long time came to light last week, and involves in litigation a Fifth Ave. jewelry concern, New York, and others, over a \$2,200 oriental pearl. The case has been handed over to the civil courts after one arrest, a number of hearings and a search for a woman said to be concerned in the case.

A ring, originally belonging to Alfred H. Smith & Co., 452 Fifth Ave., was sent on memorandum to Silo's auction rooms on Fifth Ave., together with other jewelry. It was not sold, and when the return of the unsold goods was made the trouble began. The ring contained a pearl weighing 19¼ grains, set on either side with three small perfect diamonds.

There was consternation in both firms when it was discovered, upon checking up returned goods, that in place of the valuable pearl ring was a cheap imitation pearl ring worth about \$1.50. The standing of the auction house puts it beyond suspicion, but does not clear up the mystery as to how and when a substitution could have occurred.

When the matter was still causing much confusion, Thomas Warrell, a broker in stones, at 65 Nassau St., appeared at Alfred H. Smith & Co.'s place of business and offered for sale a pearl which they recognized as the missing one.

Mr. Karelson, the attorney who represented Broker Warrell, gave out the following statement in regard to the complications: "After Warrell showed the pearl Alfred H. Smith & Co. recognized it as theirs and claimed it. At Mr. Warrell's request, Alfred H. Smith & Co. delivered the pearl to my office and it was deposited with me under a seal. Then, upon investigation, it was learned that Warrell got the pearl from Meyer Bros., 59 Maiden Lane, who claimed to have purchased it from Henry Sessler, a jeweler at 42d St. and Sixth Ave. Sessler said he got it from a woman who was introduced to him by Joseph Lowey. Lowey was arrested and finally discharged, because there was no evidence on which to hold him. I surrendered the pearl to the police. The woman could not be located."

Mr. Meyer, of Meyer Bros., 59 Nassau St., gave practically the same version of the matter. He said that Mr. Warrell received the pearl from him on memorandum and showed it to a number of dealers. He said that he got the pearl in a legitimate manner from Sessler, after about a week's dickering as to the price. He now claims possession of the pearl, which is in the court clerk's hands.

The whole affair is badly mixed up, and it looks as if the mystery as to how the change took place will take a long time to unravel.

Attorney Franklin Bier, who represents Alfred H. Smith & Co.'s interest in the case, said that the substitution was discovered as soon as the goods were checked. He said that as attorney of Alfred H. Smith & Co. he would sue the property clerk in replevin. The property clerk will

put the matter into court and substitute Meyer Bros. The result will be a civil suit for possession of the pearl.

Third Annual Exhibition of Summer Session of Rhode Island School of Design.

PROVIDENCE, R. I., Aug. 6.—The Summer session of the Rhode Island School of Design closed yesterday, the third annual exhibition of the work done by the pupils thereof being held the day before. The exhibition showed a great improvement in the work done, especially in the skilfully wrought samples of the jeweler's and silversmith's arts and other metal work. Augustus F. Rose, instructor in metal work and jewelry and silversmithing for the grammar and high schools of this city, was the director, and Charles J. Martin, assistant in these branches in the public schools, was in charge of similar branches in the Summer school. Certificates for the completion of the course in jewelry and silversmithing were awarded to Eudora M. Jennings, Arthur B. Ladd, Alexander Miller, Christelle E. Wilcox and Lena M. New-castle.

The Fall term of the school will begin Sept. 20 and continue until Saturday, Jan. 22, the department of jewelry design being under the direction of John H. Harmstone, a graduate of the Sheffield School of Art and the Royal College of Art of London. He will be assisted by Robert Bain and Finn O. Erichson in jewelry designing, and Charles B. Fuller in jewelry drawing. The jewelry course is of four years' duration, arranged to develop a refined taste, an artistic ability and skill in making original designs for jewelry. The student is taught to make models, to show the proper relief, to cut the necessary hubs and dies for production and to put together the various pieces to form the finished design. The workshop is equipped with all necessary power appliances and general shop tools. Beginners in drawing and modeling advance to practical work in metal as soon as their ability warrants it.

On Tuesday and Thursday evenings special instruction in shop work is given to the students of this department in order that they may obtain the benefit of instruction from experts who can teach in the evening only. The evening work includes drawing, modeling, designing, silversmithing, hub and die cutting, repousse and practical shop work.

Last year 80 students received instruction in the jewelry designing department. Among the various trades and occupations represented by the members of the day and evening classes in the several departments were the following: Bronze workers, 2; burnishers, 1; chasers, 5; designers, 16; die cutters, 3; die sinkers, 1; engravers, 5; enamellers, 2; glass workers, 1; hub cutters, 8; jewelers, 22; silversmiths, 8; tool-makers, 12; watchmakers, 1.

Among the contributions received last year by the school for the jewelry department were the following: Through the New England Manufacturing Jewelers and Silversmiths' Association, cash amounting to \$170; from a friend for prizes, \$30; from E. C. Ostby, imitation stones.

New York Concern Defrauded by Unique Swindling Scheme.

A postal card order swindle was worked by an unknown man on Robert Ingersoll & Bro., 47 John St., New York, last week, and neither the man nor the watches which he obtained have as yet been located. Although the amount involved was not very large, yet the success with which the scheme was carried out should serve as a warning to jewelers throughout the country to beware of delivering goods to unidentified persons who may call for them, representing that they come from some reliable dealer.

A man called at the retail jewelry store of A. C. Reichel, 207 Bergen Line Ave., Union Hill, N. J., on Monday of last week, and asked to be shown diamond rings. After he had examined the jeweler's stock he said he would tell his young lady friend of the selection which he had made and would ask her to come in and look at the ring. He received the jeweler's card and, as he was going out the door, asked Mr. Reichel if he knew the address of Robert Ingersoll & Bro., of New York. The jeweler told him that the firm was located on John St. That was all the New Jersey jeweler saw of the man. The young lady did not appear.

In a day or two the jeweler received a bill from Robert Ingersoll & Bro. for three dozen assorted watches which had been delivered to a messenger on an order received on a postal card purporting to come from Mr. Reichel. The jeweler at once telephoned the watch concern that he had placed no such order and came to New York to investigate. At the offices of Robert Ingersoll & Bro. it was learned that a young man about 23 years of age had called for the package of watches for which the post card order called. When he called for the package he was without his coat and told the young man who waited upon him that he had left it in a train and wondered how he could get it back. He signed the receipt book as "Al. Funk," took the package and went away. Just before the man who had obtained the watches called for them a telephone message was received asking if the package was ready. Since the post card order was signed with Mr. Reichel's name and postmarked Union Hill, N. J., requesting that the watches be ready for delivery on the next day, and because of the telephone message of inquiry relative to the watches, suspicion as to a crooked game was not aroused.

Mr. Reichel is, of course, not certain that the young man who called at his store and asked for Robert Ingersoll & Bro.'s address is the one who carried out the swindle. It does not seem, however, that had a man intended to obtain goods in the fraudulent manner in which the watches were obtained, that it would have been necessary for him to have visited the jeweler in Union Hill in order to carry out his scheme. He could just as well have sent in an order on the postal card and telephoned, making inquiry about it without having visited the jewelry store at all.

The man who called for the package is described as being about five feet, six inches tall, of medium build, and about 23 years old.

DIAMONDS LA VALLIERES

Nothing is more popular to-day than La Vallieres; consequently nothing sells so well.

To meet the demand, we have prepared an elaborate stock of unique and exclusive designs, in all combinations, at prices ranging from \$15.00 to \$1,500.00.

Being Importers as well as Manufacturers, we are able to offer exceptionally fine pieces at moderate prices.

Write for assortment. We can meet any requirement in quality and price.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Precious and Imitation Stone Trade Expresses General Satisfaction Upon Settlement of Tariff.

A general expression of satisfaction because of the settlement of tariff matters is voiced throughout all branches of the jewelry trade, and it is expected, now that the bill has been signed by President Taft and has become a law, that business conditions will continue to improve in all branches of the trade.

Especially in the precious and imitation stone trade is there rejoicing at the favorable outcome of the tariff schedule as relating to precious and imitation gems. A committee representing the precious stone interests, with headquarters in New York, worked with great diligence to obtain a tariff law which would serve the best interests of the trade, and the success which has crowned its efforts is well merited.

When the tariff revision first became a topic of interest, New York importers and dealers at once became alert, and as far back as last November appointed a committee to look after their interests. Temporary headquarters were established in the Lorsch building, 37 Maiden Lane, New York, and several meetings were held to discuss ways and means for obtaining a desirable tariff schedule as relating to the gem trade.

The committee appointed by the gem dealers and importers was composed of members of many of the largest houses in New York, and consisted of Alfred Krower, chairman; Ludwig Nissen, of Ludwig Nissen & Co.; Edward E. Harned, of Bailey, Banks & Biddle Co.; Meyer D. Rothschild, of the American Gem & Pearl Co.; Simon Frankel, of Joseph Frankel's Sons Co.; Jacob Goodfriend, of Goodfriend Bros.; Gustav Eisenman, of Eisenman Bros.; Louis Kahn, of L. & M. Kahn & Co.; Leopold Stern, of Stern Bros. & Co., and M. S. Van Wezel, of S. L. Van Wezel.

Alfred Krower, chairman of the committee, in speaking of the obstacles which were met and overcome and the work accomplished by the committee, said yesterday: "We met much to contend with in our work. At one time senators from western mining States wanted to put a duty of 50 per cent. on all gems such as are found in this country. That would have been very sweeping, as most everyone knows that nearly every gem is found in this country. The Ways and Means Committee in the House bill proposed a duty of 10 per cent. on diamonds, emeralds, rubies and sapphires, irrespective of size, and precious stones of other varieties when not exceeding one inch in any one dimension. Had this proposed paragraph become active, every other kind of stones, such as opal, aquamarine, amethyst, topaz, etc., over an inch in any one dimension would have been classed under paragraph 95, which would have meant that such stones would be dutiable at 35 per cent. This, on the face of it, would be an unjust duty and would greatly interfere with business.

"The paragraph relating to pearls, which was submitted under the House bill, provided for a duty of 10 per cent. for pearls in their natural state; half-sawed, drilled or split, 20 per cent., and collections of pearls, matched and selected, 60 per cent. as jew-

elry. As any pair of pearls could be construed as being a collection, it would practically have put all pearls under a 60 per cent. duty and would have destroyed the business and have caused endless litigation. Then again, Senator Bacon proposed a duty of 25 per cent. on cut diamonds and 10 per cent. on the rough stones, and it was only after a long and heated debate that a compromise was reached and the duty put at 15 per cent. on the cut stones and 5 per cent. on the rough, which, needless to say, would have been disastrous to reputable dealers had it become effective, and would have gone far toward placing the business in the hands of smugglers.

"The committee, after a great deal of labor and numerous trips to Washington, succeeded in having the best parts of the Senate and House bills condensed into one paragraph, which in all respects was what the precious stone and imitation stone importers required. As a result of this, they now have a schedule which leaves nothing to be desired. It will enable them to continue to do business, and in the end will produce more revenue for the Government.

"The rates of duty as they stand at present under the new law are as follows: On diamonds and other precious stones, regardless of size, 10 per cent.; pearls, whether in the original state, drilled or sawed, 10 per cent.; all imitation precious stones, regardless of size, 20 per cent.; rough diamonds and other precious stones, free. The trade is well satisfied with the outcome of the tariff. Business will now resume its natural course, and importers and cutters will be enabled to carry on their business on a larger scale with a feeling of absolute safety which will result in development in all directions."

The committee which had the interests of the precious and imitation stone dealers in hand has received, during the past week, a number of letters of congratulation from all parts of the country because of the excellent service rendered in obtaining for the trade a tariff schedule which will in every way further its best interests.

Robt. W. Brady, Washington, Pa., Files Voluntary Petition in Bankruptcy.

PITTSBURG, Pa., Aug. 5.—Robert Winters Brady, Washington, Pa., who began business about eight years ago, yesterday filed a voluntary petition in bankruptcy in the United States District Court in this city. His liabilities are \$8,509.49, with assets of \$3,005.67. The panic of the last two years is given as the cause of his failure, his business having suffered materially because of a falling off in trade and inability to realize on collections. His creditors are few in number, the heaviest debtors being banks.

A partial list of creditors follows: First National Bank of Washington, note for \$4,000, endorsed by Mary E. Brady; another for \$150, endorsed by the same person; one for \$100 and one for \$150, endorsed by Wm. B. Ritchie and discounted by the Real Estate Trust Co., of Washington; another for \$750, endorsed by John W. Wester; one for \$125 on the First National Bank of Washington; International Silver Co., \$69; Hayden W. Wheeler & Co., \$393; Joseph Horne Co., \$53; Hall Bros. & Co., \$238; Carter,

Howe & Co., \$52; Sam F. Sipe, \$200; Jacob Strauss & Son, \$77; James V. Brady (borrowed money), \$200; E. R. Deems (insurance), \$53; *Washington Reporter*, \$120; Real Estate Trust Co., note endorsed by Samuel Siegel, \$200; First National Bank, note endorsed also by Mr. Siegel, \$275; Samuel Garce, borrowed money, \$250; Mary E. Brady, note for rent, \$237.

The schedule sets forth that he has given no judgment bonds nor bills of sale. He estimates the value of his stock at \$2,023; household goods, \$62; jewelers' tools, etc., \$212, and outstanding accounts, \$108. He also owes Mary E. Brady \$420 for rent of the store, which is the amount due for one year. In addition to the items already enumerated, he sets forth that he is the holder of insurance policies, made payable to his wife, in the following companies: Pittsburg Life & Annuity Society, \$5,000; Aetna Life Insurance Co., \$1,000; Bankers' Life, \$1,000; Union Central Life Insurance Co., \$1,000; Ben Franklin, of Philadelphia, \$3,000; Queen Insurance Co., \$3,000. The policies have no cash value. A receiver will be appointed in a day or two and the affairs of the bankrupt wound up as speedily as possible.

Death of Jacob E. Farrington.

PROVIDENCE, R. I., Aug. 7.—Jacob E. Farrington died at the Home for Aged Men, on Broad St., this city, the first of the week. With his death passed away the last of the old-time retail jewelers who for nearly half a century previous to about 10 years ago were business landmarks of lower Westminster St. For many years he occupied one of the principal retail stores on that thoroughfare, located on the present site of Keith's Theatre. He was 73 years old and had been ill several months.

He was born in Woonsocket, being the eldest son of the late Billings S. Farrington of that city, who, for many years, conducted a retail jewelry store there, and here Jacob, as well as his younger brothers, Lindorf and John B., both of whom later were individually identified with the retail jewelry business, received their initiation into the business. In 1855, when only 18 years of age, Jacob came to this city and entered the retail store of an uncle, at 35 Westminster St., as a salesman. A few years later he acquired an interest in the business and shortly afterwards his brother, Lindorf W. Farrington, succeeded to the business. The store was removed in 1861 to the west corner of Westminster and Exchange Sts., and, six years later, was again removed further up the street to the corner of Dorrance, where it continued until the dissolution of the brothers, in 1884, when Jacob opened the store where Keith's Theatre now stands.

In 1893, Mr. Farrington made his last move, to 262 Westminster St., near Snow, where he continued until he retired, about five years ago. His store was considered one of the finest in this city and his customers included many of the city's best people. He found time outside of his business to develop an interest in horses, which became his hobby. He leaves one daughter, his wife having died several years ago, and one brother, John B. Farrington, of Jalbert & Farrington, jewelers of Woonsocket.

PEARLS

in qualities and sizes especially suited for the requirements of the manufacturing jeweler.

Our Pearl Stock, aside from our regular qualities, just now includes a number of series in manufacturer's sizes ranging from the small to one or one and a half grainers. These series will prove attractive as much for their uniformity of assortment as for their exceptional values.

Providence Manufacturers Pleased with New Tariff and Look for a Heavy Fall Business.

PROVIDENCE, R. I., Aug. 9.—Manufacturing jewelers of this city and vicinity are well pleased generally with the new tariff bill's provisions for the protection of the jewelry industry.

For a long time the manufacturers of jewelry have tried to have the rates of duty increased, and last Spring a delegation appointed by the New England Manufacturing Jewelers' & Silversmiths' Association, headed by Henry G. Thresher, of the Waite-Thresher Co., this city, went to Washington and appeared with others from other manufacturing jewelry centers, before the ways and means committee, urging an increase in the duties on foreign-made jewelry and a more specific classification than had prevailed.

It is claimed that the new bill gives the manufacturers all they desire and puts them in a position to compete with the foreign manufacturers. There is no longer any fear of an influx of certain grades of goods at prices lower than they can be manufactured here.

The Dingley bill fixed the duty on jewelry at 60 per cent., but the paragraph was only four lines long, and many of the imports properly coming under this heading were included in the other schedules. The resulting confusion enabled importers to obtain duties ranging from 15 to 45 per cent. on goods upon which Congress had intended to levy 60 per cent.

The new law makes it clear just what jewelry is. It contains definite and positive classifications, and imposes 85 per cent. duty on the gold plated jewelry, 60 per cent. on the gold jewelry and 75 per cent. on the findings. The most the manufacturers had hoped for was to hold the 60 per cent. rate and obtain a satisfactory classification.

The justice of their claim for protection against the cheap labor abroad and against the multitude of decisions which allowed importers all sorts of loopholes through which to escape the 60 per cent. tax, was recognized by the Senate committee, by the conference committee and finally by both branches of Congress, since the jewelry paragraph was unchanged from the time it left the Senate. This indicates a victory of no mean size for the Jewelers' Tariff Committee, which has worked incessantly since last November, securing data, attending hearings and presenting the claims of the trade.

It is impossible to figure just how much the new tariff will save the manufacturing jewelers of New England in protecting them from the importers. During 1907, over \$1,200,000 worth of jewelry was imported into this country, according to the Government figures, but so much of the goods came in under varied classifications, as glasswork, metals, etc., that the exact total of imports is unknown.

Henry G. Thresher, chairman of the jewelers' special tariff committee, said: "The jewelers have now got something they can stand back of. Few of them realize, however, what they actually have got. The paragraph passed just as the commit-

tee submitted it, without the changing of even a comma. It's been a great victory. Now the business will become settled, and I guess you will see things doing."

George H. Holmes, of the George H. Holmes Co., chairman of the advisory council of the association, said: "On general principles the tariff, it seems to me, ought to bring about a more settled state of affairs in the jewelry trade, which will undoubtedly result in greatly improved business this Fall. In fact, I think that there are already signs of a marked improvement. The tariff schedule itself ought to be very satisfactory to the manufacturing jewelers of New England, as it eradicates some troubles which have arisen from erroneous classification in the past and imposes a duty which will be more protective than the former one."

Mr. Holmes was further of the opinion that the effect of the tariff on the jewelry business had apparently been anticipated to some extent, and that the favorable result was being manifested even now in the bettering of the trade conditions.

William A. Copeland, treasurer of the Martin-Copeland Co., said: "In all goods where labor figures more than the stock, the tariff increase will be a great and decided benefit. The wages paid labor on cheap goods in this country are along the lines of the pay on the higher grades; as it is the cheap grade of goods that comes to this country from foreign shores, it was almost impossible to compete under the old tariff."

Mr. Copeland believes that the new rates will greatly stimulate business, and he looks for a large fall trade.

Theodore W. Foster, of the Theodore W. Foster & Bro. Co., said: "Jewelers feel confident that, with the removing of all the fears and doubts which have existed, the Fall trade should increase materially. The men of our firm have reported that the trade all along the line will be very heavy, as the dealers are short of goods; we are preparing for the heaviest business that we have done in several years."

Everett L. Spencer, of the E. L. Spencer Co., said: "The tariff does not affect solid gold work, but for business in general, in my opinion, the outlook is very encouraging and points apparently toward a very prosperous season to come. Just at present it is our busy season, and we have been running nights in order to catch up with orders."

Mrs. Edna M. Schultz Files Voluntary Petition in Bankruptcy.

MINNEAPOLIS, Minn., Aug. 7.—Mrs. Edna M. Schultz, retailer at 257 Cedar Ave., successor to her husband, A. H. Schultz, deceased, has filed a petition in voluntary bankruptcy, scheduling liabilities of \$3,317.33 and assets of \$2,007, with exempt assets of \$1,100.

The principal creditors include local jobbers and some New York firms.

Mrs. Schultz has continued the business of her husband since his death, and was business manager before his decease. Of late several creditors have brought suit to secure their claims.

It is said that these suits led Mrs. Schultz to file her petition.

Dinner Given to John F. P. Lawton in Honor of His 50th Anniversary With the Gorham Co.

PROVIDENCE, R. I., Aug. 9.—John F. P. Lawton, secretary and assistant treasurer of the Gorham Mfg. Co., completed a half-century's service with that corporation to-day, and in observance of the event Mr. Lawton's associates in the concern arranged a dinner in his honor at the Hope Club in the evening. The employees of the Gorham Co., at noon to-day, paid their tribute to the veteran official, a long line of workmen, numbering 1,807, saluting him as they filed past on their way from the works. This evidence of regard touched the recipient deeply.

At the dinner this evening there were present, to extend their congratulations, Edward Holbrook, New York, president of the Gorham Co.; John S. Holbrook, vice-president; E. J. Dinglee and W. N. La Cato, of the New York office; E. Frank Aldrich, Henry S. Sprague, William C. Codman, William Codman and William E. Keyes, of this city, officers and directors of the company. An engrossed testimonial upon parchment was presented to Mr. Lawton at the conclusion of the dinner in commemoration of his 50 years' connection with the company.

Mr. Lawton entered the employ of the company in 1859. He was first employed as bookkeeper. In 1865 he acquired an interest in the company and became its secretary, which office he has held ever since.

Mr. Lawton passed his 70th birthday two years ago, at which time there was a material appreciation of the event shown by the company.

Canadian Magistrate, in Sentencing Jewelry Thieves, Warns Jewelers Against Negligent Exposure of Stock.

OTTAWA, Can., Aug. 4.—Howard Conrad and Charles A. Wood, two of the men concerned in the robbery of the store of Alex. McMillan, of this place, where diamond rings to the value of upwards of \$3,000 were taken, but subsequently recovered, were sentenced, Friday, by Magistrate Askwith, of Ottawa, to one year's imprisonment each in the Central Prison. The sentence was light on account of the prisoners' conduct in aiding the police to recover the stolen goods, and also because both men are suffering from consumption, which, in Conrad's case, is far advanced.

In pronouncing sentence the magistrate referred to the carelessness of jewelers in leaving valuable jewels exposed where they could easily be stolen, which he characterized as almost criminal negligence unless proper means of protection were adopted. James Howard, alias Fred Smith, the other man arrested, was discharged, but re-arrested by Detective C. M. Verdin, of Weehawken, being wanted in that place on a charge of pocket-picking.

The entire stock of W. A. Penn, Morrison, Ill., who recently filed a petition in bankruptcy, is being disposed of at auction by Col. L. Byrnes of Chicago. A. R. Baird acted as trustee in bankruptcy. The fixtures and furnishings, including a large burglar-proof safe, were included in the sale.

Fourth Annual Convention of the American National Retail Jewelers' Association

Manufacturers, Jobbers and Retailers Assemble and Discuss Trade Topics of Timely Interest.

OMAHA, Nebr., Aug. 6.—The fourth annual convention of the American National Retail Jewelers' Association, which began last Tuesday, the opening session of which was reported in the last week's issue of THE JEWELERS' CIRCULAR-WEEKLY, was continued until to-day, with an unusually large attendance at each meeting. A slight change in the personnel of a few committees was made early Tuesday morning when R. M. Phipps was appointed a member of the committee on deceased members in place of L. C. Eisenmith, who was absent. H. A. Bransford and M. H. Jones were appointed on the auditing committee in place of Max Jennings and E. B. Lewis.

President Archibald then announced that the committee on resolutions would consist of Mack A. Hurlbut, chairman, and Steele F. Roberts, Chas. H. Williams, Claude Wheeler, Frank Hannis, A. F. Jahnke, Sandy McKay, Chas. F. Artes and C. E. Tillson.

The committee on the president's address consisted of A. E. Barker, Geo. Arkwright, W. L. Jones, F. D. Ausman, D. G. Gallet and A. J. Stark.

A. G. Hoch and C. P. Guy were appointed ushers, and Max Egge and A. L. Thoma were appointed sergeants-at-arms.

Treasurer Berman being absent in Europe, the reading of the treasurer's report, as well as the reading of Secretary Callison's report, was postponed until Friday. Chas. H. Williams, Condon, Ore., second vice president of the association, delivered the following address, entitled "Why Are We Here?"

WHY ARE WE HERE?

It is useless for me to say that I feel it an honor to have the privilege of addressing such an intelligent audience as I find before me to-day. The only regret that I feel is that nature has failed to endow me with the necessary talent and eloquence to do justice to the subject in hand. Our able president saw fit to select me for this subject; while I do not see the wisdom of his selection, I assure you that I will do in my small way all that I am capable of doing, and that is all that should be expected of anyone, in the meantime I hope to please you if honest efforts can accomplish my aim.

The subject which is to be the basis of this address, or heart to heart talk, if you will kindly allow me to call it such, is, "why are we here?" and to answer that question to your satisfaction will be my true aim. I may wander from my subject, seemingly, but I feel that the subject covers so much ground that I cannot do it justice without more or less wandering over a large valley of thoughts, and in my wanderings I hope that my audience will be lenient with me and take into consideration the easy spread and flexibility of my subject. There was a time in the early days of

local organization when these gatherings were had more for individual benefit, but to-day the thinking jeweler's mind has broadened to the extent that these meetings are called for mutual benefit.

We are here to get acquainted with our next-door neighbor, who maybe is a jeweler also, and whom we are afraid to call on at home, for he has such a poor reputation (mostly of our own making), that we dislike to be seen in his place of business for fear that the people will say (as a jeweler told me who was really in earnest), that we are in cahoots to beat them.

Gentlemen, we are here to establish a friendly, yes, a brotherly feeling among the trade, a feeling that should have existed for years, and a feeling without which no two jewelers can succeed in any one city or town, for sooner or later one or the other is bound to come to grief, if not both of them, as we often find it to be the case where some good man comes in who attends to his business and does an honorable business. To eliminate that antagonistic feeling among the retail jewelers should be the aim of everyone who has the good of this association at heart.

We are here to try to impress on the retail jeweler the value of price protected goods, and also the value of the minimum price on all goods handled by the legitimate retail jeweler. Right here I wish to say that I have been accused of price cutting by competitors when I was really only meeting the prices of firms who send their prices broadcast over the country. I have a letter in hand, being an exact copy of a letter sent to a leading watch concern asking their protection because I was selling seven-jeweled watches in nickel screw case for \$4.50. Gentlemen, why should I not sell that watch for \$4.50, when the same watch is quoted all over the country for \$4.50, all with 20 cents for transportation, I am only meeting their prices. I would like to have you tell me what right I have to ask or expect my trade to pay me a premium on any goods that they can buy for less money elsewhere.

Gentlemen, why are we here? We are here to tell that manufacturer and all others likewise, that if they want us to sell their goods and push them, they will have to arrange with these firms quoting these prices above mentioned in a way that will leave us a chance to make an honorable profit. We are here to tell them and show them that we are now selling all the makes and grades which have a protected price, and also to tell them and to show them that we can sell any make of watch or goods we may see fit to advertise and push, for the retail jeweler is just beginning to realize that he is the means through which all the manufacturers of the country have put their goods on the market. If we were able to create a demand for all these goods in the past, I do not believe we have lost the art.

We are here to show these gentlemen that it would be to their interest to fix a minimum selling price not only on some grades of their goods, but on all of them. Remember, we must not expect any of these manufacturers to do these things until we have shown them that it will pay them, for with the manufacturer it is nothing but a business proposition, a matter of dollars and cents. Therefore we should not expect them to do anything until we have demonstrated to them that it is to their benefit as well as ours to protect us; if we all do our duty on that line it will not be long before the manufacturer will be forced to protect us, and the reason will be his own self-protection.

All these things, gentlemen, we want to do in a friendly manner, for the manufacturer as well as the jobber is our friend; yes, the best friends that we have, and to them many jewelers present owe their existence in the jewelry business. So, gentlemen, we should forget the past and try to settle our difficulties in a friendly way by talking it over and understanding one another, for nothing can ever be accomplished by fighting our friends.

The very fact that we are progressing rapidly along these lines is shown by the interest that many watch manufacturers are taking in coming in contact with the retail jewelers of the country by attending and taking part in these conventions. We now find some manufacturers who, two or three years ago, did not pay much attention to the wave of organization, and who hardly recognized that one existed, but who now can readily see the future of this association if we are careful in the administration of the same.

We are here to talk over with one another the value of the different grades of goods on the market, one man handling one class, the next man the other, comparing the price paid for the same goods in different localities, thereby getting on to the honest or dishonest jobbers and manufacturers, also comparing the quality of the different makes on the market, and thereby deriving great benefit and experience for the future. We do not intend to use a boycott system, but simply to protect one another from unfair firms who may be putting out spurious goods.

I wish to touch on one point that to my mind is the greatest of all, that is, the point of sincerity. It is all well and good for us to come here and tell what we want to do, but when we are home what do we actually do? Do we live up to the principles laid down as absolutely necessary to attain the goal aimed at? If we do not, gentlemen, all this is only a farce. We are here to tell one another that whenever a man comes into your place of business to sell you some goods the first question that he should be asked is, "Do you sell to the legitimate trade only?" If the answer is not satisfactory the transaction should end right there, for by these methods only will we ever gain the point at issue, that is, that our principles must be put into action or that will not count for much. It is in the steady grinding of the same principles put into action, day after day, that the result will show itself in the long run. "Really believe in what you do yourself, and others will believe in you," is one of the true sayings of the sages.

Again I am asked the question, why are we here? We are here for business, and until that business is done which has brought us here we must not throw down the burden. Our able president in one of his letters to me called my attention to the fact that a radical change was to be made at this convention, and that it was to be purely a business convention, and I am really glad of it, for I have felt that our business sometimes was hurried and our attendance rather small at some of the business sessions of our last year's convention. That was caused, perhaps, by a little too much good-time entertainment. So I think the change made by our president may be radical, but it is certainly for the good of the association, and we should all fall in line and support it. "Why are we here?" is the question asked, and I answer, "For business." Then let us request that we make it business by all attending every session of this convention in full, and by taking pains that others do so, thereby showing

LOUIS J. DEACON, Cape May, N. J.

be interest that we take in our association; the impression that we make on others by our own carriage in business matters goes a long way to win or lose the good opinion of the general public, and that opinion is a valuable asset if we can get it, for with it comes the good will of the public at large.

We are here to meet with that committee representing the jobbers' association, and talk over whatever there may be to discuss regarding the trade grievances. Have you, gentlemen, ever thought deeply over this little matter? It was only a year or so ago that the jobbers and retailers were at swords' points. How is it to-day? Everything is amicable. And why? Because we have shown the jobbers that there should be some way of getting together and settling these disputes between ourselves, thereby doing away with this public fighting which was only a dishonor to all concerned.

Behave me, gentlemen, the time is soon coming when the same thing will be done by all ranches of the trade, and all disputes will be amply settled by the parties concerned in a private way and without being detrimental to anyone. We are here to demonstrate all these facts to the proper parties and, as soon as they see that it will be to their advantage to do so, it will soon be done. But in order to demonstrate these facts we must carry out our principles at home as well as at the convention, for what we do and what we say will determine the way that we are going to be judged. "Actions speak louder than words" is an old and very true adage, so let us get into action from now on, if we were not active before.

There are many manufacturers and jobbers who, from any point of view, are not getting the treatment at the hands of the members of this association that is really due them, because, gentlemen, some of them have made efforts to meet our demands, and in return have we done anything to show them that we appreciated what they had done? Some may say, yes, we have commended them in words of praise, or we have passed resolutions before our conventions showing them that we were pleased at what they had done. Now, gentlemen, I want to ask you this question: If a customer comes into your store, looks over your goods and praises them in the highest language, and finally walks out without making a purchase, I allow myself to suppose that you will very much doubt some of the fine words of praise uttered by the speaker, and you will also feel very uncertain as to whether or not he appreciated your wares as much as he seemed to by his fine expressions. Now, then, brother jewelers, we are in the same position of the customer toward the jeweler when we think that we have fulfilled our duty to the manufacturers, jobbers or wholesalers by handing them words of praise for whatever they have done to meet our demands, or do we expect them to make more efforts to meet our further demands?

Fellow craftsmen, allow me to tell you that there is but one way to show that we appreciate and are pleased at what they do or have done in the way of meeting our demands, and that is to patronize them, give them a share of your business, be true to the principles that you advocate, practice it yourself, and taking your example others will do so, for that is the only substantial way that we can show them that it will pay them to protect the retail jeweler. They will soon see if we do what is right that it is a paying proposition to protect the retail jeweler, for, in doing so, they are protecting themselves by increasing their business, and business, gentlemen, is what they are after as well as what we are after, also business is what has brought us together here to-day, and we must not be too selfish by thinking only of our own business to the detriment of all others concerned.

To demand, gentlemen, is all well and good, but our demands must be just and we must stand ready to give value received for all we ask; in other words, our demands must be founded on fair business principles, and we must be willing to give and take in the fulfilling of the same, for only in showing our willingness to give fair play to all concerned will we ever accomplish our aim.

We are here to behave ourselves and to show the world at large that the jeweler as a business man is not to be figured very far down the list, also that the retail jeweler as a citizen is an honor to the community in which he lives, and a patriot always true to his country and flag and ever ready to come to the assistance of a brother in distress. We want to show every one here present that there really exists in the heart

of every retail jeweler a warm feeling for his brother jeweler. Some of us may have to cultivate that feeling to a certain extent, but nevertheless we must show that it is there: If any of the brother jewelers here present, after taking an inventory of their feelings, should find themselves minus that feeling of warmth and good will for their brother jewelers, they must at once make a start to try to create it by daily practice.

It will make you feel so much better satisfied with yourself after you have acquired it that you will be able to look everyone of them square in the eye and call him brother, for gentlemen do not lose sight of the fact that you cannot hate or dislike anyone without hating or disliking yourself, to a certain extent, nor can you do anyone any harm without doing yourself harm, or can you in any way do anyone good without likewise doing yourself good. It seems to have been a natural law to love one another, the violating of which is sure to inflict punishment on the violator. I really believe, gentlemen, that we can do more good to elevate our trade by our proper carriage and treatment of one another than we can by any other one means at our command, and there is no other one thing in which the retail jeweler needs more education than in the treatment of his brother jeweler.

Having exhausted that subject, and I hope not in vain, for if I have been the means of even setting some of my jeweler friends to think on the subject I will feel repaid ten fold, for sometimes all that is needed is a thought to start with, and then the natural brotherly feeling flows of itself and carries us to the winning post which none of us, brother jewelers, can attain if we spend too much of our time fighting one another. When we wake up to the actual facts we find ourselves in the position of the two dogs which fought for the bone and found the bone gone when the smoke of battle was cleared away, so, brothers, take warning.

Last but not least, we are here to elect our officers for the next term of one year, and right here is where I want, with your permission, to wander a little from my original subject to put forth a few thoughts that I think will be beneficial to the association and to all concerned, and that is the tendency to change your officers too often. This organization is getting to be of some magnitude. In some of the offices it would seem to take a year to get well acquainted with the requirements of the office, and sometimes when an officer is just getting to be proficient he is removed and replaced with a new recruit who has to go through the same period of learning to prepare himself for this missile.

Now, I am of the opinion that many who try to get offices do not really know or realize the amount of work that is connected with them, and when they discover it the work is neglected to the great detriment of the association. I have reference to our State association, in which such mistake was very costly, and as this association is much larger in membership and the work thereby multiplied, I would say that it is due the association that any man, not knowing the amount of work required of him or not having the proper time to devote to any office within the gift of this association, should refrain from any efforts whatever to attain the same. Thus he will not force out others who might have the time and might be willing to spare it to the advantage of the association. Gentlemen, I am a great believer in the office seeking the man, and not the man the office, for in that way only will we succeed in enrolling the best material we have in our ranks to the benefit of the association.

Take example from some of the large industries and corporations. They are not believers in many changes in the staff of their managers. Why? Because they have found by experience, dearly bought, that it did not pay to trade horses while crossing a stream. Why is it that the state of health of the famous railroader, Mr. Harriman, can almost cause a panic? Not because all railroad traffic will stop on his lines should Mr. Harriman die, but because the change might be so costly to the interest with which he is connected, and because it will take whoever might take his place some time to acquire the same knowledge of the business that he has at the present time. For that reason, gentlemen, we should think deeply when we have a capable officer in any capacity whatsoever, before we change him, provided he is willing to continue in office, for the change may be detrimental to the association with the best efforts of the incumbent and without any fault of his.

Therefore, gentlemen, the election of officers should be looked upon as the most important business coming before this convention. In the selection of these officers care should be taken that no feeling of friendship should have any weight in the balance of power to elect; that the ability of the person chosen for the position and his willingness to serve and qualifications be the only reasons why the members of this body should support him. With that principle put into force this association will soon see the day that the retail jewelers of the country will find it an honor to hold a certificate of membership in the American National Retail Jewelers' Association, and until we have reached that point of excellence in organization we will not have attained the power that is due this association. Therefore allow me to urge every member of this convention to have but one thing in view in regard to the election of officers, and that is, the best results for the benefit of the association, first, and all the time.

Let us recognize a man's ability, whoever he may be, wherever he may have come from, or for whomsoever he may have come here to represent.

Some members must be ready to deny themselves some cherished ambition because the president, secretary and treasurer should be as centrally located as possible to transact the business of the association at the least possible expense. While I think it is quite an honor to hold the office of president in this association, I have to deny myself even the thought, for the good of the association would not permit its head executive to be located so far away from the center of its work. The extra expense in getting them together (I have reference to the executive committee), would be too great, and I feel an unnecessary expense when we have within easy reach of the center of work, members who are capable of filling those offices with credit to themselves and satisfaction to the members of this association.

Therefore, in electing your officers for the next year do not lose sight of the many things that are of great importance to this body in the line of saving expenses in the administration of the affairs of this association, as we are not very strong financially at the present time, and as we realize we cannot accomplish anything without funds. The fact of our being without funds is not a recommendation, nor is it a drawing card to the many retail jewelers at large whom we wish to enroll in this association.

I am really sorry to take up so much of your valuable time on this subject, but, brother jewelers, I feel it such an important point that I sometimes feel that if I had the tongue, voice and eloquence of a William Jennings Bryan I would be tempted to try to force the importance of these many little points which, in themselves, like the scattered drops of the April shower, do not count for much, but when united and concentrated form a power impossible to resist.

I have tried to tell you at some length why we are here and what we are here to do, now I would like, with your permission, to reverse the order of things for a moment and tell you of some of the things we are here not to do. It has almost always been the misfortune of our conventions to have some unpleasant things to settle. But when those things have to be, they must be, but brothers, permit me to call you such for the moment, for we really are brothers, some of us in more than one way, I would like to ask you if you will not all put your shoulder to the wheel and make this convention a matter of history in the jewelry trade, by making it the best, the most friendly and the most brotherly convention ever held in the interests of the jewelry trade. It is within our power. It only requires the help and willingness of every member of this body, so now, fellow craftsmen, let us all appoint ourselves as a committee of one to see that this convention is made the biggest success possible, and an event in the life of every member present.

Let us not allow any little difference of opinion to cause us to drift apart on any question and cause great arguments that will occupy the valuable time of this body, but at all times let us endeavor to let the majority rule and end all discussions. Things may not be exactly as we see them, but the fact that a majority sees them in a different light than we do should be sufficient to convince us that we may be wrong. And good government, gentlemen, in anything, can only be accomplished when the majority's ruling is final, and when all members in a body are willing to follow them and fortify them with their power and strength. So let me ask you again for your support of the majority at all times during this con-

Have you ever seen Pink Amethysts?

Handsome stones of remarkable brilliancy and of the most delicate shades of pink.

These stones are cut in every size and shape for pendants, brooches, earrings, studs, etc.

They are especially commended to manufacturers on account of their beauty, adaptability, and moderate price.

vention, and let us show the world at large that although we may be classed with the blacksmiths on the rate books, that as business men and men of intelligence, they must class us up towards the head of the line, and let us all conduct ourselves during this convention so that every member here in attendance may feel proud of the fact that he is a retail jeweler and a member of the American National Retail Jewelers' Association, and that feeling will be a great drawing card to the members at large whom we are so anxious to enroll in the membership of this association.

Mr. President, ladies and gentlemen, in my closing efforts to answer the question as to why we are here, I must say that we are here to tender thanks to the many valuable friends who at all times have always stood ready to tender us their valuable help. In this respect I have especially in mind the trade press that has so kindly helped us to make our past conventions the great successes they were, and that at all times have stood ready to do anything that would promote the welfare of this association, also to the many manufacturers and jobbers who, with their exhibits, have helped to make our conventions interesting and beneficial to the members attending, besides being a great attraction to help swell the attendance, also to thank the many manufacturers, jobbers and wholesalers who have done anything to meet the demands of the retail jewelers for protection.

We are here to commend them and to show them that we appreciate what they have done, and that we are ready to do more, and that is to patronize them and lead them on to further efforts to protect themselves by protecting the retail jeweler with a fixed selling price on all their goods instead of on part only.

Finally, we are here to render thanks to our officers who have, during the past year, carried the burdens of the work of this association to the best of their ability, and to the satisfaction of the members of this association. Special thanks is due our worthy president, who has had a heavy burden in the handling of the work of this association, and who has done so without complaint. We are here to thank the many valuable speakers who have made our conventions so interesting, also to thank the State association of Nebraska and the local association of Omaha for their able efforts in preparing the present convention.

In these, my closing remarks, I wish to say that I see in the future of this association great possibilities for the betterment of the individual jeweler and of the trade in general. All that is needed is the undivided support of the members of this association to its officers, and the careful choosing of the same. Mr. President, ladies and gentlemen, I thank you all very kindly for your appreciative attention, and hope to have the pleasure of meeting you all individually during this convention. Hoping that my efforts to please and interest you have not altogether been in vain, I again thank you for your attention.

President Archibald then invited A. W. Sproehle, Maximilian Ellbogen and Geo. H. Edwards to sit upon the platform with the officers of the American National Retail Jewelers' Association. These gentlemen constituted a committee of delegates from the National Wholesale Jewelers' Association.

A short talk was limited to two minutes each, on the question "How many times should a retail jeweler turn over his stock during the year in order to be considered a successful retail jeweler?" Mr. Hurlbut, of Iowa, said many retail jewelers carrying a large stock made money by turning over their stock only once during the year. Mr. Paegel, of Minnesota, said a small stock should be turned over three times a year. Mr. Hofer, of Nebraska, said he carried an \$8,000 stock and made money by turning it over twice during the year.

Mr. Stebbins, of Ohio, said it didn't matter how many times a stock was turned over. The principal thing, he said, was to see that the business done was profitable. Mr. Roberts, of Pittsburg, said a \$10,000 stock should be turned over twice, but that

a \$100,000 stock was impossible to turn more than once. The meeting then adjourned until the afternoon.

The Tuesday afternoon session began with the singing of "Maryland" and "America" by those present. This was followed by a preliminary report of the committee on credentials and the announcement by President Archibald that the organization had nearly 3,000 members.

The real afternoon session began with the address of President Archibald, who spoke as follows:

PRESIDENT ARCHIBALD'S ADDRESS

Another convention season has come. The jewelry craft from ocean to ocean has been invited to come to this city. Large numbers have gathered here—manufacturers, jobbers, retailers, editors, commercial men, and by no means the least, many good women. We bid you all a hearty greeting. We bid you all a royal welcome.

This convention marks the fourth anniversary of the founding of this association. The growth of this association has been steady. This is a sure sign of success. Things that are built for generations to behold are built slowly. This organization cannot move faster than its members. This organization cannot move in advance of the ideas of its members. So organization work must necessarily move slowly.

THE WORK OF THE PAST YEAR.

The work of the past year has been harmonious, pleasant, but laborious. Organization of new States has been an important factor. During the year the great States of Texas and Wisconsin affiliated with the national association. Also, the States of New Jersey, Delaware, Colorado and the District of Columbia organized and affiliated with the American National Retail Jewelers' Association. The great State of New York also formed a State organization. This makes 36 State organizations. At the close of the first year we had 678 members; at the close of the second year we had 1,780 members. We have to date 2,800 members. This shows the growth of the association since its beginning.

This year many more States might have been organized if our finances had warranted the expenditure. It takes money to organize States. It costs more money to organize any State than we receive the first year. This is inevitable. Nevertheless we must continue to organize new States until all are within our ranks.

Each State organization has taken on new enthusiasm. Nearly all States increased their membership during the year. Nearly all States had enthusiastic State conventions. These meetings were characterized by unanimity of sentiment and intelligence of action which clearly indicates progress.

Reports come to us from all States in the Union of the sentiment of the retail jewelers in favor of organization work. This is the keynote to success—interest, sympathy and enthusiasm. All these have awakened to a high degree.

Competitors in business now meet each other on friendly terms. A friendly relation between competitors has lessened jealousy and price cutting on goods.

The wholesale houses who sell you goods are more careful to whom they sell. Those who issue catalogues are more careful who receive them. The jobbers have almost entirely ceased sending out discount sheets except under sealed mail. Legitimate firms have nearly all ceased selling goods to the catalogue houses. Legitimate manufacturers have cancelled large orders when they ascertained the destiny of the goods—the mail-order house.

Some manufacturers have placed a restrictive selling price on jewelry, on silverware, on china, on watches, and on many other lines, to protect the legitimate retail jeweler.

At least two sterling silver manufacturers sell their goods exclusively to the retail jewelers with a restrictive selling price. There is a restrictive minimum selling price on at least three brands of silver-plated flat ware. Some silver makers sell the retail jewelers only.

Some of our best gold-filled chain, locket and bracelet makers require their jobbers to sell the legitimate jewelers only.

Five of our watch companies have a fixed selling price on every movement. All other com-

panies have a fixed selling price on all high grade movements. Many of these companies have adopted the policy of selling the retail jewelers only.

The oldest and largest watch company adopted a policy of great moment to the retail jewelers. The declaration means that this great corporation has decided to restrict their channels of distribution of watches wholly to the retail jewelry trade. All wholesale dealers are requested not to sell directly or indirectly to any others than retail jewelers. They further request jobbers in other lines than jewelry, mail-order houses and similar concerns to omit the listing of their watches in their catalogues. This is a far-seeing policy that recognizes that the retail jeweler is the preferred medium of distribution. These declarations, carried out, will place the watch business, in time, in the desired channels. The retail jewelers should welcome this policy and should use every legitimate means to assist in carrying out the declaration.

Great praise should be given all those companies that took the advanced steps in protecting the retail jeweler by means of a fixed selling price; and in confining the sale of their goods to the retail jeweler only. Due credit should be given all those companies that have since been induced to take either of the same steps to protect the retail jeweler.

Jobbers all over this country are ceasing to retail goods and thus are protecting our interests. Everywhere the legitimate jobbers are notifying the trade that they sell at wholesale and to retail jewelers only.

It is now the duty of the retail jewelers to do their part toward the manufacturers and the jobbers. We must practice the principles we teach. We must practice the spirit of reciprocity or our "preaching is in vain."

TRADE MARK.

One year ago this association empowered the executive committee to have drawn up a trade-mark proposition and to put the same in operation. It has been drawn up and signed, and now is in the hands of those who have the authority to carry out the contract.

This association desires a trade mark, quality marks and manufacturer's mark placed upon jewelers' goods, wares and merchandise in a manner that will enable jewelers who are members of the association to determine the quality and source of such goods, wares and merchandise. These marks will guarantee the quality of the goods to correspond with the quality marked thereon.

These trade marks shall be patented and registered in accordance with law. The members shall be furnished with a key to these marks. These goods bearing these trade marks shall be sold only to members of this association.

When the manufacturers and jobbers take hold of this proposition and handle goods marked with the trade mark and quality marks of this association, a new impulse will be given association work.

Our contract requires the president of this association to appoint a committee of three men to be known as the Trade Mark and Advisory Committee. We recommend that this association empower the president to appoint this committee.

MUTUAL RELATIONSHIP OF MANUFACTURER, JOBBER AND RETAILER.

For years we have heard the abuses of the retail jewelry trade placed upon the manufacturer and the jobber. No doubt there is some truth in the statements. But since the organization spirit has taken hold of the three branches of trade—manufacturer, jobber and retailer—a new spirit prevails. It is with much pleasure we greet manufacturers and jobbers to-day. In the past year your president has had many most pleasant and profitable conferences with manufacturers and jobbers. These conferences have brought about most harmonious relationship between the associations.

It is an advanced step to have with us at this convention delegates from the National Wholesale Jewelers' Association. It is indeed the crowning glory of this year's work to see in this assemblage the manufacturers and the jobbers ready and willing to confer on all matters.

Edicts are dangerous weapons. Threats are useless firearms. "Heart to heart" talks will conquer the greatest enemy. If your president had obeyed the mandates of many retail jewelers, many months ago the manufacturers and jobbers would have been marshalled against the retail jewelers in hattle array.

We recommend that this convention empower the executive committee of the American National

Retail Jewelers' Association to arbitrate all disputes which may arise between jobbers and jewelers, or manufacturers and jewelers, and accept and extend invitations for joint conferences and take any other action it may see fit for the promotion of the friendly relations and the advancement of mutual interests.

FIXED SELLING PRICE.

The slogan of the past year has been the fixed selling price on standard goods. This must be interpreted in the most liberal sense. We desire a fixed selling price on certain standard articles in silverware, watch movements, gold-filled watch cases and similar standard goods.

We desire each manufacturer of these articles to fix the price at which each article shall be sold. We desire that this fixed price shall be maintained.

For example: If every watch manufacturer would put a fixed selling price on each movement separately, and each gold-filled case manufacturer would put a fixed selling price on each case separately and maintain it, one of the greatest problems before us now would be solved. Likewise a fixed selling price on all standard goods would eliminate our worst evils.

We do not favor the manufacturer selling complete watches except in very low grade and in very high grade movements. The reason is very plain.

There are about 350 different watches, made in the United States. Case each one in a 20-year gold-filled case and the average cost would be about \$14.50 per watch.

In order to have one watch of each kind in stock the retail jeweler's stock in watches would amount in cost to \$5,500. In order to have a small variety of cases each jeweler would need four or five watches of each kind, thus making his minimum stock amount to \$20,000 to \$25,000 in watches alone. This would be impossible for more than 75 per cent. of the retail jewelers of the United States.

We respectfully request all watch companies and case companies that have not established a fixed selling price on their entire product to do so. We ask them to give us a fixed selling price with a living profit.

The fixed selling price is the weapon that will put back our business into the legitimate channels. Let this convention go on record in favor of a "living profit fixed selling price" on standard goods.

We may further suggest that we go on record against the sale of complete watches, except in the very high-grade movements and the low-grade movements. We wish here to state that any company that has been selling a complete watch with a fixed selling price should not be asked to change the policy.

The master topic of this convention is that we hope to impress on each watch manufacturer and each gold-filled case manufacturer the importance of adopting a "living profit fixed selling price" on these articles separately.

ROUND TABLE OR JEWELERS' CLUB.

It is impossible for the American National Retail Jewelers' Association to meet more than once a year. It is not feasible for State associations to meet much oftener than once a year. The intervals between meetings are too long. Interest cannot be kept up unless we have some means to get the members together.

I think the solution is the Round Table or Jewelers' Club. Every town, city and county can have a local Jewelers' Club or Round Table. These have been organized in many cities and towns in the past year. In most cases the members meet once a month.

Retail jewelers have always had an unfriendly spirit toward each other. Each man believed his competitor a "rascal," a dishonest man and an enemy. This spirit is fast passing away.

Let me say "competition" begins at home. Your customer would not know the cost of many articles if your competitor had not told him. Your competitor's customer would not know the profit he paid if you had not told him.

Brother Jeweler, you have lost money and friends by "knocking" your competitor. Join the hand of your competitor in true friendship. Speak well of him and he will reciprocate.

I enjoin upon you to organize a club in every town, city and county. Discuss State and National questions. Discuss local conditions. Arrange price lists on repairs, standard goods and wages. Agree on all matters pertaining to apprenticeship, working hours and holidays. By these mutual agreements many dollars will be

made by each man, and your conscience will not smite you, and your nervous system will not be wrecked.

Make the social feature strong. Make a few programmes and have few set addresses. Bring up informally all the abuses in the trade and "reason one with another." Meet on a common business level with common business sense. Rich and poor, old and young should meet on common ground.

From time immemorial we have spoken of a man in a similar business as our competitor. The technical meaning of competition is "a common strife for the same object at the same time." A pleasing synonym is "business associates." In this day of organization we should adopt the master word "business associate." Shall we do it?

THE OFFICIAL ORGAN.

The subject of an official organ for the retail jewelry trade has been discussed ever since the formation of this national organization. This year the subject has been discussed at many State conventions. Action has been taken against the official organ or no action has been taken in almost every case. The sentiment against the official organ largely predominates. This is a wise decision and good judgment.

This organization has not the financial means to publish an official organ and draw the money from the treasury. The moment we publish a journal and seek advertising we lessen the dignity and cause of our organization. The moment we seek advertising for a journal published by our association we hold over the advertisers a pressure that is unpleasant. Again, when we seek advertising, those to whose business methods the organization should be most opposed will be the first to become liberal advertising patrons.

Every advertiser in an official organ carries with his advertising the "right to be let alone," or he will not advertise. In fact, this kind of advertising is more a matter of policy rather than true business methods.

It is not possible to publish an official organ without it being either a one-man power, which must be narrow and bigoted, or it will be controlled by a faction which will counteract the good it might do. The editors of trade papers should be educated men—literary men, scientific men, broad-minded men, men of determined will-power and men of judgment.

The editor of a trade journal must live above personal likes and dislikes. He must have no political axes to grind. He must live above self-aggrandizement. Such an editor has not appeared among the rank and file of the retail jewelers.

If every member in the entire association subscribed for an official organ the circulation would be limited and at a great expense.

It has been estimated that the aggregate circulation of all the jewelers' trade papers in the United States is 60,000 copies per month. This means, on an average, more than three different copies a month to every retail jeweler. Such a circulation as this can never be reached by any official organ. Hence the advisability of having no official organ.

All the trade press have published the news of the association. Every issue has been teeming with good things. Their columns have been open to all articles of merit.

It is with pleasure that we thank the trade press for their loyal support to organization work throughout the year. We ask your co-operation for the years to come. We ask you all to work for the organization and the official organ will die a death that knows no resurrection.

FRAUDULENT ADVERTISING.

Fraudulent advertising of goods seems to be no crime in the jewelry business. At least there seems to be no redress for the continual practice of such advertising.

Some manufacturers make cheap jewelry, cheap watch cases and kindred goods and sell them for what they are not. If we had a national law compelling all manufacturers to mark all jewelry, watch cases and kindred lines just what they are, less cheap trashy goods would be made and sold.

There are no objections to cheap goods, but they should be so plainly marked that the consumer cannot be misled. The retail jeweler who wilfully advertises goods to be what they are not should be guilty of a misdemeanor and be punished for the same. The manufacturer who does likewise should suffer the penalty.

There should be National as well as State laws making it a misdemeanor to advertise goods that

are not exactly as represented. Our association should put forth all honest efforts to have such laws enacted. Public sentiment must be aroused to the necessity of such laws.

HOROLOGICAL LAWS.

Horological education is absolutely necessary to keep the American watchmaker abreast of modern times. Our new watchmakers are no longer special skilled mechanics. Little advancement has been made in the real art of watchmaking. A new impulse should be stirred along this line.

We favor horological laws that will require new watchmakers to pass a State examination under a competent board appointed by the respective governors. This will raise the standard of our watchmakers and give something for which to work.

Let us urge better preparation of our mechanics. Let us require more fundamental education for our apprentices. Let us require years of service at the bench. Then let each apprentice pass a satisfactory examination. We would have no scarcity of skilled watchmakers to-day if there were a standard of requirements. High standards always bring earnest seekers for the standard.

THE STUDY OF ART.

The retail jeweler in his eagerness for trade has long ago lost sight of one of the fundamentals in the jewelry business—art. There soon will be no distinctive jewelry craft, but a scramble to supply the trade with trinkets or goods that any shopkeeper can furnish. The dignity of the craft should be raised. Our future usefulness in the business demands it.

The retail jeweler should educate himself along the lines of art. He should cultivate his tastes along artistic lines. He should read along this line. He should study art and things aesthetic. He should be a competent judge of artistic articles. By the proper dissemination of knowledge and the most careful study of things artistic, we can place our business on a plane above the ordinary merchant. Make your knowledge of art so valuable that the lover of beautiful goods will purchase his goods from you because he knows you speak with authority on the subject.

UNCLAIMED REPAIRS.

In every retail jewelry store there are a large number of watches and articles of jewelry, left for repairs, that have never been lifted. Some stores have accumulated such goods for 10 years. Some stores have \$500 worth of repair goods which have never been lifted, and possibly never will be claimed. Every jeweler wants to be rid of the responsibility of keeping these goods, and also wants the money due for the repairs.

Very few States have laws that will legally safeguard the jeweler who disposes of goods left for repairs. In many cases, where jewelers have sold the goods and the owner demanded them, although many years had passed, the jeweler was compelled to pay exorbitant prices for the goods sold.

Jewelers have taken the risk and sold the goods by advertising them in accordance with laws in some States. This method of procedure has proven expensive, unsatisfactory and attended with considerable risk.

Some jewelers give a printed check on which due notice is given that the goods must be lifted within a certain time or the same will be sold. Legal opinions differ as to this method of satisfying the demands of the law.

I think this convention should advocate that each State association prepare a law and endeavor to have the same passed, giving the privilege to retail jewelers to sell all goods left for repairs after six months. The privilege is accorded to express companies to dispose of unclaimed baggage.

UNIFORM REPAIR LISTS.

The question of having uniform prices for repairs has not been well discussed at State conventions. This would be a good question to be taken up at the Round Table and Jewelers' Club meetings. I see no reason why each State could not adopt a uniform price list for repairs.

For example: A watch is cleaned in one town for 50 cents; in another town for \$1, and in another town the jeweler charges \$1.50 for cleaning the same watch. The price should be more nearly uniform. It seems to me that a uniform price for repairs could be adopted in each State that would be equitable to both the jeweler and the customer.

This must be worked out slowly. No radical changes must be made. This should be worked

out in the Jewelers' clubs and then in the State associations.

CODE OF ETHICS.

The retail jewelers of this nation can elevate themselves to the highest plane of mercantile and professional life, if they would follow a sensible code of ethics.

The retail jewelers should follow a code of ethics in every-day life. There are National ethics, State ethics and local ethics. The National association, each State association and local clubs should adopt a set of rules which will assist every retail jeweler to be a better man morally, socially and in a business way.

THE RETAIL JEWELER AS A MERCHANT.

The retail jeweler must soon arouse from his inactivity. He must become a merchant. The day of skilful merchandising is at hand. We must compete with the mail-order house, the department store, the hardware store and the racket store and other jewelry channels. These stores are legitimate and are here to stay.

From my own observation in the thousands of stores I have seen many jewelers are not merchants.

Who is it on Jan. 1 has to borrow money to pay his bills? The retail jeweler. Who is it on Feb. 1 has no money in the bank? The retail jeweler. Who is it on July 1 has a lot of shop-worn goods and no money? The retail jeweler. Who is it that works 12 long months at the bench and behind the counter without a vacation? The retail jeweler.

Yes, we must become merchants. We must turn our stock more frequently, and pay our bills more promptly. We must become salesmen of the first rank. We must remove the watch glass from our eye and see our customers.

HONORARY LIFE MEMBERS.

The constitution of this association provides for the electing of honorary members.

There are throughout these United States a number of retired retail jewelers. These men served their days of apprenticeship and became masters of the art. They no longer work behind the counter nor at the bench. They are venerable men. They have come down to us from a former generation. It would be but a tribute to their useful lives for this association to vote them honorary life membership. Let us do homage to those of our craft who are shadowing the evening hours of life.

AUXILIARY FINANCE COMMITTEE.

The time has not come for the raising of State or national dues. I do not believe it will come for years. We admit that \$2 or \$3 or even \$5 is a small amount of money to pay for the work done to care for our own vital interests—our business. The average amount of money paid by each member into State and national associations is two-thirds of a cent a day. Can you expect much for two-thirds of a cent a day? Certainly not.

I believe \$3 a year for State and national dues is all the average jeweler cares to pay. I believe it is all some jewelers can pay. There are a large number of thrifty retail jewelers who could pay more and who are willing to pay more for the good of association work.

I believe this convention should authorize the president to appoint an auxiliary finance committee of 10 men from 10 different States to solicit from retail jewelers only contributions from \$5 to \$25. This money is to be put at the disposal of the national executive committee for specific purposes. These purposes might be to defray the expenses in having laws passed on fraudulent advertising or any matters that require legislation or national consideration. This money is not to be used for salaries, postage nor general expenses.

This is no poverty appeal, but a common-sense business proposition to further the interests of the American National Retail Jewelers' Association.

Nearly one year ago the executive committee of this association unanimously voted that it was the sense of this association that no conflicting dates of State conventions should occur. The executive committee urged through the trade press that each State association write to the national secretary before selecting convention dates. This was only partly adhered to by the State officers.

A few conflicting dates have occurred this year. We trust that State officers will accept the suggestion and write the national secretary before dates are set for State conventions. Make the office of the national secretary a national clearing house.

I take this occasion to heartily thank the Omaha Jewelers' Club and citizens of this city for the able manner you have handled this great convention problem.

May this association continue to grow in power and efficiency. May its influences be extended wider and wider, until the most glorious achievements in commercial life shall have been accomplished.

After President Archibald's address, John C. Pierik, a prominent retail jeweler of Springfield, Ill., addressed the meeting on "The Financial Advantages of Local Jewelers' Clubs." Mr. Pierik began by saying that he was going to talk of a jeweler in moderate circumstances. He said a jeweler should consider himself a man of substance in his town. He said in some respects the retail jewelry business was one of the most difficult in which to be successful. He said a jeweler should have a knowledge of art as well as a knowledge of salesmanship and merchandising. He said a jeweler should devote a little time to the people in his community.

One of the principal reasons for the commercial downfall of so many jewelers was because a retail jeweler carried too many side lines. A retail jeweler should be more of a jewelry specialist and should confine his stock to diamonds, watches, sterling silver, gold jewelry and plated jewelry and should master these stocks. No man was able enough to master 40 or 50 lines of goods. It was better to have a few complete lines of jewelry than many incomplete ones. Organization should aim at producing friendly feeling between competitors. He believed that all jewelers should establish a sinking fund by withdrawing a little money every month from their business and investing it, so that eventually they would have an income outside of their business. He said the question of taking advantage of discounts was an important one, and that it was better to borrow money from a bank at 6 per cent. and discount his bills than to let the bills run and pay 18 per cent. a year to the manufacturer and wholesaler. He said there were two ways of doing business. One was the business method and the other was the social method, and the latter method he vigorously condemned.

Henry Zilliken, R. D. Worrell and A. F. Janke were not present to make their addresses, and regrets were expressed on all sides.

T. I. Combs, Omaha, was down for an address on "The Value of Horological Education and Horological Laws," but he was a busy man and had to be excused.

In the evening, T. C. Higginbotham, consulting superintendent of the South Bend Watch Co., delivered his lecture on the escapement. This lecture was published in full in the horological department in last week's issue of the JEWELERS' CIRCULAR—WEEKLY.

Those who did not attend the lecture were taken on special cars to the Happy Hollow Country Club, where an informal dance was held. This ended Tuesday's session, being the second day of the convention.

Wednesday's Session

On Wednesday morning the session began with an address by H. S. Hyman, Chicago, on "Dollars and Sense." This address also was published in last week's re-

port of the opening of the convention in THE JEWELERS' CIRCULAR—WEEKLY.

After Mr. Hyman's address, H. C. Carpenter, sales manager of the South Bend Watch Co., spoke on "Imagination in Business," which was listened to with unusual interest.

Alber M. Dueber, president of the Duober-Hampden Watch Works, next delivered the address entitled, "How Much Wear Is a Consumer Entitled to on a Time-Guaranteed Watch Case?" which is printed in full in the horological department of this week's issue of the JEWELERS' CIRCULAR—WEEKLY.

George H. Edwards, secretary of the National Wholesale Jewelers' Association, next read an interesting paper on "Manufacturer, Jobber and Retailer on Common Ground."

MANUFACTURER, JOBBER AND RETAILER ON COMMON GROUND.

The National Wholesale Jewelers' Association—an organization made up of the leading jewelers and jobbers of the United States, at the annual meeting in New York, in June of this year, had presented to it a letter from your worthy president setting forth some of the ends that you desire to attain. By unanimous vote the association recommended to the manufacturers that so far as it was possible your suggestions be complied with. The sentiment that the jobber should work along the same lines that you are working seems well nigh unanimous, and our association appointed a committee, composed of Messrs. M. Ellbogen and A. W. Sproehle, Chicago, a member of our executive committee, and myself, to be present on this occasion and express to you our good will and to assure you of our desire to co-operate with you in your efforts to cure the evils and abuses in our trade. The same sentiment, I believe, exists among the manufacturers.

It was my privilege to be one of the representatives of our association in a meeting with a committee of manufacturers from Providence, at which matters of interest to all branches of the trade were discussed, and I also had the honor to meet with your executive committee at Chicago, last year, and go over with them questions affecting vitally both jobbers and retailers. On both of these occasions I was impressed with the evident desire of all parties concerned to treat fairly with each other, and it seems to me that if such a spirit prevails much good can be accomplished.

In treating these problems we must not forget that there are two sides to most questions. It is hardly to be expected that I as a jobber, or you as a retail dealer, are familiar enough with the business of a watch manufacturer or a maker of silver plated flatware to be in a position to settle for him questions that come up, but we must, by having a conference with him, show him something of the effect on ourselves and our customers of certain of his methods, and he may be able to modify his business practices to correct the evils complained of. After all, our interests are identical in so far that any plans which will increase the sales and profits of all are a benefit to each.

Don't get the idea that I am going to try to reconcile all the differences between the different branches of the trade to-day. I am not expecting to do that, and even if it were possible new differences would arise to-morrow or next week or next year. What I do want to do, to-day, is to see if some principle of business, some basis of negotiation, cannot be established, or at least suggested, which is right and fair for all the branches of the business. And, first of all it seems to me, we want to get out of our heads any idea that the other fellow is a rascal, and nothing will accomplish that so effectually as getting together and becoming personally acquainted with each other.

You retailers find when you meet each other face to face that you are not such a bad lot, that you are each and everyone striving for the same end, namely to make a living for yourselves and those dependent upon you, in an honest way. To get all that you possibly can that is good out of your life for yourselves and your families. You

find that many of the stories that you hear concerning the methods and practices of your competitors are simply misunderstandings or the fruits of the imagination of some thrifty customer who is trying to work you for a lower price or a longer guarantee.

Now, I contend that an acquaintance with the jobber and manufacturer will convince you that he is just such a man as you, that, generally speaking, he is honorable, honest and fair and that he will meet you more than half way in adjusting differences, that he will try honestly to look at any proposition that comes up from your standpoint as well as from his own. Now, don't get the idea that every jobber is a saint. Some of us, I agree, will bear watching, and once in a while you meet a retailer whose angelic wings are still undeveloped, but I do hold that each of us is entitled to a fair hearing on any question in which we are interested; that it is a fair and cannot possibly result in any good to take sound judgment on any manufacturer or jobber or to accept as a fact any story you hear concerning the methods of any dealer, regardless of the source from which it comes. A knowledge of the circumstances surrounding a transaction might, if the truth is understood, entirely change your view about it. Our house recently had an amusing illustration of how easily appearances might misrepresent facts. A customer called at our office with a certain dealer and bought a gold chain at a price fixed by the dealer. A few days later another customer of ours called and asked for a commission on the deal, claiming he had given the party a letter to us and that his customer had showed him the chain and told him it was purchased of us (but neglected, it seems, to state that another dealer had accompanied him when sale was made). It took some little talk to straighten this out, and at that the dealer who did not get the commission was not entirely satisfied.

Right here I want to say that, in my judgment, a retailer makes a serious mistake to send his customer to a jobber for goods. You had better send and get a few goods on memorandum for a few days if you cannot afford to carry them in stock, and make the sale in your own store. In that case it is a sale you have made. In the other case your customer always feels, and too often says, that he bought the article of the jobber. Besides that, it is not fair to your jobber to ask him to sell the goods in a retail way and only make a jobber's profit. Furthermore, it puts the jobber in a false position with his other customers, who may see your customer in his store buying goods, or to whom your customer may say that he has bought goods of a jobber.

During the past year our house has had occasion several times to ask the advice and assistance of the worthy president of the Oklahoma Retail Jewelers' Association, Mr. Mazer, and I want to thank him for information given, for the fair and gentlemanly treatment the questions raised have had at his hands, and to congratulate the Oklahoma association on its good fortune in securing the services as president of as able, energetic and honest an official as he has proven to be. It was his handling of matters referred to him that confirmed in my mind the opinion I had formed that properly constituted committees of your association and associations representing the jobbers and manufacturers could probably do more toward correcting the evils that exist than any other agency.

You have your troubles—there is the mail order house, the retailing jobber, the dry goods jeweler, the sending by jobbers of catalogues to concerns not entitled to them, the competition of dishonest or inexperienced watchmakers, the granting by jobbers of unwarranted credit to dealers with little or no capital, the manufacture and sale of jewelry bearing unreasonable warrants not justified by the quality of the goods. Now I am not going to settle all or any of these difficulties off-hand; brainier men than I have wrestled with these questions for years, but I do think the settlement of them all would be made much more easier if there was a perfect understanding between all branches of the trade, which can be brought about through committees from each.

There are the three distinct branches of the business—the manufacturer, the jobber and the retailer—and it seems to me the distinction between the two last is made by the manner of doing business and not by the volume of business done. A concern selling the consumer is a retail concern, whether its annual sales are five

thousand or a million dollars, and should not be able to buy its merchandise direct from a manufacturer unless the other retail trade have the same concession. Again, a jobber who expects this protection from the manufacturer is, to say the least, inconsistent if he will not accord a similar position to his customer, the retailer. You are, I understand, striving to establish a fixed selling price on certain lines of goods. I want to say to you that you can never maintain a fixed selling price on any line that is sold direct by the manufacturer to the mail order houses, the department stores, or to the large retail trade at a price less than that made by the jobber to the ordinary dealer, for the simple reason that the price which the ordinary retailer must get in order to do a profitable business affords an unreasonable profit to those retailers who buy direct at near jobbers' cost. A fixed buying price is a necessary precedent to a fixed and maintained selling price. And if you will go over in your mind the lines which maintain a fixed selling price you will find they are lines marketed exclusively through the jobber or exclusively through the retailer.

There are two remedies for the present chaotic conditions. First, let the manufacturer dispose of his product through the jobber or, if the jobber is a useless appendage, let the manufacturer sell his goods direct to the retailer and put the jobber off the map entirely. Just so soon as this is done, and the manufacturer disposes of all of his product to the retailer, he must revise his prices upward, because the cost of transacting his business would be very materially increased. I do not believe that goods in our line can be sold direct from manufacturer to retailer as low as they are now sold by the jobber. In other words, in my opinion it costs less to care for the needs of the retail jeweler through one source of supply than it would through 100 or 200 sources.

My own idea is that the jobber has his proper place; that he is a necessary factor in the distribution of merchandise, that it is neither convenient, practical nor economical for each retailer to buy his mainsprings of a mainspring manufacturer, his pliers or tweezers of a toolmaker, his Elgin, Waltham, Howard, Duher, Keystone, Fahys or other makes of watches of each individual maker, his chains of perhaps five or 10 factories, his sleeve buttons of as many different concerns, etc., through the line. If my idea is the correct one, then both retailer and jobber should be protected by the concerns whose lines they handle.

I do not, and I take it that you do not want to if you could, and the laws of the land do not permit you if you did want to dictate to any manufacturer or jobber who he shall sell or how he shall run his business. The law protects each man in the prosecution of his trade so long as it is legitimate, and a manufacturer or jobber who desires to market his goods through mail order, dry goods or hardware channels or direct to the consumer is not necessarily dishonest. The thing, in my mind, that we want is that each manufacturer, jobber and retailer shall be honest with one another; that we shall not be playing this game with marked cards or loaded dice; that the policy of each house shall be understood and adhered to. I have no quarrel with any manufacturer who sells to the retailer, nor with any jobber who sells to the consumer, provided he does not misrepresent his business methods. I might doubt his judgment, but I concede to him his right to run his business as he sees fit. But I can see no justice in your competitor across the street, because he is running a wholesale department, buying his goods for his retail store at 10, 15 or 20 per cent. less than the same goods cost you. Nor can I see any element of fairness in the manufacturer selling the jobber and through the jobber building up his volume and thus decreasing his percentage of expense, and then selecting a few large retailers of department stores and placing his goods with them at figures which enable them to sell at prices that you, the jobber's customer, cannot possibly meet and live. Nor does it strike me as good business policy for you as a retailer or me as a jobber to handle lines marketed in such a manner that we can neither of us make any money out of them.

I realize that many jobbers and many manufacturers will not agree with me entirely at this time; that certain manufacturers have developed their line to handle two classes of trade, and that possibly they cannot change their policy at once without serious loss. I know also that certain jobbers, especially among the older houses,

have always had retail departments, which they cannot discontinue at a moment's notice. But I am confident that the better class in both branches will realize the fairness of this principle, and will take steps to adjust their business along these lines. As a matter of fact, I believe that now there is comparatively little retailing by jobbers, not nearly as much as the ordinary jeweler believes. I have often heard retail jewelers mention jobbing houses as retailing when I had reason to know that there was no truth in the accusation.

You are, I understand, endeavoring to arrange that lines you handle shall be sold only through the jewelry trade, and yet many of your colleagues in times past have gone home from these association meetings and sent their order for silver plated flatware or nickel clocks to some hardware jobber because he is offered 1 per cent. lower price than made by the jewelry jobber, forgetting that the difference in the time given by the hardware jobber and the time you take from the jewelry jobber is worth at current interest rates more than the additional discount you get. By such practices you offer the manufacturer a premium for selling the hardware trade.

And now, Mr. President, in closing I want to thank you on behalf of myself and my associates for the courtesies extended to us. We appreciate the honor you confer on us by your invitation to be present and to speak to you, and we feel that you and your colleagues agree with us that negotiation and not boycott is the proper solution of any difficulties that arise. Let us treat with each other like men, in an honorable, honest and considerate manner. I thank you, gentlemen, for your attention.

This closed the morning session.

The ladies of the visiting delegates were entertained Wednesday morning by a musicale and lunch at the rooms of the Y. W. C. A. and were then taken around the city in automobiles. The guests numbered about 75 in all. A group photograph of the delegates and visitors was also taken on Wednesday.

The afternoon session, Wednesday, began at 2.10 o'clock. The convention hall was very warm and uncomfortable. Steele E. Roberts, president of E. P. Roberts & Sons, and president of the 24 Karat Club of Pittsburg, opened the meeting by an address on "Personality, Profit, Publicity."

This address was one of unusual merit and was filled with words of inspiration and encouragement to the trade, besides offering numerous suggestions for the betterment of business conditions.

When Mr. Roberts concluded, Jacob Franks, president of the Rockford Watch Co., addressed the meeting on "A New Era in Business."

A NEW ERA IN BUSINESS.

In responding to the new era in business it is not my intention to take you through the many byways and highways of commerce in general, but rather to speak on the retail jewelry trade in particular, as of course that is the trade in which we are all interested.*

The foundation—that is the backbone and sinew—of the new era in business can be summed up in those few words so aptly coined by J. Pierpont Morgan, "community of interest." Now, what do those words really mean those simple words which have merged millions, aye billions, into the commerce of our country? They mean the civilization of commerce. They mean just as surely the relegation of barbarism in business to the rear as the Bible and civilization mean the elimination of the savage from society—for the "community of interest" idea means the organization of like industries into a protective league for the purpose of snatching the dangerous dagger of "profit cutting" from the throat of legitimate trade—and the new era in business for the retail jewelry trade in this country will never dawn until that dagger which has cut so deeply into their profits will be placed in the archives of yesterday and forgotten.

To best show you what organization will do for an industry, I wish to read you an extract from

an editorial which appeared in the *Saturday Evening Post*, July 24, and reads as follows:

"The most notable thing in fabrics, however, is a level of prices made by the American woolen people higher than has ever before been reached. Cloth which last year sold at \$1.15 a yard is now held at \$1.50. For cheaper goods orders have been coming in freely at five per cent. to 10 per cent. above the prices of a few weeks ago."

Now, gentlemen, you have noticed the increase in prices in these woolen goods. Now, I wish you to pay particular attention to this conclusion of the editor:

"Wool is one of the very few staple articles the consumption of which in the United States has not been increased of late years. The per capita consumption is much less than it was 20 years ago."

Just think of that, gentlemen. The consumption is reduced; there is less per capita of the goods used now than there were 20 years ago, and still the prices have been increased. Now, what facts do we derive from that statement? It is not a matter of supply and demand, otherwise the price reduction would be downward instead of upward, for by all laws of commerce when the demand of an article is decreased the price automatically decreases with the demand. But the gentlemen engaged in the woolen business supplied the gap with good commercial sense; they saw the "hand writing on the wall" that they must take drastic measures to govern their profits or their business would be ruined.

Not one or two, or a few could have done this, but they took that ideal commercial remedy prescribed by Dr. J. Pierpont Morgan, known as "community of interest," and formed a strong organization that meant each man in the trade would stand unflinchingly on the "firing line," and their united efforts have borne the fruit of success. And the "new era in business" is well supplied with examples of this kind; it is a lesson that almost every industry must learn before they can get the most out of their business.

We do not hear very much about "price raising," but we do hear considerable about "price cutting" in the retail jewelry business. This business has been going from "bad to worse" until to-day quite a percentage of those engaged in it are barely making a living, and their earnings can hardly be compared favorably with the average mechanic's wages; like the proverbial "drowning man grasping at the straw," they look in all directions for a change to take place, but, gentlemen, there is only one direction for you to look—your glances to the outside have borne you no fruit, you must come look inside.

It should be your aim to bring every retail jeweler in the United States into the ranks, and then have a retail jewelers' association that will show a solid front; so when that association voices a sentiment, it becomes the sentiment of the united industry. Then I will guarantee you, when the voice of that grand organization reaches the ear of the manufacturer, it will not come to him as an appeal, but it will come to him in the voice of a command, and then let him who dares, refuse to listen and abide by that authority.

Now, I am of the opinion that co-operative stores in this country have not met with success. Just as co-operative merchants band together for the purpose of making purchases, in the same manner could the jewelers of this country arrange between themselves as to what their earnings should be and at what prices they should sell their merchandise.

When that time comes, gentlemen, the "new era in business" for the retail jewelry trade will dawn. I know that some of the more successful jewelers have frowned on the association and could not see from their standpoint where they could be benefited, always using as an argument that they were capable of taking care of their own business. Of course they are—no one wishes to have a paternal organization that would take away individual rights or regulate the individual business of individuals. But they are erroneous in their conception as to organization. No man is so big as to say that an organization of this kind is not necessary. The biggest captains of industry, men of the commercial world who have prided themselves upon business ingenuity and upon the millions that they had amassed, have bowed to the "community of interest" idea, and have become privates, working hard in the ranks of an organization of those industries in which they were interested.

It is my hope, gentlemen, that some day every retail jeweler in the United States, big and small, will be joined into an organization such as I have mentioned, because, as we all know, there is dire

necessity of improving the conditions of the retail jewelry trade.

In speaking of the advisability of organization among the retail jewelers, I desire that it be understood, and you can readily understand that I personally have no interest in any association, but of course my entire interests are wrapped up in the betterment of the retail jewelers' business, and I urge and advocate this organization movement, realizing and believing after the most minute investigation that it is the one logical method to improve the existing conditions and bring about better results. But mark you, no one jeweler or no dozen can start in and say, "My profits are too small; henceforth I must get twice as much for my goods," etc. It must be a united effort, a unison of thought, a movement towards this advancement, enthusiastically taken up.

Another very important matter to look into is the "why and wherefore of basing a profit percentage." It appears that the retail jewelers of this country, in making prices on the articles that they are handling and selling, are overlooking the fact that jewelry is a luxury, and the buying public should pay a profit based upon the profits usually gained on luxuries.

Another thing: The jeweler in his community stands in a little more of a confidential relationship with his customers than do the ordinary run of merchants; as a general thing, when a prospective purchaser is about to buy a watch, a ring, a chain, a bracelet or precious stones, he asks the jeweler's advice, and purchases along the line of the suggestions made to him by the jeweler. In this way considerable of the time of the jeweler is taken up. Also, a certain amount of the time of the jeweler is taken up in the regulating of watches. Sometimes an article that has been bought may slightly turn in color, through no fault or misrepresentation of the jeweler, but in order to pacify the customer the jeweler probably has the article recolored, for which he makes no charge.

All of these facts must be taken into consideration when basing the profit, and the profit should be based upon such a scale that the jeweler can afford to give the time necessary in his particular line of business. But the facts of the case, as I am to prove to you, are that the jeweler's profit is not on the right comparative basis with the "butcher, baker and candlestick maker." For instance, I have investigated the profits on some 10 different lines of merchandise. I find the smallest average profit to be that of the grocer, which is about 25 per cent.; but taking into consideration that this merchant is selling necessities and that his capital is turned almost every 15 or 20 days, this is a better showing than that of the average retail jeweler.

Now, my investigation along the profit line has induced the following facts:

The druggist earns a gross profit of about 85 per cent., which is an excellent showing, taking into consideration that in many instances almost one-half of his sales consist of cigars and proprietary medicines, upon which the gross profit is less than 50 per cent.

The confectioner, who turns his capital many times in a year, earns 65 per cent. profit.

The butcher, whom we cannot do without and whose every article is an absolute necessity and whose capital is turned every few days, earns 40 per cent.

The dry goods merchant, who handles to a certain degree staples, earns from 30 per cent to 50 per cent, his profit largely depending upon the location.

The clothing merchant earns 55 per cent., shoe dealer, 33½ per cent.; haberdasher, 35 per cent.; retail hardware merchant, 50 per cent.; retail milliner, 100 per cent., and in many instances, where they handle what is known as novelties or fads, the profit is still greater.

It is safe to say that the average jeweler does not earn over 50 per cent., and when you analyze the different points:

First—That he is selling a luxury.

Second—The time that he consumes with his customers.

Third—His confidential relations to his customers.

Fourth—When he makes a sale he is not absolutely through with his customer.

Therefore, to place himself upon as good a basis as his brother merchants in other lines, it is my opinion that his gross profits should be increased to 100 per cent., and just as soon as the "new era in business" dawns upon him and he shatters that profit-cutting dagger by thorough organization, he will operate his business in a manner so as to yield him a proper compensation.

Along the theory of a "new era in business," a

very interesting thing was brought to my notice about a month ago, when I was present at the meeting of the Illinois State Jewelers' Association, held at Peoria. I listened with great interest and considerable admiration to an address delivered by W. J. Pilkington. Mr. Pilkington stated that all the business houses of Dexter, Ia., on June 1, were turned over to him to be operated under his managerial guidance and advice until Jan. 1. Among these institutions were two banks. Each concern was to retain their own help, but Mr. Pilkington was to be the absolute executive, and the business houses in the city of Dexter were to be operated wholly under his instructions.

I believe that the merchants of Dexter, Ia., made a very wise movement, because with a man of Mr. Pilkington's marked ability there is no doubt in the world but that the methods he installs will enable him to discover quickly the weak spots in the methods of any and all of these concerns. For instance, those that advertise will be shown how to advertise without the useless waste of money. Others probably will be shown that they are carrying too much business on too small a capital. Some will probably be told that they are certain departments in their business that are unprofitable and should be eliminated—and so on down the line. And I wish to go on record as stating that by Jan. 1 everyone of these institutions will have made increased money during the term of Mr. Pilkington's supervision, and that there will be pointed out facts whereby, in the future, they can continue to improve.

I am not making this statement in the interest of Mr. Pilkington, because I never met him before the time mentioned, but I simply wish to show that in the "new era in business," petty jealousies are "sidestepped" and the merchants are becoming big and broad enough to be willing to take such advice as they believe will mean the improvement of their business. It further demonstrates that it is a mistaken idea for merchants to say that their business cannot be improved and their bad trade is on account of poor location, or that the times are dull.

Now, of course it would be absolutely impossible to find a Mr. Pilkington that could operate 20,000 jewelry stores, located in different sections of the country, but it would not be impossible and it would be logical for these 20,000 jewelry stores to form an organization or an association that would work as one man, to remedy the ills and strengthen the weak spots of the retail jewelry business. It is my belief that these 20,000 jewelry stores would receive just as much benefit from a combination of this kind as the merchants of Dexter will through Mr. Pilkington's executive ability.

To further illustrate the theme upon which I am talking to-day, I will be obliged to transgress a little, and mention the business with which I am connected. I dislike to do this, but my apology is that I believe I can demonstrate the subject more clearly to you by doing so.

As you are probably aware, at the early part of this year our company adopted a new selling policy, confining our entire output to the retail jewelers exclusively and also establishing a retail selling price. In other words, making our watches "factory priced." Our entire object in putting in this policy was to try and advance the profits of the retail jeweler first in eliminating what we believe to be unjust competition and making it absolutely necessary that a purchaser to get our watch must get it from a legitimate retail jeweler, and second, to absolutely eliminate "price cutting." Therefore, we most firmly insist that our prices must be maintained, and where there is proof that a jeweler has not maintained the price, we withdraw our watches from that jeweler.

Now, this method or system has brought about a few little complications that I am sure will be of interest to you, and to show you also how far away from the "community of interest" idea the retail jeweler is to-day. For instance, one jeweler from Corning, Ia., wrote us, enclosing a clipping from a newspaper where a competitor had advertised some well known watches at a certain price that was low, and concluded his advertisement by stating "The celebrated Rockford watches also at very low prices."

The gentleman in writing us, stated that he understood that the retail selling price of our watch was to be maintained and that he wanted his competitor to stop advertising them at cut prices. We responded to the letter, telling him that he was absolutely correct, that the retail selling price of our watch must be maintained, and that if we found anyone cutting the price we would use our best efforts to put a stop to it, but that, notwithstanding the fact that his competitor advertised

Rockford watches at low prices, this advertisement did not prove that we were selling them below the price stipulated, and that we would consider it a great favor if he would send someone into his competitor's store and endeavor to purchase our watch below the retail price, and with this proof, we informed him, that we would take steps we deemed necessary, but that we could not, on the mere fact of the advertisement, take it for granted that our watch was being sold below the retail price, in fact, we further went on by saying the advertisement in our opinion proved that he was not cutting the Rockford watch price, as all of the other watches were advertised at a given price and the Rockford watch was not. Therefore, we stated, we had no proof that the jeweler complained of was not living up to his contract with us, and was only advertising as a "live" merchant would.

The gentleman, responding to our letter, evidently took exception to that portion in which we referred to his competitor as a "live" merchant, and answered us "If it is your opinion that this is only such an advertisement as a 'live' merchant would insert you have a different idea of business than I have, and the advertisement referred to is a lie in case the concern is selling your watches at cut prices, and any promise made to you could not be believed. If they will deliberately lie in an advertisement they will lie to you." Considerable other statements were made along the same line but still we could get no proof from him that the firm complained of were cutting prices.

A few days ago we received a letter from a jeweler in the town of Red Creek, N. Y., stating that, according to our terms, he would be compelled to sell one of our No. 955's in a nickel case for \$9.25, and wanted to know how this could be done when all the catalogue houses were advertising well known watches of a similar description, cased in the same manner, at from \$7 to \$7.50, and that in his opinion our retail selling prices were altogether too high, that 33 1/3 per cent. was all that a jeweler should earn.

Almost in the same mail, we received a letter from a jeweler in Phoenix, Ariz., stating that he objected to being compelled to sell our watches at the price marked on the tag—that he could not make a living selling watches at these low prices, that he knows our watches are good and he ought to get much more for them. And shortly after we received a letter from a jeweler in Miami, Okla., criticizing us severely for attempting to state at what price he shall sell, stating that he pays for what he buys and he sells for what he pleases, and that he is opposed to trusts and combinations and their method of doing business.

Therefore, our only conclusion can be that we must figure out that which in our opinion will be the best for the majority in the business, and when we have figured out that best, we must bear our burden and fight along legitimate lines.

If the retail jewelers of this country had an organization such as that which I have outlined, the jeweler who stated that \$9.25 was too much for him to get for our No. 955, because well known watches of similar description were being sold by catalogue houses for from \$7 to \$7.50, would not be in a position to make this kind of

an argument, for then the legitimate retail jewelers through their association could make it known that quality goods to become standardized and sold by the retail jeweler, must be sold by the retail jeweler exclusively.

Gentlemen, I assure you that the deductions that I have made have not come through hasty conclusions, but through minute investigation, taking into consideration not only every State in the United States, but the cities and towns as well, and the information that I have gathered is based upon facts, and I know this, that a luxury, the sales of which are limited as compared to a necessity, must bear a far larger gross profit than a necessity, otherwise it is not upon a logical basis. The trend of times is ever advancing—then why should the jewelry trade, of all lines of business stand still? The prices, gentlemen, on that which you eat and that which you wear, the roof of the house in which you live and the labor which you must purchase, has steadily advanced in the last 10 years, and if your profits do not advance in a like ratio you simply cannot exist.

The "new era in business" means organization, industries of a like nature getting together, means the elimination of rivalry between competitors, means rather that competitors in a like industry join themselves in an amicable and friendly union. We are now upon the threshold of a new prosperity, the country is in excellent condition, all things indicate that business in the Fall and Winter will at least be normal, and that the year 1910 will usher in again a new prosperity period. It is time to get "into camp" and be prepared to take advantage of this wave of prosperity that is bound to reach us. Your advancement is in your own hands—a fixed price, with a living margin, no deviation, and standardized goods for the exclusive use of the retail jeweler, that, gentlemen, in my opinion, is your salvation.

Guy V. Dickinson, vice-president and general agent of the Elgin National Watch Co., next delivered a fine address, entitled, "On the Firing Line."

ON THE FIRING LINE.

When Mr. Archibald first asked that I address your convention in Omaha, I hesitated to accept the invitation. I did not feel especially qualified to make either a very interesting or instructive talk, and also it was doubtful if I could be with you, but Mr. Archibald has been so graciously persistent that I have felt very much flattered, and as he told me the delegates to the convention would be disappointed if I did not accept. I think this was a pleasant little fiction on Mr. Archibald's part, but none the less agreeable.

I want to compliment the National association on the unselfish, untiring and capable administration of its affairs by its executive officers. Mr. Archibald, your president, is conspicuously entitled to the highest praise, having devoted almost his entire time to his official duties, and it must have been at considerable sacrifice to his private interests. I have had some experience in association matters, as this present organization is

the second one to come under my personal observation, but, as I recall it, it is the third time that the retail jewelers of the country have attempted to form a permanent National body.

Although the preceding ones did not attain the importance of the present, they were the educational stepping stones that apparently every organization must use before finally reaching success, and the benefit of their experiences comes down as a heritage to the present association. That your National Retail Jewelers' Association is a success seems to be proven by the great increase in membership and the broadening of the policy of the association, recognizing that permanent success can only be secured and maintained by considering not only the retail dealer's interest, but all those having to do with the production and sale. Business conditions are continually changing, and the long-headed members of your association realize that questions of trade advancement should be studied from the impersonal, as well as the personal, viewpoint, and that it is not only desirable but advisable that the retail trade of the country should have this National organization and meet in convention to study one another's policy of business, finding out what makes for success and what does not, and what new conditions have arisen with their problems to be solved.

Association members realize that all retail dealers cannot be equally successful. Conditions in Maine differ from those in California, the extreme north from the extreme south, and the middle from the coast States. In smaller and less competitive communities, liberties may be taken, differing from a strict business policy, that would be disastrous if practiced elsewhere.

The larger the community and the greater its purchasing power, the more competition there will be, and to be successful a man must be thoroughly alive to all the surrounding conditions, that he may take advantage of every opportunity to enlarge his field of operation, minimize his expense of doing business and add to his reputation as a good merchant.

This term, "good merchant," is very comprehensive in its requirements. It means a man who is careful in his selection of a location, making his store neat and attractive and having his stock well selected and prominently displayed. He should study his customers and all those to whom he appeals, hoping to make them customers, learn as nearly as he can their demands, their tastes and their purchasing power. His advertisements should be truthful in statements, that the public may not be deceived into expecting more than it is possible to give. All these questions the thoughtful man, when he attends the convention, has in mind, and he expects to absorb something for his individual interest, as well as adding something from his own experience to the benefit of others in the trade. In this connection I read an article in the Saturday Evening Post of July 10th, on the subject of a Trust in the Retail Business, that gives a good idea of what may be accomplished in a retail business under severe competitive conditions, if the dealer will

MEMBERS AND GUESTS WHO ATTENDED THE FOURTH ANNUAL CONVENTION OF THE AMERICAN NATIONAL RETAIL JEWELERS' ASSOCIATION.

learn to buy the right goods and practice good salesmanship.

The present association, as I look upon it, realizes that the problems of trade cannot be solved all in a moment, that the most is accomplished by making progress slowly. This means that the conservative members of the association realize how much there is to accomplish and how necessary it is to develop the spirit of good-fellowship in their association and eliminate, as much as possible, the personal and individual prejudice. At the same time, for the National Retail Jewelers' Association to reap the fullest success, it is necessary to have in its ranks the progressives—those who are not satisfied to make haste slowly, as it is the men who want to know and who are not satisfied, but restless for achievement, who are really great factors in the accomplishment of necessary reforms and advancement. The conservatives and so-called insurgents are both necessary in associations such as your national one.

I understand that the association is growing very rapidly—not only in the point of members, but also that the representative class of retail jewelers throughout the country are becoming interested. This is decidedly gratifying, as we feel sure that something eventually will be accomplished that will be to the advantage of all concerned. We want, as much as possible, unity of action, faith in one another, and belief that each and every one of us is striving for success on the right lines. It is not all plain sailing and we must meet conditions as we find them, have faith and pride in ourselves, remembering that we are on the "Firing Line" of business, and that if, through ignorance, indifference or cowardice, we fail to properly interpret the public demands and tastes, some one else will take advantage of our shortcoming and get the benefit.

We must remember that capital is looking for investment, and, naturally, because of the nature of the jeweler's class of merchandise, the attractiveness in appearance, the supposed intrinsic value and the fiction of large profits, the business of the retail jeweler is more or less subject to attack.

The consumer, whose money pays the original cost of manufacture and the profits to the different salesmen, from the manufacturer to himself, and becomes a final and lifelong possessor of the article purchased, is entitled to more than passing consideration, and it is natural that merchandise will get to the pockets of the consumer by the shortest and most economical route, and, as tradespeople, it should be realized that, as vehicles of distribution, the jewelers should study the road over which they travel and make their progress towards success as smooth and direct as possible, cater to the demands of the public, systematize their business, so that the cost is at the lowest possible level, learn to criticize and suggest advertising copy that is attractive, make an appropriation from their business for advertising, proportionate to the business that they should expect to get in the communities where they are located, examine their advertising copy that it may not betray the confidence of the community, then the result will be far beyond their expectations, and if this association, as an association, will work out some harmony of action among its members along these lines, a great step will be made toward eliminating the difficulties that the trade now experiences.

There is a subject, which is of a great deal of importance to the retail dealers, which has received, so far as I am able to learn, very little attention, and this is the matter of raising the standard of the watchmaking class throughout the country, as relates to workmanship. We have a number of horological schools in different parts of the country, some of which are giving a very practical course of instruction, although they may not be quite so advanced and thorough as the horological schools of Europe. It would be a good thing for the association to interest itself in the best of these schools and encourage them to increase their time and thoroughness of instruction, before granting any certificate to a student, and it should be one of the interests of the association to agitate the question of state regulation for watchmakers and have an examining board, the same as other trades have succeeded in having appointed, so that a watchmaker could pass the examination before that board and get a license for practicing his trade within the boundaries of his state.

I understand that the Nebraska Association has made some recommendations along this line. At

the beginning, there would have to be more or less leniency in these examinations, but year by year we could improve our class of workmen and finally become just as thorough in our instructions of the trade as they are in any other country of the globe. The safeguarding of a watch, after it is sold, is just as important to the manufacturer and to the dealer as in the first instance. A satisfied customer is the best possible kind of an advertisement, and the interest of the retail dealer and the manufacturer are always linked with that of the consumer, in the satisfaction that the watch may give.

In this country a systematic and thorough education of apprentices has been neglected, and this neglect must be ascribed to two causes.

First, the early immigration of competent watch repairers into this country from Europe and England who would work for comparatively low wages, and were thoroughly trained in the mastery of watches of all kinds and classes, made it somewhat unnecessary.

The second cause of our neglect in the thorough education of apprentices has been the supremacy of the American watch and the ease with which it could be repaired.

In Europe, where there is little uniformity of manufacture, and the duplication of parts is a recent idea, the apprentice, before he is qualified to take a position as journeyman, must give from four to seven years to the learning of the trade, his education beginning with a thorough foundation in the use and handling of tools and instructions in the making of parts. From this beginning he is carried through the different stages of repairing and watchmaking work until he is qualified to handle the most intricate and delicate pieces of mechanism. Not only are his hands educated, but also he is given a theoretical knowledge of the principles of mainspring, train, escapement, balance and hairspring action, and when he has left the direction of his master, he is qualified to undertake most difficult work.

In addition to the careful training of the apprentice in Europe by the master watchmaker, there are on the continent horological schools for the education of the student apprentices in mathematics, chemistry, metallurgy, physics and such studies as will equip him for a thorough understanding of the fundamental principles of mechanics applied to watchmaking.

In Switzerland, after all the requirements of apprenticeship have been fulfilled, the candidate for a master mechanic's degree must be examined and accepted by a board of experts appointed by the government.

In the first place, in this country, there should be some well-directed effort on the part of the expert watch repairers to secure as apprentices boys with mechanical tastes who would appreciate the necessity for a thorough training. The best way to do this is to keep the apprentice away from the commercial end of the business and not let him know anything outside of the repair bench. The glitter of jewelry and the activity of the salesman coming in contact with customers is very apt to appeal to a young man, but if he can be separated from this influence, with his attention directed to the repair bench only, he would be much more apt to continue his education in the desired direction.

The instruction of apprentices in this country cannot be made as slow of application as in Europe. The disposition of the apprentice here is opposed to it because of his more active, enthusiastic and energetic intelligence, and he will not be willing to plod along by slow stages of progression. At the same time, he can be taught the principles of the trade and given the manual training necessary for him to do careful and intelligent work.

As we have a number of horological schools in the country where a young man who is really desirous of learning can get the first training, the jewelers might work in harmony with these schools and have it understood that instead of accepting the students as finished repairers, they will take them into their employ, pay moderate wages and develop them still further in the general repair work, requiring a term of service before considering them entitled to a recommendation. In this way we would soon develop a class of repairers superior to those being educated under the present conditions, and we would also be less at the mercy of the really high-class repairer, who, because of his expert ability, is able to demand wages that are out of proportion to his returns. We probably cannot, under a short term apprenticeship, hope to develop the thorough

training of watchmakers as is evidenced in Switzerland, nor is this absolutely necessary.

If the majority of the apprentices were instructed in the principles of watchmaking, so that they would have an appreciation of the general mechanism of the watch and be able to handle the tools with facility, the jewelers and their customers would be protected against many of the so-called watch repairers, who are doing a greater injury to the watch than comes from ordinary wear.

Unless some action is taken by the jewelers, individually or collectively, to properly educate apprentices in the watch repairing business, we will soon have a very serious difficulty to face, one side of which will be the paying of extravagant salaries to educated repairers, which will leave no margin of profit for the repair work, or trust the work to the hands of inexperienced men and take our chances on keeping out of trouble with our customers.

In addition to the subject of good journeymen, the subject of advertising is a very popular one and a great many writers and speakers have expressed themselves very clearly and given some very good advice to the merchant who is bidding for business, and there is one thing that I have noticed particularly in the last few years, in regard to advertising, and that is the improvement of the tone, the greater care in the writing of the copy to see that the statements contained therein are not misleading. It is true that there are a great many advertisers throughout the country, who still feel that the only way to get business, or attract attention, is to deceive, or attempt to deceive, in their statements, but this number is growing considerably less, and as compared with the large numbers of advertisers who are truthful in their statements, they are in the small minority and conspicuous because of the deceptive character of their copy.

It is getting to be more and more a disposition on the part of the publications throughout the country, such as newspapers, magazines, periodicals, journals, organs and so on to criticize the copy of their advertisers and eliminate, as much as possible, the untruthful or misleading statements. Of course if the field of advertising is left only to those who are in the habit of writing misleading copy, the publishers have no way of determining the bad from the good, but if every tradesman who is anxious to build up a successful and well-founded business will use a certain amount of his profits to advertise his stock to the public in a true and honest manner the dishonest advertiser will soon be driven into changing his methods.

In this paper that I have read, I do not believe that I have said anything that is particularly new, or touched upon a subject that has not already been under your consideration, but I feel that the retail jewelers in their association can do more than they have done along the lines of conservative, persistent and conscientious unity of action by studying the conditions of trade, accepting those which are fixed and determining how best to differentiate themselves from the trade in general, by making their accomplishments, collectively and individually, distinctive from the general class of merchants who are simply shrewd buyers and distributors of merchandise. There are few classes of trade that have the opportunity of separating themselves and their business from the general merchant that is possessed by the jeweler. The opticians have recognized their opportunities and have accomplished a great deal in their associations along similar lines, and the jewelry trade should be equally able.

I want to thank the members of the association for their kind attention and also for the compliment paid me in extending me the invitation to talk. I am exceedingly anxious for the success of your association and will be pleased, at any time, to do all that I possibly can to contribute to that success.

Mr. Dickinson's speech was listened to with the closest attention and seemed to make a deep impression upon those present. "Building Up a Retail Watch Business," by W. H. Ingersoll, was the next paper read.

BUILDING UP A RETAIL WATCH BUSINESS.

As manufacturers, jobbers and retailers we are all anxious to sell more watches, and there are facts to show that this is a reasonable ambition, because there are some 80,000,000 of

SOME OF THE EXHIBITS MADE AT THE RECENT CONVENTION OF THE AMERICAN NATIONAL RETAIL JEWELERS' ASSOCIATION.

people in this country old enough to carry watches, yet only some 40,000,000 of watches of standard seven-jewel grade, or better, have been sold here since the watch industry was established in America.

Now, it is a safe conclusion that less than half of the watches which have been sold in the last 50 years are still in use, and it is also certain that the average watch purchaser has bought at least two watches. After making all the calculations that can properly be made as to the exchange of old watches, it appears that not over 10 or 16 millions of such watches as we are now considering are at present in use. This means that only one out of every six or seven persons thought to have a good watch really has one, and it indicates a great field upon which to direct our efforts. Of course, half our population are men, and women are not quite such available prospects for watches as men, but if we count only the men we find still two-thirds without as good a watch as they can afford to carry.

Our mutual problem, then, is to find a way of reaching the remainder of our population to "get the habit." Gentlemen, no one could have listened to the eloquent and wisdom-laden addresses of the speakers who have preceded me without being much impressed. I have profited by them immensely, and my only regret is that from lack of years perhaps other things I cannot contribute as handsomely as they have done.

The wheel of fortune has made it my own particular pleasure and duty to spend a large portion of my time during the past year and a half calling upon the trade in company with our brethren, and from what I have observed and learned in this work it has seemed to me that now we are here together I could not do better than to go back to first principles and discuss with you some of the elementary phases of business, which are, after all, the foundation blocks upon which all legitimate trade rests. I refer to the things which we all know, yet which in the whirl of affairs and the routine of business allow to sink out of sight and be forgotten. It often seems that many of us enter business, or perhaps drift into it, without understanding the true nature of our calling.

Albert Hubbard, the great Roycroft of East Aurora, has given eloquent expression to a true conception of business. As nearly as I can make it he says, that it is beginning to be discovered that to-day it is not enough that as merchants we should look out for "No. 1." We must also look out for No. 2. We must consider the needs of the buyer. It is a misfortune to sell a person anything that he doesn't want, or to do anything for more than it is worth; a calamity, indeed, for the seller as much as for the buyer. Business rests on confidence. We make our money out of our friends because our enemies won't trade with us.

For centuries business was conducted in conformity with that old legal maxim, "Let the buyer beware," but as Hubbard points out, it was a fallacy and a delusion which cost the merchants much, because it presupposes that the buyer must be suspicious, which is entirely incompatible with confidence, which is the basis of trade. There should not be suspicion between friends, and the merchant should make friends of his customers.

Let us look at it in another way. Did you ever stop to consider that all business exists for the purpose of selling, and that people buy of us a profit on what we sell in consideration of a service that we render? There, in a nutshell, we have the true principle of business. We sell just two things—goods and service. This service consists in studying the needs of those within our business horizon; studying the market and using our knowledge of it to sort and sift out the goods that will meet the requirements of those we wish to serve; providing a convenient and attractive store where people may select from the assortments we have chosen for them; providing values which merit trade, and so on.

People pay us for doing these things for them, and only in the degree that we perform the service do we succeed. Failure comes from a violation of this principle of service, for if we charge too high a profit on the one hand, it is not a real service that we offer, and people won't buy, and we charge too little on the other hand, our profit is so small that we cannot provide a service that is in other respects satisfactory. In either case our business suffers. Every failure is a result of the disregard or the neglect of natural law, and with nature as with man, "ignorance of the

law is no excuse." We are punished for the violation, regardless of the reason. Therefore, as business men, it behooves us to understand the law.

There can be no effect without a cause. Nothing happens without a reason. We have seen that all businesses exist for the purpose of selling, and selling is a psychological question. As Mr. Sheldon, who is to address us to-morrow, has said, the sale always takes place in the mind of the customer before the money passes.

It works this way: Before we can sell a man anything his attention must be drawn to it. It does not matter how, whether his need of the thing makes him think about it, or whether it is through some outside suggestion, but anyway his attention must be attracted to it first. Then he must be interested in it, and be made to want it and finally decide to buy it. No sale has ever been made in the history of the world without the customer's mind going through those four stages—first, attention; second, interest; third, desire; and fourth, resolve to buy.

Now, we have been dealing in generalities so far. In a moment we shall see how to make the definite application of these principles to increasing the sale of watches. But first it is important to have gained this understanding of the general law governing all business intercourse.

Right here I want to call your attention to the value of that force called suggestion, which was mentioned a moment ago. Suggestion is one of the most powerful allies at the disposal of any merchant. It can be used largely without cost, and again very probably on its cost in the form of advertising. It calls attention to things, which is the first step toward selling.

The suggestion may come from the man's need of a thing, but if as merchants we sell only what people demand, when their needs become so insistent that their attention is drawn to it, we won't do half the business we ought to do, and any man who lets business get away when he ought to have it is not a merchant at all. He is only a storekeeper. Again, every time we sell anything the article itself is likely to be seen by others than the purchaser, and to suggest to them that they, too, purchase it. Thus we see that business begets business. It is the story of the rolling snowball.

You can also suggest things verbally to every one who comes into your store, and your clerks can do it. You can make your window a constant suggestion of the purchase of your goods to all who pass, and it is performing a real service to people to show them what you have and how it will be of use to them. And you will be paid for this service by the profits on the sales it will make. Thus we see that advertising is a creative force; it builds business intelligently done. It is a form of suggestion. Few people seem to understand the real nature of advertising. There is a mistaken assumption that it is only a competitive weapon. Many manufacturers, as well as retailers, seem to think that only so many watches, for instance, can be sold, and that advertising merely diverts business from one maker to another. That is wrong.

Does any one here suppose that if all the watch factories of the country were to join in a big, broad advertising campaign, keeping watches before the public strongly, pointing out the disadvantages under which a man labors when he has no watch, telling about the different classes of watches and what they cost, does any one suppose that all of you would not sell a heap more watches? Why, it is a preposterous supposition! Of course you would, and there you see a creative nature of advertising.

Take another example: Suppose that every jeweler in your organization was to keep in his window for three months a card explaining to passers-by that watches should be cleaned every year, do you not believe that your repair business would materially increase and that the profits would pay you for this service in showing people how they can serve their own interests by giving their watches decent care? If any of you think enough of this idea, I would be glad to print such a card and send it to you gratis.

But even in its competitive aspects we find upon examination that advertising takes more business from other lines of trade than it diverts from one brand to another in the line of business advertised. For example, if a new factory were to start to-morrow, advertising a new watch, it would doubtless cause some people who were going to buy other watches to take this new one. But it would also reach many people who wanted a number of things, perhaps a boat or a gun, a picture,

a rug, or what not, and since few people have the means to purchase everything they want this advertising would be the means of inducing some of them to buy watches, and the total sale of watches would be increased.

You see that we are dealing with broad problems. It is important to keep our wares before the public, to keep the public mind upon our line. If we let it sink out of sight our business falls off, for if we never get public attention to it our goods never reach their proper sale, hence all watch advertising, by keeping the people thinking of watches, increases their total sale, and likewise helps the jewelry business by bringing people to jewelry stores.

This thought applies to retail dealers in the same way. The jeweler across the street in a large sense is not nearly so much your competitor as the sporting goods man, the art dealer and all other vendors of luxuries, because he is working, just as you are, to keep jewelry before the people and to increase the total sales of goods in your line. Just which one gets the greater part of this increase depends upon which is the wiser in the service he provides, but each is working in the main for the same ends.

Let us remember that we can't reap without sowing, and we must study to take advantage of every way of spreading suggestion of watches and jewelry before the people. It is wisdom to co-operate with your fellow jeweler in the particulars in which your interests are mutual, because co-operation is the expression of organization, and organization beats disorganization every time.

Now, let us see how we can apply these general principles which have been outlined to the building up of a retail jewelry business, and especially the watch business. To commence with, most men work in a rut. They become accustomed to paying attention to certain phases of their business until they have acquired a confirmed habit. They wear the rut so deep that they get into it over their heads, and then they can't look around and see the many things of times of greater importance which they are neglecting. Our good friend, Mr. Higginbotham, of the South Bend Watch Co., was deploring this very general tendency of men in a conversation yesterday.

The reason that most men work in ruts is that they have no broad, comprehensive plan specifically laid out. Lack of a plan in any undertaking is fatal to the highest success, and a plan should be written out so that it can be consulted, that the worker as he progresses may see that he is squaring himself and doing what he resolved to do. It makes consistency possible.

I have here a plan for a retail business which I will describe to you briefly. I believe that with this outline before him no man of ordinary intelligence, judgment and executive ability could get into a rut if he would give it 10 minutes of thought every morning on arriving at his store, because it enumerates every important factor in the management of a retail business, so that they could not be overlooked. If, when I have finished, any of you think it would be of use to you I would be very glad to print it in the form of a diagram and mail it to you.

Now, to get down to what some of you will regard as the practical part of this discourse: The volume of your business depends upon just two things: First, the number of customers which you sell, and the amount you sell to each, not in individual sale, but as a yearly total.

These two considerations depend upon the following:

The location of the store, because obviously it is a greater service to the community to place a store where it will be convenient for the many. Then the appearance of the store, because it is a satisfaction to people to be provided with an attractive, pleasant place to shop. Thirdly, the reputation and popularity which are gained by friendliness and fair dealing. Fourthly, the values offered. Fifthly, the merchandise stocked, including its quality, variety, condition and appearance.

The next factor in gaining large numbers of customers and getting them to purchase liberally consist in supplying a pleasing service, such as, for example, prompt attention and capable clerks. It was my good fortune to have the opportunity of learning the tremendous importance of these two things in the welfare of two of the greatest retail institutions in the world.

Other features of your service should be a good delivery system, co-operation between all departments, prompt and courteous rectification of errors.

But you can have all these things, including the excellence of your location, your splendid stocks and values, your superior service, and it will avail you nothing unless people know about it. The slow and tedious way would be to let them discover it in the course of time, but the modern way is to tell the public about the merits of your store, which is simply advertising; and by advertising we do not mean any small or narrow thing; it is a big general force having many uses. In publishing the story of your business you are not confined to listing merchandise alone; every item that is worth providing for the service of the public is worth telling about in your advertising. Describe your policy, the conveniences and satisfaction of dealing with you, and of the other things which you provide as inducement to trade.

Advertising doesn't necessarily mean the use of newspapers. Everything that you do to communicate your business news can well be termed advertising. You have at your disposal all publications that circulate within your territory, but besides this there is a kind of publicity known as display advertising, which includes not only window display and your show cases and the signs inside of your store, but also painted walls on your own building and on other buildings in the town, sign boards which can be erected on the roads leading into the city, theater curtains, in fact, every space where many people pass can be made to echo the suggestion which you wish to proclaim. Then there is the mail, through which you can send letters, booklets, circulars, catalogues, and perhaps you would find it profitable to issue a little monthly house organ to send to those about you, either by distributing from house to house or sending through the post office. Occasionally it may be well to produce a little souvenir which people will keep about them to remind them of your wares. Some of us may have tried advertising, and concluded that it didn't pay. If that is the case it was because the advertising wasn't right. There is good and bad advertising just as there is good and bad merchandise. One kind gives results, the other does not.

To put it briefly, I think there is one sure way of writing a good newspaper advertisement, letter or circular. It is this: Just pick out some typical customer in your neighborhood, and consider that you are talking straight to him, then your advertisement cannot go far wrong. Many goods of your stock are advertised extensively to the general public by the manufacturer. Now, when a factory is spending money suggesting the purchase, for example, of its particular watch, it is doing part of the work that would otherwise be left to you to do. It is getting attention, interest and desire for this article. One of the most profitable avenues into which to direct your advertising, therefore, is to take such items as are being made known to the public and let your own men's people know that in your store they can get the goods that they have heard about. Don't expect your advertising to revolutionize things in a month. Persistency and continuity are its cardinal requisites. Keep everlastingly at it, and keep it always fresh and new, and it will not fail to win out.

Now, a word about window displays. In my travels among the jewelers I do not find one window out of a hundred that is doing one-tenth of what it should. The window, as we have seen, is a means for putting forth suggestions, and it should say something definite and to the point. There should be some central feature upon which the mind can center, and simply to put a lot of merchandise in the windows more as a means of filling it up than making it convey a message is to waste the most efficient salesman that you have and one that you pay for whether you use him or not. Probably a hundred times as many people pass the outside of your store as come in it.

Your window should always say something of interest to make them stop. It is the index of what is inside. But, you say, "everybody knows me in my town; they know what I have, and would when they want anything in my line they come to me." Ah, but you are overlooking that you can create business by suggestion, and that unconsciously people judge you by your window. They can't help it, whether they want to or not. If you want your message to be as definite as it should be you should make it clear by always having in your windows your newest goods, as well as the staple articles and the advertised articles in your line, and inasmuch as people always want to know what they are going to pay

for goods, the price should always be indicated by means of a neat and, if necessary, very small price ticket.

I know that you are afraid that your competitor is going to find out what you are selling goods for, and undersell you a little, but if you are going to run your business on this principle you are going to make progress slower. It isn't price that sells goods so much as offering the people what they want.

The problem before us is how to increase our watch sales. The answer is that we must have those goods which sell in largest numbers, and which will give satisfaction. There are five points which a jeweler should keep in mind in buying watches if he is to make this part of his business a success. First, he should know when he buys that he can make a margin of profit sufficient to provide a satisfactory service. Second, the quality must be right, for as Mr. Simmons, of St. Louis, has well said, "quality is remembered long after price is forgotten." Value is the third point. We must have the best goods that we can possibly sell for the money, and if possible the best that anybody can sell. In price restricted watches, if the restriction is genuine we are sure of something on which we will not be undersold, and if the watch is the right value for the money, we have little more to ask, but fourthly, our wares must be salable, otherwise they are not cheap enough, no matter how little they cost. And, fifthly, the policy and service offered by the manufacturer or jobber through whom we purchase must be considered.

Considering that such a large portion of the public is unwatched, we must consider the best method of reaching these people. It is right and proper that we should desire to sell as high priced a watch as we can to each customer, yet we must not forget, as Mr. Hubbard says, to heed the needs of the customer. It is poor business to overload him, just as it is short-sighted for the manufacturer or jobber to overload you. And just as long as people of small means are so much more numerous than the wealthy, just so long will there be a legitimate place for the moderate priced and low priced watch. I am in the unfortunate position of recommending here something in which I have an interest, but I invite you to disregard what I say if it does not appeal to your judgment; we must remember that this large preponderance of people who are with out watches cannot be induced to begin with full jewel goods, because it is natural for us to commence things in a small way. But when a man has once acquired the watch habit he can never do without one, and as he becomes acquainted with watches his taste and requirements improve.

The cheap watch is an educator, therefore it is the most practical means at our disposal of educating people to become our customers. When we recall that every time we sell a full-jewel watch we put that customer out of the market for life because his watch will last as long as he does, we see how necessary it is to be constantly gaining new recruits, and the more watches that can get into circulation in any given community the surer may we be of a high grade watch business later on.

Of course, too, the cheap watch has many special uses on account of which it brings many well-to-do people in our store. They come to get them for their children and servants and for their own use on outings, hunting trips, and so on, and people who indulge in these pastimes are a desirable class to reach. Anything that will draw people to your store is an asset, because it gives you the opportunity of making acquaintances and selling other goods than those called for. Therefore, if I were the manufacturer of the most expensive watch made in this country I would urge you, as I now do, to sell as many watches of all kinds as you could, knowing full well that in doing this you were insuring the future sales of my own product.

In closing, gentlemen, let us remember that a man is known by his works. His business is a reflection of himself. It is his expression of his personality. When we enter a store that is characterized by cleanliness, thrift, order system, decency and peace, we know that behind it we will find a man with like qualities. If the store is dirty, topsy-turvy, with poor fixtures and an untidy window, we may be sure of finding at its head an uncouth, unbusinesslike man, who does not think clearly. If he did, the expression through his work would be otherwise. Our business proclaims us, whether we will or no, and it has its effect for good or bad, on all who come

within its influence. Let us strive, therefore, to take up the progressive methods.

Let us not leave them for those whom they have already made great, but let us make them our own that we, too, may grow and profit by them. Gentlemen, I am grateful for your attention and I wish you all success.

Geo. E. Fahys was not there to speak on "Signs of the Times," so R. A. Keute, Chicago manager for the Waltham Watch Co., spoke a few moments on the Waltham Co.'s new selling policy. He said he differed with Mr. Ingersoll in believing that a jeweler should sell a good watch, instead of a cheap one.

Ernest M. Lunt, manager of the Chicago office of the Towle Mfg. Co., next delivered a very forceful address on "A Golden Opportunity." This paper will be published in a forthcoming issue of THE JEWELERS' CIRCULAR-WEEKLY.

Joseph Mazer, of Oklahoma, delivered the last address made on Wednesday afternoon. His address, entitled "Justice and Evolution," offered many suggestions for the improvement of existing conditions. This address will be printed in a later issue of THE JEWELERS' CIRCULAR-WEEKLY.

The convention now adjourned for the day until the convivial festivities of the evening.

The Banquet.

More than 300 jewelers and their wives were present at the banquet given Wednesday evening in the banquet hall of the Rome Hotel. The tables were arranged in long rows and were decorated with potted plants and cut flowers. A gift from the Eisenstadt Mfg. Co., St. Louis, was a dainty rose boutonniere placed at each plate. The following appetizing menu was served:

MENU.

Cantaloupe.	Queen Olives.
Garden Radishes.	Tomato Anglaise.
	Filets of Black Bass, Marguery.
Anglaise Potato.	Cheese Straws.
	Broiled Spring Chicken, Supreme.
	Punch a la Rome.
New Potato, Browned.	Green Peas.
Hot Rolls.	Tea Biscuits.
	Cucumber and Tomato Salad.
	Toasted Wafers.
Panache Ice Cream.	Fancy Assorted Cake.
	Demitasse.

The menu cards were exceptionally neat and artistic. At the conclusion of the banquet T. L. Combs, president of the local Jewelers' Club, introduced the toastmaster of the evening, E. A. Benson. A short address, entitled "Greetings from the A. N. R. J. A.," was delivered by the president of the association, Hon. J. P. Archibald. This was followed by brief talks by Rev. Scott Hyde and Carl Herring, of Omaha. Rev. Mr. Hyde spoke on "the Golden West," and Carl Herring addressed "the Ladies." A pleasing musicale brought the banquet to an end. The musicians included Miss Clevee, violinist, Miss Lancaster and Joseph Barton, vocal soloists, while an orchestra dispensed popular music during the evening.

Thursday's Session.

Thursday morning the committee on credentials reported that the following States were entitled to the number of votes stated: Arkansas, 4; California, 1; Colorado, 3; Delaware, 1; Illinois, 1; Indiana, 5; Iowa, 11; Maryland, 1; Michigan, 3; Minnesota, 7; Missouri, 8; Nebraska, 7;

SOLIDARITY WATCH CASE COMPANY

(Established a Quarter of a Century)

54 Maiden Lane - - New York

D. E. D. McMURRAY, President

JOHN W. SHERWOOD, Vice-President

LOUIS J. MONTAGNON, Secretary-Treasurer

Oklahoma, 12; Oregon, 4; Pennsylvania, 12; Texas, 4; Virginia, 2; West Virginia, 2; Tennessee, 2; Georgia, 1; Wisconsin, 7; South Dakota, 2; North Dakota, 2.

The report was accepted.

The committee on president's address suggested that each State endeavor to have a law passed, whereby unclaimed repair work could be sold after being kept for six months. It also suggested a clearing house for State convention dates, so that the dates of different State conventions would not conflict in the future. The committee also suggested that the president appoint an auxiliary financial committee, consisting of one member from each State, who should solicit subscriptions from the members of the association for a specific purpose, this money to form a fund to be used for purposes beneficial to the organization, and to be held separate and apart from the general fund. Steele F. Roberts, Pittsburg, Pa., was appointed chairman of this committee.

A. L. Thoma then announced that there had just been formed an association of State secretaries, known as the A. N. R. J. Association of State Secretaries, and that the members would exchange ideas as to the best methods of furthering State association interests.

S. O. Bigney, not being present to deliver his address on the Panama Canal, the election of officers then began. C. S. Wiley, Frank Hannis and Fred Pfaffle were appointed tellers. Mr. Mazer nominated Mr. Archibald for president, in an eloquent speech, and Mr. Williams seconded the nomination. There was no opposition, and Mr. Archibald was unanimously elected. He responded and thanked the members for the hearty support accorded him.

Mr. Marean next nominated A. E. Paegel for first vice-president and the nomination was seconded by A. E. Barker. Mr. Williams nominated Joseph Mazer for first vice-president, and Mr. Hurlbut seconded the nomination. Mr. Mazer was elected.

Mr. Combs nominated Chas. H. Williams for second vice-president, and Mr. Paegel nominated Jacob Nabstedt for the same office. Mr. Nabstedt was elected.

Mr. Hull nominated Claude Wheeler for secretary. Mr. Wheeler was elected by a unanimous vote. A. B. Hull was unanimously elected treasurer.

The retiring secretary, Mr. Callison, becomes a member of the executive committee, according to the laws of the association. Mr. Hurlbut's time having expired, this left one vacancy on the board, and T. L. Combs was unanimously chosen to fill the place.

The full list of officers and members of the executive committee was as follows: President, J. P. Archibald, Blairsville, Pa.; first vice-president, Joseph Mazer, McAlester, Okla.; second vice-president, Jacob Nabstedt, Davenport, Ia.; secretary, Claude Wheeler, Columbia, Mo.; treasurer, A. B. Hull, Belding, Mich. Members of executive committee—S. Callison, Dexter, Ia.; T. L. Combs, Omaha, Nebr.

Thursday afternoon, Messrs. Paegel, Nielson, Rowe, Arkwright and Sharp were appointed a committee to hear applications for cities desiring the next convention, after which A. F. Sheldon delivered an

address on "Betterments in Business," which appears in the Storekeeping Department of this issue. A vote of thanks was extended to him.

After Mr. Sheldon's address, the visitors went to Lake Manawa, where they were the guests of the Equality Club. In the evening, 60 new members were initiated into the Ku-Kus, with King A. L. Thoma, founder of the order, in the royal chair. A public exhibit for the citizens of Omaha was given on Thursday night, at which 5,000 people got in line and inspected all the articles exhibited.

Friday's Session.

Friday morning's session began rather late. A vote of thanks was given to the musicians for the fine music they had rendered during the convention, and A. E. Barker, president of the Minnesota Retail Jewelers' Association, read a paper on "The

and assure them of our readiness to co-operate and confer in all matters.

Whereas, The keen competition in our trade has proven the means of many retailers forgetting the ethics which should govern our intercourse with fellow merchants; therefore be it

Resolved, That the president and secretary be instructed to compile a general code of ethics for the trade and that the same be given the trade press as soon as compiled.

Whereas, It may be necessary in the future for the carrying out of our work to raise additional funds from the members of our organization; therefore be it

Resolved, That we recommend the appointment by the president of a committee, to be known as the auxiliary finance committee, and consisting of one member from each affiliated State.

Whereas, We as retail jewelers often suffer great inconvenience and loss through our inability to identify articles in our line; therefore be it

Resolved, That we earnestly recommend to all manufacturers in our line that they stamp upon every article manufactured by them some trademark by which a jeweler may be able to identify the maker of any article sold from his stock.

THE BANQUETTERS AS THEY APPEARED IN THE BANQUET HALL OF THE ROME HOTEL.

Federation of Mercantile Organization as a Factor in Modern Business Methods."

Next came the report of the committee on resolutions. Claude Wheeler read them as follows:

Whereas, Manufacturers of watch movements are selling certain of their movements cased as complete watches, and

Whereas, The universal adoption of this plan by all the manufacturers would be inconvenient to the retail jobbers; therefore be it

Resolved, That the selling of complete watches be left to the discretion and judgment of the manufacturers; and be it further

Resolved, That it be the sense of this convention that we do not indorse nor recommend the universal sale of complete watches.

Whereas, It is the practice of many jewelers to sell second-hand movements to concerns which renovate the same and again place them on the market in competition with new movements, often representing them to be new; therefore be it

Resolved, That we recommend to all retail jewelers that in the future they destroy such movements and refrain from selling them to the concerns mentioned, thereby protecting ourselves and our patrons.

Whereas, The jobbers and manufacturers have demonstrated by their action and efforts at this meeting their intention and desire to co-operate with us to the fullest extent in the correction of evils existing in our trade; therefore be it

Resolved, That we desire at this time to take formal recognition of their efforts along this line,

Whereas, Certain abuses exist in the retail trade which cannot be corrected by retail jewelry organizations alone; therefore be it

Resolved, That it be the sense of this convention that our executive committee be and is hereby instructed to take some action looking to the co-operation of our organization with the National organizations of retailers in other lines.

Whereas, In this and other years it has been found necessary by jewelers in the cities in which the meetings were held to solicit aid from jobbers and manufacturers in order to meet the expenses of entertaining delegates and visitors at the convention; therefore be it

Resolved, That in the future no funds shall be raised by the city in which the convention is held through the solicitation of money or contributions from manufacturers and jobbers, except through the co-operation of and in a manner approved by the members of the Executive Committee of this organization; and be it further

Resolved, That this resolution be subscribed to by any city applying for a meeting of the association.

Whereas, The entire jewelry trade press has given us invaluable assistance in the organization of our association, and has been so liberal in the allotment of valuable space for the publication of information concerning our organization; therefore be it

Resolved, That we, at this time, extend to the trade press a vote of thanks and heartily commend them for their work; and be it further

Resolved, That we approve and commend the action of the Executive Committee of this organi-

IN justice to yourself and to the welfare of your business, *don't buy your Fall stock of watches* without keeping in mind that in the 7-jewel field the new remodeled Ingersoll-Trenton is the only *one* sold exactly as Jewelers want *all* watches marketed.

- (1) The "I-T" is, without exception, the best 7-jewel watch ever built. An examination will prove this.
- (2) It is sold only through responsible jewelers and only direct to the retail trade.
- (3) The prices are absolutely restricted, guaranteeing a fair profit.
- (4) It is the most extensively advertised of any watch ever put on the market. Every "ad." reads: "Sold by responsible jewelers only."

No jeweler should overlook the article in his line which is most prominently before the public.

The coupon in the corner will bring full information of great interest to every jeweler who can get these goods.

J. C.

ROBT. H. INGERSOLL & BRO.

zation for indefinitely postponing action in the matter of establishing an official organ.

Whereas, The idea of local jewelers clubs of round table organizations as advocated by our worthy president, wherever adopted, has proven the means of bringing a better feeling among jewelers and of improving the trade conditions in that locality; therefore be it

Resolved, That we heartily indorse the plan and urge the jewelers of every city, large or small, to effect such an organization at the earliest possible date.

Whereas, The fixed minimum selling price on certain lines has proven a success and been of great benefit to the retail jewelers; therefore be it

Resolved, That it be the sense of this association that we commend and recommend that a fixed selling price be established by manufacturers on all standard staple lines; and be it further

Resolved, That we pledge our support to the manufacturers and jobbers to adopt and enforce this policy; and be it further

Resolved, That we recommend the appointment of a committee by the president to compile a tabulated fixed minimum selling price on all watch movements and gold filled cases manufactured in this country. This list is to be submitted to all manufacturers for their approval of the prices upon their respective products.

Upon motion of Mr. Stebbins, Ohio, the resolutions were adopted as a whole. A committee consisting of Messrs. Wheeler and Mazer was then appointed to call on the chief of police of Omaha to thank him for the protection of the exhibits. A member of the National Waterways Commission being present, the association went on record as indorsing the following resolution:

Whereas, We as business men are concerned in all matters pertaining to the commercial prosperity of the nation and the economic development of her resources; and

Whereas, Cheap transportation by water is one of the greatest factors that enters into the business life of any people and determines more forcefully than any other the commercial supremacy of a nation; therefore be it

Resolved by the National Retail Jewelers' Association in annual session this 6th day of August, 1909, That we endorse the movement inaugurated by the National Rivers and Harbors Congress to secure the most complete and efficient development of our worthy inland waterways by the National Government at as early a date as possible to the end that navigation upon them may be restored and made serviceable and reliable for the cheap and easy transportation of our country's products; be it further

Resolved, That copies of these resolutions be forwarded to both houses of Congress of the United States for their early consideration.

Next a resolution of thanks was passed as follows:

Arriving at the point of recognizing the courtesies extended to and the entertainment shown the delegates to this memorable convention, we now extend a rising vote of thanks to the following individuals and organizations which have contributed so much toward our pleasure during our stay in Omaha:

Omaha Retail Jewelers' Club.
Commercial Club of Omaha.
Board of Governors of the Ak-sar-ben.
B. P. O. Elks' Club.
City Press.
Mayor of Omaha.
Equality Club.
Ladies' Committee of Omaha.

A communication from the Equality Club, promising to attend the next convention of the A. N. R. J. A. and thanking the latter for courteous treatment received, was then read, and the secretary was instructed to notify the club of the association's appreciation of the same.

Then followed the contest for the place for the next convention. Mr. Paegel, chairman of the committee, announced that Detroit had been selected by the committee—open, of course, to discussion. Mr. Stebbins made a hard bid for Cedar Point, and a vote was taken with Messrs. Stark, King

and Thoma as the tellers. Detroit won by a big margin, but it was decided that no city should ever secure the convention unless it could prove that it could furnish the financial resources necessary to make the convention a success.

T. L. Combs next made an announcement that it was the duty of all visiting jewelers to call on the exhibitors and encourage them by telling of the great satisfaction they felt in having them exhibit at the convention.

Time was passing, and everyone suffered from the excessive heat and fatigue. It was voted not to adjourn, but to continue the session, and the auditing committee reported everything correct and suggested that in future all States that did not pay their dues 10 days in advance of the national convention should not be allowed to vote. This was opposed and not passed. Secretary Callison then said that on account of the press of business his report was not ready, but that the association showed a hearty increase in membership. The report will be sent out later.

Treasurer Bernau being absent, temporary Treasurer Radabaugh reported \$196.55 in the treasury and all bills paid. Mr. Bernau had received \$1,882.24 and paid out \$1,853.02, leaving a balance from him of \$29.22. Mr. Radabaugh had received \$1,258.72 and paid out \$1,062.17. The treasurer's report was adopted.

A number of retired jewelers were then made honorary members of the association and the secretary was instructed to notify them of their honorary membership and to send them honorary membership certificates. Their names, ages and location follow: P. Gottesleben, age 65, Denver, Colo.; ex-United States Senator T. M. Patterson, age 68, Denver, Colo.; Thos. S. Sharp, age 67, Olivet, S. Dak.; H. P. Nagel, age 58, Denver, Colo.; T. E. Lucock, age 70, Lebanon, Mo.; John Baumer, age 69, Omaha, Nebr.; L. E. Armel, Holton, Kans.; A. F. Jahnke, Sr., age 87, Richmond, Va.; Henry Reis, Davenport, Ia.; G. H. Marsh, age 65, Atlantic, Ia.; Thos. Adams, age 73, Marshall, Mo.; M. E. Nabstedt, age 68, Davenport, Ia.; Silas W. Wadsworth, Los Angeles, Cal.; Joseph Schultz, Brownville, Nebr.; F. W. Bierbaum, St. Louis, Mo.; R. P. Bell, age 72, Ft. Dodge, Ia.

At the suggestion of Mr. Arkwright, Nebraska, it was decided to get a plate made, reading that the owner was a member of the A. N. R. J. A., and that each member should display it in a conspicuous place in his store. Mr. Stark, Colorado, said he would like to see some money put up for this purpose, and contributed \$30 from the Colorado delegates. Mr. Hurlbut then suggested that the ex-officers of the association form a down-and-out club, and much good-natured chaff was the result.

A vote of thanks was then tendered to President Archibald and the rest of the officers of the past year. Able responses were made, and the fourth annual convention of the A. N. R. J. A. was at an end.

The following firms were financial contributors who aided materially in making the meeting a success:

American Silver Co., M. A. Meade Co., H. F. Hahn & Co., Norris, Alister & Co., F. H. Noble & Co., Knickerbocker Watch Co., S. Borgzinner, R. F. Simmons Co., Webb C. Ball Watch Co., J.

J. Sommers & Co., Brainerd & Wilson, Wm. L. Gilbert Clock Co., D. B. Ward & Co., A. H. Bliss & Co., Woodstock, Hofer Watch & Jewelry Co., Wm. Sickles, Bassett Jewelry Co., Hamilton Watch Co., Stein & Ellbogen Co., Seth Thomas Clock Co., Waterbury Clock Co., E. Lechler, F. A. Hardy & Co., Kreis & Hubbard, Mauser Mfg. Co., N. Wolf & Co., Riker Bros., White, Wile & Warner, A. R. Katz & Leudan Co., D. Gruen, Sons & Co., A. C. Becken Co., Sansbury & Nellis, Adolph Goldsmith, Otto Young & Co., Sprochnle & Co., Illinois Watch Co., L. Strasburger's Son & Co., D. Ullman & Co., S. K. Jonas, Dreyfus Mfg. Co., E. Gideon Beck, Despres, Bridges & Noel, M. Rosenbloom, Bernheim & Beer, C. H. Knights-Thearle Co., Meyer Jewelry Co., American Cuckoo Clock Co., Allen McNearney & Co., Charles M. Robbins & Co., Wolfshelm & Sachs, Lindenbergh, Strauss & Co., G. N. Steere & Co., Rettig, Hess & Madsen, Wm. Weidlich & Bro., A. S. Wormood, C. B. Norton Jewelry Co., Traveling Men's Equality Club, Leys, Christie & Co., and Edward Lehman Jewelry Co., Denver, Colo.

OMAHA ADVERTISERS.

A. F. Smith Co., Sol. Bergman Jewelry Co., Harry Greenblatt & Co., Shook Mfg. Co., Columbia Optical Co., Omaha Watch Repairing & Optical Institute, C. A. Williams & Co., H. Willinsky & Co., Greenblatt Jewelry Co., Omaha Optical Co., Carlson & Banks, Shultz Bros., E. I. Jones, Jacob L. Jacobson, H. Eisle, John T. Cooper, Omaha Crockery Co.

The following firms had exhibits in the convention hall. Illustrations of some of the most important ones appear on page 73d.

The Exhibits

Austin & Stone, represented by J. Dunn, displayed a large line of gold-filled pendant necklaces, fobs, lockets, vest chains, bracelets and guard chains.

The Towle Mfg. Co. was represented by Mr. Lunt and Mr. Kuhn. Much space was devoted exclusively to advertising suggestions to aid the jeweler in selling silverware. The space contained two large tables, on which booklets, advertising the various patterns of silverware, were shown, while the walls were adorned with framed examples of various illustrations of the attractive features of the booklets themselves.

The Alvin Mfg. Co. was represented by J. A. Hartig, Mr. Talbot and Lewis G. Meyerson. A beautiful line of sterling silverware, consisting of deposit, hollow and flat ware was shown. Many fine patterns of plated flat ware was shown. A special feature of the display was a showing of thin model toilet ware. Mr. Talbot was accompanied by Mrs. Talbot. The handsomest souvenir given away at the convention was a sugar shell in the bridal rose pattern of Alvin plate, the gold bowl bearing the words, "Omaha, August, 1909."

White's Art Co., represented by C. F. White, had an exhibit of unusual beauty. China plates, pitchers, vases and novelties of every description, including the newest blue mat and hand etched, were shown very attractively.

J. R. Wood & Sons were represented by A. T. Hunt. This display consisted of a large line of wedding rings and seal rings. An inclosed frame contained a large display of loose diamonds, showing the process of cutting rough, after cutting square, eight square and completed process; also American and foreign cuttings.

Joseph W. Keller, represented by H. T. Daughaday, had an exclusive line of white-stone novelties, combs and hat pins.

J. B. Ash, represented by Mr. and Mrs. Ash, showed an extensive and handsome line of real ebony goods, ladies' and gentlemen's toilet sets and manicure sets, together with loose pieces. This was the only display of its kind in the exhibit hall.

The South Bend Watch Co., represented by Messrs. Carpenter, Coulter, Wiggins, Younglove and Higginbotham, displayed a splendid line of gold watches, movements and cases. Large signs and pictures formed the back ground of the display, with a model of a watch escapement, the largest of its kind in the world; also an electric flashlight sign of a watch frozen in a cake of ice. An interesting feature was the display of a water clock.

The Rockford Watch Co., represented by Earl J. G. Lovett, Chas. O'Brien and Jacob Franks, displayed movements and cases, the main feature being a large horseshoe made entirely of black velvet on which rested rows of watches with a

We can furnish these chests to suit any combination desired.

large velvet watch form covered with watches suspended from the center, 400 watches being used. Samples of their new 12 size watch were shown.

The display of the Rockford Silver Plate Co. was one of the largest in the hall and showed a fine line of flat ware and hollow ware, the Rose may pattern being especially featured. A beautiful line of loving cups, punch bowls and solid copper ware added greatly to the exhibit. Silver cups were given as souvenirs. The exhibit was in charge of C. B. Willute and C. J. Taggart.

The Elgin National Watch Co., represented by H. B. McKinley, showed a nice display of watches. A. B. Benedict, from the factory, demonstrating the different parts of the Elgin watch. Souvenirs were given away.

The exhibit of the Ingersoll-Trenton watches was in charge of W. H. Ingersoll, E. D. Tyler and A. L. Daniels. It consisted of an attractive case of watches. Reading matter was distributed. A leather memorandum book was given away as a souvenir to all visiting this booth.

The Waltham Horological School was represented by H. E. Swain, space also being reserved by A. J. Sheff & Co., where a sizing machine for rings was displayed and demonstrations made. This was in charge of J. M. Kurtz and A. J. Sheff.

R. Wallace & Sons Mfg. Co. were represented by L. F. Andrews and L. M. Mystrom. This display covered the largest space in exhibit hall and was one worthy of mention. Silverware, both plated and sterling, including every desirable piece was on display and attracted much attention to those who are lovers of such pieces of art.

Henry A. Schrantz represented the Ducher Hampden Watch Works, who made a fine display of watches, and distributed souvenirs consisting of a tape measure and scarf pin.

The Omega Watch Co. was represented by their general agent, A. Max Holzheimer, an old Omaha resident, watches of every description being shown. The thinnest watch in the world was on display, full 12 size, 17 jewel and eappel escapement. Including the case it is only as thick as a silver dollar. Hand-carved gold on enamel with numerous styles of chatelaine watches made an attractive display.

R. A. Kettle, general western manager, together with D. H. Wells and W. A. Smith, represented the Waltham Watch Co. The exhibit consisted of a display of 1,000 high grade watches, complete gold watches of colonial series model, an exhibition of jewels and jewel slabs in the rough in different stages of completion and finish and an attractive showing of silver, gold and metal dials, the fashionable feature on high grade foreign watches, now being applied by the Waltham Watch Co.

The Winthrop Mfg. Co. was represented by C. D. Petty, who showed to excellent advantage a complete line of hat pins, sash and tie pin and fobs, all of Oriental design. These goods were very handsome.

The most costly display in the exhibit hall was made by Powers & Mayer, of New York, with F. C. Kopf and Eugene F. Corwin in charge. Too much cannot be said for the display of gems which this firm sent to the convention. Diamond necklaces, corsages, tiaras, rings, brooches, Mary Garden barrettes, all contributed to the attractiveness of this booth. Worthy of mention was a magnificent and costly strand of pearls, forming a necklace. A display seldom seen were the emeralds, rubies, cashmere and star sapphires, cat's-eye and black opal matrix, all combined with diamonds in special, original and artistic designs. These were in rings, brooches, pendants, all beautiful to the eye. A 13-strand pearl collar with diamond clusters, also a diamond collar of exquisite workmanship, with six bunches of pearl grapes arranged at intervals, were two of the handsomest pieces shown. The enamel work, which is a new specialty with Powers & Mayer, was displayed in a ring, the background being blue enamel, surrounded by diamonds with diamond settings. A large vase of roses was in the center of the display.

Alfred Clark, representing the Oneida Community, Ltd., made a splendid showing of many large chests and several small chests of silver-plated ware in the new pattern of Louis XVI., Wildwood and classic, a large chest of the Flower-de-Luce design being also on display. Cut flowers added to the display.

The Juergens & Andersen Co. was represented by Albert H. Kolker and F. T. Lotz. While not making a large display the quality was such that

it more than made up for the quantity of articles. A medium-size case held thousands of dollars worth of rare gems, beautiful in every detail. Especially beautiful were the combination of cluster diamonds and ruby and diamond and emerald rings, diamond velvet collars and brooches with diamond drops. Among several large pieces was a La Valliere of graduated stones, the center stone in the pendant mounting weighing 11 carats and containing a 12-carat pear-shaped, coffee-colored diamond, the only one of its kind and weight known. Another La Valliere shown consisted of a canary diamond surrounded by a wreath of white diamonds. A novelty in an engagement ring displayed by this firm was a diamond heart within a heart, with a pear-shaped diamond and pearl combination, a diamond bow knot completing the upper portion. A fine line of Masonic jewels were shown, together with an assortment of loose gems.

This display of the Omaha Crockery Co., represented by Geo. H. Miller and Frank R. Graham, attracted a great deal of attention. It consisted of choice pieces of Italian hand-painted china, Japanese hand-decorated ware and a variety of all

Wytęgan, showing their usual attractive line.

Delegates to the National Jewelers' Convention.

J. P. Archibald, Blairsville, Pa.; Mack A. Hurlbut, Ft. Dodge, Ia.; C. H. William, Condon, Ore.; S. Callison, Dexter, Ia.; A. E. Paegel, Minneapolis, Minn.; Claud Wheeler, Columbia, Mo.; Herman Oberreich, La Porte, Ind.; F. D. Ansmore, St. Marys, O.; A. L. Thoma, Piqua, O.; H. E. Rakeman, Sapulpa, Okla.; C. Z. Rowe, Argos, Ind.; J. R. Stebbins, Ashtabula, O.; A. B. Hull, Belding, Mich.; C. H. Reideman and wife, Vinita, Okla.; Wm. Cohen, Minneapolis, Minn.; Anderson Blauton, Paris, Mo.; H. L. Rains, Marysville, Mo.; M. Miesch, Muskegea, Ark.; Sandy Mackay, West Branch, Mich.; Chas. F. Artes, Evansville, Ind.; W. L. Jones and wife, Martinsburg, W. Va.; A. E. Barker, Minneapolis, Minn.; C. A. Mauch, Marshall, Mo.; J. J. Brown, Jr., and wife, Blackwell, Okla.; J. L. Borsheim, Omaha; Geo. Gardner, Pawhuske, Okla.; Jos. Mazer and wife, McAlester, Okla.; John Harris, Trenton, N. J.; Richard Wieling, Peoria, Ill.; E. A. Shepard and wife, Oakland, Ia.; Geo.

EXHIBIT MADE DURING THE CONVENTION BY THE ROCKFORD WATCH CO., ROCKFORD, ILL.

kinds of decorated china. A new cutting in the glass ware of daisy pattern was greatly admired, as also was the grape etching.

J. H. Stouffer & Co., represented by E. E. Adkins, exhibited an exquisite line of hand-painted china. Plates, cups and saucers, vases, punch bowls and many novelties made one of the swellest showings at the convention. A line of raised paste gold work in the poppy design in tankards and different pieces attracted many an eye, and the display was considered one of the largest and most beautiful shown.

C. B. Norton was represented by Mr. Morgan. W. A. Pickard was represented by Al Bruckner. The booth contained a choice line of hand-painted china.

The Eisenstadt Mfg. Co. was represented by Nelson Hagnauer and Mr. Freide. The large room was devoted exclusively to a large assortment of jewelry, watches and diamonds, this being the only exclusive line of jewelry made at the convention. Cut flowers were given away Wednesday evening.

The C. F. Monroe Co. was represented by A. M. Brinckle and Joe Knoblauch. A beautiful line of cut glass, solid brass, sterling silver and nacara was shown.

Burley & Tyrrell, represented by F. W. Primrose and Geo. Turner, displayed an artistic line of Copeland china, together with a large assortment of cut glass, Quezal ware and Donath hand-painted china.

R. E. Williams and Mr. Richards were in charge of the St. Louis Silver Co., and made a magnificent showing.

White, Wile & Warner were represented by Ben Levy, showing a fine line of rings.

S. O. Bigney & Co. was represented by Carl

Notes of the Convention.

Mr. Weibezahn was there for Bigney. He was as modest as usual.

Carlos Hoefler came back from the Yellowstone Park to attend the convention. Carlos is an authority on wooden shoes.

Max Egge is hereditary sergeant-at-arms for the A. N. R. J. A.

If any one can beat Paegel, of Minnesota, in answering a mayor's welcoming letter let him step up.

There was music before each session, and it was enjoyed by all.

Mr. Combs, Omaha, was down for an address on horology. He was too busy to make it. He said he knew more about *way* than horology.

Guy V. Dickinson, of the National Watch Co., was the coolest looking man in the convention.

Mr. Pierik, of Springfield, is like Mr. Bigney, only the former uses two fingers instead of one.

Mr. Stebbins, of Ohio, suggested that every visitor buy souvenir postal cards and send them to the absent jewelers in their home town, asking why they didn't come to the meeting. It was a good idea and every one did.

Harry Lyman carried off the honors of the convention by making an exceptionally fine address. It was published in full in last week's issue of THE JEWELERS' CIRCULAR-WEEKLY.

Chulius Armbruster was here from Springfield, Ill.

Maximilian Ellbogen, of the Stein & Ellbogen Co., was an interested listener all through the convention.

Mr. Williams, of Oregon, thinks it a good idea to take the national convention group photograph to the State convention and show it to the jewelers who did not come to the national convention.

Jack Dunn, with Austin & Stone, ate all the cantaloupes in Omaha.

Eli Gutman was present with his flannel yachting suit.

"Cho" Mazer was the hero of Oklahoma.

Frank Lotz and Al. Kolker did the honors for the Juergens & Andersen Co.

J. P. Holliday was chairman of the Banquet Committee. It was hard work, and he didn't have a holiday.

C. E. Kendall, representing Richter & Phillips, made an attractive display of jewelry, watches and silver.

The New York Standard Watch Co. was represented by H. W. Hedge, who made a special showing of Excelsior watches, sold to jewelers exclusively.

Ex-Treasurer Bernau, who is absent in Europe, was authorized to send greetings of the A. N. R. J. A. to the German Watchmakers' Society, before whom he will shortly appear.

The Commercial Club of Omaha gave every visitor a ticket entitling him to the privileges of the club.

The Elks entertained many jewelers on Friday night. Non-members of the Elks were just as welcome as members.

When Mr. Williams, of Oregon, made the nominating address for Joe Mazer, of Oklahoma, he concluded without telling who his candidate was, and when Mack Hurlbut seconded the nomination he referred to Mazer as Mr. Joseph McAlister, of Oklahoma. Mr. Mazer is a retail jeweler of McAlister.

Col. John L. Shepard was there with a bunch of good stories.

Bert Hull carried away the palm for Detroit, next year, but Stebins and Thoma tried nobly for Cedar Point.

Herman Oberreich, La Porte, Ind., announced that he had formed a local jewelers' club in La Porte and had secured as members all of the eight jewelers in that town.

No report of this convention could be complete without mentioning Chas. Artes, Evansville, Ind., one of the finest old jewelry merchants one could ever meet.

Fred Hyatt wore a beautiful corn-colored kimono on Wednesday.

Mr. Combs, Omaha, was the busiest man on earth during the convention.

Mr. Schlitz was there with a blue kalsomine shirt.

GORHAM SILVER

TO THE JEWELRY TRADE

¶ Attention is respectfully invited to the fact that the Gorham Company's traveling representatives have already resumed their customary activities in introducing to the Jewelry Trade the many original and exclusive novelties as well as the standard lines of silverware which have been prepared by the Gorham artificers for the approaching Fall and Holiday Seasons.

¶ In view of the period of approaching prosperity it seems pertinent to suggest to the progressive jeweler the advantage he will gain by a careful examination of his stock so as to arrive at a speedy and discreet decision as to the directions in which it needs replenishing. Orders given now will be shipped whenever required.

The Tariff Law and the Jewelry Trade.

THE revival of trade which began some time ago and continued even with the tariff under discussion has now no obstacle to oppose its full progress. The tariff bill, which caused some hesitancy on the part of manufacturers, importers and buyers, has become a law, and business can now adjust itself to the new schedules and go ahead without any uncertainty as to the future so far as the customs duties and their effect upon prices are concerned. All the provisions of the tariff affecting jewelry and kindred interests, as amended by the Conference Committee, were published in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, and these appear in the law without any change. The jewelry and kindred trades as a whole are little affected by the new rates—less so than almost any other line of industry. The diamond and precious stone, as well as the solid gold jewelry, schedules remain the same as under the old law. The importers of imitation and artificial precious stones have been granted the duty for which they contended, although the paragraph is badly worded. The paragraph affecting plated jewelry and jewelry made of silver, German silver or white metal is the same as submitted by the American manufacturers. The branch of the trade most affected is the watch and clock industry, but the provisions of the Payne law seem to be more generally acceptable to the manufacturers in this country than was the Dingley law, without seriously affecting the importers, the only marked change in duty being on the very lowest grades.

The new law probably comes nearer to satisfying the various and conflicting interests in the jewelry and kindred trades than any tariff which has preceded it.

Record Month for Precious Stone Imports.

THE importations of gems at the port of New York during the month of July just passed broke all previous records of the Customs House, and established new figures which will probably be unequalled for many months to come. Importations of precious stones for the month of June were above the normal, and created considerable comment, both in and out of the trade, as an encouraging sign of returning prosperity, but according to the report received from the Customs House for the month of July the June record shows poor, in comparison.

According to the statistics compiled for the Treasury Department the gems which passed through the appraisers' stores last month amounted in all to the enormous sum of \$5,112,957, which was nearly five times the amount imported during the corresponding month a year ago, and over \$654,000 more than the importations in July, 1907. Of the total last month cut precious stones and pearls were valued at \$3,843,921, and uncut stones, principally diamonds, amounted to \$1,269,035. As compared with these figures, the value of cut precious stones and pearls imported during July, 1908, was \$1,101,842, while the uncut stones dropped to \$144,414.

The fact that all records for the im-

portation of precious stones have been broken during the past month would seem to indicate that there is a healthy demand for diamonds, and that the importers have confidence in the returning prosperity. The uncertainty that existed as to the outcome of the discussion regarding the duty on diamonds undoubtedly was a determining factor in the unprecedented total for the month of July, for many importers, fearing that an additional duty of 5 per cent. on cut stones and a duty of 5 per cent. on the rough would be enacted in the new tariff law, decided to import in larger quantities before the tariff might be changed, but even making allowances for the effect the tariff uncertainty had upon the importations, the figures are most encouraging. As the Payne tariff law makes no changes in the duties on diamonds and precious stones, the diamond importers and cutters in this country are well pleased.

Failures Show a Gratifying Decrease.

THERE is much encouragement in the reports of commercial failures in the United States for the month of July, the total liabilities of all the commercial failures being less than in any corresponding month since 1906, and the smallest, in fact, of any month since March, 1907. In only six of the months since 1905 does the total of liabilities appear less than in July of this year. The figures as compiled by *Dun's Review* show that last month there were 1,105 failures, with total liabilities of \$9,527,893, as against 1,232 failures, with liabilities of \$14,222,126, in July, 1908. In July, 1907, although the number of failures, 777, were considerably less than in July of this year, the liabilities, \$12,334,710, exceeded those of last month by nearly \$3,000,000.

In the jewelry trade the figures are equally encouraging. During last July there were 20 failures, with liabilities of \$95,057, as compared with 21 failures and liabilities of \$183,697 for July, 1908. The liabilities of all the failures in the jewelry trade during July were over \$9,000 less than for the preceding month.

A New State Trade Mark Law.

IT is not generally known that in addition to the many criminal laws relating to the subject of trade-marks which have been adopted by the State of New York this Commonwealth recently enacted a new statute which was signed by Governor Hughes a short time ago. The bill puts into the general business law of the State a chapter known as 367, which practically provides for the registration of trade-marks in this State by individuals or concerns manufacturing, packing, bottling or selling merchandise which is put up in a package or other receptacle bearing his or its name, label or private mark; such manufacturers may file their mark in the office of the Secretary of State and the office of the clerk of the county wherein the business is situated, with the description of the same as used, and the Secretary of State shall deliver to the person or corporation so filing a certificate of the record of such label or trade-mark. Certain provisions are made about publishing the mark once a week in

TRADE

MARK

PERHAPS WE ARE TIRESEMELY PERSISTENT IN DWELLING ON THE INTEGRITY OF KIRBY JEWELRY. HOWEVER, WE FEEL THAT IN AN ERA OF COMMERCIAL SUBSTITUTION AND MISREPRESENTATION THE ABSOLUTE HONESTY OF KIRBY PRODUCTS CANNOT BE TOO INSISTENTLY OR TOO FREQUENTLY BROUGHT TO THE ATTENTION OF THE TRADE. OUR UNIMPEACHABLE RECORD AS MANUFACTURERS OF THOROUGHLY GOOD, ARTISTIC AND INEXPENSIVE GOLD JEWELRY SHOULD CREATE IN THE SKEPTICAL AN ASSURANCE OF FAIR TREATMENT AND A CURIOSITY TO SEE THE KIRBY LINE.

a newspaper of the county, and after complying with this the act provides that the certificate of the Secretary of State shall be *prima facie* evidence of the ownership and use of any such label or mark as is described, in any action under the statutes of New York State where proof of such ownership and use is necessary.

The statute provides that the Secretary of State shall not register a mark or label that is identical, or so similar to another label or trade-mark already registered as would be calculated to deceive the buyer into believing that they were the same, but according to the statute the priority of registration will not avail if the Secretary of State is convinced that the later applicant was the earlier user.

Where receptacles for merchandise bear a trade-mark registered under this statute no person other than the proprietor of the trade-mark is permitted to keep or offer for sale in such receptacle any article or substitute other than the original contents of the receptacle which had been placed therein by the proprietor of the trade-mark.

There are many clauses of the statute which apply to particular lines of merchandise, such as fluids sold in bottles, etc., that afford especial protection to such manufacturers and owners of marks and labels, but in addition to these the general provisions of the act are such that it might be worth the while of manufacturers in any line wherein the trade-mark is an important element of protection to the dealer and public to look into this statute and see if they can obtain additional protection or facilities to aid them in future litigation, by taking advantage of the registration features of the act.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended Aug. 7, 1909.

The U. S. Assay Office reports:
Gold bars exchanged for gold coin...\$391,662.79
Gold bars paid depositors..... 63,959.13

Total\$455,621.92

Of this the gold bars exchanged for gold coin are reported as follows:

Aug. 2.....	\$51,777.76
" 3.....	92,776.44
" 4.....	79,852.89
" 5.....	87,633.74
" 6.....	69,164.96
" 7.....	10,457.00

Total\$391,662.79

Market Prices for Silver Bars.

" 7.....	23 1/2	.52 7/8
" 9.....	23 1/2	.52 7/8

Frederick Kaufhold, until recently located at 457 Locust St., Columbia, Pa., has leased larger quarters for his business two doors above his former store. The new premises have been thoroughly renovated and adapted to the jeweler's use.

New York Notes.

Fred A. Jeanne, Paris, sailed for this city on the *New York*, Aug. 7.

C. D. Lyons, of the C. D. Lyons Co., Mansfield, Mass., was a caller in town last week.

I. Kohn, of Hertzfelder & Kohn, 6 Maiden Lane, returned, last week, from Europe on the *Teutonic*.

Leo M. Sachs, 7 Maiden Lane, returned recently on the *Rotterdam* after a 10 weeks' trip to the European diamond markets.

Lee Reichman, of Reichman Bros., 65 Nassau St., will return this week on the *Lusitania* from the European diamond markets.

W. H. Ingersoll, of Robt. Ingersoll & Bro., was one of the speakers at the recent convention of the A. N. R. J. A. in Omaha, Neb.

J. Bochner, of J. Bochner & Co., Antwerp and New York, will be home Aug. 16 on the *Vaderland* with a large importation of diamonds.

W. G. Rattey, formerly of the Whiting Mfg. Co., will, in future, represent the Hagerstrom Co., Newark, N. J., in this city and in the east.

D. Gutter, who retired from business about six years ago, has opened an establishment at 98 Bowery and will do a jewelry business together with his son, R. R. Gutter.

George M. Gaw, formerly with Moser & Whyte, 15 Maiden Lane, has accepted a position with R. A. Breidenbach, 51 Maiden Lane. He started out Monday for a trip in the west.

The first meeting of the creditors of the American Art Metal Novelty Co. will be held at the office of Seaman Miller, 2 Reece St., Aug. 19, at 12 o'clock, at which time a trustee will be elected.

A *lazalliere* pendant, valued at about \$100, was lost between 68 and 71 Nassau St., on Monday afternoon, about three o'clock. It was set with 28 white and four yellow diamonds. It was later found and returned.

The Gem Jewelry Co., Manhattan, has been incorporated to manufacture jewelry ornaments, etc., with a capital of \$25,000. The incorporators are: E. J. Forham, F. M. Browne and J. J. Harper, all of New York.

E. R. Lederer, of the S. & B. Lederer Co., is at present in Europe on a trip in which he is combining business and pleasure. F. M. Ellis, representing the same firm, is camping with his family on Staten Island.

Crichton Bros., gold and silversmiths, Bond St., London, have leased a store in the new building at the southwest corner of 51st St. and Fifth Ave., where they will open a branch. The lease extends for a long term of years.

Van Moppes & Son, 87 Nassau St., have on exhibition a black brilliant diamond which weighs $2\frac{3}{4} + 1/32$. The stone in the rough weighed over $6\frac{3}{4}$ carats and is one of the largest black diamonds that has been brought into this city.

The Bergman Mfg. Jewelry Co. has been incorporated under the laws of the State of New York, with a capital of \$1,000. The incorporators are: Morris P. Joachin, Brooklyn; Harry Weinberger, New York, and Lena Bergman, New York.

There has been on exhibition during the past week at the Broadway salesrooms of the L. E. Waterman Co. a composite photograph of the national bank presidents of Greater New York. The composite photograph is surrounded by the photographs of the 51 bank presidents from which it was made.

George M. Kite, formerly of the W. C. Penfold Co., of New York and Philadelphia, has joined the selling force of M. J. Averbeck, 10 Maiden Lane. Mr. Kite is well known throughout Pennsylvania, Virginia and West Virginia, where he has represented two well known watch concerns in the past.

Among the out-of-town buyers in this city, last week, were: Miss M. Berry, jewelry buyer for Younger Bros., Des Moines, Ia.; Miss Baer, jewelry buyer for Halle Bros. Co., Cleveland, O.; E. L. Chamberland, buyer of leather goods, jewelry and silverware for the Jones Dry Goods Co., Kansas City, Mo.

Sam Newman, formerly with the L. Bauman Jewelry Co., St. Louis, Mo., and with Loftis Bros. & Co., Chicago, has made connections with B. Hyman & Co., 2 Maiden Lane, as a traveling salesman, and will cover all of the eastern and middle western States. Mr. Newman will start out shortly with a complete and well selected stock of loose diamonds.

Judge Hough, in the United States District Court, last week, granted a discharge in bankruptcy to Isaac Lindo, of Lindo Bros., who were formerly in the jewelry business at 1157 Broadway. The liabilities are \$31,808. According to the schedules in bankruptcy filed by the firm some time ago the nominal assets were placed at \$55,440, but this included life insurance policies. The business was established over 25 years ago. The bankruptcy petition was precipitated by a judgment obtained against the firm by the Erie Railroad Co. for \$1,077 for rent, under which a deputy sheriff made a levy on their stock of jewelry to cover the amount of the execution.

Orders were signed by Judge Hough, last week, in the United States District Court whereby two consignments of jewelry, which were seized some time ago on reaching this country, will be turned over to the United States marshal for public sale. On April 29, 1909, two customs inspectors seized a jeweled bracelet broken in two pieces, which was imported by Joseph Madriaga, on April 24, and found in his baggage. The other consignment consisted of a jeweled collar imported by Celso del Villar on the same date on the *Moro Castle*. Libels of information were filed by District Attorney Wise, asking that the goods be condemned by decree of forfeiture and the proceeds distributed according to law.

Creditors are notified that there will be a first meeting of the creditors of Retter & Rosenbaum at the office of Stanley W. Dexter, referee in bankruptcy, 71 Broadway, Aug. 19, at 11.30 o'clock, at which time creditors may appoint a trustee and transact other business. Retter & Rosenbaum were formerly in business at 266 Bowery and were adjudicated bankrupts on July 26. According to the schedules, which were filed last week, the liabilities are \$3,157 on unse-

cured claims and the assets are \$725, which includes stock \$400, machinery and tools \$200 and debts on open accounts \$25. Judge Hand appointed Joseph W. Spencer receiver in bankruptcy after the filing of an involuntary petition in bankruptcy on July 19.

Much interest is being shown by the New York jobbers of jewelry and kindred lines in the matter of reduced railroad rates from southern, western and southwestern points. They are working in conjunction with the Merchants' Association of New York to encourage retail jewelers to visit New York and buy their goods for the Fall and holiday trade here. The reduced rates are in effect now and will be until the middle of September, good for the return trip till about the middle of October. The out-of-town jeweler, by taking advantage of the reduced fares to New York, can combine business with pleasure and spend a most enjoyable sojourn in the metropolis. The newest novelties in any line are to be found in New York, and, while the opportunity is offered to buy the most desirable goods to be obtained, at the same time the visitor can see the sights of the city.

The Board of United States General Appraisers decided last week that free admission of articles accompanying American tourists is contingent upon the entry of the goods at the same time that the domestic purchaser returns to this country with the merchandise. The question came up on the protest of William Marshall Bullitt against the assessment of duty by the surveyor of customs at Louisville, Ky. Mr. Bullitt returned from Europe, Sept. 12 of last year. At that time he declared that on a later steamer he expected to have certain jewelry follow, the value of which was duly stated. General Appraiser Hay, who writes the decision for the Board, says that in order to secure free entry of goods purchased abroad such articles must accompany the returning resident, except where there is proof that they were accidentally left behind. The appeal of the importer was overruled and the contention of the Government upheld.

James Howard was arrested last week in W. 46th St., as a fugitive from Canadian justice. He is said to be one of four men who robbed an Ottawa jewelry store of a tray of 100 diamond rings, valued at \$6,000. The robbery took place in July, and Chief Dilarond asked the aid of the New York police. Howard was locked up at headquarters. He said he lived at 326 W. 43d St., was 31 years old, and an electrician. Detective O'Farrell says his picture is in the Rogues' Gallery. The three other men alleged to have been concerned in the robbery of the diamonds were arrested in Ottawa. They are "Al" Blair, alias "Chicago Al"; Thomas Malone, known also as Smithy, and James Holden, alias "Cocky" Holden. A despatch from Ottawa stated these men had told where they had hidden the diamonds in the reservoir tank in the lavatory of a hotel. Blair and Malone were sentenced to one year's imprisonment, after pleading guilty, and Holden was turned over to the authorities of the State of New Jersey. He is said to have fled from that

SAFE DEPOSIT VAULTS

New York Notes.

(Continued from page 89.)

State while under bail for a still more serious offense.

Mr Meade, traveler for the South Bend Watch Co., called on New York friends, last week.

Harry Rabinovich has purchased the business formerly conducted by J. E. Kahn at 155 W. 27th St.

Ralph Hloxie, with Mason-Howard Co., 180 Broadway, started late, last week, for a western business trip.

Moser Bros. have been succeeded by Louis A Moser, who has liquidated the indebtedness of the old firm.

Louis Hausmann, New Orleans, La., sailed from this city, recently, for a two months' vacation in Europe.

Leon Simons, traveler for the C. D. Lyons Co., returned to New York, last week, from a trip in the middle west.

Christian Klee, pattern-maker for the R. F. Simmons Co., Attleboro, Mass., was in town, last week, after new ideas.

Stephen Schaefer, a resident of Rio de Janeiro, will represent two watch concerns in Brazil. He was in town, last week.

C. A. Wangh, of the John Bolland Jewelry Co., St. Louis, Mo., sailed for Europe, from this city, Monday, for a six weeks' vacation.

Otto Bailer, of the Bailer Mfg. Co., Memphis, Tenn., and R. Brandt, Athens, Ga., were visitors at the offices of THE JEWELERS' CIRCULAR-WEEKLY, last week.

The Crown Order of the Second Class was conferred on Sir Caspar Purdon Clarke, director of the Metropolitan Museum of Art, Monday, by the German Kaiser.

R. A. Talbot, in charge of the Alvin Mfg. Co.'s local offices, attended the convention of the American National Retail Jewelers' Association at Omaha, Nebr., last week.

L. Lechenger, manufacturing jeweler, Houston, Tex., was a visitor at the office of THE JEWELERS' CIRCULAR-WEEKLY on Monday, and expects to sail for Europe shortly.

Charles Feldenheimer, of the firm of A. & C. Feldenheimer, Portland, Ore., is among the out-of-town visitors in this city. He is making his headquarters with his brother, Louis Feldenheimer, at 41 Maiden Lane.

M. J. Edmonds, North Topeka, Kans., who is spending some time in New York, was a caller at the offices of the JEWELERS' CIRCULAR-WEEKLY Monday. He reports an optimistic feeling in the trade in the west.

Among the out-of-town jewelers in this city, last week, were: Joseph Batchelder, Boston, Mass.; Mr. Sheff, of Sheff Bros., Wheeling, W. Va.; J. A. Baird, jewelry buyer for Kline Bros., Altoona, Pa.; John P. Mullally, Indianapolis, Ind., and Frederick W. Droster, president of the Frederick W. Droster Jewelry Co., St. Louis.

Among the eastern manufacturers who were in the Maiden Lane district, last week, were: Chas. A. Whiting, of Whiting & Davis, Plainville, Mass.; Fred S. Gilbert, of F. S. Gilbert, North Attleboro, Mass.; Jos. Swift, of Furbish, Swift & Fisher, North Attleboro, Mass., and Henry Curtis, of H. H. Curtis Co., North Attleboro, Mass.

Miss Eleanor Beattie, who is accused of

having obtained from the Gorham Co. a considerable quantity of goods under false representations and who departed for Europe and was there arrested, was before Magistrate Albert D. Rutzen on Friday in London, the third time, for a hearing, and the case was again adjourned because of the non-arrival from Newark of a deposition of one Anderson, which is deemed essential in the prosecution.

A passenger on the Red Star liner *Lapland*, which reached her pier from Antwerp Sunday night, was detected by a customs inspector with a small package in his possession. He was ordered back on the steamship and there searched. In a pocketbook the man carried were found six diamond rings valued at about \$100 each. In another pocket were found other rings, and about the man's legs were strings from which hung a number of coral necklaces. The goods were seized and the passenger will have to explain why he did not declare them.

On exhibition in a show window in the store of the Julius King Optical Co., 12 Maiden Lane, is the baseball trophy won by the Jewelers' 24-Karat Club, of New York City, at the annual outing, July 31. The cup is offered as a prize at the annual games of the Jewelers' 24-Karat Club and the Philadelphia Jewelers' Club. The game at the outing this year was the first of a series of three games for the possession of the cup, and was won by the New York jewelers. The cup is of silver and is surmounted by baseball bats, a ball, etc. About the body of the cup are 24 carrots in enamel work.

George E. Fahys, of Joseph Fahys & Co., 54 Maiden Lane, starts, Saturday, for Massachusetts for the series of war maneuvers which are to take place there. Mr. Fahys is first lieutenant and adjutant of Squadron A, a star New York cavalry regiment, and has charge of a large mass of the detail work in connection with the squadron. Frank A. Beckwith, with the same firm, is spending a vacation on the eastern end of Long Island, and is doing considerable fishing in and around Block Island. Frank S. Sherry, manager of the Boston office of Joseph Fahys & Co., was in town, last week, for a few days. Lee Flemming, road representative for the same concern, has started on his western trip, and will not return until the latter part of September.

Wedgwood earthen ware came in Monday for advances in value, as the result of an investigation conducted by Eugene G. Hay, of the Board of United States General Appraisers. It appears that Wedgwood & Co., Ltd., of Tunstall, England, invoiced crown royal blue ariel plates and teacups and saucers at prices deemed too low by the local appraising officials. The Appraiser of the Port held that plates invoiced as having a value of 1s. 1d. per dozen should have been set down as 2s. 9d., and duty at the rate of 60 per cent. collected on the value of the importation. The tea plates entered as worth 1s. 6¹/₂d. a dozen were advanced by the local Appraiser to 3s. 8d. per dozen. Other goods are also advanced. General Appraiser Hay in his decision affirms the finding of the Appraiser of the Port that the merchandise in question was undervalued.

The police of Bobrinsk, Russia, have arrested Shender-Taneiser, said to be a former salesman of a New York jewelry firm, who is wanted by the New York police in connection with the robbery from the firm of jewels worth a large sum. Shender-Taneiser was taken into custody for passing Russian counterfeit money, and an examination disclosed his identity. He is said to have disposed of the stolen property partly in Germany and partly in Russia. The prisoner admits having had dealings with the firm in question, but says he was never employed by them. At police headquarters nothing was known of the case. Nor did the Pinkerton Detective Agency know anything of Shender-Taneiser. The District Attorney's office was closed the afternoon when the cable arrived, so nothing could be learned there. At the office of F. W. Sackett, wholesale jeweler, 59 Maiden Lane, whose name was mentioned as possibly being the firm from whom the goods were obtained, it was said that Mr. Sackett was out of town and that nothing about the matter was known by those in charge of the office.

Importations at the Port of New York.

H. H. Hanson has opened a store at 412 Front St., Moorhead, Minn., in the same location in which his father formerly conducted business.

A. G. Prouty, 30-32 Main St., Napa, Cal., is distributing an attractive folder containing numerous views of Napa. On the back cover of the folder is the view of the interior of the jeweler's store. The front cover bears the inscription: "If you want to live, live in Napa."

George A. Klein and Ed. M. Klein, who have been well known in the retail jewelry business in Muncie, Ind., for several years past, have opened commodious offices at 212-213 Wyszor Block, in the same town, where they will carry on a jobbing business in the future. They intend to carry a complete line of solid gold and plated jewelry. It is their intention to cover the western territory especially.

Referee in Bankruptcy Recommends That M. C. Dreschfield be Adjudicated a Bankrupt.

Peter B. Olney, referee in bankruptcy, to whom as Special Master were referred the issues raised by the petition in involuntary bankruptcy filed May 11, 1908, against Maurice C. Dreschfield, a precious stone broker of New York, by Rudolph A. Breidenbach, 51 Maiden Lane, N. Y., and others, has submitted a report to the Judges of the United States District Court, New York, in which he recommends that Mr. Dreschfield be adjudicated a bankrupt.

At the time that the petition in involuntary bankruptcy was filed against Maurice Dreschfield, a petition was also filed against George H. Carpenter, with whom it was alleged Mr. Dreschfield was connected in obtaining from Rudolph A. Breidenbach, a gem dealer, diamonds valued at over \$173,000, under circumstances which did not meet with the approval of the jewel merchant. The specific allegations were that Dreschfield, while insolvent, and within four months preceding the filing of the petition, transferred \$173,103 worth of diamonds with intent to hinder, delay and defraud his creditors. The answer to the petition denied the commission of the act of bankruptcy, but did not deny the allegation of insolvency.

In his report on the case Special Master Olney says: "The proofs show that Dreschfield, between Aug. 1 and Dec. 30, 1907, had various dealings with Breidenbach and that during this period Breidenbach delivered to Dreschfield, diamonds of the invoice value of over \$180,000. Some of these diamonds appear to have been delivered by Breidenbach to Dreschfield on memorandum and afterwards bills for the diamonds delivered, made out against Dreschfield, were presented by Breidenbach to the alleged bankrupt.

"Dreschfield claims that he acted in this transaction as the agent of one George H. Carpenter. It appears that notes of Carpenter, endorsed by Dreschfield, were given for the invoice prices of some of the diamonds. Dreschfield seems to have given his own notes for part of the diamonds.

"A review of the evidence leads me to the conclusion that Breidenbach sold and delivered the diamonds to Dreschfield, thus giving him the title. The evidence would also justify the conclusion that Dreschfield was buying for Carpenter as well as for himself, but the form of the invoices and the fact that the goods were actually delivered to Dreschfield by Breidenbach indicates the sale in the first instance to Dreschfield."

The report then reviews the pledging of different portions of the diamonds with various pawnbrokers in a number of cities.

In conclusion, the referee says: "I further find that other transfers of diamonds made prior to Dec. 14, as hereinbefore set forth, were made with the intent on the part of the alleged bankrupt to hinder, delay and defraud his creditors. I find therefore that the acts of bankruptcy charged have been proven and recommend that Maurice C. Dreschfield be adjudicated a bankrupt."

The report follows a long-drawn-out

National Monthly Import and Export Statistics.

WASHINGTON, D. C., Aug. 5.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade, for June, 1908 and 1909, and for the 12 months ending June, 1909:

series of examinations during which time a large amount of testimony was taken. The petitioning and other creditors were

represented by Sol Oppenheimer. Schedules in bankruptcy were filed by George H. Carpenter a short time ago.

THE sales of Illinois watches for the month of July, 1909, were larger than any previous month in the history of the company—this is the best evidence that the retail jeweler is pushing the sale of Illinois movements because they give his customers the best satisfaction.

The established selling prices on these movements insure him a satisfactory margin of profit.

Sufficient orders are now entered for future delivery to justify the prediction that there will be a great shortage of Illinois movements this Fall.

We suggest the advisability of dealers placing their orders with our jobbers at once.

VOL. LIX.

CHICAGO, WEDNESDAY, AUGUST 11, 1909.

No. 2.

Chicago Notes.

John Hillinger, of R. J. Hillinger & Co., is making a Pacific coast trip.

M. J. Motsinger, Rector, Ark., is taking a three-weeks' course in optics in this city.

Frank Judson, of A. Judson & Co., has just returned from an outing at Fox Lake.

Wm. LaRue, silver buyer for C. D. Peacock, is taking a vacation in western New York.

Edward Winheim, city manager for Reed & Barton, is spending his vacation in Wisconsin.

P. B. Kehr, traveler for the Chicago office of Reed & Barton, left last week on a northwest trip.

A. M. Chadbourne, manager of the local office of James E. Blake Co., has returned from a visit to the factory.

A. T. Westlake, Peoria, Ill., dean of the Bradley Polytechnic Institute of that city, was a recent visitor in Chicago.

W. S. Gilmore, with the Chicago office of the Towle Mfg. Co., is taking a vacation with his family at Breedsville, Mich.

J. M. Tuttle and Charles H. Ruhman, buyers for Hyman, Berg & Co., have returned from a visit to eastern factories.

Leo H. Ludwig, of the Edwards & Sloane Jewelry Co., Kansas City, Mo., was a recent visitor in Chicago, after a trip east.

F. R. Appleton, of Robbins & Appleton, New York, was a recent visitor at the Chicago office, on his way to the exposition at Seattle.

Mr. Bitterman, Jr., of Bitterman Bros., Evansville, Ind., was a recent visitor in Chicago, on his way to an outing at Frankfort, Mich.

J. W. Stoneburner, representing C. H. Allen & Co., is making a middle west trip, as is also F. D. White, who represents C. O. Sweet & Co.

M. C. Eppenstein, of the Illinois Watch Case Co., accompanied by his wife, is making a tour of Wisconsin Summer resorts in his automobile.

G. F. Sherwood, manager of the Wm. L. Gilbert Clock Co., accompanied by Mrs. Sherwood, is taking a vacation at Atlantic City and New York.

G. William Sell, of Krantz, Smith & Co., Honesdale, Pa., visited the Chicago office last week, while on his way to the Seattle exposition and the Pacific coast.

J. B. Johnson, Goodland, Ind., has sold his store at that place to C. F. McKee and bought out W. F. Laraway, Glenwood, Ia.

Mr. Laraway will locate at Eugene, Ore., about Oct. 1.

C. H. Knights, of C. H. Knights-Thearle Co., has just returned from a two-weeks' visit to his sister at his old home town of Brattleboro, Vt., also to Boston and other eastern points.

B. A. Ballou & Co., Providence, R. I., have recently opened an office at Room 601 Columbus Memorial building. C. E. Petit is in charge. Mr. Petit, who was only recently married, will make his home in Chicago.

Chas. J. Jacobs, of the Knickerbocker Silver Co., left, last week, for a few weeks at the factory at Port Jervis, N. Y., and eastern points. J. L. Gross, of the same company, who returned recently from a coast trip, is also on a visit to the factory.

The following were recent Chicago visitors: S. B. Turner, Cassopolis, Mich.; T. P. Owen and wife, York, Nebr.; J. W. Hicks, St. John Mich.; A. M. Winchell, Avon, Ill.; R. A. Woodward, Sandwich, Ill.; Hugh M. Ewan, Fond du Lac, Wis.; J. W. Buchanan, Benton Ill.; Frank G. Ward, Anadarko, Okla.; G. William Stolz, Saginaw, Mich.; C. E. Hurd, of Hard & Diller, Sycamore, Ill.; J. B. Ferguson, Princeville, Ill.; E. L. Thayer, Rockford, Ill.; George Olin, of Olin & Olsen, Janesville, Wis.; Mr. Emerich, of Emerich, Barrett & Co., Freeport, Ill.; H. H. Truckenbrod, Mendota, Ill.

Minneapolis and St. Paul.

N. Polson has moved his store from 22 S. 6th St. to 124 Washington Ave., S., Minneapolis.

Mr. Furlong, Montevideo, Minn., Mr. Sullivan, of Sullivan & Dade, Bladuck, Minn., and A. G. Feinberg, Brownton, Minn., were among the retailers in the Twin Cities in the past week.

A. E. Paegel and A. E. Barker, Minneapolis, attended the convention of the American National Retail Jewelers' Association, which met at Omaha, last week, Mr. Paegel being an officer and Mr. Barker a delegate.

T. R. Gentry, while digging a well on his property, eight miles south of Tucumcari, in Quay County, East Las Vegas, N. Mex., recently unearthed a genuine diamond in a bucket of dirt which he took from the excavation. A St. Louis jeweler is reported to have appraised it at \$500.

Cincinnati.

Clarence Loeb, of Herman & Loeb, is in the west, and reports good trade.

John Selbert, Frankfort, Ky., was in the city, last week, buying an automobile.

J. C. Daller, president of the Clemens Oskamp Co., is on an extended business trip.

Wallace Miller, of the Miller Jewelry Co., left, this week, on an extended business trip.

Newton Fox, of Fox Bros. & Co., is on the western coast. Oscar Fox, of the same firm, is in the south.

D. A. Lamb, Wilmington, O., was in the city attending the funeral of Mayor Markbreit as a member of the Loyal Legion.

Mr. Harris, of the Harris & Shafer Co., Washington, D. C., spent the first four days of August in the city, visiting friends.

R. H. Galbreath, for many years connected with the Duhme Jewelry Co., spent the past week in the city looking up old acquaintances.

The following out-of-town jewelers were in the city, last week: J. D. Ward, Rising Sun, Ind.; Frank L. Horning, Brookville, Ind.; E. Israel, Harrison, O.; Abe Art, Zanesville, O.; Jas. C. Fischer, Flemingsburg, Ky.; Mr. Morrow, Lancaster, Ky.; Ed. De Voss, Wilmington, O.; Owen Sherwood, Falmouth, Ky.; J. C. Dutchman, Flemingsburg, Ky., and Mr. and Mrs. Dennis Schram, Jacksonville, Ill.

Special experts were called, Aug. 2, to aid in the valuation of precious stones and jewelry in the stock of the Duhme Co., at its store on 4th St. The experts are assisting the regular appraisers. It will probably be two weeks before they will finish the work. To facilitate the proceedings, Bankruptcy Referee Greve has transferred the hearing and investigation of witnesses from his court room to the Duhme store. If the valuation of the stock, with the assets of the Keck company, is in excess of the liabilities the bankruptcy proceedings will probably be dismissed. Referee Greve expects to have his report ready to hand over to Judge Thompson when the latter returns from Europe, early in September, and it is expected he will render judgment on the case by the middle of that month.

Samuel Z. Bobier, Endicott, N. Y., will move into newly furnished quarters in the Bronson block, on Washington Ave., in September.

St. Louis.

Martin Hacker has returned from a two weeks' trip to Lake McDonald, Mont.

S. Smith, 7 North Broadway, will leave, next week, for a trip to Niagara Falls.

A. J. Lee, secretary and treasurer of the Lee-Kehl Mfg. Co., has gone to Chicago on business.

Ferdinand Gowan, in the employ of Martin Hacker, is spending his vacation in Michigan.

J. J. Burke, of the Brooks Jewelry & Optical Co., has returned from a business trip to Chicago.

A. B. Lerner, of A. R. Brooks & Co., will return, Monday, from a vacation trip to southwest Missouri.

William A. Hecker, of the Drosten Jewelry Co., has returned from a stay of 10 days in the country.

George V. Stieffel, of the Drosten Jewelry Co., left, Monday evening, on a pleasure trip to the north.

Edward O'Conner, of the Mermod, Jacard & King Jewelry Co., is spending his vacation at Benton Harbor, Mich.

F. L. Jaccard, of the Bauman-Massa Jewelry Co., has left for Texas. A. J. Auer has left for Louisiana and Mississippi.

Paul Pautler, of the Brooks Jewelry & Optical Co., will leave, Saturday night, for a 10 days' trip to South Haven, Mich.

A. J. Adank, of the Brooks Jewelry & Optical Co., is spending a two weeks' vacation on a farm near Leavenworth, Kans.

F. W. Hoyt, president of the Hoyt Jewelry Co., will leave in a few days for a business trip through Arkansas and Oklahoma.

Max Bauman and William Felchner, of the Bauman-Massa Jewelry Co., left, Monday, for Elkhart Lake, Wis., to be gone two weeks.

George J. Hess, president of the Hess & Culbertson Jewelry Co., left, Monday, for Waupaca, Wis., to be gone until the first of September.

S. E. Heffern, of the J. Bolland Jewelry Co., left, Saturday, for Mackinac Island, accompanied by his family, for a stay of several weeks.

F. Dienstbier, Jr., son and assistant of F. Dienstbier, 203 North Broadway, has been in Colorado for the past six weeks. He is now at Colorado Springs.

Samuel Kober, of the Maritz-Kober Jewelry Mfg. Co., left, Tuesday, on an extended trip through the west and south. He will be gone five or six weeks.

E. W. Bornmueller, of the J. Bolland Jewelry Co., left, Saturday, as a member of a party, for Eagle River, Wis., where they will spend several weeks.

C. L. Heyman, of the L. Bauman Jewelry Co., returned from a trip through central and western Missouri, and will leave, the middle of next week, for Iowa.

J. Reinhardt, Centralia, Ill., whose creditors had a meeting some time ago, has been adjudged a bankrupt. He had been in business in Centralia for a number of years.

John Gerst, of the Whelan-Aehle-Hutchinson Jewelry Co., has gone to Michigan, where he will remain two months for the benefit of his health, which has been poor of late.

Claud Wheeler, Columbia, Mo., president of the Missouri State Association of Retail

Jewelers, and Anderson Blanton Paris, Mo., attended the national convention at Omaha.

L. D. Culbertson, vice-president of the Hess & Culbertson Jewelry Co., returned, Saturday, from Asbury Park, where he and his wife and daughter had spent the past several weeks.

M. J. Motsinger, who has stores in Rector, Ark., and Senath, Mo., was here during the week, and left for Chicago. From there he will go to the Wisconsin resorts for a stay of three weeks.

Out-of-town buyers in St. Louis during the past week were: W. R. Haselwood, Bardwell, Ky.; T. H. Edwards, Clarksville, Mo.; C. J. Friend, Salisbury, Mo.; M. J. Motsinger, Rector, Ark.

John Hagen, of the Drosten Jewelry Co., has gone to Mobile, Ala., to attend the national meeting of the Knights of Columbus, of which he is a member. He will remain in the south for three weeks.

L. P. Wolff, traveling representative of the Elliott Jewelry Co., has been sick the past few days in Corsicana, Tex., but a letter received from him by the company brings the news that he is getting better.

Mr. and Mrs. Z. B. Robbins, Robbins Jewelry Co., Holland building, returned Tuesday from an automobile trip through Central Illinois. They made stops at Edwardsville and Litchfield and called on trade acquaintances.

W. E. Tower, of Tower & Long, returned, Friday night, from a business trip through Oklahoma and Texas. He will stay in town a while, and A. W. Long, his partner, will go out the middle of the week for a trip through Arkansas and Tennessee.

Roy Edmunds, formerly St. Louis correspondent of THE JEWELERS' CIRCULAR—WEEKLY, now on the staff of the Houston Post, Houston, Tex., has been visiting relatives in St. Louis during the past two weeks and renewing acquaintances with local jewelers.

Leo J. Vogt, manager of the sterling silver department of the Hess & Culbertson Jewelry Co., will be married, Sept. 1, to Miss Grace Lupton, Montgomery, Mo. The ceremony will be performed at the home of the bride. The couple will leave for the east on a honeymoon trip.

Albert Miller, employed by Martin Hacker, manufacturing jeweler in the Globe-Democrat building, who was operated on at the Deaconess Hospital three weeks ago for appendicitis, has so far recovered that he has been returned to his home, but it will be some time before he will be able to return to his work.

Mrs. Christina Ludwig, mother of William C. Ludwig, clockmaker in the Globe-Democrat building, died, Thursday, at her home, 2613 Cherokee St., aged 70 years. The funeral took place, Saturday, from the residence to St. Mathew's Church and the Old St. Marcus Cemetery. Mrs. Ludwig was the widow of Gustave Ludwig.

Joseph Ebeling, Otto Buder and Lawrence and George Oberting were at the national convention of jewelers at Omaha. Mr. Ebeling and Mr. Buder, president and vice-president of the St. Louis Retail Jewelers' Association, were official delegates from that organization. Lawrence Oberting was traveling in the Omaha territory, which made it convenient to go to the con-

vention. George Oberting went from here direct to the convention.

Herman Obershelf, who has been acting as legal adviser in connection with the organization of the new North St. Louis Trust Co., in which Joseph and Louis Ebeling, jewelers, are interested, is a son of the late H. J. Obershelf, for many years one of the leading jewelers of St. Louis, one of the organizers and the first president of the Retail Jewelers' Association of St. Louis.

J. L. D. Rodgers, of the Rodgers-McCoy Jewelry Co., Star building, will leave, Saturday night, for Camp Perry, O., as a member of the rifle team of the Missouri National Guard, to take part in the military rifle competitions to take place there under the authority of the United States Government. Mr. Rodgers is one of 15 men selected out of 63 who made the best scores in a competition last year. He will be away from St. Louis three weeks.

F. W. Drosten, president of the Drosten Jewelry Co., has been selected one of the 27 delegates of the St. Louis Business Men's League to represent the league at the Trans-Mississippi Congress, to be held in Denver, Aug. 16 to 21, but has been compelled to decline the appointment because he had made arrangements to leave, Monday, on a trip to New York. He will be accompanied on the trip by Mrs. Drosten, and after he has transacted business in New York they will go to Rye Beach for a stay of three weeks.

Andrew Wardenski, charged with stealing \$1,500 worth of jewelry and diamonds from a jewelry store at 8th and O'Fallon Sts., several weeks ago, is again locked up after having been out on bond for some time. His present incarceration is due to the Spartan act of his father, Detective Stanislaus Wardenski. The father had obtained bond for his son, on the promise of the latter that he would keep away from his old companions. When the father learned that Andrew was not keeping his word he went in search of him, and, finding him with a party of companions at 8th and O'Fallon Sts., he approached. The young man fled, but his father overtook him and conducted him to the police station and had him placed behind the bars. He then persuaded the bondsman to retire from the bond. He said he could not do otherwise as an officer when he knew that the young man was violating the condition of the bond. The young man will now stay in jail until he is tried on the charge of stealing the jewelry.

Columbus, O.

J. T. Mathison has returned from a visit to his old home in Norway.

L. W. Lewis is having a new and attractive front put in his N. High St. store, and is conducting a remodeling sale.

H. F. Crecilius, of the Bancroft Bros. Co., will visit New York, next week, to buy goods. He will arrive Sunday or Monday.

J. A. Auld, of the D. L. Auld Co., is spending a vacation at Buckeye Lake, where he has a new launch, the *Henncfred*, named after his two sons, Henry and Fred. T. O. Pickering, of Albaugh & Pickering, will be his guest for a few days.

C. B. NORTON JEWELRY CO., Kansas City, Mo.

San Francisco.

TRADE CONDITIONS.

Business conditions in San Francisco are steadily getting better and in the past two weeks there has been a great improvement noted by both retail and wholesale jewelers. There are now more visitors in San Francisco than has been the case at any time since the fire, with the exception of the visit of the battleship fleet, and transient trade has shown a great increase. The recent convention of Elks in Los Angeles brought large numbers of visitors to the coast and many are still here. Large numbers of visitors from the Alaska-Yukon Pacific Exposition at Seattle are now coming down the coast. In October the great Portola festival will take place here, and extensive plans are now being made for this, as it will be the first attempt on the part of San Francisco to show what has been accomplished toward the reconstruction of the city. What is most needed at the present time by San Francisco is publicity, as it is not fully understood by the world at large how fully she has recovered from the fire of 1906, and how well prepared she is to take care of business again.

J. C. Miller, of the Alphonse Judis Co., is now on the road for his firm.

Fred Roth, of M. Schussler & Co., has returned from his European buying trip.

Arthur Glass, manufacturing jeweler, is visiting in the southern part of the State.

John C. Davidson has opened a store on Market St., just above 3d St., where a specialty is made of California stones and souvenirs.

E. N. Radke, Merced, Cal., who recently closed his watchmaking school at that place, has secured quarters at 717 Market St., in this city, and opened for work this week.

The Garin Jewelry Co. has been incorporated in San Francisco with a capital stock of \$25,000. The incorporators are: Andrew Garin, D. H. Kaplan and H. H. Norwood.

The Mission Savings Bank is to erect a building at 16th and Valencia Sts., and will have a large clock installed in a tower which will be a reproduction of the Mission Dolores.

Among the visitors who have been here in the past week, making purchases, were: Edward Praet, Woodland, Cal.; F. A. Conant, Santa Barbara; A. E. Howard, Oroville; A. E. Howard, Merced; H. Weindieck, Red Bluff; Peter Engle, Marysville; Chas. Haas, Stockton; P. H. Shuey, Red Bluff, and Y. Yanow, Albuquerque, N. Mex.

When Leon Nordman, of the Nordman Bros. Co., retired from that concern, the announcement was made that he would probably retire from business for a time, but he is not to be out of the harness very long. He has left for Portland, Ore., where he will make his future home, and he is to engage in business there. After a short rest he will make plans for his Portland house, and early in January he will leave for the east, where he will secure a general line of jewelry.

H. B. Kent, of B. & H. B. Kent, Toronto, Ont., has returned from Oakville after a few weeks' vacation.

Frank M. Davis, aged 31 years, son of S. J. Davis, Ottawa, Ont., who was in the west for some years, died at Vancouver recently, after an operation for appendicitis. He was engaged with the Trovey jewelry firm, of Vancouver, in the bookkeeping department.

Los Angeles.

Frieda Quast, of J. C. Fleming Co.'s sales force, has been ill.

W. T. Hixson, El Paso, Tex., is spending some time in this city.

Ford Hathaway, of the Carl Entenmann Jewelry Co., has gone to the exposition at Seattle.

R. H. Gilmore, of Gilmore & Lee, is making a business trip through the San Joaquin Valley.

J. H. Blanchard, with Newton Moore, 354 S. Broadway, is taking a vacation at Ocean Park.

A. E. Baranger, traveling representative of H. F. Wallace, is taking a vacation, with his wife.

Among out-of-town jewelers who have been here, recently, are A. L. Palis, Upland, and Ernest Pollock, Riverside.

S. Simmons, 315 S. Spring St., has gone with his wife, to Lake Tahoe for a three weeks' vacation and fishing trip.

E. T. Willis, traveling salesman for Hambright & Walsh, was married, a few days ago, to Mrs. Julia E. Reling.

The Donovan & Seamans Co. furnished about 150 prizes for contests at the Roman Catholic picnic at Long Beach, Aug. 7.

Chester A. Montgomery, secretary of Montgomery Bros., has gone to the mountains, with his family, for a vacation.

The German-American Turquoise Co., 114 S. Spring St., has received a number of samples of turquoise from its Montezuma mine in Nevada.

J. G. Donovan, of the Donovan & Seamans Co., has taken his family to Ocean Park and will make that suburb his home for the remainder of the Summer.

L. C. Roessler, salesman with the Whiteley Jewelry Co., has just returned from a vacation. Ira Lothrop, of the same firm, has gone for his Summer rest.

Brock & Feagans presented a handsome cup as a trophy for the winner of the cruising race of the South Coast Yacht Club, from San Pedro to San Diego.

Wm. Petry, 114 S. Spring St., has returned from a trip to his turquoise property in Nevada. He brought back a number of specimens of turquoise and reports encouraging prospects.

The United Jewelry & Turquoise Co. has rented space in the front of Freddie's Arcade, 539 S. Broadway, and has installed a grinding plant, as well as a stock of semi-precious gems.

Geo. M. Williams, manager of the Geneva Watch & Optical Co., reports that he has a rushing business in disposing of the J. P. Trafton stock. He has eight salesmen employed to assist him.

J. M. Hartzberg, who was formerly a salesman with J. Wiesenberger in this city, is now traveling for the Henry M. Abrams Co., San Francisco, and is paying his first visit in his new capacity to this city.

Wm. J. Getz, who had been in the watch-making and jewelry business for several years at 557 S. Broadway, was recently compelled to vacate that location on account of extensive repairs that are being made to the building.

C. H. Walton, of Field & Walton, 346 S. Broadway, has gone with his wife on a trip through the north, taking in San

Francisco and the exposition at Seattle. J. Koke is in charge of the store during Mr. Walton's absence.

The Bastheim, Adams & Abel Co. is open for business in their handsome new quarters on the seventh floor of the Broadway Central building. They start out equipped with a fine stock of new goods, including a large stock of loose diamonds. They have the agency for the Elgin and Howard watches and the Keystone cases. The members of the firm report themselves well pleased with the outlook.

Garretson & Hubbell, who conducted a jewelry manufacturing business at 342 S. Broadway, have sold out to the Los Angeles Badge & Novelty Co. This company, which was in business at 149 S. Main St., has moved to the Broadway location and will hereafter carry on a jewelry manufacturing business in addition to the badge and novelty work. It will add to the present jewelry plant, and will make a specialty of enamel work. Mr. Garretson will remain and will act as superintendent of the shop.

Pacific Coast Notes.

R. P. Gillette, Porterville, Cal., has moved to a new store at that place.

A. R. Ransch has moved to his new location on Tehama St., at Willow, Cal.

F. H. Moore, a traveling man from New York, is covering the territory around Santa Fe, N. Mex.

A. DeNeuf, Virginia City, Nev., has placed his store in the hands of the Jewelers Board of Trade.

E. R. Hubbard, Lompoc, Cal., has left with his family on a visit to friends in the southern part of the State.

The Hanford Jewelry Co., Hanford, Cal., of which A. Duncan is manager, will shortly move from its present location on 7th St. to a new location on Irwin St.

Pacific Northwest.

Ernest Abbott, Bickleton, Wash., has left that place and will work in Seattle.

S. Selka has decided to retire from business at Astoria, Ore., and is selling out his stock.

Lee Strauss, Spokane, Wash., has opened a watchmaking shop in the Grove building, Chewelah, Wash.

A. B. Crawford, who recently came to Othello, Wash., from Algonquin, Ill., has completed the erection of a building at his new home and will shortly open a retail store there.

A. H. McCurtain, as trustee in bankruptcy of the estate of A. A. Charnig & Co., has filed a suit against E. S. Booth. The plaintiff asks that the mortgage for \$2,500, executed by the insolvent company in Booth's favor, be set aside. It is alleged in the complaint that the mortgage which covered the stock of goods of the insolvent company was given Booth shortly before the company became insolvent, for the purpose of giving him a preference over other creditors. Claims against Charnig & Co., who were formerly engaged in the jewelry business at 271½ Morrison St., Portland, Ore., now aggregate \$10,000.

A post card will bring to you our new 1910 Optical Catalogue. Many new things up to date. Lowest prices. Best service.

A. C. BECKEN COMPANY, Importers, Wholesale Jewelers and Opticians
156 Wabash Avenue - CHICAGO, ILL.

Detroit.

G. W. Davis, Goodrich, purchased stock in this market last week.

J. H. Dickerson, Flushing, visited the wholesale houses, last week.

J. T. Eddington, Pontiac, visited the wholesale house, a few days ago.

Harry Schulz is now in the employ of Kunz & Rogers, being engaged in the store.

Harry Sydnam has been spending a vacation at his cottage on the Canadian shore of Lake St. Clair.

H. St. John, Milford, was in the city a few days ago, and says that trade is picking up in fine style.

F. A. Mathauer, of Mathauer & Koester, started Monday on his first trip of the Fall season through the State.

The salesmen for the E. H. Pudrith Co. will, in the coming season, carry a sample line only, all orders being filled from the store.

C. V. Haas, Ravenna, Mich., was a buyer here, last week. He stopped on his way to Niagara Falls, where he will spend his vacation.

John Kay & Co. designed some of the trophies presented by the Detroit Boat Club to winners in the international rowing regatta, last week.

W. T. Blashill, Oxford, and his father, who is a member of the firm of the Connolly Blashill Co., Inlay City, were in town together, last week.

W. H. Horton, who was on the road for the E. H. Pudrith Co. for a long time, has accepted a similar position with the Stein & Elbogen Co., Chicago.

A fine collection of the trophies raced for in the regatta of the National Association of Amateur Oarsmen was exhibited in Wright, Kay & Co.'s window, last week.

J. C. Rutman, vice-president of the E. H. Pudrith Co., is in the east with his wife, spending a vacation at the seashore resorts. He will visit New York before coming home.

The four Detroit jewelers who went as members of the local Elks' Drill Squad to Los Angeles, Cal., E. Buchbinder, James H. Garlick, Chas. J. Thiry and Louis Guthrath, have returned home after what they consider the greatest time of their lives. The drill squad to which they belonged won \$350 in prizes.

L. H. Schafer, Chicago, has taken over the retail jewelry store at 39 Michigan Ave. This was formerly conducted by John Hellerich, and the stock and fixtures were purchased at receiver's sale by G. W. French, Ionia. The latter has now disposed of the business to the Chicago man. Mr. Hellerich has been engaged as manager of the store.

The Detroit Jewelers' Board of Trade held a special meeting, last week, for the purpose of preparing a formal invitation to the National Association of Retail Jewelers, in session at Omaha, to hold their next annual convention in Detroit in 1910. The invitation was later accepted. The cooperation of the mayor, Board of Commerce and other organizations was secured, the aim being to let the retail jewelers know that Detroit would welcome them.

Milwaukee.

A. C. Kuesel, of the Kuesel Bros. Co., wholesale jewelers, has returned from a vacation spent at his Summer home at Okanichee Lake, Wis.

Among the out-of-town Wisconsin jewelers who were Milwaukee visitors this week were F. P. Beswick, Racine, and J. B. Kimball, Waukesha.

The stone recently picked up on the farm of George Clark, at Rhinelander, Wis., is said to resemble a blue diamond. Mr. Clark sent the stone to Tiffany & Co., New York, for examination.

J. G. Greenwood, who was in charge of the jewelry department at the O. O. Melaas pharmacy, at Stoughton, has resigned and will enter the undertaking and furniture business at Green Bay, Wis.

Several valuable pearls were found in Wisconsin rivers, last week. J. Parkinson, Endeavor, picked up a pearl valued at several hundred dollars. F. E. Garner, Rockton, also found a valuable gem.

Henry Van der Zanden, jeweler at Green Bay, has sailed for Holland, where he will visit his former home. Mr. Van der Zanden is enjoying his first vacation in 30 years, and he will remain abroad for three months, traveling in Holland, Germany, France and Belgium.

G. W. Fink of the Fink-Boszhardt Co., jewelers' supplies, Enterprise building, is calling upon the trade in this State. One of the popular souvenirs at the recent annual convention of the Wisconsin Retail Jewelers' Association was a handsome purse donated by the Fink-Boszhardt Co.

The F. W. Teschner Jewelry Co., Milwaukee, has been incorporated with a capital stock of \$2,500 by F. W. Teschner, Ida Teschner and Anna Krützer. F. W. Teschner has been conducting a jewelry establishment at 745 3rd St. for several years. It is expected that the business will now be enlarged.

An attractive work of the jeweler's art were the 15 silver cups which were made by the Louis Esser Co., Wells building, and offered as trophies in the homecoming week in Milwaukee. They range in height from eight to 18 inches and each cup of a different design. Each is lined with gold and each is engraved with the words "Homecoming celebration, Milwaukee, Wis., Aug. 3-9, 1909."

Milwaukee jewelers have been interested in the statement made by A. P. Dupuis, manager of Gimbel Bros.' jewelry department, who has just returned from Europe, that cut jet will be one of the popular materials for jewelry and dress ornaments this Fall and Winter. Mr. Dupuis spent 10 weeks abroad and visited manufacturers in 19 cities in Germany, England, France and Austria.

M. A. Potosky, a jeweler of McKeesport, Pa., who is now located at 535 Walnut St., will in a few days be permanently located at 539 Fifth Ave., in the New German building, at that place.

Leo Wagner and O. A. Cooper, two boys who recently broke into the jewelry store of H. W. Howe, Humboldt, Nebr., have pleaded guilty to the indictment and have been sentenced to a reform school.

Indianapolis.

Mr. and Mrs. Carl Walk have gone to Michigan for a few weeks.

Frank L. Bryant will attend a reunion of the Bryant family at Hebron, Aug. 19.

After a two weeks' fishing trip Edward E. Petri, watchmaker for Julius C. Walk & Son, has returned home.

Albert W. Gray, who has charge of the Pennsylvania St. store of Gray, Gribben & Gray, will go to Michigan for his vacation, next week.

John Holloway has taken charge of the business of Lon R. Mauzy in the west. Mr. Mauzy is now in Spokane, Wash., but later will go to California. He will return Sept. 1.

Charles Mayer & Co. supplied the four sterling silver trophy cups to the Indianapolis News recently. The cups will be awarded to the winners of the City Golf Tournament, to be held on the Riverside and Highland golf links, this week.

A French brier pipe, carved by L. A. Kiefer, of L. F. Kiefer & Son, is being exhibited in the store. The pipe was carved with a penknife while Mr. Kiefer was at a northern lake. A fish and frog are carved on the bowl, the work being difficult.

Several out-of-town jewelers were in this city, last week, buying stock. All predicted a good Fall trade. Among those in the city were: S. E. Mark, Coatesville; H. A. Roberts, Veedersburg; Mr. Turner, of Turner & Son, Arcadia; John W. Hudson, Fortville; E. O. Collins, Franklin; J. A. Pickett, Newcastle, and J. A. Miessen, Cicero.

Charles A. Rigdon, Warsaw, who is also mayor of that city, together with other public-spirited citizens, has a plan under way for a motor speedway and park on Lake Center. The mayor, who owns much of the lake frontage, has offered to donate his holdings for the purpose if others will donate sufficient funds for the construction work.

Thomas Ward, formerly manager for J. C. Ertel, a pawnbroker and jeweler at 209 Massachusetts Ave., was arrested, last Friday, on a grand jury capias, charging him with embezzlement and grand larceny. He is charged with misappropriating some of the funds of his former employer, although the sum is said not to have been large. His bond has been fixed at \$1,000.

Dyer Bros. state that they will again establish a class in hand-wrought jewelry, about Sept. 15, and will have one of the largest classes of young men and women since they established the school, three years ago. An addition to their establishment has been built expressly for the purpose of accommodating the classes, which were abandoned recently for lack of room.

Thieves obtained a quantity of jewelry from the store of A. C. Squires, Shippensburg, Pa., recently, by throwing a big stone through the plate glass window.

A thief recently broke the window in J. R. Jenzel's jewelry store, 250 Market St., San Francisco, Cal., and stole cameras and other articles valued at \$90. The robbery occurred under the full glare of numerous electric lights. The thief broke the window without attracting attention.

Kansas City.

A. Y. Boswell, Tulsa, Okla., who took in the Omaha convention, is now enjoying a trip to Seattle.

J. R. Mercer donated a beautiful trophy cup for the successful contestant in a recent automobile race.

H. W. Walter Stareke, Junction City, Kans., attended the Omaha convention and stopped over in this city on his return trip.

C. A. Hedden, recently of South Bend, Ind., has been added to the working force of the Hassig Jewelry Co. as a jeweler and engraver.

A. C. Stuhl, manager of the Kansas City Polytechnic Institute, is back from a vacation of two weeks, spent in the mountain region of Colorado.

Stuart Mitchel, a watchmaker and jeweler in the employ of H. A. Bump, Oklahoma City, Okla., is away on a three-weeks' trip to the Pacific coast.

George H. Edwards, of the Edwards & Sloane Jewelry Co., and his wife left, this week, for a vacation trip to Illinois and Michigan. They will be gone several weeks.

The following retailers were in town during the week: V. Q. Powell, Fort Scott, Kans.; F. C. Clements, Rich Hill, Mo.; B. G. Gustafson, Lawrence, Kans.; J. P. Barrett, Concordia, Kans.

C. E. Conklin and wife, of Chanute, Kans., stopped over here for a couple of days, early in the week, on their return trip from the Seattle exposition. They also took in a number of points of interest in the west.

The Greene Jewelry Co. made a record mark by turning out 500 Glidden auto tour medals within three days. It took hustling, but the work was done well and on time. The completed medals represented 6,000 different operations.

Among those from this city who attended the Omaha convention were Louis Myer, of the Myer Jewelry Co.; E. H. Morgan, vice-president of the C. B. Norton Jewelry Co.; J. M. Scott, with the Woodstock-Hoefer Watch and Jewelry Co.; George H. Edwards and Leo Ludwig, of the Edwards & Sloane Jewelry Co.

Joseph Mazer, president of the Oklahoma Retail Jewelers' Association, and his "Indians" spent the Sunday preceding the Omaha convention in this city and made their headquarters with the Edwards & Sloane Jewelry Co. It is needless to mention the fact that they were properly entertained while tarrying here. Among those composing the party were Frank Robertson, Blackwell; Frank Pfaeffle, Enid; M. Miesch, Muskogee; C. H. Reideman, Vinita; George H. Gardner, Pawhuska; W. H. Haupt, Bartlesville; Frank White, Guthrie; H. A. Bump, Oklahoma City.

Death of Charles Speidel.

RICHLAND CENTER, Wis., Aug. 7.—Charles Speidel died, recently, of a complication of diseases.

Mr. Speidel succeeded his father in the business here in 1875. He was about 56 years of age. He was a man held in high respect in this community and in the trade.

The business will be conducted by Mr. Speidel's widow and daughter.

Pittsburg.

Wm. Fisher, Greensburg, was in Pittsburg, last week.

Walter Heeren, of Heeren Bros. & Co., is at Chautauqua Lake.

Quite a number of local firms are installing chime clocks in their places of business.

J. Allison Reed, of James Reed & Co., is at Belmar, N. J., for the remainder of the summer.

George W. Biggs, of the John M. Roberts & Son Co., has gone to Mt. Chateau, Va., to spend his vacation.

Henry A. Barrett, of the Geo. B. Barrett Co., who spends most of his time out of doors, has bought a new automobile.

Gillespie Bros. have nearly finished the renovation and remodeling of their new store. New cases and shelving have been installed.

The Pittsburg Association of Credit Men held its annual picnic and outing last Friday, at Rock Point, which was attended by some of the local jewelers.

The Pittsburg Credit Association's baseball team played the Cleveland Credit Association team at Rock Point, last week, and the latter were defeated by a score of 18 to 2.

The Henry Wilkins Co. has placed a clock on the window ledge of its establishment in the Pittsburg Life & Trust Co. building. The clock is an accommodation to thousands.

F. B. Theakston, Brownsville, who was in Pittsburg last week, reports a marked improvement in the business conditions of his section of the country, which is in a mining district.

The bureau of police has recently been extending wires into pawn shops. The shops are thus connected with the detective bureau, and the pressing of a button brings a detective in short order.

The wholesale and retail teams of the Jewelers' 24-Karat Club of Pittsburg will arrange for another ball game to be played on the Shadyside Academy grounds some time between now and Aug. 28.

Out-of-town dealers in Pittsburg, last week, buying goods, included: H. R. Brown, of Brown & Son, Donora; B. E. Brown, Monessen; Asa Joseph, Donora. The latter recently returned from a business trip to New York.

C. S. Wiley, secretary of the Pennsylvania Retail Jewelers' Association, who went to Omaha to attend the National convention, will go from there to California. He does not expect to return to Pittsburg until the last of the month.

The Hardy & Hayes Co. has put a number of carpenters at work in their building, overhauling the damage caused by the fire of several weeks ago. Mr. Hayes says that it will be Sept. 1 before the building is in shape again. A new safe is being installed in the basement, and the new fixtures are expected to arrive within a few days.

John M. Roberts, of the John M. Roberts & Son Co., and chairman of the watch price-cutting committee of the Pennsylvania Retail Jewelers' Association, was unable to go to Omaha on account of pressing business here, being compelled to change his plans almost at the last minute. C. S. Wiley, secretary of the association, and

Steele F. Roberts represented the association.

Pittsburg jewelers were amused at a dispatch published in the local papers, Saturday, and telegraphed to New York, stating that there is a scarcity of diamonds among the Maiden Lane merchants. Local jewelers say there are still a few stones left in Pittsburg and prices for good stones remain about the same as they have been selling the past year.

Toledo.

J. J. Freeman will leave shortly for Wisconsin to spend his vacation there.

Tiedtke Bros. will erect a large, new store building on Summit St., near Adams. The jewelry department will be enlarged in the new store.

I. H. Christiancy has completely remodeled the interior of his store, the changes affording much more room for wall cases, show cases and work bench.

J. D. Rowland, who recently opened a new jewelry store in the Ohio building, reports increased business. He has added a complete line of optical goods to his stock.

All the Toledo jewelers are heavily stocked with souvenir spoons, etc., for King Wamba week, the assortment including several new lines not previously seen in this city.

C. W. Dean is now associated with L. H. Christiancy, jeweler on Madison Ave. Mr. Dean takes the place of C. R. Parker, who has taken larger quarters on Superior St. with W. A. Rankin.

The formation of the Judd, Gross Co., mention of which was made some weeks ago, practically marks the retirement from active business of one of Toledo's best-known jewelers, M. Judd. Although the senior member of the new firm, Mr. Judd will no longer engage in active business.

Buffalo, N. Y.

A new jewelry store will soon be opened at 286 Broadway by S. Goldberg.

William Ehmman, president of the Buffalo Retail Jewelers' Association, has returned, with his wife, after a European trip.

A most enjoyable time was passed by the employes of T. C. Tanke at their recent annual outing. The launch *Ivanhoe* conveyed the party around Grand Island. In the evening they gathered at Black Creek for a corn roast. Music was furnished by Tanke's orchestra.

Among the out-of-town jewelers who recently visited the local jewelry market were: W. H. Fuller, Silver Creek, N. Y.; Mr. Lewis, Arcade; R. H. Stinson, Camden; W. D. Werner, Grand Rapids, Mich.; L. F. Simpson, Medina; L. J. Reznor, Port Allegany, Pa.; Gordon H. Hayes, Niagara Falls.

A decision was recently handed down by Judge Hodson in the local municipal court, dismissing the complaint of Henry L. Roberts & Co., representing the Commercial Jewelry Co., Philadelphia, Pa., in an action to collect \$225 claimed to be due for jewelry sold to the L. B. Cigar Co. for use as premiums. The jewelry company is directed to return \$100.62 paid to it by the cigar company.

The George H. Fuller & Son Co., Pawtucket, started up Monday after the annual vacation, which began July 28.

W. V. Chislin, manager of the Chicago office of the Gorham Mfg. Co., visited the company's plant at Elmwood, last week.

The Brown & Sharpe Mfg. Co. has closed for two weeks' vacation. There are approximately 4,000 names on the payrolls.

Two sterling silver-spinners are wanted by Dominick & Haff, 543 W. 23d St., New York, according to calls in the local papers.

William C. Codman has been granted a patent on a design for a coffee pot, which he has assigned to the Gorham Mfg. Co.

E. Fred Gottschalk has been re-elected chairman of the Administrative Board of the Watchmocket Fire District, East Providence.

Frederick C. Lawton, superintendent of

the Gorham Mfg. Co., accompanied by his wife, are in New Hampshire for two weeks.

Edward Gilbert has entered the employ of the Shepard Co. He was formerly office manager for F. S. Gilbert, North Attleboro.

Mr. and Mrs. Jacob Schwarzkopf and family has returned to their home in this city after a three-weeks' trip to Forrest Park, Pa.

George C. Rueckert, of the Rueckert Mfg. Co., accompanied by his family, is making an automobile trip through the Berkshire Hills.

Mr. and Mrs. Charles E. Westcott, of the Snow & Westcott Co., have returned from a month's visit at Cape Cod and are spending August at Bristol.

The George H. Fuller & Son Co., Pawtucket, is receiving satisfactory returns from William H. Lamb, who is calling upon the firm's western trade.

The Cohen Mfg. Co. has started in the manufacturing jewelry business at 21 Calender St. and will introduce a full line of plated scarf pins, brooches, buckles, etc.

The directors of the Manufacturing Jewelers' Board of Trade will hold their regular monthly meeting at the rooms of the association, in the Wilcox building, Aug. 20.

George H. Holmes was among the members of the General Assembly who attended the first reunion of the Newport County Association, at Newport, Wednesday.

Noah H. Holt, for several years in charge of the office of the Jewelers Board of Trade in this city, will leave in a few days for Chicago, where his wife has landed interested.

Employees of M. F. Williams & Co., 409 Pine St., enjoyed their annual outing at Palace Gardens, Saturday. Dinner and various sports made the occasion a pleasant one.

F. E. Harris, president of the Harris & Mowry Co., Woonsocket, wife and two daughters, left, last week, in their automobile for Provincetown, Mass., on a fortnight's visit.

The Kazanjian Co., of which A. H. Bozoyan is manager, is exhibiting an interesting line of Armenian hand-made jewelry, recently imported, at its store in the Kazanjian building, Newport.

At the annual election of officers of the High St. Bank, Tuesday last, Arthur E. Austin was elected president and Englehardt C. Ostby, Nathan B. Barton and Charles F. Irons directors.

In the White Mountains, N. H., are Fred V. Kennon and Harry F. Wolcott, of the Wolcott Mfg. Co., of this city, and Mr. and Mrs. Charles H. Fuller, of the George H. Fuller & Son Co., Pawtucket.

At the 37th annual meeting of the stockholders of the Buttonwoods Beach Association, held last week, Edward B. Hough was elected president, Arthur W. Claffin secretary, and William A. Schofield one of the directors.

Danforth K. Barrett, with D. Wilcox & Co., is one of the committee of arrangements, on behalf of the State Council of Rhode Island, to entertain the National Council, Order United American Me-

chanics, in this city in the latter part of this month.

The Slade Tubing Co., Payne building, Pawtucket, has closed its plant and removed to Rome, N. Y. It has been employing about 40 hands, and manufacturing tubing, fancy metallic gas fixtures and electrical devices.

Among the creditors of Herman Meyrowitz, 225 W. 123rd St., New York, are the following Providence concerns: Edwin Lowe & Co., \$900; Lyons Mfg. Co., \$300; C. H. Cooke Co., \$200; S. & B. Lederer Co., \$125; Waite-Thresher Co., \$200.

The stockholders of the Yale Jewelry Mfg. Co. held a meeting at the office of the corporation, 62 Page St., a few days ago. The resignation of L. P. Sturtevant as treasurer was received, and C. J. Morrison, Attleboro, was elected to fill the vacancy.

John M. Howard, 113 Point St., has purchased the complete outfit of tools, dies, samples, machinery, etc., used by the D. F. Briggs Co., Attleboro, Mass., in the manufacture of seamless rings. The plant has been moved to Mr. Howard's place here.

Thursday the advisory council of the New England Manufacturing Jewelers' & Silversmiths' Association will hold its first meeting since the vacation period in its rooms in the Wilcox building. The principal business will be the discussion of the provisions of the new tariff bill.

At a sale of unclaimed imported merchandise at public auction on Thursday last, one case, consisting of 114 watch cases, 116 watch movements, a lot of parts of watch movements, 175 watch cases and 26 dials, with an appraised value (foreign value with duty added) of \$372.65, sold for \$35.

Included in the personnel of the rifle team which will represent Rhode Island at the national rifle match at Camp Perry, O., from Aug. 20 to 26, were Major Howard D. Wilcox, team captain; Capt. Martin S. Fanning, coach; First Lieut. Henry A. Crosby and Sergt. Charles Fletcher.

The partnership existing between Thos. Hanley and Wm. H. Stone, under the style of Hanley, Stone & Co., refiners, at 33 to 37 Mathewson St., has been dissolved by mutual consent, the former withdrawing. Mr. Stone will continue the business at the same place, under the same name.

The S. & B. Lederer Mutual Relief Association, composed of the employes of that company, held its fourth annual outing, Saturday, the members assembling at the Union Station at 10:30 o'clock and boarding special cars for Vanity Fair. There were about 200 persons in attendance.

In the last week the following jewelry buyers have been inspecting the goods of the local manufacturers: M. M. Kann, of Kann Bros., Chicago; Miss Henrietta Graf, of Berg Bros., Chicago; W. A. Kaufman, Chicago; A. L. Stone, of Stone Bros., Chicago, and R. Sharny, of the Damascus Jewelry Co., Montreal.

Henry Shaw, of this city, filed a suit, last week, in the Superior Court against Mark Streicher and others, including the Mark Streicher Comb Co. and the H. Rosenhirsch Co. The plaintiff's claim is for \$800 on book accounts and the proceeds of a promissory note for \$400, made by Streicher, May 13, 1909, and indorsed by

"BEGIN NOW"

No. "FOUR HUNDRED" SPECIAL COLONIAL WALL CASE

To beautify your store for the holiday season of 1909 and 1910. A new set of fixtures will bring that increased business. Our "Quarter of a Century" experience "is yours for the asking."

Write us to-day for copy of our new loose leaflet catalogue and let us quote you prices.

the other defendants. Damages are laid out at \$1,200.

Mrs. S. E. Hall, wife of S. E. Hall, salesman for the Kinney Co., and Mrs. Elizabeth Maher and Miss Ellen Bowles, are spending a few weeks in Atlantic City.

E. Merle Bixby, superintendent of the silverware department of the Shepard Co., will attend the military manoeuvres of the Massachusetts militia, which will begin about Boston, next Saturday.

James Rayner, treasurer of the Shepard Co. Employees' Beneficial Association and one of the oldest clerks in the employ of the company, died, last Saturday, at his home, 119 Stewart St. He was born in London, England, Dec. 21, 1848, and came to this country when he was 16 years of age, landing in Halifax, N. S. He came to this city in 1868. Besides a widow, he is survived by one son.

Among the foreign importations received through the Providence Customs House, in the past week, were the following: From Bremen, 10 packages of imitation precious stones, 1 package of jewelry; from Hamburg, 1 package of silverware, 14 packages of crockery; from Havre, 1 package imitation precious stones; from Liverpool, 3 packages of manufactures of metal, 1 package of china.

Among the jewelry buyers in this city, last week, were the following: H. D. Bergheim, Indianapolis, Ind.; N. Mendelsohn, who has just commenced jobbing business for himself at Syracuse, N. Y.; F. Goodman and E. Hoffman, of the Jewelry Mfg. Co., Philadelphia; S. Hudis, of the Rosenbaum Co., Pittsburg, Pa.; I. M. Oppenheimer, of M. J. Oppenheimer & Sons, Baltimore, Md. The latter was registered at the Crown Hotel and was much sought by representatives of the celluloid and horn firms of Leominster, Mass.

The manufacturing jewelers are much interested in the case brought by the police department against Samuel Benjamin, proprietor of the pawnshop and retail jewelry store at Washington and Union Sts., for failing to retain in his possession for a period of at least 48 hours a gold watch received in pawn. He admitted evidence on which he was fined \$100 and costs, which he appealed. He has now been summoned before the police commissioners to show cause why his license as a pawnbroker should not be revoked. This is the first case brought under the new law governing pawnbrokers.

Thomas F. Kilkenney, manager of Capron & Co., manufacturing jewelers at 43 Sabin St., and wife had a narrow escape from fatal injury while automobiling, Saturday. They were in company with two others, one of whom is the proprietor of the taxicab business here, and were riding along Boston Neck road in one of these vehicles. When about three miles from Narragansett Pier the cab collided with a large touring car and turned over and over and finally landed, bottom up, in the bushes at the side of the road. The occupants of the cab were all badly bruised. Mrs. Kilkenney sustained a fractured nose and cuts about the face. She was taken to one of the hotels at the Pier and later removed to the Rhode Island Hospital in this city. The machine was a total wreck.

Attleboro.

F. Milton Eldredge started last week on a business trip.

George Roberts left last week on a business trip for the Horton-Angell Co.

Charles Crane is making a western trip in the interest of the Bliss Bros. Co.

An addition is being built to the shop of the Freeman & Daughaday Co., Chartley.

Edward Moore left Chicago last week for the coast with the line of Sykes & Strandberg.

All the firms which closed shops last week for the annual vacation resumed work Monday.

George W. Kelley has been making improvements to his electro-plating factory on County St.

Work on the new Mossberg factory was started last week and will be pushed vigorously.

Ralph C. Thompson, manager of C. M. Robbins & Co., has been granted a patent on a brooch.

Morris Baer, of the Attleboro Mfg. Co., has returned from a two weeks' vacation at Atlantic City.

The first annual outing of the employes of Bates & Bacon will take place Saturday at Boyden Heights.

C. J. Morrison, of Attleboro, was elected last week treasurer of the Yale Jewelry Mfg. Co., Providence.

John Killiou, traveling salesman for the Attleboro Chain Co., has been enjoying a vacation at Block Island.

John G. Randall has accepted a position with the W. A. Sturdy Mfg. Co., Chartley, as one of its representatives.

Henry B. Richardson, of Smith & Richardson, returned last week from a three weeks' vacation at Harwichport, Mass.

Nearly all the firms have finished their sample making and will send their salesmen on the road the last of this week.

The county commissioners selected last week the property of Frederick A. Newell, of the Watson & Newell Co., at Mechanic, Haywood and N. Main Sts., as the site of the new court house.

The D. F. Briggs Co. has sold to John M. Howard, Providence, its complete outfit of tools, dies, samples, etc., for making seamless rings. The outfit is being removed to the Howard factory on Point St., Providence.

The Board of Selectmen received a letter from the Leach & Garner Co., at its last meeting relative to a drain which the company is constructing. Some time ago, the selectmen gave permission to build the drain. Since then the board of health has notified the company that the drain must not be used.

The firm of Allen-Lonergan Co. has been dissolved by agreement. Edmund J. Lonergan has withdrawn and the business will be continued by the remaining members of the firm under the name of H. A. Allen & Co. The members of the firm now are Harlan A. Allen, Elmer A. Scott, and Samuel LeFavour.

Edward A. Sweeney, a member of the manufacturing jewelers' tariff committee for New England, says that the new tariff law will result in one of the biggest booms that the jewelry trade has ever known. Mr.

Sweeney said that "in the cheap lines the new tariff will double the business of some manufacturers. Furthermore, it will protect the manufacturers whose jewelry, in the past, has been copied by foreign manufacturers who sent here the same kind of goods which were retailed cheaper than we could manufacture them." Peter Nerney, Sidney O. Bigney, William H. Saart, George J. Kelley, Albert Bushee, S. M. Einstein, James E. Blake and other manufacturers all said that they look for a big increase in business.

North Attleboro.

Alvin Chisholm returned, last week, from New York.

Payson Bennett has been enjoying a vacation at Yarmouth.

J. A. Lucas, salesman for the A. H. Bliss Co., has returned from his vacation.

Repairs were made to the boiler room at the factory of W. G. Clark & Co., last week.

Lester Cutler has accepted a position as salesman for the W. K. Toole Co., Pawtucket.

Charles E. Stanley, of the Estate of O. M. Draper, enjoyed his annual vacation, last week.

Howard Black returned, last week, from a southern trip in the interests of the J. P. Black Co.

John F. Miller, of Doran, Bagnall & Co., who was married last week, is in Maine on his wedding trip.

George Semple, New York salesman for W. & S. Blackinton Co., returned to New York, last week, after spending a few days at the factory.

Robert Fletcher returned home, last week, from New York, where he has been looking up new designs for the Estate of O. M. Draper.

Fred Cook, New York salesman for Whiting & Davis, has returned from his vacation and resumed his duties at the New York office.

Harry Peckham is in charge of the office at New York of J. H. Peckham & Co. during the absence of his brother, William, who is in the west.

A. B. Chase has accepted a position as salesman for the Boss & Baldwin Co., Attleboro Falls, and will start out next week on his first trip for his new employers.

Frank E. Whiting has returned from New York, where he has been in charge of the New York office of Whiting & Davis during the absence of Fred Cook, who was on his vacation.

Dr. Willard Scott, Worcester, who has many friends among local jewelers and was a speaker at numerous banquets of the New England Manufacturing Jewelers and Silversmiths' Association, is reported seriously ill.

George Bagnell and George Chisholm, sons of two prominent manufacturing jewelers of this town, had a narrow escape from drowning, last Thursday afternoon, when their auxiliary cat boat, the *Emily*, was caught in the surf, off Matunucket, and overturned.

S. T. Gray, Quinton, Okla., has gone out of business.

Wholesale Jewelers

SOLID GOLD AND PLATED JEWELRY

212-213 Wysor Block

MUNCIE, INDIANA

Philadelphia.

E. Mason, Perkasie, Pa., has opened a new jewelry store.

S. Lieberman, Atlantic City, N. J., has moved from 805 to 1003 Arctic Ave.

H. W. Blaisdell has bought the jewelry store of F. Proctor Donahey, Vineland, N. J.

F. B. Wallen, 405 Broadway, Camden, has started on a trip to Boston and eastern towns.

The United Optical Co., Camden, N. J., is a new corporation with a capital stock of \$50,000.

William J. Power, 719 Sansom St., was delegate to a convention held in Chicago, Aug. 5 and 6.

John Grund, formerly manager for E. S. Radley, 2401 Frankford Ave., has opened a store at 3124 Frankford Ave.

Louis Spoerhase, 4078 Lancaster Ave., has made alterations to his store and has added a show window and a side entrance.

The William A. Block Co. is a new concern at 711 Sansom St. Diamonds and diamond mounted jewelry will be their special line.

Samuel Jaquette, representing the silver department of the Bailey, Banks & Biddle Co., returned from Europe on the *Baltic* Saturday.

Joseph Gumpertz with his wife and daughter, are guests at the Pierrepont Hotel, Atlantic City, for the remainder of the Summer.

William Fussman, Gloucester, N. J., will soon open a new store at 350 Spruce St., Camden, N. J., with a complete line of jewelry and watches.

The creditors of William Waltz, Perkasie, Pa., who failed in March, 1908, have received a dividend of 41 per cent. in full for all claims.

George W. Fuller, an old-time Camden jeweler, has returned to business after an absence of several months, very much improved in health.

Mrs. Annie Rudieson, 1822 Atlantic Ave., Atlantic City, is looking for a good business location. The building she now occupies will be torn down in the Fall.

Joseph Crosland, 4521 Frankford Ave., who had been ill for three months, was a familiar figure in the trade this week, and seemed much improved in health.

Harry Weir, Manayunk, Pa., is spending a week at his cottage in Wildwood, N. J. Mr. Weir passes most of the time at Anglesea, where he has his motor boat.

H. Everline, with E. Diesinger, 115 S. 7th St., was painfully injured last week by the falling of a glass partition in the store. He was taken to the Jefferson Hospital.

Benjamin Osmond, Bordentown, N. J., who has been in charge of the jewelry business of the late George P. Osmond, last week, took over the business for himself.

Robert Richie, formerly watchmaker for the trade, has accepted a position with A. I. Hadley, at 409 Mint Arcade. Mr. Richie has been working at the bench for 53 years.

Lloyd Erhard, of Lloyd Erhard & Bro., jewelers and opticians, Davis, W. Va., was seen in the trade, last week, ordering for the Fall, prior to a vacation at Atlantic City.

An entrance was forced by thieves to the jewelry store of L. Rubin & J. Levin, at 1510 S. 7th St., by prying open a window. According to the police, jewelry and silverware valued at \$160 were stolen.

John S. Cunningham, representing the E. L. Spencer Co., Providence, R. I., has returned from a trip through the west and reports business good. After a few days in this city, Mr. Spencer will visit the factory in Providence.

J. E. Caldwell & Co. are the manufacturers and designers of the cups displayed in their window this week, to be awarded by the Ocean City Yacht Club. The company shows also the cups to be presented by the Holly Beach Yacht Club at their open regatta, Aug. 14. A miniature sail boat is an attractive feature in the company's window.

The following jewelers were visitors to this city, last week: J. W. Clark, Bristol, Pa.; H. S. Kratz, Souderton, Pa.; D. H. Kranske, North Wales, Pa.; E. K. Bean, Lansdale, Pa.; H. B. McFarlan, East Downingtown, Pa.; Benjamin Osmond, Bordentown, N. J.; B. L. Coder, Oxford, Pa., and R. W. Quicksall, Mount Holly, N. J.

William Alburger, 21 years old, of 901 Earnest St., was arrested last Thursday, and was held in \$800 bail by Magistrate Coward on a charge of theft. Alburger entered the antique shop of George Pasareli, 1031 S. 8th St., and attempted to dispose of some candlesticks. While Pasareli had his back turned, it is charged, Alburger was caught stealing a gold watch and was immediately arrested.

The Bailey, Banks & Biddle Co. are exhibiting in their window the cups and prizes for the Ocean City Yacht Club. This house has been awarded the contract for the silver cups and trophies to be presented to the winners at the midsummer auto race meet, which will take place some time this month at Point Breeze. The company will give to the winner of the one-mile speed test a large silver loving cup.

A man recently entered the store of T. J. Greaves, 6148 Ridge Ave., and handed the jeweler a ring set with an imitation diamond, requesting that it be reset. The diamond-setter completed the work, but inadvertently placed a genuine diamond ring in the customer's envelope. The customer called several hours later and was handed the envelope containing the genuine stone, which was worth \$100. The jeweler is now seeking the customer who innocently received the diamond instead of the imitation stone. The man, whose name is given as William Haddard, is described as 35 years of age, five feet 8½ inches in height, and weighing about 155 pounds. He has a sandy complexion and light mustache and wore a negligee shirt and light soft hat.

Sarah Morris Darrach, granddaughter of Robert Morris, financier of the Revolution and signer of the Declaration of Independence, presented a relic of her distinguished ancestor to the historical collection in Independence Hall, last week. The relic is a silver coffee pot 10 inches high, bearing on one side a dual coat-of-arms. Long use in the family of Robert Morris has smoothed the engraving, so that it can scarcely be read. It is believed that the coat-of-arms is that of the Bourbons.

Lancaster, Pa.

W. F. Meiskey is off on a trip to Atlantic City and the Berkshire Hills.

F. A. Peters, of the H. S. Meiskey Co., has returned from a trip to New York.

Henry Dorley, Elgin, Ill., who was visiting his mother here, has returned home.

The factory of the Lancaster Silver Plate Co., which recently went into the hands of receivers, has been shut down.

Charles D. Rood, president of the Hamilton Watch Co., is nursing an injured arm. He was hurt by being thrown from a carriage while out driving recently.

Benjamin Lichtenstein is home from a visit to Williamsport, where he visited his brother-in-law, B. G. Kaplin, jeweler, who has gone to Atlantic City for his health.

Claude S. Ridenour, Winston-Salem, N. C., and Nelson Farney, York, have entered the engraving department of the Bowman Technical School. Roy Gallatin, a student, has gone to his home in Troy, Pa., for his vacation.

William Pirosh, of Pirosh & Simmons, has become the possessor of several rare pieces of currency. Two are Maryland half dollars of 1774. Another is a five-shilling piece, issued in 1773, on the Assembly of Pennsylvania.

The beautiful silver loving cup recently presented by the employes of the Hamilton Watch Co. to President Charles D. Road is now on exhibition in a show window of T. Wilson Dubbs, where it attracts much attention. A display is made of the new "Lady Hamilton" watches, arranged around the cup.

New Orleans, La.

Sam Hart left for New York Saturday to purchase stock.

Arthur Hirsch, representing Jonas Hoch, was here last week.

Ed. Bohn returned during the week from a road trip for Leonard Krower.

Moise Waldhorn and his wife will reach New York at the end of the week, en route for home.

Alfred Krower, who is in the firm of his father, Leonard Krower, expects to take his vacation trip early in September, and he will visit Canada, returning by way of New York.

Gabe Hausmann and Mr. Sam. Alder returned recently after a delightful trip from New Orleans to the Elks' Convention, held last month in Los Angeles, Cal., and thence to the Yellowstone Park, Seattle, and Kansas City. Mrs. T. Hausmann is at Asheville, N. C., with her daughter. Louis Hausmann sailed last week from New York and will join his family in Lucerne, Switzerland.

Buyers Convention Week was conducted by the New Orleans merchants last week, and expectations were fully realized. The register at the Progressive Union shows 459 visitors from four States. Among the guests were a number of jewelry men. Isaac Popkin, of Franklin, la., spent a couple of days here, made some purchases, and left Wednesday for New York. Among the other guests were: A. E. Morlan, Gulfport, Miss.; Ben Wolf, of the B. Wolf Jewelry Co., N. Maier, Aberdeen, Miss.

Newark.

M. Hagerstrom, of the Hagerstrom Co., will leave for the mid-west on Aug. 15.

Edmund B. Kohn has returned from a trip to the White Mountains, where he spent July.

Oscar Callan, a manufacturing jeweler, Baltimore, Md., was visiting in Newark recently.

L. T. McAuley, of T. Hausmann & Sons, Ltd., New Orleans, La., was in Newark during the week.

Elwood Williams, superintendent for the Bailey, Banks & Biddle Co., Philadelphia, visited a number of firms in Newark during the week.

The Gillette Safety Razor Co. has purchased a site in Newark, near the Elizabeth city line, for a new factory, to cost in the neighborhood of \$250,000.

Newark jewelers are expecting one of the busiest Fall seasons in years. In fact, many have tangible evidences already in encouraging orders from all parts of the country.

F. W. Rowe, president of the New Jersey Retail Jewelers' Association, announces that the association will meet at Trenton, N. J., Sept. 29, and desires that all the jewelers of the State join the organization and attend the meeting.

The Elm Mfg. Co., 19 Liberty St., will be represented in New York, Boston, Baltimore and the States of New York and Pennsylvania by Percy Smith. R. C. Dick will be the representative of the concern in the middle west as heretofore.

Among the New York firms which, with the completion of the tunnels under the Hudson from Hoboken, have decided to come to Newark, is the Shiman-Miller Mfg. Co. The J. W. Rosenbaum Art Metal Co. is another New York concern coming here.

George A. Allsopp, Jr., of Allsopp & Allsopp, is in the west, and reports indications of a fine Fall season. Mr. Holbart is in New England for the same firm. Henry George is in Pennsylvania. Mr. Thomas has started on his southern trip, and Mr. Morley is touring the east.

Work has been begun on the three-story building for the Newark Brush Co., of which Edward Gniel, one of Newark's fire commissioners, is the head. The plant is located at 253 Mulberry St., and will be equipped to supply brushes to the jewelry trade. It will have a store front.

I. J. F. King, owner of a jewelry store at Ashbury Park, N. J., lost \$200 worth of gems last week, when a burglar entered his store. The thief was frightened away by a young woman who entered the store next door just after he had collected nearly all of the jewelry that was visible outside of the safe.

Mr. and Mrs. Morris Levy, claiming Philadelphia as their place of residence, are held here, charged with the theft of about \$6,000 worth of jewelry from a number of stores. They were arrested in a 5 and 10 cent store and protested their innocence. The police officials were inclined to think a blunder had been made, until a search of Mrs. Levy's pockets revealed a number of jewels. A chamois bag containing valuable rings and brooches was found.

Baltimore.

Hughes & Woodhall expect to occupy their new home about the latter part of this week.

John W. Mealy, president of John W. Mealy & Sons Co., with his young son, is camping on the south branch of the Potomac River, near Springfield, W. Va.

The 65 employes of Jenkins & Jenkins, 216 N. Charles St., were the guests of the firm at their annual outing, recently, at Yoke's Park. In the morning the center of attention was a baseball game arranged between the married men and the single men that resulted in a victory for the married men by a score of 15 to 6. The winning team was presented a silver loving cup nine inches high, while each member received a silver medal. Dinner was served at two o'clock, at which speeches were made by employes and members of the firm. There were other amusements, such as rowing, fishing, crabbing, quoits and the like. The whole party went to the beach in chartered cars.

August Becker, a jeweler at Hanover and Conway Sts., was released for the action of the Grand Jury, last week, on the charge of striking Vollie V. Stokes, a colored steward. Stokes testified that he had bought a watch from Mr. Becker and later found that the timepiece had stopped. He returned to the jeweler and had it exchanged for another watch, when Stokes alleged the jeweler demanded \$1.50 from him, which he refused to pay. He claims that Mr. Becker then pointed a pistol at him and locked the door, while Mrs. Becker tore his hat. Mr. Becker, in his defense, claims that Stokes put the watch in his pocket and refused to pay the difference in price, and that he was determined not to let the negro go without paying the difference or returning the watch. He acknowledged taking a pistol from behind the counter, but claims he did not point it at him. Mrs. Becker said the negro had grabbed her about the neck, but he denied this.

Syracuse.

The United States Post Office Department at Washington has designated the Day Card clock and the Hawley Sheet clock as official clocks for the department. The Government reserves the right to install clocks at any time it desires.

The United States Lens Co. has been formed and it will take over the company's department of the Standard Optical Co., Geneva. The capital is \$100,000. The officers are: President, Wm. Smith; vice-president, Joshua I. Maxwell; secretary and treasurer, H. B. Groves; general manager, Charles E. Wilson, Southbridge, Mass., former superintendent of the lens making department of the American Optical Co. The officers, with Theodore J. Smith and Louis D. Collins, Geneva, and William W. Essick, Reading, Pa., are the directors. A new building for the manufacture of lenses has recently been added to the plant of the Standard Optical Co., and this will be occupied by the new company. About 60 hands will be employed at first, but eventually it is claimed the number will be increased to 200.

A Mr. White has engaged in the jewelry business in Marthaville, La.

William Fussman has begun business at 350 Spruce St., Camden, N. J.

S. Goldberg will shortly open a store at 286 Broadway, Buffalo, N. Y.

John Grund has opened a store at 3124 Frankford Ave., Philadelphia, Pa.

Edward Bearfield, St. Louis, Mo., will soon open a store at Little Rock, Ark.

A new store has been opened by S. P. Bessmer at 202 Saginaw St., Flint, Mich.

D. Gutter has re-engaged in the jewelry business with his son, R. R. Gutter, at 98 Bowery, New York.

E. H. Barrett, Cleveland, O., has completed arrangements to open a store on Main St., in Painesville, O.

The Garin Jewelry Co. is a new concern which was recently incorporated with a capital stock of \$25,000 in San Francisco, Cal.

George A. and Ed. M. Klein have begun a jobbing business at 212 Wysor block, Muncie, Ind. They carry a general line of solid and gold-plated jewelry.

The William A. Block Co. has started in business in Philadelphia, Pa. The establishment will be located at 711 Sansom St. The concern will make a specialty of diamonds and diamond mounted jewelry.

The United Optical Co., of Camden, N. J., has been incorporated, with a capital of \$50,000. The incorporators are W. F. McLean, Henry McAlister and Joseph A. Schmid. The concern will deal in optical goods.

The One Hand Clock Co., Los Angeles, Cal., has been incorporated, with a capital stock of \$1,000,000. The directors are Fred C. Windsor, Robert Longtime, A. D. Windsor, Charles A. de Calla and Herbert A. Harvie.

The Loeb-Kahnwieler Co. has filed articles of incorporation in Chicago, Ill., with a capital of \$25,000, to do a general jewelry and manufacturing business. The incorporators are: A. Kahnwieler, G. Blockey and George W. Miller.

The Gem Jewelry Co., of New York, was incorporated, recently, with a capital stock of \$25,000, to manufacture jewelry and novelties. The incorporators are E. J. Forlan, H. M. Browne and J. J. Harper. The business will be located at 151 Nassau St.

The Jewel Bead Co. is the name of a new concern which recently filed articles of incorporation in Chicago, to manufacture jewelry. The capital stock is \$2,500. The president of the concern is N. L. Pietrowski, whose office is located at 307 Ashland Block, Chicago.

Extensive improvements have just been completed in the retail jewelry establishment of James Bros. Jewelry Co., Columbia, Tenn.

THIS WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS

UNITED STATES PATENTS.

PUBLISHED JULY 27, 1909

929,023. CLOCK CASE. CHARLES E. SANFORD, New York. Filed Nov. 13, 1908. Serial No. 462,373.

A clock case comprising in part a dial formed in two independent and separable sections, each of

said sections being constructed and arranged to slide in and out of said case and independently of the other.

929,024. CLOCK. CHARLES E. SANFORD, New York. Filed April 21, 1909. Serial No. 491,247.

The combination with a clock case, provided with a pivot, of a supporting frame rotatably mounted on said pivot, means for securing said supporting

frame in its different adjustments, a clock mechanism hinged to said supporting frame, an arbor carrying clock hands and forming a part of said clock mechanism, said arbor being in axial alignment with said pivot.

929,069. ELECTRIC-LIGHT-CONTROLLING DEVICE. ARTHUR L. WOOD, Jacksonville, Ill. Filed July 8, 1908. Serial No. 442,463.

The combination with a clock dial and mechanism, and a spindle operated by said mechanism, of an arm mounted on said spindle, a wheel carried

on said arm and having spokes, a series of pins arranged in the path of the spokes of said wheel, an insulated electric terminal supported by said

spindle, and means carried by said wheel for making contact with said terminal.

929,149. HAT-PIN. JOSEPH A. MARTENS, Corona, S. D. Filed Aug. 18, 1908. Serial No. 449,015.

A hat-pin, circular in cross-section at its pointed end and provided with a perforation in its pointed portion, in combination with a guard comprising a rigid, central, socketed portion open at one end and closed at the other end; a guard surrounding

the socketed portion, a spring-latch carried by the socketed portion and extending into it and which is adapted to enter the perforation in the pin when the latter is inserted in the socket and abuts against the closed end thereof.

929,227. TIME-RECORDER. JAMES F. KIELY, Syracuse, N. Y. Filed May 10, 1904. Serial No. 207,258.

In a workman's time-recorder, a time printing device and operating means therefor, in combination with mechanism brought into action by said means at each successive printing operation

by the same workman after the first registration to shift the printing device and thereby cause successive impressions by the same workman to be made at different points.

929,269. ELECTROMAGNET FOR CLOCKS AND MOTORS. CAROLUS ARNOLD, Hamburg, Germany. Filed May 11, 1908. Serial No. 452,315.

In an electromagnet for small motors and for driving electric clocks, a resistance to the reception or absorption of the effects of induction set

up in breaking the circuit, said resistance being arranged in the form of an inductionless double coil of opposite directions upon the magnet coils directly.

929,228. TIME-RECORDER. JAMES F. KIELY, Syracuse, N. Y. Filed July 17, 1906. Serial No. 326,620.

In a workman's time-recorder of the class described, the combination with a rotary printing element and a clock rotated support for the record sheet, one of the parts being movable axially, of a rotatable manual for rotating said support, said manual having an independent movement, and con-

nections between said manual and one of the parts whereby the independent movement of the manual shifts said movable part axially, mechanism for stopping the axially movable part at different distances from its starting position by each successive printing operation by the same workman, and additional stop mechanism brought into action by the first named stop mechanism to relieve the strain upon the latter.

929,340. ALARM-CLOCK. ELMER E. STOCKTON, Bristol, Conn., assignor to the E. Ingraham Co., Bristol, Conn. Filed Jan. 22, 1909. Serial No. 473,739.

In an alarm-clock, the combination with a cir-

cular sheet-metal case, of a bell arranged within the same, and sound-holes located in the vertical plane in position to let out the sound of the bell.

929,360. FOUNTAIN-PEN. HEATON H. WRIGHT, West Haven, Conn. Filed March 11, 1908. Serial No. 420,378.

The combination with a fountain-pen formed at its forward end with an enlargement and with a constriction at the base thereof and provided with a flexible ink sack projecting from its outer end, and with a cap for the protection of the said sack; of a cork having a pen-receiving hole formed with

a flexible edge located in the plane of the top of the cork and entering the constriction at the base of the enlargement at the forward end of the body of the pen to form an ink-tight point between the

pen and the cork when the pen is to be filled, whereby by inserting the enlargement of the pen into the pen-receiving hole of the cork and turning the ink-bottle upside down and manipulating the ink sack the ink may be drawn from the bottle into the body of the pen.

929,414. COMBINED MATCH-SAFE AND CIGAR-PERFORATOR. ARTHUR L. ERSKINE, Charleston, W. Va. Filed Feb. 16, 1909. Serial No. 478,157.

A device of the character described, comprising a body portion, a hinged closure therefor, and a perforating device, said perforating device consisting of a slidable rod supported in hangers depending from the under side of said closure, said rod having one end bent at an angle with its terminal

arranged contiguous to the under side of said closure and pointed, said closure having an aperture arranged contiguous to the pointed end of said rod, the opposite end of said rod being also bent at right angles in a horizontal plane, and having said right angled portion extending laterally through said closure, said closure having a slot receiving the latter right angled bent portion of said rod, and a resilient member applied to said rod of said perforating device and delivering its pressure upon said rod.

929,531. DEVICE FOR CONVERTING ORDINARY CLOCKS INTO CLOCKS WITH ELECTRIC DRIVING MEANS. AUGUST ANDERS, Charlottenburg, Germany. Filed June 19, 1908. Serial No. 439,296.

In clock provided with arrangements for converting mechanical operating means into electrical operating means, the combination with an armature, electromagnet means for operating the armature, a lever connected with the armature and provided

with a cross rod, a pair of levers, resiliently supported abutments 9 and 10 on the respective levers, the driving shafts of the striking and the moving works being provided with a carrier loosely mounted thereon, a ratchet on each of said carriers, ratchet wheels connected with the said works and operated by said ratchets, and adjustable rods connecting said abutments with said carriers.

929,535. SWIVEL. JOSEPH S. AUGUSTINE,

Taherg, N. Y. Filed Sept. 24, 1908. Serial No. 454,625.

A swivel comprising a saddle and a loop remov-

ably mounted on the saddle, and means mounted on the saddle and normally retaining the loop mounted on the saddle.

DESIGNS.

40,171. BADGE. JULIUS E. CURTIS, Tacoma,

Wash. Filed May 24, 1909. Serial No. 498,118. Term of patent 3 1/2 years.

40,172. MEDALLION OR SIMILAR ARTICLE. ANNETTE B. TEBBS, New York. Filed May

22, 1909. Serial No. 497,814. Term of patent 3 1/2 years.

40,175. HOLDER FOR POCKETBOOKS. JOSEPH BABST, Hoboken, N. J., assignor to

William Schimper & Co., Hoboken, N. J. Filed May 29, 1909. Serial No. 499,254. Term of patent 3 1/2 years.

40,174. HOLDER FOR POCKETBOOKS. JOSEPH BABST, Hoboken, N. J., assignor to

William Schimper & Co., Hoboken, N. J. Filed May 29, 1909. Serial No. 499,253. Term of patent 3 1/2 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall

prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 1 year next preceding the passage of this act."]

PUBLISHED JULY 27, 1909.

Ser. No. 42,861. (CLASS 27. HOROLOGICAL INSTRUMENTS.) BAWO & DOTTER, New York. Filed June 5, 1909.

Particular description of goods.—Clocks.

TRADE-MARK REGISTERED, JULY 27, 1909

74,642. CERTAIN PRECIOUS-METAL WARE WEBSTER Co., North Attleboro, Mass.

Filed Feb. 18, 1909. Serial No. 40,628. Published May 25, 1909.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1908, FROM THE Illustrated Official Journal.)

ISSUE OF JULY 17, 1909.

6,562. CLOCKS. BRITISH THOMSON-HOUSTON Co., London.—(G. H. Rupley, Schenectady, N. Y., U. S. A.). March 24.

Winding Mechanism.—The mainspring in a barrel 20 integral with the first wheel 21 of the clock train is wound up by an electromotor 10, which is geared to the barrel arbor 14 by a train 12 to 15. The second arbor of the clock carries on an insulating-sleeve 29 a drum made partly of metal 25 and partly of insulating-material 30, Fig. 5, and on this drum is a loose wheel 27 which is geared to a wheel 26 on the barrel arbor and carries a bent spring contact-finger 36 to feel the drum. As the mainspring runs down, a spiral rib 31 separating the two parts of the drum keeps the con-

tact-finger on the insulating-part, but eventually lets it escape from one end to the conducting-part. The winding-up which then ensues proceeds till the finger has run round in the same direction to the other end of the rib, from which it springs again to the insulating-part. If the current is not applied, the unwinding proceeds further, and a spiral thread 34 on the metal part of the drum guides the finger to a stop 35. If the clock is driven from the winding-arbor without a barrel the contact-finger, like the mainspring, is attached to the framework, and the armature of the motor

is shifted into gear with the winding-train by an electromagnet arranged in the motor circuit.

Maintaining Power.—Where a train is driven from a mainspring F without a barrel, one of the pinions *p* is loose on its arbor, but is connected thereto by a helical spring M, and is prevented from reversing by a ratchet N and pawl P.

6,700. FASTENINGS FOR BRACELETS, ETC. J. G. HASLEHCRST, Weston-super-Mare, London, March 26.

Relates to fastenings for necklets, bracelets, chains, etc., of the type in which a headed stem enters the wide part, and is drawn into and se-

ured in the narrow part, of an open wire frame. The sides *c* of the frame are brought close together at *d*, between the parts *c*¹, *c*², to give a spring locking action, and the part *c*³ is turned up nearly at right-angles to the rest of the frame.

Applications filed July 5, 1909, to July 10, 1909.

15,588. CIGARETTE HOLDER. OTTO PILZ, London.

15,722. ADJUSTABLE CARRIER AND STAND FOR SERVICE SPOONS AND FORKS. WILHELM KAUFMANN, London.

15,796. SAFETY LOCKET. SAMUEL T. RUDGE, SWINDON.

15,814. PIN-POINT PROTECTORS. THOMAS WALL, Birmingham.

16,054. HAT-PIN. ARTHUR T. HORNBY, London.

16,096. IMPROVEMENT IN THE STEMS OF HAT-PINS AND THE METHOD OF THEIR ATTACHMENT TO THEIR HEADS OR ORNAMENTS. CHARLES SHUTTLEWORTH, Birmingham.

15,716. HOLDER FOR TOOTHPICKS, MATCHES AND THE LIKE. MAX PASZKOWSKI, London.

Complete specifications accepted July 14, 1909, 1908.

14,071. CLOCKS. HERSCHEDT.

14,362. METAL HANDLES FOR TABLE CUTLERY AND OTHER LIKE HANDLES. HATFIELD.

14,574. CLOCKS. PARKER.

16,087. FOUNTAIN-PEN. HOUSTON, 1909.

2,001. FOUNTAIN-PEN. FERRIS.

2,771. CIGARETTE, CIGAR, CARD, FUSEE, OR SUCH LIKE CASES. FRANCIS.

7,520. BALANCES OF WATCHES AND CLOCKS. JOYE.

9,930. SPECTACLES. BAIN & NEWBOLD.

Business Procedure Required of American Merchants Dealing With Brazil.

Vice-Consul Dirk P. De Young, of Santos, gives three pointers which he says cannot be too frequently and persistently impressed upon American exporters seeking to establish a permanent and profitable trade in Brazil. These matters are often neglected and generally cause more or less annoyance, loss of trade, and sometimes loss of money. He outlines them as follows:

When possible, exporters should make such arrangements with the consignee that the latter assumes the responsibility and expense of clearing the goods at the port of arrival. If it be impossible to do so, they should make a careful study of the Brazilian tariff schedule, so as to be able to classify their goods in an intelligent manner, avoiding excessive taxes. There is no end to the trouble American exporter cause by utter ignorance of how to classify their own goods under the Brazilian tariff schedule, and by failing to transmit the necessary documents for clearance. Only recently an American manufacturer of post cards sold 2,000 cards to a local merchant and, because they were poorly classified, a duty of 500 per cent. on the New York price was levied against them. This might have been 200 per cent. less than he classified them as mere printed matter.

Other articles are now being held up at the customs house here, with storage charges against them for more than they are worth, because the shipper, or his broker in New York, did not send along the necessary shipping documents, without which it is impossible to clear the goods. The exporter referred to writes letters blaming the consignee, when his, or his agent's, negligence is entirely to blame for the unfortunate incident. When goods are not marked plainly, in a manner which leaves no doubt as to what they are, the highest possible tax is always levied and, if not marked correctly, an additional tax is imposed in the nature of a fine. If these regulations seem severe, the way to avoid their penalty is to obey them.

American exporters should, by all means, not neglect to place a 5-cent stamp on all letters to Brazil. There are countries to which letters are carried for 2 cents, but not in South America. It is the source of considerable humiliation to those representing American interests in foreign lands to know what a large per cent. of American letters arrive at the local post-office short paid. The error is not generally made by European exporters, and it tends to cheapen the appearance of American business methods. The managers of American exporting houses are not doing this intentionally, but by neglecting to see that stenographers or errand boys, whose duty it is to stamp the letters, does it, they get the criticism at this end of the line.

The overdue charges here for the regular 5-cent allowance is generally 240 reis (about 7 cents), but since they can not change the 100 reis at the office, 300 reis (9 cents) is always charged. This 9-cent overdue charge added to the 2-cent stamp used in the first place makes 11 cents for the letter, when it could have been carried by a 5-cent postage stamp. A short-paid

letter always has a negative effect when soliciting trade, and besides damaging one's interests it reflects upon American business methods in general.

Not all brokers and merchants are responsible, therefore great caution should be exercised to avoid bad debts. This is as true of home brokers as it is of those at the foreign port. There are, however, a lot of reliable brokers, both at home and abroad, and accurate rating can be had from those here by writing to the leading banking institutions of Santos. Consular officers are, of course, always ready to assist those who get into difficulties, but if a little more care were exercised by shippers many pitfalls could be avoided.

Death of Browning B. Nickerson.

PROVIDENCE, R. I., Aug. 2.—Browning B. Nickerson, treasurer of the Roger Williams Silver Co., died late yesterday afternoon at his home, 33 Francis St., this city. Mr. Nickerson's illness dated from February last, but he had only been confined to his bed a few days.

Browning Baker Nickerson was born in South Dennis, Mass., Jan. 21, 1857, and was, therefore, in his 53d year. He was the son of Ira and Abbie Nickerson, both of whom came from the best-known and oldest families on Cape Cod. He was brought up at Cape Cod and lived there until he was 17 years of age. At that age he decided that Providence offered excellent opportunities for advancement to a young man, so he came to this city. He had little trouble in securing a position, and steadily advanced until he became head clerk for George L. Stetson, who kept a notion store on South Main St., a quarter of a century ago. After leaving Mr. Stetson he went with the Spicer & Peckham Co. as bookkeeper, and remained with that firm for 18 years, or up to the time of its dissolution.

In 1905 he became associated with the Bannigan Rubber Co., and because of his business and executive ability he was soon made confidential man and then financial secretary for John J. Banigan. He took the position of treasurer of both the Roger Williams Silver Co. and the Daggett & Miller Co., which he held up to the time of his death.

Besides being prominent in business affairs Mr. Nickerson was also active in church matters. For many years he was one of the most prominent supporters of the Hope St. Methodist St. Church, holding the position of church treasurer until he resigned to affiliate himself with the Mathewson St. Methodist Church. He was a member of Rising Sun Lodge, A. F. and A. M., of East Providence, and of Unity Council, Royal Arcanum, of Providence. He leaves a widow and one son.

The stock of Walter S. Riddle, Guymon, Okla., was recently attached.

The business of the late J. B. Courtright, Port Jervis, N. Y., was purchased recently of the administratrix by Joseph Stuhlbach, of Stafford Springs, Conn., who will shortly take up his residence in the former place. The new purchaser is a practical watchmaker and will continue the business at the old location with a complete line of stock.

Get the Railroad Trade

CONTROL the railroad trade in your district and you are assured of a good business. The duties of railroad men require them to have a correct and durable watch.

It is also true that other trade follows railroad trade, because the patronage of railroad men at once stamps your stock as *reliable*. The Railroad

Elgin

is designed especially to meet the requirements of the railroad man. The silver finish metal dial is most popular because the faintest ray of light illuminates it. This is the *only* metal dial made with *inlaid* figures of *hard enamel*. Some prefer the white enamel dial.

The Railroad Elgin is the thinnest 18 size watch made. It is timed and cased at the factory, and will run longer on one winding than any other railroad watch.

Another sales factor is *Elgin prestige*; for the Elgin is the most popularly known watch in the country, and this particular Elgin is everywhere recognized as a standard railroad timepiece. Advertising in railroad magazines is familiarizing it among railroad men who are anxious to see it and who are asking for the Elgin with the "49 silver dial" or the "49 enamel dial."

You can't control the railroad trade with a poor watch; but you *can* with the Railroad Elgin. Write to your jobber or to the company direct for prices.

These are the four grades and established retail prices as advertised:

	GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILLED
VERITAS		23 JEWELS	\$46.00	\$48.00
VERITAS		21 JEWELS	\$43.00	\$45.00
FATHER TIME (VERITAS MODEL)		21 JEWELS	\$38.00	\$40.00
B. W. RAYMOND	" "	19 JEWELS	\$34.00	\$36.00

THE HOROLOGICAL REVIEW

The Astronomical Observatory at Greenwich.

Built by Charles II, in 1672, and Since Known as the Mariner's Standard Clock.

If we turn to a map of London we shall easily find, on its southeastern border, where the Thames in a bold turn, bends in horseshoe shape southwards, the name of Greenwich (pronounced Grinitch, both syllables short). It is one of the numerous suburbs of London. In the map of Greenwich, we should readily find the park bearing the same name. It embraces a rolling territory, and on a hill about 300 feet high stands the building that has made Greenwich one of the best known names in the world. Our illustration shows it; it is the Greenwich Observatory.

If we designate all the devices that serve for the observation of the heavenly bodies, observatories, says the *Deutsche Uhrmacher Zeitung*, ancient peoples, of the hoariest antiquity, have possessed observatories. But here a distinction must be made. What we understand now-a-days as an observatory is a building equipped with the most modern apparatus for the searching of the heavens. These apparatuses only became gradually possible after the discovery of optical lenses and the perfection of metal working in the way of technical precision. The history of observatories, as we understand the term now-a-days, may be traced to the Observatory at Paris, built between 1664 and 1672. Nevertheless, the Greenwich Observatory, built by Charles II. in the year 1672, was the first that was, from its inception, correctly constructed. It was very liberally equipped with all the necessary instruments, and has maintained its pre-eminence, although the mists and fogs that so frequently envelop the great city in their gloomy mantle have long greatly restricted the field of its utility, just as the Berlin Observatory, located in the center of the city, suffers from the veil of mist that hangs over the sea of houses.

It is an ancient fame on which the observatory near London still draws. None of the discoveries that have evolutionized astronomy has emanated from it, but, as the first astronomical observatory of the leading maritime nation of the civilized world, it became the mariners' standard clock, and has so remained until this day. From Greenwich are reckoned the 360 meridians of longitude, which the geographer, the astronomer and the mari-

ner pictures to himself as described on the globe like the seams in a peeled orange.

At right angles to these are the degrees of latitude and with the aid of their instruments and the heavenly bodies, the seaman locates himself in regard to the invisible network in a manner that is to a landsman an incomprehensible riddle. Is it not astonishing how the ocean steamships plying between Europe and America, although they do not run in tracks, follow constantly, with such slight deviation, the same roads that they must long since have worn broad

THE FAMOUS GREENWICH OBSERVATORY.

highways over the ocean but for the nature of water, which in the next moment completely obliterates their tracks?

To have been first to lay out the means whereby, in regularity and safety, the mariner can sail and steam on his course, has been the most valuable service rendered by the Greenwich Observatory. Inasmuch as the meridian is permanent and cannot be removed from it, the principal purpose of the institution now is to furnish England with the correct time. Only for Central European Standard time another meridian was sought that would be really central to Europe, and not on its edge, and resulted in the selection of the meridian 15 degrees east of Greenwich, which passes approximately through Stargard and Lörnitz.

As the illustration shows the observatory, it has probably not always appeared. But the main features of the severe old English style are still predominant. Groups of trees somewhat modify its severity and give it the air of a villa dominating the crest of the hill. Only the great clock, facing the outlook over the park, indicates that behind the walls there is a scientific institution. It is doubtful whether the visitors on the benches on top of the hill, while enjoying the view, have any idea of the tremendous importance to civilization of that which is embodied in the unobtrusive building.

Strange History of the Watchmaker, Karl Wilhelm Nauendorff.

CHIEF Pastor Recke, of Spandau, lately gave an interesting lecture on the remarkable history of Karl Wilhelm Nauendorff, the reputed son of Louis XVI. The lecture was based on documentary matter, and dealt mainly with the period of his residence in Spandau. Armed with a letter of introduction from Le Coq, State Councillor and Head of the Berlin police, Nauendorff (usually written Nauendorf) migrated in 1812 from Berlin, where he had lived for two years, to Spandau, where he passed 12 years of his life. He was a watchmaker by trade, and received the right of citizenship after he had taken the oath in the prescribed form, dressed in the uniform of the National Guard.

He enjoyed an honorable reputation both as a man and as a watchmaker. He seldom spoke of his claims to royal rank in Spandau, only occasionally alluding to them when in the company of intimate friends, on whose discretion he could rely. When he left Spandau in 1882 he was less reserved. He gave a dinner to his friends and neighbors, at which he said: "Next time I hope, as the legitimate King of France, to see you at my festal board in the palace of Versailles." Many believed in him, and even to-day this belief has not quite vanished among old Spandauers whose parents are said to have been well acquainted with him.

Nauendorff's first wife, Hanne Hassert, died in Spandau on the 15th of September, 1818; besides the widower, a son, Johann Christian Hassert, believed to be the issue of a former marriage of the deceased with a soldier, is entered in the parish register as a survivor. Exactly two months after this bereavement Nauendorff married again; his second wife was Johanna Frie-

WALTHAM WATCHES

FIFTY YEARS AGO

FRIDAY, APRIL 22, 1859.—The proprietors and workmen of the watch factory at Waltham were entertained by Gov. Banks at his residence today. About 200 men and women were present.

From Boston Advertiser, April 22, 1909.

The Waltham factory had existed five years. Here was the first successful effort to realize the dream of Dennison, father of American watch-making. Here was the first and only structure in the world erected for manufacturing pocket timepieces. Three hundred people were employed, the largest number ever assembled in such an enterprise. General Banks was proud of Waltham, where he was born and where he had worked as bobbin boy in a cotton mill. He found time, while Governor of a great State, to greet and encourage the operatives of this watch factory, because he believed that they were creating an imperishable industry. He lived until the word WALTHAM had symbolized the perfect watch in every country on the globe.

In that year, 1859, the total number of Waltham watches manufactured was 12,304; in 1906, the product was 855,000; to-day there are 16,000,000 in use. The Waltham factory was the parent factory. It is now the corner-stone of an industry that gives a livelihood to more than 100,000 persons in the United States. In 1859, it was the only institution of its kind here or anywhere else; every other watch factory came later. The Waltham factory is distinguished by its achievements as well as by its age. Waltham watches have always exemplified the highest type of watch construction, and public recognition of their superiority is attested by the highest awards at all the great Expositions wherever they have been shown.

The history of the WALTHAM WATCH COMPANY is the history of watch manufacturing on this hemisphere.

derike Einert, a girl of 16 from Havelberg. She is described as pretty and amiable. Nauendorff at that time gave his age as 43, but if he was really the son of the French king he could not have been more than 33, for Louis XVII. was born on the 27th of March, 1785. The suppression of his real age and the concealment of his name are said to have been due to political reasons. Neither the parish nor the magisterial registers throw any light on the matter.

The first child of this second marriage, a daughter, Johanne Amalie, was born on the 31st of August, 1819. She bore, as was discovered later, a striking resemblance to the unhappy Queen Marie Antoinette; her appearance, as well as that of her father, who possessed some of the royal lineaments of the Bourbons, made a great impression in France at the time. She died on the 28th of December, 1891, at Messac, in France, at the age of 72.

In addition to the name of the daughter, the parish register contains the name of Nauendorff's son, Karl Eduard, born in Spandau on the 23d of July, 1821. The latter continued to assert his claims to the throne of France after his father's death, which took place in 1845. Karl Eduard died at Breda, in Holland, in 1883, as the "Duke of Normandy." His son, Capt. Charles Louis de Bourbon, like his father an officer in the Dutch army and possibly the future King of France (sic), is living at present in Middelburg, Holland.

It is a remarkable fact that the Royalists, nobility as well as priesthood, have always, down to the present day, shown the liveliest interest in the lives of Nauendorff and his family by making constant inquiries at the parish offices and municipal courts in Spandau; replies to some of these inquiries were sent from Spandau last Autumn.

The Thinnest Watch.

THE thinnest watch so far made was recently turned out in Locle and is a timepiece of precision, says an exchange. The most astonishing feature, however, is that the watch is only three millimeters (about an eighth of an inch) in thickness. This is veritably a technical work of art. We must remember that more than a millimeter must be deducted for the case and crystal, so that for the movement itself, the pivots, the jewels and the hands but 1.9 millimeters is left.

The spring is 0.5 millimeter wide, and with this reduced width must operate a complicated mechanism, hour, minute and seconds hands. How minute must be the balance and the delicate escapement construction! And, after all, the main wonder, how exact must it all be made to insure the timepiece running true to five seconds in a day! A day has 86,400 seconds, and this wonderful watch records them with such remarkable uniformity that the balance, no thicker than a hair, swings regularly back and forth and varies but five seconds in 86,400.

A dispatch from St. Petersburg says that, beginning Aug. 1, the Russian telegraph system made use of the 24-hour clock, the numerals 12 to 23 being used to designate afternoon.

How Much Wear Is a Consumer Entitled to on a Time Guaranteed Watch Case?

Address of ALBERT M. DUEBER, President of the Dueber-Hampden Watch Works, before the recent Convention of the A. N. R. J. A., at Omaha, Neb.

WHEN your president, Mr. Archibald, wanted me to speak before The American National Jewelers' Association, on the subject of "Filled Watch Cases," I immediately recognized the good that could come from a talk upon this subject; in other words, the opportunity of a better understanding between the retail jeweler and the manufacturer upon this all-important subject.

If the present manner of handling guaranteed filled cases continues, in the course of time the jeweler will have no sale for filled cases, but will only be an agent through whom they are sent to the manufacturers for exchange. As the matter stands now, a consumer will buy a case from a retailer, guaranteed for 20 years, and say in 10 years he comes back and shows where the case is showing wear, and the jeweler concludes to return to the manufacturer with a request for a new case. Up to this point it is all right, fair and regular, but the manufacturer supplies a new case, guaranteed to wear 20 more years, and gets absolutely no credit for the 10 years' use that the purchaser has had from this case.

Why would it not be fair for the manufacturer to give the wearer a new case for the unexpired term of the old one, but bearing an equal amount of gold as the original case? This, I think, is a feasible plan, and could be worked out successfully. I have no doubt but what all manufacturers and retailers would welcome such a plan. It certainly would be giving the consumer all he expected, and, to say the least, entitled to.

There is no other line of business in the world where a similar condition exists, neither is there a manufacturing business in the world which guarantees its goods and lives up to it as the American filled case manufacturer does from the largest to the smallest.

There was an effort made by certain manufacturers to pass a law at Washington, prohibiting the guaranteeing of filled watch cases. The originator of this bill claimed it would do away with the "fake" cases that are now in existence. But the trouble with the proposed law was that it did not go far enough—it should have made it compulsory to stamp the cases with karat mark and decimal thickness of the gold.

If we are to have any legislation on the filled case business, my idea of the only way that it should be is that the manufacturer should be compelled to put on a certain decimal thickness of a certain fineness of gold for each five years that it is guaranteed to wear. For example, a case guaranteed to wear for five years would have, on the wearing parts, a rolled plate of 10 to 14 kt. gold 1-1000 of an inch; if guaranteed for 10 years 2-1000; 15 years 3-1000, etc., or whatever thickness may be determined upon. This would at least in-

sure quality in watch cases, which is not possible to do at the present time.

There is no business that I can call to mind in which the merchant has to be as careful of the class of goods he purchases as the retail jeweler. He should be conversant with all the trade-marks of reputable watch case manufacturers, and buy no goods from any one unless he is absolutely sure of the integrity of the manufacturer in the back of it.

In support of this statement, I have here a watch case and a button of metal that was once a watch case, the exact duplicate of the one I have here. This case is stamped inside "Guaranteed 20 years. H. & S. Mfg. Co." After I have read the assayer's report I think you will agree with me they meant 20 minutes. If anyone can tell me who the H. & S. Mfg. Co. is I would like to know it, although I know the name of the firm who manufactured this case.

The assay of this case is as follows: A thin electric plate inside; the outside plate is only 8 kt. and the total gold value is 23 cents. These cases cost me \$1.40 each; the jobber told me he sold them to me at cost, so you see this manufacturer gets \$1.40 for a case with a gold value of 23 cents, leaving for making \$1.17; and the cost of making this case is not more than an ordinary brass case. You can see what a fine thing they have out of this as far as the monetary end of it is concerned, as there is no one to whom you can look to for the guarantee in case the purchaser brings it back.

These disreputable cases all have a tendency to destroy the prices of the better and honestly made goods, as you well know that no manufacturer can make and guarantee a case for 20 years and expect to live up to it for \$1.40.

Whenever a traveler offers you any very attractive prices on filled cases be sure and ask him the question, "Who made them?"

In conclusion I want to say that I along with the rest of the American movement manufacturers am thankful to Mr. Archibald for his fine work at Washington, in helping us prevent the importation of all these Swiss watches, stamped "Railroad Special," etc., containing 7 jewels and less, and stamped "23 jewel."

A number of pearls have been found in Black River, near Corning, Ark., recently. J. B. Bolton, about a week ago picked up one which was later disposed of for \$2,500. Another was found by George Hensley which weighs 11 grains.

Among the provisions of the proposed ordinances prepared by a committee of the Retail Merchants Association of Hoosick Falls, N. Y., is one placing a fee of \$10 per week for the hawking or peddling of jewelry for each person and \$5 additional for each horse used. No licenses will be issued for less than a week.

NEW YORK: 21 MAIDEN LANE

CHICAGO: HEYWORTH BUILDING

Some Phases of the Ethics of the Trade.

Address by C. R. HART, delivered at the recent convention of the Illinois Retail Jewelers' Association at Peoria.

(Continued from issue of Aug. 4.)

NOW, for the taking in of watches. I have here a price list issued by one of the material houses in Chicago which looks good to me. It's a move in the right direction. Such prices as are commonly asked for watch repairs are frightful. The amount of work done for which no charge is made is appalling; and yet there are many here, no doubt, who have been educated to think that this is all right. This price list for watch repairs is sent out by a Chicago material dealer (you undoubtedly know who he is, for I understand that every jeweler in the State received one). As I read, this looks good to me. Only some things are not high enough, especially among and other things, which we will talk about later.

Some of us must be waking up. This thing watchwork at half price and even less to what should be charged is all nonsense. These "can't" people make me red. Some are always croaking "can't, can't, can't." Anything that is suggested out of the old regime they are always repeating this parrot-like phrase.

I have been at the business over 30 years and have gone through the mill pretty thoroughly. I am not making this statement in a pedantic sense, however, as I presume there is not a man here that has been at the business longer than I have, so trust you will take what I have to say kindly, for I shall talk plainly and it would not be strange if some took exceptions to what I say.

I have gone into places where competitors were half-price men and have won at every time on high prices with quality, which is always imperative. Of course this was years ago. I could stand the work and annoyance better and feel more buoyant than at my age now. But I know from past experience that even now I could go into any town, were it worth my while, and do the same thing over again, only in a larger way. What I can do, so could any man that has the skill of an artisan and a little determination. You say, people won't pay a higher price for watchwork. How do you know? Did you ever try it? Did you ever stop to think how much men think their watches? How anxious they are to have them properly repaired?

Take your own watch, for instance. Suppose for some reason you are not able to repair it. How would you like to have one of these half-price men do it? Oh, yes, you know you say all a watch needs is cleaning. A customer brings in a watch to have it repaired. To show your superior knowledge you open it and with your wise eye peer into its mechanism, and if there is any appearance of dirt you say, "It needs cleaning. It will cost you seventy-five cents or a dollar," according to what you think a customer will stand.

How did you become a mind reader, and how did your sight turn into an X-ray? How could you see the defects in the escapement? or the hairspring, or the condition of the pivots, or the jewels, es-

pecially on the lower plate? Funny, isn't it, what wise men we have in this business nowadays! And, is it any wonder customers are suspicious? Then think what the watchmaker has to do on account of these wise ones. Of course you think this customer is honoring you with the first examination of his watch. Incidentally this might be true, but generally it has been to other repairers, and they may have looked it through carefully as any workman should do and have made a reasonable price. And the customer would be satisfied did your price agree with others, as it should do, and which should be an honest price for honest work, as prices range in other lines of work, for watchwork is of the highest type of mechanical art, and it entails more experience and greater skill and a continuous watchful care during the time intervening between repairs. But, let's suppose, which is not unreasonable, you have made the mistake of making a price for cleaning when other repairs are necessary, which is most common and your customer leaves the watch. And when your workman takes it down (or I should hope it will be you) and that you had to repair it instead of him, and maybe you would learn how not to show your wonderful ignorance quite so often.

The following repairs are found necessary: Three jewels cracked on the lower plate, a soft mainspring in the barrel, balance pivot bent, the hairspring is out of true in the round and flat. Oh, well, you say, fix it up. Then go back to the rear of your store and damn that corner up there, because it don't pay. Yes, lots of you look upon the corner where the watchmaker sits as a necessary evil, and as you feel so you advertise.

You know, that corner where the watchmaker sits reminds me of a boy I knew who had a dog chained to a kennel. Every morning when he went out to feed him, and while he was eating he took up an iron bar and jabbed him in the ribs to hear him growl. Don't you think he growled? And that's the way many jewelers do with their watchmakers. Only they don't want any growling heard.

When they come down in the morning and something has gone wrong up at the house, or they were out late the night before, they take a jab at the dog in the corner. Don't talk to me about that "damn corner," as you call it—and I am not presuming unwarranted language, for I have heard it too many times. Let me tell you, gentlemen, you couldn't do any business without that corner, and you know it. But this may surprise some of you, for you never thought of it in that way, but just supposed you were the whole thing. When you go home you sit down and think it over, and use some of the grey matter that hasn't been working lately and see what a fool you have been for the past 15 or 20 years in many ways.

You probably never have figured out how much you could have made if decent and legitimate prices had been charged. Just take your watch book when you get home and this new list I refer to and see how much you have lost and how much the bench work would have paid had you done as any sensible man would do. Oh,

yes, now some of you would begin to complain if you had a chance and try to excuse yourself and say you can't do that. The man across the way only charges a small price, and I can't do otherwise than he does. And he says the same thing of you, and you never talk the matter over with him nor even speak to him when you meet on the street, do you?

But let's look again at the man in the corner. You men who have been in the business 15 or 20 years I want to talk to now. I trust you will take it kindly, as I mean it in that way. Oh, well, of course, I don't mean all of you, but presume there may be at least two here within the sound of my voice—these are the ones I mean, of course. The others are at home, so I am only talking for the benefit of these two. And the rest of you are sitting here sweltering and listening. But this is only incidental.

A good old customer of yours who has a fair watch comes in and goes way back to the safe, leans over the counter so he can whisper in your ear that the watchmaker may not hear, and he says: "Jim, my watch stopped. I don't know what's the matter with it." For pity sakes! who ever supposed he did? And how few, even watchmakers, know, until after taking down a timepiece what they should know before putting a price on the work? And your customer says in a more audible tone, looking sidewise at the man in the corner. "Now, Jim, I want you to repair it, for you have always done my work right. I don't know about your new man; presume he's good, but I would rather have you do the work." And you are flattered and take it in, don't you, just like a chump, as you or anyone else is that does it that way?

"What fools these mortals be!" said Shakespeare. And I have always thought he included just such men as I am talking about. Now, what should you have said?

Let me tell you how I would have put the matter for that good old customer of yours, and I am not casting any reflections on him either, as he is what you have made him largely. "Now, Jim, see here. What you say about my work is all right, and I appreciate the confidence you have in me, but did you ever stop to think there are lots more just like you? I have worked at the bench for 20 years and have done work good as you say. Now I have hired a man to take my place; don't you suppose I took pains to get a good one to take care of my old customers? Don't you think me capable of telling a good workman, and isn't it to my interests to have one of the best? Well, I rather think so.

"Now you take your watch up to the watchmaker and leave it with him and let him examine it, and you come in tomorrow and he will tell you what it needs and what the price will be for repairs. And, if in the meantime, you need a watch to carry, he will give you one that you may not be inconvenienced in any way. And if your watch is not properly repaired you let me know. I am going to do business on a little different scale than formerly, and I am sure you will appreciate it; and you just tell your friends I have one of the best workmen I can get and he can do

WELL=HOW GOES IT?

Our Traveler Called Upon You Yet?

He's on the way, braving the heat and dust of the road, just to show YOU the finest line of samples you have ever seen. Perhaps you're not ready to buy, but we'll appreciate it if you'll give him a hand clasp and a few words of encouragement.

THANKS!

Here's Just a Pointer for You

finer work than I ever did, for he has had experience in finer watch work than I ever had a chance to do."

Now, don't some of you have a spasm at the mere idea I have suggested, or think should you do such an unheard of thing your workman would soon have all your customers and would start in business for himself, and the corner where you have worked so long and the watches hung so constantly would be left bare and your old customers would buy all their jewelry and watches of him. Strange how you can admit the value of this corner in cases like these, isn't it? But now let me tell you something few of you have discovered. A man who has become a proficient workman (one who is a natural artisan, and you have no business to have any other kind) is a poor man for a mercantile business generally. And few of these men would have any desire to start in business for themselves if their skill could demonstrate their ability to earn a good salary where honest prices were charged for honest work, and here they were not treated like the dog referred to.

When you hire a man you get a good one. What I mean by "good" is the best there is; and you say to him something like this: "Now, my man, this corner is yours to run; I am satisfied you have the skill and I trust that you have the ability to handle this place as it should be. But I want to put you right before you start so you can do your best. I shall expect you to take care of all the watchwork and do it in a thorough and workmanlike manner. I want you to examine all the watches you see in before making a price on them, and do not wish you to do it while the customer is waiting, for should you try there will be times when you would have to neglect other customers or hurry over the movement you were examining and of a necessity miss some of the repairs, which could never be done. Also the taking down of a watch before a customer in your devious way would lead some to think there was little work to do or that it required little time to repair it, as they generally anticipate and others who are very careful with their watches might think you were careless with you on account of your speed, and even on his account take it away, fearing that it could not be properly handled.

Of course some customers will be invidious, and refuse to leave their watches would you not examine them while they wait. But these you must be patient with as they undoubtedly have just cause for being suspicious. You may tell them you always examine work before taking it in and putting a price on it; and that you have a number of watches that were left yesterday that must be examined first, as every customer is treated in the same manner it would not be fair to do otherwise. Under no consideration become angry with any customer, for you probably know that some of them use these methods to find out a good workman—one that is right need feel no rebuff at anything they may say.

"When my old customers come in and want me to look over their watches I shall always refer them to you and shall introduce you to them, and you are to take full

charge of their watch work. When you are out to dinner I shall do the same way, and watches you find on your bench are to be treated in the regular order.

"I want you to take this list of watch repairs and make out your prices in accordance with these given here, with a few exceptions, such as cleaning, which should be charged according to the grade of the watch and the care necessary in handling it properly. Also you will notice there is a little said on this list in reference to trueing and poising the balance, or trueing in round or flat of the hairspring, or of re-dressing the overcoil of the spring, or of adjusting the escapement. This is generally considered to be a part of the cleaning, and as it is so considered and no charge made for it, few take the trouble to do it, as watches in general will show.

"These things you must make a price on in your estimate, not in accordance with the time in which your skill will enable you to do them, but as to the value of their proper adjustment to a watch. You should always remember that the knowledge required in this art is not unlike the doctor's, but which also of necessity combines the skill of a surgeon. And with this consideration you will seldom go wrong. Of course you understand that when a number of things are to be done on a watch a reasonable discount from these prices here, say 10 per cent., is all right. In short, I want you to feel that you're working for my customers and yours, and you will find, as I have, that the ones whom you may reasonably call customers are the ones that appreciate good work, and are always ready to pay for it, and that they will bring you more work than any other method of advertisement, and also make customers as well for the store in other lines."

Now this may all seem absurd to you, but suppose you take some of this home with you and think it over when the weather is not so hot as it is here to-day, and when some of you are not feeling so warm around the collar, and suppose some of you should decide to try it, let me know the result.

But, say, get acquainted with that other watchmaker across the street. Of course, he'll think you are trying to find out some of his secrets, but he'll get over that if you tell him something about this convention. What a strange thing it would be if the watchmakers and jewelers get acquainted and do business in a business way and give their customers good work at a reasonable price. Oh, there are some I know who have become partly civilized, as in talking with your president not long since he told me that while he was out on a little jaunt in his motor car he passed through the beautiful city of Rockford, and saw two competitors in the jewelry business—one was assisting the other in fixing up his show window. Now he did not tell me so, but I presume he grabbed a hold of the lever, shut off the power and applied the emergency brake, and sat there and looked at one of the wonders of the 20th century. I know I should have done this had I been he. Now, don't some of you get excited, or think these men had gone daft, for I can assure you they are two

of the most rational men we have in the business to-day. And your president will verify the incident.

I would like to take up this matter further, but I have already trespassed upon your patience and can assure you that I appreciate the courtesy to the full, for this is no kind of weather to consider such topics as these, however important. But this convention has met here, and as those two I have referred to are still in the room let me take up a few moments longer. Here is an incident of recent occurrence: A young man had been in the Bradley school for some time (and this might have been in any other school as well)—I do not remember just how long—but he had passed through the list up to the finishing department and had been in there a number of months. He was a careful, steady workman, and understood what he went over. He was one of those straightforward young men you could tie to, and having done his work well was desirous of getting a position, which he did in an adjoining State to the one I referred to.

The jeweler agreed to give him fair wages, and when he reached the place he found 60 watches waiting for repairs. When the work was done, which was in proper time, there was little more coming in. Then the jeweler tried the quite common trick nowadays, telling him he would only pay \$12 per week. That's all he was worth, some of you undoubtedly think. Now I know better. I want to say to you gentlemen that he could do work which many of you can't, though you may have been at the bench five or 10 years. And this is no braggadocio, either.

You must remember he had the advantage of my experience, which has been for the past 30 years, which all students have that come to the Bradley, and you might should you attend there. So the insinuation is groundless. The young man did not stay, of course. He has a good position elsewhere. The trouble was not with the young man; it was with the method of the jeweler, whose work was taken in as I have intimated before, at less than half price, as is always the case where it is not properly examined.

One more incident and I am done. I have a letter which came from a man wanting workmen. This is what he said: "I want a first-class watchmaker, a good engraver, one that is familiar with jewelry and clock work and that is a hustler and a business winner. To such a man I will pay fair wages." Another of those \$12 men, no doubt! Or, if not to start with, he soon would be, as the one just referred to.

Now, gentlemen, you can't get men that are worth a continental in that way. You will have to pay good wages for good workmen, as some of you are willing to do, I know. This kind of business is what makes it hard to get watchmakers to leave the large cities. Unmarried men may take a chance, but those with families, never! This kind of business is driving good men out and letting poor ones in.

I have only intimated to you in a brief way some of the more important things, as it seems to me. Others we can thrash out through the jewelers' periodicals.

THE END.

HALL CLOCKS

ELLIOTT'S CELEBRATED TUBULAR CHIMES

Harris & Harrington,
 12 BARCLAY ST.,
 NEW YORK

Sole Agents to the Trade for
J. J. ELLIOTT & CO.
 LONDON

Imperial Westminster Electric 1/4-Hour Chimes

Operated from ANY clock at ANY distance by 10 wet or dry batteries. On Exhibition at our salesrooms, 81 Nassau St., New York. One hundred sets in use.

Received Diploma and Highest Award Medal at the Lewis & Clark Centennial Exposition, Portland, Oregon, U.S.A., October, 1905.

The music of the chimes is the same as the famous Cathedral Chimes of Westminster Abbey, London. Makes a quarter-hour Chime

of any silent or striking clock, converting it into a wonderful outside Chime Timepiece.
Special Note.—By the old methods, to obtain an Outside Clock Chime Timepiece, and the wonderful volume of sound, and the sweet, clear tones in the chimes—to be heard on the street at a great distance—they could only be procured at an enormous expense, while these are within the means of every jeweler and occupy very little space. Placed in vestibule, or outside of building. Write for particulars and testimonial letters.

Manufactured by **THE W. GREEN ELECTRIC CO.** 81 Nassau Street New York, U. S. A.

Always Buy Watches of a Retail Jeweler

A Mail-Order House, Although It May Sell a Good Watch, Cannot Adjust It To Your Person.

No watch you buy by mail will keep perfect time, no matter who made it, how perfectly it is made or what its reputation. A good time-keeper must be regulated to your person as carefully as a good tailor fits a coat. In no other way can you secure perfect time-keeping service. No one but your jeweler can do this. Watches you buy of mail-order concerns are not and cannot be so regulated. That is the reason they never keep perfect time and always run too fast or too slow. The variation of over one thousandth part in the vibration of the delicate watch balance which governs the movement, means a loss or gain of a minute and a half each day. South Bend Watches are sold only by reliable jewelers. They are never sold by mail, because South Bend Watches are so good that we do not want their great reputation for reliability and accuracy injured by improper regulating. We make South

Bend Watches as nearly perfect as it is possible to make a watch and pay the jeweler to regulate it to keep perfect time in your pocket. A watch which is a perfect time-keeper in one man's pocket, very likely will not keep time at all in another man's pocket. If you carry a South Bend Watch you will know that the watch you carry will stand tests that are twice as severe as any that you are ever likely to give it. It might be frozen solid in a block of ice, it would still keep satisfactory time. Every adjusted South Bend Watch, before it is sent to your jeweler, is baked in an oven heated to 100 degrees Fahrenheit and kept for hours in a refrigerator at freezing point. It must keep perfect time in every position and not be affected by the jars and jolts of railway trains, horseback riding, etc. It is built to stand the hardest wear and usage you can give it. A South Bend Watch, although it is the best watch in the world, costs you no more than other good watches. Your jeweler will gladly show them to you and tell you why they are the best watches for you to buy. And compare index for our handsome book "How Good Watches Are Made," and so interesting little device showing how South Bend Watches adjust themselves to every temperature. Don't fail to look with your jeweler about watches before you buy any watch.

WALTER FRAZER BROWN

Western Representative

Columbus Memorial Building

CHICAGO

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The hammer blow is too weak to get the tone out of good bells; only thin, light bells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MONASTERY," which are heavy, powerful brass works, with solid steel pinions and built as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture, fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular bells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

Prices F. O. B. New York.

No. 82.
89 in. x 20 in.
Solid mahogany case, brass dial, black numerals, etched sun rays, decoration in center, corners and arch; brass covered weights.

The Superiority of Fulcrum Watch and Clock Oil

HAS BEEN PROVEN

Never has any product met with such immediate success. The large sales and re-orders are the most conclusive evidence of the success of this oil.

Every watchmaker in this country has had no end of trouble with oil in the past few years. Could anything be worse than what you have been using?

Why not try this oil which is being so highly spoken of by everyone who uses it?

No one in the trade is more widely known than Dr. C. L. Morris, missionary for the Hamilton Watch Co., a man whose knowledge of watches is not surpassed by anyone in this country, a man who has been honored many times, on account of this knowledge, by Engineers and Trainmen's Unions and Brotherhoods.

Under date of July 16, 1909, Dr. Morris writes to the Fulcrum Oil Co.:

"From an unbiased standpoint, I think your oil is O. K. I used three extreme tests: heat, cold, and after heating, testing out to locate acid. You have made no claims but what are facts, as far as my knowledge of oil is concerned. I have no hesitancy in recommending it as being first-class in the full sense of the word."

FULCRUM OIL will not gum, will not evaporate, will not become rancid or discolor in any length of exposure, will not corrode the pivots — because it is the only Watch and Clock Oil ever known which is absolutely free from acid, AND WE CAN PROVE IT.

FULCRUM OIL can be obtained from your material jobber at 35 cents per bottle, or \$3.75 per dozen
A postal to the factory will bring you a small sample bottle free of charge

FULCRUM OIL COMPANY - - Franklin, Pa., U. S. A.

A Canadian Invasion! by America's Leading Jewelry Auctioneer

James L. Hand

Now conducting a number of Sales for Representative Jewelers of Canada
14 Maiden Lane, New York

My first sale was for Frank L. Thompson, of Moncton, New Brunswick. Read what he says: "I wish to express my entire satisfaction with the way in which you conducted the sale for me, and also to thank you for the many new friends you made for me through it. It has been a great pleasure to me to hear on all sides expressions of satisfaction from those who patronized our auction sale. My reputation and business to-day stand higher than ever in the public estimation."

Brother Jeweler, it is such sales as this that have made me the leading auctioneer of the United States. The jobbers will tell you that a "Hand" sale is always a success. I am conducting sales this summer throughout Canada, but will be ready September first with my trained assistants to take charge of your fall and winter sales.

If you desire the services of the best and most reliable auctioneers in the United States "get busy" at once and write for my "auction folder." It tells you all about it. Don't wait, for I will soon be dated up. I can reduce your stock without loss; let me tell you how. Correspondence confidential.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with **THE JEWELERS' CIRCULAR-WEEKLY** regarding any advantageous device or plan which they are utilizing in connection with their business.

The Science of Modern Business Building.

Address by A. F. SHELDON, before the National Retail Jewelers' Convention in Omaha, Nebr., Thursday, Aug. 5, 1909.

IT is my pleasure to address you to-day on the subject of "The Science of Modern Business Building." I will define at once just what I mean by that term. First, by the term "Business Building," I mean the art of making each customer a repeater, regardless of the kind of business engaged in, and not only that, but making him or her the first link in an endless chain to bring more customers.

By the term "Science" I mean organized knowledge, or classified common sense. By the qualifying term "Modern" I refer to the best methods of the best business men of to-day, in distinction from the cruder methods of earlier times. Let it be noted at once that Modern Business Building includes salesmanship. All business builders are salesmen, but all salesmen are not business builders.

Of those who are engaged in merchandizing, there are two classes; first, merchants, and second, storekeepers. Of those who sell goods direct there are two classes; first, salesmen, and second, order-takers.

The true merchant and the true salesman get business and lots of it, but they get it in such a way that they can build up the foundation formed by the first business obtained from each customer. The storekeeper and the order-taker often kill future business and drive customers away.

That there is much knowledge in the world concerning the getting and building of business, goes without saying. If we organize that knowledge, we have a science. Thus will business be lifted to rank with the professions, because a profession is a science practiced. "Business Building Salesmanship" may be defined as the art of serving to the end of satisfaction and profit to both buyer and seller.

Let us now consider the term "Profit." Business building salesmanship includes more than just disposing of goods. It involves the element of profit. They seem to imagine that if they are disposing of lots of goods that they are therefore salesmen or merchants.

The profits of an institution depend upon what may be termed "Business Economics." Of business economics there are three or four grand divisions:

1. General administration or management.
2. Finance, which is the science of raising and disbursement of funds.
3. Providing, which department is the factory, in the manufacturing end of the world, and it is the buying department in the wholesale, jobbing and retail world.
4. The selling department.

It is a common fallacy that the profits of an institution depend wholly upon its sales. If such a thing were possible, one might have an ideal sales division of his business, and still his business might show a loss, if other features of the management of the business were wrong, if the financial department were weak, or if the providing department was inefficient.

It is a notable fact, however, that in the land of commerce, on the continent of trade, all roads lead to the sale. Why does the administrative department administer? So that ultimately the product of the institution may be sold at a profit. Why does the financial department finance? For the same reason.

Why does the providing department provide? For the same reason. The sales division is the funnel through which all the efforts of the institution finally flow and reach point of contact with the world.

These four grand divisions of any business are not independent, neither are they dependent. They are interdependent. The profit-making power of an institution therefore depends upon the efficiency of these four general divisions of the business.

This efficiency in turn depends upon the efficiency of each individual in each of these departments. This efficiency in turn depends upon the degree of development of the positive or success qualities in each individual. Make the man right and his work takes care of itself. The business institution is a unit in the community. Make each institution right and the community is all right. Make each community right and the State is all right. Make each State right and the nation is all right. Make each nation right and the world is all right, and then we are all right.

But before we make each unit in the community right, viz., each business institution, we must get back to the units in the

unit, and the units in the individual unit are the qualities in the individual.

A few general truths for the consideration of each individual in the composite salesman, the institution itself.

1. The value of anyone, no matter what he is doing, depends upon the degree of supervision which his work needs; the less the supervision needed, the greater the value. The greater the supervision needed, the less the value.

Supervision is all occasioned by two things, viz.:

1. Errors of omission.
2. Errors of commission.

If all errors of omission and errors of commission should be eliminated from the work of any given individual, he would not need supervision—his value would be at the highest.

Errors of omission and errors of commission are in turn traceable to what we may term the negatives in human nature.

The law of positive and negative, or construction and destruction, extends all through nature. It may be termed "The Law of Doubles." Thus we see that light has its darkness; heat has its cold; and in the individual man, from a physical standpoint, health has its sickness, strength its weakness. From a mental standpoint, memory its forgetfulness, judgment its unjudiciousness, faith its doubt, honesty its dishonesty, courage its fear, loyalty its disloyalty, decision its indecision, action its inactivity.

Somewhere between perfect health and sickness each individual is. Where is he? Somewhere between doubt and perfect faith; between fear and perfect courage; between unjudiciousness and perfect judgment; between indecision and perfect decision, each can be located. His strength, his power, his efficiency, is in due proportion to the development of his positive or success qualities.

I have mentioned only a few. There are some 52 in each individual—possibly more—but that is enough to keep us busy for a while. Every positive, or success, quality has its corresponding negative or failure quality. And every error of omission or commission that is, was, or ever will be made, is a combination of one or more of the negative tendencies or qualities.

Each negative, or failure, quality is overcome by the development of its corresponding positive. Just as darkness must go when light comes, so must doubt go when faith comes; forgetfulness must go when memory comes, and thus it is with the entire list of positives and negatives.

Storekeeping Department.

The positive, or success, qualities are developed through true education. Education in its root meaning means "eduction," which means drawing out or development. It is accomplished by the union of two processes. First, by food or nourishment; second, by use. The analogy is perfect between the physical and the mental. One must give the muscles of his body exercise or use, and also give them food, if he would cause them to educt or develop. This same is true of what we may term mental muscles," or qualities of the mind.

"We must give them mental food, and we must use them if we would cause them to develop. Organized knowledge exists to-day relative to the building of the whole man—the mental and the physical man. Through an understanding of it the coward may become courageous, the disloyal, the doubter may become a man of faith, and what is true of the three qualities just mentioned is true of all the positive qualities. They can be developed in any normal individual, and up to the success-winning point.

In final analysis, the problem of business building is the problem of man building, and the life of business building is the business of life building.

Of the mind there are three divisions:

1. Intellect, with which man knows.
2. Sensibilities, with which he feels.
3. Will, with which he decides and acts.

As the intellect of man becomes more and more developed, he has more and more ability. As the sensibilities or the power of the feelings become developed, man has more and more reliability. As the positive forces of the body are developed, he has more and more endurance. As the will becomes developed, he has more and more action. This gives the individual more and more A-R-E-A—it gives him more area. And as the area of each individual increases, the area of the business increases. The success of any individual is in due proportion to the degree of ability, reliability, endurance and action which he possesses.

There are three grand injunctions which every business man should follow. The first is, Know Thyself; second, Know the Other Fellow, and the third, Know Your Business.

To obey the first injunction he must be a student of man building; he must become acquainted with his own powers and how to build them. To obey the second injunction he must be a student of human nature and be able to read and interpret correctly the types and temperaments of men. Business is one-tenth merchandise and nine-tenths human nature.

Many customers are lost because of lack of tact in the salesman or merchant, or other lack of tact of the "order taker" or storekeeper" in the handling of his customers.

Those who would otherwise become permanent customers, and the first link in an endless chain to bring more customers, are given away through the lack of understanding types and temperaments on the

part of the one who is selling or trying to sell.

There is no greater asset to the business man than the power to read the great book of human nature as it is written in the faces and actions of men.

The day of the human windmill, the verbal cyclone, and the living talking machine is past—they are out of date in modern business building. A little logic is worth a lot of talk. Is your logic perfect? If so, I congratulate you. The better the logician, the better the business man.

An understanding of self, and an understanding of the other fellow involves the necessity on the part of the business man understanding the basic laws of the human mind, what we may term "Business Psychology."

He must be acquainted with the mental states which it is necessary for the mind of the customer to pass through, and how to favor the creation of those mental conditions which are conducive to mind meeting mind. The human mind in making any purchase passes through four mental states:

1. Attention, an intellectual thing.
2. Interest, a state of feeling.
3. Desire, another state of feeling.
4. Resolve to buy, followed by the necessary action which involves volition, or the will.

From the viewpoint of business building, these four mental states must be cemented with the cement of confidence, which is another state of feeling. And if the customer is to be made a permanent customer, a feeling of satisfaction after the goods are delivered must take place in the customer's mind.

When one comes to realize these truths, he sees that the man who lies to sell goods is a fool. He is disintegrating the cement of confidence, and then the whole structure falls to pieces.

The human race passes through four stages from the viewpoint of evolution, or growth, of intelligence. Down at the bottom is Ignorance; next comes Knowledge; then comes Learning, and finally comes Wisdom. In the darkness of ignorance of the early ages, physical might made right—the strongest physically prevailed, just as the strongest dog will take the bone.

In the age of knowledge—and a little knowledge is a dangerous thing—mental might makes right in trade, and the strongest mentally prevails.

The motto of the man of little knowledge is "Caveat emptor," or "Let the buyer beware." It is a case of "dog eat dog, and the devil take the hindmost."

As learning comes, ethics, or the science of right conduct towards others, begins to enter. The man of wisdom sees clearly the fact that the science of business is really the science of service—that he profits most who serves best.

All Master Merchants are Master Servants; they are servants of the buying public. After all, the profit which the individual or the institution makes is but the pay which he gets for the service which he renders.

Reduce the service to zero, and the profits will soon be reduced to zero, and

then the institution no longer exists. Make the service big, and the profit is big, and then the institution is great. The problem, then, after all, is YOU. To fit one's self to serve commercially. Again I say the life of business building is the business of life building.

Keeping Up Stock.

By XENO W. PUTNAM.

IT is a good policy to place a certain amount of responsibility upon each employe of the store, and this can be done with particularly good effect in connection with the condition of the stock of goods in hand. Whenever any line is getting low the clerk first noticing it is expected to report, and it is time well spent to teach each clerk what may be considered "low" and what the natural variations of demand in the different seasons may bring.

A system of immediate reports keeps the head of the buying department in touch with both stock and sale conditions. If there is a big run on a certain line he knows it. If some other line drags unexpectedly he knows that, too, and takes it into consideration when making up his next order.

It is a good plan to supply each clerk with "depletion" cards. When a sale is made and the cash sent to the cashier, if the stock is running low, one of these cards should be filled out and sent up at the same time the shortage is first noticed. If the demand for this particular article is good there will probably be a number of depletion cards calling attention to the shortage. Then it is up to the buyer to get busy.

Not only the buyer, but the advertising manager, should watch the record of these cards closely. If there is a sudden demand along some special line that he has not anticipated it may pay him to make a special effort at creating more demand along this line of least resistance. From, them, too, he can quickly gauge the value of any special efforts he has made; in fact, he will get many points from these frequent stock reports which will influence his own work.

In addition to these depletion cards it is a good idea to supply each clerk with a "warning" card, upon which is a list of seasons that are not apt to pull harder than others upon certain named goods. This saves the new clerk many a blunder in making his reports and prevents lapses of memory on the part of the older employes; at the same time the store is spared much danger from stock shortages at a time when the stock is in the very best demand. One man may forget or overlook an item, but it is not likely, where each man is held individually responsible for the keeping up of stock, that every man on the force will at the same time forget the same item.

This, of course, is a part of the buyer's work, but the clerks are in more constant touch with the stock than he can be, and a sudden demand upon some line may disperse the supply before the buyer is aware of it. In any event the system of watchfulness by all the employes is sure to render them more attentive in their own regular departments, and at the same time the special drill this entails upon them will render them more efficient clerks.

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of July 28.)

BOOT, De. A Delft pottery of the XVII. century was named "De Boot" (The Boat).

BOOTH, Taylor. A ceramic artist at the Derby works, later at the Don works, Swinton. Son of Ward Booth, the Staffordshire potter, and a pupil of Enoch Ward.

BORACIC GLAZE is, in its composition, very similar to flint glass or lead glaze, but having borax or boracic acid added. It has a greater hardness and brilliancy than the ordinary lead glaze.

BORDEAUX (France) produced hard porcelain as well as faience, but there is little recorded concerning this ware. About 1770, Jacquemart says, a potter, Verneulle, made fairly good porcelain.

BORDER, or bordure. In heraldry, "a *sub-ordinary*" (see *sub-ordinary*). "It is a band one-fifth the width of the shield, which it entirely surrounds. A *bordure wavy*" (see

BORDER.

wavy) "or *bordure compony*" (see *compony*) "is sometimes now used by heralds to denote natural descent. The *bordure* was anciently used to distinguish one branch of a family from others, e.g., the younger from the older."—Milbourne.

BORDERED CROSS. "Known also as *couped*

BORDERED CROSS.

or *fimbriated*."—Robson.

BORDURE. (See *border*.)

BORELLI, Jacques. A potter working at Moustiers and Marseilles. At the latter place he probably directed a factory. A family of his name had a factory at Savona early in the XVIII. century.

BORGHIGIANI (or Borghigiani), Francesco. Gem worker. Born 1727 in Florence.

BORGO-SAN-SEPOLCRO. "One piece, a lamp in South Kensington Museum (London), tells us of this works (*faience*). It is marked *Citta Borgo S. Sepolcro-a 6 febraio 1771-Mart. Roletus fecit.*"—Jacquemart. Rolet was a French artist who also worked in Urbino.

BORNE, Claude. A ceramic artist at Rouen, 1736; Sinceny, 1751; Tournay, 1753, and lastly at Mons.

BORNE, Etienne and Henry. Ceramic artists at Rouen, 1689.

BORNIER, Jacques. "Founded a pottery at La Rochelle, which continued until 1735. It was revived in 1743 by Jean Bricqueville."—Jervis.

BOSSEING UP. "Beating out sheet metal from the back into rough approximations of the form required."—Wilson.

BOTEGA, or bottega. An Italian term used for the workshops, or ateliers, of the ceramic workers.

BOTEROILL, boterol or bouteroil. The metal tip of a scabbard or *chape*. Often borne as a *charge* in heraldry. (See *crampit*.)

BOTONNÉE. (See *botonny*.)

BOTONNY, or botoné, cross. A cross of which the "extremities resemble the trefoil.

CROSS BOTONNÉE.

(Fr., *croix treflée*.) By Leigh termed a *cross budded*."

BOTONNÉE PATTÉE, CROSS. (See *cut*.)

CROSS BOTONNÉE PATTÉE.

BOTT & Co. "Potters in Staffordshire towards the XVIII. century."—Jervis.

BÖTTCHER. (See *Boettcher*.)

BOTTLE, boutell, bowtell or bollell, are all old English terms for *bead moulding* (see

astragal); these moulding ornaments were also called *paternosters*.

"BOTTLE-SHAPED VASE." A certain vase form often found in Chinese ware is so termed in auction catalogues.

BOTRYOIDAL. Like a bunch of grapes.

BOUCHER, Guillaume. A Paris goldsmith of the XIII. century. He worked for the Khan of Tartary.

BOUCHER. A celebrated porcelain painter at the Sèvres factory, middle of the XVIII. century.

BOUFFIUX (Belgium). Only toward the XIX. century have the researches of the Historical Society of Charleroi identified numerous pieces of stone ware with this section.

BOUGEOR (Fr.). A hand candlestick.

BOULLIER, Antoine. Goldsmith to the Duke of Orleans, 1775. Died 1835.

BOULLOIR (Fr.). A small kettle, often called a "toddy" kettle. (See *rechaud*.) These old Sheffield plate pieces are prized by connoisseurs if genuine.

BOULE, André Charles. Born 1642. Noted decorator. (See *boule* or *buhl*.)

BOULE, or buhl. A style of surface decoration often used on caskets. It is composed of tortoise shell and brass. So called from its originator, André Charles Boule, a decorator during Louis XIV. and Louis XV. reigns. Died 1730.

BOLTON, Matthew. One of the most noted Sheffield plate makers. Founder of the great Soho factory at Birmingham. Born 1728, died 1809. Became a partner of James Watt, the steam engine inventor (1774). Established Soho Mint 1788, and his superior medals caused the British Government to have penny and twopenny pieces for 1797 issued thence, halfpenny and farthing pieces 1806-7, likewise the first five-shilling bank tokens for 1804. Bolton's desire had ever been "to achieve distinction as a goldsmith"; his plated wares "have never been surpassed. He is said to have employed Flaxman's talents on some designs."

BOURCHIER KNOT. This knot was a *cog-*

BOURCHIER KNOT.

nissance (see *cognissance*) of Archbishop Bouchier.

BOURBAN. A pilgrim's staff.

BOURG-LA-REINE (France). Here Jacques

363 Hudson Ave., BROOKLYN, N. Y.

ROLLING FOR THE TRADE DONE PROMPTLY

nd Julien, in 1773, on the expiration of their lease at Mennecy, continued the fabrication of the same kind of soft porcelain, differing only in its mark (B R) traced in the paste.

BOURGOUIN (France) had a faience factory, middle of the XVIII. century.

BOURNE, Joseph. In 1808 he established pottery near Derby.

BOUSSEL. Goldsmith to Louis XIV. He resided in the Louvre.

Bow. At Stratford-le-Bow, in Essex (England) porcelain is said to have been produced as early as 1730. We have record of Edward Heylyn and Thomas Frye's patent (1744) for making porcelain. Frye was a skilful artist and engraver, and became an efficient manager (1749) for Weatherby & Crowther at their works here.

In 1775 William Duesbury succeeded to his factory, which lost a partner by death and went into bankruptcy. Duesbury took away the models and moulds to Derby. The factory was known as "New Canton." Bow are paste is soft, and like the Chelsea, but usually more vitreous. The glaze is thick and creamy white. The paste, where thin, is very translucent. Where thick it is not as translucent as Chelsea, and is yellowish, not greenish like Worcester. Styles: "Raised mayflower or hawthorn from the Oriental; also acorns and oak leaves, and two roses with leaves on a stalk, all in white, in high relief on a white ground."—Hodgson. The Bow "quail" or cartridge pattern was copied by both Chelsea and Worcester, making it difficult of identification. "A very characteristic detail in Bow decorations is the narrow border in bright red formed of a Chinese scroll with small, flat bosses at regular intervals."—V. M. Binns. Very fine figures and statuettes were created similar to Chelsea, but of brighter coloring. The hole in these figures is found also in Chelsea pieces; it was formed to hold a metal stem to support nozzles for candles. Bow mugs are often confused with those from Worcester. V. M. Binns says a distinction lies in the fact of Worcester cylindrical mugs being practically the same diameter at the bottom as at the top, whereas the Bow product is larger at the bottom. Again, the Bow handle continues in a curl outward after the lower junction, while the Worcester mug handle ends at the two joints.

BOW. WORCESTER.
BOW AND WORCESTER MUGS AND HANDLES.

Bow. "In classical art the bow is an attribute of Apollo, Cupid, Diana, Hercules and the Centaurs." (See Centaur, sagittarius, etc.)

BOWED. In heraldry, *bowed* means convex.

BOWEN. A decorator of Bristol Delft ware at the Redcliffe Bank pottery. He died in 1760.

BOWMAN. A painter at the Chelsea works and later at Derby. "One of the best flower and landscape painters of the day. Millingsley was his pupil."—Marryat.

BOWEN'S KNOT. A cognisance of the

BOWEN'S KNOT.

house of Bowen.

BOYLE, John. Partner with Herbert Minton (1831-1836) under the style of Minton & Boyle. Later he became partner in the Wedgwood concern.

BOYLE, Robert. Author of the work entitled "Essay About the Origin and Virtues of Gems," published in 1672. He was a Fellow of the Royal Society of England.

BOYLE, Zachary, & Son. "Were potters at Stoke-upon-Trent in 1829, at the Glebe St. works, formerly owned by Adams, and later used as a tile by Minton, Hollins & Co"—Jervis.

BRA, Eustache Marie Joseph. A ceramic sculptor and modeler born at Douai, France, 1772. Died 1840. Worked at the Douai factory and later was interested in the Choisy-le-Roi factory. Went to Creil, taking workmen with him. There he did fine work on numerous pieces. Mark, "Bra."

BRACED, or *braced*, in heraldry, denotes interlaced, as in the illustration of the arms of Cosmo, the founder of the Medici family.

BRACED RINGS. ARMS OF COSIMO DE MEDICI.

ily."—Mollett. Sometimes called *fretted*. Clark says the figures interlaced must be of the same sort.

BRABEUM, *brabium* or *bravium* (Lat.). "The prize assigned to the victor in the public games."—Mollett.

BRACCIAFORTE, Antelletto. A XVI. century goldsmith of Piacenza.

He restored and, to some extent, remade the Monza jewels.

BRACCINI, Atto. Goldsmith of Pistoja (1398).

BRACHIALE (Lat.). "An armlet, or piece of defensive armor, covering the *brachium*, or forearm. It was worn by gladiators in the circus. Some beautifully ornamented specimens were found among the excavations at Pompeii."—Mollett.

BRACONIERE. Old English term for "a skirt of armor worn hanging from the

breast and back plates, XVI. century."—Mollett.

BRACTEA, or *brattea* (Lat.). "Leaves of metal, especially gold, beaten out."—Mollett.

BRACTEATES. "The Scandinavian *bracteates* are pendants having centers which are largely copied from Roman coins set in a very broad edge, and having a broad decorated loop at the top."—Davenport. Found in Denmark, Norway, Jutland, Gotland, etc.

BRADLEY, Samuel. Partner in the Worcester factory, 1751.

BRAMELD, Thomas, John and William. These three brothers, in 1807, became owners of the Rockingham pottery (to which refer).

BRAMPTON, Derbyshire. "For the past two centuries (pottery) works have existed here for the manufacture of brown and stone ware. Posset pots, puzzle jugs and jugs with greyhound handles were largely made."—Jervis.

BRANDI, Paulus Franciscus. An eminent majolica painter of Naples during the middle of the XVII. century.

BRANDEIS. Partner of Hartog at Amsterdam, 1780-1785. (See Amsterdam.)

BRANDENBURG (Germany). Hard paste china was made here from 1719 to 1729.

BRASSART, or *brasset*. A piece of armor

BRASSART.

protecting the arm. Some are very beautifully inlaid with gold.

BRECCIA (Lat.). A conglomerate rock used in ancient architecture and sculpture.

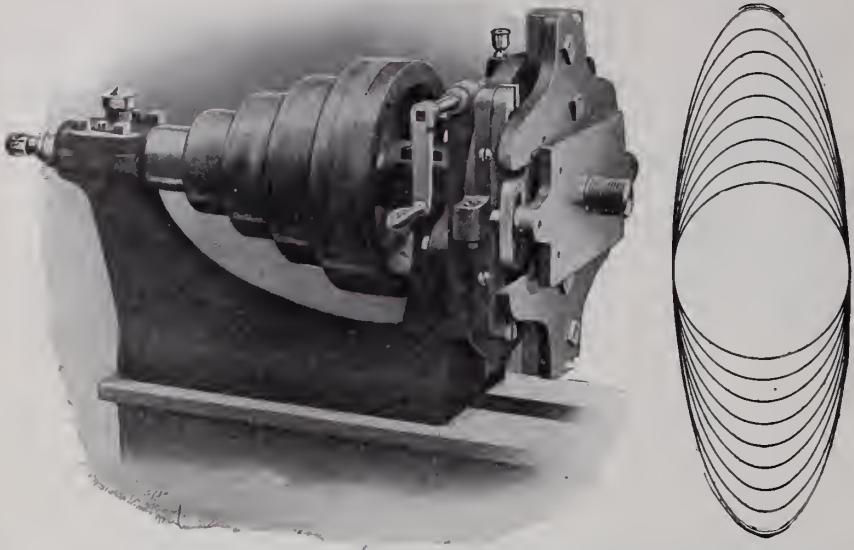

BRÉMONTIER. (See Grès de Brémontier.)

BRETÉSÉ, *bretessed* or *bretressed*. "Terms used by French heralds to express embattlements on both sides, opposite to each other."—Robson. The opposite of *counter-embattled* (to which refer), where the projections on one side are opposed to indentations on the other side.

"B. F." An abbreviation used by connoisseurs to designate the *black figure* decoration on red background of ancient Grecian pottery. It differentiates the pottery of this period from that of the red figures on black background (known as "R. F").

(To be continued.)

All the salesladies of the Hess & Culbertson Jewelry Co., St. Louis, Mo., were gowned in white at the three-day reception given recently in connection with the opening of the company's massive new store at 7th and St. Charles Sts. Music, flowers and souvenirs were in evidence and much commendation came to the firm for its enterprise.

QUESTION No. 2315.—**Refining Gold.**—
I have heard of a method of refining gold known as the Wohlwill process. Is this a particularly effective method? What are its advantages? C. B. C.

ANSWER.—As a means for producing gold of a high degree of purity, the Wohlwill process is only equaled by the very laborious and time-consuming chemical processes, says a writer in the *Brass World*. When properly conducted it is capable of turning out gold of a fineness which, were it another substance, would be called "absolutely chemically pure," but it usually falls short of being so by an extremely small quantity. In fact, the gold is so pure that it almost defies chemical analysis to determine the impurities, and it is daily turned out with a fineness of 999.8 and higher. With careful work and the use of commercial gold for the anode, it is possible to make what to all indications is absolutely pure gold; but in practice, of course, this is impossible, as raw material in the form of impure gold used for the refining will not admit of its being done so perfectly.

The Wohlwill process of producing pure gold is an electrolytic one, and several patents upon it are now in force. The inventor is Emil Wohlwill, of Hamburg, Germany. The process is carried on at several establishments in Germany for refining gold, and it is said that practically all of the gold refining in Germany is now done by this method. In the United States the process is used for refining the gold at the United States Mint and is operated under a license.

The principle of the process lies in the character of the solution. In other words, the patent is upon the solution of electrolyte. It is composed of a solution of chloride of gold containing a considerable quantity of free hydrochloric acid. The use of the hydrochloric acid is really the essential feature of the patent.

If a simple solution of chloride of gold is used for electrodeposition with a gold anode and cathode, free chlorine gas is evolved at the anode which will escape without action upon the metal; but if a quantity of hydrochloric acid is added no free chlorine escapes and it acts upon the gold anode and dissolves it, supplying the solution with the necessary quantity of chloride of gold to make the operation continuous. The evolution of chlorine gas at the anode when no hydrochloric acid is present seems almost paradoxical, as it is an active solvent for gold, but it is, nevertheless, true. The action of the hydrochloric acid in preventing the escape of

chlorine is equally as perplexing, but the action really takes place and forms the fundamental principle of the process.

The solution used at the Mint for refining gold by the Wohlwill process consists of the following:

Water	1 gallon
Gold	3.8 oz.
Hydrochloric acid.....	5 oz.

The gold is dissolved in aqua-regia and made into chloride before adding to the solution, and the hydrochloric acid is the strongest commercial acid of 1.19 sp.gr.

The solution is contained in white porcelain cells holding about five gallons. The tanks rest in a box of sand heated by a steam coil so that the solution itself can be kept at a temperature of about 120° F. When the solution is worked in a warm condition, less voltage is required, and the quantity of free acid needed is diminished. Circulation of the solution is necessary in order to secure uniform results, and this is obtained by mechanical means.

For the cathode a strip of pure gold is used, and upon it the gold deposits in a spongy condition. It is allowed to deposit until it becomes too voluminous, when it is removed and washed for further treatment by melting.

The voltage used is low on account of the fact that a low electromotive force only is required for depositing the gold. From four and one-half to five volts are ordinarily employed. The anodes used are six inches long, three inches wide and one-half inch in thickness. Rolled gold about 0.01 in thickness is used for the cathode. The distance between the anode and cathode is one and one-half inches.

When the electrodeposition of the gold is allowed to go on, the following reaction takes place at the anode:

The gold is dissolved and passes into the solution from which it deposits upon the cathode. The silver is converted into chloride and either remains upon the anode as a slime or diffuses through the solution as a fine sediment. It is not deposited under either condition. Copper is dissolved, but does not deposit with the gold. Platinum also dissolves and is not deposited. Lead partly passes into the solution and partly remains as chloride in the slime. Iridium and other metals of the platinum group remain undissolved. Bismuth usually remains as the oxychloride in the slime, but should the free acid be such as to dissolve it, it does not deposit. Antimony passes into solution, but does no harm. The other metals, such as zinc, iron, arsenic, nickel, cobalt, etc., pass into the solution, but do not deposit with the gold.

After a while the solution must be fed chloride of gold to replace that offset by the impurities in the gold. If at any time the quantity of hydrochloric acid becomes deficient, it is at once known by the smell of chlorine gas at the anode. It can immediately be remedied by the addition of more acid. The cost of the hydrochloric acid needed for replenishing is about 20 cents per 1,000 ounces of gold refined.

The slimes in the solution as well as the solution itself, when it becomes contaminated to such an extent that it contains too little gold in proportion to the impurities, are refined or treated for the recovery of the silver, platinum and other metals which they contain. It is a singular fact that, although the solution gradually becomes contaminated with metals such as copper, platinum, lead, bismuth, iron, etc., they do not prevent the deposition of pure gold, and the reason for abandoning it is on account of the displacement of the gold in it by the impurities so that it works too slowly. This fact is a remarkable one, and serves to render the process safe under all conditions.

The gold deposited upon the sheet gold cathode is in the form of a sponge, although coherent enough to remain upon the surface. While this gold is very pure and soft, it is not sold in this condition, on account of the difficulty in weighing it. It is run into bars of the usual character. All gold is now refined at the Mint by this process and its purity has proved a great boon to those who manufacture dental supplies, as they are able to use it without the further refining that is necessary with ordinary gold bars. As the Mint does not sell less than \$5,000 worth of fine gold at a time, it is impossible to purchase gold made by the Wohlwill process from them except in this amount or over. Less quantities will have to be obtained through dealers in bullion.

Aluminum as a Protection Against Mercurial Poisoning.

A PREVENTIVE against poisoning by the fumes of quicksilver in mines, mirror factories, etc., where quicksilver is used in various forms, has been discovered by an Italian named Tarugi. It is not stated what has led to this discovery, but it has been used with success and has become known to the authorities who are charged with the sanitation of workrooms and factories. The aluminum is applied in the form of masks and head-coverings, which seem to absorb the fumes of mercury by chemical affinity.

"There are funny things about the clock business," said the salesman from Connecticut. "Nine-tenths of the clocks that I sold on my last trip were eight-day clocks. Everybody seems to have serious objections nowadays to winding clocks. If I could provide customers with 30-day clocks or 60-day clocks, without too much additional cost, they would prefer them. That demand for long-distance timepieces represents a decided change in taste. A year or so ago everybody was clamoring for 24-hour clocks, on the ground that they kept better time.

Prompt attention given to Gold and Silver Bullion. SMELTING FOR THE TRADE

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal—plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag—the blades are fine. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray—contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

IMPROVED BEZEL AND WHEEL CHUCK No. 26

CUT IS FULL SIZE.

Larger capacity for holding work and improved construction. Will hold wheels or plates from 3 mm. to 52 mm. Bezels, rings, watch cases, etc., from 13 to 62 mm. State name and size of lathe when ordering.

Price, Each, \$9.00

Engelsman's Patent "Bayonet" Automatic Locking Stone Tweezer No. 119

The acknowledged superiority of this tweezer over any other of its kind is due to its many improvements and innovations.

First. It will be noticed that the points are grooved, thereby permitting any stone to be gripped *firmer* and *better* than by any other kind of stone tweezer.

Second. It is purposely made a "Bayonet" in shape because any stone can be shown or examined advantageously. It also enables

the user to count particularly small sizes of stones, *easier*, *quicker*, and with much less *exertion* than when using any other style of tweezer.

It has an *extra* part directly above the crossing points to permit the holder to examine the stone without fear of *releasing* it accidentally, which frequently occurs when using the ordinary style crossing tweezer.

Price, Each, \$1.00

CROWN CHUCK No. 50

For enlarging or cutting deeper crowns of watch cases. A movable plug in the stem regulates the depth required for various sizes. Four caps of various sizes are supplied with each to hold crowns from small to large. Stem fits in No. 50 wire chuck.

Price, Each, \$1.50

ROLLER REMOVER No. 60 (Patented)

A thoroughly efficient and quick acting Roller Remover. The work is always plainly in sight. The roller is held in the grooved jaws of the pliers. The adjustable head which holds the screw is quickly brought into position over the staff and the most obstinate roller will instantly yield to the gradual pressure of the screw.

Nickel Plated, Each, \$1.50

GRINDING OUTFIT No. 105

LEATHER DISK. SMALL DISK METAL.

CARBORUNDUM & EMERY PAPER DISKS.

This outfit consists of:

1. Two interchangeable steel disc wheels, 3 3/4" and 1 3/4" in diameter.
2. One interchangeable flexible leather disc wheel, 2 1/8" in diameter.
3. One adjustable hollow spindle for holding the above disc wheels.
4. Eight different grade emery paper discs, 2 1/8" in diameter.
5. Four carborundum paper discs of different grades, 2 1/8" in diameter.
6. Eight different grade emery paper discs, 4" in diameter.
7. Four carborundum paper discs of different grades, 4" in diameter.
8. One clamping device for keeping discs flat, when not in use.

Price of Outfit No. 105, complete.....	\$1.50
Separate small emery discs.....	per doz. .15
" large " ".....	" " .20
" small carborundum discs.....	" " .30
" large " ".....	" " .35

This new grinding device should find favor with the trade, being thoroughly practical and complete for all purposes, such as grinding steel tools, glass, enamel or any other metal or substance that can be ground with emery or carborundum. It is of equal value to the watchmaker, jeweler, optician, dentist, lock or gunsmith, platers and kindred trades. It will be found much more economical than solid emery and carborundum wheels. An assortment of solid wheels of twelve different grits would necessitate an outlay of ten times the cost of this outfit, not taking into consideration the trouble of truing up the wheels when worn or glazed.

Full description and directions accompany each outfit.

For Sale by all Jobbers in the United States and Canada.

Have You Seen the Smith Exhibit at the Marlborough?

If not, we want you to, now, right away. It will be to your advantage, as well as our own, to do so. Our exhibit opened on August 15th, and it will continue till September 11th. It is conducted for the sole purpose of introducing to the trade the many new tea and coffee sets, child's goods, small dishes, etc., that we have added to the already extensive Smith line of Sterling Hollow Ware.

These goods are all bright and snappy. They are inexpensive. In fact, the prices are far better than we have ever before been able to quote for silverware of similar quality, design and weight. We seldom advertise prices in connection with Smith Silverware. You know us and our methods well enough to take our word for it that when we do we mean business.

Remember—Hotel Marlborough, New York City, till September 11th. We show samples of our complete line—Standard designs as well as the new goods.

The Dorothy Vernon

A NEW WHITING PATTERN
IN STERLING SILVER FLATWARE

Made in the Complete Line—Dozen
Work, Fancy Flatware, Cutlery—
Ready for Delivery September 1st.
Price Lists on Application.

IN its leading motive and the treatment of its details the new pattern is eminently suggestive of the English Renaissance designers of the 16th and 17th Centuries. It seems becoming therefore that it should be known by a name that not only recalls one of the most romantic episodes of the social history of that period, but is also intimately associated with the most significant existing example of English Renaissance Art and Architecture.

A fine setting enhances the beauty of the rarest and most costly jewels.

Likewise, a fine oak or mahogany chest makes a desirable setting for ye Mount Vernon pattern, a distinct Colonial gem.

We can furnish these chests to suit any combination desired.

An Invitation

TO JEWELERS when in New York a cordial invitation is extended to visit the New Salesrooms of this Company.

The location, in the recently completed Silversmiths' Building, constitutes a decided vantage point in the Jewelry District.

The additions to our lines this season are the most comprehensive and complete in the history of the company. Prices run from popular commercial goods to the highest class of products.

All the interesting lines of Silver-craft are here fully and attractively displayed in such a manner as to afford most convenient inspection. And their artistic beauty, fine workmanship and moderate prices will be found amply to justify the most favorable consideration.

Jewelers will appreciate the fact that all our products are confined exclusively to the legitimate trade.

The "Monastery"

We constructed the "Monastery" works with a view of competing with a weight movement against inferior spring works. Our success has been great. The weight "Monastery" construction, chain wind, is of such excellent quality in every respect and offered at such a reasonable figure that it is out of question to-day to offer any hall clock above \$50.00, with long pendulum spring works.

A genuine Grandfather clock has always a weight movement. And we will state that any chiming Hall clock made up with a cheap spring movement can never be satisfactory. The hammer blow is too weak to get the tone out of good bells; only thin, light bells can be used with the little blow of the hammer; every day the spring gets weaker and the chiming slower; it even ceases after 5 or 6 days. Besides, in such cheap affairs the dial works are not suitable for quarter chiming. The combination makes a very poor clock. Not so with the "MONASTERY," which are heavy, powerful brass works, with solid steel pinions and built as a good weight chiming movement should be constructed.

The illustrated model is a fine piece of furniture fit for any residence, and can be obtained with three combinations of striking:

1. With five 1 1/4" tubular bells, made and tuned by Mr. R. H. Mayland (Westminster chimes); list.....\$180.00
2. With five rodgongs, also Westminster chimes; a feature in this combination is that the hour is struck on 4 gongs which, being tuned in a chord, produce a sound which is the nearest imitation of the distant resonance of a big tower bell; list... 151.00
3. Hour and half strike on 4 rodgongs, tuned in a chord; list..... 104.00

Prices F. O. B. New York.

THE
AUTUMN
COLOR

ITS
SECRETS
REVEALED

PARIS has spoken. Again this house is the first to hear. The secret of color-fashion this Autumn may be given in two words: SEAL BROWN. It is the under-hue of the fur separated by a breath. It has the subdued warmth of winter sunsets. Modish gowns and garnitures will revel in this charming tone. The Jewelry of this house instantly caught the inspiration. Its unique "Silverseal Finish" is a truly remarkable innovation. Richest combinations with Jet, now in the ascendant. Most comprehensive lines.

THE KREMENTZ COLLAR BUTTON

GOES ROUND THE WORLD

ITS FAME—

Wherever there are collars there are Krementz Collar Buttons. They are known the world over—the only ones that have an international reputation. With such recognition and demand, all you have to do is carry them. They sell themselves.

QUALITY MAINTAINED—

The Krementz Collar Button never disappoints. Unequaled in construction and finish, its quality always has and always will be maintained.

ASSAY—

The Krementz Collar Button does not take advantage of the elastic leeway allowed by law. There is really no reason why a solderless collar button should assay a whit less than stamped. You can depend upon it that

Krementz 14-Karat Collar Buttons will assay 14-Kt. or $\frac{5.84}{1000}$ Fine.

Krementz 10-Karat “ “ “ “ 10-Kt. or $\frac{4.16}{1000}$ Fine.

You will note that articles assaying 9 to 9½ Karat or 13 to 13½, and sold as 10-Karat or 14-Karat respectively, save the makers a profit.

ROLLED PLATE LINE—

Krementz Rolled Plated Collar Buttons and Studs are made with regular Krementz 14-Kt. stock; which is sweated, not soldered on composition base. Exhaustive tests show Krementz Plate is much heavier than is used on any other rolled-plate jewelry. Their great popularity in hot countries (where perspiration destroys ordinary goods), is largely owing to the thickness and quality of Krementz Gold Plate, similar to that used on highest quality filled cases.

TRADE A 14 K MARK

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

 THE HOROLOGICAL REVIEW
 THE JEWELERS' WEEKLY THE JEWELERS REVIEW

VOL. LIX. WEDNESDAY, AUGUST 18, 1909. No. 3.

Silver Service for the Scout Ship "Salem."

THE silver service which was recently presented to the United States scout ship *Salem* by the people of the historic New England town after which it was named, as will be seen from the illustration published on the front cover of this issue, is made distinctly on colonial lines. It varies in some particulars from other services that have been given to boats of the United States Navy, but on the whole is careful, chaste and thoroughly in keeping with the object for which it is intended, as well as representative of the people by whom it was presented.

This service, which costs about \$2,000, has no punch bowl, but instead the centerpiece is a large fruit dish surrounded byandelabra, a colonial coffee urn, sugar bowl, cream pitcher, 12 coffee cups and massive waiter. In addition to this, there is a large bronze tablet, to be placed on the mast of the ship; a large bronze ship's lock and a talking machine for the crew.

The massive fruit bowl is decorated with an etching of the old customs house in Salem where Hawthorne wrote his *Scarlet Letter*, which place has been beautifully described by that author. On the waiter is an etching representing the old frigate *Essex* which was presented to the United States Government by the merchants of Salem in the year 1799. The coffee urn, which is also in colonial style, bears the city seal upon it, and the sugar and cream pitcher and coffee cups are appropriately decorated in a similar way.

This service was supplied to the city of Salem by Daniel Low & Co., and was made by the Gorham Co., Providence, R. I.

The vessels of the United States Navy whose presentation services have been illustrated and described in THE JEWELERS' CIRCULAR-WEEKLY and the date of the issues in which these appeared from time to time are as follows:

Handsome Swedish Tankards.

IN accordance with our aim to show interesting and characteristic productions of the silversmiths of various countries we publish to-day on this page a photograph of two Swedish tankards, with covers. They are in fine repoussé work, silver gilt, decorated with pretty floral designs. One piece dates from the 17th century, and has inserted in the cover a medal of Gustavus Adolphus, King of Sweden.

The fine execution of these mugs proves that the art of the silversmith was by no

means neglected in the northern countries of Europe at a time when France was taking the leadership in this domain.

A Costly Mistake.

AN oversight on the part of a French telegraph operator, according to a report in the *Paris Daily Press*, proved very costly to a wealthy American. His wife, who while traveling passed through Paris, visited the store of a jeweler. Among the jewels shown her she was especially taken with a tiara of diamonds, costing 85,000 francs. Impulsively she at once cabled an exact description of the ornament to her husband in New York, and asked him if she could buy it.

The husband replied: "No. Price too high." But the telegram when it reached the lady read "No price too high." Delighted with her husband's gallantry, the lady repaired to the jewelers and selected in place of the 85,000-franc diadem one costing 500,000 francs.

The W. H. Hare Optical Co. has opened offices at Monterey, Cal., at 222 Alvarado St., where a factory has also been established.

“KEEPING EVERLASTINGLY AT
IT IS THE PRICE OF SUCCESS”

We know we have borrowed this sentence from one of the largest advertising concerns in the country—N. W. Ayer & Son, of Philadelphia—but it hits our ring producing methods right on the head.

Constructed Rubies and Similar Products.*

A Lecture by G. F. Herbert Smith, M.A., D.Sc. (Oxon) of the British Museum, Before the National Association of Goldsmiths, at London.

MY subject this afternoon is "Constructed Rubies and Similar Products." I shall as briefly as possible explain what they are, describe the process by which they are made, and point out the peculiarities by which they may be distinguished from the allied products of nature. It is a subject of surpassing interest, whether it be regarded from the standpoint of science or of commerce.

Before going further into my subject, I must, to obviate confusion, define two words, which are in common use, but each in a sense differing considerably from that understood in science. The first of these words, crystal, is usually applied to a clear, transparent variety of quartz. Literally, it means ice, and is derived from a Greek word for frost. In ancient times it was supposed that the beautiful, lustrous gems found among the eternal snows of the Alps were a form of petrified water, which had undergone mysterious change in the course of countless ages. When early investigators discovered that a salt solution in evaporation left behind groups of slender glistening prisms, each very similar to the rest, they wrongly, but not unnaturally concluded that they had obtained yet another form of petrified water, and accordingly applied the term crystal to such substances also. In course of time it was found that substances which have separated out from a salt solution, as well as mineral substances occurring in nature with natural facets, have in common one fundamental property: The constituent molecules are regularly arranged throughout the substance.

The scientific definition of the word crystal is then a substance in which the structure is uniform throughout and all the similar atoms composing it are arranged with regard to the structure in a similar way. That is the sense in which I shall use the word crystal. The other word, glass, is even more familiar. It is a transparent, lustrous, hard and brittle substance, produced by fusing sand with soda or potash, or both. Research has shown that such a substance, while apparently so uniform in character, has in reality no regularity of molecular arrangement; it is, in fact, a kind of mosaic of atoms, huddled together anyhow, but so irregular is its irregularity that it simulates perfect regularity. That is the sense in which I shall use the word glass. I may point out that these substances may quite possibly have the same chemical composition, but one be a crystal and the other a glass. The difference between the two structures may be illustrated by comparing a regiment of soldiers drawn up on parade with an ordinary crowd of people.

The possibility of reproducing in the laboratory the treasured stones which are extracted from the reluctant earth with infinity of labor and toil, in widely separated

and far distant parts of the globe, had long been derided by the world at large, and it came with something of a shock to most of us when concrete evidence convinced us almost against our will that a baffling problem had to some extent at least been solved. Yet a little logical consideration should have taught us that, as soon as the advance of knowledge placed in our hands weapons comparable with those wielded by nature, we might hope to achieve not far inferior results.

The methods that have been employed to cause crystallization may be classified under three different heads:

1. Separation from a saturated solution. In nature the solvent may be not merely water or water charged with an acid, but molten rock, and the temperature may be very high.

2. Solidification of the cooling liquid, the method which has been so fruitful of successful results in the case of precious stones.

3. Sublimation of a vapor, which means the direct passage from the vapor to the solid state without traversing the usually intervening liquid state; it is the most difficult of attainment of the three methods, and does not immediately concern us.

The most familiar example of the second kind of crystallization is ice, just as snow is of the third. I must not omit to mention that the pressure may be a factor as important as the temperature in certain instances.

We may anticipate that, other things being equal, the simpler the composition the greater will be the ease with which a substance may be formed; for instead of a complex substance two or more different substances may separate out unless the conditions are nicely arranged. To take a concrete instance, let us consider the species beryl, which comprises in addition to what jewelers understand by that name the varieties emerald and aquamarine. Its chemical formula is $3 \text{ BeO} \cdot \text{Al}_2\text{O}_3 \cdot 6 \text{ SiO}_2$. Other gem-stones containing the uncommon element beryllium, so called because first discovered in beryl, are chrysoberyl (cymophane, or the true cat's-eye), $\text{BeO} \cdot \text{Al}_2\text{O}_3$, and phenakite, $2 \text{ BeO} \cdot \text{SiO}_2$. Crystallized silica, SiO_2 , is that most familiar of minerals, quartz. It is elementary arithmetic to show that the beryl molecule might alternatively give rise to one molecule of chrysoberyl, one of phenakite, and five of quartz. It is pertinent and interesting to note that these last mentioned minerals are found in the immediate neighborhood of the Emerald mines at Ekaterinburg, Pera, Russia.

By far the simplest in composition of all precious stones is diamond, which is pure crystallized carbon; but the manufacture is attended by well-nigh insuperable difficulties. If carbon be heated in air, it burns at a temperature well below its melting point; moreover, unless an enormously high pressure is simultaneously ap-

plied the product would be the other form of crystallized carbon, namely, the comparatively worthless graphite. The famous chemist, Henri Moissan, whose loss science had not long ago to deplore, achieved some success; but the tiny diamonds were worthless as jewels, and the expense involved was out of all proportion to any possible value they might have.

Next to diamond, the simplest substances among precious stones are crystallized silica, quartz and crystallized alumina, corundum, more familiar perhaps by its variety names, sapphire and ruby. The crystallization in silica has been effected in several different ways, but the value in jewelry of quartz, even the violet variety, amethyst, or the yellow variety, citrine, often wrongly called "topaz," is not such as to warrant its manufacture on a commercial scale. Corundum is, however, a species held in far greater esteem. Rubies and sapphires, of good color and without flaws, have always commanded high prices. The question of their reproduction by artificial means was therefore of more than academic interest; to use a common saying, it had money in it.

Corundum is the crystallized form of alumina, the oxide of aluminum. When pure, it is quite without color; the precious tints which are the glory of the species are due to small amounts of other metallic oxides, so small that they cannot be determined with exactitude by the most searching chemical analysis. The coloration of minerals is, indeed, a matter about which we have little definite information. Chromic oxide is certainly responsible for the rich, ruddy hue of ruby; cobalt oxide perhaps causes the blue of sapphire, and ferric oxide, which is almost invariably present, plays no idle role.

Since alumina is infusible at ordinary temperatures, no successful solution of the problem could be expected before the discovery of the oxy-hydrogen flame placed a powerful means of research in the hands of experimenters. As long ago as 1837, Gaudin, by fusing together in a closed crucible equal parts of alum and sulphate of potassium, obtained small hexagonal plates, about 1 mm. in cross-section and 0.3 mm. in thickness. Ebelmen some years later, in 1851, derived similar plates from the fusion of alumina and borax, and made a step forward in coloring them by the previous addition of small quantities of metallic oxides. Sainte-Claire, Delville and Caron obtained good results a little later, in 1858, by fusing aluminium fluoride with boric acid, and, by adding varying quantities of chromium fluoride, produced not only ruby, but also sapphire, and the green variety, the so-called oriental emerald.

Gaudin had in the meantime been devoting himself to the manufacture of imitation gem stones, and in a paper published in 1869 he stated that he obtained vitreous globules by fusing alumina powder in the oxy-hydrogen flame. In 1877 Frémy and Feil published an account of their interesting and instructive researches. They fused together equal weights of alumina and minium (lead oxide) in a siliceous earthen vessel. The aluminate of lead which was at first formed, immediately attacked the silica of the crucible and formed a lead

ilicate; the alumina thus set free crystallized out in beautiful hexagonal plates, which were colored red or blue accordingly as the oxide of chromium or of cobalt was previously added to the mixture. A portion of the crucible lined with ruby lakes is exhibited in the Mineral Gallery of the Natural History Museum.

Such is a brief outline of the early history of the experiments that have been made to crystallize alumina. You will notice that throughout, with the single exception of Gaudin's later work, the products took the form of six-sided plates, which, though occasionally of some breadth, were invariably very thin, and, therefore, useless for cutting purposes.

Twenty-four years ago, in 1885, red stones, of unknown origin and mysterious production, made their appearance on the market from the direction of Geneva. Having the physical characters of genuine rubies, they were accepted as, and realized the prices of, natural stones. We know now that probably they were formed by the melting together of fragments of natural ruby in the oxy-hydrogen flame. The details of the process of manufacture no doubt varied slightly, but in the main it was as follows: Two, or perhaps three oxy-hydrogen jets played horizontally on the top of an infusible pedestal which was kept in slow rotation about a vertical axle. The ruby fragments were dropped, one by one, by means of platinum forceps, on to the top of the pedestal, where they melted into a single mass. Since the original color was driven off at that high temperature, a little potassium bichromate was added in order to revive it. Owing to the inequalities of growth, the cracks due to rapid cooling, and the inclusion of air-bubbles, often so numerous as to cause a cloudy appearance, and, above all, the unnatural color, these reconstructed stones, as they have been termed, were far from satisfactory.

In 1904 Verneuil, who had served his apprenticeship to science under the guidance of Frémy, published his epoch-making paper. In it he described his ingenious form of blow-pipe, which enabled him to overcome the difficulties that had baffled earlier instigators, and to manufacture rubies vying in perfection with the best of nature's productions. By the simple expedient of inverting the blow-pipe and introducing the powdered material with the oxygen gas, he was able to secure far greater uniformity of growth. His raw material was pure ammonium-alum, with which was mixed sufficient chrome-alum to furnish about 2½ per cent. of chromic oxide in the resulting stone. The whole was well powdered, and placed in a sieve leading to the oxygen tube, and its rate of falling through it was regulated by a hammer actuated by an electric magnet, the distance through which the hammer fell being capable of adjustment.

On reaching the flame at the orifice, the sulphur and ammonia constituents volatilized, leaving merely a liquid drop of alumina, which formed a small pedestal composed of previously fused alumina. Great care had to be taken to free the alum from all trace of potash, since the latter did not volatilize, and, if present, imparted

a brownish tinge to the stone. As the drop grew in size, the pedestal was lowered by a screw motion, provided for the purpose, and the pressure of the different gases, which initially was low to avoid melting the pedestal, was gradually increased, so that the drop assumed the shape of a pear, the apex of which was downwards and adhered to the pedestal.

The orifice was jacketed, to prevent too rapid cooling of the drop, and consequent disastrous flaws. To minimize the cost of production, a few slight modifications were subsequently introduced in the apparatus. Coal gas from the ordinary city supply has been substituted for the costly hydrogen, the hammer is more certainly and conveniently operated by a cam instead of an electromagnet, and the cams of a number of machines are worked by the same shaft. The process is so simple that, I believe, one man can look after a dozen or so of these machines, and it takes about an hour to grow a drop large enough to furnish, when cut, a ten-carat stone.

Verneuil himself pointed out that in principle his method was identical with that employed in Gaudin's later experiments, and that what the latter thought was a vitreous globule was in reality crystalline, the apparent devitrification being merely cracks caused by the sudden cooling.

The veteran crystallographer, Wyruboff, who examined some of Verneuil's early specimens, was the first to remark that each drop is a single crystalline individual, and not, as might have been expected, an alumina glass or an irregular aggregation of crystalline fragments. If the drop has cooled properly, the crystallographic axis is parallel to the core of the pear. In actual commercial practice each drop, unless the finished stone is to have a similar pear-shape, is divided longitudinally through the central core into halves, which in both shape and orientation are admirably suited to the purposes of cutting; as a general rule the drop splits of its own accord during cooling in the required direction. The broad ends of many of the drops display a roughened appearance, that is eloquent testimony to the homogeneity of the internal structure; for in certain directions, and in those only, a sheet of light is reflected from the whole of the surface.

Inspection with a lens shows that this roughness is due to a fine network forming the edges of numberless minute facets. I had the curiosity to determine the position of these facets, and found them to correspond to the fundamental rhombohedron of corundum. The parallelism of those small facets over the whole of the end can only mean that the entire drop forms but a single crystalline individual. A stone cut from one will therefore have not only the density and hardness, but also all the optical characters—refractivity, double-refraction, dichroism, etc.—pertaining to the natural species, and will obey precisely the same tests with the refractometer and the dichroscope. Were it not for certain imperfections, it would be impossible to distinguish between the stone formed in nature's vast workshop and that produced within the confines of a laboratory.

The artificial stones, however, are rarely, if ever, free from minute air-bubbles,

which can easily be seen with an ordinary lens. Their spherical form differentiates them from the plane-sided cavities, not infrequently visible, in a natural stone. Further, the coloring matter varies slightly, but perceptibly in successive shells, and consequently in the finished stone a careful eye can discern the curved striation corresponding in shape to the original shell. In a natural stone, on the other hand, although zones of different colors or varying shades are not uncommon, the resulting striations are straight, corresponding to the plane facets of the original crystal form.

(To be continued.)

Connecticut Sheriff Wants Man Accused of Passing Worthless Checks on Jewelers.

DANIELSON, Conn., Aug. 11.—Preston B. Sibley, the sheriff of Windham County, is sending out circulars notifying the police of other cities and merchants generally to look out for a man who is passing a number of worthless checks on jewelers after purchasing diamonds.

This man, who claims to be a 32-degree Mason and says he lives at Rose Mont, near Philadelphia, is described as about 40 years of age, five feet eight inches high, of slight build, dark complexion, blue eyes and very dark mustache. He claims that his business is to purchase lumber for a large German gun factory. On the strength of his alleged Masonic connections and the general favorable impression that he creates, it is said that he has been able to get jewelers and other merchants to accept checks without much difficulty.

The circulars which have just been sent out ask the recipients to have the man arrested should he appear in their town, and immediately notify Sheriff Sibley of this county.

Death of Louis Hooqe.

PARIS, Ky., Aug. 11.—Louis Hooqe, a prominent resident of this city, who died in New Albany, Ind., after a short illness, a week ago, was one of the oldest jewelers in this vicinity, having completed four score years before his demise. He was widely known and has many friends in the trade.

Mr. Hooqe began business in Louisville, Ky., in which city he continued until 1878 when he met with financial reverses. He came to Paris about 1880, joining A. J. Winter as a partner, under the style of A. J. Winter & Co. The firm prospered and developed an excellent business, but after a career of 16 years the partners disagreed and the business was wound up, Mr. Winter and Mr. Hooqe each continuing in business alone.

Deceased was a practical man, with an excellent knowledge of the jewelry trade, and stood high in business and social circles. He is survived by a widow and three children.

The officers of the Colorado Horological Society who were recently elected at a meeting held in Denver were as follows: President, Emil Rose; vice-president, Geo. Geer; treasurer, E. Wangnild; secretary, J. A. Freeman, and sergeant-at-arms, Antone Kauffman.

Handsome Testimonial Presented to J. F. P. Lawton, Secretary of the Gorham Co., by His Associates.

As noted in the last issue of the JEWELERS' CIRCULAR—WEEKLY, John F. P. Lawton, secretary of the Gorham Mfg. Co., completed a half-century's service with that company on Aug. 9, and in observance of the event he was presented with a testimonial engrossed upon parchment. Mr. Lawton's associates in the concern arranged a dinner in his honor at the Hope Club, in Providence, that evening.

The testimonial, a photograph of which is shown herewith, is an elaborate piece of work and reads as follows:

JOHN F. P. LAWTON:

"We, your associates in the Gorham Manufacturing Company, do hereby congratulate you upon the completion of fifty

JOHN F. P. LAWTON.

years of service in the interest of this company. During the long period of growth culminating in its present prosperity and commanding position your aid has ever been cheerfully given to honest management and fair dealings. Your singleness of purpose and heartfelt devotion to this company's welfare are virtues worthy of high praise, and your unflinching courtesy toward our associates has imbued us with sincere affection for you. We therefore join in thus expressing to you our appreciation of your services and we wish you long life, health and happiness, that we may still receive your advice and valued assistance.

"Signed, Edmund Holbrook, John S. Tolbrook, E. Frank Aldrich, Rob. E. Horton, W. C. Codman, Wm. E. Keyes, William Codman, Hiram A. Bliss, W. W. Leato, E. J. Dingee."

About the border of the testimonial is leaf pattern effect, while the body of the parchment shows a tree with spreading branches on the trunk of which is the insignia of the concern and the dates 1859-1909.

The Gorham Mfg. Co. was named by Mr. Lawton after James Gorham, who founded the concern in 1831. Mr. Law-

ton entered the employ of the company in 1859, the firm at that time including John Gorham, Gorham Thurber, father of William Thurber, of the Tilden-Thurber Co., and Louis Dexter, Jr. The plant was located in a small building at 12 Steeple St., Providence, R. I. Mr. Lawton was first employed as bookkeeper. In 1865 he acquired an interest in the company and be-

Death of Chas. J. Zeitler, Jr.

DENVER, Colo., Aug. 11.—Word was received from Baltimore, last week, to the effect that Chas. J. Zeitler, Jr., a prominent jeweler of this city, had died there Monday, Aug. 2. The news of his death caused distinct regret among his many friends in Denver, where he has been prominent and well known for the past 18 years.

TESTIMONIAL PRESENTED TO JOHN F. P. LAWTON BY HIS ASSOCIATES IN THE GORHAM CO.

came its secretary, which office he has held ever since.

Two years ago Mr. Lawton passed his 70th birthday, at which time there was a material appreciation of the event shown by the company.

Eugene Lobe, who was arrested three years ago, charged with the theft of a tray of diamonds at Buffalo, N. Y., was buried recently in Memphis, Tenn. Lobe was well-known to the police of the large cities of the United States and Canada. Several years ago a tray of diamonds was stolen from the jewelry store of Paul Forester in Seneca St. Lobe, suspected of the theft, was arrested in the southern city and brought to Buffalo for trial, but was not convicted.

Mr. Zeitler was a native of Baltimore and was a son of Mr. and Mrs. Chas. J. Zeitler, of 2318 Guilford Ave., that city. He was in business at one time in Havre de Grace, Ind., but established a business for himself in Denver in August, 1901. He had been formerly employed by Samuel Meyer, of this city, for 14 years.

Mr. Zeitler was a progressive business man and was prominent both in trade and social circles, especially in the fraternal societies. He was Past Exalted Ruler of the Denver Lodge of Elks and had taken a prominent part in the work of that organization at its national conventions. He is survived by a daughter, Mrs. Harry Smith, of Baltimore, by his parents and by a brother, E. A. Zeitler, of Havre de Grace.

DIAMONDS LA VALLIERES

Nothing is more popular to-day than La Vallieres; consequently nothing sells so well.

To meet the demand, we have prepared an elaborate stock of unique and exclusive designs, in all combinations, at prices ranging from \$15.00 to \$1,500.00.

Being Importers as well as Manufacturers, we are able to offer exceptionally fine pieces at moderate prices.

Write for assortment. We can meet any requirement in quality and price.

A Review of the Jewelry Exhibits at the Paris Salons of 1909.

By W. Augustus Steward

THE critic who follows, year by year, the works of the decorative artists shown at the Paris Salons lives in an atmosphere of anticipation. He knows his men, watches throughout the year their actions as exemplified in their productions, but, nevertheless, feels, when the time comes for the opening of the Salons, that he may expect something showing a distinct evolution, some fresh demonstration of the fertility of the designer's brain, some new proof of the increasing ingenuity of the craftsman's hands, something to show that the creative spirit is not dormant, and that we are not going too much upon the lessons of the past. And yet, when one observes how scrupulously some artists endeavor to rival nature, and take such pains to copy her every detail, it makes one feel that if they were to study the work of the ancients, and some of the modern Eastern nations, they could make better exponents of applied art. Even some of the uncivilized tribes can indicate the path the craftsman might follow. The jeweler should not be a copyist, neither should he be a painter; his sphere is that of the decorator, his office that which demands thoughtfulness, a consciousness of the value of detail, and, above all, the ability to adapt to his purpose the most appropriate things in nature. Too much modern work shows a slavish copying of nature; that is not art. The so-called *Art Nouveau* was the other extreme—the inventionalization of natural forms until they lost all suggestion of the object or natural phenomena on which they were based. That was a wild struggle after decorative expression. Fortunately, the Salons prove to us that this type of decorator is no more, but we do observe that the copyist of nature is still in evidence, and, I presume, because, while his productions are not jewelry, they are, nevertheless, pleasing to the eye. The jeweler brings to us a knowledge of plant, insect and animal forms which with his craftsman's dexterity he conventionalizes. It is this kind of insight into the adaptabilities of natural forms and the ability to interpret and fashion them into suitable and beautiful objects for personal adornment which makes René Lalique the leader among modern jewelers, and it is this power which one can give the right to be called a jeweler. If this were more thoroughly understood, the labor which is now expended in making servile copies of natural objects might be directed into the channels of applied art, and so increase the number and quality of the exhibits, not only in the Paris Salons, but in other Exhibitions.

A LEAN YEAR.

The exhibits, as a whole, in the Salons of the *Société des Artistes Française* and *La Société Nationale des Beaux-Arts* are not characterized by any unusual characteristics. René Lalique, standing out from among his fellows by his powerful personality, does not give us anything strikingly exceptional, but still he pleases, and makes us marvel at the great range of his creative talents.

He shows some exquisite pendants and combs, but one is particularly interested in his work as a silversmith. Once again he demonstrates his power in this direction. I call to mind his magnificent punch bowl, a fine example of the large silversmith's art, shown at the Exposition of 1900, and now we see how well he understands the small silver-workers' art in the toilet set which, thanks to the French Government, which has purchased it, will be always available for study. How different the quality of these objects, as compared with some of the strange productions of so-called artists! René Lalique is one of the few who find pleasure in doing really useful work, in producing an object in silver which serves some really useful purpose. M. Rezet is also one of the brilliant exceptions, for his centerpiece, "The Breeze," and the cup designed as a prize for aviation are both fine examples of what one may do who realizes the possibilities of a given medium and applies his art accordingly. Paul Bonnard's vases also satisfy, while M. Monod's silver objects are interesting and pleasing, but not quite up to his mark. Technically, his work is good, and the designs are on the right lines, but I do not care for his brooches, which are rather commonplace. Lucien Bonvallet was represented by work which showed that his art is still in the ascendant. The cunning of his hand is shown in the excellent tooling on his well-shaped vases. One always envies the perfect quality of his technique and the grace which he combines with softness in the chased decoration of his objects. M. Dumand is also a master spirit who delights in the same kind of work, and gives us much to think about. Camille Gueyton has successfully essayed to show what he can do as a silversmith.

INFLUENCE OF THE EAST.

Lucien Gaillard is particularly prominent this year, because he has striven more than ever after originality; but, while his jewelry is praiseworthy, it is his knickknacks which command attention. These, which include mirrors, boxes, and paper-knives, are extremely pleasing, and help to materially strengthen his position among the leading exponents of applied art. Like Lalique, this art craftsman is not above learning from the East; indeed, his success is due to the cosmopolitan nature of his studies, and France is the richer for his wide knowledge and the power which it gives. Edmond Becker is another craftsman whose work is invariably appreciated, especially when his carved ivories and wood form the objects we inspect. His talent is not in the direction of extreme delicacy, but rather in that broad, but clean, treatment which is characteristic of all sound craftsmanship. Charles Hairon also excels in this way, and his objects in carved wood, which he inlays with divers material, testify to his qualities as an artist craftsman.

Among the ladies the carving of ivory on horn is also well performed, as was demonstrated in the excellent cups, *bombonnières*,

and paper-knives by Mademoiselle O'Kin. With a keen perception and the creative faculty well developed, she bids fair to make a good name. Madame Waldek-Rousseau, whose name is more familiar, has made a name as an artistic carver of horn. Marguerite Lecreux is another clever worker in horn, who has a keen appreciation of the fitness of things and a sober spirit, which prevents her from overdoing the design. She rarely falls into the mistakes which so many craftswomen make; while Madame Clément, who is a comparatively new recruit, proved her ability with a number of rich little wood boxes. Madame Dufour is also a worker in horn, whose exhibits satisfy the critic and please the public. M. Rivaud, that eccentric genius, who, when he strives after the antique, loses his personality in the endeavor, exhibited a number of objects of jewelry which both interested and pleased, while, at the same time, inviting criticism. He, to my mind, throws away his technical knowledge in many of the designs which he produces. If he would use his undoubted ability and knowledge of style in the direction of giving his work more definite individuality, beyond the fact that he is the interpreter of traditional styles, he would make a more lasting name for himself. One cannot help admiring his constructive ability and the proofs of his untiring energy, but one wants something more than the power of application, something more than great technical knowledge, and it is because Rivaud possesses these powers that he underrates the value of originality. He showed an interesting pendant in green gold, in which diamonds and emeralds had been set, but it was not satisfactory, owing to the stiffness of its design. A gold ring, on the other hand, enameled blue and green, and set with fine diamonds, displayed more character, and, despite the fact that it was rather large, was very satisfactory, while a peculiar brooch, with a gold wire background set with vari-colored opals, fascinated one with its daring and richness, and a silver necklace was also satisfactory.

THE EXTREMISTS.

Of quite a different type is the work of Charles Boutet de Monvel, who allows a fertile imagination to run loose; while Rivaud is obsessed with tradition, Boutet de Monvel is lacking in reserve—a fault which needs curbing. His Medusa pendant is, among his best productions, while his ring, with a pearl supported and gripped by insects, is cleverly arranged. His comb, based on "Honesty," or, as the French have it, *Monnaie de Pape*, impressed most visitors, as did also his spider brooch. Paul Brandt is an artist who is also a technician, and so is Henri Dubret, who does not always soberly take his precious materials and fashion them into dainty objects of personal adornment; when he does, the effects are delightful. Charles Lefèvre exhibited a couple of magnificent head ornaments, which were set with fine stones and finished in a perfect manner. Paul Liénard's brooches and pendants demonstrated his ability as a colorist as well as a designer and craftsman. A pathetic interest attached to the exhibit of the work by the late M. Lionel Le Conteux, a man of considerable ability, and a carver of ex-

RECONSTRUCTED RUBIES

There are RUBIES and RUBIES. For OURS we claim the foremost place in the Scientific Stone market.

We have succeeded in developing the Reconstructed Ruby to the highest possible standard, improving it irrespective of effort and cost. In the purity of material, its uniformity of color and shape, correctness of size and brilliancy of finish, OUR RUBY has positively no equal.

We were the first to make the Reconstructed Ruby popular, introducing it in all the variety of MODERN SHAPES and DESIGNS.

Our stock comprising every standard shape and style is the LARGEST and BEST in the country and will be found pre-eminently suitable for the use of the LARGE MANUFACTURING JEWELER.

When buying Rubies, GET THE BEST. They cost no more.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Death of Edmund Kohn.

Edmund Kohn, senior member of the manufacturing jewelry firm of Alois Kohn & Co., Maiden Lane, New York, died at his home, 111 W. 118th St., last Thursday as a result of an operation performed at the Mount Sinai Hospital several weeks ago. The funeral services were held from his home Sunday morning and the body interred in Union Field Cemetery, New York. Mr. Kohn was well known and highly respected and was at the head of one of the oldest and largest chain manufacturing concerns in this country. The news of his death was received with deep regret by a host of friends and

THE LATE EDMUND KOHN.

The late Edmund Kohn was endowed with all that goes to make a successful business man, industry, perseverance, and above all, an unusual business ability which was manifest throughout his career. In 1900 his son Leo was admitted to the firm and the spirit of harmony and co-operation which always existed between father and son assured the continued success of the firm.

While a busy business man, Mr. Kohn found time for the social side of life and was a prominent member of a number of societies and organizations, among which were: Franz Deak Lodge, I. O. O. F., No. 465; Erster Ungarischer, K. U. Verein; Mount Vernon Lodge, I. O. F. S. of I.; Sulamith Lodge, I. O. B. B.; Grand Lodge, O. U. T. S.; Bathia Lodge, No. 10, U. O. T. S. He was also a member of the Jewelers Board of Trade.

The funeral Sunday was attended by a large number of business associates from the Maiden Lane district. A number of firms sent beautiful floral tributes in testimony of the respect in which the deceased was held.

Deceased is survived by a widow, four sons, Leo, Armin, Randolph and Dr. Alfred L. Kohn, by three daughters, Mrs. Max Schlesinger, Mrs. Henry M. Frank and Mildred Kohn, and by two brothers, Arnold Kohn, Dr. Samuel Kohn, and two sisters, Mrs. Max Eisenberg and Mrs. Raphael Greiff.

The business will be continued under the same style.

Woman and Alleged Accomplices Arrested at Batavia, N. Y., on Charge of Robbing a Jeweler.

BUFFALO, N. Y., July 16.—In the jewelry store of C. C. Bradley & Co., Batavia, N. Y., last Saturday, a woman giving the name of Lottie Fisher, "Union St.," New York, was arrested on a charge of having stolen three diamond rings. She is about 19 years old, and was stylishly attired. A report from Batavia says that one ring valued at \$110 and another at \$100 were found on her. Another report is to the effect that she is believed to have swallowed the third ring.

Florence Bliss, an employe in the store, first stepped up to wait on the Fisher woman, but the visitor was immediately turned over to Charles R. Dunkin, another clerk, when inquiries were made about diamonds. As Miss Fisher was about to leave the counter Miss Bliss called Dunkin's attention to a ring in the tray that did not look right, and it was found that a cheap ring had been cleverly substituted for one which the Fisher woman is charged with having stolen. She was then accused by Dunkin, who telephoned to the police.

The prisoner was taken to police headquarters, where she broke down and is alleged to have made a confession. At the Central Hotel, Batavia, two men, alleged accomplices of the Fisher woman, were arrested. One says he is in the employ of a private detective agency in Brooklyn, and the other says he is an employe of the first.

Employes of Austin & Prescott, in the same town, recognized the woman as one

who had visited their store. Diamond rings were shown to her, at her request, but she was not permitted to handle them.

Rudolph J. C. Bott, Milwaukee, Wis., Makes an Assignment to a Committee of Creditors.

MILWAUKEE, Wis., Aug. 11.—Rudolph J. C. Bott, a retail jeweler and repairer in business at 409 Broadway, has become financially embarrassed and has made an assignment of his stock, fixtures and other assets to a committee of creditors composed of Louis A. Kuesel, of the Kuesel Bros. Co., of this city; Maximilian Elbogen, of the Stein & Elbogen Co., Chicago; C. J. Roehr, of the Bassett Jewelry Co., Providence, and S. J. Hoefler, of M. A. Mead & Co., Chicago and New York. These creditors are to act as trustees, convert the assets into cash and distribute the proceeds ratably among all claimants. Mr. Kuesel, chairman of the committee, will supervise management of the store until everything can be sold.

Those in charge of Mr. Bott's affairs estimate that the liabilities are \$7,000, and say that nominally the value of the assets will be about \$5,000, subject to the exemptions allowed bankrupts by the laws of Wisconsin. The creditors number about 400, and it is said that they may realize about 50 cents on the dollar on their claims.

Mr. Bott, who has been a resident of Milwaukee many years, commenced business in a small way at 171 3d St., a little more than a year ago. He had previously been employed by the Bunde & Upmeyer Co., and had also worked for the Preusser Jewelry Co. and Adam Bloedel. He moved to his present address, 409 Broadway, last Fall.

Mr. Bott's creditors, last week, received formal notices asking them to consent to the assignment.

Death of Herbert H. Chapple.

Herbert H. Chapple, a jeweler at 1642 Fulton St., Brooklyn, dropped dead on Sunday as he was going into the Coney Island Reception Hospital at Coney Island. He approached a patrolman and asked to be directed to a doctor. The patrolman directed him to the hospital, and as he was leading him up the steps the man died. The policeman carried him into the hospital, where he was examined by Dr. Norstad, who said the jeweler had died of heart disease.

Mr. Chapple was one of the oldest jewelers on Fulton St. He started at 1642 Fulton St. in 1879. He was formerly employed by Horace Sill at 678 Fulton St. for over 25 years. Mr. Sill died several years ago, and Mr. Chapple acquired the stock and continued the place as a branch, but in February, 1900, discontinued it.

D. H. Caswell, Lawrence, Mass., has just returned from a month's vacation spent at Naples Bay and the White Mountains.

According to an inventory made of the store of August Pooos, who recently committed suicide in St. Louis, Mo., the deceased left a jewelry stock valued at nearly \$5,000.

Among the traveling representatives in Toronto, Ont., recently, were: E. E. Stockton, E. Ingraham Co., and Israel Michelson, I. L. Michelson & Sons; W. Kennedy, Payne & Baker Mfg. Co. Among the traveling representatives who called upon the Milwaukee, Wis., trade, last week, were: Rothschild, Kaffeman, Rothschild & Co.; H. C. Stonka, H. C. Kionka & Co.; M. S. Greenbaum, William I. Rosenfeld.

Traveling representatives in Boston, Mass., last week, included: C. H. Crane, Strobell & Crane; George A. Briggs, William L. Sexton & Co.; Louis Lawton, Jones & Woodland Co.; W. H. Thornhill, Henry A. Kirby, Frank Keller, the Keller Mfg. Co.

The following traveling representatives visited the trade in Lancaster, Pa., lately: Howard White, Mosser & White Co.; Mr. Walle, Wolfheim & Sachs; E. Kreeuer, A. Vollmer & Co.; V. L. Hough, New England Watch Co.; George Shephardson, C. A. Marsh & Co.; Mr. Buckmaster, Sykes & Strandberg; B. F. Robinson, Sinclair & Co.

Traveling representatives in Los Angeles, Cal., recently, include: George Goldberg, Untermeyer-Robbins Co.; J. P. Falk, K. Kaufmann & Co.; John Eason, Bippart, Griscom & Oshorn; Mr. Bonner, Bonser & Co.; Mr. May, Moskovitz Bros.; David Chwob; Jacob Marx, Kossuth-Marx Jewelry Co.; Ir. Holden, Alvin Mfg. Co.; M. T. Sherwood, Sydney Smith & Co.

Among the travelers who, recently, called on the Buffalo jewelry trade were: Wallace E. Welch, Hoyt, Obrig & Geiger Co.; E. B. Downs, Hayden V. Wheeler & Co.; J. Laffey, Gorham Co.; John Garland, Keller Jewelry Mfg. Co.; L. E. Picard, American Watch Case Co.; James R. Palmer, Henry A. Kirby; A. W. Angel, George L. Paine Co.; E. H. Levy, E. H. Levy Co.; C. A. Holbrook, Sloan & Co.; Earle R. Sheppard; Mr. Joel, H. H. Smith Silver Co.; Mr. Williams, Jennings Bros. Mfg. Co.; A. B. Barnes, H. M. Quacknush; Mr. Rich, Derby Silver Co.

The traveling men in New Orleans, La., last week, include: W. C. Barry, Barry & Co.; Vincent W. Henderson, Crane & Theurer; L. Nussbaum, Ingomar, Goldsmith & Co.; Louis Freund, Henry Freund & Bro.; C. C. Bugh, Libby Glass Works; S. K. Jonas; Herman Abraham, Cohen, Abraham & Co.; R. A. Hunken, J. B. Bowden & Co.; John W. Steele, C. G. Alford & Co. The jewelry salesmen now in that city include: Edward Laese, R. Wallace & Son's Mfg. Co.; Charles H. Horton, Bradley & Hubbard Mfg. Co.; H. C. Varner, New England Watch Co.; George A. Chuetz, Snow & Westcott Co.; Adolph Rosenthal, and Alfred C. Eckert, Bigalke & Eckert Co. The New York diamond houses were represented by Messrs. Oppenheimer, Powell and Lissauer.

Traveling representatives in St. Louis, Mo., during the past week, were: Alfred J. Moss, Ostby & Barton Co.; Mr. Richards, Standard Button Co.; W. Bleeker, Martin-Copeland Co.; W. P. Towse, W. H. Wilmarth & Co.; Charles P. Crane, Liss Bros. Co.; Arthur F. Dolan, Moore Mfg. Co.; Fred Perry, F. H. Sadler Co.; Fred A. Bullock, Horton-Angell Co.; Mr. Valentine, Freeman-Laughaday Co.; Perry C. Burnham, Enos Richardson & Co.; George H. Thomas, Scharling & Co.; representative of Hartford Sterling Co.; E. A. Reed, Reed & Barton; John H. C. Nevins, Harry J. Flint Co.; C. T. Barbour, Watrous Mfg. Co.; C. P. Young, Whiteside & Blank; J. M. Curtis, Meriden Silver Plate Co.; a representative ofureka Silver Co.; Clayton Shepperd, Kremenz Co.

The following traveling representatives called on the trade in Kansas City, Mo., the past week: Berman, Berman & Co.; H. E. Cobb, Daggett Clap Co.; H. S. Noyes, Bates & Bacon; H. New, Henry Baschkopf; G. Fred Perry, F. H. Sadler Co.; George Goldberg, Untermeyer-Robbins Co.; Geo. Parker, Smith & Crosby; H. G. Pfordresher, Eastern Jewelry Co.; Walter S. Strauss, Jacob Strauss & Sons; K. L. Taylor, Riley & French; P.

A. Wilkinson, J. J. Sommers & Co.; M. V. Decker, Plainville Stock Co.; Geo. B. Neill, Keystone Watch Case Co.; S. H. Ashe, Roy Watch Case Co.; G. W. Bleeker, Martin-Copeland Co.; Mr. Vaughn, New England Watch Case Co.; C. E. Edwards, Walter E. Hayward Co.; C. W. Edwards, Leach, Miller & Co.; George Southwick, Payton & Kelley Co.; M. Neuburger, Acme Comb & Novelty Co., and Castiglioni Co.

The following traveling representatives were in Cincinnati, O., last week: Mr. Shire, Konijn, Frank & Shure; V. W. Henderson, Crane & Theurer; H. A. Allen; Charles Drown, Ostby & Barton Co.; A. L. Hancock, C. Sydney Smith & Co.; Benj. Schloss, A. Wallach & Co.; Lee Powell, S. O. Bigney & Co.; Frank Bloomer, E. I. Franklin & Co.; Alfred Goldsmith, L. D. Bloch & Co.; E. A. Reed, Reed & Barton; F. E. Buffum, J. A. & S. W. Granbery; Jos. Guntzburger, L. Guntzburger & Son; Leo. Henle, Sussfeld, Lorsch & Co.; Geo. N. Steere, George N. Steere Co.; Edgar Huhn, Scofield, Melcher & Scofield; H. L. Strauss, Nathan Wallach; A. T. Teague, Link & Angell; T. W. Smith, Roger Williams Silver Co.; C. Young, Whiteside & Blank; Jul. F. Schumann, Jr., William Kinschert Co.; D. Zimmer, Zimmer, Rees & Co.; Jack Thompson, J. B. Bowden & Co.; Thos. F. Fleming, Jones & Woodland Co.; M. Smith, R. Blackinton & Co.

Among the traveling representatives in Omaha, Neb., last week, were: L. E. Smith, M. B. Bryant & Co.; Mr. Hall, International Silver Co.; Morris Lewkowitz, D. Ullman & Co.; A. Fraser, Rochester Cut Glass Co.; W. S. Dudley, International Silver Co.; M. Neuburger, Acme Comb & Novelty Co.; H. G. Pfordresher, Eastern Jewelry Co.; E. T. Wilson, G. C. Hudson & Co.; C. W. Edwards, Walter E. Hayward Co.; Mr. Sutherland, J. J. Niland Co.; Mr. Engelmann, Krautz, Smith & Co.; E. B. Frank, Parpoint Corporation; J. M. Curtis, International Silver Co.; F. R. Horton, Carter, Howe & Co.; Charles F. Hartshorn, Mling & Co.; W. F. Adams, Simpson, Hall, Miller & Co.; George W. Birnbaum, Julius Wodiska; Mr. Hagnauer, Eisenstadt Mfg. Co.; A. S. Riley, Mandeville, Carrow & Crane; Mr. Gruen, D. Gruen Sons & Co.; Fred J. Classen, Irving Cut Glass Co.; David Beer, Bernheim & Beer; F. H. Gallagher, Keystone Cut Glass Co.; I. J. Rosenthal, Rothschild Bros. & Co.; Henry Freund, Henry Freund & Bro.; J. Rothschild, Kaffeman, Rothschild & Co.; Alex. Fraser, Rochester Cut Glass Co. and Smithport Cut Glass Co.; Norman E. Treat, Gorham Co.; Perry C. Burnham, Enos Richardson & Co.; Fred H. Felger, F. & F. Felger.

Package Containing \$1,200 in Bills and Coin Mysteriously Disappears from the Office of the Aikin, Lambert Co.

The mysterious disappearance of \$1,200 from the offices of the Aikin, Lambert Co., 15 Maiden Lane, New York, is causing considerable annoyance, and it is hoped that the tangle will soon be straightened out.

The treasurer of the concern said that the money was in a compact package and that he took it to the office and left it on last Wednesday, the payday. Shortly afterward he learned that the package, which contained money to pay the salary of the employes, could not be found. After a search detectives were called into the case, but so far as can be learned no trace of the missing money has as yet been found.

The money was in envelopes marked with the names of the various employes, all of which were made into bundles.

Market Prices for Silver Bars.

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

	London.	New York selling price, .999 Basis.
Aug. 10.....	23 1-2d.	\$0.527½
" 11.....	23 1-2d.	.527½
" 13.....	23 9-16d.	.524½
" 14.....	23 9-16d.	.524½
" 16.....	23 9-16d.	.524½

R. E. Abbott has opened a store at La Connor, Wash.

J. G. Greenwood has opened a store at Wonewoc, Wis.

D. C. Deinger recently began business in Phoenixville, Pa.

J. G. Guard, Bakersfield, Cal., will shortly open a store in Maricopa, Cal.

A new jewelry store has been opened at 826 South St., Philadelphia, Pa., by A. Mander.

Wm. D. Dreyer has started in the jewelry business in the Chicago Savings Bank building, Chicago, Ill.

A. Simon & Son recently engaged in business in Philadelphia, Pa. The store is located at 137 S. 13th St.

The W. P. Cart Co., Charleston, S. C., was incorporated recently with a capital of \$10,000. The concern will do a jewelry and optical business. The incorporators are W. P. Cart and W. C. MacMurphy.

L. Stringer & Co. is the name of a new concern in Providence, R. I. The concern will make a specialty of chasing and designing. The business will be located at 49 Weybosset St.

The Newell Mfg. Co. has been incorporated in Chicago, Ill., with a capital of \$25,000, to deal in watch and jewelry materials and findings. The incorporators are G. W. Cureton, E. D. Clapp and William J. Fauth.

J. H. Baber, Dayton, O., Named in Involuntary Bankruptcy Proceedings.

DAYTON, O., Aug. 16.—J. H. Baber is named in a petition in bankruptcy which was filed to-day in the United States District Court. It is impossible at this time to give an estimate of his assets or liabilities.

Mr. Baber was formerly in the jewelry business at Marion, Ind., for about 16 years, and from there he moved to Piqua on April 1, 1907, and in September of the same year located in this city. He was at one time at Staunton, Va., where he conducted a loan business.

Providence.

Benjamin Wyman was among the visitors in New York, last week.

Mr. and Mrs. Gustave Saacke are sunbathing on Prudence Island this season.

Mr. and Mrs. Harry Fulford were guests at the Massasoit House, Narragansett Pier, last week.

The Wightman & Hough Co. started its factory Monday, the 16th, after a two weeks' shutdown.

The E. A. Bennett Co. started last week on a 13-hour-a-day schedule, with numerous orders ahead.

Robert E. Budlong and William E. Tefft have been elected directors of the Atlantic Marine Insurance Co.

A quarterly dividend of one per cent. upon the capital stock of the Silversmiths Co. has been declared.

Col. and Mrs. Arthur H. Watson were registered at the Massasoit House, Narragansett Pier, last week.

George S. Melville is calling upon the trade of the western circuit in the interests of D. Wilcox & Co.

Harry Cutler has returned from a week's vacation trip in the Maine woods, arriving home the first of the week.

James Lincoln, with the Wolcott Mfg. Co., returned the past week from a two weeks' vacation at Block Island.

Edward B. Hough, manager of the Wightman & Hough Co., left here, Friday, for a week's trip to Nova Scotia.

John S. Craft and Frederick J. Newton, of Craft & Newton, manufacturers, were in New York last week on business.

Julius Palmer of Palmer & Capron, has been elected a director of the Equitable Fire and Marine Insurance Co. for five years.

Joseph W. Heller, manufacturer of mounted combs, 59 Page St., has been on a business trip to New York and Philadelphia.

Clarence A. Fisher, manager of George W. Clafin & Co.'s store at Attleboro, has returned from a week's vacation on Cape Cod.

Mr. and Mrs. Frederick A. Devoll have returned to their home at Edgewood after spending several weeks at Saratoga Springs, N. Y.

Robert Drew, representing Parks Bros. Rogers, is back again in New York after a two-weeks' vacation at Asbury Park.

Sigmund Fischer returned, last week, from a two months' European trip, during which he visited his parents at Gablonz, Austria.

A. B. Hammerberg, western representative for Hamilton & Hamilton, Jr., of this city, has returned to Chicago, from a trip through Iowa.

The regular monthly meeting of the directors of the Manufacturing Jewelers' Board of Trade will be held Friday afternoon of this week.

W. Barbeau, for 17 years watchmaker with the late L. V. Guertin, Pawtucket, is now associated with A. A. Lupien, 24 Broad St., in that city.

Charles E. Hancock has taken to automobiling and has just registered a 36-horsepower Peerless touring car with the State Board of Public Roads.

John S. Cunningham has returned from a trip through the west and is now spending a few days at the factory of the E. L. Spencer Co., in this city.

L. Stringer & Co. have started in business as chasers and designers at 10 Weybosset St. Both members of the firm learned their trade at the Gorham Co.

The engagement has just been announced of Miss D. Eleanor Lyckland, stenographer for the Brown & Sharpe Mfg. Co., to George Blyth, Philadelphia.

B. A. Ballou & Co., Inc., of this city, have opened an office in room 601 in the Columbus Memorial building, Chicago, which will be in charge of C. E. Petit.

The Rogers, Lunt & Bowlen Co., Greenfield, Mass., has been advertising in the local dailies for a young man to make plain jewelers' cutting tools.

Peter Turner, traveling representative of the Brown & Dean Co., refiners, was married at Grace Church, this city, a few days ago, to Miss Cora L. Fenner, of Edgewood.

Mr. and Mrs. E. N. Slade, of this city, were members of an automobile party that stopped at the Kearsarge, North Conway, N. H., last week, en route to Bretton Woods.

Many of the manufacturing jewelers, especially those who make a specialty of novelties, took advantage of the great demand and furor over the new Lincoln "V. D. B." cent and made up souvenirs as articles of jewelry.

George H. Webb, secretary of the Providence Board of Trade and Commissioner of Industrial Statistics of the State, has been appointed by President Taft as supervisor of the Federal census for 1910. He occupied a similar position in 1900.

Asa H. Richmond arrived home last week from England, where he has been on business for Zare White, manufacturer of mounted combs. He at once began preparations for a trip to the Pacific Coast, on which he will leave in a few days.

Mr. and Mrs. Harry Cutler left here Saturday morning for a few days' automobiling in the White Mountains. Between Twin Mountain and Fabyans their car was in collision with another occupied by Yonkers, N. Y., parties, but all escaped injury.

Buyers and department heads of L. Diamond & Sons, Inc., gathered at Field Point Friday at a complimentary bake tendered C. A. Lockhart. After the dinner the party, numbering about 25, attended the Rochester-Providence baseball game.

Governor Pothier has appointed Frederick W. Aldred, of the B. H. Gladding Co., as one of the delegates to represent Rhode Island at the convention to be held at Seattle, Wash., the latter part of this month for the conservation of the natural resources of the country.

Among the foreign importations entered through the Providence Custom House, the past week, were the following: From Bremen, one package of jewelry, four of imitation precious stones; from Hamburg, two packages of manufactures of silver; from Toronto, 20 packages of plaster casts.

John J. Butler, superintendent of Waite-Thresher Co.'s factory, was chairman of the committee of arrangements for the annual outing of the Slocum Light Guard Association on Friday at Boyden Heights. Jo-

seph Stringer, foreman for Snow & Westcott Co., won the silver cup offered for the best rifle shot among the veterans. Lieut. Joseph Auty, Jr., and Joseph Williams were among those who participated in the outing.

The third annual outing of the employes of the Clark & Coombs Mfg. Co., was held Saturday at Emery Park. The party, numbering about 75, left the city at 10 A. M. on special cars and upon arrival a lunch was served. A baseball game between teams representing the Clark & Coombs Mfg. Co. and the Rueckert Mfg. Co. was played, the former winning by a score of 14 to 12. A clambake followed at 4 o'clock, with athletic sports to conclude the day's festivities.

The employes of B. A. Ballou & Co., Inc., held their annual outing last week, which was one of the most enjoyable in the history of these pleasant events. The shop was closed at Friday noon and as each of the employes took his or her seat in the special car a box lunch was handed out, together with bags of confectionery, cigars and peanuts. Frequently during the day similar bags were given out and ice cream and lemonade were furnished in abundance.

The petition of Charles H. Poland, a creditor, stockholder and treasurer of the United Brush Co., Pawtucket, for the appointment of a temporary receiver, was granted the past week by the Superior Court and Samuel Slocum, president of the company, was named as receiver. Mr. Poland is a creditor to the extent of \$3,200. A meeting of the stockholders was held a few days ago, at which it was decided to continue the business and make satisfactory arrangements with all holders of claims against the company.

"Your Honor, for 19 years I have been employed by the Gorham Co. as a silversmith. During that time I have borne a good reputation and have lived an honorable, upright life, but at last I succumbed to the temptation and I ask you to be merciful in the name of my wife and children" pleaded Jacob Unger, 48 years old, when arraigned before Judge Rueckert Saturday morning in the Sixth District Court. Unger was charged with the larceny of eight dollars' worth of silver scraps from this concern. The police told the court that while the thefts had been going on for several months, they were of the opinion that this was his first offense. He bitterly bewailed his fall from the path of rectitude and said that he could not explain why he had taken the metal. Upon the reading of the charge he pleaded guilty and was fined \$20 and costs.

Trade Gossip.

A new departure in mesh bags is shown in the round-cornered mountings for which a patent has been applied by Paye & Baker Mfg. Co., North Attleboro, Mass. The concern is showing this new effect in a great variety of attractive designs.

The Sommer Clock Co., Inc., Philadelphia, Pa., recently added several new patterns in cuckoo clocks to its already extensive stock and is at present showing them to the trade. Gustav C. Kunz, well known in the clock business in and about Philadelphia for some time past, and Albert Sommer are in charge of the office and showrooms.

Have you ever seen Pink Amethysts?

Handsome stones of remarkable brilliancy and of the most delicate shades of pink.

These stones are cut in every size and shape for pendants, brooches, earrings, studs, etc.

They are especially commended to manufacturers on account of their beauty, adaptability, and moderate price.

Torre del Greco, Italy New York City

Attleboro.

TRADE CONDITIONS.

Business is rapidly increasing in all the local factories, and after Labor Day the Saturday afternoon holiday will be discontinued in most of the shops.

C. D. Lyons has returned from a short business trip in New York.

A letter for the Attleboro Jewelry Co. is diverted at the local postoffice.

Ralph Hoxsie is making a western trip in the interests of the Mason-Howard Co. H. T. Regnell, formerly of the Regnell Bigney Co., left, Wednesday, for Oregon. Joseph Finberg left, last week, for an extended western trip for the Finberg Mfg. Co.

H. A. Allen, of the new concern, the H. Allen Co., started on a western trip, last week.

The addition to the factory of the Freeman, Daughaday Co., at Chartley, is almost completed.

Maxey W. Potter left, last week, for a six-weeks' trip in the interests of the J. M. Fisher Co.

The annual outing of the employes of Bates & Bacon took place, last Saturday, at Boyden Heights.

T. E. McCaffrey, who is interested in several of the local firms, has been enjoying a vacation at Hampton Beach.

George Heywood, of the Horton-Angell Co., has taken up his duties at the New York office after enjoying his annual vacation.

Maj. E. S. Horton, C. M. Robbins and others have petitioned for a layout of Bicknell St., which runs east and west of the Horton-Angell factory.

The outside walls and roof of the new Leach & Garner Co.'s factory are now finished and the firm expects to occupy its new home next month.

Edward J. Lonergan, who recently returned from the Allen & Lonergan Co., will leave in a short time for Little Rock, Ark., where he expects to enter business.

J. M. Fisher & Co. have taken the advantage of the demand for the discontinued issue of the new Lincoln penny and are sending out an advertising card with one of the new cents stuck in the center.

The Frank Mossberg Co. Mutual Relief Association has been organized with the following officers: President, Charles E. Sleeper; vice-president, Clarence Merriam; directors, Charles L. Estes, W. E. Hall, C. L. Ford, August Limberg, Carl Moberg, Phillip Smith, Charles Swanson, N. G. Lawson and Charles E. Peterson.

The firm of Regnell, Bigney & Co. is no more, James A. Bigney having sold his interests in the business to the Allison Mfg. Co., and it will be under the latter name the concern will be conducted in the future. The house will, as heretofore, be located on County St. Herman T. Regnell retired from this well-known business but a few months ago.

The refusal of the New York, New Haven & Hartford Railroad Co. to haul free of charge, the special train bearing the delegation of business men from Japan, who expect to tour the United States, next week, makes it very doubtful if they will now visit this section of the country. At-

tleboro manufacturers had hoped that they would stop off and look over the jewelry industry.

Connecticut.

Samuel Goodman and wife, New Haven, announce the engagement of their daughter, Rena, to Louis Metzger.

E. E. Stockton has assigned to the E. Ingraham Co., Bristol, a patent which he recently received on a novel alarm clock.

W. T. Bergen, traveling representative of the J. J. Niland Co., Meriden, left, last week, for an extensive trip throughout the middle west.

Contracts have just been awarded for the construction of the large brick addition to the plant of the Rogers Silver Plate Co., on Rowan St., Danbury.

Walter A. Ingraham, of the E. Ingraham Co., Bristol, has returned home from Cottage City, where he has been spending several weeks with his family.

A. E. Hobson, superintendent of the Barbour Silver Co.'s factory, Meriden, returned last week on the *Mauretania* from an extended tour of Europe.

Fernando C. Horton, a clockmaker by trade, died last week at the home of his daughter, Mrs. George J. Murphy, 27 Asylum St., New Haven, aged 81 years.

James B. Corey has opened optical offices at 48 Church St., New Haven. Prior to locating at the latter place Mr. Corey was engaged in business in Washington, D. C.

Wm. B. Robertson, for several years engaged in the watch and jewelry repairing business in Norwich, died, recently, at his home there of apoplexy. The deceased was born in Norwich, June 6, 1849.

All the departments in the factory of the Seth Thomas Clock Co., Thomaston, resumed operations Aug. 10, after having been closed for two weeks, during which time extensive repairs were made.

Nicholas J. Wenzel, who, until recently, was in the employ of the Waterbury Clock Co., Waterbury, died suddenly at his home, 666 N. Riverside St., in Waterbury, on Sunday, of last week. Mr. Wenzel was 50 years of age.

E. P. Golden, superintendent at Factory "E," International Silver Co., Meriden, has the sympathy of his many friends in the trade, owing to the recent death of his wife at her home, 596 Broad St. Death was caused by angina pectoris.

The fire departments of Factories "L" and "M," International Silver Co., held an enjoyable outing, Saturday, at Double Beach. Electric cars were taken from Wallingford to the beach. Athletic events were held and a shore dinner was served. The attendance numbered about 60.

The C. F. Munro Co., Meriden, recently made the silver trophy cup which was raced for by the sailing yachts under the auspices of the New Bedford Yacht Club on Thursday, Aug. 5. The cup is the joint gift of Mr. Monroe and Thomas F. Dey. The trophy is 12 inches high and has an ebony base.

The factory of the Middletown Silver Co., Middletown, has been closed for several weeks. A recent dispatch from Middletown announces that negotiations are in

progress for a reorganization of the plant. The concern was founded about 12 years ago by some of the former employes of the old Middletown Silver Plate Co.

A fire which broke out, Wednesday, at the residence of Cyrus B. Beets, 396 Orange St., did damage amounting in all to about \$8,000. The loss is fully covered by insurance. Mr. Beets, who is an official of the Meriden Britannia Co., and also a director of the International Silver Co., Meriden, was at the latter place at the time of the fire.

North Attleboro.

Percy Clapp left, last week, for the west. Fred S. Gilbert left, last week, for the west.

Frank Gilbert is enjoying a brief vacation at Lake Sunapee, N. H.

J. J. Sommer has returned from a successful business trip through the west.

John F. Miller, of the firm of Doran, Bagnall & Co., has returned from Maine.

W. H. Bell returned, last week, from a few days' vacation spent at Atlantic City.

Harry Fisher left, last week, for the west in the interests of Swift, Furbish & Fisher.

Bert Noble left, last week, on a western trip in the interests of Sturtevant & Whiting.

Geo. L. Paine left, last week, for the west in the interests of the Geo. L. Paine Co.

W. R. Burleigh has entered the employ of E. I. Franklin & Co., as head shipping clerk.

William McGowan has taken a position with the Hanlon-Thornton Co. as their salesman.

A. B. Chace, formerly with F. S. Gilbert, but now with Boss & Baldwin, left, last week, on an eastern trip.

John Carey, formerly a toolmaker of this town, was held up in New York City, last week, and relieved of a roll of money.

The floor in the factory of J. J. Sommer & Co., caught fire, Tuesday afternoon, Aug. 10, from a spark which flew from the forge, and caused considerable excitement for a while. It was put out by employes with water buckets before serious damage was done.

Charles C. Hagerty and Walter E. Barden, commissioners appointed by the Probate Court to pass upon the claims against the estate of Frederick E. Sargent, have filed with the court their report. The following accounts have been allowed: Chase National Bank, New York, \$17,937.33; Jewelers' National Bank of North Attleboro, \$136,668.07; William A. Miller, \$10,300; Foxboro Steam Laundry, \$4.18; Sallender, McAuslan & Troupe, 76 cents; total, \$160,910.34.

Jewelers and hotel-keepers of central New York have been complaining of a swindler who has been passing worthless checks, complaints having been received from Rochester, Syracuse, Schenectady and other cities. Last Wednesday a man and woman were arrested in Albany, and the man was charged with being the party who did the swindling. After an examination he was taken to Schenectady for identification by some of the complainants.

Philadelphia.

Miss J. Kelly, of M. Sickles & Sons, is visiting friends at Schwenksville, Pa.

Harry Barry will spend the latter part of this month with his family at Chelsea. Morton J. Levy, with Ritter, Kahn & Co., is spending his vacation at Atlantic City.

J. C. Beitel & Sons, jewelers, Catasauqua, Pa., are now occupying their attractive new store.

Samuel Mellin, a retail jeweler at 1903 South St., has invested in a new delivery wagon.

D. C. Deingerger, retail jeweler, Du Bois, has opened a new jewelry store in Phoenixville, Pa.

Harry L. Finney, of Kennedy & Bro., 8th and Arch Sts., will become a benedict, Aug. 23.

A. Mander, case and jewelry repairer, 15 Sansom St., has opened a retail jewelry store, 826 South St.

J. Hyberg, watchmaker for J. E. Caldwell & Co., is back from a pleasant vacation at Wildwood, N. J.

J. B. Robertson, with M. Sickles & Sons, will spend the month of August at Ocean City with Mrs. Robertson.

The J. E. Limeburner Co., opticians, 1702 Chestnut St., will move into a new building, 1720 Chestnut St., Sept. 6.

H. F. Freeman, West Chester, Pa., has purchased a Ford car and expects to make frequent trips to this city in it.

A. H. Ruhle, formerly with Strawbridge & Clothier, has accepted a position with Weber & Bro., jewelers, N. Front St.

Maxwell & Berlet have completed the silver cups to be presented by the Mooresown Field Club sometime this month.

Edwin Koshland, with Charles Koshland, 702 Chestnut St., is traveling through the coal regions and reports business good.

J. W. Clark, Bristol, Pa., is receiving the sympathy of the trade owing to the death of his brother, who was recently run over by a trolley car.

The Bailey, Banks & Biddle Co. is the maker and designer of the Record Cup to be presented by Dr. Leedom Sharp to the Yachtsman's Club.

George Stetsler, 7th and Sansom Sts., who has been ill for the past three months, has entirely recovered and is again able to attend to business.

A. Simon & Son, formerly connected with the Castleberg National Jewelry Co., Baltimore, have opened a new store in this city, 137 S. 13th St.

John Blisard, of John F. Blisard & Co., jewelers' supplies, 727 Sansom St., is spending this month on a trip, combining business and pleasure.

Samuel P. Ludwig, with C. W. Bixler & Co., Easton, Pa., is receiving the sympathy of the trade, owing to the recent death of his father, Henry Ludwig.

Elwood Bailey, a jeweler for a number of years with offices under Green's Hotel, 8th and Chestnut Sts., died Aug. 7 at the residence of his son-in-law, 202 N. 53d St.

Frederick Goldman, well known among the local retail jewelers and jobbers, has accepted a position with the Pennsylvania Watch Case Co., and is now calling on the

trade in this city. He will shortly cover New York, Ohio and Pennsylvania, also the middle west.

The Hoover & Smith Co., 616 Chestnut St., has taken the store which Maxwell & Berlet have just vacated at the northeast corner of 13th and Walnut Sts. and will occupy it the middle of September.

Charles H. Koshland, manufacturing jeweler, 702 Chestnut St., has just returned from a successful fishing trip along the Susquehanna. In one of Mr. Koshland's catches 10 fish were landed, the combined weight of which was 100 pounds.

The jewelry store of M. Rosenbaum, 222 N. 8th St., was robbed, last week, by a thief who entered under the pretense of making a purchase. The theft was discovered later in the day, when Mr. Rosenbaum was taking count of the stock.

The following jewelers were visitors to this city during the week: A. M. Kendall, Millville, N. J.; John MacPherson, Mauch Chunk, Pa.; Lloyd Ehrard, Davis, W. Va.; W. K. Schlotterer, Schwenksville, Pa.; Ernest Sturmer, Easton, Md.; E. Kerper, Pottstown, Pa.; A. E. Baylies, Bristol, Pa.; Henry Bolte, Atlantic City, N. J., and H. S. Kratz, Souderton, Pa.

Sol Sickles, of M. Sickles & Sons, while fishing last Saturday around Atlantic City, caught the largest weakfish that has been caught in years at this resort, but, unfortunately, just as he was about to pull the fish into the boat his hook broke and the fish was lost. "Sol" solemnly declares that this story is "on the level." Any one who doubts it is referred to the captain of the boat.

Maxwell & Berlet, 13th and Walnut Sts., will occupy their new store, 16th and Walnut Sts., this week. This building was formerly the home of Mayor Fidler's son, and it is still characterized by its beautiful interior decorations. This store will probably be one of the handsomest in the city. Colonial silverware will be carried exclusively, and engraved glassware, jewelry and art metals will complete the line.

It is rumored in political circles that Col. J. Warner Hutchins, a prominent jeweler of this city, would receive the appointment of Supervisor of the Census for Pennsylvania. Senator Penrose, when interrogated on the subject, expressed his approval of such a selection, if Col. Hutchins could be prevailed upon to accept. Col. Hutchins, who is prominently identified with the jewelry trade and formerly president of the Jewelers' Club for many years, is at present on a yachting cruise on the St. Lawrence River and apparently unaware of the honor that has been conferred upon him.

Dr. J. L. Borsch, Jr., son of Dr. J. L. Borsch, optician, 1324 Walnut St., has received a decoration from the Italian government, according to a dispatch received in this city. Word of the decoration has not been received by his friends, but it is believed that the honor has been conferred for professional service to a member of the royal family. Five years ago Dr. Borsch was decorated by the French government for optical work among the children in the French schools. He is best known as the inventor of an invisible bi-focal lens, for which he was awarded a medal by the

Franklin Institute in 1906. At the present time he has a hospital for the treatment of diseases of the eye at Biarritz, a fashionable watering place in Southern France. Dr. Borsch is a graduate of the Jefferson Medical College, this city.

Lancaster, Pa.

George M. Sachs is visiting Pittsburg, his old home.

Walter Narcross, Toledo, O., is visiting Lancaster relatives.

Christian Vollmer, with T. Wilson Dubbs, has been spending his vacation at Altoona, Pa.

William H. Fowlie, a missionary for the Elgin National Watch Co., visited the trade here last week.

George R. Weber, of Louis Weber & Son, has been at Asbury Park, making the trip by automobile.

C. H. Hartman, formerly with E. G. Hoover, Harrisburg, has opened a repair shop at Hanover, Pa.

Abram L. Barr, with Aug. Rhoads, is spending his vacation at New York, Niagara Falls and Asbury Park.

F. A. Huber and James P. Rounfort, with the H. S. Meiskey Co., have started for a tour of their respective territories.

S. G. Martin, Wisconsin, Pa., and wife stopped over in Lancaster, last week, on their way home from a trip to Atlantic City.

E. Kreener, with A. Vollmer & Co., made his initial trip to Lancaster last week, as did B. F. Robinson, of H. B. Sinclair & Co.

Walter Cahill, with S. Kurtz Zook, is on a trip to Atlantic City and New York, and E. A. Harvey is visiting Albany, N. Y., his old home.

Max Dochour, Louisville, a native Lancaster countian, who has resided in Kentucky the past dozen years, is visiting Lancaster relatives.

B. Frank Hershey, with John B. Roth, Jr., leaves the latter's employ Sept. 1 to take a position with a Williamsport, Pa., firm. Harry Keller, also at Roth's, is visiting Atlantic City and New York.

The following jewelers recently visited Lancaster: H. F. Mowrer, Strasburg; George Gehman, Terre Hill, Pa.; S. H. Miller, Mount Joy; Robert Hudson, Helm; Jacob Fisher, Elizabethtown; R. B. Fegley, Mount Joy.

Marcus Edelstein is visiting New York and Paterson, N. J., being the guest of his brother, Jeweler A. L. Edelstein, at Paterson. In his absence another Paterson brother, Sidney M. Edelstein, has charge of his business.

The firm of Soutter, Buchanan & Young having dissolved partnership, a large number of friends of John S. Soutter, last week, gave him a farewell dinner, at which he was presented with a beautiful silver loving cup, furnished by S. Kurtz Zook. Mr. Soutter will engage in business in Boston.

Charles Herrick, Oberlin, O., has entered the Ezra F. Bowman Technical School as a student in watchmaking. John J. Bowman and Charles E. Bowman, of Ezra F. Bowman's Sons, at a late meeting of the Lancaster Gnn Club, were elected a director and auditor, respectively.

The LINE of QUALITY

Factory Inspection

Having a high standard of excellence to maintain, our factory inspection is extremely rigid. Every piece of jewelry that we manufacture is critically examined by competent inspectors after each operation and the smallest imperfection is detected. Thus we maintain our reputation and protect our customers, who may feel absolutely sure that every article which they purchase will be perfect and possess every essential feature of quality.

Prices Low Quality Considered

Manufacturers of 14k. and 10k. Brooches, Diamond Mountings, Festoons, Pendants, Scarf Pins, Links, Tie Clasps, Studs, Locketts, Bracelets, Ear Screws and Drops, Collar Buttons, Hat Pins, Cuff Pins, and Combination Sets.

America's Leading Jewelry Auctioneer

The only auctioneer in the world who conducted a six months' sale on Maiden Lane, New York, the jewelry center of America.

DAN I. MURRAY

I SOLD \$1,000 to \$3,000 per day at a handsome profit over cost of goods. I just closed a sale where I made \$12,000 profits in 60 days on \$60,000 sale. I will gladly give you the name and address of this house. I can give you any amount of goods on memo, desired. I personally conduct all large sales. I have never made a sale without a profit.

Jewelers never fail after my sales. Look up my record for 15 years; look up the other fellow's also. I am booking Fall sales now; be quick if you want me to conduct your sale as I am compelled to turn away many sales every year. First come, first served is my motto, and 100 cents on the dollar is guaranteed on your goods: 25 to 50 per cent. profit on goods I will give you on memo.; you pay only for what you sell. If you have a good stock in a city of 50,000 to 300,000 I can make you \$5,000 to \$10,000 profits in a few months. Why waste time? To consult me costs nothing. I am not connected with any other auctioneer. Address the man with a record of more successful sales than any other in America—that is

Canada Notes.

The assets of J. N. Poirier, Valleyfield, Que., have been sold.

M. C. Neff has purchased the business of S. Creighton, Ponoka, Alta.

Fred. Bews has purchased the business of Gyle & Allum, Ltd., Revelstoke, B. C.

A. R. Traynor has bought out the jewelry business of W. E. Cumming, Lumsden, Man.

Harry Ryrie, of Ryrie Bros., Ltd., Toronto, Ont., is taking his vacation at the Thousand Islands.

Adams & Waddell, Toronto, Ont., have dissolved partnership, the business being continued by J. R. Adams.

The Imperial Optical Co., Ltd., Toronto, Ont., has acquired the business of the West-Optical Co., Ltd., Winnipeg, Man.

A. Dawson is removing his place of business from 240¹/₂ Carlton St. to the corner of Carlton and Ontario Sts., Toronto.

Mrs. W. E. Cumming, Lumsden, Sask., who also carried a stock of furniture, has sold out the latter department of her business to E. Troughton.

A. C. Johnston, of Johnston Bros., Montreal, has left for Europe on a purchasing tour. Pforzheimer, the great jewelry mart in Germany, is one of his chief objective centers.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: J. Young, Brantford; J. McIntyre, Chatham; R. F. Dale, Harriston; W. A. Clark, Welph; A. Neely, Bradford, and R. N. Assett, Whitby, all Ontario, and W. Andrews, Winnipeg, Man.

The following representatives of the oldsmiths' Stock Co., Toronto, left for their respective fields, last week: R. J. Gibbs, northwest and British Columbia; J. Easson, Montreal and eastern Ontario;

D. Thornloe, Quebec and Maritime provinces, and J. F. Logan, western Ontario. Walter J. Barr, president of the same company, has returned from a three weeks' vacation at Penetanguishene.

Several United States Secret Service detectives have been in Montreal, recently, in connection with an alleged smuggling of thousands of dollars' worth of diamonds. Ir. Twohey, who is in charge of the United States customs, states that so far as he is aware no seizure has yet been made. It is alleged that the diamonds were brought from England and passed through the United States, but the man who had them in his possession kept so far ahead of his pursuers that he got back safely to Canada before an arrest could be made.

On Wednesday, Aug. 4, a negro named John Smith went into the jewelry store of A. C. Kent, 257 Yonge St., Toronto, Ont., and after looking at some goods under the pretense of wishing to buy, picked up a gold watch and walked out. He was followed by a woman clerk when he put his hand to his pocket as if to draw a pistol, threatening to "blow her head off" if she called out or followed him up. He then ran off and made his escape. The police were at once notified and, on the following Saturday, Detective Newton met the man in the street and arrested him. He claimed to be able to prove an alibi. When taken to police headquarters he made a sudden break

for liberty, but was soon recaptured and identified as the robber. He was arraigned on Monday on charges of robbery and threatening to shoot and was remanded for a week. Smith is said to be only 18 years of age.

Detroit.

George Johnston has returned from a vacation spent in New London.

J. P. Walton, Durand, was a purchaser in this market, a few days ago.

Robert S. Lockhart, Jackson, was in the city, last week, buying show cases.

W. E. Counter, watchmaker for Hugh Connelly spent some time visiting at Simcoe, Ont., recently.

Bert Weyhing has been away on a vacation at the St. Clair Flats, where he had excellent luck as an angler.

Mr. Forth, formerly diamond man for Wright, Kay & Co., was in the city, last week, and visited old friends. He is now located in the east.

Mr. Hunt, of J. R. Wood & Sons, New York, stopped over on his way back from the Omaha convention, last week, to exhibit his line to the trade.

Traub Bros. & Co. have practically finished the alterations to their store at Woodward and Grand River Aves. The place has been practically made over from basement to roof and is now an up-to-date store with every convenience. A beautiful cut glass and stationery room has been set aside in the basement under the store proper, while there is also a white room for silver. The main floor is finished in walnut and the show case room has been enlarged. Upper floors are given to stock rooms and factory.

Pacific Northwest.

T. J. Parker has located in the B. Y. Rainey building at La Crosse, Wash., and is making a specialty of watch repairing.

H. A. King, a lapidary and jeweler of Eureka, Cal., has been visiting Port Orford, Ore. While there he made quite a collection of agates.

E. E. Teape, Sandpoint, Idaho, has sold his business to C. E. Newman, Minneapolis. It is Mr. Teape's intention to make a study of optometry in an eastern school, and later he will return and locate at Boise City, according to the present plans.

Wm. N. Burnite, who recently started in business in Roanoke Ave., Riverhead, N. Y., has an attractive letterhead bearing the inscription "Get it right—from Burnite." Mr. Burnite uses this slogan not only on his letterheads, but in all his advertising.

Members of the Elmira Jewelers' Club held a special dinner at Fair View Cottage, at Bohemia-on-the-Chemung, Aug. 7, which was thoroughly enjoyed by all who participated. There were about 14 members present, who were delighted with the programme which was arranged by a committee composed of Fred H. Ress, Lou Bally and James Swarthout. The following are officers of the club: President, Thomas J. Routledge; vice-president, Clarence Savles, and secretary and treasurer, Walter Hamilton.

Kansas City.

Oppenstein Bros. sustained a fire loss, last week, of about \$2,000.

B. Fricke, Jr., of the Meyer Jewelry Co., is taking a vacation this week.

Harry Snow, of the Meyer Jewelry Co., went up to Chicago for a couple of days, last week.

Bert Chapman, with J. R. Mercer, has returned from a vacation spent at South Haven, Minn.

Louis Arkoff and S. Simon have been added to the force of jewelers of the Porter & Wiser Jewelry Co.

Mr. Inkelhans, who has been with the Margolis Jewelry Co., has accepted a position with Harry Gunther.

C. E. Manor has returned from Havre, Mont., where he has been conducting a sale for the Havre Jewelry Co.

Miss Cathryn Porter, of the Porter & Wiser Jewelry Co., is spending her vacation in Eureka Springs, Ark.

Ben Leach, watchmaker for J. R. Mercer, has gone down to his old home in Higginville, Mo., to spend a vacation.

Arthur Laach, with J. R. Mercer, some time ago, but now in Seattle, Wash., was married, recently, in Killburn, Wis.

H. A. Bump, Oklahoma City, Okla., was a recent visitor to this city, on his way home from the convention at Omaha.

R. S. Hart, Warsaw, Mo., was in this city, last week, buying an opening stock of jewelry for his new store in that city.

D. B. Ward, of D. B. Ward & Co., is back from the convention, and looks able to stand another one, even in hot weather.

H. W. Porter, of the Porter & Wiser Jewelry Co., has just returned from Texas and Old Mexico, where he has been spending a vacation.

Noble Fuller, of the Edwards & Sloane Jewelry Co., and Mrs. Fuller leave, next week, for a pleasure trip over the Great Lakes and into Canada.

C. L. Palda has taken a position with the Woodstock-Hoefer Watch & Jewelry Co., and will travel in the State of Iowa, where he already has a large acquaintance in the jewelry trade.

Geo. H. Gardner, Pawhuska, Okla., stopped off in Kansas City, last week, on his return from the Omaha convention, after having spent a week visiting in Iowa.

Commodore Kiger, of the "Kansas City," and also of the firm of C. A. Kiger Co., has left for a trip down the Missouri and up the Mississippi Rivers to Alton, Ill.

The following jewelers called on the trade during the past week: C. A. Stevens, Nickerson, Kans.; A. Zurcher, Marceline, Mo.; J. W. Winkler, Holdenville, Okla.; C. H. Reideman, Vinita, Okla.; Amos Plank, Hutchinson, Kans.; W. S. Noble, Drexel, Mo.; C. E. Tieman, California, Mo.; A. Y. Boswell, Tulsa, Okla.; C. D. Morse, Osceola, Neb.; T. S. Lidstone, Dearborne, Mo.; Mr. Doolittle, of Beau-lieu & Doolittle, Sabetha, Kans.; G. E. Read, Lebanon, Mo.; Jas. Pizinger, Olmitz, Kans.; W. Edmonds, North Topeka, Kans.; Mr. Hixon, of Carlson Jewelry Co., Richmond, Mo.; A. W. Holmes, Bonner Springs, Kans.; Geo. Baer, of Spencer Drug & Jewelry Co., Lee's Summit, Mo., and J. A. Inglis, Higginville, Mo.

D. E. D. McMURRAY, President

JOHN W. SHERWOOD, Vice-President

LOUIS J. MONTAGNON, Secretary-Treasurer

Cincinnati.

Geo. Newstedt returns to-day from the Pacific Coast.

Arno Dorst, of the Dorst Co., is taking a short vacation.

Frank Herschede and family have returned from Michigan.

George Sellmeyer, with the E. & J. Swift Co., is in Michigan for two weeks.

Joseph Mehmert will leave for New York and other eastern cities, this week.

Geo. B. Hovekamp, with the Miller Jewelry Co., has gone to Niagara Falls for 10 days.

Victor Gebhardt, of Gebhardt Bros., returned Monday, from a pleasure trip spent in Michigan.

John Herschede, of the Herschede Hallmark Co., leaves, to-morrow, for Washington and other eastern cities.

A. E. Johnson, Norwood, recently purchased the Ditto stock at Versailles, O., expecting to enlarge his store at Norwood.

Mr. Lindenberg, of Lindenberg & Fox, has returned from a successful trip, Aug. 15, leaves for the south in a week or 10 days.

Theodore Neuhaus & Co. will open up their plant for work, Aug. 22, after being closed for two weeks for repairs to the machinery.

A. G. Schwab, of A. G. Schwab & Sons, and his wife, after spending four months touring Europe are now in Paris, and expect to return home early in September.

Wm. Pflueger, of Joseph Noterman & Co., left for the west, last week, and Mr. B. Osthoff, of the same firm, left for his regular Fall trip at the same time.

Herman Lange, the well-known Vine Street jeweler, with his daughter, is visiting the northwest at present. They are spending some time in the Yellowstone Park before going to the Pacific Coast.

The sympathy of his friends in the trade as extended to Mrs. Harry W. Devitt, of Newport, Ky., owing to the recent death of her husband, a well-known watchmaker or the Clemens, Oskamp Co.

Out-of-town jewelers here the past week purchasing stock included: G. H. Ashton, Middletown, O.; J. W. Tufts, Loveland, O.; R. D. Washington, Russell, Ky.; Wm. Metzger, Lexington, Ky., and C. S. Hanson, Shelbyville, Ind.

S. Gilsey, of S. & H. Gilsey, was recently elected a member of the committee to plan and arrange the outings for the Cincinnati Merchants and Manufacturers' Association. There are to be three—the first one Aug. 15, at the Lagoon; the second Sept. 1, at Chester Park, while the third, Sept. 8, will be a boat ride on the Ohio river.

The Cincinnati Wholesale Jewelers & Manufacturers' Association held a regular monthly meeting, Aug. 13, at which the routine business was transacted. The boosting of Cincinnati as a jewelry center will be pushed with renewed vigor this Fall as a result of much eloquence and good resolutions by many of the members of the association.

Philip Horr, the leading jeweler of Aurora, Ind., has been nominated for Mayor of the city of Aurora on the Democratic ticket at the recent primary elections; he has city treasurer for several years, which

office he held so satisfactorily that he could have been re-elected, but he positively declined to run. His nomination for Mayor was a case of the office seeking the man, as his many friends only succeeded in getting his consent after much earnest and persistent solicitation.

The Cincinnati Retail Jewelers' Association held its second annual outing, Wednesday, Aug. 18, at Chester Park; as 10,000 tickets were distributed free, an immense crowd attended, and a large percentage of all retail jewelry stores, wholesale jewelers' offices and manufacturers' shops closed their doors for business for at least a half-holiday, if not for the day. The object of these outings is to bring together the jobbers, manufacturers and retailers where they can meet socially and try to create a strong fraternal feeling in the trade.

F. A. Reid and Mrs. Gertrude Brown, who were arrested at Columbus, O., Friday night, with a trunk full of jewelry, are believed by the police to have been in Louisville and Cincinnati recently, from pawn tickets found in their baggage. Reid was caught in a pawnshop, where he was trying to pawn some rings and a watch, and the woman was arrested at the railway station. Many keys and burglars' tools were found in the trunk; pawn tickets from several cities were found on Reid, also a plush box containing opals, sapphires and rubies, which had been taken from rings, with considerable other jewelry.

Harry W. Devitt, for the past five years a watchmaker for the Clemens, Oskamp Co., died very suddenly, Aug. 10, at his home in Vine St., Cote Brillante, back of Newport, Ky. He was taken ill on the night of Aug. 5 with appendicitis, which was followed by a complication of diseases. Deceased was born at St. John's, New Brunswick, Canada, in December, 1856, and for the past 30 years he has been connected with the jewelry trade. For years he was foreman of the Columbus Watch Co., later was with the Waltham Watch Co. and the Elgin National Watch Co., and for the past 13 years had been with the Clemens, Oskamp Co. He was a prominent Mason and well known in howling circles. The funeral services took place at his late home, Friday, and the remains were cremated the same afternoon.

Pacific Coast Notes.

A new store of fireproof construction is being erected at Bishop, Cal., and will be occupied, when completed, by R. W. Scott.

J. W. Shanks has purchased the stock and business of Max Heymann, 425 K St., Sacramento, Cal., and is holding a special sale to make room for stock of his own selection.

Ed. E. Wood, Modesto, Cal., is moving into new quarters, and when firmly established in the new store, which is located in the Masonic building, on I St., expects to have one of the finest stores in the valley.

James G. Guard, Bakersfield, Cal., is preparing to open a new store at Maricopa, a new town that has been started near Bakersfield. He was in San Francisco recently, purchasing supplies, and will have a manufacturing department in connection

with the store. The new establishment will be located in the Torpey & Jones building, and will be ready this month.

Omaha.

C. L. Shook left, last week, to spend 10 days visiting his father in Canton, O.

H. S. Knapp, with the Shook Mfg. Co., is visiting his mother at Bertrand, Nebr.

Alvin Kaas, with S. W. Lindsay, is spending a two weeks' vacation in Denver, Colo.

M. Berland, Lake Mills, Ia., has taken a position with Albert Edholm in the watch department.

E. Paul Shaw, with S. W. Lindsay, accompanied by his family, has returned from an outing at Onawa, Ia.

Harry Ryan, son of Geo. W. Ryan, Mawhinney & Ryan, left, last week, to spend a month in Wyoming.

O. C. Homan, with the C. B. Brown Co., is making his semi-annual watch inspection trip over the Missouri Pacific lines.

John Hendrickson, of Gustafson & Hendrickson, left, the latter part of the week, for a short fishing trip in the lakes of Minnesota.

J. L. Jacobson will move from his present location in the Arlington block to the Douglas block, S. E. corner 16th and Dodge St.

Harry Greenblatt will leave, this week, for an extensive trip to the coast to join his wife, who has been spending several weeks there. They will return to Omaha, Oct. 1.

Joseph P. Frenzer will supply the silver loving cup for the Omaha *World-Herald*, to be given to the winner of the automobile endurance contest held in this State, Omaha, Aug. 17-18.

C. A. Williams and N. P. Frandsen have returned from a three weeks' fishing trip at Big Horn Basin, Wyo. Mr. Williams left, a few days later, on a business trip through Nebraska and Colorado.

Albin Cecha, a jeweler at 1248 S. 13th St., was stabbed and seriously injured recently while returning from Ralston with a party of friends. Mr. Cecha received a blow in the mouth, followed by a knife thrust in the side, from one of three men who were walking behind the party. The injured man is in a serious condition. The three men were arrested.

Since the National Jewelers' convention, held here, the local jewelers have been receiving nothing but words and letters of praise for the success and businesslike manner in which the proceedings were carried out. The business end was more successful than anticipated. While Omaha is not a city of many amusements, there were enough pleasures to keep the visiting jewelers and their wives busy. Many representatives whose firms were not represented in the exhibit hall, but showed their goods in private rooms, expressed deep regret that their stocks were not shown on the main floor. A noticeable feature was the delay for many minutes after the several sessions had been called to order, owing to the jewelers' congregating in the convention hall. While the roster showed a large attendance, there were many who stopped at other hotels, and thus were not on the register.

We present herewith illustrations of two bronze Bas-reliefs — Hendrick Hudson and Robert Fulton.

Made in the following sizes

Mounted on Oak,	8 $\frac{3}{4}$ in. x 12 $\frac{1}{4}$ in.,	Hudson or Fulton	-	Retail Price,	\$5 00

TRADE CONDITIONS.

The local outlook is promising and is indicated by the healthy condition of trade generally throughout this section. For instance, it is estimated that there are now 225,000 men on the payrolls of manufacturing and other industries of the Greater Pittsburg section, and that means the payroll of the workmen of this beehive of industry now amounts to nearly \$1,000,000 a day. That is what it totals when the mills run to full capacity. These mills are now operating to at least 90 per cent. of capacity. In fact, some of them are working full time, while others are working up to 92 per cent. With the warm weather at an end everything will be going full time. The same can be said of the coal and coke regions. The demand for steel is reported great, and that is what the local jeweler banks on. When he sees the steel business booming here he begins to anticipate profits in his business. There is a strong belief among jewelers generally that a big revival in trade is about to take place. Some report collections a little slow, but everything is righting itself towards a splendid season of prosperity. The predictions are that it will last for several years after its arrival.

Mr. and Mrs. J. C. McKelvey have returned from Atlantic City.

J. Allison Reed who spent several weeks at Belmar, N. J., is again back at the store.

M. W. Rihn and his wife and family have gone to Cresson Springs to spend the remainder of the month.

Theodore Frey, the North Side dealer, has installed a large clock in the band stand at West View Park. It is proving an advertisement for his house.

Samuel F. Sipe has been doing some clever advertising bearing on the tariff question and his shipments of diamonds from the diamond markets to Pittsburg.

S. Hudis, of the S. Rosenbaum Co., was in Providence and New York, last week, buying stock for his house. The company is erecting a new addition to its building, at Fifth Ave. and Market St.

J. Alexander Hardy, of the Hardy & Hayes Co., who left several days ago for Lake Chautauqua to take a few days' rest, wrote that he would stay sometime longer since he is not feeling well.

Steele F. Roberts left last Thursday night for Canada with the Iron City Hunting & Fishing Club, an organization composed of Pittsburg business and professional men, who spend a month each year north of Toronto.

The city of Pittsburg is wrestling with the problem of building a new City Hall, and if it does a huge clock will be placed in the dome of the building. A local architect has prepared a plan, showing a 45-story structure.

Charles W. and J. Harvey Wattles, of W. W. Wattles & Sons, left last Thursday morning in their automobiles for Lake Chautauqua, N. Y., where they will spend the next three weeks with their families fishing and having a good time.

Abraham Lewis who, last winter, filed a petition in bankruptcy has been discharged of his debts. Lewis has been considering the advisability of adding an optical department to his store in 6th St., but says that business has been so poor that he does not believe he will do so.

The United States District Court has referred the petition in bankruptcy, filed two weeks ago by Robert Winters Brady, of Washington, Pa., to H. R. Myers, the referee in bankruptcy, with headquarters

at Washington, for further proceedings. A copy of the schedules was sent to him. It is expected that a receiver will be appointed in a few days to wind up Brady's affairs.

Henry Terheyden, who owns a copy of Murillo's great painting, "Conception of the Virgin," has placed it on exhibition in the window of a store in Smithfield St., where it is attracting great attention. The original was presented to the Church of Transfiguration, New York, by J. P. Morgan, and cost \$10,000. Mr. Terheyden secured the picture a short time ago and had it cleaned and put in good condition. Its beauty attracts much attention.

Newark.

Carl Schimek, 133 Hillside Ave., has gone into the jewelry manufacturing business.

Mr. Frazier, of A. T. Wall & Co., Providence, R. I., visited many firms in town last week.

Miss A. Wittke, daughter of Paul Wittke, an Elizabeth jeweler, is making a sojourn at the seashore.

The B. M. Shanley, Jr., Co. has made an addition to its factory and has increased its working force by 30 men.

Herman Schwartz, who has been on the road for the Charles C. Wientge Co., returned Saturday from a tour of New York State.

Henry Kohn, father of members of the firm of Kohn & Co., Orchard and Camp Sts., is spending the month of August at Mackinac Island, Mich.

Baseball teams representing the Crescent Watch Case Co. and the Leon Watch Case Co. met last Saturday afternoon. The score was 13 to 14 in favor of the Crescents.

The United States Supply Co. has been incorporated in Newark to deal in jewelry, etc., with a capital of \$100,000. The incorporators are: V. P. Mullenpore, Wm. Greenfield and J. Willer, all of Newark.

A fire which started among some rubbish in the cellar of Chas. Krauthamer's jewelry store, Passaic, N. J., early one morning recently was extinguished with little difficulty and the loss incurred was slight.

John Pryor, of the Pryor Mfg. Co., recently underwent a successful operation for appendicitis. Because of this he was delayed in making his far western trip and Robert L. Pryor, of the firm, will make the trip in his place.

Miss Marie Kopp, bookkeeper in the jewel department of the American Oil & Supply Co., has been promoted to cashier in the supply department of the main office. She had been in the jewel department for three years. Mr. Van Orcutt, of the same firm, is spending his vacation in the south.

The agitation started by the Newark Manufacturing Jewelers' Association, calling for the stamping of all goods with the karat and trade-marks, is meeting with much support from all parts of the country and will no doubt be successful. The officers of the association have labored zealously for the adoption of the plan.

George S. Weiss, of the Schwarzkopf Mfg. Co., is back cast after a three months'

western tour. He intends to return to the west immediately. Mr. Weiss finds some improvement in conditions, compared with a year ago, and believes there will be a big boom before long. William A. Schwarzkopf, of the same firm, has also returned from a business tour, leaving again for the road on Saturday.

E. A. Guenther, salesman for Kohn & Co., had a narrow escape from death in a trolley accident at Waterloo, Ia., last week. The car, going at a rapid pace, ran into an open switch and was overturned. It was filled at the time and a score of passengers were badly hurt, several fatally. Mr. Guenther was hurt about the legs, and writes that he is doing business with an ankle in a plaster-of-paris cast.

Herpers Bros.' new brick addition, fronting on Washington St., is now completed except for the fact that the power plant has not yet been installed. The structure will be occupied by Nov. 1, part of it being taken up by the Herpers firm and part rented to others. The new structure gives the concern an excellent vantage point from a business standpoint, placing the main factory on Washington St. The firm now has large floor space and anticipates a business which will be commensurate with the increased facilities.

It was a jewelry store robbery in this city which led to the double tragedy of Middletown, N. Y., last week, that shocked this section of the country. In 1903 "Big Tom" McCauley was arrested charged with the theft of gems valued at \$3,000 from the store of Titus Pantillon, 215 Mulberry St., this city. "Big Tom" was one of a gang, and along with him a crook known as the "Iron Gall Kid" was arrested. Fenton was on a jury which sent McCauley to jail for six years. McCauley vowed that he would "get" Fenton and several others who helped to jail him, including Police Captain Christie of Newark. Tuesday last he shot and killed Fenton and then blew out his own brains while standing over the prostrate form of his victim.

Two 22-karat gold medals three inches diameter are part of the quota of \$6,000 medals now being struck at the Whitehead & Hoag Co.'s factory for the commission having charge of the Hudson-Fulton celebration to be held from Sept. 25 to Oct. 9. The gold emblems are heavily embossed and are being made at a cost of \$260 each. Just to whom they are to be presented the commission has not disclosed. The medals are being made in nine different forms varying in size and metal according to the purposes for which they are intended, but all contain the same design by the painter sculptor, Emil Fuchs. The Hudson commemoration is treated on the front of the emblems, the central design representing Henry Hudson's boat, the *Half Moon*, with Hudson and six sailors looking over the rail watching the heaving of the lead. Scenery along the river is depicted in the background, and in the margin are the words, "Discovery of the Hudson River by Henry Hudson, A. D. MDCIX." "The American Numismatic Society" and "The Hudson Celebration Commission." The reverse of the medal treats the Fulton idea in a classical design, consisting of three seated draped female figures.

Significance of the Omaha Convention.
 THE fourth annual convention of the American National Retail Jewelers' Association, which closed in Omaha, Nebr., Aug. 6, apparently marked the beginning of a new era in the jewelry business. Significant among other things were the quality of the addresses and the broad-mindedness and eloquence of the speakers. Manufacturers, jobbers and retailers discussed openly and on common ground questions of moment to the entire trade as an integral factor in the business world. Ideas, long pent-up or previously only hinted at eloquently, were voiced in the open before the trade as a body, so that each could understand the other and, understanding, correct existing evils to the mutual satisfaction of all concerned.

This remarkable gathering of the trade made manifest that wholesome organization is an urgent need and not the capricious desire of a few who love wrangling and superfluous argumentation. It showed clearly that organization begets mutual protection and mutual protection begets better and more business, the material end sought. It showed clearly that education, power, scientific business knowledge, experience and progress have lined up to stamp out antiquated and questionable business methods and to promote the general welfare of the jewelry industry. There was evidenced the healthy growth of a new robust organization which, a few years ago, was considered by some only a perishable embryo, destined soon to disintegrate and fall. Time is building up a factor in the business world to be reckoned with. May the tribe increase!

Credit Where Credit is Due.
 THOUGH much has been said in the trade the past week about the importance of the last convention of the American National Retail Jewelers' Association held at Omaha, and the great advancement in the organization as manifested by this convention, many have failed to realize, or, at least, give full credit to the work of certain men which has been responsible for the great strides made by the national association. To a certain extent it is true that all members of the body are to some extent responsible for its growth, but we should not lose sight of the great work done by the leaders in the association movement who have come to the front in the past year, and who have practically borne the burden of this development on their shoulders. Among them especial credit should be given to the president, J. P. Archibald, for his indefatigable labor, his suggestions for advancement and perfection of the State and local organizations, his work in helping the formation of the new associations; also his personal visits to the officers of these associations and the prominent retail jewelers, jobbers and manufacturers for the purpose of correcting conditions and suggesting ways of getting over difficulties have tended not only to give hearty encouragement to the members of the association, but also to create an interest in the body and a respect therefor by

Advertising should not be regarded as an expense but as a business investment. Rightly done, it will produce good results.

those who are not connected or affiliated with it.

That Mr. Archibald should be chosen again to take up the reins of government is an evidence of appreciation of his work, and is also a subject for general congratulation, as it indicates that the progressive yet tolerant spirit in which the organization has been able to take up and adjust the troubles of its members in the past is to continue in the future. We feel that the trade should not only congratulate Mr. Archibald and the capable body of officers that were elected with him, but also the organization which they have the honor to serve.

The Time to Wake Up.
 THE improvement in business generally noted directly after the tariff bill had been signed continued to increase throughout last week until the wave of optimism as to the conditions in the future began to be followed by a large actual improvement in business that bids fair to make this Fall, and even next year, one of the greatest years that the American merchant has experienced in some time. While it is true that the jewelry trade is one of the first to feel a business depression and the last to feel the resumption, the reports that are coming in from all sections of the country indicate that this industry is already beginning to "come into its own," and that when the Fall season opens the effects of the recent depression will have entirely disappeared.

It, therefore, behooves every merchant in the jewelry trade who has not already done so to awaken to the new industrial conditions, and to act in time to take advantage of the increased sales that will come to him in his community. To do this he must put his best foot forward and encourage the optimistic feeling which his customers will have by showing them that he is prepared for any demands that they make upon him. He should see to it that his stock is bright and up to date in every way; that new goods are plentiful, and that he is in a position to serve his patrons with the latest novelties that the market affords. He should see to it that his show windows, his show cases and his store generally reflects the new conditions of business and that in speech and in manner he and his employes should show an optimistic, live and progressive spirit, and a realization that good conditions are again at hand.

This is the time for every man to get out of his "rut" and bend all his energy to getting the business that may be had. The

progressive and encouraged customer wants to deal with a progressive and optimistic merchant, not with a dead one.

This does not mean that the jeweler should buy more than he can afford, or take unnecessary risks in the hope that a "boom" will carry him through. It simply means that he should not hesitate to buy what he needs, and put his best foot forward in every way, and bending all his energy and abilities as a merchant to buy right and to sell right.

An Important Lecture on Scientific Gems.

ONE of the most interesting lectures that has been delivered of recent years upon the subject of the scientific fabrication of gems was the discourse of Dr. G. F. Herbert Smith, of the British Museum, entitled "Constructed Rubies and Similar Products," delivered before the National Association of Goldsmiths of Great Britain, at London, early last month. Though Dr. Smith took up the subject from a scientific standpoint, his lecture was thoroughly intelligible to the laymen, as he made his points in clear and concise language, and in sketching a brief history of modern work on the subject of making gems he emphasized certain matters and explained certain features which enter into the construction of synthetic and scientific stones that have not heretofore been absolutely clear to the trade at large. One of these points—the definition of crystal and crystalline formation as distinguished from a glass-like formation is valuable, and is put in very simple, terse and understandable form.

Through the courtesy of Dr. Smith we are enabled to present a good report of his lecture before the readers of THE JEWELERS' CIRCULAR-WEEKLY, the first instalment of which appears this week on pages 59 and 61. The concluding instalment will appear very shortly. Dr. Smith's lecture is copyrighted in both Great Britain and America.

New York Notes.

Samuel Hart, a New Orleans, La., jeweler, was in town last week.

B. Hyman, of B. Hyman & Co., 2 Maiden Lane, started out last week on a business trip.

G. Percy Clap, of the Daggett & Clap Co., returned to New York, last week from a vacation trip.

J. R. Rutman, vice-president of the E. H. Pudrith Co., Detroit, Mich., was a local visitor, recently.

William La Rue, silverware buyer for C. D. Peacock, Chicago, is spending a vacation in this city.

G. F. Sherwood, manager of the Chicago office of the William L. Gilbert Clock Co., is spending a vacation in town.

Robert Woodrow, buyer for Cross & Bevelin, 23 Maiden Lane, was kept at home a part of last week by an attack of blood poisoning.

Among the out-of-town buyers in this city last week was N. B. Goldstein, representing the Herzfeld, Phillipson & Co., Milwaukee, Wis.

George Heywood, with the Horton-Angell Co., 9 Maiden Lane, returned last week from a two weeks' vacation spent at Bridgeton, Me.

Mr. Flippin, of Buckingham & Flippin, jewelers, of Lynchburg, Va., was a visitor at the office of THE JEWELERS CIRCULAR-WEEKLY, Monday.

Sam Hotchner, of A. Hotchner & Son, St. Louis, Mo., returned to this city recently from Europe with a large assortment of diamonds.

Mr. Maier, senior member of the firm of Maier & Berkele, Atlanta, Ga., is in town and is making his headquarters with Ingonar Goldsmith & Co., 180 Broadway.

O. M. Farrand, 3 Maiden Lane, has been granted a patent on a combination lock or keyless lock. The patent was filed Sept. 17, 1907, and bears serial number 393333.

Irving Baum, diamond importer, 71 Nassau St., sailed Saturday on the *Lapland*. He will visit Antwerp, Amsterdam and Paris and expects to be away until Sept. 25.

Louis Shapiro, who was formerly in the wholesale jewelry business at 12 John St., and who met with financial reverses some time ago has opened a diamond salesroom at 14 Maiden Lane.

I. Levinson, of Levinson & Friedlander, 40 Maiden Lane, has gone abroad for a trip of some months' duration, during which time he will visit the different markets on the Continent.

The business formerly conducted under the name of Gattle, Ettinger & Hammel, will be continued as Gattle, Ettinger & Co. The concern has commodious offices at 170 Broadway. The members of the firm are M. Gattle and I. B. Ettinger.

Irving N. Looker, until recently with the Providence Stock Co., has accepted a position as local representative of R. L. Moorhead & Co. He will be located at 9 Maiden Lane. His territory will include New York, Philadelphia, Boston and Baltimore.

Among the out-of-town visitors last week were: George Shepardson, of the C. A. Marsh Co., and P. J. Cummings, Attleboro; M. A. Krausman, representing the Hunter & Hunter Co., Detroit, Mich., and

H. F. Crecilius, buyer for the Bancroft Bros. Co., Columbus, O.

J. T. Montgomery, manager of the New York office of M. A. Meade & Co., 15 Maiden Lane, returned last Thursday on the *Philadelphia* from a two months' trip to Europe. He spent most of his time in Germany and was a visitor at Carlsbad.

The Siegel Stores Corporation, comprising the firms of the Siegel Cooper Co., Chicago; Henry Siegel Co., Boston, Mass.; the Simpson Crawford Co., and the 14th St. Store, of New York, has established the office of general merchandise manager for the four stores with headquarters at the Simpson Crawford Store, Sixth Ave. and 19th St. Charles Piers is in charge of the office.

Abraham Schon, a jeweler at 26 Alabama Ave., Brooklyn, told the police last week that he left his 17-year-old son in charge of his jewelry store while he went home to a mid-day meal. A boy about 15 years old came along and got the young man to go into the street to play ball. When the jeweler's son returned to the store he found that someone had entered the place and made away with four watches valued at \$50 each.

As a result of watchfulness on the part of a customs' inspector, 24 scarfpins were seized from a passenger leaving the French liner *Bretagne* Sunday morning. As the man with a friend passed the gates to the street, the inspector detected a package protruding from an overcoat pocket. The men were halted and a search revealed the scarfpins, which were found not declared. They were roughly appraised at \$200. The man in whose pocket the goods were found said he had forgotten to mention them.

A jeweled collar, imported by Celso del Villar on the *Morro Castle* April 24 and a jeweled bracelet broken in two pieces, which was imported by Jos. Madreaga on the same vessel, will be offered at public sale at noon to-day by United States Marshal Haenkel in the Post Office building. The foreign value of the jeweled collar is placed at \$3,980 with a duty of \$2,388, making its home value \$6,368. The foreign value of the bracelet is \$3,000 with an additional duty of \$1,800, making its home value \$4,800.

Officers in the New York Navy Yard are interested in inquiries arising in South Dakota, which indicate that a silver service presented in 1904 to the cruiser *South Dakota* by the State whose name she bears never reached the vessel. Reports have it that the service is in a safety deposit vault in the Navy Yard. The commandant of the Navy Yard is on his vacation. Other officers said last week that they did not know that the plate was in the yard vaults, although dispatches from Pierre, S. Dak., said this was a fact.

W. P. Schwartz, of the Pennsylvania Watch Case Co., York, Pa., was in this city last week in the interests of his concern. While here he engaged Charles Alpschul to look after the local trade. Mr. Alpschul will have office room in the Maiden Lane Safe Deposit Co. offices, Broadway and Maiden Lane. Charles H. Phelps, Fair Haven, Vt., has been engaged to take care of the New England trade for the concern. Fred A. Goldman, Philadelphia, will travel

through the States of New York, New Jersey and Pennsylvania.

Last Thursday afternoon crowds of people stood about Madison Square listening to the chimes of the big bells which have been placed in position on the 46th story in the tower of the Metropolitan Life building and are being tested by an expert from the firm that made them. In a few days the bells, which are said to be almost twice as high from the ground as any other large bells in the world, will strike every quarter hour. The hands of the big clock are being put in place and within a short time the thousands of passersby will daily note the time from this monster clock.

Aaron Grunberger, 331 E. Houston St., who arrived on the steamship *Lapland* recently, was arraigned last week on a charge of smuggling before United States Commissioner Shields, and was held for the Grand Jury in default of \$2,000 bail. When the *Lapland* docked at this port the customs inspectors carefully examined the baggage of the passengers. Inspector Timothy J. Donohue found in the pockets of Grunberger 12 rings, eight pairs of kid gloves, four pocketbooks and 12 strings of coral. These goods were seized and sent to the Appraiser's Stores for appraisal. His arrest followed the seizure.

The Board of United States General Appraisers has decided that decorated china ware of Carl Rieman, from Gera, entered through the New York Customs House is undervalued. When the merchandise arrived at this port, the collector at Louisville, Ky., on the advice of Appraiser Wanamaker, refused to accept the price at which the goods were invoiced. The appraiser reported that duty should be exacted on a higher basis and this was accordingly done. A local representative of Rieman protested to the Board. General Appraiser Hay, who writes the decision for the Board, upholds the advance imposed by the collector. General Appraiser Chamberlain held that decorated goblets, finger bowls, plates, and sherry glasses from the St. Louis Crystal Glass Co., will have to stand a higher duty.

American travelers who have been bringing into this country foreign goods to fill American homes under the generous regulations of the Treasury Department will find their task more difficult under instructions issued last week by Acting Secretary Reynolds. Hereafter import duties will have to be paid in cases of the \$100 exemptions unless the person bringing in the goods has been abroad for two years or more. Regulations heretofore in force enabled non-residents to bring household effects into the United States free of duty in quantities needed to furnish their homes in this country, and of a value suitable to their station in life, provided they had actually lived in one place abroad for a year, or had been abroad two years without a fixed residence. The new order eliminates the one-year residence qualification. Explaining the change, Acting Secretary Reynolds said that the privilege had been abused. Americans traveling abroad for a year would accumulate choice effects, send them to some address at which they had paid a year's rental, and then with the

New York Notes.

(Continued from page 87.)

ent receipt obtain free admission for their collection.

Fred A. Jeanne, the Paris gem dealer, is in town this week, making his headquarters at the Maiden Lane Safe Deposit Co., 170 Broadway.

Aaron Lauterbach sailed Saturday on the *Philadelphia* for Europe.

S. Frankel, of Joseph Frankel's Sons, 78 Fifth Ave., sails to-day for Europe on the *Lusitana*.

S. Stern, of Stern Bros. & Co., 68 Nassau St., will sail on the *Cincinnati* for Europe, Saturday.

Emanuel Jacobson, of Jacobson Bros., 65 Nassau St., returned from Europe Friday on the *Lusitana*.

The style of the firm of Francisco Peris, 130 Pearl St., has been changed to Peris & Collado.

William Schwarzschild, head of the firm of Schwarzschild Bros., Richmond, Va., was an out-of-town visitor last week.

H. J. Homrich, a jeweler of Huntington, Va., who is a visitor in this city, is making his headquarters at the Hotel Imperial.

Barrett Shaw, jewelry buyer for "The Air," Chicago, was in town last week, and during the latter part of the week went to the eastern factories.

Fred Bush, buyer for a large department store at Oakland, Cal., returned last week on a trip to Europe, and has been looking over goods in this city.

George J. Lederer, who is the general assistant in the factory and office of the Providence Stock Co., is now in the New York office of the concern.

Louis Harris, of the firm of Harris & Goldman, St. Louis, Mo., returned to this city Friday on the *Lusitania* from a visit to European diamond markets.

Wm. McGowan has accepted a position with the Hanlon, Thornton Co., North Attleboro, Mass. He was formerly with Barmen & Hull in their local office.

J. E. Millard, jewelry buyer for the Stanton & White Co., Duluth, Minn., was among the out-of-town buyers in town last week. He made his headquarters at 31 Union Square.

Max Oppenheimer, who has been for some time local representative for R. L. Moorehead & Co., has resigned his position with that concern and expects within a short time to enter the importing jewelry business.

Lee Reichman, of Reichman Bros., 65 Nassau St., who returned Friday on the *Lusitana*, reports an active demand for diamonds in the European markets. He met a number of Maiden Lane importers while abroad.

Word reached this city last week that Ruben Swartz's jewelry store at Monticello, N. Y., was one of the business places destroyed at that place last week in the fire which gutted in all 36 buildings in the center of the business section.

Henry Schwartz, a Chicago diamond dealer, returned to this city Monday morning on the *Vaderland* after a two months'

sojourn in Antwerp, Amsterdam and Paris. He reported that there is a strong demand for diamonds, and that while abroad he met a number of American buyers. He expects to leave to-day for Chicago.

Ludwig Nissen, of Ludwig Nissen & Co., returned Sunday on the *Cincinnati* from a two months' trip in European diamond markets. In an interview which he gave out to the press upon his arrival he said that the diamond prices abroad are higher than ever for a good quality of diamonds and that the quantities are decreasing.

F. W. Sackett, wholesale jeweler, 59 Maiden Lane, writes that there is a mistake in the stories which appeared in the papers last week relative to the arrest in Europe of Shender-Taneiser, who, it was said, was a former salesman in his employ and who, it was stated, had stolen a large quantity of jewelry. Mr. Sackett states that he never had a man of that name in his employ, nor has he ever been robbed of any jewelry, and that whatever the real status of the case may be the use of his name was evidently an error. The man was arrested by the Russian police and, according to the account reported, was wanted in this city for robbery.

According to a report just issued the imports of clocks and watches into the United States for the month of June, 1909, amounted to \$296,412 as against \$172,104 for the same time last year. Diamonds reached \$3,935,049 for June, 1909, as compared with \$736,430 for June, 1908, while other precious stones show \$632,332 for the past June, while a year ago the amount fell off to \$187,756. The jewelry imported amounted to \$75,089 as against \$64,525. In the lists of exports from this country clocks and watches amounted to \$219,635 last June, while a year ago the amount was \$198,599. Jewelry amounted to \$93,636 as against \$66,802 a year ago, while plated ware shows \$66,361 as compared with \$48,503 last year.

Joseph Polak, who was formerly employed by S. L. Van Wetzel as general confidential man, has severed his connection with that concern and now represents A. S. Van Wetzel, Antwerp and Amsterdam, in this city. A. S. Van Wetzel was formerly a partner in the house of S. L. Van Wetzel, but the partnership was dissolved some time ago. Mr. Polak is starting a diamond-cutting factory for A. S. Van Wetzel in this city. He returned recently on the *Teutonic* from Europe, where he had been on a business trip to see his new employer. He is, at present, in an office at 71 Nassau St., and has begun employing 20 men, who are for the present at work in a shop in Brooklyn. He expects soon to find a definite location for the factory.

A meeting of the creditors of Samuel Levinson, 69 E. Broadway, was held at the offices of Stern, Singer & Barr, 299 Broadway, Friday, at which time an offer of 15 per cent. was made in composition of the jeweler's debts. Mr. Levinson has been in business for the past 30 years. Some time ago he made unfortunate investments in real estate which affected his health to such an extent that he is now confined in a hospital. Mrs. Levinson has been carrying on the business of late. The estimated value of the assets is \$1,039, of which \$600 to

\$800 is in merchandise, \$39 in cash and \$200 in accounts. The liabilities aggregate \$5,796, of which amount \$2,441 is for merchandise and \$3,355 is money borrowed from relatives and friends.

A meeting of the creditors of the New York Export & Import Co., 133 Front St., New York; Manila, P. I.; Hong Kong, Calcutta and other cities, was held Friday at the office of Magrane Coxé, 59 Church St., referee in bankruptcy. About 55 claims were filed and Gustave Skillman was elected trustee under bonds of \$10,000. The liabilities are \$122,000 and the good assets estimate about \$25,000, with \$9,000 on hand. The company has merchandise in the Far East estimated to be worth about \$35,000, but on account of the charges and expense of selling it it is thought it will realize about \$10,000. The trustee was authorized to carry out a contract with a corporation to sell some of the goods in the Far East. Other business was also transacted.

Diamond and precious stones importers in this city will be interested in the announcement made last week of the appointment of D. Frank Lloyd as Deputy Assistant Attorney-General, to take charge of the interests of the Government in all customs litigations throughout the country. William A. Robertson, Edward R. Wickfield and Martin T. Baldwin, at present assistants to the solicitor of customs, have also been appointed as special assistants to assist the Deputy Assistant Attorney-General. On receiving the information Mr. Lloyd tendered his resignation as first assistant United States Attorney in the Southern District of New York, which was accepted to take effect immediately. The duties of Mr. Lloyd's new office are to take charge of the interests of the Government in the matter of reappraising and classifying importations and the litigation incident thereto, and to represent the Government in all parts and before all tribunals where the interests of the Government require representation. Mr. Lloyd will have his office in the Federal building, but will make his headquarters at the Appraisers' Stores, where his staff of assistants will work.

Fifth Ave. jewelers are interested in a movement to have Fifth Ave. decorated and illuminated during the two weeks of the Hudson-Fulton celebration. By request of the Hudson-Fulton celebration committee, Robert G. Cook, president of the Fifth Ave. Association, called a meeting of a special committee of that organization last Thursday to outline plans. It was voted to invite the co-operation in contributions by members of the association as well as citizens and business men along the avenue. Among those present at the meeting were: Wm. P. Sackett, of the Reed & Barton Co., and J. F. Maynard, of the International Silver Co. A committee on illumination includes the name of Mr. Maynard, and that on decoration includes the name of Mr. Sackett. The Hudson-Fulton celebration, which will occur on the Hudson River from Sept. 25 to Oct. 9, will offer a most excellent opportunity for out-of-town jewelers to visit New York and do their Fall trading and at the same time enjoy the

(Continued from page 89.)

servances which will occur at that time. The committee having this great celebration in charge has outlined a grand program which will be well worth traveling many miles to see. Because of the low rates offered by the different railroads throughout the country the out-of-town buyers will visit New York, where they will be able to obtain the latest novelties and most up-to-date trade winners to be found anywhere in the country and at the same time see the celebration. The Merchants Association of New York has arranged for special reduced rates and jewelers will do well to take advantage of this offer.

Josephs Eimer, a jeweler, of 392 Rockaway Avenue, complained in the Flatbush Court yesterday that he had been swindled with a federate \$10 bill. Eimer vented his feelings against Mike Dorin, who lives at Barren Island, whom he accuses of springing a bad money on him. There was so much fighting over the matter that Magistrate Van Dyke put the matter over until Aug. 25, when an interpreter will be on hand to hear in Dorin's side of the story. Dorin cannot speak English. Eimer said about 10 days ago Dorin dropped into his store and showed a small silver watch, priced at \$4.50. Eimer's payment Dorin extended a queer-looking bill, which Eimer looked at suspiciously. Dorin assured him it was all right. Eimer took the bill and handed over \$5.50 in change. He went next door and showed the bill and was informed that it was a worthless. He rushed back to his shop in a double-quick order, but Dorin was gone, so Eimer went to the police with his complaint.

Trans-Atlantic Voyagers.**TO EUROPE.**

Leaving Baum, New York, will sail on the *Land* Saturday.
 Aaron Lauterbach, New York, sailed, Saturday, on the *Philadelphia*.
 Stern, of Stern Bros. & Co., New York, sails, Saturday, on the *Cincinnati*.
 Frankel, of Joseph Frankel's Sons, New York, sails on the *Lusitania* to-day.
 An Cottier, of C. Cottier & Son, New York, will sail, Thursday, on the *French*.

FROM EUROPE.

Schwartz, Chicago, returned from Europe, Monday, on the *Vaderland*.
 S. Polak, with A. S. Van Wezel, returned on the *Teutonic*, recently, from Europe.
 Ludwig Nissen, of Ludwig Nissen & Co., New York, returned from a European trip on the *Cincinnati*, Sunday.
 E. Reichman, of Reichman Bros., and Emanuel Jacobson, of Jacobson Bros., both of New York, and Sam Sipe, Pittsburg, and his brother, J. C. Sipe, Indianapolis, Ind., returned, Friday, on the *Lusitania*.

H. Case, Durham, N. C., has purchased the old established business of R. D. Whitcomb. He is adding to the lines and will receive a new stock in time for the holiday trade.

Boston.

P. W. Carter is in Marblehead.
 Edward Morris is at Beachwood, Me., for an outing.

James Batchelder is in Meriden, Conn., this week.

Elmer E. Knight started, Monday, on a trip through Maine.

S. G. Learned has returned from a visit at Green Harbor, Mass.

George E. Wills, Auburn, Me., was in town several days, last week.

M. J. Atherton is with his family at Mt. Desert, Me., for a month's vacation.

Ernest J. Bailey is spending his annual vacation, yachting on the eastern coast.

Miss Esther Nurenberg, bookkeeper for A. S. Hirshberg, is enjoying her vacation.

H. L. Houghton has gone on a trip to New York, Philadelphia and Ocean Grove.

H. R. Hilton is enjoying his annual vacation at Bailey's Island, Portland Harbor.

Walter C. Harris, of Harris & Lawton, started this week on his annual western trip.

E. W. Byram, of the Wm. L. Gilbert Clock Co., is traveling through Massachusetts.

James Kingman, of the Smith, Patterson Co., is, with his family, at Castile, N. Y., for an outing.

Charles Adams has returned from a cruise along the eastern coast with the Boston Yacht club.

William E. Baird, formerly of the Jewelers Building, has entered the employ of the F. F. Place Co.

Walter B. Snow is at Bear Island, Lake Winnepesaukee, N. H., for a month's vacation. He has a new power boat.

H. F. Barrows, North Attleboro, visited friends here, last week, while returning home in his automobile from an outing in Camden, Me.

W. E. Geyer, of D. C. Percival & Co., is in Osterville for a vacation, while Martin S. Zerega, connected with the same firm, is at Orleans.

Frank W. B. Pratt has returned from an enjoyable cruise on his new auxiliary yacht *Idyl*. The sail was from the Winthrop Yacht club to Cape Porpoise, Me., and return.

James S. Blake, who is high priest and prophet of Aleppo Temple, Mystic Shriners, was a prominent figure at the outing of that organization, held at Nantasket Beach a short time ago.

Assistant Superintendent Cloutman, of the Elgin National Watch Co.'s factory, is passing his vacation in this section, visiting friends in Waltham, where he was formerly in the watch factory.

In the Lynn Police Court, Friday of last week, Harry Osler was found guilty of the larceny of jewelry valued at \$75 from A. H. Portnor, of 19 Tremont St., Lynn, and sentenced to serve four months in the House of Correction.

A. R. Harmon, London agent for the Waltham Watch Co., sailed, Saturday of last week, for England after several weeks in this country. R. A. Kettle, manager of the Chicago office of the Waltham Watch Co., was in town on business, last week. E. Charles Fitch was here from Montreal, last week.

The E. Howard Clock Co. has completed

a four-dial striking tower clock for the Methodist Episcopal Church at Chatham, Mass.; a watchman clock system for the Westchester County Courthouse, White Plains, N. Y.; a time-piece tower clock with four illuminated dials for the City Hall at Georgetown, State of Washington; an illuminated double dial post clock that was shipped to Chattanooga, Tenn.; a watchman's clock system for the Davis Mills, Fall River; a watchman's clock system for the Amoskeag Co., Manchester, N. H.

New Orleans, La.

Coleman E. Adler is in Chicago arranging for furnishings for his handsome new store.

L. D. Fincke, the foreman of the manufacturing department of T. Hausmann & Sons, is on his vacation in North Carolina.

H. Van Os, a trusted employe of the Leonard Krower house, is in the mountains of North Carolina, with his wife, enjoying his vacation.

Louis Hausmann was named by the Governor as a delegate, last week, to the Good Roads Convention, but is at present traveling to join his family in Switzerland.

Moise Waldhorn has returned from his extensive trip in Europe, accompanied by his wife. Mrs. J. H. Watts, the bookkeeper of Mr. Waldhorn, will leave, on Sept. 4, for Asheville, N. C., to remain a couple of weeks.

Leonard Krower, last week, spent a couple of days in Baton Rouge as a delegate, appointed by Governor Sanders, to the Good Roads Convention. He was accompanied by Mrs. Krower and her niece, Miss Beulah Gernsbacher. Another honor has just been conferred on Mr. Krower, the Symphony Orchestra Association having selected him as one of its officers.

Among the jewelry buyers who availed themselves of the invitation to be the guests of our merchants, last week, were the following: Dr. McClure, C. C. Rybiski, Dr. Aucoin, J. B. Rider, I. Peine, Lathrop, A. L. McAllister, R. I. Shannon, E. E. Scoggins, Dampier, Creer, Alfred Bourgeois, Levy, E. E. Grout, A. E. Morlan, L. L. Parker, Joseph Sarphe, all of Mississippi, Alabama and Texas.

While the jewelry store of G. T. Sadtler & Sons, E. Baltimore St., Baltimore, Md., was well filled with customers Monday afternoon, George Rouff, a salesman, found a strange man crouching behind a counter, clutching a tray of diamonds. Calling for help Rouff pounced upon the stranger and a struggle followed. The two men rolled over the floor locked in each other's arms. Women customers fled from the store and other salesmen gave the alarm. A policeman ran in and found Rouff on top of the stranger, holding him by the throat. At the police station the stranger gave his name as George Swatz, of Chicago, and declared that he had been examining the diamonds on the tray with the intention of buying. A "phony" three-stone ring not belonging to G. T. Sadtler & Sons was found in his pocket, but he had no money. In the struggle the diamonds were scattered, but all were recovered except a diamond hoop, which is missing.

Wm. Borgenhagen, of the jewelry department of Norris, Allister & Co., is taking a vacation in Michigan.

O. W. Eckland, traveler for the cut glass department of the Output Co. of America, is making a Pacific coast trip.

W. J. Diggs, local manager of the Jewelers' Board of Trade, is taking his usual vacation to his old home in Maryland.

W. O. Kellogg, Chicago manager of the Watson & Newell Co., is taking a vacation trip to Denver, his family accompanying him.

P. J. Stebbins, of J. K. Stebbins & Son, Ashtabula, O., stopped in Chicago several days on his way home from the Omaha convention.

A. E. Johnson, formerly in the retail jewelry business at Norwood, O., was here, last week. Mr. Johnson expects to locate in the West.

The marriage of F. E. Williams and Miss Harriette Smith took place Aug. 14. Mr. Williams is an enterprising engraver at 151 Wabash Ave.

The marriage of A. Massoun, of Massoun & Pokrass, 161 State St., and Miss Beatrice Glickman was announced to take place yesterday afternoon.

C. L. Morris, formerly a salesman for the Hamilton Watch Co., Lancaster, Pa., has been engaged by F. W. H. Schmidt to take the Indiana and Ohio territory.

Wm. D. Dreyer, formerly of Jones & Dreyer Co., has formed a new company of which he is president, with offices in the Chicago Savings Bank building, to deal in diamonds and jewelry.

J. A. Limbach, manager of the Chicago office of Theodore W. Foster & Bro. Co., is making a northwest trip. R. T. Klickner, traveler, of the same office, leaves, this week, for the Pacific coast.

Miss Ione Garlick, daughter of Charles Garlick, was married on Aug. 11 at San Diego, Cal., to Herold Lakes. Mr. Lakes is a mining man of Denver, at which place the couple will make their home.

Max Ellbogen, C. J. Roehr, T. Hoefler, all of this city, together with W. Kuesel, Milwaukee, were named as a committee to take charge of the affairs of R. J. C. Bott, Milwaukee, in the interest of creditors.

George Spies, of Spies Bros., accompanied by Mrs. Spies and a party, is making an auto tour to New York and eastern points. Richard Spies, of the same firm, has just returned from a three-weeks' trip in the east.

H. C. Strawn, son of George N. Strawn, with E. A. Dayton & Co., has bought out the interest of George Hirt in the firm of Bolstad & Hirt, manufacturing jewelers and case repairers, Seattle, Wash. The new firm will begin as of Aug. 1.

The engagement is announced of Harry H. Miller to Miss Edna Levy. Mr. Miller is the western representative of Hutchison & Huestis. Miss Levy is the jewelry buyer for Despres, Bridges & Noel. Both Miss Levy and Mr. Miller are well known in the trade, and very popular. Mr. Miller is busy distributing cigars to his friends and telling them how it happened.

Three jewelry houses—J. C. Pierik, Lochman Bros. and J. C. Klaholt—appeared before the Board of Review at Springfield, Ill., recently, to protest against the increase in their assessment this year over last. After a hearing the Board reduced the assessment on the fixtures of Lochman Bros. and Mr. Klaholt, and struck from the articles taxed against Mr. Pierik an automobile which he showed he did not possess.

Milwaukee.

E. L. Peterson, Plymouth, Wis., accompanied by his wife, was a recent Milwaukee visitor.

Among the out-of-town jewelers here, last week, were: John Armbruster, Cedarburg; J. B. Kimball, Waukesha, and O. E. Lange, Racine.

Sol. Martin, Jr., former manager of the Peerless Jewelry Co., who recently sold his jewelry business at Evansville, Ind., is now in Milwaukee and will probably open a new jewelry store within the near future.

J. G. Greenwood, formerly a member of the jewelry firm of Fish & Greenwood, Reedsburg, Wis., and lately employed as a jeweler by O. O. Melaas, at Stoughton, Wis., has opened a jewelry store at Wone-woc, Wis. New fixtures have been installed and a large and extensive stock is on display.

Franklin Thomson, secretary of the Wisconsin Retail Jewelers' Association and secretary of the Jewelers' Mutual Fire Insurance Co. of Wisconsin, has returned from attendance at the Minnesota Retail Jewelers' annual convention at Minneapolis and the national jewelers' convention at Omaha. Mr. Thomson was official delegate from the Wisconsin association to the national convention. While at Minneapolis and Omaha Mr. Thomson met with plenty of inquiries concerning the Jewelers' Mutual Fire Insurance Co. of Wisconsin.

Business men in Menasha, Wis., have started a movement to secure a city clock.

Buy Your Jewelry Early

United States Government Crop Estimates Say :

Total Cereal Crop Yield 4,875,920,000 Bushels.
Valued at 3,102,100,900 Dollars.

THIS MEANS GOOD BUSINESS.

Our Country is entering into the greatest Era of Prosperity it has ever experienced.

We Say to the Retail Jeweler, Buy Your Fall Stock of Jewelry Early!

There will be an unprecedented demand for goods which the factories will be unable to supply. You ought to be ready for the business which will come your way when the crops begin to move.

We Are Ready to Supply Your Needs.

L. Bauman Jewelry Co.

Century Building

ESTABLISHED 1844

ST. LOUIS

Importers and Jobbers of Diamonds, Watches and Jewelry

St. Louis.

Herman Mauch has gone to King's Lake or a few days' fishing.

Vincent J. Gorly, of Grimm & Gorly, has purchased a new automobile.

D. C. Burchett, Kirksville, Mo., has gone to Colorado on a pleasure trip.

Frederick Haverkamp, of the Elliott Jewelry Co., is confined to his home by sickness.

F. W. Drosten has been appointed a member of the committee on streets of the Civic League.

A. Witt, of the J. Bolland Jewelry Co., will leave, Monday, for a two weeks' fishing trip to Wisconsin.

Edward Kriemeyer and H. Doering, of the F. W. Drosten Jewelry Co., left, Saturday, on vacation trips.

Edward H. Meier, of the St. Louis Clock Silverware Co., left, Thursday, on a trip through the southern territory.

Charles Hellwig, of 1209 Olive St., has returned from a two weeks' trip to Chicago. He is having his store completely redecorated.

A. E. Addor, manager of the watch repairing department of the Mermod, Jaccard & King Jewelry Co., left, Thursday, on a vacation trip.

The Range Jewelry Co., Trenton, Mo., has been incorporated by C. E. Range, W. Pennell and Anna C. Range. The capital stock is \$5,000.

George Stiefell, manager of the diamond department of the F. W. Drosten Jewelry Co., left, Thursday, on a fishing trip to the northern Illinois lakes.

E. C. Eiseman, manager of the silver department, and Harry Dryer, assistant buyer, of the Mermod, Jaccard & King Jewelry Co., have returned from their vacations.

J. J. McKenna, manager of the Baumanfassa Jewelry Co., has returned from his vacation trip, which he spent at the northern lakes. He was accompanied by Mrs. McKenna.

F. H. Hartnagel, formerly with the Mermod, Jaccard & King Jewelry Co., and Edward Teft, formerly of DeSoto, Mo., have joined the sales force of the Hess & Culbertson Jewelry Co.

D. P. Richards, of the Maschmeyer-Richards Silver Co., returned, Tuesday of last week, from a business trip through Colorado and California. He says conditions in that territory look satisfactory.

D. Engelmann, in charge of the store of George R. Stumpf during the absence of Mr. Stumpf on a two months' trip through the west, has just received a letter from Mr. Stumpf, written just as he and Mrs. Stumpf were leaving Seattle for Boise City, Idaho.

A. Bruner, of the E. H. Kortkamp Jewelry Co., who left, June 25, on an extensive trip for the benefit of his health, will return on Monday. He has been to California and Seattle by way of St. Paul and Denver. In a letter to Mr. Kortkamp he says his health has been greatly benefited.

Among the out-of-town jewelers in this city during the past week were: E. L. Ersche, Columbia, Ill.; M. J. Motsinger, Hector, Ark.; A. D. Taylor, Beaver Dam, Wis.; Edward L. Barnard, Altona, Ill.; Fred Simon, Collinsville, Ill.; Mrs. Chris. Burk-

hardt, Red Bud, Ill.; F. B. Wolff, Chester, Ill.

Manufacturing jewelers of this city will do their part, next week, in impressing upon the thousands of visitors for "Made-in-St. Louis Week" that first-class jewelry is made in St. Louis. The Mermod, Jaccard & King Jewelry Co. will make a special exhibit in five big show windows of all the different kinds of goods made by the firm, including gold and silver work, cups, silverware and stationery. Other firms will also make special exhibits of their own manufactures.

Joseph Ebeling, president of the St. Louis Retail Jewelers' Association, has been elected one of the directors of the new North St. Louis Savings & Trust Co. The company is a North St. Louis enterprise. The stock is held by North End business men, and a peculiar feature is the fact that of the 245 stockholders no one person is permitted to hold more than nine shares of stock. Louis Ebeling, brother of Joseph, and associated with him in business, is one of the stockholders.

Indianapolis.

John A. Bernlochr and family will return this week from an extended western trip.

Asher Gray, of Gray, Gribben & Gray, is home after an automobile trip with his family through southern Indiana. He was away two weeks.

Miss Laura Steffens sailed recently for Europe, where she will remain several weeks. She has charge of the cut-glass department of Charles Mayer & Co.

After a two weeks' trip at Lake Maxinkuckee, C. J. Kiefer has returned. His brother, L. A. Kiefer, has just gone to the same resort for a few weeks.

After spending two weeks with his family at Ludington, Mich., Joseph E. Reagan, manager of the Baldwin-Miller Co., is home. His family will return later.

H. H. Bishop, president of the Indiana Retail Jewelers' Association, has returned from Omaha, where he attended the meeting of the National Retail Jewelers' Association.

Accepting a position with Joseph Lucas & Co., Orange, Tex., W. B. Patty left for that city, last week. He was formerly with George S. Kern and came to this city from Louisiana.

Ikko Matsumota has taken a cottage at Lake Manitou for the Summer, and is spending the week ends at that resort with his family. He recently purchased a cottage at the lake.

Jewelers at Fort Wayne have joined with the Retail Merchants' Association in an effort to get a new lighting system of ornamental posts and cluster lights for the principal business streets.

The Fidelity Watch Co. has changed hands, James M. Morris having sold out to William Cheney, in order to engage in the real estate. Miss Deborah Clark has taken a position with Mr. Cheney and has charge of the store.

Indiana jewelers in this city, last week, were: George W. Clemons, Greenwood; S. E. Marks, Coatesville; F. Pennington, Knightstown; J. W. Hudson, Fortville; S. B. Merrick, Plainfield; E. O. Collins, Franklin, and M. I. Kirkman, Pendleton.

John P. Mullally was elected supreme president of the American Order of Owls at the annual convention held in Reading, Pa., last week. Mr. Mullally, who was vice-president of the order for the last year, met with little opposition in securing the higher office. Mr. and Mrs. Mullally attended the convention and from Reading left for Boston, New York, Providence and other eastern cities. Mr. Mullally is president of the Indianapolis Retail Jewelers' Association, and was recently mentioned as a possible candidate for mayor.

Toledo.

George Kapp, Jr., has taken the place of F. J. Eggeman on the finance committee for Rumping Day.

Arthur Christen, 719 Cherry St., has had his sign regilded and is making other improvements in his store.

Charles Pfaaf, who recently opened a new jewelry store on Sherry St., has installed a complete optical line and will shortly have an assistant to look after that part of the business. He has also increased his other stock.

The Toledo Police Department is having considerable trouble with sneak thieves who are partial to jewelry and who in the past month have visited a score or more houses and stores and carried off stock to the value of several thousand dollars. A close watch is being kept on the local pawn shops, but up to date none of the stolen articles has been recovered.

The formal opening of the joint store on Superior St. of W. A. Rankin, manufacturing jeweler, and C. R. Parker, optician, occurred this week. The room had been especially rebuilt, including a new front and modern show windows. Mr. Rankin occupies one-half of the store and Mr. Parker the other, the rear portion being fitted up as a joint workshop in which is arranged modern machinery required by the lines of both.

Columbus, O.

Dwight Miller, for 10 years material man for the Hofman Jewelry Co., has resigned and will go to Seattle for his health.

W. B. Tucker, one of the oldest watchmakers of Columbus, will open a repair shop and small jewelry store on E. Long St., near Grant Ave.

E. E. Reeder has donated a gold wedding ring to a couple who are to be married at a street fair to be given by High St. merchants north of the viaduct, during State fair week.

S. A. Reid, who says he is from Birmingham, Ala., and Mrs. Gertrude Brown, who says she runs a boarding house there, are under arrest at Columbus. Reid was taken in by a city detective while trying to sell some rings in a pawnshop, and the woman was arrested later on suspicion. Many jewels, evidently removed from settings, and a considerable quantity of jewelry were found in Reid's effects, and among other things there was a watch which, it was later discovered, had been stolen from Albaugh & Pickering's jewelry store at 81 N. High St. Burglar tools were found in Reid's possession, the police say.

To the Jobbing Trade of the Country

Gentlemen :— Last February I purchased the entire interest of my partner, Mr. Herman T. Regnell, of Regnell, Bigney & Co.

I have reorganized the Company and will do business in the future under the firm name of The Allison Manufacturing Co., makers of high grade goods, and will sell the jobbing trade only.

We are making a most beautiful line, in choice designs, of Brooches, Dutch Collar Pins, Sash Pins, Link Buttons, Scarf Pins, etc., also an exquisite line of enameled goods, Cuff Pins, Combination Sets, etc., tastefully mounted on pads.

You will make no mistake if you give our representative a few moments of your time when he calls upon you.

JAMES ALLISON BIGNEY

The Allison Manufacturing Co.

ATTLEBORO, MASS.

NEW YORK OFFICE
37 Maiden Lane

SAN FRANCISCO OFFICE
Van Ness and O'Farrell Sts.

CHICAGO OFFICE
1205 Heyworth Bldg.

Los Angeles.

George L. Bannister, 309 S. Spring St., is taking a rest at Balboa.

W. L. Winkler, with Montgomery Bros., is taking a two-weeks' vacation.

W. Reynolds, of the E. W. Reynolds Co., has just purchased a new residence for \$10,000.

George Roberts has taken a position as salesman with Almon G. Stone, 330 S. Broadway.

V. H. Richardson, watchmaker, is now located in the store with Gilmore & Lee, 100 S. Broadway.

Harry Taylor, formerly with Nordlinger & Co., is now with A. E. Morro, corner 100 S. Broadway.

W. Kemp, who left the service of the Pacific Gem Co., some time ago, is now living in Hollywood, Cal.

W. J. Donovan, of Donovan & Seaman's, is en route to New York and the State on a business trip.

W. J. Getz, formerly of 557 S. Broadway, has moved to a new location near 10th Ave. and 7th St.

W. J. Wiesenberger has returned from an automobile trip to San Francisco with his father and her uncle.

S. Mouradi, for many years one of the leading jewelers of this city, is taking a vacation in the northern part of the State.

E. J. Innes, formerly of Dubuque, Ia., is now in the employ of the Pacific Gem Co., in this city, as a traveling salesman.

George Bloom, a jeweler, formerly located at 514 E. 5th St., has moved to a new location on S. Main, between 4th and 5th Sts.

M. Marshall, wife of a San Luis Obispo jeweler, is spending a short vacation in this city, accompanied by her son, Arthur.

Edward Cahn, formerly of New York and now of Colorado Springs, is spending about a month in Southern California and Old Mexico.

George S. Coleman, of the Whitley Jewelry Co., is taking a two-weeks' vacation with his wife in the San Bernardino mountains.

P. D. Walsh, of Hambricht & Walsh, is spending a few weeks' vacation at Balboa, a seaside resort about 40 miles from Los Angeles.

Arthur Care, head of the material department in the E. W. Reynolds Co., is off for a couple of weeks, taking his Summer vacation.

J. C. Fleming and wife, of the J. C. Fleming Co., took an automobile trip to the seaside, a few days ago, in Mr. Fleming's machine.

Montgomery Bros. have on exhibition in their window a large display of cups and medals, to be contested for at the Canoe Club picnic.

Frank and Arthur Turner, traveling representatives for the E. W. Reynolds Co., returned, a few days ago from an automobile trip to San Diego and Coronado.

George Germain, a well known jewelry salesman, has accepted a position with Bascom Adams & Abel Co., the new wholesale jewelers at 424 S. Broadway.

W. H. Greer is having a successful sale of the E. B. Bailey stock at 353 S.

Broadway. Mr. Bailey announces that he will begin business again with an entirely new stock, Sept. 1.

Among the out-of-town jewelers in Los Angeles, recently, were: M. G. Hale, of N. B. Hale & Son, San Bernardino; C. W. Erusting, San Diego; Mr. Adams, of Greenwald & Adams, Tucson, Ariz.

F. A. Marcher, manager of the Pacific Gem Co., is traveling in Europe with his daughter and expects to be gone until November. He is combining business and pleasure. His brother, George H. Marcher, is in charge of the company's business.

L. V. Brown, with Nordlinger & Sons, recently made the race from San Pedro to San Diego in the contest for the Lipton cup, under the auspices of the Southern California Yacht Club. The trip down was very comfortable, but when returning his yacht encountered a severe head wind and was 32 hours beating her way back.

Douglas B. Sterrett, gem expert in a geological survey, Agricultural Department, has left here after spending some time gathering information in regard to the gem industry in southern California and Arizona. He gave special attention to peridots and garnets in Arizona and to tourmalines and hyacinths and other stones in California.

San Francisco.

B. D. Body, who represents the Alphonse Judis Co., has been enjoying a vacation in the mountains of Mendocino County.

R. Myers, of R. & L. Myers Co., is now out on the road. Max Bayrut, formerly with this firm, is now with G. Greensweig & Co.

L. Smith, with A. I. Hall & Son, is back again to his duties, after spending his honeymoon at the Summer residence of Mr. Huggins, also of the firm.

W. R. Landram has just returned from a successful trip through the southern part of the State. Mr. Bridges, who has offices with him, is now in Portland on his north-west trip.

Harry Lippman, who travels for A. Eisenberg & Co., is now out on the road. Al. Eisenberg, of the firm, is back from his European buying trip and some of the new stock selected by him has arrived.

Among the jewelers here, last week, were: H. E. Rader, Monrovia; Charles Snyder, with E. J. Hyde Jewelry Co., Spokane, Wash.; M. Saier, Fresno; William Jung, W. C. Lean, San Jose, and Mr. and Mrs. W. J. Fritz, Port Townsend, Wash.

Col. A. Andrews is making preparations for the opening of his Diamond Palace, on Kearney St., within a short time. Decorators are still busy and the electric fixtures are not all in place yet, but these will be finished shortly and the plate glass placed in position in the windows. Across the street the new building for the Baldwin Jewelry Co., to be known as the Baldwin building, is rapidly going up and the steel work is now in place. It is hoped to have the store on the ground floor ready for occupancy before the holiday season, if possible. The store to be occupied by Radke & Co., on Post St., is also assuming shape rapidly, and this firm will be enabled to make the move from Van Ness Ave. considerably in advance of the holiday season.

In fact, it may be possible to get downtown some time next month.

According to a report received by the Jewelers' Security Alliance from the Pinkerton detective agency in this city negotiations have been opened with Thomas Lundy, a jeweler at 788 Market St., here, who has been twice the victim of robbers within a comparatively short time, for the return of his property. A Seattle detective agency has written to the jeweler that they can locate the burglars and recover the \$46,000 worth of goods, lost by the jeweler, but are reluctant to engage in the enterprise until Jeweler Lundy will make an offer of reward different from offers that have already been made. The jeweler has turned over the correspondence from the Seattle detective agency to the police. On April 11, 1908, burglars entered his store and obtained jewelry valued at \$45,000; again, on May 20, 1909, \$1,050 worth of property was taken. In neither case were the burglars captured. The letters received by the jeweler intimated that the stolen property was buried near this city.

Among the last of the large wholesale firms of the city to locate in permanent quarters in the down-town district is the Gorham Co., which has moved over from Oakland and now occupies an entire floor in the attractive fireproof building at 140 Geary St. Immediately after the fire the concern secured quarters in a prominent location in Oakland, over a bank. A large stock was carried there and business carried on just as formerly. The city trade was supplied as expeditiously as though a location had been secured in San Francisco and daily deliveries have been made since then. The new location on Geary St. could scarcely be improved on, as it is easily reached both by city and out-of-town customers. Building operations have been completed in this vicinity and the surrounding structures are of high-class construction. The Gorham Co. occupies the entire seventh floor of the building and has fitted it up at large expense. A marble wainscoting has been placed in the hallway and the entrance has been further improved. The largest stock of silverware ever carried on the coast is now being shown and the new wall cases, brought out from New York, have been put in place. The lighting facilities are one of the most prominent features of the establishment, there being light from all four sides. The buildings on either side are less than seven stories in height, so that no light is shut out. The shipping room is located in the rear and is reached by a freight elevator. Special fire protection apparatus has been installed.

Savannah, Ga.

S. E. Theus and family have gone to New York.

S. E. Theus, of Theus & Co., was time-keeper at an autocycle race held at Tybee Island, Ga., recently.

R. Van Keuren, of R. Van Keuren & Co., has returned from a visit to the west and the Alaska-Yukon Exposition.

Wolfe Bros., Gastonia, N. C., have opened a repairing department in the store of C. S. Elam, 315 W. Trade St., Charlotte, N. C.

E. H. H. Smith SILVER CO'S

"Multi-Fortified Silver Edged Back"

Showing the extra thick plating on entire back.

This is the "Multi-Silver Fortified Back"

Showing silver plating on front of spoon

IN addition to our extraordinary standard plating we put a "Multi-Silver" plating on the entire back of every spoon and fork—the place wear-resistance is most necessary:

As our *Multi-Silver* plating is accomplished in one operation, by a new patented process which we control exclusively, we get the extra fortification at but a trifle more than the cost of the additional silver:

Our goods have a *standard price and profit for the dealer*, because we take advantage of every invention to make them better:

Send your orders *now* for Fall delivery.

THE JEWELERS' CIRCULAR PUB. CO.

11 JOHN ST., NEW YORK

The Golden Opportunity.

Address of E. M. LUNT, of the Towle Mfg. Co., before the American National Retail Jewelers' Association, at Omaha, Nebr.)

FIRST let me tell you how deeply sensible I am of the honor and the responsibilities of the position in which your call to speak here on this occasion has placed me.

From a glance at your programme it is plain that the American silversmiths are to deliver their message to you at this session through me. The honor, therefore, is as an honor to the whole industry, and I wish, as their spokesman, to thank you for it. The silversmiths of the country are in hearty sympathy with you in this great enterprise of this great enterprise into which you have thrown yourselves with such a fine devotion.

Ask you to permit me read my message. It is surely here a clearer message than that of John J. Ingalls, our typically western senator, I never written or spoken another word, his net entitled "Opportunity," would have sent name on down the ages to be remembered by who speak and think and dream in the terms of the English language. His is a master's piece—a thunderer's message, driving us to our feet, to watch and pray without ceasing. Opportunity shall announce itself by a knock on our gate.

OPPORTUNITY.

Master of human destinies am I!
 Fame, love and fortune on my footsteps wait,
 Cities and fields I walk, I penetrate
 Deserts and seas remote, and passing by
 Lovel and mart and palace, soon or late
 Knock unbidden once at every gate!
 Sleeping, wake! If feasting, rise before
 Dawn away! It is the hour of fate,
 And they who follow me reach every state
 And desire, a d conquer every foe,
 Live death; but those who doubt or hesitate,
 Demmed to failure, penury and woe,
 Seek me in vain and uselessly implore.
 Answer not, and I return no more.

These are Ingalls' words. You are all familiar with them, but I hope what I have to say may somewhat dispel from your minds the solemnity of this musical and poetic idea of a single opportunity for each of us. Each has his opportunity, but it consists in the sum or aggregate of the opportunities which life presents to us in every golden moment. Which shall I get out and urge you to seize from among those that appear to me to be crowding in upon you? Surely more than one golden opportunity lies before you as an organization.

President Garman, of the Pennsylvania Retail Jewelers' Association, in his opening speech at the convention this year, said among other things, "I trust that the day may come when we may all stand at a convention where manufacturer, wholesaler and retailer shall meet as one organization for a one purpose—that of the betterment of the whole trade."

There may have been but the expression of individual feeling, but it has the ring of prophecy in it. I believe if it finds general acceptance within your own lines, and is given official expression by the national body, it will bring a rousing response from all branches of the trade.

This expression from one high in your councils is not alone indicative of present day business conditions, it touches the highest pitch of human aspirations—the keynote of present day religion—brotherly love. Contrast it with the resolutions adopted by several jewelers' conventions of history, and with the circular letters calling for recruits to the various State organizations in the hey-day of their youth. Their call for new members was a call to arms. Their emphasis of troubles and needs almost chilled the quiet and contented with the fear that a rabble was to be gathered to fight an oppressive master.

It is not in that direction that your golden opportunity will be found, but rather in binding and strengthening the ties that naturally hold us together, opening the way for a better understanding, a closer co-operation toward a common end, in extending the sympathies and services of all in efforts for the positive good, the spreading of ideas that will help to greater efficiency—help to sell more goods at better prices and profits. Teach modern methods of buying—how to distribute the investment—sound ideas about banking, bookkeeping and collection and payment of accounts. Then, why not search the world of literature for a list (or at least a list) of books to be urged

upon your members as study bound to help them work on art, historical and technical works for the office, the salesman and the workshop. These are constructive opportunities.

Have you considered how, in many States, agricultural colleges and farmers' institutes have been established? And what for? Mere protest against the abuses of boards of trade and transportation companies? No! For constructive benefit to the farmers—education along the line of their business—in a word, to teach them to "grow two blades of grass where but one grew before."

Your local clubs are springing into life everywhere. A fine work for them would be to continuously push the publicity of the general jewelry business in their localities by news notices as well as by actual paid space advertising in a joint way. There are things which all the jewelers would like to have all the people know about their business, but which they never publish in regular advertisements.

There are seasons when you spend sparingly for newspaper publicity as individual firms, but there is no time which could not be profitably used by your local clubs in keeping up the education of the public on the art, history and application to modern life of the wares you have to sell. They could also continually remind their communities in this way of the advantages of dealing with the local merchants—the home jewelers.

With sociability as a main object, these clubs will fall apart—let them engage in important work of a practical sort and sociability will take care of itself. Such associations will then become permanent. This work must be constructive. It is not enough that they should meet to discuss and discourage price cutting for this purely negative and should be incidental, as more likely to disrupt than to unite them.

While on the subject of price cutting, I want to tell you that my desk has been the target for a regular bombardment of protesting letters from jewelers everywhere, complaining of the price cutting practices of that rascal in the next block. I have had hundreds of these letters, and from the investigations made in consequence I am ready to say that every jeweler is a sometime price cutter (of course I don't mean jewelers who go to conventions, but that fellow up in the country who never goes anywhere), so we here will agree that the habitual price cutter is not a business man—he's a flea on the back of business.

Drive him into the open with your local club and train him to jump with you—educate him, and as an educated pig escapes the shambles, so the educated price cutter may escape the bankruptcy court. Nine times out of 10 this creature is just dumb, he doesn't know what it costs him to do business and of course he doesn't know in that case when he strikes the danger line in prices.

Lately I met several competing jewelers in a town not far from here and tried to help them straighten out a price cutting tangle. The oldest and most experienced one among them, in answer to the question, how much does it cost you to do business? said, "Oh, about 10 per cent." Now, in this instance I learned that the store building, being his, no rent was charged up against the business. Salary for himself and other items were omitted for similar reasons, so that he had no way of knowing just what it did cost him.

You and I know that from 20 per cent. to 25 per cent. is about what it costs a careful jeweler to run his store, including interest on investment and all the items that are proper charges. Convince your price cutters of this and they will reform—at least it will be much more effective in that direction than have been the manufacturers' efforts to establish and maintain minimum selling prices.

As a class of merchants it may be that some of you think opportunity lives in large cities and never even visits in communities as small as yours. I'll tell you briefly a story of a merchant who found himself in one of the smaller centers without name or address, as they would add nothing to the point, and I am sure I have your confidence.

One evening after dining at a wealthy customer's house, it occurred to this jeweler that the customer's household was most completely and beautifully equipped excepting only the dining table. The jeweler made up his mind that a complete silver dinner service was really needed in that home. He said nothing about the matter to his customer then, but thought it over carefully, and presently put on his hat and took the train for the factory of one of the largest silversmiths. Arriving there he explained that he thought he

knew where he could place a solid silver dinner service. They thought he was crazy (this was some years ago and such things were not sold even in New York then). Dinner service? Just what did he mean anyway? He had studied the proposition and named the pieces without hesitation. The manufacturer asked him about how much he thought such a set ought to cost—"\$6,000," came the answer, promptly.

Well, the set was made and delivered at his store. He did not put it on his shelves, but arranged it on a dining table in a room at the back of his store where his customer could get a proper view of it and they could have their talk without publicity. He then invited his customer to call and broached the matter to him before showing the ware then he showed the ware—got the women of the family in to look at it, and sold the entire outfit. Then what do you think he did? He went right back to the manufacturer and bought another set for \$8,000, which he soon sold to a friend and social rival of the first purchaser—nor did he stop there.

Other and better sets have been sold at intervals ever since by this merchant, while his competitors in the town stand by wishing they had his luck. What they need is luck with a P at the beginning (their wish bone is where their back bone ought to be), for mind you, all this was accomplished in a community not one-tenth the size of New York—an industrial community where wealth was in the raw. The section boasted no institutions for higher education, or other special marks of refinement, and yet, here in these narrow bounds, this merchant, leader, salesman, sold what they were not selling in New York till some years later, and not to one customer only, but again and again.

What's the moral of this story? First, study your customer. Second, study your merchandise and that which the market offers, and, I'm going to add, study your clerks and instruct them. These are three factors in your business—they are the raw material, like pig iron at the mine, worth only a very low rate per ton. Treat them scientifically, help your clerks to broaden and perfect their knowledge—better arguments follow and they become the steel saw that trims the iron will of the customers and fashions it to your purpose. Your merchandise then, too, under their handling, assumes as if by magic, the true image and likeness of the desire aroused in the customers' minds.

Shall I go a step or two into the details here? A great many of you buy your stock yourselves, and perhaps sell most of it yourselves, but few of you sell it all. Those who help you sell should be systematically posted on the points that made you purchase.

The appreciation of artistic merit is especially important in your business, but the money or intrinsic value and the mechanical value or finish and workmanship must also be compared and estimated by the salesman at its true worth. Knowledge of the use or intent of the ware is also important. It's proper place in the life of a purchaser as a pure ornament or as an article contributing both to the comfort of the body and the pleasure of the eye.

None of these points are trivial—a sale frequently hangs on the smallest detail and your opportunity enlarges in the degree in which points are mastered by your helpers. Only by enabling and urging helpers to fully master details can you secure full value from clerk hire in the shape of intelligent co-operation and swelling profits.

Mix with your customers, not alone in your store—exchange home visits with them—compare their possessions in other lines of ware with what they have in yours—are their rugs and chairs better than their dining table equipment? If so you have neglected an opportunity. Seize it, and induce them to remedy the defect. It is reasonable that they should, and if you lead them to a better appreciation of the worth of your wares—of the part the products of the mine and the craft have always played in the history and romance of civilized peoples—and how this points to the effect of such possessions upon themselves, their children and their guests, and so upon the whole community as far as their influence is felt—your plea will fall upon willing ears—for this is culture.

Purses open to such arguments. Men have always found it easy to believe in the worth of any agency that ministers to their social welfare. I do not here touch upon your gaining and deserving the customer's confidence, for it seems to be pretty thoroughly understood these days that a merchant is a misfit who hasn't that.

(To be continued.)

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

PUBLISHED AUG. 3, 1909

929,683. AUTOMATIC MATCH-LIGHTER. EDWARD H. MEYER, Mount Olive, Ill. Filed March 29, 1909. Serial No. 486,579.

In a match-lighter, a suitable hopper, a rotatable cut-off for the matches having a groove formation for the reception of a single match, a hinged apron or wiper bearing with its free edge

against the surface of the cut-off, means on the outside of the hopper for rotating the cut-off through an arc to cause the groove thereof to pass outside the apron and discharge the match, and a cradle for catching the match thus discharged.

929,782. MATCH-BOX. ALBERT C. NELSON and JAMES NELSON, Jr., Litchfield, Minn. Filed Feb. 25, 1909. Serial No. 479,881.

A box of the character described comprising an outer apertured casing or cover portion, an inner box portion slidably mounted in said cover portion, means forming a part of one end of said inner box portion adapted to form a trough when

said end of the box is projected from the cover, lugs extending beyond said means to engage the cover portion to limit the movement of the trough, and an apertured foldable strip projecting from the top of said box portion with the aperture adapted to register with the aperture in the cover.

929,843. FOUNTAIN-PEN. CHARLES A. EK-LUND, New York. Filed July 18, 1908. Serial No. 444,174.

A fountain pen comprising a body portion having an opening at one end thereof, a feeding de-

vice having a tubular portion located within the opening and provided with an enlarged end adapted to lie against a pen and provided with transverse air vents, the walls of which do not contact with said pen.

929,940. SHEET-METAL CLOCK-CASE AND CALENDAR-HOLDER. WILLIAM H. HALL,

Clyde, Ill., assignor to Charles W. Shonk Co., Maywood, Ill. Filed May 24, 1909. Serial No. 497,927.
A sheet metal clock case comprising in combination, an outer member furnished with a central rectangular opening, and with integral rearwardly projecting wings at the sides of said open-

ing, and an inner rectangular member having rearwardly projecting integral sides abutting together at the corners at their meeting edges, and fitting within said wings of said first mentioned member, and provided with a curved seamless wall and a circular raised clock face portion.

930,152. HAT-PIN. FRANK S. BUCKMINSTER, Los Angeles, Cal. Filed June 30, 1908. Serial No. 441,130.

A hat pin having the head thereof pivotally secured to the holding pin; means for securing the head of the pin in a plane at right angles to the body of the holding pin or in a plane parallel to

the plane of the body of the holding pin; and means secured to the head of the holding pin for attaching the same upon the back of a seat.

930,195. COMB. ERNEST O. KOHN, New York. Filed Sept. 21, 1908. Serial No. 453,946.

A guard for combs for the purpose set forth

comprising a bar provided at its ends with means for engaging the teeth of the comb for detachable connection thereto.

DESIGNS.

10,195. GLASS VESSEL. THOMAS G. HAWKES,

Corning, N. Y. Filed April 7, 1909. Serial

No. 488,533. Term of patent seven years.
10,196. GLASS VESSEL OR SIMILAR ART-ICLE. HENRY P. SINCLAIRE, Corning, N. Y. assignor to H. P. Sinclair & Co., Corning

N. Y. Filed June 3, 1909. Serial No. 488,533. Term of patent 14 years.

10,197. CARD CASE. ALFRED SCHICKER, New York. Filed May 7, 1909. Serial No. 494,718. Term of patent seven years.

UNITED STATES TRADE-MARKS

[The following trade-marks have been added to the list of registered marks under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered; which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used years" are registrable under the last provision of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by an applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States or with Indian tribes, which was in actual exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for a period of years next preceding the passage of this act.")

TRADE-MARKS PUBLISHED AUG. 3, 1909.

Ser. No. **40,512.** (CLASS 27. HOROLOGIC INSTRUMENTS.) PHILADELPHIA WATCH CASE Co., Riverside, N. J. Filed Feb. 19, 1909.

Particular description of goods.—Watches and Watch-Movements.

Ser. No. **41,872.** (CLASS 28. JEWELRY AND PRECIOUS-METAL WARE.) HERMAN UMBSTAEYTER, Boston, Mass. Filed April 19, 1909.

Particular description of goods.—Watch, Jewelry and Jewelry Charms.

TRADE-MARKS REGISTERED, AUG. 3, 1909

71,712. CLOCKS AND WATCHES. WESTERN CLOCK MFG. Co., La Salle, Ill. Filed April 5, 1909. Serial No. 41,391. Published June 1, 1909.

74,714. WATCHES, WATCHCASES, WATCH MOVEMENTS AND WATCH PARTS. MAURICE WOOD, La Chau-de-Fonds, Switzerland. Filed Feb. 27, 1908. Serial No. 41,393. Published June 1, 1909.

74,725. EYEGLASS-CASES AND JEWELRY

BONES, FARRINGTON MFG. Co., Portland, Me., and Boston, Mass. Filed April 7, 1909. Serial No. 41,845. Published June 1, 1909.

BRITISH PATENTS.

(EXTRACTS OF SPECIFICATIONS, 1908, FROM THE ILLUSTRATED OFFICIAL JOURNAL.)

ISSUE OF JULY 28 1909

703. PENS. C. VIVRINGE, Cafe Monaco, Piccadilly, London, Oct. 5. Reservoir writing pens or nibs are formed in part from a tube, or with the reservoir double. Fig. 3 shows the former construction; the rear portion a is doubled up to fit a holder, and the front portion b is bent inwardly to form a

the neck of the reservoir b. The tube is cut away to leave a single thickness at c, the neck of b only being bent up to close the rear. In the second form the reservoir b is bent to engage and slide on the pen portion a, and an aperture f is provided in the reservoir.

709. BRACELETS. F. L. ANDERSON, Attleboro, Mass., U. S. A. April 1. Expandable bracelets, each link consists of a part attached to a back plate b, to opposite ends of which connecting-pieces c are pivoted. The

links extend through holes 14 into the adjacent links, and their hooked ends 12, which thus form pairs within each link, are connected together by springs d.

710. ORNAMENTS. H. I. SULMAN and H. F. K. PICARD and F. P. HEATH, London, April 1.

A process for producing metallic designs on pottery the design is first painted on with one of the oily solutions known in the trade as "liquid silver" or "liquid platinum"; the article is then fired in the usual way, and the design is electrolytically deposited on the conductive surface thus formed.

711. PENS. E. DE LA RUE, London, April 2. A cap a, which forms the air cell or trap at the end of the reservoir of a stylographic pen, is

provided with a valve e which, when the cap is pushed down, closes the end of the air duct b.

712. STUDS AND SOLITAIRES. L. A. PICHON, Paris, and C. M. V. ALLENOU, Ville d'Avray (Seine et Oise), France, April 4.

A winged-flap stud is provided with means for locking the flaps in their folded-down position. The flaps 1, 7, Fig. 2, have slots 3 cut out to form grooves 4, with which springs 6 engage to hold the flaps on the shank 5. A projection 2 on one

flap bears on the other when folded down to lock them in that position, so that the flaps must be shifted laterally to be raised. The edges of the cross-bars 4 are oblique or curved, so that the springs 6 tend to keep the flaps in their locked position. As shown in Fig. 3, two projections 8 are provided which bear on the top of the stud

shank. In a modification, Fig. 4 the flaps are locked by a hackwardly turned wing 9 provided with a perpendicular point, the wing engaging with a groove 10 formed on the top of the shank of the stud. The cross-bar may be formed with a series of notches, which are engaged by the lips 12 of a forked spring 14, Fig. 8.

Applications filed July 12 to July 17, 1909.

16,242. ABRASIVE METAL CUTTER. EDWARD CHARLES ROBERT MARKS, 18 Southampton building, London.

16,268. DRESS FASTENING. ALEXANDER MURRAY and ANNIE MURRAY, 100 Wellington St., Glasgow.

16,314. EYEGLASS FRAMES WITH INVISIBLE SOLDERING SPOT WHERE FRAME AND BAR MEET. RICHARD SCHULZ, 10 am Turnplatz, Rothenow, Prussia.

16,324. JEWEL BOXES AND SAFES, DRESSING CASES AND OTHER RECEPTACLES. MARTIN HENRY FULLER, 8 Quality Court, Chancery Lane, London.

16,376. TOBACCO PIPES, CIGAR OR CIGARETTE HOLDERS. THOMAS HUNTER DODD, 65 Chancery Lane, London.

16,409. CASES FOR SPECTACLES, EYEGLASSES AND OTHER ARTICLES. FRANCIS JAMES WILMOTT, 75 New St., Birmingham.

16,508. CIGAR AND THE LIKE CASES. DANIEL JENKINS, 1 Imperial building, East Croydon.

16,626. IMPROVEMENTS IN HAIR, HAT AND ANALOGOUS PINS. HERBERT THOMAS HAYWARD, 24 Temple Row, Birmingham.

16,638. CLOCK CASE. CHARLES EDWARD SANFORD, 7 Southampton Building, London.

16,698. BADGE. HUGO HESSELBARTH, 20 High Holborn, London.

16,700. SPRING PIN FOR FASTENING LADIES' VEILS. LEONIE MATERNE, 163 Queen Victoria St., London.

Complete specifications accepted July 21, 1909. 1908.

18,453. TIME INDICATION BY CLOCKS. NEWITT, WEBBER & STANDARD TIME CO.

23,100. THERMOMETER AND THERMOMETER CASE. KENT.

23,106. ALARM CLOCK. FATORINI & FATORINI.

24,091. MACHINE FOR BENDING SPECTACLE TEMPLES. NORDEN.

27,724. CHIMING AND STRIKING CLOCK. NIEHUS & NIEHUS.

Chas. Waldin has had on exhibition in his store, 305 Jefferson St., Burlington, Ia., a relic of early days in the shape of a silver pitcher, made by Gale, Wood & Hughes, in 1836.

UNITED STATES PATENTS THAT HAVE EXPIRED.

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by Davis & Davis, Patent Attorneys, New York.]

Patents expired August 9, 1909.

480,325. ROLLING MACHINE FOR CUTLERY. ISSAC HIRSCH, Chicago, Ill.

480,352. SEPARABLE BUTTON. WILLIAM A. TURNER, Worcester, Mass.

480,370. OPERA OR FIELD GLASS. ERNEST LUDDECKENS, Liegnitz, Germany.

480,387. ROTARY BLADE CUTTING MACHINE. FREDERICK KIRCHER, New York, N. Y.

480,430. WATCH-CHAIN ATTACHMENT. JOHN C. KOCH, Berlin, Germany.

480,525. ELECTRIC ARC LAMP. ELMER A. SPERRY, Chicago, Ill.

480,647. QUARTZ CRUSHER. ANDREAS P. ANDERSON, Oriental, Nev.

480,675. SATCHEL OR OTHER RECEPTACLE. CHARLES H. SHAW, Brooklyn, N. Y.

480,540. BUCKLE. GEORGE E. ADAMS, Providence, R. I.

Designs issued August 6, 1895, for 14 years. None.

Designs issued August 12, 1902, for 7 years.

35,993. BACK FOR MIRRORS, BRUSH OR SIMILAR ARTICLES. WALTER TURTON, Arlington, N. J.

35,994. HANDLE FOR SPOONS OR SIMILAR ARTICLES. EUSTACE CREES and CHARLES S. COURT, Providence, R. I.

34,995. HANDLE FOR SPOONS OR SIMILAR ARTICLES. EUSTACE CREES and CHARLES S. COURT, Providence, R. I.

35,996. HANDLE FOR SPOONS OR SIMILAR ARTICLES. EUSTACE CREES and CHARLES S. COURT, Providence, R. I.

35,997. HANDLE FOR SPOONS OR SIMILAR ARTICLES. EUSTACE CREES and CHARLES S. COURT, Providence, R. I.

Designs issued Feb. 6, 1906, for 3 1/2 years.

37,805. BRACELET. JOHN BENNETT, Attleboro, Mass.

Paris Jewelry Fashions for Men.

SOME rules as to the jewelry that fashion at present allows for the sterner sex are set forth by the *Cride Paris*. The bracelet, for men who think anything of themselves, is strictly tabooed. Wearing a bracelet with a watch is the acme of bad taste. The manly hand may only display rings on the last and third finger of the right hand, the left hand must be wholly without rings. An exception is made in the case of engaged persons, who must wear the insignia of their future happiness on their left hand.

Scarf pins are of the simplest pattern, the most proper being a simple cameo set in platinum, a diamond or a pearl. The scarf pin is stuck into a loosely-tied sailor knot, not at the top near the collar, but somewhat lower down. The pearl holds the preference as an ornament for the shirt front. It must not be too large, and should have a dull luster. Black pearls, no matter what may be urged in their favor, are not exactly pleasing and harmonious with the spotless white of the shirt front.

The flat cuffs brought us buttons joined by chain links; now, solidly connected, symmetrical buttons are again worn.

Ernest Kenebel, with H. E. Adams, Tampa, Fla., and Miss Marie E. Poehler will shortly be united in matrimony, the engagement having just been announced by Miss Poehler's mother. Miss Poehler is a resident of Richmond, Va.

“Have
You
 the
 Elgin
 with
 the
 49
 Dial?”

“H AVE you the Elgin with the 49 Dial? Such a question will soon mean money to you, because it’s one that’s going to be asked everywhere and often.

Back of it is the demand that is being created for the new Railroad Elgin through the medium of advertising in Railroad magazine telling of this innovation among watches.

This watch is making a strong appeal to railroad men and others because of its readable dial. The hands are large, the figure big and plain, the dial either of white enamel or silver finished metal. This latter is the *only* metal dial with hard *inlaid enamel figures*. It catches the faintest glimmer and is easily legible in dim light, besides being proof against the chemical action of cleaning fluids.

This new Railroad Elgin is the thinnest and most compact 18 size movement made. and is cased at the factory.

Don’t wait until you see two or three prospective customers go elsewhere before you lay in a stock, but write now, RIGHT NOW, for prices and terms. Your jobber can give you full particulars. Or write direct to the Company.

Be ready when the demand is made for the Railroad Elgin with the “49 silver” or “49 enamel” dial.

These are the four grades and established retail prices as advertised :

GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILLED
VERITAS	23 JEWELS	\$46.00	\$48.00
VERITAS	21 JEWELS	\$43.00	\$45.00
FATHER TIME (VERITAS MODEL)	21 JEWELS	\$38.00	\$40.00
B. W. RAYMOND	19 JEWELS	\$34.00	\$36.00

THE HOROLOGICAL REVIEW

The Adjustment of Watches.

Written expressly for The Jewelers' Circular-Weekly by H Reinecke.

(Continued from issue of Aug. 4.)

MOST minor position errors are owing to imperfection in the compensation balance. Such defects can hardly be avoided, except by the care which a balance receives when it is intended for a special purpose, which is the same that it receives at the hands of an expert chronometer maker, and in the same degree that care is rendered to the most expensive balance. The alloy or the brass melted on the balance, even if done perfectly, is supposed to be subject to a sort of molecular liquefaction, which continues for a long time, with the result that all balances go off their temperature adjustment a little till the two metals composing the rim have settled one to another, which may take several months, during which time the balance should be warmed occasionally and again cooled by being placed on cold metal.

A balance met in the course of adjustment which shows gross defects should be readjusted, otherwise good results will not follow.

Before using a compensation balance it is well to examine it in order to determine whether it runs true without much bending, as a well-made balance should remain perfectly circular after it is bent and the rim should be of the proper thickness, which is about $1/30$ of its diameter, which may be measured by a micrometer gauge. Such gauge may be a specially divided gauge. Its divisions should represent 3,000 degrees to the inch, which division would show a number of degrees corresponding to the hundredths of an inch of the diameter of the balance. For instance, the rim of a balance, of which the diameter measures 0.62 of an inch, should measure 2 degrees on the gauge, which has a division of 3,000 degrees to the inch. If the rim is thinner it is over-compensated, and if it is thicker it is under-compensated, and any excess in either direction should cause such a balance to be rejected if such excess would amount to more than three or four degrees, as such a balance should either be too slender and active or too stiff and inactive.

The gauging of compensation balances, according to these directions, will save much trouble. But it is to be mentioned

that these measurements only apply to watch balances. In the case of balances for marine chronometers the rim of the balance may be made thinner in proportion as there is sufficient room to make the rims much wider. There is a vague rule to make the width of the rim of the balance for a watch about one-half of the width of the mainspring. Before using such a well-tested watch balance it should be spun before the flame of an alcohol lamp till the ends of the free segments touch the stiff ends. The balance is then cooled by dipping it in cold alcohol or sulphuric ether. If, after such tests, it is much out of round or out of poise, it should be rejected as unsound, particularly even if a second trial should not have confirmed the result of the first, as balances which have not been tested a second time will not stand for any length of time.

For testing a compensation balance a hot box and an ice box are used. For the former a common pine box of proper size may be heated by an electric light bulb, which will supply heat enough (about 80°), and such heat can be kept uniform for any length of time. An ice box is not needed in winter and such natural temperature is to be preferred, but in the milder seasons of the year an ice box is needed, which will produce about 50 degrees of low temperature. Short exposures to the temperature or a single observation cannot be taken as a reliable indication of the effect, for the connection of two different metals composing the rim of the balance requires time to settle.

After a watch has been tested for 24 hours in mean temperature the rate is noted. It is then placed in the warm air chamber and the rate is again noted. Let us assume that it has gained 10 seconds. It is then removed to the ice box and subjected to the other extreme of temperature for 24 hours. At the end of that period a comparison shows that it has lost on its rate 10 seconds. The result shows that the watch is over-compensated. Two opposite balance screws must be shifted towards the fixed ends of the segments. They must be shifted equally or the balance will be thrown out of poise. The watch is then again subjected to the extremes of temperature, and, as the com-

ensation adjustment gets closer, the watch is again taken from the ice box and placed a second time in hot box for verification before another alteration is made.

As the trial proceeds the watch is allowed to remain more than 24 hours in each extreme temperature. When the compensation is perfect the watch is finally brought to time.

(To be continued.)

A Universal Tool.

THIS universal tool of W. Dierstein consists of a drill, which, by means of a rule and an angle arm, can be converted into a compass. The prolonged drill, with the help of the rule, may also be made to do duty as a slide gauge. There are therefore combined in the device the following separate tools, a drill, a rule (with scale divisions), an angle measure (square), a compass and a slide gauge. The drill has the familiar spiral stem and at the upper end a press-knob in which the spindle runs.

COMBINED DRILL AND COMPASS.

The spindle is revolved by means of the hand-propelled running nut in the familiar manner, and is equipped with a butt for the runner. It is also provided at the lower end of its prolongation with a screw-chuck for the drill. In addition, the drill spindle extension has a reinforcement through which a slot vertical to the drill spindle passes, and through which the graduated rule is passed. The slot acts as a guide and by means of a set-screw the rule can be secured in any desired position. At one end of the rule an arm is attached adjustably, but in such a manner that it cannot go beyond a vertical position toward the rule, so that it can be used as an angle measure to 90 degrees.

The prolonged drill spindle, with the adjustable rule and the angle measure, to-

ether form a slide gauge as well as a compass, for the angle arm is provided with compass point (drawing point), adjustable by means of a screw. All these separate tools are usable in the ordinary manner, and this makes the universal tool, as described, a practical article. The owner of the patent rights, says the *Ost. Ung. Uhrmacher Zeitung*, wishes to dispose of the protective rights in his patent and would prefer to sell outright to a concern capable of manufacturing, or would grant licenses of manufacture, and he has commissioned the patent office of Sack, Leipzig, to enter into arrangements to this effect.

Watch Repairing; First Cost of Same; Prices and Profits.

Presented by U. H. Nesbit before the recent convention of the North Dakota Retail Jewelers' Association.)

It is my good fortune to be a member of the Jewelers' Association and to meet here with you today; but it is also my misfortune to be requested by our worthy brother, Secretary Mr. Tillson, to prepare a paper on "Watch Repairing, First Cost of Same; Prices and Profits." I realize that there are many in our organization better fitted than I for this subject, but with our Secretary's demand and Mr. Douglas' persuasion to get busy I started to work on the subject.

After looking over my watch repair records for a number of years, I find that out of 500 records taken at different seasons of the year, the largest percentage of watch repair falls on the cleaning of watches. Of 500 watches we find that 64 per cent. were left for cleaning. Next come main spring jobs, as 17 per cent., and balance jewels as 12 per cent. Roller jewels as 11 per cent. As these five items appear to be the largest percentage of my work I have confined my paper to these items.

In order to arrive at the cost of this work and repairs, it was necessary for me to determine the expense in the following items: First, the cost of labor; second, the cost of material used; third, the cost of light, heat and rent; fourth, the cost of tools and depreciation in value of tools; fifth, interest on material carried in stock. As I find that the cost of labor is by far the largest item of expense in repairing watches, I will begin the subject with labor. I have worked on a basis of three hundred working days a year, and taking 20 hours a day for our work, and wages at \$20 per week. By reducing this down we find that our labor costs us \$40 per hour or a fraction over. Next we find that light, heat and rent are important items in our repairs. We have taken the three items at \$20 per month, which gives us \$60 per year, and which we find is about 15 cents an hour. Next we find the cost of a set of tools, bench, etc., amounts to \$100. The interest on this at 10 per cent. would amount to \$40 per year; allowing 10 per cent. for depreciation in value, would be \$40, making in all \$80 per year for tools, which we reduce to hours, and find that it equals three and one-third cents per hour; and we also find that it costs us about three cents per watch in cleaning,

for alcohol, benzine, watch paper, oil, etc.

I find that on an average it takes us one and one-half hours to clean a watch, besides 20 minutes for taking in the job, giving out check and making record of same, and 10 minutes for regulating and winding watch while in our care. This gives two hours at \$40 per hour for cleaning, etc.; which amounts to 80 cents; two hours' rent at 10 cents per hour, 20 cents; two hours' interest for tools, six cents (two-thirds of a cent at three and one-third cents per hour); cost of material used, three cents (benzine, alcohol, oil, etc.). Total \$1.09, the average cost of cleaning a watch. We charge \$1.50 for cleaning watches, which leaves us a profit of \$.40 and a fraction for each job.

MAIN SPRINGS. The next largest percentage of our work, I find, is the replacing of main springs, which averages 17 per cent. of our repair jobs. I find the cost of labor for taking in the work will average 10 minutes to the job, and 10 minutes to put in new spring, with 10 minutes for regulating and winding watch while in my care, making a total of 30 minutes time to complete the job. Thirty minutes for labor at \$40 per hour, 20 cents; cost of main spring (average on spring from \$1.25 to \$2.25 per dozen), 14 cents; cost of light, heat and rent at \$10 per hour, five cents; cost of interest on tools at three and one-third cents per hour, one and one-half cents; cost of interest on material in stock an average of three cents per \$1.00, four and one-half cents. Worth of work as a base of \$500 material in stock, 45 cents. Ditto work of \$15 per year, allowing 10 per cent. for breakage of spring under guarantee, four and one-half cents. Cost of work, material, etc., 49½ cents.

I charge \$1.50 for main spring, giving me a profit of \$1.00 per job.

BALANCE JEWELS. An average of 12 out of 100 or 12 per cent. of repair jobs. We find it requires 20 minutes' time to fit a jewel, 10 minutes for making an examination, giving out check and making a record of work, putting watch on record, etc., 10 minutes for regulating, etc.; total of 40 minutes to replace jewel; forty minutes' time at 40 cents per hour, 26⅔ or 27 cents. Cost of jewels (jewels cost from \$2 to \$4 per dozen), an average of 25 cents each; 40 minutes' rent, etc., at 10 cents per hour, seven cents; 40 minutes' cost of tools and depreciation in value at three and one-third cents per hour, two cents; interest on material, at three cents on the \$1 is four and one-half cents. Total, 65½ cents.

I charge \$1 to \$2 to replace balance jewel, an average of \$1.50 nets me 85 cents, or 84½ cents, a fraction under.

BALANCE STAFFS. Eleven out of 100 repair records. Cost of labor for repairing broken staff, including taking in work, regulating, etc., average of one hour. One hour time, at 40 cents per hour, 40 cents; one hour time rent, light, etc., 10 cents; one hour time rent of tools, etc., three cents; one hour time interest on material, three cents per \$1, seven cents; cost of staff (staff costing from \$1 to \$4 per dozen), 17 cents. Average cost per job, 77 cents.

We get an average of \$2.50 for balance staff jobs, leaving me a profit of \$1.73 per watch.

Next we come to roller jewel work. We find it will take 20 minutes' time to set jewel, allowing 10 minutes to take job in and putting on record, 10 minutes for regulating and taking care of watch while in our care, making a total of 40 minutes for labor. Forty minutes' time at 40 cents per hour, 26⅔ cents, or 27 cents; rent, light and heat, six and two thirds cents, or seven cents; cost of tools, etc., at three and one-third cents per hour, two cents; interest on material carried in stock, three cents on a dollar, three cents; cost of material, five cents. Total, 44 cents.

We have made an average of 60 cents per dozen on roller jewels. The high grade material cost up to \$2 per dozen, but we seldom are called on to fit roller jewels to high grade watches. Job costs me, complete, about 44 cents. I charge \$1.25 for roller jewels, giving me a profit of \$.81 per watch.

New Apparatus for Demagnetization.

FOR years the horological press has entertained us with special articles concerning the mysterious processes and effects of electricity and magnetism. It informs us concerning electrical clocks, belt work arrangements and even regarding electric lighting installations. These are all special limited fields, which, as such, do not concern the watchmaker. There is one thing, however, he has always needed which he does not possess; that is, a knowledge of magnetism, as far as it relates to the magnetism and demagnetism of watches.

A treatise on magnetism and electro-magnetism that supplies the watchmaker with the scientific fundamental knowledge has recently been published by A. Williams, under the title "The Electro-Magnet." Properly, for the sake of completeness and better understanding of the subject in question, it would be right to preface it with the elementary theory of magnetism, says Carl Stolle in the *Deutsche Uhrmacher Zeitung*, but considering the article above referred to I can confine this to a few remarks and bestow more attention to the operation of demagnetization itself and the apparatus adopted thereto.

The space within which a magnet or electro-magnet or a current will develop magnetic influences is designated a magnetic field. Such a piece is to be found, for instance, in the vicinity of every dynamo machine, or of every permanent (steel) magnet of any form and any character. If a piece of steel is brought within such a magnetic field the slumbering magnetic molecular forces within it are aroused and an independent permanent magnet is created. If the steel parts of a watch, especially those of the escapement, suffer this misfortune they are affected diversely by each other in their regular movement. The consequence thereof is a great irregularity in performance, and where the escapement parts are strongly magnetized a complete stopping of the watch will result.

In the latter event the condition of the going parts is evident in making repairs, in that they remain attached to the tweezers. Minor magnetic conditions, which are, however, sufficient to materially affect the accuracy of the rate, may, in most instances,

to be observed in repairing except by ringing each separate steel part in contact with fine iron filings (having small cohesive force). More or less of the fragments will remain attached to magnetized steel, whereas an unmagnetic steel part will behave under this test like any other magnetic metal; brass, for instance. It will attract no filings.

The widely disseminated theory in watchmaking that it is possible to demonstrate the existence of magnetism by means of a compass, or a pair of astatic needles, is erroneous. Both instruments can be caused to deviate by any non-magnetic piece of iron or steel. If the magnetism existing in the contrary way and of the requisite intensity is necessary. This really convenient process, being very difficult to carry out, cannot be employed. It is simpler and more practical to introduce the part that has been magnetized in a constant current field, or watch, as a whole, into a field, in which direction of the lines of force con-

SIMPLE MAGNETIZING APPARATUS.

stantly changes and thereby continuously to demagnetize the steel in a contrary way—i.e., to continually transform the magnetized. If the steel part affected during this process is slowly, possibly while being revolved or turned, removed from the magnetic field, the transmagnetization occurs to a constantly lessening extent, until finally it is nothing. The magnetic molecular forces in the steel are no longer uniformly directed; they are thrown into confusion, as they originally were, and the steel is non-magnetic.

The creation of such an alternating field is often effected by causing a horseshoe-shaped steel magnet to revolve. During the revolution the steel part to be demagnetized is first brought near the magnet and then slowly removed from the magnetic field. There is nothing to be argued against this method of demagnetization. But it acts very unfavorably as soon as the magnet comes to rest. All steel parts in its neighborhood, whether tools or watch parts, are magnetized. Such a magnet, or a demagnetizing apparatus that includes one, is consequently a dangerous guest on the workbench or in the workshop of the watchmaker, even when the poles of the magnet, when it is at rest, are closed or short-circuited. The magnetic current is never completely cut off.

Especially unpractical we must designate the method of demagnetizing on the

lathe by means of a steel magnet. The entire lathe, in spite of the greatest care, is transformed into a permanent magnet, of which the centers constitute the poles. Any part worked on such a lathe is trifled for a movement having an escapement and balance; consequently, for a watch.

As long as I have been engaged exclusively in watchmaking I have experienced great annoyance with the faulty demagnetizing devices. Similar unpleasant experiences in practical circles have constantly been brought to my notice, and all who have had anything to do with demagnetization incline to almost any experiment rather than to the horseshoe. Since I have taken an interest in electro-technics and have noted how for many years it has been the practice to demagnetize the strongest permanent magnets with the aid of an alternating current, I have constructed alternating current coils, the form of which fits them particularly for demagnetization of watches. With these apparatuses I have conducted extensive and very satisfactory experiments. Demagnetization by means of a field created by an alternating current is the most thorough and complete imaginable, and the apparatus, consisting only of a wire coil is, while at work as well as while at rest, devoid of any magnetizing influence on its surroundings.

According to my experience a large percentage of all watches are magnetic, for which reason, before commencing repairs, I invariably undertake demagnetization by means of an alternating current. Thereby I obtain, in so far as no mechanical defects exist, very good regulation results. In order to place this advantage at the command of my colleagues I have induced a well-known business concern in Ludwigshafen-on-the-Rhine to manufacture on a commercial scale the apparatus shown in the accompanying illustration, and it is supplied by them in the following styles:

- (1) For attachment to lighting systems, with an alternating current of 120 to 220 volts.
- (2) For attachment to a lighting installation, with constant current of 120 to 220 volts.

Father Alexander, a Catholic priest of Pittsburg, Pa., left at the store of John M. Roberts & Son Co., last week, to be repaired a watch that appears to be a curiosity in many respects. The watch was made about 1725, by Charles Haylor, of London, and its number is 5652. The works are set in one of the first gold filled cases ever made. The watch is a key-winder and has an open face, with a bull's-eye front. The priest came across the watch at his sister's home while on a visit in England and brought it to America. The inside of the watch contains the following inscription: "Could but our tempers move like this machine, not urged by passion nor delayed by spleen, but true to nature's regulating power, by virtuous acts distinguished every hour, then health and peace would follow as they ought, the laws of reason and restraint of thought, sweet peace to pass the present moments o'er, and everlasting joy when time shall be no more." The inscription, which is printed, is encircled about the inside of the case, next to the works.

Old Viennese Clock.

An interesting old clock, both from an historical and a mechanical viewpoint, is illustrated herewith. This clock is the embodiment of the ancient and more modern elements in clockmaking, of which it is a fine specimen. It was made in Vienna about the year 1730, and is a mantle clock, the frame of which is ebony, trimmed with brass and gilt ornaments. It was brought to this country by Joseph Bonaparte and Louis Napoleon Bonaparte when they came to America in the year 1816.

In the movement is the old verge escapement with a rigid pendulum, which is attached to the pallets. It strikes the hours

CLOCK MADE IN VIENNA, ABOUT 1730.

and quarter-hours on two spring gongs of different tones. These gongs are probably some of the first ever made. The dial is made of enamel and has small dials indicating "strike" and "silent." A third dial shows a moving gilt star, which is actuated by the front pivot of the pallets and the pendulum.

The clock runs for 30 hours and keeps excellent time. It has three hands, one of which indicates the day of the month. As an ancient article of "vertu" it is a valuable specimen. The old timepiece, which is owned by Mrs. John Stockton, has recently been displayed in the store of R. V. Hurd, 126 23d St., New York.

Chimes in the Clouds.

PASSERS-BY in the vicinity of Madison Sq., New York, were treated, recently, to the ringing, for the first time, of the chimes in the lofty tower of the Metropolitan building. This melody of the bells in the clouds caused many an apathetic New Yorker to "stop, look and listen."

The sound, clear and dulcet, really seemed to emanate from the sky, so unusual was it to hear chimes 375 feet above the level of the sidewalk. The bells will chime every quarter of an hour.

Always Buy Watches of a Retail Jeweler

A Mail-Order House, Although It May Sell a Good Watch, Cannot Adjust It To Your Person.

No watch you buy by mail will keep perfect time, no matter who made it, how perfectly it is made or what its reputation. A good time keeper must be regulated to your person as carefully as a good tailor fits a coat. In no other way can you secure perfect time-keeping service. No one but your jeweler can do this. Watches you buy of mail-order concerns are not, and cannot be so regulated. That is the reason they never keep perfect time and always run too fast or too slow. The variation of even one one-thousandth part in the vibration of the delicate watch balance which governs the **GOVERNMENT**, means a loss or gain of a minute and a half each day. South Bend Watches are sold only by reliable jewelers. They are never sold by mail, because South Bend Watches are so good that we do not want their great reputation for reliability and accuracy injured by improper regulating. We make South

Bend Watches as neatly perfect as it is possible to make a watch and pay the jeweler to regulate it to keep perfect time in your pocket. A watch which is a perfect time-keeper in one man's pocket, very likely will not keep time at all in another man's pocket. If you carry a South Bend Watch you will know that the watch you carry will stand tests that are twice as severe as any that you are ever likely to give it. It might be frozen solid in a block of ice—it would still keep satisfactory time. Every adjusted South Bend Watch, before it is sent to your jeweler, is baked in an oven heated to 100 degrees Fahrenheit and kept for hours in a refrigerator at freezing point. It must keep perfect time in every position and not be affected by the jars and jolts of railway trains, horseback riding, etc. It is built to stand the hardest wear and usage you can give it. A South Bend Watch, although it is the best watch in the world, costs you no more than other good watches. Your jeweler will gladly show them to you and tell you why they are the best watches for you to buy. Send coupon today for our handsome book—How Good Watches are Made—and get interesting little device showing how South Bend watches adjust themselves to every temperature. Don't fail to talk with your jeweler about watches before you buy any watch.

South Bend Watch Company

The Ads That Ring True

to the cause of the Retail Jeweler are the SOUTH BENDS.

Men may talk and men may promise you protection against unfair competition, but we have gone further—we have put ourselves in black and white before the 80,000,000 of Uncle Sam's people, stating clearly that SOUTH BEND WATCHES are not sold to mail order houses.

What other manufacturer of watches has ever unqualifiedly come out for the Retail Jeweler? We are giving you quality goods. Now get in the bandwagon and help drum the mail order man out of the retail jewelers' camp.

Send for prices and literature to-day.

Manufacturers of High Grade Watches

SOUTH BEND, INDIANA

THE PENNSYLVANIA WATCH CASES

Trade **XXX** Mark

A New Case

Which is Proving a WINNER

It will mean increased business to the Dealer who carries a line of these cases in his stock. Our line will be sold exclusively through the Dealer and Jobber. In offering our goods for sale, you will not be up against the competition of Mail Order Houses.

Drop us a line for description and prices. You will find both interesting.

THE PENNSYLVANIA WATCH CASE COMPANY
YORK, PA.

The Superiority of

Fulcrum Watch and Clock Oil

HAS BEEN PROVEN

Never has any product met with such immediate success. The large sales and re-orders are the most conclusive evidence of the success of this oil.

Every watchmaker in this country has had no end of trouble with oil in the past few years. Could anything be worse than what you have been using?

Why not try this oil which is being so highly spoken of by everyone who uses it?

No one in the trade is more widely known than Dr. C. L. Morris, missionary for the Hamilton Watch Co., a man whose knowledge of watches is not surpassed by anyone in this country, a man who has been honored many times, on account of this knowledge, by Engineers and Trainmen's Unions and Brotherhoods.

Under date of July 16, 1909, Dr. Morris writes to the Fulcrum Oil Co.:

"From an unbiased standpoint, I think your oil is O. K. I used three extreme tests: heat, cold, and after heating, testing out to locate acid. You have made no claims but what are facts, as far as my knowledge of oil is concerned. I have no hesitancy in recommending it as being first-class in the full sense of the word."

FULCRUM OIL will not gum, will not evaporate, will not become rancid or discolor in any length of exposure, will not corrode the pivots — because it is the only Watch and Clock Oil ever known which is absolutely free from acid, AND WE CAN PROVE IT.

FULCRUM OIL can be obtained from your material jobber at 35 cents per bottle, or \$3.75 per dozen. A postal to the factory will bring you a small sample bottle free of charge.

FULCRUM OIL COMPANY - - Franklin, Pa., U. S. A.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

"Justice and Evolution."

Address delivered by Jos. Mazer, President of the Oklahoma Retail Jewelers' Association, at the recent Convention of the American National Retail Jewelers' Association at Omaha, Nebr.

MR. PRESIDENT, manufacturers and jobbers, ladies and gentlemen of the American National Retail Jewelers' Association, I would indeed be proof against all the finer instincts which should animate every human being if I did not appreciate to the full the very flattering compliment which an invitation to address this convention necessarily implies.

On behalf of the State of Oklahoma, which today I am fortunate in representing on the floor of this convention, as well as upon my own behalf, I wish to thank you for this high honor, and if throughout my talk you discover many inconsistencies, attribute them to me as mistakes of the mind and not as those of the heart.

It is possibly unfortunate that I have been selected, for this being "Jobbers' and Manufacturers' Day," we have had occasion to listen to the well-stated opinions of the greatest mercantile minds of this country. Some of them paid the jeweler glowing tributes, others have handled him not too tenderly, but all of them told that which in their inmost hearts they believed to be true, and as I am a retailer and have been chosen as the last one to address you this day, it is reasonable to presume that I am representing at this time the retail jewelry fraternity of this entire country, and as such am expected to answer in substance, if not in detail, the many excellent speeches we have heard rendered by the different jobbers and manufacturers who have today honored us by their presence. However, were I a second Solomon as regards wisdom and possessed in addition thereto the oratorical abilities of a Demosthenes, it would even then be doubtful whether I could handle with credit to myself, and justice towards you, the great responsibility you have placed upon my shoulders, but I am neither wise nor oratorical, and possess instead only the ordinary abilities of a small retailer, hailing from that portion of this great country where many people presume that "Crazy Snake" still raises Minnehaha, and where the copper-hued raiders are supposed to look upon the scalp lock as an ornamentation more to be desired than precious jewels.

Under such circumstances, you will agree with me that it is the greater part of wisdom to make no attempt to answer the preceding speakers, but instead will try to cover the subject as I think the great mass of retailers would cover it, eulogize wherever I think you would eulogize, condemn wherever I think you would condemn, and forgive, as I well know you would forgive, all those who endeavor to do that which is right, even though their ideas do not conform with our own. If in so handling the subject I manage to answer or to coincide with what some of the previous speakers have said, all well. If in addition thereto I can give you a new thought, I will consider myself indeed fortunate.

My subject is "Justice and Evolution," and when I speak of Justice, I do not refer to that blind Goddess which erring humanity has pictured as being hoodwinked, unable to see the justice she would deal out, holding the scales in her one weak hand while with the other she leans upon her sword, which apparently is too large for her to support, and which always points downward

as did Nero's thumb, but I refer to that Goddess which the newer generation will picture as having large, beautiful eyes, keenly alive to everything which occurs about her. The scales, instead of being supported by her weak, trembling hand, will rest upon a stone pedestal that they might register no false variation, and her sword will be held on high, ready to strike down the guilty, or to avert punishment from the innocent.

When I speak of Evolution, I do not refer to the Darwinian theory of evolution as applied to the physical development of the human family, but I speak of that evolution which is always going on in this grand old world of ours, whereby greater wisdom permits us to look upon something as a virtue to-day that we looked down upon as a crime the day before.

Let us consider some of the evolutions in the jewelry business: Some fifty years ago, when the first American watch factories were established, it was the retail jeweler who was depended upon to market the product, and so faithfully did he perform his task that within a short time the American watch became a by-word in this great country. Unselfishly did he eulogize its virtues, magnanimously did he forego the greater advertisement he might have had from special named foreign grades, and he smoked peacefully beneath his fig and vine tree, fondly dreaming that he was building up a retail watch business.

Just about this time the mail-order houses peeped their heads over the horizon. They were struggling for existence, striving by every means within their power to convince the public of their presumably superior values, and by cutting the prices on watches they saw a golden opportunity to entrench themselves in public favor. Their orders for watches were accordingly placed, and as in Biblical days, the manufacturers worshipped Mammon sufficiently to forget the Gods who made them, and when they filled the first order for the catalogue houses they sold the jeweler's birthright without receiving in exchange even the historical mess of pottage.

Then others came to attack the watch business, and then again others, and when at last the jeweler awoke from his sleep he saw many foes on the firing line, and as he boldly charged the enemy he discovered mail-order houses to the right of him, retailing jobbers to the left of him, Gorris Hair in front of him, Boguston Watch Co. behind him and department stores all about him, and into the valley of death rode the retailer's watch business.

But all of this time the great evolution of thought and progress was working on and on. The signs of the times showed that a new era was about to be established in the watch business. The old cry of "Rome for the Romans" echoed and re-echoed until it became "watches for the watchmakers." Eagerly was it taken up, and so wonderfully did it gain in volume that our voice was heard and soon a new watch manufacturer peeped its head over the parapets and, buried as we were beneath the debris of slaughtered profits, we were made to understand that at last we had found a friend who would give us the protection so necessary to our existence.

From that time on we gained new strength and courage, and soon a complete watch friend also enlisted under our banner. We were beginning to regain some of our lost ground. The rumble of our victorious army was heard in the camp those who formerly supplied our wants. They began to see in us newer virtues, greater possibilities, and they made to us overtures of peace. But, unlike the victors of old, we welcomed them with open arms, shed tears of joy over their return and killed for them the fatted calf.

Several of the prodigals are still following the paths of vice and sojourning partly or wholly in the land of the wicked mail-order house, or holding sinful communion with the department stores. But even against them we have not as yet steeled our hearts, but daily go we pray for them and hope that the light of justice may illumine their bosoms, and that they will prepare themselves now for their reception into the celestial fold of the jewelry fraternity, where Light and Truth, the emanation of Justice and Evolution, reign supreme. The fatted calves still wait for them, but Father Time is a cruel God and is not a respecter of persons or animals, and yesterday as I gazed with admiration upon these sleek specimens of bovine beauty, it occurred to me that their apprenticeship as calves is destined soon to end, and unless the prodigals hasten their return, I predict that it will be fatted bull instead of fatted calf for them.

Let us consider the evolution in the filled-case business. Years ago, when the first filled cases were made, the manufacturers felt that if they assured the possible purchasers that for a term of 15 or 20 years the case could be depended upon to maintain its appearance that no difficulty would be encountered in establishing a market for their output. Subsequent events proved the wisdom of their presumption. But all of the time evolution, which operates in all ages, in all climes and among all peoples, was gradually taking place, and soon it got its clutch upon the filled case business. If to guarantee a case for 15 or 20 years was a good gamble some were found courageous enough to try 25 years, and then 35 and now some of them liken the gold-filled case to the rock of Gibraltar and guarantee its permanence forever. That, however, was but one phase of the evolution taking place. Another phase dealt with its construction. If it was safe to use 15 pennyweights of gold to give it lasting qualities, it might still be safe to use eight or ten. Then it became four or five, and then one or two pennyweights, until now some cases are to be found which have no more gold upon them than can be expected from a plunge into a bathtub containing gold fish.

Evolution in thought, evolution in methods and the new era business has brought out the fact that the guarantee on the gold-filled case has had its day. It is not within the province of my talk to argue this question, but deep thought upon this subject will show you that the irresponsible dealer who has no integrity to sustain has a decided advantage over the reputable merchant in that he can guarantee his gold fish, triple plate for the same length of time as you can the honestly filled. And Justice, which is dependent upon Evolution for its final vindication, and Evolution, which is but the visible mouthpiece of Justice, will soon demand that the thickness of the gold covering the case should have an equal if not an exclusive, right to any stamping contained within the lid of the case.

And how has the jobber fared in this game of life? We find with him that but a few years ago the division point between wholesale and re-

Storekeeping Department.

I was not very marked. To retail he considered legitimate. When you suggested that he had no right to sell in competition with the retailer upon whom he, after all, depended for his existence, he answered that he received a profit in excess of what the dealers would ordinarily get and that, therefore, he was not inflicting any injury upon the trade. But gradually it began to dawn upon all right-thinking jobbers that a great injustice was being done. They perceived that the retailer could not pay his bills with the money the wholesaler got from the consumer. The jobbers began to realize further that the consumer never knew whether or not he had paid more or less than he would have paid to the retailer—he only knew that he had bought, as he summed, at wholesale.

The jeweler saw his business leaving him and he felt desperately for a remedy.

In retaliation he sought from jobbers located in other cities, and when he discovered that these jobbers also retailed he retaliated still more by purchasing direct from the makers, and the retailer saw how Evolution had turned into a dangerous practice which he had formerly looked upon as a source of extra profit. The jobber is now alive to the danger coupled with retailing and has virtually abolished the practice, and it requires but a rigid adherence to the principle of Justice to enable him to recover the ground lost by his misdeeds caused him to lose.

The silverware companies have also had their revolution. With the grasping instinct with which humanity is unfortunately afflicted they sold their wares to all who had the money to purchase. Every extra sale they made they unwisely considered as extra profit. The hardware man began to handle silverware, the department store began to handle it, and the mail-order house began to handle it, but all of this time not a dollar's worth of more silverware was being used. He who bought silverware did so because he wanted it, not because others than jewelers handled it, and had it been confined to the legitimate jewelry merchants it would necessarily have been supplied to the jeweler. The whole system was based upon injustice, and the new Goddess whom I mentioned earlier in my talk, with her beautiful eyes opened to see all that transpires about her, with her sword lifted upon high to strike down the guilty, put Thought, the touch of that divine breath, into action. Slowly the process of evolution took place and dissatisfaction grew in the mind of the retailer. He began to demand for brands. Manufacturers were found who, to the jeweler the protection he craved until now, in connection with those who have since then, the wisdom of confining their lines to the retailer, it can be truly said that those brands were most in evidence in the jeweler's stock and now so thoroughly shunned by the retailer that not a good store from the Atlantic to the Pacific can be said to carry them, and again has Evolution demonstrated the impossibility of outwitting Justice without sure punishment overtaking the offender.

The large silverware manufacturers who are still running retail stores, as well as supplying hotels and restaurants, are also receiving their share of attention, and while they may continue for a time with their old methods, egotistically imagining that they are so large that they can escape the penalty which from time immemorial has overtaken all violators of Justice, yet, so true as the sun sits in the heavens, so true is it that unless they change their ways their crowns will pass into the hands of strangers. For Evolution and Progress I consider synonymous terms, and it is impossible to be successful against either.

And how has evolution dealt with the retailer? Looking carefully into his past acts you find him in nearly all instances fighting Progress. I remember him when he fought against the screw-down and bezel case, and now he considers it one of his staples. I remember him when he fought the pendant set idea, and now he prefers it upon watches, except railroad grades. Even now he sends his customers to the jobbers and gets credit from the customer for having made the mistake, and then blames the jobber for retailing when he sees his competitor's customer there who he does not know. I remember the jeweler when he marked his goods in cipher because his father did so. I remember him when he thought it undignified to advertise. And although

a man who does not advertise is like a hen who has laid an egg without cackling, no one knows the egg has been laid except the hen, yet did he expect the customers to flow to his doors. Some large Chicago houses to this day consider it improper to make window displays. The largest firm in New York has no illustration within its catalogues. They are fighting Progress, contesting the battleground inch by inch, and while many of these firms continue to be successful because of peculiar local conditions or the strong foundations for integrity which was laid by the founders of these establishments, the phenomenal successes being made by the younger institutions as a result of their newer methods of doing business is convincing them slowly, but surely that they must awaken to the new era in business or suffer obliteration from the ranks of the mighty.

So could I continue to show that as a class the jeweler has always held out against those policies, the adoption of which would really have benefited him, and so we found it with our association. For long years had the association idea lain dormant in the breasts of many of us, afraid to let it see light. Those who brave enough to give expression to their opinions received nothing but ridicule for their pains. The large retailer laughed at the idea because he felt himself too great a Colossus to take up his time to better the interests of his smaller brother. The small retailer felt that his presence would bear no weight, either one way or the other. But Evolution was again claiming its own. The large retailer found that the thing at issue was not so much helping his smaller brother as protecting himself from an equally formidable one or the more noticeable inroads of the department store. The smaller jeweler found that if he could induce other small dealers to voice his wishes that, collectively, they would make a power stronger than the strongest, and due to this new thought the launching of the association was made possible. I will not take up the stupendous work done by the organizers of the association. It is too well known to require reiteration.

Two of the leading questions at the time of the formation of the association, as I may well say they are at this time, are those of the fixed selling price and the complete watch. The South Bend people were laughed at as fanciful dreamers because they preached a fixed selling price on low-grade movements. The Howard people on their complete watch proposition were treated pretty much as a joke, but Time vindicated their methods. Their success is phenomenal, and the fact that practically all of the other companies have come to their way of thinking proves the soundness of their system.

Some there are who claim to object to both systems, the fixed selling price and the complete watch idea, but their numbers are few and Evolution is thinning them out, but I want to tell them a little story:

Recently his Satanic Majesty was presumed to have come up on earth for converts. For days and days he searched, and at last, foot sore and weary, he sat down upon a rock to rest, knowing that his quest had been in vain, as he had but a few moments remaining in which to make his report. Just then he noticed a young man sitting upon the rock beside him, and quickly he told him of the greatness which could be his if he would but enlist under his banner. This happened somewhere in Missouri, and the young man agreed to be his if he could be "shown" on the three tests which he would submit. The bargain was readily assented to, and the Missourian told how all his life his father had been troubled with poor crops, due to the arid and stony nature of the ground, and asked his tempter to remove these obstacles to successful cultivation. Immediately the devil waved his hand and the hills and rocks vanished; beautiful flowers appeared where formerly there had been bramble bushes; the pasture appeared as if carpeted with clover; a cooling stream flowed in the middle of the farm, and from it many tributaries gave life to surrounding vegetation. The Missourian then told of a brother who had been badly crippled his entire life, and asked that he be made whole. Again did his Devilship wave his hand, and behold! the brother stood before them. The hue of the red rose was in his cheek, the sparkle of brimming life in his eye. Great knotted muscles showed on his neck, back and arms, and the brother gazed spell-bound upon the most magnificent specimen of manhood he had ever seen.

The Missourian hesitated a little before stating the third test, and suddenly, seeming to be struck

with an idea, he said: "Show me a jeweler who actually and truly would want to see the fixed selling price removed from the South Bend or the Howard sold movement separate and case separate!" and the poor Devil fell to the ground and wept.

Oklahoma was the only State to indorse the complete watch idea on all grades, and the move was criticised as foolish by no less a personage than our esteemed president, then for whom no man holds a higher regard than this speaker, and later was condemned by many of the State associations. We are not here to argue this question, but I simply wish to say that Evolution is not through evolving as yet, and before it is many of you will see the greater advantage of having the low-grade watch complete, as compared even with the high grade, by virtue of the fact that you sell so many more of the former.

Many legislative propositions have been submitted, the adoption of which (some are fearful) will end in the association's destruction, and to them I want to say that I liken our association to a huge tree, large, majestic and upraised, defying the elements, which bends, but cannot break. Beneath its grateful shade the weary jeweler sinks to rest, needing no sweeter lullaby than the music of its branches swaying 'neath the evening breeze. And that tree, which when a sprig a few short years ago a child might have destroyed, has thus in this short space of time so mighty grown until now the noblest and best of all the land worship at its shrine, counting no greater honor than to be enrolled among its men. And, if perchance, which the fates forbid, some could be found to so unwisely act as to quench for a while our altar fires, others would be found to take their place, whose music would sound all the sweeter for the absence of the discordant voices formerly contained in the choir.

We have now discussed at some length the jobber, the manufacturer, the retailer and the association, and we have seen throughout that Evolution, slow but sure, as opposed to Revolution, which is just as sure, but faster, and, therefore, results in disaster to the timid and the unprepared, has peacefully brought about a condition where we can all say that we now stand upon a common ground. Justice will not permit any other condition! Evolution will remove the obstacles which would prevent it.

Jobbers and manufacturers who have to-day honored us by your presence, on the behalf of the retail jewelers of the United States, whom I now represent, as well as the A. N. R. J. A., I wish to thank you. You have given us abundantly of your storehouses of knowledge. You have accepted our invitation in the spirit it was given, freely telling us that which you deemed right, and it would be a peculiar individual indeed who could leave this hall and not feel that as a result of the heart-to-heart talks we have had to-day we are better men than we would have been had you not come. We, like yourselves, believe in and want but Justice. The scales are now resting upon a stone pedestal, and firm and sensitive as they are they register no animosity on either side.

We want it always to be thus, and let our business relations henceforth be such that we might truly say unto each other, "Entreat me not to leave thee or from following after thee; for whither thou goest, I will go; and where thou lodgest, I will lodge. Thy people shall be my people, and thy God my God."

After all we live this life but once, and profit avails us but little if we must ponder over the fact that we did someone an injustice to secure it.

Some writer has said that "Yesterday is but a dream and to-morrow is but a vision." But I claim that every to-day well lived makes every yesterday a dream of happiness and every to-morrow a vision of hope.

I thank you.

The town clock in the belfry of the Congregational Church in Lee, Mass., for the first time in 57 years stopped one day, recently, merely through the indifference of the caretaker, who forgot to wind it. The bell, it is claimed, can be heard at a distance of six miles. Some residents have asked the church committee to keep the bell suppressed until Fall, alleging that it keeps them awake.

RETAIL JEWELERS ADVERTISING

PERSONALITY—PUBLICITY—PROFIT.

Address of STEELE F. ROBERTS, of E. P. Roberts & Sons, Pittsburg, Pa., before the Convention of the American National Retail Jewelers' Association, Omaha, Nebr.

THE jeweler's calling is the aristocracy of all trades and professions—a time honored occupation, respected and revered by all classes and conditions of men. It is the peer of merchandizing, and requires of its followers an intelligent and refined personality, an artistic and scientific development and an honesty of purpose and character above reproach.

A good personality is the most valuable asset a retail jeweler can have in his store, and though brains are essential in business, other things besides pure mental power are apt to count, and the greatest of these is an intense personality. An engaging address, good nature, sympathy, tact, patience, moral and temperamental qualities, robust health, the spirit of cheerfulness and a frank, open, truthful countenance are essential qualities; but above all is the supreme power to inspire confidence and make people trust you.

We all seek the most cheerful souls both in business and society; the cheerful man invariably attracts, and so in the field of merchandising the power to attract is a matter of great importance. A jeweler should be a typical gentleman with every supreme quality which the title implies. He should be a keen, polished, well-groomed man, cultivating tact and diplomacy; he should be a business diplomat—not an oily man—a watch is oiled—but not oily.

The successful proprietor with a good personality carries about with him an air of confidence that seems fairly to wrap itself about you and to make you at once feel that here is a person you have to pay attention to. It is more or less in a small degree the charm of personal magnetism that the man possesses, for the man who can make an impression—who can make you feel his mental capacity, personality and position—will always find the way. There is great power in appearance. You are usually judged by the way you look, and you usually look the way you feel, but you can feel the way you like. We all want people to believe we are fully as good as we are, and may be just a wee mite better.

The proprietor should be the central figure in his store—the commander-in-chief—the sun around which all employes revolve in perfect unison; and a happy man is he who combines a gracious manner and cordiality with a vast amount of cheerfulness.

All good things come to the jewelry store whose proprietor and clerks are bright and cheerful. Sunshine makes jewelry sales grow. Oh, the charm and delight of doing business with a man of good personality; a well-rounded man; a man who is the soul of honor; a man whose mind and heart is filled with all that is pure and true and beautiful; a masterpiece of his maker. And you and I do occasionally meet just such men; men who live in an atmosphere above the petty details and annoyances of business life and bask in a sunshine of perpetual good cheer; men who do a successful business and yet who just seem to live to make their customers and friends contented and happy.

Someone has said that the mainspring of the watch and the man is inside the case. The force that is to carry you to your goal is coiled up inside of you; in your energy, your pluck, your grit, your determination, your originality, your character; it does not exist in another.

On the other side some men are like a mainspring in a watch that has been set. They had the power, strength, energy and ability to conduct a successful business up to a certain point; but as the demands of the business increased they lost their elasticity and staying power—the stamina to lay hold on larger and greater possibilities. Some men thrive amazingly under the

tonic of good times, but when business becomes dull or a panic appears they weaken—lose their nerve—become a drone and their sun of business success is forever set. Men of age, said Bacon, object too much, consult too long, adventure too little, repent too soon and seldom drive business home to the full period, but content themselves with a mediocrity of business.

If any of us jewelers ever get into that predicament and find age creeping on and our business methods becoming set and that we are not equal to the opportunities presented we want to take quick action in the matter and put new life and blood into the concern by installing a business manager or competent clerk—one that has the snap, vim, energy—and go to him like a straight-away non-intermittent alarm clock.

The man who can seize promptly and firmly an opportunity as it passes and never let go until he wrings from it every possibility is the achiever; he is the man who does things.

Berton Elliott says too many stores are like machines; they run smoothly enough and there is no fault to be found with any part of their service, system or goods; in fact, they are model stores, but they do not get down into the hearts of the people; the personal element is not there. This is more apt to be the case in a large store than in a small one; in fact, the larger the store grows the more difficult it becomes to retain the personal spirit.

Many jewelers are brilliant and accomplished, yet lack that mental expression and personality that impresses itself upon all with whom they come in contact or have business dealings with. When a jewelry proprietor has a well developed case of personality it's contagious; it's catching, just like the measles. And when the clerks and employes once get the microbe in their system there is a confidence, loyalty and good cheer that breaks out all over them and incites a stimulus to work and hustle for the "Boss" that carries the business to the high tide of success.

It is the duty of every proprietor to establish a cheerful environment and impart an air of personality and integrity among his employes, not only to unfold his own character freely and completely, but to create an atmosphere in which his employes are able to develop their best quality. Many a jewelry proprietor forgets his position and neglects the greater and more important duties in his store, and is a constant menace to his own interests by doing work and attending to trivial details that a boy or girl at a few dollars a week could perform. The average jeweler is daffy about the buying end of the business, and nine times out of 10 knows nothing about the selling. As a matter of fact he lacks the mental poise necessary to properly wait on a customer.

A jeweler endowed with a good personality is like a 21-jeweled watch, adjusted to six positions. His personality and manner is so perfectly poised and adjusted as to fully meet and satisfy the hot-headed, nervous, impatient customer, the grouchy, crabbed, miserly customer, the austere old gentleman customer, the plainly-dressed customer, the timid, hesitating, doubtful customer, the dainty, affable lady customer, the haughty lady customer and the blatant, noisy customer, and all kinds and conditions of customers. He simply gathers them all in.

To be a modern jewelry merchant you must yourself be endowed with good personality and salesmanship, but to win success there is another important factor to be reckoned on, and that is the man behind the counter, the clerk or salesman; he holds the key to your success.

What is your elegant store, your magnificent goods, your perfect methods, your excellent ser-

vice, your charming personality, your whole scheme of merchandising, your profit and success. What are all these without competent salesmen. More to be desired than fine gold, yea, than price less rubies, is a competent jewelry clerk. The beauty and worth of a perfect blue-white diamond fades into utter insignificance compared to the rarity and inestimable value of a competent retail jewelry salesman.

Competent salesmen are half the stock and trade of a first class store. Better a small stock on a store room with courteous clerks than a large establishment with arrogant, indifferent salesmen for the small will become great and the latter bankrupt.

The competent salesman is neatly attired, refined in manner, pleasant, affable and has good address, with a greeting so cordial to customers entering the store that a sale is assured before the goods are shown. He is observant, gentle with tact and judgment, is truthful, honorable and faithful to his employer, and thinks and acts as though the business was his own. The competent salesman is courteous and polite under all circumstances and does not judge or neglect a customer on account of clothes or manner, for as a rule this class of trade enters a store to make a purchase.

Behind many a plain garment lies an ability and a desire to purchase the highest price goods in the store. Many a plain skirt has a pocket with a large bank roll, and many an ordinary looking man has a fat wad of bills in his trousers' pocket only waiting to be touched by some live jewelry. It is possible that the proprietor and his sales people can be so affable, courteous and long with their dealings that their customers even time they pass the store will regret that they have no occasion to enter and purchase.

Salesmen should not be indifferent to the customer with a small article to repair, for he may be entertaining an immediate or prospective purchaser as well as an angel unawares. Every salesman has the same opportunity to instill the personal equation in the business and so make himself a more valuable man.

The character of the jewelry business from the ephemeral, gushing, silly methods of the show, sissy clerk, but demands that attention, defined, personality and presence that wins the confidence of every man, woman and child the moment they enter your store door. The man that gets most out of his employes and the most for them. The most successful concern to-day find that it pays to interest their employes in their business—to encourage that enthusiasm which has so marked an influence on their quality of work.

Under no circumstances should we allow the bulldozing method of selling goods to prevail in our stores; that insistent, persistent, forcible manner which compels customers to purchase against their better judgment; in fact, forces them to buy what we know they do not want, sends them away dissatisfied and a lost customer, the chances are they will never enter your store again. Such methods of salesmanship will ruin to any store, and the clerk who rubs a customer the wrong way should receive his walk papers.

Personality, diplomacy and tact have won many battles and gained more victories than all the armies of the world ever attained, and could but instill these vital forces into ourselves, clerks and our store methods, they would win out for us a far more exceeding reward than minds ever conceived.

PUBLICITY.

In these days of modern and scientific merchandising, publicity, or advertising, plays a most important part, and the retail jeweler, ever the alert to herald his good name and disseminate the merits of his goods, finds advertising the most essential feature.

Did it ever strike you, Mr. Retail Jeweler, that you were a living, walking, full-page advertisement of your establishment—a daily, Sunday and monthly edition exploiting the fact that you were in the jewelry business? That you were a moving picture exponent of your wares, watches and jewelry? Your daily being a continuous performance, constantly reminding the public that you were "Mr. Smith, jeweler"?

When you leave your front door in the morning a stranger asks your neighbor, "Who is that fine-looking gentleman?" "That's Mr. Smith, jeweler." As you step on the car a lady nudges her husband and asks, "Is that gentleman a banker?" "No," he replies, "That's Mr. Smith, jeweler."

Retail Advertising Department.

the jeweler." As you walk to the store the policeman on the corner salutes you and says to his other officer, "That's Mr. Smith, the jeweler." Arriving at the store the clerks are all anxious to introduce their customers to "Mr. Smith, the jeweler." As you go to the club for lunch several ask in passing, "Who is that?" "That's Mr. Smith, the jeweler." As you take your box seat at the grand opera, and hundreds of persons ask, "Who is the gentleman with the handsomely wined lady?" "That's Mr. Smith, the jeweler." When you start home several on the sidewalk ask, "Who is the man with the big six-cylinder car?" "That's Mr. Smith, the jeweler." Driving in the city with your family, it's "Mr. Smith, the jeweler." As you walk down the aisle in church, the clerks are craned to see "Mr. Smith, the jeweler." No matter where you go, or what you do, you are continuously advertising "Mr. Smith, the jeweler," and, I might add, it behooves "Mr. Smith, the jeweler," that he shall lead a very respectable life.

The jeweler's windows are the most potent of advertising mediums and bring the quickest and most direct returns, and too much emphasis must be given to the importance of window displays. Artistically draped with silk or velvet and filled with the latest styles of goods daintily arranged, changed every week, the windows will command the attention and admiration of the public and return a handsome revenue.

There is a temptation or attraction about a nicely dressed jeweler's windows that scarcely a woman or child will pass without glancing and stopping to gaze at its contents. Here, then, is the jeweler's opportunity to win customers and attract by making an elegant display of his choice wares. In advertising a retail jewelry store through newspapers, of course, come first, then booklet, circular, letter or postal card.

Every bit of printed matter that goes out of a jewelry store ought to be artistic and refined, the "fin de la creme" of the printer's art, and it ought to symbolize the store. The handsomer it is the better it is likely to pay and the more it can be made to look as if it came from a jeweler the better it is.

Advertising in the daily papers is now a most important factor to the retail jeweler; it is the spark, the vital spark that starts the wheels of thought force traveling toward the goods in the store. What good does it do you to have the very choicest goods or the very best bargains if no one knows of them? Austin Jones, who has done a lot of clever things in advertising, says in his book on good advertising: "First get the right sort of goods in the right place, at the right location, at the right prices, and then make a fuss about it in the best papers you can find. An advertisement will follow."

Advertising won't work miracles: it won't make a dark store light; it won't make sneaky, unclean windows clean and tidy; it won't make a first class watch cases last 20 years; it won't make a silver plate last a lifetime; it won't make a clerk a clerk; it won't improve slipshod store methods; it won't improve the appearance of a slovenly-looking proprietor and salesman—all these things come first.

Suppose you advertise your store as having the best business methods—courteous, affable clerks, and the most generous treatment to all customers—and the next morning a lady comes to the store to exchange an article bought the previous day and meets one of your "top-notch," high and mighty clerks, who tells her he doesn't remember selling the goods, that she will have to come back later in the day and he will look the matter up, he is too busy now.

What's the use of advertising if you have salespeople of this type? The best advertisement ever written can be most effectually killed by a blank-faced, blank-minded clerk behind the counter. The man who buys the goods is the most important man in the store, and the skill of your ad. writer is only secondary and auxiliary. If the goods are not right and the prices are not right the best advertising ever written cannot bring success. You cannot always tell just what an advertisement is going to do, for it may bring direct results for the thing advertised, or it may bring a demand for something else.

Your advertisements speak "with the tongue of men and angels" and do not give a description of the goods and their quality and price, all your eloquence is in vain. Real honest scrupulous

truthfulness in advertising becomes more and more prevalent as the years go by. Advertising is simply telling people where the right goods, the right prices and service can be found.

Retail jewelry advertising is merely telling people in an agreeable, convincing way who you are and where you are and what you are doing and how much you charge for it. Be confident about your advertising; don't go about it in a half-hearted way, but pitch in as though you meant it and certain people were going to read and believe your ad.

We should always keep our stock in touch with the manufacturer who advertises direct to the consumer, stating that his goods can be had of any reliable jeweler and especially so if there is a fair margin of profit in the goods. Along this line I would like to venture a personal suggestion to the manufacturers, who, to create a public demand for their goods through the jeweler advertise direct to the consumer.

It seems to me were I a manufacturer about to exploit my goods by conducting an advertising campaign on a basis of expending \$25,000 or \$50,000 in the magazines and newspapers, I would adopt a different method from the general procedure. Out of the advertising fund I would set aside five or 10 thousand dollars and secure the services of several intelligent traveling men or promoters well versed in my line of goods, and send them out as an advance guard or missionaries to every legitimate jeweler in the United States, and instruct them to have a heart-to-heart talk with each dealer, explaining the merit of the goods, the advantage of having the goods in stock. The profit to be made, the demand the advertising will create and get close, very close, to the dealer and arouse his interest and enthusiasm by tendering every inducement possible in a financial way to handle the goods.

Then I would open up my advertising campaign with shot and shell, and with half page, whole page and double pages in magazines and newspapers I would pour volley after volley of sound, converting advertising into the minds of the millions of readers and convince them that life was not worth living without my goods; and so with dealers enthusing over the goods and profits and the public demanding your products the battle is won, victory is yours and in one unbroken stream the dollars of the masses will flow through the jeweler into your treasury.

With all the advertising that money will buy the manufacturer cannot force the dealer or middleman to handle his goods in any volume unless there is some special profit incentive. A grocer may have to have Ivory soap or Uneda biscuits, but you cannot compel a jeweler to urge the sale of any brand of watch, clock or silver unless there is a promise of adequate profit. You may advertise your specialty until doomsday and I will meet your advertising with the personality, tact and diplomacy of a competent jewelry clerk, and while he will show your goods and admit they have merit, yet in nine sales out of 10 he will sell some other make of goods in which he can show superiority.

It is not a case of substitution, it is simply an equal or better quality of goods he has sold in which there was a profit commensurate with the personal guarantee which the dealer must give.

A consumer may ask for the goods advertised by the manufacturer, but he will not buy the article unless the jeweler gives his personal guarantee that the goods are precisely as advertised. If a mainspring breaks, jewelry is defective, or silver turns green, does the consumer look to the manufacturer for reparation? No, the burden is placed entirely on the dealer, and the manufacturer is rarely given a thought in the matter. Outside the guarantee of a filled case and stamped quality on gold and silver the dealer has no real tangible guarantee as to perfect workmanship and wearing qualities. Only a few manufacturers willingly make good defective workmanship.

There is a mutual interest to conserve between manufacturer and dealer; an equitable adjustment of the question of profit and guarantee and many other important matters which, thanks to our various trade organizations, are being amicably consummated. Ninety per cent. of all the goods sold by a retail jeweler are purchased by women, and all advertisements should be prepared with an eye to their thought and their preferred style.

We should educate the public through our ads. to look to the jewelry trade for diamonds, watches, jewelry and silverware, and endeavor to elucidate the fact that there is quality and

exclusiveness in the style and manufacture of a jeweler's stock that cannot be found in a dry goods or department store. Every retail jeweler should have a distinctive style in his advertising, an individuality in arrangement, type and border, so that at a glance readers will recognize your ad. Adopt a trade-mark and use it continually in your advertising, on your stationery, boxes, bags and all printed matter.

It is a pretty safe plan to spend enough money in advertising to insure good vigorous trade. A little advertising ought to keep a little store, and a good deal of advertising will keep a big store. There can be no fixed rule laid down as to the amount which ought to be spent in advertising the retail jewelry business. The only rule necessary is to spend all the money required to bring business, but that amount should never exceed five per cent. of the gross sales.

There is a great deal in this thing of hypnotism, of the influence of mind over matter. Put your mind right into your ads.; make them virile, forcible; make them carry conviction by the very impetus of your own conviction. If you are not in earnest about the jewelry business and in love with it, if you don't honestly believe that you can do better for the people than anybody else can, you had better get out of the business and into one which you do have confidence in. If a man is in love with the jewelry business and feels it to be his calling, he should enthuse over it just as he would over a favorite horse or automobile, game of ball, golf, tennis or any pastime, only more so.

Every man has a hobby, and my advice to the retail dealer is make the jewelry business yours. Bubble over with it to your customers, clerks, friends and acquaintances; enthuse over it in season and out of season; have it and feel it through and through that yours is the most progressive store in your city.

Zealously concentrate your best thoughts and efforts in the business, and the public will respond to your enthusiasm and zeal. Just a word here in attestation of the loyal support this and all retail jewelry organizations have received from our trade journals. They have been trusted allies in promoting organization and publishing all trade abuses, and we owe the success of this and all State conventions to their publicity. They are the peer of all trade journals, and while we have such staunch adherents this organization will never need its own trade journal.

PROFIT.

Personally I think the all-important and most vital subject that faces the retail jeweler of to-day is the one of profit and sales. Have you ever seriously considered the extremely small average profit made by the legitimate jeweler in comparison with other lines of business?

In the mad rush for business during the boom years it was a matter of how large a business we could do, how many sales we could make and the all-important question of profit was forgotten until we came to close up the year's business, and then we wondered why our balance sheet showed so small a profit in comparison to the large volume of business transacted.

Think of the capital required to stock and properly equip a large retail jewelry establishment and the limited amount of business that can be transacted in comparison to other lines. Other lines of business with a capital of \$25,000 do from \$100,000 to \$150,000 per annum. Some of the wholesale and retail dry goods, furniture, grocery and hardware firms do a business of from \$600,000 to \$800,000 a year with a capital of \$100,000.

Many a mill and factory with \$200,000 capital has an output of two to three million dollars per annum, and pays large salaries and dividends. A jeweler with \$10,000 capital will have to hustle to do \$20,000 per annum; with \$20,000 capital he may do a business of \$50,000, but when you reach a capital of \$100,000 to \$500,000 it is a difficult matter to turn the capital over more than once.

(To be continued.)

Albert G. Parker, Platte Centre, Nebr., has moved to Cloudcroft, N. Mex.

The Arcanum and the Porcelain Frenzy of the 18th Century.

THIS year seems to be the year for celebrating the anniversary of famous inventions. It was just 200 years ago (in 1609) that Galileo invented the refracting telescope for astronomical observation, and 10 years ago that Böttger reinvented the Chinese art of making hard porcelain, thus producing his celebrated red ware. It is interesting to recall the great common cause his discovery caused everywhere and the porcelain fever that followed.

The success of Böttger, enormously magnified by fame, made thousands in every walk of life dream of the boundless wealth that hard porcelain would bring them—as soon as they had fathomed the secret of its production. Some sat down and tried day and night until all their property and goods were dissipated; but some, however, were more crafty and sought by bribery to acquire Meissen's secret. For the most part they were sadly deceived, for those who loved corruptible were merely subordinate workmen who, after a short engagement at Meissen, were willing to dispose of "the original secret of fine porcelain manufacture" as quickly as possible to the highest bidder. All they cared for was the cash in hand, and they were willing, in consideration of substantial monetary encouragement, to prepare everything for the production of the porcelain, but when, after months, perhaps years, it finally came to the first firing they bolted and left in the night nothing but slag and ashes which the victim might scatter over his head.

But the supply of fools was not soon exhausted. The complicated conditions of law that gave every landed proprietor, especially every princely personage or prominent city, a town court of justice, made it very difficult to pursue a swindler. For this reason, after every successful offense the rascal always managed to escape and find new victims elsewhere. The money-making passion brought the business men, the noble and the learned, the desire to replenish their exchequer, and the possibility of being able to boast of their own porcelain brought the princes into the trap. We thus see, after 1715, the secret-mongers (arcanists), or laboratory sharps, traveling adventurously about the world, to-day proudly riding on horseback, to-morrow plodding modestly afoot, few of them possessing any real knowledge.

On their travels they encountered persons who had a hankering after their art, and they "crystallized" to them and hoodwinked

them with the glitter of secrecy or the glamor of the wonderful and the supernatural. Such persons the secret-mongers sought by all possible means to excite and retain. For this reason the "arcanum," the written instrument in which the secret of all secrets was recorded, is so permeated with hieroglyphics that the authors were for the most part compelled to furnish a special key with such nonsense.

The secret-mongers were followed as the industry progressed by the "porcelain artists." They also circulated industriously from factory to factory to "greet" the art and to capture the available alms-money. Not a few tramped along with wife and child, pushing their poor household goods on a wheelbarrow. The many porcelain factories, springing up like mushrooms and passing away as quickly, attracted a number of work people, only to thrust them out again into poverty. In addition to these seekers for work those who avoided labor were to be encountered on the highway. They carefully avoided all the factories in which the wandering disciples were made to work before being given their "reward." But to the small man these vagrants were prone to pose as capable possessors of the "arcanum" so as to coax the pennies out of his pocket.

The 18th century, says Lehner, witnessed a veritable porcelain craze, and it finally became the fashion for the princes and the great nobles to own a porcelain factory, or at least as partner to support one. Some of these factories soon passed away, but some have remained in existence until the present day.

Contemporary with the German hard porcelain was the older French soft porcelain. In 1675 it was produced in Rouen; soon afterwards at St. Cloud; in 1695 at Lille; in 1725 at Chantille, and in 1735 at Menecy-Villeroi, Orleans, Arras and Sceaux. In 1740 the factory at Vincennes was established, and in 1756 that of Sèvres was founded—the famous state factory of France.

At the same time the first porcelain also developed in England. First in 1744 at Stratford le Bow; afterwards in 1745, possibly as early as 1730, in Chelsea; in 1750 at Worcester and Caughley; later at Swansea, Swinton (Rockingham), Liverpool, Longton, Lowestoft, Stoke-upon-Trent, Coalport and Nantgarn. In Belgium, in 1750, we find Tournay; in Sweden, in 1770, Marieberg; in Italy, as early as 1720, Ven-

ice, and in 1741, Capo di Monte, from which in 1759 the Spanish factory at Bueno Retiro originated. Meanwhile there was established in 1735 the works at Docia; in 1766 at Le Nove, and in 1776 a factory at Turin.

All this, however, is nothing compared with the flood of establishments that aimed at the production of hard porcelain. In 1719 Vienna; in 1746 Höchst and Fürstenberg; 1750 Berlin; 1754 Neudegg, afterwards Nymphenburg; 1755 Frankenthal; 1756-58 Ludwigsburg; 1759 Ansbach, and subsequently the smaller factories of Thuringia, Ruddstadt, Volkstedt, Kloster Veilsdorf, Grossbreitenbach, Limbach, Gotha, Fulda, and Cassel. Finally came Kelsterbach, Bayreuth, Baden-Baden and Poppelsdorf.

In the Netherlands, about 1764, the manufactory at Weesp was established; in 1778 that at the Hague; in Scandinavia, in 1754, that of Rozenborg, and in 1775 that of Copenhagen. Marieberg was engaged in the production of hard porcelain as early as 1780. Switzerland and Russia had their earliest factories, which had been preceded in Russia by experiments in 1744.

Karl Franz Hannong established a factory in Strasburg in 1724, which he was compelled to give up in 1754. About 1745 the first hard porcelain was made in Vincennes; in 1759 Sèvres was able to produce the first considerable quantity of it. Against the privileges of Sèvres numerous princes contested and supported porcelain factories, which especially were established in Paris in 1773 and 1783. But even without such august protection other establishments were forced to fight their way, such as the factories of Limoges 1773, Lille 1784, St. Armand 1788 and several in Paris.

Even in England hard porcelain had its status. Thus in 1755 in Livepool, in 1760 in Plymouth, Bristol and Newhall; later in Coalport, Lowestoft and Henley. Only North America can lay claim to more recent establishments since the first start was made at this period were only short-lived.

The history of the development of all these factories involves innumerable hopes and disappointments, victories and defeats, honesty and deceit, and invariably a peculiar, almost romantic, strain permeated the record.

C. A. B.

Hector Pickard, former paymaster for the Oneida Community, Ltd., has made restitution in the case brought against him. The losses traced to Pickard amounted to \$276. He paid the Community \$300 and \$68 for expense, and he was then fined \$50 on a nominal charge of petit larceny.

LONG DISTANCE TELEPHONE LAKE 663

The Proof of the Pudding

The proof of ability in any line consists in doing the things that others have failed in doing.

This we have done repeatedly, and can furnish the proof. We sold \$20,300 in one sale where another auctioneer had thrown up his hands after selling only \$3,000

In another sale we sold three times as much as the combined sales of two other auctioneers, and realized much better prices.

We have repeatedly taken dead sales—the result of the work of incompetent auctioneers—put new life and vim into them, and closed out the stock at a profit.

However, it is not the large amount of goods sold that counts so much as the net results in the profit and loss account—the small amount of new goods used, compared to the percentage of your goods, and your dead stock in particular, that are disposed of, and that larger and more important question of the after effects of your auction sale upon your customers, and, consequently, upon your future trade.

We believe we have solved the problem of how to conduct an auction sale so it will be to your profit, in both dollars and cents, and in the building up and permanency of your regular business.

We will furnish you evidence that sales, at this time of the year, when regular business is dull, can be made as profitable as during the seasons when regular business is booming.

You can do a holiday business during the hot months.

We would be pleased to talk with you about it.

Soldering, Welding and Brazing.

Resume of a lecture by NOEL HEATON, B.Sc., before the Central School of Arts and Crafts, London.)

SPECIFIC GRAVITY.

DEALING with the question of the specific gravity of pure and alloyed silver and gold, some useful information as to testing the purity or otherwise of the metal was given by Mr. Heaton, the information being made additionally clear by means of a series of experiments with pure silver, commercial silver (as used in the manufacture of coinage), and copper foil, and nitric acid. Other questions referred to the composition of *vermeil* (1 part nitric acid and 3 parts of chloric acid); the soldering of magnets, which, the lecturer said, he had found very easy to do; colored alloys of gold, which were difficult to prepare, because of the amount of cadmium in their composition, which was even more susceptible to the action of oxygen than was zinc; the difficulty of using aluminum for enamel work, and the best method of soldering titanium. In connection with this last question, Mr. Heaton referred to a new process, in which an oxygen-acetylene flame, to which reference was made later, and by means of which several interesting experiments were conducted prior to the lecture.

THE JOINING OF METALS

Passing on to the subject specially set for that night, the lecturer said that on two previous occasions, he had endeavored to show the position of the metals in Nature, their uses, and their particular properties which made them useful or otherwise. He now wanted to deal with a few matters connected with their working, and to show the reason that certain things were done in a certain way. If they wanted to stick any two things together, all that must be done is to get them really into contact. In the ordinary way, there would be a film of air between them. Remove that, and the two would stick close together. The air which surrounded them would serve to press them together. The point was illustrated by a simple experiment with two pieces of glass, the air being excluded by the application of a little water. In that case, however, the lecturer said that two bodies were only held together by the pressure of the air. If it is desired to stick the glass together so fast that it could not be pulled away, the meeting medium must be made of so tenacious a nature that it would not come away from the two bodies. To get that result, a liquid must be obtained that on cooling would turn it to a solid. The tenacity of that solid would, added to the resistance of the air, hold the two bodies together firmly. In the ordinary way, that would be accomplished with such a thing as glue, but, of course, that would not do for metals. That could not be applied to things joined in that manner, and it had naturally a limited strength. The great point was that the material to be used must be as nearly as possible of the same physical properties and of the same nature as the two bodies to be joined. Unless, for example, the material of the joint expanded to the same degree as the materials themselves, any warming or cooling would result in strains being set up which would tend to weaken the joint.

For fastening two pieces of metal together, then, are required some substance that would run into the joint, and would afterward solidify to a tenacious material having the same properties as the bodies themselves. In order to fulfill these conditions, metal itself must be used for the joint, a metal employed in this way being called a solder. The stability of a soldered joint would depend, firstly, on how nearly the properties of the metal they were going to use approximated to the metals they were going to join, and, secondly, on the temperature to which the metal could be heated. If they had no other consideration to think of, they would in all cases use a solder whose melting point was the same as that of the two metals to be joined. What really happened in such a case was that the solder combined with the metals at the edges of the joint to form an alloy, so that there was no sharp joint to form a plane of weakness, but a gradual transition from the metal on one side through the solder to the metal on the other side. The extreme case of this was represented by the process of fusion welding they had just seen, where two pieces of iron, for instance, were joined by a solder, also of pure iron, the resulting joint being practically homogeneous. But, of course, in practice, it was not always practicable to fuse the metal as in that case.

If they wanted to join brass, for instance, they must sacrifice that advantage, and join it with a metal that would fuse at a point considerably lower than would the brass, otherwise they ran a risk of upsetting the composition of the brass through the zinc in it partially volatilizing. Suppose they had a case where they wanted to solder a metal, and they did not want to raise it to a high temperature from one cause or other. In such a case they would take advantage of the fact that if two metals were alloyed, the fusing point of the alloy was very much lower than that of the two constituents. Any metal could be employed in the composition of such solders, and he would give them the composition of a few alloys which could be so used for various classes of work with their melting points. An alloy for use in very delicate work, with a very low melting point, was composed of two parts cadmium, two parts tin, five parts bismuth and four parts lead. Another, with a melting point of 284 degrees, was composed of tin, bismuth and lead in equal parts. The advantage of bismuth was that it always lowered the melting point of a metal considerably, and made the alloy very hard. "Blow-pipe" solder, which could be used for joining tin or lead, was formed of two parts of tin to one of lead, and had a melting point of 340 degrees. "Plumbers'" solder was composed of equal parts of tin and lead (melting point 370 degrees), or two parts of lead to one of tin (melting point 441 degrees). Such solders had a peculiar property of not solidifying suddenly, or cooling, but of remaining in a pasty state for some considerable time, and advantage was taken of that fact in the making of wiped joints. All the foregoing were soft solders, which could not be used if they wanted work that was going to stand a high temperature. In such cases, a hard solder must be used, as in brazing,

which was exactly the same thing as soldering, with the exception that alloys of the nature of brass were used, of which there were a very large number. For jewelry purposes, however, brass was not good enough. The joint would be conspicuous, and, for another thing, anything in the way of brass oxidized very easily and went black, so they must use silver solders, easily made by fusing silvers with brass. There were a great number of such solders. Four parts of silver and one of copper gave an alloy which was ductile and malleable, in the same way that copper and silver were. If a solder was required that would not have to be heated or worked very much, a little tin was added (silver 32, brass 32, tin one). When dealing with gold, alloys of gold and silver were used. Different alloys should be used according to the fineness of the gold. A joint on work that had subsequently to be enameled could be made with a solder composed of 18 parts silver to 74 gold, which would stand the temperature of the muffle. A solder containing copper should never be used for such a purpose, on account of its tendency to oxidize rapidly in the enameling furnace.

(To be continued.)

Production of French Goldsmiths.

COMPETITIONS are instituted annually by the Parisian *Chambre Syndicale* of gold and silversmiths, which serve the purpose of encouraging more rapid and at the same time more skillful production. It is noteworthy, in connection herewith, that these competitions are not intended for purely artistic productions, but are very practically confined to commercial articles.

For the various objects considered by the commission, a certain time for the completion of each is allotted. Thus, for example, we find the following periods prescribed: for a brooch, 20 hours; for a fine, richly-wrought ring, 25 hours; for a pendant in the style of Louis XVI. period, the same, and for a silver paper-knife, an egg-cup, etc., just as long. Within this period the article must be produced from the flat sheet metal. The prices range up to 100 francs. The ring in question was already finished in 18 hours and was regarded as a masterpiece.

In the competition named after Georges Carre, only silversmiths could take part, and among the labors allotted to them was the completion, inside of 40 hours, of an oval teapot in Empire style. It appears that the productions of all the participants turned out very satisfactorily, while on the other hand the prize tasks, as regards the taste displayed, show just what happens to be especially in demand in Paris.

A. J. Eaton, a jeweler of San Francisco, has been made the defendant in a suit brought against him by Mrs. Emma Warrens, who seeks to recover diamonds and jewelry, valued at \$1,000, which she claims are wrongfully withheld from her. She recites in her complaint that she was engaged to marry the defendant in Ogdenville May 26 last and that the wedding never occurred. Mr. Eaton states that he gave the jewelry to the plaintiff with the understanding that she would return it in the event of no wedding taking place.

WE BUY

Old Gold and Silver, Filings, Polishings, Sweeps, Hand Washings, etc. We will make accurate valuations and hold consignment subject to your acceptance. If valuation is not satisfactory, we re-ship to you at our expense.

Gold and Silver Solder, either from formulas furnished, or our own. "T. B. H." Alloy, 25c. per oz. Guinea Gold, 75c. per lb. Shot Copper, 40c. lb. We will send tables for alloying without charge. They save figuring.

SPECIAL AND IMPORTANT NOTICE

in ordering Plate or Wire, to avoid delay and errors, be sure to state:

FIRST, THE QUALITY—If Silver, Sterling or Pure. (Coin Silver made up only on order.) If Gold—the Karat.
SECOND, THE QUANTITY—If Wire, the Thickness and Length. If Plate, the Thickness, Length and Width.

Regarding the thickness it is **most important** to not only state the number, but also the name of the gauge you are using, as there are 13 gauges and no two alike. The most used by us is the Brown & Sharpe **American Standard**, but we will fill your order from any one by stating which you use.

Try us and you will Appreciate our Squareness, Promptness and Accuracy

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
 Attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2316.—To Precipitate Gold.—I have dissolved about 30 pennyweights of filings, averaging about 10 karats, in two quarts of aqua regia. To precipitate gold I added about a teacupful of water and two tablespoonfuls of copperas. I poured the copperas solution into the acid and slowly stirred, which did not precipitate the gold. When the copperas mixed with the acid it turned the latter a dark brownish color and effervesced, and for a minute it looked as though it was about to precipitate the gold chloride, but after effervescence had subsided the acid again took on the greenish color it had before the copperas was added, and nothing was precipitated. I have dissolved and precipitated gold many times before, but have never had this last experience. Will you kindly tell me where the trouble is, as I know there is gold in the acid?
 H. P.

ANSWER:—The acid should be neutralized before using the sulphate of iron, which would have precipitated the gold. Dissolve the gold in aqua regia; when this is done add a half pint of water and baking soda, until effervescence ceases. Filter the solution and add protosulphate of iron, which will precipitate the gold in a short time. Pour off the solution and wash the precipitate thoroughly. If a gilding solution is desired, re-dissolve the precipitate with a cyanide solution. If you want the metal, allow it to dry and melt in a crucible. Your solution may be precipitated by adding a little ammonia, or by holding a piece of bright copper in the solution. It is advisable to try a small portion first before testing the whole lot. A very successful method of recovering the gold from a solution dissolved in aqua regia is to allow the solution to evaporate by keeping warm until it comes like syrup; then thin with distilled water and hold in it a bright or clean piece of copper, when the gold will separate in a brown powder, which is filtered off, washed, dried and melted with borax, and the result is a chemically pure piece of gold.

QUESTION No. 2317.—To Clean Ivory and Bone.—Kindly tell me how to clean ivory and bone.
 T. R.

ANSWER:—Bone is best cleaned with water and tripoli. Rub it on with a cloth and brush it in the deep places with an old tooth brush. If the horn is discolored very much it is best to file over with a fine file; then proceed with the water and tripoli paste. Ivory can be polished by first rubbing with fine pumice, moistened with water; finish with putty powder. If the ivory is discolored very much it may require bleaching. This is done by washing

carefully in liquid ammonia, then in soft water. Finally apply a solution of hydrogen peroxide.

QUESTION No. 2318.—Stamping Dies Out of Electrotypes.—We want to make a set of dies for pressing up the different parts for a brush and comb set. How can we make them in the most inexpensive and economical manner?
 S. D.

ANSWER:—Dies for stamping decorations on any metal articles are best if made in steel, but this is an expensive process, as most of the work must be done by hand. A method considerably cheaper, but by which the designs will not be brought out as sharply as if cut in steel, can be produced as follows: The shapes of the brush sets should be produced in plain blanks first, which can be done in bronze dies, or steel if desired. A pressed-up piece is selected which is perfect and full, and the desired decoration is modeled on with wax. The next step is to have a copper electrotype taken against the model or wax side. This electrotype should be fully 1/16 of an inch thick. The wax model is removed, the face of the electrotype is covered by the electrotyper so he can deposit another 1/16-inch shell against it. The two electro copper shells represent male and female dies of the original wax model. The next operation is to obtain plaster of Paris patterns from the backs of the copper shells—one for the die and the other for the force. The die must fit in the bed of the press, and the force should fit the holder of the stroke or drop hammer. The plaster casts are for patterns for iron castings, and if carefully moulded will fit the copper shells. When the die and force are in place the copper shell for the die is laid in its place, a shaped-up plain blank is placed on it, the copper shell for the force is placed on this and the press or drop hammer can descend on it. Every part must be in proper place so that when the pressure is applied the two copper electros will force the decorations on the plain blank. This kind of die will force up decorations very sharply. Many pieces can be struck before the copper will wear out. The coppers can be replaced by having new ones electrotyped from the old wax model. This process is suitable for producing decorations on brush and comb sets, cake baskets, bonbon dishes, bread trays or various flat pressed articles, and may be used for silver, Britannia ware, brass or copper.

R. L. White, Greenwood, S. C., is making improvements in the interior of his store. New fixtures are being installed and the stock will be enlarged.

Simplified Electroplating for Jewelers.

(Written expressly for THE JEWELERS' CIRCULAR—WEEKLY by "R. B.")

(Continued from issue of Aug. 4.)

COLORING AND PLATING ELECTRIC BATTERIES.

As power is not available to the majority of jewelers and watchmakers, and they must of necessity fall back upon the electric battery for current, it is of the highest importance in selecting a battery to choose one that is easily replenished, inexpensive and capable of furnishing a constant current of a low voltage.

While the Bunsen battery delivers a good working current, when new, it frequently happens that it fails to work when its cur-

A GOOD FORM OF PLATING BATTERY.

rent is most desirable. Great difficulty is experienced and considerable annoyance is encountered when it becomes necessary to reamalgamate its rectangular zinc.

A good working battery to be found in the market which will give good service and is rather inexpensive consists of a rectangular or square glass jar with a lip to facilitate the removal of old solutions, and contains about a full quart of the solution. It is much to be preferred for its simplicity of construction, consisting of a pair of zinc plates and one plate of carbon.

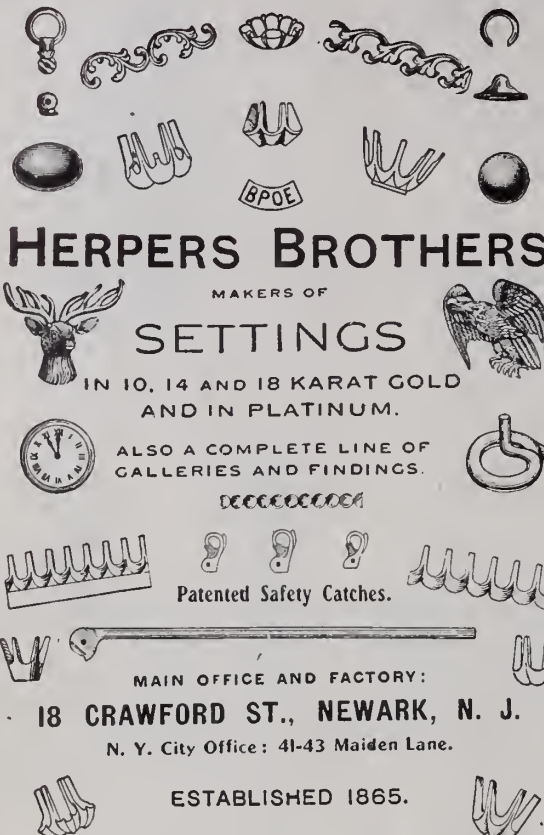

DRY BATTERIES, CONNECTED.

It has a platinum face clamp, two wire connections and a wooden support.

The glass jar should be filled with a solution of one part of oil of vitriol to 10 parts of water. Great care should be taken to add the oil of vitriol to the water very slowly, and, while doing so, it should be well stirred with a glass rod. The zinc plates should be well amalgamated by brushing them with a flannel bag containing about two or three ounces of mercury. The internal resistance being naturally very low a fairly good current is developed.

When large articles are desired to be plated two ounces of bichromate of potash should be added to each cell to increase its generating power. To the two post connections connect two copper wires, one to each connection—that is, one to the carbon

positive pole and the other to the zinc negative pole. The anode is to be attached to the wire connected to the carbon. The anode is to be of corresponding metal, that of which the plating bath consists. The solution is of pure gold, the anode should be of fine gold of equal purity. In the case of silver plating a pure silver anode should be employed, for the reason that as the silver is being drawn out of the bath, in the case of silver solution, the bath is at the same time replenished by the dissolution of the silver anode into the bath, thus avoiding the necessity of adding chemically dissolved metal, gold or silver, in the case may be. When the solution in the glass jar of the battery turns white or milky, it should be removed and refilled with a new solution prepared as before indicated.

A simple method for amalgamating the articles is to dip them into lye or caustic soda to free same from grease; rinse in clean water, then dip zinc plates into solution contained in the jar; remove the zinc plates and run over same with flannel bag containing mercury.

One cell, as shown, will afford a sufficient working current for small coloring or plating of jewelry. For silver plating at least two cells should be connected in series, the zinc of one cell to the carbon of the other. (See illustration.)

When the cells are arranged, as above indicated, the free elements being connected to be the main circuit, the current generated in the first cell forces its way through the second cell, that of the second to the first, in order to complete the circuit resulting in doubling the electromotive force. This arrangement coupling in series may be adapted for any number of cells, the electromotive force thus being increased in direct proportion to the quantity of cells employed.

To those who would consider the amalgamation of zinc plates troublesome, it may be suggested that battery salts may be had on the market which render amalgamation of the zincs unnecessary and at the same time takes the place of diluted oil of vitriol.

The small articles, such as jewelry, may be successfully plated with two or three dry, or what are commonly known as "dry" batteries shown below. (See illustration.)

Two or three of the cells will furnish a current sufficient for plating watch cases, bracelets, chains, etc., provided they are connected in series as shown.

These batteries are very convenient for use. They are clean and give a very rich color when used for Roman coloring, and, like all, are the healthiest cells known, though rather more expensive, as they cannot be recharged when exhausted, but must be replaced by new ones.

A silver-plating solution which will insure satisfactory results for plating spoons, watch cases, candlesticks, trays and other similar ware may be prepared according to the following directions:

Place two ounces of fine grain silver in a dish or capsule (the finer the grain,

the sooner will dissolution take place) and pour into the capsule a quantity of aqua fortis sufficient to fairly cover the grain silver.

Heat the capsule over a small, slow flame to accelerate the action of the acid. Care should be taken to place the capsule under some chimney or flue, in order to carry off the fumes emitted by the heated acid, inhalation of which is very injurious to the health.

While the acid is being heated it should be well stirred with a glass rod and repeated until the silver is completely dissolved. If grains of silver are still traceable a small quantity of aqua fortis should be added, when it will be found that the grains have entirely disappeared. That done, allow it to cool. Fill a stone ware jar with one gallon of water well saturated with ordinary salt—about a handful to the gallon of water. When the salt is nearly dissolved pour the dissolved silver into the salt water and stir well and steady, and presently it will be noticed that the salt water becomes milky, and soon a heavy white cheesy sediment forms on the bottom of the jar. In this state it should be permitted to rest in a dark place until the white substance known as chloride of silver is given up and settled on the bottom and the water becomes absolutely clear.

The water should now be thrown off slowly and carefully so as not to disturb the chloride deposited on the bottom. This water may be retained in a separate pot and allowed to stand several days, when it will be found still to contain some small quantity of chloride. Fresh water should be poured into the jar containing the chloride, and again well stirred and a little salt added. This should be repeated three or four times in order to give the chloride a thorough washing and free it from the acid first employed.

Now heat two quarts of water to the boiling point and dissolve therein one ounce of pure cyanide of potassium. Add to the cyanide of potassium the chloride of silver, a little at a time, stirring all the while with a glass rod until the solution clarifies and the chloride disappears.

Should a sediment remain, a small piece of cyanide may be added to complete dissolution. To this concentrated solution from one-half to one gallon of boiled water should be added and allowed to stand for 24 hours, when the solution will be ready for use. One ounce of metallic silver per gallon of water will make a very good and practical silver bath for all purposes. Articles plated in such a solution for one hour with a moderate electric current will receive a deposit of a lasting tenacity of two or three years.

SILVERING WITHOUT ELECTRICITY.

A silvering solution to be used without electricity, which will do satisfactory plating by immersion, may be prepared as follows: Dilute one quart of silver solution prepared as above described by the addition of one quart of boiling water; add thereto two teaspoonfuls of phosphate of soda and one teaspoonful of bisulphate of soda; this solution should be well stirred and allowed to rest for at least 24 hours before using. The solution must be used hot.

The article must first be thoroughly

cleaned and run through a strong potash and dipped in clean water, when it will be ready for immersion in the silver dip solution.

As soon as a silver deposit is obtained the article should be quickly removed and dipped in fresh, clean water, and next in hot water to cause it to dry quickly, whereupon it is to be thrown into clean boxwood sawdust.

This solution is not to be used for heavy deposition; it is chiefly used and is well adapted for cheap silvering on brass goods, chains, purses, lamp reflectors and picture frames. Articles plated by immersion, except reflectors, must be lacquered, in order to prevent tarnishing.

COPPER SOLUTION.

A good working and efficient bath of copper can be readily prepared as follows: Dissolve six ounces of chemically pure cyanide of potassium in three quarts of hot water; add three ounces of carbonate of copper in one quart of hot water, and stir the same well, then pour into the hot cyanide water and stir thoroughly until the mixture clarifies and the carbonate is taken up.

Should it fail to become clear, add a small piece of cyanide and the solution will soon clear up and become transparent. A few drops of strong water ammonia should be added to assist neutralization.

As soon as the solution is free from any sediment and it assumes a yellowish tint, the solution is ready for use. This solution should be used warm in order to obtain a uniform, quick and red deposit.

In plating iron, steel, lead, pewter or white metal a copper deposit should be given before gilding. In order to obtain a very heavy deposit of copper for the purpose of oxidizing or bronzing, dead gilding—commonly known as ornolu gilding—or, for the verde antique effect on heavy brass or cast-iron builders' hardware, an acid copper solution should be employed.

An acid solution may be prepared as follows: Dissolve 18 ounces of sulphate of copper in one-half gallon of hot water; in another one-half gallon of water pour in three ounces of sulphuric acid. These solutions should be mixed together and well stirred, when it will be ready for use.

Soft copper anodes should be used, and a moderate electric current should be employed. The plating in this solution must be done without haste; a fast current will render a rough and uneven deposit. Before using this acid copper bath for plating steel, iron, lead or pewter articles, it will be necessary to give a bluish or light copper deposit in a cyanide bath.

Articles removed from the cyanide bath should be well washed before placed in the acid copper bath, in order to free the article from cyanide. It is equally important that the work be well washed upon removal from the acid bath. Should the deposit be too rough or dead, the article may be dipped in an acid bath, the preparation of which will be treated in the next issue.

(To be continued.)

 KNOWN THE WORLD OVER

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal—plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag—the blades are fine. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray—contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.

Write us for full information. Get our suggestions on popular assortment. Talk to your jobber about it.

Get Ready for the Holidays NOW by Placing Your Order with Us

STORE OF G. W. BOWERS, MARION, OHIO.

Here is Evidence that Our Catalogs are worthy a Trial

Marion, Ohio, Feb. 8, 1909.
THE ARNSTINE BROS. CO.,
Cleveland, Ohio.

Gentlemen:—In reply to yours of the 6th will say I have used your Catalogs for five years, and I consider them a fine advertisement and one that adds greatly to any first-class store.

I can truly recommend them to be a winner.

Yours respectfully,
G. W. BOWERS.

The Catalogs sent out by this firm since 1904 were made by The Arnstine Bros. Company.

Give us
an Opportunity to
be of
Service to you

Wellsville, N. Y.,
Feb. 13th, 1909.
THE ARNSTINE BROS. CO.,
Cleveland, Ohio.

Dear Sirs:—In answer to your inquiry of recent date will say that the Catalog you made for me was a beautiful book, nicely gotten up, giving very perfect illustrations which made a favorable impression.

Thanking you for past favors, and wishing you success, I remain,

Very truly yours,
GEO. J. MAGNER.

The Catalogs sent out by this firm since 1906 were made by The Arnstine Bros. Company.

STORE OF GEO. J. MAGNER, WELLSVILLE, N. Y.

We are represented in every State in the Union. If you contemplate using Catalogs, and will notify us, we will have our representative call on you and explain our proposition.

ILLUSTRATIONS ABOUT THREE FOURTHS SIZE

We beg to call your attention
to our extensive

Card Jewelry Line

consisting of medium priced

10K. Solid Gold Brooches, Scarf Pins,
Baby Pins, Handy Pins, Ear
Screws, Pendants, etc.

These goods are sold through the jobbing trade at very attractive figures. An examination and comparison will at once prove them to be ready sellers and profit makers in the stock of any jobber.

New patterns have been brought to a point of especial distinction, and all bear our mark of quality and reliability

It is our earnest desire to establish the same reputation for Finish, Originality, Quality and Reliability for this CARD JEWELRY LINE as is borne by our ring lines.

Samples will be cheerfully sent to jobbers and we heartily commend this line for a profitable business in 1909.

Simmons 1/8 12-Karat Vest Chains

THESE extra quality Simmons Chains will appeal strongly to those of your customers who want something better than ordinary grade gold filled chains.

In appearance, style and finish, Simmons ONE-EIGHTH 12K. Chains are fully equal to any solid gold chains, and are made in a wide range of patterns rivaling the best designs that have ever been shown in all-gold goods.

They will be particularly good Holiday sellers and your Fall stock should certainly include an assortment of them—order from any prominent Jobbing house, East, West or South.

The new SIMMONS CATALOGUE will afford you practical assistance when selecting your stock for the coming season. If by chance you did not receive a copy, write for it now.

NOTICE!

No increase in prices of Mesh Bags on account of increase in tariff. We manufacture our Mesh at our Works at Plainville, Mass., by the latest improved machinery. We are not dependent upon imported Mesh or importers as other manufacturers are. You will not receive notices of increase in cost from us.

Buy only
machine made
mesh which
is stronger,

smoother
and better
than hand
made.

American made goods are the best. We are the only manufacturers using Mesh made by machines, enabling us to supply all demands promptly for any quantity.

Ye Mount Vernon Pattern

MADE BY

ROGERS, LUNT & BOWLEN CO.

Silversmiths

GREENFIELD, MASS.

*Write
for
Catalog*

A fine setting enhances the beauty of the rarest and most costly jewels.

Likewise, a fine oak or mahogany chest makes a desirable setting for ye Mount Vernon pattern, a distinct Colonial gem.

We can furnish these chests to suit any combination desired.

The Dorothy Vernon

A NEW **WHITING** PATTERN
IN STERLING SILVER FLATWARE

Made in the Complete Line—Dozen
Work, Fancy Flatware, Cutlery—
Ready for Delivery September 1st.
Price Lists on Application.

IN its leading motive and the treatment of its details the new pattern is eminently suggestive of the English Renaissance designers of the 16th and 17th Centuries. It seems becoming therefore that it should be known by a name that not only recalls one of the most romantic episodes of the social history of that period, but is also intimately associated with the most significant existing example of English Renaissance Art and Architecture.

SILVERSMITHS BUILDING

15-17-19 MAIDEN LANE

NEW YORK

Have You Seen the Smith Exhibit at the Marlborough?

If not, we want you to, now, right away. It will be to your advantage, as well as our own, to do so. Our exhibit opened on August 15th, and it will continue till September 11th. It is conducted for the sole purpose of introducing to the trade the many new tea and coffee sets, child's goods, small dishes, etc., that we have added to the already extensive Smith line of Sterling Hollow Ware.

These goods are all bright and snappy. They are inexpensive. In fact, the prices are far better than we have ever before been able to quote for silverware of similar quality, design and weight. We seldom advertise prices in connection with Smith Silverware. You know us and our methods well enough to take our word for it that when we do we mean business.

Remember—Hotel Marlborough, New York City, till September 11th. We show samples of our complete line—Standard designs as well as the new goods.

STERLING 1000

An Invitation

TO JEWELERS when in New York a cordial invitation is extended to visit the New Salesrooms of this Company.

The location, in the recently completed Silversmiths' Building, constitutes a decided vantage point in the Jewelry District.

The additions to our lines this season are the most comprehensive and complete in the history of the company. Prices range from popular commercial goods to the highest class of products.

All the interesting lines of Silver-craft are here fully and attractively displayed in such a manner as to afford most convenient inspection. And their artistic beauty, fine workmanship and moderate prices will be found amply to justify the most favorable consideration.

Jewelers will appreciate the fact that all our products are confined exclusively to the legitimate trade.

Trade-Mark.

Ziruth-Unbreakable GOLD AND PLATINUM CHAINS

Are cheaper than those that claim to compare in quality and much better than those of equal price.

Are stronger, more flexible, better finished, finer shaped links, more beautifully colored, more carefully soldered and inspected than any other chain on the market and are so conceded by the trade.

They are plump 10K. and 14K. as stamped and fully guaranteed.

Of what value is the stamping law unless you assay your goods? We invite you to assay our chains.

Chains, cheap in construction are dear at any price and therefore you cannot afford to use machine made chains in place of hand made chains.

ZIRUTH-UNBREAKABLE HAND MADE CHAINS

are the cheapest because they are the best constructed on the market.

Our prompt deliveries of orders are the wonder of the trade.

Write us at once and our representative will call or we will submit samples and prices.

We cater to the manufacturing and jobbing trade.

DO NOT CONFUSE US WITH ANY FIRM BEARING SIMILAR NAME.

Novelties in 10K. Jewelry

While we make an entire Staple Line, this year we are showing in our Fall Samples the most artistic and novel effects ever produced in 10K. Jewelry.

THE FINISH of a JEWEL CASE The Beauty of the Best

HERETOFORE we have referred to the make and fittings of a Jewel Case. Important as these things are one cannot omit the matter of their Finish. The Cases illustrated in these pages line up in point of finish with the very finest products. For example the Finishes include popular Butler and Oxydized Brass, also Butler and Oxydized Silver as well as Green and Roman Gold. It is hardly necessary to emphasize the rich effects of our hand etching and other forms of decorative treatment which have created a style that is known and appreciated.

A Complete Line in Original and Artistic Designs
To the Jobbing Trade Only

MILTON L. ERNST

Twelve Dutch Street NEW YORK

DO YOU REALIZE what it means to manufacture gold chains of excellent quality and faultless construction and sell them at prices much below what the retailer ordinarily pays for chains of similar quality? It means that we have a well organized factory and prefer selling these chains ourselves directly to the trade, thereby giving you the benefit of what it would cost to maintain a necessarily expensive organization of traveling men.

THAT NEW CHAIN we are exploiting is solderless and flexible, without stringing, 15-inch lengths only. IT SELLS AT SIGHT.

Write for a sample.

THE ART OF DESIGNING.

By A. F. Saunders, in the *Metal Industry*, New York.

"One may do what'er one likes. In art, the only thing is to make sure that one does like it—which takes pains to know."—*Brown ing.*

It will be my aim in the following article to give a series of simple suggestions to the basis of design, trusting they will prove an aid to the metal craftsman who lacks the lack of some criterion or standard in his work. Also to assist him in forming sound judgment in question of design, both as to form and its decoration. His work must be founded on logical reason, and we must consider as most important thorough knowledge of the fundamental principles of design, as well as a thorough understanding of his material. Workmanship separated from thought inevitably decays or degenerates, while, on the other hand, design separated from workmanship necessarily unreal and falls into affection. Thus it is easy to understand how important an art training is to the artisan. The best aid to the workshop student is to study the old work stored in our museums, without intent to copy, but to gather ideas generally applicable. He will find such study not only helpful but most interesting, and it cannot but help in time to greatly influence him in his work; also study well the writings of such men as John Ruskin and William Morris—both have done much to revive the spirit of the old master-craftsmen in our modern work-

First, I shall endeavor to emphasize the important bearing form has upon the student's work. It is the base out of which develops the very life of the object. What constitutes form, shape or outline? Let us go back to the art of the ancient Greeks: what were their simple, yet beautiful standards based on? Take for example such utensils of daily use as the Cantharus, a vessel used as a cup. The Hydria and amphora, vessels for carrying water, storing wines, oils, etc. Articles of table use, such as the Cylinx, a most favored form of drinking cup, the Phiale and the Rhyton, thus used for ceremonial purposes, and numerous other beautifully proportioned articles of both utility and ornament, all mainly proving that this art-loving people considered the shape or form first of all, then decorating it in some simple yet harmonious manner. Never did they rely upon heavy or complicated masses of ornament indiscriminately applied for effect only, naturally they sought nature for inspiration, basing their individual taste and judgment upon what she offered. The Greeks were not extensive metal workers, as were the people of the middle

ages, but their work in clay certainly established a standard of beauty in both line and form that is well worth our most careful study. We may also go back to the primitive ages, races of which are practically still with us, our Indians of the southwest; here we have a people without art, tradition or conflicting theories of beauty, yet their utensils of daily use embody not only sound judgment as to utility, but also combine the very first principles of beauty, both in form and decoration; not a line but what had some significance, some serious meaning, while to us perhaps crude, nevertheless it conveyed a thought. They gathered both the inspiration and material from Nature about them, made with their own hands the very tools that wrought the simple products of honest construction and pleasing design. Surely the art of such a race came from their hearts. They could not help but produce objects of beauty.

In the preparation of an object there are two distinct phases: First, the evolution of form, then the application of decoration. The craftsman gets his first hint from the shape or outline of the object. This gives us the second principle that form should suggest the design, and if the form suggests the design it is equally true that use should suggest the form. These are simply fundamental principles that cannot be ignored if pleasing results are to be obtained. The student should begin with the sketching of various shapes of simple outline, such as cups, vases, bowls, in fact, any objects suitable to his line of work; perhaps a piece of jewelry, its outline is as much a factor and needs as much careful study as objects of greater size.

Keep always in mind the purpose of the object, its practical use, and never adopt originality for the sake of novelty; only also remember it is far less important that one should have accurate knowledge of each particular style or period than that he should have some standard of judgment and individuality to enable him to know the good from the poor. Careful study and practical experience alone can teach him this, as there are no fixed rules for beauty; it is a question of cultivating a faculty of perception, a sixth sense, so to speak. Thus he is able to produce it in his own way. In ending this article, I quote three fundamental principles as applying to form.

"That form is most beautiful that is most appropriate for its purpose."

Construction should be the origin of decoration and ornament.

Simplicity in composition is more difficult of attainment than complication.

The Gold Crown of Abyssinia.

A VERY curious specimen of African precious metal working for ecclesiastical use is shown on the front cover of this issue. It is the crown of the Abuna of Abyssinia, now preserved among other interesting objects in the British Treasury. The material is pure gold. Bands of chased openwork, showing saints and floral designs, encircle the crown, the shape of which reminds one of the tiara of the Pope. As a matter of fact, the Abuna ("our father") is the visible head of the Abyssinian church, which is national and independent. Christianity is still the professed religion of the majority of the Abyssinians, but it is not followed in its highest form, and is largely ceremonial. The doctrines coincide with those of the Coptic church, and the Abuna is ordained by the Coptic patriarch of Alexandria.

It is not stated when this tiara was brought from Abyssinia, but it is probably not as ancient as the Middle Ages. In it are represented the old Oriental traditions preserved in the distant provinces.

CHAS. A. BRASSLER.

Russian Platinum.

THE Ural platinum industries were, for a long series of years, in most cases encumbered with a contract which compelled the delivery of the entire output to the English firm of Matthey. As this concern paid a considerably lower price than the French firm of Bonardelle, with which the other portion of the Ural platinum industry worked, the mines have now finally determined to pay to the Matthey firm the penalty called for in their agreement and to dissolve the business connection between them.

The entire platinum industry in the Ural, organized, in combination with the firm of Bonardelle, who took shares to the value of 6,000,000 roubles, a joint stock company for the working of the Taglisk mines. This appears to relieve the industry of the trouble in regard to working capital, of which it had always stood in need. The minimal price for the pood of platinum was placed at 28,000 roubles.

From Ekaterinburg, where the gold industry held a convention, it was recently announced that the question of a monopoly of the platinum industry had been again raised.

O. A. Cooper and Louis Wagner, the two youths who were recently found guilty of robbing the jewelry store of H. W. Howe, Humboldt, Nebr., have been sentenced to the State Reform School. At the time of the robbery about \$100 worth of stock was stolen. Most of the loot was recovered.

FOR YEARS, MONTHS, WEEKS AND DAYS,

we have been making Signet Rings and are continually adding new patterns in both 14K. and 10K. gold, but not the same patterns in both qualities.

We are selling more of them than we ever did, because our stock of them is bigger, and better than ever before.

Large Size
No. 1679

Medium Size
No. 1798

This is a new 10K. Signet Ring made in two sizes, and in two finishes—Rose or English.

Design, finish and prices of all our Signet Rings are attractive to retail jewelers who want the best rings for the least money.

A Lecture by G. F. Herbert Smith, M.A., D.Sc. (Oxon) of the British Museum, Before the National Association of Goldsmiths, at London.

(Continued from issue of Aug. 18.)

THE success that attended the manufacture of ruby, encouraged efforts to impart other tints to crystallized alumina. By reducing the percentage amount of chromic oxide, pink stones were turned out, in color not unlike those Brazilian topazes, the original hue of which has been altered by the application of heat. With that unfortunate inexactitude which seems inseparable from the nomenclature of jewelry, the artificial stones accordingly received the name of "scientific topaz"; they were certainly not topaz, which is properly a fluo-silicate of aluminium, and science would disclaim such a blunder.

Early attempts made to obtain the exquisite blue tint of the true sapphire were frustrated by an unexpected difficulty. The coloring matter was not evenly diffused through the drop, but huddled together in splotches, and it was found necessary to add a considerable amount of magnesia as a flux before a uniform distribution of color was secured. It was then discovered that, despite the color, the tones had not the physical characters of a sapphire. Among others, Edward Hopkins, who takes keen interest in scientific questions connected with precious stones, noticed that they were softer than sapphire, lacked its dichroism, and had lower refractivity. He kindly sent for my inspection one of the familiar pear-shaped drops, on the side of which, for convenience of examination, a small facet had been ground. I found it to be singly-refractive, the index of refraction being far below that of corundum. I noticed further that the network of lines at the broad end of the pear was rectangular, instead of being triangular, as before, and discovered the position of the minute facets giving rise to the network corresponded to a cube-octahedron, and not a rhombohedron.

All those characters clearly indicated that these blue stones belonged not to the species corundum, but to one closely allied to it, namely, spinel, the aluminate of magnesium. Being unaware at that time of magnesia being used as a flux, and thinking that possibly the substance was a cobalt-spinel, I asked my colleague at the British Museum, Dr. G. T. Prior, to analyze a fragment. Since, however, he found much magnesia, and only a trace of cobalt, it was unnecessary to carry the investigation further, and no weighings were actually made. By an unsurpassable effort of nomenclature, these blue stones have been given the extraordinary name of "—sapphire," presumably from fanciful analogy with the famous blue diamond, once the pride of the —collection. I may add that they turn purple in artificial light, unlike the true sapphire, which retains its purity of color to a greater degree. A blue spinel is occasionally found

in Nature, but the actual tint is somewhat different.

By the addition of a little nickel oxide, yellow and yellowish-green stones have been obtained. The latter have in artificial light a distinctly reddish hue; and after our previous experience in nomenclature, we can scarcely feel surprise that they have been named "scientific alexandrite." The term is, of course, absolutely incorrect, the true alexandrite being a variety of chrysoberyl, the aluminate of beryllium.

Last year, L. Paris, using lime instead of magnesia as a flux, produced blue stones which retained their color better in artificial light. I have not had an opportunity of examining any of them, but understand that they are amorphous—i. e., a glass, and have not a crystalline structure; an unexpected result, since in minerals lime may replace magnesia without any interference with the character of the crystalline arrangement.

The high prices commanded by emeralds and the comparative success that attended the reconstruction of ruby from fragments of natural stones suggested that equal success might follow from a similar process with powdered beryl, chromic oxide being the coloring agent. The resulting stones are a fair imitation, but they are a beryl glass with lower specific gravity and refractivity than the true beryl.

I mentioned two instruments which may be used for testing cut stones, namely, the refractometer and the dichroscope. Since they may not be familiar to some of you, I have been asked to say a few words about them and their use.

The refractometer is employed, as the name indicates, to measure the refractive indices, which, within narrow limits, are constants for each species, and may roughly be defined as its capacity for bending a ray of light entering it.

TABLE OF REFRACTIVE INDICES OF PRECIOUS STONES.

Opal	1.454	
Moonstone	1.53	1.54
Quartz	1.544	1.555
Beryl	1.572	1.577
Topaz	1.618	1.627
Tourmaline	1.623	1.643
Kunzite	1.660	1.675
Peridot	1.659	1.697
Spinel	1.726	
Garnet (hessonite)	1.745	
Chrysoberl (alexandrite)	1.746	1.753
Garnet (pyrope)	1.755	
Corundum (sapphire, ruby).....	1.761	1.770
Garnet (almandine)	1.790	
Zircon (a)	1.815	
Garnet ("olivine")	1.885	
Zircon (b)	1.927	1.980
Diamond	2.417	

A glance at the table will show what a powerful means of distinguishing between the species we have in this method. The indices are almost entirely independent of the color; for instance, sapphire and ruby have practically the same values, and are, indeed, classified in science under the same species, corundum. Those species, for which two indices are given, are doubly-refractive, and have the power of splitting

up a ray of light entering a stone into two rays, which have in general differing properties. None of the gem-stones emulate Iceland spar in extent of double-refraction; but the opposite edges of a peridot, if viewed through the table-facet, will appear distinctly double, and even in the case of a substance such as quartz, with comparatively small difference between the extreme indices, the phenomenon may be detected by a keen eye.

In using the refractometer we may select any facet of a stone so long as it is flat; but the table is the most convenient, because it is the largest, and is usually accessible, even though the stone be mounted. A drop of methylene iodide is first interposed between the facet and the glass of the refractometer, to displace the film of air that would otherwise intervene and prevent an observation. Light is admitted into the instrument from underneath, and should, to avoid confusion, be excluded from the upper side. On looking down the eyepiece, we see a scale graduated directly to the second place of decimals of refractive indices.

We notice as soon as a stone is placed on the instrument, that a shadow covers the upper part of the scale and terminates in a curved edge, which is diffuse and colored in white light, but sharp and distinct in the yellow light of a sodium flame. The scale is so arranged that the position of the edge on the scale in yellow light gives at once the refractive index corresponding to the stone under test. The colored edge seen in white light is a spectrum of which the violet end passes into the shadow; and since the yellow and red portions of the spectrum are scarcely noticeable in the bright field, the edge appears green, and a reading taken at the bottom of it will be accurate enough for discriminative purposes. The apparent width of the spectrum varies inversely as the dispersion of the corresponding stone, and will, therefore, be the less the greater the "fire." Doubly-refractive substances show in general two edges simultaneously. If the stone be revolved on the refractometer, one or both of them will move up or down; the highest and lowest values obtainable are the principal refractive indices quoted in the table.

To explain why the edges move and the laws governing their motion, I should have to enter a somewhat difficult domain of physical optics; but in actual practice the instrument can be used quite satisfactorily without such extent of knowledge. In white light the doubling of the edge may not be apparent owing to the overlapping of the two spectra, unless the double-refraction exceeds the dispersion effect. Peridot always shows the separation distinctly, and may be recommended to the novice to experiment with. The liquid, methylene iodide, will serve only for stones of lower refraction than its own, namely, 1.742; for higher values it has to be saturated with sulphur. The range of the refractometer extends to 1.795, and does not, therefore, include diamond, zircon, certain garnets, among them being the so-called "olivine," from Russia. These species are easily recognized by the fact that the field shadow passes beyond the limit of the field, and they may be discriminated by their color

and hardness; a negative test is, therefore, of considerable value.

The two rays into which a doubly-refractive substance splits up a ray of light are then differently absorbed, and will appear on emergence differently colored; in such a case, the stone is said to be dichroic. A deep-brown tourmaline is the most striking instance, because, unless the stone be very thin, one ray is entirely absorbed. A dichroscope is a simple instrument for enabling us to view the twin colors side by side, and consists merely of a piece of Iceland spar, of such a length as to give two contiguous images of a square hole at one end of the tube containing it. The stone is placed before this opening, and turned until the greatest contrast of color is reached.

This test is very useful in the case of sapphire; its twin colors—purplish and yellowish—red—are marked and characteristic, and readily distinguish it from other red stones. Again, in the case of sapphire, one of the twin colors is distinctly more yellowish than the other, unlike the manufactured blue-spinel, the so-called "— sapphire," which shows no difference of tint whatever to the dichroscope. The test is, however, limited in its application, because, although any stone exhibiting dichroism is doubly-refractive, the converse is not true; no colorless stone, for instance, can possibly display the phenomenon.

(THE END.)

Career of the Late William R. Abbott.

DECATUR, Ill., Aug. 18.—William R. Abbott, who passed away at the home of Mrs. M. Carden, 332 West William St., Aug. 8, after a long illness due to hardening of the blood vessels, was said to have been the pioneer jeweler in this city, and was well known and highly respected in the trade. He had been in poor health for several years, due to a breakdown from overwork. For the last two years, he had been constantly under the care of physicians, so his death was not unexpected; though it proved a great shock to his many friends.

Mr. Abbott was born April 26, 1845, at London, Ont., in which place he spent his early life and received his education. In June, 1869, he removed to Decatur with an older brother and immediately started in the jewelry business, which for so many years bore his name. He continued in the jewelry trade until September, 1902, when, owing to his poor health, he sold his business, then located on Water St., to Herman Post, now head of the present firm of Herman Post & Son. Since that time he had not been connected with any enterprise. He deceased was a public minded citizen and was held high in the esteem of all who knew him. In church and fraternal circles, specially in the A. F. & A. M., he was prominent, and was a leading member of the First Methodist Church of this city. He was married Oct. 5, 1889, to Miss Hattie Greer, of this city, who survives him, as do our brothers and two sisters.

S. D. Weisbaum, Hanford, Cal., has just received his credentials from the State Board of Optometry. He is a member of the firm of Weisbaum & Sons, and is having quarters fitted up in the Weisbaum building at 111 N. Douty St.

Why Jewelers Should Come to New York and Buy Fall Stocks During the Hudson-Fulton Celebration.

There is a decided movement making itself felt in the New York jewelry trade to induce out-of-town buyers to visit the metropolis to do their Fall buying. A number of business houses have already issued pamphlets and other attractive reading matter giving the reduced railroad rates as provided by the Merchants' Association of New York, and at the same time setting forth the advantages to be enjoyed by a trip to New York this Fall. Strongly featured in this literature is the Hudson-Fulton Memorial Celebration, which will take place Sept. 25 to Oct. 9. Members of a number of prominent concerns in the Maiden Lane district, awake to the necessity of going after out-of-town trade, are working out schemes whereby buyers will be influenced to come to New York, and they feel that if the trade unites in this effort that the result will be advantageous to all concerned.

The attention of out-of-town jewelers is directed to the work of the Merchants' Association of New York, which has resulted in obtaining a full-fare rate to New York and a half-fare return trip ticket to buyers who are or will become non-resident members of this association. When buying tickets to New York, visiting jewelers should obtain from ticket agents a return trip certificate, and this return certificate serves as a voucher which must be deposited at the office of the Merchants' Association, 66 Lafayette St., immediately upon arrival in New York in order to take advantage of the reduced rate for the return trip. Those who are not already members of the Merchants' Association can become associated with this organization without any expense to themselves, and all merchants of good standing are eligible to membership.

The Hudson-Fulton celebration will be the most interesting and, in many ways, the grandest event of its kind which ever took place in New York, and will be well worth traveling miles to see. The commission having this great celebration in charge have outlined a programme which includes a grand naval and military parade, together with a large number of other interesting attractions. On Saturday, Sept. 25, the *Half Moon* and the *Clermont* are to be officially received into New York harbor, and in the evening there will be a grand night water pageant, together with the illumination of Riverside Drive. The military parade will take place on Thursday, Sept. 30, and there probably will be 25,000 men in line. The great naval parade will start from New York on Friday, Oct. 1, escorting the *Half Moon* and the *Clermont* up the Hudson River. There will also be musical, literary and historical ceremonies in New York and at all art galleries, museums, libraries, etc., will be held special exhibitions.

The out-of-town jeweler who wishes to purchase his Fall supply of merchandise can find no better time to visit the metropolis than during this week of unusual and interesting events. Jewelers interested may obtain any additional information desired by communicating with the Merchants' Association of New York.

Members of the jewelry trade in New York are showing considerable interest in the work of the Merchants' Association of New York, and there are already about 30 firms who are identified with this organization, and it is hoped that others will join soon.

Milwaukee Board of Public Works Still Refuses to Authorize Erection of Jewelers' Street Clocks.

MILWAUKEE, Aug. 18.—The refusal of the Board of Public Works to grant a jeweler a permit for the erection of a street clock has again opened the clock question to discussion. It seems that after a year and a half of futile effort the Common Council has been unable to pass a sign or clock ordinance and the clocks which have been erected on the walks since the crusade of more than a year ago have been put up without any authorization whatever. It is generally understood, however, that David S. Rose, Milwaukee's present Mayor, is not opposed to the street timepieces and that nothing will be done to prevent their erection.

The raid on Milwaukee's street clocks nearly a year and a half ago caused the political defeat of Sherburn Becker, the Mayor under whose direction the midnight destruction was carried on, and it is not expected that any city official will again oppose the erection of the clocks. Public sentiment, moreover, is also strongly in favor of the jewelers.

Sievers & Devers, York City, Pa., have moved back to their old location at 17 S. George St., where they now occupy a new building.

The store of M. C. Kittredge, 538 14th St., Oakland, Cal., was looted, recently, by a burglar, who stole about \$150 worth of stock. The burglar secured entrance to the store through the plate glass window, but was detected in the act of robbing the store and was frightened away. About \$200 worth of goods were left in the window.

A Review of the Jewelry Exhibits at the Paris Salons of 1909.

By W. Augustus Steward

(Continued from issue of Aug. 18.)

THE MEDALLISTS.

THE medal is again gradually becoming an important means of recording events, the passing tragedies, the domestic life of the people and the portraits of famous men. I am particularly pleased to see the making of medals so well followed, because of the fitness of the medium and the means it affords of giving the people an opportunity of acquiring a work of art at a small cost. Had Alexandre Charpentier spent his labors in the production of single pieces for the decoration of a rich man's home or the sculpture gallery his fame would have been circumscribed and his art have given considerably less pleasure; but every man of taste possesses a souvenir of that great French medallist, alas! now no

has sympathy and intuition, and as a result his portraits and his themes are invariably picturesque; but the work of Vernon is of the traditional type, softened by contact with the modern spirit, and so he remains in a different category to Yencesse.

The medallion of M. Fallières by Léon Deschamps should be mentioned, for it is a very good portrait of the President, though it fails to remind me of the genial, modest, homely figure to whom I was introduced at the Franco-British Exposition. Abel Lafleur is another follower of Charpentier, although he had his training in the atelier of Ponscarne. Lafleur's fine medal of "Diane," despite its softness, reminds one of his master's work, but in "Le Miroir," we see the influence of Charpentier. But the nude figure of the woman is not so

art, and as an interpreter of a type, Peter has been very successful.

NEW MOTIFS.

It had been thought that, with the advent of the automobile and the consequent displacement of the horse, the artist would lose one of his best incentives. Certainly the fire-engine, with its fine horses, can never be surpassed for effect by the motor

BROOCH BY R. LALIQUE.

engine; but M. Morlon has found a means of making a striking design for a plaquette, which he names *L'Automobilisme*. This, like his plaquette *Navigation Aérienne*, demonstrates the fact that an artist can get expression and pleasing effect out of the most prosaic and commonplace things. I like, also, the simplicity of the work of Niehausse. His depiction of humanity, as shown in his medal of a couple of French peasants, is as perfect as his technique. Jampolsky is another of the same school, imbued with the forceful spirit of Charpentier, and his portraits are as fine and free as one could wish. Nothing weak or wanting in feeling; just the humanity in metal. Louis Desvignes is a more conventional medallist, but his work bears a delicacy which appeals, and so we admire his "Charity" and "Harmony." Of the same school are Prudhomme and Lechevreil, though they are less successful as artists.

BRACELET WITH FISH MOTIF. R. LALIQUE.

more. He was the Rodin of medallists, and as such made a lasting impression upon the ancient art, for he led us away from the tradition which had narrowed the ideas or restrained the imagination of the medallist. Charpentier daringly left the beaten track, and forced upon the applied arts the lesson which great modern sculptors and painters had taught, that exquisite but niggling delicacy and scrupulous nearness to nature is not art, that such premeditation as the average medallist exhibited was lacking in the first essentials to artistry—perception and soul. Fortunately, his art has not died with him, for there are others who, having learned his great lesson, are carrying it on. Yvide Yencesse, the clever pupil of Ponscarne, is one of these. He does not take, as a rule, for his subjects the same motifs as did Charpentier, neither does he deliberately tread in his footsteps, for Yencesse has an individuality which compels expression. His popularity is of recent date, but it will be permanent, especially if he follows on the lines of "The Study," in which he fearlessly presents us with a very low relief, in which the heads of mother and child are almost full face. The difficulties of this were apparent, but the artist has overcome them, and given us a simple, homely, but charming medal, which will appeal to every class of society. Yencesse's plaquette for the Exposition Internationale de Milan is a simple artistic effort, while his portraits are genuine studies of those they represent. There is nothing photographic about them. It is the man they portray, not alone the flesh and bone. It is this quality which gives the charm to Vernon's fine medal of President Fallières. We see in this not only a sturdy, genial, hearty man of the people, but the personification of what makes the French Republic. M. Vernon

strongly rough hewn as Charpentier would have produced her, while there is a want of gracefulness in parts which spoils the symmetry of the figure. For all that, Lafleur is one who understands his art, as the figure of "Diane" shows us. The charming plaquette of "Daphnis and Chloé," by Lasserre is a fine specimen of the modern French medallist's art, and will lead us to expect a good deal more excellent

ANOTHER SPECIMEN OF THE ART OF R. LALIQUE.

work of this type from the author. The arrangement of the figures and their graceful pose, together with the pleasant background, shows the poesy which M. Lasserre can put into metal. Of quite a different type is the medal by V. Peter for the Société des Peintres Orientalistes. The pose of the figure is daring and successful, and it possesses all the sensuous attributes which are so often associated with the East. As a demonstration of his knowledge and

Technically perfect, their work lacks soul. Two comparatively new comers into the medallist's craft have some very interesting work to show. They have already secured fame as gem engravers, but if they maintain their excellence as medallists, the ancient, but, alas! little patronized art of the gem engraver will lose two of its most brilliant exponents in M. Gaulard, who exhibits a plaquette, "Melunaise Archaeology," and M. Tonnellier, who has caught a very good

DIAMONDS LA VALLIERES

Nothing is more popular to-day than La Vallieres; consequently nothing sells so well.

To meet the demand, we have prepared an elaborate stock of unique and exclusive designs, in all combinations, at prices ranging from \$15.00 to \$1,500.00.

CURTIS, PINOVER & SCHNEIDER CO.

10 West 23d Street, Corner Fifth Avenue, NEW YORK

likeness of a colleague, M. Hahn. M. Roques is an artist who, in "The Woman Combing Her Hair," embodies just that suggestion of womanly vanity which gives life to the effigy, while "The Woman with the Peacock" emphasizes it, and pleases us by the subtle wit which underlies his composition. Henri Nocq, who is not particularly good as a jeweler, has found his forte in the medal, for he carries into this quite a different quality to that employed in his designs for jewels. His medals are particularly careful, which is more than one could say for his jewels. Stay, therefore, I would say, at the modelers' stand, and con-

given brilliance to science, politics, and art in their day, and the great part the medallist's art had played in perpetuating their memories. One of the most successful portrait medals that Charpentier ever produced was that of Emile Zola, the great novelist. But this is, perhaps, a somewhat unjudicial way of viewing the work brought together, for, after all, his widow had rather striven, I think, to show the progress of his art, and, while perhaps some of the work is not so brilliant, so full of life and quality as other specimens, it is because, when he produced it, he had not yet found himself. Alexandre Charpentier has passed

which is a pity. The financial crisis has passed, a brighter trade atmosphere has prevailed, while the political situation held nothing to disturb, and yet—there is a want of ambition and nerve which must be regretted. It may be only a passing stupor, an arrested movement, from which craftsmen will triumphantly free themselves and make manifest their full abilities. Anyway, the appearance of retrogression will not help the very desirable end of educating the public. They need it badly. So far as the crafts of the jeweler and silversmith are concerned, it is mainly by practical demonstration of the value of craftsmanship that this can be done. The craftsman should find in the medium he fashions a means of expressing the best that is in him; he is sometimes restrained by lack of encouragement and by economic or social conditions, but the true craftsman will take his art above his environment, and thus lead where others can only follow. It is when we find that there are very few doing this that we have cause for uneasiness. But, so far as French craftsmen are con-

COFFEE SET BY LUCIAN GAILLARD.

tinue to produce work like "Jacqueline Therin," and portraits of the quality of Aristide Briand, when Minister of Justice, who looks what he is now—a leader of men, and next in power to the President himself.

The French lament that more foreigners do not exhibit in the Salons, but among those who did was Spicer-Simpson, who had made a fine study of Britain's famous novelist, George Meredith. And now a word or two concerning the women medallists. Foremost, I think, I should place Madame E. R. Merignac, who exhibited medals, or plaquettes, with strikingly characteristic provincial types of women. Many Britishers know the lively and handsome "Boulonnaise." Madame Merignac has given us a typically fine ideal of the women of Boulogne, making the most of the delicate but handsome head-dress as a decorative adjunct to the subject. The "Olonnaise" and "Vendienne" are also excellent types, which have found, in one of their own sex, a sympathetic and clever portray-er. Mdlle. Genevève Granger is a clever modeler, and knows the essentials to good portraiture, while she can deal in an able and fascinating way with domestic subjects, as her plaquette of the "Child With Cats" shows.

THE PASSING OF CHARPENTIER.

And now one must pay, possibly, the last public respect to the memory of Alexandre Charpentier. His widow had thoughtfully collected a number of representative works for exhibition this year, and not only were these indicative of the great medallist's ability and breadth of his activities, but formed a regular gallery and history of modern authors, artists, and public men. To look at the various medals is to call to mind the memory of those who have

away, but his work and his influence will remain for all time as a guide and encouragement to those who follow the fascinating work of the medallist.

REFLECTIONS.

It is satisfactory to feel that the art of the medallist is so well represented, and

PENDANT BY GRANGE.

that it is being taken up so earnestly, for the exhibits in this direction help to relieve the situation, since, unfortunately, one is compelled to again pass the same criticism—viz., that, in the main, the exhibits in the Paris Salons are unsatisfactory. Last year I remarked that they were lacking in quantity and quality, and "that life and movement which everyone expects from French artist craftsmen." Still, the same inaction seems to hold the bulk of them;

PENDANT BY DERAISME.

cerned, I think and hope it is only a period of rest, and that the comparative paucity of really fine work in the Paris Salons of 1909 will be followed by a richer and more satisfactory display in the coming year.

(THE END.)

(NOTE.—We present herewith illustrations of a few of the best pieces exhibited by such artists as Lalique, Gaillard, Deraisme, Grange, etc., which bear out what Mr. Steward says about the appearance of "retrogression" in the jewelry shown this year. Though these specimens are beautiful, they mark no step forward in the art.—EDITOR.)

Silberberg Bros., El Paso, Tex., will shortly move from the location which they have occupied for so many years in that city, having secured a 10-years' lease on property in the heart of the business district, where they will remodel the building to their requirements. It was on account of their rapidly growing business that this firm was forced to give up the old quarters, even though they had limited their efforts to dealing exclusively in diamonds and high-grade jewelry. As the concern is now about to extend its field and conduct a jobbing and retail business, taking in all lines which customarily come into the jewelry trade, the old quarters can no longer be used for their purpose.

Reconstructed Rubies

There are RUBIES and RUBIES. For OURS we claim the foremost place in the Scientific Stone market.

We have succeeded in developing the Reconstructed Ruby to the highest possible standard, improving it irrespective of effort and cost. In the purity of material, its uniformity of color and shape, correctness of size and brilliancy of finish, OUR RUBY has positively no equal.

We were the first to make the Reconstructed Ruby popular, introducing it in all the variety of MODERN SHAPES and DESIGNS.

Our stock is the LARGEST and BEST in the country and will be found pre-eminently suitable for the use of the LARGE MANUFACTURING JEWELER.

When buying Rubies, GET THE BEST. They cost no more.

JEWELERS BUILDING, 373 WASHINGTON STREET, BOSTON, MASS.

Abraham Goldman, Pittsburg, Pa., Goes into Voluntary Bankruptcy with Large Nominal Assets.

PITTSBURG, Pa., Aug. 21.—Abraham Goldman, a dealer in jewelry, leather goods and novelties, has filed a petition in voluntary bankruptcy in the United States District court. His schedules show that the liabilities total \$25,936 and the assets are said to be about \$28,799.40. Goldman appears to have borrowed a large amount of money from numerous people in the hope of overcoming his difficulties. These loans cover a period of about three years.

A list of the principal creditors include: Meyer Bros., \$150; New Haven Clock Co., \$10; Max G. Cohn & Co., \$166; Frank & Gutman, \$86; Semmings Mfg. Co., \$56; Rac & Keeler, \$131; Warburg & Schwartz, \$144; H. Lakner Mfg. Co., \$62; E. Bennett Co., \$87; H. Margolin & Co., \$5; Ulton & Cook Co., \$119; Standard Cotton Co., \$245; Schofield, Battey & Co., \$53; Kingsbacher Bros., \$413; W. H. Wilmarth & Co., \$166; Attleboro Mfg. Co., \$3; Fletcher, Burrows Co., \$165; Marden Kettley, \$139; E. S. McLaughlin & Co., \$46; J. D. Berg & Co., \$86; J. Schwartzkopf & Co., \$113; Fashion Comb Co., \$137; Geo. Frost & Co., \$88; Arthur Frankenstein Co., \$93; Crescent Garter Co., \$92; W. A. Murdy Mfg. Co., \$165; Bradley & Hubbard Mfg. Co., \$58; A. Bushee & Co., \$98; C. Wolfson & Co., \$77; Biggard & Co., merchandise and cash \$682; Eisenstock & Co., \$65; Peerless Mfg. Co., \$69; Robbins Prokesh, \$162; Pacific Belt Co., \$85; Tidprett & Saecke, \$94; Capron & Co., \$35; G. H. Oppenheim (insurance and trusts) \$200; Poole Silver Co., \$194; Shener Bros., \$77; Mackey & Elias, \$125; Silverman Bros., \$73; Liberty Garter Co., \$166; Providence Mfg. Co., \$75; International Silver Co., \$126; Colonial Jewelry Co., \$188; I. Smith Co., \$102; Freudenheim Bros. Levy, \$888; L. Caplan, \$150.

Creditors from whom the bankrupt borrowed cash are: H. S. Banov, \$300; Ida Kurwitz, \$700; Jenny Goldman, \$2,000; Ruby Goldman, \$100; W. Windt, \$200; S. Caplan, \$100; J. H. Futterman, \$200; Dr. Harry Kaufman, \$250; L. Gordon, Jr., \$200; Morris Jaffe, \$150; L. Rosenfield, \$125; Roth Bank, \$150, all of which amounts were borrowed in 1907, 1908 and 1909. The bankrupt is also indebted to the Aronson Realty Co. \$100 for rent. The following are wage claims: Charles Stewart, \$165; J. Hurwitz, \$48; Lilly Goldman, \$120; J. Goldman, \$200.

Mr. Goldman is the owner of the house and lot at 2574 Wylie Ave., on which M. Gildberg holds a mortgage for \$2,500; Edith Brown holds a second mortgage of \$200 on the same property. M. Gildberg originally made to Jacob Goldman and assigned to said creditor on property above named, \$1,000.

The Wylie Ave. property is valued at \$5,000. Goldman also carries two life insurance policies, one in the New York Life Insurance Co., and the other in the Mutual Life Insurance Co., but his schedule sets forth that the policies have no cash value. His stock of the bankrupt is listed as worth \$15,000. He has outstanding accounts which are due and collectible, amounting to \$1,000. It is said that his inability to

realize on these was partly responsible for his financial troubles.

No receiver has as yet been appointed to take charge of the bankrupt's affairs, but one is expected to be named within a few days. Some of Goldman's largest creditors are Pittsburgers, and nearly all of those from whom he borrowed money, live in this city.

Death of Chas. Henri Jacot.

Charles Henri Jacot, for many years treasurer of the Jacot Music Box Co., 39 Union Sq., New York, and well known to the jewelry trade, died last Wednesday at Stapleton, S. I. The funeral was held from his late residence, 219 Ward Ave., on Friday afternoon at 2 o'clock. Mr. Jacot suffered from a shock about three years

WOMAN ABOUT WHOM THE COLUMBUS, O., POLICE ARE SEEKING INFORMATION.

ago and since that time had not been actively connected with the business.

Mr. Jacot was born in Switzerland 71 years ago. He came to this country about 1870 from St. Croix and somewhat later opened a place of business on Maiden Lane, New York, and there represented the firm of Mermod Freres, St. Croix, Switzerland, who are large music box manufacturers. The firm style was Jacot & Son, Albert H. Jacot, a son, being connected with his father in the business. May 1, 1889, the firm moved from Maiden Lane to 298 Broadway, and on March 1, 1894, from Broadway to 39 Union Sq., the present location. The business was incorporated June 18, 1900, under the style of the Jacot Music Box Co., with a capital of \$10,000, the officers of the company being Lewis Mermod, president; A. H. Jacot, secretary, and Chas. H. Jacot, treasurer.

Deceased was skilled in the making of watches and this knowledge was of much use to him in the conduct of the music box business. He received a gold medal from Paris Exposition in 1900 for improvements in music boxes, the medal being awarded to Mr. Jacot for individual work. He was an interested church and Y. M. C. A. worker, and was always active in this work.

A widow and two sons, A. H. Jacot, who is connected with the business, and August Jacot, Bridgeport, Conn., survive the deceased.

C. M. Morrison, formerly in business at Coon Valley, Wis., has moved from that place to Viroqua.

Columbus Police Seek to Identify Woman Arrested with Man Thought to Be a Jewelry Thief.

COLUMBUS, O., Aug. 20.—The police of this city are making a strong effort to identify Gertrude Brown, who was arrested here in company with S. A. Reid, the man who was accused of stealing a watch from Albaugh & Pickering. The woman's photograph will be sent throughout the country to the police to see if she is known in other cities. The local police suspect her of being a professional thief; they have apparently no evidence that she has been implicated in the crime.

The woman has red hair and her face is covered with freckles. The portrait shown herewith is a fair one, but was taken only after she had made a strong fight with

the photographer, from which she did not desist until threatened with a straitjacket.

As noted in the last issue of THE JEWELERS' CIRCULAR-WEEKLY, Reid was taken into custody while trying to sell some rings in a pawnshop, and the woman was later arrested on suspicion. Among Reid's effects were found a quantity of jewelry and also some tools which, the police say, are burglar's tools. The local police sent to Cincinnati and Louisville, in the belief that the couple had been to these cities and had been operating there.

Though many unset jewels and jewelry have been found, the only piece identified is the watch stolen from Albaugh & Pickering.

Death of Alfred L. Petren.

GRAND RAPIDS, Mich., Aug. 18.—Alfred L. Petren, who dropped dead of heart disease, at his home, Wednesday morning last, had for years kept a jewelry store in this town, at Wealthy Ave. and Charles St.

Mr. Petren, who lived behind his store, had apparently been in his usual health until the day of his death. Early in the morning of Aug. 11 he went into the kitchen, where a short time later his wife, who heard him calling, found him lying on the floor in great pain. A physician was hurriedly called, but before his arrival Mr. Petren breathed his last.

Mr. Petren had been in the jewelry trade a long time and was well known as a watch repairer.

J. P. Bolding, Terrell, Tex., has sold his store to T. J. Hines and will locate near San Angelo in the same State.

Death of William Bens.

PROVIDENCE, R. I., Aug. 19.—William Bens, head of the William Bens Co., manufacturing jewelers, at 95 Chestnut St., this city, died at his home, 18 Lillian Ave., yesterday in the 58th year of his age, after an illness of several months, from heart disease and dropsy.

Born in Cologne, Germany, March, 13, 1852, Mr. Bens attended the public schools until he was 13 years of age. He then came to this country with his parents and entered the employ of T. I. Smith & Co., North Attleboro, Mass., where he learned the jewelry business. He came to this city in 1880 to accept a position in the employ of Foster & Bailey, the predecessors of the Theodore W. Foster & Bro. Co.

In 1891 Mr. Bens withdrew from the employ of Foster & Bailey for the purpose of entering the manufacturing jewelry business on his own account, starting at 129 Tiddy St., with a line of ladies' plated goods. His business gradually increased and he removed his shop first to 102 Friendship St., afterward to 107 Friendship St., and then to 44 Pine St. Here he remained until 1905, when his business had so far outgrown his activities that he took a factory in the Irons & Russell building, on Chestnut St. The year previous to the latter removal the firm was incorporated as the William Bens Co., with Mr. Bens as the president. The concern was well known throughout the trade as manufacturers of sterling silver novelties and manicure sets.

Mr. Bens was married in North Attleboro, June 4, 1881, and is survived by his widow and four children, two boys and two girls. He was a member of Redwood Lodge, A. F. & A. M., the Germania Club, The Harugari Lodge and also the Deutsche Gessellschaft.

Providence, R. I., Police Looking for Swindler Who Sells Imitation Diamonds as Genuine.

PROVIDENCE, R. I., Aug. 21.—Some time ago a stranger came to this city in an automobile and disposed of a lot of diamonds that proved to be worthless at the loan office of Colitz & Kaplan, 735 Westminster St. Yesterday a stranger, also in an automobile, drove up to the shop of A. Colitz, Woonsocket, and entering the place, tried to induce the proprietor to buy some fine diamonds in bulk. As A. Colitz is a relative of the senior member of Colitz & Kaplan, and had known all about the latter's experience, he became suspicious and notified the police.

As there was no warrant for the man in Woonsocket, Sergt. Monroe communicated with Deputy Chief Inspector Nickerson, of this city. The Deputy asked that the man be apprehended and sent Inspectors Haran and Caffrey out to Woonsocket to see if the diamond broker was the one that was wanted here. When the Woonsocket police went out to get the suspect, however, they found that he had gone.

The Pawtucket police were notified, and in a short time they had the man and automobile at the police headquarters in that city. The Inspectors from here brought word to this city, and after being questioned by Deputy Chief Nickerson at headquarters, he was taken over to the shop of Colitz &

Kaplan for identification. One look, however, convinced Mr. Colitz that he was not the man who had sold him the bogus diamonds some time ago.

The stranger, moreover, convinced the inspectors and Mr. Colitz that he was doing a legitimate business and he was allowed to depart. The man, whom the inspectors would like to capture, is wanted not only in this city, but also in Fall River and New Bedford. His diamonds are an excellent imitation of the genuine gems, and the stranger is said to have sold many of them to merchants in the three cities.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., Aug. 18.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Basle: 1 case jewelry, \$275.
 Berlin: 5 cases clocks, \$240.

 Bremen: 1 case jewelry, \$200; 1 case plated ware, \$135; 3 cases watches, \$3,596.
 Buenos Ayres: 1 case jewelry, \$206; 32 cases plated ware, \$3,745; 2 cases watches, \$1,276; 112 cases clocks, \$3,369; 23 cases clocks, \$185; 25 cases watch machinery, \$871.
 Cavaddello: 2 cases optical goods, \$149; 6 cases watches, \$170; 8 cases clocks, \$1,131; 5 cases jewelry, \$199.
 Christiania: 7 cases clocks, \$374.
 Coion: 7 cases plated ware, \$264.
 Glasgow: 31 cases clocks, \$632.
 Guayaquil: 1 case plated ware, \$109; 5 cases clocks, \$148.
 Hamburg: 1 case jewelry, \$100; 2 cases watches, \$3,927; 1 case plated ware, \$350.
 Havana: 2 cases plated ware, \$259; 5 cases optical goods, \$415; 6 cases clocks, \$132; 4 cases jewelry, \$617.
 Havre: 7 cases jewelry, \$678; 1 case optical goods, \$100; 49 cases clocks, \$789.
 Kingston: 2 cases clocks, \$100; 1 case jewelry, \$142; 4 cases optical goods, \$217.
 La Union: 2 cases jewelry, \$126.
 Limon: 22 cases plated ware, \$215; 2 cases jewelry, \$205.
 Liverpool: 4 cases watches, \$604; 124 cases clocks, \$1,947.
 Lisbon: 40 cases clocks, \$425; 30 cases clocks, \$1,690; 1 case plated ware, \$115; 16 cases watches, \$2,933; 1 case scopes and views, \$186; 14 cases optical goods, \$8,287; 5 cases optical goods, \$1,624; 6 cases optical goods, \$667; 15 cases watches, \$2,330; 168 cases clocks, \$1,159; 32 cases clocks, \$867.
 Manchester: 10 cases clocks, \$500.
 Melbourne: 44 cases plated ware, \$2,679; 58 cases clocks, \$678.
 Montevideo: 19 cases clocks, \$437; 2 cases plated ware, \$196; 2 cases plated ware, \$155.
 Para: 63 cases clocks, \$1,359; 4 cases jewelry, \$846.
 Rotterdam: 8 cases clocks, \$117.
 Port Barrios: 2 cases plated ware, \$230.
 Rangoon: 44 cases clocks, \$675.
 Rio de Janeiro: 103 cases clocks, \$2,718; 1 case optical goods, \$322.
 Rouen: 6 barrels jewelers' sweepings, \$5,400.
 Salevary: 1 case silverware, \$104.
 Tampico: 2 cases thermometers, \$179; 1 case plated ware, \$227.
 Trinidad: 1 box jewelry, \$350.
 Valparaiso: 3 cases plated ware, \$470.
 Vera Cruz: 19 cases clocks, \$464.
 Vienna: 5 cases clocks, \$300.
 Yokohama: 17 cases clocks, \$455.

A new catalogue and price list of jewelers' and metal workers' tools, machinery and supplies has been issued by the American Oil & Supply Co., 52-58 Lafayette St., Newark, N. J. It is a book of 638 pages, is arranged alphabetically, is compact in form and illustrates and describes all the goods made by this company.

Prominent Attleboro Colorer Hurlled to Death While Trying to Fix Machinery in His Factory.

ATTLEBORO, Mass., Aug. 21.—George Winfield Kelly, a well known and popular young business man, was caught in a shafting on the roof of his coloring and electroplating establishment, on County St., last Tuesday afternoon, and instantly killed.

A belt that kept slipping from a pulley on the main shaft was the cause of the accident. Mr. Kelly determined to remedy the matter, and, calling the engineer, Jas. L. Sylvester, he went upon the roof to make the repairs. In some manner his linen duster and heavy overcoat became wrapped around the rapidly revolving shaft and he was hurled to the roof with great force and instantly killed. Sylvester hastened to shut off the power, but it was too late.

Deceased was born in Providence, July 16, 1880, and when a young boy his parents moved to Attleboro Falls, where he passed the greater part of his life. By trade he was a colorer, and five years ago, with his brother, James, opened a coloring and electroplating establishment in the W. D. Wilmarth & Co. building, on County St. About two years ago James retired from the business, and since that time the deceased has been sole owner. Under his supervision the business had rapidly grown until it is now in a flourishing condition.

Mr. Kelly was married and is survived by a widow and son, George W. Kelly, Jr. The funeral was held, Thursday morning, with services at St. Mary's Church, North Attleboro, and interment was in St. Mary's Cemetery. The church was filled with mourners and the floral gifts were very numerous and beautiful.

Creditors File Bankruptcy Petition Against the William C. Greene Co., Providence, R. I.

PROVIDENCE, R. I., Aug. 21.—An involuntary petition in bankruptcy was filed in the United States District Court yesterday against the William C. Greene Co., manufacturers of gold jewelry at 101 Sabin St., this city, and upon a petition a hearing will be given before Judge Arthur L. Brown, Aug. 25, at 10 o'clock.

The petitioning creditors are Nelson B. Whitaker, of Seekonk, with a claim of \$1,065 with interest, represented by three promissory notes, dated May 1, 1905, for \$285, at six per cent.; Jan. 1, 1906, for \$180, and Feb. 1, 1909, for \$600; A. Josephine Fry, of Cranston, whose claim is \$3,000 on a promissory note, dated April 30, 1907, and N. Perry & Co., of Attleboro, with a claim of \$2.63 for labor and material in carpentering work.

It is alleged that the William C. Greene Co. committed an act of insolvency April 19, 1909, when John A. Straight, of Straight & Conley, refiners, of this city, was appointed receiver. It was claimed by Straight & Conley that they were stockholders in the firm of William C. Greene & Co., and it was upon their petition that Mr. Straight was appointed receiver. The firm is one of the oldest in this city, and was for many years located at 95 Pine St.

C. Buchanan has succeeded R. M. Adams, Gage, Okla.

by the Richter Mfg. Co., to engage in the
manufacture of jewelry and silverware, with
a capital stock of \$40,000, at Providence,
R. I. The incorporators are: George C.
Richter, Victor F. Richter and Thomas A.
Carroll, all of Providence, R. I.

Jeweler of St. Louis, Mo., Struck Down and Robbed in His Store.

St. Louis, Mo., Aug. 23.—While South
Broadway was crowded with shoppers, on
Saturday afternoon, robbers entered the
store of "Gus" Scholl, in the guise of pur-
chasers, and after beating Mr. Scholl into
insensibility picked up \$100 worth of jew-
elry and walked out.

Mr. Scholl conducts a small jewelry store
at 1321 South Broadway. He was stand-
ing at his counter when a man entered and
asked to be shown some diamond rings.
A moment later another man entered and
said he wanted to buy a heavy gold band
ring. The first man was willing to wait
and the jeweler took a tray of gold rings
from a case and placed them on the coun-
ter. As he did so the man who had en-
tered first dropped his right hand to his
side and an iron bar slipped from his
sleeve to his hand. The man struck Mr.
Scholl on the head with the bludgeon and
as he staggered back a second blow felled
him.

When Mr. Scholl regained his senses the
robbers were gone, as were a pair of dia-
mond earrings valued at \$50, a \$20 stud and
a \$35 ring. Scholl called for help, and
after he had been treated by a physician
was taken to his home, at 3936 Cleveland
Ave., suffering from concussion of the
brain.

Two men were later arrested on descrip-
tions furnished by Scholl, but were re-
leased.

E. W. Meck, Fort Plain, N. Y., has re-
signed his position with A. Dunn & Sons
and will go to Detroit Sept. 1 and devote
his time to the manufacture of a thermo-
stat which he has invented.

Death of Karl J. Einig.

TOLEDO, O., Aug. 18.—His associates in
the jewelry trade as well as the many
friends in this city learned with deep re-
gret, last week, of the death of Karl J.
Einig, second vice-president of the Mer-
rill & Broer Co., wholesale and manufac-
turing jewelers. Superior and Adams Sts.
Mr. Einig, who is but 29 years old, passed
away at his home in Fremont, Aug. 11,
after an illness of a few days. The fun-
eral services were held from that town.

Mr. Einig was the son of Mr. and Mrs.
M. B. Einig, Cleveland, O., and was born
in Ashtabula in 1880. At the age of 15 he
obtained employment with the Bowler &
Burdick Co., Cleveland, and after working
there for some years engaged with the
Scribner & Loehr Co., of the same city. In
1905, when the Merrill & Broer Co. was
formed, Mr. Einig became one of the or-
ganizers and was elected second vice-
president of the concern, his associates
being C. Kenneth Merrill, Wm. H. Broer
and Will F. Broer.

For the local firm Mr. Einig traveled
through the southern part of Michigan,
northwest Indiana and Ohio, and among
his customers as well as business asso-
ciates he was exceedingly popular and
was noted for his genial personality and
other winning ways. His death is consid-
ered a distinct loss to his concern. He was
prominent in fraternal circles, especially in
the Knights of Columbus, of which he was
a member of the Toledo Lodge.

The deceased was married about a year
ago to Miss Elizabeth Deran, of Fremont,
at which town he had made his home. His
widow survives him.

George W. Harris, Earlville, N. Y., Goes into Voluntary Bankruptcy.

UTICA, Aug. 12.—George W. Harris, a
jeweler at Earlville, N. Y., filed a petition
in voluntary bankruptcy in the United
States District Court to-day, scheduling li-
abilities of \$2,244, including \$450 due se-
cured creditors and \$1,794 unsecured cred-
itors. The value of the assets is placed at
\$720 and includes a stock valued at \$200,
machinery and tools \$200 and property
claimed as exempt \$250.

The First National Bank of Earlville is
the only secured creditor. Its claim is for
\$450, and it is secured by a chattel mort-
gage upon Harris' store fixtures, tools, etc.
W. D. Andrews, of Earlville, has secured
a judgment for \$237 against Harris, and
among the other creditors with claims un-
secured are: The W. P. Hitchcock Co.,
notes for merchandise aggregating \$1,209;
James H. Morse Optical Co., \$25; M. J.
Averbeck, notes, \$180 and \$81; Carl
Fischer, \$68; C. L. Taylor, \$50; McKinley
Music Co., \$58. Among other creditors of
the bankrupt are: American Publishing &
Engraving Co., Knickerbocker Watch Co.,
N. J. Felix, W. H. Terhune, Leo Feist, H.
A. Whiteman & Co., F. A. Davis Co., J. H.
Remick & Co. and F. M. Pudam.

Virgil T. Ellis has moved from Bab,
Ark., to Ellsville, in the same State.

Charles E. Rose, Telluride, Colo., has
disposed of his stock at auction and moved
to Norwalk, Pa., for a much needed rest.

Artistic Designing

The jewelry designer's art ranks very high to-day, and his productions far excel those of a few years ago, appealing directly to that which is most ennobling in man—the taste for the beautiful—his is a very broad field of endeavor.

He must have business ability as well as artistic skill, for to be a commercial success the price of an article must be attractive as well as the design.

Our productions are good examples of skillful designing, and by comparison you will find our

aring Robbery of a London Silversmith and Jewelry House Frustrated in Time.

One of the most daring and carefully planned robberies in the annals of the jewelry trade was reported from London, England, today. According to the account, 10 men were engaged in the attempt, the victims being Mappin & Webb, well known silversmiths and goldsmiths, whose establishment is close to the Bank of England and the Royal Exchange.

Jewelry, valued at \$35,000, had come into the possession of the thieves and was packed up ready for removal, when the plans of the men were frustrated by the fact that the watchman, whom they had intended, bound and gagged, escaped from the building and his cries brought the police. About 3 o'clock in the afternoon, the watchman appeared in the door in a battered condition, yelling for help, and at the same moment four men ran out of the store and escaped in a cab. The police, who arrived on the scene, arrested six others.

Smith, the watchman, was taken to the hospital in an unconscious condition, and is not able to talk until evening. He expressed the belief that the robbers entered the building by means of a false key.

"I was having dinner about half-past 2 o'clock," he said, "in a room adjoining the long room, when I heard footsteps. Almost immediately I was struck on the head with a 'jimmy' and knocked off my chair. A number of heavy blows followed and I collapsed. When I came to myself I found that I was bound to a chair, but I managed to unfasten the ropes and scrambled to the door and raised an alarm. There were 10 men concerned. All were smartly cessed."

Smith's injuries are very serious. Three of the arrested men, when searched by the police, were found to have in their possession jewels estimated at a value of many thousands of dollars.

Paris Pearl Market.

PARIS, Aug. 12.—Business in the pearl trade in the city continued very active during July and sales were made on a larger scale than formerly, and with greater facility than at any time since the resumption of business. The prices obtained in all cases were thoroughly satisfactory, the market being strong and an important increase being noted in certain lines.

A remarkable feature of the market during the month lay in the fact that all qualities of goods, from the cheapest to the best, were in demand and sold. A number of buyers from foreign countries contributed to the improvement. It can truly be said that July has made the best showing of any month since the financial crisis, and the business done during that month established a record in the pearl market for that season.

The holiday season is coming and merchants are now arranging for their departure so that during the latter part of August and the beginning of September business is apt to drop off, as many of the shops will be closed; however, everyone looks forward to the Fall with great encouragement.

As far as colored stones are concerned, business is going on regularly and dealers have as much as they can attend to.

There will probably be a change in the carat weight, as the Government has decided to introduce a metric carat. This will probably be adopted in other countries so that the carat will be uniform all over the world. G. K.

Death of A. Scholandt.

DALLAS, Tex., Aug. 20.—Telegraphic advices received in this city announced last week the sudden death of A. Scholandt, a prominent jeweler of Columbus, Tex. According to the despatch Mr. Scholandt while suffering from the heat fell out of the fifth story window of a prominent Houston hotel.

The deceased, who was about 50 years old, was widely known in the jewelry trade, in which he had acquired a competence. He had been connected with the industry in Texas for over a quarter of a century and had been located in Columbus since 1885. The news of his death caused profound regret in the trade in this city, where he had many friends and acquaintances and was exceedingly popular.

Gettysburg Jewelry Co. in the Hands of an Assignee.

GETTYSBURG, Pa., Aug. 31.—Carrie L. Stine, doing business as the Gettysburg Jewelry Co., of this city, made a general assignment yesterday, under the State law, for the benefit of creditors, naming W. S. Schroder as assignee. No schedule of the assets and liabilities has been filed.

Mrs. Stine is the wife of J. H. Stine, who acts as the manager of the concern. She commenced business in Gettysburg in March of this year, succeeding Penrose Myers, and since that time has built up a trade in jewelry and souvenirs.

Chas. J. Scholler, Van Wert, O., has been awarded the contract to supply the illuminated dials for the local Court House clock.

News Gleanings.

Among the petitions in bankruptcy filed in the United States Court in Utica, N. Y., last week, was one by Frank C. Sutherland, of Syracuse. His schedule shows liabilities of \$562.11, and assets of \$80.75.

John Fisher, White Haven, Pa., has the sympathy of his many friends in the trade owing to the recent death of his wife, Eustatia Ellen Fisher, who passed away, Aug. 13, and was buried Aug. 16. Deceased was in her 60th year.

Sidney S. Morrill, Fulton, N. Y., who was known as the oldest baseball enthusiast in the Empire State, for many years conducted a jewelry business in the little village of Fulton, to which place he came in 1847. Mr. Morrill is a native of Stafford, Vt., and celebrated the 94th anniversary of his birth, July 25th.

The creditors who early this month filed a petition in involuntary bankruptcy against W. Powell Harvey, Des Moines, Ia., in the United States Court of that district, were R. L. Griffith & Sons Co., whose claim is for \$376; A. H. Bliss & Co., \$87; the Standard Chain Co., \$35; A. Bushee & Co., \$39; C. R. Harris, \$55. Mr. Harvey's stock is valued at \$3,000.

It would appear that the mystery surrounding the murder of W. M. McAllister, a jeweler of New Albany, Miss., who, four or five years ago, was shot dead in front of his store, has at last been cleared up. Arthur Prince, a negro, who recently served a term in the penitentiary at Jackson, has been brought back to that institution after having pleaded guilty to the murder of Mr. McAllister. The authorities did not know of Prince's connection with the crime until nearly the end of his former sentence.

The fifth annual convention of the Associated Advertising Clubs of America will be held in Louisville (to-day), Aug. 25, 26 and 27. The visiting members will be the guests of the Advertisers' Club of Louisville, and the committee in charge has arranged an excellent programme, which includes speakers who may be numbered among the greatest active powers in the world of commerce to-day. It is confidently expected that this convention will be the biggest and most important event of its kind ever held by the organization.

The first annual outing of the Jewelers' League of Rochester was held at Maplewood Park, Aug. 14, and proved most enjoyable to all who participated. After the dinner, which was served at 2 p. m., the married men played a ball game with the single men, which the latter won by a score of 15 to 4, and this was followed by an interesting program of athletic contests of which the winners were: Men's running race, Charles Coster; women's running race, Miss Ayers; girls' running race, Stella Rosenbaum; boys' running race, Edward Schroedel; three-legged race, Lester Cohn and Charles Bingemer; pin race, Charles Coster; wheelbarrow race, Lester Cohn and Chas. Bingemer; women's backward race, Miss Ayers; doughnut contest, Henry Schlegel; umbrella race, Mr. and Mrs. Brockway; nail driving contest, Mrs. Rosenbaum; button contest, Mr. and Mrs. Schroedel; children's shoe race, Edward Schroedel; children's potato race, Edward Schroedel; ladies' potato race, Miss Heyman.

TRADE CONDITIONS.

That the manufacturing jewelry business will be a most flourishing condition before the end of the next month is the opinion of many of the manufacturers and present indications would seem warrant this optimistic view of the situation. It is said that the buyers of the large houses throughout the country are now placing orders, though others have arranged dates during the next few weeks when they look at such lines as they are desirous of obtaining. A majority of the orders are away, mostly in the west, and are being in good orders, and everything points probably to a successful season. Many of the jobs are starting up on full time and some have advanced overtime.

H. C. Nevins is on his western trip for Harvey J. Flint Co., of this city.

A patent has been granted to Arthur W. Aham, of this city, on a nurling tool.

James R. Palmer is on a trip through the Middle West with Henry A. Kirby's line.

William G. Lind, of the T. W. Lind Co., returned from an outing on Cape Cod.

James J. Moss is calling on the western side of the Ostby & Barton Co., with good success.

C. L. Trout, of C. L. Trout & Co., of New York, was a visitor in this city the past week.

George N. Steere, of the George N. Steere Co., Pawtuxet, is on a western tour for his firm.

Harry Cutler and wife are staying for the rest of the Summer at the Heath cottage at Commet.

William F. Kilkenny, assistant manager of the United Wire & Supply Co., is resting in Littleton, N. H.

George A. Schuetz is doing the southern circuit for Snow & Westcott, being in New Haven last week.

M. T. Sherman is sending home some good orders from the Pacific Coast to C. D. Smith & Co.

W. A. Fay is making a trip through the Northwest, representing the Potter & Buffon Co., of this city.

Mr. and Mrs. George M. Baker are among the guests registered at the Ocean House, Nantucket, Mass.

James C. Doran and family have taken the Stillman cottage at Longmeadow for the remainder of the season.

Mr. and Mrs. Theodore W. Foster are making an extended automobile trip through northern New York.

Mr. and Mrs. Frederick C. Lawton have returned from a two weeks' automobile tour to the White Mountains.

Jerome Fleischer, manufacturer of plated jewelry, has removed from 26 Fountain St. to larger quarters at 21 Eddy St.

R. T. Klieking left Chicago, a few days ago, for the Pacific Coast for the Theodore A. Foster & Bro. Co., of this city.

Mr. and Mrs. William H. Manchester left, Wednesday, for an automobile trip through Maine and New Hampshire.

The Martin-Copeland Co., of this city, is receiving satisfactory orders from its western representative, G. J. Blecker.

Mr. and Mrs. Thomas Catlow gave a dinner party to a number of friends from this city at Buttonswood Beach, last Thursday night.

Stock to the value of \$100 was damaged by a fire in the rear of the Outlet Co. building, Thursday afternoon. The flames

were quickly extinguished by the department.

The contract was awarded the past week for the erection of a six-story building for manufacturing purposes on Pine, Orange and Peck Sts.

James N. Henry, of this city, assignor to the C. P. Henry Novelty Co., of which he is treasurer, has been granted a patent on a curtain fixture.

Frank T. Pearce has returned from Plymouth, Mass., where he has been spending a couple of weeks enjoying a respite from business affairs.

Benedict Lederer, Adolph Lederer, Edward Lederer and Edward S. Lederer, formed an automobile party at Narragansett Pier last Sunday.

Abraham P. Workman, of Workman & Newman, has the sympathy of a large circle of friends in his bereavement in the recent death of his infant son.

Mrs. Myra V. Faylor, buyer for the jewelry and leather department of James A. Foster Co., this city, is on a three weeks' trip to Galveston, Tex.

The Slater Trust Co. has discharged a \$3,200 mortgage against real estate with improvements on the south side of Exford St., belonging to Eustace B. Ingraham.

George J. Lederer, who has been general assistant at the factory and office of the Providence Stock Co., in this city, is now in the New York office of the concern.

The first dividend of five per cent. is being distributed by the Manufacturing Jewelers' Board of Trade to creditors in this city and vicinity of S. M. Shaw, Boston.

Leonard C. Peters, with the Tilden-Thurber Co., and his bride, have returned from an extended trip, during which they visited New York, Philadelphia and Washington.

The Himalaya Mining Co. has completed the improvement and alteration of its cutting plant at 21 Eddy St. and is now prepared for the cutting of all kinds of stone.

The *Medric II.*, W. Louis Frost's crack racing yacht, was the winner of the second Brenton Reef race last Saturday, sailed under the auspices of the Rhode Island Yacht Club.

Mr. and Mrs. Louis S. Darling have been motoring through the southern sections of the State, stopping at Narragansett Pier, Matunuck, Quonochontaug, Watch Hill and other resorts.

Clarence M. Dunbar returned from a yachting cruise to the eastward the past week. During the cruise Commodore Dunbar was delayed at Provincetown, Mass., for three days, by the big blow.

Mederic Remillard, buyer for the jewelry and haberdashery department of the Harris & Mowry Co., Woonsocket, has been enjoying a two weeks' vacation at Webster Lake, Webster, Mass., with his family.

Police Commissioner William H. Luther, of William H. Luther & Son, has been made the beneficiary of \$5,000 under the will of the late J. E. Brown, of Boston. Mr. Luther was a relative of Mr. Brown by marriage.

Irving L. Looker has resigned as traveling salesman for the Providence Stock Co., of this city, and will represent R. L. Moorhead & Co., with headquarters at 9 Maiden Lane, New York. His territory

will include the eastern section from Boston to Baltimore.

James A. Foster has at his Summer residence at Warwick Neck, one of the handsomest displays of hydrangea to be seen anywhere in the State. Some of the single bushes measure more than 40 feet in circumference.

George W. Dover, Ira Whittier and Manuel F. Williams were among those present at the complimentary dinner given by Manager Hugh Duffy to the members of the Providence Baseball Club at the Longmeadow Club on Wednesday evening.

The engagement of Ralph A. Wilkinson, of the firm of C. A. Wilkinson & Co., manufacturers of optical goods of this city, to Miss Edith Shellabarger, has just been announced by Mrs. Anna Shellabarger, Decatur, Ill., mother of the bride-to-be.

Catherine Humphrey, 50 years of age, was arraigned in the Sixth District Court, before Judge Gorham, Friday, for the larceny of four brooches from the jewelry department of L. Dimond & Sons, Inc. She pleaded guilty and was fined \$10 and costs.

Harvey J. Flint's *Bat* has been awarded the McCoy trophy for the 18-foot craft making the best showing during the recent race week of the Narragansett Bay Yacht Racing Association. The *Bat* has also been awarded the championship of Bristol Yacht Club race week.

Among the jewelry buyers in the city the past week were noted the following: M. Herz, of Mandel Bros., Chicago; Mrs. L. B. Walter and M. Duprez, of Gimbel Bros., Milwaukee, Wis.; W. Barrett Shaw, of "The Fair," Chicago; Harry Bodek, of Bodek & Co., Philadelphia.

Early Tuesday morning, Aug. 17, a still alarm called members of the fire department to the manufacturing jewelry establishment of William H. Luther & Son, 214 Oxford St., where an overheated blow-pipe in the basement had caused a blaze to start. The damage was slight.

The Gorham Co., of this city, made the nine golf trophies to be played for at Watch Hill in a few days. The trophies consist of a large hammered silver punch bowl and eight hammered silver cups with ebony bases. The decorations are uniform and consist of Indian heads.

Articles of incorporation were filed at the office of the Secretary of State, Saturday, by the following persons: Frank E. Guild, Allin W. Ripley and Edward J. Brownell, to be known as "The Frank E. Guild Co.," and to conduct a manufacturing jewelry business. The concern is capitalized at \$50,000.

John Daly, president of the Hanlon-Thornton Co., announced the past week that that concern will continue its jewelry manufacturing business at its present location in Attleboro, until next year, when it will avail itself of the 10-year tax exemption grant, which the Woonsocket City Council voted it.

Fellow employes of Charles A. Jencks, foreman for William H. Luther & Son, to the number of 40, were the guests of Mr. and Mrs. Jencks at their new home on Blackmore Ave., Eden Park, Auburn, Thursday evening, for a housewarming. Charles Battey, on behalf of his fellow employes, presented Mr. Jencks with a Mor-

chair and Mrs. Jencks with a cut glass set.

The taxpayers of North Providence, at special financial town meeting, Saturday, voted to exempt from taxation for 10 years proposed improvement by the Allendale Co., of which Henry A. Kirby, the manufacturing jeweler of this city, is the owner. Provided the concern shall erect within two years improvements to the value of \$75,000.

The regular monthly meeting of the directors of the Manufacturing Jewelers' Association of Trade was held at the rooms of the association on Friday afternoon, at which President Robert E. Bullong presided. The consideration of routine matters occupied the major portion of the meeting, and four new members were elected.

Articles of incorporation have been issued from the office of the Secretary of State to George C. Richter, Victor F. Richter and Thomas A. Carroll, all of this city, the concern to be known as The Richter Mfg. Co., and to engage in the manufacture of jewelry and silverware. The firm is to be located in this city and is capitalized at \$10,000.

John Shepard, Jr., of the Shepard Co., is in correspondence with the representative Bleriot, who crossed the English Channel in a flying machine, with the intention of securing one of his or some other inventor's heavier-than-air machines. Mr. Shepard believes that he will shortly be able to reach this city from his Summer home in the Berkshires in an hour and a half.

B. A. Ballou & Co.'s baseball club held an outing Saturday afternoon at Emery Park. There were about 40 in the party, which went directly to the park at noon, when the factory closed. Lunch was served when they arrived. A baseball game with the "Yannigans" was won by the regulars by a score of 7 to 5. At four o'clock a full course clambake was served, the outing concluding with a musical programme.

Among the foreign importations received through the Providence Custom House, the past week, were the following: from Bremen, two packages of jewelry and ten of imitation precious stones; from Hamburg, 10 packages of crockery; from New York, one package of imitation precious stones and one of manufactures of metal; from Liverpool, eight packages of manufactures of metal; from Rotterdam, nine packages of crockery.

George O. Herrmann's estate, 204 Thames Street, Newport, has just added a line of antique jewelry to its stock. This includes a number of very interesting pieces, among which is a beautiful emerald cameo that is at one time the property of a prominent lady of the Spanish court, who, through an unfortunate affair, was banished from her native country. The cameo was sold to a Frenchman, after whose death it was sold among his effects at public auction.

The refinery of Andrews & Co., 25 Mathewson St., was somewhat damaged by fire that broke out shortly before 12 o'clock Thursday night. The starting of the sprinklers and the discovery by the night fireman and night watchman occurred at about the same time, and the two

latter soon had a stream of water playing on the flames. Fearing that the fire might spread an alarm was sounded, but the firemen found little difficulty in extinguishing the flames. It is thought that the fire started from a flue leading from the refinery. Most of the damage was caused by water.

North Attleboro.

F. H. Cutler returned last week from New York.

Clifton Emerson is in the west in the interests of W. H. Bell & Co.

George O. Bugbee has been enjoying a few days' vacation at Oaks Bluffs.

Curtis Reed left, last Saturday, for the west in the interest of the H. F. Barrows Co.

Daniel Chrisholm left, Thursday evening, on a business trip for the Bugbee & Niles Co.

Albert Totten has gone to Providence, where he will enjoy a few weeks' vacation.

Herbert Sturdy returned, last week, from an outing enjoyed at Quonochontaug, R. I.

Herbert French, of Riley & French, was in New London, last week, in the interests of his firm.

Charles Peckham left, Sunday evening, for the west in the interests of the J. H. Peckham Co.

Harry Peckham returned to New York, Saturday evening, after spending several days in town.

Walter C. Sherman, sales-man for the Estate of O. M. Draper, spent several days last week at Brant Rock.

E. D. Sturtevant, of Sturtevant & Whiting, has returned from Maine, where he has enjoyed a month's vacation.

The Paye & Baker Mfg. Co., last week, were compelled to run part of the factory evenings in order to fill orders.

Andrew E. Morris, manager of the G. C. Hudson Co., has just completed a beautiful new residence on S. Washington St.

William Bens, the well-known manufacturing jeweler, of Providence, who died last week, was for many years a resident of this town.

The railroad depot of the New York, New Haven & Hartford Railroad was broken into last week, and several sample cases belonging to the Estate of O. M. Draper were opened, but nothing was taken.

Cards are out announcing the marriage of William E. Smith, a retired jewelry manufacturer, to Mrs. Julia Louise Pierce, of this town. The ceremony took place in Pawtucket, and immediately afterward Mr. and Mrs. Smith left on a two weeks' wedding tour. They will make their home on Washington St., North Attleboro. Mr. Smith was for years a member of T. G. Frothingham & Co.

An American consul in the West Indies sends to the Department of Commerce and Labor, Washington, D. C., the name of a merchant in his district who carries provisions, shirts, ties, collars, jewelry, perfumery, etc. He would like to be placed in communication with manufacturers of the above-mentioned lines.

Attleboro.

E. D. Moore, of Sykes & Strandberg, is making a trip to the Pacific Coast.

Walter Hopkins has returned from a successful trip in the interests of C. H. Eden & Co.

Freeman, Daughaday & Co., Chartley, have found it necessary to run their pearl factory evenings.

Walter I. Tuttle, of the Frank Mossberg Co., returned, last week, from a vacation enjoyed at Long Island.

Arthur Aldrich, of the Winthrop Mfg. Co., has returned from an enjoyable visit to Lake Sebasticook, Me.

P. J. Cummings returned last week from New York, where he spent a few days in the interests of his firm.

G. Percy Clap, of the Daggett & Clap Co., has again resumed his duties in New York, after an extended stay in town.

The members of the All Saints' choir were entertained by Harvey Clap, D. E. Makepeace, James E. Blake and Peter Nerney at the Ponham club, last Thursday.

William Cooke, of the Fontneau & Cook Co., has returned from Hot Springs, Ark., much improved in health, and is now making a western trip in the interests of his concern.

George H. Sykes, of Sykes & Strandberg, and C. O. Sweet, of C. O. Sweet & Sons Co., visited Co. I, last week, while the organization was in camp with the 5th Regiment at Halifax.

The members of the Massachusetts Press Association were entertained at the Lyons jewelry factory at Mansfield, last week, and after being shown through the factory each member was presented with a pair of link buttons.

Connecticut.

Gen. George H. Ford, New Haven, returned, last week, from an outing trip in the White Mountains.

George D. Munson, Wallingford, accompanied by his family, has returned from a sojourn at Fishers' Island.

S. H. Kirby & Sons and Paul Roessler's Son, New Haven, donated trophies for the big field day recently held at Morris Cove, New Haven.

Landers, Frary & Clark, New Britain, have awarded the contract for the building of what is supposed to be the largest factory chimney in the State. It will be 220 feet high.

Mayor George M. Landers, New Britain, left, Aug. 17, for New York, whence he sailed for England the following day on the *Lusitania*. President Charles F. Smith, of the Landers, Frary & Clark Co., accompanied Mr. Landers as far as New York.

M. D. Donovan, for several years in the employ of the Waterbury Clock Co., Waterbury, where he resided for a long time, died suddenly, on Tuesday evening of last week, aged 47 years. Mr. Donovan, while eating dinner, was seized with a paralytic stroke and passed away soon afterward.

L. N. Lee, Ada, Minn., has closed out his stock and discontinued business. He will continue to make Ada his home and will practice as a traveling optometrist.

The HARRISON Fall and Holiday lines of UMBRELLAS and CANES

are now ready and may be seen at our showrooms.
All our goods are made from a Jeweler's point of
excellence.

San Francisco.

TRADE CONDITIONS.

The retail jewelry business here has shown a remarkable increase during the past two weeks and most all of the stores are able to report an improvement. The public schools have opened for the Fall and Winter sessions, Summer vacations have come to an end, and in addition to the customary population of the city there is added a large number of tourists. The railroad companies have been rather puzzled of late in regard to the number of people who have been coming to this city from the east and have concluded that it is merely a return to normal conditions again.

Among the out-of-town jewelers here, last week, were: W. E. King, Stockton, and L. A. Schaufele, Monterey.

S. Davidson, who conducted a store at 33d St., up to a short time ago, has failed in business, and his stock is now being disposed of by the Board of Trade of San Francisco. Sealed bids were solicited and were to have been received at the offices of the Board up to 2 o'clock on the afternoon of Aug. 16.

The store of A. Lutz, 1376 Market St., was entered by burglars one night, last week, and eight silver watches were stolen. The thieves entered the building through the skylight and lowered themselves into the store by means of a knotted rope. No attempts were made to effect an entrance into the safe, which accounts for the small loss sustained.

The new Diamond Palace will have been opened to the public long before the Portola festival, and Radke & Co. will also be in their new store on Post St., leaving very few in the jewelry business still located in temporary quarters. In fact, the Baldwin Jewelry Co. will be about the only large firm in this line that will still be located on the Avenue, two months hence.

Most of the large stores in San Francisco are now making preparations to decorate their places of business during Portola week from Oct. 18 to 23, when San Francisco formally welcomes the world to view the reconstruction work that has been done during the past three years. President Taft, according to the plans just announced, will not be able to attend the festival, but will be here earlier in the month. While no great preparations are being made for his visit, from a spectacular standpoint, it is expected that many persons will take advantage of the opportunity to be here at that time and welcome the nation's Chief Executive.

Boston.

Redmond J. Murphy is making a trip through New England for M. Myers.

Joseph Harkins, of E. A. Cowan & Co., has returned from an outing at Auburn, N. H.

Among the jewelers in town, last week, were B. D. Loring, Plymouth; Robert H. Johns, Worcester, and Mr. McLeod, of Woodbury & McLeod, Haverhill.

William B. Morris, a salesman in the store of Shreve, Crump & Low Co., was married, Aug. 15, to Miss Celia M. Leftovith, daughter of ex-Councilman and Mrs. Martin Leftovith.

Al. Levy, formerly with the Orient Mfg. Co., has entered the employ of a Providence firm that makes cards and other

printed matter for jewelers and is traveling west in its interest.

The information has reached here from Burlington, Vt., that George Q. Stiles, who secured, recently, the Bristol jewelry store and stock by purchase, has taken K. W. Nims as a partner. The firm name hereafter will be Stiles & Nims. Formerly Mr. Nims was with R. W. Parish for three years in the same business.

Canada Notes.

J. E. Nelson, Ridgeway, Ont., has sold his business to Charles Mallory.

The stock of J. W. Gabriel, Halifax, N. S., is advertised for sale by auction.

J. P. Vick, Owen Sound, Ont., has given a chattel mortgage to R. Wightman for \$300.

H. A. Giles, East Toronto, Ont., removed from 12 $\frac{1}{2}$ Queen St., E., to 30 $\frac{1}{2}$ Richmond St., E.

N. F. Babb, Stratford, Ont., has sustained a fire loss, which is fully covered by insurance.

Woods & Donnelly, manufacturing jewelers, of Guelph, Ont., have dissolved partnership. The business will be continued by E. N. Woods.

Out-of-town jewelers calling on the Toronto, Ont., trade, last week, included: T. W. Poile, Chatham, Ont.; Alex. Moffatt, Brantford, Ont.; A. H. Humber, Calgary, Alta.; George Jacques, Calgary, Alta.

John Smith, the negro recently arrested for a robbery committed at the store of A. C. Kent, 207 George St., Toronto, Ont., was, on Monday of last week, sentenced to 23 months' imprisonment. Since his arrest he was proved to have been concerned in several similar robberies, including the stealing of rings from the stores of Ryrie Bros. and J. W. Johnson. He comes originally from Demarara, and is believed to have operated in the United States before coming to Canada.

J. E. Ray, Canadian Trade Commissioner to Newfoundland, reports as follows to the Canadian Department of Trade and Commerce respecting the Canadian jewelry trade with that colony: "The correspondence received by this office from Canadian jewelers is an indication that they are anxious to secure a good portion of the colony's trade in silverware, electro-plated ware, etc., and it is gratifying to learn from dealers here that Canadian designs are becoming more and more popular. During the last four years the imports of jewelry of all kinds from Canada have increased by nearly a thousand dollars, and the importance of this increase is emphasized when it is borne in mind that the total imports of jewelry by Newfoundland were \$5,000 less in 1907-8 than they were in 1904-5. Moreover, the imports from the United Kingdom has fallen from \$10,812 in 1904-5 to \$7,135 in 1907-8, although her trade in these articles amounted to \$12,000 in 1906-7. The imports from the United States also exhibit a gradual decline from \$8,510 in 1904-5 to \$6,547 in 1907-8."

It is reported that John Erickson has sold his jewelry business at Mapleton, Ia., and moved back to Lake View, Ia.

Buffalo, N. Y.

M. B. Fitch, a jeweler of Flint, Mich., recently spent a week in this city.

C. F. Damm, the well known Main St. jeweler, is away on a brief pleasure trip.

George E. Debus, of Yung & Debus, 184 Genesee St., recently returned from a week's trip to Crystal Beach, Ont.

Silver cups and other prizes awarded at the annual outing held recently by the Buffalo Odd Fellows were displayed in the window of Walbridge & Co.

Dan Munna, a jeweler on the staff of T. C. Tanke, has been with the 74th Regiment, N. G. N. Y., doing field duty at Camp Josiah Porter, situated at Farnham, N. Y.

At a recent meeting of the Buffalo Retail Jewelers' Association it was decided to hold the annual outing of that body, at the Beddell House, a Summer resort near here, Thursday, Aug. 26.

A report from Batavia, N. Y., says that Lottie Fisher, the young woman charged with attempting to steal diamonds in C. C. Bradley & Co.'s jewelry store in that city, has been held to await the action of the September Grand Jury.

In the Bankruptcy Court in Lockport recently Trustee Glenn A. Stockwell, in the matter of Nelson A. Soggs, bankrupt, who committed suicide over business affairs, reported the sale of fixtures, some stock, etc., for \$2,848.61. The sale was confirmed.

Harris Cohn and I. Rosenbloom, local jewelers, were on the committee in charge of the outing recently held by the local Order of Knights of Joseph. Mr. Cohn is past commander of Electric City lodge No. 8, and Mr. Rosenbloom holds a similar office in Eureka Lodge No. 91.

William H. Cohn, a traveling representative of King, Raichle & King, has returned from a trip to Ohio. Miss Anna L. Smith, with the same house, returned from a week's outing; Miss Henrietta Wageman, bookkeeper of the firm, is away on a week's vacation, and F. G. Raichle soon departs for the White Mountains, where he will spend a fortnight.

Eugene Tanke, a local jeweler, is much interested in the proposition being exploited here in favor of holding an international peace jubilee in this city and vicinity. Mr. Tanke recently wrote a letter to the Buffalo Chamber of Commerce, suggesting some ideas for such a celebration. Secretary Parke, of the local Chamber of Commerce, said recently that he would present Mr. Tanke's views on the subject to a meeting of business men and citizens to be held later under the auspices of that body.

The Southern Buck, an Elk magazine, recently published a page article commending Sam Martin, the jewelers' auctioneer of Milwaukee, Wis., for his work in introducing and promoting a movement for instituting orphanages for children of the deceased members of the Order of Elks. Mr. Martin is a very prominent member of this order, having been the Exalted Ruler of Seattle Lodge No. 92 three terms, besides holding a number of other offices. While District Deputy Grand Exalted Ruler his efforts were largely instrumental in increasing the membership of the Elks in the State of Wisconsin from 100 to over 8,000.

We present herewith illustrations of two bronze Bas-reliefs — Hendrick Hudson and Robert Fulton.

Made in the following sizes

Mounted on Oak,	8 $\frac{3}{4}$ in. x 12 $\frac{1}{4}$ in.,	Hudson or Fulton	-	Retail Price,	\$5 00

Charles Feil, jeweler, 311 Market St., Wilmington, Del., announces the engagement of his daughter, Anna.

Gustav C. Kuntz, representing the Sommer Clock Co., 111 S. 8th St., started out, last week, on a business trip.

Roland Oliver, with George Oliver & Sons, Burlington, has just returned from a vacation spent at Atlantic City.

T. C. Kremer, Phoenixville, is receiving the congratulations of his friends upon his recovery from a serious operation.

H. H. Lake, jeweler, of Ocean City, is scheduled to lead the tennis tournaments, to be held, next week, at that place.

R. W. Broadbent, Wilmington, Del., is receiving the sympathy of the trade on account of the death of his mother.

J. C. Fenton, manufacturer of monogram jewelry, 12th and Filbert Sts., has opened a branch store at Atlantic City.

Walter M. Engle, 4233 Lancaster Ave., with his family, is motoring through eastern Pennsylvania and New York State.

Lyn Thomas, of Lyn Thomas & Co., Wilmington, Del., was a visitor to this city during the week in his new automobile.

Fred Fischer, formerly watchmaker for

R. M. Cooper & Son, has started in business for himself at 5330 Germantown Ave.

L. P. White, wholesale jeweler, 9th and Chestnut Sts., is cruising around the various waters as the guest of Mr. Eisenlohr.

Frank F. Hendry, who has been located for the past 25 years at 628 Chestnut St., will remove his business to 209 S. 11th St.

A. F. J. Dorn, Camden, N. J., with Mrs. Dorn and family, have started on a pleasure trip through South Baltimore and Washington.

A number of jewelers have gone to Ocean City to attend the celebration of the Shriners. The "Lu Lu" band has already arrived.

The Association of Jobbers and Wholesale Jewelers will hold the 3rd regular monthly meeting, Tuesday evening, at the Jewelers' Club.

F. B. Eberhard, jeweler, Allentown, Pa., is in this city awaiting the result of an operation performed on his wife at St. Agnes Hospital.

F. W. Schuler, principal of the Horological Institute, Broad and Somerset Sts., is again at his desk after a pleasant vacation at Wildwood.

The Hoover & Smith Co., 616 Chestnut St., is making extensive alterations and improvements to its new uptown branch store, at 13th and Walnut Sts.

J. Warner Hutelbins made and designed the silver loving cups for the Cape May Yacht Club that were presented at the races, held last Saturday.

The Philadelphia Optical Club will entertain the club members and friends at an oyster supper, to take place in the club rooms, 1410 Arch St., Sept. 8.

Oscar Hardegg, with John F. Blisard & Co., and his brother, Julius Hardegg, of I. Bedichimer & Co., were the guests of H. McLane, a jeweler of Atlantic City, on a recent auto trip.

Miss Reba Rubenstone, assistant manager of the jewelry department of N. Sneltenberg & Co., is spending her vacation with friends in York, Pa., and Pen-Mar, in the Blue Mountains.

Jack Place, assistant manager of the Adelphi and Lyric Theaters, this city, was married, Aug. 7, to Miss Blanche Reynolds. Mr. Place is connected with the firm of Oscar Place & Sons, Providence, R. I.

L. A. Breitingger, of the American Cuckoo Clock Co., has returned to Philadelphia after spending a few weeks with his family at Wildwood, N. J. J. B. Breitingger, of the same concern, is sojourning for a few weeks in the Catskill Mountains.

Application has been made by Morris Herzstein, Nathan Josias, Jacob Josias and John Josias for the charter of an intended corporation, to be called Josias Mfg. Co., the object of which is to manufacture, buy, sell and trade in paper and wooden boxes, jewelry trays and boxes and other manufactures of paper and wood.

The jewelry store of Edward Herberm, 1622 Market St., was robbed, Thursday night, of jewelry valued at \$190. The thieves entered the building by forcing the back door. They stole one dozen watches, a number of spoons and several pieces of jewelry left at the store to be repaired. This is the second robbery committed with-

in a square of the City Hall within the past week.

The following jewelers were visitors this city during the week: J. E. Dean, North Wilkesboro, N. C.; E. K. Bea Lansdale, Pa.; I. H. Krause, North Wales, Pa.; H. B. McFarlan, Downingtown; K. Hanley, Reading, Pa.; W. L. Ston Pottstown, Pa.; L. C. Wettling, Newtown, Pa.; H. E. Norcross, Pemberton, N. J.; J. A. James, Swedesboro, N. J.; William Updegrave, optician, Jamestown, and J. Moore, optician, Johnstown.

Because of an appeal from the battleship *Delaware* fund committee, at New Castle, Del., Mayor Evan G. Boyd has appointed William J. Ferris, George McIntire and Patrick McGrory to receive subscriptions and solicit donations for the silver fund, for which about \$5,000 is yet needed. In appreciation of the share raised by the people of this city it is proposed to hire the battleship, when completed, anchor off this city for two days for inspection.

Mrs. May Rahilly Gannon, wife of Albin J. Gannon, a manufacturing silversmith, Philadelphia, passed away, Monday, Aug. 9. Mrs. Gannon, before her marriage, was prominent in Newark, both socially and philanthropically and as a seamstress and worker. She was a communicant of Columbia's Church, and since her marriage has been identified with St. Matthew Church, Bala, Pa. She was an accomplished musician and held the position of organist in her church and teacher of the Bible class. Mrs. Gannon was a directress of the firm of Unger Bros., Newark, which she left at the time of her marriage, and her death is a great loss to her relatives and many friends.

Charles Heffer, whom Benjamin Silverman, a jeweler, at 705 S. 2d St., had arrested several weeks ago on a charge of swindling him out of \$5,000, was arrested on a *capias* last week in a civil suit growing out of the same transaction. He was held in \$1,500 bail. Silverman declares that his business as a jeweler has been ruined by the loss of the \$5,000. He sues Heffer for \$20,000 damages. Heffer had two alleged confederates, according to Mr. Silverman, who says they urged him to get into the jewelry business with them on a large scale. After a confidential check was taken to a house, 716 Pearce St., where, he says, he deposited on a note of \$5,000 as his investment in the business whereupon a band of men broke into the room, crying out that they were detectives and "arrested" all who were present. When outside he slipped away from his captors and ran all the way home. He has since learned, he declares, that the so-called detectives were accomplices of Heffer's in a scheme to defraud him out of the \$5,000.

Jacob C. Schmidt, 713 Cumberland St., Lebanon, Pa., recently furnished a handsome silver service for the new hotel Conewago. The silver service is massive in weight and fine and elegant in design. Each piece has the name "Conewago" on it. It is one of the largest orders that has ever been placed in Lebanon. Mr. Schmidt also recently furnished a silver service to the American Consul in Moscow, Russia.

catalogues is distinctly wrong, and the jobbing house in the jewelry trade that will send its catalogue to a merchant in other lines simply because he is a merchant of standing, and accept on a wholesale basis what is practically a retail order, is as great an enemy to the retail jewelry trade as the biggest mail-order house or department store. Such jobbers deserve no patronage of legitimate retail jewelers, and have no reason to complain as the retailers awake to their own interest and ignore them.

Lancaster, Pa.

TRADE CONDITIONS.

Lancaster jewelers are looking expectantly and hopefully forward to good Fall business. All of Lancaster's industries are now in operation, and the number of unemployed is lessening daily.

Morris J. Kurtzner has gone to Boston on a pleasure trip.

E. P. Zane, Christiana, is home from visit to Philadelphia.

Elwood Browne and Giles K. Mortimer have gone to Chicago on a two week vacation.

S. Tuillo Herr, a director of the Non-Retailing Co., has been enjoying himself at Atlantic City.

J. E. Wintumite, Coatesville, participated in the business men's big excursion to Lancaster, Aug. 18.

Henry Weeber, the city Hall jeweler and optician, has gone to Ocean City, N. J. with his family for a short rest.

G. Edward Fleischer, head watchmaker for Ezra F. Bowman's Sons, is on a two weeks' automobile trip through New Jersey with friends.

The beautiful large silver loving cup presented to M. S. Miller at the recent dinner given in honor of his birthday anniversary was furnished by Louis Weber & Son.

Joseph Vollmer, with G. William Reiser, will leave, Sept. 1, for Cuba, where he will take a position, probably in Havana. Miss Elizabeth Keller, bookkeeper for this house, is spending her vacation in Philadelphia.

The Lancaster Country Club has on exhibition in a show window of S. Kurtz Zook's store, where they were purchased eight beautiful silver loving cups, which will be awarded to the winners in the coming golf and tennis tournament of the club.

Clifford Latchaw, an agent for C. B. Kline, was arrested in York, Aug. 18, on the charge of stealing 46 pieces of jewelry, valued at \$250. He confessed that he sold the articles at prices far below their value, and Clarence Lau has been arrested for receiving some of the stolen articles.

Kendig H. Bare, head instructor of watchmaking in the local technical school, has returned from a two weeks' vacation at Atlantic City. H. Birdsey Souther, Sandy Hook, Conn., having finished a course in watchmaking and engraving at the school, has returned home, where he will engage in business for himself.

The business of Fred. Ingram, Lansford, Pa., will hereafter be carried on under the name of Mrs. D. Ingram.

New York Notes.

Joseph Mehmert, Cincinnati, O., is spending a vacation in this city.

S. E. Theus, of Theus & Co., Savannah, Ga., accompanied by his family, is in town. George Spies, of Spies Bros., Chicago, lived in this city in an automobile, last week.

A. L. Barr, with Augustus Rhoads, Lancaster, Pa., is spending a vacation in the metropolis.

J. G. Donovan, of Donovan & Seamans, Los Angeles, Cal., is spending a vacation in New York.

Fred Kennon, of the John T. Mauran Co., Providence, R. I., was at the office last week.

Albert Pretzfelder, of the Bayer & Pretzfelder Co., 11 W. 17th St., is confined to home by sickness.

De Lloid Safford, secretary of the Jewelers' Board of Trade, is spending his vacation at Summit, N. J.

L. Newman, representing B. Hyman & Co., 2 Maiden Lane, started last week on a trip west for that concern.

M. O. Nobbe, of M. O. Nobbe & Co., Weston, Tex., was a visitor at the offices of THE JEWELERS' CIRCULAR—WEEKLY, Monday.

Robert Budlong, of the S. K. Merrill Co., returned last week, from a vacation trip, a part of which was spent at Jackson, N. H.

James H. Noyes, secretary of the Jewelers' Security Alliance, returned Thursday from a month's vacation spent at Christmas Cove, Me.

Howard Sisson, representing the E. A. Bennett Co., Providence, R. I., in this city and the middle west, returned Thursday from a five weeks' vacation, spent in Maine. Simon Frankel, of Jos Frankel's Sons Co., 578 Fifth Ave., sails to-day on the *Arctania* for Europe. The report that he sailed last Wednesday, published last week, was erroneous.

The New York Self-Winding Electric Clock Co. has been incorporated to manufacture self-winding clocks, batteries, etc., with a capital of \$500,000. The incorporators are F. W. Livingston, H. A. St. George and C. B. Frazier, all of New York.

The Globe Jewelry Case Co. has been incorporated under the laws of the State of New York to manufacture jewelry and manicure cases with a capital of \$3,000. The incorporators are Max Kleinman and E. Schwartz, New York, and Morris Weinman, Brooklyn.

The case of Miss Eleanore Lorraine Tutie, who is wanted in this city on a charge of grand larceny made by the Graham Co., is dragging along slowly through the Extradition Court in London. At a hearing, last week, a delay of a fortnight was granted the defense, as one of the witnesses is seriously ill.

Among the out-of-town jewelers in this city last week were: G. W. Halton, Bowie, Md.; Fort Worth, Tex.; J. W. Owsley, Chickasha, Okla., and Fred Saul, Chattanooga, Tenn., all of whom were visitors at the offices of THE JEWELERS' CIRCULAR—WEEKLY. Other out-of-town visitors included S. Hudin, of the Rosenbaum Co.,

Pittsburg, Pa.; Charles Erisman, La Fayette, Ind., and Marcus Edelstein, Lancaster, Pa.

Italian residents of New York are arranging for an exhibition of modern Italian art and other high grade Italian specialties to take place at Long Beach from May to September, 1910. It is proposed to have a permanent building in which products of Italian art, skill and mechanics will be exhibited. These will include gold, silver, copper, iron, marble and glass works and ornaments of goldsmithing, together with many other lines.

Phillip Emden, for 32 years in the employ of Tiffany & Co., died last Wednesday from apoplexy at his residence, 165 Central Park West. He was 47 years of age. He entered the employ of Tiffany & Co. when he was a boy, and at the time of his death was a department head in that establishment. He had just returned from a vacation spent on Long Island when he was seized with apoplexy a few minutes after entering his home.

R. L. & M. Friedlander, 30 Maiden Lane, have a curiosity in the way of small checks, the firm having received a check for one cent drawn on the National City Bank of New York, the largest bank in the United States. The check was made out by the disbursing bureau of the Consolidated Gas Co., of New York. The check was evidently made out as a supplemental check to correct an error in the amount of a previous check. It will be framed and kept as a curio.

A coachman formerly in the employ of M. J. Averbeck, 10 Maiden Lane, has disappeared from Mr. Averbeck's country home in Rockland county, taking with him a fine team of horses and two carriages, which he sold at Nyack, N. Y., for \$250. Mr. Averbeck was successful in locating the stolen property, but has not succeeded in finding the man. The coachman was well recommended to Mr. Averbeck and had lived in that section for about three years. He left behind him a wife and several small children.

Stephen Badin, of Aleppo, Syria, who arrived in the steerage of the Italian steamship *Duca degli Abruzzi* with his wife and baby, was ordered deported by the board of special inquiry that looked into his case. He was without money and said he had no job in view, but declared that he was one of the finest silversmiths of Aleppo, which has a few experts in that line. He mentioned the names of several Syrian merchants here, including that of a Fourth Ave. curio dealer. This man was sent for and pronounced Badin of Aleppo an artist that he would be glad to employ. The merchant put up a bond for the silversmith and he was permitted to come in.

Friday, at 12 o'clock noon, William Henkel, United States Marshal, will offer for sale, in room 56 of the Post Office building, a collection of jewelry valued at \$576—taken from the person of Riamotto Moscatello and forfeited for violation of the customs laws. The jewelry will be open for inspection to-morrow morning and on Friday morning. The collection comprises 132 finger rings, 20 charms, eight brooches, 37 pair of earrings, two brooches in cases, six necklaces, five long chains and 16

pocket knives. The foreign value of these goods is \$359.81.

The Jewelers' Security Alliance received word last week from Samuel J. Lyons, a jeweler at 2258 N. Front St., Philadelphia, Pa., that the man who stole about \$1,500 worth of jewelry from him in May has been captured at Fluvanna, N. Y., by Pinkerton detectives. A part of the goods were found on the man, while four pieces had been pawned, three in this city and one in Fluvanna. The alleged robbery was, according to the Philadelphia jeweler, committed by a watchmaker who had been in his employ but a week. The jewelry was taken out of the safe while Mr. Lyons was out of the office.

According to the regular monthly statement of the Bureau of Statistics at the Customs House the total value of free and dutiable goods remaining in bonded warehouses at this port for the month ending July 31 was \$50,147,953, as against \$51,722,228 on June 30. Included among the goods remaining in the warehouses on July 31, 1909 are clocks, \$23,727; watches, \$111,457; diamonds unset, \$60,145; precious stones, \$31,858; jewelry, \$5, and manufactures of gold and silver, \$18,035. As compared with these figures those for July 31, 1908, are given as follows: Clocks, \$20,005; watches, \$159,922; diamonds unset, \$60,107; precious stones, \$37,993; jewelry, \$4,748; manufactures of gold and silver, \$12,484.

Elias Mehr, a traveling jeweler, 179 Graham Ave., Williamsburg, lost a box containing more than \$1,000 worth of jewelry under peculiar circumstances Sunday in a barber's shop at 137 Meserole St. He went to the shop to be shaved, and while in the barber's chair he frequently looked in the direction where his jewelry box was. Presently he missed it, and a small boy in the place told him a man had taken it and sneaked out. Mehr got a policeman, and in a nearby restaurant there was found a man who said he was Jacob Edelman, 25 years old, of 498 E. 74th St., Manhattan. The barber's boy recognized Edelman, and two persons in the restaurant said that when Edelman entered the place he went into a rear room. The policeman found in this room a piece of wrapping paper which Mehr declared had been around his jewel case. There were also found several price tags, but no trace of the jewelry or box. Edelman was taken to the Stagg St. Police Station. Later, in the Manhattan Ave. Court, he was held in \$500 bail for a further hearing.

Among the department store jewelry and novelty buyers in the metropolis are T. C. Bunch, of the William Hengerer Co., Buffalo, N. Y., headquarters at 214 Church St.; L. Traubman, of the Silberstein & Bondy Co., Duluth, Minn., 817 Broadway; A. Rosenthal, with M. Goldenberg, Washington, D. C., Hotel Grand; H. H. Cohen, Montreal, Que., Grand Union; S. A. Meyers, with B. Lowenstein & Bros., Memphis, Tenn., 43 Leonard St.; F. J. Stanley, with Porteous & Mitchell, Norwich, Conn., 57 White St.; E. A. Upham, with Castner-Knott Dry Goods Co., Nashville, Tenn., 214 Church St.; W. L. Noble, with England Bros., Pittsfield, Mass., 75 Spring St., and

New York Notes.

(Continued from page 85.)

Miss M. Reynolds, with the Dun-Taft Co., Columbus, O., at the Hotel Latham. Lawrence I. Cohn, representing the Cohn Bldg. Co., 71 Nassau St., returned from a successful trip yesterday.

Cortlandt E. Hastings, secretary of the Maiden Lane Realty Co., returned yesterday on the *Kaiser Wilhelm II.*

Burton Fox, of Fox Bros. & Co., Cincinnati, sailed from this city Wednesday last week for Europe on the *Lusitania*. Miss Desio, buyer for Victor Desio & Co., Washington, D. C., recently paid a visit to New York, and is now spending several weeks resting at Manchester-by-the-Sea.

J. T. Rutherford, of the Hartwell Jewelry Co., Oklahoma City, Okla., will be in New York from Aug. 28 to Sept. 25 and will make his headquarters at the Hotel Nickerbocker.

Earle R. Sheppard, manufacturer's agent, Maiden Lane, expects to spend 10 days in Chicago, calling on the jobbing trade, and then will make a short trip west. He will return about Oct. 1.

J. B. Hudson, Minneapolis, Minn., accompanied by his son returned to this city last Friday on the *Mauretania* from a three months' trip abroad. He departed the last of the week for his home.

Mrs. Sarah Boghossian, who died recently at the age of 101 years at her home, 97 Elisade Ave., Yonkers, N. Y., was the mother of Jos. Boghossian, a jeweler in business at 38 N. Broadway, Yonkers.

W. E. Smith, of the L. E. Waterman Co., left, last week, on an automobile trip to Montreal accompanied by his wife and daughter. They will return by way of the dirigibles, stopping at Paul Smith's hotel.

The Manhattan Clock Co., New York, has been incorporated to manufacture clocks, watches, ornaments, etc., with a capital of \$10,000. The incorporators are: Lewis Weil, Sarah Weil and Jos. T. Collins, all of New York.

The Kaufman & Rosenberg Metal Co. has been incorporated under the laws of the State of New York to deal in metals, with a capital of \$3,000. The incorporators are: Solomon Kaufman, Judel Rosenberg, Lewis Berkman and others of New York.

H. A. Groen & Bro., 52 Nassau St., are soliciting sealed bids on a part or the complete stock of diamond jewelry, appraised at \$15,000, for the benefit of creditors of J. Karger, formerly at 51 Maiden Lane. The goods will be on inspection until Friday at 4 P.M.

Two members of Joseph Bros., 224 Meridian St., Indianapolis, Ind., a new concern which has just started in the jewelry jobbing business, have been in this city during the past week; they are J. Joseph, who was formerly a retail jeweler at Greensburg, Ind., and Isaac Joseph.

Charles Ginsberg, of Ginsberg Bros., 9 Maiden Lane, left Saturday for a trip to the Pacific Coast, to be gone about three months. This firm was started recently by Charles and Samuel S. Ginsberg, sons of J. Ginsberg, who formerly traveled for

himself through all parts of the country.

It is announced that M. Mannikendam, with Albert Lorsch & Co., 37 Maiden Lane, will be married Thursday evening to Miss Emma Loeb, at the Cafe Martin. Miss Loeb is a sister of James J. Loeb, who is also connected with Albert Lorsch & Co. After the ceremony the happy couple will start on a wedding trip.

On Saturday, Aug. 28, two teams made up from employes of the L. E. Waterman Co. will play a game of baseball at the Eastern Lake Park, Jersey City, N. J. One of the teams comprise the best players in the rubber factory of the company at Seymour, Conn., and the other will be made up from the employes in the ink and pen factory and offices in this city.

E. Karelsen is the name of a firm which has just been incorporated to deal in rough diamonds, with a capital of \$2,000. The incorporators are Adolphus E. Karelsen, Edgemere, L. I.; Frank E. Karelsen, 165 Lenox Ave., New York, and George Boochever, 200 W. 119th St., New York. The new concern is making its headquarters with E. Karelsen & Co., 68 Nassau St., but the two firms are distinct.

W. H. Wright, who is acting as trustee of the business of Paul W. Towner, Waverly, N. Y., says that a cash offer of 25 cents on the dollar has been made and is being accepted by all of the largest creditors. He said that part of the trouble was due to the fact that Mr. Towner had borrowed considerable money. Among the creditors he mentioned is one large concern in Buffalo, and several in this city. He said that an inventory of stock had been taken.

Goldsmith Bros. Smelting & Refining Co., which now has offices at 32 Union Sq., will move to 20 John St. about Sept. 1, where the concern will occupy three floors in that building, which is now being remodeled. One floor will be used as a laboratory and assay room, another as the purchasing and salesroom, and the remaining floor as a sample room. The concern is one of the largest smelting and refining companies in the business, and its headquarters are in Chicago.

Much interest is being shown in the coming exhibition which will be held by Powers & Mayer, 258 5th Ave., from Aug. 30 to Sept. 4, inclusive. A large number of out-of-town jewelers are expected to attend the exhibition, which is one of the events of the season in the New York jewelry trade. The exhibition, this year, will undoubtedly surpass anything that has been previously shown, and the interest which has been aroused by the fine display in past seasons warrants the attention of all who are interested in specially fine jewelry. This exhibit is the seventh annual display by the concern.

The Hudson-Fulton Exhibition at the Metropolitan Museum of Art, it was announced Monday afternoon, will include an important exhibit of silver made in the Colonial days. More than 300 pieces will be shown. Of these, there will be 20 pieces made by the Reveres, father and son, in Boston early in the 18th century. Among the New York silversmiths represented will be Adrian Bancker, Thauvet Besley, Peter Quintard, R. Van Dyke, Thomas Underhill,

Benjamin Wyncoope, and others. Among those who have lent pieces of silver are George S. Palmer, R. T. Haines Halsey, Judge A. T. Clearwater, Hollis French and the Trinity Church Corporation. Many of the pieces were collected by the Colonial Dames of the State of New York.

United States Marshal Henkel sold at auction on Saturday at 11 o'clock, a jeweled collar and a bracelet. The collar brought \$1,975, and the bracelet \$2,275, and were purchased by Simon Hess, who, it was said, is a contractor. The auction sale, which was held in room 56 in the Post Office building, was attended by quite a number of merchants from the Maiden Lane district. On previous occasions when the jewelry was offered for sale, no one bid high enough to obtain it. The jeweled collar was imported by Celso del Villar, a wealthy Mexican, who came in on the *Morro Castle*, April 24, and the bracelet was found in the possession of Joseph Mandriga. They were appraised at \$3,980 and \$3,000 respectively. A duty of \$2,388 was assessed upon the collar, and \$1,800 upon the bracelet, bringing the home value up to \$6,368 and \$4,800 respectively. A large number of bids on both pieces of jewelry were recorded Saturday. The bidding started at \$500 in each case.

The collection of gems valued at thousands of dollars which were lost on an Erie ferryboat on a trip from 23d St. to Jersey City, June 29, and for which a reward of \$5,000 was offered by Dreicer & Co., 506 Fifth Ave., New York, was recovered Saturday night by Chief James F. Larkins, of the detective bureau, and two detectives, who found them in the possession of several residents of the Italian section of Jersey City, N. J. The jewels are said to belong to Mrs. Richard Mortimer. According to Chief Larkins, an Italian named Paolo Campenella picked up a package of jewelry on the Erie ferryboat on June 29, and turned it over to Stephano Bardazo, with whom he boarded. He had no idea of the value of the gems until inquiry had been made by neighbors, one of whom prised a 10-carat diamond from one of the pieces of jewelry and took it to G. D. Davidson's jewelry store, on Newark Ave. The jeweler said the stone was worth \$1,500. Several other of the diamonds were prised off from the piece of jewelry and it was later learned that a reward of \$5,000 had been offered for the return of the package. When the pieces of jewelry were examined by the police it was found that there was a diamond for every setting but one, the missing stone being a small one. Chief Larkins is credited with saying that he thought that Campenella and Bardazo were entitled to part of the reward. The jewelry consisted of a diamond bow-knot brooch, a diamond tiara, one diamond paved watch and a large emerald. Mr. Dreicer, of Dreicer & Co., when seen Monday by a representative of THE JEWELERS' CIRCULAR-WEEKLY corroborated the newspaper story to the effect that the jewelry had been recovered, but said that he was not in a position to give out any information as to whom the jewels belonged. He added, however, that they were the property of a customer of his, but would not make known the name.

Pittsburg.

Edward Schaffnit and family have returned from Chautauqua.

A. B. West and wife are on a pleasant trip to Cambridge Springs.

The wife of George Goddard, of Godard, Hill & Co., is in poor health.

Benjamin Culbertson, of J. R. Reed & Co., is confined to his home by illness.

Mr and Mrs. Dawson B. Adams are journeying at Morris Cross Roads, Pa.

P. C. Gillespie, of Gillespie Bros., is home from a European diamond-buying trip.

Harry Heeren, buyer for Heeren Bros. Co., has been spending the last week at Somerset, Pa.

C. S. Wiley expects to visit the Seattle exposition before returning to Pittsburg from California.

W. M. Barbour, of Midway, and Asa Joseph, of Donora, were in Pittsburg, last week, buying stock.

George W. Biggs, who has been fishing for mountain trout at Mt. Chateau, W. Va., has returned to Pittsburg.

Sam F. Sipe and his son, Sam G. Sipe, have returned from Europe after importing several hundred thousand dollars' worth of diamonds.

The repairs and alterations and decoration of the store of Gillespie Bros. have been completed, and this firm now has one of the most attractive stores in the city.

F. F. Aul, of the George B. Barrett Co., is spending his vacation in the country.

Miss Helen McFall, of the same house, is in the Great Lakes. John Allison is home from Conneaut.

The Crescent Jewelry Co. is preparing to open its new store at 441 Smithfield St. The fact that this location had been leased has already been noted in THE JEWELERS' CIRCULAR—WEEKLY. New fixtures are being built for the store and the interior is being renovated. The application for a charter will be made Sept. 1.

Floyd Twyman, who was arrested here recently on the charge of grand larceny, referred by the Lewis Jewelry Co., Cleveland, O., was discharged in police court at that city later. Twyman proved that the watch which he pawned in this city was one which he had bought from the Lewis company. It was explained in police court that through an error the number of the watch bought by Twyman was reported to the police as the number of a watch taken by the burglars.

Early last week thieves entered several stores in the Frankstown Ave. district, among them that of the Empire Loan Co., 17 Frankstown Ave., and carried off a quantity of jewelry. A rear door of the company's store was found open at 2 o'clock in the morning. The thieves secured 55 gold lockets, eight watches and a quantity of other jewelry. The police are investigating, but there is no clue. The store is owned by Louis Shopp, but the value of the goods stolen was only \$100.

The Hardy & Hayes Co. is building a crystal department in the rear of the first floor store room, which is being handsomely fitted up for displaying cut glass. The fixtures are ebony, with beautiful look-in-glass shelving. The ceiling of the

cases have reflectors which, when the cases are finished and in use, will give a very attractive appearance to the display. Mr. Hardy has returned from Chautauqua, where he had been ill. Mr. Hayes, of the same house, is taking a few afternoons off at the Sewickley Country Club to play golf with his sons before they return to school.

The police, last week, arrested John E. Newton, aged 41, rooming at 123 Seventh Ave., and charged him with trying to work the torn-bill game. He also had a model of a 100-hole jewelry lottery, a board pierced with 100 holes through which anyone taking a chance thrusts his finger. Those taking a chance must pay according to the number selected behind the hole. The lucky number wins a watch. Newton, so far as known, took no orders here for the board, but it is alleged that he tore the opposite ends of two one-dollar bills and then presented them back at the Government building for redemption. In this way he would receive \$3 for \$2.

Baltimore.

Arthur C. Macy is taking week-end trips to Atlantic City during this month.

The Charles C. Crooks Co. is having the interior of the establishment renovated and several new devices installed.

Robert Rausch will shortly move from 310 N. Howard St. to 326 W. Lexington St., where he is having the premises improved, including the building of new show windows.

Talbot W. Jenkins, of Jenkins & Jenkins, is at the Blue Mountain House. Joseph B. Joyner and J. Wilson Pleasants are also away on their vacations, the latter at Atlantic City.

James O. Bates, president of the Hennege-Bates Co., has returned from an extended automobile trip up north. John D. Reynolds, the vice-president, has gone to Ocean City, Md., for several weeks.

George Schwartz, who was apprehended a short time ago behind the counter of G. T. Sadtler & Son, 14 E. Baltimore St., this city, has been held in \$2,000 bail by Justice Hebb, of the Central Police station.

The Maryland Retail Jewelers Association will hold another outing, Thursday, Aug. 26, at the Mikado shore, in Anne Arundle County. A "Maryland Shore" dinner will be served at 6:30, and the events will include a ball game between the married men and the single men, boating, fishing, etc.

Dr. A. J. Volek is working on a terrapin set in silver, of which the ladle has the bowl fashioned like an oyster shell, while small diamond-back terrapin climb over the handle amid masses of seaweed. He does his own casting and smelting by a process discovered in Paris, recently, and introduced in this country. By this process the design issues complete from the mold without further finishing touches. Dr. Volek is an assiduous and versatile workman, notwithstanding his age and the fact that he uses crutches. In beaten silver or repoussé work he depicts scenes from fairyland, folklore, poetry, animal heads, and the like, wreathed in silver of exquisite design.

Newark.

TRADE CONDITIONS.

Continued reports of a record breaking Fall season in sight are received every day, and almost all the manufacturing jewelers in the city are engaging extra help in anticipation of the rush. Several who have only had a dozen or so working during the Summer already have five times that number employed.

John Bolt, of the Bannatyne Watch Co., Watertown, Conn., was in Newark last week.

The Gebrhardt Mfg. Co., 59 Warwick St., has been organized for the manufacturing of jewelry and has begun operations.

The Alberts, Buob & Van Ness Co. has been incorporated with an authorized capital of \$100,000 to manufacture and deal in jewelry. The incorporators are: Conrad J. Alberts, Edward Buob, of Newark, and Herbert C. Van Ness, of Hilton.

The Sloane & Chace Mfg. Co. has been awarded a contract for supplying to the Census Bureau tabulating machines at \$400 each and 300 punching machines at \$200. The machines will be used in compiling statistics for the next census. The concern was formerly manufacturer of jewelry machinery.

George J. Busch, a jeweler at Springfield Ave. and High St., was robbed of a diamond ring worth \$250, Thursday night, by a well dressed young man. The fellow asked to see other goods while he was examining the ring. As Mr. Busch moved away a few feet the stranger dashed through the door with the diamond ring. Mr. Busch gave chase, but the man got away by running through High and Stirling Sts.

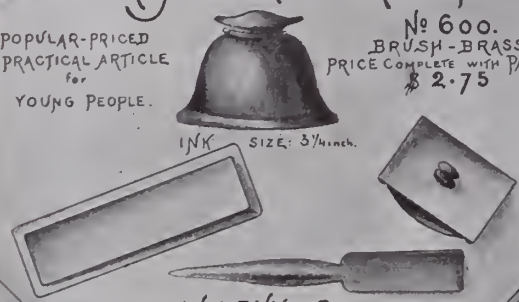

Mr. Van Ness, of the sales department, and Mr. Hoffman, of the shipping department, of the American Oil & Supply Co., are taking an automobile trip along the New Jersey coast with their parents. Mr. Van Oreutt has returned from a most enjoyable vacation in the south. He brought back with him pictures of a southern girl whom he wooed and won while in Virginia. The engagement has been announced.

When Elias Stone, 53 Rankin St., a peddler of diamonds and jewelry, woke one morning recently he found his trousers, which he had placed on their customary hook the night before, lying on the floor of a room he assigned to a boarder last Wednesday. The latter was missing, so Stone told the police about his loss. He said he was out about \$900 in money, rings and diamonds. In the list he gave to the police Stone declared that several loose diamonds worth \$300 were taken, \$30 in bank notes, a gold watch, a bracelet set with nine diamonds, a heart locket, a gypsy ring, a wedding ring and a gold chain, besides other pieces of gold jewelry.

Jewelry, valued at about \$200, was stolen, one night recently, from the store of M. Abrams, Kansas City, Mo. The loot included 56 signet or set rings, nine solid gold rings, 10 fobs, three ladies' neck chains, four waist sets, three ladies' large chains, two dozen collar link buttons, two brooches, four lever buttons, four lockets and crosses, six link buttons, 14 filled rings, six emblem pins, 10 gents' chains, five misses' chains.

Newspaper Ads Free

To Any Dealer Who Sells K & H Umbrellas

Let Your Next Umbrella Be a K & H With New Detachable Handle

Then you will not lose it. You can put the handle in your pocket. The insurance against loss is worth a good deal if you have a fine umbrella.

QUALITY

Umbrellas and Canes

have extra distinction and beauty due to selected materials, expert workmanship and most advanced ideas.

Our line of K & H umbrellas includes handles in Virgin Color Gold, Sterling, Oriental Pearl, Ivory and rare woods and the prices are low considering the fine quality. K & H umbrellas are sold by jewelers only. Not in dry goods or department stores. K & H on any umbrella is a guarantee of quality.

Your Own Name Here

Here is only one of a series of newspaper ads we have prepared to help our dealers sell more umbrellas.

There are several sizes—some larger, some smaller, prepared for us by an advertising expert and all ready in type form so that you need only have the newspaper set your name in the blank space at bottom.

These advertisements will make your store known as "THE" place to buy umbrellas.

A full page advertisement of K & H Umbrellas will appear in Collier's issue of September 18.

Every jeweler should make that week "K & H Umbrella Week" by

displaying our umbrellas and advertising them in local newspapers.

Write for one of these newspaper ads to-day.

New Catalog Now Ready

Ask about our new catalog on which we print your name and advertisement free. This de luxe booklet has the "K & H Umbrella Girl" on the front cover—price pastel in four colors.

J. G. Mason, New York manager for the R. Wallace & Sons Mfg. Co., spent a few days here, last week, on his way to Denver.
A slight fire in front of the store of Louis Ritter, 1005 Milwaukee Ave., damaged one of the show windows there last week.
F. H. Noble took his motor boat *Swastika* down to Peoria last week, to take part in the races of the Illinois Valley Yacht Club.
C. L. Morris, formerly with the Hamilton Watch Co., has been engaged by F. W. H. Schmidt to represent him in Indiana and Ohio.
Frank W. Alter, of Holsman & Alter, is on a trip to Atlantic City, accompanied by his wife. Mr. and Mrs. Alter will return Sept. 1.
Edward Vail, Wichita, Kans., will spend a month here to receive medical attention. Mr. Vail's left eye has become seriously affected.

Judge L. Bach, of Bach & Co., accompanied by Mrs. Bach, is on a trip to the Yellowstone Park and the Seattle exposition.
A. Marks, a retail jeweler of Lawrence, Kans., stopped over here, last week, on his way home from a six weeks' tour of the Great Lakes.
Charles P. Smith, for many years traveler for C. H. Knights & Co. and recently with the F. C. Happel Co., died recently in St. Paul, aged 47 years.
The family of Edmund J. Hahn, of H. F. Hahn & Co., has been increased by the arrival of an eight-pound boy, who will be named Ermund J. Hahn, Jr.
Seth Laraway, formerly of Glenwood, Ia., was here, last week, accompanied by his wife. He bought his opening stock for his new jewelry store at Eugene, Ore.
C. E. True, formerly of Muskegon, Mich., who has been roughing it for four months in Montana and Idaho, has again entered the jewelry business at Muskegon.
"Joe" Finn, formerly diamond buyer for Loftis Bros. & Co., has accepted the position as buyer and manager for the diamond department of the A. C. Becken Co.
A. W. Johanson entertained a party of friends at the Bismarck Garden, Thursday night, where the Sviothof Singing Society sang some of their famous Swedish songs.
Coleman E. Adler, New Orleans, La., was here, last week, superintending the construction of new store fixtures for the jewelry store which he will shortly open in New Orleans.
S. E. Edwards, of the house staff of Reed & Barton's Chicago office, has been promoted to the position of traveling salesman and is covering parts of Illinois, Iowa, Indiana and Michigan.
The Jackson Jewelry Co. has taken the store next to its present quarters and increased the size of its store considerably. Geo. Rider, the manager, is now in New York on a buying trip.
M. E. Kinsley, sales manager for the Oneida Community, Ltd., has returned from a visit to the factory at Niagara Falls, N. Y. G. H. Miller is in the northwest. W. E. Scanlon is on an eastern trip.
Mrs. George E. Horn was arrested, last week, charged by Philip Barnett with obtaining \$196 worth of jewelry by false pretenses. The case against her was dismissed, the jewelry being returned to Mr. Barnett.
Lewy Bros. have sold their Van Buren St. store to the Loeb-Kahnweiler Co., a cor-

VISIT ST. LOUIS DURING CENTENNIAL WEEK

One Entire Week of Gala Occasions
THE ENTIRE WEEK OF OCTOBER 3d to 9th

ST. LOUIS WILL CELEBRATE THE One Hundredth Anniversary of its incorporation October 3d to 9th. The week will be a fitting climax to a century of progress and the most gorgeous event in the city's history. A fund of over \$100,000 has been raised to defray the expenses of the celebration. In addition to this the municipal authorities have pledged themselves to assemble as special guests the mayors of American cities and no fewer than one thousand mayors will participate in the festivities. An elaborate programme of balloon and other aeronautic features has also been prepared including a long distance race of spherical balloons and exhibition flights of aeroplanes. There will also be the great pageant of the Veiled Prophet and the grand ball with more than the usual features.

In addition to these entertainment features, St. Louis business men have made elaborate preparations for a convention of retail merchants for an exchange of ideas on advertising, window and show case display, store arrangements and other matters of vital interest to retail merchants, together with a gathering of the best and most successful traveling merchants representing St. Louis houses. These conventions will prove of inestimable value to retail merchants. Special excursion rates will be in force for Centennial week for the entire Middle West and Southwest territory and special arrangements have been made by all the hotels to provide for the entertainment and comfort of the many thousands of visitors who will attend the celebration.

Transformation of the downtown section into a fairyland of vari-colored lights for an all-week Centennial Festival, including music and fireworks

Q ARRANGE YOUR BUSINESS APPOINTMENTS so you can spend Centennial Week in St. Louis. You will regret it if you don't.

oration of which Alfred C. Loeb is president, Leo H. Kahnweiler vice-president and Alexander Kahnweiler secretary-treasurer. F. E. McCullin, manager for Wm. A. Rogers, Ltd., has returned from an eastern pleasure trip, accompanied by his wife. H. Willer, with the same corporation, is spending a few weeks at Quincy, Ill., with his family.

John S. Townsend, 1554 Wabash Ave., in this city, was recently elected grand president of the Order of the Sons of St. George, Jr. Townsend being an Englishman by birth. He will preside at the convention at St. Paul next year.

It was erroneously reported in this column, last week, that W. D. Dreyer had formed a corporation to deal in jewelry. This was a mistake. Mr. Dreyer, who was formerly of Jones & Dryer, has not formed a corporation, nor does he intend to.

A. Trocky, father of S. J. Trocky, the oldest St. jeweler, died last week, aged 72 years, and was buried at Waldheim cemetery. Mr. Trocky had been ill for four months, suffering from a paralytic stroke. He is survived by a widow, four daughters and three sons.

When O. Hirsch, of Hirsch & Oppenheimer, went to Michigan, last week, to bring his family back to Chicago he had to take a 10 days' extra vacation that he didn't figure on. There was a smallpox scare in the town, and Mr. Hirsch was quarantined for 10 days, much to his disgust.

The Landis Watch Co., of Chicago, Ill., as incorporated in West Virginia to manufacture and deal in watches, jewelry, etc., with a capital stock of \$10,000, of which 1,000 has been subscribed and paid. The incorporators are H. E. Landis, Sidney M. Spiegel, Arthur H. Spiegel and Edwin P. Goldsmith, Chicago, and Modie J. Spiegel, Vinnetoka, Ill.

Louis Epstein, traveler for Theo. Jacobs Co., lost a trunk containing \$750 worth of jewelry, last week. He checked his trunk on the interurban line from Springfield to Decatur, Ill., and when he reached Decatur was told the trunk would arrive on the next car. It never reached Decatur, and the supposition is that it was stolen from the platform at Springfield. The trunk was a regulation jewelry trunk painted black with a red diamond "J" painted on it.

Among the buyers in town last week were: G. W. French, Ionic, Mich.; H. R. Daniels, Douglas, Wyo.; W. H. Sales, Mesville, Wis.; B. Goodman, Toledo, O.; T. Randolph, Farina, Ill.; R. Weitlich, Turgeon Bay, Wis.; Geo. F. Beach, Valparaiso, Ind.; A. Pierce, Knox, Ind.; W. C. faeffle, Enid, Okla.; R. J. Jenkins, Amboy, Ill.; R. G. Rutherford, Mt. Vernon, Ill.; C. Peers, Rockford, Ill.; M. Green, Atlanta, Ga.; J. W. Zangl, Spring Green, Wis.; I. Josephson, Moline, Ill.; Frank Hazeltine, Kokomo, Ind.; Arthur Rooelstad, Elmhurst, Ill.; Fred T. Webber, Danville, Ill.; L. Baldwin, Gary, Ind.; J. L. Egleston, Valdema, Minn.; Frank Ricketts, Charleston, Ill.; D. C. Burehett, Kirksville, Mo.

The stores of the Frank Curtis Co. and H. Post & Son, Decatur, Ill., were destroyed by fire recently, the damage to the business district amounting in all to about 1,000,000.

Minneapolis and St. Paul.

E. C. Baxter, Minneapolis, was recently in Indiana, visiting his old home.

R. Bronson, watchmaker for H. H. Green & Bro., Minneapolis, is confined to his home by illness.

The Minneapolis Drug Co., Minneapolis, has installed a new holiday line, to which has been added a number of articles of jewelry.

A. O. Hulberg, who recently sold his business at Two Harbors, Minn., to his nephew, has moved to St. Paul. He will take a trip through the western country.

Mr. Lund, Owatonna, Minn., is now watchmaker for John D. Bodfors, Minneapolis. Peter Uldine, watchmaker there, is taking a two months' vacation for the benefit of his health.

The Twin City Wholesalers and Manufacturers' Association, arranged for the usual merchants' excursion rate for the latter part of August. Merchants buying tickets between Aug. 15 and Aug. 25, returning within 10 days, by conforming to the requirements, were able to secure a rate of one fare and a half for the round trip.

Out-of-town jewelers in the Twin Cities, last week, included: Mr. Kelner, brother of R. W. Kelner, Clark, S. Dak.; Mr. St. John, of St. John-Strand Co., Lakota, N. Dak.; Mr. Van Nies, of C. F. Fisher & Co., Groton, S. Dak.; Wm. Krohn, Annandale, Minn.; Mr. Kulberg, of Goldstein & Kulberg, Hankinson, N. Dak.; E. H. Prey, Watertown, S. Dak.; H. O. Schleuder, Springfield, Minn.; Mr. Nelson, of the Imperial Drug Co., Bagley, Minn.; H. B. Lund, Morris, Minn.

Omaha.

A. Winler, with S. W. Lindsey, is taking his vacation.

Mr. Shook, of the Shook Mfg. Co., is home from a visit in Canton, O.

O. C. Homan and wife are spending two weeks in Des Moines, Ia., and the lakes.

Phil. Folsom, Ashland, Nebr., was in this city, last week, replenishing his stock.

Joseph P. Frenzer left last week for a two weeks' fishing outing at Winter, Wis.

Mrs. A. Wahlstrom and daughter, of Oakland, Nebr., were in Omaha visiting friends, last week.

A. Mandelberg supplied the large handsome silver trophy cup which was awarded at the tennis tournament, recently.

A. B. Regnier, who had been in charge of the watch repairing department of Albert Edholm has resigned his position.

D. M. Gillette, formerly of Deadwood, S. Dak., but now residing in Boston, Mass., was in this city, last week, visiting friends.

Mrs. Albert Edholm and small daughter left, last week, for a visit of six weeks in New York. Mr. Edholm leaves this week to visit his brother, who is in the jewelry business in Evanston, Wyo.

M. D. Franks, who is in the jewelry business in N. 16th St., expects to move the latter part of September from his present location to 1611 Farnam St. The store is being remodeled. A marble floor, new wall cases and floor cabinets will be installed.

Indianapolis.

O. A. Wise, Mitchell, has gone to eastern cities on a business and pleasure trip.

Mr. and Mrs. J. H. Reed are spending several weeks at their country home in Brown County.

Mr. and Mrs. F. L. Bryant went to Hebron, last Thursday, to attend the annual reunion of the Bryant family.

John M. Williams, watchmaker for J. H. Reed, has gone to Seattle, Wash., and other points in the northwest for a few weeks.

Harry J. Reed, who has been assisting his father, J. H. Reed, has enrolled for an agricultural course at Purdue University.

F. C. Ries, of Ries & Armstrong, Macon, Ga., was in the city, last week, to attend the races at the Indianapolis motor speedway.

Harry Sebel, city salesman for the Baldwin, Miller Co., has gone to a farm near Zionsville, where he will spend his vacation.

After a month's trip to Amsterdam, J. C. Sipe has returned home. He went abroad July 10, to purchase diamonds from the cutters.

Word comes from Carl Walk, who is fishing at Kagawong on Georgian Bay, that the fishing is excellent. He caught 60 black bass in three hours' time one day last week.

It is expected that the Order of Owls will give J. P. Mullally an enthusiastic reception when he returns from an extensive eastern trip, next week. While away Mr. Mullally was elected supreme president of the order.

There is talk of reviving the Indianapolis Retail Jewelers Association early in the Fall. The association has been inactive for several months, but there are a number of questions which members believe should be given consideration. It is expected a meeting will be held next month.

Owing to the three days' race meet at the Indianapolis motor speedway last week, there was a large number of retail jewelers in the city. Among them were, William Helman, Terre Haute; R. B. Vent, Kokomo; J. Mayer, Elwood; George F. Long, New Richmond; L. D. Smith, Jonesboro; Mr. and Mrs. Geo. L. Spahr, Lebanon; George H. Morgel, Brazil; H. L. Rost and son Carl, Columbus; G. C. De Camp, Shirley; Mr. and Mrs. S. B. Merrick, Plainfield.

J. H. Reed has completed an attractive gold and silver ornament for G. L. Bnm-baugh, an aeronaut, who has presented it to Carl G. Fisher, also an enthusiastic balloonist. The ornament is about six and one-half inches high. It represents the balloon "Indiana." The bag of the balloon is about two inches in diameter and gold plated. The bag and basket are excellently engraved and on the bag appears the name of the balloon and the presentation card. The ornament was enclosed in a handsome leather and velvet case.

E. T. Bakody has engaged in business in Oklahoma City, Okla., having succeeded to the business of Harry Gerson, of that place.

M. F. Wood, Lowell, Mass., is about to enlarge his retail jewelry establishment. He will, in future, occupy the entire store and basement at 104 Merrimac St.

1809—1909

100 Years—City of St. Louis

1844—1909

65 Years—L. Bauman Jewelry Co.

“To the Front”

then and now, by business methods that must ever win.

L. Bauman Jewelry Co.

the oldest and largest Jobbing House in the West for DIAMONDS,

WATCHES and JEWELRY, want your trade, be it large or small. We are now selling goods to the grandsons of many of our first customers, for **once a customer, always a customer.** A cordial invitation is extended the Trade in general, to make our Offices their headquarters during Centennial Week.

L. Bauman Jewelry Company

ESTABLISHED 1844

CENTURY BUILDING

ST. LOUIS, MO.

St. Louis.

Herman Rohs, Cynthiana, Ky., stopped in the city to purchase stock on his return from California.

Mrs. I. J. Spieldock, of the Erber Jewelry Mfg. Co., returned on Friday from a business trip to Jefferson City, Mo.

Charles H. Lyle, of the J. Bolland Jewelry Co., is spending his vacation at Mackinac, Mich., accompanied by his family.

St. Louis creditors of W. H. Wallace, Guthrie, Okla., have received notice that W. H. Wallace has gone into bankruptcy.

Al. P. Wolff, of the Elliott Jewelry Co., who was taken sick in Texas while on a business trip, has recovered and resumed his trip.

E. Smith, president of the Smith's Credit Jewelry Co., is spending a three weeks' vacation at Salado, Ark., accompanied by his wife.

Massa, of the Bauman-Massa Jewelry Co., is on a vacation trip through the North, accompanied by his wife. They will return in about a week.

Sam Gold has filed a reply in suit in Justice Spaulding's court against Morris and Ary Elsenstein. The claim is for \$34.20. The case is set for Aug. 27.

S. Bauman, of the L. Bauman Jewelry Co., who has been on a pleasure trip to Liver, Salt Lake City, Portland and Seattle for weeks, will return in a few days.

W. Hoyt, president of the Hoyt Jewelry Co., will leave the first of the week on a four weeks' business trip through the Northwest. Later he will make a trip to New York.

Mr. Penney, formerly with Joseph Ebeling here, but now with C. L. Norsworthy, El Paso, Tex., is visiting here on his way home from a six weeks' trip through the Northeastern States.

J. Shearer, who recently graduated from the St. Louis Watchmaking School, will open a store at his home town, Gleason, Tenn. He has been buying his stock in St. Louis during the week.

Harris, diamond merchant, Commercial building, returned Sunday of last week from Europe, where he spent two months, visiting Antwerp, London, Paris, Liverpool and Brussels and making purchases.

F. Blankenmeister, of the Blankenmeister-Oberting Jewelry Co., will leave in a few days on a vacation trip to Florida. George Oberting, of this firm, has returned from a three weeks' business trip through Illinois.

J. Burke, head of the Brooks Jewelry Optical Co., is spending a week in Chicago. He was accompanied on the trip by J. Burke, who has completely recovered from her recent illness during which she underwent a critical operation.

by Culbertson, son of vice-president S. D. Culbertson, of the Hess & Culbertson Jewelry Co., and a recent addition to the staff of the company, has gone to Geneva, Wis., to spend his vacation. He will not return until Sept. 1.

Shahman & Jacobs, 223 Collinsville Ave., St. Louis, have put in a new front and remodeled their store, and it now presents a much more attractive appearance than formerly. L. Lukkason, formerly with

Tobin & Cannon, Springfield, Ill., is now with this firm.

J. Bolland, president of the J. Bolland Jewelry Co., will leave next week for New York and Atlantic City. He will transact business in Atlantic City and join his family for a short time there, where they have been spending the entire summer. He will be gone three weeks.

Leakage from a water pipe, Friday night, on the second floor of the building at 7th and St. Charles Sts., occupied by the F. W. Drosten Jewelry Co., damaged the ceiling, fixtures and stock of the jewelry company on the first floor. The ceiling is being redecorating.

Alfred Clark, western sales manager of the Oneida Community, with offices in the Victoria building, has returned from Omaha, where he attended the national convention of retail jewelers and looked after an extensive exhibit of the Oneida products. Mr. Clark is expecting a visit soon from a number of the Community leaders.

Harry W. Mark, of the St. Louis Clock & Silverware Co., and Miss Amelia B. Drissel, daughter of Police Sergeant Michael Drissel, of the Central District, will be married Aug. 31. The young couple will be at home at 3122 Keokuk St. Mr. Mark and Miss Drissel have known each other since their school days and have been sweethearts a long while.

Mrs. Susan R. Buder, 2023 Park Ave., widow of the late William Buder and aunt of Otto Buder, died at the Josephine Hospital here after a month's illness. Mrs. Buder's husband founded the jewelry business now conducted by Otto Buder, at 2118 S. Broadway. She continued the business after the death of her husband until eight years ago, when she turned it over to her nephew.

L. J. Vogt, manager of the silverware department of the Hess & Culbertson Jewelry Co., has entered upon his vacation and is spending it in making preparations for his marriage to Miss Grace Lupton, of Montgomery City, Mo., which is to take place at the young lady's home, Sept. 1. The couple will take an extensive eastern wedding trip and on their return will begin housekeeping in this city.

Creditors of August Rosenberg, until recently doing business as the Providence Jewelry Co., will have a meeting Monday at the office of Alfred G. Wilson, trustee under a chattel deed of trust, at his office, 909 Times building, to adjust and allow claims against the estate. The business went into bankruptcy, recently, and the stock was sold out by an auction company under the deed of trust. The invoice was \$9,000.

Dispatches from Camp Perry, O., where the military rifle competitions are in progress, indicate that the Missouri team, of which J. L. D. Rodgers is a member, has good prospects of finishing in first place. The high scores have been made by Mr. Rodgers in the 200 yards, slow fire; the 600 yards, slow fire, and in the skirmish run. Mr. Rodgers is president of the Rodgers-McCoy Jewelry Co., in the Star building.

Joseph Ebeling, president of the St. Louis Retail Jewelers' Association, will

leave Monday evening for Kansas City to attend a meeting of the retail merchants of the State as one of the representatives of the North St. Louis Business Men's Association. Shortly after his return from there he will leave for Alabama to attend a meeting in the interest of a Mississippi Valley deep waterway, as a representative of the same organization.

A window of the Mermod, Jaccard & King Jewelry Co., in which a display was shown of jewelry made in St. Louis during "Made in St. Louis Week," was photographed and used in the St. Louis Times in connection with an article exploiting the made in St. Louis idea. Displays were also made during the week of goods by the Hess & Culbertson Jewelry Co., the F. W. Drosten Jewelry Co. and other jewelry houses that do their own manufacturing.

Herman Mecklin, of William Weidlich & Bro., will return next week from a vacation trip of a month, spent mostly in Chicago and Moline, Ill. H. F. Hines, who "makes" the big cities, is in for a few days. H. L. Hollister has come in from a trip through Missouri and Iowa, but will get out again in a few days. Herman Spaekler, who left the Weidlich firm a year ago, to take up country life near Alton, Ill., has returned and is in charge of the stock department.

Charles Hellwig has sold the stock and fixtures of his jewelry store at 752 S. 4th St. and has closed up the place. He will hereafter confine himself to his newer place of business in the Star building, at 12th and Olive Sts. The S. 4th St. store had been at that location for many years, but the neighborhood finally underwent such changes as to render it less desirable for that class of business. Mr. Hellwig first opened another store on Olive St. and then closed out at the old place.

Out-of-town jewelers in St. Louis, during the past week, were: F. W. Meisenheimer, Ava, Ill.; J. M. Sharp, Lamar, Mo.; A. D. Taylor, Beaver Dam, Ky.; Fred Simon, Collinsville, Ill.; J. L. Prevallet, Perryville, Mo.; Sigmund Cachs, Shreveport, La.; D. H. Schreaves, Greenville, Ala.; A. H. Krause, Greenville, Ill.; A. P. Wolff, Murphysboro, Ill.; P. A. Kirsch, Millstadt, Ill.; W. H. Jahn, Pacific, Mo.; J. R. Krug, Staunton, Ill.; C. H. Scanlon, Indianapolis, Ind.; J. Levinski, Waco, Tex.; William Pfaeffe, Enid, Okla.; Mr. May, of Schaul & May, Atlanta, Ga.

Savannah, Ga.

Frank Werner was a member of the Grand Jury of Chatham Superior Court for the July, 1909, term, which has just ended.

S. E. Theus, of Theus & Co., and a director of the Savannah Chamber of Commerce, is an ardent supporter of the movement to hold a Panama Exposition in Savannah, Ga., in 1915.

Because \$600 was the highest bid offered at auction for the bankrupt estate of A. Levy & Son, consisting of the stock of jewelry in two small stores and a bottling plant, the referee in bankruptcy has authorized the trustee to offer the property at private sale in order to ascertain if a larger amount can be secured.

Cincinnati.**TRADE CONDITIONS.**

All lines of the trade report very good business, with every evidence to show that the Fall and holiday trade will be exceptionally good.

I. L. Grenwald has bought out Walter Ickerd, 22 Arcade.

Frank Dunn, of Dunn & Rodenberg, is here on his initial trip.

Jesse Ray, with Frohman & Co., returned this week from Texas.

Lee Loeb, of Merman & Loeb, leaves this week for a five weeks' trip through the west.

G. M. Braham and Mr. Jacobson, with J. & J. Plaut, left Aug. 20 for the west and south.

F. Young, Warren, Ind., has renovated his store, making it one of the finest in that territory.

Geo. Detmering, with the M. Schwab Jewelry Co., left Saturday on his regular business trip.

Arnold Brandt, San Diego, Cal., recently passed through Cincinnati on his way to his home in W. Va.

"Gus" Rosenberg, a well-known manufacturer, was in the city the past week visiting friends here.

W. J. Gow, of the Standard Button Co., Lowell, Mass., spent last week among friends in the city.

C. H. Bowen, of Winchester, Ky., stopped over in Cincinnati on his way home from Michigan, recently.

D. Gruen, of D. Gruen, Sons & Co., is in Clark's Lake, Mich. Geo. Gruen, of the same firm, is in California on business.

H. H. Lentz, watchmaker for Louis Kummel, is away on a 10 days' pleasure trip to Detroit, Mt. Clemens and Niagara Falls.

Stewart Kelly, a watchmaker of Farmer City, Ill., who was married Aug. 18, stopped over in the city a day on his wedding trip East.

Chas. W. Lucisu, of the Frank Herschede Co., is at Camp Arthur, Ind. C. Bennett, bookkeeper for the same firm, has returned on a week's outing.

The Holland Gold Pen Co. reports that the steadily advancing price of crude rubber is having its effect on the manufacture of fountain pens.

A. Chapman, of the Loring-Andrews Co., is spending a two weeks' vacation in Nevada. Before returning he will go East on a two weeks' business trip.

Carl Thoma, of the Thoma Bros. Co., starts out on his regular business trip this week. Fred Thoma and Jerome Thoma, of the same firm, are both out looking after their regular territories.

"Sig" Strauss, of Lindenberg, Strauss & Co., has been in Christ's Hospital for the last two weeks undergoing a slight operation. He is rapidly recovering, expecting to leave there the first of next week.

Wm. S. B. Oskamp, of the Oskamp Jewelry Co., arrived in New York from Europe, last week, and was met there by A. J. Oaks, manager of the same firm, who has been visiting the eastern jewelry market purchasing goods for the holiday trade and for the new store.

Burton Fox, of the Fox Bros. Co., sailed for Europe, Aug. 18, on the *Lusitania*, expecting to be gone three months. Geo. Fox, of the same firm, leaves Aug. 21 for the Pacific Coast. I. N. Fox, of this house, returns next week from a western trip of two months.

Out-of-town jewelers who have been in the city, recently, include: F. J. H. Schell, Xenia, O.; M. Marlett Middleton, O.; Jno. Walsh, Delphos, O.; Mr. Wilshire, Paris, Ky.; Al. Grenwald, Maysville, Ky.; Will Rossier, Martinsville, Ind.; E. A. Morgan, Atlanta, Ga.; L. C. Pettit, Williams-town, Ky.; I. L. Pendley, Toccoa, Ga.; A. Abraham, Nashville, Tenn.; C. Roberts, Springfield, O.; Aug. Schunck, Minister, O.; C. F. Cross, Gadsden, Ala., and J. D. Ward, Rising Sun, Ind.

Milwaukee.

Adolph Turek has opened a new store at 929 12th St.

J. Armstrong, with the Paye & Baker Co., New York, called upon Milwaukee friends, recently.

F. C. Hyde & Co., Appleton, Wis., will furnish the \$75 diamond ring offered by the Appleton *Post*, in a contest.

Jacob Meinzer, Jr., formerly watchmaker with Theodore Schelle, has opened a jewelry store at 3226 North Ave., Milwaukee.

Among the out-of-town jewelers in Milwaukee, last week, were: R. Weitlich, Sturgeon Bay; J. B. Kimball, Waukesha; William F. Notbohm, Oconomowoc; Val Schemerell, Sun Prairie; F. P. Beswick, Racine, and John Armbruster, Cedarburg.

A pearl weighing 19 grains, perfect in shape and color and valued at \$2,000, was found, recently, near Janesville by a young farmer named Horace Pease. Jewelers are enthusiastic over the find and say that the pearl is one of the finest found in Wisconsin this year. The pearl harvest in the State this year has been unusually large. The specimens found have been more than ordinary.

Valued at more than \$60,000, one of the finest exhibits of Wisconsin pearls ever displayed in Milwaukee, is now being shown in the windows of the Bunde & Upmeyer Co., leading jewelers of the city. The pearls range in value from \$1 to \$2-000 and comprise Bunde & Upmeyer's purchase in the State, this season. Fred Osterwald, manager of the firm's New York office, is in Milwaukee, this week, arranging the listing of the pearls.

Archie Tegtmeier seems to be attracting national attention with his idea of organizing a national bald-headed club. Mr. Tegtmeier is in receipt of letters from parties all over the country commending him for forming the Milwaukee club and announcing that co-operation will be extended in the organization of the national body. Mr. Tegtmeier's Milwaukee club proposes to induce a growth of hair on the bald heads of its members by encouraging the wearing of hats or other headgear as little as possible.

Friends of John Gaard, formerly a jeweler at Beloit, Wis., are greatly alarmed over his apparent disappearance. Following the death of his wife, a few months ago, Mr. Gaard sold his jewelry business and left Beloit, locating for a time at Denver, Colo. Mail forwarded to his Denver

address has been returned and all trace of the former jeweler has been lost. Mr. Gaard has property interests at Beloit and his rent has been collected regularly by friends and deposited in a bank, but no news of Mr. Gaard has been received. At the time he left Beloit his health was poor and he was much depressed owing to the death of his wife. Every effort is being made to locate the missing jeweler.

Pacific Coast Notes.

Pollock Bros., Riverside, Cal., have moved into new and larger quarters.

James Wilson, New Haven, Conn., is now visiting in the City of Mexico on a pleasure trip.

Dupen & Son, Chico, Cal., have moved into a new store at that place, and installed new show-cases.

Asa Kendall, of Kendall & Smith, Pasadena, has just returned from a business trip of two months in the east.

Raymond Finch, brother of Thomas Finch, Covina, Cal., has gone to San Francisco to take a course in watchmaking.

W. B. Woolsey, Sawtelle, Cal., has renovated his store and made many improvements, in anticipation of a brisk Fall business.

The Santa Paula Jewelry Co., Santa Paula, Cal., has been bought out by Fred Bacon, Los Angeles. Walter Bartlang will manage the business for Mr. Bacon.

W. B. Williams, Highland Park, Cal., has secured a five years' lease on the new Hanlin building, now being erected at 5807 Pasadena Ave., in the same block as his present store, and will move into it at an early date.

George Cochran, known to the police under several aliases, has been arrested in Oakland, Cal., for attempting to sell jewelry without a license. The goods found on his person were identified as being part of the loot of a recent burglary.

J. C. Wakefield, Healdsburg, Cal., who is taking a long vacation this year, has spent considerable time motoring in the Sierra Nevada mountains. He has been in the Lake Tahoe region and along the Truckee River, and reports the most enjoyable time of his life.

Amethysts of fine quality are being mined at the present time in the Taxoo district, Mexico, and several shipments have been made to the United States and to London. The Mexican properties are owned by Don Placido Garcia, of the Hotel Barcelona, City of Mexico.

Because his customer looked and acted like a farmer, A. J. Padgham, of the firm of J. H. Padgham & Son, Santa Ana, Cal., was the victim of a bunco game recently. The fellow visited the store twice on Saturday evening and said that he lived at Garden Grove. He selected goods to the value of \$19 and then presented a check for \$57.50, drawn by a well-known company. He was given the merchandise, \$3.50 in change and the firm's check for \$35. Payment on the latter was stopped before it was cashed by the stranger.

Wesson & Holland have moved from Midlothian, Tex., to Lubbock, in the same State, where they will continue business.

**ROY WATCH
CASE CO.**

21-23 Maiden Lane, New York
704 Market St., San Francisco

Los Angeles.

Philip Klein, 445 S. Spring St., is advertising a reduction sale at 25 to 50 per cent. discount.

I. W. Birnbaum, of Birnbaum Bros., is ending two weeks at Lake Tahoe and in Francisco.

E. L. Dayton, of the material department of the E. W. Reynolds Co., is taking a vacation at Catalina Island.

Paul D. Walsh, of Hambright & Walsh, is just returned from a two weeks' business trip among the company's customers.

P. Asbury, formerly with Montgomery Co., and Homer M. Atterbury are new additions to the sales force of the Whitley Jewelry Co.

George M. Williams, proprietor of the Nevada Watch & Optical Co., is in the east on a business trip. Mr. Grimm is in charge of the store.

Out-of-town jewelers in Los Angeles, recently include: Y. H. Boudreau, Hanford; R. Kennedy, San Bernardino; F. E. Lentz, Pomona.

The Southwest Turquoise Co. is about to continue its branch store at 531 S. Spring

that location not having been found entirely satisfactory for this line of business.

W. Simmons, who is spending his vacation at Lake Tahoe, has given evidence to his success here of his success in fishing by sending them two liberal shipments of fine brook trout.

Arthur P. Care, head of the material department of the E. W. Reynolds Co., has bought a new home in Boyle Heights, this city. He spent part of his vacation in fitting out the new place.

Chester A. Montgomery, of Montgomery Co., has returned from his vacation spent at Coronado Beach. His brother, Monroe Montgomery, is taking a vacation at Santa Monica Beach, 200 miles up the coast.

Wm. M. Kinney, 607 S. Spring St., has had it necessary to put on an additional watchmaker, and V. T. Mitchell has been employed. George Spalding, with Mr. Kinney, has just returned from a vacation spent in the mountains.

Percy H. Greer, the auctioneer, last Saturday, concluded his sale of S. B. Bailey's stock rescued from the fire. The sale was a very successful one, there being generally a good attendance and fair prices being realized. Mr. Bailey is now in the city buying new goods and expects to reopen his store with an entirely new stock next month.

The J. C. Fleming Co. has let contracts for extensive improvements in the store. A balcony will be built in the rear in order to enlarge the optical department, and new show cases will be placed in the rear of the store. A grinding plant will also be installed. E. E. Gray, formerly in the Broadway Department Store, will be added to the force in the optical department.

The Carl Entenmann Jewelry Co., recently designed and has just completed an exceptionally beautiful necklace for a German baroness living in New York. It contains some 40 or more pearls of various sizes and a number of very handsome opals, including an especially beautifully black opal. All the work itself is done in 14-kt. gold. The

company also designed and made for the same customer a handsome cross, chain and dog collar of New Zealand jade; also a heavy jade necklace containing nine large stones.

H. F. Wallace, 414 S. Broadway, adopted a novel way, last Saturday afternoon, after the store was closed, of paying his compliments to his customers in Southern California. Taking his new automobile, with which he recently toured the east, he took with him W. A. Wheeler, A. E. Baranger and H. M. Seaman, of his office force, and made a whirlwind trip, visiting Pasadena, Claremont, Pomona, Ontario, Upland, Riverside, Colton, Redlands and San Bernardino, making a five-minute call on each of his customers in each of those towns. On reaching home, his odometer showed that he traveled 170 miles. Twenty-five calls were made, each being strictly limited to five minutes by the watch. At one time before reaching Riverside a speed of 62 miles an hour was reached. His customers were evidently pleased with this little attention shown them, and his office force was more than delighted with the trip.

Cleveland.

A thief stole Charles Ettinger's \$3,500 motor car from in front of Mr. Ettinger's jewelry store, 652 Euclid Ave., one afternoon early last week, and the loss was not discovered for several hours. Mr. Ettinger has been the victim of thieves in various ways. Burglars broke the window of his store at 2005 Ontario St. and also robbed the shop in the Rose building. Once before an attempt had been made to steal his automobile. The missing car is less than a year old, is painted gray and has a State number 595.

A mistake in the number of a watch reported to the police as having been stolen caused a somewhat serious complication. Acting on the information sent out, the Pittsburg police recently took into custody Floyd Twyman, 24 years old, who is also said to be known as Harry Hatfield, and locked him up in the belief that he was implicated in the robbery of the \$5,000 worth of jewelry from the Lewis Jewelry Co., 530 Euclid Ave., this city. Hatfield, when arrested, was trying to get a loan on a watch the number of which corresponded to that reported to the police. Hatfield was brought back to Cleveland and later released in the police court after he had established the fact that the watch in question had been bought and paid for and was not a part of the loot. The detectives admitted he was not the man wanted and he was released.

New Orleans, La.

Coleman E. Adler has returned from a 10 days' trip to Chicago in the interest of his new store.

Moise Waldhorn and his wife returned to New Orleans, last week, from an extensive tour abroad.

T. Hausmann & Sons made the beautiful silver plaque bearing the names of the contestants in the Working Girls' Contest for the benefit of Touros Infirmary, the net proceeds of which aggregated \$93,055.96. The plaque will adorn the center hall of the hospital.

Kansas City.

Harry N. Snow, of the Meyer Jewelry Co., spent last week in Chicago.

A branch store of the Empire Jewelry Co. has been opened at 912 Main St.

C. H. Wardell, Nowata, Okla., passed through this city early in the week on his way home from the Seattle Exposition.

George H. Edwards, of the Edwards & Sloane Jewelry Co., and his wife, will return from a trip to the lake region next Monday.

Noble R. Fuller, manager of the jewelry department of Edwards & Sloane Jewelry Co., is off on a vacation to the northern lakes. He was accompanied by his wife.

H. A. Herschfield has removed from the Aragon building, 8th and Walnut Sts., to 15 E. 5th St. His new quarters are commodious, convenient and handsomely furnished.

Crellin & Felen have opened a new retail jewelry store at 1003 Walnut St. Mr. Crellin is an old-time jeweler in this city, and until its dissolution was a member of the firm of Ward & Crellin, now D. B. Ward & Co.

Elmira Dunning, aged 14 years, daughter of B. J. Dunning, a well-known jeweler of Kansas City, Kans., died Tuesday night, of typhoid fever. Another child, Robert, seven years of age, is critically ill with the same disease.

The following out-of-town jewelers were in this city during the week: T. J. Kohr, Poteau, Okla.; E. R. Percival, Westmoreland, Kans.; J. O. Stott, Paola, Kans.; V. W. Huffman, Herington, Kans., and Frank Mitchell, Marshall, Mo.

Porter & Wiser Jewelry Co. made a silver plate for the Douglas Chamber of Commerce and Mining, Douglas, Ariz., which contains a handsomely engraved inscription inviting President Taft to visit that city during his western trip. The plate is in oblong form, measures 10 by 6 inches and is inclosed in a morocco case.

Pacific Northwest.

August Molsnoss has purchased the stock of H. F. Daum, Enumclaw, Wash.

Howard Thomas has purchased the jewelry and optical business of J. K. Moore, formerly in business at Wenatchee, Wash., and has opened a store at Cashmere, Wash.

Chas. N. Williams, who went from Corvallis, Ore., as Oregon's delegate to the American National Retail Jewelers' Association held at Omaha, Nebr., is still absent, visiting the leading manufacturing centers. The optical end of the business has been suspended, pending his return.

Atlanta, Ga.

Eugene V. Haynes, of the Eugene V. Haynes Co., has been enjoying an automobile tour from Atlanta to New York.

An application for a charter of incorporation has been made by attorneys representing M. Greer and M. Greenblatt. The company is to be known as M. Greer Jewelry Co., with a capital of \$10,000.

To the Jobbing Trade of the Country

Gentlemen:—Last February I purchased the entire interest of my partner, Mr. Herman T. Regnell, of Regnell, Bigney & Co.

I have reorganized the Company and will do business in the future under the firm name of The Allison Manufacturing Co., makers of high grade goods, and will sell the jobbing trade only.

We are making a most beautiful line, in choice designs, of Brooches, Dutch Collar Pins, Sash Pins, Link Buttons, Scarf Pins, etc., also an exquisite line of enameled goods, Cuff Pins, Combination Sets, etc., tastefully mounted on pads.

You will make no mistake if you give our representative a few moments of your time when he calls upon you.

The Long Awaited Has Arrived

At last a satisfactory Watch and Clock Oil can be obtained. One which will hold its lubricating efficiency— which will not gum— which will not evaporate— which will not become rancid or discolor— which will not corrode the pivots— which does not contain a trace of acid. The solution of the watchmaker's difficulty has been found in

Fulcrum Watch and Clock Oil

Never has any product met with such immediate success as FULCRUM OIL.

ARE YOU USING FULCRUM OIL ?

If not, you are one of the few watchmakers in this country to-day who are not. Jobbers will tell you that the sales have been enormous, and they will tell you that every man who has tried it, has re-ordered. It's the only Watch and Clock Oil ever known which is absolutely free from acid, AND WE CAN PROVE IT.

35c. PER BOTTLE For Sale by all Jobbers \$3.75 PER DOZEN

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published in compliance with Section 6 of said act. Said section provides:

"Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Section 2 of this act. If no notice of opposition is filed within said time the commissioner shall issue a certificate of registration therefor, as hereinafter provided for."

Marks which are stated to have been "Used 10 years" are registrable under the last proviso of Section 5 of said act, which is as follows:

"And provided further, that nothing therein shall prevent the registration of any mark used by the applicant or his predecessor, or by those from whom title to the mark is derived, in commerce with foreign nations or among the several States, or with Indian tribes, which was in actual and exclusive use as a trade-mark of the applicant or his predecessor from whom he derived title for 10 years next preceding the passage of this act.]"

TRADE-MARKS PUBLISHED AUG. 10, 1909.

Ser. No. 42,512. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) PAUL S. REEVES & SON, Philadelphia, Pa. Filed May 19, 1909.

Drive-Wheels in Your Business

A line of Elgin Railroad Movements will prove a strong drive-wheel in your business. Not only will the Railroad Elgin command the patronage of railroad men in your district, but it will also attract *other* trade, for it is only natural that the man who wants a reliable timepiece will go where the railroad man, whose duties require him to have a correct and durable watch, buys his.

Briefly stated, these are the advantages of the Railroad

Elgin

Large plain hands and figures; large spring which will run longer on one winding than that of any other railroad watch; silver finish, metal dial easily seen in faint light—the only metal dial with inlaid figures of hard enamel (or, if preferred, watch can be had with plain enamel dial). The thinnest railroad watch made. Cased at the factory and timed in the case.

Another business drive-wheel is that Elgin is the most popular watch word everywhere—a popularity maintained by Elgin advertising and, in itself, a distinct asset to the dealer—to *you*.

Advertising in railroad magazines is creating a demand for the Elgin with the "49 silver dial" or the "49 enamel dial," and your stock should be in readiness to anticipate the demand. Your jobber or the Company will furnish prices on request.

These are the four grades and established retail prices as advertised:

	GRADE		20 YEAR GOLD-FILLED	25 YEAR GOLD-FILLED
VERITAS		23 JEWELS	\$46.00	\$48.00
VERITAS		21 JEWELS	\$43.00	\$45.00
FATHER TIME (VERITAS MODEL)		21 JEWELS	\$38.00	\$40.00
B. W. RAYMOND	" "	19 JEWELS	\$34.00	\$36.00

THE HOROLOGICAL REVIEW

The Relation of the Thickness and Length of the Mainspring to the Barrel.

Translated from the German of KARL HARMS, in the *Deutsche Uhrmacher Zeitung*.

COMPLAINTS are often heard of the buckling (creeping) of watch springs, which buckled springs are distinguished in the first place by their inferior quality, and, secondly, they are without exception too weak. I do not wish to speak here only for good and expensive springs; for in fact, handmade watches especially the general class of good springs on account of their high price will be attended with difficulty. Even the cheapest springs in the cheap watches must be properly selected. For nothing else is necessary than attention in purchasing and in the choice of springs.

How shall we proceed in the selection of springs? Apparently this is often done without system. Some employ as strong a spring as possible to obtain more power, but they attain their purpose not with the aid of as thick a spring as possible, but by means of a spring of a better quality. With a good spring it is not necessary to resort to such an artifice; it furnishes enough power without this. A spring of poor quality is liable to buckle or creep together already on insertion, much more likely at first winding.

The following is the best-known rule: The spring core or collet should occupy one-third of the diameter of the barrel; the half of the remaining diameter should be occupied by the spring. This rule, however, is not correct; but it merits here special notice because it differs only in one word from the right rule. The right prescription is: The spring core should occupy one-third of the diameter of the barrel; of the remaining surface the spring should occupy one-half. The words "diameter" and "surface" have probably been originally founded in a translation from the French. It may even still be possible to show where and when this error took place. Between the two precepts there is, however, a great difference, as may be perceived from the accompanying sketches.

Fig. 1 shows the breadth of the space in the barrel a properly selected spring should occupy. Fig. 3 shows how broad the space is when the spring is inserted according to the "tripartite division" precept. The difference is at once apparent. It is still more evident, however, when both springs are

wound up. Fig. 2 shows the correct spring as it looks when wound; Fig. 1 a wound spring selected like the spring in Fig. 3, according to the "tripartite division" rule.

Proof of the assertion that springs, in accordance with Figs. 1 and 2, were correctly selected, I am unfortunately unable to produce. Others, better qualified, have

doubtless done this. To what an extent this false precept has been disseminated is proved by the fact that it is to be found even in Sievert, "Handbook for Apprentices" (sixth edition, page 137; in the last, carefully revised eighth edition of Sievert this error does not appear). In the "Uhrmacher am Werkstisch" (Watchmaker at the Bench), however, it is disputed. From this work I learned the correct precept (first edition, page 166). Here also, on pages 164 and 165, the experiment is undertaken of determining the correct thickness and length of the spring by experiment.

The result of these investigations in the case of the "tripartite division" is comprised in the following words: "The spring is of the correct thickness and length when in a state of repose with about 14 coils on each side of the inner barrel wall; it occupies one-sixth of the diameter" (verbatim from

"Sievert," sixth edition, page 137). These and similar precepts have but little value in practice, because they have no relation whatever to a measurement system, least of all to the customary spring standards (the forces). If in spite of this one desires to be guided by such rules, then it is a matter of trying out in place of measuring. I will now show how the thickness and length of a spring may be computed.

Comparing our two figures, 1 and 2 (the correct spring), we notice at once that the spring when wound occupies the same space that is left empty when the spring is relaxed, and *vice versa*. In both cases the ground plan of the spring is annular. The wound spring, however, has as many more coils as the collet has made revolutions in windings. When we, therefore, succeed in calculating the difference in the breadth of the two ring surfaces we need only divide this by the number of revolutions the barrel must make (in most watches this is six) and we have the thickness of the spring.

The ground surface of the spring (its longitudinal section) is equal to the superficial area of the barrel, less the cross section of the core divided by two. The longitudinal section of the spring divided by its thickness gives the length of the spring.*

Here we have not taken into consideration the inner free coils of the spring. The inner end of the spring, however, has so much influence on the calculation that we cannot neglect it. It can be considered in two respects. The first is, in the case of a spring like Fig. 1, to add the free lying coils to correct the cross section of these ends to the cross section of the core or barrel center and otherwise to calculate as above described. Thereby, however, we are departing from the precept that the spring should occupy half the free space. The most correct plan is in any event to consider the innermost coil of the spring in Fig. 1 as bent in the form in which it is shown in Fig. 5. The end of the spring that in Fig. 1 has one coil now has one and a half coils. In other words, the spring, although in the condition usually regarded as relaxed, already has half a coil wound. This may not always be correct, but can be taken as an average.

This half a coil the spring must and cannot

*The length of the spring is measured by fastening a thin thread into the inner hole of the spring, then the spring is laid on a yielding surface (six to eight thicknesses of paper), the thread runs between the coils of the spring, on the whole an alarm-clock glass is pressed and the thread drawn tight. This process gives the length of the spring with an excess of a few millimeters.

ROCKFORD WATCH CO.
ROCKFORD
ILLINOIS

ot run down. If, therefore, six practical
ils remain available we must take the dif-
ference between the two ring shaped springs
Figs. 1 and 2, not as above given, as six.
it as six and one-half coils.

Example: In a barrel with a clear di-
meter of 15 mm. and the prescribed collet
core thickness of 5 mm. a spring to fit
properly is to be inserted; the spring is to
part six complete revolutions to the bar-
rel. How thick and how long must the
ring be? The appended figures, 1 to 5,
e made in double size.

The superficial area of the barrel, the
dus of which is 7.5

$$\pi r^2 \times n' = 176,625 \text{ sq. mm. (1)}$$

The cross section of
e collet, the radius
which is

$$r = 2.5 \text{ mm., is}$$

$$\pi r^2 \times n' = 19,625 \text{ sq. mm. (2)}$$

The free area in the
rrel is, therefore, . . . 157,000 sq. mm. (3)

The half of the free
rface in the barrel,
hich shall be covered
the spring, and is

FIG. 5.

erefore equal to the
ngitudinal section of
e spring is conse-
quently 78.5 sq. mm. (4)

In order now to as-
tain the difference
y the breadth of the
vo ring surfaces (b
d c, Figs. 1 and 2)
e radius $a + c$ (Fig
o) of the wound spring
ust be calculated.
he circular space in-
osed by the circum-
rence of the wound
pring is obtained by
dding the cross sec-
on of the core (result
) and the cross sec-
on of the spring (re-
ult 4) together; this
ves 98,125 square
illimeters. A circu-
r space of this extent
therefore also the
ound spring in our
xample) has a radius
i 5.6 mm. Deducting
rom this the radius of
he core, = 2.5 mm.,
e find the ring
readth of the wound
pring, which is

The ring breadth of
he completely relaxed
pring we find when,

from the radius of the
barrel, $K a b$ (Fig. 1),
we deduct the two
hitherto unchanged
values $K = 2.5$ mm.
and $A = 3.1$ mm.

Therefore,

$$\text{Radius } K a b \dots\dots\dots = 7.5 \text{ mm.}$$

$$- K = 2.5 \text{ mm.} + A$$

$$= 3.1 \text{ mm.} \dots\dots\dots = 5.6 \text{ mm.}$$

Ring breadth (b) of the
relaxed spring = 1.9 mm. (6)

According to this,
the difference in the
breadth of the two ring
surfaces amounts to 1.2 mm. (7)

The ring c must con-
tain $6\frac{1}{2}$ more coils
than ring b. Each of
these coils is equal to
the thickness of the
spring. This is ap-
proximately 0.185 mm. (8)

The longitudinal sec-
tion (thickness times
length) of the spring
is (result 4) ascer-
tained to be 78.5 square
millimeters. This cross
section divided by the
thickness gives the
length of the spring as

$$425 \text{ mm. (9)}$$

For other barrels having the same num-
ber of revolutions the relations of thickness
and length of springs is in the same ratio
to the foregoing results as the diameters of
the barrels are to the diameter of the ex-
ample, consequently to 15 millimeters. It
is easy therefore to compile a table in which
the clear diameter of the barrels, graded in
half millimeters, may be, supposed to be
given.

Diameter d, of the barrel mm.	Thickness of the spring 1/81 d 100ths of mm.	Length of the spring thickness $\times 2300$, mm.
8	9.9	228
8 $\frac{1}{2}$	10.5	241
9	11.1	255
9 $\frac{1}{2}$	11.7	269
10	12.3	283
10 $\frac{1}{2}$	13.0	299
11	13.6	313
11 $\frac{1}{2}$	14.2	326
12	14.8	340
12 $\frac{1}{2}$	15.4	354
13	16.0	368
13 $\frac{1}{2}$	16.7	384
14	17.3	398
14 $\frac{1}{2}$	17.9	412
15	18.5	425
15 $\frac{1}{2}$	19.1	439
16	19.8	455
16 $\frac{1}{2}$	20.4	469
17	21.0	483
17 $\frac{1}{2}$	21.6	497

This table applies, however, only to
springs that are perforated on the outside.
Where a bridle is used with the spring this
bridle, directly and indirectly, deprives the
spring of space. With a good bridle that
occupies but little space the spring must be
selected *one* number; in the case of a bad
bridle that takes up much space *two* num-
bers thinner and somewhat shorter.

According to this it should be easy to
select a well-fitting spring, especially if the
watch spring manufacturers and supply
dealers would do their share towards im-
provement. They need only to give up the
former classification, according to "force"
and (provided that the measurements that

I have given are correct) to pack their
springs, in addition to giving the breadth,
according to the following statements:
"Thickness, 18 $\frac{1}{2}$ hundredths of a milli-
meter; length, 425 millimeters; fitting in
barrels of 15 mm. clear diameter for six full
revolution."

Also, when the springs, as hitherto, are
sent out too long (I always found my good
springs, according to above table, 20 to 25
per cent. too long) I consider the statement
of the actual length very necessary. The
excess can then easily be measured off from
the outer end. I consider it better, how-
ever, to have the length in the correct pro-
portion to the thickness. When we are then
compelled to put in a thinner spring it will,
it is true, not fill out the barrel; that, how-
ever, contrasted with existing conditions, is
by no means so bad; among 100 watches of
the ordinary run we usually find at least 95
in which the springs overcrowd the barrels.

So much regarding the installation of new
springs. What are we to do, however, with
old, ill-fitting springs, the replacement of
which cannot be justified to the customer?
Measure their thickness and determine the
deviation as compared with a proper spring,
with the help of the table. The presence of
a possible bridle must also be taken into
consideration, as indicated above. If the
spring is, for instance, 5 per cent. *too thick*,
it must be made 5 per cent. *shorter* than is
given for such a barrel in the table. Meas-
uring the length, it is true, is not very con-
venient; after a time, however, we shall
have become familiar with the appearance,
as illustrated in Fig. 5, and can undertake
the shortening of the spring by sight meas-
urement.

Before anything can be done in this re-
spect it will, however, be necessary to have
a discussion in which especially the spring
manufacturers should participate and at
which, above all else, they should state, ac-
cording to what principles they have hith-
erto determined the proportion between the
thickness and the length of the springs.

One more suggestion regarding the col-
let or barrel center. These cores in the
cheap watches are made thinner now than
formerly. To this must be added the fact
that the hook is milled out of the core. The
advantages of such a hook (its solidity and
the spiral shape of the core I by no means
overlook; but the spring often presses so
tightly against the lining or bushing of the
barrel as to cause the watch to stop. This
defect frequently does not manifest itself
until we insert a new, thinner (and therefore
more flexible) spring. The old thick and stiff
spring did not hug the core as closely as
the new one. The collet or core in our
example might safely be made 6 mm. thick
instead of 5 mm. The measurements of the
spring in such a case would require but
slight modification.

Editor's Note:—The above proportions
which have been laid down have omitted
the consideration of tapered springs which
are used at the present time by certain
manufacturers of very fine watches.—H. R.

C. L. Marlence, San Bernardino, Cal., has
been visiting towns in the vicinity of that
city in the interests of the Optical & Jew-
elry Mfg. Co., a new concern.

NEW YORK: 21 MAIDEN LANE

CHICAGO: HEYWORTH BUILDING

Harlem's Curfew Again Tolls the Knell of Parting Day.

FIFTY years ago the good housewives of Harlem, N. Y., set their little old-fashioned clocks by the curfew bell which stands on a lofty hill in Mount Morris Park. Delinquent youngsters, too, with a predilection for staying out after dark, were summoned home as the curfew tolled the knell of parting day. The bell was later used as a fire alarm, and subsequently was silent for a long time until, in compliance with the wishes of old residents, a fireman from a nearby engine house rang the curfew, as of old, every day regularly at 8 A. M., noon, and at 9 P. M.

This continued for a time, but a spirit of indifference again prevailed, and once more the old bell was silent for 10 years until, Monday, Aug. 13, the Fire Commissioner, acting in accordance with a petition presented by Harlemites, again put into action the ancient tocsin. Now, by an electrical arrangement, the bell will be sounded every day as formerly, simply by pressing a button in fire headquarters.

The Time in Many Cities.

LARGE crowds have been attracted to the Broadway windows of the J. P. Hod, Jaccard & King Jewelry Co., St. Louis, Mo., by the installation of a universal clock with 11 dials, showing the time in 20 large cities of the world, including St. Louis. The time may be seen instantly for each of the following cities, besides St. Louis: Paris and Vienna, Berlin and Rome, London and Valencia, Spain; Washington, D. C., and Ottawa, Canada; Tokio, Japan, and Adelaide, Australia; Peking and Hong Kong, China; Manila, P. I., and Port Arthur, China; New York and Valparaiso, Chili; Mexico City, Mexico, and Bismarck, N. Dak., and San Francisco, Cal. The clock measures 42 inches in diameter and weighs 200 pounds. It is built entirely of steel, with bronze gears. The hands of the large dial operate those of the smaller dials synchronously, and the delicate construction assures accuracy on all dials. Each dial is half black and half white to represent day and night, and each case presumed to extend from 6 P. M. until 6 A. M. The dials show spaces for each of the 24 hours, and it takes that time for the hour hand to make the circuit.

As in other clocks the minute hand revolves once in each hour. When it is 3:06 P. M. in St. Louis the clock shows it is 9:06 P. M. in London, 5:07 A. M. in Manila and 9:05 P. M. in Paris.

Charter Members of Colorado Horological Society.

THE Colorado Horological Society, which was recently organized, is working diligently for the technical and practical improvement of watchmakers and the promulgation of matters relating to horological science. The accompanying photograph shows the majority of the charter members of the new local organization in Denver. Among the members of the society are many master watchmakers. Emil Rose, president of the society, has for years been a personal friend and fellow workman of Mr. Church, master mechanic of the Waltham Watch Co. Mr. Rose is now delivering a series of lectures on the lever escapement. The membership also includes Irving B. Scott, Antone Kauffman, R. M. Beaman, J. C. Cottrell, Albert Moeller, W. C. Hansen, N. C. Nielsen, Max Garmatter, F. H. Maxwell, George Geer, J. L. Dahlin and J. L. Hansen.

The educational features of the organization are being emphasized and numerous lectures by the members will be delivered from time to time. It is believed that with well directed efforts the standard of watchmakers will be considerably elevated. All communications to the society should be addressed to Charles B. Krueger, assistant secretary, suite 1, Londoner block, Denver.

An attractive clock will shortly be installed in the tower of the proposed building to be erected by the Mission Savings Bank, in San Francisco, Cal. The base of the clock tower will be an exact reproduction of the old Mission Dolores, one of the oldest landmarks of the Mission, which has been ingeniously worked into use for a modern banking institution.

The Old Venice Clock Showing the Three Wise Men in Porcelain.

THE famous old astronomical clock in St. Mark's Square at Venice has been spoken of in these columns before, but it was not until recently that we were fortunate enough to obtain a photograph taken just at the time when the Three Wise Men of the East were passing in obeisance before the Madonna seated in a niche above

A FAMOUS CLOCK IN VENICE.

the large dial. The three "Magician Kings," as they are called, are raising their hands to salute the Virgin holding the infant Jesus in her arms. An angel blowing a trumpet precedes them. This procession appears only at a certain hour of the day.

The hours are struck by the celebrated "Moors of St. Mark" on a large bell, which is not visible in the photograph, as it is situated on the top of the tower. The "Moors" are large figures of bronze and the story goes that in the 16th century one of them with a blow of his mighty hammer smashed the head of an imprudent sacristan who ventured too near to these terrible automatons to observe their functions.

This clock, constructed in 1495, is a very interesting movement of early skill in the construction of large complicated clockwork.

The stock of Abraham M. Slutzker, Johnstown, Pa., has been sold out by the constable to meet the demands of creditors.

IN justice to yourself and to the welfare of your business, *don't buy your Fall stock of watches* without keeping in mind that in the 7-jewel field the new re-modeled Ingersoll-Trenton is the only *one* sold exactly as Jewelers want *all* watches marketed.

- (1) The "I-T" is, without exception, the best 7-jewel watch ever built. An examination will prove this.
- (2) It is sold only through responsible jewelers and only direct to the retail trade.
- (3) The prices are absolutely restricted, guaranteeing a fair profit.
- (4) It is the most extensively advertised of any watch ever put on the market. Every "ad." reads: "Sold by responsible jewelers only."

No jeweler should overlook the article in his line which is most prominently before the public.

The coupon in the corner will bring full information of great interest to every jeweler who can get these goods.

STORE KEEPING DEPARTMENT

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

An Airship Window Display.

Prepared expressly for The Jewelers' Circular-Weekly.

UNIVERSAL interest is centered just at present in the problem of aerial navigation. Therefore this is an opportune

method of doing this is herewith illustrated and explained:

Fig. 1 represents an ordinary cardboard

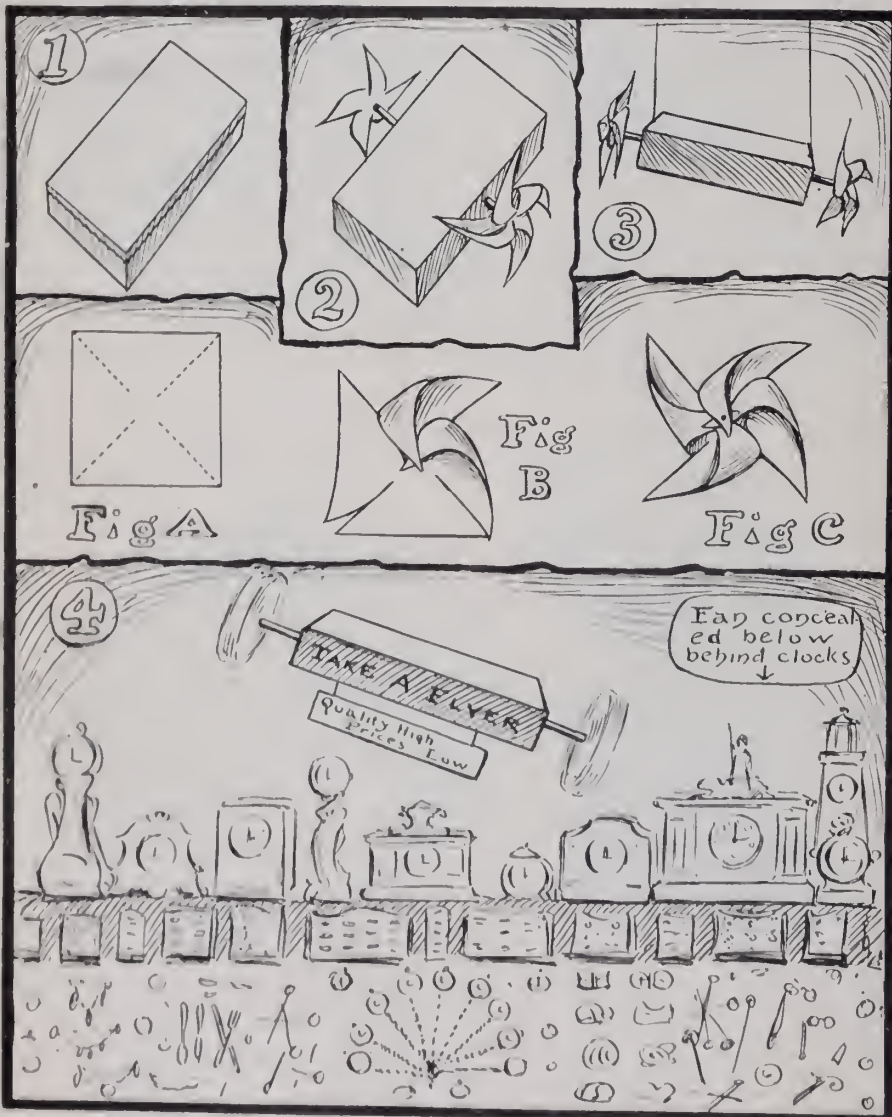

DIAGRAM SHOWING HOW TO ARRANGE THE AIRSHIP DISPLAY.

time to use an airship device to exploit your window work, and it will prove to be an unusually attractive feature. A simple

box. A long flat box, such as shirts are usually packed in will answer the purpose very well. Cover this box with gauze,

pasted on smoothly in order to give it appearance of canvas; run a dowel stick (one of those light round pieces of wood such as can be purchased in any hardware store for five cents or less), through the box so that the ends project on either side. Fasten pinwheels made of silver gilt paper to both ends of the stick, as shown in Fig. 1.

Figs. A, B and C show the method of cutting and folding paper in making pinwheels, which, although very easy to do might be confusing to anyone not instructed. Fig. A is a sheet of stiff paper, the dotted lines showing where to cut. Fig. B is the same, with ends folded in. Fig. C shows the pin inserted, forming a complete pinwheel ready to be attached to the dowel stick.

Fig. 3 shows the "airship" suspended by thin wires from the ceiling. If very thin wire be used it will be almost invisible. Arrange in different lengths so the "airship" will tilt to one side. This creates an appearance of the entire apparatus moving when your fan from below is trained on the pinwheels and the current of air sets them in motion, incidentally swaying the box representing the "airship."

The fan should be screened from the view of passersby; this can be done by placing large clocks or vases so that they will hide it. It is important to hide the source of power as the mystery of the motion is one of the main points of attraction in all moving shows.

Fig. 4, which gives a general outline of the window, shows how this can be arranged. The great advantages of this display are that it leaves the entire base of the window free for use in displaying goods, and, as the tendency of people is to look down, after glancing up, after viewing the attraction they must see the goods shown and will possibly become interested in them.

The expense of this particular mechanical display is virtually nothing, excepting the time required to construct it. It may be built during leisure moments and made ready for use when the window is dressed.

To Shop Here Is a Round of Pleasure.

Storekeeping Department.

Personality—Publicity—Profit.

Address of STEELE F. ROBERTS, of E. P. Roberts & Sons, Pittsburg, Pa., before the Convention of the American National Retail Jewelers' Association, Omaha, Nebr.)

(Continued from issue of Aug. 18.)

THE fact is that while the manufacturer, wholesaler and retail dealers in other lines turn their capital over from five to 10 times a year, the retail jeweler barely turns his capital over once. The average jeweler we will say makes a profit ranging from 25 to 40 per cent., and on a few high-priced articles 50 per cent.

Now, step out of your store and see what profit made in other branches of the retail business. As an illustration, send your wife out on a shopping tour to a first class department store in any large city. She buys a hat or bonnet and is charged from 100 to 500 per cent. profit; a dress, gown or coat, and pays from 100 to 200 per cent. profit; shoes, gloves, hosiery, trimmings, etc., at 50 to 100 per cent. profit; in fact, she receives returning home \$500 worth of goods that really cost the dealer \$250.

A jeweler wishes to build a new house and hires a contractor for a new home. A contractor bids it at a profit of from 15 to 25 per cent. and for a dollar of invested capital—all sub-contracts. The jeweler must have a piano, furniture, carpets, curtains, pictures and china for the new home, and pays the dealers 50 to 150 per cent. profit for these.

As a rule jewelers are good liver, and the wife explains the orders to butcher, baker, grocer and market man, and you freely give up for these necessities the same 50 to 100 per cent. profit. Now comes the head of the firm, the jeweler himself, and he must be well clothed and groomed; in fact, he must always have a prosperous air about him; that's part of the business, and a very important part, too. He goes and buys an overcoat, suit of clothes, hat, shoes, shirts, neckties, etc., and gladly hands out to the gentlemanly dealer a profit of 50 to 150 per cent.

Gentlemen, every stitch of wearing apparel you own has paid the maker and dealer 50 to 150 per cent. profit; nay, more yet from the day you are born until you shall be laid away in the earth others have and will reap from your very existence a profit of 50 to 200 per cent.

Fellow jewelers, there is no guesswork about the profits mentioned in other lines of trade; they have been verified in all the large cities; my figures do not lie; they are cold, unadulterated facts. I admire the sagacity and enterprise of the merchants who secure these larger profits. It is certainly no robbery or crime to get 100 per cent. profit in retail merchandising. The Scriptures teach us that the man who received five talents returned 10 to his master. Now, gentlemen, in view of all these facts and figures, why should we an intelligent body of men invest our capital and devote a lifetime to acquiring the skill and knowledge necessary to efficiently conduct the jewelry business, and after toiling mentally and mechanically for a period of 25 to 50 years be rewarded in the end by having eked out a mere living or small competence, while our friends in other lines of business with less capital and perseverance less brains have become wealthy? Why the difference in results? I'll tell you. Your friends in other lines of business had the assurance and business acumen to ask and insist on a legitimate profit of 50 to 100 per cent., while the jeweler, so dead anxious to make a sale, takes an old profit from 10 to 40 per cent., and then even waits a year for payment. Statistics show that the fixed charges or actual cost of selling goods in the retail business is from 18 to 30 per cent., depending on the character and volume of business.

Granting these figures to be accurate, then whence comes the glory, honor or hope of future reward to the jeweler who knowingly sells his goods for a less percentage of profit than pays his fixed charges or running expenses? If merchants in other lines of business turn their stock from five to 10 times a year and receive a profit of 50 to 100 per cent., why should the retail jeweler, who barely turns his stock once a year, sell his goods at a profit of 10 to 40 per cent.?

Many articles bought from a jeweler, as a diamond ring, watch, gold jewelry or sterling silver, last the buyer a lifetime and have an intrinsic

value, while goods in other lines are bought and replaced 10 to 100 times and have no inherent value, yet the jeweler with his large capital and limited business receives the lesser profit. I am from Pennsylvania, "but show me" any large number of men that have made fortunes out of the retail jewelry business. How many millionaires have we in our craft? How many delving in diamonds, gold and silver have struck a lead that netted them in a lifetime a fortune of \$100,000 to \$500,000? Even our friends, the jeweler and silver manufacturers, look well after their end of the profit and take from us a rake-off of from 50 to 60 per cent. gross. The larger our business the greater the volume of goods we buy from the manufacturer and carry over, so that at the end of each year we have our surplus and profit in accumulated stock, while the manufacturer has his profit and surplus in our cash.

I have no doubt they have their troubles, too, but I have always thought the manufacturers had the best end of the jewelry proposition, and have repeatedly told them so, but the only redeeming feature about the matter is they know better how to spend our money and get more out of life than we ever could, and I really have no regrets, for after all they are as a whole a very honorable lot of gentlemen to do business with.

On the quiet, Mr. Retail Jeweler, I will tell you a secret. If you would be as wealthy as a manufacturer "decrease your stock one-half" and increase your profits one-half, and next year you can drive to the jeweler's convention in a 10-cylinder car. In times of depression, when there is no demand for jewelry, your stock has no real market value, yet there is always a market value for dry goods, groceries, hardware, iron, glass, steel and other commodities.

In comparison to other lines the jewelry business is a hazardous business, spasmodic and intermittent, for when the people want jewelry they will pay the price for it, and when they don't want it, it is no inducement at any price. While some of our goods are necessities, yet the greater part of a jeweler's stock is composed of luxurious articles pure and simple, and should pay the dealer a large profit commensurate with the risk consequent upon change of style and fashion.

I have often asked, "Why the small profit and keen competition in the jewelry business?" Is it because the goods are easy to get, easy to pay for, or is it because we are afraid of our neighboring competitor? We jewelers sometimes get the impression that our competitor across the street or around the corner is a dishonorable man, a great price cutter, but as we meet him face to face as many of us have done at this convention we find him to be just as honorable a man and merchant as we are and just as anxious to get a good profit.

We often imagine that competition is an unscrupulous friend going about seeking whom it may devour, but it is not the case. Good, clean, honorable competition is a stimulus to the trade. It keeps us from falling into a rut, shakes up the dry bones, puts ginger, snap, energy into the business, keeps us on the alert, gives us better stores, cleaner stocks, handsomer window displays, makes us more courteous and obliging and is the keynote, the touch-stone that fixes the ambition to make our stores the scene of perfection, the embodiment of all that is rich, rare and beautiful in gold, jewels and art.

The jewelry business is peculiar. Think of the faith and confidence expressed in you and the reputation of your establishment when an absolute stranger comes into your store and places in your hands for repairs an article of jewelry valued at several hundred or thousands of dollars without asking for a receipt or acknowledgment of any kind. The public believe you to be honest, reliable and trustworthy because you are a jeweler.

The jewelry business is one of small as well as great things, and more work is done and attention given its customers gratuitously than any other trade. As judge and jury in giving opinion and appraising value of precious stones and jewelry, the jeweler performs a service gratis which, were his calling a profession instead of a trade, would entitle him to an income equal to that of a corporation attorney. Every jeweler is a philanthropist.

The greatest evil of the jewelry business is our buying, which tendency appertains to the small as well as the large dealer, for as each year's balance is made up they both find that all their profit and surplus is locked up in accumulated

stock, and like the running brook it seems to go continuously.

Fellow jewelers, there is something radically wrong with the profit end of the retail jewelry business. Is it spinal trouble, lack of nerve, misunderstanding among ourselves or want of organization?

We need an army of retail jewelers who will "stand pat" for a fair profit. We need a captain of the jewelry industry in every city and town who will organize a company of "stand patters" and lead them to conquest and victory under the banner of "Better Goods and Better Prices." Never mind the department stores or the sharks or fakers in the business. Stand pat. The name and reputation of your firm will command a profit and trade that they can never attain.

Every city and town in this broad land should have a jewelers' club. They are the hope and salvation of the trade, and I only regret that I have not the time to tell you of the remarkable success of the "Pittsburg 24-Karat Club," organized this year.

Now, fellow jewelers, if we have not made adequate profit from the jewelry business the fault is with us, and it is within our power to retrieve the loss. Why not come together and be of one mind on this question, loosen up, get busy, cultivate the fraternal spirit; and mentally resolve that we will eliminate all price cutting, vanish all ill feeling, petty jealousies, tale bearing and all the unpleasant things that go to dwarf our business manhood.

Let us rise to a higher plane of commercial integrity and honor among ourselves and be big enough and broad enough to give to others the benefit of our knowledge and experience and appealing to "the good that is in every man"; may we out of the abundance of our hearts scatter sunshine and good cheer in our paths.

This convention will be an epoch in the history of the jewelry trade of this country, and the fruits of its organization and benefits of its deliberation will be an inspiration and a textbook to the retail jewelers in every city, town and village in this land. So let us lay hold and discuss the greater problems as they are presented and delegate the less important matters to the State and City organizations during the year, citing all the shortcomings of the retail jewelry trade.

My message to you may have had a pessimistic tone, but such was only intended in an explanatory way. I come to you from the east as a harbinger of glad tidings and great joy, proclaiming the gospel of personality, publicity, profit and prosperity. I come knocking at your door as a herald of optimism to tell you of the glorious possibilities of the retail jeweler and the fatness of milk and wine and honey that shall be poured upon you until your cup of business joy runneth over. The dark clouds of depression that have hung over the jewelry trade during the past two years are drifting by, and the dawning light of prosperity is glimmering on the horizon.

Good times; good times are surely coming for every jeweler in the land. From the east echoes the clash of iron as the mills throb and pulsate—resesmer furnaces paint their glow in the sky, beaten paths to the mills are filled with happy workmen, empty cars are being laden, idle labor is being employed, ships filled with our products are sailing from every port, commerce and industry thrive on every hand and a million voices proclaim, "Prosperity is coming."

From the cotton fields of the south comes the song of plenteous crops as they gather the products of the forest, field and farm. The smoke of mills, hum of factories, and valleys spouting oil, tell the gladsome story of fat prices and easy money to the dwellers in Dixie land—"Prosperity is coming."

In the north we hear the creaking hoist of shafts with their loads of ore. The slush and grind of mill and smelter. The sound of pick and shovel from the miner's prospect hole, and everybody's hussy taking gold and silver to the mint, and there's such a lot of coin loose that the hardy workers cry, "Prosperity is coming."

The sound of harvest home comes a stealing from the west. Their humper crops of corn and wheat, they tell us, is the best. The cattle on a thousand plains are gathered from far and near. The luscious fruits from tree and vine are now o'er the world in transit. The farmer with his garden stuff and wagon loads of wool, rides home in his automobile and cries to his banker as he dashes by—the west has all the money—Prosperity is here!

[THE END.]

The Golden Opportunity.

Address of E. M. LUNT, of the Towle Mfg. Co., before the American National Retail Jewelers' Association, at Omaha, Nebr.

(Continued from issue of Aug. 18.)

LEANLINESS is quite common in jewelry stores nowadays, but order and symmetry are comparative strangers and comfort and convenience deny yourselves and your customers even in planning and fitting of new stores. I think in the last 50 years no trade has made so little progress as ours in respect to these matters of display.

Compare the usual jewelry store of to-day with that of two generations ago and you will find it exactly the same array of counter cases and wall cases. The style of wood may have changed from dark walnut to mahogany, but new floor plans, furnishings, equipment for attractive arrangement, easy, quick and complete demonstrations of a given line, are only to be found in one or two stores throughout the country. The grocers, furniture dealers, the carriage makers, even hardware dealers, everywhere have outstripped us in bidding for the public's surplus cash through improvement in this first medium of approach.

Let me illustrate. Years ago the grocer sold his crackers from barrels hidden under his counters in the rear of his store. To-day crackers occupy shelves in attractive piles of convenient packages, in plain view of every purchaser, and what is the result? Statistics say that the cracker business has increased 15-fold in the past 10 years. Jewelers have had one object lesson in the art of display. I refer now to the cut glass line of your business. How many of you find that this line doubled in sales and profits in a prominently and conveniently shown in a room by itself, in full view from the store, but lined off and effectively arranged? Do you suppose for a moment that these cut glass rooms are into such general use because of the demands of customers? On the contrary, that particular line flourished because of the improvement in handling, and every line you have will respond to similar treatment even more satisfactorily.

Now, in contrast to the grocers' crackers, let us look at your silver. How does your display differ from that of your grandfather's? He showed his spoons wrapped up in sets—so do you, in a show case—a mixed lot. He had a few sugar spoons and the like scattered about in the same kind of show case, and so do you—likewise mixed up in particular order—no relation to anything. For this shown does not recommend itself or suggest anything to the looker. It rather seems to wait wearily for someone to draw it from the show bag.

The sugar spoon should be displayed next to the berry spoon that matches it in design, in such a way as to call attention to the berry spoon as a most desirable addition to the customer's table service. In short, all pieces of a silver pattern should be displayed together and should be so accommodated by the modern store fixtures that a whole outfit of each design carried may be quickly and easily seen by the prospective purchaser. This, too, in a comfortable way, so as to invite quiet contemplation and assure a measure of seclusion or freedom from unnecessary interruption. This applies whether your town numbers 2,000 or is a city of the first class.

The jewelry store of the future is not to be a series of separate rooms for different classes of wares; let it be at least divided into booths or bays that will constitute miniature departments. I repeat, show your silver of one pattern together. The old counter case is not adapted to that sort of display. It has two disadvantages—first, it is a barrier between you and your customer. (I like to stand by a customer's side when showing goods, because we both then get the same light on any article that is held up to view and because a certain indefinable psychological something has its passage between the salesman and his customer when they stand shoulder to shoulder.)

Second, the old counter case provides no means of clearly defining and framing off the different lines. The impression a customer gets is therefore somewhat mixed. The most profitable way to show silver flat ware is by means of chests, each pattern by itself. A complete outfit always suggests things your customer hasn't yet bought for her own table, and while she is purchasing for it her present for the bride, she says to herself, "I have a birthday next month and

John has got to buy me those butter spreaders."

The chest helps to discourage shopping for wedding presents, too, that is, it helps you to bring your customer to a quick decision, and not only is it superior for display but it is a better stock keeper. I wish my time permitted a recital in full detail with reasons for all their excellencies for use in the store, but perhaps these hints will be sufficient.

It follows naturally that your attitude in purchasing them should be exactly the same as if you were buying a show case (which you do without a thought of selling it again), for though the chests with contents may be frequently sold, the chest itself is a wise investment as a fixture and with sole regard to the sale of the silver.

Just one more word about display—the store window. Some of you put altogether too much into it. Your customers will see better, understand better and remember, if you show but one, or at most two lines of goods in a window at a time. Let them be well arranged and carefully separated, so that each may carry its message direct to the mind of the looker. The window is advertising space, and you cannot drive clear home a great variety of unrelated points in one advertisement. Better suggest one at a time and change frequently. So much for display.

Now as to presentation, by which I mean argument and solicitation—the means by which you throw your personality, character and knowledge into transactions and gain, hold and defend your share of the surplus which the people have to spend. You have been told often of late by speakers at your conventions, that it is time to quit working at the bench and attend to your business. I want to repeat this, and add the warning that unless you do you may soon be as small a factor in the jewelry business as the cobbler is in the shoe business. You must be thoroughly awake to the need of informing yourself completely about your customers and prospects, as well as about the goods. Then the question will be how to use the knowledge gained in a scientific way for the benefit of your business.

So far in this, as in matters of display, we are largely acting as our grandfathers did. They never bought an article until they "had a call for it." They worked wearily over their benches, with little care or thought of the merchandise until someone came into the door to interrupt their work and inquire for something which, if they had it at all, was possibly hoarded carefully away in the safe. Waiting upon customers who thus presented themselves was perfunctory, much as if they were necessary evils in the business, and to go out of the store, deliberately planning to make a sale, was never thought of, nor is it in any large measure done in our trade to-day. My story of the merchant who created his demand for dinner services depends entirely for its interest on the exceptional nature of the circumstances. This practice of going out after business has become quite common in some lines.

Not long ago a young silk salesman in a central Iowa department store told his employer that the daughter of one of their customers was about to be married and that the trousseau would likely be quite elaborate. The family had made some insignificant purchases from his counter and he was afraid they were intending to send to one of the large centers for the trousseau proper. If the employer would request an opportunity for the clerk to show in the home a line of silks which had just arrived he had great hopes of securing at least a share of the business. The employer accordingly addressed a note to the mother of the prospective bride. The way was opened for the salesman and he spent three days in that home showing not only silks but all sorts of fabrics, as well as hosiery, lingerie and other parts of a bride's trappings, securing by dint of his ability and tact an order totaling \$1,700.

We act as if we thought it undignified to go out into the homes for business. The only undignified job I know is the loafer's job. The only way to be dignified in business is to be thorough. Use your time—use your material—use your opportunities, and you needn't ask your banker for money or advice.

You ask, how shall I get an entree to the home? Well, socially of course, if that can be brought about in a natural way. There are many ways in which you will be welcome there professionally if you are not on a special footing. One hint. Ask your customers to let you clean and repair their silver for them. Offer to get it, to clean it and return it in good order. Then take and keep a list of it. Note the absence of useful pieces and

form your plans for supplying them. You will be well repaid by opening up a market for your silver in this way.

Again, presentation isn't alone mouth talk. Written salesmanship (advertising) is also presentation, and you seem to be largely overlooking that fact. Not that you are not buying space or paper enough and printer's ink galore, but you merely recite the fact that you have a store in most of your advertising. You do not explain any specific thing to anybody or call attention to the desirability of some article of merchandise with interesting reasons—reasons that will impel someone to buy. You do not talk on paper as you do to one who stands at your counter. Some of you scatter—try to cover too much—and so you hit nobody, while others are satisfied to put a mere sign in the paper for weeks at a time and this set up in type by your publisher, exactly like the coal dealer's announcement in the next column. I know, because I have been a subscriber to a newspaper clipping agency which has sent me jewelers' ads. from all over the country for the last two years.

Just try offering one line of goods at a time and see how much more profitable it is. Be sure, too, to clip your ads. from the paper and display them with the goods advertised in your windows—thus again reminding the passer of the ad. and urging him on to further investigate and to purchase. In this way, too, you consistently emphasize the matter in your clerks' minds and the result is a combined effort; the psychological effect upon your trade is easy to imagine. If you haven't the time or experience necessary to write first rate ads., the manufacturers of many lines stand ready with electrotypes prepared by high priced writers which will be freely furnished you for use in your local papers.

These and many other opportunities lie open to you as a class of merchants, and though they seem ever so prosy when pointed out in this rambling matter of fact way, those who claim them for their very own shall find in them the poetry of action—shall find in them the beauty of strength—shall find in them the lure of the race whose trophy shall surely be awarded to the fleet and sure of foot—above all, they shall find the sublime satisfaction of manly achievement.

Then, brothers of the craft, as individuals, too—our pot of gold—our golden opportunity lies, not at the foot of some rainbow where we must locate it ere the sun goes down or leave it forever. Our golden opportunity lies right here at our own feet and faith bids us bend our backs and dig! dig!! dig!!! until we have uncovered its every dimension. The fruit of our desire is ripening on the very tree under which we now stand. Hope cries, "Look up!"—stand on your toes—stretch yourself—reach and climb for that which shall be thine. The way to the Delectable Mountains is the very trail by the side of which we are now camped and love bids us strike our tents, take our brother by the hand, and with a song in our hearts to travel on.

And now, to you, gentlemen of the American National Retail Jewelers' Association, and especially you who have given yourselves since the beginning in untiring service for the good of your brothers—to you who have blazed the way—who have thought, worked, fought and prayed for a forum in which the voice of your people might find itself and utter the truths that should make you free—all praise and honor! Your hands and hearts guided by the Creator have builded better than you knew. By seizing and making the most of the chances that lay next of hand you have carved your notches high up on the arches of the natural bridge that spans the gulf of oblivion—you have proven yourselves worthy of the golden opportunity—life itself.

"We live in deeds, not years; in thoughts, not breaths;

In feelings, not in figures on a dial.

We should count time by heart-throbs. He most lives

Who thinks most, feels the noblest, acts the best. Life is but a means unto an end; that end, Beginning, means, and end to all things—God."

[THE END.]

THE CONNOISSEUR'S HANDBOOK.

Definitions of Some Technical Terms in Gold and Silver Smithing and Ceramics Alphabetically Arranged for Easy Reference.

By Clement W. Coumbe.

(Continued from issue of Aug. 11.)

BRETTESSED CROSS. (See "crossed cross.")
BREWER. A painter of Derby. Later he did capital work in landscapes at Worcester.

BRIARD, Eloi. Was a director at the machines factory, 1733.

BRICHEISEN. An XVIII. century Vienna porcelain painter, later worked at Dresden.
"BRICK HOUSE." This pottery in Burslem, started about 1657, by John ("Brick house") Adams. It was continued by John Adams, and then, by the latter's son, John, till 1757. In 1760 Josiah Wedgwood leased the factory till about 1773, when he moved to his new works, "Etruria." William Adams, son of John, then carried on the works for some years, then sold the place and started the Cobridge factory (William Adams & Co.). "Brick House" is sometimes called "Bell Works" during Wedgwood's occupancy.

BRIEL, Pieter van den (1759). A Delft painter, owner of "Het Fortuyn" (The Fortune) factory. Those pieces marked "VDB" were made, of course, during his administration, and those marked "WVDB" were produced by the widow Van den Briel, who continued the pottery.

"BRIGHT CUT" lines in engraving are the open cuts of the engraver.

BRIOT, Francois. Goldsmith of the second half of the XVI. century. He excelled in chased work. Lovely work of his is extant on pewter, probably models for silverware. His is the finest work of the century. He was employed under Henry II. of France.

Certain pieces of pottery (dishes) of admirable design are discovered from time to time with the name Francois Briot on them. They are reproductions moulded from the beautiful pewter works of this artist.

BRISTOL (delft). As early as in the reign of Edward I. a pottery existed here. In Queen Elizabeth's time it is again recorded. Next century delft was made in Bristol, and the earliest known dated piece is a plate with the initials S. M. B. and the date 1603. Next dated specimen is a delft high-heeled shoe, dated 1722, with initials beautifully formed. For about 80 years Bristol produced delft ware. Till 1777 Richard Banks carried on a delft works at Redcliffe Bank, which later was continued by

Joseph Ring. But he relinquished his work on delft ware early in the XIX. century. Wedgwood earthen ware pushed it out of demand. The pieces consisted chiefly of plates, dishes, Dutch tiles for fireplaces, etc. Joseph Flower started a factory on delft ware soon after Franks. The paste, glaze and color are claimed to be better than the Franks and Ring productions. The decorators at Redcliffe Bank pottery were Michael Eakins, John Hope, Thomas Patience and a certain Bowen. A most interesting fact about Bristol delft ware is that very large quantities of it were shipped to this country, and that most of the existing pieces are held in the United States, especially in New England, and many of the owners, though prizing it, are unaware of its origin.

Characteristics: Enamel has a peculiar green shade, English style of decoration, wreath of flowers and leaves, a fruit-like something is interspersed. It has a dark, coarse body.

An earthen ware pottery was started at the Temple Rocks in 1787 to produce Queen's and other ware like Staffordshire. It was not a success.

Porcelain ware was made in Bristol earlier than 1750, as a specimen exists. In 1770 Richard Champion started a Bristol factory. In 1773 he was using the patent rights for making hard paste porcelain purchased from William Cookworthy, of Plymouth. He obtained an extension of the monopoly from Parliament, in spite of Wedgwood's bitter opposition. The commercial side of the business was a failure, and on or about 1777 he sold out his patent rights to a Staffordshire pottery. Champion had the celebrated modeler, Tebo, in his service.

Characteristics: "The paste is remarkably white and cold-looking, the glaze, hard from its very nature, is also brilliant and glittering."—W. M. Binns. The ware shows, in reflected light, spiral ridges. The pieces consist mostly of "tea, coffee and dessert services, figures and bouquets of flowers, after the style of Vincennes. The common ware is generally blue and white; the best is rich in gilding and painting. The groups are not equal to those of Chelsea in execution, though superior to the Plymouth. The bouquets are exceedingly fine, but the paste is not so fine in color as

the French."—Marryat. Bristol porcelain ware is, of course, scarce, as the period of its production was short.

Marks: The Bristol cross is usual, but several other marks are used. The Dresden "cross swords" were common at all English factories, but in Bristol ware they are usually accompanied by a number between the hilts to distinguish it from Dresden, which is also hard paste, and which it aims to copy.

BRIZAMBURG (France). Near Saintes. According to De Thou, here was erected by Henry IV. a faience factory. "In 1600 Enoch Dupas was at the head of the works, which consisted in faïences sealed or impressed (*imprimées en creux*) with various ornaments and glazed marblings, well incorporated in the glazes; the reverse of these pieces was a plain green."—Jacquemart.

BROACH (Old English). A spit. Sharp-pointed objects of all kinds were called *broaches*. Even the sharp-pointed church spires were so named in church wardens' accounts.

BROCCA, or *broc*. "A vessel with a wide, elongated mouth; a pitcher."—Marryat.

BROCHETTE. An ornamented skewer of precious metal or plated.

BRODRIBB, John and Richard. "Original partners in the Worcester Porcelain Co., 1751."—Jervis.

BROMIAS (Gr.). A drinking vessel of wood or silver, resembling a large Scythian (to which refer).

BRONGNIART, Alexandre. Appointed director of the Sèvres factory, 1800. A brilliant savant and writer on ceramics. Remained at this post 47 years. Was son of the architect who built the Paris Bourse (Stock Exchange). Died 1847.

BRONZE, an alloy of copper and tin, has been in use for a remote period; its adaptability for casting, its durability and color, render this material one of extreme beauty and usefulness. Among the many examples of antiquity are the 1,000 statues of Osiris, found in the temple of Rameses III., and the bands of figure subjects in relief from the Assyrian Balawat gates, now in the British Museum. In Greece *bronze* was wrought with exquisite skill and refinement, and the name of Lysippos (340 B.C.) is usually associated with the finest statues.

"Two beautiful repoussé bronzes, found in 1820 near the river Siris, in Italy, are admirable examples of this period. Many Greek statues have been found in Pompeii and Herculaneum, of which the beautiful statuette of Narcissus is the best known, and many bronze heads are still extant

with the eyes formed of ivory or beautiful stones and jewels.

Etruscan bronzes have a most expressive treatment of incised lines, which differentiates them from the repoussé works of the Greeks. The bronze mirrors with an intricate treatment of classic mythology, and the cista, or toilet caskets, all found, with a few exceptions, at Palestrina, are typical of Etruscan bronzes. The finest example known is the 'Ficoroni Cista' of the third century B.C. Its cylindrical sides are decorated with a representation of the 'Argonauts,' by Morios Plantios, and it is now in the Collegio Romano. Of small decorative bronzes Naples Museum alone has over 14,000 examples, consisting of candleabra, tripods, tables, chairs and couches which, 18 centuries ago, were used by wealthy Roman citizens.

Early bronze equestrian statues are the 'Nero,' found at Pompeii (Naples Museum, D. 175), and the 'Marcus Aurelius' at Rome (D. 175). The four bronze horses, now in front of St. Mark's, at Venice, are probably of the time of Nero. Later examples are the 'Gattamelata' at Padua, by Donatello (1453), the magnificent 'Colleone' at Venice, by Verrocchio and Leopardi, and the 'Luis XIV.' by Girardon, cast by Jean Bazar Keller in 1699, and destroyed in the French Revolution. Many fine bronze statue effigies are still extant, which rival the earlier effigies of Purbeck marble such as the Earl of Salisbury at Salisbury (1227), and the earliest recumbent figures in gilded bronze are those of Henry V (1272), and Queen Eleanor (1291), in Westminster Abbey, by William Torell, goldsmith of London. In Canterbury is the effigy of the Black Prince (1376). The Richard II. and his Queen, in Westminster Abbey, are by Nicholas Broker and Geoffrey Prest (1395).

The Florentine Torrigiano, in 1512, made the beautiful recumbent effigies of Henry V and his Queen, and also the Countess of Richmond, which are in Westminster Abbey, where are also the gilded bronzes of the Duke of Buckingham (1628).

In Rome the recumbent effigies of Sixtus IV (1493), and Innocent VIII., which are the finest of Renaissance bronzes, were by Arnobio Pollajuolo. In 1508 Michel Angelo made the colossal seated statue of Pope Julius II., which was over the door of St. Petronio at Bologna. Benvenuto Cellini (1500-70) was the great Florentine goldsmith; his 'Nymph of Fontainebleau,' a relief in bronze for the lunette over the entrance of the palace, is now in the Louvre, and his masterpiece is the 'Perseus,' in the Loggia dei Lanzi, at Florence, where the 'Birth and Holofernes' by Donatello is also placed. Another eminent master was Giovanni da Bologna, who executed the beautiful fountain with the figure of Neptune at Bologna.

The shrine of S. Sebald at Nuremberg, by Peter Vischer (1508-9), and the figure of the Emperor Maximilian, at Innsbruck, by Ludovico Scalza of Milan, which is enclosed by an elaborate grille and surrounded by 28 large bronze statues of men in armor, are excellent examples of German Renaissance.

Many of the early historical buildings

still retain their original bronze gates. Those of the Pantheon (A. D. 118-38) are still in position; also those of the Cathedral at Hildesheim, with the panels of scriptural subjects in high relief, and the name and date of Bishop Bernward (1015). Early Byzantine gates cast in Constantinople by Staurachios are at Amalfi (1066), and at S. Salvatore, Atrani (1087), enriched in silver damascening.

"The west door of San Zeno, Verona (XII. century), is of wood, covered with panels of repoussé work. Early cast bronze gates in Italy are those of S. Ambrose, Milan (1170), and at Trani, Ravello and Monreale Cathedral (by Bonanno, 1186), having relief panels and bosses upon the style of the door. In 1150 Bonnano cast some gates for the Cathedral at Pisa, which were destroyed, with the exception of one, by fire, in 1596, the west door being replaced in 1600 by a fine work by Giovanni da Bologna.

"Of the Renaissance bronzes the Baptistery gates are the most remarkable, while others are those of S. Peter's, by Simone and Filarcte (1439), the door of the old Sacristy of the Cathedral at Florence, by Lucca della Robbia (the only bronze by this master, 1464-74), and the baldacchino of bronze, 95 feet high, covering the high altar of S. Peter's, and cast from the ancient bronze enrichments of the dome of the Pantheon, by order of Pope Urban VIII., in 1633."—Glazier.

BRONZITE. A stone belonging to the pyroxene group of minerals. It is used in ornament when its fibrous structure or "inclusions" create a chatoyance.

BROUWER, Ary (1699). A Delft potter. M. Havard assigns several pieces signed "A. B." as probably by this master.

BROUWER, Gerrit (1759). A Delft potter of "The Jug" factory. Marks: Factory initials only and various. Thus, "De Lampet Kan," "L P Kan," "lpk," etc.

BROUWER, Hugo (1764). A Delft potter of "De Drie Porseleine Fleschen" (Three Porcelain Bottles). Frequent examples are extant. An interesting plaque representing a sea storm encroaching on Scheveningen is in possession of the Queen of Holland. Initials "H. B.," sometimes separate, sometimes in combination.

BROUWER, Huisbrecht (1679). A Delft potter, at one time owner of "De Porseleine Byl" (The Porcelain Axe). Many pieces with the axe sign emanate from other periods of this factory's activity, of course.

BROUWER, Justus (1759). A Delft potter at "De Porseleine Byl" factory. This factory produced colored ware, but its blue pieces are more noted. Its plate series illustrating herring fishing and whale catching are in good drawing and high quality glaze and workmanship. Those marked "I B" are supposed to be from this master.

"BROWN, in Egyptian art, was the color consecrated to Typhon; in ancient times it was the sign of mourning. Regarded as a compound of red and black, *bistre*, it is the symbol of all evil deeds and treason. In a monastic costume it signifies renunciation. With the Moors it was emblematic of all evil. Christian symbolism appropriates the color of the dead leaf for the type of 'spiritual death.'"—Mollett.

BRUHL, Count. From 1733 to 1763, director at the Meissen factory.

BRUSSELS (faience). "We should expect to see this city occupy a distinguished rank in the ceramics of the Low Countries. This is what the *Journal du Commerce* of March, 1761, says concerning it: 'Philipp Momaers, manufacturer of faience to His Royal Highness, makes at Brussels every kind of faience, consisting of "plate d'épargne," oval and round terrines, in the form of cabbages, melons, artichokes, asparagus, pigeons, turkeys, cocks, hens, eels, butter pots, sauce boats, coffee pots, fountains, basins, mustard pots, pepper boxes, salad bowls, small and great, salt cellars, flower pots, oval and round dishes, plates, fruit baskets, oval and round, of all colors; complete table services, large and small; lusters with eight and six branches, etc., all fireproof.'"—Jacquemart. Doubtless much of this ware must be in collections and attributed to Delft. Veuve Mombaers and a Veuve d'Artoisonnez were also at Brussels. The Sèvres Museum holds a lovely centerpiece by Artoisonnez.

Hard Porcelain.

"Toward the end of the XVIII century a M. Cretté possessed a manufactory of porcelain, of which some pieces exist in the Reynolds collection. Upon one is the monogram E B conjoined. The others have the name only in the inscription: *Ls. Crette de Bruxelles rue d'Arenberg*, 1791. Other porcelains are signed with a B surmounted by the royal crown. One piece bears the name of the decorator, Ebenstein."—Jacquemart. All is very uncertain about the Brussels fabrique.

BRUGES (Belgium). The Sieur Pulinx had an establishment here where high quality faience is said to have been produced.

BRUNELLESCHI, Filippo. Born 1377, was apprenticed to and learned the goldsmithing art. He did brilliant work in stone setting and niello work. From this he went into sculpture and then into architecture. Among his creations are two figures of prophets on the altar of Pistoja. This great artist and designer has been called the founder of the Renaissance. He was the first to make a science of perspective.

BRY, Theodore de. A noted goldsmith. He was born at Lieges, 1528, and died 1598 in Frankfort.

BRY, Johannes Israel de. Son of Theodore de Bry. Goldsmith at Frankfort-on-Main. His creations were as fine as his father's.

BRY, Johannes Theodore de. Son of Theodore de Bry. His beautiful work equalled that of his father.

(To be continued.)

On Nov. 27, 1907, Consul John Steel Twells, at Carlsbad, reported that the largest china ware manufacturers in Austria had formed a trust, with the object of increasing the price of china goods and of establishing two market prices, one for Austria and the other for the United States, it being held that the class of goods exported to the United States differed materially from that sold in the home market. The consul now reports, under date of May 24, 1909, the dissolution of this trust, which he writes should be a matter of much interest to American dealers.

WORKSHOP NOTES AND QUERIES

Answers are also solicited from our readers to the questions published on this page.]
No attention paid to communications unless accompanied by full name and address of the writer.

QUESTION No. 2319.—Testing for Free Cyanide.—*Kindly give me a formula so I can test my coloring solution for free cyanide.* T. F.

ANSWER:—The following tests have been worked out by Fred J. Liscomb, and are recommended for their accuracy and the method with which they are applied: **TO TEST FOR FREE CYANIDE:** *Solution No. 1.*—Prepare a standard solution of cyanide of potassium by using one ounce of the cyanide to each gallon of water. *Solution No. 2.* Prepare a standard copper ammonia test solution by dissolving 1½ ounces of carbonate of copper in a sufficient quantity of ammonia, added slowly to completely dissolve it, and then adding water to make one gallon. This is a blue solution. Cyanide of potassium destroys the blue color. The proportion of free cyanide in the copper solution to be tested can be determined as follows: Measure off one fluid ounce of solution No. 1 (standard cyanide solution). To this add solution No. 2 (copper ammonia solution) drop by drop until your copper solution shows a faint blue tinge. This indicates that the cyanide has been saturated with the copper. Be careful to keep a record of the number of drops of solution No. 2 required to produce the effect. Now take one fluid ounce of the copper solution which you wish to test for free cyanide. To this add solution No. 2 drop by drop until the color conditions are exactly the same as in the standard cyanide solution. Keep a record of the number of drops required in this case also. If the experiment has been properly executed, by waiting for the color to disappear after each drop we should find the value of the free cyanide as follows: Suppose that it required 25 drops of solution No. 1 while it required 30 drops of solution No. 2 to produce the same color in a like quantity of an unknown copper solution which you are testing. Then—remember that solution No. 1 contains one ounce of cyanide to the gallon—you get the following proportion:

$$\begin{array}{l} 25 : 1 :: 30 : X, \\ 25x = 30 \times 1 \\ x = 30 \times 1 \\ \hline 25 \end{array} \text{ or}$$

1½ ounces of free cyanide to the gallon in your copper plating solution. **To Estimate the Metallic Contents.**—Prepare a standard plating solution of, say, four ounces carbonate of copper, eight ounces cyanide of potassium, and one gallon water. Take one-half ounce of the standard solution or one-half ounce of the copper solution which you desire to test. Place each in a

separate test tube. Add to each test tube, drop by drop, dilute sulphuric acid until a precipitate no longer falls, proceeding slowly so as not to get in too much. Then allow the contents of the tubes to settle; this can be hastened by diluting with warm water. To estimate the quantity of metal, compare the height of the precipitate in the two tubes, or the precipitate may be filtered, dried and weighed on scales which will weigh grains. This test is not reliable when used on brass solution.

QUESTION No. 2320.—Silvering Horn and Ivory.—*How can I cover horn or ivory with silver?* S. H.

ANSWER:—Heat the horn or ivory as hot as it will stand, then paint over with a hot solution of gallic acid in water; then with a solution of one part nitrate of silver dissolved in water, and then alternately paint and repaint until the silvery appearance is produced.

QUESTION No. 2321.—To Soften and Harden Jewelers' Buffs.—*What kind of buffs are best for polishing such as fobs and chains? Also how can I produce a soft, velvety surface on the buff, suitable for finishing up small pieces of jewelry?* S. H.

ANSWER:—For small articles of jewelry, such as chains or fobs, a muslin wheel from three to four inches in diameter is best. Get the kind that has one row of stitching around the center. Drive two or three nails through a piece of wood, and with this comb out the buff, when running, until the layers of the cloth become frayed and the wheel feels soft; then use enough rouge to color the wheel a pale pink. To harden the buff again, hold a piece of coarse sandpaper against it.

QUESTION No. 2322.—Gray Stain for Ivory.—*How can I stain ivory to match French gray silver? I want to apply it on handles for French gray silver articles.* G. S.

ANSWER:—To gray-stain ivory two solutions are used. The first one is pyrogallic acid, one part, and water, 20 parts. Lay the ivory in this for about 20 minutes, then allow it to dry thoroughly. The second solution is one part of green vitriol and 25 parts of water. Immerse the ivory in this until it assumes the desired gray.

QUESTION No. 2323.—To Repair Shell Combs.—*How are broken shell combs repaired?* G. I. P.

ANSWER:—To join tortoise shell combs, bring the edges together and hold them in place between hot irons or pincers. The heat must be regulated so that it will not burn the shell. Another way is to level

both edges to be joined together so they will overlap, each one-eighth or one-quarter of an inch; secure them in place with iron clamps and immerse in boiling water for some time. The joints become firmly united together by this method. Do not heat too long, or the shell will be darkened. To polish tortoise shell, rub up first with powdered charcoal and water on a woolen cloth, and follow this with whitening, moistened with water. The article should first be moistened with vinegar. Finish by hand rubbing with dry rottenstone or whitening.

QUESTION No. 2324.—Niello Alloy.—*Kindly give me the composition of what is known as niello, or gorgeous, blue alloy.* N. G.

ANSWER:—The alloy of niello consists of nine parts of silver, one part copper, one part lead, one part bismuth, which are melted together, and saturated with sulphur. This mixture produces the gorgeous blue which has often been erroneously spoken of as steel blue.

QUESTION No. 2325.—Non-Magnetic Alloy.—*There is a non-magnetic alloy used in some Swiss watches to take the place of steel in the hairsprings. Can you give me the formula for making this?* N. M.

ANSWER:—There are several non-magnetic alloys used for this purpose: (1) Equal parts of gold and palladium, copper about 15 per cent. of the whole, and a trace of rhodium and manganese are added; this may vary from 1/10 of one per cent. to five per cent. each. The copper and manganese are added first. (2) Another alloy used to some extent consists of copper, 60 parts; nickel, 20 parts; zinc, 18 parts; lead, one part; tin, one part, and a trace of iron. The proportions may vary a little from the one given without affecting the quality.

A New Flux for Use in Welding Aluminum.

WHILE it is possible to weld aluminum by means of the oxy-acetylene blow-pipe, more or less difficulty has been experienced by the oxidation of the aluminum while the welding is going on. The welding, of course, is nothing but a melting operation, and while exposed to the aluminum oxidizes so that a flux is quite necessary for the success of the process.

A new flux for this purpose has recently been patented by Max U. Schoop, of Bois Colombes, France (U. S. Patent 922,523, May 25, 1909). The flux is composed of the following ingredients: Potassium chloride, 60 parts; sodium chloride, 12 parts; potassium bi-sulphate, four parts; lithium chloride, 20 parts.

The ingredients are melted together and then pulverized for use. The theory of the flux seems to lie in the fact that a mixture of the salts melts at a lower temperature than the constituents. The use of lithium chloride, however, will add much to the expense of the flux.—*The Brass World.*

The oldest jeweler in Lowell, Mass., is said to be Jonathan Johnson, who recently celebrated his 91st birthday. Mr. Johnson still does active work at the bench, notwithstanding his advanced years. He learned his trade as a jeweler in Pittsfield, Mass., but came to Lowell in 1840.

Gold and Silver Solder, either from formulas furnished, or our own. "T. B. H." Alloy, 25c. per oz. Guinea Gold, 75c. per lb. Shot Copper, 40c. lb. We will send tables for alloying without charge. They save figuring

SPECIAL AND IMPORTANT NOTICE

in ordering Plate or Wire, to avoid delay and errors, be sure to state:

FIRST, THE QUALITY—If Silver, Sterling or Pure. (Coin Silver made up only on order.) If Gold—the Karat.
SECOND, THE QUANTITY—If Wire, the Thickness and Length. If Plate, the Thickness, Length and Width.

Regarding the thickness it is **most important** to not only state the number, but also the name of the gauge you are using, as there are 13 gauges and no two alike. The most used by us is the Brown & Sharpe **American Standard**, but we will fill your order from any one by stating which you use.

Try us and you will Appreciate our Squareness, Promptness and Accuracy

 KNOWN THE WORLD OVER

Beautifully adapted for the jeweler's stock and show case display—the New Pocket Edition Gillette Safety Razor is becoming an important feature in the best retail jewelry stores.

The demand over the retail counter is astonishing. Every old Gillette user wants the New Pocket Edition and it makes new friends at sight.

The set consists of handle and blade box, either triple silver-plated or 14-k. gold-plated. The pocket case is of gold, silver or gun metal—plain polished or richly engraved in Floral or Empire designs. It is so neat and compact that it will fit like a card case in the waistcoat pocket or slip into the side of a travelling bag—the blades are fine. Prices, \$5.00 to \$7.50.

For the special use of the jewelry trade, the Gillette Company has designed a tray lined with purple velvet, size of the regular watch tray—contains wells for twelve razors. These trays are made in various hardwood finishes to match the store fixtures and are shipped free of cost with the initial order for a dozen razors. Aside from the sales of the razor, the business in blades is a steady income for a store.

Two additions to the Gillette line this season are the Gillette Brush—a brush of Gillette quality, bristles gripped in hard rubber; and the Gillette Shaving Stick—a soap worthy of the Gillette Safety Razor. The stick is enclosed in a sanitary nickel box: both soap and brush are packed in attractive cartons. They will be welcomed by Gillette users everywhere.
